

AMERICA'S NATIONAL GAME By A. G. SPALDING PRICE, \$2.00 NET

A book of 600 pages, profusely illustrated with over 100 full page engravings, and having sixteen forceful cartoons by Homer C. Davenport, the famous American artist

The above work should have a place in every public library in this country, as also in the libraries of public schools and private houses.

The author of "America's National Game" is conceded, always, everywhere, and by everybody, to have the best equipment of any living writer to treat the subject that forms the text of this remarkable volume, viz., the story of the origin, development and evolution of Base Ball, the National Game of our country.

Almost from the very inception of the game until the present time—as player, manager and magnate—Mr. Spalding has been closely identified with its interests. Not infrequently he has been called upon in times of emergency to prevent threatened disaster. But for him the National Game would have been syndicated and controlled by elements whose interests were purely selfish and personal.

The book is a veritable repository of information concerning players, clubs and personalities connected with the game in its early days, and is written in a most interesting style interspersed with enliven

interesting style, interspersed with enlivening anecdotes and accounts of events that have not heretofore been published. The response on the part of the press and the public to Mr. Spalding's efforts to perpetuate the early history of the National Game has been very encouraging and he is in receipt

of hundreds of letters and notices, a few of which are here given.

ROBERT ADAMSON, New York, writing from the office of Mayor Gaynor, says:--"Seeing the Giants play is my principal recreation and I am interested in reading everything I can find about the game. I especially enjoy what you [Mr. Spalding] have written, because you stand as the highest living authority on the game."

BARNEY DREYFUSS, owner of the Pittsburg National League club:--"It does honor to author as well as the game. I have enjoyed reading it very much."

WALTER CAMP, well known foot ball expert and athlete, says:--"It is indeed a remarkable work and one that I have read with a great deal of interest."

JOHN B. DAV, formerly President of the New York Nationals:----"Your wonderful work will outlast all of us." W. INVING SNYDER formerly of the house of Peck & Snyder:-"I have read the book from cover to cover with great interest."

ANDREW PECK, formerly of the celebrated firm of Peck & Snyder-"All base ball fame should read and see how the game was conducted in early years."

MELVILLE E. STONE, New York, General Manager Associated Press:-"I find it full of valuable information and very interesting. I prize it very highly."

GEORGE BARNARD, Chicago: -- "Words fail to express my appreciation of the book. It carries me back to the early days of base ball and makes me feel like a young man again."

CHARLES W. MURPHY, President Chicago National Leagu: club:-"The book is a very valuable work and will become a part of every base ball library in the country."

JOHN F. MORRILL, Boston, Mass., old time base ball star.—"I did not think it possible for one to become so interested in a book on base ball. I do not find anything in it which I can criticise."

RALPH D. PAINE, popular magazine writer and a leading authority on college sport:—"I have been reading the book with a great deal of interest. 'It fills a long felt want,' and you are a national benefactor for writing it."

GEN. FRED FUNSTON, hero of the Philippine war:---"I read the book with a great deal of pleasure and was much interested in seeing the account of base ball among the Asiatic whalers, which I had written for Harper's Round Table so many years ago."

DEWOLF HOPPER, celebrated operatic artist and comedian:--"Apart from the splendid history of the evolution of the game, it perpetuates the memories of the many men who so gloriously sustained it. It should be read by every lover of the sport."

HUGH NICOL, Director of Athletics, Purdue University, Lafayette, Ind.--"No one that has read this book has appreciated it more than I. Ever since I have been big enough, I have been in professional base ball, and you can imagine how interesting the book is to me."

MRS. BRITTON, owner of the St. Louis Nationals, through her treasurer, H. D. Seekamp, writes:-"'Mrs. Britton has been very much interested in the volume and has read with pleasure a number of chapters, gaining valuable information as to the history of the game."

REV. CHARLES H. PARKHURST, D.D., New York:—"Although I am not very much of a 'sport,' I nevertheless believe in sports, and just at the present time in base ball particularly. Perhaps if all the Giants had an opportunity to read the volume before the recent game (with the Athletics) they might not have been so grievously outdone."

BRUCE CARTWRIGHT, son of Alexander J. Cartwright, founder of the Knickerbocker Base Ball Club, the first organization of ball players in existence, writing from his home at Honolulu, Hawaiian Islands, says: —"I have read the book with great interest and it is my opinion that no better history of base ball could have been written."

GEORGE W. FROST, San Diego, Calif.:--"You and 'Jim' White, George Wright, Barnes, McVey, O'Rourke, etc., were little gods to us back there in Boston in those days of '74 and '75, and I recall how indignant we were when you 'threw us down' for the Chicago contract. The book is splendid. I treasure it greatly."

A. J. REACH, Philadelphia, old time professional expert:—"It certainly is an interesting revelation of the national game from the time, years before it was so dignified, up to the present. Those who have played the game, or taken an interest in it in the past, those at present engaged in it, together with all who are to engage in it, have a rare treat in store."

DR. LUTHER H. GULICK, Russell Sage Foundation:--"Mr. Spalding has been the largest factor in guiding the development of the game and thus deserves to rank with other great men of the country who have contributed to its success. It would have added to the interest of the book if Mr. Spalding could have given us more of his own personal experiences, hopes and ambitions in connection with the game."

INTRODUCTION

Every person interested in base ball wants to keep posted on the standing of the clubs, and sometimes is eager to know what the percentage is without waiting for the newspapers to publish it.

Many base ball enthusiasts do not know how to compute the percentage. It is ascertained by dividing the games won by the total number of games played.

This little volume renders unnecessary, however, any calculations to learn percentages. It tells everything at a glance. In the left hand column you will find the games won; in the second column to the right the games lost, and in the third column, to the right of both, the correct percentage.

This is the only percentage book published which includes every position likely to be encountered in a 154-game schedule. It is the most complete of its kind that has been arranged.

It will prove of valuable assistance in other than base ball competitions which are determined by percentage, instead of by a "round robin" schedule.

TO FIND THE BATTING AVERAGE

Divide the total number of base hits by the total number of times at bat. Example: Wagner makes 171 hits and is 490 times at ba-171 divided by 490 gives .349.

TO FIND THE FIELDING AVERAGE

Divide the number of chances accepted *i. e.*, the total of put-outs and assists, by the number of chances offered, *i. e.*, the total of put-outs, assists and errors. The result will be the fielding average. For example: Dahlen has 316 put-outs and 494 assists—total chances accepted, 810. Add to 810 the number of errors, 61, and the total is 871. Divide 810 by 871 and the result is .930, Dahlen's average.

TO FIND THE BASE-RUNNING RECORD

Divide the number of bases stolen by the total number of games $\ln n$ which the player has taken part.

The Spalding "Official National League" Ball PATENT CORK CENTER

Adopted by The National League in 1878 and is the only ball used in Championship games since that time and, as made now with Patent Cork Center, has been adopted for twenty years more, making a total adoption of fifty-four years.

This ball has the SPALDING "PATENT" CORK CEN-TER, the same as used since August 1, 1910, without change in size of cork or construction. Same ball exactly as used in World Series Games of 1910. 1911, 1912 and 1913.

No. 1 { Each, - \$1.25 Per Dozen, \$15.00

Each ball wrapped in tinfoil, packed in a separate box, and sealed in accordance with the latest. League regulations. Warranted to last a full game when used under ordinary conditions.

THE SPALDING "OFFICIAL NATIONAL LEAGUE" BALL HAS BEEN THE OFFICIAL BALL OF THE GAME SINCE 1878

Spalding "All Star" Model Bats

No. 1005. This line for 1914 comprises twelve models specially designed for amateur players and selected from models of bats used by over five hundred leading batters during the past ten years. Quality of wood used is finest selected second growth Northern ash, air dried and treated as follows: yellow stained, mottled burnt, carefully filled, finished with best French polish. Each, \$1.00

Furnished in any of the following twelve models--Mention model number when ordering LENGTH WEIGHT LENGTH WEIGHT LENGTH WEIGHT

Model S1-31 in.		Model S5-34	in.	40 to 44 oz.	Model S9-35 in.	40 to 45 oz.

Spalding Brown Oil-Tempered Bats

No. 100D. These bats are tempered in hot oil and afterwards treated with a special process which darkens and hardens the surface and has exactly the same effect as aging from long service. The special treatment these bats are subjected to make them most desirable for players who keep two or three bats in use, as the oil gradually works in and the bats keep improving. Line of models has been very carefully selected. Timber used is the same as in our "Players' Autograph," "All Star," "Professional Oil Finish" and Gold Medal lines. . . Each, \$1.00

Furnished in any of the following twelve models-Mention model number when ordering

Prices in effect January 5, 1914. Subject to change without notice, Far Canadian prices see special Canadian Catalogue.

Standard Policy

A Standard Quality must be inseparably linked to a Standard Policy. Without a definite and Standard Mercantile Policy, it is impossible for a Manufacturer to long maintain a Standard Quality.

To market his goods through a jobber, a manufacturer must provide a profit for the jobber as well as for the retail dealer. To meet these conditions of Dual Profits, the manufacturer is obliged to set a proportionately high list price on his goods to the consumer.

To enable the glib salesman, when booking his orders, to figure out attractive profits to both the jobber and retailer, these high list prices are absolutely essential; but their real purpose will have been served when the manufacturer has secured his order from the jobber, and the jobber has secured

His order from the retailer. However, these deceptive high list prices are not fair to the consumer, who does not, and, in reality, is not ever expected to pay these fancy list prices. When the season opens for the sale of such goods, with their misleading When the season opens for the sale of such goods, with their misleading

but alluring high list prices, the retailer begins to realize his responsibilities, and grapples with the situation as best he can, by offering "special discounts," which vary with local trade conditions. Under this system of merchandising, the profits to both the manufacturer

and the jobber are assured; but as there is no stability maintained in the prices to the consumer, the keen competition amongst the local dealers invariably leads to a demoralized cutting of prices by which the profits of the retailer are practically eliminated.

This demoralization always reacts on the manufacturer. The jobber insists on lower, and still lower, prices. The manufacturer, in his turn, meets this demand for the lowering of prices by the only way open to him, viz.; the cheap-

ening and degrading of the quality of his product. The foregoing conditions became so intolerable that 15 years ago, in 1899, A. G. Spalding & Bros, determined to rectify this demoralization in the Athletic Goods Trade, and inaugurated what has since become known as "The Spalding

Goods i rade, and manginate immates the jobber entirely, so far as Spalding Policy." The "Spalding Policy" eliminates the jobber entirely, so far as Spalding Goods are concerned, and the retail dealer secures the supply of Spalding Athletic Goods direct from the manufacturer by which the retail dealer is assured a fair, legitimate and certain profit on all Spalding Athletic Goods, and the consumer is assured a Standard Quality and is protected from imposition. The "Spalding Policy" is decidedly for the interest and protection of the users of Athletic Goods, and acts in two ways:

First. - The user is assured of genuine Official Standard Athletic Goods and the same prices to everybody.

Second.-As manufacturers, we can proceed with confidence in purchasing at the proper time, the very best raw materials required in the manufacture of our various goods, well ahead of their respective seasons, and this enables us to provide the necessary quantity and absolutely maintain the Spalding Standard of Quality.

All retail dealers handling Spalding Athletic Goods are requested to supply All retail dealers handling Spalding Athletic Goods are reducested to supply consumers at our regular printed catalogue prices - neither more nor less-the same prices that similar goods are sold for in our New York, Chicago and other stores. All Spalding dealers, as well as users of Spalding Athletic Goods, are treated exactly alike, and no special rebates or discriminations are allowed to anyone. This briefly, is the "Spalding Policy," which has already been in successful operation for the past 15 years, and will be indefinitely continued. In other words, "The Spalding Policy" is a "square deal" for everybody.

Standard Quality

An article that is universally given the appellation "Standard" is thereby conceded to be the criterion, to which are compared all other things of a similar nature. For instance, the Gold Dollar of the United States is the Standard unit of currency, because it must legally contain a specific proportion of pure gold, and the fact of its being Genuine is guaranteed by the Government Stamp thereon. As a protection to the users of this currency against counterfeiting and other tricks, considerable money is expended in maintaining a Secret Service Bureau of Experts. Under the law, citizen manufacturers must depend to a great extent upon Trade-Marks and similar devices to protect themselves against counterfeit products — without the aid of "Government Detectives" or "Public Opinion" to assist them.

Consequently the "Consumer's Protection" against misrepresentation and "inferior quality" rests entirely upon the integrity and responsibility of the "Manufacturer."

A. G. Spalding & Bros. have, by their rigorous attention to "Quality," for thirty-eight years, caused their Trade-Mark to become known throughout the world as a Guarantee of Quality as dependable in their field as the U. S. Currency is in its field.

The necessity of upholding the Guarantee of the Spalding Trade-Mark and maintaining the Standard Quality of their Athletic Goods, is, therefore, as obvious as is the necessity of the Government in maintaining a Standard Currency.

Thus each consumer is not only insuring himself but also protecting other consumers when he assists a Reliable Manufacturer in upholding his Trade-Mark and all that it stands for. Therefore, we urge all users of our Athletic Goods to assist us in maintaining the Spalding Standard of Excellence, by insisting that our Trade-Mark be plainly stamped on all athletic goods which they buy, because without this precaution our best efforts towards maintaining Standard Quality and preventing fraudulent substitution will be ineffectual.

Manufacturers of Standard Articles invariably suffer the reputation of being high-priced, and this sentiment is fostered and emphasized by makers of "inferior goods," with whom low prices are the main consideration.

A manufacturer of recognized Standard Goods, with a reputation to uphold and a guarantee to protect must necessarily have higher prices than a manufacturer of cheap goods, whose idea of and basis of a claim for Standard Quality depends principally upon the eloquence of the salesman.

We know from experience hat there is no quicksand more unstable than poverty in quality—and we avoid this quicksand by Standard Quality.
