C. A. GREEN, President.

OUR CHAIRS A GREEN originated this method of doing business in a large way in 1874. We are the best equipped of all nurseries for the mail order trade. We are incorporated under New York State law, with \$100,000 capital, fully paid. We have the largest buildings and storage cellars and **MORE LAND DEVOTED TO THE GROWING OF TREES** than any other exclusively mail order nursery in the world. We have **150,000 Customers** scattered over every state and territory. Where once we had only one patron in a village or township, now we have large numbers. Our pleased patrons have thus extended our business.

Since we grow our own trees, we can be sure that they are **vigorous, healthy and true to name.**

Our financial standing is quoted in Dun's and Bradstreet's commercial reports, which can be seen in every bank or large business house through the country. We have permission to refer you to the **Traders' National Bank, Rochester, N. Y.**, in regard to our financial standing. Our general terms are cash with order. We **make no charge for packing or boxing** at prices offered in our catalogue. We charge for boxing wholesale and specially priced orders.

Plant Better Trees and Save Half of Your Money

If you buy of tree agents or peddlers more than half the money you pay them goes to the agent himself, for his wages and expenses. This you save by buying direct of us, the producer. If you wish to find the agent who sold to you you cannot do so, but you can always find us at Rochester, N. Y., where we have been growing trees for 25 years past.

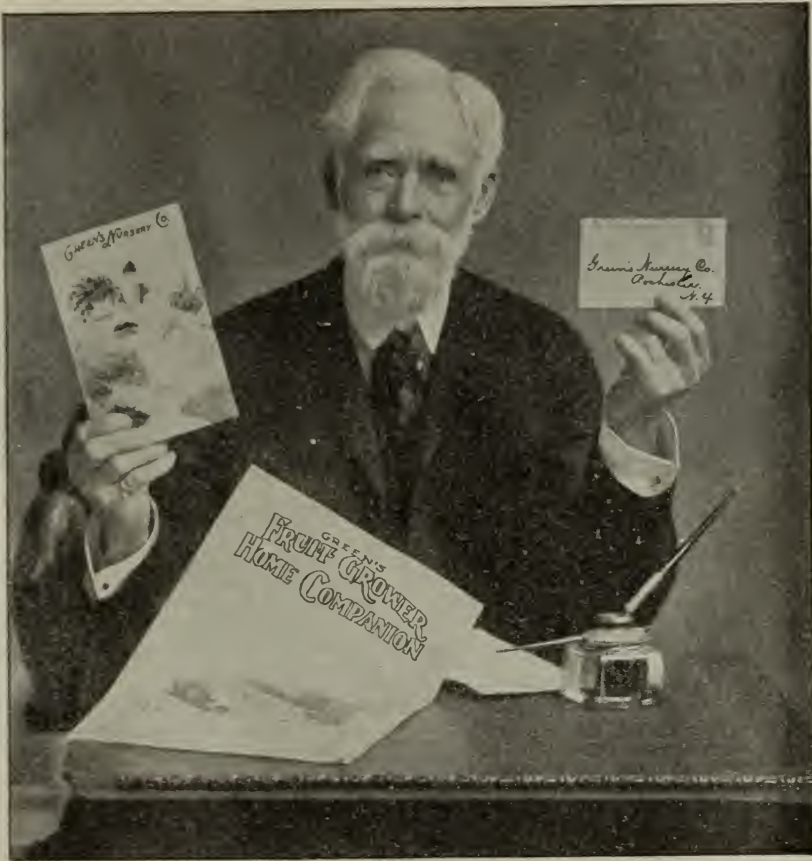

There is a difference between wholesale and retail prices of trees. We are selling trees to planters at nearly wholesale prices. How can we do this? We can do it for the reason that we do not have to pay salaries to tree agents and tree peddlers to canvass the entire country. We have no tree agents. Our catalogue is our only salesman. Those nurserymen who sell through tree agents spend half the money they get for the sale of trees in paying agents and agents' expenses.

We sell better trees than most nurserymen. We have 245 acres devoted to growing trees, plants and vines. We handle our trees with great care and pack them carefully, so that they arrive in the finest possible condition.

Our Trees, Plants, and Vines are of Our Own Growing.

We sell various sizes of trees. Those who live far away order small size trees at lower prices, since the freight and express charges are less on them than on larger trees. Small trees are carefully sorted and are in fine condition and are sold much cheaper than the larger size.

This is the way I Order Plants, Trees and Vines.

I send to Green's Nursery Co., Rochester, N. Y., for their illustrated catalogue which describes the various varieties of fruit and ornamental trees, vines and plants, and gives prices after the description of each variety. In that catalogue I find an order sheet on which I make out a list of the trees, plants, etc., which I desire to plant, attaching prices to it. Then I procure a postal money order, express money order, bank draft, or I enclose money in the letter, and register it and forward the order, money and my letter in an addressed envelope which I find in Green's catalogue. This is an easy way and a desirable way to order trees, plants and vines. This is the kind of business that Green's Nursery Co. has done during the past twenty-five years. Many hundreds of thousands of dollars have in this way been sent to Green's Nursery Co. and the orders have been faithfully filled, as is seen by the fact that such orders are constantly increasing. Every new year brings more orders than the past. Green's Nursery Co. is incorporated under the laws of New York State, with a paid-up capital of \$100,000. Any Bank can tell you in a moment about our responsibility and financial standing, by consulting Dun's or Bradstreet's Commercial Reports.

SURPLUS TREES FOR SALE AT LOW PRICES.

20,000 Poplars.—There is to-day no more popular street, cemetery or farm shade tree than the Carolina Poplar. We offer also the Lombardy Poplar. We offer trees 8 to 10 feet, also 10 to 12 feet high. Write at once for our prices per dozen, 50, 100, 1000 or car load. We also have a surplus of APPLE AND STANDARD PEAR TREES, GRAPE VINES AND CURRANT BUSHES.

SURPLUS GRAPE VINES FOR SALE AT LOW PRICES.

What is more attractive or profitable than grape vines planted to supply the home, or market? We have several car-loads of grape vines dug that must be sold. These are the best and finest grape vines we have ever grown; they have splendid roots and are more vigorous than those usually sold. If you are thinking of planting 100, 500, 1000 or more grape vines, do not fail to write us for our special pen prices before buying elsewhere. Our surplus grape vines consist of those well tested and most valuable varieties, such as Concord, Niagara, Worden, Diamond-white, Campbell's Early, and, best of all, that hardy new white vineyard grape known as the Chas. A. Green grape. I will guarantee that you will not be disappointed in the vigor, productiveness or hardiness of this new white grape, the Chas. A. Green grape. It is not surpassed by any other variety.

The above picture was taken by the Orange Judd Farmer, of rows of grapes in a vineyard trained to wires.

GRAPE VINES AT A BARGAIN.

One-third Off Regular Price.

We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—all 2-year-old first-class grape vines, for 98 cents, regular price being \$1.35.

Certificate Worth \$1.50.

If sent in with order on or before March 15th.

(WRITE YOUR NAME AND ADDRESS PLAINLY HERE.)

State.....

THIS CERTIFICATE (when accompanied by a cash payment for \$10.00 worth or more of trees, etc.) entitles the holder to a credit of One Dollar on his purchase of trees, plants or vines, but the prices must be those printed in Green's Catalogue, and no plant, vine or tree, premium or gift, must go with this offer. It also entitles him to one year's subscription to Green's Fruit Grower.

If your nursery order amounts to \$5.00 or over, this Certificate will be accepted in payment for one year's subscription to GREEN'S FRUIT GROWER magazine.

This Certificate will not be accepted after March 15th, 1905.

GREEN'S NURSERY CO., ROCHESTER, N. Y.

SURPLUS TREES AT BARGAIN PRICES.

SURPLUS APPLE AND POPLAR TREES, CURRANT AND GRAPE VINES FOR SALE.

We have just cleared off a fifteen-acre field of apple trees that we had growing on leased land, and among these trees are many that are a little too small to grade up to the full market size. These trees are over 4 feet high, $\frac{1}{2}$ inch caliber, are branched, have straight bodies and excellent roots, and will do well anywhere and come into bearing as soon as larger trees. We offer these smaller trees at surprisingly low prices. If you write us we will send you prices and full particulars. **Varieties:** We offer in these smaller trees the following varieties—Ben Davis, Maiden's Blush, Yellow Transparent, R. I. Greening, York Imperial, Duchess, Hubbardston, Fanny, Grimes' Golden, Spy and many other varieties. Speak quick if you want these trees.

Surplus Currant Bushes.—We have car loads of splendid currant bushes that must be sold. Write for prices in lots of 100, 1000 or more. Our varieties are Red Cross (best currant of all), Cherry, Black Champion.

Poplar Trees.—We fear we have more of these beautiful shade trees dug than we can sell; therefore, we make special low prices for those who desire them in lots of 25, 50, 100, 1000 or by the car load. Let us know how many you want. These trees are just the right size for planting.

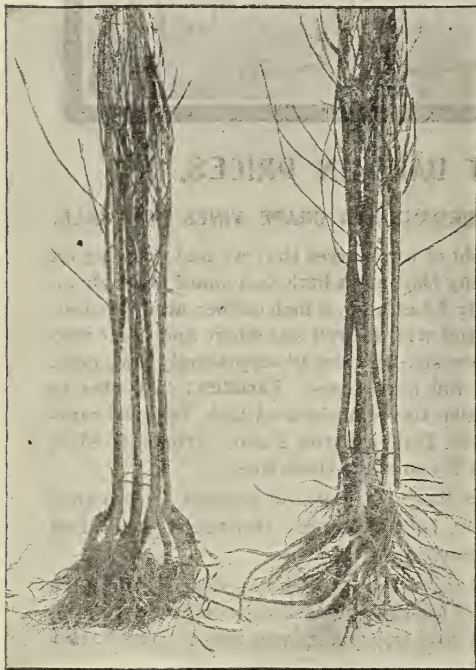

Surplus Grape Vines.—We have dug, and which must be sold, the following choicest varieties: Concord, Worden, Niagara, C. A. Green new white grape, Campbell's Early and Diamond. These are the varieties in demand all over the country for home supply and commercial vineyards. Let us know how many grape vines you want, and ask us for our special pen prices in lots of 50, 100, 1000 or by the car load.

Green's Nursery Company Guaranty.

KNOW ALL MEN BY THESE PRESENTS, that if Any Person, who may Avail Himself (or Herself) of any Proposition Described Within the Pages of this Catalogue of Spring 1905, should Within 5 Days after Receiving the Goods, Be Not Entirely Satisfied, or For Any Reason Regret the Transaction. We Guarantee to Immediately Duplicate that Part of the Order which Failed to Satisfy, or to Send by Mail a DUE CHECK Good for the Amount Involved, Redeemable in Stock the Next Following Season, Providing the Complaint is a Reasonable One.

Given under my Hand and Seal at Rochester,
N. Y., this 1st day of January, 1905.

CHAS. A. GREEN,
Pres't.

This size Green's First Class Trees 2 to 3 years, 5 feet high.

THIS TO CERTIFY that the stock in the nursery of Green's Nursery Co., of Rochester, N. Y., was duly examined in compliance with the provisions of Section 83 of the Agricultural Law, and it was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious pest or pests.

Dated September 6th, 1904, Albany, N. Y.

C. A. WIETING, Com. of Agriculture.

CHAS. A. GREEN recommends the following list of apples for planting in different States named below. Other varieties succeed there, but those named are the leaders:

For New England, New York, New Jersey, Pennsylvania, Indiana and Michigan :

- | | |
|-----------------|-----------------|
| American Blush, | Jonathan, |
| Banana, | King, |
| Bismarck, | Lord Nelson, |
| Baldwin, | Northern Spy, |
| Ben Davis, | Red Astrachan, |
| Duchess, | R. I. Greening, |
| Fanny, | Sutton Beauty, |
| Fameuse, | Wagener, |
| Grimes' Golden, | Wealthy. |
| Gravenstein, | |

For Illinois, Wisconsin, Missouri, Kansas, Minnesota, Iowa, and Nebraska, all hardy:

- | | |
|-----------------|---------------------|
| American Blush, | N. W. Greening, |
| Ben Davis, | Rome Beauty, |
| Duchess, | Shiawassee Beauty, |
| Fameuse, | Stark, |
| Hubbardston, | Willow Twig, |
| Jonathan, | Yellow Transparent, |
| Maiden's Blush, | York Imperial. |
| McIntosh, | |

For Delaware, Maryland, Virginia, West Virginia, Kentucky and Tennessee:

- | | |
|---------------|---------------------|
| Ben Davis, | Stark, |
| Duchess, | Wealthy, |
| Gravenstein, | Yellow Transparent, |
| Jonathan, | York Imperial. |
| Northern Spy, | |

For North and South Dakota, Wyoming and Montana, all hardy:

- | | |
|-----------------|---------------------|
| Duchess, | Pewaukee, |
| Fameuse, | Wealthy, |
| N. W. Greening, | Yellow Transparent. |

IMPORTANT.

Orders for trees, etc., to go by express, should not be for less than \$1.00 worth. Orders to go by freight should not be for less than \$2.50. If your order is less than \$1.00, see mail order pages.

Northport, L. I., April 25, 1904. Green's Nursery Co.: The stock ordered from you arrived last week in fine shape, and I wish to express to you my appreciation of the same. The trees are all doing nicely and look thrifty and hardy, and I am very much pleased with them. I can most certainly heartily recommend your stock to anybody, and shall take pleasure in doing so in this part of the country, for whatever I have purchased from you has always reached me in good condition and proved to be good stock. Thanking you for your kindness in sending me the extra stock, I remain, yours very truly,
M. C. R.

YELLOW TRANSPARENT APPLES.

If you want the best and most productive yellow summer apple, plant Yellow Transparent. It has succeeded well at Green's fruit farm where it has borne fruit in the nursery rows and on orchard trees the second year planted. It is something like Early Harvest in appearance. It is a stronger, more upright grower and as great a bearer. The famous Dr. Hoskins, of Vermont, was in love with Yellow Transparent as the dairy man may be in love with his best milch cow. He had a photograph taken of an orchard tree, laden with fine specimens, borne two years after planting. None but hardy trees can be grown in Vermont, where this succeeded so well, but now it has been tested in almost every state in the Union and has been found hardy, productive, vigorous and desirable in every way. It is called Yellow Transparent because it has the transparency of the purest wax. The specimens are free from defects and will keep a long time for a summer apple. Its quality is superior and this with its great beauty and wonderful productiveness makes it a favorite summer apple the world over.

Price of Yellow Transparent: First-class trees, 2 to 3 years, 5 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100. Extra size, 6 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100.

SUMMER APPLES

Cooper's Early.—This is an apple well known for its great productiveness. Of medium size, color pale yellow, good quality; tree a strong grower. Succeeds well in the West.

Sweet Bough.—Large, light yellow, tender, sweet and excellent for baking. Of compact, moderate growth, producing large crops annually and is a profitable market sort. August.

Golden Sweet.—Large; yellow; sweet apple; productive; of good quality.

Red Astrachan Apple.—This hardy early variety is well known, and a lengthy

description is not necessary. Its merits are conceded in nearly every state in this country. Always demands a ready sale at paying prices, if grown for market, and is

indispensable for home use. Large, roundish, nearly covered with deep crimson, overspread with a thick bloom; handsome, juicy, good, though rather acid. The tree is hardy, a free grower, with large foliage, and is a *good bearer*; highly esteemed on account of fine appearance, earliness, and hardiness. August.

Duchess of Oldenburg (Red Fall Apple.)—A man near Rochester, N. Y., planted 5000 apple trees that were supposed to be Banana, a winter variety, but which, when they came to fruit, proved to be Duchess of Oldenburg. He was about to sue the rascally nurseryman who thus imposed upon him, but that year his orchard bore an immense crop of fruit, which sold at remarkably high prices, and he concluded that it was the most fortunate thing that ever occurred to him that his trees were all of the Duchess. This happened many years ago, but the orchard has continued to be one of the most profitable orchards in the country, and has yielded its owner a liberal fortune. This orchard of Duchess apples has borne fruit every year for many years. The owner picks the fruit very early and ships it to New York and Boston, where it sells at high prices. Duchess is a large, beautiful Russian apple; roundish; streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality, and esteemed by many for dessert. Tree a vigorous, fine grower, and an early and abundant bearer. September. Succeeds well in the Northwest, where most varieties fail. *The hardiest valuable fall apple.* In Minnesota and Wisconsin horticultural reports recently published we find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, having survived in some instances when all others died (except Wealthy), and all in all a wonderful variety for those states. It is termed a summer variety in some parts. It keeps long and is both a summer and fall variety. Very hardy.

Price of all varieties on this page: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

Fanny (Late Summer Apple).—Charles Downing's favorite apple. If you fail to plant trees of the Fanny you will make the mistake of your life. It is the handsomest fruit of its season in the world, and there is no apple of its season that compares with it in fine quality. It is among the best, and its fragrance will fill a room like the fragrance of a basket of roses. This apple is rare, being seldom found in any catalogue. We have taken great pains to have it true to name. When you plant trees of Fanny remember you have one of the finest apples in the world, and one of the rarest, since it is seldom found in any nursery or orchard. The handsomest of all the late summer or early fall varieties, and the finest in quality. Also beautiful in form and of good size. Fanny was recommended to me by the great and lamented Charles Downing, who sent me specimens which delighted me beyond expression. He pronounced it the queen of apples. It is of a dark, rich crimson color; firm, juicy, agreeable sub-acid. The tree is a vigorous grower and productive; originated in Pennsylvania. Very desirable as a dessert fruit. We predict for it a great future. J. S. Gaylord, Kan., writes: "My Fanny trees are healthy, thrifty, grow well in orchard, produce good crops of fine apples. Bore when we had no other good fruit."

Price of Fanny: First class trees, 2 to 3 years, 5 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100. Extra size, 6 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100.

AMERICAN BLUSH.

American Blush (High Quality Red Winter Apple).—Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be growing in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. This is a remarkable statement, since many varieties of apples bear only every other year. The foliage of American Blush resists apple scab fungus and other diseases, being tough and leathery, as well as luxuriant, which accounts in part for the great productiveness of American Blush. Season, November to March. We secured this variety of James Norton, Farmer Village, N. Y., a friend of ours, a veteran and reliable fruit grower. He says that American Blush somewhat resembles Hubbardston, but that it is entirely distinct from Hubbardston. We have fruited this apple at our farm for several years and are convinced that Mr. Norton is correct in his statement, since American Blush proves to be a better keeper than Hubbardston. It has, however, many of the characteristics of that popular variety called Hubbardston. The flesh of the American Blush is of a crisp and tender character, juicy, aromatic, and the most tempting of all apples. Once eaten one cannot forget the peculiar delicacy and attractiveness of this highly flavored variety. Heavily streaked and splashed with bright crimson; superlative quality, hardy and productive. Not only is it attractive in appearance and flavor, but it is remarkably reliable in bearing—every year in many localities. Where other varieties have failed year after year American Blush has yielded large crops of remarkable fruit. We make a specialty of this splendid apple, because we recognize its value to our patrons. There are other good varieties, but none that will give our friends better returns for a winter fruit. As a dessert fruit, cooking fruit, for shipment to nearby markets, or for exportation to England, it will be found an excellent variety, bearing when other varieties grow no fruit.

Price of American Blush, first-class trees: 2 to 3 years, 5 feet high, 20c. each, \$2.25 per 12, \$19.00 per 100. Extra size, 6 feet high, 25c. each, \$2.75 per 12, \$22.00 per 100.

Princess Louise.—Prof. H. E. Van Deman says that this is a Canadian apple of some value. The size is medium, oblate conical, mixed and striped red over a yellowish ground color; flesh yellowish, fine, juicy, tender; sub-acid flavor; good quality.

Rome Beauty Apple.—This is a large and handsome apple, almost entirely covered with bright red; an apple of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West.

Price of Princess Louise and Rome Beauty: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.25 per 12, \$19.00 per 100. Extra size, 6 feet high, 25c. each, \$2.75 per 12, \$22.00 per 100.

WINTER APPLES.

American Beauty—A deep red winter apple of good quality; hardy, productive.

Yellow Bellflower.—Season, winter. Hardy, large size, beautiful golden color, often with red blush; conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid; of excellent quality.

Grimes' Golden.—Of all the apples in cultivation there is none that quite equals it in satisfying and delicious quality. It is only medium in size; roundish truncated in shape; green when ready to gather, but turns rich golden yellow and sometimes a little blushed; flesh firm, becoming tender and breaking, juicy, rich sub-acid, aromatic, satisfying; of highest quality, says H. E. Van Deman. Trees very productive.

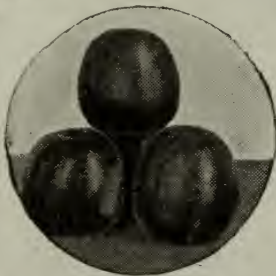

Mc Intosh Red.—Season early winter. A very hardy variety, originating in Ontario, Canada. Size, medium to large with yellow skin entirely covered with bright red. Is of fine flavor, juicy, sub-acid. A seedling of Fameuse.

Minkler—A new red winter apple; a long keeper of good quality.

Ontario.—Hardy, fine thrifty grower, very productive. Handsome, large size, yellow, nearly covered with bright red; juicy, sub-acid, valuable for market and home use.

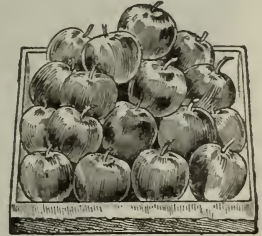

Paragon.—A beautiful hardy red winter apple, originating in Tennessee. It is a seedling from Winesap is of medium size and a desirable variety. This apple has attracted considerable attention.

Shiawasse Beauty.—Hardy, and of finest quality. A favorite of Prof. A. J. Cook. Well spoken of by many. Hardy and vigorous. "Every family should have one." Medium in size; whitish, splashed and striped with rich red. Its flavor is delicious. Season, October to January.

Golden Russet.—Medium size; dull russet with a tinge of red on the exposed side; flesh greenish, crisp, juicy, high flavored. Tree a vigorous grower, with light-colored speckled shoots, by which it is easily known; hardy, bears well. November to April.

Jonathan Apple.—Very hardy. Jonathan originated in Woodstock, N. Y., and was exhibited as early as 1829, and sometimes called the New Spitzenberg. Does well in many of the Western States and in the mountain orchards on the Pacific Coast. The apple is a clear, whitish yellow, thickly covered with clear red stripes; of medium size, but very handsome, and one of the best in eating quality.

Missouri Pippin—Large, oblong, bright red with deep stripes; very handsome, good quality. Early and exceedingly productive bearer. December to April.

Mann Apple.—Season, winter. Size, medium to large. This is an attractive yellow apple, mild sub-acid; a prolific and profitable variety. Tree vigorous and hardy; an early and annual bearer, and a late keeper.

Pound Sweet has been a most profitable and productive apple with us. Large size, of a pleasant quincy flavor, juicy, crisp.

Pewaukee.—This is one of the hardy varieties. The size is medium; shape, nearly round, very full at the stem cavity and often lipped; color greenish yellow with mixed and striped red; flesh, yellowish, coarse grained, juicy; flavor, almost sour, not rich; quality fair, says H. E. Van Deman.

Roxbury Russet.—Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping.

Seek-No-Further.—(Westfield.) Medium to large, striped with dull red and slightly russeted. Flesh tender, rich, and excellent. Tree a good bearer and fruit always fair. Season, November to February.

Price of all varieties on this page: First class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

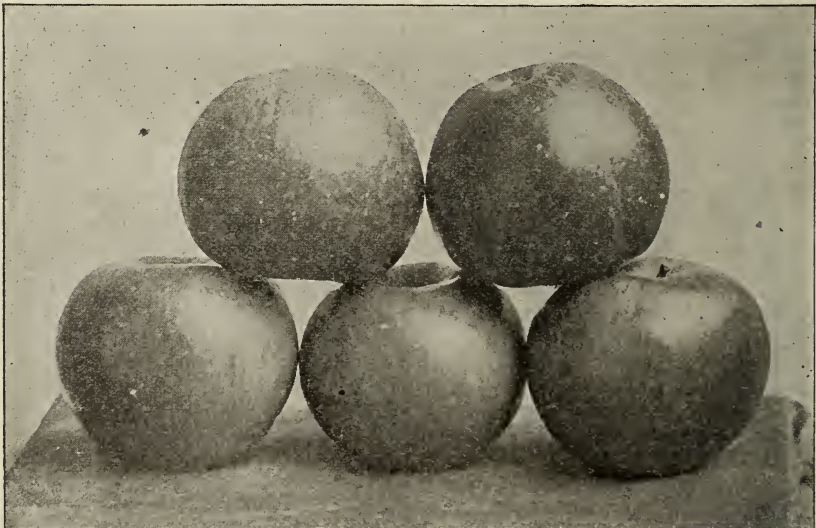

WISMER'S DESSERT.

Price of Wismer's Dessert Apple Trees Reduced to 50c. each.

Wismer's Dessert. Hardy. Best of all in quality. The Dollar apple. The tree is iron-clad in hardiness. It is vigorous in growth and healthy in constitution. It bears very early, regularly, and excessively. The fruit is winter in season, and is a first-class shipper. It is of the most popular size, medium to large. It is very handsome in appearance, being smooth and most brilliantly colored. Its aroma and flavor are much superior to any other apple known. Its texture is like a pear, being extremely juicy, melting, rich, buttery and free from fibre. This cannot be said of any other apple.

Prof. John Craig says: "The quality of this apple pleases me very much. It is of a peculiarly distinct character in its melting juiciness."

MAIDEN'S BLUSH—One of the Most Profitable Late Fall Apples.

Maiden's Blush Apple.—This is one of the handsomest and most highly prized of all the fall apples. It is a hardy and very productive variety, succeeding not only in the Eastern States but throughout many of the Western States. It is of superior quality, flesh being tender and of fine flavor. The fruit is uniformly fair and attractive. It has a red cheek on a clean yellow skin. Its season is September and October. It makes a beautiful tree and is a good grower.

Price of Maiden's Blush Apple Trees: 2 to 3 years, 5 feet high, 10c. each, \$1.00 per 12, \$9.00 per 100. Extra size, 6 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100.

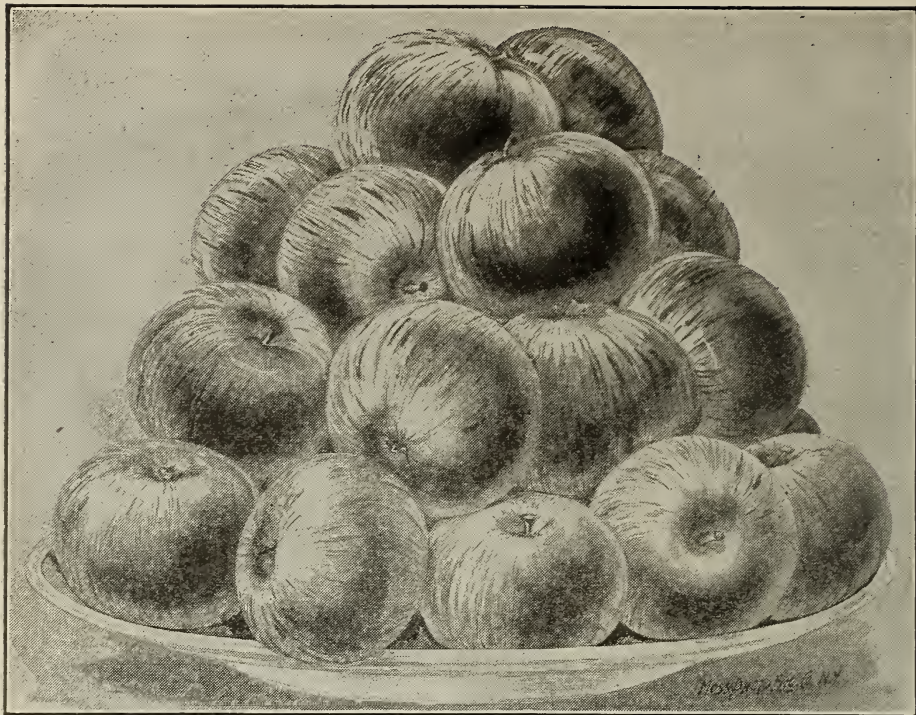

GREEN'S IMPROVED BALDWIN APPLE.

At the rear of C. A. Green's Rochester, N. Y., dwelling stood a thirty-year-old apple tree which in every way appeared to be a Baldwin. The apples were placed in the cellar. The following March we were surprised to find them of a far brighter and better color than Baldwin. The red blush and streaks were brighter, and the yellow portions were more like gold than Baldwin. On eating these apples we found that the quality was far better than Baldwin. We cannot recall a more tender fleshed or better flavored apple. It has all the excellent qualities of the Baldwin. In quality and beauty it is far superior to Baldwin. It is a superior strain of the Baldwin. Prof. L. H. Bailey says that trees of certain varieties bear better fruit than others, and that by grafting from these peculiar trees we may greatly improve well known varieties. This is just what we have done. C. A. GREEN.

Price of Green's Improved Baldwin: First class trees, 2 to 3 years, 5 feet high, 40c. each. Extra size, 6 feet high, 50c. each.

Baldwin (Red Winter Apple).—What the Bartlett pear is to pears, the Baldwin is to apples for the Eastern and Middle States. While sufficiently hardy for these sections, it will not endure the severe climate of the Northwest. No variety yields larger crops or bears shipment better, or is more attractive in color and size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. For a commercial orchard it can be relied upon. In New England, New York, Ontario, and Michigan, this is one of the *most popular and profitable sorts* for table or market.

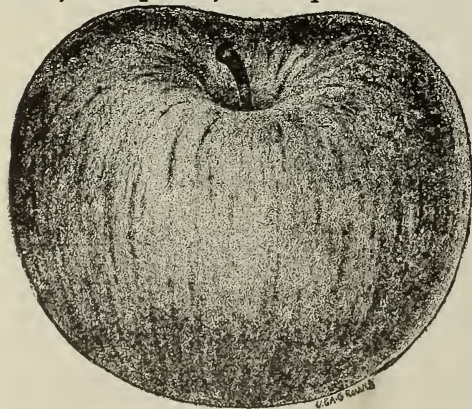

Price of Baldwin: First class trees, 2 to 3 years, five feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

See Bargain Price for this Variety.

BEN DAVIS is a hardy and attractive red apple, and succeeds wherever apples are grown. We have seen it in the far South bearing well and withstanding the extreme heat. We have seen it in Northern Michigan and Central New York, Ontario and Massachusetts where it surprised us with its size and handsome color. There is no apple in all of North America that is grown so extensively and with such general profit as Ben Davis. Say what you will of it the market men like it, and somehow the customers do too, else they would not continue to buy it. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. Its quality varies, owing to locality. It is supposed to have originated in Virginia and is growing in favor in many States. It is excellent for cooking. Fruit large and handsome; bears handling well and keeps until March in ordinary storage. There are better apples, but where Ben Davis succeeds one can always be sure of success owing to its regular and heavy bearing qualities.

Reduced Price of Ben Davis Apple Trees: First class trees, 2 to 3 years, 5 feet high, 10c. each, \$1.00 per 12, \$9.00 per 100. Extra size, 6 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100.

WEALTHY—REDUCED SIZE.

Wealthy Apple.—This is a beautiful hardy winter apple, originating in Minnesota. It is gaining in popularity each year on account of beauty and quality, as well as its hardiness. It is productive and an acquisition almost everywhere. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle States. In season it differs somewhat, according to locality; in New York and neighboring States its season is December to February, and earlier in others. **Price of Wealthy:** First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

NORTHERN SPY APPLE.

This superior red winter apple originated near Rochester, N. Y. It has no superior for beauty and quality. When at its best it is of large size, and an abundant bearer. The fruit is held on a long, slender stem, which sways in the wind, therefore the Spy does not blow off from the tree. It is a good keeping apple. Season, December to February.

Price of Spy: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

Lord Nelson (Winter) Blenheim—Our C. A. Green recommends this remarkably large and handsome apple with great confidence, since it has proved for him at Green's fruit farm one of the

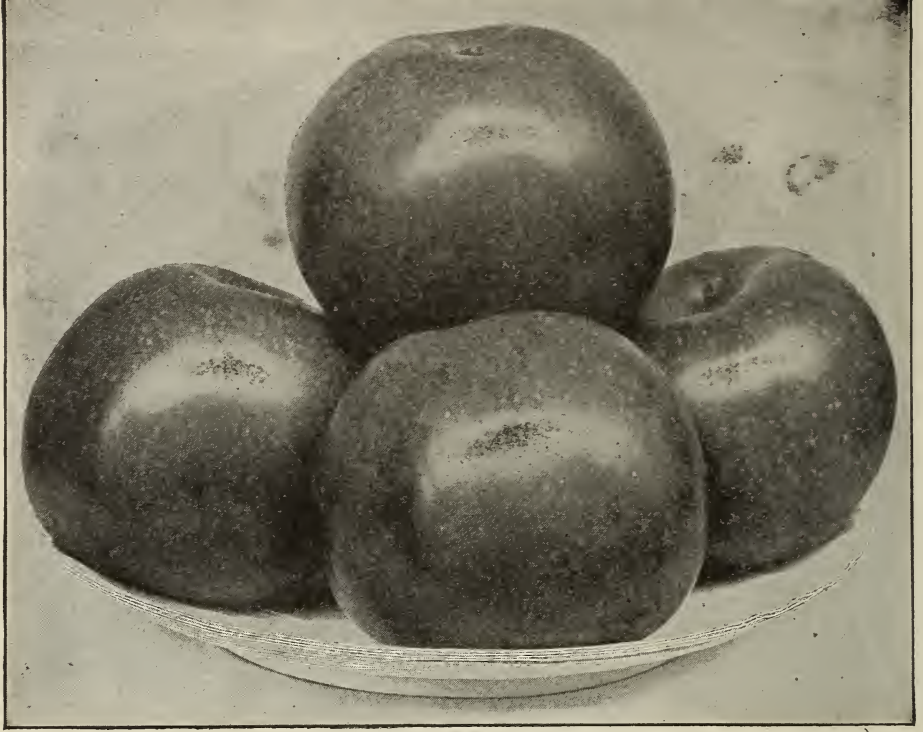

most profitable varieties of early winter apples ever grown there. It ripens at a date when apples are in great demand, that is, before the other winter varieties are ripe enough to eat. The skin of this apple is of a golden hue almost entirely covered with stripes and slices of bright red. Its quality is delicious.

LORD NELSON

This superb apple is known as the Blenheim Pippin in Canada and Blenheim Orange in England, where it originated. It is a regular bearer of large, handsome, reddish apples of good quality, desirable for dessert or for cooking purposes. The flesh is yellow, crisp, juicy, tender, and highly flavored. Its season is early winter, being at its best in December and January, but we have kept it much later. The tree is of handsome form and a good, rapid grower.

Price of Lord Nelson Apple Trees: Medium size, 20c. each, \$2.00 per 12. Large size, 25c. each, \$2.50 per 12.

Rhode Island Greening.—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than perhaps any other variety. It is a good keeper, but will keep better if picked early. This Greening is of a beautiful yellow color when ripe, and is a most abundant yielder, producing immense crops. The fruit is invariably of large size, and is free from defects. There is no apple known that will make better pies or sauce than the R. I. Greening, therefore there is no apple more highly prized by the housewife. The Greening cooks soft and is famous for its pie-making qualities. The Greening succeeds admirably throughout the middle states, and almost everywhere except in extreme north where only such hardy varieties as North Western Greening, Yellow Transparent and Duchess of Oldenburg will succeed. It is an enormous bearer, and bears regularly every year.

A Rochester man has sold the apples from twenty-eight acres of orchards at \$3.00 per barrel, and he estimates that he will have 7000 barrels, which will yield \$21,000.00, a little less than \$1000 per acre. This man has learned to grow fine fruit. You can learn to grow fine fruit also. Why not plant an apple orchard?

Bargain Price of R. I. Greening trees: First-class trees, 2 to 3 years, 5 feet high, 10c. each, \$1.50 per 12, \$9.00 per 100. Extra size, 6 feet high, 15c. each, \$1.50 per 12, \$12.00 per 100.

Gravenstein.—Flesh tender, juicy, very rich, sub-acid, highly flavored; mid-autumn, productive, handsome, and excellent; fine in all localities; shoots strong, becoming smooth and shining, ascending; fruit rather large, roundish, slightly oblate, obtusely and obscurely ribbed, surface a little wavy; striped and splashed with bright red on a yellow ground; stalk three-quarters of an inch long; cavity rather deep, calyx large, basin deep, narrow.

Fall Pippin.—Very large, roundish, oblong, yellow; flesh tender, rich and delicious. Tree is a free grower, spreading and fine bearer. One of the most valuable varieties for table or market. Season, October.

Fameuse.—(Snow Apple)—Hardy; medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits, and valuable for market. November to January.

Price of Gravenstein, Fall Pippin and Fameuse: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

KING APPLE.

King (King of Tompkins Co.)—A red winter apple. When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. A superb red apple of the largest size and finest quality. Tree a vigorous grower, good bearer and hardy. The King succeeds well in Western New York, and on account of its color and firmness is one of the most desirable for distant shipping.

Price of King: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

York Imperial Apple.—This fine, hardy, large, red winter apple has rapidly leaped into favor of late, and on account of its beauty has been in demand for shipment to Europe. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab.

Price of York Imperial: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

Garden Royal Apple.—This is a high class dessert apple of great value. I have long been trying to get scions of this rare but valuable variety, and feel confident that those who appreciate a superior quality of fruit will be delighted with Garden Royal. It is a reddish apple on yellow ground, somewhat redder than Baldwin. The flesh is yellowish white, exceedingly tender and fine grain, mild, and sub-acid.

Price of Garden Royal, large size 25c., medium size 20c.

Hubbardston (Hubbardston Nonesuch).—Large; striped yellow and red; tender, juicy and fine; strong; good bearer. November to May. The Hubbardston has long been a popular early winter apple, often growing to the largest size, and always of good size. It is a handsome red apple, far superior in quality to many varieties. Hubbardston has become more popular recently than ever before, since it has been discovered that its leaves have great power to resist attacks of the apple scab fungus. Owing to this fact Hubbardston bears full crop every year where other varieties fail, or bear every other year. The tree is a good, vigorous grower, and the fruit is prized as a dessert fruit, or for cooking.

Price of Hubbardston: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

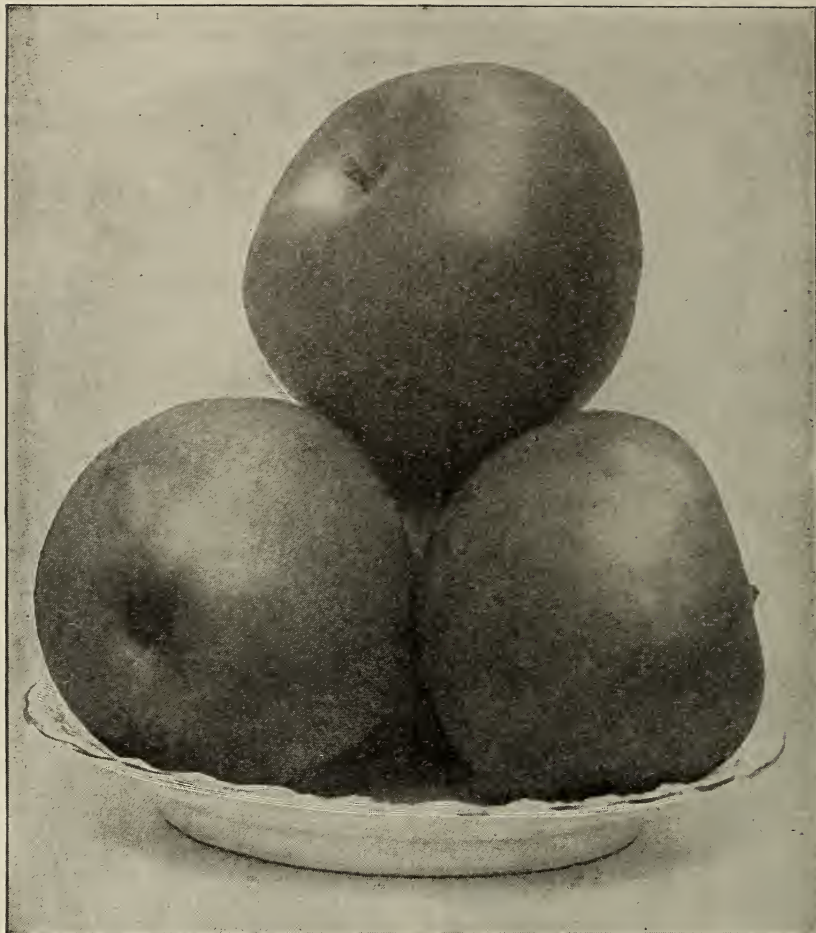

VALUABLE CRAB APPLES.

Transcendent.

—The old favorite, well known in every state and territory where trees grow. *Immensely productive, bright red, one of the most popular.* September and October. Beautiful fruit, and no garden is complete without one. Tree rather irregular in growth.

Price of Transcendent: First-class trees, 2 to 3 years, 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

BANANA APPLE.—Better than Swaar in Quality.

Banana Apple.—A friend told me yesterday that he planted Banana appletrees three years ago and that these trees bore fruit last fall. This indicates that the Banana is an early fruiting variety. I am at this date, February 8th, eating Banana apples and have been for several weeks. I have my apples stored in bushel boxes in a cold storage building and take them out only as I want to eat them. The first winter apple eaten was the American Blush. After these were all gone I commenced on the Banana. I carried several of the Banana apples to the Western New York horticultural meeting, giving several of the members an opportunity to test its quality. Many spoke of its pronounced banana flavor; after eating a mouthful of this apple you have the sensation of having eaten bananas for half an hour. Some of the largest orchardists were greatly interested in the quality of this superior apple. Professor Van Deman says he considers the quality of Banana better than Swaar. Last year Banana at this date was as yellow as gold, with scarcely any red blush. This year Banana is covered with a blush so that in the box they almost look like red apples. This is simply a peculiarity of the season. Ordinarily Banana is a bright golden yellow apple. We have been growing Banana apple at Green's fruit farm for many years. The tree is a good grower. It is an attractive variety. No orchardist should feel satisfied without having the Banana in his orchard. No apple at Green's fruit farm gives more uniformly fair marketable specimens than Banana. It originated in the west, therefore it must be reasonably hardy.

C. A. GREEN.

Price of Banana Apple Trees: Medium size, 20c. each. \$2.00 per 12, \$18.00 per 100. Large size, 25c. each, \$2.50 per 12, \$20.00 per 100.

Stark.—A hardy winter apple; tree a No. 1 grower, upright and spreading; good bearer, fruit large greenish yellow, shaded and striped with dark red and sprinkled with brown dots; good to best. January to June.

Sutton Beauty.—C. A. Green has always been loud in praise of this beautiful winter apple, which he is growing largely. It is a rare variety seldom found in the catalogues, and on account of its great beauty, productiveness, and quality, should be found in every collection. Medium to large, roundish; waxen yellow, striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper. Tree a free grower, vigorous, and productive.

Tallman Sweet.—Season, winter. Medium to large size; color light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. A late, well known favorite.

Walbridge.—Hardy and productive fruit of medium size, skin pale yellow shaded with red, flesh crisp, tender, juicy; a late keeper. Tree very vigorous.

Wagener (Red Winter Dessert Apple)—Wagener is one of the most beautiful winter apples ever grown. It is supposed to be a seedling of the Northern Spy. It is of the highest quality, the flesh being crisp, tender, and aromatic. It succeeds well East and West. All successful fruit-growers desire such an apple as the Wagener as an attractive fruit to market at home or abroad. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple.

Wolf River (Winter.)—A comparatively new sort which originated in Wisconsin. Fruit is very large, some specimens weighing 27 ounces; round, flattened, conical, highly colored with stripes and splashes of red. An excellent cooking fruit. Core compact, small. Moderate.

November to February. This is one of those hardy apples in such demand in the north and northwest, where our well known apples will not succeed. I have seen this apple at various exhibitions and have been attracted by its large size and great beauty. Sub-acid; quality, medium.

Price of Apple Trees where not otherwise stated: First-class trees, 2 to 3 years. 5 feet high, 18c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 6 feet high, 20c. each, \$2.25 per 12, \$18.00 per 100.

Bismarck is a new apple attracting considerable attention. It is an attractive apple in color and shape, the skin being a bright yellow covered on one side with bright carmine. The principal feature of the Bismarck which recommends it to many people is that it bears fruit at a very early age on small trees.

Price of Bismarck Apple Trees, 4 to 5 feet high, 2 years, 35c. each, \$3.50 per 12.

ADDITIONAL VARIETIES OF WINTER APPLES.

- Baxter.**—Red Winter Apple.
Peach.—Superior quality winter apple.
Rambo.—A very highly esteemed variety. Streaked with red, tender, juicy.
Pennsylvania Red.
Scott's Winter.—Red, excellent; very hardy.
Spitzenburg.—An old favorite; bears well.
Twenty Ounce.—A very large, showy, striped apple. Tree a free grower and fine bearer; excellent for baking.
Willow Twig.—Large greenish yellow, striped with dull red; early bearer.
Walter Pease.—Fine red winter apple.

WOLF RIVER.

Niagara Peach.—C. A. Green's favorite peach. This photo-engraving represents three Niagara peaches, and on top of these three is placed one Elberta peach to show the comparative sizes of these two varieties. Niagara is the largest, most beautiful, and most profitable of all peaches. It has been called the improved Elberta. It is better in flavor and quality than Elberta. It ripens between Early Crawford and Elberta. Its foliage is large and leathery, and the trees are remarkable specimens of vigor. It is the great market peach in Western New York.

Vice-President J. S. Woodward said of the new peach at the meeting of the W. N. Y. Horticultural Society: "We have a peach which is an accidental seedling of the Crawford. I wouldn't set a Crawford if I could get the peach I refer to. It is about one picking later than Crawford; averages a good deal better, better color, better leaf and holds its size to the end of the season. You can't sell any other tree in our locality if the variety I speak of can be obtained. It is called 'Niagara.'"

Prices for Niagara Peach trees are as follows: Largest size 25c. each, \$2.50 per 12, \$20.00 per 100. Medium size, 20c. each, \$2.25 per 12, \$18.00 per 100. For mailing sizes see prices on mailing page.

Elberta Peach.—Unsurpassed as a valuable, large, beautiful peach of good quality. One of the best orchard varieties, and valuable also for planting in the garden. A friend near Rochester has planted fifteen acres entirely to Elberta. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. At Green's fruit farm this year we are harvesting a large crop of Elbertas, and yet we had three consecutive frosts last spring that destroyed nearly all peach buds in this locality. Many people have feared that too many Elbertas would be planted, but I think these fears are groundless, since it is such a valuable variety. Owing to the great demand for Elberta trees, we are compelled to limit somewhat the number of Elberta trees desired with each order, and yet we have a large supply of this variety. Elberta is large, yellow, with red cheek, juicy, and high flavored, flesh yellow; freestone. Season medium early, following quick upon Early Crawford.

with red cheek, juicy, and high flavored, flesh yellow; freestone. Season medium early, following quick upon Early Crawford.

Price of Elberta Peach, first-class orchard planting trees 3 to 4 feet high, well branched, 15c. each, \$1.50 per 12, \$10.00 per 100. Price for selected sized trees, 18c. each, \$1.80 per 12, \$12.00 per 100.

Crawford's Early.—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty, and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people, when they buy peaches, ask for Crawford's. Price of Early Crawford, 15c. to 18c. each.

Fitzgerald Frost-proof Peach.—Fruit large; brilliant color, bright yellow, suffused with red; flesh deep yellow, best quality. Ripens with or just after Early Crawford.

Price of Fitzgerald, 15c. to 18c. each.

Prices and sizes of Peach trees, where not otherwise stated, are as follows: First-class orchard planting trees, 3 to 4 ft. high, well branched, 15c. each, \$1.50 per 12, \$10.00 per 100. Price for selected largest sized trees, 18c. each, \$1.75 per 12, \$12.00 per 100.

HELP!

Surplus Apple Trees, etc., For Sale.

HELP !! We have just cleared off a fifteen-acre field of apple trees that we had growing on leased land, and among these trees are many that are a little too small to grade up to the full market size. These trees are over 4 feet high, are branched, have straight bodies and excellent roots, and will do well anywhere and come into bearing as soon as larger trees. We offer these smaller trees at surprisingly low prices. If you write us we will send you prices and full particulars. Varieties: We offer in these smaller trees the following varieties: Ben Davis, Maiden's Blush, Yellow Transparent and R. I. Greening, Hubbardston, Spy, York Imperial, Grimes' Golden, Fanny, Duchess, and other varieties. Speak quick if you want these trees.

Surplus Grape Vines.—We have dug, and must sell, the following choicest varieties: Concord, Worden, Niagara, C. A. Green new white grape, Campbell's Early and Diamond. These are the varieties in demand all over the country for home supply and commercial vineyards. Let us know how many grape vines you want and ask us for our special pen prices in lots of 50, 100, 1000 or by the car load.

Surplus Currant Bushes.—We have car loads of splendid currant bushes that must be sold. Write for prices in lots of 100, 1000 or more. Our varieties are Red Cross (best currant of all), Cherry, Black Champion.

Poplar Trees.—We fear we have more of these beautiful shade trees dug than we can sell, therefore we make special low prices to those who desire them in lots of 25, 50, 100, 1000 or by the car load. Let us know how many you want.

Crawford's Late—A superb yellow

peach, very large, productive, and good, ripens here about the close of the peach season. Season last of Sept. Not a very late

peach—its season is just right. Largest of all older kinds at Green's fruit farm. It does not overbear, thus does not need thinning. Its quality is superb.

Price of Late Crawford, 15c. to 18c. each.

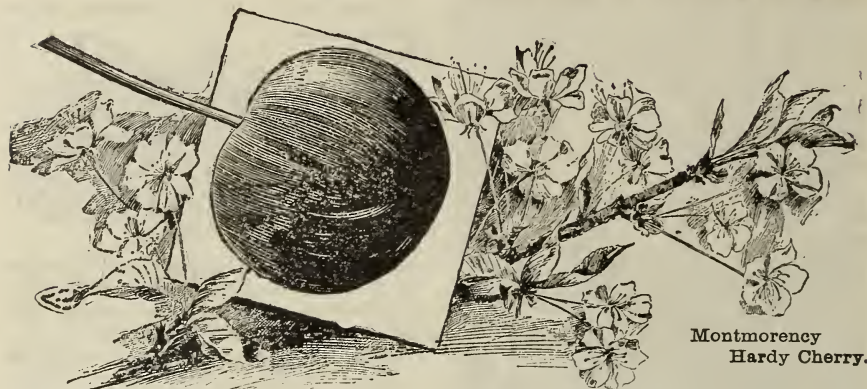

Crosby.—A fine, large, handsome yellow peach, with remarkably small pit that bears regular crops north of the peach belt. Quality delicious. Season follows quickly after Early Crawford, which is an excellent time for putting on the markets. Crosby is now so well known that it will be no experiment planting it. It has now been planted in nearly, if not all peach growing States, and is spoken of in the highest terms. Many large orchards of this variety have been planted the past two seasons,

Price of Crosby, 15c. to 18c. each.

Champion Peach.—Ripens early, best in quality, hardy in bud, very productive. This fine early peach fruited abundantly at Green's fruit farm this season, ripening at Rochester, N. Y., in August.

Price of Champion, 15c. to 18c. each.

MORELLO OR HARDY CHERRIES.

Montmorency
Hardy Cherry.

MONTMORENCY—Most Profitable Hardy Market Cherry.

Montmorency Cherry—The most popular of all hardy cherries for market and home use. This cherry is planted largely in orchards at Rochester, N. Y., and in other parts of the country. It is of large size, light red in color, stem rather short. The tree is very hardy and a vigorous grower. The trees bear fruit soon after planting.

Price of Montmorency: First-class trees, 2 years, 4 feet high, 25c. each, \$2.50 per 12, \$20.00 per 100. Extra size, 5 feet high, 30c. each, \$3.50 per 12, \$25.00 per 100.

Early Richmond Cherry—This is a hardy cherry, fruiting on young trees soon after planting. It is the good old variety that yielded such marvelous crops in the gardens of our boyish days. We have at

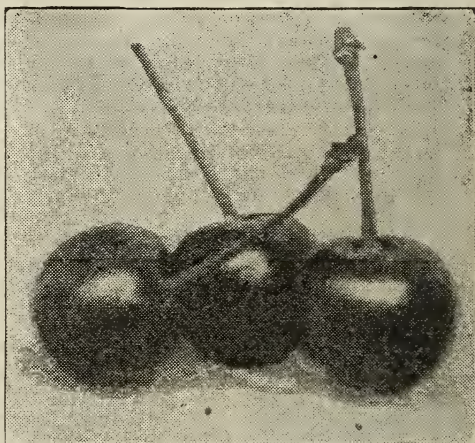

**GREEN'S
NURSERY Co.,
ESTABLISHED 1870.**

Green's fruit farm quite an orchard of Early Richmond cherry trees that are heavily loaded with fruit almost every year. The fruit does not rot upon the trees, and can be left without picking longer than most varieties. The trees bear fruit regularly each year, and the orchard has been highly profitable.

The tree is a free grower; hardy, healthy and very productive. One of the best. "If I could plant but one cherry it would be Early Richmond," says *American Agriculturist*.

"For Illinois, Early Richmond can be relied upon for market, also the Montmorency is valuable," says A. G. Hammond, Secretary Illinois State Horticultural Society. It is a safe, reliable, worthy favorite.

Prices and sizes for Sour Cherry trees of the following varieties: Montmorency, English Morello and Early Richmond: First-class orchard planting trees, 4 feet high, 25c. each, \$2.50 per 12, \$20.00 per 100. Price for selected largest sized trees, 5 feet high, 30c. each, \$3.50 per 12, \$25.00 per 100.

BATES CHERRY.—NEW.

Bates Cherry—This is a new and improved variety of the Early Richmond family. It is the largest, darkest colored, and best flavored of any of the hardy red cherries that we have seen. It is eight to ten days earlier than Early Richmond in ripening, and ever so much better in quality.

Price for strong 2-year-old trees, 50c. each.

The Lipp Late Blood Cherry—(Latest of all Cherries.) This new cherry originated with a friend at Lancaster, Pa. It ripens there five weeks later than English Morello, and six weeks later than Richmond. It is a very prolific bearer.

Price of Lipp Cherry trees: 75c. each for 2-year-old trees, and 1-year-old trees.

SWEET VARIETIES OF CHERRIES.

Green's Tartarian Cherry.—In front of our Rochester house are two black cherry trees which are something of a wonder to all who see them. These trees never fail to bear a heavy crop of fine fruit. The trees are perhaps forty years old. They have reached an age when most cherry trees begin to fail and to become unproductive, but these trees are as productive as in their earlier years. A notable peculiarity of the fruit upon these trees is that it remains upon the trees in an eatable condition for nearly three weeks. I have never known cherries to remain so long upon the trees. The fruit from these trees sells in the market more readily than any other fruit we are acquainted with. It is accepted by our marketmen as the Black Tartarian. It has much the appearance of the Black Tartarian, and yet we have never known that good old variety to remain so long in perfect condition upon the trees, which is a desirable feature in prolonging the season for family use. We call it Green's Tartarian cherry, not to indicate that it is a new variety, but to indicate that it is what it is represented to be—a superior strain of the Black Tartarian.

Price of Green's Black Tartarian Cherry Trees, 2 years, 60c. each, \$6.00 per 12.

Bing New Black Cherry.—This is a new and superior black cherry.

Price for medium sized Bing Cherry Trees, 75c., largest size, \$1.00 each.

POPLAR TREES.—Car Loads in Surplus.

We fear we have more of these beautiful and popular street and shade trees dug than we can sell, therefore we will make a special low price to those who desire them in lots of 25, 50, 100, 1000 or by the car load. These trees are just the right size for planting. They are not overgrown. We offer Poplar trees 8 to 10 feet, also 10 to 12 feet high. Carolina Poplar is round headed, something like an apple tree. It has monstrous leaves. It is a rapid grower. It is beautiful in all stages of growth. Lombardy Poplar is an upright grower like the steeple of a church and is used by landscape gardeners to give marked effect. It is made a landmark along highways, or by farmers making their homes conspicuous features in the landscape. There is no other tree so healthy and enduring for city or village streets as the Poplar. We offer both the Carolina and Lombardy Poplar at bargain prices. Let us know how many you want so we can make you special pen prices.

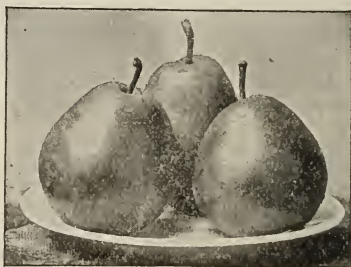

HARVESTING BARTLETT PEARS.

Bartlett Pear.—*Successful as Standard or Dwarf.* Dwarf Bartlett pears in C. A. Green's garden only 5 feet high were filled with beautiful specimens. What the Concord is among grapes, the Baldwin among apples, the Crawford among peaches, is the Bartlett among pears. It is the *most popular pear*, both for home use and market, that the world has ever known. It is buttery and melting, with a rich, musky flavor. The tree is vigorous and rapid in growth. Its season is September. Many people remove half of the fruit in August, ripening this for market, thus relieving the tree of its strain and securing larger fruit from that which remains on the tree. As the Bartlett is liable to overbear, nearly half of the fruit should be removed early in the season when about the size of a hickory nut. If this is done and the trees are kept in cultivated soil and well fertilized, they will bear profitable crops of the finest specimens imaginable. All pears should always be picked before fully ripe to secure best quality.

Clapp's Favorite Pear.—*Standard and Dwarf.* Season, August, earlier than Bartlett.

This is without doubt the most productive pear in cultivation. Every limb is a veritable rope of pears. A splendid pear resembling the Bartlett and ripening a few days earlier. A cross between Bartlett and Flemish Beauty; the tree is hardy and vigorous, either as standard or dwarf. Care should be taken to pick the fruit ten days before it ripens upon the tree. This pear is very large, remarkably beautiful and a prolific bearer. No collection is complete without it. Larger than Bartlett and has a handsome red side.

Flemish Beauty.—A large, beautiful, melting sweet pear. Tree very hardy, vigorous and fruitful; succeeds well in most parts of the country. Needs an open sunny location on well drained soil for best results. Season September and October.

Price of Standard Bartlett, Clapp's Favorite and Flemish Beauty: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 25c. each, \$2.50 per 12, \$18.00 per 100. Price of Dwarf trees: First-class, 2 to 3 years, 3 to 4 feet, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 4 to 5 feet, 18c. each, \$1.75 per 12, \$12.00 per 100.

WILDER EARLY PEARS—Best Very Early Kind.

The Wilder Early Pear pleases all because: First, the tree looks well; it is a good grower. Second, it produces a crop early; two year grafts at the nursery and trees four years old produce a lot of fruit. Third, the quality of the fruit is the best. Fourth, one does not have to wait until frost to get it. It ripens August 1st or before, in warmer localities than ours. Fifth, it is so productive—we remember one branch bearing 27 perfect specimens. Sixth, it is handsome in appearance. And lastly, it is hardy.

Lawrence.—Late Winter Pear.—Standard and Dwarf.—Size medium to large, obovate; golden yellow; flesh melting, with a pleasant aromatic flavor. Tree a moderate grower and abundant bearer. This is one of the best winter pears and one that should be in every collection, whether for home use or market. Though not over large and showy, its excellent quality and productiveness places it high in the estimation of all our pear growers.

Sheldon Pear.—*First Quality*; large, round, russet and red, melting, rich and delicious. Tree vigorous, erect, and handsome, and bears well when grown. As a standard should be more largely planted. Season October and November. Pick early in September and store in a cold cellar.

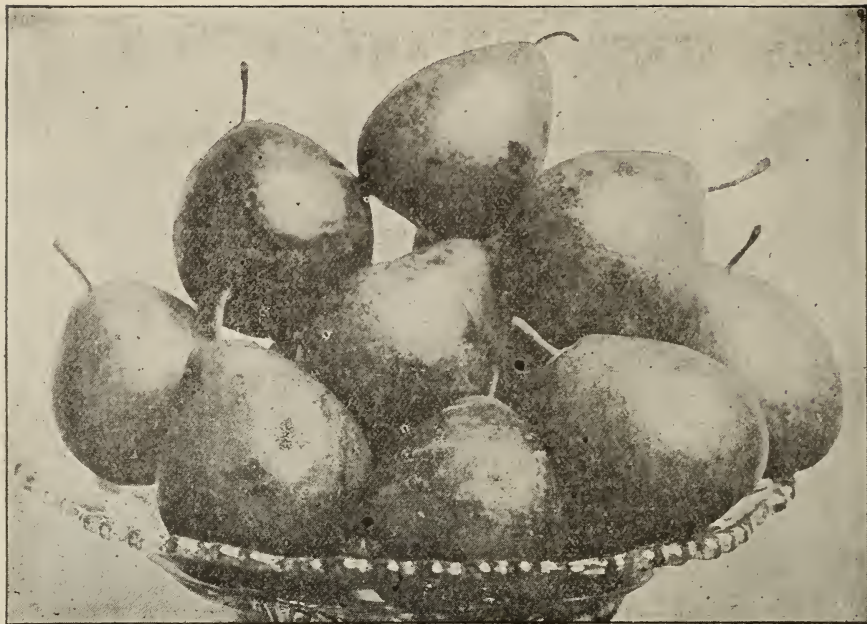

SHELDON.

Price of Standard Wilder Early, Lawrence and Sheldon: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 25c. each, \$2.50 per 12, \$18.00 per 100. **Price of Dwarf trees, first-class,** 2 to 3 years, 3 to 4 feet high, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 4 to 5 feet high, 18c. each, \$1.75 per 12, \$12.00 per 100.

Bosc Pear—Finest quality, large as Bartlett, very productive. Bosc is a large pear, the size of Bartlett, deep golden yellow, with yellow flesh, of a peculiar shape shown in cut—notice that the cut is greatly reduced in size. Bosc pear resembles Sheldon in quality, but is considered by many as superior to Sheldon and later in ripening. On account, however, of the difficulty of securing trees of this variety it is not largely known and comes under the head of rare varieties. Hardly one planter in a hundred has a tree of this variety, and yet none can be planted with greater confidence for both home use and market.

Price of Bosc Pear trees: Large size, 50c. each. Medium size, 35c. each.

GANS SEEDLING PEAR, NEW.—Size reduced.

This valuable summer pear was sent us by the originator, who is an old friend and patron, six years ago. This has given us time to fruit the pear at Green's fruit farm and to test its merits. Our C. A. Green is greatly pleased with it. It is a valuable early variety of high quality. Ellwanger & Barry describe it as follows: "A fine early pear, ripening just after Tyson and a week to ten days before Bartlett. It is large and handsome, pyriform in shape, color yellow, with slightly brownish cheek; flesh fine grained, melting, very juicy, sweet, sugary, quality very good. It shows no tendency to rot at the core. Tree a vigorous grower."

Price for Standard Trees: Medium size, 2 years, 35c. Large size, 50c. each. Dwarf trees of Gans Pear, 65c. each.

Worden-Seckel Pear.—This is a seedling of the Seckel, which it resembles and fully equals in flavor and quality, and far surpasses in size, color, form and beauty. It is more juicy and equally delicious. For twelve years the tree has not failed to bear a full crop of bright, clean fruit without spraying or any other treatment, showing freedom from tendency to scab. It is more upright and a much better grower than its parent, with rich, abundant foliage, which it retains until late in the season. It has not been injured by freezing, even in the cold locality of its origin, showing its unusual hardiness. It is an enormous bearer, ripens a little later than the Seckel, keeps remarkably well, retaining its flavor until the last. It is free from the tendency to decay at the core. It bears

exceedingly young, producing frequently large clusters of beautiful pears on three and four-year-old standard trees in the nursery row.

Price for medium sized trees: Standard, 35c. each; largest size, 50c. each. Dwarf Worden-Seckel, 25c. for medium size, 2 years old; 30c. each for largest size.

Duchess Pear—(*Duchesse d'Angouleme.*)—*Dwarf.* Trees of the Duchess are great yielders, and being vigorous growers are money makers. What the Bartlett pear is as a standard, the Duchess pear is as a dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking. Like all dwarf pears, it should have the branches of the last season's growth cut back at least one-half every fall or in the spring before the growth begins. This is necessary to prevent the trees getting too tall and top heavy.

Kieffer Pear—*Standard and Dwarf.*

The Kieffer has many admirers on account of its splendid growth of tree, productiveness, and selling well in market. Its looks sell it. The fruit hangs on well and is not liable to be blown off, and is good to handle because it is hard when fit to pick. Nine hundred and forty trees, eight and nine years old, produced last year seven hundred and ninety-one barrels, which sold for \$1,028.30, averaging \$1.30 per barrel, clear of all expenses.

Anjou (Beurre d'Anjou.)—*Standard and Dwarf.* A large, handsome pear, buttery, and melting, with sprightly, vinous flavor; keeps into mid-winter. Tree a vigorous grower and a good bearer.

Louise Bonne—*Standard and Dwarf.* Good size, greenish yellow, with a bright cheek. September to October.

Clairgeau—*Standard and Dwarf.* Very large pyriform; yellow and red; handsome and attractive; flesh yellowish, nearly melting; keeps sound a long time after being gathered. Tree a free grower and *early abundant bearer*; a magnificent and valuable market fruit.

Vermont Beauty—*Standard and Dwarf.* A beautiful new seedling pear from Grand Isle, Vermont, up near the Canadian line. Probably the hardiest pear grown. Fruit medium size, not quite so large as Bartlett, but much larger than Seckel; skin yellow, nearly covered with bright carmine. A very handsome pear.

Seckel Pear—*Standard and Dwarf.* The standard of excellence in the pear, small, but of the highest flavor and production, and small Seckels sell better than large, if smooth and fair. Tree is stout, slow, erect grower. Season, September and October. Gives *excellent results*, both as standard and dwarf.

Price of Standard Trees, for all varieties named above: First-class trees, 2 to 3 years, 5 feet high, 20c. each, \$2.00 per 12, \$15.00 per 100. Extra size, 25c. each, \$2.50 per 12, \$18 00 per 100.

VARIETIES OF DWARF PEAR TREES.

Anjou, Buffum, Bartlett, Clairgeau, Duchess, Clapp's Favorite, Flemish Beauty, Howell, Kieffer, Lawrence, Louise Bonne, Seckel, Tyson, Vermont Beauty, Wilder Early.

Price of Dwarf Trees, first-class, 2 to 3 years, size 3 to 4 feet, 15c. each, \$1.50 per 12, \$10.00 per 100. Extra size, 4 to 5 feet, 18c. each, \$1.75 per 12, \$12 00 per 100.

Don't fail to take advantage of our special offer on all orders received by us on or before March 15th, 1905.

THE THANKSGIVING HARDY PRUNE.

It will keep for weeks and months after picking, like an Apple.—Prunes are plums, plums are prunes, but prunes are plums with much sugar in them. Another year's experience with this valuable prune leads us to think that we have not claimed enough for it. We did not know that it was a very hardy variety until the past winter of 1904 established that fact. Last winter was the most severe ever experienced, and in consequence nearly all plum trees growing in the nursery rows in this country were injured or destroyed. Thanksgiving Prune stood up nobly, not being hurt in the least, where all other varieties but natives were destroyed. Notice that but little space is given to offering other plum trees for sale in this catalogue, as there are scarcely any other varieties left uninjured by the winter. That Thanksgiving Prune is not only a variety of superior merit in many other respects but that it is hardy makes this one of the most valuable varieties of the age. Thanksgiving Prune is also a very vigorous grower; it makes a nice straight tree in the nursery row.

Prof. L. H. Bailey considers it of the Damson family. He says it has distinct merits. He says: "Your prunes keep until about the twentieth of November. *This Prune is certainly the longest keeper I have ever seen.*" L. H. BAILEY."

C. A. Green has eaten these prunes in January, and has kept them lying on his desk for two weeks in January, when he ate the rest of them, and there was no sign of rotting. The quality of this prune is superior, sweet and rich. It is the large amount of sugar in this variety that preserves it so long. Thanksgiving Prune ripens about the first week in October at Rochester, N. Y. This is one of the most remarkable prunes ever introduced. It has been thoroughly tested. A few prominent orchardists have planted from one to two hundred trees, paying \$3.00 each for them.

Read what the secretary of W. N. Y. Hort. Society says: "One month ago I received specimens of Thanksgiving Prune, placed them in cellar. November 1st I ate and found them sound and of excellent flavor."

Price of Thanksgiving Prune Trees, 2 years, largest size, 50c. each; medium size, 2 years old, 40c. each.

Damson Plum.—This is the best of Damsons. These are smallish plums, produced in thick clusters or groups, almost hiding the branches from view. It is highly prized for canning and for preserving. The tree is not a rapid grower in the nurseries, is difficult to propagate, therefore trees are always in short supply, and cannot be sold as low as other plum trees.

Burbank Japan Plum. Very productive. Best of the Japan plums. Comes into bearing two or three years after planting, covering a period of nearly three months with a daily supply of plums.

Wickson.—Hardy. A cross between Japan and American plums. Tree a good grower, of vase-like form, and an early and productive bearer. In several sections of the United States grafts set in 1895 fruited in 1896, showing superb specimens of fruit almost as large as turkey's eggs. From time fruit is half-grown till nearly ripe it is of a pearly white color; quickly soft pink shadings creep over it till in a few days it is changed to a deep crimson, covered with a light bloom. For marketing purposes it may be picked when white, and will color up almost as well as though left on the tree. Pit small, flesh tender, sweet, and delicious; season just following Burbank. Wickson is a very hardy variety, and one that is attracting attention everywhere on account of its large size and great beauty.

German Prune.—Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune.

Gueli Plum (Blue Magnum Bonum).—Season of ripening rather late. The color is a dark purple. The flesh is firm, subacid, and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this.

REINE CLAUDE PLUMS READY FOR MARKET.

Reine Claude (Bavay's Green Gage).—Roundish, oval, greenish, marked with red in the sun; a great favorite.

The Abundance (Japan) Plum.—The Abundance is large, showy and beautiful. Amber, turning to a rich, bright, cherry color, with a decided white bloom and highly perfumed. Flesh light yellow, exceedingly juicy and tender, and of delicious sweetness impossible to describe. Stone small and parts readily from flesh.

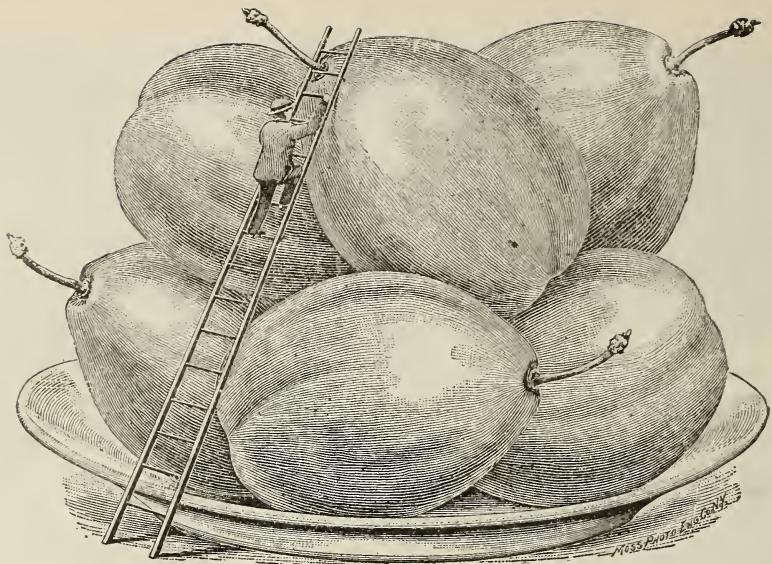

Red June.—A vigorous, hardy, upright spreading tree, as productive as Abundance; fruit medium to large, deep vermilion red, with handsome bloom, very showy; flesh light lemon yellow, slightly subacid, of good and pleasant quality. When a little better known likely to be in great demand for orchard planting. Of immense value for its very early ripening. It is the best in quality of any of the early Japanese varieties and is exceptionally free from rot. The fruit is medium to large, roundish conical, deep purplish red, covered with bloom, very handsome and attractive; flesh pale yellow, firm and meaty, excellent in quality. Trees come into bearing in two or three years.

RED JUNE PLUM,
BEARING IN
NURSERY ROWS.

Grand Duke Plum.—We have had our attention called to this plum, and have watched and fruited it for several years. It is one of the good varieties offered by us. Late in ripening, as large as Bradshaw, of the same color, free from rot, and one of the best late plums for market. It is more like a prune than the general varieties of plums. Tree is a vigorous grower; an all round desirable plum.

Price for all varieties of Plums named above: First-class trees, orchard planting size, 4 to 5 feet high, 2 to 3 years, 35c. each, \$3.00 per 12, \$20.00 per 100. Extra size trees, 2 to 3 years, 35c. each, \$5.00 per 12, \$27.50 per 100.

YORK STATE PRUNE. LARGE, BEAUTIFUL AND OF SUPERIOR QUALITY.

York State is one of the largest, best in quality, and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in August at Rochester, N. Y. This prune originated at Dansville, N. Y., where it has been grown largely by the Germans, who are great fruit growers. It is a seedling of the German Prune and has been sold by these Germans for German Prune to Buffalo fruit buyers in large quantities at profitable prices. It resembles Felleberg more than it does German Prune. York State Prune is a vigorous grower, and is healthy and hardy here at Rochester. There is no more profitable prune for orchard purposes than York State and none more desirable for a home garden, as it is equally valuable for eating fresh out of hand or for canning and preserving. It is also valuable for evaporating, making a product equal to that of the California prunes. It is firm in flesh and endures shipment well, being usually picked before it softens, as all plums should be harvested. If you have grown the German Prune and have noticed the fine quality of that variety, you will be greatly pleased when you see the York State Prune, a prune twice as large as German Prune, possessing the same excellencies and bearing at an earlier age. Four and five bushels of these prunes from a large tree is not an unusual crop. York State resembles Felleberg (known also as French Prune or Italian Prune) but is distinct from that valuable variety.

Price of York State Prune: First-class trees, 5 feet high, 35c. each, \$3.00 per 12, \$20.00 per 100. Extra size, 6 feet high, 50c. each, \$5.00 per 12, \$27.50 per 100.

ADDITIONAL VARIETIES OF PLUMS.

Reine Claude (Bavay's Green Gage).—Roundish, oval, greenish marked with red in the sun; a great favorite.

Lombard Plum.—Season, August. The Lombard is a great favorite for the following reasons: *The tree adapts itself to any locality; it is extremely hardy, producing good crops where many varieties will not grow.*

Beauty of Naples.—This plum is a good medium size, of purple color, with slight bloom covered with yellow dots.

Shipper's Pride.—Large, round, purple, excellent.

Niagara Plum.—Originated in Western New York. It is a very early plum and particularly valuable for this reason. It is a red plum, *large size*, attractive, and possesses good shipping qualifications. It bears *enormous crops* of fruit with great regularity.

Apple Plum.—A superb deep reddish purple plum, in shape and size like a medium-sized apple; flesh red, firm, delightful, keeping and shipping remarkably well. Strong-growing, with large foliage. Ripens after Burbank.

Price of additional varieties of Plums named above: First-class trees, 5 feet high, 35c. each, \$3 00 per 12, \$20.00 per 100. Extra size, 6 feet high, 50c. each, \$5.00 per 12, \$27.50 per 100.

NUTS.

American Sweet Chestnut.—Succeeds best on gravelly soils, on ridges, or on rocky hills or mountainous places. Price of trees, 3 to 4 feet, 50c. each.

Hazelnut.—This is of the easiest culture and among the most profitable and satisfactory nuts to grow. Price of bushes, 2 feet, 25c. each.

English or Persian Walnut.—One of the largest, most delicious and desirable nuts. Price of trees, 2 to 3 feet, 35c. each.

Japan Walnut.—This variety is coming much into favor on account of hardiness and productiveness. The leaves are of immense size, and the nuts, which grow in clusters of fifteen or twenty, have a shell thicker than the English Walnut, but not so thick as the black walnut. Price of trees, 3 to 4 feet, 35c. each.

QUINCES.

Bourgeat Quince.—This is the most remarkable of all quinces. There is no other variety which grows so vigorously, and there is no other variety of quince which will keep so long in perfect condition. Price of trees, 3 to 4 feet, 50c. each.

The Alaska Quince.—Every year we are more than pleased with this new quince. Our special claims for it are early bearing, productiveness, earliness and hardiness. Price of trees, 3 to 4 feet, 50c. each.

Orange Quince.—Every one is well acquainted with the Orange Quince, a good old favorite that never disappoints the planter—good for home use and for market, and more largely planted than any other variety. Price of trees, 3 to 4 feet, 50c. each.

CAMPERDOWN WEEPING ELM.

head is formed, making it one of the most picturesque drooping trees. The foliage is very dense, making a perfect arbor. The finest weeping elm.

Price of first class trees, \$1.00 to \$1.50 each according to size.

Osier or Basket Willow.—Farmers about Rochester, N. Y., make big money out of the Osier or Basket Willow. They plant them in rows $3\frac{1}{2}$ feet apart, planting simply the cuttings in the rows 6 to 8 inches apart. The cuttings grow almost as easily as weeds and require scarcely any attention except the first year or two only to cut the willows and carry them to market. Basket makers pay from \$18 to \$30 per ton. They are planted on low land that is too wet to produce corn or other grain. These willows often grow to the height of 6 to 8 feet under favorable circumstances. We offer Osier Willow cuttings 8 inches long, by mail, at 40 cents per 100, or by express at \$1.50 per 1000.

No charges for packing on orders received at prices quoted in this catalogue.

Camperdown Weeping

Elm.—The cut herewith is a fine illustration of this remarkable ornamental tree.

With age it often makes a tent-like playground for children beneath its umbrella-like branches. A tent could not better keep out the sun from this playground than could the Camperdown Elm. This is a rare tree, not often found on account of its expense, but it is highly prized by all who are lucky enough to possess it. Its vigorous, irregular branches, which have a uniform weeping habit, overlap so regularly that a compact, roof-like

A BARGAIN LOT OF FLOWERING SHRUBS.

We Offer 267 Flowering Shrubs for \$3.24,
Regular Price is \$5.50.

Our patrons sometimes ask our C. A. Green to select the most desirable shrubs since they do not know which are the best. C. A. Green has selected the list given below which he feels confident will give good satisfaction: 2 Old Homestead Lilacs, 2 New Lilacs, 4 Deutzias, 4 Spiraeas, 2 Hydrangeas, 4 Weigelas, 2 Cranberries, 2 Ribbon Grass, 2 California Privet, 1 Ostrich Plume Plant. Note reduced price.

27 Shrubs for \$3.24, regular price \$5.50.

Grape Culture.—Even one grape vine will make a place look home-like, ten to twenty vines will give a good home supply of grapes. Plant grape vines near the house. Make a trellis, or allow the vines to grow on the porch; it will afford a pleasant shade and produce an abundance of delicious fruit. Those in good health enjoy it and should eat a few clusters every day. The sick crave the fruit of the grape vine, and it is prescribed for them when other fruit must not be thought of. On occasions persons have come a long distance to our nurseries to purchase grapes for the sick relative or friend. No home is complete without at least 12 grape vines. How well I remember the ancient vines that twined their tendrils about the home of my childhood. No ornamental vine is more attractive. It is worth its cost for ornament alone. Grape vines will bear fruit the third year from planting, and will continue to bear for a hundred or more years; hence, a grape vine which may cost ten or twenty cents must be a good investment, planted where it can run over the piazza, over the side of the barn or shed, over the garden fence, or to cover some objectionable object, such as a stump, out-house or pile of stones. When established it will succeed without any cultivation, in good soil, but should be pruned annually. No home is complete without grape vines. How pleasant to clip off a cluster of fresh bloom-dusted grapes as you walk at the morning or evening hour. Grapes are now grown by the hundred acres in many parts of this country. While large vineyardists sell their crops at moderate prices, the fruit grower who has an acre or less may sell them to his regular patrons at prices very much higher. This is the case at our Rochester fruit farm. Such as we have bring more than double the price secured by large growers, and are a very profitable crop.

PORTION OF A NIAGARA GRAPE VINE IN FRUITING.

Niagara White Grape.—Popular everywhere. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections. Is largely planted by vineyardists.

Price of strong 2 year old vines, 8c. each, 75c. per 12, \$3.75 per 100, \$29.00 per 1000. 1 year vines, 5c. each, 50c. per 12, \$2.75 per 100, \$19.75 per 1000.

THE CHAS. A. GREEN NEW WHITE GRAPE.

After fruiting this new white grape for several seasons at my Rochester place I am satisfied that it is a valuable variety, a vigorous grower, and an enormous yielder of very large and beautiful clusters of excellent fruit. This variety was sent to me by F. W. Loudon, Janesville, Wis., the originator of Loudon red raspberry, Jessie strawberry, Janesville grape and other valuable fruits. He named it the C. A. Green grape, wishing to honor me for having done him a service in introducing Loudon raspberry and the Jessie strawberry. We have hitherto had trouble in supplying patrons with 2-year old vines of this variety, but now we have a good stock of very strong vines. Notice that we have reduced the price so that all can afford to plant it.

What U. S. Pomologist G. B. Brackett says: "The Chas. A. Green grape came in good condition, and I have had a description made of it. I am greatly surprised to find it so good a fruit. I really believe the quality is superior to that of Niagara, since it has such a very delicate flavor. If the vine is hardy I think it worthy of trial and dissemination."
Signed, G. B. BRACKETT, Pomologist."

This grape has been tested by the late Samuel Miller of Bluffton, Mo., a veteran grape grower, who wrote me that he was delighted with this variety, which he considered exceedingly promising.

E. B. Lewis, the veteran grape expert of Lockport, writes us as follows: "The C. A. Green grape has borne fruit on my vines this season. It shows no mildew. It is hardy and a great grower and a great producer. Big clusters, big berries. I am delighted with it. You have a good thing."

Price of strong 2-year-old vines, 15 cents each, by mail or by express, 50 for \$5.00, 100 for \$9.00.

**HELP! HELP!!
GRAPE VINES
AT A BARGAIN.**

One-third off Regular Price. Must be Sold.—We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—all 2 year old first-class grape vines for 98 cents, regular price being \$1.35. We have car loads of grape vines of the finest quality and best varieties that are dug and must be sold. Write for prices in lots of 50, 100, 1000, or by the car load.

CONCORD—MONARCH OF HARDY GRAPES.

Concord Grape.—This hardy black grape is decidedly the most popular grape in America, and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet pulp, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety.

Price of Concord vines, 2 year, 8c. each, 75c. per 12, \$3.50 per 100, \$22.00 per 1000; 1 year, 5c. each, 50c. per 12, \$2.50 per 100, \$17.00 per 1000.

Worden Grape.—If you fail to plant Worden grape you will make a mistake. When it was first introduced it was claimed to be the same as Concord, since it resembles Concord in many respects. It is, however, much earlier than Concord in ripening and larger in size of berry. Its earliness of ripening is a strong point over Concord. It will not ship, however,

so well as Concord, being tender in skin, but for home use I know of no grape of greater value. Everyone plants it. It is an enormous cropper and its vines are vigorous enough to ripen such crops, but the more fruit a vine carries the later will it ripen its fruit. Worden is ripe and gone before Concord comes in. It is an early black grape, very large in cluster and berry, of good quality, selling well everywhere. In brief, Worden is an improved Concord, being larger in both bunch and berry, handsomer, nearly two weeks earlier, and of better quality. Surely this is enough to please all. If only one grape vine can be planted, plant the Worden.

Price—Strong vines, 2 year, 8c. each, 75c. per 12, \$25.00 per 1000; 1 year, 5c. each, 50c. per 12, \$2.75 per 100, \$19.00 per 1000.

WORDEN GRAPE.

GRAPE VINES AT A BARGAIN.

One-third off regular price. Must be sold.—We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white; all 2-year-old, first-class grape vines for 98 cents, regular price being \$1.35. We have car loads of grape vines of the finest quality and best varieties that are dug, and must be sold.

Diamond White Grape.—This is our choice in white grapes. It is an excellent variety for those having only a small garden or those desiring to plant for market. In growth of vine it is marvelous and seems adapted to all localities where grapes are grown. It is a diamond among grapes. Extremely hardy; vine a vigorous grower; foliage large and healthy. Very prolific in bearing; cluster large and handsome, often shouldered. Color greenish white, turning to an attractive golden tinge at maturity. Berries large, skin thin, but tough; berries hanging well to the peduncle even when very ripe; flesh melting and very juicy, sweet to the center, and the foxiness, peculiar to all our native varieties is in the Diamond almost entirely eliminated. Persons of delicate taste, who will not eat such as Niagara, enjoy the Diamond. It keeps well. It comes nearer to the quality we demand in a first-class exotic grape than any other native variety with which we are acquainted. The Diamond surpasses the Niagara in quality. Vines planted three years on both high and low lands at our nursery gave wonderful yields the past season. Growers who came to see our grapes in bearing were particularly struck with the Diamond.

Price of Diamond Vines—2 years, 10c. each, \$1.00 per 12, \$6.00 per 100, \$47.50 per 1000.

We have 60,000 2 year Grape Vines that must be dug and sold this spring. Watch for special prices if you think of planting largely.

Grape Vines by Mail.—Strong vines by mail of all varieties offered at prices quoted for each vine. If dozen vines wanted add 10c. to dozen prices.

GRAPE VINES AT A BARGAIN.

One Third off Regular Price.

We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—all 2-year-old first-class grape vines for 98 cents, regular price being \$1.35. We have car loads of grape vines of the finest quality and best varieties that are dug and must be sold. Write for prices in lots of 50, 100, 1000 or by the car load. We also have a surplus of apple trees, poplar trees, and currant bushes. Let us price your list if you want to plant many.

Don't Overlook the leading tree for shade and street planting—the Poplar. We offer all sizes at bargain prices.

Campbell's Early Grape is a new variety of the Concord type, of great promise. It is one of the strongest growers, and one of the most hardy varieties. It ripens with Moore's Early, ahead of Worden; quality is good and it is a long keeper. Its long keeping and good shipping qualities are really marvelous and unequaled by any other variety, old or new; and I still believe that it is and will be the most profitable grape to grow. All I know and can influence I shall advise to plant and grow as many Campbell's Early as they possibly can. It is the best of all American grapes, the grape of the future.

Price of Campbell's Early—Strong vines, 15c. each, \$1.00 per 12, \$10.00 per 100.

Brighton.—A vigorous grower, healthy, hardy and productive; one of the best early red grapes.

Price of Brighton—2 years, 15c. each, \$1.50 per 12.

Moore's Early.—Clusters of medium size; berries large, round, black, with heavy blue bloom. Desirable for market on account of its earliness, well suited to Canada and northern portions of the United States.

Price of Moore's Early—2 years, 10c. each, \$1.00 per 12, \$7.00 per 100.

Green Mountain (Winchell or Clough).—A very early white grape of great promise. I saw it first at the Boston meeting of the Boston Pomological Society and was attracted by its beauty and fine quality. At the World's Fair there was a surprising display of this grape which attracted every grape grower.

Price of Green Mountain—2 years, 25c. each, \$2.50 per 12.

SEE special offer of Poplars—the most satisfactory shade and roadside tree, which we offer at bargain prices.

THE REGAL LONG KEEPING RED GRAPE.

If you want the longest keeping grape, one that you can eat during fall and winter months, plant the Regal. Read what C. E. Barnes, of Talmadge, Ohio, the grape expert, says of Regal, as follows: "Regal is a short jointed, vigorous and healthy grower, ripening its wood early. It is hardy in both bud and cane, enduring 30 degrees below zero. Regal is exceedingly productive, ripening a heavy load of fruit well without injury to vines. Clusters of Regal are of a desirable size, medium to large, cylindrical, very compact and handsome. Berries of Regal are large, persistent, translucent, dark bright red with a skin thin but tough. The pulp is tender, parting easily from its seed. The quality of Regal is the best. Regal ripens with Concord. Its quality is equal to Catawba or Ulster. Regal grape keeps well owing to its tough skin and persistent nature, keeping in fine condition late in the season. I believe it will be a good shipper." C. A. Green says it is splendid for home or market. Good in every way and a long keeper.

We are offering one of the best grapes known in the Regal. A vine planted in 1901 bore 18 clusters in 1902, and in 1903, 110 clusters. Its great vigor, its productiveness, hardiness and its long keeping qualifications make it of great value. It has been tested at the Geneva, N. Y., experiment station, and has been favorably mentioned by that station. Matthew Crawford, the veteran Ohio fruit grower, has tested it upon his place for many years and speaks of it in the highest terms. Storrs, Harrison & Co. write us that they are greatly pleased with Regal grape. R. A. Hunt, of Euclid, Ohio, pronounces Regal a long keeper that should sell at good prices. "Sweet and vinious, evidently a good shipper and keeper," says Col. G. B. Bracket, U. S. Pomologist. I am delighted with it.—C. A. Green.

Price of 1 year vines of Regal grape, 50c. each. We have but few 2 year old vines to offer and the price of these is \$1.50 each.

THE CUTHBERT RED RASPBERRY. LARGE, PRODUCTIVE, ATTRACTIVE.

This is a valuable variety well tested throughout the country. It has given good results both for home use and market. When it was introduced the demand for plants was far beyond the capacity of any one to supply, and it marked a new era in raspberry growing. Previous to the Cuthbert, red raspberries were a novelty in the market and sold at from fifteen to twenty-five cents per quart. Cuthbert was largely planted, and it succeeded so well as to bring about a lower price for the fruit, which for a time discouraged planters. But the last year or two there has been a great scarcity of red raspberries, and the price has again advanced so that this year the price opened at twenty cents per quart, and did not go lower than fifteen cents per quart even at Rochester, where red raspberries are largely grown. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries. My friend planted a few rows of Cuthbert in the garden of his married daughter the past spring. This demanded the work of half an hour, and yet these few plants will yield that family an abundant supply of delightful fruit for many years. Price, 35c. per 12; \$1 per 100; \$8 per 1000.

Loudon Red Raspberry.—The Loudon does not sucker nearly so much as do many other red raspberries. Sucker plants springing up about the parent plant are considered a nuisance to the grower of fine fruit, since these suckers have to be removed the same as weeds. Other red raspberries will send up ten suckers where Loudon will send up one. This makes less work for the producer of fruit, but at the same time makes plants of the Loudon raspberry less plentiful, therefore whoever buys Loudon plants

should expect to pay more for them than for those kinds which can be propagated much more rapidly. The tendency with Loudon is to begin bearing fruit immediately after planting. I can always find an abundance of berries in July on plants set out in May. This fruit should be removed before it ripens or the plants will be enfeebled. Then, after the main crop of fruit has been produced on the Loudon plants, new canes begin to bear fruit, producing a second crop in August and September. These peculiarities show the tendency of the Loudon to great productiveness. It produces fruit in large amounts and is unsurpassed in this respect. Loudon raspberry made a great showing at the Pan American Exposition at Buffalo last summer. Prof. Van Deman, who had charge of the fruit exhibit there, has pronounced Loudon the best of all red varieties. Considering its hardiness, productiveness, large size, quality and bright color, it will be difficult to secure a better variety than Loudon.

Price of Loudon red raspberry plants, first-class plants, 60c. per 12; \$3.00 per 100.

The KANSAS

Kansas Black Raspberry.—Is of the largest size, vigorous, healthy and productive. It is a leading favorite at Green's fruit farm. When I was a boy I delighted to gather the wild black raspberries, but in those days I never met with anything like the Kansas. Fruit is large and excellent in quality. We have fruited it several seasons and find it an excellent variety.—C. A. GREEN.

Read what a leading firm says: "Kansas is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, ripening just after Palmer. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market."

Price of Kansas, 35c. per 12, \$1.50 per 100, \$14.00 per 1000.

Nemaha.—The best late variety. The Nemaha is an excellent, large, black, good quality, late variety. The very fact that it is considered to be better than the Gregg is enough to cause it to be planted by every grower of black raspberries desiring a late variety. In Wisconsin large fields of the Nemaha are seen. It originated in that state, and therefore it is no wonder that it is hardy. One grower in Wisconsin who has ten acres of this famous raspberry, says: "Nemaha yields nearly 150 bushels to the acre." We saw its value some years ago and introduced it. Nemaha excels in hardness of bush and in quality of fruit.

Price of Nemaha, 50c. per doz., \$2.00 per 100, \$15.00 per 1000.

Gregg (Black) is the favorite for general planting when a late variety is needed. It produces a heavy crop of large sized berries. This variety is perhaps more generally known and planted than any other. The fruit sells well for home canning or for drying purposes.

Price of Gregg, 35c. per 12, \$1.50 per 100, \$14.00 per 1000.

Shaffer's Colossal is an immense raspberry, both in cane and fruit. Canes are of wonderful vigor and size, hardy and enormously productive; berries are very large and of a purplish color.

Price of Shaffer, 50c. per 12, \$1.50 per 100, \$13.00 per 1000.

Surplus of Grape Vines at Low Prices.—

These grape vines are dug and must be sold to the highest bidder. They are the best we ever grew. We have never had so many grape vines to offer in all our nursery experience of 25 years. These vines are better rooted and of stronger growth than any we have ever offered for sale. They are the choicest varieties: Concord, Worden, Niagara, C. A. Green New White Grape, Campbell's Early and Diamond. These are the varieties in demand all over the country for home supply and for commercial vineyards. Grape growing is profitable. Owners of vineyards have been making large money, but grapes are far more profitable to the

owners of homes or farms. Every family should have a large supply of this healthful fruit during the season of three or four months each year. Grapes are of medicinal value. There are grape cures or sanitariums where the sick are fed on grapes to cure them of diseases. Every one likes to eat grapes, they are nourishing food; they tone up the system and keep it in health and vigor. Let us know how many grape vines you need and ask for our special pen prices.

Special low prices in lots of 50, 100, 1000, or by the car load.

We also have a surplus of Currant Bushes, Apple and Poplar Trees.

CONRATH—EARLIEST AND BEST BLACK RASPBERRY.

Conrath, Early Black-Cap Raspberry has distinguished itself at Green's farms for many seasons. It is our leader for market or home use. In Conrath we have united vigor, hardiness, large size and productiveness: qualities that will give it a foremost rank. It resembles Gregg in many ways, being probably a seedling of that variety, and the fruit retains its large size to the last picking. The canes are of iron-clad hardiness, very prolific, and make a good healthy growth. It is one of the best of the very early black-caps, equaling the largest in all points, with the Gregg type of berry, being large, firm, sweet and good; free from the woolly appearance of Gregg. The fruit leaves the stem easily, and may be gathered without crushing or breaking. Wherever it has been grown it has given great satisfaction, and we can recommend it as exceedingly valuable. Our attention has been repeatedly called to the success of this black raspberry. We have sent out inquiries to various parts of the country to learn how it has succeeded, and the reports without exception have all been favorable. Price of Conrath, 35c. per 12, \$1.50 per 100, \$14.00 per 1000.

Columbian Raspberry is a new variety, much resembling Shaffer in growth of bush and fruit. A strong grower, unexcelled for productiveness and desirable for canning. At Green's Fruit Farm nine rows, 150 feet long, yielded 66 bushels. Color of the berry purple, like the Shaffer.

Price of Columbian, 50c. per 12, \$1.75 per 100, \$15.00 per 1000.

No charge for packing on orders received at prices quoted in this catalogue.

Eureka, the Earliest Black Raspberry.—

This is one of the newer varieties for which great claims were made from a number of experiment stations where it had been tested. It had strong, stocky, free-branching canes, and is hardy and healthy; it is as early as Palmer, as large as Gregg, and as productive as both combined; better quality than either, holds its size to end of season, and is a good keeper. Price of Eureka, 35c. per doz., \$1.75 per 100.

RATHBUN

Rathbun Blackberry.—On account of its superior character those accustomed to the old varieties would scarcely recognize it for a blackberry. The plant is very vigorous, branching naturally, producing fruiting canes very freely, and an abundance of large, luscious fruit. It “suckers” but slightly, the roots are strong and branching, penetrating deeply into the soil, a valuable characteristic in dry seasons and locations. The fruit is large and handsome, intense black, with a very high polish, and without any hard core, juicy, highly flavored; of so superior quality that it is in a class by itself. For table use, for canning, or for culinary purposes it is equally desirable.

Price of Rathbun, 12 for 50c., 100 for \$3.75, \$25.00 per 1000.

Snyder Blackberry.—This popular, hardy and profitable blackberry is known everywhere and planted largely. Where other varieties have entirely failed it proved itself entirely hardy.

SNYDER.

It is also grown in localities where hardiness is not the prime and first consideration because of its productiveness and general adaptability to all locations. It is the blackberry for every fruit grower desiring to make a start in blackberries, but has not the means to buy the high-priced varieties. Keep the soil rich with barnyard manure and wood ashes and no one will

complain of the size of the Snyder. We have grown it for twenty years and shall continue to plant it, as it usually gives a good picking where many other varieties have failed. This is the standard early sort for the North and Northwest, and is very popular. This was the first of the hardy kinds that made a sensation over the country. With good culture they are large enough to gratify all. Like old dog Tray, it is ever faithful. The severest frost does not bite it. Season early; oblong oval in form; quality good.

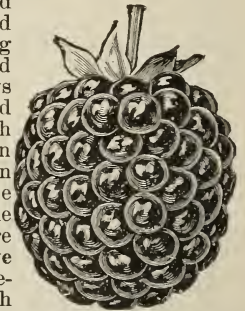

Price of Snyder, 50c. per doz., \$1.50 per 100, \$14.00 per 1000.

Minnewaska.—This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness. The originator told our Charles A. Green that on his three-quarter acre patch he picked forty bushels every day for eight weeks. We went several hundred miles to see it, and found the bearing bushes tall and bushy and throws wide, and loaded with fruit in such a manner that even our imagination could not have done justice. Some of our friends were surprised when we published the report above—such an immense yield.

Price of Minnewaska, 50c. per 12, \$2.50 per 100, \$18.50 per 1000.

Eldorado.—At Green’s fruit farm this variety has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days.

Price of Eldorado, 65c. per 12, \$3.00 per 100.

Downing Gooseberry. — The largest and best of all native American varieties; see illustration above.

The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. This variety is recommended as proof against mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Downing is enormously productive. Since plants of Downing can be produced in America and plants of foreign varieties cannot, Downing plants can be sold at a lower price, which is another inducement for planting. In order to make the Downing gooseberry known to our patrons we mark herein perhaps the lowest price ever made for such strong, vigorous plants. An acre of Downing can be made to yield \$500. It is unsurpassed for canning. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. They can be shipped from Maine to California like marbles.—C. A. GREEN.

Price of Downing: 2-year-old bushes, first-class, 60c. per 12, \$5.00 per 100, \$50.00 per 1000.

Chautauqua Gooseberry.—A large yellow variety of American origin. It is without doubt the best variety of gooseberry every originated in this country. The bush is a vigorous, stout, stiff, upright grower. Its leaves are large, glossy, and dark green; its fruit is of a beautiful light yellow color, perfectly free of spines and hair, veined and translucent, averaging in size 1 to 1½ inches in diameter, although we have often grown them 1½ inches long. Our Chas. A. Green saw fruit of this variety first at the World's Fair. It made a wonderful show, surpassing all others. The bushes were a marvel of productiveness, and all the fruit large, and a beautiful yellow color. It has fruited on our own grounds at Clifton, N. Y., several years, producing an extra heavy yield the past season, surprising everyone there, for after being used to the other American varieties it was not expected that Chautauqua would so much eclipse them. It will not be long ere the fruit of the gooseberry will be general in the market. It is a delicious fruit and a fruit that everyone is fond of, a fruit that everyone could have if they had a garden or field. Last season we had several rows fruiting on our grounds in Rochester—and such fruit. So large that passers-by were attracted as they passed by in the distance.

Price of Chautauqua Gooseberry: Strong, 2-year bushes, 15c. each, \$1.50 per 12, \$10.00 per 100.

Industry Gooseberry.—An English variety which is being largely planted in this country. The Industry is marvelously productive and bears second, if not the first, year planted. It is very popular in England. The fruit is of large size; color dark red. It is delicious for dessert; some prefer Industry to apricots or peaches. At Green's farm it bears heavily every year. We eat all we can and sell many bushels.

Price of Industry Gooseberry: 2-year, strong bushes, 15c. each, \$1.75 per 12, \$12.00 per 100.

Columbus Gooseberry.—Fruit very large, green, inclined to straw color, of excellent flavor, carries well to market. Bloom is well protected by early foliage, making it one of the surest croppers. We have fruited this variety several seasons, and on account of its productiveness, believe that every one of our patrons should have one or more bushes.

Price of Columbus: 2-year, 15c. each, \$1.50 per 12.

Red Jacket.—An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper, with bright, clean, healthy foliage.

Price of Red Jacket: 2 year, 15c. each, \$1.75 per 12, \$12.00 per 100.

**BEST
CURRANT**

**NEW
RED CROSS
CURRANTS.**

Red Cross Currant is sweet. It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant ever produced in the way of red currants. I know of no more appetizing or healthful dish than a dish of Red Cross currants at the table to be eaten the same as strawberries, raspberries or other sweet fruit. In calling attention to the characteristics of Red Cross, this qualification of sweetness and palatableness has not been properly emphasized. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to the natural sweetness and fine flavor of Red Cross.

Prof. Maynard, of Amherst College, (Hatch Experiment Station, Mass.,) says Red Cross currant, as seen at Rochester, averages larger than Fay's Prolific, and is more vigorous. Jacob Moore, the originator, to whom we paid \$1250.00, saw it in fruit here and says it is twice as large as Victoria, will yield twice as much as Cherry, and is of better quality than any of the older varieties.

P. C. Reynolds, the veteran horticulturist of Rochester, N. Y., says

that the Red Cross currant averages larger than Fay's or Cherry, and is sweeter than most other varieties. He says that the clusters are longer and that the size of the berry holds out larger to the end of cluster than Fay. C. M. Hooker, the largest small fruit grower in Monroe County, N. Y., says that Red Cross currant as seen at our Rochester place, is larger than Fay's with longer fruit stems. He says the growth is remarkably vigorous, and the plants healthy and free from fungus. He says, "Book my order for 100 plants." Price of Red Cross, 35c. per 12; \$1.75 per 50; \$3.00 per 100; \$25.00 per 1000, for two-year-old bushes, strong. 25c. per 12; \$1.25 per 50; \$2.00 per 100; \$18.00 per 1000, for one-year-old bushes.

Price, 3-year-old bushes, extra fine, bearing age, 35c. per 12, \$3.00 per 100, \$25.00 per 1000.

CURRENT CULTURE.

Currants are perfectly hardy and may be planted in fall or spring. They succeed best on cool, moist soils, well tilled and well enriched. In warm climates a northern exposure suits them best. Plant the bushes about 4 feet apart and cultivate well, or mulch heavily, sprinkling ashes around the roots occasionally to keep out borers. If the Currant worm appears, dust with hellebore. Prune out the old wood that has ceased bearing.

Fay's Prolific Currant.—A seedling of Cherry that originated in 1868, with Lincoln Fay.

FAY'S CURRANT.

It was introduced about twelve years ago, and is now generally known. Its clusters are long and attractive, filled with large fruit, making it desirable for market. It is liked at canning factories for making jelly or jam, on account of its large size, thin skin, and rich, juicy pulp.

Bush vigorous, but not as strong as Red Cross. Its canes are somewhat spreading and not always strong enough to remain upright when

weighted with fruit. The clusters vary from two and a half to four inches long. The berries vary from medium to very large, averaging large. They are quite uniform in size.

Price of Fay's: 50c. per 12, \$3.00 per 100. \$25.00 per 1000 for two-year-old plants.

Champion Black Currant.—This is comparatively new, of English origin, but in great demand now by all lovers of the fruit. The quality is excellent, bunches are very large, the flavor of the fruit is particularly delicious. No garden should be without a few plants of black currants.

Price of Champion: 2 years, 50c. per 12, \$3.00 per 100, \$25.00 per 1000.

White Grape Currant.—The largest and best white. Garden not complete without it. Bush moderately vigorous, slender, branches somewhat spreading, productive. Bunches three to four inches long. Berries quite uniformly large, but vary from medium to very large.

Price for White Grape Currants: 2 years, 50c. per doz, \$4.00 per 100.

Cherry Currant.—This popular market variety is one of the largest red currants and is valuable for the garden. The Geneva Experiment Station says of Cherry: "Bush vigorous, stocky and compact in nursery. The young plants are upright, but with age they tend to become more spreading."

Price for two-year old Cherry Currants: 50c. per 12, \$3.00 per 100.

Red Victoria.—The latest in ripening. Very productive; bunches long; of excellent quality.

Price of Red Victoria: 2 years old, 50c. per 12, \$3.00 per 100.

Wilder.—A new Red Currant, with large fine-flavored fruit of a bright, attractive red color, even when overripe. In some trials it has outyielded the Fay Currant; is as large, with longer bunch, less acid, ripens at the same time and hangs longer. Few varieties equal it in the two essential qualities of productiveness and long-keeping.

Price of Red Wilder: 2 years old, 75c. per 12, \$5.00 per 100.

If you desire currants by mail add 10c. per doz. to doz. prices. See mailing plant pages.

GREEN'S PINEAPPLE FLAVORED STRAWBERRY.

If you want the best flavored strawberry, one of the greatest yielders of large and beautiful fruit; if you want one of the most vigorous growers. If you want a variety that will please your patrons and from which you can make lots of money, plant Green's Pineapple Flavored Strawberry. The past year has been a poor one for making strawberry plants. The nights were cold and not favorable for strawberry growth. This variety came out ahead of the others for making plants the past season, hence the great reduction in price which we have made for plants. Last year the price was \$25 per 1000, now we offer them at \$5 per 1000. But you will have to speak quick if you want these plants since they will go like hot cakes. No acceptable name has been sent us for this strawberry therefore it is a nameless strawberry. It was introduced by Green's Nursery Co. We have watched it for the past ten years, therefore with us it is not a new variety, but one that has been thoroughly tested. We are confident you will be surprised and pleased with this variety when you see it fruiting upon your place. So says C. A. Green.

Its History.—A strawberry grower at Mt. Morris, N. Y., discovered a valuable new strawberry. After testing this variety, he destroyed all other varieties, and planted nothing but this new one. He has secured each year an immense crop of large and handsome berries, which sold in the local market at prices far above those of ordinary strawberries. Not only is this new variety very vigorous and productive, and the fruit large, but the quality is superior, having a rich pineapple flavor. Mr. C. A. Green made a visit to Mt. Morris. He was delighted with what he saw.

Wm. Sage says: "A friend of mine at Mt. Morris, N. Y., sent me plants of the new strawberry, which I planted in my garden at Rochester, N. Y. This bed of plants bore the largest and most beautiful strawberries I have ever seen, and not only this, but the quality of the fruit was most remarkable, being superior to that of other varieties. I can recommend this variety with great confidence to all who are interested in fine strawberries."

Price of Green's Pineapple Flavored, 25c. per 12, 75c. per 100, 500 for \$3.00,
1000 for \$5.00.

SENATOR DUNLAP STRAWBERRY MARKS A NEW ERA IN BERRY CULTURE.

Senator Dunlap.—At Green's Fruit Farm it has no superior as an early variety. It is an all round, rough and ready producer, sturdy plant and heavy cropper of best quality berries. I have compared it with eighty-two other varieties and do not hesitate to say that it has greater merit than any other berry. With clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular, with slight neck. In color they are glossy crimson, with the meat firm and solid, deep crimson throughout, and good in quality. It is a wonderfully productive strawberry. Altogether Senator Dunlap is the most attractive strawberry I know of. Price of Senator Dunlap, 25c. per 12, 75c. per 100, \$5.00 per 1000.

Corsican, biggest berry on earth.—This is C. A. Green's favorite strawberry. We have sent it out by the hundred thousands to every postoffice from the Atlantic to the Pacific oceans. It is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation. Price of Corsican Plants, 25c. per 12, \$1.00 per 100, \$6.00 per 1000.

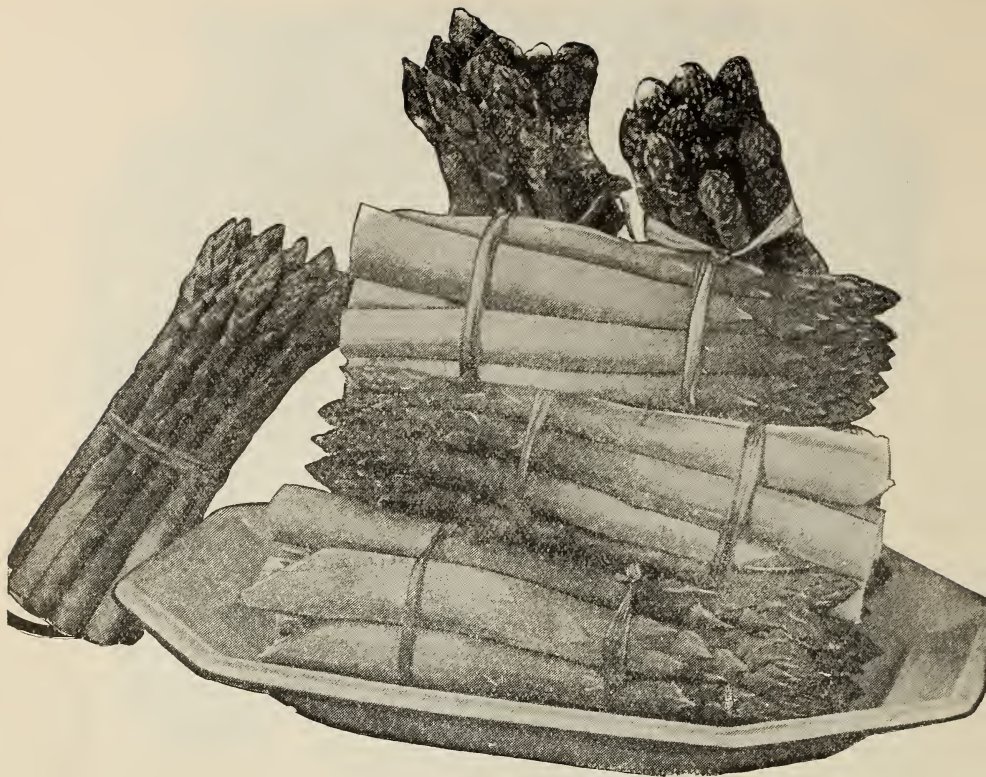

Brandywine.—A very late and firm berry; a good shipper, good canner; a good all round strawberry. This strawberry is being largely planted, and much liked. In plant it is a luxuriant grower, healthy and early and very productive; blossom perfect; fruit large, of good form, bright red all over, and good quality. Season medium to very late. It succeeds on any soil. Price of Brandywine, 25c. per 12, \$1.00 per 100, \$6.00 per 1000.

Glen Mary.—One of the best varieties at our fruit farm.—C. A. GREEN. Recommended for the home garden and near market. It is fairly firm and will bear shipment comparatively well. When Crescent will bring 5c. and Bubach 10c. per quart, Glen Mary ought to bring 20c. per quart if size and quality cut any figure in the price, and it is my opinion that for size, productiveness and quality the Glen Mary has no superior.

Price of Glen Mary, 25c. per 12, 75c. per 100, \$6.00 per 1000.

How Many Varieties.—There are thousands of varieties of strawberries. We do not deem it best to describe a large number, preferring to call attention to a few that seem to possess the most merit.

Note.—Do not order strawberry plants sent by freight. Oftentimes our friends order from 50 to 500 trees, and 500 or more strawberry plants by freight. The trees should go by freight and the strawberries by express, or small lots by mail. In all cases when desired by mail, add postage at rate of 20c. per 100. Always state plainly that the strawberry plants are to be sent by express or mail.

ASPARAGUS READY FOR COOK AND MARKET.

Cut used by permission of Bradley Fertilizer Co.

Conover's Colossal Asparagus.—There is probably no vegetable that is so absolutely superb to the delicate appetite of the epicure as the first delicious cuttings of this early asparagus, and no vegetable more beneficial as an appetizer to persons of sedentary habits, and it is difficult to account for its cultivation being so much neglected by the community at large. In country gardens it is more rarely to be found than any other vegetable, although so healthful and nutritious; yet everyone who knows anything about gardening, having a plot of ground, should have an asparagus bed. This good old variety is known everywhere; is of large size, rapid in growth and of good quality. Grown on black muck land on our grounds at Clifton, it is mammoth in size and continues to give good cuttings for a long season.

Price of Conover's Colossal Asparagus—Large 2 year plants, 25c. per 12, 75c. per 100, \$4.75 per 1000.

Palmetto Asparagus.—This is a large growing variety, particularly delicious in quality. No home garden can be complete without it. Asparagus is one of the greatest garden delicacies, coming in at a season when there is no competitor. When once planted this will continue to produce abundantly for life. The plants late in the season are objects of great beauty, and are worth growing for their beauty. Palmetto Asparagus is valuable for its health-giving properties. It is also appetizing and is a rare delicacy for any table.

Price of Palmetto Asparagus—Strong two year plants, 30c. per doz., \$1.00 per 100, \$5.50 per 1000.

Asparagus Culture.—Plant in rows $3\frac{1}{2}$ feet apart, and one foot apart in the rows. Let the lower ends of roots extend down as far as they can, but do not cover the crowns deep at planting. Plant by opening a trench or furrow. Lay the plant on the side of the trench, with the top or crown 3 inches from the surface. Then cover roots and crown, but see that the crown is covered but slightly, or it will rot. As the new shoots come up you can fill up the trench and cover over the crown. The ideal conditions would be a deep sandy loam with easterly, southeasterly or south-western slope, as warm as possible and sheltered from prevailing cold winds.

Asparagus plants will be sent by mail postpaid at dozen rates and in 100 lots if 20c. is added to the 100 price.

Rhubarb or Pieplant for Family or Market

We have millions of well-rooted Rhubarb plants for sale. Our propagator had such good success it looks as though we could supply the world. We are glad that we have this big supply on hand for the reason that we believe that these Rhubarb Roots, when planted in the gardens of our friends and patrons, will prove a blessing. Rhubarb is one of the most healthful foods known. When spring opens the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the only source. Those who eat pieplant pie and sauce freely are greatly benefited. Do you realize what excellent sauce can be made of rhubarb?

Have you a bed of pieplant in your garden? If not do not fail to start a bed this spring. I prefer to plant a solid row of pieplant running. This row will not prevent plowing and cultivating the garden with a one-horse cultivator, and the row will not be in the way nearly as much as a bed devoted to pieplant. Pieplant is one of the most easily transplanted of all plants. It is sure to grow, and once planted will continue to produce an abundant supply for the family for life. The richer the ground the more luxuriant the growth, and the longer the stalks. Set 12 to 18 inches apart in the row. For ornament alone it pays to plant it.

Price of strong Pieplant roots, lower than ever before, 10c. each, \$1.00 per 12, \$5.00 per 100.

Horse Radish.—Will stand a great deal of hardship and will persist in soil year after year. Like the currant and many other hardy plants, it responds to good treatment very promptly. Plant in a deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

Price—Strong sets, 20c. per 12, 35c. per 100, \$2.00 per 1000.

Sage (Holt's Mammoth).—Price, large bushy plants, that have been grown in the nursery row, 10c. each, \$1.00 per 12, \$5.00 per 100; rooted layers, \$1.50 per 100.

Children playing hiding-go-seek behind Green's strong growing Rhubarb.

HELP!

HELP!

GRAPE VINES AT A BARGAIN.

ONE-THIRD OFF REGULAR PRICE.

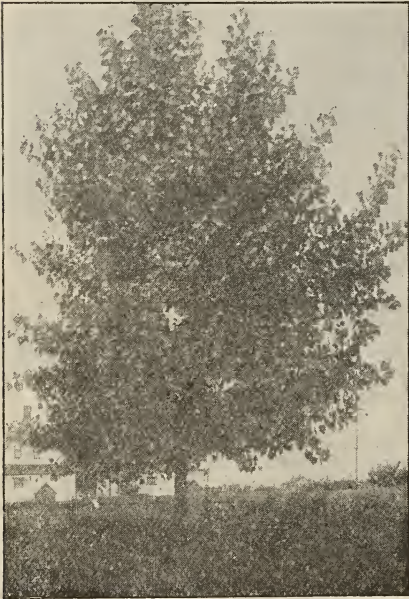

MUST BE SOLD. We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—all 2-year-old first-class grape vines for 98 cents, regular price being \$1.35. We have car loads of grape vines of the finest quality and best varieties that are dug and must be sold. Write for prices in lots of 50, 100, 1000 or by the car load. Vines are dug and must be sold regardless of price. We have also a surplus of Apple Trees, Poplar Trees and Currant Bushes. Write for prices per 12, 100, 1000 or car load.

NOTE.—Your order must be here by March 15th, 1905, if you wish to take advantage of our special offer for early orders.

THE POPLAR

A Rapid Growing Ornamental Tree.

This is a slightly tree, rapid growing, easily transplanted, making a delightful shade. This tree has been more largely planted of late than ever before. It will grow twice as fast as an ordinary tree, therefore where quick results are desired there is nothing superior to the poplar. Along the beautiful streets of Rochester in many places every other tree planted has been the poplar. Between each poplar was planted an elm or Norway maple. The poplars grow rapidly and make an immediate effect. Trees are often desired for planting in front of objectionable out-buildings, or to screen unsightly outlooks, and nothing can excel the poplar for this purpose.

CAROLINA POPLAR.

Carolina Poplar—For a quickly growing shade tree there is no tree which equals the Carolina Poplar. It is broadly pyramidal in form, very robust in growth, with large, glossy, deep green leaves. It stands the smoke and dust of the city streets better than any other shade tree. Very useful for planting as a screen to shut out unattractive buildings.

Special Bargain—Price of Carolina Poplar trees, 8 to 10 feet, 20c. each, \$2.00 per 12, \$15.00 per 100. Extra large, 10 to 12 foot trees, selected, 35c. each, \$3.50 per 12, \$25.00 per 100.

LOMBARDY POPLAR.

Lombardy Poplar—Known everywhere owing to its tall, pyramidal growth. A group of Lombardy Poplars upon a lawn produces a most spirited effect. At Rochester it is planted thickly in the form of a tall hedge, and in this way acts as a screen to shield the house from the stables or any other objectionable object.

Bargain—Price of Lombardy Poplar trees, 7 to 8 feet, 25c. each, \$2.50 per 12, \$18.00 per 100. Extra large, 8 to 10 foot trees, 35c. each, \$3.50 per 12, \$25.00 per 100.

WHO EVER HEARD

of a Poplar tree dying in transplanting?
20,000 trees to offer at low prices.

POPLAR TREES

best for Avenues, Shade and Lawns at
reduced prices.

AMERICAN ELM, MOST FAMOUS OF ALL AMERICAN TREES.

American Elm.—A natural spreading and drooping tree of our own American meadows and forests, spoken of by many as the most beautiful of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other variety. We have a large stock of these handsome and most beautiful trees to offer at bargain prices.

6 to 8 feet in height, 35c. each; 8 to 10 feet high, 50c. each.

American Linden (Basswood)—A rapid growing native tree, deep green leaves of enormous size, and clusters of fragrant flowers. Valuable for its wood and for the honey gathered from the blossoms. It is hardy, very handsome, and is destined to come into general use for street, lawn or park planting.

Price—6 to 8 feet, 75c. each.

European White Birch.—This attractive ornamental tree is suitable for decorating lawns, parks, etc. The bodies of these trees are white, like those of cut-leaved weeping birch. In planting trees on your home grounds you should order a few of these European Birch. Well branched, handsome and well-rooted trees.

Price—6 to 7 feet, 35c. each, \$3.50 per 12.

Norway Maple.—This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Price—10 to 12 feet, selected, \$1.00 each; 8 to 9 feet, 75c. each.

Silver Maple.—This is one of the best quick-growing shade trees. It is beautifully ornamental if given room to develop, and is particularly useful on wide streets and avenues. Foliage is of an attractive silvery tinge. Succeeds well on all soils.

Price—6 to 8 foot trees, 35c. each; \$3.50 per 12; 8 to 10 feet, 75c. each.

Sugar or Rock Maple.—This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long lived. If planted in sod all trees or shrubs should be kept mulched for a year or two for best results.

Price—6 to 8 feet, 50c. each, \$5.00 per 12.

ASH LEAF MAPLE.

Ash Leaf Maple.—A very desirable tree for street planting; it stands transplanting well and grows rapidly. It is much used in the West and Northwest on account of its withstanding successfully both drouth and intense cold. We have many of these at bargain prices, also the poplars.

Bargain Price of Ash Leaf Maple—6 to 8 foot trees, 25c. each, \$2.50 per 12, \$18.00 per 100.

Don't Fail to include with your order a few trees of Ash Leaf Maple. It succeeds everywhere.

DOUBLE FLOWERING THORN TREE.

Double Flowering Thorn.—These are unequalled for their fine effect on the lawn, forming a beautiful bouquet in tree form.

Thorn, Double White.—Has small, double white flowers. A highly ornamental variety, on account of both foliage and flowers. Makes a very striking contrast when planted with the double scarlet. Strong trees. Price—45c. each.

Thorn, Paul's Double Scarlet.—Flowers bright carmine red. Superior to any of its color. Strong trees. Price—45c. each.

White Flowering Horse Chestnut Trees.—There are two large horse chestnut trees located in front of Mr. Green's house. They are the largest trees of the kind we have ever seen. One of them will measure nearly two feet through the trunk. A portion of the largest tree was blown off in a hurricane, but the wound has healed over, and new branches have taken the place of those destroyed, so that the tree is as beautiful as ever, furnishing a delightful shade at the noon hour.

In early spring these trees are completely covered with beautiful flowers. We think there are but few who realize how beautiful are the flowers of the horse chestnut. When autumn comes, the large red nuts cover the ground to the delight of the children, who gather and make of them playthings. It is one of the old standbys as an ornamental tree.

Price—5 to 8 feet, 50c. each ; 4 to 5 feet, 35c. each, \$3.50 per 12.

The Cut-Leaved Weeping Birch.—This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful drooping branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree. It thrives in any soil, and is very hardy, needs no protection. As single specimens on the lawn or employed as avenue trees, they are very imposing and handsome. If one ornamental tree only, plant the Cut-Leaved Weeping Birch.

There are many who do not know what the Cut Leaved Weeping Birch is. They have often been attracted by beautiful specimens of this tree on the lawns of the well-to-do (for a few years ago \$2 to \$5 was the price of them) and have wondered what tree it was. The illustration is a fair representation of these beautiful trees.

Price—4 to 5 feet trees, \$1.00 each.

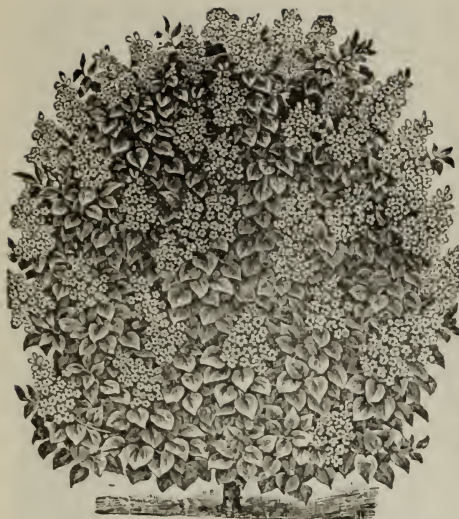

27 FLOWERING SHRUBS—C. A. GREEN'S SELECTION.

Regular Catalogue Price \$5.50. Our Special Price \$3.24.

To introduce our flowering shrubs to those who have never seen them we make this surprisingly low offer, for the following varieties: 2 Old Homestead Lilacs, 2 New Lilacs, 4 Deutzias, 4 Spiraeas, 2 Hydrangeas, 4 Weigelas, 2 Cranberries, 2 Ribbon Grass, 2 California Privet, 1 Ostrich Plume Plant.

Cut-Leaved Weeping Birch.

HARDY CATALPA.

Russian Mulberry.—The Russian Mulberry is the hardiest of all the mulberries, and we think the most valuable. We have several trees upon our Rochester place and they are loaded with fruit every year, remaining in fruit for three or four weeks. The chickens are particularly fond of this fruit, which drops daily. The Russian Mulberry is a profitable tree to grow if only for chicken feed. One large mulberry tree will furnish, perhaps, ten bushels or more of mulberries.

The tree shown in this cut is the weeping mulberry, which cannot be sold for less than \$1.50 each, since it has to be top worked and is hard to produce; but the upright growing mulberry is even more valuable for fruit, since it has a larger head and makes a larger tree, and can be sold much cheaper.

Price of Russian Mulberry Trees—4 to 5 feet, 35c. each; 3 to 4 feet, 25c. each.

Red or Blood-Leaved Plum.—This is also known as *Prunus Pissardi*. It is the most valuable of all red-leaved ornamental trees, and is planted largely in this country and Europe. A few trees of this plum give character to any place. Trees can be placed with fine effect in beds, or can be grouped in corners or borders. Any tree can be kept small by cutting back the branches every year. You should have some red-leaved ornamental tree on your place, and nothing is better or

cheaper than this red-leaved plum. This variety bears fruit, but is recommended mainly as an ornamental tree that cannot be passed unnoticed.

Price of Blood-Leaved Plum—Strong 2-year-old trees, 35c. each.

Hardy Catalpa.—One of the most showy flowering trees I saw on a recent visit to Washington was this Catalpa, low branching, covered with beautiful flowers. It is but little known, yet it is of great value, as it grows rapidly, is hardy and attractive in both foliage and flowers. It is suitable for street trees, for single specimens on lawns, or for grouping purposes. The flowers have a pleasant fragrance, and a tree in bloom attracts the sense of smell and sight. It makes a beautiful object on a lawn and should be in everyone's dooryard.

Price of Catalpa—4 to 5 foot trees, 35c. each.

Kilmarnock Weeping Willow.—This is sometimes called the umbrella tree.

It is often planted in cemeteries, but more often in private grounds, where it is an object of beauty. It is a rapid growing tree, is free from insects and disease, and does not litter a place. There are few trees more popular throughout the country than the Kilmarnock Weeping Willow. It is easily transplanted, and is hardy almost everywhere.

Price of strong, first-class trees, 75c. each.

RUSSIAN MULBERRY.

The Carolina Poplar takes the front rank among the best of poplars. It is one of the most rapid growers among shade trees, frequently growing 8 feet during one season, thus making fine avenues in a few years. Its branches spread just enough to give it a symmetrical, commanding form of elegant appearance. It is very desirable at the roadside, in parks, along rivers and streams for the protection of the banks. *It has advantages over other shade trees because it will grow on any kind of soil, swampy or muck, light or heavy.*

Price of Carolina Poplar trees—8 to 10 feet, 20c. each, \$2.00 per 12, \$15.00 per 100. Extra large, 10 to 12 foot trees, selected, 35c. each, \$3.50 per 12.

Lombardy Poplar.—This is an old favorite. Well known and remarkable for its erect, rapid growth, and tall, spiral form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

Price of Lombardy Poplar trees—5 to 6 feet, 25c. each, \$2.50 per 12, \$18.00 per 100; 7 to 8 feet, 25c. each, \$2.50 per 12, \$18.00 per 100. Extra large, 8 to 10 foot trees, 35c. each, \$3.50 per 12.

Althea (Rose of Sharon, Tree Hollyhock).

—The Althea is a flowering shrub and is represented in many colors, the prevailing colors being white and bluish-purple. The Althea has been called by some the Tree Hollyhock, since its blossoms somewhat resemble those of the Hollyhock. When in full bloom the Althea is ablaze with blossoms. We have the Altheas in different colors, pink, purple, white, and pink and white. Price of strong plants, 25c. each.

LARGE-LEAFED CAROLINA POPLAR.
Can be grown for hedge purposes.

DEUTZIA GRACILIS.

and introduced by Ellwanger & Barry and blooms a week earlier than the other varieties. The flowers are large, double white, slightly tinged on the back of the petals with rose. Price of any of above Deutzias, 25c. each.

Deutzia, Flore Pleno.—Flowers double white, tinged with rose.

Deutzia, Double.—White flowering.
Deutzia, Waterii.—Red flowering.

Prices of all above varieties of Deutzias, 25c. each, \$2.50 per 12.

Deutzia Gracilis.—The slender or graceful Deutzia is a native of Japan, from whence it was introduced by Dr. Siebold. Flowers pure white. In the open air it is the first of the Deutzias to flower, which it usually does about the middle of June. When young its growth is stiffly upright, but in time it will spread into a graceful little bush from 3 to 4 feet in height.

Deutzia Crenata.—A variety of the above having double flowers, which are white, tinged with pink, and which are produced in racemes from 4 to 5 inches long in great profusion.

Deutzia, Pride of Rochester, is a variety raised

LILACS. These are well-known, beautiful shrubs, indispensable in every collection. Special attention is called to the new double flowering varieties we are offering.

MADAME LEMOINE LILAC.

Madame Lemoine (Double White).—This fine double flowering variety is of a pure snow white color. Its flowers, which are composed of a number of corollas, are borne in enormous panicles, larger than other varieties.

Price—Strong, 3 to 4 feet, 35c. each, \$3.50 per doz.

Old Homestead Lilac.—There are no flowering plants more highly prized than this beautiful pink lilac. The Old Homestead Lilac is not claimed to be a new variety. It is a choice variety found in an old garden at at Green's Fruit Farm.

Price—25c. each for strong well rooted plant.

Lilac, Purple.—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Price—Large size plants, 25c.

Lilac, White.—A very desirable contrast to the purple; those who have one should have the other.

Price—Large size plants, 25c.

1000 NEW HARDY LILACS.

Comprising Twenty Named Varieties

In double and single blossoms. There are double and single white, double and single purple, double and single violet, pink and others of bluish tints. Order by colors, please. Strong 2-year flowering bushes.

Price—50c. each, \$5.00 per doz.

OLD HOMESTEAD PINK LILAC.

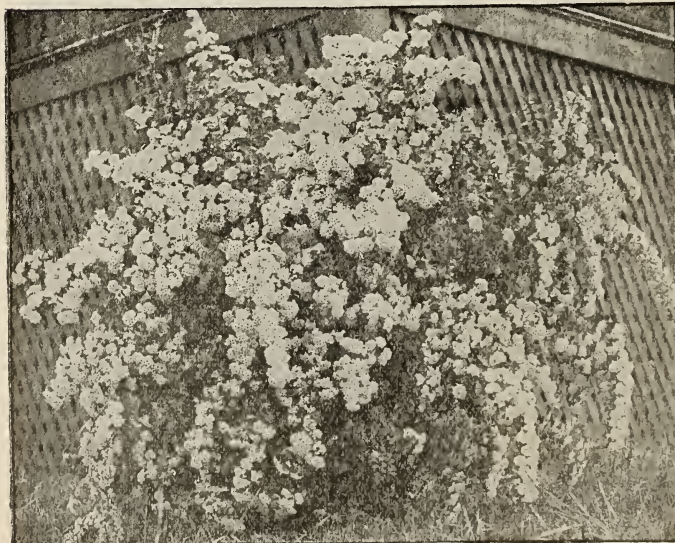

Weigelas always were and always will be a favorite with us. *Rosea* and *Candida* are exceptionally fine and should not be overlooked in making up the collection.

Weigela Rosea.—This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of a deep rosy color, and are borne in great profusion.

We also have a large assortment of Weigelas in different colors—**Pink, Red, Pink and White, and White.**

Price of strong plants, 25c. each, \$2.50 per 12.

Spiræa Billardi.—Rose color. Blooms nearly all summer.

SPIRÆA VAN HOUTTEI.

White Fringe.—A popular and much admired shrub of moderate growth and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white, fringe-like flowers, which are borne in great abundance throughout May and June, and present a most graceful appearance. Price of strong plants, 35c. each.

Purple Fringe or Smoke tree.—Is greatly admired for its curious fringe, or hair-like flowers, that covers the whole surface of the plant in mid-summer. Price of strong plants, 35c. each.

Spiræa Callosa Alba.—A white flowering variety of dwarf habit; very fine.

Spiræa Douglasi.—Has spikes of beautiful deep rose-colored flowers in July and August.

Spiræa Callosa Rosea.—Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

Spiræa Van Houttei.—This is undoubtedly the best of the spiræas. The accompanying cut is a fair one, and shows it in blossom. The blossoms are white. Do not pass it by.

Price, strong bushes of above spiræa, 25c. each.

Spiræas in assorted colors—White, Pink, Red, Double White and Rose.

Price of all varieties of Spiræas—25c. each, \$2.50 per 12.

Hardy Hydrangea.—We urge our friends to plant the Hydrangea. There is nothing that will gratify you, who love beautiful objects, more than this. We advise you to plant it for the following reasons: It is perfectly hardy, enduring the severest winters out of doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. It is thus attractive immediately after planting, gaining in beauty each year for ten or twenty years if properly pruned. It remains in blossom the longest of any flower, a single blossom remaining in beauty for nearly a month. We have plantations of these flowers that delight the beholder for a month at a time. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink hue. The Hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens. If the branches of the bush are cut down nearly to the ground, it will not injure it, and the most beautiful specimens will be produced the same season. It can be grown in tree form to a single branch. To get the best results, make the soil very rich, but it will grow anywhere and on any kind of soil. There is no plant on earth that I can recommend with greater confidence than the Hydrangea. It can be mailed safely anywhere.—C. A. GREEN.

HARDY HYDRANGEA PANICULATA GRANDIFLORA,
KING OF SHRUBS.

Price—By mail, postpaid, 25c. each; larger, by express or freight, 25c. each, \$2.50 per 12; extra large, 35c. each, \$3.50 per 12.

California Privet Hedge.—This photograph of a hedge of California Privet, with pear and apple trees and grape vines behind hedge, was taken by C. A. Green at Rochester, N. Y., and shows how beautiful is the California Privet as hedge plants. This hedge has been planted only a few years. It remains green at Rochester nearly all winter. It has a beautiful white blossom, something like a white lilac. It is not

so rank a grower as the locust or the spruce, and does not spread so wide or occupy so much ground as many other hedges. Therefore it is popular in city and village planted on the streets or between small building lots.

This cut also gives an idea of what may be accomplished in the way of growing fruit trees and vines on a small lot. The lot photographed is not larger than 45x150 feet, and yet it contains six pear, five plum, four peach, two quince and two apple trees. Near the hedge will be noticed several grape vines, which are objects of beauty, trained on a trellis. At the back end of the lot is a cultivated strip of ground, ten feet wide, the width of the lot.

Price—Strong well branched Privet plant, 8c. each, 75c. per 12, \$4.00 per 100, \$35.00 per 1000.

COMMON SNOWBALL.

Snowball (Viburnum).—A well-known favorite shrub, with globular clusters of white flowers the latter part of May. Price—25c. each.

Tree Cranberry.—This is an attractive and profitable fruit. Hardy as a rock and most desirable, combining the ornamental with the useful. Its beautiful red fruit clings to the branches in winter.

Price—Large bushes, 20c. each, \$2.00 per 12; medium, 15c. each, \$1.50 per 12.

Golden-Leafed Elder.—The best of all colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Price—Strong plants, 25c. each, \$2.50 per 12.

Forsythia Viridissima (Golden Bell).—From China. A fine, hardy shrub of spreading habit and straggling growth. It comes into bloom early, and flowers are of a bright orange-yellow.

Price—Large, 25c. each.

Purple-Leafed Barberry.—A beautiful shrub with violet purple foliage; showy, small yellow flowers, and beautiful red berries in pendulous clusters.

Price—Strong bushes, 25c. each.

Mock Orange.—Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Price—25c. each.

Japan Quince (Cydonia Japonica).—A popular and very valuable showy shrub. Blossoms early in spring.

Price—Strong, large bushes, 25c. each.

Calycanthus Floridus (Sweet-scented or Strawberry Shrub).—Price, strong plants, 25c. each.

OSTRICH PLUME ORNAMENTAL GRASS.

Ostrich Plume grows as high as four feet, and a single plant may measure across its top three or four feet. Is easily transplanted and almost sure to grow.

Price—Plants by mail or express, 10c. each, 75c. per 12.

Variiegated or Striped Grass.—This is a grass we grow on account of its being so pretty. It pleases us well for borders of flower beds, walks or a row here and there to change the monotony of the garden or field.

Price—Strong sets, 10c. each, 60c. doz. \$4.00 per 100.

Norway Spruce Hedge.—The cut herewith shows a hedge of Norway Spruce in Mt. Hope Cemetery, with cut-leaf weeping birch trees in the background. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed of great beauty at all seasons, particularly in winter when its branches are weighed down with snow.

The trees may be planted eighteen inches to two feet apart for hedges, but if planted three feet apart they will in time occupy all of the space. Norway Spruce is often used as a lawn fence between village or city lots. It can be planted most effectively in groups on the lawn, planting far enough apart to give each tree an opportunity to expand itself in its beauty. It is as often planted as single specimens, and planted in this way it has few superiors as an ornamental tree, growing to great size. There are many who do not realize the value of this grand evergreen for ornamental and practical purposes. Were its value known as it merits, there would not be enough in stock in all the nurseries in the United States to supply the demand. In all bleak places, where nothing else will grow, or in other situations where needed, plant Norway Spruce.

Price of Norway Spruce, 2 to 3 feet, 25c. each, \$2.50 per 12, \$18.00 per 100; 12 to 18 inches, 15 cents each, \$1.50 per 12, \$10.00 per 100.

American Arbor Vitae (Yellow Cedar) is a favorite evergreen tree for hedges. Its growth is not so rampant as to be objectionable, and yet it soon assumes a condition of great beauty, attractive from the moment it is planted. The foliage is feathery and spray-like, becoming more dense after each pruning with shears. Set plants twelve to twenty inches apart, in a border wide enough to admit of cultivation on each side of the hedge, and see that sods do not encumber the ground at planting.

The first three or four years all the pruning necessary will be to shear off the tops of each plant, making the hedge of an equal height. I know of no more beautiful hedge than the American Arbor Vitae. It forms a dense mass through which a cow or horse would not attempt to penetrate, and which shields the grounds from cold winds and driving snow. It is a thing of beauty, not only in the summer but in winter.

It is also beautiful as a single tree, made dense by clipping the shoots every year or two at the ends of the branches, but it forms a beautiful tree without any trimming whatever. It is often used in beds with shrubs and ornamental plants with good effect.

Price of first class trees, 2 to 3 feet, 25c each; \$2.50 per 12; \$18.00 per 100.

HEDGE OF AMERICAN ARBOR VITAE.

If we please you, tell others. If not, tell us.

ROSES.

Crimson Rambler.—A climbing rose of unusual attractions. Very hardy, having withstood 10 degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises.

General Jacqueminot.—The leading rose. Deep, brilliant shaded crimson, with large petals, globular with high center. A well known favorite; one of the best and planted by all who plant roses.

Paul Neyron.—On our grounds gives us *more blossoms than any other variety*, except Coquette des Alps. If we could only plant one rose bush, Paul Neyron would be our choice. It is very strong in growth and prolific in blossom.

La France.—Delicate silvery rose; very large, full flowers, with a faint tea odor.

Mad. J. Laing.—Soft, delicate pink.

Rosa Rugosa (Japan Rose).—Those who are unacquainted with this wonderful species of the rose family will find great interest in it, especially in its adaptability for ornamental hedges. Growth is very strong and vigorous.

ADDITIONAL VARIETIES.

John Keynes.—Red.

Madam Plantier.—White.

Red Moss and Salet Moss.

Price of all varieties of Roses named above : 25c. each, \$2.50 per 12.

Two year Bushes.—The bushes we send by express or freight are two-year-old (mostly on their own roots) and bushy, that will blossom the first season.

Coquette des Alps.—White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of

blossoms for weeks after general varieties have finished.

Baltimore Belle (Climber).—Pale blush, large, very double; one of the best climbers.

Coquette des Blanches.—Pure white, of fine form. Free bloomer and a very fine rose for late blossoms.

Magna Charta.—Pink, suffused with carmine; full; globular. A fragrant rose.

Margaret Dickson.—Pure white. Is an excellent rose and a free bloomer; hardy.

M. P. Wilder.—A seedling of General Jacqueminot. A great favorite. Color cherry carmine.

Prince Camille de Rohan.—Deep velvety crimson; large, moderately full.

Magna Charta.—Pink, suffused with carmine; full; globular; fragrant.

Prairie Queen (Climber).—Bright rose, very large and free bloomer; extra fine.

Clematis Paniculata.—A remarkably beautiful climbing plant. Flowers pure white, star-shaped, about one inch in diameter, borne in large clusters: will last several days as cut flowers, retaining their freshness and fragrance. Plant is a strong, quick grower, has broad, healthy foliage, seldom attacked by insects. A strong, blooming plant. **Price—25c. each.**

Clematis, Jackmanni.—We consider this by far the best clematis—takes to transplanting better, blossoms more, is hardy and seems to be free from disease which attacks other varieties. The flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich, velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts.

Price—Strong plants, 35c. each.

Halleana (Hall's Japan Honeysuckle).—An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white changing to yellow, resembling a Cape Jasmine in odor, and produced in profusion from May to December. **Price—Strong plants, 25c. each.**

TRUMPET FLOWER—TRAINED TO STAKE
IN TREE FORM

Trumpet Vine.—The reader may be surprised to learn that the Trumpet Vine may be made to grow like a tree, and is very beautiful when grown in this way. Plant the Trumpet Vine in an open space of the lawn and train a single shoot to a strong stick. After a few years this single shoot will form a trunk like a tree, and the branches may be confined to the top, or as you wish, when the vines will be transformed into a weeping tree of rare beauty. It is a hardy plant and will succeed anywhere, growing rapidly.

Price—Strong plants, 25c. each.

Ampelopsis Veitchii (Boston Ivy).—This is one of the most beautiful ivies and the latest acquisition. It is a rapid grower and clings tenaciously to brick or stone walls, requiring no artificial fastening or training. A single vine may in time cover the entire side of a house or church. It is hardy and thrives almost everywhere.

Price—Strong vines, 35c. each.

BARGAIN LOT OF FLOWERING SHRUBS.

We offer 27 Flowering Shrubs for \$3.24
Regular Price is \$5.50.

Our patrons sometimes ask our C. A. Green to select the most desirable shrubs, since they do not know which are the best. He has selected the list given below: 2 Old Homestead Lilacs, 2 New Lilacs, 4 Deutzias, 4 Spiræas, 2 Hydrangeas, 4 Weigelas, 2 Cranberries, 2 Ribbon Grass, 2 California Privet, 1 Ostrich Plum Plant.

Yucca Filamentosa.—I know of no flowering plant more showy than this. The plant itself looks something like the Century plant, and is mistaken by many for the Century plant. It is a gorgeous grower and endures the most severe winters without protection. It blossoms year after year, perhaps for a lifetime, as shown in the above illustration, and its blossoms look something like lily blossoms. They are pure white, and remain a long time in bloom. Sometimes the blossom stalk is thrown up to the height of 5 to 6 feet, making one of the most showy and conspicuous flowering plants in existence.

YUCCA—ADAM'S NEEDLE, HARDY CENTURY PLANT.

PERENNIAL PHLOX.

The Yucca is a rare plant, is easily transplanted and should be in every selection.

Price of Yucca—Strong plants, 35c. each, \$3 50 per 12.

Perennial Phlox.—Finest autumn flowers. Plant roots of the Phlox in fall or spring and those roots will continue to send up flower shoots each spring for twenty years. The bunch of roots, however, will after four or five years become so large as to be improved by dividing the cluster of roots, making, perhaps, a dozen transplants from one cluster, planting those out in a new bed, or a new row. Nothing transplants easier and there is no flower grown which can be produced in abundance with so little trouble. I plant the Phlox in a row along the border of the roadway, in a bed made up of several rows, or in a round bed on the lawn, or in single clumps here and there among the flower beds, or in the shrubbery. Every one who visits Mr. Green's place admires these beautiful plants of Phlox. The Phlox is hardy everywhere, and succeeds everywhere, and on all soils. *We offer three colors: Pink, white and red.*

Price of Phlox—Strong plants, 10c. each, \$1.00 per 12.

Paeonies.—This old and popular flower has again come into great favor. It is certainly worthy of a revival in its favor, since it is one of the most showy and attractive of flowering plants. Of late years great improvement has been made in varieties of Paeonies. Almost all colors have been introduced, and many of the varieties have marked peculiarities, being as fragrant and beautiful as the rose.

Price of Paeonies—Two colors, red and pink, best varieties, strong roots (that will flower the coming summer), 35c. each.

Golden Glow.—This beautiful and vigorous blooming perennial plant was unknown to most people until a recent date. I know of no flowering plant that has attained such great popularity in so short a time. In order to be popular, a plant must be able to thrive in all localities without nursing and this is just what Golden Glow does. Like Phlox it stands out doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. If you do not wish the plants to grow so high nip

PART OF A BED OF PÆONIES.

them off when they are a foot or two high, and they will branch out lower and be more desirable for certain localities. The blossoms appear in large numbers, hundreds of them on a single plant, and they succeed one another and remain long in bloom, giving the place an animated and brilliant appearance. Don't fail to plant Golden Glow.

Price of Golden Glow strong plants, 15c. each, \$1.50 per dozen.

Dahlias are all the rage now. They are different from all other flowers and have been greatly admired since the days of our grandmothers. But varieties have been vastly improved and multiplied, so that if our grandmothers should rise from their graves they would scarcely recognize the modern Dahlia in all its beauty. Dahlias are easily grown. They must be treated like Cannas. We take up the roots every fall before freezing and place them in dry sand in ordinary cellar and have never had trouble in keeping them. Immediately when planted in spring they send up vigorous shoots which soon blossom freely. Dahlias may be planted in beds by themselves or may be mixed with other flowers. Usually strong growing plants should be placed in the back part of the bed with lower flowers in front. Dahlias make beautiful bouquets, and as they blossom in a bed are remarkably attractive.

Price of strong Dahlia roots, 10c. each, \$1.00 per dozen.

Gladiolus Bulbs.—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow, and is lovely enough to satisfy the most exacting.

Price of Gladiolus Bulbs—Fine mixed colors, 15c. per 6, 25c. per 12, \$1.10 per 100.

DAHLIA BLOSSOMS.

GREEN'S FRUIT GROWERS' SUPPLY DEPARTMENT

OFFERS EVERYTHING NEEDED FOR PLANTING, GROWING AND MARKETING FRUIT.

Plows
Harrow
Rollers

IDEAL PRUNER AND SNAGGIN SHEARS No. 42.

Interchangeable blade, extra strong shanks, ash handles, joined with bolt and nut. By express. Price, No. 42, length 26 inches, not prepaid, 85c.

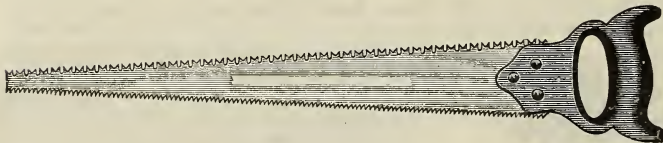

THE LEVIN TREE AND GRAPE PRUNER.

One of the strongest and easiest cutting pruning shears made. Special price, by mail, postpaid:

No. 23, medium size, 60c.
No. 24, large size, cut 3/4 inch dry oak, 75c.

The Levin No. 24 is the most practical pruner made.

DOUBLE EDGE PRUNING SAW,

Two in one, 75c. Post-paid, \$1.00

STANDARD TREE PRUNER

With Metal Brace Plate. Anti-Rust Rod. Steel Lever.

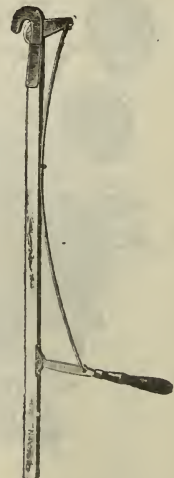

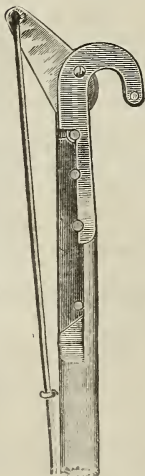

Standing on the ground the operator can cut from distance of arm's length to a height of 18 feet, according to the length of pole, the smallest twig or a branch an inch in diameter. Most convenient to use. Sure to do its work well.

Price, not prepaid.	Length 4 ft.,	weight 3 1/2 lbs.	- \$.75
" " "	6 "	4 "	- .85
" " "	8 "	4 1/2 "	- .95
" " "	10 "	5 "	- 1.00

WE DO NOT SELL EVERYTHING, but make a specialty of fruit growers' tools and supplies. Write us about anything you need, and let us give you a low price on the best tools and supplies. All shipments made direct from factory or from nearest distributing point, to save charges.

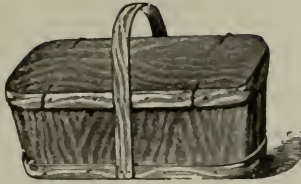

Address GREEN'S NURSERY CO.,
Rochester, N. Y.

Pole cut away to show Steel Brace Plate.

Do not take chances. Get tools and supplies from us. We use them and know they are right.

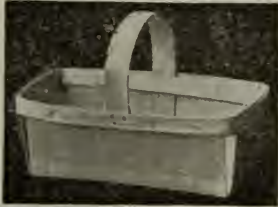

CLIMAX BASKETS FOR GRAPES AND PLUMS.

These baskets are used for shipping grapes, plums, etc.; also eggs for hatching.

Price of Climax basket, 4 lb., \$2.75 per 100; 8 lb., \$3.50 per 100, \$32.00 per 1000.

STANDARD 4-LB. SPLINT BASKET

For marketing grapes, etc., in the near-by or home market. More of these baskets used than any other.

Price, per 1,000, \$9.50; 500 for \$5.00; 100 for \$1.25. Send orders early.

Important Note.—All orders for baskets of any kind must be sent early to insure these prices. Prices are sure to advance as the season comes on. **Order Early.**

BERRY BASKETS, QUART OR PINT.

Price, 500 for \$2; 1,000 for \$3.50.

These are the standard size regulated by law, made of the best material, wire sewed. The price will be higher as the season comes on. **Order now,** or you may not get them at any price. **Order Baskets early.**

STANDARD CRATES, 50c. each; \$5.00 per dozen.

They are well made, of the best material, and are complete with hinges and patent latch. They hold 32 quart baskets of berries without crowding.

SPECIAL.—A Standard 32-quart crate with 100-quart or pint baskets, only 95c.

STANDARD PEACH BASKETS:

Price of peach baskets, 50 for \$1.75; 100 for \$3.00; 1,000 for \$26.00.

All Baskets and Fruit Packages must be ordered before the season for picking to make sure of getting in time.

These Prices subject to change.

HORSE MUZZLES.

To prevent horses from biting trees and plants when cultivating and plowing.

Price, japaned, 25 cts.

Price, heavy tinned, 35 cts.

Price, postpaid, 1-2 lb., 25c.; 1 lb., 40c.

Grafting Wax, by Express, 25c. per lb.

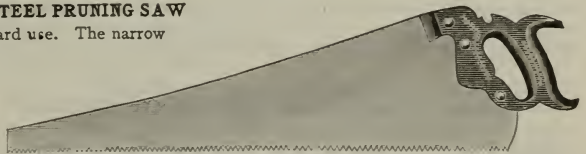

Combined Budder and Pruner, a beautiful pattern, stag handle, razor steel, each, postpaid, 75 cts.

MOORE'S CELEBRATED BLUE STEEL PRUNING SAW

is the best saw on the market for orchard use. The narrow point gets close in between the branch and the body of the tree, while the smooth back prevents injuring the bark.

Price, not prepaid, \$1.00.

Our Aim is to furnish our patrons with everything needed for planting, growing, harvesting and marketing fruit in the best possible way at smallest outlay of money.

THE LATEST IMPROVED SPRAY PUMPS.

We are in the very center of the district where spraying was begun, and is now being done in the most approved fashion. We know, therefore, the best Sprayers. Here are some of the most Practical Spray Pumps with all the latest improvements with nothing to get out of repair.

IMPROVED BRASS BARREL SPRAY PUMP.

FOR ORCHARD OR SMALL FRUITS.

The best Barrel Spray Pump on earth for the price. It is made by the largest pump makers in the United States. All parts coming in contact with spray solution are made of Solid Brass and are not affected by the materials used. The entire pump sets inside the barrel and all valves are submerged in the solution, therefore no priming to be done as with other pumps. It throws a uniform, constant and elastic spray. It is very powerful and easily operated. The patent agitator stirs the solution from the bottom.

Nothing to get out of order. Can be used for whitewashing.

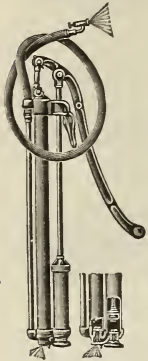

Price, No. 5, complete, with 5 feet of three-ply discharge hose and nozzle, ready to use, weight 25 lbs., only \$4.95
 Eight foot extension pipe for higher trees, .50

Price, No. 6, complete with two 5 foot lengths of three-ply discharge hose and two nozzles for spraying two rows at a time, ready for use. Weight 30 lbs., 5.95
 Eight foot extension pipe for higher trees (each), .50

For Dasher Agitator, if preferred, add \$1.00 to the price of either pump.

Always use extension pipes—You get better results.

These very pumps are sold by some dealers at \$10.00 and \$12.00 each.

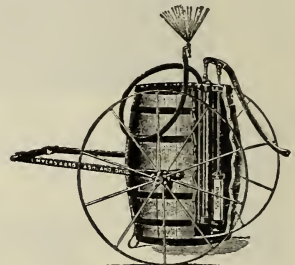

ALL STEEL BARREL CART.

For use with any of our Barrel or Bucket Pumps. Enables the user to carry a full barrel of water or spray solution, and to reach places that would be impossible with a team and wagon. It is also a valuable protection against fire, and for sprinkling. Being made entirely of steel, it will last a life time.

The best Barrel Cart made furnished with barrel or without.

Price, without barrel, \$3.95
 Barrel \$2.00 extra. Complete with barrel, 5.95

BUCKET OR BARREL SPRAY PUMPS.

Two Pumps in one for trees or small fruits and potatoes. When used as a barrel pump the entire pump except the handle goes inside the barrel, all valves being submerged in the solution. A Brass Bucket Spray Pump with more real advantages than are contained in any other spray pump now on the market. It has all the advantages of the ordinary barrel pump and bucket pump combined, and is sold at a moderate price. The work is all done on the down stroke of the handle, and it can be operated with one-third the power required for any other old style bucket spray pump. It is no experiment. It has been thoroughly tested and is an excellent pump for practical use.

Price No. 24, complete, ready to use, with agitator, 5 feet of 3-ply hose and graduating Vermorel fine or coarse spray and solid stream nozzle, \$3.45
 With eight foot extension pipe for higher trees, 3.95

This pump is catalogued by some dealers at \$6.00 and \$6.50, and is made at the largest pump factory in the country.

Always use pipe extension—You get better results.

BRASS BUCKET PUMP.

An excellent pump for small fruit growers and poultrymen. Can be used for whitewashing, washing wagons, spraying potatoes and fruit trees. With the eight-foot extension pipe this pump can be used for spraying the larger trees. The pumping is all done with the downward stroke. A constant pressure of from 50 to 100 lbs., with very little effort, maintains a steady stream or continuous spray. The patent agitator stirs the solution from the bottom.

Price, with 5 feet of 3-ply hose, the best all around nozzle, ready to use, weight, 7 lbs. only, \$2.85

The eight-foot extension pipe for spraying trees, 50c. extra.

Always order the 8-foot extension pipe; you get better results.

NOTICE.—We can send any of the sprayers on this page, or the Knapsack Sprayer on the next page, DIRECT FROM THE FACTORY in Ohio if desired to SAVE EXPRESS CHARGES TO POINTS IN THE WEST.

KNAPSACK SPRAYER

For Small Fruit, Potatoes, Etc.

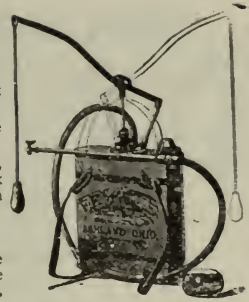

A Convenient Outfit with which to spray from four to six acres of small fruit or potatoes in a day.

The tank holds 5 gallons, and is fitted with lid and strainer, which can be removed.

The pump has a large air chamber, ball valves, solid plunger and agitator, and is also fitted with handle, so the operator can use it the same as our tank with bucket pump, viz., set the knapsack on the ground and work pump with handle.

The handle lever can be shifted from right to left shoulder, at will.

Price, No. 330, Knapsack Spray Pump, with 5 feet of 1/4-inch hose, pipe extension and Bordeaux or graduating Vermorel spray nozzle, which can be graduated from a fine mist spray to a solid stream or shut off entirely, **\$4.95.**

THE AUTO-SPRAY.

A Self-Operating or Automatic Sprayer.

The climax of all sprayers; combines every conceivable point of excellence, including economy, durability, low price, and ease in carrying and operating.

Nothing but galvanized steel and solid brass or copper used with 4-ply rubber hose—nothing to rust or corrode. Fully warranted, made in solid brass and galvanized steel. Eight to ten strokes of plunger compresses enough air to spray ten minutes. Sprays a quarter acre of potatoes, tobacco, etc., without re-charging. Weight, empty, 7 lbs.; loaded, 39 lbs.; capacity, about four gallons. Extension pipes extra.

Price, complete, Galvanized steel tank, - - - - -	\$4.50
Solid brass tank, - - - - -	5.85
Galvanized extension, 2 ft. lengths, brass ends, - - - - - Each	.30
Solid brass extension, 2 ft. lengths, - - - - - "	.35
Elbow extension, solid brass, - - - - - "	.35

SPECIAL INTRODUCTORY OFFER.

The Auto-Sprayer, one in a place, to introduce it.

Galvanized steel, with three extension pipes, - - - - -	\$4.45
Solid brass, with three extension pipes, - - - - -	5.95

BORDEAUX MIXTURE.

(Standard Formula, 1 gallon makes 50 gallons spray.) Ready for use by simply adding water. An indispensable fungicide, curing and preventing black rot, mildew, blight, rust, scab, and all fungoid diseases on fruits and plant.

Price. 1 gal. makes 50 gals. of spray solution, - - - - -	\$1.00
5 gals. make 500 gals. " - - - - -	4.50

KEROSENE EMULSION.

Prepared according to the most improved formulae; ready for use by simply adding water (25 to 50 parts water to one of Emulsion). **Price, per gal., \$1.00; 5 gals., \$4.50.**

WHALE OIL SOAP SOLUTION.

For cabbage worm, scale on trees, caterpillars, melon louse, rose bugs, green fly and lice of all kinds, all sucking insects, either on plants or animals. Use from one to two pounds of the soap to 5 to 8 gallons of water. Be sure that the soap is thoroughly dissolved, and then apply in form of spray. **Price of Whale Oil Soap, 1 lb., 15c.; 2 lbs., 25c.; 5 lbs., 50c.**

WHITE HELLEBORE FOR CURRANT AND GOOSEBERRY WORMS.

Hellebore is often employed in cases where arsenical poisons would be objectionable. Use one ounce to three gallons of water. **Price of Hellebore, 1 lb., 25c.; 5 lbs., \$1.00.**

SULPHO-TOBACCO SOAP KILLS CURRANT WORMS.

Excellent for rose bushes, shrubs, etc. It also acts as a valuable fertilizer, reviving plant life. For domestic purposes it rids the house of cockroaches and is a superior wash for dogs and all animals. Prevents poultry lice.

Price, 3 oz. Cake, sufficient for two gallons prepared solution, 10c.; mailed, postpaid, 13c.

8 oz. Cake, sufficient for five gallons prepared solution, 20c.; mailed, postpaid, 28c.

Valuable booklet, "The Window Garden," free with 8 oz. cake of Sulpho-Tobacco Soap.

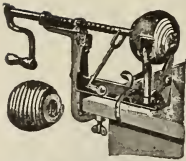

We are interested in supplying all our patrons with a good Sprayer, because it helps to care for the trees and plants they purchase.

Write us, telling how many trees you have to spray, the size, etc.; also the small fruit, potatoes or cabbage to be sprayed, and let us help you in the choice of a Sprayer, large or small, according to your actual needs. If you write us at once we can send you the latest and most reliable Spray Calendar, telling just what to use and just when to spray.

Address **GREEN'S NURSERY CO., Supply Dept., ROCHESTER, N. Y.**

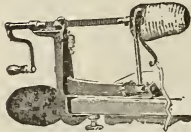

GREEN'S IMPROVED APPLE PARERS, CORERS AND SLICERS.

No. 1, for Home Use.—Pares, cores and slices the fruit, and then, pushing off apple and core separately, is ready to repeat. This machine stands beyond the reach of all competitors. There is nothing about it to break or get out of order, while the wear is so slight as to make it almost everlasting. Can be used to pare without coring and slicing. Weight, packed, 3 lbs.

Price, No. 1, complete, only 95c.

GREEN'S POTATO PARER.

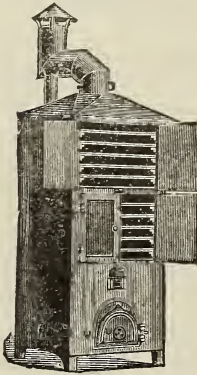

Pares any shape or kind of potato better and quicker than can be done by hand; enters into and cleans out the eyes, and by taking a thinner paring, saves 50 per cent. of the outside potato, which is ordinarily wasted. This machine is also suitable to quinces and pears. Weight, packed, 3 lbs.

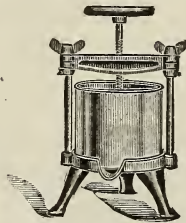

Price, 95c.

FRUIT EVAPORATORS.

We have a complete line of Fruit Dryers, Bleachers, Presses, etc. Write for prices on whatever you need in this line. Every fruit grower should have an outfit for evaporating fruit. It pays well.

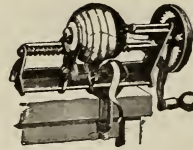

SENSIBLE WINE AND CIDER PRESS.

A well-made and handsome Press for making cider, wines, jellies, lard, syrups, etc. Made with special reference to strength, and guaranteed against breakage under any fair usage. All iron and steel, stronger and better than the old wooden press. It has double curbs.

PRICE:

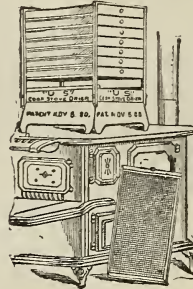

Four quart curbs, weight 30 lbs. - \$2.95
Ten quart curbs, weight 40 lbs. - 3.95

No. 2, for Home or Dry House is larger than No. 1 and faster, and may be used for pears and quinces. It has a steel feed screw, and fastens to the table at both ends. Parings fall clear of the working parts. Has automatic push-off for removing the core. Pares, cores and slices, and may be used to pare only. These parers all cut a thin peel, removing the entire skin without cutting away the flesh of the fruit.

Price, No. 2, packed for shipment, \$3.50.

GREEN'S HOME EVAPORATOR.

Thoroughly tested and approved. Latest, cheapest, best. Can be used on any stove, dries any fruit.

Price, \$4.00.

Send for Special Catalogue of Parers, Slicers, Bleachers. Also special circulars of small and large evaporators.

One man writes: "I am more than pleased with our Cook Stove Fruit Drier, and would not be without it for four times its cost."

APPLE CUTTER.

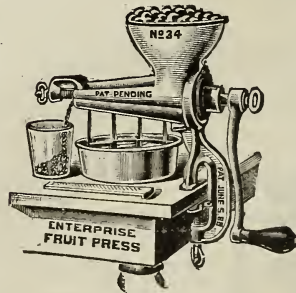

Cuts the apple into eighths or twelfths. Does it quick as a wink, and digs out the core at the same time. Leaves slices united at bottom by a tiny portion of skin, so that for baking the parts can be quickly put together and the sugar put into the hole where the core was.

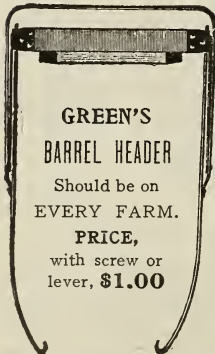

Price, postpaid, 30c

FRUIT, WINE AND JELLY PRESS

Three in one. Cleanest and best. The only one that separates juice, seeds and skins at one operation. For making wines, jellies and fruit butters from grapes, strawberries, raspberries, blackberries, gooseberries, currants, quinces, pineapples, etc. The dryness of the pulp may be regulated by thumb screw at the outlet. Weight only 15 lbs.

Special Price, complete, \$3.00.

GREEN'S BARREL HEADER
Should be on EVERY FARM.
PRICE,
with screw or lever, **\$1.00**

Large Cider Mills and Presses for home or commercial use at very low prices. Send for special descriptive circulars.

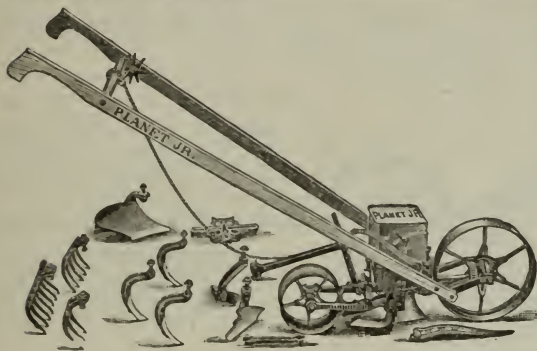

THE BEST BOOKS

for the Fruit Grower, Gardener, Poultry man or general farmer. Each book is the work of a competent specialist, under the editorial supervision of Professor L. H. BAILEY, of the Cornell University, CHAS. A. GREEN and other practical men, and will be found readable, clear-cut, practical and thoroughly up to date, treating its topics in a plain but comprehensive way from the same general standpoint of combining science and practice. Planting, Gardening, Pruning, Spraying, Grafting, Budding, Picking, Packing, Marketing, Shipping, Dairy, Milk, Butter, Cheese, the Feed and Care of Animals, Poultry etc. Send for descriptive Catalogue and prices.

PLANET JR. FARM AND GARDEN TOOLS.

We can fill orders from Detroit, Milwaukee or Peoria at 35c. advance over Rochester prices, from Minneapolis at 50c. advance, or from San Francisco, California, or Portland, Oregon, at prices which will be named on application.

No. 4 IMPROVED PLANET JR. Combined Hill and Drill Seeder and Wheel Hoe, Cultivator and Plow. Steel driving wheel. Holds 2 quarts.

We can hardly recommend it too highly. It combines in a single convenient implement a capital hill-dropping seeder, a continuous row seeder, an admirable single wheel hoe, a cultivator and a plow. Its work as a seeder is marvelous. It sows in continuous rows with the greatest uniformity, and also drops with accuracy in hills, 4, 6, 8, 12 or 24 inches apart. The feed is automatically stopped, by simply raising the handles.

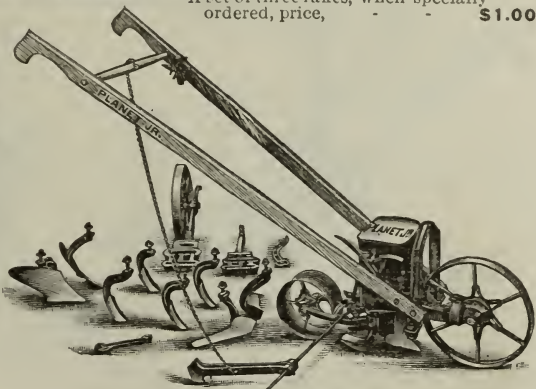

Price, complete, - - - - \$10.00
Drill only, - - - - - 8.00
Weight packed, 47 lbs.

A set of three rakes, when specially ordered, price, - - - - \$1.00

No. 25 PLANET JR., Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plow. 11 1/2 inch wheels. Holds 2 1/2 quarts.

It combines in a most practical way the PLANET JR. No. 4 Drill and No. 12 Double Wheel Hoe. This new combined machine is intended for gardeners who have a large enough acreage in crops, for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy a Seeder and Wheel Hoe separate. The Seeder is large enough for field use, for it holds 2 1/2 quarts, or about 5 lbs. of onion seed.

Price, - - - - - \$13.00
Weight packed, 59 lbs.

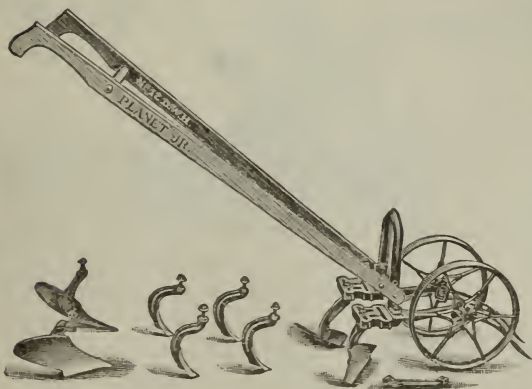

No. 12 Planet Jr. Double Wheel Hoe. One pair of 6 inch hoes; two pairs of hollow steel cultivator teeth; one pair of plows and one pair of leaf lifters.

The plows are invaluable; use them with points together for opening furrows for manure, seeds, etc.; then exchange sides for covering; use them also for plowing away from or to the crops, both sides at once.

Leaf lifters save time and enable fine work to be done close to the row without additional labor, when plants are larger or leaves are flat to the ground.

As a whole, no wheel hoes have ever been made so complete in each detail, while combining such a variety of attachments adapted to so many kinds of work.

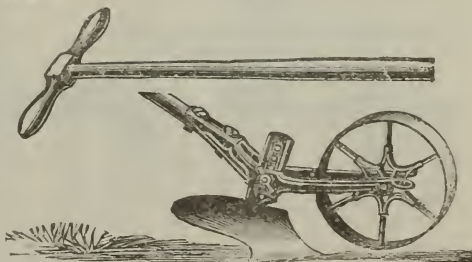

Price, with attachments, as in cut, - - - - - 6.50
Price, hoe only, - - - - - 4.25
Packed weight, 32 lbs.

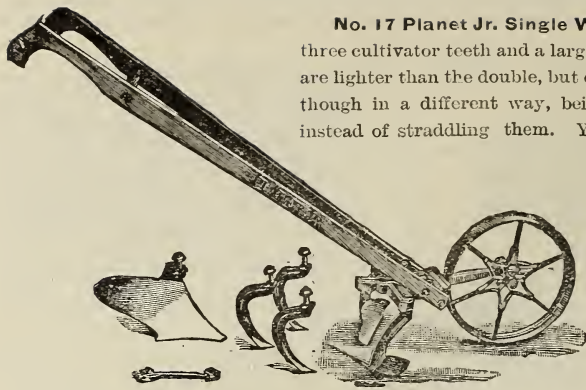

FIRE-FLY GARDEN PLOW.

This tool is exceedingly useful to owners of small gardens. It will throw a furrow four to six inches wide and one to three inches deep. Furrows for manure or seeds can be opened and covered. In cultivating, plow away, weed and plow back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

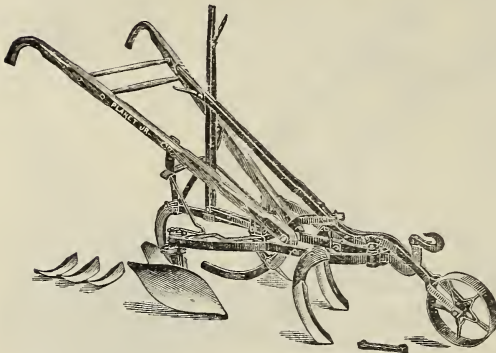

Price, - - - - - \$2.35
Packed weight, 13 lbs.

No. 17 Planet Jr. Single Wheel Hoe. One pair of 6 inch hoes, three cultivator teeth and a large garden plow. Single Wheel Hoes are lighter than the double, but do almost the same variety of work, though in a different way, being used mostly between the rows instead of straddling them. Yet by attaching the wheel to the other side of the arm, No. 17 can be used to hoe both sides of the row at once while the plants are small—the most important time.

Price, as in cut, - - - - - **\$4.50**
 " without Plow, - - - - - 3.75
 " as Hoe only, - - - - - 3.00

No. 8 Planet Jr. Horse Hoe and Cultivator. Our horse hoe and cultivator frames can all be closed to 9 inches and opened to 25 inches.

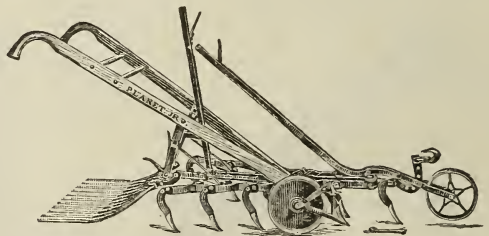

The patents standard are of hollow steel, of the strongest pattern, mutually stiffening the frame and being stiffened by it.

Price, complete, as shown in cut, - - - - - **\$7.50**
 " without depth regulator, - - - - - 6.90
 " with expansion lever and plain wheel, - - - - - 7.00
 Packed weight, 82 lbs.

Planet Jr. Twelve Tooth Harrow, Cultivator and Pulverizer. This tool has rapidly grown in favor among strawberry growers, market gardeners and farmers. It is convenient and strong.

Price, complete, - - - - - **\$8.00**
 " plain, - - - - - 5.30
 " with wheel, - - - - - 6.40

Strawberry Runner Cutter, \$1.75 extra.
 Packed weight, 74 lbs.

No. 41 PLANET JR. ORCHARD AND UNIVERSAL CULTIVATOR.

This is a new Orchard and Universal Cultivator, with patents pending, built to combine strength, lightness, adjustability and efficiency to the fullest extent in one tool, representing in itself all the advantages of our earlier patterns, with important improvements added.

Wheels. The steel wheels are low, entirely within the frame, and therefore do not catch and injure low limbs, etc. They do not change in width.

The Tongue is Steel, with either steel or wood evener and singletrees.

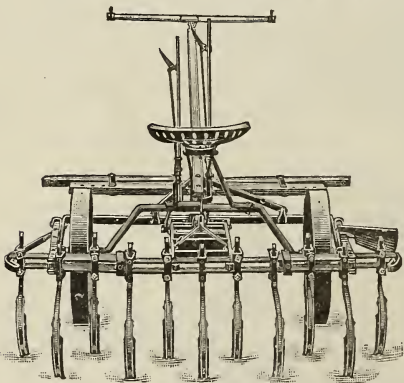

The Frame is high carbon steel, compact in form, well braced, heavy and strong.

Without the extensions, it cuts four feet in width, having seven stiff steel standards, carrying $2\frac{1}{2} \times 10$ inch teeth.

With the extensions, it cuts 6 feet 6 inches, carrying eleven teeth. The frame can be changed quickly to cut any width from six and a half down to four feet.

Packed weight, 450 lbs.

Price, with extensions, - - - - - **\$42.00**
 " without extensions, - - - - - **32.00**

A COMPLETE ILLUSTRATED CATALOGUE ON APPLICATION.

THE MATTHEWS NEW UNIVERSAL GARDEN TOOLS.

The Matthews Seed Drill, an efficient and durable instrument, has obtained such pre-eminence over the former styles that it has been generally copied by other manufacturers of Seed Drills.

MATTHEWS NEW UNIVERSAL CONSTELLATION SEEDER, HOE, CULTIVATOR, PLOW, RAKE AND MARKER.

This illustration shows the complete implement with all attachments furnished.

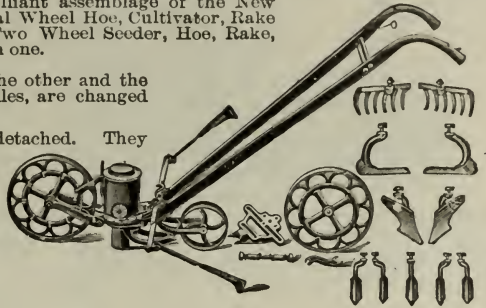

In the Constellation is presented a brilliant assemblage of the New Universal Garden Drill, and the New Universal Wheel Hoe, Cultivator, Rake and Plow, for use either as a One Wheel or Two Wheel Seeder, Hoe, Rake, Cultivator, Plow or Marker. Six implements in one.

Each implement is entirely separate from the other and the only parts used in each, the wheels and handles, are changed from one frame to the other by only two bolts.

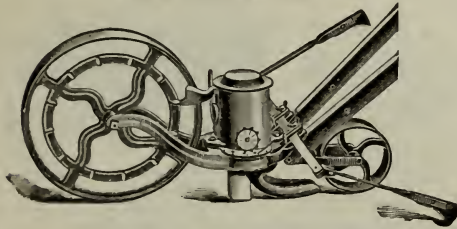

Cultivating Attachments are shown detached. They consist of 1 Cultivator Frame, 1 Pair Hoes, 1 Pair Plows, 1 Pair Rakes, 1 Pair Narrow Cultivator Teeth, 1 Pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 Pair Markers.

Price, boxed, complete, . . . \$8.50

Send for complete catalogue of New Universal Tools.

NEW GARDEN DRILL.

THE PERFECT DRILL.

So acknowledged by all the leading seedsmen and market gardeners.

The Manual "Cut-off," worked from the handles, instantaneously stops the flow of seed, and there is no seed wasted turning at end of rows.

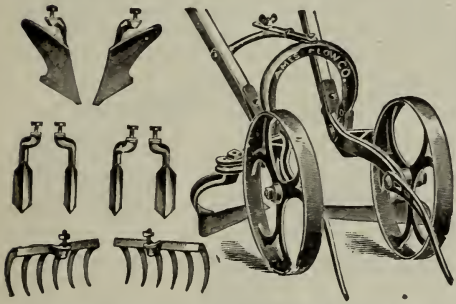

Price, \$6.50.

HILL AND DRILL SEEDER.

A complete hill and drill seeder. Drops seed in hill 4 to 48 inches apart, or in continuous drill.

Price, complete with right and left markers, \$7.25

NEW UNIVERSAL DOUBLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE.

The Special Design of a Double Wheel Hoe is the working of both sides of the row, at one passing, by what is termed "straddle-row cultivation," but it may also be used as a between-row cultivator. In our implements all the good points of older efforts are retained, and in addition, new features are offered, which cannot fall of appreciation.

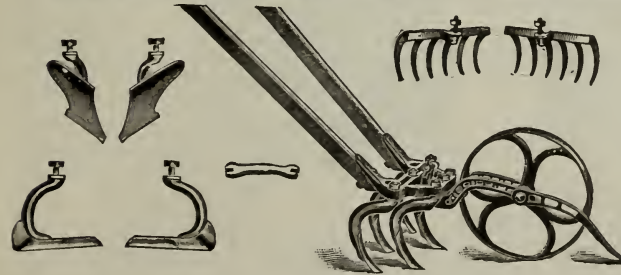

The Adjustable Arch not only forms a means for gauging the depth of work to be performed; but, by an ingenious device enables the teeth to be pitched at any angle desired. This is especially advantageous for the Hoe Attachments, which are by far the most used of all.

The Attachments are;

- 1 Pair Hoes, 1 Pair Narrow Cultivators,
- 1 Pair Plows, 1 Pair Wide Cultivators,
- 1 Pair Rakes, 1 Pair Vine Guards.

Price, boxed, complete, . . . \$5.50

NEW UNIVERSAL SINGLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE.

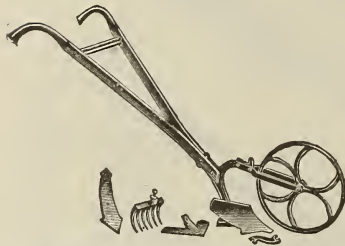

This Form of Wheel Hoe is preferred by many, and as with the Double Wheel Hoes just described, may be used either between or astride the rows. For straddle cultivation, the wheel may be set on one side, so as to bring the rows of young plants under center of frame. Later cultivation must be done between rows.

The Attachments are: 1 pair Narrow Cultivators, 1 pair Wide Cultivators, 1 pair Hoes, 1 pair Plows, 1 pair Rakes, 1 Center Cultivator, 1 Vine Guard.

The Adjustments, five in number, for graduating the depth of cultivation, are unique and readily accomplished. Price, boxed, \$4.75.

THESE TOOLS DELIVERED FROM ROCHESTER, N. Y., WORCESTER, MASS., or CHICAGO, ILL.

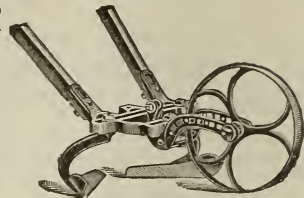

NEW UNIVERSAL STEEL FRAME GARDEN PLOW AND ATTACHMENTS.

The same Frame and Wheel are used as in the above implement. It is a very acceptable addition to our line. The Wheel is just for use of the able and is 15 1/2 inches in diameter. The Handles are also adjustable. The finish is in the same style as our other implements of this well known line. The attachments are: 1 Landside Plow, 1 Sweep or Scuffle, 1 Rake and 1 Double Tongued Cultivator.

Price, complete, - - - - - **\$3.00**

NEW UNIVERSAL SINGLE WHEEL HOE.
With Hoe Blades Only.

The same Frame and Wheel are used as in the above implement. It is a very acceptable addition to our line. The Wheel is just for use of the able and is 15 1/2 inches in diameter. The Handles are also adjustable. The finish is in the same style as our other implements of this well known line. The attachments are: 1 Landside Plow, 1 Sweep or Scuffle, 1 Rake and 1 Double Tongued Cultivator.

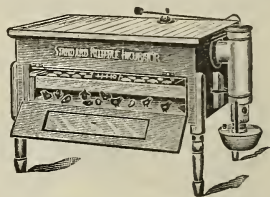

Price, boxed, complete, - - - - - **\$2.75**

REMEMBER, that we ship these tools from the warehouse nearest your railroad station. This is a great saving in the freight charges.

Did you ever hear of such bargains! All prices free on cars at factory. Send for our Poultry and Poultry Supply Circulars.

A MAN WITH A MASTER'S PLANT SETTER

matoes, tobacco, celery, etc.

Regular price, \$3.75. Our price, to introduce it, (weight 8 lbs) \$3.45.

will set, water and fertilize 10,000 plants per day. Every plant securely set by absorption—nature's own way. No blanks—no stooping—no more lame backs—no damage by cut worms.

Don't wait for showers, but keep the planter going every day and by using water or liquid fertilizer you will produce the best stand of plants seen for many a day.

For cabbage, to-

THE HAND CULTIVATOR.

In addition to the use as a cultivator, the outside edges of the shovels are sharp so that they may cut weeds as a hoe. The three shovels may also be set in a line for hilling potatoes, or for similar work. When used in this way it not only hills up the rows but thoroughly stirs the soil.

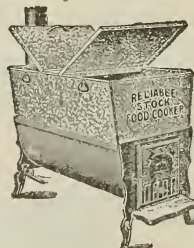

Those who do not like the hard work of hoeing will delight in the tool, boys especially becoming enthusiastic over it.

After a little experience in the use of the tool the gardener will find many more uses than we have taken the time to describe.

Price, complete, - - - - - **\$1.00**

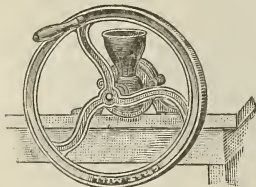

FOOD COOKER AND WATER HEATER.

Warm food aids digestion and scientific investigation has shown that fully one-third the cost in feeding is saved by cooking food. In summer they are invaluable as water heating for scalding milk cans and pans, heating milk for calves, etc. In the fall they come in doubly handy to heat water for pig scalding. They are the most durable, cheapest and best on the market.

GREEN'S FAMILY GRIST MILL.

Make your own graham flour, corn meal for table use and cracked corn for poultry. Weight 23 pounds. Hand wheel 19 1-2 in. in diameter. A pound of wheat can be ground in about one minute, also grinding any other kind of grain, separate or mixed, roots, barks, etc., fine or coarse as desired.

Price, ready to use, **\$2.45.**

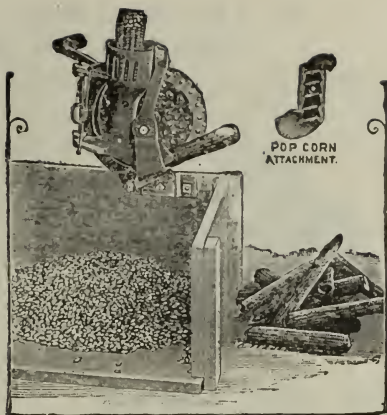

VEGETABLE AND ROOT CUTTER.

Thousands in use. Thousands sold every year. Thousands of testimonials. Great time and money savers.

Price, complete, \$3.85

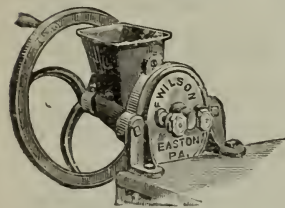

Save their cost before they show any evidence of use. Cuts green foods of all kinds for cattle, sheep and poultry, thus securing the greatest benefit from food with no waste. Easily operated, any child can do the work. Cuts rapidly. It supplies the best possible manner of preparing this food at all times for sheep and cattle. The knives in cutter can be removed and resharpened, making a practical, durable, convenient, economical and valuable machine.

HANDY CORN SHELLER.

Reliable, substantial, convenient, compact.

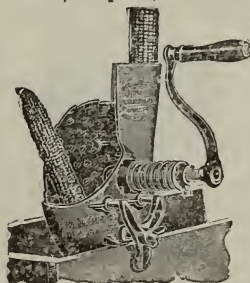

Price, complete, 95c.

The No. 1 Bone, Shell and Corn Mill for Poultrymen. This mill will grind dry bones, shells, all kinds of grain, gravel, etc. It is also a splendid machine

for grinding stale bread, crackers, roots, barks and spices for pantry or poultry yard. One customer writes that he ground and sold \$105.00 worth of oyster shells on the No. 1 mill and it is as good as new.

Price, weight 33 lbs., . . . \$3.95

Champion Ball-Bearing Corn Sheller.

A Sheller that shells. It can be set to shell any corn that grows. Set it for pop corn and it will shell pop corn; set it for field corn and it will shell field corn; set it for the largest corn that grows and it will shell the largest corn that grows. That is why it is so much better than other types.

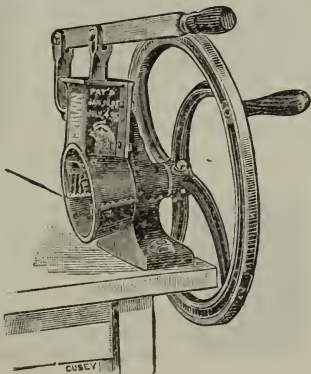

Ball-Bearing Corn Sheller.

Made with ball bearings, obviating the expense of a heavy balance wheel. Easily fastened to box by thumb-screw—no bolts nor screws required—no holes to be bored. The working parts are all machine made, not castings thrown hastily together. Every part is perfectly fitted and can be duplicated at any time.

Price, complete, \$2.00.

THE CROWN GREEN BONE CUTTER.

Cuts easy, fine and fast. Has steel knives; can be taken out and sharpened and replaced in a few minutes. Diameter of hand-wheel 21½ inches.

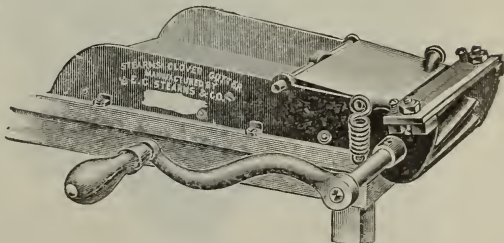

Price, (weight 50 lbs.)

\$6.50.

Price, with iron stand, \$2.00 Extra.

THE STEARNS CLOVER CUTTER.

Those who have small flocks do not care to expend large sums for ordinary feed cutters. The Stearns Clover Cutter is a special implement for their purpose. This clover cutter may be quickly attached to a table or bench; it feeds itself and cuts rapidly; it is self-sharpening, cuts all kinds of hay. Its weight is but five pounds; it may

be sent by express at a small cost, and has been on the market for years, having made hosts of friends.

Price of Stearns Clover Cutter, \$3 00.

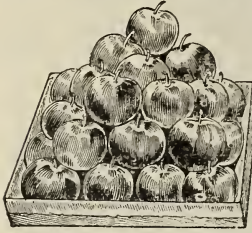

POULTRY SUPPLIES OFFERED BY OUR SUPPLY DEPARTMENT.—Bone Mills, Clover Cutters, Food Cookers, Corn Shellers, Drinking Fountains, Incubators, Brooders, Thermometers, Leg Bands, Powder, Bellows, Spaying Knives. Send for circular of Poultrymen's Supplies.

GREEN'S NURSERY COMPANY, Rochester, N. Y.

London—Each, 6c.; doz., 60c.; \$3.25 per 100.

"I am glad I purchased the Red Raspberry plants from you a few years ago. I got 12c. a quart for them.—*John C. Weber.*"

Black Raspberries—(Kansas, Conrath), 40c. per 12, postpaid.

For other Black Raspberries, see pages 36-38.

GRAPES.

We have a car-load of nice vines that can be sent by mail.

Charles A. Green Grape.—

This hardy early white grape is equal to McPike in growth and hardness of wood. The quality is much better than Concord and very sweet. Clusters are large and compact.

Price of strong vines, 15c. each.

Worden, Niagara, Concord, Diamond and Moore's Early—These are leaders, hardy and reliable in every way.

Price, 10c. each, \$1.00 per 12.

We will ship 500 or 1,000 by freight at a low figure. Write us for bargain prices.

Green's Unnamed New Strawberry (see page 42)—Pineapple flavor, large size, vigorous grower, great yielder. **Price 50c. per 12, \$1.35 per 100.**

The above is our leading variety for this season, but we can mail other varieties offered in this catalogue at same prices as offered by the dozen and at 100 price if 20c. be added.

Red Cross Currant is an exception to the ordinary rule, being the sweetest currant ever produced in the way of red currants. In calling attention to the characteristics of Red Cross, this qualification of sweetness and palatableness has not been properly emphasized. We have 50,000 strong 1-year mailing size plants now ready to send out. **Price of Red Cross Currant, 5c. each, 50c. per 12, \$3.25 per 100, postpaid.**

For fruiting size, 3-year and 2-year-old bushes, and other varieties of currants, see special offers in this catalogue.

Asparagus—We send many thousands by mail—never knew of a root being spoiled on way to the buyer.

Everyone who has a garden should have an asparagus bed.

Palmetto and Conover's Colossal, 25c. per 12, \$1.00 per 100.

Asparagus plant ready to set. 12.

Rhubarb—10c. each, \$1.00 per 12.

Horse Radish—Sets, 15c. each, 60c. per 100.

Sage (Holt's Mammoth)—Strong plants. **Each, 10c.; dozen, \$1.00.**

PEACH TREES BY MAIL.

Not stunted trees, but first-class June budded, excellent in every way for long shipment and successful planting. We have mailed these in years past to valleys of the Western mountains, and other distant sections, where their success has led to the planting of thousands of acres of trees in regions where it was not known that peaches could be grown.

We offer one variety only of mailing size peach trees, Niagara.

Niagara Peach.—A new variety, but fully tested by extensive orchard planting near Rochester, N. Y. Ripening one week earlier than Elberta, remarkably free from yellows and leaf curl, and cannot be surpassed in healthfulness and vigor. It is of large size, beautiful, and better in quality than Elberta.

Price of Niagara Peach, mailing size trees, 15c. each, \$1.50 per 12.

For Niagara and other peach trees for express and freight shipments see other pages in this catalogue.

Blackberries.—
Rathbun (new).

Price 60c. per doz., \$4.00 per 100; Minnewaska and Agawam 50c. per doz., \$3.00 per 100, postpaid.

ROSES.—The roses we offer are hardy outdoor grown. (We do not sell the so-called everblooming and tender kinds.) We offer a varied assortment, Red, Pink, White, etc.

We especially recommend Crimson Rambler, Magna Charta, Paul Neyron, La France and Prince C. de Rohan.

Price of Roses—25c. each.

Perennial Phlox.—Ladies passing my place stop to admire my Perennial Phlox. I can hear their exclamations as I

sit in the shade near by. I have for several years been propagating selections of Phlox. These brighten and beautify my grounds each year. You simply plant the roots and it blooms forever after, forming large clumps which can be separated and replanted; thus from a few plants you may in time secure a large bed. It is hardy, showy, a free bloomer, highly prized by all.—C. A. GREEN.

Perennial Phlox, assorted colors—Price, 10c. each, 75c. per 12.

Six mailed at half the price of dozen and offered by mail.

FLOWERING SHRUBS.

By Mail, nice, well rooted Plants (ready March 1st).

Spireas—White and Pink, at 10c each. **Deutzias**—White, and Pink and White, at 10c. each. **Altheas** (grafted double flowers)—White, Purple and Red, at 15c. each. **Lilacs** (selected grafted varieties)—Red, Purple, White and Blue, at 25c. each. **Snowballs** at 10c. **White Fringe** at 15c. **Purple Berberry** at 10c. **Hydrangea P. G.** at 15c. each. **Wiegela**—White and Red, at 15c. **Norway Maple** (Shade tree) at 15c.

SPECIAL.—15 of above nice plants, our selection, for \$1.00, all postpaid.

Gladiolus Bulbs.—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow, and it is lovely enough to satisfy the most exacting. By making successive plantings the flowering season may be continued much longer than by planting the bulbs all at the same time. There is no limit to the range of color—pink, scarlet, yellow, crimson, white, and a host of other colors, and in a variety of combinations in such a manner as to rival the orchid in superb coloring and delicacy of texture. Nothing is finer for vases than a bunch of cut Gladiolus.

Fine mixed colors. Price, 15c. per 6, 25c. per 12, \$1.10 per 100.

CANADIAN PATRONS.

Please add to following prices to defray postage, which is double that of U. S., one cent for each plant, tree, bush, shrub, vine and bulb. Except strawberry plants, and raspberry and blackberry plants, add 5c. per dozen and 25c. per 100 to postage rates already given.

50 at half the hundred price on all items

Sampling fruit is a pleasant pastime. Have you fine fruit to sample on your place?

This picture is a photograph of four leading men of Green's Nursery Co. testing apples grown at Green's fruit farm. These are the men you deal with when you send orders to Green's Nursery Co. These men have handled more than a million dollars sent in by mail from every part of this continent for plants, trees and vines. It is well that you should know something of these men who have served our patrons so faithfully for many years. This company has earned a reputation for fair dealing, and for labeling trees true to name. Sometimes patrons send more money than they intend, or more than is due. In such cases they are sure to get the surplus money back again, although they may not have known that they sent too much. Look these men over and see how you like them.

Above is a photograph of small trees in Green's Nursery. If you want smallish trees at low prices send for Green's Bargain List.

EGGS

FOR HATCHING

\$2.00 for 13

From prize-winning breeds S. C. Brown Leghorns, White Wyandottes, Barred and White Rocks. Price of Cockerels and Pullets \$3.00 each. Trios \$7.50. Green's Poultry Book for 25 cents.

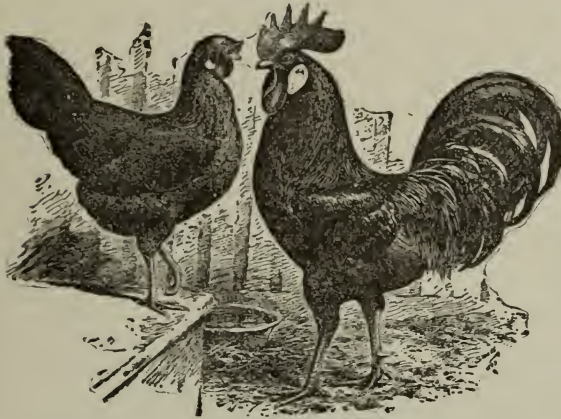

GREEN'S NURSERY CO.,
Rochester,
N. Y.

GREEN'S POULTRY DEPARTMENT

COCKERELS, PULLETS, AND EGGS FOR HATCHING FOR SALE.

Why Not Have Birds on Your Place from Chas. A. Green's Home? We Offer for Sale Four Breeds, as follows: **WHITE PLYMOUTH ROCKS, BARRED PLYMOUTH ROCKS, SINGLE COMB BROWN LEGHORNS, and WHITE WYANDOTTES**

THE POPULAR LEGHORN.—The acknowledged queen of the practical egg-laying breeds is the Leghorn when judged by the standard of the greatest number of marketable eggs produced at least cost. Not only are the hens persistent layers, but they are extremely active foragers and waste no time in sitting. Like a good milch cow, they put little fat upon their bones, but devote all surplus nourishment to steady production. They eat less than the heavy breeds, but whatever they consume is put to good purpose.

WHITE WYANDOTTE FOWLS are among the handsomest fowls known, large size, good layers, and highly prized for their meat. The New York markets will, in time, more fully appreciate the value of the Wyandotte for its delicacy on the table of the epicure. It will be noticed that no breed has all the good qualities, therefore if we want all the good qualities we must have more than one breed, but surely no one can make a mistake

in breeding the White Wyandotte, considering their beauty, egg-laying propensities and desirability in markets of the world.

BARRED PLYMOUTH ROCKS.—This breed is as solid as its name, and is often called the "Farmer's Friend," the "Old Reliable." It is the bird for business, and deemed by many the best fowl for farm and home raising. It is not only a good layer, but is quick to develop for the early market. As a far-sighted farmer once said to us, "When you kill one you've got something."

WHITE PLYMOUTH ROCKS.—These are similar to Barred Plymouth Rocks, except they are all white, therefore above description will do for White Rocks. Note that prices are the same for all of our breeds. See prices of birds and eggs below.

PRICES OF BIRDS OF ALL OUR BREEDS, and their eggs for hatching, are the same, as follows: Cockerels, \$3.00, \$4.00 and \$5.00; Pullets, \$2.00, \$2.50 and \$3.00; Trios, \$6.00, \$8.00 and \$10.00. Eggs for hatching of all breeds, \$2.00 per 13. Note—All our different breeds at these prices.

GREEN'S AMERICAN POULTRY KEEPING is a practical treatise on Hatching, Diseases, Feeding and Care of Poultry, and plans for buildings. How to Market Poultry and Eggs for Profit. By mail, postpaid, 25 cents. Address,

**GREEN'S NURSERY CO.,
ROCHESTER, N. Y.**

IT DON'T PAY to send away for cheap birds. All culls from our hatching we kill for market. We sell only good, pure blooded birds at the lowest price named, \$3.00 for Cockerels and \$2.00 for Pullets. If you want birds particularly well marked, fancy birds for exhibition, we charge more, as set forth above.

PRIZE BIRDS.—We have repeatedly taken prizes for our poultry at the large Rochester, N. Y., poultry shows. Breeders of fancy poultry come to our place to buy birds to breed from. Lower prices than ours mean poorer birds, dear at any price.

Poultry Prizes Taken by Birds from our Breeding Pens.

In the year 1900 a Leghorn Cockerel from which most of our stock was bred, took first prize at the Chicago Poultry Show. At Rochester Show, January 5th, 1900, entered three birds, took one prize for White Wyandotte Cockerel. Rochester, N. Y., Show, January, 1901, won two Wyandotte prizes for cockerel and hen. At same show entered three S. C. B. Leghorns, won prize on hen; Rochester, N. Y., 1903, entered five S. C. B. Leghorns and won first, second and third prizes for cockerel, and fourth prize for hen; at Rochester, N. Y., January, 1904, entered S. C. B. Leghorn, won prize for cockerel. You can trust C. A. Green to send you big value for your money.

Don't Be Fooled

WHEN some unscrupulous dealer or tree agent calls upon you soliciting your order, and learns that you are thinking of buying of Green's Nursery Co., he agrees to drop his usual high prices and sell to you trees at Green's Nursery prices, beware! REMEMBER our Catalogue prices are for first-class, full sized, well grown stock, and that no agent or solicitor can compete with us on such a grade of stock and cover his expenses. But he could, and often does, send small inferior trees or vines and make money.

We Have 50,000

Superior small sized trees, and if for any reason you do not desire to order our large size grades, as offered in catalogue, let us send you our Cheaper List of Bargain Small Sized Trees. We guarantee safe delivery and satisfaction, and make no charge for boxing and packing.

Certificate Worth \$1.50 IF SENT IN WITH ORDER ON OR BEFORE MARCH 15

(WRITE YOUR NAME AND ADDRESS PLAINLY HERE.)

Name _____

Postoffice _____ State _____

THIS CERTIFICATE (when accompanied by a cash payment for \$10.00 worth or more of trees, etc.) entitles the holder to a credit of One Dollar on his purchase of trees, plants or vines, but the prices must be those printed in Green's Catalogue, and no plant, vine or tree, premium or gift, must go with this offer. It also entitles him to one year's subscription to Green's Fruit Grower.

If your nursery order amounts to \$5.00 or over, this Certificate will be accepted in payment for one year's subscription to GREEN'S FRUIT GROWER magazine.

This Certificate will not be accepted after March 15th, 1905.

GREEN'S NURSERY CO., Rochester, N. Y.

If you have ever written us for a catalogue or have ever sent us an order, and have since moved or changed your postoffice address, we would thank you to fill out the lines above, stating your former address. Mail this notice to us, and with this information we can correct our records so as to avoid sending any printed matter to your old address, and instead, send it to your present and correct address, and thus insure your getting all the mail we send you.

GREEN'S NURSERY CO., Rochester, N. Y.

Small Fruits.

STRAWBERRY

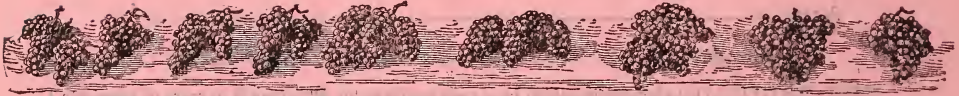

We do not hear so much about the profit of small fruits as we do about the profits of orchards, but the fact is that strawberries, raspberries, blackberries, grapes, currants and other small fruits yield even greater profits than orchard fruits. Small fruits are the poor man's friends. Many poor men cannot wait for an orchard to come into bearing, but the strawberries, etc., come into fruit quickly and can be sold at home at large profits. See our small fruit department in Green's Catalogue, pages 30 to 43.

Asparagus and Rhubarb Roots.

See illustrations, descriptions and prices of these most valuable garden products on pages 44 and 45. Asparagus is a delight in every American home. No home should be without an ample supply since it costs almost nothing, and is as delicious as a dish of early green peas when nothing else of the kind can be secured so early in the season. Rhubarb, or pieplant, is one of the most healthful delicacies, and is used by the housewife for pies and for sauce. The plant is also remarkably attractive as an ornamental plant in foliage or in blossom. Do not fail to plant it.

Grape Vines.

We have a surplus of the largest and best rooted grape vines to be found in the wide world, and offer special bargains, particularly to those who are planting vines by the hundred or thousand. See pages 31 to 34.

Currant Bushes.

We have a surplus of vigorous and well rooted currant bushes, mostly of the Red Cross, largest, most vigorous and best of all currants. Notice the low price we have made in catalogue for currant plants. See pages 40-41.

GREEN'S NURSERY CO.

ROCHESTER, N. Y.

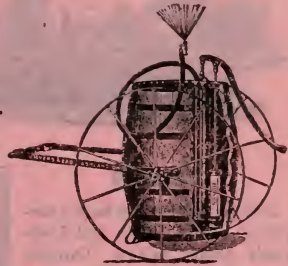

C. A. GREEN began publishing Green's Fruit Grower twenty-four years ago at his fruit farm, twelve miles out of Rochester, N. Y. It has always smelt of the soil in which the Editor has so long worked. It has more subscribers than all other horticultural papers combined, and far more than any other paper of its class in the world. We solicit your subscription to this valuable publication, which is not simply devoted to the Fruit Grower, but interests every member of the family. The subscription price is 50 cents per year, with premium. New subscriptions from those who receive this catalogue will be received at 25 cents per year.

Don't Forget

Green's Farm Tool and Supply Department.

We supply fruit growers with berry baskets and crates, peach baskets, garden tools, cider presses, plows, cultivators, hoes, knives, root cutters, green bone cutters, and many other kinds of poultry and fruit growers' supplies. Also

Spray Pumps and other Spraying Equipment

Our prices for farm and orchard tools defy competition. See pages 60 to 69.

Help! Help!

We ask your help in selling a vast lot of apple trees that we have been obliged to dig in clearing off a large field of leased land adjoining our large nursery farm. These are the best trees we have ever grown and we recommend them as superior in every way. We have three sizes—large size, medium size and smallish size. If you or your neighbors are planting orchards send us your list of wants, telling us how many of each variety you desire and what size, and we will give you lowest possible prices. See pages 5 to 17.

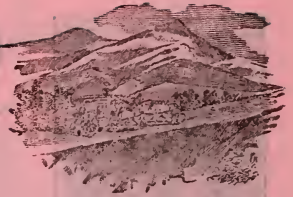

GREEN'S NURSERY CO.

ROCHESTER, N. Y.

Plants by Mail.

Notice on pages 70 and 71 of Green's Catalogue a list of plants and trees that can be mailed to any part of this continent. Notice that in every case the price is given for the plants or trees at your door, Green's Nursery Co. to pay postage. The free rural delivery of the mail makes this method of ordering plants, etc., desirable for those who live a long way from our nurseries.

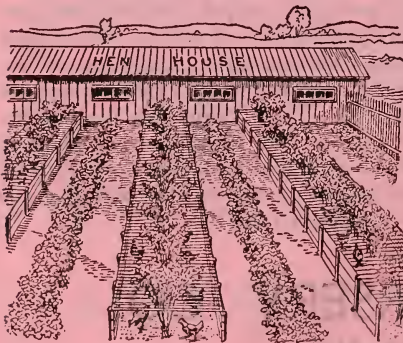

Trees, Plants and Vines for Ornament.

Our patrons are waking up to the fact that it pays to plant ornamental trees, plants, vines, etc., about their homes. From \$5.00 to \$10.00 invested in such planting often adds \$500 to \$1000 to the value of the home and makes it more attractive to every member of the family. See pages 46 to 59 for descriptions and illustrations of ornamental trees, plants and vines.

Poplars

Don't forget that we have a surplus of both Carolina and Lombardy poplar trees. Carolina poplar is lower and more flat headed. Lombardy poplar is the tall upright grower; if left untrimmed grows to the height of the meeting-house steeple, but even this can be headed back and made to be round headed if desired. These poplars make excellent hedge rows if cut back every year. They are planted for screens for outbuildings; they grow rapidly. Poplar trees are beautiful as street trees, or planted singly on the lawn. See page 46.

The cut shows how a poultry yard can be made into a fruit garden, and how the fowls can be kept from pecking or eating the fruit. The slatted rows show the device by which the poultry can have access to the poultry house and can obtain exercise, fresh air, insects and still be kept from eating the fruit.

There is no better place for plum, peach or other fruit trees than poultry yards.—C. A. Green.

Green's Nursery Co.

RED CROSS CURRANT—FROM PHOTOGRAPH.

BEST AND MOST PRODUCTIVE OF ALL CURRANTS.

We have several acres of Red Cross Currant growing and fruiting at Green's fruit farm near Rochester, N. Y. We have been selling this currant by the wagon load and by the ton for several years. It is an amazingly productive variety. It is also of very large size and the clusters are very long. It is the strongest grower of any currant we have on our fruit farm. Notice in the photograph that the fruit stems are very long and that there is much space between the currant and the stem, enabling the large clusters to be removed at one sweep of the fingers, making picking easy. Red Cross is the finest quality of all currants. It is acid mingled with sweetness and not the sharp acid of most currants, thus we eat them with sugar and cream the same as raspberries. Now I have named some of the remarkable characteristics of this currant which make it superior to and more profitable than other varieties, and yet you do not have to pay fancy prices for plants. We sell them to you as cheap as we can sell any of the older varieties. Thousands of fruit growers have planted Red Cross currant and are delighted with the size of the berries and its great productiveness. It is no experiment. We have testimonials from the large growers and famous horticulturists of various parts of the country, but have not room to print them. We are delighted with the Red Cross currant. Prices for Red Cross currant bushes: Three years old, extra fine, bearing age, 50c. per 12, \$3.50 per 100, \$35.00 per 1,000; 2 year old, strong, 50c. per 12, \$2.00 per 50, \$3.50 per 100, \$32.50 per 1,000.

GREEN'S NURSERY CO., Rochester, N. Y.
