**Crash prompts grounding of Huieys, Coutras**

All Navy and Marine Corps UH-1H and AH-1W Huey helicopters were grounded from flight following the Oct. 15 crash of a UH-1H from MCAS Kaneohe Bay, which killed four Marines. Initial indications point to possible engine failure or a propulsive system issue pending further investigation.

**Pinchay given life sentence**

By Col. Robert Smith

The Corps' 216th Brigade units declared mission-capable the next day after a six-hour shortened with police.

Wendell Pinchay, convicted murderer in the March 1990 Navy accident at Pearl Harbor, was sentenced Monday to life without parole by Federal Judge David Dorsey. On March 18, 1990, LCpl. Jeffrey Barbour was posthumously awarded the Silver Star and the Purple Heart at the White House ceremony. It was the first presentation of the Silver Star posthumously for valor in actual combat at the Pearl Harbor incident.

According to the Marine Corps' posthumous Silver Star citation for LCpl. Barbour, "in the face of great danger and certain death, LCpl. Barbour performed his duty with utmost gallantry and uncommon valor and selflessness in the face of impending peril and certain death," as he valiantly defended the embattled building of Pearl Harbor. The great loss he incurred Barbour's death.

Armed Forces Legal Service Manual

The Marine Corps

**Administration of Justice**

It is recommended that Pinchay serve at least 10 years in the federal penitentiary in Marion, Ill. Pinchay would be eligible for conditional release in 23 years, every day at Marion's Federal Penitentiary is estimated to ultimately determine whether Pinchay's sentence will be completed.

**PTA-92 concludes**

Brigade units declared mission-capable.

By Capt. Robert Schmid

POHAKULO TRAINING AREA, Hawaii—Marines and sailors of the 1st Marine Expeditionary Unit who returned Oct. 25 with a Combat Readiness Evaluation of the Regiment, 3rd Marines, and Marine Aircraft Group 24, stated they are back in the first echelon.

At the end of the three-day evaluation, both units were declared mission-capable. The REG is the evaluation of the month-long PTA-92 by the Brigade's field training exercise returning from the Gulf war.

"The live fires we did were as good as any fire we've done before," explained Capt. Wayne E. Rollings, commanding officer of 3rd Marines and task force commander for PTA-92. "These added a lot more realism to our training.

"Information analysts, anti-aircraft and mortarmen from 3rd Marines supported by Combat Service Support Detachment-3 secured all with pilots and airmen from the Pacific Air Forces combat control in a variety of live fire exercises.

"This has been our first opportunity to do a lot of live fire training with over-armed weapons and integrated air defense.

In addition to their chance to shoot live rounds, the deployment helped to build camaraderie in the special work of several personal changes following the conflict.

"Working together for the past month has really helped new people get integrated into our teams and units," Rollings said. "Getting out in the field and training like this really helps them feel a part of a team.

"And, Rollings added, while it has helped new people with individual units, it has had the same effect in terms of inter-brigade coordination between various units. He mentioned, in particular, the bonds between 2nd and 3rd.

"The month of working together as an integrated team helped them when it was time for PTA-92.

**Drug policy becomes tougher**

Separation mandatory for first-time abusers

Support Marines: PTA-92’s ‘backbone’

By Capt. Paul Schneider

POHAKULGA TRAINING AREA, Hawaii — With the ground set to roll the next phase of training for the Marine Corps’ Combat Engineers begins.

Task Force 3rd Combat Engineer Battalion is being tested to prove their worth during the PTA-92 Combat Engineer Support Exercise. The force has been busy making sure those units had only training to conduct this exercise.

The attachment provided additional support to the entire PTA force for supplies, medical and dental support, fuel, ammunition, personnel transport, maintenance and engineering.

In addition to the support of the task force, CSIB also did some improvements during this exercise.

"We did several range projects and also general and redeployed a few roads," explained Capt. Martin Bemis, commanding officer, CSIB-92. "The engineers also developed new embankment points and built fuel sites.

And maintenance support of the task force and support to PTA-92, CSIB Marines found time to practice their infantry skills in the form of close-quarter security.

During the combat readiness training, Marine Medium Helicopter Squadron 263 and 3rd Battalion, 3d Marine Regiment, the CSIB Marines and an attached combat engineer element built embankments and other structures from their while made full utilization in a manner that best suited their needs.

"I think everybody gave it a shot," Bemis said. "We were all involved in a single times, but everyone did well.

Right from the time the deployment started at PTA-92, the engineers have been derailing by hitting the mark and getting ready for the next. And in the past significant new item defined this time around was the landing area for MLA.

"The sensors really liked that," Bemis said. "We don’t have to build or have to have it all done to have a target for their radars.

The better books by chemical warfare, rather than just to age, and can even be slipped into a pocket during training.

The transport time for CSIB is the last rank of other units. For some, the landing support team set up a base near supply area to support the 1/3 company, while the Marine Corps Combat Engineer Battalion set up a support supply area for CSIB 3-92 during their Marine Corps Combat Engineer training.

Marines spent time giving range support to their fellow soldiers. In this way, they helped the infantry work.

"It helps maintain the fighting force and getting ready for the future," Bemis said.

"This is a good preparation for the engineers to build more units to train more units, but I liked the partnership to the better because we were not looking for them rather than adopting in one area.

The deployment also made the Engineers a part of the Engineers Light Brigade who has the job of the Engineers Light Brigade, making up the train, and getting ready with their own supplies.

A few others touch on the continued SS36 command post for the first leg back to KMCAS/television Bay.

Battalion conducts demolition training, 'sweep and clean' tactics

By Lt. Thomas Brown, 3d CEB

"The old Army sergeant in 'Full Metal Jacket' said to Easy Company, 3d CEB: I like things rough."

"He must have been a combat engineer. Between the Marines from Company A, 3d Combat Engineer Battalion, and the folks who like to blow things up, it doesn’t seem to be much different," stated the 3d CEB Sergeant Major.

"Our engineers are handier and no longer needed, is far gone for the CEB Marines and their version of explosive destruction.

Recently, the Pohakulga Training Area was the latest setting for the engineers to practice their skills. "They don’t get the idea, though, what the engineers simply want at PTA for a month, existing by things small and existing here in the ground. They made their way on foot to the Big Island.

The complete unit training package will be used in PTA-92 training. In addition to conducting their own demolition training, the engineers improved several areas of training. Experiential Brigade units on demolitions, for example, the unit training was limited to "This is how to engage a block of C4 explosive." For others, like Company A, engineers have brought a new way to train the Marines of the Engineers Light Brigade. In an old Army-based course called "House Toes," the engineers staged an extensive overnight attack on a site. Known as Military Operations on Urban Terrain, the exercise used the "deep" tactics to urban environments. Room by room and house-by-house the engineers got a taste of urban combat.

It should also be noted that the engineers are rapidly adapting to building as they do at demolition. To prove this point, 3d CEB built a wooden conference center on Kona during their stay. It will be used in future deployments by Marine and Army soldiers alike.

Combat engineers, in the role of a rear area combat Marine - themselves and their fellow 1st MEU survivors.

"When Combat engineers aren’t in a fighting hole or something, they are on the road making sure every mile leads enough water."

The deployment also made the Engineers a part of the Engineers Light Brigade who has the job of the Engineers Light Brigade, making up the train, and getting ready with their own supplies.

Faulty boots may be returned

Defect found in jungle boots

Joint Public Affairs Office

A defect has been found in many of the black jungle boots now being issued to military personnel.

The Defense Personnel Support Center, Philadelphia, began an investigation after receiving complaints from soldiers across the country about the quality of the boots. The investigation revealed that many of the boots have faulty seams at the rear of the ankle, resulting in the possibility of injury. If you notice any defects in your boots, they should be returned immediately.

"If there's a pull in the seam at the back of the boot, we'll take it back," said Armor Telephone. "If there's any other defect, you should return the boots immediately."

Defects were found in approximately 20% of the boots issued to the military.

A large number of complaints have already been received. If you have received faulty boots, you should return them immediately.

New dinner-theater opens with 1960s musical

Hawaii Theatre Guild and the Hawaii Jewish Community Service teamed up to produce the play that was once called "Mother's Day" and now quoted the words of Robert Altman's film, "A Wedding." The theater guild's goal was to make the play more accessible to the public, and they succeeded in recreating the atmosphere of the 1960s. The show opens at the Joint Public Affairs Office, and tickets are available.

Big Island exercise ends

The end of 1991 brings the end of a special military operation in Hawaii. The exercise, called "Operation Island Life," was designed to test the ability of the U.S. military to respond to a potential invasion of the island. The exercise involved working with local law enforcement agencies and the Hawaii National Guard. The exercise is expected to continue into 1992.

Kuwaiti government buys F/A-18s

McDonnell Douglas

ST. LOUIS — McDonnell Douglas Corp. ended a lengthy negotiations Oct. 8 at its St. Louis plant for the final of 60 F/A-18E/F multifunctional strike fighters ordered by the United States. John P. Cafferty, president of McDonnell Aircraft Co., a division of McDonnell Douglas, officially presented the two F/A-18's, which have Kuwaiti Air Force markings, to the Department of Defense. Also present to receive the aircraft was a delegation who were the Kuwaiti Shaybani Khalid Hakeem, Kuwait's ambassador to the United States, and Faisal Al-Sabah, Kuwait's under secretary of defense.

Cafferty said that the first Kuwaiti Air Force F/A-18 is unique in that it is the first production F/A-18 to be delivered to a foreign customer, and that it is the first Kuwaiti Air Force aircraft to fly, in fact, without an American in the cockpit. The second aircraft will be delivered to Kuwaiti Defense.

The EPEs, powered by two General Electric F404-GE-402 Enhanced Performance Engines, will generate a combined thrust of 28,600 pounds. The first of the two EPEs to fly was proposed by the United States Navy to have the freshest, most environmentally friendly engines available. McDonnell Douglas will deliver the two F/A-18's to Kuwait's Air Force in 1990.

The F/A-18 will become the standard power plant for the Navy, Navy and Marine Corps. The F/A-18 will provide the United States Air Force with an expanded family of single-seat fighter aircraft.

The F/A-18 is a product of thePosX(plus)Joint Strike Fighter Program (JSF). The F/A-18 is a joint effort between the United States and France. Grounds for the F/A-18 project were laid in 1976 by a joint U.S.- French agreement.

The F/A-18 is an advanced aircraft designed for carrier and land-based operations. The F/A-18 integrates highly reliable and maintainable engines, maritime-air mission avionics, advanced aircraft systems, mature and low-altitude supersonic, and, as replacements for the electronic warfare packages, threat.

Alcohol-related incidents

• A man was apprehended by a Manawah Police Depart- ment officer for driving under the influence. After he was determined to be under the influence, he was arrested and his vehicle was impounded. The driver was released after the state’s implied consent law was invoked and he refused to submit to a breath test, which stopped the man’s content level in the .18 range.

• Military Police apprehended a suspect and charged him with driving under the influence. The suspect failed the Niagara Breathalyzer test and was charged with driving under the influence. After the incident, his blood alcohol level was .18, which is a 170 percent increase from the legal limit.

• EPD apprehended a Mar- ine for DUI after he failed to stop at a stop sign and ran a red light. The suspect is charged with driving under the influence. He was also charged with evading police and reckless driving. A blood test showed the defendant’s blood alcohol level was 0.18 percent.

• EPD said a Marine that was stopped on Kamehameha Highway on Saturday was found to be under the influence of alcohol. The suspect was charged with driving under the influence and was taken to Barnes Hospital for a blood test. The suspect was released and will be arraigned on August 28.

Courts Martial

• LCP, 25, of Kailua, was found guilty of vehicular homicide after he failed a chemical test. He was sentenced to 18 years in prison and was ordered to pay $200,000 in fines.

• A Marine was sentenced to 18 months in prison after he was found guilty of driving under the influence of alcohol. He was also sentenced to 30 days in jail and ordered to pay $200,000 in fines.

• Spotlight on living blues: Johnny Shines, Robert Lowery, Terry Garland and more

Robert Johnson, dead for more than 67 years, remains the most in- fluential and best selling blues artist in modern music. His The Delta Blues remain, without argument, the most beloved and revered album in history, and is regarded as an avoca- dor of all American music. His influ- ence lives on through the music of Johnny Shines, the leader of the Nighthawks, who is known as one of the greatest bluesmen.

Shines was a huge influence, both personally and musically, for Johnny Shines, the leader of the Nighthawks. Shines and Pryor romp through the African-influenced blues of the early ‘60s, highlighting trips, soul and respect for each other.

Blues Comes to Texas.” Garland treats the most of the tracks Shines has been heard. Shines, who was both a harpist and a singer, is known for his use of the harmonica and his ability to play the guitar. His music is a fusion of blues and country, with an emphasis on the blues.

The Danger Zone

In Tennessee native Terry Saydak, Mighty Joe Young band, which includes T-Bone Smith’s boisterous baritone guitar, Shines and Pryor romp through the African-influenced blues of the early ‘60s, highlighting trips, soul and respect for each other.

Marines beautify Mokapu School

Adopt-a-School program comes home

Aloha United Way

With your help, there's hope.

When the 1st Marine Expeditionary Brigade Adopt-a-School program started, MEB units began sending out detachments to help schools in various programs. But in the dismay of some parents and teachers at the School's Mokapu Elementary School, it seemed they were forgotten.

Enter flag officer John Newborn, and his Marines of Headquarters Company, M Marine Expeditionary Force.

Newborn and a team of 41 of the Marines, along with a group of about 30 Navy Seabees and volunteers, parent and students of Mokapu, recently worked on improving the school facilities that were badly needed in the school.

"They were here by 7:00 in the morning and a few hours later they had all the playground area completed," said Kelly Klein, Mokapu parent and volunteer. Klein said they also completed some tasks on the basketball court, the polo field and the cafeteria.

Other work completed by the group that day included painting the hall and setting benches in concrete.

"This is just part of taking care of our community," Newborn said. "This is the first big project we've been involved with, but we hope this becomes the first of many more projects in the future with the maintenance of the school."

"I've been doing maintenance work quietly because that's where I'm usually needed," Petty Officer Big Eagle said. "But I like working with the kids because there is a sense of happiness, of freedom, of life where you get to work with them. Big Eagle hopes to become a school teacher someday because he said the kids make him feel like a kid himself and "they're our future."

Klein said about 330 children attend Mokapu Elementary, which prepared the school to receive a $140,000 grant. Big Eagle said a few kids went in the other day down the street from where they live. According to Newborn, he had no problem getting volunteers for the job and probably won't have any trouble getting them to return for future projects.

"I've been here five years and this is the first time anything like this has been done at Mokapu," Klein said. "This is the first time we've had the Marines come out and get it done in a hurry."

We're so excited that we're finally testing out the modified LAV until the end of November.

Welcome to Castle's New Era.

Come To An Open House Celebrating Our
$10 Million Renovation.

SUNDAY, NOVEMBER 3, 1 TO 4 P.M.

To Meet Your Needs

UPCOMING EVENTS

We're excited about our expansion that we've planned activities and entertainment so the whole community can join in celebrating.

E Komo Mai No Ka Hale.
Wear uniforms proudly...and correctly

Military Police Department, MCA
Kaneohe Bay

"To the proud, the Marines" is a motto that is emblazoned on the Marine uniforms. We should all wear our uniforms with the pride we feel upon graduation from recruit training.

Uniforms are:

- Military uniform.
- Heavy utility coat.
- Camouflage duty coat.
- Maroon service coat.
- Maroon rank insignia.
- Walk signals.
- Marine uniform.
- Marine drill.

Wearing the uniform in the proper manner is something that is instilled in us by our drillmasters. Everyone is wearing the uniform, in a manner which doesn't meet with the regulations we are all familiar with.

Here are some restrictions about those regulations:

- When riding in a vehicle, we must wear our uniforms.
- We always wear the correct uniform, and it is a part of the uniform in utility coexistence, unless authorized for removal.
- Even as we head out the gate on our way home, we must wear our uniform items.
- Male Marines are not permitted to wear earrings.
- If you have questions regarding proper uniforms, wear, etc., you must be wearing proper regulations or seek guidance from superiors.

Grand Opening!

Military Farms
LAX $1.50 off any size
DFW $1.25 off any size
BOS $2.50 off any size
NYC $1.50 off any size
MCO $1.25 off any size

Financing may not be best route

By Capt. R.W. Kincaide

A-12 HAWAII MARINE

October 31, 1991

How much will it really cost?

The Federal Trade Commission has recently attempted to improve the way that car buyers are informed about the costs of financing their cars. Unfortunately, they frequently mislead prospective buyers by not informing them of the true costs of financing. A new policy will help Marine families.

Drug policy toughened

Drug Abuse A-1

But there are drugs, and only by a small minority which are only tested for in special cases, Gray said.

The new rules will not affect the Marine Corps' drug testing "if you can pass" program, according to the chief lawyer of the drug case.

"Marines who have a history of using drugs will continue to be tested for drugs," Gray said. "If you are a drug user, you will be caught." Gray added that more programs are needed because of the "aggressive drug problem in the Marine Corps.""Drug users, we are going to catch you," Gray said. "If you have a problem, you're going to get caught." Gray said that some drug users are "bribing" drug users to pass the test, and that this is why the new policy will help Marine families.

Intramural football championship
Rude Boyz edge by Razorbacks

By Cpl. Randy Smith

In big football, where the kickoff game usually only captures my attention, the intramural championship was marked by a field goal as the VBNB-FM Rude Boyz defeated the Mal-24 Razorbacks, 10-7.

Down 10-7 late in the fourth quarter, and with only 1:40 remaining, the Razorbacks were looking for their first win in the 10-7 perfect 10-season and second conference game this season. While the Rude Boyz field goal actually went in, it was in the 36-yard line after a 15-yard foul. The play went 201-41 and was called for a 15-yard foul. Taggart, running from the front of the St. John's quarterback Don Poulson's trap, tipped it in the corner and made a successful field goal to win the game.

"This is always going to be the right place at the right time," said 11th Squadron's (RBC) ChuckPhillips, who kicked the past three seasons in a row and didn't practice. "I wanted to at least make it go." The Rude Boyz won, 10-7.

On the first play following the interception, "The Stilettos" quarter back John Hendrickson passed a pass to the end zone for a touchdown, that point was good and the Rude Boyz won, 10-7.

"I've felt all season that Apens' kicking gave us a definite edge," said Phillips, "and we've made a big point in the first half, but I still don't know how this win is. Apens is capable of kicking non field goals.

As Apens didn't feel the tremendous amount of pressure to try to win with a non field goal kick, he went with the plan he said. The Razorbacks are the only team to score in the conference and are the only team to make a field goal in the conference.

The disappointment was greatly visible on the faces of the players, Coach Elmore, and Coach Steve Kuba, the Razorbacks assistant coaches.

"We won't be back for the All-Marine tournament, and we're not going to be back for the regular season tournament," said Elmore.

The regular season tournament doesn't come around until March, 1986, and the Razorbacks will be in the regular season tournament. The regular season tournament will come around until March, 1986. The normal season tournament will come around until March, 1986.

The Razorbacks faced the Mal-24 on Saturday, November 10, and with a 2-6-0-1 record, the Razorbacks were defeated by the Mal-24, losing 2-6-0-1.

Rude Boyz 10, Mal-24 7

On the first play following the interception, "They're already in the position that was right," said 11th Squadron's (RBC) ChuckPhillips, who kicked the past three seasons in a row and didn't practice. "I wanted to at least make it go." The Rude Boyz won, 10-7.

"I've felt all season that Apens' kicking gave us a definite edge," said Phillips, "and we've made a big point in the first half, but I still don't know how this win is. Apens is capable of kicking non field goals.

As Apens didn't feel the tremendous amount of pressure to try to win with a non field goal kick, he went with the plan he said. The Razorbacks are the only team to score in the conference and are the only team to make a field goal in the conference.

The disappointment was greatly visible on the faces of the players, Coach Elmore, and Coach Steve Kuba, the Razorbacks assistant coaches.

"We won't be back for the All-Marine tournament, and we're not going to be back for the regular season tournament," said Elmore.

The regular season tournament doesn't come around until March, 1986, and the Razorbacks will be in the regular season tournament. The regular season tournament will come around until March, 1986. The normal season tournament will come around until March, 1986.

The Razorbacks faced the Mal-24 on Saturday, November 10, and with a 2-6-0-1 record, the Razorbacks were defeated by the Mal-24, losing 2-6-0-1.

Rude Boyz 10, Mal-24 7

It's tempting to believe in ghosts, poltergeists, and titles and ghost stories, but I've seen enough to know that they've already done it.

Then again, who's to say that the entire town doesn't not exist at all? And even if it did, could it be any global problem? They're not that far away.

There's a problem with this, though. The fact is, we don't know anything about this town, but a town that no one has ever heard of or seen. It's still the same old tale. The whole town has its own unique style, and Halloween occurs from ancient beliefs. Regardless, it's often night until the next day, the couple of hours of darkness can never be overriden. They're not that far away.

It would take months, maybe years of planning, research, and local law enforcement to figure it out. It would be impossible to see anything in the dark. Thank you. It would make things the Rude Boyz get their hack in to threatened
deadman's party of perverting proportions?

Commentary by Cpl. James Finkenauer

"It's tempting to believe in ghosts, poltergeists, and titles and ghost stories, but I've seen enough to know that they've already done it.

Bowling center offers new improvements

By Col. Peter Smith

Air Force bowling centers are a little more than a month away from recruiting the handicapping system, the bowing center has had its grand opening.

In addition to new players, the center has a 12-lane bowling facility. Staff includes Bart Stoltz, a bowling pro and former Air Force officer; SgtMaj. Robert Menne, a bowling facility manager; and Capt. David Mallen, station support manager.

The center will be open to all, including dependents of military personnel. The center will be open from 10 a.m. to 10 p.m. daily.

The center will be open to all, including dependents of military personnel. The center will be open from 10 a.m. to 10 p.m. daily.

The center will be open to all, including dependents of military personnel. The center will be open from 10 a.m. to 10 p.m. daily.

Sports

Marine Corps

Birthday 10k Run

The Navy Reserve Hawaii Marine Corps Birthday 10k Run is scheduled for Nov. 30 at 9 a.m. The event begins at the Marine Corps Station in Honolulu. For more information about the run, call 254-5615.

Boxing smoker

A boxing smoker will be held Nov. 15, 9 a.m. at the Air Station's athletic center. All active duty members stationed in Hawaii Marine Corps and their families are encouraged to attend. The event is free. For more information, call 254-5615.

Morning aerobics class

A morning aerobics class is offered Monday through Thursday, 7 a.m. to 8 a.m. The class is open to all active duty members stationed in Hawaii Marine Corps and their families. For more information, call 254-5615.

Scuba Locker

The Scuba Locker has been updated to a Professional Association of Diving Instructors' training center and offers several new lessons. The lessons include basic scuba diving, advanced scuba diving, and rescue diving. The lessons are available to all active duty members stationed in Hawaii Marine Corps and their families. For more information, call 254-5615.

Fitness center

The Air Station's Fitness Center will be open extended hours during the holiday season. The extended hours are 6 a.m. to 9 p.m. on Sundays and holidays.

Little League season

The Little League season is set to begin. Registrations for this year's Pearl Harbor Little League will be held Nov. 10 and 11, 9 a.m. to 5 p.m. at the registration center at Pearl Harbor Memorial Field. The league is open to all military children ages 8-15. Adult volunteers are also needed to manage, assist, and organize. For more information about volunteering, contact Captain, call 254-5615.

The center will be open to all, including dependents of military personnel. The center will be open from 10 a.m. to 10 p.m. daily.
Stress management
Two stress management workshops will be held in November. The first will be held Nov. 18, 6-9 p.m., and will focus on techniques to handle stress effectively. "Managing Stress of Work vs. Home" will be held Nov. 28, 9:30-2 p.m., and will emphasize the identification and resolution of stressors. Both workshops are sponsored by the Visual Support Center and the Air Station's Family Service Center at 257-3003 to reserve spaces for one or both classes.

Buying a home
The next workshop in this series will be held in December. For more information, contact the Civil Service at 307-2600.

Employment programs
A free resume writing workshop will be held Wednesday, Nov. 15, 9:30-11:30 a.m., "How to Get Into Civil Service" will take place Nov. 26, 6:30-8:30 p.m., in the Training and Audio-Visual Support Center classroom.

"How to Take the Civil Service General Exam" will be held Nov. 22, 7-9 p.m. For reservations, call the Air Station's Family Service Center at 257-3003.

Transition assistance program
A new educational program for military transition candidates is now available. Consult your transition counselor to be notified of upcoming workshops at the Visual Support Center or the Air Station's Family Service Center on Nov. 12 at 10 a.m. to register.

Home treatments for common cold
Learn to treat common colds at home through a two-hour class. "How to Feel as if You've Never Needed to See a Doctor" will be held Nov. 16 at 11:30 a.m. For reservations, call 257-8071 or Maj. Bunn, 486-1577.

Job-hunting assistance
A computerized listing of daily jobs is available. Call the Family Services Center at 257-3003 for an appointment with a counselor.

Scholarships for spouses
The Air, Sea, and Land Oceans Off-duty Service Members (OSM) have available scholarships for military transition candidates. Information sessions, to be held at 257-3003 on Nov. 12, from 1-4 p.m. For reservations, call the Air Station's Family Service Center at 257-3003.

Drivers education
Behind-the-wheel driver education is available at the Civil Service at 257-3003.

Cherishing our differences
A class geared toward raising self-awareness and understanding of others with whom we have different backgrounds, values, and opinions is available in November. Call 257-3003 for more information.

NCOA
The U.S. Army Academy at West Point's annual symposium offers 30 fields of study. Interested candidates must enroll for the Fall semester at 257-6101 or Mrs. Ward, 673-2335.

Success
For more information on the NCOA, contact your NCOA Counselor, you will be contacted by the United States Military Academy, West Point, New York.

Our Success Can be your Opportunity
The Non Commissioned Officers Association (NCOA) has immediate openings for NCOA Accredited Counsellors in your area. As an NCOA Counsellor, you will be a licensed insurance agent, offering products written by Academy Life Insurance Company and Pension Life Insurance Company, America, NCOA's endorsed life insurance providers.

This demand has been created by the successful introduction of the Military Service Benefits, a revolutionary new life insurance feature now available through Academy Life and Pension Life. This new benefit pays 100% of the policy face amount should the insured die in a war or act of war.

Along with several other military-specific features unique to NCOA-endorsed Career Option Plan, this new benefit creates a highly competitive product that can virtually sell itself to the informed military servicemember.

If you would like the opportunity to spread the good news about this exciting new product as well as the other outstanding benefits offered by the Association, contact your local NCOA Service Center at 496-10-10 or call toll-free 1-800-662-2620.

Academy Life Insurance
Pension

Recently, the Academy Life Insurance Company joined the American Association of Retired Persons (AARP) as a corporate member, making Academy Life Insurance Company the first and only life insurance company to endorse AARP. This endorsement is a result of the AARP's commitment to the good of America's active and retired citizens.
Join us in celebrating the debut of your
