NATURE.

BY R. C. WATERSTON,

I LOVE thee, Nature—I love thee well
In sunny nook and twilight dell
Where birds, and beasts and blossoms dwell,
And leaves and flowers;
And winds in low, sweet voices tell
Of happy hours.

I love thy clear and running streams,
Which mildly flash with silver gleams,
Or darkly l'e, like shadow dreams,
To bless the sight;
While every wave with beauty teems
And smiles delight.

I love thy forest deep and lone,
Where twilight shades are ever thrown,
And murmuring winds with solemn tone,
Go slowly by;
Sending a peal like Ocean moan,
Along the sky.

I love to watch at close of day,
The heavens in splendor melt away
From radiant gold to silver grey,
As sinks the sun;
While stars along their trackless way,
Come one by one.

I love, I know not which the best,
The little wood-bird in its nest;
The wave that mirrors in its breast,
The landscape true,
Or the sweet flower by winds caressed
And bathed in dew.

They are all to my bosom dear,
They all God's messengers appear!
Preludes to songs that spirits hear,
Mute prophecies;
Faint types of a resplendent sphere,
Beyond the skies.

The clouds—the mist—the sunny air,
All that is beautiful and fair,
Beneath, around and everywhere,
Were sent in love,
And some Eternal truth declare,
From Heaven Above.

THE GRAVES OF A HOUSEHOLD.

BY MRS. HEMANS.

THEY grow in beauty side by side.
They filled our house with glee,
Their graves are severed far and wide,
O'er stream, and mount, and sea.

The same fond mother bent at night
O'er each fair sleeping brow,
She had each folded flower in sight;
Where are those dreamers now!

The sea, the lone blue sea hath one,
He lies where pearls lie deep;
He was the loved of all, yet none
O'er his lone grave may weep.

One fell where Spanish vines are dressed
Above the noble slain;
He wrapped his colors round his breast,
In a blood-red field of Spain.

One 'midst the forests of the West,
By a dark stream is laid;
The Indian knows his place of rest,
Far in the forest shade.

And one o'er her the myrtle sheds
Its leaves by soft winds fanned,
She fuled 'midst Italian flowers,
The last of that fair band!

THE HOUSE MIT A BIG CHIMNEY.—A few years ago, the proceedings of the Washington Monument Society, at Washington, received a sudden impetus. Among other measures adopted to procure sufficient funds for the completion of the edifice, was that of appointing an agent in each congressional district throughout the United States, who were furnished with lithographs of the future monument, which were presented to such gentlemen as chose to subscribe.

One of these gentlemen called one day at the house of a very wealthy farmer in the upper end of Dauphin county, Pa. The whole family were soon assembled to look at the beautiful pictures. In the mean time the agent exerted all his influence to induce the steady old German to "plank the tin." He portayed the service of Washington to his country; he dwelt in glowing terms upon the gratiude we should feel for them.

Suddenly the farmer broke silence:

"What is all this?"

The agent began again—

"You know who Washington was?"

"Yes, he was the first President; he licked the British, didn't he?"

"Yes, that's the man; and this monument is to be erected as a fitting testimonial of the eternal gratitude of his countrymen."

The anticipated subscriber studied the plate attentively.

"Well," said he, "I wont pay anything towards it; I don't see no use to build a house mit such a big chimney."

The agent immediately vamoosed.

SNOODLEDKE lives in the county, and recently commenced going to singing-school. He heard the master say something about "two beats in a measure," when he eagerly remarked—"if he means a half-peck measure, the *beets* must be a darned sight bigger than the ones we raise, for it takes a dozen of them to make a measure."

"SAMMY, my son, how many weeks belong to the year?"

"Forty-six, sir."

"Why, Sammy, how do you make that out?"

"The other six are *Lent*."

"Mother put that child to bed; he's getting too for'ard."

SAYS the Pioneer: Some time since, a politician who had been in Congress, serving his "sovereigns in the West," made use of the following language, while addressing his constituents from a stump: "—— the laws, the American Eagle and the Constitution! O, my fellow-countrymen! that this *bosom was glass*, that you could look into this bosom and see the purity of my intentions—the integrity of my motives, and the ardent desire I have for the public welfare." At this point of his discourse a rascally boy poked his head up from the crowd, and asked the speaker if a *pain in his stomach* wouldn't answer as well."

DENTAL.—The Andover Advertiser relates that a short time since, a person called at a dentist's door and inquired for the doctor. The dentist happening to be out at the time, his lady went to the door, and found a man there with his face in a bandage, apparently suffering with the toothache. She remarked to him that he probably wished to have to a tooth extracted. "No!" said he, "I want to have 'em PULLED OUT."

A BEAUTIFUL young lady having invited a plain elderly gentleman to dance with her, he was astonished at the condescension, and believing that she was in love with him, in a very pressing manner desired to know why she had selected him from the rest of the company.

"Because, sir," replied the lady, "my husband commanded me to select such a partner as should not give him cause for jealousy."

EXCHANGE OF COMPLIMENTS.—A lady of not very amiable temperament, rudely discharged her servant girl. "I will not only send you away," said she, "but I will not even allow you to refer to me for a character."

"Thank you, ma'm," said the girl, "the only favor I can ask of you is, that you will never mention my having lived with you, for if you do, I fear no one else will give me a place."

IN India, when a horse can, and will not draw instead of whipping, spurring or burning him, as is practiced in most civilized countries, they quietly get a rope and attaching it to one of the fore feet, one or two men take hold of it, and advance a few paces ahead of the horse, pulling their best. No matter how stubborn the animal may be, a few doses of such treatment effect a perfect cure.

A YOUNG gentleman the other day asked a young lady what she thought of the marriage state in general?" "Not knowing, can't tell," was the reply, "but if you and I were to put our heads together, I could give you a definite answer."

A YOUNG dandy, about starting on a sea voyage, went to purchase his life preserver.

"Oh, you will not want it," suggested the clerk; "bags of wind won't sink."

"IS THAT dog of yours a cross breed?" asked a gentleman of a canine vender.

"No, zur," was his reply; his mother was a gentle, affectionate cretur'."

The gentleman left.

HENRY McNALLY, No. 183 Washington street,

15 1m (between Battery and Front streets.)

BATES' SUPERIOR

UPLAND BELL CRANBERRY.

THE PROPRIETOR has been induced to present this Circular to the public on account of the numerous applications from distinguished Horticulturists, Amateurs, Land Agents and others, in different parts of the Union, personally and by letter, wishing information in regard to cultivating this valuable fruit upon ordinary upland, and would respectfully invite the attention of Gardeners and Fruit Growers, to such facts only as have come directly under our own experience and observation.

Soil, Propagation, Management, &c.—Having tested the plants thoroughly in all kinds of soils, we have no particular choice in their selection. We know of no kind of soil in which they would not be likely to grow well if managed according to our method. We should not choose a perfect clay soil, extremely liable to bake, nor a perfect sand, containing no power of vegetation.

In extensive field culture, the Bell Cranberry flourishes well in soils varying from moist to dry. No great degree of moisture is necessary, providing it is more or less uniform. Any soil that the strawberry can be grown on to advantage, is well adapted to the growth of this plant, but no animal or vegetable manure should be used, as the fruit draws most of its nourishment from the atmosphere. The vines propagate by runners, like the Strawberry, and will flourish in almost any soil and ocation, under good management. Where the land is rich and liable to grass and weeds, we prepare the ground by removing the top soil at a sufficient depth to prevent their growth. This may be easily done by plowing the sod, and removing the top soil in carts or otherwise. The object in doing this is to make the soil so poor that nothing will grow to obstruct the growth of the Cranberry Plants, bearing this in mind, that I am fully satisfied, from long experience in the business, that the Cranberry derives its nourishment only from the air and moisture.

If the land is poor, so that grass and weeds will not vegetate when it may be plowed and harrowed without other preparation. If these rules are followed there is no difficulty whatever in their cultivation. Persons having a garden of moderate size, and wishing to raise their own Cranberries of a superior quality can do so by obtaining a few plants, and with a small amount of labor at the commencement, will find their cultivation both easy and profitable.

Persons wishing for Plants can have their supply of the subscriber. The Plants will be carefully packed in meadow moss, and well boxed, which will enable them to go to a great distance in a fresh state.

The proper time for Fall transplanting is October and November; for Spring, from the opening of the same till about the 25th of May. Persons wishing for Plants, are requested to order as early as the first of September, for Fall transplanting and during the winter for Spring. 15

ADVERTISEMENTS.—A limited number of Advertisements will be inserted at the following rates: For one square of eight lines, per month, $6. For business notices of five lines or less per month, $4. A slight reduction will be made to regular advertisers.

Love and Self-Love.

It was during the very brightest days of the republic of Venice, when her power was in its prime, together with the arts which have made her, like every Italian state, celebrated all over the world—for Italy has produced in poetry and painting, and in the humbler walk of musical composition, the greatest of the world's marvels—that Paolo Zustana was charged by the Marquis di Bembo to paint several pictures to adorn his gallery. Paolo had come from Rome at the request of the Marquis, who had received a very favorable account of the young artist. Paolo was handsome, of middle height, dark, and pale; he had deep black eyes, a small mouth, a finely-traced mustache, a short curling beard, and a forehead of remarkable intellectuality. There seemed a slight savageness in his manner, a brief, sharp way of speaking, a restlessness in his eye, which did not increase the number of his friends. But when men knew him better, and were admitted into his intimacy—a very rare occurrence—they loved him.

Then, he was generous-hearted and noble: his time, his purse, his advice, were at all their service. But his soul was in his art. Night and day, day and night, he seemed to think of nothing but his painting. In Rome he had been looked upon as mad, for in the day he was content with remaining close at work in his master's studio, but at night he invariably shut himself up in an old half-ruined house, in the outskirts, where none of his friends were ever invited, and no man ever penetrated, and no women save an old nurse, who had known him from a child. It was believed, with considerable plausibility, that the artist had a picture in hand, and that he passed his nights even in study. He rarely left this retreat before mid-day, and generally returned to his hermitage early, after a casual visit to his lodgings, though he could not occasionally refuse being present at large parties given by his patrons.

On arriving in Venice he resumed his former mode of life. He had an apartment at the palace Bembo; he took his meals there, but at nightfall, when there was no grand reception, he drew his cloak, put on his mask, and, with his sword hilt close to his hand, went forth. He took a gondola until he reached a certain narrow street, and then, gliding down that, he disappeared in the gloom caused by the lofty houses. No one noticed much this mode of life; he did his duty, he was polite, affable, and respectful with his patron; he seemed gallant to the ladies, but no more. He did not make the slightest attempt to gain the affections of those around him. All this passed in general without much observation.

Still there was one person whom this eccentricity of character—all that has a stamp of originality is called eccentric—caused to feel a deep interest in him. The Marquis had a daughter, married at sixteen, from interested motives, to the old uncle of the Doge, lately dead. Clorinda was a beautiful widow of one-and-twenty, who rich, independent, of a determined and thoughtful character, had made up her mind to marry once more, not to please relations, but herself. From the first she noticed Paolo favorably; he received her friendly advances respectfully, but coldly, and rarely stopped his labors to converse. She asked for lessons to improve her slight knowledge of painting; he gave them freely, but never added a single word to the necessary instructions. He seemed absorbed in his art. One day Clorinda stood behind him; she had been patiently watching him for an hour; she now came and took up her quarters in the gallery all day, with her attendant girl, reading or painting. Paolo had not spoken one word during that hour. Suddenly Clorinda rose and uttered the exclamation,

"How beautiful!"

"Is it not so, sir?"

"Most beautiful!" she replied, astonished both at the artist's manner and the coldness with which he addressed his own creation.

"I am glad you admire it," said Paolo, laying down his pencil and folding his arms as he looked at the picture—Cupid and Psyche—with a look of rapture.

It was the first time [illegible]—and [illegible] sun; with a white, small, but exquisitely-shaped forehead; with deep blue eyes, fixed in admiring love on the tormented god; with cheeks on which lay so softly the bloom of health that it seemed ready to fade before the breath from the painting; with a mouth and chin moulded on the same Grecian statue, she thought she had never seen anything so divine.

"Ah!" she said, sighing, "you painters are dreadful enemies of woman. Who would look at reality after gazing on this glorious ideal?"

"It is reality," said the painter. "I paint from memory."

"Impossible! You must have combined the beauty of fifty girls in that exquisite creation."

"No!" said the artist, gravely; "that face exists. I saw it in the mountains of Sicily. I have often painted it before—never so successfully."

"I would give the world to gaze on the original," replied Clorinda. "I adore a beautiful woman. It is God's greatest work of art."

"It is, signora," replied Paolo, and he turned to work.

Women born in the climate of Italy, under her deep blue sky, and in that air that breathes of poetry, painting, music and love, are not guided by the same feelings as in our colder and more practical north. Clorinda did not wait for Paolo's admiration; she loved him, and every day added to her passion. His undoubted genius, his intellectual brow, his noble features and mien, had roused her long pent-up and sleeping affections. She was herself a woman of superior mind, and had long revelled in the delights of Petrarch, Dante, Ariosto, and Boccaccio. Now, she felt. How deeply, she alone knew. But Zustana remained obstinately insensible to all her charms; to her friendship, and her condescending tone, as well as to her intellect and beauty.

He saw all, save her love, and admired and respected her much. But there was—at all events, at present—no germ of rising passion in his heart.

It was not long before she began to remark his early departure from the palace, his mysterious manner of going, and the fact that he never returned until the next day at dawn, which saw him at his labors. The idea at once flashed upon her mind that he had found in Venice some person on whom to lavish the riches of his affection, and that he went every evening to plead his passion at her feet. Jealousy took possession of her. She spent a whole night in reflection, she turned over in her mind every supposition; and she rose, feverish and ill. That day, pleading illness, she remained in her room, shut up with her books.

About an hour after dark, Paolo, his hat drawn over his eyes, his cloak wrapped around him, and his mask on, stepped into a gondola which awaited him, and started. Another boat lay on the opposite side of the canal, with curtains closely drawn. Scarcely had the artist's been set in motion than it followed. Paolo, who had never, since his arrival in Venice, had been watched or followed, paid no attention to it. The two gondolas then moved side by side without remark, and that of Zustana stopped as usual, allowed the artist to land, and continued on its way. A man, also wrapped in a cloak, masked, and with a hat and plumes, leaped out also from the other gondola, and, creeping close against the wall, followed him. The stranger seemed, by his gazing at the dirty walls and low shops—chiefly old clothes, rag shops, and warehouses devoted to small trades—very much surprised, but, for fear of losing the track of the other, followed closely.

Suddenly Zustana disappeared. The other moved rapidly forward in time to observe that he had entered a dark alley, and was ascending with heavy step a gloomy and winding staircase. The stranger followed cautiously, stopping in time with Paolo, and feeling his way with his hands. Zustana only halted when he reached the summit of the house. He then placed a key in a door—a blaze of light was seen, and he disappeared, locking the door behind him. The man stood irresolute, but only for a moment. The house was built round a square court, like a well: there was a terraced roof. Creeping noiselessly along the stranger was in the act of [illegible] like a malefactor, to the [illegible] whose the windows of the rooms occupied by Zustana were distinctly visible.

A groan, a sigh from the stranger, who sank behind a kind of pillar, revealed the Countess. The groan, the sigh, was echoed by the [illegible] very strange [illegible]

[illegible] was a beautiful young girl, simply and elegantly dressed—the original of the Pysche which she had so much admired. Now she understood all; that look, which she had thought the consciousness of his own beautiful creation, was for the beloved original.

The child, a beautiful boy nearly a year old, was brought to Zustana to kiss. Now, all his savageness was gone; now, he stood no longer the artist, the creator, the genius of art; but the man. He smiled, he patted the babe upon the cheek, he let it clutch his fingers with its little hands, he laughed outright a rich, happy, merry, ordinary laugh; and then, turning to the enraptured mother, embraced her once more, and drew her to a table near the opened window.

"What progress to-day?" asked the painter, gaily.

"See," replied the young mother, handing him a copy book, and speaking in the somewhat harsh dialect of a Sicilian peasant girl. "I think, at last, I can write a page pretty well."

"Excellent," continued the painter, smiling. "My Eleanora is a perfect little fairy. A prettier handwriting you will not see. I need give no more lessons."

"But the reading," said the young girl," speaking like a timid scholar; "I shall never please you there."

"You always please me," exclaimed Zustana; "but you must get rid of your accent."

"I will try," said Eleanora earnestly, and taking up a book she began to read, with much of the imperfection of a young school-girl, but so eagerly, so prettily, with such an evident desire to please, that, as she concluded her lesson, the artist clasped her warmly to his bosom, and cried with love in his eyes and in his tone, "My wife, how I adore you!"

One summer morning a young man, with a knapsack on his back, a pair of pistols in his belt, a staff to assist him in climbing the hills and mountains, and in crossing the torrents, was standing on the brow of a hill overlooking a small but delicious plain. It was half meadow, half pasture land; here, trees; there, a winding stream, little hillocks, green and grassy plots; beyond, a lofty mountain, on which hung a sombre-tinted pine forest; the whole illumined by the joyous sun of Sicily, which flooded all nature, and spread as it were a violet and metallic veil over her. After gazing nearly half an hour at the delicious landscape, the young man moved slowly down a winding path that led to the river side. Suddenly he heard the tinkling of sheep-bells, the barking of dogs, and looked around to discover whence the sound came. In a small corner of pasture-land, at no great distance from the stream, he saw the flock, and seated beneath the shadow of a huge tree, a young girl.

He advanced at once toward her, not being sure of his way.

She was a young girl of sixteen, the same delicate and exquisite creation which had so struck Clorinda on the canvas, and in the garret of Venice. The eye of the artist was delighted, the heart of the man was filled with emotion. He spoke to her: she answered timidly, but sweetly. He forgot his intended question; he alluded to the beautiful country, to the delight of dwelling in such a land, to the pleasures of her calm and placid existence; he asked if he could obtain a room in that neighborhood in which to reside while he took a series of sketches. The girl listened with attention and interest for nearly half an hour, during which time he was using his pencil. She then replied that her father would gladly offer him a shelter in their small house, if he could be satisfied with very humble lodging and very humble fare. The young man accepted with many thanks, and then showed her his sketch-book.

"Holy Virgin!" she cried, as she recognized herself.

"You are pleased," said the artist, smiling.

"Oh! it's beautiful; how can you do it with a pencil? Come quick, and show it to father!"

The young man followed her, as she [illegible] drove her sheep along, and soon found himself within sight of a small house with a garden which she announced as her father's. She [illegible] the drawing in her hand, looking at it with delight. Unable to restrain herself, she [illegible] forward, and, entering the [illegible] Zustana—for [illegible] picked up the [illegible] sheepskins, and [illegible] serving [illegible] Eleanora [illegible]

He took up his residence with them; he sought to please, and he succeeded. After a very few days he became the constant companion of Eleanora. They went out together, he to paint, she to look after her sheep—both to talk. Paolo found her totally uneducated, ignorant of every thing; unable to read or write, and narrow-minded, as all such natures must be. But, there was a foundation of sweetness, and a quickness of intellect, which demonstrated that circumstances alone had made her what she was, and Paolo loved her.

He had been a fortnight at Arnola, and he had made up his mind. One beautiful morning, soon after they had taken up their usual position, he spoke.

"Eleanora, I love you, with a love that is of my life. I adore, I worship you; you are the artist's ideal of loveliness; your soul only wants culture to be as lovely as your body. Will you be my wife? Will you make my home your home, my country your country, my life your life? I am an artist; I battle for my bread, but I am already gaining riches. Speak! will you be mine?"

"I will," replied the young girl, who had no conception of hiding her feelings of pride and joy.

"But you do not know me. I am jealous and suspicious, I am proud and sensitive. You are beautiful, you are lovely; others will dispute you with me. I would slay the Pope if he sought you: I would kill the Emperor if he offered you a gift. You are a simple peasant girl; those around me might smile at your lack of town knowledge—might jeer at you for not having the vices and accomplishments of the town ladies—I should challenge the first who smiled or jeered. You must then, if you can be mine, live apart from men, for me alone; you must know of no existence but mine; you must abandon all society, all converse with your fellow-creatures. I must be your world, your life, your whole being."

"I will be what pleases you best," said the young girl.

"The picture does not alarm you?"

"And will you continue to love me?" she asked timidly.

"While I live, my art, my idol, my goddess! Eleanora, while I breathe!"

"Do with me as you will," replied the young girl.

A month later they were married, her parents being proud indeed of the position their daughter had attained. They proceeded in the autumn to Rome, where Paolo had prepared for his mysterious existence by means of his faithful and attached nurse. He devoted to her every moment not directed to his art, and at once began her education systematically. He found an apt and earnest scholar, and at the time of which I speak, Eleanora possessed all the mental advantages to be derived from constant intercourse with a man of genius.

But Paolo Zustana, out of his home, was a changed and unhappy man; he lived in constant dread of his treasure being discovered; he saw with secret impatience the many defects still existing in his beloved object; he felt the restraint of confining her in a suite of rooms; he longed to give her air and space; but he dreaded ridicule for her peasant origin and education; he dreaded her being [illegible] and unobtrusive manner. He [illegible] her character.

It was on the afternoon of the next day, and Zustana, who had been giving [illegible] thanks to the Power [illegible] tenderness. He had [illegible] and [illegible]

"I [illegible]!" To [illegible] right"

"No [illegible]"

"[illegible]!" [illegible] Paolo, trying [illegible] to start [illegible]

[illegible]

[illegible]

from enjoying the manifold blessings that God intended for all; you deprive us of the satisfaction of admiring a face so divine, and a mind so exquisite. But then, you will say, she is beautiful enough to excite love; she is simple enough to excite a smile. Signor Paolo, she is good enough to scorn the first word of lawless passion; she is educated enough to learn every thing that becomes a lady, and befits the wife of a man of genius, if you but let her mix with the world. You are yourself miserable; your life is a torment. I the friend, the confidant, the sister of this innocent, good girl, declare to you that you must change your mode of existence."

"Countess, you have conquered," cried Zustana, who guessed the truth, and intuitively felt that her generous heart would find, in devotion to Eleonora, means of withdrawing her attention from her unfortunate passion. "Do with her as you please. When the Countess Clorinda, only child of my generous patron, calls my wife her sister, my wife is hers for life."

The result was natural. Paolo Zustana ceased to be suspicious and restless. Eleonora was universally admired; and when, ten years later, the artist, after finishing the paintings for the gallery of the Palace Bembo, took up his residence permanently in Venice, his wife had become an accomplished and unaffected lady, capable of holding her position in the elevated circles to which the genius of her husband and the friendship of Clorinda established her right to belong. Clorinda remained true to her friendship all her life, delighted and happy at being the ensurer of permanent happiness to two loving hearts, which, under the system of suspicion, fear, and seclusion adopted by one of them, must ultimately have been utterly wretched.

No one can be happy and useful in this world, who is not of it. If it were not our duty to be of it, we may be very sure we should not be in it.

Statuary in Pleasure Grounds.

THERE is perhaps no branch of Landscape Gardening in which the correct principles of taste are so frequently violated as in the introduction of statuary into ornamental grounds, and yet there is none in which the rules by which it should be regulated have been better defined. It is not usual, for instance, to see rustic alcoves and bridges, or summer-houses in the Swiss style, *ornamented* with statuary in marble or white stone. Nothing can be a greater mistake. However beautiful in themselves, such objects are wholly at variance with the situation; and it is impossible to introduce them in such positions, without injury to that consistency of purpose which is a primary condition in artistic arrangement.

There are two modes of placing statuary in grounds. One is, to connect it with architectural structures—either the house, or some of the subsidiary edifices, such as a conservatory or other building, (and this is generally deemed the most desirable situation for it); or else to place it in the vicinity of avenues or walks, in the midst of the rural scenery of the place. In connection with the bouse, or with any important subsidiary edifice, it is considered admissable to introduce almost any species of sculpture; because, where it is supported by a mass of building, the character of art *in both* maintains that "unity of purpose" which should be apparent in all attempts at tasteful arrangement. But where it is contemplated to introduce statuary into rural scenery, without its being in view of architecture of any description, two circumstances require attention; the one, the kind of scenery; and the other, the subject the sculpture is intended to represent.

In scenery now styled *Gardenesque* in character, in which the "beauty of repose" is the prevailing feature, provided rustic ornaments (such as alcoves constructed of rough wood) are not present, statuary of suitable subjects may be introduced with perfect good taste. In reference to statuary placed in such scenes, those are best adapted to the purpose which embody some rural conception—as Flora, shepherds, or some idea which is usually associated in the mind with the relation of country life. But if the statuary introduced into rural scenes is in considerable quantity—as, for instance, a series of statues, busts, or vases on pedestals, within sight of each other on either side of a long walk or avenue—the subjects may be as varied and as diverse as may be wished: because, in the latter case, by their number they become an important feature of themselves, indicative of an intention that they shall command the attention of the spectator Independently of the surrounding scenes, in the same manner as would be the case in a sculpture gallery; whereas, in the instance of simple *specimens* of statuary placed in the midst of rural scenery, it is evidently proposed that it shall be viewed rather as an additional ornament, to add effect to the surrounding beauties, and a propriety of subject is therefore required.

In scenery of the grand and picturesque character, such as Salvator Rosa portrayed, whether this is derived from the presence of rocky or barren scenery, or from the general disposition of the natural features of the place, statuary must be introduced with great caution; for in such situations it is very difficult to select subjects which are not in themselves repulsive to the ideas suggested to the mind by the ruling character of the scene. In such positions, I should hesitate much to recommend the introduction of statuary at all, that represented living objects, except equestrian statues, or statues embodying some mythological composition associated with the brute creation. Vases and architectural fountains or fragments are among the most successful embellishments for which the picturesque can be indebted to the chisel of the sculptor.

In whatever situation statuary is placed, therefore, in the open air, it becomes necessary to well consider the appropriateness of subject and of situation; and this is the more imperative in proportion as the desire exists to place statuary in single specimens alone.

The foreground of a large vinery affords a most appropriate situation for the formation of a flower garden in the Italian style, in which *statuary* is necessarily the predominant feature; but it only admits of adoption in two situations—the one immediately adjoining the house, and the other in connection with a conservatory of sufficient extent to support the general design. The low terrace wall is an indispensable adjunct to the introduction of this style. It serves the double purpose of isolating from the adjoining plantation the geometrical character of the flower-beds, which the adjacent architecture renders it necessary to employ; and it forms, as it were, a general base for the assemblage of sculpture distributed through it; for when the statuary is placed, and the low terrace wall with its wide coping of stone is erected, to the eye of a spectator viewing the whole from a short distance, the top of the terrace wall will appear to form a common base for the whole of the statuary.

In the form of the flower-beds, in this style of garden, angular and straight lines alone should be made use of, as being most in keeping with the architectural character of the whole. Vases or urns should be placed at the several corners of the terrace wall. Plants may be placed in the vases in the summer, but they should be confined to those species which are of a formal, stiff outline, as being most consistent with architectural decoration—such as the *Agave Americana*, the *Yucca*, the Cacti family, *Hydrangea*, Orange trees, and some others.—*B. Munn, in Horticult.*

SCIENCE.

Injury to the Grain Crop.

There can be no doubt but that there will be more or less Grain lost by *smut* and *rust*, chiefly by smut. The late rains have increased the tendency to smut, which has made its appearance, but we apprehend the evil will not be serious in the aggregate. There will undoubtedly be some cases where it will bear hard upon individuals, where large fields will be lost, so far as the grain is concerned, yet it will be harvested as a "hay crop;" relieving in some measure the severity of the blow. When we say the aggregate will not be heavy, we mean so as to materially advance the price. It will induce to a permanency in the price, until the amount of the year's crop is in some measure ascertained with certainty.

We would urge upon all our wheat growers not to make too hasty contracts, yet not by any means to refuse a generous offer—a quick sale to realise ready cash, and a re-investment of the proceeds, or a relief from the payment of interest moneys, is by far better than storing crops, unless the chances are greatly more than balanced by the risks of fire, waste and decline. We have asserted that our estimates lead us to believe the amount of wheat grown the present year, will be equal to the wants of the State, and enough for the *seed* for 1845.

Should the *smut* be more serious than it threatens now, the crop would fall short the amount lost. Yet, for all this, we are frequently reminded, that there are crops of wheat high up, where we little expected them. We still feel we have no occasion for alarm, but rather of rejoicing, that our State, so young, will be able to say to the older States—"we shall raise our own breadstuff in 1854, and hereafter."

Injured Grain.

We would most earnestly call the attention of "stock raisers" to the fact, that there is at the present time a disease prevailing among stock of all kinds—we mean horses and neat cattle—which has proved very fatal, baffling the skill of the best vetrinary physicians. This information comes to us from many quarters. We have believed it resulted from poison, and believe so still. It may be from some deleterious shrub, or plant; and yet, what is this disease like? We are told by several who have lost brood mares, cows, and other animals, that the throat and chest swells, the mouth and nostrils become hot and burning, the skin bloats and rises, and the udder of the cow becomes *black after death*. Are not these symptoms of poison?

The present disease is entirely new, and we are now more convinced than ever, for we learn that this disease has made its appearance in many places where the "smut has blasted the grain." Those who know the nature of "ergot" in rye, know that it is one of the most active of poisons, and the various diseases of other grains must surely tend to the same results.

We therefore re-assert that the disease now prevalent among stock, has its origin in the poison received from feeding upon blighted grains, and we would urge upon our stock raisers to note every symptom of the disease, and ascertain if blighted grains have been fed to the stock that have been attacked or lost. We ask of the press in every section of the State, to call the attention of the stock raisers to this fact, for if, as we assert this is the cause of the disease among cattle, the press can save many an industrious farmer from a heavy loss, by a word in season.

Irrigation.

WE have often expressed our conviction of the great utility of irrigating improved lands in this country; and it gives us pleasure to find our views fully sustained by intelligent Americans familiar with agriculture, who have observed the advantages of irrigation in Europe. L. G. Morris, Esq., late President of the New York State Agricultural Society, offered the following remarks on this subject in his address before said Society, at its annual meeting, held in Albany, Feb. 9, 1854:—*Genesee Farmer.*

"The next subject I will call your attention to is that of irrigation. While in Europe, in 1850, and again in 1852, I was forcibly struck with the great advantage of this fertilizer. There is many a brook or stream running comparatively waste through a farm, that, if properly directed, would add as much to fertilizing the land of said farm as the ordinary stock kept upon it. If you will allow me to trespass on your time, I will give a short description of the three modes of irrigation I saw in practice.

"In Devonshire, England, I saw what is called the 'catch meadow' system. The plan is this: A stream is dammed, and as large a pond formed at as high an elevation as the location will admit; that pond is tapped by a small ditch or raceway, at its bottom, to drain it; that ditch or raceway leads the water, keeping it at the highest elevation its head will admit, and allowing its banks to overflow and irrigate as it meanders along, by which means a certain number of acres of the farm can be watered. This process is performed in the fall, winter and spring, as often as the pond will fill.

"An experiment of this kind I witnessed in Exeter, at the Royal Agricultural Meeting held in that place in 1850. Mr. George Turner, the celebrated agriculturist of that section, exhibited the process on his own farm, and while the water was flowing made very full and explanatory remarks as to its efficacy. Mr. Turner stated that he irrigated at any season of the year, excepting midsummer; he also said that he did not use manure on the part irrigated, but would hurdle his sheep above the irrigated land where the water could not get; by which means he transferred the advantage of irrigation by the droppings of the animals which had consumed the pasture and hay, on the land below the water line.

"The only disadvantage, Mr. Turner stated by telling an anecdote of the celebrated breeder Bakewell. Bakewell was so tenacious as to the exclusive breeding of superior animals himself, that he would not sell his old ewes to a breeder; and when it became necessary to part with them, he would fatten them on irrigated land, and then say to the butcher, 'You may sell them to breeders if you please, as they will never produce increase hereafter.'

"This kind of pasture produces what is called the NOT (a disease of the liver), and if the animal is not killed that fall it will die before spring. Mr. Turner stated that he was very careful never to graze his breeding flock on such pasture. Horned stock and other animals he expressed no opinion as to injurious effects.

"The second mode of irrigation I saw on the plains of Lombardy (near the city Milan), the great country for making Parmezan cheese, which is produced almost entirely from the grass and hay, as they very seldom feed any thing else to their cows. The process of making this cheese is very simple, and performed by men in a very careless and any thing but cleanly manner.

"The cows are kept tied in the stables the year round, and only put out a few hours each day for water and exercise; they are rather better than an ordinary race of milkers, and are procured in Switzerland, at three years old, before they have produced their first calf; they are allowed to breed every year, and the young calves butchered; and when they get too old for the dairy they are killed, and their placed again supplied from Switzerland. They possess a very decided appearance as a distinct breed, being, universally, some of them brown, and others mouse color, with a light or mealy tinge around the eyes and nose; very straight on the back; coarse in the bone, horns and hair. The agricultural establishment at Grignon prefer them to any breed of cattle.

"The kind of irrigation used in Lombardy is by letting the water remain on the land, at a moderate depth, for a certain number of days; this country being so level, it is prepared thus: The water which decends from the snowy peaks of the Alps, rests itself in such beautiful lakes as Como and Maggoire, and after being quieted, tamed, and comparatively warmed, it winds its way in sluggish streams throughout those extensive plains. Previous to the channels of those streams being formed, and in great freshets, this whole country must have been irrigated naturally, which has produced one of the richest countries in the known world. At the present day, it is necessary to renovate that alluvial quality, and to do which, a stream is dammed at the most suitable location, and a raceway is formed, frequently by raising an embankment; this raceway is tapped at pleasure, and suffered to cover a certain amount of meadow, which is so graded and arranged by ditches that after the water has remained on it a proper length of time it is let off upon another meadow, so graded as to receive the water of the others, &c.

"The person owing a location high enough to warrant a stream being dammed, sells the privilege of taking the water from it for quite a large sum, and the next neighbor sells to his next neighbor, and so on. There are certain periods of time, and depth for the water to lay on the meadow, regulated by the heat of the weather; and a crop is taken from the meadow once in thirty days, at a growth from seven to nine inches long, as thick as the hair upon a dog. The climate is so mild that eight or ten crops of this kind are taken per year; and if the grass is not cut every thirty days during the season of growth, the roots of the sod are injured.

"The third and last mode I saw, and by far the most beautiful, and in all respects better adapted for our general use, was in that picturesque country, Switzerland. This country is diversified by mountains, steep side hills, slopes and flat lands; and when the water is finding its way down from those snowy peaks to the streams in the valley, its course is diverted by the peasantry, and obliged to flow over and irrigate the side-hills, and at last finds its way into the streams below, after having performed its enriching duties.

"This process of irrigation is well understood in Switzerland, not only by the large farmers and small peasantry, but every woman and child seems to understand the working and advantage of it.

"When at Berne, I spent part of two days with Mr. Fellenberg, the President of the Swiss Agricultural Society, and for whose kindness and hospitality I shall ever feel grateful. Mr. Fellenberg was the son of the late celebrated Fellenberg, the founder of Hofwyle (the celebrated institution which partly united with its studies agriculture); and while on the grounds of Hofwyle I had pointed out to me a very complete system of drainage, and the three different kinds of irrigation. This institution ceased on or shortly after the death of its founder, and the whole estate was for sale, it being the private property of the Fellenberg family.

"Mr. Fellenberg offered, if I desired, to send me a man to this country who was a scientific irrigator and drainer; and I believe it would pay a few of us well, as individuals, to import a man of that kind. He could take a gang of hands, prepare one farm, and then go to another, only moving himself, as the work can be performed by the common Irish laborer, if it is properly laid out and superintended.

"The waters considered to have the most beneficial effects for irrigation, are such as the speckled trout frequent, and the water cress grows in luxuriantly; and it is my belief that we have not a cultivated county in the State, or a cultivated State in our Union, but that the productiveness of which could be increased one-fifth by irrigation, and that, too, at a comparatively small cost."

Mercantile Library.

THAT the lecture before the Mercantile Library, by Rev. Mr. Scott, was an able one, all will admit, and, we will say more, it was an eloquent one. Many of the figures and illustrations were beautiful and the comparisons most charming to all who never lived in the country, or felt the influence that the county exerts over the city.

There is no denying that the great wealth of States and its influences centres most in great cities. We mean that which men call wealth money; but the true wealth, the treasures of mind and heart—that which produces contentment, health and pure happiness, is rarely found except in the country. We would not wish to detract a word or gleam from all the credit or fame that may result to the city or the valuable institution for which the gentleman has so ably and eloquently pleaded; "but one story is good till another is told," and we would be most happy to join the lecturer in a trip to some of our large ranches, in the rich valleys of our State. Let him cast his eye over the fields of waving grain, touch and taste the heavy clusters of the purple grape, the delicious pear, the luscious fig; and enjoy tho "home scenes" to which we could show him—and then hear him lecture upon the country, not from his notes, but from his own feeling heart, inspired by the scenes still on his mind. Methinks the influence of the country would be a theme that might be made eloquent when touched by one so able as our friend Dr. Scott.

MURRAY'S BOOKSTORE AND LITERARY DEPOT. We find upon our tablo from our old neighbor from Sacramento—now Murray, of Montgomery street—a fine collection of new periodicals by tho last steamer. Harper's, Graham's, Godey's, and Knickerbocker; Punch, Gleason's Pictorial, London Illustrated News, &c., &c., with a liberal addition of papers and other matters, for which wo are duly thankful—and would say, truthfully, if any ono really deserves prosperity, our friend Murray deserves it. We have more to say of him.

RAIN! RAIN!!—We havo to record tho singular phenomena of heavy rains in various parts of the State, on Saturday last, June 17th. The rains have extended quito a distance, and been very beneficial to vegetation, all except the grains; upon these wo hope the effect is not so severe as is reported.

HORTICULTURAL.

State Agriculture.—The Committee to Investigate the Farms and Crops of the State will shortly commence their work.

All who are interested and all who have Farms to offer for Premiums had better do so at the earliest moment.

Yew Tree.—The Indians have a tree in the mountains they use for their bows, and it is in appearance similar to the Yew of old. This tree is of a very singular nature—it bears a berry, but never blossoms. So says report.

State Society Meeting.—An adjourned meeting of the State Society was held at the counting-house of the President, F. W. Macondray, Esq., on Saturday, 17th. In the absence of several members from other counties, who were to make reports, the meeting was adjourned to the call of the Secretary.

Balsam Tree.—We have received the notice of a curious yet very valuable medicinal plant, or shrub, found in the vicinity of Bird Valley, that grows about two feet high, upon which is found a burr, containing a species of Gum or Balsam, of high medicinal power; and is used by the Indians as a powerful cathartic, and a reliable remedy for diarrhœa and other similar diseases—being used with great success.

Agriculture in the Mountains.—We learn from our friend Hatfield, just down from the mountains, that there is more attention paid to Agriculture in the mountains than is conceived of here below.

At Michigan City there is to be found all kinds of vegetables and in sufficient quantities for the use of that vicinity, and the price pays the farmer very well.

At Birds' Valley, thirty miles above Auburn, quite high up, there is also all the most desirable kinds grown and commanding a fair price.

The Nutmeg Tree.—At Bird's Valley and Eldorado canyon, this valuable tree is found in its greatest perfection. Trees are found here from eighteen to twenty-four inches in diameter, and full of the fruit, which is contained in a covering like the coating of the English walnut. Before ripe it is soft and quite stringent, but when mature the covering opens and the Nutmeg drops; the berries or nut ripens at various periods—upon the same tree may be found ripe and green fruit.

The ripe Nutmeg is of the same form and is as fully aromatic as the fruit from Sumatra; the foliage is like the pine, or the hemlock; each leaf having, however, a sharp briar or thorn upon each leaf. The fruit grows in clusters, similar in the cherry, and is indeed quite ornamental. This tree can be easily grown, and will be quite an acquisition; and we trust, ere long, to see it generally cultivated.

"Jardine de Horticulture."

Among the many evidences of the advance of Horticulture which appear in various parts of our State, by the improvements of our city lots, the private gardens of our citizens, and the high state of cultivation which characterise some of the splendid "Ranches" in the country, we have to note with much pleasure the establishment of some fine public Nursery Gardens and Floral establishments, which give promise to become equal to any that are known in the older States.

Among those we have visited in our ramblings, we would mention the gardens of Messrs. L. Provost & Co., of San Jose.

Situated upon the banks of one of the streams that rise with the rains of spring, portions of the ground are annually flooded, but in so gentle a manner as not to do injury, but to work to a very great benefit; their entire grounds are of deep, rich alluvial bottom land, and capable of a very high state of cultivation. The whole place has been reclaimed from a thick covering of underbrush, and those portions now devoted to a garden are highly cultivated, and present, in the manner of laying out and of propagating, evidence sufficient to satisfy us that Messrs. Provost & Co. understand their business.

The grounds are well arranged—portion laid out for nurseries of "fruit trees," of which we saw very fine specimens, of remarkable growth; portions for the vine, and squares of the grape, as standard for "fruiting;" other portions for propagation and nurseries of seedling fruit trees and stocks, ornamental trees, &c., &c. Throughout all these departments we noticed excellent order and cleanliness—the best feature of a garden. In the "floral" department we saw many fine specimens of plants and shrubs, but the "Rose" has been the principal object of regard with Messrs. Provost. Here we found the best collection we have seen in the country, consisting of many thousands, and in most excellent order; and among the collection we noticed a majority of the very best specimens we have yet seen of the new kinds.

Messrs. Provost have no Conservatory, yet we learn with pleasure that this autumn they intend to erect one of considerable size, on an improved plan, near the banks of the stream. This Garden is near the Ferry, and surrounded with fine large trees, suitable for shade, and we suggest to our friends the propriety of opening these grounds as a *Public Garden*. It is a pleasant walk from the city, and it would not only result in a profit to them, but be a great public good. A few arbors and summer houses, a conservatory, and the cultivation of the various fruits, would make this spot a delightful retreat, where visiters might partake of a dish of strawberries and cream, with a good appetite; thus refreshed—a bouquet and a pot rose in hand, the return walk to the city would be so pleasant, that many would like to repeat the same over again.

What say you, Messrs. Provost, to this plan?

The public taste demands this of you—and your skill in Horticulture requires that you should accomplish it.

Premium Farms.

We call attention of cultivators to the following farms entered for premiums to the State Fair, and furnished to us for publication by the State Society. We trust several of our farmers in each county will forward immediately a sketch of their farms, and enter the same for premiums. Let their be a general interest manifested and a generous rivalry exist; this will serve as a stimulus to exert and promote the interest in the exhibition. The following are the entries alluded to:

Sonoma, June 12th, 1854.

Dear Sir:—I respectfully offer my farm in Sonoma Valley, for one of the three premiums to be given by the California State Agricultural Society, (for the three best farms in this State) and invite the Committee to award said premiums to visit and examine my farm at such time as will suit their convenience.

Respectfully yours,
D. W. C. Thompson.

To F. W. Macondray, President C. S. A. S.

The "Woodside Farm," property of I. C. Woods, Esq., Arguello Park, Pulgas. This farm contains 1,200 acres tillage land, divided and tenanted in seven allotments. Also 1,080 acres of pasturage, timber and mowing, in three fields; surrounded with wire, ditch and rail fences, twenty-one miles in extent—a hedge planted on a portion. Has a garden and orchard of 18 acres. Dairy of 120 cows; 70 head of young cattle, 4 bulls, one blooded; stallion, Kentucky, blooded; and band of American mares. First year in cultivation—improvements commenced in June, '53.

The "Oak Knoll Farm," Napa, property of J. W. Osborn, Esq. This farm contains 500 acres tillage, enclosed in fields; 350 acres of which is in barley, rye, oats and wheat; 346 acres of pasture and timber land, partially enclosed, Dairy of 16 cows; 150 hogs, Island breed, crossed with Berkshire. At present working team, 2 yoke of cattle, 9 span of horses and mules, band of large California mares and stallion—50 head of young stock. Orchard and garden of 27 acres; a portion of the grain land third year in cultivation—fences, rail, ditch and wire—hedges planted 5 miles.

The "Mayfield Farm," property of E. O. Crosby, Esq., (under the direction of S. J. Crosby,) Santa Clara county. This farm contains 250 acres tillage land, oak opening; the whole surrounded with redwood posts and rails, five feet high. 100 acres in wheat, oats, barley and potatoes; 23 acres in vinery, orchard and garden; 2300 peach trees, 12 000 grape vines. Present working team 4 yoke American oxen, 2 span of horses; stock, 20 head Spanish steers, 4 American cows. First year's cultivation—improvements commenced in April, 1853.

Artesian Wells.—We are glad to learn that the description we gave of the Artesian Wells in San Jose has drawn considerable attention to the subject, for we believe the immense good that will result to the country from their discovery and use, is beyond all estimate. Maj. P. B. Reading, of Cottonwood, informed us that he has just visited those in Jose, and was so much gratified that he will immediately commence boring for one or more, and we have learned of some half a dozen in other sections. We hope to learn that Sacramento valley will awake to her interest. Now is the time to commence.

You can receive favors only from the generous; and to be plain with you, those are few who are rich that are not poor.—*Fielding.*

LADIES' DEPARTMENT.

Domestic Bread.—The Rhode Island Society for the Promotion of Industry, gave the first premium on domestic bread, to Mrs. Hiram Hill, of Providence. The following is Mrs. Hills receipt for making the bread exhibited by her:

For two loaves of the ordinary size, take eight potatoes, pare them, slice very thin and boil until quite soft, then mash to a fine pulp, and add a little by little two quarts of boiling water, stirring until a starch is formed, let this cool, and then add one-third of a cup of *new* yeast, this forms the "sponge," which should remain in a moderately warm place for ten or twelve hours, or "over night," until it becomes very light and frothy, even if a little sour it is of no consequence. When the "sponge," is ready, add flour, and work it until you have formed a *stiff, firm* mass. The longer and more firmly this is kneaded, the better the bread.

Let the kneaded mass remain say from a half to three-quarters of an hour to rise, then divide into loaves, put into pans, where it should remain say fifteen minutes, care being taken that it does not rise too much and crack, then put the loaves into a quick oven and bake, say three-quarters of an hour. If the oven is not hot enough, the bread will rise and crack, if too hot, the surface will harden too rapidly and confine the loaf.

A Home in the Country.—"A home in the country for me!" exclaimed a lively girl to me one day, after she had been wandering through fields and meadows, over hill and dale, as she came rushing into the parlor, faint with over-exertion. So exclaimed I, as I looked out of the open window on that calm, spring morning, and saw the green grass just beginning to shoot up its tender blade, and the trees to put forth their buds. Yes, give me a home in the country, where I can see the *real beauty* of God's works; where I can view Nature as she really is, the Goddess of beauty! Who would not exchange the dusty streets of the city, the clattering hoofs, and the bustle of human beings going to and fro, for the humble, neat cottage home in the country, where we can sit at our window with the calm, soft evening breeze blowing playfully in our face, and where we can breathe the fresh air of heaven in all its purity! How many delightful thoughts centre around a home, and especially a home in the country! How it refreshes the worn traveller as he begs a cup of cold water from the sparkling well, and sees the ruddy countenances of parents and children, all conspiring to show that health with all its train reigns there! Yes, give me a home in the country, a home on the bright hills of New England, humble though it be, and my brightest joys will be realized! Minnie.
—*Boston Cul.*

The Water Lily.—It is a marvel whence this perfect flower derives its loveliness and perfume, springing as it does from the black mud over which the river sleeps, and where the slimy eel and speckled frog, and the mud-turtle swim and creep. It is the same black mud, out of which the yellow lilly sucks its obscene life and noisome odor. Thus we see, too, in the world, that some persons assimilate only what is ugly and evil from the same moral circumstances which supply good and beautiful results—the fragrance of celestial flowers—to the daily life of others.—*Margaret Fuller.*

To Boil Fresh Pork.—Take a flat blade-bone of country pork, commonly called the oyster; take out the bone and put veal stuffing in its place; wrap it in a clean cloth, and put into a saucepan of boiling water, with a little salt; let it boil slowly for about an hour and a-half, or an hour and three-quarters, according to the size; it should, however, be well done. Serve it up with parsley, and butter poured over plentifully. This is a most rich and at the same time a most delicate dish, equal to boiled fowl and pickeled pork, which, indeed, it greatly resembles.

How to Cook Sweet Potatoes.—Boil two large sweet potatoes; rub them through a sieve; then add a piece of butter the size of an egg, a little salt, one pint of buttermilk, a tea-cupful of sugar, a table-spoonful of saleratus dissolved in warm water; bake in an earthen dish. Serve up with cold cream.

Great Product of Butter.—Mr. Thomas Motley, Jr., of Jamaica Plains, states that his four-year-old Jersey cow, Flora, has made, during the eight months ending January 18th, four hundred and seven and seven-tenths pounds of butter. Up to November 16th she had no grain. Since then her feed has been three quarts cob and corn meal per day, less than half a bushel of carrots, and oat straw.—*Boston Journal.*

The Races.—The great interest now given to the "Course" will lead many to manifest a higher regard for this noble animal, the horse, and induce those who keep them to want [illegible] possessors of fine animals. They will produce a [illegible] horses, and demand will produce a supply, and we [illegible] in a very short time the "finest and fleetest" horses will be found in California. Already here has been [illegible] to the world some of the best racers upon record, as [illegible] California. We trust that everything [illegible] and improvement of the stock of the country [illegible] "most noble animal," to be a great [illegible] who are laboring for [illegible] In this week's issue will be found the [illegible] premiums of the Union Course, which is pronounced to be the finest [illegible] country. We are [illegible] given to it. The [illegible] Mr T. K. B. [illegible]

A Premium---Farmers' Clubs.

With the hope of inducing such of our friends, and [illegible] who have a little leisure, to ride among their neighbors and introduce an Agricultural Paper, we take pleasure in [illegible] the California Farmer and, to make it an inducement [illegible] we say to such friend—if you will get us five subscribers, and remit the amount, we will send you six papers, or for ten subscribers, twelve papers. We trust there are many friends who will cheerfully take a little pains to aid us, and thus extend the circulation of the Farmer, and make a useful vehicle for the Agriculture of California.

Subscribers will please be particular to name the Post Office to which papers are to be sent; or, if forwarded by express which line they prefer.

We want good active agents to visit every county in the State for the Farmer. Young men can find a steady and profitable employment. Apply at this office.

Domestic News.

THE CITY.

Monday being the day set apart by the Democrats for their primary election, the usual amount of business in the shooting and drinking line was transacted. About 10 o'clock a Mr. Watson entered the Union Hotel, and, after some loud talking, he pulled out a pistol, and commenced firing, apparently at random, among the crowd then in the bar-room. Mr. C. Duane, who stood by, drew a revolver and fired at Watson. Several others then joined in the fray, and about thirteen shots were fired. A Mr. Barney Mulligan, who stood quietly by, was shot by Watson in the left thigh. Watson received three shots—one in the thigh, and two upon his hands, one of his fingers being shot away. Several other fights occurred on Kearney street, in which pistols and knives were freely used.....Mr. Sonntag and lady were thrown from a buggy by a pair of runaway horses on Monday afternoon, and, though falling on a pile of bricks, were not seriously injured.....The plaza improvements are going on, slowly.....The new engine which recently arrived in the city, per Whirlwind, for Yuhn Company No. 2, of Marysville, was forwarded to its destination on Monday.....The American bark W. G. Lewis, recently put on for New York, by Messrs. Green, Heath & Allen, is rapidly filling up for that port, her cargo consisting of hides, horns, and a large quantity of general merchandise.

THE INTERIOR.

The Sacramento State Journal is informed by Mr. Reny, one of the Deputy County Assessors, that a large portion of the wheat of that county is so greatly injured by the smut, that some of the farmers are cutting and saving it for hay only. The barley crop is generally good, and will yield well.....The Shasta Courier says: delegations from the various tribes in this county assembled to the number of 500—men, women and children—in the vicinity of Spring Lane Ranch, in the first part of last week, and from dewy eve till early morn, danced, hopped, jumped and skipped; bowled, yolled and stunk! Those of the whites who witnessed the ceremonies and amusements of the occasion, were highly delighted. The whole affair was conducted in a manner very creditable to the efficient management, among whom we were pleased to see that prince of good fellows, "Heap-big-Indian-Chief," who is more particularly celebrated for having on one occasion stolen and eaten the quarter of an ox, accompanied with a very large basketful of young clover, by way of salad.....For many years, says the Marysville Herald, a sort of loose tradition has been afloat, that a tribe or nation of Indians existed on the northern confines of the Mexican Republic, whose complexions were identical with those of the Anglo-Saxons. Some have said that these Indians were the descendents of an unfortunate colony of Welch, which was planted somewhere near the Pacific coast, in the eleventh century. Some have said this, and some have said that, and many have denied the tradition *in toto*. Capt. A. A. Gray writes to the Columbia Clipper as follows: "What that gentleman has said in regard to the existence of such a tribe is correct. This I can testify to, having seen them myself, while acting as guide and interpreter for Lieut. Moore."....A letter has been received from Capt. Henry Gilman, of the steamboat Belle, stating that the body of Mr. J. W. Henderson, who was drowned off that boat on the 7th of April last, has been found. Some money and a watch, which were on his person, have been taken charge of by Capt. Gilman, who holds them, subject to the order of his family. Henderson was formerly a compositor in the Sun office: he has two sisters in New York, and a brother, a physician, living near Albany.....James Carney, says the Columbia Clipper, was brought before Justice Carley, on Thursday last, for an attempt to shoot Mr. and Mrs. John Cunnaman. He fired four shots, the last one taking effect in the breast of Mr. Boyle's daughter—a miss about twelve years of age—causing quite a wound, though not considered dangerous. Carney was bound over in the sum of $700, to appear at the next term of the criminal court.

THE MINES.

The miners in this vicinity, says the Columbia Gazette, are now doing remarkably well. . . Riggs & Co., of Vallecito, washed out in one day $300. This camp is filling up fast, and great preparations have been made to get the water out of the holes on the flat.....In the Main Gulch, on Saturday last, Morrissey & Co., took out twenty-three and one-half ounces of dust. This claim pays well all the time.....Last week, Messrs. Steele & Co., on the flat, washed out in the space of four days and a-half, twenty-five ounces of fine gold, valued at $17. ...The miners on Saw Mill Flat are doing well, and [illegible] is in a flourishing condition. A rich lead has been found to extend the whole length of the flat which is supposed to have once been the bed of Wood's Creek. ..Hudson & Co. have a claim in Laigan's garden, which pay from [illegible] per day. The garden is nearly [illegible] ....The Nevada Company [illegible] day....The [illegible] pay [illegible] The [illegible] New [illegible] [illegible] [illegible]

AGENTS FOR CALIFORNIA FARMER.

Messrs Adams & Co. at all their offices throughout the United States or Europe.
Messrs. Wells, Fargo & Co., at their offices throughout the Country.
Mr. Chauncey Langdon, Travelling Agent for the northern section of the State.
Mr. E. R. Highton, general and travelling Agent for Northeastern section of the state, to whom we commend our Agents for all information needed.
Mr. Wm. M Lester, Travelling Agent for Sacramento City and County
Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*
Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniontown, Eureka, and Bucksport.*
San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.
Benicia, Martinez, &c.—Messrs. Stiles & Dodds.
Union City and Mission San Jose—Messrs. Howard & Chamberlain.
Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.
San Luis Obisp.—Dr. Thomas T. Harvey, P. M.
Union, Humboldt Bay—A. H. Murdoch, P. M.
Mount Farm, O. T.—Gen. M. M. McCarver.
Bidwell's, Butte Co—P. Freer.
Weaverville, Trinity Co—H B. Davison & Co.
Yreka—Cram, Rogers & Co
Mokelumne Hill—I. Coffin.
San Jose—E. Reed.
Marysville—R. A. Eddy & Co.
Stockton—C. O. Burton.
Sonora—Young & Roberts.
Columbia—A. Hunnewell, P. M.
Placerville—Nash & Davis.
Nevada—A. W. Potter.
Coloma—D G. Waldron & Co.
New York City—A. T.—J. M. Thorburn & Co.

N B.—We want Agents in all the principal localities, and persons disposed to act can have the opportunity, if satisfactory to all parties.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JUNE 22, 1854.

What is the Prospect?

This is the word! In every occupation and employment; in every community, merchants, traders, manufacturers, artizans, each and all salute the other in their own professions, occasionally, with the inquiry, "What is the prospect?" We often have the inquiry propounded to us, "What is the prospect of Agriculture? How are the Wheat crops? What do you think of Potatoes? Will Barley pay?—and how does the Farmer prosper?"

We answer—the *prospect* of Agriculture was never so good as at the present moment; but there are some features that we note, that, like some pictures, "distance lends enchantment to view." Thus it is with the Agriculture of California; its best views are seen at a distance—near too they are in the rough—and this we should expect. We are in our infancy as a State; our infancy in our Agricultural efforts, and many who are engaged in these employments are mere "babes in knowledge," for they are new beginners; yet, with all these draw backs, California has surprised the world in her Agricultural productions. Her crops of Grain have astonished the world; her immense yield of root crops defy competition, either in size, quality or quantity, the rapid development of Horticultural products, by specimens in "Flora and Pomona," give features of the beautiful picture that in a few years more shall place before our then present vision, Agriculture in all its glory and prosperity.

The present rough aspect of Agriculture consists not only in the few features named; there are others, and we will present them. The cultivator of the soil must be brought more in contact with the light of science, and with all the practical knowledge obtained by others around him. He should make himself familiar with every kind of machinery and implement designed to advance his interest; he should become acquainted with the soil he is cultivating and its adaptation to his purposes—and to do this effectually he must arouse a spirit of inquiry among those around him. This will result in the formation of Agricultural Associations, the great main-spring of action that leads to success.

Already California has established two County Agricultural Societies—one in Napa and another in Santa Clara—and the organization of the State Society under the sanction and patronage of the State, gives us a prospect for the future that is gratifying. To make these societies efficient and beneficial to their utmost capacity, the knowledge and benefit obtained by their formation must be widely diffused. This can only be done by a press devoted to the Agricultural interests; a press wholly and entirely unbiassed by party and sectarian interests, and one that shall be made the channel of communication to every cultivator in the State; a press so devoted to the great interests of Agriculture, that every honest mind shall see in the good it can accomplish for the people of this State, a blessing so great that he shall be not only willing, but desirous to lend a helping hand. Such a press is worthy of being called a free press,—worthy of being supported by freemen, and the cultivator of the soil, who fails in his duty to himself by neglecting to be informed and in aiding to inform others—we hold that man recreant to himself, to the science, to his fellow men and his country.

That this information might be extended to the utmost borders of the State; that these Societies might be formed and set in motion, so that all this good could be accomplished, the California Farmer, a press devoted to the interests of Agriculture and its kindred sciences, was established. For six months it has spoken weekly to its friends and its advocates. Amid all the embarrassing depressions that have fallen upon the entire Agricultural interests of this country, it has moved on in its way, manfully and truthfully battling to arouse the slothful, to stimulate the inactive, to cheer the desponding and to encourage the bold. No column has been soiled by political or sectarian disputations; no article been seen in print that would raise a blush or taint the family circle. From the date of its first issue, the question has not been, "Will it pay?" but confiding in the justice of those who desire to advance the best interests of our country—the Agricultural, the farming interests, the home scenes, the happy cottage life—sources of happiness such as these, it has been the object of the California Farmer to promote. Those who have been the early friends and patrons of the Farmer, to such we appeal to know if we have not been that "free press" that should be the medium of the intelligent cultivator of the soil; and we appeal to know if we do not deserve that generous support which will place it in our power to scatter these great truths far and wide over our whole land. If you answer in the affirmative, to you then we look for an influence to extend the circulation of that press and give it that efficiency that it deserves.

Shall we then receive from every reader their kind remembrance, and know we have it by acknowledging that influence in an addition to our list of subscribers from a number of their friends?

Public Improvements at San Jose.

While the mass of citizens are at work building their homesteads, planting orchards, making gardens and preparing for so much personal comfort and pleasure, we admire to see a generous regard paid to improvement of the public streets also. In our recent visit to San Jose, we spent a pleasant hour or more at the residence of E. O. Crosby, Esq., about half a mile from the centre of the city. We here found a large garden, admirably laid out—the design was unique and in good taste—while regard was paid to a design, yet it was in irregular form, giving it a easy, natural style, pleasing to the eye.

In these grounds the proprietor has caused to be planted a very fine collection of large native forest trees; many of them 20 and 30 feet high: thus at once securing beauty and shade. The garden was otherwise well stocked with choice fruit trees, flowering shrubs, blooming plants, and all the best varieties in each department. The work had been most successfully done, and great credit was due to the skill and industry of Mr. Low, under whose care the ground had been transformed from a wild to a fertile spot. Mr. Low's success in removing large fruit trees has been complete, and Mr. Crosby may well feel proud of the result, for the gardens present the appearance of having been the work of years. It is a matter of great moment also to know our citizens in various parts of the State are thus improving and adorning their homesteads, not only at the metropolis and large cities, but all over the State.

There is one feature more that we commend to the especial notice of every good citizen. Mr. Crosby has caused the public street, for some distance in front of his mansion, to be handsomely graded, and the street lined with fine ornamental trees, all at his own expense; which in this country is very considerable. While we know that all this adds to the value and beauty of his own estate, it is not often that we have noticed so much done by our private citizens, and the grading and finishing of public highways, and adorning both sides of the street, evinces a spirit worthy of commendation. We trust the example will be followed by many others.

We noticed among the fruit trees in bearing in the gardens, fine peach trees heavily loaded with fruit; and here too we saw the curl on the peach tree, of which we have spoken in former numbers. This Mr. Low attributed to the severity of the sweeping winds that are so severe in many places. We saw fine cherry trees in bearing; apple and pear trees in excellent order, and many of the fine fruits, such as strawberry, currents, &c. Horticulture is rapidly on the advance, and there is every indication of abundance of fruits for coming years.

We recommend visitors to San Jose to call and examine the success which has attended the planting of native fruit trees at this fine residence, and then "go and do likewise."

Correspondence.

Green Springs, June 13, 1854.

Messrs. Editors: Dear Sirs—I received a note from you on Saturday, in which you wrote you had sent me twelve copies each of No. 22 and 23, but as they did not come, I held off writing till the mail came up to-day, and as they have not come yet, I think the fault is in the post office some where between this office and San Francisco, for I have been here each day and opened the mail myself.

I have proposed calling a County Agricultural Society Meeting and it is responded to in all parts of our county. It will be held as soon as it is convenient for us to meet. I will let you know when it is to come off, and would like to have you attend it, if convenient for you.

Should it be convenient for you to visit these parts, we would be happy to have you do so.

I have a beautiful garden, and it looks fine. As for Lettuce, the State cannot begin with me, for I have one head that measures six feet in circumference, and the head is as closely packed as a drum head cabbage; its height is twenty-two inches, and I should judge it would weigh ten pounds; it is the curly head Lettuce. Besides the above, I have two other kinds—the green head and the early speckle head which is beautiful.

Please to give me some of your modes of irrigation, as I have never had any experience in it; still I think in the evening is the best time. If I am wrong I wish to be corrected.

Truly and faithfully yours,
G. W. Seger.

—

We answer friend Seger, 1st: We mailed you the papers *two weeks since*, and shall send you a parcel this week also; and as you say, the fault is in the post office. Of this we hear great complaints on every route. We are in hopes this evil will be soon remedied, for Col. Henley and his assistants here are ever active and do everything they can to facilitate business and accommodate all. The amount of business here at this office is beyond all estimate.

2d. Your Lettuce bears off the *palm*. We wish we could see this famous head, it would be worth a visit to Green Springs, alone. Let it grow, we will come soon.

3d. We refer our correspondent, for the correct principles of irrigation, to the article in this number on that subject; but in all cases, the application of water should be after the sun has left the plants.

We are glad to see the increased interest on the subject of County Societies—it is of the highest importance to every agriculturist—and in answer to our friend, we promise him we shall be very glad to come to Green Springs, and will do so. So call your meeting, friend Seger, and let us know in season—for we mean if possible to visit every county in the State and strive to induce our farmer friends to move unitedly in County Societies, Farmers' Clubs, County Shows, and also prepare for the Great State Show in this city, in October next. So you may tell your friends we are coming, and hope to find a goodly number of those who are readers of the California Farmer.

Sacramento, June 12, 1854.

I would now speak in respect to your excellent paper, The California Farmer: let me write a few lines more.

I intend to draw the attention of the Californians to it every where I go—at Weaverville, Ringgold, Placerville, Twin Springs, Diamond Springs, Mud Springs, Cold Springs, Coloma,—and for this purpose I subscribe for three copies of the Farmer for myself. By collecting the numbers of one of them I will enrich my library, and the numbers of the other two I will spread over the districts of my circuit.

It is certain there are not a great many farmers to be found in the mountains, but I think there are a good many miners there that intend to settle down on the farms in the valley's after some time—and if such men are made to consider how very much it is for their interest to prepare themselves for an occupation, respecting which, the rules are so vastly different from the same occupation in the Atlantic States. By reading the California Farmer, they will, I think, subscribe for it.

There came last year a case of great loss under my observation, that would not have occurred had the parties been acquainted with the *agricultural peculiarities of California*. Two miners, friends of mine, from Ohio, planted where I lived all last summer, in the spring of 1853, about two acres of potatoes. The patch was a slightly inclined piece of ground, and it was lengthwise (south) bordered by a small creek, whose waters they used for irrigation every evening. The potatoes were planted in hilly rows, betwixt which the water used for irrigation ran down. The potatoes had been planted by a young man who had followed farming from childhood exclusively. The result was, no potatoes were found in the hills, not one, nothing but roots—once in a while, something in the shape of a potato turned up, but it was not bigger than a pea, or a hazel nut, and useless, of course. Fence, labor, seed, all were a total loss. Probably planting the potatoes in hills in this way, was the true cause of the loss.

Whatever it was, this fact shows that farming in the Atlantic States, and farming here, are two entirely different things, and that man who intends to range himself among the "California Farmers," ought to prepare himself for his task as well as he can, to prevent heavy losses.

What else could be put into the hands of such a man, that would be more serviceable to him, than your Farmer? I, for one, do not know of anything else, and I will therefore do for your paper whatever I can.

As I shall leave for the mines on Friday, I beg you will have the parcel ready for me that day.

Your ob't serv't,
Dr. Chas. Offtedinger.

—

Note.—We are glad to receive such communications as the above, for many reasons; the first is: it contains important truths, which should be felt by cultivators. "*Farming in the Atlantic States, and farming in California, are two entirely different things.* Every day evidence of this is brought home to the minds of farmers, from the losses they experience by practising in the old beaten track of other States. We might almost say we have the trade to learn over again. "Learn over again?" Farming is a trade that is never fully learned—it is a perpetual school, where every day's labors reveal new truths, and new languages are taught by the changing and fruitful seasons.

The occasion of the loss referred to by our correspondent, arose from a wrong system of cultivation, and unnecessary irrigation. Had the ground been plowed deep, made level instead of ridged, and been kept in constant cultivation even in dry weather—without irrigation, provided they had been planted in proper season, there would have been a good crop.

We are always glad to receive communications upon all subjects connected with our enterprise. The interest which our friend feels for the Farmer we duly appreciate and we especially commend him to the farmers and to all who love the beautiful things of earth, as a gentleman who will impart interest and valuable information in the Science of Flora; therefore we again recommend Dr. Charles Offtendinger, who is now travelling to make collections of flower seeds, plants, shrubs, &c., and who will always give interesting information to all who may desire it. The Doctor will act as our agent for the Farmer, in any or all sections of the county—and we shall be always pleased to hear from the practical farmers, touching their experiments in each department of Agriculture.

Bidwell's Bar, Butte County, June 11, 1854.

Mr. Editor:—In your valuable paper of the 1st inst., I observed an article in regard to Artesian Wells. If not too much trouble to you, I wish to inquire, if you can inform me, the names and residence of any parties who are engaged in boring such wells.

Respectfully yours, O. M. Evans.

We are most happy to inform our correspondent that we can promptly place him in a way to have all his wishes answered. We refer him to the card of Messrs. Henrickson & Little, whose success in this business has given them a large share of patronage, and whose work will give satisfaction to their employers.

How to Pass through Smoke.—In the course of an inquest in London, lately, Mr. Wakely, the coroner, observed that it might be well to acquaint the public with the fact that if persons in a house on fire had presence of mind to apply a damp cloth to their mouth and nostrils, they could effect a passage through the densest smoke: but the surest method is to envelope the head and face completely in the damp cloth.

Milk.

Milk consists of three materials blended together—oil, or, in Science, the butteraceous, lactic, and serous kinds of matter—which can be separated by artificial means, so as to form *butter*, the milk called *buttermilk*, and *serum* or whey. The whey is little else than water, slightly saline, and is generally the chief ingredient in the milk. When taken from the cow, milk should be removed to the dairy or milk house, and, after being sieved, placed in shallow pans, to throw up the butteraceous matter termed cream, which, being lightest, floats on the top.

The following observation on milk and its management made by Dr. Anderson, are worthy of the consideration of cow-keepers:

"Of the milk drawn from any cow at one time, that part which comes off at the first is always thinner, and of a much worse quality for making butter, than that afterward obtained; and this richness continues to increase progressively to the very last drop that can be obtained from the udder.

If milk be put into a dish, and allowed to stand till it throws up cream, the portion of cream rising first to the surface in quality and greater in quantity than that which rises in a second equal space of time; and the cream which rises in the second interval of time is greater in quantity and richer in quality than that which rises in a third equal space of time; that of the third is greater than that of the fourth, and so of the rest; the cream that rises continuing progressively to decrease in quantity, and to decline in quality, so long as any rises to the surface.

Thick milk always throws up a much smaller proportion of the cream which it actually contains than milk that is thinner; but the cream is of a richer quality; and if water be added to that thick milk, it will afford a considerably greater quantity of cream, and consequently more butter, than it would have done if allowed to remain pure; but its quality is, at the same time, greatly debased.

Milk which is put into a bucket or other proper vessel, and carried in it to a considerable distance, so as to be much agitated, and in part cooled, before it be put into the milk-pans, to settle for cream, never throws up so much or so rich cream as if the same milk had been put into the milk-pans directly after it was milked.

From these fundamental facts, the reflecting dairyist will derive many important practical rules. Some of these we shall enumerate, and leave the rest to be found out. Cow's should be milked as near the dairy as possible, in order to prevent the necessity of carrying and cooling the milk before it is put into the creaming dishes. Every cow's milk should be kept separate till the peculiar properties of each are so well known as to admit of their being classed, when those that are most nearly allied may be mixed together. When it is intended to make butter of a very fine quality, reject entirely the milk of all those cows which yield cream of a bad quality, and also keep the milk that is first drawn from the cow at each milking entirely separate from that which is last obtained, as the quality of the butter must otherwise be greatly debased, without materially augmenting its quantity. For the same purpose take only the cream that is first separated from the first drawn milk. Butter of the very best quality can only be economically made in those dairies where cheese is also made; because in them the best part of each cow's milk can be set apart for throwing up cream—the best part of this cream can be taken in order to be made into butter—and the remainder or all the rest of the milk and cream of the dairy can be turned into cheese. The spontaneous separation of cream, and the production of butter, are never effected but in consequence of the production of acid in the milk. Hence it is that, where the whole milk is set apart for the separation of cream, and the whole of the cream is separated, the milk must necessarily have turned sour before it is made into cheese; and no very excellent cheese can be made from milk which has once attained that state."

Sweet Potato Vines.—A correspondent of the Georgia Telegraph, states that the vines of the sweet potato may be saved during the winter and used in the spring for propagating a new crop. In the fall, any time before frost takes place, the vines may be cut in any convenient length, and placed, in layers, on the surface of the earth, to the depth of twelve or eighteen inches, cover the vines, whilst damp, with partially rotten straw, (either pine or wheat will answer) to the depth of six inches, and cover the whole with a light soil about four inches deep. In this way the vines will keep during the winter, and in the spring they will put out sprouts as abundantly as the potato itself when bedded. The draws or sprouts can be planted first, and the vine itself can be subsequently cut and used as we generally plant slips.

At a meeting of the Farmer's Club, New York, April 10, the Secretary, Henry Meigs, Esq., read a number of interesting papers collected from various sources. Among them one stating that the estimated value of one year's manure in England amounts to three hundred millions of dollars—worth more than the entire foreign commerce of the kingdom. The total value of a year's crop, including every animal and vegetable, has been reported to parliament some time ago, as being about 2 000,000,000 of dollars; and that (in 1848) the turnips of England, taken in the whole of their utility, were valued at one half of that great sum viz.; three hundred millions of dollars.

It is said that plaster is a sure and successful remedy against the encroachments of [illegible] on the first named vegetable.

Peruvian Guano.

The notice which we have recently been led to take of various estimates of the supply of Guano at the Chincha Islands, has induced a friend to send us a statement or report, made and published in England in December last, by Geo. Peacock, F. R. G. S. The statement is founded upon a personal survey, made by Mr. Peacock during four months special devotion to the subject, in an open boat, all along the coast of Peru. His survey was made at the instigation of the British Government, with a promise of a 1000 tons of guano as compensation, which promise, it is said, has never been fulfilled. The English holders of Peruvian bonds, secured by the proceeds of the guano islands, began to apprehend a failure of the guaranty; and hence, probably this survey. As to the Chincha group, Mr. Peacock says:—

"I estimated in 1844 that the quantity remaining on the northern island alone, was at least ten millions of tons; although it had been worked by the Indians from time immemorial, and although a very large quantity had been removed since the permission of its first exportation to Europe in 1841; besides the immense quantities that had been used by the Peruvian farmers since the conquest. At this time (1844) I measured the cliff of pure guano lying in a north-east and south-west direction, where it had been worked in upon from the north-west verge of the rocky basement towards the middle ridge of the island; I found it to be 85 feet perpendicular, and I calculated that by the time the workings had reached the summit or crown of the hill it would be at least 100 feet in section to the rocky base, all pure guano.

I did not examine the other two islands, merely landing on them, the deposits there not having at that time been opened upon; but Senor Villa, who examined them in 1842, declared that they contain in his opinion, considerably larger quantities than the northern island, the middle one being the largest of the three. A rough estimate was formed that from 40 to 50 millions of tons existed on this group. Senor Don Francisco de Rivera, the late charge d'affairs of Peru in London, who was entrusted with my plans and estimates of the new guanaros discovered by me, found (as I was informed in 1846) that valleys filled with guano to the level of the surrounding hill of this material, upwards of 120 feet in depth, existed in the Chincha group, and that the quantity might be said to be practically inexhaustible during the present generation.

However, independent of these immense deposits on the Chincha Group, the Lobos, Guanape, Huanra and other islands upon the north-west coast of Peru were estimated by me to contain some five millions of tons of it, at least; whilst that truly wonderful sugar-loaf shaped peninsular, the Pavilion de Pica, in the province of Tarapaca, still contains some four or five millions of tons; and whilst the Hunnillas, Chipana, Lobos, and other known guaneros on the south coast of Peru between Iquique and the river Loa, contain some four or five millions more amongst them. Thus, independent of the Chinchas, there are some thirteen or fourteen millions of this invaluable manure still known to exist, and I am therefore of opinion that the holders of Peruvian stock need be under no apprehensions of their guarantee falling short whilst the demand for this indispensable article remains practically inexhaustible, as I firmly believe, with Senores Rivera and Villa, it to be."

How to Winter 100 Sheep from Two Acres of Land.—We take the following from that excellent agricultural paper the Maine Farmer, published "away down where the sun rises," and edited by the veteran Dr. Holmes:

"We have been accused of inducing farmers to try *visionary* experiments. We hardly know what meaning those who use the word visionary would put to it in this connection, nor do we care. We have faith in the following project of producing fodder enough on two acres of land to winter one hundred sheep. But, says Mr. Doubtful, it must be made very rich. Of course it must. That wont hurt the land in the least. But how will you do it? In the first place, make the land very rich. Manure it generously—plough it thoroughly—harrow it fine—roll it smooth—put on the marker and mark it into rows three feet apart, and sow Indian corn in drills. Hoe it twice, and after the second hoeing take your seed-sower and sow between each two rows of corn a row of flat turnip seed. After your corn has spindled, cut it up; let it wilt, then tie it into bundles and shock it up as you do cornstalks which you have cut in the usual way, and let them stand until dry. It would not be strange if you had six tons of fodder per acre when they were sufficiently dry to put into the barn. This will be twelve tons, (from two acres.) Now, to winter one hundred sheep you ought to have twenty tons of fodder. You have got twelve of them and want eight more, or four tons from each acre. The turnips ought to produce this amount. Let us see. Allowing a bushel of turnips to weigh 60 pounds, in order to have four tons on an acre you should raise 133 1-2 bushels. Will not your land produce this amount after taking away the Indian corn crop?"

Seeds from the North.—It is a great error to plant seeds from States further South. The action of a southern climate upon northern seeds is to hasten their growth and productiveness; whence it will be found that seeds carried northward rarely mature in cold or backward seasons, and are never so productive as in their own climate.

Workmen have commenced preparing the site of the new San Francisco Custom House.

A Chloroformed Horse.—Messrs. Cheeseman & Dodge have a valuable roadster who resolutely eschews all farriers, being determined to go as nature provideth, and as we often see certain poor bipeds of another genus go from necessity—*shoeless*. The horse had long contracted this habit, while every means had been tried, from the nose *twitch*, to that of casting and blinding with straps, &c., occupying the attention of some dozen men in a doubtful issue to set a shoe. This morning as I happened in at the stable, preparations were in progress for a determined *shoeing*. The fine fellow had been kept without his feed for twenty-four hours, hoping that fasting—that terrible mollifier of mettle—might aid the operation. I determined to interfere in behalf of the noble fellow. I suggested chloroform, and got a half pound bottle. A groom led the horse from his stall into the open space, and while he held him by the halter with one hand, applied a saturated sponge holding about two ounces of chloroform to his nostrils with the other. After a few inhalings, he became quite passive; and in 10 minutes or less, was perfectly ready to be shod, which was effected through all the various manipulations, with the same unconcern that any old nag would do, who having travelled a flinty road, gloried in a new set of shoes well hammered on. He evinced no symptoms of sensation, nor flinched in the least during the clinching process. When one foot was finished, in taking up another, he seemed not to realize the necessity of aiding himself to gravitate. Yet his eyes seemed bright and natural. The experiment was deemed perfectly satisfactory, and an increased value laid upon the horse. There was about a fourth of a pound of chloroform used, but a portion, perhaps one-third of it, was wasted in appliance. The operation over, the horse was led out and exercised for a few moments, when his feed was given to him, and apparently relished with great gusto.—*Xenia News*

A Prolific Potatoe.—The following account, from the Tallahassee (Fla.) Sentinel, is hard to beat and hard to believe too, unless he means say that the product of the one potato was planted, and that product replanted, and thus this great yield was the result.

"Steam Mills, Decatur Co., Ga., December 10, 1853.—Mr. Clisby: Dear Sir—A neighbor of mine, Mr. Daniel Rambo, planted this year a large potato of the variety called 'negro killers,' which he cut into seventeen pieces. From these pieces he planted one and a half acres in vines, and on Monday last, I, with other gentlemen, was called to witness the digging and measuring. The potatoes were simply plowed up and gathered as exposed by the plow. 225 bushels were thus gathered. Subsequently, he sowed the same land in barley; and while plowing in the barley, 48 1-2 bushels more of the potatoes were gathered, making in all, 303 1-2 bushels from the single potatoe originally planted. The potatoes weigh 50 pounds to the bushel, and the aggregate weight of the crop from this one potato was therefore 15 175 pounds. Rev. John W. Mills, our circuit preacher, witnessed the digging of the first acre, the product of which was 189 bushels; Mr. Wm. C. Erlers, James J. Coachman and myself witnessed the first day's digging and measuring, and Mr. Coachman and myself saw the measuring of the remainder to-day. If you can beat this wonderful potato, I should be pleased to hear from you. Sam'l H. Dickenson."

Imitative Powers of the Chinese.—It is generally supposed that the Chinese will not learn anything; but no people are more ready to learn if it is likely to be attended with advantage. They have lately been taught to make glass, and turn out bronze argand-lamps and globes, emblazoned with the London maker's name all complete; and actually export these lamps to Batavia. They like putting an English name on their commodities, and are as free with the word "patent" as any manufacturer in Germany. They excel in the manufacture of locks, particularly in padlocks. One of my friends gave an order to a tradesman to varnish a box, furnished with a Chubbs' lock, of which he had two keys, and one of these he sent with the box, retaining the other himself. When the box came back, he found that his key would not turn the lock, though the one he had given to the tradesman acted very well. Thinking some trick had been played, he accused the man of having changed the lock; and after some evasion, he acknowledged the fact, stating that, on examination, he had found it such an excellent one, that he took it off and kept it, making another exactly like it, with the maker's name, and everything complete, except that the original key would not open it. Their mechanical contrivances generally have some defect of this kind. They have never made a watch that will keep time, though they greatly prize watches, and usually carry two. If you ask the reason of this fashion, their reply is: "'Spose one makee sick, other can walkee."—*Sketcher's Tour Round the World*

Discovery of Coffee.—About the year 125[illegible], a dervish named Hadji Omer, was driven out of the community of Mocca. Hunger induced him to roast the *Kahlra* berries which grew near his hiding place. He roasted and ate them as his only means of sustaining life. Steeping them in the water which quenched his thirst, he discovered very agreeable qualities, and also that the infusion was nearly equal to solid food. His persecutors, who had [illegible] of saving them, regarded his preservation as a miracle. It was transmitted into a [illegible] resulting to coffee [illegible] in Constantinople.

Size of our Great Lakes.—The latest measurements of our fresh waters, are these:

The greatest length of Lake Superior is 335 miles; its greatest breadth is 160 miles; mean depth 988 feet; elevation 627 feet; area 32,000 square miles.

The greatest length of Lake Michigan is 360 miles; its greatest breadth 108 miles; its mean depth 000 feet; elevation 587 feet; area 23,000 square miles.

The greatest length of Lake Huron is 200 miles; its greatest breadth is 160 miles; its mean depth, 900 feet; elevation 574 feet; area 20,000 square miles.

The greatest length of Lake Erie is 250 miles; its greatest breadth is 80 miles; its mean depth is 84 feet; elevation 555 feet; area 6,000 square miles.

The greatest length of Lake Ontario is 180 miles; greatest breadth 65 miles; its mean depth is 500 feet; elevation 262 feet; area 6,000 square miles.

The total length of all five is 1585 miles, covering an area altogether of upward of 90,000 square miles.

Remedy for Plant Lice.—Mr. E. G. Mygatt, of Illinois, offers the following remedy for plant lice, so destructive in the early part of the season in the green-house as well as out it. We commend it to our friends for a trial:

"If you have any species of the aphis in your nursery, please make a trial of the following decoction: get from a druggist 1-2 lb. of Quassia, boil it fifteen minutes in six quarts of water; pour off the decoction into a dish pan with handles. When cool get an assistant to hold the pan while you carefully bend down and immerse the branches—giving them a little motion to wet all the insects. Look at your trees two days after; and if the aphides are dead, and the tender shoots uninjured, use and recommend the quassia and let the whale oil soap perform some other office.

"For young and tender buds or grafts, I use the spray from a nearly spent syringe where it is not safe to bend them over the pan.

The Flax Market.—The Scientific American is publishing a series of articles on flax culture, and figures are made to show that the extensive cultivation of the plant would add largely to the income of the country. Great Britain has imported from Russia $26,000,000, worth of flax every year, and as the ports of that nation are now closed by the war, the demand will be greater than it has previously been.

The Scientific American says:—"There are millions of acres in our country, the soil of which has no superior for the cultivation of this plant, and which, we have no doubt, might be profitably applied to such a purpose; there is no mystery whatever about the cultivation; well-drained, plowed, and pulverized loamy soil, the seed thickly sown, and the plants kept free from weeds, are the plain common sense rules for producing flax of a good liber."

Spare the Birds.—On no pretext whatever should farmers or gardeners permit their birds to be disturbed. Instead of killing them or frightening them away, they should make use of every means in their power to induce them to increase in number, and become more tame and familiar. The worst of them earn twenty times what they eat, and then, what exquisite pleasure to have your garden, yard, orchard, or wood, alive and vocal with the music of merry birds! Plant trees for them, build houses, if necessary for them, and they will teach you lessons of domestic bliss—preach you sermons—and warble you such hymns as you never heard elsewhere. Be kind to your birds. Warn off, and if necessary expel all transgressors upon your premises, who seek the lives of these delightful companions. The law is ample to protect your premises.—*Ed.*

Pruning Ornamental Trees.—If a tree has plenty of sunshine and air, with a congenial soil, its beauty will be perfect, and the pruning knife should never touch it. What can add to the grandeur of a tree standing alone in a yard, or a field, or by the roadside, where it has had opportunity to develope itself in all directions. Could symmetry and proportion be more complete? Let the man who has a passion for trimming and *spoiling* trees, study these models. The limbs are none too many, nor too long and hang none too low, notwithstanding he may think otherwise. Pruner, "spare that tree; touch not a single bough."—*Ohio Farmer.*

Greese for Carriage Wheels.—This composition prevents friction to a great extent. Its cost is not comparatively greater than the materials often employed for the purpose; it is not changed by heat and hence [illegible] and flow away from its proper place:

Black Lead pulverized,	50	parts by weight.
Hog's Lard,	50	" "
White Soap,	50	"
Quicksilver	5	"

Amalgamate well the quicksilver [illegible] then gradually add the [illegible] soap, mixing the whole as perfectly as possible.—*Exchange.*

A Hint.—A [illegible] up over [illegible] paper is always [illegible] paper is always [illegible] paper—[illegible] the [illegible] paper [illegible]

Eastern Summary.

THE WAR.

Our dates from Liverpool are to May 6. The intelligence is of much interest.....Odessa, the principal Russian port on the Black Sea, had been bombarded by the combined fleets. The following is the best account we can gather from the meagre telegraphic despatches: On the 6th ult., the steamer Furious was sent with a flag of truce to bring off the British ex-consul and 70 British subjects. The Russians refused to permit the steamer to enter the harbor, and, on her persisting, fired at her and sent out some ships to chase her. The Furious escaped, and brought to the fleet a report of the treatment she had met with. On the morning of the 23d, nine steamers of the allied fleets took up a position before the forts that command the entrance to the harbor, and immediately commenced to throw bombs and rockets upon the forts and the city. One statement says that the bombardment was over in two hours; another that it continued incessantly for ten hours, and only closed with the night. Twelve Russian ships were sunk, and two powder magazines exploded. All the batteries were dismounted, and one Austrian ship was destroyed. During the bombardment, the Russian fleet advanced out of Sebastopol towards the allies, but, on a portion of the British fleet offering them battle, the Russians withdrew to their stronghold. The allied forces lost 11 in killed and wounded. The fleets sailed in the direction of Sevastopol and, as that port is the Russian naval depot in the Black Sea, the next mail will probably bring accounts of a bloody engagement in that vicinity.....The following brilliant feat has been announced: The British steamer Fury, of 6 guns, steamed under Austrian colors within three miles of the entrance of Sevastopol, where she saw two merchantmen, two frigates and a steamer leaving the harbor. The Fury dashed in, seized one of the merchant ships, and towed her off. The Russians gave chase, and the Fury was obliged to cut the prize adrift, but not until one of the frigates and the steamer had come near enough to exchange shots. The Fury succeeded in escaping, and carried off the merchant ship's crew as prisoners, who gave important information respecting Sevastopol.....A bold and successful feat is also recorded of the Russians. A steamship, supposed to be a Russian dispatch vessel, under English colors, boldly steamed from the Archipelago, passed the Dardanelles and the batteries, and succeeded in escaping into the Black Sea.....From the Baltic we have dates to the 27th. Sir Charles Napier, with the line-of-battle-ships under Admirals Corry and Chads, were keeping up a vigorous blockade of the Gulf of Finland, which would render the escape of a single Russian vessel impossible. Numerous prizes had been taken..... The Danish Government still lingers on the side of Russia. The Swedes are decidedly in favor of the allies. One Swedish line-of-battle ship and four frigates were in commission at Copenhagen, and more were being made ready.....A most formidable force of gunboats is being organized by the Russians to harass the invading fleet from the shallow water. Eight hundred armed boats are already enrolled. All the boats of the Neva Yacht Club have been placed at the disposal of the State. Sir Charles Napier is so well aware of the formidable nature of this force, that he has hastily applied to his government for a fleet of small steamers that may penetrate wherever row-boats can. .....The Russian schooner Libertas, Captain Rass, was taken by the British, and a prize crew put on board to navigate the ship to England. Captain Rass being acquainted with British tastes, supplied the captors with an unlimited allowance of brandy. They got drunk; the Russians nailed them below the hatches, and carried them as prisoners to Carlscrona!

GREAT BRITAIN.

The Marquis of Anglesey and Lord Cockburn are dead..... Wednesday, the 26th of April, being appointed as a day of humiliation and prayer, all business was suspended.....Six of the merchant ships captured by the British cruisers had arrived in England. The crews were liberated on parole not to serve against England and France.....The supplemental estimates for the army, navy, and ordnance were laid before Parliament on the 3d inst. These estimates show that war is an expensive game. They amount to no less than five and a half million pounds sterling, of which £3 096,000 were for the conveyance of troops!....At the annual meeting of the "Friends of Poland," the chairman announced that *within a few weeks the flag of Poland would be once more raised against Russia!*—Lord Dudley Stewart having proceeded to the East to facilitate the scheme. The plan had received, until lately, the opposition of Lord Stratford da Redcliffe, on the ground of his anxiety to conciliate Austria. That opposition was now withdrawn.

FRANCE.

Large bodies of troops continue to March in the direction of Toulon, for embarkation for the Levant. An imperial decree calls into active service, on land and sea, 80,000 men, from the 140,000 of the class of 1853.....It is again positively asserted that the French army of the East will be augmented to 100,000 men. The formation of a camp of 60,000 men at Boulogne, with a view to an expedition to the Baltic, is also spoken of. As another proof of the disposition of the government to carry on the war in a manner befitting a great nation, it is intended to propose to the Chambers a demand for authority to raise another loan of 250,000,000 francs, in case it should be needed. .....Admiral de Tinan who has been cruising off the coast of Greece, is to proceed with a portion of his fleet to Algeria, to embark several regiments for Turkey.....The long expected decree for the formation of a new Imperial Guard has been at length issued. The Guard shall consist of 12,000 picked men, having extra pay, whose sole duty is to guard the person of the Emperor.

UNITED STATES.

The steamer Golden Gate arrived at this port on the afternoon of the 15th inst., bringing New York papers to the 20th ult.....The emigrant ship Winchester, bound from Liverpool to Boston, foundered at sea. Four lives were lost.....A terrible explosion occurred at the "English Coal Pit," about fourteen miles from Richmond, Va. Nineteen lives were lost. The debate on the Nebraska Bill was to have been closed, and the vote taken, at noon on the 20th.....A convention of the officers of railroad companies between New York and Alabama was held at Baltimore on the 19th. A resolution was unanimously carried, declaring that the companies represented would not submit, under any circumstances, to the terms of compensation for carrying the mails indicated by the Post Office department in the bill now before Congress.....On the 19th ult., 12,471 immigrants arrived at New York.....A suit of Edwin Forrest vs. N. P. Willis, for a libel published in the Home Journal, has been on trial in the Court of Common Pleas. The Jury were not able to agree. The damages were laid at $10,000.....John S. Sleeper, for twenty years Editor of the Boston Journal, closed his connection with that paper on the 20th, on account of declining health.....The body of Samuel Hunt, Secretary of the Manufacturers' Insurance Company, who committed suicide in November last by drowning, was found on the 13th, on the flats near Cambridge.....The Celeric ship Ericsson had been raised, and it was found that her hull and engines were comparatively uninjured.....The Pacific Railroad bill had been delerred to the 24th.....No tidings had been received from the steamer City of Glasgow, and no hopes are entertained of her safety. ....Hon. Edward Everett has resigned his seat in the U. S. Senate, to take effect in June.....The immense suspension bridge, across the Ohio river at Wheeling, Va., was destroyed by a gale on the 18th. The loss to the bridge company is very large.....The New York Aldermen, by a vote of two to one, have decided against the proposition to cut a new street through Trinity Churchyard.....On the 16th inst., a destructive fire broke out in New York, by which 15 buildings were destroyed, involving a loss of about $40,000.

MARKET REPORTS.

San Francisco, June 21. 1854.

VERY little change has been noticed since our last issue. There is occasionally a rally upon some articles, but it is not permanent. Trade in some articles is improved, but generally remains as languid as usual. Harvesting has commenced; new Barley has made its appearance, and sold at 3½. The Wheat crop will be heavy, although a portion may be lost by smut. We note the shipment of 500 tons Wheat from Chili to this port.

The late rains has been beneficial to the farmer, excepting to the Grain department, and we hope this is not serious.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known UNION HOTEL, situated on the Plaza, in this city.

Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.

The BAR will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) F. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.

Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.

The INTERNATIONAL is conducted on the European plan of lodgings, with meals a separate charge, in a Relectory in the basement, and also a Ladies' Ordinary on the main floor.
E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....Proprietor.

THE proprietor announces to the public that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.

The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the house. There are also Billiard Tables and Ten Pin Alleys connected with it.

For the accommodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake, and to prevent accidents they will be under the especial charge of an "OLD SALT."

An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.

The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:

Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.

Stopping at all the Hotels on the road.

☞ Families called for in any part of the city.

HAVING enlarged their works, are prepared to furnish every kind of castings and machinery on the shortest notice. Their patterns for mill and other machinery cannot be surpassed in the State. And particular attention will be paid to getting up machinery for Flour Mills, Saw Mills, Quartz Mills, &c.; also, will furnish every description of House fronts, or other castings on as good terms as any other establishment.
San Francisco, June 1, 1854. 22-tf

HENRY A. SMITH & CO.'S
GRAND RAFFLE.
$100,000,
CONSISTING OF
TEN THOUSAND DOLLARS IN SLUGS!
Farm, Residence, Building Lots, Watches, &c., &c.
Guaranteed to come off at the
AMERICAN THEATRE,
ON THE FOURTH OF JULY, 1854.
TICKETS ONE DOLLAR EACH.

To be had of the proprietors, at their office, north-west corner of Montgomery and Merchant streets, or at all the principal book stores, hotels and saloons throughout the city and State.

1st Grand Prize—Ten Thousand Dollars in cash..... $10,000
2d Grand Prize—One handsome Residence, consisting of three acres of land, with a beautiful cottage house, in the city of Oakland, on Broadway, within five minutes walk of the steamboat landing. The proprietors own the property under the Peralta title and two years possession—the same, with a warrantee deed, will be given the drawer. Valued at.. 5,000
3d Grand Prize—One Ranch, consisting of 160 acres of land, with a good House, Farming Utensils, &c., &c. This valuable Ranch is located in San Jose Valley, and is held under a confirmed Spanish title. A warrantee deed will be given the drawer. Valued at.. 4,000
4 to 254 Two hundred and fifty Valuable Building Lots in the city of Oakland, the Brooklyn of San Francisco, situated on Broadway, within five minutes' walk of the landing. These lots are unquestionably the most beautiful sites for residences in the State, and are too well known to need description. The proprietors hold the Peralta title and have possession. The drawer will receive warrantee deeds. Size, 25x100. Valued low at $200 each..... 50,00
255 to 465 Two hundred and ten Fine Gold Lever Watches, Hunting Cases, each of equal value. Valued at $100..... 21,000
466 to 666—Two hundred elegant Chinese Shawls, high cost. These shawls are of the same quality as are sold daily in this city at $60 each, each one of equal value. Valued at $50..... 10,000

We, the undersigned, are acquainted with the parties owning the property offered in this Raffle, and also know the Real Estate referred to, and we assure the Public that we consider the title to the property is indisputable.

Hon. D. S. SHATTUCK,
JAMES A. MORRISON, M. D.

The proprietors in conducting this Raffle bind themselves to carry it on in a manner that will be satisfactory to all who may buy tickets. The drawing will be done by gentlemen chosen by the holders of Tickets, each county in the State sending a committee of one for that purpose. Maps of the Real Estate, and samples of the property may be seen at our office, corner of Montgomery and Merchant streets.

For the responsibility of the proprietors of this Raffle, and that it will be conducted with honesty and integrity, we refer to
His Excellency JOHN BIGLER,
Hon. J. W. DENVER, Secretary of State,
J. B. HARDENBERG, Mayor of Sacramento,
Hon. LEWIS ALDRICH,
Maj. W. H. HARVEY, Sergeant-at-Arms of Senate,

THE CROWNING GRACE OF WOMAN.

TO MISS W.

HOWE'ER well moulded is the face,
Each limb and every feature;
Woman should have one crowning grace,
Beyond the gift of nature;
A grace which cometh from above,
That binds the heart to Heaven in love.

May this grace be ever thine,
Throughout life's checker'd road;
And ever sweeter, brighter shine,
Till Heaven is thine above:
And there removed, the scenes of time,
Bloom in immortal, glorious prime.

June, 1854. FLAVIO.

[ORIGINAL.]

MY MOTHER.

O, call me to thee mother!
I'm weary where I roam,
This world is far too lonely—
O, call me to *thy home!*

I'm weary of this life, mother,
I long to be with thee,
And such have been my feelings
Since you died upon the sea.

I dreamed of thee last night, mother,
When thou upon me smiled,
And I could faintly hear thee say—
"Heaven bless my sorrowing child."

But ere the sound had died away
An angel did appear;
He took thee, mother, from my arms,
And I awoke with fear. ROSALIE.

KINDRED SPIRITS.

BY A. FLOYD FRAZER.

GENTLY as the weeping willow
Sighs responsive to the breeze,
Or the morning-zephyrs whisper
To the half-unfolded leaves—
Bend the chords of kindred spirits,
Wakeful to each other's strains;
Each, the other's impulse sharing,
Knows its joys and feels its pains.

Sweetly as the wind-harp trembles,
Swept by fairy hands unseen,
Where the genii haunt the bowers,
In the summer wood-lands green—
Speaks the silvery voice confiding,
Breathing through its tranquil tone
Thoughts, whose depth of latent being
Stirs the fountains of our own.

Fondly as the waking flower,
From drowsy air of night,
Smiles to greet the pleasant morning,
With its cheerfulness and light—
Turns the lonely heart from sadness,
Yielding to the unyetic tie,
Which transmits the sweet assurance
That a sister soul is nigh.

Pure the source, O KINDRED FEELING,
Whence thy sweet impulses flow;
Lending hope, and joy, and gladness,
Man, without thee, ne'er might know;
Thou dost preach of love immortal—
Love beyond the sphere of Time:
Thou findst, sure, thy birth in heaven!
Earth is not thy native clime.

FARMER'S GIRLS.

BY HELEN M. LADD.

Up in the early morning, just at the peep of day,
Straining the milk in the dairy, turning the cows away,
Sweeping the floor in the kitchen, making the beds up stairs,
Washing the breakfast dishes, dusting the parlor chairs.

Brushing the crumbs from the pantry, hunting the eggs at the barn,
Cleaning the turnips for dinner, spinning the stocking yarn,
Spreading the whitening linen down on the bushes below,
Ransacking every meadow where the red strawberries grow;

Starching the "fixens" for Sunday, churning the snowy cream,
Rinsing the pails and strainer, down in the running stream,
Feeding the geese and turkeys, making the pumpkin pies,
Jogging the little one's cradle, driving away the flies;

Grace in every motion, music in every tone,
Beauty of form and feature thousands might covet to own,
Cheeks that rival spring roses, teeth the whitest of pearls,
One of these country maids is worth a score of your city girls.

GEN. JACKSON AND THE CLERK.—Many of our readers will recognize the point of the following joke, which we heard related "long time ago," but which has but lately appeared in print. It will bear repeating.

When General Jackson was President of the United States, he was tormented day after day by importunate visiters (as most Chief Magistrates of this country are) whom he did not care to see—and in consequence, he gave strict directions to the messenger at his door, to admit only certain persons on a particular day, when he was more busy with state affairs than usual.

In spite of his peremptory orders, however, the attendant bolted into his apartment during the afternoon, and informed the General that a person was outside whom he could not control, and who claimed to see him—orders or no orders.

"I wont submit to this annoyance," exclaimed the old gentleman, nervously. "Who is it?"

"Don't know, sir."

"Don't know! What's his name?"

"*His* name! Beg pardon, sir—it's a woman!"

"*A woman!* Show her in, James; show her in," said the President, wiping his face; and the next moment there entered the General's apartment, a neatly clad female, past the middle age, who advanced courteously towards the old gentleman, and accepted the chair profered her.

"Be seated, Madam," he said.

"Thank you," responded the lady, throwing aside her veil and revealing a handsome face to her entertainer.

"My mission hither to-day, General," continued the fair speaker, "is a novel one, and you can aid me, perhaps."

"Madam," said the General, "command me."

"You are very kind, sir. I am a poor woman, General—"

"Poverty is no crime, Madam."

"No, sir, but I have a little family to take care of—I am a widow, sir; and a clerk employed in one of the departments of your administration, is indebted to me for board to a considerable amount, which I cannot collect. I need the money sadly, and come to ask if a portion of his pay cannot be stopped, from time to time, until this claim of mine—an honest one, General, of which he had the full value, shall be cancelled."

"I really—Madam—that is, I have no control that way. What is the amount of the bill?"

"Seventy dollars, sir—here it is."

"Exactly; I see. And his salary, Madam?"

"It is said to be twelve hundred dollars, a year."

"And not pay his board bill?"

"As you see, sir, this has been standing for five months unpaid. Three days hence, he will draw his monthly pay; and I thought sir, if you would be kind enough to—"

"Yes, I have it. Go to him again and get his note, to-day, at thirty days.

"His note, sir! It wouldn't be worth the paper on which it was written; he pays no one a dollar voluntarily."

"But he will give you his note—will he not, Madam?"

"O yes—he would be glad to have a respite in that way, for a month, no doubt."

"That's right then. Go to him and obtain his note at thirty days from to-day, give him a receipt in full and come to me, this evening."

The lady departed, called upon the young lark, and dunned him for the amount—at which he only smiled—and finally asked him to give her his note, for it.

"To be sure," said he, with a chuckle—"give a note—sart'n—and much good may it do you, mum."

"You'll pay it when it falls due, won't you," said the lady.

"O certainly," was the reply. And in the evening she again repaired to the White House with the note. The President put his broad endorsement on the back, and directed her to obtain cash for it at the bank.

In due time a notice was sent to the clerk that a note signed by, will be due on a particular day, which he was requested to pay.

At first John could not conceive the source from whence the demand could come, and supposing that it had only been left for collection, was half resolved to take no notice of it. But as he passed down the avenue, the unpaid board bill suddenly entered his head.

"Who has been foolish enough to help the old woman in this business, I wonder," said John to himself. "I'll go and see, it's a hum, I know; but I'd like to know if she has really fooled anybody with that bit o' paper!" and entering the bank, he asked for the note, which had been left there for collection, against him.

"It was discounted," said the teller.

"Discounted? who in the world will discount my note," said John, amazed.

"Anybody, with such a backer as you've got on this."

"Backer! Me—backer—who?"

"Here's the note; you can see," said the teller, handing him the document; and on which John instantly recognized the bold signature of the then President of the United States.

"*So'd, truly!*" exclaimed John, with a hysteric gasp, drawing forth the money—for he saw through the management, at a glance.

The note was paid, of course, and justice was awarded to the spendthrift at once. On the next morning, he found upon his desk a note, which contained the following entertaining bit of personal intelligence:

SIR: A change has been made in your office; I am directed by the President to inform you, that your services will no longer be needed in this department.

THEODORE PAYNE. SQUIRE P. DEWEY.

HENRY McNALLY, No. 185 Washington street,
15 1m (between Battery and Front streets.)

BATES' SUPERIOR
UPLAND BELL CRANBERRY.

THE PROPRIETOR has been induced to present this Circular to the public on account of the numerous applications from distinguished Horticulturists, Amateurs, Land Agents and others, in different parts of the Union, personally and by letter, wishing information in regard to cultivating this valuable fruit upon ordinary upland, and would respectfully invite the attention of Gardeners and Fruit Growers, to such facts only as have come directly under our own experience and observation.

Soil, Propogation, Management, &c.—Having tested the plants thoroughly in all kinds of soils, we have no particular choice in their selection. We know of no kind of soil in which they would not be likely to grow well if managed according to our method. We should not choose a perfect clay soil, extremely liable to bake, nor a perfect sand, containing no power of vegetation.

In extensive field culture, the Bell Cranberry flourishes well in soils varying from moist to dry. No great degree of moisture is necessary, providing it is more or less uniform. Any soil that the strawberry can be grown on to advantage, is well adapted to the growth of this plant, but no animal or vegetable manure should be used, as the fruit draws most of its nourishment from the atmosphere. The vines propagate by runners, like the Strawberry, and will flourish in almost any soil and section, under good management. Where the land is rich and liable to grass and weeds, we prepare the ground by removing the top soil at a sufficient depth to prevent their growth. This may be easily done by plowing the sod, and removing the top soil in carts or otherwise. The object in doing this is to make the soil so poor that nothing will grow to obstruct the growth of the Cranberry Plants, bearing this in mind, that I am fully satisfied, from long experience in the business, that the Cranberry derives its nourishment only from the air and moisture.

If the land is poor, so that grass and weeds will not vegetate then it may be plowed and harrowed without other preparation. If these rules are followed there is no difficulty whatever in their cultivation. Persons having a garden of moderate size, and wishing to raise their own Cranberries of a superior quality can do so by obtaining a few plants, and with a small amount of labor at the commencement, will find their cultivation both easy and profitable.

Persons wishing for Plants can have their supply of the subscriber. The Plants will be carefully packed in meadow moss, and well boxed, which will enable them to go to a great distance in a fresh state.

The proper time for Fall transplanting is October and November; for Spring, from the opening of the snow till about the 25th of May. Persons wishing for Plants, are requested to order as early as the first of September, for Fall transplanting and during the winter for Spring. 15

SULLIVAN BATES,
Bellingham, Norfolk Co., Mass.

Valuable Plants.

FOR THE GARDEN, Nursery, Green-house and Pleasure Grounds. Carriage paid to Boston. B. M. WATSON, Old Colony Nurseries, Plymouth, Mass., offers for sale a very complete collection of plants of every description, including all those of recent introduction. Catalogues gratis, and postpaid on receipt of a postage stamp. Usual discounts to trade.

Dwarf and standard fruits of the very best sorts.

200,000 APPLE, PEAR, Cherry, Quince, (Angers,) Mahaleb and Paradise Stocks.

Currants, Gooseberries, Raspberries, Rhubarb, &c.; Asparagus, Needham's White Blackberry, High-Bush cultivated Blackberry.

Strawberries, the finest collection in the country, in nearly a hundred varieties, including every novelty of foreign or native production.

Scions of best Fruit and Ornamental Trees and Shrubs.

Ornamental Trees, Shrubs and Hedge Plants, for the Avenue, Lawn, Cemetery and Street, in great variety, including many novelties. Weigelia Amabilis, (new yellow,) $1. Deutzia Scabrella, (new,) $1. Spirea Callosa, (new,) $1.50. Pyrus umbellata roses, $1.

300,000 Norway Spruce, Silver Fir, Austrian Pine, Scotch Fir, Arbor Vitæ of sorts, Scotch Larch, &c., with varieties of Deciduous Trees, suitable for nurseries or hedge, &c., worth from $10 to $20 per 1000.

A very large and fine collection of new and striking varieties, recently imported, of Verbenas, Fuchsias, Daily-flowered Chrysanthemums, (100 var.), Salvias, Heliotropes, Scarlet Geraniums, Petunias, Roses, Double-Quilled Belgian Dahlias, Lantanas, Carnations, Dahlias, Cuphœas, Achimenes, Gesneras, Gloxinias, Cinerarias including the best foreign novelties for 1854.

Fine named collections of Iris, Phlox, Viola, Lobelia, Sedums Potentilla, Campanula, Polyanthus, Hollyhock, Pansy, &c. Japan Lilies, Gladiolus, Tiger Flowers, Tuberoses, &c. Oxalis Deppei, fine for edging and bedding, $10 per 1000.

☞ Catalogues now ready. 16 1y

Lots for Sale in Horner's Addition.

THE subscriber has removed his office, books, maps and records, to the old San Miguel Rancho House, one mile southwest of the Mission Dolores Church, where he can be consulted every day. Those who may wish to purchase in HORNER'S ADDITION, or Villa Lots of any required size, from one to twenty acres, with clear and undisputed titles, would do well to call upon him before buying elsewhere, for it will cost nothing to get posted up before purchasing. Those wishing to purchase will find it to their interest to call at the "Old Rancho House" where they can see an abstract of the titles, the identical lots with their boundaries, advantages, elegant situations for residences, gardens, &c., &c.

J. M. H. can be seen at Horner & Co.'s Counting Office, on Davis street, corner of Broadway Wharf, between the hours of 12 M. and 3 P. M. [15] JOHN M. HORNER.

RIVETT & CO.,

IMPORTER OF *PAPER HANGINGS.* Country dealers and the trade supplied at a liberal discount.

Dealers in Paints, Window Glass and Upholstery Fittings.

Paper Hanging, Upholstery, &c. executed with despatch and at the lowest city prices.

☞ *IN SIGN PAINTING* we defy competition, having engaged one of the most eminent sign painters in the state, we are now enabled to execute every description of sign work on the most moderate terms. 28 K street,
16 between Front and 2d, Sacramento city.

Mission Pottery,

Corner of Folsom and Clara streets, San Francisco, Cal.

DONAGHHO, WALTER & CO. have constantly on hand, a large assortment of Flower Pots, Stove Tubes, Chimney Pots, Jugs, Milk Pans and Butter Pots, and all articles in the line of business.

Orders promptly attended to 15 3m*

THE CALIFORNIA FARMER

And Journal of Useful Sciences.

VOL. 1. SAN FRANCISCO, THURSDAY, JUNE 29, 1854. NO. 26.

THE CALIFORNIA FARMER,
AND JOURNAL OF USEFUL SCIENCES,
PUBLISHED EVERY THURSDAY MORNING.
BY WARREN & SON
Office in Musical Hall Building, Bash street.

TERMS.—Eight dollars per annum, in advance; or delivered by carrier at one dollar per month.

ADVERTISEMENTS.—A limited number of Advertisements will be inserted at the following rates: For one square of eight lines, per month, $6. For business notices of five lines or less per month, $3. A slight reduction will be made to regular advertisers.

[From the American Agriculturist.

Two Farmers Contrasted.

As you have so far broken the rule which barred you from publishing articles not *strictly agricultural*, as to give place to occasional jottings, I thought perhaps your readers might be interested in a couple of incidents that fell under my notice the last year. Although small in themselves, they convey a lesson of much import, and as the best coloring could not give them the least beauty, I shall content myself by giving the facts just as they occurred, hoping that while the example of the one may be condemned, the other may be properly appreciated.

Having business with the agricultural portion of the citizens of one of our Middle States last autumn, I had good opportunity to note many almost *curiosities* that came under my observation in various ways. I found some sections where the tillers represented so many different nations of the East, and so many different languages were spoken, that I sometimes required more than one interpreter to accompany me. In one of my business excursions I called on one of the tillers of the soil for a few moments, and having completed my business, was about leaving, when a bright-eyed little boy came skipping along, holding in one of his hands a large, fair apple, which was partly red colored. The animated sparkle of his eye, and the intelligent appearance of his countenance completely captivated me, and I felt an interest in him from that moment. Said he:

"Pa, see what a pretty apple I have found, half red and half green, and it is sweet, and I want to know what makes this apple sweet?" "'Cause it growed so," said the father gruffly. "Well, Pa, all t'other apples that have red on them are sour, and why isn't this sour too?" "'Cause didn't grow so," more gruffly than before. "Well, pa, do tell me what makes apples sweet?" "'Cause they grow so *I tell you*;" (this was said sternly and in a very emphatic manner, accompanied with a menacing gesture;) "and if you don't stop asking your foolish questions I will *whip* you again—I should think that I had whipped you enough to whip all the foolish questions out of you, but you don't know how to say anything but ask questions. Now hold your tongue and be off." The little boy said, as he turned to obey, "Pa, I'll try not to ask more questions." This was said in a subdued tone, and his face was suffused with tears, while the elasticity and ardor of his movements were visibly damped. I loitered a moment to see what might follow, when the father turned to me and said, "that boy is almost *spil't* by going over to my neighbor SMALL'S, who has a couple of boys about his age, and Mr. Small wants my John to come over sometimes and *larn* with his boys. He *allers* telling them something when he's at work about felosephy, as he calls it, and I wish he'd keep it to himself, for boys oughn't to know too much, and if he don't quit telling my John so much stuff, I shall keep him at home, I shall."

As I had previously finished my business, and seeing but little chance to help little John, I resolved to learn what kind of a neighbor Mr. Small was. I soon after called, and found him to be a farmer and true gentleman. Every thing showed that he was as near master of his profession as any in our country. Every tool had a place, and was in its place, too, and so arranged as to be come-at-able when wanted without any needless waste of time, while the general appearance of his farm showed that they had been used when needed. I soon had an opportunity to see the two boys that John's father had spoken of, as two active little lads joined us, and the father introduced them as his sons. There was none of that shyness we often see in country lads, nor of the wayward-ness that we sometimes observe in city lads, but a sort of manliness that makes one feel acquainted from the first sound of their voices. They were true types of their father. The elder had in his hand an ear of corn partly red, and when a pause in the conversation ensued, he said to his father: "Pa, may I ask a question?" "Yes," said Mr. Small, "if it is not a long one." Well, you see this ear of corn has some red kernels in it, and Bub and I cannot agree how it [illegible] Bub says it was [illegible] our field that was [illegible] I showed Mr. Small [illegible] as he was about [illegible] Mr. Small [illegible] a sack [illegible] of either to give the true cause, but that each should state his views since he had no recollection of ever explaining to them the reason for such occurrences, so turning to the elder, he said: "Edwin, let me hear what you have to say, and then Bub shall have his turn at an explanation."

We had reached a beautiful eminence as Edwin commenced and said: "You remember, Pa, to have told us that unless the pollen of the anthers (which grow on the upper end of the corustalks) should fall or be carried by the wind to the *silks* or pistils of the ear-shoot, there would be no corn on the cob. Now if the pollen can be carried by the wind as well as by the hand, as you showed us, there is no reason why the wind should not blow the pollen from P.'s corn to ours, although it is near half a mile off, and the wind blowed from his corn-field toward ours, too, from the time it was *silked* until it was full in milk, and I told Bub that this was the most likely way that it came that we have red corn in ours this year." "Now, Bub, for your turn," said Mr. Small. "Well, Pa," said he, "I have changed my mind some since brother has been talking, as it has put me in mind of what I read in the 'Agriculturist.' The paper said that it was very difficult to raise pure seed of any kind, for there were so many bees and other winged insects that were all the while going from one flower to another, and carrying the pollen on their bodies, thus mixing melons, cucumbers, squashes, corn, as well as all other such plants and vegetables, so that it must be very difficult to raise any pure variety. I can only wonder now how we find them so pure as they are, but there is something else where I am more puzzled, and that is to find out how it is that so small a speck of a fine yellowish powder can impart an influence to a yellow variety of corn that shall make red kernels grow on the same cob, when the juice that supports both the red and the yellow corn comes through the same source to the ear; can you explain, father, for I find nothing in any book that tells me?"

"Well, my sons, you have between you spun out a long story, and have reasoned or quoted correctly, too; but how to answer the question Bub put, will take more time than I now have, but we must all study, and when we have time we will see whether there is any satisfactory reasons given in any of our books."

I heard much more such conversation, that was not only interesting, but instructive, so much so, that I determined to pay another visit. Should this prove acceptable, I will try to give you the history of the other call at some future time. J.

[From the Boston Cultivator.

A Home Picture.

'Twas a clear, cloudless New Year's eve. The blue vault above, star-gemmed and bathed in brightness, its beauty mirrored upon the snow-wreathed earth, reflecting a sheet of silver light upon its surface, presented a magnificent scene, enlivened ever and anon by the merry tinkling of bells. Many were the sorrowing hearts that looked out upon the lovely scene, which seemed to them only a mockery of their misery—the sons of want, to whom the new year was but the renewal of a bitter struggle for a daily subsistence, and upon whose sufferings the heartless world turned as coldly as the scene around them. Many to whom the past year had been the burial of their brightest hopes, and to whom no bow of promise appeared in the future! many, very many there were, who had felt the strong ties of affection, had seen the grave close over their dearest earthly friends, and now darkly, bitterly felt that they must tread life's weary way alone!

But all were not sorrowful—some hearts beat high with joyous hopes, looking to the new year as the fulfilment of many bright anticipations, and among these was Nelly Sedley, the belle of the little village of N., but not a coquette—she was too pure and good for so unworthy a mission! She sought not admiration, yet all unconsciously, her artless manners and loving spirit had gained for her the love and homage of many hearts! She had a kind word and pleasant smile for all, yet one alone had succeeded in obtaining that priceless treasures—her young heart, with the wealth of love.

Harry Norton had sought out and won the fair flower from its secluded retreat, and was about to transplant it where it might grace the bower of another home, and a little party had assembled at the old farm-house to witness the wedding ceremony. How cheerily the old-fashioned parlor looked! It had no brilliant adornings, but so cozy and comfortable with its neatly papered walls and substantial home-made carpet, the cheerful wood fire blazing brightly upon the [illegible] hearth, the [illegible] to the polished brasses. The cheerful [illegible] and lighted by the [illegible] bride. How [illegible] lovely she looked, arrayed in a [illegible] white [illegible] purity and innocence! A single rosebud nestling in the glossy braids of her hair, her only ornament! As she stood before the man of God, with confiding trust in the manly heart beside her, all present were weaving for her bright visions of happiness. The ceremony over, all crowd around to offer their congratulations, to express their warm wishes that the bright visions they had been weaving might all be realized! They rejoiced in her happiness, yet there was sorrow at parting! She had been the sunlight of the little village, and very much would she be missed. She might have lacked that power which contends bravely with whatever opposes it, yet this deficiency was amply supplied to her in the full tide of overflowing affections and sympathies, which disarmed opposition and drew around her a circle of loving friends, and to each of these she now bade a sad yet hopeful adieu. The younger members of the household band crowded around for a parting kiss from sister Nelly! The honest old farmer brushed away a tear as he bestowed upon his daughter a parting blessing.

One year of wedded life has nearly flown, and now in a lovely cottage upon the winding banks of sweet Mersomere, we will again introduce our fair bride. How tastefully the little parlor is arranged with its simple mirror, the windows in their muslin drapery, graceful as though a fairy hand had adjusted it. A few choice paintings adorn the walls. A seraphine occupies one corner, and a collection of choice plants another, bearing evidence that a taste for the ornamental had not been neglected. A bright fire blazing in the grate reflects a cheerful light over the little apartment; our sweet friend Nelly is sitting at the little work-table, and beside her we recognize him to whom her young heart was plighted, with book in hand, reading aloud to her. The same joyous spirit looks out from those loving eyes, no shadow had yet darkened that young life. They had lived for each other, and now that another had been added to their heart's treasures, life had become doubly attractive to them. As they together doated upon the pledge of mutual love, they felt that their cup of happiness was full to overflowing! But shall it always be so? Alas, that the brimming cup should be dashed from their lips, and that by their own hands! While basking in the sunshine of each other's love they had forgotten that the flame must be replenished, or its brightness would become dim; that it must be nourished by kind words, by frank and courteous manners, that it must be carefully watched, lest some unkind word or suspicious thought sully its purity; but this they have neglected, and a barrier had grown up between their hearts.

We are not about to write some startling event to portray exaggerated feeling which may have its counterpart in reality, but oftener exists only in the imaginations of the writers of fiction, or to hold up deeds upon which the world looks with admiration or scorn, but to delineate a picture which hangs like a cloud over many dwellings, spreads a blight over many home circles, where the world least suspects it.

Two brief years have passed away, and we will again visit our friend's dwelling, but alas, how changed! The air of cheerfulness which pervaded the little dwelling has fled, and in its place is the appearance of neglect; and Nelly too has changed; we should hardly recognise in that pale and anxious countenance the once laughing and happy Nelly Sedley. What has brought the shadow upon that fair brow, and the melancholy light into those loving eyes? Many, very many are the hearts which appear in the presence of the world gay and happy, whose domestic happiness is embittered or destroyed by the absence of sympathy and the reciprocation of those little numberless acts of kindness which keep alive the flame of love in the hearts, and by a fault-finding and reproachful spirit on the part of any member of the home circle.

'Twas too much for the gentle and loving spirit of Nelly, nourished as it had been in the bosom of affectionate parents and brothers and sisters, to feel that the being for whom she lived did not sympathise with her, and daily, to listen patiently, uncomplainingly to his reproaches. With [illegible] what of pride and coldness, perhaps, [illegible] yet in secret she wept bitter tears! Nor was Harry altogether to blame; he had felt that [illegible] were not as they should be; he panted for the [illegible] welcome, for the love which had been the [illegible] light of his home. That pale, sad face would haunt him, and bitterly it upbraid him for [illegible] proach himself for many a [illegible] would be forgotten in the [illegible] to the wife [illegible] the sorrows [illegible] spirit! But the [illegible] [illegible] the [illegible] [illegible] too late; reason had forsaken its throne, yet in those incoherent wanderings were murmured unconsciously, reproaches upon him who had destroyed her happiness!

For a few brief days the spark of life flickered in the socket, and then went out! Witness now, in the darkened chamber of death, the strong man bowed in grief, with the past, the present and future, like a void picture spread out before him, bitterly learning the lessons that only love and sympathy afford true happiness, and that these, when the heart most pines for them, may be denied!

VIOLA MAY.

The Sphere of the True Woman.

THE true Woman for whose ambition a husband's love and her children's adoration are sufficient, who applies her military instincts to the discipline of her household, and whose legislative faculties exercise themselves in making laws for her nursery; whose intellect has field enough for her in communion with her husband, and whose heart asks no other honors than his love and admiration; a woman who does not think it a weakness to attend to her toilette, and who does not disdain to be beautiful; who believes in the virtue of glossy hair and well-fitting gowns, and who eschews rents and ravelled edges, slipshod shoes, and audacious make-ups; a woman who speaks low, and who does not speak much; who is patient and gentle, and intellectual and industrious; who loves more than she reasons, and yet does not love blindly; who never scolds, and rarely argues, but who rebukes with a caress, and adjusts with a smile; a woman who is the wife we all have dreamed of once in our lives, and who is the mother we still worship in the backward distance of the past: such a woman as this does more for human nature, and more for woman's cause, than all the sea-captains' judges, barristers and members of parliament, put together—God-given and God blessed as she is! If such a wife as this has leisure which she wishes to employ actively, she will always find occupation, and of a right kind too. There are the poor and the sick round her home; she will visit them, and nurse them, and teach their children, and lecture their drunken husbands; she will fulfil her duty better thus than by walking the hospitals, or preaching on Sundays! There are meetings to attend also, and school committees, and clothing-clubs and ragged schools to organize; and her voice will sound more sweet and natural there than when shrieking through a speaking-trumpet or echoing in court. And there are books to read, and then to discuss by the fireside with her husband, when he comes home in the evening—though perhaps his attention may sometimes wander from the subject to her little foot, peeping out from under the flounces over the fender, or to the white hands stitching so busily,—and is not this better than a public lecture in a Bloomer costume? And then, perhaps, she can help her husband in his profession, write out a clear manuscript for his editor, or copy a deed, find out references and mark them for him, or perhaps correct his sermon, to the general advantage of his congregation,—which, we contend, is a fitter occupation than arguing divorce cases in a wig and blue bag or floundering in the quagmires of theology in bands and a scholar's hood. Our natural woman, too, loves her children, and looks after them; but the babies of our emancipated woman belong as much to the State as to her, and as much to chance as to either. Our natural woman plays with her children, and lets them pull down her thick hair into a curtain over her face, and ruffle even her clean gown with their tiny hands; but the emancipated woman holds baby up by a degradation, and resigns it to servants and governesses.

Give us the loving quiet wife, the good mother, the sweet unselfish sister; give us women beautiful and womanly, and we will dispense with their two years' service and [illegible] or two or three years's [illegible] in a [illegible] room.

Let women have their rights in H[illegible] name let [illegible] to [illegible] they [illegible] fit, and give them [illegible] [illegible] in—but to their [illegible] and the [illegible] ; and a [illegible] and a friend; but [illegible] [illegible] [illegible]

complete in their lives. Rest in the shade, dear woman! Find your happiness in love, in quiet, in home activity and in natural duties; turn as from your ruin from all those glaring images of honor which a weak ambition places before you. —*Household Words.*

Familiar Sketches of the Natural History of California.

BY ALEX. S. TAYLOR, OF MONTEREY.

THE CORRERO DEL CAMINO, - OR SNAKE BIRD.

This singular bird, found only, we believe, in California, is one of the most extraordinary curiosities of natural history in our State. It is an inhabitant of the coast counties of Southern California, and in some portions of San Diego it exists in large numbers. It delights particularly in arid, stony lands, where the cactus species grow, and where the rattlesnake is common. In some parts of the Lower Peninsula, it is said to be very abundant. The habits of this bird are what may be called wonderful. It may generally be seen on the roads or paths, and when aware of the approach of a passenger, runs off with the swiftness of a racer. Hence, the Spaniards calls it the "Courier." The Correro is the mortal enemy of the rattlesnake, and other snake tribes—retaining all the antipathy of Eve to this class of the animal creation.

What we are about to relate may seem a pleasant piece of California Munchausenism, but it has been confirmed to us by too many respectable persons, native and American, to leave the slightest doubt of its truth.

The rattlesnake, as before stated, is found in great numbers in Southern California, and across the frontier, where the cactus covers the ground. The Correro is always his neighbor, and wages eternal war on him; lying in wait for his enemy with all the craft of the Indian, to surprise him snugly coiled up and asleep. Then is his time. With the greatest stillness, slyness and hurried dispatch, he gathers the fallen cactus fruit and dry lobes, and quietly corrals him in, to the height of two or three feet—the spikes and spines of the plant, strong as needles, making a splendid procrustean fence for the passionate and fiery "Cascabella." This much accomplished, the bird now gathers with his feet and claws, the hard young cones of the pine—and they are as hard and as heavy as stones—and hovering over his enemy, like a fluttering hawk, lets it fall from five or six feet height in the air on the infuriated viper, who, surrounded by prickles and points wherever he turns, is soon fully aroused to his danger—the bird, with malicious screeching, dropping cone after cone, or stones, as the case might be, until his foe is vanquished, when he demolishes the corral, and picks the snake to death with his iron beak.

It is said not to be a bird of prey, or living on flesh, but entirely on grain, like the Gallinacia, to which class of birds it is in nearly every respect allied. It measures at times two feet from the end of tail to tip of beak. The tail has four or five long feathers, and is sometimes a foot in length, tipped with white. It stands six inches from the ground when erect, and its feet furnished with only four toes—two in front and two immediately behind of smaller size—and all guarded with sharp needle-like claws. The color of the bird is a mottled yellowish grey. When full grown, it weighs about twelve ounces, though we have heard of them being killed at the South, of one and a half pounds in weight.

But the great features of this strange bird, is the tuft on the head, which is depressed when not alarmed or excited, but when in danger, erect and rampant; and the beak, which is two and a half inches long, is sharp as a knife, and hard and polished as steel. It measures across the body, when the wings are closed, four inches.

This description is made from a specimen killed lately near Monterey.

The first settlers and colonists of the old Spanish times noticed particularly this bird, and protected it as an adversary of the rattlesnake, which is said to be gluttonously fond of its eggs. The old priests were always on their guard about "viboras," as the intractable Indians at times resorted to this plan to poison the good fathers, who were obliged to drive good habits and principles into their stubborn neophytes, by applications to their bodies of a stern and smarting nature; as we fully believe was necessary and proper. An ancient tradition of the country, which is vouched for as true by some of the King's old soldiers, still living, relates, that on one occasion as Padre Junipero was about to administer the Holy Sacrament, and had uncovered the chalice to present it with great fervor to the assembled congregation, white and red, a big rattlesnake, with fiery eyes and rattling tail, erected himself out of the vessel, to the dismay of the terrified priest; the reptile having been placed there by some of the incorrigible Gentiles. Hence the Missionary fathers conceived for them a bitter enemy, and rated the creatures as condensed Apollyons, with a chime of devilish bells tinkling at their tails. From this war of extermination no doubt is to be deduced the fact of the great scarcity of the Cascabellas in the vicinity of Monterey, for it is very rarely they are seen in this country.

We have never seen a printed description of this curious bird, and believe it has not been described before.

LATE FROST.—Mr. Quant, of Napa City, informed us that quite a hard frost was experienced at that place on Thursday morning last, doing injury to young seedling trees and vegetation.

Napa and Sonoma.

We are enthusiasts, but it is in the best sense of that words. Well has it been said "God made the country." Let any one stand upon the hills that rise in these great valleys, and they would see the Divine hand in the beauty that lies before them; they would see also in the incipient stages of cultivation and settlement the design of the Creator in drawing to these and other similar valleys the rural population that is destined to be the foundation of a great empire.

In connection with a committee of visitation and investigation of farms, orchards, &c., we have made a partial survey of several parts of these valleys and shall briefly note these—reserving to a future time, and to the Reports of the Committee, the complete data—as on these will be founded the Premiums to be awarded by the State. After leaving Benicia, we rode rapidly over the hills through a portion of the Suisun valley to Suscol, the route being an undulating country, and the hill sides presenting the dry and yellow aspect of the harvest season—the hills around Benicia and for miles covered with the wild oats, of which abundant crops are annually gathered.

We passed the large ranch of Messrs. Clark & Curtis, used for raising hay and stock. Messrs. C. & C. will harvest and press some thousand tons of hay the present year. Several other large hay farms are in the same valley. Upon entering Napa Valley an increased verdure is apparent—an extended and improved Agriculture is readily manifest at and around the ranches established. The nursery, vineyards, and orchards of William Neely Thompson, Esq., gave evidence of great care and interest in the advancement of horticulture.

Napa city is much larger, and a better and more thriving business is transacted here than our citizens suppose. Several large and fine hotels and public buildings, stores well stocked, and quite a lively business, denote a healthy tone in this great valley. The many improvements going on are noted elsewhere in our columns. Some of the finest ranches in this State may be found in this vicinity, including one of George Yount, Esq., where large vineyards and orchards are laden with fruit, where are found butter and milk dairies, grain fields of one thousand acres, flouring mills, stock farms, and all the indications of a wealthy and successful farmer. Here is found much to interest. Mr. Kellogg is the proprietor of the large warehouse for grain at Napa city. He has many valuable improvements—a very extensive dairy—the water coming from the mountains sufficient to carry a mill, and thence passing through the dairy rooms, and churning the butter by water power; thence to a wheel which moves a turning lathe, machine shop, &c., and thence to his large orchard for irrigation. The fruit orchard is in excellent condition, and full bearing, including apple, pear, peach, fig, and large vineyards.

Mr. Geo. Boggs, formerly of Missouri, has a very fine farm in extra order—fine brick buildings, and fences and grounds indicating the real farmer. Angus Boggs has also a very fine farm, and some of the finest stock we have seen in the country—among them a portion of the best stock from Ashland, once owned by that great patriot, Henry Clay. The wheat fields are most promising and heavy. Henry Boggs has a very excellent farm, and in fine order. Mr. McNeil cultivates a large and valuable farm and fruit orchard—peach trees only 15 months old in full bearing. These two last were passed in the shades of evening. J. W. Osborn has a farm of 800 acres, of which 500 in cultivation presented features of farming very gratifying. Over the entire grounds are excellent fences, guarded from fire by a space around each field. The building for his stock manifests the right idea of farming. He has a fine garden and orchard in the highest state of cultivation, containing apples, pears, peaches, cherries, plums, currants, strawberries, and raspberries; also, a neat flower plat and lawn, interspersed with roses, evergreen shrubs, &c. A very genteel mansion graces the grounds, and adds the finish to the scene. Apart from these grounds is the stock farm, embracing some very extra stock. He has 250 acres of wheat in very promising growth, nearly ready for the harvest, and averages over 40 bushels to the acre. There is also an orchard of over 50,000 young peach trees for the budding knife. It is the examples of these farms and orchards that stimulate and prompt men to labor for success.

At Mr. Lillie's we note a fine tepid and sulphur spring, where have been erected very neat and convenient houses for bathing, and ere long these and other similar springs will draw many visitors to Napa city for pleasure as well as health. Capt. Charles Van Pelt has a very fine ranch at Napa, well cultivated and stocked, with very fine buildings in the modern style, and in the taste and design of buildings giving promise of a good future.

In the Sonoma Valley we visited the farm of Mr. Leavenworth, upon which has been recently discovered valuable springs, over one of which Mr. L. has erected a neat building for the convenience of bathing. The grain fields here look promising. The farm of Col. Hooker gives evidence of his personal care. The Col. has some very rich spots, and will ere long present all the features of orchards and gardens in their luxuriance. The farm of D. W. C. Thompson, comprising about 500 acres, presented many interesting features—some 450 acres of grain, nearly all ready for the harvest—reapers at work upon portions of it. The wheat was free from smut or rust, and promised a good average yield. An excellent feature of this farm is the fences. Here are also an excellent dairy, turning out 500 lbs. of butter monthly, a good family flouring mill, neat outbuildings, a very handsome cottage, and all the comforts of home. The majestic oaks that are spread over the farm give a beauty and dignity that cannot be found without them. We noticed some very stately oaks near the house, and near to them large "Buckeyes" in full bloom, casting their fragrance upon the air. Beneath this cool and shady retreat Mr. T. has his summer stable for his horses. He uses Hussey's Reapers and Prouty & Mears' Plow, and recommends them.

Returning from Sonoma, the farm of Major Beck presented some very fine grain fields—wheat very fine. A young orchard of peach, cherry and apple gave promise for the future. The fine farm of Mr. Clayton, also of Sonoma, was of interest, beautifully located on a pleasant terrace, facing the lofty hills, and a fine deep soil, with running streams in the garden in the rear—wheat fields; 17 acres corn; good stock; a very handsome cottage, with every "home comfort." These are the evidences we love to look upon, for they speak of permanency and prosperity.

The fruit orchards of Julius K. Rose, Esq., was of more than usual interest. A very large vineyard of old vines (nearly 2,000) with abundant crop, and young vineyards of thousands more. A large orchard of apple trees, with branches bending with the crop upon them; every tree requiring strong props to support them. Very large fig trees, also, full of fruit. Peaches, a large number—young trees. Apricots in full bearing. Pear trees bending with fruit, and all trees in excellent health except the peaches. Here we noticed the same disposition to disease in the native or southern peach, while the northern was in good health. These orchards are truly a wonderful sight, and more than half the fruit now on the trees should be removed to save the trees or secure their ripening. A very pretty fortune in store from this orchard.

Gen. Vallejo's farm and gardens were most gratifying to visit, and the General felt pleased to see the interest manifested by the State in Agriculture, and by the visit of the committee. The General has redeemed a large tract of land by excellent cultivation and irrigation. A large spring has been opened in the mountains above the house and conducted to the immediate vicinity of the ground by pipes, furnishing water for all the uses of the house, and led from thence to each section of the building and each corner of the garden, furnishing a constant supply of very pure water. An elegant mansion has been built in modern style, with the improvements within and without. The garden contains fine fruit trees, apple, pear, peach and fig, in bearing. A very excellent flower garden, an abundance of flowers and a good promise of fruit. We regretted to find the General unwell, but his attentions and hospitalities marked the true Spanish gentleman. We trust his health will be restored and his success in Agriculture be abundant.

The committee in visiting the several farms and grounds named, have received very kind attention from all, at every place they visited, and have enjoyed the scenes witnessed, and consider their duties were made light by the courtesies received. To D. Hale Haskell, Esq., of this city, and J. W. Osborn, Esq., who conveyed the committee from place to place, the committee are greatly obliged. Santa Clara and other valleys are to be visited, and a full and detailed report will be prepared and submitted in the autum by the committees. The present is but a slight sketch to show to those who begin to feel an interest in Agriculture, the advance which has already been made throughout the country.

The committee are composed of Colonel J. B. Crockett, Judge Blair, and the editor of this paper, and were accompanied by Theo. Adams, Esq., and the gentleman who conveyed the committee.

GRAIN WAREHOUSES.—It will be recollected that some months ago we suggested the importance of concentrated action among the grain growers in the several counties, and the erection of large warehouses for storage of the grain; and an arrangement among the growers themselves so that they could command this fall the full value of their crops by not forcing them into the market. We examined at Napa City last week a very fine large building, 60x80, two stories high, erected by Mr. Kellogg, for this purpose. The lower room is twelve feet high, and capable of holding 40,000 bags of grain. The upper room is to be finished in part as a hall for the Masonic and Odd Fellow fraternities. The lumber was prepared in the valley twenty-three miles above, by steam power. About ninety thousand feet of lumber were used in the building. The entire cost of the building will be some $6000 or $8000. We are informed that over $10,000 was lost in this valley last year, for want of such a building. The warehouse was built by Mr. Lillie, a thorough and practical mechanic, and reflects credit upon his ability. The great interests of agriculture are being cared for.

A NEW PLANT.—J. B. Polley, Esq., of Downieville, very kindly brought us down a specimen plant of a most remarkable and most beautiful habit, character and species. It is a fibrous rooted plant of succulent growth, throwing up a spike of very rich crimson flowers and fruit, and giving forth a pleasant ordor. The spike of flowers is about fifteen inches long, and contains within the flowers about sixty berries or fruits the size of a filbert, enclosed in a covering similar to the filbert, but of deep crimson. Altogether, it is a wonderful and curious specimen. It can be seen at our office.

DOUBLE-HEADED BARLEY.—We were presented while at Napa City, with a cluster of double and treble-headed barley, of most remarkable size. They were the product of seed from a head of the same character last year, thus continuing the species. They were given to us by Dr. Stillwagon, of Napa, from Mr. Harden's field. These heads are most remarkable and worthy the attention of grain growers. They can be seen at our office.

Superintendent Beale---Tejon Reservation.

FACTS CONCERNING THE INDIANS.

If benefits conferred upon the human race—if transforming a race of savages into men and teaching them the arts of civilization, can render a man's name and character immortal, that of Lieut. Beale is destined to shine as one of the brightest in history.

Lt. Beale has devoted himself to the amelioration of their condition, with a zeal so kindly earnest that he has won the good will and confidence of the whole race. He lays out a field and tells them how to plant it, and he explains to them that the fruits of their labor inure to themselves alone. By his presence, his encouraging words, his prompt decisions, and his kind assurances, he has gathered about him a host of dependents, from far and near, who look to him for counsel as to a father, and obey him with alacrity, believing that he is truly their friend.

We recently visited the Tejon, in company with several gentlemen, at the invitation of Lieut. Beale, and from personal observation, are enabled to give some idea of what has been done there since the first ground was broken on the first of November, but little over six months ago. According to the official survey of Mr. Washburn, U. S. Surveyor, the great Reservation Field embraces 2,800 acres, and this is divided into crops as follows: wheat, 2,100 acres; barley, 400 acres; corn, 300 acres; pumpkins, (estimated) 500 wagon loads. In addition, there are two patches, one of potatoes, 25 acres, and one of beans, 25 acres. The crops of the different Rancherias amount to 415 acres, which makes the entire land now under cultivation amount to 3,265 acres. They are now harvesting the wheat, with two reapers and several hundred Indians. About 40 acres per day are cut and gathered. We have never seen a finer crop of wheat. Every stalk stands erect, and is full headed. At a low estimate it will average 35 bushels to the acre, and this will give it as the result in this single field more than eight thousand barrels of flour.

During three days we were there, Mr. Bishop, the general overseer, informed us that there were from four hundred to four hundred and twelve laborers in the field—men, women and boys. Included in this number, are delegations from Sacramento, San Joaquin, and other distant places. There are twenty-five plowboys from the Frezno, delegated by their tribe to labor in the general field, so that when they arrive they may claim a living from out the general storehouse. There are boys, also, from the Four Creeks, laboring upon the same terms. These boys are represented as industrious and intelligent, and emulous of doing a great deal for their people.—*Los Angeles Star.*

HORTICULTURAL.

A Fine Cyclamen.—One pot of a new Cyclamen was exhibited at a meeting of the London Horticultural Society, Feb. 21, that had 254 blooms wide open, besides buds and those that were going to seed. It is a crossbetween Cyclamen corem or veruum, and is named *Atkinsonii*—color, delicate Freuch white, growing deeper at the eye.

Mass. Hort. Society.—We havo received from this Society an interesting and valuable pamphlet entitled "an inquiry in the uses and abuses of the practice of scraping and washing trees, by a committee of the Society." We have read the work with much interest, and shall refer to it at an early day. The work also contains a table of all the insects that usually infest fruit and ornamental trees, to which we shall allude hereafter.

The Beurre Clairgeau Pear.—This is a new French variety, originated by M. Clairgeau, of Nantes, and sent out from the French nurseries in 1848 or '49, we believe. It is a very large fruit, and so far as it has been tested, both in Massachusetts and New York, gives promise of being a valuable acquisition. Col. Wilder sent us the following description among his notices of new pears that promise well.

"Size—extra large. Form—oblong, ovate pyriform, outline a little irregular. Stem—short and stout, set obliquely and without much depression. Calyx—open, segments short, moderately sunk. Color—brownish green, coarsely clotted and almost entirely covered with russet, sometimes intermixed with dull red on the sunny side. Flesh—melting and juicy, with an agreeable sub-acid flavor, resembling the *Baronne de Mello*, but with more aroma. Class—good; will probably prove very good.

"The *Beurre Clairgeau* has fruited in several gardens in the vicinity of Boston and New York, and promises to be a great acquisition. The tree is a strong, thrifty grower, either on the pear or quince root, and comes early into bearing, many trees which were grafted in the spring of 1851, being now full of fruit buds."

Mr. Cabot, President of the Massachusetts Horticultural Society, speaks of it as follows, in Hovey's Magazine of March last:

"So far as an opinion, formed by testing one or two specimens, and these from imported trees of the first year of bearing, is justifiable, this pear promises to be, on account of its size, beauty and quality, a highly respectable acquisition. It is a new pear, raised from seed by M. Clairgeau, at Nantes, of a yellow, russet color, with darker russet specks, and a little red in the sun; very large, with a short, very thick stem; calyx small and open; flesh yellowish white, tender, half melting, of a very pleasant, sub-acid flavor, ripening last of October and November; tree a strong grower, wood stout, and appears to come early into bearing."—*Horticulturist.*

The Oranoe.—Next to the grape, in commercial importance, is the orange family. For the production of these fruits, all the countries coming within the trophical and sub-trophical zones are well adapted. They abound in the East and West Indies. Formerly proximity to England, says the London Merchants Magazine, was an essential in the production of the orange for commercial purposes, and hence they derived their supplies almost exclusively from Spain and Portugal; but the rapid passages made by steamers now enable them to obtain them from more distant quarters. The orange, lemon, lime, citron, shaddock and forbidden fruit, all belong to one order—the *citrus* of Linnæus. According to Lindley, there are fifteen distinct species, with one or two varieties. They are natives of India and other parts of Asia, where they are found growing wild, and are not thought to be indigenous to America, although a few plants, probably the remains of gardens long since abandoned, were discovered there. Lindley, however, naturalises one species, *C. spinosissima*, in Cayenne. Six of the choicest species are natives of China, one of Japan, and the rest of India and other parts of Asia. Risso, of Nice, in his large work, enumerates 43 species and varieties of sweet orange; 32 of bitter and sour; 5 of bergamots; 8 of limes; 6 of shaddocks; 46 of lemons, and 17 of citrons.—*People's Journal.*

Culture of the Sunflower.—A "Conestoga" correspondent of the Germantown Telegraph, says:—"I do not think there is sufficient attention paid to the cultivation of this plant. The Sunflower is a native of South America, but is easily cultivated in any common soil, either by sowing the seed early in spring, or by slips or offsets from the roots. It is now a common and well known production, having long since become naturalized throughout the United States. The manner of planting and cultivating it, is not dissimilar to that adopted in growing Indian Corn, and its acreable product exceeds that of the most prolific cereals. The principal uses to which the seed of the sunflower is ordinarily applied, are the manufacture of oil for painting and burning, and the feeding of horses, sheep, beeves and swine. The oil is clear, thin and inodorous when burnt, though of an agreeable taste. For painting, it is said to be preferable to any other oil now in use. As a feed for hens, it is highly prized. Being of an oily nature, it approximates more nearly to the character of animal food than any grain that can be fed to them, and supplies to a considerable extent, a very efficient substitute for meat. The sunflower requires good soil, and may be managed in the same manner as Indian corn, when grown on soils that are friable, rich and moist."

Soap Suds for Watering Plants.—Nothing can be better for summer watering of plants and vines, than the suds of the weekly wash, and no one who desires a good garden will suffer it to be wasted. For cabbages, cucumbers, beets, and the like, it seems especially adapted, and one of the most thrifty grape vines we ever saw, was watered with soap suds almost daily in dry weather. A large supply is not needed at once, but frequent waterings promote rapid and vigorous vegetation.

Los Angeles Grain Crop.—Through the kindness of a friend we have been favored with the perusal of a letter just received by him from one of the largest vine growers of Los Angeles. The writer states that the grape vine is in full blossom and rapidly approaching maturity. A good average crop is confidently anticipated. The shipments last season commenced about the 20th August. Great competition exists among the freighting vessels plying between Los Angeles and San Francisco. There are now running three lines of steamers, and it is anticipated that another will shortly be put upon the route. The grapes imported from Los Angeles are packed either in printing-paper or sawdust.—*Los Angeles Star.*

Premium Farms.

Pajaro Valley, June 20th, 1854.

Dear Sir:—I respectfully offer my farm in Pajaro Valley, for premiums to be given by the State Agricultural Society, and invite the Committee to visit and examine my farm at such time as will suit their convenience. In extending this invitation, I do not do so with any expectation of having awarded to me either of these premiums, but with a view of soliciting from the Committee a visit to our Valley. Respectfully yours,

J. D. Carr.

To F. W. Macondray, President C. S. A. S.

Mission of San Jose, June 27th, 1854.

The undersigned offers his farm of 200 acres, in Alameda County, three miles from Alameda, on the road to San Jose, for the examination of the Committe appointed to award premiums for the best farms in the State.

Respectfully yours, Jesse Beard.

Sacramento, June 27, 1854.

I herewith enter my farm on the "Putah" for the premiums to be awarded by the State Agricultural Society, and shall be happy to receive the Committee at such time as may suit their convenience. Respectfully yours,

C. J. Huchinson.

To Horticulturists.—Is *soil* necessary to the healthy growth of shrubbery? If so, and if it is the intention of the contractors for the improvement of the Plaza to adorn that spot with such of nature's ornaments, is it advisable to raise the ground to the stipulated grade with any more of Telegraph Hill? The Farmer, perhaps, will state how vigorous such ornaments might become, planted in a three-inch soil with a solid stone foundation.—*Golden Era.*

We respond to our friends of the Era, cheerfully. If *brains* are necessary as the foundation of intellectual greatness, *soil* is necessary for the development of beauty, health or durability of whatever we desire to cultivate on the earth. We have not spoken heretofore upon the subject of the "Plaza"—the waste of labor and expense, the want of design, and the ruin to the future beauty of this "notable spot"—lest we should be charged with selfishness or egotism; but if ever there was a case where those ingredients were so much wanting—*brains* and *soil*—we think it may be found in the improvements (?) of the Plaza. There have been designs offered far better, and we think the original one was so, by Mr. Stewart, a very worthy citizen, whose labors and expense deserved a better reward. But unless we mistake, there is always some "friend at court" that secures "public contracts" that do not look so much to durability, future good and the best interests of our citizens, as to self-aggrandizement and immediate personal emoluments. We have cast many a sad look to the Plaza. We have in our mind conceived how beautiful it could have been made and how it is to be done, and have turned away "more in sorrow than in anger," for we knew all we might say would be like "scattering seeds by the way side," the *fowls* of the air would come and devour them—for we are not politicians enough to scramble for loaves and fishes.

California Grain Implements.—We were much pleased to examine several fine threshers and separators, of eight-horse power, of most excellent workmanship, made at Napa, by Messrs. Longwell & Co. This is right—we shall soon manufacture everything we want in California.

Grain! Grain!!—We received a very good sample of wheat from friend Wand, of Benicia, Salina county, measuring six and a half feet high; also, oats seven feet high.

While on our visit at Sonoma Valley, we were presented with a very handsome sheaf of wheat containing three varieties, remarkably large heads, from Mr. McLellan, who settled at Sonoma in 1848.

Flouring Mill at Napa.—A fine large flouring mill has been erected at Napa, sixty by forty, two stories high, by Messrs. Longwell & Co., the building and machinery to be the best. It will be ready in two months.

The Steamer Yankee Blade from Panama, is expected on Friday.

LADIES' DEPARTMENT.

Mother.—Round the idea of one's mother the mind of a man clings with fond affection. It is the first deep thought stamped upon our infant hearts, when soft and capable of receiving the most profound impressions, and all the after feelings of the world are more or less light in that comparison. I do not know that even in our old age we do not look back to that feeling as the sweetest we have through life. Our passions and our wilfulness may lead us far from the object of our filial love; we learn even to pain her heart, to oppose her wishes, to violate her commands; we may become wild, headstrong, and angry at her counsels, or opposition; but when death has stilled her monitory voice, and nothing but calm memory remains to recapitulate her virtues and good deeds, affection like a flower beaten to the ground by a past storm, raises up her head and smiles among her tears. Round that idea, as we have said, the mind clings with fond affection; and even when the earlier period of our loss forces memory to be silent, fancy takes the place of our dead parent with a garland of graces, and and beauties, and virtues we doubt not that she possessed.—*James.*

Ludicrous Mistake.—The following droll incident is related in the Knickerbocker, as having occurred to a lady of respectability, in Brooklyn, N. Y.:—"The lady has a charming little boy, very observing, imitative and active. The child had noticed the postman constantly leaving letters, and moving off quickly, and he thought it would be a very fine thing to become a postman. So he went one day to his mamma's escritoire, and took out some twenty-five letters, tied them up and sallied forth, leaving one at every house, and moving off quickly. The lady was rather surprised when her next neighbor brought her an open letter, which she said somebody had left at her door; but what was her astonishment when visiting hour arrived, for another, and another, and another lady coming in, all bringing open letters, until her ample parlors were completely crammed! You need not doubt the mirth and fun grew fast and furious, as each lady entered with the same tale, and the little postman was elated beyond measure to find what a capital postman he was; but the best of the fun was, that every lady, one and all, asserted she had not unfolded or read a word of it."

How to Wash Lace.—The following mode of washing laces we find in an exchange, and republish it for the benefit of our fair readers: The difficulty of getting lace washed, especially out of a great city, is very great. Every lady, therefore, should know how to wash her own thread lace. If any fair reader is ignorant of this art we can teach her in a very few words. Let her first rip off the lace, carefully pick out the loose bits of thread, and roll the lace very smoothly and securely round a clean black bottle previously covered with old white linen, sewed tightly on. Tack each end of the lace with a needle and thread, to keep it smooth; and be careful in wrapping not to crumple or fold in any of the scallops or pearlings. After it is on the bottle take some of the best sweet oil, and with a clean sponge wet the lace thoroughly to the inmost folds. Have ready in a wash-kettle, a strong cold lather of clear water and white Castile soap. Fill the bottle with cold water to prevent its bursting, cork it well and stand it upright in the suds, with a string round the neck secured to the ears or handle of the kettle, to prevent its knocking about and breaking while over the fire. Let it boil in the suds for an hour or more, till the lace is clean and white all through. Drain off the suds and dry it on the bottle in the sun. When dry, remove the lace from the bottle and roll it round a wide ribbon-block; or lay it in long folds, place it within a sheet of smooth white paper, and press it in a large book for a few days.

How to Cook Cabbage.—Chop the half of an ordinary head very fine, put it in the spider or in the saucepan, and add two-thirds of a teacup of water, a table-spoonful of butter, and half a teaspoonful of salt; cover and cook it from one hour and a half to two hours, giving it now and then a stirring. Then add two-thirds of a teacup of good vinegar, some pepper and salt sufficient to season it to taste. Let it be on the fire five minutes and serve up.

To Keep Suet.—Suet keeps good all the year round, if chopped and packed down in a stone jar, covered with molasses. Mince pie meat may be equally well preserved if boiled, chopped and similarly packed.

Interesting to Farmers—Bakewell Sheep. F. Mellus, Esq., received per ship M. Howes, from Boston, six bucks and five ewes, of the famous Bakewell breed. This breed of sheep for size and beauty of proportion cannot be surpassed, and instances are on record of their attaining from 350 to 400 lbs. weight on foot. Such enterprise as this should always receive the greatest encouragement, especially when we take into consideration the present diminutive breed of sheep among us. These sheep cost in Boston $20 a head and delivered here about $50. Also per same ship, thirteen hogs of the Suffolk breed. These hogs do not show to good advantage at present, on account of the long sea voyage of nearly five months, and being confined so closely cooped for room, and illy cared for on ship board. One of the same importation sold to Mr. Geo. C. Alexander for $5, and he considers it cheap at that.—*Los Angeles Star.*

Masonic Celebration at Napa Valley.

It was a pleasing circumstance to be at Napa City on Saturday last, and witness the celebration of the memorable St. John's Day by the associated orders of Masons and Odd Fellows. The gathering was large, delegations being present from several lodges in the surrounding counties.

The procession, as they moved from the Lodge-room in their rich regalia, presented a most interesting and imposing appearance. A very large procession of ladies preceded the order to the church, where the exercises were performed. The opening prayer was by a reverend brother of the order. The address, by Rev. Mr. May, of the Masonic Brothers, upon the objects and influences of masonry, was a most happy effort, although the orator was not in good health. Here were many beautiful figures and illustrations of Masonry, that we know were true, although we are not of the fraternity. The good influences of the institution we have seen and known. The early historical allusions in the days of Solomon, and during the persecutions of the early Christians, the sympathy that exists between Christianity and Masonry, both alike prompting men to deeds of brotherly love and charity, these were all most happily conceived and most eloquently delivered, reflecting credit upon the head and heart of the elequent orator. After the address of Mr. May, Mr. Eaton, of the I. O. O. F., addressed his order upon the character and purposes of the institution, presenting many interesting features of the order, and claiming for it a relation as twin with Masonry. The address of Mr. Eaton was able and earnest, and frequently interspersed with rich veins of poetry, as illustrative of the design, operation and actions of the members of the order. The exercises closed by prayer from the Rev. chaplain of the order. After the services at the church the procession formed and marched as before to the Napa Hotel, where a sumptuous dinner had been provided for three hundred ladies and gentlemen. We can vouch that the dinner was a good one, for by the courteous attention of the officers, we were a privileged Mason and Odd Fellow for the day; and we certainly would have been an "odd fellow" not to have accepted such courtesies. After the appetite was satisfied, the usual toasts, sentiments and speeches were enjoyed, and the commemoration of the day closed with dancing from early eve till 11 P. M.

There was a very large gathering of citizens of the valleys to witness the celebration; a very large number of farmers were present. The day was cool and pleasant, every one wore a joyous aspect, business in the city was lively, and everything went off with great credit to all the managers and to the city. We noted one event that was rather remarkable: just as the church was packed full and while the prayer was being made, the floor gave way and settled down suddenly, yet not a single word was uttered or a single person moved, and the prayer proceeded without interruption. This was wise, for sudden movements and alarm always produce harm. Let all remember, in cases of danger like this, quiet or calm movements only are safe.

California Babies.—In Massachusetts they recently had quite an exciting time relative to a "Baby Show." Premiums were awarded, and they had a merry time in deciding which was the nicest, lattest, chubbiest and prettiest baby. We see no harm in knowing who has the prettiest baby, and as we know there are many of our farmers that say they can beat all creation by showing the fattest and prettiest "pet" in the State, we hope the State Agricultural Committee will give an opportunity for all to compete for the prizes.

Young Men's Christian Association.—The rooms of this Association were well filled on the occasion of the regular monthly meeting, on the 19th. An original and well written essay upon "Prayer," was read by H. L. Leffingwell, Esq., one of the members of the Association. A very interesting discussion upon the subject of the essay followed in which many of the members participated.

The annexed testimonials must have been most gratifying to the parents of young Mr. Rising, as well as to himself, and would afford them great satisfaction under the trials of a separation, even for a time. The testimonials were so well merited that they offered a most cheering consolation:

Mr. E. B. Benjamin offered the following preamble and resolutions, which were unanimously adopted:

Whereas, Mr. Franklin S. Rising, one of the founders and most active members of this Association, has been called by important duties to the Atlantic States, which has caused his separation from us, therefore—

Resolved, That we deeply appreciate the active and untiring efforts of Mr. F. S. Rising for the advancement of the interests of this Association since its establishment; and we hereby tender to him our prayers and best wishes for his success and happiness in this life, and for his blessedness for the life to come.

Resolved, That Mr. F. S. Rising be, and is hereby, declared an honorary member of this Association.

Resolved, That a copy of these resolutions be forwarded to Mr. Rising, by the corresponding secretary.

A very liberal donation of valuable books was received, and duly acknowledged, from the Protestant Episcopal Society in New York city. After singing and prayer, the meeting adj.

Duncan's Art Union.—The space occupied by the sketches of the farms of the valleys precludes the full notice of this sale, which would be given, but those who know Mr. Duncan's taste for the beautiful must know that with the privilege of a personal knowledge and examination of many of the fine galleries of paintings, statuary, &c., we may expect in this collection to arrive a truly grand collection, many of great value and beauty, and prizes in reality.

Ross's Saloon, Clay Street.—This spacious and elegant saloon was opened on Monday evening, under new and favorable auspices. Messrs. Holman & Sherwood are the proprietors, and their opening gave promise what the future shall be. There is no place in the city more genteel, or where the most keen appetite, or the most delicate taste could be better suited. We most heartily commend them.

Adams & Co.'s Banking House.—One would suppose this world-renowned house had [illegible] all the improvements of the age to the concern before this; but their enterprize is continually finding something new, [illegible] and benefit the public. Adams & Co. is one of the [illegible] for it had its beginning in [illegible] this act [illegible] makes it a Kingly concern, and we trust it will be continued with rich success.

Napa City Hotel.—This [illegible], kept by [illegible], is now in [illegible] order—fine, clean and airy rooms, [illegible] and plenty of [illegible] we [illegible] fact a [illegible] to keep [illegible] than None Else.

American Hotel, Napa [illegible]

Artesian Wells [illegible]

AGENTS FOR CALIFORNIA FARMER.

Messrs Adams & Co. at all their offices throughout the United States or Europe.
Messrs. Wells, Fargo & Co., at their offices throughout the Country.
Mr. Chauncey Lanodon, Travelling Agent for the northern section of the State.
Mr. E. R. Highton, general and travelling Agent for Northeastern section of the state, to whom we commend our Agents for all information needed.
Mr. Wm. M Lester, Travelling Agent for Sacramento City and County
Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*
Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniantown, Eureka, and Bucksport.*
San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.
Benicia, Martinez, &c.—Messrs. Stiles & Dodds.
Union City and Missian San Jose—Messrs. Howard & Chamberlain.
Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.
San Luis Obispo—Dr. Thomas T. Harvey, P. M.
Union, Humboldt Bay—A. H. Murdoch, P. M.
Mount Farm, O. T.—Gen. M. M. McCarver.
Bidwell's, Butte Co—P. Freer.
Weaverville, Trinity Co—H B. Davison & Co.
Yreka—Cram, Rogers & Co
Mokelumne Hill—I. Coffin.
San Jose—E. Reed.
Marysville—R. A. Eddy & Co.
Stockton—C. O. Burton.
Sonora—Young & Roberts.
Columbia—A. Hunnewell, P. M.
Placerville—Nash & Davis.
Nevada—A. W. Potter.
Coloma—D. G. Waldron & Co.
New York City, N. Y.—J. M. Thorburn & Co.

N B.—We want Agents in all the principal localities, and persons disposed to act can have the opportunity, if satisfactory to all parties.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JUNE 29, 1854.

Many Lessons in one Story.

The "Two Farmers Contrasted," upon our outside column, will be found an interesting story to a reflective mind. It shows how great an injury may be inflicted upon the inquiring mind of the child by a thoughtless and heartless parent who fails to feel an interest in his own offspring and finds no pleasure in unfolding those beautiful truths in nature that are daily being revealed to us.

In former numbers of the Farmer we endeavored to show that the cause of the present ignorance and apathy in regard to the "Science of Agriculture," arose from the wrong direction given by parents to the early tastes of their children. The present story is a case in point—where the very desire for knowledge of this science was crushed by the heartlessness of the parent; and this case is but one of a thousand.

Let readers contrast the spirit and disposition of the two farmers, and they will *feel* the influence that such parents exert upon their offspring. If the influence of farmer "Small" upon T. was so genial, what must it be upon a child's early affections and tastes? The great wonder is that the children of the neighboring farmer should have ever received a taste for nature from such a parent. One thing is certain—it could not long remain in such a blighting atmosphere.

We repeat, it is from such heartlessness and indifference on the part of parents and guardians of the young that a mountain of obstacles has been placed in the path that led to agricultural knowledge. God grant that the new interest awakened in this beautiful science may be permanent.

The pleasing illustration of the *true* manner in which the various kind of seed are mixed, is worthy of being read and understood by the cultivators more generally. Simple as is this story, it is a valuable one, and worthy a perusal and a place in memory's storehouse.

We append to our remarks a leader from the Genesee Farmer, and heartily commend it to the perusal of all who feel interested in Agriculture. Its every word tells upon the heart of the true patriot. The severe censures poured out upon the political mummery of the day, will apply with equal force, perhaps more so, to this country, and we urge the cultivators of California to look to their interests in the coming legislature, as of permanent importance:

"Agriculture as a Profession.—Thousands who have long thought of nothing more than to pursue farming as an occupation, and submit through life to its dull, monotonous drudgery, are now happily beginning to appreciate the dignity and pleasures of Agriculture as a Profession. It is a calling which admirably adapts itself to every taste, and every capacity. The most stupid and thoughtless slave finds fitting employment in the unvarying routine of the commonest field labor. Roman slaves, Russian serfs, and English peasantry, have followed tillage and husbandry for indefinite ages, and advanced scarcely one degree in mental development. So uniformly dead-and-alive have farm operatives been for five thousand years, that many have affected to regard agriculture as the mother of stupidity. Born on a farm, and nursed by the milk of its gentlest kine, this insult stung us like the wound of a scorpion; and if it were possible to lift rural industry above such degrading imputations, we resolved that no effort of ours should be withheld from any friend of the great farming interest who was willing to work for its immediate and enduring elevation. The difficulty has ever been to reach the millions who own and cultivate the soil; and no one has yet devised a plan which fully attains that object. Exceedingly cheap periodicals, those that cost clubs only thirty-seven cents a year, promised the greatest advantages by universal circulation; but their very cheapness, such is the pride of the human heart, operates against their usefulness in some circles. Purse-proud men think it beneath their consequence to teach their brother farmers, or be taught by them, through the medium of a fifty cent paper. The good spirit of universal philanthropy is not in them. They arrogate to themselves all the honors of advanced agriculture as a profession, without performing any of its higher duties. Such characters deserve nothing but contempt; for while they do nothing to enlighten and benefit mankind, they claim the consideration due only to the faithful servants of the people. There is but one way for a man to show that his faith in agricultural progress is genuine, and that is by his works. If all who profess to believe in the improvement of rural affairs would cheerfully lend a helping hand to make agriculture as learned and honorable as it is useful, it might be raised in a few years to the highest public honor, where it of right belongs. High elevation, it should be remembered, cannot be reached by trick, clap-trap, or shallow advantage. Empiricism is often clamorous, and full of oily-gammon, but its labors always have 'selfish ends to serve. It belongs to agriculture as a mere occupation, not to agriculture as a scientific profession. None but liberal minds devise liberal things. After four years' experience and observation at the federal metropolis, we do not hesitate to say that the tone of public morals, and the spirit of patriotism, have suffered greatly from the corrupting influence of selfish, mercenary politicians. There is a lamentable want of *sound agricultural statesmen* at Washington; and there is an equal lack of care among all farmers in selecting men to represent them in Congress. American statesmanship is not what it ought to be. Its most prominent feature is a degrading strife for the spoils of office. Educate and elevate the industrial classes, and thereby form a more patriotic and purer public opinion, and all parties will be compelled to serve the country more, and individuals less. It is a perfect misnomer to call a majority of our state and national legislators "public servants." Their principal labor is to serve themselves, their personal and political friends—not the community at large. This defect must be remedied by intelligent farmers, who control the ballot box in every State in the Union. They are the true conservative power of the republic; and so regarding them, we esteem their professional standing and intellectual attainments as matters of the highest public interest. They should not feel the necessity of sending so many lawyers to fill all the important offices at Washington, because farmers and mechanics are too poorly educated. The profession of agriculture is not what it ought to be in a free country. It should be the nursing mother of wise statesmen, instead of the pack-horse of itinerant demagoges and political gamblers. Agricultural Statesmanship is almost unknown in a land where farmers themselves give a large majority of the votes that make and unmake every administration and every state and national legislature. Let the talented youth who read this journal, and who will soon have to discharge the responsible duties of popular sovereignty, think of these things, and study to be worthy of the highest honors that freemen may confer. Provide yourselves with good libraries, and read them faithfully to some purpose.

New Gold Separator.

By the courtesy of the proprietors of this new invention, we were present last week at the various experiments performed with it in the presence of several scientific gentlemen, among them Dr. Birdsall of the U. S. Mint, Maj. Allen of the U. S. Army, and some dozen others, all of whom were much gratified with the result.

Experiments were tried with the poorest refuse "tailings" of a quartz company, and the result was $2 25 to the pound. From common black sand the gold was soon shown, and in sufficient portions to know it would pay.

We say *new* separator—it is an improvement. The original instrument has been successfully used abroad. Six are in use in Virginia; four in North Carolina; four by Lieut. Wilkes, in the exploring expedition; twenty-four have been ordered to England to separate native tin from sulphate of copper; six are in use at the nickel and cobalt mines; six are in use in New Jersey, to separate pure iron ore; eighteen at Lake Superior copper mines; forty at Cuba, at copper mining, and many are to be used here in separating gold from black sand.

The trials were upon quartz tailings or refuse stock, as an experiment only. We saw portions of rich quartz from Bear Valley mines; also from the Guadaloupe some of the richest specimens yet discovered, containing $5 to the pound of quartz. We were presented with specimens of the last mentioned rock. Other experiments are soon to be tried from these new specimens just found. Every experiment was most satisfactory. The machine will be duly announced to the public in a short time, and offered for sale.

Correspondence.

The following extracts we publish from a long and interesting letter from our valued correspondent now in New Hampshire. Mr. Russell was a resident of California the last year, and we deeply regret that he should have left. He was a most able and scientific cultivator, and his valuable services and influence should have been retained here. We hope he may be induced to return again.

Mr. Russell was one of the most successful growers of the grape, in the East. Evidences of his skill were the wonder of many at the horticultural exhibitions of the Mass. Hort. Society, at Boston, for several years. We hope to hear from him often, so long as he is away from us.

The letter was not written for publication, but it is important as showing the views entertained at the East of California efforts, and that such efforts are appreciated by intelligent minds. We know the able addresses that were delivered in Musical Hall were extensively read in the East, and highly esteemed, affording a very great interest to many:

Nelson, N. H., April 17, 1853.

I have received several numbers of the California Farmer, here on the hills of New Hampshire, that have given me great pleasure in the perusal of them. Please to accept my thanks for this kind favor from your hand. * * * * The addresses delivered at your splendid Agricultural show in San Francisco, I have read with much pleasure. They are all, and embody all, that the most enlightened farmers and gardeners could desire. They are masterly productions, emanating from minds imbued with the great and good in all civilized lands.

I have noticed the great crop of barley grown by J. Bryant Hill, Esq., in the Salinas Plain, last year. I had the pleasure of visiting the Salinas Plain last June, in company with Mr. Hill. At that time the Barley, and its growth, was particularly noticed by me. The whole of the one hundred acres was a beautiful sight, being as level as a table; the heads of the grain were large, and the growth about three feet high. This field of barley was the best I had ever heretofore seen. Mr. Hill and myself at that time thought that the whole one hundred acres would average one hundred bushels to the acre.

Mr. Hill owns five thousand acres of the best land in California, in the Salinas Plain. We rode over some hundreds of acres where the grass stood as high as the horses' heads, with a thick clover bottom at least two feet deep. Mr. Hill had a small portion of this grass cut for hay, that we then thought would yield four tons to the acre. The soil in the Salinas is deep, very rich, and of a loose, friable nature; will not crack open or become hard through the dry season: it is easily worked, and brought into good tilth—in fact, it is all that the diligent farmer could wish for or desire. In this beautiful plain the tillers of the soil will be abundantly remunerated for their toil. The Salinas Plain is situated in a fine healthy part of the country, twelve miles from Monterey, by a good travelled road, in fact the stage road. The harbor at Monterey is one of the best on the coast. Vessels can take in their cargo or deliver it at all seasons of the year. For the growth of onions, the Salinas might challenge the world to compete with it—the deep, rich mellow soil, cannot be beat in California. I would strongly and earnestly recommend to all who are interested in the growth of onions in California, to raise a crop of small onions and transplant them in February or March, as the season may be, in order to obtain the greatest crop. The produce from one acre of good onion land would much surpass anything that has heretofore been raised; but as the cultivators of this vegetable probably think that they can beat the world, I will conclude. With much respect, J. W. Russell.

Foreign Exchanges.—We are happy to say to our many friends east and in the principal States, as well as Europe, that their papers reach us promptly. And we can say to our readers that as our list of the very best standard publications of the world will be regularly before us, we can offer them from time to time all the practical experience of old and long established cultivators, and also the very best results from our own State—thus making the California Farmer the most reliable source of agricultural information in the country.

Paper from Straw.—After many unsuccessful attempts, the feat has been accomplished, and paper of a very good quality is now made from straw. So good indeed has this been found, that the Philadelphia Ledger, a paper that has the largest circulation in the world, is regularly printed thereon.

Farmers' Clubs.

We make the following extracts from Mr. Hunt's Massachusetts Agricultural Report:

About twenty of these clubs have been organized in different towns in the Commonwealth, and the results of their past exertions show that much may be expected from their future labors. By their efforts, a greater interest in agricultural pursuits, and a more earnest spirit of emulation and enterprise has been aroused, and much useful information has been diffused in their neighborhood. In most of the towns where they exist, the inquiries made in the circular given above, were made a subject of discussion, and committees were appointed to 'gather reliable statistics, which were submitted to the club. From these statistics were drawn up the answers sent to the Secretary, and thus the most active minds of the whole town were engaged in the preparation of the replies. Returns thus carefully and deliberately prepared are entitled to as much confidence as if they had been official.

When the club is once established, and a foundation is laid for a valuable library, it will grow rapidly; and though there may, at first, be but few leading minds sufficiently interested to work for its success, they will soon be found, and vigor and enthusiasm will be shown in every discussion entered into by the club. When the mind is once deeply interested in any subject, it often exerts powers it was not itself conscious of possessing before, and experience of the good effects of Farmers' Clubs will show with how much advantage this principle may be applied to agricultural investigations.

The committee of a Farmers' Club speak of these associations as follows:—

"In conclusion, allow us to call your attention to the means which, in our opinion, after a practical test of four years, will be found more efficient than any other for elevating the condition of the farmers of Massachusetts. We allude to the formation of Farmers' Clubs, or town associations, is the social meetings for the discussion of subjects connected with agriculture. The great mass of the working farmers of Massachusetts are comparatively ignorant men, and one trait is common to very ignorant and very learned men, viz.: a strong attachment to certain theories or hobbies, which stand ever in the way of impartial investigation; and we think that no plan can be devised which so effectually roots out error, as bringing these different theories—formed, as they usually are, upon a very limited observation of facts—into collision with each other by means of free and friendly discussion. We have no hesitation in saying that the result of such discussions among ourselves has been to diffuse more valuable information through our community than could possibly have been accomplished in twice the time, if every farmer among us had carefully read every scientific work ever published upon agriculture. It is a great mistake to suppose that the formation of such associations will injure those of the several counties in the State, and we would do all in our power to remove the antagonistic feeling which has in some degree existed between the two forms of organization. That they must benefit the county societies is, we think, rendered evident by the increased interest in that of Middlesex County, where these town societies have for some years been most extensive."

Flora.

The Antirrhinum.—A great number of florists' flowers, though exceedingly beautiful, have the disadvantage of their bloom being short-lived. Such, for instance, as the glorious, though somewhat gaudy, tulip, and the neat-blossomed ranunculus. These, and some others, which the florist will easily recollect, only last, with every attention to shading them from the flower-fading power of the sun, some five or six weeks; but I may fairly claim for the antirrhinum the power, with very moderate care, of continuing to reward the cultivator with its bright-colored blossoms for at least three months, and that at a season when florists' flowers are comparatively scarce. Even as a bedding-out flower it has great merit. It produces at least three colors not to be surpassed by any flower—I mean bright crimson, pure white, and clear yellow. For large beds, especially, it is well adapted, blooming continuously during July, August and September.

The antirrhinum is so perfectly hardy that the seed may be sown in the open border of the garden. I would advise the zealous raiser of improved varieties, first to procure from some respectable florist a few of the leading best sorts now in cultivation, grow them one year, and save the seeds from them, keeping the seed of each variety to itself. By adopting this plan he would find out the best borders.

The time for *sowing* this carefully-saved seed is about the third week in April. Prepare a bed for it in an open part of the garden, by manuring it well in the autumn, and digging in the manure at the same time, leaving the surface rather rough for the frosts to act upon it and pulverize. Then, when the sowing time arrives, fork the surface over, breaking it as fine as possible. Choose a time when the surface is moderately dry for this operation.

When the seedlings have attained an inch or two in height, dig another larger bed, and transplant the seedlings into it, planting them five inches apart every way, keeping the sorts still separate. Here they may remain till they flower.

There are many varieties of this plant, some of the most beautiful of which are but little known. The monochromes are the most desirable, as the pure white, the saffron, and the splendid crimson. The flower is sometimes double, and one variety is quite fragrant.

Action of Drouth on Plants.

The specific action of drouth on plants is one of the problems not yet entirely solved. Whether it is the indirect waste of moisture on the plants by evaporation, or the want of the due proportion of water necessary to build up the structure of plants, or whether it is some indirect action on the constitutions of the soil, is by no means a settled question.

The present season has afforded abundant illustrations of the effect of a want of moisture on the several plants the farmer has to cultivate; and what is more remarkable, the drouth, though absolutely less than it was last year, seems to have had a far greater effect on the plants. The meadows especially appear to have suffered. In all the northern counties particularly, the grass crop is peculiarly affected. The finer and shorter grasses are absolutely either wanting, or so thin that they show the meadow to be without bottom grass. The coarser grasses are tall, but thin, and running to seed, forming no tillering stalks, and few blades in comparison to those of former years. The corn is the same—thin, stunted, and spiry in its character. There have been no tillering—no thick matted surface. The drills have been visible up to the present period, and the stems are fast running to the ear before half the usual height has been attained, being also hard and yellow in color, and different as possible from the graceful flopping blade the wheat plant exhibits at this period.

Now, in what specific way has this drouth so acted on the plant? In ordinary vegetables, 90 per cent. of their whole structure is simply water. Hence it is easy to perceive how large a quantity of that material is necessary during their growth and development. But there was no such absolute deficiency this season. The soil always contained a comparatively large amount of moisture; the dews were often plentiful, amounting to fully as much more as any diurnal development of the plant could require, and all the tables of rain fallen in the spring of this year we have seen, showed a larger quantity than in the corresponding months of last year. Hence it seems we must look to the abstract cause of the injury—to somewhat beyond the mere denuding of the plant of water, as such.

We think the theory of Liebig far better established this season. The plant, to take up its elements, must have them presented to it in a state of solution. The action of rain operates to dissolve regularly and gradually the material required by the plant, both in the soil and in the rocks from which the soil is continually forming, by disintegrading the small particles existing in the land. These are being supplied to the plant by the rains as it requires them, but this year they have not been so washed out and made ready for its use. But why did not the same cause operate equally in the spring of 1852? Simply because the incessant rains of the autumn and early winter had washed the soluble constituents of the soil, so as to leave less free material in the land by far than in the previous spring, and hence the ordinary drouth had much greater effect on the plant this year than it had last.

The effect of water on plants, regularly supplied, is most wonderful. Those who have seen the Clipston water meadows, and the small and clear stream, which produce from three to five crops of grass per annum, either depastured or mown, or partly the one and partly the other, must be convinced that it is almost as much owing to the plentiful supply of water in the dry season, as to any great amount of manure held by that small river in solution, that the vast increase of grass is produced. By watering, Mr. Kennedy, of Myremill, keeps close upon a thousand head of stock on 90 acres of Italian rye-grass. In ordinary seasons from five to nine sheep can be kept on one acre of land; the latter may be done in a dropping season on clover, and on well cultivated land; but with the aid of a little artificial food and by the application of *liquid* manure, in the shower form, by steam, Mr. Kennedy can keep fifty-six sheep per acre! Nor can we believe that this is altogether due to the manure. To that it is partly owing, doubtless; but it is by far more owing to its being watered with that manure in a soluble state, and so fit for the immediate use of the plants. Hence he is independent of the season. The water-drill, to which we before alluded, is an application of the same principle; and the wonderful results of the dressing of dissolved bone liquid, in a dry season, by the due Duke of Richmond, is a powful fact in the same direction.

That it is the want of soluble manure, or, in other words, elements of plants, which is mainly the cause of the injury, is manifest from the fact that all the poorest land has suffered by far the most from the drouth. The very highly manured land has sustained the least damage; while on land to which very highly soluble manures have been applied, the crops are growing vigorously.

Nor let it be forgotten that the rain brings down the ammonia, which, in dry states of the atmosphere, will float undisturbed; and this failing, as well as the soluble supply below, would of course aggravate the cause of injury.—*Mark Lane Express, of* 1853.

To Drive Away Rats.—Says the Southern Agriculturist, a friend has just informed us of a plan he adopted to get rid of rats. His premises swarmed with them. He took a small fish hook attached to a fine wire and suspended it at a piece of cheese, so that it hung a out a foot from the ground. One of the rats jumped at it and swallowed it, and at the moment it touched a squeal, more as if made by a human than that of the rat, startled all the rats around him and fled. Not a rat remained on the premises.

The Best Sheep.

The following communication in regard to the most profitable breed of Sheep, we find in the Albany (N Y.) Country Gentleman.

Seeing an inquiry asking for information in regard to the most profitable kind of sheep for wool growing, induces me to give my experience and the profit of my little flock the past year. I purchased some ewes twenty-seven or eight years ago, from a stock of full blood Spanish merino sheep, imported by Cadwallader R. Colden, of Pittstown, Rensselaer Co., N. Y. Since then I have taken the utmost pains to get crosses from the best flocks of sheep in the country. I have crossed successfully from the flocks of Consul Jarvis; E. Robinson, Shoreman, Vt., and from a buck I have now, sired by Jewett's old 'Fortune.' He is now I think sixteen years old, in good condition, and has sheared the last four years, being and one-half pounds of clean washed wool. I am likewise crossing from G. and D. Cutting's stock, Vermont, all of which are pure Spanish merinos. One year ago, my flock consisted of eighty-nine sheep; fifty-two of them were breeding ewes, six bucks, eight wethers, and twenty-three lambs, which sheared, June 18th, 1853,—

429¼ lbs. wool, sold for 56 cts. per pound,	$279 62
Twenty pounds of tag-locks,	3 00
Sold twenty-seven sheep and lambs,	229 00
Killed two fat ewes and one lamb,	10 00
Have sixteen sheep on hand, overplus, worth,	160 00
Hired out Fortune, after using him,	10 00
Received premiums on said sheep,	38 00
Making,	$729 62

Thus you will perceive, that the eighty-nine sheep have yielded eight dollars and twenty cents per head, leaving the old flock worth more than it was one year ago. I would also add, that I have bred from the French Merinos, Cotswold, Saxony and Bakewell, to try the experiment; but they have all proved a failure compared with the above sheep, and I would invite all good breeders of sheep to call and see my flock, and judge for themselves. Nathan Brownell.

Tomhannock, Rensselaer Co., N. Y., April, 1853.

Improved Native Cows.—Having been reared on a dairy farm, and paid much attention to the economical production of milk, we have never yet seen any breed of imported cows that was able to elaborate more milk, butter or cheese, from 1,000 pounds of grass, hay or roots, than our best native cows yield. Nor are we alone in this opinion. The Hon. John W. Proctor, of Danvers, Mass., one of the most distinguished farmers of the State, in an address before the Agricultural Society of Hillsborough county, N. H., made the following statement bearing on this subject: "Where can be found an animal excelling the Oakes cow for butter? * * * She was a small sized, ordinary looking cow, with a small head and neck, straight back and broad hind parts, with milk vessels of best form and capacity. She was taken when about two years old, by a farmer in Danvers, from a drove on its way from Maine to Brighton, without any certificate of pedigree, as many others have been taken, and proving to be a good milker, was sold to his brother Oakes, a shoe manufacturer, to afford milk for his family." An account was kept of the butter made from her in one season. This was in 1816; and from May 17th, when her calf was killed, to December next following, she yielded 16 lbs. of butter per week, besides one quart of milk per day for the use of the family.

Mr. Proctor says, "of the truth of this statement there is not a shadow of doubt. A more reliable man than Mr. Oakes never lived. I knew him well. But it may be said that she was high fed or she never could have done this. So be it. Can it be expected of any animal to create such produce from nothing? Suppose a cow to yield 20 quarts of milk a day throughout the year, how much do you think would be the weight of the milk? If I figure right, 15,000 lbs., or nearly 8 tons. Can this be expected of a cow without something to feed on?"

Spring "Sport."—The Clinton Conrant condemns in strong terms the practice of shooting birds in pairing time, and is somewhat sanguinary in its remarks. Here is the article, which is commended to the attention of those bipeds who deem it manly sport to blow a little bird to pieces!

"The editor of the Germantown Telegraph says that he saw in the Philadelphia market, *several large bunches of robins*, which had been shot and brought there for sale. We don't desire the death of any man, but if some humane sportsman would only manage to put shot enough in the legs of the murdering vagabond who killed those birds, to keep him busy at home during the remainder of the spring, he would confer an especial obligation upon us. A man who would slaughter an innocent bird in 'pairing time,' would shoot his own grandmother, if her hide was marketable. If *white* slavery were legal, we would try and buy that chap for the sake of the fun of driving him to market in fly-time."

Wonderful Hen's Egg.—Probably the largest hen's egg ever recorded is that recently laid by a hen of C. R. White's, the landlord of the Warriner House, Springfield. It is a foot in circumference the long way, nine inches the other, and weighs 11 1-2 ounces! It is well-shaped, with a very thick and hard shell. It is almost impossible to believe that it is the product of a hen; but we have been convinced of it. The egg probably contains four yolkes—it is certainly four times the size of an ordinary hen's egg. The hen that laid it is believed to be of the ordinary breed, but is very large weighing about [illegible] pounds alive. She has been a [illegible] in the production of [illegible] in the egg line.—*Con. Valley Farmer.*

Native Marble.—We have received from Mr. M. S. Primo, a specimen of native marble—brown ground, interlaced with white veins. The specimen brought us is capable of great polish. This vein, just discovered, lies upon the banks of Tomales Bay, near to the water, and apparently extends to a considerable distance. It is mostly of a dark mahogany color, and the veins of white are curiously interlaced. The quarry is some fifteen miles up the Bay from the ocean. The water is always smooth, so that vessels drawing ten feet of water could anchor within a mile, to which the marble could be easily conveyed in lighters.

We have heard of other veins and of various colors—thus proving our resources are being rapidly developed. Ere long long we shall see our millionares building their marble palaces of "native marble."

We are thankful to Mr. Prime for this specimen. It can be seen at our office.

Agricultural Committees.—The Committee of the State Agricultural Society commenced their labors on Saturday, June 24th, and visited Sonoma and Napa Valleys. The labors and duties are immense, if well performed; but a large and able committee have been selected, and farmers in many places will find the committee there before they are aware of it. However ardous, the duties thus are deeply interesting, and we are most happy to say that the Steam Navigation Company, with their usual magnanimous spirit, tender every facility by their boats to the committees, of which due mention will be entered in the committees records and reports. If possible, reports will be made from this section, in part, for next week's issue.

Frying Pans.—A single law passed by Congress, supposing it had the power, and obeyed by the people, would effect a great reform in the public health, diminish the business of doctors and the demands for drugs, and prove of incalculable benefit to this and future generations. Thus: Be it enacted, that on the first day of January, 1855, every frying-pan in the United States be broken up, and sold for old iron, and that no more be manufactured henceforth for ever. Frying is the most unwholesome of all modes of cooking. Every thing cooked by this method is saturated with fat or butter, rendered tough, covered with empyreum oil, and made as unfit as possible for the human stomach. No dyspeptic should ever eat anything fried, and no one should ever do so who would avoid becoming a dyspeptic. Let your food be boiled or roasted, or broiled, or baked even—anything but fried. Frying meat is the worst possible mode of cooking; destroying whatever good qualities it may possess, and exaggerating all its badness. And all this comes of having frying-pans, spiders, and other cast iron abominations for making food unwholesome. Good people, beware of the frying-pan; beware of the fat which it scorches; and beware of the meat, and fish, and eggs, which it renders unfit for food and difficult of digestion, that your days may be long upon the land.—*Nichol's Journal.*

Designation of Horses.—I enclose an extract from a rare and valuable work, illustrating the different breeds of horses, (English,) published in London in 1820, by the author of "British Field Sports." It throws some light upon the question raised at the Springfield horse show—"what constitutes a pony?"—*R. B. in Country Gentleman.*

"A Hack, in our modern stable phrase, signifies a Road Horse, and not merely a horse let out to hire, as some of the uninitiated suppose. The British and Irish Hackney, with respect to his proper average height, is from fourteen hands one-half to fifteen hands one-half; beyond the latter, unless the ridder be also a *topper*, he had need carry a pocket ladder for mounting convenience. With respect to the Denominations, the term of *Pony* is applied to all horses beneath thirteen hands in height; from thirteen to fourteen hands, a *Galloway*; at fourteen hands, a *Horse*; a *Cob* is a short, cloddy hackney; a *Merlin* is a Welch pony or galloway, from a certain part of the principality, where *Old Merlin*, many years after his racing services had been completed, covered a great number of the small country mares, and left a peculiar and valuable race to posterity."

Bushel and Acre.—What difference is there in the United States bushel and the English—also, in the acre of the two countries? *Ans.* The standard bushel of the United States is the same as the "Winchester bushel," which was the standard in England, from the time of Henry VII. to 1826, and contains 2150.4 cubic inches. The present standard in England is the "Imperial bushel," which contains 2218.1 2 cubic inches, being within a fraction of 68 cubic inches larger than that of the United States. The acre is the same in both countries.

Every man has two distinct [illegible] aspects or characters—one, by which he [illegible] at and viewed by the Deity; the other by which he looks at and is viewed by man. The [illegible] real face, as to [illegible], the world in [illegible] appears only [illegible] he is in the sight of [illegible]

Seedling Apples.—I inclose a small sample of a dried Apple, which you will see is quite remarkable for its whiteness. (Almost as white as snow.—En.) I received it from Mr. L. Norris, of Windsor, Ohio, who assures we it was dried in the usual way. It is the product of a seedling apple which is remarkable for this peculiarity—of retaining almost a snowy whiteness when dried. It cooks tender, and altogether must be a very desirable variety for this purpose, as it is also quite a good eating apple. I have thought it worthy of a notice in your journal, and therefore copy Mr. Norris' remarks upon it in his letter covering the scions which he very kindly sent me. He names it *White Beauty*, and adds:—"It is a native of the township of Windsor, Ashtabula county, Ohio, where the original tree is now growing on the farm of S. A. Lathrop. Its fruit is very highly esteemed by all who have tested its value, for all culinary uses. It differs from all other apples we have seen, in the *beautiful whiteness* it retains when dried, and its tenderness in cooking. The fruit is of medium size. Form—globular, with a smooth and regular surface. Color—dull greenish, dotted with greyish specks. Stem—medium size, three-fourths of an inch long, set in a shallow and regular cavity. Calyx—in a broad, open, not deep basin. Flesh—white, tender, and juicy, with a sprightly subacid flavor. In season from September to December. Mr. Norris omitted to speak of the nature or habit of the tree; but, judging from the scions received, should think it a vigorous grower, with darkish shoots dotted with greyish specks.—*Cor. of Horticulturist.*

Wheat Destroyed by Fire.—On Wednesday, almost the entire crop of wheat and barley on the farm of Mr. J. Hanks, four miles south of San Jose, was destroyed by fire. It is said the fire was blown by the wind from a small spot the men on the place were endeavoring to burn off for the purpose of threshing. Capt. J. Hanks lost one hundred and fifty acres of wheat, and forty or fifty acres of barley; the whole crop was destroyed, with the exception of about twenty acres of barley. The fire spread to the adjoining fields of O. P. Watson, Esq., and destroyed of his crop, fifteen acres of wheat and thirty of barley. The wheat was very fine, and would probably have yielded more than forty bushels to the acre.—*San Jose Telegraph.* 22d.

Muskmelon and Watermelon.—The muskmelon contains a very large per centage of phosphoric acid and soda, and considerable potash; the watermelon a large per centage of soda and potash, and is quite rich in phosphoric acid. The occurrence of these bodies in such quantity in these plants, explains to us why dead animal matter, as flesh, bones, &c., common salt, and ashes, have such marked influence in promoting their growth and productiveness.

The Cucumber is similar in composition, but is most remarkable for the very large proportion of water it contains, being about 96 1-2 per cent. In other words, a ton of cucumbers contains only 70 lbs. of solid matter, the remaining 1930 lbs. being water.—*Dr. Salisbury.*

The Home of Taste.—How easy it is to be neat!—to be clean! How easy it is to arrange the rooms with the most gracious propriety! How easy it is to invest our houses with the truest elegance! Elegance resides not with the upholsterer or the draper; it is not put up with the hangings and curtains; it is not in the mosaics, the carpeting, the rosewood, the mahogany, the candelabras, or the marble ornaments; it exists in the spirit presiding over the chambers of the dwelling. Contentment must always be most graceful; it sheds serenity over the scene of abode; it transforms a waste into a garden. The home lightened by these intimations of a nobler and brighter life, may be wanting in much that the discontented desire, but to its inhabitants it will be a place, far outvying the oriental in brilliancy and glory.

Modifying Influence of Water.—The modifying influence of a body of water less than a mile in breadth is conclusively shown by the difference between the two banks of the Mississippi river, near New Orleans, where it runs east and west. The south side has a milder climate—vegetation advances earlier in the spring—the cane has a longer period to mature in Autumn, and fruits that are occasionally cut off by the severity of weather in the north bank, are uninfluenced on the other.

Last and Least.—We had "laid" on our table yesterday morning, two eggs, the larger having on it the following inscription: "Laid on Lockwood & Tildon's Ranch, Sutter, by a common California hen, 5 3-4 by 7 1-2 inches. Along with it came "the least," measuring 2 1-2 inches in circumference, being almost round. These two eggs are the production of the same hen. Verily the old adage is at least overthrown. "Last, but not least."—*State Journal.*

Dried Fruit. Immense.—On Monday last about [illegible] pounds of dried fruit [illegible] apples, were received at this port [illegible] J. [illegible], a part of which was [illegible] Norwich, and the remainder by [illegible] & Van [illegible] Baltimore. D. D. [illegible] was the [illegible] for [illegible] *Advertiser, Feb.* 2.

Taste of Tea [illegible] to prevent the [illegible] [illegible] [illegible]

Six Months.

With *this number* will expire the term for which many originally subscribed for the Farmer. We trust to receive prompt remittances for a renewal of the time, and also the amount of the several bills which have been forwarded. Surely the amount due us will not longer be withheld.

A Card.

All letters intended for the editorial or business departments of the California Farmer, and all letters on business generally, should be addressed to us at San Francisco, at our office at "Musical Hall." WARREN & SON.

News Summary.

CHINA.

The French bark Surprise arrived at this port on the 23d inst., from Hongkong, bringing papers to May 1. Two Imperial soldiers robbing a foreigner's house, were shot by him, and about two hours after an attack was made by some of their comrades in revenge on unoffending unarmed promenaders, which attack was not only made with swords, but even musket shots were discharged. Of the persons thus exposed to this attack, two were ladies, and a gentleman in protecting them received seven wounds, two of them severe if not dangerous. In consequence of this attack, the evacuation of all the camps adjoining the Riding Course was demanded by the British Consul on the 4th. The representatives of France and the U. S. agreed with the British Consul as to the absolute necessity of enforcing this demand. Accordingly, the Imperialist authorities were informed, that failing the abandonment of the camps by 4 P. M., the naval forces of Great Britain and the United States would proceed to occupy them by force of arms Accordingly, a force of 300 men were landed from H. M. ships Encounter and Grecian, and the U. S. ship Plymouth, and, after two hours' fighting, the Chinese fled in every direction, and the allies took possession of the camp. The Herald says the safety of the foreign settlement is now on a better footing than it has ever been since the capture of the city.....A most resolute attempt to retake Shanghae was made by a body of 2000 Imperialists on the morning of the 20th March. These men were led to the attack by four ferocious Mandamen, three of whom were killed in attempting to scale on the south side—the fourth fought hand to hand on the walls until cut to pieces. The Imperialists were compelled to retreat leaving twenty of their number dead and many wounded, several of whom have since died, including two Mandarins in chief command.

AUSTRALIA.

The ship Magnolia, which arrived on Friday, in 72 days from Sydney, brought Melbourne papers to the 6th, and Sydney papers to the 11th of April.....The American steamer Golden Age was advertised to leave Sydney on the 10th of May for Panama.....The inhabitants of Sydney had held meetings and passed resolutions asking the government to increase the fortifications of the port.....There had been large imports of American ice at Sydney, but, owing to the want of an ice-house to store it in, it had to be sold from the ship's side at a heavy demurrage.....Mrs. Stark had taken a benefit at Sydney, the proceeds of which amounted to $5000.....The Braidwood mines are yielding well. One party had cleared $700 per man in five weeks. Frauds had become quite common in the mines, large quantities of brass filings having been mingled with the gold dust, and sold for gold.....The mine had set in, and the diggings previously suffering for want of water were plentifully supplied.....The mines at the Ovens were yielding very plentifully.

THE INTERIOR.

The annexed abstract of mining news is from the Mariposa Chronicle: Occasionally a few dollars are still found in Mariposa by those who are willing to hunt for them. One day last week Messrs. McGrann & Co., who are working a claim a few hundred yards below town took out $126, and the next day $102.....At Mormon Bar Miners are making excellent wages. This has long been a favorite mining place, a great many of our old miners having realized snug fortunes in that neighborhood. .....Agua Frio is now nearly deserted, on account of the scarcity of water. There is not a camp in the county that a miner can make better wages in during the winter season, but unfortunately during the summer scarcely anything can be done. Had we a water ditch from the Merced or San Joaquin rivers, thousands would be at work, where now a few idle miners are watching their claims.....A great many miners have left Carsontown lately, on account of the scarcity of water. A French company, above town, have sunk a well, from which they derive sufficient water to run three toms, and make on an average at each tom $9 or $10 per day to the hand. Why would not the plan of sinking wells operate equally well in some of our other dry camps.....Guadalupe has been entirely taken possession of by the Chinese. These people are content with smaller wages than those of any other nation, but we think, in this particular locality, they are making more than average wages. They are making on the creek, from $3 to $5 per day, to the Celestial.....Accounts from Sherlock's Creek are quite gratifying to the miner. Some companies above the falls are daily averaging from $10 to $12 per day to the hand. The hill claim of Mr. Marshall, which paid so well this spring, has commenced paying good wages again. Below the falls, miners are doing very well....The Columbia Clipper gives the following mining news of that region: The miners at Brown's Flat, on Wood's Creek, are now working the bed thereof, and where it has paid so much on the surface, they find in nearly every instance, that by going deeper, say from 20 to 60 feet, that they find another strata of rich wash dirt....The Gold Mining Claim has paid well for two years, and promises to pay for some time to come. This claim, yielded over $3000 to the share last year....The New York claim are down some thirty feet or more, and are taking it out big. Their average is from 16 to 20 ounces per day....Senator Gwin claim, owned by Smith & Co., have a magnificent prospect before them. On Tuesday they panned out $580. The pieces were from a bit up to an ounce. Shares have advanced in one week from $300 to $700. ....At Humbug Flat great excitement was caused one day this week from the fact that a party struck a large and very rich crevice in M'Cmy's garden. In less time than it takes us to write this paragraph, the whole garden was staked off, and the vegetables had to give way to the pick and shovel.

THE CITY.

Mr. Hughes, who undertook to walk 80 consecutive hours without stopping, finished his task on Sunday night, at the Mountaineer Saloon. His limbs were frightfully swollen, but he has now completely recovered. He is said to have realized about $2 000 by the operation....Mr. Murdoch gives one of his "readings" this evening for the benefit of the Ladies' Protection and Mutual Relief Society....Certain parties squatted on the public square on Post street, and put up a fence, but the city authorities demolished the fence, and no resistance was attempted....A dray loaded with stone while passing down Jackson street wharf Monday forenoon, was suddenly overturned, in consequence of one wheel falling through the wharf. A large crowd gathered round, and it was soon discovered that the sleepers had been thoroughly pierced by auger holes for a space of five feet by eight—rendering the spot very insecure. It was probably done with the design of entrapping some of the specie carts on their way to the steamer....The Fire Department declines parading on the 4th, on the ground that it would thin the ranks of the military—many of our citizens belonging to both bodies....A young and extremely pretty French woman was discovered on Monday morning near the old State Marine Hospital. Her face was much bruised, and she bore other marks of ill-treatment. Her mind wandered, and her only coherent words were, "I wish he had taken my life." There is foul play here, evidently. Some infernal scoundrel has effected his object. Shall he be arrested and punished, or will the authorities look on placidly, until the people, goaded to madness, mete out to him and them the punishment they deserve? Apropos of this, why have not the villains who assaulted Mr. Myers and his wife, been arrested? *That bayonet* ought surely to furnish a clue....James King of Wm., who is well known to our business community, has taken charge of the banking department of Messrs. Adams & Co.....The members of Knickerbocker Engine Co., No. 5, attended the American Theatre on Saturday evening, in full uniform, by invitation of Mr. Thorne....Shephard, who murdered Day, some time ago, has been convicted of murder in the first degree. The Sun publishes the names of the Jury in large capitals.....The ship Potomac, from Hongkong, arrived on Monday with some five hundred more Celestials.....Mrs. Murphy, who was shot during a squatter riot on Green street, a short time since, died on Sunday evening from the effects of the wound.

Bear Hunt.—A party returned to Napa City on Saturday, from a bear hunt some 60 or 70 miles up Scott's Valley, and we saw the paws of the monster grizzly, which was brought in as an evidence of the success of the trip. We learned that the animal was shot dead at the first fire, by one of the gentlemen who bravely rode past and round the bear, heading him, and giving the contents of a double barrel gun upon a running fire.

Strawberries and Raspberries.—Real magnificent and luscious strawberries, measuring from 1½ to 3 inches in circumference, we saw at the market this morning, only 75 cents each—grown at Contra Costa. We also saw superb red "Fameuse Raspberries," from the same place, the fruit looking "good enough to eat."

MARRIED.

On the 27th June, in this city, by Rev. Dr. Scott, John W. Bell and Miss Maria P. Reynolds.

On the 16th May, in Coxsackie, N. Y., Mr. Anthony W. Rotsford, of Sacramento, and Miss Mary A. Brown, of the former place.

On the 7th June, in Scottsburgh, Oregon, Mr. Elisha Veasy and Miss Margaret J. Newsom.

On the 16th April, in Salt Lake City, Mr. Ebenezer Bryce and Miss Mary Ann Park, of West Jordan.

On the 11th June, at San Rafael, Mr. Walter J. Skidmore and Dona Madalina de Meranda, both of San Rafael.

On the 20th June, in this city, by Rev. F. Mooshake, Mr. Charles Hans and Miss Elizabeth Kuhn.

On the 17th June, in this city, by Rev. Wm. Rollinson, Mr. George Greig and Miss Isabella Gilchrist.

On the 22d June, by Rev. Wm. Rollinson, Mr. Frederick Horswill and Miss Dorcas Perkins, all of this city.

DIED.

On the 26th June, in this city, Mrs. Margaret Murphy, formerly of New York, aged 24 years.

On the 21st June, at Iowa Hill, James S. Christy, a native of the State of Pennsylvania, but more recently of Illinois.

On the 21st June, in Coloma, John S. Chalmers, aged 18 months and 4 days.

On the 14th June, at Dutch Creek, Arthur McLenden, formerly of St. Louis, Mo.

On the 21st June, Frank, infant son of Albert and Eleanor B. Wardwell, aged 5 months and 5 days.

On the 24th June, Rev. P. L. Beverly, late of Lynn, Mass., aged 42 years.

On the 17th April, at sea, on board the clipper ship Sea Serpent, Mr. S. Ligaton, of Philadelphia, aged 17 years, fell overboard and was drowned.

On the 14th June, near Briggsville, Mr. Ole Hanson, in the 21st year of his age.

On the 14th June, near Briggsville, Mr. Ole Hanson, in the 21st year of his age.

On the 4th June, at Buteville, O. T., Mr. Flavien Leignon, formerly of Kahokie, Illinois.

SHIPPING INTELLIGENCE.

PORT OF SAN FRANCISCO.

ARRIVALS.

June 21—Clipper ship Sea Serpent, Howland, New York, 116 days, with mdse.
Ham ship Melissa, Peterson, Hamburg, 204 days, via Valparaiso 54 days, with mdse.
Brig Vesta, Miller, Mendocino, 30 hours, with lumber.
Schr Curlew, Gray, Santa Cruz, 1 day, with lumber.
June 22—Clipper schr Flying Dart, Honolulu, 16 days; mdse.
June 23—Ship Magnolia, Patterson, Sydney, 70 days; mdse.
Br bark Envelope, Hains, Sydney, 98 days, with coal.
Fr bark Surprise, Berton, Hong Kong, 54 days; mdse.
June 24—Stmr Fremont, Hudson, San Diego, 2 days; mdse.
June 25—U S revenue cutter W L Marcy, Cornell, Mazatlan, 30 days, via Guaymas 24 days—33 passengers.
Clipper ship Meteor, Pike, Boston, 124 days; mdse.
Bark Ork, Oakes, 9 days from Oregon, with lumber.
Bark Julia Ann, Davis, New Castle (N S W), 89 days, via Society and Sandwich Islands, and San Pedro; mdse.
Brig Detroit, Slocum, Humboldt Bay, 5 days; lumber.
Br brig Carolina Hort, Gotts, Tahiti, 37 days; oranges.
June 26—Chinese ship Potomac, Wating, Hong Kong; mdse.
Bark Madonna, Russell, Humboldt Bay, 2 days; lumber.
Brig Dudley, Staples, Oregon, 9 days; lumber.
Schr Pilgrim, Fiske, Humboldt Bay, 2 days; lumber.
June 27—Steamer Columbia, Dall, Oregon, 60 hours.
Ship Persia, McCook, Hong Kong, 72 days; mdse.
Brig Halcyon, Eldridge, Oregon, 5 days; lumber.
U S schr Monterey, Belcher, Oregon; Government Stores.

CLEARANCES

June 22—Ships North Carolina, Nickerson, for Callao; Union, Buxton, Shanghae; bark Jenny Pitts, Snow, Hong Kong.
June 24—Ships Challenger, Hill, for Manila; Whirlwind, Burgess, Callao; bark Wavelet, Smith, Honolulu; brigs Æolian, Briard, Portland; Henrietta Sophie (Dan), Lilholdt, Ports in Pacific; schrs Curlew, Gray, Santa Cruz; Frolic, Godley, Ports in Pacific.
June 27—Bark Equator, Morton, Manila; schr Gazelle, Prescott, Crescent City.
June 27—Barks Rebekah, Corwin, for Tahiti; Ashland, Nelson, Australia.

Wool Packing.

IMPORTANT TO WOOL GATHERERS, MERCHANTS AND OTHERS.

THE undersigned begs leave most respectfully to inform the dealers in Wool, that he is prepared to pack wool and goods of every description, in large and small bales, after the most improved form and at the shortest notice. All kinds of goods packed. Old clothes bought. All orders received and promptly attended to by DARIUS STOKES,
Basement of Sanders & Brenham's Bank,
No. 129 Montgomery street.

Whitewashing and House Cleaning done, as usual, with neatness and dispatch. 26

FIREWORKS.

SAN FRANCISCO LABORATORY.

THE San Francisco Laboratory are now ready to receive orders for any quantity of Fireworks, consisting of Fancy Pieces, stars, triangles, signal and congreve rockets, port fires, Roman candles, serpents, whistling rockets, &c.

Cities, Towns, Clubs or Ranches, wanting quantities for the coming holidays, can have them packed carefully for shipping.

Dealers will find this a good chance to supply themselves for the retail trade. BRADSHAW & CO. Agents,
25 Corner of California and Battery streets.

MARKET REPORTS.

San Francisco, June 28, 1854.

The same dull trade and the same inaction in almost every branch of business. Real estate, that great pendulum that moves so many wheels, is stationary, or it may be *unscrewed*. The long delay in settling the city titles in San Francisco and the Sutter titles at Sacramento is becoming more and more injurious—it postponcs many valuable improvements; these titles settled, a quick start would be soon seen and felt in various branches of trade.

The great staple of this country, Wheat, has not yet "been to market," and therefore the new crop is not priced. The various reports of smut and rust will pass away in a great measure in *moonshine*; and the farmer who has toiled in hope will be enabled to realize the fruit of his labor.

Flour is languid and no speculative feeling; price ranges lower. There is quite a large stock on hand, some reports place it as high as four months supply. One large shipment of wheat is on the way.

Provisions heavy and price receding. Why should these articles be imported longer? we have Beef and Pork enough; of Butter, Lard and Cheese we shall soon have a supply of California. The market has been long overstocked with Implements of all kinds, except Grain Harvesters.

In a visit the past week through Suisun, Napa, and Sonoma counties, we noted excellent crops of Wheat, and little or no injury. The Dairies of our State are sending in valuable samples of their products, as can be seen at Messrs. Gusbec's in the market; finer Butter and Cheese cannot be found in any market. The trees of our Orchards are bending beneath their heavy load of Fruit; the Vineyards of clustering Grapo give promise of abundance, and farmers' prospects are better.

NEW ADVERTISEMENTS.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!

SOON TO OPEN AT

DUNCAN'S

CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!

TO THE

Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** of Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!

CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares*, the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our house in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course that has gained us this position will be strictly adhered to, that no dissatisfaction can possibly occur.

CERTIFICATES OF SHARES
ARE NOW READY, AT
ONE DOLLAR EACH!

☞ Several articles of this Superb Collection have been just received, and are open for examination.

[ORIGINAL.]

AN HONORED AGE.

These are the springs of health and honored age—
Temperate indulgence, heaven's light, pure air;
A conscience free of stains on every page,
Light cheerful labor; little worldly care:
Submissive action 'neath affliction's rod,
And faith, unwavering in a Saviour God!
Who holds his passions, appetites in bounds;
Reaps most of life;—escapes its sorest wounds.

June, 1854. FLAVIO.

DON'T KILL THE BIRDS.

Don't kill the birds!—the little birds.
That sing about your door,
Soon as the joyous spring has come,
And chilling storms are o'er.

The little birds!—how sweet they sing!
Oh! let them joyous live;
And do not seek to take the life
Which you can never give.

Don't kill the birds!—the pretty birds
That play among the trees!
'Twould make the earth a cheerless place,
Should we dispense with these.

Don't kill the birds!—the happy birds
That bless the field and grove;
So innocent to look upon,
They claim our warmest love.

TO PARENTS.

He who checks a child with terror,
Stops its play and stills its song,
Not alone commits an error,
But a great and moral wrong

Give it play and never fear it,
Active life is no defect;
Never, never break its spirit,
Curb it only to direct.

Would you stop the flowing river,
Thinking it would cease to flow?
Onward it must flow forever;
Better teach it where to go.

Good Grit.—A gay young lady in this city made an appointment to go sleigh-riding with a young gentleman of her acquaintance, and when the time arrived forgot her appointment and was not to be found; the gentleman was piqued of course, and by the way of reparation, the lady stated that if he would call for her some evening next week, (naming it) she would go if *she was alive*—the time came, so did the gentleman with his light cutter, and span of fine horses, all right *except the snow;* that had stepped out meanwhile. Not one word was said, the lady understood it, took her seat in the cutter, adjusted the buffalo robes, and took four miles of grit! She will be likely to keep the next appointment she makes with that young gentleman.—*Waverly Mag.*

A Wonderful Memory.—We are acquainted with a young man, a clerk in this city, who once committed to memory in a single evening, a whole page of the New York Journal of Commerce, and repeated the same with great exactness. In the company of a number of literary young men, he defied any one present to repeat a line of poetry from any standard work, the next line of which he could not recite, and also give the name of the author. Some hundreds of quotations were made, and in each instance the right author was named, and the connecting lines given. The power of retention in this person's memory was most remarkable, as the above named facts abundantly prove.—*Boston Transcript.*

A few days since a good old lady of this city meeting a farmer in our streets on a load of hay, inquired if it was for sale; on being answered in the affirmative, she asked him to turn his team around and drive to her husband's yard, some quarter of a mile distant. Her request was complied with, and after reaching the barn-yard, the old lady informed him that she only wanted a cent's worth of hay for her hens' nest, and that while he was throwing it off, she would step into the house and get the change! The driver was ungallant enough to curse the old lady, and the hens, and refused to retail his bay.—*Portland Transcript.*

Good Advice.—Girls, let us tell you a stubborn truth. No young woman ever looked so well to a sensible man, as when dressed in a neat, plain, modest attire, without a single ornament about her person. She looks then as though she possessed worth in herself, and needed no artificial rigging to enhance her value. If a young woman would spend as much time in cultivating her mind, training her temper, and cherishing kindness, meekness, mercy, and other good qualities, as most of them do in extra dress and ornaments, to increase their personal charms, she would, at a glance, be known among a thousand. Her character would be read in her countenance.

James Ferguson and his wife led a cat-and-dog life, and she is not once alluded to in the philosopher's autobiography. About the year 1750, one evening while he was delivering to a London audience a lecture on astronomy, his wife entered the room in a passion and maliciously overturned several pieces of the apparatus, when all the notice Ferguson took of the catastrophe, was the observation to the audience, "Ladies and gentlemen, I have tho misfortune to be married to this woman."

"What would our wives say, if they knew where we were?" said the captain of a "down east" schooner, when they were beating about in a thick fog, fearful of going ashore. "I shouldn't mind that," replied the mate "if we only knew where we were ourselves."

Personality an Awful Gift.—The short verse—"Every man shall bear his own burden," opens to our consideration one of the deepest principles of our being. It singles us out from all the multitude around us. It sets us alone with our own spiritual and moral character, as we have fashioned it, and reminds us that we must hear for ourselves that burden. It bids us remember that great truth which the world is ever seeking to hide from us,—that we are each of us One; that we have that in us which does truly separate us from every other beside; that we are in reality alone. There is something awful in this truth, in whatever light we look at it. Though this is, indeed, our greatness—though it is in this, in a great measure, that our likeness to God consists, yet it is an awful thought. Our very greatness is appalling to us—but we cannot shake it off. We may, indeed, strive in our shrinking weakness to break in upon the stillness of our solitary being by crowding others around us, but we cannot. We may forget our loneliness for a season, in the whirl of pleasure, or the fever of excitement, or the warm gushes of a loving sympathy; but in all the pauses of outward things, the solemn voice comes back again upon the ear; the multitude of shows fade into nothingness; and the great vision of our single, proper, solitary being, again overshadows our spirits. We have each one this burden of a separate soul, and we must bear it. Each ordinary life utters voices which add their witness to this truth, if we will listen for them. How do all deep-thinking people, in the inmost current of their spirits, live apart from others, and, more or less, even feel that they do so?—*Bishop of Oxford.*

An English paper tells a story of a lady preacher, who was holding forth one Sunday afternoon, and concluded her learned exposition of the Scriptures, thus:—"My Christian friends, as I am on a pilgrimage and a wanderer, without a place to lay my head, I hope some of your hearts will be softened to my condition, and that *you will invite me to tea.*"

"An Indiana paper says:—Amos Worthington, of Cairo, is dead. He was an unpretending man, lived unostentatiously, and supplied the people with fish. His last words were characteristic. "I say, Pritchard, I'm going to 'peg' right off. I've flirted my last fish; hut bury my tackle with me—who knows hut they hite in Jordan."

HOTELS.

Murray's Fifty-cent Western House.

Corner of Second and D streets,.....MARYSVILLE.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known Union Hotel, situated on the Plaza, in this city.

Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.

The Bar will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.

Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.

The International is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.

E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....Proprietor.

THE proprietor announces to the public that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.

The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the house. There are also Billiard Tables and Ten Pin Alleys connected with it.

For the accommodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake, and to prevent accidents they will be under the especial charge of an "old salt."

An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.

The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:

Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.

Stopping at all the Hotels on the road.

☞ Families called for in any part of the city.

25 LINESS AND CLARK.

Rassette House.

SAN FRANCISCO,.....CAL.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.

Gentlemen can be accommodated with single rooms, or families with suites of rooms.

The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

St. Charles Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.

J. HARPER AND J. L. MERRITT.....Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.

Its close proximity to the steamboat landings renders this house very desirable for transient visitors, as also for people arriving in the State and those leaving for the older States.

☞ There will be a Night Watchman, and guests can procure rooms at all hours of the night.

24 HARPER & MERRITT, Proprietors.

Public Notice.

THE copartnership hitherto existing between the undersigned, transacting business as Bankers and Express Carriers in the State of California, and in the Eastern States of the United States, under the name, firm and style of ADAMS & CO., expires this day by limitation. D. H. HASKELL, ALVIN ADAMS, W. B. DINSMORE, S. E. SANFORD, S. M. SHOEMAKER, * By C. E. Bowers, their Attorney in fact.

Dated San Francisco, May 12, 1854.

THE UNDERSIGNED have this day formed a Copartnership for the transaction of Banking and Express business in the State of California, under the firm, name and style of "ADAMS & CO."—the principal office continuing at the same place, in the city of San Francisco.

Dated San Francisco, May 12, 1854.

ALVIN ADAMS,
(By C. E. Bowers, his Attorney in fact,)
D. H. HASKELL,
I. C. WOODS.

THE UNDERSIGNED, composing the firm of ADAMS & CO., of New York, Boston, Philadelphia, and all other principal cities and towns of the Eastern States, will hereafter carry on the Express and Forwarding business to and from the said cities and towns to the Eastern States and the City of San Francisco. The Banking and Express firm of Adams & Co. in California, at the city of San Francisco acting as our agents.

Harvesting Implements.

HARVESTING IMPLEMENTS—
1 McCormick Reaper;
2 Hussey's Do.;
1 Manny's Do.;
2 Burrill's Patent Reapers;
1, 2, 6 and 8 horse Threshing Machines.
ALSO—Steam and Water Power Flouring Mills.
For sale by BRYANT & CO.,
Agricultural Warehouse,
24-1m Corner of Battery and Richmond streets.

Reapers and Threshers.

PURCHASERS of Reapers and Threshers, or any Farming Machinery, can be directed in the purchase of them very greatly to their advantage, as we make it a point to be informed relative to these matters; and this will be a saving to purchasers. Persons at a distance can be supplied, and save the cost of coming to the city, by addressing us.

WARREN & SON, office "California Farmer,"
25 Musical Hall Building, San Francisco.

Farming Machinery.

M'CORMICK'S combined Mowers and Reapers, with extra parts complete, 6 feet cut;

Wheeler's 2-horse endless chain powers, with threshers and separators.

Taplin's 6-horse powers, threshers and separators.

Pitt's large 8-horse travelling machines, complete.

Hay Presses, Grist Mills, Scythe Snaths, &c., &c.

Just received and for sale by JOS. S. PAXSON,
25 4t 26 Front street, near Pine.

Strawberry Plants.

ALPINE Monthly Strawberry Vines, at $4 per dozen; Black Prince $4 per doz; Hovey's $4 per doz, and Elton $4 per doz or $25 per hundred, strong plants. Plants will be carefully packed and forwarded according to direction, to parties that forward the amount of their order to us. Now is the time.

Directions for planting with the plants.

25 WARREN & SON, Farmer Office, Musical Hall.

Threshers, Separators and Cleaners.

PITT'S EIGHT HORSE POWER, complete, with extras.—This machine was made to be exhibited at the Baltimore and Richmond Agricultural Fairs, held respectively for Maryland and Virginia. It is superior in every respect to any of the sort ever shipped from New York to California, and is intrinsically worth nearly double that of any other machine. (Ex Golden Fleece.) In addition to the parts usually sent, there are six wheels—four for the separator, two for the power, &c.

Also, EMERY'S Threshers and Separators, of Two Horse Power.

We have also on the Golden Fleece, two of HALL'S (Rochester,) Latest Improved Threshers, Separators and Cleaners, Eight Horse Powers, all complete.

Also, four of Hussey's Reapers and Mowers, all combined.

For sale by COIT & BEALS,
9 tf 94 Battery street, office up stairs.

Fruit and Ornamental Trees and Plants.

INCLUDING everything necessary to the Garden, Greenhouse, Nursery, and Orchard, with all the recent introductions, at very low rates. Descriptive price Catalogues gratis. Carriage paid to New York. Ornamental and other planting done in any part of the country. Address B. M. WATSON, Old Colony Nurseries, Plymouth, Mass.

Plants packed for California with extra care. 16 1y

Manny's Patent Reaper and Mower combined.

THREE of the above celebrated machines, which can be used as a Reaper or Mower,—for sale by

HENRY McNALLY,
15 1m No. 183 Washington street, (near Battery st.)

Ketchum's Patent Mowing Machines.

A LIMITED supply of the above justly celebrated *Mowing Machines*, that will mow from 12 to 15 acres of grass per day as well as can be done with a scythe. For sale by

HENRY McNALLY, No. 183 Washington street,
15 1m (between Battery and Front streets.)

BATES' SUPERIOR

UPLAND BELL CRANBERRY.

THE PROPRIETOR has been induced to present this Circular to the public on account of the numerous applications from distinguished Horticulturists, Amateurs, Land Agents and others, in different parts of the Union, personally and by letter, wishing information in regard to cultivating this valuable fruit upon ordinary upland, and would respectfully invite the attention of Gardeners and Fruit Growers, to such facts only as have come directly under our own experience and observation.

Soil, Propagation, Management, &c.—Having tested the plants thoroughly in all kinds of soils, we have no particular choice in their selection. We know of no kind of soil in which they would not be likely to grow well if managed according to our method. We should not choose a perfect clay soil, extremely liable to bake, nor a perfect sand, containing no power of vegetation.

In extensive field culture, the Bell Cranberry flourishes well in soils varying from moist to dry. No great degree of moisture is necessary, providing it is more or less uniform. Any soil that the strawberry can be grown on to advantage, is well adapted to the growth of this plant, but no animal or vegetable manure should be used, as the fruit draws most of its nourishment from the atmosphere. The vines propagate by runners, like the Strawberry, and will flourish in almost any soil and location, under good management. Where the land is rich and liable to grass and weeds, we prepare the ground by removing the top soil at a sufficient depth to prevent their growth. This may be easily done by plowing the soil, and removing the top soil in carts or otherwise. The object in doing this is to make the soil so poor that nothing will grow to obstruct the growth of the Cranberry Plants, bearing this in mind, that I am fully satisfied, from long experience in the business, that the Cranberry derives its nourishment only from the air and moisture.

If the land is poor, so that grass and weeds will not vegetate then it may be plowed and harrowed without other preparation. If these rules are followed there is no difficulty whatever in their cultivation. Persons having a garden of moderate size, and wishing to raise their own Cranberries of a superior quality can do so by obtaining a few plants, and with a small amount of labor at the commencement, will find their cultivation both easy and profitable.

Persons wishing for Plants can have their supply of the subscriber. The Plants will be carefully packed in meadow moss, and well boxed, which will enable them to go to a great distance in a fresh state.

The proper time for Fall transplanting is October and November; for Spring, from the opening of the same till about the 25th of May. Persons wishing for Plants, are requested to order as early as the first of September, for Fall transplanting and during the winter for Spring. 15

THE CALIFORNIA FARMER

Ibis Journal of Useful Sciences.

VOL. 2. SAN FRANCISCO, THURSDAY, JULY 6, 1854. NO. 1.

THE CALIFORNIA FARMER,
AND JOURNAL OF USEFUL SCIENCES,
PUBLISHED EVERY THURSDAY MORNING
BY WARREN & SON
Office in Musical Hall Building, Bush street.

TERMS.—Eight dollars per annum, in advance; or delivered by carrier at one dollar per month.

ADVERTISEMENTS.—A limited number of Advertisements will be inserted at the following rates: For one square of eight lines, per month, $6. For business notices of five lines or less per month, $4. A slight reduction will be made to regular advertisers.

The Lost and the Living.

BY FANNY FERN.

The husband's tears may be few and brief,
He may woo and win another;
But the daughter clings in unchanging grief
To the image of her mother.

BUT a fleeting twelve-month has passed since the heart (that for four years had beat against his own) was forever stilled, when Walter Lee brought again a fair young creature to share his widowed home. No father or mother, brother or sister, claimed any part of the orphan heart that he coveted and won. No expense or pains had he spared to decorate the mansion for her reception. Old familiar objects, fraught with the tenderest association, had been removed to make way for the upholsterer's choicest fancies. There was no picture left upon the wall, with sweet, sad, mournful reproach. Everything was fresh and delightful to the new born joy that filled his heart.

"My dear Edith," said he, fondly pushing back the hair from her forehead, there should be no shadow in your pathway, but I have tried in vain to induce Nelly to give you the welcome you deserve; however she shall not annoy you. I shall compel her to stay in the nursery till she yields to my wishes."

"Oh, no! don't do that;" said the young stepmother anxiously, "I think I understand her. Let me go to her, dear Walter;" and she tripped lightly out of the room.

Walter Lee looked after her retreating figure with a loving like tenderness. The room seemed to him to grow suddenly darker, when the door closed after her. Reaching out his hand he almost unconsciously took up a book that lay near him. A slip of paper fluttered out from between the leaves, like a white winged messenger. The joyous expression of his face faded into one of deep sorrow, as he read it. The hand writing was the child's mother's. It ran thus:

Oh to die, and be forgotten! This warm heart cold—these active limbs still—these lips dust! Suns to rise and set, flowers to bloom, the moon to silver leaf and tree around my own own dear home; the merry laugh, the pleasant circle, and I not there! The weeds choking the flowers at my head-stone; the severed tresses of sunny hair forgotten in its envelope, the sun of happiness so soon absorbing the dew drop of sorrow! The cypress changed for the orange wreath! Oh no, no! don't quite forget! close your eyes sometimes, and bring before you the face that once made sunshine in your home! feel again the twining clasp of loving arms; the lips that told you (not in words) how dear you were. Oh, Walter, don't quite forget!—From Nellie's clear eyes, let her mother's soul still speak to you.

"MARY LEE."

Warm tears fell upon the paper as Walter Lee folded it back. He gave himself time to rally and glided gently up to the nursery door. It was partially open. A little fairy creature of some five summers, stood in the middle of the floor. Her tiny face was half buried in sunny curls. Her pinafore was half full of toys, which she grasped tightly in either hand.

"No you are not my mamma," said the child, "I want my own dead mamma, and I'm sorry papa brought you here."

Nellie looked up with a pleasant surprise.

"I had a dear mamma and papa once," she said; "and brothers and sisters so many, and so merry! but they are all dead, and sometimes my heart is very sad; I have no one now to love me but your papa and you."

Nellie's eyes began to moisten; and taking out one after another of the little souvenirs and toys from her pinafore, she said, "And you won't take away this—and this—that my dear mamma gave me?"

"No, indeed, dear Nellie."

"And you will let me climb in my papa's lap as I used and put my cheek to his, and kiss him? and love him as much as ever I can, won't you?"

"Yes, yes, my darling."

Walter Lee could hear no more! his heart was full.

What? Mary's child pleading with a stranger from mine in a father's heart! In the sudden gush of this new found tenderness, had he forgotten [illegible] the wishes of that he placed the [illegible] Cast aside! from Nellie's clear eyes, let her mother's soul still speak to you." Ay! [illegible]

When next Walter Lee met his young bride it was with chastened tenderness. Nellie's loving little heart was pressed closely against his own. He was again "her own papa!" No, he did not "quite forget!"

"It is I."

THE prettiest girl in the whole village, or indeed four miles around, was Nanette La Croix.—She had a hundred lovers, all of whom expressed themselves ready to die for her, though she, cruel thing, would not give more than a smile in return. Her heart was free, she said, and hoped it ever would be; she had no notion of making herself a slave by marrying.

So spake Nanette just as hundreds have spoken before her, and she really believed for a while all she said. No foot was lighter at the ginguette than hers; no jest was merrier than that which fell from Nanette; no maiden curled her lip more saucily when her name was linked with that of any of the beaux. And yet, all this while, she was in love with Pierre Latour, the handsomest, bravest and blithest of the village lads. She found it out too not until he was levied for the the conscription; when the certainty of his long absence, and the probability that he might never return, revealed to her the secret.

Poor Pierre loved her as his own life, and now, on the eve of his leaving her, uncertain whether she returned his love, was nearly beside himself with despair. He rallied courage, however, and resolved to tell his tale, for diffidence hitherto had sealed his tongue; though his eye had long spoken his adoration in more eloquent language. He found Nanette in tears. It was an unguarded moment for her, and Pierre had no difficulty in winning an acknowledgment that she returned his affection.

"And you will be mine when I return?—Promise me this?" he said, "and I will strive to become great, and will win, if bravery can do it, the Cross of the Legion of Honor."

Nanette promised; how could she help it? and the young soldier departed. The secret was to be kept between them, so the villagers were none the wiser; and as Nanette seemed as gay as ever, no one suspected that her heart was far away in Russia, whither the Imperial army had gone.

But this ecstacy proved most unfortunate, for the young men, ignorant of her engagement, were as attentive as ever; indeed more so, for she grew prettier daily. Pierre, even before the army had reached the frontier, heard from those who had left the village later than himself, that this or that gallant was always with Nanette, and the gossip said that it would be a match. How could he help being a little jealous? And when, later, by six months, and just before the Russian territory was invaded, he met an old acquaintance from the village, and heard that the son of the rich notary was dying for her, is it strange that he began to fear he would yet lose his beautiful Nanette! He had heard so much of woman's inconstancy, especially when a young and wealthy suitor was the rival, that he trembled for her fidelity.

All the horror of that campaign in Russia. Of the half million that followed Napoleon into the hostile territory not a tithe came back. Of these, however, Latour was one. Yet he almost wished he had perished in the fatal snows, for he had lost an arm, and that, too, without gaining the Legion of Honor. Not that he did not deserve it, but in that awful retreat there was no time for the emperor to think of bestowing favors. Slowly, and almost in rags, like thousands of others, Latour begged his way back to his native village.

It was a bright morning in autumn, more than a year after Latour's departure, when one of the village gossips stopped a minute at the window of the cottage where Nanette and her mother dwelt.

"Who do you think has come back?" she said. "Latour himself. He arrived yesterday."

At the announcement of her lover's return, Nanette's heart leaped with joy; but when she heard he had been back so long without coming to see her, her spirits sank, for she continued to love the absent soldier, in spite of the notary's son and her hundred other admirers.

"He is come back in a sorry plight, though," continued the gossip, "lame, a beggar, and with but one arm. He is sick at heart, too, and so ashamed that he will not show himself; he is not fit to live among the young and happy.

Poor Nanette! her heart was full of pity for her lover. She turned aside to conceal her tears. Yet she still wondered why he had not come to see her, and she felt almost angry again when she thought of it.

"He tells me news, the wicked [illegible] knew you are sly about [illegible] Nanette. He says you are to marry the notary's son. I [illegible] from the way he spoke, he has [illegible] old love for you; when he spoke of the notary's son he sighed, looked at his tattered garments, his stump of an arm, and his lame leg with travel.

Nanette heard no more. She understood all. She left her mother so entertain the gossip, and hurrying up stairs, attired herself in her holiday garments; and then, selecting the choicest fruit from the garden, and filling her apron with flowers, she hurried to the cottage of Pierre's family.

Never had she looked more charming. Her white head dress, falling low on her shoulders, relieved the dark tresses, and added greater effect to her brilliant, black eyes. A handkerchief, worn around her neck, modestly concealed her swelling bust. Her arms, rounded and mellow as antique marble, were bare almost to the shoulders.—in a word, always beautiful, her dress and her high spirits now made her perfectly bewitching.

"Who's there?" said a voice, as she knocked.

She knew the family were all abroad at this hour at their work, and that the voice must be Pierre's, else she would scarcely have recognised it, so discontented and hopeless was the tone once so happy and bright. But she knew a magic, she believed, to call back all its old sweetness.

"It is I!" she answered, disguising her voice; and as she thought of the joyful surprise she had in store for Pierre, she archy smiled.

She heard a muttered growl inside, and some one coming to the door. "Oh! the great jealous bear," she said to herself "how he hates to be disturbed—but we shall see."

When the door opened, and the laughing girl stood before him, Pierre staggered back. Surprise contended with gloom in his features, but the smile of Nanette gradually reassured him.—At last he stammered out, "you here, Nanette, what does it mean?"

The unhappy girl read in every look of that haggard face how truly Pierre loved her, and she could no longer contain herself; but speaking amid smiles and tears, while she put down her basket of fruit, and emptied her flowers on the table, said, "It means, dear Pierre, that as you won't come to see me, I have come to see you; and as I heard you were ill and tired, I have brought all these fruit and flowers for your acceptance; yes, and myself, too, if you will have me!" And she, weeping, clasped him in her arms.

"What! and do you love poor Pierre still?—And you won't have the notary's son?" he murmured in amazement.

"No! I will have none but you. Oh! how could you think I could desert you? Don't you believe, dear Pierre, that we women can be constant as well as you men?"

"But, Nanette," said Pierre, looking at his stump, "I am maimed now, and—and I have come back without my cross."

"No you have not," said she, touching the mangled shoulder kindly, "there is your Cross of the Legion of Honor, a nobler one than a piece of mere ribbon. I do believe," she said, bursting into tears, "that I shall love you better for having lost your arm."

Happiness soon restored the bloom of Pierre's cheek, and on the morning of his marriage, he looked the handsomest man in the whole gay company. Nor was his bride the only one who thought his honorable scar added to the interest which he inspired, for all the village girls envied Nanette her husband.

A Tale for the Young.

TWO NOBLE HEARTED CHILDREN.

IT is a beautiful sight when children treat each other with kindness and love, as is related in the folowing story: Last evening, says the narrator, I took supper with Lydia's father and mother. Before supper, Lydia, her parents, and myself, were sitting in the room together, and her little brother Oliver was out in the yard drawing his cart about. The mother went out and brought in some peaches, a few of which were large red-cheeked rare-ripes—the rest small or l'nary peaches. The father handed me one of the rare-ripes, gave one to the mother, and then one of the best to his little daughter, who was eight years old. He then took one of the smaller ones, and gave it to Lydia, and told her to go and give it to her brother. He was four years old. Lydia went out and was gone about ten minutes, and then came in.

"D'd you give your brother the peach I sent him?" asked the father.

Lydia blushed, turned away, and did not answer.

"D'd you give your brother the peach I sent him?" asked the father again a little sharply.

"No, [illegible] I ate it myself."

"What [illegible] you do that?" he asked.

"I [illegible]

"What [illegible]

"Yes, I did, father," said she, "I gave him mine."

"Why did you not give him the one I told you to give?" asked the father, rather sternly.

"Because, father," said Lydia, "I thought he would like mine better."

"But you ought not to disobey your father," said he.

"I did not mean to be disobedient, father," said she; and her bosom began to heave, and her chin to quiver.

"But you were, my daughter," said he.

"I thought you would not be displeased with me, father, said Lydia, "if I did give brother the largest peach;" and the tears began to roll down her cheeks.

"But I wanted you to have the largest," said the father; "you are older and larger than he is."

"I want to give the best things to brother," said the noble girl.

"Why?" asked the father, scarcely able to contain himself.

"Because," answered the dear generous sister, "I love him so; I always feel best when he gets the best things."

"You are right, my precious daughter," said the father, as he fondly and proudly embraced her in his arms. "You are right, and you may be certain your happy father can never be displeased with you for desiring to give up the best of everything to your affectionate little brother. He is a dear and noble boy, and I am glad you love him so. Do you think he loves you as well as you do him?"

"Yes, father," said the little girl, "I think he does; for when I offered him the largest peach he would not take it, and desired me to keep it; and it was a good while before I could get him to take it."

The Maiden and the Hero.

ON the night of the Battle of Brandywine, I was sent with a message from Gen. Green to Count Pulaski, a noble Polander, who took a prominent part in our freedom. He was quartered in a neat farm-house, near the upper fords. After our business was finished, the Count asked me to take some refreshments, and at the same time called out—

"Mary, my lass, Mary!"

In an instant a rosy-cheeked girl entered, her face beaming with joy, it would seem, at the very sound of Pulaski's voice.

"Did you call me, Count?" said she very timidly.

"How often have I told you, little love," he said, bending his tall form to kiss her cheek, "not to call me Count; call me your dear Pulaski. This is a Republic, my little favorite. We have no counts, you know.

"But you are a Count, sir, when at home, and they say you came a long way over the ocean to fight for us."

"Yes, yes, Mary, very true, I did come a long way, but one reason why was, I had to come, in a measure. Now can you get for this gentleman and myself a little refreshment? He has a long way to ride to-night."

"Certainly, sir," and she went out of the room like a fairy.

"A fine, pleasant girl," said Pulaski. "Would that I had the riches that I once had, I should give her a portion that would send half the youths hereabouts after her sweet face." * * * *

On the morning of the 11th of September, 1777, the British army advanced in full force to Chadd's Ford, for the purpose of crossing the Brandywine Creek, and bringing on an action with Washington. Sir William Howe drew Maxwell's division across the creek by ten o'clock, at one of the lower fords.

The Hessian General Knyphausen, with a large force advancing up the side of the creek, and uniting with Lord Cornwallis who [illegible] the left wing of the army crossed at the upper forks of the river and creek.

It so happened that during the ragings of the conflict, in carrying [illegible] I passed [illegible] in the direction of Pulaski's quarters that I had visited the night before. [illegible] was in the midst of the battle, [illegible] to ride up [illegible] a [illegible] [illegible] [illegible] by the [illegible] and her [illegible] I had [illegible] Pulaski [illegible] [illegible] I [illegible] [illegible] [illegible]

He pointed to a company of Hessians, or Anspach grenadiers, then some distance off.

"Right wheel, men—charge!"

And they did charge; I do not think one man of that Hessian corps ever left the field, except to be placed in the grave.

The last I saw of Pulaski on the battle ground of Brandywine, he was bearing in his arms the lifeless form of poor Mary.

The Glorious Fourth.

Amin the thousands and tens of thonsands that have gathered together to celebrate this memorahle day, in our blessed land, all should have some particular event to lay away in memory's storehouse, to which they can refer in after days with pleasure. All should have, for it is a day so eventful, so joyons, so sacred that every true American should so enjoy and improve the day, that each return of it should he hailed with only pleasant recollections. Would that we could make record of all the happy gatherings—all the patriotic orations and speeches, toasts and sentiments, and herald to our readers many of the merry gatherings of young and old. Would that we could tell of tbo honfires and fireworks, the roar of cannon, the ringiug of hells, the many finely spread tables and generous hospitalities that have been exhibited in our land, or even in this, our own Eureka State. But it cannot be done, and we can only speak of here and there a few cases that have come under our notice, personally or by proxy.

California will ever bo true to those most glorious principles that gave birth to the Declaration of Independence. That spirit will not slumber here, as the return of each 4th of July will testify.

Long before the god of day had mounted his chariot, the roar of cannon and rattling of musketry, the ringing of hells and the shouts of the awakened people told us a great day was at hand. In all the principal cities of the State, the 4th was duly observed, and with great eclat.

We know there are many who have richly enjoyed those festivities—our forte lay another way. We received many kind and pressing invitations to many of the festive scenes, but declined them all. We had an object to accomplish, and there was one scene to which we were drawn, which compelled us to decline all others, much as we desired to testify our thanks for the remembrance of our friends. Those who are parents will readily receive our excuse, when we tell them we spent our 4th of July within the circle of HOME. It is there all can best enjoy and appreciate the value of the freedom for which that Declaration was made, which cost so much treasure and blood, and which is now being estimated as it should be, as we see the influences that are extending world-wide in blessings.

Among the celebrations which we shall note hereafter, are those at "Woodside," by one of the partners in the celebrated house of Adams & Co., —a magnificent affair, given to their employees and friends, at that beautiful residence: the military gatheriug at Martinez, under Gen. Sutter—a grand affair; the Sabbath School gathering at Sacramento; the parado of the Marysville Fire Department—the day closed with bonfires and fireworks, which could be seen from many places. Few accidents occurred, and the day passed, to be sealed as another link to our enduring Freedom and Independence.

HARVESTING.—The Sonora Herald, of July 1, says: "In the short perigrinations which we have lately been enabled to enjoy, wo have noticed that the grain crops are being cut, preparatory to harvesting, in all the fields in this vicinity, for miles around. The ripe fields of barley and wheat form a pleasing contrast to the barren appearance of the parched, brown hills which surround them. Every day's experience goes towards satisfying us that the industry of man is capable of producing wonders; and seeing what it has already been done here, we are led to expect that we shall yet see this whole region blooming at every step with gardens, surrounding the homes of a happy mining population."

GRAIN IN SACRAMENTO VALLEY.—Tho grain upon the Sacramento Valley will yield a much larger crop than has been anticipated. The crop is more extensive—travel where you will, it matters not—in tho valley or up the mountain, it is grain, grain, grain, and good crops, too. There is quite a large amount of barley in and around Sacramento city, wheat farther back, and all we have seen or heard of is nearly free from smut.

THE article on California Trees, on our fifth page, was credited, by mistake, to the Marysville Herald. For "Herald," read "Express."

State of Trade.

A STEREOTYPED phrase will be found in all the journals of the day that utter an opinion upon the state of trade, or upon the prospect ahead. A general apathy—a general apathy—a general despondency, and little prospect for the better—these are the oft-quoted expressions. But can we not easily account for all this? We aver that it is the easiest thing in the world to account for the present dull trade, and the causes of it. We hold that it is because all our traders have been carrying "coals to Newcastle;" i. e., our importers have paid hut little regard to the increased productions of the country. They have imported as much beef, pork, hutter, lard, and various other articles as in former years, forgetting that we are rapidly increasing our home products, which must inevitahly diminish the profits of importation, hesides increasing a surplus that must drain us of the treasure, aud thus add to the already heavy pressure.

Farmers have made the same mistake in raising crops out of proportion to any demand that could possibly arise. For instance, in years past the *only* food of our horses and mules was Barley, and the demand was large. Recently, this food has changed, and hay, oats, meal, and good pasturage have reduced that demand nine-tenths, and yet no calculations have been made to meet such a change. We might mention several other articles affected hy similar changes, such as shovels and picks. In '50, '51, and '52, every miner needed both; during the last two years the system of mining has changed, and comparatively few are wanted, and they continue to import, while our warehouses are piled full of them. In past years, too, every huilding was of wood—outside, inside, roof, and flooring—all parts needed nails, and the demand was large; hut now our buildings are of hrick and stone, the roofs slate or zinc, and by these changes the demand for nails has decreased nearly three-fourths; and many changes else we might name. These are a part of the causes of the terrible derangement of trade. If a wise forethought had been observed, this could have been avoided—every department could have been shielded, and a prosperous condition could now have been enjoyed. Trials only can make men wise, and experience is the best teacher. We must all strive to correct these evils, and guard against a repetition of them.

For prices, where there *is* a fixed price, we refer to our market report, in another column.

GREAT HEAT.—The hot weather of Sacramento has been felt by Franciscans the last few days; 102, 103, 105, 102, is the record for four days, and when we notice that those who leave one place to visit the other, experience a change of fifty degrees in seven or eight hours, we need not wonder at an occasional "chill." or "fever." Such changes cannot be endured without severe results.

PROFITS OF POULTRY.—We received the following data as the result of raising poultry, from Mr. Myers, of San Jose. Mr. Myers had ten hens on the 28th of May, 1853. By their increase he sold *two hundred* young fowls and had one hundred and fifty left for himself; he sold $30 worth of eggs, and had a plenty for his family for the season. Is this profitable?

PEARS and Apricots have made their appearance from the South, and a few Apples, but none of a good or healthy character. Oranges are abundant, and of good quality.

GERMAN BENEVOLENCE.—A gentleman interested in the welfare of the German General Benevolent Society, sends the following extract of its proceedings to the Chronicle, showing what it has accomplished during the past three months, ending on the 1st inst:

"Of 183 applications for employment, 51 persons have been employed by the agent of the society, who rendered his services gratuitously to to all who applied to him. Relief to the amount of $304 was granted to 16 persons; 12 were sent to the mines, 4 to the Atlantic States and 1 to Acapulco. Several sick persons are now in private hospitals, under charge of the society. It is the intention to establish a hospital for the benefit of indigent sick German, as soon as sufficient mean can be obtained, and towards which liberal donations have been made by our generous citizens. The society acknowledges duly the kindness of C. K. Garrison, Esq., who, in every instance, when applied to on behalf of the society, has granted a liberal reduction in the rate of passage to the States."

IMPROVEMENTS IN COLUMBIA.—We have noticed a very great increase of improvement in Columbia lately. There are six stone houses now being or about to be built, and everything seems to give token of a prosperous state of affairs. It is our earnest wish that it may long continne.—*Sonora Herald.*

Familiar Sketches of the Natural History of California.

BY ALEX. S. TAYLOR, OF MONTEREY.

THE KANGAROO RAT OF CALIFORNIA.—This beautiful little animal is found in various districts of our State, and often proves a great pest to farmers and housekeepers. It is said to abound in large numbers in the neighborhood of the Tulare Lakes of the San Joaquin Valley, where it makes a burrow like the common ground squirrel of the country. An old hunter informed me that there are two kinds, one much larger than the other—the larger found in the upper Sacramento plains and the Sierra Nevada. The specimen before us belongs to the smaller variety, and is found in some parts of Monterey county in considerable numbers. The head is as large as that of a common sized rat, with four long bristles declining back on each side of the upper jaw. It has two long lower teeth, and four upper ones half the length of the former. It measures ten inches from the end of the tail to the nose, and weighs about three ounces. The body on the back is a brownish sprinkled grey, divided from the fine white hairs of the belly by a yellowish stripe, which continues to the extreme end of the tail, along with the other colors—the tail tipped with a complete brush of fine hairs. It has a large pouch on each side of the mouth, which overlaps and at times entirely conceals it. The pouch is crammed with its food by two small hands, one inch long, armed at the palm with four claws and a rudimentary one. The hind legs are three inches long, with paws three-fourths of an inch in length, and armed with four long claws. The ears decline sharply, and erect half an inch. The nose of the animal is as hard as the rind of old cheese, and with its fore hands it can descend into the hardest earth in an incredibly short space of time. It has acquired the name of the Kangaroo Rat from the fact of the length of its hind legs, and springing in long leaps like the kangaroo of Australia. This variety of the Rodentia of California, must not be confounded with the wood-rat of the country.

THE WOOD RAT OF THE CALIFORNIA GROVES.—This animal is about the size of the common house rat, which it much resembles in appearance, but with a shorter tail. It inhabits the oak and pine groves of the State in the south, and builds a curious nest of sticks, in a pyramidal form, sometimes as high as four feet. The house or nest is so well put together with ragged and crooked splinters and sticks, that it is difficult to demolish it without burning. The animal forms its nest among the interstices of the mass of rubbish, or digs a small hole in the ground at the base inside. Its feet are furnished with long warts behind the claws, and when frightened it runs along the branches of trees with great speed and dexterity, where it generally has some secret retreat in a hole from hawks and snakes. This little animal is found in large numbers all through the county of Monterey, and also in abundance in San Luis and Santa Barbara. It often builds its wooden house in the branches of the trees. These chip edifices are a curious feature among the open groves of oaks of Coast California. To a stranger it is almost impossible to believe that such an insignificant animal should show himself such a cunning architect from the slender materials he has to build with, and when finished found to be so firmly matted and bound together.

THE BLINN VELVET MOLE OF TOPO CIEGO. This curious little animal is found all over the coast counties of Southern California, and is a great depredator in gardens and orchards. It is six inches long from the end of the tail to the end of the snout. The head is the size of a small rat, and is furnished with a long hard snout of grizzle, half an inch overlapping the entrance of the mouth, which is furnished with only elementary teeth in the form of a sharp fine bone above and below. The tail is one inch long, slightly hairy, of a round-file shape. The fore paws or hands are half an inch long, by the same breadth, white and hard, and furnished with five strong claws, which, with its hard snout, enables it to make a hole in the ground in an incredibly short space of time—in a minute they are out of sight if they can get these instruments to bear. It is furnished with *neither eyes nor ears*. The hind feet are of the same shape as the fore, but much smaller. The body of this little varmint is covered with a fur of plush, softer than the finest velvet, and is much used by the Californians for cleansing the eye when inflamed.

Manufacture of Axes in Collinsville, Ct,

THE importance of this branch of domestic industry will, in some measure, be realized, when we learn the extent to which the business is carried by a single establishment, which has been in operation about twenty years, under the supervision of Messrs. Collins & Co., in Hartford, Ct. The works of the company are located at Collinsville, on the Farmington river, to which place a branch of the New York and New Haven Railroad extends, connecting with the main road at New Haven.

This company is incorporated by an act of the legislature, and has a capital of $300,000 invested in tho business. The machinery employed is of the most powerful description, ingeniously constructed, and skilfully adapted to the various purposes for which it is intended.

The entire works of the company are kept in operation, and all the machinery driven by thirteen large water wheels. Twelve hundred tons of iron, 200 tons of cast steel, and 2,000 tons coal are annually consumed at this establishment. The company employs about 350 men, and manufacture from 1,500 to 2,000 edge-tools *daily*, and the reputation of all articles hearing the mark of "Collins & Co." is of the highest order. Their trade is rapidly extending, and their sales are very extensive not only throughout the United States, but also in Canada, Mexico, Cuba, South America, and other foreign countries.

To those who have never seen the axe manufacture in all its various departments, a brief description of the *modus operandi*, by which the rough materials are transformed into the beautifully finished and highly polished axe, ready for the workman's use, will not be unprofitable or uninteresting.

More fully to illustrate this, the reader will imagine himself quietly seated in the accommodation train, from New Haven to Collinsville. After a pleasant ride over an easy track, surrounded by picturesque scenery, he suddenly finds himself in the immediate vicinity of this thriving little village, snugly and beautifully situated amid the surrounding mountains. Here is a thrifty population of near 1,500 inhabitants, depending mainly upon the edge tool business for their maintenance. Two churches, and a neat and convenient schoolhouse, where 200 to 250 children regularly receive the benefits of an excellent education, add essentially to the attractions of the village, while the pleasant dwellings and heatiful shade trees which adorn the streets, give an air of comfort and contentment to its general appearance.

Entering the extensive and admirably arranged workshops of the company, the visitor is struck with the perfect system and regularity which are exhibited in all the various departments. Much of the labor-saving machinery in use at the works of the Collins Company was invented, patented and constructed here, and is unlike any other in use. The iron, after being properly heated, is carried to a machine which cuts it to its proper shape, forms it, and punches the eye to receive the helve. The steel (previously cut into the necessary size and shape) is welded to the iron under trip-hammers, and drawn down to a more perfect form. After this, another workman examines each axe, and regulates the eye, and also takes out all crooks and irregularities of the edge. It is then taken to another shop, and by a powerful machine (invented at the works), *shaved down* by a cutting operation to a nearly perfect edge, and is now ready for *hardening*.

The process of properly tempering edge-tools is one of extreme practical difficulty. Indeed, by the old method, it is nearly impossible to arrive at the precise point of temperature, and give the requisite hardness without leaving the axe too brittle for general use. This difficulty, however, has been obviated by the invention of a new plan, based upon a principle by which the most unerring results are obtained. Every tool is subjected to an uniform heat, produced by means of ovens peculiarly arranged, and regulated by thermometers in the most perfect manner, by which the temper is most accurately and uniformly *drawn*, and a fine and permanent cutting-edge produced.

After the axe is sufficiently *tempered*, it is taken to the polishing shop, when the surface of the cutten portion below the eye is finely polished on emery wheels. By this means an even surface is obtained, the axe receives a fine polish, and any defects or flaws in the steel are rendered visible, and may be readily detected. The axes are now carefully examined by inspectors, whose sole duty it is to attend to this branch of the business, and every tool having tho least flaw or imperfection that would injure it, is rejected; and only those which are perfect are allowed to receive the mark of the company upon them. By this means tho axes of the Messrs. Collins & Co. have attained a reputation at home that is well founded, and their superior qualities are known and appreciated abroad. After stamping, tho *head* of the axe is dipped in asphaltum to prevent its rusting, and a *label* with the signature of Samuel W. Collins is put on every tool, the more effectually to guard against counterfeiting. After being weighed, the axes are enveloped in paper, and packed, a dozen in a box, ready for market.

Although we have more particularly described the manufacture of *axes*, Messrs. C. & Co. do not confine themselves to making these alone. Edge-tools of various descriptions, such as adzes, coopers' tools, hatchets, &c., &c., also picks, sledges, and mining tools generally. These are all of the most perfect finish and superior quality, as hundreds of those who have used them, can attest from their own experience.

Such establishments as this are an honor to the country, and creditable alike to the proprietors and to the skilful mechanics in their employ; and we trust the time is not far distant when similar manufactories of articles of general utility will be seen springing up in all parts of our country, and prove a source of wealth and prosperity to all who embark in the enterprise. Some of the best cutlery in the country is now manufactured by our own artisans, from our own native mines; and with our mountains teeming with coal, and the richest ores in the world, there is no good reason why we should be dependent on the importation of a single article of cutlery or hardware from foreign countries.—*Plough, Loom, and Anvil.*

TALL OATS.—On Monday last we received two dozen heads of oats from C. Hix, Esq., of White Oak Springs. One of them measures 28 inches in length, and has over six hundred kernels. The twenty-four heads average over five hundred kernels. These specimens were taken from a field on Hix's Rancho, and we are informed that the entire crop is unsurpassed in size by any heretofore noticed.—*Mountain Dem.*

HORTICULTURAL.

When we were at San Jose, among the many fine spots we visited was the garden of Judge Daniels. We took notes at the time, but they were mislaid, and we now jot them down.

The Judge is a true, scientific and practical Horticulturist, and in his garden may be found some of the very best specimens of rare plants in the country. The love of science inspires him to obtain the best, and, understanding the art, he is very successful in their propagation. We noticed the roses, large plants, solfataire, chromatella, giant de battelles, and others; very choice grapes, and in full bearing; very fine fruit trees, standards and trained. Here we again saw the disease incident to the California peach. We find it, all the same everywhere. Most excellent strawberries; some extra native kinds, from seed. No native fruit of this kind has yet equalled those that have been introduced. We found here "Longworth's Prolific," in perfection. It was from this variety we received the fruit heretofore noted. We enjoyed the fruit in their perfection, and were delighted with the grounds. We would like very much to see a garden so well stocked with such gems, receiving a little more regard to the finish and design. A few finished walks, neatly gravelled; a few arbors, covered with the grape, or that beautiful English ivy we saw, would make a nice place, Judge, to eat your fine strawberries and cream; and then, how much better will the fine specimens appear when in clean and well designed grounds. The gooseberries were large and fine.

It was here we saw six hives of the Bee. This we esteem a matter of great moment in this country, to get these well acclimated. We were gratified at what we saw, and feel assured Horticulture has a good aid in Judge Daniels.

Advance of Horticulture.

We publish the entire Report of the Committee on Agrticulture, of the Santa Clara County Society, as it is a valuable and interesting document, and presents facts that are very important to be known thoughout the State. It shows also the interest manifested in that county, and will serve to stimulate others. Unless some of our citizens in other counties awake, this county will bear off the palm at the coming State Fair.

Report of Committee on Agriculture, at the Meeting of the Agricultural Society in San Jose on the 10th inst.

Mr. President: The Committee on Horticulture have thought that a few hints in relation to that interesting and useful science, in its various branches, as suited to the valley of Santa Clara, by way of a brief report of this Society, would not be out of place at the present time.

Your committee believe that the soil of this valley contains all the elements necessary to the growth of all the fruits, flowers, vegetables, trees and plants, of every variety, either for use or ornament, that are natives of the temperate zone; and in some localities, many of the tropical fruits and plants can be raised in all their richness and beauty: All that is wanting is industry, guided by science, to develop the rich treasures hidden under our feet, and to produce in all their beautiful profusion the riches of Flora and Pomona.

Your committee feel persuaded that Horticulture, as one of the great branches of Agriculture, is destined to achieve greater triumphs in this country than has ever been awarded it elsewhere, but we feel averse to detaining this meeting with a minute detail of all its operations, and only wish to offer a few hints of a general character on the three main divisions of Horticulture, viz.: the larger kinds of Fruits, such as Apples, Pears, Peaches, Plums, Cherries, &c., with all the kinds of kernel and stone fruit; 2d, the smaller kinds of fruit, such as Grapes, Strawberries, Gooseberries, Currants, &c.; 3d, all the kinds of cultivated flowers and ornamental planting, whether indigenous or exotic.

The cultivation of fruit is receiving increased attention as the adaptation of our soil and climate to the object is being developed, and as far as experience has shown, California has proved herself susceptible of producing a greater variety of fruits than any other State in the Union.

Apples, pears, peaches, plums, apricots, grapes, quinces, nectarines, figs, almonds, pomegranates, cherries, &c., have all been tested far enough to indicate a luxuriance and productiveness exceeding our most lively hopes. Your committee anticipate a large increase in the cultivation of the pear. The adoption of the quince as a stock for engrafting and budding many of the choice varieties upon, has given an impetus to the business which bids fair to give us in a very short time all that we can wish of that excellent fruit. The peach will require some care or order to succeed well; especially in the selection of sorts, soil and location; the southern sorts generally will not bear exposure to the cold and stormy winds in the spring to which a great part of this valley is particularly liable, occurring as it does just when they are in bloom—but by selecting suitable northern varieties, and a proper soil and location, the evil can no doubt be avoided.

The small fruits, such as grapes, strawberries, gooseberries, raspberries, currants, &c., have been tested sufficiently to remove all doubt of their complete success; all that is wanting is judgment and care in selecting the proper varieties.

It is all a mistake to think that fruit will not grow on soil that is not continually wet. A deep, clean and thorough cultivation will do more for the driest soil we have, than all the irrigation that can be given it. In making selections of any of the different kinds of fruit, a proper regard should be paid to soil and location, and your committee would strongly recommend the raising of new varieties from seed raised and ripened in this country, especially of the smaller fruits; and some means should be adopted to correct, establish and preserve the nomenclature of the different kinds of fruit, as almost every different variety has some distinctive characteristic and habit requiring a modification in this treatment. Society has suffered greatly by getting their trees and plants of men with whom they were unacquainted, and such impositions are calculated to injure the cause of Horticulture very much, and we fear that while such unprincipled speculators can get sale for their trash, the evil is without a remedy.

We now come to the most pleasing part of our report—"the Flowers"—and, cheering as it is to be able to record such bright results in favor of Pomona, our cheek receives a brighter tinge, our eye a more vivid sparkle, and as we anticipate the future and behold the riches and beauty of our favored valley, our hearts cannot but throb with a livelier feeling of gratitude to Him who has given such a world to the children of men: especially as the fairer part of creation, the Ladies of our land, are turning their attention strongly to this subject; and, we know, with their help we can carry the day.

The *Rose*—the queen of flowers—exhibits itself in all varieties, and in all rich characteristics, in greater excellence in this valley than we have ever witnessed elsewhere; while the Dahlia, the Carnation, the Pink, the Chrysanthemum, the Verbena, &c., attain such a vigorous growth, and such brightness and beauty of color, as must be seen to be believed.

The ornamental trees and shrubs, both of foreign and native varieties, thrive remarkably well with common attention; and we have no doubt that time and attention will bring a number of our native trees, shrubs and flowers into notice, which will far exceed any now in cultivation.

All of which is respectfully submitted:

Wm. Daniels, Jas. F. Kennedy,
Joseph Aram, L. Prevota.
Committee on Horticulture.

The Concord Grape.—Mr. E. W. Bull, the originator of this esteemed variety, thus describes in Hovey's Magazine this beautiful fruit:

"The Concord Grape is a seedling, in the second generation, of our native grape, and fruited for the first time four years since, being at that time the only seedling I had raised which showed a decided improvement on the wild type. Notwithstanding its unfavorable position, it has proved a great grower and bearer, and very constant to its quality and season. The seedling from which the Concord was raised grew to a Catawba, and, it is quite possible, was impregnated by it, it having the flavor of that variety. The parent vine was a good and sweet grape, large, black and ripe the 20th of August.

The Concord Grape, as I said before, is a strong grower; the wood strong, the foliage large, thick, strongly nerved, with a woolly under-surface, and has never mildewed nor rusted under any vicissitudes of weather. The grape is very large, frequently an inch in diameter, and the bunches handsome, shouldered, and sometimes weigh a pound. In color it is a ruddy black, covered with a dense blue bloom, the skin very thin, the juice abundant, with a sweet aromatic flavor, and it has very little pulp. It ripens about the 10th of September. The first ripe bunch of the season was exhibited at the Massachusetts Horticultural Society's Room, on the 3d of September, 1853. The vine was neither pruned nor pinched, nor had application of any of the horticultural arts, whereby precocity and size are attained, my object being to ascertain what would be the constant habit of the vine. I suppose that its quality would be much improved in a more favorable climate, and that its superiority to the Isabella would be as apparent under such circumstances as it is here. The great want of the country in this latitude is a good table and wine grape, which shall also be early, hardy, and prolific. The Concord Grape fulfils these conditions, and I feel sincere pleasure in offering it to my countrymen."

Flowers and Music.—Yes, two gifts God has bestowed upon us, that have in themselves no guilty trait, and show an essential divineness. Music is one of these, which seems as if it were never born of earth, but lingers with us from the gates of heaven; music, which breathes over the gross, or sad, or doubting heart, to inspire it with a consciousness of its own mysterious affinities and to touch the chords of its unsuspected, undeveloped life. And the other gift is that of Flowers, which, though born of earth, we may well believe, if anything of earthly soil grows in the higher realm—if anything of its methods are continued, if any of its forms are identified, they will live on the banks of the River of Life.

Flowers! that in our gladness and in our sorrow are never incongruous—always appropriate. Appropriate in the church, as expressive of its purest and most social themes, and blending their sweetness with the incense of prayer. Appropriate in the joy of the marriage hour, in the loneliness of the sick room, and crowning with prophecy the foreheads of the dead. They give completeness to the associations of childhood, and are appropriate even by the side of old age, strangely as their freshness contrasts with wrinkles and gray hairs; for still they are suggestive, they are symbolical of the soul's perpetual youth, the inward blossom of immortality, the amaranth crown. In their presence we feel that the body shall go forth as a winged seed.

The following was brought out in one of the discussions of the American Institute, at a late meeting of the Farmers' Club:

Song Birds.—Mr. Hooper, a distinguished naturalist, read a paper upon the introduction of the song-birds of Europe into this country. He stated that in 1852, a committee of gentlemen undertook to introduce these birds into Greenwood Cemetery. Mr. Woodcock, of Brooklyn, then in Europe, introduced fifty goldfinches, fifty English larks, fifty robin red-breasts, and some others, which have been let loose in the groves of the cemetery. These are now probably well established upon Long Island.

Breeding of Fish.—Dr. Adams communicated the success of those engaged in the business, as it has now become a business, of breeding fish. Fish eggs can be transported between folds of wet linen in a box, and 500,000 eggs can be hatched in a stream under a sieve fifteen inches in diameter. Another paper treated of the mackerel fishing of the Black Sea and Bosphorus. The fishing season commences at Constantinople, February 24th. The fish are then five or six inches long. By the time they reach Gibralter, the mackerel are about half grown. In September the same fish arrive on the American coast, and are then full grown. Hundreds of thousands of people are engaged in the fishing in the spring of the year in the Bosphorus. The water seems alive with these fish as they come down from the Black Sea.

Mr. Pell said upon the subject of fish, that he would give the Club some information. He was convinced by his own experiments that all salt-water fish can be bred in fresh water, and that fish are easily domesticated. He feeds his fish upon liver, Indian meal mixed with blood, and boiled rice. He says his pike are very voracious. He has seen one strike into a school of small fish he was feeding, and take a full mouthfull in an instant. He said a perch or golden carp can be frozen in ice solid and thawed out without injury. He spoke of the value of fish as a manure, containing all the elements necessary to fertilize the earth. He had succeeded in producing leeches. By cutting off the tail of the leech, the blood will pass off, and the leech do double duty.

The Scientific Convention.—This body of learned men have been in session at Washington the past week, to the number of one hundred and fifty. This association has for its object the promotion of science generally, and particularly the natural sciences. Previous to its formation there had been little systematic effort among the scholars of this country, and consequently comparatively little advancement in research. This organization has awakened a generous rivalry among our prominent scholars, and the results of the few meetings already held are such as to warrant the prediction that our contributions to science will soon equal in importance those of any other nation. The acquiring of wealth has hitherto been the absorbing object of the young men of our land; but a fortune is now so often acquired by men who are inferior in intellectual attainments and not fitted to grace refined society, that wealthy men will be led to seek distinction in the paths of science, and to devote some of their gold to the furthering of the purposes of scientific investigation.

We have not space to notice the various subjects brought before the association, or to speak particularly of the new theories broached. The President, Prof. Dana, of Yale College, in his opening address, after speaking of the leading purpose of their meeting, as the gathering of facts which shall give solidity, increasing extent, and beauty to the edifice of truth, said:—"But there is another prominent object in view in this annual meeting. It is the cultivation of good feeling, kindly sentiments and sympathy among the lovers of science in the land; that with one aim before us—*truth*, and not self—as the end of every investigation, we may go forward harmoniously rejoicing in each other's success, and glad for the new light we may each receive."—*Country Gentleman.*

New England Wine.—We find that in many localities in Connecticut, wine of excellent quality has been made from the native grape within a few years, on a small scale, but in sufficient quantities to test the question, whether good wine can be made from the native grape of this State. In every instance a superior article has been produced. A gentleman of Andover made two barrels a few years since and the physician in his neighborhood ordered it to be used in sickness as a much better article than the imported. He readily sold it for $2 50 a gallon. Two gentlemen of this city, each had a barrel last fall, from grapes purchased at $1 a bushel in the market. Six or eight bushels will make a barrel. We find on our desk a letter from Mr. A. G. Graham, of New Britain, and suppose from the word he writes it, that it is from the [illegible]. We are gratified that wine can be produced in [illegible] in large quantities and at a great profit to the producer.—*Hartford Times.*

German Agricultural Schools.

Mr. C. L. Fleischman, who was educated in one of the German agricultural schools, and is one of the editors of the Polytechnic Journal says:

"Who is not acquainted with the history of the wars which enervated Germany, which exhausted all her pecuniary means, and brought her to the verge of utter ruin? Germany was, after the close of the French war, in a pitiable condition; and had it not been for her kind soils, which for thousands of years enabled her to withstand the severe calamities which befel her during that long period, Germany would now be a second Greece. She adopted, at an early period, various means to improve her agriculture. Professorships of agriculture were instituted at the universities, journals and periodicals were published to disseminate modern improvements, fairs and meetings were regularly held to encourage the farmer; but all that gave not the desired results. A thorough education was found necessary, practical and scientific education, which enables the farmer to enhance the value of his landed property, as circumstances and condition allow it, to give them the knowledge to improve the various modes of agriculture, *and to be more than a mere imitator*. Proper agricultural schools were wanted, and the monarchs of Germany spared no pains to accomplish this important object. The ablest men were selected for the institutions, and nothing was spared to induce them to take charge of them. The late King of Prussia, who, like his ancestors, paid great attention to all improvements in husbandry, was the first to establish such an institution. He invited Thaer, the celebrated German agriculturist, to settle in his kingdom, and introduce agricultural schools. Thaer accepted his offer, and left Cella for Berlin. The other monarchs of Germany followed the example of the King of Prussia, and Germany had, in 1847, 62 large institutions. With some of them Forests and Veterinary schools are connected. Austria then had 9; Prussia, 12; Saxony, 5; Bavaria, 16; Hanover, 2; Wurtemburg, 8; and other States, 14; in all, 62.

Milk for Manufacturers.—Milk now possesses other offices besides the production of butter and cheese, and the flavoring of tea. It has made its way into the textile factories, and has become a valuable adjunct in the hands of the calico-printer, and the woolen manufacturer. In the class of pigment-printing work, which, indeed, is a species of painting, the colors are laid on the face of the goods in an insoluble condition, so as to present a full, brilliant face. As a vehicle for effecting this process of decoration, the insoluble albumen obtained from eggs was always used until Mr. Pattison, of Glasgow, found a more economical substitute in milk. For this purpose buttermilk is now brought up in large quantities from the farmers, and the required insoluble matter is obtained from it at a price far below that of the egg-albumen. This matter the patentee called "Iaebrine." A second application of the same article—milk—has just been developed, by causes arising out of the recent high price of olive oil. The woolen manufactures are now using the high priced article mixed with milk. This mixture is said to answer much better than oil alone, the animal fat contained in the globules of the milk apparently furnishing an element of more powerful effect upon the woolen fibres than the pure vegetable oil alone.—*London Medical Journal.*

As an illustration of the influence of the cotton crop of the United States upon England, we find this in Household Words: "Let any social or physical convulsion visit the United States, and England would feel the shock from Land's End to John O'Groat's. The lives of nearly two millions of our countrymen are dependent upon the cotton crops of America; their destiny may be said, without any sort of hyberbole, to hang upon a thread. Should any dire calamity befall the land of cotton, a thousand of our merchant ships would rot idly in dock; ten thousand mills would stop their busy looms, and two millions of mouths would starve for lack of food to feed them."

How to Treat your Boots and Shoes when Partialy Burned.—Somebody says: On one of the cold days, I pulled off my boots and set them close to a stove which was very hot. The room was filled with a smell as of something burning. Turning round I saw my boots smoking at a great rate. I seized them and immediately besmeared them with soft soap, much of which, owing to their highly heated condition, quickly disappeared in the leather. When the boots became cold, the leather was soft and pliable; and now, after several days of subsequent wear, they exhibit no marks of having been burned. The foregoing seems to be worthy of attention.

Tall Grain.—The editor of the Placer Herald has been shown several stalks of early [illegible] seven feet in length, which grew in Placer county, —while the editor of the Grass Valley [illegible] has seen a stalk of rye grown near Grass Valley [illegible] eight inches and containing 144 grains. And we of the Express to-day saw a [illegible] from Kyle's farm near the [illegible] measured [illegible] feet.

The San Jose [illegible]

AGENTS FOR CALIFORNIA FARMER.

Messrs Adams & Co. at a' their offices throughout the United States or Europe.

Messrs. Wells, Faboo & Co., at their offices throughout the Country.

Mr. Chauncey Langdon, Travelling Agent for the northern section of the State.

Mr. E. R. Highton, general and travelling Agent for Northeastern section of the state, to whom we commend our Agents for all information needed.

N. B.—We want Agents in all the principal localities, and persons disposed to act can have the opportunity, if satisfactory to all parties.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JULY 6, 1854.

The Past, the Present and Future.

It is expected of every conductor of a public journal, that they shall hold a particular communion with their readers, at certain periods, and at such times, throwing aside the ordinary topics, come directly before them and hold such a familiar converse, as shall be understood and be beneficial to both.

The California Farmer has completed its first volume of six months. With what degree of success, or how it has succeeded in the approval of it friends and readers, we leave for them to decide. Of one thing we were certain, it has received from its proprietors all the earnestness, all the energy, all the devotion that was in their power to give; regardless of pecuniary results for the moment, regardless of personal fatigue and self sacrifice, they have labored to awaken a due interest in this great science, and to cherish and keep alive every principle that would give strength to this great "right arm" of the State, believing that upon the success of Agriculture depended the permanency and prosperity of California. Like to a barque upon an unknown sea, was the Farmer when it was first launched upon the tide of public favor. The pilot, however, was at the helm and the compass was in its place. The pilot had faith and knew his compass was true: the sails were let loose to the breeze; favorable breezes were steadily increasing, and the filling sails denoted a prosperous voyage. For a period of six months the Farmer has been sent on its weekly mission to every county in the State; to every principal city and town in these counties, to Oregon and Washington territories, to the Islands of the seas, to all the sister States of this glorious union, and to the kingdoms of the old world; to England, France, Belgium and Germany, the California Farmer—the *first* Agricultural paper on the Pacific coast—has gone like a missionary, telling the world that here, amid a gold seeking, gold loving people, there were those who still loved and still were practising the science that the Almighty designed originally for man when he created him in his own image, and placed him in the Garden of Eden.

While love for the accumulation of gold was so strong, and the cause of Agriculture but in its incipient stages, and while it was subject to the fluctuations which ignorance, a want of system and a changing population, must ever bring upon it, the California Farmer knew its duty and strove to perform it. With its first numbers, the Farmer published a memorial to Congress asking the endowment of an Agricultural College in California, by general government, and it has constantly urged attention to it. The Farmer has joined in bringing before our State Legislature the subject of Agriculture, and has aided in obtaining the act of incorporation of a State Society with an annual appropriation of five thousand dollars, to be awarded as premiums to the farmers of California. The Faamer has awakened public attention to the cause of Agriculture generally, advocating it at all times in suitable places. Its aim has been to call into notice every feature of improvement in every department, and to utter words of encouragement to the hardy tillers of the soil. We have been encouraged by many kind evidences of interest from the friends and practical cultivators of the farms of California; many cheering words have come to us, and many promises of support in this great work. On these in a measure we have relied. The press generally have been generous, and have bestowed their attention, and given publicity to our enterprise by liberal notices: for all these favors we have been grateful and shall ever remember them.

The past year has been one of peculiar trial to the farming interest throughout the State. A general depression in all the great staples has placed a bar for a while upon the enterprise, and this has prevented them from looking into the causes of their present embarrassment which we have weekly laid before them, and have endeavored to ward off by plans which we are confident would have accomplished it.

When the interest of Agriculture is embarrassed, the mercantile and commercial must feel its effects; when agriculture prospers, all other branches of business feel its vivifying influences, and merchants, business men and real estate owners must now see that the Agricultural interest will be their hope. Let them then aid this great branch of industry, encourage and support it, and prosperity will again return to them. Fail in this, and a retrograde movement will commence in this city and State that years cannot recover. In this depression we of course feel its effects, for we look mainly to the cultivators of the soil for the support to our journal, and thus far we have enjoyed a portion of it. We wish a still wider influence, a more extended circulation, that the truths so necessary to be spread abroad may have their effect. We therefore hope that with this present number, the *commencement of the second volume*, those who desire the spread of Agricultural knowledge will give us their kind influence to extend the circulation of the Farmer. We ask that generous support which will enable us to spread before them, not only things new and old in Agricultural science, but such encouragement as prompt us to prepare for the future and keep in advance, and thus draw up to a high standard. The present is a most momentous period for this country. We repeat—the "great right arm of the State," the "Agricultural interests," demands our greatest attention—for it is the "industrial telegraph," whose machinery, when in order, conveys with lightning speed a healthy, happy, prosperous tone through all the vital interests of the State; or whose derangement produces disease, alarm, ruin and death to all. We speak what we have seen; we speak what we have known—the history of all mercantile and commercial matters bear record that their interests are affected immediately by the condition of the Agriculture of the country.

The present then is a period in the history of the Agriculture of California, from which will be dated its rise and progress, or a paralysis, and the commencement of its decline. We speak not despondingly; we speak the truth boldly, that we may arouse men to a just sense of their condition and responsibility; we speak that we may call not only those who are immediately interested in this matter, but to call the attention of our merchants, tradesmen, ship owners, real estate owners, mechanics, all, all! for it will soon affect them, if it does not now. We call upon them to look to the Agriculture of California, to the vast amount that has been invested in this great interest, and note how much our cities depend upon them for success. What is the chief freight of our steamers up and down rivers, but Agricultural products? What fills our large warehouses, but Agricultural products? What gives the merchant the largest sales, but the products of Agriculture—flour, beef, pork, butter, lard, hams, tea, sugar, coffee, rice—take this traffic away, and what merchandizing would be left. The hides from our cattle produce the trade in boots and shoes, that tells in millions; the large warehouses filled with dry goods, are but the products of cotton, flax and wool, or the substance of the mulberry tree converted into the rich silks and satins that ere long shall be the products of California. Thus would we urge the fact, that there is no branch of trade that is not immediately interested in the cause of Agriculture, and this truth should elicit the due attention of all to its present success.

For the future we have hope, strong hope. The depression that has long hung upon all branches of trade has in some degree aroused a spirit of inquiry into the causes of it, and when once the inquiry is commenced it will not cease until the true cause of the present embarrassment upon trade is understood and the proper remedies applied.

We say again, we look to the future with hope; dark as has been the cloud over these great interests, all is not lost—there is a bright side, and a cheering one. The clouds may settle darkly over our cities, but the sun shines brightly upon the hills and valleys of our beautiful country. The cattle upon our hill sides—fields of grain over our wide spread valleys—orchards where trees are bending under their bounteous crops, the luscious Peach, the purple Fig, the Apple, Pear, and all the fruits of the earth—the wine presses running over with new wine—the abundance everywhere, should inspire us with gratitude to the Giver of all good, and lead us not to murmur because of the abundance of the earth. It is themes like these—prospects like these, that lead us to hope, and if we speak of our own future, it is to assure our patrons and friends that we shall use the same untiring zeal, the same enthusiastic devotion, the same ceaseless energies to this cause, that we may awaken new powers and interests to its aid, and to stimulate those already at work.

It will be our purpose to visit the various counties, to examine personally all the varied sources of success and discomfiture—to urge those measures that can alone secure permanent success Our past is but a type for the future. If we have done well, *we will try* to do better. Our motto is *Excelsior!* What the California Farmer has been—the principles it has advocated, are some index to the future. Free from political bias, free from sectarianism, it will come to its readers regularly, to declare the great truths of Agriculture and Horticulture and its kindred sciences. A portion of its columns will be spared for Literature, and a portion for themes appropriate for a "Ladies' Department," and we solicit the interest of those who make the charm of Rural life, to aid us in this department especially.

The news department will continue to be under the charge of Mr. H. G. McLean, and it will be the object to have the latest and most select intelligence.

In our market reports, we are aided from the best sources, and we shall receive from time to time valuable data of a new and interesting character.

It is our intention, at the earliest moment, to present to our readers plates and drawings of the various subjects connected with agriculture. This will depend, however, upon the interest manifested by those engaged in Agriculture, and the support they give the California Farmer, as it involves a large outlay.

We ask a constant intercourse with our correspondents, and urge that they should make us familiar with their plans and prospects, for by these means we can enlighten others. While we feel we can offer our thanks to many who have cheered us on our way, we appreciate every word and act, and hope that we may long labor to the satisfaction and approval of our readers, and to the building up of the cause of agriculture and it associated interests and blessings.

That was Sweet Butter.—We were much pleased to receive a nice present of a kettle of "True June Butter," from Capt. Simonds, of Santa Clara. The Capt. has a dairy of eight very select cows, and the butter brought to thiscity by him is "butter worth eating."

New Churn.—We have seen a very fine churn, manufactured to order of our friend Clayton, (of Clayton's Saloon, Commercial street) and a churn highly approved. Mr. C. has a splendid ranch at Sonoma, and his interest for rural life has done some good.

California Express, Maarsville,—We are glad to see this paper revived, for it has done good service to the cause of Agriculture, in times past. By the change we are sorry to know we are to lose the aid of our friend Colonel Rust, but we hope to hear from him again.

Los Angeles Grape Crop.—Through the kindness of a friend, we have been favored with the perusal of a letter just received by him from one of the largest vine growers of Los Angeles. The writer states that the grape vine is in full blossom and rapidly approaching maturity. A good average crop is confidently anticipated. The shipments last season commenced about the 20th August. Great competition exists among the freighting vessels plying between Los Angeles and San Francisco. There are now running three lines of steamers, and it is anticipated that another will shortly be put upon the route. The grapes imported from Los Angeles are packed either in printing paper or saw dust.—*State Journal.*

Two opposite opinions should not lie on the same bolster.

Farming in Palestine.

S. W. Jones, Esq., who is laboring in Palestine to ameliorate the condition of the Jews, has has written home to Dr. Reed's Culturist and Gazette an interesting letter, descriptive of the geology and agriculture of that part of the eastern coast of the Mediterranean. He says that its surface rocks belong to the chalk formation; and that the soil is naturally fertile, but wretchedly cultivated. The plains of Sharon appear to be elevated table land, having an abundance of lime in the form, primarily, of minute shells (characteristic of chalk), and valuable for raising grain.

Mr. Jones' letter bears date January 21, 1854, in which he gives the following interesting information:

"The plains are chiefly used to raise grain upon, and to pasture flocks and herds. The appearance now is much as our river lands and plains are about the fore part of June. The wheat is from six to twelve inches high; barley is sown before and after wheat, and is of different ages. Dhura and sem sem is not yet sown. Sem sem bears a seed of a nature somewhat like a flax seed, only larger, and is used to make lamp-oil. There is nothing like a fence or hedge around the grain fields, and all the land not occupied for tillago is one common pasture; but, as in the days of old, no creature of any kind is allowed to run at large, —all are under the care of shepherds, and at night they are driven home into the fold. The first persons that we see stirring in the morning are the cattle tenders, 'going forth with their flocks,' and all day long they can be seen scattered in every direction over the plains 'tending their flocks,' precisely as we read of in the days of the Patriarchs. The wheat is ripe in May, and before this time the rains are over, and there is no need of barns; so the grain is cut and piled up till they *take a notion* to thresh it, when a place is smoothed off on the ground, and the grain thrown on and oxen driven over it till it is pounded up fine, and then is thrown against the wind, put into sacks and carried to market, full of everything that can make it foul; and then people whose business it is, take it and sift it on *the ground in the street*, when it is ready for grinding. If this land was not as rich as the Garden of Eden, they would not, in the way they cultivate it, get their seed. Their plows do not make a larger furrow than our cultivators; and what is more, they only 'cut and cover;' they go round a land, or back and forth on the same, just as it happens—as their plow turns a furrow both ways, it makes no difference. Their yokes are simply a straight stick, with two pins for a bow, with a string tied across the ends under the neck; and it looks, at a little distance, just like a long, low saw-horse, or a saw-bench. They use the same yoke for an ox, mule or donkey; and they are not at all particular about working two animals of the *same kind* together—an ox and an ass, or an ox, a mule or a cow is just as well as any way—the *same gear fits all.*

"In the neighborhood of Jaffa are some of the best gardens for oranges, lemons, pomegranates, melons, dates, bananas, &c., that can be found in the country—perhaps in any country. These gardens have to be watered during the dry season, and all the water is raised from the wells. The well is dug on the highest place in the garden, and the water raised into a pool by a crazy apparatus, turned by a mule hitched to a sweep, where it stands till it becomes warm enough, to use, when it is let on the garden by channels made for the purpose. By watering in the dry season, vegetables can be grown all the year round, and two, three or four crops can be produced on the same ground in a year. All things grow very quick. Early Indian corn has been raised fit for eating in seven weeks from planting, and wheat has ripened in sixty days from sowing. The orange trees, and also the lemons and pomegranites, require to be watered through the summer months, in order to have them produce any good fruit. Figs, grapes and olives are not much raised in these gardens—they do best on the mountains and rocky places—precisely the opposite of what the products of these gardens want. A dry, stony soil, without water during the summer, is the place for them. They say here that if grapes have much water they *mildew.* May *we* not have given *our grapes and gooseberries* too much water or two wet a place? The oranges here are something that we, in Massachusets, have never seen. I wish I could send you *a tree*, with its load hanging to it. They are so full that they are literally bottom upwards, resting on the props. They grow here sometimes that will weigh one and a half pounds. I have seen pound ones, and larger; but it is not the largest that are the best and most beautiful. Their greatest beauty is in their color and number contrasted with the deep green of the leaves. In many places on the trees they are so thick as to make one solid mass, with only room for the leaves to stick out between them. It is in time of gathering during the months of November, December, January and February, and soon the trees are in blossom again."

Every Word True.—The Rev. Mr. Patton, of Hartford, a contributor to the New England Herald, has the following just remarks touching the system of credit on newspapers: "It is our personal opinion that no newspaper should be sent on credit. Advance payment is the only reasonable plan, and to that it will all sooner or later come. If no man is allowed to travel on a rail car, steamboat, or coach, or to enter a concert room or or other public exhibition, without first paying the stipulated price, much more should subscribers, scattered all over the country, and owing a few dollars each for a paper, be required to pay the cash down."

Plants in Pots and Management of Cuttings.

It is remarked that the purchasers of plants rarely succeed in keeping them in any degree of health for many weeks after they come out of the nurseryman's hands; this holds good particularly with those who place them in the windows of dwelling houses. Plants so situated labor under certain disadvantages; but it cannot be denied, that in public houses, in the rooms of poor and even dirty cottages—where it might be supposed that the pores of the leaves must be inevitably closed by carbonaceous matter, or dust—many healthy and beautiful specimens are to be found, which, if we except actual cleanliness of the foliage, fairly rival and eclipse those of the greenhouse. We have in our eye at this moment the window of a small, low and dark room, occupied by a shoemaker, but a most enthusiastic admirer of the geranium (*pelargonium*), wherein flowers of the finest description, produced upon well grown plants, are always to be seen. How are we to account for these things? how reconcile them with the almost inevitable failure of many persons, who expend pounds every year on plants which, in spite of every attention, dwindle and fade.

Another fact is worthy of notice—it is this: If we pass through the streets of a country town, we can scarcely fail to observe that some particular genus or species abounds and flourishes with luxuriance, while plants of more easy culture appear miserably unhealthy. Thus in the town of Abingdon, England, we saw, two years since, in almost every window, specimens of Fuchsia, (*conica* nearly without exception if our memory be correct,) that could scarcely be found in the very best collections, and growing in pots of two or three inches in diameter at the rims; the soil was heaped up round the stem so as to preclude watering at top; hence the water must have been supplied by absorption from the pans. We do not recollect that a healthy geranium was to be seen in any of the windows of that ancient town. We can assign no better reason for these anomalies, than what is found in the trite old Latin line —*Omnia non possamus omnes;* and therefore shall quit digression, and proceed at once to the direct object we proposed to ourselves when we took up our pen.

Half the failures of amateur cultivators may be ascribed to the texture of the soil, which being put in loose, or left in holes, the plant never can thrive, but languishes to its death. Let any one turn out the ball of a plant which he purchases of a skilful nurseryman, by reversing the pots, and while he supports the earth with the fingers, tapping the rim gently against a board or other resisting solid material, and he will rarely fail to discover that the soil is in the condition described, that is, compactly and firmly pressed everywhere around and among the roots, without holes, and with a certain quantity of chips of pots or other open matters to serve as drainage for superfluous water.

When persons attempt to repot a plant, they but too often press and work about the old ball, to clear off and loosen the soil, then, after putting into a larger pot some common garden mold, they place the disturbed roots upon it, fill the surrounding space with same mold, shake or strike the pot, water the surface, and bring the plant into a sitting-room, or perhaps place it in the open air on some bed of earth. This is a supposed case, it is true, but if it do not exactly apply, certain it is that the nurseryman employs soils, which his experience teaches him will suit the constitution of his plants, and brings them to a showy saleable condition. The purchaser is unable to obtain a compost, or even a pure loam, or vegetable earth of a similar character, and thus an ungenial medium is applied unskilfully applied about the roots; while the foliage of the plant is exposed to every inequality of light, air, heat, and water, which belongs to a sitting-room. If garden mold be used, or if the pot be placed in a border, worms are liable to be introduced, or to find ingress to the roots, and then woo to the plant; for, to say nothing of the direct injury they may occasion, those sappers gradually undermine the roots, perforate the soil and make it a complete gallery by their contortive evolutions. Thus they produce all the evil consequences which result from loose and imcompact potting, and also defeat the attempts to furnish a proper supply of water; for the holes they bore are just so many channels through which the fluid passes, without moistening the body of the soil.

We wish to add a word on two material points in the treatment of cuttings. Whenever sand (clean writing, or silver sand, or pure silicious earth, free from adhesive matters.) is employed, it will not be amiss to saturate it with water before it be put on the soil in the pot; it will then act as a quicksand, embracing and closing upon the cutting, and entirely excluding the air from the heel; so prepared, it is readily kept moist and free, whereas sand, if applied dry, receives water with great difficulty. In taking off and preparing a cutting, we have frequently found it better to cut, not *through the joint*, but a trifle below it, thus leaving the part completely perfect. At every joint a bud or system of life exists, and it is this which in ordinary cases propels the first radical processes; by not injuring the vital point we act prudently, and on the same principles as when in budding a tree or shrub we carefully retain the eye of the bud, for without that there be no success. The importance of buds or eyes is always kept in view by a practised gardener; but it must not be overlooked that in every case where the peculiar state of the wood, as to age or ripeness, which the individual plant required, is equally at command, a top will succeed better than a cutting, because it abounds with embryos of buds at its base, and these are most active in the production of those minute fibrous processes, which in the first instance establish the connection between the cellular albumum of the infant plant, and its earthy medium of nutriment. We are indebted for the hint to a nurseryman of eminence, when conversing upon the means of propagating *gardenia;* the rule is not without exception, but it is of the first consequence, and should be always retained in the mind.—*Pax. Bot. Magazine.*

The Absorbent Powers of Spongioles of Plants.

An opinion is very extensively, if not generally, entertained, that the nutriment which trees and other plants derive from the soil in which they grow, is exclusively taken in by the cellular extremities of the roots, which, from their texture, have been called spongioles; and which, in their organization, differ from other parts of the roots, in being totally without any albumum or woody matter distinct from the bark. But it is through the albumum alone of trees, as I have proved by a great variety of experiments, and as is, I believe, generally admitted, that the ascending sap, under ordinary circumstances, passes up from their roots into the branches and leaves; and as this substance does not exist in the spongiole, my attention was directed to an inquiry whether the spongioles possess the power of transmitting fluids, and if such powers were found to exist in them, through what peculiar channels such fluids pass up; and as these questions are necessarily interesting, and to some extent, in particular cases, may become important to the practical gardener, I communicate the result of my experiments.

Spongioles are obtainable in the most perfect state from large seeds, such as those of the common or French bean, which have been permitted to germinate by simply detaching them from the cotyledous; as they thus remain united to the caudex of the plant, and its bud and plumule. Many of these were obtained from the seeds of plants of several kinds, and subjected to various modes of treatment in soils of different quantities, but all perished without a single plumule having expanded, or having apparently received any nutriment either from the soil or other source. Yet the spongioles, in these cases, must have contained greatly more living, organizable matter, derived from their cotyledons, than the whole body of the seed of a very large majority of plants can possibly contain; but they were, I conclude, incapable of transmitting it into the plumules, owing to the want of albumum. I therefore believe my opinion, that spongioles are imperfectly organized parts of the plant, which neither absorb from the soil, nor transmit fluids of any kind for the service of other parts of it, to be well founded; but albumous matter is generated with great rapidity within them, and they become, to a very great extent, transmuted into perfect roots (but not exclusively) I conceive that nutriment is absorbed from the soil and sent up into the leaves, to be there converted into the true sap of the plant. I am aware that the above stated opinions are in opposition to those of many eminent physiologists, to which much deference is due; but I think that they have erroneously included among their spongioles portions of albumous fiber, a substance never found in the organ properly called a spongiole.—*Corres. Pax. Bot. Mag.*

Culture of the Carrot.

A correspondent recently inquired "if carrots could be grown two years in succession on the same ground, and what manure is best for them." In answer to this inqiry:

Mr. G. W. Grant, of Rensselaerville, says—"I have planted the same ground to carrots for the last six years, and with the exception of last year, the crop has improved with each year's cultivation. Last year the draw-back was occasioned by planting a little too thick. I have manured every other year, but think it better to manure lightly every year. Mine is a clayey loam, and I have manured with spent tan-bark, used first as bedding for my stable. My method is to back furrow the ground in beds four or five feet wide, and then plant in drills across these beds, from 16 to 18 inches between the drills, dropping the seed by hand in small furrows made by a long bitted very narrow hoe, and then covering with a rake, hauling the dirt lengthwise of the drills. In this manner they can be almost entirely wed with the hoe by standing on the alleys between the beds. In this way my yield has been from 900 to 1200 bushels to the acre.—One thing more I will state. My best crop was planted on the 14th June. Another thing—I plow deep. The Orange I consider much the best variety.

Mr. Wm. J. Pettee, of Lakeville, Conn., says—"My mind is—use fine, well-rotted manure, and plenty of it—not less than 60 cartloads to the acre—spread on the manure early in the spring, and plow it under 12 inches deep, and on the 15th May plow again, and thoroughly pulverize the soil. Do this on the same ground just as many years in succession as you please, and you need have no fears of success in raising carrots. This course is preferable to using new land every year."—*Country Gentleman.*

Sure Remedy for the Potato Rot.—Select a suitable piece of ground; plough to the full depth of the good soil, and, as the old farmers say, so as to "turn up a *leetle yeller* dirt;" then subsoil; manure as highly as possible—it don't matter much with what, so that it is rich and enough of it—and, when you have done all the rest—*plant with Indian corn.*

California Trees.—*Yew Trees.*—The Indians, says the California Farmer, have a tree in the mountains used by them for bows, and which in appearance is similar to the Yew tree of old. So far the Farmer is correct, but the singular fact of its bearing a berry and never blossoming, is a mistake. It bears a flower, the petals of which are green, or colorless, as it is termed in botany, and might be mistaken for leaves.

Balsam Tree.—We have received the notice of a curious yet very valuable medical plant, or shrub, found in the vicinity of Bird Valley, that grows about two feet high, upon which is found a burr, containing a species of gum or balsam of high medical power; and is used by the Indians as a powerful cathartic, and a reliable remedy for diarrhœa and other similar diseases—being used with great success."

In addition to the Yew, Balsam, and Nutmeg trees, noticed by the California Farmer, as the growth of the district of country between the North and Middle forks of the American river, there are many others valuable, either for ornament, or their medicinal properties.

First, there is the *Laurus Nobilis*, called Winter Laurel or Bay tree, which among the ancients was a famous tree. It is a native of the country bordering on the Mediterranean; but of where else, besides California, we are not prepared to say. It is an evergreen, and grows in the district spoken of, to the height of from fifteen to twenty feet. Its leaves give forth a fragrant odor, and to the taste are somewhat astringent and quite aromattic The Bay Water, in common use, is distilled from the leaves.

The *Juniperis Sabina*, or Wild Juniper, is also found in the same region. And it, too, is an evergreen, in height attaining thirty feet. The bark of the young sprouts is of a greenish, approaching to an orange color, and that of the trunk is rough and of a dark brown. It bears a great quantity of flowers, which grow in clusters, and are delightfully fragrant, loading the air around them with perfume equal to the Magnolia. As an ornamental tree, there is no other, either native or exotic, in California, that can vie with it. How it is now, we know not, but it has been esteemed for its medicinal properties. In chronic rheumatism, particularly, the medical properties obtained from it have been highly recommended.

And then there is the *Cornus Florida*, or Dogwood, which abounds in the same locality, and grows to the height of thirty or forty feet. Elsewhere it generally grows on barren soil, and is slow in its growth; there it is only found where the earth is moist and fertile, and is rapid in its growth.—*Marysville Herald.*

What is Manure?—This question resolves itself into the stating of a great fact: *The farmer creates nothing; he only changes the form of what already exists.* Wheat, or any other plant, wool, beef, beef, cheese, and butter, are nothing else than air, earth, and water in another shape. But the earth is composed of some ten or twelve substances; and that portion of it capable of being converted into a plant, at any one time, is comparatively small—about one-half per cent. of the whole, while air and water constitute the least valuable part. These three substances are the farmer's *raw material*, and out of them he must manufacture his grain. If his soil contains a very small quantity of matter capable of conversion into a vegetable, he receives a small crop at harvest time. A baker can make but little bread out of a nearly empty barrel of flour; but fill the barrel and he will make much bread. Let the farmer fill the earth with substances capable of changing into grain, and he will receive much grain. Nothing can be more simple and yet more true, than that whatever we receive off our farms is but a portion of the soil, with some air and water, in a new form.

An Extraordinary Time-Piece.—There is now in the possession of and manufactured by Mr. Collings, silversmith, of Gloucestershire, England, a most ingenuous piece of mechanism—an eight dry clock, with dead beat escapement maintaining power, chimes the quarters, plays sixteen tunes in the twelve hours, or will play at any time required. The hands go round as follows: one, once a minute; one, once an hour; one, once a week; one, once a month; one, once a year. It shows the moon's age, the time of high and low water, half ebb and half flood, and by a beautiful contrivance, there is a part representing the water, which rises and falls, lifting the ship at high tide as if it were in motion, and as it recedes, leaving these automaton ships dry on the sands. It shows the hour of the day, day of the week, month of the year. In the day of the month, there is a provision made for the long and short months. It shows the twelve signs of the zodiac; it strikes or not, chimes or not, as you wish it; it has the equation table, showing the difference of clock and sun in every day in the year. Every portion of the clock is of beautiful workmanship, and performs most accurately.—*Scientific Am.*

Mammoth Pea Stalk.—A gigantic pea stalk of the variety called marrow-fat, grown on the Keystone ranch, has been exhibited to the editor of the Marysville Herald. It measures seven feet two inches in height, and is only a fair sample of other stalks in the garden. The promise of fruit is commensurate with the gigantic stalk.—*State Journal.*

Plant Something—Any flower, a tree, a shrub, even the lowly fern—for ornament or for fruit, for yourself or some one else; somewhere, anywhere—plant something. It shall grow and produce joy or fruit for somebody. It shall not grow in vain.

Dr. John C. Warren's Great Mastodon.

A party of ladies and gentlemen, by invitation visited Dr. Warren's museum building at the foot of Chestnut street, lately, for the purpose of viewing the mammoth skeleton of a Mastodon, there set up, or standing in the natural position of the animal. Several of the party were members of the State Senate, and by request of Hon. S. D. Parker, Dr. Warren favored the company with a very interesting explanation of the subject before them.

He stated that some years since there were five skeletons of the Mastodon known to be in existence, but two had unaccountably disappeared, and all that were now known were the one before them, another at Cambridge, and another in the British Museum. It is remarkable that three of the perfect skeletons were found in the State of New York, though more bones had been found in Ohio than in any other section of the world. Mastodons had also been found in Europe and Asia, but the species were slightly different from the American.

The first skeleton was discovered in this country in 1801, and placed in Peale's Philadelphia Museum. One was subsequently exhibited in Baltimore, but was taken down and disarticulated many years ago, and finally purchased by Dr. Warren. That in the British Museum was discovered by a Prussian, who made several additions of bones not belonging to it, and exhibited it in this country and in Europe. It was finally properly articulated for the Museum for the sum of $5000. The Doctor related several anecdotes of the ingenuity of the Prussian gentleman in getting up skeletons for exhibition, and the manner in which he was from time to time exposed by the investigations made by our native naturalists.

The mastodon clearly belonged to the same family as the elephant; the bones were all similar and of the same number, but larger. The teeth alone were different, those of the elephant being broad, like millstones, while those of the mastodon are pointed, which fact led to the supposition at first that the latter were carnivorous, but further researches proved the contrary. The elephant's teeth are flat, as if for grinding the food, while the mastodon has both sharp and flat, as if nature designed the sharp teeth for cutting off the branches of trees, and the other for masticating them.

To enable the spectator to make a comparison of the two animals, standing by the side of the mastodon there was the skeleton of "Pizarro," the largest elephant ever seen in this country, and which, it will be remembered, was drowned in crossing the Delaware.

The mastodon under notice was found in Newburgh, N. Y., about eight years ago, while some farmers were digging marl from the bottom of a dry pond. It was situated several feet below the surface, and must have lain in the place where it was found for thousands of years, as nothing was known in history of such an animal, and in the scriptures the animals mentioned were the elephant and the rhinoceros. It is a general idea that water hastens decomposition, and it does with the combined action of the air, but if tho air be excluded the reverse is the case, and bones and wood will be preserved by it for a great length of time.

This skeleton stands 12 feet in height, 18 feet in length, breadth across the chest 8 feet, length of tusks 10 1-2 feet, and their diameter 9 inches. When clothed with flesh the animal must have stood nearly 14 feet high, with a girt of some 24 feet. The present weight is about 2200 pounds, and in size appears at least double that of the largest elephant.

Dr. Warren also exhibited to the company a complete skeleton of a right whale; also the backbone of an unknown marine animal, 70 feet long, which is petrified, and was taken out of a solid rock in Alabama. This bears a strong resemblance to the sea serpent, the existence of which is now admitted by naturalists. There is but one other specimen in existence—the famous "Hydrarchos," which was sold by the Prussian speculator in Berlin for $20,000.

The remarks of the venerable and learned Dr. in relation to these and other wonders of the natural world were interesting in the highest degree, and were listened to with profound attention by the party present, who expressed great satisfaction at the intellectual entertainment afforded them.—*Boston Trans.*

Opposition.—"A certain amount of opposition," says John Neal, "is a great help to a man. Kites rise *against* and not *with* the wind. Even a head wind is better than none. No man ever worked his passage anywhere in a dead calm. Let no man wax pale, therefore, because of opposition. Opposition is what he wants, and must have, to be good for anything. Hardship is a native soil of manhood and self-reliance. He that cannot abide the storm without flinching or quailing, strips himself in the sunshine and lies down by the way, to be overlooked and forgotten. He who bent himself to the wind to struggle when the wind blow, give up when they have done, and fall asleep in the stillness that follows."

Sales of Real Estate—Mr. [illegible] from Australia, has purchased of H[illegible] Esq., the fine range of [illegible] three square leagues [illegible] for $[illegible]; also of Mr. [illegible] Farm, [illegible] purchased [illegible] Los Angeles [illegible].

To Agents.

We desire our Agents to report to us on the 1st of every month, the increase of names and the prospects, together with the amount due the office.

☞ We have several valuable routes where a good monthly salary can be made. None need apply that cannot bring satisfactory references.

News Summary.

UNITED STATES.

By the arrival of the magnificent steamers J. L. Stephens and Yankee Blade, we have the mails and papers to the 5th ult..... We annex a summary of news items—our limited space forbidding details.....The Nebraska-Kansas bill passed the House on the 22d May, by a vote of 109 to 100. The Senate, on the 25th May, passed the bill as it came from the House, by a vote of 35 to 13. On the 30th, the President delivered a message to the House, approving and signing the bill....A great riot had occurred in Boston, on account of the arrest of a fugitive slave named Brown. He had been surrendered to his master, and was escorted on board a revenue cutter by one thousand troops and a nine-pounder loaded with grapeshot, amid the groans and hisses of the multitude. The United States Marshal and District Attorney had been hung in effigy....The Ericsson has been removed from the Government Dry Dock at Brooklyn, and now lies at Hogg & Delameter's dock, undergoing repairs. The degree of injury to her machinery cannot as yet be ascertained. It is believed, however, that the expense of repair will be comparatively slight, and that the ship will be ready for her trial trip in a few weeks....It is stated that C. B. Weller, brother to the Senator from California, will be appointed Postmaster of San Francisco, in place of T. J. Henley, who succeeds Lieut. Beale as Superintendent of Indian Affairs....Information has been received at the State Department from the Sandwich Islands that King Kamahameha is impatient to become annexed to the United States, and has again applied to the Consul at Honolulu, urging the speedy adoption of measures to that effect.....Matt. F. Ward returned to Louisville on the 22d, and left again the next day, in consequence of the threatening manner in which his return was noticed by the city papers of that morning....A riot occurred in Brooklyn on the 4th June, in which revolvers were freely used, and from thirty to forty persons severely wounded. Hon. Edward Everett, on account of ill health, has resigned his seat in the United States Senate, to take effect in June.....The Herald says that the Sea Serpent was seen on Friday, near King's Beach, Swampscot, by more than twenty fishermen. It is supposed to be about sixty feet long, and of quite a different appearance from any one ever witnessed in those parts.....Wm. H. Mitchell, of Brooklyn, brother of John, has invented a machine for composing and distributing type. It is said to be an improvement on machines for the same purpose heretofore invented.....Julien gave his last Concert in this country, at Castle Garden, N. Y. After the Concert there was to be a grand dress ball. The great novelty of the evening, however, was to be an imitation of Niagara Falls, done in champagne. A waterfall of real stones was constructed in front of the orchestra, and the contents of three thousand bottles of champagne was to flow into a large basin, from whence it would be served to guests by young ladies dressed in the Swiss costume.....The Providence Tribune says there is no doubt as to the existence of cholera in that city. Seven cases have occurred within a few days, six of which terminated fatally. Three of the sufferers lived less than twelve hours after the first attack.....Over 3,000 head of cattle have been driven from the counties of Crawford, Sebastian and Scott, Arkansas, this season, for California; as also large droves from other frontier counties, and the Cherokee nation.....More than one hundred persons from the age of eighty down to ten years, have been the subjects of a late revival in Castleton, Vermont. The New Orleans Picayune publishes a private letter from Hon. John J. Crittenden, in regard to his connection with the trial of Matt. T. Ward. Mr. Crittenden says he had nothing to do with the case, except professionally as counsel, and that he appeared at the earnest solicitation of the Ward family, with all of whom he was on terms of intimate friendship.

THE WAR.

The latest intelligence from Europe was received at New York on the 6th,—being the Liverpool mail of May 24.....No action of any importance had taken place since our last advices. ....A despatch received at Paris from Vienna on the 15th states that the bombardment of Silistria by the Russians, with eighty pieces had commenced....The evacuation of Lesser Wallachia had been suspended. Why the Russians should allow their troops to remain exposed to the fevers of those terrible swamps, it is impossible to conceive....The allies are in sole possession of Varna, and as the French have already advanced to Adrianople, the relieved Turkish garrison of that city is on its way to Shumla....Sebastopol had been cannonaded by the English and French fleets, with guns of long range, and the Russians were compelled to evacuate the outer ports.... The Duke of Cambridge and Marshal St. Arnaud had arrived at Constantinople previous to the 10th.....A great quantity of French artillery and four squadrons of Spikers, have reached Gallipoli....From Kalafat, it is reported that an engagement between six squadrons of Cossacks and five of Turkish Hussars, had taken place near Badona, on the 4th of May. The Cossacks were defeated and lost 60 horses, 2 guns, and 138 men killed....The troops of Omar Pacha have driven the Russians out of Krajova....A despatch from Omar Pasha, dated from Schumla, May 6, states that Sali Pishn had, on the 28th of April, defeated the Russians at Nicopolis, with a loss to the Russians of 1500 men....On the 2d of May, Suleiman Bey had also defeated the Russians at Padova, not far from Krajova.... Paris papers state that news had been received from Constantinople that the Russians had attempted to cross the Danube at various points, and that they had been repulsed with heavy loss. ....Marsh fever had broken out to a considerable extent among the Russian troops.....Sir Charles Napier's fleet had been reinforced by three line of battle ships. Three French ships had also recently joined the fleet. The fleet sailed on the 5th of May for the Gulf of Finland. On the evening of the 10th, the French portion of the fleet was off the Island of Romsoe, in the Great Belt. The reason assigned for the hasty advance of the English fleet was a (false) report that the Russian fleet had ran out of Helsingfors. St. Petersburg letters state that the fleet had been seen within 25 miles of Croustadt. Our next news, per steamer Sonora, will probably bring accounts either of a tremendous naval action between the rival fleets at Helsingfors, or of the bombardment of Croustadt.

ENGLAND.

Lord John Russell had stated, in reply to a question in Parliament, that the government had taken no official part in the Black Warrior affair. The communications which took place on the subject was merely of the kind which always took place between friendly Governments on matters of interest. He had it in his power to state that the last accounts justified the expectation of an amicable termination of the affair....England has officially denied having tendered either ships or men for the purpose of protecting Cuba from the United States.....In the House of Commons the Chancellor had proposed to continue the double income tax to the end of the war, in order to meet the necessary expenses. This is a good move, as the burden is upon the heavy pensioners and parasites of the Court....The steam line of battle ship Royal Albert, 121 guns, was launched at Woolwich on the 13th May, in presence of 60,000 spectators, Her Majesty performed the christening.....The wife of Mr. Thomas Francis Meagher died at Waterford on the 8th ult.

SPAIN.

It seems from the statements of the Madrid correspondence of the London Times, that the Spanish Government have consented to pay the $6,000 indemnity demanded for the Black Warrior's detention, but rejects peremptorily all the additional demands of the United States Government. The refusal is so peremptory that our Government must either back out or declare war.....Dispatches from Mr. Soule assert that Spain has accorded to the Black Warrior line of steamers all the privileges and exemptions allowed the British steamers entering the port of Havana....The other news from Spain is of an interesting character. Six thousand men are immediately to embark for Porto Rico. This will raise the garrison of Cuba to thirty thousand of the flower of the Spanish army. Paixhan guns and such like hollow-ware are to be sent out in due supply.

AUSTRIA.

In consequence of the great concentration of Russian troops on the north-eastern frontier of Austria, 95,000 additional soldiers will be raised. This measure must be considered an open declaration of the resolution of Austria no longer to be bullied by Russia. An order has been signed for the occupation of the Gallician frontier by two army corps. It is further asserted that Austria has already sent an ultimatum which, as it is very unlikely that Russia will accede to it, will be followed by active hostilities. Similar rumors are current respecting Sweden. A month or six weeks must elapse before Austria is ready to take the field.

PRUSSIA.

Prussia seems to become daily more Russian. The King secretly clings to the Russian policy, though from time to time he seems willing to coöperate with the Western powers. Prussia, accordiog to the hopes entertained by the Russians, will in a very few days declare openly in favor of the Czar, and Austria will go with the western powers.

SALT LAKE.

The Sacramento Union says: Messrs. Kinkhead and Holliday arrived in this city on Saturday afternoon, direct from Great Salt Lake City and Carson Valley, having left the city on the 4th of June. They have kindly placed us in possession of interesting news from Deseret and the Plains, eight days later than that received by the mails. The amount of stock on the way from Salt Lake is very considerable. Mr. Kinkhead's train consisted of 1000 head of cattle, 100 mules, 50 wagons, and upwards of 100 men, women and children. These are now crossing the Sierra Nevada by the Carson route....A party of packers were met at Blue Springs, who gave information that a man some time previously had murdered his companion. He was caught, and hung on the Humboldt, on the 28th of May.....A train of emigrants arrived at Salt Lake on the 2d of June, from Wisconsin.....George Watson was seen on the Humboldt with eight or nine hundred cattle and seven hundred sheep.... Mr. Kinkhead reached Carson Valley on the 27th May. The grass along the Humboldt is fine, but the same disease prevails on the Carson river which was so fatal to the cattle last year..... An outlet from what has heretofore been considered the "Sink of the Humboldt" has cut its way some thirty miles through the desert, and empties itself into the Sink of the Carson..... The Indians are generally quiet, but steal stock whenever an opportunity presents.....On the 30th May, Brigham Young and party arrived from the scene of their successful treaty with the Indians, who have since given no trouble.....On the 29th May snow fell at Salt Lake to the depth of three inches, and on the 8th June our informants encountered a snow storm on the road. The crops, however, are very promising.....The market was bare of everything, but a great influx of goods was shortly expected from the States. Flour was worth ten cents per lb, and other necessaries in proportion....Lieut. Beckwith's exploring party left Salt Lake on the 5th May, for the west.

☞ To Advertisers.—We would call the attention of those who desire to have their advertisements produce quick returns, to the pages of the California Farmer. The Farmer will reach sources of trade entirely new and unattainable by any other means, and thus secure large and immediate profit to those who desire to make known their business. By a glance at our advertising columns, it will be perceived that we present the best known and most extensive houses, and as we have space for but one or two of each branch, these will be the most prominent houses, and thus give more influence to them.

Title Confirmed.—We rejoice to see that our friend Mc. Combe, the able express conductor at Crescent City, has been successful, and his claim to "Virginia Grant" has been fully confirmed; thus giving him a home and making him rich. Well, he deserves it.

Murray's Bookstore.—We are again under obligations to our friend Murray, of Montgomery Block, for a generous supply of new periodicals; and we cannot help calling to mind former days, when Mr. Murray was with us in Sacramento. We remember well the energy and cheerfulness he displayed after the great fire in Sacramento, which swept away a valuable stock, the result of his former labors; but, not disheartened, he rose superior to that false pride which deters most men from industry when a dark day comes, and we soon afterwards saw him with his parcel of newspapers, visiting his patrons; his store all out doors, his stock under his arm—and when sold, soon replenished. From these little beginnings, our friend has arisen, and fortune has dealt kindly with him ever since, while many others have been called to repeated trials. We now find Mr. Murray in his new store in Montgomery Block, ready to receive a call from all his friends, and we can cheerfully say to them that a better stock, a more complete collection of books and stationery cannot be found in the State. We noticed a superb collection of blank books, from a 12 mo. pass book to the full bound Russia 5 vol. superior royal, and comprising the long quarto, cap quarto, octavo, demi quarto, and in fact a style for every taste; splendid writing desks, letter presses, and all the thousand *et caeras* of a complete stationery house. Reader, if you wish books or stationery, call at Murray & Co.'s, and judge if we have not spoken truly. Call, and you will have pleasure and satisfaction also in the patronage you give to this worthy house.

Family Groceries.—San Francisco is getting famous for the style adopted in everything and every department of business. We refer our citizens and families to the cards of Messrs. Bradshaw & Co., the largest grocery warehouse on the Pacific, and also to Messrs. Bessider & Co., one of the neatest and most unique in the city. At either of these every want and taste can be suited.

Shaw's Studio.—We spent a pleasant hour in the rooms of this artist, and were much gratified with the admirable likenesses which Mr. Shaw has painted. One of P. Brinsmade, Esq., a perfect life-like picture. The portrait of Dr. Colo we esteem a most excellent picture, and the painting of Richard Knot, our distinguished Freemason, is a remarkable painting. There is also a gem to be seen in the "child in the carriage." This sweet little child will soon be recognized as that of Capt. Blithin's, and its easy, graceful and natural position in the cradle, almost makes you believe it real. We assure our readers that they will be gratified by a visit to this artists rooms. It is over "Rohb's Saloon," Clay street.

The Prices Current and Shipping List.—This is one of the very best publications of the kind in the United States. It is full, complete, correct. It presents matters of the greatest interest, and furnishes data that can be relied upon. It should be sustained by every merchant in our city, and it is one of the best sheets to mail to the States as it furnishes facts to a greater extent than any other publication.

CHARLES D. CARTER,

REAL ESTATE AGENT, AUCTIONEER AND NOTARY PUBLIC,

105 Montgomary street, near California,

HAVING established himself at the above locality for the purpose of transacting the Real Estate business, in all its branches, will give especial attention to sales of every description of Real Estate, examination of titles, conveyancing, &c.

A Register for property, at either public or private sale, will be kept at the office for the inspection of purchasers, 29

MARRIED.

On the 1st July, in this city, by Rev. C. B. Wyatt, Mr. John B. Meek, of Marysville, and Miss Caroline B. Bull, of St. Johns, Canada East.

On the 2d July, in this city, by Rev. F. Mooshake, Mr. Peter Argens and Miss Secunda Dinkel.

On the 3d July, in this city, by Rev. B. Brierly, Samuel C. Eveleth and Grace Payne.

On the 27th May, in South Bridgeton, Maine, James H. Deering, of Jacksonville, California, and Marianna R. Brackett, of Denmark.

On the 23d June, at Chico, Butte county, Mr. James M. Brown and Miss Luranin S. Abbott.

On the 25th June, in San Jose by Rev. Eli Corwin, Mr. Robert Thompson and Miss Ellen Lucinda Wall, all of Santa Clara.

On the 27th June, in this city, by Rev. A. Williams, David W. McComb, of Wells, Fargo & Co.'s Express, and Virginia Grant, late of New York city.

On the 28th June, in Martinez, Capt. John H. Mallett, of San Francisco, and Miss Tennant, of Martinez.

On the 29th June, in Martinez, by Rev. Mr. Sanford, Mr. Nicholas Hunsicker and Miss Brown.

On the 29th June, in Sacramento, Mr. Wm. W. Featries and Miss Hester Ann Phelps.

On the 22d June, by Rev. Mr. Wellhof, Mr. Joseph Newburn and Miss Rosalia Elsasser, all of this city.

On the 24th June, in Grass Valley, by Justice J. I. Sykes, A. B. Dibble and Miss Emma Allen, all of Grass Valley.

On the 24th June, by Rev. Mr. Tansey, Mr. Wm. Natman, and Miss Statira Tomlinson, all of Nevada.

DIED.

On the 30th June, on board steamship Sierra Nevada, on her last trip from San Juan, of consumption, Susan Adaline Winn, youngest daughter of Tristam and Mary Ann Winn, late of Buffalo, N. Y., aged 16 years and 8 months.

On the 28th June, in Martinez, of consumptioo, Mr. Francis Stafford, aged 18 years.

On the 26th June, in Marysville, Wm. G. Middleton, in the 21st year of his age.

On the 24 June, at his residente on the French Prairie, O. T., Jacques Servant, aged 64 years.

On the 26th June, in Stockton, of congestion of the heart and lungs, Mrs. Louisa Hermon, aged 28 years, wife of Mr. John P. D. Wilkins, proprietor of the Crescent City Hotel.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOMS!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** of Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendnots of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares*, the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. Tue Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our house in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course that has gained us this position will be strictly adhered to, and no dissatisfaction can possibly occur.

CERTIFICATES OF SHARES
ARE NOW READY, AT
ONE DOLLAR EACH!

☞ Several articles of the Superb Collection have been just received and are now under examination.

FOUNDRIES.

DONAHUE'S UNION IRON WORKS,
[THE FIRST ESTABLISHED IN THE STATE.]
Cor. of First and Mission streets, Happy Valley, San Francisco

THE undersigned calls the attention of the citizens of California and Oregon to his unequalled facilities for doing work with rapidity and cheapness. He has made, and will continue to make, such additions to his time and labor-saving machinery, as the increasing wants of the State require, and hence solicits public patronage.

Saw and Grist Mill Irons,
Quartz Crushing and Amalgamating Machinery,

and Castings of either Iron or Brass of every description (having a most extensive assortment of ready made patterns) made promptly to order.

STEAM ENGINES from the manufactories of William Burdon, Brooklyn, New York, and other celebrated makers, constantly on hand and for sale.

BOILERS of every description furnished at lower rates than can be afforded elsewhere, the iron for the same being imported direct, and the machinery for shearing, punching and riveting being driven by steam power. Patent Steam and Water Guages Steam Whistles, Cocks, India Rubber Steam Packing. Ready made Bolts and Nuts, Belting Lace and other Engineer's Findings for sale.
20 3m JAMES DONAHUE.

Pacific Foundry,
On First Street, between Mission and Howard.
GODDARD & CO.,

HAVING enlarged their works, are prepared to furnish every kind of castings and machinery on the shortest notice. Their patterns for mill and other machinery cannot be surpassed in the State. And particular attention will be paid to getting up machinery for Flour Mills, Saw Mills, Quartz Mills, &c.; also, will furnish every description of House fronts, or other castings on as good terms as any other establishment.
San Francisco, June 1, 1854. 22-4t

MISCELLANEOUS.

Cochituate Baths.
No. 57 Sansome street, between California and Pine,
SAN FRANCISCO.

THE proprietors of this well known Establishment, desirous of meeting the wants of a discerning public, have remodeled and thoroughly renovated the entire premises, added several new rooms and new furniture complete.
In making these improvements, we have had particular reference to the accommodation of the LADIES, and have provided a Private Entrance and Ante-Room, with *Extra large Bathing Rooms*, adjoining, expressly for their accommodation.
We have made many important improvements and additions, which cannot be particularized in a short notice, but will be readily appreciated by our friends and patrons. The
Hair Dressing and Shaving Saloon,
has been greatly enlarged, and furnished with a new set of Chairs, Mirrors, &c., imported expressly for this Establishment, and of a style and quality superior to any in the State.
Prices as usual—single baths 75c; ten tickets for $5.
N. B.—A fine assortment of Shirts, Undershirts, Drawers, Collars and Cravats, Scarfs, Socks, Perfumery, Combs, Brushes, &c. &c., constantly on hand, for the accommodation of our customers. (23) San Francisco, 1854.

Branch of Keyes & Co.'s
GOLDEN GATE CLOTHING WAREHOUSE,
CORNER OF J AND SECOND STREETS,.....SACRAMENTO.

LARGE IMPORTATION of Summer Clothing, ex steamers John L. Stephens and Sierra Nevada. We are now receiving a choice assortment of single milled CASSIMERE PANTS, Fancy and White Drilling, do; and SUMMER COATS of every description, which with our already unprecedently large and varied stock, comprises *every article required for a Gentleman's Wardrobe.*
We have just received a small invoice of *CHILDREN'S and YOUTH'S CLOTHING*, and as we design giving particular attention to that branch of our business, we would invite the attention of the Ladies, in making selections of clothing for their children, to an examination of our stock. We shall receive by steamer invoices of the richest and latest styles children's suits, manufactured by our house in New York, and cut in the prevailing styles.
Punctuality observed in filling orders, and no deviation in prices. BRANCH OF KEYES & CO.,

[ORIGINAL.]

TO FLAVIO.

'Tis sweet to have a hope in Heaven,
Aye, sweeter than the joys of earth!
And those to whom such bliss is given,
Should cherish fondly at its birth.
For the heart grows sick when *hope* is gone,
And we've nothing left till it return.

Then let us *hope*, while life will last,
However dark our fate may be,
There's sunshine when the clouds are past,—
A rainbow for security!
And more than this, *our trust above Will*,* "bind the heart to Heaven in Love!"

June, 1854. Miss W.

WRITE SOON.

BY ELIZA COOK.

Long parting from the hearts we love,
Will shadow o'er the brightest face;
And happy they who part and prove
Affection changes not with place.

A sad farewell is warmly dear,
But something dearer may be found
To dwell on lips that are sincere,
And lurk in bosoms closely bound.

The pressing hand, the steadfast sigh,
And both less earnest than the boon,
Which, fervently, the last fond sigh,
Begs in the hopeful words "Write soon!"

"Write soon!" oh, sweet request of truth!
How tenderly its accents come!
We heard it first in early youth,
When mothers watched our leaving home.

And still amid the trumpet joys,
That weary us with pomp and show,
We turn with all the brassy noise
To hear this minor cadence flow.

We part, but carry on our way,
Some loved one's plaintive spirit-tune,
That as we wander seems to say,
"Affection lives on faith; write soon!"

POOR BOB.

BY R. H. TAYLOR.

When I am dead is there a heart
Will feel a bitter, aching smart?
In any eye will tear-drops start,
For Bob?

When my free spirit soars away,
Will friends to my lone earth-bed stray,
And weave a melancholy lay,
For Bob?

Many there are, I know, who could
Bethink them kindly, if they would,
Of pleasure, in some joyous mood,
With Bob.

And in the fount of Friendship placed,
(Were not the memory effaced,)
Something of gold there might be traced,
To Bob.

I know that some who now profess
A world of heartfelt friendliness,
Will say with mocking hollowness,
"Poor Bob!"

The world will be as madly gay,
The storms of life as wildly play,
And all who knew me simply say,
"Poor Bob?"

And death, that darkens all of earth,
That dricth tears and hushes mirth,
Will only prove a second birth
To Bob.

Mrs. Partington Indignant.—"The printing press is a great steam engine," said Mrs. Partington, "but I don't believe Dr. Franklin ever invented it to commit outrages on a poor female womau like me. It makes me say everything Mrs. Sled; and some of the things, I know, must have been said when I was out, for I can't remember 'em," and she dropt three inches in the excitement. "They ought to think," continued she, "that them who make sport of the aged don't never live to grow up!"

Doubtful Compliment.—A compliment is recorded as having been paid by a rustic, who had never before tasted ice-cream, to a lady who at an evening party had helped him to a plate of "unsuccessful frigid milk," under its usual simple designation of "cream."

"Your cream is *very* sweet," said he "but aint it a *leetle tetched* with frost?"

It was a compliment "over the left," but it "made considerable laugh at the time."

Getting into Business.—A man who had set up business with a wheel barrow, was met in the street by one who said—

"Is that you Tom? I thought you were gone out of town."

"That's true," was the answer, "you see that I have gone to *Wheeling*."

Cruel Work.—"Do you do crewel work?" asked a Boston lady of her New Hampshire cousin, while on a visit up country.

"Well, yes, I do sometimes; I kill the turkeys and the chickens, when father goes to market, and its *cruel* work enough I tell you.—*Lynn News*.

A Good Answer.—An over-the-way neighbor fairly posed us the other night, by asking us the simplest question—"When is a fish crazy?"—and assured us it was only when the aforesaid fish was *in-seine*. We left immediately.

It has been aptly said that a false friend is like a shadow on a dial—appearing to the clear weather, and vanishing as soon as it is cloudy,

AGRICULTURAL, &c.

Ketchum'e Patent Mowing Machines.

A LIMITED supply of the above justly celebrated *Mowing Machines*, that will mow from 12 to 15 acres of grass per day as well as can be done with a scythe. For sale by

HOTELS.

St. Charlee Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.
J. HARPER AND J. L. MERRITT.....Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.
Its close proximity to the steamboat landings renders this house very desirable for transient visiters, as also for people arriving in the State and those leaving for the older States.
There will be a Night Watchman, and guests can procure rooms at all hours of the night.
24 HARPER & MERRITT, Proprietors.

American Hotel,

NAPA CITY, ...CALIFORNIA.
L. A. & W. W. CHAPMAN, Proprietors.

GOOD accommodations for families, and on reasonable terms. Saddle and buggy Horses kept for hire. Horses kept on board, by the day or week, and well taken care of. 126

Murray's Fifty-cent Western House.

Corner of Second and D streets,.....MARYSVILLE.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known Union Hotel, situated on the Plaza, in this city.
Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.
The Bar will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.
Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.
The International is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.
E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....Proprietor.

THE proprietor announces to the public that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.
The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the house. There are also Billiard Tables and Ten Pin Alleys connected with it.
For the accommodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake, and to prevent accidents they will be under the especial charge of an "old salt."
An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.
The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:
Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.
Families called for in any part of the city.
25 LINESS AND CLARK.

Rassette House.

SAN FRANCISCO,.....CAL.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.
Gentlemen can be accommodated with single rooms, or families with suites of rooms.
The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

The Gambler's Wife.

A SKETCH OF CALIFORNIA IN 1850.

BY WILLIAM H. THOMES.

——"I have set my life upon a cast,
And I will stand the hazard of the die."
Shakspeare.

In all new countries gambling is not looked upon with the abhorrence in which it is held by the stern Puritanical residents of New England, and California was no exception to this rule in her infancy. Nearly every building fronting on Portsmouth square was devoted to gambling. All day long they remained dormant, but as soon as darkness took the place of daylight, the glittering *salons* would be illuminated by thousands of brilliant jets of flame. Music was the inducement to entrap those adverse to entering such places, and all night long, and often until the sun had rose, would the tooting of the post horn, the twanging of the harp, or the shrill scraping of the violin, be heard, mingled with the monotonous cries of the *croupiers*, who paid out or raked in the gold and silver which were piled high on the tables, with the indifference that habit had taught to assume. It was only where the bets amount to thousands that their eyes would flash with unnatural brightness, and the compressed lips give evidence of the struggle within. The small bets of five or ten dollars were not considered worthy of any particular interest or excitement.

Hugo mirrors, reflecting the rough, unshaven features of the crowd, studded the walls, and where they were not, gaudy pictures of Venuses, water nymphs, or sleeping Dianas, hung in rich frames, exciting the passions of the multitude, who flocked in the saloons to gaze, and then turn with a sigh to the bar or tables, and endeavor to banish their recollections by gambling or drink.

At the farther end of the apartments, a rich bar, with its massive decanters, filled with enticing liquors, glittered through the cut glass like dew drops in a summer's sun. The liquor, music, and pictures helped the poor miner to forget his home and friends, until he awoke the next morning to reality, with aching head and empty pockets.

Without society, and more than half of them with only a rude tent, which they called home, alas, what inducements were not offered to the victims to spend their earnings in one of the glittering hells, where you were sure of seeing an acquaintance, or learning the latest news. At first you only looked on with wonder at the indifference with which men lost; then as the bets grew higher, you felt sympathy for the miner, who was always certain to lose in the end, and boldly staked your money and endeavored to recover some portion of his loss.

Charles Hartwell had not been in San Francisco more than six hours when he was invited by a friend, a merchant in the city, to accompany him to one of the large saloons on the square. He had just returned from the mines, where he kept a store. During the summer months he had done a good business; so well, in fact, that he sent for his wife to join him, and his present business in the city was to meet her, settle some bills that he owed, and purchase sufficient provisions to last him during the wet season, when the transportation of freight would be impossible, owing to the badness of the roads.

It was in vain that Hartwell declared he had no desire to visit such scenes. He was laughed at as a Puritan whose ideas were not in accordance with the freedom of the new country he inhabited, until at last ridicule prevailed, and he committed his first great error—he crossed the threshold of a gambling saloon.

Liquor circulated freely—the music was good; the paintings never looked more voluptuous, and the *croupiers* smiled blandly as they counted out the gold they lost, and again doubled the bets.

"Come, Hartwell, let's put down a few dollars and win enough to pay for a supper," said his friend, a good-looking, careless fellow, named Merry.

"But I never bet a dollar in my life at monte and know nothing about the game."

"No matter, you will stand a better chance to win. I know it thoroughly, and will see that you are not cheated."

"But I do not approve of a game of chance, Merry."

"Neither do I, but how can a man spend his evenings in this city, where not finding a home to rest. Besides every one bets here—it will not do to think we are better than others. There's a venerable judge—see, he has just put down an ounce, and at yonder table is your principal creditor, but he will not think your note for three months is any the worse if he does see you betting on monte or roulette."

"Say no more, Merry. I'll bet a few dollars to let you see that I am not afraid of losing, and then I'll back to our quarters. You look on and see that I am not cheated."

As he spoke, they approached a table, at which but a few votaries were engaged in betting.

"Good evening gents, you're come just at the right time. I've done nothing but lose all the evening. Will you bet on the ace, or the king, or the knave. Now's the time, gents. I've lost more than two thousand dollars this evening, but I'm not discouraged, and if I should lose all that's on the table, I should have enough to commence with to-morrow. Money all down, gents. Time's up," and in this strain did the dealer converse, as Charley laid an ounce of gold on the king.

"You are fortunate, sir," the dealer continued, pushing two doubloons towards Hartwell, after dealing the cards.

"What?" cried Charley, laughing, "have I won so soon. Well, this is an easy way of making money, I must say. Let them both remain on the tray of clubs," and he looked at the gold pieces with more interest than he had hitherto evinced.

"By thunder, Charley," cried Merry, "you've won again. Go in old fellow, and break the bank."

"Let the four ounces remain on the same card, dealer. I see I'm in luck to-night. Shuffle away the cards."

The *croupier* mixed the cards with his face still wreathed in smiles, and then dealt them carefully. His disappointment was evident, as Hartwell again won.

"You are in luck, sir. Will you try again?"

"Try again? of course I shall try again.—Merry, get me a good glass of brandy,—I need something to stimulate me in this game. Now, then, deal away."

A fresh pack of cards was taken and carefully shuffled, and then drew off one by one. The king came up and Hartwell lost.

"Try again, gents. Nothing like perseverance. Money all up. Time," and once more did he throw down the cards to bet on.

"Wait a moment," cried Charles," "I have a few more gold pieces that I can spare," and he dashed down five ounces on the queen of diamonds.

"Deuce of clubs wins—queen of diamonds loses. Bet away, gents. I shan't pay my rent to-night, unless business is better. Now, then, money all up. Time," and in the coolest manner he played with the cards, and again glanced towards Hartwell.

"Wait one moment," cried Charles, hastily, drawing a pocket-book. "Here is a certificate of deposite for ten thousand dollars from Burgoyne & Co. Look and see if it is all right. I stake five hundred dollars of the amount on the queen of diamonds."

"You shall do no such thing," cried Merry, eagerly. "Be content with what you have lost. Come, let us return to our room. Who in the devil's name supposed you would get so excited. Come away, for Heaven's sake. Put up your certificate," and he reached out his hand to take it from the dealer.

"I suppose the gent knows his own business best, and can get along without your advice. I accept the bet," replied the *croupier*.

"No, no," cried Merry, eagerly, "do not bet again, Charles, you will lose, and then I shall forever blame myself. Come away, that's a good fellow. I have something to tell you of interest."

"Don't interfere, Merry. The money is mine, and whether I lose or win will affect you nothing. Put the certificate on the queen. Deal away, sir," and with a stern brow he awaited the result.

A few overhearing the high words between the dealer and Merry, had drawn near the table, and when the *croupier* drew the cards one by one from the pack, a dozen pair of eyes were watching his movements with anxiety, if not distrust. The queen was declared the winner. A few rough hands were thrust forward to congratulate Hartwell.

"Double the bet?" inquired the dealer.

Charles nodded his head and again drained a glass of brandy, which had been procured from the bar for him, by one of his new friends, to drink to his success. Merry once more remonstrated, but his friend was deaf to his entreaties, and with rude words he turned once more to the table. Again and again were the cards dealt. Hartwell's eager eyes were riveted on the game until he seemed to have lost all that was human in his description. His face no longer looked natural, but was flushed and [illegible] brow was contracted by a dark scowl, while the parted lips revealed the clenched teeth, through which his breath came in quick gasps.

"Knave wins, queen loses," drawled out the dealer. Make your game, gents. Time is up."

Charles felt in his pockets and then looked around for sympathy: no one, however, regarded the unfortunate gambler, and in a few minutes he felt himself elbowed from the table by others anxious to increase their wealth by the same exciting and uncertain means. He could scarcely comprehend that when he had entered the room he had possessed over ten thousand dollars, and was now destitute. He put his hand to his forehead as though he would awaken from a frightful dream, and then he was drawn from the room and stood in the open air with Merry by his side.

At the instant the firing of a heavy gun roused him from his stupor. He saw that day had broke; while, as the report vibrated among the hills, men rushed wildly from the crowded rooms and dashed toward the beach.

"What is the meaning of this?" inquired Hartwell in a hoarse voice of his friend.

"It means that a Panama steamer has arrived with the mail and passengers. Hurrah for letters from home."

Charles groaned and leaned heavily against the building for support.

"What is the matter, Hartwell? Do not let the loss of a few thousand affect you thus. A few months will be sufficient to make all right again. Come, let's go and get some coffee."

"It is not the loss, Merry," said Charles, laying his strong hand on his friend's shoulder and pulling his hat over his eyes to hide the weakness that threatened to break out. "I expect my wife in the steamer, and in what a position am I placed to receive her. I promised her not to touch a card when I left home. Oh, curses on the gambling saloon and my own weakness.—Merry, Merry, would that I had not accompanied you."

"Too late do I see my fault; but I'll befriend you now, and thus atone for it. Command me in any way, Charles."

"Merry, if you would do me a service, go on board the steamer and attend my wife ashore. Bring her to your rooms where I'll wait for you. She must be informed of everything. I shall feel like a guilty wretch in her presence until I have told her all. Now go make any excuse you see fit for my not coming off."

"I'll do as you wish, Charles, but my advice would be to conceal all from her until your affairs are retrieved."

"No, no, Merry, you do not know my wife, or you would not give me such counsel. When we were married we vowed to have no secrets from each other. I shall adhere to my word. Now, go."

"Expect me in an hour's time, Charles. Go get some coffee, and bathe your head and eyes before I return. They do not look natural."

Hartwell made no reply, but wrung his friend's hand, and then strode in the direction of his room. He entered, and the atmosphere seemed too confined. He threw up the window and leaned with his bare head against the side. The cool breeze played around his heated temples and revived him. The newly arrived emigrants were already on shore, thronging the streets with wondering eyes at the sight of a city which had sprung up as if by enchantment. Men were hurrying to the post office for letters from dear ones at home, while at the corners of streets groups were collected reading the newspapers from the Atlantic States. All were busy but Hartwell.—With a sigh, he dashed down the window and threw himself on the bed. Light, rapid steps, were heard coming up the stairs. Merry's voice gave some directions. His heart told him who was approaching. How often in happier days had he listened for the same sound. He sprang from the bed, the door opened, and he held his sobbing wife to his heart.

Both were too much agitated to speak for a few minutes, then the wife raised her head from his broad breast and looked anxiously in his face.

"Oh, Charles, how this climate has altered you. You look care-worn and haggard. Your eyes, too, are bloodshot. Are you ill? how fortunate that I arrived, for now I can take care of you," and the pretty little woman rose and brushed the dark locks from his brow.

"No, no, Ellen you are needlessly alarmed. I am not ill, but I am low spirited. Although I am happy to see, yet I am sorry you have arrived."

"Sorry, Charles?" cried the wife tearing herself from his arms with astonishment. "Have I travelled all this weary way to be received as an unwelcome husband?" and she wore the same troubled look.

"God is my judge, [illegible] for you [illegible] not diminished, but rather strengthened by absence. Yesterday I should have hailed your arrival with joy, but to-day—"

"And why not welcome me to-day, Charles? Let me know the secret of this reserve."

"You shall, dear. Do you remember soon after we were united we agreed to withhold no secret from each other. Do not interrupt me," he added, as she was about to speak, "for I have a great one to confide to you. I might have kept it from you and been miserable, but I prefer to impart it and be happy hereafter. Last night—do not look at me in such a strange manner, Ellen. "Here seat yourself, and lay your head on my shoulder. I can never tell my story with those large blue eyes looking in my face so reproachfully. Well, dear, as I said before, last night I was tempted, and like your great ancestor Eve, I yielded."

"Did a woman tempt you, Charles?" and the fair head was raised from the shoulder with a slight frown.

"No, dear. No woman can tempt me but my wife."

A satisfied expression beamed on her face. The head again rested on his shoulder, and she murmured,

"Go on with your story. I am listening."

"Last night I strayed into a gambling saloon with my friend Merry. I made a few bets and lost; carried away by excitement, I staked all the money I had and lost, and this morning a penniless husband was called upon to welcome his wife who had dared the journey of three thousand miles for his sake."

"Is that all, Charles?"

"All, dear? Is it not enough that yesterday I was rich, and to-day poor?"

"There might be worse misfortunes, Charles. For instance, to lose my husband's love, which I feared I had. You have done wrong and broken your word, but it is not for a wife to reproach her husband. From me you will never hear of it again. Let us begin anew. You have *me* now to help you to make a fortune, and while I shall work hard I will not forget your comfort or happiness. Smooth your brow, and let us look to the future."

"Ellen, you are an angel, and if I ever gamble again, may—"

"No oaths or protestations, I do not like them."

"Well, then, in my heart, that only beats for you, do I record my oath."

"That is better. When can we start for the mines?"

Before Hartwell could answer, there was a knock at the door. Charles opened it and gave admission to Merry.

"My friend," the latter said," "it was my fault last night, but I hope Mrs. Hartwell will extend to me her pardon for leading you into temptation. While you have been engaged I have seen your creditors and paid their demands against you. Here are two thousand dollars in *dust* to purchase a fresh lot of goods. If you are fortunate you can repay me, if you are not—but you must be lucky or you could not have such a handsome wife."

"Ah, my friend, you have indeed proved yourself worthy of the name. To-morrow I leave for my store, and when you next see me, I hope to return your money with interest."

"And I," said Ellen, coming forward and frankly extending her hand, "will forgive you, if you will take a lesson from last night's doings. Lead us not into temptation,' should be borne in mind by every one who thinks himself strong enough to resist evil."

The next day they left for the mines, where by industry and economy, Charles was enabled to repay his friend, and return to New England with sufficient to live comfortably, if not in a state of affluence.

An Irish soldier once waited on his commanding officer, with what he termed a very serious complaint:—"Another man," he said, "has applied to him that he was to marry his own wife, whom he accused of being on [illegible] and he had left and married her many [illegible] besides which he should be ashamed [illegible] to his honor."

Colonel.—Well, my good fellow, [illegible] of that you are [illegible]

Soldier.—Faith, your honor, I have [illegible] the world.

He took [illegible] and [illegible] and [illegible] I [illegible] a [illegible]

Agricultural Warehouses.

No greater evidence is needed of the importance of the Agriculture of California and of its influence upon the trade and commerce of the country, than to examine the various warehouses that are established in our cities and devoted particularly to the purposes of Agriculture and for the sale of implements, many of which would never have been brought into existence or notice had it uot been for the discovery of California and its adapation to the purposes of agriculture. Our purpose ever will be to DEVELOPE, to REVEAL, to EXPOSE all and every feature, and hring to view everything that shall advance this all-important hranch of industry. Our present object is to call the attention of those interested to the facilities that are now enjoyed for obtaining all the various implements, seeds and tools that are necessary to carry on the work in the most successful manner. When we call to mind that iu the sbort space of *three years* all the present demand and sale of implements have heen established, we hut testify anew to its importance. Commencing in the great mart of San Francisco, we shall note some of the warehouses and establishments that are now promoting this *right arm* of California industry.

Messrs. Bryant & Co. have a warehouse on Battery street, and to this eminent firm, and to Mr. Bryant, personally, the farmers owe much, for the facilities and advantages they have enjoyed in both the planting and in the harvesting season. Amid all the vicissitudes of trade and all the changes that so suddenly take place in California, overturning the best laid plans and defeating the hrightest hopes, we are confident that this house has done much, and deserves much at the hands of those engaged in Agriculture. Bryant & Co. now offer a well stocked warehouse and their usual prompt and personal attentions to their patrons, and for this should receive a cordial support from them.

Messrs. McNally & Co., on Washington streets, have in several years past occupied a prominent place before the community as the U. S. Agricultural store, on Clay street, where have been exhihited and sold a large amount of the various implements and seeds from the celebrated warehouses of Mayher & Co. and Allen & Co. of New York. Mr. McNally is now on Washington street. and well prepared to answer the call of his friends and patrons in the various branches of the trade, and should receive a goodly portion of the same.

J. S. Paxton, on Front street, has heen considerably engaged in the importation of harvesting implements, and the present year has introduced many large and valuable ones.

Messrs. Southworth & Co., Battery street, have for two years imported largely the famous Peoria and Galena steel plows, fencing wire, and many other valuable acquisitions to our agricultural interests.

Several houses in San Francisco, viz: Messrs. J. M. Brown & Co., Messrs. C. A. McNulty & Co., Messrs. Hawley & Co., and others, have entered more or less largely into the importation of agricultural implements, thus manifesting a confidence in its permaneney.

Warren & Son, of Sacramento and of San Francisco, have imported implements, tools and seeds fresh. Of seeds, trees and plants, they have imported more than any other house, and an amount that would seem astonishing. The agricultural husiness of that house is now concentrated at Sacramento—the enterprising house of Baker & Hamilton are their successors.

The last of which we shall now speak, but far from the least, is the house of the Messrs. Treadwell & Co., of San Francisco and also of Marysville. In calling the attention of the public to this extensive, wealthy, and well estahlished housо, we take pleasure iu giving assurance to agriculturists that Messrs. Treadwell & Co. will present the coming season to the agricultural community, the most extensive stock of new and and improved implements of agriculture, at their large warehouse at San Francisco, at wholesale and retail, that can be found in the country. Their large capital and extended business influence will fully enable them to do this, and their house in Marysville will be complete in all kinds of implements, seeds. tools, &c., thus offering to up river trade every facility needed. With Mr. Treadwell, the senior partner at San Francisco, and Mr. Lord, the partner at Marysville—gentlemen whose business habits are a guaranty of success—we may look for an assurance that the patrons of this house will find their orders promptly answered. We refer to the card of Messrs. Treadwell & Co. in another column.

We would urge particular attention of agriculturists to these several warehouses in their purchases, and constantly urge them to hear in mind that the very hest implements are always the cheapest. The most costly implements are often great labor saving instruments, and this is one of the great features of the present age, and to this point California Agriculture should have especial regard.

Insects.

It is a most singular fact, that in California, with the advance of Agriculture, has been introduced a number of insects, not heforo known or found in the country. Among them first came the Slug, the Gopher, and the Wire Worm; next, the Squash Bug, Cut Worm, Aphis, and other small insects; and the present season that most destructive minute pest, the Red Spider. Wo see also that the locust is announced as paying a visit to us.

The Red Spider we consider as ono of the very worst of all the pernicious and destructive of these trihes. Stealthily and impereeptihly it makes its appearance, and without the utmost care it will gain a possession, and when once upon the ground its desolation is quickly noticed. In the older States it is rarely found except in our greenhouses and conservatories. By reason of constant showers of rain this pest is dislodged from the plants, hut in greenhouses they require to be removed by means of repeated syringing. This pest is most destructive the present season. Melons and vines of all kinds aro soon destroyed, as if by fire. Roses, shruhs and young trees in many places seem hlighted the same way.

To those who are not familiar with this insect, by carefully noticing the change in the foliage of of vines or plants, they will ohserve the leaves turn sear and hrown. A small eye-glass or microscope will show these depredators in thousands upon the underside of the leaf—soon all the foliage changes brown, and the web is seen; then the increase of myriads, and the attack upon the next living and verdant plant or shruh. Where this insect appears in a garden, there is but one remedy—a constant application of cold water at night, after the sun is down, with a good syringe, or from the hose of a powerful pipe. Unless this is done, the entire loss of the vines and plants is certain, for this pernicious insect is the most destructive in dry or hot weather. When the water is applied the ground must be cultivated next day, else the earth will bake.

We are informed that the Grasshopper has made its appearance, and has become very destructive in many places. We should be thankful if those who see and suffer from these old depredators, would promptly communicate with us. This accession to the trials of the tiller of the soil will not discourage him, if he will hut remember that it is his lot to "earn bis daily hread by the sweat of his hrow." The decree went forth that weeds and thorns and briars must spring up, and noxious vermin affect bis labors; but neither should this discourage. The greater tho obstacles, the greater energy should he put forth, for the victory is his alone who shall triumph over them all.

Sabbath School Celebration at Sacramento.

A most glorious sight we witnessed on the evening of the 4th July, at Sacramento. The Sahbath School children, numbering nearly a thousand, gathered upon tbe decks of two steamers for a pic nic, on the morning of tho 4th. We saw them on their return. and wo could hardly realize that so many children could be found in this country. It was most gratifying to see tho happy faces of all. A fine band of music them. and many parents and friends. Music playing, hanners streaming, children singing—surely this is a way to keep alive those priuciples which shall perpetuate our glorious Union, and our libertics, with their blessings.

Great praise is due to the Teachers and Parents for the neatness and order of tho whole affair, and great credit is alike due to the city of Sacramento for sustaining schools and churches that in time build up and sustain others in their turn for future generations.

The Shasta Courier learns that quite a considerable quantity of wheat in that portion of the State is badly injured by smut. The blight has principally fallen upon those fields sown with Australian wheat.

Marysville and Yuba County.—Messrs. Treadwell & Co., will always he supplied with the California Farmer for thoso who desire to suhscribe or ohtain extra numhers for tho steamers.

Wright's Ranch, Butte County, June 30th, 1854.

Messrs. Editors:—When reading your paper I noticed an inquiry made for a cure for the disease of Cattle in California. As I have made cattle raising my business for more than four years in this State. I therefore think I can impart some useful knowledge to stock raisers on that subject. I have had many cattle die in the spring season after the grass was almost full grown. The cause of their death is yet to be conjectured: however, I have settled upon one cause to he the most prominent, which is the eating of some ohnoxious plant.

In the early part of my observations in this disease, I was told it was the eating of clover at a certain time of its blooming; hut this did not satisfy my curiosity. I made further search, and when the animals were ill, to notice in particular their symptoms, which are as follows: The animal, when sick, is somewhat hloated, and when walking, has the appearance of being lame in every leg; eyes somewhat sunken in its head, with unusual green hue; not much inclined to walk, hut when made to do so, it staggers and has the appearance of heing hlind. The disease is speedy and very fatal. I have milked my cows in the morning, turned then out, and before twelve o'clock found two of the same dead. On examining my herd of cattle, I found some six or eight diseased. Some could walk, but others could not, and even when those which could walk did so, they would fall down every few steps.

I commenced pouring whisky down them, until I had poured down each cow about one quart. I soon observed this antidote gave relief, and some of the worst eases wanted about three pints to warrant a cure. The reader will distinctly understand all this was done the same day. Two cows were dead before I discovered the disease; but out of the number above stated, I lost none of the others.

I imparted the information to my neighhors generally, and to my certain knowledge they have had occasion to try the same remedy and have never known it to fail, in any single case, however bad. To prevent any one from losing cattle by this disease, they should corral them during night, or herd them on more thin soil, where the grass and weeds are not so obnoxious. By a herdsman staying with the cattle, it enables him to discover when any of them are first taken sick, so as to administer the antidote in due time and form. It might be proper to say that the season for this disease soon passes over; at furthest not more than a week long, and generally comes in cloudy weather, and does not happen at the same time each year. Thomas S. Wright.

P. S.—I might have added, when animals die with this disease they froth at the mouth and swell soon after death. Their flesh is not poisonous, for the Indians eat all they find to die in this way.

[For the California Farmer.]

Messrs. Editors: As you are travellers on the Sacramento steamers, will you please permit the insertion of the enclosed and oblige a subscriber and many friends.

ARRIVAL OF THE NEW MUSICAL TROUPE—MUSICAL WONDERS AND SERENADERS.

On the downward trip of the steamer last week, we chanced to hear the first "concert or serenade" of this new troupe and to hear the music of some of the new instruments just introduced into notice.

We learn that a "love of music" has inspired several gentlemen of considerable ability belonging to the steamer and they have just imported and had made *at great expense!* a variety of *new and wonderful* instruments, of peculiar *tone* and *power*, consisting of a band of some dozen entirely new kinds, never introduced into tho musical world. We havo time only to describe two of these musical prodigies, leaving others for a series of future letters.

The In-tone-a-ting "Cymbals" are of a peculiar metal, measuring only *four feet in diameter*.

The "Gabriel-le" is a new species of trumpet of a yielding metal of *silvery texture!* of some TWELVE FEET iu length, the *mouth piece* only one foot hroad, and tbe *bowl* of tho trumpet five feet in diameter.

It would be impossible to describe the style and character of tho musical performanee with these and the *other ten* instruments of like character. The first eoncert was announced at 8 P. M. on the deck of the "New World," as a salute to the musical *attaches* of the "Confidence," as these two steamers passed each other just above Benicia.

"The moon was beaming lustrous bright,"
Just as the Confidence hove in sight—

'Twas then the music, loud and full,
Poured like a broadside at her hull.

That powerful music, like a shock,
Made the proud steamers roll and rock.

That "tother Band" are now in great suspense,
And *it is said* thoy've had *no music since.*

We insert the above to please a subscriber, and suppose or hope *we* may hear *more* of this *prodigious* music at some future time, as *we too*, are fond of music of tbe *right kind*. En.

New England Seed Store—Agricultural Warehouse.—This old established house at Sacramento City, commenced in 1850 by Warren & Co., continued by Warren & Son till the May last, is still in full operation and with a complete stock of implements, tools and seeds, hy their successors, Messrs. Baker & Hamilton. We commend most kindly this house to the notice of all the cultivators of the great valley of the Sacramento, and we can speak strongly of Messrs. Baker & Hamilton to our old friends. Mr. Hamilton has heen with us and served his time in our employ, and we know his ahilities and qualifications and we the more cheerfully speak from personal knowledge. Mr. Baker we have known long and well, and we say again to all the patrons of our former business, that they can rely upon having their orders carefully and promptly filled at our old stand, and we ask for this house generous support. With the autumn season Messrs. Baker & Hamilton will receive a large and varied stock for every hranch of trade and such as will be worthy of the especial notice of the farmers of Sacramento valley. We shall feel especial pleasure in knowing our old friends still give their patronage to the *New England Seed Store* of Messrs. Baker & Hamilton, of Sacramento; and we will return our thanks by presenting from time to time, through the California Farmer, all those matters that are esteemed of moment to the great interest of Agriculture—our especial duty now being to act as Seedsmen for the Mind, giving our entire devotion to our journal.

Arrival of the Locusts.—Douglass' Ranch on the Calaveras river, is infested with locusts. The San Joaquin Republican says that so numerous are they, that for a distance of three miles the air is fairly black with them for three hundred feet from the earth. They are moving in a westerly direction, at tho rate of some two or three miles a day, and are destroying vegetation to an alarming extent. It will he remembered we published some weeks since, a prediction by Dr. Smith, of Baltimore, who has for many years made the movements of the locusts his study, that this insect would appear on this coast during the present summer. Dr. Smith has frequently predicted such visitations in various parts of America, and has, we believe, been in every instance correct. He foretells the arrival of the locusts in spots they have not visited for many years, with almost as much certainty as the astronomer does the time of an eclipse.

Preserving Flour, Grain, &c.—Thomas Pearsall, of Smithhoro', Tioga Co., N. Y., has taken measures to secure patents both at home and in Europe, for a very important improvement to prevent Flour and Meal in barrels from heating. The invention is hased upon tho theory that vegetable substances, Flour, Meal, &c., which contain a small quantity of moisture, when packed in harrels or piled in heaps, commence to heat or decompose at the centre, owing to the pressure being greatest there, and also to its being furthest removed from the refrigerating influence of the atmosphere. Mr. Pearsall has been engaged for a quarter of a century in manufacturiug Flour, and is well acquainted with its nature, and the causes of its souring. It is well known to millers that the Flour near the outside barrels will oftentimes he perfectly sweet and unmjured, while that at the centro and around it has been heated and snured. To remedy this evil, he removes, as it were, the centre of the mass in a barrel or pile, by placing therein a tube (for a Flour barrel to eross the Atlantic one of 2 1-2 inches in diameter will be sufficient) for the circulation of air, and hy this means provido a remedy for the evils of Flour, &c., heating. The centre of the barrel, hy this plan, is not the centre of the Flour, as in the common barrel without a tube, hut is hetween the air tube and the outside of the barrel. This improvement is one of vast importauce to our country and other countries. We do not know how many thousands of barrels of Flour become sour from heating every year, but the number must be very large. All these involve a heavy loss to our country, for sour Flour is unfit for making bread. Any discovery or invention to prevent Flour, &c., becoming heated when packed, is of considerable value. This improvement therefore deserves, as it will no doubt receive, the attention of all our millers and Flour merchants, and at the same time, as it eoncerns them as deeply, it should excite the attention of all our people.—*N. Y. Commercial List.*

Congressional Favors.—To our delegation in Congress we are thankful for repeated favors of valuable documents from Washington.

Private letters from Alameda state that it is estimated that one-third of tho wheat in tho valley of the San Jose Mission is full of smut.

Look well to your buildings during this dry weather. Combustible materials and incendiaries are dangerous partners.

HORTICULTURAL.

Alameda County.—Some time since we noticed a call among those that were interested in Agriculture, for a County Convention and organization of a Society. Where are the friends of such an enterprise? Alameda has within the county some of the largest and most influential agriculturists of the State, and had ought to have one of the most efficient organizations. Only about *three months* to the State Fair—will Alameda be behind?

Specimens of Grains, &c.—Those who desire to advance the knowledge and interest of Agriculture are invited to send their specimens of grains and all other kinds of Agriculture, to the rooms of the Californnia Farmer, at Musical Hall building, where they will be exhibited and duly noticed. Farmers and all others who desire to see them, are invited to call at our office, where they can see at all times the evidences of success in the several counties.

Rare Green House Plants.—Among the gardens upon the Sacramento Valley, are those of A. P. Smith, Esq., to which we have alluded in another column. We would make mention here, that one of the finest collections of green house plants that can be found in the country, will be seen at these gardens. That very choice lot of plants imported the past season by Warren & Son, were purchased by Mr. Smith and added to his collection. Among these are very rare Camellia Japonicas, Roses, Daphnes, Lillies, Azaleas, and others of the most beautiful character—many kinds that cannot be found in any other collection in the country. The collection is very large, numbering thousands. Purchasers should by all means visit Smith's Gardens; they will be amply repaid for it.

Meeting of the Napa Agricultural Society.

At a meeting of this Society, held at Napa City, July 3, for the purpose of receiving the report of the Committee on Annual Fairs, a large number of members were present. Mr. Geo. N. Cornwell, from the Committee, made a report in favor of a Fair to be held near this place, upon the grounds of Mr. Nathan Coombs, on the 21st, 22d, and 23d days of September next. Also, presenting estimates of the exponse, and recommending an allowance of $500 from the funds of the Society, to be expended in premiums for the best farming products presented upon that occasion. The Report was unanimously accepted, and a cheering degree of enthusiasm exhibited, which is very gratifying to the friends of the farming interest. Ront. R. Pierpont, Corres. Sec'y.

Premium Farms.

To the Committee on Farms, Gardens, &c:

Gentlemen: As the cultivator and proprietor of fifty acres, devoted to farming and gardening purposes, and having devoted a large amount of time and money to advance the cause of agricultural science, I feel a desire to enter my farm and garden for the premium to be awarded by the State Agricultural Society the present year, and should feel much gratified if the committee would favor we with a visit, at such time as shall best suit their pleasure. A. P. Smith.

Sacramento, American River, July 8, 1854.

San Jose, July 7, 1854.

Dean Sir: The undersigned offers his farm in Santa Clara county, three miles south of San Jose, for the examination of the committee appointed to award premiums for the best farms in the State.

Respectfully, yours, H. C. Melone.

To F. W. Macondray, Pres't C. S. A. S.

Dear Sir: I herewith enter my farm in Santa Clara county, about three miles west of San Jose, for the premiums to be awarded by the State Agricultural Society, and shall be happy to receive the committee at such time as may suit their convenience. Respectfully, yours,

S. H. Bascom.

To F. W. Macondray, Pres't C. S. A. S.

To the Committee on Farms:

Permit me to hand in statement of my homestead, the "Rancho los Passas," in Alameda county, of 1,000 acres, for the premiums of the State Society; and I should be pleased to receive the committee at such time as shall suit their pleasure.

J. M. Horner.

Preserving Fruit.—Take buckwheat chaff and place alternately a layer of wheat and of chaff. The chaff is light. In case you wish to transport your wheat a great distance, it not only preserves it from bruising, but is proof against frost, if used liberally. So says C. Hunt, of Somerset, Mich., in Patent Office report.

We received the list for insertion this week a letter from J. M. Horner, Esq., upon farms and farming, with entry of farm.

Nursery Apprentices.

The propagation and culture of fruit trees in the nursery, and the production of fruits in the garden and orchard, at the present time occupy the attention of a very large number of persons in the United States, and constitute a very important item in the general industry. To the majority of those embarking in it the business is entirely new, and they have everything respecting it to learn. The more experienced, even, have much more to learn than they imagine. It is by no means a simple thing—the work or study of a few weeks or months—that will make nurserymen, or a fruit grower, even. We not unfrequently hear people say they would like to send their sons to a nursery for a few months, to learn the business; and a man embarking largely in fruit culture, will sit down and address a dozen inquiries to a horticultural journal, expecting replies that will at once enable him to prosecute the matter successfully. Now, we wish to draw attention to these errors; the sooner people are undeceived in these matters the better it will be for themselves and the community. We are an apt people, to be sure; still we have to learn our alphabet before we read, and a certain length of time is necessary to learn to simplest mechanical art. Agriculture and Horticulture present a much wider field for study, and a much more embarrassing one, than any mechanic art; and yet, strange enough, few people are willing to believe that they cannot at once leave the workshop or counting room, and become successful farmers gardeners or nursery-men. How many are every year awakened from this delusion, by dear bought experience. A few succeed; they are those who appreciate their want of knowledge, and go to work as zealous and earnest students,—like a man who finds himself in a foreign country, ignorant of the language spoken, and conscious that he cannot prosecute his travels with either pleasure or profit, until he has learned it. Such is exactly the position of the man who becomes a tiller of the soil, a grower of wheat or corn, a breeder of stock, a propagator of trees or plants, without previous study or preparation. Nature speaks to him in an unknown tongue; he is continually mistaking one sound for another; blunder after blunder confuses him; and he soon finds he must either leave her and return home to his old pursuit, or at once bend himself down with dictionary, grammar, and "first lessons," to study her language.

We would have people look less lightly upon these pursuits. Young men especially, who aim at acquiring a respectable position in them, should go to work in earnest—begin at the beginning; and abandon the idea that a few months can be any sort of a preparation to enter upon this practice successfully. Those who aim at being nursery-men, should go and serve as apprentices for at least three or four years in the best establishments, where they may get a thorough training. To be able merely to put a tree into the ground, or set a graft or bud, is but a small part of the trade. The time is fast approaching when such acquirements will not do, they will not be sufficient to contend with greater skill, nor will they inspire the community with that confidence without which success cannot be attained. A sentiment is fast growing up against quacks or half-way workmen in any profession, and all such will find themselves run off the track. Reading, study, and observation, continually, are necessary in conjunction with every-day practice.

The growing season is the time to acquire information; everything is active, and yielding to surrounding influence. The effects of soils and manures, dryness and moisture; the attacks of insects and diseases; the habits, growth and bearing of trees; the ripening of fruits; the advantages of different modes of propagation, pruning and training; and all the various treatments that trees and plants undergo during summer, should be closely watched, and every result be seized upon and turned to account, for the guidance of the future.—*Genesee Farmer.*

The Flora of the Himalayas.—Rhododendrons occupy the most prominent place, clothing the mountain slopes in a deep green mantle, glowing with bells of brilliant colors; of the eight or ten specimens growing here every bush seemed loaded with as great a profusion of blossoms as are their northern congeners in our English gardens. Primroses are next, both in beauty and abundance; and they are accompanied by yellow cowslips, three feet high, purple polyanthus, and pink large-flowered dwarf kinds nestling in the rocks, and an exquisitely beautiful blue miniature species, whose blossoms sparkle like sapphires on the turf. Gentians begin to unfold their deep azure bells, aconites to rear their tall blue spikes, and fritillaries and *meconopsis* burst into flower. On the black rocks the gigantic rhubarb forms pale pyramidal towers a yard high, of inflated reflexed bracts that conceal the flowers, and, overlapping one another like tiles, protect them from the rain; a whorl of broad green leaves, edged with red, spreads on the ground at the base of the plant, contrasting in color with the transparent bracts, which are yellow, margined with pink. This is the handsomest herbaceous plant in Sikkim; it is called Tchuka, and the acid stems are eaten both raw and boiled; they are hollow and full of pure water; the root resembles that of the medicinal rhubarb, but it is spongy and inert; it attains a length of four feet, and is as thick as the arm. The dried leaves afford a substitute for tobacco, although a smaller kind of rhubarb, called Chuka, is more commonly used. The best for this purpose. The elevation being 12,000 feet, I was above the limit of trees, and the ground was covered with many kinds of small-flowered [illegible] berry and white [illegible]

LADIES' DEPARTMENT.

The annexed letter from a lady 70 years of age, to her son, in this city, we find very interesting, and publish, in part:

Boston, June 3, 1854.

Dear Son—I received a letter from you on the 26th May—the day of the solar eclipse. I have forgotten how much the papers said the sun would be eclipsed in your region. We were somewhat disappointed in our view by the clouds, which mostly intercepted our sight, but still it was interesting, though not so much so, as that total eclipse which took place the 16th of June, when I resided at Burlington, Vt., on the day that I was 19 years old. Then, when the sun had been throwing his rays with all the beauty of a summer's day, about noon, if I recollect right, everything began to wear a sombre hue, and as we viewed the advancing progress of the moon over the face of the sun, no clouds intervening, the sight became truly grand; and as the eclipse became total, the grass looked more sombre, the cattle lowed and came home, the fowls went to their accustomed homes for the night, the constellations began to make their appearance in the Heavens, and everything around looked solemn and sublime. In a short time after this darkness, the sun again poured forth his rays with resplendant beauty, and all Nature seemed to spring into life and praise our Heavenly Father's wisdom, beauty and order.

A Good Recipe—Rice Balls.—A few days since we sat at the table of a Connecticut lady, who has fortunately been rightly *educated* to look upon the care of her own household affairs and the proper instruction of her own children, as a higher and nobler occupation than nursing poodles and lap-dogs, or pursuing the gay bauhles of fashionable life. We need not say that her house was in order, and that under her superintendence food was prepared and the table arranged to please both eye and taste. But we did not commence this to write about household arrangements in general—for, although we have an eye upon such matters wherever we go, we leave the subject to our fair correspondents who have promised us aid in this line—we now only wish to give what we call *the* best method of cooking rice to our taste. At our request, the lady above referred to, furnished us the following recipe, which is simple and *good* we know:

Boil rice until it is soft, and while warm make it into cakes or flat balls. Dip these balls into a beaten egg, and then roll them into Indian meal till thoroughly coated. This done, fry them in lard, which is better than butter for this purpose. Serve them with sauce, or with butter or cream and sugar.

Try them ladies, and in return for this recipe, send us one of your best.—*Amer. Agriculturist.*

Apple Dumplings.—Make a good paste; pare some large apples; cut them in quarters, take out the cores, and in place of them put a clove and piece of lemon peel cut very thin; take a piece of crust, enough for one apple, roll it round, put the quarters together, and roll the crust round it with a little flour in your hand; when they are done enough, take them up, lay them on a dish, throw fine sugar over them, and send them to table with fresh melted butter in a boat, and fine beaten sugar in a saucer. Some persons boil apple dumplings without tying them in a cloth, but they are very apt to break and spoil.

Egg Dumplings.—Make a batter of a pint of milk, two well-beaten eggs, a teaspoonful of salt, and flour enough to make a batter as thick as for pound-cake; have a clean sauce-pan of boiling water, let the water boil fast, drop in the batter by the table spoonful; four or five minutes will boil them; take them with a skimmer on to a dish, put a bit of butter and pepper over, serve with meat.

Quite a Darling of a Doctor.—The following curious prescription was presented by a witty physician of Paris to the husband of a lady who was suffering under melancholy and depression, from the want of a fashionable wardrobe. The husband handed it to his wife unread, and requested her to send for the medicine:

Prescription for Madame de S——: A decoration of fifteen yards of velvet! friction of the shoulders with Cashmere shawls; a tissanne of several new bonnets; the whole mixed up with a vigorous stir of visettes, and an infusion of pocket money to suit the taste of the purchaser.

Wheat Burned.—The Sacramento Union of Saturday learns that there had been a terrible destruction of wheat in Suisun and Vacca Valleys by fire. Fourteen hundred acres of wheat land lying contiguous to each other are said to have been burned over and it is also reported that there is little left standing in those valleys. The violent winds of the last few days have beaten down and thrashed out a great deal of the wheat in Sacramento valley.

Express Favors.—We can [illegible] report what we have often said, that we are [illegible] under obligations to the [illegible] of Messrs. Adams & Co., and others, Wells Fargo & Co. for [illegible] river [illegible] documents, papers [illegible] the interest we are [illegible]

The Kern River—Crops in Salinas Valley.—A spirited correspondent of the Mariposa Chronicle, under a late date, writes to that paper as follows:

The country low down on Kern river, at this season, or later, is a veritable desert. We speak from actual knowledge, having seen something of it two years ago. It is a succession of low rolling sand hills, treeless, grassless, and inhabited only by squirrels, lizards and coyotes. We have conversed with several men who have prospected the river in the mountains, and their report is *nary* speck. Though, come to think on't, this testimony may be a little like Patrick's, who, when confronted by two witnesses swearing that they had seen him commit a burglary, immediately produced four others who readily swore they hadn't seen him, and so demanded his acquittal.

Harvesting in this vicinity has barely commenced, being later here than in the inland valleys. On the farm of Mr. Hill, in the Salinas Valley, a fine crop of barley is now being cut, threshed and winnowed by machinery—the world renowned reapers of Ketchum, and a powerful thresher and separator attached. The crop is volunteer—that is, seeded from that of last year, which was probably the greatest yield that has been produced even in California, having averaged 149 bushels to the acre.

The great Salinas plain, running back more than a hundred miles from the sea—walled in by high and precipitous mountains on either side—level as the ocean, fragrant with flowers, fanned constantly by the grateful sea breeze, reminds one of the Happy Valley, or the abodes of the blessed, sung by Homer, where was

> "Nor snow, nor frost, nor wintry shower,
> But ocean ever to refresh mankind,
> Breathed the shrill spirit of the western wind."

Little thought the blind old poet of the "bright Chian isle," that his inspiration was that of a prophet, and that even then the sun shone upon the land of which he sung, peopled, it may have been, with warriors as impetuous and as brave as those who fought around Ilium.

Time will develope the resources of this favored place, and make it one vast, fruitful garden, with a teeming, happy population. We often wished we might see some of the valleys of California in the middle of the next century; places now solitary and choked with luxuriant vegetation, then to become the seats of a higher civilization than the world has yet seen,

What the Farmer most Needs.—It is not a college endowed by the State, says a contemporary; it is a primary school, to prepare farmer's sons and daughters for the higher walks in science as applied to agriculture. They need organization. They want farmers' clubs and neighborhood organizations. They need discussion—they need more intercourse, not only in their own town and county, but throughout the State and country, to see and learn what other farmers are doing. This is the greatest need of farmers. They need to become satisfied with their avocation; to get rid of the prevailing notion that farming is, necessarily, an unmental employment. The farmer is accustomed to think that he has no occasion for education, and never can become a wealthy man, or what the world calls respectable, while engaged in the culture of the earth, and he therefore seeks the first opportunity to escape from an avocation, placed under ban, not only by all others, but by his own class also. The great need of the farmer is that he shall declare himself independent of all classes; at least more so than they are of him, and is entitled to engage in any other calling whatever, and if he is a man of toil that is no reason why he should not be a man of intellect. The great need of the farmer is organization, and this must be accomplished by a few self-sacrificing men, who will undertake the labor of establishing and maintaining farmers' clubs in every neighborhood. Farmers need not drop politics to take up agriculture. They must talk, read, and think.—*Vermont Statesman.*

Age of the World.—In a recent work of Hugh Miller, the geologist, we find the following view of the antiquity of the world. Along the cliffy shore near his native town, as in other parts of the coast of Scotland, there is a line of dry caves in the face of the rock, about twenty feet above the line of similar objects which the sea is at present engaged in hollowing out. Surveying this set of objects impressed on Mr. Miller "the fact of the amazing antiquity of the globe. I found," he says, "that the caves hollowed by the surf, when the sea had stood from fifteen to five-and-twenty feet above its present level or, as I should perhaps rather say, when the land had stood that much lower, were deeper, on the average, by about one-third than those caves of the present coast-line that are still in the course of being hollowed by the waves. And yet the waves have been breaking against the present coast-line during the whole of the historic period. The ancient wall of Antonine, which stretched between the Friths of Forth and Clyde, was built at its termination with reference to the existing [illegible] and ere Caesar landed on Britain, St. Michael's Mount was connected with the mainland by a narrow neck of [illegible] which [illegible] Cornish miners used to drive a [illegible] carry [illegible] tin. If [illegible] six hundred years [illegible] line—and [illegible] state of the same [illegible] [illegible] the [illegible] [illegible] [illegible]

AGENTS FOR CALIFORNIA FARMER.

Messrs Adams & Co. at a.. their offices throughout the United States or Europe.
Messrs. Wells, Fargo & Co., at their offices throughout the Country.
Mr. Chauncey Langdon, Travelling Agent for the northern section of the State.
Mr. E. R. Highton, general and travelling Agent for North-eastern section of the state, to whom we commend our Agents for all information needed.
Mr. Wm. M Lester, Travelling Agent for Sacramento City and County
Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*
Messrs. Adams & Co.—*Humboldt Bay, Trinidad, Crescent City, Port Orford, Umpqua City, Scottsburg, and the entire northern coast.*
Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniontown, Eureka, and Buckport.*
San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.
Benicia, Martinez, &c.—Messrs. Stiles & Dodds.
Union City and Mission San Jose—Messrs. Howard & Chamberlain.
Bidwell's, Butte Co—P. Frecr.
Columbia—A. Hunnewell, P. M.
Coloma—D. G. Waldron & Co.
Mokelumne Hill—I. Coffin.
Marysville—R. A. Eddy & Co.
Mount Farm, O. T.—Gen. M. M. McCarver.
Napa—James & Co.
Napa City—Dudley & Co.; Hiram Downing.
Nevada—A. W. Potter.
New York City, N. Y.—J. M. Thorburn & Co.
Placerville—Nash & Davis.
Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.
San Luis Obispo—Dr. Thomas T. Harvey, P. M.
San Jose—Dr. Samuel Youcham.
Stockton—C. O. Burton.
Sonora—Young & Roberts.
Sonoma—Senor Pedro Valasquex.
Suisun—B. F. Finchley,
Union, Humboldt Bay—A. H. Murdoch, P. M.
Weaverville, Trinity Co—H B. Davison & Co.
Yreka—Crum, Rogers & Co; Parker & Roman.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JULY 13, 1854.

Approval---The Press.

How like leaven are kiud words, snd how quickly tbey act upon man's better nature. Every heart feels mueh better after a generous approval of what is good and commendable, than in censnring even that whicb may deserve condemnation. "When we cannot speak well of a man, let us be silent," is an old and honorable sentiment. We know it by experience—we love to approve and to praise; our profession teaches us this principle, for everything on the earth, every tree, plant and shrub have forms of beauty tbat call forth sentiments of approval, and the lovely flowers that spring up in our pathway awaken in ns continually the desire to approve. It is tbis constant growing sentiment of esteem that leads us to become an enthusiast, and is it not better to be an enthusiast than a fault-finding and censorious spirit? Approval of bumble efforts often awakens dormant energies, or serves to arouse fainting genius. "Well done!" are words that often open tbe gate of heaven, and call into aetion those resolutions that result in mighty acbievements.

We are led to these remarks by finding tbe annexed paragraph in tbe Chronicle of the Ist:

The California Farmer.—This is the only agricultural journal in this State, and deserves a bandsome support. To obtain this, those who feel any interest in developing our immense agricultural resources should at once subscribe for it and solicit tbeir friends to do so. The steamer edition is an excellent paper to inform tbe people in the Atlantic States how we progress here in farming, &c., one of tbe most interesting facts which tbey sre desirous to learn.

We feel these to be such words as we deserve, and if the recommendations of our generous Chronicle could be carried out—if this community would but read the Farmer, and become interested in all that pertains to agricnlture, a quick and mighty change would be visible in every department of life, for it is and ever must be true tbat our rural interests are what sustain and build up a State; and we repeat what we have often said—let the Press of San Francisco and this State take a deep interest in this, and in the plans we are endeavoring to advanee for the best weal of the State, and each press would have their proportion of the consequent prosperity—aye, they would have three subscribers where tbey now have one. We verily believe this, for the press can now see and feel how deeply they are involved by the embarrassments tbat hang upon every branch of trade.

We appreciate the words of the Chronicle—there is some Suul-e in them. A genial ray comes to us occasionaily from the Sun—how it warms and cheers! We are strengthened and lift our upwards and not quail before it. May its 5,000 patrons be made 10,000 in one year. For every kind word from the press generally we shall return sevenfold, hy laboring to build up that which shall build them up. No personal, political or sectional feeling will ever discolor the ink in our pen. From the *Times* we take a *Transcript* of tbe *News* that is *Heralded* in the *Advertiser*, tbat our *Journal* of *Alta California* may be the *Pioneer* of the *Wide West*, while we *Advocate*, upon the *Pacific*, in this *Golden Era*, the cause of the California Farmer.

Protection to Crops.

California has ever been noted for the great waste of property during tbe stormy season, and any casual ohserver can also see a vast amount of property that is sacrificed by neglect during the burning beat of summer. Neglect is too often stamped upon mucb that is valuable, and a brief period only can elapse in a country like this before ruin is certain to follow. In tbe mercantile, the commercial, the manufacturing and the agricultural interest it is all alike. In the mercantile, merchandise lies exposed to depredation, to the storm—and what with theft, bilging, sbrinkage, leakage—all caused by negleet—bcavy losses are the result. In the commercial, a ship is laid up for a brief time—her boats and tackle exposed day after day—week after week; rains and the sun soon commenec tbe work of decay, and the ruin is soon consummated. The workshop often sbows the same features; half finished implements, broken or injured tools, that quick repair would save, are laid aside and forgotten, until these trifles are increased to a serious amonnt, and the mark of decay tells of the same neglect. In the agricultural department this is more serious. Visit many of our farms and the tools and implements may often be seen lying out exposed to wet and damp, and to tbe burning sun; tbese and various other ways lead on step by step to that final catastropbe that is so aptly described by the old adage—Waste makes want.

We are earnestly desirous to see a better state of things, and we are confident it can be brought about at little expense, if all who have property would but give attention to the subject and erect suitable buildings that can be prepared at very small cost, and use tbe protection now offered by the admirable composition roof offered by Mr. Purkitt, to which we refer in another column. We have received a circular from Mr. Purkitt, touching the valuc and usefulness of this roofing, and we would call the attention of our farmers to this valuable protection. Buildings and sheds can be erected light and cheap for the shelter of the stock in wet weather, and protected by tbis roofing. Other buildings for produce and for farming implements are subjects worthy the attention of farmers.

We make the following extracts from the circular, and leave tbe matter to our readers for consideration:

It combines, in a greater degree than any other fire-proof roof in use, the valuable requisites of *cheapness*, *durability* and *security* against both fire and water.

It is rapidly superseding the use of all other kinds of Roofs, wherever it has been introduced, giving general satisfaction, and is highly recommended by all who bave tested its utility.

These roofs require an inclination of not more than one inch to the foot, which is of *great advantage in cases of fire*, and for drying purposes.

In a word, by virtue of its intrinsic worth and excellence, it bas rapidly won its way to popular favor, and is now generally preferred to every kind of roof by all those who have inquired into, or had experience of, its many and great advantages.

Our farmers and builders will also find them adapted to all manner of buildings, bowever large, as well as those we have named.

The Flora of Sacramento.

A stranger would bardly suppose that the inhabitants of this ill-fated city would find time or money to improve her suburbs or garden grounds; but there are many very fine gardens and cottage residences around this city that would mueb surprise any one not familiar with the country. Among the many improvements now going on, and the beautiful spots that we would note, are those of A. P. Smitb, Esq., late of the firm of Smitb, Barber & Co., near the banks of the American river. Mr. Smith has 50 aeres in orchards and gardens, with everything useful and ornamental. The grounds are well laid out, the soil is a deep alluvial, irrigated by water from the American river, by means of a powerful engine. Upon the grounds is a large green-house, well filled with plants. Mr. Smith deserves great credit for persevering amid the general depression that has fallen upon the whole agriculture of the country, but he has continued his improvements and now presents a most interesting spot for visitors to Sacramento. We have taken full notes and shall speak more in detail.

Curious Corn.—W. Durham, Esq, of the academy, Union street, brought to our office an ear of corn having five smaller ears attached to it, forming a pretty cluster. This, like the many headed barley, is the result of tbe prolific character of the soil. The curious can make interesting experiments by planting, to see if "like produces like."

State Agricultural Society.

It is of the highest moment tbat the farmers and all who are interested in Agriculture should bear in mind that the Great State Fair under the auspices of the *State Society*, will be holden this coming October in San Francisco. The Cattle Show is expected to be one of the largest and finest that can be got up in tbe United States.

The amount of premiums to be awarded by the State is Five Thousand Dollars. *Farmers, Gardeners and Florists* throughout the State should be making preparation for it. Circulars will soon be issued, giving all the particulars of *time*, *place*, and each class of premiums tbat are to be awarded.

Grain growers should save samples of tbeir grain in the sheaf, and wreatbs of corn of the various kinds. Extra or new species of all the varied productions of the earth should be carefully reserved for this coming exhibition.

Dairymen sbould be preparing—and all branches of Domestic Industry shonld have an eye to this enterprise.

Tbe Corresponding Secretary of tbe Society will be glad to render any and all information concerning it. Readers of tbe California Farmer will be immediately apprized of all meetings of the Society and their action, which will now be immediate and efficient.

To Grain Growers.

The Grain growers of this State sbould hold meetings in every county of the State, and organize societies for their own benefit and protection. County warehouses for the storage and deposit of grains, where those most immediately interested could consult, know the markets, and take these steps wbicb would secure to themselves the full amount of their labor, should be built.

We bave been iuformed of several capitalists, who, aside from any speculative movements, are desirous to advance capital upon grain safely deposited, so as to effect this most desirable object.

If County meetings are organized and sustained, great and immediate good will result from them—not only great pecuniary good, but plans will be developed and adopted that will secure for coming years a more permanent prosperity for tbe agricultural interest. We hope this matter will awaken a due attention among those whose interests are so immediately involved.

A Way to Improve Farms.—We would take the liberty to suggest to our wealthy farmers, those who are leasing farms on shares, and those who employ a large number of men in the cultivation of their grounds, that we can point out a way by which they can greatly increase their crops and otherwise improve their farms. Send to us and subscribe and pay for a copy of tbe Farmer for each of their farms and each of tbeir men. This would interest them in their work—it would show your interest in their improvement and the increase would more than repay the cost by several hundred per cent. It would stimulate them to much greater exertions and the result would be a very decided improvement. Who will take the lead?

The Cashmere goat has been successfully introduced and bred in South Carolina. The Charleston papers say that the animal seems perfectly at home in the climate, and is as hardy and easily raised as the common goat. The fleece obtained is in weight about equal to that of the choice varieties of sheep, while its value is ten times more.

Shortening-in Peach Trees.—We, too, have tried the shortening-in system, for several years, upon the peach-tree; and so far from causing the branches to become upright, the head of the tree became rounded like to that of an apple-tree; the limbs radiating from a common centre; and though the shortening-in decreased the number of fruit buds, by just the quantity cut off, yet we are convinced that we have had a greater *weight* of fruit by pursuing this system, than if the entire number of fruit buds had been allowed to remain and be perfected.

On one occasion, we selected a spindling tree, just in bearing; cut it down even with the surface of the earth; and from the young shoots that issued from the root, selected four to form one new tree. By shortening-in, we caused this tree to form almost a perfect semi-circular head, with a diameter of about nine or ten feet; the lower branches starting from the ground, and, at their extremities, not three feet above it. In one season, we thinned out and threw away five hundred immature peaches, and allowed the tree to perfect as large a number—all of which were unusually large and fine. The next year we allowed the tree, which we had determined to remove, to retain all its branches, and all its fruit. Instead of furnishing us with a good supply of peaches, the branches were borne *flat to the earth* by the amount of fruit upon it, and not one single specimen ripened.—*Rural New Yorker.*

Grubs in Peach Trees.---Shortening in.

It has become a fact pretty well established, tbat soil and climate adapted to the growth of tbe peacb tree are to be found, in greater or less extent, in nearly every portion of tbe country. This is seen in the exhibitions of beautiful peaches so often witnessed in our cold New England, hitherto celebrated mostly for its productions of ice, rocks and men. Scarecly an agricultural or horticultural fair was held last autumn, in which this fruit did not claim a conspicuous position, and attract the admiration and wonder of the spectators. Many, from what they saw at these convocations, will undoubtedly be induced to try tbeir fortunes in the business, and we sincerely hope it will be with satisfactory results, for we would gladly see so delicious and healthful a fruit placed abundantly within the reach of every body.

We have alluded to tbe success attending the peach culture, (which, we admit, is now carried on in a very small, yet promising way,) in New England, suppusing that if it succeeded in these States, its success must be nearly certain in every State in the Union.

Yet, as sure indications as the peach may have given of its adaptedness to a wide range of territory, there are obstacles to be contended with in order to insure for it satisfactory results. Among these, the grub, so perpetual in annoyance, and so fatal in its operations, furnishes one of the least formidable. So far as our observation has extended, it slyly secretes itself in the earth until age and strength have armed it to the teeth for mischief, when it insinuates its way into the tree, under the darkness and cover of earth, where it noiselessly works on in its mission of destruction, until its errand is complete.

Different methods have been pursued to cut off the march of this desolator of beautiful verdure and heart-gladdening fruits, each productive of different results. Among the many that bave been brought to our notice, none has higher claims for simplicity and facility of application than one casually mentioned a day or two since. It was, simply to take a woollen rag, of sufficient size, and wind it around the collar of the tree, not too tight, of course, when setting out. Tbe rag should be of sufficient size to extend quite up to tbe surface, and the lower it extends over the roots the better. If, in a course of years, it wastes away, as it naturally must, a new one is easily replaced by removing the earth. We have been credibly informed that, when at any time the earth is displaced and the rag removed, the bark exhibits a soundness and freshness nowhere to be found but in vigorous and healthful trees.

Since we are upon the subject of peach trees, we may as well suggest a hint upon our favorite and successful process of shortening in. It is well known that the tree is a native of warm climates. Consequently, it pushes its growth to the full extent of our short seasons, leaving the later growth wholly immature and unable to withstand the mildest severity of winter. Of course, the extremity of the branches is almost uniformly winter-killed. We only attest to the experience of others, when we say that we havo found a fully remunerating benefit in shortening in the branches, a process that may be safely performed at any time previous to the commencement of the flow of sap in spring. We thin and shorten in every twig, until we are sure it is reduced so much tbat none but healthy wood remains. In this way the sap goes to work in healthy and vigorous vessels, and no impediment remains to its free circulation and rapid appropriation to the nourishment of new branches and the fruit.—*Cor. Plough, Loom, and Anvil.*

Farming.

Among the most vigorous class of people the farmer may be found. There are many ways by which men of this present age procure the necessaries of life: but no occupation is more conducive to health and happiness than farming. There are several ways by which this may be exemplified.

First—In order to make the muscles of the human body rigid and strong, they should all receive tbeir due proportion of exercise. Those trades and kinds of exercise that tend to give every muscle its proper share of action, both of the upper and lower extremities, are most salutary, as it tends to develope and strengthen them equally.

Second—The purer the air we breathe, the longer can the muscles be employed in labor. What apartment can be more thoroughly ventilated than the open fields?

Third—Light has as great an influence upon man as it has upon the plant, particularly that of the sun. You have doubtless noticed a plant that grows in the shade is weak and pale. The same is true of man; both, in order to make them strong, require the stimulus of this great agent.

There might be numerous other reasons brought forward to show that farming is most conducive to health; but it is useless to multiply them. In regard to happiness, I would ask but one question to be resolved in your minds. What is health but happiness? Knowing that farming promotes the greatest blessing, let each and every one of us be engaged in this business, for shop work, (particularly shoe making,) does not bring the lower limbs into any action while the upper limbs are constantly employed. The air in doors, where laborers are employed, is not so healthy as it is in the great department or shop, owned by Uncle Sam, which was not planned by man, and needs no ventilation. In-door work is not exposed to solar light; hence let us devote ourselves to that which affords us the purest air, and which exercises the muscles in the right mode: and that, as we have already proved, is Farming.—*Farmer and Mechanic.*

Arboriculture---Treatment of the Soil.

John J. Thomas, who is a close and accurate observer, and by no means to make exaggerated statements, says in his treatise, *The American Fruit Culturist*, that more trees are lost from negligent and improper treatment after planting, than from all other causes combined. The conductor of one of the most extensive nurseries in this country—a man of great experience and very extensive observation—said to us, a short time ago, "I know of no way in which you can do horticulture a greater service, than to urge upon people who plant trees, the importance—nay, the *downright necessity*—of better cultivation than that which prevails at the present time." "Every day," said he, "they come here and make long and bitter complaints that their trees have died, or have made no growth; and wherever I go, I see trees in orchards, gardens, lawns and pleasure-grounds, in a stunted, sickly, and dying condition, mainly in consequence of careless and unskilful culture of the ground. If the evil cannot be completely reached through the press, the friends of arboriculture should raise a fund, and employ a competent person to go out as a missionary among planters, and preach on this text, '*Good Cultivation.*" If it were possible to compute the loss which this country sustains annually in the mismanagement of trees, the result would be astounding."

We are well persuaded, from our knowledge of the manner in which trees are managed, that there is great room for improvement; and not merely among the agricultural classes, whose attention is chiefly absorbed in their farms, crops and stock, and who consider trees as of comparatively little importance, but among those who give a large share of attention to horticulture, and have learned to appreciate both its pleasures and profits. Some are careless: they get their trees planted, and no doubt intend to give them all necessary attention, but unfortunately they forget; other matters more pressing, and for the time apparently more important, present themselves, and the poor trees are left to fight their own battles as best they can. Others are careful and attentive to their trees, but do not really understand what good cultivation is; while they flatter themselves they have done everything for them that could be done, they have scarcely done anything useful or effective. The misfortune is, a very large portion of those who plant are not half in earnest; they go about it without the slightest experience; and instead of making a deep and thorough search for information in books, and in the example set by experienced and successful cultivators, they are satisfied with the merest inkling of information—a simple say-so of a neighbor, which is as likely to be a false guide as a true one. This will never do—there is no excuse for ignorance now in this country; books and periodicals are numerous and cheap, and examples of actual practice are every where to be found, from which to gather instruction.

We have observed that within the past year or two, new zeal has been awakened among the better class of cultivators, on the subject of *high culture*. Instead of devoting their time and attention to the collection of new, rare and wonderful things, they are endeavoring to bring old, well-known, and well-tried objects, to a higher and more perfect standard of perfection. And this is a hopeful sign. We have no admiration to bestow on a set of ill-grown, half-starved trees and plants pining under neglect and bad treatment. As well might we take pleasure in gazing at an unfortunate prisoner through the iron grating of his dismal cell, Give us half a dozen trees well cultivated, with health, vigor, luxuriant beauty, and productiveness, expressed in every leaf and limb, rather than a hundred lean and hungry. Give us one dish of well-grown, beautiful fruits, rather than bushels of "windfalls"; or one pot-plant showing in its well-proportioned form and luxuriant growth skilful and careful training, rather than a houseful of lanky friends that speak to us only of pot-bound roots, careless watering, and bad ventilation. "Whatever you do, do it well," should be the motto of every cultivator.

It is unnecessary to say that the health and vigor of trees depend almost entirely upon the condition in which the roots are placed, because the roots perform the important office of feeders. The spongy points, or extremities of the roots, are like so many mouths, through which the supply of food must pass; and if these are bound up in a compact mass of earth, impenetrable in a great degree to air and moisture, it is impossible for them to find the necessary supply of food. No matter how rich the soil may be, if not in the proper mechanical condition, its fertility will be of no avail; because the chemical combinations which prepare the food of trees and plants cannot go on in the absence of air and moisture. Here lies the prime defect of cultivation generally; it is not deep and thorough enough to reach the roots. We see people who call themselves very careful cultivators scratching the surface of a narrow circle around their trees with a common hand-hoe, and flatter themselves this is good culture; but if they reflect a moment, they will see their error. What they have done is a mere mockery—no better than the scratching of a sprightly bantam. The points of the roots extend further from the tree than most people suppose; and the earth should be kept completely pulverized around them, and *beyond* them some distance. Anything short of this is labor lost.

Nurserymen have good opportunity of ascertaining the influence of deep and frequent loosening of the soil. The usual practice in this country is to plow between the rows of trees, as deeply as a one-horse plow can go with safety to the roots, and then to finish with a cultivator or hoe. The plow is used two, three, or four times a year, according to the stiffness or looseness of the soil, and the cultivator as often as once a fortnight, say from May to October. This is not only an economical mode of culture, but, in this country, the very best that could be followed. It protects the trees against the effects of our long and severe drouths. It is very common to see nursery trees, thus treated, in a fine growing condition; while others, that have been merely surfaced with a hand hoe, are completely at a stand still. If we turn over ground that has been kept finely and deeply pulverized by frequent stirring, we find moisture even in the dryest times; while ground that has been left unstirred until it has become hard on the surface, will turn up as dry and as warm as though it had been baked in an oven. In our own grounds a plot of Norway spruce is planted in beds of six rows each, with a distance of about eighteen inches between the rows; the plow and cultivator cannot pass between them, and they have to be hand-hoed. Between the beds, however, there is a space of three or three and a half feet, which is regularly dressed with the plow and horse-hoe; and the rows on either side of this space have in three years grown nearly twice as large as those dressed with the hand-hoe only. One year we took it into our head to grow a crop of carrots among some rows of young apple trees. The rows were three and a half feet apart, and we sowed one row of carrots in the centre. This prevented the use of the plow and cultivator, and we could use only the hand-hoe. In the fall we observed that a portion of the plot of apple trees not cropped with carrots, but worked in the usual way with plow and cultivator, were about twice as large as the others, and they were really marketable two years sooner.

Singular Case of Instinct in a Horse.

We do not remember ever to have heard of a more remarkable exhibition of equine intelligence than was communicated to us a few days since by Mr. Allen, of this place. The circumstances as they were narrated to us, are as follows:—

Mr. A. had for a considerable time a span of sprightly little horses, that he had never separated. In the stable, in the field, and the harness, they have always been together. This has caused a strong attachment to grow up between them. A few days ago he went with them out to Lake Minnetooka, on a fishing excursion. Taking them out of the carriage, he led them to the lake and tied them several rods apart on a strip of grass that grew upon the shore, and left them to feed. Returning to the shantee, he threw himself upon the floor, to await the return of the party who had repaired to the lake to fish.

Not much time had elapsed before the sound of approaching horse's feet attracted his attention, and a moment after, one of his horses appeared at the door. The animal put his head in, and giving one neigh, returned at a slow gallop, yet under evident excitement, to the spot where, but a few moments before, he and his companion had been seemingly safely fastened. Surprised to find his horse loose, and struck with his singular conduct, Mr. A. immediately followed, and found the other lying in the water, entangled in the rope, and struggling to keep his head from being submerged. While Mr. A. proceeded to disengage the unfortunate horse, his noble benefactor stood by, manifesting the utmost solicitude and sympathy, and when his mate was extricated from his situation, and again upon his feet upon terra firma, the generous creature exhibited the most unquestionable signs of satisfaction and joy. That this intelligent animal should have noticed the unfortunate situation of his mate—that he should know where to apply for rescue, and in his efforts should sunder a three-fourths of an inch rope, and finally that he should exhibit so high an appreciation of the event, are curious circumstances to us, and commend themselves to the thoughtful consideration of those who would limit the power of reasoning to the "genus homo."—*St. Anthony's Ex.*

State Agricultural Rooms.—The Journal of the N. Y. State Agricultural Society says: We are much gratified in being enabled to announce, that an appropriation of $25,000 was made, by the legislature, to enlarge the Old State Hall, so as to afford ample accommodations for the State Agricultural Society, and for the Agricultural and Geological Museums. These improvements, we presume, will be completed the present season, and the farmers of New York will be provided with an establishment, of which they may well be proud, every way adapted to the display of instruments, seeds, &c.; and where they can resort at all times and examine the progress which is making in the Agricultural Department of our country. The Museum, heretofore, has been of great interest; but the collection has, for a long time, been stationary, from the want of accommodation for additional articles.

To the Hon. T. C. Peters, of Genesee, great credit is due for this improvement. He introduced the bill in 1853, but though favorably reported on, it failed; and early in the present session, he again presented it to the Assembly, and was most cordially sustained by the Hon. Mathias Hutchinson, chairman of the agricultural committee, and his associates, as well as the Hon. R. H. Pruyn, Speaker; and in the Senate, Hon. A. B. Dickinson, of Steuben, and Hon. M. Butts, M. H. Clark and E. Sherrill, of the agricultural committee; Hon. Messrs. Crosby and Pratt, and others, gave the bill their hearty support, and it passed both branches of the Legislature without serious objection.

At the recent cattle show in Dayton, Ohio, Governor Wright, of Indiana, made some very excellent remarks, from the report of which we select the following:

He began by saying he had just returned from Yankee land, which he had visited for the first time in his life. He had attended several New England cattle shows and fairs, especially in Vermont. He was struck everywhere, with the appearance of comfort and independence, that on all sides met his eye. The hum of business was heard in all directions. He never saw so industrious a people. Everybody seemed to have something to do, and to be at work. This would make a poor land rich. The farms were not so good, but the farmers were better than in the west.—Owing to their economy and industrious habits, he verily believed the farmers of New England lived better, enjoyed more of the comforts and luxuries of life, than the same class of people in any other part of the Union. He had searched for the secret of this prosperity, and found it, as he believed, in the order and system of the people. There is more of this in the east than in the west. The hap-hazard, helter-skelter policy is not prevalent. The labors of individuals and of bodies of workmen and of whole communities are systematized and divided off, and this system as carefully carried out. This insures success.—In the west every man fights on his own hook, and he lives more by fighting and by brandishing his arms, than by steady working. Idleness and want of system, on the richest soils, are sure to breed poverty and vice; whereas industrious and frugal habits are the sure road to competency and wealth.

There was, too, a pride of "home" in the north—a desire to make that beautiful and happy—which lay at the foundation of all social excellence and all public good. From a love of home all true patriotism proceeds until it reaches the State and National governments. It was not so in the west. Governor Wright declared that one of the greatest evils in the west, one which he would labor to correct above most others, was to first think of the national capital, at Washington, and then the patriotism of the politician descended till it reached himself as an aspirant for public office. Every man in the west has the whole national government on his shoulders. He wished they would first take care of their homes, and then the government at Washington would be best taken care of. He mentioned an anecdote that took place in Vermont while he was in that State. The State elections had just come off, and the whigs, though naturally in the majority, had for the first time in many years, been beaten. A good old whig farmer came home with sad heart, and related the dreadful news to his patriotic wife. What! exclaimed she, has our dear old Vermont fallen into the hands of the enemy? It is, alas! even so. Well, then, ejaculated she, with an emphatic siga, if Vermont is gone, the Union is lost. That is the principle, said Governor W. He wanted every man to feel as if everything centered in his own home, his own town, county, and State, and if that suffered, the nation was in danger. He verily believed that the town system of New England was the seed-bed of true democracy. People legislated at home. They met in their school districts to see about educating their children together; they all understood one another and their families; then, if a road between neighbors was to be made or repaired, or a bridge was to be built, the people all got together and legislated on the subject. This was a popular democracy, and it was here our free institutions were born. The school houses of New England were our republican line of fortifications. From these school districts and town meetings, emigrants have gone forth all over the Union, who have spread free principles everywhere. Cold and sterile as New England was, she was rich in good principles, and rich in her enterprising and intelligent men. Said Governor Wright: "If what is now this nation, had been settled two hundred years ago in the valley of the Mississippi, we should have had no New England; and if we had not had a New England, we should never to this day have been a free republic." It was one of the most beneficent ordinations of Providence, that this country should have been originally settled on the rock of Plymouth. The cold climate and the sterility of the soil created that very necessity which is the mother of invention and the stimulus of effort; and these have filled the land with hardy, enterprising and well-educated men.

American Wool.—The British Commissioners of the Great Exhibition of 1851, have determined to form, in London, a grand universal trade museum. Mr. Solby, their agent, has applied to Mr. P. A. Browne, of Philadelphia, to ascertain how they will be able to procure for it all the leading varieties of the best American fleece; and Mr. Browne has recommended this direct appeal in their behalf, to the sheep-breeders and wool-growers of the United States. Any one disposed to countenance this laudable design, will please, with as little delay as possible, to forward specimens to Mr. Browne, post-paid.

Each sample ought to be accompanied with the name and address of the donor, and also of the breeder, where he is not the donor; the name of the species, variety, or breed of both parents or ancestors of the animal from which the specimen is taken; the age, sex, probable weight, and the amount and date of last clip, &c. All specimens, when practicable, should be drawn out, (not cut) and be taken from the back, six inches in the rear of the neck.

Read the correspondence in another column.

Farmers' Gardens.

As a general thing, farmers do not provide themselves with good gardens; at least so far as the writer has travelled, he has seldom see what he would call a good garden on farms. The excuse for this neglect is generally the same with all of them—they "have no time to attend to such small matters." And yet it may safely be asserted that an acre of ground appropriated to a good garden, will be more profitable to the farmer than any other ten acres of the farm. The interests of the farmer, the comforts of his family, the good condition and health of his whole household, require such a garden on every farm in the country. And it should be a garden, not a mere excuse for one, a mere weedy patch. It should be one so managed and arranged, that every vegetable of a wholesome quality for human food should be raised in it, in perfection, and at the earliest season. After a winter's diet on solid and generally salt animal food, the human constitution requires the deterging operations of free vegetable and fruit diet, and as a general rule no one can dispense with it safely. Besides this, the natural appetite calls for it, and there are few pleasures that may be so safely and even beneficially indulged in. In the latter part of the winter and early in spring, measures should be taken to secure *early* vegetables of all kinds capable of very early cultivation. Details will not be expected here; there are other books and papers appropriated to such information; but I cannot help saying that when I am at a farm house, at a season when early peas, beans, cabbages, cucumbers, potatoes, green corn, lettuce, &c., are properly in season, and find none of these luxuries on the table, nothing but the blue beef, salt pork and beans or potatoes of winter, I am free to say I do not envy that farmer's life, nor his family their enjoyments. These very people are fond enough of such things when they go to the city, and it is not, therefore, want of taste. It is simply the fault of negligence. Why may not every farmer in the State have every kind of early vegetables on his table as early as any gardener in the city can raise them? There is not a single reason why he should not, while there are a great many why he should. The gardeners have to incur a very considerable expense in procuring *hot* manure for their hot-beds, while the farmer has it in his barn-yard. The gardener has everything to purchase, and draw a considerable distance, while the farmer has nothing to buy. The small quantity of lumber required is probably rotting on his premises. It would only be a source of amusement during winter, for him to construct the frame of a hot bed and prepare the manure and bed for use. Having done this, and got his plants in a thrifty state, he can in a short time, when the season arrives, get his garden ground in order and make his plantations. And then he will have all these vegetable luxuries as early as any of his town friends can purchase them. It only requires a little industry and attention to accomplish this, and as said before, his enjoyment, his health, and even his interest, as well as the comforts of his family, will be benefitted by it.—*Country Gentleman.*

Instinct of Bees.—"I was visited," says Mr. Stedman, "by a neighboring gentleman, whom I conducted up my ladder; but he had no sooner entered my aerial dwelling than he leaped from the top to the ground, roaring like a madman, after which he instantly plunged his head into the river. But looking up I soon discovered the cause of his distress to be an enormous nest of wild bees, in the thatch directly above my head as I stood in my door; I immediately took to my heels as he had done, and ordered them to be demolished by my slaves. A tar mop was brought, and the devastation just going to commence, when old negro stepped up and offered to receive any punishment I should decree, if ever one of those bees should sting me in person. 'Massa,' said he, 'they would have stung you ere now had you been a stranger to them; but they being your tenants, that is, gradually allowed to build on your premises, they assuredly know both you and yours, and will never hurt either you or them.' I instantly assented to the proposition, and tying the black man to a tree ordered the boy Quako to ascend the ladder quite naked, which he did and was not stung; I then ventured to follow, and I declare upon my honor that even after shaking the nest, which made its inhabitants buz about my ears, not one of them attempted to sting me. I next released the old negro, and rewarded him with a gallon of rum and five shillings for the discovery. This hive of bees I have since kept unhurt as my body guards, and they have made many overseers take a desperate leap for my amusement, as I generally sent them up the ladder upon some frivolous message, when I found it necessary to punish them for some injustice or cruelty.

The same negro assured me that on his master's estate stood an ancient tree, in which had been lodged ever since he could remember a society of birds and another of bees, who lived in the greatest harmony together; but should any strange birds come to disturb or feed upon the bees, they were instantly repulsed by their feathered allies, and if strange bees should settle near the birds' nest, the native swarm would drive the invaders. His master and family had so much respect for the above [illegible] that the tree was considered as sacred and was not to be touched by an axe [illegible] destroying time.

Plum Trees are [illegible] a few years of age [illegible] by [illegible]

Weekly Summary of News.

FROM THE SOUTH.

The steamer Sea Bird, Capt. Haley, arrived on Saturday morning from San Pedro, bringing two weeks later news from the South.....The Fourth of July was celebrated at Los Angeles and Santa Barbara with more than ordinary parade and show. At Los Angeles, a procession of Sunday-school children accompanied by a band of music, marched through the principal streets to the vineyard of Hon. B. D. Wilson, where a collation was served. Addresses were made by several of the scholars, much to the gratification and edification of the children of a larger growth.....The materials for a new paper had arrived at Los Angeles. It is to be called the "Southern Californian," and will be published by Messrs. Botts & Richards on the 15th.....The land mail between Monterey and San Diego has been suspended, and the mails will for the future be carried by coast steamers.....The grape crop promises to be more than usually abundant. Extensive preparations are making for the shipment of this delicious fruit to all parts of the State. Apricots, figs and pears are already in the market....The Kern river Mines are represented as "gin eout."....Four prisoners escaped from the Los Angeles jail on the evening of the 4th of July. Three were confined on charges of larceny, and one for murder—the latter, Smith, charged with killing Dana. On Independence Day they had been allowed the liberty of a hall contiguous to the cells, which they improved by taking up a portion of the flooring and gaining access to a room in the basement, where they possessed themselves of two revolvers and some other arms. In the evening, when the jailor came to lock the prisoners in their cells, they presented their firearms and marched out without resistance. From the circumstance of a number of valuable horses being stolen a night or two previous to the jail delivery, it is supposed the prisoners had confederates outside. Sheriff Burton has offered a reward of $500 for the apprehension of Smith, and $300 for the others.....An inoffensive man named James Kelly was stabbed in the streets of Los Angeles on the 1st. A person named Woods has been arrested on suspicion,....On Sunday, July 2d, a native was tripped by a rianta in the hands of two boys, and in falling, broke his neck. ....Los Angeles is improving more rapidly than almost any other portion of the State. Many fine buildings are going up, and it is intimated that fully one hundred will be erected this season.....Lieut. Beale, late Superintendant of Indian Affairs in this State, had arrived at Los Angeles, and will come up on the Southerner. Affairs at the reservation were in a very prosperous condition. The wheat crop had just been harvested, and will amount to 50,000 bushels. The Indians, having completed the harvest, were enjoying a sort of Jubilee. Under the system adopted by Lieut. Beale, the Indians were happy and contented. The removal of so efficient an officer is regarded by most persons conversant with Indian affairs as a public calamity. *Chronicle.*

THE MINES.

We take the following summary from the Columbia Gazette of the 8th: On the flat, Messrs. Steele & Co., are still taking it out rich. Last week they took out 35 ounces, including 11 on Saturday. This week they have averaged about 6 ounces per day....The claim of Ives, Glass & Co. pays finely. This was formerly known as the Pelmer claim....Nudd & Co., near the above claims, are also doing well. Their claim averages about ten dollars per day to the man....Turner & Co., on the flat, are making from eight to ten dollars per day to the hand. They wash but three or four days in the week, being engaged the balance of the time in hauling out and drying the clay....Hathaway & Co., are taking out the dust in heaps. Their claim is considered one of the best on the flat....Mr. Brown, the man who became insane from a fright received by the caving of a bank on Jackass Gulch, has recovered sufficiently to work his claim, and was the lucky hombre to pick up a 32 oz. piece.... The miners generally, at Jackass Gulch are doing very well. ....Pinkham & Co., on the east side of Wood's Creek, have one of the best claims at that flourishing camp. The lead seems to be an extensive one, and has the appearance of being a slide of a rich decomposed quartz lead, as the gold is coarse and rough, but of very fine quality. The company have been at work on the claim for the last eleven months, and have reaped a rich reward for their labor. Nearly all the miners at this camp are doing well....Every claim at Knickerbocker Flat is paying well....Woodbury & Co., Christian & Co., McLenn & Co., whose claims are within speaking distance of each other, are doing finely. A few days ago Mr. Woodbury picked out of the sluice a beautiful specimen of pure gold weighing something over six ounces....Chaise, Bovaie & Co., have a claim at this camp which beats everything for natural advantages. Their claim is situated at the base of a little bluff, which rises some ten or twelve feet, and which design ties the upper from the lower flat. Upon the brink of this bluff stands a large oak, having long branches, which form a splendid arbor, many yards in circumference. Underneath this natural canopy is the entrance to the drift; here, also, is placed the tom and sluice, and here they dig and wash all day, perfectly secure from the scorching rays of the sun, and almost invisible to the passer-by....New diggings have been struck between the flume and the Hatch Garden, at Gold Springs. Several companies have commenced washing and are doing first rate....Butler & Co., on the north side of Gold Hill are taking out from four to eight ounces per day, with a prospect of its lasting eternally. Other claims in the immediate vicinity are making good wages....Several parties from the south fork of the Stanislaus, about 13 or 15 miles from Columbia, have returned, within a few days, bringing cheering reports of good prospects on the banks and bars of that section. Companies are building cabins and preparing to commence operations as soon as the water shall have fallen sufficiently. Until recently it was supposed this portion of the Stanislaus was of but little consequence for mining purposes.

THE CITY.

In the tax-payers of this city pay $5,400 per annum for ringing the bell on the top of the City Hall, have they not a right to demand that it *shall be* rung? On the occasion of the fire on Sunday night, and again on Tuesday morning, it rang about two minutes. In New York and Boston the alarm ceases only when the fire is extinguished. Perhaps the ringers are afraid of disturbing the slumbers of our good citizens....On Saturday morning last it was discovered that certain parties had fenced in a portion of Merchant street, on the southeast corner of Montgomery. The Mayor ordered a man to take down the fence. The City Marshal immediately ordered the workmen to stop, under penalty of arrest. The Mayor again ordered the removal of the fence, and, upon the workman attempting to execute the order, the Marshal ordered him to be arrested and taken to the Station House, which was done. Subsequently the fence was removed, and in the evening the Common Council directed the City Attorney to prepare articles of impeachment against the Marshal, charging him with disobedience.... Some miserable wretch entered the house of California Engine Co., No. 4, on Sunday night, and battered the hose pipe to such a degree as to render it unserviceable. The Company offer $500 for the detection of the villain. If caught, we would not be in his shoes for ten times that amount....A magnificent brooch, valued at $1500, was presented to Miss Kate Hayes, previous to her departure, by some of her personal friends.... The new society of "Know Nothings" hold daily and nightly meetings in Meigg's Building. They are rapidly organizing and increasing, and it is said their ramifications extend to every hamlet in the State.....A fire broke out on Sunday evening in the El Dorado restaurant, near the corner of Front and Clarke streets. Owing to the high wind, three frame buildings were destroyed before the progress of the flames could be arrested. ....On Tuesday morning, an alarm of fire was raised about 6 o'clock, and flames were discovered issuing from the Golden Gate Hotel, on the corner of Oregon and Davis streets. Fortunately for the slumbers of our citizens, the man on the City Hall gave no alarm until *awakened* by a small boy, and, it is said after one engine was at work. So fiercely and with such appalling rapidity did the flames spread, that many were unable to save a single article. The Editor of the Sun, himself one of the most active and efficient officers in the department, gives the following account: "The engines were on the ground very shortly after the alarm was given, but as the tide was very low, and but three of the Engines, (Volunteer, Howard and California,) were able to reach the water from the wharf, in consequence of the shortness of their suction hose. In this dilemna the firemen at once proceeded to get their engines to work wherever an opportunity offered. The Pennsylvania, No. 12, was lowered into an old hulk that had been sunk to fill in a water lot on Clarke street, which position they maintained during the entire fire, doing good service. The Crescent, No. 10, placed their engine on the old storeship Bethel, on Drum street, and kept up a steady stream on the fire, checking it in its progress toward the steamers. Manhattan, No. 2, got their engine on board the schooner Warsaw, at the foot of Jackson street wharf and supplied Columbian, No. 11, who did effective service in checking the progress of the flames toward the Bay. The Monumental, No. 6, were fortunate enough to obtain an extra section of suction hose, which enabled them to reach the water, and do excellent service in connection with Nos. 10 and 12. The Empire No. 1, was supplied for a short time from the pumps of the Yankee Blade, which however soon gave out, when the engine was placed in line and received water from the Knickerbocker, No. 5, which engine took suction at the cistern corner of Commercial and Battery street, and supplied Vigilant No. 9, on the fire. This line (in which also was Young America No. 13, from the Mission,) succeeded in checking the fire on Front, Oregon and Washington streets. The California, No. 4, a Hunneman, was enabled from the length of their hose to take water from the Bay, at Washington and Davis streets, which position they maintained through the height of the fire, which raged furiously around them, and threatened even to burn their engine—nothing daunted they worked away, and succeeded in checking the flames, preventing its crossing Washington street, and saving the St. Charles Hotel, which was badly scorched. The Volunteer, No. 7, was also enabled to take suction (through 24 feet of hose,) and as usual worked with spirit and effect—keeping a steady and well directed stream on the fire. The Pacific, No. 8, went to work on Oregon street, and did good service, but were compelled to draw out, after their engine had been badly scorched. They afterwards took up a position beside the Volunteers. The Live Oak Volunteers worked No. 8's old Engine, and threw a good stream. The Howard Company was the first in service, and were enabled to reach the water from the wharf. They changed their position but once, and for a time was the only engine in service. They worked like heroes and did some tall playing. The Boston engines were compelled to stand the brunt of the fire until the Monumentals obtained their extra suction, and the other engines had been placed in the vessels. They did credit to their reputation."

The three Hook and Ladder Companies were, as Handy Andy said of bad luck, "everywhere"—putting up ladders, cutting holes for the passage of streams, and making themselves generally useful.

The fire is said to have been occasioned by the cook of the Golden Gate Hotel, who, having overslept himself, threw camphene on the fire to hurry it up, which set the house on fire. The fire swept about two-thirds of the block bounded by Jackson, Davis, Washington and Front streets; about one-half the block between Jackson and Washington, below Davis; and the S. E. corner of the block between Jackson and Pacific streets—about seventy houses. The loss is estimated at $200,000.

The Sun says: "For some unaccountable reason, the bell on the City Hall was not rung until the fire had got fully under way." It would have been "unaccountable" if it *had* rung, except on the theory of somnambulism.

☞ To Subscribers.—In order to make it perfectly convenient to remit to us from the East, the amount of subscription to our paper, we will receive bills on any of the State banks that are usually current in New York—these can be remitted by mail to us at our publishing office, and the receipt will be acknowledged and the paper regularly mailed. We can assure the friends of Agriculture, abroad as well as at home, that every token of their approbation; every evidence of their generous support, shall be met with a corresponding evidence on our part that we will merit their kindness.

MARRIED.

On the 1st July, in Jackson, Mr. Harold Evans and Miss Sophia Page, both of that place.

On the 2d July, at Cold Springs, Mr. Wm. Gregory, of Marysville, and Miss Sarah J. Miller.

On the 4th July, in Marysville, Zachariah Montgomery, of the Marysville Bar, and Miss Helenn Graham, of Marysville.

On the 4th July, at Placerville, by H. Doyle, Esq., Mr. H. Larkin, of Diamond Springs, and Mrs. A. Gray, of Weberville.

On the 4th July, in Sacramento, by Rev. J. A. Benton, Mr. J. L. Atkinson and Miss Isabella E. Clarkson, both of Georgetown, El Dorado County.

On the 6th July, at Alameda, by Rev. Mr. Myers, Mr. Benjamin K. Myers and Miss Harriet Kelloy.

On the 6th July, by Rev. S. H. Willey, Mr. John Shaw and Miss Hester Brangan, all of this city.

On the 7th July, in this city, by Rev. A. Williams, Alexander R. Foote and Jessie Beanson, both of Dundee, Scotland.

On the 7th July, in this city, by Rev. B. Brierly, Capt. John Ingraham and Miss Almira Pittsinger, both of this city.

On the 8th July, in Stockton, by M. L. Ward, Esq., Mr. F. M. Kennedy and Miss Mahala Smith.

DIED.

On the 3d July, at Mokelumne Hill, Haadel Lund, of Nashua, N. H., aged 24 years and 7 months.

On the 4th July, in Novada, at the residence of Mr. Bullington, Mr. Wm. Copeland, aged 36 years, recently from Spurtanburg, S. C.

On the 4th July, in this city, an infant son of Capt. Charles Wallace.

On the 9th July, in this city, Mary Elizabeth, daughter of Sarah and Peter A. Owens, aged 5 months.

On the 9th July, in this city, Cidelia Florence, infant daughter of Mr. Alphonse Dunn, aged 10 months.

☞ To Advertisers.—We would call the attention of those who desire to have their advertisements produce quick returns, to the pages of the California Farmer. The Farmer will reach sources of trade entirely new and unattainable by any other means, and thus secure large and immediate profit to those who desire to make known their business. By a glance at our advertising columns, it will be perceived that we present the best known and most extensive houses, and as we have space for but one or two of each branch, these will be the most prominent houses, and thus give more influence to them.

MARKET REPORTS.

San Francisco, July 13, 1854.

The harvesting season has given life and activity to the Agricultural department for the present. Portions of grain are brought to market, thus giving a little activity to this department of trade. Considerable quantities of grain have been destroyed in Suisun and Vacca Valleys, some in San Jose and other places; the smut has had its run, but the quantity destroyed, although it may be large, is small compared to the immense crop that will be harvested, and, hopefully for the farmer, the price is not even fixed, either for grain or flour. The arrival of three clippers has started some demand, but no permanent trade. Lumber is abundant and heavy. Provisions remain dull. Butter and Cheese—imported—poor and cheap. Flour is a shade less than last week, but will rally again. Many new flouring mills have been erected this season, and new crop California flour will soon be in the market.

With the hope of inducing such of our friends, and those who have a little leisure, to ride among their neighbors and Introduce an Agricultural Paper, we take pleasure in offering the CALIFORNIA FARMER: and, to make it an inducement, we say to such friends—if you will get us five subscribers, and remit the amount, we will send you six papers, or for ten subscribers, twelve papers. We trust there are many friends who will cheerfully take a little pains to aid us, and thus extend the circulation of the Farmer, and make a useful vehicle for the Agriculture of California.

2 HENRY McNALLY.

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof!

MATERIALS FOR SALE!

The subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as

"Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tight*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.

All letters of inquiry, or orders for materials, must be directed to the subscriber. J. H. PURKITT.
2 Office 34 Battery street, near Pine, San Francisco.

ART UNION.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOMS!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** of Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Thereso!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Tenlers, Vaadyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares,* the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our house in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course that has gained us this position will be strictly adhered to, that no dissatisfaction can possibly occur.

CERTIFICATES OF SHARES
ARE NOW READY, AT
ONE DOLLAR EACH!

☞ Several articles of the Superb Collection have been just received, and are under examination.
San Francisco, June 1, 1854. 26

MISCELLANEOUS.

Cochituate Baths.
No. 57 Sansome street, between California and Pine,
SAN FRANCISCO.

THE proprietors of this well known Establishment, desirous of meeting the wants of a discerninng public, have remodeled and thoroughly renovated the entire premises, added several new rooms and new furniture complete.

In making these improvements, we have had particular reference to the accommodation of the LADIES, and have provided a Private Entrance and Ante-Room, with *Extra large Bathing Rooms,* adjoining, expressly for their accommodation.

We have made many important improvements and additions, which cannot be particularized in a short notice, but will be readily appreciated by our friends and patrons. The

Hair Dressing and Shaving Saloon,

has been greatly enlarged, and furnished with a new set of Chairs, Mirrors, &c., imported expressly for this Establishment, and of a style and quality superior to any in the State.

Prices as usual—single baths 75c; ton tickets for $5.

N. B.—A fine assortment of Shirts, Undershirts, Drawers, Collars and Cravats, Scarfs, Socks, Perfumery, Combs, Brushes, &c. &c., constantly on hand, for the accommodation of our customers. (23) San Francisco, 1854.

Branch of Keyes & Co.'s
GOLDEN GATE CLOTHING WAREHOUSE,
CORNER OF J AND SECOND STREETS,.....SACRAMENTO.

LARGE IMPORTATION of Summer Clothing, ex steamers John L. Stephens and Sierra Nevada. We are now receiving a choice assortment of single milled CASSIMERE PANTS, Fancy and White Drilling, do; and SUMMER COATS of every description, which with our already unprecedently large and varied stock, comprises *every article required for a Gentleman's Wardrobe.*

We have just received a small invoice of *CHILDREN'S and YOUTH'S CLOTHING,* and as we design giving particular attention to that branch of our business, we would invite the attention of the Ladies, in making selections of clothing for their children, to an examination of our stock. We shall receive by steamer invoices of the richest and latest styles children's suits, manufactured by our house in New York, and cut in the prevailing styles.

Punctuality observed in filling orders, and no deviation in prices. BRANCH OF KEYES & CO.,
24 Sacramento

☞ **To Purchasers of Groceries:**

THE FAMILIES of the city and the farmers of the country, before purchasing elsewhere, are requested to call at our Store, where everything in the Grocery Line can be had, not only of the finest quality, but at the lowest market prices.

Our Flour is of the best brands, and our Hams are not surpassed in the country. We have always on hand a large collection of Pie Fruits, of natural preserves and Dried Fruits. All kinds of Sugars, Coffee, and Teas can be had at the cheapest rates. We have also the choicest Wines of France and Germany constantly on hand. All the staple articles of domestic consumption are selected with care and offered to the public at the most reasonable rates. Orders from the country will be forwarded with dispatch, as may be directed, and all orders in the city promptly attended to and delivered free of charge. Come and judge for yourselves.

[ORIGINAL.]

TO MRS. R—.

WHILE waiting in the house of prayer,
Music so rapturing floated there,
Surely some Seraph sang the air,
Swelling those strains, to none but Angels given;
They swept each fibre of the heart,
And with its dearest hopes took part;
Oh, may those accents ne'er depart
God's earthly courts, but to be heard in heaven.

Would that a voice that's so divine,
Which Heaven has made so purely thine—
May ever its sweet notes combine
To give its generous benefactor praise:
Would that thy strains and heart may rise
Superior to all earth-bound ties,
Till both unite in Paradise,
To swell redemption's hymn through endless days.

FLAVIO.

From the Pioneer.

DEATH.

BY G.

DEATH is a phantom, dreaded by the weak,
Scorned by the foolish, reverenced by the wise,
Whose kingdom is the world, whose anodates speak
To every living thing beneath the skies.

Death is an heritage and an estate
All men may claim with undisputed right,
Whose mystic title bears the fatal date
When Eden's glories sank in gloomy night.

Death is a terror only unto those
Who fear to look the spectre in the face;
His form, when shunned, more huge with horror grows,
And cowards shrick, and fly from its embrace.

Death is a mockery to the scoffer's mind,
A thing all meaningless—and not until
The monster's icy arms are round him twined,
He feels it has a mission to fulfil.

Death to the wise, O! what is he to such?
No ghastly skeleton with clanking bones—
But a bright spirit, whose electric touch
Thrills the heart's chords with Heaven's angelic tones.

TOO HONEST.—*Scene First*—A boot and shoe store.

Enter a middle-aged gentleman, in pepper and salt pants.

"Mr. Slocum, I believe, sir?"

"Yes, sir, Jahez Slocum."

"Some six months ago, Mr. Slocum, you gave me credit for a pair of boots—price five dollars. I have now called to liquidate the demand."

"Owe me five dollars? Well, really, I have no remembrance of the fact."

"Be that as it may, the debt is honest and must be paid."

Here he took out a well-filled pocket book and handed Slocum a twenty dollar bill. Slocum balanced the account and handed the other fifteen dollars in change.

The middle-aged gent left, and Slocum went off in a revery.

"Well, the world is not so bad after all; here at least is one honest man. I shall never speak ill of one of the human family again."

Scene Second—An exchange office.

Enter Slocum.

"Bullion, my boy, just discount that lot of money and give me current."

"Certainly, sir."

Bullion runs over the pictured blotting paper and throws out a twenty.

"What do you throw that out for?"

"Not worth a cent—one of the new counterfeits."

Slocum goes into revery number two.

"Curse that scoundrel! That's the very bill the honest man paid me yesterday for the boots. What a vile world. I don't believe there's an upright man in it."

A COUPLE of Irishmen who had not been long in this country, met in an inn and called for dinner. As it so happened, there was a dish of horse radish grated for dinner. Pat, thinking it was something to be eaten with a spoon, put a large spoonful into his mouth. Tears immediately filled his eyes, and rolled down his cheeks. The other said:

"Pat, what's the matter?"

"I was thinking of my poor father, that was hanged," said Pat.

But Jemmy soon filled his mouth with the same, and tears gushed from his eyes also, when Pat said:

"What's the matter, Jemmy—what has happened to ye?"

"Ah!" said Jemmy, "I was just thinking what a pity it was you were not hanged with your father."

"WHERE is the fire?" asked Mrs. Partington of a fireman, from an upper window, as the bell were waking the night with their clangor. "In —— was the ungallant response, naming the hottest title of perpetual warmth. "Dear me," said the old lady, not understanding him, "is it so far off? I wish it was nearer for your sake. But he'll get there soon," she muttered to herself, "if he goes on as he does now," and she went to sleep again, invoking blessings on the guardians of public safety.

TWO OF A FAMILY.—"How well he plays for one so young," said Mrs. Partington, as the organ boy and his monkey performed near her door; "and how much his little brother looks like him, to be sure."

THE most difficult ascent—Getting up a subscription.

HOTELS.

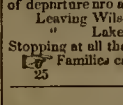
American Hotel,
NAPA CITY.....CALIFORNIA.
L. A. & W. W. CHAPMAN, Proprietors.
GOOD accommodations for families, and on reasonable terms. Saddle and buggy Horses kept for hire. Horses kept on board, by the day or week, and well taken care of. '126

Murray'e Fifty-cent Western House.
Corner of Second and D streets,.....MARYSVILLE.
THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.
THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known UNION HOTEL, situated on the Plaza, in this city.
Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.
The BAR will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.
JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.
THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.
Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.
The INTERNATIONAL is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.
E. S. PECK. (25) HENRY FISHER.

Lake House.
C. L. WHITE,.....Proprietor.
THE proprietor announces to the public that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.
The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the house. There are also Billiard Tables and Ten Pin Alleys connected with it.
For the accommodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake, and to prevent accidents they will be under the especial charge of an "OLD SALT."
An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.
The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.


The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:
Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.
☞ Families called for in any part of the city.
25 LINESS AND CLARK.

Rassette House.
SAN FRANCISCO,.....CAL.
THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.
Gentlemen can be accommodated with single rooms, or families with suites of rooms.
The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3in

St. Charles Hotel,
COONEO OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.
J. HARPER AND J. L. MERRITT.....Proprietors.
THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.
Its close proximity to the steamboat landings renders this house very desirable for transient visitors, as also for people arriving in the State and those leaving for the older States.
☞ There will be a Night Watchman, and guests can procure rooms at all hours of the night.
24 HARPER & MERRITT, Proprietors.

Public Notice.

THE copartnership hitherto existing between the undersigned, transacting business as Bankers and Express Carriers in the State of California, and in the Eastern States of the United States, under the name, firm and style of ADAMS & CO., expires this day by limitation.

D. H. HASKELL,
ALVIN ADAMS,
W. B. DINSMORE,
S. E. SANFORD,
S. M. SHOEMAKER,
* By C. E. BOWERS, their Attorney in fact.

Dated San Francisco, May 12, 1854.

THE UNDERSIGNED have this day formed a Copartnership for the transaction of **Banking and Express business** in the State of California, under the firm, name and style of "ADAMS & CO."—the principal office continuing at the same place, in the city of San Francisco.

Dated San Francisco, May 12, 1854.

PERSEVERE.

BY C. N. PINE.

Young man, toiling on obscurely
Struggling 'gainst an adverse tide,
With a high and honest purpose
Which the mocking world deride;
Faint not, fear not, brave the current—
Face the storm, however rude;
Truth will triumph, thou wilt conquer,
God will ne'er forsake the good.

Do the proud deride thy calling,
Mock thy efforts at the start,
With a scoffing coldness, galling
To thy proud and honest heart?
Persevere! attain a station
With the gifted and the great,
Those who now scorn thy vocation
Then will gladly kiss thy feet.

Has the venomed breath of slander
On thy lonely frame been hurled
From the serpent-soul of envy
That would keep the worthy down?
Persevere, with manly patience,
Time will heal the wound you feel,
From thy name such taint may vanish
As thy breath from burnished steel.

For encouraging example,
Scan the names on history's page,
Those who most their race have honored,
Giving glory to their age;
Names of Newton and of Franklin,
And a thousand more as bright;
Names that gain increasing glory
With the world's increasing light.

Persevere! unceasing effort,
Humble though and weak it be,
May o'ercome whate'er opposes,
And work miracles for thee.
Be assured reward will follow,
Gold will come to him who delves,
Honest industry must proper—
"God helps them who help themselves."

OH, HOW I LONG AGAIN TO VIEW.

Oh, how I long again to view,
My childhood's dwelling-place—
To clasp my mother to my heart—
To see my father's face!
To hear each well-remembered tone—
To gaze on every eye
That met my ear or thrilled my heart
In days long since gone by.

Oh! let me seek my home once more,
For but a little while—
But once above my couch to see
My mother's gentle smile;
It haunts me in my weary hours—
It comes to me in dreams;
With all the pleasant paths of home,
And woods and shaded streams.

There is a spring—I know it well—
Flowing beneath a rock
Oh! how its coolness and its light
My fevered fancies mock;
I long to lay me by its side,
And bathe my lips and brow:
'T would give new fervor to the heart
That beats so languid now.

I may not—I must linger here—
Perchance it is but just;
Yet, well I know this yearning soon
Will scorch my heart to dust.
One breathing of my native air
Had called me back to life;
But I must die—must waste away,
Beneath this inward strife.

"I SAY, Bill, I seed a Know-Nothin'."
"Where?"
"On the Museum steps."
"What did he look like?"
"Why, he looked like a man."
"No, but what had he on?"
"Clothes."
"Don't be a fool—tell me how you found out he was a Know-Nothin'."
"Why, he said so."
"Did you ask him to tell you?"
"No, but I asked him whether he wouldn't give me six cents, and he said, "No, nothin'. — *N. Y. Pick.*

Elise de Vaux.

BY FANNY FERN.

"WELL, Doctor, what do you think of her? She has set her heart upon going to that New Year's Ball, and it will never do to disappoint her—poor thing."

The blunt old doctor bit his lip impatiently, and striking his cane in no very gentle manner on the floor, said—

"Think! I think it would be perfect insanity for her to attempt it. I won't be answerable for the consequences."

"But, my dear sir, she has had a dozen attacks before, quite as bad, and —"

"And that is the very reason why she should be more cautious now, madam. Good morning—good morning! Heaven save me from these fashionable mothers, be muttered, as he banged the door too behind him. "She'll kill the girl, and then her death will be laid to my door—ugh!—it would be a comfort to meet a sensible woman occasionally."

Elise was sitting in bed, propped up by pillows, when her mother entered. If youth, grace and beauty, could bribe the destroyer, or turn aside his unerring aim, then had she been spared. Her cheek was marble pale, and rested wearily on one little hand; the eyes were closed as if sleeping, and from the other hand a few choice flowers had escaped, and lay scattered upon the snowy counterpane.

"Oh! is that you, mamma? I hope you have made that stupid doctor give you something that will set me up. I feel such a deadly sinking—from want of nourishment, I fancy. Do pray see what you can get for me. I hope Dr. Wyman don't presume to interfere about my going to the ball, because I intend to go, dead or alive; and, mamma, while my lunch is getting ready, bring me my dress, and let me see if Jeannet has placed the trimmings where they should be, and have a ruche placed around the wrist of my kid gloves; and mamma, don't forget to send Austen for that pearl spray I selected for my hair. And, by the way, just hand that mirror; I'm afraid I'm looking awfully pale."

"Not now," said the frightened mother, "You are too fatigued. Wait till you have had some refreshment," and the pale beauty sank back on her pillow, crushing a wealth of dark ringlets, and closed her eyes heavily, in spite of her determination to be well.

A ring at the door. A bright flush came to her cheek. "That's Vivian, mamma. Tell him—tell him—(and a sharp pain through her temples forced her to pause) tell him I'm better, and he may call for me at ten to-morrow night; and, mamma, hand him this," and she took a perfumed note from beneath her pillow, with a rose-bud crushed in its folds.

"Draw aside the curtain, Jeannet. Oh! we shall have a nice evening for the dance; now give me the dressing gown. Mamma, that medicine is perfectly miraculous—I never felt better. Heaven knows where I should have been had you not called in a better counsellor than Dr. Wyman. He would like me for a patient a year, I dare say, but I know better than to line his pockets in that way," and she skipped gaily across the floor to a large fateuil, and called Jeannet to arrange her hair.

"Softly—softly, Jeannet; my head isn't quite right yet. There, that will do," said Elise, as the skilful Frenchwoman bound tress after tress in glossy braids around her well-formed head. Now place that pearl spray a little to the left, just over my ear—pretty, is it not?

Here, Jeannet!" and she extended the dainty foot for its silken hose, and satin slipper.

"Rest a little, now, Elise," said her mother, as she looked apprehensively at the bright crimson spot on the cheek, that grew deeper every moment, and contrasted so strikingly with the marble paleness of her brow. "I'm afraid you are going beyond your strength."

"Mamma, what are you thinking about? Look at me, and see how well I look! Besides, I'd go to this ball to-night if it cost me my life. Mabel has triumphed over me once: she shall not do it a second time. Besides, there is really no danger. I feel in good spirits to-night, and anticipate a most brilliant evening," and she clasped the pearl pendants in her small ears, and the light fleecy dress fell in soft folds about her graceful person, and upon her fair arm placed his gift, and taking in her hand the rich bouquet, every flower of which whispered hopes to her young heart, she held up her cheek with a bewitching smile, and said—

"Now kiss me, mamma, and say that you are proud of me."

And now Jeannet, with officious care, draws the rich opera cloak about her shoulders, and with a thousand charges from mamma to beware of the draughts, partake sparingly of ices and not weary herself with dancing, the carriage moves from the door, freighted with its lovely burden.

"Elise de Vaux here!" said a tall, queenly girl attired in black velvet, and she curled her lip in ill-concealed vexation—"I thought her dying, or near it;" and as Elise glided gracefully past in the dance, every eye followed her, and every tongue became eloquent in her praise. Mabel's cheek paled in anger.

"How radiant she is! how dazzling. Sickness has but changed her beauty—and see how proudly Vivian bears her through the waltz! Every step they take is on my heart-strings! This must not—shall not be!" and mastering her feelings by a strong exercise of will, soon brought the rose to her cheek, her eye became brilliant, and, had not Vivian been magnetised past recal his eye must have been engaged by the dazzling vision.

"Heavens! that is not Elise de Vaux!" said a nephew of Dr. Wyman's. "What mad folly! My uncle told me that if she came it would be at the price of her life. How surpassingly beautiful she is."

"What unearthly beauty," said an old man to a youth on whose arm he leaned, as Elise glided past. "Who is she?"

"Elise de Vaux."

"Well, why do you look at her so wildly? Has Cupid aimed a dart at you out of those lovely blue eyes?"

"Good God!" said the young man, leaping forward, as a piercing shriek came upon the ear. "Make room! help! throw up the window!" and Elise was borne past, senseless, to the cool night air.

Aye, Vivian! kneel at her side chafe the little jewelled hands, put back the soft hair from the azure veined temples, press the pulseless wrist listen for the beating heart—in vain—Elise is dead!

And in the arms of him for whom she had thrown away her young life, she was borne to her home. The diamond sparkled mockingly on her clay cold fingers, the pearls still lingered amid her soft ringlets, the round symmetrical limbs still fair in their beautiful proportions. The heart she coveted was gained—the dear bought victory won.

The Old Oaken Bucket.

THIS beautiful and popular song or ballad is said to have had its origin under the following circumstances:—Some years ago, when Woodworth, the printer, and several other old New Yorkers, were brother typos in a printing office situated at the corner of Chesnut street and Chambers, they dropped in at an establishment kept by Mallory, on Franklin street, for the purpose of taking some brandy and water, which Mallory was famous for keeping. The liquor was superexcellent, and Woodworth seemed inspired by it, for after taking a draught he set his glass upon the table, and smacking his lips declared that Mallory's *eau de vie* was superior to any he had ever tasted.

"No," said M., "you are quite mistaken; there was one thing which, in both our estimations, far surpassed this stuff in the way of drinking."

"What was that?" asked Woodworth, dubiously.

"The draught of pure fresh spring water that we used to drink from the old oaken bucket that hung in the well, after our return from the labors of the field on a hot sultry day in summer."

The tear-drop glistened for a moment in Woodworth's eye. "True, true!" he replied, and soon after quitted the place. He returned to the office, seized a pen, and in half an hour "The Old Oaken Bucket," one of the most delightful compositions in our language, was ready in manuscript to be embalmed in the memories of succeeding generations.

I CONFESS that increasing years bring with them an increasing respect for men who do not succeed in life, as those words are commonly used. Heaven is said to be a place for those who have not succeeded upon earth; and it is surely true that celestial graces do not best thrive and bloom in the hot blaze of wordly prosperity. I [illegible] sometimes arises from a [illegible] ties in themselves good—from a [illegible] too sensitive, a taste too fast [illegible] too romantic a modesty too re[illegible]. I would not go so far as to say, with a living poet, that "the world knows nothing of its greatest men," but there are forms of greatness, or at least of excellence, which die and make no sign; there are martyrs that [illegible] there are heroes with[illegible] and conquerors without the triumph. —*G. S. H.*

Anecdote of Washington.

IN the summer of 1776, when the American army was in New York, a young girl of the city went to her lover, one Francis, and communicated to him, as a secret she had overheard, a plan then in operation among the government men to destroy the American commander-in-chief, by poison, which was to be plentifully mingled with the green peas, a favorite dish of his, on the following day at Richmond Hill, head-quarters, where he was to dine. Francis, who was a thorough whig, although supposed to be friendly to the royalists, went immediately to Washington and acquainted him with this diabolical plan for his destruction. Washington having listened with attention, said:

"My friend, I thank you: your fidelity has saved my life, to what reserve the Almighty knows! But now for your safety; I charge you to return to your house, and let not a word of what you have related to me pass your lips; it would involve you in certain ruin; and heaven forbid that your life should be forfeited or endangered by your faith to me. I will take the necessary steps to prevent, and, at the same time, discover the instrument of this wicked device."

The next day, about two hours before dinner, he sent for one his guard, told him of the plot, and requested that he would disguise himself as a female, and go to the kitchen, there to keep a strict watch upon the peas, until they should be served up for the table. The young man carefully observed the directions he had received, and had not been long upon his post of duty, before a young man, another of the guard, came anxiously to the door of the kitchen, looked in and then passed away. In a few moments after, he returned and approached the hearth where the peas stood, and was about to mingle in the deadly substance, when, suddenly he shrank back as though from the sting of a forked-tongued adder, his color changing to the pale hue of death, and his limbs apparently palsied with fear, evidently horror-struck with his own purpose—but soon, however, the operation of a more powerful excitement urged forward his reluctant hand that tremblingly strewed the odious bane, and he left the kitchen, overwhelmed with conflicting passions, remorse and confusion.

"Harold sleeps no more, the cry has reached his heart ere the deed be accomplished," said the youth on duty, in a voice not devoid of pity, as he looked after the self-condemned wretch.

"What, Harold!" said the commander-in-chief, sorrowfully, upon receiving the information; "can it be possible—so young, so fair and gentle! He would have been the last person upon whom a suspicion of that nature could have fallen, by right of countenance. You have done well," said he to the youth before him. "Go join your comrades and be secret."

The young man went accordingly, and Washington returned to the piazza, where several officers were assembled, among whom was the hero of Saratoga, who was waiting for further instructions from Congress before he departed for Canada. In a few moments dinner was announced, and the party was ushered into a handsome apartment, where the sumptuous board was spread, covered with all the delicacies of the season.

The commander-in-chief took his seat, placed General Gates on his right hand, and General Wooster on his left. When the remainder of the officers and company were seated, and eager to commence the duties of the table, the chief said, impressively:

"Gentlemen, I must request you to suspend your meal for a few moments. Let the guard attend me."

All was silence and amazement. The guard entered and formed in a line towards the upper end of the apartment.

Washington, having put upon his plate a spoonful of peas, fixed his eyes sternly upon the guilty man, and said:

"Shall I eat of this vegetable?"

The youth turned pale and became dreadfully agitated, while his trembling lips faintly uttered,

"I don't know."

"Shall I eat these?" again demanded Washington, raising some upon his knife.

Here Harold [illegible] his hand, as if by an involuntary impulse, to prevent their [illegible]. A chicken was then brought in, that an experiment might be made in the presence of the witnesses. The animal ate the peas and immediately died, and the [illegible] with terror, [illegible] and was borne from the [illegible].

To Readers of the California Farmer.

We mean you, kind reader, now looking over this sheet to see if you can find something of interest, something of importance, something new. Are you a subscriber to the Farmer? If you are, then you are a regular reader, we trust, and as you read, did it ever occur to you that you might add to the interest of other readers by some communication from your pen touching such subjects as will best advance the science we are advocating. Your example would call out a response from *other readers*, and then you would receive new pleasure and interest as a return for your efforts, and many other readers would receive good also. Would it not be an ample reward thus to give pleasure and interest to others? This would be carrying out the "golden rule." And reader, if you are not a subscriber to the Farmer, have you not found enough of interest in your present perusal to induce you to become a subscriber? We shall be happy to place your name upon the list. We have a goodly array of names, and we are proud of them. True it is not so long a list as we desire; but the names themselves are of a character and influence that can be appreciated, and we ask yours also, and ask your interest among your friends; whether you are a farmer, merchant, ship-owner, manufacturer, mechanic, or in whatever station of life, for we believe we can interest you all. We can interest your family, if you have one, for we mean that the Farmer shall be a "family visitor," awakening an interest in all that appertains to rural life, and giving to the denizens of our cities a desire to make their city homes bear as much the appearance of a garden outside, and a happy home inside, as the beauties of earth and its abundance can make it, if they will be but interested in these things.

There is no family in our cities but should wish to know how "the abundance of the earth" can be obtained. Fruits and flowers are the needed wants of a city life, and a city life would be no life without them. They are necessary for health as well as comfort, and the luxuries of the "vegetable kingdom" are to our citizens as necessary for health as pure air. There are other things too the country will and must give to the city beside the beef and bread of our good friend "Dr. Scott." Then, kind readers, will you not give us you kind influence, that the country and city may become better acquainted with each other? This is what we are striving to accomplish.

Forty-Five Days from Paris.—What would our old forty-niners have said, when doing business in cloth shanties, if they had been told that in five years we should receive communications from the city of Paris in forty-five days. We publish the annexed letter from one of the largest horticultural and seed establishments in France with whom we have corresponded and transacted business, and who are actively engaged in extending agricultural science, for the purpose of showing the interest they feel in all that relates to California. We received also from them drawings of several of our native pines and forest trees, including the "mammoth tree," and we wish our own citizens would but show a proportionate interest in the rich treasures we possess in our native trees. Our California trees are treasures in Europe, and why should they not be to us? We also feel that the approximation we have made to the great marts of the old world—the quick communications we now possess with them, must tend to newer developments in this age of progress. The drawings can be seen at our office.

The following is the letter alluded to:

Paris, May 30, 1854.

Messrs. Editors—For some months past we have been regularly favored with your very valuable paper, containing, besides much general useful information, a great number of interesting articles on agricultural and horticultural matters, and showing with what surprising rapidity rural sciences are progressing in California. We suppose it is to your kind remembrance we are indebted for these papers, and, returning our best thanks for your civility, we beg leave to reciprocate it by presenting you with the *Journal d'Agriculture pratique*, to the publication of which we oftentimes concur (contribute?) The numbers issued since the beginning of the year have been forwarded to you to-day, and the subsequent numbers will be regularly mailed. * *

We are very desirous to import from California seeds of some sorts of the Fir tribe, and think it would not be difficult for you to procure, if not of all, at least some of the sorts, and forward to us in as early a season as possible. Some of the cones of each species ought to be added. We enclose descriptive notes, with sketches and indication of *habitat* of the different trees. Those mentioned in the subjoined notes we may still add as very interesting and desirable—the *Taxodia Sempervirens* or *Segnoia Sempervirens Vel. Giganteu*, known in California by the name of Redwood. We send you also a cone and leaf of the *Taxodium*, together with a description.

Hoping soon to hear from you,

We remain,

Yours truly,

Vilmorin Andrieux & Co.

The following description of the farm of J. M. Horner, Esq., will be found of interest to our readers, and will also show to our farmers in the old States what a California farm is. This is one of the farms entered for premiums in last week's issue.

Mr. Editor—Permit me to submit for a premium the Rancho de los Papas. It is my homestead establishment, containing one thousand acres. It is fenced on the outside entire, and has several cross fences, dividing it into 50, 100, 200, and 500 acre fields. We have 400 acres of wheat, 100 of which has been sown this season—the balance is volunteer. 100 acres of volunteer oats yielding double of last year's crop, on the same land; 50 acres of barley; 100 acres of potatoes; 50 acres of orchard, including about 4 acres of garden; 3000 fruit trees, embracing more varieties than I am willing or able to name—principally apples and peaches; some of the latter will yield the present season nearly one bushel of good matured fruit. The trees the most thrifty I ever saw. There is also a nursery of various kinds and qualities of fruit. My grape vines, numbering 250, are very full of fruit this year. There is 1-4 of an acre of strawberries, besides gooseberries, currants, and other shrubs and flowers innumerable; 300 acres of pasture lands, in which are pastured from 20 to 80 head of horses, mules, oxen, cows, &c., nearly all of choice American stock; 300 head of hogs, of choice breed, and about the same amount of chickens.

I built the first house on the premises in 1847. The above named farm is in Alameda County, and took its name in 1849 from this fact: In 1848–9 I raised more potatoes on it than were raised in the balance of the State, and I presume it has been the most effectual argument used to convince the people of California and the world that vegetables could be raised abundantly in this State. Besides the above particular farm we have some ten outside farms, and from their thorough cultivation, they would undoubtedly come in for their share of merit. We have 3000 acres cultivated on the latter farms, which are all situated in Alameda County.

Yours, &c.,

John M. Horner.

The Monumental Engine Co., on Thursday last, presented their foreman, Mr. Geo. H. Hossefross, with a massive and beautiful silver trumpet as a testimony of their esteem; and Mr. Hossefross at the same time presented the Company with a magnificent banner, which cost $500.

Congressional.—We have received a pamphlet containing the very able speech of Senator Gwinn on the Pacific Railroad; also, a pamphlet containing a schedule of the various bills and resolutions he has presented to Congress during his term. The amount he has accomplished shows what can be done when a mighty will is at work. We have also received the eloquent speeches of Hon. M. S. Latham, and documents from our other delegates at Washington, all giving proof of earnest devotion to our interests.

The Pacific Reconnea.—A new religious paper, issued under the patronage of the Board of the California Baptist State Convention, and edited by Edward J. Willis. This paper makes a very handsome appearance, and gives good assurance by the first issue that there is ability of such weight as to ensure success, which we trust it will receive. With such advocates for the cause of religion as the Recorder, the Pacific and Advocate, we may hope for the improvement and elevation of society and its continual increase and prosperity.

Messrs. Flint, Peabody & Co., have presented the First Congregational Church with a splendid bell, weighing 2500 pounds. It was elevated to its destined position in the belfry of their brick edifice, at the corner of Dupont and California streets, on Tuesday afternoon, and, on trial, proved to be a very fine sounding bell. We have heard many of our gallant firemen express a hope that it may be rung in case of fire.

Grain Crops in the Old States.

Indiana.—From the Wabash Gazette, we receive information of an abundant crop throughout the State.

Illinois.—From the Alton Telegraph we learn that the wheat crop will exceed all calculation; accounts from every county promise large results, and it is expected Illinois will stand next Ohio as a wheat-growing State.

Michigan—The crop is heavy and abundant.

Kentucky—In some parts heavy, and in others injured.

Ohio has portions of the crop injured, and other portions very fine.

New York—The Empire State will have as large a crop as ever before harvested.

From other States the report is very favorable to farmers, and the present price of wheat ranges from $1 75 to $2 05 per bushel.

Shipping Grain East.—It is a question of some moment to our grain growers, now that a large crop is in prospect, to make the inquiry—Will it pay to ship grain to the old States? The price of wheat in New York is about $2 per bushel—say 3 1-3 cts. per lb., and it would require about eight months to get a return, without asking an advance. If wheat should fall to 2 *a* 2 1-2 cents, it would pay handsomely; at 2 1-2 it would pay freight and interest at 2 per cent. per month. Clipper ships returning would like such a freight.

We would urge particular care to see the grain *well dried* before shipping. These suggestions are made in case we have too great a surplus.

The People's Journal.—We receive among our exchanges the People's Journal, published by Alfred E. Beach, New York, at $1 per annum. We esteem this particularly valuable, as affording a mass of agricultural, scientific, and mechanical information. The work is got up in excellent style, and ought to receive an extended support. The work contains about 500 engravings annually.

Ants.—It is said that a chalk line drawn round a bucket of sugar, or any kind of sweet meats, will always prevent the intrusion of ants.

Petrified Pine.—A remarkably curious specimen of pine wood, thoroughly mineralized, has been exhibited to us. This boulder, if we may so term it, was found near Murderers' Bar, on the Middle Fork of the American River. A tunnel has been bored into the mountain at this point, some eight hundred feet, and the specimen before us was taken from the earth at a depth of two hundred feet beneath the surface. This piece of petrifaction appears to be composed of calcarous stone and black flint, and has evidently experienced great pressure, and been subjected to very powerful heat. Its weight is thirty pounds.—*Sac. Union.*

Fire in Sacramento.—On Thursday morning last, about 11 o'clock, a tremendous fire broke out in Sacramento, which in the space of a few hours consumed nine blocks in the centre of the city. The destruction of property by this calamity is only exceeded by the fire in 1852. The fire broke out in the block bounded by I, K, 3d and 4th streets, and burnt over the following district: K street, north side, from 3d to 7th; I street, from 3d to 7th, both sides; also, 4th, 5th, 6th and 7th streets, from K to I streets, both sides; both sides of I street, from 3d to 7th. The loss is estimated at about $400,000. A delegation of firemen went up from this city, to render aid, but the fire was fortunately got under before they arrived.

Truths to Farmers.

The master of a Ragged School, who had exhausted all the stereotyped plans of reward and punishment, without being able to make his vagabond pupils keep their faces clean, at length succeeded by a very simple expedient: he put a looking-glass in the passage by which they entered the school-room, just over where the little-used soap, basin, and jack-towel had long been displayed in vain.

The dirt, previously unconsciously worn by more than half the ragged ones, disappeared with marvellous celerity, and very soon the habit of cleanliness was established. There was nothing in the mechanical or chemical qualities of a shilling shaving-glass to make long-accustomed dirt peel off ragamuffin faces, but it told the truth, and the truth set the young dirt-pie makers a scrubbing. In the same way the sea captain, who had taken to sea a barometer, after having studied the law of storms, shortened sail, and made all snug while the sky was clear, because the barometer suddenly fell, and saved his ship in the midst of the same hurricane that sent unwarned captains' ships to the bottom. The barometer was no magic antidote, but it warned the wise captain to look out for squalls.

So, too, the mere art of book-keeping, however beautiful in theory and exact in practice, will not make a trader's fortune, or even save him from ruin; but in its results, by its severe truth-telling qualities, it has prevented thousands of traders from cheating themselves, and thus at once warned them from bankruptcy and led them to fortune. In every pursuit one important element of success is to leave as little as possible to guesswork.

What the mirror is to those who would be clean-faced—what the barometer and the compass are to the mariner—what correct accounts to the trader—statistics are to a nation. That and no more. They serve the double purpose of encouragement and warning, they guard equally against undue depression and elevation. * * *

But when did a miller or a bread-eater ever inquire by what method the corn he ground, or the quartern loaves he consumed, was made? It is for this reason that agricultural improvements travel so slowly; they are only propagated by the observations of agriculturists themselves—to the consumer the best and the worst farming looks much the same.

But with the results of statistical inquiries annually published, the comparative progress of different districts would be brought into such strong relief, that competition would inevitably follow the comparison. What publicity can do may be seen, to a limited extent, in the effects of the "County Reports of the Journal of the Royal Agricultural Society."

It is not too much to assert that there are districts in the south and west of England, and in Wales, a hundred years behind the north and east in agricultural practice; and yet that there is scarcely any district which does not excel in some one branch of agriculture. It is amazing to find—in days of newspapers and railways—districts where fertile land with a good climate is only half cropped, undrained, wasted with thick hedgerows and useless timber, and scratched with rude implements—where farm-yard manure is wasted, portable manures are neglected, unprofitable live stock obstinately bred, and useful root crops and green crops almost unknown—within a day's journey of other districts, where for a quarter of a century the best practices of agriculture have been successfully followed.

But there is another point of view in which, to the farmer, the early publication of correct annual statistics would be of incalculable value. At present, all the information on prices, and probable prices, that exists is more easily accessible to those who dwell in towns. Great corn merchants, like Messrs. Sanders and Messrs. Sturge, in doubtful years, find it worth while to send out special calculators to estimate the corn crops in order to guide their own operations. The newspapers which depend on farmers for support, devote considerable space to reports of the state of the crops in many districts, and the price of corn in all markets within their means of correspondence. The Mark-lane Express has gained a reputation by this sort of intelligence. The first question of a farmer, in commencing a conversation with any one from a town—the first page of a newspaper to which he turns—is to ascertain "how are the markets?" That is, he asks for statistical information.

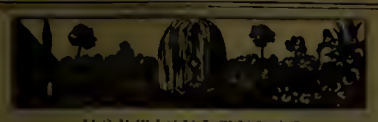
Thus, then, it must be clearly understood that it is not a question between no information and some information, but between vague calculation and idle rumors and careful estimates, founded on facts of measurement and weight.

In times of alternate depression and excitement in the corn market, the farmer with his local and limited means of information, is almost certain to be the sufferer. We had proof of this in a valuable and curious diagram exhibited the other day at the Society of Arts, by Mr. Morton, showing the fluctuations the prices, and the periods at which sales of 50,000 bushels of wheat were made by a number of intelligent farmers of the capital during the year 1846. In that year wheat rose from 40s. to upwards of 80s., and then fell below 60s., and it appeared, from the returns, that by far the greater part of the crops of the farmers was sold at the lowest prices. It must always be so while farmers are guided by rumor only. A correct estimate of the deficiency would have steadied the demand and the supply, prevented over importation, raised the price of grain early in the year, and maintained an average neither so high nor so low as that from which both producers and consumers suffered.

We know now that the present population requires a large importation of wheat; all the eloquence of social economists will not drive the laborers back to barley, oat, or rye bread, or induce capitalists to turn their investments from profitable manufactures to the slow return of barren soils. Since 1846 we have never imported less than seven million quarters of wheat, and in several years nine millions, ten millions, and eleven millions. To the farmer, it is especially important that early in the year an unexaggerated statement of the extent of the harvest should protect his produce from the competition of speculators, who, with money to spare, flood the market to realize. We lay stress upon this part of the question, because panics are equally injurious to all classes, nor the least the advantage of correct estimates would be a more steady demand and supply. Neither the farmer producer nor the bread-eating consumer profits by sudden fluctuations; and these fluctuations would be prevented by the circulation of reliable information.

At present corn is the only staple of which we can never estimate the supply.

But, after admitting the theoretical advantages of agricultural statistics, the main difficulty will, after all, rest in the details. Has a feasible plan been as yet propounded by any one of those who have agitated the subject—by the Government officer, Mr. Jadis, or by Messrs. Caird, Wingrove Cooke, Leonir Levi, Morton, and Wilson?—*S. S. in London News.*



HORTICULTURAL.

Prize Farms.—It is highly important that farmers throughout the State should send in immediately a description of their farms, gardens and nurseries, that they may be entered upon the Committee's record for examination. In addition to the regular premiums to be awarded by the State, special premiums are to be given to the most deserving in each class. Letters addressed to F. W. Macondray, Esq., President of the State Society, will receive attention.

Great State Fair.—The California State Agricultural Society will hold an Agricultural and Horticultural Exhibition, and Cattle Show, in October next, at San Francisco. Full particulars of the plans and list of premiums, time, place, &c., will soon be issued and forwarded throughout the State. Farmers, gardeners and stock raisers throughout the State will please bear in mind the importance of preparing for it in season.

Roses.—There is no spot in the world where the Rose can be so successfully cultivated as in California. The Climbing Rose will surpass in growth the utmost conception, if properly cared for, and its increase of blossom equals its growth.

The Perpetuals bloom nearly all the year, and in profusion. Ever blooming roses need very rich soil.

The Tea Scented increases in size and beauty, and continues longer in bloom in this country than is known elsewhere.

Our finest roses can be increased in size and made more enduring by budding them upon our native standards, or what is called the Castilian Rose. Roses love rich deep soil and good cultivation. It is needless to expect the sweetest fragrance and the most perfect flowers without a corresponding care.

Bush your Tomatoes.—It is just as sensible to grow peas without bushing them, as it is tomatoes. You may grow both in a slovenly sort of manner, if you have plenty of room on the ground, but you can grow either twice as well upon something to support them, and tomatoes are decidedly better grown up in the air than on the ground, under the shade of a mass of vines. The best support for a tomato vine is a short bush set firmly in the ground. The branches have room to spread among the limbs and support the fruit. The plan is much better than tying to stakes and trimming, according to our experience. We have tried both ways. We have every season, for the last four or five years, given this same advice to all growers of this vegetable. Bushing increases the product nearly one-half, gives larger fruit, and it keeps sound much longer on the vines.—*Germantown Telegraph.*

A Great Barn.—The Shakers are building a granite barn for their cows. It is to be two hundred and fifty feet in length, fifty feet wide, and is to cost $15,000. Mr. Elkine, the architect, thus describes the edifice:

"The location and arrangements of this barn edifice are in many respects peculiar, and in all respects admirable. Its outer walls are of stone, and its roof of slate. It is located across a gentle ravine, opening from bank to bank, and is so arranged that teams laden with hay or straw may enter at either gable, precipitate the load into the bay below, pass on, and make their egress at the other end. Such a situation has enabled them to extend a basement from end to end for the reception of manures, both solid and liquid, which are kept from filtration or otherwise escaping downwards by a plank floor upon a stratum of clay, wrought as a bed of mortar. The descent of the ground upon the back side of the barn renders egress and ingress to and from the cellar convenient and easy for carrying pond mud and manure. The cows are to be tethered upon the south side of the barn, and in one continuous stable sixteen feet in width, with walls plastered inwardly with mortar, and a corridor or passage between the cribs and mows upon the north side (which preserves the warmth of the barn throughout,) sufficiently wide for a horse and cart to pass, which is often convenient when feeding on green food.

The scaffolds above the cows are the best depository for litter, which is let down through a trap-door in the rear of the cows; and, when partitioned into rooms, serves as a place for meal, grain, and also for a herdsman's office. These arrangements render it perhaps the most convenient and it is undoubtedly the most expensive barn in America. It height to the eaves, upon the back side is to be thirty-four feet; stables, eight feet, main timbers, and scaffolds sixteen feet. Floor for teams framed four feet below the eaves.

The Board of Aldermen have declared Mayor [illegible] guilty of disobedience of orders, and suspended him to be suspended from office till the first day of September next.

Statistics of Sonoma.

From the returns made for 1854, by the county Assessor, we glean the following interesting statement of the amount of stock, grain, etc., in this county:

Sonoma Township—302 oxen, 1565 cows, 883 calves, 436 horses, 165 colts, 1262 hogs, 3095 pigs, 2570 sheep, 1053 lambs, 43 beeves, 3100 acres wheat, 1381 do. barley, 73 do. oats, 190 do. corn, 5 do. rye, 62 do. potatoes, 355 tons grapes. Militia, 209.

Vallejo Township.—218 oxen, 415 cows, 355 calves, 144 horses, 16 colts, 750 hogs, 2000 pigs, 18 sheep and lambs, 213 beeves, 540 acres wheat, 156 do. barley, 31 do. oats, 13 do. corn, 112 do. potatoes. Militia, 77,

Petaluma Township—455 oxen, 571 cows, 255 calves, 390 horses and 75 colts, 659 hogs and 1394 pigs, — sheep, 24 beeves, 879 acres wheat, 555 do. barley, 174 do. oats, 107 do. corn, 652 do. potatoes. Militia, 162.

Santa Rosa Township—755 oxen, 1444 cows and 786 calves, 659 horses and 176 colts, 3415 hogs and 4514 pigs, 48 sheep and 20 lambs, 189 beeves, 2072 acres wheat, 547 do. barley, 114 do. oats, 86 do. corn, 43 do. potatoes. Militia, 157.

Russian River Township—125 oxen, 528 cows and 222 calves, 202 horses and 108 colts, 1255 hogs and 1449 pigs, 30 sheep and 23 lambs, 4 beeves, 1120 acres wheat, 287 do barley, 14 do. oats, 238 do. corn. Militia, 94.

Bodega Township—511 cows and 460 calves, 81 oxen, 95 horses and 55 colts, 513 hogs and 745 pigs, 150 sheep and 110 lambs, 148 acres wheat, 130 do. barley, 160 do. oats, 7 do. corn, 735 do. potatoes. Militia, 55.

Annally Township—1069 cows and 449 calves, 448 oxen, 442 horses and 54 colts, 2606 hogs and 1480 pigs, 200 sheep, 1182 acres wheat, 532 do. barley, 497 do. oats, 136 do. corn, 10 do. rye, 1001 do. potatoes. Militia, 169.

Recapitulation.

Oxen,	2412
Cows and calves,	9804
Horses, mares and colts,	3017

Militia, No.,	1023

The following are the statistics for Mendocino township (Mendocino County—yet unorganized, and attached to Sonoma County for judicial purposes):

274 cows and 75 calves, 210 oxen, 241 horses and 67 colts, 2052 hogs and 1128 pigs, 146 sheep, 751 acres wheat, 46 do. barley, 87 do. oats, 381 do. corn, 40 do. potatoes. Militia, 80.—*Sonoma Bulletin.*

Distress among Farmers.

There can be no doubt that in various parts of our State there is real distress among those who have embarked their all in agriculture. The severe loss occasioned by the abundant potato crop of the last year, utterly depriving many of their entire cash means, and otherwise involving them, has caused a vast deal of suffering. Many large farmers are now in want of means to harvest and market their crops. There should be a generous forbearance and aid offered to this great interest by those who have means. County meetings should be called immediately, to devise the best means to relieve the farmers. Plans can be devised that will benefit all classes, without cost to either. If each county would erect large, safe and substantial warehouses for receiving grain and produce, and capitalists would make advances, it would prove a great blessing, as it would not only relieve immediate wants, but also encourage those who are now desponding, to greater exertions, and good would result from it.

Will not the farmers themselves, and the friends of these interests, give heed in season? Delay will bring more suffering.

Cockroaches.—Spirits of turpentine is prescribed as an effectual circumventer of cockroaches. Only touch the shelves and sides of the book-cases, bureaus, &c., with it, and the enemy quits not only the furniture, but the room.

Cure for Diarrhœa.—Take of sweet oil one ounce, cinnamon water six ounces, laudanum one drachm—mix well together. Dose for an adult, one table spoonful every three hours.

To Make a Candle Burn all Night.—When, as in case of sickness, a dull light is wished, or when matches are mislaid put finely powdered salt on a candle till it reaches the black part of the wick. In this way a small and steady light may be kept through the night, by a small piece of candle.

Easy Washing.—Make suds as usual, then add a tea-spoonful of Spirits of Turpentine to each gallon of water, stir it up, put in the clothes and let them soak an hour as usual and rinse them as usual. Unless very dirty, they will need no rubbing the turpentine having the effect to loosen the dirt.

LADIES'. DEPARTMENT.

What is Home?

"When the heart is sad and lonely,
And we have no wish to roam,
That we seek for, can come only
From the loved ones round our 'Home.'"

What is home? Is it the mere building of wood and brick wherewith to shelter one from the summer's heat and winter's cold; or is it a place made sweet and sacred by the endearing ties of those we love? Those who are blessed with a dear home and can appreciate its influence, will answer to the latter. Why is it the people of this country are so unsettled, and often say: "we are going *home* to the States." They cannot fix their minds upon one place long enough to call it home; but still cling to the "spot where they were born," and picture, in imagination, the old folks seated by a cheerful fireside, reading the family bible, or giving a bit of timely advice to those who are prone to stray. Home can be made a "Little Heaven below," and to realize such every inmate should do all their power to make one another happy. For instance, the husband, when he returns home at night from his daily labor, should see the fond wife at the cottage door ready to receive him with a smile of welcome: this would give him ambition to work harder the next day. But if, on the contrary, he finds his wife gone, the children in different directions, regardless of a mother's care, his heart sinks within him, and he seeks the noisy crowd to banish the truth from his mind. Weary of this, he should not return with harsh words to the erring one, but inquire the cause of her absence, and win her back again. Men do not like to hear women complain, (they prefer to do all the complaining themselves); but a wife and mother has a great many little cares and troubles, which, with the kind indulgence of a husband would be soon forgotten.

How many young hearts have been allowed to break by the stern decree of parents, who for their own convenience would strive to bend to their will the hearts of their children. Do they forget they were once young themselves? where are their thoughts? where their reason? Know they not that the heart, once fixed upon an object, cannot be changed by earthly power. How much misery has been caused in this way, when a little reflection on the part of the parent would have saved years of unhappiness.

It is these things which help to break up the family circle; for if a child cannot obtain sympathy from a parent, they'll seek for it elsewhere. How often is a son condemned for going into bad company, when the unkind treatment of the father has driven him from the door of his heart and home. 'Tis not always the mercileess and disobedient who stray from home, for they are better constituted to endure harsh treatment than the sensitive and pure minded, who long for communion with those of their own nature. Such treasures are lost to parents forever by their own neglect. Trouble will change the disposition and often make one speak and act unkindly even to those they love; 'tis then the soul yearns for sympathy, and 'twould take but a few soothing words to change that spirit again. But there lies the fault. The haughty spirit will not bend, nor the unwilling ear listen to reason, and ere reflection can take the place of retaliation, angry words follow.

"Angry words, oh! let them never
From the tongue unbridled slip;
May the heart's best impulse ever
Check them ere they soil the tip."

Thus it is with many brothers and sisters who might be perfectly happy in each other's society; but how little confidence exists between them. One is ever ready to blame the other for a fault which perhaps they have been guilty of themselves. How different are the feelings when the wide ocean separates them for years, perhaps forever. What would they not give for even a smile from that brother or sister they had rejected. But *'tis too late:* God has ordered that such should be the suffering, until all can appreciate the "loved ones at Home."

Cora.

July 14th, 1854.

California Babies.

Messrs. Editors: I really wish to know if you are in earnest about an [illegible] of "California Babies." Now, I like to pass; there's no place in the world where there are so many pretty babies. Every mother has the prettiest one ever was seen; and I think it will be too much trouble to have a baby show. We don't have a cow contest to know if our cows are better than the rest.

We [illegible] and I think it would [illegible] that have grown up within a year, it would prove that we are a growing country. Now, Messrs. Editors, don't let them show the "great babies." (I mean those that wear "whiskers.") I would have them one year and under!

Just have it so, do. I have a baby, as pretty a little darling, as ever blessed a mother, and I would not give it for all the gold mines of California, and I want to show it too, and one thing more, Messrs. Editors, I have been puzzled as well as my husband, to find a name as pretty as the baby. Now, do please have a premium offered for the "prettiest names," for the pretty boys and girls that shall grow up in California. Let us have some new names; we are tired of all the old ones; we want new names for a new country and new babies. Now, will you, Messrs. Editors, help us?

Plantaganet.

To Prevent Cows from Shedding Milk.

Collodion (liquid culture) is a somewhat recent discovery, and has been applied to useful purposes by surgeons, but I am not aware that it has ever been used to prevent the loss of milk by leakage from the udder of the cow. The mode of applying is as follows:—After milking, take a thin piece of muslin, the size of a three cent piece, wet it in the collodion and apply it quickly to the end of the teat. It dries immediately, and adhering firmly, prevents the escape of milk from the orifice. It can readily be removed at the next milking.

On first making use of this means I did not anticipate anything more than temporarily to prevent the evil. After making a few applications it was discontinued, and I was somewhat surprised to find that it had permanently lessened the fault. Upon reflection, the *modus operandi* appeared as follows: First the collodion contracts the orifice and thus prevents the escape of milk; and second, the bag becoming distended, its capacity is permanently enlarged. Try it.

Another useful purpose of this article may be mentioned. Cows' teats often become tender from chaps and deep fissures in them. They may be readily cured by moistening a piece of muslin in this liquid and applying it smoothly to the part affected. It adheres so firmly that it will not be loosened, even if the calf is allowed to draw the milk.

Mr. Editor:—The above recipe I cut from a Harrisburgh paper. As it gave no credit, it may be origiual. Please publish it and add, that *molasses* is "the sovereignest remedy" for the chapped teats of cows—to be applied after milking. Of course the udder should be washed in cold water, which of itself will frequently cure light cases.

My observation and experience, though limited, go to prove the better plan to be letting the calf have free access to the dam, for twenty-four hours after birth. The sucking and butting it administers, is just the right treatment for the swollen udder; and cases of "Garget" are extremely rare, where this plan is practised. It is also much easier to separate the mother from the calf, the next day, the maternal instinct being then partially quieted.

Also, it should *never* be permitted to kill a calf, in any place which the cow can have access to. Their piteous lowing in such cases leave no room to doubt that they recognize the blood of their offspring. The writer has known of *actual tears* pouring down the face of a cow, on being shown the bloody hide of her calf. These may be thought matters too trifling for the consideration of "men of mark"—but is it not so; the beautiful humanities must all combine, to form the perfect character.—*Rural New Yorker.*

Pedestrianism.—Mr. Francis Cole commences at 2 o'clock to-day, his unprecedented feat of walking eighty-five hours without intermission, on Merchant street, opposite Montgomery block

Ole Bull and Strakosch will make their *debut* before a San Francisco audience at the Musical Hall, on Monday evening next. Of course they will have a crowded house.

The name of the public spirited individual who charged the Pacific Engine Company $2 for bad rum, on the morning they saved his property from fire, is "P. H. Ahrens." So he says.

A man named Charles R. Bowdoin shot himself at his residence on Green street, on Saturday night, while in a state of temporary insanity. He leaves a wife and two children.

Favors.—We are indebted to the enterprising firm of Murray & Co. for a liberal supply of all the Magazines, English periodicals, Dramas, the Knickerbocker Monthly, [illegible]

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JULY 20, 1854.

Home and the Homestead.

The Homestead! how much is comprised in that word—father, mother, sister, brother, wife, child; all, all are centered there, and there the fondest, holiest affections gather, and when the fairest and brightest promise made us in the world fail us, we find a place where, instead of the world, we can receive what the heart needs—"Home."

In the great struggle the few past years—the desire to accumulate wealth rapidly—we fear that love of home has in a great measure been lost, or it has not been sufficiently cherished. Fireside duties, social duties and pleasures, and neighborly intercourse has been performed in a hurried manner or slighted altogether. The arrival and departure of our ocean steamers has been made an excuse for the neglected duties of home, and many an affectionate heart of wife or child has heard that word, "'tis steamer day," until it sounds to them like a knell. It is a knell, and its continued repetition lays their affections and hopes in the grave of neglect.

The homestead! the very word should touch the heart with electric power and awaken it to a sonse of its duties and obligations, and unless this is done more faithfully, the word home will lose its significatiou, for it will have no reference to that place where the best affections cluster around our kindred, and where the fondest memories are perpetuated. It is that fatal neglect of home that has brought the taint of dishonor upon much that was once pure and good. It is the same neglect that has caused the separation of families and laid the foundation of misery to many a once happy fireside.

Tho temptations in our cities are great, and men, wearied and harrassed with cares and duties, are apt to seek for a relaxation and pleasure not where alone it should be sought; but in those resorts of fashion and dissipation that tempt little by little, until the appetite for such pleasures are ungovernable, and home is neglected or forgotten. The gaming table has lured many a young man to the path thaat led to ruin. His downward course began by neglecting to spend his leisure hours at home. The intoxicating cup and the theatre has also done its work, and the wreck of human happiness and human hearts are evidences that meet us every day in the walks of life. These things are not only found in our cities, but they exist in the country at and among our "homestead farms;" the place, above all others, where contentment, prosperity and happiness should be found.

The cause of all this evil arises from the fact that a too constant and incessant application of mind and thought to the acquisition and desire for wealth, induces men to forget those claims that circle around the hearthstone, and the mind is weaned stealthily away. When they feel the need of excitement, instead of the home circle the political circle is sought, not for the purpose generally that the elective franchise was instituted; but for self-elevation, self-advancement, to place, power, emolument. And men failing to acquire wealth rapidly by a regular business, and believ-it may be obtained through political influences, seek these, and thus neglect home affairs and home duties and pleasures, and the old homestead is soon left to its fate or sold, its proprietor having received some "office," as the reward of his devotion to party, instead of his attentions to home. We war not upon polities or parties, but we do war upon those wrongs that are induced and brought upon our country hy polities and parties which legislate not for country and people, but for self and party; and we now urge the yeomanry of our State, one and all, to that attention to their own duties, their own interests, which their own present embarrassed condition demands. We say to the farmers, that unless they will take immediato and proper steps to secure good and true men to the coming legislature, the interests of the Agriculturists will be esteemed of but little moment.

If the homestead is worth preserving, if its blessings are worthy of especial care, then let the cultivators of the soil see that their interests are represented in the halls of legislation. We draw no party lines; let the candidate he whig or democrat, only he sure that he regards agriculture and will act for its general interest, whenever and wherever his services are demanded, Let the representatives of Agricultural districts be a representation of that interest, and then and uot till then shall we see that prosperity rest upon the hardy tiller of the soil; then and not till then will the homestead be surrounded with these blessings and comforts which it is so well qualified to diffuse.

Sacramento.

Devoten city! will nothing appease the stern god of Ruin. Heroism is a trait that calls forth commendation from an antagonist; and will not fato he appeased? With all that has been said and written of this second city of our State, "tho half has not been told." Externally and internally she is great. The broad, beautiful and picturesque prairies around her, now becoming the chosen and cultivated homes of her citizens, make her great. The lofty Sierra with her snow clad peaks sends down her winter covering in sweeping currents to fertilize a vast territory, enriching Sacramento and making her great. The fertility of all the surrounding country, and the riches of adjacent mines tend to make her great; hut there are other causes that give her the name, and deservedly so—we mean the enduring courage, the undying energy and ceaseless perseverance of her citizens, and surely no city in the world, since the days of creation, has ever passed through so many trials, so severe calamities, such repeated and bitter trials as this great city of the plains, Sacramento. When we recount them it seems almost incredible that any city could have resisted so many afflictions, and now present so bright an outward aspect.

In 1849-'50 a sweeping flood buried the city and took from this newly founded place nearly a million of dollars in property, and suspending all business for nearly two months. In the summer of the same year the lamented scenes of the squatter riot cast a gloom and a blood stain that can never pass from tho memory of those who are identified with Sacramento. In the autumn of the same year, tho cholera, liko "death on the pale horse," marked this fatal city, and the graves of nearly two thousand who fell victims to this pestilence, tell the story of many a desolated heart. Sacramento had a brief respite in winter of 1850-'51, and bright skies and a warm sun cheered the citizens for a while. The summer and autumn of 1851 brought again more marks of the walking pestilence, but it passed away with less fearful marks than its former visit. Another season of industry, and the floods of the winter of 1851-'52 called into activity the enduring perseverance of her citizens. The toil of one portion of the year was continually swept away hy tho calamities of the remaining term. In 1851-'52 we had a severe winter of trials and suffering, beyond previous years, and yet the opening spring found the citizens with their usual prompt and cheerful attention at the post of duty. Tho year 1852 was commenced with high hopes, and continued till the early summer, when the epidemic again threatened the city and prostrated for a while its business. A revival of better times had commmenced, when that calamitiy which left its indelible mark engraven upon the memory, swept the city from sight in a few brief hours.

The pen, mighty as it is, can never describe the grandeur, the awful grandeur of that night of wreck and ruin. Fortunes were swept away; the wealthy were made poor, the poor made desolate; bright hopes were blighted, energy blunted, and for a while paralyzed, and hope whispered not even of itself. Despair, however, came not; like an electric spark the light of hope dawned anew, and the work of resuscitation commenced: when lo! the flood-gates of heaven were opened, the mountains melted, the torrents came sweeping over the plains, and Sacramento lay a buried city. What the flames had spared the flood claimed. For months those rolling waves came and receded, spreading everywhere wreck and ruin. Never, never could human fortitude bear more heroically the "ills that flesh is heir too," than did the citizens of this apparently doomed city bear their oft repeated trials.

From this last calamity Sacramento arose, and shaking herself, like some powerful war-horse from a stunning blow, she sprang forward again to the "Battle of Life." For one year, since the floods abated in 1853, this city has accomplished more than any other city of its size in the known world. Steadily, firmly and bravely has she made her march onward, improving in every department of her interests, morally, politically, religiously and pecuniarily. Nothing daunted hy a depression in trade which prevailed over the country, Sacramento went on in all the public improvements which were demanded. Leveeing the city, raising it beyond the reach of flood, grading and planking her streets, erecting water works, building school houses, completing her fire department, and erecting substantial buildings for it; and at the same time meeting all her obligations, redeeming her bonds, and setting an example of probity, energy and endurance, the equal of which has never yet been known, or ever can be. Previous to the last fire Sacramento was in a better condition than any other city in California To-day the mark of that destroyer is again upon her. But Sacramento *is not destroyed*; that same undying energy remains with her citizens. Fire cannot consume it, water cannot drown it—Sacramento is reserved for a better fate, and she will yet win it. The brave and high minded will ever yield a hearty sympathy, and now is the time for that sympathy.

Let San Francisco perform a noble and generous deed, let her yield to her suffering sister a ready help, not in wealth alone, but in that noble and generous confidence which she alone can bestow.

Interesting Correspondence.

We have been permitted to make extracts from a very pleasing descriptive letter from a resident of San Bernardino to one of our best citizens, whose scientific attainments have accomplished much good for our State. The letter is valuable for the information rendered relative to this part of the country:

San Bernardino, June 3, 1854.

Dear Friend—After an interval of I know not how many years, I once more resume my pen for the purpose of communicating with you. I often think of our first meeting on the little island of Tohoui, and our pleasant little rambles together there. It was, I can assure you, an event which must forever remain fixed in my mind, and I often find myself back there again with you, threading our way among the trees. But those are realities that were, and, like many other events in our lives, have passed, never to recur in this world; but the recollection of them I believe will never be lost—no, not even in death, and after the spirit leaves this tenement of clay, we shall be able to look back with pleasure upon all congenial scenes we have passed through in this stage of existence. * * * * * I know you would like to hear a description of San Bernardino and the surrounding country, but this I shall not be able to give, as I am deficient in descriptive power, but I can perhaps give you a faint idea of it as a general thing. In the first place I will say it is the handsomest place I have seen in either Upper or Lower California, and the soil is generally the very best. The valley is, I believe, from twenty-five to thirty miles wide, surrounded on all sides but one by high mountains, which are still clad in their snowy mantles. A portion of these mountains are full of pine, hemlock, and redwood lumber. The pine is hard, and resembles the Oregon pine, with the exception of what they call the Sugar pine, which is nearly as soft as eastern pine. There are also a great variety of other woods, including white and live oak, box elder, and the tallest alders I ever saw. In the bottom may be found any quantity of cotton wood and sycamore. There are at present five saw-mills in operation, and three more erecting, besides two shingle machines. The lumber is situated about twenty miles from the city, and it takes a team two days to go from here and get a load.

There is at the foot of tho mountains and in the canons plenty of deer, elk, bear, coons, squirrels, &c. In the streams are plenty of trout, from two inches to two feet long. As for the feathered tribe, there is a host of them—the quails are so plenty one would think the children of Israel were about being fed by them. The ducks and geese beat all I ever saw before. I thought I had seen a few in the upper country, but when I came here I found I had seen none, so to speak. I have known one man go out and be gone two days, and bring home a hundred and forty geese and two hundred ducks. The ground is literally covered with them for miles and miles, and a person seeing a flock of white geese at a little distance would easily imagine that the ground was covered with snow. I wish you to come and see our delightful country. Come down and see us, and let us take our hooks and lines and trace up the gurgling streams, as they wend their lonely way from their mountain bed. Here in the midst of wild scenery is an abundance of food prepared for the mind—food which is wholesome and agreeable to all those who love the works of the Creator. Come, Doctor, and let us enjoy ourselves for a season. * * * * * * *

Now about the grain. I wish you could see some of the wheat fields in this place. I will not pretend to tell you how much grain they expect to have this year, but there is some ten or twelve thousand acres sown. They have all the way from 25 to 100 acres in, and there is one man who has a field containing five hundred acres. They have commenced to harvest the barley, and the wheat will be ready in about a month or six weeks. It will turn out from 25 to 40 bushels per acre. Everything grows well here. We have been eating new potatoes and green peas for a month past. The whole ranch is a perfect level except a gentle slope to the East, just enough to irrigate with. The water runs through every street in the city, which is surveyed off into lots containing one acre and a quarter, and is incorporated. The lots sell for one hundred dollars each. Any person can take a lot and pay for it when he can. * * * * * *

Layton and I are at work making adobes for our houses. Our adobes we make a little larger than a brick, and dry them in the sun. The clay is of such a nature that they stand the weather without burning them or mixing them with cut straw, as is practised in some places. We make from twelve to fifteen hundred per day. The climate here resembles the Island climate more than any I have been in before. The coldest weather in winter just skims the shallow still water with ice, and this only happens at night. There is at the base of the mountains a belt of land about five miles wide, where the frost never comes, and vegetation flourishes the year round.

Last, but not least is the people, and what can I say of them? Of course you are well enough acquainted with human nature to know they cannot differ much from the rest of the human family. There is of course all kinds, both good, bad and indifferent. There is some, the best of men, and some, I suppose, as bad as you will find in any place; but everything is peaceable and quiet. I like them as a people better than any I have lived among heretofore, taking all things into consideration. They are a hard working industrious and obliging people, taking them as a whole. They are made up from all parts of the civilized world. There are at present five families from the Society Islands and one from the Sandwich Islands. In a year from this time the probability is there will be a hundred families from the Islands. A train of sixty wagons of emigrants arrived last week from Salt Lake, and they are continually going and coming. * * * * But I must draw to a close, When I begin a sheet I seldom stop short of six or eight pages. I know it is considered vulgar to write long letters, but it impossible for me to conform to fashion.

Yours as ever,

Chas. P. Hills.

Dr. C. F. Winslow.

San Jose Tribune.—No. 2 of this handsome semi-weekly has been laid upon our table. We are right glad to receive it, and consider it as an evidence that that there is a growing demand for this kind of intelligence—newspaper reading. People must read, if they would become intelligent, and they often catch up a paper when they have but a moment to spare—some article arrests their notice—this leads to further enquiry, and from this often a permanent love of study is the final result of a single newspaper paragraph. The Tribune is printed very handsomely, on new type, and published by Mr. Givens George. Our best wishes ever attend every vehicle of knowledge—therefore success to the Tribune, say we, most heartily.

Eggs and Poultry.

Few persons, wo apprehend, have any correct idea of the magnitude of trade, both at home and abroad, in poultry and eggs. Having recently had our attention directed to a work embodying some interesting statistics on the subject, we propose placing them before the reader. The amount of sales of poultry at the Quincy market, Boston, in the year 1848, was six hundred and seventy-four thousand four hundred and twenty-three dollars, while for the city of Boston, they exceeded four millions. The number of eggs sold in Quincy market was 1,129,735, tho price paid for them being about $203,352, or an average of 18 cts. per dozen. The sales in the whole city, it is supposed, fell little short of $1,000,000. The daily average consumption of eggs at three of the hotels, in that year, was 200.

The city of New York, however, it is estimated, expends a million and a half of dollars yearly, in the purchase of eggs. Probably the amount in 1853 was much larger, as the above estimate was made in 1848. One single dealer in Philadelphia sends to this city daily, one huudred barrels of this commodity.

Ireland and France are great egg-exporting countries. We have not the most recent statistics, but they are of sufficiently late date to approximate to the present condition of the trade. M'Culloch says that the amount paid yearly by England to Ireland for eggs and poultry is from £200,000 to £300,000. The yearly value of eggs alone exported from Ireland to Great Britain exceeds £100,000. Tho number is probably 70,000,000 or 80,000,000. The British census for 1841 gave an *ad valorem* estimate of the poultry stock in Ireland, in which each fowl was valued at only sixpence sterling. According to this estimate, it showed that in the province of Leinster the stock of poultry amounted to £56,243; in Connaught, to £35,216; in Munster, to £62,830, and in Ulster, to £47,883; making a total of £202,172. But even at the low average named, the amount probably much exceeds this, as the people supposed the inquiry was made to obtain the basis of some new tax, and reported the number as being less than it really was.

The number of boxes of eggs shipped by the city of Dubliu steam packet company's vessel to London during the year 1844-5 was 8,874. A box of the usual dimensions contains 13,000 eggs, but occasionally larger ones are used, capable of containing four times that uumber; so that about 24,565,500 are annually shipped from Dublin to London. To Liverpool, in the same year, in the samo company's vessels, were shipped 5,135 boxes containing 25,565 eggs; giving a total export from Dublin to two ports of England of 48,539,900, valued at £122,500. Since then, however, the trade has enormously increased.

In 1840 Great Britain imported from Franco and Belgium 96,000,000 of eggs, the duty upon which (one penny per dozen) amounted to £34-000. Nine-tenths of the foreign eggs imported into Great Britain are from France. The importation thence in 1842 was 89,548,741; in 1843, 70,415,831; and in 1844, 67,487,920. Tho yearly importation exceeds 80,000,000. The consumption of eggs in Paris is estimated at upwards of *one hundred millions* yearly. Supposing a fowl to produce one hundred and twenty eggs annually—which is perhaps a fair average—the reader may imagine the immense stock of poultry that must be kept in France. Any one who has travelled in that country is aware that they are reared in vast numbers, they being the most profitable stock on the many farms owned or tenauted by the French peasantry.

The late poultry shows have tended to awaken new interest iu the breeding and rearing of poultry by our own farmers, especially those whose land is situated near large cities, or where there are means of rapid transport to such cities. Though we are far from believing all the stories which interested parties, or amateur poultry keepers put forth, there can be no question that, with economical management, the poultry yard becomes a source of large profit, as it is of unabated interest. On this subject, however, others are far more competent to speak than we are. But we are glad when a new impulse is giving to the rearing of auy domestic stock, and though the present movement in that direction looks a little too much to extravagance in size, or peculiarity of breed, its more mature result will be beneficial to the farmer, and though him to tho consumer.—*N. Y. Commercial Advertiser.*

Yuba County.

This large and influential county has occupied a conspicuous place in the Agriculture of California in years past, and is destined to make herself distinguished, if wo judge rightly from her present position. Some of the finest grain fields of the State will be found in that county; and the Horticulturists are also taking high grounds. The immense melon grounds of Mr. Briggs, that of Mr ———, and the peach orchard and nursery of G. H. Beach, Esq., are evidences of great advance. One thing is now needed to secure the advantages at present attained, and to make still greater attainments, i. e., a County Organization, and the immediate measures set on foot to have a County Exhibition previous to the great State Fair in October next.

Where is our good friend Col. Rush, that warm friend of Agriculture; where is Judge Stinger and G. H. Beach, Esq., Mr Briggs, Chas. H. Lovejoy, and many others we could name. We earnestly hope they will attend.

We take the following interesting letter from the San Joaquin Republican:

Tejon Military Reserve,
Tulare County, July 1, 1854.

Dear Sir: Captain Howard and myself arrived here on the 20th June. Our march from the Merced to this place was rather slow, in consequence of being incumbered by a party of would be miners, of Stockton, on their way to the new El Dorado, on Kern river.

We met several parties returning from the new diggings, and the universal answer to our several questions was, "Oh, there is gold on Kern river, but not enough to pay me." I afterwards ascertained, on arriving at the river, that but a few of these persons had done anything; being mostly men of the stamp that will not work under any circumstances. Many of them never stuck a pick in the ground, not even dismounting from their half-starved, raw-boned old horses.

However, the reports as first circulated were highly colored. There are about twenty-five men working on the river at present, who intend working two and three cent dirt, until the river falls, when they expect to find richer deposits. Three cents to the pan is the most that has been found as yet, and there is only one party working dirt that rich—the others only two cent dirt. Th river is very high, and they expect to do better when the water subsides sufficiently to enable them to reach the rock. I think, however, that they will be disappointed in the water falling low enough for their purposes, as Kern river is known to remain high longer than any tributary of the San Joaquin. Its south fork, which heads in Walker's Pass, is fed by almost perpetual snows, and its north fork, which has its head among the highest peaks of the Sierra Nevada, is a roaring torrent the greater part of the year. So, to take all things into consideration, those persons who expect to find a fortune in a day, or dirt richer than three cents to the pan, had better stay at home.

Matters go on handsomely at the Indian Reservation. The harvest is all gathered, and the threshing machine is doing its work of separation. It is indeed a most lovely and interesting sight to observe parties of Indians in their various occupations, working with the utmost cheerfulness and alacrity; some driving four and six mule teams, some feeding the threshing machine, and others attending the large crops of corn, potatoes, and water-melons. The wheat crop is the best I have ever seen this year. A small portion of the yield has produced as much as *seventy bushels to the acre*, and the whole crop will average thirty-five bushels to the acre. The barley crop being sown late, is rather light, especially that part of it sown latest. The value of the present crop, according to Los Angeles prices, is estimated at from $300,000 to $400,000; it is certainly an enormous crop, considering the lateness of the season at which operations were commenced.

* * Tho Indians are arriving daily in small parties, and are immediately reported to Mr. Bishop the worthy superintendent of the farm, who is not long in finding them employment. A more happy set of beings it has never been my lot to see; and although each tribe speak a different dialect, such a thing as a fight or quarrel has never happened among them.

Captain Howard and myself intend starting, as soon as our horses are sufficiently rested, on a short tour of exploration to Owens Lake and the desert beyond the Sierra Nevada, and return through Walker's Pass. You may expect us in Stockton about the 1st of August.

Very respectfully, yours, &c.,
P. E. Connor.

To Jas. M. Seofield, Esq., Stockton.

Improvements in Farming.

Farmers are an "injured race" in more than one respect. They are sometimes called the mum profession, or those that have to get lawyers to make all their speeches, and sometimes the stand still profession, or those who make little or no progress in their art. These both are calumnies. We have elsewhere defended them against the first, and now have a word to say in reference to the second.

We deny that they are of that dull and stupid class, which have eyes but see not, and ears but hear not. They see and hear too much to believe all that is addressed to them by their volunteer overseers and self-created supervisors, and are very unwilling to risk what they have earned by hard labor, on the mere recommendation of those who claim a per centage for their instructions. And this is right. We love the staid character of many of our rural districts, who know of many of the modern *isms* only by report. They guard safely what they get, and they get what they can by those means which they consider reliable.

But have they not made great progress in their art? Unquestionably they have. And for our first witness on this point, we will call that old plough that we all remember in our grandfather's out-house, if not our father's, and which is, today, on exhibition in the north-east gallery of the Crystal Palace. Yet it stands 'mum" by the side of the modern plough, as it does in that gallery, and though it was the property of no less a man than Roger Sherman, of Connecticut, the defendant stands acquitted of the charge of "no progress." Then call up the cultivators, and hoes, and forks, the carts and wagons, the shellers and reapers, the threshers and cleaners, of recent times; those of times gone by are among the things most of them, not only that *are* not, but never were. It cannot be said of them even as was said of Troy, Troia fuit—and upon the defendant stands acquitted.

Nor is this all. In the saving of and in the preparation of barn-yard manure, there is a great improvement, enough to affect materially the value of the crops. New manures, before unused, are often and generally turned to account. Composts are prepared. Mineral manures are purchased; the phosphates, the super-phosphates, and the improved super-phosphates; the guanos of Peru and other countries, all are modern and even recent. It is not long since our farmers first heard the name of gypsum as a manure. Eighty years ago bones were not used as manure, and the super-phosphates were unknown till 1790.

We are inclined to believe that more progress has been made in these matters than we find in almost any other trade. For we have just begun to enumerate the improvements of the greatest value. Improved implements, as means, are important. But *improved crops* and improved stock are still of greater importance. And look at the varieties of pears and apples, and other fruits, on the tables at the shows of every county in the States. Berkshire rivals even Norfolk, and Western New York stands up unbashed before either, while Iowa, and other States far west, are already gaining ground upon the older sections of country. In a southern tour, within a few weeks, we were shown some apples that were raised in and brought from Iowa, as specimens, that could not be beaten by those on the tables of the Massachusetts Horticultural Society.

The sales of imported animals for the last few years in every section of country, are ample testimony as to the improvement of hogs, sheep, and cattle.

Notwithstanding all this, one of our *excessively* scientific journals declares that no trade or calling has made so little progress.

But still further improvements are made in the construction of their buildings, and in the increased comfort thereby secured. All such improvements, however, are but incidental. They grow out of a deep conviction that a farmer is some body, and can afford to have domestic enjoyment as well as others.—*Plough, Loom and Anvil.*

Starch Manufacture.

Mr. Edward Tucker Belfast, Ireland, has invented a process of manufacturing starch, from grain and potatoes, which appears valuable. It is substantially this: The reduced grain and potatoes is submitted to the usual process of fermentation, and is washed, so as to separate the bran, or refuse of the potato, from the rest of the materials forming the substance to be treated. The starching liquor is then run into a vat and allowed to remain for about thirty-six hours for precipitation. The supernatant liquor is then run off, or removed, and the precipitate is broken up. A solution of sulphate of soda or Glauber's salts in boiling water, is prepared, on the proportion of about 13 lbs. of salt to one ton of wheat or other grain under treatment; and after cooling this solution, it is poured into the precipitated starch, and the vat being filled up with water, the entire contents are thoroughly mixed, and intimately incorporated by stirring. The mass is then permitted to stand for twenty-four or thirty hours perfectly quiescent. In the subsequent process, technically known as the "fine shift," when the water and slimes are removed, another solution of the same salt is employed, but in much smaller proportions; about 3 lbs. weight only being applied to one ton of wheat. At this stage, in combination with the sulphate of soda, a portion of sulphuric acid is used, in the proportion of about one qnart of the acid to four tons of wheat. The acid, in a diluted state, is poured gradually into the vat, which is then nearly filled up with fresh water, and tho whole contents are thoroughly mixed by agitation. When the starch has been precipitated, it is finished, and prepared for sale, and used in the ordinary manner. The patentee remarks that he has found sulphate of magnesia, muriate of soda, and other salts and acids available for a similar purpose. This general process renders pure all water suitable for manufacturing starch, however hard and unsuitable it may have been originally. Tho pure starch is also better separated from the glutinous constituent of the grain, whilst the manufactured starch is superior in purity, sweetness, strength, fineness of texture, and whiteness, as compared with all starch made in the usual way, and tho yield is greatly increased.—*Plough, Loom & Anvil.*

Practical Hints about the Dairy.

We are now approaching a time when those who have a dairy, either large or small, should pride themselves in the production of the best butter and cheese that can be made. The first thing the farmer ought to attend is the food for the cows, otherwise the labors of the most careful dairy maid will be void. Many are tempted to produce quantity rather than quality; but those who are renowned for manufacturing a superior article are sure to find the best customers and the best customers and the best price in the market. Next to food for the cows comes cleanliness in the dairy. It is no uncommon thing to find that the possessors of large dairies are by no means celebrated for the best flavored butter; we frequently see them beaten by those with only two or three cows, where the produce is usually managed by the farmer's wife. Such persons are usually found to be scrupulously clean in everything pertaining to it. Once let it be known, and every neighbor becomes a customer, for they want good butter; to such the price is no object. It soon gets around that the cows are kept and that no unwashed hands are permitted to milk unwashed udders—that the pails are exposed to the air after being—that the dairy is clean and sweet and the butter is made by her own clean hands. What a recommendation is this to those whose stomachs are not prepared to take anything and everything that comes in their way, without regard to the mode of producing it. In extensive establishments the case is frequently very different. A certain number of hands have to milk a certain number of cows, and, so long as they bring in a fair quantity of milk, no questions are asked. In such places from one to two or more young dairymaids are kept at low wages. Their appearance in person and dress should be the perfection of neatness and cleanness, but too often the reverse is the case. And in this, as many other instances in the preparation of what we eat and drink, if we did but reflect on such things, we should feel but little pleasure in eating and drinking. Cleanliness in the dairy itself is of the highest importance. It should be used for nothing else—nothing calculated to taint the atmosphere should enter or be near it; yet how common it is to see it used as a larder because it is cool. Anything that is wanted to be kept as long as possible is thrust into the dairy. In many cases the scullery for washing up the utensils, with a heated copper of water, joins the dairy, and oftentimes the door between left open, admitting the steam from sour vessels. Most dairies have windows to admit the air; and so long as they are open, it suffices, without regard to the out-of-door temperature, or whether the wind blows from one quarter or another. Perhaps the window nearest the yard or piggery, tainted by the animals or sour wash or grains, is left open when the wind is in that direction, and carries with it all it can gather, to taint the dairy. No wonder that, under such circumstances, the produce is not good. Having had some experience in these matters, we do not hesitate to say that such things have a very bad effect upon the butter and cheese. Remove these evils, and let it be known; then raise your price, and your returns will be greater.—*Gardeners' Chronicle.*

Grafting Stone Fruit.

It is a mistaken idea that many entertain that there is difficulty attending grafting stone fruit. It may as safely and as surely be performed with the plum and cherry as with the apple and pear. A little more care may be necessary, from the fact that tho wood of these fruits does not split so easily; and a greater care becomes necessary, in consequence of the different arrangement of the bark, which, with the apple and pear, is easily cleft with the wood, while on trees producing stone fruit it runs around the stalk, rendering it liable to be irregularly torn, unless precautions are taken in cleaving to insert the graft.

Hence, we find it necessary to make a longitudinal slit in the bark with a very sharp knife, previous to cleaving the wood, which should also be done with a sharp knife. Sometimes, when the bark is very firm, and a dispositiou is shown in the cuticle to curl, I have found it necessary to secure it in its place by a bandage, and for this purpose have used an India-rubber ring, cut considerably smaller than the stalks, and drawn over it when rendered pliable by warming. This holds the bark in its place until it heals, when the bandage may be taken off.

Another cause of failure in grafting stone-fruit arises from the delay which attends the operation. To be successful, it should be done before the frost starts at all. We have performed the operation early in March—when it was so cold that we were obliged to have a pan of coals in order to heat the wax, to keep it pliable—with entire success. It may be performed from that time forward, but more care is necessary, and more doubtful success will attend if they live at all.

Grafting large trees may sometimes succeed very well; but as a general thing, we cannot recommend it. The better plan is to get the right kind of stocks, and graft near the ground, when the trees are no larger than a person's thumb. Then, if the scion is like to outgrow the stock, earth can be placed around it, to give strength, and, it may be, new scions to the roots.—*Correspondent Plough, Loom and Anvil.*

Potato Starch.—When we examined the immense crops of this vegetable that lay in heaps on the various farms at San Jose, in May last, we suggested (in No. 21 of the Farmer) to the growers the plan of manufacturing Potato Starch. We then believed it would be a profitable business, and that it could be made cheap and shipped to England for manufacturing purposes. We presume there are quantities of the old crop now in our valleys that could be used for this purpose, and should we have an excess of that vegetable this year, or of grain, we suggest the plan again, and refer to the article we publish to-day as a guide on the subject.

Artesian Wells.—We learn that A. D. Patterson, Esq., of Sacramento, has made arrangements for boring an artesian well at his house in the Town of Hock Farm on the American River. We are very confident that good success will attend the efforts to obtain water at that point, and hope to see the Sacramento Valley soon supplied with fountains, and a plentiful supply of water for domestic purposes, and a portion of the land now lying waste, made productive.

Weekly Summary of News.

UNITED STATES.

The Steamship Sonora, Capt. Whiting, arrived at her wharf on Saturday afternoon, bringing New York dates to June 20. The news is unimportant. Ole Bull and Mr. and Mrs. James Stark arrived on the Sonora....It was reported in New Orleans that the Gadsden treaty had not been accepted by Santa Anna, but returned to Washington, with some unknown amendments. ....A disastrous fire occurred at Worcester, Mass., on the 16th of June, destroying the principal manufactories of the city. The loss is estimated at nearly half a million dollars....The Providence Tribune says that three men have died in that city with cholera within a week. They were all of intemperate habits....The National Fire Insurance Company in New York have received, through the medium of a Roman Cathobe clergyman, the sum of two thousand two hundred and eighty-nine dollars, from some person unknown, who accuses himself of having defrauded the Company to that amount, and desires to make restitution....Locusts are beginning to appear in great numbers in and about Rockford, Illinois. In some gardens the ground is literally perforated in all directions with holes about half an inch in diameter and four inches deep, out of which they crawl in the form of a beetle, cast off their jackets, take wings and fly away.....All hopes of any tidings from the ill-fated steamer City of Glasgow are now given up. She was probably overwhelmed by the ice, and with her nearly four hundred passengers were lost.....The remains of the clipper White Squall which was nearly destroyed last December in the same conflagration which proved so disastrous to the clipper Great Republic, is to be built up into a three-masted schooner of about 600 tons....The steamer Queen of the West lately ran from Buffalo to Cleveland, 190 miles, in nine hours, being over twenty-one miles an hour....Matt. Ward has gone to the Arkansas Hot Spring. The only steamer he could find to carry him on the river was the R. J. Ward, partly owned by his father....The selection of John Mitchell, the Irishman, to deliver the address before the Literary Societies of Franklin College at the next annual commencement, has been made the subject of much comment among the Georgia papers.....In the recent Court Martial Major Wyse has been found guilty of a disobedience of orders in having refused to embark four companies of the regiment under his command on board the Falcon; but was acquitted of the charge of conduct unbecoming an officer and a gentlemen. The sentence of the court was dismission from the service, but the President has mitigated it to suspension from rank, pay and command for six months....Fifty-seven cases of cholera had occurred in New York the week previous to the sailing of the steamer....The discussion of the Pacific railroad bill has been postponed in the House of Representatives till December....The Know-Nothings had elected Judge Conrad Mayor of Philadelphia by a tremendous majority. He has 800 appointments to make, and stated that he would not place any naturalized citizen in office....The sixty-ninth anniversary of the battle of Bunker Hill was celebrated with the usual patriotism at Charlestown on the 17th ult....Beeham, the man who murdered Mr. and Mrs. Wickham on Long Island, had been arrested and confessed his crime. He says his object was to ravish the servant girl, but while he was killing the others, the girl escaped.

THE WAR.

We have no news of general operations in the Baltic. On the 28th Sir Charles Napier lay before Hangoe Point, and was preparing to bombard the fortress of Gustafsvern. This is the first of a series of fortresses which defend Cronstadt....The steamers Hecla and Arrogant had performed a dashing feat at Hangoe. They succeeded in cutting out a merchantman from under the guns of the strong fort of Eckness, amidst a thick exchange of compliments in the shape of shells, hot shot, grape, and Minnie rifle balls. Sir J. Graham, in Parliament, mentioned the circumstance as "one worthy the brightest annals of British naval warfare." On arriving at the harbor Capt. Hall, of the Hecla, landed with a party of marines and succeeded in carrying off a gun as a trophy. Then taking in tow the only merchantman that was afloat, he made his way back to the fleet. On receiving the news, the commander-in-chief hoisted the signal, "Well done Arrogant and Hecla!"....The Paris papers state the Russians have attacked Silistria with all the disposable forces they had. The attack was renewed four times by 90,000 Russians, and was four times repulsed by the Turks. Omar Pasha was preparing to go to the assistance of the place. The Russians, at the request of the Turks, had promised not to direct their fire upon the hospitals....Omar Pasha, Marshal St. Arnaud and Lord Raglan had held a conference, at which it is supposed the plans for the campaign have been decided on. Now that Austria and Prussia have taken their stand, the war will be actively prosecuted. The whole solicitude of the allies has been, until now, to secure the Austrian alliance. Nothing, however, has been left undone to act instantaneously and with the utmost vigor, the moment Austria came to a decision. This explains at once the inactivity displayed heretofore....There is no news from the allied fleet in the Black Sea.

GREAT BRITAIN.

The proceedings in Parliament are without any general interest....It is decided to appoint a special Minister at War, and the names of various statesmen are mentioned as eligible to the office, and foremost of all stands Lord Palmerston. The appointment would cause other changes in the Cabinet, of which the most popular would be the transfer of Lord John Russell to the Home Office, and Sir William Colesworth to the Colonial Department....A subscription amounting to nearly $300 had been raised among the working classes by the British admirers of Capt. Ingraham, for the purchase of a gold chronometer, as a testimonial for his conduct in the Koszta affair.

AUSTRIA.

From Vienna it is stated that on June 2d the Austrian summons to evacuate the Turkish territories would be sent to St. Petersburg. Letters from Belgrade and Widdin state that Austrian troops were continually coming down the Danube, in the direction of the Wallachian frontier. Considerable forces are now concentrated in Hungary and Transylvenia.

AUSTRALIA.

By the arrival of the steamer Golden Age at Panama, we have advices from Sydney to May 11, and from Melbourne to the 7th. ....The Melbourne Argus, of the 4th of May, says the yield of gold continues encouraging. The amount brought down by the government escort averages about 40,000 ounces a week. The price of gold is quoted at £3 19s. per ounce. The same paper says that the regular labor of the miners at the old sites has been greatly disturbed by rushes to newly-discovered spots, which take a certain time to exhibit results.....The population now approaches 260,000 thousand souls, but a census has just been taken which will shortly furnish accurate returns..... The Argus, speaking of the supply of food, says: From the facts before us, we are not inclined to think that there will be any material deficiency in importation. In 1853 the net import into the colony was about 30,000 tons, and at the end of the year it was estimated that about 7000 tons remained on hand. A large portion of this latter was sour, but was mixed with sweet flour and mostly consumed. The imports from Van Dieman's Land, in consequence of a bad crop, have ceased of late, and shippers from the United States have diminished their supply. But, on the other hand, we have received during the last quarter about three thousand tons from South America, and as prices have been remunerative, there is no doubt this rate of supply will be maintained. Large shipments are now also pouring in from South Australia, where the stocks are said to be large.

MEXICO.

The Mexican Consul at San Francisco has been recalled, and Mr. Barron appointed Vice-Consul....A statue is to be erected to Santa Anna as a token of gratitude from the people for his valiant behavior in the Acapulco expedition I t....Cotton has been cultivated to a considerable extent in the State of Chiapas the present season....General complaint is made in the papers of the bad tobacco used by the new monopolist, Sr. Escardon. The paper cigars are said to be so bad that their use creates epidemic diseases....The Indians are said to getting the worst of it in the war now raging in Yucatan....Several bodies of troops have been ordered from the interior to the city of Mexico.

OREGON.

The steamer Peytona, Capt. Sampson, arrived at this port on Tuesday, bringing Oregon papers to the 15th....The wheat crop is now being harvested, and promises abundantly, both in Oregon and Washington territory. The oats, potatoes, and other crops also look well....Several parties of immigrants, who had wintered at Salt Lake had arrived, but the main body will not arrive for some time yet. The Indians are quiet and grass is abundant along the route....According to the official returns there is a majority of 869 against forming a state government. ....A new Democratic paper called the Standard has been issued at Portland.

Effects of a Flood.—The Montgomery correspondent of the Charleston Courier says that during the late overflow of the Alabama river, the artasian well at Montgomery discharged more water per minute than at any other time. While the river was at its highest stage, a guage showed that the well discharged about three times the quantity it had uniformly given out up to the rise in the river, and but for the small circumference of the spout, it would probably have discharged even more. This increase of flow was first noted at the time of the great rise in the river, and it appeared to decrease with the falling of the water in the river bed, until, at this time, it is venting only its usual quantity previous to the rise. The well is about four hundred yards from the river, and its depth near seven hundred feet, so that its source must be two hundred feet beneath the bed of the river. The pressure of the water of the river upon the arch must have been very great to effect to such an extent a stream of water passing so many feet beneath its bed.

MARRIED.

On the 17th July, by Rev. C. E. Wyatt, D. D., Mr. Alfred A. Cohen and Miss Emilie, daughter of Dr. H. Gibbone, all of this city.

On the 12th July, in this city, by Rev. A. Williams, Mr. Robt. Beaching and Miss Julia Adams.

On the 16th July, by Rev. Bishop Kipp, Mr. N O. Arrington and Miss Maria L. Cook, second daughter of Capt. M. M. Cook, all of this city.

On the 12th July, in this city, by Rev. Mr. Taylor, Wm. Lyon and Eleanor M. Simmons.

On the 15th July, at the San Francisco Bible House, by Rev. Wm. C. Pond, Mr. Erastus Johnson, of Union City, and Miss Pamelia Silsbee, of this city.

On the 15th July, at the same place, by Rev. Frederick Buel, Mr. Daniel Farrington, of Benicia, and Miss Elizabeth Silsbee, of this city.

On the 13th July, in Coloma, by M. K. Shearer, Justice of the Peace, Mr. Jona S. Ellis and Miss Nancy Ann Ingersol.

On the 13th July, at Red Bluffs, by A. A. Mix, Esq., Mr. J. C. Underhill and Miss Angelina Acosta.

On the 10th July, by M. L. Ward, Esq., Mr. John Farley and Mrs. Mirnuda Daily, all of San Joaquin county.

On the 10th July, in Columbia, Col. T. N. Cazneau and Jane T. Matthews, both of Columbia.

DIED.

On the 12th July, in Sonora, Arthemus Winker Richardson, a native of Charleston, S. C., in the 34th year of his age.

On the 15th July, in Shasta, of apoplexy, Mrs. Bridget Jakey.

On the 11th July, in Shasta, after a protracted illness, Mrs. Ann Farley, formerly of St. Louis, aged 45.

On the 18th July, in this city, Henry Willers, aged about 70.

On the 18th July, at San Pablo, Margarette, wife of David Morgan, Jr., aged 30 years.

On the 13th July, at Park's Bar, on the 13th July, Mr. Hart, formerly of Cincinnati, Ohio.

On the 12th July, in this city, Mr. J. Edward Band, in the 30th year of his age.

On the 10th July, in Auburn, Jonas G. Salisbury, formerly of Vt., aged 40 years.

On the 13th July, in this city, Griscilda Petty, youngest of Wm. and Griscilda, E. Perry, aged one year and one month.

July 17—Stmr. Sonora, Whiting, Benicia.
July 18—Stmr Cortes, Cropper, Benicia; barks Mallory, Elliott, Prince Frederick Sound; E. Wright, Jr., Burgess, New York.

A Premium---Farmers' Clubs.

With the hope of inducing such of our friends, and those who have a little leisure, to ride among their neighbors and introduce an Agricultural Paper, we take pleasure in offering the CALIFORNIA FARMER: and, to make it an inducement, we say to such friends—if you will get us five subscribers, and remit the amount, we will send you six papers, or for ten subscribers, twelve papers. We trust there are many friends who will cheerfully take a little pains to aid us, and thus extend the circulation of the Farmer, and make a useful vehicle for the Agriculture of California.

MARKET REPORTS.

San Francisco, July 20, 1854.

It were in vain to say that a correct or reliable price current could be presented to the reader. Prices are made to suit the exigency—made to size the pile wanted. Almost any article can be replaced, so that what appears as speculative may be considered more as a fiacese card to "start a market," than any indication of a scarcity of the article or an increased demand. The fact is evident that there are too many sellers and too few buyers. We want a large population—more consumers—and until we have them, we need not expect a better state of trade.

Wheat will be abundant in spite of smut or any other contingency, save fire. New crop, extra, 2¾@3c. Barley comes in fine and heavy; price, 1¼c. Provisions a drug and falling. Lumber cheap and declining. The prices quoted for many articles are only nominal.

Card.

SPECIMEN GRAINS!

Desirous to advance the knowledge of our California Crops to the various Horticultural and Agricultural Societies of the various States and Europe, we invite all who are willing to aid us in this matter to forward us specimens of Grains and Grasses, of any and all kinds. Such shall be forwarded carefully, with credit to the growers. The names of the growers, and place where grown, will always accompany the packages.

Notice.

Lone Mountain Cemetery.—The Trustees and Proprietors take pleasure in announcing that the Cemetery is now open for the purpose to which it has been dedicated.

The following are the Prices of Lots:
FULL SIZE LOT—12 by 25—containing 300 superficial feet—$175.
HALF SIZE LOT—10 by 15—containing 150 superficial feet—$125.
QUARTER SIZE LOTS—8 by 10—containing 80 superficial feet—$80.
LOTS IN THE REAR of Main Avenues and on Paths are 20 per cent. less.
SINGLE INTERMENTS at prices according to the Location.

Rules and Regulations of the Cemetery.

TO SOCIETIES AND ASSOCIATIONS wishing larger Plats, a liberal discount will be made.

WARRANTEE DEEDS ARE GIVEN for all Lots purchased in the Cemetery.

The following extract from the Deed of Trust will explain the provision for the embellishment of the Grounds:

"*Sixty per cent. of the entire receipts shall be appropriated to the improvement and embellishment of the cemetery.*"

A faithful and trusty keeper of the Grounds will always be found in attendance.

THE ENTRANCE is temporarily from the Presidio, or Government Reserve.

N. B.—A RECEIVING VAULT is now completed and ready for use.

Applications for Interments must be made at the Office.

For further information inquire of either of the Proprietors, at MASONIC HALL, 112 Montgomery street. Office Hours, from 9 A. M. to 3 P. M.

WASHINGTON STEAM MILLS.

WASHINGTON FLOUR MILLS.

The undersigned proprietor of the Washington Flouring Mills take pleasure in offering to families and the trade, Superior Family Flour. To our Mills, we are happy to say to our friends, was awarded the Silver Medal; and we shall be always striving to maintain for it a high reputation, so that our customers can send to us in confidence, believing they will receive the highest character of Flour the market affords.

In the same establishment we have extensive STEAM SAW MILLS, capable of performing every kind of work that may be desired, and to this branch of our business we invite the attention of the public. We have also STEAM PLANING MILLS, that will finish all kinds of work in the most workman-like manner, and equal to anything performed in the country, and in the most prompt manner to order.

We invite all who are contracting work, to call on us and examine our Mills, and we can satisfy them of our ability to supply every order in each branch of our extensive establishment.

D. W. VANCOURT, Proprietor.
3 Near the Oriental.

Patent Planing Machine.

We invite all who feel interested in seeing the working of fine machinery, to call at our establishment and see the operation of Norcross' Patent Planing Machine.

Having purchased the patent right for this valuable improvement for the State of California, we are prepared to perform work in the very best manner, in any given quantity and in the shortest time. Builders wishing work done in quantities will do well to call and see our machinery.

D. W. VANCOURT.
3 Proprietor Washington Steam Mills.

Agricultural Implements and Hardware.

Fanning Mills; assorted sizes; Hay Presses;
Heavy Wagons, for two or four horses; Manure Fors;
Ox yokes and bows; Hoes and hoe handles;
One fancy butcher's cart and harness, (Kipp's);
Two sets silver mounted Express Harness;
Iron, tray, coal and canal barrows;
Coal scoop shovels, double stamped;
One second hand chain cable, 90 fathoms, 1¼ inch;
2 For sale by JAMES M. TAYLOR.

Horse Powers and Threshers.

Eight-horse power, with combined threshers, separators and cleaners;
Two-horse tread powers, with combined threshers, separators and cleaners;
Wilkinson's premium grain cradles;
Grant's five-fingered grain cradles;
McCormack's last improved reaper and mower, combined, with full set of extras;
Ketchum's reaper and mower;
Portable flour mills, and burr mill-stones of all sizes;
Bolting cloth, Anchor brand;
Iron wire-cloth, 36-inch wide, Nos. 2 to 10, suitable for threshing machines and milling purposes;
Brass wire-cloth, Nos. 16 to 60;
Rover steel plows, extra carbon;
Thermometer churns; fan mills; ox yokes and chains and all articles pertaining to Agriculture.

For sale at the Agricultural Warehouse,
85 Washington street, between Battery and Front, by
2 HENRY McNALLY.

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof!

MATERIALS FOR SALE!

The subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as "Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tightly*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.

All letters of inquiry, or orders for materials, must be directed to the subscriber, J. H. PURKITT,
2 Office 34 Battery street, near Pine, San Francisco.

Beef and Beef Tongues.

ART UNION.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Thereac!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, no

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder no INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the Board of all the Shares*, the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in proportion of Sixteen to each Article in the Catalogue.

The satisfaction here referred to by our [illegible] transactions—its long standing and reputation—are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same reference [illegible] this position will be strictly observed in case of [illegible] can possibly occur.

CERTIFICATES OF SHARES
ARE NOW READY AT
ONE DOLLAR EACH!

A Goon Excuse.—There is a society in existence, which, like many other associations of the kind, has a standing rule that those who come late or absent themselves, shall he fined a certain sum, unless they are able to give sufficient excuse for their tardiness or absence. On one occasion, a member came in after the hour, and the chairman asked him the reason for being late.

"Really, sir," said he, "I was not able to get here before. Domestic troubles, perplexities of mind—I cannot say which will die first, my wife or daughter."

"Ah!" said the chairman, expressing much commiseration for the father and husband, "I was not aware of that. Remit the fine, Mr. Secretary, the excuse is good."

The member consequently took his seat. The next morning another member met him, and with much feeling, asked him how his wife and daughter were.

"In excellent health," was the reply.

"Why, I thought you said last night you did not know which would die first."

"I did; and am still in a quandary. Time will decide the question."

When the French fleet was lying off Deal, thirty women of Boulogne, most of whom had husbands or relatives on board, resolved to pay the fleet a visit. Some of them went in the Folkstone steamer, but the greater part embarked for Deal direct in a couple of fishing boats. They were received with extraordinary honors by the fleet. Admiral Purseval Deschenes paid particular attention to one lady, whose husband he had known at Brest, and the officers of the Admiral's ship asked her to dine with them. She felt overwhelmed by this condescension, and begged not to be separated from her travelling companions. This modesty was appreciated. A separate table was laid with thirty covers was laid in the officers' cabin, and there the whole party were splendidly regaled, to their own and the spectators' great delight and astonishment.

A correspondent of the Louisville Democrat speaking of a history of the battle of Lundy's Lane, which appeared in the Louisville Journal, says:

"Mrs. Partington has made Ike read the whole history thirteen times. She has told a friend that she thought it, 'without conception the most extraordinary confusion of glowering ideals and sentinels that ever intermitted from the pen of Genesis. His imposition,' says she, 'is most superfluous. The deleterious sweetness of his constipations, the roundness of his paragulphs, the impertinence of the subject, and the judyish secretions of his expansions, are unequalled in the annuals of litterature.'"

A Fop.—The fop is a comple specimen of an outside philosopher. He is one-tbird collar, one-sixth patent leather, one-fourth walking-stick, and the rest kid gloves and hair. As to the remote ancestry there is some doubt, but it is now pretty well settled that he is the son of a tailor's goose. He becomes ecstatic at the smell of new cloth. He is somewhat nervous, and to dream of tailors' bills gives him the night-mare. By his hair one would judgs he had been dipped like Achilles; but it is evident that the goddess must have held him hy the head instead of by the heels. Nevertheless, such men are useful. If there were no tadpoles, tnere would be no frogs. They are not entirely to blame for being devoted to externals. Paste diamonds must have splendid setting to make them sell.

"My son, what did you bite your brother for? Now I shall have to whip you. Dont you remember the golden rule I taught you? If you would not like your brother to hite you, you sbould not bite him."

"Ho, mother, get out with your whipping, and remember the golden rule yourself. If you would not like me to lick you, taint right for you to lick me."

"Julius, why didn't you ohlong your stay at the Springs."

"Kase, Mr. Snow, dey charge too much."

"How so, Julius?"

"Wy, de landlord charged dis colored individual wid stealing de spoons."

A jailer had received strict orders not to keep any prisoners in solitary confinement. On one occasion, when he had but two in charge, one escaped, and he had to kick the other out of doors, in order to comply with the regulations.

The Boston Post is responsible for the following: Why are the theatrical nights of California likely to prove very dark ones? Because so many stars have gone out there!

If you wish to have your wood go a good way, just leave it out of doors at night. A neighbor says some of his went over half a milo in one night.

A country dentist offers to insert "natural artificial teeth." He's probably brother to the man who described the water of a pond as heing very wet.

A young man who has recently taken a wife, says he did not find it half so hard to get married as he did to get the furniture.

Dr. Franklin, in speaking of education, says: "If a man empties his purse into his head, no one can take it from him."

No man can avoid his own company—so he had best make it as good as possihle.

AGRICULTURAL, &c.

Reapers and Threshers.

PURCHASERS of Reapers and Treshers, or any Farming Machinery, can be directed in the purchase of them very greatly to their advantage, as we make it a point to be informed relative to these matters; and this will be a saving to purchasers. Persons at a distance can be supplied, and save the cost of coming to the city, by addressing us.

Directions for planting with the plants.
25 WARREN & SON, Farmer Office, Musical Hall.

Threshers, Separators and Cleaners.

PITT'S EIGHT HORSE POWER, complete, with extras.—This machine was made to be exhibited at the Baltimore and Richmond Agricultural Fairs, held respectively for Maryland and Virginia. It is superior in every respect to any of the sort ever shipped from New York to California, and is intrinsically worth nearly double that of any other machine. (Ex Golden Fleece.) In addition to the parts usually sent, there are six wheels—four for the separator, two for the power, &c.

Also, EMERY'S Threshers and Separators, of Two Horse Power.

We have also on the Golden Fleece, two of HALL'S (Rochester,) Latest Improved Thresbers, Separators and Cleaners, Eight Horse Powers, all complete.

Also, four of Hussey's Reapers and Mowers, all combined.
For sale by COIT & BEALS,
9 tf 94 Battery street, office up stairs.

Fruit and Ornamental Trees and Plants.

INCLUDING everything necessary to the Garden, Greenhouse, Nursery, and Orchard, with all the recent introductions, at very low rates. Descriptive price Catalogues gratis. Carriage paid to New York. Ornamental and other planting done in any part of the country. Address B. M. WATSON, Old Colony Nurseries, Plymouth, Mass.

Plants packed for California with extra care. 16 1y

HOTELS.

Murray's Fifty-cent Western House.

Corner of Second and D streets,.....Marysville.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with an entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known Union Hotel, situated on the Plaza, in this city.

Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.

The Bar will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.

Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.

The International is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main flour.
E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....Proprietor.

THE proprietor announces to the public that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Meluotte's) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.

The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the house. There are also Billiard Tables and Ten Pin Alleys connected with it.

For the accommodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake, and to prevent accidents they will be under the especial charge of an "old salt."

An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.

The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:

Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.

☞ Families called for in any part of the city.
25 LINESS AND CLARK.

Rassette House.

San Francisco,.....Cal.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.

Gentlemen can be accommodated with single rooms, or families with suites of rooms.

The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

St. Charles Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.
J. HARPER AND J. L. MERRITT.....Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.

Its close proximity to the steamboat landings renders this house very desirable for transient visiters, as also for people arriving in the State and those leaving for the older States.

☞ There will be a Night Watchman, and guest can procure rooms at all hours of the night.
24 HARPER & MERRITT, Proprietors.

American Hotel,

NAPA CITY,.....California.
L. A. & W. W. CHAPMAN, Proprietors.

BY WARREN & SON.
Office in Musical Hall Building, Bush street.
TERMS.—Eight dollars per annum, in advance; or delivered by carrier at one dollar per month.
A limited number of Advertisements inserted at fair rates.

TO A CHILD BLOWING BUBBLES.

BY ALARIC A. WATTS.

THRICE happy Babe! what radiant dreams are thine,
As thus thou bidd'st thine air born bubble soar;
Who would not Wisdom's choicest gifts resign
To be, like thee, a careless child, once more.

To share thy simple sports, and sinless glee;
Thy breathless wonder, thy unfeigned delight,
As, one by one, those sun-touched glories flee,
In swift succession, from thy straining sight!

To feel a power within himself to make,
Like thee, a rainbow wheresoe'er he goes;
To dream of sunshine, and like thee to wake
To brighter visions, from his charmed repose.

Who would not give his all of worldly lore,
The hard earned fruits of many a toil and care,
Might he but thus the faded past restore,
Thy guileless thoughts and blissful ignorance share.

Yet Life hath bubbles too, that soothe a while
The sterner dreams of man's maturer years;
Love—Friendship—Fortune—Fame—by turns beguile,
But melt, 'neath Truth's Ithuriel touch, to tears.

Thrice happy Child! a brighter lot is thine;
(What new illusion e'er can match the first?)
We mourn to see each cherished hope decline;
Thy mirth is loudest when thy bubbles burst.

THE DAISY.

Not worlds on worlds, in phalanx deep
Need we to prove a God is here—
The Daisy, fresh from Winter's sleep,
Tells of His hand in lines as clear.

For who but he who arched the skies,
And pours the day-spring's living flood
Wond'rous alike in all he tries,
Could rear the Daisy's purple bud?

Mould its green cup, its wiry stem,
Its fringed border nicely spin,
And cut the gold-embossed gem,
That, set in silver, gleams within?

And ling it unrestrained and free,
O'er hill and dale and desert sod,
That man, where'er he walks, may see
In every step the stamp of God.

[From the United States Magazine.]

Last Days at Mount Vernon.

THE only surviving member of Washington's family circle, during his last days at Mount Vernon, is the venerable George Washington Park Custis, a grandson of Mrs. Washington. He resides, and we believe has resided for forty years or more, at Arlington House, a stately looking mansion which overlooks the Potomac, directly opposite the city of Washington. It has long been known that Mr. Custis was writing "Recollections and Private Memoirs of the Life and Character of Washington," portions of which have, from time to time, been published. For many years past, on Washington's birthday, 22d of February, he has sent a chapter of these recollections to the National Intelligencer, for publication, as an appropriate remembrance of the day. He has now made his last contribution of this kind to the public press. Our readers, we are sure, will thank us for transferring this chapter to our columns, together with the note which accompanied it:

ARLINGTON HOUSE, Feb. 21, 1854.

MY DEAR SIRS: I enclose you a *Recollection* for the twenty-second, which I propose shall be the last published in the journals. I commend it to your excellent press, which has published for me so long, and so well, and to which I shall ever owe great obligation.

The story of the *Lost Letters of the Rawlins Book* I have put off to the last. It is a painful subject to me, but it was a bounden duty upon me, as Washington's biographer, and the last of his domestic family, to place this matter in the only light in which it can ever appear to the world. * * * * *

Faithfully yours, GEO. W. P. CUSTIS.

Messrs. Gales & Seaton.

On Washington's resignation of the Presidency in 1797 one of the first employments of his retirement as a private citizen, was to arrange certain letters and papers for posthumous publication. With this view, he wrote to General Spotswood in Virginia, to select a young man of respectable family and moral habits, and send him to Mount Vernon, where a large number of letters and papers would be prepared for that purpose.

Now these letters and papers were by no means of a general character, neither did they come within the range of Recollections of the Revolution or Constitutional Government; they were more especially *private*, and could with propriety be termed Passages, Personal and Explanatory, in the Life and Correspondence of George Washington.

General Spotswood selected a young man named Albin Rawlins, of a respectable family in the county of Caroline, and well qualified for the duty he was to perform. He soon after arrived at Mount Vernon, and entered upon his employment.

The letters were delivered to Rawlins by the Chief, in person, were carefully returned to him when copied, and others delivered out for copying. As the duties of the clerk lasted for a considerable time, very many of the most interesting and valuable letters Washington ever wrote or received, were copied into the *Rawlins Book*. While we repeat that these letters were not of an official character, we must observe that they were written to and received from some of the most illustrious public men who flourished in the age of Washington, and shed more light upon the true character of the men and things of that distinguished period, than any letters or papers that ever were written or published.

Washington postponed the arrangement for publication of his private memoirs to the last; all such matters lay dormant during the long and meritorious career of his public services. It only was when retired amid the shades of Mount Vernon that he thought of self, and determined that in his latter days nothing should be left undone to give to his country and the world a fair and just estimate of his life and actions.

A portion of the letters of the Rawlins Book were of a delicate character, seeing that they involved the reputation of the writers as consistent patriots and men of honor. *These letters are no where to be found.* But, although the veil of mystery has been drawn over the *lost letters of the Rawlins Book*, that time or circumstance can never remove, our readers may rest assured that there is not a line, nay, a word, in the lost letters that Washington wrote, that, were he living, he would wish to revoke or blot out, but would readily, fearlessly submit to the perusal of his countrymen and the world.

During the agitation of the public mind that grew out of the subject of those letters more than fifty years ago, it was contended that the rumors were groundless; that there were no such letters. Faithful to our purpose at the close of our labors, as at the commencement of our humble work, more than a quarter of a century ago, to give in the recollections and private memoirs of the Life and Character of the *Pater Patriæ* only of what we were, only of what we saw, and only of what we derived from the undoubted authority of others, we do not hesitate to declare, and from an authority that cannot be questioned, that there were such letters as those described as the *Lost Letters of the Rawlins Book*.

The ancient family vault having fallen into a state of decay, the Chief surveyed and marked out a spot for a family burial-place during the last days at Mount Vernon. The new situation is peculiarly unfavorable and ill-chosen, being a most uncomfortable location for either the living or the dead. The executors, conceiving themselves bound by the provisions of the will to erect a burial vault on the spot marked out, proceeded to do so to the best advantage; but all their endeavors, together with the labor of skilful mechanics, have resulted in the tomb of Washington being universally condemned as unfit for and unworthy of the purpose for which it was intended, while it serves as a matter of reproach, to the crowds of pilgrims who resort thither to pay their homage to the fame and memory of the Father of his Country.

It is certain that Washington never gave even a hint of his views or wishes in regard to the disposition of his remains. He no doubt believed that his ashes would be claimed as national property, and be entombed with national honors; hence his silence on the subject that has agitated the American public for more than half a century. On the decease of the Chief, the high authorities of the nation begged his remains for public interment at the seat of the National Government. They were granted by the venerable relict, conditioned that her own remains should be interred by the side of her husband in the national tomb. This memorable compact so solemn in itself, is still in full force and bearing on the nation, insomuch that no subsequent authority could alter or annul it.

On the fifth of this present, Colonel Monroe, who resided at the United States arsenal two miles or more to be found on the Eastern [illegible] of the Chief and his consort, agreeably to the arrangement of 17[illegible] to the day.

Surely, it cannot be denied that Mrs. Washington had the right, the only right, to the disposal of the remains of the Chief, and by virtue of this right she granted them to the prayer of the nation, as expressed by its highest authority.

On her death-bed, the venerable lady called the author of the *Recollections*, her grandson and executor, to her side, and said: "Remember, Washington, to have my remains placed in a leaden coffin, that they may be removed with those of the General, at the command of the Government."

And yet we hear of the right of a State! No one State can appropriate to itself that which belongs to the whole. Of the glorious Old Thirteen, little Delaware has as much right to the remains of the beloved Washington as either of her larger sisters; for though small in size, she was great in value in the "times that tried men's souls," and, in proportion to her resources, furnished as much courage, privation and blood to the combats of liberty, as those that were far larger than she. From Long Island to Eutaw, from the first to the last of the War of Independence, her banner was ever in the field, and ever floated 'mid the "bravest of the brave."

It is high time the subject of the remains, and the remains themselves, were at rest. Presuming that Government should purchase Mount Vernon, and determine that the ashes of the Chief should there find lasting repose, we would respectfully suggest that a sepulchre be erected on the site of the ancient family vault, a magnificient location, having an extensive view of the surrounding country, and of the noble Potomac that washes its base; the massive structure to be formed of white American marble, in blocks each of a ton weight, a dome of copper, surmounted by an eagle in bronze, a bronze door, and for inscription two words only, that will speak volumes to all time—*Pater Patriæ*. The key of the receptacle to be always in the custody of the President of the United States for the time being. This done, and if done, "'tis well it were done quickly," the tomb of Washington would cease to be a reproach among nations. The pilgrim from distant lands, as he journeys through a mighty empire with his heart filled with veneration of the fame and memory of America's illustrious son, when he arrives at the national sepulchre that casts its broad shadow over Potomac's wave, will become awed by the solemn grandeur of the spot. The American of generations yet to come, will behold, with filial reverence, the "time-honored receptacle that contains the ashes of the Father of his Country;" the enduring marble mellowed by age, the inscription freshly preserved in never-dying bronze; when, proud of such a monument erected by the piety of his ancestors, the future American may exclaim, in the words of the immortal bard,

"Such honors Ilion to her hero paid,
And peaceful sleeps the mighty Hector's shade."

Another object claimed the attention of the Chief during the last days at Mount Vernon—the comple survey and remodelling of his farms, with a view to their improvement. These surveys he made in person, the calculations and estimates drawn out by his own hand; and indeed it was a rare spectacle to behold this venerable man, who had attained the very topmost height of human greatness, carrying his own compass, the emblem of the employments of his early days.

His correspondence with Sir John Sinclair and other eminent characters in Europe, gave a great deal of information touching the improvements in agriculture and domestic economy in the Old World. This valuable information was carefully digested by the Farmer of Mount Vernon, with a view to its adaptation to the climate and resources of the United States. Nothing that tended to public benefit was too vast to be undertaken by this man of mighty labors. The whole of his public as well as private career was marked by usefulness. His aim was good to his country and mankind, and to effect this desirable end, untiring were his energies, and onward course, as a public benefactor.

Mount Vernon, in the olden time, was celebrated for the luxuries of the table. Its fields, the forest, and the river, each in their [illegible] seasons, furnished the most [illegible] for good living. [illegible] on the Potomac, to leeward [illegible] portico of the mansion house, [illegible] of Father Jack, the fisherman [illegible] Father Jack was an [illegible] years of age and, although [illegible] body by [illegible] possessed [illegible] of days [illegible] of Mount [illegible] was in [illegible] was [illegible] where [illegible] the leading quality of all his race—somnoleney. By looking through a spy-glass you would see the canoe fastened to a stake, with the old fisherman, bent nearly double, enjoying a nap, which was only disturbed by the hard jerking of the perch that became entangled by his hook.

But the slumbers of Father Jack were occasionally attended by some inconvenience. The domestic duties at Mount Vernon were governed by clock time. Now the cook required that the fish should be forthcoming at a certain period, so that they might be served smoking on the board precisely at three o'clock. He would repair to the river bank and make the accustomed signals; but, alas! there would be no response; the old fisherman was seen quietly reposing in his canoe, rocked by the gentle undulations of the stream, and dreaming, no doubt, of events "long time ago." The unfortunate *artiste* of the culinary department, grown furious by delay, would now rush down to the water's age, and, by dint of loud shouting, at length the canoe would be seen to turn its prow to the shore. Father Jack, indignant at its being even supposed he was asleep on his post, would rate those present on landing with, "What you all make such a debit of a noise for, hey? I wa'n't sleep, only noddin'."

Poor Father Jack! No more at early dawn will he be seen, as with withered arms he paddled his light canoe on the broad surface of the Potomac, to return with the finny spoils and boast of famous fish taken "on his own hook." His canoe has long since rotted on the shore, his paddle hangs idly in his cabin, his "occupation's gone," and Father Jack, the old fishermen of Mount Vernon, "sleeps that sleep that knows no waking."

A hunter, too, was attached to the household establishment. Tom Davis, and his great Newfoundland dog, Gunner, were as important characters in the department for furnishing game and wild fowl as Father Jack in that of fish. So vast were the numbers of the canvass-back duck on the Potomac, in ancient time, that a single discharge of Tom Davis' old British musket would procure as many of those delicious birds as would supply the larder for a week.

George Washington Lafayette, and his tutor and friend, M. Frestel, became members of the Mount Vernon family during the last days. These estimable Frenchmen, driven by persecution from their native country, found refuge in America.

While reasons of State prevented Washington, as President from receiving *emigres*, so soon as he became the private citizen, he warmly, joyfully welcomed to his heart and his home the son of his old companion-in-arms, bidding the young Lafayette consider George Washington as a friend and father. The French gentlemen, from their superior intelligence, together with their highly accomplished and amiable manners, endeared themselves to all who knew them during their sojourn in the United States. They remained members of the family of Mount Vernon until a change in European affairs enabled them to embark for their native land.

The sentinel placed on the watch-tower by fate to guard the destinies of Washington, might have cried all's well during the last days at Mount Vernon. All was well. All things glided gently and prosperously down the stream of time and all was progressive. Two blades of grass had been made to "grow where but one grew before," and a garden "bloomed where flowers had once grown wild."

The best charities of life were gathered around the *Pater Patriæ* in the Last days at Mount Vernon. The love and veneration of a whole people for his illustrious services; his generous and untiring labors in the cause of public utility; his kindly demeanor to his family circle, his friends, and numerous dependants; his courtly and cordial hospitality to his guests, many of them strangers from far distant lands, all [illegible] all of which sprung from the heart, were the ornament of his declining years, and gave [illegible] to the setting sun, and cast [illegible] the rest of his pilgrimage [illegible] [illegible] [illegible]

San Francisco. Thursday, July 27, 1854.

A Trip by Stage.

Reanen, havo you evor crossed tho ferry to Oakland? If not, try it; try it. You have no oxeuse ahout husiness now, every hody is prating ahout dull timos. and it is a good thing to get away from this croaking. Discard and steal off into the country whero the hirds sing, tho cattle low, the lambs frisk and frolic, and where golden grain fields tell the ahundance of the earth. Go to tho ferry and eall

"A boat, a boat to cross the ferry,
And row me over lo be merry."

Tho Contra Costa Ferry-hoats are in "apple pie order," comfortahlo, speedy, safe; and half an hour's steaming hrings you to Oakland. Here you should spend an hour. Go over in tho eight o'elock hoat—this gives you an hour and a-half—go out among these nohlo evergreen oaks that God planted, and ask yourself as you admire their heauty, why they were placed there. A voieo will answer you, "for a future eity equal to Brooklyn;" and as you admire, let a prayer go, up from your heart, saying "Woodman spare these trees;" and whenever your influenee is felt, lot thy voiee go forth. Oakland is destined to he a large and heautiful city: all it wants is tho right kind of a population. The soil should he hetter cultivated; the many fine residences seem neglected—weeds! weeds! ehoke up the doorways and yards around the houses. This should not he. A hettor eare should prevail in this lovely spot.

We know if our eitizens were aware how much pleasure they could derive from a few hours' respite aeross the Bay, they would enjoy it. The eity has excellent hotels for families to tarry a while, aud their prices are very reasonahle. If you have plenty of timo, step into the stage of the line that runs to the Mission, rido through the grain fields and see the abundanee of the harvest, and feel that however many ery of hard times, we shall havo bread onough, and to spare. Riding along a brief time, we reach the pretty spot selected for the eity of Clinton. The ruins of that fine hotel reminds us of the usual fate of first enterprisos—firo or flood usually lays its elaims to the first; and wo propheey that, Phœnix-like, thore shall arise from the ashes of the Clinton, a more splendid and eommodious edifiee than the original. Tho sito was a eommanding one, and its projectors should not he diseouragod hy this ealamity. Try it again, gentlemen.

The road along the routo to tho Mission is of the most interesting eharaeter; the towering range upon the opposite side of the bay, and that upon tho inner side; the broad prairie, dotted here and there with the heme of the farmer—all give evidence of a permanency that is cheering. The mansion house at tho landing, and tho group of stores, are the nucleus of a future city. A few miles further, and you reach the fine raneh of Senor Don Castro. You stop upon the eminenee ahove the residenee of this gentleman, at Hayward's find hotel. Here you have a beautiful prospeet of the whole valley around. Far as the eye can reaeh, for miles upon miles, extend the grain fields. It is now harvest time, portions in tho staek, others in hindiug, while the ponderous leveller of aeres (MeCormaek or Huzzey's reapors) are marching along the proud heads of the hending grain, howing hefore these majestic levellers. It is a glorious sight to witness these mighty weapons at harvest time; the contrast in tbe amount of lahor performed in a day and that of former years; the eontrast hetweeu a sickle and reaper—between one acre and twenty.

Don Castro's ranch is one of wide extent and beauty, as well as of great fertility. Here may be seen fields of corn in the greatest luxurianee and promise. Every speeies of garden produet that home requires is raised successfully at this fino ranch.

Hayward Hotel commands a fine few and is a pretty stopping place. Future years will find this also tbe centre of a thriving village. A few miles ride from this point, aeross the continuous fields of "hreadstuff," brings you to the Cove, or Uniou City. It is here the wheat and grain of thousands of aeros aro ehanged and formed into the superior flour known as "Horner's Premium Flour." Horner's Mills are amoug tho finest in the State, and turn out hundreds of barrels daily. One great advantage the farmers have now at Horner's Mills, there is no delay. When they bring their whent it is weighed and they receive their flour. The same team that hrings the wheat takes tho flour away. This is of great advantage to the farmer when "time is money."

But, reader, we will hreak off here, and next week give you more of our ride, and tell you of the ahundance of fruit now bending the trees at the Mission.

The Right Way to Build up California.

MACHINERY.

We are aro pleased to notiee the return of our friend from the States, D. W. Van Court, Esq., proprietor of the Washington Steam Mills. He comes to add to the industry of the country—and that is its wealth. Mr. V. C. has seeured the patent right of the eelehrated planing mill advertised in this issue. This valuahle machinery will give employment to hundreds in various portions of our State, as it is diffused, thus eneouraging labor. This what California wants—machinery to convert our forests into dwelling houses for those who shall eome; give them good dwelling houses at a moderate priee and the ahundanee of tho earth will feed them. We want more population as CONSUMERS—and our friend Van Court has done the State some serviee by introduein machinery of this kind; this will build *houses*, and his *steam mills* turu out the *flour* No. 1, to feed the people that shall live in them. Let all our eitizens who visit the old States take the same method as Mr. V. C., hy hringing back *improvements* and help to the State, instead of leaving tneir means there, or what is worse, IMPORTING that which WE CAN RAISE, or that WE DO NOT WANT, and we shall hear no more of HARD TIMES.

Level forests, and set the machinery to work—huild "homes,"—give employment to thousands in active industrious trades—*stop political financiering*, and work! work! work!—this will build up any country. Till tho earth better, make living eheaper, give aetivity to mechanies *in the country*—set mills nnd machinery at work—induee a demand for mechanies and manufaeturers—this will call to our shores a population that will soon inerease the demand for the surplus produee, and tho farming interest will feel the effeet like magie.

Wo want and must have *more population*, more *working men* and less drones in the hive, and we shall have more honey. Send tho drones away if they will not work—send them to Cuha—tho Islands—anywhere—get them out of the hive. Drones (politieians) eonsume, but never produee, and this always impoverishes a country.

YANKEE BLANE.—This splendid steamer lays at the wharf ready for inspection. She is indeed a nohle palaee-like steamer, and seems to say as she floats upon tho waters—try me! try me! Graeeful as a swan, stately as a queen, she rides the wave; moving with every surge as she lays in the dock at her moorings. Passengers are invited to examine this splendid craft. We would particularly note the complete ventilating system adopted upon her. Oh, what a luxury is *fresh air* upon a crowded ship. Like to fresh water to a parched tongue, so is fresh nir to tho wearied or sick passenger upon a long voyage; but sueh is the air of comfort, such the convenience upon this steamer, that wo do not fear the passengers would he either wearied or sick, and surely such a ship would never have a long passage. Nevertheless fresh air is good even on the short passagos required upon the Yankee Blade.

POSTMASTERS PAIN.—By the last steamers we notiee the fact that an inerease of thirty-three and one-third per et. has been allowed to postmasters for office duties and all extra ineurred, dating back to 1853. This is as it should be, for they deserve it. They have lahored hard for n mere pittnnee, sometimes for nothing, and then continually hlamed for irregularities in office, when if the truth was known, they did not have allowed them enough to pay the time required to open the hags. It was a starving business, and then if some poor hungry wight was hack in his aecounts, he was charged as n defaulter. There should he no temptation for a person holding office to be hehind hand. We go for *liberal pay to honest men*, and *death for stealing*.

FINE ARTS.—A large sale of pictures, some 400, consisting of paintings, steel engravings, mezzotint, &c., took plaee on Saturday last, at Messrs. Selover & Sinton's. A large company was in attendanee, and the entire lot was sold. Quite an interest was evineed for many pieees, nlthough the prices at which they were sold were low. The pictures were those from the gallery of the Messrs. Marvin & Hitehcock.

GOLDEN ERA.—This admirahly conducted paper deserves the success it is receiving. Its enlarged number of eorrespondents is indicative of increased usefulness. Tho last numher was most exeellent in its nppearance and matter, aud a credit to the proprietors. Our mining aud rural citizens will do well to take the Golden Era; it is offered reasonablo and worth twice its priee.

The Rights of Neutrals.

We commend a careful perusal of the eloquent speech of California's ahle representative on this question. M. L. Latham, Esq. We have only room for a portion, and that relates to our eharaeter, present condition, and present and future influenee, and is of unoment and importanee.

There are three great nations in the history of the world who. thus far, have had the greatest influence on the destiny of mankind. They are tho Romans, the English, and the Americans.

The third power which nppeared on this gloho, marking a distinet progress and filling the minds of men, from its infaney, with anxious hopes and expeetations, is the United States of America. Born at an advanced stage in tho history of tho world, and eoneeived of strong and healthy parents, our eonfederaey of States gave, even at its hirths, assurance of its future greatnoss. Like Hereules, we killed two serpents in our eradle, plaeed there hy the ignoranee of the world, not by the malice of a jealous goddess. We destroyed the worldly power of the estahlished ehureh hy hanishing it from the political arena, and reared in its place the temple of religious tolerance; and we expelled royalty as a useless and expensive political institution. But in assuming tho supreme direetion of our own affairs, we committed no injustiee to others. We did not infringe on the rights of the ehureh or the clergy, in religious matters; and in suppressing royalty, applied merely to our own use, what was already our own. With the Declaration of Independenee of the United States, a new great historical era was ushered into tho world, not only for individual freedom, hut for liheral political *association*, insuring and guarantying that freedom. It is the peculiar *mode* of associating men for the exereise of power which eonstitutes American freedom and signalizes its superiority over all other Governments; and the distribution of power, under this new association, formed by our nncestors on the ruhhish of the old association of church and State, marks as distinet a progress in the *art* of government as the Revolution itself manifested in men's ideas. True to the doctrine of the Revolution, that all Governments derive their just power from the eonsent of the governed, the framers of our Constitution had a care to interest all equally in its maintenanee, nnd to let all share proportionally in its power. Not only were the differont colonies who had achieved their independenee, united into a representative Confederaey, hut individually elevated into sovereign and independent States; delegating to the Federal Government no other powers than those named in the Constitution. While all share in the power of the Federal Government through their representatives in Congress, each has supreme control over the administration of its own affairs, and enjoys, within its own limits, the privileges and immunities of sovereignity. Herein consists the immeasurahle superiority of our Confederaey of States, over nny system of government as yet recorded in history, and its adaptation to indefinite expansion without loss of power. We have, in less than a century, tripled the nnmher of States composing our Federal Union, without suffering the least perturhation in our political system; and our population has increased from three to twenty-five millions, without complieating the system, or meeting with the least difficulty in the application of the principles which were laid down hy our forefathers with so much vigor and simplicity.

Nor is this all. We have, during that hrief period, received among us so large a portion of foreign immigrants that their number exceeds alone our whole population during the revolutionary war, and would in itself suffice to add a dozen States to our Confederaey. The monthly arrivals of immigrants from foreign countries average now fifty thousand for the single port of New York, and not less than a million in all the ports of tho United States *per annum*. All these men, and women, and children, or most of them, eome here with the crudest political and social notions, with habits and customs not unfrequently repugnant to our own, and speaking languages which, until they hecome familiar with our idiom, prevent them from communicating freely with our people. Yet in a few years we nbsorh this whole vast aeeretion to our strength. The immigrants have hecome assimilated with us in lahor and enterprise, in customs nnd manners, in thought and language, and in political ideas. What other people than our own, what other Government than ours, could thus invite all the political, social, and religious heretics of the world to come and sojourn among them, without fear of heing ultimately contaminated and overwhelmed? This powor of absorhing and assimilating foreign elements is the strongest proof of our historical mission; or, if gentlemen would rather have it, our "manifest destiny;" for it uffords the strongest evidence of the superior energy of our people, and the practical advantages of our political institutions. We absorb to elevate; we rule hy hestowing on the governed a share of political power. Sir, we are destined to expand by assimilation, and by elevating those who have been misgoverned and oppressed to the rank of freemen; and if we have the power to do that with millions of Europeans who flock to our shores; if our exampio is constantly working revolutions and changes in the politieal and social condition of the Old World, why should we not possess the same faculty here, when less powerful States, and more misgoverned people are eager to share the hlessings of our institutions nnd laws? Rome, and the people of Romnnic origin, French, Spaniards, Portuguese, have never colonized; they merely planted or transplanted power; tho people of England eultivated and improved, hut held, and still hold, their colonies in subjeetion; the Americans alone, for the first time in the history of the world, elevate and regenerate those over whom they extend their sway. We conquer that we may raise the eonquered to an equality with ourselves; we annex to assimilate others with us in a higher scale of humanity.

This country is destined to support a larger population than all Europe—a population of happy, thinking, self-relying men; not a mixture of heggars and princes. And it will, despite the hetorogeneous elements which contribute to it, be a population full of national, American sentiments, energetie, free, martial; whose friendship and good will ho an object of solieitude with the different nations of Europe. The present war in Europe will exeite n hitterness of feeling, and heget new national jealousies, which will continue long after the eonelusion of peaee, and be an effectual bar to all joint operations against our growing power. England, France, and Spain may yet sojourn in different parts of America. We are at home in it, and shall arrange our household as we please.

But while I have full faith in the mission of our country; while I have no apprehension of any successful interferenee of any European Power, or any eombination of them, in the affairs of this eontinent; while I believe, if I may indulge in the expression, in the invincibility of the United States, I yet wish that, in our conduet as a great nation, we avoid everything like provocation to the weaker Powers. Let our mission be accomplished hy as few eollisions with our neighbors as possible. Let the world he convineed of our mission as we are, and let the world see that that mission is eompatible with public justiee.

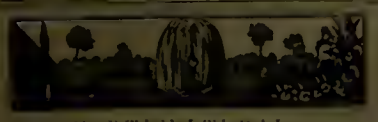
ADAMS & Co.—The new express and banking house of this eelebrated firm is rapidly assuming the appearance of being ready for occupation. The removal of Adams & Co. to the new hlock of Halleck, Peachy & Billings, will take plaee in a few days. Their new establishment will be one of the most complete in all its arrangements, in the country. Their hanking department will he separate and elegant; the Express department spacious, extensive and complete in every branch, as clock work—so perfect and convenient that they can do the business of the world; and they deserve a goodly share of it for their liherality in all that pertains to California.

UNION HOTEL.—The improvements that are making in the Union Hotel, opposite the plaza, will make it a very desirable house for those who wish a central place and magnificent apartments. We noticed the workmen preparing spacious suites of rooms, and learn it is the intention of the proprietor to have some of the finest apartments in the city, for private rooms for gentlemen or families. A restaurant of tho highest character will he attached to the Hotel, so that every wish of those who patronise the house will be promptly answered; and what T. K. Battelle promises he will do, is done—that's certain.

NEW MARKET HOUSE.—We took a stroll through this spacious building the present week. It will add much to the ease and comfort of our market traders, hoth buyers and sellers. Tho building has been erected in a substantial mannor and handsomely fitted up with fancy stalls for for the sale of meats, game, vegetables and products of the dairy; every portion is in good taste. The huilding is 120 feet long, 60 feet wide, and 26 feet high in the clear, oponing on Merchant street, and also on Washington. It is to be conneeted with the old U. S. Market by arehes through. It was huilt by H. F. Williams, Esq., and reflects credit upon tho builder as well as to our city.

WHEAT CROPS IN YNEKA.—The Herald states that the farmers in that vicinity are now in the midst of the grain harvest. The weather has been very warm, the mereury heing over 100 degrees in the shade. This hot weather is maturing the grain so fast that it will requiro considerahle energy and attention in order to save tho crops without sustaining loss. The farmers have run the gauntlet, owing to the great risk that has been attendant upon the present crop. The cost of the wheat farms this year, including the seed, sowing, feneing, the high prices of agricultural improvements generally required for farming, has heen to each individual equivalent to a nice little fortuna in the Atlantic States. The crops have turned out hetter than was expected in the early part of the season. Many of the fields that escaped the frosts will yield well. The heads are long and full, and the grains large. There has been discovered as yet hut little smut.

THE San Jos6 Telegraph of Thursday, says: Some one, with the diabolical design of destroying by fire Mr. John Cooney's grain, resorted to the following scheme. The villain got a piece of shingle, about six inches long, in the centre of which he fastened a small upright stick, about eight inches long, and on the top of the stick a sun glass was placed. So arranged, he put the instrument among the dry grass and grain. On Tuesday, in cutting the grain, the mowers struck the upright stick, and discovered that the shingle had ignited and was half consumed, and that the grass for a few feet around had been burnt, but had gone out. We saw the sun-glass, shingle and stick, yesterday, in the office of Justice Allen, who was about issuing a process for the arrest of a person suspected of this ingenious but cowardly and infernal crime.



HORTICULTURAL.

Premium Farms.

MOUNTAIN VIEW, Santa Clara County, July 17th, 1854.

DEAR SIR: "Oak Shade Farm," consisting of 200 acres, and situated six miles west of Santa Clara, on the San Francisco road, is hereby offered for the examination of the Committee appointed to award premiums for the "best farms in the State." Yours, LEONARD FROST.

To F. W. Macondray, Pres't, C. S. A. S.

THE large and fine farm of F. E. Kellogg, Esq., of Napa Valley, was submitted to the Committee, with others, the last week. Due notice will be taken of each and all.

THE MAGNOLIA.—This gorgeous tree has been bloomed in great perfection the present season, at the grounds of John A. Kennoh, Esq., at Newton, Mass. We learn that the following specimens were perfection in June: *Magnolia Soulangiana*, producing from 1,500 to 2,000 flowers; *Magnolia Conspicua*, producing about 3,000 flowers; *Macrophylla* has bloomed with mark for many years; *Cordata*, *longefolia* and other varieties have been grown perfectly.

When we remember that in Massachusetts the thermometer runs below zero, and these beautiful trees flourish in great perfection, we think that upon our prairie land they would become the more splendid. Nothing could exceed them in beauty or fragrance. Just imagine a tree 20 or 30 feet high, of the finest form, large glossy foliage, bearing fragrant blossoms, the size of a full goblet. Such are these noble trees the Magnolia. Will not our lovers of Flora take pains to cultivate them?

The Paulownia Imperialis.

THE Imperial Paulownia is one of the plants lately brought to Europe from Japan, by Dr. Von Sieboldt, the Belgian botanical traveler. In its native country its local name is *Kirri*; and the Chinese call it *Too-Hak-Too*. It forms a tree, in Japan, about 30 or 40 feet high, with a trunk two or three feet in diameter. The bark is smooth and light colored. The branches are rather few in number, spreading horizontally and forming a large head.

The striking peculiarity of the Paulownia, however, is its showy foliage. The leaves are of the shape of those of the Catalpa, but of darker green, perhaps resembling more closely those of a large sunflower—being broad and heart-shaped. In rich soil, the growth of the tree is extremely rapid—young plants making shoots of 8 or 10 feet in a season, and on such, we have measured leaves a foot and a half in diameter. But on older trees, they are usually about half that size.

The flowers are produced in April in panicles, at the ends of the branches. They resemble in general appearance those of the Catalpa, but the color is a pale bluish-violet. The seeds are borne in an oval capsule as large as a pigeon's egg.

When the Paulownia was first introduced into the Garden of Plants at Paris, it was treated as a delicate green-house plant. It was soon found, however, that it was perfectly hardy on the Continent and in England. In this country it appears equally so. The trees in this latitude have stood the past two winters, even in exposed situations, without covering, and have not lost an inch of the previous season's growth. We therefore consider it a hardier tree than the Catalpa, which often suffers badly from the cold of this latitude. Nothing is easier than the propagation of this tree. Single buds will grow, like those of the Mulberry and the Vine, taken off early in the spring and covered about an inch deep in the soil of a fresh hot-bed. The cuttings of the young shoots, planted under a hand-glass in a shady border, strike root readily. But by far the easiest and most rapid mode is that of planting pieces of the roots.

Every little piece of the root of the Paulownia will under certain conditions, produce a plant. It is only necessary to make a common hot-bed early in the spring, reduce the roots of the parent tree, (and it will bear a very severe reduction,) and plant every piece that will make a cutting not smaller than a goose-quill, and a couple of inches long. Plant these bits of roots about an inch and a-half deep in the rich, light soil of the hot bed. In a fortnight's time, every bit will throw up a bud, make new roots and become a distinct plant. When the plants are about three inches high, they may be transplanted into rows, beds, borders, or, in short, wherever they are finally to grow. If the season is favorable, they will grow to the height of from three to six feet before the close of the autumn. Next year, if the soil is deep, they will make shoots eight or ten feet long.—*Dom.*

Rich Silver Ware.

LOOK IN UP the superb collection of SILVER WARE, now opening at Messrs. SHREVES on Montgomery-st. This is probably one of the finest lots of rich silver ware yet imported into our city. These gentlemen have an extensive collection of new silver ware, in every department and worthy a particular attention.

LADIES' DEPARTMENT.

COURTESY.—The Philadelphia Inquirer, in a sensible homily on "Courtesy," has the following graceful sentiments: "The little compliments of life and society are more potent than most people are apt to imagine. We have more than once seen a smile of pleasure pass over a countenance that is ordinarily rugged and stern, at some kindly demonstration intended to convey good-will, and to manifest respect. And with the gentler sex such demonstrations are almost irresistible. Who has not seen some bright eye kindle, and some full cheek glow, at little attentions of this kind—attentions that cannot be paid too frequently, and that rarely fail to have some effect? A few years since, a gentlemen of a neighboring city became utterly devoted to a young and accomplished beauty, with whom he had been on terms of friendly intimacy from childhood. He, however, although highly educated, graceful and courteous, was remarkably homely. Fully aware of this, he supposed, and rightly, that the task of conquest would be one of great difficulty. But he was devoted to the fair object of his regard, and she, although she always respected and esteemed him, could not believe it possible for her ever to cherish a more tender emotion. Nevertheless, the suitor persevered. He did so, too, not rashly and impetuously, but by paying the most delicate attentions at all proper times and seasons, and by consulting her wishes, her tastes and her feelings, at every fitting opportunity. He was untiring and indefatigable; and although she was capricious, vain, and somewhat coquettish, she possessed a noble and generous heart, and one that was full of the warmest sympathies. Year after year passed by, and still the suitor persevered. Others stepped in, meanwhile, but they could not appreciate her butterfly character, and would not conciliate the many whims of the beauty and the belle, and hence they made but a momentary impression. Not so, however, the other. He had studied her nature thoroughly, and had discovered that he was gradually overcoming the prejudice that at first prevailed, and accomplishing the realization of his warmest hopes. At last, too, he was successful. He not only won the hand, but he secured the heart of the fair enchantress, and all, in a measure, by such delicate, kindly and complimentary attentions, as are at the command of almost any one who studies human nature, and has the patience to practice the philosophy of perseverance, of self-denial and of courtesy. And so in every condition of life. It is almost impossible for any one to think unkindly of another, who, on every occasion, exhibits the warmest regard, and seeks for opportunities to extend courtesy, manifest friendship, and indicate feeling. On the other hand, those who neglect the little compliments of life, who fancy that they may trample on this point of etiquette, and that feature of courtesy, that *their* business is to *receive*, and not to *extend*, favors—that they may be selfish and indifferent, and insulting, and all with impunity, will, in the end, discover that they have committed a fearful, an egregious mistake."

MUNIFICENCE OF A SINGLE LADY.—Miss Caroline Plummer died at Salem on the 14th ult., at the age of 74 years. She was a lady of fine talents and acquirements, numbering among her friends many of the most distinguished of her fellow citizens. She was for many years an inmate of the family of the late Dr. Bowditch. By a course of rigid economy and self-denial, she had accumulated a fortune of $100,000. By her will she bequeathed more to public uses than has ever been left by any resident in Salem, viz., the sum of $15,000 to Harvard College, to found "a professorship of the heart," i. e. for Moral Philosophy; the sum of $30,000 to the Salem Athenæum, and (after other private bequests) the residue of her estate, which will probably be about $30,000, to found a Farm School at Salem.—*N. E. Farmer.*

KEEPING QUINCES.—A new fact in domestic economy has been communicated to us, says the Boston Cultivator, by Mr. Shurtleff, of Chelsea. At the usual time of gathering quinces, they were put into barrels filled with water and placed in the cellar. A few days since they were opened, and the quinces found perfectly sound—not one having decayed in the least. We are indebted to Mrs. S. for a specimen of the fruit which has thus been kept through the winter, and has just been prepared with sugar in the usual way. It has the aroma, peculiar flavor, and all the qualities of a fresh quince. From Mrs. S.'s experiment, we should think this mode of keeping quinces an important desideratum.

CLEANING WALL PAPER.—Wall paper is the order of the day now, and all persons who find their paper dirty, would make a saving by cleaning it, instead of putting on new. The best process for doing this is to take about two quarts of wheat bran, tie it up in a bundle in coarse flannel, and rub it over the paper. It will cleanse the whole paper of all descriptions of dirt and spots better than any other means that can be used. Some use bread, but dry bran is better.

Native Birds.

WE publish a part of an able and interesting article upon Birds, from Hovey's Magazine, and commend it to the attention of our readers. We shall publish a continuance of it. We have with us many very beautiful birds, and those that are sweet songsters. Shall we not preserve them?

The presence of birds as companions of a country residence is considered by all a [illegible] consequence, second only to woods, flowers, green fields, and the general advantages of prospect. Without birds, the landscape, if not wanting in beauty, would lack something which is necessary to the happiness of all men who are elevated above a state of gross sensualism. It is indeed highly probable that nature owes more to the lively motions, songs and chattering of birds, for the influence of her charms, than to any other single accompaniment of terrestrial scenery. They are so intimately associated with all that is delightful in field and forrest, with our early walks in the morning, our rest at noondny, and our meditations at sunset, with the trees that spread their branches over our heads, and the vines and delicate mosses at our feet, that it is difficult to think of the one apart from the others. Through the voices of birds nature may be said to speak to us, and without them she would be but a dumb companion, whose beauty could hardly be felt.

It is customary, when speaking of the advantages of birds, to treat of them as they have relation to the agricultural interest. Admitting the value of almost every species as destroyers of insects, I am disposed to consider their importance in this respect as only secondary to that which regards their pleasant companionship with men. Hence it is a matter of no small consequence to use the best means that have been discovered, to preserve the birds from destruction, and to multiply them about our dwelling. Very little attention has been paid to this subject. A few laws have been made for their preservation; but these have seldom been enforced. Occasionally a paragraph in the newspapers has pleaded for their protection; but as yet no full and elaborate essay, devoted to this subject, has made its appearance. I believe the farmer would promote his own thrift by extending a watchful care over the lives of every species of birds; but the smaller tribes are considered the most useful. And it would seem as if nature had given them their beauty of plumage, and endowed them with song, on purpose to render them attractive, that man might thereby be induced to preserve a race of creatures so necessary to his pleasures, and so valuable to his interest.

There are two methods of preserving the birds: the first consists in omitting to destroy them; the second in promoting the growth of certain trees, shrubs and other plants on which they depend for shelter and subsistence. The birds, considered in relation to trees and shrubbery, may be divided into two classes. First, the familiar birds that live in our orchards and gardens, and increase in numbers in proportion as the woods are cleared, and the lands devoted to tillage. To this class belong several of our sparrows, the wren, the blue-bird, the American robin, the bobolink, the linnet, the yellow-bird, and some others. The second are the less familiar birds that frequent the woods and wild pastures, and which would probably be exterminated by reducing the whole forest to park or tillage. Among these may be named the little wood-sparrow, one of the sweetest of American songsters, nearly all the thrushes, the towee finch, and many of the *sylvias*, and woodpeckers.

To preserve the first of these species little is necessary to be done except to avoid destroying them: but to insure the multiplication of the second, we must study their haunts, the substances provided by nature for their food, the plants that afford them shelter, and to a certain extent labor to preserve all these for their use. The little brown sparrow is never heard in the heart of our villages, unless they are closely surrounded by woods. Yet this bird does not live in the woods. He frequents the pastures which are overgrown with wild shrubs, and their undergrowth of vines, mosses and ferns that unite them imperceptibly with the green sward by which they are surrounded. He is always found in the whortleberry pastures, and probably makes his repast on these simple fruits in their season. He builds his nest on the ground, in a mossy knoll, under the protection of a thicket. Every bird is more or less attached to a particular character of grounds and shrubbery; and if we destroy this character, we drive this particular species from our neighborhood, to seek in other places its natural habitats. Hence we may account for the comparative silence that pervades the grounds of some of our most admired country seats; for with respect to the wants of our most familiar birds, it is possible that cultivation may be carried too far.

Pacific Railroad.

THE following extracts from the able appeal made before the Senate by Senator Gwin, upon this great national work, we esteem worthy especial notice. Senator Gwin, in alluding to the great route proposed in England, from London to Calcutta, a distance of five thousand six hundred miles, requiring fourteen years for its construction, says:

Look at the measure before the Senate in contrast with what England has done to further her commercial interests, and will any one say that our government is not as capable of extending equal benefits to our people as Great Britain is to hers? The beauty and perfection of our institutions consist in their eminent capacity for good and its general diffusion; and, under enlightened popular control, this Government cannot long be misdirected, nor remain [illegible] or inactive when the public interest demands its interposition. No Senator can say that the measure is not one of the highest concern to our present interests and our future property, if [illegible] it is not indispensable to prevent sectional [illegible] most alarming. How the people of the United States [illegible] we [illegible] arms [illegible] denying them? Or shall sectional jealousy, that destructive canker of national happiness, be suffered to paralyze and destroy our energies and usefulness, or wire-drawn political theories of power defeat this important object?

There is a point of time in the dealings of men with each other, when "forbearance ceases to be a virtue." So with the public mind aroused on a question of momentous importance, when every public man is held to a just responsibility. Recognising that responsibility, how will we stand justified before our constituents, if, by failure now in the discharge of duty, we permit a continuance of the trade of the world through foreign channels, when it is in our power to bring it under the control of our own people, whose industry and enterprise have set afloat upon our waters and upon the ocean more than eighteen thousand vessels, with nearly half a million of tonnage.

We ask in the name of our trade, domestic and foreign, that a direct means of communication be given through our own territory. The *geographical* centre of the Republic is almost unoccupied and uncultivated for want of the road we now seek. Intersect it as speedily as you please by an indefinite number of highways when the public interest and business of the country require them, but give us NOW one railroad as a practical measure to begin with, and the settlement of the country will speedily be accomplished, the foundation laid for the building of many roads connecting this with all parts of the Union. For all postal, military and commercial purposes, the intervening territory between the Mississippi and the Pacific now presents an impassable barrier, forcing all our intercourse through foreign territory, and placing California at a distance of seven thousand miles from New York—the time occupied in making the transit being more than double that required for European communication; whilst Egypt and Turkey may be reached sooner than our Pacific possessions. There, too, we can go by an uninterrupted voyage under our own national flag. But in going to, or returning from the Pacific we are indebted to the courtesy of foreign powers for the privilege of a passage, unless we undertake the voyage by Cape Horn, which we might be fortunate enough to accomplish in between two and three months by steam, or from four to six months in the ordinary sail navigation. That such a state of things can long continue, either in peace or war, is impossible.

California now points you the way to the commerce of Asia, and to secure it, she asks a continental railroad, not only for her own use, but for the benefit of all, yet appealing to you in virtue of the high claims she has upon you. Already she has more than doubled your metallic capital, in pouring her golden treasures into the lap of the Union. Hold back for a single quarter of a year her returns to the Atlantic and Gulf of Mexico, and another commercial panic will involve you in speedy bankruptcy. Your stocks will fall; property will decline in value; banks perish; industry, agriculture, navigation and manufactures will be prostrated. Go where you will, and your money, coined from her gold, will be found in every dwelling, the lowly cabin as well as the lordly mansion, in all the States and Territories. Everywhere has it stimulated your industry, and given to labor increased employment and more ample reward. What has it done to the commerce of the country and your National Treasury? It has doubled your exports, and nearly tripled your receipts.

Look at results. Twenty-three millions of revenue from duties in 1845—nearly seventy millions from the same source in 1854. Who doubts that, with the enlarged commerce growing out of a more liberal policy, this incredible increase of revenue is mainly attributable to the yearly supply of California gold! No merchant, manufacturer, banker, or statesman of any party will controvert this. Your receipts from custom and the sale of your public lands are increased from this swell in the volume of currency. Forty millions in the aggregate increase of your annual revenues from lands and customs, are the consequence. Yet you hesitate about a reasonable appropriation—the effect of which will be to multiply a hundred fold your revenues and sources of wealth. Is this wise, just or expedient? California furnishes the element of national prosperity in peace, and the sinews of war; yet for the want of this road you keep her in distant and dangerous isolation.

The people from the Atlantic to the Pacific, from the Lakes and the St. Lawrence to the Gulf of Mexico, demand this measure. They look to Congress during this session to lay the foundation for its commencement. If we accomplish the object, it will be in vain for Great Britain, in her efforts to maintain commercial supremacy to carry out her scheme of a great continental railway from Halifax through British territory to the Pacific, now so warmly advocated by many of her statesmen and engineers, or to make her Asiatic railway from the Mediterranean by the Persian Gulf and Indus to the port [illegible] But if local jealousy or sectional [illegible] defeat our present action, we will [illegible] renewed vigor to the prosecution of [illegible] works, and now avail ourselves [illegible] her the [illegible] the world. It is a question between [illegible] New York, between [illegible] between England and America by [illegible] for the [illegible] assert to our [illegible]

TALL [illegible]

AGENTS FOR "THE CALIFORNIA FARMER."

Messrs Adams & Co. at all their offices throughout the United States or Europe.

Messrs. Wells, Fargo & Co., at their offices throughout the Country.

Mr. Wm. M Lested, Travelling Agent for Sacramento City and County

Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*

Messrs. Adams & Co.—*Humboldt Bay, Trinidad, Crescent City, Port Orford, Umpqua City, Scottsburg, and the entire northern coast.*

Messrs. Leland & McCoomoe—*Crescent City, Port Orford, Uniontown, Eureka, and Bucksport.*

San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.

Benicia, Martinez, &c.—Messrs. Stiles & Dodds.

Union City and Mission San Jose—Messrs. Howard & Chamberlain.

Bidwell's, Butte Co—P. Freer.

Columbia—A. Hunnewell, P. M.

Coloma—D. G. Wuldron & Co.

Mokelumne Hill—I. Coffin.

Marysville—R. A. Eddy & Co.

Mount Farm, O. T.—Gen. M. M. McCarver.

Napa—James & Co.

Napa City—Dudley & Co.; Hiram Downing.

Nevada—A. W. Potter.

New York City, N. Y.—J. M. Thorburn & Co.

Placerville—Nash & Davis.

Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.

San Luis Obispo—Dr. Thomas T. Harvey, P. M.

Stockton—C. O. Burton.

Sonora—Taney & Roberts.

Sonoma—Senor Pedro Valasquez.

Suisun—B. F. Finchley.

Union, Humboldt Bay—A. H. Murdoch, P. M.

Yreka—Cram, Rogers & Co; Parker & Roman.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, JULY 27, 1854.

California.

As the tones of some great bell come upon the ear, clear and loud, sounding above all the many that may be ringing out their call or alarm, so the name of "California" rings upon the great business marts of the world. It is the "Great Bell" whose notes awake to action, or whose voice souuds tbo alarm. It has come to thousands in tones clear and sweet as music's softest strain—and it has fallen upon the ear of many thousands like the mournful toll of the "Deathbell," and its echo is with them still. It has called into action thousands and tens of thousands, like the merry bell that calls to early labor—and it has been to many the evening knell, it bas laid them to rest forever.

There is no spot of oartb where civilization is known or where the products of the earth are changed, tbat the trado and influence of California is not felt; there is no port in tbe world where the "stars and stripes" are unfurled, tbat California is not known and represented. There is no "Exchange" where its *gold* is not the electric wire that moves tbe action tbere, as with lightning touch.

California! is the magic word. The price of breadstuff in the old States is almost as much affected by what Californuia does, and what California is, as by what the Czar of Russia or the Allied Powers may do. The value of tho shipping of the United States and the world is guaged by the population that rusbes to this El Dorado or is stayed in its progress. The mercantile, the commercial and the agricultural interests are swayed to and fro like tbe trees of a mighty forest before the gale; the past bas left many a sad mark of the hurricane blast, and the gale bas not yet abated.

California, is now like some great ship upon the stormy billow witb a precious cargo—treasures enough to enrich a world, if the ship rides out the storm; wide are the sympathies felt for her and great are the interests involved, her timbers are strong, her sails and rigging good; all now depends upon the crew. Rocks, quicksands, and shoals are about ber; upon tbose who bave the *helm* will rest tho responsibility of her safety; danger is immiment, action must be prompt. That crew is represented by the *mercantile, commercial, agricultural* and *mechanical* interests, and each have duties to perform. All these interests are affected by the monetary system, and the "gold of our country" is the *helm* that guides—when that is deranged the helm is disabled and the ship is unsafe, and when dangor is near, prompt action only can save ship and cargo. Let the crew be called and ready for action; let tbe officers be summoned for counsel; let it be to save ship and cargo, and not to *rule the ship*—then will tho treasures of tbat priceless cargo be saved to our people, and their value fall upon tho mercantile, commercial, agricultural and mechanical interests, like to the genial sunshine and early dew, to fertilize and invigorate, and the abundance of the earth shall bo for the blessing of the people.

We presume we are understood; if not, let us say what we believe: California, with all her gold mines, with all her commercial privileges, with all her agricultural wealth, can never be permanently prosperous without a good government, and when we soy a good government, wo mean a government for the *people, not for party*—we mean that kind of a government where the legislators shall feel tbey are tbe representatives of the people and their interests, and not of mere party—where representatives shall feel it a duty and a pleasnre to advance the best interests of the community thus represented, rather than be a mere hack or tool of party. We know no party or interest save that which shall tend te develope tbe resources of our country. We believe a great portion of our present trials and troubles has arisen from misgovernment in every department and we trust the "Alarm Bell" has sounded and the people see and know *our Ship of State* is in danger; we trust they appreciate the value of the cargo and are resolved to save it. We know that the danger is great, but when the people are called upon to battle for their "Firesides," their "Homesteads,"—all that is worth contending for—they *will come* to the rescue and the ship be saved. The people have suffered loug in California and the cry of distress has gone forth, but *politicians* heeded not, cared not. But the people will be heard and they will say—

"The *thousands* that last year ye scorned,
Are millions now; be warned! be warned!"

Insects.

In the very able Report of the Mass. Hort. Society, by a committee relative to the "scraping and washing of trees," we find the following number of insects that prey upon our fruit and ornamental trees. To a stranger this number may seem large, yet here in California we can add several more. This is the list referred to:

The Apple bas fourteen.		The Elm has	nine.
Pear	eight.	Oak	ten.
Cherry	six.	Linden	five.
Plum	four.	Ash	two.
Peach	three.	Maple	one.

These are all that bave been studied, and are the most injurious. The committee report adversely to the system of *scraping and washing trees*, of which we shall speak more fully hereafter

This efficient society has accomplished great results for the good of the Old Bay State, where Horticultuie and Agricultuie is now in advance of any other portion of the Union.

Wool Growing.—We have repeatedly asserted that California will become one of the wool-growing States. Everything favors it—climate, pasturage, season, rapid increase, and little caro or cost, all give the assurance of good success. Already the efforts have been particularly successful. The San Joaquin valley has already 150,000 sheep, and tbe number will soon be doubled by those on the way. Heavy lots of wool have been received in this city for shipment to the States; more than 200,000 lbs. have gone, and more will soon follow. Thero is no doubt but that in a little time California will take a prominent part in wool-growing, adding largely to the wealth of the State.

Domestic Industry of California.—We learn that at the famous ranch of C. J. Hutchinson, Esq., on the Putah Creek, one thousand pounds of butter are made monthly. D. W. C. Thompson, Esq., at Sonoma, sends down five hundred pounds monthly. There are many valuable dairies at Petaluma, Napa, Sonoma, Santa Clara, San Jose, and other places. The aggregate manufacture of butter and cheese would surprise any one; it is, however, of sufficient quantity to give assurance that we shall soon be independent of foreign importations.

Natural History.—Those who have a desire to see some of tho animals of California, and can find leisure to pass up the head of Commercial street, near Kearny, can see a "cougar," of the largest species. This animal is frequently taken for the lioness, but an observer can see the difference. Tho grizzlies are there, and a case of those amiable creatures called *rattlesnakes;* a catamount also. These were all obtained within a short distance of our city. The proprietor intends adding from time to time all the animals of California; we are glad to know this, for one of the very best collections could be made.

Strawberries.—The enormous quantity of 68,100 baskets of this most delicious and wholesome fruit, was carried on the Keyport steamer to New York in one day, selling at 5 cts. per basket; The price in Boston at the same time being four times as much.

The value of garden shrubbery, fruits trees, seeds, &c., imported into Boston the past spring, was $24,717.

It is said tbere is not a single Jew engaged in Agriculturo in the United States. All are engaged in trading.

The Grape Disease.

There has been much alarm in Europe relative to the disease which has made its appearance upon the Grape. In France, at the Island of Madeira, and at Oporto, entire vineyards have been destroyed, as is reported by the journals, and much pecuniary distress has resulted from it. Vine growers have been placed in the samo position respecting the Grape, as our cultivators have been in regard to the Potato—their entire crops have been lost. But with tho Vine the evil is vastly more serious; it is not for *one year* that the crop is lost, it has swept away vineyards of *years' standing*, and those that would take many years to replace; and another fear arises, which is, that the same disease may fix itself to the new vines.

Some months since we urged the attention of Vine growers to California. We believe our future will reveal to us a new era in tho Grape culture, and that our own State, so well adapted to the growth of this great staple, will be found to be one of tho finest spots of earth for it. We hope the information just received relative to a remedy found by the Commission appointed under the government of France, may be permanently successful. We give the report of the Commission, as it is communicated to the "Cincinnati Gazette."

When will *our* national and state governments take such steps to advance the interests of agriculture and horticulture?

"The Commission appointed by the Minister of Agriculture to repair to the department of Thomery, and to report, after a thorough examination, on the best remedy for the disease of the grapevine, which has caused such ravages in France recently, has made its report. The Commission reports decidedly in favor of the treatment of dry sulphur. At Thomery, where the treatment has been attended with complete success, the sulphur is applied indiscriminately to all the vines, whatever be their mode of culture, whether in rows, beds, or arranged for ornament. The sulphur, reduced into a fine and perfectly dry powder, is thrown on to the vines by means of tho *Soufflet Goutier*—a machine from which the powder is blown by the breath. Each application is made going and coming, in order that every surface of the plant shall be brought into contact with the sulphur; three applications aro made a year. The first application of the powder takes place after the shoots have attained a length of two or three inches; the second as soon as the vine was flowered, and the third before maturity, when the grape begins to turn. The morning and the evening are preferred for theso operations, by the people at Thomery; but the commission advances reasons for believing that the middle of the day would bo better. The results of this treatment last year, were all that could be desired, and no other will be resorted to for the present year."

Smut in Wheat.

We would urge upon all our "Wheat growers" to copy all the proposed *remedies* into a memorandum book, which every farmer should keep; and then, selecting those most judicious, *try them carefully*, and make the result known—thus benefitting themselves and others. If cultivators would keep sueb a journal, and make known well-attested experiments, great good would be conferred upon the country.

Remedy for Smut in Wheat.—Messrs. Editors: I see a writer in the Country Gentleman, asks for a preventive for smut or fungus in wheat. This, together with the frequent inquiries made by our northern friends in the wheat growing regions, induces me to give you one that is simple, cheap, and never failing. It is simply a soak, in water, in which blue vitriol has been dissolved, in the following proportions: For each four or five bushels wheat, dissolve 1 lb. blue vitriol in water sufficient to cover and properly soak tho wheat; let it remain in this soak 20 to 24 hours—sow immediately after taken out of the soak. Pursue this annually and properly, and my word for it you will never more hear complaint of smut in wheat, however badly the seed from which it was grown may have been mixed with smut. This is the discovery (at least in this State,) of an old and successful planter and wheat grower of this district; and has been tested many years, always successfully, by hundreds, yea thousands. Some say this soak also effectually eradicates chess, in a few years, but of this I am not fully satisfied. But when properly applied and used, that it is a sure and effectual remedy for smut, there is not the shadow of a doubt.

If new, or untried with you, get a single farmer to make the experiment. He, you, or the country, generally, will never regret it.—*N. Y. Country Gentleman.*

The Strawberry Bed.—Keep down all weeds in the Strawberry bed, cultivate and cut all runners. Let the vines rest, check their fruiting for a while. If you would have an abundant crop, keep off all runners—the vine will either make runners or fruit; it cannot do both well and continually. Water freely when the fruit is setting; water at night after the sun is down. Care and continual watching is needed to accomplish much. Lazy folks should not expect great crops. They don't deserve them.

Agricultural Qualities of Nebraska.

The Cleveland Herald contains an interesting letter from the Nebraska region, written by William Walker, an intelligent and worthy half-breed, and the chief of the Wyandot Indians, from which we make the following extract:

"As far as I have been able to make observation on cultivated lands, I have no hesitation in affirming that there can be no country found to surpass it in the production of corn, wheat and oats. Clover, I think, will not do well. The soil is too loose, and the clover freezes out in the winter, and what is left gets the finishing stroke during the autumnal droughts so common in this country. That this country is well adapted to fruit raising I can speak with confidence, as I have been doing something in that line myself, and take much interest in that department of horticulture. I think I never ate as luscious peaches in my life as my neighbors and I have raised. It is to be regretted, however, that in some seasons tho peach crop has met with total failure. But apples and other fruits seldom fail. On the alluvial lands we have pawpaws, &c., that can eclipse anything in the Western world.

With regard to mercantile and mechanical pursuits, it would be difficult at present to tell. This will depend upon the population in the various prominent points, and when the current of trado has settled down to the permanent maximum. The location of the Mississippi and Pacific Railroad through the central route will soon develop the business points. But upon the organization of the territory, and, moreover, upon the extinguishing of the title of the Shawnee and Delaware Indians to their lands upon the Kansas river, (as they own both sides) a great opening will here present itself to the enterprising and business men of all pursuits. It is navigable for 200 miles upon the "Republican Fork," except in a low state of water, which occurs generally in the fall. The country upon this stream is considered the best portions of the territory, the land generally being well adapted to agricultural purposes, and being well watered by streams emptying into tho Kansas River.

I have not travelled this portion of the Territory, and therefore state only what I derive from reliable authority. I have explored the southern portion, and cannot speak in rapturous terms of the country. It is not well watered, nor bas it as many privileges for machinery as in the northern part, nor is the soil as good, though a fine grazing country. The whole territory is a prairie, except upon the streams; and like most other western countries, has hills and dales, rivers and creeks, prairie and timber, rich and poor land. The upland lies high and rolling into beautiful waves. The timber in the country is red, white, black burr, and pine oak, shell and smooth bark hickory, coffee, bean, mulberry, ash, linden, &c., and in the bottom lands which are subject to inundation, nothing but cottonwood of the rankest and most rapid growth.

There can be no better country for raising livo stock. The water (from springs,) is generally hard, owing to tbe source being from beds of limestone. There are springs, however, that proceed from clay banks, and the water from these is invariably soft.

With regard to the climate, it is about tho same as in the northern part of Ohio, except the winters are not so long, and the summers are longer and warmer. As evidence of the latter, I may state that through the months of July and August, the mercury in tho shade is frequently up to 100 and 105 deg., and I recollect two or three instances of 110 deg.

In the winter, the weather is very irregular. In the winter months, tho mercury will sometimes stand at 55 deg of "Temperate," and in twelvo hours' time it will be 10 deg. below zero. The irregularity of the climate is by many attributed to our altitude above the Mississippi and proximity to the Rocky Mountains. But permit me to say at least one thing in praise of tho "Queen of the Prairies"—we have, both in winter and summer, the finest roads for wheel carriages on the continent of America. I do not say turnpike macadamized roads, but roads made by the plastic hand of Nature. In tbe winter, especially, it is glorious wheeling. Indeed good for any other mode of travelling.

One peculiarity I cannot pass without remark. The morning and evening twilight lasts about an hour longer than in Ohio."

The New York Horticultural Society, like the Crystal Palace, has been thoroughly resuscitated by Mr. Barnum, and people are crying out that Barnum's name will give success to any thing. This, however, is a great mistake. If Barnum would sit down and fold his arms, and merely wish for success, or beg assistance, his name would very soon lose its prestige. This talk about men's *names* doing this or that, is perfectly childish. Success, in everything, depends upon well laid plans carried out with boldness and energy. Barnum's programme for the re-opening of the Crystal Palace shows that he depends upon his name for nothing. Societies and institutions that are sighing for a Barnum to animate their lifeless bodies, would do well to observe his management.—*Horticulturist.*

Sheep for California.—The Nashville (Tenn.) Whig of May 26th, says a large drove of sheep, part of a flock of fourteen thousand, purchased for the California market, by E. H. Skeggs, of Memphis, passed through this city yesterday. We learn that Mr. S. has invested $60,000 in sheep in this State. This drove numbered twenty-two hundred.

Grasshoppers have appeared in immense swarms in Cumberland, Md., doing great damage.

Remedy for the Gapes in Fowls.

Messrs. Editors: I have had five or six broods of chickens hatched this spring, every one of which has died. When from two to three weeks old, they were taken with the *gapes*, and after a few days, despite change of food, and such other remedies as were recommended, they invariably expired. Pills of lard rolled in pepper, were confidently recommended, but they did no good. Black and red pepper were both tried. Indian meal mixed with onion water, was of no avail. Wet food, dry food, vegetable and animal food, did no good whatever. My neighbor that lives but a few hundred feet from me, is not troubled at all. Last evening I called upon a gentleman who is a very successful raiser of poultry, and communicated to him my sad experience, and desired to know the cause of the complaint. That, said he, is what I should like to know, but if you desire to know the remedy, come with me into the fowl yard and I will show you how to cure the disease. There I found he kept a clam-shell filled with spirits of turpentine, and a feather stripped of the barb. Catching a chicken which gave evidence of illness, while another person held it, he placed the fore finger of his left hand under the chick's bill or throat, which caused it to open its mouth, then caught and held the tongue (which was drawn well forward) by the thumb nail of the same (left) hand; then dipping the feather in the turpentine he thrust it down the chick's windpipe, giving it a twist; as soon as the feather was withdrawn, the chick coughed and threw up what looked like a string of clotted blood about an inch long and as thick as a darning needle. Upon examining it with a magnifying glass, the clotted mass was found to consist of several worms of an eel-like shape. The gentleman assured me that the presence of these worms in the windpipe was the cause of the gape, and his remedy was an effectual one. He says that the operation seldom required to be performed the second time on the same chick, and that he had acquired such skill in the performance of the operation that very rarely was a chick injured by it. In this case he was not more than half a minute and the bird ran off when freed, apparently uninjured.

To my mind it is proved that the death of my chickens was caused by these parasites, but the remedy in the hands of any but a skillful operator would be severe, if not barbarous, and this case forcibly illustrates the old saw, "an ounce of preventive is better than a pound of cure." Now can you or any of your readers tell how these parasites are produced, and what treatment is necessary to prevent their formation.. It is very clear that any medicine powerful enough to kill the worm in the windpipe, would kill the chicken first. Yours respectfully, Geo. W. Savage.

The insect alluded to above, was figured and accurately described by Mr. C. E. Morton, of Orange county, in The Cultivator for 1844, page 305. We copy Mr. Morton's remarks on preventing the disease:

"There is one fact connected with this disease—that it is only old hen-roosts that are subject to it; and I am of opinion that where it prevails, if the chicken houses and coops were kept clean and frequently whitewashed with thin whitewash, with plenty of salt or brine mixed with it, and those chickens that take the disease, operated on and cured, or if they should die, have them burned up or so destroyed that the eggs of the worms would not hatch out, that the disease would be eradicated.

I am also satisfied that the chicken has not the disease when first hatched; several broods that I carried and kept at a distance from the chicken house where the disease prevailed, were entirely exempt. And chickens hatched from my eggs where they had never been troubled with the disease, were perfectly free from it; and a neighbor of mine who built in the wood, half a mile from any dwelling, and has raised fowls for six or seven years past, and has frequently set my eggs, has never had the gapes among his chickens.

With my first broods of chickens, there was not one escaped the gapes. But all that have been hatched since I had the chicken-house and coops well whitewashed inside and out, with thin whitewash, with plenty of brine in it, and kept clean, have been exempt in the disease, with occasionally an exception of one or two chickens out of a brood.—*Country Gentleman.*

Leibig, the great German Chemist.—Mr. Kinney, the late U. S. Charge to Turin, thus speaks of this distinguished man:—

We have had recently an interesting visit from Prof. Leibig, the eminent German naturalist who fills the chemical chair in the University of Munich, and whose works on agricultural chemistry have placed his name among those of the benefactors who have taught mankind how to make two blades grow where but one grew before. He received every practicable attention from our savans and the public authorities. At Turin the patriot King did himself the honor to confer upon him the Cross of the Order of St. Maurice and Lazarus, which the Professor, in consideration of the delicate and respectful manner in which it was tendered, did not hesitate to accept: thus conferring upon the royal donor more than he gave—a title to notice in the memoirs of science. While here he expressed a desire to visit the United States, where he knew that his "labors were duly appreciated, at least by fellow-laborers." It is worthy of mention in this connection, that a chemical professor at Parma has recently succeeded in producing gas for illuminating from various kinds of wood, which is said to be cheaper and purer than any now in use.

Salt Your Stock.

Most persons, probably, are aware of the beneficial effect of salt upon the human system. By the ancients, salt was held in high estimation, and every one has doubtless noticed how extremely insipid meat and vegetables are when cooked without it, or with only an insufficient supply. Horses, cattle and sheep, in short all domestic animals, should be regularly supplied with it at all seasons. The liberal use of this mineral improves their condition and promotes their health, and when they have acquired the habit of partaking of it freely, there is no danger to be apprehended from their taking too much.

Salt promotes digestion, and destroys or dislodges worms, which at certain seasons effect a lodgment in the stomach and alimentary canal. We have, most of us, probably witnessed with what avidity wild, and undomesticated animals seek at certain times the creeks and estuaries which indent the shores of the ocean—the "salt lakes," and what long journeys, dangers and difficulties they voluntarily encounter to reach them. This is the result of pure instinct; it is not to be attributed to mere caprice, as some have imagined.

Horses, sheep, neat cattle and swine are all equally eager for this sanatory and invigorating substance, and cannot be maintained in a healthy and thriving condition without it. The former, it has been remarked, when liberally supplied with salt, are seldom afflicted by the "bots," or with that scarcely less to be dreaded disease, the cholic. In salting sheep, especially during the vernal months, when the green, succulent and highly fermentable matter of which they partake has a tendency to create stomachic deraugements, we have thought it advisable to have a shed erected, and fitted with a range of boxes, in which a supply of salt can be constantly kept, and to which the animals, at all times, can have free and unrestrained access. A mixture of one part salt to two or three parts of wood ashes, may also be deposited in some of the boxes. This mixture possesses highly sanitory properties, and should be provided for all animals, particularly when first sent to pasture. They soon acquire a relish for it, and partake of it with great avidity.

Salt is also a valuable article in compost. According to Cuthbert Johnson's statement, it is now extensively used for this purpose by the farmers of Great Britain, and has been found singularly beneficial, particularly on light soils. The "squash-vine destroyer," he says, is easily prevented from committing its depredations by the application of *brine*, which is also a preventive of *aphides*, or plant lice, which so frequently lay waste the turnip and cabbage yards. But it should here be observed, that the direct application of very strong brine will prove fatal to the plants, and that it should be used for this purpose only in a weak state. By pouring it round the roots, it will tend to dislodge worms and other insect depredators.—*New England Farmer.*

A Cheap Mode of Procuring a Valuable Bone Manure.—A writer in the Country Gentleman says, in reference to the cultivation of the potato, and successful attempts to prevent attacks of the rot: "We know a gentleman who for eight years has manured potatoes with bones fermented in ashes, has had good crops uniformly, and not one of them has rotted; but unfortunately for the conclusion to which he would have been glad to come, he has planted other potatoes, every one of these eight years, with all sorts of manures, and some of them without any, and neither of these rotted, except a very few where no manure was put. The bones in the case just alluded to, were treated thus: In a large family, consuming much butchers' meat, the bones were thrown into a hogshead from day to day; ashes as taken from the fires daily, were thrown upon them; enough water to keep the whole moist and to prevent the gases escaping, was added from time to time, the rain falling generally being sufficient, as the hogshead was placed in the open air, away from all buildings. When one hogshead was full, another was taken. The bones treated in this way retained their form and size, but became so soft as to be easily cut through with the shovel and rubbed down with the back of the shovel into powder, with some extra ashes or dry earth. The oily matter of the bones, together with the potash of the ashes and the water thrown on, becomes a saponaceous mass, and the phosphate of lime in the hardest part of the bones is diffused through the soapy mass in a state of exceedingly fine division. Bones thus fermented in ashes are exceedingly valuable for potatoes and for Indian corn, and probably for all crops. There is reason, from actual trial, to believe that the effect on the land is permanent, lasting for several years."

The Poor Laborer.—I will show you a man worn, spent; the bony outline of a human thing, with toil and want cut, as with an iron tool, upon him; a man, to whom the common pleasures of this, our mortal heritage, are as unknown as the joys of paradise. This man toils and starves, and starves and toils; even as the market vary. Well, he keeps a heart sound as the oak in his bosom. In the sanctity of his soul he bestows the kiss of peace upon a grudging world; he compels the homage of respect, and champions himself against the hardness of fortune. In his wretched homestead he is throned in the majesty of the affections. His suffering, patient, loving, wife—his pale-faced, ill-clad children—are his queen and subjects. He is a king in heart, subduing and ruling the iron hours; unseen spirits of love and [illegible] anoint him; and sir, (and the limit in a solemn voice,) as surely as the kingdom of God is more than a fairy tale, as surely do God's angels sing that poor man's jubilee.—*Household.*

Weeds! Weeds!!—We often observe, in passing through the country, the pastures of poor farmers crowded with armies—not of Turks and Russians—but of mullcins, horse-thistles, and other invaders, which not only devour the strength of the land and pay nothing in return, but continually say, like impertinent tell-tales, to every passing traveler, in the language of a celebrated writer—"Behold the field of the slothful, and the field of the man void of understanding! For lo, it is all grown over with burdocks, and Johnswort has covered the face thereof."

We take it for granted that no reader of this journal ever voluntarily allows weeds to grow on his premises, but some, however, obtain stealthy possession—and if some of our good friends of this class would go over their grounds, make a careful observation, and estimate the amount of vegetable growth thus feeding on the strength of their soil, which might as well be wheat, corn and rutabagas, they would certainly be surprised at the amount. It would be a curious question in philosophy, why so many will thus allow a yearly waste from weeds of some fifty or a hundred dollars, with all quietness and submission, who would be ready in a moment to bring an action at law against a neighbor, whose cattle and swine should devour a fifth part of that quantity. If we could only have all the value of the riches of the country at large thus wasted, placed in our hands for endowing agricultural schools, there would be no necessity whatever of applying to national and state legislatures for help.

Now is the very point of time for thinking this matter over, with a determination to act efficiently in the premises; and if any one is too busy or "drove" to attend to it, he has certainly either undertaken the care of too much land, or else is pursuing a system which may emphatically be compared to "saving at the tap and wasting at the bung." No one is ever too busy to turn his neighbor's cattle out of his cornfield—and he ought to pursue the same system towards other intruders. We have known farms to be affected in market value from five to ten dollars per acre, by being kept neat and clean in one instance, and foul, weedy, and repulsive, in the other.—*N. Y. Country Gentleman.*

Inquiries for Farmers.—Permit me through the medium of your valuable publication, to make one or two inquiries. I hope they will be answered by practical farmers:

The best mode of cultivating wheat when sown in drills? The best implement, or implements, in use for cultivating wheat sown in drills? The best machine for drilling wheat? Together with any remarks of practical utility on this subject, that may suggest themselves to the mind of the writer.

I have never seen wheat sown any other way than broadcast, and I doubt if a dozen farmers in the country have seen it drilled. Most of our farms lie in the prairies; consequently, we have neither roots, stumps, nor stones to interfere with the use of the best agricultural implements. Our prairies, in a state of nature, are covered with a thick coat of sedge grass. To draw a fifteen-inch plough in it, requires a team of six or seven yoke of oxen. After the sod has been turned, it lies several months, before the grass-roots rot sufficiently to admit tillage. It is then generally "cross-broken," with a yoke of oxen, or pair of horses, harrowed, or brushed, and either sown in wheat or planted in corn. It pays better to sow it in wheat the first year. Our average crop of corn is about thirty bushels per acre. Of wheat, the average, according to the present mode of cultivation, will not exceed twelve bushels. But I am saying more than I designed.—*Corres. Plough, Loom and Anvil.*

Coffee is dethroned.—Asparagus is waxing potent enough to threaten an usurpation of breakfast-dom. Hear what experimental philosophy pronounces on the coming revolution:

Liebig, the illustrious German chemist, says that asparagus contains, in common with tea and coffee, a principle which he calls taurine, and which he considers essential to the health of those who do not take strong exercise. Taking the hint from Liebig, a writer in the London Gardeners' Chronicle was led to test asparagus as a substitute for coffee. He says: "The young shoots I first prepared were not agreeable, having an alkaline taste. I then tried the ripe seeds; these roasted and ground make a good-flavored coffee, not easily distinguished from fine Mocha. The seeds are easily freed from the berries by drying them in a cool oven and then rubbing them on a sieve." In good soils, asparagus yields seeds abundantly; and if they are charged with taurine, and identical with the seeds of the coffee-plant, asparagus coffee may be grown in these United States at less than half the cost per pound of the article now imported.

Charcoal.—The preservative qualities of charcoal are not so generally known as they should be, and I hope you will tell your readers that if they will imbed their smoked beef and pork in pulverized charcoal, they may keep it as long as they please, without regard to weather. Tell them also, that if they will take about a pint of charcoal, also pulverized, and put it into a bag, then put it into a barrel of new cider it can never ferment, will never contain any toxicating quality, and become more and more valuable the longer it is kept. Further, take a piece of charcoal of a surface equal to a [illegible] wrap it in a clean cotton cloth two thicknesses and work about one pound of butter with it, [illegible] rancid, and it will restore it perfectly.—*Michigan Farmer.*

Pompeii.—Wonderful is the perfection of art here exhibited; amazing must have been the wealth of a city adorned with such temples, theatres, and other public edifices as yet are to be found in their old places and proportions, along those silent streets; vast, too, was the wealth of private citizens who lived in those houses, having walls adorned by frescoes, courts surrounded by marble pillars, and beautified with marble vases and fountains. In the garden of one of these houses recently exhumed, the statuary has been left precisely as found—pretty groups surround the fountain, whose pipes can be distinctly traced from the reservoir above.

There is nothing new under the sun—not even our patent methods of heating houses. This was done at Pompeii by means of flues of tiling carried around the rooms inside the walls, and having apertures for the escape of heat from the furnace. We don't know so much, after all, in the nineteenth century. Take away the gospel and we know, in comparison with those ancient lords, little of the arts and elegancies of life.

The streets of Pompeii are rectangular. The houses are much better built than those of New York. The cement made two thousand years ago is like rock to-day. How strange the preservation of these walls, in ashes to be sure, but in themselves proof against decay. How perfect the mouldings! How distinct and delicate the paintings on the ceilings! how admirable the arrangement of the houses and gardens! The gloom of Pompeii is the more oppressive for the sunlight that shines upon its desolation.—*Rev. Mr. Thomson.*

Perpetual Thirst.—Some years ago we gave a detailed account of the condition and appearance of a man who was then supposed to be the greatest drinker among men in America, if not on the globe. He is yet living in excellent health, at the age of 58 years, and still remains in a state of perfect thirst. The individual alluded to, is Mr. James Webb, of Fairhaven, Mass. Under every aspect in which the case may be examined, it is remarkable, and perhaps unparalleled in the annals of philosophy. In early infancy, the quantity of water he consumed was so large as to astonish those who witnessed it. A development in size and weight of the body required a corresponding increase in the quantity of his aquatic potations. Under ordinary circumstances three gallons of water is rather a short daily allowance for him, and it would be impossible, it seems, for him to live through a night with less than a pailful. With this immense amount of cold water daily poured into the stomach, Mr. Webb has been in good health and spirits. We leave the statements of these curious facts unembarrassed by comment, and simply ask of learned editorial friends the probable cause of this unsatisfied thirst.—*Boston Med. and Sur. Journal.*

Buggy Peas.—In this and many other sections of the State, we are troubled with buggy peas. A few years ago I sowed a field of peas, in part with seed of the previous year, and in part with seed of two years old. They were of the same kind, and sown the same day, and along side of each other. The product of the new peas was very buggy, while in that from the old seed, I scarcely found a bug. The next year, I had no old seed, and used seed of the previous year. The result was, a crop of buggy peas. I kept some of the same seed over the second winter, and sowed it the third year. The result a good crop, almost entirely free from bugs, while fresh seed the same season, produced very buggy peas as before.—*O. F. Marshal, in Country Gentleman.*

"Go to the ant, thou sluggard!
Consider her ways and be wise."

Raising Ants for their Eggs.—Mlle. Rose, a raiser of ants near Paris, earns thirty francs a day. She has correspondents in all the departments, and never receives less than ten bags a day. She makes them lay when she likes, and can get from them, as she says, ten times what they would produce in a state of nature. She sells the eggs to the Garden of Plants, as food for certain species of birds; to the pheasant-raisers of the environs; and to apothecaries for sundry medicinal purposes. Mlle. Rose lives and sleeps in the midst of her insects, and the skin of her whole body has grown insensible to their bites. She is as callous all over as though she were a universal corn. The police lately made her remove from Paris to an isolated house beyond the barriers.

Fine Potatoes.—Messrs. Sim & Co., produce merchants, kindly sent us a bag of very superior potatoes, that were raised upon the ranches of Messrs. Hance & Polley, and W. H. Walker, Esq. They were raised from new seed, and those planted late now are the finest that have been shown this year, weighing from 1 to 1 1-2 lb. They are worth seeing, and are at our office, Bush street.

The United States Agricultural Society is to hold its first Cattle Convention at [illegible], Ohio, on the 25th, 26th and 27th days of [illegible] next, on which occasion, premiums to the amount of $500 are to be distributed for the best [illegible] of the various breeds of cattle [illegible] competition without pecuniary [illegible].

To Kindle a Fire.—[illegible] a piece in the morning, take a piece [illegible] an ounce ball, [illegible] paper and put the [illegible] it's worth a week's [illegible].

Summary of News.

FROM OREGON.

By the arrival of the Columbia on Tuesday, we have news from Oregon till the 22d, one week later. The Oregonian has the following:

The weather has been very warm. The Farmers are now engaged in their harvests. The wheat crops were never better.

There appears to be an unusual excitement among the people in relation to the gold mines. Many have left, and others are leaving daily for the newly discovered mines.

A report reached here by the steamer Lot Whitcomb, that gold had been discovered near Shoalwater Bay, and that the citizens had all abandoned their vocations and gone to digging.

The Salem Statesman says: Mr. J. Force has brought to our table English gooseberries of his own cultivation, measuring an inch and a quarter in diameter, free from spines and of the finest flavor. Wild gooseberries are now found in abundance among the hills and in the lowlands. Raspberries and low bush blackberries also abound at this season of the year.

The Standard states that the crops along the Columbia river are very promising. There has been an unusual quantity of wheat sown this year on the bottoms, and the June rise of the water has not injured it. The corn is not quite so good as last year, owing to the cold. Oats and barley are first rate. Potatoes and onions promise more than an average yield.

The Times learns that valuable mines have been recently discovered on the Cathlepoodle river, some thirty or forty miles above its mouth. Large quantities of gold, silver, and rich iron ore have been found on this river. The Cathlepoodle takes its rise at Mount St. Helens, and empties into the Columbia at the lower end of Sauvie's Island.

FROM THE SOUTH.

The steamer Southerner arrived here on Monday, bringing Los Angeles papers to the 20th inst. By this arrival the Chronicle has the following from the Tejon:

"News from the Tejon is to the 18th. The wheat, corn and barley are harvested, in fine condition. The estimated value of the crop is between $300,000 and $400,000. Before it was all thresbed, the news of Lieut. Beal's removal arrived, and gloom and discouragement spread among the Indians. They gathered in knots about the fields, and some of them refused to work. A grand war council was held, and various inflammatory harangues were made. Some were for going to the old hunting-grounds, others for remaining and forming a reservation whether they had a superintendent or not. One party of one hundred left, and could not be induced to return."

A new paper has been started at Los Angeles, called the Southern Californian. It goes to the death for a division of the State, though neutral in politics.

The Pah-Utah Indians are reported to have been stealing large numbers of horses from the different ranches between San Gabriel and San Jose ranches.

FROM THE INTERIOR.

At Deer Creek, several companies are at work in its bed, just above the Main street bridge. They have flumed the creek for over half a mile, so as to render it nearly dry, and are making good wages, most of them averaging from $20 to $35 per day to the hand.

On Little Deer Creek, says the Nevada Journal, they are constantly making from $10 to $20 per day to the hand, among whom are S. Rogers & Co. who are still working the flat between the Creek and the saw mill with great success.

The reports from Iowa Hill are as favorable as ever. A gentleman informs the Nevada Journal that he saw one company wash up for their day's work, in which four men had washed out ten pounds of gold. And such day's works are quite frequeuently made.

At Michigan Hill, near Iowa Hill, in Placer county, says the Sacramento Union, Scofield's claim, which is worked by six men, was opened on the 13th inst., and 64 ounces taken out on the first day. On the second day the company took out 121¼ ounces, as we are told by a friend who was present and saw the gold.

Miners working on the Jesus Maria branch of the Calaveras are reported to be doing well. The bar, near the town of Jesus Maria, is being worked by several companies, who have averfor the past three or four months from $8 to $10 per day to the hand. Some Chileans have very rich claims on the creek.

The claim on the North Branch of the Calaveras owned by Messrs. C. A. Clarke & Co., has averaged for some time past 28 ounces a week, operated by six men.

Owing to the scarcity of water in many localities, mining is not carried on so actively as in the early part of the summer. But where water is to be had, the miners are making their usual good wages. The South Fork Canal is to be completed next month, and will afford an abundant supply of water, giving great activity to mining operations.

A new post office has been established at McDermott's Bridge, San Joaquin county, and Mr. W. F. McDermott appointed postmaster.

The late County Assessor of Sonoma, Mr. Box, died Monday afternoon, 17th inst., after a few hours' illness.

A man named Nathan Parker, says the Sierra Citizen, was shot on Indian Creek, on Tuesday, by one Chum, alias Texas.

David F. Douglass and Thomas J. Keyes were nominated as Representatives by the San Joaquin whig county convention, and W. W. Porter for District Attorney.

The Mountain Democrat states that Mr. W. H. Rogers designs running a weekly passenger train of saddle animals from Placerville to Carson Valley, commencing on Thursday, the 27th inst. Fare through, $12.

Nine prisoners escaped on Monday from the State Prison at Corte Madeira. Coyote Charley is among them. One of the scoundrels, slung-shot Smith, was shot dead, and three others wounded, who were subsequently captured.

In Napa Valley, last week, some seven hundred acres of wheat and barley were destroyed by fire. Don Salvador Vallejo is said to be the principal sufferer.

The Columbia Clipper states that there are now in that town upwards of one hundred buildings, commenced since the fire, many of them finished, and nearly all occupied by business men. Eight of them are fire-proof.

The Nevada Journal, of July 21, says the weather has grown considerable cooler for several days, the thermometer ranging from 76 to 84 in the shade, the hottest part of the day.

Two Divisions of the Sons of Temperance were instituted at Sacramento last week, by the Rev. I. S. Diehl—one as Johnstown Division, No. 29, with seventy-seven charter members, and the other as Kelsey Division, No. 60, with thirty charter members.

The immigration, says the Placer Democrat, is slowly arriving from the Plains, and large numbers reported yet to come. Grass is said to be plenty on the route, and the immigrants enjoying fine health. The Cattle arriving in Carson Valley are reported to be in excellent condition.

The First California Guard, Flying Artilery, celebrate their fifth anniversary to-day, by a grand parade and field piece target firing, the latter to take place on a plain near the Pioneer Race Course, commencing at 11 A. M.

The ceremony of laying the corner stone of a Jewish Synagogue in this city, was performed last Sunday. The Synagogue is being erected on Broadway, between Powell and Mason sts.

The Association of Riggers and Stevedores celebrated their first anniversary Tuesday. A procession of about three hundred paraded the streets, with a band, presenting a fine appearance. They marched out to the Mission to partake of a dinner.

The three members of the Board of Engineers have been allowed the sum of five thousand dollars each, for their services in determining the grade of the streets.

The bark Libertad arrived last week with Chinese passengers. One hundred deaths occurred during the passage, including the captain of the vessel. The passengers have been quarantined on Goat Island since their arrival, and twenty or thirty deaths have occurred. The disease is said to be scurvy.

A new and powerful fire engine, arrived on the clipper ship Swordfish, on Sunday last. It was imported by Joseph French, Esq., proprietor of the Metropolitan Block. We hear it is to be given to Manhattan No. 2.

A man named Robinson, who jumped from a third-story window of the Golden Gate Hotel during the late fire, died on Sunday, from the effects of the injuries received.

A Frenchman named Auguste Rombeau, under treatment in Dr. Olivera's Hospital for insanity, escaped on the 12th. On Sunday morning his body was found floating near Pacific wharf.

MARKET REPORTS.

San Francisco, July 26, 1854.

The prices given below are mostly nominal.

The new hotel at Clinton, across the bay, was destroyed by fire on the morning of the 20th. The house was full of boarders, but no one was injured. The fire was caused by a defect in one of the chimneys. Loss about $22,000. The hotel was occupied by Messrs. Wagstaff & Co. The enterprising owners, Messrs. Patten, Lacy, Stephens & Co., are making active preparations to rebuild.

MARRIED.

Watches and Jewelry.

We would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,

139 Montgomery street, two doors south of Clay.

Patent Planing Machine.

We invite all who feel interested in seeing the working of fine machinery, to call at our establishment and see the operation of Nordness' Patent Planing Machine.

Having purchased the patent right for this valuable improvement for the State of California, we are prepared to perform work in the very best manner, in any given quantity and in the shortest time. Builders wishing work done in quantities will do well to call and see our machinery.

D. W. VANCOURT,
3 Proprietor Washington Steam Mills.

FOUNDRIES.

DONAHUE'S UNION IRON WORKS,

[THE FIRST ESTABLISHED IN THE STATE.]

Cor. of First and Mission streets, Happy Valley, San Francisco

The undersigned calls the attention of the citizens of California and Oregon to his unequalled facilities for doing work with rapidity and cheapness. He has made, and will continue to make, such additions to his time and labor-saving machinery, as the increasing wants of the State require, and hence solicits public patronage.

Saw and Grist Mill Irons,
Quartz Crushing and Amalgamating Machinery,

and Castings of either Iron or Brass of every description (having a most extensive assortment of ready made patterns) made promptly to order.

STEAM ENGINES from the manufactories of William Burdon, Brooklyn, New York, and other celebrated makers, constantly on hand and for sale.

BOILERS of every description furnished at lower rates than can be afforded elsewhere, the iron for the same being imported direct, and the machinery for shearing, punching and riveting being driven by steam power. Patent Steam and Water Guages Steam Whistles, Cocks, India Rubber Steam Packing. Ready made Bolts and Nuts, Belting Lace and other Engineer's Findings for sale.

24 3m JAMES DONAHUE.

Pacific Foundry,

On First Street, between Mission and Howard.

GODDARD & CO.,

Having enlarged their works, are prepared to furnish every kind of castings and machinery on the shortest notice. Their patterns for mill and other machinery cannot be surpassed in the State. And particular attention will be paid to getting up machinery for Flour Mills, Saw Mills, Quartz Mills, &c.; also, will furnish every description of House fronts, or other castings on as good terms as any other establishment.

San Francisco, June 1, 1854. 25-4t

All in store, in fine order, and for sale by
W. L. CHRYSLER & CO.
21 64 Front street, corner of Sacramento.

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof!

MATERIALS FOR SALE!

The subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as "Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tightly*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.

All letters of inquiry, or orders for materials, must be directed to the subscriber. J. H. PURKITT,
2 Office 34 Battery street, near Pine, San Francisco.

WASHINGTON STEAM MILLS.

WASHINGTON FLOUR MILLS.

The undersigned proprietor of the Washington Flouring Mills take pleasure in offering to families and the trade, Superior Family Flour. To our Mills, we are happy to say to our friends, was awarded the Silver Medal; and we shall be always striving to maintain for it a high reputation, so that our customers can send to us in confidence, believing they will receive the highest character of Flour the market affords.

In the same establishment we have extensive STEAM SAW MILLS, capable of performing every kind of work that may be desired, and to this branch of our business we invite the attention of the public. We have also STEAM PLANING MILLS, that will finish all kinds of work in the most workmanlike manner, and equal to anything performed in the country, and in the most prompt manner to order.

We invite all who are contracting work, to call on us and examine our Mills, and we can satisfy them of our ability to supply every order in each branch of our extensive establishment.

D. W. VANCOURT, Proprietor.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF
Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and Bronzes,
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Thereae!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mockiug Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!
BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful, that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares*, the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our [illegible] in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course [illegible] has given us this position will be strictly observed to [illegible] can possibly occur.

LONE MOUNTAIN CEMETERY.—The Trustees and Proprietors take pleasure in announcing that the Cemetery is now open for the purpose to which it has been dedicated.

The following are the Prices of Lots:
FULL SIZE LOT—12 by 25—containing 300 superficial feet—$175.
HALF SIZE LOT—10 by 15—containing 150 superficial feet—$125.
QUARTER SIZE LOTS—8 by 10—containing 80 superficial feet—$80.
LOTS IN THE REAR of Main Avenues and on Paths are 20 per cent. less.
SINGLE INTERMENTS at prices according to the Location.

Rules and Regulations of the Cemetery.

TO SOCIETIES AND ASSOCIATIONS wishing larger Plats, a liberal discount will be made.

WARRANTEE DEEDS ARE GIVEN for all Lots purchased in the Cemetery.

The following extract from the Deed of Trust will explain the provision for the embellishment of the Grounds:

"*Sixty per cent. of the entire receipts shall be appropriated to the improvement and embellishment of the cemetery.*"

A faithful and trusty keeper of the Grounds will always be found in attendance.

THE ENTRANCE is temporarily from the Presidio, or Government Reserve.

N. B.—A RECEIVING VAULT is now completed and ready for use.

Applications for Interments must be made at the Office.

For further information inquire of either of the Proprietors, at MASONIC HALL, 112 Montgomery street. Office Hours, from 9 A. M. to 3 P. M.

A[illegible]

DO YOU REALLY THINK HE DID?

BY MISS MARIETTA HUTCHINS.

I waited till the twilight,
And yet he did not come,
I strayed along the brook side
And slowly wandered home,
When who should come behind me,
But him I would have bid;
He said he came to find me—
Do you really think he did?

He said that since we parted
He'd thought of naught so sweet,
As of the very moment,
The moment we should meet,
He showed me where, half shaded,
A cottage home lay bid;
He said for me he made it—
Do you really think he did?

He said, when first he saw me,
Life seemed at once divine—
Each night he dreamed of angels,
And every face was mine.
Sometimes a voice, when sleeping,
Would all his hopes forbid,
And then he waked up weeping—
Do you really think he did?

IRISH GINL'S STNATAGEM.—An amusing instance of Hiberian simplicity is afforded in the following little story, told us by a friend, in whose words we give it:

"Molly, our bousemaid is a model one, who handles the broomstick like a sceptre, and who has an abborrence for dirt and a sympathy for soap-suds that amounts to a passion. She is a hustling, busy, rosy-cheeked, bright-eyed, blundering Hiberian, who hovers about our bookshelves, makes war upon our love papers, in the shape of undusted and unrighted corners.

One day she entered our library in a confused and uncertain manner, quite different from the usual bustling way. She stood at the door with a letter between her tbumb and finger, which she held out at arm's length, as if she had a gunpowder plot in ber grasp. In answer to our inquiries as to her business, she answered:

"An 'it plase yer bonor, I'm a poor girl, an' han't much larning, an' ye see, plase yer honor, Paddy O'Reilly, and the better than him doesn't brathe in old Ireland, had been writin' me a letther—a love letther, plase yer honor; an'—an—"

We guessed at ber embarrassment, and offered to relieve it, by reading it to ber. Still she hesitated, wbile she twisted a bit of raw cotton in her fingers.

"Sure," she resumed, "an' that's just what I want, but it isn't a gintleman like yourself that would be likin' to know ov tbe sacrets betweeu us, an' so (here she twisted the cotton quite nervously) if it'll only plase yer honor, while yer reading it, so that ye may not hear it yerself, y'll jist put this bit of cotton in yer ears an' stop yer hearin,' an' thin the sacrets 'il be unbeknown to yc!"

We had'nt the heart to refuse ber, and with the bravest face possible, complied with her request; but often since we have laughed beartily as we related the incident.

A YANKEE TRICK.—A letter from an officer of the Britisb fleet in the Black Sea, states that they recently saw a large vessel eigbt or ten miles ahead, whicb they fully believed to be a Russian man-of-war, as she made all sail to get away, and showed no colors. As they rapidly came up with her, she took in sail until she was under reefed topsails—fighting trim—so the English ship beat to quarters, and the pipe sounded loudly, "Hands, bring the sbip into action." For some three minutes everything was bustle—easting the guns loose, clearing the decks, &e. Five minutes more, and every gun was sbotted and primed, and the men standing with tbe match lines in their hands, waiting for tbe word to fire. Just as they got within good distance the stranger ran up the American colors, and coolly told tbem he would have hoisted them sooner, *but he wanted to see how smartly they would clear for action.* The saucy Yankee captain was for putting them tbrough tbeir exerciso!

HANNIBAL'S TREATISE ON THE ROOSTER.—De rooster am de he hen; and aldo he lay no eggs nor hatches no chickens, euny body would tink, by seein' bim strut around the barn-yard, dat he laid all de eggs and brought up all de chickens. He does de best to make you tink he does it all, for no sooner does a hen drop an egg dan be sets up as loud a cacklin' as de hen herself, in order to pull the wool ober de eyes ob us silly fellers, and make us believe he done it, when he am no more capable ob doin the same than I am. How much like some lazy husbands in dis kongregation I could menshun, wbo let der wives do all de work, and take care ob de family, while dey do all de cacklin'!

"UNCLE," said a young man, wbo thought that his guardian supplied him rather seldom with pocket money, and felt a little hesitation in beginning to make a request on his relative's generosity, "is the Queen's head still on tbe shilling piece?" "Of course it is, you stupid lad; why do you ask that?" "Because it is now such a length of time since I saw one."

IMPORTANT RACE.—The great race between the night-*mare* and the clothes-*horse* came off at the *Washing*-ton grounds, but the decision was not made when the mail left.

"THE treo is known by its fruits." The only exception to this is the *dog*-wood, which is known by its *bark*.

GOOD resolutions are like fainting laidies—they waut to be carried out.

AGRICULTURAL, &c.

Corner of Second and D streets.....MARYSVILLE.
THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. 17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hull, Esq., the entire fixtures and appurtenances connected with the well known UNION HOTEL, situated on the Plaza, in this city.
Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.
The BAR will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.
Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.
The INTERNATIONAL is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.
E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....PROPRIETOR.

THE Proprietor announces to the public, that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's,) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.
The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the House. There are also Billiard Tables and Ten Pin Alleys connected with it.
For the accomodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake,—and to prevent accidents, they will be under the especial charge of an "OLD SALT."
An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.
The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:
Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.
☞ Families called for in any part of the city.
25 LINESS AND CLARK.

Rassette House.

SAN FRANCISCO,.....CAL.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.
Gentlemen can be accommodated with single rooms, or families with suites of rooms.
The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 24 3m

Public Notice.

THE copartnership hitherto existing between the undersigned, transacting business as Bankers and Express Carriers in the State of California, and in the Eastern States of the United States, under the name, firm and style of ADAMS & CO., expires this day by limitation.
D. H. HASKELL,
ALVIN ADAMS,
W. B. DINSMORE,
S. E. SANFORD,
S. M. SHOEMAKER,
* By C. E. BOWERS, their Attorney in fact.
Dated San Francisco, May 12, 1854.

THE UNDERSIGNED have this day formed a Copartnership for the transaction of Banking and Express business in the State of California, under the firm, name and style of "ADAMS & CO."—the principal office continuing at the same place, in the city of San Francisco.
Dated San Francisco, May 12, 1854.
ALVIN ADAMS,

[From the Golden Era.]

STANZAS TO MY WIFE.

BY LUOF.

Dear Fanny, in the by-gone days,
When we were gay as summer flowers,
My heart was rapturous in thy praise!
Thy smiles with joy winged all my hours.
And still, though clouds obscure my sky,
My fondest thoughts all turn to thee;
I breathe thy praises, in a sigh,
Upon the shore, down by the sea!

Afar from home, afar from thee—
What once was love, seems madness now;
For Time hath laid his hand on me,
And wrinkled my once smoothen hrow:
But o'er thy charms, as light as air,
His shadow falls, that they may be
As fresh as angel foot-prints are
Upon the shore, down by the sea!

I stand beside the "Golden Gate,"
And, listening to the Ocean's roar,
Impugn the stern decrees of Fate,—
I would be with thee evermore.
But, like a lion strongly caged,
I chafe the bars of Destiny;
I stalk, with dark grief unassuaged,
Along the shore, down by the sea!

And shall "we meet" in Time? Or where
Time mergeth in Eternity?
And shall we find our "jewels" there—
Those, dark Death whilom stole away?
Those thoughts oppress me more and more,
While musing by this wide-west sea:
'Tis well: we may meet on the shore
Of blissful Immortality!

[From the Waverley Magazine.

The Escape.

AN INCIDENT OF THE REVOLUTION.

BY "HARRY."

PART I.—THE SENTINEL.

Conceralen, as many of the incidents of our Revolutionary struggle have been from the present generation, either by the culpable negligence of historians, or their still more blamable ignorance, our recourse must be to the related narratives of those veteran fathers, who yet remain with us as venerable patriarchs of olden times, who once mingled their blood with the soil of the battle plains, where tyranny died, and youthful liberty was born amid the travails of war.

Back through the vista of by-gone years, their thoughts yet wander, and oft do they call the incidents of the past down the highway of their memories, and rehearse them, and again their dim eyes beam as they once beamed, when war sang the death song of oppression.

There were times during that bloody strife of seven long years, when a God seemed to smile upon the efforts of those patriots who had forsaken all for their country; when success mingled her joys with their gratitude, and their hearts ascended in grateful yearnings to the God of battles; and there were other times when the dark clouds of adversity gathered close around them, when the bare feet of the patriot army marked with blood the frozen ground, and the officer would fain beg the boon of a crust from the common soldiers, when chains clanked around and near them, and oppression seemed well nigh upon the fulfilling of its designs. It was at one of the latter periods that my story commences.

The army under Washington, ragged, ill-fed, and poorly clad, laid encamped at Valley Forge, and the ever-buoyant heart of their patriot leader, was now shrouded in gloom, partly caused by daily seeing the sufferings of his faithful followers, who were already sighing for the comforts of their own firesides, even with the yoke of bondage heavy upon their necks. But far greater were his sorrows to behold his bleeding country calling upon him for that aid which he was unable to grant.

It was a dark night in the spring that followed that winter of hardship and suffering. The pointed sleet drove by the huts of soldiers, and the sentinels drew their caps over their eyes to protect their faces, and would fain screen their half-clothed forms from the driving blast. That one pacing near the building occupied by the commander-in-chief, was a young man scarcely numbering over twenty years, but characterized by the sturdiness of his well knit frame, and his [illegible] strength. For a long hour he [illegible] back and forth before the door, throwing [illegible] rays from a camp fire struggled now and then.

Momentous were the questions there discussed. At midnight, the door opened, and the officers of the army emerged one by one therefrom, and retired to their several quarters. No sooner had the last one disappeared, ere Washington came to the entrance, and speaking to the sentinel, called him to enter. Awed by the presence of his General, but proud of the honor conferred upon him, the benumbed soldier entered, and respectfully approached the blazing fire. The entrance being closed, Washington seated himself by the table, and said—

"Morton, I have called upon you to execute for me a dangerous mission, which I am satisfied, from the recommendation given of you by your officers, you are capable of performing; and I trust this bag of gold will make you as willing as I know you to be capable. It is small, but it is the most that I can offer."

"Sir," responded the young man, proudly putting back the proffered reward, "if the task that you see fit to assign me is an honorable one, and one that is calculated to benefit my country, I will cheerfully perform it, without fee or reward; but if it be a dishonorable undertaking, (which I cannot believe, coming from you, sir,) no amount of money is sufficient to bribe me to it."

"It is," replied Washington, "that which some might shrink from as dishonorable; but he who undertakes it shows a greater love for his country than he bears for himself. It is to act the part of the spy."

"No act that is in itself conducing to the freeing our land from the red-coated minions of tyranny, is by me considered dishonorable," said Morton.

"Am I," asked Washington, "to construe your words as consenting?"

"Yes sir," was the reply, "your wishes to me are commands—in this case the end justifies the means."

"You had better accept the money, it—"

"No sir," said the young man, firmly.

"You are sadly in need of clothing, it may aid in procuring at least a comfortable suit to keep out the cold."

"So long as my officers are suffering," said he, "so long will I suffer with them, rather than the scanty means of Congress should be appropriated to making one of her private soldiers more comfortable than are her highest officers."

"Nobly said," exclaimed Washington, "with an army of such men, and England's king shall tremble upon his throne. Come to-morrow evening at this hour, and you will find disguises, instructions, a horse, and money to defray your expenses. Good night."

"I will be here, sir, good night," replied the sentinel, and retired to his quarters.

The morrow night came, and with it, punctual to the appointment, came young Morton. After a short conference with his commandant, he mounted an indifferent, but speedy horse, and with his baggage strapped behind him, set out upon his perilous mission. Edward Morton, six months before, had left home and friends, to take part in that struggle then going on between the colonies and the mother country. Not for the hope of gain, but with his patriot heart swelling with pity for his country's needs, did he join the thin, but sturdy ranks, of the troops of Congress. We find him yet in the ranks as a private, but well deserving a foremost station among his fellow soldiers.

PART II.—THE SPY.

On the banks of the rippling Schuylkill, was at that time situated an old-fashioned farm-house, antique in its interior construction, but showing around it evidences of skillful hands to plan true happiness, and an unmistakable air of comfort and substantial enjoyment. At this time, a part of the British army were encamped near this dwelling, they being upon a foraging excursion.

Toward the evening of the following day, the young "spy" (as we must now call him) rode up to the door of the building mentioned, and throwing the bridle over the gate-post, entered the house. A dark-eyed girl met him almost at the threshold, and though she spoke not a word of welcome, a flushed cheek and speaking glance of her gazelle-like eye, told more of love and welcome than volumes of words could have done. What passed in that narrow entry, I am not disposed to reveal. In the inner room, a middle-aged man sat, the uncle of Mary Wilson, noble in mien, with raven locks, but evidently of indifferent health, and,

Though [illegible] and proud
That forehead was, [illegible] crowd
Of [illegible] hair curtained [illegible]
Now knew how made [illegible] a star
[illegible]'s dome, [illegible]
[illegible] more bea[illegible]

As her father's brother, under his guardianship she had been placed, when made doubly an orphan by the death of both her parents. And an ever kind guardian and father he made to the bereaved girl; and now at the age of fifteen years, she had ripened to the almost perfect woman. Edward Morton and herself had been playmates together, and although five years her senior, yet she had loved her manly lover. No one of her numerous schoolmates gave an interpretation of the difficult portions of her lesson half so plainly as did he, nor to any one did she give half so willingly an ear.

Until the breath of war had been felt at their own door, the youth and maiden had floated gently down the stream of happiness together, the flow of their love unrippled, and their pleasure without a care. But when his country called, through the cherished lips of a Washington, he exchanged her arms for the sterner embrace of war, and his quiet home for the tented field and busy camp.

To guardian and niece his story was soon told, and an hour—after many well wishes from the elder, and a warm embrace from the younger, given in the little entry—found a sun-browned and flaxen-haired country lad, to appearance, pushing boldly into the camp of the enemy, with a quarter of beef laid upon the rump of his horse.

It would have taken a sharp eye to pierce the complicated disguise, and a keen ear to have detected the voice of Morton, from the drawling, nasal twang of the verdant youth. Trotting slowly into the camp, the spy had soon disposed of his beef, and in turn, laid in a valuable store of information, which, if safely conveyed to the right quarter, would inestimably benefit and aid the plans of Washington.

It was late at night when Morton prepared to leave, but it was not until he had been urged to sell his horse, and notwithstanding his many protestations that "Father would be allfired mad if he should let the old mare go," he was obliged to sell her to a young officer, who, with half a dozen others, were carousing in one of the tents. As he passed out at the tent door, he met an old acquaintance, who had joined the British ranks. He passed him, but the Tory, thinking that he saw something suspicious, turned and followed him. Morton recognized him, but feeling secure in his disguise, passed on, yet having some misgivings. He had gone some quarter of a mile, when, hearing footsteps close behind him, he inadvertently cast his eye over his shoulder. The Tory knew him at once, and giving the alarm, quickly followed the fast retreating spy. Morton encumbered by his tight-fitting suit of homespun, was almost within his grasp, when his pursuer called loudly upon him to stop. It was the last word that he ever spoke, for Morton, dropping suddenly upon the ground close before him, sent him sprawling along the road, and springing up he quickly sent his concealed knife to the hilt in his bosom. The shout of the Tory had been heard by the officers, and quickly mounting their horses, were soon in close pursuit. Exciting indeed was that chase, and the pursued had well nigh escaped, by betaking himself to the woodlands and marshy places. From the last clump of bushes, through which he had passed, the house of Wilson lay about half a mile. To this spot, he held his lagging, but yet swift way, and was just passing the gate in front of the house, when a horseman riding into the road near by, descried him, and immediately gave the alarm to his companions.

Scarcely two minutes had elapsed ere they had surrounded the house, and two officers were proceeding toward the door. But they found the nest, and warm, but the bird had flown. Their search proved unavailing, although carried to the out-buildings.

Verdancy was not thus to be caught.

PART III.—THE LIBERATOR.

No darker page is there in the history of the English nation than that whereon is recorded the inhuman barbarities of her troops, as exercised towards our nation's soldiery, in the struggle of the Revolution. Age, nor sex, were safeguards against their atrocities—the gray-haired man of three-score, the maiden of twelve summers, were equally the recipients of their refined cruelties. The English nation did not, it is true, countenance their diabolical proceedings, but nevertheless are they blamable for sending such unfeeling wretches among us; for inciting the red man to attack our frontier settlements, and worst than all, for procuring the knife of the [illegible] renegade from principle, to be pointed to the heart of his brothers, who had commenced the cause of liberty. Exasperated by their [illegible] failure, the searchers returned to the farm house, and hunted by the [illegible] drank, they [illegible] reveal the hiding place of the spy, at [illegible] ing him with a [illegible] compact. He promised [illegible] knowledge of [illegible]

him and his fair niece, they mounted them upon horses, and set out for the camp. A keen pair of eyes tracked them, until the prisoners were placed under triple guards, in one of the tents of the encampment. Seeing no hope of rescuing them at present, Morton resumed his ordinary dress, and scoured across the country to Valley Forge.

Washington, with a beaming eye and a kindly countenance, heard the report of his spy, but his noble brow lowered, and a frown gathered upon his features as he heard the sequel. Scarce a week had passed, ere, from the request of "the Father of his Country," the maiden was set at liberty, and placed by her lover under the care of a staunch, whig family, in the interior. In the mean time, Wilson had been conveyed to Philadelphia, and there immured in the prison of the city.

About this time, a young fisherman, although embargoed by the commands of General Howe, had, under the pretext of selling whiskey to the soldiers, passed the outposts and sentinels with impunity, and the sentinels had become so familiar with the old red boat, and blue barrel, that he was but seldom challenged. Under this fisherman's slouched hat might have been recognised the face of young Morton. His object was not alone the gaining of information. That gloomy old stone prison contained one whom he had sworn by his love to release, were it at the peril of his life.

The night was dark and stormy. The invalid prisoner sat alone in his lonesome cell. He was to die at sunrise, and for what? Forsooth a spy had been seen near his door. Fit example of tyrannical justice. The wind wailed around his prison walls, but he heard it not, there was a wilder storm within. He arose, and approached the narrow, grated window. Unaided, escape was impossible. He listlessly gazed out and counted the lamps, as they were extinguished one by one, or heard the distant cry of the sentinel, "all's well." He had stood thus for some time, when he was startled from his reverie by a sharp click below him. Again and again he heard it, and it seemed to approach up the face of the wall, Soon a head appeared above the window sill, and a low voice said: "Hist! Wilson, is it you?"

He recognised the voice of Morton, notwithstanding the form before him was hump-back and deformed.

"Haste! but do not speak," said he; "our time is short, and we must employ it to the purpose."

"I fear the attempt is useless," said Wilson, "these iron bars—"

"Are but cobwebs," said Morton, as he wrenched one of them by main strength from its sockets.

Another and another followed, and the hunch-back stood within the prison walls. Quickly stripping off his sailor jacket, the young man removed the pack from his shoulders, and revealed a small, but strong rope ladder, and a complete suit of British uniform. Wilson immediately donned the disguise, and the ladder being made fast to the only remaining bar, the prisoner followed his liberator to the ground. A gagged and prostrate sentinel endeavored to shout, but to no avail. They passed him, and were soon on their way toward the wharf. Although the feat of climbing the side of a stone prison, by simply placing iron wedges in the crevices, was difficult, yet the hardest task was to be performed. He must be placed beyond the lines. Morton's plans were well laid, and after readily passing the sentinels, and gaining his boat, he silently removed the head of his empty whiskey cask and pointing to the interior, said: "I am afraid you will be obliged to personate the commodity in which I deal." With a comical smile, the liberated prisoner, after a deal of contortions and twistings, finally adjusted himself and was "headed up." The task was barely accomplished, ere Morton heard the alarm, telling that the escape was discovered. Instead of pushing off hastily seated himself, and with [illegible] in his hands, appeared the personification of surprise at the hue and cry. Soon after, three or four soldiers roused up, and demanded of the well known whisky peddler, "if he had seen any one pass lately."

"I did," was the reply; "but I [illegible] a small [illegible] passed by here [illegible] I [illegible] him on [illegible] I [illegible] more," said they, starting in pursuit.

"Hold on," said Morton, "you [illegible] a [illegible] of my way to help you along."

"Quick's the word," said they, and [illegible]

THURSDAY, AUGUST 3, 1854.

To Grain Growers.

In response to the letters which have been received from our correspondents, asking what shall be done with our Wheat? we are happy to say to them, that we addressed letters to our most prominent Bankers upon the subject of Shipping Grain East, and are now ready to say to those who desire to send Grain forward, that a way is opened to relieve them. We are authorized by Messrs. Page, Bacon & Co., who are ever ready to aid in the great interests of the country, to say that they are willing to make liberal advances upon *cargoes* or large quantities of Grain shipped and consigned to them. Those who are now ready can make such arrangements as their case requires. Other prominent houses are ready for aiding the Farmers, and A Million of Dollars is ready for them, and more if wanted.

To perfect this relief and to give a permanency to these interests, a Convention in every County should be immediately called, and a State Convention also. This is the *great interest* of the country, and demands immediate attention.

Let those who are crowding grain and flour from Chili and the States, know the true condition of this market, and that we have in California one million bushels wheat to spare; that the grain growers will manage their own business, and are determined not only to sell as low as the lowest, but become exporters also.

Alvarado, July 26, 1854.

Messrs. Editors: There is a rumor current in this place, that some Merchants or Bankers in San Francisco are offering a liberal advance on Wheat to be shipped to New York. The present low figure at which it is selling in San Francisco, induces me to ask you for information with regard to the above; and well knowing the interest you take in our welfare generally, I feel confident you will attend to this matter, and advise us accordingly.

If there is a surplus of grain in this State, it is to the interest of the merchants and farmers to find a market for it; and the sooner it is done the better, for all parties.

Respectfully, yours, J. H.

We have similar letters and advices, from a large number of the largest grain growers in the country, but we nor they feel willing at present to show where these quantities are, lest they become the object of speculators. Those interested as growers, can have the facts.—En.

Never Say Die!

Sacramento is fast removing the marks of the late ruinous fire. Fine fire-proof, substantial buildings are springing up in all the streets lately devastated by the destroyer. Dark and dismal as is this new trial, we really think a permanent good will come of it—by such a change of ownership in lots, or of the style of buildings, that the same calamity will not again befall the city.

In a walk through the city we could not but note with great satisfaction and pleasure the activity that prevailed generally among the merchants. We note those old and well established mercantile houses of Meeker & Co., Nevett & Co., Hamilton & Howlett, Maddux & Co., Stanford & Bro., Huntington & Co., Booth & Co., Corthvin Potter & Co., McWilliams & Co., Lady Adams & Co., Barr, Coursen & Grigg; these with some few others are doing an active and prosperous business on K street, and Berry & Co., (late Scudder, Carrol & Co.,) Figg, & Co., Sneath, Arnold & Co., Wilcox & Co., Grissim & Co., Gillig & Co., Mitchell & Co., Brown, Henry & Co., Rich & Tilly, on J street, are likewise doing a very handsome business. Many others are, even in these dull times, steadily going onward. These old *forty-niners* stand out among the Sacramentans as the fixed stars stand out in the firmament—you know where *they are*—and their light and influence is constantly felt.

Every part of the city is improving. Front street, facing the river, with its broad and fine finished grade, is indeed an ornament to the city. We trust the citizens or the authorities will take steps speedily to secure a great public benefit before it be too late—we mean the laying out of a public square in front of the water works; this could be surrounded with trees and prove a pleasant resort for the inhabitants during the sultry weather. Only, in mercy, let it be done with some taste, and not ruined, as has been San Francisco with her famous "Plaza," whose dry, sandy and barren aspect reminds one of the desert of Sahara.

Munray & Co.—We are again indebted to this house for a generous parcel of the latest and best monthlies and periodicals, and English journals.

Export of British Stock.

WHAT THE BRITISH SAY ABOUT IT.

We noticed recently the arrival of Dr. Watts, of this State, and that Mr. Waddle would follow him with their purchase of cattle, &c. In the Mark Lane Express, of May 15th, we find a description of these animals, which conveys some interesting information. It is from the Liverpool correspondent of that Journal, who is the editor of the English Herd Book.—*Ohio Farmer.*

"In accordance with my promise, I send you some further particulars of a valuable cargo of Short-horned cattle, Cotswold and South-down sheep, which left this port during the past week, in the 'Bailey,' for Philadelphia. The stock in question were those purchased by Dr. Watts and Mr. Waddle, the gentlemen I named in my former report as having made great search throughout the United Kingdom, they having visited most of the principal herds of England, Ireland and Scotland, as agents for a spirited company in Clarke county, Ohio, United States. When we mention that amongst the cattle which consisted of 10 Short-horned bulls and 20 cows and heifers, were animals that have cost 200 guineas, ($1,000) several 150 guineas, ($750) and most of them averaging over 100 guineas, ($500) each, it may be readily inferred that ample funds were placed at their disposal; coupling with this the heavy personal expenses of these gentlemen, with freight, fittings, and food for the stock, each in itself an item of no small amount, some idea may be formed of the enterprise and spirit of our trans-atlantic brethern; and we may heartily wish them the reward which such patriotic conduct so richly deserves. Every facility was given us by those gentlemen for the inspection and particulars of the animals during their stay in Liverpool; several breeders also, some of them from a distance, came to view them; and we are happy to have their testimony in confirmation of our own. They were indeed a prime lot, and to collect such, a work of no little difficulty. Dr. Watts paid a visit of the kind in the year 1852, and we learn that he was one of the original shareholders in the first Ohio company which imported largely from this country in the years 1834 and 1836, and that such stock have proved a great benefit to Kentucky, Ohio and other western States, over the vast extent of which country we are told the produce of this valuable race of cattle (the Shorthorn") are widely spread, and that many of them are such as would do credit to the parent country.

Amongst those now shipped were 8 lots purchased at Mr. Wilkinson's sale at Lenton, many of them very superior specimens of the breed; three very promising animals from Mr. Fawks' herd, at Farnley Hall; a fine young white bull, called 'Medalist,' bred by Mr. Torr, of Aylesby, which attracted a good share of attention—this animal is closely allied to the blood of Mr. Booth, of Warlaby; Mr. Toor also sold them a bull, cow, and heifer; there were four good specimens from the herd of Mr. Ambler, of Watkinson Hall, Halifax, besides others bred from the stock of Lord Feversham, Sir T. Cartwright, Messrs. Birchall, Clarke, Dudding, Mitchell, and Wood, all English breeders: three splendid bulls purchased at the Royal Dublin Show, (two of them winners of the first prize in their classes), which were bred by Messrs. Farral, Lee, Norman, and Topham; there were also several promising yearling heifers from the herds of Messrs. Barnes and Chaloner, celebrated breeders of Short-horns in the Sister Isle.

The Cotswold sheep were from the celebrated flock of Mr. Hewer, of Northleach, and the Southdowns from that of Mr. Webbs, of Babraham.

CLINTON COUNTY IMPORTATION.

Messrs. Hankin & Co., also shipped a valuable lot the previous week; their cattle were mostly purchased in the North Riding of Yorkshire and the county of Durham; the sheep were from the same breeders as above. I regret I had not an opportunity of seeing this shipment, being absent from Liverpool at the time; but I learn, from a friend residing near here, interested in such matters, that they were a useful lot of stock, about the same quality as those of Messrs. Watts and Waddle; they are also for a company in the western States of America, and for which good prices were paid. I hope these continuous exports of our best stock, may induce our farmers and breeders to pay greater attention to the rearing of the most improved breeds of cattle as such a demand holds every encouragement for them to do so."

Views of California.—We are pleased to know of a rich treat in store for our citizens, in the great painting which is to be opened to the public on Monday evening next, at Musical Hall. Every one should go and see it, and live over again their early life in California. Messrs. T. Ayres and T. H. Smith are the artists, and Dr. Gunn, the former editor of the Sonora Herald, an old forty-niner, and associated with them, will explain the various scenes. No one should omit these Views of California.

To our Sacramento Subscribers.—We have ever endeavored to have our patrons regularly supplied, and promptly too, but some *mysterious!* misfortune prevents our best efforts. It has been no want of endeavor on our part, for we have lost hundreds of papers, which we supposed had been delivered. We now feel assured that the carrier, Mr. O. H. Hamilton, will not fail to deliver them promptly—as he will give time to do it well. We commend him to our friends, and hope to receive a generous addition to our list.

Daguerrean Art.—The rapid advance in this beautiful art can hardly be realized—from the blurred *imitation* of the human features, to the finished productions now emanating from the galleries of Ford & Co., G. H. Johnson, Vance & Co., Bradley & Co., Jonhson & Sellick, and others, where in each, some of the finest specimens of the art that have ever been produced can be seen. It is well for all to visit these galleries; surely no one could spend an hour more pleasantly, and they would there not only see many familiar faces, but would keep pace with the rapid advances of this splendid *memorial-preserving science.* A friend showed us last week the Daguerreotype likeness of that distinguished divine, Dr. Scott, done by Bradley, one of the most perfect, life-like pictures we have ever seen, a gem of the art. Every specimen of work like this elevates the whole art, for who will be now going backward. Progress, progress is the word with the gentlemen in this science, and they all deserve great credit for what they have done in this country. Ere long we trust to see the "Homes" of our citizens, their "Country Homes," with trees, plants and flowers, and in *natural colors*, too. Who will rank No. 1, in thus perfecting this art. It can be done, gentlemen; who leads?

Adams & Co.—This distinguished firm now occupy their new Express and Banking House in Montgomery Block. On Saturday last they were doing business at their old establishment; on Monday, in the new. This surely was an "express movement," and one of the quickest on record. The order went forth, "It were well done, were it done quickly," and it was quickly done. We wonder which of the fast teams was on duty, one or all—echo answers all! Who delivered papers first? Woodward or Haskell?—or up-river messeugers? Was Martin there? But it is done; and this house can now present not only facility for every department, but room to do all with facility, being undoubtedly the finest of the kind in the world, and forming business connections to a greater extent and number than any house known. D. Hale Haskell, Esq., the founder of this house in California, left in the Sonora, to be absent several months. The best and kindest wishes of a very large circle of friends go with him; and though many attachments may draw him eastward, and kind friends hail him there, his return to California will be welcomed by as many friends as usually fall to the lot of men.

A Stroll through Duncan Art Union.—We have spent a very pleasant hour at several times among the *nouvelettes* at this gay and fashionable place. There is much to admire now. The beautiful and sparkling gems make one wish to be a millionaire. Give us the diamond, the simple, plainly set diamond; let it be a large, clear, and luscious, one like to the full, sparkling eye of woman, when the soul is looking through it—there is *one* at Duncans; *that* will do; mark *that* for us, neighbor Duncan. And then that chaste and rich silver tea set, from the Empire City; it can be no harm to wish that, too. There are trees, flowers, cottages and garden walks, natural as life—that too we should like, for it is in our way—horticultural, sure. But we could not speak of all the beautiful things, our readers must go and see them.

We look with great interest and longing to see the soon coming gems of art that Mr. Duncan has selected at great cost in Europe. We shall speak of this again.

Fine Hams.—We found at our office a box marked family stores, and a very courteous letter from Wm. L. Chrysler & Co., presenting us with a box of hams that made the mouth moisten at the first glance. Better, sweeter, or finer flavored hams cannot be found in the country—and certainly equal to any *Westphalias.* Now we go for "Home Industry," gentlemen importers of produce, and although we say you have the best hams in the market *now*, next season California will make her own hams. So we warn you, gentlemen, of *next year.* We recommend most cheerfully Messrs. Chrysler & Co.'s hams as "tip top," good enough for an epicure's tooth, but hope at the same time to have the pleasure of advertising California Hams of *best quality* next year.

Pea Nuts.—This "pet fruit" of everybody, this convenient pocket commodity, which is so useful to kill time—but which is a pest to all cleanly housewives, we found growing finely upon the farm of Jessie Beard, Esq., of Mission San Jose. We are glad to notice this; so much the less to import.

Hon. Samuel Brannan.—This gentleman, who so often marks his path by acts of liberality, has again returned to our city, and the best evidence of his attachment to San Francisco is shown by the magnificent gift he has secured for one of the earliest fire companies. A fire engine of the best power and highest finish, costing nearly $12,000, is on the way for the noble "Howards;" a name endeared to many thousands. Mr. Brannan is one of our wealthiest citizens, and the wealth he has acquired in San Francisco he is freely dispensing to his favorite city. We welcome him back to our shores again, for such men not only build up cities, but they sustain them by giving employment to the mechanical interest, and thus give permanency to all that makes a city great.

New Stage Company from Santa Clara to Martinez.—W. G. Matthews, proprietor of this new line, has placed very handsome coaches upon the route running from Martinez to San Jose Valley, stopping at Union City, Mission San Jose and the City. This will connect the Sacramento Valley, with the great valley below. Leaving Sacramento in the afternoon boats, passengers can stop at Benicia or Martinez over night, take stage in the morning, and be at San Jose the same evening; saving the expense between Benicia and San Francisco, (one fourth). Returning, leave San Jose in the morning, and reach Benicia in time to meet the up-river boats same evening. This is a saving of time and money, and gives a beautiful landscape to view in travelling.

New Market House.—Visit the new Market House, all ye lovers of the good things of earth—and don't forget Mr. and Mrs. Weaver's stand, No. 1. Call there—and if you keep house you will surely go there; and if you are a bachelor, you'll want to keep house for the sake of going to market and buying the good things there.

Blood Horses.—Four full blood horses arrived by the Golden Gate, and two by the Uncle Sam. Thus giving additions to our stock of fine horses. These are spoken of as very superior animals, and spotted high as pacers.

Destruction of Greytown.—We take the following from the Herald of this city: By a passenger who came up on the Pacific, we learn the following important occurrences at Greytown. It will be recollected that an *emeute* took place some time since between the natives and the foreign residents, which led to the organization of the latter for their protection. Affairs remaining in this State, two or three American houses were burned down. The U. S. sloop-of-war Cyane, Captain Nicholson commanding, arriving, a demand was made upon the authorities of the place for the damages thus done, some $20,000. The authorities refused, and on the 11th of July the Cyane opened her batteries upon the town, throwing hot shells etc. The inhabitants fled, although but little damage was done. On the following day, the 12th, the authorities still refusing to make reparation, a party was landed from the Cyane, who set fire to the town and thus destroyed all but two or three of the houses or huts of the natives.

Barley Burnt.—The barley field on Vance & Athens' ranch, six miles above Staples' ranch, caught fire on Saturday last, and burned one hundred and fifty acres of barley, it having just been cut. The fire was with great difficulty, kept from burning the houses, by resorting to plowing, &c.—*Stockton Argus.*

Music a Stimulant to Mental Exertion.—Alfieri often, before he wrote, prepared his mind by listening to music. Almost "all my tragedies were sketched to my mind, either in the act of hearing music, or a few hours after"—a circumstance which has been recorded of many others. Lord Bacon had music played in the room adjoining his study. Milton listened to his organ for his solemn inspirations; and music was even necessary to Warburton. The symphonies which awoke in the poet sublime emotions, might have composed the inventive mind of the great critic in the visions of his theoretical mysteries. A celebrated French preacher, Bourdaloue or Masillon, was once found playing on a violin, to screw his mind up to a pitch, preparatory to his sermon, which, within a short interval he was to preach before the court. Curran's favorite mode of meditation was with his violin in his hand; for hours together he would forget himself, running voluntaries over the strings, while his imagination, in collecting its tones, was opening all his faculties for the coming emergency at the bar.—*Disraeli on the Literary Character.*

Interesting Incident.—The Springfield Republican relates the following singular circumstance:—

"A few days since Joel Rice, of Conway, discovered a nest of flying squirrels which he secured for the amusement of his children, but on descending from the tree, the old one made her appearance, and in the temerity of her maternal affection, jumped upon his hat, crawled down to his hand, seized one of her young ones and attempted to take it away. Mr. R. resisted her claim but a moment, when sympathy for the agonized dam made a successful appeal, and she was permitted to gather into her furry folds a little one which she soon deposited in a new home, returning, again and again, till she had taken them all from the hands of their captor.

HORTICULTURAL.

Premium Farms.

UNION CITY July 24.

MESSRS. EDITORS: We would desire to enter our farms for the premiums to be awarded by the State Society the present year. We shall be very happy to receive the committee at any time it may suit their pleasure.

Our lower farm contains 200 acres—175 acres in cultivation—grain, vegetables, orchards, &c.

Our upper farm contains 200 acres, all in cultivation—110 acres new crop, balance volunteer.

We feel confident we can exhibit some fields of grain as handsome as any in the State.

HAWLEY & CORNELL.

MISSION SAN JOSE, July 24, 1854.

MESSRS. EDITORS: Desirous to make known the advance of Pomology and to do what I can to promote an interest in fruit growing and nursery cultivation, I herewith send you entries of the Mission Fruit Orchard and Nursery, which I desire may be enrolled by the committee, for the premiums which I learn are to be awarded by the State Agricultural Society the present year. We shall be glad to receive the Committee when it may please them to visit the Mission.

E. L. BEARN, for proprietors.

AGRICULTURAL MEETING AT SACRAMENTO CITY.—We rejoice to know that this queen city of the plains will hold a meeting to awaken an interest in this important branch of our wealth and industry. No valley in the State could surpass Sacramento in Agricultural productions, if those engaged in this science would but give a just portion of time to their developments. There are many of the best cultivators in the State in this county, and we trust a proper response will be given to the call of the vice-president, on Saturday evening next. Let all who are engaged in Agriculture attend. The meeting is at McNulty's Hall, J street, as will be seen in the card.

A Fine Orchard.

THE fine orchard of Jessie Beard, Esq., at the Mission of San Jose, gives promise in a few years of making an ample return for the cost and labor bestowed. It has been planted with great care and reflects much credit upon the proprietor. We noticed a perfect system and regularity in the rows, and counted the following trees: 1800 apple trees, 1000 peach trees, 300 apricot, 200 cherry, 250 plum, 150 pear, 100 quince, 150 fig and grape. There were also very fine currants, raspberries, strawberries, and blackberries, and 6,000 young trees in nursery rows.

Connected with this orchard is a fine FARM, containing 50 acres of fine grain, 50 acres of potatoes (the finest we have seen this season), 50 acres of sundry vegetables, corn, peas, beans.

Around this orchard and farm there is two miles of fine wire fence, and two miles of Osage Orange, and what has been done, has been well done.

Grapes and Peaches.

THE prospect of the Grape and Peach crop was never better in any country than in California and Oregon the present season. We do not mean that the crops will be in quantity large, but when we consider the brief time of our fruit culture, we say that comparatively it will be large. In Oregon there are growers that will have hundreds of bushels of peaches and apples, and pears of the finest kinds. In California, in many counties, there are growers that will raise five, ten, twenty, and fifty bushels each; and in our lower counties, hundreds of bushels.

We have never seen or known such crops as we have seen the present year upon young trees, those of only two years growth—peaches in clusters of three, four and five hanging together, and some trees bearing hundreds of *double peaches*.

The grape crop will be large, vineyards of two and three years growth yielding *tons of grapes*.

Pears also will be of excellent quality and very abundant.

The present year will demonstrate fully and satisfactorily that California will be a "great fruit growing country."

Fig Trees.

WHEN our citizens purchase Figs in our market they have but little conception of the size of the trees that have yielded the delicious fruit they are so tempting.

We have written this communication beneath the [illegible] trees in the fruit garden of E. L. Beard, Esq., of San Jose. We have just measured two of a group of *ten fig trees*, the body of which measure 2 1-2 feet in circumference. The trees of the group are *forty feet* high, and the largest measure 5 1-4 feet in circumference; the limbs eleven feet from the ground measure 2 feet two inches in girth; limbs four feet from the ground measure 3 and 3 1-2 feet in circumference. The leaves upon the trees measure 18 inches across. This may seem incredible, yet these are facts. The fruit is just now ripening, and one specimen before us measures eight inches in circumference. Such fruit can be easily raised, and will be, by those who make California their "home." The fruit gardens of Mr. Beard now present a cheering sight—Pear trees are bending beneath the weight of their fruit, which hangs in immense *ropes* and clusters, causing the entire trees to assume the appearance of weeping trees. There are no grounds in the State that present a finer appearance than those we name; young orchards of acres, numbering thousands and tens of thousands of trees, are coming into bearing, giving promise of future abundance. Surely, such effort on the part of our cultivators deserves a corresponding reward.

The Mission Orchard at San Jose.

WE have examined the splendid Orchard and grounds at Mission San Jose, now entered for premium by E. L. Beard, Esq., as noted in the column of Horticulture. In the original "mission orchard" there are two hundred and sixty pear trees, from 30 to 50 feet high, and from 5 to 12 feet in circumference—many of them bearing bushels of fruit, each; so full, that the weight of the fruit bend them, and cause them to look like weeping willows. Large apricot trees, full of fruit; olive trees, 30, 40 and 50 feet high; the fig trees are there, that we have spoken of elsewhere. Many thousand young apple, pear, peach, plum and cherry trees, are also within the mission walls; currant, gooseberry, raspberry, strawberries—in bearing, and in excellent order. It is one of the finest vineyards in the valley, and in full bearing. The condition of the gardens bespeak the care they have received.

The "Cochindlifer," or large Cactus, as it is called, which yields the fruit known as the *Tune*, grows around the walls, from 12 to 16 feet high, in full fruit. Across the street is the new orchard; here, within the last two years, have been planted the following trees, which are now in splendid order, many of them overloaded with fruit: 5,560 apple, in great variety; 1,680 peach, 300 apricot, 394 pear, 175 cherry, 125 plum, 283 fig, grape, etc.; making eight thousand five hundred and seventeen trees. To these may be added a large number of young trees, in the nursery rows. Many of these trees now bave more fruit upon them than they can mature.

This orchard was planted by Mr. J. Lewellan, under the direction of Mr. B.; and we think Mr. Lewellan has good reason to be proud of his labor. No better evidence need be had of bis constant care and skill, than this orchard. We counted twenty-four large "Julien pears" upon a small tree, about six feet high; young apple trees bending with fruit. Mr. L. received the medal for his apples last year. This orchard is worth a ride to the valley, only to note its success.

PRESERVING FLOWERS AND FRUIT.—A friend has just informed us, says the Country Gentleman, that fruit and flowers may be preserved from decay and fading by immersing them in a solution of gum Arabic and water two or three times, waiting a sufficient time between each immersion to allow the gum to dry. This process covers the surface of the fruit with a thin coating of the gum, which is entirely impervious to the air, and thus prevents the decay of the fruit, or the withering of the flower. Our friend has roses thus preserved which have all the beauty and fragrance of freshly plucked ones, though they have been separated from the parent stem nearly a year. To insure success in experiments of this kind, it should be borne in mind that the whole surface must be completely covered; for if the air only gains entrance at a pin-hole, the labor will all be lost. In preserving specimens of fruit, particular care should be taken to cover the stem, end and all, with the gum. A good way is to wind a thread of silk about the stem, and then sink it slowly in the solution, which should not be so strong as to leave a particle of the gum undissolved. The gum is so perfectly transparent, that you can with difficulty detect its presence, except by the touch. Here we have another simple method of fixing the fleeting beauty of nature, and surrounding ourselves ever with those objects which do most elevate the mind, refine the taste and purify the heart.

SPLENDID PLANT.—There is now in full bloom in the Liverpool Botanic Garden, a beautiful specimen of the *Victoria regia*. This splendid plant, which is considered the most splendid [illegible] a space of wall [illegible] nearly nine feet [illegible]. At the present time there is about six [illegible] or leaves of [illegible] out, [illegible] on an average about [illegible] in diameter. It bears on the whole about fifteen [illegible] and buds. It is not the [illegible] that this plant yields a most grateful perfume

LADIES' DEPARTMENT.

RECIPE FOR A LADY'S DRESS.—Let your earrings be attention, encircled by the pearls of refinement; the diamonds of your necklace be Truth, and the chain Christianity; your bosom-pin Modesty, set with Compassion; your bracelets be Charity, ornamented with the pearl of Gentleness; your finger-rings be Affection, set round with the diamonds of Industry; your girdle Simplicity, with the tassels of Good Humor; let your shoes be Wisdom, secured by the buckle of Perseverance.

MINT SAUCE.—Many of our country friends do not know what a luxury they deprive themselves of, when they eat lamb either boiled or baked, without mint sauce. Set a few roots of spearmint in one corner of the garden, and they will soon furnish an abundant supply. Strip off the leaves and chop them fine, add an equal amount of sugar, and cover the whole with vinegar. A small tea-cupful of the mixture will be sufficient for a large family. Try this and see if it is not far preferable to greasy gravies.—*Ohio Cultivator.*

APPLE OR GOOSEBERRY SCUFFLE.—Scald and sweeten the fruit, bear it through a sieve, and put it into a tart dish. When cold, pour a rich custard over it, about two inches deep; whip the whites of the eggs, of which the custard was made, to a snow, and lay it on small rough places on the custard; sift fine sugar over, and put it into a slack oven for a short time. It will make an exceedingly pretty disb.

DIFFERENT KINDS OF WOMEN.—The obstinate woman gets to sea in a band box.

The patient woman roasts an ox with a burning glass.

The curious woman would like to turn the rainbow over, to see what there was on the other side.

The vulgar woman is a spider attempting to spin silk.

The cautious woman writes her promises on a slate.

The envious woman kills herself in endeavoring to lace tighter than her neighbors.

The extravagant woman burns a wax candle in looking for a lucifer match.

The happy woman died in a blind and deaf asylum years ago.

Nobodies.

I. "HAVEN'T the honor of his acquaintance! He's *nobody* but a common farmer?" Of course you haven't! What *could* such a gentleman as you say to a man of sense? Would you converse about the newest style of neck-chockers and ear slicers? Would you lovingly pet your moustache, stroke your whiskers, and patronizingly inquire if they were not "*very splendid?*" Would you extend one of your immaculate digits, allow it to come into contact with his embrowned hand, and condescendingly ask, "How are all the country natives?" O, no! An exquisite like you can only smoke your superior cigar, sport your pipe-stem cane, and superciliously curl your lip whenever one of Nature's noblemen contaminates the atmosphere by appearing in your august presence! Certainly, he's a *nobody! He* has no dearly-loved, petted moustache, no "foinely"-tied cravat, and is uninitiated in the sublime science of orthoepy, according to the Dandy's Dictionary. His thoughts are impressed with the golden stamp of intellect, and expressed, lamentably devoid of the magnificent drawl and foreign accent with which you so ingeniously beautify the vulgar Anglo Saxon. Expect *you* to be acquainted with *him!* The idea is preposterous! You, with your modicum amount of brains, to have any affinity with a man of mind,—one who *labors* both physically and mentally;—why the thought makes me nervous! O, no! don't degrade yourself by making his acquaintance!

II. "Don't speak to her! she works for a living! and it's not genteel to know such *nobodies!*" Nobody? She, with her noble brow, soul-full eyes, beaming with the light of intellect, and elevated mind, rich with the gems of thought and goodness—a nobody? No, no! petted, spoiled child of fashion though you are, say not that! Glance scornfully at her,—daintily pick your way past her, lest your silken robes come in contact with her cheap delaine, — complacently imagine yourself the personification of superior worth and loveliness,—but never dare call her a nobody! Genius is here. Hidden thought it is from the glance of the scornful, it will one day assert its power, and place her on Intellect's high pedestal, far, far above such heartless beings as you. Nobodies? How my cheek burns with shame and indignation when woman—whom poets so often have described as the embodiment of loveliness and earthly perfection—looks with scorn and contumely upon the misfortunate one of her sex.

III. Nobodies! How much is [illegible] by that one word! Gifted minds, [illegible] unappreciated worth and [illegible] bursting [illegible] dark [illegible] and starting the seeds of [illegible] "thoughts that [illegible] Nobodies? Why they are [illegible] the earth." Such were [illegible] Clay, a Farmer, a [illegible] wand of genius [illegible] life to [illegible] Many [illegible] as he

on the hearts of their countrymen, never to be erased. Are we nobodies? Are we to care for the disdain of the children of fashion and folly? Are we destined continually to turn the pitiless machine of life, despised, neglected, and at last drop into the grave of forgetfulness? No, never! Mind, immortal mind, is progressive, and though the strong hands of Poverty and Necessity may seek to bind us to the grovelling things of earth, yet Aspiration and Intellect will soar up, up to the Home of the Infinite, where "the tears which we forget to note, our God shall wipe away."—*Horticultural Gazette.*

BYNA BELL, of Cloverside.

Influence of Machinery on Civilization.

THE annexed eloquent extract is from the Philadelphia Daily Ledger,—a paper uniformly correct:—

"The influence of these reforms on civilization cannot be estimated too highly. The old prejudice against machinery, which never had any hold on men of real intelligence, is now disappearing even from the minds of the most ignorant. Everywhere the great truth is being acknowledged, that the influence of machinery is to elevate the condition of the human race, by substituting skilled labor and directing talent for mere executive work. In other words, men are elevated, so far forth, from machines to makers and controllers of machines. The higher qualities of their nature are being called into exercise. Instead of going the same unvaried round of labor for generation after generation, like a blind horse forever travelling the narrow circuit of a mill, they are throwing the burden of all mere mechanical work or machinery, subjecting the dull and inanimate forces of nature to their will, and making iron and steel submissive agents. If the reforms, already made in this direction, afford any criterion for the future, the time will come eventually, when nearly all that is irksome in labor will be avoided, and then that part of the curse pronounced on Adam at least be alleviated.

Yet this aspect of the influence of machinery and civilization, though the most important, is precisely the one least regarded. It is far more common to hear the cheapening effects of machinery extolled than to have these enfranchising and elevating influences pointed out. We do not deny that the placing of cottage goods with the reach of the poorest, has materially improved the physical condition of the human race, and therefore indirectly refined and enlightened mankind. But this is only the ultimate, not the proximate result. Nor is it without alloy. And to a certain extent the effect of machinery in this direction is enervating and sensualizing. It advances civilization in its physical aspect, but not in its moral, intellectual, and religious ones. It fosters less the spiritual and mental part of humanity than that baser part which is 'of the earth, earthy.' But machinery, regarded as a means to banish man's slavery to toil, by substituting brain work for the labor of the hand, is the high road to that fuller and more perfect development of society, which poets have painted, philosophers predicted, and revelation, it is believed by many, expressly promised."

KENTUCKY STOCK SALES.—A correspondent of the Louisville Courier, reports the stock sales on last court day, May 1st, at Paris, Bourbon county, as follows:

"The present has been more than an average county court in the number of stock and persons present. The live stock in attendance was valued at from $150,000 to $175,000, including about 2000 mules. Many of these were from Missouri and other distant parts. There were also horses from Ohio and Indiana; hogs from Massachusetts, and cattle from the barren of Green river, driven here to be grazed upon the beautiful blue grass pastures that now carpet our woodland pastures and cleared slopes.

"Prices, as at last court, were not so well sustained, nor sales so brisk; and consequently some lots were bid in. Mules, two years old, went at $138, $110 and $80; yearlings $100, $79; sucklings, privately, at $50, $60 and $40; cattle at $30, $25 and $15. A large lot of Suffolk hogs and pigs, direct from Massachusetts, were sold at auction by the head at $160, $141, $120, $100, &c. This was the finest sale of hogs ever known."

FUTURE PRICES.—A "Practical Farmer" in the Mark Lane Express, [illegible] article on the above subject as follows:

"Farmers may for once [illegible] upon [illegible] the corn trade for the next year very much in their own hands. [illegible] never was a time when the [illegible] stock of [illegible] so nearly exhausted; and one [illegible] of [illegible] —[illegible] got out from us by war. Why, then, should farmers hurry their harvest work? Prices must [illegible] if they will only be moderate and [illegible] good [illegible] of [illegible] Let every farmer [illegible] to [illegible] and [illegible] a price [illegible]

AGENTS FOR "THE CALIFORNIA FARMER."

Messrs Adams & Co. at a, their offices throughout the United States or Europe.

Messrs. Wells, Fargo & Co., at their offices throughout the Country.

Mr. Wm. M Lester, Travelling Agent for Sacramento City and County

Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*

Messrs. Adams & Co.—*Humboldt Bay, Trinidad, Crescent City, Port Orford, Umpqua City, Scottsburg, and the entire northern coast.*

Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniontown, Eureka, and Bucksport.*

San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.

Benicia, Martinez, &c.—Messrs. Stiles & Dodds.

Union City and Mission San Jose—Messrs. Howard & Chamberlain.

Bidwell's, Butte Co—P. Freer.

Columbia—A. Hunnewell, P. M.

Coloma—D. G. Waldron & Co.

Mokelumne Hill—I. Coffin.

Marysville—R. A. Eddy & Co.

Mount Farm, O. T.—Gen. M. M. McCarver.

Napa—James & Co.

Napa City—Dudley & Co.; Hiram Downing.

Nevada—A. W. Potter.

New York City, N. Y.—J. M. Thorburn & Co.

Placerville—Nash & Davis.

Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.

San Luis Obispo—Dr. Thomas T. Harvey, P. M.

Stockton—C. O. Burton.

Sonora—Taney & Roberts.

Sonoma—Senor Pedro Valasquex.

Suisun—B. F. Finchley.

Union, Humboldt Bay—A. H. Murdoch, P. M.

Yreka—Crum, Rogers & Co; Parker & Roman.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, AUGUST 3, 1854.

Gen. Sutter---Land Titles.

Noble pioneer! Generous man! Suffering martyr! Our heart was stirred with its deepest sympathies, and waked with its most profound reverence, as we saw the Good Old Pioneer upon his charger, leading the van of the returning "California Guard," on Thursday last. It was a proud sight. He was returning from the field, victorious! He had "hit the mark,"—*his* shot had told; a well trained eye, a brave heart, a true aim—the shot sped—victory! victory! God grant that it may be, that it shall prove, ominous of victory for him in the great battle in which his all is at stake. God grant that in this, too, he shall be victorious—that he and those dear to him may dwell with us in peace, happiness and comfort the balance of their days.

The noble Pioneer! Who has done more for California than John A. Sutter? Through whose instrumentalities were these vast gold placers laid open to the light, and to whom mostly do we owe the impetus that has been given to science, and to all the interests that make a nation great? To John A. Sutter and his millrace, California, the United States, and the world owe a debt which they can never pay.

Generous man! Where lives the man upon all God's earth whose hospitalities have been more profuse, whose generosities have been more profuse, whose liberality has been more wide felt than John A. Sutter? How many thousands of the early comers to this land of gold remem-Sutter's Fort! How many have turned in there, weary, almost naked, wet, hungry, and sick—have been met and welcomed, then comforted, clothed, fed and cherished! Who ever called upon John A. Sutter hungry and he gave him no bread? who ever came to him thirsty, and he gave him no drink? who naked, and he clothed him not? or sick, and he ministered not unto him?

How glorious must be the consciousness of that noble Pioneer as he looks back over the past few years, (great ages in the history of the world,) and remembers his own works; there must ever come up before him a voice sweet and consoling as the music of angels—"Inasmuch as ye have done it unto any of these, ye have done it unto me;" henceforth there is laid up for you a crown of glory in the Kingdom of Heaven. The promiso of the Almighty and His blessing is secured for the future, sustaining and cheering him while at present he is a suffering martyr.

Sutter's Fort is in ruins! its fallen and smouldering walls are but a type of his fortunes and friends for the last two years. How trial, trouble, and poverty scatter property and friends! That once noble fort and those broad plains where Sacramento city now stands, were once *his own;* they have passed from his hands. Marysville—that city too, was once his; and the wide and rich fields along the Sacramento were the lawful possessions of the early, brave, good and generous Pioneer; but they are nearly all gone—the little he should have to make his last days comfortable has been kept from him by the "law's delays;" month after month and year after year he has waited patiently, a suffering martyr.

That property and those rights which were the great feature in the treaty with Mexico, and which were so loudly talked of and specially provided for—"the grants under Mexican authority to settlers and citizens"—are now matters of law, and have been for years keeping our brave Pioneer out of his just and lawful rights. This great wrong to one of California's bravest and best citizens we trust will soon be redressed. The calamities that have so peculiarly afflicted the two great cities we have named, would almost seem to be a visitation from the Throne of Justice to awaken their inhabitants to a sense of the duty they owe as defenders of the Pioneer. The fires and floods have been sweeping over this very territory during these trials; they have covered every portion of it save the very dwelling of the Pioneer at Hock Farm, and here too the waters came to his house, significant of his near approach to earthly ruin.

But we trust a better and brighter day is in store for him. Just men and true, will guard his rights and the rights of the early settlers and lawful owners of the soil, in despite of chicanery or fraud, and we breathe the air of confidence freely; and when the General rode past us, returning triumphantly, we felt an inspiration of faith that the dark days were passed for him; and knowing his reliance upon the justice and equity of his cause, we saw emblazoned upon his countenance that reliance; and as he moved on with so noble a bearing, these words floated on the air: "*Dieu et mon droit.*"

Shipping Grain East.

We proposed this plan in a late issue, fully believing it could be done successfully. We believe also that a great relief would be given to the whole country, from the fact of its being done, and done promptly and successfully. Let the grain go forward—let it go by the cargo: we have enough to spare. We feel confident of success in the matter, and in another part of this paper the plan will be found that shall effectually relieve, in some degree, our farmers from the embarrassments that at present hang over them.

Let our ship owners come forward, and offer low rates—let them do it from a high and goodly motive, a purpose to give relief to this great interest.

We refer to the communication of one of our Grain Growers—and we have many such. We have visited the great grain growing districts, and we find a real distress for want of a present market. We rejoice to know that relief is at hand. One of our largest banking houses stands ready to advance liberally upon cargoes consigned to them. We have the fact from themselves—they wish to give relief. We have spoken with several. A generous sympathy is felt for this interest, and we lay before the grain growers of California the plan that will give them immediate relief.

We ask their prompt attention to it, and will aid them to the utmost of our power, if they will communicate with us.

Thanks! Thanks! Thanks!—These are due to our friends—the friends of the California Farmer, in Napa—for their generous addition to our subscription list. This makes Napa county the "banner county." She was the first to start a County Society, the first to announce premiums, and Napa sends the largest subscription list to the Californnia Farmer. According to the announcement in the beginning of our paper, the prize of Harper's Illustrated Family Bible has been awarded to Hiram Downing, Esq., of Napa, who has kindly volunteered to act as our agent, and refused to receive any compensation; but very generously presented our cause to the farmers in his vicinity and obtained in a brief time the handsome number of forty subscribers. We shall endeavor to show to our readers in Napa, and to all our subscribers, that we do appreciate their kindness to the Farmer. San Jose came closely up to Napa—within two. Each of these counties give us a large and handsome subscription; and the result is the establishment of a "county society" in each place. We hope to go on increasing, until every farmer in the State shall become a reader of the Farmer.

Specimen Wheat.—We have received from Mr. Hardman, of Napa, by the hand of Mr. H. Downing, a box containing a parcel of the celebrated many-headed wheat—or barley, as it is called by some. This variety is most remarkable, and should be examined by every grain grower in the State.

Splendid Grain.—Mr. James Morrison, four miles south of Oakland, has sent us a sheaf of the finest wheat we have ever seen—about five feet high, heads ten inches long, and the fullest, cleanest, and best filled grain that has been exhibited yet. Mr. M. approves and practices *deep* plowing, and *sub-soil* plowing.

Artesian Wells.

This subject should command more interest among farmers, generally, and we see no reason why the *mininig interest* should not awake to its value.

The Press should give it their influence. Artesian Wells will work a complete revolution in the farming interests, and applied to mining, would reveal a source of wealth not yet dreamed of. In a trip through the Valleys, recently, we traveled with a distinguished citizen from Alabama, who related to us facts in connection with the history of the banks of the Wabash. A large tract of land, of many miles in extent, had remained uncultivated, valueless for want of some method of irrigation. Artesian wells were tried with complete success, and the result is known. One of the most prosperous spots in that whole territory, is that fertilized by Artesian wells.

All our broad valleys adjacent to the high lands, can be immediately doubled and trebled in value through the introduction of these invaluable and never-failing springs; not only utility, but beauty is revealed. Fountains of the loftiest height, and jets of every variety can be introduced throughout the grounds of every proprietor, machinery set in motion, power for the moving of much that is useful; turning lathes, grindstones, hand mills for grain, etc. Artesian wells will be the labor-saving machinery of California—they will also cool the atmosphere of a dry climate, and render it more endurable. Artesian wells are the certain destroyers of gophers, squirrels, moles, and thousands of insects that destroy crops and discourage farmers; and they are a great safeguard against *frost*—they bring from below the earth a *warmer* temperature, and diffuse it over the surface of the earth where the waters flow, thereby giving a higher temperature and preventing the effects of frost.

We annex below the valuable remarks of Dr. C. F. Winslow,—once before published—but they are so valuable that we re-publish them, that those who have not yet seen them may realize their benefit. The Dr. has conferred great benefits upon science; his little work "*Views of the Universe,*" should be in the hands of every lover of God's beautiful earth—it is to literature what the diamond is among the jewels, light in various beautiful colors.

"Mr. Editor:—I am very glad to see you calling the attention of farmers to the subject of Artesian wells, as the stimulus to Agricultural enterprises. The geological structure of the great Sacramentu valley leads me to believe that complete success in irrigating its broad and prolific plains will result from boring Artesian wells. It would not be strange if in some places water rose to a much greater height than is observed in the valley of San Jose. The irregularities of the surface of the foundation rock, over which the detrital deposits have gradually accumulated, may render success greater in some localities than in others; but as a means of irrigation, the system of boring must be the main dependence of the Agricultural interests, and it will probably be found sufficient, and its cheapness must recommend trials sufficiently numerous to test its utility. But farmers in the broad and deep valley, stretching between the Sierra Nevada and Coast Range, should not be disappointed if they have to sink their bores much deeper than their neighbors in the valley of San Jose. The detrital accumulations are much deeper probably in the Sacramento than in the San Jose valley, but the sources of the springs are higher, and it would not be strange if splendid and lofty fountains, in some places, should follow boring to great depths. At any rate, the plan of buring for water as a means of Agricultural irrigation ought to be put to the test throughout the entire boundaries of the Sacramento valley, wherever an enterprising farmer can employ his means for that purpose. The amount of fruitfulness that would be stimulated is beyond account, and while no Agricultural country on the globe is so liable to a famine as California, no country could be so strongly fortified against such a state of things as could this by a universal adoption of Artesian wells throughout the valley regions of the State." Yours, C. F. W.

Fine Peaches.—The first Peaches of the season were produced at the gardens of A. P. Smith, Esq., on the banks of the American river, Sacramento. Delicious "Royal Georges!" and "George the Fourth!" Call, friends, at the office of the Californnia Farmer. We will allow you to—to—smell—and that is worth a dollar—and yet we shall be glad to show you the reality. Mr. Smith will have a very handsome crop the present season.

Peaches! Peaches!—A branch of a Peach tree, the growth of the present year, was brought to us by Mr. Leonard Frost, of Mountain View farm, Santa Clara county. It was very thrifty, bearing eight fine peaches, four of them united in a "quartette;" the branch was three feet in length—variety, "Early Crawford." These are but the forerunners of the beautiful crop that is to follow.

The Great Machine.

Truly can it be said, we live in a "great age." It will appear almost incredible when we say to our readers that there is a Harvesting Machine, now at work in the Valley of San Jose, that will harvest twenty acres per day, and yet such is the fact. We saw it moving on its ponderous wheels, like the great "Car of the Juggernaut," and heads were bowing down before it as numerously, and were crushed as effectually, also—for this machine not only *harvests* the grain, but *threshes, cleans, winnows, and bags it,* performing all the work at the same time.

A team of twenty horses takes this mighty *wholesale harvester* steadily through the field,—the knives take off every head clean and carry them over a cloth drum into the thresher, this in turn taking them into the separator and fan mill, and from thence up a hopper into the bags, these are filled, sewed up and rolled gently off into the field behind the machine. At the close of the day's work, the harvester looks back and sees *twenty acres* of headless straw, while the decapitated grain lays over the broad field in well-filled bags, resembling hundreds of large sheep.

This is one of the most wonderful inventions of the age, and the sight of it is well worthy a visit to this great valley. The machine will be at work for some time, and all who feel interested will never regret the trouble it costs to witness it. It is at work upon the grain fields of Messrs. Horner, Beard and others, near the Mission of San Jose.

Fire among the Farmers.

The heavy losses so often experienced by the farmer, from the carelessness of some, and the villainy of the incendiary, calls for the most energetic action and the most watchful care. Every precaution should be adopted against exposure from the public roads, and public or private dwellings. *Cigars* thrown from stages and carriages, by travelers without reflection, often bring ruin to the hopes and prospects of the farmer. *Sparks* from buildings blown by the wind, prove "how great a fire a little matter kindleth."

To the *incendiary,* the cool, premeditated, revengeful incendiary, but little mercy should be shown. Mercy is thrown away upon such. There are means that can be used to save us from such calamities. "An ounce of preventive is worth a pound of cure." Farmers, "shut and fasten your stable doors *before* your horse is stolen," say we.

We would suggest *planting corn* upon the borders of all grain fields, next the highways, and also around the divisions of farms, and again across very extensive fields where 300, or 500, or 1000 acres are owned by one party. Six, eight, or ten rows of corn will make an effectual barrier *against fire.* Rows of potatoes will do it, and all farmers will need both.

We trust these suggestions will not be disregarded another year. Thousands of acres would have been saved, had such plans been used heretofore. Fire is a *good* servant, but a *hard master.*

Superb Specimens of Grain.—To those who have seen and heard of the grain fields of California, of their enormous growth, and the size and weight of the grain, we can assure them the half was not told. The other morning, a splendid sheaf of four kinds of grain, forming a superb pyramid, was brought to us by Messrs. Hawley & Cornell, of Union City, Alameda county. The centre of the sheaf was of oats like the top of a *jet d'eau;* the second formation, a cascade of Australian wheat; the third, Chili barley, and the fourth, Chili spring wheat. The whole forming one of the finest sheaves of grain we have ever seen made. It has been estimated by Messrs. H. & G. that their oats will yield them one hundred bushels per acre, the Chili wheat fifty bushels, the barley seventy-five bushels, and the Australian wheat forty bushels. Here we have facts, and such as can be easily made satisfactory to all who feel any interest in these great staples of California. Call at the office of the Californnia Farmer and see them.

Great Increase of Domestic Fowls.—We saw upon the ranch of Jessie Beard, Esq., the best proof of the success of this branch of domestic industry. Mr. Beard commenced in January last, upon his fine ranch, with ninety hens. Now in less than seven months the stock has increased to over *fifteen hundred* hens and chickens on hand, besides about three hundred that have been sold. All this has resulted in doing things well. Personally and particularly has the interest been guarded, and there has been no lack of that proper care which is always needed to insure success.

The Grape.

The following we publish as one of the best, simplest, and most instructive lectures that can be given upon the Grape. The works of Clement Hoare are used in Europe and America as the standard in the cultivation of the vine:

Observations on the present method of cultivating Grape Vines on open walls.

There is, I believe, no branch of practical horticulture, which the possessors of gardens are so deficient in the knowledge of, as in that which embraces the culture of the grape vine; and, yet, singular as it may appear, there is no fruit tree of any description that grows in this country, that can be depended upon with such certainty for a full crop, or that will yield so ample a return, as a vine judiciously cultivated on an open wall.

Let any person, in the month of September, make a tour of inspection through the southern counties of England, in which nearly every cottage may be seen with a grape vine trained on its walls. Let him stop at intervals in his journey, and select any number of vines for examination, and carefully estimate the weight of fruit growing on each, and the extent of walling occupied in producing that fruit; and having calculated the average weight grown on every square foot of walling, let him then be told, which he may be with truth, that at least *five* times the quantity of grapes of superior flavor might be annually produced on the same extent of surface. Let him also select any given district, and estimate the number of superficial feet of walling which the buildings in that district contain, and on which nothing whatever is grown, or at least nothing of any value, and which might, at a trifling cost of time and trouble, be annually covered with fine crops of grapes; and he will find to his astonishment, that for every square foot on which vines are trained, there are at least *twenty* square feet that are either entirely vacant, or occupied in a useless manner. If he then sum up his calculations, the result will show, that, for every pound of grapes that is now grown, not less than a *hundred* pounds might be annually produced on the existing surface of walling without the additiou of a single square foot! Nor let it be supposed that this estimate is made hypothetically; on the contrary, it is the result of actual inspection and careful observation, and is considerably within the mark as to the quantity of grapes that might be annually grown. Every moderate sized dwelling house having a garden and a little walling attached to it, may, with ease, be made to produce, yearly, a quarter of a ton weight of grapes, leaving a sufficient portion of its surface for the production of other fruit,

It is difficult to account for the indifference which has hitherto been manifested towards the propagation of the vine, or to assign sufficient reasons why a fruit so universally esteemed as the grape, should have remained stationary in respect to any improvement in its mode of culture.

I suspect, however, that the force of custom and example will be found amongst the chief operating causes. Scarcely any person, when planting vines against his premises, ever thinks of setting apart for any one to be trained on, a less space of walling than a hundred and a hundred and fifty, or two hundred square feet, seeing that the universal practice is to suffer a single vine to cover as quickly as possible the entire surface of one side of a house or building, or a large portion of that of a garden wall. And this seems to be done under the idea, that the more wood there is in a vine the more grapes it will produce, or that the one will be in proportion to the other. It happens, however, that the fact is precisely the reverse. If a vine be suffered to make a large quantity of wood, it will bear but little fruit; if it produce good crops of fruit, it will make but little wood; the one checks the other. To permit a vine, therefore, to make a great quantity of wood, under the idea of getting thereby a great quantity of grapes, is completely grasping at the substance, and catching the shadow.

Another reason why the method of cultivating the vine in open walls has remained stationary, may be found in the fact, that in the gardens of the rich, where professed gardeners are kept, grapes on vines of this description are but seldom grown to any extent, a sufficient quantity for the table being brought to perfection under glass. Hence, one of the principal sources from which improved modes of culture are, in general, derived, is thus closed, and the routine of management of this most valuable fruit thereby consigned to the chances of empirical practice.

The grand parent error which prevails universally in the cultivation of the vine on open walls, lies in the method of pruning usually adopted, and this is, undoubtedly the consequence of the nature of the plant and its peculiar characteristics being, in general, but little understood. The immense quantity of wood which a vine annually produces, and the force with which its sap flows, causing its most vigorous shoots to be formed at the extremities, render it necessary, in order to keep the plant in a good bearing condition, and its branches within a reasonable distance of its stem, that the pruning knife should be used to a far greater extent than is ever practised on any other description of fruit tree whatever. The most severe manner, indeed, in which that instrument is at any time applied to other trees, is as nothing when compared with that required by the vine.

In the course of the growing season, a vine in a healthy condition will make a quantity of bearing wood sufficient to produce ten times as much fruit as can be brought to maturity. When this fact is considered in connection with another, namely, that the wood which bears fruit one year, never bears any afterwards, and is therefore of no further use in that respect, it will easily be seen to what a surprising extent the pruning knife must be used, to get rid of the superabundant wood which the plant annually produces. But nine parts out of ten of the current year's shoots, and all those of the preceding year, if possible, to be cut off and thrown away, is apparently so much beyond all reasonable proportion, and the rules usually observed in pruning other fruit trees, that few persons ever possess the courage to attempt it. And herein, as remarked before, lies the capital error in the common method of managing the vine.

A vine in the third or fourth year of its growth, will in general show a few bunches of grapes, and these are usually suffered to remain and ripen, instead of being plucked off as soon as they appear, having been produced before the plant has sufficient strength to mature them without injury to its constitution. Although the quantity be small, it inflicts a severe blow on the vital energies of the vine, from the exhausting nature of the process of maturation. At the proper season the pruning knife is applied, but the operator being in perfect ignorance, as to whether the plant has sufficient strength to ripen any fruit or not in the following year, looks at the young wood, and seeing four or five good strong shoots, cuts them back to as many buds each, leaving, perhaps, twenty in the whole. Summer comes, and the vine having been seriously crippled by the premature ripening of fruit in the preceding year, and having now twenty shoots to supply with nourishment instead of two or three, the sap is so diminished in quantity, and distributed also through so many channels, that it is incapable of forming an inch of really good bearing wood. The shoots protrude, and though small, produce a great mass of foliage; the evaporation from this being far too great for its loss to be supplied by the roots, a languid circulation of the juices of the plant takes place, and it receives thereby a most serious check in its growth. The result is, that, at the end of the season, no shoots larger in size than that of a small wooden skewer are to be seen except at the extremities.

The proper season arriving, the vine is again pruned, and again eight or ten times as many buds are retained as the plant can nourish. The same disproportionate mass of foliage follows of course, and the same exhausting effects are produced on the vital powers of the plant. No bearing shoots are formed except at the extremities, and these being retained at the autumnal pruning, old blank wood begins rapidly to cover the surface of the wall. The method of pruning, also, being in general what is called the spur method, tends more than any other to the permanent retention of old wood. And thus the vine commences its fruit bearing under the most adverse circumstances.

The same mode of culture being followed in yearly succession, the vine quickly spreads over its allotted space of walling, exceeding, perhaps, two hundred, or even three hundred superficial feet. It then contains a vast number of long and useless limbs, on which may be seen scores of excrescences, dignified with the name of spurs, producing in the growing season a superabundance of foliage, but with little fruit, and that of an inferior description, and requiring in its management a tenfold portion of time and trouble beyond what would be necessary under a proper mode of culture.

To those characteristics of the usual method of managing a vine, may be added two others, namely, that of suffering the stem and principal branches to be covered with several years' accumulation of decayed layers of bark, and of continually digging the border in which the roots run, and cropping it with vegetables, even close up to the very stem.

This brief description of the method of cultivating vines on open walls, will apply, I believe, to ninety-nine out of every hundred throughout the country. And it may be remarked of it, that during the very first year of the plant having been suffered prematurely to ripen fruit, and throughout every successive year afterwards, not a single point of culture has been practised but what may be described as most erroneous. Every step taken has been apparently for the purpose of rearing a superstructure of old barren wood, rather than the production of abundant crops of fine flavored fruit.

Can it be matter of surprise, therefore, that under such a mode of culture, grapes grown on open walls do not, in general, attain to a higher degree of perfection?

Mr. Editor: I noticed in your last paper, an article on the subject of Wheat, in which it is stated, that the bearded wheat has this year on the Moquelumne entirely escaped the smut, and that what is called the Salt Lake variety, has likewise escaped it; and such I believe to be the case here in the valley of San Jose, though I have heard of none here, however, as the Salt Lake variety. The only bearded wheat known here is the California, and that, last year, was generally injured by rust. The best variety here is the Chili; at least, such is the case this year; and it did well last year, being generally free from rust, and no smut. I have just finished cutting on my farm thirty five acres of it, all of which is entirely free from smut; and it is worthy of notice, that a field of Australian wheat, separated from mine only by a wagon track, and on the same kind of land, and sown at the same time is at least one-third injured by the smut. The Chili wheat grows well on any dry land, it has a good strong yellow straw, and does not [illegible] fall. It is a smooth head white with a white grain of good size, yielding from 40 to 50 bushels per acre.—*M. S., in San Jose Telegraph.*

London Horticultural Society.

We give below the first *fete* of this eminent society. We invite the attention of our readers to the interest manifested in these exhibitions in Europe, and we ask the earnest consideration of our citizens to facts which cannot be denied. In Europe the science of Agriculture and Horticulture is appreciated, and it ranks as the first of sciences. The royal family and the nobility take pleasure in the meetings; and why should not the royal family and the nobility of the United States, and all California besides, take a corresponding interest in these matters? The lofty position which this science occupies abroad results entirely from the deep interest taken by all classes in all that relates to it.

California can exhibit from her half cultivated prairies, and her open gardens, product that shall surpass the finest specimens that grace the costly conservatories of Europe; and yet where is the relative interest? Free and independent cultivators of the soil are the members of the royal family of our country, and compose our nobility. Let them then emulate the example of the old world in their attention to this great science, and the results will be more glorious.

"The first *fete* of the Horticultural Society took place on May 13th, in the society's grounds, at Chiswick. The weather was unusually propitious, and the display of fruit and flowers was superb. Several milirary bands, stationed at various points in the grounds, materially added to the attraction of the scene. Among the visitors present we observed the Countess of Salisbury, the Bishop of Winchester, Lord and Lady Downes, Lord and Lady Bridport, the Earl of Carnarvon, the Marchioness and the Lady Hastings, Sir John and Lady Catherine Boileau, Sir Charles Lemon, &c. The following is the award of judges: L.G. 1, signifies first large gold medal; L.G. 2, second large gold medal; G.K. 1, first gold Knightian medal; G.K. 2, second gold Knightian medal; G.B. 1, first gold Banksian medal; G.B. 2, second gold Banksian medal; S.G. 1, silver gilt medal; L.S., large silver medal; S.K., silver Knightian medal; S.B., silver Banksian medal; C. 1, first certificate; C. 2, second certificate.—Class I. Exotic Orchids, in collections of 20; L.G. 1, Mr. Williams; L.G. 2, Mr. Blake; G.K. 1, Mr. Woolley; G.K. 2, Mr. Carson. Exotic Orchids, in collections of 10: G.B. 1, Mr. Dods; G.B. 2, Mr. Green; S.G., Mr. M. Clarke. Exotic Orchids, in collections of 15: G.B. 1, Messrs. Rollison. Stove or Greenhouse Plants, in collections of 20: L.G. 1, Mr. Green; L.G. 2, Mr. John Gillam. Stove or Greenhouse Plants, in collections of 15: G.K. 1, Mr. Hamp; G.K 2, Mr. Rhodes. Stove or Greenhouse Plants, in collections of 6 (in pots or tubs not less than 20 inches in diameter): G.B. 1, Mr. Dods; G.B. 2, Mr. Carson; S.G., Mr. Peed; L.S., Mr. J. Morris. Stove or Greenhouse Plants, in collections of 6 (in pots not exceeding 13 inches in diameter): S.G., Mr. Taylor; L.S., Mr. Over; S.K., Mr. Dods; S.B., Mr. Jarvis; S. B., Messrs. Pamplin.—Class II. Collection of Fruit: G.B. 1, Mr. Fleming; G.B. 2, Mr. Clements, including some very remarkable black Hamburg grapes. Collection of Grapes: S.G., Mr. Martin; L.S., Mr. Brearley; S.K., Mr. Jennings. Black Hamburg Grapes: S.B., Mr. Forbes, Mr. Mitchell, Mr. Spary, and Mr. Dods. Black Hamburg and Chandos Muscat Grapes: S.B., Mr. Spencer, Cayenne (4lb. 14oz.) and Lemon Queen (3lb. 13oz.) Pines: L.S., Mr. Turnbull. Ripley Queen Pine (4lb.): S.K., Mr. Jones. B. Jamaica Pine (3lb. 5oz.); S.B., Mr. Jennings. British Queen Strawberries, in pots and gathered: S.G., Mr. Smith. Paul (nurserymen). Roses in pots: G.B. 1, Mr. Bushy; G.B. 2, Mr. A. Rowland; S.G., Mr. Sage (amateur.) Helichrysums: S.K., Mr. Taylor. Tall Cacti: L.S., Mr. Green. Single Specimens: S.K., Messrs. Veitch, for Vanda suavis; S.B., Mr. Dods, for Gompholobium polymorphum; C. 1, Mr. Clarke, for Ixora coccinea.

Remarkable Escape.—Mr. Mann, of San Jose had a narrow escape some ten days since. It seems he was out practicing with a revolver, with a friend, when, just previous to firing, he dropped his hand, having it in his pocket loaded and capped, and on his return at arm's length, his pistol went off, passing through the pants, boot top, drawing [illegible] down vandals [illegible] and there remained. The ball is preserved to show to skeptics.

The Mammoth Tree.—We take the following from Hovey's Magazine of Horticulture, Boston:

The Red Wood, or Giant Taxodium of California.—Mr. Lobb, the collector of Messrs. Veitch & Co., of Exeter, England, who is now in California, has sent home seeds of the Giant Taxodium, with a description of the tree, which Dr. Lindley notices in the Gardener's Chronicle, and suggests the pompous name of Wellingtonia gigantea, believing it to be botanically distinct from Taxodium. Whether it is or not, remains yet to be decided, but if it may prove distinct, we trust that every American, at least in this case, will repudiate the name! Mr. Lobb was not the first to discover this tree: in a letter, now before us, and which we shall allude to hereafter, Mr. W. R. Prince states that he and other Americans discovered it at the head of the Stanislaus, in June, 1849, and believing it to be a true Taxodium, as he still thinks it is, only a different species, it did not attract any particular attention, only from the uncommon size of the specimens. In our note to Mr. Prince, requesting some information in regard to the tree, we suggested if it was a distinct genus, that it should be named after the beloved Father of our own country, and we now publicly suggest it again. Let Dr. Torrey or Dr. Gray give it a critical botanical examination, and if not a Taxodium, let this giant of our American forests be called Washingtonia—in honor of one who, above all others, deserves the homage of this and every people.

Let it be Washingtonia! Emblematically true, for it soars as much above the other trees of the forest, as did the great mind and holy purposes of Washington over that of other men.

[communicated.]

The following is but the truthful description of a scene witnessed within the walls of a beautiful garden, a few days since:

"O, Catch my Bird!"—Hear you the cry of of that maiden, with flushed brow, a beating heart and streaming eye? She watches the tiny bird that has just escaped from the little wiry prison that she is holding in her hand. Days and weeks she has watched the little songster, feeding it with crumbs from her own hand. Its every chirp and note is as familiar as the sounds of her favorite guitar, and the note of each are in unison with the chords of her own young and happy heart. Watch now, a moment only, and she springs forward that she may again imprison that pretty little spirit, that has but now tasted of freedom. See with what eagerness she moves on bearing the prison house of her little favorite, hope and fear alternately beaming from her features as the freed bird flies from bough to bough. What a picture of life; how emblematical, that the happiness of one created being should be enhanced by depriving another of its liberty and enjoyment. But that sweet bird is still free. Alas! a moment only more, quick as thought—hope says to the maiden, the freed bird shall be caged again. Look now! within that wiry prison house still is found the "mate-bird," fluttering wildly round and round,

"Within that wiry prison house still is found,
The 'mate-bird,' wildly fluttering round and round."

Malden, set down the cage and you will see the freed bird will come back, will find its mate, and come to thee.

Children not Taught to Think Enough.—Study, and the means of study, are indispensable; but all study and no reflection will never make a scholar. A man may read a monument of books, and never know the more; because, knowing but a little of all, he knows nothing definite of a part. So with children. They should obtain the faculty of reflection. Moderate study, and rigid, scrutinizing, untiring thought, will bring a child any sufficient knowledge. Who is the successful man? He who thinks. Who is the distinguished professional man? He who reflects and investigates. And who the enviable scholar?—the hook-worm? Ask Newton with his apple, Watt with his engine, or Franklin and Morse with the kite and lightning; and they will tell you, as all history portrays, that knowledge comes only after close, vigilant thought; and show me that boy who is reserved, thoughtful and inquisitive, and when he comes to manhood I will point you to an intellect; or the girl who sees beauty in nature, and admires nature for its beauty and instruction, and I will show you a store of intellectual brightness.—*Maine Com. School Advocate.*

The velvet moss grows on the sterile rock, the mistletoe flourishes on the naked branches the ivy clings to the mouldering ruins, and the pine and cider remain fresh and fadeless amid the vegetations of the preceding year; and, Heaven be praised, something green, something beautiful, beautiful to see and grateful to the soul, will in the darkest hour of fate, still twine its tendrils around the crumbling alters and broken arches of the desolate temples of the human heart.

Tall Threshing.—We had the pleasure of a visit from Mr. H. Dowing of Napa City, who is now using a "horse-power thresher" in [illegible] county. Mr. D. has [illegible] and he has accomplished the [illegible] even hundred bushels per day, [illegible] easily. In one day last week the [illegible] turned out five hundred and [illegible] bushels. Remember, this was by a machine [illegible] by horses, by [illegible] Napa City, or [illegible] Dan Gay who [illegible]

Summary of News.

FROM THE EAST.

The Uncle Sam of the Independent Line, arrived at this port on Sunday morning last, and the Golden Gate, of the Mail Line, on the evening of the same day. The Pacific, of the Nicaragua Line, arrived on Monday. They bring dates from New York to July 5, and from London to June 17. The news is of not much importance.

The Gadsden treaty with Mexico was ratified Friday, June 30, and soon after Gen. Almonte presented himself at the Treasury Department and received Secretary Guthrie's check on the Sub-Treasurer at New York for $7,000,000. The boundary line of the territory acquired by this treaty, commences on the Rio Grande at 31° 47', five miles above the town of El Paso, follows that parallel due west a hundred miles, then turns at right angles and runs south 27 geographical miles, to the line of 21° 20', when it again bends to the west, following that line to 111° west longitude from Greenwich. Thence it proceeds in a straight line to a point on the Colorado river twenty miles below its junction with the Gila. The principal portion of this new territory is a worthless desert.

The mysterious association of "Know Nothings appear to be obtaining great success. They carried the municipal elections at Norfolk, Va., and Memphis, Tenn., and are making their appearance in all parts of the country.

Some interest is felt in relation to the Gold Mines recently discovered in Franklin county, Me. A company with a capital of $12,000 has commenced operations. Some of the gold has been assayed, and pronounced worth $19 per ounce.

The death of Madame Sontag is announced with the Mexican news by telegraph. She was first taken sick on the 11th June, on which evening she was announced to appear in Lucrezia Borgia. She was somewhat better on the 16th, but a relapse occurred and she died on the 18th. Universal grief was manifested for her by the citizens of Mexico, and an immense number attended her funeral.

The Hon. Daniel Wells, Chief Justice of the Court of Common Pleas in Massachusetts, died at his residence in Cambridge Friday, June 23d.

Thomas Ritchie, Esq., long known as the editor of the Richmond Enquirer, and for a few years as editor and proprietor of the Washington Union, died at noon on Monday, July 3, after a lingering illness. Mr. Ritchie was about 76 years of age, a native of the State of Virginia, and for more than fifty years acted a prominent part in the politics of the State and nation.

The amount of gold deposited at the Philadelphia mint for the first four months of the present year, was $17,749,579, showing a decrease of $7,485,792 from the amount deposited for the corresponding period of 1853.

By telegraph to New York we learn that a bill had passed the Senate for the establishment of a line of steamers between San Francisco and Shanghae, touching at the Sandwich Islands and Japan.

Commodore Isaac McKeever has been ordered to the command of the California Navy Yard, with Commodore D. S. Farragut, as second in command.

An express train recently ran from Syracuse to Rochester, N. Y., eighty-one miles, in ninety-six minutes.

A terrible railroad accident occurred July 4th, on the Susquehanna road, nine miles from Baltimore. An excursion train with 2000 persons came in collision with the regular passenger train from Baltimore for New York. The excursion train was going at full speed. Over thirty persons were killed, besides a hundred injured, many fatally. Carelessness was probably the cause of the accident.

The clipper ship Trade wind came in contact off Cape Sable with the ship Olympia from Liverpool, both vessels sinking almost immediately. Twenty lives are supposed to be lost.

From Europe advices contain nothing new, of much importance. The Russians have been trying hard to take Silistria, but without success, and the latest accounts represent them as about to give up the siege, though the Turks had not been reinforced by the Allies. Nothing decisive has been done by the Allied fleets or land forces in the Baltic or Black Sea, or on the Danube. From Asia, the Circassians are reported now to have possession of all the fortresses along their coast. The last one was defended by 20,000 Russians, and was not evacuated till after a severe struggle and heavy losses. Large stores of provisions, munitions of war, etc., were found in the fortress.

Kossuth has been making a speech to the English at Sheffield in which he advises the government to let Austria go as she pleases, and help Hungary and Poland to revolt.

Mr. Soulé appears to have been entirely unsuccessful in restoring friendship between the United States and Spain, or doing anything towards the purchase of Cuba.

FROM THE INTERIOR.

The Columbia Gazette reports quite a number of prosperous miners in that vicinity. R. J. Steele & Co. took 65 ounces out of their claim in one week, making a clear dividend of $265 to the share; the next week they took out 96 ounces, and last week 80 ounces. Roberts & Co.'s claim pays from fifteen to twenty dollars per day to the hand. The New England claim at Sawmill Flat took out on Wednesday a piece of pure gold weighing 26 ounces. A company of five men have struck a new lead at the last named place, which promises to pay rich. Smith & Co. a few days since obstructed a piece weighing 20 ounces. At Knickerhocker last week, $60 was washed out of one pan of dirt. Gold Hill still yields well and the supply of water is abundant. The reports from Springfield are highly encouraging. The miners on the South fork of the Stanislaus have commenced work in good earnest; the river has been very low but the recent heavy rains in the mountains caused it to rise two feet above its usual height.

The Grass Valley Telegraph states that notwithstanding the extreme heat, our industrious mining population have continued their delving, and fair proceeds have rewarded their hardy effort. At Squirrel Creek two lumps were taken out the past week, one weighing $66 and the other $22. Donovans claims on Wolf Creek yield 36 to 65 ounces per week with six or seven men. From Iowa Hill favorable accounts are still coming in. It is beyond a question that Iowa Hill lead is one of the richest in the country, but at the same time, like all new towns in this country, everything is overdone.

The United States company on Bourbon hill, says the Nevada Journal, have recently procured a large and excellent engine and pump, by the aid of which they design to work their ground. It is 230 feet deep. Their pump is spoken of as one of the best and most expensive ever brought into the mountains, being 230 feet long and capable of throwing a five or six inch stream of water.

The Marysville Express states that new and rich diggings have been discovered near Pine Grove, on the South Fork of Slate Creek and Rowland's Flat. They are very extensive, and so far as prospected, prove to be very rich, paying 50 cents to the pan four feet above the bed rock.

Jackson has been elected the seat of justice for the new county of Amador, with Wm. A. Phœnix, whig, for sheriff. The other county officers are democrats.

Fire in Marysville.—Another large fire occurred at Marysville, Thursday evening last. It commenced on the corner of Second street and Virgin Alley, sweeping nearly every building from Second to Fifth, between B and D streets. Six blocks, or about 200 houses, all frame, were consumed, besides considerable lumber. The heaviest losses are the Tremont House, Iowa House, Galena House, Hudson & Co.'s lumber yard, and Greeu & Ripley's livery stable. Loss $250,000.

Fire on Coon Creek.—The Placer Herald states that the residence of Mr. Waldron, adjoining Cox's Ranch, was destroyed by fire on Monday, 23d July. The family escaped almost in a state of nudity. Mr. Waldron's hand and face were severely burned in rescuing his children, the youngest of whom died in less than twenty-four hours, from the effects of burning.

Fire at Sacramento.—A dwelling belonging to Hon. Todd Robinson, and occupied by his domestics, was destroyed by fire on the 31st inst. A valuable law library of the Judge's was destroyed. This is a loss that money cannot restore, and much to be regretted. Col. Zabriskie liberally supplied refreshment to Engine No. 3, which was promptly on hand.

Outrage.—Don Nemecio Berreyesa, living near San Jose, and said to be one of the kindest-hearted and estimable citizens of the county, was forcibly taken from his bed by a party of men, on Friday night, 21st ult. and hung. His body was found by his friends on Saturday morning, suspended to a tree.

On Saturday evening last, W. S. Way was killed by H. B Atkins, at the store of the latter, on Front street. Atkins affirms that he acted only in self-defence.

Mr. J. T. Wright has taken control of the steamship America and placed her on the Humboldt Bay, Trinidad, Crescent City, Port Orford and Umpqua route.

Wm. B. Shepherd, according to Judicial sentence, was hung in this city last Friday, for the muder of Henry C. Day.

MARRIED.

On the 30th July, in this city, by Rev. Mr. Scott, Henry Channing Beals, and Miss Mary E. Ward.

On the 31st July, in this city, by Rev. A. Williams, Wm. Carman, M.D., of San Fraucisco, and Miss Margaret Smith, formerly of Flushing, L. I.

On the 30th July, in this city, by Rev. Mr. Scott, Charles Wheatcleigh, of London, England, and Miss Lucy J. Ansel, of Baltimore.

On the 27th July, in this city, by Rev. A. Williams, Mr. Andrew S. Wadleigh and Miss Maria H. Black, both of Sacramento.

On the 27th July, in Sacramento, by J Gaines, Esq., Mr. Robert E. Beasley and Miss Elizabeth M. Baley, all of Agua Frio.

On the 27th July, in Sonora, by Justice L. Lane, John V. Gowen to Martha Ann Monning.

On the 21st June, in San Augustine county, Texas, Mr. J. E. Terrell, of San Francisco, and Miss R. Anne Love.

DIED.

On the 31st July, in this city, of congestion of the lungs, Mrs Emma Florence Johnson, aged 25 years.

On the 30th July, in this city, of consumption, R. Allen Carlton, aged 29 years.

On the 27th July, at Trinity Ferry House, Mr. Palmer, of typhod fever.

On the 23rd July, at Marysville, Dr. S. H. Baldwin, of Rose's Bar, and late of Rochester, N. Y.

On the 27th July, at Galena Ranch, Yuba county, Wm. Reichherdt, aged 35 years.

On the 23d July, at Hawkins' Bar, Tuolumne River, from an attack of epilepsy, James G. Hall, late of Philadelphia.

Aug. 1—Steamships Sonora, Whitney, and Yankee Blade, Randall, Panama; Ham brig Rose, Stege, Vancouver Island.

Card.

SPECIMEN GRAINS!

DESIROUS to advance the knowledge of our California Crops to the various Horticultural and Agricultural Societies of the various States and Europe, we invite all who are willing to aid us in this matter to forward us specimens of Grains and Grasses, of any and all kinds. Such shall be forwarded carefully, with credit to the growers. The names of the growers, and place where grown, will always accompany the packages.

Jewelry and Silverware.

OUR immense stock of Watches, Jewelry, Diamonds and Silver Ware, has been imported by ourselves, for a Regular Customer Trade, and is of the mostly costly and superior description, but owing to the depressed state of the market at present, we are disposing of them at New York prices.

BARRETT & SHERWOOD,
City Observatory, 135 Montgomery street.

N.B.—Quartz Jewelry of our own manufacture, at greatly duced prices. 5

Valley Hotel, Suisun.

Fourteen Miles from Benicia.

THE undersigned, in opening his new hotel, takes pleasure in announcing to his friends and the public, that at his place they will meet with the best accommodations the country affords, and he solicits their patronage.

5 THOS. S. FINCHLEY, Proprietor.

MARKET REPORTS.

San Francisco, August 2, 1854.

The same inactivity rules throughout, and it is unnecessary to make statement of prices. The great staples, Grain and Flour, remain in *statu quo*. Sales only made from necessity, by the raiser, of grain, and by the merchant, of flour, to escape a greater loss. Provision and Lumber come to a poor market. We refer for our Grain crop to the correspondence in another column which is important. There is hope for the farmer. The 5,000 bbls. Flour, per the Messengor, also came to a poor market. Shippers from abroad will learn by and by.

A full supply of Looking Glass Plate, at moderate prices.

For sale by LOGAN & CO., 187 Clay street.

Picture Frames and Looking Glasses made to order at short notice. 5

TIME.

PARTICULAL attention paid, as usual, to the cleaning and repairing of Watches, by

BARRETT & SHERWOOD,
City Observatory, Montgomery st. 5

State Agricultural Society.

A Meeting of the EXECUTIVE COMMITTEE of this Society will be held at the Counting Room of the President, TO-DAY, August 3, at 10 A.M.

Per Order
F. W. MACONDRAY, President.
C. V. Gillespie, Secretary. 5

Notice.

THERE will be a meeting of those engaged and interested in Agriculture in Sacramento County, at McNulty's Hall, on Saturday, the 5th day of August, 1854, for the purpose of forming a County Agricultural Society, authorized by Act of the Legislature of the State of California.

The State has liberally appropriated Five Thousand Dollars, to be awarded in premiums at the State Agricultural Fair, to be holden in San Francisco in October next.

It is confidently expected that the great interest of Agriculture, not only in this County, but throughout the State, will receive its full share of attention from the farmers of Sacramento County. C. I. HUTCHINSON,

Vice-President State Agricultural Society.
Sacramento, July 28, 1854. 5

OFFICIAL EDITION OF STATE LAWS.

HAS BEEN MADE IN ORDER TO KEEP UP WITH THE TIMES.

OUR Friends and the Public are assured that we shall keep on trying, and deserve the reputation of being *the place* to get a good breakfast and dinner, and in future at such prices that shall not fail to give general satisfaction.

We are gradually overcoming the many obstacles that at first presented themselves; and hope now, by every attention to business, to merit a due share of patronage.

Soup will be hereafter served at 12 M.

HOLMAN & SHERWOOD, Proprietors.
Wednesday, August 2d, 1854. 5

SWEETSER & CO.,

DEALERS IN

Game, Poultry, Fish, Butter, Cheese, Eggs, &c.,

Stalls Nos. 7, 17 and 19, Washington Market.

Particular attention paid to goods on consignment. Orders forwarded to any part of the country. 5

Washington Market—Stall No. 1.

MR. & MRS. WEAVER would invite Hotel Proprietors, Restaurants and Families to call and examine Stall No. 1, Washington Market, on Washington street side. We shall offer each morning everything that can tempt the palate of an epicure. The choicest only of all in the vegetable kingdom; Fruits of every kind; Game, fat and plump—in short, the best variety. Remember our number, it is *One*, and we mean to keep No. 1.

5 MR. & MRS. WEAVER.

Watches and Jewelry.

WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to sub tantiate all that we guarantee. G. C. & S. S. SHREVE,

139 Montgomery street, two doors south of Clay.

N.B.—Watches of all descriptions repaired by skillful and experienced workmen. 4 tf

Salvers, Spoons,
Gobleta, Forks, &c.

Those goods are all of the best quality, imported expressly for our own trade, and are offered at reasonable prices.

G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

Opera Glasses.

JUST received, a fine assortment of Opera Glasses; also, a lot of rich Silver Card Cases and Bouquet Holders, China manufacture.

G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

Capital Wanted.

AN Active or Silent partner, with a capital of $25,000 or $50,000, can hear of an opportunity where a business can be made that will yield a large and certain profit, and at the same time be sure from all contingencies of loss. A business which may be increased to any extent.

Letters will be strictly confidential, addressed to S. R. T. F., this office. 4-limo.

Artesian Wells.

HENRIKSON & LITTLE, Artesian Well Contractors, refer to Market street, First street, and all the principal water works in San Francisco; also at the Irrigating Fountains, San Jose, and at Horner's Mill, Union City. Wells of any depth contracted for.

Office at H. W. Vaughan's Plumbing Works, 25 Bush street, where orders will be received, or at B. A. Henriksen's, 88 Kearny street, or at S Little's, 40 first street. 23

WASHINGTON STEAM MILLS.

WASHINGTON FLOUR MILLS.

THE undersigned proprietor of the Washington Flouring Mills take pleasure in offering to families and the trade, Superior Family Flour. To our Mills, we are happy to say to our friends, was awarded the Silver Medal; and we shall be always striving to maintain for it a high reputation, so that our customers can send to us in confidence, believing they will receive the highest character of Flour the market affords.

In the same establishment we have extensive STEAM SAW MILLS, capable of performing every kind of work that may be desired, and to this branch of our business we invite the attention of the public. We have also STEAM PLANING MILLS, that will finish all kinds of work in the most workmanlike manner, and equal to anything performed in the country, and in the most prompt manner to order.

We invite all who are contracting work, to call on us and examine our Mills, and we can satisfy them of our ability to supply every order in each branch of our extensive establishment.

D. W. VANCOURT, Proprietor.

ART UNION.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!

SOON TO OPEN AT

DUNCAN'S

CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!

TO THE

Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!

CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Bianchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most lifelike. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares,* the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our house in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course that has gained us this position will be strictly adhered to, that no dissatisfaction can possibly occur.

CERTIFICATES OF SHARES

ARE NOW READY, AT

ONE DOLLAR EACH!

☞ Several articles of the Superb Collection have been just received, and are open for

San Francisco, June 26, 1854. 26

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof!

MATERIALS FOR SALE!

THE subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.,* to the new and improved mode of Roofing, known, in the Eastern States, as

"Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to put on roofing for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged,* and *nailed fast,* so as to prevent warping. The most desirable pitch for this roofing is from *half an inch* to *an inch* to a foot.

All letters of inquiry, or orders for [illegible] must be addressed to the subscriber. J. H. PUTNAM

FOR [illegible]

CALIFORNIA SONG.

(The following attempt at poetry is decidedly rich, and was handed us by a gentleman who knows not its author.—*Oregon Spectator, July* 14.)

I am lonsome since I krost the planes,
And floating ar my joys;
Sence all that's necr and deer to me
I left in Illynoize.

When I look back to Illynoize,
The teers enklin to blind me;
My minde revirts to that sweet home,
And the frends I left behinde me.

I herd of Kaliforni gold,
I thot i'de go and tri it;
And foolishley I left mi home,
I shoorlia can't deni it.

Inn Coliforney now I nm,
Thee kradel I am rockin;
And sumtimes I am flatired
That a fortin I am makin.

I entind to rock mi kradel well,
In plaises where theigh iniuc it;
and iff a fortion kan been found,
I'll shoorlia tri to find it.

Inn travelin threw this far-faimed land,
I find thee pepel klevir;
Theigh treet n stranger with respect,
I'm shore 'tis theire indever.

I sumtimes meat with ladys cind,
And gurls that doo reminde me—
Of mi cind harted little gerl,
And thee friends I left behind me.

And now ma heven smil on me,
Let fortshun kwickley finde me;
And speed me bak too thee *deer* little gerl,
And thee frends i lefft behinde mee.

Nonsuiting a Creditor.—There was a certain lawyer in the Cape a short time ago, the only one in those "diggins" then, and, for aught I know, at present. He was a man well to do in the world, and what was surprising in the limb of the law, averse to encouraging litigation.

One day a client came to him in a most terrible rage.

"Look here Squire," said he, "that are blasted shoemaker at Pigeon Cove has gone and sued me for the money for a pair of boots I owed him."

"Did the boots suit you?"

"Oh! yes—I've got them on now—fust rate boots."

"Fair price?"

"Oh, yes."

"Then you owe him the money honestly?"

"Of course."

"Well, why don't you pay him?"

"Why, 'cause the blasted snob went and sued me, and I want to keep him out of the money if I kin."

"It will cost you something."

"I don't keer a cuss for that. How much do you want to begin?"

"Oh! ten dollars will do."

"Is that all? Well here's an X, so go ahead!" and the client went out very well satisfied with the beginning.

Our lawyer next called on the shoemaker, and asked him what he meant by commencing legal proceedings against M.

"Why," said he, "I kept on sending to him till I got tired. I knew he was able to pay; and I was determined to make him—that's the long and short of it."

"Well," said the lawyer, "he's been a good customer to you, and I think you acted too hasty. There's a trifle to pay on account of your proceedings; but I think you'd better take this five dollars and call it square."

"Certain, Squire, if you say so, and darned glad to get it."

So the lawyer forked over one V, and kept the other.

In a few days his client came along, and asked him how he got on with his law suit.

"Rapidly!" said the lawyer, "we've nonsuited him, and he will never trouble you."

"Jerusalem! that's great!" cried the client. I'd rather gin fifty dollaes than have him got the money for them boots."

"Everything is arranged for your wedding with Susan Tompkins," said a father to his only son: "I hope you will behave yourself like a man, Thomas."

The individual addressed was a young man seated in a chair, despatching a piece of bread and molasses. His only answer was a sigh, accompanied with a flood of tears.

The parent started, and in an angry voice demanded:

"What objections can you have? Susan is handsome and wealthy, and married you must be, some time or other. Your mother and I were married, and it is my command that you prepare yourself for your nuptials."

"Yes," finally sobbed Thomas, "that's a different thing. You married mother, but I'm sent to *marry a strange gal!*"

That was rather a precocious specimen of "Young America," not yet inducted into trousers, who one day, recently, said to his father—

"Father, come and get me this apple."

There being no immediate sign of complianee, the young chap exclaimed—

"Father, why don't you start! I always start when *you* tell me!"

One of the prettiest prayers we ever heard of was that of a little girl, not quite three years old.

"O, Lord, bless my dear papa, and my sweet mamma, and our man John, and our horse Billy, and Katy's bright star Venus, and all the beautiful flowers.—Amen."

HOTELS.

Rassette House.

San Francisco,.....Cal.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.
Gentlemen can be accommodated with single rooms, or families with suites of rooms.
The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

St. Charles Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.
J. HARPER and J. L. MERRITT.....Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.
Its close proximity to the steamboat landings renders this house very desirable for transient visitors, as also for people arriving in the State and those leaving for the other States.
☞ There will be a Night Watchman, and guest can procure rooms at all hours at the night.
24 HARPER & MERRITT, Proprietors.

American Hotel,

NAPA CITY,.....CALIFORNIA.
L. A. & W. W. CHAPMAN, Proprietors.

GOOD accommodations for families, and on reasonable terms. Saddle and buggy Horses kept for hire. Horses kept on board, by the day or week, and well taken care of. [26

Murray's Fifty-cent Western House.

Corner of Second and D streets,.....MARYSVILLE.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known Union Hotel, situated on the Plaza, in this city.
Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.
The Bar will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.
PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.
Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.
The International is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.
E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....Proprietor.

THE Proprietor announces to the public, that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's,) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.
The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the season. A fine Bar Room is attached to the House. There are also Billiard Tables and Ten Pin Alleys connected with it.
For the accomodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake,—and to prevent accidents, they will be under the especial charge of an "old salt."
An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.
The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:
Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.
☞ Families called for in any part of the city.
25 LINESS AND CLARK.

THE SAILOR BOY'S GRAVE.

Oh! bury me not in the dark cold grave,
With the rank weeds growing o'er me;
But let me sleep 'neath the silent wave,
The sea nymphs watching o'er me.
I ask no proud marble to mark the spot
Where the sailor boy lies sleeping:
He is not there alone, he will not be forgot,
Where the mermaids are nightly weeping.

For the spirits that hover o'er the deep,
E'en in the silent night,
Will pause by his grave, but not to weep,
When the stars are shining bright:
There 'll be naught to disturb the stillness there,
But the night winds gently driven;
And the low flutter of the sea fowl near,
Or the distant echo given.

The flowers may bloom, and the gay birds sing,
Where the cypress waves its head;
But what care I, if the violets spring—
Are they heeded by the dead?
Then bury me not in the dark cold grave,
Where the worms their vigils keep;
Let my winding sheet be the ocean's wave—
Oh! 'tis there I'd wish to sleep.

[ORIGINAL].

THE SILKEN BANDS.

When the silken bands that have fettered our youth,
Are sundered by fate's imperious decree;
And the fondest hopes of our young heart's truth,
Shall wither away as the leaf on the tree.
Oh! where shall we seek, all desolate then,
The magical charm our bless to restore:
Alas! 'tis in vain, the heart injured once,
May throb till it break, but never *love more.*

The wild rose may spring from a desolate rock,
And shed o'er its barrenness sweetest perfume;
The oak that has felt the lightning's shock,
May stand, and the ivy around it may bloom;
And when it is withered, another may spring,
Its tendrils entwine round the oak as before:
But the heart, injured once, like the trunk may remain,
But the flowers of love will never bloom more.

A Lesson for Children and Youth.

THE BOY WHO KEPT HIS PURPOSE.

"I WOULN not be so mean," said George Ward to a boy, who stood by, while he put the candy he had just bought in his pocket.

"You have no right to call me mean," replied Reuben Porter, "because I don't spend my money for candy."

"You never spend it for any thing," continued George, tauntingly.

It was true. Reuben did not spend his money. Do you suppose it was because he loved it more than other boys do?

Reuben turned slowly away, meditating upon what had occurred. "I will not care for what he thinks," he at length said to himself; "I have four dollars now, and when I have sold my cabbages, I shall have another dollar, I shall soon have enough," and his heart bounded joyfully, his step recovered its elasticity, and his pace quickened, as the pleasant thought removed the sting which the accusation of meanness had inflicted on his sensitive spirit. Enough did not mean the same with Reuben as with grown people. It had a limit. He hastened cheerfully home, or to the place he called home. He had no father or mother there; but in their stead, kind and loving friends. Mr. Porter had died two years before, leaving a wife and four children, without property to sustain them. Reuben was the eldest; and he was old enough to assist in the labors of a farm, and it was thought best that he should leave his mother. Mr. Johnson a neighbor, took him into his family, where he very soon became a great favorite.

There was one thing about the boy, however, that good Mrs. Johnson regarded as a great fault. It was what she called a "spirit of hoarding." She said she never gave him an orange or an apple, that he did not carry to his room, instead of eating it. Perhaps his sister at home, or dear little brother Benny, could tell what became of them.

Mrs. Johnson had noticed, too, in his drawer a box, which was quite heavy with money. She did not believe he had bought so much as a cake since he had been in their family. If he should persist in this way he will grow up to be a miser, Mr. Johnson said at his wife's earnest request, remarked this with such an example of generosity as Reuben had constantly before him; he would not believe the child was in much danger from the fault she feared. "It must be remembered," he said, "that Reuben has his own way to make in life. He must early learn to save, or he will always be poor. There are his mothers and sisters, too, who need his aid."

In various ways Reuben added to his store. When the snow came, he made nice broad paths about the house, which so attracted the notice of a neighbor that she asked if he might be allowed to make paths for her. He rose early that he might have time for the extra work, and was well paid for his efforts. The box grew heavier from week to week, *Reuben had almost enough.*

One day there was a barrel of flour left at Mrs. Porter's. She thought there must be a mistake about it; but the man said he was directed at the store to take it to that house. Mrs. Porter went immediately to learn about it, and what was her surprise, on finding her son had been the purchaser. How could he pay for a whole barrel of flour? "The money," said the merchant, "he brought in a box. It was in small bits, which took me some time to count, but it was enough."

That night, Mr. Johnson remarked to his wife, as they sat together before a cheerful fire, that he had some idea of keeping the little *miser* and educating him. "A boy who could form such a purpose, and keep it, will in all probability make a useful man.

After years proved the correctness of this conclusion. Reuben is now a man of intelligence and wealth. He is one whom the world delights to honor; but among his pleasantest memories, I doubt not is that of the barrel of flour he bought for his beloved mother.

The mother called, with a full heart, at Mrs. Johnson's, and related what had occurred. Reuben wondered why his mother should cry. He thought she would be happy. He was sure she was. He had been thinking of that barrel of flour, and now he felt more like laughing than crying. Those tears, noble boy, are not tears of sorrow, but of the deepest joy.

You are more than repaid for your self-denial. You have persevered in your determination; you have resisted every temptation to deviate from the course which you marked out as right; you have borne meekly the charge of meanness, so galling to your generous spirit, and now you receive your reward.

You are happy, and so is your mother, and so are your kind friends, Mr. and Mr. Johnson.

The Bargain for a Wife.

A YOUNG Norfolk farmer, on beginning life with a limited capital, found that two things were wanting to do justice to a large farm which he rented on a long lease; namely, a wife to rule the house at home, and an additional thousand pounds to invest upon the land. Like a sagacious man, he conceived that the two might be found combined, and he began to look about for a cheerful lass with a dowry to the desired amount. Accident threw him one day into company with the parson of a neighboring parish, with whom, as he rode home, while returning from market, he fell into conversation. Encouraged by the divine, the youth unburthened himself of his cares and plans, and mentioned the desire he had for marrying as soon as he could find an agreeable lass with a moderate dowry.

"I tell you what," said the parson, "I've got three daughters, and very nice girls they are, I assure you. Suppose you come and dine with me next market day—you will meet them at the table; and if any of them should prove to be the "inevitable she" that you are in search of, I shall not be backward to do my part as far as I can."

"Agreed," said the youth. "I'll come, as sure as you're alive, if you'll say nothing about it to the ladies."

"That shall be a bargain. On Saturday next then, we shall have you at dinner, at five." And here their roads diverging, the two gentlemen separated.

At the appointed hour on the following Saturday, the young farmer, in handsome trim, descended from his galloway at the parson's door. Dinner was served in a few minutes after, and the young ladies, with their mother, graced the table with their presence. All three fully justified the encomiums of their father; but the youngest—a rosy faced, roguish, cheerful lass, just escaped from her teens—alone made a vivid impression upon the young farmer. The repast progressed agreeably, and when ended, the ladies withdrew, leaving the gentlemen to chat over their wine.

"Well," said the host, "what do you think of my girls?"

"I think them all charming," said the youth: "but the youngest—you call her Nelly—really is such a witching and clever lass, and if I am to have the honor of being allied to you, you must give me her."

"That is against all rule," returned the host; "to take the youngest first; but, of course, I cannot control your choice. What dowry do you expect?"

"My capital," said the wooer, "is three thousand pounds, and I want a thousand more—and I must have it."

"I will give you a thousand with the eldest girl."

"No; the charming Nelly and the thousand, or I am off."

"That cannot be; five hundred with Nelly if you like. The others are not half so handsome, and must have a fortune, or I shall never get them off."

"No; my resolution is fixed, replied the young gentleman; and I shall never alter my mind."

"Nor I mine," said the parson, "and the affair is an end; but we will be good friends, notwithstanding."

The conversation, which each speaker supposed to be strictly private, now fell into another channel. The ladies returned with the tea-urn, and chatted unreservedly with the farmer. Evening came on, and towards sunset, the girls having strolled into the garden, the youth rose to take his leave. He found his nag in the stable, and having bid farewell to his host, took his way through the shrubbery that led to the road. He was about alighting to open the gate, when the rosy-faced Nelly darted forward to save him the trouble. As she lifted the latch, she archly looked up in his face and said—

"Can't you take my father's money?"

"Yes, by Jove, I will, if you wish it."

"Then come over to the church to-morrow morning, and tell him so after service;" and she vanished like an elfin sprite among the shrubbery.

Musing on the proverb which says, "walls have ears," the young farmer rode home. He did not fail—how could he?—of attending at the church the next morning, and after the sermon, declared to the parson his altered resolution. He married the fair Nelly three months afterwards; and she brought him in due course of years a row of goodly sons, than whom there are few at the present hour wiser in their generation, or more worthy, or more wealthy, in the whole of broad England.—*Chambers' Journal.*

Going into Mourning.

A few weeks since, our friend Clark was lying sick with bilious fever. The attack was severe, and he believed that death was near. One morning he awoke from a short sleep to hear a hurried and smothered conversation in the adjoining room in which his wife took part. The first words that Clark caught were uttered by his better-half.

"On that ground," said she, "I object to mourning!"

"Yes," replied another, "but the world looks for it—it is fashionable, and one might as well be out of the world as out of the fashion."

"Very true!"

"Here," thought Clark, "is a nice wife. She thinks I am about to die—to be planted, if I may use the expression, in the cold earth, and yet she refuses to go into mourning for me. Ah! me."

"Now that I am here, perhaps I had better take your measure."

"The unfeeling wretch!" exclaimed Clark, "to think of sending for a dress-maker before I am dead! But I'll cheat her yet! I'll live for spite!"

"Well," mused the wife, "I believe you may measure me. I will let you buy the trimming, and let it be gay as possible."

"What heartlessness," groaned Clark. "Woman-like, though. One husband is no sooner dead than they set about entrapping another. I can scarcely credit it."

"Of course you will have a flounce?"

"Two of them; and as the body is to be plain, I wish you to get wide gimp to trim it."

"How will you have the sleeves trimmed?"

"With buttons and fringe."

"Well—well—this beats all," sighed poor Clark.

"When do you want the dress?" enquired the mantua-maker.

"I must have it in three days. My husband will then be off my hands, and I shall be able to go out!"

"Oh! horrible—horrible!" ejaculated the sick man, "I am only half dead, but this will kill me."

His wife heard him speak, and ran quickly to his bedside.

"Did you speak, my dear?" she said, with the voice of an angel.

"I have heard it all madam," replied Clark.

"All what, my dear?"

"The mourning—gay flounce—fringe—everything. Oh! Mary—Mary!"

"You rave!"

"Do you mean to be a fright?"

"Certainly not, my dear."

"You mean to go the way to three days, do you?"

"Yes, love; the doctor said you would be well in that time."

"What means the dress?"

"It is the one you bought for me before you were taken sick."

"But you were speaking of mourning!"

"We were talking of Mrs. Taperly."

"Oh, is that it?"

"Yes, love. You know she is poor, and her family is large, and it must inconvenience her very much to find mourning for them all. On this ground alone, I oppose it."

"So—so—that's it, is it? I thought you were speaking of me, and it distressed me. Let me beg you to be more careful for the future."

Clark was out in three days, and he now laughs at the matter, which then appeared so horrible.

Landseer's Sketches.

WE copy from the Magazine of Art, the following—made for *some latitudes*—and will answer for many. Wonder if the Pacific shores breed such animals?

Political Dogs.—Pardon us, good sir, for referring to them. The race is nearly extinct now. They have been banished with other vermin, off the face of the earth. Men and dogs are now learning the wholesome lesson, that they can be bettered by no Society for the Universal Emancipation of Rascaldom, by no theory of government, but only by their own genuine and honest worth and will. But there were snarling, snapping, ill-conditioned curs, like those our artist has portrayed, that at one time thought otherwise. Ill born and bred, they were a terrible nuisance in their time, always wrangling and interfering, and minding every body's business but their own. The whole lot, we'll be bound to say, are not worth a rap; not worth even stealing, unless by a skillful artist, who could touch them up a bit; paint here a little black and there a little brown, crop their ears and caudal appendages; add here a little and there a little; give them a faint air of fashion, and so fit them for Broadway. Otherwise they are fit for nothing; and when doctored for the market, are, like Peter Pindar's celebrated razors, only fit to sell. You can't trust them. They are as deceitful, fickle, untrustworty, unprincipled, as it is possible for dogs to be. As to principles, they have not the faintest idea of them. All they care about is the pickings of place. Give them a bone, and they will rush to it from all sides. They realise "where the carcase is, there will the eagles be gathered together." That wild and wondrous tale, told by sage nurses in our younger days, ere we had tasted of the world's wickedness and ways—whilst we yet believed that tale of

> "Old Mother Hubbard,
> Who went to the cupboard
> To fetch the poor dog a bone;"

which proceeds to tell us how

> "When she got there
> The cupboard was bare,
> And so the poor dog had none,"

could never have been true of your political dogs, who would have soon found out the destitute condition of Mother Hubbard's cupboard, and would have been off with the celerity of express trains to more hospitable and better-appointed quarters. The only exception we would make, would be in favor of that right honorable gentleman—we beg his pardon, we mean dog—upon his legs. He is a dog of substance and of weight; but he is in a hopeless minority, and the opposition have got Hansard to quote against him. But why? Has not a dog a fair right to change his opinions? Do we not alter every day and every hour, and can our creed always remain the same? Who is to stereotype a dog's political opinions? To say, "Hitherto shalt thou come, but no further; and beyond this shall canine intelligence never advance?' The attempt is preposterous.

LITTLE TO DO.—The Cleveland Plaindealer says an athletic specimen of a man from the Emerald Isle called into the counting room of one of our River street merchants. He took off his hat to make his best bow.

"The top o' the mornin' to ye Mister P——, I've been to'e ye're in want o' help."

"I've but little to do" replied P—— with momentary gravity.

"I'm too very sorry for you. It's not that I care about your——re to the pump. I'd rather"

The native repartee [illegible]

TYPOGRAPHICAL.—A New York paper says [illegible] to the Rev. Dr. [illegible] of him as "a Father [illegible] Father indeed!"

"Do you [illegible] for a frolic?"

"Certainly not, my dear."

"You [illegible] the way to three days, do you?"

"Yes, love; the doctor said you would be well in that time."

"What means the dress?"

"It is the one you bought for me before you were taken sick."

THURSDAY, AUGUST 10, 1854.

A Pattern Farm.

We read some time since the notice in the Union of Sacramento, a description of the farming grounds of Gen. Hnchinson, of Putah; and having an opportunity, we have visted them, and have received very great pleasure from what we found there.

The entire ranch contains fourteen hundred acres—600 wheat, 500 barley, some 100 volunteer crop, the rest pasturage for the dairy stock, gardens, &c. Forty plows and twenty harrows are used in the breaking up of the soil. Twenty-five yoke of working oxen, and sixty horses are used in plowing, harrowing, teaming, threshing, pressing hay and other operations that are constantly carried on. Seventy men were employed during the harvesting season; at other times, forty. Seven reapers have levelled the grain, and two of Pitts' eight-horse-power threshers we saw at work in the fields, each machine finishing seven hundred bushels per day. Five or six mowers were used in cutting hay and grain. Six hundred tons of hay have been gathered in the finest manner. The hay yard, with its hay presses, is in the very best condition; we saw and examined one hay stack that contained nearly 200 tons. Some two hundred tons of hay have been pressed, ready for the market; one hundred already have been marketed. The "large hay stack" is undoubtedly the finest ever got up and finished. It is one hundred and sixty paces long (or ten rods), about twenty feet wide, and forty high. We understand this *pretty little pile* is intended for the use of the stock while the plowing season lasts. In addition to the stock named, there are some 200 head of farm stock, 200 hogs, and 300 domestic fowls. The dairy stock consists of one hundred and thirty cows and seventy calves. It requires twenty-five double teams in constant use, to carry the crops to market and return the materials and stock wanted upon the farm. The blacksmith shop employs three men, the wheelwright the same, and every day brings new machinery into use; and as at such a farm, there ever will be repairs wanted, it is economy to have a shop that is ready for any emergencies. There are ten miles of fence finished, and six more will be added this autumn.

There is much to admire in this farm, and we were surprised to see the change within two years, since we had been there. There is a system carried on there so thorough, and there is so much to see, that we wish our "down easters" could examine the farm. We shall again refer to this ranch, for we look upon it as a model that should be copied.

Our neighbor of the Chronicle seems to think we are rather over-delighted at the reception of those gems that the god "Ceres" had blest, and which our kind friends were so thoughtful as to send to our office. Well, if there is anything in the world that should put a man into ecstacies, it surely would be the sheaves of ripened grain that cheer the sight over hill and plain. There is so much in our dull cities to make one feel sad, that we ought to rejoice with one another that *any* occasion or object presents itself to put us in ecstacies. We do not often get into ecstacies, but if there were any sin in it, we have good examples of old, for the earth is so "full of his glories" that we cannot speak of them without ecstatic pleasure. We read in the good book, that "the mountains skipped like rams, and the little hills like lambs," and that "the hills broke forth into singing." These were ecstacies uttered by the voices of Nature—and we are privileged to use these voices; and if we do sometimes give a glowing description to "Ceres," "Pomona," or "Flora," we hope we may inspire the *Soul-e* of our neighbor to a love of our god or goddesses, that it may fall into ecstacies also. We would like this above all things, for there is no journal in our State whose editorials afford us more real pleasure, or whose columns are more closely scanned than those of the Chronicle, and we believe we but express the minds of many newspaper readers.

Washington Territory.—The Olympia Pioneer and Democrat has been presented with a hill of wheat stalks, with well developed heads, many of the stalks measuring over six feet in length. The specimen was taken from the farm of Mr. Morton, on the Shutes river bottom, and considering the backwardness of the season, may be looked on almost as a prodigy. The crops are ripening hastily, and with the present enjoyment of excellent weather, with a prospect of continuance, an abundant harvest awaits to be stored.

Ride Across the Plains.

Many persons hear of and read about the "Tule Lands," and know not their position or their value; and often complain that time and money are spent in legislation upon what is apparently of little account. To such persons we say, let them ride across some of our vast prairies, and they will find miles and miles of these Tules, that ere many years will be found to be the very soil for our cotton and rice plantations.

Crossing from Sacramento City, a broad and almost endless prairie meets the view; and some of the finest lands in Yolo county will be found to be these now termed the waste Tules. We rode for many miles through them recently, over a fine road that in '53 was covered with eight feet of water. And yet, there can be no doubt that by a change of the course of the present rush of waters, by canals that will hereafter be cut across these wide prairies, an entire change of the course of a portion of the Sacramento current will be made, and a new feature, one of astounding prospects, of fertility and beauty, will be presented to those whose business requires them to cross these now waste prairies.

Three miles from the Sacramento crossing, is a large and fine lake, abounding with game and fish, (a glorious place for sportsmen,) over which a ferry has been established with good boats for the heavily loaded teams that cross in large numbers daily each way, loaded with grain, etc., from the large Ranchos above. Vast numbers of live stock cross this ferry also, as some of the largest "Stock Ranches" in Sacramento Valley are upon the "Putah"—among them Col. Childs', Davis', Harbin's, and Wolfskill's, the latter principally wild stock. Some of the finest horses in the country can be found at these Ranchos, and particularly the Ranch of Col. J. M. Harbin. The immense amount of stock upon these Ranchos seems almost incredible—one, two, and three thousand each of horses and horned cattle—and scattered over these broad plains present an interesting prospect, one which we shall watch with care and note further.

Weather and Business at Sacramento.—The most delightful weather has been enjoyed at this city for many days past. Not too hot in the day, and even the warm portion of it relieved by a cool and invigorating breeze the great portion of the day. And *such evenings!* when we contrast them with those of San Francisco, it would be like comparing an Italian sky, a pleasure party upon the waters, a la Gondolier, and paradise, with a down-east rain storm in March, a London mizzle, or that place across the river, so dark and dreary, where a heavy fee is required to bribe the ferryman. There are, is is true, much to refresh in the great city of San Francisco, but when we talk of evenings, there the Sacramentans have us—we Franciscans are nowhere. Business in Sacramento is, to every appearance, quite lively. 'Tis true there is not a general heavy business, but all seem lively, cheerful and content. Some houses are doing an excellent business, as the freights upon our river steamers the past week will show. The traces of the late fire are nearly gone. Several fine brick warehouses have been erected, and every appearance indicates an improvement in beauty, security and permanence, and also the same undying heroism in the struggle to triumph over the trials to which this city has been subjected.

San Francisco.—So much has been said and written about the magnificence of the city of San Francisco, and the rapidity with which she has been built up, that we fear that strangers who should visit us now would have just reason to say we did not act wisely in the locality, or in the early plans of our city; and should they chance to visit Sansome, Sacramento or California streets, they would verily believe an earthquake had occurred, or that we were going back to a chaotic State again—for never were the streets of a city in such a condition before, and never do we believe they will be so again. Yet order will come from confusion, and beauty spring again from ruin. Those who live long enough to see San Francisco *finished* will behold indeed a mighty city; a city whose influence shall be felt in every part of the earth. It only needs a little extra trial and suffering before we shall see the dawn begin. When the darkest shall have past, we know the light shall come at last.

Views in Califonnia.—Those who are fond of beholding the curiosities of our Golden State, and the sublime works of nature in our mining districts, are invited to call and see "California on Canvas," now on exhibition at Musical Hall, Bush street.

The Chinese.

There is so much now said and done about the Chinese, that a general interest is felt in all that affects them in this country. We noticed at the lake crossing, opposite Sacramento, a few days since, six heavily-loaded teams bearing their provisions and mining implements, with about ten Chinese to each wagon, "new comers," on their way to Shasta.

It is true they are coming to our shores in countless numbers, and while we would advocate an enlightened, a wise, benevolent and humane policy, we would urge, as we ever have done, that we should make them feel we are a free government—and yet a *government of Law.* They can be made useful citizens, by being made obedient to our laws. While we advocate a liberal policy, we shall never refrain from a free expression of our views in all that relates to this interesting people.

We cannot but deeply regret to notice the leading article in the "Gold Hill News," the Chinese publication in this city, of July 25th: "*American Preachers* vs. *Practice!*" While we would never trammel the press, but grant it the greatest liberty, to rebuke wrong wherever found, yet we cannot permit even with this great liberty that press to become licentious, or utter such sentiments as have been uttered by the Gold Hill News, without condemning its whole tone and matter. We believe it uncalled for, and its influence will be very injurious upon the Chinese, and those who have ever advocated their cause. We trust those who conduct that paper will make the *amende honorable.*

Works of Art.

Duncan's Art Union.—We understand from Mr. Duncan, that our citizens may expect the promised works of art in a few days, the ship that contains them having been spoken..

In looking over the catalogue of what is expected, we note much that will prove highly interesting. Among them, Mr. Duncan informs us, are original sets of "Sevres China," once at the Tuileries," and bearing the crest of Napoleon—sets of very great value; "Bronzes," too, of the highest value; "Gobelin Tapestries," some of the very richest; paintings on porcelain; oil paintings from "Dusseldorf." All these works deserve the attention of our citizens. We feel assured that Mr. Duncan will have a pride in exhibiting many specimens that are of a high order, such as would reflect credit upon his taste and judgment by a visit to the galleries of the grand old masters, and also the marts where every opportunity is offered to display taste and judgment. At London, Paris, Ghent, Brussels and other cities, Mr. D. must have had opportunities to secure what we trust will be appreciated.

We are informed by Mr. D. that he has an original "Magdalen;" also, the "Descent from the Cross," and many gems of art that will soon gladden the vision of the true worshipper of the beautiful. We trust a fair wind will soon bring the ship to her port, for we can assure our readers that even a good copy of the "grand old masters" will amply reward them.

We have stood in the "Louvre" from morn till eve, often hours before a single picture, and found it hard to leave. We have strolled through the galleries of Old England, and France, and Belgium, and the memory of those magnificent works and the old cathedrals will be recalled even at the recognition of *one* copy of these old favorites. We anticipate a rich repast in beholding the "Battles of Napoleon," that mighty man, to whom justice will yet be done, though years intervene.

If friend Duncan can but show us "Napoleon's retreat from Moscow," we should like it—much as we would rather it should have been a triumph; yet this *painting* is a triumph of one of the great artists of the Old World. The very blood sputs upon the snow seem to stand out upon the canvas, and one can almost hear the dying soldier, as he raises himself up to salute the Emperor while his wounds bleed afresh, utter the words, "*Vive la Napoleon,*" or "*Napoleon le Grand.*" If Mr. Duncan has but secured these, then our citizens have in store for them a rich repast. But we forbear more now.

Agricultural Meeting at Sacramento.—The meeting which was called at Sacramento, to organize a "County Agricultural Society," although not large, was of sufficient number and interest to ensure the organization. Preparatory steps were taken for the formation of a Society, the full reports of which will be found in another column, to which we call the attention of our readers.

From a Journal of 1850.

The following extracts we have made from a Miner's Journal of 1850:

The Golden Age.—Every age, sex and condition are more of less tainted with it; the people are "gold mad." And where shall all this end: is the mere pursuit of gold, the building of cities, and the loading of ships, all that shall result from this passion for gold. No! no! God has his purposes to accomplish, and man is his instrument; but so wedded is he to this love of gold, that no other inducement but an assurance of finding this precious ore, could have aroused him or induced him to have borne the hardships and perils of an emigrators life. No promise of any other kind would have inspired him with faith to bear and suffer, but the knowledge that he should posses the *pure gold*, dug from the bowels of the earth. When men could gaze upon it and feel it, then they would believe.

Nothing else under heaven would have awakened the world to these shores, or have peopled the land; and God, who knew the nature of man and the craving that was planted in his nature, took this method to people the land, which under no other plan could ever have been peopled.

But what was the great design of Providence in all this? Not surely to encourage a love of gold! Oh no! but to bring together people of all nations under the sun, that He might test the value of our free institutions and modes of government, and to influence the world by the very principles that were deep in the hearts and affections of our "Pilgrim Fathers." God designed to place a nation here at the gate of the commercial world, whose influence should be felt the wide world over, and felt for good; and God designed that "these mountains should be brought down," those vallies filled, those vast plains cultivated, so that the hungry of all nations should be fed. Indeed "His ways are unsearchable and past finding out." For though this may seem to us his design, the great future is unknown to us, for we are frail and finite; He, eternal and infinite, and his plans for all this beautiful world in truth and perfection are planned.

Tulare County.—The Southern Californian gives the following accounts from this county:

"We learn by a gentleman late from the Four Creeks, that Tulare county is fast settling up with farmers, who are laying out farms and improving them, with the intention of making it a permanent place of residence. They are making all preparations necessary to put in a large crop next season. The class of people settling there are practical farmers, who will go into the business in the right way, and next year we may hear a good account of their efforts.

The crops this year are light, on account of the lateness of the season that they were planted, and the dry season they have had; but they have sufficient for home consumption.

Tulare county, we are informed, is one of the most agricultural and grazing counties in the State. It probably possesses a larger body of good land than any other county of the same size. But it is remote from market, lying back from the coast, and the people will labor under a great disadvantage on that account for some time to come. All they want in future to make this county one of the most flourishing in the State, will be a means of getting their produce to market; but we hope in a few years this difficulty will be remedied. When there is sufficient produce raised to warrant it, there is always some means devised to get it to market, either by railroad or canal.

Our informant says the Indians are once in a while caught stealing cattle and horses; when they are, they get from thirty to a hundred lashes. This is taking the pains for stealing that which don't belong to them. The people settle in communities, so that they have but little cause to apprehend danger from Indian depredations."

Luscious Peaches.—At the Agricultural Meeting at Sacramento, a fine basket of peaches, the "Early Crawfords," were exhibited by A. P. Smith, Esq., from his gardens on the American river. Mr. Smith will have a fine crop of this delicious fruit this season. Those exhibited were large, rich, high colored, and as full bloomed as those we find in our markets East. This we can attest, for the sample lot which Mr. Smith kindly presented us we know was delicious; for as seeing is naked truth, tasting surely is a good corroboration. By the way our neighbors of the State Journal, whom we were very glad to meet at the Agricultural Meeting, can attest to the beauty and flavor of the Peaches. For every effort our neighbors of the Journal put forth in behalf of this great interest, we believe and hope it will so add to their "basket and store," as that the one shall be always *full*, and the other constantly *well supplied.*

Something New in Oregon.—Mr. John Davenport, says the Oregon Statesman, has just returned from a visit to the States, and has brought with him a *hive of honey bees*, an enterprise hitherto supposed impracticable. The bees are apparently in good health, and not less in numbers than when hived for the journey. Mr. D. states that they subsisted entirely upon their own honey, made last year. The hive in which they were confined is of the ordinary size, three sides being being made of wire gauze and the fourth of boards, So far the enterprise is successful.

Agricultural Meeting at Sacramento.

Pursuant to notice there assembled at "McNulty's Musical Hall," on Saturday last, a respectable number of our citizens, for the purpose of organizing a County Agricultural Society. The meeting was called to order at the appointed hour, and on motion, Mr. C. I. Hutchinson was called to take the Chair, and Mr. W. B. H. Dodson appointed Secretary.

On motion, a committee of three was appointed to draft resolutions expressive of the sense of the meeting; whereupon, the following gentlemen were named as such Committee: Messrs. Warren, Smith, and Wright. The Committee returned after a short absence, and made the following report, which was unanimously adopted:—

Whereas, Agriculture has ever been considered by wise and good men the basis of wealth for a State and Nation, the great source of all providence and prosperity; and,

Whereas, We find the name of Washington, the father of his country, as the great leader and promoter of this noble science, who, by his earnest interest, his writings, his personal labors, his entire example, has given it so glorious an impetus in our country; and,

Whereas, We find also those great statesmen, Webster, Clay, Adams, Jackson, Calhoun, Cass, and a host of others, as the able advocates of the same great interest; therefore,

Resolved, That we, as permanent settlers and citizens of this new State of California, a State which is destined to influence the world by her agricultural resources, feeling a deep interest in the prosperity of our adopted State, and having a desire to promote this great interest, we therefore as citizens of this great valley of Sacramento, citizens of the city and county of Sacramento, actuated by a desire to perform our duty to this right arm of American industry, have assembled ourselves, that we may manifest that desire by doing what we can to awaken a proper interest in regard to agriculture, and to unite our exertions with the citizens of this valley, that we may establish such an institution as shall tend to the accomplishment of the greatest possible good.

Resolved, Also, that we believe the formation of a County Agricultural Society for the County of Sacramento, will in its action and influence do much, nay more, than can be accomplished in any other way; and,

Resolved, That we, the citizens of this county, do this day agree to form ourselves into a County Society, to be auxiliary to the State Agricultural Society of California.

On motion, a committee of five was appointed to draft a Constitution and By-laws, for the government of the Society, to be reported at the next meeting. Messrs. Moore, Tebbits, Smith, Warren, and Dodson, were appointed said Committee.

G. R. Moore offered the following resolutions:

Resolved, That we highly approve the action of our sister counties in the formation of county societies for the promotion of the cause of agriculture, and will ever be glad to correspond with them, and unite with them in promoting the general interests of agriculture throughout the State.

Resolved, That we deem it of the highest importance that each county should so unite their action and interests as to visit each other by delegates, at their *stated meetings*.

Resolved, That we feel it to be the duty of every member of the agricultural community to advocate the interest of every association, either county or State, that is formed for the promotion of agriculture, to the best of his ability.

Messrs. Moore and Warren addressed the meeting at some length in support of the resolutions, and at the conclusion of their remarks they were adopted. Mr. Moore offered the following resolutions, which after considerable debate thereon, were unanimously adopted:

Resolved, That we hail the proposition announced in the California Farmer, for the shipment of grain to the East, as a proposition that will very beneficially affect the whole of California; and we fully and highly appreciate the liberal offer of the eminent banking house of Page, Bacon & Co., who promptly offer to make advances to those who may desire to ship grain.

Resolved, That the thanks of the grain growers are due Messrs. Page, Bacon & Co. for their offer, and we recommend the immediate action upon the same, believing as we do, that this is the only way California can convince other portions of the world of its ability to sustain itself, and the only way we can secure a just return to the cultivators of the soil.

On motion of Mr. Smith, the proceedings of this meeting were ordered published in the State Journal, Union, and the California Farmer. On motion, the meeting then adjourned, to meet at "McNulty's Musical Hall," two weeks from this date. Sacramento, Aug. 5, 1854.

C. I. Hutchinson, Chairman.
W. B. H. Donson, Secretary.

San Bernardino.—This beautiful rural city was incorporated at the last session of the Legislature. It lies about sixty miles from this, in a healthy location, at the foot of the mountains, and we are informed that it is rapidly improving. The inhabitants are generally Mormons, who, by their industrious habits are accumulating an independence, enabling them to improve and beautify their little city. Their pursuits are generally agriculture and lumbering, both of which remunerate them well for their labor. The constant immigration from Salt Lake is multiplying their numbers, and gives those who were the pioneers, a market for their produce at home. In a short time, the city will hold an important position in the east part of the State.—*Southern California.*

Return of Lieut. Beckwith---Pacific Railroad Surveys &c.

On Thursday evening, Lieut. Beckwith, of the overland surveying party, arrived in this city from Salt Lake, via the Humboldt and Fort Reading, having left the former place on the 6th May, and the latter on Tuesday last.

Lieut. Beckwith with his assistant surveyors and attachees to the corps, consisting in all of sixty souls arrived at the Great Salt Lake City in November, 1853. In April of the present year, the Lieutenant with his party went eastwards again, as far as Green river, on a surveying tour.

On the 6th of May, the company left Salt Lake, and struck off due westward some forty miles to southward of the regularly traveled California trail. About seventy five miles this side of the valley, the party came upon a solid granite boulder or hill, some fifteen or eighteen hundred feet in height, in which was found a clear cool spring of water. After leaving this point they journeyed on directly to the Humboldt, which they reached in about two weeks, being delayed a day or so in removing obstructions from the road. All along the Humboldt there is the most feasible route imaginable for a railroad, and according to Lieut. Beckwith's statement, surveys would be almost superfluous. All the way from Salt Lake to California the party found an abundance of grass and water for their cattle and stock, which arrived at Fort Reading in good order. The Lieutenant informs us that with his present knowledge of the country, he could lay out a road from California to the Great Salt Lake Valley, at at least one hundred and fifty miles nearer than any heretofore traveled, with an abundance of wood, water and grass, along the entire route, and he would ensure the traveler freedom from all annoyances from insects, except, perhaps, while crossing Mary's river.

After leaving the Humboldt, the party of Lieut. Beckwith struck off to the northward to the Sierra Nevada. No less than five different passes were examined in this range with direct reference to their feasibility for the line of the Pacific Railroad. All of these lie to the northward of Noble's Pass, except the latter, which is included in the number of those examined. After careful surveys, all of the above routes are pronounced to be impracticable, with the exception of Noble's Pass, and the one first north of it. Of the superiority of these two, Lieut. Beckwith is as yet unprepared to express any opinion, but he unhesitatingly declares that none of the passes except Noble's and that adjoining, are or can be adapted to the passage of a railroad. In his report to be submitted to the Secretary of War, immediately after his arrival at Washington, accurate details of the surveys of these various passes, together with all particulars connected with the topography and geography of the country examined, will be given.

Lieut. Beckwith furthermore informs us that the greatest difficulties of the contemplated route for a railroad are to be encountered in the "foot hills" of the Sierra Nevada, that but for these there would scarcely be any serious impediments to the construction of the road. Lieut. B. also says that the stream usually termed Pitt river in the upper part of this valley, is really the Sacramento, and that at the point where he struck what is known generally as the Sacramento, he could easily leap from one to the other bank. The stock and other effects of the party were sold at Shasta by Lieut. B., and brought good prices, being bought by ranchmen, miners and others. The amount received for this property was in the neighborhood of $5,000.

Lieut. Morris, of the escort, who accompanied the surveying party, and who was announced by us as having arrived in town some days ago, has returned to Fort Reading for the purpose of turning over the detachment to Col. Wright.

Lieut. Beckwith, who has been absent on his arduous official campaign for the last four months, returns on the 16th inst. to Washington, in company with his assistants, when he will immediately lay before the Hon. Secretary of War the fruits of those laborious and scientific researches, which are perhaps to have no slight influence on the future destiny of the race.—*Sac. Union.*

Antediluvian Discoveries.—The Swiss journals give the following details relative to the discoveries recently made in consequence of the extraordinary fall in the water in the Lake of Zurich. About one hundred feet from the right bank of the lake, opposite the village, there have been found several rows of piles formed of trunks of trees. The piles are about a foot apart, with an interval of sixteen feet between the rows. These piles support enormous beams, which form a very large area. Between the piles there have been found the skeletons of animals which are no longer to be seen in Switzerland, but no trace of any domestic animals. On removing the mud there have been found an immense number of heads of arrows and spears made of stone, carefully cut and very pointed; poignards made of flint, with buck-horn handles; a battle-axe of stone; clay vases, evidently formed by the hand without the aid of any instrument, and afterwards baked in an oven; and several other articles in stone and baked clay. A human skull has also been found. These remains, which are considered to have belonged to the ancient Celts, are under examination by a commission of antiquarians.—*Scientific American.*

God in the Flowers.—A gentlemen being invited by an honorable personage to see a stately building, erected by Sir Christopher Hatten, he desired to be excused, and to sit still, looking on a flower which he held in his hand. "For," said he, "I see more of God in this flower, than in all the offices in the world."

LADIES' DEPARTMENT.

[For the California Farmer.]

TO NELLY.

The sun has gone to its nightly home,
While the moon is just appearing—
I'm gazing on your gulding star,
And earth seems quite endearing.

I'm thinking at this hour, Nelly,
About two weeks ago,
While we were walking hand in hand,
Near Declaration Row.

You gently placed your arm in mine,
And pointing to that star,
Pictured a brilliant future,
And a brighter home afar.

Do you remember who came near—
Now do not think me hard;
For 'twas while we were standing
In flirtation promenade.

You remember what he said, Nelly,
While our hearts were full of mirth;
Just as that brilliant meteor
Fell from heaven unto earth.

Ah! those bright scenes I ne'er forget,
Nor the merry joyous hours;
They're as refreshing to this heart
As sunshine is to flowers.

Cora.

The following beautiful sentiment was proposed at the magnificent Horticultural Festival at Concert Hall, Boston, in 1842, of the Massachusetts Horticultural Society:

Woman—a "Floral Lexican:" complete as follows:—

Whate'er has beauty, worth, or power,
Or grace, or lustre, is a *flower*—
Woman 's a flower; in her we trace
Some blossom of the mind or face!

Does woman lead the courtly dance?
We hail the *flower of eloquence!*
Does fashion's wreath adorn her brow?
The *flower of truth* is woman now.

In woman 's mien, in woman 's mind
The twin-born *flowers of grace* we find;
And in her blushing cheek we see
The *royal rose of dignity.*

The lilly symbol of her youth
Blooms next her heart. The *flower of truth,*
And more, the violet's bud's express
The *flow'rets of her tenderness.*

How to avoid Wrinkles and never to grow Ugly.—I saw the lady of the house; and much as I liked master, I don't know but I liked mistress more. Such a dear, kind-hearted creature; and so good looking; one of the sort that would never grow old, or look ugly, even if she were to live to the age of Methuselah. And her fondness for her old man is quite delightful. None of your "my dearing" or "my loving" nonsense, or anxiety about everything he likes to eat or drink disagreeing with him; but good, downright, honest, hearty affection, which was beautifully displayed in the happy smile with which she regarded the old fellow, and witnessed how truly he seemed to be enjoying himself. That's what I'd recommend all wives to do, who wish to preserve their good looks. A woman's looks depends so much upon expression; that, if that be spoiled, farewell to all her charms; and which nothing tends more to bring about than a countenance soured with imaginary cares, instead of being lighted up with thankfulness for innumerable blessings. That's what makes half the women wither away into wrinkles so early in life whilst nothing renders their beauty so lasting as that placid look of pure benevolence, which emanates from a heart full of thankfulness to God, affection for those nearest and dearest to him, and good-will towards all mankind.—*Blackwood's Magazine.*

No Mother.—"She has no mother!" What a volume of sorrowful truth is comprised in that single utterance—no mother! We must go down the hard, rough path of life, and become inured to care and sorrow in their sternest forms, before we can take home to our own experience the dread reality—no mother—without a struggle and a tear. But when it is said of a frail young girl, just passing from childhood towards the life of a woman, how sad is the story summed up in that one short sentence! Who now shall administer the needed counsel?—who now shall check the wayward fancies?—who now shall bear with the errors and failings of the motherless daughter!" Deal gently with the child. Let not the cup of her sorrow be overflowed by the harshness of your beating, or your sympathizing coldness. Is she heedless of her doings? Is she forgetful of her duty? Is she careless in her movement? Remember, oh, remember, "she has no mother!"

Dress.—A lady, writing to the Pennsylvanian says:—"Speaking of beauty, I wish people would dress pleasantly, benevolently. I saw a lovely girl to-day looking unlovely and unlovable, because her muslin dress was stiffly starched *to keep clean longer.* My laundress tries to persuade me into the barbarous custom. To my mind, a woman should always look as soft to the touch as a flower, and as pure. All her garments should be made of the finest and softest material that will easily disarrange itself into folds, falling gracefully around her and yielding to every movement, rather than keep her in stiff attitudes and [illegible] luxury of [illegible] dress which depended on [illegible] propriety."

The Wife.—It needs no guilt to break a husband's heart; the absence of content, the mutterings of spleen, the untidy dress and cheerless home; the forbidding scowl and deserted hearth: these, and other nameless neglects—without a crime among them, have harrowed to the quick the core of many a man, and planted there beyond the reach of care, the gem of dark despair. Oh! many woman before that sad sight arrives, dwells on the recollection of her youth, and cherishing the idea of that tuneful time, awake and keep alive the promises she then so kindly gave, and though she may be injured, not the injuring one—the forgotten—not the forgetful wife—a happy allusion to that hour of peace and love—a kindly welcome to a comfortable home—a smile of love to banish hostile words—a kiss of peace to pardon all the past, and the hardest heart that ever locked itself within the breast of selfish man, will soften to the charms, and bid her live, as she had hoped, her years in matchless bliss—loved, loving and content—the soother of the sorrowing hour—the source of comfort, and the spring of joy.

The Crops in the Interior.

The Mariposa Chronicle reports the wheat crop as being extremely light, particularly in King's river valley—yielding in many instances, not not more than ten or twelve bushels per acre. Corn, potatoes and garden vegetables, have also generally proved complete failures this season, partly in consequence of the swarms of grasshoppers which has devastated that section of country.

The Calaveras Chronicle states that the grasshoppers are committing depredations on the grain and vegetable crops on the Calaveras and Mokelumne rivers. Immense injury has been sustained by farmers and gardeners from this cause during the present season. A monster squash, weighing thirty-three and a half pounds, has been exhibited at the Chronicle office.

The people at San Bernardino are late in gathering their crops, on account of the want of men to assist in harvesting. It will be a month yet before they get their wheat cut and threshed out, although they have four reaping and threshing machines. They will sustain considerable loss in their crop, as it is entirely ripe, and falls out of the head in reaping—yet the yield will be abundant, and they will be able to supply the demand for flour in this part of the State. The Southern Californian states, that Messrs. Rich & Co. have 15,000 bushels of wheat engaged for their mills.

The Sacramento Union states that on the ranch of Messrs. Hutchinson & Green, in Yolo county, forty thousand and four pounds of wheat were produced from ten acres of ground this year. This gives sixty-six and two-thirds bushels to the acre, and is said to be an extraordinary yield.

Tall Oats.—Mr. J. Aplin, of Sublimity, Marion county, Oregon, has left at the office of the Statesman, a head of oats, grown on the farm of D. S. Staton, Esq., which contained 602 perfect grains. The head is but little, if any, better than an average one. Mr. A. also exhibited a large head of wheat, containing seven grains in each section, perfect, and of remarkable size.

Intelligence.—Farmers in want of help, workmen in any department, will please note the advertisement of Messrs. Antrobus & Huber, of Sacramento. These gentlemen are prompt, active, and furnish good men and help always at call.

The Public Schools.—The regular quarterly meeting of the teachers of the public schools of this city was held last Friday evening, in the Unitarian Church on Stockton street. The Superintendent read a retrospect of the origin and progress of free schools up the present time. He accords to Mr. J. C. Pelton and lady the credit of establishing the *first free school* on the Pacific Coast. The public schools as now organized, were established 25th September, 1851. By the 11th quarterly report it appears that 1,703 pupils have attended school; the expenses have been $13,160 72—22 teachers being engaged. In the 10th quarter 1,574 pupils were instructed, the expenses being $10,637 31. The attendance for the 11th quarter has been more regular than ever before, and the library has increased to 600 volumes. The schools are represented to be in a very flourishing condition.

John Blaxton, a young man, has laid two wagers one of $4,000 and another of $3,000, that he will ride from San Francisco to Independence, Mo., in twelve days. The distance has been estimated at 1,700 miles, but Mr. Blaxton asserts that by the route he will take, it will not be more than 1,300. He recently arrived here, overland, and made arrangements for relays of horses, twenty-four of which will be ready for his return. The greatest equestrian feat of the kind ever performed was by Mr. F. X. Aubrey, who went from Santa Fe, New Mexico, to Independence, nearly 1,000 miles in a little over four days.

The corner stone of the new Synagogue of the Congregation Sherith Israel, was laid on Sunday by the Rev. Dr. Eckman. A variety of documents to be deposited in the corner stone, [illegible] of the congregation, various [illegible] of the day, and many contributions from persons present, were deposited. The Rev. Mr. Stockton stated that Mr. Benjamin and Mrs. Hays had each given forty dollars, and Mr. Hays a hundred dollars. This is the second [illegible] by Jewish worship [illegible] in this city.

AGENTS FOR "THE CALIFORNIA FARMER."

Messrs Adams & Co. at a. their offices throughout the United States or Europe.

Messrs. Wells, Fargo & Co., at their offices throughout the Country.

Ma. O. H Hamilton, Travelling Agent for Sacramento City and County

Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*

Messrs. Adams & Co.—*Humboldt Bay, Trtnidad, Crescent City, Port Orford, Umpqua City, Scottsburg, and the entire northern coast.*

Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniontown, Eureka, and Bucksport.*

San Francisco.—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.

Benicia, Martinez, &c.—Messrs. Stiles & Dodds.

Union City and Mission San Jose—Messrs. Howard & Chamberlain.

Bidwell's, Butte Co—P. Freer.

Columbia—A. Hunnewell, P. M.

Coloma—D. G. Waldron & Co.

Mokelumne Hill—I. Coffin.

Marysville—R. A. Eddy & Co.

Mount Farm, O. T.—Gen. M. M. McCarver.

Napa—James & Co.

Napa City—Dudley & Co.; Hiram Downing.

Nevada—A. W. Potter.

New York City, N. Y.—J. M. Thorburn & Co.

Placerville—Nash & Davis.

Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.

San Luis Obispo—Dr. Thomas T. Harvey, P. M.

Stockton—C. O. Burtoo.

Sonora—Tooey & Roberts.

Sonoma—Senor Pedro Valasquex.

Suisun—B. F. Finchley.

Union, Humboldt Bay—A. H. Murdoch, P. M.

Yreka—Cram, Rogers & Co; Parker & Roman.

☞ We desire Agents to report as early as possible, that we may be prepared in our issues for a sufficient number to supply the demand. Be sure and report promptly.

THE CALIFORNIA FARMER.

SAN FRANCISCO, THURSDAY, AUGUST 10, 1854.

Raising Seed.

One of the great obstacles in the way of success in this country in our gardening operations is the vast amount of Spurious Seed that is thrown upon the country from abroad, and the quantity that is raised and sold here.

Hundreds in California are buyers and sellers of seed, who have no knowledge of the business or the nature or character of seeding, many who cannot tell one *kind* from another, and when we speak of the numerous varieties of *each kind*, they are lost. Seedsmen have much to bear with and are often blamed when they deserve more praise than blame. They have to bear all the faults of the ignorant and want of skill in those who call themselves farmers or gardeners. Seedsmen have to bear all the blame of the *seasons*; it matters not with those who are ignorant, whether the floods lay upon the seeds for weeks, or a burning sun destroys them; it matters not whether they plant too deep or too shallow—seedsmen are to blame if the seeds don't grow, however little care is given by the planter to soil, season, or depth of planting.

Many farmers, too, and those that think they know all about gardening, raise seed to sell, and think if raised in this country fresh, of course it must be good. They plant all the varieties of each species together, not knowing that they are destroying the *purity* of the species by thus mixing the varieties; and these raised thus, they offer them as pure and fresh California seeds. Unless the seller is a seedsman, qualified by his knowledge of seed growing, he unintentionally commits a great wrong as well as error, and brings the whole trade into disrepute.

The best and most experienced tradesman in seeds will often be the sufferer, when entirely innocent of intending wrong. Seeds are injured by importation without manifesting the least appearance of it. And when we hear of wholesale charges against all the seed sellers, we impute it to ignorance and want of charity, and are more *grieved* than injured, at the poor judgment displayed by such a disposition. Let planters be willing to sustain those who introduce only the best and purest, and be willing to give liberal prices for a good article, and there will be encouragement offered to those who embark their all in advancing great interests.

Snip Your Grain.—We trust our grain growers will give immediate attention to the liberal offer of Messrs. Page, Bacon & Co. Let those whose industry has been crushed by speculators abroad, and those who manifest a determination to break them down, feel that there is a spirit here that will act in self-defence, and that we have not only an abundance of grain, but that we are able to supply our neighbors across the water with a quality of wheat they rarely see.

State Agricultural Society.—Those who desire to become members of the California State Agricultural Society, are invited to call on Judge Chambers and enroll themselves as members, and receive their certificates of membership. Judge Chambers is the Treasurer of the Society, and is to be found at the banking house of Page, Bacon & Co., of which he is a member.

Figs pears and apricots are plenty at Los Angeles. They are retailed at twenty-five cents per dozen.

Foreign Grain Markets.

We make the following extracts from Wilmer's & Smith's Liverpool Times, of June 10. It is well to note these matters, as they have a bearing upon our markets. Those of our growers that are not familiar with the manner of sales in England, by remembering that *a quarter is eight bushels*, they arrive at the price per bushel, after reducing sterling money to our currency:

Grain—Wheat, American, 76s@83s; do, Danzig and Konigsberg, 79s@90s; do, Rostock and Pomernoian, 77s@86s; do, Odessa and St. Petersburg, 70s@76. Maize, white, 45s@48s; do, yellow, 45s@48s. Peas, fine boilers, 55s@58s. Barley, grinding and distilling, 35s@41s. Beans, Friesland and Holstein, 42s@48s; Konigsberg, 47s@50s. Oats, Polish, 30s@33s. Flour, American, per barrel, 35s@41s; do, sweet, 40s@44s; sour, 37s@39s.

The Corn markets throughout the kingdom have generally been quiet, and prices have not fluctuated much during the week. At Mark-lane Wheat and Flour were unaltered in value, but were firmly held by factors. Oats, owing to the magnitude of the supplies, declined 6d. to 1s. per qr. At the provincial markets generally the value of Wheat declined from 1s. to 2s. per qr., and for all other Grain and Flour trade was limited. At Liverpool, at a slight advance on last week's prices, there has been a steady daily consumptive demand for all articles in the Corn trade, and the deliveries are fast reducing stocks; an absence of speculative purchases, however, gives the market a tame appearance. To-day there was again a steady demand from consumers at Tuesday's quotations.

London Corn Market.—The weather has turned more tranquil, and vegetation will progress. The arrivals of home-grown Wheat are trifling, and not large of foreign. The market is firm, but transactions few and small. The arrivals of Barley are moderate, but the market is dull. The foreign supply of Oats has for the market ceased, and the market wears a firmer tone. Flour: Market firm.

Curing Foot Rot in Sheep.

As practical experiment yields the most reliable knowledge, I am about to relate one with its results. In 1847, circumstance gave us the opportunity, and in company with Bros. Jas. & J. R. Cunningham, I selected one hundred and ten ewes from the flock of sheep of the purest Dickson blood then extant. We were aware they had the foot rot, but it was a rare chance to get a selection of choice blood, and we thought we could cure them. To guard against getting our home flocks innoculated, we hired quarters for them two miles distant, and brought them there the last of October. We doctored them regularly about every ten days, from that time until spring, as follows: With nippers and sharp knives we clipped and pared off the diseased parts, not sparing any of the hoof so long as there was any appearance of unsoundness. Then immersed the feet in a solution of blue vitriol in vinegar, as strong as the liquid would dissolve when boiling hot, holding them in long enough for the powerfully corrosive solution to penetrate the foot thoroughly. This was done to every one of the sheep, whether they showed any appearance of disease or not. We also gave them about half a pound of sulphur in their salt, twice a month. We had them apparently well, again and again, but as often it would break out afresh, either from the seeds of the disease lurking in their systems, or from coming in contact with the virtues they had previously dropped.

In the spring we despaired of curing them, while they remained in one flock, and in the same field they had infected; so we divided them and removed them to fresh quarters. I took thirty-seven with their lambs, and from that time dressed and dipped them every week; and if I had not classified them, I do not know but I might have been at it yet. But, so soon as one appeared to be well, and its feet grown out, I marked it, and if it kept sound for a fortnight, I promoted it to fresh.

Proceeding in this way, and regularly dipping both the sound and the unsound, by winter I had them all passed into the cured class. To guard against its breaking out again, I dipped them occasionally through the winter; still, noticing a lamb but three or four days old, lame, some three months after the old ones all appeared well, I examined it, and found one foot entirely rotten. I of course killed and buried it immediately, and this was happily the last of my foot rot. But I had become too well acquainted with the insidious disease by this time, to allow of their going with my home flock until they had been entirely well some eighteen months. My Bro. James took but a small number, and succeeded in curing them by nearly the same treament.

Now, I desire to say to my brother wool-growers, I have never had foot rot or any other contagious disease in my home flock. This hilly, dry country, is remarkably healthy for sheep, and free from contagious diseases of all kinds; and I presume such disease would be as easily cured here as in any other section of the United States; yet, I would not consider one thousand dollars, cash in hand, an equivalent for its introduction into my flock. You are never safe in buying sheep of irresponsible, itinerant sheep jockies; as freedom from lameness at any given period, is no certain guarantee that a sheep is not from diseased stock, and innoculated. I do not speak thus to irritate the sores of some prominent sheep men in this State, who have already got the disease in their flocks in this way, but to warn those who are still safe. If you have a good flock, you cannot receive an equivalent for the introduction of this direfully destructive, and almost incurable disease.—*Corr. in Ohio Farmer.*

Deep Plowing.

As many persons will plow in their stubble after harvesting their grain, and as the straw stubble is a good fertilizer and keeps the ground open, we call especial attention to the following article, (from the Rural New Yorker,) and trust it will receive a careful perusal:

The season having again returned when farmers are busily engaged in turning the sod, or stirring the soil, I will add my testimony in addition to others, in favor of deep plowing. Four years ago I purchased the farm on which I now reside. Being a stranger in this section, I commenced plowing my land with deep furrows—which some of my neighbors noticing, they remonstrated, saying that I was turning up ground so poor that nothing would grow. I may remark here, that the farm has been tenanted for 20 or more years, till the soil was supposed to be exhausted. My faith being strong, I continued to plow as deep as I could, and, I believe, with good results; from 32 acres of land, I gathered over 1,500 bushels of corn.

In the fall of the same year I plowed a lot of some 9 acres of wheat. This was contrary to common custom, as the old fallow system was then, and is yet to some extent, in full vogue. From this field I had cut a light crop of grass. When I was plowing this field, some inquired my intention. I told them, to put in wheat. The reply was, "you will not get your seed. The last crop did not yield five bushels to the acre." Well that was discouraging; but I let the teams go on—the first team drawing the Eagle C, and the next a sub-soil. I will remark here, that the field should have been plowed earlier, as this was the last of August and the first of September. The wheat was put in, without any manure, the last of September, and the yield next season was over 22 bushels per acre. The ground was seeded, but did not take well.

The next season I pastured it till after harvest, and plowed it with a double or Michigan plow, followed by a sub-soil, and sowed the 24th of September with Hutchinson's and Soule's wheat; and the yield I think was not less than 33 bushels per acre. The only manure for the last crop, besides the poor and closely eaten grass sod, was 30 loads of leached ashes, and some 9 or 10 of muck and marl, scattered broadcast over the field just previous to sowing. The ground is now worth fifty per cent. more than it was four years ago.

It may not answer to turn up the soil to a much greater depth than usual at first, but a gradual deepening can be practiced to advantage in almost all cases. I have heard some say that they plowed deep; and when interrogated how deep, replied six or eight inches. When I plowed the above field the last time, the depth was twelve inches, followed by the sub-soil plow, going some six or ten inches deeper. I. A. Clank.

Do King Birds Eat Bees?—The agricultural journals are discussing the knotty question *pro* and *con*. Some contend with great vehemence that they do, and others with equal earnestness that they do not. Now both are right and both are wrong, dependent entirely upon what they understand by the word "bees." If they mean *working* bees, then one party is mistaken; for we do not believe either a king bird, or indeed, any other bird, could swallow many of them before they would inevitably be stung to death. If they mean *drone* bees, then they are right, as drones have no sting, and may be swallowed with impunity. We have often seen king birds perch themselves on a tree over bee-hives, and as the bees flew out, dive, catch and swallow them. An old bee-master informed us that he has frequently shot the king birds after doing so, yet never found any other than drone bees in their crops. We thought this question settled years ago, for we well recollect that such an understanding of the matter was common among farmers and their children when we were boys.—*American Agriculturist.*

It cannot be that the bird destroys the "working bee—it cannot be; it is the *drone*, and it is kingly work. We wish some of the king birds would come to California, for there are *plenty of drones here* that need killing off, and then we should hear less of dull times.—Ed.

To Destroy Vermin on Animals and Trees. The celebrated Raspail, well known as one of the best French chemists, has given an important receipe for destroying vermin on animals, and also on plants and trees—important, at least, if true. The process he recommends is to make a solution of aloes—one gramme of that gum to a litre of water—French measure—and, by means of a large brush to wash over the trunks and branches of trees with this solution. This simple process, says Raspail, will speedily destroy all the vermin on the trees, and will effectually prevent others from approaching. In order to keep clear sheep and animals with long hair, they must be bathed with the solution, or well washed with it. Raspail mentions several trials he has made with this mixture, all of which have been attended with the most complete success, and he recommends it very strongly to general use. I can only say that if a simple solution of aloes and water will kill or drive away ants from peach and other trees in Texas and other parts of the South, the discovery will be hailed with pleasure. At all events there is no harm in trying the experiment. A French litre is a little less than three of our pints—a gramme is the five hundredth part of a French pound. A little aloes, if used at all, will thus go a great way.

Preparation of Flax.

The following is the Report of the Committee of Arts and Sciences of the American Institute, on Leavitt's Machinery for the Preparation of Flax, the Committee report:

That they have examined the samples of flax in various states of preparation exhibited to them by Dr. O. S. Leavitt, and have received from him full explanations of his processes and the machinery by which he purposes to perform them. In order that they might perform the duty assigned to them more satisfactorily, they have invited Col. John Travers to aid them in their investigations and to unite with them in their report.

1. From the samples exhibited, it appears that by Dr. Leavitt's process, ripe flax, after being stripped of the seed can be cleansed completely and prepared for manufacture without being rotted.

2. That from the flax in its earlier stages of preparation without rotting, rope, twine and coarse fabrics, may be made with great saving of manual labor.

3. That by further mechanical processes the gum, glutin, and resin, may be chiefly removed, and by the use of machinery in aid of the usual chemical processes, the flax may be deprived entirely of its color and rendered fit for the manufacture of fine linen—that thread exhibited to them, apparently in consequence of the omission of the process of rotting, and the substitution of mechanical methods for much of what has hitherto been performed chemically, is stronger than common linen thread.

4. That the expensive and wasteful process of heckling is entirely superseded by Dr. Leavitt's processes, and the prepared material is delivered from the last of the cleansing processes in rovings ready to be submitted to the usual spinning machines.

5. That the flax cleansed, bleached, and ready to be formed into rovings, can we believe, be produced at a cost much less than that of rotted and heckled flax unbleached, while the inventor claims and adduces satisfactory arguments to prove the probability that flax, ready for spinning into white thread, will not exceed good cotton in its cost.

6. Dr. Leavitt also claims that by a process of kyanizing, applied during the preparation of flax and hemp, the cordage made therefrom is rendered more durable and stronger, while the surface of the yarns is rendered smoother.

Admitting that the process of Dr. Leavitt has no other advantages than those which your committee can state to be absolutely certain, your committee are of opinion that their result must be attended with very important consequences, and will, if carried into operation on an extensive scale, add much to the agricultural and manufacturing wealth of the United States.

Jas. Renwick, Chairman.

Subterranean Air Essential to the Growth of Vegetation.—There is now on exhibition at the Crytal Palace from Holland, says the American Agriculturist, a long pointed iron socket attached to a wooden handle, labelled "to promote the growth of fruit trees. The mode of using is not specified, and we can only conjecture that it is for making holes and breaking up the earth around the roots—not a bad idea, we think.

It has seldom occurred to farmers, but is a fact, nevertheless, worthy all due considerations, that air beneath the surface of the ground is just as essential to the growth of the tree or vegetable, as air and light above it. A light or porous soil, or a well manured one, which is always porous, affords a continued, though limited circulation of air, and thereby secures its contact with the root and its fibres. This is indispensably requisite to all healthy vegetable growth, except aquatic plants.

This principle will satisfactorily account for the great improvement in crops which follows sub-soil draining on compact soils, which seemed to be wholly independent of any such aid. It is not the quantity of water that is thus removed which makes the difference, but the augmented circulation of air thus introduced through the drains; and especially the breaking up and disintegration of the heavy soil which is inevitably secured by these aerial and humid currents.

Variety of Food Necessary.—It is in vegetable as in animal life; a mother crams her child exclusively with arrow root—it becomes fat, it is true, but, alas! it is rickety, and gets its teeth very slowly, and with difficulty. Mamma is ignorant, or never thinks, that her offspring cannot make bone—or, what is the same thing, phosphate of lime, the principal bulk of bone—out of starch. It does its best; and were it not for a little milk and bread, perhaps now and then a little meal and soup, it would have no bones and teeth at all. Farmers keep poultry; and what is true of fowls is true of cabbage, a turnip, or an ear of wheat. If we mix with the food of fowls a sufficient quantity of egg-shells or chalk, which they eat greedily, they will lay more eggs than before. A well fed fowl is disposed to lay a vast number of eggs, but cannot do so without the materials for the shells, however nourishing in other respects her food may be. A fowl, with the best will in the world, not finding any lime in the soil, nor mortar in the walls, nor calcareous matter in her food, is incapacitated from laying any eggs at all. Let farmers lay such facts as these, which are matters of common observation, to heart, and transfer the analogy, as they may do, to the habits of plants, which are as truly alive, and answer as closely to every injudicious treatment, as their own horse.

What has Government Done for Agriculture?

In De Bow's Review are facts of so much importance that we publish them entire and urge them upon the attention of our readers, and trust our own State will ere long present a goodly list of County Societies and Schools, and her College also. The writer says:

Gen. Washington, Mr. Jefferson, Mr. Madison, Mr. Monroe, and Mr. Adams, for a period of thirty-six years consecutively, all recommended an improvement of agriculture, or national schools; and the same principles and powers are involved in each of their recommendations, and no one of the subsequent Presidents advising against it; Mr. Taylor and Mr. Fillmore strongly recommending, and their secretaries; the resolutions of legislatures, petitions of agricultural socities and of the people, and the interest of eighteen millions of our inhabitants, yea, of the whole, I ask, if all this combined is entitled to any consideration? It has received but very little. But I am told there is a patent office, and the farmers are abundantly enlightened with the crumbs that fall from its table. The patent office, until 1831, during Gen. Jackson's administration, when he called Mr. Ellsworth to it, was a burlesque, and is now, upon farming, compared with the wants of this great nation. Mr. Ellsworth was a practical farmer; but he had all to do, and nothing to do with. He was the first in that office to give any attention to agriculture. But the first appropriation for that object was in 1839, $1,000, for collecting agricultural statistics; in 1842, $1,000; in 1843, $2,000; in 1844, $2,000; in 1845, $3,000; in 1847, $3,000; in 1848, $3,500; in 1849, $3,500; in 1850, $4,500; in 1851, $5,500; —total, $29,000 in seventy-five years. The cost of printing is not included, and cannot be ascertained, as the report of the Commissioner was all published in one volume until the last two years. What can this small pittance do for this nation? Scarcely enough in any one year to defray the ordinary expenses of correspondence.

The Fund is to be distributed by the Commissioner of Patents, who is not selected for his knowledge of agriculture, (whose main business is of a different character, and more than he can do,) and may or may not be acquainted with it. The business must therefore be done by an unaccredited agent. Where is our agricultural department? Pent up in the cellar of the patent office, and cannot be found at midday without a candle; and when found, a single clerk struggling to get up the report. When it is up and out, there are but four hundred volumes of each congressional district of one hundred thousand population, and that a reading people; and there is more call for this document than all others of a public character, and fast gaining in reputation from editors over the Union, and the public generally, inadequate as it is.

There is no country where the mind is so inquisitive and information so generally desired and possessed as in America. Travel over the whole world and return, and the truth is seen and felt more palpably. To us the masses of the world are looking for improvement, physically and morally, and for it they seek us in thousands daily. In the United States there are but about thirty agricultural periodicals published, and there are five hundred thousand copies taken and read by the people—a mere drop to the ocean. There are agricultural journals in the State of New York that have six times greater circulation than any single paper of the kind in Europe. This only shows how great the thirst we ought to assist in gratifying. In America, there is not an agricultural school aided or patronized by the government; and, in fact, it may be said, there is none at all. Some are just beginning to struggle for life, but the faint, feeble feeling of the general government infuses itself into every part of its great family, and paralyzes the whole body. There is not what may be regarded as a text-book in any branch of agriculture or rural economy in America.

Compare what America as a nation has done, with what has been done by other nations. I can but glance at it. Russia has in all sixty-eight schools and colleges. She has an agricultural institution with forty college buildings, occupying three thousand acres of land, and attended by several thousand students. The Agricultural society of St. Petersburg was established by Queen Catharine. There are under the patronage of the French government seventy school-farms, besides five first-class colleges, in which professors are employed to lecture on botany, zoology, chemistry, agriculture, and the treatment of diseases in cattle; on the culture of woods, forests, etc. These are supported throughout the country. National establishments for the improvement of breeds of stock, and colleges for the education of veterinary surgeons, and investigating the uses of all discoveries contemplated for agricultural improvement. The government expends in three veteriuary schools, a year, for instruction, 754,200 francs; for instruction in agriculture, 2,731,428 francs; for encouragement in agriculture, 700,000 francs; for improvement in the breeds of horses and science connected with it alone, 1,776,400 francs. The requirements for admission into these veterinary schools are as follows: The applicant must be not less than seventeen years of age, and not over twenty-five, and have the following qualifications: to be able to force a horse or ox-shoe after two heatings; pass an examination in the French language, arithmetic, and geography, and after four years' study, is permitted to practice veterinary surgery, and receive a diploma. In Belgium, great attention is paid to the subject. There are a hundred agricultural schools or colleges established by the government—a high school of veterinary surgery. The science of agriculture is the most fashionable in the kingdom. They have their palaces furnished more or less with rare specimens of the products of the land, and are farmed like a garden. These facts I know, having traveled over considerable part of that country. In Saxony, they have five schools; in Bavaria, thirty-five; in Wurtemberg, seven; in Austria, thirty-three; in Prussia, thirty-two; in Italy, two; in Scotland, two; in Ireland, sixty-three. The one at Glessnevin, near Dublin, I visited. It now consists of one hundred and twenty-eight acres of good land, and convenient buildings, and are about to add to their farm, and increase their buildings, so as to accommodate one hundred or more students. With the teacher, Mr. Donaghy, I became acquainted. He is an intelligent, practical man. With him I viewed the farm, and their farming and buildings, etc., and it is carried on very successfully. These schools are doing more for Ireland than any other attention the government is giving them. They have colleges and agricultural schools in England sustained by the government—some four or five with large farms attached to them—where all the sciences connected with the general business are taught with great perfection, and millions of money each year invested in the general science of agriculture by the nation. It is an investment, and not an expenditure. Other countries are engaged in the same business, but I cannot go further into detail. Sufficient is said to draw a parallel between their views and ours. Abroad, they invest millions each year in a country not larger than the average of our States. Here, in all our country, for seventy-five years, for the general object we have expended $29,000. * * * The number of agricultural societies in this country are thus given: New York has a State society, and from seventy to eighty county societies. Pennsylvania has from twelve to twenty county societies, and many grouped together. Ohio has a State society, and seventy county societies. Massachusetts has twelve societies, and in many of these societies several counties together. Michigan has twenty county societies. Indiana, a State society. Kentucky, five county societies. Georgia, a State society, and fifteen county societies. South Carolina has six county societies. Virginia has a State society, and three county societies. Maryland, a State society, and four county societies. Vermont, a State society, and four county societies, and was the first *State* to ask us to establish a National Board. New Hampshire, a State society, and eight or nine county societies, and also asked Congress to establish a Board. Connecticut, a number of county societies. Rhode Island has also passed resolutions asking Congress to establish a Board. Maine has six county societies. Iowa, a State society, and six or eight county societies. Wisconsin, a State society. Illinois, three county societies. Tennessee has some county societies, and two years since, unanimously recommended a National Board. Florida has passed a resolution for a National Board. Louisiana, in 1848, passed a law for a Bureau.

Is the First Milk Poisonous?—A friend informs us that Mr. H. H. Wymon, of Sydney, lost a valuable sow, not long ago, in consequence of giving her the first milk of a cow after calving, and aks if it invariably causes such trouble if hogs are fed on it? We believe that it does. We one year gave some such milk to a sow with pig. It made her sick and she cast her pigs before her time, all of which were dead. We had been told this would be the result, but doubted it. The next year we fed it to another under the same circumstances, and the result was the same—all the pigs being dead. We found that rather costly experimenting, and never tried it again. Last spring one of our neighbors, who had a very fine sow, fed her with a generous portion of such milk; she immediately became sick, and came very near dying.—*Maine Farmer.*

To Restore those struck by Lightning.—E. Merriam, the meteorologist, renews the recommendation to apply cold water freely to persons who have been struck by lightning. In all cases where persons have been struck down by lightning use cold water on the body for hours; do not be discouraged if immediate success is not attained, but continue to persevere, and if, after three or four hours' drenching, animation is not restored, add salt to the water and continue the drenching. I have an account of a person struck down by lightning on Staten Island several years ago, who was restored after several hours' drenching with cold water. This case alone is sufficient to prompt to exertions in all cases beyond the time usually devoted to restoration of animation, in cases where persons have been struck down by lightning.

Farmers of the old School.—Somebody has strung together the following list, it might be extended:

Adam was a farmer while yet in paradise, and after his fall was commanded to earn his bread by the sweat of his brow.

Job, the honest, upright, and patient, was a farmer, and his stern endurance has passed into a proverb.

Socrates was a farmer, and yet wedded to his calling the glory of his immortal philosophy.

Cincinnatus was a farmer, and one of the noblest Romans.

Burns was a farmer, and the muse found him at the plow and filled his soul with poetry.

Washington was a farmer, and retired from the highest earthly station, to enjoy the quiet, rural life, and presents to the world a spectacle of human greatness.

The Cocoa-Nut Tree.

This tree is found all over the tropical parts of the world, especially in the vicinity of the sea, growing within reach of salt water, and establishing itself upon reefs and sand banks, as soon as they emerge from the ocean. Its great importance to man has caused it to be cultivated wherever the climate is favorable to its growth. The whole Brazilian coast, from the river San Francisco to the bar of Mamanguape, a distance of 280 miles, is, with few breaks, thus occupied; and it is estimated that in the year 1813, no less than ten millions of trees were growing on the south-west coast of Ceylon.

The cocoa-nut palm rises like a slender column, to from 60 to 90 feet in height. In hot countries, the uses to which the cocoa-nut tree are applied, are innumerable. The roots are chewed in place of the areca-nut; gutters, drains and the posts of huts are formed from the trunk; the young buds are a delicate vegetable; shade is furnished by the leaves, when growing, and after separation from the tree, their large size and hard texture render them invaluable as thatch for cottages; they are, moreover, manufactured into baskets, buckets, lanterns, articles of head-dress, and even books, upon which writing is traced with an iron stylus; their ashes yield potash in abundance; their midri form oars; and brushes are made by bruising the end of the leaves, with a portion of the midri adhering.

From the juice of the stem a kind of palm wine, and subsequently an ardent spirit, is prepared; the farinaceous matter contained in the stem is a good substitute for sago, and a coarse, dark colored sugar, called "jaggherry," is obtained by inspissating the sap. This jaggherry, mixed with lime, forms a powerful cement, which resists moisture, endures great solar heat, and will take a fine polish. The ripe fruit is a wholesome food, and the milk it contains a grateful, cooling beverage. Indeed these, together, constitute the principal sustenance of the poorer Indians in many countries.

The fibrous bark is used to polish furniture, as brushes, and to form a valuable elastic cordage, called "coir." The fibrous matter of the husk is employed to stuff mattresses, and a manufacture of it into cordage, mats, sacking, &c., has lately been introduced in Great Britain. The shell is manufactured into drinking vessels and vessels of measure, and the albumen, or white solid matter contained within the shell, yields by pressure or decoction, an excellent oil, which is employed not only for burning but in the manufacture of torches, and in the composition of pharmaceutical preparations. Mixed with dammer, (the resin of thorea robusta) it forms a substance used in India for covering the seams of ships and boats.

Cocoa-nuts are imported as dunnage, and therefore are free of freight.

The philanthrepist will be pleased to learn that whether the existence of cocoa-nut groves has led to a taste for agriculture, or a taste for agriculture has led to the formation of cocoa-nut groves, certain it is, as proved by long experience among races just emerging from utter barbarism, that this tree is the banner of hope to its possessor. Mr. Earle says that whenever assisting to form remote settlements, (at which he has spent years of his life,) several hundreds of cocoa-nuts, for planting, have always formed part of the first ship-loads of seeds; and assuredly, if the natives preserve the groves that he has left them, they will have made the first step out of the darkness of barbarism.

When once this boundary is passed, progress becomes smooth and easy, although it may not be rapid. A fixed residence becomes necessary, to protect the newly acquired property, and the plantation now becomes extended to other plants and edible fruits and roots that may be found in the woods or procured from their neighbors.

Hail, then, to the cocoa-nut tree, with its feather of leaves, and delicious fruit—the commencement of agriculture—the harbinger of civilization—may it be propagated from shore to shore, wherever it will grow, until barbarism shall be unknown, except as history; the errors of Paganism giving way to the truths of the Christian religion, its blessings shall be diffused to the furthermost parts of the earth.—*Dollar Newspaper.*

To Cure Warts on Cows.—We copy the following from the New England Farmer:

"What will cure warts on the teats of cows?"

"My remedy is as follows: I tried walnut shells on the shoulder of a cow, where the warts covered a place six inches square. I took the walnuts, cut the shells off, and pounded them (the shells) up so that I could press the juice out, and rubbed the warts with my hand and juice for about ten minutes, every day for a week, when the warts began to be quite loose, so that you could pick them off easily. Before applying the juice, I rubbed the warts so as to take all off that I could; the last time I put on the juice, I rubbed the warts until the blood came; now the warts are all gone, and the place looks as if none had been there.

"Having given this a fair trial, and found it to prove successful, I give you the result.—G. C."

Horse Killed by Bees.—At Jackson, Missouri, a short time ago, a horse was stung to death by bees. The owner of the horse had tied him to a fence, on the inside of which were a number of hives of bees, which became enraged at the movements of the intruder and fell upon him en masse, covering him from head to foot and stinging him in such a manner that he died in about two hours.

The Sack-Tree.—There is said to be a tree in Bombay called the Sack-tree, because from it may be stripped very regular natural sacks, which resemble "fish" in appearance,

---

Application of Guano.—We find the following article in a late number of the Lawrence Home review:

Mr. Editor: As I was passing by the fine estate of Mr. Rogers, in Danvers, formerly a part of the Derby farm, my attention was arrested by the luxuriant growth of grass in his fields; so that I was induced to inquire what had been done to start it thus ahead of all other fields. The farmer told me it had been brought about by the application of liquids (*urine of cattle*) gathered under his stall, mixed with guano, and the whole spread upon the ground, by being pumped from a cistern into a cask set upon wheels, and scattered, as is water upon streets. This application was made about four weeks since. Where the watering machine passed is distinctly apparent, by the quantity and richness of the grass; no other dressing having been applied to the field this season. If my memory is right, Mr. R. more than doubles the quantity of his grase on several acres this season, simply scattering the urine thereon; and now by mixing it with a small quantity of guano, of good quality, the effect is most astonishing. It is too early in the season to say what will be the effect upon the crop, but I mention it, that those who are curious in these matters may examine it for themselves. Much has been said of the benefits to accrue from *model farms*, where experiments can be tried, that individuals cannot afford to undertake; but when men with ample fortunes undertake such experiments, and are willing that others should see them, they become *models* themselves, for the benefit of the community in which they live.

Cattle Show and Man Show.—I have now on my table a handbill of the "South Kennebec Society for the promotion of Agriculture, Horticulture, and the Mechanics and Arts," offering premiums for the best of everything in the line, from a horse to household furniture, including neat stock, swine, sheep, agricultural implements, &c., &c. While reading the bill the thought occurred to me, why not commence the bill with the best woman and man, then the best children, of the respective ages of 15, 10, 5, 3, 2, and 1, years. Don't ridicule the idea, gentle reader, for if you were present at that show, and took half the notice of your own species that you did of your hogs, you found almost every form of deformity inherited, as well as disease acquired, the removal of which will be quite as beneficial to the world at large, and yourself in particular, as the improvement in hogs or horses, geese or hens. Don't scorn the thought of improvement of your own kind, for you have not a class of animals so susceptible of improvement nor one so much neglected. What would you think of propagating animals, one-half of which must die in infancy, three-fourths before maturity, and every tenth one with some deformity, and one-half at least so ugly-looking that they would "frighten owls" that had only seen those made in God's image?

It is a notorious fact that our domesticated animals have more interest taken for their health, longevity, beauty, and usefulness, than is bestowed by their masters or owners on themselves. The fault is not that too much interest is taken in the improvement of the one, but that too little is taken in the other.—*Eastern Light.*

How to Get Rid of Flies.—It was on a subject of general interest that Mr. Spence wrote, when he communicated to the Entemological Society the account of a mode employed by a friend of his in Florence to remove this drawback to the comfort of existence. He tells us that his curiosity was greatly excited on being told by a gentleman residing in the neighborhood of that city, that for two or three years he had entirely succeeded in excluding flies from his apartments, though allowing the windows to be open wide for the admission of air. While the sitting and dining-rooms of his neighbors were swarming with them, a strict search was necessary to detect even two or three in his apartments. The possibility of excluding flies from a room where the windows were wide open was explained by the curious fact, that flies will not pass through the meshes of a net, even though those meshes are more than an inch in diameter. The plan of this gentleman was simply to suspend a net made of light colored thread to the outside of the window, and although every mesh was large enough, not only to admit one fly, but several flies with expanded wings, to pass through at the same moment, yet from some inexplicable dread of venturing across the meshwork, these insects were effectually excluded. It is necessary to state that in order for this plan to succeed, it is essential that the light enter the room on one *side only*, for if there be an opposite side window, the flies pass through the net without scruple. The fact of these insects being excluded by the simple means above stated (when the room is lighted from one side only,) has been repeatedly noticed and confirmed. Nor are we dependent solely on account of this fact as received from a foreign country; it has been noticed and confirmed also by observers in England.

Dr. Stanley gives an account, in the "Transactions of the Entomological Society," of some experiments entered on by him in order to obtain satisfactory investigation of this [illegible] discovery.—*Brown's Pictorial Cyclopedia.*

The Kentucky Agricultural and Mechanical Association at Lexington have [illegible] with an account of their [illegible] for the premium of a [illegible] Address [illegible] on their Fair ground. [illegible] and invited [illegible] to be present. [illegible] the annual [illegible] on September.—*Louisville Eagle.*

Summary of News.

FROM OREGON.

By the arrival of the Peytona last week we have dates from Oregon to the 29th July. In relation to the overland immigration, the Oregonian learns that there are four hundred wagons on the way, besides many droves of cattle. Grass is abundant all the way except from Snake River to Salmon Falls. There were a number of miners at work on Burnt River, who are said to be doing well. A large number of traders are on the route, so that immigrants can obtain what they require.

In the Willamette Valley the people are in the midst of their harvest. The crop is said to be large.

Gen. Palmer, Superintendent of Indian Affairs in Oregon, has lately returned from the south, where he has been visiting the various Indian tribes. At present all is quiet and peaceable but there are some slight indications of a rupture with the Upper Rouge Indians. The extent of country along the coast susceptible of cultivation is not large; it is mostly covered with a dense growth of fir and cedar. The Indians are comparatively few in number, healthy, sleek, and indolent, subsisting mostly on herries and fish.

Some of the papers declare the Coquille mines a humbug; while others contain statements verifying their richness.

LATER.—The mail steamer Columbia arrived on Tuesday. By this arrival we learn that Governor Davis of Oregon has resigned; in consequence of the continued sickness of his family. Mr. George L. Curry, Secretary of the territory, thus becomes clothed with the powers and entrusted with the duties appertaining to the guhernatorial chair.

A new steamboat of the Mississippi style, named the Walemet, has been placed on the Columbia river, to ply between Astoria and Portland.

Lumber is being shipped from Oregon to China, the bark Louisiana having just loaded a cargo of selected lumber.

The Times learns that a large bed of oysters has recently been discovered at Shoalwater Bay. They are said to be superior to the Baltimore oysters.

The amount of lumber exported from Oregon the past ten months is 22,567,000 feet, which at $14 per thousand at the mill would realize $315,930.

The aggregate vote for a Convention to form a State Constitution in Oregon, at the last election, was 3,210; against a Convention 4,079; majority against Convention, 869.

Immigrants arrive daily, though the number of families to arrive is said to have been over estimated; the amount of stock is large.

FROM THE SOUTH.

By the steamer Sea Bird we have Los Angeles papers to the 28th July. From them we learn that a company has been formed for the purpose of manufacturing salt from a lake located about seventeen miles from Los Angeles. The salt is equal if not superior to any in the market, and can be procured in sufficient quantities to supply the whole Pacific Coast. The lake is fed from the sea at high tides.

A great excitement prevailed at Santo Barbara in regard to the Kern River mines. The miners were said to be averaging $10 to $25 per day. The diggings are one and a half day's travel from Santa Barbara, over a good wagon road.

The usual number of murders and robberies are reported.

FROM THE TEJON.—Many Indians are said to have left the Reservation and gone into the mountains, there being scarcely enough remaining to finish up the harvesting. About 50 left, who were followed by Mr. Beal; rather than be taken back they showed fight. The cause is said to be the removal of Mr. Beal.

LATER.—The Southerner arrived on Monday, from San Diego, via Santa Barbara, bringing later accounts.

The mines on Kern River are said to have been discovered by a party of three inexperienced Mexicans, who in five days succeeded in taking out $480, in what is called coarse gold.

Col. Thomas J. Henley, Superintendent of Indian Affairs, started for the Tejon, in company with Lieut. Beal, on the 30th.

FROM THE INTERIOR.

SALMON RIVER is a desirable place for the unemployed, according to a correspondent of the Shasta Courier, who writes: As I consider one of the best mining portions of California has been neglected or unnoticed by way of publication, I will make a true statement as regards the same. I have been here about two months, and have made a general visit among the miners, and know, from ocular demonstration, that they are doing extraordinary well. Some companies are taking out from three to five ounnces per day to the man, and none less than one ounce. A man can make, with a common rocker, anywhere on the banks of the river, from six to eight dollars per day, and there is plenty of such ground for one thousand men. For two miles on either side of this place, over half of the river is flumed, and one company, (working in what is called the Gilbert claim,) is taking out thirty ounces per day to the ton.

THE Nevada Journal says that several companies of overland emigrants have arrived there during the past week. They report hut little difficulty on the passage. The Indians had given them hut little or no trouble; though during the last hundred and fifty miles they were a good deal annoyed by cattle stealers who come out there for that purpose. Trading posts to any amount, and plenty of provisions are found along the trail for two hundred miles back. They also report that the emigration this season will he larger than any previous one.

A BIG LUMP has been taken from the drift claim of Messrs. John Marshall & Co. on Sherlock's Creek, above the Falls. The Mariposa Chronicle says it is an irregular mass of gold weighing 85¾ ounces, and containing apparently not more than ten dollars of quartz or other impure matter. It had been thrown among a pile of stones, in removing which it was discovered by its weight alone, its surface being nearly covered with a black mineral substance.

DROWNED.—Last Sunday morning John A. Lind and R. Lind, of the steamer Gov. Dana, and John Ryan of the Gazelle, were accidentally drowned in Feather river. They were on board a lighter, which was being towed by the Dana, when the lighter struck a snag in one of the sudden bends of the river and capsized. Their bodies have not been recovered.

AN election took place at Sacramento on Monday last, for Engineers of the Fire Department, and the following named gentlemen were elected: J. H. Houseman, Chief; J. B. Blanchard, First Assistant; P. McDowell, Second Assistant.

THE Butte Record estimates the loss at Bidwell by the fire alone at $102,300, besides which several buildings were torn down to arrest the progress of the flames.

AT Walloupa Canon, the Nevada Journal says the miners are doing exceedingly well, making from $75 to $100 per week, clear of all expenses.

ON the Mariposa, miners generally are making excellent wages; in the vicinity of Log Town, $4 to $8 per day.

THE mining streams throughout the Northern portion of the State are extraordinary low.

Two pieces of pure gold were taken from the tunnels near Placerville, last week, one worth $800 and the other $300.

MARKET REPORTS.

San Francisco, August 9, 1854.

THERE is no material alteration in the state of the market, and but few transactions. Some Wheat has been disposed of at 2@2½c, but large parcels could hardly he sold at these rates. Barley is held at 1¼@1⅜c. We hear sales of Oats, domestic and foreign, at 2¼@2½c for former, and 2c for latter. New Potatoes sell at 1¼@1⅜c, and improving. Onions have been jobbing at 5c. Sales of Hay at $18@20 per ton.

Flour! Wheat!! Barley!!!

THE SAN JOAQUIN FLOUR MILLS, STOCKTON—Are now completed and ready to grind Wheat and Barley in any quantities. The above Mills are not surpassed by any in the Atlantic States, having all the modern improvements for the manufacture of the finest Family Flour, and are capable of turning out 250 barrels per day.

A large fire-proof Warehouse for the storage of Grain, is attached to the Mill.

Particular attention is called to the fact of Stockton being the depot for the supply of the Southern Mines, and therefore offers superior inducements to wheat growers to ship their grain direct to Stockton, for milling.

Liberal advances made on consignments of Wheat.

For particulars as to terms, &c., apply at the MILLS—or to Messrs. PAIGE & WEBSTER, Union Block, corner of Battery and Union streets, San Francisco. 6

Montgomery Paint Store,

BRUSHES in every variety.
The subscribers intend keeping a full assortment of every article in their line, of the best quality.
6 RAYE & HANKS.

A Valuable Farming and Stock Ranch for Sale,

SITUATED in the County of Monterey, about one mile from the Mission of San Juan Bautista. Said Ranch consists of about one hundred and fifty acres of valuable farming land, running back to the hills, which are covered with clover and oats. The Ranch and hills are heavily timbered. There is also a stream of never failing mountain water, running through the entire place. Either for Agricultural purposes or for Stock Raising, this is certainly one of the best situations south of San Francisco.

☞A good title will be given, it being Government land.—Price $2,000.

P.S.—The improvements upon said Ranch consists of a tolerable good Dwelling House, with lumber sufficient to erect a large one; also about twenty-five acres enclosed under a good fence. Address, ALEXANDER COOPER,
San Juan Bautista, Cal.
Refer to JAMES McMAHON, Esq., San Juan.
AARON LYONS, Esq., } Monterey City.

FOUNDRIES.

DONAHUE'S UNION IRON WORKS,
[THE FIRST ESTABLISHED IN THE STATE.]
Cor. of First and Mission streets, Happy Valley, San Francisco

THE undersigned calls the attention of the citizens of California and Oregon to his unequalled facilities for doing work with rapidity and cheapness. He has made, and will continue to make, such additions to his time and labor-saving machinery, as the increasing wants of the State require, and hence solicits public patronage.

Saw and Grist Mill Irons,
Quartz Crushing and Amalgamating Machinery,

and Castings of either Iron or Brass of every description (having a most extensive assortment of ready made patterns) made promptly to order.

STEAM ENGINES from the manufactories of William Burdon, Brooklyn, New York, and other celebrated makers, constantly on hand and for sale.

BOILERS of every description furnished at lower rates than can be afforded elsewhere, the iron for the same being imported direct, and the machinery for shearing, punching and riveting being driven by steam power. Patent Steam and Water Gauges Steam Whistles, Cocks, India Rubber Steam Packing. Ready made Bolts and Nuts, Belting Lace and other Engineer's Findings for sale.
24 3m JAMES DONAHUE.

VULCAN IRON WORKS.

STEAM ENGINES AND BOILERS of all sizes and powers, on hand and made to order;
Pumping Apparatus;
Flouring mills, portable and stationary;
Saw mills, do do
Farmers' Implements generally.
These works possess the largest facilities in the State for the rapid execution of mechanical orders, with patterns for almost every kind of power needed by the Farmer, Miner and Mechanic. GEO. GORDON & STEEN,
Works corner First and Mellus streets,
22-3m SAN FRANCISCO

Cochituate Baths.
No. 57 Sansome street, between California and Pine,
SAN FRANCISCO.

THE proprietors of this well known Establishment, desirous of meeting the wants of a discerning public, have remodeled and thoroughly renovated the entire premises, added several new rooms and new furniture complete.

In making these improvements, we have had particular reference to the accommodation of the LADIES, and have provided a Private Entrance and Ante-Room, with *Extra large Bathing Rooms*, adjoining, expressly for their accommodation.

We have made many important improvements and additions, which cannot be particularized in a short notice, but will be readily appreciated by our friends and patrons. The

Hair Dressing and Shaving Saloon,

has been greatly enlarged, and furnished with a new set of Chairs, Mirrors, &c., imported expressly for this Establishment, and of a style and quality superior to any in the State.

Prices as usual—single baths 75c; ten tickets for $5.

N. B.—A fine assortment of Shirts, Undershirts, Drawers, Collars and Cravats, Scarfs, Socks, Perfumery, Combs, Brushes, &c. &c., constantly on hand, for the accommodation of our customers. (23) San Francisco, 1854.

A Material Reduction in the Rates on the Bill of Fare,
AT ROBB'S, 182 CLAY STREET,
HAS BEEN MADE IN ORDER TO KEEP UP WITH THE TIMES.

OUR Friends and the Public are assured that we shall keep on trying, and deserve the reputation of being *the place* to get a good breakfast and dinner, and in future at such prices that shall not fail to give general satisfaction.

We are gradually overcoming the many obstacles that at first presented themselves; and hope now, by every attention to business, to merit a due share of patronage.

Soup will be hereafter served at 12 M.
HOLMAN & SHERWOOD, Proprietors.
Wednesday, August 2d, 1854. 5

Watches and Jewelry.

WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobins & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,
139 Montgomery street, two doors south of Clay.

N.B.—Watches of all descriptions repaired by skillful and experienced workmen. 4 tf

Silver and Silver Plated Ware.

THE subscribers invite attention to their large and general assortment of Silver and Silver Plated Ware, consisting of
Tea Sets, Cups,
Waiters, Cake Baskets,
Pitchers, Oastors,
Salvers, Spoons,
Goblets, Forks, &c.
Those goods are all of the best quality, imported expressly for our own trade, and are offered at reasonable prices.
G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

Opera Glasses.

JUST received, a fine assortment of Opera Glasses; also, a lot of rich Silver Card Cases and Bouquet Holders, China manufacture. G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay

Jewelry and Silverware.

OUR immense stock of WATCHES, JEWELRY, DIAMONDS and SILVER WARE, has been imported by ourselves, for a Regular Customer Trade, and is of the mostly costly and superior description, but owing to the depressed state of the market at present, we are disposing of them at New York prices.
BARRETT & SHERWOOD,
City Observatory, 135 Montgomery street.
N.B.—Quartz Jewelry of our own manufacture, at greatly reduced prices. 5

Capital Wanted.

AN Active or Silent partner, with a capital of $25,000 or $50,000, can hear of an opportunity where a business can be made that will yield a large and certain profit, and at the same time be sure from all contingencies of loss. A business which may be increased to any extent.

Letters will be strictly confidential, addressed to S. R. T. F., this office. 4-1ms.

Washington Market—Stall No. 1.

MR. & MRS. WEAVER would invite Hotel Proprietors, Restaurants and Families to call and examine Stall No. 1, Washington Market, on Washington street side. We shall offer each morning everything that can tempt the palate of an epicure. The choicest only of all in the vegetable kingdom; Fruit of every kind; Game, fat and plump—in short, the best variety. Remember our number, it is *One*, and we mean to keep No. 1.
5 MR. & MRS. WEAVER.

Mendocino Redwood.

THE California Lumber Manufacturing Company, having just completed their New Mills, are ready to contract for the delivery of their very superior BOARDS and PLANK, to the extent of *sixty thousand feet per day*; at prices which will enable their patrons to meet the present low market.
N.B.—Vessels wanted. Apply to
H. MEIGGS, President,
5 corner Bush and Montgomery streets.

North Point Dock Warehouses,
Corner of Sansome and Lombard sts.

THE subscribers will make cash advances on goods stored in the above Warehouses, in sums to suit.

To Farmers and Produce Dealers, they offer the advantage of the saving of Cartage and Waste—vessels being enabled to discharge alongside the store.
5 COHEN & CO.

Ex Whirlwind.

Rassetto House.

SAN FRANCISCO, ... CAL.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast. Gentlemen can be accommodated with single rooms, or families with suites of rooms.

The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

St. Charles Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,
San Francisco, California.

J. HARPER AND J. L. MERRITT ..... Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.

Its close proximity to the steamboat landings renders this house very desirable for transient visiters, as also for people arriving in the State and those leaving for the older States.

☞ There will be a Night Watchman, and guest can procure rooms at all hours of the night.

24 HARPER & MERRITT, Proprietors.

American Hotel,

NAPA CITY, ... CALIFORNIA.

L. A. & W. W. CHAPMAN, Proprietors.

GOOD accommodations for families, and on reasonable terms. Saddle and buggy Horses kept for hire. Horses kept on board, by the day or week, and well taken care of. [26

Murray's Fifty-cent Western House.

Corner of Second and D streets, ... MARYSVILLE.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hall, Esq., the entire fixtures and appurtenances connected with the well known UNION HOTEL, situated on the Plaza, in this city.

Extensive repairs and alterations will be made, and the house fitted in a style equal to all respects to a first class European Hotel.

The BAR will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)
San Francisco, California.

PECK & FISHER, ... Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.

Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.

The INTERNATIONAL is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the main floor.

E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE, ... PROPRIETOR.

THE Proprietor announces to the public, that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (not Claude Melnotte's,) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.

The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the House. There are also Billiard Tables and Ten Pin Alleys connected with it.

For the accomodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake,—and to prevent accidents, they will be under the especial charge of an "OLD SALT."

An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.

The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:

Leaving Wilson's Exchange at 10 A. M. and 3 P. M.
" Lake House at 7 A. M. and 3 P. M.

Stopping at all the Hotels on the road.

☞ Families called for in any part of the city.

25 LINESS AND CLARK.

Valley Hotel, Suisun.

Fourteen Miles from Benicia.

THE undersigned, in opening his new hotel, takes pleasure in announcing to his friends and the public, that at his place they will meet with the best accommodations the country affords, and he solicits their patronage.

5 THOS. S. FINCHLEY, Proprietor.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Genoa,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and Silver Work and **Music Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an juvalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

Imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psycho and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods from* Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of disposition. When a sale is made by the Committee of all the shares, the property will await the order of the shareholders, through the fair and impartial decision of a committee chosen by themselves. The Names of persons will be entered upon certificates of Sixteen to each Article in the Catalogue.

The [illegible] be conducted by [illegible] in all its departments, standing and reputation, [illegible] of the trust and [illegible] every share [illegible]. The [illegible] from the [illegible] of this [illegible] will be strictly [illegible] by a [illegible] Committee.

CERTIFICATES OF SHARES
ARE NOW READY AT
ONE DOLLAR EACH

☞ [illegible] of the [illegible] purchasers.

[illegible] & CO.
Hardware, Parlor Stoves and Grates,
[illegible]

FOREVER THINE.

[RARELY do we meet with anything more beautiful than the the following, for sublimity and tenderness, from the pen of A. A. WATTS.]

Forever thine, whate'er this heart betide,
Forever thine, where'er our lot he cast—
Fate, that may rob us of all wealth beside,
Shall leave us love till life he past.

The world may wrong us—we will brave its hate—
False friends may change, and falser hopes decline,
Though bowed by cankering care wo smile at fate,
Since thou art mine, belov'd, and I am thine!

Forever thine—when circling years have spread
Time's snowy blossoms o'er thy placid brow—
When youth's rich glow, its purple light is fled,
And lilies bloom where roses flourish now.

Say, shall I love the fading beauty less,
Whose spring tide radiance has been wholly mine!
No! come what will, thy steadfast truth I'll bless—
In youth, in age, thine own, forever thine!

Forever thine—at evening's dewy hour,
When gentle hearts to tenderest thoughts incline—
When balmiest odors from each closing flower
Are breathing round me—thine, forever thine!

A VALID REASON.—Uncle Peter B., who flourished a few years ago among the mountains of Vermont, as an inveterate horse dealer, was one day called upon by an amateur of the "equine" in search of "something fast." The result is told as follows in the Northern Gazette:—

"There," said Uncle, pointing to an animal in a meadow below the house; "there, sir, is a mare yonder who would trot her mile in two minutes and twenty seconds were it not for one thing!"

"Indeed!" cried his companion.

"Yes," continued Uncle Peter; "she is four years old this spring, is in good condition, looks well, and is a first rate mare; and she can go a mile in 2:20, were it not for *one thing!*"

"Well, what is it?" was the query.

"That mare," resumed the jockey, "is in every way a good piece of property. She has a heavy mane, switch-tail, trots fair and square, and yet there is *one thing* only why she can't go a mile in 2:20."

"What in the Old Harry is it then?" cried the amateur, impatiently.

"The distance is too great for the time," was the old wag's reply."

THE LOVE OF TITLES.—An old Dutchman, who for many years, kept the ferry at Oil Creek, was one day, crossing with a large load of passengers, who, with one exception, addressed each other as Colonel, Major, Captain, Judge, &c. When the fare came to be paid, he charged the *titled* men one shilling each.

"What is the fare?" said the gentleman who had no title, after the rest had all paid.

"Your fare?" said the Dutchman, "your fare is chust noting—you ish de first high private Yankee ever carried over this creek, and you is welcome!"

A PASSENGER on board a ship bound for California, who had been sea sick all the way out to the line, one day went to the doctor, and in a sad supplicating tone, accosted him with—"Doctor, can you tell me what I shall be good for when I get to San Francisco, if I keep on this way?" "Tell you? to be sure I can. You're just the man we want to begin a graveyard with."

HEAD AND TAIL.—*Jones:* That's a fine horse you are leading, Patriek; he carries his head well. *Pat:* That's true, an' it's a grand tail that he carries behind him. *Jones:* Behind him! Don't everything that carries a tail, carry it behind him? *Pat:* No, yer honor. *Jones:* No! What don't? *Pat:* A halfpenny, sure, carries its tail on one side and its head on the other.

A POSER.—On Sunday a lady called to her little boy, who was tossing marbles on the sidewalk, to come into the house: "Don't you know you should not be seen there, my son? Go into the back-yard if you want to play marbles. It is Sunday." "Well, yes, but aint it Sunday in the back-yard, mother?"

AUDACIOUS WRETCH.—An editor, way down-east, objects to Female Legislators, because they would Miss-represent the people. "Ye gods and little fishes," what shall we do with such a man, and he an editor?

AN exchange paper asks very innocently if it is any harm for young ladies to sit in the lapse of ages, Another replies that it all depends on the ages selected. Those from eighteen to twenty-five it puts down as extra hazardous.

A SETTLER.—"I'm glad this coffee don't owe me anything," said a financier at breakfast.

"Why?" grumbled his wife.

"'Cause I don't believe it would ever settle."

SHALL ladies have votes? "Certainly," replies a strong-minded woman of our aequaintanee. "Is woman made only to sew on buttons? And, if she is, you have no right to turn away the needle from the pole."

"COME here, my dear, I want to ask you all about your sister. Now, tell me truly—has she got a beau?" "No, it's the janders; the doctor says so."

A CONTEMPORARY thus graphically describes the success of a certain actor's benefit: "The audience had to laugh *perpendicularly*, there being no possible room for lateral cachination."

WHEN you go a fishing, be sure you take "a *bite* before you start, for you may not get one after,

AGRICULTURAL, &c.

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof!

MATERIALS FOR SALE!

THE subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as
"Warren's Fire and Water Proof Composition Roofing."
It is admirably adapted to every class of buildings; is impervious to water or dampness; neither cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.
The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.
In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tight*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.
All letters of inquiry, or orders for materials, must be directed to the subscriber. J. H. PURKITT,
2 Office 34 Battery street, near Pine, San Francisco.

Notice.

LONE MOUNTAIN CEMETERY.—The Trustees and Proprietors take pleasure in announcing that the Cemetery is now open for the purpose to which it has been dedicated.
The following are the Prices of Lots:
FULL SIZE LOT—12 by 25—containing 300 superficial feet—$175.
HALF SIZE LOT—10 by 15—containing 150 superficial feet—$125.
QUARTER SIZE LOTS—8 by 10—containing 80 superficial feet—$80.
LOTS IN THE REAR of Main Avenues and on Paths are 20 per cent. less.
SINGLE INTERMENTS at prices according to the Location.

Rules and Regulations of the Cemetery.

TO SOCIETIES AND ASSOCIATIONS wishing larger Plats, a liberal discount will be made.
WARRANTEE DEEDS ARE GIVEN for all Lots purchased in the Cemetery.
The following extract from the Deed of Trust will explain the provision for the embellishment of the Grounds:
"*Sixty per cent. of the entire receipts shall be appropriated to the improvement and embellishment of the cemetery.*"
A faithful and trusty keeper of the Grounds will always be found in attendance.
THE ENTRANCE is temporarily from the Presidio, or Government Reserve.
N. B.—A RECEIVING VAULT is now completed and ready for use.
Applications for Interments must be made at the Office.
For further information inquire of either of the Proprietors, at MASONIC HALL, 112 Montgomery street. Office Hours, from 9 A. M. to 3 P. M.

LEONORA.

BY WILLIAM R. LAWRENCE.

RADIANT as a fairy vision
Ravishing a poet's dream,
Shining from a world elysian
With a momentary gleam—
Such was gentle Leonora,
Brightly beautiful was she;
But the waves have long swept o'er her—
Now she sleeps beneath the sea:
Where 'mid coral groves there glideth,
Ever beautiful and fair,
Lovely naiads, sadly weaving
Pearls and gems amid her hair.

Beautiful in form and feature,
Free from every artful wile,
None e'er saw a lovelier creature;
None e'er wore a sweeter smile.
But a flower so frail and slender
Seldom lingers in its bloom,
And a heart so fond and tender
Cannot long escape the tomb;
With her journey nearly ended—
Suddenly the summons came!
But to those who o'er are ready,
Any hour alike's the same.

Often do I see beside me
In the silent midnight hour,
When sweet slumber stealeth o'er me
With its ever soothing power—
The fair form of Leonora,
Perfect in its matchless grace;
Angels pure seem hovering o'er her,
Smiles of love illume her face.
But too soon the dream doth vanish—
Naught again can here restore
Unto me the loved and lost one;
We shall meet on earth—no more.

THE CAT AND THE CANARY.—A lady had a pretty canary-bird that was so tame she permitted it to leave its cage and fly at largo in her apartment. She had also a fine large cat, which she had trained to treat her bird gently, till they had become very good friends.

One morning the bird was hopping about the room picking crumbs from the carpet as usual, when the cat, that had been asleep on the rug, suddenly sprung up, and seizing the bird in her mouth, jumped with it upon the table. The lady was alarmed for the life of her favorite bird, and starting from her seat was about to visit her displeasure upon poor pussy, as she discovered the occasion of the cat's unusual behavior.

The door had been left open and a strange cat had just crept into the room intent to make the little bird his prey, had not the friendly puss so seasonably rescued her. Tho lady immediately turned out the intruder, when her own cat leaped off the table and released her affrighted captive without doing it the slightest injury.

It was the nature of this friendly cat to destroy every bird within her reach; but in respect to the canary she had learned self-control. And cannot a child overcome his natural tendency to selfishness, anger, or any other fault? It can be done, little friends. Will you try? The Savior is ready to help you to do this. It will make you lovely in the sight of all, and well pleasing to Him who loved you and gave himself to you. —*Child's Paper.*

THE Boston Chronicle says the great elm on the Common can be historically traced as a large tree in 1680, in which year it is recorded that the Ancient and Honorable Artillery held a meeting under its branches. It is probably a little the senior of the Washington Elm at Cambridge, that is believed to have witnessed, during its minority, the installation of the first President of Harvard, in 1640, and, still earlier, to have had its foliage illumed by the Council fires of the Indians. The Daily Advertiser states that "the Great Tree was set out about the year 1670, by Captain Daniel Henchman, an officer in King Philip's war. It was intended to afford a shade for the military, when they should parade on the Common."

A LIVING SUPERIORITY.—Woman has this great advantage over man—she proves her will in her letters, whilst man is obliged to wait till he is dead.

A Levi-athan.—A puppet moved by man in the body.

Levi-tation.—The art of conveying public property into private pockets.—*Punch.*

The Stolen Fruit.

A STORY FOR YOUNG PEOPLE.

ON the 15th of August, 1777, two little girls of seven or eight years old, were playing in a garden near Ajaccio in Corsica. After running up and down among the trees and flowers, one of them stopped the other at the entrance to a dark grotto under a rock.

"Eliza," she said, "don't go any further: it frightens me to look into that black cave."

"Nonsense! 'Tis only Napoleon's Grotto."

"This garden belongs to your uncle Fesch: has he given this dark hole to Napoloon?"

"No, Panoria; my great uncle has not given him this grotto. But as he often comes and spends hours in it by himself, we all call it *Napoleon's Grotto.*"

"And what can he be doing there?"

"Talking to himself."

"What about?"

"Oh, I don't know: a variety of things. But come, help me to gather a large bunch of flowers."

"Just now, you told me not to pull any, though there was an abundance of sweet ones."

"Yes; but that was in my uncle the canon's garden."

"And are his flowers more sacred than those of uncle Fesch?"

"They are indeed, Panoria."

"And why?"

"I'm sure I don't know; but when any one desires to prevent our playing, they say, 'That will give your uncle the canon a headache!' When we are not to touch something, 'tis always 'that belongs to the canon!' If we should like to eat some fruit, 'Don't touch that, 'tis for your uncle the canon!' And if we are even praised or rewarded, 'tis ever because the canon is pleased with us."

"Is it because he is archdeacon of Ajaccio that people are so much afraid of him?"

"Oh no, Panoria; but because he is our tutor. Papa is not rich enough to pay for masters to teach us, and he has not time to look after our education himself; so our uncle the canon teaches us everything. He is not unkind, but he is very strict. If we do not have our lessons, he slaps us smartly."

"And don't you call that unkind, Eliza?"

"Not exactly. Do you never get a whipping yourself, Panoria?"

"No indeed, Eliza. It is the Corsican fashion to beat children; but our family is Greek, and mamma says Greeks must not be beaten."

"Then I'm sure, Panoria, I wish I were a Greek; for 'tis very unpleasant to be slapped!"

"I dare say your brother Napoleon does not like it either."

"He is the only one of my brothers that does not cry or complain, when he is punished. If you heard what a noise Joseph and Lucien make, you might fancy that uncle was flaying them alive."

"But about Napoleon. What can he be talking about alone in the grotto?"

"Hush! Here he is! Let us hide ourselves behind this lilac tree, and you'll hear."

"I see Severia coming to call us."

"Ah! it will take her an hour to gather ripe fruit for uncle the canon. We shall have time enough. Come."

And the little girls, gliding between the rock and the overhanging shrubs, took up their position in perfect concealment.

The boy who advanced towards the grotto differed from the generality of children of his age in the size of the head, the massive form of his noble brow, and the fixed *examining* expression of his eyes. He walked slowly—looking at the bright blue sea—and unconscious that his proceedings were closely watched by two pair of little bright black eyes.

"Here I am my own master!" he said as he entered the grotto. "No one commands me here!" And seating himself royally on a bench within the dark entrance, he continued—"This is my birth day. I am eight years old to-day. I wish I lived among the Spartans, then I should be beyond the control of women; but now I have to obey such a number of people—old Severia among the rest. Ah, if I were the master!"

"Well, and if you were the master, what would you do?" cried Eliza, thrusting forth her pretty little head.

"First of all, I'd teach you not to come listening at doors," replied Napoleon, disconcerted at being overheard.

"But, brother, there's no door that I can see."

"No matter, you have been eaves-dropping all the same."

"Eliza!—Panoria!" cried a loud voice. "Where can these children have gone to?"

The young ladies came out of their leafy lurking-place in time to meet the little Bonaparte's nurse Severia—a tall old woman who carried on her arm a basket filled with the finest fruit, pears, grapes and figs.

"A pear, Severia," cried Napoleon, darting forwards, and thrusting his hand into the basket.

"The saints forbid, child," exclaimed Severia. "They are for your uncle the canon."

"Ah!" said Napoleon, drawing back his hand as quickly as if a wasp had stung him.

Panoria burst out laughing.

"I never saw such people," she said, as soon as her mirth allowed her to speak. "My uncle the canon seems the bugbear of the whole family. Is Severia afraid of him too?"

"Not more than I am," said Napolen boldly.

"And yet you were afraid to take a pear?"

"I did not wish to do it, Panoria."

"Did not *dare* do it, Napoleon!"

"Did not *wish* to do it, Panoria."

"And if you wished it, would you do it?"

"Certainly I would."

"I think you are a boaster, Napoleon; and in your uncle's presence would be just as great a coward as Eliza or Pauline?"

"Come, children, follow me," said Severia, walking on.

"You think I am coward?" whispered Eliza to her little friend. "Come into the house, and see if I don't eat as much of uncle's fruit as I please. Mamma is gone out to pay a visit, and will not be home until to-morrow."

"Then I'll help you," said Panoria. And the little girls, fixing their wistful eyes on the tempting fruit, followed Severia to the house.

Napoleon remained some time longer in his grotto; and when supper-time approached, he went into the house. Feeling very thirsty, he entered the dining-room, in which was a large cupboard, where fresh water was usually kept. Just as he was going in, he heard a noise: the cupboard door was quickly shut, and he caught a glimpse of a white frock disappearing through the open window. Instead, however, of looking after the fugitive, he went quietly to get a glass of water in the cupboard. Then, to his dismay, he saw his uncle's basket of fruit half empty. While, forgetting his thirst, he looked with astonishment at the fruit, considering who could have been the hardy thief, a voice behind him roused him from his reverie.

"What are you doing there, Napoleon? You know you are not permitted to help yourself to supper."

This was uncle the canon himself—a short, stout old man with a bald head, whose otherwise ordinary features were lighted up with the eagle glance that afterwards distinguished his grand-nephew.

"I was not taking anything, uncle," replied Napoleon. And then suddenly the idea occurring to him that he might be accused of having taken the fruit, the blood rushed hotly to his cheeks.

His confusion was so evident that the canon said, "I hope you are not telling a falsehood, Napoleon?"

"I never tell falsehoods," said the boy, proudly.

"What were you doing?"

"I was thirsty; I came to get some water."

"No harm in that—and then, my boy?"

"That was all, uncle."

"Have you drunk the water?"

"No, uncle; not yet."

The archdeacon shook his head. "You came to drink, and you did not drink; that does not hang well together. Napoleon, take care. If you frankly confess your fault, whatever it may be, you shall be forgiven; but if you tell a lie, and persist in it, I warn you that I shall punish you severely."

The entrance of M. Bonaparte, M. Fesch, and M. Joseph, Napoleon's eldest brother, interrupted the conversation; and for some minutes the elder gentlemen spoke to each other on political subjects; when a sudden exclamation from Severia, as she opened the cupboard, attracted the attention of all.

"Santa Madonna! who has taken the fruit?"

"This is the mystery discovered," said the canon, turning towards Napoleon. "So you stole the fruit."

"I never touched it," replied the boy.

"Call in the other children," said the archdeacon.

In a few minutes five beautiful children three boys and two girls, formed a group round their father, who, looking at each one in turn, asked—"Which of you has taken the fruit that was gathered in your uncle the canon's garden?"

"I did not!" "Nor I!" cried they all. But Eliza's voice was lower and less assured than those of the others.

"And you, Napoleon?"

"I have said, papa, that I did not do it."

"That's a falsehood," exclaimed Severia, who being an old domestic, took great liberties.

"If you were not a woman!" said Napoleon, shaking his head indignantly at her. "Silence, Napoleon," said his father.

"It must have been you, Napoleon," said Severia; "for after putting the fruit into the cupboard, I never left the anteroom, and not a soul passed through except the archdeacon and yourself. If he has not taken them"—

"I wish truly I had," said the old gentleman, "and then I should not have the grief of seeing one of my children persist in a lie."

"Uncle, I am not guilty," repeated Napoleon firmly.

"Do not be obstinate, but confess," said his father.

"Yes," added the canon, "it is the only way to escape punishment."

"But I never touched the fruit—indeed I did not."

"Napoleon," said his uncle, "I cannot believe you. I shall give you five minutes; and if, at the end of that time you do not confess, and ask for pardon, I shall whip you."

"A whip is for horses and dogs, not for children," said the boy.

"A whip is for disobedient, lying children," replied his father.

"Then 'tis unjust to give it me, for I am neither a liar or disobedient." So saying, Napoleon crossed his arms on his chest, and settled himself in a firm attitude.

Meantime his brothers and his sister Pauline came close to him, and whispered good natured entreated that he would confess.

"But how can I when I have not done wrong?"

"So you are still obstinate?" said his uncle, and taking him by the arm, he led him into the next room. Presently the sound of sharp, repeated blows was heard, but not a cry or complaint from the little sufferer.

Madame Bonaparte was absent from home, and in the evening her husband went to meet her, accompanied by Joseph, Lucien, and Eliza. M. Fesch and the canon were also about to depart, and in passing through the anteroom, they saw Napoleon standing, pale and grave, but proud and firm-looking as before.

"Well, my child," said his father, "I hope you will now ask your uncle's pardon?"

"I did not touch the fruit, papa."

"Still obstinate. As the rod will not do, I shall try another method. Your mother, brothers, Eliza and I, shall be gone for three days, and during that time you shall have nothing but bread and water, unless you ask your uncle's forgiveness."

"But, papa, wont you let him have some cheese with his bread?" whispered little Pauline.

"Yes, but not *broccio.*"

"Ah do, papa, please let him have *broccio*, it is the nicest cheese in Corsica."

"That's the reason he does not deserve it," said his father, looking at the boy with an anxious expression, as if he hoped to see some sign of penitence on his face. But none such appearing, he proceeded towards the carriage.

Joseph and Lucien took a kind leave of their brother, but Eliza seemed unwilling and afraid to go near or look at him.

Three days passed on, heavily enough for poor Napoleon, who was in disgrace, and living on bread, water, and cheese, that was not *broccio.* At length the party returned, and little Panoria, looking for her friend Eliza, came with them into the house.

"Good morning, uncle," said Madame Bonaparte to the archdeacon; "how are you? And where are Napoleon and Pauline?"

"Here I am, mamma," said the latter, throwing her arms around her mother's neck.

"And Napoleon?"

"He is here," said the canon.

"Has he confessed?" asked his father.

"No," replied the uncle. "I never before witnessed such obstinacy."

"What has he done?" asked his mother.

The canon, in reply, related the story of the fruit; but before he could finish it, Panoria exclaimed—

"Of course, poor fellow, he would not confess what he never did!"

"And who did take the fruit?" asked the canon.

"I and Eliza," replied the little girl somewhat hesitatingly.

There was a universal exclamation.

"My poor child!" said the archdeacon, embracing Napoleon tenderly, "why did you not exculpate yourself?"

I suspect it was Eliza's mischief-loving disposition that was to blame. At all events, I would advise her to tell her father, when she sees a bear.

My readers may imagine the [illegible] and reconciliation that followed. [illegible] Napoleon [illegible]

Dr. C. F. Winslow's Letters from the Mountains.

Mountain Passes.....Indian Caves.....Geological, Mineral, and Agricultural Treasures of California.

Sonora, August 6, 1854.

Dear Sir: As I promised you a hasty account of my wanderings in the Interior, I will embrace a few moments of leisure, though much fatigued, to jot down a few observations and enjoyments connected with my journey.

Our party is composed of fuur gentlemen of diversified accomplishments and tastes — some scientific, and all eminently displaying the most cheerful urbanities of social life. My worthy friend Col. Pardee, so highly endowed by nature and cultivation with the choicest qualities of head and heart; Wm. P. Blake, Esq., U. S. geologist—a close and careful observer of the mineralogical and geognostical features of the earth, wherever he wanders; and your humble servant, a mere amateur of nature's works — placed ourselves, by invitation, under the care of Mr. Alderman Fisher, of Stockton, a gentleman as full of the milk of human kindness, as he is of enterprise and usefulness. Jim and Bib, two of his most gallant steeds, were harnessed to a comfortable buggy, and with him at the reins, we were invited to take our own time, ride or rest, look at the fields, mountains or stars, break rocks, scale cliffs and explore caverns, just as our tastes and inclinatioos might dictate. Thus equipped with the best of oufits in men and beasts, we have commenced a jaunt, which from its enjoyments thus far, augurs a rich store of solid pleasure in the future, which few travelers can boast of.

That portion of our journey from San Francisco to Stockton, performed by steamboat, partly by day and more by night, afforded nothing specially worthy of observation. The wind almost always blows stiffly across the Bay. The hills at this season are always yellow and sear with dry wild oats, and the laudscape, however varied with ridge and vale, or clothed with redwood and oaks, though attractive to the eye, imparts a dullness to the mind which would probably not exist if the same landscape was beautified with the dwellings of a permanent, thrifty and happy agricultural population. But so it is at present, parched, dull, unoccupied, and only stimulating the mind to silent musings and contemplations on the past, present and future of this remarkable State. Benicia and Martinez, small and slowly improving towns, were passed before dark, and night came upon us as we entered Suisun Bay and cut off a monotonous but strangely interesting view of the extensive delta covered with bull rushes, through which the Sacramento, San Joaquin and its sloughs, wind their way to the interior cities. It is strange how an incident of this kind will afford food for contemplation, and transporting the mind to remote ages, inadvertently bring into comparison the two most interesting epochs in the history of civilization. Fading away in the duskiness of night were vast tracts of tule, corresponding with the bull-rushes growing on the deltas and banks of the Nile. Here they are of no account, science and invention having effected wonderful revolutions in the arts; but in Egypt in ancient days they were gathered and prepared with unusual care, for they constituted the papyrus on which the sacred and public writings of the priests and kings were preserved and transmitted from age to age. And not only were the tule lands of the valley of the Nile serviceable for literary purposes, but they furnished the most prolific soil for the cultivation of the grain, which furnished not only the land of Egypt, but the bordering tribes of Asia with bread. With such fancies as these, tracing Egypt through her decline, and this new commonwealth through the unfoldings of its infancy, we glided along till all material objects, and at last thought itself faded into complete night and forgetfulness.

Morning brought us to Stockton—a city so much improved in some respects within a twelvemonth as to be very comfortable for wayfarers, to say the least, and Bib and Jim, with aching necks and flowing manes, were as fresh and bright as the morning, and waiting to receive the friends of their master and to display for our comfort the fullest extent of their "*horse*-pitality." How the glorious mornings and the genial heat of the valleys and mountains contrast with the dull, gloomy, cold, foggy and changeable airs of San Francisco and the coast! It is a luxury to escape from clouds, fogs and winds, and breathe balmy breezes and look into the bosom of the deep blue sky by day, and let the soul, by night, mingle with ten thousand brilliant spheres and the pale emanations of the milky-way. So we think and so we journey, admiring the note of each new bird, watching the timid and frisky motions of countless squirrels, charmed with the orchard-like growth of bright, green oaks which stud the arid lawn in all directions, and conversing freely about all we see and all we think of, without reserve.

The distance from Stockton to Knight's Ferry of the Stanislaus, is about forty miles. At this season the road is good but dusty, and it passes over a district of country apparently level for about twenty-five miles, and then enters a section continuously more hilly, till we reach the Stanislaus. The level region is composed of the finest alluvion, extending many feet deep, here and there interrupted only by very small pebbles, constituting a layer from one to three inches thick, as far as I could judge by inspecting wells along the road. The water furnished by these wells is not very good, containing much terrginous and saline matter, and it will be only when artesian bores are sunk to the foundation rock of the valleys, or below thick beds of clay, that pure and crystal water will be obtained. As a means of irrigating the arid plains at this season of the year, their existance will be invaluable, and their permanent flow will serve as a constant solvent to the silicates, phosphates and other nutrient qualities of the soil, and will increase the productions of agriculture an hundred fuld. For many miles the road winds among scattered oaks—at a little distance looking like large apple trees—until suddenly they disappear, and the view between the sparse forest and the foot hills of the Sierra Nevada becomes uninterrupted. Constant radiation of heat and vapor renders distant aspects of landscape somewhat obscure, and a mellowness is imparted to everything remote, as agreeable to the eye as the appearances are peculiar in character. This section of country is almost wholly uninhabited, and but few fences or dwellings denote enterprize or population. Journeying on, at last we reach the hilly district, which becomes interesting on two accounts. A new array of oaks clothe the more distant and loftier range of hills, resembling in many places a large park laid out with order and taste; and long level summits or rounded isolated mounds stretch away to the South as far as the eye can reach, on the sides of which the stratification of the sedimentary deposits of former seas are so clearly defined that prominent lines expose a parallelism of strata from hill to hill, until distance cuts off a view as interesting to the geologist as it is unique and wonderful on the face of the earth. On reaching Knight's Ferry these curious and remarkable aspects of landscape attain their greatest degree of prominence and interest. A precipitous cliff a hundred feet high faces the river on the valley side, presenting layer above layer of large rolled stones, smaller pebbles, coarse and fine sands, and at last impalpably fine detritus, each layer from one to two feet thick, and one superimposed on the other, till the uppermost is crowned with ocean drift and fine gold. Below this lofty and broad area of sedimentary accumulations appears, conspicuous and wild, a blackened mass of basaltic rock and besicular lava, presenting, on close inspection, the walls and warm outpourings of an ancient volcano, In a chasm through this, a hundred feet wide, with perpendicular sides fifty feet deep, flows the rapid current of the Stanislaus. Such are the geological features of this district of the San Joaquin valley; but the philosophical considerations growing out of these data are far more interesting. I have not time to enter into details about these things: suffice it to say that wherever volcanic eruptions took place in very remote epochs in this region, none have taken place since the deposits of the tertiary beds, and it is absolutely certain that no *violent* earthquakes have supervened *since* the ocean retired from the Sierra Nevada, for these strata remain as horizontal as in the day of their deposit; and though fresh water seas may have washed over them, or rivers cut into their level, dividing them into isolated and widely separated hills, still their strata are coincident and their parallelism has never been disturbed.

On we went, leaving Knight's Ferry and traveling over a road more dusty and hilly, rocky and uncomfortable all the way to Sonora. First along we trundled over and wound our way among lava and basaltic boulders, which indicated great subterranean disturbance previous to the tertiary epoch. The outbreak of this molten rock was no doubt simultaneous with that at Knight's Ferry, and through a fissure in the earth's crust, extending some miles in length. But those events transpired beneath the ocean, and the surface was as quiet and cold as the grave long before the detritus accumulated over it, which for many scores of feet has since been removed, by periodical rains and the floods of the Sierra Nevada. Notwithstanding the rocks and dust, the ride is delightful; for a thousand objects attract the eye, charm or enrich the mind, and furnish conversation of the most instructive kind. Through all this region beyond the Stanislaus, flat slabs of rock project above the soil, more or less numerous in certain localities. They resemble worn grave stones, pitched about by the heavings of a frozen and thawing soil. And sure enough the geologist may read on their rough surfaces the records of life, death and decay—not the life, death and decay of the human race, but of the forces by which our planet was formed and its surface fitted for marine life long before God called a living creature or form into being.

The landscape through this section of country is diversified and delightful. Little cultivation is observable any where, and little else than public houses and cargo-teams remind one of civilization; but the hills grow bold and the valleys deep and broad, and all are clothed thickly with dry herbs, and dotted here and there with verdant oaks.

At last we reach the mining regions, and the dearth of human beings on the route is transformed into a busy and free and easy multitude, toiling hard for their bread, and for the support of mothers, wives and little ones, far away from their lonesome tents and cabins. No community can show such numbers of athletic, well-formed and intelligent young men as toil amid these hills. Their hands are here, and their hearts elsewhere. Home is a talisman that softens the hardest labor, and I wonder not that misfortune and ill luck embitter the sensibilities of some, and with others make life undesirable. But men of true courage and lofty aims only encounter obstacles, to become the truer and the greater by resolutely and triumphantly surmounting them. Reflections of this sort are not altogether out of place here, for they are part and parcel of our journeying, and as we ride along they often steal across the mind, whether we indulge them or no.

The mining localities which we pass through or see at a distance, are very numerous; and running water, dry creeks, costly flumes, up-torn earth and stones, deep pits, long trenches and well-skinned gullies, all denote the labor and industry expended in search for gold. But they are too numerous to specify in detail. Indeed the whole surface of these sections of the mountain range contains more or less gold. The rocks were disintegrated by the wearing of the ancient oceans, and while some deposits are of extreme antiquity, and very profound beneath lofty accumulations of drift now rounded off into hills by meteoric causes, others are comparatively recent, and mingled only with the common diluvium, and even with the surface soil. I see no reason to apprehend the immediate exhaustion of gold. But human invention and industry, with the accumulating millions of population to this region of the continent, must ultimately diminish very greatly these resources of precious metal. This, however, is not the place for speculations, and as your readers must by this time be tired, as well as myself, they will be as glad that I have reached the end of my letter, as I am that we have reached Sonora, to refresh ourselves for other and new observations.

Respectfully, yours, &c.,

C. F. Winslow.

Murphy's Camp Aug. 7, 1854.

Dear Sir: Having an hour or two to rest at this quiet and hot place, I will improve a few moments in jotting down a hasty page or two. I have not time to say half I would, or describe half I have seen or enjoyed, and you and your readers must excuse the haste and desultoriness of my remarks. After a very interesting journey from Sonora which we left at half past 4, A. M., we arrived here about 10. We came through Columbia and Texas Flat, and crossed the Stanislaus at Abby's ferry, near Columbia. In this region we came to a "limestone-rock" formation extending for many miles from NW. to SE. or nearly in that direction. It is blue and white, and in various localities appears to be distinctly laminated. It will be highly useful hereafter as an ornamental marble and valuable building material. The landscape through the whole journey is exceedingly bold and picturesque. The Stanislaus, in the vicinity of Abby's ferry, is some 600 feet below the summits of the hills on either side of the stream. The water is clear and cool, but the stream is not over 150 feet in width and of moderate rapidity. During the flooding seasons it rises in this place about thirty feet, and becomes much broader. It is hemmed in above and below by steep banks, and in some places they are so precipitous as to expose the limestone for several hundred perpendicular feet. The descent on the southern side is by a zigzag road cut into the side of the gorge and in some places the rock has been blasted to improve the travel through these wild and mountainous regions. On the northern side the same excavations have been made and the ascent is long and tedious for both man and beast. The hills are covered, not densely—rather sparsely, on the whole—with pines and oaks of several varieties, and with various species of smaller trees, and much shrubbery. Granite is visible below the limestone on the southern side of the river, but I had no opportunity to observe the relative position of these rocks on the northern side, except that granite or mica schist running into, or more or less connected with trappean rocks, seemed to lie side by side with the limestone on its southern margin as it tended in a SE. and NW. direction. These relative positions of the two rocks extended across the Stanislaus and entered into the structure of the lofty and rugged landscape forming this ridge of the Sierra Nevada. About one and a half miles from the Stanislaus we came to the limestone cave, which has been often spoken of, of late, as being the receptacle of human bones covered with calcareous deposits. This we did not enter, for lack of time. We had passed it about half a mile before learning its whereabouts, and as the day was so hot and the sun advancing, we considered it best to pass without exploring it. This we could dispense with the better, as we met a person who had explored it carefully and who offered us fragments of human skeletons which he had taken from the cave. These bones were dry and light and not impregnated or overlaid with calcareous spar, like others which I had seen from the same cave. Heretofore obscurity had surrounded the history of the bones which had been found in the cave. But this person on returning from the cave, met an old Indian, and having a good interpreter of the Indian dialect with him, he learned that the bones were of comparatively recent deposit there. The old Indian well remembered the circumstances that occurred by which they came there. A few years before the Whites came to the country, there were two tribes of Indians who were hostile to each other—one lived in the immediate vicinity of this cave, the other about a mile from it, on a hill in the neighborhood, but separated by a deep valley. They met in fight, and the tribe living nearest the cave, numbering about sixty, was overpowered and killed; and the conquering indians fearing to make fires to burn their bodies, which was a customary event on such occasions, on account of arousing notice from other tribes, threw them headlong into this cave. They struck against the sides and so lodged in some instances a short distance from the lower end of its mouth. The cave is about thirty-five feet deep, is irregular in form and is not more than twenty feet in extent in different directions. The bones have been all taken away and the stalagmites also have been broken and removed, so that there is little now to interest one in exploring it. In this vicinity is also another cave with an entrance rather small and about one hundred feet deep, from which have been taken some very large and finely crystalized stalactites. About eight miles from here is another, which we intend to visit to-morrow. These are all in limestone districts of country, and are cavities hollowed out in this easily soluble material by the long continued action of water. Last summer I visited a cave in the vicinity of Columbia, formed by the forcible breaking up of the primitive or metamorphic rock by subterranean violence. The hill was rounded over this cave and the rock broken in various directions, and huge masses were tilted and lodged against each other, so that large caverns existed under the hill and were connected with each other by low or narrow passages. The whole had been often filled with water, and when a vast reservoir for mining purposes immediately over its mouth suddenly sunk away into it last summer, it was observed that the water obtained an outlet some six miles further south, from the side of another hill. This circumstance shows a connexion of the fractures and indicates a simultaneous action of force by which some of these hills were elevated. I observed no teeth nor other vestiges of animal remains in that cave, though it had been asserted by the first explorers that the teeth of some large animal had been found there.

The remains of ancient quadrupeds, however, if not found there, are frequently found in the flats of the neighboring regions of country where the miners are at work in procuring gold. The fire of Columbia burnt up many specimens of remarkable organic remains which had been collected by miners while excavating for gold among the drift of the valleys. Texas Flat seems peculiarly distinguished for these remains. I have now a piece of bone temporarily in my possession, probably a fragment of the lower jawbone of a mastodon from that locality—and a person at Texas Flat assured one of our party that a tush nine feet in length and twenty-seven inches in circumference, had been lying for a twelve-month on the ground near his cabin, but had been recently removed by some one who felt an interest in collecting such curiosities. It is desirable that all such relics of the ancient fauna of this portion of the country should be preserved —and I trust the miners of Texas Flat and other

mining regions will preserve with great care the relics of this kind, and forward them to me or some other person who will use them for contributing to the already great accumulations of human knowledge. Such relics though a sort of curiosity to most persons, are after all of no real importance to them; while to those who feel a special interest in the progress of science, they become of great value and importance. A collection of these remains of extinct creatures, whether of quadrupeds, fishes or shells, or even of trees and plants, will lead investigation to the most interesting results. The discovery of trees and plants long since extinct, and of animals which ceased to live many thousands of years before Adam or Noah began to look upon the sun and breathe the breath of life, would lead inquiring and philosophic minds to a reconstruction of the ancient topography of this continent, so that maps of the Sierra Nevada, the Coast Ranges, and of the Pacific Ocean might be made which would be so unlike the present that we should not recognize them as belonging to the same latitude and longitude. All geological antiquities are of the greatest interest to mankind, especially all fossil remains, and too much care cannot be manifested by individuals nor by the State in preserving all these relics in fire-proof safes or buildings. Indeed the next legislature would do itself honor to cause to be erected a fire-proof edifice, as a public receptacle for all remains of this sort; for perhaps no country in the world, from one end of its domains to the other, contains a richer mine of fossil wealth buried in its busom than does this very state of California; and when a great public scientific storehouse has become filled with this fossil wealth, the genius of some man will be stimulated to put bone to its bone and breathe into extinct races the breath of life, and new forms not now dreamed of will be seen stalking over vast plains which are now lofty and rugged mountains, or swimming in seas whose bottoms were covered with the gold dust which is now being taken from flats and ravines several hundreds or even thousands of feet above the level of the present ocean. Such will be the results from some of the investigations to be deduced from the careful preservation and study of the remains of the extinct races found on this Western Slope of our continent. They abound in the drift of all parts of California, from the peninsula on which stands San Francisco, and even in the heart of that city, to the flanks and summits of the Sierra Nevada. This field is rich in these materials, and miners and common laboring men are the persons who in their humble but necessary employments will add mostly to this stock of important knowledge. I cannot say more on this subject in this letter, written in so much haste, but may take occasion to refer to it again at my leisure.

The whole journey from the Stanislaus to this place, take it on the whole, is over a remarkably rugged and picturesque country. Indeed, before reaching Abby's ferry, the view from the summit of the hill before you begin to descend to the Stanislaus is grand and enchanting. Lofty mountains, bold and precipitous cliffs, vast and frowning headlands succeeding each other in the distance, fill the mind with strong emotions of admiration and surprise. The straight and stately pino is the principal occupant of the loftier summits, while the oaks and manzanito, and varieties of shrubs occupy the slopes in charming variations of foliage and form. After passing the Stanislaus and ascending the dividing ridge between it and the succession of beautiful valleys which brings us more on a level with Murphy's Camp, a new set of bold and interesting landscape views strike the eye. The grandest geological phenomena fill the mind with awe at the terrible catastrophes which have overwhelmed this region of the globe in former times. In several places, forming the summits of lofty hills, are perpendicular walls, which at a distance appear to be columnar basalt spread out and overlying softer materials. Alternate exhibitions of deposits from great floods of water and overwhelming floods of fire fill the mind with wonder at the violence of the agencies which wrought out the present physical structure of the Sierra Nevada. Spreading between these lofty cliffs are broad and charming valleys, filled with a soil fit for the most successful culture, and deeper still within their bosom lie millions of the precious medium of commercial intercourse of men and nations. The road through these valleys from Vallecito to Murphy's, was very good, and the scenery ever varying, constantly pleased the eye and suggested agreeable contemplations to the mind.

On the score of agriculture, little is done, so far as I have observed. Here and there through the morning's ride, I have seen a small spot under fair cultivation. But little in this way seems to be done in this region of country, but fine opportunities for irrigation are frequently presented and sooner or later attention of miners will be partially turned to the cultivation of fields or garden spots in the vicinity of their camps or dwellings. Some of the flumes in these regions are of great service to the mining flats, and one in particular stretching across this valley just before reaching the village is really a great work, lofty and substantial and of great benefit to the gold hunters in this vicinity. But the water as a general thing is low and times are dull, and the place is as quiet as a Sabbath day.

This afternoon when the heat diminishes, we shall take saddle for the "Big Tree," which is about fifteen miles from this place, and if I get there I will give you some account of my journey to that greatest wonder of the world.

Very respectfully yours,
C. F. Winslow.

HORTICULTURAL.

Woolfskill Ranch.

We have enjoyed a very pleasant trip to this place, and were highly gratified with our visit. John Wolfskill, Esq., established his ranch early as a "Stock Ranch," in company with his brother (now of Los Angeles.) This was in 1843. It was not until 1851, that the orchard was commenced, and then a few thousand grapes only were planted, a few fig trees, and a few pears (of native kind) were added; and each year thereafter, new additions were made, and they are promising finely.

At the present time the grounds are quite extensive, the vineyard comprises about three thousand vines in fruit, samples of which were cut for us that we might test their flavor; they give good promise of a crop, though not so large as the last year. The grapes were only partially ripe, here and there only were the full purple clusters.

Another younger vineyard of some three thousand, had been much injured by the grasshopper, which had been very destructive.

The peach trees were very heavily loaded with fruit, but only of the native kind. Pear trees were large and vigorous, well grown, and many of them quite full of fruit; the pears very large at the present time, and would weigh half a pound each — the Bartlett variety prevailing; several fine trees, well loaded with native fruit of good size. Some very fine apricot trees, which had borne well, but the fruit had passed. The fig trees were of remarkable size, planted in '51; they had attained the height of 20 feet and near a foot in diameter; only one variety were fruiting well, the purple of the lower country. A large collection of young fruit trees of various kinds, in nursery rows. Orange trees—the Shaddock and the Chinese Chesnut, were growing thriftily, and the whole grounds were under very excellent cultivation.

We noticed a fine Engine upon the banks of the creek, of some ten-horse power, used in connection with the rotary pump, in raising water for the purpose of irrigation; and we took especial note of the plan, the labor required, and the effect upon the ground, the trees, etc., etc. Where the ground is a light sandy alluvial deposit, the simple conveying the water will answer; but where the soil is of a claycy texture, or a rich mould, it must be cultivated shortly after, or it will bake, and the result is injurious. Irrigation requires cultivation; and we had rather have a deep and generous cultivation, without water other than what nature has in the earth, than a free supply of water upon the surface, and the ground left afterwards to bake in the sun. *Will cultivators note this.* Irrigation is of vast importance to our State, but the science must be understood. The best plan, and we think the most economical, is *Artesian wells;* and if friend Woolfskill and others, on these beautiful prairies, will try this plan, they will accomplish a great good.

The crop of grapes from the "Wolfskill Ranch" will be in Sacramento market, in about two weeks; and peaches will soon follow, with pears and figs. Mr. W. has accomplished much, and deserves great credit for the attention, labor and skill displayed. All the best portions of the work, the budding, pruning, planting, and forming trees and nursery plans, are the work of his own hands, and are well done. The only objection of importance we could make, would be the *pruning up trees;* they should be headed low, in this country: this shields the ground around the tree, and the trees resists the wind with safety.

We should have been glad to have accepted the kind and courteous invitation of the proprietor to tarry over night, enjoy his hospitalities, and to have rode over his grounds—seen his fine stock, and grain, etc., but we were obliged to defer this. For his kind attentions we were very grateful; were delighted with our visit, and trust a full and prosperous harvest will amply reward the proprietor for his faithful labors.

Letters from Dr. Winslow.—Our readers are presented with a theme to-day, from our talented and accomplished correspondent and friend, that will be to them a rich repast. We feel assured that if the eye but catches the subject, the mind will not be contented till every sentence has been laid away in memory.

We can say to our readers, that it will be our aim to offer them, from time to time various letters from the ablest pens; and they can always be assured of a rich repast for the time given to perusing the sketches that flow from the able pen of Dr. C. F. Winslow

The California Farmer,

With State Fair Reports, Description of Articles, &c.

The "California Farmer" is now firmly established, and we trust acceptably in every county of our State. It has a circulation in many of the old States, and in Europe; it is daily increasing, and daily receiving marks of favor. Its advertising columns we believe to be the *very best in the State*, and those who desire to make known their business widely, can have no means *so certain* as by the California Farmer.

The present issue will be near three thousand five hundred copies—and during the months of September and October, we have every reason to believe that our circulation shall reach upwards of *five thousand.*

Now is the time to subscribe for the "Farmer;" its issues will contain all the particulars of the "*Great State Fair,*" all the *Reports, Addresses, Correspondence, Descriptions in full, &c.,* of all articles exhibited at the Fair—and everything that will be matters of moment to people of other portions of the Union.

By subscribing now, the Volume can be secured from No. I of Vol. 2, and will be a most valuable record of the Agriculture of California.

Post Offices.

San Luis Obispo, July 25, '54.

Messrs. Editors: I am a subscriber to your paper, and the last No. I have received was dated June 15th. Now is this not enough to make any man cry out against the mail arrangements. I received a letter July 18th, dated 13th of June, by Adams & Co.'s Express. The writer tells me he has wrote to me repeatedly, none of which I ever received until that of the 13th. Now as I had other business to attend to, I was not here when the mail arrived, therefore could not answer it by steamer. Consequently, I am forced to wait until the 31st August, before any letter leaves here; it then takes the route South by steamer, then up, and at length it arrives in San Francisco on the 7th of August. Now, Messrs. Editors, how old will your next newspaper be when I get it? And how long does it take to send a letter to San Luis Obispo—or get an answer from San Jose?

Southerner.

There must be a remedy for the present irregular and unsatisfactory condition of the mails. We are constantly receiving complaints *from all quarters.* Sometimes the letters are not more than *a week* between our up river correspondents at Marysville, and this city. We actually received some letters recently, *only three days* from that point, and then we looked forward for some improvement.

The tone of the letter from "Roving Jack," is but the sentiment of twenty of our patrons every week. We have now before us, while writing, four letters, complaining of the mails, and showing us there was no excuse. We are aware that some excuse should be had for a *new country,* but there is no excuse for gross negligence or sheer carelessness; and we see no other way than for the citizens to come together and take the matter in hand, and show the cases that occur of valuable letters and parcels that lay in the various county offices for days, that should go forward. We remember while on a tour recently in San Jose, that we mailed letters for the Mission on a Wednesday, in San Francisco, and was at the Mission on the Sunday following; staid till the ensuing Wednesday, and yet the letters came not—they were on their way, however, and reached their destination in the *short space of nine days* from San Francisco to Mission San Jose. Here is expedition with a vengeance. But the letter of "Southerner," and a host of others, are but the few of many thousands that are continually crying out against *Uncle Sam's mails.*

We do hope that there will be a better state of things; the evil should be remedied, and we hope it will. We shall constantly speak of it.

Journal of Commence.—We find upon our table this new Journal, and found pleasure in unfolding it. We like to see a clean and well-printed sheet, and typographical taste displayed. Were we interested in politics, like some men, we should undoubtedly eulogise the Salutatory of the editor. There is a classic grace in the composition that wakes the patriotism within us, and makes one almost forget that "all is fair in politics." If devotion to a cause, added to the gift of eloquence in pleading, and a complete knowledge of the wants of that cause, could bring success to the "Journal of Commerce" may hail its colors and cry victory, already; for no party ever had a more devoted and self-sacrificing partizan than C. E. J. C. Kewen. But alas! the "race is not to the swift, nor the battle to the strong."—Therefore we trust that should the "Journal" not be triumphant as a party paper we may long enjoy it as a commercial guide, and be rewarded with the thanks and profits as well as the approval of [illegible].

Page, Bacon & Co.

Envy, with her wily tongue,
Loves to do a neighbor wrong.

That rumor which was started against this old and firmly established Banking House, and called *idle* rumor, should be ascribed to the right source. Envy has more to do with such things than vanity—and it is well known that birds of prey do not often pick at small and worthless fruit; they strive to pluck the fruit that is fairest, and that which grows upon the loftiest branches—and thus with *envy.*

That station or excellence which the envious cannot reach or attain, they assail, and thus we believe originated the base report—it appears to some, idle, for its aim was a covert one—but the motive was envy. Interested persons call such reports idle, because they know they are false; but the crowd when called into action, are the workmen of the vindictive slanderer. It was by a similar subterfuge that the report was spread relative to the able House of Adams & Co. It is such houses that "envions birds" would assail, but there is a glorious pleasure in knowing that though

"Envy's a coal that comes hissing hot from hell,"

it has failed it its venomous efforts here, in these two cases; and now the fruit is fair, its good qualities have been tested: men have tried it, and are satisfied with it. We wish to call things by their right names. What envy would, but cannot do, is *evil,*—not *idle.*

American Talent—Mrs. Robb.—It is something to know that amid the excitement that is raised, and the desire to follow after stars of foreign skies, there are those who appreciate our own native talent. Mrs. Robb has ever deserved success not only for her talent and skill in ballad singing, but for the dignity and excellence of character maintained in all her course before the public; and it has been more gratifying to know that she has always been adding to the number of her friends as well as to the wealth of character, which is a mark of greater success than a flowing house or full purse, and the loss of all else. At the concerts recently given by this lady at San Jose she was greeted by an appreciating audience, and her singing gave so much satisfaction that she has been called on to repeat them. Mrs. Robb is expected soon to visit other portions of our State, and we trust American hearts will appreciate native talent.

Target Excursion.—The City Guards will turn out to-day, on a target excursion. The best shot will be rewarded with a magnificent gold cross, and the second best will receive a gold medal.

Gold! Gold!!—Wells, Fargo & Co., must surely win friends on the *other side,* as well as in California, for we learn by the gentlemanly and efficient manager Mr. Howard, that *only* $213,000 was the parcel brought down river Monday evening. Now we do not wish to quarrel with friend Howard nor this powerful and growing establishment—yet we will *protest* against sending so much gold out of the country; it is altogether too bad; and it is rather a mystery to us that they should wish to do so. We think we can account in some measure for it. We shall lay it all to *Howard*—his soul is full of music and humanity, and we should quarrel with him were it not so, and that he is so kind, always ready to help an editor to the *latest.* We know he loves music, and that hides many sins. But their sending off this gold, $213,000 in one lot—ah! I have it—'tis Howard! a lineal descendant of that good and humane man that loved to relieve sufferers; and this Howard knows how much they *need the dust* the other side, and does this out of sheer humanity. We shall try to forgive him—conditionally.

Chauncey Langdon.—Sometime in February we appointed the person above named as travelling agent to the California Farmer. For a period of time names were transmitted to us, till they amounted to a large list. To every name so received we have regularly sent our journal, and believing our readers are not disappointed in its character or value, we shall continue to send it. As we have no means of knowing who have paid and who have not,—and from facts that have come to our knowledge recently, we fear many persons are receiving who do not receive the paper because of their names never having been sent to us—and believing many may owe [illegible] of which we are not advised—we desire all such to [illegible], and every deficiency shall be made up by us to the [illegible]. Mr. L.'s name was *withdrawn as agent*; he is now an [illegible] to the Farmer now, and we should be glad to learn [illegible]. Those who are in arrears to us, we kindly [illegible] to at once.

Courtesies.—We received a [illegible] from Messrs. Atwill & Co. for which we are [illegible]. They have supplied [illegible] with our [illegible] who would be [illegible] and [illegible]. They [illegible] the [illegible] of [illegible].

From the East.—[illegible]

THE CALIFORNIA FARMER.

WARREN & SON, EDITORS AND PROPRIETORS.

AGENTS.

Messrs Adams & Co. at all their offices throughout the United States or Europe.
Messrs. Wells, Fargo & Co., at their offices throughout the Country.
Mr. O. H Hamilton, Travelling Agent for Sacramento City and County
Messrs. Langton & Co. *for Downieville, Foster's Bar, Goodyear's Bar, Minesota.*
Messrs. Adams & Co.—*Humboldt Bay, Trinidad, Crescent City, Port Orford, Umpqua City, Scottsburg, and the entire northern coast.*
Messrs. Leland & McCoombe—*Crescent City, Port Orford, Uniontown, Eureka, and Bucksport.*
San Francisco—Sullivan's newspaper stand, near the Post Office; Kimball's, Noisy Carriers Hall, Long wharf.
Benicia, Martinez, &c.—Messrs. Stiles & Dodds.
Union City and Mission San Jose—Messrs. Howard & Chamberlain.
Bidwell's, Butte Co—P. Freer.
Columbia—A. Hunnewell, P. M.
Coloma—D. G. Waldron & Co.
Mokelumne Hill—I. Coffin.
Marysville—Treadwell & Co.; James Lloyd.
Mount Farm, O. T.—Gen. M. M. McCarver.
Napa—James & Co.
Napa City—Dudley & Co.; Hiram Downing.
Nevada—A. W. Potter.
New York City, N. Y.—J. M. Thorburn & Co.
Placerville—Nash & Davis; Dr. Charles Offendinger.
Sacramento—Messrs. Gardiner & Kirk; Baker & Hamilton.
San Luis Obispo—Dr. Thomas T. Harvey, P. M.
Stockton—C. O. Burton.
Sonora—Taney & Roberts.
Sonoma—Senor Pedro Velasquez.
Suisun—B. F. Finchley,
Union, Humboldt Bay—A. H. Murdoch, P. M.
Yreka—Cram, Rogers & Co; Parker & Roman.

We desire our Agents to report to us on the 1st of every month, the increase of names and the prospects, together with the amount due the office.

SAN FRANCISCO, THURSDAY, AUGUST 17, 1854.

I Would I Were a Boy Again.

Who can be so engrossed in the cares and business of this busy age, as not to be aroused at times at the scenes passing around us, that remind us of our "boyhood days." How many scenes now enacted in our midst by the teeming population of children that are gathering into our community, recall the sports and play of childhood. See that little boy with his bow and arrow, and that little group at marbles; hear them talk of their alleys and claydaubs—but these children have advanced with the age. A new language is given to toys of our boyhood years; playing earnestly now, boys tell of their agates, chrystals, Chinas and pottiers. Watch them now, and see the winner. His eyes gleam with joy as he pockets the winnings. Hear him descant upon the rules of the game, even as an old student of Hoyle. Another group—see them with their "kites," and watch the struggle between them; see them "take in, and let out," in their strife to mount highest their favorite; and look yonder to that "game of ball," how eagerly these combatants hold their game. Neck and neck they side very even—all these interest us, they are children's play; but children now are men by and by, and these marbles, the bow and arrows, the kites and even the game of ball, are all as a type of the character and destiny of men. The boy with the kite is but a type of the full grown politician striving for political preferment. The marbles represent the losses and and gains of the merchant in his chances of trade. The bow and arrow is the professional or literary man, and many a shot will be made in vain; many a shot fall short of the high mark aimed it.

We were thus musing upon the magnificent scenes that had passed before us in a brief space of our morning ride, when we saw—"stop! stop the carriage! I must go. Let me pull off my shoes and stockings, and roll up my trowsers above my knees, that, may wade into the creek and get some 'cat o' nine tails,' just like as I was a boy, for they look so good. I must have them, that I may have the pretty pussy tails to scatter to the breeze, as in boyhood years."

Oh, who would give up this feeling, or resign the enjoyment of living over again their early life by failing to stop and view the innocent sports of boyhood's early years. How often may we receive instruction from infant years, and how often, too, may we make an impression for good upon the minds of the young, by "a word fitly spoken," or a kind and earnest effort to promote the happiness of the young around us. The little boy with the miniature ship upon the pond of water, or the stream by the road side, may become a skillful navigator. The little "Yankee whittler" that cuts and carves his dogs and lions, or his group of wooden statuary, may become a future Powers or a Canova; and the sprightly urchin that marks the walls and fences with figures and fancy sketches, in chalk or charcoal, in years to come shall be your Benj. West. Slight not then the child's play, for light and trifling as it may seem now, it has a mighty future in it. Oh, who does not often love to recall their early years of happy childhood sports and their boyhood labors, that were a pleasure to them when manhood came. They will see the impress it made upon them and the influence it gave to future years. We can go back and recall our boyhood years, and go to the little garden spot where we toiled; we can see every little walk and alley, every bed of early flowers, the old stone wall, the five barred gate, the well and the "old oaken bucket;" our weekly duties, the stent our dear father gave us for the week he was accustomed to be absent; and even now the long, long years that have passed, when we hoed the corn patch and sniffled the onions, beets and carrots; how we sweat among the outside rows of potatoes; how carefully we lifted the vines to hoe beneath them and turned them back again. When wearied by the task, which seemed to us a great one, then came our reward by the daily visit of our dear mother, who came to the garden with some good butter and bread and other fixings of a choice lunch. Then beneath the spreading tree we sat in its cooling shade and partook of the good things: the kind words of encouragement and cheer given us by our blessed mother, if we toiled hard to finish our day's labor; the words, "well done my son," made an impression that nerved the arm; and the approval of that dear father of our weekly labor made us still the happier. That mother's influence and that father's approval have been with us through life, and if we have ever accomplished anything for the cause of Agriculture, or been the means of stimulating others in this great science, we owe it all to the cheering and approving influence of our parents upon our labors in "early childhood's home."

Our ride across the Tules, and the "cat 'o nine tails" that we gathered, has been the means of bringing up again those dear and loved scenes of by-gone years, until tho beating heart and streaming eye called from our lips the wish, "I would I were a boy again."

Grasshoppers.

We have to note many instances where much loss has been occasioned by this destructive insect. On the Putah Creek, at Messrs. Wolfskills', we saw quite a plantation of grape vines completely stripped of fruit and foliage, the same as if a fire had swept over them, taking every vine clean.

At Mr. Smith's, on the American river, near Sacramento, peach trees were stripped of leaves and the green peaches were eaten clean to the stone. Vegetables, such as carrots, parsnips, &c., were eaten entirely off even with the ground, and had not Mr. Smith taken the matter in hand in early season, rallied his men, and with large bushes brushed them away from the trees and swept them as with a besom from the grounds back into the grain fields, they would have literally eaten up every green thing in the gardens and fields.

While at San Jose very recently, we rode for miles where the ground was literally *black* with them. Here the species were black instead of gray, and resembled the cricket more than the grasshopper.

We would be obliged, if our readers will give us such facts of their depredation and progress as may be known to them. We have samples of the peaches eaten by this insect, which can be seen at our office.

Flora.—We found at our sanctum, on Thursday last, one of the finest specimen plants of Heliotrope we have ever seen. It was a new seedling, raised at the garden of W. C. Walker, Esq., on the new Mission plank road—the Golden Gate Nursery. We can assure our friend Walker he may well be proud of this variety, for it would bear off a prize at many of the Royal Exhibitions of Europe. We have seen probably as good plants as most men, and grown them too, but the foliage and flower of this plant deserve an especial notice. The plant is nearly three feet high; its leaves three and a quarter inches broad, and five and a-half long; the umbel of flowers seven inches long, in three lobes, of a rich deep purple and very fragrant. In justice to the proprietor of the gardens we name the plant "Walker's Magnificent." We earnestly commend a visit to the gardens and the conservatories of Mr. Walker, by every lover for Flora. Mr, D. Nelson, the skillful gardener who has charge of the conservatory, and who also attends the *Floral Saloon* of Mr, Walker, on Washington street, is ever courteous and attentive, and will be always happy to attend to and explain all that relates to Flora.

Large Egg.—A very large egg was presented us by Mrs. Murphy, from Mission Dolores. The egg was of very remarkable size, and we at once pronounced it a "double yolked." We are very thankful for such things and trust our friends have more of the same kind.

Dairy Stock.

It would hardly be supposed that California had as yet made much advance in the selection of Dairy Stock, or that much time had been given to prepare a fine stock of the *Durhams, Ayershires,* or *Holderness;* but to such persons we can say, that if they will but visit some of our Dairy and Stock Ranches, they will find that no State of the Union could boast of a general stock of so fine cattle as California.

The select stock of the Dairy, which will be exhibited the present season, will far surpass the highest expectations of the most sanguine. We have ourselves been surprised to find, as we have visited the various portions of the State, so many fine Durhams, Ayershires, Devons, and Holdernesses. Upon some of our Ranches we have seen as many as seventy-five or one hundred, of young blood stock, giving us an assurance that in a brief time we shall excel the world in our stock raising. At Mr. Thompson's, at Sonoma; at Mr. Osborne's, at Napa; at E. L. Beard's, Esq., and J. M. Horner's, Esq., at Mission San Jose; at B. Southwick's, Esq., of Sacramento, and at Huchinson & Green's, on the Putah, we have examined the stock and find it fully up to the high encomiums that have been passed upon it.

We advise any one interested in the Agriculture of California, just to visit Putah Creek, and examine the various Ranches there. At Huchinson & Greene's we noted some very extra full-blood Durhams, and were struck with their remarkable beauty, and learned they were selected by Daniel D. Page, Esq., of Page, Bacon & Co., and sent from St. Louis to F. W. Page, Esq., as being of extra quality.

We have urged oft times the attention of our stock raisers to the importance of importing the *best breeds of stock* only, as no country in the world has so many and great advantages for rearing successfully the very best kinds, and at so little expense. We refer our readers to the estimate of value put upon the blooded stock recently imported, in the old States, and we trust California will not be behind the age.

Profitable Gardening.

We hear so often of the want of success among the cultivators, that a stranger might suppose there is no such thing as profitable gardening now; but we have no difficulty in finding many persons who are doing very well indeed. The greatest cause of so much distress and loss has arisen from bad judgment in planting excessively of one article. Every cultivator can select some variety of fruit, grain or vegetable, or a portion of each, and by giving heed and raising the very best, and only the best, always secure an ample reward. Within a short time we have visited an establishment where great pains was taken to raise whatever was grown to the highest point, and we were favored with particulars and learned that success has attended every effort. Here they gave us a glimpse at private notes, and we found that the net return from all the products was nearly $2,000 per month. Here was an income of $25,000 per annum. Figures don't lie; and here is but one case of several we know. Will not our cultivators be encouraged? Better days are coming for those who till the soil well.

J. C. Davis' Ranch.—While upon our route in Yolo county, we stopped at the fine ranch of J. C. Davis, Esq., a very large stock raiser, about sixteen miles from Sacramento city. Mr. Davis has a fine large public house, fitted with very comfortable accommodations for those travelling that way. Mr. Davis has several thousand head of fine stock, cattle, horses, mules and cows, and his dairy stock is very fine. The garden attached to the house has been much improved within a year, and now contains some large and fine fruit trees, also some thousand or two of grapes, in fine bearing order. The garden is well designed, has a good fence, and is well arranged for irrigation. We regretted the absence of Mr. Davis, being desirious of obtaining some facts relative to the engine recently erected on the premises. An engine of some twenty horse power has been put up in the buildings, by which a flouring mill with two run of stones is used, thus benefitting the whole neighborhood. This same engine also moves the smith's bellows, the lathe for iron or wood turning, thence the power is taken into other shops, and lastly into the garden for irrigating the grounds. The buildings and fences are all in very creditable order.

Warm Weather,—On Tuesday, 8th, at Mr. Smith's ranch, on the American river, near Sacramento city, at 2 P. M., the mercury was at 104 degrees.

We Want More Population.

California requires the same means used to build up our waste places, and to establish permanently those already begun, to make them prosperous and happy, that was used by that benevolent-hearted woman, Mrs. Chisholm, who accomplished so much to settle and make prosperous the people of Australia; and whose plans will well apply to California. We make extracts from Harper's Magazine, touching the same:

"A scheme of colonization gradually grew up in the mind of Mrs. Chisholm, based upon a keen insight into human nature, and a thorough knowledge of the wants of the colonies. All experience has shown that it is not good for man, or woman either, to be alone; and that a virtuous society can be reared only upon the basis of the family state. Her published reports contain many instances, half sad, half-ludicrous, of the anxiety of the better part of the settlers for virtuous wives, and of the impossibility of their obtaining them. The anxious question of the stockman, "When they were to have a Governor who would attend to matters of importance like that?" embodied more wisdom than the Colonial Office was aware of. Something else is requisite for a flourishing state, than fat cattle and fine-wooled sheep. With practical good sense, Mrs. Chisholm thus hits the nail upon the head: "To supply flockmasters with good shepherds is a good work; to supply those shepherds with good wives, is a better. To give the shepherd a good wife—is to make a gloomy, miserable hut, a cheerful and contented home. To introduce married females into the interior, is to make the squatters' stations fit abodes for Christian men. All the clergy you can dispatch, all the school-masters you can appoint, all the churches you can build, and all the books you can export, will never do much good, without 'God's police,' wives and little children."

"But seeing all this, she also saw that sending out female emigrants, as Government had done, like so much merchandise to supply the matrimonial market, would not remedy the evil. The only feasible means of removing the disparity between the sexes, was to send out emigrants in families. To organize a scheme of family emigration, Mrs. Chisholm, accompanied by her husband, who had now rejoined her, and family, left Australia for England, in 1846, bearing with her the warmest good will of the colonists, of every class."

To Grain Growers.

We publish the following to show a portion of the feeling that is abroad in the community. We have many communications on hand; but we do not publish all. We request the real signature to be left with us, confidentially, if desired—but on this subject all should speak out.

San Jose, August 3, 1854.

Messrs. Editors: The farming interest calls aloud for assistance from some quarter. From whence shall it come? From the farmers themselves? by calling a convention of the farmers and resolving to hold on to every pound of wheat until it will bring them something. Let the millers come to the same convention and arrange with the farmers on such terms as they can afford. Something, and that at once, must be done to protect the farmer, or the agricultural interest will receive such a blow as it will not recover from for many years. You can suggest something; if so, let us have it. A Farmer.

Fire on the Putah.—The constant danger to which our farmers are exposed on account of fire, should cause them to watch with great vigilance lest this destroyer should catch them unawares. We saw the rapidity with which fire spreads across the grain fields during the past week. This fire resulted from the "wad" of a gun, fired by the proprietor while hunting rabbits. We were passing the ranch of Mr. McClory and saw the ground burnt over. It was only about an acre, and the fire was discovered immediately, and the men were called to the number of fourteen, who, being near the creek, cut green boughs, and dipping them in the water, beat out the fire in the space of half an hour. Farmers should not permit a gun to be fired upon their premises during the dry season, unless most strictly guarded. A fire is easier prevented by caution, than arrested when once under way, and the small fire mentioned here, unless discovered at the instant, would have destroyed tens of thousands bushels of grain, and probably buildings also. Prevention is better than cure.

High Winds.—We had supposed we had seen some dust at San Francisco in times past, but the way they raise dust upon the plains at Putah Creek, would fill the eyes of any merry soul that loves to "raise a breeze." A north-wester swept across the prairies on Tuesday of last week that *was some.* It come through the gulches of the mountains, across the fields, making the straws fly, and verily if straws show the way the wind blows then it was a real north-wester: it was a perfect gale. The threshing machines were stayed in their operations, for the natural wind made them hide their diminished heads and wait till the greater power was past. Indeed it was a gale one seldom sees among the harvest months.

Letter from Roving Jack---No. 2.

Blue Devils.... The Merced Valley....The Wheat and Barley Crops.... Threshers Wanted....The Mails....Politics.... The New Road, and New Ferry....Agricultural Society.

SNELLING'S RANCH, July 27th, 1854.

MESSRS. EDITORS: Did you ever have a fit of *ennui*, in the worst stage? or in other words, (to use a term familiar among the clod-hopping fraternity,) were you ever seized and possessed with the "blue devils," until you were so indifferent to passing events, that should a passer-by happen to take it into his head to gouge out one of your eyes, or wring your nose until the claret would start, or twist off your right ear, it would scarcely serve to rouse you from your reverie to a proper sense of "what's up?"

Now, if you have ever been thus situated, you can form some idea of the present state of my mind.

Notwithstanding the blues, together with divers and sundry other *etceteras*, quite as annoying as Beau Hickman's board bills, or *Dick's* pet pigs, I shall endeavor, in answer to your request, to jot down a few items from this (rather peaceable than otherwise) unassuming neighborhood, which peradventure, may prove interesting to some of your readers.

This valley is one of unsurpassed beauty and fertility. There are many valuable farms in a high state of cultivation, upon its face, and it is inhabited by a host of energetic, high-minded, laboring—and aye—tax-paying citizens.

The wheat and barley crops have turned out superior to the most extravagant expectations of the God-loving and loved farmer. We have, however, been sadly disappointed about threshers; and as yet, the prospects for getting our threshing done is quite gloomy. One or two threshing machines would do well here, throughout the entire season.

There is one feature in the wheat and barley crops in this valley, that is worthy of note, which is, that notwithstanding the season has been so exceedingly dry, there is not a crop of either, in my knowing, that has not made a fair yield; and but one that is injured with the smut—and that was the result of very bad judgment in the proprietor, in selecting smutty wheat for seed.

When I set out upon the difficult task of concentrating my scattered ideas upon the subject of this article, as well as I can recollect among the jumbled mess, there was something to be advanced upon tho subject of *Post Offices, Mails*, etc. It seems to me that the Post Office Department has resolved itself into a sort of game of chance. I should like very much if some generous, kind-hearted philanthropist, would—*pro bono publico*—give some light upon the subject, and let their light so shine as to dissipate the darkness that pervades this region in regard to the same. I ask, what kind of a game do they play in there? what do they call it, and what does it cost to come in? And, by the way, do they play it with "life's pack of cards?" if they do, we desire to be understood as having employed Ebenezer Little John to play our hand, as we look upon Ebenezer as being a shrewd (?) old sport.

It is a matter of no little surprise that we should be thus neglected. We have among us philosophers of the sect of Zeno, some too who are possessed of the patience of *Job*, almost; but patience, resignation and submission, are now virtues (?) that we read of. We have suffered the most temper-destroying inconveniences from (it seems to us) the willful neglect of a misguided and ill-advised post office department, for "lo. these many years," and have bore up under it with christian fortitude; it now passes endurance. We have increased to a mighty people, and it behooves us as a people to raise our voices in our own behalf, and if we are considered as living within the pale of civilized government, we are most certainly entitled to a freeman's rights; (and by Jove I am half inclined to the conclusion, that we have something to do with some kind of government, as it costs a poor white man nineteen "human scads" to breath the pure air of benign heaven.) * * * * True, it would look like nonsense in the extreme, to attempt penetrating a coat of mail with straws, much more would it appear indicative of insanity for a common clod-hopper to raise his Ebenezer away out here in the wilds of Californin, and expect to be heard at the great Federal Metropolis; but in the face of all this sound philosophy, I have determined to "pitch in headlong," if I should (as the adage goes) "come out squeezed."

We have a tri-weekly mail from Stockton to Mariposatown, and a weekly mail from Sonora to that point; and that is precisely the mails, and all the mails we have west of the Tuolumne river. A glance at the map will very clearly show a vast range of country, comprising hundreds of miles in length and breadth, thickly inhabited by a hardy race of enterprising spirits—and not a post office. Not a post office, did I say? if I did, I will take it back, for there has been a post office established at Millerton, in this county; and one in Tulare county, at Woodville; with an appropriation of a sum almost sufficient to defray the expenses of transporting a semi-monthly mail one-half of the time over said routes, which precludes any possible show for the people to derive any benefit from this generous (?) act of the post office department in establishing the aforesaid routes and offices, unless they voluntarily defray the expense of transporting the mails by subscription. That is the way the wants of the pioneer Farmers of California receive the prompt attention of the post office officials at Washington. What has become of Judge John G. Marvin, and all his new-fangled ideas and plans for post routes and offices? Mayhap the Judge is, by the new mail routes, something like my old friend Bill was, by running the mustangs: Perhaps he *can't see any money in it!* and has come to the conclusion to "*engage in nothing that won't pay?*"

Politics are running tolerable high in this county. We have first, the unterrified Democracy; secondly, we have the quite respectable little band of genuine Whigs; and last and least, we have the Broderickites. These are the principal factions.

* * * * * *

One word about the Road, that has been laid out some two years, and is finally being worked by N. S. Farrens; the road leaves the Stock and Mariposa road at Forbes' Ranch, descends into the valley of the Merced river six miles below Snelling's Ranch, crossing the river at Farren's flouring mill; (where Mr. F. contemplates building a No. I ferry boat.) This is a splendid route to Fort Miller, Four Creeks, Kern River, Tejon Pass, and Los Angeles. &c. To close, I will state that we are about getting up an Agricultural Society in this valley. Yours, ROVING JACK.

NOTE.—We trust the interesting letter of our excellent correspondent from the "Snelling," will not pass unread by those who have influence with the "*Post Office Department*," of which we will again speak. We know our readers will be much gratified, and read with interest the free thoughts of "Roving Jack," and we trust we shall hear from him often.—ED.

A New Red Dye for Dyeing Wool.

ON treating uric acid with nitric acid and then with ammonia, Proust obtained, at the beginning of this century a red substance which he called purpurnto of ammonia. MM. Wohler and Liebig have since studied this substance and separated a compound of a fine red color represented by the formula $C^{12}N^5H^6O^8$, which they call *murexid*. This material, which is easily prepared from alloxane and ammonia, has been applied to dyeing wool, for which it furnishes a red color richer than that of cochineal. The author of this process is M. Albert Schlumberger, of Mulhouse, (Haut-Rhin). His experiments have been verified by a commission from the Industrial Society of that town.

The red of murexid fixes itself on the wool without a mordant. After imbibing the alloxane, a bit of wool drying exposed then to ammoniacal vapors and afterward to the heat of a steam drum or heated iron, the red color is seen to be immediately developed. It is indispensable that the ammonia should be applied before the heat. The color is not produced if the specimen impregnated with alloxane has been heated; water removes this last, while it is wholly without action or murexid.

Although this color requires no mordant, M. Schlumberger has however found that a mordant may be useful. That which he prefers is a bath consisting of equal parts of bichlorid of tin and oxalic acid, the whole forming with water a solution marking 1° Beaume. The mordants made with protochlorid of tin give indifferent results.

Under the action of the sun's rays, the Commission found the red of murexid to be more stable than that of cochineal, and they do not hesitate to recommend the use of it in dyeing gobelins in preference to cochineal, although the new red is just now dearer than the old, since uric acid or alloxane are now known only in the laboratories. The price will be cheapened when it is made a branch of industry, and it is certain that guano will here find a new demand.

The red of murexid resists the action of alcohol, ether, and the acetic and oxalic acids. Muriatic, nitric and sulphuric acids destroy it; but if the destruction is not complete, the color may be restored by means of ammonia.

Cotton, whether with a mordant or not, whether animalized (Broquette's process) or mixed with wool, is not dyed with murexid. Impressed with the alloxane and then treated with the hot iron, cotton is colored it is true of a rose tint, and the color is deepened with ammonia; but the color does not stand washing, water causing it wholly to disappear.

Silk does not take the amaranth color of murexid; it becomes yellowish rose. M. Schlumberger recognizes in this property a means of distinguishing cotton, silk, and wool.—*Scientific American's Journal.*

Agriculture at the Sandwich Islands.

WE have made extracts from the very able report of the President of the Royal Hawaiian Agricultural Society, and only wish we had space for every work of it; there is such a spirit breathing through every sentence, that one feels that a Society with such a head and leader must be attended with success. We note too an extract from the Treasurer's Report. All give assurance of its prosperity.

PRESIDENT'S REPORT,

Gentlemen of the Society: It becomes my pleasant duty to again congratulate you on the return of our annual festival; and agreeably with our constitution, to render you a report of the proceedings of our Society for the year which has just closed. I think there is no reason to doubt that our association is a useful one—one whose influences for good are seen to some extent at the present time, in the increased interest manifested in the culture of the soil, the importation of new and improved breeds of stock, the introduction of new fruits, plants and flowers, and ono whose influences will be deeply felt in the bright future so sure to dawn upon these pleasant islands. That we have done good, who will question? Still, I am not satisfied that we have done all we ought to have done, and I trust that our efforts for the future will be pushed with redoubled energy, and so directed as to confer the greatest amount of real, practical benefit upon the great cause we seek to promote. Let us take hold of the matter with a will—remedy whatever defects may exist in our plan of operations—and push our cause for the year to come with a life and vigor which shall greatly extend our usefulness.

Our Society is a progressive one. We have gained strength with every new year, increasing in members and funds, and adding, I trust, to the increased interest which is manifested in all the various branches of Agriculture, Horticulture, Floriculture and Manufactures. * * *

The cause of Agriculture in these Islands, I think, is decidedly upon the advance, and though some of us have been disappointed in our crops—though our trade with California, the great consumer of our products has diminished—and though the small pox has smitten thousands of our best laborers to the ground, we have great reason to rejoice in the general prosperity and abundance of the land. In several branches there has been great activity and progress, and such as cannot fail to gladden the hearts of all those who are fond of sweet flour, good mutton and tender beef.

In the early days of wheat sowing, when it was raised by the peck and bushel, the lava rocks were used as a threshing machine, and the mouth for a fanning mill, but lo! the Yankee has come with his reaping machine, his horse power, and steam mill, and he will wake up the slumbering soil; cause the fields to rejoice with beauty; gather in his harvest and his dimes; and gives us plenty of sweet bread and to spare. * * * *

POTATOES.—Two or three years since the largest export from these Islands was that of Irish potatoes to California. To-day we are eating California potatoes of a better quality and at a less price than those of our own raising. How shameful! There is no soil in the world better adapted to the raising of this valuable vegetable than the rich mellow loam of Kula, East Maui; and I am happy to hear that the people of that region are beginning to wake up to the importance of raising a supply fur our whaling fleet. The great potato man of the Islands is Mr. Torbert, and from him I learn that he has introduced the purple California potato into the uplands of Kula since our last gathering, and that it is fast becoming popular with the natives. Thank God! that with all our indolence and neglect of the potato, we have as yet escaped that great scourge of other land, the potato rot.

SHEEP.—The business of raising sheep has taken a start this year, almost equal to that of wheat growing, and is fast acquiring an importance second to no other. It ought to be very profitable, for the price of mutton is high, and the rapidity of increase beyond all precedent. I have known of some flocks that have trebled in the last year, and I hear that Mr. Moffit has one ewe with five lambs, doing well. The Merinos imported by Mr. Moffit, and the Southdowns by Mr. Cummins, are all thriving, I am told; and in a short time we may promise ourselves a large export of good wool, and the luxury of the best mutton. Dr. S. P. Ford, who has entered largely into the business of raising sheep, has now on the way to the Islands, in the ship Falcon, four French Merino and two South Down rams, which will infuse into our flocks some fine blood. Mr. Montgomery has also gone extensively into the business, and has ordered from Australia a choice lot of rams, which may be expected to arrive every day. Captain Meek has also ordered some South Downs from Vancouver's Island. The Society has recently received a donation of valuable books from the Hon. B. P. Johnson, corresponding secretary of the New York State Agricultural Society, among which is the "American Shepherd," a treatise on the breeding and management of sheep, of high repute. For this and many similar acts of kindness, Mr. Johnson merits our best thanks. While speaking of sheep, I ought not to forget the burr, which is one of the greatest pests of this island and is fast spreading to Maui, and the other islands; being carried home in the manes and tails of horses that were better dead than alive. I hope the Society and Legislature will take means to prevent the increase of this nuisance. * * * * *

TREASURER'S REPORT.

The receipts, (exclusive of a payment of a mortgage of $500 which sum was again loaned,) are $2186 23, being an excess over the receipts of last year of $844 34, or nearly 63 per cent. This great difference has been occasioned, partly, by the interest, the liberal donations from the Honolulu auctioneers, the amount received for refreshments, the proceeds of the auction, and the sale of "Transactions;" but the principal cause is an increase of $530 in the amount of subscriptions.—*Polynesian.*

Farmers' Creed.

WE believe in small farms and thorough cultivation.

We believe in large crops which leave land better than they found it, making both the farmer and the farm richer at once.

We believe in going to the bottom of things,—and therefore in deep plowing and enough of it. A sub-soil is all the better.

We believe that the best fertilizer of any soil is a spirit of enterprise and intelligence—without this, lime, gypsum, bone and green manure, or guano, will be of little use.

We believe in good fences, good barns, good farm-houses, good stock and orchards, and children enough to gather the fruit.

We believe in a clean kitchen, a neat wife in it, a spinning piano, a clean cupboard and a clean conscience.

We disbelieve in farmers that will not improve—in farms that grow poor every year—farmer's boys turning into clerks and merchants—farmer's daughters unwilling to work—and in all who drink whisky till honest men are ashamed of them.

Moreover, we believe in taking a newspaper, in paying for it, and reading it. Such hints are worth at least a year's subscription.—*Me. Farmer.*

HORSE BREAKING FOR THE HARNESS.—Before the horse is attached to any vehilce, the harness should be allowed to remain on him in the stable several hours during two or three days; he should be led out so that he may become thoroughly acquainted to the trappings, and a cord of six or seven feet in length should be fastened to each trace. With this the horse is quietly led about, one man performing that duty, while another follows, holding the aforesaid cords, which, as the animal moves forward, are to be strained so that he feels a slight pressure of the collar upon his shoulders. The intention of this treatment must be obvious; if the horse is alarmed by the effect of the collar, the man holding the cords which are affixed to the traces, can instantly relax them; and again, when he finds his pupil is reconciled, he may renew a moderate strain, and finally as much resistance as he has power to create. By this means the most timid horse will gain confidence, and by perseverance, the most refractory may be overcome. A horse when first encumbered with harness, if immediately attached to a vehicle, is astonished when required to move, to find a pressure on his shoulders that he has never before experienced. He discovers another novel apparatus for confinement; he is, in fact, trammeled, and endeavors to escape; probably he plunges, kicks or rears and becomes difficult to manage, but by the simple process just recommended, all this is obviated.—*Hints on Training.*

HOW THE SALAMANDER SAFE WAS DICOVERED. It is well known that iron safes are now made with a chamber between the inside and the outside filled with plaster of Paris. This is an effectual non-conductor of heat, and if the safe is made so strong as not to break when falling in a burning building, there is little danger that its contents will be burnt. The discovery of the qualities of plaster of Paris was made as follows: Mr. Fitzgerald, a very intelligent mechanic of this city, whom we know very well, was engaged in making plaster images, and frequently washed his hands in a tin pan. The bottom of the pan soon became encrusted over with plaster, and one day when it was set on the fire to heat the water, it was found that the water could not be heated in it. The discovery led to the knowledge that plaster of Paris was a suitable non-conductor for iron safes, thousands of which are made every year.

TOBACCO.—"The habitual use of tobacco was never calculated for health or substantial comfort, or to prolong life. It destroys all these. Notwithstanding the slow and insidious manner in which it poisons the vitals and undermines the constitution, it is yet seen that it occasions, every where, a frightful waste of life. In the United States, intelligent physicians have estimated that 20,000 die every year, from the use of tobacco; and in Germany, where the streets, as well as the houses, are literally befogged with tobacco smoke, the physicians have calculated that, of all the deaths which occur between the ages of 1 and 35, *one-half* originate in the waste of the constitution by smoking! Such opinions as these from men who ought to know, should startle all the world, and bring chewers and smokers to their senses, in regard to the powers of this Indian weed, and the effects of habits which have been inclined, hitherto, to [illegible]

We take the following [illegible] Era and Argus, published at Honolulu:

SPECIAL NOTICES.

☞ **Great State Fair.**—We call attention to the Programme of the Great State Fair, to come off at the Musical Hall, in San Francisco. The List of Prizes will be found to be the largest, most comprehensive and complete ever offered in the United States. It is important that a wide circulation should be given to the plan of this Fair, that all may have an opportunity to enjoy its privileges, and that the greatest possible good may result to the whole State.

We trust the Press throughout the State will give their best influence to its promotion, and keep their readers continually advised relative to it—it is a duty they owe to this great interest. This is a Public Industrial Exhibition: the proud display of the products and genius of this country, and its success will be the beginning of greater exertions for future years. It is no private enterprize, for it is the State Society's Fair. The Prizes are the award of the State, and should serve as a stimulus to the citizens to do what they can to build up the Agricultural interests and to awaken a lively regard to this basis of her prosperity.

We speak for the State and by its authority, being but her agent, we plead for her best weal. We therefore urge upon every citizen to lend a helping hand to this great enterprize, and the greatest and most glorious results will be accomplished.

WARREN, Corresponding Secretary, C. S. A. S.

N.B.—The Programme to which we allude above will be issued in an *Extra*, which will follow immediately, and we solicit for it prompt attention.

☞ **The Post Says—**

Death is another life. We how our heads,
At going out, we think, and enter straight
Another golden chamber of the king's,
Larger than this we leave, and lovelier.

Nevertheless, most people dread death, and will catch at every remedy for the tortures that rack the mortal body and hurry its dissolution. Dr. Guysott's Improved Extract of Yellow Dock and Sarsaparilla, is pre-eminently the safest and most reliable medicine for restoring the human system to life and vigor.

This Sarsaparilla contains more of the pure Honduras Sarsaparilla than any other preparation that now exists—which is chemically combined with the Extract of Yellow Dock and the Extract of Wild Cherry, thus making the remedy more thoroughly ancient than any other Sarsaparilla before the public.

Scrofula has baffled the skill of the most eminent physicians in this country and in Europe. But there is an antidote for this disease in Dr. Guysott's Extracts of Yellow Dock and Sarsaparilla, which is proving itself a specific in the most severe cases of Scrofula. Purchasers will please be careful to ask for, and take none other but Dr. Guysott's Improved Extract of Yellow Dock and Sarsaparilla. All others in comparison are worthless.

For sale at all the principal Drug Stores in the State. PARK & WHITE, Sole Agents, to whom all orders must be addressed. Office No. 94 Merchant street, third door above Montgomery. 7

☞ **Notice.**—Persons wishing business cards very widely circulated throughout the State, can have that opportunity by sending them to this office, and they will go out in the *Extra Premium sheet of many thousands, during the present week.* Send your cards early, to secure their place.

MARRIED.

On the 10th August, in Sacramento, H. W. Harkness, M. D., and Miss Amelia Griswold, all of that city.

On the 14th August, in Sacramento, by Rev. J. A. Benton, Mr. Stillman Jette, of the former place, and Miss Susan Curran, of San Francisco.

On the 12th August, in this city, by Rt. Rev. Dr. Kip, Mr. E. Seyd and Miss M. A. Crittendon.

On the 6th August, at Fix & Co.'s Saw Mill, by H. A. Curtiss, Esq., Mr. Henry Ferrell and Miss Augeline Densmore, all of Shasta county.

DIED.

On the 11th August, in this city, of erysipelas, Wm. Wilder, only child of W. Buss and Anna E. Wood, aged 16 days.

On the 8th August, at his residence, Laguna Seco, Dr. George H. Bull, formerly of Troy, N. Y., aged 36 years.

On the 8th August, at Auburn, Placer county, Isaac C. Copeland, in the 27th year of his age, formerly from Taunton, Mass.

On the 13th August, in this city, Kate, infant daughter of J. F. and Kate Hutton, aged 1 month.

On the 7th August, at Adamsville, Stanislaus county, Mr. G. Work, from New York.

Book Bindery,

No. 78 Merchant street, below, Adams & Co.

THE undersigned beg to inform the citizens of California that they are prepared to execute all orders for Book Binding of every description, and in every style. Also, Blank Books made to order, of superior paper, and ruled to any desired pattern. We are Practical Binders, and feel confident of giving perfect satisfaction in *style* and *price*.

BALDWIN & EMERSON, San Francisco.

N.B.—Orders from the Country promptly executed. 7

Lad Wanted.

WE want an Active LAD to attend to the office duties. One of good address and good education only need apply. Apply at our office only at 5 P. M. 7

Watches and Jewelry.

WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,

139 Montgomery street, two doors south of Clay.

N.B.—Watches of all descriptions repaired by skilful and experienced workmen. 4 tf

North Point Dock Warehouses,

Corner of Sansome and Lombard sts.

THE subscribers will make cash advances on goods stored in the above Warehouses, in sums to suit.

To Farmers and Produce Dealers, they offer the advantage of the saving of Cartage and Waste—vessels being enabled to discharge alongside the store.

MARKET REPORTS.

San Francisco, August 16, 1854.

THERE is but little use to note prices of heavy articles, for the sales are made as the circumstances of the case demand. Agricultural Implements and Hardware are in quantities in this market for two years supply. The crops of Grain will be gathered well, will yield well, and we do hope will pay well.

Artesian Well Boring.

WE would respectfully inform the public that we are fully prepared to take contracts in the above operations in a manner to guarantee satisfaction or no charge will be made.

SMITH & VAN DYNE having associated themselves with an old and experienced operator from the East, who challenges the world to compete with him in all the branches connected with the above business, are fully confident to guarantee success in all contracts that we may undertake, and warrant the work for one year. We have also implements for boring through stone to any depth, and all work done on the most reasonable terms.

For the satisfaction of those wanting anything in the above line, we would refer to I. C. Woods, of Adams & Co.'s Express; J. W. Ostund, Napa City; Rufus S. Eells, of Haworth & Eells; Mott & Sullivan, New Custom House; Wight & Co., 137 Jackson street, &c., &c.

We can do work cheaper than any other operators, for two reasons:

1st. Because we are prepared to work on a most extensive scale.

2d. Because we understand all branches connected with the above business, and are, therefore, able to work with certainty.

All orders left at the What Cheer House will be promptly attended to. SMITH & VAN DYNE, Contractors.

N. B.—We also refer to Warren & Son, publishers of the "California Farmer," who have seen and known the character of the work done. 7

ADAMS & CO.'S

CALIFORNIA AND ATLANTIC EXPRESS.

OUR Atlantic States Express will leave San Francisco on the 1st and 15th of each month, by the Pacific Mail Steamship Company's Steamers, and the Treasure crosses the Isthmus under the charge of a strong guard. The Treasure forwarded by us to the Philadelphia Mint, is always deposited there previous to that sent by any other conveyance. Our rates are lower than those offered by any other House, with the same security.

We also forward Treasure on the 1st and 15th of every month To England, by the P. M. S. S. Co.'s steamers to Panama, and from Aspinwall by the West India Mail steamers.

We draw Bills of Exchange on any of our Houses in the following places:

Boston, New York, Philadelphia, Baltimore, Washington, St. Louis, Cincinnati, Pittsburg, Louisville, New Orleans, London, &c., &c.,

Also, payable at any of the following Banks:

Mechanics' and Farmers' Bank ..... Albany.
Alex. Mitchell, Fire and Marine Insurance Co. ..... Milwaukie.
Commercial Branch Bank of State of Ohio ..... Cleveland.
Utica City Bank ..... Utica. | Bank of Syracuse ..... Syracuse.
Bank of Auburn ..... Auburn. | Bank of Attica ..... Buffalo.
Rochester City Bk ..... Rochester. | Geo. Smith & Co. ..... Chicago.
Michigan State Bk ..... Detroit. | Clinton Bank ..... Columbus, O.

☞ In the Northern Mines we run Express, in our own name, always accompanied by faithful Messengers, to and from the following places:

San Francisco, Sacramento, Marysville, Benicia, Grass Valley, Nevada, Colomia, Placerville, or Mormon Islands, Georgetown, Hangtown, Salmon Falls, Greenwood, Shasta City, Auburn, &c., &c.

And every other part of El Dorado, Placer and Shasta counties. Through Langton & Bro.'s Yuba Express, to and from the following places in Yuba, Sierra and Nevada counties:

Long Bar, Deer Creek Crossing, Park's Bar,
Sicard's Bar, Bridgeport, S. Yuba, French Corral,
Kanaka Bar, Sweetland's, Boston Bar,
Union Bar, Hoyat's Diggings, Hunt's Ranch,
Rose's Bar, Cherokee Corral, Barton's Bar,
Foster's Bar, Hess' Crossing, N. Yuba, Wombow's Bar,
Winslow's Bar, Slate Range, Slate Range.
Oak Valley, Junction House, Nevada House.
Indian Valley, Frenchmun's Bar, Empire Ranch,
Sleighville, Bullard's Bar, Downieville,
Cox's Bar, Minnesota Diggings, Kanaka Creek,
Goodyear's Bar, and Emery's Crossing, Middle Yuba.

Sacramento and Stockton,

via Benicia in the Southern Mines, we run an Express in our own name, always accompanied by faithful Messengers, to and from San Francisco, Stockton, Sonora, Mokelumne Hill, Columbia, Mariposa, &c., by Brown's Express, from Stockton to all the Camps in the Southern Mines.

Our Bills of Exchange

can be procured at, and Treasure forwarded to us for shipment, from any of the above places. In all of the above places we have *Brick Vaults and Iron Safes* for the security of Treasure entrusted to us, and on board of steamboats on any of the above routes, we have *Iron Safes* for the security of all valuable packages transported by us.

Insurance.—We have made arrangements for insurance to the extent of *One Million Dollars*, on any one shipment, and are empowered to insure for other parties on Gold Dust, Bars, Coin and Merchandise to and from New York and this city, by endorsements on Bills of Lading, at the time of shipment.

7 ADAMS & CO.

BURGOYNE & CO.,

BANKERS, corner of Montgomery and Washington streets, San Francisco. Exchange for sale at Sight or Time, in sums to suit purchasers, on—

Baring Bros. & Co. ..... London.
Rothschild & Co. ..... Paris.
Wm. Hoge & Co. ..... New York.
Phœnix Bank ..... do
J. E. Thayer & Bro. ..... Boston.
Horner Bean & Co. ..... New Orleans.
L. A. Benoist & Co. ..... St. Louis.
Chubb Brothers ..... Washington.

Gold Dust and Bullion purchased. Collections made and Funds remitted at the lowest rates.

6 RAYE & HANKS.

A Valuable Farming and Stock Ranch for Sale,

SITUATED in the County of Monterey, about one mile from the Mission of San Juan Bautista. Said Ranch consists of about one hundred and fifty acres of valuable farming land, running back to the hills, which are covered with clover and oats. The Ranch and hills are heavily timbered. There is also a stream of never failing mountain water, running through the entire place. Either for Agricultural purposes or for Stock Raising, this is certainly one of the best situations south of San Francisco.

A good title will be given, it being Government land.—Price $2,000.

P. S.—The improvements upon said Ranch consists of a tolerable good Dwelling House, with lumber sufficient to erect a large one; also about twenty-five acres enclosed under a good fence. Address, ALEXANDER COOPER.

San Juan Bautista, Cal.

ART UNION.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!

SOON TO OPEN AT

DUNCAN'S

CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have an equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *rerte* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!

TO THE

Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Cashmere, **VASES** Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Geneva,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!

CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and **Silver Work** and **Music Boxes**;
Statuettes, Clocks and **Bronzes**,
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the renowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A Series of Original Drawings, twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of similar Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful; that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST, BY PURCHASE, in the entire collection, and constituting a membership, with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When the sale is completed by the disposal of all the Shares*, the property will await the order of the Shareholders, through the fair and impartial decision of a committee chosen by themselves. The Number of Shares will be in the proportion of Sixteen to each Article in the Catalogue.

The satisfaction heretofore rendered by our house in all its transactions—its long standing and reputation, are guarantees of the faithful discharge of the trust and prompt delivery of every article specified. The same course that has gained us this position will be strictly adhered to, that no dissatisfaction can possibly occur.

CERTIFICATES OF SHARES

ARE NOW READY, AT

ONE DOLLAR EACH!

☞ Several articles of the Superb Collection have been just received, and are now for examination.

HOTELS.

Valley Hotel, Suisun.

Fourteen Miles from Benicia

THE undersigned, in opening his new hotel, takes pleasure in announcing to his friends and the public, that at his place they will meet with the best accommodations the country affords, and he solicits their patronage.

5 THOS. S. FINCHLEY, Proprietor.

Rassette House.

SAN FRANCISCO,.....CAL.

THIS HOTEL offers inducements to persons visiting San Francisco, unequalled by any on the Pacific Coast.

Gentlemen can be accommodated with single rooms, or families with suites of rooms.

The House is entirely new, built of brick; all the rooms are furnished in a style of comfort hitherto unknown in the Hotels of California, and the House is capable of accommodating over five hundred boarders. 22 3m

St. Charles Hotel,

CORNER OF DAVIS AND WASHINGTON STREETS,

San Francisco, California.

J. HARPER AND J. L. MERRITT.....Proprietors.

THE undersigned take pleasure in announcing to the travelling public that they have completed the above spacious Hotel, and are now prepared to receive their guests. The great improvements and conveniences for travellers in the house warrant them in hoping that they will receive a liberal patronage. They have rooms capable of accommodating three hundred lodgers. The table will always be supplied with the best the market affords, and the prices for board will be as reasonable as the times will admit.

Its close proximity to the steamboat landings renders this house very desirable for transient visiters, as also for people arriving in the State and those leaving for the older States.

☞ There will be a Night Watchman, and guests can procure rooms at all hours of the night.

24 HARPER & MERRITT, Proprietors.

American Hotel,

NAPA CITY,.....CALIFORNIA.

L. A. & W. W. CHAPMAN, Proprietors.

GOOD accommodations for families, and on reasonable terms. Saddle and buggy Horses kept for hire. Horses kept on board, by the day or week, and well taken care of. [26

Murray's Fifty-cent Western House.

Corner of Second and D streets,.....MARYSVILLE.

THIS HOUSE is entirely devoted to the wants of the travelling public and to all who will favor us with a call, entire satisfaction will be given. [17] R. J. MURRAY.

Union Hotel.

THE undersigned informs the public that he has purchased from Isaac M. Hull, Esq., the entire fixtures and appurtenances connected with the well known UNION HOTEL, situated on the Plaza, in this city.

Extensive repairs and alterations will be made, and the house fitted in a style equal in all respects to a first class European Hotel.

The BAR will be *par excellence*, and the patronage of his old friends is respectfully solicited. (25) T. K. BATTELLE.

International Hotel.

JACKSON STREET, (between Montgomery and Kearny,)

San Francisco, California.

PECK & FISHER,.....Proprietors.

THE undersigned take pleasure in announcing to their old friends and the public generally, that they have leased for a term of years the above five-story brick fire-proof Hotel, furnished it in the most substantial, chaste and elegant style, and it is now open for the inspection of and patronage of the public.

Their House, situated in the vicinity of the steamboat landings, and near to the business portions of the city, is convenient for the business community; and being located on elevated ground, just aside from the dusty thoroughfares, is also a desirable home for families and gentlemen of leisure.

The INTERNATIONAL is conducted on the European plan of lodgings, with meals a separate charge, in a Refectory in the basement, and also a Ladies' Ordinary on the ninth floor.

E. S. PECK, (25) HENRY FISHER.

Lake House.

C. L. WHITE,.....PROPRIETOR.

THE Proprietor announces to the public, that he has completed the erection of a large Hotel Building, at the old stand by the Lake of Como, (nnt Claude Melnotte's,) which has been thoroughly finished, and is furnished in the most splendid style, with elegant and costly furniture, where he will be happy to see his former patrons and the public generally.

The Culinary Department is under the charge of the most experienced caterers, and his table will be covered with the luxuries and delicacies of the seasons. A fine Bar Room is attached to the House. There are also Billiard Tables and Ten Pin Alleys connected with it.

For the accomodation of parties, fine boats will be kept in readiness at all times, for excursions on the Lake,—and to prevent accidents, they will be under the especial charge of an "OLD SALT."

An excellent road has been opened from the Lake House to the sea beach, affording a most delightful drive.

The distance from the city to the Lake House is but eight miles, affording a pleasant drive of an hour.

New Line of Coaches.

The undersigned have established a line of Concord Coaches to run between the city of San Francisco and the Lake House. The hours of departure are as follows:

Leaving Wilson's Exchange at 10 A. M. and 5 P. M.
" Lake House at 7 A. M. and 3 P. M.
Stopping at all the Hotels on the road.

☞ Families called for in any part of the city.

25 LINESS AND CLARK.

ATWILL & CO.

[illegible] prices.
24

NOW.

[The following lines from Household Words, are full of wholesome advice as well as beautiful imagery. They convey to the youthful *dreamer*, a lesson which it would be well for him to ponder:]

Arise! for the day is passing
While you lie dreaming on;
Your brothers are cased in armor,
And forth to the light are gone;
Your place in the ranks awaits you;
Each man has a part to play;
The past and the future nothing
In the face of the stern to-day.

Arise from your dreams of the future—
Of gaining a hard fought field,
Of storming the airy fortress,
Of bidding the giant yield;
Your future has deeds of glory,
Of honor; (God grant it may!)
But your arm will never be stronger,
Or needed as now—to-day.

Arise! If the past detain you,
Her sunshines and storms forget,
No chains so unworthy to hold you
As those of a vain regret;
Sad or bright she is lifeless ever;
Cast her phantom arms away,
Not look back, save to learn the lesson
Of a noble strife to-day.

Arise! for the hour is passing;
The sound that you dimly hear,
Is your enemy marching to battle!
Rise! rise! for the foe is near!
Stay not to brighten your weapons,
Or the hour will strike at last,
And from dreams of a coming battle,
You will waken, and find it past.

A New Mode of Book-keeping.—"Who was it bought the handsome saddle, John?" enquired a saddle and harness maker in Philadelphia, some time ago, of his foreman, upon coming into the shop and finding a very handsome new saddle had disappeared.

"Indeed, I cannot tell who it was; and, the worst of it is, it has not been paid for. I was very busy this morning, when a gentleman came in, priced it, told me to charge it to his account, threw it into his vehicle, and drove off before I could ascertain his name. I am sure, however, he is one of our customers, for he has frequently bought articles before."

"That's rather a puzzling case, really," said the boss, scratching his head, "and some mode must be devised to find out the purchaser and get the pay for the saddle. Aye, I have it; John, charge every one of our customers, who have accounts open, with the saddle; those who didn't get it, will of course refuse to pay, and in that way we shall reach the right one."

John did as he was ordered. Two or three weeks after the July bills had been sent out, the foreman was interrogated as to whether he had succeeded in finding out the purchaser.

"It is impossible to say, sir," he answered; "*for about thirty have already paid for it without saying a word.*"

Boiled Ice.—In some hot countries, to which Yankee ice is sent, it is considered as a great luxury. An African journal relates that a gentleman who had purchased some lumps of it, sent it to his cook, with orders to have it sent up for dinner. The cook was at a loss what to do with it. But as he had a pot of boiling water over the fire, he dropped the ice into it. At the dinner-table, the master said, when the dessert was ready, "Now, fetch on the ice." "All gone, massa." "Gone! where is it gone to?" "Why, massa, me put into the pot to boil, and when me look for it, it wasn't there." The poor fellow had a bottle thrown at his head for his blunder.

Dear Darling.—A young and pretty girl stepped into a shop, where a spruce young man, who had long been enamored but dared not to speak, stood behind the counter selling dry goods. In order to remain as long as possible, she cheapened every thing; as last she said, "I believe you think I am cheating you."

"Oh, no," said the youngster, "to me you are always *fair*."

"Well," whispered the lady, blushing as she laid an emphasis on the word, "I would not stay so long bargaining, if you were not so *dear*."

The great law of nature is, "eat and be eaten." The spawn-eater swallows the worm, the shark swallows the spawn-eater; the hawk pounces on the chicken—the eagle on the hawk—the sportsman on the eagle; rogues feed on honest men, pettifoggers on rogues, and the devil on pettifoggers. Queer arrangement this; but who will say that this is not all for the best? Let us turn over and reflect.—*N. Y. Times.*

Sporting Pun.—On the Duke of York's "Moses" winning a match at Ascot, his Royal Highness was observed to look very thoughtful. A spectator asked his companion what he (the royal sportman) could be pondering on.

"Why, you know," replied he, "that the Duke is a Bishop, and he is doubtless thinking of Moses and the Profits!"

A Hint.—When you rub the knobs of your doors, use a piece of paste-board as large as your two hands, with a small hole large enough to encircle the knob in the centre and a slit in the paper to let it in. This slipped on, will keep off all soil from the paint, and is a nice way of doing it.

"Tommy, how 's all your folks?" "All well but Growler—he's got the bow-wow-el complaint."

Industrious.—The lady who "knit her brows," has commenced a pair of socks.

AGRICULTURAL, &c.

Valuable Plants.

FOR THE GARDEN, Nursery, Green-house and Pleasure Grounds. Carriage paid to Boston. B. M. WASHINGTON STEAM MILLS.

WASHINGTON FLOUR MILLS.

THE undersigned proprietor of the Washington Flouring Mills take pleasure in offering to families and the trade, Superior Family Flour. To our Mills, we are happy to say to our friends, was awarded the Silver Medal; and we shall be always striving to maintain for it a high reputation, so that our customers can send to us in confidence, believing they will receive the highest character of Flour the market affords.

In the same establishment we have extensive STEAM SAW MILLS, capable of performing every kind of work that may be desired, and to this branch of our business we invite the attention of the public. We have also STEAM PLANING MILLS, that will finish all kinds of work in the most workman-like manner, and equal to anything performed in the country, and in the most prompt manner to order.

We invite all who are contracting work, to call on us and examine our Mills, and we can satisfy them of our ability to supply every order in each branch of our extensive establishment.

D. W. VANCOURT, Proprietor.
3 Near the Oriental.

POLLEY & CO.,

OF THE BAY STATE MILLS, would announce that for the better accommodation of their numerous customers and trade in general, that they have opened a branch of their business at the Fire Proof Store No. 49 K street, between Second and Third, where they will always keep on hand a large stock of California FLOUR; also, Haxall and Golden.

Public attention is particularly directed to the "Bay State Lower Mills' Brand," an article we have every confidence in warranting, being made under our own inspection, from new Wheat, without any admixture.

Ground feed of all kinds always on hand.

Every exertion will be used to merit a continuance of the favor heretofore so liberally extended to us. 1-tf

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof

MATERIALS FOR SALE!

THE subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as "Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tight*, so as to prevent warping. The most desirable pitch for the roofing is from *half an inch to an inch*, to a foot.

All letters of inquiry, or orders for materials, must be directed to the subscriber.

THE CALIFORNIA FARMER

The Journal of Useful Sciences.

EXTRA.

SAN FRANCISCO, THURSDAY, AUGUST 17, 1854.

GRAND AGRICULTURAL and HORTICULTURAL FAIR,

OF THE

CALIFORNIA STATE AGRICULTURAL SOCIETY.

The Government of the California State Agricultural Society invite the co-operation of all the Cultivators of the Soil, to an *Agricultural, Horticultural and Industrial Fair*, to be held in the City of San Francisco, commencing on the Fourth of October, and continuing Four Days. The Fair will be held in Musical Hall, Bush street, near Montgomery.

It is the desire of the Society to render all the aid in their power. They will receive, classify, arrange, and label all the various contributions. This will be done free of cost to contributors.

With an earnest will that the Exhibition should draw the finest productions of the State. Prizes amounting to Five Thousand Dollars for the best Farms, Gardens, Stock, specimens of Grain, Fruit, Flowers, Manufactures, Works of Art, &c., that shall be exhibited at the Fair, will be bestowed as enumerated in the List of Prizes annexed.

The Society are happy to state that the Steam Navigation Company have most liberally offered to convey to and from the Fair, all Stock and Articles intended for exhibition, *free of cost* to contributors. This instance of liberality deserves a just appreciation.

Prizes will be awarded by Committees who are disinterested, and who will be selected for the occasion.

That the Fair may be indeed worthy the noble Science of Agriculture, and of this great and influential State, we invoke the hearty co-operation of its friends, far and near.

The Hall will be ready to receive contributions on the 2d of October. Specimens not liable to decay, had better be sent as early as that day.

The Society will be very grateful to any and all who may possess Paintings or Statuary, appropriate to adorn the Hall during the Fair.

Works of Art will be received and duly noticed, and whenever very rare, suitable prizes will be awarded.

To encourage Home Industry, we take pleasure in announcing as follows.

PREMIUMS OFFERED BY THE California State Agricultural Society, 1854.

The following section from the Act of Incorporation, by the Legislature, is the basis for the premiums announced below:

"Sec. 8. There is hereby appropriated from any money in the Treasury not otherwise appropriated, the sum of Five Thousand Dollars annually, for the space of four years, to be paid in September each year, to the Treasurer of said Society, on a requisition on the Treasurer of this State, signed by the President and Recording Secretary of said Society, which sum shall be used only for the purpose of paying premiums, and for no other purpose whatsoever.

No premium will be awarded to any competitor, who does not strictly comply with the following rules and regulations:—

Competitors for premiums on Farms, Vineyards, Orchards, Nurseries and Gardens, must make application to the President, or Corresponding Secretary of the Society, before the first day of September; for the purpose of having them visited and examined by the Committee, at such time or times as they may deem best.

No premiums will be given for manufactured articles not produced in California, but the society will receive any such articles and place them on exhibition.

CATTLE SHOW.

The Cattle Show will be held near San Francisco, (the particular ground will soon be announced,) and will take place on the third day of the Agricultural Fair.

Competors for premiums on animals must deliver a list of those intended for exhibition to the committee, on or before the first day of the Fair.

Stock must be on the ground on or before 10 A. M., on the 5th when proper places will be assigned them, and on the day of the Cattle Show must remain in their places from 10 A. M to 4 P. M.

Discretionary premiums, not exceeding $ —— in amounts, may be awarded by the Society on articles or animals which they shall deem highly meritorious, although they may not be named in the list of premiums.

Each Committee is authorized to recommend special premiums upon objects that properly belong to the class assigned to them.

The managers of the Society will be present during the Fair to give directions to all who may wish to enter animals or any articles for premium or exhibition, and forage will be furnished gratis for all animals entered for premiums.

The Society earnestly desire to be informed, at the earliest possible moment, how far the different Farmers in the State can co-operate in this undertaking, and what specimens they intend to exhibit—so that suitable provision may be made for their contributions.

All communications upon the subject, will be promptly responded to, and all information cheerfully rendered.

The announcement of the awards, together with appropriate exercises, will take place on the last day of the Fair.

☞ Address the President, or Corresponding Secretary, San Francisco.

F. W. MACONDRAY, *President.*
E. L. Bearn, Alameda County,
J. K. Rose, San Francisco Co.,
D. W. C. Thompson, Sonoma Co..
H. C. Malone, Santa Clara Co.,
W. N. Thompson, San Francisco Co.,
C. J. Hutchinson, Sacramento Co.,
J. W. Osborn, Napa Co.,
Vice Presidents.
C. V. Gillespie, *Recording Secretary.*
J. L. L. F. Warren, *Corresponding Secretary.*
David Chambers, of Page, Bacon&Co., *Treasurer.*

California State Agricultural Society.

ENROLL YOUR NAMES.

Certificates of Membership are now ready, and it is important that all who desire to unite with the Society, should forward the amount of subscription and receive their *Certificates.*

The following sections from the Act of Incorporation, are annexed, and will be a guide for action:

Sec. 5. For the purpose of carrying into effect this act, F. W. Macondray, of San Francisco county, is hereby appointed President of this Society; E. L. Beard, of Alameda county; J. K. Rose, of San Francisco county; D W. C. Thompson, of Sonoma county; H. C. Malone, of Santa Clara county; W. N. Thompson, of San Francisco county; C. I. Hutchinson, of Sacramento county; and J. W. Osborne, of Napa county, Vice Presidents; J. L. L. F. Warren, of San Francisco county, Corresponding Secretary; C. V. Gillespie, of San Francisco county, Recording Secretary; Judge David Chambers, of San Francisco county, Treasurer; who shall call the first meeting of the Society at the city of San Francisco; and who are hereby authorized to solicit and receive subscriptions to said Society, as hereinafter specified.

Sec. 6. The members of this Society shall be composed of such persons as shall pay the sum of Ten dollars to the Treasurer, annually, and such persons shall be members only for the year for which they shall have thus paid the amount aforesaid.

It is to be hoped that citizens of all interets will feel a desire to unite with this Society, and thus aid to make it efficient for good.

☞ **Great State Fair.**—We call attention to the Programme of the Great State Fair, to come off at the Musical Hall, in San Francisco. The List of Prizes will be found to be the largest, most comprehensive and complete ever offered in the United States. It is important that a wide circulation should be given to the plan of this Fair, that all may have an opportunity to enjoy its privileges, and that the greatest possible good may result to the whole State.

We trust the Press throughout the State will give their best influence to its promotion, and keep their readers continually advised relative to it—it is a duty they owe to this great interest. This is a Public Industrial Exhibition: the proud display of the products and genius of this country, and its success will be the beginning of greater exertions for future years. It is no private enterprize, for it is the State Society's Fair. The Prizes are the award of the State, and should serve as a stimulus to the citizens to do what they can to build up the Agricultural interests and to awaken a lively regard to this basis of her prosperity.

We speak for the State and by its authority, being but her agent, we plead for her best weal. We therefore urge upon every citizen to lend a helping hand to this great enterprize, and the greatest and most glorious results will be accomplished.

WARREN, Corresponding Secretary, C. S. A. S.

Dr. C. F. Winslow's Letters from the Mountains.

Mountain Passes.....Indian Caves.....Geological, Mineral, and Agricultural Treasures of California.

Sonora, August 6, 1854.

Dear Sir: As I promised you a hasty account of my wanderings in the Interior, I will embrace a few moments of leisure, though much fatigued, to jot down a few observations and enjoyments connected with my journey.

Our party is composed of four gentlemen of diversified accomplishments and tastes — some scientific, and all eminently displaying the most cheerful urbanities of social life. My worthy friend Col. Pardee, so highly endowed by nature and cultivation with the choicest qualities of head and heart; Wm. P. Blake, Esq., U. S. geologist—a close and careful observer of the mineralogical and geognostical features of the earth, wherever he wanders; and your humble servant, a mere amateur of nature's works — placed ourselves, by invitation, under the care of Mr. Alderman Fisher, of Stockton, a gentleman as full of the milk of human kindness, as he is of enterprise and usefulness. Jim and Bib, two of his most gallant steeds, were harnessed to a comfortable buggy, and with him at the reins, we were invited to take our own time, ride or rest, look at the fields, mountains or stars, break rocks, scale cliffs and explore caverns, just as our tastes and inclinations might dictate. Thus equipped with the best of outfits in men and beasts, we have commenced a jaunt, which from its enjoyments thus far, augurs a rich store of solid pleasure in the future, which few travelers can boast of.

That portion of our journey from San Francisco to Stockton, performed by steamboat, partly by day and more by night, afforded nothing specially worthy of observation. The wind almost always blows stifily across the Bay. The hills at this season are always yellow and sear with dry wild oats, and the landscape, however varied with ridge and vale, or clothed with redwood and oaks, though attractive to the eye, imparts a dullness to the mind which would probably not exist if the same landscape was beautified with the dwellings of a permanent, thrifty and happy agricultural population. But so it is at present, parched, dull, unoccupied, and only stimulating the mind to silent musings and contemplations on the past, present and future of this remarkable State. Benicia and Martinez, small and slowly improving towns, were passed before dark, and night came upon us as we entered Suisun Bay and cut off a monotonous but strangely interesting view of the extensive delta covered with bull rushes, through which the Sacramento, San Joaquin and its sloughs, wind their way to the interior cities. It is strange how an incident of this kind will afford food for contemplation, and transporting the mind to remote ages, inadvertently bring into comparison the two most interesting epochs in the history of civilization. Fading away in the duskiness of night were vast tracts of tule, corresponding with the bull-rushes growing on the deltas and banks of the Nile. Here they are of no account, science and invention having effected wonderful revolutions in the arts; but in Egypt in ancient days they were gathered and prepared with unusual care, for they constituted the papyrus on which the sacred and public writings of the priests and kings were preserved and transmitted from age to age. And not only were the tule lands of the valley of the Nile serviceable for literary purposes, but they furnished the most prolific soil for the cultivation of the grain, which furnished not only the land of Egypt, but the bordering tribes of Asia with bread. With such fancies as these, tracing Egypt through her decline, and this new commonwealth through the unfoldings of its infancy, we glided along till all material objects, and at last thought itself faded into complete night and forgetfulness.

Morning brought us to Stockton—a city so much improved in some respects within a twelvemonth as to be very comfortable for wayfarers, to say the least, and Bib and Jim, with aching necks and flowing manes, were as fresh and bright as the morning, and waiting to receive the friends of their master and to display for our comfort the fullest extent of their "*horse*-pitality." How the glorious mornings and the genial heat of the valleys and mountains contrast with the dull, gloomy, cold, foggy and changeable airs of San Francisco and the coast! It is a luxury to escape from clouds, fogs and winds, and breathe balmy breezes and look into the bosom of the deep blue sky by day, and let the soul, by night, mingle with ten thousand brilliant spheres and the pale emanations of the milky-way. So we think and so we journey, admiring the note of each new bird, watching the timid and frisky motions of countless squirrels, charmed with the orchard-like growth of bright, green oaks which stud the arid lawn in all directions, and conversing freely about all we see and all we think of, without reserve.

The distance from Stockton to Knight's Ferry of the Stanislaus, is about forty miles. At this season the road is good but dusty, and it passes over a district of country apparently level for about twenty-five miles, and then enters a section continuously more hilly, till we reach the Stanislaus. The level region is composed of the finest alluvion, extending many feet deep, here and there interrupted only by very small pebbles, constituting a layer from one to three inches thick, as far as I could judge by inspecting wells along the road. The water furnished by these wells is not very good, containing much terrginous and saline matter, and it will be only when artesian bores are sunk to the foundation rock of the valleys, or below thick beds of clay, that pure and crystal water will be obtained. As a means of irrigating the arid plains at this season of the year, their existance will be invaluable, and their permanent flow will serve as a constant solvent to the silicates, phosphates and other nutrient qualities of the soil, and will increase the productions of agriculture an hundred fold. For many miles the road winds among scattered oaks—at a little distance looking like large apple trees—until suddenly they disappear, and the view between the sparse forest and the foot hills of the Sierra Nevada becomes uninterrupted. Constant radiation of heat and vapor renders distant aspects of landscape somewhat obscure, and a mellowness is imparted to everything remote, as agreeable to the eye as the appearances are peculiar in character. This section of country is almost wholly uninhabited, and but few fences or dwellings denote enterprize or population. Journeying on, at last we reach the hilly district, which becomes interesting on two accounts. A new array of oaks clothe the more distant and loftier range of hills, resembling in many places a large park laid out with order and taste; and long level summits or rounded isolated mounds stretch away to the South as far as the eye can reach, on the sides of which the stratification of the sedimentary deposits of former seas are so clearly defined that prominent lines expose a parallelism of strata from hill to hill, until distance cuts off a view as interesting to the geologist as it is unique and wonderful on the face of the earth. On reaching Knight's Ferry these curious and remarkable aspects of landscape attain their greatest degree of prominence and interest. A precipitous cliff a hundred feet high faces the river on the valley side, presenting layer above layer of large rolled stones, smaller pebbles, coarse and fine sands, and at last impalpably fine detritus, each layer from one to two feet thick, and one superimposed on the other, till the uppermost is crowned with ocean drift and fine gold. Below this lofty and broad area of sedimentary accumulations appears, conspicuous and wild, a blackened mass of basaltic rock and besicular lava, presenting, on close inspection, the walls and warm outpourings of an ancient volcano. In a chasm through this, a hundred feet wide, with perpendicular sides fifty feet deep, flows the rapid current of the Stanislaus. Such are the geological features of this district of the San Joaquin valley; but the philosophical considerations growing out of these data are far more interesting. I have not time to enter into details about these things: suffice it to say that wherever volcanic eruptions took place in very remote epochs in this region, none have taken place since the deposits of the tertiary beds, and it is absolutely certain that no *violent* earthquakes have supervened *since* the ocean retired from the Sierra Nevada, for these strata remain as horizontal as in the day of their deposit; and though fresh water seas may have washed over them, or rivers cut into their level, dividing them into isolated and widely separated hills, still their strata are coincident and their parallelism has never been disturbed.

On we went, leaving Knight's Ferry and traveling over a road more dusty and hilly, rocky and uncomfortable all the way to Sonora. First along we trundled over and wound our way among lava and basaltic boulders, which indicated great subterranean disturbance previous to the tertiary epoch. The outbreak of this molten rock was no doubt simultaneous with that at Knight's Ferry, and through a fissure in the earth's crust, extending some miles in length. But those events transpired beneath the ocean, and the surface was as quiet and cold as the grave long before the detritus accumulated over it, which for many scores of feet has since been removed, by periodical rains and the floods of the Sierra Nevada. Notwithstanding the rocks and dust, the ride is delightful; for a thousand objects attract the eye, charm or enrich the mind, and furnish conversation of the most instructive kind. Through all this region beyond the Stanislaus, flat slabs of rock project above the soil, more or less numerous in certain localities. They resemble worn grave stones, pitched about by the heavings of a frozen and thawing soil. And sure enough the geologist may read on their rough surfaces the records of life, death and decay—not the life, death and decay of the human race, but of the forces by which our planet was formed and its surface fitted for marine life long before God called a living creature or form into being.

The landscape through this section of country is diversified and delightful. Little cultivation is observable any where, and little else than public houses and cargo-teams remind one of civilization; but the hills grow bold and the valleys deep and broad, and all are clothed thickly with dry herbs, and dotted here and there with verdant oaks.

At last we reach the mining regions, and the dearth of human beings on the route is transformed into a busy and free and easy multitude, toiling hard for their bread, and for the support of mothers, wives and little ones, far away from their lonesome tents and cabins. No community can show such numbers of athletic, well-formed and intelligent young men as toil amid these hills. Their hands are here, and their hearts elsewhere. Home is a talisman that softens the hardest labor, and I wonder not that misfortune and ill luck embitter the sensibilities of some, and with others make life undesirable. But men of true courage and lofty aims only encounter obstacles, to become the truer and the greater by resolutely and triumphantly surmounting them. Reflections of this sort are not altogether out of place here, for they are part and parcel of our journeying, and as we ride along they often steal across the mind, whether we indulge them or no.

The mining localities which we pass through or see at a distance, are very numerous; and running water, dry creeks, costly flumes, up-torn earth and stones, deep pits, long trenches and well-skinned gullies, all denote the labor and industry expended in search for gold. But they are too numerous to specify in detail. Indeed the whole surface of these sections of the mountain range contains more or less gold. The rocks were disintegrated by the wearing of the ancient oceans, and while some deposits are of extreme antiquity, and very profound beneath lofty accumulations of drift now rounded off into hills by meteoric causes, others are comparatively recent, and mingled only with the common diluvium, and even with the surface soil. I see no reason to apprehend the immediate exhaustion of gold. But human invention and industry, with the accumulating millions of population to this region of the continent, must ultimately diminish very greatly these resources of precious metal. This, however, is not the place for speculations, and as your readers must by this time be tired, as well as myself, they will be as glad that I have reached the end of my letter, as I am that we have reached Sonora, to refresh ourselves for other and new observations.

Respectfully, yours, &c.,
C. F. Winslow.

The letters will be continued in the succeeding numbers of the Farmer.

Horse Breaking for the Harness.—Before the horse is attached to any vehilce, the harness should be allowed to remain on him in the stable several hours during two or three days; he should be led out so that he may become thoroughly acquainted to the trappings, and a cord of six or seven feet in length should be fastened to each trace. With this the horse is quietly led about, one man performing that duty, while another follows, holding the aforesaid cords, which, as the animal moves forward, are to be strained so that he feels a slight pressure of the collar upon his shoulders. The intention of this treatment must be obvious; if the horse is alarmed by the effect of the collar, the man holding the cords which are affixed to the traces, can instantly relax them; and again, when he finds his pupil is reconciled, he may renew a moderate strain, and finally as much resistance as he has power to create. By this means the most timid horse will gain confidence, and by perseverance, the most refractory may be overcome. A horse when first encumbered with harness, if immediately attached to a vehicle, is astonished when required to move, to find a pressure on his shoulders that he has never before experienced. He discovers another novel apparatus for confinement; he is, in fact, trammeled, and endeavors to escape; probably he plunges, kicks or rears and becomes difficult to manage, but by the simple process just recommended, all this is obviated.—*Hints on Training.*

How the Salamander Safe was Discovered. It is well known that iron safes are now made with a chamber between the inside and the outside filled with plaster of Paris. This is an effectual non-conductor of heat, and if the safe is made so strong as not to break when falling in a burning building, there is little danger that its contents will be burnt. The discovery of the qualities of plaster of Paris was made as follows: Mr. Fitzgerald, a very intelligent mechanic of this city, whom we know very well, was engaged in making plaster images, and frequently washed his hands in a tin pan. The bottom of the pan soon became encrusted over with plaster, and one day when it was set on the fire to heat the water, it was found that the water could not be heated in it. The discovery led to the knowledge that plaster of Paris was a suitable non-conductor for iron safes, thousands of which are made every year.

SAN FRANCISCO, THURSDAY, AUGUST 17, 1854.

The Press.

The quicker intelligence is communicated of matters of moment, the more widely knowledge is diffused. The more stimulus that is given to develope and aid the industrial interests of a country, the more rapid is its advancement and the more certain its prosperity. The Press is the *great lever* for the diffusing of that kind of knowledge which most rapidly awakens the interests of a country. Agricultural and Mechanical industry is the basis of the wealth, and the best guaranty of the permanency of California.

If the Press will but give these interests a tithe of what they demand, devote a portion of their columns weekly to the coming Exhibition, and do what they can to create and keep alive but a just regard to its merits, not a word they utter or a sentence they shall pen, but will be a rich investment, returning more than compound interest; for rich and prosperous Agricultural States, are always the best sustainers of the Press.

We trust, nay, we feel assured, that the Press of California will unitedly give the State Agricultural Society a liberal share of their kind attention and thought.

Savings' Bank.

The history of banking, the rise and progress of this "money power," with all its influence over the world, powerful as it has been, has never yet been fully revealed in its *best feature*, or felt under its *best influences*. The United States Bank, the Bank of England, the Rothschilds, Lafitte the Banker, Hottinguer & Co., and other powerful public and private money kings, have all been more or less affected by political as well as pecuniary interests; and when the former prevails, the latter must suffer. In all such cases the innocent are made to feel the sad effects of mismanagement.

There is now a better and brighter feature in banking—when the political is entirely separated, and the pecuniary interest alone is regarded. We mean the most excellent plan of Savings' Banks. Although they have been established for many years, and their value enjoyed to a great degree, yet their full power has never been understood, nor their value rightly comprehended. The cities of the east have enjoyed them for years, quietly, and without excitement. The "Suffolk Institution," for savings at Boston, is among the oldest institutions of the kind, and has done a large and successful business. Millions of dollars have laid in the vaults, and millions have accumulated as the interest to be paid out to the hardy and industrious citizens. The amount that has been deposited as savings, and now invested in Boston, is carefully estimated at twenty millions of dollars, and the amount in New York at twenty-five millions. There are now very many institutions of the kind in every city of our Union.

The establishment of the "five-cent" bank of Savings at Boston, exciting a curiosity at first, has now become firmly established, and thousands and tens of thousands lie in the vaults from these little beginnings.

If economy and savings are required in the old States, surely they are more demanded in California; and we rejoice to know that the value of these institutions are now beginning to be better understood and more fully appreciated. California has now a countless store of wealth—hoarded, locked up, buried—idle millions, that should be in active circulation; and it is for the want of a knowledge of the conditions of banks and banking, and the fear that many feel against our private banks, that so much of the capital lays inactive. This ought not to be, for we have as strong and solvent Houses as any in the United States.

The banking houses of Page, Bacon & Co.; Adams & Co.; Wells, Fargo & Co.; Burgoyne & Co.; Drexel, Sather & Church; Davidson & Co.; and others, are houses beyond question—but they have capital enough, and therefore do not offer those inducements that are required to give increase to the earnings of the laboring classes.

It is the same want here, a Deposit for Savings, where *increase shall be added to safety.* We are pleased to know that there is such an institution founded in California, and we feel gratified, after a careful inquiry, that we can direct our Farmers and Mechanics to a place where they can feel that their earnings would be secure, and that they can also enjoy a fair interest for their money.

Robinson & Co's Savings' Bank, corner of Clay and Montgomery streets, San Francisco, is an institution that has been founded for years; possessing an ample capital, it now enjoys a high reputation. The proprietor is a permanent resident, his family and all his interest located and established here, and possesses the fullest confidence of the city and State. To such an institution we can look with pleasure and satisfaction, and can cheerfully commend it to all.

The amount of *real available capital* at this moment, even amid all the depression upon trade, is *millions;* and with all the drawbacks upon Agriculture now, wealth and capital will soon spring from this mighty interest, that shall overleap all other interests and over-size all other piles; and this capital wants a place of deposit where it may be safe and drawing a moderate rate of interest, and such is found in the Savings' bank of Robinson & Co.

Smith's Pomological Gardens.

Early Rising....Doing Good....Pleasant Ride....Beautiful Flowers....Fine Fruit....Luxurious Repast....Satisfaction.

When we were at our "pet city" of Sacramento, last week, meeting our friend Smith and actuated by a desire to throw a little sunlight into a political editor's sanctum, we took our friend into our neighbor of the Journal, and absolutely prevailed upon him to rise early the next morning, and, forsaking the town, eschewing all politics, go out into the country and breathe God's fresh air, and see the beautiful flowers that were scattering their fragrant breath around, to realize that the "whole earth was full of his glory."

We know how hard this early rising is for an editor, but we felt that if we could accomplish it; we could persuade our contemporary to see the sun rise, take a pleasant ride, &c, we should be "doing good." Our friend Smith, with his usual liberality, provided conveyance and the thing was done. Taking our pony we crossed the valley next morning and met our friends at Smith's gardens, as per agreement. And now, readers, don't you think we were doing good. If any one will only read the Sacramento State Journal the morning of their description of *that* excursion, they will see how the rough corners were clipped off and the sharp edges shaved down from their *political horizon.* Oh, it is a good thing to take such men and show them the "better way." Go friends, and get the State Journal of August 10, and read the fact that once in that city they were revelling in a flower garden, forgeting the strife of politics.

It was a delightful day—an early ride gave a fresh zest to the enjoyment, and we were early on the ground. The broad acres of these fine grounds are well managed, every portion being well and judiciously cultivated, and giving assurance to the proprietor of a just reward for his years of labor. Mr. Smith has in his grounds all the best varieties of approved Agricultural market products, such as, asparagus, rhubard, artichoke, horse-raddish, and every species of annual crops. In these gardens may be found fine ornamental trees, the locust, ash, ailanthus, chesnut, &c. The fruit orchards will comprize about twelve acres, and being familiar with every variety of fruits, we hesitate not to say that in these gardens will be found as choice a collection of pears, peaches, grapes and figs, as in any garden in the Sacramento Valley. Mr. Smith has been very successful in his nursary operations. He is also fortunate in having an excellent nursery gardener—Mr. Michael Doherty—and we are pleased to note his success in budding, this being one of the evidences of a good gardener.

The Peach Orchard was a gratifying sight; nearly every tree was in bearing, and only two years planted. The grasshoppers had done some injury, eaten clean to the stone and taken the foliage. The crop of the Peach Orchard will be a pretty income.

The Pear Trees are young, yet remarkably thrifty. We notice many that had grown the present year from the *bud*, four and five feet, strong and healthy.

The Grapes were in full bearing, and many fine clusters of the Golden Chasselas and Black Hamburg, reminded us of our own gardens and graperies in New England.

Some Fig Trees, also, we noticed, and a few Orango and Shaddock.

"There's a good time coming," and we hope to live to see a just and full appreciation of God's munificence from those who have enjoyed his bounty. After a general view of the ground outside we descended the banks of the river, and there, beneath the broad oaks and shrubbery upon the bed of the river, about forty feet below the high water of last winter, we found a splendid collection of roses, and other green-house plants; this was an admirable place for plants during the hot months, and worth a "plum" to friend S. for this purpose. The neat conservatory contained a fine collection of many plants, no where else to be found in the county. Here we find Mr. Thos. O'Brien, who has charge of the Green-house and Floral department, and whose industry and good taste ensure success in each branch of Flora's home.

We next examined the elegant, costly and complete Engine and apparatus, for irrigating the gardens. Mr. Smith having gone East the past year, he examined the various inventions for the purposes of irrigation, and selected the one now used on his grounds. "Worthington's Safety Steam Pump and Fire Engine;" the power and capacity of this small but powerful engine, is truly astounding, for while it is not more than 10 or 12 feet in length and 2 to 3 feet wide, it is capable of throwing *twenty thousand gallons per hour* easily; it is one of the most perfect and neatly finished pieces of machinery we have seen. Pipes are led from the reservoir over a large portion of the grounds, the water flowing so free as to completely saturate the whole; the soil of this garden being a fine sandy alluvial, the result is of the highest possible good. Mr. S. being able to continue planting all the year round. The cost of this machinery, complete, in New York, was $1,200; freight, extras, putting up, pipes and layers, &c., brought the amount to about $3,000. We saw the working of every part of the machinery, and found it the *ne plus ultra.* Mr. S. has never been miserly in his outlays, but dealt with a liberal hand in all his improvements. Such men should be sustained; they deserve prosperity.

Mr. Smith's grounds are located finely, near the American River, with a fine row of large shade trees, that in a little time will, with the new ones planted, form a beautiful avenue from his entrance-gate around his entire grounds, and thus give the citizens of Sacramento the finest drive for miles around.

Having fully viewed, though we have briefly sketched the outside, we were shown into the—the——; now friend Smith, don't be angry if we speak the truth—we entered the Batchelor's Saloon—and although there was every comfort around us, and everything to tempt the appetite, we could not but think how lonely such a place must be, even with those beautiful flowers and that luscious fruit. "It is not good for man to be alone." But we had to forgive, and Mr. S. was ready as a liberal host. We sat down to a repast fit for a "Board of Aldermen;" after an abundance of good things, enough to satisfy any appetite, we were tempted by large dishes of rich and luscious peaches full equal to "Jersey frees," grapes, and other luxuries. And these things in Sacramento, '54—the city of fires and floods. The varieties of peach were "Crawford's Early Melacaton," and "George IV." We saw upon the trees "Old Mixon Cling," and "Mixon Free," the "President," and "Crawford's late Melacaton;" these are the best varieties grown, and worthy a place in every garden.

At this repast we could not but notice the peculiar kind of *wonderment* of our neighbors of the Journal—like a cat in a strange garret. They did venture to eat peaches and cream—real peaches, grown in California—and we could not help looking at them occasionally and seeing the workings of this to them mystery—the *contrast* from a close application in a political sanctum to a fifty-acre garden of fruit and flowers, and the first time our friends had ventured so far. This is one reason the cause of Agriculture is so lagging—ordinarily public journals know nothing of these subjects, and if a plain statement of facts go forth, unless they *know* it to be so, they call it *sham.* We hope the *truth* they have imbibed now, will awaken them to a sense of the obligation resting upon them, and call them into action on this great interest, which at this moment demands the most earnest attention.

We suppose if we had been of the true political stamp we should have been remembered in the glowing thoughts at the time; but we are glad our friends have awoke to the reality. We shall expect now that the Journal is aware of the reality of the Agriculture of its own neighborhood, to be electrified upon the "Agriculture of Sacramento county."

We spent the hours most happily, and bade adieu to our friends—our appetite satisfied, our mind gratified, our heart grateful, our pockets and parcel full, and our thoughts full of good wishes to our generous host. The only doubt upon our mind to disturb us, we hope to see removed; if our neighbors of the Journal, after this, *don't do their duty*, we will take them again and, *choke them with strawberries and cream.*

We shall close, by giving the statement of the crop of two Peach Trees, and the amount received the present season, in cash. After paying commission to those who sold in the city, the net proceeds amounted to *Three hundred and twenty-six dollars and fifty cents;* in addition, Mr. S. has used and contributed among his friends sufficient to have swelled the amount to over *Four hundred dollars.* The world cannot produce a parallel case. We would invite all who love beautiful things, to visit "Smith's Pomological Gardens," at Sacramento. If you are in pursuit of fruit trees, ornamental trees, plants, shrubs, vines, etc., you will find them there; and no one will ever regret a visit to this place. Mr. Smith is ever ready, with courtesy and attentions, to make a visit agreeable; and we most sincerely rejoice to know that he will surely be successful in his enterprise.

Page, Bacon & Co.

Envy, with her wily tongue,
Loves to do a neighbor wrong.

That rumor which was started against this old and firmly established Banking House, and called *idle* rumor, should be ascribed to the right source. Envy has more to do with such things than vanity—and it is well known that birds of prey do not often pick at small and worthless fruit; they strive to pluck the fruit that is fairest, and that which grows upon the loftiest branches—and thus with *envy.*

That station or excellence which the envious cannot reach or attain, they assail, and thus we believe originated the base report—it appears to some, idle, for its aim was a covert one—but the motive was envy. Interested persons call such reports idle, because they know they are false; but the crowd when called into action, are the workmen of the vindictive slanderer. It was by a similar subterfuge that the report was spread relative to the able House of Adams & Co. It is such houses that "envious birds" would assail, but there is a glorious pleasure in knowing that though

"Envy's a coal that comes hissing hot from hell,"

it has failed it its venomous efforts here, in these two cases; and now the fruit is fair, its good qualities have been tested: men have tried it, and are satisfied with it. We wish to call things by their right names. What envy would, but cannot do, is *evil,*—not *idle.*

Treadwell & Co.—The house of the Messrs. Treadwell & Co., of San Francisco, is an extensive, wealthy and well established house, and we take pleasure in giving assurance to Agriculturists that they will present this season to the community, the most extensive stock of new and improved implements of Agriculture, at their large warehouse at San Francisco, at wholesale and retail, that can be found in the country. Their large capital and extended business influence will fully enable them to do this, and their house in Marysville will be complete in all kinds of implements, seeds, tools, &c., thus offering to up-river trade every facility needed. With Mr. Treadwell, the senior partner of San Francisco, and Mr. Lord the partner at Marysville—gentlemen whose business habits are a guaranty of [illegible]—we may look for an assurance that the patrons of the house will find their orders promptly attended. We refer to the card of Messrs. Treadwell & Co., in another column.

Courtesies.—We received a [illegible] of New Mexico. Messrs. Atwood & Co., for whom we have engaged [illegible] who will [illegible] and [illegible] Atwood & Co. [illegible] carved in a [illegible] effect.

THE CALIFORNIA FARMER,
AND JOURNAL OF USEFUL SCIENCES,
PUBLISHED EVERY THURSDAY MORNING.
BY WARREN & SON.
Office in Musical Hall Building, Bush street.
TERMS.—Eight dollars per annum, in advance; or delivered by carrier at one dollar per month. For a club of five new subscribers, we will send a sixth copy gratis.
A limited number of Advertisements inserted at fair rates.

The California Farmer,

With State Fair Reports, Description of Articles, &c.

THE "CALIFORNIA FARMER" is now firmly established, and we trust acceptably in every county of our State. It has a circulation in many of the old States, and in Europe; it is daily increasing, and daily receiving marks of favor. Its advertising columns we believe to be the *very best in the State*, and those who desire to make known their business widely, can have no means *so certain* as by the CALIFORNIA FARMER.

The present issue will be near three thousand five hundred copies—and during the months of September and October, we have every reason to believe that our circulation shall reach upwards of *five thousand.*

Now is the time to subscribe for the "FARMER;" its issues will contain all the particulars of the "*Great State Fair*," all the *Reports, Addresses, Correspondence, Descriptions in full, &c.*, of all articles exhibited at the Fair—and everything that will be matters of moment to people of other portions of the Union.

By subscribing now, the Volume can be secured from No. 1 of Vol. 2, and will be a most valuable record of the Agriculture of California.

Woolfskill Ranch.

WE have enjoyed a very pleasant trip to this place, and were highly gratified with our visit. John Wolfskill, Esq., established his ranch early as a "Stock Ranch," in company with his brother (now of Los Angeles.) This was in 1843. It was not until 1851, that the orchard was commenced, and then a few thousand grapes only were planted, a few fig trees, and a few pears (of native kind) were added; and each year thereafter, new additions were made, and they are promising finely.

At the present time the grounds are quite extensive, the vineyard comprises about three thousand vines in fruit, samples of which were cut for us that we might test their flavor; they give good promise of a crop, though not so large as the last year. The grapes were only partially ripe, here and there only were the full purple clusters.

Another younger vineyard of some three thousand, had been much injured by the grasshopper, which had been very destructive.

The peach trees were very heavily loaded with fruit, but only of the native kind. Pear trees were large and vigorous, well grown, and many of them quite full of fruit; the pears very large at the present time, and would weigh half a pound each — the Bartlett variety prevailing; several fine trees, well loaded with native fruit of good size. Some very fine apricot trees, which had borne well, but the fruit had passed. The fig trees were of remarkable size, planted in '51; they had attained the height of 20 feet and near a foot in diameter; only one variety were fruiting well, the purple of the lower country. A large collection of young fruit trees of various kinds, in nursery rows. Orange trees—the Shaddock and the Chinese Chesnut, were growing thriftily, and the whole grounds were under very excellent cultivation.

We noticed a fine Engine upon the banks of the creek, of some ten-horse power, used in connection with the rotary pump, in raising water for the purpose of irrigation; and we took especial note of the plan, the labor required, and the effect upon the ground, the trees, etc., etc. Where the ground is a light sandy alluvial deposit, the simple conveying the water will answer; but where the soil is of a clayey texture, or a rich mould, it must be cultivated shortly after, or it will bake, and the result is injurious. Irrigation requires cultivation; and we had rather have a deep and generous cultivation, without water other than what nature has in the earth, than a free supply of water upon the surface, and the ground left afterwards to bake in the sun. *Will cultivators note this.* Irrigation is of vast importance to our State, but the science must be understood. The best plan, and we think the most economical, is *Artesian wells;* and if friend Woolfskill and others, on these beautiful prairies, will try this plan, they will accomplish a great good.

The crop of grapes from the "Wolfskill Ranch" will be in Sacramento market, in about two weeks; and peaches will soon follow, with pears and figs. Mr. W. has accomplished much, and deserves great credit for the attention, labor and skill displayed. All the best portions of the work, the budding, pruning, planting, and forming trees and nursery plans, are the work of his own hands, and are well done. The only objection of importance we could make, would be the *pruning up trees;* they should be headed low, in this country: this shields the ground around the tree, and the trees resists the wind with safety.

We should have been glad to have accepted the kind and courteous invitation of the proprietor to tarry over night, enjoy his hospitalities, and to have rode over his grounds—seen his fine stock, and grain, etc., but we were obliged to defer this. For his kind attentions, we were very grateful; were delighted with our visit, and trust a full and prosperous harvest will amply reward the proprietor for his faithful labors.

AMERICAN TALENT—MRS. ROBB.—It is something to know that amid the excitement that is raised, and the desire to follow after stars of foreign skies, there are those who appreciate our own native talent. Mrs. Robb has ever deserved success not only for her talent and skill in ballad singing, but for the dignity and excellence of character maintained in all her course before the public; and it has been more gratifying to know that she has always been adding to the number of her friends as well as to the wealth of character, which is a mark of greater success than a flowing house or full purse, and the loss of all else. At the concerts recently given by this lady at San Jose she was greeted by an appreciating audience, and her singing gave so much satisfaction that she has been called on to repeat them. Mrs. Robb is expected soon to visit other portions of our State, and we trust American hearts will appreciate native talent.

LETTERS FROM DR. WINSLOW.—Our readers are presented with a theme to-day, from our talented and accomplished correspondent and friend, that will be to them a rich repast. We feel assured that if the eye but catches the subject, the mind will not be contented till every sentence has been laid away in memory.

We can say to our readers, that it will be our aim to offer them, from time to time, various subjects from the ablest pens; and they can always be assured of a rich return for the time given in perusing the sketches that flows from the able pen of Dr. C. F. Winslow.

JOSEPH M. BROWN & Co.,
95 *Sacramento* and 81 *Battery streets, San Francisco.*
IMPORTERS AND DEALERS IN
Hardware, Mining and Agricultral Implements.
Brown's, Ames' and Rust's Shovels; Tuttle's Sluice Rakes;
Collins' heavy and light Picks; Ploughs of all kinds;
Fan Mills, Straw Cutters; Builder's Hardware, in great variety;
Carpenter's Tools of every description.
We invite the trade to call and examine this extensive stock.
At the sign of the Golden Anvil.
8 JOSEPH M. BROWN & CO.

Golden Gate Nursery,
Corner of Folsom and Fourth streets, San Francisco.
OFFICE—NO. 170 WASHINGTON STREET.
THE attention of the public is requested to a large collection of the following Plants, now for sale at this Establishment, embracing the most extensive assortment in the State; among which may be found—
Camelia Japonicas, in seventy varieties;
Perpetual blooming Roses, of all the classes;
Moss and climbing Roses, do do;
Fuschias, a choice collection; Heliotropes, in variety;
Rose and Lemon Geraniums;
Lemon-scented Verbenas, Flowering do, Arhutilluma, Azaleas, Orleandera, Passifloras, Honeysuckles, Carnations, Dahlias, Bulbous Roots, &c., &c.; and a general collection of Greenhouse plants and ornamental shrubbery.
Catalogues for 1855 will be ready on the 1st of December, and will be forwarded on application.
Orders for any part of the State, will be promptly attended to, on application to *D. Nelson*, No. 170 Washington street—or to the proprietor. (7-3m) W. C. WALKER.

Watches and Jewelry.
WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.
We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,
139 Montgomery street, two doors south of Clay.
N.B.—Watches of all descriptions repaired by skillful and experienced workmen. 4 tf

Jewelry and Silverware.
OUR immense stock of WATCHES, JEWELRY, DIAMONDS and SILVER WARE, has been imported by ourselves, for a Regular Customer Trade, and is of the mostly costly and superior description, but owing to the depressed state of the market at present, we are disposing of them at New York prices.
BARRETT & SHERWOOD,
City Observatory, 135 Montgomery street.
N.B.—Quartz Jewelry of our own manufacture, at greatly reduced prices. 5

SAVINGS BANK,
Corner of Clay and Montgomery streets, San Francisco.
[ESTABLISHED FEBRUARY, 1851].
Interest, one and one-half per cent. per month.
THE establishment of this Institution, three years and a half ago, was upon the plan and operations of similar Institutions in Europe and the Atlantic States, regulating the rates of interest by the value of money in this country.
DEPOSITS draw interest at the rate of one and a-half per cent. per month, as per "Rules and Regulations" to be had at the Bank. Special agreement for money deposited for a specific or particular time. Deposits with Interest payable on demand.
☞ Exchange on all the Atlantic Cities. Gold Dust bought at market rates. Usual Banking facilities afforded, and deposits received from merchants and other business men.
7 ROBINSON & CO.

SPECIMEN GRAINS!
DESIROUS to advance the knowledge of our California Crops to the various Horticultural and Agricultural Societies of the various States and Europe, we invite all who are willing to aid us in this matter to forward us specimens of Grains and Grasses, of any and all kinds. Such shall be forwarded carefully, with credit to the growers. The names of the growers, and place where grown, will always accompany the packages.

New Planing Machines.
THE undersigned having purchased the exclusive right for the State of California, to use and vend Norcross' Patent Planing Machines, would respectfully call the attention of parties engaged in the manufacture of lumber to the operation of the above machine. To those acquainted with the machine it is deemed unnecessary to urge anything in its favor; but to others I would state that to this machine was awarded the Gold Medal for the best Rotary Cutter Planing Machine, after a trial of three weeks in competition with two of the best Woodworth Machines, at the Fair of the American Institute, New York; and also from the Massachusetts Charitable Mechanic Association at Boston. It is highly recommended by the most eminent mechanical experts in the United States, and parties having used the machine, as can be shown by affidavits and certificates in my possession.
To set aside all doubts which may arise in the minds of the public relative to "infringment," it is only necessary to quote the closing paragraph from the final decision of the Supreme Court of the United States, delivered by Justice Catron:
"Therefore, The defendent, Norcross, has made a new and independent invention, and does not use the arrangement or mode of combination of the plaintiff, and hence it is not an infringement."
Machines, together with rights for counties, towns, or single machines, for sale at the Washington Mills, Market street, San Francisco, where the above machine may be seen in operation, and all necessary information obtained relative to the same.
7 D. W. VAN COURT, Proprietor.

Artesian Well Boring.
WE would respectfully inform the public that we are fully prepared to take contracts in the above operations in a manner to guarantee satisfaction or no charge will be made.
SMITH & VAN DYNE having associated themselves with an old and experienced operator from the East, who challenges the world to compete with him in all the branches connected with the above business, are fully confident to guarantee success in all contracts that we may undertake, and warrant the work for one year. We have also implements for boring through stone to any depth, and all work done on the most reasonable terms.
For the satisfaction of those wanting anything in the above line, we would refer to I. C. Woods, of Adams & Co.'s Express; J. W. O born, Napa City; Rufus S. Eells, of Haworth & Eells: M. A. Sullivan, New Custom House; Wight & Co., 137 Jackson street, &c., &c.
We can do work cheaper than any other operators, for two reasons:
1st. Because we are prepared to work on a most extensive scale.
2d. Because we understand all branches connected with the above business, and are, therefore, able to work with certainty.
All orders left at the What Cheer House will be promptly attended to. SMITH & VAN DYNE, Contractors.
N. B.—We also refer to Warren & Son, publishers of the "California Farmer," who have seen and known the character of the work done. 7

Silver and Silver Plated Ware.
THE subscribers invite attention to their large and general assortment of Silver and Silver Plated Ware, consisting of
Tea Sets, Cups,
Waiters, Cake Baskets,
Pitchers, Oastorn,
Salvers, Spoons,
Gobleta, Forks, &c.
Those goods are all of the best quality, imported expressly for our own trade, and are offered at reasonable prices.
G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

Hardware at Wholesale.
THE subscriber offers at wholesale prices, AN ENTIRE STOCK OF SHELF HARDWARE,
Also, cut nails, chains, shovels, picks, anvils, bellows, vices, horse nails and farrier tools;
Every variety of files, hammers, sledges and axes;
A large assortment of table and pocket cutlery;
Guns, rifles, pistols, caps, flasks, pouches, shot, &c.;
Colt's revolvers always on hand in any quantity.
SAFES—S. C. Herring's make—on hand and finished to order.
BEADS—The largest assortment in California.
E. FITZGERALD & CO.,
Hardware Dealers, No. 100 Battery street,
23 tf San Francisco.

WASHINGTON STEAM MILLS.
WASHINGTON FLOUR MILLS.
THE undersigned proprietor of the Washington Flouring Mills take pleasure in offering to families and the trade, Superior Family Flour. To our Mills, we are happy to say to our friends, was awarded the Silver Medal; and we shall be always striving to maintain for it a high reputation, so that our customers can send to us in confidence, believing they will receive the highest character of Flour the market affords.
In the same establishment we have extensive STEAM SAW MILLS, capable of performing every kind of work that may be desired, and to this branch of our business we invite the attention of the public. We have also STEAM PLANING MILLS, that will finish all kinds of work in the most workmanlike manner, and equal to anything performed in the country, and in the most prompt manner to order.
We invite all who are contracting work, to call on us and examine our Mills, and we can satisfy them of our ability to supply every order in each branch of our extensive establishment.
D. W. VANCOURT, Proprietor.
3 Near the Oriental.

POLLEY & CO.,
OF THE BAY STATE MILLS, would announce that for the better accommodation of their numerous customers and trade in general, that they have opened a branch of their business at the Fire Proof Store, No. 49 K street, between Second and Third, where they will always keep on hand a large stock of California FLOUR; also, Haxall and Gallego.
Public attention is particularly directed to the "BAY STATE LOWER MILLS' BRAND," an article we have every confidence in warranting, being made under our own inspection, from new Wheat, without any adulteration.
Ground feed of all kinds always on hand.
Every exertion will be used to merit a continuance of the favor heretofore so liberally extended to us. 1-tf

Roofs! Roofs!! Roofs!!!
Cheap, Substantial and Durable! Fire and Water Proof
MATERIALS FOR SALE!
THE subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as
"Warren's Fire and Water Proof Composition Roofing."
It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.
The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.
In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tightly*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.
All letters of inquiry, or orders for materials, must be directed to the subscriber. J. H. PURKITT,

16 between Front and 2d, Sacramento city.

BATES' UPERIOR
UPLAND BELL CRANBERRY.
THE PROPRIETOR has been induced to present this Circular to the public on account of the numerous applications from distinguished Horticulturists, Amateurs, Land Agents and others, in different parts of the Union, personally and by letter, wishing information in regard to cultivating this valuable fruit upon ordinary upland, and would respectfully invite the attention of Gardeners and Fruit Growers, to such facts only as have come directly under our own experience and observation.
Soil, Propagation, Management, &c.—Having tested the plants thoroughly in all kinds of soils, we have no particular choice in their selection. We know of no kind of soil in which they would not be likely to grow well if managed according to our method. We should not choose a perfect clay soil, extremely liable to bake, nor a perfect sand, containing no power of vegetation.
In extensive field culture, the Bell Cranberry flourishes well in soils varying from moist to dry. No great degree of moisture is necessary, providing it is more or less uniform. Any soil that the strawberry can be grown on to advantage, is well adapted to the growth of this plant, but no animal or vegetable manure should be used, as the fruit draws most of its nourishment from the atmosphere. The vines propagate by runners, like the Strawberry, and will flourish in almost any soil and ocation, under good management. Where the land is rich and liable to grass and weeds, we prepare the ground by removing the top soil at a sufficient depth to prevent their growth. This may be easily done by plowing the sod, and removing the top soil in carts or otherwise. The object in doing this is to make the soil so poor that nothing will grow to obstruct the growth of the Cranberry Plants, bearing this in mind, that I am fully satisfied, from long experience in the business, that the Cranberry derives its nourishment only from the air and moisture.
If the land is poor, so that grass and weeds will not vegetate then it may be plowed and harrowed without other preparation. If these rules are followed there is no difficulty whatever in their cultivation. Persons having a garden of moderate size, and wishing to raise their own Cranberries of a superior quality can do so by obtaining a few plants, and with a small amount of labor at the commencement, will find their cultivation both easy and profitable.
Persons wishing for Plants can have their supply of the subscriber. The Plants will be carefully packed in meadow moss, and well boxed, which will enable them to go to a great distance in a fresh state.
The proper time for Fall transplanting is October and November; for Spring, from the opening of the snow till about the 25th of May. Persons wishing for Plants, are requested to order as early as the first of September, for Fall transplanting and during the winter for Spring. 15

THE CALIFORNIA FARMER

And Journal of Useful Sciences.

VOL. 2. SAN FRANCISCO, THURSDAY, AUGUST 24, 1854. NO. 8.

GRAND AGRICULTURAL and HORTICULTURAL FAIR,

OF THE

CALIFORNIA

STATE AGRICULTURAL SOCIETY.

The Government of the California State Agricultural Society invite the co-operation of all the Cultivators of the Soil, to an *Agricultural, Horticultural and Industrial Fair*, to be held in the City of San Francisco, commencing on the Fourth of October, and continuing Four Days. The Fair will be held in Musical Hall, Bush street, near Montgomery.

It is the desire of the Society to render all the aid in their power. They will receive, classify, arrange, and label all the various contributions. This will be done free of cost to contributors.

With an earnest will that the Exhibition should draw the finest productions of the State, Prizes amounting to Five Thousand Dollars for the best Farms, Gardens, Stock, specimens of Grain, Fruit, Flowers, Manufactures, Works of Art, &c., that shall be exhibited at the Fair, will be bestowed as enumerated in the List of Prizes annexed.

The Society are happy to state that the Steam Navigation Company have most liberally offered to convey to and from the Fair, all Stock and Articles intended for exhibition, *free of cost* to contributors. This instance of liberality deserves a just appreciation.

Prizes will be awarded by Committees who are disinterested, and who will be selected for the occasion.

That the Fair may be indeed worthy the noble Science of Agriculture, and of this great and influential State, we invoke the hearty co-operation of its friends, far and near.

The Hall will be ready to receive contributions on the 2d of October. Specimens not liable to decay, had better be sent as early as that day.

The Society will be very grateful to any and all who may possess Paintings or Statuary, appropriate to adorn the Hall during the Fair.

Works of Art will be received and duly noticed, and whenever very rare, suitable prizes will be awarded.

To encourage Home Industry, we take pleasure in announcing as follows.

PREMIUMS OFFERED BY THE California State Agricultural Society, 1854.

The following section from the Act of Incorporation, by the Legislature, is the tho basis for the premiums announced below:

"Sec. 8. There is hereby appropriated from any money in the Treasury not otherwise appropriated, the sum of Five Thousand Dollars annually, for the space of four years, to be paid in September each year, to the Treasurer of said Society, on a requisition on the Treasurer of this State, signed by the President and Recording Secretary of said Society, which sum shall be used only for the purpose of paying premiums, and for no other purpose whatsoever."

No premium will be awarded to any competitor, who does not strictly comply with the following rules and regulations:—

Competitors for premiums on Farms, Vineyards, Orchards, Nurseries and Gardens, must make application to the President, or Corresponding Secretary of the Society, before the first day of September; for the purpose of having them visited and examined by the Committee, at such time or times as they may deem best.

FARMS, VINEYARDS, ORCHARDS, ETC.

meritorious, although they may not be named in the list of premiums.

Each Committee is authorized to recommend special premiums upon objects that properly belong to the class assigned to them.

The managers of the Society will be present during the Fair to give directions to all who may wish to enter animals or any articles for premium or exhibition, and forage will be furnished gratis for all animals entered for premiums.

The Society earnestly desire to be informed, at the earliest possible moment, how far the different Farmers in the State can co-operate in this undertaking, and what specimens they intend to exhibit—so that suitable provision may be made for their contributions.

All communications upon the subject, will be promptly responded to, and all information cheerfully rendered.

The announcement of the awards, together with appropriate exercises, will take place on the last day of the Fair.

Dr. C. F. Winslow's Letters from the Mountains.

THE "BIG TREE."

Washington Mammoth Grove, August 8th, 1854.

Dear Sir: At half-past three P.M. yesterday, we started from Murphy's for the Big Tree, on the stump of which I am now writing. The ride is fifteen miles long, and is one of the most varied and charming which I have ever enjoyed. At first you follow a ravine for several miles, hedged in by sloping and rounded hills, sparsely wooded with varieties of the conifera; and in the bottom of this winds a clear brook which forms the stream of the Union Water Company, for supplying the miners with water during the dry season at Murphy's Camp. Subsequently the beautiful ravine opens into a broad vale, which at last is lost in the gentle slopes and varying aspects of landscape that swell and charm the eye in all directions. A great variety of pines, oaks and other trees and shrubs add finish and endless charm to this fresh and virgin landscape. After gradually ascending for some miles by a winding and well made carriage road, you reach points where the lofty and magnificent pines open and afford prospects of distant mountain slopes and summits, covered to the uppermost ridge with such grand and magnificent coniferous forests that I will not attempt to describe them. The sun shone with heated and golden beams, and the light, softened and mellowed by the radiating vapors of the highlands, lent tints to the verdant wilderness and towering ridges which heightened the charms and magnificence of the broad and wild panorama. The road was more or less shaded all the way by pines so gigantic as to awaken in me, who had never before seen the native and lofty forest scenery of the north temperate zone, the strongest feelings of wonder and admiration. I had never before conceived of the capacity of the various species of conifera to attain such enormous dimensions. They were often six foot through, and from one hundred and thirty to three hundred feet high, and so symmetrical and perfect in form as to impress me with new and more commanding ideas respecting the force and operation of the vital principle presiding over the nourishment and growth of organized bodies. The delicate and symmetrical development of some of these towering and gigantic vegetable forms filled the mind with emotions of the beautiful, similar to those felt at beholding the most perfect models of the human form wrought from marble or delineated on canvass. There they stand against the deep blue sky, cell having been added to cell by slow processes of growth, fashioned by the breath of the Almighty, until they have attained such strength as to defy the ordinary methods of violent destruction, All along the last few miles of the road I was filled with impressions wholly new, and often involuntarily surrendered myself to the idea that I was approaching the visible and actual presence of the Great One, who realized himself to Moses on the heights of Sinai. Such sublime thoughts have rarely impressed my soul, and it is only here, in the midst of these living wonders of the mountain forests, that such conceptions have been awakened to their complete height of grandeur and awe. On the summit of these lofty mountains, amid the columns of this great temple of nature, I am compelled to bow down and acknowledge the utter nothingness of mortal man and the infinite greatness of the power that hovers around the globe and weaves a germ from the dust of the earth that shall outlast sixty human generations. But another order of reflections crowd upon the mind. What changes have transpired in the condition of people and of States since the germ shot down the root on which I record these thoughts. The golden age had not yet dawned on the Roman empire, and the ancesters of the present polished races of Great Britain, France and Germany, were naked and wandering savages in the bleak and snowy forests of northern Europe. Within this time the man of Nazareth and the prophet of Mecca have overturned the dogmas and idolatrous worship of the benighted nations of Asia and Europe, and, like the waves of the ocean, little and great kingdoms have arisen, and, melting away, mingled their elements with each other, until no trace exists of their former bounds or grandeur. How strangely interesting are all these multitudinous events when crowded by contrast into a space of time occupied by the growth and life of a single tree on these Alpine and lonely heights. If the lifetime of a single vegetable germ shall outlast and look down on all these stripes and transactions of the races of man for two thousand years; how ancient must be the earth, the parent and the stage of them all?

The height of this spot above the ocean is rather less than five thousand feet, and it is two thousand four hundred feet above Murphy's Camp. The road, gradually ascending for several miles over a varied landscape, becomes afterwards more level, or rather it undulates and winds for a long stretch among hills and vallies thickly wooded, and fit for farms, and deer parks. During the last three miles the ascent is steady and through a virgin wilderness of pines, firs, spruce, arbor vitæs and other cone bearing trees, whose magnitude perceptibly increases with the altitude of the locality. The whole surface of the hill sides is covered with herbage or plants, more or less verdant, and in spots there is a freshness to the verdure which reminds one of spring, and which contrasts strongly with the arid and dusty plains and hills of the lower sections of country. The wild raspberry, strawberry, pea and hazelnut mingle their humble or more prominent foliage with the diversified undergrowths of the forests, and here and there new and attractive flowers struck my eye so pleasingly that I was compelled at times to stop, gather, examine and admire them. The charm of these regions to the botanist would be in the freshness and luxuriance with which nature elaborates her vegetable forms. The vital principle, stimulated by the condensing vapors of the cool fresh of night, and nourished by a suitable pabulum in the decomposing soil, acts with a steady energy, and thousands of stately trees stud the hills in all directions, so lofty as to amaze the observer and to compel him when near them to strain his eyes to catch a view of their topmost offshoots. But the most amazing of all these vegetable productions is here, and nature, by peculiar geognostic arrangements, seems to have isolated them to startle and arrest the attention of mankind, and to strengthen scientific truth, teaching the special distribution of organic races. So far as known, the vegetable growth to which the name of "Big Tree" has been attached, grows in no other region of the Sierra Nevada, nor on any other mountain range of the earth. It exists here only, and all the individuals of its kind, so far as I can learn, are localised to this vicinity. They are embraced within a range of two hundred acres, and are enclosed in a basin of coarse silicious material, surrounded by a sloping ridge of sienitic rock, which in some places projects above the soil. The basin is reeking with moisture, and in the lowest places the water is standing, and some of the largest trees dip their roots into the pools or water-runs. The trees of very large dimensions number considerably more than one hundred. Mr. Blake measured one ninety-four feet in circumference at the root; the side of which had been partly burnt by contact with another tree, the head of which had fallen against it. The latter can be measured four hundred and fifty feet from its head to its root. A large portion of this fallen monster is still to be seen and examined; and by the measurement of Mr. Lapham, the proprietor of the place, it is said to be ten feet in diameter at three hundred and fifty feet from its uptorn root. In falling it had prostrated another large tree in its course, and pressed out the earth beneath itself so as to be imbedded a number of feet into the ground. Its diameter across its root, is forty feet. A man is nothing in comparison of dimensions, while walking on it or standing near its side. This to me was the greatest wonder of the forest. The tree which it prostrated in falling has been burnt hollow, and is so large, a gentleman who accompanied us from Murphy's informed us, that when he first visited the place two years ago, he rode through it on horseback for 200 feet without stooping, but at one spot as he entered at the root. We all walked many scores of feet through it, but a large piece of its side has fallen in near the head. But there are many standing whose magnitude absolutely oppress the mind with awe. In one place, three of these gigantic objects grow side by side, as if planted with special reference to their present appearance. Another so monstrous as to absolutely compel you to walk around it, and even linger, is divided at from fifty to a hundred feet from the ground into three of these straight mammoth trunks, towering over three hundred feet into the sky. There are others, whose proportions are as delicate, symmetrical, clean and straight as small spruces, that rise three hundred and fifty feet from the ground. In one spot a huge knot of some ancient prostrate giant is visible above the soil, where it fell ages ago, and the earth has accumulated so as nearly to obliterate all traces of its former existence. The wood of this tree, I am told by Mr. Lapham, is remarkable for its slow decay. When first cut down its fibre is white, but it soon becomes reddish, and long exposure makes it as dark as mahogany; it is soft and resembles in some respects pine and cedar. Its bark, however, is much unlike these trees; nearest the ground it is prodigiously thick, fibrous, and when pressed on has a peculiar feeling of elasticity. In some places it is eighteen inches thick, and resembles a mass of cocoa-nut husks thickly matted and pressed together, only the fibrous material is exceedingly fine, and altogether unlike the husk of the cocoa-nut. This bark is fissured irregularly with numerous indentations, which give it the appearance of great inequality and roughness. A hundred and fifty feet from the ground it is only about two inches thick on the living tree, which is now being stript of its bark for transportation from the country.

The cone of this tree is small and compact, and nearly regularly oval; and although the tree itself is the largest of the conifera, its fruit is as small as that of the dwarfish pines of North Carolina and Cape Cod. Its foliage is not, as a general thing, altogether agreeable to the eye, as the head of the tree is small in proportion to the size and height of the trunk. But the boughs, when examined more closely, are bright-green, rather complicated and delicate in structure, and pleasing to the mind by contrast with the rough and gigantic stem and branch from which they spring.

The name that has been applied to this tree by Prof. Lindley, an English botanist, is Wellingtonia Gigantea. By him it is declared to be so much unlike other conifera as not only to be a new species, but to require description as a new genus. Other botanists, of eminence, think differently. To this, however, he has seen fit to apply the name of an English hero, a step indicating as much personal arrogance or weakness as scientific indelicacy; for it must have been a prominent idea in the mind of that person that American Naturalists would regard with surprise and reluctance the application of a British name, however meritoriously honored, when a name so worthy of immortal honor and renown as that of Washington would strike the mind of the world as far more suitable to the most gigantic and remarkable vegetable wonder, indigenous to a country, where his name is the most distinguished ornament. As he and his generation declared themselves independent of all English rule and political dictation, so American Naturalists must in this case express their respectful dissent from all British scientific "stamp acts." If the "Big Tree" be not a Taxodium, let it be called now and forever *Taxodium Washingtonium.* If it should be properly ranked as a new genus, then let it be called to the end of time, *Washingtonia Californica.* The generic name indicates unparalleled greatness and grandeur; its specific name, the only locality in the world where it is found. No names can be more appropriate, and if it be in accordance with the views of American botanists, I trust the scientific honor of our country may be vindicated from foreign indelicacy by boldly discarding the name now applied to it, and by affixing to it that of the immortal man whose memory we all love and honor, and teach our children to adore. Before many ages shall elapse the ruthless hand of man, or climatic changes, may totally annihilate the few giants of this remarkable race, now growing on and confined to this small basin in the Sierra Nevada. Seeds indeed may be planted and means employed to prolong its existence elsewhere, but few spots of earth, perhaps none, will be so eligible for its natural and complete development as its present locality. Under any and all circumstances, however, whether of perpetuity or extinction, the name of Wellington should be discarded, and that of Washington attached to it, and transmitted to the schools of future ages.

At this place is a very excellent public house, kept by an urbane proprietor, who spared no pains to interest us and give all information in his power. The half I heard or saw, I have not noted here. The hotel is built near the "Big Tree," whose bark was stripped last year and exhibited in San Francisco. An appendage of the house is built over it, and it constitutes a hall for cotillion parties; at the root it measures ninety-six feet in circumference, and a portion of its prostrate trunk is used for a bowling alley. To overthrow it holes were bored through it with a large auger, and after the trunk was mostly separated, attempts were made to wedge and upset it. But its immense size and weight prevented the success of this undertaking, and on the fourth day it fell by the force of a strong wind. In falling, it convulsed the earth, and by its weight forced the soil from beneath it so that it lies in a great trench, and mud and stones were driven near a hundred feet high, where they have left their marks on neighboring trees.

The coolest, purest, choicest water in the world is here. I have never tasted such water in all my wanderings over the earth. The well that supplies it is sunk twenty-two feet, through coarse sienitic sand and fine angular gravel, apparently the mere unwashed detritus of the neighboring ridges of the basin, and the water stands twelve feet deep in the well.

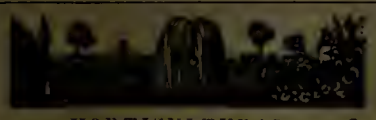
Here we spent the night; rose early and inspected the forests, and contributed a large share of blood for the maintenance of the numerous musketos that infest the luxuriant under-growths of the moist and teeming soil. The abundance of these pertinacious and venomous creatures was the only drawback to our enjoyment; but I have seen them no where else, away from the delta, and even during the night the cool temperature destroyed their activity here.

The night spent here was delightful. The moon shone with unparalleled splendor, and the atmosphere was so pure that it seemed as if the stars of heaven had quadrupled in number. I shall never forget this night, nor the first glimpses of the rising moon as her mild and pensive beams penetrated the waving foliage of two mighty giants not far from me. O glorious orb! how thou stealest the heart from strong men's breasts, and on thy lambent beams transportest it athwart a continent and layest it down in the silent chambers of the beloved! Only assure us that thou lendest it thy pencils to paint pleasant dreams on the slumbering souls of the little and the weary, and we will yield it gladly and rejoicingly to thy benign sway. As silent as is thy voice and influence, so sweetly shall that heart pass to its repose; and the images of the distant and beloved shall rise or vanish as thy beams brighten or the night grows dark.

Respectfully, yours, C. F. Winslow.

Rain in Sacramento.—We were at our "Home" in Sacramento on the morning of the 21st, and were surprised on awakening to find a cool, cloudy morning—and at 6 A. M. to find the rain falling as gently as one of our old fashioned "April showers," in New England. After the preceding hot Sunday, the change was most agreeable. The air had a most delicious freshness—the birds sang their songs anew—children awoke merrily—the lambs were seen to sport friskily, and nature robed herself with a clean blue above and a bright green beneath. O there was a freshness that made all feel happy, for the memory of such showers awoke scenes of by-gone days, and the tear-drop stood in the eye of all, like as the dew-drop upon the new opened flower.

To Remove Marks from Tables.—Hot dishes sometimes leave whitish marks on varnished tables, when set, as they should not be, carelessly upon them. To remove it, pour some lamp oil on the spot, and rub it hard with a soft cloth. Then pour on a little spirits, and rub it dry with another cloth, and the white mark will disappear, leaving the table as bright as before.



HORTICULTURAL.

Agricultural Meeting at Sacramento.

SACRAMENTO CITY, August 22d, 1854.

MESSRS. EDITORS: I herewith send you a report of the "Sacramento County Agricultural and Horticultural meeting," held in this city on Saturday last, which you will do us the favor to publish in your valuable paper. You will see by the proceedings that a Constitution and By-laws were adopted, and an organization of a County Society nearly completed. Our city papers are so full of important matters at this time, that we cannot find it in our hearts to trespass upon their columns. You are aware that the political canvass is now fully open, and to ask political journals to publish articles upon subjects as *unimportant and uninteresting as Agriculture*, to the exclusion of discussions which affect the *sacred rights of the dear people* and our glorious country, would be unkind indeed. You will therefore confer a great favor upon the Farmers of this County, by giving the proceedings of our meeting, and our Constitution and By-laws a place in the FARMER.

Your ob't serv't,

GEO. R. MOORE, Secretary.

The Sacramento Agricultural and Horticultural Society met on Saturday, August 19th, '51. pursuant to previous notice, and urganized by calling Col. SMART to the Chair, and electing GEO. R. MOORE Secretary.

The Committee appointed at the last meeting to draft a Constitution and By-laws for the government of the Society, submitted their report, which was accepted and the committee discharged.

The Constitution and By-laws were then taken up by sections, and unanimously adopted.

The meeting then adjourned to meet on Saturday, August 26th, at 2 o'clock, P. M.; at which time permanent officers will be elected.

Nursery Notices.

WE would call very particular attention to the advertisement of the Messrs. HOVEY & Co., of Boston, Mass., *Nurserymen, Seedsmen, and Florists*. It has been a pleasure to us to note the advance of Agriculture, Horticulture and Floriculture in California—it has been more than a pleasure—it has been our endeavor and study to aid onward these glorious sciences to the utmost of our ability; and now when we see the gatbered treasures of the older States—their well stocked nurseries—their best seed warehouses—their conservatories, vieing with each other to pour these treasures into Californai, we rejoice earnestly, and we say to them, gather your *richest and best*—these, and these only, are what California wants.

We are most happy to publish to-day the card of the Messrs. Hovey, of Boston—and as nurserymen, as seedsmen and florists we can most cheerfully commend them to our friends in California who desire to import from the East either seeds, trees, plants, or shrubs. They have undoubtedly one of the largest and finest stocks in the East, in every department of their business; they make their business their study; they are practical working men, and they take an honorable and just pride in excelling. We know their grounds well, and from a personal knowledge of them and of their skill and attention to business, we conscientiously say to our friends—you can rely upon this establishment for everything you wish to import.

Messrs. Hovey & Co. deserve well of the country for their zeal and perseverance in the cause of horticulture. We remember well, years and years gone by,—(before Hovey's Magazine of Horticulture was started)—the little green house and garden plat near the smoke house. We remember the brothers Hovey, and their early endeavors to excel in whatever they then produced. This was the early beginning—it was well. It was their example that stimulated others, and has called into action many a skillful cultivator; and the pages and reports of the "Massachusetts Horticultural Society" will find enrolled many a name as member of that eminent Society, and many a gem in horticulture and kindred science inscribed there, that has been stimulated and brought into action by the early efforts of the Messrs. Hovey and a visit to their gardens at Cambridgeport, Mass. Men may not always be willing to give credit when credit is due, but we ourselves remember how the exhibitions of their skill and taste aroused our own, and we are willing to give them credit for it, and know it had an influence upon us for good.

We feel it but an act of justice to speak thus, and say also that the largest and finest [illegible] trees that had ever been imported into California, came from Messrs. Hovey & Co.'s nurseries the last year and were exhibited at their warehouse on Battery street; many will remember that *pears were formed and grew upon the trees on their passage out, and we exhibited them here*. These were the finest trees we ever had from the east, and many of them will bear fruit for the Exhibition the present year.

Hovey's Magazine of Horticulture has now reached its *twentieth volume*, is justly ranked as one of the first magazines of the kind in our country, is most deservedly popular, and has arisen and been brought into action by this same enterprising firm. It is a work we also recommend to our friends, and we shall be glad to forward subscriptions to them for their magazine.

We have written more than is usually accorded to a mere notice—but this deserves more, and we are pleased to do justice to the deserving.

Sacramento County Agricultural Society.

WE publish the letter of the Secretary of this new Society, and the report of their meeting last Saturday. Were it possible, we would publish the Constitution and By-Laws also in this issue, and do it *free*. It was received one day too late for this week; but it shall be published in our extra, with other important matter. The letter of the Secretary reveals the cause of the laggish feeling in regard to the great interest of the State. The leading journals of the day are established and maintained as political journals, and it is not to be expected they could give their columns to any great extent to Agriculture, yet we do believe that they committ a fatal error in not giving it more space. Many of our journals we are happy to see, express a genuine and combined interest by their notices, &c.; but we believe their pecuniary interests would be favorably affected if they would do more. In this instance of Sacramento, we should have thought the two journals of that city would have tried to publish the Constitution and By-Laws of their own County Society, and to have devoted a liberal space to so great an interest. There are no two journals in the State more widely circulated than the "Sacramento Daily Union" and the "State Journal," and certainly do we accord the Union to be one of the ablest in the State. No paper is more ready with important news for its readers; no paper is got up in better style or furnishes better matter, or exerts a wider influence. It is for this very reason we would urge its influence in pleading for the Agricultural interest of its own county.

And the "State Journal," we have ever found it ready, and we plead for a continuance of the same, and even more interest. Sacramento county demands it, for there is much dependant upon it. Let these journals then both, see that their interest and influence is felt for the coming meeting next Saturday, 26th inst., at McNulty's Hall, and they may be assured their own interest as well as that of the County will be promoted.

THE WORLD BEATEN.—We have just received from A. P. Smith, Esq., of the "Pomological Gardens," at Sacramento, a memorandum account of the sale of Peaches from two peach trees. The fruit was gathered and carried to Sacramento and sold on commission. The net amount received by Mr. Smith was the astonishing sum of *three hundred twenty-six dollars and a-half*. The commissions paid and the fruit eaten and distributed would swell the amount to over *four hundred dollars*. We challenge the world to beat Sacramento.

SAN JOSE NURSERY.—We take great pleasure in calling attention to the card of Messrs. Prevost & Co., of San Jose. We have visited this establishment and know it is deserving of particular notice. We heartily commend it to the notice and regards of all our friends, and shall give a full and extended notice in our extra the present week.

Favors Received.

OUR kind friend D. W. Van Court, Esq., of the Washington Mills, sent us two neat bags of his "premium flour," that we might take it home; and such bread, such cakes, such flapjacks. If any one doubts the reality, and the extra qualities of that flour, just call at our office and see how fat we grow in spite of the labor we perform.

Most kindly was it for our friend H. Chauncey Beals, Esq., to send us that volume of the Rev. Dr. Scott's—"Daniel, a model for young men"—together with the Doctor's Lecture before the Mercantile Library Association. Both these gifts are valuable, and add [illegible] to the kind manner and motive which brought them to hand.

We found upon our table a [illegible] parcel from stall No. 1 Washington Market from Mrs. Weaver. How easy to do a favor when you have them before you: all [illegible] taste and smell. Here we find the luscious peach, the juicy apricot, the melting pear, strawberries and whortleberries. Just think of it, whortleberries in California. But these strawberries, the best dentifrice in the world—it needs no brush. We recommend those who wish handsome teeth to go to Mrs. Weaver, stall No. 1, and buy strawberries every day. It is not hard to use this dentfrice for the teeth and breath, and we are told it is a good lip salve also. Mrs. Weaver has all the good things. No. 1 is hard to be excelled. We were so refreshed that we could not refrain from walking to witness these good things, and saw a basket of fruit made and arranged to order; and such a basket! five kinds of apple, six kinds of pears, three kinds of peaches, strawberries, blackberries, whortleberries, raspberries, grapes, figs and limes. The very sight made the mouth water. We know it requires taste to *weave a boquet;* but by the way this basket was put together we say this lady must be the best "Weaver" in the market, and if labor and skill is of any account, then that basket must have cost two XX's and a V.

THE POTATO CROP.—We find in the Tribune, of San Jose, the following information in regard to the potato crop:

The prospect of the potato crop this year in our valley is gloomy. There have been but few planted by our farmers, and the yield is by no means encouraging. The early crop is materially injured by the worm, and the late crop has suffered much on account of the extreme dry season of this year. We have endeavored to ascertain with certainty the quantity in our county, but regret to say this article of our consumption has been neglected by our farmers. Last year every one suffered by an over product, and this year the same consequences must ensue for the want of them.

From what we can gather, the quantity in our county, that will be offered in the market, will not exceed five hundred acres, and the yield from them will be small to what it has been in years past.

In Santa Cruz, they are limited to the Pajaro district, and this renowned locality, there are but comparatively few planted compared with last year—the amount in quantity and yield not being over one-fourth.

The accounts from Alameda are, that the crop has been injured by drought, and the worm also.

Throughout the county a general complaint is made, and we venture the assertion, that this article, which enters so largely in our consumption, must necessarily be in demand this fall. There is not a sufficient yield this year to supply the demand of our growing population. They are worth now in our home market two cents a pound by the sack; and we believe that the farmer will reap a rich reward from his potato crop.

There is already much inquiry, and some offers made for the purchase of crops. We are assured that the crop is a short one, and we advise our farmers not to sacrifice their interests by selling at this time.

TWO MEN HUNG.—Amadi Canne and Peter Ancham, the one a Frenchman, and the other from Illinoia, arrested for cattle stealing, were taken at Withrell's Hotel, San Antonio, yesterday morning, 22d inst., and hung on a tree. Forty persons from the Redwoods, and several others who had lost cattle in the neighborhood, were present, and aided in the execution. Attempts were made to rescue Canne, by some Frenchman, but without success. It is said that Canne was wealthy.

LETTER FROM THE "BIG TREE," BY DR. C. F. WINSLOW.—There can be no need of a word from us to call the attention of those who have perused the previous letters of this gifted writer. They will seek them as a thirsty soul would clutch again the cup at the gushing spring. The present letter will be sought for and read with more than ordinary delight, by every one who has a gleam of the true or beautiful in their nature. Those who have not the first of these letters, can find them at our office.

CORRECTION.—We published inadvertantly as original, two old and beautiful songs—"The Sailor Boy's Grave" and "Stolen Bands." They were sent us by a lady, and being in manuscript copy were thus published as original while we were absent. Our neighbor of the San Jose Telegraph need not fear us for we never intentionally rob a [illegible] of their rights although we often see Agricultural items that we would really mark *stolen*.

IS THAT SO?—That the gold [illegible] one of the prizes in a late "grand raffle" after being drawn by one of the ticket holders, was sold before it was [illegible] to the winner!

(The above was handed us at Sacramento, by publish. We ask was it so?—Ed.

COMMERCIAL FAILURES.—We have [illegible] by last mail valuable letters from our [illegible] correspondents in the Sandwich [illegible] and Gold Mines, postponed to this [illegible] and Gold Mines.

LADIES' DEPARTMENT.

"ABSORBED day and night by the vast occupation Heaven has intrusted to me," says the Emperor of China, in a public document, "I have need of an assistant actuated by the same sprit as myself." Nin-lou-Rou, the lady he proposes to raise to this high position, is a lady of honorable extraction, who is highly esteemed in the Palace, where her exemplary character is shown by the exactness with which she performs her domestic duties—not even shrinking from washing even fine or coarse linen with her own hands. She is, therefore, to be in the imperial costume, and to be at the head of the ladies of the "six pavilions." A sensible fellow, the Emperor of China, he is.—*Exchange*.

Such is the language of the paper from which we clip, in announcing what may seem of little moment to this erudite editor. "A sensible fellow, the Emperor of China, he is." There may be more in this little event as it seems to you, than is "dreamed of in your philosophy." An Emperor can be assisted, and counselled even, in duties of high moment, by a "woman," such as is described to be the one selected by the Emperor of China—"A lady highly esteemd in the palace, where her exemplary character is shown by the exactoess with which she performs her domestic duties—not even shrinking from washing either fine or coarse linen with her own hands. We would almost believe that Solomon had instructed the Emperor, for if the wise editor who makes so light of the matter had perused the thirty-first chapter of Proverbs, he would have found a perfect description of the character such as is given of Nin-lou-Rou:

"The heart of her husband doth safely trust in her."

"She will do him good and not evil all the days of his life."

"She riseth while it is yet night and giveth meat to her household and a portion to her maidens."

"*Her* husband is known in the gates where he sitteth among the elders of the land."

"She maketh *fine linen* and selleth it—and delivereth girdles to her maidens."

"Strength and honor are her clothing, and she shall rejoice in time to come."

"She openeth her mouth with wisdom—and in her tongue is the law of kindness."

"She looketh well to the ways of her household and eateth not the bread of idleness."

"Her children rise up and call her *blessed;* her *husband* also, he *praiseth her*."

Such is the principal point which the wisest man that ever lived gave of the character of woman—virtuous woman—the fit companion of man, and such are the points of character which are ascribed to Nin-lou-Rou. It may be we have said sufficiently to lay ourselves liable of being thought in favor of "Woman's Rights." If so, we abide the charge. We do pray to live to see the day, when man shall not be too proud and lordly to be counselled and guided by the woman whose character and virtues are described by the sage of old. Better, far better would the world be, if the influence of noble and virtuous woman was felt in our midst with greater power. Political asperities would cease, sectarian strife pass away, and the discordant elements made to move harmoniously.

THE LESSON.—On a beautiful evening in spring, a father said to his wife, "Let us go out into the fields and rest on the hill, to enjoy the sight of the setting sun. It will be a lovely evening." When his two children—a boy and a girl—heard this, they said, "We will go before you, and wait for you on the hill." And with these words, they skipped on before. Soon after, the grave father and the kind mother followed them, talking of the beauties of creation and of their children—the father speaking from the treasure of his wisdom, the mother from the simplicity of her heart. When they came to the hill and ascended it, the children were there already and ran joyously towards them with a white pet lamb they had taken with them. When the sun went down in glory, the parents looked on with emotion, and the father lifted up his voice and spoke to the children of the creation of the universe of the host of the stars and of the supreme Creator of nature, who has made heaven and earth and the sea and all that there is; and how he made them look at the sun in his glory and say, "It is a wonderful work of the Most High;" for he thought in his heart, "It is now time to teach them heavenly wisdom. When the father had finished speaking the [illegible] exclaimed [illegible], "Oh, our father and dear mother, [illegible] lamb—how lovely!" Then said a [illegible] of the children, "Let us [illegible] of the last of their flocks." The father [illegible] at the request, and there was [illegible] a pure [illegible], but the mother smiled and said, "My children, the [illegible] the lamb to the sacrifice. That [illegible] you, my children, that [illegible] —Anon.

THE CALIFORNIA FARMER.

WARREN & SON, EDITORS AND PROPRIETORS.

AGENTS.

Messrs Adams & Co. at all their offices throughout the United States or Europe.
Messrs. Wells, Fargo & Co., at their offices throughout the Country.

We desire our Agents to report to us on the 1st of every month, the increase of names and the prospects, together with the amount due the office.

SAN FRANCISCO, THURSDAY, AUGUST 24, 1854.

Savings' Bank.

The history of banking, the rise and progress of this "money power," with all its influence over the world, powerful as it has been, has never yet been fully revealed in its *best features*, or felt under its *best influences*. The United States Bank, the Bank of England, the Rothschilds, Lafitte the Banker, Hottinguer & Co., and other powerful public and private money kings, have all been more or less affected by political as well as pecuniary interests; and when the former prevails, the latter must suffer. In all such cases the innocent are made to feel the sad effects of mismanagement.

There is now a better and brighter feature in banking—where the political is entirely separated, and the pecuniary interest alone is regarded. We mean the most excellent plan of Savings' Banks. Although they have been established for many years, and their value enjoyed to a great degree, yet their full power has never been understood, nor their value rightly comprehended. The cities of the east have enjoyed them for years, quietly, and without excitement. The "Suffolk Institution for Savings," at Boston, is among the oldest institutions of the kind, and has done a large and successful business. Millions of dollars have laid in the vaults, and millions have accumulated as the interest to be paid out to the hardy and industrious citizens. The amount that has been deposited as savings, and now invested in Boston, is carefully estimated at twenty millions of dollars, and the amount in New York at twenty-five millions. There are now very many institutions of the kind in every city of our Union.

The establishment of the "five-cent" bank of Savings at Boston, exciting a curiosity at first, has now become firmly established, and thousands and tens of thousands lie in the vaults from these little beginnings.

If economy and savings are required in the old States, surely they are more demanded in California; and we rejoice to know that the value of these institutions are beginning to be better understood and more fully appreciated. California has now a countless store of wealth—hoarded, locked up, buried—idle millions, that should be in active circulation; and it is for the want of a knowledge of the conditions of banks and banking, and the fear that many feel against our private banks, that so much of the capital lays inactive. This ought not to be, for we have as strong and solvent Houses as any in the United States.

The banking houses of Page, Bacon & Co.; Adams & Co.; Wells, Fargo & Co.; Burgoyne & Co.; Drexel, Sather & Church; Davidson & Co.; and others, are houses beyond question—but they have capital enough, and therefore do not offer those inducements that are required to give increase to the earnings of the laboring classes. The want created here, is a Deposit for Savings. where *increase shall be added to safety*. We are pleased to know that there is such an institution founded in California, and we feel gratified, after a careful inquiry, that we can direct our Farmers and Mechanics to a place where they can feel that their earnings would be secure, and that they can also enjoy a fair interest for their money.

Robinson & Co's Savings' Bank, corner of Clay and Montgomery streets, San Francisco, is an institution that has been founded for years; possessing an ample capital, it now enjoys a high reputation. The proprietor is a permanent resident, his family and all his interest are located and established here, and he possesses the fullest confidence of the city and State. To such an institution we can look with pleasure and satisfaction, and can cheerfully commend it to all.

The amount of *real available capital* at this moment, even amid all the depression upon trade, is *millions;* and with all the drawbacks upon Agriculture now, wealth and capital will soon spring from this mighty interest, that shall overleap all other interests and over-size all other piles; and this capital wants a place of deposit where it may be safe and drawing a moderate rate of interest, and such is found in the Savings' bank of Robinson & Co.

Smith's Pomological Gardens.

Early Rising....Doing Good....Pleasant Ride....Beautiful Flowers....Fine Fruit....Luxurious Repast....Satisfaction.

When we were at our "pet city," Sacramento, last week, meeting our friend Smith and actuated by a desire to throw a little sunlight into a political editor's sanctum, we took our friends to our neighbor of the "Journal," and absolutely prevailed upon him to rise early the next morning, and, forsaking the town, eschewing all politics, go out into the country and breathe God's fresh air, and see the beautiful flowers that were scattering their fragrant breath around, to realize that the "whole earth was full of his glory."

We know how hard this early rising is for an editor, but we felt that if we could accomplish it; we could persuade our contemporary to see the sun rise, take a pleasant ride, &c, we should be "doing good." Our friend Smith, with his usual liberality, provided conveyance and the thing was done. Taking our pony we crossed the valley next morning and met our friends at Smith's gardens, as per agreement. And now, readers, don't you think we were doing good. If any one will only read the Sacramento State Journal the morning of their description of *that* excursion, they will see how the rough corners were clipped off and the sharp edges shaved down from their *political horizon*. Oh, it is a good thing to take such men and show them the "better way." Go friends, and get the State Journal of August 10, and read the fact that once these Editors were revelling in a flower garden, forgeting the strife of politics.

It was a delightful day—an early ride gave a fresh zest to the enjoyment, and we were early on the ground. The broad acres of these fine grounds are well managed, every portion being well and judiciously cultivated, and giving assurance to the proprietor of a just reward for his years of labor. Mr. Smith has in his grounds all the best varieties of approved Agricultural market products, such as, asparagus, rhubard, artichoke, horse-raddish, and every species of annual crops. In these gardens may be found fine ornamental trees, the locust, ash, ailanthus, chesnut, &c. The fruit orchards will comprize about twelve acres, and being familiar with every variety of fruits, we hesitate not to say that in these gardens will be found as choice a collection of pears, peaches, grapes and figs, as in any garden in the Sacramento Valley. Mr. Smith has been very successful in his nursary operations. He is also fortunate in having an excellent nursery gardener—Mr. Michael Doherty—and we are pleased to note his success in budding, this being one of the evidences of a good gardener.

The Peach Orchard was a gratifying sight; nearly every tree was in bearing, and only two years planted. The grasshoppers had done some injury, eating clean to the stone and taking the foliage. The crop of the Peach Orchard will be a pretty income.

The Pear Trees are young, yet remarkably thrifty. We notice many that had grown the present year from the *bud*, four and five feet, strong and healthy.

The Grapes were in full bearing, and many fine clusters of the Golden Chasselas and Black Hamburg, reminded us of our own gardens and graperies in New England.

Some Fig Trees, also, we noticed, and a few Orange and Shaddock.

"There's a good time coming," and we hope to live to see a just and full appreciation of God's munificence from those who have enjoyed his bounty. After a general view of the ground outside we descended the banks of the river, and there, beneath the broad oaks and shrubbery upon the bed of the river, about forty feet below the high water of last winter, we found a splendid collection of roses, and other green-house plants; this was an admirable place for plants during the hot months, and worth a "plum" to friend S. for this purpose. The neat conservatory contained a fine collection of many plants, no where else to be found in the county. Here we find Mr. Thos. O'Brien, who has charge of the Green-house and Floral department, and whose industry and good taste ensure success in each branch of Flora's home.

We next examined the elegant, costly and complete Engine and apparatus, for irrigating the gardens. Mr. Smith having gone East the past year, he examined the various inventions for the purposes of irrigation, and selected the one now used on his grounds. "Worthington's Safety Steam Pump and Fire Engine;" the power and capacity of this small but powerful engine, is truly astounding, for while it is not more than 10 or 12 feet in length and 2 to 3 feet wide, it is capable of throwing *twenty thousand gallons per hour* easily; it is one of the most perfect and neatly finished pieces of machinery we have seen. Pipes are led from the reservoir over a large portion of the grounds, the water flowing so free as to completely saturate the whole; the soil of this garden being a fine sandy alluvial, the result is of the highest possible good. Mr. S. being able to continue planting all the year round. The cost of this machinery, complete, in New York, was $1,200; freight, extras, putting up, pipes and layers, &c., brought the amount to about $3,000. We saw the working of every part of the machinery, and found it the *ne plus ultra*. Mr. S. has never been miserly in his outlays, but dealt with a liberal hand in all his improvements. Such men should be sustained; they deserve prosperity.

Mr. Smith's grounds are located finely, near the American River, with a fine row of large shade trees, that in a little time will, with the new ones planted, form a beautiful avenue from his entrance-gate around his entire grounds, and thus give the citizens of Sacramento the finest drive for miles around.

Having fully viewed, though we have briefly sketched the outside, we were shown into the—the——; now friend Smith, don't be angry if we speak the truth—we entered the Batchelor's Saloon—and although there was every comfort around us, and everything to tempt the appetite, we could not but think how lonely such a place must be, even with those beautiful flowers and that luscious fruit. "It is not good for man to be alone." But we had to forgive, and Mr. S. was ready as a liberal host. We sat down to a repast fit for a "Board of Aldermen;" after an abundance of good things, enough to satisfy any appetite, we were tempted by large dishes of rich and luscious peaches full equal to "Jersey frees," grapes, and other luxuries. And these things in Sacramento, '54—the city of fires and floods. The varieties of peach were "Crawford's Early Melacaton," and "George IV." We saw upon the trees "Old Mixon Cling," and "Mixon Free," the "President," and "Crawford's late Melacaton;" these are the best varieties grown, and worthy a place in every garden.

At this repast we could not but notice the peculiar kind of *wonderment* of our neighbors of the Journal—like a cat in a strange garret. They did venture to eat peaches and cream—real peaches, grown in California—and we could not help looking at them occasionally, and seeing the workings of this to them mystery—the *contrast* from a close application in a political sanctum, to a fifty-acre garden of fruit and flowers, and the first time our friends had ventured so far. This is one reason the cause of Agriculture is so lagging—ordinarily public journals know nothing of these subjects, and if a plain statement of facts go forth, unless they *know* it to be so, they call it *sham*. We hope the *truth* they have imbibed now, will awaken them to a sense of the obligation resting upon them, and call them into action on this great interest, which at this moment demands the most earnest attention. We suppose if we had been of the true political stamp we should have been remembered in their glowing thoughts at that time; but we are glad our friends are awake to the reality. We shall expect now that the Journal is aware of the reality of the Agriculture of its own neighborhood, to be electrified upon the "Agriculture of Sacramento county."

We spent the hours most happily, and bade adieu to our friends—our appetite satisfied, our mind gratified, our heart grateful, our pockets and parcel full, and our thoughts full of good wishes to our generous host. The only doubt upon our mind to disturb us, we hope to see removed; if our neighbors of the Journal, after this, *don't do their duty*, we will take them again and, *choke them with strawberries and cream*.

We close by giving the statement of the crop of two Peach Trees, in this garden, and the amount received the present season, in cash. After paying commission to those who sold in the city, the net proceeds amounted to *Three hundred and twenty-six dollars and fifty cents;* in addition, Mr. S. has used and contributed among his friends sufficient to have swelled the amount to over *Four hundred dollars*. The world cannot produce a parallel case. We would invite all who love beautiful things, to visit "Smith's Pomological Gardens," at Sacramento. If you are in pursuit of fruit trees, ornamental trees, plants, shrubs, vines, etc., you will find them there; and no one will ever regret a visit to this place. Mr. Smith is ever ready, with courtesy and attentions, to make a visit agreeable; and we most sincerely rejoice to know that he will surely be successful in his enterprise.

The Press.

The quicker intelligence is communicated of matters of moment, the more widely knowledge is diffused. The more stimulus that is given to develope and aid the industrial interests of a country, the more rapid is its advancement and the more certain its prosperity. The Press is the *great lever* for the diffusion of that kind of knowledge which most rapidly awakens the interests of a country. Agricultural and Mechanical industry is the basis of the wealth, and the best guaranty of the permanency of California.

If the Press will but give these interests a tithe of what they demand, devote a portion of their columns weekly to the coming Exhibition, and do what they can to create and keep alive but a just regard to its merits, not a word they utter or a sentence they shall pen, but will be a rich investment, returning more than compound interest; for rich and prosperous Agricultural States, are always the best sustainers of the Press.

We trust, nay, we feel assured, that the Press of California will unitedly give the State Agricultural Society a liberal share of their kind attention and thought.

California State Agricultural Society.

ENROLL YOUR NAMES.

Certificates of Membership are now ready, and it is important that all who desire to unite with the Society, should forward the amount of subscription and receive their *Certificates*.

The following sections from the Act of Incorporation, are annexed, and will be a guide for action:

Sec. 5. For the purpose of carrying into effect this act, F. W. Macondray, of San Francisco county, is hereby appointed President of this Society; E. L. Beard, of Alameda county; J. K. Rose, of San Francisco county; D. W. C. Thompson, of Sonoma county; H. C. Malone, of Santa Clara county; W. N. Thompson, of San Francisco county; C. I. Hutchinson, of Sacramento county; and J. W. Osborne, of Napa county, Vice Presidents; J. L. L. F. Warren, of San Francisco county, Corresponding Secretary; C. V. Gillespie, of San Francisco county, Recording Secretary; Judge David Chambers, of San Francisco county, Treasurer; who shall call the first meeting of the Society at the city of San Francisco; and who are hereby authorized to solicit and receive subscriptions to said Society, as hereinafter specified.

Sec. 6. The members of this Society shall be composed of such persons as shall pay the sum of Ten Dollars to the Treasurer, annually, and such persons shall be members only for the year for which they shall have thus paid the amount aforesaid.

It is to be hoped that citizens of all interests will feel a desire to unite with this Society, and thus aid to make it efficient for good.

Peacemakers.

"Blessed are the peacemakers, for they shall be called the children of God."

Scarce a day passes but we see brawls and drunken quarrels in our streets, and the records of our courts are paraded in the public journals with such fancy style as seems a desire to gloss over crime and debauchery and make it less hideous. This is wrong. If the reports of our criminal courts need be made, let them be exposed in their darkest colors, so that men shall be shocked at their occurrence, rather than pleased at the witty manner in which they are dressed. So long as the press will palliate crime and debauchery by dressing the reports of it in gay and fancy colors, so long it will increase in our midst; and those early tempted and led astray will attend our courts for curiosity, and thus brought in contract with criminals, be led astray and led into the same crime.

We are led to remark on this subject by the matter of a drunken quarrel that arose in the street opposite our windows, and the manner in which the troubled waters were allayed called forth the words at the head of this article. We noticed in this quarrel three horsemen, and one on foot—all appeared in liquor; and from words they proceeded to blows, which would soon have

called out the police to place them in the lock-up. In the morning the scene in the recorder's court would have been fines, costs, and another high and fancy colored report. In the early part of this melee a waterman drove along, who seeing the quarrel, and feeling that liquor was at the bottom of it, he sprang from his cart, and seizing the men, he held them like little children, and coolly and calmly spoke to them. His firm and gentle words had the effect; peace was restored; the men mounted their horses, and all went away quietly. That young man was a *peacemaker;* and while some dozen of men stood ready to add fuel to the flame, preferring bloodshed to peace, he with a noble spirit, poured oil upon the waters and calmed the storm, simply and calmly remarking to those around him, who asked if he knew them—"I do not know either of them; but I do know they would all be sorry if they had quarrelled, when they came to their senses." Saying this he mounted his cart and moved on his round of duties.

Young man thou art rewarded well! thou art rewarded within thine own breast, for thy nature is "Peace on earth—good will to men." Thy influence will tell for good long after this act may be forgotten. We wish that young man could have heard the words of praise that fell from the lips of a beautiful young maiden: that would have been a reward indeed. The heart of that maiden loved peace also, and as her words of earnest praise were uttered for his generous acts, the color rose in her cheek, telling of the truthfulness of the sentiment she uttered. We revereneed the sentiments as the God spirit that shall bring blessing upon all that cherish them, and at last they shall enjoy the promise conveyed in the words we have uttered: "Blessed are the peacemakers, for they shall be called the children of God."

Card your Cattle.

How few stock raisers ever give that time and attention to their stock which they require, how few ever provide them with stalls in wet weather, or with shelter from the heat of the sun, and how few ever think that oxen, milch cows, or young stock need the action of the card.

We would like to have some of our stock raisers *try the experiment of extra care*, and if they will do this they will be astonished at the results. Any dairyman can satisfy himself by selecting two cows of equal quality as milkers—let one run in the yard, lay upon the ground in all weathers, wet or day, hot or cold, let her be fed in the lump and never be cared for, except as common stock; then take the other cow, and when the day is done, place her in the stall, once a day have her well carded and thoroughly rubbed down, let her have good litter to sleep on, be fed regularly morning and evening, give her protection from the sun in the hottest weather and shelter from the storms—and then keep strict account of the expense of the keeping both ways, and take account also of the quantity of milk taken, and then see WHICH PAYS.

We have only to say, *try it.* Knowing its value, for always having practiced it with our stock East, we desire it practiced here—and were reminded of its utility by seeing fine "cattle cards" at C. A. McNulty's, on Battery street, and hope their value will be proved by our stock raisers.

Letter from Port Orford.

We call attention to the annexed Letter, as one of much interest touching the cause of Agriculture, stock raising, farming in general, and mining in particular. We have been highly gratified and obliged by the courtesy and kindness of our friend to whom the letter was addressed, for the very fine samples of *grasses* alluded to, which he kindly presented to us, and which are far superior to any we have seen in this country. They are at our office, and worthy the attention of agriculturists:

PORT ORFORD, July 30th, 1854.

MY DEAR FRIEND: I am now in this most healthy region of country, and have since I left you been most actively employed in pioneering my way to future prosperity and success. I have often wished that you were my companion, to witness the varied beauties of Nature, as well as the numerous channels which direct men of prudent enterprise to wealth and fame.

Since my return I have paid a visit to the famed Rogue River, and if I had every gift of language, I could not find words to convey to you my exceeding delight. The river called Rogue river, is a most beautiful mount of water, commanding at its mouth a beautiful and safe harbor for inland trade, abounding with immense quantities of fine salmon, and would affect not only the most accessible, but the most lucrative salmon fisheries in this region. The lands adjoining, and in the immediate vicinity of its entrance into the ocean, are of the most valuable class for grazing and farming purposes. They are of an elevated character, devoid of marsh, and covered with proportionate verdure, without the exhausting effects of hot weather or a dog-day sun. The winter, I am informed, is the most pleasant part of the year, and the heat not greater than a Maryland May.

I send you a sample of the growth which I cropped from the hills, and which you may receive as an honest specimen of the growth of the land which I have alluded to. The timothy grows in common, together with luxuriant blue grass and red top, which you well know render the lands of Kentucky so extremely valuable for grazing purposes. A visit to this place is worth a trip across the Atlantic. I have never seen any thing to equal it, and to secure them becomes an immense fortune for the parties holding them.

You would be surprised to see the herds of the most beautiful cattle that luxuriate upon the gentle slopes of the hill sides, so burthened with fat as to render them dull and sluggish; and what is most remarkable, they become fat and fit for the market in six or eight weeks after taken from the drove. The lands which I have alluded to are government lands, and can be secured by the pre-emption law; and for a very small expenditure, certain points can be secured to control a very extensive range of grazing country.

To survey some four thousand acres, including the most important points, would secure not less than eight or ten thousand acres, and which would not require more than one thousand dollars outlay; as a permanent occupancy of the same would entitle the holders to a permanent title from the government.

The gold excitement at the Coquille River is beginning to subside, and from all the information which I can gather, I think there will be a rush to the beach at this place, as they will by proper management pay well for their working; and the claims which have been partially abandoned, and many that can be at this time purchased for a small consideration, will in a short time quadruple in value, particularly as they are getting machinery to separate the gold.

Yours, most truly, JOHN S. WEBSTER.

Post Office Again.

We have commenced the warfare and do not mean to lay down our weapons until we see a change for the better. It is a crying shame that publishers should be debarred from enjoying the support of their best subscribers, because some of the offices on the routes are so miserably connected. We intend to publish such letters as we receive from every quarter, and do what we can to find out where the blame lays, and if we find it we shall expose it. To-day we have a complaint of an office on the San Jose route, where the papers of all the subscribers are thrown out promiscuously upon the counter, and people come in and help themselves. We instantly felt it our duty to call on Postmaster Henley and state the fact, being interested ourselves. We found, as we expected, a prompt and ready will on the part of Mr. Henley to remedy the evil, and he assures us that complaints of this kind shall be instantly attended to and rebuked; also if the Postmasters fail in their duty they shall be removed. That is the only way to secure efficiency, and if the *press* wills success they will see how far they are each affected, and seek a remedy for the evil.

Major Henley will act without fear or favor, and if our subscribers will advise us, being careful to give us reliable facts, as near to all the material as they can, we will go to head quarters and aid them to the extent of our power. Now, if our friend "Roving Jack" will hold on a little longer and not get too desperate; if he will recall the electricity of his wrath, we will cry, and spare them not the next time they "steal the FARMER." Forgive them, Jack, do, and we will make up your loss; for don't you know they must be literary men, and men of taste and good sense. Don't be too severe. You would be merciful to a poor creature that stole bread, if you knew he was absolutely starving; and may it not be that they were really *mentally* starving, for the amount of ——— that is circulated could not sustain life, so they stole and lived. Don't get angry. We have sent the back numbers. Yours ever, ED.

SPELLING'S RANCH, August 19th, 1854.

MESSRS. EDITORS; With the best of feelings for the perpetuity and prosperity of the CALIFORNIA FARMER, I take the liberty, (I hope you will excuse,) of [illegible] that from some unaccountable reason—if however such a thing could be *attributed* or in any way connected with *reason's* laws—I have not received a single copy of your estimable journal since the 6th day of July; whether it is the negligence of the *mails*, or the "too close attention of the *males*," I am unable to decide. But certain it is, that I get no paper, and somebody is to blame; and unless I shall get my paper regular I may be induced to perpetrate something rash, and say that the mails are not what they should be! or that perhaps some literary *gent*, who has more time than money, is guilty of the very degrading offence of petty larceny in the shape of pilfering a poor white man's newspapers from the post office; or else that the paper is not regularly mailed to my address. All this would be disagreeable to any one, more especially a modest farmer; and I hope that I will not be driven to such extremes. Your investigation of the matter will perhaps throw some light upon the subject, and anticipate the tornado that is gathering. That such may be the result is my devout prayer—as it would be entirely too bad to let anything disturb the innate equilibrium of so pacific a temper as mine is conceded to be (?) by all.

Your ob't. serv't, ROVING JACK.

NEW AND VALUABLE INVENTION.—The New York Courier, through their Parisian correspondence, furnishes the important information, that the Olympic Academy of Vicenza, Italy, having carefully examined the discovery made by their fellow citizen, Tremeschini, of electric telegraph by secret transmission, has publicly declared it to be a perfectly successful invention. The commission appointed to test its efficacy, was composed of the Councillor Delegate of the Podesta, the superior Commissary and the Academic Council. The first experiment consisted in sending and receiving a dispatch in the ordinary way, with secresy. In the second experiment a dispatch was sent secretly, and the answer received in the same manner, by the aid of the new apparatus. In the third a dispatch was sent openly, and the answer received secretly, to show that the secret apparatus might be used or suspended at will. The results of the inquiry show: 1st, That the apparatus of Tremeschini may be applied to Morse's telegraph; 2d, That when a dispatch is sent secretly, it can only be received so, any fraud in that respect being subject to immediate detection; 3d, That secresy may be suspended or applied at pleasure. The report of the Commission is highly eulogistic of the invention.

A PROFITABLE SHEEP.—A correspondent in the Ohio Farmer, furnishes the editor with the following: "I herewith furnish you a brief description of my celebrated buck *Old Tiger*. He is five years old, 185 lbs weight of carcase, 16 lbs 11 oz. weight of fleece, and very clean for unwashed wool. The wool is fine and even, for that variety. His stock is superior, and sought after by our best wool growers. I have repeatedly refused $500 for him. I purchased Old Tiger, as he is called, August 20th, 1850, of Mr. A. S. Bingham, of Cornwall, Vt.; and he is known as the Tainter stock. I paid $200 for him, and I confess that it has been the best investment I ever made, having realized the sum of $1,200 profit from him, in three years. My present flock consists of French, Silesian and Spanish Merinos, selected mostly from Mr. Campbell's celebrated flock, who is now breeding each variety, distinct, except in a few cases of cross with each other, which have thus far proved very satisfactory." Very truly, A. V. Stockwell. Brattleboro', Vt.

HARDSHIPS OF FARMERS.—The Hampshire Gazette gives the following as the pith of a speech by Pres. Hitchcock, at a late cattle show in Amherst:

Dr. Hitchcock followed, and in a pleasant way proceeded to speak of the hardships of Farmers. They were obliged to cultivate their fields in order to make them produce; they must stay at home and not spend their time in grog shops. In order to prosper they must educate their children, if they would have them grow up men and women; and then, worst of all, their fine cattle and good products will be taken away by men who will leave nothing but money in place of them. He closed with the following sentiment:

"*The Farmers of the Connecticut Valley*—May their hardships go on increasing till they cry out for very joy."

A MACHINE has been invented, and is now in operation in New York, for bending the largest and strongest timbers into any requisite shape. It is of immense value to ship building, as by this means timber stronger and more durable can be furnished, and at a much cheaper rate, to take the place of the knees and other crooked material of natural growth, now so much in demand in ship building, and which is at the same time growing more and more scarce. In this way a whole ship's frame may be bent to the proper mould, and as by this process the acids in the timber are expelled there is much less liability to its decay.

BOUND VOLUMES OF THE CALIFORNIA FARMER. We can supply a few copies of the CALIFORNIA FARMER, at $5 neatly bound. Subscribers wishing their Volumes bound or binding of any kind we recommend them to [illegible], Battery St., between [illegible], who have [illegible] and who have done work for us satisfactorily.

Farmers, Study your Profession.

IT is somewhat strange that the little time farmers devote to literary pursuits, they spend in acquiring political in preference to agricultural knowledge. We now address the farming community.

The lawyer spends his time poring over his law books, acquiring a knowledge of jurisprudence. The physician dissects the human body, ascertains the precise location of every artery, vein, muscle, nerve, bone, &c., &c., acquires a knowledge of the conditions of health, and the causes of disease. The minister ponders over the sacred scriptures, and reads works that will afford him a knowledge of divinity. In short, they all "*study their profession.*" Now, how is it with the great mass of those who devote their time to tilling the soil? You profess to be farmers—agriculturists—and yet almost the sum total of your reading and study is of a political character. We are denominated a nation of farmers; yet we patronize and support about three thousand political, and but sixty or seventy agricultural, papers—about in the ratio of forty-five to one. The greatest source of our nation's wealth and prosperity is in her agriculture. Our schools and colleges for disseminating a knowledge of the professions of law, medicine and divinity, are numerous (all well enough); yet the whole nation can scarcely boast of one such institution for the spread of a scientific knowledge of agricultural operations. We read with delight and admiration of our vast exports of agricultural products; yet do little or nothing, in the aggregate, to keep up the productiveness of our virgin soil. We boast of our privilege of having a voice in the elevation of our officers; yet vote for men unskilled in our profession, who will legislate on any and every subject save that of spreading abroad a scientific knowledge of agricultural pursuits. Each State, county and town throughout the Union, almost has its regular meetings for the discussion of political topics; yet how few such societies meet regular and *exclusively* for the discussion of agricultural topics, compared with the political.

Now, farmers, our appeal is to you—to *you*, who have the power of swaying every legislative body in the Union—to *you*, who may say to them, legislate for us, encourage our profession, attend to our wants, do what you *can* at least to aid us in discharging successfully the most important duty devolving upon man, or it shall be our most imperative duty to act the part of a Cromwell—to throw you out of our employ, and place those in your stead who will do our bidding. We say, to you the question is asked, shall this system of things continue, so long as "water runs" and mankind are born with the demand of food stamped upon their constitutions? We have more confidence and faith in the growing intelligence of American farmers than to believe that such a system of things will long be permitted to exist. Farmers, awake! behold your dignity and your strength! Exercise the power you have for your own best interests and the good of the race, and your wants will not be neglected. Every farmer, or tiller of the soil, may aid in this great work.

If your library consists of but half a dozen volumes, let one at least be devoted to agriculture. If you obtain and read two periodicals, let one be devoted to agricultural. And since *farming* is your profession, if you should read four or more papers, let two or more be devoted to the same subject. If in the future you should contribute your mite for the erection and support of two institutions of learning, let one be an agricultural school or college. If you have two sons to be educated, let one have an agricultural education, if such can be had in America—if not, patronize the schools of the "Old World." If you attend conventions, fail not to attend the agricultural convention. If one or two associations is to be attended, patronize the agricultural. When you cast your vote into the ballot box, let it be for one who will advocate boldly and faithfully the interests of your profession.

If every farmer would attend as closely to his own profession as here set forth, or as the minister to his text, how long, think you, it would be till the farmer's calling would be as honorable as though he were classed with the titled nobility? How long, think you, it would be till the farmer's profession would be sought by the educated, the talented and the wealthy? How long before his occupation would be loved, desired, admired, and sought?—*Cor. Genesee Farmer.*

ARTESIAN WELLS.—The Artesian Well at St. Louis, Mo. is probably the deepest in the world. It has been bored to the depth of 2,200 feet; the first 1500 feet through solid limestone, and afterwards through sandstone and limestone formations. An abundant supply of water impregnated with salt and sulphur was obtained at the depth of 1700 feet. At present the water rises [illegible] of the Big Lick water; it is supposed that in [illegible] feet more pure fresh water will be reached. The work has progressed day and night, and is done with an engine by four men. The well furnishes pure water for a large sugar refinery.

There is an Artesian well at Paris [illegible] deep; one at Charlestown S. C. [illegible] feet; and several in Alabama from [illegible] to 700 feet deep.

DESTRUCTIVE FIRE IN BUTTE—PROSPECTS OF THE CROPS.—A correspondent of the Herald of this city, writing from Chico, Buttc county, Aug. 17, says: Some of our citizens in this nighhorhood have sufferred severely from a recent fire, whicb broke out by some means on the Sacramento river a few days ago. Ahout 16,000 bushels of grain have been burned, and nearly all the grass hetween Chico and Big Butte. Mr. Couples lost ahout sixty acres of excellent wheat. Messrs. Rice and McCutcheon also suffered considerahle loss. One bouse burned down, with a fine set of carpenter's tools and ahout 200 busbels of harley. A considerable amount of grain was also hurned on the west sido of the Sacramento. Crops in this vicinity are generally good—wbeat especially. Major Bidwell has as fine a crop of wheat as I ever saw. From five acres he threshed 282 hushels. The hest of bis crop hlew down. Had it stood, it would have averaged 75 hushels to the acre. I saw a squash last Sunday, raised on Mr. Henshaw's farm, which weighed fifty-one punds.

A correspondent of the San Joaquin Republican, says in relation to the crops on the Stanislaus and Tuolumne rivers, that the grain crops are all gathered, and the grain mostly threshed out. The yield has not equalled the just expectations of the planters. The season has been too dry, not affording moisture sufficient to fill the berry, hence the ligbtness of the crops. In some few instances, portions of extensive fields have yielded fifty or sixty husbels to the acre. Some fields have averaged twenty-four or twenty-five bushels to the acre, others not ahove ten or twelve. Barley, as a general thing, has afforded a better yield than wbeat.

LARGE FIRES.—Three extensive fires, nearly destroying as many towns in the interior, have occurred lately. August 17, the town of Campo Seco, situated ahout fourteen miles from Mokelumne Hill, was totally destroyed.

On the morning of the 20th, a fire occurred at Mokelumne Hill, destroying the main part of the town, including the Chronicle office with all its contents.

On tbe nigbt of tbe 19th, tbe town of St. Louis was totally destroyed hy fire. Loss $115,000.

AT French Bar, on the Tuolumne river, about four miles ahove Branch's ferry, is said to be plenty of room for several hundred miners to make good wages, as soon as they can ohtain water. One company having water from the river by means of a force pump, are taking out from half an ounce to $12 to a man each day.

TRE Marysville Herald states that the grasshoppers continue to destroy the grain and vegctahle crops on the Calaveras and Mokelumne rivers. Great damage has already hecn done. One gentleman at Mokelumne has lost over tbree tbousand dollars wortb of property hy these destructive insects.

BARLEY BURNT.—We learn from the Stockton Argus, that the barley field of Vance & Athens' ranch, six miles above Staples' ranch, caught fire on Saturday, 12th inst., and burned 150 acres of barley, it having just heen cut. The housc was saved with great difficulty by plowing.

ON Thursday last, the thermometer at Auhurn, Placer county, stood at 104 deg., and at Ophir, at 114.

ARRIVAL EXTRA.—The French clipper ship St. Ann, with one hundred and fifty tons freight for Duncan's Art Union, arrived yesterday. We trust now our citizens will enjoy a rich repast for the bigher faculties.

EXPRESS FAVORS.—We experience many valuable favors from the obliging messengers of Adams & Co. This week we received, while going our rounds, full lists of hoth up and down river papers; and from Mr. Haskell, particular favors and many personal attentions.

MARKET REPORTS.

San Francisco, August 23, 1854.

THERE is scarce an article in tbe market wbicb bas a fixed value. Brendstuffs are abundant; stock of Foreign Flour decreasing, althougb yet large. Grains somewbat firm. Wheat still firmer than last week; we know of some large parcels of extra that have been sold at 3c—tbis precludes the shipping; we bave note also of a very large contract to deliver at 3c, very many thousand bushels. Potatoes will be scarce and high—no one extreme follows another. Agricultural implements are a perfect drug; shovels, hoes, rakes, &c., can be purchased here at half the home cost. Provisions still lower. Lumber drags heavily and coming in abundantly. Merchandise generally fills our warehouses, often breaking them down and their owners too, and if those on the other side don't begin to feel yet, they bad better prepare, for the avalaucbe is coming, and they deserve to feel it.

SPECIAL NOTICES.

☞ **The Poet Says—**

Death is anotber life. We bow our heads,
At going out, we think, and enter straight
Another golden chamber of the king's,
Longer than this we leave, and lovelier.

Nevertheless, most people dread death, and will catch at every remedy for the tortures that rack tbe mortal body and hurry its dissolution. DR. GUYSOTT'S IMPROVED EXTRACT OF YELLOW DOCK ANN SARSAPARILLA, is pre-eminently tbe safest and most reliable medicine for restoring the human system to life and vigor.

This Sarsaparilla contains more of tbe pure Honduras Sarsaparilla than any other preparation that now exists—which is chemically combined with the Extract of Yellow Dock and the Extract of Wild Cherry, thus making the remedy more thoroughly ancient than any other Sarsaparilla before the public.

Scrofula bas baffled the skill of the most eminent physicians in this country and in Europe. But there is an antidote for this disease in Dr. Guysott's Extracts of Yellow Dock and Sarsaparilla, wbich is proving itself a specific in tbe most severe cases of Scrofula. Purchasers will please be careful to ask for, and take none other hut Dr. Guysott's Improved Extract of Yellow Dock and Sarsaparilla. All others in comparison are worthless.

For sale at all the principal Drug Stores in the State. PARK & WHITE, Sole Agents, to whom all orders must be addressed. Office No. 94 Merchant street, third door nbove Montgomery. 7

☞ **Notice.**—Persons wishing business cards very widely circulated througbout the State, can have that opportunity hy sending them to tbis office, and tbey will go out in the *Extra Premium sheet of many thousands, during the present week.* Send your cards early, to secure their place.

☞ **Great State Fair.**—We call attention to the Programme of the Great State Fair, to come off at the Musical Hall, in San Francisco. The List of Prizes will be found to be the largest, most comprehensive and complete ever offered in the United States. It is important tbat a wide circulation should be given to the plan of this Fair, that all may have an opportunity to enjoy its privileges, and tbat the greatest possible good may result to the wbole State.

We trust the Press throughout the State will give their best influence to its promotion, and keep their readers continually advised relative to it—it is a duty they owe to this great interest. This is a Public Industrial Exhibition: the proud display of the products and genius of this country, and its success will be the beginning of greater exertions for future years. It is no private enterprise, for it is the State Society's Fair. The Prizes are the award of the State, and should serve as a stimulus to the citizens to do what they can to build up the Agricultural interests and to awaken a lively regard to this basis of her prosperity.

We speak for the State and by its authority, being but her agent, we plead for her best weal. We therefore urge upon every citizen to lend a helping hand to this great enterprise, and the greatest and most glorious results will be accomplished.

WARREN, Corresponding Secretary, C. S. A. S.

MARRIED.

On the 20th August, by Rev. T. Mooshake, Mr. John G. Beutler and Mrs. Rosina Beck.

On the 21st August, by Rev. Mr. Wellboff, M. Goldman, of Stockton, and Miss Celin Rosenfeld, of New York.

On the 17th August, in Shasta, Mr. P. F. Terbush and Mrs. Catherine Foutz.

San Jose Nursery.

WE are prepared to supply the trade with the best varieties of Fruit Trees, Grapes Vine, Roses, Plants, &c., in all tbeir varieties; and are disposed to sell at a low price, that we may suit the times. Our Trees are cultivated with great personal care. Those who desire to make Nurseries and Gardens will do well to visit and ascertain for themselves our ability to supply what we advertise. Trees will be carefully labelled and packed for any season or distance.

The following Trees we offer this season:

Peacb Trees, 44 varieties;			Strawberries, 7 varieties;		
Pear	do	44	do	Fig Trees;	
Apple	do	54	do	Pomegranates;	
Plum	do	15	do	Walnuts;	
Apricots		6	do	Chestnuts;	
Almonds		2	do	Locust Trees, very large;	
Quinces	do	2	do	Rose Acacias, for hedges.	
Cherry	do	many	do	Osage Orange, for hedges.	
Grapes,		12	do		

In addition to our Fruit and Ornamental Trees, we offer *ten thousand finest Roses*, comprising more than one hundred varieties, all of the best known kinds. Our plants are too numerous to specify in an advertisement. Hoping visitors will come and see us, we refer them to our agent in San Francisco, MR. DELABIGNE, 121 Sansome street, where we shall have a collection of plants in the season as samples. The nursery is situated in the city of San Jose, immediately above the City Mills.

We are also permitted to refer to Warren & Son, who have examined our grounds, and who can testify of the character of our nursery, and who will receive and forward orders to us.

Every order promptly and speedily attended to.

8 1stf L. PREVOST & CO.

To Fruit Growers in California.

HOVEY & CO., Seed and Nurserymen, No. 7 Merchants' Row, Boston, Mass., invite the attention of Cultivators of Fruit in California, to their very extensive collection of Fruit Trees of all kinds, particularly of Pears: embracing every variety worthy of cultivation, to be obtained either in this country or in Europe. They offer for sale—

100,000 Pear Trees, of all the choicest kinds both upon Pear and Quince stocks, dwarfs and standards;
50,000 Apple Trees, in 50 varieties;
25,000 Plum Trees, in 30 varieties;
20,000 Peach Trees, in 25 varieties;

Also,—Quince and Cherry Trees; 40 varieties of the finest Grapes; 12 varieties Currants; 10 varieties Raspberries; 10 varieties choicest English Gooseberries; and 50 varieties Strawberries, including our Hovey's Seedling, which has not yet been equalled for size and productiveness.

Also,—100,000 Asparagus, and 20,000 Giant Rhubard Roots. An immense collection of Ornamental Trees and Shrubs, Roses, Greenhouse Plants, &c., &c. Agricultural and Garden Seeds of every description, and of the best quality, constantly for sale.

Catalogues gratis to post-paid applicants.

Messrs. HOVEY & CO. would remark that their mode of packing trees for California, has met with the greatest success, and they feel confident of being able to give satisfaction to those who may favor them with their orders.

Address, HOVEY & CO., No. 7 Merchants' Row,
8 Boston, Mass.

Pennock's Patent Seed and Grain Planter.

FOR planting Wheat, Rye, Barley, Oats, Indian Corn, Beans, Peas, Turnips, &c. This machine operates equally well on all kinds of land, and is not injured by coming in contact with rocks, roots, &c., and by completing the work at one operation, obviates the necessity of harrowing after the grain is sown. With two horses it will plant from ten to twelve acres of Wheat or Barley per day, and of Corn, Beans or Peas, fifteen to twenty per day—besides effecting a considerable saving in the seed. For sale, with full sets of extra parts, by

JOS. S. PAXSON, 26 Front street, cor. of Pine.

Also.—Cultivators, Garden Drills, Hay Cutters, Hay Presses, Grist Mills, &c., &c. 8 6t.

SPECIMEN GRAINS!

DESIROUS to advance the knowledge of our California Crops to the various Horticultural and Agricultural Societies of the various States and Europe, we invite all who are willing to aid us in this matter to forward us specimens of Grains and Grasses, of any and all kinds. Such shall be forwarded carefully, with credit to the growers. The names of the growers, and place where grown, will always accompany the packages.

HOTELS.

G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

PURE MEDICINES!

LITTLE & COLE, Apothecaries,
139 Montgomery street,
Between Clay and Commercial streets,

Pay particular attention to the preparation of

Physicians' Prescriptions,

and the dispensing of Family Medicines. The public can rely upon all articles purchased at this establishment as being of the

Purest and Best Quality,

and at reasonable prices.

MEDICINES AT MIDNIGHT.

Medicines can be obtained at all hours of the Night.

☞ French, German, Spanish and Italian spoken. 6

Book Bindery,

No. 73 Merchant street, below, Adams & Co.

THE undersigned beg to inform the citizens of California that they are prepared to execute all orders for BOOK BINDING of every description, and in every style. Also, Blank Books made to order, of superior paper, and ruled to any desired pattern. We are Practical binders, and feel confident of giving perfect satisfaction in *style* and *price*.

BALDWIN & EMERSON, San Francisco.
N.B.—Orders from the Country promptly executed. 7

Washington Market—Stall No. 1.

MR. & MRS. WEAVER would invite Hotel Proprietors, Restaurants and Families to call and examine Stall No. 1, Washington Market, on Washington street side. We shall offer each morning everything that can tempt the palate of an epicure. The choicest only of all in the vegetable kingdom; Fruits of every kind; Game, fat and plump—in short, the best variety. Remember our number, it is *One*, and we mean to keep No. 1.

5 MR. & MRS. WEAVER.

Watches and Jewelry.

WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably knowu to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are constantly receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,
139 Montgomery street, two doors south of Clay.

N.B.—Watches of all descriptions repaired by skillful and experienced workmen. 4 tf

Jewelry and Silverware.

OUR immense stock of WATCHES, JEWELRY, DIAMONDS and SILVER WARE, has been imported by ourselves, for a Regular Customer Trade, and is of the mostly costly and superior description, but owing to the depressed state of the market at present, we are disposing of them at New York prices.

BARRETT & SHERWOOD,
City Observatory, 135 Montgomery street.

N.B.—Quartz Jewelry of our own manufacture, at greatly reduced prices. 5

Montgomery Paint Store,

No. 159 Montgomery street, opposite Montgomery Block,
San Francisco.

HOUSE AND SIGN PAINTING, GLAZING, GILDING, GRAINING, &c. Painters and the trade will find the following goods always on hand, and of the best quality.

ATLANTIC, UNION and FRENCH WHITE LEAD;
TIEMAN'S ZINC WHITE; ENGLISH BOILED OIL;
TURPENTINE; 1st QUALITY FRENCH PICTURE GLASS;
WINDOW GLASS; TIEMAN'S COLORS, in oil and water;
ARTISTS' MATERIALS, a large assortment, to arrive soon;
BRUSHES in every variety.

The subscribers intend keeping a full assortment of every article in their line, of the best quality.

6 RAYE & HANKS.

Artesian Well Boring.

WE would respectfully inform the public that we are fully prepared to take contracts in the above operations in a manner to guarantee satisfaction or no charge will be made.

SMITH & VAN DYNE having associated themselves with an old and experienced operator from the East, who challenges the world to compete with him in all the branches connected with the above business, are fully confident to guarantee success in all contracts that we may undertake, and warrant the work for one year. We have also implements for boring through stone to any depth, and all work done on the most reasonable terms.

For the satisfaction of those wanting anything in the above line, we would refer to L. C. Woods, of Adams & Co.'s Express; J. W. O horn, Napa City; Rufus S. Eells, of Haworth & Eells; M. A. Sullivan, New Custom House; Wight & Co., 137 Jackson street, &c., &c.

We can do work cheaper than any other operators, for two reasons:

1st. Because we are prepared to work on a most extensive scale.

2d. Because we understand all branches connected with the above business, and are, therefore, able to work with certainty.

All orders left at the What Cheer House will be promptly attended to. SMITH & VAN DYNE, Contractors.

N. B.—We also refer to Warren & Son, publishers of the "California Farmer," who have seen and known the character of the work done. 7

A Valuable Farming and Stock Ranch for Sale,

SITUATED in the County of Monterey, about one mile from the Mission of San Juan Bautista. Said Ranch consists of about one hundred and fifty acres of valuable farming land, running back to the hills, which are covered with clover and oats. The Ranch and hills are heavily timbered. There is also a stream of never failing mountain water, running through the entire place. Either for Agricultural purposes or for Stock Raising, this is certainly one of the best situations south of San Francisco.

A good title will be given, it being Government land.—Price $2,000.

P.S.—The improvements upon said Ranch consists of a tolerable good Dwelling House, with lumber sufficient to erect a large one; also about twenty-five acres enclosed under a good fence. Address, ALEXANDER COOPER,
San Juan Bautista, Cal.

Refer to JAMES McMAHON, Esq., San Juan;
AARON LYONS, Esq., Monterey City.
6 3m CHAS. G. HARRON, Monterey City.

15. Washington Market. 10.

HENRY PILEY would respectfully solicit the attention of his friends and the public to the variety and quality which it will be his purpose to offer at all times. The finest and fattest of our best American Beef; Mutton, fine as the finest; Pork, sweet as the sweetest; and every kind of meats and solids that each season offers. We can say to our customers that we do not intend to be behind any one in this or any other market, in quantity or quality, but will always aim to have the very best, and thus merit the approval of all our customers.

8 HENRY PILEY, 15 and 16 Washington Market.

FOUNDRIES.

Chile Seed Wheat,
FOR sale by J. FRIEDLANDER & CO.
4 60 California street.

Flour! Wheat!! Barley!!!

THE SAN JOAQUIN FLOUR MILLS, STOCKTON—Are now completed and ready to grind Wheat and Barley in any quantities. The above Mills are not surpassed by any in the Atlantic States, having all the modern improvements for the manufacture of the finest Family Flour, and are capable of turning out 250 barrels per day.

A large fire-proof Warehouse for the storage of Grain, is attached to the Mill.

Particular attention is called to the fact of Stockton being the depot for the supply of the Southern Mines, and therefore offers superior inducements to wheat growers to ship their grain direct to Stockton, for milling.

Liberal advances made on consignments of Wheat.

For particulars as to terms, &c., apply at the MILLS—or to Messrs. PAIGE & WEBSTER, Union Block, corner of Battery and Union streets, San Francisco. 6

BAKER & HAMILTON,
New England Agricultural Warehouse and Seed Store,
11 J street, Sacramento City, (near the Levee).

CHOICE FIELD and GARDEN SEEDS, selected fresh every year by experienced Seedsmen in the Eastern States, and warranted, always for sale by
BAKER & HAMILTON,
5 Successors to WARREN & SON.

Portable flour mills, and burr mill-stones of all sizes;
Bolting cloth, Anchor brand;
Iron wire-cloth, 36-inch wide, Nos. 2 to 10, suitable for threshing machines and milling purposes;
Brass wire-cloth, Nos. 16 to 60;
Rover steel plows, extra article;
Thermometer churns; fan mills; ox yokes and chains
and all articles pertaining to Agriculture.
For sale at the Agricultural Warehouse.
85 Washington street, between Battery and Front, by
2 HENRY McNALLY.

Farming Machinery.

M'CORMICK'S combined Mowers and Reapers, with extra parts complete, 6 feet cut;
Wheeler's 2-horse endless chain powers, with threshers and separators.
Taplin's 6-horse powers, threshers and separators.
Pitt's large 8-horse travelling machines, complete.
Hay Presses, Grist Mills, Scythe Snaths, &c., &c.
Just received and for sale by JOS. S. PAXSON,
25 4t 26 Front street, near Pine.

Threshers, Separators, and Cleaners.

PITT'S EIGHT HORSE POWER, complete, with extras—This machine was made to be exhibited at the Baltimore and Richmond Agricultural Fairs, held respectively for Maryland and Virginia. It is superior in every respect to any of the sort ever shipped from New York to California, and is intrinsically worth nearly double that of any other machine. (Ex Golden Fleece.) In addition to the parts usually sent, there are six wheels—four for the separator, two for the power, &c.

Also, EMERY'S Threshers and Separators, of Two Horse Power.

We have also on the Golden Fleece, two of HALL'S (Rochester,) Latest Improved Threshers, Separators and Cleaners, Eight Horse Powers, all complete.

Also, four of HUSSEY'S REAPERS and MOWERS, all combined.
For sale by COIT & BEALS,
9 tf 94 Battery street, office up stairs.

Fruit and Ornamental Trees and Plants.

INCLUDING everything necessary to the Garden, Greenhouse, Nursery, and Orchard, with all the recent introductions, at very low rates. Descriptive price Catalogues gratis—Carriage paid to New York. Plants packed for California with extra care. 16 1y

Fan Mills! Hay Cutters!!

WE have the very best Fan Mills in the Country, with all the new improvements for cleaning perfectly, and worthy particular attention of Grain growers.

The Straw Cutters are of new pattern, of extra quality and working power. BAKER & HAMILTON,
7 11 J street, Sacramento City.

New Planing Machines.

THE undersigned having purchased the exclusive right for the State of California, to use and vend NORCROSS' PATENT PLANING MACHINES, would respectfully call the attention of parties engaged in the manufacture of lumber to the operation of the above machine. To those acquainted with the machine it is deemed unnecessary to urge anything in its favor; but to others would state that to the machine was awarded the Gold Medal for the best Rotary Cutter Planing Machine, after a trial of three weeks in competition with two of the best Woodworth Machines, at the Fair of the American Institute, New York, and also from the Massachusetts Charitable Mechanic Association at Boston. It is highly recommended by the most eminent mechanical experts in the United States, and parties having used the machine, as can be shown by affidavits and certificates in my possession.

To set aside all doubts which may arise in the minds of the [illegible] relative to "infringement," it is only necessary to quote the following paragraph from the decision of the Supreme Court of the United States, delivered by Justice CATRON:

"The defendant, NORCROSS, has made a new and [illegible] and does not use the arrangement of [illegible] of the patentee and therefore it is not an infringement."

[illegible] with rights for [illegible] or sale at the Washington Mills, Market street, San Francisco, where the [illegible] can be seen in operation and if necessary [illegible]
7 D. W. VAN COURT, Proprietor.

ART UNION.

CALIFORNIA ART UNION.

SUPERB COLLECTION OF WORKS OF ART!
SOON TO OPEN AT
DUNCAN'S
CHINESE SALESROOM!!

MR. DUNCAN has been engaged in Europe for some months past, in selecting everything beautiful in manufactures and arts for importation to this State. Having expended more than three times the amount gained by his last ANNUAL DISTRIBUTION in erecting a Gallery for the display of Paintings, Sculpture, Statuary, and Specimens of the World's Industry in this city, he will now receive the RICH and COSTLY WARES gathered during his tour, and intended for the SPACIOUS ROOMS erected for their reception. The collection will have no equal at home or abroad—and he can confidently say that neither London, Paris nor New York will be able to show—as the stock of a mercantile firm—the many treasures of Art and valuable objects of *vertu* intended for San Francisco. The Catalogue will embrace several thousand articles, from the delicately wrought

BRONZES OF PARIS!
TO THE
Grand Paintings of Italy, Germany, France and Spain!

SHAWLS of Casbmere, **VASES** of Bohemia,
CRYSTAL of Prague and Vienna,
CARVINGS and **FILAGREE WORK** of Genoa,
MATCHLESS MECHANISM of Geneva,
MOSAIC WORK of Florence,
GEMS OF ART from Brussels,
SILVER and **GOLD BROCADES** of France.

THE COSTLY WARES OF PARIS!
CONSISTING OF

Sevres Porcelain, wonderful in its exquisite workmanship and prized in art;
Diamond Work of great beauty;
Solid Silver Dressing Cases;
Gold and Silver Work and **Musin Boxes;**
Statuettes, Clocks and **Bronzes,**
Fans of Gold and Mother of Pearl, set with Diamonds,
Cabinets inlaid with Jewels, **Caskets** studded with Gems,
Superb Paintings by the best Artists of the age,
Beautiful Copies from the Priceless Originals in the Imperial Gallery of the Louvre, and
Countless Elegant Trifles for the Drawing Room and Boudoir.

It is impossible here to recount more than a few of the principal objects of interest purchased. Full catalogues will be issued on their arrival. Among the most conspicuous are—THE MAGNIFICENT PAINTING OF

Descent from the Cross!

after RUBENS, purchased by Mr. Duncan at the Cathedral of Notre Dame, in Antwerp, where the Great Original was presented by the reuowned artist to the church of his native city.

The Chapel of Saint Therese!

the wonderful work of an invalid painter, while confined in the hospital of Bruges.

Three Original Paintings by Teniers, Vandyke and Greuze!

The Holy Family, by Blanchard!

The FINEST MODERN PAINTING for sale in Paris.

The Largest Diamond in the United States!

imported through the house of Messrs. ROVEAT, of Paris and New York.

Services of Sevres Porcelain!

formerly belonging to NAPOLEON THE FIRST and LOUIS PHILIPPE, with their Crown Mark, Initials, etc.

A Clock of the Days of Louis XIV.!

Exhibiting the most exquisite and surprising Mechanism, with pendants of Diamonds and Precious Gems.

The Famous Boudoir Clock of Mdlle. Rachel, the Tragedienne!

Representing a flight of Birds—the plumage is true to nature—the whole scene most life-like. The mimic warblers fly from bough to bough, and fill the air with the notes of the Mocking Bird, Canary, etc.

An Intricate Piece of Mechanism from Cologne.

A Magician performing with perfect accuracy the curious tricks of his profession.

The Great Original Painting of the Huguenots!

This picture is well known to Parisians, and will be welcomed with enthusiasm by every lover of Art in California.

The superb Tableau of Psyche and Amour!

The twin to this Painting is owned by the French Government, and has the most conspicuous place in the Gallery of the Louvre.

A **Series of Original Drawings,** twenty in number, of the

BATTLES OF NAPOLEON!

BY AN OFFICER OF THE OLD GUARD.

The great interest that attaches to them, is enhanced by the extraordinary merit of the Pictures. They were visited by crowds in Paris, and

FIVE THOUSAND DOLLARS

has since been offered for their purchase.

AN INGOT OF GOLD

For this amount will be placed beside them, ready for the person to whom they may fall. This sum in itself is a handsome little fortune, and will be immediately delivered, should he desire the exchange.

For the purpose of disposing of this *Magnificent Collection of Valuable and Beautiful Goods* from Europe, an

ART UNION

Has been formed, on the plan of those Associations in London and Paris. The intent is to give to all an opportunity to secure for their homes, at a trifling cost, something pertaining to the artistic and beautiful, that the Cottage of the Artisan and the Dwelling of the Millionaire may alike boast that which money cannot replace, and which the man of taste in every walk of life may appreciate. The whole will be divided in shares, placed by general wish as low as

ONE DOLLAR EACH!

Giving to the holder an INTEREST BY PURCHASE in the entire collection, and consisting [illegible] with all the privileges annexed thereto, and the right to decide upon the mode of distribution. *When a the sale is completed by the disposal of all the Shares*, the property will await the order of the Share holders, through the fair and impartial decision of a committee chosen [illegible] themselves. The Numbers of Shares sold as [illegible] proportion of the [illegible] to each Article [illegible]

The association [illegible] governed by [illegible] in all its transactions—its long standing and reputation, as guarantees of [illegible] the trust and [illegible] honesty of every article [illegible] The terms [illegible] and the [illegible] strictly observed to, and no [illegible] can possibly [illegible]

CERTIFICATES OF SHARES
ARE NOW READY AT

A "LOVE STORY" CONTINUED.

A few weeks since, was published a humorous poem, entitled an "Original Love Story," in which the lovers finally, from the word shan't, *shantied*. A continuation of the "story", appears in a Cooperstown paper. The last line of the story runs: He said "shan't we, my dear?" and they shantied! The *continuation* goes on:

And gently beamed over them love's colored ray
(The bridegroom and the bride of this ballad,)
He said "let us walk at the close of the day,
My own lovely Sall"—and they sallied.

He plucked her the sweetest and loveliest flower
That scented the path where they wandered,
And when she exclaimed, "let us turn from this bower
And roam near the pond"—then they pondered.

And when the glad sun hid his radiant light
And the frogs a "good evening" had croak-ed,
Said the bride—"As the moon is just peeping in sight,
We'll walk round the slope"—and they slope-ed!

Old time softly passed o'er the home of this pair,
Nor grief or perplexity daunted,
And when the meek husband asked "what may I wear?"
She answered "plaid-pants"—and he panted!

So, like a good wife, was the wardrobe her care,
(Neglecting it seemed to her wicked,)
And when she brought linen so shining and fair,
Saying—"wear this, dear Dick"—then he dickied!

And when a bright bud of divinity came
To gladden the home where it tarried,
They put to a vote that the young stranger's name
"Sweet Carrie" should be,—and *'twas carried!*

A VERY SLIGHT DIFFERENCE.—How one of our gay young brokers was recently furnished with a new wrinkle is told by his friends on the streets, as thus:

A fellow came riding a fair-enough looking horse to the front of the office at which Joseph does the needful trimming for his fellow citizens, and halloed:

"Say, understand you want to huy a hoss here, at this shop."

Banker leaned against the side of the door, half opened his eyes, shut 'em again, gazed sleepily at the bi-pedal, and then at the quadrupedal animal, and at last—

"How much?"

"A hundred and fifty dollars," was the reply.

"Can't give it, my friend. You're a good fellow, I don't douht, but I can't give that price. Some judge of horse-flesh myself!"

"Well, say what you will give!" exclaimed the horse-merchant; "I want to sell."

"Tell what." drawled Joe, very sleepily, "tell what—I'll give you *twenty-five dollars* for that horse."

"He's wuth more," said the jockey, tossing his legs over the saddle and sliding slowly to the ground; "hut I never was the man to let a *hundred and twenty-five* dollars split me in a hoss trade. He's yourn.

Banker took the horse and has him yet, having utterly failed in a dozen efforts to give him away. His last trial was to bestow him on Professor Snow, Veterinarian, to he used as a living illustration of nll the diseases to which the horse is subject in this climate. But the Professor steadily objects, on the ground that several of the beast's ailments may possibly he contagious.—*Montgomery, Ala., Mail.*

A BOUNCING GIRL.—Miss Rosina Delight Richardson, according to the Boston Journal, is a delectable armful, helonging to the State of New Hampshire, where she resides with her father, a substantial farmer. She is thus described: Miss Rosina is nineteen years of age, is five feet three and a quarter inches in height, measures five feet four and a quarter inches around the waist, six feet two inches around the hips, twenty-two inches around the arm above the elhow, fourteen in a straight line across the shoulders. At hirth, she weighed six pounds; at ten years two hundred and sixty-eight pounds; at fifteen years of age, three hundred and sixty-five pounds; and now, at nineteen years of age, she weighs four hundred and seventy-eight pounds! On estimating the quantity of cloth in her clothing when dressed for a ride on a winter's day, we found it to contain ninety-eight yards of three-quarter cloth.

A HOT PLACE.—An old Dutchman took a joh of hauling cotton across the country to a river and one day he stopped his horse ahout noon for the purpose of eating his dinner and giving refreshment and rest to his horses. Perceiving indications of a spring a little distance from the road, he left his son in charge of the horses and carried his tin pail over to the water. It proved to bo a hot spring, and the old Dutchman cried out in terror to his son, with n loud voice:

"Haunse! trive on! trive on de team, for Got's sake! *Haell* ish not von mile vrom dish playshe!"

FASHIONS.—Kerseymere for pantaloons, says a New York paper, of the plaid style now in vogue, have the stripes so far apart that a chap has to huy two patterns to get one check. Such proceedings ought to he checked.

IN Michigan, Mr. Henry Bills was married to Miss Mary Small. We hope the issuing of small bills is not prohibitedin that State.

THERE is no book so cheap as a newspaper in a family.

Roofs! Roofs!! Roofs!!!

Cheap, Substantial and Durable! Fire and Water Proof

MATERIALS FOR SALE!

THE subscriber would respectfully call the attention of Farmers and all others in the country, who contemplate erecting *Stores, Houses, Barns, &c.*, to the new and improved mode of Roofing, known, in the Eastern States, as

"Warren's Fire and Water Proof Composition Roofing."

It is admirably adapted to every class of buildings; is impervious to water or dampness; neither seams, cracks, warps, nor shrinks; can be easily repaired, if, from any accidental cause, it gets injured; can be walked on without injury; and, in all essential particulars, is immeasurably superior to every other mode of roofing now in use, and is rapidly working its way into general favor. Several of the largest and most expensive buildings in this city are covered with it.

The subscriber has on hand a large stock of materials, and will be in the monthly receipt of the same, so that he is prepared to fill all orders with dispatch, to any desired extent. The Felt is superior to any ever before manufactured either in the United States or in Europe. The Composition is put up in barrels ready for use. Written instructions, in regard to laying the roof, will be furnished all who wish to purchase materials for that purpose.

In laying the boards for this mode of roofing, it is necessary that they be *close jointed, straight edged, and nailed tightly*, so as to prevent warping. The most desirable pitch for this roofing is from *half an inch to an inch*, to a foot.

All letters of inquiry, or orders for materials, must be directed to the subscriber. J. H. PURKITT,
2 Office 34 Battery street, near Pine, San Francisco.

THE CALIFORNIA FARMER

Journal of Rural Sciences.

VOL. 2. SAN FRANCISCO, SATURDAY, AUGUST 26, 1854. NO. 8.

GRAND AGRICULTURAL and HORTICULTURAL FAIR,

OF THE

CALIFORNIA

STATE AGRICULTURAL SOCIETY.

The Government of the California State Agricultural Society invite the co-operation of all the Cultivators of the Soil, to an *Agricultural, Horticultural and Industrial Fair*, to be held in the City of San Francisco, commencing on the Fourth of October, and continuing Four Days. The Fair will be held in Musical Hall, Bush street, near Montgomery.

It is the desire of the Society to render all the aid in their power. They will receive, classify, arrange, and label all the various contributions. This will be done free of cost to contributors.

With an earnest will that the Exhibition should draw the finest productions of the State, Prizes amounting to Five Thousand Dollars for the best Farms, Gardens, Stock, specimens of Grain, Fruit, Flowers, Manufactures, Works of Art, &c., that shall be exhibited at the Fair, will be bestowed as enumerated in the List of Prizes annexed.

The Society are happy to state that the Steam Navigation Company have most liberally offered to convey to and from the Fair, all Stock and Articles intended for exhibition, *free of cost* to contributors. This instance of liberality deserves a just appreciation.

Prizes will be awarded by Committees who are disinterested, and who will be selected for the occasion.

That the Fair may be indeed worthy the noble Science of Agriculture, and of this great and influential State, we invoke the hearty co-operation of its friends, far and near.

The Hall will be ready to receive contributions on the 2d of October. Specimens not liable to decay, had better be sent as early as that day.

The Society will be very grateful to any and all who may possess Paintings or Statuary, appropriate to adorn the Hall during the Fair.

Works of Art will be received and duly noticed, and whenever very rare, suitable prizes will be awarded.

To encourage Home Industry, we take pleasure in announcing as follows.

PREMIUMS OFFERED

BY THE

California State Agricultural Society, 1854.

The following section from the Act of Incorporation, by the Legislature, is the the basis for the premiums announced below:

"Sec 8 There is hereby appropriated from any money in the Treasury not otherwise appropriated, the sum of Five Thousand Dollars annually, for the space of four years, to be paid in September each year, to the Treasurer of said Society, on a requisition on the Treasurer of this State, signed by the President and Recording Secretary of said Society, which sum shall be used only for the purpose of paying premiums, and for no other purpose whatsoever."

No premium will be awarded to any competitor, who does not strictly comply with the following rules and regulations:—

Competitors for premiums on Farms, Vineyards, Orchards, Nurseries and Gardens, must make application to the President, or Corresponding Secretary of the Society, before the first day of September, for the purpose of having them visited and examined by the Committee, at such time as the Society may deem best.

FARMS, VINEYARDS, ORCHARDS, ETC.

Best	$100

Best	
2d best

meritorious, although they may not be named in the list of premiums.

Each Committee is authorized to recommend special premiums upon objects that properly belong to the class assigned to them.

The managers of the Society will be present during the Fair to give directions to all who may wish to enter animals or any articles for premium or exhibition, and forage will be furnished gratis for all animals entered for premiums.

The Society earnestly desire to be informed, at the earliest possible moment, how far the different Farmers in the State can co-operate in this undertaking, and what specimens they intend to exhibit—so that suitable provision may be made for their contributions.

All communications upon the subject, will be promptly responded to, and all information cheerfully rendered.

The announcement of the awards, together with appropriate exercises, will take place on the last day of the Fair.

☞ Address the President, or Corresponding Secretary, San Francisco.

F. W. MACONDRAY, *President.*
E. L. Beard, Alameda County,
J. K. Rose, San Francisco Co.,
D. W. C. Thompson, Sonoma Co..
H. C. Malone, Santa Clara Co.,
W. N. Thompson, San Francisco Co.,
C. I. Hutchinson, Sacramento Co.,
J. W. Osborn, Napa Co.,
Vice Presidents.
C. V. Gillespie, *Recording Secretary.*
J. L. L. F. Warren, *Corresponding Secretary.*
David Chambers, of Page, Bacon & Co., *Treasurer.*

California State Agricultural Society.

ENROLL YOUR NAMES.

Certificates of Membership are now ready, and it is important that all who desire to unite with the Society, should forward the amount of subscription and receive their *Certificates.*

The following sections from the Act of Incorporation, are annexed, and will be a guide for action

Sec. 5. For the purpose of carrying into effect this act, F. W. Macondray, of San Francisco county, is hereby appointed President of this Society; E. L. Beard, of Alameda county; J. K. Rose, of San Francisco county; D W. C. Thompson, of Sonoma county; H. C. Malone, of Santa Clara county; W. N. Thompson, of San Francisco county; C. I. Hutchinson, of Sacramento county; and J. W. Osborne, of Napa county, Vice Presidents; J. L. L. F. Warren, of San Francisco county, Corresponding Secretary; C. V. Gillespie, of San Francisco county, Recording Secretary; Judge David Chambers, of San Francisco county, Treasurer; who shall call the first meeting of the Society at the city of San Francisco; and who are hereby authorized to solicit and receive subscriptions to said Society, as hereinafter specified.

Sec. 6. The members of this Society shall be composed of such persons as shall pay the sum of Ten Dollars to the Treasurer, annually, and such persons shall be members only for the year for which they shall have thus paid the amount aofresaid.

It is to be hoped that citizens of all interests will feel a desire to unite with this Society, and thus aid to make it efficient for good.

Destructive Fire in Butte—Prospects of the Crops.—A correspondent of the Herald of this city, writing from Chico, Butte county, Aug. 17, says: Some of our citizens in this nighborhood have sufferred severely from a recent fire, which broke out by some means on the Sacramento river a few days ago. About 16,000 bushels of grain have been burned, and nearly all the grass between Chico and Big Butte. Mr. Couples lost about sixty acres of excellent wheat. Messrs. Rice and McCutcheon also suffered considerable loss. One house burned down, with a fine set of carpenter's tools and about 200 bushels of barley. A considerable amount of grain was also burned on the west side of the Sacramento. Crops in this vicinity are generally good—wheat especially. Major Bidwell has as fine a crop of wheat as I ever saw. From five acres he threshed 282 bushels. The best of his crop blew down. Had it stood, it would have averaged 75 bushels to the acre. I saw a squash last Sunday, raised on Mr. Henshaw's farm, which weighed fifty-one punds.

San Jose Nurseay.—We take great pleasure in calling attention to the card of Messrs. Prevost & Co., of San Jose. We have visited this establishment and know it is deserving of particular notice. We heartily commend it to the notice and regards of all our friends, and shall give a full and extended notice in our extra the present week.

A Large Snake.—The Etupire County Argus states that Mr. L. Eggleston, while traveling from Johnstown to this place, a few days ago, killed a rattlesnake, measuring nearly *eight feet* in length, and having eleven rattles. Mr. E. had considerable difficulty in capturing him, as his snakeship was disposed to have a "fair fight."

THE CALIFORNIA FARMER. EXTRA.

SAN FRANCISCO, SATURDAY, August 26, 1854.

State Exhibitions.

The State of California, by her Senate and Assembly, passed a bill at the last session appropriating the sum of Five Thousand Dollars as Premiums to be awarded by the State Agricultural Society at their *annual* Exhibitions; that sum can only be appropriated for that purpose.

To support the Society—to prepare for the Annual Exhibitions—to make known by and through their publications the doings of the Society—to make that Society efficient, it is very requisite there should be means to carry on the the work. These means are raised by memberships, and it is to be hoped that all who feel a desire that the coming exhibition should be one worthy this State, will become sufficiently interested to enroll their names and take an active part in the doings of the Society.

There is much to be done, and the time is short; and it is important that members should be enrolled from all parts of the State.

An efficient Society, whose members are widely scattered and who make their influence felt in their several localities, can produce a vast amount of good; and the California State Agricultural Society, by its members, has it in its power to accomplish much.

Every person that enrolls his name will become an active member, and be the recipient of all the privileges that may hereafter flow from societies of kindred origin, and from the General Government.

There can be no doubt that each member will be more than amply rewarded by the privileges and benefits arising from the present contemplated Fair in October next.

By referring to the publications in this sheet, to section 8, on the 1st page, and to section 5 on the 2d page, members will note *how the appropriations are to be made*, and the terms of membership. Judge David Chambers, of Page, Bacon & Co., is the Treasurer; and each member of the Executive Committee is authorized to enroll members. Persons desirous to join the Society and receive the benefits arising from it, are invited to call and obtain Certificates from the Treasurer or of the Executive Committee.

Members Certificates are at our office, with copies of the Constitution, where all the needful information will be cheerfully rendered.

Nursery Notices.

We would call very particular attention to the advertisement of the Messrs. Hovey & Co., of Boston, Mass., *Nurserymen, Seedsmen, and Florists.* It has been a pleasure to us to note the advance of Agriculture, Horticulture and Floriculture in California—it has been more than a pleasure—it has been our endeavor and study to aid onward these glorious sciences to the utmost of our ability; and now when we see the gathered treasures of the older States—their well stocked nurseries—their best seed warehouses—their conservatories, vieing with each other to pour these treasures into Californai, we rejoice earnestly, and we say to them, gather your *richest and best*—these, and these only, are what California wants.

We are most happy to publish to-day the card of the Messrs. Hovey, of Boston—and as nurserymen, as seedsmen and florists we can most cheerfully commend them to our friends in California who desire to import from the East either seeds, trees, plants, or shrubs. They have undoubtedly one of the largest and finest stocks in the East, in every department of their business; they make their business their study; they are practical working men, and they take an honorable and just pride in excelling. We know their grounds well, and from a personal knowledge of them and of their skill and attention to business, we conscientiously say to our friends—you can rely upon this establishment for everything you wish to import.

Messrs. Hovey & Co. deserve well of the country for their zeal and perseverance in the cause of horticulture. We remember well, years and years gone by,—(before Hovey's Magazine of Horticulture was started)—the little green house and garden plat near the smoke house. We remember the brothers Hovey, and their early endeavors to excel in whatever they then produced. This was the early beginning—it was well. It was their example that stimulated others, and has called into action many a skillful cultivator; and the pages and reports of the "Massachusetts Horticultural Society" will find enrolled many a name as member of that eminent Society, and many a gem in horticulture and kindred science inscribed there, that has been stimulated and brought into action by the early efforts of the Messrs. Hovey and a visit to their gardens at Cambridgeport, Mass. Men may not always be willing to give credit when credit is due, but we ourselves remember how the exhibitions of their skill and taste aroused our own, and we are willing to give them credit for it, and know it had an influence upon us for good.

We feel it but an act of justice to speak thus, and say also that the largest and finest invoice of fruit trees that has ever been imported into California, came from Messrs. Hovey & Co.'s nurseries, the last year, and were exhibited at our warehouse on Battery street; many will remember that *pears were formed and grew upon the trees on their passage out, and we exhibited them here.* These were the finest trees we ever had from the east, and many of them will bear fruit for the Exhibition the present year.

Hovey's Magazine of Horticulture has now reached its *twentieth volume*, is justly ranked as one of the first magazines of the kind in our country, is most deservedly popular, and has arisen and been brought into action by this same enterprising firm. It is a work we also recommend to our friends, and we shall be glad to forward subscriptions to them for their magazine.

We have written more than is usually accorded to a mere notice—but this deserves more, and we are pleased to do justice to the deserving.

Sacramento County Agricultural Society.

We publish the letter of the Secretary of this new Society, and the report of their meeting last Saturday. We now publish the Constitution and By-Laws in this issue, and do it *free.* It was received one day too late for our weekly issue; but we now give it in full, together with other equally important matter. The letter of the Secretary reveals the cause of the laggish feeling in regard to the great interest of the State. The leading journals of the day are established and maintained as political journals, and it is not to be expected they could give their columns to any great extent to Agriculture, yet we do believe that they committ a fatal error in not giving it more space. Many of our journals we are happy to see, express a genuine and combined interest by their notices, &c.; but we believe their pecuniary interests would be favorably affected if they would do more. In this instance of Sacramento, we should have thought the two journals of that city would have tried to publish the Constitution and By-Laws of their own County Society, and to have devoted a liberal space to so great on interest. There are no two journals in the State more widely circulated than the "Sacramento Daily Union" and the "State Journal," and certainly do we accord the Union to be one of the ablest in the State. No paper is more ready with important news for its readers; no paper is got up in better style or furnishes better matter, or exerts a wider influence. It is for this very reason we would urge its influence in pleading for the Agricultural interest of its own county.

And the "State Journal," we have ever found it ready, and we plead for a continuance of the same, and even more interest. Sacramento county demands it, for there is much dependant upon it. Let these journals then both, see that their interest and influence is felt for the coming meeting next Saturday, 26th inst., at McNulty's Hall, and they may be assured their own interest as well as that of the County will be promoted.

New Market.

Come go with us to market this morning, and take a trip through the New Market—they tell us it is in advance of all we have yet seen in California. Beginning at No. 1, here's Mr. and Mrs. Weaver's stall—we find them as busy as ever; look here and see the fruit—pears, peaches, apples plums, apricots, nectarines, strawberries, blackberries, raspberries, whortleberries, oranges, &c.

Who would not be an enthusiast? Just look at the quantity around—the *quantity* and *quality;* the fruit, the garden vegetables, butter and cheese. Here is the "well-stalled ox," the "fatted calf," mutton fit for the palate of an epicure: game, fish,—in fact there is nothing we may not find at Washington Market.

Look at that fine array of "fat things" of the land—the sign over the stall says Joseph Begin, and if he has not made a good beginning we lose our guess.

We took a look at stall No. 8, Edwin Faxon's; such an array of fine things—butter, cheese, preserved fruits, &c.; if any doubts, go there, and you can easily obtain "facts on dairies" to satisfy you.

A single look at stall 2 and 3, Trofatter & Co., will make you grow fatter each day you live.

Look at Valin & Cardinet—to catch such fish a man must be as valiant as a Cardinal, for we think the names so intended it.

That game—do not name too much of it—every kind for an epicure; and Mr. Anderson at his stall would feed a man with good things till he sings in his old age as happy a song as "John Anderson my Jo John," his name sake.

And then, too, King's stall—here is a choice bit fit for the palates of a king; and should the "King" have too many customers he can go to his neighbor "Piley," stall 15 and 16, and there too find a pile of the "fattest and sweetest" that any good liver might be satisfied with.

One look more, before we go—Sweetser & Co. Here is everything to tempt the palate: butter and cheese that melt upon the tongue, game, &c.; and when our fair friends market, they have only to say, "Sweet-Sir, fill my basket," and it is done and done well, too.

But we must save a *little* for marketing another day, at the "Washington Market," for it bids fair to rival all others.

California on Canvas.

How common a thing it is for the mass of men to pass every thing that is "home made," as common or unclean. Give it but a tip of the "forcign," and all run for it—offer a painting of Vesuvius, or the Alps, and crowds gather around it. But place before them "Niagara," with its roaring torrent; "Superior," with its world of waters, or the towering Mountains and beautiful Valleys of some of our Eastern States, and—oh, we can see *them* at any time, they are common. This is all wrong; we should love home and home scenes most.

"California on Canvas" is worth more than all the pictures ever yet painted. It is the *daguerreotype* of a mighty empire, whose infant features are but just bursting into light. Go then, and look upon glimmerings of coming greatness. These pictures are so beautifully true that all (our country friends included) should see them.

New England Seed Store.

AGRICULTURAL WAREHOUSE.

This old established House at Sacramento City, commenced in 1850, by Warren & Co., and continued by Warren & Son till May last, is still in full operation with a complete stock of implements, tools and seeds, by their successors, Messrs. Baker & Hamilton. We commend most kindly this House to the notice of all the Cultivators of the great Valley of the Sacramento, and we can speak strongly of Messrs. Baker & Hamilton to our old friends. Mr. Hamilton has been with us and served his time in our employ, and we know his abilities and qualifications and we the more cheerfully speak from personal knowledge. Mr. Baker we have known long and well, and we say again to all the patrons of our former business, that they can rely upon having their orders carefully and promptly filled at our old stand, and we ask for this house a generous support. With the autumn season Messrs. Baker & Hamilton will receive a large and varied stock for every branch of trade, and such as will be worthy of the especial notice of the Farmers of Sacramento Valley. We shall feel especial pleasure in knowing our old friends still give their patronage to the *New England Seed Store* of Messrs. Baker & Hamilton, of Sacramento; and we will return our thanks by presenting from time to time, through the California Farmer, all those matters that are esteemed of moment to the great interest of Agriculture—our especial duty now being to act as *Seedsmen for the Mind,* giving our entire devotion to our journal.

August 26th, 1854.

Letter from the "Big Tree," by Dr. C. F. Winslow.—There can be no need of a word from us to call the attention of those who have perused the previous letters of this gifted writer. They will seek them as a thirsty soul would clutch again the cup at the gushing spring. The present letter will be sought for and read with more than ordinary delight, by every one who has a gleam of the true or beautiful in their nature. Those who have not the first of these letters, can find them at our office.

Barley Burnt.—We learn from the Stockton Argus, that the barley field of Vance & Athens' ranch, six miles above Staples' ranch, caught fire on Saturday, 12th inst., and burned 150 acres of barley, it having just been cut. The house was saved with great difficulty by plowing.

Agricultural Meeting at Sacramento.

SACRAMENTO CITY, August 22d, 1851.

MESSRS. EDITORS: I herewith send you a report of the "Sacramento County Agricultural and Horticultural meeting," held in this city on Saturday last, which you will do us the favor to publish in your valuable paper. You will see by the proceedings that a Constitution and By-laws were adopted, and an organization of a County Society nearly completed. Our city papers are so full of important matters at this time, that we cannot find it in our hearts to trespass upon their columns. You are aware that the political canvass is now fully open, and to ask political journals to publish articles upon subjects as *unimportant and uninteresting as Agriculture*, to the exclusion of discussions which affect the *sacred rights of the dear people* and our glorious country, would be unkind indeed. You will therefore confer a great favor upon the Farmers of this County, by giving the proceedings of our meeting, and our Constitution and By-laws a place in the FARMER.

Your ob't serv't,
GEO. R. MOORE, Secretary.

The Sacramento Agricultural and Horticultural Society met on Saturday, August 19th, '51, pursuant to previous notice, and organized by calling Col. SMART to the Chair, and electing GEO. R. MOORE Secretary.

The Committee appointed at the last meeting to draft a Constitution and By-laws for the government of the Society, submitted their report, which was accepted and the committee discharged.

The Constitution and By-laws were then taken up by sections, and unanimously adopted, as follows:

CONSTITUTION.

PREAMBLE.

Whereas Agriculture is the basis of a Nation's prosperity, and whereas Agricultural Societies have ever proved efficient agents in elevating and advancing this all-important branch of industry. Now, therefore, we the undersigned, for the more rapid advancement of the Agricultural interests of our State and County, do hereby organize ourselves into a Society, and agree to be governed by the following Constitution and By-Laws.

ARTICLE I.

This Society shall be called the "Sacramento County Agricultural and Horticultural Society."

ARTICLE II.

Sec. 1. The officers of this Society shall consist of a President, Vice-President, Recording Secretary, Corresponding Secretary, Treasurer, and Board of Managers.

Sec. 2. The President shall preside at all meetings of the Society, and of the Board of Managers; put and decide all questions, maintain order, sign all orders drawn on the Treasurer, and perform such other duties pertaining to his office as the Society may require.

Sec. 3. The Vice-President shall perform all the duties of the President in his absence.

Sec. 4. The Recording Secretary shall keep a fair and impartial record of the transactions of the Society, register the names of all members in a book to be provided for that purpose, certify all papers and records under the direction of the Board of Managers, and countersign all orders drawn on the Treasurer. He shall report to the Society all members in arrears, immediately previous to the election of officers; give due notice to the officers and members of all meetings of the Society, and perform such other duties as the Board of Managers or the Society may require.

Sec. 5. The Corresponding Secretary shall correspond with such Societies or individuals as he or the Board of Managers may deem expedient. He shall keep copies of all letters sent by him, and preserve a file of all communications received by the Society; he shall officiate for the Recording Secretary in his absence, and perform such other duties as the Society or Board of Managers may require.

Sec. 6. The Treasurer shall safely keep all moneys belonging to the Society, pay the same out on the order of the Society, signed by the President and countersigned by the Recording Secretary. He shall collect all moneys due the Society, and make a correct report of all receipts and disbursements on the first Monday in February of each year, and oftener if the Board of Managers require, and perform such other duties as may be required of him by the Society.

Sec. 7. The Board of Managers shall have general supervision of the affairs of the Society. They shall meet for the transaction of business semi-annually, on the first Monday in February and August; and call meetings of the Society whenever the interests of the Society require it. They shall have power to fill vacancies in any of the offices. A majority shall constitute a quorum for the transaction of business.

ARTICLE III.

The Board of Managers shall consist of nine members, including the President, Vice-President, Recording and Corresponding Secretaries and Treasurer—who shall be *ex officio* members of the Board.

ARTICLE IV.

The Society shall meet annually, on the first Monday in February in the city of Sacramento, and at such other times as the Board of Managers may think expedient.

ARTICLE V.

No person shall be a member of this Society who is not a citizen of the United States, or has not declared his intention to become a citizen, and signed the Constitution and paid the initiation fee required by the By-laws.

ARTICLE VI.

The officers of this Society shall be elected (after the first election) on the first Monday in February, annually.

ARTICLE VII.

No person shall be eligible to any office (after the first annual election) unless he has been a member of the Society three months.

ARTICLE VIII.

This Constitution shall not be changed, altered or amended, unless by a vote of two-thirds of the members present, at a stated meeting. Such amendment or alteration having been previously submitted in writing.

BY-LAWS.

Art. 1. Any person who is a citizen of this county may become a member of this Society by signing the Constitution and paying an initiation fee of five dollars—and the Society shall have power to admit honorary members.

Art. 2. Every member shall pay into the treasury of the Society, five dollars annually.

Art. 3. No money shall be used except for the benefit of the Society, or the agricultural interests of the county.

Art. 4. The Board of Managers shall have power to remunerate the Recording and Corresponding Secretaries for their services.

Art. 5. All elections shall be by ballot and decided by a plurality of votes, each member having one vote only.

Art. 6. Any member may be expelled for misconduct, by a vote of two-thirds of the members present at any stated meeting.

Art. 7. No member shall be entitled to vote at any meeting of the Society till he shall have paid his annual assessment.

Art. 8. Any fifteen members of this Society shall constitute a quorum for the transaction of business.

Art. 9. These By-Laws may be amended by the vote of a majority of the members present at any regular meeting, the proposed amendment having been previously submitted in writing.

The meeting then adjourned to meet on Saturday, August 26th, at 2 o'clock, P. M.; at which time permanent officers will be elected.

Steam Farming.

WE would invite the attention of our readers to the following very interesting sketch from one of our English exchanges. This is but a type of the future, for the features of the present develop a most glorious future. Genius will be put to its utmost tension to invent such labor saving machinery as, were it present to our minds now, might seem a monstrosity. Yet the time is rapidly approaching when simple agricultural implements will perform the labor of twenty, forty and fifty men. The tone and character of the *fete* we especially commend.

It is pleasant to see that this wonder-working power can bring landlords and mill-owners into social intercourse, honorable to both sides; it is not less remarkable that it bids fair, ere long, to merge the two great classes in the one class of manufacturers. In one aspect it is exalting the present manufacturers to a level with the lords of the soil—in the other it is converting the landlords themselves into master manufacturers, and their farms into manufactories. The day after Mr. Salt's princely *fete*, Mr. Mechi was the invited guest of the Herts Agricultural Association. An earl and a baron, and so forth, were assembled, in expectation of the speech of the day from a London tradesman; one who had made an irruption from the counter (with wealth amassed there), into the broad acres of territorial aristocracy. Nor did the guest disappoint the nobility and squires who had invited him evidently to stimulate their own tenants. He dealt out wholesome suggestions to landlords of large estates, complaining of want of capital to improve, honestly advising them to sell part of their land and improve the rest with the money. He rebuked tenants, who, clinging to their old ways, grudged the landlord a fair interest for the money he had laid out; but the burden of his speech was steam.

The amount of steam power in any agricultural district, he took as the test of its condition. People thought him crazy when he first put up a steam engine; but now, two makers in the village had more than they could do to supply the neighborhood fast enough. Lincolnshire and Norfolk farmers have, some of them, one, two and even three engines on a farm! Herts had but made a beginning; he was sure they would soon get deeper into it. But the grand agricultural achievement of steam is yet to come. Its advent is nigh. Mr. Mechi is now building the engine at a cost of two hundred pounds, which is to *plough* the land and do almost everything besides. A Canadian engineer, neglected in his own province, is working at Tiptree, under Mr. Mechi's patronage; soon the implement is to be ready which is to revolutionize British agriculture, "to enable farmers to plough twelve inches deep instead of five inches, and to benefit agriculture to the tune of ten millions of pounds per annum!" What are all the laughts of rival Chancellors of the Exchequer to this? His guests, the gentlemen of the toplofts and counters at least were wrong either by over rank assessment, or by not having [illegible] Income [illegible] Property [illegible] However, the same tools remain that [illegible] have [illegible] all these years, that coal-fires and consequently [illegible] and [illegible] that the [illegible] [illegible] to the manufactory; and the farmer and his laborers bid fair in another generation, to equal in intelligence their brethern of the towns.

TWO MEN HUNG.—Amedie Cance and Peter Anchambalt, one a Frenchman, and the other from Illinois, arrested for cattle stealing, were taken at Withrell's Hotel, San Antonio, on Wednesday last, 23d inst., and hung on a tree. Forty persons from the Redwoods, and several others who had lost cattle in the neighborhood, were present, and aided in the execution. Attempts were made to rescue Canee, by some Frenchman, but without success. It is said that Cance was wealthy.

SAVINGS BANK,

Corner of Clay and Montgomery streets, San Francisco.

[ESTABLISHED FEBRUARY, 1851].

Interest, one and one-half per cent. per month.

THE establishment of this institution, three years and a half ago, was upon the plan and operations of similar Institutions in Europe and the Atlantic States, regulating the rates of interest by the value of money in this country.

DEPOSITS draw interest at the rate of one and a-half per cent. per month, as per "Rules and Regulations" to be had at the Bank. Special agreement for money deposited for a specific or particular time. Deposits with Interest payable on demand.

☞ Exchange on all the Atlantic Cities. Gold Dust bought at market rates. Usual Banking facilities afforded, and deposits received from merchants and other business men.

7 ROBINSON & CO.

JOSEPH M. BROWN & Co.,

95 *Sacramento and* 81 *Battery streets, San Francisco.*

IMPORTERS AND DEALERS IN

Hardware, Mining and Agricultural Implements.

Brown's, Ames' and Rust's Shovels; Tuttle's Sluice Rakes; Collins' heavy and light Picks; Ploughs of all kinds; Fan Mills, Straw Cutters; Builder's Hardware, in great variety; Carpenter's Tools of every description.

We invite the trade to call and examine this extensive stock. At the sign of the Golden Anvil.

8 JOSEPH M. BROWN & CO.

Silver and Silver Plated Ware.

THE subscribers invite attention to their large and general assortment of Silver and Silver Plated Ware, consisting of

Tea Sets, Cups,
Waiters, Cake Baskets,
Pitchers, Castors,
Salvers, Spoons,
Goblets, Forks, &c.

These goods are all of the best quality, imported expressly for our own trade, and are offered at reasonable prices.

G. C. & S. S. SHREVE,
4 tf 139 Montgomery st., two doors south of Clay.

Jewelry and Silverware.

OUR immense stock of WATCHES, JEWELRY, DIAMONDS and SILVER WARE, has been imported by ourselves, for a Regular Customer Trade, and is of the mostly costly and superior description, but owing to the depressed state of the market at present, we are disposing of them at New York prices.

BARRETT & SHERWOOD,
City Observatory, 135 Montgomery street.

N.B.—Quartz Jewelry of our own manufacture, at greatly reduced prices. 5

Dennis' Wire Works.

ORDERS executed for Wire Cloth for Flour Mills, Fanning Mills and Threshers. Also, for every description of Fancy Wire Work.

Wire Fencing put up in the best manner. Staples for Fencing, on hand.

Every style of Bird Cages, Coal Screens, Meat Safes, Sieves, &c., on hand and for sale by the Agents,

CHAPIN & SAWYER,
9 Nos. 127 and 129 Sansome street.

Watches and Jewelry.

WE would direct the attention of those in want of fine Watches to our present stock, comprising manufactures of F. B. Adams & Son, T. F. Cooper, M. I. Tobias & Co., and David Taylor, names too long and favorably known to require comment. We are also sole agents in California for the sale of Samuel Lowry's Watches, which, for correctness of time and beauty of finish, stand unrivalled.

We are continually receiving, by every steamer, additions to our stock of Diamonds and Jewelry, which we will sell as low as any others in the business, and are prepared to substantiate all that we guarantee. G. C. & S. S. SHREVE,

139 Montgomery street, two doors south of Clay.

N.B.—Watches of all descriptions repaired by skillful and experienced workmen. 4 tf

To Fruit Growers in California.

HOVEY & CO., Seed and Nurserymen, No. 7 Merchants' Row, Boston, Mass., invite the attention of Cultivators of Fruit in California, to their very extensive collection of Fruit Trees of all kinds, particularly of Pears; embracing every variety worthy of cultivation, to be obtained either in this country or in Europe. They offer for sale—

100,000 Pear Trees, of all the choicest kinds both upon Pear and Quince stocks, dwarf and standards;
50,000 Apple Trees, in 50 varieties;
25,000 Plum Trees, in 30 varieties;
20,000 Peach Trees, in 25 varieties;

Also,—Quince and Cherry Trees; 40 varieties of the finest Grapes; 12 varieties Currants, 10 varieties Raspberries, 10 varieties choicest English Gooseberries, and 50 varieties Strawberries, including our Hovey's Seedling, which has not yet been equalled for size and productiveness.

Also,—100,000 Asparagus, and 20,000 Giant Rhubard Roots. An immense collection of Ornamental Trees and Shrubs, Roses, Greenhouse Plants, &c., &c. Agricultural and Garden Seeds of every description, and of the best quality, constantly for sale.

Catalogues sent to post-paid applicants.

Messrs. HOVEY & CO. would remark that their mode of packing trees for California, has met with the greatest success, and they feel confident of being able to give satisfaction to those who may favor them with their orders.

Address, HOVEY & CO., No. 7 Merchants' Row,
8 Boston, Mass.

San Jose Nursery.

WE are prepared to supply the trade with the best varieties of Fruit Trees, Grape Vine, Roses, Plants, &c., in all their varieties; and are disposed to sell at a low price, that we may suit the times. Our Trees are cultivated with great personal care. Those who favor the Nursery will do well to visit and ascertain for themselves our ability to supply what we advertise. Trees will be carefully labeled and packed for any climate or country.

The following Trees we offer this season:

Pear Trees,	44 varieties,	Strawberries,	7 varieties,
Pear	do 44 do	Fig Trees,	
Apple	do 54 do	Pomegranates,	
Plum	do 15 do	Walnuts,	
Apricots	6 do	Currants,	
Almonds	2 do	Locust Trees, very large,	
Quinces	do 2 do	Rose Acacias,	
Cherry	do very fine	Osage Orange,	
Grapes,	18 do		

In addition to our Fruit and Ornamental Trees, we have an extensive assortment of Greenhouse Plants, Roses, Bulbous Roots, Dahlias, Verbenas, Pinks, Carnations, Pansies, Phloxes, Petunias, Lobelias, Fuchsias, Heliotropes, Salvias, Gladiolus, Tuberoses, Cannas, Tigridias, Amaryllis, Lilies, Ixias, Sparaxis, Oxalis, Ranunculus, Anemones, Hyacinths, Tulips, Crocus, Jonquils, Narcissus, Iris, Snowdrops, Crocus, Colchicums, Polyanthus, Primroses, Auriculas, Cyclamens, Calceolarias, Cinerarias, Gloxinias, Achimenes, Gesneras, Begonias, Tydeas, Lantanas, Salpiglossis, Nemophilas, Collinsias, Clarkias, Eschscholtzias, Gilias, Leptosiphons, Linanthus, Phacelias, Whitlavias, Larkspurs, Lupines, Poppies, Candytufts, Mignonette, Sweet Peas, Asters, Stocks, Balsams, Cockscombs, Globe Amaranths, Zinnias, Marigolds, Sunflowers, Nasturtiums, Morning Glories, Convolvulus, Petunias, Portulacas

Dr. C. F. Winslow's Letters from the Mountains.

THE "BIG TREE."

WASHINGTON MAMMOTH GROVE, August 8th, 1854.

DEAR SIR: At half-past three P.M. yesterday, we started from Murphy's for the Big Tree, on the stump of which I am now writing. The ride is fifteen miles long, and is one of the most varied and charming which I have ever enjoyed. At first you follow a ravine for several miles, hedged in by sloping and rounded hills, sparsely wooded with varieties of the conifera; and in the bottom of this winds a clear brook which forms the stream of the Union Water Company, for supplying the miners with water during the dry season at Murphy's Camp. Subsequently the beautiful ravine opens into a broad vale, which at last is lost in the gentle slopes and varying aspects of landscape that swell and charm the eye in all directions. A great variety of pines, oaks and other trees and shrubs add finish and endless charm to this fresh and virgin landscape. After gradually ascending for some miles by a winding and well made carriage road, you reach points where the lofty and magnificent pines open and afford prospects of distant mountain slopes and summits, covered to the uppermost ridge with such grand and magnificent coniferous forests that I will not attempt to describe them. The sun shone with heated and golden beams, and the light, softened and mellowed by the radiating vapors of the highlands, lent tints to the verdant wilderness and towering ridges which heightened the charms and magnificence of the broad and wild panorama. The road was more or less shaded all the way by pines so gigantic as to awaken in me, who had never before seen the native and lofty forest scenery of the north temperate zone, the strongest feelings of wonder and admiration. I had never before conceived of the capacity of the various species of conifera to attain such enormous dimensions. They were often six feet through, and from one hundred and thirty to three hundred feet high, and so symmetrical and perfect in form as to impress me with new and more commanding ideas respecting the force and operation of the vital principle presiding over the nourishment and growth of organized bodies. The delicate and symmetrical development of some of these towering and gigantic vegetable forms filled the mind with emotions of the beautiful, similar to those felt at beholding the most perfect models of the human form wrought from marble or delineated on canvass. There they stand against the deep blue sky, cell having been added to cell by slow processes of growth, fashioned by the breath of the Almighty, until they have attained such strength as to defy the ordinary methods of violent destruction. All along the last few miles of the road I was filled with impressions wholly new, and often involuntarily surrendered myself to the idea that I was approaching the visible and actual presence of the Great One, who revealed himself to Moses on the heights of Sinai. Such sublime thoughts have rarely impressed my soul, and it is only here, in the midst of these living wonders of the mountain forests, that such conceptions have been awakened to their complete height of grandeur and awe. On the summit of these lofty mountains, amid the columns of this great temple of nature, I am compelled to bow down and acknowledge the utter nothingness of mortal man and the infinite greatness of the power that hovers around the globe and weaves a germ from the dust of the earth that shall outlast sixty human generations.

But another order of reflections crowd upon the mind. What changes have transpired in the condition of people and of States since the germ shot down the root on which I record these thoughts. The golden age had not yet dawned on the Roman empire, and the ancestors of the present polished races of Great Britain, France and Germany, were naked and wandering savages in the bleak and snowy forests of northern Europe. Within this time the man of Nazareth and the prophet of Mecca have overturned the dogmas and idolatrous worship of the benighted nations of Asia and Europe, and, like the waves of the ocean, little and great kingdoms have arisen, and, melting away, mingled their elements with each other, until no trace exists of their former bounds or grandeur. How strangely interesting are all these multitudinous events when crowded by contrast into a space of time occupied by the growth and life of a single tree on these Alpine and lonely heights. If the lifetime of a single vegetable germ shall outlast and look down on all these strifes and transitions of the races of man for two thousand years; how ancient must be the earth, the parent and the stage of them all?

The height of this spot above the ocean is rather less than five thousand feet, and it is two thousand four hundred feet above Murphy's Camp. The road, gradually ascending for several miles over a varied landscape, becomes afterwards more level, or rather it undulates and winds for a long stretch among hills and vallies thickly wooded, and fit for farms, and deer parks. During the last three miles the ascent is steady and through a virgin wilderness of pines, firs, spruce, arbor vitæ and other cone bearing trees, whose magnitude perceptibly increases with the altitude of the locality. The whole surface of the hill sides is covered with herbage or plants, more or less verdant, and in spots there is a freshness to the verdure which reminds one of spring, and which contrasts strongly with the arid and dusty plains and hills of the lower sections of country. The wild raspberry, strawberry, pea and hazelnut mingle their humble or more prominent foliage with the diversified undergrowths of the forests, and here and there new and attractive flowers struck my eye so pleasingly that I was compelled at times to stop, gather, examine and admire them. The charm of these regions to the botanist would be in the freshness and luxuriance with which nature elaborates her vegetable forms. The vital principle, stimulated by the condensing vapors of the cool fresh of night, and nourished by a suitable pabulum in the decomposing soil, acts with a steady energy, and thousands of stately trees stud the hills in all directions, so lofty as to amaze the observer and to compel him when near them to strain his eyes to catch a view of their topmost offshoots. But the most amazing of all these vegetable productions is here, and nature, by peculiar geognostic arrangements, seems to have isolated them to startle and arrest the attention of mankind, and to strengthen scientific truth touching the special distribution of organic races. So far as known, the vegetable growth to which the name of "Big Tree" has been attached, grows in no other region of the Sierra Nevada, nor on any other mountain range of the earth. *It exits here only*, and all the individuals of its kind, so far as I can learn, are localised to this vicinity. They are embraced within a range of two hundred acres, and are enclosed in a basin of coarse silicious material, surrounded by a sloping ridge of sienitic rock, which in some places projects above the soil. The basin is reeking with moisture, and in the lowest places the water is standing, and some of the largest trees dip their roots into the pools or water-runs. The trees of very large dimensions number considerably more than one hundred. Mr. Blake measured one ninety-four feet in circumference at the root; the side of which had been partly burnt by contact with another tree, the head of which had fallen against it. The latter can be measured four hundred and fifty feet from its head to its root. A large portion of this fallen monster is still to be seen and examined; and by the measurement of Mr. Lapham, the proprietor of the place, it is said to be ten feet in diameter at three hundred and fifty feet from its upturn root. In falling it had prostrated another large tree in its course, and pressed out the earth beneath itself so as to be imbedded a number of feet into the ground. Its diameter across its root, is forty feet. A man is nothing in comparison of dimensions, while walking on it or standing near its side. This to me was the greatest wonder of the forest. The tree which it prostrated in falling has been burnt hollow, and is so large, a gentleman who accompanied us from Murphy's informed us, that when he first visited the place two years ago, he rode through it on horseback for 200 feet without stooping, but at one spot as he entered at the root. We all walked many scores of feet through it, but a large piece of its side has fallen in near the head. But there are many standing whose magnitude absolutely oppress the mind with awe. In one place, three of these gigantic objects grow side by side, as if planted with special reference to their present appearance. Another so monstrous as to absolutely compel you to walk around it, and even linger, is divided at from fifty to a hundred feet from the ground into three of these straight mammoth trunks, towering over three hundred feet into the sky. There are others, whose proportions are as delicate, symmetrical, clean and straight as small spruces, that rise three hundred and fifty feet from the ground. In one spot a huge knot of some ancient prostrate giant is visible above the soil, where it fell ages ago, and the earth has accumulated so as nearly to obliterate all traces of its former existence. The wood of this tree, I am told by Mr. Lapham, is remarkable for its slow decay. When first cut down its fibre is white, but it soon becomes reddish, and long exposure makes it as dark as mahogany; it is soft and resembles in some respects pine and cedar. Its bark, however, is much unlike these trees; nearest the ground it is prodigiously thick, fibrous, and when pressed on has a peculiar feeling of elasticity. In some places it is eighteen inches thick, and resembles a mass of cocoa-nut husks thickly matted and pressed together, only the fibrous material is exceedingly fine, and altogether unlike the husk of the cocoa-nut. This bark is fissured irregularly with numerous indentations, which give it the appearance of great inequality and roughness. A hundred and fifty feet from the ground it is only about two inches thick on the living tree, which is now being stript of its bark for transportation from the country.

The cone of this tree is small and compact, and nearly regularly oval; and although the tree itself is the largest of the conifera, its fruit is as small as that of the dwarfish pines of North Carolina and Cape Cod. Its foliage is not, as a general thing, altogether agreeable to the eye, as the head of the tree is small in proportion to the size and height of the trunk. But the boughs, when examined more closely, are bright-green, rather complicated and delicate in structure, and pleasing to the mind by contrast with the rough and gigantic stem and branch from which they spring.

The name that has been applied to this tree by Prof. Lindley, an English botanist, is Wellingtonia Gigantea. By him it is declared to be so much unlike other conifera as not only to be a new species, but to require description as a new genus. Other botanists, of eminence, think differently. To this, however, he has seen fit to apply the name of an English hero, a step indicating as much personal arrogance or weakness as scientific indelicacy; for it must have been a prominent idea in the mind of that person that American Naturalists would regard with surprise and reluctance the application of a British name, however meritoriously honored, when a name so worthy of immortal honor and renown as that of WASHINGTON would strike the mind of the world as far more suitable to the most gigantic and remarkable vegetable wonder, indigenous to a country, where his name is the most distinguished ornament. As he and his generation declared themselves independent of all English rule and political dictation, so American Naturalists must in this case express their respectful dissent from all British scientific "stamp acts." If the "Big Tree" be not a Taxodium, let it be called now and forever *Taxodium Washingtonium*. If it should be properly ranked as a new genus, then let it be called to the end of time, *Washingtonia Californica*. The generic name indicates unparalleled greatness and grandeur; its specific name, the only locality in the world where it is found. No names can be more appropriate, and if it be in accordance with the views of American botanists, I trust the scientific honor of our country may be vindicated from foreign indelicacy by boldly discarding the name now applied to it, and by affixing to it that of the immortal man whose memory we all love and honor, and teach our children to adore. Before many ages shall elapse the ruthless hand of man, or climatic changes, may totally annihilate the few giants of this remarkable race, now growing on and confined to this small basin in the Sierra Nevada. Seeds indeed may be planted and means employed to prolong its existence elsewhere, but few spots of earth, perhaps none, will be so eligible for its natural and complete development as its present locality. Under any and all circumstances, however, whether of perpetuity or extinction, the name of Wellington should be discarded, and that of WASHINGTON attached to it, and transmitted to the schools of future ages.

At this place is a very excellent public house, kept by an urbane proprietor, who spared no pains to interest us and give all information in his power. The half I heard or saw, I have not noted here. The hotel is built near the "Big Tree," whose bark was stripped last year and exhibited in San Francisco. An appendage of the house is built over it, and it constitutes a hall for cotillion parties; at the root it measures ninety-six feet in circumference, and a portion of its prostrate trunk is used for a bowling alley. To overthrow it holes were bored through it with a large auger, and after the trunk was mostly separated, attempts were made to wedge and upset it. But its immense size and weight prevented the success of this undertaking, and on the fourth day it fell by the force of a strong wind. In falling, it convulsed the earth, and by its weight forced the soil from beneath it so that it lies in a great trench, and mud and stones were driven near a hundred feet high, where they have left their marks on neighboring trees.

The coolest, purest, choicest water in the world is here. I have never tasted such water in all my wanderings over the earth. The well that supplies it is sunk twenty-two feet, through coarse sienitic sand and fine angular gravel, apparently the mere unwashed detritus of the neighboring ridges of the basin, and the water stands twelve feet deep in the well.

Here we spent the night; rose early and inspected the forests, and contributed a large share of blood for the maintenance of the numerous musketos that infest the luxuriant under-growths of the moist and teeming soil. The abundance of these pertinacious and venomous creatures was the only drawback to our enjoyment; but I have seen them no where else, away from the delta, and even during the night the cool temperature destroyed their activity here.

The night spent here was delightful. The moon shone with unparalleled splendor, and the atmosphere was so pure that it seemed as if the stars of heaven had quadrupled in number. I shall never forget this night, nor the first glimpses of the rising moon as her mild and pensive beams penetrated the waving foliage of two mighty giants not far from me. O glorious orb! how thou stealest the heart from strong men's breasts, and on thy lambent beams transportest it athwart a continent and layest it down in the silent chambers of the beloved! Only assure us that thou lendest it thy pencils to paint pleasant dreams on the slumbering souls of the little and the weary, and we will yield it gladly and rejoicingly to thy benign sway. As silent as is thy voice and influence, so sweetly shall that heart pass to its repose; and the images of the distant and beloved shall rise or vanish as thy beams brighten or the night grows dark.

Respectfully, yours, C. F. WINSLOW.

AT French Bar, on the Tuolumne river, about four miles above Branch's ferry, is said to be plenty of room for several hundred miners to make good wages, as soon as they can obtain water. One company having water from the river by means of a force pump, are taking out from half an ounce to $12 to a man each day.

THE Marysville Herald states that the grasshoppers continue to destroy the grain and vegetable crops on the Calaveras and Mokelumne rivers. Great damage has already been done. One gentleman at Mokelumne has lost over three thousand dollars worth of property by these destructive insects.

☞ **Great State Fair.**—We call attention to the Programme of the Great State Fair, to come off at the Musical Hall, in San Francisco. The List of Prizes will be found to be the largest, most comprehensive and complete ever offered in the United States. It is important that a wide circulation should be given to the plan of this Fair, that all may have an opportunity to enjoy its privileges, and that the greatest possible good may result to the whole State.

We trust the Press throughout the State will give their best influence to its promotion, and keep their readers continually advised relative to it—it is a duty they owe to this great interest. This is a Public Industrial Exhibition: the proud display of the products and genius of this country, and its success will be the beginning of greater exertions for future years. It is no private enterprise, for it is the State Society's Fair. The Prizes are the award of the State, and should serve as a stimulus to the citizens to do what they can to build up the Agricultural interests and to awaken a lively regard to this basis of her prosperity.

We speak for the State and by its authority, being but her agent, we plead for her best weal. We therefore urge upon every citizen to lend a helping hand to this great enterprise, and the greatest and most glorious results will be accomplished.

WARREN, Corresponding Secretary, C. S. A. S.

THE CALIFORNIA FARMER,

HYMN OF WELCOME,

SUNG BY THE CHILDREN ON MR. GRAY'S RETURN.

Dearest Pastor thou hast come,
Welcome, welcome, welcome home!
Though long absent thou hast been,
Welcome to thy church again;
Here we come with willing feet,
Joying, thee again to greet;
Glad we are that thou hast come—
Dearest Pastor, welcome home.

We with joyful hearts will raise
Cheerful notes of grateful praise,
Unto him whose guardian care
Still to us thy life doth spare:
His kind hands from day to day
Led thee on thy toilsome way;
Thou to us again hast come—
Dearest Pastor, welcome home.

Friends, unto thy soul most dear,
Near thee still, thy heart doth cheer;
Loved ones of thy family
Our kind Father spares to thee;
Friends, whose love thou long hast tried
Still are near on every side;
Glad are all that thou at come—
Dearest Pastor, welcome home.

The Two Choices.

BY AUSTIN C. BUNDICK.

George Ellingwood and his sister Augusta were seated in a well-furnished parlor, the windows of which looked out upon the street—said street being one of the most fashionable localities of the large city. It was a winter evening and a bright coal fire burned upon the grate. George and his sister were orphans, having met with their second paternal loss—that of the father—about a year previous to the opening of our story. They were rich, for their father had divided a large amount of property between them, and thus far they had lived together in the parental mansion, George continuing the business his father had left, and Augusta taking charge of the orphaned home.

The brother had seen his five-and-twentieth year. He was a handsome man, and though possessed of a naturally good heart yet his mind was considerably warped by circumstances by which he had been surrounded. He was very proud, and very rigid and tenacious in his opinions. Augusta inherited her mother's nature; being not only eminently beautiful, but kind and affectionate, and possessing a mind of rare moral excellence. She had been taught by her mother many important lessons of life, and she had learned to look upon all things in the light of their real value. Her mind was a moral balance and everything of life she tried against a moral standard.

For some time the brother and sister had been sitting in silence. Augusta gazed mildly upon her companion, while he gazed nervously into the fire.

"Well," he said at length, raising his eyes to his sister's face—"you are of age and I suppose you can do just as you please."

"But, my brother, you do not reason calmly on the subject," returned Augusta, in a mild, persuasive tone. "This is an affair of grave moment."

"Ah, so it is," said George, speaking quickly and with bitterness, "and for that very reason does it provoke me to see you so foolish."

"Foolish, George! Ah, you do not speak the sentiments of your heart."

"Yes I do Augusta."

"And wherein am I foolish?"

"Wherein? Why, in everything connected with this mad freak of yours. Here you are, the mistress of nearly two hundred thousand dollars, courted by both and end wants of the very truest the most solid and aristocratic circle in our city courted on all hands by the very first men of the fashionable world, loved and esteemed by every body of your acquaintance, all you would have all these advantages—advantages for which thousands envy you—by marrying a [illegible] lawyer. Is not this enough?"

"You are [illegible] of [illegible] lawyer as a profession" and Augusta cast a [illegible]

"[illegible]"

"[illegible]"

"[illegible]"

"George," she said, in a very calm, firm tone, "I beg that you will at least speak with becoming dignity. I have made up my mind how to act, and shall not change it unless I can be convinced by some reasonable argument that I am wrong. I will admit that Allan Johnson is what you call a poor man; but yet I love him, and I tell you why. His widowed mother was our mother's best and dearest friend. When our mother lived I used often to visit at Mrs. Johnson's, and I was placed much in Allan's company. I found him to be a noble, generous-hearted youth, with a high mind, a rich store of information, and good moral character. I loved him and he loved me. I knew this long before he dared to speak of the subject, and from that moment I began to study all the points of his character. At length—only two months ago—he asked me if he dare to hope for my hand. I told him that I would give him an answer in one week."

"And did you study hard during that week?" asked George.

"I studied carefully," replied Augusta, not seeming to notice the tone of irony in which her brother had spoken. "I held my future in my own hands, and meant my decision should be just such an one as should conduce to my greatest good. I weighed well the different opportunities that were opened to me, and in making up my mind was governed solely by my own moral sense of right. I had offers of marriage from several wealthy gentlemen, and after I had subjected them to my test they all came out wanting."

"Did not Harry Lannel offer you his hand, Augusta?"

"Yes."

"And was he subjected to this test?"

"He was."

"And will you be so gracious as to inform me wherein you found him wanting? I have been acquainted with Lannel for many years, and he is not only wealthy and holding a high position in society, but his moral character is above reproach. Pray, *Miss Moral*, wherein does Lannel lack?

"I will tell you, George. He lacks one of the most essential qualities of life. He lacks in heart; his good qualities are all of the head. He may strict fulfill all the outward moral requirements, but there is a want of sincerity which renders him an unfit companion for me. In fact I considered him unsuitable for a husband; and for nearly the same reason do I dislike your choice of a wife. Miss Allyne is but a heartless child of fashion, and will never make you a pleasant home companion."

"O fudge!" exclaimed the brother.—"I will trust Angeline. She is my choice."

"Very well," added Augusta, "all I can say further, is that I hope both our choices may be happy ones."

"I have one word farther to say," resumed the brother, not in the best humor; "if you marry Allan Johnson, you must not presume on his relationship to make free with me. He must never think to look to me for sociability or assistance."

There was a tear sprang to the eye of the maiden, but she turned away her head to hide it. For a while she felt unhappy; but she looked forward into the future and joy settled once more upon her soul. * * * * *

Time passed on, and Augusta Ellingwood became the wife of Allan Johnson, and a year after they were married they moved to the Great West. The young lawyer felt that a new field of action would be advantageous, and as he passed his opinion upon good reasons, his wife hesitated not to agree with him. In his new home, Allan found some things that were discouraging, but he resolved to persevere. People soon found out that the young lawyer was an honest, industrious, generous man, and at length they began not only to trust him with business as an attorney, but they soon learned to love him as a friend. Much of his success was owing to his own innate energy, but he knew he owed much to the gentle wife that presided over his home and assisted him by her wise and loving counsel.

George Ellingwood and Angeline Allyne his wife, and he found that he was going to be happy. [illegible] deeply moral considerations, and he was desirous ere long to [illegible] for the qualifications of his wife. It was not long before he began to [illegible]

[illegible] found that [illegible] married [illegible] wife. He [illegible] his business and became [illegible]. It was [illegible]

There was a tear sprang to the eye of the maiden, but she turned away her head to hide it. For a while she felt unhappy; but she looked forward into the future and joy settled once more upon her soul. * * * * *

Time passed on, and Augusta Ellingwood became the wife of Allan Johnson, and a year after they were married they moved to the Great West. The young lawyer felt that a new field of action would be advantageous, and as he passed his opinion upon good reasons, his wife hesitated not to agree with him. In his new home, Allan found some things that were discouraging, but he resolved to persevere. People soon found out that the young lawyer was an honest, industrious, generous man, and at length they began not only to trust him with business as an attorney, but they soon learned to love him as a friend. Much of his success was owing to his own innate energy, but he knew he owed much to the gentle wife that presided over his home and assisted him by her wise and loving counsel.

George Ellingwood had Angeline Allyne his wife, and he found that he was going to be happy. [illegible] deeply moral considerations, and he was desirous ere long to [illegible] for the qualifications of his wife. It was not long before he began to [illegible]

[illegible] found that [illegible] married [illegible] wife. He [illegible] his business and became [illegible]. It was [illegible]

"[illegible]"

"[illegible]"

"[illegible]"

opera if any of them are going. Won't you go with me?"

"No, Angelino, I am too tired. I was in hopes that I should have your company this evening."

"What to do?"

"Why, to pass a social, quiet evening at home."

"O! heaven preserve me! Ha, ha, ha! A social, quiet evening at home! Why, Mr. Ellingwood, didn't you know that you couldn't be more quiet than when you are all alone? No, no—don't you think that I can drudge away an evening as unprofitably as that."

"Unprofitably, Angeline? And do you think that your own fire-side ——"

"Stop stop, Ellinwood. You are going to give me some moral lecture that you learned from your sister; but I don't want to hear it. I have heard too much of that already. If you fancied that your sister was such a pattern of propriety, you ought to have kept her by you. Ah, here's the carriage. I must dress. Good evening."

When she was gone, George Ellingwood sat back in his chair. "O, heavens!" he murmured, "What a life this is! No home—no comfort—no peace. All is either hubbub and bustle, or else drear loneliness.

It was at such times as these that George Ellingwood thought of his sister. He remembered how many evenings he had enjoyed her society, and what pure comfort he used to take when she was by his side to sooth and cheer him. Then he would think how happy must be the fortunate man who had gained her for a wife. This would lead him to a contrast miserable. In society he was sometimes flattered by the homage which was paid to his wife, and he was often congratulated in the prize he had gained. He desired momentary gratification even from this thrilling boon, but it did not make up for the loss of the sweet comforts of home. He now realized the truth of what his sister told him—the woman who might shine in society, and even adorn some circle, might not be a true wife. He now began to wish that he had looked deeper into the qualifications of the woman he was to have taken for his partner through life.

On the next morning George had to eat his breakfast alone, his wife having not yet arisen. At noon he did not return to his dinner—he had contracted the habit of getting his dinners at a hotel near his place of business. At night, when he came home, he found his wife dressed and all prepared for a whist party she had invited in. George felt sick and weary, but the company came, and he had to make himself agreeable. He used to like these sorts of parties when he and his sister attended them once a month or so, but he found it quite a different thing now.

"By my soul, George Ellingwood, how I envy your happiness," said one of the gentlemen, during the evening.

"Do you, Atwood?"

"In faith I do. What a magnificient wife you have drawn! What wit and beauty!—she is always in smiles. Egad, you're a lucky fellow."

George turned to where his wife sat with a choice circle about her, and his heart bounded with a quick feeling of pride when he saw how beautiful and smiling she looked. But in a moment more came the thought that those smiles were not for him—that they were not for the lighting up of his home—and he felt unhappy.

And yet George Ellingwood was forced to admit that his wife had not deceived him. All that she had appeared to be before her marriage she really was. He had married her because she would make a splendid mistress of his mansion and shine in society. She did all this; but his soul yearned for joys she was not capable of giving him.

"Ah, if I had let [illegible] to my kind sister! but it is too late now!" * * *

Ten years [illegible] and George Ellingwood stood in the streets of the great city without a home. His wife had worn [illegible] her ceaseless round of excitement; and he had laid her in the cold grave—another victim to [illegible] what you please. It is [illegible] any more. The [illegible] had [illegible] He had [illegible] wife [illegible] had passed from [illegible]—he [illegible] most of it [illegible]

He stood [illegible] Western States [illegible] hair [illegible]—[illegible] was [illegible] came [illegible] Western States [illegible] and [illegible] application, but he remembered the old adage:—"Nothing ventured, nothing gained," and he determined to make the trial. His summons at the door was answered by a girl, and he asked if the Governor was in. She replied in the affirmative, and bade him walk in. He was conducted to a well finished parlor, where the girl left him and went to call her master. The room was very large, and furniture, though evidently costly, was yet very plain and substantial. Everything seemed made for use, even to the maps and pictures which adorned the walls.

At length the door opened, and a plainly dressed, middle-aged man entered. His appearance was at once commanding and friendly, and he saluted his visitor with a graceful smile.

"You are the Governor, I believe, sir," said George, after he had shaken hands with his host.

"Yes! you are Mr. George Ellingwood, if I mistake not," returned the Governor.

George started at the sound of that voice, and as he gazed more searchingly into the host's features, he was moved by a strange sensation. The countenance was familiar, but where he had before seen it, he could not think.

"Do you not remember me?" asked the Governor, with a smile.

"I have surely seen you before, sir," replied George, with much embarrassment; "but I cannot call the circumstances to mind."

"Yes sir," said George, speaking with difficulty and hesitation. "I heard that the power had been left with you to employ a land agent, and that you had not yet made a selection."

"Ah! and would you like the berth?"

"Why—yes—yes sir—if I could satisfy you of my qualifications."

"Wait a moment, Mr. Ellingwood."

As the Governor thus spoke he turned and left the room. George was not left long to puzzle his brain, for the host soon returned, and was followed by a female.

"This is my wife, Mr. Ellingwood. Perhaps she my solve the problem for you."

George Ellingwood trembled like an aspen. His mind went back over the space of half a score of years, and he remembered a scene that he had often tried to forget.

"George," said the still beautiful woman, "I am happy to see you once more. It is a blessing I had not looked for."

George Ellingwood reached forth his trembling hand, and on the moment his head was reclined upon the shoulder of his sister.

"O, Augusta! my dear sister," he uttered, "this is the first resting place of pure joy I have found these ten years! I know that you will forgive and ever love me."

"Yes, George," returned the affection te sister, still holding his hand, and gazing through her tears into his face; "I cannot forget my de love for you. Are your family here?"

"Alas! my sister, I have none left to me on earth but you. My children are dead long ago, and my poor wife has now joined them." * *

Allan Johnson had risen from post to post, working his way up upon his own manhood in the confidence and affections of the people, until he now stood at the head of the State.

George Ellingwood did not get the office he sought; but with the aid of his brother-in-law he gained a business that was far more lucrative, and he found a home beneath the roof of his patron. He was once more in the society of a kind and gentle sister, and he began to live over again the days of his youth. But he could not forget the years of misery he had passed. He knew that Allan Johnson had [illegible], and that his sister was the very [illegible] of peace and joy.

"Augusta" he said, as he [illegible] "[illegible] I have [illegible] dear kind [illegible]. O, how [illegible] I realized [illegible]

[illegible]

looking back upon the home of their childhood, and regretting that the happy days of youth have passed from them forever! They have entered the married life in ignorance."

"O, my sister, how truly you speak. I was ignorant, but it was because I would not learn of you. You have lived long years of true joyous life, while I have just learned life's first lesson. 'Tis strange how many will suffer in bitter experience rather than be wise at first."

THURSDAY, AUGUST 31, 1854.

California Babies.

"To the pure all things are pure."

Lest some of our cotemporaries should think we had overlooked the deep interest they feel for the coming Exhibition of the "California State Agricultural Society," and more particularly that portion of the Fair announced at the head of this article, we would most sincerely return our personal regards for the interest thus expressed by them. Having been absent for some days, we have not had an opportunity of ascertaining *how far* the entire Government has been annihilated by the wisdom, the holy horror, the delicate social sensibilities or the shrinking modesty, of all these "bachelor" gentlemen who dissent from the plans of the State Fair, and have only space to say a few words and to assure our friends that in due season the California Farmer will meet the question.

We rejoice indeed for our "single" brethren of the quill; the interest they express on subjects of this kind, is the best and strongest assurance of their reformation. We should like to hear from some one qualified by his interest as a *parent* to speak understandingly. We are but one of the government, and only responsible for one vote, and that we mean shall be an open one; our cotemporaries may rest assured we shall not dodge the question. The leaven of discussion is all important, and that theme that will not bear open and manly discussion, ought not to stand. We ask those, however, who discuss the subject, to use such statements in reference to this *part* of the exhibition while alluding to the *place* of exhibition, as can be substantiated by the plans proposed; for we shall never in any discussion, or under any circumstance, give time or place, or descend to disputes or the exchange of any remarks that could be construed into personalities, not absolutely required as argument of defence. In our present remarks we speak of our cotemporaries as "Bachelors," our only purpose for so doing is the *fact* that we do not think they are competent to sit on a jury in such a case; they can come into Court and give their opinions, and the Judges will of course take their evidence for what it is worth.

We do sincerely hope those who are qualified to judge, will speak out and give us light. We would earnestly hope there are those who can "show us some good" that might result to the world, when parents shall regard the physical and moral well being of their children, as of at least equal consequence to the lower order of creation. We hope some one wise and learned in morals will tell us the wrong that would result in looking upon innocence and purity, as we have never yet seen a man so hardened that the sight of an innocent child would not remind him of his "early home," and our hope of such a man would be weak, if a tear would not rise to his eye quicker than a coarse jibe to his lip. Most unfortunate will be the day for any city when pure and innocent children will not demand the tribute of a pure and happy thought.

That the associating little children with any other part of the Fair may not be misunderstood or *misrepresented*, we append the following:

PREMIUM ON BABIES.

Competitors for premiums on Babies must have them on exhibition between the hours of ten o'clock A. M. and four o'clock P. M., on the second day of the Fair. A *special hall* will be provided for the accommodation of the "little children," and every convenience provided. The committee will pass in examination from two to four o'clock. P. M.

As we have said, we have only introduced these few remarks at this time; we shall not shrink from our duty, but will endeavor to meet every question frankly, and never depart from our position or plan of discussion.

Continued Favors.—Not a day but we have to acknowledge kind favors from the obliging and attentive messengers of Wells, Fargo & Co., and Adams & Co. Papers from the interior, and parcels to help the great cause which brings out the "fat things of the earth."

Change of Hours of Ocean Steamships.—The time of departure of the Panama Mail steamers, and of the Nicaragua steamers, is hereafter to be 8 o'clock, A. M. The steamers of the Independent line leave at 9 o'clock, A. M.

Savings' Bank.

Since the publication of our former article upon this subject, we have received the Banker's Magazine of July last, from which we make copious extracts upon this important subject.

The first attempts to establish Savings' Banks in the city of New York, were made in the year 1818. Previous to that period several of these institutions had been in operation in Massachusetts. On the 30th Dec., 1818, a letter was addressed by John White Treadwell, Esq., secretary of the Institution for Savings in the town of Salem, Mass., to John E. Hyde, Esq., of New York city, detailing the operations of the bank in Salem. This, and similar favorable reports, led to the establishment of the "Bank for Savings," in the year 1819, in this city. The progress of the important principles of Savings' Banks is fully shown in the fact that the deposits in this city alone have increased to nearly $27,000,000, as will appear by details now given.

In Boston there are three Savings' Banks, whose deposits, &c, were as follows, in 1853:

	Depositors.	Deposits.
Provident Savings' Institution	27,910	$5,155,948
Suffolk do do	7,467	1,856,460
East Boston do do (just begun)	380	63,600

The total for Massachusetts was as follows, in the last three years:

	1851.	1852.	1853.
Number of Depositors	86,537	97,353	117,404
Amount of Deposits	$15,554 088	$18,401,307	$23,370,102

In Great Britain the progress has been alike remarkable. In the year 1830 the number of depositors were 412,217, and the amount of their deposits £13,507,565 sterling. Their condition at three several periods may be stated as follows:

	Depositors.	Deposits.
November, 1830	412,217	£13,507,565
" 1840	1,065,031	26,671,963
" 1850	1,092,581	27,198,503

Equal to $135,992,515, or nearly so.

In addition to these there were 32,233 other similar institutions, under the names of Friendly Societies, Manchester Unions, Foresters, Druids, &c., with a capital fund of £11,360,000. Making a grand total of £38,558,503 sterling, or $192,792,515.

On the first day of January, 1847, there were in nine Savings' Banks in the State of Connecticut, $3,215,292, and on the first of January last, $8,143,357. All these institutions were established for the ostensible purpose of safe repositories for the earnings and accumulations of the laboring classes, and for the safe keeping and faithful use of their deposits. The accumulations or interest being divided among the depositors after deducting the expenses, losses, &c., in their management. They are regulated and managed by a board of from fifteen to forty trustees, who receive compensation for their services; nor are they liable and responsible for the success or failure of the institutions. They are only moral guarantees for the faithful management of the trust confided to them, and, as with banks, insurance offices, &c., the management is confided in the main to two or three, such as the president, treasurer, cashier, &c.

The founding of a Savings' Bank for California, in San Francisco, by Messrs. Robinson & Co., three and a-half years ago, was upon this plan, and their operations, rules and regulations were copied from the Boston Savings' Bank, being modified to suit this particular locality, and the peculiar exigencies of this country, regulating the rates of interest according to the value and demand of money from time to time, and paying depositors on demand instead of requiring a week or ten days' notice.

The great utility of Savings' Banks and unusual necessity for them in this country is not to be questioned. There is no place in the world where the accumulations of the laboring and industrious classes are so large as here, and where the safe keeping of their savings is so hazardous, except when in the hands of our able bankers; but then, except in a few cases, they are not drawing interest. We hesitate not to say that there ought today to be million of dollars in the Savings' Bank, and were it an incorporated institution and managed by a board of trustees or directors, (although they are not responsible for a dollar,) there would be an enormous accumulation of deposits, far excelling all others in the history of these institutions. Our community have only to decide whether it is safer to trust their money to an association of men who are neither individually or collectively responsible for the keeping, use and management of it (as would be the case of a Savings' Bank, under the old form), or to an individual or firm who have had years of training and experience, and who have earned an enviable reputation by the success of their enterprise. We are informed by Messrs. Robinson & Co. that the increase of their depositors is rapid, at this time being more than two hundred depositors a month, and an increase of more than $1,000 a day. Their experience and success, prompt and thorough business habits, and strict integrity of purpose; past success, present reputation and prosperity, and their permanent interests, are sufficient guarantees for the future. We can not do our readers and the public a better service than by recommending them to a liberal patronage of this Savings' Bank, not only as a safe place for the deposit of their money, but also where they may receive a liberal rate of interest for the use of it. Messrs. Robinson & Co. are for the present allowing for deposits at the rate of one and a half per cent. per month interest.

News from the East.

By the arrival of the Brother Jonathan at this port yesterday morning we have dates from New York to Aug. 4. The news is not of much importance. The market for breadstuffs in New York remains without much change.

The Canadian Reciprocity Treaty had been ratified. Col. Charles Loring, formerly Receiver of Public Moneys at Benicia, was killed at the St. Nicholas Hotel, in New York, Aug. 2, by Robert M. Graham, of New Orleans, who ran a sword through his body, in consequence of an altercation between them. A disastrous conflagration had occurred in Jersey City on the 30th July—loss 300,000. The steamer Franklin remained in the same position—all her cargo has been saved.

The New York Herald says a special mission has arrived from Russia with a proposition from the Czar to sell Sitka, and to enter upon a new commercial treaty with the United States.

Among the deaths by cholera, we notice that of the daughter of ex-President Fillmore, at Anrora, on the 17th August. Also a brother of the ex-President died of cholera, at St. Pauls, Minnesota, on the 28th of July last.

The consulship of Havana falls to Mr. Roger Barton, of Mississippi. Gen. Campbell, the former consul, supersedes Mr. Sanders, and goes to London.

FROM EUROPE.

No change had occurred in the state of the Eastern War, and none was likely to occur until after further consideration by the English and French governments of the recent conduct of Austria.

The news from Spain is very important. The insurrection was spreading rapidly. By telegraph from Bayonne, on the 20th, it is stated that Madrid and its garrison have pronounced against the Queen. The Cabinet is dissolved, and San Lino, the Premier, has fled.

Letter from Yuba.—We commend the letter from Yuba county (on another page of this paper) and hope to hear from our correspondents more constantly, generally and universally. Where is Yuba County Agricultural Society? Will Yuba be content to rank seventh or eighth; already Napa, Santa Clara, and Sacramento are in the field, and all preparing for a County Exhibition *this fall*. One thing is certain—we have noted in every county where there is a desire for agricultural knowledge and improvement, and where we have a liberal increase of subscribers, it has been followed by the establishment of a county Society, and a more general interest among the farmers. We assure our friend "Landis" that we appreciate his excellent remarks; they are highly creditable to his head and heart. We hope they will meet the eyes of many and stimulate them to "go and do likewise." We sincerely desire the farmers of Yuba will hear the voice from "Ashland," and awake. Call a county meeting, neighbor Landis—you have many warm-hearted friends of the cause; give us short notice and we will be most happy to come and preach as eloquently as we can, and take our pay in a goodly lunch of your melons, etc., and plead for a few more subscribers. When will you have the meeting?

The Pioneer for September.—As we open the "Pioneer," which greets us on our return from the prairies, we rejoice to know of its extended circulation and the kindly influences that mark its way. A better literature, a higher aspiration, a more refined taste for reading will grow up in the pathway that is strewn with the "First Literary Magazine of California." If its circulation shall but be parallel with its deserts, wealth and fame will surely crown the labors of its editors and proprietors. We most truthfully commend it to all.

Artesian Wells.—This is the greatest invention of the age for this State. Artesian wells will make California a perpetual garden, and we know of none that can perform their work more acceptable than Messrs. Smith & Vandyke, whose card appears in our issue, and who can produce the best testimonials in the State of success in what they have undertaken. Some persons have attempted this important work, and have been unsuccessful. Every such failure is a public injury, therefore it behooves all who desire good work, to know the parties understand their profession.

Dr. Gray's Return.—The tender and affecting song of "Welcome Home" to this able and estimable divine, and which we find so much pleasure in publishing, we feel assured will be read with deep interest by many who love and cherish his memory here.

The salt works at the salt lake near Los Angeles are in active operation.

Ship Building.—The Boston Traveller says, judging by the present prospects, at least three hundred thousand tons of shipping will be built this year, in the States of Massachusetts and Maine. This amount of tonnage would be equal to three hundred ships of one thousand tons each, a number probably exceeding the present fleet owned in the port of Boston. The shipping built in these States the present season, will be worth, fitted for sea, (at an average of seventy dollars per ton) the enormous sum of twenty-one millions of dollars. About three quarters of the entire tonnage built in the United States this year, will be launched from the ship yards of Maine and Massachusetts; thus showing the great advance made in these States in this important department of national industry. Three hundred and sixty square-rigged vessels, including ships, barks and brigs, were built in the United States last year, and an equal if not an excess in number will be built in the above States, alone, the present season.

Since the present year commenced, in the Bath district, Me., there have been returned to the Custom House at Bath, thirty vessels, making an aggregate of over twenty thousand tons of new shipping built in this district during that time. This is a large build for the time, but it is estimated that it will only amount to about one-third of the build for the year. Last year the entire build of the district was sixty-nine vessels, giving an aggregate of 49,399 tons.

Large Sale of Short-Horned Cattle.—Lewis F. Allen, of Buffalo, N. Y., has recently sold his entire herd of short-horn cattle into the State of Indiana. They were about sixty in number, of all ages, comprising many excellent animals. The descendants of his imported bull, Duke of Exeter, (10,152) were remarably choice. The bull unfortunately died last April. Had he lived, his value would probably have added one thousand dollars or more to the amount of sales. We learn that the herd sold in the aggregate for upwards of $9,000. We congratulate the enterprising farmers of Indiana on the acquisition of this important addition to their stocks of blood cattle, and have little doubt that their fullest expectations in improvement will be realized.

Mr. Allen at the same time sold thirteen fine young South-down rams, and a few Middlesex pigs, all which go into the same region of country, the eastern counties of Indiana. Mr. A. having disposed of his short-horn cattle, will continue to breed his Devons, of which he has a select herd of about twenty-five, with an imported bull from the herd of Mr. Quartly, one of the most celebrated breeders in Devonshire, England. He has also a flock of about one hundred and fifty South-down sheep, which are bred to imported rams from the celebrated flock of Mr. Webb, of Babraham, England.—*Am. Agriculturist.*

California Agricultural Society.—Our young sister of the Pacific is already in the field with her State Agricultural Society. An act of incorporation has passed both branches of the Legislature, together with an appropriation of $5,000 annually for four years, for the payment of premiums. It is in contemplation to hold a "Great State Fair" the coming fall. Hurry up that Railroad, and we will *drop over* to the California State Fair, and see our subscribers, of which we have a number scattered along through California, Oregon and Washington Territory.—*Ohio Cultivator.*

We will brother—we have a miniature railroad in our mind's eye, a thousand miles to the inch, and we can see already the various delegations from the "Atlantic," entering the cars to join their friends on the "Pacific."

Sale of Famous Horses.—Four celebrated racers were sold at auction in New York lately, viz.: *Mac* was struck off at $4,100, to Mr. Mann, of Baltimore; *Tacony* was sold for $3,700, to Mr. J. G. Bevens, of New York; *Frank Forrester* was sold to Mr. Mann also, who paid $2,350. *Barnum* was withdrawn from the auction, he having been sold at private sale during the morning, for the sum of $2,850.

The Ant Union.—There are pleasures in store at "Duncan's Art Union," and now is the time to test this question: Which affords the most pleasure, *anticipation* or *reality*? What say you Mr. Duncan?

A coffin was found, enclosed in a large box, on Saturday last, by the laborers while digging a sewer in Commercial street, between Montgomery and Kearny. On opening it, it proved to contain the body of a Mr. W. O. Rae, who was agent for the Hudson Bay Company from 1840 to '45, when he died. Mr. R. was a native of Scotland. The remains were re-interred in Yerba Buena Cemetery.

A Russ Pavement is under contract to be laid in Montgomery street, between Clay and California streets. The blocks will be of granite, and the work is to be completed as soon as possible. Here is an example for property owners to have others streets graded and paved, before the wet season approaches.

Fugitive Slave Case.—The Stockton Argus states that the negro Stephen J. Hill, arrested last week in Tuolumne county, as a fugitive from his master, in Arkansas, has had a final hearing before Judge Quint—and was handed over to the agent of his master.

The Redwood Mills of Santa Clara county, are now in full operation, turning out large quantities of fine flour daily.

HORTICULTURAL.

To the Corresponding Secretary of the California State Agricultural Society.

SIR: I wish to present my vineyard and also my fruit orchard, for examination and premium. They are situated in Los Angeles county.

Yours respectfully, WM. WOLFSKILL.
By J. J. Warner.

San Francisco, August 25, 1854.

WILLOUGHBY FARM, August, 1854.

To the Corresponding Secretary of the California State Agricultural Society.

SIR: By an *extra* of the FARMER I see it stated that all competitors for premiums must send in to the Committee, on or before the second day of October, Fruits, &c. Early Peaches, for instance, will not keep. I now send you for competition, five varieties of Peaches, (early varieties I should have said). As our trees are young, of course you cannot expect a great quantity, but enough to show the excellence of the fruit in size and flavor; and if examining committees are appointed they can as well be tested now as in October: however this lays with you, and can do as you see proper. Some varieties are gone, others are still to ripen, that bid fair for excellent samples; and as a competitor I offer my farm, orchard, vineyard, nursery and garden for examination by the Committee. The varieties of Peaches I send you are the Early York, Early Strawberry, Yellow Rare Ripe, and Crawford's Early Mclacaton and Yellow Alberge. Yours,

SIMPSON THOMPSON.

THE fine specimens of fruit that were sent to this office from the above fruitful garden, were seen by the President and other members of the Executive, and were considered equal to fruit of the best gardens of the East in point of flavor and beauty, and reflect credit upon the proprietors.

AGRICULTURAL SOCIETY.—A meeting of the Sacramento County Agricultural and Horticultural Society met pursuant to adjournment at two o'clock on Saturday afternoon last, and organized by calling Gen. C. I Hutchinson to the chair, and appointing A. P. Smith, Secretary. The business in order being the election of permanent officers—the following gentlemen were thereupon chosen: Angus Frierson, President; Benjamin Tibbetts, Vice-President; A. P. Smith, Recording Secretary; Geo. R. Moore, Corresponding Secretary; J. M. Rhodes, Treasurer; Col. J. T. Hall, Jacob Rippstein, Dr. C. Duncombe and Gen. C. I. Hutchinson, members of the Board of Managers. A number of gentlemen then came forward, signed the constitution and paid their initiation fees. The Rev. B. T. Crouch and Col. Warren were elected honorary members, and the thanks of the society unanimously tendered the former for the use of the church building.—*Sac. Union.*

PEACH ORCHARD.—We published an account in our last issue relative to the crop of *two peach trees* in the orchard of Mr. Smith, on the American river. Our neighbors of the "Sun" seem to have a desire to know a great deal more of the facts relative to it, and seem to hint that the "eating and distributing" part should be more widely demonstrated before *they* can realize so great a product. We intended to say: "eaten and distributed, besides amount sold;" and are happy to say to our neighbors of the "Sun," and to every other conductor of the press, that there are now, in the same gardens, trees that this year will even be more profitable than the two named and that Mr. Smith will be very happy to give such gentlemen ocular demonstration of the facts. There are now in these gardens several large trees, only two years growth, that will produce from four to six bushels of large and very rich peaches. We measured one peach that was nine and a-half inches in circumference. The trees are loaded with as rich fruit as has ever been seen in New Jersey, and it is worth a special trip to Sacramento to see them.

EFFECTS OF VEGETABLE GROWTH UPON FRUIT TREES.—We examined, while at Sacramento, four rows of Peach Trees, in the orchard of the Pomological Gardens of Mr Smith, and noted the deleterious result of growing vegetables upon the ground around them. These four rows of trees were not much more than half the size of the adjoining trees, and they appeared yellow and sickly; the entire ground between the rows and under the trees were planted with cabbages. In other cases are found planted with cabbages, in the same sickly condition. All the other trees in the orchard were larger; the leaves a fine[illegible] were in perfect health. These facts [illegible] by a visit to the [illegible]

SUPERB FRUIT.—Sacramento is destined to rival some of our finest valleys lower down the coast, and where the system of cultivation has been longer practised. Sacramento has some very active and practical men, who are doing much to unfold the nature and qualities of the soil, and to test its capabilities. There is all the assurance needed that those who desire success can succeed in raising all the desirable fruits in their greatest perfection. We received from A. P. Smith, Esq., "Golden Chasselass" Grapes, finely ripened, and some Peaches raised at his Pomological Gardens on the banks of the American river. Mr. Smith has been very successful in raising fruits the present season, and has settled satisfactorily the question of fruit growing in Sacramento valley. The Peaches we received were of the highest flavor—"Crawford's Early." Many other varieties of later kinds are now ripening, and fine fruits of other kinds also.

LIVE BRACES FOR FRUIT TREES.—Every fruit culturist knows that crotched trees are frequently split apart and nearly ruined when loaded with fruit. I have found by experience that this can easily be prevented by putting in a live brace or stay when the tree is young, to fasten the two prongs or stems of the tree together. It is done in the following manner: Take a small branch of one of the main stems, growing between the two, and cut off the top end slanting, similar to a scion prepared for lap grafting; then make an incision on the opposite stem with a sharp-pointed knife or small chisel; then insert the top end of said branch and tie it down firmly with a woolen string; then cover the wound with grafting wax, and the work is completed; remembering to cut the string as soon as the brace has grown fast, to prevent it from girdling the tree. This is the best operation for crotched trees that I have ever seen tried.—*Elihu Cross.*

The Shakers at Niskayuna have practised a system of connecting the branches of fruit trees, something like that described above, for years, and we should be greatly obliged if some one of them would furnish us with a description of their process, with the benefits derived from it.—*Country Gentleman.*

THE NEW YORK STATE FAIR.—The American Institute and the New York Horticultural Society will unite with the State Agricultural Society in the Fair to be held at Hamilton Square, New York, on the 3d, 4th, 5th and 6th of October next. The amount of premiums offered exceeds $8,000. It is intended to make this one of the most interesting and important exhibitions ever held in this country.

List of State Fairs for 1854.

Ohio	Newark	Sept	19—22
Michigan	Detroit	Sept	26—29
Illinois	Springfield	Sept	12—15
Indiana	Madison	Oct	4— 6
Iowa	Fairfield	Oct	25
Wisconsin	Watertown	Oct	5— 7
Pennsylvania		Sept	27—29
New York	New York City	Oct	3— 6
Vermont	Brattleboro'	Sept	12—14
New Hampshire		Oct	3— 6
Georgia, So. (Central)	Augusta	Oct	23—28
Connecticut	New Haven	Oct	10—13
Maryland	Baltimore	Oct	3— 6
Missouri	Booneville	Oct	2— 5
Lower Canada	Quebec	Sept	12—16
Upper Canada	London	Sept	26—29

General Summary.

THE weather a Los Angeles has been warm of late, 90 to 100 deg. by the thermometer. On the 20th, copious showers fell during the day and night, wetting the ground to the depth of eighteen inches. The quantity of rain that fell is estimated at ten (?) inches on the level.

The Southern Californian says it is apprehended the rain will rot and destroy the dry grass upon which the immense herds of cattle are entirely dependent for food. The rain was so unexpected that many of the farmers had not gathered and housed their crops of wheat and barley, which received considerable damage by getting wet, yet the corn crop will be be benefitted by it.

CROPS IN THE SALINAS VALLEY.—The San Jose Tribune of the 25th, learns that the potato crop in the Salinas Valley now looks well and promises an abundat yield. No signs of the worm have yet appeared; and farmers this year will be able to ship their produce from Monterey and the Pajaro valley at such a rate as to compete with Santa Clara and other places adjacent to San Francisco Bay. The wheat crop averages an abundant yield. A field of [illegible] acres on the farm of Mr. Hall near the new town of Salinas, is one of the best crops ever raised in California; and sets at rest the question of the adaptation of that section of our State to the growth of this staple.

INDIAN DEPREDATIONS.—The Sacramento Union learns that great [illegible] at Carson Valley, in consequence of depredations committed by the Walker River Indians. They have stolen immense numbers of mules and horses from different parts of the valley. An armed force had been raised to go in search of the depredators.

The correspondent, says the Grass Valley Telegraph, is now [illegible] to the [illegible] to be an object of interest. There are [illegible] hour's [illegible] ride. It [illegible] a pleasing [illegible] to [illegible] by the [illegible] [illegible] that good health and [illegible] [illegible] the sick [illegible] [illegible]

A correspondent of the Placer Herald writes from Iowa Hill, Aug. 19: "A company of Germans at Roach's Hill, one mile above here, have struck it big in the channel. They have between three and four feet of dirt which pays from one to six dollars to the pan—coarse gold. In washing up the river in front of these claims, it pays from an ounce to $20 a day to the hand; and now that they have struck it so rich in the channel, there is no telling scarcely what the yield will be."

SAN JOSE, according to the Telegraph, is fast improving, notwithstanding the depressed state of the market, and complaints of hard times. Houses are springing up in every part of the city, and other valuable and permanent improvements going forward with an energy indicative of progress and prosperity. Among the new buildings there is one being erected by Mr. Avery, for the purpose of establishing a foundry—an establishment much needed in the valley.

AN enormous sweet potato, from the "Oakwood Farm" about thirty miles below Sacramento, has been shown to the editor of the Union. This specimen measures longitudinally exactly *two feet and three inches*, and latitudinally *seventeen inches*, and weighs five pounds. It is of a clear yellow color, without speck or blemish, and apparently is as sound internally as externally.

ANOTHER TOWN DESTROYED.—It is reported by telegraph from Nevada, that the town of French Corral, which contained nearly one hundred houses, was completely destroyed by fire on Friday night last. The fire accidently originated in the California House. But three buildings are left standing, viz: the French Corral House, Sublitt's Hotel, and Fale's Store.

THE town of Columbia is said to have virtually risen from her ashes, spleudid saloons and substantial fire-proof edifices appearing where but a few days since was nothing to be seen but blackened ruins and burning cinders. Business is lively, the town full, and all are engaged.

THE Yreka Herald of August 19, gives an account of the ascent of Shasta Butte, said to be the highest mountain on this coast. Messrs. E. D. Pearce and seven others constituted the party.

THE RAPID RIDER.—The Stockton Argus learns from a correspondent from Sonora, dated the 25th inst., that Blaxton, the man who would ride to the Missouri line in twelve days, has been sent to the Tuolumne county, jail, for selling a revolver belonging to a miner in Sonora.

THE Shasta Courier says that the taxable property of that county amounts to more than $6,000, and to the county, of more than $5,000.

LOS Angeles is said to rapidly improving; houses are going up in every quarter, and find tenants as fast as finished.

THE San Diego Herald has revived, and is now conducted by J. Judson Ames and J. F. Damon.

THE new Court House at Downieville, Sierra county, is nearly completed.

FROM THE MINES.

KERN RIVER MINES.—The excitement is said to still continue in Santa Barbara; a gentleman who lives there states that he had prospected the river for a distance of seven miles, and that in every part of it he found earth that would pay six cents to the panful. If this is so, and there is plenty of material, the Kern River mines are a reality. A stage line is to be started, running from Santa Barbara to the mines.

SAYS a letter from Eureka, Humboldt Bay, date of Aug. 25th, "We have most glowing accounts from the mines and practical demonstrations of the truths of the reports, in the shape of from 5 to 600 ounces of oro per week received in Union. Men are making as high as $50 dollars a day, in consequence of which labor is high (say $100 to $125 per month) here—mill men and laborers are leaving daily."

IN Tuolumne county, the Union Democrat says Donnella, Ross & Co., have struck a very rich lead in their claim on Woods' Creek, at the North end of the city, that will last for years; it pays about $11 daily per man, clear of all expenses. Frazier & Borland took out a sixty-eight dollar lump a few days ago. Some companies on Mormon Creek are doing remarkably well. The miners on Brown's Flat, and all the way up Wood's Creek, never were doing better than at present.

THE Grass Valley Telegraph says the Empire Quartz Mill took out last week [illegible] of $[illegible]. The company at the mouth of Woolsacker Ravine, have averaged since our last issue [illegible] per day. The [illegible] is being [illegible], and the prospects are [illegible]. In consequence of the scarcity of water [illegible] Hill is nearly deserted.

THE Southern mines are reported to be yielding well. From Sonora the accounts are favorable. The Union Democrat says [illegible] Woods Creek and Brown's Flat were never better. On Mormon Creek and Confidence the prospects are also very flattering.

[illegible]

[illegible]

LADIES' DEPARTMENT.

Why don't the Ladies Learn to Cook?

AMONG the common things to the teaching of which public opinion is now so strongly directed, it is to be hoped that the art of cookery—one of the commonest, and yet, apparently, one of the most difficult and neglected of all—will not be forgotten. The instruction of the female peasantry in this useful art would be as advantageous to themselves when settled on their own hearths as to the middle classes, in which before marriage they officiate as domestic servants. Emigration and abundance of employment have given to the servants at home the upper hand, as completely as if they were in Australia. On all sides we hear complaints of the difficulty of finding, and of retaining when found, a cook who can roast a leg of mutton, and make a pea-soup. In point of fact, we have heard of ladies who have it in serious contemplation to dispense with servants altogether, as the least troublesome alternative. Without wishing matters carried quite so far, we are convinced that many of our fair friends would lose nothing, either in point of respectability or happiness, while they could add at least one-third to the effective incomes of their husbands, if they were to spend a little more time in their kitchens, superintending the preparation of the family dinner, instead of contenting themselves with ordering it—if, indeed, they condescend to do even that. Some forty years back ladies were driven to shoemaking as a fashionable means of killing time. Why not try a little cooking? Thanks to the modern stoves, with their nicely arranged skillets and stewpans, which science and mechanical skill have substituted for the blazing kitchen hearth of other days, young ladies of the nineteenth century, just passing its prime, may cook without soiling their fingers or injuring their complexions. Were it not so, we would not recommend them to cook. We would rather live on bread and cheese all the days of our lives.

It will be said, perhaps, that our notions with regard to female education and employment are too antiquated—that in these matters, as in everything else, a new era has dawned, and the solid course of instruction now given in colleges for ladies will be triumphantly appealed to. Ladies however, who possess these solid acquirements—who, like Lady Jane Grey, prefer Plato to a picnic—will be least likely to neglect the economy of the kitchen. They will thoroughly understand the dignity of the employment and call to mind all the poetry of cooking. To say nothing of the dinner which Milton describes Eve as preparing when "on hospitable thoughts intent," there are the Homeric banquets, at which kings literally "killed their own meat," and at which queens and princesses turned the spit for the roasting, or drew the water and chopped wood for the boiling. Cooking is classical, and no lady will disdain to take part id It who has read of these feasts in the original Greek. Let it be observed that it is the middle and working classes on whom we wish to urge the importance of the study. An earl's daughter can afford to be so ignorant of common things as not to be able to recognize chickens in a poultry yard, because they do not run about with a liver under one wing and a gizzard under the other, though our modern poultry shows, it must be confessed, will tend much to dissipate this error. A knowledge, however, of the art of cooking is of more importance to the wives of the laboring population than to those of the middle classes, because it is the art, when properly cultivated of making a little go a great ways. A French army can subsist in a country where an English one would starve, and chiefly for this reason—an English soldier can cook.—*Mark Lane Express.*

"A WOMAN who wants a charitable heart wants a pure mind." There is a good deal expressed in these few words. The measure of a woman's judgment must be her own fulness—and if she judge harshly, her feelings are not delicate. Her experience is her own; and if *that* is adverse, it ought at least to impose the charity of silence. Innocence is not [illegible]—but guilt is always ready to turn informer.

LITTLE THORNS.—The sweetest, the most clinging affection is often shaken by the slightest breath of unkindness as the [illegible] tendrils of the vine are [illegible] by the lightest air that blows in summer. A [illegible] from one [illegible] would [illegible] a heart which would [illegible] the [illegible] or the keenest edge of [illegible] [illegible], the shade, the [illegible] of the [illegible] and [illegible] grief and pain. There are the little [illegible] which [illegible] [illegible] may [illegible] their way through [illegible] [illegible] [illegible] a [illegible] [illegible] and [illegible]

[illegible]

Stockton—C. O. Burton.
Sonora—Tuney & Roberts.
Sonoma—Senor Pedro Velasquez.
Suisun—B. F. Finchley,
Union, Humboldt Bay—A. H. Murdoch, P. M.
Yreka—Cram, Rogers & Co; Parker & Roman.

WE desire our Agents to report to us on the 1st of every month, the increase of names and the prospects, together with the amount due the office.

SAN FRANCISCO, THURSDAY, AUGUST 31, 1854.

"Home."

"There is a tide in the affairs of men, which taken at its flood leads on to fortune."

MOVING on with the crowd to the wharf where lie the up-river steamers, our eye caught sight of a noble ship, lying at her berth, whose hull, masts and spars seemed to touch and awake a feeling as of some old familiar friend—one glance more, and the blood in our veins rolled back upon the heart, awaking in memory scenes of other days; scenes, every feature of which lie daguerreotyped upon the soul. That noble ship, the gallant "Sweden," the ship that bore us hither in '49—how every mast and spar, every sail and shroud, every spot upon which our foot may have tracked, recalls recollections of by-gone years.

We can go back these long years, and recall every scene—the wild and strange excitement of that time, when every heart seemed mad in its thirst for gold! We can recall the scenes of Home, the counsels of Parents, the tears of kindred, the agony of separation in a thousand families, in and around our own dear New England; our own personal experience is too deeply engraved on memory ever to be obliterated.

Over two hundred souls left their homes in New England on board our noble ship in '49, all eager for the "land of gold." We can recall the gathering in the "Seamen's Bethel," in Boston the Sabbath before the ship left port. We can recall the parting address of good old "Father Taylor;" and we can never forget the fervent appeal of the venerable Dr. Pierce, of Brookline—now no more. In that church were a thousand of the kindred and friends of those who the next day were to embark for the new "El Dorado." How many homes were affected by the sailing of that one ship—and how many who that week left their homes in the morning of life and hope, ever realized the fruition of their hopes? How many of the homes that were broken up by that event, have ever had gathered together again their members—none missing? How many have been laid in the deep—how many lie buried in the mountains? How many, whose resting place is not recorded? And what can requite for all this ruin of "home?" Can gold repay for life—can gold bring back the dead? And yet it was the "love of gold" that swept over our land like an avalanche, calling all to its altar, and men bowed and worshipped and believed that the time had come when the tide should "roll them on to fortune."

If the memory of one scene in that "great drama" can awake such feelings, and recall so many startling events as we could record connected with the "gallant Sweden," who can picture the *price that has been paid of life and human happiness and wreck of homes*, by the tens of thousands who have left home and friends in thousands of ships, to come to the land of gold.

How many, now here, can look back and recall the last look of their native shores? How many now, remember the rising tear, as they uttered,

I must bid the farewell N I must leave thee, fair shore,
For a "home on the deep"—I may see thee no more;
Bright shores of New England, my heart beats anew
For the "loved ones" I leave, as I bid them adieu.

Alas! how many bade adieu, and forever! Few homes have escaped; and very few hearts but have paid the fearful price which the all-absorbing love of gold demands.

Fearful and bitter as has been the trial, if the "homes" that shall be reared upon these shores shall bear an approximate value in point of happiness and worth to the price paid, it were well. "There is," says Lamartine, "a good feature in revolutions,"—and surely we have passed through one in our "homes." God grant we may yet see the good.

State Exhibitions.

THE State of California, by her Senate and Assembly, passed a bill at the last session appropriating the sum of FIVE THOUSAND DOLLARS AS PREMIUMS to be awarded by the State Agricultural Society at their *annual* Exhibitions; that sum can only be appropriated for that purpose.

To support the Society—to prepare for the Annual Exhibitions—to make known by and through their publications the doings of the Society—to make that Society efficient, it is very requisite there should be means to carry on the the work. These means are raised by MEMBERSHIPS, and it is to be hoped that all who feel a desire that the coming exhibition should be one worthy this State, will become sufficiently interested to enroll their names and take an active part in the doings of the Society.

There is much to be done, and the time is short; and it is important that members should be enrolled from all parts of the State.

An efficient Society, whose members are widely scattered and who make their influence felt in their several localities, can produce a vast amount of good; and the California State Agricultural Society, by its members, has it in its power to accomplish much.

Every person that enrolls his name will become an active member, and be the recipient of all the privileges that may hereafter flow from societies of kindred origin, and from the General Government.

There can be no doubt that each member will be more than amply rewarded by the privileges and benefits arising from the present contemplated Fair in October next.

By referring to what we have formerly published, those interested will note *how the appropriations are to be made*, and the terms of membership. Judge David Chambers, of Page, Bacon & Co., is the Treasurer; and each member of the Executive Committee is authorized to enroll members. Persons desirous to join the Society and receive the benefits arising from it, are invited to call and obtain Certificates from the Treasurer or of the Executive Committee.

Members Certificates are at our office, with copies of the Constitution, where all the needful information will be cheerfully rendered.

Steam Farming.

WE would invite the attention of our readers to the following very interesting sketch from one of our English exchanges. This is but a type of the future, for the features of the present develop a most glorious future. Genius will be put to its utmost tension to invent such labor saving machinery as, were it present to our minds now, might seem a monstrosity. Yet the time is rapidly approaching when simple agricultural implements will perform the labor of twenty, forty and fifty men. The tone and character of the *fete* we especially commend.

It is pleasant to see that this wonder-working power can bring landlords and mill-owners into social intercourse, honorable to both sides; it is not less remarkable that it bids fair, ere long, to merge the two great classes in the one class of manufacturers. In one aspect it is exalting the present manufacturers to a level with the lords of the soil—in the other it is converting the landlords themselves into master manufacturers, and their farms into manufactories. The day after Mr. Salt's princely *fete*, Mr. Mechi was the invited guest of the Herts Agricultural Association. An earl and a baron, and so forth, were assembled, in expectation of the speech of the day from a London tradesman; one who had made an irruption from the counter (with wealth amassed there), into the broad acres of territorial aristocracy. Nor did the guest disappoint the nobility and squires who had invited him evidently to stimulate their own tenants. He dealt out wholesome suggestions to landlords of large estates complaining of want of capital to improve, honestly advising them to sell part of their land and improve the rest with the money. He rebuked tenants, who, clinging to their old ways, grudged the landlord a fair interest for the money he had laid out; but the burden of his speech was steam.

The amount of steam power in any agricultural district, he took as the test of its condition People thought him crazy when he first put up a steam engine; but now, two makers in the village had more than they could do to supply the neighborhood fast enough. Lincolnshire and Norfolk farmers have, some of them, one, two and even three engines on a farm! Herts had but made a beginning; he was sure they would soon get deeper into it. But the grand agricultural achievement of steam is yet to come. Its advent is nigh. Mr. Mechi is now building the engine at a cost of two hundred pounds, which is to *plough* the land and do almost everything besides. A Canadian engineer, neglected in his own province, is working at Tiptree, under Mr. Mechi's patronage; soon the implement is to be ready which is to revolutionize British agriculture, "to enable farmers to plough twelve inches deep instead of five inches, and to benefit agriculture to the tune of ten millions of pounds per annum!" What are all the budgets of rival Chancellors of the Exchequer to this? His guests, the gentlemen of the top boots and gaiters at least, were withheld, either by utter blank astonishment, or by not having heard so much Latin, from exclaiming *Credat Judæus Apella!* However, the sober truth remains, that we have farms now in which steam does all the fixed work, that such farms are increasing in number, and that machinery of every kind is so rapidly extended that the farm is fast assimilating to the manufactory; and the farmer and his laborers bid fair in another generation, to equal in intelligence their brethern of the towns.

New Market.

COME go with us to market this morning, and take a trip through the New Market—they tell us it is in advance of all we have yet seen in California. Beginning at No. 1, here's Mr. and Mrs. Weaver's stall—we find them as busy as ever; look here and see the fruit—pears, peaches, apples plums, apricots, nectarines, strawberries, blackberries, raspberries, whortleberries, oranges, &c.

Who would not be an enthusiast? Just look at the quantity around—the *quantity* and *quality;* the fruit, the garden vegetables, butter and cheese. Here is the "well-stalled ox," the "fatted calf," mutton fit for the palate of an epicure: game, fish,—in fact there is nothing we may not find at Washington Market.

Look at that fine array of "fat things" of the land—the sign over the stall says Joseph Begin, and if he has not made a good beginning we lose our guess.

We took a look at stall No. 8, Edwin Faxon's; such an array of fine things—butter, cheese, preserved fruits, &c.; if any doubts, go there, and you can easily obtain "facts on dairies" to satisfy you.

A single look at stall 2 and 3, Trofatter & Co., will make you grow fatter each day you live.

Look at Valin & Cardinot—to catch such fish a man must be as valiant as a Cardinal, for we think the names so intended it.

That game—do not name too much of it—every kind for an epicure; and Mr. Anderson at his stall would feed a man with good things till he sings in his old age as happy a song as "John Anderson my Jo John," his name sake.

And then, too, King's stall—here is a choice bit fit for the palates of a king; and should the "King" have too many customers he can go to his neighbor "Piley," stall 15 and 16, and there too find a pile of the "fattest and sweetest" that any good liver might be satisfied with.

One look more, before we go—Sweetser & Co. Here is everything to tempt the palate: butter and cheese that melt upon the tongue, game, &c.; and when our fair friends market, they have only to say, "Sweet-Sir, fill my basket," and it is done and done well, too.

But we must save a *little* for marketing another day, at the "Washington Market," for it bids fair to rival all others.

California on Canvas.

How common a thing it is for the mass of men to pass every thing that is "home made," as common or unclean. Give it but a tip of the "foreign," and all run for it—offer a painting of Vesuvius, or the Alps, and crowds gather around it. But place before them "Niagara," with its roaring torrent; "Superior," with its world of waters, or the towering Mountains and beautiful Valleys of some of our Eastern States, and—oh, we can see *them* at any time, they are common. This is all wrong; we should love home and home scenes most.

"California on Canvas" is worth more than all the pictures ever yet painted. It is the *daguerreotype* of a MIGHTY EMPIRE, whose infant features are but just bursting into light. Go then, and look upon glimmerings of coming greatness. These pictures are so beautifully true that all (our country friends included) should see them.

California Rye.

A VERY handsome sample of a *new species* of grain, called as above named, has been sent us by Messrs. Campbell & Hansbors, commission merchants, of Clay street wharf. This Ryo was raised by the Hon. D. O. Shattuck, of Sonoma.

We have examined this grain, and have compared it with the "Russian" or Skinless Barley, and are of opinion it is the same variety, improved by soil and climate. It is worth an examination.

Agricultural Meeting at Sacramento.

SACRAMENTO CITY, August 22d, 1854.

MESSRS. EDITORS: I herewith send you a report of the "Sacramento County Agricultural and Horticultural meeting," held in this city on Saturday last, which you will do us the favor to publish in your valuable paper. You will see by the proceedings that a Constitution and By-laws were adopted, and an organization of a County Society nearly completed. Our city papers are so full of important matters at this time, that we cannot find it in our hearts to trespass upon their columns. You are aware that the political canvass is now fully open, and to ask political journals to publish articles upon subjects as *unimportant and uninteresting as Agriculture*, to the exclusion of discussions which affect the *sacred rights of the dear people* and our glorious country, would be unkind indeed. You will therefore confer a great favor upon the Farmers of this County, by giving the proceedings of our meeting, and our Constitution and By-laws a place in the FARMER.

Your ob't serv't,
GEO. R. MOORE, Secretary.

The Sacramento Agricultural and Horticultural Society met on Saturday, August 19th, '51, pursuant to previous notice, and organized by calling Col. SMART to the Chair, and electing GEO. R. MOORE Secretary.

The Committee appointed at the last meeting to draft a Constitution and By-laws for the government of the Society, submitted their report, which was accepted and the committee discharged.

The Constitution and By-laws were then taken up by sections, and unanimously adopted, as follows:

CONSTITUTION.

PREAMBLE.

Whereas Agriculture is the basis of a Nation's prosperity, and whereas Agricultural Societies have ever proved efficient agents in elevating and advancing this all-important branch of industry. Now, therefore, we the undersigned, for the more rapid advancement of the Agricultural interests of our State and County, do hereby organize ourselves into a Society, and agree to be governed by the following Constitution and By-Laws.

ARTICLE I.

This Society shall be called the "Sacramento County Agricultural and Horticultural Society."

ARTICLE II.

Sec. 1. The officers of this Society shall consist of a President, Vice-President, Recording Secretary, Corresponding Secretary, Treasurer, and Board of Managers.

Sec. 2. The President shall preside at all meetings of the Society, and of the Board of Managers; put and decide all questions, maintain order, sign all orders drawn on the Treasurer, and perform such other duties pertaining to his office as the Society may require.

Sec. 3. The Vice-President shall perform all the duties of the President in his absence.

Sec. 4. The Recording Secretary shall keep a fair and impartial record of the transactions of the Society, register the names of all members in a book to be provided for that purpose, certify all papers and records under the direction of the Board of Managers, and countersign all orders drawn on the Treasurer. He shall report to the Society all members in arrears, immediately previous to the election of officers; give due notice to the officers and members of all meetings of the Society, and perform such other duties as the Board of Managers or the Society may require.

Sec. 5. The Corresponding Secretary shall correspond with such Societies or individuals as he or the Board of Managers may deem expedient. He shall keep copies of all letters sent by him, and preserve a file of all communications received by the Society; he shall officiate for the Recording Secretary in his absence, and perform such other duties as the Society or Board of Managers may require.

Sec. 6. The Treasurer shall safely keep all moneys belonging to the Society, pay the same out on the order of the Society, signed by the President and countersigned by the Recording Secretary. He shall collect all moneys due the Society, and make a correct report of all receipts and disbursements on the first Monday in February of each year, and oftener if the Board of Managers require, and perform such other duties as may be required of him by the Society.

Sec. 7. The Board of Managers shall have general supervision of the affairs of the Society. They shall meet for the transaction of business semi-annually, on the first Monday in February and August; and call meetings of the Society whenever the interests of the Society require it. They shall have power to fill vacancies in any of the offices. A majority shall constitute a quorum for the transaction of business.

ARTICLE III.

The Board of Managers shall consist of nine members, including the President, Vice President, Recording and Corresponding Secretaries and Treasurer,—who shall be *ex officio* members of the Board.

ARTICLE IV.

The Society shall meet annually, on the first Monday in February, in the city of Sacramento; and at such other times as the Board of Managers may think expedient.

ARTICLE V.

No person shall become a member of this Society until he shall have signed the Constitution and paid the initiation fee, required by the By-laws.

ARTICLE VI.

The officers of this Society shall be elected (after the first election) on the first Monday in February, annually.

ARTICLE VII.

No person shall be eligible to any office (after the first annual election) unless he has been a member of the Society three months.

ARTICLE VIII.

This Constitution shall not be changed, altered or amended, unless by a vote of two-thirds of the members present, at a stated meeting. Such amendment or alteration having been previously submitted in writing.

BY-LAWS.

Art. 1. Any person who is a citizen of this county may become a member of this Society by signing the Constitution and paying an initiation fee of five dollars—and the Society shall have power to admit honorary members.

Art. 2. Every member shall pay into the treasury of the Society, five dollars annually.

Art. 3. No money shall be used except for the benefit of the Society, or the agricultural interests of the county.

Art. 4. The Board of Managers shall have power to remunerate the Recording and Corresponding Secretaries for their services.

Art. 5. All elections shall be by ballot and decided by a plurality of votes, each member having one vote only.

Art. 6. Any member may be expelled for misconduct, by a vote of two-thirds of the members present at any stated meeting.

Art. 7. No member shall be entitled to vote at any meeting of the Society till he shall have paid his annual assessment.

Art. 8. Any fifteen members of this Society shall constitute a quorum for the transaction of business.

Art. 9. These By-Laws may be amended by the vote of a majority of the members present at any regular meeting, the proposed amendment having been previously submitted in writing.

The meeting then adjourned to meet on Saturday, August 26th, at 2 o'clock, P. M.; at which time permanent officers will be elected.

Letter from Yuba.

ASHLAND RANCH, Yuba County, Cal., August 20, 1854.

MESSRS. EDITORS: The warm invitation given in your excellent paper to readers and patrons to write, has induced me to respond, although but little accustomed to writing. I am a farmer, the son of a farmer of the old Keystone State (perhaps this is sufficient apology for any blunders I may commit in writing,) but more recently an adopted Buckeye, and at present a citizen of this new and flourishing State. And although not bound to live and die within its narrow limits, I feel deeply interested in the Agricultural interest of the State, I feel that her interests are mine and mine hers.

As humiliating as it is, we must acknowledge that there is too much truth in the communication from Cincinnatus in regard to the education and abilities of the farmers generally; but we hope this state of things will not long continue. Farmers of California, let us educate our sons and daughters, whether adopted or native, and let it not be said of them that they are illiterate and unlearned. Farming is a profession admirably adapted to every inquiring mind and expanding capacity, and, of all occupations, the least monotnous. The practical farmer is always learning, and always finds something new to learn.

The CALIFORNIA FARMER is a very welcome weekly visitor in my family, and I hope and trust its usefulness will be parallelled with its circulation.

My ranch is situated on the south side of the Yuba river, two miles above Marysville, and as yet is in but a rude state of cultivation; but I believe it is the best vegetable farm in Yuba county—the celebrated melon grounds spoken of in your paper not excepted. However, I do not wish to boast; the products will show for themselves. All we ask, Mr. Editor, is for you to call and see for yourself. We claim a visit from you, and until you do come we feel that we are *minus* a visit from the Editor of the CALIFORNIA FARMER, whether he be *plus* to the same amount or not.

The grasshoppers have done considerable damage in this vicinity, particularly to the onions destroying some crops entirely. I have some varieties of the musk-melon much subject to rust in their rapid growth. To pick them as they ripen is a sure preventive.

Yours respectfully,

BENJAMIN LANDIS.

Making Pine-Apple Cheese.

WHAT is called *pine-apple* cheese was first made in this country by Mr. Lewis M. Norton, of Goshen, Ct., he having commenced its manufacture in 1808. That which had been previously known here was imported. Mr. N., without any particular knowledge of the mode by which the article received its particular form, imitated it so successfully that his process has been extensively adopted in many parts of the United States. Several years since, while collecting information in regard to the cheese dairies of Connecticut, we called on Mr. Norton and obtained from him many valuable facts. His process was in substance as follows:

The curd is kept twenty-four hours before it is made into cheese. The advantage of this is supposed to be that a degree of fermentation takes place, which, being checked at a particular time by the cutting of the curd, preparatory to its being formed into cheese, it is not renewed after it comes from the press; thus preventing the defect of the cheese being hoven or blown.

The curd is cut with a machine into pieces of not more than a fourth of an inch square. After being cut, the curd is put in a cheese cloth, placed in warm water, and the temperate gradually raised by pouring on water that is still warmer, till it reaches 105 degrees by the thermometer. This does not *scald* the curd, which, according to the best cheese makers in England and in this country, is, we think, discountenanced. The curd is next cooled by adding cold water to the temperature of 88 degrees, when the whole of the water is drawn from the vat, and the curd weighed, and salted with the finest kind of table salt—four ounces of salt to ten pounds of curd—and after being well stirred is put in the press, where it remains twenty-four hours, or a longer time, as is convenient, as it takes no hurt by remaining forty-eight hours. The curd is weighed immediately over the tub, being drawn up by a pulley, and, when this is done, is again lowered into the tub, where it is salted.

The cheeses are pressed in moulds, made of sound blocks of oak timber about twenty inches long and ten inches square. They were sawed lengthwise through the middle, and each half is carved or worked out so as to give the general shape of a pine-apple—one-half in each part. From the cavity to the upper end of the block, a groove is cut into each part, which, when the parts are placed together, makes a round channel of about two and a-half inches in diameter, for passing the curd into the mould. When the two parts of the block are put together in such a manner that the cavities match each other, and are strongly keyed into a frame, they form the mould for pressing the curd. The pressure is applied by means of a screw, operating upon an upright, round piece of wood, which fits the channel in the block, and as it is forced down compresses the curd in the mould. The cheeses weigh, when dried, five pounds each.

When the cheeses are taken from the press they are trimmed, and then placed in nets and hung in water of the temperature of 130 degrees. This is to soften the outside, that it may receive the desired impression from the net, which is done by taking them from the water while developed in the nets, placing them in a frame and straining the nets tightly over them by means of a screw. This indents the threads of the net into the cheese in such a manner as to give the external appearance of the fruit from which they are named. After this operation the cheeses are hung in the nets from three to five weeks, for the outside to harden, and are then set on shelves having suitable hollows and concavities for the cheeses to rest on. In the centre of each concavity a hole two inches in diameter is cut through the shelf, the more freely to admit air to the cheese, and to allow any liquid, which comes from it, to run off. The nets used for the cheeses are made from three threaded flax twine, and the manufacture of them costs, exclusive of the material, about five cents each. They will last three or four years.—*Boston Cultivator.*

The Farmer's Home.

MR. EDITOR: Having during the past year traveled through a portion of this, and some of the adjoining New England States, I have had an opportunity to observe many New England farmer's homes. While there are some which present a pleasing and inviting aspect, there are many so cheerless and unanviting, that they seem to send a chill through one's whole frame. Buildings are located without any regard to appearance, and every ornamented tree and shrub in the vicinity has fallen before the woodman's axe without a thought except how many potatoes could be grown on the land; in front of the dwelling where should be gravelled walks, graceful shade trees, beautiful shrubs, carefully trained climbing vines and pretty flowers, are geese, pigs, or bleating calves and noisy ducks whose utility seems to consist in giving the inmates of the house timely notice of the approach of a stranger, who easily judges of the number of acres the farmer possesses, by the size of the wood-pile and the number of broken wheels, carts, sleds, plows, and other worn out farming implements which deck the yard on either side. Should the stranger linger a few minutes, desirous to learn some of the character of the person he is about to see, he has but to view the rye from the adjoining field, one end of which is used as a pasture for cows, horses and sheep, the other as a meadow, the two-rods in width by the whole length of the field, which has a fence on each side, and is pretty dirty everywhere, it is only because they are not yet old enough to carry out their own desires.

The man who can take hold of the handles of such plows as I have seen, *and not look back*, must be one whose mind is so absorbed in the word *utility* that he thinks of nothing but the fattening of his land as each turning furrow scrapes guano from his plow, not even perceiving the increase of his own weight, by an external application of the same material upon his hands.

I do not believe man was placed here to spend his whole time in procuring gold with which to enlarge his farm, for what profiteth a man if he gain the whole township and lose his own happiness? The farmer who desires to keep his children at home, should neglect nothing within his means to make his home attractive. Let neatness and order manifest itself in every department; let him beautify what he already possesses, rather than enlarge his farm, and thus make his home so attractive that his children no longer seek the artificial beauties of the city, but become satisfied with the purer and superior attractions of their rural home. There is perhaps no class better able to make their homes attractive than the farmer, but in his eagerness to acquire more territory he often fails to perceive it.

I could name individuals who own hundreds of acres of land, but cannot spare a rod for a flower-garden for their daughters, or an acre for an orchard for their sons, and yet lament that their daughters yearn to be treading the loom for some manufacturing company, and their sons the counter of some city merchant.

I cannot but hope that the time is fast approaching when the farmer will be as eager to satisfy the wants of his family, as he now is those of a stranger, and thus make his home a happy one, and his children contented.—*Cor. N. E. Farmer.*

INTRODUCTION OF DOMESTIC ANIMALS.—The following account of the introduction of domestic animals into this country, has been condensed from the Census Report. It furnishes a clue to the origin of our native cattle:

The first animals brought to America from Europe were imported by Columbus, in his second voyage, in 1493. He left Spain as Admiral of seventeen ships, bringing a collection of European trees, plants, and seeds of various kinds, a number of horses, a bull, and several cows.

The first horses brought into any part of the territory at present embraced in the United States, were landed in Florida, by Cabeca de Vaca, in 1527, forty-two in number, all of which perished, or were otherwise killed. The next importation was also brought to Florida, by De Soto, in 1539, which consisted of horses and swine, among which were thirteen sows; the progeny of the latter soon increasing to several hundred.

The Portuguese took cattle and swine to Newfoundland and Nova Scotia, in the year 1553. Thirty years after, they had multiplied so abundantly that Sir Richard Gilbert attempted to land there to obtain supplies of cattle and hogs for his crew, but was wrecked.

Swine and other domestic animals were brought over to Arcadia, by M. L'Escarbot, a French lawyer, in 1604, the year that country was settled. In 1806 the French extended their settlement into Canada, and soon after introduced various animals.

In 1609, three ships from England, landed at Jamestown, in Virginia, with many immigrants, and the following domestic animals, viz: six mares, one horse, six hundred swine, five hundred domestic fowls, with a few sheep and goats. Other animals had been previously there. In 1611, Sir Thomas Gates brought over to the same settlement one hundred cows, besides other cattle. In 1610, an edict was issued in Virginia, prohibiting the killing of domestic animals of any kind, on penalty of death to the accessory, and twenty-four hours' whipping to the concealer. As early as the years 1716, the swine had multiplied so rapidly in the colony that the people were obliged to palisade Jamestown, to prevent being overrun with them. In 1627, the Indians near the settlement fed upon hogs, which had become wild, instead of game. Every family in Virginia, at that time, which had not an abundance of tame hogs and poultry, was considered very poor. In 1648, some of the settlers had a good stock of bees. In 1667, sheep and mares were forbidden to be exported from the province. By the year 1724, or before, sheep had somewhat multiplied, and yielded good fleeces.

The first animals introduced into Massachusetts were by Edward Winslow, in 1624, consisting of three heifers and a bull. In 1626, twelve cows were sent to Cape Ann. In 1629, one hundred and fifteen cattle were imported into the plantations on Massachusetts Bay, besides some horses and mares, and several ponies and forty-one goats. They were mostly ordered by Francis Higginson, formerly of Leicestershire, whence several of the animals were brought.

The first importation into New York was made from Holland, by the West India Company, in 1625, comprising one hundred and three animals, consisting of horses and cattle, besides as many sheep and hogs as was thought expedient.—*N. E. F.*

HOW TO JUDGE CATTLE.—In all animals, the skin or hide forms one of the best means by which to estimate their [illegible] properties. In the handling of animals the hide is soft and silky, and the hair fine and sleek. A horse having a [illegible] a thick [illegible] a bed of [illegible] skin. But a thick set short hair always handles hard, and indicates a hard feeder."

There is a deal of valuable information embraced in the above short extract. The handling of animals, we have always considered a most important point in selecting a good feeder, and it is too much neglected. Nothing but practice will enable one to understand the difference in this particular. We have heard capital judges say, they would prefer to buy an animal with their eyes shut, if they were allowed to handle an animal, rather than judge by appearance only, without handling.

ARTESIAN WELLS.—The boring of Artesian wells is still being prosecuted in this vicinity with great success. Mr. G. A. Dabney has just had one completed in this city, which throws up a stream of water through a pipe six inches in diameter, with extraordinary force. The pipe extends some eighteen inches above the level of the ground, over the mouth of which two men have not sufficient strength to hold a small object, excluding the flow of the water altogether. The experiment was tried with a spade. It is supposed that the water from this well may be raised to a height of thirty feet.—*San Jose Tribune.*
