GENERAL NOTES - SECTIONS - PLANS - ETC -

BLDG. NUMBER

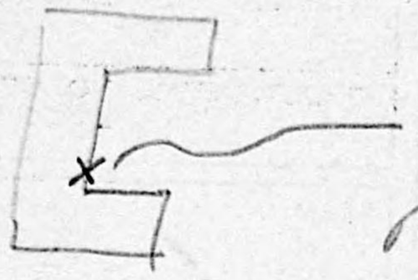
Bldg 28

Fragmentation damage mainly to roof & walls
Complete loss of window glass
Small amount of structural damage observed



10 ft. of tar & gravel roofing torn loose
Reinforced concrete 3 stories

Bldgs. 46-51

Apparently - asbestos cement on wood framing
Concrete floors
All destroyed - Primarily H.E.
Some fire in Bldg. ~~51~~ 46

Cont. Bldg 52

Bldg 52

Construction similar to above (46-51)
Destroyed fire & H.E.

Bldgs 53-55

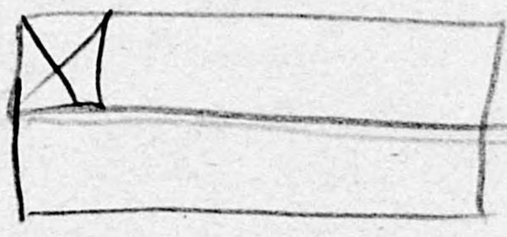
Construction as above
all destroyed
53 by H.E.
54 by Fire

Bldgs 57&8

Construction as above
Destroyed
Fire & H.E.

Bldg 56

Construction as above
structural damage & W.W. cover
& then replaced by corrugated iron
sheets & roof
H again



57A

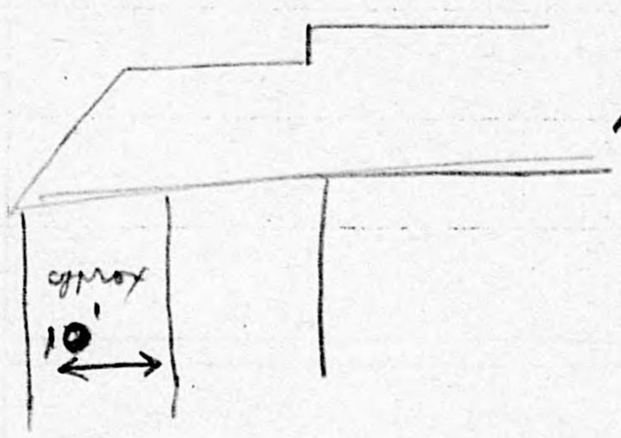
Reinforced concrete
Substructure
Some fire in
roof end

Damage to outside by
fragments - Slight
Probable weakening of
members but no
much structural
damage

Bldg 11 Steam boiler plant

Steel framed
Corrugated iron sheeting - Walls + roof
(possibly repaired)
8 ~~[redacted]~~ boilers (at least 2 in operation 29 Oct)

3 Reinforced concrete stacks
Actual stack structurally damaged
Lightning conductor on stack and at base
Minor roof disturbance only



Bldgs 9+10

Contents similar to 16-18

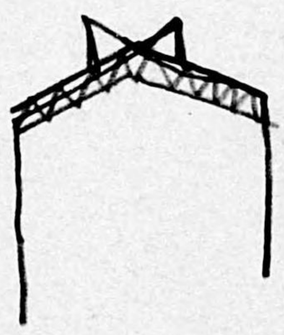
Also similarly damaged - i.e. condition similar now

No 9 Machine shop - grinding of ~~bearing~~ bearings

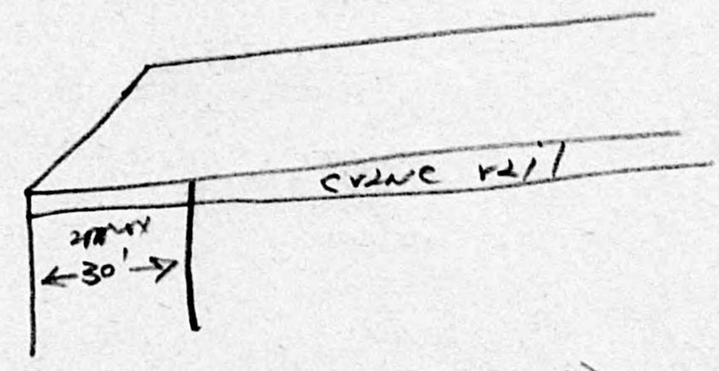
No 10 Pump house

Bldg 7A (Foundry) + Forging
Corrugated iron sheeting on steel frame
Minor roof + wall disturbance

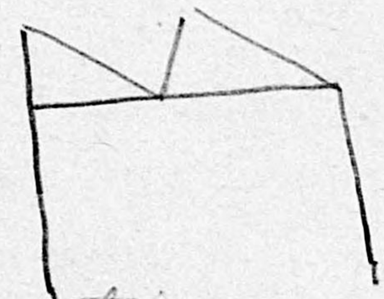
3 Bays



Storage yd served by overhead crane continuing from Bldg at W. end



Southern bay



concrete floor in southern bay

Bldg. in operation 29 Oct.

DAMAGE ASSESMENT

DESTROYED

STRUCTURAL DAMAGE No structural damage (?)

SUPERFICIAL DAMAGE Minor spalling on walls (probably from fragmentation)

ROOF DISTURBANCE

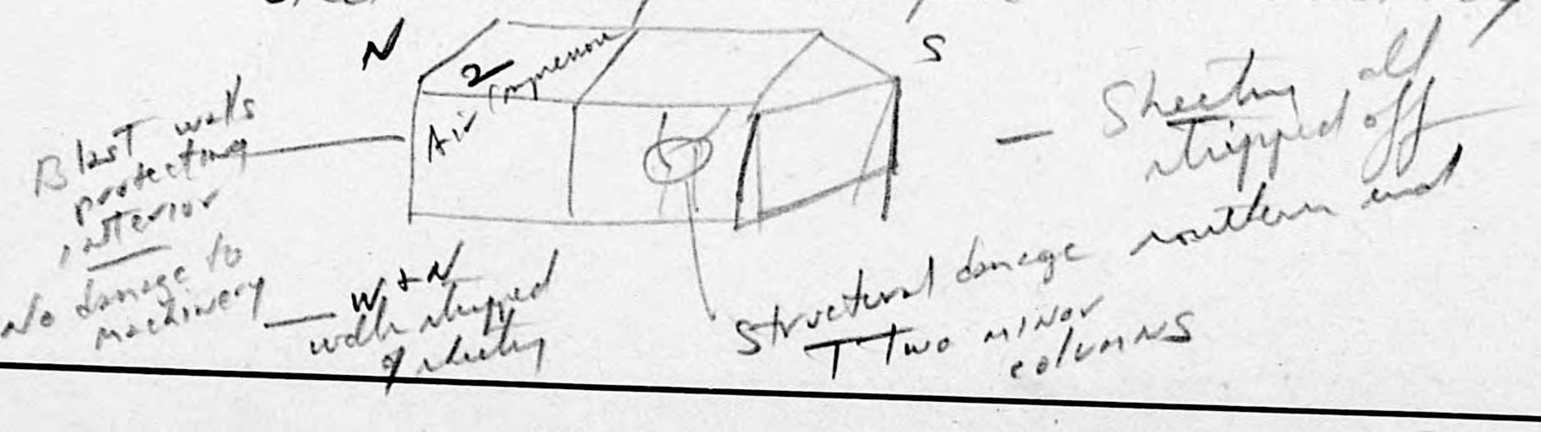
MINOR DAMAGE Window glass blasted out + frames twisted

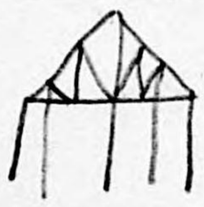
GENERAL NOTES - SECTIONS - PLANS - ETC -

15/ Reinforced concrete
Surrounded by blast wall - blast wall partially burned + blown apart
N. End of bldg. - concrete + reinforcing rods torn around window
Blast walls built around transformers inside of bldg.
- apparently effective

13/ Bldg. destroyed by fire
Wood framing - corrugated iron sheeting

14/ Saved from fire in adjacent (13) by blast wall between.
Steel framing - corrugated iron sheeting





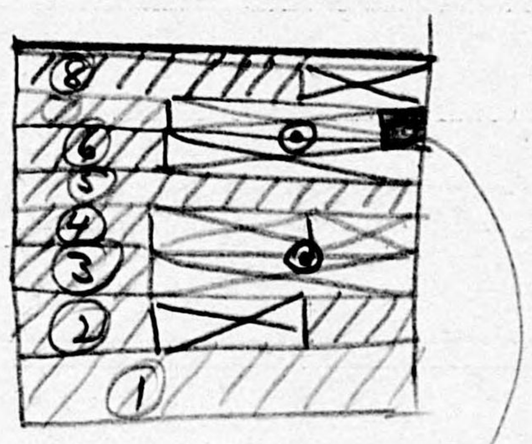
BLDG. NUMBER

Bldg. 12

Constructed like #31

2 floors

1st reinforced concrete
2nd Saw tooth steel frame – asbestos cement sheeting roof
+ glassed in walls with asbestos cement walling



Bay 1 Fermentation + rust of main structural members might render them useless.

" (2) Ditto for superficially damaged part of 2

" (3) ⊙ Circled member bottom + should be removed ensuring structural repair to large upper superficially damaged area.

" (6) ⊙ Ditto above

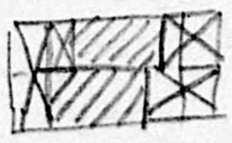
Complete demolishing of roofing + walling

structural damage to reinforced concrete floor

Bldg 26

Wood framing
Asbestos cement roofing
Concrete floor

Completely demolished
Stge. 0/4.



Bldgs 22, 23, 24, 25

All destroyed
Probably similar to #26 in construction

GENERAL NOTES - SECTIONS - PLANS - ETC -

BLDGS. 1 + 2: (Probable Storage)

@ Wood framing
(b) Corrugated asbestos cement roofing & siding
(c) Saw toothed roof framing
(d) Concrete floors
(e) Both buildings destroyed - apparently by HE

BLDG. 3: (Probable Storage)

@ Wood framing.
(b) Corrugated asbestos cement roofing & siding.
(c) Dirt floor.
(d) Complete structural damage.

BLDG. 4: (Probable Storage)

@ Wood framing
(b) Corrugated asbestos cement roofing and siding.

BLDG. NUMBER

SHEET

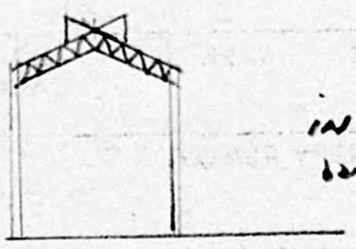
(c) 2/3 (Northern end) structural damage.
(d) 1/3 (remaining) minor roof disturbance patched up.

Bldgs. 5 & 6 (Probable Storage)

@ Similar in constructin to 1 & 2.
(b) Both destroyed.

Bldg. 7A (Forge) PIC-S-713

@ Steel framed structure
4 Northern bays →
5th, Southern bay →



Cranes in two central bays of four.

(b) Corrugated iron sheeting – roof + siding
(c) Storage yd. served by overhead cranes extending from bldg. at west end.
(d) Concrete floor in northernmost bay
(e) Bldg. still in operation – some minor damage to walls and roof has been repaired.

Bldg. 7B (Foundry) PIC-S-714

@ Steel framed saw tooth structure
(b) Asbestos cement roofing and siding on wood purlins – repatched with corrugated iron sheeting
(c) Concrete floor
(d) Two bays at S.W. corner raised above remainder of bldg. To house furnace equipment.
(e) West wing of 5 bays contained fire but no structural members were twisted. All bays superficially damaged. Sheds rebuilt beneath members in eastern end of 3 north bays. South bay repatched at eastern end with corrugated iron sheeting
(f) Loss of glass in roof lights and wall windows throughout bldg.
(g) Structural damage to one roof member in raised portion of bldg.

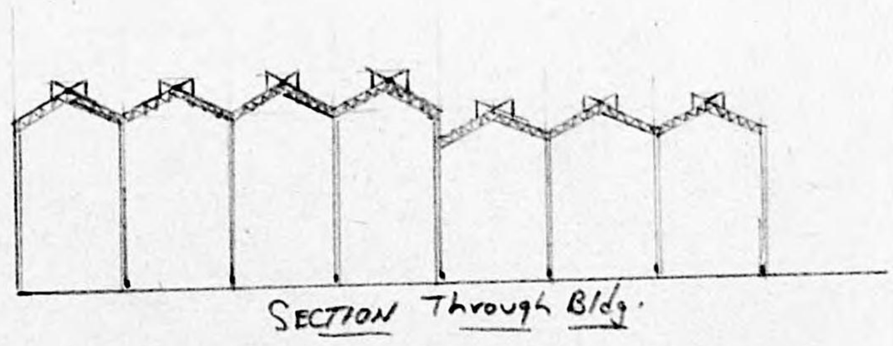
PIC-S-3: 7+8
PIC-S-7: 5

Bldg. 7c (Foundry)

- (a) Steel framed bldg.
- (b) Asbestos cement sheeting on steel roof.
- (c) Glass windows in major portion of walls.
- (d) Concrete floor
- (e) Almost complete superficial damage to walls and roof.
- (f) Two easternmost bays only 25% superficial roof damage - remaining 75% - minor roof disturbance



SECTION Through Bldg.

Bldg. 8 (Shop - values)

- (a) Saw toothed steel frame structure
- (b) Asbestos cement sheeting roof
- (c) Glass window walls + lights
- (d) Concrete floor
- (e) Complete loss of roofing and walling

BLDG. NUMBER

SHEET OF

ⓑ Corrugated iron sheeting replaced over machines at east end of 3rd & 4th bays from the south end of bldg.

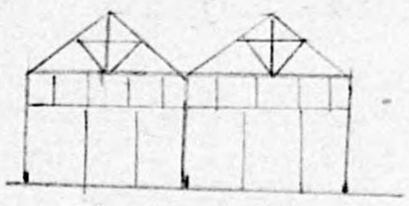
Bldg. 9 - (Grinding Shop)

@ Wood framing

ⓑ Corr. Asb. Cement siding & Roofing

ⓒ Concrete floor

ⓓ Destroyed



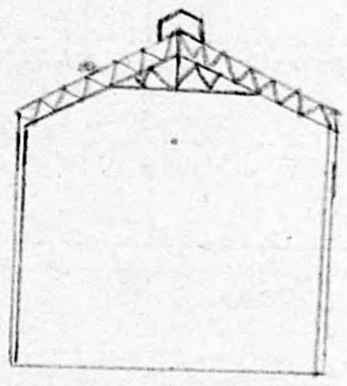
(This type of construction known hereafter as Type I building.)

(See PIC-S-6: 12)

Bldg. 10 - (Pump House)

@ Construction similar to bldg. 9

ⓑ Bldg. destroyed except for small shed rebuilt over principal pumps



Bldg. 11 (Steam Boiler Plant)

@ Steel frame (see sketch)

ⓑ Corrugated iron sheeting walls & roofing (probably the result of repairs)

ⓒ Three reinforced concrete stacks - hole in central stack where aerial torpedo passed through. Also hole at base of stack.

ⓓ Only minor roof and wall disturbance to iron sheeting

ⓔ 8 boilers

Bldg. 12 (Dining Room) PIC-S-7: 1+2

@ Two floors - first floor reinforced concrete walls & ceiling with reinforced concrete pillars for support. (Apparently used as storage floor)

- second floor: saw toothed steel framed structure, asbestos cement sheeting on roof and walls, glass windows in roof lights and wall windows

ⓑ Complete denuding of walling & roofing.

ⓒ Structural damage to small section (about 100 sq ft) of 1st floor ceiling at N.E. corner. (See chart for other damage.)

Bldg. 13

@ Simple wood framing with corrugated iron sheeting covering walls and roof.

ⓑ Bldg. destroyed by fire

GENERAL NOTES - SECTIONS - PLANS - ETC -

Bldg. 14 (Air Compressor Bldg.)

ⓐ Steel framed with corrugated iron walls & roofing. (Sheeting probably result of repairs from previous raids – formerly walls & roof were probably covered with asbestos cement sheeting)

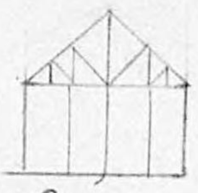
ⓑ Bldg. protected from fire on 13 sy wood & earth blast wall.

ⓒ Concrete floor.

ⓓ Blast walls protecting interior machinery – no damage to machinery

ⓔ Sheeting stripped off southern half structural damage to two lesser members of S.W. wall

ⓕ W. & N. walls of northern half stripped of sheeting



SECTION OF 14

BLDG. NUMBER

Bldg. 15 (No. 1 - Sub-station)

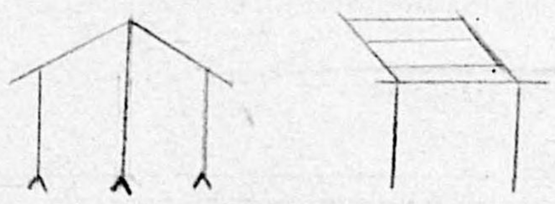
ⓐ Reinforced concrete structure
ⓑ Blast wall (wood filled) surrounding building - partially burned & blown apart
ⓒ Blast walls built around transformers inside bldg. - apparently effective
ⓓ N. End of bldg: concrete and reinforcing rods torn around windows - minor spalling to other walls from fragmentation.
ⓔ Complete loss of window glass.

Bldg 16, 17, 18, 19

ⓐ Two bayed type I bldgs. (see bldg. 9)
ⓑ Concrete floors now used for storage of parts
ⓒ All destroyed

Bldg. 20

ⓐ Bldg. consists of 6 simple wood sheds - about 15' apart, 8' to eaves, 15' to ridge pole
ⓑ Corrugated asbestos cement sheeting (roof)
ⓒ Stanchions set in concrete
ⓓ 2½ sheds could easily be covered with sheeting & used



ⓔ All sheds superficially damaged
3rd shed from W. approx ½ removed (N. end); 4th & 5th sheds partially removed from S. end.

Bldg. 21

ⓐ Type I Construction (see Bldg. 9)
ⓑ Destroyed

Bldg. 22

ⓐ Destroyed

Bldg. 23, 24, + 25

ⓐ Type I construction
ⓑ Destroyed

Bldgs 26 SPIC-S-6:12

ⓐ Type I construction
ⓑ Completely denuded of cover
ⓒ See chart for damage.

ROOF DISTURBANCE

MINOR DAMAGE

GENERAL NOTES - SECTIONS - PLANS - ETC -

Bldg 27 (Head Office) PIC-S-6: 9-11

Steel Frame

(a) Reinforced concrete construction

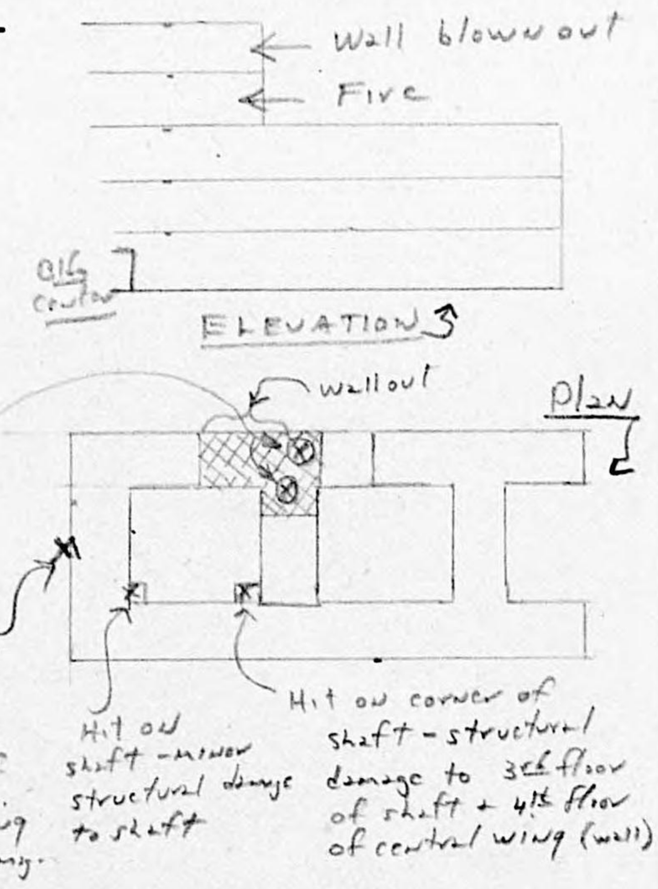
(b) Fifth Floor — wall blown out along front of bldg. — general weakening of structural members — hits penetrated to 4th floor as noted

(c) Cross hatch denotes structural damage to fifth floor

(d) Fire in 4th floor

(e) 4 M/G emplacements on roof of central section (5th floor) — guns removed after April + May raids.

(f) Loss of glass to entire bldg.



BLDG. NUMBER

SHEET OF

Bldg. 28 (Laboratory)

@ Reinforced concrete structure (3 floors) similar to Bldg. 27

(b) Fragmentation from near misses caused spalling to south wall

(c) Small amount of structural damage from hit on east roof (15 ft of roof girder weakened

(d) Complete loss of window glass.

Bldg. 29 a, b (No.1 Mfg. Dept. - Machining + Series Exp. Assembly) + c (Heat treatment + electro-plating)

@ Steel framed saw-tooth roof construction PIC-S-7: 11

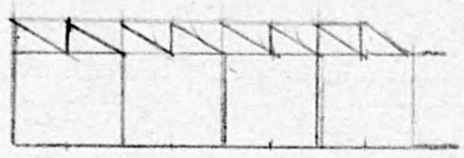
(b) Asbestos cement siding + roofing

(c) Main structural members - all lattice girders

(d) Glass roof lights and wall windows

(e) About 1/4 structural damage

(f) About 1/7 minor roof disturbance — remainder superficial damage.



(g) Wall separating 29 c from 29 a + b + dividing 29 c in two parts

Bldg. 30 (Wood Pattern Shop)

@ Steel framed saw toothed roof construction (single story)

(b) Asbestos cement roofing - glass lights + wall windows

(c) Complete loss of glass

(d) Minor roof disturbance

(e) Superficial damage to east wall - repaired with corrugated iron sheeting.

Bldg. 31 (Mess Hall)

@ Construction like Bldg. 12 - Two floors : 1st reinforced concrete supported by rein. con. pillars, 2nd saw toothed steel frame construction

(b) Minor damage to roof - loss of all glass in lights + windows

GENERAL NOTES - SECTIONS - PLANS - ETC -

Bldg. 32 (Engine Test cells)

@ Reinforced concrete cells — 2 on west end, 4 on east end

(b) Between two groups of cells stands a steel framed, saw tooth, shop b/dg. with asbestos cement roof & glass walls.

(c) Complete superficial damage to shop — one small section of lower wall in eastern cells structurally damaged.

Bldg. 33 (Engine Testing Room)

@ Simple wood framed b/dg. with asbestos cement roofing

(b) Two bays (gable), concrete floor — overhead crane in south bay collapsed

(c) Bldg. destroyed by Fire + H.E.

BLDG. NUMBER

SHEET OF

Bldg. 34 (Testing Room)

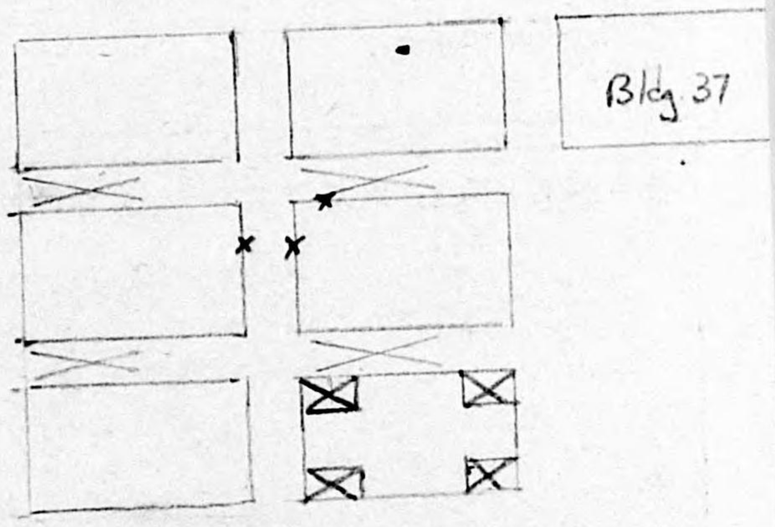
ⓐ Steel frame saw tooth structure - 2 bays wide
ⓑ Asbestos cement roofing - glass lights & walls
ⓒ Concrete floor
ⓓ Structural damage to approx 80' of south wall new construction
ⓔ " 40' of north wall "
ⓕ Complete superficial damage to wls and roof.

Bldg. 35 (Testing Room)

ⓐ Construction the same as Bldg. 34
ⓑ Complete superficial damage to walls & roof.
ⓒ One minor structural member in south wall cut by frag.
ⓓ Approx. 130' of roof at east end of both bays reroofed with corrugated iron sheeting (one machinery not disturbed.

Bldg. 36 (Engine Test Cells) PIC-S-7:6+7

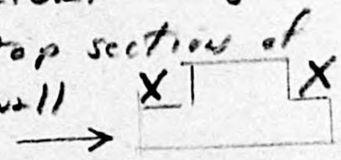
ⓐ Six separate blocks (3 stories) of reinforced concrete test cells
ⓑ Structural damage as noted
ⓒ Spalling of numerous walls from fragmentation
ⓓ Windows in control sections blown out in many cases - also heavy doors to cells in a few cases ripped off by blast damage from near misses.



X = Single story wood frame storage sheds. Frame only, left standing.

Y = Minor structural damage to upper wall sections

⊠ = Structural damage to entire top section of wall



Bldg. 37 (Engine Test Cells) PIC-S-7:9

ⓐ Construction like Bldg. 36 - except bldg. apparently intended for larger sized engines. Cells somewhat longer.
ⓑ Structural damage to base of wall & 1st major stanchion by near miss at N.E. corner of bldg.

FUNCTIONAL ANALYSIS REPORT NO. F/A-11

Date 26 December 1944

TARGET: 90.20-194, MITSUBISHI AIR CRAFT WORKS

LOCATION: NAGOYA CITY, JAPAN COORDINATES: 35°05N 136°54E

PHOTOGRAPHY:	Date	Mission	Print Nos.
	23 Nov 44	3PR/4M17-2V	V7,8,9

1. FUNCTION

The Mitsubishi A/C Works manufactures components and assembles aircraft for both the Army and Navy. It is one of the most important airframe plants in Japan. Experimental and new model developement is also carried out at this plant.

2. LOCATION

This target is located on the East Shore of [illegible]ya Harbor on reclaimed land. The target area is roughly triangular in shape, it's greater dimension E-W is approximately 5100' and the N-S dimension is approximately 3200'. The target is bounded by water on the N-W and S sides and by swamp area and water to the E.

3. SERVICES

The Plant is served by spurs from the Takanabe RR and by excellent harbor facilities, as well as by highways.

4. IDENTIFICATION OF FACILITIES

5. DISCUSSION

The small scale and poor quality of the photo cover does not permit detailed interpretation except for the following statements. The 150' wide roadway between the Final Assembly Bldgs. 4 and 5 is cluttered with a great quantity of material and possible debris which appears to have come from the SW portion of 5 where the roof is undergoing some repair or alterations. Bldg. 19 also appears to have an unexplainable roof condition. The new plant area (C) to the E containing bldgs. 66 - 94 does not appear to be in large scale operation and the Boiler Plant seems to be inactive. The large buildings have not as yet been camouflaged in the area.

6. ACTIVITY

Some rolling stock is seen on the RR sidings throughout the plant and smoke is seen to be coming from the stacks in the navy area (A). No barges are visable at the shipping point between buildings 4 and 5, but several fighter aircraft and several possible fuselages are seen in this area.

REMARKS:

* - Denotes buildings annotated on P.T.I.

Area A - Head Office + Cont. of Navy H/C

Area B - For Construction of Army H/C only

Area C. - Expanded area for construction of Army planes

Area D - Exp. t. reserve + Design Stop area

PIC-5- Report # 13

SX7 — 90.20 -194 Mitsubishi A/C WKS.

Location: Nagoya City Waterfront

Product: Army, Navy + Exp't. Finished A/C
(For details of organization + production
see Lt. Craig - A/C Team # 2)

F/A — Enclosed with AC/AS report
Comprisin of AC/AS report with Jap. reported FA

S/A — Following attached sheets (Navy A/c Production Section only)

BDA — Following attached sheets - (compare with plot of
Japanese report of damage on photographic blow-up)
- BDA - on Navy A/c Production Section Only
- Jap. report of damage on entire plant

Legend of BDA
- Structural damage
- Superficial damage
- Minor Roof disturbance

Plan View of All Bldgs. on following sheets oriented N-S + i.e. N. is at top of paper.

Scale Check
Bldg 35 n.e. corner — Bldg 5 n.w. corner
1686'

Bldg 4 — n.e. corner to s.e. corner
842'

Plant Boundaries: Correctly drawn.

DESTROYED

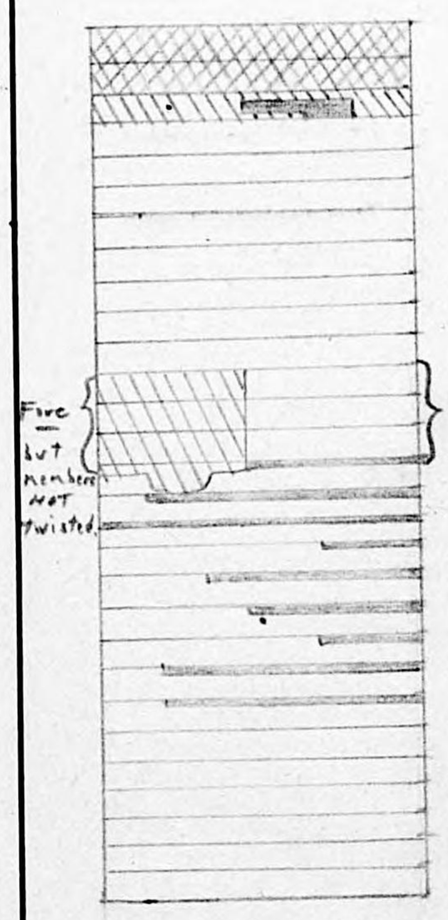
STRUCTURAL DAMAGE — FOR DAMAGE: COMPARE JAP REPORT PLOTTED

SUPERFICIAL DAMAGE — ON PHOTOGRAPHIC BLOW-UP.

ROOF DISTURBANCE

MINOR DAMAGE

GENERAL NOTES - SECTIONS - PLANS - ETC -



Scale: 1mm = 10'

Bldg. 4 - WING ASSEMBLY & FINAL ASSEMBLY

ⓐ Steel framed saw toothed bldg. - single story (except as noted)
ⓑ Columns every three bays N. + S.
ⓒ 5 bays e. + w.
ⓓ Corrugated iron sheet roofing + siding
ⓔ Glass lights - glass windows + walls
ⓕ 15 southern bays - approx 40' elevation
ⓖ 14 northern bays - approx 50' elevation.
ⓗ Over 60% glass damage - occasional frag holes in roof not marked for damage

① Bldg. 5 of 4 + siding - steel framed (gable truss) - corrugated iron roofing - concrete floor - (small shop) - minor roof holes.

PIC-S-9:4 Interior of bldg. 4 ⓒ - looking east along bays 324 reading from south.

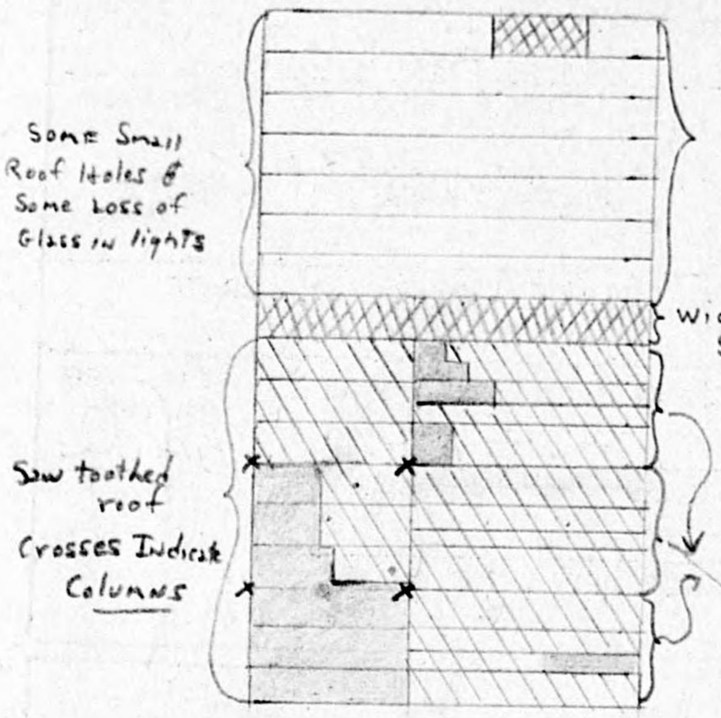
PIC-S-9:7 E. wall of bldg. ④ looking N.E.

Photos show framing.

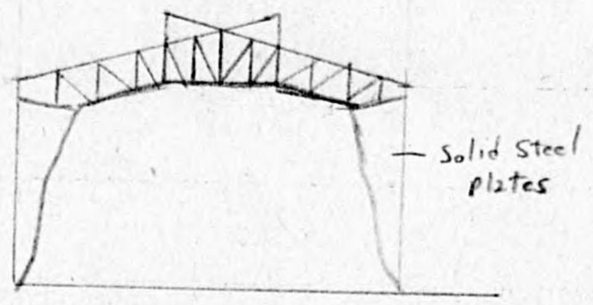
BLDG. NUMBER

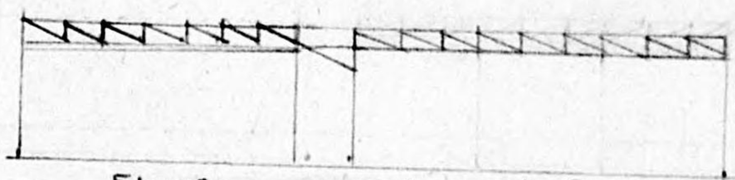
SHEET OF

Bldg. 5 - Final Assembly



Scale: 1mm = 10'





Elevation - w. section Bldg 5 - scale approximate.

ⓐ Framing as noted - all steel (including purlins)
ⓑ Corrugated iron sheeting - roof + walls
ⓒ Glass lights + windows
ⓓ Heavy steel hanger doors along w. wall.
ⓔ Approx 60' elevation - n. end.
ⓕ Approx 65-70' elevation - s. end.

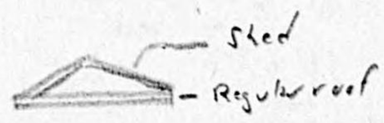
Compare Photos For Framing: PIC-5-9
- #5 - looking e. at w. wall
- #6 - heavy truss construction on e. side of Bldg.
- #8 - north end - interior looking to damage at NE. corner

Bldg. 6 - Mess + Parts Storage

ⓐ Bldg. destroyed.
ⓑ Wood framed.

Bldg. 7 - Sub-Station

ⓐ Reinforced concrete bldg.
ⓑ Windows concreted over
ⓒ Wood framed shed with corrugated iron sheet cover on roof - shed partially collapsed.



ⓓ No damage to concrete part of bldg.

Photo - PIC-5-9:9

Bldg. 8

ⓐ Bldg. destroyed.
ⓑ Wood framed.

Bldg. 9 - Head Business Office

ⓐ Three-story reinforced concrete office bldg.
ⓑ Bldg. undamaged save for a few panes of glass.
