Twitter:
@WWH_UG

Wiki World Heritage User Group is a Wikimedia affiliate initiated by wikimedians interested in the documentation of UNESCO World Heritage around the world through Wikimedia projects.

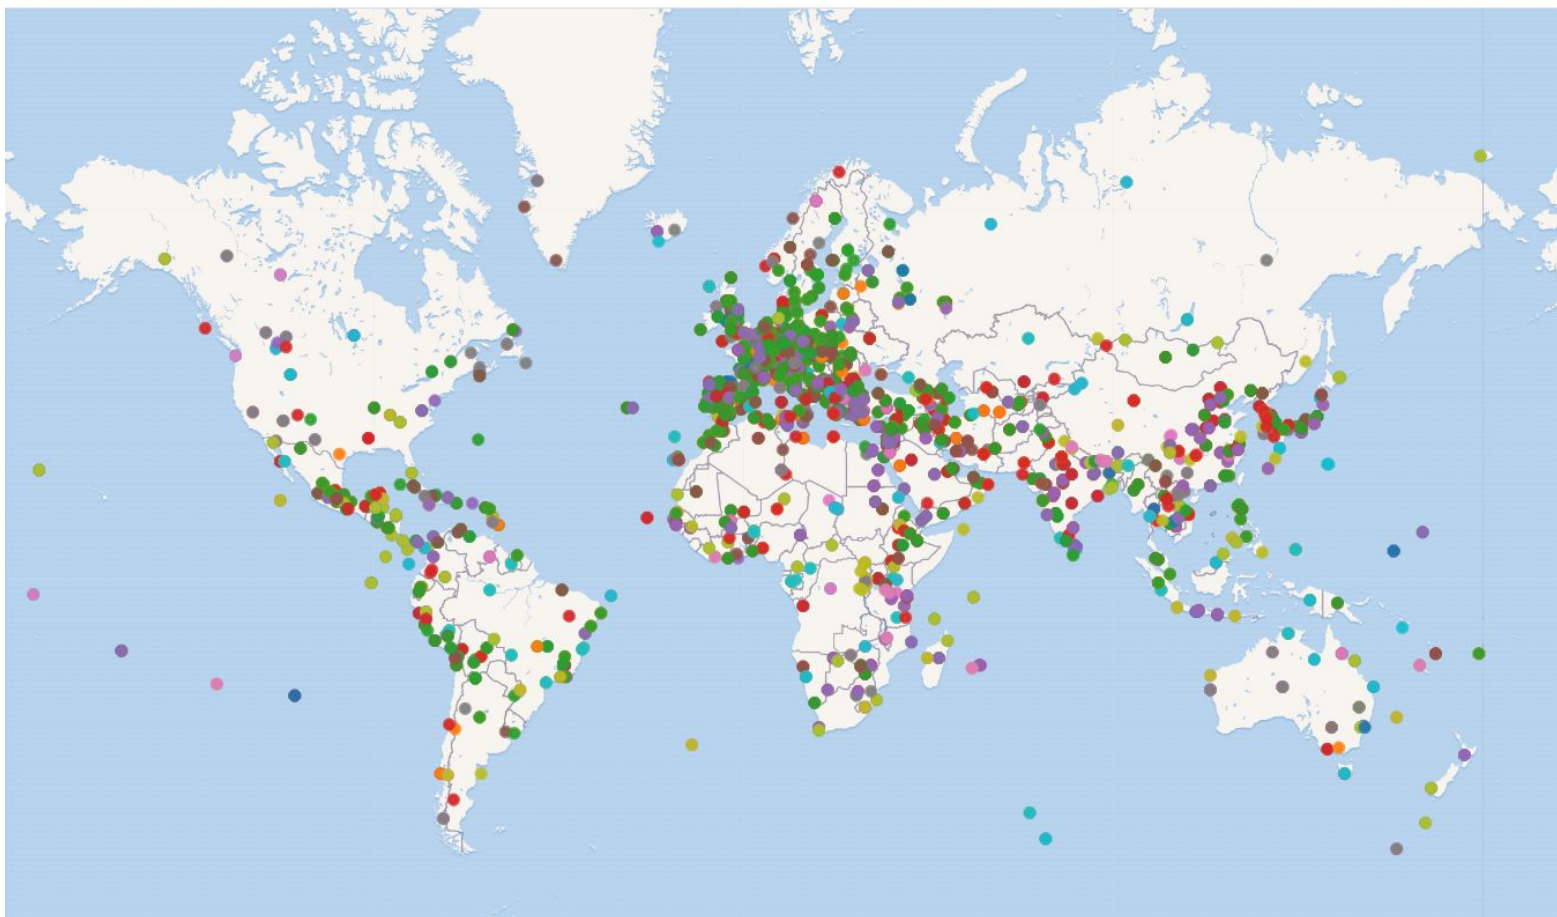

It was officially recognized by the Wikimedia Affiliates Committee on 22 October 2020.

Goals:

- Ensuring the full coverage of World Heritage on Wikimedia projects
- Catalyzing dynamic synergies around World Heritage

Approach:

We design and implement our projects through a fully collaborative approach, through partnering with local Wikimedia affiliates or/and relevant organizations in the target countries.

Using QuickStatements To Create New Items

A how-to guide

Stone Town, Zanzibar, Tanzania - By Luganosamwel - Own work, CC BY-SA 4.0,

**THE TIMES
WE HAD**

Step 1 : Prepare your data

This is the most important step of the process as you will need to make sure that you have well prepared the data to be imported via QuickStatements in order to create new Wikidata items.

You will need to use a spreadsheet to prepare the data using the following structure for each item to create:

A	B	C
Column1	Column2	Column3
CREATE		
LAST	Lxx	Label in xx language written between ""
LAST	Dxx	Description in the xx language written between ""
LAST	P...	Q number corresponding to the Property in Column 2
LAST	P...	Q number corresponding to the Property in Column 2
LAST	P...	Q number corresponding to the Property in Column 2

Please note:

- the label and the description of the item to be created must be written between ""
- you can add several labels and description lines in different languages
- the first line must contain only the word CREATE
- all the lines following the first line must start by LAST
- you can add as many lines as the number of information (label, description, properties)
- you can replicate the same structure to create other items

Step 1 : Prepare your data

Example:

In the below example we will prepare the data that will be used in the next step in order to create 3 new items corresponding to 3 Guest Houses in the WH City of Salt in Jordan

The diagram illustrates the preparation of Wikidata data for three guest houses in Jordan. A table with three columns (Column1, Column2, Column3) shows the data structure. Red boxes highlight specific values in the table, and arrows point from these boxes to explanatory text boxes on the left and right.

Column1	Column2	Column3
CREATE		
LAST	Len	"Al Awamleh Mafada"
LAST	Den	"Traditional Guest House in As-Salt"
LAST	P31	Q2460422
LAST	P361	Q867586
LAST	P17	Q810
CREATE		
LAST	Len	"Al Akrad Madafa"
LAST	Den	"Traditional Guest House in As-Salt"
LAST	P31	Q2460422
LAST	P361	Q867586
LAST	P17	Q810
CREATE		
LAST	Len	"Christian Madafa (Al Masiheiah)"
LAST	Den	"Traditional Guest House in As-Salt"
LAST	P31	Q2460422
LAST	P361	Q867586
LAST	P17	Q810

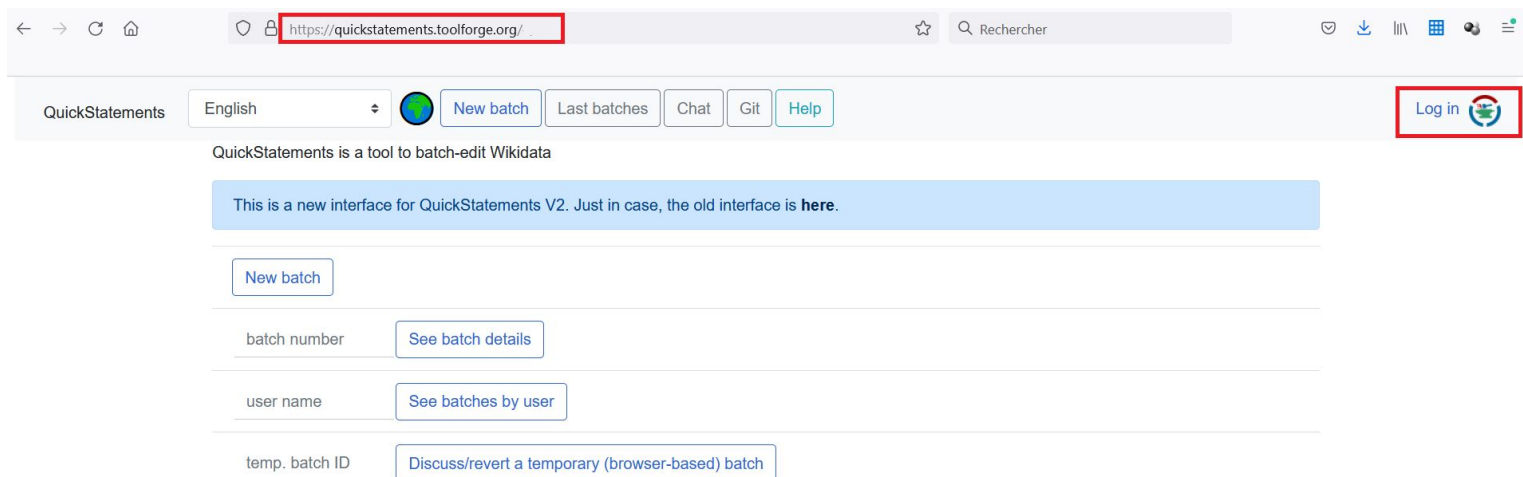

Annotations:

- Label in English: en** points to the first row (CREATE).
- Description in English: en** points to the first row (CREATE).
- The P number corresponding to Instance of** points to the P31 property in the first three rows.
- The P number corresponding to Part of** points to the P361 property in the first three rows.
- The P number corresponding to Country** points to the P17 property in the first three rows.
- The Q number corresponding to Guest House** points to the Q2460422 value in the first three rows.
- The Q number corresponding to Guest House** points to the Q867586 value in the first three rows.
- The Q number corresponding to Jordan** points to the Q810 value in the first three rows.

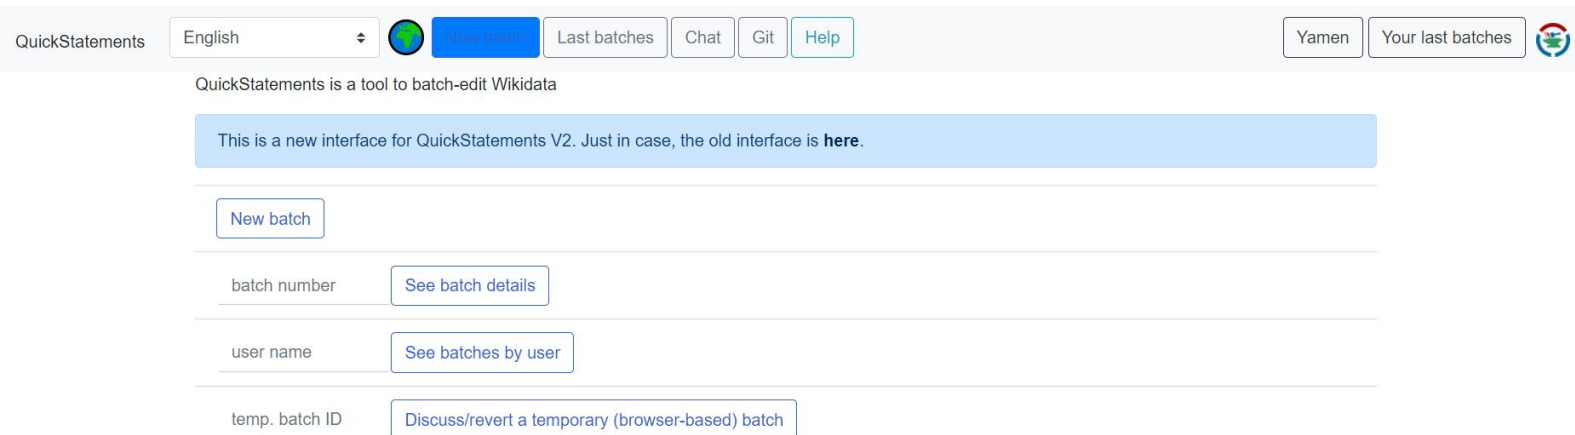

Step 2 : Login to QuickStatements and import your data

Open and login to QuickStatements:

You will need to open the following url: <https://quickstatements.toolforge.org> and login using the same wiki username/pasword.

Once logged in, you will need to start a **New Batch** and to import your data:

Step 2 : Login to QuickStatements and import your data

Copy your data from the spreadsheet (without the header) and paste it in the QS's form.

Then click on the button "Import V1 Commands".

QuickStatements English [New batch] [Last batches] [Chat] [Git] [Help] Yamen Your last batches

Create new command batch for Wikidata as batch name

```

CREATE
LAST Len "Al Awamleh Mafada"
LAST Den "Traditional Guest House in As-Salt"
LAST P31 Q2460422
LAST P361 Q867586
LAST P17 Q810
CREATE
LAST Len "Al Akrad Madafa"
LAST Den "Traditional Guest House in As-Salt"
LAST P31 Q2460422
LAST P361 Q867586
LAST P17 Q810
CREATE
LAST Len "Christian Madafa (Al Masiheiah)"
LAST Den "Traditional Guest House in As-Salt"
LAST P31 Q2460422
LAST P361 Q867586
LAST P17 Q810
    
```

[Import V1 commands] [Import CSV commands]

Once the commands have been imported you can click on the button "Run" in order to start the items creation process.

QuickStatements English [New batch] [Last batches] [Chat] [Git] [Help] Yamen Your last batches

Using QuickStatement To Update Items

A how-to guide

Stone Town, Zanzibar, Tanzania - By Luganosamwel - Own work, CC BY-SA 4.0,

Step 1 : Prepare your data

This is the most important step of the process as you will need to make sure that you have well prepared the data to be imported via QuickStatements in order to update existing Wikidata items.

In order to prepare the data, you will need to retrieve the Q numbers of the items to be updated.

You will need to use a spreadsheet to prepare the data using the following structure for each item to update:

Column1	Column2	Column3
Q number of the item to update	Lxx	label placed between " " in the language xx to update the item
Q number of the item to update	Dxx	description placed between " " in the language xx to update the item
Q number of the item to update	P number of the property to update	Q number corresponding to the property to update
Q number of the item to update	P number of the property to update	Q number corresponding to the property to update
Q number of the item to update	P number of the property to update	Q number corresponding to the property to update

Please note:

- you can use QS to update labels, descriptions in different languages as well as updating properties.
- the label and the description of the item to be created must be written between “”
- you can add several labels and description lines in different languages
- In the first column you have to make sure that you have the Q number of the item to be updated.
- all the lines following the first line must start by LAST
- you can add as many lines for the same item as the number of information (label, description, properties) to be updated

Step 1 : Prepare your data

Example 1:

In the below example we will prepare the data that will be used in the next step in order to update several Wikidata items in order to add to them the property "Part of".

Column1	Column2	Column3
Q1521987	P361	Q12220316
Q2548705	P361	Q12220316
Q12204343	P361	Q12220316
Q12204207	P361	Q12220316
Q22686659	P361	Q12220316
Q12204182	P361	Q12220316
Q13668727	P361	Q12220316
Q22686698	P361	Q12220316
Q13668725	P361	Q12220316
Q22686908	P361	Q12220316
Q20421981	P361	Q12220316
Q20421986	P361	Q12220316
Q20391529	P361	Q12220316
Q20397029	P361	Q12220316

Items to be updated
Urban elements of the Old Sana'a

"Old Sana'a" Q number corresponding to the Property "Part of"

P number corresponding to the Property "Part of"

Example 2:

In the below example we will prepare the data that will be used in the next step in order to update the arabic description of several Wikidata items.

Please note that in order to update the label you can use Lxx where xx is the language code.

Column1	Column2	Column3
Q22686659	Dar	"مسجد يقع في صنعاء، اليمن"
Q12204182	Dar	"مسجد يقع في صنعاء، اليمن"
Q13668727	Dar	"مسجد يقع في صنعاء، اليمن"
Q22686698	Dar	"مسجد يقع في صنعاء، اليمن"
Q22686908	Dar	"مسجد يقع في صنعاء، اليمن"
Q20421981	Dar	"حارة في صنعاء القديمة، اليمن"
Q20421986	Dar	"حارة في صنعاء القديمة، اليمن"
Q20391529	Dar	"حارة في صنعاء القديمة، اليمن"
Q20416946	Dar	"حارة في صنعاء القديمة، اليمن"
Q20412130	Dar	"حارة في صنعاء القديمة، اليمن"
Q20418738	Dar	"حارة في صنعاء القديمة، اليمن"
Q20392833	Dar	"حارة في صنعاء القديمة، اليمن"

Q20381874	Dar	"حارة في صنعاء القديمة، اليمن"
Q20386491	Dar	"حارة في صنعاء القديمة، اليمن"
Q20407991	Dar	"حارة في صنعاء القديمة، اليمن"
Q20392485	Dar	"حارة في صنعاء القديمة، اليمن"

Items to be updated
Urban elements of the Old Sana'a

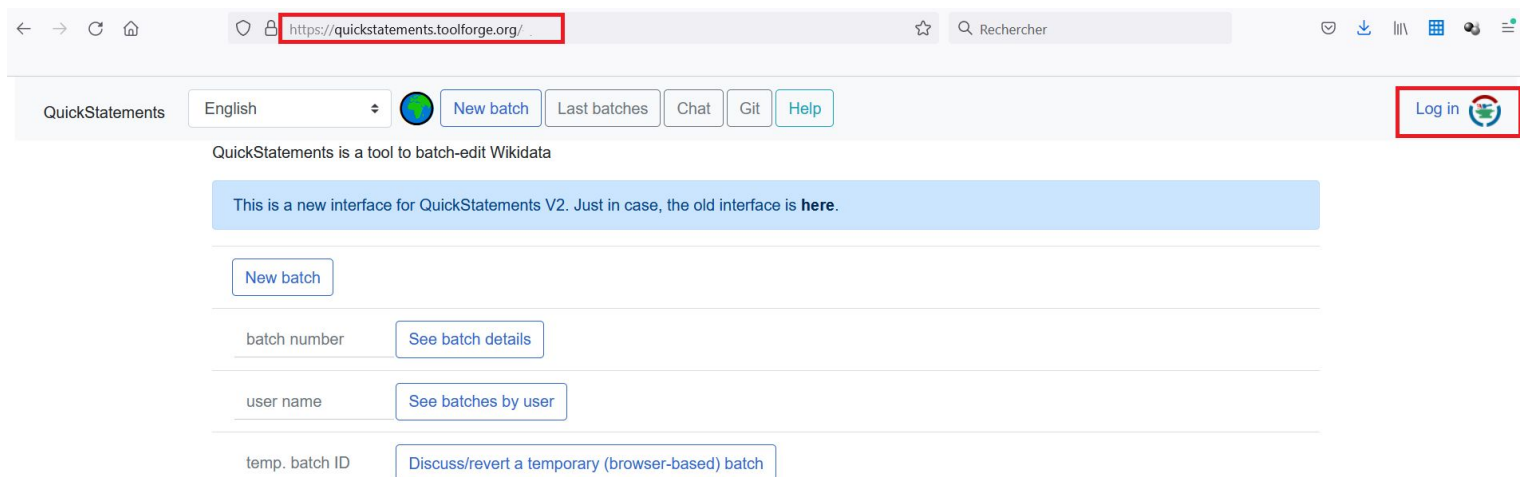

Description to be added/updated placed between ""

Description D in Arabic ar

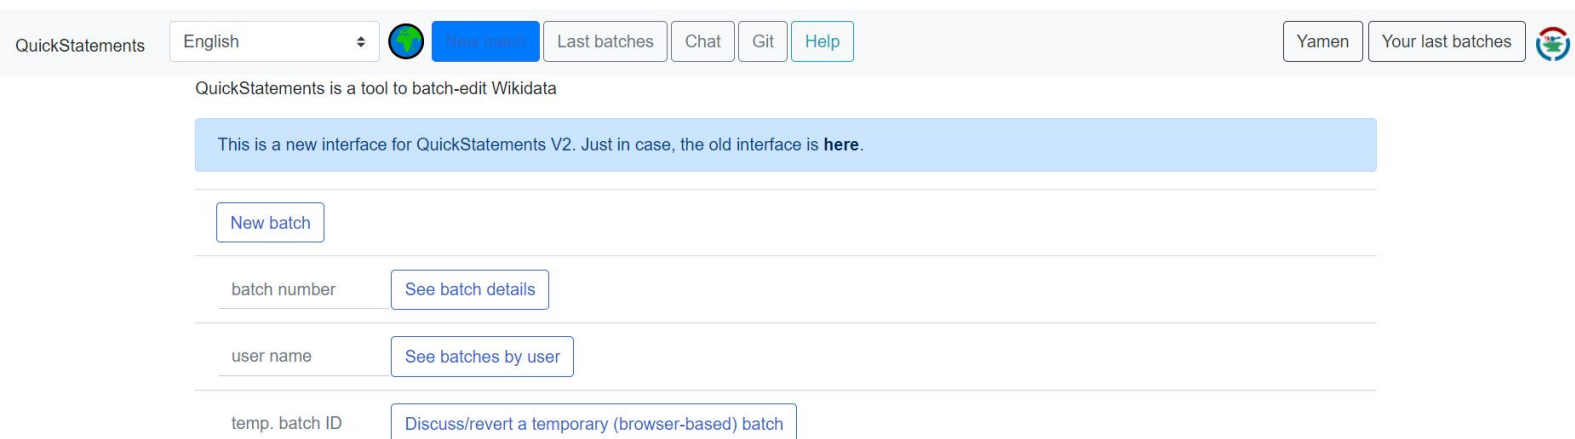

Step 2 : Login to QuickStatements and import your data

Open and login to QuickStatements:

You will need to open the following url: <https://quickstatements.toolforge.org> and login using the same wiki username/password.

Once logged in, you will need to start a **New Batch** and to import your data:

Step 2 : Login to QuickStatements and import your data

Copy your data from the spreadsheet (without the header) and paste it in the QS's form.

Then click on the button “Import V1 Commands”.

The screenshot shows the QuickStatements interface. At the top, there are navigation buttons: 'New batch', 'Last batches', 'Chat', 'Git', and 'Help'. A user profile 'Yamen' and 'Your last batches' are visible. Below the navigation, there is a section for creating a new command batch for Wikidata. A table of commands is displayed, with columns for ID, type, and value. At the bottom of the table, there are two buttons: 'Import V1 commands' (highlighted with a red box) and 'Import CSV commands'.

ID	Type	Value
Q1521987	P361	Q12220316
Q2548705	P361	Q12220316
Q12204343	P361	Q12220316
Q12204207	P361	Q12220316
Q22686659	P361	Q12220316
Q12204182	P361	Q12220316
Q13668727	P361	Q12220316
Q22686698	P361	Q12220316
Q13668725	P361	Q12220316
Q22686908	P361	Q12220316
Q20421981	P361	Q12220316
Q20421986	P361	Q12220316

Once the commands have been imported you can click on the button “Run” in order to start the items update process.

The screenshot shows the QuickStatements interface after a batch has been imported. The status bar indicates '0% (0) of 12 done'. Below the status bar, there is a table of items with columns for ID, name, type, and value. At the bottom of the table, there are navigation buttons: 'First', 'Page 1', 'Next', and 'Last'. A 'Run' button is highlighted with a red box, and a 'Run in background' button is also visible.

ID	Name	Type	Value
1	Ghamdan Palace(old sana'a) [Q1521987]	Statement	part of [P361] : Old Sana'a [Q12220316]
2	Great Mosque(old sana'a) [Q2548705]	Statement	part of [P361] : Old Sana'a [Q12220316]
3	Salah al-Din Mosque(old sana'a) [Q12204343]	Statement	part of [P361] : Old Sana'a [Q12220316]
4	Bukayriyah Mosque(old sana'a) [Q12204207]	Statement	part of [P361] : Old Sana'a [Q12220316]
5	Al-Zumar Mosque(old sana'a) [Q22686659]	Statement	part of [P361] : Old Sana'a [Q12220316]
6	Al-abhar Mosque(old sana'a) [Q12204182]	Statement	part of [P361] : Old Sana'a [Q12220316]
7	talha dome(old sana'a) [Q13668727]	Statement	part of [P361] : Old Sana'a [Q12220316]
8	Al-Falih Mosque(old sana'a) [Q22686698]	Statement	part of [P361] : Old Sana'a [Q12220316]
9	Dome of the Mahdi Mosque(old sana'a) [Q13668725]	Statement	part of [P361] : Old Sana'a [Q12220316]
10	Farwa bin M'sik Mosque(old sana'a) [Q22686908]	Statement	part of [P361] : Old Sana'a [Q12220316]

Thank you!
