

BABY MICE CRY FOR IT!

Put it on the Top Shelf and They'll Find it.

Accomplished at last! in the Nineteenth Century, a Compound with which to "blow up" Rats, Mice, Etc.!

RAT DYNAMITE, OR DYNAMITE FOR

Rats,

Mice,

Weasels,

Woodchucks,

Skunks,

Musk Rats,

Roaches,

Bed Bugs,

Water Bugs,

Potato Bugs,

Flies,

Ants, Insects,

Vermin,

Etc., Etc.

A few persons might think the dynamite used in this compound is the same explosive material as used to destroy property. Not so! We name it Rat Dynamite because it has the magic power of destroying rats, mice, etc. Do NOT BELIEVE it will blow up your building; such an idea would be nonsense. RAT DYNAMITE is a very poisonous substance; it will explode life, and great care must be taken to keep it beyond the reach of children and valuable animals.

Experience proves that Rat Dynamite is a better rat poison than any similar article. IT HAS NO EQUAL AND CANNOT BE SURPASSED! If used according to the directions grand results will surely follow. It drives out rats and mice. They do not die on the premises. When they have eaten Rat Dynamite they immediately seek the open air and quiet fields, only to be exploded and ruined.

BEWARE OF FRAUD.

Your attention is called to COUNTERFEITS, FRAUDS and imitators of our Rat Dynamite. It is the very valuable preparations only which are a prey to pirates and thieves, and it is their object to steal the reputation which our preparation has attained, and to sell their worthless compounds on the faith of the wonderful satisfactory results achieved by Rat Dynamite. One trial will convince you of its merits.

MADE ONLY BY
