INDEX TO GENERA, SPECIES, ETC., DESCRIBED OR REFERRED TO IN THE PROCEEDINGS AND JOURNAL	189

(iii)

61835

“Who wants a lock without a key, a ship without a rudder, a binnacle without a compass, a check without a signature, a book without an index.”

Adapted from OLIVER WENDELL HOLMES.

THE publications of the Academy are the means by which it holds communication with scientific men throughout the world, and their maintenance is one of the most important functions of the society.

The first series of the JOURNAL, in octavo, was begun in 1817, five years after the foundation of the Academy, the first number being placed on the table at the meeting of May 20th of that year. The series was continued at irregular intervals for a period of twenty-five years, the eighth and concluding volume being published in 1842.

To secure prompt issue of communications made at the weekly meetings the publication of PROCEEDINGS was begun in March, 1841. The sixty-second volume, with which this Index terminates, was completed in 1911.

The second series of the JOURNAL, in quarto, is designed for the publication of papers requiring more elaborate illustration than can be supplied in the octavo form. The first volume was issued in December, 1847, and the thirteenth, included in the Index, was distributed in September, 1908.

It has been considered fitting, as one of the incidents commemorative of the centenary of the Academy, that access to the scientific contents of these eighty-three volumes be facilitated by the issue of an Index to the entire series.

Other serials, published under the auspices of Sections of the Academy, but not indexed, are as follows:

THE AMERICAN JOURNAL OF CONCHOLOGY, Volumes III-VII, 1867-1872. Volumes I and II were published by the editor, George W. Tryon, Jr.

MANUAL OF CONCHOLOGY. First Series, X, Parts 2, 3 and 4-XVII. Second Series, IV, Parts 2, 3 and 4-XXI. The earlier volumes were published by Mr. Tryon. The work, bequeathed by him to the Conchological Section of the Academy, has since been continued by Henry A. Pilsbry, Sc. D.

TRANSACTIONS OF THE AMERICAN ENTOMOLOGICAL SOCIETY (Entomological Section of the Academy), Volumes VI, 1877, to XXXVII, 1912. The Society united with the Academy as a Section in 1875.

ENTOMOLOGICAL NEWS AND PROCEEDINGS OF THE ENTOMOLOGICAL SECTION OF THE ACADEMY. I, 1890-XXIII, 1912.

Because of the frequent change of generic names it has been considered essential to the usefulness of the Index to provide alphabetical references to the specific designations. In the compilation questions of synonymy have not been considered. Except where errors are manifestly typographical, no attempt has been made to correct the orthography of authors.

EDWARD J. NOLAN,
Recording Secretary.

The Academy of Natural Sciences of Philadelphia,
March 27, 1913.

DATES OF PUBLICATION.

AN effort has been made to ascertain the time of issue of the several parts of the JOURNAL and PROCEEDINGS not otherwise dated, and with this end in view the minutes, correspondence, and accessions lists of the Academy have been diligently searched. It is to be regretted that the result is not complete, but it is here given in the hope that it may establish dates of publication, at least approximately, and help to determine questions of priority arising in connection with the scientific contributions to the three series now indexed.

It may be assumed that the undated portions appeared between the dates immediately preceding and following the omissions.

When a date is established by a letter of acknowledgment it is necessarily later than the actual distribution of the part. While therefore, the dates of publication were frequently earlier than those here given, they were certainly never later.

The entries referring to the publication of the first series of the JOURNAL, Volumes II-VI, were compiled by John S. Phillips and published in the first volume of the PROCEEDINGS. Many of the contributions to the second series of the JOURNAL, when supplied to the authors in advance, were dated in the table of contents, this being uniformly the case since the publication of Volume VI. The issue to authors of separate copies of papers from the PROCEEDINGS also antedate the publication of the numbers of which they form a part, the record being printed on the covers of the separata but not otherwise preserved.

Acknowledgment is due the Assistant Librarian, William J. Fox, for the compilation and arrangement of the following list.

JOURNAL, 1817-1845.

- Vol. I, Part 1. Presented to the Academy meeting, May 20, 1817.

 - 3 (pages 93 et seq.). Ditto, March 14, 1871.

The dates of printing of the signatures of the subsequent volumes will be found on the reverse of the title pages.

LIST OF CONTRIBUTORS

With Titles of their Contributions

The first series of the JOURNAL is indicated by a small j and small Roman numerals; the PROCEEDINGS by a capital P and abbreviated date, and the second series of the JOURNAL by a capital J and Roman numerals.

- AARON, CARRIE B. Biographical notice of Robert Henry Lamborn. P '01, 486
- AARON, S. FRANK. On some new Psocidæ. P '86, 13
- ABADDIE, E. A. On crania from New Mexico. P '57, 179
- ABBOTT, CHARLES CONRAD. Descriptions of new species of American freshwater fishes. P '60, 325
- Description of a new species of *Astroscopus* Brev. in the museum of the Academy of Natural Sciences of Philadelphia. P '60, 365
- Description of a new species of *Exocetus* from Chili. P '60, 472
- Descriptions of four new species of North American Cyprinidæ. P '60, 473
- Description of new species of apodal fishes in the museum of the Academy of Natural Sciences of Philadelphia. P '60, 475
- Descriptions of two new species of *Pimelodus*, from Kansas. P '60, 568
- Observations on *Cottus copei* Abbott. P '61, 15
- Notes on the habits of *Aphredoderus sayanus*. P '61, 95
- On *Cyprinus corporalis* Mitch., referring it to the genus *Semotilus* Raf. P '61, 154

INDEX TO GENERA, SPECIES, ETC.,

DESCRIBED OR REFERRED TO

JOURNAL, first series, Volumes I-VIII, is indicated by small, heavy-faced j and small Roman numerals.

JOURNAL, second series, Volumes I-XIII, by capital J and large Roman numerals.

PROCEEDINGS, 1841 to 1910 inclusive, by capital P with abbreviated date.

When a name occurs frequently in a paper, the individual pages are not given, the limits of the contribution being indicated.

Where a species or genus is described as new, the page numeral is in heavy-faced type.
