G. Remarks:

1. List items most needed to further health program in this H.C. district.

The Dr. in charge made complaints concerning present building. The building did not seem too bad. The use of space was much better than average health centers. The building had obviously been scrubbed and freshly sprayed heavily with D.D.T. Fujinomiya district covers all Fujinomiya area, therefore transportation should come before an annex or new building, in my estimation. There is but one health center M.D. for this area. There are many resort towns and small villages to be serviced.

2. Miscellaneous (problems, plans, equipment, shortages, etc.)

This group seemed more ingenuous and willing to operate willingly under hardship than health center groups as a whole.

H. Recommendations:

There are 15 H.C. in this pref. This H.C. ranks Good
