JOINT STANDING COMMITTEES FOR 1883.

ACCOUNTS. — Aldermen Weld, Vinal; Councilmen Janvrin, Woodberry, Attwood.

BURIAL GROUNDS. — Aldermen Durgin, Roulstone; Councilmen Steele, Russell, Bennett.

CITY ENGINEERING. — Aldermen Durgin, Weld; Councilmen Steele, Bennett, Mayhew.

CLAIMS. — His Honor the Mayor, *ex-officio*; the President of the Council, *ex-officio*; Alderman Vinal; Councilmen Janvrin, Woodberry.

FINANCE. — His Honor the Mayor, *ex-officio*; the President of the Council, *ex-officio*; Aldermen Burns, Perry; Councilmen Smith, Blackwell, Fitch, Twycross.

FIRE DEPARTMENT.—Aldermen Roulstone, Davis; Councilmen Stodder, Blackwell, Mayhew.

FUEL AND STREET LIGHTS.—Aldermen Vinal, Perry; Councilmen Giles, Stodder, Russell.

HIGHWAYS.—Aldermen Durgin, Wellington; Councilmen Steele, Smith, Russell.

LEGISLATIVE MATTERS.—His Honor the Mayor, *ex-officio*; the President of the Council, *ex-officio*; Alderman Vinal; Councilmen Steele, Beals.

ORDINANCES.—Aldermen Burns, Perry; Councilmen Smith, Attwood, Bennett.

PRINTING.—Aldermen Roulstone, Davis; Councilmen Janvrin, Stodder, Attwood.

PUBLIC PROPERTY.—Aldermen Wellington, Burns; Councilmen Beals, Richards, Giles.

SOLDIERS' RELIEF.—Aldermen Roulstone, Davis; Councilmen Woodberry, Blackwell, Twycross.

WATER.—Aldermen Burns, Vinal; the President of the Council; Councilmen Richards, Beals.

COMMITTEES OF THE BOARD OF ALDERMEN.

(STANDING COMMITTEES.)

ELECTIONS.—Aldermen Davis, Weld.

ENROLLED ORDINANCES.—Aldermen Perry, Wellington.

LICENSES.—Aldermen Davis, Perry.

POLICE.—His Honor the Mayor, *ex-officio*; Aldermen Vinal, Durgin.

SEWERS.—Aldermen Weld, Burns, Perry.

STATE AID.—Aldermen Roulstone, Weld, Wellington, Davis.

SPECIAL COMMITTEE.

BUILDING PERMITS.—Aldermen Durgin, Roulstone.

STANDING COMMITTEES OF THE COMMON COUNCIL.

ELECTIONS AND RETURNS.—Councilmen Fitch, Bennett, Mayhew.

ENROLLED ORDINANCES AND RESOLUTIONS.—Councilmen Beals, Twycross, Fitch.

SCHOOL COMMITTEE.

JOHN A. CUMMINGS, Mayor, Chairman, *ex-officio*.

FRANK E. FITTS, President of the Common Council, *ex-officio*.

WARD ONE.

HORACE C. WHITE, M. D.	Pinckney Street.
JOHN H. BUTLER	Pearl Street.
HENRY M. MOORE	Myrtle Street.

WARD TWO.

MAYOR'S INAUGURAL ADDRESS.

INAUGURAL ADDRESS OF

HON. JOHN A. CUMMINGS,

DELIVERED JAN. 1, 1883.

GENTLEMEN OF THE CITY COUNCIL:—

We have this day assumed important responsibilities for the ensuing year. In accordance with the nearly unanimously-expressed wish of our fellow-citizens, we have obligated ourselves to guard the interests and advance the moral and material welfare of our beloved city with all our energy and all our ability. To this work let us bring honesty of purpose, industrious effort, and unselfish devotion.

From the fact that our financial year closes with the thirty-first day of December, it is impossible to give at this time an exact statement of our accounts, but the following, furnished me by the city treasurer, is a nearly accurate statement of our

PRESENT FINANCIAL CONDITION.

The net debt of the city one year ago was \$1,263,668.87. At the present date the debt is as follows:—

Total funded debt	\$1,585,000.00
Excess of assets over liabilities, 1881	\$ 9,067.54
Estimated excess of assets over liabilities, 1882	26,000.00
	<hr/>
	35,067.54
Funded debt, less surplus of 1881, 1882	\$1,549,932.46
Less amount of sinking funds	373,654.18
	<hr/>
Net debt of the city, January 1st, 1883	\$1,176,278.28

Our indebtedness has been reduced during the year by the following items:—

Sinking fund, contribution and accumulation	\$61,390.59
Surplus saved from appropriations of 1882, estimated	26,000.00
	\$87,390.59
Net reduction	\$87,390.59

The unfunded liabilities of the city last year were \$190,000; at this time the amount is \$160,000, and the uncollected taxes, assessments, and sundry accounts due, exceed this sum by about \$35,000.

The total valuation of the public property belonging to the city, including \$341,000 for water works, was \$1,155,000 one year ago. Allowing that over \$12,000 expended upon the maintenance, renewal and extension of our water works during the past year has nearly made good the annual depreciation, the value of our city property would remain about the same as last year with the exception of the Edgerly schoolhouse, to which four new rooms have been added, in accordance with the original plan of the building. The appropriation for this purpose was \$17,000, and the cost of the work when completed will probably overrun that amount some five or six hundred dollars. It is now one of the best eight-room school buildings in the city, amply fitted and furnished, and supplies what had become a pressing need in that district. Adding its cost to the valuation of last year, would give \$1,172,000 as the present value of our city property.

By the valuation of the assessors, the taxable property in the city on the first of May, 1882, was \$23,162,200, an increase over the previous year of \$593,100. A large portion of this increase was from the addition of new property to the lists. The total amount raised by taxation last year was \$425,721.16; and the rate, \$17.80 upon each \$1,000.

Our annual tax levy, valuation, and rate for the past seven years has been as follows:—

Year.	Tax levy.	Valuation.	Rate.
1876	\$504,475.24	\$26,573,400	\$18.60
1877	471,789.14	25,479,400	18.10
1878	409,497.10	20,976,900	19.00
1879	352,553.80	18,950,100	18.00
1880	402,927.71	20,458,100	19.10
1881	452,945.45	22,569,100	19.50
1882	425,721.16	23,162,200	17.80

The number of poll taxes assessed in each of the above years has been from five thousand to a little over six thousand, at \$2.00 each.

From the treasurer's reports I have collated the following figures, which give a nearly correct representation of the gradual improvement in our finances for the corresponding years, beginning with January 1st, 1876, the point where our net indebtedness was the greatest:—

	Funded debt.	Net debt.
January 1, 1876	\$1,571,854	\$1,573,447
“ 1877	1,606,854	1,541,724
“ 1878	1,606,854	1,503,099
“ 1879	1,596,854	1,388,748
“ 1880	1,585,000	1,408,172
“ 1881	1,585,000	1,357,838
“ 1882	1,585,000	1,263,668
“ 1883	1,585,000	1,176,278

The large reduction in the net debt, as shown by the above figures, in 1879, and the apparent increase in 1880, were to a certain extent fictitious, being caused by reckoning, as available assets, betterment assessments to the amount of several thousand dollars, laid for the widening of Somerville avenue, other streets, and the Public Park, in former years, on which there was a large depreciation, or total loss, in 1880. From these figures it will be seen that our progress for the last seven years towards a better financial standing has been steady and commendable, the average annual reduction of the debt being \$56,800. For the past three years the average annual reduction has been over \$77,000.

In the year which has just closed, a very large portion of the unexpended surplus arises from interest account. During the year, \$182,500 in city bonds, bearing interest at the rate of 6 1-2 per cent., matured. New bonds for a like amount were issued, bearing interest at the rate of 5 per cent. Of these bonds, \$61,500 in amount were placed in the sinking fund, and the balance \$121,000, having an average of twelve years to run, were sold in the open market, bringing a premium of \$16,031.60, which sum went to the credit of interest account. The premium received reduced the actual rate of interest paid by the city on these bonds to 3.30 per cent. Our temporary loans during the year have also been secured at an average rate of 3.73 per cent., and such loans

having been kept at the lowest possible sum, a considerable saving to interest account has been made from this source. The large saving the past year from the annual appropriations may therefore be attributed in a great degree to the improving financial condition of our city, and a favorable money market.

Our maturing bonds could have been renewed last year at the rate of 4 per cent., and sold at a premium, and I am now satisfied that it was a mistake that they were not issued bearing interest at that rate. In the future I would recommend that all bonds, except such as are to be placed in the sinking funds, be renewed at 4 per cent., if it can be done, and the bonds sold at par or a premium.

The funded debt of the city, according to the report of City Treasurer Sargent, for the year 1879, was contracted for the following purposes :—

Fire Department	\$ 26,000
Highways	257,000
For lands, buildings, war loans, school purposes, and undesignated town loans	295,000
Police Station	50,000
Public Park	200,000
School-houses	155,000
Sewers	227,000
Sidewalks	40,000
Water Works	335,000
 Total	 \$1,585,000

While we are paying this funded debt, the demand upon us for expenditures for sewers, highways, sidewalks, school-houses, fire department, water works, etc., is nearly as pressing as it was upon our predecessors. The lesson is: Pay as you go; the policy which has been followed for the past seven years. Only in the most urgent cases should it be departed from. If we will but continue our conservative, economical course, Somerville will soon stand among the first cities in the Commonwealth in financial credit, wealth and population. Keep down our expenses, continue reducing our debt, and the road to prosperity is easy and sure.

SCHOOLS.

The appropriation for the support of our schools the past year, exclusive of \$17,000 for the addition to the Edgerly school building, amounted to \$82,000. The expenditures exceeded this sum by \$3,619.74; the excess being mostly in the item of school-teachers' salaries.

We have nineteen school buildings, ninety-three school-rooms, and eighty-nine schools. Eight male and ninety-three female teachers are employed. The number of scholars in attendance is:—

In the High School	279
“ Grammar Schools	2,189
“ Primary “	2,043
Total	<u>4,511</u>

The whole number of scholars registered in the last year was 5,576; the average attendance, 4,283. The number in attendance at the present time is 196 in excess of the number one year ago.

Most of our schools are under the charge of good teachers, and in a satisfactory condition. Some of them are among the first in rank. In these latter cases, the excellent standing attained is due almost entirely to the superior merit of the teachers. Every possible effort should be made by those upon whom the important duty of selecting teachers devolves to secure the very best, and under no circumstances should a poor or inferior teacher be retained after his or her qualifications have been tested and found wanting. A year or a term under an indifferent or incapable teacher is frequently but little better than lost time, and may be even worse than lost in its effect upon the pupil.

The expenditure for teachers' salaries last year was \$65,037; by far the largest item in our list of current expenses. We pay our teachers well, and should make every effort to secure those who excel in their calling.

PUBLIC LIBRARY.

During the past year additional shelving has been put into the library rooms, but the accommodations are still inadequate for the storage and delivery of books, and convenience of patrons. The whole number of volumes now in the library is 9,679, an increase

of 640 for the year. During the 306 days in 1882 that the library was open, 67,000 books were delivered and returned.

I believe it would be wise to erect, during the present year, at a cost of not more than four or five thousand dollars, a one-story building at the east end of the City Hall, to be connected with the latter by an archway. Suitable rooms for reading, for the storage of books, and for the transaction of the business, could thus be provided, and the annual expense for heating and janitor's services would be small. By this plan, ample accommodations would be provided for several years to come, without placing a heavy burden upon our treasury.

The appropriation for the support of the library the past year was \$1,500, of which sum \$1,400 was expended.

HIGHWAYS.

Our highways are as a rule in good condition, and compare favorably with those of our sister cities. In the year just closed, Vinal avenue and New Cross street have been accepted, graded, edgestones set, and gutters paved. North street has been widened, graded, and greatly improved. Edgestones have been set and gutters paved in Wallace and Day streets, and a brick sidewalk laid upon one side of the latter. Sidewalks have also been laid in Concord avenue, Newton and Pearl streets.

The total appropriation for this department last year was \$35,600, which included \$2,600 for sidewalks, and \$3,000 for watering streets. The expenditures have exceeded the amount appropriated by about \$1,800. During the early part of the year heavy storms occasioned an unusual expense for the removal of snow, and the extension of the tracks of the Charles River Street Railway in Summer street, Beacon street and Somerville avenue caused an extra outlay for repairs in those streets. The Charles River Street Railway Company now has some two miles of track in our city, and having recently obtained the privilege of running its cars into Boston, will be a great convenience to our people, and of decided advantage in the development and improvement of the territory which it accommodates.

During the past year efforts have been made to secure the rebuilding of the bridge over the Lowell Railroad at School street.

The railroad company desires to widen and rebuild the bridges at Cross and Walnut streets first, however, and a proposition has been made on the part of the city to grade the approaches if the company will rebuild the bridges and abutments on those streets. This proposition will probably be accepted by the company.

The committee on highways of last year, in their final report, recommended that the city purchase during the present year a steam road-roller and picker, at a cost of about \$5,000.

The members of that committee informed themselves, by personal investigation, as to the value and utility of such a machine, and I commend their recommendation to you. We have not a dollar to waste in trying experiments with new inventions, but if the practical usefulness of a steam roller has been tested so as to satisfy us that its use will save money in building and repairing our streets, it should be purchased. Other cities using them claim that a much better and more durable road bed is secured at a less cost than by the old method.

SEWERS.

One and one-half miles of new sewers have been constructed in the year past, at a cost of \$15,459.24. Of this amount, \$9,134.50 has been assessed upon abutting estates. For catch-basins, rebuilding, repairing, cleaning, and incidentals, \$5,197.81 has been expended. The appropriation for this department was \$14,000, and of this sum a little over \$3,000 was unexpended.

A serious defect in the Bow-street sewer, which has caused considerable trouble to abutters upon that street and Summer street, has been remedied by the continuance of the Bow-street sewer, some two hundred feet in Union square, to a junction with the large 5 1-2 foot sewer. Heretofore Bow-street sewer, three feet in diameter, came to a dead end near the termination of that street in Union square, and for an outlet had only a small two-foot sewer running across nearly at right angles into the old three-foot sewer in Somerville avenue. This connecting link, being less than half the size of the Bow-street sewer, was insufficient for the removal of surface water in case of a heavy rainfall, and the result was flooded cellars. This improvement has been made at a cost of \$958 to the city. We have several defective sewers in the city which ought to be reconstructed.

A report was made to the Legislature of 1882, by a commission appointed for that purpose, recommending a metropolitan sewerage system for towns and cities located on the Mystic, Charles and Neponset rivers. By this report a plan was presented, the estimated cost of which was \$13,000,000. Somerville's proportion of this expense was variously estimated at from \$79,000 to \$564,000. It is not advisable for us to advocate the construction of a costly system at present, but it would be well to have surveys made and a comprehensive plan prepared for the ultimate drainage of all our territory, so that our work from year to year might be made to conform to that plan, and be adjusted to it with small expense when it shall finally be adopted and constructed.

HEALTH.

The continued existence of diphtheria in our city prompts me to renew, in stronger terms my suggestion of one year ago, that measures should be taken to have the sanitary condition of every dwelling examined by a competent person, who should point out defects where found, and recommend a remedy. Of the houses examined by our board of health, ninety-nine per cent. are found with defective drainage, and often, through faulty construction or imperfect material, the street sewer is ventilated into the house. Many new houses are constructed with imperfect plumbing and drainage. After sickness, and perhaps death, has resulted, the services of the board of health are called in, and the defects remedied at an increased expense over what it would have cost to have properly performed the work in the first instance. All plumbing and drainage in new houses ought to be examined by an expert, and the rules of the board of health enforced, before being occupied.

The sanitary arrangements in our public buildings, especially our school-houses, should receive careful scrutiny, and every thing possible be done to make them perfect in this respect. Nearly all of our public buildings have been found defective in drainage and ventilation, and this is true not only of the older buildings, but of those recently constructed. Radical defects have been found in the latter, the result of gross carelessness, ignorance, or utter disregard of sanitary laws on the part of those having in charge their construction.

The appropriation for this department last year was \$2,500, and the expenditures exceeded this amount by \$324.

FIRE DEPARTMENT.

This department is efficient and in good condition. It consists of seventy-one men, including the chief and assistant engineer; one steam fire engine, one hook and ladder truck, and four horse hose carriages. The chief engineer recommends the purchase of a new steam fire engine this year, upon the ground that the present one is nearly worn out. Whether this is necessary or not, I leave to your judgment without suggestion. He also recommends that the hose carriage in Ward Four be equipped with ladders, or that the old ladder carriage now there be supplied with ladders; that portable fire extinguishers be placed upon each of the hose carriages, and that two new fire-alarm boxes be added. These recommendations are commended to your attention. Our department excels in the celerity with which a fire is reached when an alarm is given. Additional alarm boxes will add to its efficiency in this important respect.

The appropriation for this department last year was \$22,000, and the credits \$196.44 additional. The expenditure was \$22,124.89, leaving a balance of \$71.55 to the credit of the account.

The total estimated loss by fire was \$19,342, upon which insurance to the amount of \$17,379 was paid.

SUITS AT LAW.

The city is remarkably free from litigation, with but few suits of any importance now pending. During the year past the suit of Sanborn against the city, for grade damages on Washington street, has resulted in a verdict for the city.

Squire vs. Somerville has been referred to an auditor.

Sullivan vs. Somerville is still pending, and the suits of Hitchings and nine others for the abatement of betterment assessments for the laying out of Columbus avenue extension, have been taken to the Supreme Court for decision upon legal questions.

Whitcher vs. Somerville is an action recently brought for damages by reason of an accident on Washington street.

The suits of Parker, trustee, remain in the same condition as last year.

WATER CONTRACT.

A special committee was appointed last year to endeavor to secure a modification of the contract under which we are supplied with water by the city of Boston. That committee labored faithfully to accomplish the purpose, but failed, for reasons set forth in their final report to the last city government. It would be well to renew the effort the present year.

POOR DEPARTMENT.

The appropriation for this department in 1882, was \$14,000. The expenditures exceeded this amount by \$789. Our board of overseers recommend that an almshouse be provided as a measure of economy in the support of the poor. It would be well to carefully investigate the subject, and adopt the suggestion, if it should commend itself to your judgment. The calls upon the department are increasing with our increasing population, and it is only a question of time when some provision must be made for the care of the poor different from the present arrangement.

IN GENERAL.

Our police department consists of a chief, captain, two sergeants, and twenty patrolmen. The appropriation for its support last year was \$22,500, and about \$300 of this amount remained unexpended at the close of the year.

The appropriation for street lights in 1882 was \$7,000, and the expenditures exceeded that amount by \$146.

An unusually large number of questions in which our city was interested, came before the Legislature last year for action. Much of the time of our city solicitor during the first months of the year was occupied in committee hearings upon matters of importance to our city, and in his annual report he suggests that a standing committee upon legislative matters be appointed. I concur in the recommendation.

Our citizens, by a decided majority, have again voted that no licenses shall be granted for the sale of intoxicating liquors during the present year, and that expressed will must be carried out, and the sale of liquors prevented as far as possible. During

the past year it has been asserted in my hearing that as much liquor as ever was being sold within our limits. This I do not believe. In no case has a complaint been made to myself, or to our chief of police, where a prompt and earnest effort has not been made to bring the parties complained of under the arm of the law. The number of places searched for liquors in 1882 was 25; number of prosecutions made, 15; number of places closed by action, 11; number closed without action, 1. The statistics of our police force cannot be relied upon, of course, to show how much intoxication arises from liquor procured in our own city, and how much from that obtained elsewhere, but the following figures present a favorable showing for the past year in comparison with previous ones:—

1879.	Number of arrests for drunkenness	161
1880.	“ “ “	115
1881.	“ “ “	173
1882.	“ “ “	143

Number of disturbances and affrays caused by drunkenness:—

1879	358
1880	267
1881	265
1882	210

If any one feels that the law is not impartially and efficiently enforced, that person has only to enter his complaint to myself, or the chief of police, of any violation of the law within his knowledge, to secure immediate action and prosecution, if sufficient evidence can be obtained.

Our city is prosperous beyond any previous period in her history. In the year just closed, eighty-three new dwelling-houses, two manufactories, one car-house and five stables have been erected, aside from a large number of additions and improvements. In a great measure the continuance of this prosperity depends upon a wise and economical management of our municipal affairs. During the coming year, if each one of us will but devote his best efforts to the work before us, we will be able to turn over our responsibilities at its close with satisfaction to ourselves, and with the good opinion of our fellow-citizens. Your

immediate predecessors in our city council have left behind them a record unsurpassed for economy, efficiency and faithful attention to the duties of their several positions. I sincerely trust that you will emulate their example, and surpass it, if possible.

In closing, I desire to express to my fellow-citizens a deep sense of gratitude for the evidence of their confidence and esteem manifested in my re-election for a third term, by a nearly unanimous vote, to the responsible duties of this office. It will be my utmost endeavor to merit a continuance of that confidence, by faithful and industrious attention to the interests of our city during the coming year.

REPORT

OF THE

TREASURER AND COLLECTOR OF TAXES.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 23, 1884.

Referred to the Committee on Finance, and sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 24, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

IN COMMITTEE ON FINANCE, Feb. 8, 1884.

To the City Council of Somerville:—

Agreeably with the requirements of section 9 of ordinance No. 4, the Committee on Finance, in conjunction with the auditor, has examined the accounts and books and the annual report of the city treasurer and collector of taxes for the year 1883, and has failed to find any errors therein.

A comparison has been made with the books of the city auditor; with the warrants and vouchers in the files of the treasurer; with the statements forwarded in compliance with section 4 of ordinance No. 4, by the several committees and boards; and by a general comparison of the books and vouchers. The cash balance, as shown by said books and accounts, has also been verified by actual count, and examination of bank deposits. Your committee would commend the very neat and business-like appearance of the books and accounts of the city treasurer and collector of taxes, and the thorough and conscientious manner in which the duties of his office are discharged, and recommends that his report be accepted and printed with the annual reports.

JOHN A. CUMMINGS, HIRAM D. SMITH, SAMUEL G. A. TWY-CROSS, JOSIAH B. MAYHEW, ELBRIDGE G. PARK, ALBERT M. ROBINSON, FRANK A. TITUS,	} Committee on Finance.
---	-------------------------------

IN BOARD OF MAYOR AND ALDERMEN, Feb. 13, 1884.

Accepted and referred to the Committee on Printing, to be printed with the annual reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 14, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

TREASURER'S OFFICE, January 19, 1884.

To the Honorable the Mayor and City Council of the City of Somerville:—

GENTLEMEN,—The undersigned presents herewith the twelfth annual report of the financial condition of the city, and a statement showing in detail the receipts and disbursements of the several departments for the year ending December 31, 1883.

The valuation of the public property December 31, 1882, was \$1,155,000, and the accessions thereto during the past year were, for cost of Edgerly School-house addition \$17,000, and for the furniture placed therein \$600; making the value of the public property. December 31, 1883, \$1,172,600. A new steam fire engine and four fire extinguishers have been purchased during the year by the committee on fire department, at a cost of \$4,136.50. The inventory of public property has not been increased by reason of the purchase of this apparatus, as the depreciation of the old engine made the purchase of a new one a necessity, in order to preserve the efficiency of the department.

The funded debt of the city remains the same as at the close of last year, viz., \$1,585,000.

City Loan Bond, No. 349,	\$36.500
City Loan Bonds, No. 353 to 373,	20,000
Water Loan Bond, No 36,	7,500
	<hr/>
Amounting to	\$64,000

became due during the year, and were provided for by the issue of

City Loan Bond, No. 465,	\$6,500
City Loan Bond, No. 466,	50,000
Water Loan Bond, No. 198,	6,500
Water Loan Bond, No. 199,	1,000
	<hr/>
Amounting to	\$64,000

all of which the commissioners of the sinking funds were enabled to purchase with the amount of their appropriation, added to the accumulations for the year.

There will mature, during the present year, bonds of the city amounting to \$473,500, bearing interest as follows:— \$5,000 at 5 per cent. ; \$20,000 at 5½ per cent. ; \$26,000 at 6 per cent. ; and \$422,500 at 6½ per cent., which will have to be provided for as follows:—

April 1st, \$47,000 ; July 1st, \$82,000 ; and October 1st, \$344,500. If these bonds are issued bearing interest coupons at 4 per cent., which can undoubtedly be done at a premium, reserving such an amount as will be required for the investment by the commissioners of the sinking funds of their appropriation and accumulations, to be issued at 5 per cent., there will be an annual reduction of the amount required to be appropriated for the payment of interest of about \$10,000.

The tax levy for 1883 was on a valuation of \$23,812,900, at a rate of \$16.70 on \$1,000 valuation; and 6,985 polls at \$2.00 each; amounting to \$411,645.43.

The appropriations for the year provided for by the tax levy, the additional amounts credited, the amount of expenditures and unexpended balances of the various departments, were as follows:—

Accounts.	Appropriations.	Additional Credits.	Expenditures and Balances.
CENTRAL HILL IMPROVEMENT:			
Appropriation	\$1,500 00

<hr/>			
Total amount of Appropriations . . .	\$411,645 43		
“ “ Additional Credits	59,254 21		
“ “ Expenditures			\$461,558 75
Excess of Appropriations over current expenses			9,340 89
	<hr/>		
	\$470,899 64		<hr/>
	<hr/>		<hr/>

The assets of the city available for the payment of its unfunded liabilities are as follows:—

Taxes	\$150,585.55
Real estate liens	3,729.86
State of Massachusetts, State Aid	3,654.50
State of Massachusetts, indigent soldiers and sailors	418.50
Highway betterment assessments	951.21
Sidewalk assessments	3,140.38
Sewer assessments	5,946.64
Water service assessments	857.80
Cash.	14,465.87
	<hr/>
Total amount of available assets	\$183,750 31

The unfunded liabilities are:—

Temporary loans	\$135,000.00
Overlay and abatement account	2,302.45
Overplus on tax sales	102.13
Public Library, balance to be expended	88.45
Sundry persons	485.10
	<hr/>
Total amount of unfunded liabilities	\$137,978.13
Excess of available assets over unfunded liabilities	45,772.18
	<hr/>
	<hr/>
	\$183,750.31

The financial condition of the city, without taking into consideration its public property, is as follows:—

Funded debt	\$1,585,000.00	
Amount of sinking funds as per report of the Commissioners	438,133.19	
		<hr/>
Net amount of funded debt	\$1,146,866.81	
Excess of available assets over unfunded liabilities derived from Excess of appropriations over current expenses:		
1881	\$9067.54	
1882	27,012.43	
1883	9,340.89	
Public Park, unexpended balance	351.32	45,772.18
		<hr/>
Leaving a net indebtedness December 31, 1883, of		\$1,101,094.63
		<hr/> <hr/>
The total cash receipts for the year, including a balance of \$21,516.88, from the year 1882, were		\$935,106.53
And the total cash disbursements		920,640.66
		<hr/>
Leaving in the treasury the sum of		\$14,465.87

A detailed statement of the funded debt, public property, and the receipts and disbursements of the various accounts will be found in the appendix to this report.

Respectfully submitted,

JOHN F. COLE, *Treasurer*

Water	1,405 90	
Gas	129 57	
Books	455 41	
Printing	281 10	
Stationery and other supplies	1,241 00	
Miscellaneous	838 77	
	<u> </u>	79,298 02
Total expenditures		<u>\$94,661 95</u>

RECEIPTS.

Tuition of non-resident pupils	\$301 50	
Rent of school halls	245 50	
	<u> </u>	547 00
Net expenditures		<u>\$94,114 95</u>

SCHOOLS.

Four new schools have been formed within the year; one grammar school in the Morse school-house and one in the Lincoln school-house; one primary school in the Forster school-house and one in the Webster school-house.

Whole number of schools	93
High school	1
Grammar schools	50
Primary schools	42

SCHOOL-HOUSES.

Whole number of school buildings	19
Number of school-rooms owned by the city	96
Number of rooms hired for school purposes	1
Number of vacant school-rooms	3
In the Bennett school-house	1
" Webster "	1
" Lincoln "	1

FORSTER SCHOOL-HOUSE.—In the summer of 1881, two school-rooms were constructed in the hall of this building. During the present year, the remaining portion of the hall has been divided into two school-rooms. The building now contains twelve school-rooms, all of which are occupied by schools.

This building was dedicated April 13, 1867, and first occupied by schools, five in number, on the second day of May following. The steam-boiler which had been in use ever since the house was dedicated, was displaced by a new one during the summer vacation, and the entire heating apparatus was thoroughly renovated.

The first Forster school-house was completed and occupied by schools, three in number, early in the year 1855. It was burnt February 18, 1866.

HIGH SCHOOL-HOUSE.—For the convenience of the High School, the partitions in the third story of this building, have been removed and two school-rooms, each thirty by thirty-one feet, have been constructed, leaving a hall sixty-three by sixty-four feet. This change, which does not mar the beauty of the hall or materially diminish its capacity, will, probably, render the accommodations of the building equal to the wants of the school for several years to come.

PRESCOTT SCHOOL-HOUSE.—The steam-boiler in this building has been in use sixteen years. The safety of the schools that will occupy the building, will require the substitution of a new boiler for the old one, sometime during the coming year. This building was dedicated June 16, 1868, and first occupied by schools, eight in number, on the 20th day of the same month.

HIGHLAND SCHOOL-HOUSE.—By order of the Board of Health, this building was vacated, for sanitary considerations, on Tuesday, December 11, and will not be occupied again until after

the Christmas vacation. The schools which have occupied this building, have been subjected to several interruptions during the year, in consequence of defective means of heating and ventilation.

TABLE SHOWING THE NUMBER OF SCHOOL BUILDINGS IN EACH OF THE SEVERAL DISTRICTS, AND THE NUMBER OF SCHOOLS AND PUPILS IN EACH BUILDING IN DECEMBER.

ADDITIONAL ACCOMMODATIONS.

EAST SOMERVILLE AND PROSPECT HILL DISTRICTS.—All the school-rooms in East Somerville district are occupied by schools. One room is hired for school use. In Prospect Hill district there are only two vacant school-rooms; one in the Bennett school-house, which will be required for the accommodation of children in its immediate neighborhood, early in the coming spring, and one in the Webster school-house. All of the occupied

rooms in the district are full; those in the L. V. Bell school-house are crowded. Large accessions will be made to the ninth class in this building, when pupils of that grade are admitted in April next.

In each of these two districts there are many dwelling-houses just completed, or in process of construction, which will be occupied in a few months.

Present emergencies, and the necessities of the immediate future, seem to demand that measures be adopted at an early day, to furnish additional and permanent school accommodations in these two districts.

WEST SOMERVILLE DISTRICT.—All the school-rooms in this district are occupied except one room in the Lincoln school-house. The principal's room in the Highland school-house contains fifty-nine pupils, thirty-nine of whom are members of the second class. The ninth class contains sixty-three pupils, all in one room. Large numbers will be added to this class in the coming spring.

Two additional school-rooms will be required in this district next year; one in April for the sixth class, and one in September for the second class.

CEDAR STREET SCHOOL-HOUSE.—This building is insufficient to accommodate the primary-school children who live in its immediate neighborhood. The crowded condition of the schools which occupy the building was relieved temporarily, in September, by sending a portion of the seventh class to the schools of that grade in the Forster and the Highland school-houses. Those buildings cannot afford further relief; hence, when the usual accessions are made to the ninth class, in April next, an additional school-room in the neighborhood of the Cedar street school-house will be a necessity.

TEACHERS.

Fourteen teachers have been elected within the year, and eleven have resigned.

ELECTED.

Mr. Frank F. Murdock, principal of the Morse School.

Miss Corinne Harrison, teacher in the Morse School.

Miss Laura J. Brooks, teacher in the Morse School.

Miss Mary E. Stiles, teacher in the Forster School.

Miss Addie S. Winnek, teacher in the Forster School.
 Miss Annie S. Gage, teacher in the Forster School.
 Miss Clara G. Fogg, teacher in the Prescott School.
 Miss Florence A. Robinson, teacher in the Prescott School.
 Miss Isadore E. Taylor, teacher in the Bennett School.
 Mr. John Wilson, principal of the Jackson School.
 Miss Harriet A. Holbrook, principal of the Franklin School.
 Miss Annie R. Cox, teacher in the Highland School.
 Miss Alice B. Chadwick, teacher in the Lincoln School.
 Miss Kate O'Brien, teacher in the L. V. Bell School.

RESIGNED.

Mr. William M. Stevens, principal of the Morse School.
 Miss Nellie M. Whitney, teacher in the Forster School.
 Miss Abbie F. Bosworth, teacher in the Edgerly School.
 Miss Lizzie F. Appleton, teacher in the L. V. Bell School.
 Miss Hattie E. Boardman, teacher in the Prospect Hill School.
 Miss Nora O'Leary, principal of the Jackson School.
 Miss Ada L. Sanborn, principal of the Webster School.
 Miss Sarah F. Gibbs, teacher in the Highland School.
 Miss Annie L. Clapp, teacher in the Lincoln School.
 Miss Zillah E. Freeman, teacher in the Beech Street School.
 Miss Ada I. Howe, teacher in the L. V. Bell School.

Whole number of teachers, 106: (male teachers 9; female teachers 97).

Number of teachers in the High School, 8: (male teachers 2; female teachers, 6).

Number of teachers in the grammar schools, 55: (male teachers, 6; female teachers, 49).

Number of teachers in the primary schools, 42.
 One teacher of vocal music.
 Number graduated at Normal Schools, 20.
 Number graduated at our high school, 41.
 Average time of service in years, 5.4.

PRIMARY SCHOOLS.

The primary schools contain forty-six per cent. of all the pupils in the several schools. Of the forty-two schools of this grade, thirty contain one class each; nine, two classes each; and one contains three classes. In eight of these schools there has been no case of corporal punishment during the year.

Number of pupils in January	2,048
Number admitted during the year	950
Number promoted to the grammar schools	470
Number in attendance in December	2,206
Average number to a teacher	55
Number registered during the year	2,998

Rare qualifications are essential for the successful management of primary schools. Each succeeding year the impression becomes more general, that only such teachers as have had special training in the art of teaching, should be entrusted with the education of young children. In some of the best German elementary schools, men of literary distinction are employed in teaching children the rudiments of learning; and in the highly organized Jesuit schools it was a regulation that only those teachers who had been specially successful in the higher classes, should be entrusted with the care of the lowest.

It was said by Horace Mann: "It ought to be universally understood and intimately felt, that, in regard to children, all precept and example, all kindness and harshness, all rebuke and commendation, all forms, indeed, of direct or indirect education, affect mental growth, just as dew and sun and shower, or untimely frost, affect vegetable growth. Their influences are integrated and made one with the soul, and though imperceptible in childhood, work out more and more broadly into beauty or deformity in after life."

The course of study prescribed for our grammar schools is, substantially like the courses adopted by most cities in the Common-

wealth, and, in many respects, is satisfactory. In some branches, however, at certain stages of advancement, the requirements are in excess of the capabilities of our pupils.

The preparation of courses of study, is one of the most difficult and important duties required of school officers. The Public Statutes prescribe the studies to be pursued, define school age, and the period during which school attendance is compulsory; but the responsibility of limiting school time, selecting text-books, prescribing the extent to which they shall be pursued, and of apportioning the work among the several classes, devolves upon school committees. The efficiency and success of the schools depend, in large degree, upon the wisdom exercised in these particulars.

The tendency of the times is, to extend the curriculum of the schools, to the loss of thoroughness in the more essential branches of instruction, and to curtail school time without a corresponding diminution of the amount required in each particular branch of study. Some compensation is found in the increase of facilities, and in improved text-books and methods of instruction; still the work demanded is in excess of ability to perform. The present generation of pupils evince no increase of aptitude in acquiring knowledge, and they derive comparatively little advantage from the accumulations of preceding generations.

“When did Age transfer to Youth
The hard-gathered lessons of its day?”

All are compelled to begin with the rudiments of learning, and to advance by slow stages up its rugged way.

Were less attempted, more, doubtless, would be accomplished for the permanent good of our pupils. In order, under existing circumstances, that the work required may be completed in the allotted time, much of it is performed by the teachers, to the injury of their pupils. The teacher's province is to guide, stimulate, and encourage pupils to exercise their activities; to train them to the formation of correct habits of study; to use all healthful incentives, and to impose all needful restraints, with a view to the formation of strong, symmetrical, and noble characters; but never to perform, for pupils, their legitimate and essential work.

We cannot emphasize too strongly, that the young are educated, not by what is done for them, but by what they do for themselves,

under wise direction ; not by what is communicated to them, but by what they acquire by their own earnest, persistent endeavor. The most valuable teacher, therefore, is he who is most successful in training his pupils to habits of patient study and careful investigation ; who teaches them the art of gaining knowledge, unaided, from the printed page and the ever-open book of nature, and to make a wise application of what they know. The success of our pupils in the labor of life, will be greatly promoted by the mental strength evolved, and the self-reliance induced, by patient, persevering study, and the independent exercise of their capabilities.

If the curriculum of the schools is too extensive, and the work required is excessive, the inquiry is pertinent : Why are they not abridged to conform to the capabilities of the learner? Within certain limitations, they are, in practice. But the interests of the various cities and towns of the Commonwealth are so interwoven, and the interchange of pupils is so frequent and general, uniformity of practice and conformity to prevailing sentiment and usage, seem to be a necessity. Besides, in matters of public concern, the convictions and judgment of individuals, must yield to popular sentiment and demand.

Number who have left the School during the year, exclusive of graduates	58
Whole number at the present time	275
Number over fifteen years of age	246
Number in course preparatory to college	78
Number pursuing the regular course	165
Number pursuing the English course	32
Number in the first class on entering the school	107
Number at the present time	45
Number in the second class on entering the school	94
Number at the present time	56
Number in the third class on entering the school	111
Number at the present time	98
Number in the fourth class on entering the school	96
Number at the present time	96

Number of pupils at the present time is about 6 per cent. of the number in attendance in all the schools.

The number of pupils graduated this year, is six more than the largest number graduated in any previous year.

THIRTY-FIRST ANNUAL EXHIBITION OF THE SOMERVILLE
HIGH SCHOOL, TUESDAY, JUNE 26, 1883, AT 9 O'CLOCK A.M.

ORDER OF EXERCISES.

- SINGING.*—Solo and Chorus: Qui Tollis—Mass in B flat. *Farmer.*
Vocal March. *Southard.*
1. SALUTATORY IN LATIN. ARTHUR H. OSGOOD.
2. ESSAY. *Nihilism.* EDWARD W. HARNDEN.
3. READING. Daisy's Faith. *Mathews.* JENNIE M. KEYES.
4. READING. Mona's Waters. MARY E. O'BRIEN.
SINGING.—Unison Solo: The Two Grenadiers (male voices).
Schumann.
Cradle Song (female voices), *Taubert.*
5. ESSAY. *Two Hills.* GEORGIA SMITH.
6. READING. The Catholic Psalm. *Hubbard.*
NELLY M. SYLVESTER.
7. FROM "MARIA STUART." *Schiller.*
MARY C. ALLEN, ELEANOR L. ROBINSON.
8. READING. Higher Education for Women. *Century.*
LILLIAN V. LOVEJOY.
SINGING. Selections from "Lohengrin." *Wagner.*
a. Introduction—Act III. (orchestra alone).
b. Bridal Chorus.
9. FROM "HAMLET." (Original Version in Greek).
ALBERT D. DAVENPORT, GEO. W. FOSTER.
FRED M. PERKINS, FRANK C. STOWELL.
10. READING. Selected. MINNIE G. CURVILLE.
11. ORIGINAL CONTRIBUTIONS. ABBIE A. MATTOON.

RECESS.

- MUSIC.—Overture "Iolanthe" (Orchestration by Henry Hadley).
Sullivan.
- SINGING.—From "Loreley:" a. Ave Maria (female voices).
b. Vintage Song (male voices).
Mendelssohn.
12. ESSAY. *Sounds.* ANNIE C. THAYER.
13. FROM "L'AVOCAT PATELIN." *Brueys.*
FRANK C. CHAPIN. HERBERT A. WILCOX.
HERBET M. HOWES, FRED I. WRIGHT.
ALBERT C. TUFTS, MINNIE S. TURNER.
14. ESSAY. *We.* HATTIE RAYMOND.
15. READING. *Ginevra.* *Coolidge.*
ELEANOR C. BOOTHBY.

* WITH HADLEY'S ORCHESTRA.

16. POEM. CHARLES H. ST. JOHN.
SINGING—Semi-Chorus: Bird Song. *Taubert.*
Solo and Chorus: Sanctus,—St. Cecilia's Mass (with organ)
Gounod.
17. NIOBE. ELWOOD G. TEWKSBURY. *Ovid.*
18. PROPHECIES. RUTH C. MILLS.
19. VALEDICTORY. FLORENCE L. GOODHUE.
20. PRESENTATION OF DIPLOMAS, BY MAYOR JOHN A. CUMMINGS.
21. PARTING HYMN.

MEMBERS OF THE GRADUATING CLASS.

Lena Gertrude Allen,
Mary Charlotte Allen,
Carrie Louise Blake,
Eleanor Chadbourne Boothby,
Helen Fleming Bowie,
Hattie Amanda Cheney,
Lucy Estelle Clark,
Minnie Gertrude Curville,
Fannie Eliza Dillon,
Elizabeth Veronica Finegan,
Florence Lizzie Goodhue,
Jennie Madelin Keyes,
Lillian Virginia Lovejoy,
Susie Augusta Mattoon,
Ruth Caroline Mills,
Mary Etta O'Brien,
Belle Frances Powers,

Hattie Raymond,
Eleanor Louise Robinson,
Clara May Smith,
Georgia Smith,
Mary Isabel Snow,
Nellie Maude Sylvester,
Annie Cleveland Thayer,
Minnie Stimpson Turner,
Harriet Ellen Vickery,

Frank Colburn Chapin,
Edward Warren Harnden,
William Thomas Harney,
Charles Hartwell St. John,
Albert Clifford Tufts,
Herbert Augustus Wilcox,
Fred Irving Wright.

COURSE PREPARATORY TO COLLEGE.

Henry Blanchard Barber,
Albert Dudley Davenport,
Geo. Waldo Foster,
Herbert Morton Howes,
Arthur Henry Osgood,

Fred Miller Perkins,
Frank Caleb Stowell,
Elwood Gardner Tewksbury,
Margaret Teresa Keefe,
Abbie Antoinette Mattoon.

EVENING SCHOOLS.

The evening school which was in operation at the beginning of the year, in the Webster school-house, under the charge of Mr. John Wilson and three assistants, was continued thirty-three evenings.

Whole number registered.	80
Males, 59 ; females, 21.	
Largest number in attendance	72
Average attendance	43

The school in the Cedar street school-house under the care of Mr. L. B. Pillsbury and one assistant, was continued twenty-five evenings.

Whole number registered	55
Males, 45 ; females, 10.	
Largest number in attendance	45
Average attendance	22
Cost of instruction in both schools	\$337 00
Janitors' services	66 75
	<hr/>
Total cost	\$403 75

HEALTH.

We respectfully invite earnest attention to the important subject of school hygiene, and solicit a careful revision of practice pertaining thereto.

An impression very generally prevails that the prime object of public schools is the development of mental strength and activity, and the bestowment of such knowledge as is helpful in the performance of the ordinary duties of life. But education in its broadest significance has respect to the complete and harmonious development and training of all the powers and faculties of our entire being. The true educator, therefore, has due regard to physical training and moral culture, as well as to mental development and the promotion of sound learning.

As recipients of the trust delegated to us of directing the education of the youth of our city, we assume in large measure parental responsibilities, and become the custodians of whatever pertains to the well-being of those committed to our care.

In our solicitude to promote the intellectual advancement of our pupils, we should never forget that an education obtained at the cost of impaired health and an enfeebled constitution, is purchased at too costly a sacrifice. We should earnestly endeavor to preserve and promote the health of our pupils and secure to them, if possible, the priceless treasure of a sound, vigorous body as well as a highly cultivated and liberally endowed mind. "A sound mind depends greatly upon a sound body." Rosseau says: "Make your pupil robust and healthy in order to make him reasonable and wise."

Under the most favorable circumstances there are unavoidable conditions, incident to school-life, that are prejudicial to the maintenance of sound health: as confinement and unnatural quiet, for several hours daily, in dusty and imperfectly ventilated school-rooms; exposure to cold draughts of air and sudden changes of temperature; constrained positions of the body; severe and protracted use of the eyes, often under trying circumstances; continuous mental effort accompanied not infrequently by undue anxiety; increased liability to contagious diseases.

To mitigate these conditions, and to counteract their influence, by all available means, should be our earnest and constant endeavor. We will briefly consider the conditions specified.

ATMOSPHERIC CHANGES.—An ample supply of pure air, and an agreeable, equable temperature, are indispensable conditions of health and comfort. To maintain these with imperfect and inadequate means of heating and ventilating, and in the variable climate of this region,—which has been aptly styled "the perpetual battle-ground of the Torrid and Arctic, where they alternately prevail,"—requires incessant vigilance, and imposes duties, the neglect of which, may result in fatal consequences.

Pure air contains twenty-one per cent. of oxygen which is its life-sustaining element, seventy-eight per cent. of nitrogen, and one per cent. of carbonic acid. At each respiration about five per cent. of the oxygen disappears and an equal quantity of carbonic acid and other deleterious substances supply its place. Since the average number of respirations is twenty per minute, and the average quantity of air inspired at each respiration is thirty cubic inches, it is apparent that the vitality of the air, in crowded apartments, is rapidly diminished, and that its frequent and complete renovation is an imperative necessity.

To maintain a healthy condition of the atmosphere, it is estimated that, at least, four cubic feet of fresh air should be supplied to each individual every minute; hence a school-room containing fifty pupils should be furnished, each hour, with twelve thousand cubic feet, a quantity equal in capacity to that of an ordinary school-room. To accomplish this result, doors and windows must be resorted to frequently, for the admission of pure air and the exclusion of that which has lost its vitality. To do this, and not endanger the health of pupils, is a problem by which teachers are constantly confronted.

VENTILATION. — Concerning ventilation we have yet much to learn; but the item of expense prevents, in large degree, an application of the knowledge already acquired. The great desideratum is ample provision, by means of suitable heating apparatus, for the introduction into school-rooms of large volumes of pure air at the proper temperature for health and comfort, instead of, as at present, small quantities at a high temperature, and, also, for the exclusion of equal volumes of vitiated air through ventilating ducts well distributed and sufficiently heated to produce an active current. Under such circumstances, a proper balance would be maintained between the air admitted and the air excluded; the supply would always equal the demand; the air would be pure and healthful at all times; and pupils would not be exposed to cold currents and sudden changes of temperature.

For the exclusion of impure air, the ventilating registers should be kept open both at the top and bottom of the room, except when it is desirable to economize heat; then they should be opened at the bottom only. Whenever it is necessary to change the air while the school is present, the windows should be opened for a few minutes, and the pupils should engage in brisk physical exercises. If any are in delicate health they should occupy positions least exposed to the incoming air, and protect themselves, if necessary, by outer garments. Immediately after the close of each session of the schools, and during the time of the recesses, all the doors and windows should be thrown wide open, that the air in the school-rooms may be thoroughly renovated.

CAUTIONS AND SUGGESTIONS.—Under no circumstances should pupils be exposed to currents of cold air when they are not in motion. We would strongly emphasize this caution, for we regard such exposure a more fruitful source of colds and their

attendant dangerous consequences, than all other causes, incident to school-life, combined. *Occasion for adverse criticism in this regard should be avoided.* An eminent physician has said: "Though foul air is a slow poison, we must not forget that a *blast of cold air may slay like a sword.*"

The temperature of the air in the school-rooms should be kept as equable as possible, and should not deviate materially from 68°. As sensation is not a reliable criterion, the thermometer should be consulted frequently and at stated periods.

Except in stormy weather, all pupils should be required to spend the entire recess in the open air, and should be encouraged to engage in vigorous, healthful sports.

Pupils should never be allowed to sit in school with wet feet or damp clothing. If the means for drying them in the school-room are insufficient, they should be sent immediately to their homes.

We commend the practice, so generally pursued, of requiring pupils, in inclement weather, to put on their outer garments before they leave their respective buildings for recess or to return to their homes.

By the Regulations of the School Board, teachers are required to be present and to open their school-rooms for the reception of pupils, both morning and afternoon, fifteen minutes at least before the time for school to begin.

We would advise that in cold or stormy weather, pupils be retained at their homes until they will be sure of gaining admission to their school-rooms.

Great caution should be exercised to avoid injury to the eyes of pupils. The morning hour should be used for exercises which severely tax the sight. Such exercises should not be protracted, especially when the light is faint. Never allow the sun to shine upon pupils' books or desks. A few plants well cared for, are usually interesting to children, and add to the attractiveness of a school-room; but when they are so situated as to prevent the free opening and closing of the blinds, and are the means of causing the sun's rays to fall upon the books and desks of the pupils, they should be removed.

We invite special attention to the following excellent rules for the care of the eyes, prepared by Dr. D. F. Lincoln, of Boston :

When writing, reading, drawing, sewing, etc., always take care that

- (a) The room is comfortably cool and the feet warm;
- (b) There is nothing tight about the neck;
- (c) There is plenty of light, without dazzling the eyes;
- (d) The sun does not shine directly on the object you are at work upon, or upon objects in front of you;
- (e) The light does not come from in front; it is best when it comes over the left shoulder;
- (f) The head is not very much bent over the work;
- (g) The page is nearly perpendicular to the line of sight; that is, that the eye is nearly opposite the middle of the page, for an object held slanting is not seen so clearly;
- (h) That the page or other object is not less than fifteen inches from the eye.

In any case, when the eyes have any defect, avoid fine needlework, drawing of fine maps, and all such work, except for very short tasks, not exceeding half an hour each, and in the morning.

Never study or write before breakfast by candle-light.

Do not lie down when reading.

Avoid reading or sewing by twilight, or when debilitated by recent illness, especially fever.

UNDUE ANXIETY.—In the management of the schools, we should endeavor to guard against all disturbing influences and whatever tends to undue excitement or nervous irritability and depression; for these are not only detrimental to health, but positive hindrances to intellectual advancement. Method and simplicity of arrangement conduce to quiet and to effective work. The more complicated the machinery the greater the liability to derangement and friction. In the assignment of lessons, we should aim to keep within the limit of our pupils' capabilities. We should give them the stimulus and pleasure of success, and save them, when possible, from the discouragement of failure. In all test exercises, we should avoid the parade of percentages, and the comparison of results, as incitements to effort. The *pleasure of acquiring* is the true incentive to acquisition. No home study should be required of pupils under twelve years of age.

PHYSICAL EXERCISES.—We would earnestly recommend the regular and systematic practice of physical exercises in all the schools. The many advantages which accrue, more than compensate any apparent loss of time required. By our Regulations fifty minutes

a week are assigned for these exercises in the primary schools, and thirty minutes in the grammar schools. The specific requirement of the primary schools, is from three to five minutes twice each session. The exercises should be short, brisk, and frequent, never sufficiently prolonged to induce weariness.

The following are some of the beneficial results of calisthenic exercises: "The weariness of long-continued sitting is dispelled; the nervous restlessness, which so often disturbs the order of the school, is allayed; headaches and other forms of nervous ailments, are diminished; the tendency to distortion, incident to sitting in one position, is overcome; a greater amount of intellectual work is secured, and grace of attitude and gesture is developed."

CONTAGIOUS DISEASES. — The liability to the propagation of contagious diseases, occasioned by the massing in the schools of large numbers of persons from all localities, requires the adoption and enforcement of stringent precautionary regulations. Public safety demands of all persons having in charge the interests of the schools, extreme vigilance in regard to health, and constant fidelity in the observance of such precautionary regulations.

The following provisions of Chap. 26, of the General Statutes, are enforced in our city: —

"SECT. 47. When a householder knows that a person within his family is taken sick of any disease dangerous to the public health, he shall immediately give notice thereof to the Board of Health in the town in which he dwells. If he refuses or neglects to give such notice, he shall forfeit a sum not exceeding one hundred dollars."

"SECT. 48. When a physician knows that any person whom he is called to visit is infected with any disease dangerous to the public health, he shall immediately give notice thereof to the Board of Health of the town; and if he refuses or neglects to give such notice, he shall forfeit for each offence a sum not less than fifty nor more than one hundred dollars."

The diseases specified by our Board of Health as dangerous to public health, and of which they require a report, are small-pox, scarlet fever, diphtheria, and typhoid fever.

The following is the order of the Board of Health which applies to the schools : —

It is hereby ordered :—

“That no child from any family in which a case of scarlet fever has occurred, or shall hereafter occur, shall, without a written permit from this Board, attend any school in this city until the expiration of *four weeks* from the commencement of the last case in such family. Such length of time shall be certified in writing by a physician or some responsible member of the family ; the certificate to be presented to the teacher of the school before the child is admitted.”

By the Rules of the School Board, no child can be admitted to our public schools without satisfactory evidence that he has been secured against small-pox ; and no pupil affected with any contagious or infectious disease or directly exposed to the same, shall be allowed to attend the public schools.

CONCLUSION.

Ever since the great educational awakening inaugurated and fostered by the indomitable energy and unquenchable enthusiasm of Horace Mann, the public schools of our Commonwealth have been gradually and constantly improving. From their various complications their improvement has been, of necessity, slow, but permanent and substantial. The celebrated Dr. Arnold said : “I came to Rugby full of plans for school reform ; but I soon found that the reform of a public school was a much more difficult thing than I had imagined.”

Spasmodic reforms in every department, are like meteors that rush across the sky and dazzle by their brilliancy for a brief period only, and suddenly disappear. But the advance of all great movements, by which the moral and intellectual uplifting of the race is effected, like the incoming tide of the ocean or the sun in his course, is apparently slow, but steady, constant, and sure. In matters of minor moment, causes and their effects frequently follow each other in quick succession ; but in great and far-reaching reforms, they are often separated by long intervals of time.

The progress of the schools, and the rapid increase of facilities for their improvement, furnish an interesting chapter in the history of the last fifty years. Previous to the organization of the State

Board of Education, in 1837, there was only one institution in the State designed especially for the preparation of teachers for their work, and only one publication, of any note, for the dissemination of information relating to educational subjects. There were no systematic courses of study, no conventions or associations for the interchange of opinions or comparison of practice, and comparatively few books from which teachers could gain information of practical value. In most towns, and in many cities, school architecture was of a rude type, and great apathy pervaded communities in regard to the interests of education.

Horace Mann, the first Secretary of the Board of Education, made the following statement concerning the condition of the public schools at the time he entered upon the duties of his office:—
“In this Commonwealth there are about three thousand public schools, in all of which the rudiments of knowledge are taught. These schools, at the present time, are so many distinct, independent communities; each being governed by its own habits, traditions and local customs. There is no common, superintending power over them: there is no bond of brotherhood or family between them. They are strangers and aliens to each other. The teachers are imbedded, as it were, each in his own district, and are to be excavated, brought together, and established as polished pillars of a holy temple. As the system is now administered, if any improvement in principles or modes of teaching, is discovered by talent, or accident, in one school, instead of being published to the world, it dies with the discoverer. No means exists for multiplying new truths, or even for preserving old ones.”

Great changes have been effected, in these respects, during the last forty years. At the present time, there are six State Normal Schools, and various other institutions of learning with courses of study having special reference to the preparation of teachers. From these preparatory schools, hundreds of persons are annually graduated with qualifications of high order. By means of teachers' institutes and conventions, numerous educational publications, lectures, essays, discussions, and works upon the science of education and the art of teaching, teachers become familiar with the theory and practice of the most eminent and successful educators in all leading nations. Many men of the highest order of ability in our own country, and in other lands, are devoted to the consideration of the great problems of education, and are

laboring earnestly for the improvement of methods of instruction, and for the general diffusion of knowledge.

Our own schools have kept pace with the onward march of improvement. They have always maintained an honorable position in the front ranks of the best schools in the Commonwealth. It is our pleasure to report that, with scarcely an exception, the schools of the present year have sustained the reputation of those of former years, and have made important advances. Probably at no previous period have all the conditions of successful school work been more fully realized than during the present year. No prevailing diseases have seriously affected the attendance of pupils or materially interfered with regular school duties. With the exceptions already specified, the school buildings and their various appurtenances are in good condition. Pupils have been well accommodated, kindly cared for, and skilfully instructed. They have reciprocated by regular and punctual attendance, commendable application, cheerful submission to authority, and respectful and courteous demeanor. The order of the schools has been unexceptionable and secured mainly by mild measures. The instruction imparted has been thorough, and in accordance with the most highly approved methods. With rare exceptions, cordiality, mutual forbearance and coöperation have marked the relations of parents and teachers.

Our best schools closely approximate the following: —

The buildings have a healthy and quiet situation and pleasant surroundings. The school-rooms are spacious, light, and attractive, and are furnished with every appliance needful for health, convenience, and successful school work. Pupils are punctual, regular in attendance, studious in their habits, orderly in conduct, and courteous in demeanor. Teachers possess all the endowments and attainments, all the qualities of mind and heart, which are essential to eminent success in their important and noble avocation. Programmes of exercises are arranged with a view to the strictest economy of time and the relative importance of each particular branch of instruction. The work of the entire term, and of each individual day, is anticipated and provided for. No loss of time is incurred through negligence or delay. All lessons are carefully considered before they are assigned; all difficult and important principles are elucidated; and correct habits of study are inculcated. School records and all work to be copied, exhibit

the care which an accomplished accountant bestows upon his ledger. In discipline, firmness and decision are accompanied by justice and kindness. Mutual confidence and respect mark the relations of teachers and pupils. With constant fidelity, all known and available means are employed to promote physical health, intellectual invigoration, and moral culture.

Such schools are blessings to communities in which they exist, beyond comparison, and the value of their influence exceeds computation; but the labor, of which they are the outcome, none can fully estimate except those by whom it was performed. Carlyle says: "The built house seems all so fit, we forget the rude, disorderly quarry it was shaped from. The very perfection of the house, as if Nature herself had made it, hides the builder's merit."

The deliberations of the School Board have exhibited deep interest in the welfare of the schools, and have been characterized, at all times, by the courtesy and harmony which have ever been eminently exemplified by successive committees during our entire history. We have been stimulated in our work by the coöperation and encouragement of an intelligent and appreciative community, whose interest and solicitude for the promotion of general intelligence and the prosperity of the schools, are deep and abiding.

Respectfully submitted,

J. H. DAVIS,

Superintendent of Public Schools.

SOMERVILLE, Dec. 21, 1883.

REPORT
OF THE
SOMERVILLE MYSTIC WATER BOARD.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 13, 1884.

Referred to the Committee on Printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 14, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

OFFICE OF WATER BOARD, Dec. 31, 1883.

To His Honor the Mayor and the City Council :—

GENTLEMEN:—The Somerville Mystic Water Board present their report for the year ending December 31, 1883. A detailed and comprehensive statement of what the department has done during the year, and of the present condition of its property, will be found in the report of the Superintendent, herewith transmitted.

A large amount of pipe has been laid during the year, a great portion of it in Somerville avenue, where an eight-inch main was laid to take the place of the old six-inch main, which had become worn out, and the cause of great expense for repairs. The new line was laid about ten feet from, and parallel with, the old one, and upon a carefully prepared foundation. Under the Fitchburg Railroad crossing two hundred and sixty-four feet of extra heavy cast-iron pipe was used, as better adapted than the cement-lined pipe to withstand the jar of passing trains. The change of grade of Austin and Jaques streets rendered the lowering of the mains necessary, and new pipe was substituted where the old was found unserviceable.

Petitions are now before us for laying about twenty-five hundred feet of main pipe in different sections of the city.

The large number of services laid affords gratifying evidence of the city's rapid growth, as most of them were for the accommodation of new buildings.

Water is now supplied as follows:—

Dwelling-houses	3,836
Families in same	5,266
Model houses	143
Tenants in same	493
Stores and shops	110

Saloons	6
Offices	4
Manufactories.	6
Churches	12
For hand hose	593
Miscellaneous	54

The large number of breaks that have occurred during the year show conclusively the absolute necessity of substituting as soon as possible new pipe for the old in the street mains. This pipe, laid from fifteen to twenty years ago, was warranted for only five years, and its weakness, as shown by the frequent breaks, is increasing in an alarming ratio. Two breaks in a day have been nothing unusual during the year, and on one day five were reported, and received the attention of the department. It is easy to see that as the weakness of this old pipe is constantly increasing, so large a number of breaks may, and, judging from the past, probably will, occur at one time as to be beyond the control of the department, and subject the city to great inconvenience and damage. What would happen if a fire should break out in a closely built section of the city, while the water had been shut off by reason of one of these frequent breaks, is a question which none of our citizens would like to see answered by actual trial.

This old pipe must all be taken up very soon, and replacing it piecemeal is the most costly system the city can pursue. The repairs on the old pipe in Somerville avenue, while the new pipe was being laid parallel to it, cost the city more than three hundred dollars, an expense that would have been saved if the new pipe had been laid a year earlier.

We recommend an increase in the appropriations, that the Board may be able to begin a systematic relaying of pipe on a larger scale in those sections where the old pipe remains, beginning with the lower portions of the city, where the pressure is greatest, and the danger of breakage most imminent. The appropriation should be large enough so that this work may be done without crippling the department in its ordinary and necessary course of business. This work will have to be done, and economy demands that it be done as soon as possible.

An examination of the present condition of the works, and the record of what has been accomplished during the year, will bear

testimony to the ability and faithfulness of the Superintendent, Mr. Dennett; and we believe it will also show that a vigilant and judicious economy has been exercised in all expenditures.

To the Somerville police, through whose watchfulness thirty-nine leaks were discovered and reported, and other information given, thereby, doubtless, saving the city damages, the thanks of the Board are tendered.

Respectfully submitted,

J. O. HAYDEN.
JOHN F. NICKERSON.
A. R. COOLIDGE.
WALTER S. BARNES.
JAMES E. WHITAKER.

SUPERINTENDENT'S REPORT.

To the Somerville Mystic Water Board:—

GENTLEMEN :— In compliance with a rule of the Board, I present a report of the work done under my direction during the year ending Dec. 31, 1883 :

DISTRIBUTION MAINS.

The distribution mains were extended 6,411 feet (including 26 feet of hydrant pipe), which amount, added to that already laid, gives a total in the entire city of 248,640 feet or 47 miles, 480 feet.

On Somerville Avenue, 2,079 feet of eight-inch pipe were relaid in continuity (in place of the old six-inch main) ; and on Austin and Jaques Streets, 533 feet 6 inches of pipe were lowered, 380 feet of which were relaid to replace that found unserviceable. There were 64 bursts on mains, for repairing which 386 feet 6 inches of pipe were required : thus making the total of relaid pipe 2,845 feet 6 inches.

There were 28 leaks on mains from the following-named causes : rust holes, 10 ; pick holes, 9 ; joint leaks, 9. Total number of leaks and bursts, 92 ; an increase of 43 over those of 1882.

It will be noticed that the number of bursts and leaks is largely in excess of those of any previous year, a fact which is attributable chiefly to the bad condition of the mains in the lower part of Somerville Avenue (now relaid), and the streets of the immediate vicinity, 21 having occurred in that neighborhood alone.

SERVICE PIPES.

The whole number of services laid was 233, an increase of 72 over those of the previous year, giving an increase of 8,140 feet 4 inches. There are now in the city 3,838 services, aggregating 125,206 feet, or 23 miles 3,766 feet.

Twenty-six services were extended, and 17 were lowered on account of frost, and of changes in street grades. Two hundred and twenty-five feet of service pipe were used on old services.

Services were cleared, as follows :—

Pumped,	42
Thawed,	18
Tapped at corporation,	24
Of eels,	8
	—
Total,	92

Twenty-four services were repaired on account of leaks caused by broken leads, clamps, etc.; eighty-three iron service boxes were substituted for old wooden ones; and nineteen service gates were set on old services.

Water was shut off from 111 dwellings, stables, etc., for repairs, and by order of the Water Registrar for non-payment of rates.

STAND PIPES.

Nineteen stand-pipes were repaired by having new gates, boxes, pipe, valves, nipples, etc., and many were furnished with new hose.

DRINKING FOUNTAINS.

These had the usual attention, and very slight repairs were found necessary. The watering trough on Broadway, opposite the Park, and that on Medford street, corner of School street, are sources of great annoyance, as the waste pipes are frequently filled with stones, by boys, thereby causing overflows. I shall endeavor to devise some means for remedying the difficulty.

STOP-GATES.

Stop-gates were located on old mains as follows :—

Four-inch gate on Benedict Street.

Six-inch gate on Tufts Street, corner of Cross Street.

Eight-inch gate on Somerville Avenue, near Linwood Street.

Eight-inch gate on Somerville Avenue, between above-named gate and Poplar Street.

Eight-inch gate on Somerville Avenue, below Medford Street, line of pipe.

Eight-inch gate on Somerville Avenue, above Medford Street, line of pipe.

The four eight-inch gates on Somerville Avenue were all set upon the relaid line of eight-inch pipe, and of these the two latter were in place of a six-inch gate and four-inch blow-off, removed from near the corner of Medford Street.

The gate on Benedict Street was set in consequence of a change of street grade; but it has not yet been connected with the main on Austin Street, as some change is to be made in line of street.

The gates set on extension were located as follows:—

Six-inch gate on High Street, corner Prospect-hill Street.

Four-inch gate on Melvin Street, corner Bonair Street.

Six-inch gate on Madison Street, corner School Street.

Two-inch gate on Joy Street Place, corner Joy Street.

Six-inch gate on New Church Street, corner Somerville Avenue.

Six-inch gate on Boston Street, corner Prospect-hill Street.

Four-inch gate on Dover Street and Davis Square.

Four-inch gate on Leon Street.

Six-inch gate on Chauncey Avenue, corner Jaques Street.

One-inch gate on Olive Square.

Four-inch gate on Oxford Street, corner Central Street.

Four-inch gate on Hudson Street, corner Cedar Street.

Four-inch gate on Tennyson Street, corner Medford Street.

Six-inch gate on Lowell Street, corner Medford Street.

Three gates were reset, viz.:—

Six-inch gate (blow-off) on Somerville Avenue, opposite Squire's factory.

Six-inch gate on Somerville Avenue, near barrel factory.

Six-inch gate on Linwood Street, near F. R.R. Crossing.

Two gates were removed, the setting of others having rendered them unnecessary, viz.:—

Four-inch gate (blow-off) Somerville Avenue, near corner Medford Street.

Six-inch gate on Somerville Avenue, corner Medford Street.

On Fountain Avenue a three-inch gate (blow-off) was replaced by one of four inches.

Fifteen new gate boxes were set, and the customary repairs made on, and attention given to, all gates and gate boxes.

The whole number of gates in the city is 422, of which 24 are for blow-offs.

HYDRANTS.

Four new hydrants were set, two on the extension and two on old main, viz. : —

Boston machine hydrant, on Chauncey Avenue, corner of Jaques street.

Holyoke hydrant, on Lowell Street, opposite Vernon Street.

Bigelow hydrant, at end of Fremont Street.

Boston machine, Somerville Avenue, below railroad crossing.

Eight hydrants needing repairs were removed and a like number substituted, as follows : —

Adams Street, Boston machine in place of Bigelow.

Union Square, Holyoke in place of Holyoke.

Medford Street, near North's, Holyoke in place of Holyoke.

Somerville Avenue, below railroad crossing, two Boston machines (new), in place of two old Boston machines.

Mystic Avenue and Union Street, Holyoke in place of Boston machine.

Mystic Avenue and Union Street, Holyoke in place of Holyoke.

Tenney Court, Boston machine in place of Boston machine.

Sixteen hydrants were repaired, and one, found frozen, was thawed.

The whole number of hydrants now in the city is 297. All the hydrants received great care, and no complaint of their working reached me from any source.

WORK OF DEPARTMENT SHOPS.

There were made and lined in the shops of the department 7,670 feet of cement-lined pipe, and 285 new service connections. Twelve gates and eight hydrants were repaired; 425 large iron clamps, and all clamps and appliances for services were fitted, and innumerable repairs made incidental to the business of the works.

REPORT

OF THE

OVERSEERS OF THE POOR.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 13, 1884.

Referred to the Committee on Printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 14, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

OFFICE OF OVERSEERS OF THE POOR,
Feb. 12, 1884.

To the Mayor and City Council:

GENTLEMEN:—Again it becomes the duty of the Board of Overseers of the Poor to present you an abstract of their proceedings for the past year. The Secretary submits, in various tables, such information in regard to the workings of the Board as will be essential to the comprehension of the same.

The table containing Receipts and Expenditures for the year shows an excess of \$103.47 above receipts, also a decrease in expense since last year, of \$430.84. By comparing Table No. 1 with last year's report, it will be seen that in some items there is an increase, in others a decrease, leaving the average requirement at about \$15,000 for appropriation for the coming year; for which amount the Board respectfully petition. For the last six months of the past year, one member of the Board, Captain Lewis, Overseer and Storekeeper, has been an invalid. His duties as overseer, and in part as storekeeper, have been performed with pleasure by his associates. From the reports of his friends there is very little hope of a favorable result in his case. The store has been conducted the past year, on the same basis as before, with about the same results, giving the Poor more groceries for the money without extra cost to the city.

The Board still repeat the statement that an Almshouse is required for the economical and humane care of the poor.

On account of the illness of Captain Lewis, no report from the store is given.

JESSE J. UNDERHILL,
THOMAS CUNNINGHAM,
Overseers of the Poor.

REPORT
OF THE
BOARD OF HEALTH.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 30, 1884.

Referred to the Committee on Printing, to be printed with the annual reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 30, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

OFFICE OF THE BOARD OF HEALTH,
CITY HALL, January 30, 1884.

To his Honor the Mayor and the City Council:

GENTLEMEN:—The following is our report for the year ending December 31, 1883, and is the sixth annual report of this board.

MEMBERSHIP.

The membership of the board was not changed during the year. Jan. 9, Mr. Kimball was re-appointed for a term of two years.

ORGANIZATION.

March 1, the following officers were re-elected:

GEORGE A. KIMBALL	.	.	<i>Chairman.</i>
GEORGE I. VINCENT	.	.	<i>Clerk.</i>
WM. H. BRINE (40 Houghton St.,)			<i>Inspector.</i>

NUISANCES.

The following table states the nuisances abated, and the months when they were complained of:

NUISANCES ABATED IN THE YEAR 1883.

*Including nuisances referred to us by the Board of 1882.

Number of nuisances abated, as per preceding table, 1,004; number of nuisances referred to the Board for the year 1884, 171; total, 1,175.

Number of complaints, 564, only 1 of which appeared to have been made without a sufficient cause.

Number of houses ordered vacated, 54; number of these houses since put in habitable condition, 44; number vacated, 3 in compliance with our orders, and 3 by order of the Chief of Police under our direction.

Number of notices sent by mail, 660; number served by constables, 90; and in addition to these we have written 94 letters.

STABLES.—The usual number of complaints have been received of offensive stables, and they relate, in most cases, to stables which are unfit for use on account of their faulty construction, or, more properly speaking, lack of construction. We have not, as yet, resorted to extreme measures, but as the density of our population increases we shall be compelled to deal with these nuisances more rigidly than we have in the past.

Although it may be claimed that stables are not injurious to health, yet if they are “offensive to the senses, and render habitation uncomfortable,” they are nuisances, in the meaning of the law.

We renew the recommendation made in the first annual report of this board, that the Board of Aldermen do not grant permission to erect a stable unless it is to be placed at such a distance from dwellings as not to cause annoyance, and is to be well drained and ventilated, and provided with a suitable manure-pit; also, that on every petition for permission to erect a stable, a hearing be given to all persons dwelling in the immediate neighborhood.

PERMITS.

Permits were granted to keep swine and goats, and to collect grease, as follows:—

SWINE.—Applications were received for permits to keep 241 swine; permits were granted for 236, and refused for 5.

GOATS.—Permits were applied for, and granted, to keep 16 goats.

GREASE.—Twenty-one permits to collect grease were applied for, and 20 were granted, of which 14 were issued to residents of

Somerville, 3 to residents of Cambridge, 2 to parties doing business in Boston, and 1 to a firm in Medford; all of the non-residents having been recommended by the Boards of Health of their respective places of residence.

Recommendations to neighboring Boards of Health for Somerville parties to receive licenses to collect grease in their cities, were given as follows:—

To collect in Boston, 5.

To collect in Cambridge, 9.

During the year, the Board of Health of Cambridge granted licenses to 12 Somerville parties to collect grease in that city, and similar licenses were granted to 50 of our citizens by the Board of Health of Boston.

ASHES.

The Highway Department has continued to collect ashes and house-dirt, under our direction, but during the past year the collections were made weekly instead of monthly. This change, which was regarded as an experiment, has proved satisfactory in all respects except the cost, and this has been much greater than we anticipated, it having increased from \$1,429.56 in 1882 to \$2,416.94 in 1883. The number of loads collected last year, as reported by the Superintendent of Streets, was 7,539.

The collections are made in Ward One on Wednesdays, in Ward Two on Thursdays, in Ward Three on Fridays, and in Ward Four on Saturdays.

HOUSE OFFAL.

Mr. Christopher Burke's contract for the collection of house offal expired June 26th, when, as he was the lowest bidder, a new contract was made with him for three years. The new contract is precisely like the old one except in the item of compensation, which, in the latter, was five hundred dollars per annum and the materials collected, and in the present contract is "the materials collected" only. He is required to make three collections per week in the months of May, June, July, August and September; two per week in the months of April, October and November, and one each week in the months of December, January, February and March.

The contractor reports that he collected about 220 cords of offal during the year.

NIGHT SOIL.

The contract with Messrs. Russell and Fitch for the removal of night soil, which expired April 24th, was extended for one year.

They are entitled to charge, under said contract, for every load or part of a load removed in the months of April, May, June, July, August, September, October and November, \$3.50; and for the same in the months of December, January, February and March, \$2.50; a load consisting of eighty cubic feet. The contractors report that 504 loads were removed during the year.

Order-books are kept, as heretofore, at the Police Station on Bow Street and in the grocery store at the corner of Franklin and Perkins Streets.

SEWERS.

It is very necessary that sewerage be provided for the houses on Wyatt, Fairlee, Murdock and Clyde Streets, Brastow, Jenny Lind and Partridge Avenues and Tower Court, as their sewage is now being discharged upon the highways or into cesspools, and causes very serious nuisances.

The several sewer-outlets are in the same condition as stated in our last annual report.

SCHOOL BUILDINGS.

In March last, by request of the School Committee, we made a careful examination of all the school-buildings in the city, and reported in detail the defects found in each building. Some of these defects have received attention; but in our opinion very serious defects still remain, which it will cost a large sum of money to remedy. As our report to the School Committee is not in print, we repeat the portion relating to the general condition of the buildings.

“VENTILATION.—We are convinced, from our examination of the school buildings in Somerville, that they are generally defective in the system of ventilation, which in most cases is entirely inadequate. We also find that the teachers and janitors are generally ignorant and careless in regard to the necessity for pure air. For

instance, in the Bell School, in each of the twelve rooms we found every ventilator closed, and there were only one or two teachers in the building who said that they had at any time made use of them, but on examination we found them all in working order.

Every teacher should be instructed to make use of such means of ventilation as are provided, even though they may not be adequate.

The method of ventilating by open windows we consider very dangerous. In many of the buildings, however, it is necessary to make use of the windows for ventilation; but when this is done during the school session, the greatest caution should be observed. Free use may be made of them during exercises and at recess, and we found this to be the custom in some of the schools. In several instances we occupied a scholar's seat near an open window and could plainly feel the draught. Some of the teachers informed us that they always close the windows when scholars complain of the cold air; but it seems to us unreasonable to expect a child, under such circumstances, to be cautious enough to protect its health, when even grown people, who are at perfect liberty to consult their own comfort and convenience, suffer so often from colds contracted by heedlessly and unnecessarily exposing themselves to draughts.

The first duty of a teacher should be to promote healthfulness in her pupils, and the securing of large percentages and frequent promotions should be made matters of secondary consideration. We would suggest to your board that you consider the advisability of appointing some one to give to teachers and janitors the necessary instructions in relation to heating, ventilating, and other sanitary matters.

Many of the water-closets and privies were found offensive on account of insufficient ventilation, or faulty construction. We believe water-closets can be built in the basement of a school-building, which, if kept in good repair, with proper arrangements, and great care on the part of the janitors, will not cause any trouble; but as experience has shown that we cannot depend on having these necessary conditions, we believe it is better to place the closets outside of the building, provided the school-yard is not too small, and they can be located so as not to become offensive to neighbors or the public.

We believe the practice of allowing janitors with their families

to occupy apartments in the school-building is injudicious. The odor of the cooking is often diffused throughout the building, and is a subject of complaint at several of the large school-houses. A contagion is liable to break out in the janitor's family, which may render it necessary to close the school, as has been the case recently at the Webster School, which has remained closed for several weeks on account of a death from scarlet fever in the family of the janitor. If janitors are to live in the school-houses, only those with small families should be engaged.

Many of the school-rooms are crowded.

We have reported as defective any school-room that has a less capacity than 200 cubic feet of air-space to each seat.

The authorities on this matter are quoted as follows:—

A. C. Martin in Massachusetts State Board of Health, 1871, — 220 cubic feet.

Prof. Kedzie in Buck's Hygiene,— 300 cubic feet.

W. A. Briggs in New Hampshire State Board of Health Report, 1882, — 347 cubic feet.

In building a new school-house we should recommend an allowance of at least 250 cubic feet to each seat.

The janitors in many of the school-houses fail to keep the buildings and water-closets in proper condition. We believe that to a considerable extent, the foul odors that have caused so much complaint in the past, have been due to their carelessness and neglect.”

DEATHS.

544 certificates of death were approved during the year, and 27 certificates of still-births.

DISEASES DANGEROUS TO PUBLIC HEALTH.

SCARLET FEVER.—There were 84 cases of this disease reported to our Board during the past year, 6 of which proved fatal.

While this is a considerable increase over last year and the year before (1881, 25 cases and 1 death; 1882, 39 cases and 4 deaths), nothing like an epidemic has prevailed, the cases being for the most part scattered, and having little connection with one another. We, as a Board of Health, are very much pleased to notice the growing feeling not only of dread, but also of caution, among our people in regard to these contagious diseases; for this we believe is the surest safeguard against any extensive spread of them. We still continue our custom of placing cards with "Scarlet Fever Here," upon the houses in all cases, and are perfectly satisfied with the practical working of this rule.

DIPHTHERIA.—We are happy to note a diminution in the number of cases of this disease in our city during the past year. In 1880 there were 108 cases and 19 deaths; in 1881, 155 cases and 45 deaths; in 1882, 172 cases and 52 deaths; while in 1883, with an increase of population, there were only 156 cases, 31 of which proved fatal.

This diminution in the number of cases we believe to be due, at least in part, to the strenuous efforts of our Board in keeping children away from the schools. In this work we have had the hearty coöperation of the school teachers, and for this we are grateful to them. We have also had valuable assistance from the undertakers in preventing public funerals, and in burying the bodies of those dying from this disease as soon as possible.

Cards on the houses are also used in this disease.

TYPHOID OR TYPHUS FEVER (?).—At the very commencement of the year, in fact in December 1882, a child by the name of Porter, aged 12 years, was taken sick with all of the symptoms of typhoid fever; there was headache, pain in the back, etc., nose-bleed, typhoidal temperature, rose-spots and diarrhœa. She died in the third week, of exhaustion. This certainly was a well-marked case of typhoid fever.

January 17, 1883, the father, Thos. Porter, aged 45, was taken suddenly sick with scarcely any prodromal symptoms. He was sent immediately to the hospital, where he died in a few days. (History of this case is not known, with the exception that from

the peculiar character of the rash, some question was raised as to whether this was not a case of typhus; that was finally settled in the negative.)

At about the same time, January 23d, 1883, Frank Porter, 7½ years, and Thos. Porter, Jr., 9 years, were taken sick; the former was sick four weeks and had diarrhœa and was covered with a thick, dark brown rash all over the body, which did not disappear on pressure; typhoid temperature; recovered: the latter had the same symptoms, but with no diarrhœa.

January 23d, 1883, James L., 23 years, living near the Porter family, was sick in the same way with slight delirium, constipation, and this same rash; sick four weeks and recovered.

January 24, 1883, Mary N., 11 years, living in the same yard with the Porter family and using the same vault; symptoms strictly typhoidal; recovered.

Next in order came the City Physician, who was attending these cases. In this case distinct prodromes for ten days, no nosebleed, profuse diarrhœa caused by calomel, afterwards constipation throughout, this same dark rash all over the body, even in the palms of the hands and soles of the feet, active delirium early and continuing throughout the disease; sick eight weeks; recovered; temperature strictly typhoidal.

Next in order came Mrs. H., who nursed the Porter children. In this case there was profuse rash and constipation; recovered.

Next, Mrs. M., mother of Mary, profuse rose-rash, constipation; recovery.

Mollic M., 10 years old, daughter of Mrs. M. who assisted in the care of the Porter children, rash on face, hands and bowels; temperature at one time, 105°; recovered.

At about this time Dr. ———, who took the practice of the City Physician, became sick. In his case the temperature rose very high, and early in the disease made a sudden fall, after which the delirium and stupor continued for many days. This same dark rash was everywhere present. There was constipation, and finally, after a very severe illness, recovery.

Mrs. M., mother of Mary M., sick directly after with same symptoms. These two M—— cases seemed to transport the disease to Harris street, for shortly after, Mrs. John O'Brien, living near the M—— family, and having direct connection with them, was taken sick in the same manner as the rest and was taken to

the Massachusetts General Hospital, where she was treated for typhoid fever, and recovered.

Within a few days of this, the husband, John O'Brien, and a son, John O'Brien, Jr., became ill, and were taken to the City Hospital, Boston, whence, after a short stay, they were transported to the quarantine hospital, the cases being regarded as typhus fever. Both died.

In a short time Willie O'Brien, a younger son of John, was taken sick at his brother's house, where he and the sister had gone after the father's removal. In view of the possibility of this being another case of typhus, all practical precautions were taken to prevent the further spread of the disease. This boy had a typical typhoid fever, with hemorrhage from the bowels even, and after an illness of three weeks, recovered.

At this time the brother's wife, who had gone to her mother's, in Cambridge, became ill, and her case was thought by the authorities there to be typhus. This finally ended the epidemic.

There were four other cases having an apparent connection with these cases, the histories of which are not known. The exact dates of the commencement of the cases is unknown, as there is always some delay in the reporting of these cases.

In considering these cases, it is necessary to state that the region where they occurred is, perhaps, the most unhealthy in the city; the land is low and the houses in a wretched sanitary condition, vaults being used in most of the cases.

In the cases of the two physicians there was every reason for their having typhoid fever independently of these cases, for they were both completely broken down from exposure and overwork. In these two cases, where the ordinary precautions for preventing the spread of typhoid fever were taken, no other cases occurred, although no attempt were made at isolation.

It is extremely difficult, with no post-mortem examination to assist us, to determine just what the true nature of the cases was; but in our judgment all of the cases, certainly those seen by us, were *typhoid fever*.

The other cases that occurred during the year were scattered, and the usual sanitary defects were found to exist.

We present herewith a table, prepared by the Inspector, showing the sanitary condition of the several dwellings where diphtheria was reported.

We also submit two tables, the first of which shows the number of cases of scarlet fever, diphtheria, and typhoid fever reported in 1883, with the number and percentage of deaths from each, and the second shows the number of deaths in Somerville from scarlet fever, diphtheria, and typhoid fever in the several districts for each of the past six years.

The number of cases marked "fatal" in the Inspector's Diphtheria table is one less than the number of deaths from diphtheria during the year, because one of the deaths was that of a case which was reported in 1882 and which does not therefore appear in the Inspector's table.

DISTRICTS.

We have continued the comparison, by districts, of the number of deaths, the prevalence of the principal causes of death, the prevalence of dangerous diseases, and the number of nuisances abated.

The ten health districts are indicated on the accompanying map, which also shows the locations of sewers constructed prior to January 1, 1879, and the locations of the several cases reported and of fatal cases of scarlet fever, diphtheria, and typhoid fever in 1883.

The soil and elevation of the different districts are as follows:—

SOIL.—In Districts I., II., III., V., VI., VII., VIII. and X., and a part of IX., the soil is chiefly clay or clayey gravel, with considerable ledge in Districts VII. and VIII.; and in District IV. and the remainder of District IX. it is sandy.

ELEVATION.—In Districts I., III. and IV. and that part of District VIII. which borders on Mystic River the elevation is low, and in the remainder of the city it is generally high, ranging in parts of Districts II., V., VI., VII., VIII. and X., from 90 to 145 feet above mean low tide.

The four following tables show—

First.—The area, the estimated population, number of dwellings and people to each dwelling in the several districts in the year 1883, and the number of deaths in each district for the last ten years (exclusive of deaths at the McLean Insane Asylum), with the rate per thousand of population.

Second.—The five principal causes of death in Somerville in 1883, with the number of deaths from each and the rate per thousand of population, in each district.

Third.—The number of cases of scarlet fever, diphtheria and typhoid fever reported and the number of deaths from each of these diseases in each district in 1883, and the number of cases and number of deaths per thousand of population.

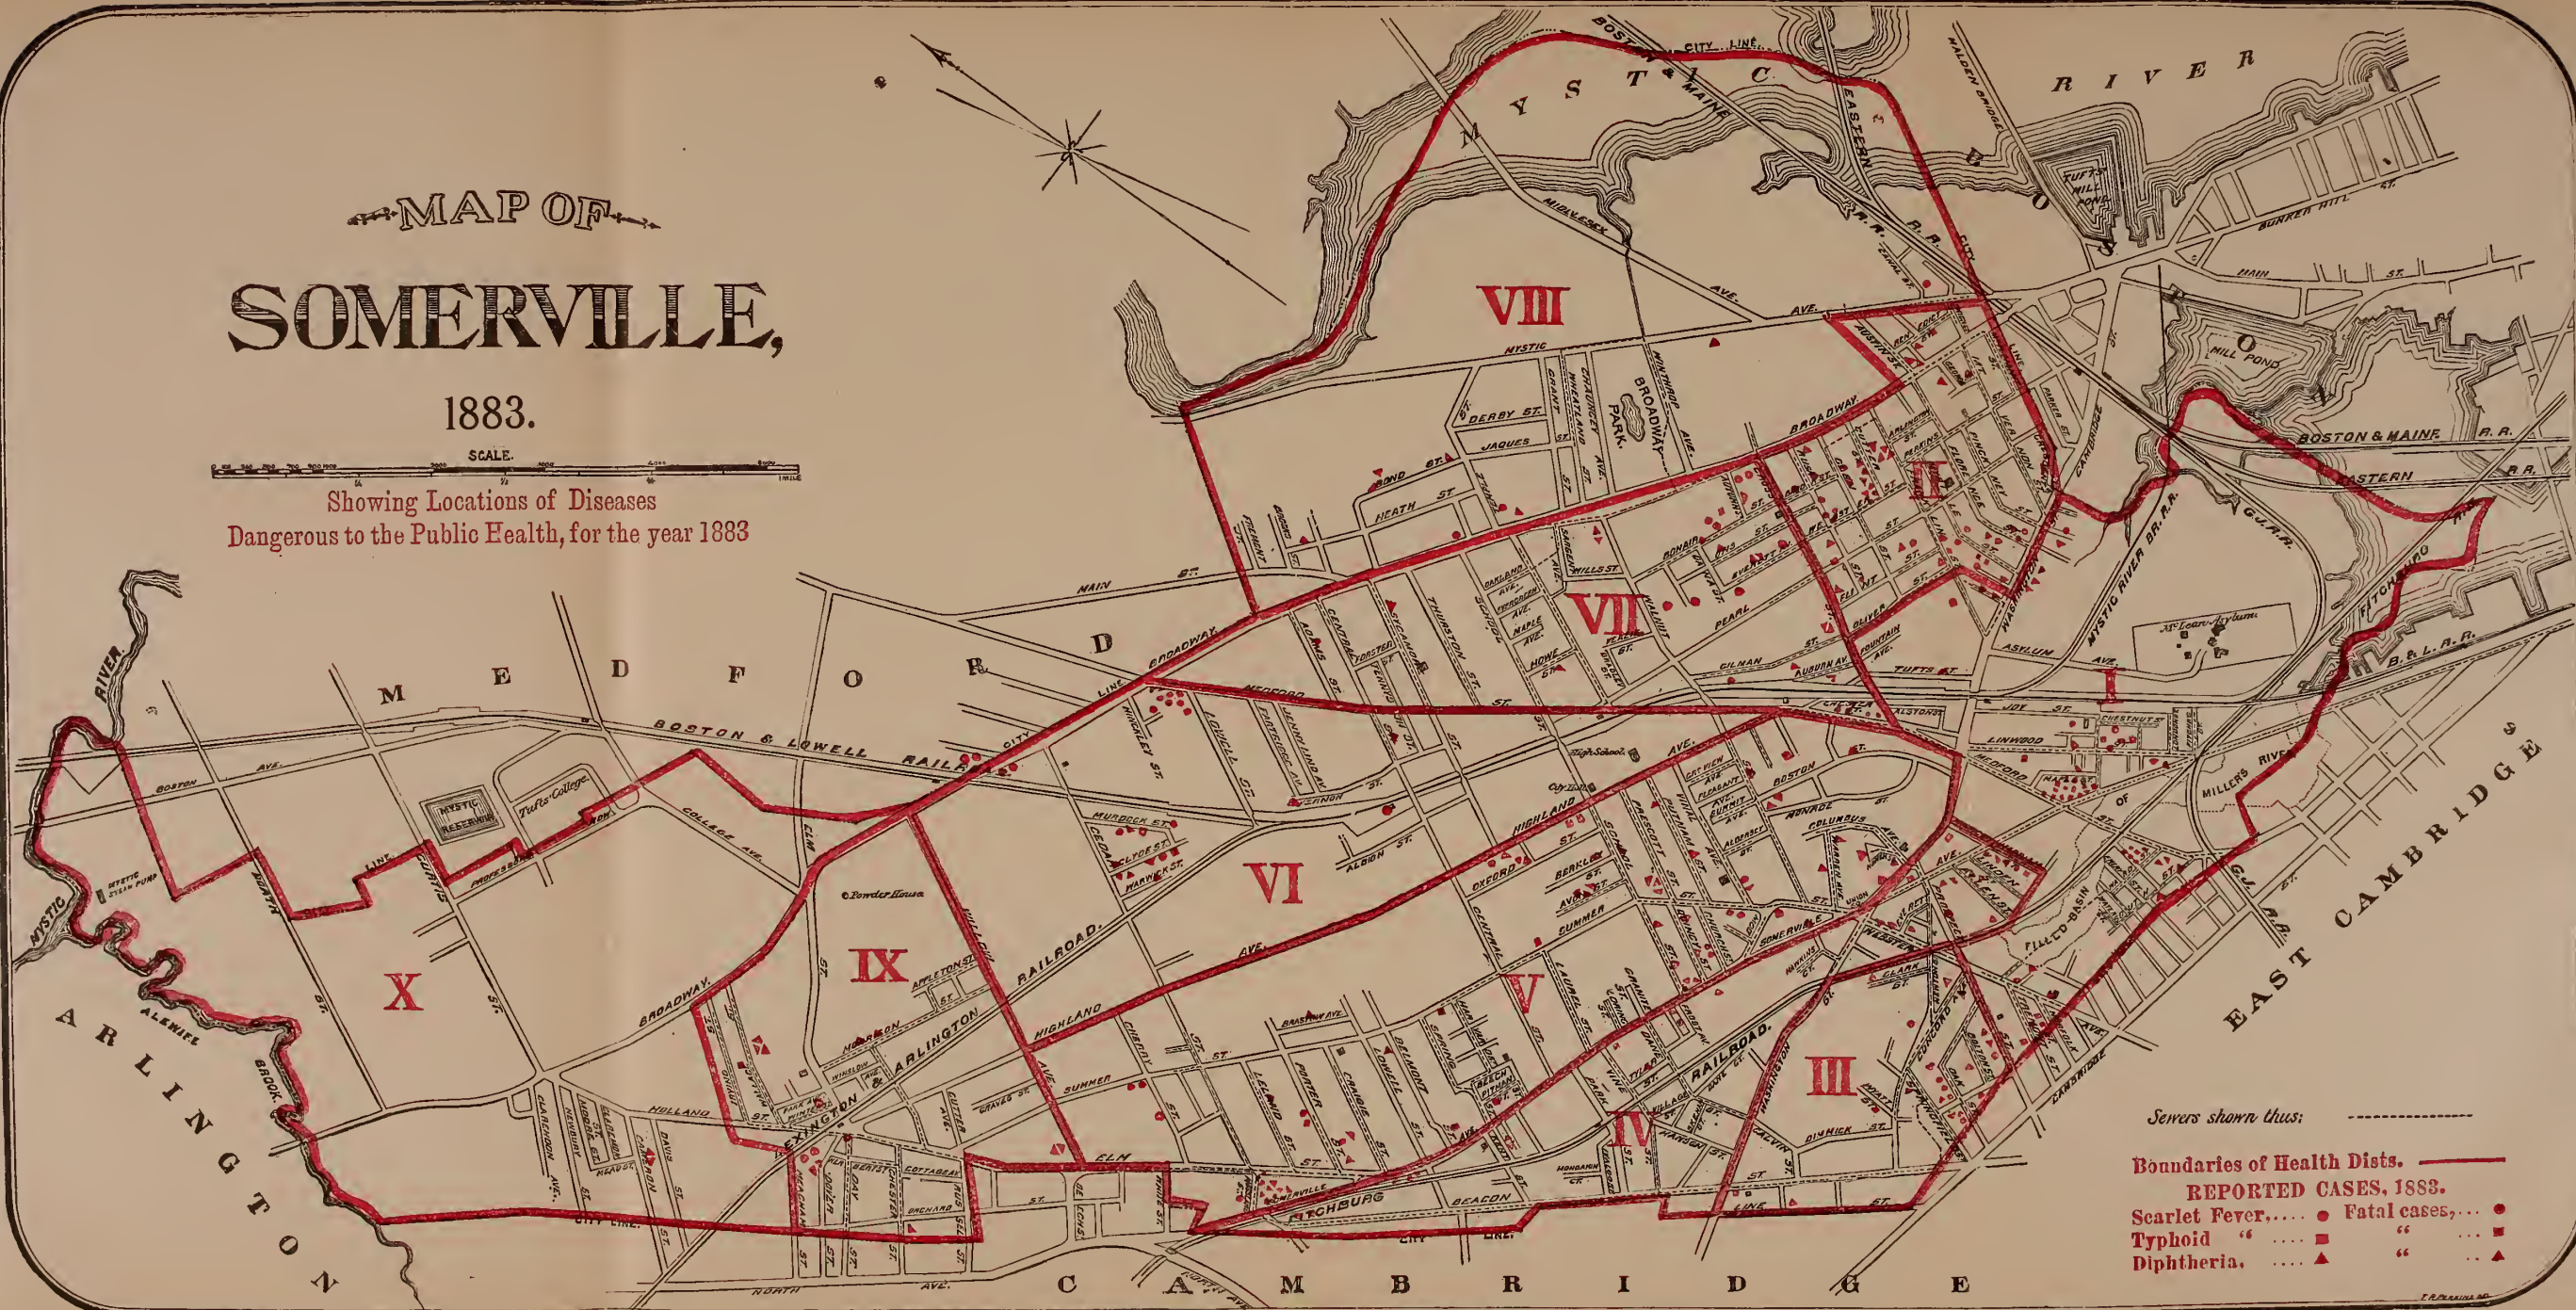

Fourth.—The number of nuisances abated in each district in 1883.

REPORT
OF THE
CITY PHYSICIAN.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, January 17, 1884.

Referred to the Committee on printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, January 17, 1884.

Concurred in.

DOUGLAS FRAZER, *Clerk.*

CITY OF SOMERVILLE.

REPORT OF THE CITY PHYSICIAN.

To His Honor the Mayor and the City Council :—

GENTLEMEN :— I respectfully present my second annual report as City Physician.

This report, is, of necessity, an imperfect one, as I was prostrated by sickness for two months during the busiest season of the year, and have been compelled to rely upon the other physicians for a report of the work done during this time.

I wish here, publicly, to thank my brother physicians for their kindness, both to me and to the city patients, during my sickness.

I have made, during the year, 2,541 visits : of these, 350 were surgical ; 52 visits were made to persons at the police station. I have, in accordance with the law, viewed the bodies, and given certificates of the probable cause of death (making a post-mortem examination in two cases), of 16 persons who died unattended by a physician. I have examined 10 persons, supposed to be insane, and have given certificates in six cases. I have vaccinated 302 persons at my office and elsewhere. Seventy-one persons had teeth extracted at my office.

In compliance with the city ordinances, I have examined 4 applicants for the police force. I have, with the other gentlemen of the Board of Health, spent a great deal of time in the examination of the several school-houses in the city.

In closing this report, I desire to repeat my wish, expressed in the last annual report, that an almshouse, with suitable accom-

modations for sick paupers, be provided. Every day of my practice strengthens my belief that this is the only way of properly caring for these unfortunate people,

Respectfully submitted,

THOMAS M. DURELL, M. D.

City Physician.

SOMERVILLE, January 16, 1884.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb 27, 1884.

Referred to the Committee on printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 28, 1884.

Concurred in.

DOUGLAS FRAZER, *Clerk.*

CITY OF SOMERVILLE.

ELEVENTH ANNUAL REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

To the Members of the City Council:—

GENTLEMEN:—The librarian's annual statement, hereto appended, shows a gratifying increase in the circulation and wise use of our books. It is evident that many of the teachers of our public schools, are coming to direct their pupils to valuable works of reference not only, but to profitable books for general information and literary culture. The trustees feel that such action is to be commended, as helping to give the library its rightful place and use among the free educational agencies, which the city does well to provide and foster. The book committee keep in mind in their purchases, this function of the library, and are grateful to all parents or teachers who will furnish hints, or lists of books, that may assist them in making selections. The trustees would remind such persons and the public, that a supplementary catalogue will be at once issued, which will furnish information concerning the additions of the last four years. They would also remind your honorable Board, that the necessity of this publication is a reason for asking for a somewhat larger appropriation for the coming year.

The plans presented to your Board by us, at the opening of the year, for a one-story addition to the City Hall, at an estimated expense of four thousand five hundred dollars (\$4,500), to secure needed additional accommodations for the library, did not meet the views of the committee on public property, which proposed instead a removal of the library to the basement of the high school-building. This project was found to be for so many reasons undesirable that it was dropped, and no further action in the matter has been taken. The trustees are still of opinion that their proposed

plan is the least expensive of feasible ones, to furnish the additional room that grows more necessary with every year. Of course, it would be much more desirable to have a new library building if that can be brought about. The trustees are sorry to say that a movement initiated by the librarian, and actively co-operated in by them, to secure by subscription a generous sum towards erecting such a building, has not met with so general response as they had hoped and expected; and they can only commend anew to you, and to the people of Somerville, the need which should somehow speedily be met, for the adequate and convenient use of our books, and for the credit and good name of our growing and increasingly prosperous city.

The financial statement of the year is as follows:—

BALANCE, from 1882,	\$100 29	
APPROPRIATION,	1,500 00	
Dog licenses,	1,083 63	
Fines,	241 56	
Catalogues,	31 30	
		<u>\$2,956 78</u>
EXPENDED FOR SALARIES,	\$1,307 31	
Books,	1,212 75	
Printing,	177 00

		<u>\$2,868 33</u>
BALANCE to credit in account, 1884,	88 45	
		<u>\$2,956 78</u>

For the Trustees,

HENRY H. BARBER,

President.

LIBRARIAN'S REPORT.

During the past year the library has been open 306 days, and 70,531 books have been delivered; of this number 1,195 have been used here.

Our cyclopædias, dictionaries and other books of reference have never been so much used, as the teachers send their pupils daily for information to be found in them.

The whole number of books in the library is 10,574. The number of books bound during the year was 206, not including the periodicals: 102 were withdrawn because worn out. The number of books covered was, 10,858, and 2,000 postal notices were written and sent.

The largest delivery on any one day was 690, and the smallest 63.

Our circulation steadily increases, and there is also a great gain in the intelligent use of the books. When the alarm sounds for closing schools, we know that our room will be filled in consequence, and the reading table be surrounded with eager readers. The conditions required are neatness and a quiet deportment.

Our books are generally well used, and free from pencil marks, and but few fines have been imposed for that cause during the year. Our inconveniences it is useless to recount, but our added cares each year would be greatly diminished could we only have ample room.

H. A. ADAMS.

Librarian.

REPORT
OF THE
COMMITTEE ON HIGHWAYS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 2, 1884.

Report accepted and referred to the next City Council, to be printed in the Annual Reports of 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 2, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

IN COMMITTEE ON HIGHWAYS, Jan. 2, 1884.

To the City Council of Somerville:—

The Committee on Highways submits the following report of the work of the department for the year 1883:—

STATEMENT OF APPROPRIATIONS, EXPENDITURES, AND PROPERTY.

Manure,	18 00		
Total expenditure,		<u>1,743 41</u>	
Balance unexpended.			<u>\$2 14</u>

STORMS.

The damage to the highways by storms has been very slight; but, on the other hand, they have suffered largely from the long drouth of the summer and fall, and as it has been impracticable, on account of the prevailing dry weather, to make all the repairs thus made necessary, the road-beds in many of the streets will require attention early in the coming year.

- NEW STREETS.

Evergreen Avenue extension, from School Street to Thurston Street, was the only street accepted during the year. The abutments have opened and fenced it, and have laid a sewer in a part of it, but no work has been done upon it by the city.

Five new streets, all of which were accepted in 1882, have been constructed as follows, to wit: —

Austin Street, from Broadway to Mystic Avenue, has been

graded and prepared for macadamizing; edgestones have been set and the gutters paved on both sides in its entire length, and brick sidewalks have been laid throughout the street, except in front of four estates on the easterly side.

Cottage Avenue, from Russell Street to Chester Street, has been graded and macadamized.

Herbert Street, from Chester Street to Day Street, has been graded and macadamized; a brick sidewalk, with edgestones, has been constructed and the gutters have been paved on the south-westerly side.

Jaques Street, from Chauncey Avenue to Temple Street, has been graded and macadamized.

Newbury Street, from Holland Street to the Cambridge Line, has been graded and macadamized.

MYSTIC AVENUE.

The widening of Mystic Avenue on the southerly side, from the Park to Austin Street, has been completed; and from the Park to the Boston Line the avenue has been raised, ballasted and macadamized in a thorough manner, and a gravel sidewalk has been made on the southerly side.

No further work, except ordinary repairs, will be needed on this avenue between the Park and the Boston Line, until the abutters on the northerly side shall have filled their lands to grade.

RAILROAD BRIDGES.

No permanent improvements of railroad-bridges have been made during the year, but the Lowell Railroad Company has repaired its wooden bridges at Cross and School Streets.

DRINKING FOUNTAIN IN UNION SQUARE.

The iron drinking fountain in Union Square, which was erected at the close of the year 1882, has given perfect satisfaction to the committee, and, so far as we have heard, to the public generally. It is convenient and durable, and has needed no repairs. It cost \$219.02, of which \$24.65 was paid in 1882, and the remainder the

past year. These figures are exclusive of the cost of the lantern and gas-piping, which has been paid from Street Lights Account.

There are other places in the city where fountains are needed, and we recommend that when they are provided, they be of a pattern similar to the one in Union Square.

CENTRAL HILL IMPROVEMENT.

An appropriation of \$1,500 was made with which to begin the improvement of the City's land on Central Hill. Of this sum \$568.08 was paid for the relaying with concrete, of the walk from School Street to the High School-House, which has been done in a substantial manner. The remainder of the appropriation, with the exception of a small balance, has been expended in grading three different sections of the hill in accordance with a plan by the City Engineer; the first section being near Medford Street, the second in rear of the Unitarian Church, and the third on Highland Avenue near the Engine House, at which latter place the land has been brought to grade and covered with loam.

We recommend that an appropriation be made every year for the continuance of this improvement until it shall be completed, so that this piece of property may soon become so attractive as to aid in promoting the growth of our city.

PUBLIC PARK.

On the first of April the public park on Broadway was placed in charge of this committee in all respects except the care of the lamps, which was given to the committee on fuel and street lights.

We have had no special superintendent of the park, but it has been under the supervision of the superintendent of streets, the same as other branches of work in the department. A few plants and trees were set out in the spring, the trees, grass and walks have received proper care, and this fall a liberal quantity of manure has been spread.

SETTING TREES.

By an order dated March 21st, the superintendent of streets was authorized, under the direction of this committee, to set out trees furnished by citizens in the public streets of the city, the cost of setting to be charged to Highways Account. Under this order 133 trees have been set at a cost of \$87.58.

This is a move in the right direction. The one thing more than any other that is needed to improve the appearance of our city is the planting of shade trees, and their increase should be encouraged in every proper way. One step further is necessary in this connection, and that is to ensure the speedy and adequate punishment of those who, either thoughtlessly or maliciously, mutilate the trees. Considerable of this mischief has been done, and some measure should be taken to check it.

CHARLES RIVER STREET RAILWAY COMPANY.

This company has, during the past year, extended its tracks from Putnam Street to a point one hundred feet east of Central Street, and has built a stable and a car-house on Summer, School and Avon Streets.

By this extension it gives the residents of Spring Hill a convenient means of travel to the south and west ends of Boston, as well as to the principal centre of our own city, Union Square.

STONE CRUSHER.

The crusher has worked to excellent advantage, and has supplied all the broken or crushed stone used. Although it has had quite extensive repairs, yet the entire cost of the crushed stone, when ready for teaming to the streets, has been but a trifle more than one dollar per load; the ledge and field stone delivered at the crusher, ready for breaking, being charged at sixty cents per load, which was the price paid for field stone delivered in 1882. We have not bought any stone for the crusher during the past year, but it has been supplied with stone from the Holland Street Ledge, and with field stone collected on the streets and carted by our own teams. It will be seen by the foregoing statement of

the difference between the charges for, and cost of, materials, that if the stone from the Holland Street Ledge had been charged to the crusher at cost, the value of the production of crushed stone at \$1.00 per load would have exceeded its cost, by the sum of \$112.30. Fifty-three hundred and fourteen loads of crushed stone have been produced during the year.

STEAM ROAD ROLLER.

We renew our recommendation of last year that a steam-road-roller be purchased by the city as soon as possible, and reiterate all that was then said in its favor. We believe that with one, our roads could be built very much better and cheaper than they can be by the present method.

SUPERINTENDENT.

From the first of April to the sixth of June, the department was without a regular superintendent; but during that interval Mr. Arthur Murley, for many years a foreman on the highways, was made by this committee the acting superintendent, and, as a simple act of justice, we wish at this time to express our appreciation of the ability displayed by Mr. Murley in that position, and our sense of obligation to him for the faithful and careful manner in which he performed its duties.

CITY OF SOMERVILLE.

IN COMMITTEE ON SEWERS, Jan. 2, 1884.

To the Board of Aldermen of Somerville:

The following is respectfully submitted as the final report of this Committee for the year 1883 :—

APPROPRIATION,		\$9,600 00
Receipts and credits ;—		
For uncollected bills of 1882,	\$24 75	
Amount approved in labor pay-roll and not called for,	1 75	
Catch-basin curbs in sidewalks,—received credit from sidewalk account,	11 60	
Fee for drainage of asylum buildings in- to Fitchburg Street sewer,	50 00	88 10
Value of materials on hand Jan. 1, 1883,		312 47
Value of tools and prop- erty, Jan. 1, 1883,		289 57
Total credit,		<u>\$10,290 14</u>
Expenditures ;—		
For 13 sewers as per table,	10,708 71	
Less assessments,	<u>7,879 90</u>	
Cost to city,		<u>\$2,828 81</u>
<i>Amount carried forward,</i>		<u>\$2,828 81</u>

<i>Amount brought forward,</i>	\$2,828 81	
Less amount with-		
held from con-		
tractor,	\$490 17	
And advertising		
paid for in 1882,	10 80	
	<hr/>	500 97
		<hr/>
		\$2,327 84
10 catch-basins (average \$70.93),		709 31
1 catch-basin in Summer Street,		
near horse-car stables,	117 07	
Less portion of cost paid by		
Railroad Company,	58 53	
	<hr/>	58 54
1 man-hole,		30 54
Cleaning and relaying sewer in Chestnut Street		
and Linehan place,		299 03
Changing grade of a section of the Laurel		
Street sewer,		54 36
Repaving in Union Square over sewer built in		
1882,		55 13
$\frac{5}{8}$ cost of removing deposit from mouth of Bridge		
Street sewer,		1,662 56
Repairing sewers and drains,		93 52
Flushing sewers,		248 76
Cleaning Somerville Avenue sewer east of Med-		
ford Street,		310 60
Cleaning other sewers,		71 15
Examining sewers,		16 62
Repairing catch-basins,		852 06
Changing lines and grades of catch-basins,		44 98
Cleaning catch-basins,		840 23
Clearing mouths of catch-basins,		269 13
Repairing man-holes,		71 38
Changing lines and grades of man-holes,		62 47
Cleaning man-holes,		112 01
Examining man-holes,		1 00
Cleaning ditches,		50 99
Clearing deposit from reservoir in Temple		
Street,		63 00
		<hr/>
<i>Amount carried forward,</i>		\$8,305 21

<i>Amount brought forward,</i>		\$8,305 21
Inspecting sewer built in Evergreen Avenue		
extension by the owners of abutting estates,		13 50
Books and stationery,		35 25
Tools and personal property,		191 30
Repairing tools and property,		24 70
Arranging tools and property,		9 00
Sundry small expenses,		20 68
Abatement of assessments of 1882 and 1883,		6 21
An unpaid bill of 1882 (P. Terry),		16 00
Depreciation in value of materials,		13 94
Depreciation in value of tools and property,		134 12
Value of materials on hand Dec. 31, 1883,		274 21
Value of tools and property on hand		
Dec. 31, 1883,	\$344 75	
Less purchases during the		
year, as above,	191 30	
	<hr/>	153 45
Total debit,		<hr/> \$9,197 57
Balance unexpended,		<hr/> <hr/> \$1,092 57

Bills remain unpaid, as follows:—

Balance favor Richard Falvey, for constructing sewer in Shawmut and Alston Streets, in 1882,		\$99 33
Balance favor Dennis O'Connell, for constructing sewer in Oakland Avenue and School Street, in 1883,		490 17
		<hr/> \$589 50

Both of these sums are withheld, awaiting the result of claims for damages on account of personal injuries received by Henrietta G. Stepp, in Shawmut Street, and Edgar F. Shaw, in Oakland Avenue, during the construction of the above-named sewers.

Work has been done for other departments, and credit has been received for the same, as follows:—

For the Board of Health (Health Department Account), a stagnant pool at the lot on Cedar Street where ashes are dumped, has been filled, at a cost of		\$4 38
For the Committee on Public Property (School-house Incidentals Account), the vaults at the Bell school have been repaired and the floors of the water-closets relaid, at a cost of	\$9 55	
Also, the drains at the Highland school have been repaired at a cost of	32 93	
	<hr/>	42 48
For the Committee on Fire Department (Fire Department Account), a new floor has been laid in the reservoir in Union Square, and the chimney of the same has been repaired and supplied with an iron cover, at a cost of	102 96	
Also, iron covers have been placed on the reservoirs in Franklin, Mt. Vernon and Florence Streets, at a cost of	70 35	
	<hr/>	173 31
Total,		<hr/> \$220 17
In addition to the above, articles have been sold and private work has been done, for which the Treasurer has received payment or credit, as follows:—		
Sold to the Committee on Highways (Highways Account),		6 30
Sold to individuals,		12 00
Work done for individuals,		15 94
		<hr/>
Total,		\$34 24

The only extraordinary expense incurred during the year, was the cost of removing the deposit from the mouth of the Bridge Street sewer. This work was done by the City of Cambridge in the spring, and a bill for $\frac{5}{9}$ of the cost, amounting to \$1,662.56, was forwarded to us, and approved in pay-roll.

Submitted herewith is a schedule of sewers built during the year.

For the Committee,

WILLIAM E. WELD, *Chairman.*

GEO. I. VINCENT, *Clerk.*

REPORT
OF THE
CITY ENGINEER.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 30, 1884.

Referred to the Committee on Printing, with instructions to print the same in the Annual Reports of 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 30, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

CITY ENGINEER'S OFFICE, Jan. 24, 1884.

To His Honor the Mayor and City Council:—

GENTLEMEN:—In accordance with the provision of the city ordinance in relation to city engineering, I herewith present my annual report for the year 1883.

SEWERS.

Seven thousand and seventeen and three-tenths feet of sewers were built during the year, of which 1663.4 feet were of brick and 5343.9 feet of pipe. In these sewers were built thirty-three man-holes.

The following table will show the location, size, length, cost, assessment, etc., of each sewer:—

LAUREL STREET SEWER.

Ninety-seven and two-tenths feet of the Laurel Street sewer were relaid at a lower grade to accommodate the block of brick buildings recently constructed on the corner of Summer Street. This is a pipe sewer, laid in 1869, and was found in good condition and nearly all the pipe relaid.

CHESTNUT STREET SEWER.

Two hundred and thirty-four feet of the Chestnut Street sewer were rebuilt. This is a pipe sewer, laid in 1869, and found badly cracked, defective in grade, and nearly full of deposit. The pipe was all removed and Akron pipe substituted.

PRIVATE DRAINS.

Two hundred and forty-eight permits were issued for laying private drains, 232 for new connections and 16 for repairs. The locations of these drains have been recorded in this office, and where practicable have been shown on the sewer plans.

MAN-HOLES.

One man-hole was built on the Harvard Street sewer near Summer Street. I would renew my recommendation of last year that man-holes be built at frequent intervals on our old sewers.

CATCH-BASINS.

Eleven catch-basins were constructed during the year, ten at an average cost of \$70.93, and one at a cost of \$117.07. The work of substituting iron catch-basin covers for the wooden covers is now nearly complete. During the last few years this item has very materially increased the cost of repairing catch-basins.

CRAIGIE BRIDGE SEWER OUTLET.

The accumulation of sewage near the sewer outlet under Craigie bridge and under the adjoining wharves, was removed by the City of Cambridge at a cost of \$2,992.60, five-ninths of which was paid by this city.

SIDEWALKS.

The following table will show the sidewalks laid during the year:—

Street.	Side.	From	To	Materials.	Length of walk in feet.	Cost.
Aldersey . .	Both	Walnut St.	Vinal Ave .	Gravel and edgestone,	1,026	\$680 42
Austin . . .	Both	Broadway .	Mystic Ave .	Gravel and edgestone,	1,420	1,109 00
Concord Ave.	North	Newton St.	Marion St .	Gravel and edgestone,	573	981 68
Concord Ave.	South	Prospect St.	Sprigfield St	Gravel and edgestone,	975	
Davis Square.	E. and W .			Gravel and edgestone,	235	235 52
Glen	Both	Broadway .	Webster St .	Gravel and edgestone,	1,410	974 94
Glen	Both	Pearl St . .	Flint St . .	Gravel and edgestone	620	559 54
Herbert . . .	Southwest .	Chester St .	Day St . . .	Brick and edgestone,	323	331 04
Total	6,582	\$4,922 14

The Board of Aldermen assessed one-half the cost on the abutters.

STREETS.

Evergreen Avenue, from School Street to Thurston Street, 469.6 feet in length and 40 feet wide, was the only street accepted during the year.

STREET NUMBERING.

Six streets have been numbered during the year and plans prepared for several others. There are many houses in the city to which the owners or occupants have neglected to affix the proper numbers, and in some cases the numbers on the houses are incorrect, causing much confusion. I would recommend that the chief of police be requested to enforce the ordinance, and compel parties to affix the proper numbers.

BRIDGES.

The wooden bridge over the Boston and Lowell Railroad at Cross Street, has been partly renewed, the abutments repaired, and new fences built on each side: that over the same railroad at School Street has been rebuilt, widened on the easterly side, the abutments repaired, and fences built on each side.

The bridges over the Boston and Lowell Railroad at Cedar Street and Broadway are in fair condition: that at Central Street is in good condition.

The bridges over the Fitchburg Railroad are in the same condition as mentioned in my last annual report.

The stone-arch bridge on Broadway over Alewife Brook, and the wooden bridge on Boston Avenue over the Mystic River, are both in good condition.

The draw on the Middlesex Avenue bridge over Mystic River has been planked; the bridge will need more extensive repairs during next season.

SURVEY OF THE CITY.

An appropriation of three hundred dollars was made to continue the survey of the city; a large tract including a portion of the southerly slope of Central Hill was surveyed and plotted, also a portion of the East Somerville section completed.

The maps to be made from this survey will show the owner, area and dimensions of each lot, all houses, sewers, water-pipes, hydrants, street lights, crossings, catch-basins, etc., and will be of great value to every department of the city.

I would recommend that a larger appropriation be made for this work, in order that it may be completed at an early day.

HEALTH.

At the request of the Board of Health, all the school-rooms in the city have been measured, the cubic contents computed, the ventilators measured, and other information obtained for the use of the Board in making their report on the condition of the school buildings.

STREET LIGHTS.

A map of the city showing all street lights was completed in March last.

WATER WORKS.

A large map showing all water mains was made for use in the office of the Water Registrar at Charlestown.

EXPENSES.

The expenses of the department for the year 1883, were as follows:—

Salary of city engineer, including maintenance of a team,	\$2,000 00
Salaries of assistants,	1,199 31
Salaries of assistants for survey of city,	299 31
Repairing instruments, stationery, spikes, tools, fares, etc.,	199 67
	<hr/>
Total expense of department,	\$3,698 29

Respectfully submitted,

GEORGE A. KIMBALL,
City Engineer.

REPORT

OF THE

COMMITTEE ON FIRE DEPARTMENT.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 2, 1884.

Report accepted and referred to the next City Council to be printed in the Annual Reports of 1883. Sent down for concurrence.

CHARLES E. GILMAN, *City Clerk*.

In COMMON COUNCIL, Jan. 2, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk*.

CITY OF SOMERVILLE.

IN COMMITTEE ON FIRE DEPARTMENT, Jan. 2, 1884.

To the City Council of Somerville:—

The following is the final report of this Committee for the year 1883:—

A full statement of the work done by the department, and of the improvements which have been made in its buildings and equipment, may be found in the Annual Report of the Chief Engineer; and he also makes certain recommendations, which are fully endorsed by this committee, with a view to the still further increase of the department's efficiency and usefulness.

The following is a condensed statement of receipts and expenses for the year ending Dec. 31, 1883:—

FIRE DEPARTMENT ACCOUNT.

APPROPRIATION,	\$22,000 00	
RECEIPTS AND CREDITS:—		
For articles sold,	\$179 30	
Bill approved and charged to the account in 1882, and credited back this year because the party could not be found,	90	
Total credit,	180 20	\$22,180 20
EXPENSES:—

REPORT
OF THE
CHIEF ENGINEER OF FIRE DEPARTMENT.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 13, 1884.

Referred to the Committee on Printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 14, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

SOMERVILLE, MASS., Dec. 30, 1883.

To His Honor the Mayor and City Council:—

GENTLEMEN,—I herewith submit to you a report of the operation of the Fire Department for the year ending December 31, 1883.

In addition to the usual details, this report contains an account of the number of alarms, with the causes thereof, the amount of loss, insurance, and insurance paid, as near as can be ascertained, with some recommendations which I trust will be found of sufficient interest and importance to receive your favorable consideration.

NUMBER OF BOX ALARMS.

The Department has been to answer fifty-seven alarms during the year.

The causes of alarms were as follows:—

Burning of grass	3
Defective chimney flues	2
Sparks from locomotive engine	3
Oil stoves	3
Burning of beds	6
Burning of rubbish in yards	3
Breaking of kerosene lamps	3
False alarms	6
Sparks on roof from chimney	5
Incendiary	3
Children playing with matches	3
Bursting of water pipe	1
Thawing out a water service pipe	1
Burning of hatching incubator	1
Fire-crackers on roof	1
Supposed fire in church	1

Carried forward.

<i>Brought forward,</i>	45
Hot coals dropping from stove	2
Blast of fire from furnace	1
Neglect to attend fires in smoke-house	1
Unknown	1
Fumigating hen-house	1
Fires in Cambridge	3
Fire in Medford	1
Fires in Boston	2
Total	57

The loss, insurance and insurance paid, as near as can be ascertained, were —

Loss,	\$7,510 00
Insurance,	18,500 00
Insurance paid,	6,881 00
Net loss to property holders,	629 00

Our department has rendered assistance out of the city three times and has received assistance once.

MANUAL FORCE.

The manual force of the Department remains the same as last year; viz.,—

1 Steamer Company, number of men	14
4 Hose Companies, 10 men each	40
1 Chief Engineer	1
1 Assistant Engineer	1
1 Hook and Ladder Company	15
Total number of men	71

APPARATUS.

The apparatus in service in the Department consists of two steam-fire-engines, five horse-hose-carriages, one hook-and-ladder-truck.

In addition to the above, there are one hook-and-ladder-truck, one two-wheel hand-hose-carriage, and one horse-hose-carriage.

The last-mentioned is hardly worth enumerating as a piece of fire-apparatus, as it is totally unfit for fire-service.

I desire to again call your attention to the importance of adopting some plan whereby the Department can be supplied with ladders at the first instance of a fire. We frequently work at a disadvantage when there is a fire in a section of the city remote from where the ladder truck is located. I renew my recommendations of last year that the spare hose-carriage be rebuilt and fitted to carry both *ladders* and *hose*. If this plan is adopted there will not be any increase in the running expenses of the Department, while if the spare truck is put in service it will necessitate the keeping of a pair of horses, a permanent driver, and certainly a few call ladder-men, involving probably an annual increase of \$1,500, in the running expense.

Owing to the large number of telephone-wires which interfere with the raising of spliced ladders, I recommend the purchase of a fifty-foot Bangor telescope ladder for Hook and Ladder No. 1.

The new steam-fire-engine built by the Silsby manufacturing Company, and delivered to the city last June, has thus far proved an excellent engine; although in service a number of times, there has been but one severe test of her ability to do heavy work, and her three hours performance at the burning of Stickney & Poor's factory was such as to receive the praise of the chief officers of the Boston Fire Department and the owners of the property. The Engine has been drawn 60½ miles and has worked 25 hours.

HOSE.

There is in the Department 6,950 feet of hose; 5,550 feet of which is cotton hose, rubber-lined, and 1,400 feet of leather hose; 900 feet of old hose has been transferred to the Water and Sewer Departments.

There was no new hose purchased last year. I recommend that 1,000 feet be bought this year, that there may be a sufficient quantity on hand to replace that which has been in service, as it is hurtful to hose to have it remain on carriages without being thoroughly dried so as to prevent mildew.

FIRE ALARM TELEGRAPH.

This very important branch of the Department has continued to work satisfactorily. Three new alarm-boxes have been added, viz. : 36, 43, and 229,—the last-named being placed in the office of the Eagle Shade Roller Company at their own expense. This box is in a combustible neighborhood, and is available for use, both night and day, for any fire in the vicinity. The three circuits of wire and the apparatus connected therewith, have received watchful attention. The placing of the fire-alarm wires upon the cross-arms of the telephone-poles has thus far worked satisfactorily. It is easier to detect trouble, and less dangerous for our men to have the lines of wire placed on poles than on the roofs of buildings. Crooked and unsightly poles have been replaced by new ones of such a kind as to be entirely unobjectionable to the abutters. New wires have been run to replace those that have become weakened by age, and considerable work will be necessary the coming summer for the same purpose. There is not a sufficient alarm in the Spring Hill district to arouse the call-members of the Department. A remedy for this would be the placing of a striker on the bell of the Spring Hill Baptist church, and the children of that district would then hear the storm-signal for the omission of any session of the public schools. There are now twenty-five (25) miles of wire, thirty-four alarm-boxes, five bell-strikers, four large gongs, and nine small gongs, and a battery of 180 cups, 125 of which are known as the "Hill" battery, and 60 as the "Serson-Kauffer" battery; the latter was placed on one of the circuits as an experiment on July 15, 1883, and has thus far proved satisfactory.

The locations of fire alarm-boxes are as follows, viz. : —

Box.

12. Junction Somerville Avenue and Linwood Street.
112. John P. Squire & Co.
13. McLean Asylum.
113. F. R.R. Freight Yard.
14. Cross Street, opposite Tufts Street.
15. Washington, corner Myrtle Street.
16. Webster Street, Hose House No. 1.
17. Lincoln, corner Perkins.
18. Broadway, corner Union.

21. Medford, corner South.
23. Lincoln & Chamberlain's, South Street.
24. Webster Avenue School-House.
25. Washington Street Hose House No. 3.
26. Concord Square, corner Springfield.
27. Junction Summer and Bow.
28. Somerville Avenue, corner Laurel.
227. American Tube Works.
229. Eagle Shade Roller Co.
29. Washington, corner Dane.
31. Highland Avenue, corner Walnut, Engine No. 1.
32. Bonair, opposite Dana.
34. Marshall Street, Hose House No. 2.
35. Junction Broadway and Main.
36. Central, corner Vernon.
38. Cedar, corner Clyde.
4. Broadway, corner Elm.
41. Summer, corner Cedar.
42. Beacon, corner Kent.
43. Holland, between Wallace and Irving.
45. Summer, opposite Spring.
46. Elm House.
47. Highland Avenue, corner Grove, Hose House No. 4.
48. Broadway, corner Curtis.
49. College Hill.
55. No School.

WATER SUPPLY.

By the report of the Superintendent of Water Works for the year 1882, we learn that there are 294 hydrants where a supply of water can be obtained for fire purposes. As the water-pressure in the lower parts of the city is only fifty pounds, and continues to grow less, until at Winter Hill the pressure is but five pounds, it is important that hydrants should be placed at frequent intervals, in order that fires may be reached with short lines of hose; because by the running of long lines of hose the pressure is so reduced as to make the stream non-effective. For information the following illustration of tests of water-pressure is here given:—

If, from a hydrant of thirty-five pounds' pressure, we run a line of

hose 300 feet, and discharge the water through a one-inch nozzle, the horizontal distance reached will be seventy-two feet, and the vertical height reached, forty-five feet; if the line is increased to 1,000 feet the horizontal distance reached will be forty-nine feet, and the vertical height twenty-two feet, showing a loss by friction in the horizontal and vertical distances of twenty-three feet, and these distances can only be reached when the air is still and there is no wind to impede the stream. It must be borne in mind that there is always a strong wind drawn to and around every building after the fire gets outside of it, and unless the firemen can reach the fire in season to take the stream inside of the building, they cannot do effective work. I recommend that the old flush-hydrants be replaced with post-hydrants, and that new hydrants be placed as follows: —

On Beacon street opposite Charles River Railroad Stables.

On Summer “ “ “ “ “ “

On Dover “ “ Union “ “

On Hawkins Court.

To provide for an emergency, such as the breaking of a pipe, whereby we should be deficient of a supply of water, it was considered proper to put the reservoirs in condition for immediate use; accordingly some of them have been provided with iron covers which can be readily removed in cold weather and access obtained to the storage basins, which was not the case before, as the plank covers could not be removed in the winter season

The reservoirs are located as follows: —

Union Square, near flagstaff.

Summer Street, opposite Harvard.

Broadway, opposite Central.

Temple Street, 200 feet from Broadway.

Franklin Street, opposite Webster.

Florence Street, 100 feet from Pearl.

Mt. Vernon Street, 100 feet from Broadway.

BUILDINGS.

The several buildings occupied by the Department remain the same, in their exterior appearance, as last year. The houses of Steamer 1 and Hose 4 have both required painting for some years, and this work ought not to be delayed beyond the coming spring. The interior of Hose-House No. 2 has been painted and put in complete order. At the Steamer House the bed-rooms have been papered, new bedsteads and bedding have been furnished, and a sliding pole has been put up to enable the men to reach the engine-room quickly. A new floor should be built in the stable of this house as the present one is nearly worn out. The battery of the fire-alarm-telegraph is in a room underneath the stable, and the droppings from the stable above have necessitated the building of a roof to protect the battery-jars from pollution thereby. New beds have been furnished for the Hook and Ladder House and Hose-Houses Nos. 1 and 3, and we now have two men in each house at night, which is an excellent arrangement, as the driver is sure of one man to assist him.

In closing this report, I desire to express to His Honor the Mayor and the City Council, my sincere thanks for their cordial support in all things appertaining to the welfare of the Department, and to the Committee on Fire Department my grateful thanks are due for their coöperation in the furnishing of the necessary supplies and apparatus to properly equip the Department for service. I also express my gratitude to the officers and members of the force for their cheerful compliance at all times with orders, as evinced in their united and successful efforts to extinguish fires.

Respectfully submitted,

JAMES R. HOPKINS,

Chief of Fire Department.

REPORT
OF THE
COMMITTEE ON PUBLIC PROPERTY.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 2, 1884.

Report accepted and referred to the next City Council, to be printed in the Annual Reports of 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 2, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

To the City Council of Somerville:—

The Committee on Public Property presents the following final report for the year ending Dec. 31, 1883.

The receipts and expenditures have been as follows:—

POLICE STATION INCIDENTALS ACCOUNT.

APPROPRIATION,	\$1,800 00	
RECEIPTS :—		
For hall rent,	943 50	
	<hr/>	
Total credit,		\$2743 50
EXPENDITURES :—		
For janitor's salary,	\$750 00	
Janitor's substitute in vacation,	14 00	
Gas,	246 80	
Gasoline,	180 00	
Water (being for the year 1882 and $\frac{3}{4}$ of the year 1883),	19 67	
Fuel,	392 77	
Insurance,	20 00	
Repairs and improvement of build- ing and furniture,	720 42	
Incidental expenses,	36 13	
	<hr/>	
Total expenditure,		2,379 79
		<hr/>
Balance unexpended,		\$363 71
		<hr/> <hr/>

PUBLIC PARK MAINTENANCE ACCOUNT.

Expenditures (for three months),		
for pay of foreman,	\$180	00
Additional labor,	15	50
		<hr/>
Total expenditure,		<u>\$195 50</u>

SCHOOL-HOUSE INCIDENTALS ACCOUNT.

APPROPRIATION,		\$7,000	00
RECEIPTS :—			
For hall rent,	\$135	50	
Articles sold,	36	50	
		<hr/>	172 00
Total credit,			\$7,172 00
EXPENDITURES :—			
For improvements,	\$4,822	74	
Repairs and furniture,	5,056	56	
Rent (Tufts Street school, including last quarter of 1882),	250	00	
Gas (high-school hall),	106	93	
Insurance,	100	20	
Trees,	82	93	
Fire-extinguisher for high-school hall,	50	00	
Carriage hire for annual inspection,	5	00	
		<hr/>	\$10,474 36
Total expenditure,	\$10,474	36	
Less collections for $\frac{1}{2}$ cost of division fences at Franklin and Prescott schools,		73	50
		<hr/>	10,400 86
Net expenditure,			<u>10,400 86</u>
Excess of expenditures,			<u>\$3,228 86</u>

The following is a statement of expenses at each school-house :—

EDGERLY SCHOOL-HOUSE ADDITION ACCOUNT.

APPROPRIATION : —

Balance from the year 1882,	\$1,479 66	
Appropriated in 1883,	610 00	
Total credit,		\$2,089 66

EXPENDITURES : —

To Mead, Mason & Co., carpenters,		
balance of account,	2,024 16	
Mr. Mullen, for ventilating-pipe,	8 00	
S. D. Kelley, for architect's services, balance of account,	50 00	
Total expenditure,		2,082 16
Balance unexpended,		\$7 50

MISCELLANEOUS ACCOUNT.

EXPENDITURES : —

For City Hall expenses,—		
Gas,	\$341 32	
Fuel,	251 45	
Ice,	50 00	
Repairs and furniture,	214 58	
Incidentals,	122 19	
	<hr/>	\$979 54
For ringing bells,		18 00
Repairing flag-staff, Union Square,		78 60
Painting flag-staff and fence on Central Hill Land,		31 50
Hoisting and lowering flag-staffs,		45 67
Pump in Union Square,		51 54
Preparing cemetery for Memorial Day,		12 00
Preparing ward-rooms for caucuses and elections,		12 50
Total expenditure,		<hr/> <u>\$1,229 35</u> <hr/>

The Edgerly School-house addition was completed early in the year, and the total cost of this improvement is as follows :—

Expended in 1882, as per detailed statement in last Annual Report,	\$15,520 34
Expended the present year as hereinbefore stated,	2,082 16
Total cost,	<hr/> <u>\$17,602 50</u> <hr/>

As will be seen by the foregoing statement of expenditures from School-house Incidentals Account, a considerable sum has been paid from that account during the year for improvements of school property.

At the Forster school, that part of the hall in the third-story which remained undivided has been made into two school-rooms with a movable partition between, so that, when desirable, they may be used as one room ; the stairways leading to the third story have been moved from the end to the middle of

the building, and an office for the master and suitable dressing-rooms have been provided. A new boiler with additional heating apparatus has also been furnished, and the chimney has been enlarged. In the basement, the water-closets and their approaches have been improved, so as to ensure good light and ventilation and freedom from offensive odors. This work has cost, as shown above, \$3,914.04.

At the Highland school, an outlay of \$908.70 has been made for improvements of the heating apparatus and water-closets; making the amount of extraordinary expenses at these two school-houses, \$4,822.74.

An improvement has just been completed at the High school-house, which must be paid for the coming year, as it was not finished in season to have the bill approved in a pay-roll of the year 1883. The platform in the hall has been made smaller and moved forward, and two new school-rooms have been constructed in the rear of the platform and across the end of the building toward Highland Avenue. This will cost \$725.00, as per contract with T. B. Blaikie & Son. Most of the furniture which will be required in these rooms is already provided as the hall has been used for school-purposes since the early part of the year.

Particular attention has been given to the wooden school-houses, and several of them, which for some time have needed repairs, have been put in good order.

On the first of April, the care of the lamps on the Public Park was transferred to the Committee on Fuel and Street Lights, and the management of the Park in all other respects was placed in the hands of the Committee on Highways; it being the general opinion that the Highway Department, with all its facilities, could take care of the Park more economically than it could be done by this committee.

For the Committee,

J. FRANK WELLINGTON, *Chairman.*

GEO. I. VINCENT, *Clerk.*

REPORT

OF THE

COMMITTEE ON FUEL AND STREET LIGHTS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 2, 1884.

Total expenditure,		\$45 26
		<hr/> <hr/>

The fuel has been furnished by W. M. Hadley under two contracts, the first of which expired July 1, and the second covers the year ending July 1, 1884. The prices in the first contract were \$5.35 per ton for furnace, egg and stove coal, \$9.00 per cord for hard wood, and 6.25 per cord for soft wood. In the present contract the prices are \$5.70 per ton for stove, \$5.60 for egg, and \$5.55 for furnace coal, \$8.50 per cord for hard wood, and \$6.00 per cord for soft wood.

At the beginning of the year the Globe Gas Light Company's attachments were used in the oil or naphtha street-lamps, and the city paid said company for lighting and taking care of them and for the naphtha burned, \$1.75 per lamp per month. In the middle of February these attachments were removed, and the lamps were supplied with the "Eclipse" attachments at a cost of \$3.50 each, and since that time these lamps have been lighted and taken care of by the same contractor who lights the gas lamps, and at the same price; the naphtha being furnished by the city.

In the months of January and February the price paid for the

lighting and care of the gas lamps was fifty cents per lamp per month. March 1st, a contract for one year was made with Hugh Blackwell for the lighting and care of all the street lamps, both gas and oil for the sum of two cents per lamp per night, but as it afterward appeared that Mr. Blackwell signed the contract under the impression that he was to light the lamps twenty nights each month, the rate of compensation was increased, by order of the City Council, to forty cents per lamp per month for the entire period of the contract.

The price paid for gas in January, February and March, was \$2.25 per thousand feet, but on the first of April a reduction was effected to \$2.15 per thousand, which is the price now paid.

Nine new lamps have been erected during the year, and the City Treasurer has received for each of them, the sum of twenty dollars from the petitioners. The cost of new street lamps (exclusive of street signs), has been \$210.61; but this amount includes the sum of \$22.73 for the lamp on the fountain in Union Square, which was erected at the close of the year 1882, leaving \$187.88 for the lamps erected this year, and to this sum must be added about \$15.00 for piping two of them, the bill of which has not yet been approved, making the total cost of the nine new lamps about \$202.88, or an average of \$22.54 each.

The system of lighting has been the same as in former years; viz. to light until twelve o'clock every cloudy night, or when there is no moon.

The following is a statement of the street lamps in the city:—

	GAS LAMPS.		Naphtha Lamps.	Total.
	Charlestown Gas.	Cambridge Gas.		
Lamps in the city January 1, 1883	159	185	55	399
Lamps erected during the year	3	3	3	9
Present number	162	188	58	408

April 1st, the lighting and care of the lamps on the public park on Broadway, was placed in charge of this Committee, and the care of the park in all other respects was placed in charge of the

Committee on Highways. It was thought that these lamps might be lighted by the same party who should light the street lamps and in connection with that work ; but this has proved impracticable from the fact that they can not be approached with a horse and wagon, and as it is undesirable to divide the management of a single appropriation between two committees unless some advantage is to be gained, we would recommend that hereafter the lighting and care of the lamps on the park be in charge of the Committee on Highways.

We regret to report that on the 28th of the present month Mr. Hugh Blackwell, the contractor for the lighting of the street lamps, deceased after a brief illness. Mr. Blackwell was a long-tried servant of the city, he having had the care of the lamps ever since their first introduction, some twenty-five years ago.

In regard to the lighting and care of the street lamps for the remainder of the term of the present contract (to March 1, 1884), we report, that Mr. R. T. Blackwell, who, as executor of the estate of Mr. Hugh Blackwell, has superintended the lighting of the lamps since the decease of his father, declines to carry out the contract for the unexpired term, on the ground that he cannot afford to do the work at the contract price.

For the Committee,

QUINCY A. VINAL, *Chairman*,
GEO. I. VINCENT, *Clerk*.

REPORT
OF THE
CITY SOLICITOR.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb 27, 1884.

Referred to the Committee on printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 28, 1884.

Concurred in.

DOUGLAS FRAZER, *Clerk.*

CITY OF SOMERVILLE.

SOMERVILLE, Feb. 15, 1884,

To His Honor the Mayor and the City Council of Somerville:

GENTLEMEN:—I beg leave to present the following as my Eighth Annual Report:

Early in the year I was instructed by you to confer with the counsel of the Boston and Albany Railroad, as to the failure of that corporation to operate their gates at Somerville Avenue, when their trains were passing that point upon the Grand Junction Railroad. I succeeded, without the expense of litigation, in procuring a reference of the troubles between the Fitchburg and Albany roads, which had caused the disuse of the gates, to General Superintendent Furber, of the Boston and Maine Railroad, who has made an award, in accordance with the terms of which the gates are now satisfactorily tended, and public travel at that point adequately protected.

Two special acts of the General Court have been enacted during the year, in which the city has received certain advantages, to wit: Chapter 5, of 1883, entitled, An Act authorizing the town of Medford to lay water-pipes in Boston Avenue, in which it is provided that "said town shall, at its own expense, erect and maintain a hydrant at some suitable point upon the line of said avenue in said Somerville, from which said city shall have a right to take, free of expense, whatever water it may require for the extinguishment of fires or the watering of streets," and Chapter 87, of 1883, authorizing the Mayor and Aldermen of Somerville, to construct a sewer in Cambridge and Crescent Streets, in Boston. At the request of City Treasurer Cole, and with the cooperation of our own Committee on Legislative matters, and of the City Solicitors of Boston and Cambridge, I have been enabled to secure an amendment of Section 58, of Chapter 12 of the Public Statutes, extending the time within which a city or town may sell

real estate held under a sale, or taken for non-payment of taxes, the amendment appearing in Chapter 101, of 1883.

During the year I have attended all the meetings of the Committee on Claims, and have investigated with the Committee the following claims: Of Henrietta G. Stepp, for personal injuries received upon Shawmut Place; of Daniel Splane, for personal injuries received February 15, 1883; of Edward Cunningham, for damages received by the bursting of a water-pipe on Maple Street; of E. Markland White, with reference to a tax title upon an estate on Elm Street; of Ellen Crowley, for personal injuries received upon Broadway; of Michael Moran, for injuries received at corner of Medford and Ward Streets; of James Gavin and Lucy Gallagher, for gravel taken from Poplar Street, near Somerville Avenue; of Moses W. Thompson, for personal injuries received upon Washington Street; of L. J. Fowler, for personal injuries received upon Concord Avenue; of Morris E. Kanaly, for injuries to his horse upon Dickinson Street; and of Edgar F. Shaw, for personal injuries received upon Oakland Avenue.

These cases were disposed of as follows:—

Leave to withdraw was given to Splane, Crowley, Moran, Thompson, Fowler, Kanaly and Shaw.

The cases of Cunningham, Gavin and Gallagher were settled at a trifling expense. No action was taken in the case of White.

Mrs. Stepp and Mrs. Crowley have each brought suit against the city. Mr. Shaw has sued the contractor, instead of the city.

During the year, the following cases have been disposed of, or advanced toward settlement:—

The four cases of Reed et al, v. City of Somerville, were heard in the Superior Court at Cambridge soon after my last annual report, upon a motion for revision of cost, but the Court was of opinion that it had exhausted its jurisdiction in the matter, and the motions were accordingly overruled. I immediately sued out writs of error in the cases and have recently submitted the questions of law arising under them to the Supreme Court at its law term recently held at Boston, whose decision, which-ever way it may be, will probably render any further legal proceedings unnecessary.

The case of the City of Somerville for bridges, etc., v. the Boston and Lowell Railroad Company, is gradually approaching the

point where, either by the action of one or both of the parties, the improvements sought for by the suit will be realized.

For the same reasons stated in my last annual report, I have nothing new to report in the case of the City of Somerville v. the Fitchburg Railroad Company for grade crossing at Sacramento Street.

The cases of Parker, Trustee of the Klous estate, in the Supreme Court for Middlesex County, and before the Middlesex County Commissioners, for reasons stated in my last annual report, remain in the same condition as at that time.

During the past year the costs to which the city became entitled by the verdict in its favor in the suit of Sanborn v. the City, the year previous, have been received from Mr. Sanborn's executors and paid into the city treasury.

At the calling of the General Docket, recently, in the Superior Court at Cambridge, counsel associated with General Butler for the plaintiff in the case of Squire v. City of Somerville, informed the court that it was the plaintiff's intention soon to proceed with the case before the auditor. Otherwise the case would have been dropped from the docket for want of prosecution.

The case of William Sullivan against the city to recover \$15,000 claimed to be due Daniel F. McCarty and Mary Ann McCarty, for whose benefit the suit was brought, has been terminated in favor of the city.

The case of Cunningham against the city, for personal injuries on Washington street, has been dropped from the docket of the court, for want of prosecution.

The case of Brennan v. the City remains unchanged, and the city can have no interest in disturbing it.

The ten cases, called the Columbus Avenue betterment cases, were tried last June, occupying three days, and under the ruling of the court that no part of the sum paid by the city for land damages could be assessed upon the abutters, under the circumstances of these particular cases, the assessments were largely reduced. I, of course, excepted to the ruling of the court, and the cases were submitted recently by me to the Supreme Court upon the exceptions then taken.

The case of Whitcher v. the City of Somerville, for damages to horse and carriage by driving against one of the posts in Washington street near the Milk-Row Crossing, was tried Decem-

ber 26 and 27, 1883, and resulted in a verdict for the plaintiff of \$108, which if finally sustained by the Supreme Court, where the case has been taken on exceptions, will be paid by the Middlesex Horse Railroad Company. The case is a grave one, as involving the possible primary liability of the city for such accidents, and we shall be fortunate in obtaining the decision of the Supreme Court in this case, without expense to the city.

Respectfully submitted,

SAMUEL C. DARLING,

City Solicitor.

REPORT
OF THE
INSPECTOR OF BUILDINGS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 13, 1884.

Referred to the Committee on Printing, to be printed with the Annual Reports for 1883. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 14, 1884.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

To His Honor the Mayor and the Board of Aldermen :—

GENTLEMEN :—Your Inspector of Buildings will herewith present his annual report :—

The past year has been one of activity in building. Your inspector has found builders willing to comply with the ordinance in most cases, though there have been a few exceptions, but after an explanation, the ordinance has been complied with.

There have been one hundred and twenty-nine houses built the past year, besides a large number of additions, and one horse-car stable and car-house, thus adding quite a large amount to the taxable property of the city.

The buildings are divided among the different wards, as follows :—

Ward 1,	23 houses.
“ 2,	45 “
“ 3,	38 “
“ 4,	23 “
								<hr/> 129

RECOMMENDATION :

As the present ordinance is not definite in some particulars, I would recommend that it be amended so as to be more effective.

All of which is most respectfully submitted.

DAVID A. SANBORN,
Inspector of Buildings.

SOMERVILLE, Dec. 31, 1883.
