1908

# THIRD INAUGURAL ADDRESS

DELIVERED BY

MAYOR CHARLES A. GRIMMONS

MONDAY, JANUARY 6, 1908.

---

Gentlemen of the Board of Aldermen :—

We meet this morning to inaugurate the thirty-seventh administration of our city government. Each succeeding year brings new conditions, fraught with added responsibilities, making each period harder of successful achievement than the preceding one. The year 1907 opened with the general business and financial conditions of our country in an apparent state of great prosperity, while to-day we are in a state of uncertainty, which calls for the extreme efforts of conservatism and economy in both private and public life.

We have taken upon ourselves solemn obligations and assumed the responsibilities entrusted to us by the people. The people ask of us that we give them in our official actions our best efforts, which "the Somerville idea" demands shall be unselfish, non-partisan, and with an eye single to the best interests of the whole city.

I regret to say that the financial outlook is far from reassuring. Our expenses have been, and are, growing in excess of our receipts. Conditions existing in 1907 have been responsible for higher costs, which it was impossible to foresee. The interest on temporary loans was \$10,319.31 more than in the previous year. We received \$8,000 less from the Elevated railroad than in 1906. Every increase of salary was just and proper, and some salaries are yet below the normal standard of the city. Prices for hay and grain, as well as for all other supplies, have

been abnormally high, but the city has bought only what was absolutely necessary. An additional expense this year will be the increase in the school teachers' salaries, which public sentiment demanded, and which seemed just and reasonable.

On account of interest rates and market conditions, I refrain at this time from making many recommendations which would require the expenditure of money.

It is a matter for congratulation that the state has recently assumed the cost and interest charges paid on the Somerville armory, which have been an expense to the city for the past five years. It is expected that the additional mileage of the Boston Elevated railway, through Mystic avenue to the metropolitan parkway in Somerville, will be a source of additional income to the city. A small income may be expected from the sale of sand and gravel from the Waltham land, which has been unproductive for many years. Still, these small sources of income will, I fear, be insufficient to care for the added demands which must be met. I therefore urge on you the most unselfish efforts to aid the executive in giving the city as economic an administration as is possible. It is to be hoped that the impending business readjustment will soon be accomplished, and that normal conditions will prevail. This will somewhat lighten the burdens of this year.

Somerville has always been fortunate in having a low tax rate. In comparison with its rate of \$17.40 last year, that of Malden was \$18.00; Everett, \$18.50; Cambridge, \$18.80; Medford, \$20.00; and Chelsea, \$20.80. In view of the increased demands and of the unusual payments on the funded debt to be provided for, the city must expect to have a slightly increased tax rate for this year, at least, if not for the future.

The total funded debt of the city January 1, 1907, was \$1,464,500. This debt was increased during the year \$198,000. It was decreased \$154,500, leaving the net funded debt January 1, 1908, \$1,508,000, a net increase of \$43,500.

The total amount of taxable property is \$61,627,200, of which \$55,372,500 is real estate, and \$6,254,700 is personal estate, including non-resident bank shares. At a rate of \$17.40 on each \$1,000 of valuation, the tax is \$1,072,313.28. There are 20,793 polls at \$2.00, making \$41,586. We received from street watering, \$29,036.05, and from the suppression of gypsy and brown-tail moths, \$1,499.59, making the total tax levy \$1,144,-

434.92. The total number of persons assessed, resident and non-resident, was 28,365.

Of the amount received in taxes, \$167,500 is required for the debt provisions; \$187,213.28 are state and county taxes, metropolitan sewer assessments, etc., matters over which the city has no control; \$374,000 is used for current expenses of departments, over which the board of aldermen has no control; \$343,600 is the amount for current expenses within control of the board of aldermen.

The same statement, based upon the \$17.40 per thousand, is as follows: Of each \$17.40, \$3.04 is for state, county, and metropolitan taxes; \$2.72 for debt requirements; \$6.07 for current expenses over which the board of aldermen has no control; \$5.57 for current expenses within control of the board of aldermen.

In addition to the amount received from taxes, there was available last year the sum of (estimated) \$224,672.11 on water income account; we received \$27,409.58 from corporation and bank taxes; from the clerk of the courts, \$3,538; from the county treasurer, for dog licenses, \$4,109.54; from the state, the street railway tax, \$40,439.71; from the Boston Elevated Railway tax, \$8,908.18; amount charged to the state, \$3,357.13; and amount received from the state for rent of armory, \$1,098; a total of \$313,532.25, making the total amount available from taxes and other sources, \$1,457,967.17.

It is a matter for congratulation that we close the year 1907 with a credit balance \$3,715.26 on appropriations from the tax levy.

Funded Debt.—The funded debt of the city January 1, 1907, was as follows:—

Funded Debt, City Loan . . . . .	\$1,082,500 00
Funded Debt, Sewer Loan . . . . .	243,000 00
Funded Debt, Paving Loan . . . . .	30,000 00
Funded Debt, Water Loan . . . . .	86,000 00
Funded Debt, Metropolitan Park Assessment Loan . . . . .	23,000 00
	<hr/>
	\$1,464,500 00

The debt was increased during the year by appropriations made by the board of aldermen as follows:—

Electrical Department, Underground Construction . . . . .	\$3,000 00
Fire Department, Additional Apparatus . . . . .	5,500 00
Highways, Construction . . . . .	20,500 00
Highways Construction, Clarendon Hill Ledge . . . . .	8,500 00
Highways, Paved Gutters and Crossings, . . . . .	10,000 00
Highways, Shade Trees . . . . .	500 00
Public Buildings Construction:—	
Addition to Benjamin G. Brown School . . . . .	20,000 00
Addition to Sanford Hanscom School . . . . .	15,000 00
Bath House . . . . .	3,000 00
Heating Plant, Charles G. Pope School, Incinerator . . . . .	6,000 00
Vault, City Hall . . . . .	2,000 00
Renewal of Funded Debt . . . . .	10,000 00
Sewers, Construction . . . . .	60,000 00
Sidewalks, Construction . . . . .	12,000 00
Soldiers' Monument . . . . .	20,000 00
	<hr/>
	\$198,000 00

The debt was reduced during the year by maturities as follows:—

Funded Debt, City Loan . . . . .	\$118,500 00
Funded Debt, Sewer Loan . . . . .	13,000 00
Funded Debt, Paving Loan . . . . .	5,000 00
Funded Debt, Water Loan . . . . .	17,000 00
Funded Debt, Metropolitan Park Assessment Loan . . . . .	1,000 00
	<hr/>
	\$154,500 00

Leaving the funded debt of the city January 1, 1908, \$1,508,000 (an increase of \$43,500 from the previous year), classified as follows:—

City Loan bonds bearing interest at 3½ per cent. . . . .	\$314,000 00
City Loan bonds bearing interest at 4 per cent. . . . .	788,000 00
City Loan Sewer bonds bearing interest at 3½ per cent. . . . .	72,000 00
City Loan Sewer bonds bearing interest at 4 per cent. . . . .	214,000 00
	<hr/>
Amount carried forward . . . . .	\$1,388,000 00

Amount brought forward . . . . .	\$1,388,000 00
City Loan Sewer bonds bearing interest at 4½ per cent. . . . .	4,000 00
City Loan Paving bonds bearing interest at 4 per cent. . . . .	25,000 00
Water Loan bonds bearing interest at 4 per cent. . . . .	69,000 00
Metropolitan Park Assessment Loan bonds bearing interest at 3½ per cent. . . . .	22,000 00
	<hr/>
Total Funded Debt January 1, 1908 .	\$1,508,000 00

The foregoing amount represents the net indebtedness of the city, the unfunded liabilities for the temporary loans, etc., being equaled by its assets, which consist of uncollected taxes, sewer and sidewalk assessments, etc.

Taxes.—The assessors' warrant for the tax levy assessed upon the polls and estates of the inhabitants, as of May 1, 1907, was duly submitted to the collector.

The total amount of taxable property was \$61,627,200, and the rate established was \$17.40 on each \$1,000 valuation, as follows:—

Real estate, valuation . . . . .	\$55,372,500 00
Personal estate, valuation . . . . .	6,155,250 00
Non-resident bank shares . . . . .	99,450 00
	<hr/>
Total valuation . . . . .	\$61,627,200 00
At a rate of \$17.40 on each \$1,000 valua- tion . . . . .	1,072,313 28
Polls, 20,793 at \$2 . . . . .	41,586 00
Street watering . . . . .	29,036 05
Suppression of gypsy and brown- tail moths . . . . .	1,499 59
	<hr/>
Total amount of tax levy . . . . .	\$1,144,434 92
Total number of persons assessed, resident and non-resident, 28,365.	

Appropriations.—The amount of revenue provided by the tax levy may properly be classified as follows:—

	Rates assessed on \$1,000 valuation.	Amount.
For current expenses within the control of the board of aldermen . . . . .	\$5 57	\$343,600 00
	<hr/>	<hr/>
Amounts carried forward . . . . .	\$5 57	\$343,600 00

Amounts brought forward . . . . .	\$5 57	\$343,600 00
Current expenses of departments over which the board of aldermen has no control . . . . .	6 07	374,000 00
Debt requirements . . . . .	2 72	167,500 00
State and county taxes, metropolitan sewer and park assessments, national bank tax, and Overlay account . . . . .	3 04	187,213 28
<hr/>		
Total amount assessed on a valuation of \$61,627,200 at . . . . .	\$17 40	\$1,072,313 28
Poll taxes assessed, credited to state and county . . . . .		41,586 00
Street watering . . . . .		29,036 05
Suppression of gypsy and brown-tail moth tax . . . . .		1,499 59
<hr/>		
Total amount of the tax levy . . . . .		\$1,144,434 92

The appropriations to the various accounts were as follows:—

ACCOUNTS WITHIN THE CONTROL OF THE BOARD OF ALDERMEN.

Assessors . . . . .	\$10,000 00
City Auditor . . . . .	725 00
City Clerk . . . . .	5,500 00
City Engineer . . . . .	11,500 00
City Messenger . . . . .	2,000 00
City Solicitor . . . . .	2,300 00
City Treasurer . . . . .	9,700 00
Clerk of Committees and Departments . . . . .	4,200 00
Contingent Fund . . . . .	2,675 00
Election Expenses:—	
City Clerk . . . . .	1,650 00
Commissioner of Public Buildings . . . . .	900 00
Pay of Election Officers . . . . .	2,500 00
Registrars of Voters . . . . .	1,550 00
Electrical Department . . . . .	8,200 00
Executive Department . . . . .	4,000 00
Fire Department . . . . .	42,000 00
Inspection of Buildings . . . . .	4,300 00
Military Aid . . . . .	900 00
Police . . . . .	46,000 00
Printing and Stationery . . . . .	2,000 00
<hr/>	
Amount carried forward . . . . .	\$162,600 00

Amount brought forward . . . . .	\$162,600 00
Public Buildings Maintenance:—	
City Buildings . . . . .	10,900 00
Fire Department . . . . .	3,600 00
Janitors' Salaries . . . . .	28,500 00
Schoolhouses . . . . .	30,000 00
Public Grounds . . . . .	10,700 00
Sealer of Weights and Measures . . . . .	1,300 00
Sidewalks Maintenance . . . . .	1,000 00
Soldiers' Relief . . . . .	22,000 00
Somerville Hospital . . . . .	5,000 00
Street Lights . . . . .	64,000 00
Suppression of Gypsy and Brown-tail Moths . . . . .	4,000 00
	<hr/>
Total amount assessed on a valuation of \$61,627,200 at \$5.57 . . . . .	\$343,600 00

## ACCOUNTS OVER WHICH THE BOARD OF ALDERMEN HAS NO CONTROL.

Health Department . . . . .	\$8,000 00
Health Department, Collection of Ashes and Offal . . . . .	40,000 00
Health Department, Contagious Disease Hospital . . . . .	1,000 00
Health Department, Medical Inspection in Public Schools . . . . .	1,500 00
Public Library . . . . .	15,000 00
School Contingent . . . . .	27,000 00
School Teachers' Salaries . . . . .	265,000 00
Support of Poor, City Home . . . . .	2,500 00
Support of Poor, Miscellaneous . . . . .	14,000 00
	<hr/>
Total amount assessed on a valuation of \$61,627,200 at \$6.07 . . . . .	\$374,000 00

## ACCOUNTS PROVIDING FOR DEBT REQUIREMENTS.

Interest . . . . .	\$63,000 00
Reduction of Funded Debt . . . . .	104,500 00
	<hr/>
Total amount assessed on a valuation of \$61,627,200 at \$2.72 . . . . .	\$167,500 00

## PROVIDING FOR STATE AND COUNTY TAXES, ETC.

State Tax . . . . .	\$70,160 00
Deduct one-half of poll taxes, . . . . .	20,793 00
	<hr/>
	\$49,367 00
County Tax . . . . .	\$61,897 01
Deduct one-half of poll taxes, . . . . .	20,793 00
	<hr/>
	41,104 01
	<hr/>
Amount carried forward . . . . .	\$90,471 01

Amount brought forward . . . . .	\$90,471 01
Metropolitan Sewer Assessment . . . . .	37,575 77
Metropolitan Park Assessment . . . . .	28,140 91
National Bank Tax . . . . .	1,730 43
Overlay and Abatement . . . . .	21,688 77
Armory Tax . . . . .	3,868 99
Wellington Bridge Tax . . . . .	3,737 40

Total amount assessed on a valuation of \$61,627,200 at \$3.04 . . . . .	\$187,213 28
---	--------------

In addition to the above, the following appropriations were made from the various income accounts:—

From the income of the water works:—

Water Maintenance . . . . .	\$25,000 00
Water Loan Interest . . . . .	3,200 00
Water Works Extension . . . . .	20,000 00
Sewers Maintenance . . . . .	12,000 00
Fire Department . . . . .	30,000 00
Reduction of Funded Debt, Water Loan Bonds . . . . .	7,000 00
Metropolitan Water Assessment . . . . .	106,334 61
Interest on Sewer Loan Bonds . . . . .	9,137 50
Reduction of Funded Debt (estimated) . . . . .	12,000 00
<b>Total . . . . .</b>	<b>\$224,672 11</b>

From the income from the state and county:—

Police, the amount received from the state for corporation taxes . . . . .	\$23,606 35
Amount charged to the state . . . . .	3,357 13
Police, the amount received from the state for bank taxes . . . . .	3,803 23
Police, the amount received from the clerk of the courts for fines, costs, etc. . . . .	3,538 00
Public Library, the amount received from the county for dog licenses . . . . .	4,109 54
Highways Maintenance, from Boston Elevated Railway tax . . . . .	8,908 18
Highways Maintenance, from street rail- way tax . . . . .	40,439 71
School Teachers' Salaries, amount re- ceived from the state for rent of Armory . . . . .	1,098 00
<b>Total . . . . .</b>	<b>\$88,860 14</b>
Total from water income and from state and county . . . . .	<b>\$313,532 25</b>

The aggregate appropriations from taxy levy and from income were as follows:—

From tax levy . . . . .	\$1,144,434 92
From income . . . . .	313,532 25

\$1,457,967 17

The following tables, giving a condensed history of the city's finances, are herewith presented for reference:—

YEAR.	Amount of Funded Debt.	Increase of Funded Debt.	Reduction of Funded Debt.	Tax Rate per \$1,000 Valuation on Account of Reduction of Funded Debt.
Town . . . . .	\$593,349	. . .	. . .	. . .

I recommend that the customary sum of \$5,000 be appropriated for the care of the sick poor in the Somerville hospital. This corporation and the board of overseers of the poor are the only bodies by which the public funds can be used for charitable work. You will permit me to again remind you of our many other charitable institutions, all doing a good work on broad and non-sectarian lines, which Somerville has always supported with public spirit and private charity. While we are in the midst of a state of financial depression, which always causes additional

demands in this line, I urge our people not to be lax in their good deeds, for this is a time when the cause is better, if possible, and more necessity prevails for the alleviation of poverty and suffering.

The streets and sidewalks of the city have had the usual efficient efforts of the highway department, which has had an unusually busy year. Many granolithic sidewalks have been constructed in response to the public demand. In the judgment of the department, granolithic appears to be the ideal material for a sidewalk.

Thirteen thousand, eight hundred and fifty yards of permanent pavement have been laid on the more heavily-traveled streets. I recommend that further use of this material be made on Highland avenue this year, as far as our resources will permit. The plan of the department is to lay permanent pavement on the principal arteries of travel as fast as possible, thereby giving the best roads and minimizing the cost of maintenance.

Much progress has been made on the Broadway improvements, and, with the passing of a few more months of good weather, it is expected that this work will be completed. Then we shall have a local boulevard from the Boston line to the foot of Winter hill. Many of the poles on Broadway have already been removed, and the placing of wires under ground has been carried to the extent required by law.

It is expected that this year the Massachusetts highway commission will take Mystic avenue and construct it as a state highway. While this will be of material benefit to the towns beyond Somerville, it will relieve our city of a great cost of maintenance, which has been a burden since the establishment of the town.

It is a cause for regret that the Lowell-street bridge matter has not yet been settled, owing to the delays due to court proceedings brought by the railroad companies. The case is on the list for an early hearing in the supreme court, and it is hoped that it will be speedily determined. The city has made all reasonable efforts to settle the problem outside of the courts, but its propositions have been rejected by the railroad companies.

Considerable progress has been made during the past year toward the abolition of grade crossings on the line of the Fitchburg division of the Boston & Maine railroad, running through the southwesterly portion of the city. Many hearings have

been held before the special grade crossing commission appointed by the court for this particular work. While the commission has not issued its final report on the subject, it has intimated what it will be, which, however, I regret to say, does not wholly meet with the views submitted by the city. Courtesy forbids a discussion of the subject before the issuance of this report, but when it is received it will be within the province of the administration to fully consider it, and, if not satisfactory, to present its wishes when the report is presented to the court for confirmation. This subject is one of such vital interest to the city that I ask that, when you consider it, you give it your closest study and best effort for the good of the whole city.

Early in last year the city acquired the so-called Clarendon-hill ledge. This desirable action is doubly beneficial to the city, inasmuch as it gives a new stone supply for highway purposes and has abated in a large degree a great menace to public safety. It is hoped that in the early future the city may acquire from the city of Cambridge, for a nominal consideration, if any, land in that locality which will furnish a dumping ground for many years to come.

The fire department equipment has been augmented by the purchase of another fire engine of the first class, which has been placed on Clarendon hill for the better protection of that rapidly-growing district. The small amount of fire losses in Somerville is a silent, though powerful, tribute to the efficiency and discipline of our fire department. I recommend that a new chemical be purchased to replace the old one at Clarendon hill, which is not as safe and reliable as is desired.

The executive's suggestion of last year in regard to excessive fire insurance rates has been followed up by presenting a petition and bill to the legislature, and he has appeared before the insurance committee several times. It is hoped that it will report a bill early in the year which will safeguard the rights of property holders and protect them from extortion. It is a fact, coincident or otherwise, that shortly after the introduction of the bill in the legislature, the added insurance rates which followed the San Francisco disaster were withdrawn and canceled. I have urged on the committee the necessity of definite legislation, so that similar conditions may not again arise.

A four-room addition to the Hanscom school building on Webster street has been constructed, in order to relieve the con-

ditions which existed in the schools of ward one. This addition will accommodate 196 pupils. A four-room addition to the Brown school on Willow avenue has been constructed. This addition became necessary on account of the large increase of population in the Highland district. The increased space will greatly relieve the other school centres in the ward six and ward seven districts. The antiquated system of heating and ventilating the Pope school building by furnaces has been entirely removed, and a modern system of steam heating and fan ventilation installed. This improved system greatly adds to the comfort of the pupils and teachers.

The incinerating plant, the construction of which was begun in 1906, was finished last year, and it has been in operation a sufficient length of time to demonstrate its value and efficiency in every way.

A vault has been constructed in the basement of city hall, which will afford the additional space required for the storage of city documents.

In accordance with my recommendation of last year on the subject of building ordinances, a commission of experts was appointed, and it has submitted a draft of building ordinances which, it is believed, will prove to be more in accordance with modern methods of building construction than the old ones, and will materially benefit the city.

By a recent act of the legislature, the installation of water meters is made compulsory, although sufficient time is given, so as not to render it a heavy burden on the city. The work will be commenced this year in ward one, and will be prosecuted until the whole city shall have been equipped. This course appears to be the most equitable and just method of levying and collecting the water tax, as each piece of property thus pays for the actual amount of water that has been consumed.

Somerville maintains its distinguished reputation as the banner no-license city of the state. In the granting of sixth-class liquor licenses and of licenses for the transportation of liquors I urge your most careful attention to each and every applicant, in order that this business may be so restricted as to conform in the greatest degree to the public sentiment so strongly expressed at the polls. I pledge the best attention of the executive and of the police department in strictly enforcing the law. There was especial watchfulness last year, with the re-

sults that there were a great many less arrests for drunkenness and a marked reduction in the number of prosecutions for violation of the liquor laws.

In response to public sentiment and demand, and in fulfilment of a long-deferred duty, the city government last year appropriated \$20,000 for a soldiers' monument. After a full and broad competition by some of the best talent obtainable, a contract has been made, and the models are approaching completion. I confidently expect that the result will be pleasing, and that it will be a worthy memorial to those men of Somerville who, on land and sea, served their country during the war of the Rebellion. It is hoped that the cornerstone may be laid on Memorial day of this year, and in a manner befitting the cause which it commemorates. It is especially pleasing to know that many of the participants in that conflict will have lived to see this token of the people's appreciation of their efforts to perpetuate the integrity of the nation.

Somerville has always been a well-governed city. The subject of rule of cities by commission, which is now engaging the attention of the country, has no interest for us, save as it works for progress in the evolution of a great problem. Somerville, inspired by the events which have taken place on her very soil, and true to the underlying principles of Plymouth and of early New England, stands as a model for the sisterhood of American municipalities. Look to it well that you keep her so.

# REPORT OF THE CITY TREASURER AND COLLECTOR OF TAXES.

Treasurer's Office, February 13, 1908.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen: The undersigned presents herewith the thirty-sixth annual report of the financial condition of the city, and a statement showing, in detail, the receipts and disbursements for the year ending December 31, 1907.

### Public Property.

The value of the public property of the city December 31, 1906, was \$5,144,662.92. The property acquired during the year was as follows:—

Vault, City Hall . . . . .		\$1,567 81
Heating Plant, Charles G. Pope School . . . . .		5,000 00
Addition to Latin High School . . . . .		700 00
Addition to Benjamin G. Brown School . . . . .		11,666 12
Addition to Sanford Hanscom School . . . . .		12,489 53
Incinerator . . . . .		2,622 02
Fire Apparatus . . . . .		5,415 45
Water Works Extension . . . . .		17,039 00
Sewers, Construction . . . . .		25,765 70
Clarendon Hill Ledge . . . . .		8,500 00
		\$90,765 63
Less Rifle Range Building, abandoned . . . . .	\$693 21	
Whipple Street land . . . . .	3,000 00	
	3,693 21	
		\$87,072 42

Total public property December 31, 1907, \$5,231,735.34.

### Funded Debt.

The funded debt December 31, 1906, as per Table B of the last annual report, was \$1,464,500.

The debt was increased during the year by appropriations as follows:—

Electrical Department, Underground Construction . . . . .		\$3,000 00
Fire Department, Additional Apparatus . . . . .		5,500 00
Highways, Construction . . . . .		20,500 00
Highways, Construction, Clarendon Hill Ledge . . . . .		8,500 00
Highways, Paved Gutters and Crossings . . . . .		10,000 00
Highways, Shade Trees . . . . .		500 00
Public Buildings Construction:—		
Addition to Benjamin G. Brown School . . . . .		20,000 00
Addition to Sanford Hanscom School . . . . .		15,000 00
		\$83,000 00
Amount carried forward . . . . .		

Amount brought forward . . . . .	\$83,000 00
Bath House . . . . .	3,000 00
Heating Plant, Charles G. Pope School . . . . .	6,000 00
Incinerator . . . . .	2,000 00
Vault, City Hall . . . . .	2,000 00
Renewal of Funded Debt . . . . .	10,000 00
Sewers, Construction . . . . .	60,000 00
Sidewalks, Construction . . . . .	12,000 00
Soldiers' Monument . . . . .	20,000 00

Total amount of appropriations on Funded Debt account . . . . . \$198,000 00

To provide for the above-mentioned appropriations, coupon bonds to the amount of \$198,000 at 4 per cent. were issued, viz. :—

City Loan Bonds Nos. 3508 to 3518, payable 1908 . . . . .	\$11,000 00
City Loan Bonds Nos. 3519 to 3529, payable 1909 . . . . .	11,000 00
City Loan Bonds Nos. 3530 to 3540, payable 1910 . . . . .	11,000 00
City Loan Bonds Nos. 3541 to 3551, payable 1911 . . . . .	11,000 00
City Loan Bonds Nos. 3552 to 3562, payable 1912 . . . . .	11,000 00
City Loan Bonds Nos. 3563 to 3573, payable 1913 . . . . .	11,000 00
City Loan Bonds Nos. 3574 to 3584, payable 1914 . . . . .	11,000 00
City Loan Bonds Nos. 3585 to 3595, payable 1915 . . . . .	11,000 00
City Loan Bonds Nos. 3596 to 3606, payable 1916 . . . . .	11,000 00
City Loan Bonds Nos. 3607 to 3617, payable 1917 . . . . .	11,000 00
City Loan Bonds Nos. 3618 to 3620, payable 1918 . . . . .	3,000 00
City Loan Bonds Nos. 3621 to 3623, payable 1919 . . . . .	3,000 00
City Loan Bonds Nos. 3624 to 3626, payable 1920 . . . . .	3,000 00
City Loan Bonds Nos. 3627 to 3629, payable 1921 . . . . .	3,000 00
City Loan Bonds Nos. 3630 to 3632, payable 1922 . . . . .	3,000 00
City Loan Bonds Nos. 3633 to 3635, payable 1923 . . . . .	3,000 00
City Loan Bonds Nos. 3636 to 3638, payable 1924 . . . . .	3,000 00
City Loan Bonds Nos. 3639 to 3641, payable 1925 . . . . .	3,000 00
City Loan Bonds Nos. 3642 to 3643, payable 1926 . . . . .	2,000 00
City Loan Bonds Nos. 3644 to 3645, payable 1927 . . . . .	2,000 00
Sewer Loan Bonds Nos. 379 to 438, payable 1908 to 1937 . . . . .	60,000 00

Total amount of bonds issued in 1907 . . . . . \$198,000 00  
 \$71,000 of these bonds were exchanged for registered bonds.

The following bonds became due during the year :—

City Loan Bonds Nos. 3319 to 3327, interest 3½ per cent. . . . .	\$9,000 00
City Loan Bonds Nos. 1686 to 1691, interest 4 per cent. . . . .	6,000 00
City Loan Bonds Nos. 1933 to 1947, interest 4 per cent. . . . .	15,000 00
City Loan Bonds Nos. 2148 to 2155, interest 4 per cent. . . . .	8,000 00
City Loan Bonds Nos. 2312 to 2320, interest 4 per cent. . . . .	9,000 00
City Loan Bonds Nos. 2447 to 2456, interest 4 per cent. . . . .	10,000 00
City Loan Bonds Nos. 2571 to 2577, interest 4 per cent. . . . .	7,000 00
City Loan Bonds Nos. 2696 to 2705, interest 3½ per cent. . . . .	10,000 00
City Loan Bonds Nos. 2818 to 2825, interest 3½ per cent. . . . .	8,000 00
City Loan Bonds Nos. 2934 to 2942, interest 3½ per cent. . . . .	9,000 00
City Loan Bonds Nos. 3047 to 3055, interest 4 per cent. . . . .	9,000 00
City Loan Bonds Nos. 3208 to 3215, interest 4 per cent. . . . .	8,000 00
City Loan Bond No. 3216, interest 4 per cent. . . . .	500 00
City Loan Bonds Nos. 3428 to 3425, interest 4 per cent. . . . .	8,000 00
City Loan Bonds Nos. 3156 to 3157, interest 4 per cent. . . . .	2,000 00
Sewer Loan Bond No. 330, interest 3½ per cent. . . . .	1,000 00

Amount carried forward . . . . . \$119,500 00

Amount brought forward . . . . .	\$119,500 00
Sewer Loan Bond No. 66, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 183, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 207, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 229, interest 3½ per cent. . . . .	1,000 00
Sewer Loan Bond No. 258, interest 3½ per cent. . . . .	1,000 00
Sewer Loan Bond No. 282, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 306, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 359, interest 4 per cent. . . . .	1,000 00
Sewer Loan Bond No. 49, interest 4½ per cent. . . . .	1,000 00
Sewer Loan Bonds Nos. 117 to 119, interest 4 per cent. . . . .	3,000 00
City Loan Paving Bonds Nos. 71 to 75, interest 4 per cent., . . . . .	5,000 00
Water Loan Bonds Nos. 267 to 276, interest 4 per cent. . . . .	10,000 00
Water Loan Bond No. 291, interest 4 per cent. . . . .	1,000 00
Water Loan Bond No. b458, interest 4 per cent. . . . .	1,000 00
Water Loan Bonds Nos. 359 to 361, interest 4 per cent. . . . .	3,000 00
Water Loan Bonds Nos. 456 to 457, interest 4 per cent. . . . .	2,000 00
Metropolitan Park Assessment Loan Bond No. 5, interest 3½ per cent. . . . .	1,000 00
<hr/>	
Total amount of bonds maturing in 1907 . . . . .	\$154,500 00

Leaving the net funded debt December 31, 1907, as per Table B, \$1,508,000, classified as follows:—

	Registered.	Coupon.
City Loan Bonds at 3½ per cent. . . . .	\$119,000 00	\$195,000 00
City Loan Bonds at 4 per cent. . . . .	75,000 00	713,000 00
Sewer Loan Bonds at 3½ per cent. . . . .	32,000 00	40,000 00
Sewer Loan Bonds at 4 per cent. . . . .	67,000 00	147,000 00
Sewer Loan Bonds at 4½ per cent. . . . .	1,000 00	3,000 00
Paving Loan Bonds at 4 per cent. . . . .		25,000 00
Water Loan Bonds at 4 per cent. . . . .	31,000 00	38,000 00
Metropolitan Park Assessment Loan Bonds at 3½ per cent. . . . .	3,000 00	19,000 00
	<hr/>	<hr/>
	\$328,000 00	\$1,180,000 00
		<hr/>
Registered Bonds . . . . .		\$328,000 00
Coupon Bonds . . . . .		1,180,000 00
		<hr/>
		\$1,508,000 00
Total Funded Debt, City Loan . . . . .	\$1,102,000 00	
Total Funded Debt, Water Loan . . . . .	69,000 00	
Total Funded Debt, Paving Loan (outside legal limit) . . . . .	25,000 00	
Total Funded Debt, Sewer Loan . . . . .	236,000 00	
Total Funded Debt, Sewer Loan (outside legal limit) . . . . .	54,000 00

	<hr/>	<hr/>
		\$1,508,000 00

**Resources.**

The assessors' warrant for the tax levy, assessed upon the polls and estates of the inhabitants, was duly received.

The total amount of taxable property was \$61,627,200, and the rate of taxation was \$17.40 on each \$1,000 valuation, as follows:—

Real estate, valuation . . . . .	\$55,372,500 00
Personal estate, valuation . . . . .	6,155,250 00
Non-resident bank shares . . . . .	99,450 00
<b>Total valuation . . . . .</b>	<b>\$61,627,200 00</b>
At a rate of \$17.40 on \$1,000 valuation . . . . .	\$1,072,313 28
Polls, 20,793 at \$2 . . . . .	41,586 00
Street watering . . . . .	29,036 05
Suppression of gypsy and brown-tail moths . . . . .	1,499 59
<b>Total amount of tax levy . . . . .</b>	<b>\$1,144,434 92</b>
Borrowed on Funded Debt account to provide for the cost of public improvements and renewals of debt . . . . .	198,000 00
Water works income . . . . .	226,001 63
National bank and corporation taxes, applied to Police . . . . .	30,766 71
Court fees, fines, etc., applied to Police . . . . .	3,538 00
County of Middlesex, dog licenses, applied to Public Library . . . . .	4,109 54
Street Railway tax for the year 1907, applied to Highways Maintenance . . . . .	40,439 71
Boston Elevated Railway tax for the year 1907, applied to Highways Maintenance . . . . .	8,908 18
Rent of armory, applied to School Teachers' Salaries . . . . .	1,098 00
<b>Total amount of resources . . . . .</b>	<b>\$1,657,296 69</b>

### Appropriations from Funded Debt and from Income.

#### CREDIT BALANCES.

### APPROVAL OF TREASURER'S REPORT.

In Committee on Finance, February 26, 1908.

To the Board of Aldermen of the City of Somerville.

Gentlemen:—The committee on finance presents the report of Edwin L. Pride, expert accountant, as its report as an audit of the books and accounts of the City Treasurer, and recommends that the report of the treasurer be printed in the annual reports of 1907.

Respectfully submitted,

LEONARD W. COLE,	}	<i>Committee</i>
CHARLES A. BURNS,		
DAVID BERGLIND,		
EDWARD H. KINGMAN,		
GEORGE A. LORD,		
GEORGE W. HARVEY,		
CHARLES W. ELDRIDGE,		<i>on</i>
		<i>Finance.</i>

In Board of Aldermen, February 27, 1908. Accepted.

FREDERIC W. COOK, Clerk.

BENJAMIN G. BROWN SCHOOL.

## REPORT OF THE SCHOOL COMMITTEE.

---

School Committee Rooms, January 3, 1908.

Ordered, that the annual report of the Superintendent be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the Board to the opinions or recommendations made therein; that it be incorporated in the reports of the City Officers; and that 1,000 copies be printed separately.

G. A. SOUTHWORTH,  
Secretary of School Board.

## SCHOOL COMMITTEE, 1907.

FREDERICK A. P. FISKE, . . . . .	Chairman
J. WALTER SANBORN, . . . . .	Vice-Chairman

### Members.

EX-OFFICIIS.	Term expires January.
CHARLES A. GRIMMONS, Mayor, 72 Thurston street.	1908
LEONARD W. COLE, Pres. Board of Aldermen, 5 Homer Square.	1908
WARD ONE.	
DR. HENRY F. CURTIS, 145 Perkins street.	1908
ELMER H. SPAULDING, 44 Tufts street.	1909
WARD TWO.	
DANIEL H. BRADLEY, 19 Concord avenue.	1908
THOMAS M. CLANCY, 52 Springfield street.	1909
WARD THREE.	
GEORGE E. WHITAKER, 75 Walnut street.	1908
WILBUR S. CLARKE, 40 Vinal avenue.	1909
WARD FOUR.	
CHARLES A. KIRKPATRICK, JR., 27 Sewall street.	1908
GEORGE W. FOSTER, 7 Evergreen avenue.	1909
WARD FIVE.	
HENRY H. FOLSOM, 103 Central street.	1908
J. WALTER SANBORN, 183 Central street.	1909
WARD SIX.	
FREDERICK A. P. FISKE, 44 Cherry street.	1908
LEON M. CONWELL, 1 Harvard place.	1909
WARD SEVEN.	
DR. GEORGE C. MAHONEY, 97 College avenue.	1908
MRS. HENRIETTA B. H. ATTWOOD, 12 Park avenue.	1909

### Superintendent of Schools.

GORDON A. SOUTHWORTH.

Office: City Hall Annex, Highland avenue.

Residence: 40 Greenville street.

The Superintendent's office will be open on school days from 8 to 5; Saturdays, 8 to 10. His office hours are from 4 to 5 on school days, and 8 to 9 on Saturdays.

Office telephone, 314; house telephone, 12.

Cora S. Fitch, Superintendent's clerk, 15 Pleasant avenue.

Mary A. Clark, clerk, 42 Highland avenue.

## STANDING COMMITTEES, 1907.

---

High Schools.—Sanborn, Mahoney, Curtis, Clancy, Clarke, Foster, Conwell.

District I.—Curtis, Spaulding, Foster.

PRESCOTT, HANSCOM, DAVIS, BENNETT.

District II.—Bradley, Clancy, Clarke.

KNAPP, PERRY, BAXTER.

District III.—Whitaker, Clarke, Curtis.

POPE, BELL, CUMMINGS.

District IV.—Kirkpatrick, Foster, Cole.

EDGERLY, GLINES.

District V.—Folsom, Sanborn, Kirkpatrick.

FORSTER, BINGHAM.

District VI.—Fiske, Conwell, Folsom.

CARR, MORSE, PROCTOR, DURELL, BURNS, BROWN.

District VII.—Mahoney, Mrs. Attwood, Conwell.

HIGHLAND, HODGKINS, LINCOLN, LOWE.

Additional School Accommodations.—Mahoney, Sanborn, Curtis, Clancy, Clarke, Kirkpatrick, Conwell, Grimmons, Cole.

Evening Schools.—Folsom, Whitaker, Fiske.

Finance.—Kirkpatrick, Spaulding, Conwell, Grimmons, Cole.

Industrial Education.—Foster, Clarke, Mrs. Attwood.

Medical Inspection.—Curtis, Clancy, Mahoney.

Music.—Mrs. Attwood, Curtis, Bradley.

Private Schools.—Clancy, Spaulding, Kirkpatrick.

Repairs of School Buildings.—Spaulding, Foster, Folsom.

Rules and Regulations.—Bradley, Folsom, Fiske.

Salaries.—Fiske, Whitaker, Sanborn.

Supplies.—Clarke, Bradley, Sanborn.

Text-Books and Courses of Study.—Whitaker, Spaulding, Bradley, Kirkpatrick, Folsom, Fiske, Mrs. Attwood.

Vacation Schools.—Conwell, Foster, Mahoney.

Note.—The member first named is chairman.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Committee of Somerville:—

The thirty-sixth annual report of the Superintendent of Schools, the fifteenth prepared by the present incumbent, is respectfully submitted. Assuming that the usual custom will be followed and this report be made the report of the School Committee which the law requires them to make to their fellow-citizens, some matters are presented that would be omitted and others more fully treated than would be the case if the School Board alone were interested. The order of the last few years has been maintained, the first thing presented being a

### Summary of Statistics.

Population, United States census, 1890.....	40,117
Population, State census, 1895.....	52,200

Number of dollars spent for all school pur- poses out of every \$1,000 of valuation..	6.29	6.35	0.06

**Length of the School Year.** Theoretically all our schools are in session for forty weeks, or 200 days, one two-hundredth of a teacher's pay being deducted for a lost day. This year our schools have been in session thirty-five and three-tenths weeks. The average length of our school year for the last decade is

thirty-six weeks, three days. The work of 1907 has been interrupted by five and one-half holidays, twelve sessions lost through excessive cold, extreme heat, or severe storms, four and one-half days by the extension of vacations here and there, and one day by a teachers' convention. If we reduce this loss still further by six per cent. of absences by pupils, we find that more than one-sixth of the forty-week year has been subtracted, that is, we realize dividends on only eighty-three per cent. of our stock. This is a serious loss, and of course reduces the efficiency of the schools by so much. The summer vacation is constantly encroaching on the September end of the year. The vacationists, however, constitute only a small minority of school attendants. A week would be gained by beginning the school year on the Wednesday following Labor Day. Three days and often four would be added to the school year by changing the Rules so that those weeks should be vacation weeks in which Christmas, Washington's Birthday, and Patriots' Day occur. No more reason exists for making New Year's Day a school holiday than for making it a legal holiday. Moreover, more than a day is really lost by a holiday that comes in term time. It affects the work of the day before and of the following day.

It is a question whether the application of the no-school signal may not be limited in general to the four lower grades of pupils. Most grammar and high school students can reach school without suffering save in a very exceptional storm. There is much in habit when it comes to facing ordinary weather conditions. If the changes in the Rules suggested should be made, the schools would actually be in session thirty-eight and one-half weeks in 1908 and 1909, as against the yearly average of thirty-six and one-half weeks, a gain of two weeks of school work each year. The chief objection to the plan is connected with the restriction of the application of the no-school signal. Nevertheless, as a longer year with fewer interruptions is desirable, I recommend the plan to your consideration.

**School Population.** It is impossible to make an errorless registration of all children in the city between five and fifteen years of age. A special effort, however, has been made this year to do this, the enumerators sparing no pains in their work. The result is as follows:—

	1907.	1906.	Change.
Ward 1.....	2,008	1,974	+34
“ 2.....	2,607	2,569	+38
“ 3.....	1,095	1,148	—53
“ 4.....	1,001	986	+15
“ 5.....	1,910	1,908	+2
“ 6.....	2,054	1,979	+75
“ 7.....	1,623	1,504	+119
Total .....	12,298	12,068	+230

The census shows 12,298 children between five and fifteen years of age in the city, a gain of 230 since last year, one-half of which has been made in Ward Seven. At the same time, the registration in public and private schools was 12,615, a gain of 336 as compared with last year. The school registration is correct and reliable.

In October there were 313 children five or six years of age who were not attending school, kept at home by the choice of parents. Thirty children of the compulsory school age, between seven and fourteen, were permanently at home on account of ill-health. One hundred and three children fourteen years of age, that is, just above the compulsory requirement, were found to be at work. These children should be in school, but are set at work by parents, under stress of poverty in most cases.

On December 15 there were 12,488 children in the public schools and 1,735 in private schools, a total of 14,223.

Based on the number of children in the city as compared with the number in 1905, the present population of Somerville appears to be very nearly 72,000, one-fifth of whom are at the present time members of public or private schools.

**School Attendance.** The attendance at the public schools during the year is as follows:—

Whole number enrolled in 1907, 14,802. Of these there have attended only a part of the year, 2,893.

Entered Grade I. in September, 1,210. Graduated, 948.

Dropped out during the year to go to work, 321.

The remainder, 414, are transient pupils who have been in the schools only a part of the year, entering from other cities or towns, or removing from the city during the year.

The average membership of the schools has been 11,909, an increase of 147 for the year.

Six and one-fifth per cent. of these have been absent from the schools all the time, chiefly on account of sickness and the enforcement of quarantine rules, leaving an average daily attendance of 11,166, an increase of ninety-seven.

While the general effect of medical inspection in the schools will be to increase regularity of attendance, during this first year it is probable that the strict enforcement of the rules has increased absence. We look for improvement in this direction during the coming year.

There have been 4,162 cases of tardiness and 2,541 instances of dismissal in 1907. This sounds like a large number, but when we reflect that it means that every child has come late to school once out of 907 chances, or once in two and one-half years, or that he leaves his work before he ought to once in 1,486 times, or once in four years, the numbers take on new proportions.

Teachers are anxious, sometimes unwisely anxious, to secure punctuality and regularity of attendance, not only on ac-

count of the loss of time involved, but because they have to do with certain important elements of character. Parents often mistake their motives, and sometimes fail to co-operate as they might.

There have been 314 cases of the use of the rod during the year. This means that every twentieth schoolboy in Somerville has been punished once in 1907. There are some of our citizens who have suffered from juvenile depredations of one sort or another, who feel that an occasional chastisement of some of the remaining nineteen would not be wholly a miscarriage of justice. There is a constant effort on the part of teachers to govern by moral power alone. The number that succeed is growing larger year by year, but while human nature continues perverse and parental control constantly grows weaker, there must of necessity be an occasional resort to force, the sentimentalists to the contrary notwithstanding. With hardly an exception, punishment is calmly and judicially administered. Hardly any complaints have been received during the year of undue harshness on the part of teachers, but repeated instances of parental abuse of children have come to our notice. Teachers are to be congratulated on their methods of government and on the success that attends them.

**Additional Accommodations.** *High Schools.* The increase in the membership of the high schools predicted last year was realized in September, when 135 were added to the enrollment of the preceding year. There were in October a total of 1,614 high school pupils, 1,136 in the English and 478 in the Latin School. Seats enough were found in the Latin School for the forty extra pupils, but there were and are now no additional rooms that can be used by teachers for recitation purposes. There should be seventeen teachers in the Latin School, in addition to the principal, in order that justice may be done in the assignment of work. There are, however, but fifteen. If we should take for the Latin three additional rooms in the Annex now used by the English School, the present needs of the Latin School as far as room goes would be supplied.

The English School, however, not only needs these rooms, but at least three more rooms in order that its forty teachers may have facilities for class instruction. Two clothes closets and the old office have again been put into commission as recitation rooms. It will be remembered that the plan proposed in ex-Mayor Chandler's administration for increased high school accommodations included not only an annex to the Latin School, but a northerly wing to be added to the English building. In all probability provision must be made by September, 1910, for at least 1,900 high school pupils, divided between the schools in the same proportion as at present. Whenever an attempt is made to increase existing accommodations, something more than mere

seating facilities should be provided. There are certain things that must be secured to the high schools if their efficiency is to be maintained and our city be found abreast of other cities of the Commonwealth in the provision that it makes for high school necessities. These needs have so often been set forth in detail that nothing more than the following brief mention of them is now needed:—

(1) Suitable quarters for manual training with a view to its extension.

(2) Enlarged facilities for commercial work.

(3) A readjustment of seats and the release of the lecture hall for its original purposes.

(4) More room for the library.

(5) Thoroughly-equipped gymnasiums for both sexes.

(6) Additional room for the chemistry and physics departments.

(7) Facilities for the teaching of domestic science.

(8) A suitable lunch room accessible to both schools.

(9) More convenient toilet rooms for pupils.

(10) Dressing rooms for teachers.

(11) Larger book and supply rooms.

(12) An assembly room large enough to accommodate an entire school.

In this connection due attention must be paid to changing educational conditions and to the constantly-growing demand that schools must fit their students for vocational pursuits. The commercial and industrial side of the high school is sure to develop more rapidly than the purely academic, and provision must be made therefor.

Whatever is to be done to relieve the situation should not only regard present needs, but should be adequate to meet those of the next twenty-five years. There is ample room in the rear of the English School for an enlargement that shall more than duplicate the present building. With four clear stories on its northerly side, room can easily be provided for manual training shops, for gymnasiums, and for all the other necessities enumerated above. The expense should not deter, for the example of other municipalities may well be followed. They have been granted permission by the Legislature to issue twenty-year bonds to meet similar expenditures. Is it not perfectly legitimate to ask the future to share the financial responsibility incurred to provide educational facilities that are to serve for generations?

The problem demands an immediate solution, for at the best relief cannot be provided in less than two years.

**School Accommodations, Elementary Schools.** *Ward One.* Ward One has four school buildings, containing thirty-four rooms, occupied by 1,593 pupils, under the charge of forty-one teachers, an average of 46.9 pupils to a room. An addition of

four rooms to the Hanscom School is nearly completed, and will be occupied in January. For seven years 100 first-grade children in the Prescott School have been on half-time, and for two years fifty children of the same grade in the Hanscom School have lost one-half of the school time rightly belonging to them. The new rooms provided will secure an all-day session to all pupils within their radius, and will terminate the congestion concerning which so much complaint has been made. The schoolhouses in this district will be fully adequate to meet the probable needs of the next five years.

*Ward Two.* This ward has three school buildings, containing twenty-four rooms, occupied by 1,167 pupils, under the charge of twenty-eight teachers, an average of 48.6 to a room. In this count the ward room in the Knapp School is not included, although this is the second year of its use as a regular classroom for fifty first-grade pupils. It is ill adapted for this purpose, and is used because nothing more suitable is available. In the Baxter School seventy-five children are on half-time. These children, whose ages run from five to twelve, and many of whom are ignorant of English, are deprived of one-half of their legitimate school session in order that thirty children of four years of age may enjoy the supposed advantages of kindergarten training. Without questioning the value of kindergartens where school accommodations are plentiful and financial requirements easily met, it will not be denied that it is short-sighted economy and a perversion of educational rights to pay a thousand dollars a year for the benefit of thirty four-year-olds, while for seventy per cent. of that sum seventy-five six-year-olds could be given twice the school time that they now enjoy. This kindergarten should be suspended, and the room used for first-grade children and for the relief of a seriously-crowded second-grade room. The majority of children in the Baxter School at the best have a brief school life, and all they learn must be crowded into the few years coming before the limit of the compulsory school age. The increase of pupils in this district emphasizes the request made last year for an addition to the Perry Schoolhouse. Six rooms should be added to the building to provide for the establishment of another grammar school centre containing the nine grades.

*Ward Three.* There are in Ward Three three schoolhouses, containing twenty-eight rooms, occupied by 1,203 pupils, under the charge of thirty teachers, an average of forty-three pupils to a room. There has been little change for a dozen years in the school population of this district, and present accommodations are ample for all present and prospective needs.

*Ward Four.* This ward has two school buildings, containing twenty-four rooms, occupied by 1,069 pupils, under the charge of twenty-seven teachers, an average of 44.5 pupils to a room. It is no longer necessary to use the ward room in the Glines, the

transfer of pupils to the Forster School rendering this unnecessary. One room in the Glines building has been taken for a manual training centre, and is no longer available for ordinary school purposes. An increase in the school population of the northerly part of this ward is probable in the near future, but relief may be found in the Hanscom addition. No immediate expenditure for school buildings will be required in this ward.

*Ward Five.* There are two schools in this ward, having thirty-four rooms, occupied by 1,489 pupils, with thirty-six teachers, an average of 43.8 to a room. The school census for the last three years shows no variation in the numbers in this ward,—the figures running 1,911, 1,908, and 1,910. It is probable that the present accommodations will be sufficient for several years to come.

*Ward Six.* This ward has six school buildings, containing fifty-five regular classrooms, with 2,607 pupils, under the instruction of sixty-one teachers, an average of 47.4 to a room. This enumeration includes, as one room, two small rooms in the Carr building originally designed for recitation rooms, but which for several years we have been compelled to use as classrooms. These rooms are dimly lighted and practically unventilated. Twenty-four children are crowded into each of these rooms, and a teacher is provided for each room. This entails an expenditure of \$1,300, twice as much as would be necessary if a proper classroom were provided. These rooms have been pronounced unfit by the medical inspector of the school, and their use should be abandoned. By sacrificing the westerly entrance of the school-house, which is used only for fire drill purposes, these two rooms could be put into one well-lighted and well-ventilated school-room. This could be done for the salary now paid the superfluous teacher for a single year.

Pending the completion of an addition of four rooms to the Brown School, we have been compelled to place the first grades in the Burns and Brown Schools on half-time. It is expected that these new rooms will be ready for occupancy early in January. This addition, while only half as large as the prospective needs demand, will accomplish several desirable things.

(1) It enables us to open another full-grade grammar school centre, with a master at its head. Ward Six has had but two grammar masters, although its pupilage outnumbers that of Wards Three and Four together, where four grammar masters are in service.

(2) It enables us to dispense with half-time conditions in the Burns, Brown, and Hodgkins Schools.

(3) It releases six assistants from service whose aggregate salaries are nearly \$2,500.

(4) It temporarily relieves the congestion in the Lincoln School.

(5) It removes a ninth-grade class from the Highland School, where for several years there have been three ninth-grade classes,—a condition to be deprecated.

*Ward Seven.* This ward has four schools, containing thirty-six regular classrooms and 1,776 pupils, in charge of forty-two teachers, an average of 46.7 to a room. I have not included two rooms in the Hodgkins School, one the basement ward room, and the other a small room which furnishes seating accommodations for half a class, and which requires the services and salary of a whole teacher. For economical reasons, if for no other, at least one of these rooms should be abandoned. The needs of Ward Seven for the immediate future demand additional accommodations.

The mistake of the past should not be repeated. We have heretofore built to relieve urgent present needs, with little regard to the future. Instead of a small structure that tides over the present emergency, we should build with the prospective demands in mind. An enlargement of the Lincoln School building, if feasible, would afford only temporary relief. Even six rooms added to the Hodgkins would be prospectively inadequate. A location convenient and suitable in every way can readily be found on the old ledge lot on the proposed extension of Cameron and Packard avenues, midway between Broadway and Holland street. Here should be erected a building of twelve or fifteen rooms, with an ample assembly hall for public as well as school convenience. Such a building can be easily reached, and will apparently serve the needs of the ward for many years. A portion of the expense may be transferred to the future, as in the case of the high school enlargement.

*To recapitulate* the requirements for additional school accommodations, there are needed:—

(1) An adequate enlargement of the English High School building.

(2) An addition to the Perry School that shall duplicate its present accommodations.

(3) A twelve or fifteen-room building located on the city ledge lot in Ward Seven.

**Teachers.** There are now 337 teachers employed in the city, not including sixty at work in the evening schools. Thirty-two of these are men. Fewer changes than usual have occurred during the year in the teaching corps. Eighteen teachers have resigned, and one has died. Nine of our best teachers have left us for positions in other cities that offer stronger professional and financial inducements. Seven have resigned to be married. One, Miss Gorda N. Bean, of the Bell School, an excellent and well-beloved teacher, died suddenly on December 6. Miss Anna E. Sawyer retired from teaching during the year, after a

faithful and efficient service in our schools covering an unusual period of thirty-four years. Twenty-five teachers,—four men, twenty-one women,—have been elected during the year. According to custom, these new teachers have been carefully selected, all but two having had successful experience that justified the payment of the maximum salary from the outset.

Four of the eighteen teachers who resigned in 1907 taught in Somerville an average term of eleven years, the length of service of the remaining thirteen averaging four years and two months. In this latter list all of those who left us for better positions are included. It is difficult in the nature of things to secure permanency of service from teachers. The chief cause of the present instability is found in the fact that so many yield to the allurements of matrimony. Of the 114 teachers that have resigned during the last five years, fifty-five, or forty-eight per cent., have been married, and fifty per cent. of the remainder have left us for financial considerations. We must probably expect losses from these two causes in about the same proportion annually. We may possibly retain teachers longer by larger salaries. It will be in the interests of the schools to do this, for it is growing constantly more difficult to replace teachers that can command larger salaries by those equally good. Whatever other inducements we can offer for longer service should be made. In this connection I wish again to call attention to the plan of allowing long-service teachers a year or part of a year once in a while for travel and study, on half-pay, and to permit teachers who have been twenty years or more in service to retire from teaching for a year simply for rest, under the same conditions. Experience elsewhere shows that this provision entails a relatively small expenditure, but results in increased efficiency on the part of valuable teachers, and has a tendency to prolong the period of service. Occasionally a teacher now does one of these two things, but the great body of teachers cannot afford the expense, many of those most needing the change being the least able.

**The Latin School.** The membership of this school has risen from 432 to 480 within a year, an increase of forty-eight, without any change in the teaching force. This number is divided among the classes as follows:—

	1906.	1907.	Change.
Senior .....	83	102	+19
Junior .....	101	107	+6
Sophomore .....	124	109	—15
Freshman .....	124	162	+38

With the head master, there are fifteen teachers in the school, six of whom are men. Including the principal, who teaches two-thirds of the time, the average class unit is thirty-two. Some of the classes are small, and others number almost forty. This is altogether too large a quota for each teacher, but

the number is compulsory rather than optional, for there is no room for additional teachers to work. Indeed, even under existing conditions, either the assembly hall or the library room is frequently used for recitation purposes. By good rights the Latin School should use four additional rooms in the Annex. But such rooms cannot be taken without forcing the English School to the wall. This is one urgent reason for the enlargement of the English School building.

There has been but one change of instructors during the year. Miss Pratt, the head of the English department, left the school for professional advancement. Her place was taken by Miss Gertrude M. Hall, a teacher in the Winchester High School and a graduate of Wellesley, '97.

Seventy-five pupils were graduated from the school in June, fifty-one of whom entered college or technical schools,—an unusually large proportion.

The standing of the school among institutions that fit for college is unsurpassed. Its graduates take high rank wherever they go, and reflect honor not only upon the school and its teachers, but upon the city as well. The numbers pursuing each study is shown in the following table:—

English .....	475	French .....	117
History .....	269	German .....	196
Mathematics .....	480	Greek .....	112
Physics .....	55	Drawing .....	21
Latin .....	470	Chemistry .....	12

Thirty more pupils would take chemistry if there were room for them.

The following table shows the extent to which pupils drop out of the school during their four-years' course:—

**TABLE SHOWING LOSSES OF CLASSES IN LATIN HIGH SCHOOL EACH YEAR.**

MEMBERSHIP.	Class of 1902.	Class of 1903.	Class of 1904.	Class of 1905.	Class of 1906.	Class of 1907.	Class of 1908.	Class of 1909.	Class of 1910.	Class of 1911.

\*Gain.

**The English School.** Eleven hundred eighty-one pupils have been members of the school since the opening of the term in September. Seventy-seven of these have dropped out, leaving

at the present time a membership of 1,104, fifty-six more than there were a year ago at this time. They are classified as follows:—

	1906.	1907.	Change.
Post-graduate .....	7	12	+5
Senior .....	162	164	+2
Junior .....	194	205	+11
Sophomore .....	286	301	+15
Freshman .....	399	422	+23

There are forty teachers, exclusive of head master and secretary, eleven of whom are men, three of them being employed in the manual training department. The average number of pupils to a teacher is twenty-six and three-fourths.

Four new teachers were added to the corps in September:—

Albert I. Montague, Amherst, '96, mathematics.

Mary E. Hadley, B. U., '96, Latin, English, and history.

Winifred E. Howe, B. U., '01, English.

Flora E. Anderson, Chandler Normal Shorthand School, '03, commercial department.

The school lost one teacher, Miss Ella A. Newhall.

Since September the school has been handicapped by crowded conditions. Three teachers have been obliged to use rooms wholly unsuitable for recitation purposes. The manual training department has been so crowded that one section has been obliged to attend in the afternoon from two o'clock to four, Mr. Jaynes being employed as instructor. The chemistry department has been taxed to its utmost. Twelve Latin School pupils are taking the chemistry course. Others were excluded on account of lack of room. The commercial department has been full to overflowing. Notwithstanding these disadvantages, the work of the school has been pushed energetically, and its high standard fully maintained.

As before stated, seventy-seven members of the school have dropped out since the opening of the term. While there has always been a loss of pupils during the first of the year, this year shows an exceptional number. It is difficult to account for this. Many of the entering class come into the school with no well-defined purpose and with no disposition to make studious application to work. They easily become disheartened and fall out. The following tabulation shows losses by classes, and also, as far as can readily be ascertained, by causes:—

Summary of Causes.		Summary by Classes.			
		Girls.	Boys.	Total.	
Work .....	16				
Other schools.....	13	IV year .....	3	6	9
Ill health or home needs... 15		III year .....	5	6	11
Moved .....	7	II year .....	12	5	17
Cause unknown.....	} 26	I year .....	26	14	40
Indifference .....			—	—	—
	—		46	31	77

This diminution of numbers during the first year is not peculiar to this school, but is a matter of general observation and complaint. No efficient remedy has yet been found. The following table shows the losses that the school has sustained during the last ten years.

**TABLE SHOWING LOSSES OF CLASSES IN ENGLISH HIGH SCHOOL EACH YEAR.**

MEMBERSHIP.	Class of 1902.	Class of 1903.	Class of 1904.	Class of 1905.	Class of 1906.	Class of 1907.	Class of 1908.	Class of 1909.	Class of 1910.	Class of 1911.

Physical geography . . . . .	33	Music . . . . .	1,035
Mechanical drawing . . . . .	358	General science . . . . .	355

**Elementary Schools.** There are now in these schools 10,710 pupils, 147 more than a year ago. They are classified as follows:—

Grade	1907.	1906.	Change.
Grade 1 . . . . .	1,532	1,526	+6
“ 2 . . . . .	1,384	1,473	—89
“ 3 . . . . .	1,375	1,352	+23
“ 4 . . . . .	1,337	1,292	+45
“ 5 . . . . .	1,239	1,240	—1
“ 6 . . . . .	1,201	1,109	+92
“ 7 . . . . .	1,022	1,003	+19
“ 8 . . . . .	831	872	—41
“ 9 . . . . .	789	797	—8

In June last 725 were graduated from the grammar schools, eighty-five more than last year. Of these, 561, or 77.4 per cent., entered the high school, 414 going to the English and 147 to the Latin.

The number of graduates was larger than ever before. Of the 1,183 in the class in the fifth grade, we have succeeded in holding sixty-two per cent. for graduation and about one-half for entrance upon high school work. The remainder dropped out as follows: From Grade 5, 49; Grade 6, 131; Grade 7, 86; Grade 8, 120; Grade 9, 72; at graduation, 164.

This large loss of pupils from the upper grammar grades is a serious matter, a remedy for which is being diligently sought in educational circles. Similar conditions prevail in many communities. During the year we have issued 386 working certificates to minors under sixteen, 300 of which have been given to grammar school boys and girls from the five upper grades. None are issued to those under fourteen. From these grades children fourteen and fifteen years of age are constantly dropping out to go to work. The chief impelling cause is doubtless financial needs in the home. Another cause is lack of interest in school work, a feeling that it is contributing little to an equipment for wage earning. A few more leave school rather than repeat the year's work. Most of this class are poorly qualified for any permanent productive work. Because they can do no better, they gladly take manual or mercantile work requiring little or no skill or scholastic attainment, at small pay. As they grow older, they feel the need of more money. They change employers for an additional dollar a week now and then, drifting with nothing permanent in view, until they finally settle down in the ranks of unskilled labor, ranks already crowded, although the demand for skilled labor is unsupplied.

**Industrial Education.** It is facts such as these, in part, that have given rise to the widespread movement for industrial or trade schools. An urgent need exists for institutions that shall receive boys and girls from fourteen to eighteen years of age and for a year or more give them training for some productive mechanical pursuit in which skilled laborers are needed and in which they may earn a comfortable living and find a life occupation. This matter was fully presented in last year's report. The State Industrial Commission is actively engaged in perfecting plans to meet the demand, and has invited the co-operation of municipalities. The suggestion has been made that several contiguous cities and towns unite with the state in the establishment and maintenance of such schools. For example, Cambridge, Somerville, Watertown, Arlington, and Belmont might unite as a district in a location accessible to all, and each contribute its quota of that half of the expense which the State does not pay.

The question is a large one in all its phases, educational, sociological, and industrial. It is in the hands of able experts, and out of their investigations let us hope some scheme will be evolved to meet the needs of the pupils who are forced by circumstances out of school and into the overcrowded field of unproductive labor.

**Kindergartens.** The kindergartens in the Hanscom, Bennett, Baxter, and Glines Schools are still in operation, although the attendance has fallen off in two of them. The entire cost of these kindergartens for the year was \$3,956.03, or \$21.62 for every child that attended.

The details are as follows:—

	Hanscom.	Bennett.	Baxter.	Glines.	Total.
Enrollment . . . . .	106	109	101	94	410
Average membership . . . . .	46	52	42	43	183
Average attendance . . . . .	41	43	35	39	158
Per cent. attendance . . . . .	87.9	82.7	83.5	89.3	86.3
Age . . . . .	4—7	4—8	4—5	4—7	4—7

**Evening High School.** The evening high school opened its third year in October, 1906, under the principalship of George W. Earle, of the English School. The experience of previous years was in the main repeated. Six hundred and thirty-one different students were in attendance. The average attendance dwindled from 240 in October to 139 at the time of closing. The instructors, in point of ability and experience, were the equal of those employed in our day high schools, and the advantages for the brief time were equal to those enjoyed by regular high school pupils. If some way can be discovered of excluding those whose interest is shallow and transient and whose membership is brief, there will be a decided gain to the school. The cost of the school was \$0.352 per pupil for each evening. The aggregate cost of instruction was \$3,787.25. The cost of supplies, janitor's services, and light was \$1,014.56. Total, \$4,801.81.

The school closed the first of March and re-opened on the second Monday of October, 1907, with the same principal and practically the same corps of instructors.

Instead of running the school in two sections for four evenings a week, giving to each section two evenings only of work, at the present time the school holds its sessions three evenings a week, and every student is expected to be present each evening. Thus far this change has proved decidedly advantageous, the attendance being more regular and the work accomplished being

increased by one-half. Besides, the expense has been materially lessened.

The great majority of the young men and women in attendance are fitting themselves better to perform the duties of the positions they now hold or to secure advancement. They are ambitious, interested, and apply themselves diligently to the business in hand. The work done by this school justifies its existence.

The cost of instruction per pupil per evening thus far this year has been \$0.191, as against \$0.254 last year.

**Elementary Evening Schools.** In these schools, as in the high school, the term of 1906-1907 was shortened by closing at the end of February, in order to make expenditures and appropriations harmonize more nearly. The amount thus saved was about \$1,600. The enrollment in the four schools was 917, with an average attendance of 328, or 35.8 per cent. The total expenditure was \$5,312.99, or \$0.213 per pupil per evening.

The attendance at these schools at the present time is larger than ever before, and the interest is better maintained. The number of non-English-speaking students is constantly increasing, and at present constitutes about one-half of the whole number. All must recognize the importance of teaching these uneducated foreigners to use the language of their adopted country and of training them in some of the primary duties of citizenship. Certainly whatever can be done to safeguard the community against the perils that naturally inhere in the addition of a heterogeneous people to our population should be done. Our evening school work might easily be broadened in its scope, and its term should certainly be lengthened rather than shortened.

**Vacation Schools.** It is unfortunate that the stringency in the city's finances has rendered it inexpedient to open vacation schools for the last three years. It is coming to be more and more recognized that the responsibility of the city for the restraint, control, and education of its children is not limited to the forty weeks of the school year. In Somerville, as in most large cities, there are thousands of children that spend the ten weeks of the summer vacation at home. Much of their waking time is spent, as it ought to be, out of doors. In the absence of useful occupation and the direction of their sports, and without playgrounds to which they may resort, they roam the streets in aimless idleness. It is not strange that they get into mischief, that they trespass on the rights of property holders, that vicious habits are formed, and that their moral status falls far below what it might otherwise be. For these reasons school authorities and all others interested in social betterment are everywhere doing what they can to control the activities of children during vacation periods, and to give useful direction thereto. Whatever concerns children either in school, at work, or at play is a

subject of public interest and activity. Just now playgrounds for children are receiving special attention. Play is the normal occupation of childhood. It is recognized that play, properly supervised and directed, has an educational and an ethical, as well as a hygienic value. Hence there has arisen a widespread movement to provide playgrounds near schools and homes, suitably equipped with gymnastic and play apparatus, and placed under the direction and control of competent supervisors. Under special authority from the Legislature, Boston has this year spent \$60,000 for these purposes, and the good work has only been begun. General enactments have given municipalities in other states authority to make similar expenditures. While we may not have the legal right to spend money for these purposes, the subject should receive attention, public interest in it should be aroused, and ways and means found to provide play facilities for the hundreds of Somerville children that will be vastly benefited thereby.

Through the generosity of one of our leading corporations, an example has been given of what may be done. The old Prospect Hill School lot has been utilized, an inexpensive equipment furnished, and a director supplied during the months of July and August. In other sections of the city schoolyards might be provided with swings, see-saws, parallel bars, sand-heaps, and other similar means of amusement and training at small expense. Young women could be found to act as directors. The school buildings might be opened for reading, music, story-telling, and simple hand work. Somerville has generous citizens, who would doubtless gladly give financial aid. In this work some of our women's clubs would find ample opportunity for their activities.

It is easy to retrench by eliminating vacation schools and shortening the term of evening schools. The loss may not be immediately apparent, but it is no less real. Through these agencies we reach a class greatly in need of influences that make for good citizenship. Neglected, they become a menace. Properly cared for, they make more or less helpful elements of our population.

**Cost of the Schools.** The total amount spent for the maintenance of the schools of Somerville in 1907 is \$340,852.07. This does not include the sums spent on schoolhouse repairs and for new buildings. It does cover the amount paid for the care of school buildings, for janitors' services, fuel, light, and school telephones. This expenditure is wholly in charge of the city government.

The amount paid for janitors is.....	\$23,999.00
The cost of fuel is.....	15,235.48
The cost of light is.....	3,760.08
The cost of the school telephones is.....	433.07

A total of.....	\$43,427.63
The cost per capita.....	3.65

The second important expenditure is wholly under the control of the Board, and is covered by what is known as the "School Contingent" appropriation. The following is the itemized account:—

Officers' salaries.....		\$5,500.00
Books .....	\$6,743.44	
Stationery .....	4,931.63	
Laboratory and manual training supplies,	3,396.60	
Printing .....	1,479.10	
Graduation exercises.....	1,159.59	
Drawing supplies.....	853.28	
Bookbinding .....	2,175.70	
Writing books.....	535.65	
Stereoscope pictures.....	625.41	
Typewriters and typewriter supplies.....	357.21	
Truant officer's horse.....	240.00	
Express and postage.....	222.01	
Board of truants.....	597.44	
School census.....	246.20	
Office telephones.....	182.32	
Kindergarten supplies.....	89.53	
Miscellaneous supplies.....	482.22	
		<hr/>
Total for school supplies, etc.....		24,317.33
		<hr/>
Total outlay on school contingent account....		\$29,817.33
Appropriation .....		27,000.00
		<hr/>
Deficiency .....		\$2,817.33
Received for damage to school property, tuition of state wards and non-residents, etc.....		482.01
		<hr/>
Net deficiency.....		\$2,335.32

The estimate of the committee for school contingent expenses was \$29,000. This sum was exceeded by \$335.32.

The third, and by far the largest, element of the cost of schools is the sum spent for the salaries of teachers. The following shows the monthly payments:—

January .....	\$27,183.93
February .....	27,323.13
March .....	25,645.75
April .....	25,613.56
May .....	25,648.32
June .....	25,576.26
September .....	26,388.42
October .....	27,506.12
November .....	28,393.50
December .....	28,328.12
	<hr/>
Total .....	\$267,607.11
Amount of appropriation.....	265,000.00
	<hr/>
Deficiency .....	\$2,607.11
Credit .....	6.00
	<hr/>
Net deficiency.....	\$2,601.11

The estimate of the School Board for teachers' salaries amounted to \$272,522.50. The expenditure was \$4,915.39 less. This amount was saved by the early closing of the evening schools, the omission of vacation schools, the employment of teachers at salaries below the maximum, the employment of a smaller number of cadet teachers than was expected, and by the non-employment of teachers for backward pupils.

The total outlay for all school purposes in 1907 was as follows:—

Teachers' salaries.....	\$267,607.11
Administration .....	5,500.00
Care of schoolhouses.....	43,427.63
School supplies.....	24,317.33
Total for school maintenance.....	\$340,852.07
Paid for repairs.....	18,007.85
Paid for new buildings.....	31,804.34
Total for all school purposes.....	\$390,664.26

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

	1902.	1903.	1904.	1905.	1906.	1907.
Teachers' salaries....	\$0.800	\$0.781	\$0.793	\$0.792	\$0.792	\$0.785
Administration .....	0.017	0.013	0.016	0.013	0.016	0.016
Janitors' salaries....	0.073	0.070	0.070	0.070	0.070	0.070
Heat and light.....	0.042	0.067	0.053	0.061	0.052	0.057
School supplies.....	0.068	0.069	0.068	0.064	0.070	0.072
Total .....	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000

**Per Capita Cost.** The proper method of comparison of the cost of schools year by year is to consider the sum spent for each pupil in the average membership. In this computation we exclude the cost of evening schools, the sum being so large as possibly to mislead. The following shows

**THE PER CAPITA COST OF DAY SCHOOLS FOR 1906 AND 1907.**

	High Schools.			Grammar and Primary Schools.			All Day Schools.		
	1906.	1907.	Increase.	1906.	1907.	Increase.	1906.	1907.	Increase.
Instruction . . . .	\$43 82	\$44 07	\$0 25	\$18 94	\$19 24	\$0 30	\$21 82	\$22 30	\$0 48
Supplies . . . . .	4 73	5 44	0 71	1 50	1 52	0 02	1 88	2 01	0 13
Care . . . . .	3 75	4 21	0 46	3 22	3 35	0 13	3 28	3 46	0 18
<b>Total . . . . .</b>	<b>\$52 30</b>	<b>\$53 72</b>	<b>\$1 42</b>	<b>\$23 66</b>	<b>\$24 11</b>	<b>\$0 45</b>	<b>\$26 98</b>	<b>\$27 77</b>	<b>\$0 79</b>

Including the cost of maintenance of evening schools, the per capita cost will be as follows:—

	1904.	1905.	1906.	1907.
Cost of instruction.....	\$23.03	\$22.50	\$22.63	\$22.93
Cost of supplies.....	1.93	1.74	1.92	2.04
Cost of care.....	3.52	3.63	3.45	3.65
Total .....	\$28.48	\$27.87	\$28.00	\$28.62

The examination of these tables shows that we have paid twenty-five cents more for the instruction of each pupil in the high school than in 1906, and seventy-one cents more per pupil for supplies. This increase is due to the employment of three additional teachers in the English School and to supplies necessary to meet an increase of 106 in the membership of the high schools.

The grammar and primary schools have cost thirty cents per pupil more for instruction, and two cents for supplies. Eight cents of this increased cost of instruction is chargeable to manual training, and the remainder to the employment of assistant teachers in large classes and one extra teacher. The increased cost of supplies is due to the unusually large bookbinding bill.

Considering all day schools together, the increase of cost has been seventy-nine cents, forty-eight cents of which is for instruction, thirteen for supplies, and eighteen for the increased cost of the care of school buildings. Adding the cost of evening schools to that of day schools, we increase the cost of instruction by sixty-three cents, the cost of supplies three cents, and the cost of the care of school buildings nineteen cents. This makes the total cost for 1907 \$28.62 per capita, as against \$28 for 1906. In 1906 there were seventy-six cities and towns in the Commonwealth in which the per capita cost was larger than it was in Somerville. The cost of maintaining our schools in 1906 was \$5.46 for every thousand dollars of the city's valuation, but there were 145 cities and towns in the state that paid a higher rate. This year the maintenance of the schools in Somerville has taken \$5.54 of the \$12 allowed for the maintenance of all departments in the city.

The salaries paid to teachers in January, 1908, are as follows:—

1 man .....	\$3,000	24 women .....	\$900
1 man .....	2,600	2 women .....	850
1 man .....	2,000	2 women .....	825
10 men, 2 women.....	1,900	3 women .....	800
1 man .....	1,850	16 women .....	775
1 man .....	1,800	9 women .....	725
6 men .....	1,700	194 women .....	700
2 men .....	1,600	11 women .....	650
3 men .....	1,500	12 women .....	600
2 men .....	1,400	2 women .....	525
1 man .....	1,300	1 woman .....	500
3 women .....	1,200	5 women .....	425
3 men .....	1,100	3 women .....	350
1 man, 12 women.....	1,000	3 women .....	200

A careful estimate shows that for 1908 the school expenditures will be:—

For teachers' salaries.....	\$291,424.38
For contingent expenses.....	28,500.00
Total .....	<u>\$319,924.38</u>

**Schoolhouses.** There have been no recent public criticisms upon the sanitary conditions of school buildings. With hardly an exception, they are in excellent condition, well cared for, and perfectly healthful. During the year the ordinary repairs have been made, and in several buildings the walls have been tinted. The heating and ventilating apparatus of the Pope School has been entirely changed by the substitution of steam heat and a ventilating fan, in place of furnaces and the gravity system which had for years yielded such unsatisfactory results.

There are two respects in which some of our school buildings should be improved. Attention has been frequently called to them, but they are mentioned once more that they may not be forgotten.

1. The lighting of the Prescott, Bell, Forster, and Morse Schools should be improved by the addition of extra windows in most of the rooms. A visit to any of these buildings on a dark day would convince any one that an attempt at sight-work would be perilous. I certainly hope that the work of improvement in this respect may at least be begun this year.

2. The old-fashioned furniture still remaining in many of the rooms should be replaced by that which is adjustable to the size of pupils. This is in the interest of the health and comfort of children. The desirability of this change is so obvious that I am sure the new furniture will be substituted as rapidly as financial conditions will warrant.

The fire escape on the Bell Schoolhouse has at last been completed, although no attempt has been made to use it in connection with the fire drill. The practice of the fire drill, in accordance with an amendment to the Rules, recently adopted, absolutely removes all danger of panic in emergency, and secures the safety of the children in any case of danger that is likely to arise. Any building in the city may be emptied of pupils within two minutes without disorder or excitement.

**The Training of Teachers.** Twenty-five years ago it was thought that graduation at a high school sufficiently equipped a young woman for teaching. Now the demand everywhere is for teachers that have supplemented this academic education by two years of professional training at normal schools. The standard of qualifications for teaching has been greatly raised. There must be added to the requisite amount of academic knowledge the study of the mind and character of children, of the history and theory of education, and of the best methods of instruc-

tion. Theories must be tested by experience. The self-confidence of the fresh normal school graduate must be tempered by facing the realities of a schoolroom.

In Somerville we have for years employed only trained teachers who have had sufficient experience in teaching to place their ability and success beyond question. Most teachers who have come to us have been paid our maximum salary at the outset. This principle of selection underlies whatever of excellence our schools may possess. The rare exceptions to the rule have only emphasized its wisdom. There has always been a strong feeling in the community that Somerville women should be employed in Somerville schools. This feeling has been chiefly confined to those who have friends or relatives needing employment. It has not been shared by the more intelligent portion of the community, who consider the demands of the schools as paramount to personal considerations. Nevertheless preference has been given, when other things have been equal, to the graduates of our own schools. This is evidenced by the fact that during the last fifteen years nearly a hundred of our own residents have been given positions as teachers. The state has established ten normal schools, in which young men and women who desire to qualify for teaching can receive gratuitous instruction and training. These schools are rarely crowded. Occasionally a city whose residents cannot easily reach one of these schools has established a training school, which serves as an indifferent substitute. Some of our own graduates hesitate to leave home to secure experience in other towns or cities whose financial status compels the employment of cheap teachers. This has given rise to a call for some sort of training school that shall give experience that will enable a normal school graduate to work successfully in our city schools. This matter has been fully discussed at one time or another, and a year ago this discussion materialized in a plan for the employment of what are called cadet teachers. (See Appendix I. for details of the plan.) These young women are to be employed in different schools for a year at a small salary, under the direction of experienced principals and teachers. The number is limited by the Rules to twelve. Only three candidates presented themselves at the beginning of the year. They are now at work in the schools.

It is too early to pronounce upon the success of the plan. Its great weakness is that the cadet has no opportunity for the independent management and discipline of a class. It is in these respects that young teachers are generally weak. Nevertheless the plan should receive a fair trial before it is abandoned.

**Truancy** • The following shows the record for the year :—

	1906.	1907.	Decrease.
Number of visits to schools.....	511	474	37
Number of cases investigated.....	502	499	3

Number found to be truants.....	151	94	57
Number sent to truant school.....	6	9	+3
Paid for board of truants.....	\$117	\$597	+\$180

It does not appear that this vice is growing in the city. Constant vigilance is required for its restraint. What is demanded is not the punishment of the offender, but his reformation. Truancy, while not a venial offence, tends towards immorality and crime. For many a boy it is the start down hill. It has its origin in unfortunate home environment, or failure on the part of the schools to furnish that which meets the truant's needs and interests. Like other juvenile offenders, he must have sympathetic treatment so positive in character as not to be mistaken for leniency or weakness. There is now and then an inveterate case, curable only by harsh methods, but in the main truants are amenable to the patient and persistent efforts of those who can secure their confidence and friendship.

For many years we have been fortunate in having the service of a single faithful and efficient officer who has done for Somerville what four such officers are just able to do for our sister city, Cambridge. If we are to attempt the reformation of truants by modern methods, our force must be increased. Promptness in dealing with offenders is needed, and it often happens that while the officer is scouring West Somerville for a boy in hiding, in the east end or in some other distant locality two or three are reveling in conscious immunity. But it is not enough to return the boy to school or hale him to court. The home must be visited, parental co-operation secured, or its education attempted. The boy himself must be studied and every case diagnosed that the proper remedy may be applied. Early morning or late evening visits are often needed. All this requires more time and effort than one man can find available. Hence another truant officer is imperative, a man fitted by nature and experience for the delicate and responsible service he is to render. I therefore recommend the employment of another active truant officer.

**Stamp Savings.** In June last the stamp savings system concluded five years of activity in Somerville. The results of these five years are shown in the figures below:—

#### YEARLY TOTALS.

Year.	Collections.	Dividends.	Total.
1902-3 .....	\$15,135.59		\$15,135.59
1903-4 .....	9,069.80	\$187.75	9,257.55
1904-5 .....	8,056.80	129.90	8,186.70
1905-6 .....	7,503.01	62.58	7,565.59
1906-7 .....	8,043.48	138.78	8,182.26
Total for five years.....	\$47,808.68	\$519.01	\$48,327.69

## REDEMPTIONS.

	Banked.	Cashed.	Total.	Dividends.	Total.
1st year . . . . .	\$8,069.85	\$3,152.46	\$11,222.31		\$11,222.31
2nd year . . . . .	6,060.91	2,927.90	8,988.81	\$71.74	9,060.55
3rd year . . . . .	4,754.46	3,116.47	7,870.93	48.00	7,918.93

5th year . . . . .	4,070.13	3,060.41	7,130.54	85.00	7,215.54
Total . . . . .	\$27,421.30	\$15,179.43	\$42,600.73	\$266.39	\$42,867.12
		Balance May 1, 1907 . . . . .			5,460.57
					<u>\$48,327.69</u>

Adding to the total collections \$2,971.54, the amount thus far collected since September, 1907, the grand total of collections is found to be \$50,780.22. These results imply much gratuitous labor and sacrifice on the part of the officer of the Associated Charities having the matter in charge, and her assistants. It also means a great deal of effort, time, and perplexing work on the part of principals and teachers. Its most important meaning, however, is to be found in habits of thrift that have been formed, in lessons on the value of money and the importance of saving by littles, and in the positive financial advantages accruing to the thousands of children who have shared its benefits. Teachers naturally feel that every obligation imposed upon them by duties that really lie outside of their legitimate work makes a serious addition to a burden that threatens to become too heavy to be carried. Not only their desire, however, to be loyal to requirements, but their wish to promote the interests of the children placed under their charge leads them cheerfully to bear it. The following quotation from an article by one of our own English High School teachers in the current number of *Education* is so timely and pertinent in this connection that I think it worthy a place in this report:—

“No less unfortunate seems the growing tendency to make the public school teacher the medium for all sorts of investigations and reforms, excellent in themselves, but hard to reconcile with the other demands on her time and strength. Statistics, medical inspection, free text-books, red-tape of all kinds, a thousand interruptions, often seem to a teacher with any conscience as to her work like the veritable fiend that troubled Launcelot Gobbo, ‘Well, my conscience says, “Launcelot, budge not”; “budge,” says the fiend; “budge not,” says my conscience.’ It is not the work of teaching, but such conflicting claims that sap the strength of the public school teacher, sending her home at night too weary to make adequate preparation for the morrow. She does not beg for sympathy; she does not ask an easier life, but she does desire, yes, longs ardently and passionately for means to make more fruitful the service to which she is dedicated. In the name of all true scholarship, as you love your children, see

to it that the well-meaning efforts in her behalf be guided by wisdom and understanding."

**The Public Library and the Schools.** The contrast between old methods and new is nowhere more striking than in the use of the public library now made by the public schools as compared with a dozen years ago. Then the library was inadequately supplied with children's books, and comparatively few children patronized it. Now books are provided in abundance, a room has been set apart for the use of children, and every facility has been granted to teachers and pupils for the use of library books in connection with the work of the schools. At the present time there are 165 libraries scattered over the city in schoolrooms, under the care of teachers. These contain 6,649 volumes, and are interchanged whenever necessary. These books are selected with discretion by teachers or by the school librarian. Besides the use of books in the schools, thousands of children deal directly with the library. All these advantages are provided at the expense of the library trustees, the school department contributing nothing thereto. We desire to extend thanks to the librarian and his assistants, as well as to the Board of Trustees, on behalf of both teachers and children, for the privileges thus generously furnished.

**Manual Training.** *In the Grades.* In 1898 the Legislature passed a law making instruction in manual training compulsory in all cities having a population of at least 30,000.

Since that time every School Report has urged the introduction of this subject into the grammar school curriculum, and reasons have been given therefor. In expression of a settled conviction on the part of the School Board, three separate requests have been unanimously made to the City Government during the last eight years for the equipment of manual training rooms in various parts of the city. These requests have been without avail. At the beginning of this year the opinion of the City Solicitor was obtained to the effect that authority to open and equip such rooms was vested in the School Committee. After due investigation and consideration, the School Board voted in April last to establish two manual training centres, and authorized the Committee on Industrial Education to employ two instructors at a salary not exceeding \$1,200 each.

In pursuance of this vote, a room in the Glines School and one in the Carr have been fully equipped with twenty-five benches each, and tools in conformity with the recommendation of Gustav Larsson, of Boston, the father of sloyd work in New England. The entire expense of equipping these two rooms was \$1,302.20.

Two men, each of whom had had thorough training and long experience in this line of work, were employed at a salary of \$1,100 each. A modified sloyd course of work was adopted

CARR MANUAL TRAINING ROOM.

GLINES MANUAL TRAINING ROOM.

similar to that used in kindred schools throughout the country. Four hundred and nineteen boys belonging in the eighth grades in thirteen schools during the girls' sewing and drawing time have received a weekly two-hour lesson since the beginning of the school year. The boys have been intensely interested in the work, only one having been found without a relish for it.

There has been no perceptible falling off in the work accomplished in other branches. One hour of the eighth-grade boy's time has heretofore been spent in miscellaneous pursuits, while the girls have been sewing. This hour is now taken for manual training.

In the work in the shop the boy first prepares a working drawing of the object he is to make. This is drawn to scale. He then fills out a lumber order, giving the dimensions required, and estimates the cost. After general class instruction, he proceeds to fashion the piece of work in hand. When finished, he makes a record of what he has done, accompanied by self-criticism. Forms used will be found below.

#### LUMBER ORDER.

For coat hanger.

Kind and thickness of wood, soft pine,  $\frac{7}{8}$ .

Finished dimensions,  $15\frac{1}{2}$  inches x  $\frac{3}{4}$  inches x  $2\frac{1}{2}$  inches.

Rough dimensions,  $15\frac{3}{4}$  inches x  $\frac{7}{8}$  inches x  $2\frac{3}{4}$  inches.

Approximate cost, \$0.03.

Name, George Marshall.

Note.—If model consists of more than one part, state for which the wood is to be used.

State length, width, and thickness.

#### SLOYD RECORD.

(Pupils are requested to carefully note and fill out this blank, to hand in with each completed model.)

Bench 10.

Name, George Marshall.

Age, 15. School, Pope.

Model, coat hanger.

Kind of wood, soft pine.

Tool used, plane, spoke-shave, saw, circular saw, knife, ruler, pencil, square, marking gauge.

Time spent in making the model, 2 hours.

Standard measurements,  $2\frac{1}{2}$  inches x  $\frac{3}{4}$  inches x  $15\frac{1}{2}$  inches.

Measurements obtained,  $2\frac{1}{2}$  inches x  $\frac{3}{4}$  inches x  $15\frac{1}{2}$  inches.

Workmanship, with reason, good, because I took good care to do my work well.

What are you going to do with your model? Give it to the Junior Auxiliary of the Fathers' and Mothers' Club.

Teacher's remarks on above: Did very well.

Note.—Measurements: State the greatest length, width, thickness.

Workmanship: Excellent, Good, Fair. Plus (+) and minus (—) may be used to indicate a little better or a little less than the mark.

Evidence of the value of manual training both in elementary and high schools is overwhelming. The general trend of school work is away from the purely academic and towards the vocational and practical. The call is not so much for boys and young

men who know things as it is for those who can do things. Knowledge and power that can be applied in commercial or industrial business are demanded. More and more the schools are called upon to equip their graduates, in some degree, to be sure, for further study, but in the majority of cases with training that will make them efficient and self-supporting. This enlargement of the function of the schools is demanded by modern conditions, and must be recognized by those in authority. This manual training work so auspiciously begun must be extended to other elementary school grades. Indeed, in all grades some form of handwork, which can be provided in great variety and abundance, should have a place.

I therefore recommend that at least two additional rooms be provided and instructors employed so that another grade, either the seventh or ninth, may share in the advantages of this work. If for financial reasons this cannot be done, the session of the manual training schools can be extended from five hours to six and one-half, by beginning at 8.30 and closing at 4 o'clock. This will shorten the length of lessons from two hours to one and one-half hours, but it will enable instruction to be given to the boys of the eighth grade and to those of the ninth as well. Some addition would need to be made to the salary of instructors in this case.

Besides this, I recommend that, under the direction of the teacher of drawing, some simple and inexpensive form of handwork that can be carried on at the pupils' desks be introduced.

Manual training work in the high school is somewhat different, and, as might be expected, is more advanced in its character. It will be better understood from the brief outline prepared by the head of the department in the English High School, and found in Appendix I.

**Sewing.** Sewing was introduced into our schools nineteen years ago. There were then two sewing teachers. The growth of the schools compelled the employment of a third teacher in 1900. The continuance of this growth has compelled the gradual reduction of the time given, so that instead of the sewing period being one hour in length, it now averages about three-quarters of an hour. Instruction is given in four grades,—the fifth, sixth, seventh, and eighth. The demands of the situation can be met in two ways,—first, by the employment of a fourth teacher of sewing; secondly, by dropping sewing out of one of the grades. The recent decisive vote of the School Board shows the first plan to be unattainable. The second plan, therefore, is the only one available. It is the opinion of the majority of the sewing teachers that the work now done in the eighth grade may be omitted with the least loss. Three years of instruction in sewing is as much as most cities and towns give. It covers all the fundamental essentials of the work that the girl needs to know. What is given in

the eighth grade is not new, but rather an extension or application of the work of previous grades. This modification of the course would enable the three sewing teachers now employed to give practically a lesson an hour long to all classes.

I recommend that this be done.

**Medical Inspection.** By the concurrent action of the Board of Health and the School Board made effective by a generous appropriation on the part of the Board of Aldermen, a systematic plan of medical inspection of the public schools was established on the first of January, 1907. The schools were divided into eight districts, the parochial schools constituting one of them. Eight physicians were employed at an annual salary of \$200, each having a district in charge. Each school has been visited regularly on every school day, generally at an appointed hour. A bell signal indicates to teachers the arrival of the physician. Each teacher has previously made an examination of the members of her class, and sends all pupils that appear to be in need of medical attention to the principal's office. The physician examines each child, and makes such disposition of the case as he deems necessary, placing this one in quarantine, sending that one to his home with a blank advising parents to consult a physician, and sending another back to his schoolroom. There is now very little interruption to the ordinary work of the school. The chief trouble has been found in the failure of parents to return children to their schools promptly in case of quarantine. This results generally from a misunderstanding of the conditions. Parents are becoming familiar with the system, and are co-operating heartily with the medical inspectors.

The year has been marked by an unusually small number of cases of contagious disease. Whether this may be attributed in whole or in part to the work of the school inspectors, it is difficult to say. It is obvious, however, that the general health of school children has been unusually good during the year, and absence from sickness has been less conspicuous.

The following summary of the work of the medical inspectors is interesting as showing what has been accomplished. The general result of the plan has certainly justified its establishment and the expenditure which it has entailed.

The number of sick or defective children reported to date is 4,840. Number of children sent home, 2,062.

The cases are divided as follows :—

Specific infectious.....	81
Nose and throat.....	1,359
Eye .....	346
Ear .....	109
Skin (including pediculosis).....	2,423
General .....	522

The efficiency of this work would be greatly increased by the employment of one or two school nurses in certain sections of the city who would follow up cases of children who are either quarantined or need special attention in their homes. The hygienic conditions there would be greatly improved and information given to parents that would be valuable, to say nothing of the amelioration of the conditions of the children. Twenty-four such nurses have been employed in Boston to supplement the work of the medical inspectors, and the success that has attended their labors has been such as to justify the appointment of an additional number.

I recommend that two such nurses be employed.

In this connection allow me once more to call attention to the subject of physical training. It is directly connected with the health of school children. Prevention of disease is better than its cure. A wider range and more time should be given to our instruction in physiology and hygiene, and statutory requirements more nearly fulfilled. Three-quarters of the modicum of time now allowed by schedule must be used in purely anti-tobacco and temperance teaching. There is much beside concerning the laws of health and its preservation that should be taught in the schools. Some knowledge should be given of the more important facts of physiology, that an intelligent idea may be had of the functions of various bodily organs. In addition to all this, there should be scientific physical exercise and training. This requires technical instruction that not all teachers are qualified to give. Hence the need, for a while, at least, of a general director of physical training. There is especial need along this line in the high schools for reasons that have been set forth in full in previous reports. It is possible for a director of high school athletics to take charge of the physical training in those schools. Mr. Cuddy, who managed our high school athletics so satisfactorily for many years, is now doing this combined work in Malden.

This important matter is recommended to your consideration.

**Eye and Ear Tests.** By act of the Legislature of 1906, every teacher in the state is required to test the sight and hearing of each one of her pupils once a year. For this purpose test cards are furnished by the State Board of Education, accompanied by full directions for the teacher and blank notices to be sent parents in cases where professional treatment is deemed necessary. On blanks provided for the purpose the name of each child and the result of the examination of each eye and of each ear are recorded. Under this enactment two tests of the sight and hearing of Somerville public school children have been made, one between September, 1906, and February, 1907, and the other from September, 1907, to December, 1907.

The results are tabulated below:—

EYES.			
	1906.	1907.	Change.
Tested .....	11,270	11,255	—15
Defective .....	2,884	2,434*	—450
Per cent. defective.....	25.6	21.6	—4%
Notices sent to parents.....	2,083	1,171	
Professionally treated.....	527	168	

\*Wearing glasses, 880.

EARS.			
	1906.	1907.	Change.
Tested .....	11,527	11,786	+259
Defective .....	869	622	—247
Per cent. defective.....	7.5	5.3	—2.2%
Notices sent to parents.....	581	350	
Professionally treated.....	122	44	

With regard to the second test it should be said that in some classes notices are yet to be sent to parents, and it is too early to report the number professionally treated.

A study of the results of these tests is interesting. In 1906 25.6 per cent. of the eyes examined were found defective. In the second test 21.6 per cent. were found defective. This difference of four per cent. in the two tests must lead to one of two conclusions,—(1) there has been a marked improvement in the vision of children during the part of the year intervening between the two examinations, or (2) the tests are inaccurate. I am of the opinion that the second conclusion is correct. The tests have been made by different teachers and under different conditions. It is no easy matter to make an accurate examination of the eyes of fifty children. They must be tested individually and in a room by themselves, and the directions must be explicitly and uniformly followed. Much of this work must be done out of school hours. Most teachers are the merest amateurs in such business, and while in many cases their inaccurate work may be greatly to the advantage of pupils, it should by no means be deemed final. Aside from the immense amount of labor involved on the part of teachers, it seems to me that to be sufficiently effective the examination of all eyes and ears should be made by a single expert and under ideal conditions. The value, however, of this rough examination has been illustrated over and over again in the discovery of defects that were not suspected and by the application of remedies that have been of marked advantage. At least 600 cases have been professionally treated, and parents as a rule have gladly co-operated with teachers. There have been numerous instances, however, in which parents have been unable or unwilling to incur the expense attending examination and relief.

What has been said with regard to the eye test applies with nearly equal force to the test of hearing. While 7.5 per cent. of

defectives were found in 1906, but 5.3 per cent. were disclosed in 1907, an apparent improvement of 2.2 per cent. This apparent improvement may be accounted for in two ways,—first, the inaccuracy of the test, and secondly, many pupils have been treated by the school physician for adenoids and other throat diseases that have interfered with hearing. In many cases partial deafness has been wholly relieved. It still remains, however, to be said that the hearing test is much more difficult and more liable to inaccuracy than the eye test, for not only must there be the isolation of the pupil during the examination, but it must be done under conditions of absolute silence. The method prescribed requires more time in the case of an examination for hearing than for sight.

The "Instructions to Teachers" recommend that all pupils in a building should be tested for hearing by the same person. Some attempts have been made to do this by the principal or his assistant, but in general it is impracticable.

These tests are found by teachers to be a serious addition to their labors and an interruption to their regular work. Some of them are conscious, too, that this work, under the conditions under which it is done, is necessarily unsatisfactory.

The question naturally arises whether an annual examination of all children is needful. May not the test be limited in some way so that it shall be less burdensome?

**Grammar Masters.** I have heretofore urged that the principals of the larger schools be given increased supervisory duties by placing in their charge the smaller schools which are tributary to their own. In doing this we should be following the custom adopted by many other cities, and one which, judging from its continuance, works satisfactorily. These principals occupy positions which, if we should adopt the standard set up by our sister cities, are worth at least \$2,000 a year. They are men and women of long experience, with professional training and an equipment that should qualify them for all branches of school work. The time they now spend in clerical duties, in distributing supplies, in looking after books, in testing eyes and ears, in managing the stamp savings business, in aiding the medical inspector, in teaching music, in receiving and escorting visitors may well be used in more important work, and these miscellaneous duties be turned over to assistants employed in part for such service.

One leading criticism of our schools made by the Mosely Commission was that we have altogether too little instruction by men. The most skilful instructors should certainly use their skill to the greatest extent possible. The more important subjects should be taught by them in the upper grades. The supervision of the work of other teachers in their buildings is now incumbent on them under the Rules. Into their schools come

pupils from outside buildings. They should readily assimilate. Their attainments should be uniform. The methods followed should be identical. Moreover the advantages enjoyed by teachers in the large buildings with masters at their head should be shared by other teachers, who welcome suggestions and need the stimulus of helpful daily visits from enthusiastic experts. Believing that this arrangement would in most, if not in all, cases be of decided advantage to the schools, I renew my recommendation that the work of masters be thus extended.

In this connection I wish to call attention to the need of an assistant in all buildings of eight rooms or more, who shall give her entire time to one building. The principal needs more freedom for helpful supervisory work, and an assistant besides teaching can care for the miscellaneous business of the office and have time to spend with backward children who greatly need special attention.

**Teachers' Salaries.** As the result of an active, though perfectly courteous and legitimate, campaign conducted by the women teachers employed in the elementary schools, an increase of \$50 per year in salaries has been voted by the School Board to take effect at the beginning of the next fiscal year. This is but part of a movement that has extended throughout the country. Salaries have everywhere been increased. It is probable that the most prominent factor in this movement has been economic in character. The actual financial needs of teachers have been largely influential. The discussion has, however, accomplished more for the schools probably than it has for the teachers. The work of the teacher, the demands made upon her for professional training, upon her time, her nervous energy, as well as the general standard and attainment demanded by the twentieth century school, have been discussed by the public as never before. A clearer understanding of some educational matters has been reached. People are coming to realize more fully than ever before the value of the public schools and the dependence upon them of city and state for the promotion of civic welfare. The belief that larger expenditures and a broader extension of the work are required has been developed. The salaries of teachers have by no means reached their limit. If high standards are to be maintained, if men and women especially fitted by nature and education are to be attracted towards the teaching profession, the financial inducements must be increased. Somerville has been generous in the past and in its recent action, and is sure to reap the benefit that comes from increased efficiency and a more contented and enthusiastic service on the part of its teachers. We must be prepared, however, for larger expenditures. I know that it hardly seems possible to those who have charge of city finances that any larger proportion of the fund available for the maintenance of city institutions should be

spent for the schools. Good schools, however, are the leading factor in promoting the city's prosperity. It has been said repeatedly that people move to Somerville in order to give their children the educational advantages which the city furnishes. If this is true, they should be willing to pay for them. The value of every foot of real estate and every dwelling house is increased by the character of our schools and by every improvement made therein. This fact should be and probably is recognized by the assessors.

Why should schools cost more than they do now? First, because they are to grow better and broader in their scope. They are to meet the demands of new industrial, commercial, and social conditions. They will retain their pupils longer. The compulsory age of school attendance will be raised and child labor laws be modified.

Secondly, schools will cost more in the not distant future because fewer pupils will be assigned to a teacher. Mass instruction must be replaced by more individual teaching. The backward and abnormal child will receive greater attention. No teacher can do justice in these days to fifty pupils. In recognition of this fact classes are being gradually reduced to a teachable number. A reduction from fifty-six to forty-four is being made in Boston. The day is not far off when forty pupils will form a large class, and thirty-five or thirty be considered a good maximum. The average number given a teacher in Malden is thirty-four; Newton, thirty-one; Melrose, thirty-three and one-half; Brookline, thirty-four; and Springfield, thirty-five. Diminishing the size of classes twenty per cent. means an increase of twenty per cent. in the teaching corps. This will require six teachers where five are now employed.

The third reason for the future increased cost of schools will be found in the necessity of still further raising the pay of teachers. All cities that desire the best must pay the market price, and the market price will continue to rise so long as the demand exceeds the supply. Moreover, the great body of professional teachers, whatever may be said of those temporarily in the ranks, will never be contented with a salary that affords a bare personal maintenance. Nearly one-half of all teachers have others dependent upon them for support (53.3 per cent. is the actual ratio in Somerville), and this is a factor in the problem.

The chief factor, however, is connected with the provision for the teacher's support after the period of her efficient teaching closes. Either a teacher's salary must be such as to enable her to provide by her annual savings for comfortable maintenance during the inevitable period of retirement, or the promise of a public pension must relieve her of all anxiety in this respect. In either event there must be an increase in public school expenditure.

**The Merit Plan of Salary Increase.** This plan is being substituted in many cities for the one so long in use,—increase of salary based on length of service. It does away, in the first place, with the appointment of teachers based on political or personal consideration, for under it teachers are selected from a carefully-prepared merit list based on Civil Service principles. In the second place, it demands constant professional growth and increased efficiency while the teacher is rising by gradual steps from the minimum to the maximum salary. These objects are not only worthy, but essential to the best interests of the school. To what extent is the plan applicable or desirable in Somerville?

For years our teachers have been selected mainly by visiting them in their schools in other cities or towns and choosing only those of evident excellence. During my experience as superintendent, among the 436 teachers employed, I can now recall but ten instances where any other question than that of absolute fitness for the position has affected the appointment. There have been perhaps a half-dozen cases of misjudgment and failure on the part of the appointee to fulfill expectations. If we were sure that this method of choosing teachers would continue, no change would be desirable, but as the city grows, untoward influences and objectionable methods are likely to appear, and it may be well to safeguard the schools by the adoption of some plan that will render impossible appointment on any other ground than that of merit.

Theoretically the increase of salaries of Somerville teachers is based on length of service, a period of from two to eight years being required to pass from the lowest to the highest. The theory is founded on the assumption that every year of service renders the teacher more efficient. Practically, however, this theory has been applied in but few cases, for, having selected teachers of unquestioned efficiency, we have voted them the maximum salary at the outset. A few have started near the middle of the salary schedule. At the present time there are but twenty-one teachers in the city receiving less than the maximum salary of the position, fifteen of whom are employed in the high schools.

The recent increase of the salaries of grade teachers was voted without regard to the question of efficiency. It was rather based on the conviction that at least \$700 is necessary to the comfortable maintenance of a teacher. Any system of increase of salary based on increase of efficiency would affect our present corps only with reference to a possible future increase. As I have elsewhere predicted, this increase is sure to come in the not distant future. Will a provision made at the present time for larger salaries, based on professional growth and improvement, tend to raise the standard and give us better teachers, and hence better schools? If so, it is worth making.

Some teachers are not especially influenced by financial considerations. They do not expect to continue long in the business, and hence their indifference. Others are working for conscience' sake, with high ideals and motives, with a love for their work, and with strong interest in those whom they teach. They are constantly reaching out for better things. Still others are ambitious of higher professional standing, and are alert in their efforts to secure it. The great majority, however, while rendering honest, faithful service, are amenable to the influences and advantages of larger salaries. They feel the need of the extra money, and may be stimulated to the effort necessary to obtain it.

So long as some increase in salaries must be made in the near future, why not offer it now as a reward for and a recognition of earnest effort to increase efficiency? There need be no "hard and fast" requirement of work to be done or examinations to be passed. Let it be understood that when salaries are again raised, those teachers will share the benefit who have made earnest efforts to add to their efficiency and have obviously increased their value as teachers. In other words, why not make salaries in the future commensurate with service?

The chief objection to the plan on the part of teachers is found in the apparent difficulty of securing just and unprejudiced judgment concerning higher qualifications. So many elements enter into the making of a good teacher, so various are the lines in which improvement may be made, so difficult is it to learn all that a teacher has done, so hard is it to read motives, and recognize difficulties, and measure attainments, so rare is it to find critics wholly unprejudiced, that teachers fear to trust the working of the plan.

Another objection is that present demands upon teachers so occupy their time and exhaust their strength that they cannot do what might be expected in the line of study. Still another is found in the expenses incident to summer schools and college courses. While there is force in these and kindred objections, they are not necessarily insuperable. There are just judges and inexpensive ways of self-improvement.

The merit plan is in the line of progress. It means ultimately better service, the elimination of unworthy teachers, and the raising of professional standards and remuneration in a way to attract and hold those best fitted for the great work of teaching.

I recommend it to your consideration.

**The Tenure of Office of Teachers.** In 1886 the Legislature enacted a law that the School Committee may elect a teacher who has served as such in the public schools of its city or town for not less than one year to serve as such at the pleasure of the Committee.

The object of this enactment was to give some degree of permanence to a teacher's tenure, and render annual elections needless. At the present time rather more than one-third of the teachers of Massachusetts are serving under the provisions of this act. The arguments offered in favor of a permanent tenure for teachers are: That where the custom has been adopted it meets the hearty approval of school officials; indefinite tenure is preferred by all teachers who have worked under it; its tendency is to make teachers permanent residents of the city or town and to lead them to enter more heartily into the life of the community; it removes one element of anxiety from the teachers; it is taken by them as an evidence of confidence on the part of their employers, and inspires them to render their most efficient service.

The adoption of the act does not deprive the Committee of its right to discharge a teacher summarily. Where the method is adopted it is customary to provide for a probationary or temporary service of two or three years, and if found satisfactory the name of the teacher is placed upon a permanent list. Sometimes this is done by special vote. If there is a falling off in efficiency, the name of the teacher may be transferred to the temporary list, after a suitable notice. At the same time, the advance in salary may be temporarily suspended.

On this subject Secretary Martin, of the State Board of Education, says in a recent report: "The obligations imposed upon teachers are too heavy, and the drain upon their vitality too great to make it wise to subject them to the anxious suspense attending annual elections. They have a right to feel secure in their positions so long as they are fulfilling their obligations, and there is neither justice nor good sense in subjecting them to an annual round-up, with its attendant publicity."

I recommend that a simple rule be adopted which shall secure to teachers and schools the advantages accruing from a permanent tenure of office.

**Backward Children.** A thousand pupils in the upper eight elementary grades are repeating the work of last year. Another thousand, promoted on trial, are struggling to maintain a satisfactory standing. Only three out of every four received an unconditional promotion in June.

Inquiries show that out of every hundred pupils in the present ninth grade, in June two will have completed the elementary school course in seven years, twelve in eight years, fifty, or one-half, in nine years, twenty-nine in ten years, and seven will have taken eleven years. The average time will be nine years, three months, and the age at graduation will be fifteen years. These conditions are not peculiar to Somerville. They exist in greater or less degree in other cities. Cambridge has for years had an excellent skipping system, which gives every advantage to the

brighter pupils, and yet for the last five years the time taken by graduates as a whole to complete the course averages nine years, one month. In Providence in 1905 fifteen and one-half per cent. of all grammar school pupils repeated the year's work.

Why is it that so large a percentage fail to go through the schools in the allotted time? The following are suggested as reasons, no attempt being made to give them in order of their importance:—

Sickness and other enforced absences; physical defects of sight, hearing, throat, or nerves; abnormal mental equipment; natural slowness in all mental operations; outside interests; indifference to school that teachers cannot overcome; studies that fail to attract or interest; natural defects along the line of some one subject; a curriculum too full for the unscholarly; classes too large to allow individual instruction; a natural tendency on the part of teachers to work along lines of the least resistance.

Probably no complete remedy can be found for this state of things, but surely something may be attempted by way of relief. A physical examination by experts will show how certain defects may be remedied by parental action. Outside interests that distract may be controlled by the same authority. The requirements of the course of study may be modified for these pupils. Indeed, for all classes we should emphasize the essentials and ignore details that now absorb too much attention; teach principles and fundamentals without attempting to present every remote application of them. We can avail ourselves of the well-recognized psychological law that the dull and slow of intellect are stimulated and helped by motor activities. We can cease forcing all the children through the same mould. Uniform attainments should not be insisted upon. Superiority in one study should compensate for deficiencies in another. Shorter promotion periods and double the number of grades would greatly relieve the situation, but there is no room at the top, and promotion in crowded classes can be made only as often as graduates are admitted to high schools.

Undoubtedly the chief obstacle on the part of pupils is the natural indifference to all school interests. The chief obstacle on the part of the system is the large classes which are enforced by our lack of conditions. We have seventy-six classes with an average of nearly fifty pupils. Mass instruction becomes imperative and individual instruction well-nigh impossible. We have made some use of the Batavia plan, so-called, but with meagre success for this reason. Teachers must have time to study the individual child, find his weaknesses, and get next to him in order to awaken and develop his latent powers. The available remedy that would be most effective lies in the employment of extra teachers, at least one to every 300 grammar pupils, teachers of experience and skill, kind and sympathetic, who

should give their whole time to the instruction of these needy children. Such instruction would save many a child the wasteful prolongation of his school course. This was illustrated by the success of the summer school provided by the Y. M. C. A. in July and August last, and attended by fifty boys who successfully made up deficiencies and strengthened their position in school.

In the long run, if we cut down the number of repeaters, there would be a financial gain. Every child's education costs the city \$30 a year. A year for each 500 repeaters costs \$15,000, a sum sufficient to pay for twenty extra teachers.

This subject is surely worthy of attention, and I trust that some effort will be made in the interests of this submerged tenth.

**School Books.** There are at the present time in the twenty-six schools 150,000 school books, which have cost the city about \$70,000; 24,000 of these are in the high schools. This does not include 1,684 reference books in the English School library, nor about 200 in that of the Latin School. Twelve thousand books have been destroyed during the year, a few on account of contagious diseases, but chiefly because worn out. Fourteen thousand two hundred and ten books have been re-bound. This is nearly three times the annual number. This results from an attempt to re-bind before books become so badly worn as to render re-binding inexpedient. Fifteen thousand new books have been purchased. The care and renewal of text-books is an important matter. The life of a book varies from two years to ten, according to its character and to the usage it receives. Many books are discarded because too badly soiled for further use. In some schools probably too rigid economy has been practiced, and there are books in use that never should have been re-bound. They bear too distinctly the soil of usage.

It will be seen that we have an average of twelve books for each child in the schools. This unnecessarily large number comes chiefly from the multiplicity of reading books in the elementary schools, of which there are 55,000, or more than ten for each child. This number of reading books has been accumulating for years, new books being added to the list before those previously in use are worn out. It would be well to have a revision of the reading-book list and some disposition made of those that appear to be useless. The management of the text-book supply demands more attention from headquarters than can under existing conditions be given. Several of the school buildings erected before the day of free text-books are without suitable book-rooms. While teachers are alike in their good intentions, they differ materially in the oversight of school books and in their judgment regarding their renewal. I am sure that a more direct supervision of books and other school supplies and their use would be in the line of economy.

A statement of books in the various school buildings will be found in Appendix I.

**Administration.** Somerville has doubled its population within twenty years. The methods and the force employed in the conduct of public business in a city of 35,000 are inadequate and ill-adapted to one of twice that size. This is as true in the administration of school affairs as in that of any other department. Nevertheless there has been no material change in methods nor increase in the supervisory or administrative force during this period. This matter has been called to your attention before, but I wish to present it for your consideration once more, solely in the interest of the public service and with the personal element wholly eliminated.

There are two completely different departments of school administration which may and should be kept separate and distinct. One has to do with the material interests of the schools, and the other with their purely educational side. One concerns the all-important work of the teachers in the schools, and the other is connected simply with their machinery. By far the most important part of this administrative work is that of supervision and superintendence. It requires all a man's time and thought and energy to select suitable teachers, to arrange courses of study, to make a proper classification and distribution of pupils, to adjust differences with parents, to visit 300 school-rooms, to direct and stimulate and reform the work of teachers, to keep in touch with educational movements, and to perform the many other duties that are legitimately his.

On the other hand, there is the business side of school administration. This involves the purchase and care of books and supplies of all sorts, the keeping of accounts, the making of pay-rolls, the cataloguing of pupils, the matter of truants, the issuing of labor certificates, the licensing of newsboys, the annual inventoring of books and their re-binding, the preparation of statistics for state and national authorities, the keeping of records of Board meetings and of sub-committee meetings, and other miscellaneous duties. All this work and the responsibility therefor should be transferred from the Superintendent to some competent man. He should be made the secretary of the Board, leaving the Superintendent free to take part in its deliberations and discussions. This would, of course, require an amendment of the City Charter, other defects in which must ere long be remedied.

The reorganization of the administrative department of the schools along some such lines as these, my judgment, confirmed by my experience, tells me would conserve both the financial and the educational interests of the city in a marked degree.

**Recapitulation.** In reviewing this report I find that it contains an unusual number of recommendations. Further consideration of them, however, leads to the conviction that their adoption is largely a matter of time. If they could be made at once the schools would be greatly benefited.

These recommendations are here recapitulated: (1) changes in vacations to lengthen the school year; (2) the extension of high school accommodations by additions in the rear of the English Schoolhouse; (3) the suspension of all kindergartens that force primary pupils into the streets for half a school day; (4) the enlargement of the Perry Schoolhouse; (5) the erection of a twelve-room building on the city ledge lot in Ward Seven; (6) the employment of additional teachers in the Latin School; (7) the non-curtailement of the evening school year; (8) the awakening of public interest in playgrounds for children; (9) additional light for four of the older buildings; (10) the substitution of adjustable furniture for that now in use; (11) the employment of an additional truant officer; (12) the extension of manual training, to include the eighth and ninth grades; (13) the omission of sewing instruction in the eighth grade; (14) the employment of two nurses in connection with the medical inspection of schools; (15) the employment of an instructor of physical training for the high schools; (16) the extension of supervision by grammar masters, to include the smaller schools; (17) the gradual reduction of the number of pupils assigned a teacher; (18) consideration of the merit plan of salary increase; (19) the election of teachers on permanent tenure; (20) the employment of extra teachers for backward children; (21) changes in the methods of school administration; (22) provisions for a sabbatical year for teachers.

**Changes of Fifteen Years.** The school property of Somerville has a valuation two and one-quarter times as large as in 1892. School accommodations have been increased seventy-two per cent. This has been brought about by the enlargement of six buildings, the Latin, Knapp, Glines, Forster, Bingham, and Burns Schoolhouses, and by the construction of eleven buildings,—the Durell, English, Hodgkins, Carr, Hanscom, Perry, Baxter, Brown, Lowe, Bennett, and Proctor Schoolhouses, the remaining nine of the present twenty-six buildings being unchanged. Eight antiquated wooden buildings have been destroyed or abandoned. They are the Bennett, Jackson, Prospect Hill, Harvard, Spring Hill, Beech Street, Cedar Street, and Webster, containing twenty-four rooms.

The number of pupils in the grammar and primary schools has increased sixty per cent., and the number of teachers slightly more, sixty-three per cent. The number of grammar school graduates is ninety-six per cent. larger in 1907 than in 1892, showing that a relatively larger number of pupils remain to

graduate. The increase in the cost of instruction for these schools has been twenty-one per cent. This is due to an increase of \$50 in the salaries of grade teachers in 1900 and to the employment of additional masters, higher-priced principals, supervisors, and kindergarten teachers.

The number of pupils in the high schools has increased 188 per cent., the number of graduates 179 per cent., and the number of teachers 339 per cent. The cost of instruction is 412 per cent. more now than it was fifteen years ago. The per capita cost of instruction has increased seventy-eight per cent. This increase is due to a reduction in the number of pupils assigned to a teacher from forty to thirty, by the employment of a relatively larger number of men, and by a general increase in salaries.

The valuation of the city has increased ninety per cent., while the expenditure for school maintenance is 144 per cent. more than it was fifteen years ago, showing that our school expenditures have increased more rapidly than our ability to meet them. The cost of the care of schoolhouses has increased 123 per cent. This corresponds very nearly to the increase of 124 per cent. in the value of these buildings.

**Personal.** In August next I shall have completed fifty years of school work and an uninterrupted service of thirty-five years in Somerville, the last fifteen of which will have been spent as superintendent of schools. For a long time I have felt entitled to a release from responsibilities and labors which grow more exacting and burdensome year by year. This feeling having become a settled conviction, I shall not again be a candidate for election as superintendent, but shall retire from service at the expiration of my official year, August 31, 1908. I realize that this determination will sunder ties that have become very strong and sever relations that have always been exceedingly pleasant.

In this final report I wish to acknowledge my indebtedness to the members of the various School Boards with whom it has been my good fortune to be associated for the courtesy, forbearance, and support which they have uniformly accorded me, and to assure them that I shall always recall their kindness with grateful pleasure.

To those with whom I have been more intimately connected as co-workers, and to whom far beyond all others whatever excellence and influence the schools may have had are due, the supervisors, principals, and teachers, I am under the deepest obligation. Greater loyalty, more earnest co-operation, a heartier service there could not be. The remembrance of their unvarying fealty and constant consideration will always awaken feelings of the deepest gratitude.

To the citizens of Somerville who have so long honored me with their confidence and good will, and whose generosity and

influence have done so much to promote the educational interests of the city, I tender most hearty thanks.

The aim of our schools has always been to qualify for honest, useful, and happy living; to lay deep and strong the foundation of business integrity and success; to give culture and refinement, and an appreciation of what is true and worthy in art, literature, and life; to cultivate the spirit of civic loyalty and service; to develop a citizenship that shall maintain the honor and promote the highest interests of the city and the state. With these aims still in mind and at heart, let home, church, schools, the press, all agencies that make for intelligence and righteousness clasp hands in constant striving for what is best, and the future honor and prosperity of our city and the happiness of its people are permanently assured.

Respectfully submitted,

G. A. SOUTHWORTH.

December 27, 1907.

## Bits

There are many varieties of bits, among them the auger-bit, twist-bit and the gimlet bit. The auger bit is the one most commonly used.

All holes must be bored from both sides to prevent splitting on the under-side.

## Book-Rack

Two pieces of stock. Finish base out of one piece then mark out ends on the other. Groove in the base to be cut to the line with the back saw and chiseled from both sides. Ends to be sawed and chiseled as shown.

## HIGH SCHOOL MANUAL TRAINING.

---

The high school of to-day has become such a prominent feature in education that it should be as broad and far-reaching in the course of study as is possible.

Only a few years ago courses were planned with distinct partiality to the small number of pupils who were to continue their studies beyond the secondary school. During the last few years, however, many new subjects, in approval of which educators have been unanimous, have been added, in order to meet the needs of the great number of pupils whose schooling is to end at the completion of the high school course. It is self-evident that our duty is to prepare young men and women for life as far as lies within our power, knowing that the value of their life work depends largely on the choice of a proper vocation.

So commercial and manual training courses have gained a footing because of their strong educational and practical features.

Manual training creates power, physical, mental, and moral, and the high school has unlimited possibilities along this line of education, if carried on with the idea constantly in mind of never losing sight of the educational side of the subject.

To obtain a high standard of efficiency these things should be made prominent: (1) The teacher should thoroughly understand and appreciate the educational principles in such work; (2) the work should be laid out so that it can be thoroughly appreciated by the pupil; (3) and the material results should in every way represent the pupil's own efforts.

With these several ideas firmly impressed upon us, we are undertaking to make manual training productive of the best results. In the first place we substitute for the word "shop" the word "laboratory," for we are doing our work as thoroughly as is done in any of the other laboratory subjects. One illustration of our laboratory method is the using of notebooks in which are worked out the principles of construction and the uses of the many tools. This notebook is also of great value to the pupil because many things incidental to the subject at hand are taken up, such as the study of timber, how and where it grows, the kind of soil it requires, etc. (See specimen page of notebook.)

At the present time our manual training follows a two-years' course, to which are devoted six periods each week, or, in actual time, four hours, twelve minutes, with an additional three periods, or two hours, six minutes, for mechanical drawing, this drawing being compulsory for pupils electing this course.

The time during these two years is divided between the several subjects as follows:—

FIRST YEAR.		SECOND YEAR.	
	Weeks.		Weeks.
Joinery .....	27	Wood turning.....	19
Clay modeling.....	4	Pattern making.....	17
Wood carving.....	9	Foundry practice.....	4

*First Year Course.* Although the term "joinery" is used to describe our first year wood work, it does not begin to explain the number or nature of processes which have to be worked out by the individual pupil. Beginning with the study of simple measuring and marking, he works his way through the following steps: sawing, planing, boring, laying out of curves, construction of different kinds of joints, such as the halved, mortise and tenon, dovetail and glue joints, and lastly, the construction of some project requiring the assembling of several parts,—such as a chair or table.

Clay modeling as done in connection with the other work in this department acts as an aid to the carving, in that it trains the eyes and fingers to recognize form and relief. It is one of the strongest factors in connection with a manual training course in that it develops to a greater extent than any other subject the artistic as well as the manual sense. In this course each pupil makes a model of a cube of conventional and natural leaves, and an original tile from which he makes a plaster mould and cast.

After modeling with clay, the pupil turns to modeling in wood; i. e., wood carving. This is started in the simplest form by chip carving, and after that the different styles of carving follow.

*Second Year Course.* The second year starts with a very different line of work, in that it gives the pupil his first insight into the use of machinery, for in wood turning he must use the lathe. This work is begun by first giving a careful explanation of the lathe and then requiring full explanatory notes and drawings from the pupil. After this preliminary knowledge, the pupil proceeds with the course prescribed, cutting straight and taper cylinders, making oblique, concave, and convex cuts, and demonstrating the use of the skew chisel, gouge, and parting tool. Screw chuck and face plate work are also given, taking the form of a finished exercise, such as the candlestick, which is completed even to its polishing on the lathe.

The next division of the course, pattern making, brings the pupil nearer to the industrial idea than any one of the subjects thus far treated, and the training in accuracy, craftsmanship, and clear thought is of the very highest order. At the beginning, the pupil is taught an appreciation for labor by a thorough explanation of what the term "pattern maker" means, and led to see the accurate knowledge of drawing, geometry, and advanced mathematics which such a trade requires.

Bed.

The lathe is driven by a belt from the counter-shaft and the counter-shaft by a belt from the main shaft. The speed of the lathe for small work should be at least 2000 revolutions per min.

The course itself includes the making of different styles of patterns, such as the two-part pattern, and patterns that require core prints or wired pieces, with special thought regarding the draft, shrinkage, and finish of the castings made from such patterns.

Accompanying this pattern work is a course in foundry practice. This gives the pupil an opportunity, first to understand the use and value of a pattern and to realize the importance of draft, and second, to teach the practical side of the work in the actual making of metal castings. During the work on moulds the use of the flask, rammer, sprue, slickers, gate cutter, and trowel are all taught in their proper places, together with the use of green sand and baked cores.

This outlines the course as it exists at present. We could do vastly more for our pupils, however, if a four-years' course could be established to include forging and machine tool work for the boys and domestic science for the girls. What we need in this city is not a separate industrial school, but such accommodations and extension of this department as will enable us to cover thoroughly the subjects ordinarily taught in a school of this size.

FREDERICK O. SMITH.

*Head of Manual Training Department, English High School.*

**AMENDMENTS TO THE RULES OF THE SCHOOL COMMITTEE.**  
**MADE SINCE THE PRINTING OF THE LAST EDITION OF THE RULES.**

---

**Regulations for Licensing Minors Under Fourteen Years of Age.**

SECTION 167. No minor under the age of fourteen years shall, in any street or public place of the city of Somerville, work as a bootblack, or sell or expose for sale any books, newspapers, pamphlets, fuel, fruits, provisions, ice, live animals, brooms, agricultural implements, hand tools used in making boots and shoes, agricultural products of the United States, or the products of their own labor or the labor of their families, unless he has a minor's license issued to him by the superintendent of schools of said city, for so working or for so selling said articles, nor unless he complies with the terms of said license.

SECT. 168. The principal of the school in which a minor under the age of fourteen years is a pupil shall receive the application, in duplicate, of the parent or guardian of such minor, or next of kin, for a license for such minor to work as a bootblack, or to sell any or all the articles enumerated in the preceding section, and shall forward the same to the Superintendent of Schools, accompanied by the certificate of the teacher in whose class said minor may be, and of the said principal, that such minor is an attendant at such school and that they approve of the granting of a license to said minor. When the Superintendent authorizes the issue of a license, he shall return to said principal one of said duplicate applications, for filing, retaining the other, and shall issue said license to such minor authorizing said minor to go about from place to place in the city of Somerville and on the sidewalks in said city to sell newspapers, or to work as a bootblack, or in the streets and other public places in said city to sell any or all of the other articles enumerated in the preceding section, and shall provide such minor with a suitable badge, for which a charge of twenty cents shall be made. Every such license shall be issued and accepted on the condition that the minor shall comply with the conditions of his license as contained in the following section, and said section shall be printed in the license.

SECT. 169. The minor shall conform to the statutes and the Regulations of the School Committee of Somerville; shall, so long as he continues under the age of fourteen years, attend, during every session thereof, one of the public schools, or some regularly established school in the city of Somerville; shall surrender his license and badge when notified that his license has been revoked, to the principal aforesaid, who shall return the same immediately to the Superintendent; shall not transfer or

lend his license or badge, nor furnish any unlicensed minor with newspapers or other articles to sell; shall not sell newspapers in or on any part of the street other than the sidewalk; shall not sell newspapers in or on a street car, nor, except on the days of national, state, or city elections, after 8 o'clock in the evening; shall not work as a bootblack, or sell newspapers, unless he is over eleven years of age; shall not sell any other article than newspapers, unless he is over twelve years of age; shall not at any time, while engaged in working as a bootblack, or selling articles in public places, congregate with other persons, nor make any unnecessary noise, nor in any way disturb or annoy persons as they pass, nor cry their papers on Sunday, nor occupy any stand with any other person, nor allow any unlicensed minor to assist or accompany him, nor allow idle persons to assemble or congregate around him, or around any stand occupied by him, nor so work or sell in any place other than that specified in his license, when a place is so specified, nor at any time, while so working or selling, fail to wear conspicuously in sight the badge furnished to him by said Superintendent, nor fail to exhibit his license to any police or other officer of said city if requested by him to do so. The Superintendent may suspend or revoke said license upon the violation of any of the conditions thereof, and the minor shall surrender his badge and will be subject to a fine.

---

#### **AMENDMENTS CONCERNING THE EMPLOYMENT OF CADET TEACHERS ADOPTED DECEMBER, 1906.**

SECTION 170. Before the opening of the schools in September of each year the Committee on Text-Books and Courses of Study shall nominate for election by the Board not more than twelve women who shall be designated as cadet teachers, to serve for one year following their appointment, at a salary not to exceed \$200 per year each.

To be eligible for the position of cadet teacher, the candidate must be a graduate of one of the Somerville high schools, and also a graduate either of some state normal school or of some college having pedagogical courses, one or more of which courses the candidate must have taken.

SECT. 171. The cadet teachers shall be assigned by the Superintendent to an equal number of elementary schools, and the assignments shall be changed at the end of each term of thirteen weeks, so that by the close of the school year each cadet teacher will have practiced under the direction and observation of three different principals in three different school buildings.

Cadet teachers shall receive guidance, instruction, and criticism from the principals of the schools in which they serve, render assistance to class teachers or to individual pupils, and when-

ever possible act as substitutes in the absence of regular teachers. They shall receive no increase of pay when acting as substitutes.

SECT. 172. Such of these cadet teachers as secure the recommendation of three out of four of the following officials: the three principals under whom they have served during their cadet year and the Superintendent of Schools, shall be eligible as grade teachers.

The following amendments to the Rules were adopted December, 1906:—

On page 6, insert as the twenty-first standing committee “(21) On Medical Inspection.”

On page 12, add as Section 32b the following:—

SECTION 32b. The Committee on Medical Inspection of the schools shall advise and co-operate with the Board of Health in all matters pertaining to the medical inspection of the schools. They shall see that all orders and requests of said Board are properly executed by teachers. The annual test of the sight and hearing of pupils required by Statute shall be made by teachers under direction of this committee.

The following sentence was added to Section 80 of the Rules:—

They shall see that fire drills are practiced in their respective buildings at least once in every two weeks, provided that the weather conditions are suitable.

Section 44 of the Rules was amended by making the first sentence of the second paragraph to read as follows. Adopted April, 1907:—

He shall annually publish and send to each member of the Board a complete list of all books, charts, maps, and globes with the number of each kind belonging to the city.

**ORGANIZATION OF SOMERVILLE SCHOOLS.**

---

Information concerning our schools is frequently sought by citizens or by educators in other localities. Following are the principal facts concerning them:—

**Kindergartens.** The city supports four kindergartens, in the Hanscom, Bennett, Baxter, and Glines Schools. Vaccinated children between four and five years of age are admitted to the kindergarten nearest their residence during the months of September and April, and may remain until the July following their fifth birthday. Sessions from 9 to 11.45.

Head kindergartners receive \$600. One trained assistant is allowed when the number exceeds thirty, at a salary of \$275, \$350, or \$425, according to experience. Kindergarten teachers give five hours daily to their work, the afternoon being employed in visitation, preparation, mothers' meetings, and the like.

**Primary Schools.** Our elementary school course covers nine years, the first three of which are spent in primary schools. We have one exclusively primary school building, the ninety-three primary classes being distributed among twenty-three school-houses.

Vaccinated children five years of age, or who will reach that age on or before the first day of October, are admitted during the month of September only, provided they have never attended school before. Children able to enter existing classes will be admitted at any time. Applications for admission should be made to the principal of the school.

Only trained or experienced teachers are employed, the salaries being \$300, \$375, \$450, \$525, \$600, \$650, or \$700, according to length of service. Normal training is equivalent to a year's experience, and experience in other places may be counted in determining salary.

Teachers of any grade, with classes numbering fifty, are allowed an assistant at the option of District Committees, who is paid \$200, \$275, \$350, or \$425, according to years of service.

**Grammar Schools.** The grammar grades are found chiefly in twelve large buildings, of twelve or more rooms each. The course covers six years, and includes only those studies which the statute requires, with the addition of music, sewing, elementary science, and sloyd manual training in the two upper grades.

The salaries of grammar school teachers are the same as those of primary teachers. Masters are paid \$1,900, and their assistants \$775. Other ninth-grade teachers are paid \$725. Principals of smaller schools receive \$775, \$825, \$900, \$950, or \$1,000.

**Promotions.** Promotions in all grades, from the first to the thirteenth, are made in June by the regular teacher and the prin-

cipal, with the approval of the Superintendent and district committee. They are based on the estimate of the pupil's daily work made by the teacher and recorded bi-monthly. An occasional brief, unannounced, written test is a factor in this estimate.

Where there is reasonable doubt of a student's fitness, he may be promoted on a trial of three months. In such cases the parent is notified and kept informed of his child's progress. At the end of this probationary period he may be returned to his former grade, provided it seems for his interests. In 1907 eleven per cent. of those promoted on trial fell back.

Children capable of more rapid advancement may be promoted one or more grades at any time. Forty-nine were thus promoted in 1907.

Fitness for graduation or for admission to the high schools is determined in precisely the same way. Diplomas are given in grammar and high schools to those who have satisfactorily completed full courses.

**Latin High School.** In September, 1895, in the forty-third year of its existence, the Somerville High School was divided, the classical, or college preparatory, departments remaining in the old building, erected in 1872, and the English departments occupying a new building, erected in 1894-'95.

Some facts concerning the Latin School are presented in the following table:—

School Year.	Average Number Belonging.	Number Entering.	Graduates.	Cost of Instruction.	Per Capita Cost.	Teachers.	Pupils to Teacher.
1895-6	257	69	50	\$11,702	\$45.57	9	28.6
1896-7	262	81	51	11,840	45.19	9	29.1
1897-8	273	86	55	11,921	43.67	9	30.3
1898-9	264	78	51	11,935	45.21	9	29.3
1899-0	245	65	48	12,491	50.98	9	27.2
1900-1	271	104	56	12,676	46.74	9	30.0
1901-2	314	114	56	12,583	40.13	10	31.4
1902-3	358	125	46	14,170	39.58	11	32.5
1903-4	398	122	73	16,104	40.46	13	30.6
1904-5	411	138	76	16,566	40.31	13	31.6
1905-6	431	135	81	16,991	39.42	14	30.8
1906-7	425	122	75	19,243	45.20	15	28.5

The object of the school is, primarily, to furnish a suitable preparation for those pupils who desire to pursue either a regular or a special course of study at higher institutions of learning, but the school is open to all pupils who wish to take the courses of study offered.

The regular time for completing the course is four years. Pupils, at the request of their parents, can make the work of each year easier by taking five years for the course. Those who are capable, and have good reason for shortening the time of preparation, are allowed to complete the course in as short a time as their ability will permit.

Graduates of grammar schools are admitted to either high school on presenting a certificate of qualification signed by a master. All other pupils are admitted by an examination in grammar school studies, given usually on the day preceding the opening of the schools in September.

The tuition for non-residents is the per capita cost for the year, payable in advance. The sessions of the school are from 8.30 to 1.30. The salaries paid high school teachers range from \$900 to \$1,200 for women and from \$1,000 to \$3,000 for men.

#### COURSE OF STUDY IN THE LATIN HIGH SCHOOL.

##### FIRST YEAR.—CLASS I.

*Latin*.—First lessons, with translation of easy Latin prose, and introduction to Caesar.

*Mathematics*.—Elementary algebra through quadratic equations.

*History*.—Ancient history, with historical geography.

*English*.—Introduction to English literature, with special study of works of American authors. Rhetoric and English composition.

*Elective Drawing*.

##### SECOND YEAR.—CLASS II.

*Latin*.—Easy Latin prose, with four books or less of Caesar's Gallic War. Latin prose composition.

*Mathematics*.—Plane geometry.

*English*.—English literature, including part of the works prescribed in the requirements for admission to college. Rhetoric and English composition.

One of the three following languages:—

1. *Greek*.—First lessons, with translation of easy Greek prose and introduction to Anabasis.

2. *German*.—First lessons, with translation of easy German. German conversation and written composition.

3. *French*.—First lessons, with translation of easy French. French conversation and written composition.

One of these languages may also be *elective*.

*Elective Drawing*.

##### THIRD YEAR.—CLASS III.

*Latin*.—Selections from Sallust, Nepos, Caesar, and Ovid. Aeneid, four books. Cicero, three orations.

*Mathematics*.—Algebra reviewed and completed to satisfy the requirements for admission to college.

*History.*—History of Greece and Rome. Ancient geography.

*English.*—English literature, including part of the works prescribed in the requirements for admission to college. Rhetoric and English composition.

*Elective Physics.*—Elementary principles, with experiments and a course of laboratory exercises Friday afternoons during the year.

One of the three following languages:—

1. *Greek.*—Selections from Anabasis, Hellenica, and other Greek prose. Greek prose composition.
2. *German.*—Translation of German prose and poetry, with conversation and written composition. Grammar.
3. *French.*—Translation of French prose and poetry, with conversation and written composition. Grammar.

One of these languages may also be *elective*.

*Elective Chemistry.*

*Elective Drawing.*

#### FOURTH YEAR.—CLASS IV.

*Latin.*—Aeneid, five books. Ovid, 2,000 lines. Cicero, six orations. Latin prose composition.

*Mathematics.*—Review of plane geometry, with original demonstrations and solutions of problems. *Elective* solid geometry.

*English.*—English literature, including the remainder of the works prescribed in the requirements for admission to college. Rhetoric and English composition.

Two of the three following languages:—

1. *Greek.*—Seven books of Iliad and Odyssey. Selections from more difficult Greek prose. Greek prose composition.
2. *German.*—Elementary German for beginners. Advanced German for those who have studied the language earlier in the course.
3. *French.*—Elementary for beginners. Translation of simple prose and poetry, with conversation and written composition as a preparation for translation at sight of easy French into English and English into French. Grammar. Advanced French for those who have studied the language earlier in the course.

*Elective Chemistry.*

*Elective Drawing.*

There is practice in sight reading in all the languages each year.

Advanced French, advanced German, advanced mathematics, and chemistry may be substituted for a part of the Latin, a part or a whole of the Greek.

There are exercises in debate during the whole course in English.

In each language there are five recitations a week during the year.

Special courses are marked out to meet the wants of those pupils who desire special preparation for special courses in college or professional schools.

**English High School.** This school was organized in September, 1895. Information concerning it is found in the following table:—

School Year.	Average Number Belonging.	Number Entering.	Graduates.	Cost of Instruction.	Per Capita Cost.	Teachers.	Pupils to a Teacher.
1895-6	456	213	67	\$20,102	\$44.13	21	21.7
1896-7	531	235	70	23,010	43.33	21	25.3
1897-8	535	224	75	24,843	46.44	22	24.3
1898-9	575	231	86	26,159	45.49	23	25.0
1899-0	669	316	83	31,322	46.82	27	24.8
1900-1	691	249	97	32,739	47.35	30	23.0
1901-2	738	294	108	35,989	48.74	34	21.7
1902-3	747	264	135	36,843	49.32	33	22.6
1903-4	728	264	106	36,426	50.04	33	22.1
1904-5	784	339	135	39,634	50.56	33	23.8
1905-6	893	378	127	39,823	44.60	35	25.5
1906-7	994	402	148	42,862	43.12	39	25.5

The course of study covers four years. Graduates are admitted to special courses when the conditions are favorable. Candidates for technical and normal schools take specific preparatory work.

1. A pupil in course for a diploma is required to take studies representing *at least eighteen points* each year, consisting of the required studies with additional electives to make the necessary number of points. Pupils who do not take the required amount or kind of work are classed as partial students. The number of periods each week of a subject is in general the same as the number of points which it represents. Exceptions to this will be found in subjects of a laboratory nature, as manual training, drawing, typewriting, penmanship, the sciences, etc. In these subjects extra school periods are assigned because of the unprepared nature of the work.

2. Elective studies for any year may be selected from the list for that year and from the list for any *preceding* year. Only one foreign language and only one science may be begun the

same year. A language should be continued two years, at least; a longer time is strongly urged.

3. Pupils who are unable to take the full course, *i. e.*, eighteen points a year for four years, may arrange for a five-years' course by consulting the Superintendent and head master.

4. No pupil will be permitted to take subjects representing more than eighteen points each year, unless his scholarship and health warrant the increase. The above regulation refers to the addition of an extra study after eighteen points have been selected, but does not forbid the choice of studies unavoidably exceeding the required number of points.

5. Regular courses are required in preparation for normal schools and for scientific schools.

6. Pupils electing manual training must also elect mechanical drawing, although mechanical drawing may be elected without manual training.

7. Pupils electing a commercial course will be allowed to substitute commercial arithmetic for mediaeval history during the second year.

8. In the election of commercial subjects, commercial arithmetic and penmanship must precede bookkeeping. Bookkeeping (1) must be accompanied by penmanship (2), and stenography by typewriting. The selection of typewriting without stenography is strongly opposed.

9. There must be a sufficient number of pupils desiring a certain elective to warrant a class being formed in that subject.

10. A condition or failure of any year (excepting that of a *required* subject) may be removed in three ways: (1) by passing a satisfactory examination on the subject, (2) by repeating the subject in course, and (3) by taking as an extra subject during any following year an elective of an equivalent number of points.

11. In the spring of each year pupils will be asked to choose electives for the following year. No change of course will be allowed during the year, except for urgent reasons, and then only by permission of Superintendent and head master.

Concerning admission, sessions, etc., see Latin School.

A simple, healthful, inexpensive lunch is served at the recess midway of the session to pupils desiring it.

**Manual Training.** Three rooms are fitted and equipped in the basement of the English High School for its manual training department. The course includes carpentry, wood-turning, and carving, clay modeling, pattern making, moulding, and casting. A fourth room is devoted to mechanical drawing, with a full course. Manual training has been extended to include the eighth grade in the grammar schools, two centres having been established with twenty-five sloyd benches each.

The men in charge of the manual training department are paid \$1,700, \$1,500, \$1,100, and \$1,000.

**Sewing.** Sewing is taught to the girls in the fifth, sixth, seventh, and eighth grammar grades in weekly lessons of about one hour each.

Three special teachers are employed at salaries of \$700.

**Music.** Instruction in music is given exclusively in the high schools and in part in the three upper grammar grades by a specialist, who is paid \$1,700. The books used are "The Euterpean," "The Cecilian Series of Music and Song," Nos. 1, 2, 3, and 4, and "The Laurel Song Book."

In the six lower grades musical instruction is given by the regular grade teacher, under the supervision of a specialist, who visits each class once every fifteen days. She is paid \$900. The Normal System of Music, with its books and charts, is used.

**Gymnastics** In elementary grades the Ling system of Swedish gymnastics is practiced daily. No special teacher is employed.

**Recesses.** The Latin School has two brief recesses, breaking the daily sessions into thirds. The English School has a single recess at the end of the third period.

The four lower elementary grades have a five-minute recess midway of each session. The five upper grammar grades have no recess, though no unreasonable physical restraint is placed upon any pupil.

No detention of pupils is allowed at noon, and but a half-hour's detention at the close of the afternoon session, "for wilful neglect of duty only."

**Corporal Punishment.** Corporal punishment, "which includes any infliction of physical pain or application of physical force," is not prohibited. It must, however, not be administered until twenty-four hours after the offence, the approval of the principal being first obtained. Each case must be reported in detail to the Superintendent. There were 339 cases in 1905, 326 in 1906, and 314 in 1907.

**Drawing.** Two teachers of drawing are employed in the English High School at salaries of \$1,000 and \$800. In that school freehand drawing is compulsory for first-year pupils, and elective for all others. Drawing is not taught in the Latin School. A few Latin School pupils take drawing in the English School.

In the primary grades daily lessons, and in the grammar grades semi-weekly lessons are given by the regular teacher, under the direction of a supervisor, who visits each class once a month, and is paid \$1,000.

The course includes pictorial drawing from nature, models, and objects; structural drawing from type solids; decorative drawing, designing, and color work, historic ornament and

picture-study. No drawing books are used. Colored crayons are provided in primary grades, and water-colors and brush in grammar grades.

**Penmanship.** Intermedial slant writing is taught in the elementary schools, the Whitehouse system being used. The supervisor visits each class once in four weeks, and receives \$1,500.

**Cadet Teachers.** Provision has been made for the employment in the elementary schools of not exceeding twelve "Cadet teachers," at a salary of \$200 each. Three such teachers are at work at the present time.

**The Public Library.** The English School has a working library of 1,700 volumes, but it draws constantly on the public library, located in an adjoining building.

For many years there has been a constant use of the library by school children. One hundred and sixty-five circulating libraries of fresh books are in use in the smaller buildings. As far as they can, the teachers guide in the selection of books by the children, and the librarian and his assistants cheerfully render all the help in their power.

**Evening Schools.** An evening high school is maintained in the English High School building on three evenings a week, from 7.30 to 9.30. The principal is paid \$6, and his assistants \$4, \$3, \$2, and \$1.50. Any high school study, and freehand and mechanical drawing, may be pursued.

Elementary evening schools are open in the Prescott, Bell, and Highland buildings from October 1 on four evenings a week, from 7.30 to 9.30. The length of the term is dependent on the interest and attendance. The course of study followed is that prescribed by the Statutes. Principals receive \$3 or \$4, and assistants, \$2, \$1.50, or \$1 each evening.

**Truants.** The city employs one active truant officer, who is paid \$1,100 and the board of his horse. Truants are sent to the county truant school at North Chelmsford. There are now eighteen truants from Somerville in the school.

**Janitors.** These important officers are appointed by the Commissioner of Public Buildings, and are under his direction and that of the school principal.

**Supervision.** The Superintendent of Schools is the executive officer of the Board, and upon him devolves the general management of the schools under its direction. He serves as the secretary of the Board and as supply agent. His salary is \$3,000, and he is allowed two clerks, who receive \$750 and \$600. His office is in the City Hall Annex, and his hours are from 4

to 5 each school day, and from 8 to 9 on Saturday. His office is open from 8 to 5 on school days, and from 8 to 10 on Saturdays.

The meetings of the School Board are held on the last Monday evening of each month, except July, August, and December, at 8.15 o'clock.

### OLD SCHOOLHOUSES.

As a matter of record and reference, the following facts are given concerning old buildings that have given way to modern structures:—

In 1842, when Somerville started on an independent career as a town, its entire educational establishment comprised five small school buildings, accommodating 247 pupils, with an assessed valuation of \$3,150. The only man who taught in the town received an annual salary of \$450, and each of four women was paid \$157.50 for a year's work.

These schoolhouses were located as follows:—

The "Pound Primary" on Broadway, corner of Franklin street.

The "Winter Hill Primary," west side of Central street, near Broadway.

The "Milk Row Primary" on Somerville avenue, next to the cemetery.

The "Prospect Hill Primary" in what is now Central square.

The "Prospect Hill Grammar" adjoining the primary in Central square.

Since that day the municipality has erected forty-four school buildings, eighteen of which have been destroyed or abandoned. The remaining twenty-six are in use to-day. As a matter of record it will be interesting to note what and where these buildings were and what has become of them.

In 1843 what was known as the *Walnut Hill* Schoolhouse was built on Broadway, near Irving street, to accommodate a small school in what was known as the Russell district, which up to this time had been kept in a private house. In 1868 this building was moved to Cedar street, doubled in size in 1873, and abandoned on the completion of the Burns enlargement in 1899.

In 1843 the *Pound Primary* was replaced by what was known as the *Lower Winter Hill* Schoolhouse and used until 1848, when it was moved to Beacon street and became the *Harvard Primary* School. In 1861 it was enlarged, burned in 1871, and replaced by what was originally the *Bell Primary*, moved first from Cherry street to Kent and Somerville avenue, in 1867, and thence to Beacon street in 1871. This building was abandoned for school purposes in 1899 and made into a dwelling house.

In 1846 the *Franklin* Schoolhouse was built on Somerville avenue and Kent street. Its two rooms were duplicated in 1862,

and the building was abandoned and destroyed on the completion of the Carr School in 1898.

The *Milk Row Primary* was burned in 1849, and its pupils sent to the Franklin.

In 1848 a four-room schoolhouse, built on Washington street and Bonner avenue, replaced the Prospect Hill Schools, and two rooms were added thereto in 1865. The building was abandoned for school purposes in 1902. It is still standing, and furnishes accommodations for the Somerville Boys' Club.

In 1850 a one-room building to accommodate the *Spring Hill Primary* School was built on Beech street, near Harvard. It was closed in 1892, and destroyed in 1898 to make way for the Carr building.

In 1861 the *Brastow* Schoolhouse was built on the present site of the Central Fire Station. Its two rooms were occupied until 1891. The building was afterwards removed to Hamlet street and converted into a dwelling house.

In 1861 the *Jackson* Schoolhouse, with four rooms, was built at the corner of Poplar and Maple streets. This building was duplicated in a nearby location on Joy street in 1868 by the *Bennett* Schoolhouse. These buildings were abandoned and destroyed in 1902, being replaced by the present Clark Bennett School.

In 1868 the *Webster* Schoolhouse, with four rooms, was built on Webster avenue, and used until 1893, when it was destroyed by fire.

In 1872 a Baptist chapel on Beech street was bought for school purposes, and its two rooms were occupied by the *Beech Street Primary* until 1898, when the building was destroyed and replaced by the Carr School.

The *Upper Winter Hill* Schoolhouse was moved in 1855 from Central street to the present site of the Prescott School, and thence in 1856 to Prospect street, and occupied by the *Union* School until 1890.

The building occupied by the *Prospect Hill Primary* was removed to the corner of Washington and Prospects streets, where it is now occupied by the Veteran Firemen's Association.

### BRIEF HISTORY OF PRESENT SCHOOLS.

[NOTE—Biographical sketches of gentlemen after whom schools have been named will be found on page 102 of the school report for 1894 and in subsequent reports.]

As a matter of present interest, but chiefly for future reference, the following brief historical statements are made with reference to existing schools.

The *Somerville High School* was first opened May 3, 1852, in a building constructed for the purpose and now constituting the principal portion of the City Hall. Sixty-one pupils attended the

first term. This building was occupied by the school until March 4, 1872, when the present Latin building was occupied by its 150 pupils. The school having outgrown its quarters, the *English High School* building was constructed in 1895. The school was divided, the college-preparatory section continuing to occupy what has since been known as the Latin School, while 508 pupils were transferred and constituted what has since been known as the English High School. The unprecedented growth of the high schools led to the erection in 1906 of an addition called the Latin School Annex, which is used conjointly by the English and the Latin Schools. The following gentlemen have served as masters of the Latin School:—

Robert Bickford, May, 1852, to March, 1854.  
 Leonard Walker, March, 1854, to September, 1856.  
 Samuel J. Pike, September, 1856, to August, 1858.  
 Isaac N. Beals, August, 1858, to August, 1859.  
 H. H. Babcock, August, 1859, to August, 1867.  
 George L. Baxter, August, 1867, to ————

The masters of the English High School have been:—

Charles T. C. Whitcomb, June, 1895, to June, 1906.  
 John A. Avery, June, 1906, to ————

The first (William H.) *Prescott* Schoolhouse was erected on the corner of Franklin street and Broadway in 1846, to replace what was known as the Pound Primary. This building was burned in 1856. The Prescott School building No. 2 contained seven rooms, and stood on the site of the present structure. It was burned in 1866. The present building, containing ten rooms and a hall, which has since been converted into classrooms, was built in 1867. Previous to 1852 only women teachers were employed. The following men have served as masters of the school:—

Robert Bickford, September, 1851, to March, 1852.  
 McLaurin F. Cook, April, 1852, to November, 1853.  
 H. O. Whittmore, November, 1853, to August, 1854.  
 Daniel B. Wheeler, September, 1854, to August, 1859.  
 John Wilson, August, 1859, to February, 1872.  
 Augustus Linfield, March, 1872, to May, 1872.  
 Luther B. Pillsbury, June, 1872, to June, 1873.  
 Gordon A. Southworth, October, 1873, to June, 1893.  
 Samuel A. Johnson, September, 1893, to ————

The (Charles) *Forster* Schoolhouse No. 1 was built in 1854 near the site of the present building on Sycamore street, and contained four schoolrooms. It was burned in February, 1866. It was replaced by the present building in 1867. The hall which occupied the third floor was converted into classrooms in 1883. The annex to the school, containing six rooms, was built in 1899. The following gentlemen have been masters of the school:—

John Jameson, February, 1855, to January, 1860.  
 Edward W. Howe, January, 1860, to August, 1864.

Charles G. Pope, August, 1864, to September, 1870.  
 George R. Bradford, September, 1870, to July, 1878.  
 John S. Hayes, September, 1878, to June, 1893.  
 Fred C. Baldwin, September, 1893, to ———

The (Enoch R.) *Morse* Schoolhouse was built in 1869 on Summer street, and contained four rooms and a hall. In 1880 the hall was divided into classrooms. In 1889 an addition of six rooms was made. The following have been masters of the school:—

William B. Allen, November, 1869, to 1877.  
 William M. Stevens, 1882 to 1883.  
 C. C. Hunkins, 1877 to 1882.  
 Frank F. Murdock, 1883 to 1884.  
 Henry C. Parker, 1884 to 1886.  
 Horatio D. Newton, 1886 to 1890.  
 Mina J. Wendell, 1890 to ———

The (John G.) *Edgerly* School was built on Cross street in 1871, and contained four rooms. Four rooms were added in 1882, and four more in 1892. The principals have been:—

Augusta M. Cowles, 1871 to 1881.  
 Frank P. Hudson, 1881 to 1888.  
 Edgar R. Raub, 1888 to 1889.  
 Charles E. Brainard, 1889 to ———

The *Luther V. Bell* School on Vinal avenue, containing twelve rooms, was built in 1874. It received its pupils from the Prospect Hill School, of which it is virtually the successor. The Prospect Hill School was the oldest grammar school in the city, having been opened in 1842. Its principals were:—

William E. Graves, April, 1842, to October, 1846.  
 Martin Draper, Jr., October, 1846, to May, 1847.  
 Charles S. Lincoln, April, 1847, to April, 1853.  
 Oren S. Knapp, May, 1853, to February, 1864.  
 George R. Bradford, March, 1864, to May, 1866.  
 Samuel C. Hunt, May, 1866, to September, 1874.

The masters of the Bell School have been:—

Samuel C. Hunt, September, 1874, to July, 1876.  
 Simeon C. Higgins, 1876 to 1879.  
 Robert Bickford, 1879 to 1885.  
 Herbert L. Morse, 1885 to 1890.  
 Fred W. Shattuck, 1890 to 1897.  
 Harlan P. Knight, 1897 to ———

The (Charles S.) *Lincoln* Schoolhouse No. 1 was built on College avenue in 1866, and contained four rooms. In 1881 it was moved to the present site in Teele square, and was burned in October, 1884. It was rebuilt in 1885. The principals have been:—

Horace P. Makechnie, 1867 to 1876.  
 Edward E. Bradbury, 1876 to 1877.  
 George E. Nichols, 1877 to 1880.  
 Mary A. Paul, 1880 to 1887.

Hattie A. P. Roth, 1887 to 1889.  
 Harry F. Hathaway, 1889 to 1894.  
 Grace Emerson, 1894 to 1895.  
 Elizabeth Hodgdon, 1895 to 1896.  
 J. Louise Smith, 1896 to 1900.  
 May E. Small, 1900 to 1903.  
 Eliza H. Lunt, 1903 to ————

The *Highland* Schoolhouse on Highland avenue was built in 1880. It contained eight rooms, to which four rooms were added in 1891. Its principals have been:—

George E. Nichols, September, 1880, to October, 1902; September, 1903, to June, 1905.  
 J. Sherman Richardson, October, 1902, to January, 1903.  
 Ernest W. Robinson, January, 1903, to June, 1903.  
 Aaron B. Palmer, September, 1905, to ————

The (Joshua H.) *Davis* Schoolhouse was built in 1884, to replace a one-room building which stood near the present site on Tufts street. Its principals have been:—

Lucretia A. Burns, 1884 to 1896.  
 Frances Meldrum, 1896 to 1900.  
 Harriet C. Roxbury, 1900 to 1901.  
 Mary A. Holt, 1901 to ————

The *John A. Cummings* Schoolhouse on School street was built in 1884. The building contains four rooms. Its principals have been:—

Lydia J. Page, 1884 to 1902.  
 Fannie L. Gwynne, 1902 to ————

The (Norman W.) *Bingham* Schoolhouse was built in 1886. In 1894 four rooms were added, and in 1904 the capacity of the building was doubled. The principals have been:—

Nora F. Byard, 1886 to 1894.  
 Harry F. Hathaway, 1894 to ————

The (Mark F.) *Burns* Schoolhouse was built in 1886. It contained four rooms, to which four more rooms were added in 1899. The principal has been:—

Laura J. Brooks, 1886 to ————

The *Oren S. Knapp* Schoolhouse on Concord avenue, containing eight rooms, was built in 1889. Four rooms were added in the rear in 1894. Its masters have been:—

Harry N. Andrews, 1890 to 1894.  
 John Sherburne Emerson, 1894 to ————

The *Jacob T. Glines* Schoolhouse on Jaques street was built in 1891. It contained eight rooms, and was enlarged by the addition of five rooms in 1896. Its principals have been:—

Mrs. Cora E. Dimpsey, 1891 to 1893.  
 Mary E. Northup, 1893 to ————

The *George W. Durell* Schoolhouse on Kent street was built in 1894, its principals having been:—

Nora F. Byard, 1894 to 1905.

Abigail P. Hazelton, 1905 to ———

The *William H. Hodgkins* Schoolhouse on Holland street was built in 1896. Its only master has been:—

Arthur L. Doe, 1896 to ———

The *Sanford Hanscom* Schoolhouse on Webster street was erected in 1897. It contained six rooms, to which four rooms were added in 1907. Its principals have been:—

Lina F. Bates, 1897 to 1905.

Elizabeth M. Collins, 1905 to ———

The *Martin W. Carr* Schoolhouse on Beech street, containing seventeen rooms, was erected in 1898. It superseded the Franklin and Beech Street Schools. Its only master has been:—

Charles G. Ham, 1898 to ———

The *Albion A. Perry* Schoolhouse on Washington street was constructed in 1899. It contained six rooms. Its principals have been:—

Laura B. Underhill, 1899 to 1901.

Mary B. McKusick, 1901 to 1905.

Catherine E. Sweeney, 1905 to ———

The *George L. Baxter* Schoolhouse on Bolton street, containing six rooms, was built in 1901. Its only principal has been:—

Helen Tincker, 1901 to ———

The *Benjamin G. Brown* Schoolhouse on Willow avenue was erected in 1901. It contained six rooms, and was enlarged by the addition of four rooms in 1907. Its principals have been:—

Harriette C. Baker, 1901.

Annie G. Smith, 1901 to 1908.

In 1907 it was made a full-grade grammar school centre, under the mastership of

George I. Bowden, January, 1908, to ———

The *Clark Bennett* Schoolhouse was built on Joy street in 1868. Together with the Jackson School, it was superseded by the present Clark Bennett School erected on Poplar street in 1902. It contains twelve rooms, under the principalship of

Annie E. McCarty, 1902 to ———

The *Martha Perry Lowe* Schoolhouse was erected on Morrison avenue in 1903. It contains eight rooms, under the principalship of

May E. Small, 1903 to ———

The *George O. Proctor* Schoolhouse on Hudson street, containing nine rooms, was built in 1905. Its principal has been:—

Nora F. Byard, 1905 to ———

**SOMERVILLE TEACHERS' ASSOCIATION.****OFFICERS, 1908.**

President, Everett W. Tuttle.

Vice-President, Frank H. Wilkins.

Secretary-Treasurer, Emma F. Schuch.

Executive Committee:—

Gordon A. Southworth.	Lilla M. Marble.
Susie M. Hosmer.	Mary I. Bradish.
Carrie T. Lincoln.	Clara D. Eddy.
Phenie L. DuGar.	M. Florence Eustis.

Clara B. Sackett.	Alice G. Hosmer.
Charlotte Holmes.	Mary Winslow.
Minnie A. Holden.	Annie G. Smith.
M. Abbie Tarbett.	M. Alice Paul.
Naomi E. Stevens.	Katherine E. Hourahan.
Fannie L. Gwynne.	Beatrice A. Randall.
Charles E. Brainard.	Eliza H. Lunt.

## CONSTITUTION OF THE SOMERVILLE TEACHERS' ASSOCIATION.

### I. NAME.

This Association shall be known as the Somerville Teachers' Association.

### II. OBJECTS.

The objects of this Association shall be to unite all teachers of Somerville into one organized body of professional workers for the welfare and progress of the public schools, to consider the aspects of education, to study its principles, to improve its methods, and to advance teaching as a profession.

### III. PRINCIPLES.

This Association holds:—

1. That the highest end of education is the formation of character.
2. That this end is to be attained through the complete and harmonious development of the human being in his threefold nature,—physical, intellectual, and moral.
3. That intellectual development depends upon the conscious self-activity of the individual in the exercise of all the faculties of perception, thought, and expression.
4. That a system of education should furnish such instruction and training as shall stimulate all the energies of the child in their natural order and at the proper time, by means of appli-

ances, material, and subjects of instruction adapted to his varying powers.

5. That the child is of more importance than the school; that the natural growth of the child in his threefold character should never be subordinated to the maintenance of an organization or machine.

6. That we all, being members of one body, and realizing the importance of each and every one to the whole system, hold it to be our duty to give to one another all the sympathy, aid, and co-operation in our power, and so far as the opportunities may permit, to familiarize ourselves with the aims, principles, and methods of the several departments of our school system, in so far as such knowledge may contribute to the general welfare and progress, and render our individual work more effective.

#### IV. OFFICERS.

1. The officers of the Association shall be a President, two Vice-Presidents, and a Secretary-Treasurer, who, with fifteen other members, shall constitute the Executive Committee. Each high school, each grammar school, and one of the smaller schools in each district shall be represented on this committee. The Superintendent of Schools is a member, *ex-officio*, of this committee.

#### ELECTION.

2. The officers shall be elected annually, at the last regular meeting of the year.

#### DUTIES.

3. The duties of the President, Vice-Presidents, and Secretary-Treasurer shall be such as usually devolve upon these officers.

4. It shall be the duty of the Executive Committee to arrange the programmes of the meetings of the Association, and to change the date of any meeting, if necessary.

#### QUORUM.

Seven shall constitute a quorum of the Executive Committee for the transaction of business.

#### BY-LAWS.

#### MEETINGS.

1. The meetings of the Association shall be held in the English High School building, and shall take place on the second Wednesday in February, April, October, and December. There may also be a fifth meeting of a social character at a time and place to be arranged by the Executive Committee.

2. The hour of the stated meetings shall be 3.30 P. M.

## DUES.

3. The annual dues shall be fifty cents, payable at the first meeting of the year. Assessments may be called by vote of the Association.

## AMENDMENTS.

4. Amendments may be made by a two-thirds vote of the Association.

## SOMERVILLE KINDERGARTEN ASSOCIATION.

The teachers in Somerville kindergartens are united in an association, the object of which is to promote interest in the kindergarten on the part of parents and others, and to extend a knowledge of its principles. Several general public meetings have been held during the year. Mothers' meetings are held frequently at the local kindergarten rooms.

## NAMES OF MEMBERS OF THE SCHOOL BOARD UNDER THE SECOND CHARTER.

**January, 1900, to January, 1908.**

### FROM WARD ONE.

George S. Poole.....	1900-1905 .....	5 yr.
S. Newton Cutler.....	1900-1904 .....	4 yr.
Henry F. Curtis.....	1904- .....	
William W. Kennard.....	1905-1907 .....	2 yr.
Elmer H. Spaulding.....	1907- .....	

### FROM WARD TWO.

Edward J. Flynn.....	1900-1905 .....	5 yr.
John H. O'Neil.....	1900-1904; 1905-1907 ..	6 yr.
Daniel H. Bradley.....	1904- .....	
Thomas M. Clancy.....	1907- .....	

### FROM WARD THREE.

Dana W. Bennett.....	1900-1905 .....	5 yr.
James F. Beard.....	1900- .....	8 mos.
Alvah B. Dearborn.....	1900-1902 .....	1 yr. 4 mos.
George E. Whitaker.....	1902- .....	
Wilbur S. Clarke.....	1905- .....	

### FROM WARD FOUR.

William P. Jones.....	1900-1907 .....	7 yr.
George W. W. Whiting.....	1900-1906 .....	6 yr.
Charles A. Kirkpatrick, Jr.....	1906- .....	
George W. Foster.....	1907- .....	

### FROM WARD FIVE.

J. Walter Sanborn.....	1900- .....	
Quincy E. Dickerman.....	1900-1906 .....	6 yr.
Henry H. Folsom.....	1906- .....	

### FROM WARD SIX.

Martin W. Carr.....	1900-1901 .....	1 yr.
Frederick A. P. Fiske.....	1900- .....	
Fred M. Carr.....	1901-1903 .....	2 yr.
Charles H. Hood.....	1903-1907 .....	4 yr.
Leon M. Conwell.....	1907- .....	

### FROM WARD SEVEN.

Henrietta B. H. Attwood.....	1900- .....	
George A. Miles.....	1900-1904 .....	4 yr.
George C. Mahoney.....	1904- .....	

(In 1905 the Charter was amended so that the Mayor and the President of the Board of Aldermen become members, ex-officiis, of the School Board.)

### MAYORS.

Leonard B. Chandler.....	1905-1906 .....	1 yr.
Charles A. Grimmons.....	1906- .....	

### PRESIDENTS OF THE BOARD OF ALDERMEN.

John J. Higgins.....	1905-1906 .....	1 yr.
Sidney B. Keene.....	1906-1907 .....	1 yr.
Leonard W. Cole.....	1907- .....

## CONTENTS OF APPENDIX II.

---

### Concerning Finance.

No. of Table

1. Schedule of school property
2. Cost of maintaining schools, 1907
3. Cost per capita of maintaining schools, 1907
4. Cost of maintaining schools for a series of years
5. Cost per capita for maintaining schools for a series of years
6. Amount spent annually for new school buildings and for repairs for a series of years

### Concerning Pupils.

7. Population and school census
8. Attendance, etc., of the schools for 1907
9. Statistics of the high schools, for school year 1906-1907
10. Pupils by grades, December, 1907
11. Separate statistics for grammar and primary schools, 1907
12. Admissions to first grade in September
13. Number of grammar school graduates, 1907
14. Truant statistics
15. Evening school statistics, 1906-1907
16. Grammar school graduates for a series of years
17. Attendance statistics of all schools for a series of years
18. Statistics of the high school for a series of years
19. Promotions, 1907

### Concerning Teachers.

20. Resignations of teachers, 1907
21. Teachers elected in 1907
22. Leave of absence of teachers
23. Transfers of teachers
24. Number of teachers employed for a series of years

### Miscellaneous.

25. Changes in text-books, 1907
26. High school graduation exercises, 1907
27. Grammar school graduation exercises, 1907
28. Organization of school board for 1908
29. Teachers in service, January, 1908
30. Officers in service January, 1908
31. School janitors

TABLE 1.—SCHOOLHOUSES.

Joseph Victor Pacios.	

#### TABLE 27.—GRAMMAR SCHOOL GRADUATES.

The lack of a hall large enough to accommodate all the grammar school graduates and their friends compelled us to devote two evenings to the graduation exercises. Accordingly, Tuesday evening, June 25, and Wednesday evening, June 26, were set apart for the purpose.

The following was the order of exercises on Tuesday evening:—

##### Order of Exercises.

J. Walter Sanborn, Vice-Chairman of the School Board, presiding.

- Overture.  
"Light Cavalry." Suppé  
Orchestra.
- Prayer.

## REPORT OF THE TRUSTEES.

---

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—The annual report of the trustees of the public library is herewith respectfully submitted.

We have appended to and made a part of this report the full report of the librarian, to which your honorable body is referred for the details of the year's work; we shall content ourselves with commenting briefly under the various heads.

During the last year the library has been conducted under the same policy as in recent years. Its various activities have been continued with much the same results, and no new features of importance have been introduced.

The library has done a larger amount of business this year than ever before. The total circulation of books, the largest in the history of the library, has been 419,539,—a small increase over the circulation of the previous year. This increase has evidently taken place at the central library, as the circulation of the agencies in general has scarcely maintained itself. The agency at Davis square, however, is an exception to this statement, as this agency has slightly increased its work over that of the preceding year. The proportion of the different classes of books circulated has not materially changed from that of former years. The works of fiction, always ranging within a small percentage of seventy per cent. of the gross circulation, have, this year, slightly exceeded the usual proportion, although only one-tenth of the books purchased were works of fiction.

The work of the reference and art department has proceeded in the steady manner of previous years, and has frequently been enlivened by the exceedingly interesting and instructive traveling art exhibitions. These pictures range from views of our own New England towns to views of the great historic centres of the world in both hemispheres; and are worthy of wider notice and closer study by our people, whether for pleasure or instruction. The collection of Americana, also housed in the second story, has been added to from time to time as opportunity has offered. This is a respectable collection of histories of towns in Massachusetts and Northern New England, interspersed with the more important genealogical works and local magazines on historical subjects. This room has been much visited, especially by the many who are now striving to trace their family descent.

The school work of the library has continued on the usual lines, and is extended to all teachers of the public schools who wish it. Consequently some two-thirds of the schoolrooms of the city are supplied by us with small collections of books which may be changed as often as desired, provided the resources of the library will permit it. We believe that a larger sum could advantageously be expended annually on the equipment of this school department. As it now is, the infrequent changes in the

libraries and the only partial use of them in the schools tax the department to the utmost.

Other collections are sent to other places, as enumerated in the librarian's report.

Vacation cards entitling borrowers to draw more books from the library and for longer periods than usual have been even more popular than before.

On the subject of the loss of books from the library shelves we had hoped by the close of this year to have further information which might determine our future action on the subject of continuing free access of the public to the shelves; but various causes have prevented the taking of an inventory of any considerable part of our collection. Some books have undoubtedly been taken from the children's room from time to time by mistake, which is not unnatural, as the library permits the youngest child that walks to wander among the shelves of the children's room; however, that there is still an intentional abstraction of books going on in some degree is highly probable. With a view to lessening the pilfering, as far as injunction would go, the trustees, after consultation with the city solicitor, have caused the following notices to be posted conspicuously around the library building: "The taking of books from the library without having the same charged is equivalent to larceny and will be so treated." It is believed that such notices will have a salutary effect except in cases of confirmed thieves. It is gratifying in this connection to note that an inventory taken in the reference and art department, on and about September 1, showed the loss of not a single volume for the preceding twelve months.

The subject of further library facilities for the section of West Somerville has been touched on in all of the late reports of the trustees, and until last autumn no satisfactory solution had been reached. Fortunately the question has become settled by the tender of Mr. Carnegie of a branch library building for this part of the city, to be located on the old Lincoln schoolhouse lot, and the acceptance of the same by your honorable body on October 24.

We congratulate not only the citizens of West Somerville, but those of the whole city, on this generous and useful gift. We believe that while it will redound more particularly to the welfare of the section where the building is placed, it will also enhance the dignity of the central institution. When in 1890 the experiment was tried of establishing branches to the public library of Boston, which were the first branch libraries successfully put into operation in this country, it was thought by many that the importance of the main collection would be diminished when the branches were fairly under way. This notion was speedily dissipated, for it was found that the borrowers of a library were fewer in proportion to the distance and difficulty of the access of the library building, and that while a new centre created a new class of borrowers, the library circulation of the city as a whole was increased. It was also felt that branches

would detract from the hold which the main library would have upon the people. This fear likewise proved to be unfounded, for it was shown that while the branches "created and supplied a constituency of their own, they served to make known to a larger degree the existence and capabilities of the parent institution." Similar results have uniformly followed the establishment of branches in this country and in England, with a few unimportant exceptions. Therefore we shall enter on this new phase of library development in our city with full confidence in the benefits to accrue to the city as a whole.

Conspicuous among the gifts to the library during the year is the statue of Damoxenus, presented by Mr. E. D. Jordan, of Boston. This beautiful and costly copy, in Italian statuary marble, of one of the twin figures of Canova's Boxers, represents a Greek boxer in the act of returning a blow just received from an antagonist with whom he has been contending. The beauty of the athletic figure, the expression of the countenance befitting the tragic intent, and the portrayal of symmetrical muscular development in the height of action show the consummate art of the great sculptor. The statue was placed in its present position in the curved front of the delivery room last October, and has since attracted universal attention.

For the maintenance of the library for the year 1908 the trustees ask for an appropriation of \$17,000 and the dog tax.

The request for a somewhat increased appropriation is necessitated by a greatly enlarged expenditure for binding; our annually decreasing amount of funds available for the purchase of books; and by the increase of \$100 per year in the salary of each member of the staff—an increase which the trustees believed was demanded as a matter of simple justice.

As it will be necessary to have a suitable equipment of books ready for the branch library at West Somerville, at the completion of the building, in order that the library may be put in operation without delay; and as these books can be purchased at much better advantage if procured from time to time as opportunity offers, and as the cataloguing and other preliminary work connected with the installation of these books can be done with much saving if done in moments of leisure extending through the year, the trustees have asked the city government to place at their disposal for this purpose \$1,000 of the \$2,500 which by terms of gift is to be devoted annually to the maintenance of this branch.

It remains for us again to recognize the intelligence, fidelity, and zeal of our librarian, and his ready helpfulness to the public on all occasions, and the efficient and harmonious working of the corps of assistants.

Respectfully submitted for the board of trustees,

EDWARD C. BOOTH,  
President.

December 31, 1907.

## REPORT OF THE LIBRARIAN.

To the Trustees of the Somerville Public Library:—

I herewith submit the librarian's thirty-fifth annual report. In accordance with recent custom, the details of the library's activities for the year are given by departments.

### The Cataloguing Department.

The cataloguing department, under the supervision of Miss Esther M. Mayhew, has had an active year. Below are the statistics in detail of the work accomplished:—

#### Books Added.

Accession number January 1, 1907 . . . . .	87,501
“ “ “ “ 1908 . . . . .	92,891
Total number of books added during 1907 . . . . .	5,390
Books new to library . . . . .	3,274
Duplicates . . . . .	2,116
Total number withdrawn . . . . .	13,729
Total number of books in library . . . . .	79,162

#### Binding.

Volumes rebound . . . . .	4,659
Periodicals bound . . . . .	415
Paper-covered books bound . . . . .	20
Pamphlets . . . . .	134
Total . . . . .	5,228

#### Books Withdrawn.

Number of books worn out . . . . .	1,801
“ “ “ lost by general readers . . . . .	37
“ burned on account of infectious exposure . . . . .	60
“ lost in schools . . . . .	51
Total number withdrawn . . . . .	1,949
Total number of books withdrawn to January 1, 1907 . . . . .	11,780
“ “ “ “ “ during 1907 . . . . .	1,949
Total . . . . .	13,729

It will be noted that no mention is made above of the number of books reported missing at inventory. This omission is due to the fact that we have been unable, largely on account of illness on the part of the staff, to make any inventory during the past twelve months. A thorough inventory is a monstrous bugbear; but it is a duty that should be performed and performed thoroughly. I think perhaps unless there are well-founded suspicions of systematic thievery, the requirements of good business management would be satisfied with a biennial inventory. At any rate, a thorough inventory of all departments of the library should be made during the coming year. Various plans looking

to this end have been considered; but it becomes increasingly evident that the work cannot be done by the regular staff in addition to their routine duties in a limited period of time. The library might be closed to the public for several weeks while the inventory is going on; but this is an alternative I dislike to consider. I think the most feasible method that can be adopted would be to close up the cataloguing department for as long a period as possible during the month of July and put the cataloguers upon the work of the inventory. The reference department might also be closed, and the reference librarian devote her time to inventory work. During this period, of course, if there should be any urgent demand upon the reference department, the resources of the reference room could be used to meet this demand temporarily. This help, with some assistance from our substitutes, at a cost probably not much exceeding \$50, would supply us with what we have never yet had,—a thorough inventory of the library in a limited period of time.

The steady increase in the amount of binding done by the library should impress us that this is an item of expense that will progressively enlarge with each succeeding year. The bulk of our books have now reached an age when the need of re-binding becomes imperative. This, with the accumulative growth of the library and the increased price of binding, due to the eight-hour system that prevails in the binderies, makes a largely increased appropriation for binding necessary each successive year. This will be especially true for next year, as a large number of books requiring binding have not been sent to the binderies the latter part of the present year for lack of necessary funds.

During the latter part of the year the cataloguers have written the shelf number upon the backs of the books with gilt and various colored inks, instead of writing them upon a gummed tag. These tags become frayed and discolored, are hard to remove, and are inartistic. It is hoped the new system may give better satisfaction.

#### **School Department.**

The school department, under the supervision of Miss Mary S. Woodman, has done an increased amount of work during the past year. Though a considerable number of books is purchased for this department every year, we do not yet have a sufficiently large collection to furnish the teachers a wide range of choice. It is not sufficient to have just enough books to supply the requisite number to all the schoolrooms; but we ought to have a considerable collection of surplus books on the shelves at all times, so that the teachers may be granted a wide freedom of choice.

The shelving facilities of the school librarian's room are not sufficient to accommodate the books during the vacation months,

and many of them are stored in closets. This is an awkward and unsatisfactory arrangement, and increased shelving accommodation should be installed.

Below are the statistics of this department for the year:—

Books in library . . . . .	7,376
Increase during year . . . . .	265
Libraries out . . . . .	165
Volumes out . . . . .	6,649
Volumes delivered . . . . .	7,983
Circulation during the year:—	
Fiction . . . . .	48,564
Non-fiction . . . . .	58,440
Total . . . . .	<hr/> 107,004

### Reference and Art Department.

The reference and art department, under the supervision of Miss Mabel E. Bunker, has accomplished its usual amount of work during the past year.

Below is given the monthly attendance for the year:—

January . . . . .	972
February . . . . .	1,045
March . . . . .	1,130
April . . . . .	1,148
May . . . . .	665
June . . . . .	619
July . . . . .	471
August . . . . .	339
September . . . . .	635
October . . . . .	1,417
November . . . . .	1,172
December . . . . .	1,095
Total . . . . .	<hr/> 10,181

During the year there have been sixteen art exhibitions, as follows:—

- Famous Pictures, No. 2.
- Egypt No. 1, Cairo to Luxor.
- Yellowstone National Park, Part 3.
- Switzerland, No. 2, The Bernese Overland.
- Japan, No. 2.
- Switzerland, No. 1.
- Florence, No. 2.
- Babies in Art.
- Southern Coast of England.
- Local No. 2, Photographs of Milton, Framingham, and Lancaster.
- Concord, and Concord Fight, April 19, 1775.
- Pompeii and Herculaneum.
- The Land of Evangeline.
- Famous Pictures, No. 4.
- American Parks.
- Modern American Sculpture.

Some of the books purchased during the year for this department:—

Apocryphal New Testament.  
 Aria's Costume: Fanciful, Historical, and Theatrical.  
 Bailey's Cyclopedia of Agriculture, 2v.  
 Benham's Book of Quotations.  
 Bing's Artistic Japan.  
 Capen's Country Homes of Famous Americans.  
 Cary's Works of James McNeill Whistler.  
 Clement's Angels in Art.  
 Coemen's Essays on Glass, China, Silver, etc.  
 Cyclopedia of Law, 12v.  
 Dayot's Beautiful Women in Art.  
 Forbush's Useful Birds and Their Protection.  
 Frost's Book of Drawings.  
 Holt's Fancy Dresses Described.  
 Hooper's The Country House.  
 Hough's Handbook of the Trees of the Northern States and Canada.  
 Jackson's Intarsia and Marquetry.  
 Johnston's Writing and Illuminating and Lettering.  
 Martin & Campbell's Canada.  
 Muther's History of Modern Painting, 4v.  
 Nelson's Encyclopaedia, 12v.  
 Roger's The Tree Book.  
 Rowe's Practical Wood-Carving.  
 Solon's The Art of the Old English Potter.  
 Strange's English Furniture, Decoration, Wood-Work, and Allied

Arts.

"(The) Studio," Year Book of Decorative Art, 1907.  
 Thompson Genealogy.  
 Tissot's The Old Testament, 2v.  
 Twopenny's English Metal Work.  
 Wakeman Genealogy.  
 Wood's Scottish Pewter Ware and Pewterers.

Also some German art books:—

Alte Meister.  
 Eyth's Das Farbige Maberbuch.  
 Hoffman's Auswahl von Motiven ans der Moderne Stil, 6v.  
 Meister der Farbe, 1906.  
 Menzels, Adolf—Das Werk Adolf Menzels.

An actual count has been made during the year of all the books in this department. As the result of this count the following facts have been ascertained:—

Number in main reference room . . . . .	2,355
“ “ art room . . . . .	940
“ “ Americana room . . . . .	3,512
“ “ Somerville alcove . . . . .	395
“ “ catalogue room . . . . .	197
“ “ Massachusetts document room . . . . .	821
“ “ United States document collection . . . . .	1,193
Total . . . . .	<u>9,413</u>

During the year 171 visitors have used the Americana room and 134 have used the art room. Thus it will be seen that these rooms are used to a very small extent in proportion to the money that is expended upon them. During the year 134 people have used the art room, and \$228.85 has been expended upon the art

department. Consequently it has cost us \$1.70 for every visitor that has entered the art room during the year. This is a poor return for the money expended. I cannot think that this furnishes a criterion of the artistic taste of the community. It is rather a demonstration of a fact, that has already been many times demonstrated, that the public will not use books that are sequestered from public access.

Increased shelving facilities are urgently needed in this department. Permit me to call attention once more to the structural weakness of this room. This is so apparent that the committee on building and grounds has decided that increased shelving in that part of the room under the dome in the interests of safety should not be attempted. If there is any way to remedy this weakness, I respectfully recommend that it be remedied during the coming year.

#### **The Children's Department.**

The children's department, under the supervision of Miss Anna L. Stone, has done an increasing amount of work during the year. The circulation of this room has been 71,563, of which 58,572 have been fiction and 12,991 other works.

There is no doubt that this is one of the most useful rooms in the building, and perhaps results in greater civic benefit than any other department of the library. But, as I have before mentioned, the entrance and exit to this room are such that it is more or less of a nuisance to the mature part of our patrons. The noise made by the children in passing up and down the stairs in such near proximity to the reading room is at times very disconcerting. This room would be ideally located, as far as the general public is concerned, if there were a direct entrance to it from the outside. It is remote from the main body of the library; and if there were a direct entrance to it, the exuberance of youth, that inevitably results in noise, could let off its surplus energy without a general disturbance. I again respectfully recommend that such an entrance be effected.

A corticine carpet, such as covers the floor of the delivery room, would deaden the noise that is unavoidable in a gathering of children, and, although it would not be appreciated by the children themselves, would result in a great relief to the attendants of the room.

### Agencies.

Below is a table of circulation of the different agencies during the year:—

Agencies.	Teele Square.	West Somerville.	East Somerville.	South Somerville.	Union Square.	Highland.
January . . . . .	398	525	18	227	13	35
Shelves . . . . .	1,026	1,734	909		432	1,380
February . . . . .	348	460	32	186	14	27
Shelves . . . . .	910	1,395	768		352	1,144
March . . . . .	356	518	34	211	15	12
Shelves . . . . .	1,064	1,537	814		397	1,197
April . . . . .	367	574	40	214	6	10
Shelves . . . . .	1,025	1,884	944		533	1,432
May . . . . .	271	450	14	196	10	6
Shelves . . . . .	600	1,534	689		349	1,142
June . . . . .	244	377	4	147	13	8
Shelves . . . . .	916	1,364	637		316	1,047
July . . . . .	328	365	19	234	10	9
Shelves . . . . .	1,115	1,716	709		461	1,196
August . . . . .	223	280	4	147	12	6
Shelves . . . . .	802	1,241	605		410	829
September . . . . .	167	275	8	151	3	6
Shelves . . . . .	794	1,315	472		362	996
October . . . . .	302	344	17	158	20	27
Shelves . . . . .	1,023	1,696	945		439	1,131
November . . . . .	265	281	18	136	20	13
Shelves . . . . .	956	1,365	740		327	876
December . . . . .	330	302	20	216	21	13
Shelves . . . . .	1,250	1,769	1,376		352	1,026
Totals . . . . .	15,080	23,301	9,836	2,223	4,887	13,568

### General Work.

The general work of the library has been carried on under the supervision of Miss Florence D. Hurter, the assistant librarian. Miss Hurter took up this new work with enthusiasm and great efficiency. Her serious illness has been a matter of regret to all the library staff. I am glad to say that she seems to be

well on the way to a full recovery at an early date. During her enforced absence Miss Nellie M. Whipple has served as assistant librarian, and under unusual difficulties, induced by a staff greatly depleted by sickness, she has performed the work to the great satisfaction of the library management and to the public.

The general circulation figures of the year are as follows:—

	Fiction.	Other Works.	Total.
January . . . . .	29,159	14,590	43,749
February . . . . .	24,857	12,382	37,239
March . . . . .	27,905	12,976	40,881
April . . . . .	31,895	14,767	46,662
May . . . . .	24,658	11,343	36,001
June . . . . .	21,572	8,480	30,052
July . . . . .	21,781	4,077	25,858
August . . . . .	15,415	2,965	18,380
September . . . . .	15,347	3,531	18,878
October . . . . .	25,976	10,749	36,725
November . . . . .	25,476	12,311	37,787
December . . . . .	31,380	15,947	47,327
Total . . . . .	295,421	124,118	419,539

Last year the circulation was 410,538; there is consequently a net increase the current year of 8,862, or about 2.16 per cent. This is not as large as our usual increase. In fact, during much of the year there has been an actual decrease from the corresponding months of the previous year. But our circulation for December is the largest circulation for that month, or for any other month, in the history of the library, and we seem to be entering upon another period of steady and progressive increase.

Below is given our circulation by classes, exclusive of fiction:—

General works . . . . .	7,918
Philosophy . . . . .	1,400
Religion . . . . .	5,643
Sociology . . . . .	21,078
Philology . . . . .	611
Natural science . . . . .	15,141
Useful arts . . . . .	4,655
Fine arts . . . . .	6,462
Literature . . . . .	16,474
History . . . . .	31,745
Total of general delivery . . . . .	111,127
Delivered from children's room . . . . .	12,991
Total of other works . . . . .	124,118
Fiction . . . . .	295,421
Other works . . . . .	124,118
Total . . . . .	419,539
Percentage, fiction . . . . .	70.42%
Other works . . . . .	29.58%

Below is the statistical statement of the general work of the year:—

Accession number . . . . .	92,891
Volumes in library . . . . .	79,162
“ added . . . . .	5,390
Total circulation . . . . .	419,539
Delivered from children's room . . . . .	72,754
“ “ Teele Square agency . . . . .	3,599
“ “ “ shelves . . . . .	11,481
“ “ West Somerville agency . . . . .	4,751
“ “ “ shelves . . . . .	18,550
“ “ East Somerville agency . . . . .	228
“ “ “ shelves . . . . .	9,608
“ “ South Somerville agency . . . . .	2,223
“ “ Union Square agency . . . . .	157
“ “ “ shelves . . . . .	4,730
“ “ Highland agency . . . . .	172
“ “ “ shelves . . . . .	13,396
“ “ Knapp school . . . . .	999
Volumes out in Sunday schools . . . . .	1,595
“ “ “ school library . . . . .	6,649
Visitors in reference room . . . . .	10,708
Cards issued . . . . .	3,781
Fines . . . . .	\$794 73
Books . . . . .	158 12
Telephone . . . . .	15 82
Total . . . . .	<u>\$968 67</u>

During the year 364 vacation cards were issued. Eleven hundred and twenty-seven books were delivered to the homes of the people by our delivery boys. Thirty-three sets of stereographs are now owned by the library. The circulation of these sets during the year amounted to 678.

The following Sunday schools take books from the library: Broadway Congregational, Flint-street Methodist, Perkins-street Baptist, Prospect-hill Congregational, Second Unitarian, West Somerville Baptist, Winter-hill Congregational, Winter-hill Universalist, Park-avenue Methodist, Second Advent, and the Highland Congregational.

Books are also sent to the Y. M. C. A., the Somerville Boys' club, and to the Somerville hospital.

The library has received the following donations of books, pamphlets, and periodicals during the past year:—

**Conclusion.**

The work of the library has been rendered difficult during the past year by an unusual amount of sickness on the part of the staff; so that at times it has been very hard to perform it with the efficiency with which it should be done. The staff has done excellent work, however, under these difficulties; and I wish to thank them, as well as the members of your board, for co-operation, for forbearance and help.

Respectfully submitted,

SAM WALTER FOSS,

Librarian.

December 31, 1907.

## BOARD OF HEALTH.

1907.

ALLEN F. CARPENTER, Chairman,  
WESLEY T. LEE, M. D.,  
ZEBEDEE E. CLIFF.

### OFFICERS OF THE BOARD OF HEALTH.

WILLIAM P. MITCHELL, Clerk and Agent to Issue Burial Permits.

CALEB A. PAGE, Agent.

FRANK L. MORSE, M. D., Medical Inspector.

CHARLES M. BERRY, Inspector of Animals and Provisions.

JULIUS E. RICHARDSON, Milk Inspector.

DUNCAN C. GREENE, Plumbing Inspector.

EDGAR T. MAYHEW, Superintendent Collection of Ashes and Offal.

# REPORT OF THE BOARD OF HEALTH.

OFFICE OF THE BOARD OF HEALTH, }  
 City Hall, January 1, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—We respectfully submit the following as the thirtieth annual report of the board of health, in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1907:—

## Nuisances.

A record of nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:—

### NUISANCES ABATED IN THE CITY IN 1907.

Bakery offensive . . . . .	8
Barber shops . . . . .	2
Bread left on steps . . . . .	1
Burning leather . . . . .	1
Cellar damp . . . . .	19
Cesspool offensive . . . . .	4
Cow barn offensive . . . . .	5
Cows kept without license . . . . .	4
Dogs bred in house . . . . .	1
Drainage defective . . . . .	48
Drainage emptying into cellar . . . . .	17
Drainage emptying on surface . . . . .	9
Fish offal . . . . .	3
Gas from power house . . . . .	1
Goats kept without license . . . . .	2
Hens in cellar . . . . .	6
Hennery offensive . . . . .	11
Hens without permit . . . . .	7
Horses under store . . . . .	1
Manure exposed and offensive . . . . .	13
Manure pit defective . . . . .	31
Offal on land . . . . .	16
Offensive odor in and about dwellings . . . . .	13
Pigeons in cellar . . . . .	1
Pigs kept without license . . . . .	8
Premises dirty . . . . .	147
Privy-vault offensive . . . . .	8
Rabbits in cellar . . . . .	1
Rubbish in cellar . . . . .	44
Slops thrown on surface . . . . .	3
Stable infected with glanders . . . . .	38
Stable and stable premises filthy and offensive . . . . .	27
Stable without drainage . . . . .	18
Stagnant water on surface . . . . .	8
Water-closet defective . . . . .	41
Water under stable . . . . .	5
Total . . . . .	572

Number of nuisances abated . . . . .	572
Number of nuisances referred to board of 1908 . . . . .	16
Number of nuisances complained of . . . . .	588
Number of complaints (many covering more than one nuisance) . . . . .	410

In addition to the above, 365 dead animals have been removed from the public streets, and many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards, and alleyways where rubbish and filth have collected are required to be cleaned.

*Glanders.*—Thirty-eight cases of glanders have been reported during the year. Prompt action was taken in every case, and thirty-three of the horses were killed, five being released from quarantine by order of the cattle commissioners.

#### Permits.

The record of permits to keep cows, swine, goats, and hens, to collect grease, and to remove manure is as follows:—

*Cows.*—Forty-one applications were received for permits to keep 112 cows. Thirty-four permits to keep ninety-nine cows were granted, and seven permits were refused.

*Swine.*—Eighteen applications were received for permits to keep thirty-five swine. Seventeen permits were granted to keep thirty-four swine, and one permit was refused. The fee is one dollar for each swine.

*Goats.*—One application was received for a permit to keep one goat, which permit was granted. The fee is one dollar for each goat.

*Hens.*—Thirty-nine applications for permits to keep 1,124 hens were received. Thirty-three permits to keep 1,002 hens were granted, and six permits were refused.

*Grease.*—Thirteen applications were received for permits to collect grease, all of which were granted. The fee is two dollars. Four of the parties licensed reside in Somerville, three in Charlestown, two in Cambridge, three in Boston, and one in Chelsea.

*Manure.*—Two permits were issued during the year for the carting of manure through the streets of the city in the daytime between May 1 and November 1. All permits issued for the removal of manure from the stables in the city in the daytime, or for carting through the streets of the city, remain in force until revoked. No fee is charged for these permits.

*Melting and Rendering.*—Four parties have been licensed to carry on the business of melting and rendering, under the provisions of the revised laws of 1902, chapter 75, section 111.

### Pedlers.

One hundred and sixteen certificates of registration were issued to hawkers and pedlers during the year under the provisions of ordinance number 27—a decrease of sixteen from the year 1906. One hundred and seven certificates have been renewed during the year. Each pedler is required to present a statement from the sealer of weights and measures, showing that his measures have been properly sealed, before a certificate is issued to him. Pedlers are also required to present their vehicles at the police station the first Monday of each month for inspection by the agent of the board, that he may see if they are kept in a clean condition, and are properly marked with the owner's name and number.

### Ashes and Offal.

The collection and disposal of ashes, garbage, and other refuse materials is under the control of the board of health, and a competent superintendent is employed to take charge of this department.

To do this work sixty-nine men are employed, and the department owns and uses thirty-two horses, fifteen ash carts, four paper wagons, and thirteen garbage wagons.

*Ashes.*—The ashes and non-combustible materials are deposited upon the city dumps at Winter Hill and West Somerville. The combustible materials are burned in the incinerator which was built this year near the city stables, except those materials which can be sold at a profit, such as clean paper, rags, and bottles.

The incinerator was put into operation early in September, and has worked very satisfactorily. In order that the combustible and non-combustible materials might be kept separate as far as possible, the following circular was distributed throughout the city:—

Office of the Board of Health,

Somerville, September 6, 1907.

An incinerator has been installed at the city farm, where the combustible waste materials collected by the board of health wagons will be burned, instead of being deposited upon the city's dumps as has formerly been necessary.

Hereafter all householders and others having waste materials for removal by the ash and paper wagons are required to keep combustible and non-combustible matters separate. Paper, cloth, and any other material which can be burned must be kept in separate receptacles from ashes, cans, bottles, iron, dirt, and other articles which cannot be burned.

When combustible and non-combustible materials are deposited together in the same receptacle, the board of health employees may refuse to remove them.

ALLEN F. CARPENTER,  
WESLEY T. LEE, M. D.,  
ZEBEDEE E. CLIFF,

Board of Health.

During the year 46,516 loads of ashes and 3,258 loads of refuse material have been collected and disposed of.

Collections are made weekly, and the districts and days of collection are as follows:—

MONDAY, DISTRICT NO. 1.

Comprises the entire area extending easterly to the cities of Boston and Cambridge, from a line drawn across Somerville, commencing on Mystic avenue, and extending through Cross street, Central square, Medford street, Washington street, Prospect street, Webster avenue, Tremont street to the Cambridge line, and including collection on both sides of the above-named streets along the division line described.

TUESDAY, DISTRICT NO. 2.

Comprises the entire area extending westerly from the previously-described district number 1 to a line drawn across the city, commencing on Mystic avenue, and extending through Wheatland street, across Broadway, through Walnut street, and extending across Bow street and Somerville avenue, through Hawkins street, Washington street, Perry street, Wyatt street, Concord avenue, crossing Beacon street to the Cambridge line, and including collection on both sides of the above-named streets along the division line described.

WEDNESDAY, DISTRICT NO. 3.

Comprises the entire area extending westerly from the previously-described district number 2, to a line drawn across the city, commencing at the Medford boundary line at Main street, and extending easterly along said Main street, across Broadway, through Sycamore street, thence easterly on Highland avenue, through School street, thence westerly on Somerville avenue, through Dane street and Washington street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

THURSDAY, DISTRICT NO. 4.

Comprises the entire area extending westerly from the previously-described district number 3, to a line drawn across the city, commencing at the Medford line at Magoun square, and extending on Medford street to Lowell street, thence easterly on Somerville avenue and through Park street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

FRIDAY, DISTRICT NO. 5.

Comprises the entire area extending westerly from the previously-described district number 4, to a line drawn across the city, commencing on Broadway, and extending through Willow avenue to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

SATURDAY, DISTRICT NO. 6.

Comprises the entire area extending westerly from Willow avenue to the Medford, Arlington, and Cambridge lines.

RULES AND REGULATIONS FOR COLLECTION OF ASHES  
AND OFFAL.

Ashes must be put in suitable receptacles not larger than an ordinary flour barrel, and must be kept free from all other refuse matter.

House offal or garbage must be kept free from all other refuse matter, and in suitable vessels,

All other refuse, such as paper, rags, excelsior, straw, mattresses, old clothes, pasteboard boxes, carpets, etc., must be kept free from ashes and garbage, and placed in suitable packages or barrels to prevent being scattered in handling.

All ashes and refuse matter for removal must be placed on the outer edge of the sidewalk, on or before seven o'clock in the morning of the day when the collection is to be made.

Earth, gravel, bricks, mortar, stones, lime, plaster, cement, concrete, or refuse material from repairs or construction of buildings will not be removed by this department.

The department will remove tree trimmings, vine cuttings, and yard cleanings during the spring and summer months.

Employees of this department are not allowed to enter cellars, cellarways, bulkheads, or areas for the removal of ashes or offal.

*Offal.*—During the year the board has continued to dispose of the city offal at its garbage plant adjacent to the city stables. This offal is sold direct to farmers and others, and is handled in a thoroughly sanitary and satisfactory manner. The demand for the garbage has exceeded the supply, and in its disposal there has been an entire absence of objectionable features. The financial returns to the city are large.

During the year 6,986 loads of offal have been collected.

Two collections are made in each district weekly, and during the summer months an extra collection is made at hotels, stores, and other establishments producing large quantities of offal.

#### Stables.

Under the provisions of sections 69 and 70 of chapter 102 of the revised laws of 1902, thirty petitions for licenses to erect and use stables were received and disposed of as follows:—

Number granted	. . . . .	17
Number refused	. . . . .	13

#### Board of Infants.

Eighteen parties, whose applications were first approved by this board, have been licensed by the state board of charity to care for forty children, in this city, under the provisions of chapter 83 of the revised laws of 1902.

#### Deaths.

There were 997 deaths and seventy-five stillbirths in the city during the year, as specified in the following table, which shows a decrease of deaths from the previous year of seven:—

Deaths at Somerville hospital during the year	. . . . .	60
Deaths at Cherry-street hospital	. . . . .	5
Deaths at hospital for contagious diseases	. . . . .	13
Deaths at home for aged poor (Highland avenue),	. . . . .	69
Deaths at City home	. . . . .	6

## DEATHS BY AGES.

AGES.	Total.	Male.	Female.
Under one . . . . .	166	78	88
One to two . . . . .	17	5	12
Two to three . . . . .	12	6	6
Three to four . . . . .	9	4	5
Four to five . . . . .	9	7	2
Five to ten . . . . .	25	14	11
Ten to fifteen . . . . .	16	9	7
Fifteen to twenty . . . . .	15	8	7
Twenty to thirty . . . . .	66	32	34
Thirty to forty . . . . .	55	24	31
Forty to fifty . . . . .	75	37	38
Fifty to sixty . . . . .	111	55	56
Sixty to seventy . . . . .	152	65	87
Seventy to eighty . . . . .	165	70	95
Eighty to ninety . . . . .	90	36	54
Ninety and over . . . . .	14	5	9
Total . . . . .	997	455	542

Of the stillborn, 47 were males and 28 females.

Of the parents of the stillborn, 28 fathers and 36 mothers were natives of the United States, and 47 fathers and 39 mothers were of foreign birth.

**Diseases Dangerous to the Public Health.**

This board has adjudged that the diseases known as small-pox, scarlet fever, diphtheria, membranous croup, typhus fever, typhoid fever, chicken pox, pulmonary tuberculosis, cerebro-spinal meningitis, and cholera are infectious, or contagious, and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases and all cases of measles coming under their care, and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the superintendent of schools,

the principal of the school in the district in which the patient resides, and the librarian of the public library are notified, and state board of health.

*Scarlet Fever.*—Four hundred cases of scarlet fever have been reported during the year, twelve of which resulted fatally. In 1906 there were 154 cases, one of which resulted fatally.

*Diphtheria.*—One hundred ninety-four cases of diphtheria have been reported during the year, nine of which were fatal. In 1906 there were 136 cases, fifteen of which proved fatal. Anti-toxin has been provided by the state board of health, and placed by this board in central locations for use by physicians in cases where people are unable to purchase the same. Culture tubes for diphtheria and sputum bottles for suspected tuberculosis have been obtainable at the same stations.

Warning cards are used in dealing with scarlet fever and with diphtheria, and the premises are fumigated by the use of the formaldehyde gas regenerator, immediately after the termination of the case. An inspection is made by the agent of the board of the premises where diphtheria is reported, and all sanitary defects discovered are required to be remedied as soon as possible.

*Tuberculosis.*—Eighty-three cases of tuberculosis have been reported during the year. There were eighty-six deaths from this disease.

*Typhoid Fever.*—Ninety-one cases of typhoid fever have been reported during the year, eleven of which have proved fatal. In 1906 there were ninety-three cases reported, eleven of which were fatal.

*Typhus Fever, Cholera.*—No cases of typhus fever or cholera have been reported the past year.

*Smallpox.*—One case of smallpox has been reported during the year.

Number of cases of scarlet fever and diphtheria for which houses were placarded	594
Number of premises disinfected by agent	988

### Disinfection.

It will be seen by the foregoing figures that, in addition to the 594 premises infected with scarlet fever or diphtheria, 399 other premises were disinfected. Forty disinfections were made at the request of attending physicians whose patients had been ill with typhoid fever or cancer. Two hundred and twenty-six schoolrooms were disinfected for scarlet fever or diphtheria, and 128 premises for tuberculosis, in compliance with the regulations passed by this board.

Many library books have also been disinfected, and quantities of infected bedding and other material have been burned.

TABLES.

The prevalence of scarlet fever, diphtheria, and typhoid fever in the city during the several months of the year 1907 is shown by the following table, and in the table next following is given the number of deaths from these three diseases, by months, during the last ten years:—

Scarlet Fever, Diphtheria, and Typhoid Fever Reported in 1907.

MONTHS.	SCARLET FEVER.			DIPHThERIA.			TYPHOID FEVER.

**Hospital for Contagious Diseases.**

During the past year this hospital has proved its value and usefulness to the city. In January an epidemic of scarlet fever occurred, and every available space, including the temporarily-equipped attics, was utilized for the accommodation of patients. At no time has the hospital been without patients, and there has been a considerable financial income from paying patients and those having settlements in other cities.

Miss Nellie J. Van Cor has continued as matron during the year, and under her efficient management the care of the patients has been satisfactorily conducted and the business details have been economically arranged and carried out.

Additional room is needed for nurses and help, and several improvements and alterations would greatly increase the effectiveness of the hospital. It is to be hoped that these changes may be made in the near future.

Undoubtedly the removal of patients to the hospital has prevented the development of many cases of contagious diseases in our city, besides saving some lives which would have been sacrificed under less favorable conditions.

The statistical report of the hospital will be found in the report of the medical inspector.

### Medical Inspection of Schools.

The medical inspection of the schools of Somerville, which was instituted in December, 1907, has been continued during the year. The value of the system has been constantly demonstrated, and the work has been done in a very satisfactory manner. There has been harmony of action between the board of health and the school board, and the school principals and teachers have very generally co-operated with the inspectors in making the system as successful as possible. During the scarlet fever epidemic, which occurred early in the year, the children were constantly watched and inspected, and every effort was made to prevent the spread of the disease.

The inspectors make daily visits to the schools under their charge, and to them are referred all children who show evidences of disease or abnormal conditions. Children who are found to be unfit to remain in school are sent home, accompanied by a slip properly filled out advising that the family physician be consulted. The inspectors also make an annual inspection of all the children in the schools, and any defects discovered are called to the attention of the parents. Monthly inspections of the school buildings and premises are made, and suggestions or criticisms are referred to the proper authorities. Every effort is made to protect the health of the children and to co-operate with the parents in keeping the children in as normal a condition as possible.

In accordance with the provisions of the statute, tests of sight and hearing are made by the principals or teachers.

A great many children have been referred to the inspectors during the year, and over 2,000 have been sent home on account of illness, or found to have abnormal physical conditions.

The following list will show the classes of diseases and defects which have been found in the schools, except defects of sight and hearing. The prevalence of pediculosis was found to be unusual, in some schools over half the children being affected; but owing to the persistent efforts of the inspectors, the number of cases has been greatly reduced:—

#### LIST OF DISEASES AND NUMBER OF CASES REPORTED.

##### 1. Infectious diseases:—

Chicken pox . . . . .	42
Scarlet fever . . . . .	13
Influenza . . . . .	11
Mumps . . . . .	9
Whooping cough . . . . .	8

Total number of diseases reported . . . . .		4,712

The districts and inspectors are as follows:—

*District No. 1.*—Prescott, Hanscom, Davis, and Edgerly schools. Inspector, Dr. Francis Shaw, 57 Cross street.

*District No. 2.*—Baxter, Knapp, Perry, and Bell schools. Inspector, Dr. D. M. Flewelling, 9 Carlton street.

*District No. 3.*—Bennett, Pope, Cummings, and Proctor schools. Inspector, Dr. L. H. Raymond, 66 Highland avenue.

*District No. 4.*—Morse, Carr, Durell, and Burns schools. Inspector, Dr. W. L. Bond, 322 Highland avenue.

*District No. 5.*—Brown, Bingham, and Forster schools. Inspector, Dr. H. M. Stoodley, 383 Highland avenue.

*District No. 6.*—Lincoln, Hodgkins, Highland, and Lowe schools. Inspector, Dr. H. Cholerton, 396 Highland avenue.

*District No. 7.*—Glines, English High, and Latin High schools. Inspector, Dr. R. F. Gibson, 108 Highland avenue.

*Parochial Schools.*—Inspector, Dr. M. W. White, 42 Bow street.

### **Bacteriological Department.**

The work of this department was performed by Frank L. Morse, M. D., medical inspector of the board, whose report is appended to this report:—

Specimens will be received at the laboratory at the city hall daily, including Sunday, at any time, and they will be examined and reported upon the morning following their reception.

#### **SPECIMENS AND ANTI-TOXIN.**

Outfits for specimens for tuberculosis, diphtheria, and typhoid fever, and diphtheria anti-toxin and vaccine lymph may be obtained at the laboratory and at the following places:—

Claude Curtis, 154 Perkins street.

Bay State Pharmacy, 173 Washington street.

Herbert E. Bowman, 25 Union square.

Fred W. Gay, 524 Somerville avenue.

Hart Brothers, 263 Highland avenue.

Percy A. Hall, 2 Studio building, Davis square.

Herbert E. Bowman, 529 Medford street, Magoun square.

Eugene B. Carpenter, 10 Broadway,

Julius E. Richardson, 310 Broadway.

Paul S. Eaton, 693 Broadway.

Willis S. Furbush & Co., 1153 Broadway.

After the specimen is collected, it must be taken or sent directly to the laboratory at the city hall.

#### **Undertakers.**

Under the provisions of section 44 of chapter 78 of the revised laws of 1902, nineteen persons have been duly licensed as undertakers.

#### **Examiners of Plumbers.**

The public statutes provide for a board of examiners of plumbers, consisting of a chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

#### **Milk Regulations.**

Milk is an essential factor in the dietary of nearly every person. If milk is impure or adulterated, it not only has a diminished food value, but it may be a positive menace to the health of the users. Contaminated milk has frequently been proven to be the carrier of disease and the cause of epidemics.

It is evident that too much care cannot be exercised to maintain the standard of quality and purity of the milk supplied to our citizens, not only for the purpose of preventing the development and spread of contagious diseases, but to furnish infants,

invalids, and others who depend for their nutrition largely upon milk, as safe and nutritious a food as possible.

An inspector of milk is employed by the board whose duty it is to constantly test the milk, inspect the sources of supply, license the carriers and dealers, prosecute those who do not conform to the requirements, and in every way endeavor to keep the milk supplied in the city up to the standard.

Believing that the rules governing the sale and care of milk which have been made by the board in the past were not sufficiently stringent or comprehensive to safeguard the health of the citizens, the board passed and is enforcing the following regulations:—

#### REGULATIONS FOR THE SALE AND CARE OF MILK.

In Board of Health,

Somerville, Mass., May 7, 1907.

It is the opinion of the board of health of the city of Somerville that producing, storing, cooling, mixing, selling, delivering, or distributing milk under conditions contrary in any respect to the following regulations is a cause of sickness within said city, and is and may be injurious and dangerous to the public health, and that milk produced, stored, cooled, mixed, sold, delivered, or distributed under such conditions is capable of containing and conveying infection and contagion and of creating sickness. This board hereby adjudicates that the following regulations are necessary for the public health and safety, and the same are hereby made and adopted. This board hereby prohibits producing, storing, cooling, mixing, selling, delivering, or distributing milk within the limits of this city contrary to any of said regulations.

#### REGULATION I.

SECTION 1. All persons in the city of Somerville engaged in the production of milk for sale, or in the business of selling, delivering, or distributing milk in said city, shall annually before the first day of June make written application to the inspector of milk for a license, on forms prescribed by the board of health.

SECT. 2. No person in the city of Somerville shall engage in the business of producing milk for sale, or in the sale or distribution of milk without a license so to do, under these regulations and such other conditions as the board of health may impose; and said license shall be revoked if the licensee fails to comply with the conditions of his license or the regulations of this board.

SECT. 3. All persons having a license to sell, deliver, or distribute milk in the city of Somerville shall keep a copy of the license constantly posted in a conspicuous place on the premises, and every person using a carriage or other vehicle for the delivery of milk for the purpose of sale in the city of Somerville shall have his name, license number, and place of business legibly placed on each outer side of such carriage or vehicle.

SECT. 4. The conditions under which every cow is kept whose milk is brought into the city of Somerville, or kept, delivered, distributed, sold, or offered for sale in said city, shall be made known to the inspector of milk by the licensee in such detail as he may require, and shall be approved by the board of health. No milk except that derived from such cow shall be brought, kept, delivered, distributed, sold, or offered for sale in said city.

## REGULATION II.

SECTION 1. No milk for sale or distribution shall be stored in that portion of a building which is used for the stabling of horses, cows, or other animals, or for the storing of manure, or in any room used in whole or in part for domestic or sleeping purposes.

SECT. 2. No person in the city of Somerville engaged in the business of producing milk for sale, or of storing or delivering milk in said city, shall store, cool, or mix said milk in any room which is occupied by horses, cows, or other animals. All rooms in which milk is stored, cooled, or mixed shall be provided with tight walls, and floor, and shall be kept constantly clean, the walls and floor to be so constructed as to allow of easy and thorough cleansing. The room or rooms aforesaid shall contain proper appliances for washing or sterilizing all utensils actually employed in the storage, sale, or distribution of milk, and all such utensils shall be washed with boiling water or sterilized by steam each time after being used.

SECT. 3. No urinal, water closet, or privy shall be located in the rooms specified in the preceding section, or so situated as to pollute the atmosphere of said rooms.

SECT. 4. All milk produced for the purpose of sale shall be strained and cooled as soon as it is drawn from the cow.

SECT. 5. All wagons used in the conveyance of milk for sale or distribution shall be kept in a cleanly condition and free from offensive odors.

## REGULATION III.

SECTION 1. No person shall sell or deliver or have in his possession with intent to sell or deliver any milk of a temperature exceeding fifty degrees Fahrenheit.

SECT. 2. Milk kept for sale in any store, shop, restaurant, market, bakery, or elsewhere shall be kept in a covered cooler, box, or refrigerator. No vessel containing milk for sale shall be allowed to stand outside said cooler, box, or refrigerator, except while a sale of said milk is being made. Every such cooler, box, or refrigerator shall be properly drained and cared for, and shall be kept only in such locations and under such conditions as shall be approved by the board of health.

## REGULATION IV.

SECTION 1. Every person engaged in the business of producing, storing, selling, delivering, or distributing milk in the city of Somerville shall immediately notify the board of health of the occurrence of any infectious disease in himself, or in his family, or amongst his employees, or within the buildings or premises where milk is produced, stored, sold, or distributed, and he shall suspend the sale and distribution of milk until authorized to resume the same by the board of health.

SECT. 2. No vessels which have been handled by persons suffering with or directly exposed to an infectious disease shall be used to hold or convey milk until they have been thoroughly sterilized.

WILLIAM P. MITCHELL,

Clerk.

**Keeping of Medical and Surgical Appliances in Factories.**

In Board of Health,

Somerville, October 2, 1907.

Ordered, that the following regulation be and hereby is adopted:—

In accordance with the requirements of Chapter 164, Acts of the Massachusetts legislature of 1907, providing for the keeping of medical and surgical appliances in factories, the board of health adjudges that

the following articles are necessary, and that they must be kept in a suitable dust-proof case:—

Adhesive plaster, 1-inch roll and 2-inch roll.  
 Bandages, 2 dozen assorted sizes, 1 to 4 inches.  
 Absorbent cotton, 1 pound.  
 Gauze, 1 package of 10 yards.  
 Elastic tourniquet, 24 inches.  
 Safety pins, 2 dozen.  
 Splint material, 4 whitewood strips 30 by 4 by 3-16.  
 Scissors, straight, 3-inch blade.  
 Basin, enamel.  
 Tablets, cor. sub. and citric acid, 100.  
 Carron oil, 1 quart.  
 Aromatic spirits of ammonia, 4 ounces.

(Signed)

WILLIAM P. MITCHELL,

Clerk.

The following is a copy of the Act referred to above:—

SECTION 1. Every person, firm, or corporation operating a factory or shop in which machinery is used for any manufacturing purpose, or for any other purpose, except for elevators, or for heating or hoisting apparatus, shall at all times keep and maintain, free of expense to the employees, such a medical and surgical chest as shall be required by the local board of health of any city or town where such machinery is used, containing plasters, bandages, absorbent cotton, gauze, and all necessary medicines, instruments, and other appliances for the treatment of persons injured or taken ill on the premises.

SECT. 2. Any person, firm, or corporation violating this act shall be subject to a fine of not less than five dollars nor more than five hundred dollars for every week during which such violation continues.

Approved March 1, 1907.

Board of Health.

## REPORT OF THE MEDICAL INSPECTOR.

---

Somerville, January 10, 1908.

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present the report of the medical inspector for the year 1907, including the statistics of the contagious disease hospital and the bacteriological laboratory.

**Scarlet Fever.** During the year 400 cases of this disease were reported in the city, a considerable increase in number over the previous year. For the month of January 191 cases were reported, at which time this city shared with Boston, Cambridge, and Everett, one of the largest epidemics of scarlet fever ever reported, aggregating over 1,000 cases. From January 1-5 only three cases were reported. For the week January 5-12 115 cases occurred; from the 12-17 thirty cases were reported; from the 17-24 twenty-nine cases were reported, and during the last week of the month fourteen cases were reported. During the month of February the number reached that usually prevalent, except for other cases already existing in the same household. This epidemic therefore reached its height during the week of January 5-12. Careful inquiry made by a visit to each infected household showed that ninety-two per cent. of the cases obtained milk from one dealer, but a study of this milkman's business carried on with the assistance of the inspector of milk failed to show the exact source of infection. From the sudden onset of the cases and its rapid decline it can be almost definitely stated that infection was only of limited extent, perhaps not more than a single day, and from four cases, in which it is definitely known that infection could have taken place on only one day, January 6, we must conclude that it was this day's milk which became infected. These four cases also give some information upon the incubation period of the disease, for in three of them the symptoms developed on the third day, and in the other on the fourth day of this period. For the remainder of the year no unusual number of cases occurred. Every case has been inspected, before the house was fumigated, and 427 visits were made at residences to determine when desquamation was complete.

**Diphtheria.** During the year 194 cases of diphtheria have been reported in the city, a marked decrease from the previous year, when 236 cases were reported. The same restrictions are placed upon all cases, and before patients are released from quarantine, two successive negative cultures must be obtained. It is optional with the attending physician to take the first culture, but the second must be taken by the medical inspector, and during the year 326 visits were made at houses for this purpose, and a total of 481 cultures taken.

**Typhoid Fever.** During the year ninety-one cases of this disease were reported, the greater number in any one month appearing in October, when forty-three cases occurred. From August 8-31 only one case was reported; from September 1-22, seven cases, and during the last week of this month eleven cases occurred. Upon investigation of the fifty-four cases developing between September 22 and October 31 it was learned that eight of them had probably contracted the disease while away on their summer vacation, for symptoms of the disease showed soon after their return; in four cases no definite information could be obtained, and of the remaining forty-two cases, thirty-seven of them obtained milk from one dealer. With the assistance of the inspector of milk, the investigation was carried to the farms where the milk was produced, but no source of infection could be discovered. Attention was then directed to the milk route itself, and it was found that the milk dealer was taking away bottles from two houses where the disease already existed, and where it was possible from the conditions for those bottles to have become infected.

**Tuberculosis.** Eighty-three cases of tuberculosis were reported during the year, an increase of twenty-five over the year previous. In November, following a conference with the overseers of the poor, these cases which had been previously cared for medically by the city physician were transferred to the board of health and the medical inspector instructed to care for them, since which time thirty-three visits have been made to them.

**Smallpox.** One case of this disease was reported upon October 21, the patient having recently arrived from Prince Edward Island, where her sister was ill with the disease apparently unrecognized, and no restrictions placed on the family. Upon the discovery of the case, the smallpox hospital was opened, the patient transferred to it, where she remained until recovery. Many persons were exposed to her, as she traveled in an electric car after the eruption appeared, but no other cases developed from it. She had never been vaccinated.

#### **Contagious Disease Hospital.**

In September, 1906, following a change in the city charter, the city physician, who, up to this time, had treated the cases at the hospital, was relieved of this duty, and the care of the patients transferred to the medical inspector on October 1. During 1907 this arrangement has continued, 377 visits having been made at the hospital during the year.

**Scarlet Fever.** During the year ninety-five cases of scarlet fever were admitted, seven of which proved fatal. Thirty-seven of these cases were among males, and fifty-eight among females. Twenty-seven were under five years of age, thirty-one from five

to ten years, and the remainder were over ten years. Vomiting was a constant symptom, it occurring in fifty-one cases, and a sore throat in sixty-nine cases. In twenty-one cases the rash occurred on the first day of the illness, in sixty-three cases on the second day, and in five instances on the third day. There was membrane present on the tonsils in thirty-one cases; in twelve cases the disease was complicated with nephritis, and in eight cases with rheumatism. One mastoid operation was performed.

Of the deaths, all were complicated with nephritis, and in addition four had diphtheria.

**Diphtheria.** During the year fifty-one cases of diphtheria were admitted, six of which proved fatal. In order to make the records complete, however, the cases dating from October 1, 1906, are included, making a total of sixty-seven cases in fifteen months, with eight deaths. Of these patients, thirty-four were among males, and thirty-three among females. Seventeen were under five years of age; twenty were from five to ten, and the remainder were over ten. Sixteen entered the hospital on the first day of their illness, and all recovered. Twenty entered the second day of the illness and three died; two on the third day with one death; six on the fourth day with no deaths; six on the fifth day with no deaths, and three on the seventh day, all of whom died. The importance of early treatment with antitoxin is thus very obvious. Of the laryngeal cases one had been ill one day, four for two days, two for three days with one death, one for four days, three for five days with one death, and three for seven days, all of whom died. In ten patients the membrane extended over both tonsils, uvula and palate, four of whom died from systemic infection involving both the heart and kidneys. In fifty-six cases the cultures were positive. The throat was clear of membrane in three cases on the first day, in twelve cases on the second, in thirteen cases on the third, in twelve cases on the fourth, in six cases on the fifth, in one on the sixth and seventh, and in four on the eighth day. In twenty-seven patients eruptions appeared on the body due to the use of the antitoxin, and in four patients joint pains occurred from the same cause. The average stay in the hospital of fifty-eight patients was fourteen days. The dose of the antitoxin varied from 4,000 to 48,000 units, depending upon the severity of the case, the largest aggregate dose being 60,000 units. Our best record was from November 9, 1906, to November 9, 1907, during which period forty-five consecutive cases were treated, with one death, that patient dying eight hours after admission. Of the six deaths during the year three died within nine hours of admission and were hopeless at that time. Two died on the sixth day, and the last on the sixteenth day, all being complicated with nephritis.

Sixteen cases of laryngeal diphtheria were treated, five of

whom died. Of these cases, one came to intubation and was discharged well. Of the deaths, two had recovered from the acute symptoms, the tube had been removed, but nephritis was fatal on the sixth day, and the other three all died within nine hours of admission. One case of diphtheria has developed among the attendants at the hospital, but we have yet to record a case of diphtheria developing among patients admitted for scarlet fever, or of scarlet fever among diphtheria patients.

Two patients were sent to the hospital as diphtheria, in which the diagnosis was syphilis, one case of measles was sent as scarlet fever, and one case of typhoid fever was sent as erysipelas. One patient with chicken pox was also treated.

Patients Treated at the Contagious Hospital.

**Bacteriological Department.**

During the year 1907, 971 examinations were made of cultures for the diphtheria organism, 227 examinations made of sputum from patients suspected of having tuberculosis, and 110 examinations to detect the Widal reaction in typhoid fever.

**Diphtheria.** Nine hundred and seventy-one cultures have been examined for diphtheria, 423 being in males, and 548 in females. Diphtheria being a disease of children, 224 of these examinations have been made in children under five years of age, 346 in those from five to ten years of age, 185 from ten to twenty, and 210 in adults over twenty years. In six cases the age of the patient was not stated. Four hundred and sixty-two examinations were made for the diagnosis of the case, 107 proving positive, and 445 negative. Of the positive results, forty-five were of cases in which the attending physician's diagnosis of diphtheria was confirmed, ten in which the clinical diagnosis was not diphtheria, and fifty-two in which no definite diagnosis was made. Of the 445 negative examinations, thirty-four were obtained in which the clinical diagnosis was diphtheria, 104 in which the diagnosis was not diphtheria, and 217 in which no diagnosis had been made.

Five hundred and six cultures were taken for release of patients from quarantine, ninety-eight of which were positive, and 408 negative. The importance of taking release cultures is demonstrated by these figures, these patients showing the presence of the bacilli in the throat after the clinical evidence of the disease had disappeared. In three examinations there was no growth upon the serum tube.

**Tuberculosis.** Two hundred and twenty-seven examinations have been made of sputum suspected of containing the tubercle bacillus, seven of which were positive and 220 negative. In eighty-three cases a definite diagnosis of this disease had been made by the attending physician, but in seventy-nine of them the organism could not be detected. In the remainder of the cases, eighty-six were stated as not showing evidence of the disease, two being positive, and in fifty-eight cases no statements were made giving information as to its character, one of which was positive. One hundred were males and one hundred and twenty-seven females. Although printed directions accompany each outfit, telling how the specimen should be obtained, it has not been unusual for specimens to be sent to the laboratory containing only saliva from the mouth, with no excretion from the lungs or bronchial tubes. - Physicians should be urged to give definite instructions to each patient, relating to the collection of the sputum, for in some instances a negative report would mislead both physician and patient. Consumption to-day is recognized as an infectious disease, and all persons afflicted with it should be instructed in the modern methods for preventing its

spread. In some cases this is not done by the attending physician, and during the past four years your board has required that this disease be reported to you, as other infectious diseases are, and that printed instructions and advice be sent to each patient ill with the disease. The decrease in the death rate of consumption, and the cure of persons afflicted with it, is due to the improved and intelligent manner with which cases are treated, and the prevention of further spread of the disease is a subject which is of importance to all local boards of health.

**Typhoid Fever.** One hundred and ten examinations of the blood of patients suspected of having typhoid fever have been made, forty-five of which proved positive. In thirty-five cases a positive diagnosis of this disease had been made by the attending physician, in three cases it was stated not to be typhoid fever, and in the remainder no statement was made relating to the diagnosis. Of the negative results, ten were diagnosed as typhoid, three were said not to be typhoid, and in fifty-two no diagnosis was made. Fifty-eight were males and fifty-two females.

### Summary for Five Years, 1903, 1904, 1905, 1906, 1907.

## REPORT OF INSPECTOR OF ANIMALS AND PROVISIONS.

---

OFFICE OF THE BOARD OF HEALTH, CITY HALL, }  
Somerville, Mass., January 7, 1908. }

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith submit the report of the inspector of animals and provisions for the year 1907.

The following is a statement of the number of animals killed during the year at the five slaughtering establishments in the city:—

Swine, 1,181,148; sheep, 304,325; calves, 66,485; cattle, 26,504, and goats, 476. The work of the four large establishments, being under the inspection of the United States government, requires only the inspection of the premises by the local inspector, who reports very favorably on the same.

Somerville is still the leading city in slaughtering, east of Chicago, and is the largest quarantine station for the export of animals in the United States, the number exported last year being 108,341.

The total number of neat cattle kept in the city is 253, all of which have been inspected several times during the year.

There have been 1,963 horses examined in stables where contagious diseases were reported to exist, thirty-three being killed and five released.

One cow was killed for tuberculosis.

There have been 2,624 visits made to stores and markets, and 965 pedler's carts have been inspected from which fish, provisions, and produce were sold.

There are sixty-one barber shops and seventy-eight bakeries in the city, all of which have been frequently inspected, most of them being found in excellent condition.

I have inspected, condemned, and caused to be destroyed 213 whole haddock, 92 whole codfish, 63 pounds of salt cod, 2,057 herring, 81 pounds of halibut, 176 pounds of salmon, 123 whole pollock, 47 pounds of swordfish, 114 dozen smelts, 1 1-2 bushels of oysters, 2 1-2 gallons of oysters, 2 bushels of clams, 19 quarts of clams, 16 whole lobsters, 419 whole shad, 138 mackerel, 51 cups of raspberries, 17 quarts of blueberries, 27 baskets of grapes, 84 quarts of strawberries, 33 quarts of blackberries, 31 quarts of cranberries, 36 dozen lemons, 2 1-2 boxes of oranges, 3 1-2 barrels of apples, 61 pineapples, 16 watermelons, 23 crates of canteloupes, 84 dozen bananas, 6 barrels of squash, 5 bushels of onions, 4 bushels of turnips, 4 barrels of cabbage, 1 1-2 bushels of cauliflower, 14 crates of tomatoes, 1 bushel of tomatoes, 8 bushels of sweet potatoes, 19 bushels of white potatoes, 51

bunches of celery, 14 bushels of greens, 4 crates of cucumbers, 5 bushels of lettuce, 29 packages of cereals, 49 loaves of bread, 17 loaves of cake, 1 box of common crackers, 1-2 barrel common pickles, 4 kegs of pickles, 19 pounds of butter, 4 gallons of mixed pickles, 1 barrel of mixed pickles, 2 boxes of dates, 7 boxes of figs, 291 pounds of fresh beef, 436 pounds of corned beef, 812 pounds of fowl, 108 pounds of veal, 119 pounds of fresh pork, 87 pounds of salt pork, 138 pounds of mutton, 5 whole swine, 57 pounds of smoked pork, 5 whole livers, 197 pounds of chopped meat, and 1 1-2 kegs of pigs' feet.

In conjunction with the above, numerous other duties have been performed as required by your board, including the investigation of eleven cases of dogs suspected of having rabies, all of which have been properly attended to.

Respectfully submitted,

Dr. Charles M. Berry,  
Inspector of Animals and Provisions.

## REPORT OF INSPECTOR OF MILK AND VINEGAR.

OFFICE OF INSPECTOR OF MILK AND VINEGAR, }  
310 Broadway, Somerville, January 1, 1908. }

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith submit my report for the year ending December 31, 1907.

Two epidemics of contagious diseases have occurred in the city during the year, and in both the source of infection seemed to be traceable to a contaminated milk supply. During the scarlet fever outbreak in January, I made about one hundred visits, and in my opinion the cause of the epidemic was infected milk. In September an outbreak of typhoid fever occurred, and as a result of fifty visits in the city and to the sources of supply of the milk affected, I believe the contamination of milk to have been the cause of the epidemic, although no definite source of infection could be discovered.

During the year I have issued 133 licenses to milk dealers, three to sell oleomargarine, twenty-nine to grocers to deliver milk on teams, and 136 registrations of stores for the sale of milk, making a total of 301. I have received and paid to the treasurer of the city \$151.74, of which \$150.50 was for licenses issued, and \$1.24 for postage stamps.

I have made 103 visits of inspection to the stables and milk rooms of the dealers in the city, and have caused them to make many needed alterations and improvements. I have also inspected forty-nine farms in the towns of Concord, Billerica, Carlisle, and Waltham, where milk is produced for sale in Somerville; many things were found in the methods of milking, straining, cooling, and keeping the milk which were open to criticism, and I believe that more work along the line of keeping the milk pure at its source of supply will be of great benefit to our citizens.

The new regulation adopted by the board, requiring that milk be kept at a temperature not to exceed fifty degrees Fahrenheit, has been productive of good and is very generally complied with. Of 200 temperatures taken throughout the city, nearly all were found to be satisfactory, the instances of high temperature being practically all in stores.

I have collected and analyzed 791 samples of milk, sixty samples of vinegar, and thirteen samples of cream, making a total of 864.

Several complaints have been received from citizens as follows: Bloody milk, one; poor milk, two; dirty milk, one; typhoid, one; an analysis of one sample of milk was made at the request of a physician.

A microscope was purchased for the use of the inspector in

July, and 164 examinations of samples of milk for bacteria, pus, and dirt have been made. I consider the microscopic examination of milk to be a very important part of the work of this department. A new set of analytical balances has also been purchased this year; it is one of the finest made and sensitive to one-twentieth of a milligramme.

I hope to install the card index system for filing records next year.

The following cases were prosecuted in court:—

9 storekeepers, selling milk below the standard; each fined \$10 . . . . .	\$90 00
2 storekeepers, selling milk below the standard; each fined \$5 . . . . .	10 00
1 farmer, who produces and brings his milk to a dealer; fined . . . . .	20 00
1 milk dealer for diluting whole milk with skimmed milk; fined . . . . .	25 00
1 keeper of a lunch room, milk below the standard; fined, . . . . .	10 00
1 milk dealer; milk below the standard; fined . . . . .	10 00
1 storekeeper for not registering; fined . . . . .	10 00
1 milk dealer, second offence, fined . . . . .	100 00
1 milk dealer, third offence, sentenced to 60 days in house of correction and fined . . . . .	50 00
(Jail sentence was suspended on condition that he would not again attempt to do business in Somerville.)	
4 storekeepers found not guilty.	
1 storekeeper found guilty of second offence, but sentence suspended on condition that he will not attempt to sell milk again.	
1 case nol prossed.	

Amount of fines imposed by the courts . . . . . \$325 00

In prosecuting the above cases I spent twenty days in the Somerville court and two days in the superior court.

I have made about 800 visits to stores for the purpose of inspecting their methods and facilities, and to explain the new regulations and statute laws.

The average daily consumption of milk is about 25,100 quarts, beside 400 quarts of cream and thirty-five quarts of fresh condensed milk. There has been a great improvement during the past year in the quality of, and the method of handling, the milk. We are indebted to the secretary of the state board of health for the vigorous inspection of the producing farms in and out of the state.

I desire to thank the board for the support given me in the enforcement of the laws.

The office of the inspector is open for the issuing of licenses and to receive the complaints of citizens from 8 A. M. to 10 P. M. every week day in the year.

Respectfully submitted,

JULIUS E. RICHARDSON, V. S.,

Inspector of Milk and Vinegar.

## REPORT OF OVERSEERS OF THE POOR.

---

Somerville, Mass., December 31, 1907.

To His Honor, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—In accordance with our usual custom, we beg leave to submit the following report for the year 1907:—

In the past year some important improvements and additions have been made at the city home. A more perfect system of heating has been put in, thereby saving, we think, some considerable expense for fuel. A new floor has been laid in the dining-room, and the house generally seems to be in first-class repair.

As our agent mentions in his report, the financial and business depressions of the last few months have added some twenty per cent. to the calls upon this department, and transfers from the state institution have added several to the inmates of the home. We hear of no cases of want which are not properly relieved when called to the attention of the board.

Upon the management of the affairs of our city in common with that of others some reflection has lately been cast. Certainly in this department we feel that there are few indications of useless or extravagant expenditure. To provide a pleasant and suitable home for our aged and helpless people and proper relief for all our deserving poor is and has been our sole aim. Our home, so far as regards original cost, attractiveness, and expense for maintenance, certainly compares most favorably with any similar institution in the state. In our agent, warden, and matron the city has most efficient and faithful servants, in whose hands her interests are most thoroughly guarded.

Very respectfully,

EDWARD B. WEST,  
ALBERT W. EDMANDS,  
HERBERT E. MERRILL,

} *Overseers  
of the  
Poor.*

## REPORT OF GENERAL AGENT.

---

Somerville, Mass., December 31, 1907.

To the Board of Overseers of the Poor, Somerville, Mass.:—

Gentlemen,—I herewith submit my report for the year 1907.

### **Business Good.**

During a large part of the year business was good and working people were generally employed, so that we aided less families and less persons than in former years. There was quite a large number of families, however, that we were obliged to aid, owing to the fact that they did not have sufficient income for their support. In the most of these cases the head of the family had died, or was unable to provide for those dependent on him for support by reason of sickness. As in 1906, we aided a large number of widows, the most of them with large families.

### **Business Dull.**

Late in the fall the financial depression caused many to lose their work, and as a consequence during November and December we were obliged to aid more families and to admit more to the city home than ever before during the same length of time. The expense was about twenty per cent. more in these two months than the corresponding months of 1906.

### **In Touch with the Poor.**

We have tried to keep in touch with those who were destitute and needed assistance from the city. Many families, no doubt, have suffered rather than make their wants known. We believe, however, there has been as little suffering in this city as in any one of its size in the state.

### **Hospital.**

We still find the hospital a very great help in dealing with the sick poor. If a maternity ward could be added, it would be a great blessing to some of the poorer people, as well as others, who would be glad to patronize the same.

### **City Home.**

I can again testify to the wisdom of the city officials in establishing the city home when they did. We could hardly get along without it now.

### **City Physician.**

The city physician, Dr. C. Clarke Towle, is doing faithful work among the poor, many having testified to this during the year.

### **Persons Aided.**

Again I can say that the year just closed has been one of satisfaction because of the fact that we have been able to reach and aid directly or indirectly (including the work of the city physician) more than 2,000 persons, and by so doing we have prevented much distress and suffering, and have added to the comfort and happiness of many more.

### **Small Appropriations.**

The appropriations for the care of the poor in this city are, we believe, smaller than those made in any other city in the commonwealth, according to the population, and yet I think the poor are looked after and made as comfortable here as in any part of the state. I think our neighbors from other cities and towns and the state officials will testify to this fact.

### **Self Supporting.**

One of the chief aims of this office is to help each person and family aided to become self-supporting as soon as possible. This of course cannot always be accomplished, owing to the advanced age and infirmity of some of those aided; but in a great many cases, by investigating and keeping a close watch, we can help them to help themselves. By so doing they become self-respecting and self-reliant. In doing this we are sometimes obliged to be very firm, and in many cases positively refuse to continue aid when asked to do so; but we have learned that in the end this is the correct method, and the one adopted and taught by those who have had the most experience.

Gentlemen of the board, as in the past, I again thank you for uniform courtesies and help received from all of the members, the secretary and city physician, also from the warden and matron of the city home. The year just closed has surely been one of the most pleasant and satisfactory of the twenty-two years of my service in this department. The tables attached give detailed work of the department for the year.

Very respectfully,

C. C. FOLSOM,  
General Agent.

## REPORT OF WARDEN OF CITY HOME.

City Home, January 1, 1908.

To the Overseers of the Poor, Somerville, Mass. :—

Gentlemen,—I submit the following as the report of the warden of the city home for the year ending December 31, 1907 :—

**Table No. 1.**

**REIMBURSEMENTS.**

Produce and pork sold . . . . .	\$3,452 12	
Board of sundry persons . . . . .	340 00	
		\$3,792 12

**Table No. 2.**

**LIVING EXPENSES.**

Salaries and wages . . . . .	\$2,554 93	
Groceries and provisions . . . . .	1,770 99	
Dry goods . . . . .	194 37	
Boots and shoes . . . . .	51 35	
Hay and grain . . . . .	607 14	
Seeds and fertilizer . . . . .	113 68	
House furnishings . . . . .	25 95	
Kitchen furnishings . . . . .	54 26	
Sundries . . . . .	145 21	
Farm sundries . . . . .	267 64	
Cash paid by warden, car fares for warden, inmates and laborers . . . . .	36 35	
Medicine . . . . .	66 02	
Shoeing horses . . . . .	45 35	
Repairs on wagons and tools . . . . .	107 40	
Repairs on sash . . . . .	7 34	
General repairs . . . . .	26 49	
Swill and bedding . . . . .	246 79	
New tools . . . . .	95 90

J. FOSTER COLQUHOUN,

Warden.

## REPORT OF THE CITY PHYSICIAN.

---

OFFICE OF CITY PHYSICIAN, }  
Somerville, January 1, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I beg to submit the following summary as representing the work of your city physician for 1907:—

House visits . . . . .	1,822
Office consultations . . . . .	1,082
Visits at city home . . . . .	33
Attended at police station . . . . .	54
Vaccinations . . . . .	190
Confinements . . . . .	24
Examinations for legal department . . . . .	12

Very respectfully,

C. CLARKE TOWLE,

City Physician.

## REPORT OF THE CITY ENGINEER.

OFFICE OF THE CITY ENGINEER,  
CITY HALL, SOMERVILLE, JANUARY 20, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—In accordance with the provisions of the city charter, the following report of the work done and expense incurred for the year ending December 31, 1907, by the departments and appropriations under my charge and supervision, including Engineering, Grade Crossings, Sewers Construction, Sewers Maintenance, Public Grounds, and other public works, is herewith presented.

### ENGINEERING DEPARTMENT.

#### Statement of Expenses, 1907.

Salary of City Engineer . . . . .	\$3,000 00	
Salaries of assistants (see itemized statement) . . . . .	7,733 29	
Stakes, tools, and general supplies (outside work) . . . . .	66 08	
Draughting materials and office supplies (inside work) . . . . .	150 99	
City maps . . . . .	48 00	
City fares . . . . .	250 75	
Maintenance of team. . . . .	173 90	
Telephone, postage, and incidentals . . . . .	120 87	
<b>Total debit</b> . . . . .		<b>\$11,543 88</b>
CREDIT.		
Appropriation . . . . .	\$11,500 00	
Amount received for making acceptance plans . . . . .	45 00	
<b>Total credit</b> . . . . .		<b>\$11,545 00</b>
<b>Balance unexpended</b> . . . . .		<b>\$1 12</b>

**Classification of Expenses, Assistants' Salaries.**

Sewers,—comprising surveys, estimates, profiles, lines, grades, titles, plans, assessments, and all engineering work relating to sewers . . . . .	\$2,014 26
Highways,—comprising plans, estimates, titles, profiles, lines and grades, inspection of paving, and all other engineering relating to the department . . . . .	626 53
Sidewalks,—comprising profiles, lines, grades, measurements, titles, costs, and assessments . . . . .	1,190 12
Water Works,—comprising lines, grades, locations of mains, gates, hydrants, and services, and other matters relating to water department . . . . .	322 48
Public Grounds,—comprising surveys, plans, estimates, profiles, and grades, including laying out of parks, and grounds, and boulevards . . . . .	102 78
Public Buildings,—comprising surveys, estimates, lines and grades, and other work relating to construction . . . . .	40 48
Street Numbering,—comprising locations of buildings, plans, and affixing street numbers on houses . . . . .	321 98
Street Lines and Grades,—comprising establishing of lines, grades, and miscellaneous data given parties for building and grading . . . . .	138 11
City Survey,—comprising establishing of street lines, acceptance plans, and miscellaneous survey work for city map, bridges, etc. . . . .	926 45
Middlesex Registry,—comprising copying of plans and abstracts from deeds and examination of titles filed at East Cambridge, also tracings of street acceptance and sewer taking plans filed for record . . . . .	282 54
Railway, Telephone, Electric Light, and Gas Light Companies,—comprising grades, plans, profiles and office notes, locations of poles and conduits . . . . .	72 61 95 50
Stone Bounds,—locating and setting . . . . .	928 96
Office Work,—comprising records of all locations, indexing, typewriting, calculations, and general draughting. . . . .	52 33
Miscellaneous Work,—comprising preliminary surveys, designs, sketches, etc., relating to various schemes for different committees . . . . .	618 16
Vacations, Holidays, and Sickness . . . . .	\$7,733 29
Total . . . . .	<hr/> \$7,733 29

**Grade Crossings Account.****STATEMENT OF EXPENSES, 1907.**

Legal services (City Solicitor) . . . . .	\$200 00
Consulting engineer's services . . . . .	200 00
Printing, advertising, etc. . . . .	143 31
	<hr/> \$543 31

**CREDIT.**

Balance of appropriation unexpended December 31, 1906, . . . . .	\$373 51
Overdrawn . . . . .	<hr/> \$169 80

**Office Records and Value of Instruments.**

Number of survey note-books, sewer permit books, and deed books, two hundred and sixty-five.

Number of plans, including sewers, highways, parks, house lots, etc., six thousand.

Value of field instruments, tools, and office instruments, \$2,000

The total cost of maintaining the city engineer's department since it was established (1872-1907, both years inclusive) has amounted to \$248,791.03.

**General Work.** The number of assistants employed during the year on engineering work varied from eight to eleven.

The department has made designs, plans, estimates of cost of contemplated and completed public works, etc., as required by various orders of the board of aldermen and committees. All survey notes, records, and plans made of sewers, drains, highway work, water works, grade crossing work, etc., have been filed for future reference.

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, have been copied, titles examined, and abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and schedules of assessments made out showing the property owners; and copies made of all city plans where land has been taken for highways or sewers, and these have been filed and recorded at the Registry, East Cambridge, as required by law.

Plans have been made and photographs taken where accidents have occurred on the city work or where boundaries were in dispute, for the use of the city solicitor in court cases and hearings; and special plans and data prepared for hearings relating to the proposed bridges and approaches on Lowell street, over the Southern division, and the abolition of all grade crossings on the Fitchburg division of the Boston & Maine railroad.

A number of street names have been changed and plans made showing a re-numbering of the buildings, and all old numbering plans revised, new houses plotted, and numbers assigned; some of the old main thoroughfares should be re-numbered throughout their entire length, so as to eliminate half numbers and letters now being used, as many of these old streets have outgrown their original numbering.

There are many streets, avenues, courts, and places in the city of the same or very similar name, which should be changed to prevent the confusion and inconvenience now existing.

Stone monuments have been set at a number of street intersections and angles to define and preserve the true lines of public streets, and this work should be continued as much as possible each year. By setting these stone bounds or monuments, in Portland cement concrete, at the level of the surface of the ground, or flush with the surface of the sidewalk, they can also

be used as permanent "Bench Marks" throughout the city by establishing their exact elevations, and thereby being a great convenience and saving of time in giving grades, not only for the city engineering department, but also for all other surveyors.

Lines and grades have been given for the erection of new city buildings, and plans and sketches made for the laying out of the surrounding grounds.

About one hundred and five street lines and grades have been given by the department during the year for builders and private parties applying for established grades and lines in connection with the erection of buildings and fences and grading of property.

A table has been made to be used by various city departments, showing subdivision of the city's acreage, as follows:—

Land and water, total area in city . . . . .	2,700	acres
Water . . . . .	100	acres
Marsh lands . . . . .	138.5	"
Streets . . . . .	499.35	"
Steam railroads . . . . .	96.15	"
Parks and playgrounds . . . . .	60	"
(24) Schoolhouse lots . . . . .	13.40	"
(8) Fire station lots . . . . .	2.45	"
Miscellaneous city buildings and lots . . . . .	29.30	"
(37) Church lots . . . . .	18.20	"
9 large manufacturing plants . . . . .	52.65	"
Vacant college land . . . . .	56	"
Large tracts vacant land . . . . .	164.50	"
	<hr/>	1,230.50 acres
Approximate area built upon (not wholly covered) . . . . .	1,469.5	acres
Approximate number of dwellings in city, 12,000.		
Average area to a dwelling about 5,000 square feet.		

Plans have been made by the Edison Electric Illuminating company, of Boston, the New England Telephone and Telegraph company, West End street railway company, Charlestown Gas and Electric company, and Cambridge Gas Light company, and filed in this office, showing the various locations of poles, tracks, and conduits in this city which have been granted by the board of aldermen during the year; and work has been continued under a special act of the legislature, with reference to the city of Somerville, passed in April, 1905, whereby the electric light and telephone companies are placing their overhead wires in conduits underground in certain specified streets, and removing all poles from these streets.

The telephone and electric light companies have extended their underground conduits in Broadway during the year 6,061 feet (Rogers avenue to North street), and 1,827 feet (Fenwick street to Partridge avenue), respectively, making a total of underground conduits in the city January 1, 1908, belonging to the

New England Telephone and Telegraph company 13.27 miles, and the Edison Electric Illuminating company, 1.45 miles.

The Boston Elevated Railway company have also placed their power wires in underground conduits on Broadway (Boston line to Grant street), a length of 4,500 feet.

The Charlestown Gas and Electric company have laid 1.34 miles of gas mains and the Cambridge Gas Light company have laid 1.94 miles of gas mains in various streets in the city during the year.

Lines and grades have been given for laying 4,163.8 linear feet of new city water mains varying in size from six inches to twelve inches in diameter. Two hundred and thirty-seven house services, twenty-eight gates, five hydrants, and five water posts have been located and recorded, sketches and plans made showing the same, and the large water works map corrected to date.

Eighty-one services were re-located, principally on account of new permanent pavement being laid in certain streets where it was advisable to place an extra water pipe in the sidewalks. The trench work on the extension of water mains the past year has been done by the water department by day labor at a considerably increased cost to the city. The greater part of this work should be done by contract with the lowest bidder.

During the year the engineering department has made plans and established grades for the acceptance, under the betterment act, of fourteen new public streets, a total length of 1.73 miles; copies of these plans have been made and filed at the Middlesex Registry at East Cambridge, as required by law.

Five plans have been made of private streets for acceptance as public streets during the year, as ordered, but not as yet made public, and there are plans for acceptance of nine other private streets, previously made, on file in the office that, for various reasons, are still unaccepted as public ways.

Six streets have been constructed during the year, a length of two thousand nine hundred twenty-six feet, at a cost of \$3,272.02, where betterment assessments have been levied on the abutting property amounting to \$1,743.00.

The total length of public streets in the city is 72.954 miles, and private streets, 21.506 miles.

Lines and grades have been given for setting thirteen thousand seven hundred ninety-one and three-tenths linear feet (2.61 miles) of new edgestone and the re-setting of eight thousand seven hundred sixty-two and four-tenths feet (1.66 miles) of old edgestone, and measurements taken for computing assessments; the total length of edgestone set being less than the previous year by about two thousand and eighty-six feet.

Seven thousand two hundred and seventy-eight and eight-tenths square yards of new brick sidewalks and seven thousand two hundred eleven and one-tenth square yards of granolithic

and tar concrete sidewalks have been laid (about 4.18 miles in length), and three thousand and seventy-seven and three-tenths square yards of old brick sidewalks re-laid; the total yardage laid being less than the previous year by about two thousand three hundred and sixty-four yards.

The average cost for the year of setting edgestone with gravel sidewalk has been one dollar and four cents per linear foot, and laying brick sidewalks one dollar and five cents per square yard, which is in excess of the previous year on account of a slight increased cost of materials and labor.

Four thousand six hundred ninety-three and four-tenths square yards of new paved gutters have been laid, and five hundred ninety-one and eight-tenths square yards of new vitrified brick and granite crossings and driveways constructed; two thousand five hundred and four and six-tenths square yards of old gutters, driveways, and crossings have been re-laid, all requiring lines, grades, and measurements.

(See tables in this report for cost of new work, 1907, and total lengths of sidewalks constructed in the city to date.)

### Streets Accepted as Public Highways in 1907 under the Betterment Act.

\*Includes 7.95 miles granolithic and tar concrete walk.

**Table of Street Construction.**

	Square Yards.	Miles
*Streets paved with granite blocks . . . . .	66,300	2.73
Streets paved with "Hassam" pavement . . . . .	36,802	1.80
Streets paved with asphalt . . . . .	10,410	0.73
Streets paved with vitrified brick (Davis Square) . . . . .	5,640	0.20
Streets paved with "bitulithic" . . . . .	14,689	0.88
**Streets macadamized . . . . .		65.35
Streets graveled or unimproved . . . . .		22.77
Total . . . . .		<u>94.46</u>

\*Also 31.8 miles (single track) electric railway, paved with granite, asphalt, "bitulithic."

\*\*Includes 2.84 miles boulevard.

Lines, grades, and measurements have been given and miscellaneous work done for paving with "Hassam Pavement," by contract, a portion of Medford street, extending from Central square to Highland avenue; Central square and Cross street, between Tufts street and Central square; and the entire width of Broadway, extending from near Cutter street to Cross street and on the southwesterly half of Broadway from Cross street to the northwesterly line of Fellsway (east) extended; and a strip in front of the City Hall one-half the width of Highland avenue.

The space occupied by the street railway tracks was not paved with the new pavement, but left with the old granite block pavement.

Simpson Brothers corporation, of Boston, were the contractors, laying this new pavement (without guarantee) for \$1.65 per square yard, the city re-setting all edgestone, re-laying all sidewalks, crossings, and making all other necessary alterations to complete the work at the following cost:—

Location.	Length in Feet.	"Hassam Pavement" Square Yards.	Total Cost. Contract and City.
Broadway, double roadway . . (near Cutter st.—Cross st.)	958	8,796.13	\$15,558.93
Broadway, single roadway . . (Cross st.—Fellsway east ex- tended.)	751		
Cross st. . . . . (Tufts st.—Central sq.)	432	799.30	1,444.63
Highland ave., one-half roadway (In front of City Hall.)	96	137.75	247.05
Central sq. . . . .	254	1,370.25	7,766.84
Medford st. . . . . (Central sq.—Highland ave.)	1,096	2,746.30	
Totals . . .	3,587	13,850.23	\$25,017.45

These accounts were credited with \$318.91, being the amounts allowed for old materials removed from the line of work.

Also a portion of the yard at the city's water department stable was laid with this pavement, amounting to 241 square yards.

The average cost of laying "Hassam Pavement" in the city during the year (principally by contract) was \$1.80 per square yard, including the cost of re-setting edgestones, re-laying sidewalks, and all other incidental work.

Total "Hassam Pavement" laid in the city during the years 1906 and 1907, 37,521.3 square yards.

This pavement laid under proper specifications and competent inspection will stand any climatic conditions; it has a gritty surface and is being laid at a less cost per square yard than any other permanent pavement heretofore laid in this city.

New streets constructed during the past year have been more thoroughly and better built than for some time past; at least six inches of stone, after rolling, being used, and trap-rock entirely for the wearing surface, and on some streets "Tarvia" or "Asphaltoilene" has been applied. The same method of con-

struction should be carried out in the re-building and surfacing of old streets.

A number of experiments and tests have been made, using "Tarvia," "Asphaltoilene," and "Terracolio" for preserving macadam street surfaces and for suppression of dust; and future road construction will depend more or less on some mixture with the macadam surface to prevent deterioration caused by automobiles.

The greater part of highway construction work during the year has been done by the city furnishing all materials, labor, road-roller, watering, etc. The average cost of new street construction work, macadamizing with trap-rock, where the city furnished everything, has been sixty-five cents per square yard, and shows an average cost of \$1.50 per lineal foot for constructing a street forty feet in width, having a macadamized roadway twenty-one feet wide, built by the city, day labor.

All new street construction work, trench work for laying water mains, etc., should be done by contract with the lowest bidder, under proper specifications and plans drawn by the city engineer, and thereby saving a considerable percentage of cost.

Where double car tracks have been laid in streets, leaving narrow roadways on either side, it is impossible to maintain a macadam surface, even at a heavy expense yearly, and these streets should be permanently paved with a suitable permanent pavement adapted to the character of the surroundings and amount of traffic and conditions encountered.

On some of the principal streets the edgestones should be completed and gutters paved, so that the street can be properly drained in times of heavy storms. A considerable quantity of stone still remains on the southerly portion of the city ledge, situated in West Somerville, between Holland street and Broadway, that can be quarried and used on street and sidewalk work to the city's advantage. The city has also come into possession of the Collins and Ham ledge on Clarendon hill, West Somerville; and by using the stone from these two ledges and purchasing trap-rock, the city will have a sufficient supply of good road material for a number of years to come.

The West End street railway company (by its attorney, the Boston elevated railway company) has laid double tracks in Mystic avenue, from the Charlestown line to the Fellsway (state boulevard) and northerly in this boulevard to Mystic river, a length of about one and one-tenth miles in Somerville; these tracks are being extended in the Middlesex Fells reservation through Malden and Medford to Spot pond and Stoneham.

The double car tracks in Broadway at Cross street have been relocated, and new curves constructed to conform with the parkway work of the previous year.

There are thirty-one and eight-tenths miles of electric railroad (single track location) laid at the present time in the city's streets.

Negotiations are still pending between the city and Massachusetts highway commission whereby, eventually, Mystic avenue, between the Medford city line and Austin street, will be taken, constructed and maintained as a state highway. A plan and profile of the street has been received showing what is contemplated by the commission.

The portion of this avenue in Medford has already been taken by the state and constructed during the past year.

**Perambulation of City Boundary Line Between Somerville and Medford.** On November 12, 1907, representatives from the city of Somerville and city of Medford, duly authorized, met and examined the bounds and marks defining the existing division line between the two cities, and reported in due form to their respective boards of aldermen.

These boundary lines between the adjoining cities are perambulated every five years, and an accurate description of the same is placed on record in the city clerk's office.

In connection with these city boundary lines the accurate location of a number of dwellings and parcels of land, situated partly in one city and partly in another, has been determined for the assessors' department.

**Abolition of Grade Crossing.** Considerable progress has been made towards the abolition of grade crossings on the line of the Fitchburg division of the Boston & Maine railroad, running though the southwesterly portion of the city.

Many public hearings have been held before the special grade crossing commission, appointed by the court for this particular work, plans presented, and many interested parties appearing, and the matter considered.

No decree has yet been issued, but it is known what the commissioners' report will be in regard to the matter, and plans are being made to accompany the findings of the commissioners, on the separation of grades, at these various crossings, with the railroad tracks.

At the Somerville-avenue crossing, the city's highway is to be carried over the railroad tracks by a bridge with elevated approaches, with no change in the railroad grade.

At the Medford-street crossing the grade of the railroad is to be partly raised, and the city's street depressed and carried under the railroad tracks.

At the Webster-avenue and Newton-street crossing (combined) the grade of the railroad is to be slightly depressed, and the city's highway carried over the railroad tracks by a bridge with elevated approaches.

At the Dane-street crossing and the Park-street crossing

the city's highways are to be carried over the railroad tracks by bridges and elevated approaches with no change in the railroad grade.

This plan of abolishment of crossings at grade in the first two described (Somerville-avenue and Medford-street) are practically as proposed by the city's scheme presented to the commission; the other three (Webster-avenue, Dane-street, Park-street) are just the reverse of the city's scheme, as presented.

No provision is made for crossings at Vine street, Kent street, or Sacramento street, and the steep approaches and old narrow bridges remain as at present at Prospect street and Washington street.

By the railroad company's scheme five crossings would be changed at an estimated cost of slightly less than one million dollars, leaving a number of dead-end streets, while the city's scheme provides for the carrying of all streets across the railroad location at a cost slightly in excess of one million dollars.

The plan at Webster-avenue and Newton-street crossing for carrying the city's street over the railroad tracks by a bridge with elevated approaches is a very unsatisfactory solution of the problem for the city's welfare, and requires unnecessary changes to private property and streets outside of the railroad location, necessitating the payment of heavy damages.

The matter of constructing bridges over the main line and branch locations of the Boston & Maine railroad on the line of Lowell street, as decreed by the county commissioners, is still pending in court, and some decision will probably be rendered during the coming year.

An agreement with the Boston & Maine railroad company has been made, whereby gravel is being taken from the city's lot, located in Waltham, and used by the railroad, in the construction work now being carried on, for abolishing grade crossings in Belmont and Waltham. The city will receive a considerable income during the next five years from the sale of this gravel.

Following is a table, compiled from reports, maps, and office notes, showing the location of stone bounds, as set, for defining street lines and angles; the year when set, and whether existing, or removed, at the present time.

### Stone Bounds Set 1860 to 1875 Inclusive.

Beacon Street.—North side, at Cambridge line. (Dickinson street.)	
Beacon Street.—Centre at Cambridge line. (Dickinson street.)	
Beacon Street.—Southwest side, at Cambridge line. (Dickinson street.)	
Beacon Street.—Centre line, angle, west of Cooney street.	(Removed)
Beacon Street.—Northeast side, angle, west of Cooney street.	
Beacon Street.—Southwest side, angle, west of Cooney street.	
Beacon Street.—Southwest side, south side Washington street.	
Beacon Street.—Southeast side, south side Washington street.	
Beacon Street.—Centre line, centre Washington street.	(Removed)
Beacon Street.—Centre line, near Kent street. (Opposite city line bounds.)	(Removed)
Beacon Street.—Centre line, centre Sacramento street.	(Removed)
Beacon Street.—Centre line, angle at Oxford street.	
Beacon Street.—Centre line, centre Milk street. (Somerville avenue.)	(Removed)
Bond Street.—Centre line, at side line Broadway.	
Bond Street.—Centre line, at angle north of Broadway.	(Removed)
Bond Street.—Centre line, P. C., north of Heath street.	(Removed)
Bond Street.—Centre line, P. T., north of Heath street.	(Removed)
Beech Street.—Centre line, centre Milk street. (Somerville avenue.)	(Removed)
Beech Street.—Centre line, angle at Atherton street.	(Removed)
Beech Street.—Centre line, angle at centre Spring street.	
Bow Street.—North side, P. T., in Union square.	
Bow Street.—North side, east side Walnut street.	(Removed)
Bow Street.—North side, west side Walnut street.	(Removed)
Bow Street.—North side, P. C., west of Walnut street.	(Removed)
Bow Street.—South side, P. C., west of Walnut street.	
Bow Street.—South side, P. C. C., west of Walnut street.	
Bow Street.—South side, P. T.	
Bow Street.—North side, P. T.	(Removed)
Bow Street.—South side, P. C., Milk street. (Somerville avenue.)	(Removed)
Bow Street.—North side, P. C., Milk street. (Somerville avenue.)	
Bow Street.—Centre line, centre, Milk street. (Somerville avenue.)	(Removed)
Broadway.—South side, angle at Franklin street.	
Broadway.—North side, angle at Franklin street.	(Removed)
Broadway.—South side, angle at Glen street.	
Broadway.—North side, angle at Glen street.	(Removed)
Broadway.—South side, west side Glen street.	
Broadway.—South side, centre of Rush street.	
Broadway.—South side, angle west of Cross street.	(Removed)
Broadway.—North side, angle west of Cross street.	(Removed)

- Broadway.—Both sides, angle west Melvin street. (Old 100-foot street.)
- Broadway.—Both sides, angle at Walnut street. (Old 100-foot street.)
- Broadway.—Both sides, angle between Sargent avenue and Marshall street.
- Broadway.—North side, centre Main street, angle.
- Broadway.—South side, near centre Central street, angle.
- Broadway.—South side, angle between Bartlett street and Glenwood road.
- Broadway.—South side, angle west of Medford street.
- Broadway.—North side, west side Medford street.
- Broadway.—North side, angle west of Cedar street.
- Broadway.—South side, angle west of Cedar street. (Removed)
- Broadway.—Centre line, angle east of Willow avenue.
- Broadway.—Centre line, P. C., west of Liberty avenue.
- Broadway.—South side, P. C., west of Liberty avenue.
- Broadway.—North side, P. T., west of Liberty avenue.
- Broadway.—North side, P. C., Warner street. (Removed)
- Broadway.—South side, P. C. C., Powder House square.
- Broadway.—South side, P. T., College avenue.
- Broadway.—Centre line, centre College avenue. (Removed)
- Broadway.—Both sides, P. T., just beyond Powder House square.
- Broadway.—Centre line, P. C., 484 feet west of Powder House square. (Removed)
- Broadway.—Centre line, P. T., west of Chandler street. (Removed)
- Broadway.—Centre line, angle west of Simpson avenue. (Removed)
- Broadway.—Centre line, angle west of Paulina street. (Removed)
- Broadway.—Centre line, angle west of Packard avenue.
- Broadway.—Centre line, angle centre Curtis street. (Removed)
- Broadway.—Centre line, P. C., west of Clarendon avenue. (Removed)
- Broadway.—Centre line, P. T., east of Endicott avenue. (Removed)
- Broadway.—Centre line, angle between Endicott and Faragut avenues. (Removed)
- Broadway.—Centre line, angle between Garrison avenue and Victoria street. (Removed)
- Broadway.—Centre line, angle west of North street. (Removed)
- Broadway.—Centre line, near Alewife brook. (Removed)
- Cedar Street.—Centre line, centre Elm street. (Removed)
- Cedar Street.—Centre line, north line Sartwell avenue. (Removed)
- Cedar Street.—Centre line, centre Summer street. (Removed)
- Cedar Street.—Centre line, angle near south line Highland avenue.
- Cedar Street.—Centre line, angle north of Morrison avenue. (Removed)
- Cedar Street.—West side, angle north of Morrison avenue.
- Cedar Street.—Centre line, south side Broadway.
- Central Street.—Centre line, centre line Milk street. (Somerville avenue.) (Removed)
- Central Street.—Centre line, centre Summer street. (Removed)
- Central Street.—Centre line, Highland avenue. (Removed)
- Central Street.—Centre line, centre Medford street. (Removed)
- Cherry Street.—Centre line, centre Elm street.
- Cherry Street.—Centre line, angle near Sartwell avenue. (Removed)
- Cherry Street.—Centre line, centre Summer street. (Removed)
- College avenue.—See Elm street.
- Cross Street.—Centre line, south side Broadway. (Removed)
- Cross Street.—East side, north side Brook street.
- Cross Street.—Centre line, centre Webster street. (Removed)
- Cross Street.—Centre line, P. C., centre Pearl street.
- Cross Street.—Centre line, P. T., near Flint street.

- Cross Street.—Centre line, P. C., near centre Gilman street. (Removed)
- Cross Street.—Centre line, P. T., south of Tufts street. (Removed)
- Cross Street.—Centre line, centre Shawmut street. (Removed)
- Cross Street.—Centre line, centre Medford street. (Removed)
- Curtis Street.—Both sides, at Broadway. (Not used.)
- Curtis Street.—Centre line, at Medford city line. (Opposite bound No. 14.)
- Cutter Street.—Centre line, south side Broadway.
- Cutter Street.—Centre line, centre Webster street.
- Dane Street.—Centre line, Milk street. (Somerville avenue.) (Removed)
- Dane Street.—Centre line, Washington street.
- Elm Street.—Centre line, Milk street. (Somerville avenue.)
- Elm Street.—Both sides, P. T., between Somerville avenue and Porter street.
- Elm Street.—Centre line, angle west of Cedar street. (Removed)
- Elm Street.—Centre line, angle near Cherry street.
- Elm Street.—Centre line, angle at White street.
- Elm Street.—Centre line, angle east side Willow avenue. (Removed)
- Elm Street.—Centre line, angle near west side Beech street.
- Elm Street.—Centre line, angle west of Windom street.
- Elm Street.—Centre line, angle west of Russell street.
- Elm Street.—Centre line, at P. C., west of Chester street.
- Elm Street (now College Avenue).—Centre line, at P. T., north of Lexington & Arlington Br. R. (Removed)
- Elm Street (now College Avenue).—Centre line, at P. C., north of Morrison avenue. (Removed)
- Elm Street (now College Avenue).—Centre line, at P. T., Chapel street. (Removed)
- Elm Street (now College Avenue).—Centre line, at P. C., north of Francesca avenue. (Removed)
- Elm Street (now College Avenue).—Centre line, at P. T., at Kenwood street. (Removed)
- Elm Street (now College Avenue).—West side, P. T., in Powder House square.
- Elm Street (now Warner Street).—Centre line, angle north of Broadway. (Old layout.)
- Elm Street (now Warner Street).—Centre line, at Medford line. (Old layout.)
- Flint Street.—South side, west side Franklin street.
- Flint Street.—North side, near Cross street.
- Florence Street.—Centre line, centre Perkins street.
- Florence Street.—Centre line, Pearl street.
- Franklin Street.—Centre line, south side Broadway.
- Franklin Street.—Centre line, Webster street.
- Franklin Street.—Centre line, centre Pearl street, east.
- Franklin Street.—Centre line, centre Pearl street, west.
- Franklin Street.—Centre line, angle between Flint street and Oliver street.
- Franklin Street.—Centre line, angle near Washington street. (Removed)
- Franklin Street.—Centre line, side line, Washington street. (Removed)
- Greenville Street.—Centre line, centre Medford street.
- Harvard Street.—Centre line, centre Beech street.
- Harvard Street.—Centre line, centre Summer street.

- Prospect Street.—Centre line, centre Milk street. (Somerville avenue.)
- Prospect Street.—East side, south side Milk street. (Somerville avenue.)
- Prospect Street.—Centre line, centre Webster avenue.
- Prospect Street.—Centre line, Cambridge line.
- Russell Street.—Centre line, centre Elm street.
- Russell Street.—Centre line, at Cambridge line.
- Sacramento Street.—Centre line, centre Milk street. (Somerville avenue.)
- School Street.—Centre line, centre Milk street. (Somerville avenue.)
- School Street.—Centre line, centre Summer street.
- School Street.—Centre line, centre Highland avenue. (Removed)
- School Street.—Centre line, centre Medford street. (Removed)
- School Street.—Centre line, side line Broadway.
- Shawmut Street.—Centre line, side line Washington street. (Removed)
- Somerville Avenue.
- (Formerly Milk Street.—North side, angle near East Cambridge line.
- (Formerly Milk Street).—Centre line, angle near East Cambridge line.
- (Formerly Milk Street.)—Centre line, angle at Medford street.
- (Formerly Milk Street.)—Centre line, centre Bow street.
- (Formerly Milk Street.)—Centre line, angle between Union square and Metropolitan square.
- (Formerly Milk Street.)—North side line, P. T., at Bow street.
- (Formerly Milk Street.)—Centre line, angle west of Bow street.
- (Formerly Milk Street.)—Centre line, angle east of School street.
- (Formerly Milk Street.)—Centre line, angle west of Dane street.
- (Formerly Milk Street.)—Centre line, P. C., near Belmont street.

- (Formerly Milk Street.)—Centre line, P. T., west of Lowell street.
- (Formerly Milk Street.)—North side, P. T., west of Lowell street.
- (Formerly Milk Street.)—Centre line, angle west of Oak square.
- (Formerly Milk Street.)—Centre line, at West Cambridge line.
- South Street.—North side, west side Medford street.
- South Street.—North side, east side Water street.
- Spring Street.—Centre line, centre Milk street. (Somerville avenue.)
- Spring Street.—Centre line, centre Summer street.
- Summer Street.—North side, P. T., near Wesley square.
- Summer Street.—South side, P. T., near Wesley square.
- Summer Street.—Centre line, angle between Spring street and Belmont street.
- Summer Street.—Centre line, angle between Craigie street and Porter street. (Removed)
- Sycamore Street.—Centre line, centre Highland avenue.
- Sycamore Street.—Centre line, centre Medford street.
- Temple Street.—Centre line, side line Broadway.
- Temple Street.—Centre line, centre Heath street.
- Temple Street.—Centre line, centre Jaques street.
- Temple Street.—Centre line, P. C., at Derby street.
- Temple Street.—Centre line, P. T., north of Derby street.
- Temple Street.—West side, south side Mystic avenue.
- Temple Street.—Centre line, centre Medford turnpike. (Mystic avenue.)
- Tufts Street.—Centre line, centre Cross street.
- Walnut Street.—Centre line, centre Bow street.
- Walnut Street.—Both side lines, angle at Munroe street. (Removed)
- Walnut Street.—Both side lines, near south side Highland avenue.)
- Walnut Street.—Centre line, P. C., north of Pearl street.
- Walnut Street.—Centre line, P. T., centre Veazie street.
- Walnut Street.—Centre line Bonair street. (Removed)
- Walnut Street.—Centre line, side line Broadway.
- Warner Street.—See Elm street.
- Washington Street.—South side, at Boston city line.
- Washington Street.—North side, at Boston city line.
- Washington Street.—Both sides, angle between Florence street and Myrtle street.
- Washington Street.—South side, west of Bartlett street.
- Washington Street.—South side, opposite Franklin street.
- Washington Street.—North side, centre Tufts street. (Removed)
- Washington Street.—South side, centre Boston & Lowell R. R.
- Washington Street.—North side, east side Shawmut street.
- Washington Street.—South side, east side Linwood street.
- Washington Street.—South side, west side Medford street.
- Washington Street.—North side, west side Boston street.
- Washington Street.—North side, P. C., west of Boston street.
- Washington Street.—South side, P. C., between Rossmore street and Mystic street.
- Washington Street.—Both sides, P. T., west of Mystic street.
- Washington Street.—North side, angle near Prospect street.

- Washington Street.—South side, angle centre Prospect street.
- Washington Street.—South side, north side Milk street.  
(Somerville avenue.)
- Washington Street.—South side, south side Milk street.  
(Somerville avenue.)
- Washington Street.—North side, P. C., Stone avenue.
- Washington Street.—Centre line, centre Webster avenue.

Boston Street.—North side, P. T., east of Prospect-hill avenue.
Boston Street.—North side, P. C., west of Munroe street.
Boston Street.—North side, P. T., opposite Munroe street.

construction assessed on the abutting estates under orders adopted by the board of aldermen.

Short lines of storm drains and overflows from congested sewers have been constructed during the year in the most needed districts.

The "separate system" sewers (those built for house drainage only) have been extended in a number of streets, and this system should be extended yearly until all the flooded districts in the city have two complete systems of drainage, the old sewer to be used for storm and surface water. The city pays the entire cost of these new sewer extensions for house drainage.

Wherever these new sewers are constructed, the house plumbing should be changed where necessary, and the house drains and conductor, or surface water drains, reconnected with both systems as soon as possible.

During the year the main outlet for storm drainage in the North Somerville district through Two Penny brook has been permanently constructed. The course of the old brook running diagonally across building property has been changed between College avenue and the Medford city line, and a new covered structure built in a passageway and street released to the city for the purpose of drainage, the brook being diverted into this new channel, and thence extended through Medford to Mystic river.

The structure is constructed principally of Portland-cement concrete re-inforced with expanded metal and I beams in the roof construction, with the invert lined with brick and varying in width from six feet to five feet by three and one-half feet high and about six hundred and ninety feet long.

New sewers and drains were constructed during the year varying in size from eight-inch pipe to fifteen-inch pipe, and concrete structure six feet by three and five-tenths feet, in the following localities:—

"Separate system" sewers in:—

Hawkins street,—(east side) Washington street to Lake street.

Lake street,—(both sides) Hawkins street to near Church street.

Marion street,—Near Wyatt street to near Dimick street.

Myrtle street,—(both sides) Washington street to angle in street.

Park street,—Beacon street to near Somerville avenue.

Somerville avenue,—(northeast side) near East Cambridge line.

Somerville avenue,—(southwest side) Prospect street to Washington street.

Washington street,—(southwest side) Somerville avenue to Kingman road.

Washington street,—(northeast side) Union square to Hawkins street.

“Combined system” sewers in :—

Walnut road,—Walnut street to angle in street.

Whitfield road,—Packard avenue westerly.

Storm drains in:—

Bay State avenue,—Mallet street northerly.

City field (street),—Near Cedar street to Sumner street.

Kidder avenue,—Lowden avenue to Bay State avenue.

Lowden avenue,—Broadway to Kidder avenue.

Mallet street,—Lowden avenue to Bay State avenue.

Pearson road,—Along Medford city line at Two Penny brook.

Private lands,—Pearson road to College avenue.

Sumner street,—City farm (street) to Hinckley street.

**Summary of Work.** Twenty-one new sewers and drains have been constructed during the year, a total length of 10,187.9 linear feet (1.929 miles), at a cost of \$25,765.70, plans have been made showing these sewers in detail, and assessments levied on a portion of them, amounting to \$1,331.46. (See tabular statement of sewers and drains for 1907, showing itemized statement of work and cost.)

The total length of the city's drainage system is 97.114 miles, 23.401 miles being on the “separate system,” and 6.273 miles of storm drains, and the entire cost of construction has amounted to about \$1,206,231, exclusive of the amount paid to the state for assessments for the construction of the North Metropolitan sewerage system.

Forty-one new catch basins have been constructed in the highways during the year, at an average cost of \$58.78 per basin, making a total of 1,463 catch basins in the city for street drainage purposes, constructed and maintained as follows:—

By the city (sewer department):—

Located in streets and subways . . . . .	1,414 basins
Located in city boulevard . . . . .	29 “
Located in parks (11) other city lots (9) . . . . .	20 “

Total catch basins constructed and maintained by city,	1,463
By Boston & Maine railroad company on rail- road locations . . . . .	29 basins
By State, located in boulevards . . . . .	52 “
	<hr/> 81

Total catch basins in city for drainage purposes, 1,544

**Metropolitan Sewer Connections.** All of the city's ten connections with the North Metropolitan sewerage system are in good condition. No new main connections have been required.

A private drain about 150 feet in length has been con-

structed on the Boston Elevated Railway company's property at the owners' expense for the purpose of drainage from the power station, located on the marsh lands near Woodstock street, and connecting with the Metropolitan sewer main along the easterly side of Alewife brook.

At the Somerville-avenue-Poplar-street connection with the Metropolitan sewer, records compiled from an automatic recording clock placed in the "regulator chamber" on the combined system show this outlet to have been cut off as follows:—

Year 1907, completely closed 206 hours, partly closed 534 hours.

In previous years the following:—

Year 1906,	completely closed	289	hours,	partly closed	331	hours.
" 1905,	"	297	"	"	548	"
" 1904,	"	279	"	"	922	"
" 1903,	"	180	"	"	167	"
" 1902,	"	376	"	"	377	"
" 1901,	"	336	"	"	225	"
" 1900,	"	353	"	"	114	"

The city's assessment for the Metropolitan sewer system for the past year was \$23,895.41 on construction account and \$13,680.36 for maintenance, and the total amount paid the commonwealth of Massachusetts for this state sewer has been \$609,385.55 (1894-1907, both years inclusive). The total length of the Metropolitan sewerage system mains running through the city amounts to 3.368 miles.

**New Work.** The separate system sewers should be extended in the old sections of the city each year as the appropriation will allow.

The construction of the storm drainage system, commenced in the year 1905, should be continued in the vicinity of North Somerville, where buildings and new streets are being rapidly constructed; the outlet for this district being through the city of Medford into Mystic river.

Storm drainage should be provided on sections of Mystic avenue, and also in the vicinity of Lincoln park.

In the vicinity of Lowell and Vernon streets, some arrangement should be made with the railroad company, whenever the highway bridge is constructed at Lowell street, for providing an outlet for storm water in this locality through the railroad valley, which would be beneficial to both city and railroad.

A large storm overflow drain has been contemplated for some time at the East Cambridge line, across private lands from Somerville avenue, discharging into the head of Miller's river. In conjunction with this last proposed work, a readjustment of the present legislative act should be made on a more equitable basis, whereby the amount paid by this city to Cambridge for the maintenance of the Somerville-avenue-Bridge-street sewer would be less and in proportion to the use of the same at the

Total length of the city drainage system, January 1, 1908, 512,761.0 feet, or 97.114 miles.

present time, the prevailing conditions being far different from what existed some thirty years ago, when the division of the cost was established.

A special act of the legislature in 1903 authorized the cities of Somerville and Cambridge and the towns of Arlington and Belmont to unite in improving the sanitary condition of Alewife brook within the limits of the referred-to cities and towns, and after considerable preliminary work had been done, it was deemed advisable to suspend operations, as another act was passed by the legislature in 1904 whereby, in conjunction with the Metropolitan Park Commission, the entire length of Alewife brook, together with upper Mystic river in Medford, might be improved far more extensively than at first proposed by the cities and towns originally interested in the matter. A lengthy report has been published by the state authorities showing the existing conditions, and some construction work has been done, but the brook remains in the same unimproved condition.

Following tables show itemized cost of sewers constructed in 1907; sewers constructed on the "separate system"; storm drains constructed; size and materials of construction of the city's entire drainage system:—

**Sewers Maintenance Account.****STATEMENT OF EXPENSES, 1907.**

Maintenance of sewers, including cleaning and flushing (97 miles)	\$2,507 60	
Maintenance of catch basins, cleaning and flushing (1,463)	6,798 80	
Changing line and grade and repairing catch basins	661 45	
Changing line and grade and repairing man-holes	596 08	
Repairing old sewers	433 83	
Inspection and location of house drains	310 08	
New tools and supplies	253 86	
Repairs of tools and property	97 62	
Sundry expenses, car fares, telephone, books, etc.	95 07	
Maintenance of sewer department yards and buildings	327 00	
Work and materials furnished other departments and companies	242 35	
Total debit		<u>\$12,323 74</u>
CREDIT.		
Appropriation	\$12,000 00	
Amounts received from other departments and companies, labor, materials furnished	242 35	
Total credit		<u>\$12,242 35</u>
Amount overdrawn		\$81 39
Value of tools and property on hand used in maintenance of sewers	\$907 00	

A permanent force of men and teams are kept continually at work flushing, cleaning, and repairing the city's drainage system, the expense necessarily increasing yearly as lengths of sewers, drains, and catch basins are added to the system.

About 9,000 cubic yards of deposit have been removed from the catch basins and sewers during the year, and the average cost per mile for this cleaning and maintaining has amounted to \$95.83.

Ninety-five catch basins and one hundred and five manholes have been repaired and grade or line changed.

A number of repairs have been made on some of the old sewers, alterations made in the outlets, and overflows and extra manholes built for the purpose of improving the system.

Three hundred and eighteen permits have been issued to licensed drain layers for connecting buildings with the main sewers, ninety-one being for repairs or alterations; all of the

work being done under the supervision of the city's inspector. There are to date about 13,658 private drain connections with the city's drainage system.

During the year the sewer department has done considerable miscellaneous work for other city departments and outside companies where alterations and new construction work has been required, furnishing materials and labor, and being reimbursed for the same to the amount of \$242.35.

Two old private sewers have been released to the city; namely, in Sumner street and a portion of Dana street, and will be maintained in the future by the city.

**PUBLIC GROUNDS DEPARTMENT.**

At the present time there are seventeen separate parcels of land located in all parts of Somerville, used for parks and playgrounds, amounting to 62.6 acres, and also a boulevard about one and one-third miles in length maintained by the city; included in this total area are playgrounds where the land is owned by private parties and leased to the city, for use, in the following localities: On Winthrop avenue (Fellsway east), two and one-half acres; Knowlton street, one and one-half acres; the Broadway athletic field in West Somerville, 4.4 acres; and the cemetery lot, .7 acre.

By orders passed by the board of aldermen, the College-avenue playgrounds have been transferred from the Public Grounds department for use of a branch public library building, to be built from the Carnegie fund.

The old Harvard school lot has been added to the Public Grounds department, and a strip in the centre of Broadway, between the Charlestown line and Fellsway (east) has been reserved as a parkway. The portion of this reserved space between the double car tracks is to be loamed and shrubbery planted the coming year.

There are a number of vacant lots in the city, owned by private parties, large enough for the purpose of establishing recreation grounds and breathing spaces, which undoubtedly could be obtained for short term leases by payment of the taxes to the owner of the property, and be of great benefit to a large number of children in the congested parts of the city.

The larger areas, Broadway, Central hill, Prospect hill, Lincoln and Tufts parks, have been policed by regular officers from the police department, when required, the expense being paid from the police appropriation, trees and shrubs added to the various grounds, and bulbs, plants, and flowers furnished in their seasons, and during the winter time ponds flooded for skating when the weather was favorable.

Seven fields have been maintained for baseball and three for football playing, and have been constantly in use by the many athletic teams, the games being arranged for and scheduled on the various grounds throughout the season. An outdoor gymnasium, two bicycle and running tracks, and three tennis courts have been maintained, and are a source of much enjoyment for a large number of people.

The westerly end of Lincoln park has been filled and graded to the same elevation as the rest of the playground, and this area has been laid out and maintained as another ball field. A new entrance has been made and flight of steps constructed leading from Washington-street bridge into the park, and the roadway of Lincoln parkway re-macadamized, and a new brick sidewalk laid on the Perry-street side of this park. A swimming pool having

an area of not over 4,000 square feet could be constructed with a concrete bottom and side walls at a small cost, and would be a source of much enjoyment and beneficial to a very large number of children in the immediate vicinity of Lincoln park.

On Central-hill park many of the concrete walks should be re-constructed and new ones added. A contract has been executed with Augustus Lukeman, sculptor, of New York, for the erection of a soldiers' monument costing \$20,000, to be placed on Central hill and completed in the fall of 1908.

The granite curbing around the pond in Broadway park should be re-set.

Two baseball and football fields have been maintained on the playground located at the corner of Broadway and Cedar street.

As an experiment, "Asphaltoilene" has been applied on the macadam surface of a section of Powder-house boulevard, and on Prospect-hill parkway "Terracolio" has been applied.

At the annual Thanksgiving day football game between teams representing the Somerville and Cambridge high schools, played on the enclosed athletic field, West Somerville, there were about 6,500 people in attendance, and as an admission is charged by the Somerville High School Association at their contests, a portion of the cost of maintaining this field has been paid by the association, amounting to \$143.80 for the years 1906-1907.

This athletic field is on leased land belonging to Tufts College, and in accordance with the terms of agreement, the city has the use of this area until July 1, 1911, unless terminated earlier. Notice of such termination was received during the past year, accompanied by a plan showing the field laid out into streets and building lots, but no definite action has been taken as yet.

If the city is to maintain an athletic field in the future, some provision should be made previous to the termination of the present lease whereby a permanent enclosed area, owned by the city, will be ready for use. The present city ledge property, located in West Somerville, situated between Holland street and Broadway, is of sufficient size and a suitable location for this purpose, and could be laid out and constructed, with ornamental fences of re-enforced concrete on the street and boundary lines, making an athletic field unsurpassed by any in this vicinity. A portion of this construction work might be done each year, until completed, by making small appropriations yearly.

The city's assessment for Metropolitan parks and boulevards for the year 1907 amounted to \$18,253.61 on construction account, and \$9,887.30 being the proportional cost for maintaining the same; in addition to this, the city's special assessment for the newly-constructed Wellington bridge, across Mystic river on the line of the Metropolitan parkway, amounted to \$5,564.98 on construction account, and \$284.77 for maintenance. Somerville pays a separate assessment, together with four other cities, of twelve and one-half per cent. of the cost of construction and

maintenance of this new bridge, besides the proportional part of the Metropolitan park district assessment. The total of the above assessments amount to \$33,990.66, being Somerville's proportional payment to the state on account of the Metropolitan park system for the year 1907; less an over-charge in 1906 of \$2,112.35. The length of the state boulevard at present constructed in this city consists of seven-tenths of a mile of double roadway, located in the easterly part of the city, and extending between Broadway and Mystic river.

Whenever the plan of sanitary improvement is carried out along the line of Alewife brook, on the northwesterly boundary of Somerville, a boulevard could be constructed along the banks of this brook at small expense, connecting Massachusetts avenue in Cambridge with the city's Powder-house boulevard, which would improve the general conditions in this section of the city, and enhance the value of surrounding property.

### Maintenance Account (Public Grounds).

#### STATEMENT OF EXPENSES.

##### Broadway Park (15.9 acres):—

Maintenance of grounds and general care of property, labor and teams . . . . .	\$1,300 49	
Tools and supplies . . . . .	36 17	
Repairing tools and property . . . . .	38 57	
Plants, flowers, bulbs, trees, and shrubs . . . . .	137 36	
	<hr/>	\$1,512 59

##### Broadway Parkway (2.0 acres, Grant street to Boston line):—

Maintenance of grounds, labor . . . . .	114 81	
Plants, flowers, trees, etc. . . . .	106 00	
	<hr/>	220 81

##### Central Hill Park (13.1 acres):—

Maintenance of grounds and general care of property, labor, and teams . . . . .	\$1,135 45	
Tools and supplies . . . . .	41 37	
Repairing tools and property . . . . .	64 55	
Plants, flowers, bulbs, trees, and shrubs, . . . . .	610 21	
	<hr/>	1,851 58

##### Prospect Hill Park (2.6 acres):—

Maintenance of grounds, labor, and teams . . . . .	\$1,145 53	
Tools and supplies . . . . .	74 54	
Repairing tools and property . . . . .	102 16	
Trees and shrubs . . . . .	8 75	
	<hr/>	1,330 98

##### Lincoln Park (8.3 acres):—

Maintenance of grounds and general care of property, labor and teams . . . . .	\$1,094 11	
Tools and supplies . . . . .	117 17	
Repairing tools and property . . . . .	101 39	
Plants, flowers, bulbs, etc. . . . .	56 20	
	<hr/>	1,368 87

Constructing new ball field . . . . .	\$553 86	
Re-macadamizing roadway . . . . .	253 41	
Constructing new entrance and steps, Washington street . . . . .	100 76	
	<hr/>	\$908 03
Tufts Park (4.5 acres):—		
Maintenance of grounds and general care of property, labor and teams . . . . .	\$811 85	
Tools and supplies . . . . .	42 20	
Repairing tools and property . . . . .	5 08	
Plants, flowers, bulbs, trees, and shrubs . . . . .	165 15

Received from other departments . . . . .		22 50	
		<hr/>	
Total credit . . . . .			\$10,916 30
Overdrawn . . . . .			\$23 44
Value of tools and property used in maintenance of grounds . . . . .			\$1,500 00

#### APPENDED TABLE.

Following this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1901 report a table was given showing the location and names of public squares in the city, and in the 1898 report old names of certain streets as formerly known.

Respectfully submitted,

ERNEST W. BAILEY,  
City Engineer.

TABLE SHOWING THE LOCATION, LENGTH AND WIDTH OF PUBLIC AND PRIVATE STREETS.

TRANSPORTING EXPLOSIVES

## REPORT OF THE STREET COMMISSIONER.

OFFICE OF THE STREET COMMISSIONER, }  
CITY HALL, January 1, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I most respectfully submit the forty-second annual report, containing a brief summary of the principal work performed by the highway department during the year 1907.

The highway maintenance appropriation was estimated at \$57,000, this amount to be received from the Commonwealth of Massachusetts for street railway tax and the Boston Elevated Railway tax, but the department actually received only \$49,347.89, due to the shrinkage of the taxable value of the shares of the corporations.

The question of to-day is not only how to make good roads, but how to maintain the same against the wear and tear of automobiles and heavy travel, and the highway department has tried several experiments to overcome the same.

### Permanent Paving.

The improvement started on Broadway in 1906 has been extended with Hassam paving from opposite Franklin street on the north side to Cross street, and on the south side from Cutter street to a point between Arthur and Edmands streets. There were 8,796.13 square yards laid, at a cost of \$15,558.93.

Cross street, on both sides from the outside rail of the car tracks to the edgestones, from Tufts street to Central square, has been paved with Hassam paving, the paving blocks between the rails and tracks having been allowed to remain, thus enabling teams during slippery going to reach the bridge on this steep grade. There were 799.3 square yards laid, at a cost of \$1,444.63.

On Medford street, from Hamlet street and opposite the same, to and including Central square, 2,746.8 square yards of this paving were laid, at a cost of \$7,766.84, and on Highland avenue, on the northeasterly side, in front of city hall, 137.75 square yards were laid, at a cost of \$247.05.

These several costs of streets where permanent paving was laid include the cost of re-setting edgestones, re-laying bricks, and crossings.

This paving was laid on the several streets by the Simpson Brothers Corporation, at a cost of \$1.65 per square yard, without a guarantee.

The street railway company raised and repaired its tracks, and all mains and connections of the telephone, electric light, water, gas, and sewer pipes were repaired before the paving was laid. Edgestones were re-set where needed and flagging crossings laid at street intersections.

Late in the year 1906 several streets were coated with "Tarvia," a product from coal tar. This proved to be so successful that "Tarvia" has been used to some extent this year on old streets as a surface and on new macadam as a binder. This was done at a very small cost, Somerville being situated so near the still where "Tarvia" is produced. The tank wagons which transport the hot "Tarvia" to the place where it is to be used make two trips a day, the city being charged at the rate of \$.065 a gallon, exclusive of the cost of teaming. The cost is about \$.12 per yard on surfacing, and about \$.17 for binding, including the "Tarvia," labor, pea stone, and rolling.

#### **Central and Lake Streets.**

Central street was macadamized, from Highland avenue to Summer street, and after the street had been opened to travel about a week, it was closed again, and "Tarvia" was applied. Fine stone screenings were then spread, and rolled with a steam roller, and the street was again opened the same day to travel.

Lake street was macadamized, from Carlton street to Hawkins street, but before the dust was applied, "Tarvia" was spread hot from the tank wagon on the one-and-one-half-inch stone, then the pea stone was spread and rolled into the "Tarvia" with a steam roller, and the street was opened the same day, thus saving the work of watering and rolling the street until it flushed, and keeping it closed to travel while so doing.

#### **College Avenue.**

College avenue was swept clean with sweeping machines, and "Tarvia" was applied on one section of the street, pea stone being used for covering with very good results.

Terracolio was applied to another section, and while it kept down the dust to some extent, it does not save the road from the tear of automobiles.

Asphaltoilene was tried on another section. This has, in my opinion, been a failure, as we have scraped this section of the street with road machines to remove the mud, many complaints having been received at the office about the condition of that section of the street after a rain.

#### **City Ledge.**

Test holes were made early this year at the Holland-street ledge to determine the quality of the stone still remaining, and such good specimens were found that it was deemed wise to quarry the same. Although the land was then down to the grade of Holland street and parts of Broadway, the intention has been to bring it to the grade of the Simpson property on the east side of the ledge, thereby making this land, which has been on the market, much more valuable for building property than it otherwise would have been.

This year a steam drill has been constantly kept at work, instead of hand drilling, thus saving a large expense for labor.

### **Stone Crusher.**

The crushing plant has worked 220 days during the past year, but was unable to supply the demand for stone. For the last layer, nut size, and dust for binder on nearly all the old streets re-surfaced and new streets constructed, trap rock was purchased, under contract, from the Winchester Trap Rock Company at \$1.07 per ton, F. O. B., Somerville. Ten thousand four hundred thirty tons were crushed and 944 tons purchased during the year.

### **Street Cleaning.**

All the streets, both public and private, were cleaned during the past year, and all the paved streets swept as often as the highway appropriation would allow, \$17,714.98 being spent in this branch of the work.

The expense of teaming is increasing every year, as the dumping places are few and far between. Patrolmen with push carts have been constantly kept at the squares and on the main streets, and I hope the appropriation will allow this force to be increased the coming year, as more patrolmen with push carts are required to care for the permanent paving laid this year.

Experiments have been tried of flushing smooth paved streets with watering carts and by connecting hose to hydrants, but the latter has proved more successful; it is my intention early in the spring to do this work at night, thus keeping smooth paved streets and squares in a clean and healthy condition. I recommend that a sanitary flushing machine be purchased, which would reduce the expense in this branch of the work.

The placing of waste barrels at all the schoolhouses and on the main streets for the use of the public has made a noticeable difference in the appearance of these places.

### **Bridges.**

The bridges are in good condition. The railroad commissioners have accepted the city's plans for the abolition of grade crossings on the Fitchburg division of the Boston & Maine Railroad. The bridges on the Southern division of the Boston & Maine Railroad at Cross street and Walnut street have been thoroughly repaired and strengthened during the year.

### **Shade Trees.**

Shade trees are a great improvement to the general appearance of a street. Many trees have been injured by electric wires, but as the work of placing the wires underground advances, this difficulty will be removed.

Many trees are injured and killed by gas leaks.

In every case where trees have been set out the past year a pole and wire guard has been placed on them for protection.

When abutters purchase trees, the city set out the same free of cost.

There is no appropriation for the care of shade trees, and the amount expended is quite large. The expense so incurred is charged to the highways maintenance appropriation.

I recommend that the city purchase and set out shade trees where dead and dangerous ones have been removed, and think it wise to protect the trees which we already have by placing wire guards around them. The department has set out 350 trees, and sixty-eight dead and dangerous ones were removed during the year.

### **Subways.**

The subways at Kent, Sacramento, and Thorndike streets are in good condition. Men are assigned to care for them, and extra help is provided in case of a storm. If subways were built at West street and Hancock street, on the Arlington branch of the Boston & Maine Railroad, it would be a great convenience and safety to the public until such time as grade crossings are abolished.

### **Street Watering.**

Under the law providing for the assessment for street watering, only accepted streets can be watered. When residents desire private streets watered, they must pay the cost of such watering in advance. The street watering is let out by contract at \$90 per month per cart, the contractor furnishing a competent driver with a good pair of horses. He is obliged to see that his route, which comprises about two miles, is properly watered at all times, including Sundays and holidays. This branch of the department is under the charge of an inspector.

There are forty-two double and three single watering carts, all painted and repaired by the department.

So many new streets have been added to the street watering list that ten new carts were purchased during the year and a shed built by the department in which to house them.

So many complaints have been received from tenants of stores in the squares which are watered by contractors that single carts have been purchased to be operated by the department in these squares in the coming year.

### **Granolithic Sidewalks.**

More granolithic sidewalks were laid during the year than ever before. Specifications were sent out and bids called for to lay the same. The contract was awarded to the lowest bidder, whose price was \$1.42 per square yard, with a five-year guarantee.

The department, with its own labor, laid the granolithic sidewalk on Bartlett street, between Broadway and Medford street, at a cost of \$1.405 per square yard. I recommend that the city do this work with their own labor in the future.

#### **Steam Rollers.**

The city has three Buffalo Pitts steam rollers,—one fifteen-ton roller which has worked 189 days, one twelve-ton roller which has worked 173 days, and one five-ton asphalt roller which has worked seventy-three days.

The department has received a large revenue by the letting of these rollers to contractors doing work in and for the city and to the various departments.

During the year the department received, free of cost, including the teaming, much good material which may be used for the bottom of streets in remacadamizing and resurfacing. This, together with the fact that it was found necessary to carry over the work on so many streets to next year, on account of not having facilities for rolling the crushed stone with which they should be covered, leads me to recommend the purchase of another fifteen-ton roller.

#### **Snow and Ice.**

During the winter of 1907 there were 3,114 loads of snow removed and a large sum of money spent sanding sidewalks and slippery streets on side hills. This renders the expenditures for street repairs correspondingly less, as no separate appropriation is made for the care of ice and snow. The amount spent in this branch of the work was \$9,548.28. The teaming in this branch has been increasing every year on account of the scarcity of dumping places. An experiment, consisting of dumping the snow into the sewers by way of the manholes, was tried, which proved a success. This experiment not only removes the snow quickly, thus opening the main streets and squares for travel, but also flushes and purifies the sewers.

It is the duty of this department to care for the removal of snow from all sidewalks in front of public buildings and public grounds, and to prevent them from becoming slippery.

Ordinance No. 46, approved February 12, 1904, Section 1 and 2 of which are quoted below, clearly regulates the removal of snow and ice on sidewalks.

Section 1. No owner or tenant of land abutting upon a sidewalk within the limits of any highway or townway in this city shall suffer to remain on such sidewalk for more than six hours between sunrise and sunset, on any day, any snow nor any ice, unless such ice is made even and covered with sand or other suitable material to prevent slipping. Such owner and tenant shall remove all snow and ice from such sidewalk within the time and in the manner herein specified.

Section 2. Whoever violates any of the provisions of Section 1 of this ordinance shall forfeit to the city the sum of twenty-five dollars for each offence.

Boxes filled with fine sand have been placed within easy access of the push cart men who care for the smoothly paved streets, squares, and subways.

#### **Wires Underground.**

Permits for opening the streets for burying wires were issued to the Edison Electric Illuminating Company for the north side of Broadway, from a point near Fenwick street, to a point nearly opposite Partridge avenue, and to the New England Telephone and Telegraph Company, for the south side of Broadway, from Boston avenue to the Arlington line. Permits were also issued to the same companies for opening streets to extend their underground system, and to the Boston Elevated Railway Company to lay conduits in the loam space between the car tracks from the Charlestown line to a point west of Grant street.

This does away with all poles except where lights are maintained from the Charlestown line to this point, thus making a great improvement in the appearance of lower Broadway. The total length of underground conduits in the city amounts to fifteen and one-half miles.

#### **Accepted Streets.**

There have been fourteen streets accepted during the year, a total length of 9,109 feet. There were six streets constructed, at a cost of \$3,272.02, a total length of 2,926 feet. In all streets which were constructed during the past four years, edgestones were set and gutters paved with granite paving blocks before the construction work was begun. This is a good custom to follow.

There were twenty-five streets macadamized and resurfaced, at a cost of \$12,942.77. There are 72.954 miles of public streets and 21.506 miles of private streets, making a total length of 94.46 miles of streets in the city.

#### **Perambulation of Boundary Lines.**

A committee was appointed to represent Somerville, consisting of a member of the highway committee, the city engineer, and the street commissioner, to meet a committee from Medford November 12, 1907, for the purpose of perambulating the boundary of Somerville and Medford. This committee has attended to its duty and made its report.

#### **Sidewalks Maintenance.**

The appropriation for this account was so small that old sidewalks were not re-laid as recommended in last year's report. I hope that the city government will, this coming year, see its way clear to make a much larger appropriation for this account. If this is not done, it is my opinion that the number of accidents

on old sidewalks will increase, and that the damages which might be awarded in these cases would exceed the appropriation which should be made this year. I think it would be to the advantage of the city to make an appropriation sufficient to take care of this branch of the work.

### **Street Openings.**

A great many complaints reach the office of the street commissioner, for which he is blameless, in regard to the uneven condition of some of the newly-constructed streets, and depressions in the gravel and brick sidewalks in the older portions of the city, which are due to trenches made by the sewer, water, gas, and underground wire construction. In many cases in the first instance the defects are caused by trenches having been made to new houses after the street has been constructed, and in the second by work having been done late in the season after the ground is frozen.

The inspection of these trenches will be made by this department, and if found unsatisfactory, will be repaired by skilled labor, and the expense so incurred charged to the different departments and companies.

Tunneling under streets and sidewalks ought not to be allowed when the tunnel is to be more than six inches in diameter, and when borings are made for pipes the bore should be made only large enough to allow the pipe to be put in position. From my experience, it can be safely said that it is impossible to re-fill a horizontal tunnel so that the pavement over the trench will not settle and require repairs which make extra expense for this department. No department, company, or corporation should be allowed to open any street after the frost sets in unless in a case of emergency.

### **Street Railways.**

Permission was granted the Boston Elevated Railway Company to lay double tracks on Mystic avenue. From the Boston line to a point near Austin street the space between the tracks and for a width of eighteen inches outside of the outside rails was paved with paving blocks, and from Austin street to Fellsway East the tracks were laid in ballast on the north side of the street. This street is in very poor condition, and I hope that the state will take the same the coming year and construct it, from Austin street to the Medford line, where the Massachusetts Highway Commission finished this year. This would make a good main highway for travel from nearby cities and towns to Boston over an easy grade.

The Boston Elevated Railway Company widened the curves on College avenue, at Broadway and at Professors Row, to accommodate the large cars they intend running on this line to West Medford,

### Emergency Call.

Somerville is the originator of the emergency call in case of accidents for highway men, and is the only city in the Commonwealth having such a call. The following is a copy of an order issued by the street commissioner on October 7, 1907:—

“If at any time after this date, day or night, Sunday or holiday, there should be an accident on the railroad, a burst water main, a collapse of a bridge, a big fire, or any other accident in the same line that would be likely to cause injury to life or limb, or be a menace to the safety of public travel, all employees of the highway department will be required to report immediately at the city stables and receive further orders there. In case of the above-mentioned accidents happening, eight blows will be sounded twice on the fire alarm. For further information, see the foremen or sub-foremen, who will explain more fully.”

On October 17, 1907, an alarm was sounded to test the efficiency of the department, and inside of fifteen minutes there were forty-one men, two foremen, three sub-foremen, six double teams, and two single teams at the city stables.

The emergency wagon which is kept in the cellar of the stable was hooked up and in front of the stable in three minutes from the time of sounding the alarm. No one, excepting Mayor Grimmons, Assistant Chief Ring, of the fire department, Commissioner Underwood, and the street commissioner, knew that the alarm was to be sounded.

I wish to recommend that a signal box 8-8 be placed in the city stables for the use of the department. There has also been installed at the city ledge and stables an emergency medicine chest, in compliance with the law of the State Legislature of 1907. These chests have been used several times, with very satisfactory results.

### Miscellaneous.

Specifications were sent out to all the local and wholesale concerns and bids asked for the furnishing of tools and supplies of all kinds, including edgestones, brick, sand, gravel, cement, paving stock, etc. The bids were opened publicly in the office of the mayor, and the contracts were awarded to the lowest bidder, preference being given Somerville citizens.

The department maintains its own painter, carpenter, blacksmith, horseshoer, and harness repairer, all employed at the city stables.

If the names of certain streets in different parts of the city which are the same were changed, it would be a great convenience to the public.

This department has been called upon to furnish steam rollers, teams, crushed stone, sand, gravel, and ashes to the other departments, being reimbursed for the same.

There were 207 permits issued to the Cambridge Gas Light Company and ninety-three to the Charlestown Gas and Electric Company for the opening of streets for gas connections and repairs; 124 permits were issued to occupy and 157 to open streets; two to blast rock and forty-four to cross the sidewalks to contractors and corporations; nine to erect canopies, two to feed horses, and nine to run steam rollers through the streets; 172 permits were given to licensed drain layers to open streets for sewer connections.

There were 816 defects in the streets and sidewalks reported by the chief of police which were promptly repaired, thereby, in all probability, saving the city from law suits.

There were fifty-one signs and guide posts erected by the department during the year; 455.4 square yards of crossings paved with granite blocks, flagging, and bricks, and 4,693.4 yards of block stone gutters laid, at a cost of \$9,548.64; 2,750 yards of sand and gravel were used; 6,777 loads of dirt and 11,218 loads of scrapings were removed from the streets; 2,000 loads of old macadam and 1,439 loads of ballast were used in the repairs and construction of streets; 3,836 loads of ashes were used in the repair and construction of sidewalks and in setting and re-setting edgestones; 5,445.9 square yards of granolithic and 7,278.8 square yards of brick sidewalks were laid, and 13,791.3 feet, or nearly 2.612 miles of edgestones set, at a cost of \$30,111.22; 8,762.4 feet of edgestones, or nearly 1.66 miles, were re-set, and 3,077.3 square yards of brick sidewalks re-laid, at a cost of \$2,173.70. This amount includes patching sidewalks and attending to police reports of defects. There were 1,654.4 square yards of granolithic sidewalk laid by private parties on private streets.

I have attended twenty-five meetings of the Committee on Highways to consult and give information regarding work and petitions.

#### **Recommendations.**

I recommend that permanent paving be laid on Broadway, north side, from New Cross street to Fellsway East. This would carry the improvement to a point opposite the paving laid this year. Permanent paving should be laid on Highland avenue, extending from the pavement at Hamlet street northerly as far as the appropriation would allow.

The freight houses of the Boston & Maine Railroad, being removed from Boston to Rutherford avenue, Charlestown, cause all the heavy teams of the packing houses to use Medford street and Washington street, instead of East Cambridge. These streets are in poor condition and permanent pavement should be laid on the same, also on Somerville avenue, from Kent street to Oak square. Main street, from Broadway to the Medford line, is very narrow, thus making it a hard street to keep in repair, and should be paved with permanent pavement.

Summer street, from Belmont street to Cutter square, should be re-macadamized, and School street, from Broadway to Medford street, and College avenue, from Davis square to Powder-house square, tarviated.

The re-macadamizing with a Tarvia top of Broadway, near Willow bridge, should be extended this year westerly to Powder-house square, and easterly to Magoun square.

Edgestones should be set and gutters paved with granite blocks on College avenue, from Broadway to the Medford line, Medford street, from the Boston & Maine Railroad bridge to Highland avenue, Beacon street, southerly side, from Washington street to Park street, Elm street, from White street to Cutter square, and on one side of Packard avenue and Curtis street, the other sides of these streets being already set. This would improve the appearance of these two streets and care for the surface water which now gullies the sidewalks and gutters after a storm.

There are several brick and granolithic sidewalks that should be extended or the spaces completed so as to make one continuous walk between intersecting streets, as these spaces are very disagreeable to pedestrians, especially in the spring and fall.

## REPORT OF THE INSPECTOR OF TREES.

---

OFFICE OF THE INSPECTOR OF TREES, }  
City Hall, January 1, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I most respectfully submit the following report, containing a brief summary of the principal work performed by this department during the year 1907, toward suppressing the gypsy and brown-tail moths in our city:—

### **Protecting Property Owners.**

On October 1, 1907, a notice was issued, with the approval of his honor, the mayor, from this office, a copy of which was left at each door in the city by an inspector of this department, and in case of a vacant lot where trees existed, these trees were properly posted, in accordance with the law. On the lower part of this notice there was a request that work done by **contractors** should be inspected and approved by the inspector of trees before payment for the same is made.

Many owners of property took advantage of this offer and in this way were positively relieved of a second payment for the one job, and in case some nests were overlooked by the private parties, the person who made the inspection would see them, and the original party would be called back to complete the work.

Many cases of poor individual moth work have been discovered, and in many cases the person paid for the work was found and sent back to make good his agreement.

### **The Gypsy Moth.**

The gypsy moth, a well-known European insect pest, was brought to America about 1868 by Professor Leopold Trouvelot for use in his experiments on silk-producing insects. Accidentally escaping, it spread gradually in the woodland near Professor Trouvelot's home in Medford, Mass., and becoming acclimated soon developed into a first-class enemy of fruit and shade trees. By 1888 the plague of the gypsy moth caterpillars had become notorious, and in 1890 the state commenced its work against the insect. This work, at first carried on by a commission, but principally by the State Board of Agriculture, resulted in bringing the pest under control, and by 1899 so few moths could be found and so little damage was caused by the insect that the legislature of 1900, probably not realizing the necessity of continuing control measures, stopped the work. The few moths left in 1900 multiplied to such an extent that in 1906 the caterpillar plagues of 1888-90 were duplicated over a much larger area in eastern Massachusetts. Since these insects kill trees and shrubs by repeated defoliations, not to mention the

annoyance caused by the invasion of houses by the swarming caterpillars, it is important that property owners should familiarize themselves with the appearance and habits of the moth and the best means for destroying it in its various stages of development.

During 1907 much work has been done by the state and cities nearby, and another year it is hoped the moth will be brought under control.

#### **Life History.**

In July and August the female moths lay their yellow, hair-covered egg masses on tree trunks, fences, walls, etc. Each egg cluster is about one and one-half inches in length, by half an inch in width, and contains about five hundred eggs. Hatching takes place in April or May. The young caterpillars first attack the buds, and later the blossoms and foliage. Spinning down on silken threads, they are blown about by the wind, or falling on teams are often transported long distances. As they grow, the effects of their feeding become more apparent, and badly infested fruit trees, shade trees, and woodland are soon as bare of foliage as in mid-winter. By July, the caterpillars change to pupae, from which the moths emerge in the course of two weeks to lay eggs for the next year's brood.

#### **Distribution.**

Teams, automobiles, electric cars, etc., are the principal means of spreading the moth. The female moths do not fly, and the caterpillars seldom crawl over 200 feet. But each infested spot, early in the spring, yields a swarm of tiny caterpillars, which by the agencies mentioned spread locally, or even to considerable distances, the main spread being, of course, along the principal lines of travel.

#### **Food Plants.**

The gypsy moth caterpillar is remarkable in that it attacks nearly all our common fruit and shade trees. The apple, oak, and willow would seem to be slightly preferred, while the white ash and rock maple are attacked to a less extent. Garden vegetables, flowers, and shrubs are consumed as readily as the foliage of fruit trees. Pines and other coniferous trees die as a result of one defoliation, while deciduous trees seldom survive stripping three years in succession.

#### **Remedies.**

*Egg-destruction.*—This is best accomplished by searching out the egg clusters in the fall, winter, or spring, and soaking them with creosote mixture. This preparation may be found in the hardware stores, and retails at seventy-five cents per gallon. In applying it a small paint brush is used, it being important to thoroughly soak the nests.

*Burlapping.*—When a loose band of burlap or other cloth is tied about an infested tree trunk, the caterpillars will gather under it in the early morning, and may then be destroyed by hand. The burlap should be examined daily.

*Spraying.*—Spraying with arsenate of lead at the rate of ten pounds to one hundred gallons of water is very effective when the caterpillars are small. Any of the common hand outfits will suffice for the spraying of shrubs or flowering plants. For use on trees, a barrel pump is desirable. The poison should be thoroughly mixed in water, and applied if possible on a clear dry day.

*Cutting and Burning.*—In woodland infested by the moth, it is usually desirable to thin out the trees and cut the underbrush. The brush so obtained should be burned early in May after the caterpillars have hatched. If this work is followed by spraying and burlapping, the moth can be brought under control.

In parts of the city there are many worthless or scrub apple trees and other trees (especially the wild cherry tree, a regular moth breeder) which are neglected by their owners, and merely serve as breeding places for the moth pests; also worthless brush along fences and walls, principally in the West Somerville section, and property owners are urged to cut and burn such neglected trees and brush, thus doing away with the breeding places of the moths.

#### **Natural Enemies.**

While the gypsy moth is a serious enemy of trees, it has its own foes in the shape of predaceous insects, parasites, and birds. Several ground beetles prey on the caterpillars, while true parasitic insects attack both larvae and pupae. Several species of birds, notably vireos and cuckoos, consume large numbers of the caterpillars, while others, like the chewink, chickadee, blue jay, and crow, do their part in reducing the numbers of the pest. The services of these natural tree protectors is worthy of high praise, but in attempting to control the moth, the main reliance must be placed on human efforts—on the timely and thorough application of the remedial measures outlined above.

The state ceased its work in 1900, as previously stated, and in 1901 the city undertook the burden, and has since handled it.

There are nests to be found in all sections of Somerville, but this is caused by the work in the surrounding towns and cities lying idle from 1900 to 1905, when a law was enacted compelling these localities to take up the work where the state left off.

All colonies of this moth in this city have been broken up, and what now appear are scattering, and it is hoped soon to have them practically wiped out.

#### **The Brown-Tail Moth.**

The history of the brown-tail moth is as old as the history of economic entomology. When the early scientists began to re-

cord the habits of insects injurious to fruit trees, this pest was one of the first to be described. It found its way to Somerville, Mass., in the late nineties, probably on rose bushes imported from Holland, and has now spread throughout eastern Massachusetts, southern New Hampshire, and southwestern Maine.

The first outbreak of the brown-tail moth covered only a few square miles in Somerville and Cambridge. It was sufficient, however, to yield a swarm of moths which flew, or were drifted by a high wind over a wide territory. As the female moth is a strong flyer, its spread has been rapid. In addition to the effect of the wind, the insects are also strongly attracted to light. It results, therefore, that a swarm of moths arising from any infested spot and being drifted by the wind out of their immediate environment fly to the nearest mass of lights. Thus the centres of cities and towns become first infested, and here are established the colonies from which a more general infestation takes place. Electric cars, railroad trains, and even steamboats serve to transport the moths. The rapid spreading of the insect indicates that within a few years it will be well distributed throughout New England.

#### **Life History.**

The brown-tail moth lays from two hundred to four hundred small globular eggs, thickly covered with a mass of brown hairs from the tip of the abdomen of the moth. The typical egg mass is about two-thirds of an inch long and about one-quarter of an inch wide. While the eggs are occasionally deposited on branches or trunks of trees, or even on lamp posts or house walls, a very large majority are laid on the under surfaces of the leaves of fruit and shade trees. The moths show a strong liking for pear trees, and will apparently seek out trees of this species in preference to any others. At the same time the apple, elm, wild cherry, and white oak are very commonly infested by the insect, while other trees suffer to some extent.

The eggs laid in July hatch the following month, and the young caterpillars, feeding in a mass, soon commence their work of spinning their winter webs. In making this web, a number of leaves in the vicinity of the egg clusters are drawn together and are carefully spun in with a tenacious silken web. With the approach of cold weather the caterpillars enter the web and close the exit holes. We then have the strange phenomenon of a caterpillar wintering over when only one-quarter grown and emerging the following spring to complete its life history. Whatever extremes of cold we have in Massachusetts do not seem to affect these insects adversely. They emerge early in the spring, eat first the buds, then the blossoms, and attack the foliage of fruit trees as soon as it develops. The full-grown caterpillar is light brown, with a white stripe on either side, and about two inches in length. Stripping the foliage of one tree, they march to another, and so continue until full grown, when

the cocoons are spun within the leaves at the ends of the branches, or sometimes on the tree trunks. The pupation usually takes place the latter part of June, and the moths emerge from the first to the twentieth of July. The snow-white female moth is conspicuously marked with an enlarged tuft of brown hair, which gives to the insect its common name.

#### **Nettling by the Caterpillars.**

The damage by the caterpillars to the fruit trees is only a part of the story. Whenever these insects come in contact with human flesh they produce a most severe and painful nettling. This is apparently not due to any poisonous material in the hairs, but rather to the finely-barbed and brittle hairs themselves. So severe is this affection that in many cases people have been made seriously ill by it. The best remedy for it is the liberal use of cooling lotions, or, what is more satisfactory, even if less pleasant, the free use of common vaseline.

#### **Remedies.**

The habit of the caterpillar in wintering over in webs at the tips of the branches gives a key to the simplest and cheapest remedy, which is merely to cut off and burn the webs during the fall, winter, or spring. This preventative means is most effective, and gives such excellent results that in Germany, France, and Belgium there is a law making it obligatory on property owners to destroy the webs during the winter season. Where citizens neglect to carry out this work it is done for them by local authorities, and the sum thus expended added to their tax levy.

*Winter Work.*—The work of removing the webs is best done by the use of a long-handled tree pruner or similar device. Particular care should be given to gathering the webs and burning them, as any left on the ground will yield caterpillars and continue the infestation locally.

*Spraying.*—Spraying is very effective against these insects; in fact, they are much less resistant to the action of poison than is the gypsy moth or elm leaf beetle. To secure best results, spraying should be done as soon as the foliage develops in the spring. Five pounds of the arsenate of lead paste to one hundred gallons of water is sufficient.

Where the caterpillars swarm from trees along fences or on house walls, the use of kerosene emulsion or strong soap suds is advisable. Fall spraying with arsenate of lead is also effective, but the feeding of the caterpillars at that time of the year is usually of minor importance.

Little good can be done in the way of collecting the eggs or trapping the moths by light, although many of the mature insects are destroyed by arc lamps. There is no method of combatting the brown-tail moths that will give better results for the outlay than the destruction of the webs in the winter season. Cases will arise where the caterpillars swarm from adjoining estates,

and where this occurs banding the trees with some sticky material, as heretofore described, will protect the foliage from harm.

#### **Natural Enemies.**

Like the gypsy moth, the brown-tail moth is attacked by numerous parasites and by certain birds, but the latter do not appear to take to it as readily as to the former insect. Of the birds, the cuckoos, vireos, and orioles are most helpful, while English sparrows eat many of the winged moths. The garden toad also does its part in feeding first on the migrating caterpillars, and later on the moths as they fall injured from the street lights.

The city moth crew clean the trees on the streets first, which takes until the first of March; they then inspect all the yards in the city, and in case the nests are still on the trees, they are removed, and the time consumed is charged to the owner, and is added to his tax bill as a separate item for moth suppression.

The city took hold of the problem in 1901 and dealt it a very severe blow, not stopping up to the present time. We can safely say the pest is under control, but we cannot wholly stamp it out while the surrounding cities and towns are really fighting for control, not to mention real suppression.

The brown-tail moth does not wait to be carried (as does her sister, the gypsy moth), but, being a powerful flyer, makes good use of her wings. Thus, no matter how perfect our work is done in this city, we shall continue to have brown-tails until the surrounding cities and towns are clear of them.

Our winter work relieves our citizens from being poisoned by this caterpillar. As we do not have the full-grown worm, we have only the moth, eggs, small caterpillar in September, and then the winter webs on the trees, which are cut down in cold weather by the moth men. The citizens are also relieved of their trees being eaten during the summer months. We also remove in the winter the nests made by the moths from other cities and towns.

#### **Incinerating Apparatus for Brown-Tails' Nests.**

At the city stables, in the highway department yard, is installed an apparatus for burning to ashes paper or rubbish of any kind, which the street commissioner kindly allows this department to use to burn brown-tail nests.

These winter webs of the brown-tail moth caterpillars (sometimes called nests) are clipped from the trees, gathered in buckets by the men, and later emptied into burlap bags of three-bushel capacity. These are carried every night to the incinerator which destroys them. By this manner of destruction, it seems almost impossible for any to escape.

The egg-clusters of the gypsy moth are painted with creosote oil on the objects on which they are laid, which totally destroys them. In case they are deposited on a house wall or

newly-painted fence, judgment is used, and generally they are scraped off into the pail of oil.

### **The Parasite Problem.**

The state parasite station, formally in Saugus, has been moved to Melrose Highlands.

At present the hatchery has many kinds of live parasites, and a large quantity in the egg form.

Many thousand parasites have been liberated, and much good work is expected in the near future.

### **The Japanese Bug Found in Dorchester.**

*Cuidocampa flacescaus*, the Japanese moth found in Dorchester, seems to be confined at present to a section around Blue Hill avenue, it being learned from investigation that the moth was brought to this country from Japan several years ago by a party of Japanese who came to the Japanese hospital on Blue Hill avenue. It is known that the moths are to be found also in China and Korea.

The species has been found nowhere else in the country.

The authorities during the past summer have taken active steps, spraying all infested trees in the hope of exterminating this pest.

Upon a careful investigation, we are very thankful to find our city free from this pest.

### **Information on Imported Elm Leaf Beetle.**

Owing to the prevalence of this insect in the Winter-hill district of our city this year, and the numerous inquiries which were made concerning its habits, the following information may be found useful:—

The mature beetle hibernates in large numbers under shingles and clapboards of buildings and under the rough bark of trees and elsewhere. In May the beetles emerge from their winter quarters and feed for some weeks on the foliage of the elm, making round holes through the leaves. A badly-infested tree at that time of year appears as if charges of fine shot had been fired through the foliage. The eggs, similar in appearance to those of the potato beetle, are laid in clusters on the under side of the leaves. Hatching takes place late in May or early in June.

The slugs feed on the lower epidermis of the leaf, and by July 1 often cause the trees to turn as brown as if scorched by fire. When full grown, the slugs are about one-half an inch long, yellowish, with a conspicuous black stripe on either side, and black dots down the centre of the back. About the middle of July they descend to the trunk of the tree or to the ground, and pupate in large masses. The pupae are orange yellow in color, and from them the beetles emerge by August 1.

### Remedy.

Spraying with arsenate of lead during the first two weeks of June will destroy the slugs and prevent injury to the trees. Care must be taken to thoroughly spray the under surface of the leaves. Later in the season the slugs and pupae may be destroyed in the bark or at the base of the trees by the use of strong soap suds, kerosene emulsion, or even hot water.

The above remedies were both used very effectively where the beetles appeared.

The English elm trees were generally favored as the food for this insect.

### Miscellaneous.

The total expenditure for moth suppression since the state ceased its work in 1900 is \$31,272.99. The city crew removed the moth nests on 1,499 private estates in 1907. One thousand sixteen poles owned by The New England Telephone & Telegraph Company, and about 4,000 owned by The Edison Electric Illuminating Company of Boston have been inspected, and the egg clusters destroyed when found, at the expense of the owners of said poles.

Removing the moth nests from the trees in the city's gravel pit in Waltham cost \$96.

Two hundred and fifty-seven notices were posted on trees on vacant lots throughout the city. Over 12,000 notices were delivered at houses by the inspectors of this department during October.

From ten to sixteen pounds of arsenate of lead to the 100 gallons of water was the mixture used in spraying the trees against the brown-tail and gypsy moth, together with the elm leaf beetle.

### Properties of the Department.

- 1 100-gallon Ware hand spraying machine, with hose.
- 1 50-gallon barrel hand pump, with hose.
- 2 cyclone burning machines, with hose and nozzles.
- 2 dozen telegraph pruners, with 18-foot poles.
- ½ dozen Waters tree pruners.
- 1 double-edge pruning saw.
- 2 hand saws.
- 2 cross-cut saws.
- 1 cross-cut bull saw.
- 5 axes.
- 1 brush scythe.
- 2 18-foot ladders.
- 2 21-foot ladders.
- 4 36-foot extension ladders.
- 1 45-foot extension ladder.

### Recommendations.

I would most respectfully recommend that a gasoline spraying machine be purchased the coming spring. The two machines now used are of hand power, and are insufficient to

perform the work expected of the department at the present time.

We are called upon to do all the tree spraying throughout the city, both on street trees and on private property.

Four lines of hose are used when spraying the large elms. This requires both machines to operate them, which takes a man on either pump, while with a power sprayer we can operate as many lines of hose as can be properly used with the one man handling the machine. Time and money could be saved by the purchase of such a machine.

I wish to extend my sincere thanks to his honor, the mayor, the board of aldermen, heads of departments, and all city officials with whom I am associated, and the general public, for their help and hearty co-operation with this department in its hazardous undertakings, and I would express my appreciation of the efficient services of the foreman, inspectors, and all others employed in the department.

CHARLES I. BUCKNAM,

Inspector of Trees.

## REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

OFFICE OF COMMISSIONER OF PUBLIC BUILDINGS, {  
City Hall, Somerville, January 1, 1908. }

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—I have the honor, as commissioner of public buildings, to submit the following as the report of the department of public buildings and the department of inspection of buildings for the year 1907. In submitting this report I desire to express my appreciation of the valuable counsel and assistance received from his honor, the mayor, and from the members of the honorable, the board of aldermen.

### **Addition to the Benjamin G. Brown School.**

On May 31, 1907, an order was passed authorizing the construction of a four-room addition to the Benjamin G. Brown school building on Willow avenue. The plans and specifications for this addition were prepared by the commissioner of public buildings, and competitive estimates were called for in June of this year. The following estimates were received in response to the above request:—

A. H. Hines, Somerville . . . .	\$21,205 00
William Crane, Boston . . . .	21,140 00
Walsh Brothers, Somerville . . . .	20,800 00
F. C. Alexander, Boston . . . .	19,727 00
J. E. Locatelli, Somerville . . . .	19,614 00
G. M. Davis & Son, Boston . . . .	19,504 00
J. M. Andrews & Son, Somerville . . . .	18,687 00

The contract for construction was awarded to J. M. Andrews & Son, the firm submitting the lowest bid, and a contract was signed by the mayor on July 8, 1907.

The construction work on this building was commenced immediately after the signing of the contract, and the building is now ready for occupancy. These four additional rooms will greatly relieve the crowded conditions existing in this school district.

### **Brown School Heating Plant.**

Invitations for the heating plant in the Brown school building were sent out on October 29, and the estimates received and opened by his honor, the mayor, on November 11. The lowest estimate was \$1,148, and the contract was awarded to J. J. Hurley & Co., who submitted the same. The following is the list of bidders who submitted figures:—

A. B. Franklin & Co. . . . .	\$1,444 00
The Merrill Company . . . . .	1,416 00
C. A. Sanborn & Co. . . . .	1,370 00
A. Duncan & Co. . . . .	1,193 00
J. J. Hurley & Co. . . . .	1,148 00

This plant is an extension of the plant in the Brown school building made necessary by the building of the new addition of four rooms, and at the present time is working in a satisfactory manner.

**Addition to the Sanford Hanscom School.**

The construction of a four-room addition to this building was authorized by an order which was passed on May 31, 1907. The estimates received were as follows:—

F. C. Alexander & Co. . . . .	\$19,990 00
G. M. Davis & Son . . . . .	18,665 00
J. Nicholson & Son . . . . .	18,426 00
J. E. Locatelli & Co. . . . .	14,994 00

The lowest bidders, J. E. Locatelli & Co., were awarded the contract, and after signing the same proceeded with the work. The addition is now practically completed, and will be ready for occupancy on January 20, 1908.

**Hanscom School Heating Plant.**

On October 29 of this year invitations were sent out for the installation of the steam heating plant in the addition to the Hanscom school building. The estimates received in response to these invitations were publicly opened by his honor, the mayor, on Monday, November 18. The lowest bidder was J. J. Hurley & Co., of Boston, and the contract was awarded to that firm on November 8, for the sum of \$1,475. The following is the list of bidders and their estimates:—

Pierce & Cox . . . . .	\$1,875 00
Alexander Duncan Co. . . . .	1,765 00
The Merrill Co. . . . .	1,676 00
Isaac Coffin & Co. . . . .	1,618 00
C. H. Sanborn & Co. . . . .	1,595 00
J. J. Hurley & Co. . . . .	1,475 00

**City Hall Vault.**

The new vault for the storage of city documents, the construction of which was authorized May 31, 1907, has been constructed by this department, and is ready for use. This vault is located in the basement of the city hall under the treasurer's department, and is constructed of stone, concrete, and iron.

The space provided will afford a safe and convenient storage for all city documents which cannot be taken care of in the department vaults and safes.

### Incinerating Plant.

The incinerating plant, which was authorized in 1906, was completed during this year, and was put in operation early in September, 1907. The waste paper which is collected by the health department daily is taken to the plant, where such of it as is merchantable is baled for shipment, and the balance cremated in the incinerating furnace. This method of taking care of the waste paper is a great improvement over the old method of burning the paper on the various dumping grounds of the city.

The modest outlay of expenditure has already shown good results, and the plant has shown itself a success.

### Pope School Heating System.

In accordance with an order approved May 31, 1907, estimates were received for the construction of a new heating and ventilating system to be installed in the Pope school building on Washington street. The estimates were as follows:—

A. B. Franklin & Co. . . . .	\$7,180 00
Bradlee Chatman Co. . . . .	6,564 00
The Merrill Co. . . . .	6,548 00
Laskey & McMurrer . . . . .	6,437 00
A. A. Sanborn & Co. . . . .	6,273 00
Pierce & Cox . . . . .	6,171 00
J. J. Hurley & Co. . . . .	5,875 00
Alexander Duncan & Co. . . . .	5,775 00

The contract was awarded to Alexander Duncan & Co., of Boston, Mass., the lowest bidders. The system was installed during the summer vacation, and was ready for use at the opening of the school year in September. At the present time the system is working satisfactorily, and is a great improvement over the old form, a furnace system, which was removed.

### Care and Repair of Public Buildings.

The public buildings, which are placed, in accordance with the charter requirements, under the jurisdiction of the commissioner of public buildings, are as follows:—

Building.	Value.	Date of Construction.	Location.
Baxter school.....	\$32,955 64	1901	Bolton street
Bell school.....	45,400 00	1874	Vinal avenue
Bennett school.....	59,448 32	1902	Maple street
Bingham school.....	68,885 04	1886	Lowell street
Brown school.....	59,690 16	1901	Willow avenue
Burns school.....	34,760 00	1886	Cherry street
Carr school.....	53,800 00	1898	Atherton street
Cummings school.....	11,921 00	1884	School street
Davis school.....	22,720 00	1884	Tufts street
Durell school.....	19,720 00	1894	Beacon street
Edgerly school.....	44,230 00	1871	Cross street
Forster school.....	85,290 00	1866	Sycamore street
Glines school.....	80,540 00	1891	Jaques street
Hanscom school.....	69,580 00	1897	Webster street
Latin High school.....	78,537 00	1871	Highland avenue

English High school....	\$137,900 00	1895	Highland avenue
Highland school.....	60,560 00	1880	Highland avenue
Hodgkins school.....	71,700 00	1896	Holland street
Knapp school.....	50,540 00	1889	Concord square
Lincoln school.....	18,220 00	1885	Holland street
Morse school.....	48,199 00	1869	Summer street
Perry school.....	37,080 00	1899	Washington street
Pope school.....	80,160 00	1891	Washington street
Prescott school.....	66,260 00	1867	Pearl street
Proctor school.....	42,820 16	1905	Hudson street
Lowe school.....	51,826 16	1903	Morrison avenue
Public library.....	42,000 00	1884	Highland avenue
Police building.....	57,000 00	1874	Bow street
City hall.....	47,432 32	1851	Highland avenue
City hall annex.....	20,655 02	1898	Highland avenue
Contagious hospital....	22,793 76	1906	Broadway
City home.....	37,901 73	1871	Broadway
City stables.....	84,000 00	1894	Broadway
Health shed.....	1,189 79	1905	Broadway
Water dept. stables....	32,000 00	1889	Cedar street
Central fire station....	37,200 00	1893	Medford street
Engine 2 building.....	33,600 00	1894	Broadway
Hose 2 building.....	10,800 00	1871	Marshall street
Ladder 1 building.....	56,143 18	1904	Union square
Ladder 2 building.....	15,300 00	1894	Highland avenue
Hose 5 building.....	16,900 00	1888	Somerville avenue
Hose 6 building.....	18,200 00	1898	Holland street
Engine 4 building.....	15,900 00	1874	Highland avenue
Incinerating plant.....	3,000 00	1907	Cedar street
Total .....	\$1,984,858 28		

### Heating and Ventilating.

The heating and ventilating systems of the school buildings have been improved during the year, and in the Pope school a new plant has been installed. The systems in use are now in a very satisfactory condition, with the exception of the Cummings school, in which the ventilation is not of the best. I would recommend that in the year 1908 sufficient appropriation be made to allow for an expenditure of money to improve these conditions.

The following table will describe the systems in use and the existing conditions.

#### Heating and Ventilating Systems in the School Buildings.

School.	No. of Rooms.	System.	Working Condition.
Baxter	6	gravity—automatic control	good
Bell	12	fan— automatic control	good
Bennett	12	gravity—hand control	good
Bingham	16	gravity—hand control	good
Brown	6	gravity—hand control	good
Burns	8	gravity—hand control	good
Carr	16	gravity—hand control	good
Cummings	4	furnace	not satisfactory
Davis	4	furnace	not satisfactory
Durell	4	gravity—hand control	good
Edgerly	12	gravity—hand control	good
Forster	12	gravity—hand control	good

Forster Annex	6	gravity—hand control	good
Glines	14	gravity—hand control	good
Hanscom	6	fan— hand control	good
High	47	fan— { part hand control part automatic control }	good
Highland	12	furnace	fair
Hodgkins	12	gravity—hand control	good
Knapp	12	gravity—automatic control	good
Lincoln	4	gravity—hand control	good
Morse	12	furnace—hand control	fair
Perry	8	gravity—hand control	good
Pope	12	gravity—hand control	good
Prescott	12	fan—automatic control	good
Proctor	8	gravity—hand control	good
Lowe	8	gravity—hand control	good

### Sanitary Conditions.

The sanitary condition of the school buildings is, I believe, a very satisfactory one. Great care has been taken to keep the sanitary rooms in a clean and wholesome condition, and this, in a great measure, is due to a systematic inspection by Duncan C. Green, the inspector of plumbing, who has faithfully watched the matter, and with the co-operation of the janitors has maintained a healthy condition in this respect.

The enclosed table will describe the system in use and the existing conditions.

School.	System.	Ventilation.	General Working Condition.
Baxter .....	Hydraulic closet system.	Local vented.	Good.
Bell .....	“ “ “	“ “	“
Bennett .....	“ “ “	“ “	“
Bingham .....	“ “ “	“ “	“
Brown .....	“ “ “	“ “	“
Burns .....	“ “ “	“ “	“
Carr .....	“ “ “	“ “	“
Cummings .....	“ “ “	“ “	Fair.
Davis .....	“ “ “	“ “	“
Durell .....	“ Latrine closet	“ “	“
Edgerly .....	“ “ “	“ “	Good.
Forster .....	“ “ “	“ “	“

Lowe .....	“ “ “	“ “	“

**Inspection of Buildings.**

The commissioner as inspector of buildings has devoted as much time as possible to the inspection of the building construction in the city during the year, but feeling that a more systematic inspection should be given to this work, I respectfully request that a careful consideration be given to the matter with a view to increasing the inspection force of the department. The increased expenditure for this purpose would not be large, and would more fully protect the interests of the people who are investing their savings in the new buildings which are being constructed.

The recommendation of a revision of the buildings ordinances, made in my report of a year ago, was taken up and followed out, and at the present time a full report, consisting of a new set of building ordinances, is in the hands of the committee on ordinances and rules of the board of aldermen. This committee will undoubtedly make a full report in the near future.

**Buildings Condemned.**

During the year 1907 three buildings were condemned as being in a dangerous condition and a menace to life and limb. These buildings were ordered taken down, and in the case of two of them the owners complied, while in the case of one this department was obliged to enter the premises and demolish the building.

**Permits.**

There have been issued during the year 1907 291 permits for new buildings and alterations. This number is twenty-seven less than in 1906. The total estimated cost of the new buildings and alterations was \$939,795, while the cost in 1906 was \$1,031,835, showing a decrease of \$92,040.

During the year there have been made 926 inspections of private buildings in the course of construction. The following table will show the number of permits in each ward and the uses for which they were intended.

Buildings.	WARDS.							Total.
	1	2	3	4	5	6	7	
Dwellings . . . . .	6	12	11	6	22	32	100	189
Stores . . . . .	4	2	5	2	3	6	1	23
Stables . . . . .	2	3	0	1	0	0	0	6
Miscellaneous . . . . .	14	13	3	3	9	8	16	66
Brick buildings . . . . .	3	2	0	0	0	1	1	7
<b>Total</b>	<b>29</b>	<b>32</b>	<b>19</b>	<b>12</b>	<b>34</b>	<b>47</b>	<b>118</b>	<b>291</b>

The number of plumbing permits issued during the year was . . . . .	389
Permits for plumbing in new buildings . . . . .	191
Permits for plumbing in old buildings . . . . .	198
Number of buildings in which soil pipes were tested . . . . .	301
Number of master plumbers' licenses, 47 at \$.50 . . . . .	\$23.50
Number of journeyman plumbers' licenses, 28 at \$.50 . . . . .	14.00
Number of new master plumbers' licenses, 5 at \$2 . . . . .	10.00
Number of new journeyman plumbers' licenses, 3 at \$.50 . . . . .	1.50
Amount received in fees . . . . .	49.00

Respectfully submitted,

WALTER T. LITTLEFIELD,

Commissioner of Public Buildings.

# REPORT OF THE COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

---

OFFICE OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS, }  
Central Fire Station, January 1, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen.—I respectfully present herewith my report for the year ending December 31, 1907.

## Electrical Department.

Under this department come the care and maintenance of the fire alarm and police signal systems and all work of an electrical nature belonging to the city; also the inspection of wiring in all buildings and in the city's streets.

During the year the Edison Electric Illuminating Company and the New England Telephone and Telegraph Company have replaced a large number of dangerous poles.

To the Edison Electric Illuminating Company 282 permits were issued for the attachment of lamps and motors in buildings after inspection of wiring for same by this department.

For the New England Telephone and Telegraph Company 402 permits were approved for the attachment of its wires to various poles in the city after the inspection of the poles.

## Fire Alarm.

Two hundred and fifty-three alarms were transmitted correctly during the year.

Three new boxes were added during the year, as follows, making a total of 112 boxes:—

Box 211, located at New England Oil Company, Allen street (private box);

Box 121, located on Somerville avenue, near Cambridge line;

Box 341, located on Pearl street, corner of Walnut street.

Twenty-four keyless doors were put on the fire-alarm boxes in place of the old-fashioned key doors.

A gong has been installed at the city stables, and a special signal arranged, so that the highway department men can be called together, should their services be needed in any part of the city on emergency work.

The equipment of the fire-alarm consists of the following:—

One hundred and twelve signal boxes, one eight-circuit automatic repeater, eight tower strikers, thirty gongs, eight indicators, twelve private telephones, fifty tappers, one automatic steam whistle, 425 cells storage batteries, and about 130 miles of overhead wire and 9,986 feet of underground cable.

### Police Signal.

The police signal system has received its usual attention, and a new close-circuit battery has been installed during the year.

The equipment consists of 125 cells of close-circuit batteries, one four-circuit instrument desk, and fifty signal boxes.

### Underground Wires.

The underground posts have been purchased for the fire and police signal boxes to complete the work on Broadway, and they are ready to be located and connected with underground cables.

The placing of wires under ground by the Edison Electric Illuminating Company, the New England Telephone and Telegraph Company and the city has been carried on in conformity with the law, and a large number of poles and wires have been removed.

### Street Lights.

There are at present 482 arc lights and 616 incandescent lights in service in the city. Several new lights will be needed during the coming year, owing to the laying out of the new streets in the western part of the city.

### Recommendations.

I make the following recommendations:—

That additional fire and police boxes be installed to shorten the present distances between boxes in certain parts of the city.

That twenty-four more keyless doors be put on fire-alarm signal boxes.

That the fire department houses be connected with the public telephone exchange.

That the three blows now struck on the fire-alarm system at nine o'clock in the evening be reduced to one blow.

That the rules and regulations governing the installation of electric wiring, issued by the department, be adopted as an ordinance.

# SOMERVILLE WATER WORKS.

---

SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

---

Area of city, including land and water, about 4.22 square miles.

Population, estimated, 72,000.

Entire population on line of pipe and supplied with water.

---

Water works owned by City of Somerville.

Construction commenced in 1868.

Source of supply : Metropolitan system, taking water of the  
Nashua river at Clinton, Mass.

---

## Mayor

HON. CHARLES A. GRIMMONS.

## Water Commissioner

FRANK E. MERRILL.

Office of the Water Department,

Room 10, City Hall.

---

Department Buildings and Yard,

Cedar street, near Broadway.

## REPORT OF THE WATER COMMISSIONER.

OFFICE OF THE WATER COMMISSIONER, }  
January, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

I present herewith my report for the year ending December 31, 1907, this being the thirty-fourth annual report made by the water department:—

### Receipts and Expenditures.

Water bills have been issued as follows:—

“Annual” water charges, amounting to . . . . .		\$129,030 15
“Additional” water charges, amounting to . . . . .		3,415 31
“Metered” water charges, amounting to . . . . .		98,807 50
		\$231,252 96
Abatements made on the above charges . . . . .	\$4,353 01	
Refunds made on the above charges . . . . .	552 46	
Abatements made on charges of 1906 . . . . .	343 96	
	5,249 43	
Income from sale of water . . . . .		\$226,003 53
Amount received from water service assessments . . . . .		3,254 88
Amount received for labor and materials . . . . .		5,879 71
		\$235,138 12

This amount was used as follows:—

For water works purposes:—

Water works maintenance . . . . .	\$30,721 75	
Water works extension . . . . .	17,039 00	
Miscellaneous accounts . . . . .	5,879 71	
Interest on water loan bonds . . . . .	3,200 00	
Maturing water loan bonds . . . . .	7,000 00	
Metropolitan water works assessment . . . . .	106,334 61	
	170,175 07	

For other municipal purposes:—

Sewers, maintenance . . . . .	\$12,000 00	
Interest on sewer loan bonds . . . . .	9,137 50	
Fire department . . . . .	30,000 00	
Reduction of funded debt . . . . .	13,823 65	
Balance carried to credit of Water Income account of 1908 . . . . .	1 90	
		64,963 05
		\$235,138 12

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use. The value of this water is estimated at \$12,000.

**Department Receipts and Disbursements.****WATER MAINTENANCE ACCOUNT.**

	DR.	CR.
Amount appropriated by board of aldermen from water income . . . . .		\$25,000 00
Sundry receipts for labor and materials . . . . .		5,541 87
Amount transferred from Water Works Extension account . . . . .		5,721 75
Materials used in extension of the water works . . . . .		12,812 05
Amount expended for labor and materials for operation, maintenance, and renewal of the water works . . . . .	\$30,721 75	
Amount expended for materials used in extension of the water works . . . . .	12,812 05	
Miscellaneous accounts . . . . .	5,541 87	
	\$49,075 67	\$49,075 67

**WATER WORKS EXTENSION ACCOUNT.**

	DR.	CR.
Amount appropriated by board of aldermen from water income . . . . .		\$20,000 00
Receipts from 173 water service assessments . . . . .		3,254 88
Sundry receipts for labor and materials . . . . .		337 84
Labor and materials used in extension of the water works . . . . .	\$17,039 00	
Miscellaneous accounts . . . . .	337 84	
Amount transferred to Water Maintenance account . . . . .	5,721 75	
Unexpended balance . . . . .	494 13	
	\$23,592 72	\$23,592 72

**Cost of Water Works.**

The total cost of the water works on December 31, 1906, as represented by the expenditures from appropriations for water works extension was . . . . .	\$874,698 99
Expended during the year 1907, on extension account . . . . .	17,039 00
Total expenditures, December 31, 1907 . . . . .	\$891,737 99

**Water Debt.**

Water loan bonds have been issued on funded debt account to the amount of \$1,017,000; this has been reduced by \$948,000, leaving the water debt on December 31, 1907, \$69,000.

The outstanding bonds mature as follows:—

YEAR.	AMOUNT.	YEAR.	AMOUNT.
1908	\$7,000	1915	\$5,000
1909	6,000	1916	5,000
1910	6,000	1917	5,000
1911	6,000	1918	5,000
1912	6,000	1919	4,000
1913	6,000	1920	2,000
1914	6,000		

**Water Works Income from 1898 and its Distribution.**

The water income and its distribution from 1898 to 1907, inclusive, is shown in the following table:—

Total water income, years 1898 to 1907, inclusive . . . \$2,180,480 07  
 Distribution:—

**Water Works Account.**

Water Works Construction, Renewal, Maintenance and Operation . . . . .	\$548,961 32	
Water Bonds . . . . .	205,000 00	
Interest . . . . .	69,415 00	
Metropolitan Water Assessments . . . . .	641,210 44	
		\$1,464,586 76

**Other Municipal Accounts.**

Sewers	{	Construction . . . . .	\$117,035 65

Credit of Water Income account, 1908 . . . . .			1 90	
				\$2,180,480 07

**Extension of Water Distribution System.**

Reference may be had to the accompanying table for the location and size of new water mains laid during the year, number and size of gates set, and number and kind of fire hydrants installed.

The total number of feet of new mains laid, including hydrant branches, was 4,309, making the water pipe mileage of the city approximately ninety-two miles, 692 feet. Four additional fire hydrants and twenty-eight water gates have been set during the year.

Trench work, excavating, and re-filling for water pipes was done by contract labor in the following streets and at prices named:—

Street.	Feet of Trench.	Contractor.	TRENCH WORK.		Total Cost of Trench Work.	Average Cost per foot of Trench Work.
			Earth. Lin. Ft.	Rock. Cu. Yd.		
Bromfield rd. . . . .	588	Daniel A. Dorey . . . . .	\$ .20	....	\$117.60	\$ .20
Pearson rd. . . . .	207	T. F. Crimmings . . . . .	.25	\$3.00	57.75	.279
Sawyer ave. . . . .	506	Daniel A. Dorey . . . . .	.22	3.00	512.32	1.0125
Teale ave. . . . .	281.5	Daniel A. Dorey . . . . .	.40	1.50	203.26	.7221
Walnut rd. . . . .	352	T. F. Crimmings . . . . .	.35	2.40	157.52	.4475
Whitfield rd. . . . .	767	B. Burke . . . . .	.29	2.48	455.55	.5939

The pipes and all materials required were furnished, and the pipe-laying done in each street by the water department.

The number of new services laid during the year was 173, a smaller number than for many years past, indicating a considerable falling off in building operations. In laying these services 6,575 feet of pipe was used, making the total of service pipes in the city approximately 75.2 miles.

A six-inch fire service pipe was laid for the Brown-Durrell building on Howard street, and a four-inch fire pipe for the Cushman estate building, No. 37 Somerville avenue. A four-inch service pipe was also laid from the North-street main to the grounds of the city home.

Five new waterposts have been set for the street watering department, making seventy-eight now in the city.

Six hundred and sixty-one meters have been installed during the past year, including the re-setting of twenty-seven which were removed for various reasons in years prior to 1907, and thirty-five have been removed for either temporary or permanent discontinuance of water services; the net increase in number of meters is 626, and the total number in service is 3,446, the kinds and sizes being as shown in the following table:—

METERS DECEMBER 31, 1907.

KIND	SIZE								Total.
	5/8"	3/4"	1"	1 1/2"	2"	3"	4"	6"	
Nash . . . .	174								174
Empire . . . .	1								1

Totals . . . .	3,129	210	59	15	19	7	5	2	3,446
Motor and ele- vator registers									9
									3,455

The meters installed in 1907 were classed as follows:—

Applications of property owners . . . . .	431
New services . . . . .	191
General installation . . . . .	12
Reset . . . . .	27

Total . . . . . 661

The following table gives a summary of the pipes and fixtures of the water system December 31, 1907:—

#### Summary of Pipes and Fixtures.

Feet of main pipe (approximately) . . . . .	486,452
Feet of service pipe (approximately) . . . . .	397,555
Service connections (approximately) . . . . .	11,662
Public fire hydrants . . . . .	1,022
Private fire hydrants . . . . .	50
Gates . . . . .	1,404
Check valves . . . . .	7
Meters . . . . .	3,446
Motor registers . . . . .	9
Waterposts . . . . .	78
Blow-offs . . . . .	136
Drinking fountains and troughs . . . . .	10

#### Maintenance.

In the main distribution system fourteen joint leaks have been discovered and repaired during the year.

Early in the morning of April 17 water escaped in large quantity from the main in Broadway, near Rush street, causing much damage to the street, and to the walls, cellars, and contents of the block corner of Broadway and Rush street, as well as to several cellars in Rush street. It was found that a pipe in the twelve-inch main opposite No. 132 Broadway had cracked lengthwise along the side in a fairly regular line for about ten feet. No piece of the pipe was blown out, but the pipe opened up along the crack under pressure of the water, allowing a great volume to escape, and when the pipe was relieved of the pressure on shutting the gates, it closed together so that the crack was hardly perceptible. This pipe had been laid about ten years, and the line had never shown any defects nor indications of weakness.

Tests were made of the cracked pipe after removal, and it was found to be of good quality of metal throughout. Tests for electrolysis were also made, but no indications of destructive currents were found. No reason is apparent for the cracking of this pipe. A not improbable cause, however, might be found in the theory that water from a leak in the city of Boston twenty-four-inch main, which is known to have existed at a point not far distant, had worked through the sandy soil, and had so undermined or disturbed the bearings of the Somerville pipe as to allow a sufficient settlement or movement of the pipe to cause it to crack. Numerous claims for damages were presented, and most of them have been adjusted and settled; the total cost of repairing the pipe line, streets, buildings, and settlement of claims to date has been \$1,193.59.

One hundred and forty-three service pipes have been renewed wholly or in part, of which number eighty-one were on

account of the permanent paving in Broadway, Medford street, and Cross street. One hundred and thirty-five service pipe leaks have been repaired during the year.

The customary needed attention has been given to the water gates and fire hydrants, a force of men being kept on hydrant inspection constantly during the winter season.

### Water Assessments and Consumption.

The annual assessments paid by this city as its proportionate part of the cost and operation of the metropolitan water works are given below:—

Year.	Sinking Fund.	Maintenance.	Interest.	Total.
1898	No division made			\$14,250 19
1899	“ “ “			20,975 58
1900	“ “ “			28,689 24
1901	\$12,491 73	\$12,033 79	\$32,291 24	56,816 76
1902	19,014 85	12,955 64	30,427 40	62,397 89
1903	15,748 56	12,763 10	48,776 77	77,288 43
1904	16,404 42	15,393 87	54,938 64	86,736 93
1905	21,358 11	13,666 71	55,535 91	90,560 73
1906	22,345 50	17,412 51	57,402 07	97,160 08
1907	25,365 30	18,880 01	62,089 30	106,334 61
				\$641,210 44

There has been credited to the city by the commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district, and water furnished to water companies the sum of \$9,056.10. By legislative action such amounts as are now received by the state from these sources are paid into the sinking fund for the extinguishment of the principal indebtedness, instead of being applied to the diminution of the annual water assessments, as heretofore.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the metropolitan water works, is shown below by months for the year 1907:—

Month.	Gallons.	Month.	Gallons.
January .....	7,169,000	July .....	6,751,600
February .....	8,046,900	August .....	6,343,900
March .....	6,320,400	September .....	6,268,600
April .....	6,295,900	October .....	6,207,600
May .....	6,376,400	November .....	5,857,700
June .....	6,756,200	December .....	6,016,800

The total consumption for the year is 2,390,166,000 gallons, making an average daily consumption of 6,548,400 gallons.

The average daily quantity of water used in Somerville during 1907 was ninety gallons per inhabitant, an increase of one gallon over the previous year, due to a greatly increased consumption of city water in one of our large mercantile establishments, while the average for the entire water district has in-

creased five gallons, or to 133 gallons per day for each inhabitant.

The following table shows the daily per capita consumption of water in the cities and towns in the metropolitan water district for the year 1907, as registered by the metropolitan meters:—

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	For the Year.
Boston .....	174	187	167	152	151	152	154	156	151	152	148	152	157
Somerville .....	100	112	88	87	88	93	93	91	86	85	80	82	90
Malden .....	48	52	48	47	46	51	52	51	45	41	40	40	47
Chelsea .....	130	156	115	93	87	88	89	87	85	82	79	82	97
Everett .....	96	114	89	78	76	80	80	82	78	73	68	71	81
Quincy .....	97	100	99	94	98	107	115	122	107	103	93	91	102
Medford .....	106	113	106	101	104	111	112	116	102	99	96	96	105
Melrose .....	113	125	117	110	111	121	122	131	117	116	113	116	118
Revere .....	95	111	90	83	82	94	103	107	90	75	70	68	88
Watertown .....	58	61	59	63	69	73	80	80	73	72	61	55	67
Arlington .....	82	96	77	76	81	99	125	149	98	84	70	70	92
Milton .....	43	40	37	41	51	56	57	61	48	42	40	39	46
Winthrop .....	115	129	113	106	105	126	149	153	119	104	95	91	117
Stoneham .....	75	89	90	84	83	88	97	109	102	100	100	102	93
Belmont .....	53	58	58	57	70	94	108	125	77	58	56	57	73
Lexington .....	68	72	73	70	72	82	85	105	76	65	62	51	73
Nahant .....	87	94	78	90	62	59	79	87	60	50	91	84	73
Swampscott .....	64	70	66	56	65	76	96	112	72	61	58	60	74
Total .....	146	158	139	128	127	130	133	135	129	127	123	126	133

The district, in order of per capita consumption, beginning with the lowest, stands as follows:—

1—Milton .....	46	8—Somerville.....	90
2—Malden .....	47	9—Arlington .....	92
3—Watertown .....	67	10—Stoneham .....	93
4—Belmont .....	73	11—Chelsea .....	97
4—Nahant .....	73	12—Quincy .....	102
4—Lexington .....	73	13—Medford .....	105
5—Swampscott .....	74	14—Winthrop .....	117
6—Everett .....	81	15—Melrose .....	118
7—Revere .....	88	16—Boston .....	157

The towns and cities showing the lowest per capita consumption of water are those having the largest percentage of meters and, therefore, the smallest waste of water.

### Compulsory Meterage.

By provision of Chapter 524, Legislative Acts of 1907, all cities and towns in the metropolitan water district are now required to equip with water meters all water services hereafter laid, and to annually equip with meters five per cent. of the water services which were unmetered on December 31, 1907.

This legislation is practically identical with the policy recommended by your water commissioner in his report for the year 1902 for adoption by this city, and which has since been pur-

sued. By having thus early taken up the problem of restriction of water waste, the city has the advantage of starting under the new law with about one-third of its services already metered. There are at this time in the city about 8,000 services still unmetered, requiring, in compliance with the law, a yearly installation of about 400 meters in this class; at this rate it would take twenty years to complete the work. The benefits to be gained from a metered system, such as conservation of the general water supply, equalization of water charges to consumers, and a probable direct financial gain to those cities that show low water consumption, in the way of a reduction in the annual water assessment levied by the state, lead me to the opinion that advantage should not be taken by this city of the full period allowed by law for this work, but that it should rather be completed in one-half that time, requiring for all purposes, including new services, the installation of about 1,000 meters annually.

Respectfully submitted,

FRANK E. MERRILL,

Water Commissioner.

**Summary of Statistics**

FOR THE YEAR ENDING DECEMBER 31, 1907.

In form recommended by the New England Water Works Association.

**SOMERVILLE WATER WORKS.**

—SOMERVILLE, MIDDLESEX COUNTY, MASS.

**GENERAL STATISTICS.**

Population by census of 1905, 69,272.

Date of construction: commenced in 1868.

By whom owned: City of Somerville.

Source of supply: Metropolitan water system.

Mode of supply: water is delivered into the city's mains, under both high and low pressures, by the Metropolitan Water Works.

**STATISTICS OF CONSUMPTION OF WATER.**

1. Estimated total population at date, 72,000.
2. Estimated population on lines of pipe, 72,000.
3. Estimated population supplied, 72,000.
4. Total consumption for the year, 2,390,166,000 gallons.
7. Average daily consumption, 6,548,400 gallons.
8. Gallons per day to each inhabitant, 90.

**STATISTICS RELATING TO DISTRIBUTION SYSTEM.****MAINS.**

1. Kind of pipe, cast-iron.
2. Sizes, from 4-inch to 20-inch.
3. Extended 4,309 feet during year.
5. Total now in use, 92.13 miles.
7. Number of leaks per mile, 0.163.
9. Number of hydrants added during year (public and private), 5.
10. Number of hydrants (public and private) now in use, 1,072.
11. Number of stop gates added during year, 28.
12. Number of stop gates now in use, 1,404.
14. Number of blow-offs, 136.
15. Range of pressure on mains, 35 pounds to 100 pounds.

**SERVICES.**

16. Kind of pipe: Lead; wrought iron—lead-lined; wrought iron—cement-lined; cast iron.
17. Sizes, one-half to six inches.
18. Extended 6,575 feet.
20. Total now in use, 76.54 miles.
21. Number of service taps added during the year, 173.
22. Number now in use, 11,662.
24. Average cost of service for the year, \$21.81.
25. Number of meters added, 661; discontinued, 35.
26. Number now in use, 3,446.
27. Percentage of services metered, 29.57.
28. Percentage of receipts from metered water, 43.67.
29. Number of motors and elevators added, 0.
30. Number now in use, 9 (included in number of meters).

# REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

OFFICE OF CHIEF OF FIRE DEPARTMENT, }  
December 31, 1907. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I herewith present to you the annual report of the fire department for the year ending December 31, 1907:—

## Fire Alarms.

Number of bell alarms . . . . .	253	
Number of still alarms . . . . .	158	
Total alarms . . . . .		411
Number in excess of 1906 . . . . .		74
Value of buildings at risk . . . . .	\$450,475	00
Damage to buildings . . . . .	36,656	00
Insurance on buildings . . . . .	323,590	00
Value of contents . . . . .	212,172	00
Damage to contents . . . . .	39,190	00
Insurance on contents . . . . .	145,284	00
Total value of risks . . . . .	662,647	00
Total damage . . . . .	75,846	00
Total insurance . . . . .	468,874	00

## Manual Force.

The manual force of the department consists of 120 men, divided into companies as follows:—

	Permanent Men.	Callmen.
Chief engineer . . . . .	1	
Assistant engineer . . . . .	1	
Engine Co. No. 1 . . . . .	6	7
Engine Co. No. 2 . . . . .	5	9
Engine Co. No. 4 . . . . .	5	7
Hose and Chemical Co. No. 6 . . . . .	4	5
Hose and Chemical Co No. 7 . . . . .	3	5
Hose Co. No. 2 . . . . .	2	8
Hose Co. No. 3 . . . . .	2	8
Hose Co. No. 5 . . . . .	2	8
Ladder and Chemical Co. No. 1 . . . . .	3	12
Ladder Co. No. 2 . . . . .	2	12
Chemical A . . . . .	3	
Total number of men . . . . .	39	81
		120

## Apparatus in Service.

Steam fire engines . . . . .		3
Chemical engine . . . . .		1
Combination chemical and hose wagons . . . . .		2
Ladder truck . . . . .		1
Ladder truck with chemical tanks . . . . .		1
Hose wagons . . . . .		6

**Horses.**

The number of horses owned and maintained, 41, divided as follows:—

Chief engineer . . . . .	1
Central station . . . . .	12
Engine Co. No. 2 . . . . .	5
Engine Co. No. 4 . . . . .	5
Union-square station . . . . .	5
Hose Co. No. 2 . . . . .	2
Hose Co. No. 5 . . . . .	2
Hose Co. No. 6 . . . . .	4
Hose Co. No. 7 . . . . .	2
Ladder Co. No. 2 . . . . .	3
Total . . . . .	41

**Fire Hose.**

There is in service in the department 10,600 feet of good hose and 900 feet of second-hand hose on auxiliary hose reels. All the hose has been tested, and that which could not stand the pressure of 100 pounds has been condemned for fire purposes, and 700 feet of same has been transferred to park department, 800 feet to street department, 450 feet to water department, and 600 feet to the sewer department; 1,290 pounds of worthless hose has been sold for \$25.83, and the money paid to the city treasurer.

**Recommendations.**

I recommend that a new combination chemical and hose wagon be placed in the Clarendon-hill fire station to take the place of the apparatus now there, which is unsafe for use by reason of age.

That the steam fire engine at Clarendon-hill station be placed in service.

That a chemical engine be placed in service in the Union-square fire station.

That an automobile chemical engine be stationed at Union square, such engines having been pronounced a success by parties who have used them. It would be valuable in extinguishing small fires and economical in its operation.

I renew the recommendation made last year that Chapter 191 of the Acts of 1905, permitting the establishing of a sinking fund from which any municipal building damaged or destroyed by fire may be repaired or replaced by another building in lieu thereof. A copy of said act is herewith submitted.

**An Act to Authorize Cities and Towns to Establish Municipal Building Insurance Funds.**

Be it enacted, etc., as follows:—

Section 1. Any city or town which accepts the provisions of this act may establish and maintain a municipal building insurance fund, from which any municipal buildings or other property damaged or destroyed

by fire, lightning, or otherwise may be repaired, rebuilt, or replaced by other buildings or property to be used in lieu thereof.

Section 2. Any such city or town may raise money for the purposes of this act, not exceeding in amount in any one year one-twentieth of one per cent. of its assessed valuation; but no money shall be raised for such purpose while the amount of the fund equals or exceeds one per cent. of such valuation.

Section 3. The fund established under this act by any city or town shall be managed and administered as provided in section fifteen of chapter twenty-seven of the Revised Laws, by the sinking fund commissioners thereof, if such there be, or by any municipal board of commissioners or trustees having charge of its trust or sinking funds; and if in any such city or town such commissioners or trustees have not been established sinking fund commissioners shall be elected in the manner provided in section fourteen of chapter twenty-seven of the Revised Laws.

Section 4. This act may be accepted by any city by a concurrent vote of both branches of the city council, and by any town by a majority of the voters present and voting thereon at a meeting duly called for that purpose.

Section 5. This act shall take effect upon its passage.

Approved March 17, 1905.

Chapter 191, Acts and Resolves for 1905.

I again recommend, as in former years, that shingle roofs on all buildings throughout the city be discontinued and replaced by non-inflammable materials.

**Fire Alarms and Causes thereof.**

Accidental . . . . .	2
Automobile . . . . .	2

In addition to the notices of fire alarms received by the fire alarm system, notices of fires by the Central telephone, the local telephone, oral notices, automatic signals from factories, district telephone, notice of engine going to Charlestown, and notice of hose No. 2 going to Medford have been received at the Central fire station. This shows the importance of there being a man always at the desk at the Central fire station to receive calls for services required. There is only one telephone connected with the fire department that can be used for general business. There have been fifty-eight oral and telephone calls for the fire apparatus at the Central station, and thirty-three times the apparatus at other stations has been sent to fires from the Central station. This record shows the necessity of having a greater number of men at this station.

Service of Companies in Fire Department, Year 1907.

### In Memoriam

Captain Melvin B. Ricker, born August 30, 1841, died September 7, 1907. He was, for a term of forty years, a member of the fire department of this city, seventeen years of which he was captain in command of hook and ladder company No. 1. He was an excellent fireman, greatly esteemed by his associates, and a worthy citizen.

## REPORT OF THE CHIEF OF POLICE.

OFFICE OF THE CHIEF OF POLICE, }  
 January 1, 1908. }

To the Honorable, the Mayor, and Board of Aldermen of the City of Somerville:—

Gentlemen,—I respectfully submit a report of the doings of the police department for the year ending December 31, 1907, with suggestions and recommendations for your consideration:—

### Arrests.

Whole number of arrests made . . . . .	1,819
Americans . . . . .	943
Foreign born . . . . .	876
	1,819
Males . . . . .	1,701
Females . . . . .	118
	1,819
Residents . . . . .	1,087
Non-residents . . . . .	732
	1,819

of which 1,359 were confined in the lockup.

Arrests for crimes against good order as follows:—

Bastardy . . . . .	7
Contempt of court . . . . .	5
Cruelty to animals . . . . .	2
Disturbing the peace . . . . .	35
Drunkenness . . . . .	909
Keeping unlicensed dog . . . . .	3
Lewdness . . . . .	7
Neglected children . . . . .	13
Neglect to support family . . . . .	32
Peddling without license . . . . .	2
Stubbornness . . . . .	8
Vagrancy . . . . .	18
Violation of automobile laws . . . . .	1
Violation of city ordinances . . . . .	106
Violation of gaming laws . . . . .	3
Violation of health food laws . . . . .	32
Violation of liquor laws . . . . .	6
Violation of Lord's day . . . . .	81
Walking on railroad track . . . . .	19
	1,289

### Crimes Against the Person.

Adultery . . . . .	2
Assault and battery . . . . .	206
Assault felonious . . . . .	13
Murder . . . . .	2
Threats . . . . .	5
	228

**Crimes Against Property.**

Attempt to commit arson . . . . .	1
Breaking and entering . . . . .	48
Evading railroad fare . . . . .	6
Fraud . . . . .	1
Larceny . . . . .	112
Malicious mischief . . . . .	73
Wilful trespass . . . . .	20
	<hr/>
	261
	<hr/>
	1,778

**Miscellaneous Reports.**

Buildings found open and secured . . . . .	601
Defective streets reported . . . . .	588
Obstructions in streets reported . . . . .	69
Larcenies reported . . . . .	285
Amount of property reported stolen . . . . .	7,936
Water pipes reported leaking . . . . .	81
Number of street light reports . . . . .	4,289

**Police Signal, Patrol Wagon, and Ambulance Service.**

Number of on duty reports made by the patrolmen . . . . .	231,293
Number of wagon runs . . . . .	1,006
Number of prisoners conveyed to station . . . . .	1,095
Number of miles run with wagon . . . . .	1,633
Number of telephone calls . . . . .	12,804
Number of ambulance calls . . . . .	459

**Suggestions and Recommendations.**

I renew my recommendation of last year, to equip this department with an automobile, and I am more than ever satisfied that with such an addition a very much better record of arrests for crimes of an aggravated nature could be made by the department.

I am also satisfied of the need of a sub-police station in ward seven, as recommended last year, but if a combination gasoline automobile patrol wagon and ambulance similar to the one used by the city of Springfield (Mass.) police department can be installed in the service of this department and located in said ward, it would answer many of the calls and be a great relief to the teams now used until a station is erected.

I also recommend that the city provide a saddle horse and one motor-cycle for the use of this department, and also provide extra police officers to obtain information concerning the character and fitness or qualifications of any of the inhabitants for jury service for the registrars of voters as provided by Chapter 348, Acts of 1907.

**Intoxicating Liquors and Licenses.**

The pony express business, so-called, is a legalized cloak under which many violations of the law can be safely committed.

Chapter 517, Acts of 1907, makes it an offence for a common carrier to receive intoxicating liquors for distribution in no-

license cities or towns, unless they are regularly and lawfully conducting a general express business, but that does not apply to the authorities of this city except that of the propriety of granting a license for such purpose to persons not conducting a general express business on account of said Acts and Resolves.

#### **In General.**

The force has not been increased since April 21, 1906, nearly two years, and there is one vacancy since June 17, 1907.

Sergeant Eugene H. Gammon resigned June 17, Patrolman Harry L. Allen resigned March 27, and Ira S. Carleton was retired May 9.

There was one death; David J. Hanna died July 17. The new officers appointed were: Joseph A. Dwyer, Thomas P. Walsh, and Clyde W. Steeves.

In conclusion, I want to thank the Honorable Charles A. Grimmons, mayor, the board of aldermen, and the several heads of departments for support and encouragement given me in the discharge of the duties of my office, also, I thank more cheerfully than ever the officers, rank and file of my department for their valuable support and commendable performance of their duties.

---

**In Memoriam**

David J. Hanna,

Died July 17, 1907.

Chief of Police,

## REPORT OF SEALER OF WEIGHTS AND MEASURES.

OFFICE OF SEALER OF WEIGHTS AND MEASURES, }  
City Hall Annex, Somerville, January 3, 1908. }

To His Honor, the Mayor, and the Board of Aldermen:—

The following report of the sealer of weights and measures for the year 1907 is respectfully submitted:—

Section 21, chapter 62, of the Revised Laws provides that sealers of weights and measures shall annually give public notice by advertisement, or by posting, in one or more public places in their respective cities and towns, notices to all inhabitants or persons having usual places of business therein who use weights, measures or balances for the purpose of selling goods, wares, merchandise or other commodities or for public weighing to bring in their weights, measures and balances to be adjusted and sealed. Such sealers shall attend in one or more convenient places, and shall adjust, seal and record all weights, measures and balances so brought in.

Section 34 of the same chapter provides that each sealer of weights and measures, including the county treasurers, shall receive a fee of one dollar for sealing each platform balance if weighing five thousand pounds or more, and fifty cents if weighing less than that amount, and three cents each for sealing all other weights, measures, scales, beams or balances. He shall also have a reasonable compensation for all necessary repairs, alterations and adjustments made by him.

Where weights, measures and balances are sealed as provided in Section 21 (that is, brought to the office), no fee is charged for sealing.

In compliance with the foregoing Section 21, the customary notice was given by advertising in the Somerville Journal and the Somerville Reporter in March, 1907.

During the year the sealer visited all places in the city where goods were bought or sold, tested all scales, weights and measures, sealed those which were found correct, and condemned all found beyond repair and useless.

One hundred and ninety-three scales, weights and measures were adjusted before sealing, twenty-three scales were tagged for repairs, nine of which were repaired as ordered, and the remaining fourteen put out of use.

Work done in weights and measures during the year 1907:—

	No. of Tests in the Office.	No. of Tests Outside of Office.	Total No. of Tests in and Outside of Office.
Number of scales sealed . . . . .	263	1,219	
Number of weights sealed . . . . .	198	3,899	
Number of dry measures sealed . . . . .	502	1,098	
Number of tin liquid measures sealed . . . . .	787	1,443	
Number of glass jars sealed . . . . .	112,096		
Number of yard sticks sealed . . . . .		134	
Number of coal baskets sealed . . . . .	30		
	<hr/>	<hr/>	
Total number of all kinds sealed . . . . .	113,876	7,793	121,669
Number of scales adjusted and sealed . . . . .	45	96	
Number of weights adjusted and sealed . . . . .	9	37	
Number of dry measures adjusted and sealed . . . . .	2	1	
Number of liquid measures adjusted and sealed . . . . .	3		
	<hr/>	<hr/>	
Total number adjusted and sealed . . . . .	59	134	193
Number of scales tagged for repairs . . . . .	14	9	
Number of scales repaired as ordered . . . . .	8	1	
	<hr/>	<hr/>	
Total number tagged and repaired . . . . .	22	10	32
Number of scales condemned . . . . .	5	3	
Number of weights condemned . . . . .	1	2	
Number of dry measures condemned . . . . .	9	37	
Number of liquid measures condemned . . . . .	1,811	12	
Number of yard sticks condemned . . . . .		4	
	<hr/>	<hr/>	
Total number condemned . . . . .	1,826	58	1,884
	<hr/>	<hr/>	
	115,783	7,995	
	<hr/>	<hr/>	
Total number tested in and out of office . . . . .			123,778
Expenditures for year 1907:—			
Telephone . . . . .		\$29 60

JOHN H. DUSSEAUT,  
Sealer of Weights and Measures.

## REPORT OF THE CITY SOLICITOR.

---

January 16, 1908.

To the Honorable, the Mayor, and Board of Aldermen of the City of Somerville:—

The following is my report as city solicitor for the year 1907:—

*Abolition of Grade Crossings.* The commission appointed by the superior court, consisting of George W. Wiggin, George F. Swain, and James D. Colt, have held several public hearings in the Tremont building, Boston, in regard to the abolition of the five grade crossings in this city of the Fitchburg division of the Boston & Maine railroad. At these hearings, persons representing the Fresh Pond Ice Company, the American Tube Works, and several other business interests along the line of the railroad were fully heard. The regular public hearings have been closed, and plans are in preparation under the direction of the commission. There is good reason to expect that the work of the commission will soon be finished.

*Lowell-street Bridge.* Actions brought in the supreme court by the railroad corporations, to determine the validity of the decrees made by the county commissioners, were set down for a hearing in January, 1908, and will go to the full bench of that court for adjudication.

*Other Cases in Court.* Three highway accident cases have been settled for \$100, \$350, and \$650, respectively, with the approval of the mayor and the street commissioner.

In another highway accident case the plaintiff was nonsuited by agreement, and the case was disposed of without expense to the city.

A highway accident case for injuries received in Washington street by reason of a hole in snow and ice at a catch basin, whereby it was claimed an accident was caused, resulting in the death of the person injured, was tried before a jury of the superior court. The amount claimed was \$5,000. A verdict was given against the city for \$1,000. On the application of the city, the verdict was reduced by the court to \$900, and then entirely set aside. The case was reported to the full bench of the supreme court and was argued in November. No decision has yet been given.

A petition in the superior court for the abatement of taxes was dismissed by agreement without costs.

An action brought for damages to property in Hall street, claimed to have been caused by the filling of a water course in an adjoining estate with ashes and other refuse by the board of

health, was argued last year before the full bench of the supreme court, after a verdict of a jury in the superior court for \$400 against the city, and has been decided in favor of the city.

An action long pending in the superior court, brought by the commonwealth against the city for expenses incurred in the support of paupers settled in Somerville, was adjusted for \$737.75, being much less than the amount claimed.

An action brought in the superior court by the city, against a drain layer on his bond, was settled for the full amount of the judgment and costs previously paid by the city.

An action brought against the city of Newton, for expenses incurred in the support of a pauper, was tried in the superior court, and judgment given in favor of the defendant. By agreement previously made with the city of Boston, full reimbursement was made to this city.

*Alewife Brook Improvement.* As the result of many hearings before legislative committees and the metropolitan park commission, the legislature passed an act, chapter 529 of the year 1907, for the purification of Alewife brook and adjacent drainage areas. The cost to the cities and towns concerned is not to exceed \$125,000, and is to be apportioned according to the following percentages: Cambridge, 47; Arlington, 24; Belmont, 17; Somerville, 12.

*Boston, Lowell, and Lawrence Electric Railroad Company.* Hearings were given by the Massachusetts railroad commissioners on the petition of this company for a location between Lowell and Boston through Somerville. From information obtained at the hearings, it appeared that the company intended to erect a structure here which would be a detriment to property in its vicinity, and that the operation of the railroad would give the people of this city little in the way of facilities for travel. I joined in the opposition to the petition. The commission refused to grant the petitioner a certificate of location.

Very respectfully,

FRANK W. KAAAN,

City Solicitor.

## REPORT OF THE CITY CLERK.

OFFICE OF THE CITY CLERK, }  
January 1, 1908. }

To the Honorable, the Mayor, and the Board of Aldermen:—

Gentlemen,—The following is respectfully submitted as the thirty-sixth annual report of the city clerk of the city of Somerville, and is for the year ending December 31, 1907:—

The receipts and payments were as follows:—

### Receipts.

Balance from year 1906, being for dog licenses issued in December, 1906:—		
2 males at \$2.00 . . . . .	\$4 00

Recording and issuing liquor licenses, 35 at \$1.00 . . . . .		35 00	
Permits to transport liquors, 23 at \$1.00 . . . . .	\$23 00		
14 refused, but money not called for . . . . .	14 00		
1 granted in 1906, issued and paid in 1907 . . . . .	1 00		
	\$38 00		
6 refused in 1906, paid back in 1907 . . . . .	6 00		
		32 00	
Interest on deposits . . . . .		12 49	
			1,783 49
Total receipts . . . . .			\$6,717 69

### Payments.

To Joseph O. Hayden, county treasurer, June 1 and December 1, receipts for dog licenses from December 1, 1906, to November 30, 1907, both inclusive:—			
1,579 males at \$2.00 . . . . .		\$3,158 00	
295 females at \$5.00 . . . . .		1,475 00	
83 spayed at \$2.00 . . . . .		166 00	
5 breeders' licenses at \$25.00 . . . . .		125 00	
		\$4,924 00	
Less city clerk's fees, 1,962 at \$.20 . . . . .		392 40	
			\$4,531 60
To the city treasurer, monthly:—			
City clerk's fees for issuing and recording dog licenses, 1,962 at \$.20 . . . . .		\$392 40	
All the receipts above specified, except for dog licenses . . . . .		1,783 49	
			2,175 89
Total payments . . . . .			\$6,707 49
Balance January 1, 1908, being for dog li- censes issued in December, 1907:—			
2 males at \$2.00 . . . . .		\$4 00	
1 female at \$5.00 . . . . .		5 00	
1 spayed at \$2.00 . . . . .		2 00	
		\$ 11 00	
Less city clerk's fees paid to the city treasurer, 4 at \$.20 . . . . .		80	
			\$10 20

**Licenses and Permits.**

Besides the licenses mentioned in the foregoing list of receipts, licenses and permits have been granted by the board of aldermen and issued without charge, as follows:—

Amusements, Somerville High School Athletic Association, ball games (fees remitted) . . . . .	24
Auctioneers (to veterans of the Civil War) . . . . .	4
Innholders . . . . .	3
Common victuallers . . . . .	54
Common victuallers, transferred to new owners . . . . .	4
Drain layers . . . . .	8
Drain layers, bond not filed . . . . .	2
Newsboys . . . . .	91
Junk collectors, to cry calling in streets . . . . .	45
To cry goods in streets . . . . .	39
To cry aloud in streets to announce calling:—	
Umbrella menders . . . . .	2
Umbrella mender and locksmith . . . . .	1
To ring bell in streets:—	
Ice cream venders . . . . .	5
Scissors sharpeners . . . . .	8
To set up and use engines:—	
Electric motors, 12 licenses for 17 motors . . . . .	17
Gas engines . . . . .	10
Steam engines . . . . .	3
To erect or use buildings for gasoline . . . . .	6
To blast rock or stone . . . . .	3
To maintain projections over sidewalks:—	
Awnings . . . . .	7
Banner . . . . .	1
Barber's pole . . . . .	1
Bay windows . . . . .	2
Electric lights . . . . .	2
Flag and flag pole . . . . .	1
Signs . . . . .	18
To set and maintain hitching post . . . . .	1
To erect guy post and cable . . . . .	1
To lay pipe under sidewalk . . . . .	1
To move buildings through streets . . . . .	3
To Salvation Army to parade, sing, and play on musical instruments in streets . . . . .	2
To hold open-air meetings . . . . .	1
For children to take part in entertainment . . . . .	1
To keep lying-in hospital . . . . .	1

**Gas and Pole Locations.**

The Cambridge Gas Light Company and the Charlestown Gas and Electric Company have been granted permission to lay gas mains in sundry streets.

Permission has also been given the New England Telephone and Telegraph Company of Massachusetts and the Edison Electric Illuminating Company of Boston to erect poles for the support of wires in various streets.

In every case of such permission to use the streets, a suitable agreement for the protection of the interests of the city must be filed with the city clerk before the order can become operative.

**Births.**

Number of births reported by physicians and midwives for 1907:—

Males . . . . .	860
Females . . . . .	770

A canvass of the city is at present being made under the direction of the city clerk, as required by section 5, chapter 29, of the Revised Laws, to ascertain the facts required for record relative to all children born therein during the year.

As the information derived from such canvass will not be available in time sufficient for its incorporation in this report, a statement in full of the births of 1907 will be given in the city clerk's report for the year 1908.

**Marriages.**

Number of intention certificates issued in 1907 . . . . .	835
Less than previous year . . . . .	14
Marriages registered . . . . .	890
Less than previous year . . . . .	6
Both parties American . . . . .	470
Both parties foreign . . . . .	208
American groom and foreign bride . . . . .	118
Foreign groom and American bride . . . . .	94
	<hr/>
	890 couples
First marriage of . . . . .	1,595
Second marriage of . . . . .	178
Third marriage of . . . . .	7
	<hr/>
	890 couples

**Deaths.**

(Exclusive of still-births.)

Number of deaths in Somerville in 1907 . . . . .	997
Less than previous year . . . . .	7
Males . . . . .	455
Females . . . . .	542
	<hr/>
	997
Under ten years of age . . . . .	238
10 and under 20 years of age . . . . .	31
20 and under 30 years of age . . . . .	66
30 and under 40 years of age . . . . .	55
40 and under 50 years of age . . . . .	75
50 and under 60 years of age . . . . .	111
60 and under 70 years of age . . . . .	152
70 and under 80 years of age . . . . .	165
80 and under 90 years of age . . . . .	90
90 years of age and over . . . . .	14
	<hr/>
	997
Age of oldest person deceased . . . . .	100 yrs. 9 mos. 4 dys.
Born in Somerville . . . . .	233
Born in other places in the United States . . . . .	417
Of foreign birth . . . . .	338
Birthplace unknown . . . . .	9

---

 997

The number of still-births recorded during the year was seventy-five. In addition to the above, 164 deaths which occurred elsewhere were recorded in Somerville, almost the entire number of persons deceased having been residents of this city.

### Voting Precincts.

In my report of last year, I called attention to the fact that precinct two of ward seven had nearly reached the legal limit of 1,000 voters. By an order of the board of aldermen approved March 15, 1907, this precinct was divided into two precincts by a line beginning at the Cambridge line, and following the middle line of Cameron avenue in a northeasterly direction to Holland street, and thence in the same general direction across Holland street, through the proposed street, across land of the city of Somerville known as the Holland-street ledge, to Broadway, across Broadway, and following the middle line of Packard avenue to the Medford line.

The southerly of these two new precincts is numbered two, and the northerly three. A room in the Hodgkins schoolhouse on Holland street is used for the polling place for precinct two, and a room in the Lincoln schoolhouse on Broadway for precinct three.

Precinct one of ward five has at present the largest number of registered voters of any precinct in the city, there being 863 names on the list at the close of registration November 20, 1907.

When a re-division of the ward is made, it would seem advisable to rearrange the existing precinct lines so that the number of precincts would remain unchanged and the number of voters in each precinct be more nearly the same.

It does not appear necessary, however, to make any change in this precinct the present year.

## ORDINANCES.

Somerville, January 1, 1908.

The following ordinances have been adopted since the printing of the annual reports for the year 1906:—

### No. 63.

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. Section one of chapter six of the Revised Ordinances of 1900 is hereby amended by inserting the word seven after the word hundred in the fifth line, and inserting the word first in place of the word fifteenth in the sixth line, so that the section as amended shall read as follows:—

Section 1. All taxes shall be payable on or before the thirty-first day of October of each year, and interest at the rate of six per centum per annum shall be charged from said thirty-first day of October upon all taxes assessed for the year nineteen hundred seven and subsequent years, which shall remain unpaid on the first day of November next ensuing, until the same shall be paid; and all taxes remaining unpaid on the first day of December next ensuing, the collector shall proceed to collect by due process of law.

Section 2. This ordinance shall take effect upon its passage.

*Approved May 10, 1907.*

### No. 64.

#### **An Ordinance to Regulate the Rate of Speed of Automobiles or Motor Cycles.**

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. No person shall permit or cause an automobile or motor cycle to go at a greater rate of speed than eight miles an hour on any portion of Medford street, from Washington street to Cross street, and of Cross street in this city.

Section 2. Any person violating the provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each offence.

Section 3. This ordinance shall take effect upon its passage, and shall be effective upon publication in any newspaper published in this city.

*Approved May 10, 1907.*

### No. 65.

#### **An Ordinance to Amend Section 7 of Chapter 22 of the Revised Ordinances of 1900 as Amended by an Ordinance Approved May 23, 1902, Entitled "Electric Wires."**

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. Section seven of chapter twenty-two of the Revised Ordinances of 1900 as amended by an ordinance approved May 23, 1902, is hereby amended by adding thereto the following words:—

The poles shall be kept well painted, of a uniform color, and in good condition to the satisfaction of said commissioner. The name of the owner, with a special number for each pole and owner, shall be distinctly painted in white letters upon a dark background on every pole, about

seven feet from the ground, or the owners of the pole and all other persons and corporations having authority to attach wires, cross bars or other things thereto, shall be otherwise designated thereon by words or figures to the satisfaction of said commissioner.

Section 2. This ordinance shall take effect upon its passage.

*Approved November 15, 1907.*

### No. 66.

#### **An Ordinance Regulating the Use of Streets by Vehicles.**

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. Every vehicle, except street railway cars, bicycles, and tricycles, which shall be used within the city of Somerville for the conveyance of persons or goods of any description for hire from place to place within the city, before being so used, shall be licensed by the board of aldermen, and every vehicle so used for the conveyance of goods shall have placed upon the outside and upon each side of the same the name of the owner and the number of the license in plain, legible letters and figures of not less than one and one-half inches in size, and so that the same may be distinctly seen.

Section 2. Upon each side of each hackney carriage so licensed there shall be fitted a lamp, which lamp shall always be kept lighted at night when the carriage is in use or waiting for passengers, and upon the glass covering of each of said lamps there shall be painted in black the number of the license in Arabic characters not less than one inch in size, and such numbers shall be preceded by the letter "S," not less than one inch in size.

Section 3. Every hackney carriage shall carry its license so that it shall be easily accessible to passengers.

Section 4. No person shall set up or use or have charge of any hackney carriage which shall be used within the city of Somerville for the conveyance of persons for hire from place to place within the city, unless he is licensed thereto by the board of aldermen, nor unless the carriage is licensed, marked, and numbered as provided in sections one and two, and carries its license as provided for in section three.

Section 5. No person having charge of a hackney carriage shall solicit passengers, except by a motion of the hand, unless he is on or within ten feet of such vehicle.

Section 6. No person having charge of a hackney carriage shall solicit passengers in any public way or place within the city, unless he is licensed by the board of aldermen.

Section 7. The board of aldermen reserves the right to revoke any license at its discretion. If any person other than the owner or lessee shall take out a license for any such vehicle, he shall be liable to have his license revoked, and if any licensee shall cease to be an owner or lessee, his license shall be null and void, and he shall immediately surrender the same to the board of aldermen.

Section 8. The city clerk shall receive for the use of the city the fee of one dollar for every license so granted and for every license granted for a wagon stand, and shall keep a record of the same and of all licenses granted.

Section 9. Each license so granted shall expire on the first day of May next after the date thereof, and no license shall be sold, assigned, or transferred without the consent of the board of aldermen.

Section 10. No vehicle shall be set up in front of any premises without the written consent of the owner or the agent of the owner and the occupant of said premises.

Section 11. The person in whose name the license is taken out for any such vehicle shall for all the purposes of this rule be considered as the owner of the same, and liable to all the forfeitures and penalties

herein contained, unless, upon the sale of such vehicle, written notice be given to the city clerk and the license returned to him forthwith.

Section 12. No owner, driver, or other person having charge of any such vehicle shall suffer the same when attached to a horse to stop in a street without some proper person to take care of the same, unless said horse is properly and securely fastened; but no person shall be deemed to have violated this provision who is a physician visiting the sick or who is delivering goods or taking orders at any house, store, building, or tenement.

Section 13. No person having charge of any hackney carriage shall receive or permit to be placed therein, or convey in or upon the same any person sick with any contagious disease, or the body of any person who has died of any such disease.

Section 14. Every vehicle used, or to be used, for the conveyance of persons for hire, except street railway cars, bicycles, and tricycles, shall be deemed a hackney carriage within the meaning of this ordinance.

Section 15. Whoever violates any of the provisions of this ordinance shall be punished by a fine not exceeding twenty dollars for each offence.

Section 16. This ordinance shall take effect May 1, 1908.

*Approved December 13, 1907.*

#### **No. 67.**

### **An Ordinance Regulating the Erection and Maintenance of Garages for Automobiles.**

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. No person shall erect or use for a garage any building or structure unless licensed by the board of aldermen after a public hearing, and only to the extent so licensed.

Section 2. The term "garage" shall be understood to mean a place for keeping or storing an automobile or several automobiles. The term "automobile" shall be understood to mean a vehicle propelled by any power other than muscular, except steam railroad cars and engines, and street railway cars and vehicles running on less than four wheels.

Section 3. The provisions of this ordinance shall not apply to buildings or structures in use for a garage at the time of its passage.

Section 4. Whoever violates a provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each offence.

Section 5. This ordinance shall take effect upon its passage.

*Approved December 13, 1907.*

#### **No. 68.**

### **An Ordinance to Amend Section 15 of Chapter 16 of the Revised Ordinances of 1900, Entitled, "Sewers."**

*Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—*

Section 1. Section fifteen of chapter sixteen of the Revised Ordinances of 1900 is hereby amended by adding thereto the following:—

No gasoline or other explosive or inflammable substance shall be caused or allowed to enter directly or indirectly any common sewer or other public drain.

Section 2. Whoever violates a provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each offence.

Section 3. This ordinance shall take effect upon its passage.

*Approved December 13, 1907.*

FREDERIC W. COOK,  
City Clerk.
