OFFICE OF THE MAYOR  
BALTIMORE

Mayor's Office,

BALTIMORE, MD.

TO OUR VISITORS.

A patriotic people naturally feels stirred by a lofty emotion, when it undertakes to memorialize a great national event.

Surely the mayor of a great city should have no greater pleasure than to cordially welcome a patriotic multitude.

The people of Baltimore join with you in paying patriotic tribute to the Flag of our country, and to the heroes, the shedding of whose blood has made that flag so sacred.

We want you to know our city--big, enterprising, progressive, successful; we want you to know our people--hospitable, courteous, patriotic, chivalrous; we want you to know our history--important, creditable, nation-wide in its influence; and I extend a most cordial welcome to all who have come to Baltimore to join with us in the celebration of the 100th Anniversary of the writing of our National Anthem, "The STAR-SPANGLED BANNER."

## FOREWORD

ONE hundred years ago Baltimore—then a robust miniature of the great City of today—was attacked by a powerful British expeditionary force. The unequal struggle between America and Great Britain, generally referred to as the War of 1812, had raged for two years.

The flower of the British Army and Navy attempted to take the town. At North Point their land forces were repulsed after a bloody encounter, and their commander, General Sir Robert Ross, was killed. Untrained soldiery under gallant leaders held in check the invaders, who were seasoned veterans to the man. At the very gates of the City the British came upon a line of trenches they dared not assail.

Fort McHenry was bombarded by the naval forces for twenty-five hours. When the smoke of battle cleared "our flag was still there." Realizing the hopelessness of capturing Baltimore, the British weighed anchor and withdrew, taking away scores of wounded and a lesson never to be forgotten.

Detained aboard the flag-of-truce ship "Minden," Francis Scott Key, a young patriot, witnessed the conflict. Inspired by the thrilling sight, he wrote the words of our National Anthem, "The Star-Spangled Banner."

The final gun of the attack on Baltimore marked the close of the last important engagement of the War of 1812. Jackson and his brave followers defeated the British at New Orleans months later, unmindful that peace had been proclaimed days before.

American independence, so proudly heralded in 1776, became an actuality with the signing of the Treaty of Ghent.

A century of progress has elapsed. Once more Baltimore is the stage of a national drama. The National Star-Spangled Banner Centennial from September 6 to 13, 1914, is to commemorate the birth of our National Anthem; the successful defense of Baltimore at North Point and Fort McHenry; the achievement of real National Independence, and a century of progress.

That, also, is the purpose of this book.

## BALTIMORE AND MARYLAND WERE TO THE FRONT IN THE WAR OF 1812.

WILLIAM PINKNEY, a Baltimorean, wrote the declaration of war, which consisted of the single and explicit statement: "That war be, and the same is hereby declared to exist between the United States and Great Britain." Pinkney was sent in 1806 to England to negotiate a treaty that should settle all disputes between the two governments. From 1808 the political relations between America and Britain foreboded inevitable hostilities at no distant day. Incensed by the seizure of our ships upon the high seas, the impressment of thousands of American sailors and other outrages, Pinkney, in 1811, demanded his recall. Upon his return to America he was made Attorney-General. On June 18, 1812, after debating for fifteen days, Congress passed the War Act. President Madison signed it the same day. The Union was then made up of eighteen States—the thirteen original, Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina and Rhode Island, with Vermont, Kentucky, Tennessee, Ohio and Louisiana.

Baltimore merchants loaned the Government \$3,000,000, and this, later assumed by the city, became the foundation of Baltimore's first municipal debt. When war was declared the general Government was practically bankrupt, with liabilities amounting to \$45,154,000. Congress authorized a war loan of \$11,000,000. Baltimore merchants were the first to subscribe. Finding none of this available for her own defense, the city raised another \$600,000.

The first gun of the war was fired by a Maryland man, when Commodore John Rodgers, a native of Havre de Grace, and

CHAMP CLARK  
Speaker of the House of Representatives  
Honorary Vice-Presidents of Centennial Commission

later a resident of Baltimore, aboard his flagship, "President," attacked the British frigate "Belvidera," June 23, 1812. Commodore Rodgers was in command of the North Atlantic Squadron. Three days after war was declared he received the news while his ship was lying at New York. Within an hour he had weighed anchor and put to sea. Coming up with the "Belvidera" off Nantucket Shoals, Commodore Rodgers with his own hand pointed and fired the first shot of the war, hulling the enemy. A gun burst on the "President," injuring her commander. In the confusion that followed the British vessel escaped.

A Baltimore man, Captain David Porter, captured the first British national vessel, the "Alert," whose colors were struck August 13, after an eight-minute engagement with the "Essex." From the masthead of the "Essex" fluttered a flag bearing conspicuously the words, "Free Trade and Sailors' Rights." Captain Porter left New York a few days after Commodore Rodgers. Soon after leaving Sandy Hook he captured several English merchant vessels, making trophy bonfires out of most of them. One night, a little later, he chased a fleet of British transports convoyed by a frigate and bomb vessel. Without attracting the attention of the rest of the fleet, the "Essex" captured one of the transports, with one hundred and fifty men. Later in the war Commodore Porter made one of the most remarkable cruises on record.

Manned by a Chesapeake crew, the "Constitution," better known as "Old Ironsides," captured the first and third British frigates taken in the war. On July 12, the "Constitution," with a new crew, sailed from Annapolis, Maryland. In thirty minutes, August 19, she destroyed the famous "Guerriere," taken from Napoleon by Lord Nelson at the Battle of the Nile, in 1798. After a fierce fight, December 29, the same crew took the frigate "Java," with the outgoing Governor of Bombay and all his staff.

Commodore Stephen Decatur, Jr., a native of Berlin, Maryland, in command of the "United States," captured the second British frigate, the "Macedonian," October 25, after a conflict that lasted two hours. Decatur's subsequent career added luster to his renown as the conqueror of the "Macedonian."

From Maryland, and chiefly from Baltimore, more officers, ships and seamen went out than from any other State. Of the two hundred and forty officers of the American Navy, Maryland furnished forty-six. This was more than twice the number given by any one State, except Virginia, which supplied forty-two officers.

Sixty-one privateers were sent out from Baltimore, while the number from Maryland totaled more than one hundred. New York equipped fifty-five, Salem forty, Boston thirty-two, Philadelphia fourteen, and nine other ports combined about thirty-eight. "Baltimore Clippers," world famous for their speed, manned by daring crews, struck blow after blow at the commerce of Great Britain. This caused the English press to refer to this city as "a nest of pirates."

Baltimore privateers captured five hundred and twenty-five vessels, or nearly one-third of all the prizes taken in the war. Aboard Government vessels and privateers, Baltimore men captured five hundred and seventy-five British ships. The activities of Baltimore privateers caused a loss of \$16,000,000 to the British.

The most famous privateersman was Captain Thomas Boyle, of Baltimore. First on the "Comet," and later on the "Chasseur," known as the "Pride of Baltimore," he made a number of brilliant captures and had hair-breadth escapes. With the "Comet" he seized twenty-nine vessels. The "Chasseur" is said to have lowered the colors of fifty-one British ships.

Commodore Joshua Barney, commanding the "Rossie," accompanied by six other privateers, sailed from Baltimore in

PHILLIPS LEE GOLDSBOROUGH  
Governor of Maryland  
Honorary Vice-President of Centennial Commission

July, 1812. After forty-five days his captures totaled fifteen vessels, valued at \$1,289,000. When he returned to Baltimore in November this had been increased to \$1,500,000, representing 3,689 tons of shipping. He took two hundred and seventeen prisoners. Another rich capture was that of eight vessels made by the "Rolla," Captain Dooley. The vessels and cargoes were valued at \$2,000,000. To the "Dash," of Baltimore, belongs the credit for the first capture made by a privateer. She took the British schooner "Whiting," with dispatches from Great Britain to the United States, in Hampton Roads July 10, 1812. The fame of Baltimore ships was spread by the exploits of Captains Coggeshall, Miller, Moon, Murphy, Stafford and others.

The first news of peace was brought by a Baltimorean, Christopher Hughes, Jr., who was Secretary to the Commission at Ghent. As soon as the treaty was signed, December 24, 1814, he sailed direct for the Chesapeake and landed at Annapolis. He was the first to bring the good news to Washington, arriving there before the official messengers.

# STORY OF THE NATIONAL ANTHEM, FORT MCHENRY AND NORTH POINT.

By FRANK A. O'CONNELL.

**CHURCH BELLS** were calling in Baltimore Town Sunday, September 11, 1814, when through the streets went the cry, "The enemy is at our door!" On the Court House green three cannon boomed. With martial tread and beating drums patriots spread the alarm. From the houses came men of all classes, determined to protect their kin and their homes.

At the mouth of the Patapsco, off North Point, twelve miles from the city, fifty ships flying the British colors were silhouetted against the eastern skies. Nine thousand strong, the invaders, representing the flower of the English Army and Navy, gazed towards the city they had termed "a nest of pirates."

Lining the decks of this fleet were part of Wellington's "Invincibles," and veterans of Nelson's victories, the men who had humbled the great Napoleon. Fresh from the Battle of Bladensburg, encouraged by the capture and burning of Washington, emboldened by their raids along the Chesapeake, they impatiently awaited the loosening of the leash.

Pick and shovel made the dirt fly along fortifications around the town. To the east, in a line more than a mile in length, men, women and children toiled. Hampstead Hill (Patterson Park) was selected as headquarters by the commander-in-chief, General Samuel Smith, a Revolutionary hero. Behind these bulwarks he placed ten thousand troops, largely Baltimore militia, and one hundred cannon were mounted.

On the north side of the harbor, opposite Fort McHenry, Commodore Rodgers planted batteries at the Lazaretto. One

thousand volunteers and regulars garrisoned Fort McHenry. Major George Armistead, in command, knew that the magazine was not bomb-proof, but those under him were ignorant of the fact. To the rear of the fort along the shores of the Patapsco were two redoubts—a six-gun battery under Sailing Master Webster, and Fort Covington under Lieutenant Newcomb.

Anticipating the landing of the enemy, General Smith sent General Stricker with 1700 men to harass the British advance up Patapsco Neck. Late Sunday afternoon this body marched out the Philadelphia Road to Long-Log Lane (now North Point Road), leaving behind a cloud of dust. At eight o'clock that evening they paused. The defenders chose the ground well, with the right resting on Bear Creek and the left near Bread and Cheese Creek; then they lay on the ground to await the coming of dawn and the British.

General Stricker spent the night in the old Methodist Meeting House, still standing on the North Point Road, near Bread and Cheese Creek. His force was composed of the Fifth, Sixth, Twenty-seventh, Thirty-ninth and Fifty-first Regiments. These were made up of separate companies, some in uniform and others in their citizen's clothes. In the haste and confusion of the day many still wore their silk hats. Incorporated in these regiments was one company each from York, Hanover and Marietta, Pennsylvania, and one from Hagerstown, Maryland. All the rest were from Baltimore.

While the opposing forces slept that night from a cloudless sky the full moon shone brightly, its beams illuminating a huge flag flying over Fort McHenry. Fifteen stripes, alternate red and white, the Union of fifteen stars, white in a blue field, it measured 36 by 29 feet. The flag was made by Mrs. Mary Young Pickersgill, who was assisted by her two nieces.

Mrs. Pickersgill had won no little fame as a designer of ship's colors, pennants, etc. Commodore Barney, with the

FRANK BROWN

approval of General Stricker and General McDonald, had placed the order for the flag. At her little home, "House No. 60 Albemarle Street, Old Town," (which still stands) she had cut the colored sections. Owing to its dimensions the flag, in pieces, had been taken to a near-by brewery and there stretched and sewed together in a large room.

Before the first streaks of dawn appeared on the twelfth, the British were astir. From their transports boat after boat carried human freight to North Point—where now stands Fort Howard. Advancing into the marshes skirting the shore, they eagerly sought the shelter afforded by high reeds.

The veterans crawled cautiously to higher ground and assembled in the woods nearby. In command of the land forces was General Sir Robert Ross, a soldier of distinction, who had served in Holland, Egypt and the Peninsula. At his side rode the ranking naval officer, Rear-Admiral Cockburn, whose lust for booty had earned the hatred of every American. Admiral Sir Alexander Cockrane, commander-in-chief of the British forces, remained aboard his ship.

Four miles up Patapsco Neck proceeded this force. General Ross, Admiral Cockburn and six other officers stopped at the home of Robert Gorsuch, a farmer, and ordered him to prepare breakfast. As each dish was placed before his unwelcome guests, Gorsuch was compelled to taste the food. The unwilling host asked General Ross if he would return for supper. He was told, "No, I shall eat my supper in Baltimore, or in hell."

While the British officers were laughing at this remark the firing of musketry was heard. Dashing from the house, they mounted their horses and galloped to the scene of action. They emerged from a piece of woods about a mile distant and saw engaged the advance guards of their forces and a small party of Americans.

J BARRY MAHOOL

E. CLAY TIMANUS

THOMAS G HAYES

ALCAEUS HOOPER

FORMER MAYORS OF BALTIMORE  
Vice-Presidents of Centennial Commission

General Ross turned to Admiral Cockburn and said, "I'll bring up a column." As his horse wheeled a ball pierced the General's arm and chest. He fell—a monument marks the spot. Admiral Cockburn and others placed him on a horse and quickly sought the woods. A messenger was dispatched for a horse and cart, and in this crude vehicle the wounded officer was placed on blankets.

As he was carried to the rear General Ross ordered that he be covered lest he be recognized by the troops. Beneath a huge poplar (a new stone church marks the place), opposite the Gorsuch farmhouse, a halt was made. Commending his wife and family to the protection of the government he had served so well, General Ross died in the arms of his favorite aide, Sir Duncan M'Dougall.

Tradition has it that the British commander was shot by two young riflemen, Daniel Wells and Henry C. McComas. In the skirmish that followed both were killed. They were buried in a vault in Aisquith Square (Gay, Aisquith and Monument Streets), over which a monument was erected September 12, 1858.

On the fall of Ross the command of the British troops devolved upon Colonel Brooke, of the Forty-fourth Regiment. Pushing forward, the British artillery was soon engaged in a duel with the American field-pieces. The invading army was ordered to lie down and partake of the refreshments afforded by their haversacks and canteens.

Drawn up behind a strong paling (known as Dr. Houck's acre), the American yeomen awaited the approach of the English veterans. Both forces suffered from the intense heat.

In the early afternoon the Battle of North Point began. A roar of musketry opened out. The British advancing in their customary fashion, in close order, attempted to take the American position by a rush. Into their midst was poured a hail-

JEROME H. JOYCE, *Chairman*  
JOHN M. DEPONAI                      FREDERICK H. GOTTLIEB  
Managing Directors of Centennial Commission

storm of shot, slugs, nails and scrap iron. The defenders were short of ammunition and their weapons were mostly of antiquated type.

Several flank movements were attempted by the attacking body. General Stricker, comprehending these movements, met each one sturdily. The armies swayed back and forth, with victory coquetting first with one and then with the other. Closing in, a hand-to-hand struggle followed. The American lines, outnumbered, began to waver, and were ordered to retire. Instead of administering a slight check to the enemy, they had stopped the advance with a bloody shock.

In this struggle, which lasted an hour and a half, the British lost 600 men killed and wounded, and the Americans 150. Leaving a trail of blood behind, General Stricker's army, in good order, made its way back to Worthington's Mill, near Hampstead Hill. Here he was joined by General Winder, with the Virginia Brigade and U. S. Dragoons.

A heavy rain fell and the weary soldiers were drenched before they reached shelter. Worn by the march of the day previous, a night of nervous anticipation, the battle and the retreat, they sought such rest as they could get.

The battlefield was a sickening sight. Scattered about were the bodies of the slain, mingled with the wounded. Over the sodden fields the British searched, picking out their men. The dead were ignored and the injured carried to the old meeting house, near Bread and Cheese Creek.

After their own men had been cared for, the invaders turned their attention to the American injured. In the old meeting house British surgeons worked over friend and foe. The building vibrated with the groans of the wounded and dying. Beneath the same roof Colonel Brooke sought shelter from the torrents that poured from the heavens.

Thirsty for revenge, the British commanders ordered their men forward at daybreak. From beneath makeshift tents,

A. BARNEVELD BIBBINS, *Chairman*

ROBERT E. LEE, *Secretary*

T. ROWLAND THOMAS, *Treasurer*

Board of Directors of Centennial Commission

through which the water had dripped, weary and cramped, they responded to the call to arms. The march was resumed and unopposed they made their way towards the city. At noon they halted near Orangeville.

Colonel Brooke and Admiral Cockburn reconnoitered. Determining to attack the American forces, the commanders dispatched an officer to the fleet with a request that Admiral Cockrane make a diversion on the water front. Before sun-down the messenger returned. He bore an order, which read, "You are on no account to attack the enemy, unless positively certain of success."

Admiral Cockburn glanced at the message. He insisted on an attack. Colonel Brooke summoned a council of war, which the naval officer refused to attend. The deliberations lasted until midnight, when the majority of the officers decided upon a retreat, and an hour and a half later the British army withdrew from the gates of the city, leaving bright campfires as a ruse.

The naval forces were not idle. On the morning of the thirteenth, the bomb and rocket vessels began to bombard Fort McHenry and the other water defenses. Sixteen heavy ships hurled bombs, rockets and solid shot. The British were prevented from attempting to pass into the basin by a line of sunken hulks between Fort McHenry and the Lazaretto.

Major Armistead opened the batteries of Fort McHenry upon them, and kept up a brisk fire for some time with his guns and mortars, when, to his chagrin, he found that the missiles fell short. The British ships were lying about two and a half miles off the fort—near the present Fort Carroll. The garrison was exposed to a shower of shells for several hours.

One of the 24-pounders in the southwest bastion of the fort was dismantled by an exploding bomb. Judge (Captain) Joseph H. Nicholson, with a company of volunteer artilleryists,

FRANK A. O'CONNELL  
Director of Publicity  
of Centennial Commission

PAUL J. QUINN  
Assistant Secretary  
of Centennial Commission

was in charge of this part of the works. The explosion killed Second Lieutenant Claggett and wounded several others. The wife of one of the men, while administering to the injured, was killed.

Admiral Cockrane observed the confusion and ordered three of his bomb-vessels to move up nearer the fort. Major Armistead quickly took advantage of this. He ordered a general fire from every part of the fort. Within half an hour the British were driven back to their old anchorage. One vessel, the "Erebus," was saved from destruction by a division of small boats towing her beyond the range of Armistead's guns.

In the rear of the British men-o'-war was the cartel ship "Minden." Aboard this vessel were Francis Scott Key, a young lawyer, soldier and poet; his friend, Dr. William Beanes, of Upper Marlboro, Maryland, and Colonel Skinner, commander of the ship. Dr. Beanes had been made prisoner by the British after they had withdrawn from the burning of Washington.

The conduct of several stragglers of the invading army caused the venerable physician to order their detention. Learning of this some of the British officers, by way of retaliation, brought about his arrest. He was carried aboard a British ship. The news that Dr. Beanes was a prisoner spread rapidly.

One of his friends went to the home of Francis Scott Key, at Georgetown, and requested the young lawyer to go with a flag-of-truce and ask for the release of the physician. President Madison gave his consent and orders were issued that the "Minden," used by the United States Government for the transfer of prisoners, be made ready.

The "Minden" was then lying at Baltimore. Key came to this city and went aboard her. She came up with the British fleet in the lower Chesapeake. Key's mission was made

HAMPSTEAD HILL

WHERE GENERAL ROSS FELL  
OLD METHODIST MEETING HOUSE

known. General Ross and Admiral Cockburn, in strong terms, spoke against the release of Dr. Beanes. After being informed of his many kind acts toward British officers who had been wounded, they relented.

Having decided to attack Baltimore, they detained the Americans. The fleet headed up the Chesapeake. As the vessels entered the Patapsco, Key, Dr. Beanes and Colonel Skinner was transferred from the British ship to the "Minden." A guard of British marines were sent aboard the flag-of-truce ship to prevent the patriots from going ashore. The "Minden" was anchored north of the present ship channel, some distance from what is now Dundalk, Baltimore County.

From the decks of the "Minden" Key and his companions watched the bombardment. As night fell the fury of the attack increased. At midnight 1250 picked men were sent from the fleet in barges, with scaling ladders and other implements for storming the fort. Under the cover of darkness they passed to the south and approached Fort Covington and Webster's six-gun battery.

For the purpose of examining the shores they threw up rockets. This gave the alarm. A large hay stack was set afire by the Americans. As its glow revealed the British boats, Fort McHenry and the two redoubts opened a terrific fire. The concussion was tremendous. The houses in the city were shaken to their foundations.

Webster and his men worked gallantly, and to them Major Armistead said he was "persuaded the country was much indebted for the final repulse of the enemy." Two vessels were sunk and a number of the attacking force were killed. Back to their ships went the British. The bombardment of the fort lasted until seven o'clock in the morning. Eighteen hundred shells were thrown by the attacking force. The total American loss was four killed and twenty-four wounded.

LAZARETTO LIGHT

FOUNTAIN INN

FLAG HOUSE

During the night Key and his friends paced the deck of the "Minden." To these men the spectacle was one of horror. As shell after shell went screaming skyward towards the fort Key's anxiety grew. During an intermission in the firing he was in doubt as to the safety of the fort. On the back of a letter he began to write.

The first blush of day tinged the skies. Gazing towards the fort Key beheld the Stars and Stripes floating triumphantly above the ramparts. His joy was without bounds. Into his brain leaped the words of "The Star-Spangled Banner." As the sun rose and the British gave up in despair he continued to make notes.

The men-o'-war fell back. Key and his companions were permitted to go ashore. In a small boat with Dr. Beanes, Colonel Skinner and an oarsman, Key finished his writing. He proceeded into the city and came to Fountain Inn, which stood on Light Street, near Orange Alley, now German Street. That night he completed the poem destined to become the American National Anthem.

In the morning he took the verses to his brother-in-law, Judge Nicholson. The words were found to fit perfectly the then popular melody, "Anacreon in Heaven." Carrying the song to the printing office of Benjamin Edes (Baltimore and Gay Streets), then serving as captain of the Twenty-seventh Regiment, copies of it were ordered. Samuel Sands, an apprentice, set the type and printed it.

That evening it was sung in the taverns. Bonfires were lit in the streets and the citizens of Baltimore made merry, while the British with their dead commander and scores of wounded were on the Chesapeake, outward bound.

FRANCIS SCOTT KEY

## FRANCIS SCOTT KEY.

HE author of our national anthem, "The Star-Spangled Banner," was born on his father's estate, "Terra Rubra," Maryland. The date of his birth is in dispute. It is given as August 1, 1779, and August 9, 1780.

"Terra Rubra" was at that time in Frederick County, but the locality now forms part of Carroll County. There in the shadow of the Catoctin Mountain, amid fertile valleys, Francis Scott Key was reared.

He was the son of John Ross Key, who served with distinction as an officer in the Continental Army, and Ann Phoebe Dagworthy Charlton Key. General and Mrs. Key had another child, Ann Arnold Key, who married her brother's chum, Roger Brooke Taney, Secretary of the Treasury under President Jackson and later Chief Justice of the United States Supreme Court.

From the peaceful shades of "Terra Rubra" young Key was sent to St. John's College, Annapolis. The quaint town, around which centered the brilliant life of the Capital of the State, was a wonderful change for the impressionable boy. Dr. Upton Scott, his father's and uncle's neighbor in Frederick County, had built historic Carvel House, on Shipwright Street, and here the boy lived, with frequent visits to his grandfather, Francis Key, at his estate, "Belvoir," on the Severn River.

Graduating with high honors, Francis Scott Key, with his fellow-student, Roger Brooke Taney, read law in the office of Jeremiah Townley Chase. Meantime he fell in love with Mary Tayloe Lloyd, daughter of Edward Lloyd IV of "Wye House," Talbot County.

They were married at Annapolis by Rev. Ralph Higginbotham, rector of St. Anne's Parish. Like the date of his birth, there is a discrepancy of a year in the two dates men-

Frederick, Md.

Baltimore

San Francisco, Cal.

tioned for this event. It is usually given as occurring in 1802. In May, 1855, Mrs. Mary Tayloe Key, the widow, applied to the Pension Office at Washington for bounty land on account of her husband's service in the War of 1812, and stated under oath that she was married to F. S. Key at Annapolis, Maryland, January 19, 1801. Eleven children were born of this marriage.

The year of his marriage Francis Scott Key began practicing law in Frederick County. Later he removed to Georgetown, D. C., where he formed an association in the practice with his uncle, Philip Barton Key. He was three times appointed United States District Attorney for the District of Columbia, which office he held from 1833 to 1841.

Key was a devout Christian. In the Sunday School he taught a Bible class of young men for many years. He was one of the vestrymen of St. John's Episcopal Church, Georgetown. The best memorial bearing tribute to his Christianity is found in the lines of the hymn he composed, "Lord, With Glowing Heart I'd Praise Thee."

He wrote many poems, being also a contributor to the same periodical for which Edgar Allan Poe wrote. His holidays he spent at "Terra Rubra." In that vicinity he was regarded as a spendthrift. He was careless in dress, but of a fine, free, impulsive nature, generous to a fault. An expression often heard was, "Farmer Key spent all the money that Lawyer Key made."

In the winter of 1843, while visiting his daughter, Mrs. Charles Howard, in Baltimore, Key was stricken with pneumonia, and died January 11. Mrs. Howard's home was on the corner of Mount Vernon Place and Washington Place, where the Mount Vernon Methodist Episcopal Church now stands. He was buried in the Howard vault in St. Paul's Cemetery, Lombard Street and Fremont Avenue. The remains were later taken to Frederick and interred in Mount Olivet Cemetery.

COL. GEO. ARMISTEAD

GEN. JOHN STRICKER

GEN. SAMUEL SMITH

GEN. WILLIAM H. VINDER

COMMODORE JOHN RODGERS

DEFENDERS OF BALTIMORE

DEFENDERS OF BALTIMORE.

HE Commander-in-Chief of the American forces at Baltimore in 1814, MAJOR-GENERAL SAMUEL SMITH, was born in Lancaster County, Pennsylvania, July 27, 1752; entered his father's counting house, Baltimore, 1766; went abroad and traveled extensively, 1772 to 1776; Captain in the First Maryland Regiment, served at the Battle of Long Island, distinguished at Harlem and White Plains, slightly wounded and elevated to rank of Major, 1776; Lieutenant-Colonel, Fourth Maryland Regiment, 1777; after serving three years he resigned his commission, but continued to do duty as Colonel of Militia at Baltimore; Member of Congress, 1793 to 1803; United States Senator, 1803 to 1815; Member of Congress, 1816 to 1822; United States Senator, 1822 to 1833; died April 22, 1839, while Mayor of Baltimore. He is buried in Westminster Churchyard, Fayette and Greene Streets.

LIEUTENANT-COLONEL GEORGE ARMISTEAD, in command at Fort McHenry during the bombardment in 1814, was born at New Market, Virginia, April 10, 1780; Second Lieutenant, Seventh United States Infantry, 1799; First Lieutenant, 1800; transferred to First Artillery Engineers, 1801; Assistant Military Agent, Fort Niagara, 1802; Assistant Paymaster and Captain, 1806; Major in Third Artillery and distinguished at capture of Fort George, 1813; breveted Lieutenant-Colonel for gallant defense of Fort McHenry, 1814; died April 25, 1818, at Baltimore. He is buried in Old St. Paul's Cemetery, Lombard Street and Fremont Avenue.

BRIGADIER-GENERAL JOHN STRICKER, commander of the American forces engaged in the Battle of North Point, was born in Maryland, 1758. He resigned from the army December 20, 1814, and died June 23, 1825, while president

WELLS AND McCOMAS MONUMENT

of the Bank of Baltimore. He is buried in Westminster Churchyard.

BRIGADIER-GENERAL WILLIAM H. WINDER, commander of the Tenth Military District, was born in Somerset County, Maryland, February 18, 1775; was graduated from the University of Pennsylvania; member of the Maryland Legislature, 1798; began to practice law in Baltimore, 1802; was commissioned Lieutenant-Colonel of Infantry, and after being elevated to rank of Colonel performed eminent service with Maryland troops on Niagara frontier, 1812; became Brigadier-General and several months later captured at Stony Creek, Canada, 1813; appointed Adjutant and Inspector-General, 1814; went to Northern frontier and resigned from the army, 1815; twice elected State Senator; died at Baltimore, May 24, 1824.

COMMODORE JOHN RODGERS, in command of the marine forces at Baltimore in 1814, was born at Havre de Grace, Maryland, 1771; Lieutenant in United States Navy, 1798; Captain, 1799; Executive Officer aboard the U. S. S. "Constellation" when the French frigate "Insurgenta" was taken, 1800; in active service during naval operations in the Mediterranean until 1805; fired first shot in the War of 1812; President of the Board of Naval Commissioners, 1815 to 1824; in command of squadron in the Mediterranean, 1824 to 1827; member of the Board of Naval Commissioners, 1827 to 1837; died at Philadelphia, 1838.

STAR FORT GATE

WATER BATTERY

PATAPSCO BATTERY

FROM THE BAY

OUTER GATE

FORT McHENRY

FORT McHENRY.

HE reservation, containing thirty-four acres, is situated in Baltimore City, between the Patapsco River and its northwest branch. It was named in honor of Secretary of War James McHenry. The principal events in its history follow: 1661, Charles Gorsuch, a Quaker, was granted a patent for the land and paid an annual rental of one pound sterling; 1776, the first fortification, a water battery, was begun; 1778, eighteen guns were placed in position; 1794, the United States Government made an appropriation to improve the fort; 1795, J. J. Ulrich Rivardi was sent by the Secretary of War to examine the fortifications, after which the Government made its first purchase of land; 1800, the citizens of Baltimore appointed a committee to solicit funds to strengthen the infant fortress; 1813, extensive improvements were made and paid for by the City of Baltimore; 1814, bombarded by the British; 1816, jurisdiction over part of the reservation was ceded to the United States by the Maryland Legislature; 1824, visited by General Lafayette; 1833, Black Hawk, famous Indian chief, visited the city and held a reception at the fort; 1835, during the "Bank Riots," Reverdy Johnson took refuge there; 1838, Maryland ceded another part of the reservation to the Government; 1861, Baltimore editors who were thought to be in sympathy with the Southern cause were imprisoned there; 1875, the Government made its last appropriation for fortifications at this place; 1912, abandoned as an Army post. On May 21, 1914, Congress passed the Linthicum bill, turning the fort over to Baltimore City to be used as a public park. The formal transfer took place June 27, 1914. Congressman J. Charles Linthicum, acting for the Secretary of War, surrendered the deed to Mayor James H. Preston. A monument to Francis Scott Key will be erected at Fort McHenry, Congress having appropriated \$75,000 for that purpose.

# STAR SPANGLED BANNER

*Music from the Bombardment of Fort M. Henry*

Published by G. & T. CARP, Music Store Baltimore

The image shows a musical score for the first system of 'The Star Spangled Banner'. It consists of two staves: a treble clef staff for the vocal line and a bass clef staff for the piano accompaniment. The time signature is 6/4. The lyrics are: 'In the distant east the first light of the morn'ing came, and the warlike flag of our country came streaming o'er the land.' The score includes various musical notations such as notes, rests, and dynamic markings.

STANDARDIZED ADAPTATION OF  
**THE STAR-SPANGLED BANNER**

AS SUNG BY 6000 SCHOOL CHILDREN OF BALTIMORE, FORMING A  
 HUMAN FLAG, DURING CENTENNIAL CELEBRATION,  
 SEPTEMBER 12, 1914, AT FORT M. HENRY

Note: The harmonies were re-arranged  
 as much as possible from the original  
 by John Lead

FRANCIS SCOTT KEY

SAMUEL ARNOLD

*With spirit.*

Oh! say, can you see, by the dawn's early light, what so  
 proud - ly we hailed at the twi - light's last gleaming? Whose broad stripes and bright stars thro' the  
 per - il - ous fight, O'er the ram - parts we watched were so gal - ant - ly streaming? And the  
 rock ets' red glare, the bombs bursting in air, Gave proof thro' the night that our

STANDARDIZED VERSION OF  
 Arranged by

flag was still there: O! say, does that star spangled ban - ner still wave - o'er the  
land of the free and the home of the brave.

On the shore, dimly seen thro' the mist of the deep,  
Where the foe's haughty host in dread silence reposes,  
What is that which the breeze, o'er the towering steep  
As it fitfully blows, half conceals, half discloses?  
Now it catches the gleam of the morning's first beam,  
In full glory reflected, now shines on the stream:  
'Tis the star-spangled banner, Oh! long may it wave,  
O'er the land of the free, and the home of the brave.

And where is that band who so vauntingly swore  
That the havoc of war and the battle's confusion,  
A home and a country shall leave us no more?  
Their blood has wash'd out their foul footsteps' pollution,  
No refuge can save the hireling and slave  
From the terror of flight or the gloom of the grave  
And the star-spangled banner in triumph doth wave,  
O'er the land of the free, and the home of the brave.

Oh! thus be it ever when freemen shall stand  
Between their loved home: and the war's desolation;  
Blest with vict'ry and peace, may the heav'n-rescued land  
Praise the pow'r that hath made and preserved us a nation,  
Then, conquer we must, when our cause it is just,  
And this be our motto, "In God is our trust."  
And the star-spangled banner in triumph shall wave,  
O'er the land of the free, and the home of the brave.

Now you see ~~the~~ by the dawn of light  
is primary as light at the twilight's gleaming  
Over the ramparts we watch'd were so gallantly streaming  
And the rocket and glare the bomb hurley of war  
Can't pierce through the night that our flag is as white there  
O'er the land of the free & the home of the brave?

On the shore dimly seen through the mists of the deep  
Where the foe's haughty host in dread silence reposes,  
What is that which the breeze o'er the towering steep  
As it fitfully blows half conceals half discloses?

Now it catches the gleam of the morning's first beam  
In full glory reflected now shines on the stream  
Tis the star-spangled banner — O long may it wave  
O'er the land of the free & the home of the brave!

Who then is that band who so vauntingly swore  
That the havoc of war & the battle's confusion  
O'er home & a Country should leave us no more?

— Their blood has wash'd out their foul footsteps' pollution  
No refuge could save the hireling & slave  
From the terror of flight or the gloom of the grave  
And the star-spangled banner in triumph doth wave  
O'er the land of the free & the home of the brave.

Thus be it ever when freemen shall stand  
Between their lov'd home & the war's desolation,  
Blest with vict'ry & peace may the heav'n rescued be  
Behind the hosts that halt make & never be  
"Then conquer we must, if our cause is just,  
And this be our motto — 'In God is our trust.'  
And the star-spangled banner in triumph shall wave  
O'er the land of the free & the home of the brave."

FLAG THAT FLOATED OVER FORT McHENRY IN 1814

This banner, the largest battle flag in existence, measures 36 by 29 feet. It was made by Mrs. Mary Young Pickersgill and her two nieces. The material was cut at Mrs. Pickersgill's home, "No. 60 Albemarle Street, Old Town" (Pratt and Albemarle Streets, Baltimore), and carried to a nearby brewery, where it was sewed together. During the bombardment it was pierced by a number of shots. Recently the flag was restored at the National Museum, Washington, D. C., where it is considered one of the most precious possessions of that institution.

Garnett, Robert Garrett, Mrs. Robert Garrett, James A. Gary, James Cardinal Gibbons, Dr. Basil Gildersleeve, Mrs. Phillips Lee Goldsborough, Arthur P. Gorman, Judge James P. Gorter, Dr. John F. Goucher, Robert P. Graham, Clayton C. Hall, John B. Hanna, Judge Henry D. Harlan, Emerson C. Harrington, W. Hall Harris, Thomas G. Hayes, Judge Charles W.

U. S. S. CONSTELLATION

Launched at Baltimore, September 7, 1797, this frigate is the oldest vessel in active service in the United States Navy. On February 9, 1799, off Basse Terre, after a fierce fight, the "Constellation" captured the French frigate "L'Insurgente"; in 1802 she rendered valuable service during the war with Tripoli; bottled up in Norfolk harbor during the War of 1812, the vessel prevented the British from capturing the water defenses in that vicinity; during the Civil War she was stationed in the Mediterranean to protect American commerce from privateers; from 1871 to 1888 and from 1890 to 1893, the "Constellation" was used to take the midshipmen from the United States Naval Academy, Annapolis, Maryland, on their annual cruise; on May 22, 1894, she arrived at Newport, Rhode Island, where she was assigned to do duty as a receiving ship; in 1914 Congress appropriated \$50,000 to repair her and ordered that she be stationed at Baltimore during the National Star-Spangled Banner Centennial Celebration.

Heusler, John Philip Hill, Dr. Jacob H. Hollander, Alcaeus Hooper, Dr. William H. Howell, Major George W. Hyde, William P. Jackson, Dr. Henry Barton Jacobs, Mrs. Henry Barton Jacobs, George C. Jenkins, Michael Jenkins, Dr. Howard Kelly, R. Brent Keyser, Dr. A. B. Kinsolving, Dr. H. E. Kirk, U. S. Senator Blair Lee, Brooke Lee, J. Southgate Lemmon, Eugene Levering, Congressman David J. Lewis, Congressman J. Charles Linthicum, Lloyd C. Howard, C. C. Magruder, J. Barry Mahool, William A. Marburg, Dr. E. B. Matthew, Dr. James Dudley Morgan, John T. Morris, Bishop John G. Murray, Judge Alfred S. Niles, Rev. Dr. Edwin B. Niver, John R. Pattison, James Alfred Pearce, Edgar Allan Poe, Mrs. James H. Preston, J. E. M. Raley, John B. Ramsey, Blanchard Randall, Dr. Ira Remsen, Judge John C. Rose, Rev. Dr. William Rosenau, T. Herbert Shriver, Thomas J. Shryock, Robert Poole Simpson, Congressman Frank O. Smith, U. S. Senator John Walter Smith, Thomas Smith, Rev. Dr. J. Ross Stevenson, Redmond C. Stewart, Judge Henry Stockbridge, William F. Stone, Dr. John Roach Straton, Issac Lobe Straus, Colonel Sherlock Swann, Judge Arthur H. Stump, Congressman J. F. C. Talbott, Jonathan K. Taylor, De Courcy W. Thom, William H. Thomas, E. Clay Timanus, James McC. Trippe, Hammond Urner, Murray Vandiver, Edwin Warfield, Mrs. Edwin Warfield, Dr. William H. Welch, George Whitelock, W. W. Willoughby, John F. Wilhelm, Peter R. Quinn, Dr. Charles S. Woodruff.

#### HISTORICAL COMMITTEE.

Mrs. A. Barneveld Bibbins, *Chairman*; Mrs. Lucy Meacham Thruston, *Vice-Chairman*; Mrs. Phillips Lee Goldsborough, Mrs. John Ridgely of Hampton, Mrs. J. M. Wrensell, Mrs. W. F. Pentz, Mrs. Charles W. Bassett, Miss Virginia W. Cloud, Miss Louise Maloy, Dr. A. H. Abel, Dr. Bernard C. Steiner, Colonel Richard H. Spencer, Allen S. Will, John Wilber Jenkins, Folger McKinsey, Louis H. Dielman, Wilbur F. Coyle, Mrs. John H. Adams, Miss Emily E. Lantz.

#### HISTORICAL EXHIBITS COMMITTEE.

Lee, Mrs. Daniel Miller, Mrs. Henry C. Miller, Mrs. James H. Preston, Mrs. Charles Rieman, Mrs. Ralph Robinson, Miss Alice Tiffany, Mrs. Chester Turnbull, Miss Mary E. Waring, Dr. Lillian Welsh, Miss Elizabeth Chew Williams, Mrs. John S. Wilson, Mrs. Lucy Meacham Thruston, Mrs. George Huntingdon Williams.

In response to an invitation issued by Mayor James H. Preston, President of the Centennial Commission, the following persons were named to represent their respective States and Cities at Baltimore during Centennial Week, and are HONORARY MEMBERS of the Commission:

### ALABAMA.

REPRESENTING THE STATE—Governor Emmet O'Neal, Congressman Oscar W. Underwood, Colonel Francis G. Coffey, Mrs. S. H. Dent, Jr., Washington, D. C.; Mrs. J. V. Allen, Birmingham; Miss Maud McLure Kelly, Birmingham; A. R. Lauderdale, Goodwater; J. H. Wallace, LaFayette; Dr. Goodwin DuBose, Selma; Gen. John H. Peebles, Mooresville; W. J. Jordan, Elrod; J. H. Price, May; Robert R. Zell, Birmingham.

### ALASKA.

REPRESENTING THE TERRITORY—Governor J. F. A. Strong, Delegate James Wickersham, Senator Henry Roden, S. Hall Young, New York; Senator Elwood Bruner, Senator L. V. Ray, Senator Conrad Freeding.

## ARIZONA.

REPRESENTING THE STATE—Governor George W. P. Hunt, U. S. Senator Henry F. Ashurst, Mrs. Henry F. Ashurst, Congressman Carl Hayden, Mrs. Carl Hayden, W. G. Hartranft, Phoenix.

## CALIFORNIA.

REPRESENTING OAKLAND—Mayor Frank K. Mott, Mrs. C. J. Waterhouse, Mrs. George C. Coddling, Charles E. Keyes, P. M. Fisher, F. S. Rosseter, Roscoe D. Jones.

REPRESENTING SACRAMENTO—M. J. Burke, President City Commission; Congressman C. F. Curry, Rev. William Hughes, C. M. Goethe, E. W. Hale, Major S. W. Kay, Dr. G. C. Simmons.

REPRESENTING SAN DIEGO—Mayor Charles F. O'Neill, J. W. Sefton, Jr., Frank A. Frye, W. M. Herbert, M. T. Gilmore.

## COLORADO.

REPRESENTING THE STATE—Governor Elias M. Ammons; Mrs. John F. Shafroth, Washington, D. C.; Mrs. Edward T. Taylor, Washington, D. C.; Mrs. Charles S. Thomas, Washington, D. C.; Lawrence C. Phipps, Denver; Dr. R. G. Corwin, Pueblo; Wardner Williams, Denver.

## CONNECTICUT.

REPRESENTING THE STATE—Governor Simeon E. Baldwin, Morris B. Beardsley, Bridgeport; Gen. Edwin S. Greeley, New Haven; Dr. Walter R. Steiner, Hartford; James S. Hemingway, New Haven; Miss Helen E. Chase, Waterbury.

REPRESENTING BRIDGEPORT—Mayor Clifford B. Wilson, L. B. Curtis, Patrick Kane, A. B. Beers, John A. Leonard, James H. Crossley, Michael E. Griffin.

REPRESENTING HARTFORD—Mayor Louis R. Cheney, Congressman Augustine Lonergan, Meigs H. Whaple, Francis B. Allen, Charles W. Newton, Edward C. Frisbie, Dr. G. C. F. Williams, William Bro Smith, Francis R. Cooley, M. Lewin Hewes.

REPRESENTING NEW HAVEN—Mayor Frank A. Rice, Edward A. Harriman, James S. Hemingway, Livingston W. Cleaveland, Charles J. Anderson.

DELAWARE.

REPRESENTING THE STATE—Governor Charles R. Miller, Gen. James H. Wilson, Wilmington; Judge Henry C. Conrad, Georgetown; William H. Heald, Wilmington; Mayor Harrison W. Howell, Wilmington; Frank J. Williams, Wilmington; Judge George Gray, Judge James Pennewill.

FLORIDA.

REPRESENTING JACKSONVILLE—Mayor Van C. Swearingen, U. S. Senator N. P. Bryan, Congressman Emmett Wilson, Pensacola; Congressman Claude L'Engle, Mayor A. W. Corbett, St. Augustine; J. C. Privett.

GEORGIA.

REPRESENTING ATLANTA—Mayor J. G. Woodward, U. S. Senator Hoke Smith, Congressman William Schley Howard.

HAWAII.

REPRESENTING TERRITORY—Governor L. E. Pinkham, Ex-Governor Sanford B. Dole, Ex-Governor George B. Carter, Ex-Governor Walter F. Frear, P. C. Jones, Mayor J. J. Fern.

IDAHO.

REPRESENTING THE STATE—Governor John M. Haines, Mrs. Clair Southworth, Buhl; Mrs. Della B. Willis, Lewiston; Mrs. Carrie Taylor, Twin Falls; Mrs. L. M. Nesbit, Blackfoot; Mrs. George Chittenden, Coeur d'Alene.

ILLINOIS.

REPRESENTING THE STATE—Governor Edward F. Dunne, Bruce Campbell, East St. Louis; Ben Caldwell, Chatham; C. N. Wheeler, Chicago; James Edgar Brown, Chicago; Captain O. W. Wallace, Chicago; John M. Stahl, Chicago.

REPRESENTING ROCKFORD—Mayor William W. Bennett, Mrs. P. A. Peterson, A. Thorsten Lindgren, Miss Julia C. Gulliver, Burrell B. Treat, Robert Lathrop, John H. Natrass.

REPRESENTING SPRINGFIELD—Mayor John S. Schnepf, Congressman James M. Graham, Logan Hay, Judge J. Otis Humphrey, Hugh S. Magill.

### INDIANA.

REPRESENTING THE STATE—Governor Samuel L. Ralston, Congressman Martin A. Morrison, Dr. William L. Bryan, Bloomington; Dr. Harry A. King, Moores Hill; Meredith Nicholson, Indianapolis; Major George V. Menzies, Mt. Vernon.

### IOWA.

REPRESENTING THE STATE — Governor George W. Clarke, Robert Kissick, Oskaloosa; Congressman H. M. Towner, Corning; Congressman G. N. Haugen, Northwood; W. P. Dawson, Aurelia; Julius Rohwer, Ida Grove.

REPRESENTING COUNCIL BLUFFS — Mayor Thomas Maloney, H. W. Binder, Gen. G. M. Dodge, Judge Walter I. Smith, E. A. Wickham, J. J. Hughes.

REPRESENTING DES MOINES—Mayor James R. Hanna, Z. C. Thornburg, Miss Frances Wright, Frank Nagel, Holmes Cowper, Dr. M. L. Bartlett.

### KANSAS.

REPRESENTING THE STATE—Governor George H. Hodges, U. S. Senator Wm. H. Thompson, Congressman Dudley Doolittle, Congressman John Connelly, Charles Knabb, Hiawatha; Miss Maggie Dornblaser, Fredonia.

REPRESENTING KANSAS CITY—Mayor C. W. Green, Col. L. C. True, H. C. Herrick, E. F. Heisler, Mrs. Nettie M. F. Nason, Mrs. L. W. Leplinger.

### KENTUCKY.

REPRESENTING THE STATE—Governor James B. McCreary, George C. Webb, Lexington; Thomas A. Combs, Lexington; John W. Holland, Shelbyville; Charles P. Weaver, Louisville; James M. Lang, Paducah.

REPRESENTING COVINGTON—Mayor George E. Phillips, William A. Byrne, Henry Berndt, U. J. Howard, Albert Boehmer, Lew L. Applegate, Edwin P. Morrow.

LOUISIANA.

REPRESENTING THE STATE—Governor Luther E. Hall, Clarence J. Rodgers, New Orleans; W. J. Hennesey, New Orleans; Philip Arras, New Orleans; S. W. Martien, Waterproof; J. E. Clayton, Vidalia; George W. Smith, Rayville; W. O. Hart, New Orleans.

REPRESENTING NEW ORLEANS—Mayor Martin Behrman, U. S. Senator J. R. Thornton, U. S. Senator Joseph E. Ransdell, Congressman Albert Estopinal, Congressman H. Garland Dupre.

MAINE.

REPRESENTING THE STATE—Governor William T. Haines, Adjutant-General Greenlaw, Augusta; Ray P. Eaton, Brunswick; Col. Frank M. Hume, Houlton; Col. William O. Peterson, Portland; L. L. Hooker, Bath; S. C. Stetson, Greene; George D. Bisbee, Rumford Falls.

MASSACHUSETTS.

REPRESENTING LAWRENCE—Mayor Michael A. Scanlon, Rev. George E. Lovejoy, Rev. James T. O'Reilly, Miss Bertha Macurdy, Charles E. Bradley, C. J. Corcoran.

REPRESENTING NEW BEDFORD—Mayor Charles S. Ashley, Thomas W. Cook, George N. Allen, Allen F. Wood, Henry W. Mason, John L. G. Mason.

REPRESENTING SPRINGFIELD—Mayor John A. Denison, Kurt R. Sternberg.

MICHIGAN.

Lombard Street and Fremont Avenue.

Decoration of Graves of those who fought in the Revolution and the War of 1812.

8 P. M.

General Illumination of City.

# PART TWO

THE BALTIMORE BOOK SECTION  
OF THE NATIONAL STAR-SPAN-  
GLED BANNER CENTENNIAL  
OFFICIAL PROGRAMME

The Panama Canal will have a tremendous influence upon Baltimore.

Why?

Almost every page of this book contributes to the answer.

Baltimore, to begin with, is on an almost direct line with the west coast of South America, and is nearer the Canal than any other of the large cities of the Atlantic Coast.

These important facts are very comprehensively shown on the accompanying map.

With that rugged barrier, the Isthmus of Panama, no longer barring the way, the great west coast opens up untold and incalculable opportunities for commerce.

But why Baltimore?

Because trade, like almost everything, follows the course of least resistance. It traverses natural lanes if it can, and the thing that makes a lane natural or unnatural is largely geographical position.

Baltimore's position is splendid.

Because of this, one cannot evade the conclusion that the Canal will have a tremendous influence upon this City, and that the beneficial effect will be communicated to the new field opened up—that vast territory which is just now put in direct touch with Baltimore. In other words, there will be reciprocity.

South American trade will come to Baltimore and be carried through Baltimore, because it will benefit those who take advantage of the opportunity the City offers. Baltimore does not expect people to bring their business here for its enrichment. The point is, they benefit and enrich themselves by so doing.

Look at the situation.

The Baltimore Book is laden with facts that bear out the assumption that Baltimore is a natural trade route from Panama and is destined to become a great distributing depot for transoceanic trade. Lower freight rates than enjoyed by any other city of the Atlantic Coast (as shown on pages 76, 77, 78, 79 and 80 of this book) will draw merchandise here from an extensive area of the United States, and just here an important combination is effected.

Low freight rates, a shorter land and sea distance. Hence the natural lane—the course of least resistance. No obstacles in the guise of excessive rates to or from the western and northwestern sections of the United States, and a short voyage to the Canal.

Isn't that an advantageous combination?

But there are many other considerations, all arguments in favor of Baltimore.

Its splendid harbor. Covered wharves, from which ships lying in deep water alongside may be loaded; devices for the rapid handling of bulk cargoes, including coal.

Three great trunk line railway systems connect Baltimore with the rich mining and agricultural regions of the West. Baltimore lies nearer these regions, let it be repeated, than any other large city of the Atlantic Coast.

Then there will be always return cargoes for ships—a most important consideration.

The vessel that comes here with the forest products of the North Pacific Coast, fruits or vegetables from California, bulk commodities from Central or South America, will go forth again freighted with coal, manufactured products of iron and steel, machinery, paints and mixed merchandise, for Baltimore is very near the producing regions of these commodities.

Central and South American countries require railroad equipment. Their agricultural and industrial development depends upon such. These countries want machinery of all sorts, clothing, hats, etc., and Baltimore stands ready to supply such needs, for it is in the manufacture of these articles that it now occupies a commanding position.

Truly, there is no need for apprehension concerning return cargoes.

With great railroad piers, open and covered; with storage warehouses; with a great Municipal pier system, which is being extended; with shorter rail haul to Northern and Western cities and manufacturing districts than is enjoyed by other Atlantic ports; with the activities of the City Administration earnestly employed in the development of these facilities; with these and the multiplicity of other advantages set forth in *The Baltimore Book*, who can successfully dispute that the Canal will have a tremendous influence upon the future of this City?

BALTIMORE IN 1752

1904—February 7, 8, fire swept over 140 acres, destroying 86 blocks of buildings in the business center of Baltimore; loss \$125,600,000. This picture is a partial view of the ruins

1911—This comparative picture includes the burned section above. It shows the marvelous rehabilitation of the burned district and bears testimony to the pluck and energy of Baltimoreans, who courteously declined outside aid after the great disaster

## EXPLANATORY

HIS book is written in response to the demand for accurate information concerning Baltimore, its resources, its general development, and its municipal activities.

The Baltimore Book is published by the Municipality. It has no private purpose to serve. It deals primarily with the Baltimore of TODAY.

Baltimore reveres her traditions, is proud of her history glories in her honored past, but Baltimore, rich in all these priceless blessings, has been very practical and has given much thought, much aggressive energy, to the solution of the material problems that confront her as an important member of the Great Family of American Municipalities.

What Baltimore is and what Baltimore is doing are herein presented as eloquent and convincing facts. The case is rested without argument.

The development of Baltimore along industrial, commercial, governmental, financial and all civic lines, during recent years, has been extraordinary. Imagination plays no part in that statement.

Baltimore, as far as the memory of man runneth, has always been big. It started with all the natural prerequisites of a great city. But Baltimore is not only big. It is bigger than ever; not only bigger, but better. This is not a vain boast. A few cities are bigger than Baltimore; find a better one. Baltimore has been bountifully endowed by nature, and nature is being assisted by those most skilled in civic development. The following pages will tell how. That is the STORY.

CITY HALL

## CITY GOVERNMENT OF BALTIMORE WHAT IT IS DOING

---

A résumé of great projects under way: The \$23,000,000 Sewerage System; Repaving the City; Civic Centre; Colossal Municipal Docks; Factory Site Commission; Splendid Parks; Sanitary Regulations; Health, Fire and Police Departments; Public Schools; Free Baths, etc.

**T**HE Municipal Government of Baltimore is alert, creative and constructive. It is not sufficient to say that the administration is in sympathy with the great forward movement in this City. It is an inspiring part of the movement. Loyal supported and encouraged by citizens in all walks of life, it is engaged in a systematic scheme of modernization and beautification, and is pursuing a masterful constructive policy. It is a policy that does not balk at obstacles. An obstacle is something to be overcome; that's all.

Since 1904, when the heart of Baltimore was burned out, when smoldering ashes and hideous debris stretched over 140 acres, Baltimore has been building, and building big. The great disaster was turned into opportunity. The loss, approximately \$125,000,000, was a staggering blow. No effort is made to minimize this fact, but it was a blow that awoke the fighting spirit. It was not a knockout.

At this crisis, what did the City Government do?

BALTIMORE'S \$3,000,000 COURTHOUSE

Its mural decorations are among the finest works of art in American public buildings

It refused all outside aid; declined it courteously and with grateful thanks, for stricken Baltimore was very grateful. It wasn't false pride that impelled Robert M. McLane, then Mayor, to take this stand. He voiced the sentiment of the community when he notified the world that Baltimore would take care of its own, and would rebuild through its own effort. Before he could get this on the wires \$60,000 had actually been received, and "draw on us" telegrams brought the amount up to \$200,000. Every cent went back, but the generous sentiment which prompted the givers will always be treasured. The whole world seemed eager to hasten to the aid of Baltimore. Hundreds of sympathetic messages were received.

The City had just sold its interest in the Western Maryland Railroad for \$8,751,000. Upward of \$4,500,000 of this fund was immediately used for public improvements and the rehabilitation of the burned area.

A Burnt District Commission was created. It widened streets; it reduced grades. Baltimoreans built; they built wisely and built well. Old picturesque Baltimore had been partly wiped out by the fire, but before the flames were extinguished at one end of the destroyed district a new Baltimore was springing up at the other. Those who saw the City in the throes of devastation wonder at the metamorphosis presented today. It is simply marvelous. Following the work of the Burnt District Commission other millions were spent according to a definite plan of City development. So much for the past.

What is the City Government doing today?

It is building the finest sanitary Sewerage system in the world, and will expend about \$23,000,000 for this purpose. The system is almost completed.

It has spent \$6,161,000 on its magnificent Municipal docks, and has available \$5,000,000 more for the enlargement of the system, which includes a recreation pier.

POSTOFFICE  
Calvert Street (Monument Square) side

It is constructing a broad street (Key Highway) paralleling the south side of the harbor for several miles.

It is grappling the paving problem, and a Commission is now engaged in a general repaving plan for the entire City. The Commission has a working capital of \$5,000,000. This will be increased by means of the paving tax to \$10,000,000.

To date 54 miles have been repaved and 10 miles are under contract. The highways are being improved under a general plan, and it is the aim of the administration to make Baltimore second to none in this particular branch of civic development. The latest standard specifications are followed and four standard pavements, namely, Granite Block, Vitrified Block, Sheet Asphalt and Wood Block, are being used.

Aside from the above-mentioned \$10,000,000, an additional \$4,500,000 are being spent on street improvement in the "Annex" (northern and western extremities).

Forty-seven miles (based upon a width of 30 feet between curbs) have been paved in this particular section since 1906. These streets, with those within the older parts of the City repaved in accordance with the general plan of 1910 referred to, total 101 miles paved or repaved within recent years.

And the work is still being pushed forward with great energy.

There is pending a loan of \$1,000,000 for the construction and improvement of Police Department buildings.

For the enlargement of Baltimore's water supply, \$5,000,000 is available.

A high-pressure water pipe line through the business section was completed in 1912 at a cost of \$1,000,000. This is a very important addition to Baltimore's fire-fighting equipment, and materially reduces the cost of fire insurance.

U. S. CUSTOM HOUSE

The sum of \$340,000 was expended in 1911 for additional apparatus and buildings for the Fire Department, exclusive of the sum appropriated annually for its maintenance.

By means of an electric conduit system, overhead telephone, telegraph and electric wires have been placed underground; \$3,000,000 have been spent for this purpose and \$2,000,000 more are available for a continuation of the work.

There are hundreds of other things which the City Government is doing. In matters of municipal routine it is kept right to the notch. Departments are "keyed up" as are those of great private enterprises, and the whole organization is working in systematic harmony. Baltimore is not only enjoying a business administration, but a progressive business administration.

The following pages will describe concisely some of the projects in which it is engaged.

*Boat Lake—Druid Hill Park*

**AN AUTOMOBILE TRIP THROUGH BALTIMORE'S SANITARY SEWERS**  
This picture conveys an idea of the magnitude of the great drains Baltimore is now building. The system will be the finest in the world

## A GREAT SEWERAGE SYSTEM

Baltimore will spend \$23,000,000 on its Sewerage System. The work was begun in 1905 and will be completed by 1916. Sections in various parts of the City are already in operation, and when it is entirely finished the City will have the most modern plant in the world. The system represents the most advanced ideas in the solution of this great Municipal problem.

It is impossible to realize the magnitude of the work or the diversified engineering problems that are being solved every day unless one takes the time to visit in person some of the construction work being carried on in various parts of the City. The work is most interesting because of its complications.

The requirement of the Legislative Act, that all sewage must be purified before being discharged, made it necessary to keep the storm-water separate from the sanitary sewage, allowing the former to discharge through its own system of drains into the nearest natural outlet. The sanitary sewage is carried to the disposal plant and purified. The sewage, by bacterial treatment, becomes 95 per cent. pure.

Two-thirds of the sanitary sewage of the City will flow by gravity to the disposal plant on Back River, about six miles from Baltimore. The other third will be pumped through huge iron force-mains to the outfall sewer, an elevation of 72 feet, from which point it also will flow by gravity to the disposal plant. The pumping station building is now completed and equipped with three engines, each having a pumping capacity of 27,500,000 gallons a day. The station will house five of these enormous pumps, the additional two to be installed later.

The difficulties of the work are doubled because of the necessity of constructing two systems of sewers—sanitary and storm-water—which cross and recross each other in thousands of places. In some cases two large sewers of the different systems come together on the same level, which requires the

**SEWERAGE SYSTEM DISPOSAL PLANT, BACK RIVER**

Disposal of sewage is a great municipal problem. At this plant, by bacterial treatment, the sewage becomes more than 95 per cent. pure

The great tanks shown cover many acres

siphoning of one beneath the other. In one instance this resulted in the construction of one of the largest siphons in the world.

The purified sewage, discharged from the disposal plant, in flowing to its outlet operates turbines. These run dynamos, which produce current for lighting the plant at practically no cost.

*Baltimore's Water Supply—Mt. Royal Pumping Station*

BALTIMORE'S WATER SUPPLY  
The Big Dam at Loch Raven, Gunpowder River

## BALTIMORE'S WATER SUPPLY

The City of Baltimore has about \$15,000,000 invested in its water works system, and an additional \$5,000,000 was recently voted for an impounding and storage reservoir and filtration works, with the necessary connecting conduits and tunnels. Many of these are now in course of construction, and it is hoped that the entire work will be completed during the year 1915.

Upon the completion of the new plant, the entire supply of the City will be taken from the Gunpowder River, which has an average daily flow of 270,000,000 gallons. The Jones Falls watershed which is used at the present time to supply part of the City's water, will be abandoned, although it will be possible to use the water from this source in case of an emergency.

When the improvements, which are now well under way, are completed, Baltimore will have one of the finest water supplies of any city in the United States. A new impounding reservoir will not only give an ample supply, but a filtration plant will purify this water so that in quality it will equal that of any city in the world.

The impounding reservoir, now being built at Loch Raven, on the Gunpowder River, will have a capacity of about 2,000,000,000 gallons. The impounding reservoir on the Jones Falls Supply, known as Lake Roland, has a capacity of 400,000,000 gallons.

There are seven storage reservoirs, most of them within the City limits, with a total storage capacity of 1,488,875,000 gallons. There are also two standpipes, each with a capacity of 300,000 gallons. The Water Department's income is derived from water rents.

**FIFTH MARYLAND REGIMENT ARMORY — EXTERIOR VIEW**

Baltimore's great convention hall. This is the home of the "Dandy Fifth." The building cost \$450,000 and is 360 x 290 feet. It has an unobstructed drill space 200 x 300 feet. The great hall was designed to accommodate large conventions, as well as for military purposes

CIVIC CENTER — JONES FALLS AND KEY  
HIGHWAYS

**T**HOSE charged with the administration of the City Government have given much thought to the future. What is done is done on a large scale. Every succeeding day finds the City a bigger, better, busier Baltimore, and improvements are made with a comprehensive idea of the demands of the future. They are, as nearly as human calculation can make them, for all time.

The development now going on is in accordance with a pre-conceived plan of city building. Certain details are in charge of a Commission on City Plan. One of the most important features in the City betterment plan was the recent covering of the stream (Jones Falls) which formerly flowed in an open channel through the center of the City. The flow is now through three concrete tubes, consisting in part of the largest drainage tunnel in the world.

The top of these conduits and tunnel is now a highway of a minimum width of 75 feet. This drive will provide a direct highway on an easy grade running diagonally across the City from the docks to the railroad terminals. This great improvement is a part of an elaborate and connected scheme of future development, the main feature of which is a Civic Center to the east of the City Hall. To the west, forming a part of the general plan, are the Postoffice and Baltimore's three-million-dollar Courthouse.

Another project of importance in which the City is now engaged is the construction of Key Highway, a wide thoroughfare extending from Light street, along or very near the waterfront, to Fort McHenry—a distance of several miles.

FIFTH MARYLAND REGIMENT ARMORY—INTERIOR VIEW  
Showing running and 100 yard dash tracks

This highway, named for Francis Scott Key, author of "The Star-Spangled Banner," will open up a splendid avenue of approach to the southern side of Baltimore's extensive harbor. A system of railroad tracks and switches, which are to be installed, will place all plants, piers, etc., in direct touch with railroad systems.

*The Vista—Druid Hill Park*

**ONE OF BALTIMORE'S GREAT MUNICIPAL DOCKS**  
Baltimore is spending over \$11,000,000 on City owned piers

## BALTIMORE'S MUNICIPAL DOCKS

The Municipal docks of Baltimore are not mere ornaments. They are not solely colossal specimens of engineering skill. They are for use. When the City put acres of land under water and spent its millions, its object was, and is, to provide the best maritime terminals that could be built. These docks may be leased by any responsible parties for 36 cents a square foot per year. Those who have not seen the great marine stations have little idea of their magnitude, and it is important to remember that they are not a private monopoly, and are not controlled by private parties to selfish ends. The City of Baltimore OWNS them and throws them open to the commerce of the world. Those who would enter the shipping business here have the first and most vexatious problem, namely, terminal facilities, solved in advance. Magnificent docks are available.

Prior to the fire of 1904 the City owned little wharf property of importance. The fire made it possible to acquire all of the burned district fronting on the harbor (about 4,000 lineal feet). The City purchased the property, removed all buildings, streets, etc., and laid out a system of public wharves and docks along Pratt street. These are situated in the upper harbor and are intended for the coastwise and bay trade. The transatlantic steamers, at present, find ample accommodations at the railroad piers in the lower harbor.

Pier 4, at the foot of Market Place, is 150 feet wide. Along Market Place the City has erected three handsome, commodious buildings, a retail market, a fish market, a wholesale market, all within a stone's throw of Pier 4, which is set apart for the use of the market boats.

A two-story recreation pier at the foot of Broadway was completed early in 1914. The lower floor of this structure is to be used for commercial purposes; the upper section for a recreation center.

AN ATLANTIC COAST STEAMSHIP LEAVING ONE OF THE MUNICIPAL PIERS

Baltimore's domestic commerce is extensive and a large portion is carried in commodious steamships

## MUNICIPAL FACTORY SITE COMMISSION

**T**HE City Government has a specially organized department that handles all industrial problems. It is a public agency created for the purpose of promoting any movement that has for its end the development or enlargement of Baltimore's industrial activities.

It is a department of the City Government; supported by the City Government. There are no charges, costs nor fees connected with its work.

Any service performed by the department or any information given by the department is absolutely free of any financial burden to the person who seeks its aid or takes advantage of its co-operation.

If you want to know anything about the business possibilities of Baltimore; if you want to get in touch with the City's financial interests; if you want to know what factory sites are in the market; in fact, if you want to know anything at all about any phase of the industrial affairs of the City or any of the problems incident thereto—communicate with the Municipal Factory Site Commission, City Hall.

You will find it ready to give help in any particular or in any direction whatsoever.

The Commission is organized on a basis that puts it in touch with all the different business interests in Baltimore.

It is composed of a member of the Chamber of Commerce; a member of the Merchants and Manufacturers' Association; a member of the Travelers and Merchants' Association; a member of the Old Town Merchants and Manufacturers' Association; a member of the Federation of Labor; a member of the Builders' Exchange; a member of the Real Estate Exchange; a representative of the Pennsylvania Railroad; a

BIRD'S-EYE VIEW OF BALTIMORE HARBOR

Showing water frontage for terminal development and industrial opportunities

representative of the Baltimore and Ohio Railroad; a representative of the Western Maryland Railroad.

The Commission has a finely-developed system under which a wide range of factory sites is listed. Real estate dealers, as well as prospective manufacturers, are constantly referring to the Commission's list whenever they have inquiries for industrial property.

The City itself controls about one hundred and seventy acres of waterfront territory with direct railroad connections.

The Commission is in touch with a combination of magnificent buildings which have been converted into "beehive industrial colonies." All of the most modern appliances, power and other manufacturing advantages are readily available on attractive terms. These buildings are situated near the junction of two railroads.

The Factory Site Commission will put anyone in touch with any of the above propositions.

### MUNICIPAL JOURNAL

The City is issuing a semi-monthly publication known as the MUNICIPAL JOURNAL. It is devoted to the exploitation of facts about the operations of the City Government, and through this agency the public, both at home and abroad, is kept in intimate touch with all the plans and achievements of the Municipal Government. It is also provided with frequent reports of all moneys collected and how the same is being spent. It is conducted in a manner intended to familiarize Baltimoreans with all the most important data about their City. Its columns are filled with exceedingly instructive matter which never finds its way into the columns of any other publication. It lays before its readers things that are planned to be done, as well as things that have actually been done, and has established itself as an institution of practical value to the community, and the community is giving it cordial support.

HANDSOME PORTICO OF THE CITY HALL IN SUMMER DRESS

A permanent botanical display which is very pleasing to the eye and decidedly unique

## GOVERNMENT OF BALTIMORE

The government of Baltimore is vested in the Mayor and City Council, the corporate entity.

The Mayor, the Comptroller and City Council are elected by the people for a term of four years; so is also the President of the Second Branch City Council, who acts in the Mayor's stead when the latter is absent and who succeeds to the Mayoralty in event of a vacancy during an unexpired term. The Mayor appoints all heads of departments, boards, commissions, etc., subject to confirmation by the Second Branch.

Baltimore is divided into 24 wards and four councilmanic districts. Each district is composed of six wards. Each ward has a representative in the First Branch and each district has two in the Second Branch. Including the President, there are nine members of the latter body.

The Board of Estimates, composed of the Mayor, President of the Second Branch City Council, Comptroller, City Solicitor and City Engineer, is a co-ordinate body and passes on many measures in conjunction with the City Council, particularly those that relate to finances, granting of franchises and such.

All contracts are let by the Board of Awards, the personnel of which is the same as the Board of Estimates, with the exception that the City Register takes the place of the City Engineer.

## PARKS OF BALTIMORE

**B**ALTIMORE has a splendid system of parks. These are one of the features of the City. The reservations are, or will be, all connected; that is, they may be reached one from the other by especially constructed boulevards, the whole system being generally referred to as "Baltimore's chain of parks."

The City for years has been blessed with an abundance of park area, but very recently large sections of the suburbs, north and west, were acquired, which added many acres of beautiful and picturesque territory. In making these purchases Baltimore looked far into the future.

The topography of the country in some instances is almost mountainous, with beautiful streams winding in and out, the scene retaining much of its natural environment.

Druid Hill is Baltimore's largest park. It is famous, for among the parks of the country it is unequalled in natural beauty. It was purchased in 1860, and has an area of nearly 700 acres.

The rugged scenery of Gwynn's Falls Park, through which flows the stream Gwynn's Falls, at times rushing like a torrent, arises to challenge Druid Hill's claim to pre-eminent beauty. Here nature's handiwork is sublime.

As has been stated, the scheme of park development embraces, as one of its important features, broad boulevards, which represent the most advanced ideas and skill in highway construction.

The parks play an important part in City life, and in their administration and management are kept "abreast of the times." Many have swimming pools, which are enjoyed by thousands, and from which graduate each year scores of youthful expert swimmers. There are playgrounds for the tots, and these

SCENES IN BALTIMORE'S MAGNIFICENT PARKS

Swimming Pool in Patterson Park

View in Riverside Park  
View in Carroll Park

especial reservations are under the direction of the Playground Association, which has professional instructors or teachers in attendance. All the parks are supplied with baseball grounds, tennis courts and other facilities for healthy sport.

The parks are not supported by direct taxation, but from the receipts of the street railways, 9 per cent. of the gross receipts being devoted to this purpose. The fund thus raised, which is increasing yearly at the rate of 6 per cent., can not be diverted from the parks.

This amounts to approximately \$500,000 annually, which, with other sources of revenue, brings the total available for park purposes to \$510,000 as a yearly income, exclusive of any loan for park improvement and enlargement.

## BALTIMORE A HEALTHY CITY

**B**ALTIMORE is naturally an unusually healthy City, but nature has an ally in the form of a Department of Health, which for effective work and successful results is second to none. The Health Department of Baltimore is regarded as a model. It wages its warfare with thoroughly modern and scientific methods. "Nip in the bud" is its slogan. With the combination—nature, vigilance and science—enlisted on the side of health, pestilence and epidemic are unknown. This is all the more gratifying when it is recalled that Baltimore is an immigrant port. To fight against the importation of disease there are very strict regulations. The Quarantine Station, connected with the Health Department, is some distance from the City, and all incoming vessels are boarded and must be given a clean bill of health by a medical officer representing the Municipality before they are allowed to proceed.

Exceptional measures to combat tuberculosis are applied, and a corps of vigilant nurses is constantly working throughout the City with this object in view. These efforts have been crowned with the most gratifying results. In fact, the State, City and private organizations are rendering splendid service in the prevention of tuberculosis. There is in operation a Municipal hospital (Sydenham) for the treatment of infectious diseases. Exceptionally effective laws are enforced in the interest of sanitation. Inspectors pass upon edibles offered for sale to determine whether they are fit for consumption. If not, they are destroyed summarily. There is also a regulation which prescribes the quality of milk that may be sold, and inspectors with facilities for making tests are constantly at work.

A department for the treatment of rabies or hydrophobia is connected with one of the hospitals. Nearly all cases of this dread malady brought to this hospital are successfully treated.

THE JOHNS HOPKINS HOSPITAL  
Baltimore's world-famous medical institution

## BALTIMORE HOSPITALS

The hospitals of Baltimore are by no means the least of its features. The City, to the contrary, has developed into a mecca to which persons requiring the most scientific treatment come in search of cure, and thousands from afar are entered as patients yearly. Some of the most distinguished men and women of the country have come to Baltimore in search of health, and have gone away singing praises of Baltimore hospitals. The City is very proud of its development and equipment in this respect, for to be a leader in the world's work for humanity is a very enviable reputation to enjoy.

The great Johns Hopkins Hospital is a Baltimore institution. It is known all over civilization and has an unexcelled record of accomplishment. This establishment has many departments, one of the most recent of which is The Henry Phipps Psychiatric Clinic; for the erection and endowment of the building Mr. Henry Phipps donated nearly one million dollars. The purpose of this clinic is primarily for the study of nervous and mental diseases and affords exceptional opportunities for scientific treatment of these cases. Its laboratories are equipped with every modern appliance known to medical science.

As stated elsewhere, Baltimore makes especial effort to combat tuberculosis, and several large State and City sanatoriums are devoted to this purpose; while Sydenham Hospital, supported by the City and under the direction of the Commissioner of Health, treats infectious diseases exclusively.

Some of the other leading hospitals are:

Presbyterian Eye and Ear Infirmary,  
Maryland General Hospital,  
St. Luke's Hospital,  
Franklin Square Hospital,  
Church Home and Infirmary,  
Mercy Hospital,

Hebrew Hospital,  
University of Maryland Hospital,  
Union Protestant Infirmary,  
United States Marine Hospital,  
Quarantine Hospital,  
St. Joseph's Hospital.

BALTIMORE'S PUBLIC BATHS

A Typical Bathhouse

The largest artificial Swimming Pool in the United States  
Patterson Park

## BALTIMORE PUBLIC BATHS

The Public Baths of Baltimore represent one of the chief agencies in the City for the promotion of health and cleanliness. The system provides for cleansing baths, which are open all the year round in congested City districts, and recreative swimming pools, open during the summer.

There are six indoor cleansing baths, which contain 225 cabins and accommodate 650,000 patrons annually, erected at a cost of \$200,000.

There are also five recreative swimming baths in parks and on the riverfront, which have 250,000 patrons annually. Four portable baths (which scheme originated in Baltimore) are small houses carried from one street corner to another in crowded sections. They afford hot and cold water shower baths to over 75,000 persons yearly.

Two recreative centers in public parks are also equipped with shower and swimming baths. The one at Patterson Park has the largest artificial swimming pool in the United States. The annual cost to the City for maintenance of the entire Public Bath System is about \$40,000.

*Historic Fort McHenry*

BALTIMORE CITY COLLEGE

EASTERN FEMALE HIGH SCHOOL

## PUBLIC SCHOOLS

In providing educational facilities for children, most liberal provision is made, and a compulsory educational law is strictly enforced. The schools are of exceptionally high standard. There are kindergartens for the very young. Night schools for those who have advanced in years, but not correspondingly in scholastic attainment. A summer vacation school and a vocational school are a part of the system. The course of public school training terminates with graduation from the City College, Polytechnic Institute or the Girls' High Schools.

Teachers entering the educational service are not only required to be proficient along general lines, but they must take a two-year course of training in the Teachers' Training School.

There were 84,000 pupils and 2,064 teachers during the last scholastic year. There are 144 schools of all kinds.

*Lake Montebello—Water Supply*

**TYPE OF BALTIMORE'S FIRE APPARATUS**

The City's department is modern in every particular and of the highest efficiency

## FIRE DEPARTMENT

Baltimore's Fire Department has been officially declared by experts to be one of the most thorough in the United States. It has all known mechanical devices for fighting fires.

The high-pressure pipe line, which has been extended over an area of 170 acres in the business district (completed 1912), is the latest device and the most modern auxiliary of the fire-fighting establishment of the City.

The pipe line system consists of three powerful pumps, which force water through large pipes at tremendous pressure. These pipes are, of course, all underground, but are tapped at intervals of 170 feet and connected with hydrants that bring the water to the surface. The hydrants, which are depressed below the sidewalk and protected by covers that can be easily removed, are systematically placed through the "down-town" district. There are at present 226 hydrants, and the number will be increased as the system is extended. Water, under great pressure, may be thrown in or against a building by means of various nozzle devices connected directly to the hydrants or with hose especially adapted to pipe line service.

Baltimore has spent \$1,000,000 on its pipe line. Insurance rates in the area protected by the service have been greatly reduced.

The personnel of the Fire Department is of the highest type. Recruits must pass an examination, mental and physical, before entering, and the training which they subsequently receive makes them exceptionally fit for their exacting duties.

The department consists of 40 engine companies, 18 hook and ladders, two fire boats, two water towers, two automobile hose companies, automobiles for the chief, deputy and district chiefs. The force numbers 860 men. Automobile tractors are replacing horses at the rate of ten tractors a year.

An exclusive feature in connection with the signal system is a portable telephone which may be connected to the fire alarm boxes in the high pressure zone to establish communication with headquarters. Each company carries one of these portable telephones.

BUSY BALTIMORE STREET  
East from Charles Street

## POLICE DEPARTMENT

The Police Department of Baltimore consists of 1,129 persons, all told, from Commissioners down. The department, though supported by the City of Baltimore, is under the direction of a board appointed by the Governor of the State.

The department is splendidly disciplined, and its administration is along thoroughly modern lines. There are "traffic officers" stationed at all points where traffic is congested. Their duty is to "keep things moving." These officers have large powers. They may summarily arrest any who show a disposition not to obey to the letter the very exacting traffic laws. The officer keeps vehicles and cars "on the move" or stops them by whistle signals. In this way the problem is solved to the best advantage. The immovable "jam" that formerly occurred on down-town streets is now absent. Cars, great motor vans, automobiles and the collection of miscellaneous vehicles that crowd the thoroughfares pass along without confusion and unnecessary delay.

Aside from the traffic squad and main body of the force, there are mounted police, motorcycle men and automobile patrol wagons; a harbor patrol, which uses a steamer and a gasoline launch.

Police headquarters are at the Courthouse. Here the Police Board, the Marshal and the detectives are located.

*Fort McHenry*

LOCUST POINT

Showing a portion of Baltimore's splendid terminal facilities—railroad and shipping

## BALTIMORE'S WIRES UNDERGROUND

In maintaining its own electrical conduit system, Baltimore stands unique as being the first American City of importance to provide underground accommodation for wires and cables transmitting all classes of electrical energy.

The entire central portion of the City is served by the Municipal system, and the work of laying extensions to the more remote sections is progressing rapidly. Three million dollars have already been invested in the plan, and during the fall of 1912 the people of the City approved an additional loan of \$2,000,000 to be expended in a continuation of the work.

By virtue of certain Legislative enactment, it is made mandatory on the part of wire-operating corporations and individuals to remove, upon notice of the completion of the system in various given districts, their poles and overhead wires and, in substitution therefor, to install cables in the conduits. The electric light and power, telephone and telegraph companies, realizing the advantages to be derived in the way of greater protection and more facile access to their equipment, heartily co-operate with the City authorities in the prosecution of the work. Furthermore, the Municipal ownership of the system insures a uniform and reasonable rate of rental for the underground space thus provided.

## INDUSTRIAL ADVANTAGES OF BALTIMORE

**A** MANUFACTURER must have facilities for assembling raw material at his plant. He must have facilities for getting a finished product on the market, and he must have a MARKET.

Baltimore furnishes these accessories.

*First*—The City has splendid railroad service in all directions. It offers transportation facilities by water that are unexcelled. It is a great seaport, foreign and coastwise. It also utilizes the great Chesapeake Bay and its numerous tributaries, thus connecting with scores of towns and landings, penetrating far into Maryland and Virginia.

*Second*—Baltimore is the natural feeder of its immediate vicinity in all directions. It has at home about 700,000 persons for whom it must provide; but it has another natural market—that tremendous area to the South and Southwest and West. This is Baltimore's undisputed sphere of industrial and commercial influence.

*Third*—No Chinese Wall, in the form of excessive freight rates, separates the manufacturer from his market. Baltimore enjoys lower rates than other cities, as the table of comparative rates, given elsewhere in this book, will show.

*Fourth*—The manufacturer in Baltimore is not harrassed by labor troubles.

*Fifth*—Manufacturing implements—machinery, apparatus, mechanical tools actually employed in the manufacture of articles of commerce—are not taxed in Baltimore for City purposes.

*Sixth*—Insurance rates on manufacturing and mercantile establishments in Baltimore are lower relatively than in other cities.

*Seventh*—Power, fuel and light are cheap. Wheels turn more economically in Baltimore than anywhere else.

Great warehouses of this character are one of the principal features of Baltimore's railroad terminal facilities

Grain Elevator and Freight Sheds

## BALTIMORE'S TRADE AND INDUSTRIAL ORGANIZATIONS

The business associations of Baltimore, particularly the large central bodies, are important elements in the City's commercial and industrial life. There are a number of such organizations and they exert a tremendous influence. Though they have their respective spheres, they are bound by ties of business and social relationship. By cohesive action and unity of purpose they have time and again made their influence felt to the mutual benefit of the City and the thousands who maintain business relations with it. Through them the business interests of Baltimore operate upon an organized and systematized basis. The good effect is not merely local, for Baltimore is the great commercial and industrial headquarters of thousands of miles of territory.

Organization and combined force have not only helped those who trade in Baltimore, but are largely responsible for placing the City in the front rank of the great commercial centers of the country.

The usefulness of these associations is not confined to the avenues of trade. They have been aggressively active in the many successful projects for the proper civic development of Baltimore, and are vital forces in the City's welfare.

## BALTIMORE'S GREAT INDUSTRIES

---

### MANY ENTERPRISES FLOURISH IN THIS INDUSTRIAL DISTRICT

---

Baltimore leads in Canning and Preserving; Millions worth of Fertilizer shipped; the great Straw Hat Industry; foremost Clothing Manufacturing Centre; Copper Refining; large Cotton Duck Plants; Steel Rails; Shipbuilding Interests, etc.; cheap Light and Fuel; no Labor Troubles.

**A**CCORDING to the United States Census of 1910 there were, at that time, within the City limits of Baltimore (which is  $31\frac{2}{3}$  square miles in area) 2502 manufacturing establishments, comprising 123 specific industries, employing 9369 salaried employees and 71,444 wage-earners, who were paid annually \$41,742,000. The annual value of their output was \$186,978,000. The capital represented by these enterprises amounted to \$164,437,000, not including the value of rented buildings. A reliable compilation during 1910 shows that the Baltimore industrial district (that area contiguous to and including the City of Baltimore) produced manufactured products to the value of \$265,000,000 yearly. A later compilation made in 1914 shows that the manufactured products of this district had increased in value to \$300,000,000. This makes Baltimore one of the foremost industrial centers of the United States.

Immigrants disembarking

## LEADS IN CANNING AND PRESERVING

Baltimore ranks first among the cities of the United States in the canning and preserving industry, which employs thousands of workers. Its annual product is valued at millions of dollars.

## MANUFACTURE OF CLOTHING

In the manufacture of clothing Baltimore occupies a leading position. United States Census of 1910 shows that the value of men's and women's clothing (including shirts, overalls, etc.) amounts annually to \$41,000,000. These industries employ 24,000 persons. Most of this clothing is of the higher grades. There are 393 establishments in Baltimore, some of them the largest in the world.

## SHIPS MOST FERTILIZER

More fertilizer is shipped from Baltimore than from the combined manufacturing plants of any other State. The value of fertilizer produced in Baltimore annually is \$16,000,000.

## THE GREAT STRAW HAT INDUSTRY

The straw hat industry is represented by establishments employing thousands of hands, producing millions of dollars' worth of goods yearly.

## COPPER

The copper smelting and refining works and coppersmithing in Baltimore represent for plants an investment of \$20,000,000. Baltimore has the largest copper refining plant in America.

Copper exported from Baltimore during the year ending October 31, 1913, amounted to 134,000 tons.

Baltimore's industrial activity extends to so many branches that it is impossible to discourse specifically upon all, but the following are some of the chief enterprises, in many of which

McCALL FERRY DAM ON SUSQUEHANNA RIVER

The electric current generated at this mammoth plant turns the industrial wheels at Baltimore, 40 miles away

## ELECTRIC POWER FROM THE SUSQUEHANNA

**T**HERE has been developed for Baltimore a tremendous source of electric energy. Across the Susquehanna River, at McCall Ferry, is the third longest dam in the world, exceeded only by the dams at Keokuk, Iowa, on the Mississippi River, and at Assouan, on the Nile. Behind this barrier, which is half a mile long, 55 feet high and 65 feet thick, the Susquehanna River forms a lake eight miles in length.

Their foundations resting on the bed rock of the river, the power-house and dam contain 300,000 cubic yards of concrete. The power-house provides space for ten units, with a total maximum capacity of 135,000 horse-power.

From McCall Ferry, in a straight line, the steel towers and the aluminum cables of the transmission line stretch to Baltimore, 40 miles away, where the harnessed river drives the wheels of the City's industries and lights the homes and streets.

Independent steam generating stations, storage batteries and an unexcelled distribution system assure adequate, efficient, never-failing service. Baltimore offers the manufacturer cheap electric power in abundance. The rates for electric power in Baltimore are the lowest on the Atlantic Seaboard.

The harnessed river furnishes the power necessary to propel the street cars of the extensive transit system of Baltimore and its suburbs. Power from the Susquehanna moves the trains in the Belt Line Tunnel of the Baltimore and Ohio Railroad, beneath the City of Baltimore, one of the earliest electrically-operated tunnels in the world. The entire power requirements of the Maryland Electric Railways Company, which operates the converted steam road connecting Baltimore with Annapolis, come from the same source.

Abundant power at low rates, with an efficient and comprehensive service, gives Baltimore a tremendous advantage, which no manufacturer can afford to overlook.

### PLAY-GROUND SCENES

Recreation centers have a telling influence on city life

## NO LABOR TROUBLES

Baltimore has practically no labor troubles. After the great fire, the City was rebuilt without one strike. Owing to conditions that obtain in no other large community, the capitalist and laborer maintain a status which enables them to operate to their mutual interest, and to the benefit of the whole industrial situation.

Baltimore seems totally unaffected by those periodic gusts of labor agitation that sweep over one section of the country or another, unsettling conditions, causing industrial distress and financial loss.

The City is exceptionally fortunate in this respect, primarily because of natural conditions. The working class is enabled to live well. The abundance of seasonable foodstuffs at reasonable prices, cheap rents, the opportunity to buy homes on the easiest terms are elements which contribute to the contented condition of the laboring man. In Baltimore he gets the most out of life for himself and his family. The average laborer owns his home. Tenements are practically unknown. Then there is plenty of work and plenty of workmen.

Industrial tranquillity lasts the year round.

*A Bee Hive of Industry*

**SOUTH STREET, NORTH FROM GERMAN—PART OF BALTIMORE'S FINANCIAL CENTER**  
Baltimore is noted for the large number of successfully conducted banks and other financial institutions

## BALTIMORE'S FINANCIAL INSTITUTIONS

Few cities enjoy the enviable reputation of Baltimore for sound financial methods, or have a larger number of successfully conducted banks and trust companies. Baltimore is noted for its excellent banking facilities.

There has not been a bank failure in Baltimore for many years, and the conflagration of 1904, which caused a loss estimated at \$125,000,000, resulted in no embarrassment to the City's financial organizations, except that arising from the destruction of buildings.

There is ample capital in Baltimore for legitimate enterprises. It is not a City given to the encouragement of "wildcat" schemes, but sound projects can find substantial backing.

## BONDING

The first bonding or surety company was organized in Baltimore. This City occupies a commanding position in this branch of finance.

Millions of dollars are invested here in bonding enterprises. The assets of numerous companies total millions. They have branches practically all over the world; in fact, Baltimore is the bonding headquarters of the world.

## INDUSTRIAL BUILDINGS

Baltimore has a series of modern "Industrial" or "Beehive" buildings, where heat, light, power and space in proportion to the large or small needs of any and all kinds of industries can be had on terms and conditions attractive even to infant enterprises. This enables enterprises to be started without the usual capital outlay required for investment in land and building. It offers to local industries and to those outside the City, desiring to establish operations here, every essential factory requirement that can be obtained by the most successful manufacturers.

SEA OF FREIGHT CARS, LOCUST POINT—BALTIMORE AND OHIO R. R.

This is a striking exhibit of Baltimore's terminal and transportation facilities, giving an idea of the arrangements for handling freight

(Commercial Section)

## COMMERCE AND TRANSPORTATION

---

A Splendid Harbor; Grain rapidly handled; low Freight Rates; Magnificent Piers; Steamship Lines; Great Railroads, with terminals at deep water, centre in Baltimore; Colossal Municipal Piers; Great Jobbing Trade; Plants and Machinery Exempt from Taxation, etc.

**B**Y reason of its geographical location, the City, from the very first days of the "iron horse," became a railroad center. It has, also, always been one of the important seaports of the country.

That Baltimore lived and thrived may be attributed to its natural maritime advantages. It early became a distributing point for merchandise that came over all seas and from all lands. It sent, and still sends, back ships burdened with products of every section of this country.

Long before steam became the propelling force of commerce, Baltimore's supremacy was assured. The Baltimore clipper was famous; it was sailing every sea and was seen in every port.

The City has a largely-developed trade in every respect, particularly through the South. Being of the South, this seems natural, but Baltimore is not dependent upon sentiment alone.

As the metropolis of the South, Baltimore is the natural source of supply of this section, and its trade throughout the vast country is large and ever-increasing. Nor is Baltimore's sphere of commercial influence confined to the great region south of the Mason and Dixon Line. Its merchants are invading the North. They have captured a good percentage of trade of Pennsylvania and New York State, and are successfully operating in the Ohio Valley.

As a jobbing center Baltimore ranks among the foremost cities of the United States. Its jobbing trade, comprising principally dry goods, groceries, food products, drugs and tobacco, represent annually \$250,000,000, which, with its commission business of \$100,000,000, brings the total to \$350,000,000.

STEAMBOATS AT LIGHT STREET WHARF

Vessels of this type carry passengers and merchandise from Baltimore to points on Chesapeake Bay and its numerous tributaries

## THE HARBOR OF BALTIMORE

Baltimore has a splendid harbor. The channel leading from Baltimore is 35 feet deep and 600 feet wide, and there is a project under way to deepen it to 40 feet and to make it 1000 feet wide.

Baltimore is on the Patapsco River, a tributary of Chesapeake Bay, and is about 150 nautical miles from the Atlantic Ocean as vessels travel. The harbor may be said to begin where the Patapsco and the bay meet, about 14 miles from the center of the City.

There are 18 miles of dockage and waterfront within the contracted City limits, and many times that area in the immediate environs.

Baltimore harbor, even within the City limits proper, can accommodate the largest vessels. Such, for instance, as liners of 20,000 tons displacement or more enter and leave Baltimore harbor. Baltimore has a busy waterfront. It is very picturesque and is a shelter for all manner of craft, from the ponderous Atlantic liner to the Chesapeake Bay oyster pungy.

*Typical Chesapeake Bay Steamer*

### BALTIMORE'S TERMINAL FACILITIES

Grain Elevator, N. C. Railroad — The harbor is flanked on either side by elevators and piers, where the largest ships find accommodations

## GRAIN RAPIDLY HANDLED

Baltimore has long been justly famous for handling quantities of export grain and has largely contributed to the nation's wealth through these facilities. Railroads had the foresight to build the present terminal elevators, which have a capacity of 5,000,000 bushels, and to properly equip them with dryers to give "out of condition" grain deserved attention. They also established great terminal yards with facilities for rapid and safe unloading of cars. The elevators can place 2,000,000 bushels of grain aboard vessels in a day, and this capacity will soon be increased. Vessels are loaded while in deep water alongside the elevators, avoiding the use of lighters and floating elevators. The railroads have in every other way supported the efforts of grain merchants, who, for years, have labored to make this a favored market for domestic and export grain.

Baltimore Chamber of Commerce weighing and inspection departments are models of their kind, giving confidence and security at home and abroad.

Much Canadian grain comes to Baltimore for export and is handled so satisfactorily that tonnage is constantly increasing.

On grain for export from the Great Lakes there is a difference of three-tenths of a cent per bushel in Baltimore's favor, compared with New York and Boston. Nine-tenths is the present difference in Baltimore's favor on grain from the West, arriving all rail.

Table of comparative distances showing how much nearer Baltimore is to Southern and Western cities than are Philadelphia, New York or Boston.  
Hence, Baltimore enjoys cheaper freight rates than other cities mentioned. Consult Exhibits, 1, 2, 3.

## SPLENDID RAILROAD TERMINAL FACILITIES

ALTIMORE is the local and reshipping market for the fish, oyster and crab supplies of the fertile waters of the Chesapeake Bay and tributary rivers and streams.

The railroads, Baltimore and Ohio, Pennsylvania and Western Maryland, have carfloats, large docks with warehouses, cranes and facilities for receiving, storing and shipping all kinds of raw material and manufactured articles. Lighterage companies have a multiplicity of tugs, scows and lighters, expediting commerce of the port.

The Baltimore and Ohio system has domestic and export elevators, hay sheds, terminals and storage warehouses, coal piers, and maintains general offices in Baltimore. The Baltimore and Ohio freight yards are extensive and reach all portions of the City. About 10,000 employees are located in Baltimore.

The Pennsylvania Railroad system has division offices in Baltimore and extensive terminals. The company's export and domestic elevators, hay sheds and many terminal and storage warehouses are of the usual high type, and a new passenger station facilitates travel.

The Western Maryland Railway, like the other railroads above named, has freight terminals in the business district and storage warehouses at convenient locations. In addition, docks and warehouses on the waterfront give it opportunities for prompt handling of export, import and domestic shipments.

The co-operation between the Western Maryland and New York Central lines through the extension from Cumberland to Connellsville, and connection with the Pittsburgh and Lake Erie Railroad, greatly benefits Baltimore, since new tonnage is

NEW UNION STATION, PENNA. R. R.

MT. ROYAL STATION, B. & O. R. R.

handled between Baltimore and the West under attractive conditions.

The Maryland and Pennsylvania Railroad, operating between Baltimore and York, Pa. (77 miles), has a large dairy and slate, as well as suburban passenger, business.

The Canton Railroad is a terminal railroad of Baltimore offering connecting line switching service on advantageous terms to industries located on the extensive waterfront property of the Canton Company.

### PLANTS AND MACHINERY THAT ARE EXEMPT FROM TAXATION

Under a City Ordinance, authorized by an Act of Assembly, mechanical tools, implements, machinery and manufacturing apparatus, actually employed in the manufacture of articles of commerce in Baltimore, are exempted from City taxes, provided application be made annually before a specified time.

Following is a table of exemptions from 1896 to 1913:

1896.....	\$3,405,055
1897.....	4,695,518
1898.....	4,829,912
1899.....	4,178,945
1900.....	5,593,270
1901.....	4,671,730
1902.....	4,875,396
1903.....	5,734,446
1904.....	6,203,784
1905.....	6,177,262
1906.....	7,527,328
1907.....	8,067,442
1908.....	8 842,573
1909.....	8,878,644
1910.....	9,434,978
1911.....	9,829,312
1912.....	10,406,817
1913.....	11,415,660

**EXTENSIVE FREIGHT YARDS OF THE NORTHERN CENTRAL (PENNA.) RAILROAD**  
Baltimore's freight facilities are constantly being enlarged. Millions of dollars will be spent in development in the near future

## COAL AND COKE

The position Baltimore occupies in its ability to move, by rail and water, bituminous coal from the enormous deposits in Maryland and West Virginia gives the City a commanding position in the soft coal trade. There are 5,000,000 tons of coal annually exported from Baltimore.

Baltimore consumes 1,000,000 tons a year.

The United States Collier Neptune recently took on at one of the coal piers 15,000 tons in one day.

The short haul on coke from the ovens to Baltimore and nearness of limestone deposits make this City an ideal place for the smelting of ore from Cuba and Spain. Steel can be manufactured into railroad supplies under advantageous conditions and sent by water at low cost to home and foreign ports.

*Great Piers of the Baltimore and Ohio Railroad*

**WHERE IMMIGRANTS LAND**

Thousands of foreigners annually find their way into America through this gateway

## STEAMSHIP LINES

Baltimore, being one of the great ports of the Atlantic Coast, is in constant commercial intercourse with all parts of the world. There is a score or more lines of steamships engaged regularly in foreign trade, and they are represented by a multiplicity of vessels.

Foreign steamship lines having regular sailings from Baltimore are:

Johnston Line, Baltimore to Liverpool.

North German Lloyd, Baltimore to Bremen.

Holland-America Line, Baltimore to Rotterdam.

Lord Line, Baltimore to Belfast, Cardiff and Dublin.

Atlantic Transport Line, Baltimore to Havre and London.

Hamburg-American Line, Baltimore to Hamburg.

United Fruit Co. Line, Baltimore to Port Antonio, Jamaica.

Red Star Line, Baltimore to Antwerp.

Furness Line, Baltimore to Leith.

Creole Line, Baltimore to Italy.

English-American Line, Baltimore to Huelva, Spain.

Scandinavian-America Line, Baltimore to Copenhagen.

United Fruit Company, Baltimore to Santo Domingo.

Atlantic Fruit Company, Baltimore to Jamaica.

Atlantic Fruit Company, Baltimore to Cuban ports.

Munson Line, Baltimore to Havana and Colon.

Earn Line, Baltimore to the West Indies.

Lanasa & Goffe Importing and Steamship Company, Baltimore to Port Antonio, Jamaica, and Cuban ports.

Aside from the above, there are hundreds of steamships of the "tramp" or transient class, which are constantly arriving or leaving port; also that rapidly vanishing class of vessels, the "square riggers."

U. S. S. "NEW HAMPSHIRE" IN BALTIMORE HARBOR  
Great warships, as well as big merchant liners, contribute to the impressiveness of the water front

Steamships which regularly ply between Baltimore and Atlantic Coast ports are fitted for first-class passenger service as well as freight. Commodious steamers leave daily, going north and south, carrying hundreds of passengers and tons of freight.

It is estimated that 13,000 craft of all character sail between Baltimore and points on Chesapeake Bay and its tributaries. These vessels traverse all navigable waters of Maryland and Virginia, touching at the larger cities and numerous obscure landings. Bay steamers, as a rule, are large and modern, having excellent passenger accommodations. The oyster punny, other small sailing craft and a multitude of power boats carry much of Baltimore's Chesapeake Bay commerce.

*Great Grain Elevators of the Baltimore and Ohio Railroad*

### A GLIMPSE OF THE SUBURBS

The country is very picturesque and offers limitless opportunities for splendid development

(Domestic Section)

## LIVING CONDITIONS

---

Baltimore a City of Owned Homes; Reasonable Food Prices; Cheap Rents and Fine Markets; Excellent Street Car Service; Exceptionally Good Climate; Oysters, Crabs and all Edibles in Abundance; Baltimore offers a Great Opportunity to "Live Well."

**I**T has been stated that Baltimore is a City of homes. It is more than this. Baltimore is a City of OWNED homes. Houses of any class may be purchased upon terms that place OWNERSHIP within reach of the most humble wage-earner.

The report of the British Board of Trade, which made an exhaustive inquiry into the cost of living in American cities, lends force to this statement. It says:

"House ownership among the working classes of Baltimore has made great progress, and among American cities Baltimore claims to take a leading place in this respect.

"In 1900, 20.5 per cent. of all private dwellings in the City were owned unencumbered by their occupants; 7.4 per cent. were owned, but encumbered, while 72.1 per cent. were hired. The number of building loan societies is very large, some 200 having meeting places in the City.

"The future owner (purchaser) must, as a rule, provide about one-third of the proposed cost of the dwelling, and the society advances the balance and issues shares to the same amounts, upon which interest of 6 per cent. is charged until they are paid up; but in the meantime the borrower is entitled to dividends upon these shares.

"The single family dwellings enjoy an absolute predominance in Baltimore," says the report.

SUBURBS OF BALTIMORE

Well paved streets and boulevards, flanked by stately mansions

"In 1900 the percentage of families in dwelling-houses occupied by one family was 72.6, while the percentage in dwelling-houses occupied by two families was 20, and the percentage in dwelling-houses occupied by three or more families was 7.4."

This same report goes on and describes Baltimore as a "City of practically no tenements," as the tenement evil is understood in connection with other cities, and is authority for the statement, which is a well-known and established fact, that a house in Baltimore can be rented for about one-half a similar house in a like neighborhood can be rented for in New York.

Baltimoreans, at least, know how to live. Of the 115,243 private dwellings in the City, about 50 per cent. are two stories in height, modern in every detail, and are usually very attractive. Many of the latest styles are "detached," have ornamental bay windows, and each, by law, must be provided with a bathtub and the best sanitary appliances.

A real home in Baltimore is within reach of all. And this home is on a good street, in a respectable neighborhood. Baltimoreans are not stowed away in the uppermost stories of unhealthy, insanitary tenement houses, with dubious and doubtful associates under the same roof, and in an atmosphere of social, physical and moral impurity.

Baltimore has many stately mansions amid the environment of wealth and dignity, which are very impressive, but the thousands of small dwellings, sheltering thousands of contented families, each dweller in his or her own "castle," offer a splendid object-lesson.

The excellent system of street car lines enables a person to reach any part of Baltimore for a 5-cent fare, which also includes one free transfer. This is a great boon to the wage-earner who desires to live in the open, away from the office, factory and workshop.

BALTIMORE MARKETS

Three views of Lexington market, possibly the most famous in the country

## BALTIMORE MARKETS

The habit of "going to market" is so fixed a custom, and so generally practiced as a part of the domestic routine by the Baltimore housekeeper, that markets are supported and flourish as they do nowhere else. Moreover, the markets, on market days, are one of the sights of the City. Few strangers come to Baltimore who do not join the picturesque throng at one of these centers. To see these markets in "full blast" is indeed interesting. Not only the markets themselves, but all approaches for squares take on the market environment. Along the streets are hundreds of wagons, converted into stalls, and scores of improvised shops line the curb; the flower girl, the ubiquitous faker, the country folk, the thrifty housewife, making her discriminating purchases, is a spectacle well worth witnessing.

Lexington Market is the most noted and is, possibly, without a serious rival in the country. It is very central, being contiguous to, in fact within, the retail shopping district. It is three squares long, but the market's "sphere of influence" extends for squares in all directions.

All markets are owned and under the control of the Municipality.

Centre Market, built after the fire of February, 1904, on the site of Marsh Market, which was destroyed, is a splendid modern structure. It cost \$500,650 and extends from Baltimore to Pratt street, three blocks. There are two great halls over the northern (Baltimore street) end, which are used by the night classes of the Maryland Institute. Twelve hundred pupils may be comfortably accommodated here. There is also another large hall above the produce section, which will seat 2500 persons. The wholesale and retail fish market, connected with the Centre, has been pronounced the most complete in the world.

The Baltimore markets are: Belair, Canton, Centre, Cross Street, Fells Point, Hanover, Hollins, Lafayette, Lexington, Northeast, Richmond.

BALTIMORE'S FOOD SUPPLY  
Produce and Fish Markets

## A NOTED FOOD SUPPLY CENTER

**B**ALTIMORE'S markets are a success because of the great variety and character of the food-stuffs on sale. The investigators for the British Board of Trade, who recently made a study of living conditions in American cities, were struck by this advantage, and in their report said:

"Baltimore is a noted food supply center—fruits, vegetables, dairy products, poultry and meat are produced in the fertile districts of the State of Maryland, and the shores of the Chesapeake are especially favorable for those branches of agriculture. The City is remarkable among the large cities of the United States for the abundance and varied character of its retail markets. In the principal districts of the City are covered markets, where all kinds of meat, vegetables, fruit, butter and eggs are on sale."

The report also refers to the extensive patronage enjoyed by the markets, and the great number of butcher stalls receive particular mention.

Baltimore is singularly fortunate as to food supply, as the British report says. Things regarded as luxuries elsewhere are here matters of every-day commonplace diet. The City being situated within two hours' ride of the mountains, and at the very door of a great trucking region (the adjacent counties of Maryland), has a wonderful advantage. The great Chesapeake Bay and the Patapsco River yield up an enormous supply of crabs, oysters and fish. Several lines of steamers bring tropical fruits in abundance. Maryland is the home of the terrapin and the canvas-back, and Baltimore is the gastronomic center, where these delicacies are prepared and where they are consumed in large quantities.

Baltimore offers the best of foodstuffs in abundance; its markets bulge with the products of the season; reasonable prices make it possible for those of limited income to enjoy the benefits of these exceptional advantages, facts that contribute to Baltimore's reputation as an exceptionally desirable place of residence.

WASHINGTON MONUMENT AND VICINITY  
This is the first monument erected to George Washington

## MISCELLANEOUS SECTION

Population; Baltimore a Leading Educational Centre; Aquatic Sports; Theatres; Hotels; Churches; Monuments; Climate; Points of Interest; Chronological History from 1603 to 1913.

**A** VERY unique situation is presented in connection with the enumeration of the population of Baltimore. According to the United States Census Report for 1910, its population within the City limits was then 558,485; while its population, including those persons who reside just beyond the City limits, was 647,884.

This condition was of sufficient import to call from Director Durand of the Census a special report (August, 1911). In this he referred to the distinction to be made in favor of Baltimore when comparing the population of cities. The numerical peculiarity concerning Baltimore's population arises from the fact that its corporate limits have not been extended correspondingly as the City's inhabitants have multiplied.

The census reports show that Baltimore has actually grown apace, and is the most densely populated City in the country, but that thousands of Baltimoreans who live "just over the line" are not listed as residents. At the same time they are not divided from the corporate limits by squares of unimproved lots, but live on well-paved streets, in "built-up" sections which, in some instances, extend a mile beyond the present limits.

Thus, according to the census of 1910, about 90,000 persons (since greatly increased in numbers) outside the technical bounds are so essentially a part of Baltimore in their business and social relations that they should be included when a comparison of cities is made.

Baltimore has  $31\frac{2}{3}$  square miles within its contracted limits, and its population within these bounds is, according to the census, 558,485. St. Louis, with  $61\frac{1}{3}$  square miles, twice the area of Baltimore, has a population of 687,029.

St. Louis ranks fourth, but Baltimore would no doubt arise to dispute that claim if its area were doubled.

GOUCHER (Woman's College) COLLEGE

MARYLAND INSTITUTE—School of Art and Design

## BALTIMORE AN EDUCATIONAL CENTER

Baltimore, as a center of learning, is proud of one of the leading institutions of the world—the Johns Hopkins University. This is the foremost institution in the United States devoted to research work.

The great Johns Hopkins Hospital, with its Medical School and other educational features, is unequalled by any similar organization. It, too, is world famous.

The Goucher College of Baltimore, formerly the Woman's College, has a fixed place among the advanced educational institutions of the country.

The City also boasts of the Peabody Institute, the Maryland Institute of Art and Design, the Walters Art Gallery, which is far-famed; the Enoch Pratt Free Library, with its multiplicity of branches; the Maryland University, with its various departments of learning, and a score of other institutions devoted to culture and intellectual pursuits. Aside from these, there are the Baltimore public schools, with their several colleges. These are referred to at length elsewhere.

There are many medical colleges in Baltimore, as well as others devoted to law. The City, in fact, may be aptly described as a "College Town." Thousands of students, representing not only this but almost every country of the civilized world, have received and are receiving their education in Baltimore, which occupies a commanding position in the arts, sciences and culture generally.

For the study of painting, music and sculpture, Baltimore offers unexcelled opportunities, and large numbers of pupils from various sections are taking advantage of these.

The Baltimore College of Dental Surgery is the oldest college of this kind in the world.

STATE NORMAL SCHOOL

ENOCH PRATT FREE LIBRARY, Main Building

## BALTIMORE'S EXCELLENT CLIMATE

Baltimore has an excellent climate. The City is so situated that it does not experience the extremes of weather. It is free from the rigors of the North and yet it is not inflicted with the continued enervating heat of the South. The changing seasons are one of the delights of the locality. There is no monotony; no prolonged hot, dry spell to face in summer, and no long, dreary, severe winter, with its accompanying hardships. The winters are short, being relieved by beautiful spring and fall conditions. The rainfall is well distributed throughout the year and destructive storms are practically unknown.

Baltimore is, likewise, free from all other elemental disturbances, which, in some sections, are a source of constant unrest, if not actual peril.

## AMPLE HOTEL ACCOMMODATIONS

Baltimore has splendid hotels. In this respect it is abreast of any city of the country of its size, and far ahead of the majority.

Just at present it is better equipped than ever, owing to the recent establishment of several large hotels. These are great institutions, designed on a large scale, built on a large scale, and operated in accordance with advanced ideas and methods.

There are scores of hotels, so the visitor will have no difficulty finding accommodations at reasonable rates.

Baltimore as a "Convention City" has entertained thousands of visitors without inconvenience to guests, and it is now better prepared than ever to assume this agreeable responsibility.

THE UNIVERSITY OF MARYLAND

PEABODY INSTITUTE

## AMUSEMENTS—AQUATIC SPORTS—THEATRES

Miles of waterfront afford Baltimoreans unlimited opportunities for aquatic sports. Yachting, boating, crabbing, fishing are pastimes within reach of the most humble.

Any man may have his little power or sail boat, which at once extends his suzerainty, not only over the Patapsco River, but the great Chesapeake Bay. Here he may disport himself at will. Baltimore offers a great opportunity to the man with a boat. A race on the Patapsco, between the trained crews of rival clubs, is a sight never to be forgotten.

The pleasure seeker, who disdains the lure of salt water and the thrills of the nibble, has a splendid collection of theatres, including grand opera, for Baltimore boasts of first-class, wholesome amusement features, where the cream of the passing show may be seen. The City's theatres are all modern and commodious, and public taste demands and receives the best that the stage has to offer.

*The Shepherd and his Flock—Druid Hill Park*

BALTIMORE STREET, WEST FROM NEAR CALVERT  
All buildings in picture were erected since fire of 1904

## POINTS OF INTEREST IN BALTIMORE

NOTE:—The places listed are approximately contiguous; that is, in order named, one is not far removed from another. Hence, it will be possible to "swing around the circle" by going from point to point, beginning at Washington Monument.

Washington Monument (180 feet high)—The first monument to George Washington. Charles and Monument streets (Mt. Vernon Place).

In the immediate vicinity of the monument are:

The Peabody Institute, school of music, art, library, statuary and paintings—Monument and Charles streets.

Statues of:

George Peabody—Mt. Vernon Place; Chief Justice Roger Brooke Taney, General John Eager Howard. Washington Square (Charles street and Madison)—Severn Teackle Wallis—Washington Square near Centre street.

Mt. Vernon M. E. Church—Northeast corner Monument and Charles streets (Mt. Vernon Place). Attached to the wall of this building is a tablet bearing the following inscription:

"Francis Scott Key, author of 'The Star-Spangled Banner,' departed this life on the site of this building, January 11, 1843."

Walters Art Gallery—The finest private art collection in America. Northwest corner Charles and Centre streets.

Unitarian Church—Magnificent specimen of colonial architecture. Northwest corner Charles and Franklin streets.

Y. M. C. A. Building—Cathedral and Franklin streets.

Roman Catholic Cathedral—Cathedral and Mulberry streets.

Cardinal's Residence—Charles and Mulberry streets.

Enoch Pratt Free Library—Main Building, Mulberry street, near Cathedral.

The Johns Hopkins University Buildings—Howard street and Druid Hill avenue.

Baltimore City College—Howard street, opposite Centre.

CALVERT STREET, NORTH FROM BALTIMORE STREET  
In the center is Battle Monument

Lee House—Residence of Gen. R. E. Lee (with United States Engineer Corps) during erection of Fort Carroll at entrance to Baltimore Harbor. Madison avenue, near Biddle street.

Fifth Regiment Armory—Baltimore's great convention hall. Hoffman and Bolton streets.

Mt. Royal Station (B. & O. R. R.)—Cathedral street, Preston street and Mt. Royal avenue.

Bryn Mawr School—Cathedral and Preston streets.

Revolutionary War Monument—Mt. Royal avenue, Cathedral and Oliver streets.

Union Station (Pennsylvania R. R.)—Charles street and Jones Falls.

Polytechnic Institute—North avenue, from Calvert street to Guilford avenue.

Goucher College, formerly "Woman's College"—St. Paul street, between Twenty-second and Twenty-fourth streets.

Homewood Park—Johns Hopkins University. Charles street and University Parkway.

Druid Hill Park—Six hundred and seventy-four acres, noted for its natural beauty. One of the finest parks in America.

Soldiers and Sailors' Monument—Druid Hill Park, between Druid Lake and Mt. Royal Reservoir.

Watson Monument—Mexican War shaft. Mt. Royal avenue and Lanvale street.

Maryland Institute—School of art and design. Mt. Royal avenue and Lanvale street.

Confederate Monument—Mt. Royal avenue, near Lanvale street.

Francis Scott Key Monument—Erected to author of "The Star-Spangled Banner." Lanvale and Eutaw streets.

Lexington Market—Baltimore's famous market. Lexington street, from Eutaw street to Pearl street.

LEXINGTON STREET, EAST FROM HOWARD  
A section of Baltimore's busy shopping district, where one is always assured of meeting an animated crowd

Edgar Allan Poe's Tomb—In Westminster Presbyterian Churchyard. Southeast corner Fayette and Greene streets.

Fourth Regiment Armory—Fayette street, near Paca.

Maryland Workshop for the Blind—Southwest corner Fayette and Paca streets.

Camden Station (B. & O. R. R.)—Camden and Eutaw streets.

Mt. Clare Shops (B. & O. R. R.)—Where early locomotives were built. Pratt street, from Poppleton street to Carey street.

Mt. Clare Station—Where first telegraph message, "What hath God wrought," was received. Poppleton street and B. & O. R. R.

Carroll Park—With colonial mansion of Charles Carroll, barrister. Monroe street and Baltimore and Ohio Railroad.

Fort McHenry—During bombardment of which Francis Scott Key composed "The Star-Spangled Banner."

Fort Carroll—Mid-stream at entrance of Baltimore harbor. Erected 1848-1852 under direction of Gen. R. E. Lee, then of United States Engineers.

Piers at which large ocean steamers dock—Locust Point, near Fort McHenry.

Riverside Park—Formerly Fort Covington, which prevented a land attack upon Fort McHenry during bombardment in 1814. Randall and Johnson streets.

Federal Hill Park—Used as a fort during the Civil War. Hughes street and Battery avenue.

Armistead Monument—To memory of Lieutenant-Colonel George Armistead, War of 1812-14. Federal Hill Park.

Where the Fire of 1904 started—Southeast corner German and Liberty streets.

Congress Hall—A tablet on the wall, east side of Liberty street, south of Baltimore street, says:

HOWARD STREET, NORTH FROM LEXINGTON STREET  
Another view of the shopping district

"On this site stood Old Congress Hall, in which the Continental Congress met December 20, 1776, and on December 27, 1776, conferred upon General Washington extraordinary powers for the conduct of the Revolutionary War."

Hood Monument—Erected by City to John Mifflin Hood, President of Western Maryland Railroad, 1874-1902.

Baltimore and Ohio Office Building—Main offices of B. & O. R. R. Northwest corner Charles and Baltimore streets.

Maryland Historical Society Building—Historical documents, paintings, statuary, etc. Northwest corner St. Paul and Saratoga streets.

Court House—One of the finest courthouse buildings in America. Calvert and Lexington streets.

Battle, or Baltimore, Monument—Erected in memory of soldiers who fell in defense of Baltimore during British attack, September 12-13, 1814. Calvert street, between Fayette and Lexington streets (Monument Square).

Postoffice—Fayette and Calvert streets.

City Hall—Fayette, North, Holliday and Lexington streets.

Merchants' Club—German street, between Calvert and South streets. A tablet on the west wall says:

"Upon this site stood, from 1774 to 1786, the Lovely Lane Meeting House, in which was organized (December, 1784) the Methodist Episcopal Church in the United States of America."

Custom House—Gay and Lombard streets.

Centre Market—Market Space and Baltimore street.

President Street Station (P., B. & W. R. R.)—President and Fleet streets.

Shortly after leaving this depot the Sixth Massachusetts Regiment was attacked, April 19, 1861.

Wells and McComas Monument—To the memory of two sharpshooters who shot Major-General Ross, September 12, 1814. Ross commanded the British forces at Battle of North Point. Gay, Monument and Aisquith streets.

SHARP STREET (HOPKINS PLACE), NORTH FROM LOMBARD STREET  
A part of Baltimore's wholesale district

The Johns Hopkins Hospital—World-famous institution. Monument street and Broadway.

Willey Monument—To Thomas Willey, founder of first lodge Independent Order of Odd Fellows in America. Broadway Square, near Fayette street.

Patterson Park—One of Baltimore's finest public reservations. Contains breastworks erected during War of 1812. Patterson Park avenue and Baltimore street.

Columbus Monument—In grounds of Samuel Ready School, North avenue and Bond street. Claimed to be the first monument erected in the United States to Christopher Columbus. Genuineness of claims disputed and story advanced that the former owner of the estate was an enthusiastic horseman and raised the shaft (66 feet) over the spot where a favorite steed is buried.

Eastern Female High School—Southeast corner Broadway and North avenue.

Clifton Park—With the summer residence of the late Johns Hopkins, founder of university and hospital bearing his name. Harford road and Washington street.

*Picturesque Lazaretto Light, at the Entrance of Baltimore Harbor*

PRATT STREET, EAST FROM LIGHT STREET

## BALTIMORE HISTORY 1608-1913

To begin at the very beginning of direct historical information concerning Baltimore, one must go back to the year 1608.

June 2nd, 1608, Capt. John Smith, whose life is reputed to have been saved by Pocahontas, having settled Jamestown, started from the vicinity of Cape Henry, on the first of his two famous explorations of the Chesapeake Bay. During this expedition, which lasted nineteen days, he visited every inlet on both sides of the Bay, from the Capes to the Patapsco River (named by Smith, Bolus), sailed up that stream, and from him we get the first information concerning the region, now Baltimore. Smith and his followers were, therefore, the first white men to set eyes on the present site of the City. There is no question about Smith's visit to this locality. He prepared an excellent map of the Chesapeake and its tributaries. The Patapsco River, then, of course, unnamed, he called "Bolus," because of the red clay resembling "bole armoniack" along its banks. The red clay, or "bole," was a covering for deposits of iron ore, afterward discovered and mined. The first of these mines was owned and worked by John Moale, at Moale's Point, along Spring Gardens. Smith's map indicates quite an extensive knowledge of the topography of this section. He went up the "Bolus" for a considerable distance. On his voyage he had fourteen companions and used a barge, of between two and three tons, propelled by sail and oar. He had exciting and interesting experiences with Indians.

Following Captain Smith's explorations in this vicinity, there is a lapse of years before the thread of the narrative can be taken up by the historian.

In the absence of proof to the contrary it must be assumed that Indians roamed over the site of Baltimore at will, or at

CHARLES STREET, NORTH FROM FAYETTE STREET

least without interference from white men; for it was not until 1661 that history records the second step in the advance of civilization.

In 1661 the first surveys were made, pursuant to land grants, and henceforth this section became the permanent habitation of white men. Tract after tract was taken up by settlers, and in 1706 Locust Point, then "Whetstone Point," was made a port of entry.

INTERESTING EVENTS IN HISTORY OF BALTIMORE  
GIVEN CHRONOLOGICALLY

- Captain John Smith sails from lower Chesapeake on the first of his explorations of Chesapeake Bay. He and his followers were the first white men to see the locality, now City of Baltimore, 2 June, 1608
- Charles Gorsuch, a member of the Society of Friends, patents 50 acres at Whetstone Point (Locust Point). Whether Gorsuch actually resided on the Point is not known.....24 Feb., 1661
- David Jones, reputed to be the first actual settler, "took up" and had surveyed 380 acres of land along the eastern bank of a stream, now Jones Falls, the Falls inheriting its name from the original resident. Jones built a house in the vicinity of what is today Front street, near the stream.....15 June, 1661
- Cæcilius Calvert, second Lord Baltimore, becomes Governor of Maryland under Charter from Charles I of England; from Cæcilius (Lord Baltimore) this City derives its name..... 1662
- NOTE:—The original grant of the territory called Maryland was obtained by Sir George Calvert, first of the Barons of Baltimore, in 1632. Sir George died before the Charter was actually issued, and the grant devolved upon his son Cæcilius, who became the real founder of Maryland, although he never visited the Colony. Cæcilius, however, sent out settlers under his younger brother Leonard.
- Alexander Mouteney "takes up" two hundred acres of land on each side of Harford Run, a stream since covered, and now Central avenue ..... 1663
- John Howard patents a tract, which includes a large part of South Baltimore, between the Middle and Northwest branches of the Patapsco ..... 1668
- Thomas Cole took five hundred and fifty acres, bounded now approximately by Paca, Mulberry, High and Lombard streets, the tract known as Cole's Harbor..... 1668

EUTAW PLACE, SOUTH FROM WILSON STREET

- James Todd obtains a warrant for Cole's Harbor and has it re-surveyed, granted a patent June 1, 1700, under the name of Todd's Range. Patent later void..... 1698
- Whetstone Point, by Act of Legislature, was made a port of entry, the first within the now city limits..... 1706
- Mill erected by Jonathan Hanson, who acquires 31 acres, at about the point where Bath and Holliday streets intersect..... 1711
- Iron ore discovered at Whetstone Point. This tract was re-surveyed March 29, 1723, and passed into the hands of the Principio Furnace Company, which concern seems later to have started smelting works in other parts of the Colony of Maryland.... 1723

NOTE:—There is no little confusion concerning the early grants and patents, which were sometimes reconveyed, and others became the subject of litigation, but the foregoing, as conspicuous transactions and incidents, are sufficient for present purposes to show that the history of Baltimore antedates 1729-30, when the town was officially laid out.

- Act authorizing "erection" of Baltimore Town passed...8 August, 1729
- Town Commission meet and officially survey 60 acres...12 Jan., 1730
- Jones Town, east of Baltimore Town, laid out.....22 Nov., 1732
- P. E. Parish Church, built on site afterwards occupied by St. Paul's Church, corner Charles and Saratoga streets, begun 1730, completed ..... 1739
- Baltimore and Jones Towns consolidated and incorporated as Baltimore Town..... 1745
- Subscription of £100 by citizens for building a market-house and town-hall, erected 10 years later, at northwest corner Gay and Baltimore streets.....23 April, 1751
- 32 acres annexed, known as "Hall's addition" to Baltimore Town.. 1753
- Mount Clare House erected by Charles Carroll, barrister, built of imported brick..... 1754
- A number of Acadian exiles settle in Baltimore..... 1756
- Baltimore made the county seat, and courthouse erected where Battle Monument now stands..... 1768
- Mechanical company organized, and a fire-engine purchased..... 1769
- First umbrella in the U. S. (brought from India) used here.... 1772
- Baptist Church erected corner Front and Fayette streets, afterwards site of the shot tower..... 1773

- Baltimore American and Daily Advertiser first issued. (Successor of Maryland Journal and Baltimore Advertiser, established 1773).....14 May, 1799

On the 15th of December news of the death of General Washington reached Baltimore, and on the first day of January, 1800, commemorative funeral rites were held. The militia, including the regulars at Fort McHenry, and citizens, many from the country surrounding Baltimore, formed a procession at the "Head of Baltimore street," where an appropriate address was delivered by Rev. Dr. Allison. From thence the procession went to Christ Church. A bier was carried into the edifice, and the funeral services were conducted by Rev. Dr. Bend. There was a concourse present.

As a result of this demonstration, sundry bills against the Mayor and City Council of Baltimore were rendered, generally upon fragments of paper. These have been mounted, and are on exhibition at the City Library.

- President Adams passes through Baltimore June 15, 1800, from Washington. The Mayor and City Council presented him an address of welcome.....15 June, 1800  
(Original document—President's reply—at City Library.)
