# Birds of Lincoln County: A Checklist

Lincoln National Forest

Reserve  
aQL684  
.N6B48  
2012

PRODUCED IN COOPERATION WITH  
Lincoln County Bird Club and  
Professional Birder Bill West

# Using the Checklist

The columns following the name of each species are intended to help the birder with identification.

The **Abundance** column refers to how numerous the species is in relation to other species.

- C - Common**
- F - Fairly Common**
- U - Uncommon**
- O - Occasional**
- R - Rare**

The **Residence** column lists the time of year the species normally appears in the checklist area.

- P - Permanent Resident** (present year-round)
- S - Summer Resident** (present from spring until fall migration)
- W - Winter Resident** (typically from October through March)
- M - Transient or Migrant** (present as a migrant in spring and/or fall)

The remaining columns describe the habitat(s) where one is most likely to encounter each species.

Note: This is not a comprehensive list; use it as a guide.

## Vegetation

Lincoln National Forest contains three ranger districts (Guadalupe, Smokey Bear, and Sacramento), three major mountain ranges (Guadalupe, Sacramento, and Capitan), and covers 1,103,441 acres in parts of four counties in southeastern New Mexico. The following information describes Smokey Bear Ranger District of the Lincoln National Forest.

Smokey Bear Ranger District, headquartered in Ruidoso, ranges in elevation from 5,400 to 11,400 feet. The district, lying entirely within Lincoln County, contains two wilderness areas—White Mountain and Capitan Mountains—totaling 86,000 acres. The vegetation ranges from semidesert plants, piñon pine and juniper, ponderosa pine, and mixed conifer to spruce, fir, and high elevation grasses and forbs. This range contains one of the few mountain ranges in the country that runs east to west.

	Abundance	Residence	Desert	Grassland	Oak Woodland	Oak/Juniper	Piñon/Juniper	Ponderosa Pine	Mixed Conifer	Lake/Marsh	Deciduous Riparian	Conifer Riparian

Please report any unlisted sighting to the Smokey Bear Ranger District in Ruidoso, New Mexico, at (575) 257-4095.

## Biodiversity

Since its creation in 1905, the Forest Service has been entrusted with management of the National Forest System. With passage of the Multiple Use–Sustained Yield Act in 1960 and the National Forest Management Act in 1976, the Forest Service's role was further refined to balance demands that were often in conflict: demands for forest products and demands to protect other resource values. These conflicting demands raised problems related to the map scales used for planning, protection of species and wildlands, forest conversion and simplification, fragmentation, pesticide use, and conservation of genetic resources.

While addressing these questions, the Forest Service continues to play many roles in conserving biodiversity, including renewable resources research, international forestry, aid to state and private forestry organizations and individuals, and, of course, stewardship of the National Forest System.

By virtue of its size and geographic breadth, the National Forest System ranks chief among the country's most important reservoirs of biodiversity. Indeed, the majority of nonmarine species in the United States probably occur somewhere on national forest lands.

The Forest Service strives to emphasize certain aspects of biodiversity in managing national forests and national grasslands, which cover 191 million acres from subarctic Alaska to tropical Puerto Rico—an area larger than the state of Texas. Scientists and resource managers are developing new knowledge and technologies that affect biodiversity such as population viability, ecosystem restoration, landscape ecology, habitat isolation and fragmentation, analysis of cumulative effects, and genetic variation.

The Forest Service also helps conserve biodiversity on state and private lands through cooperation and technology transfer with land managers in such areas as forest management, water quality, fire management, tree planting and breeding, and nursery management.

If you are interested in joining the Lincoln County Bird Club, contact the Smokey Bear Ranger District in Ruidoso, New Mexico, at (575) 257-4095.

A thank you goes to Anita Powell, Lincoln County Bird Club, for assistance with the bird map.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TTY). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TTY). USDA is an equal opportunity provider and employer.
