NOTE TO AMERICAN EDITION.

This edition comprises the whole of the 13th English edition of Haydn's valuable compilation, edited by Mr. B. Vincent of the British Museum, and imported in its original shape,—with the addition of a Supplement relating chiefly to American affairs, and giving dates of recent events in Europe and the East. To this is added a Biographical Index, which will probably be found sufficiently copious and convenient for ordinary reference.

Mr. Vincent's edition of Haydn is wonderful for its comprehensiveness and accuracy, even on American topics; and this is a gratifying surprise to those who have had occasion to refer to other English works which have attempted to give American statistics. But the paragraphs which have been added in the American Supplement will be found in some cases to be essential to the usefulness of the volume as a book of reference in this country. Absolute completeness in such a work is, of course, unattainable. The difficulty of obtaining accurately the details and dates of recent occurrences can only be appreciated by actual trial. But the reader will find in these pages all that can be reasonably expected in a single volume so compact and portable as this.

PREFACE
TO
THE THIRTEENTH EDITION.

THIS Volume is once more presented to the Public, with gratitude for its long-continued favourable reception ; the frequency of New Editions having increased, although larger numbers of each have been printed.

Since 1855, when my connection with the book began by the superintendence of the printing of the Seventh Edition, my constant aim has been its thorough renovation ; and this has been effected at the cost of very much time and thought, by careful revision and selection from the abundance of invaluable materials at my disposal. The great difficulty, indeed, has been to keep the book within convenient dimensions : its enlargement by the insertion of matters of merely local and temporary interest, and of commonplace remarks upon the events recorded, would have been a far easier task. Among the new features are the Chronological Tables at the beginning of the work, the dated Index, and many biographical, geographical, and scientific facts inserted wherever they seemed requisite. To afford room for the new matter, the size of the page and the bulk of the book have been enlarged, and very many articles have been condensed.

Encouraged by success, I hope still to maintain the reputation which this work has attained, by daily watching and recording in its pages the progress of events, and sedulously endeavouring to make it, not a mere Dictionary of Dates, but a dated Cyclopædia, a digested summary of every department of human history, brought down to the eve of publication. I have endeavoured to act under the influence of the old maxims : “*Homo sum ; humani nihil a me alienum puto,*” and “*Nulla dies sine linea.*”

PREFACE TO THE FIRST EDITION.

THE design of the Author has been to attempt the compression of the greatest body of general information that has ever appeared in a single volume, and to produce a Book of Reference whose extensive usefulness may render its possession material to every individual—in the same manner that a London *Directory* is indispensable, on business affairs, to a London merchant.

He grounds his hope of the Public taking an interest in this work altogether upon its own intrinsic utility. Its articles are drawn principally from historians of the first rank, and the most authentic annalists; and the *DICTIONARY OF DATES* will, in almost every instance, save its possessor the trouble of turning over voluminous authors to refresh his memory, or to ascertain the date, order, and features of any particular occurrence.

The volume contains upwards of *FIFTEEN THOUSAND ARTICLES*, alphabetically arranged;* and, from the selection of its materials, it must be important to every man in the British Empire, whether learned or unlearned, or whether connected with the professions or engaged in trade.

It would be difficult to name all the authors from whose works the Compiler of this volume has copiously extracted; but he may mention among the classics, Herodotus, Livy, Pliny, and Plutarch. He has chosen, in general chronology, Petavius, Usher, Blair, Prideaux, and the Abbé Lenglet Dufresnoy. For the events embraced in foreign history, he has relied upon Hénault, Voltaire, La Combe, Rollin, Melchior Adam, the *Nouveau Dictionnaire*, and chief authors of their respective countries. On subjects of general literature, his authorities are Cave's *Historia Literaria*, Moreri, Bayle, Priestley, and others of equal repute. And English occurrences are drawn from Camden, Stow, Hall, Baker, Holinshed, Chamberlayne, Rapin, Hume, Gibbon, Goldsmith, &c. Besides

* Mr. Haydn evidently meant fifteen thousand articles placed under alphabetical headings, not fifteen thousand headings, and this was a correct statement as far as regards the *First Edition*.

these, the Compiler has freely used the various abridgments that have brought facts and dates more prominently forward ; and he is largely indebted to Chambers, Aspin, Beatson, Anderson, Beckmann, the *Cyclopædias*, *Annual Register*, *Statutes at Large*, and numerous other compilations. In almost every instance the authority is quoted for the extract made and date assigned, though inadvertence may have prevented, in some few cases, a due acknowledgment.

The leading events of every country, whether ancient or modern kingdoms, are to be found in the annals of each respectively, as in the cases, for instance, of GREECE, ROME, the EASTERN EMPIRE, ENGLAND, FRANCE, and GERMANY. But, independently of this plan of reference, when any historical occurrence claims, from its importance, more specific mention, it is made in a separate article, according to alphabetical arrangement. Thus, in the annals of England, the dates are given of the foundation of our universities, the institution of honorary orders, and signature of *Magna Charta* ; we find, in those annals, the periods of our civil wars, and remarkable eras in our history, set down as they have occurred ; but if more ample information be necessary to the Reader, and if he desire to know more than the mere date of any fact or incident, the particulars are supplied under a distinct head. In the same way, the pages of *Battles* supply the date of each, in the order of time ; yet in all instances where the battle has any relation to our own country, or is memorable or momentous, the chief features of it are stated in another part of the volume.

The Compiler persuades himself that the DICTIONARY OF DATES will be received as a useful companion to all Biographical works, relating, as it does, to *things* as those do to *persons*, and affording information not included in the range or design of such publications.

LONDON, *May*, 1841.

BALLOT (p. 72). A ballot-box was used in the election of aldermen of London in 1526. Its use by the company of merchant adventurers, in electing an agent, was prohibited by Charles I. 17 Dec. 1637. A test-ballot was adopted at Manchester, and Ernest Jones was thus chosen as a candidate for representing the city in parliament, 22, 23 Jan. 1869. He died the next day. Mr. E. Leatham introduced a ballot bill into parliament, March, 1870, and Mr. Gladstone spoke in favour of the ballot, 27 July, 1870. The bill was withdrawn. The ballot was employed in electing the London school board in 9 districts, 29 Nov. 1870.

BAZEILLES a village in the Ardennes, N.E. France. During the dreadful battle of Sedan, 1 Sept., 1870, Bazeilles was burnt by the Bavarians, and atrocious outrages committed. Of nearly 2000 inhabitants scarcely fifty remained alive, and these indignantly denied having given provocation. It appears that an old woman, whose husband and sons had been killed, had fired upon and killed two Bavarians. Much controversy ensued, but the above statements are generally considered authentic.

BAZOCHE-DES-HAUTES, near Orleans, central France. Here a part of the army of the Loire, under gen. D'Aurelle de Paladines, were defeated after a severe action, by the Germans under the grand-duke of Mecklenburg, 2 Dec. 1870. See *Orleans*.

BEAUMONT, a village near Sedan, department of Ardennes, N.E. France. Near here a part of the army of marshal MacMahon under De Failly, which, after vainly endeavouring to

reach Metz, was retreating before the Germans under the crown prince of Prussia, was surprised, defeated, and driven across the Meuse at Mouzon, 30 Aug. 1870. The French loss included about 7000 prisoners, many guns, and much camp equipage. The victory was chiefly gained by the Bavarians.

BEAUNE-LA-ROLLANDE, a village in the Loiret, France. Here the French army of the Loire, under General D'Aurelle de Paladines, was defeated by the Germans, under prince Frederick Charles, in an attempt to march in the direction of Fontainebleau to relieve Paris, 28 Nov. 1870. The French loss was reported by the Germans to be 1000 dead, 4000 wounded; above 1700 prisoners. Their own loss was heavy.

		The Episcopal church was thus reduced to the condition of a Non-conformist body, at first barely tolerated.	

BISHOPS, SUFFRAGAN, to assist metropolitans, existed in the early church. Twenty-six, appointed by Henry VIII. 1534, were abolished by Mary, 1553, and restored by Elizabeth, 1558. The last appointed is said to have been Sterne, bishop of Colchester, 1606. The appointment of suffragan bishops was revived in 1869, and archdeacon Henry Mackenzie, suffragan bishop of Nottingham (diocese of Lincoln) was consecrated 2 Feb 1870, and archdeacon Edward Parry, suffragan bishop of Dover (diocese of Canterbury), 23 March, 1870.

BISHOPS' RESIGNATION FOR INFIRMITY ACT, passed 11 Aug. 1869.

BLACK SEA (p. 106): by the treaty of Paris, 30 March, 1856, it was opened to the commerce of all nations, and interdicted to any ships of war; and the erection of military maritime arsenals forbidden. The article was repudiated by a Russian circular, dated 31 (19) Oct. 1870, and after some correspondence, the meeting of a conference on the subject, in London, was agreed to by all the powers concerned in the treaty.

BOKHARA (p. 111). The Russians were again victors, 25 May, 1868, and occupied Samarcand the next day. Further conquests were made by the Russians, and Samarcand was secured by treaty, Nov. 1868.

BORDEAUX (p. 116). The French delegate government and the representatives of foreign powers, removed here from Tours, 11 Dec. 1870. M. Gambetta remained with the army of the Loire.

CHASSEPOT (p. 164). "The range of the chassepot being 1800 paces, and that of the needle-gun only between 600 and 700, the Germans in all their charges had to traverse 1,200 paces before their arms could be used to purpose." Many Germans were armed with the chassepot after the surrender of the French army at Sedan, 2 Sept. 1870.

CHATEAUDUN, an old city, N. C. France, the residence of the heroic Dunois, who died 1468. Here were massacred 20 July, 1183, about 7000 Brabançons, fanatic mercenaries who had been hired to exterminate the Albigenes by the cardinal Henry, abbot of Clairvaux, in 1181. They had become the scourge of the country, and the "Capuchons" were organised for their destruction. Châteaudun was captured by the Germans after a severe conflict of about nine hours, 18 Oct. 1870. Barricades had been erected in the town, and the Garde Mobile fought bravely. The town was re-occupied by the French, 6 Nov.

CHAUVINISM, a term derived from Chauvin, the principal character in Scribe's "Soldat Laboureur," a veteran soldier of the first empire, filled with intense admiration for Napoleon and for all that belonged to him. Scribe was born 24 Dec. 1794, died 20 Feb. 1861.

FRANCO-PRUSSIAN WAR. The origin of this dreadful series of sanguinary conflicts is ascribed to the jealousy of the emperor of the French of the greatly increased power of Prussia, in consequence of the successful issue of the war with Denmark in 1864, and more especially of that with Austria in 1866. By these events the German Confederation was annulled, and the North German Confederation established under the supremacy of the king of Prussia, whose territories were also enlarged by the annexation of Hanover, Hesse-Cassel, Nassau, Frankfort, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic, unscrupulous, and unconstitutional policy of count Bismarck-Schönhausen, prime minister since Sept. 1862. In March, 1867, a dispute arose through the emperor's proposals for the purchase of Luxemburg of the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; but the affair was eventually settled by a conference of the representatives of the great powers in London, 7-11 May, when the perfect neutrality of Luxemburg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications. On 25 July, 1870, the *Times* published the draft of a treaty between France and Prussia, drawn up in 1866, whereby it appeared that the emperor was willing to enter into an offensive and defensive alliance with the king for making certain territorial changes on the continent for their mutual aggrandizement, such as the annexation of Luxemburg by France, &c.* The authenticity of this document was admitted after some discussion, but count Bismarck asserted that it emanated wholly from the emperor, and had never been entertained by himself. Both governments had prepared for the impending struggle, and the crisis came when prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Roumania), consented to become a

* By this proposed treaty, 1. The emperor recognizes the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxemburg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, except Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive.

candidate for the throne of Spain, about 3 July, 1870. This was violently denounced by the French government. Threatening speeches were made in the French chamber by the duc de Gramont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, the prince, with the consent of his sovereign, declined the proffered crown 12 July. This submission did not satisfy the French government and nation, and the demand for a guarantee against the repetition of such an acceptance irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister, 13 July. Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister, 15 July. War was announced by the emperor 15 July, with the hearty consent of the great majority of the chambers. The left or republican party opposed the war, but M. Thiers and a few others only protested against it as premature. After his surrender on 2 Sept., the emperor told count Bismarck that he did not desire war, but was driven into it by public opinion. He appears to have been greatly deceived as to the numerical strength of his army, and its state of preparation. (For details of the battles see separate articles.)

FRENCH ARMY, about 300,000:—

1st corps, under marshal MacMahon.

2nd corps, under general Frossard.

3rd corps, under marshal Bazaine.

4th corps, under general Ladmirault.

5th corps, under general De Failly.

6th corps, under marshal Canrobert.

Imperial guard, under general Bourbaki.

Commander-in-chief, the emperor; general Le Bœuf, second; succeeded by marshal Bazaine.

PRUSSIAN ARMY, about 640,000:—

1. Northern, under general Vögel von Falckenstein, about 220,000, defending the Elbe, Hanover, &c.

2. Right, under prince Frederick Charles, about 180,000.

3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.

4. The left, under the crown prince of Prussia, about 166,000.

Commander-in-chief, king William; second, general Von Moltke.

The North German army, at the beginning of August, consisted, firstly, of 550,000 line, with 1,200 guns and 53,000 cavalry; secondly, of 187,000 reserve, with 234 guns and 18,000 cavalry; and, thirdly, of 205,000 landwehr, with 10,000 cavalry, making a grand total of 944,000 men, with 1,680 mobilized guns and 193,000 horses.

To these must be added, firstly, the Bavarians, 69,000 line, with 192 guns and 14,800 horses—25,000 reserve with 2,400 horses, and 22,000 landwehr; secondly, the Würtembergers—22,000 line with 54 guns and 6,200 horses, 6,500 reserve, and 6,000 landwehr; and, thirdly, the Badenese—16,000 line with 54 guns, 4,000 reserve, and 9,600 landwehr.

All the German troops taken together as under arms at the present moment reach the enormous figure of 1,124,000 men. Aug. 1870.

Four weeks previously, on the peace footing, they numbered no more than 360,000.

The French and Germans in this war were shown to be equally brave and efficient; but the generals of the former appear to have acted greatly upon impulse. The latter seem to have been invariably guided by a well matured plan, their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Saarbrück to Sedan, Moltke appears to have left nothing to chance; and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: "1, the enormous superiority of the Germans in regard to numbers; 2, the absolute unity of their command and concert of operation; 3, their superior mechanism in equipment and supplies; 4, the superior intelligence, steadiness and discipline of the soldiers; 5, superior education of the officers, and the dash and intelligence of the cavalry."—*Quarterly Review*.

FRANCONIA, or FRANKENLAND (on the Maine), one of the circles of the German empire, formerly part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonised. Its count or duke, Conrad I., was elected king of Germany, 912; Conrad II. was elected emperor 924; and the imperial dignity was held by his family till 1250. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest part was awarded to Bavaria.

GENEVA CONVENTION, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant published his experiences, which induced the *Société Genevoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates, and propositions were drawn up. These were accepted as an international code by a congress which met at Geneva 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilized powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference. The International Society (termed "the Red Cross Society"), established in consequence of these proceedings, was very energetic and effective in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. See *Aid to Sick and Wounded*. Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.—Dec., 1870.

METZ, a fortified city in Lorraine, now in the department of the Moselle, N.E. France. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the 6th century. It was made a free imperial city 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins; was captured by Henry II. 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Wörth and Forbach, on 6 Aug. the whole French army (except the corps of MacMahon, De Faily, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

MINT (p. 488). Professor Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage Act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Mr. T. Fremantle).

MITRAILLEUSE, OR MITRAILLEUR, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Prusso-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness 11 Aug. 1870. It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage."

MOABITES, descendants of Lot, a people living to the south-east of Judæa. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat 895 B.C., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, said to relate to Meshah, king of Moab, referred to in 2 *Kings*, iii., was announced in Jan. 1870, and impressions were exhibited soon after, which caused much discussion among orientalists.

MONITEUR UNIVERSEL, a French newspaper, was established in Paris by C. J. Panckoucke, 24 Nov. 1789; and became the organ of the government in 1799. It was superseded by the *Journal Officiel*, 1 Jan. 1869; but resumed its official position about 23 Sept. 1870.

ORLEANS (p. 536). The princes' demand for permission to return to France, 19 June, was refused by the legislative assembly 2 July, 1870. Their requests to serve in the army after the disastrous defeats and the fall of the empire, 4 Sept., were also declined.—After nine hours' severe fighting, the city of Orleans was captured by the Germans, under general Von der Tann, 11 Oct. 1870. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged. The city was made to pay a war contribution of 60,000*l.* On 9, 10 Nov. following, Von der Tann and the Bavarians were defeated by generals D'Aureille de Paladines and Pallières, and Orleans was re-taken. The Germans acknowledged the loss of about 700 men and 1000 prisoners, chiefly wounded. The French asserted the numbers of both to be higher, and were much cheered with their victory. The French loss was heavy. The chief conflict took place between Coulmiers and Bacon or Bacon. Orleans was again occupied by the Germans at 3 a. m. 5 Dec., after severe conflicts on 2, 3, 4 Dec. at Bazoche and Chevilly, near Orleans, between a part of the army of the Loire and prince Frederick Charles and the grand-duke of Mecklenburg. On 4 Dec. a battle took

place, during which the suburbs were stormed; and about 10,000 unwounded prisoners, 77 guns and 4 gunboats taken. The gallant duc de Luynes was killed, 2 Dec., and Charrette, commander of the Pontifical zouaves, was struck down. The French assert that their army retired in good order.

PORTE, OR SUBLIME PORTE, official name of the court of the sultan of Turkey. Mostaem, the last of the Abbasside caliphs (1243-58) fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. *Bouillet.*

RHINE (Latin, *Rhenus*; German, *Rhein*; French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Marne, Neckar, and other rivers, terminating in many arms in Holland, and falling into the German ocean. On its banks are Constance, Basel, Strasburg, Spire, Mannheim, Cologne, Dusseldorf, Utrecht, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and it has been crossed by the French above twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing it in 1792, and at the close of the war in 1815, France retained the left bank, which she will probably lose in consequence of the war declared 15 July, 1870. A navigation treaty with other powers was signed by France, 17 Oct. 1868.

RITUALISTS (p. 628). At a general convocation of the American episcopal church at Philadelphia, 27, 28 Oct. 1868, after a warm discussion on ritualism, the discussion was adjourned to 1871.

ROAD STEAMERS. Mr. R. W. Thomson, of Edinburgh, in 1868, by adding india-rubber to the tires of the wheels of locomotives is considered to have solved the question of steam traction on common roads. Road-steamers have been successfully employed in Edinburgh and Leith for drawing heavy waggons up inclined planes, and are adaptable to any draught work. They were tried at Woolwich, 1 Oct. 1870, and reported successful by eminent authorities.

ROMAN CATHOLICS. A proposal of the Derby government to endow a catholic university for Ireland, Oct. 1867, failed through the Catholic bishops claiming the entire practical control, 31 March, 1868. Mr. Justice Thomas (now lord) O'Hagan, appointed lord chancellor of Ireland Dec. 1868, is the first Roman Catholic who has held that office since the revolution of 1688-9.

SAARBRÜCK, the Roman *Augusti Muri* or *Saræ pons*, an open town on the left bank of the Saar, in Rhenish Prussia, founded in the tenth century, long subject to the bishops of Metz, afterwards ruled by counts (about 1237), and by the house of Nassau about 1380. It was captured by the French and retaken by the Germans 1676, reunited to France 1794-1814, and ceded to Prussia 1815. On 2 Aug. 1870, it was bombarded by the French under Frossard (between 11 and 1 in the daytime), and the Prussians in small force were dislodged, and the town occupied by the French general Bataille. The mitrailleuses were said to be very effective. The emperor Napoleon, who was present with his son, said in a telegram to the empress, "Louis has gone through his baptism of fire. He has not been in the least startled. We stood in the foremost rank, and the rifle balls were dropping at our feet, and Louis picked up one that fell near him. His bearing was such as to draw tears from the soldiers' eyes." On the 6 Aug. the Prussian generals Gœben and Von Steinmetz, with the first army, recaptured Saarbrück, after a sanguinary conflict at the village of Spicheren. The heights taken by the French on the 2nd are in Germany, those taken by the Germans on the 6th are in France, and both battles were fought between Saarbrück and the town of Forbach, which was captured and has given a name to the second conflict. The loss was great on both sides. The French general François was killed, and the 2nd corps under Frossard nearly destroyed. The French retreated to Metz. They were greatly superior in numbers at the beginning of the fight, but were badly commanded.

SEA-BIRDS PRESERVATION ACT, passed 24 June, 1869.

SEDAN (p. 662), a fortified city in the valley of the Meuse, N.E. France. Around this place a series of desperate conflicts on 29, 30, and 31 Aug. between the French army of the north, under Marshal MacMahon (about 150,000 men), and the greater part of the three German armies under the king and crown-prince of Prussia and the crown-prince of Saxony, (about 250,000 men), was brought to a close on 1 Sept. The battle began with attacks on the French right and left about 5 a.m., and was very severe at 2 p.m. At 4 p.m. the Germans remained masters of the field, and the crown-prince of Prussia announced a complete victory, the chief part of the French army retreating into Sedan. The emperor Napoleon was present during the battle, and, it is said, stood at Iges, near Sedan, exposed for four hours to the German grenades. The impossibility of further resistance was then evident. The Germans had contracted their circle close round Sedan; their formidable artillery held all the heights, from which they could at pleasure wholly destroy the town and the army, and only 2000 men were in a condition to respond to their commander's call, and to make a supreme effort to break through the enemy with the emperor and escape to Montmédy. At first general De Wimpffen (called to the command when MacMahon was wounded,) indignantly rejected the terms offered by the victor, and the emperor had a fruitless interview with count Bismarck to endeavour to mitigate them. On 2 Sept. the emperor wrote in autograph to the king of Prussia, "Mon frère, n'ayant pu mourir à la tête de mes troupes, je dépose mon épée au pied de votre majesté. NAPOLEON." A capitulation of Sedan and the whole army therein was signed by generals von Moltke and De Wimpffen at the château of Bellevue, near Frenois, at 11.30 a.m., and at 2 p.m. an interview took place between the king and the emperor, who was downcast but dignified. The conflict was principally carried on by the artillery, in which (according to the emperor) the Germans had the advantage, not only in number (600 to 500), but also in weight, range, and precision. The carnage was awful, and the field the next day was a mass of shattered bones, torn flesh, and coloured rags. About 25,000 French prisoners were taken in the battle, and 83,000 surrendered the next day, together with 70 mitrailleuses, 400 field-pieces, and 150 fortress guns. About 14,000 French wounded were found lying in the neighbourhood, and about 3000 escaped into Belgium and laid down their arms. The great army of the north had ceased to exist. Among the killed was lieut. col. Pemberton, a correspondent of the *Times*, who had approached too near the conflict. The French emperor and his suite arrived at Wilhelmshöhe, a castle near Cassel appointed for his residence, (formerly inhabited by his uncle Jerome, when king of Westphalia), in the evening of 5 Sept. —On 1 Sept. the village of Bazailles was stormed by the Bavarians and burnt, it was said, because the inhabitants fired on the ambulances; many women and children perished. The French denied the provocation. The place had been previously twice bombarded and stormed by the maddened combatants.

SEEDS. An act was passed to prevent the adulteration of seeds (a common practice), 11 Aug. 1869.

SILKWORM DISEASE. In 1853 the annual produce of sericulture in South France was estimated at about 4,680,000*l.* Soon after a disease broke out in the worms, which reduced the value of the silk crop to about one-third that amount. In 1858 a commission was appointed to inquire into the nature of the disease, then termed *pébrine*; and M. Quatrefages, in 1869, proved that it is hereditary, contagious, and infectious. M. Filippi discovered in the blood of the diseased worms a multitude of cylindrical corpuscles, since named *panhisto-phyton*, which Pasteur, who took up the study in 1865, has demonstrated to be parasitical, and the cause of the disease. He has since devised a way by which the organic germs may be got rid of, and the disease extirpated.

STRASBURG (p. 702). The cathedral, an epitome of Gothic art, was founded by Clovis, and reconstructed by Pepin and Charlemagne. After destruction by lightning 1007, it was principally rebuilt by Erwin de Steinbach and his son in the 14th century. The lofty tower was completed in 1439. The celebrated astronomical clock, after a long stoppage, was repaired by M. Schwilgué, and inaugurated 1 Jan. 1843. Strasburg was invested by the Germans, principally from Baden, during the Franco-Prussian war, 10 Aug. 1870. Gen. Von Werder assumed the command of the besiegers, and the bombardment began 14 Aug. and a vigorous sally was repulsed 16 Aug. Gen. Urich, the commander, declared that he would not surrender except upon a heap of ashes. After a heroic resistance, and when a breach had been made and an assault was impending, notice was given, 27 Sept. and the place surrendered at 2 A.M. 28 Sept.; at 8 A.M. 17,150 men and 400 officers laid down their arms. The German loss was said to be 906 men, of whom 43 were officers. The Germans entered Strasburg 30 Sept., the anniversary of its surrender to the French in 1681 by a surprise. Urich received the grand cross of the legion of honour, Oct. 1870. The invaluable library was destroyed and the cathedral much injured. About 400 houses were destroyed, and 8000 persons rendered homeless.

THIONVILLE, the ancient *Theodonis villa*, a fortified city on the Moselle, N.E. France. It was the occasional residence of Charlemagne and his successors, and on the extinction of his race, it was successively held by private lords, the counts of Luxemburg, the dukes of Burgundy, the house of Austria, and the kings of Spain. It was taken by the duke of Guise,

23 June, 1558, after an obstinate defence, and returned to Philip II. by the peace of Cateau Cambresis. It successfully resisted the marquis de Feuquières in 1637, but was taken after four months' siege by the duc d'Enghien, 10 Aug. 1643, and remained with France. It successfully resisted the Austrians in 1792, and the Prussians in 1814. It was invested by the Germans in Aug. 1870, and after bombardment, being in flames, surrendered 24 Nov. following.

TOUL, the Roman *Tulli Leucorum*, a fortified town on the Moselle, N.E. France, one of the most ancient in the empire. The city and diocese acquired great privileges from Charles the Simple, 925, when it was united with the German empire. It was reunited with France, 1552. The fortifications, begun in 1238, were rebuilt and enlarged in 1700, according to the plans of Vauban. After a vigorous resistance to the Germans, commencing 14 Aug. 1870, Toul surrendered with its garrison of 3000 men, 23 Sept., when the town was burning in twenty-three places. The Germans thus acquired an uninterrupted railway communication to Paris.

TOURNAMENTS (p. 734), introduced into England early in the 12th century, were prohibited by Henry II., but revived by Richard I., his son. Solemn tournaments were held by Edward III., 25 Sept. 1329, in London; and 19 Jan. 1344, at Windsor; and by Richard II. in Smithfield, London, 10 Oct. 1319; and also by Henry VIII., in May, 1513.

TOURS (p. 735). When Paris was invested by the Germans, M. Crémieux and several of the members of the French government of defence went to Tours, together with the representatives of foreign powers, 18 Sep. On 9 Oct. these were joined by Gambetta, then minister of the interior and now of war (who escaped from Paris by a balloon), 7 Oct. In consequence of the defeat of the army of the Loire near Orleans, the government removed to Bordeaux, 11 Dec.

TRACTION ENGINES, see *Road Steamers*.

TRAMWAYS (p. 736). Street railways or tramways for omnibuses drawn by horses, previously established by Mr. Train in New York, were opened by him at Birkenhead, Cheshire, 30 Aug. 1860, and at Bayswater, London, 23 March, 1861. (See *Ireland*, 1868.) A street railway bill was rejected by the house of commons in April, 1861. Several of these railways existed for a time in various parts of the metropolis in 1861, but were all taken up in 1862. An act to facilitate the construction of tramways passed 9 Aug. 1870. Tramways from Brixton to Kennington, and from Whitechapel to Bow, were opened 9 May, 1870; and others since.

VALUATION OF PROPERTY ACT—to provide for the uniform assessment of rateable property in the metropolis, was passed 9 Aug. 1869.

VELOCIPEDE. A machine of this kind was invented by Blanchard the aeronaut, and described in the *Journal de Paris*, 27 July, 1779; and one was constructed by Nicéphore Niepce in 1818. The "dandy-horse" or "Draisena, a machine called a velocipede," was patented for the baron von Drais, in Paris and London in 1818, and described in "Acker-mann's Repository," Feb. 1819. These machines came again into use in 1861; and since

1867 have been very common under various forms, termed bicycles and tricycles. Velocipede races took place at the Crystal palace, 26 May, 1869, and frequently since.

VELVET. The manufacture, long confined to Genoa, Lucca, and other places in Italy, was carried to France, and thence to England, about 1685. Velvet is mentioned by Joinville in 1272; and our king Richard II., in his will, directed his body to be clothed "in velveto," 1399.

VENEZUELA (p. 776). A revolution broke out in Caraccas, and president Falcon fled, 22—26 June, 1868. The president Monagas died, 18 Nov., and Pulgar became provisional president, Dec. 1868. Caraccas was captured by revolutionists, April, 1870.

VERDUN (the ancient Verodunum), a first-class fortress on the Meuse, N.E. France, made a magazine for his legions by Julius Cæsar. It was acquired by the Franks in the sixth century, and formed part of the dominions of Lothaire by the treaty of Verdun, 543, when the empire was divided between the sons of Louis I. It was taken and annexed to the empire by Otho I. about 939. It surrendered to France in 1552; and was formally ceded in 1648. It was taken and held by the Prussians 43 days, Sept.—Oct. 1792. Gen. Beaufort, the commandant, committed suicide before the surrender, and 14 ladies were executed in 1794, for going to the king of Prussia to solicit his clemency for the town. Verdun surrendered to the Germans 8 Nov. 1870, after a brave defence; two vigorous sallies being made 28 Oct. Above 4000 men were captured, and much arms and ammunition.

VERSAILLES (p. 777), with the troops there, surrendered to the Germans 19 Sept. 1870, and the crown prince of Prussia entered the next day. On 26 Sept. he awarded the iron cross to above 30 soldiers at the foot of the statue of Louis XIV. The palace was converted into an hospital. The royal head-quarters were removed here from Ferrières 5 Oct.

WALLACE MONUMENT at Abbey Craig, near Stirling, was inaugurated 27 Aug. 1869, and soon after given into the charge of the magistrates of Stirling. It cost about 13,000*l*. The telescope there was presented by the Scotch inhabitants of Ipswich 24 June, 1865.

WAR-OFFICE ACT, passed 20 June, 1870, appoints a financial secretary, who may sit in parliament, and other officers.

WATERING STREETS. Mr. Cooper's plan for using solutions of chloride of lime or of sodium (which dry slowly and attract moisture and ammonia and other gases, and combine them with the material of the road) was partially used in the parish of St. Mary-le-bone in 1868, and also in Liverpool, Boston, and other towns. The plan was ordered to be tried in Westminster in July, 1870.

WELLINGTON MONUMENT (p. 797), entrusted to Mr. A. Stevens, the sculptor, was very far from completion in Aug. 1870. Parliament had granted 20,000*l.* for the purpose, and it was stated that 15,000*l.* more would be required.

WHEAT (p. 800). Value imported into the united kingdom in 1868, 22,069,353*l.*; in 1869, 19,515,758*l.*

WINE (p. 806) imported into the united kingdom in 1867, 15,442,581 gallons; in 1868, 16,953,429 gallons; in 1869, 17,184,307 gallons.

WISSEMBOURG, OR WEISSENBURG, N.E. France, in the department of the Lower Rhine, situate on the right bank of the river Lauter, the boundary of France and the Palatinate. It was formerly an imperial city of Alsace, and was seized by Louis XIV. in 1673, and annexed to France by the treaty of Ryswick 1697. The "lines" of Wissembourg, erected by Villars 1705, were taken by the Austrians and retaken by the French, 1793, after Hoche's victory at Geisberg. On 4 Aug. 1870, the crown-prince of Prussia crossed the Lauter and gained a brilliant but bloody victory over the French (a part of MacMahon's division), storming the lines, and the Geisberg. General Abel Douay was mortally wounded, and about 500 prisoners were made. The killed and wounded on both sides appear to have been nearly equal. The German army, composed of Prussians, Bavarians, and Württembergers, were, it is said, about 40,000, against about 10,000 French, who fought with desperate bravery.

WIVES (p. 807). An act to amend the law relating to the property of married women was passed 9 Aug. 1870. By it the separate earnings of a wife were secured to her own use, as well as personal and freehold property bequeathed to her. She may maintain an action at law, and acquires other rights. The husband is declared not liable for debts contracted by his wife prior to marriage, and she may be sued for them.

WERTH SUR SAUER, a town in the department of the Lower Rhine, N.E. France. After storming Wissembourg (*which see*) on 4 Aug. 1870, the crown-prince of Prussia with the 3rd army (about 120,000) marched rapidly forward and surprised part of the French army under Marshal MacMahon, including the corps of Canrobert and Faily (about 47,000), and defeated it in a long, desperate, and sanguinary engagement near this place 6 Aug. The battle lasted from 7 a.m. till 4 p.m. The chief struggles occurred in the country round Reichshoffen and in the village of Froeschweiler; the French are said to have charged the German line eleven times, each time breaking it, but always finding a fresh mass behind. The ridge on which Wörth stands was not captured until the French were taken in flank by the Bavarians and Württembergers. Nearly all MacMahon's staff were killed, and the marshal himself, unhorsed, fell fainting into a ditch, from which he was rescued by a soldier. He then, on foot, directed the retreat towards Saverne, to cover the passes of the Vosges. The victory is attributed to the very great numerical superiority of the Germans (about 130,000) as well as to their excellent strategy. The French loss has been estimated at 20,000 killed and wounded, and about 6000 prisoners, 2 eagles, 6 mitrailleuses, 30 cannon, and much baggage. The Germans are stated to have had above 8000 men put *hors de combat*. It was admitted that MacMahon had acted as an able and brave commander.

DICTIONARY OF DATES.

AAR

ABD

AARGAU (Switzerland,) formerly included in Berne, was made an independent canton in 1803, and settled as such in 1815. It was much disturbed by religious dissensions in 1841 and 1844.

ABACUS, the tile on the capital of a column. That on the Corinthian column is ascribed to Callimachus, about 540 B.C.—This name is also given to a frame traversed by stiff wires, on which beads were strung, used by the Greeks, Romans, and Chinese. M. Lalanne published an ABACUS at Paris in 1845.—The multiplication table has been called the Pythagorean abacus.

ABANCAÿ, a river in Peru, on the banks of which the Spanish marshal Almagro defeated and took prisoner Alvarado, a partisan of Pizarro, 12 July, 1537.

ABATTOIRS, slaughter-houses for cattle. In 1810 Napoleon decreed that five should be erected near Paris, which were opened in 1818. One was erected at Edinburgh in 1851; and they form part of the new London metropolitan cattle-market, opened on 13 June, 1855.

ABBASSIDES, descendants of Mahomet's uncle, Abbas-Ben-Abdul-Motaleb. Merwan II., the last of the Ommiades, was defeated and slain by Abul Abbas in 750, and became caliph. Thirty-seven Abbasside caliphs reigned from 750 to 1258. Their colour was black; that of the Fatimites being green, and of the Ommiades white.

ABBAYE, a military prison near St. Germain des Prés, Paris, where 164 prisoners were murdered by infuriated republicans led by Maillard, 2 and 3 Sept. 1792.

ABBEYS, monasteries for men or women; see *Monachism* and *Convents*. The first abbey founded in England was at Bangor in 560; in France, at Poitiers, about 360; in Ireland in the fifth century; in Scotland in the sixth century. 110 monasteries and priories were suppressed in England, 2 Henry V. 1414. *Salmon*. The gross disorders in these establishments occasioned their destruction in Britain. After visitations of enquiry, king Henry VIII. commenced the suppression of small monasteries to raise revenues for Wolsey's colleges at Oxford and Ipswich, on 7 June, 1525; and all religious houses (containing then about 47,721 persons) were suppressed throughout the realm by parliament, 1539.* Abbeys were suppressed in France in 1790, in Spain in 1837, and in Italy in 1866.

ABBOT (from *Ab*, father), the head of an abbey. In England, mitred abbots were lords of parliament; twenty-seven abbots and two priors thus distinguished 1329; the number reduced to twenty-five, 1396. *Coke*. The abbots of Reading, Glastonbury, and St. John's, Colchester, were executed as traitors for denying the king's supremacy, and not surrendering their abbeyes, 1539; see *Glastonbury*.

A B C CLUB, a name adopted by certain republican enthusiasts in Paris, professing to relieve the *abaissés* or depressed. Their insurrection 5 June, 1832, was suppressed with bloodshed, 6 June. These events are described by Victor Hugo in "*Les Misérables*" (1862).

ABECEDARIANS, followers of Stork, an Antibaptist in the sixteenth century, derive their name from their rejection of all worldly knowledge, even of the alphabet.

ABELARD, a celebrated teacher of theology and logic, in 1118 fell in love with Heloise, the niece of Fulbert, a canon of Paris, became her tutor and seduced her. After a compulsory marriage, he placed her temporarily in a convent. Having been cruelly mutilated at the instigation of her relatives, he entered the abbey of St. Denis, from which he was compelled to depart, accused of heresy, on account of his censuring the dissoluteness of the monks. He then built and lectured at the oratory of the Paraclete (or comforter) which eventually he made a convent, with Heloise for the abbess. He died under the charge of heresy, 21 April, 1142, and was buried in the Paraclete, where also Heloise was laid in 1163. Their ashes were removed to the garden of the Museum Français in 1800, and to the cemetery of Père la Chaise in 1817. Their epistles and works were published in 1616.

ABENCERRAGES, a powerful Moorish tribe of Granada, opposed to the Zegriss. From 1480 to 1492 their quarrels deluged Granada with blood and hastened the fall of the kingdom. They were exterminated by Boabdil (Abu Abdallah), the last king, who was dethroned by Ferdinand and Isabella in 1492; his dominions were annexed to Castile.

ABENSBERG, Bavaria. The Austrians were here defeated by Napoleon 20 April, 1809.

ABEOKUTA, see *Dahomey*.

ABERDEEN (N. Scotland), said to have been founded in the third century after Christ. Gregory the Great conferred peculiar privileges on Aberdeen in 893. Old Aberdeen was made a royal burgh in 1154; it was burnt by the English in 1336; and soon after New Aberdeen was built. The *university* was founded by Bishop William Elphinstone, who had a bull from the pope Alexander VI. in 1494. King's college was erected in 1500-6. Marischal college was founded by George Keith, earl marshal of Scotland, in 1593; rebuilt in 1837. In 1858 the university and colleges were united.—A statue of the prince consort was inaugurated by the queen 13 Oct. 1863; and one of Queen Victoria by the prince of Wales, 20 Sept. 1866.—Malcolm III. having gained a great victory over the Danes in the year 1010, resolved to found a new *bishopric*, in token of his gratitude for his success, and pitched upon Mortlach in Banffshire, where St. Beanus was first bishop, 1015. The see, removed to Aberdeen early in the twelfth century, was discontinued at the revolution, 1689, and is now a post-revolution bishopric, instituted in 1721; see *Bishops*.

ABERDEEN ADMINISTRATION, called the *Coalition Ministry*, as including Whigs, Radicals, and followers of sir R. Peel. Formed in consequence of the resignation of the first Derby administration; sworn in 28 Dec. 1852; resigned 30 Jan. 1855; succeeded by the *Palmerston* administration, *which see*.

Earl of Aberdeen, * <i>first lord of the treasury.</i>	Sir James Graham, <i>first lord of the admiralty.</i>
Lord Cranworth, <i>lord chancellor.</i>	Sir Charles Wood, <i>president of the India board.</i>
Earl Granville, <i>president of the council.</i>	Edward Cardwell, <i>president of board of trade.</i>
Duke of Argyll, <i>lord proxy seal.</i>	Hon. Sidney Herbert, <i>secretary-at-war.</i>
Lord John Russell, † <i>foreign.</i>	Sir William Molesworth, <i>chief commissioner of works.</i>
Viscount Palmerston, <i>home secretary.</i>	Marquess of Lansdowne (without office).
Duke of Newcastle, † <i>colonial and war secretary.</i>	Viscount Canning, Lord Stanley of Alderley, right hon. Edward Strutt, &c.
William Ewart Gladstone, <i>chancellor of exchequer.</i>	

* Born in 1784; engaged in foreign diplomacy, 1813; became foreign secretary, Jan. 1828; joined the party of sir R. Peel, 1846; died, 14 Dec. 1860.
 † Lord John Russell was succeeded as foreign secretary by the earl of Clarendon (Feb. 1853), but continued a member of the cabinet, without office; he afterwards became president of the council, in the room of earl Granville, appointed to the duchy of Lancaster (June, 1854).
 ‡ In June, 1854, the offices were separated; the duke of Newcastle remained *secretary of war*, and sir George Grey was made *colonial secretary*.

ABHORRERS, in the reign of Charles II. the court-party in England, the opponents of the Addressers (afterwards *Whigs*), so called from their address to the king praying for the immediate assembly of the parliament which was delayed on account of its being adverse to the court. The former (afterwards *Tories*) expressed their abhorrence of those who endeavoured to encroach on the royal prerogative, 1680. * *Hume*.

ABINGDON LAW. In 1645, lord Essex and Waller held Abingdon, in Berks, against Charles I. The town was unsuccessfully attacked by sir Stephen Hawkins in 1644, and by prince Rupert in 1645. On these occasions the defenders put every Irish prisoner to death without trial; hence the term "Abingdon law."

ABJURATION of certain doctrines of the church of Rome was enjoined by stat. 25 Char. II. 1672. The oath of abjuration of the pope and the pretender was first administered by stat. 13 Will. III. 1702; the form was changed in after reigns. By 21 & 22 Vict. c. 48 (1858) an alteration in the oath was authorised; see *Oaths*.

ABKASIA, a province of the Caucasus, annexed by Russia, the last prince Michael Shervashiji being deposed: an insurrection against the Russian authorities, 8 Aug. 1866, was quelled with much bloodshed.

ABO, a port of Russia, founded prior to 1157, was till 1809 capital of Swedish Finland. It has suffered much by fire, especially in 1775 and 1827; was seized by the Russians in Feb. 1808; ceded to them in 1809; and rebuilt by them after the great fire in 1827. The university erected by Gustavus Adolphus and Christina, 1640, *et seq.*, was removed to Helsingfors, 1827. The peace of Abo, by which Sweden ceded part of Finland to Russia, was signed 18 Aug. 1743.

ABORIGINES (without origin), a name given to the earliest known inhabitants of Italy (whence came the *Latini*); now applied to the original inhabitants of any country.—The Aborigines Protection Society was established in 1838. Reports on the condition of the aborigines in the British colonies were presented to parliament in 1834 and 1837.

ABOUKIR (Egypt), the ancient Canopus. In the bay Nelson defeated the French fleet, 1 Aug. 1798; see *Nile*. A Turkish army of 15,000 was defeated here by 5000 French under Bonaparte, 25 July, 1799. A British expedition to Egypt under general sir Ralph Abercromby landed here, and Aboukir surrendered to them after an obstinate and sanguinary conflict with the French, 8 March, 1801; see *Alexandria*.

ABRAHAM, ERA OF, used by Eusebius; so called from the patriarch Abraham, who died 1822 B.C. It began 1 Oct. 2016 B.C. To reduce this era to the Christian, subtract 2015 years and three months.

ABRAHAM, HEIGHTS OF, near Quebec, Lower Canada. The French were defeated here by general Wolfe, who fell in the moment of victory, 13 Sept. 1759; see *Quebec*.

ABRAHAMITES, a sect holding the errors of Paulus, was suppressed by Cyriacus, the patriarch of Antioch, early in the ninth century. A sect of this name was banished from Bohemia by Joseph II. in 1783.

ABSALOM'S REBELLION and death (1024—23 B.C.) is described 2 *Sam.* xv.—xix.

ABSENTEE TAX (four shillings in the pound), levied in Ireland in 1715 on the incomes and pensions of absentees, ceased in 1753. A tax of 2s. in the pound was vainly proposed by Mr. Flood in 1773 and by Mr. Molyneux in 1783.

ABSOLUTION. Till the 3rd century, the consent of the congregation was necessary to absolution; but soon after the power was reserved to the bishop; and in the 12th century the form "*I absolve thee*" had become general.

ABSTINENCE. It is said that St. Anthony lived to the age of 105 on twelve ounces of bread and water daily, and James the hermit to the age of 104. St. Epiphanius lived thus to 115; Simeon the Stylite to 112; and Kentigern, commonly called St. Mungo, to 185 years of age. *Spottiswood*. Ann Moore, the fasting woman of Tutbury, Staffordshire, was said to have lived twenty months without food; but her imposture was detected by Dr. A. Henderson, Nov. 1808. At Newry, in Ireland, a man named Cavanagh was reported to have lived two years without meat or drink, Aug. 1840. His imposture was discovered in England, where he was imprisoned as a cheat, Nov. 1841; see *Fasts, Tectotallers*.—**ABSTINENTS**, ascetics that wholly abstained from wine, flesh, and marriage, appeared in France and Spain in the 3rd century.

ABYDOS, see *Hellespont*.

* The commons expelled several members for being Abhorrrers, among them sir Francis Withens (whom they sent to the Tower), and prayed his majesty to remove others from places of trust. They also resolved, "that it is the undoubted right of the subject to petition for the calling of a parliament, and that to traduce such petitions as tumultuous and seditious, is to contribute to the design of altering the constitution." Oct. 1680. *Salmon*.

ABYSSINIA, the country of the Habese, N. E. Africa. Its ancient history is very uncertain. The kingdom of Auxumitæ (from its chief town Auxume) flourished in the 1st and 2nd centuries after Christ. The religion of the Abyssinians is a corrupt form of the Christianity introduced about 329 by Frumentius. About 960, Judith, a Jewish princess, murdered a great part of the royal family, and reigned forty years. The young king escaped: and the royal house was restored in 1268 in the person of his descendant Icon Amlac. In the middle ages it was said to be ruled by Prester John or Prete Janni. The Portuguese missionaries, commenced in the 15th century, after much intrigue and altercation, were expelled about 1632. The encroachments of the Gallas and intestine disorders soon after broke up the empire into petty governments. From the visits of James Bruce, 1769-72; Henry Salt, 1809-10; Edward Rüppell, 1834-7; Major Harris, 1841; Mansfield Parkyns, 1844-7, much information respecting Abyssinia has been gained. Several expeditions into Abyssinia have been organised by the French Government. The brothers Antoine and Arnauld Abbadie visited the country 1837-45. Abyssinia is now divided into four provinces. In 1847 Ras Ali was ruler of Amhara; Ras Ubie of Tigré and Samien; and Sahela Selassie of Shoa.

Treaty of Commerce with the king of Shoa concluded by captain Harris, 16 Nov. 1841.
 Mr. Plowden (made British consul at Massowah, 1843,) concludes treaty with Ras Ali, ruler of Amhara, 2 Nov. 1849.
 Ras Ali deposed by his son-in-law Theodore, who is crowned, 11 Feb. 1855.
 Protestant missionaries received, replacing Roman catholics, 1855.
 Mr. Plowden (who had joined the party of Theodore) killed by rebels, Feb.; his friend Bell killed soon after, when revenging him; Theodore overcomes the rebels and massacres about 150 prisoners as a sacrifice to their manes, 1860.
 Theodore sends a letter to the queen of England desiring alliance, which arrived Feb. 1863.
 Stern and Rosenthal, missionaries, beaten and imprisoned for censuring Theodore in letters intercepted, before Sept. 1863.
 Theodore imprisons consul Cameron (on suspicion of his intriguing with the Turks?) and others, about 22 Nov. 1863.
 News of the imprisonment arrives in London, May, 1864.
 Mr. Hormuzd Rassam, an Arab Christian, assistant to col. Merewether, British political resident at Aden, sent on mission to Abyssinia, arrives at Massowah 20 Aug. 1864.
 Prisoners conveyed to fortress of Magdala, June, 1865.
 Mr. Rassam, having negotiated without result, recalled, goes to Suez, Aug. 1865.
 Mr. Rassam, lieut. Prideaux, and Dr. Blanc arrive at Matemma from Massowah, 27 Nov. 1865.
 Invited by Theodore to come to him, December 1865.

They write that they are well-treated, 18 April; all seized and imprisoned, about 1 July, 1866.
 Mr. Flad sent to England by Theodore to obtain British workmen, April; arrives, July; introduced to queen Victoria, and receives from her an autograph letter, dated 4 Oct. 1866.
 Mr. Flad returned without workmen to Massowah, 29 Oct.; Theodore received the queen's letter about 19 Dec. 1866.
 Lord Stanley's ultimatum to Theodoros, demanding release of the captives in three months, sent 16 April, 1867.
 Mr. Flad received by the king; and made to join his family in prison, May, 1867.
 Preparations for war; sir Robert Napier appointed commander of an expedition; pioneer force sails from Bombay, 14 Sept. 1867.
 A formal letter from the British government sent to Theodore, 9 Sept. 1867.
 The king 30 miles from Debra Tabor, encumbered with baggage, and checked by rebels; Mr. Flad and other Europeans with him, 11 Oct. 1867.
 Advanced brigade (3500) sail from Bombay, 7, 8 Oct.; land at Zoulla, 21 Oct. 1867.
 Napier's proclamation issued in Abyssinia, 6 Nov. 1867.
 Captives at Magdala reported well, 11 Nov. 1867.
 Report that the Gallas have joined the revolt against Theodore, 25 Nov. 1867.
 The British parliament meets; the queen's speech announces the war, 19 Nov.; 2,000,000. voted, 26, 27 Nov. 1867.
 Arrival of sir R. Napier at Annesley bay, 4 Jan. 1868.
 Telegram: the army reported well; Theodore hemmed in by rebels, 8 Jan. 1868.
 (See ADDENDA at the end of the volume.)

ABYSSINIAN ERA is reckoned from the creation, which the Abyssinians place in the 5493rd year B.C., on 29 Aug. old style; their dates consequently exceed ours by 5492 years, 125 days. To reduce Abyssinian time to the Julian year, subtract 5492 years, 125 days.

ACADEMIES. *Academia* was a shady grove without the walls of Athens (bequeathed to Academus for gymnastic exercises), where Plato first taught philosophy, and his followers took the title of Academics, 378 B.C. *Stanley*.—Rome had no academies.—Ptolemy Soter is said to have founded an academy at Alexandria, about 314 B.C. Abderahman I., caliph of Spain, founded academies about A.D. 773. Theodosius the Younger, Charlemagne, and Alfred are also named as founders of academies. Italy is celebrated for its academies; and Jarekuis mentions 550, of which 25 were in Milan.

ACADIA, see *Nova Scotia*.

ACANTHUS, the foliage forming the volutes of the Corinthian capital, ascribed to Callimachus, about 540 B.C.

ACAPULCO, a Spanish galleon, from Acapulco, laden with gold and precious wares (estimated at above 1,000,000*l.* sterling), taken by lord Anson, who had previously acquired booty in his voyage amounting to 600,000*l.* He arrived at Spithead in the *Centurion*, after having circumnavigated the globe, 15 June, 1744.

ACARNANIA, N. Greece. The people became prominent in the Peloponnesian war, having invited the help of the Athenians against the Ambracians, 432 B.C. The Acarnanians were subdued by the Lacedæmonians in 390; they took part with Macedon against the Romans in 200, by whom they were subjugated in 197; finally, in 145.

ACCENTS were first introduced in the Greek language by Aristophanes of Byzantium, a grammarian and critic who taught at Alexandria about 264 B.C. Accents were first used by the French in the reign of Louis XIII. (about 1610).

ACCESSION, THE, *i.e.* that of the house of Hanover to the throne of Great Britain, in the person of George I., elector of Hanover, son of Sophia, daughter of Elizabeth, daughter of James I. He succeeded, 1 Aug. 1714, by virtue of the act of settlement passed in the reign of William III., 12 June, 1701, which limited the succession to his mother (as a protestant) in the event of queen Anne dying without issue.

ACCESSORIES TO CRIMES. The law respecting them consolidated and amended in 1861.

ACCIDENTS, see *Coal, Fires, Railways, &c.* For compensation for accidents, see *Campbell's Act* and *Passengers*. In 1865, it was computed that in one year, about 250 persons were killed, and 1200 injured, in the streets of London.

ACCLIMATISATION OF ANIMALS. This has been prosecuted with great vigour since the establishment of the Zoological society of London in 1829, and of the Société d'Acclimatation in Paris. Numbers of European animals have been naturalised in Australia; the camel has been conveyed to Brazil (1859); alpacas are bred at Paris; and ostriches in Italy (1859). On 6 Oct. 1860, the Bois de Boulogne, near Paris, was opened as a zoological garden, containing only acclimatised animals. An English acclimatation society was founded 10 June, 1860, by hon. Grantley Berkeley, Mr. J. Crockford, Mr. F. Buckland, &c., and the prince of Wales became president in April, 1865. An acclimatizing garden was established at Melbourne, Australia, in Feb. 1861, and efforts are being made to naturalise English birds, fishes, &c.

ACCORDION, a small wind-instrument with keys, introduced into England from Germany about 1828.

ACCOUNTANT-GENERAL IN CHANCERY, an office instituted in 1726. In 1841, the office of accountant-general of the court of exchequer was abolished, and the duties transferred to the accountant in chancery.

ACCUSERS. By occult writers, such as Agrippa, accusers are the eighth order of devils, whose chief is called Asteroth, or Spy. In *Revelation*, ch. xii. 10, the devil is called "the accuser of the brethren."—False accusers were to be hanged, by 24 Henry VI. 1446; and burnt in the face with an F, by 37 Henry VIII. 1545. *Stow*.

ACELDAMA, a field said to have been the one bought with the thirty pieces of silver given to Judas Iscariot for betraying Christ, is still shown to travellers. *Matthew* xxvii. 8; *Acts* i. 19.—This name was given to an estate purchased by Judge Jeffreys after the "bloody assizes" in 1685.

ACETYLENE, a luminous hydrocarbon gas resembling coal gas, discovered by Berthelot, and made known in 1862.

ACHAIA (N. Peloponnesus), Greece, said to have been settled by Achæus, the son of Xuthus, about 1330 B.C. (?) The kingdom was united with Sicyon or subject to the Ætolians until about 284 B.C. The Achæi, descendants of Achæus, originally inhabited the neighbourhood of Argos; but when the Heraclidæ drove them thence, they retired among the Ionians, expelled the natives, and seized their thirteen cities, viz. Pellene, Ægira, Ægium, Bura, Tritæa, Leontiun, Rhyes, Cerynea, Olenos, Helice, Patræ, Dyme and Pharæ, forming the **ACHÆAN LEAGUE**.

ACHONRY, SLIGO (N. Ireland); a bishopric founded by St. Finian, who erected the church of Achad, or Achonry, about 520, and conferred it on his disciple Nathy (Dathy, or David), the first bishop. The see, held with Killala since 1612, was united with Tuam in 1834.

ACHROMATIC TELESCOPES, in which colour is got rid of, were invented by John Dollond, and described in *Phil. Trans.* of the Royal Society, London, 1753-8.

ACIDS (now defined as salts of hydrogen) are generally soluble in water, redden organic blues, decompose carbonates, and destroy the properties of alkalies, forming alkaline salts. The number was increased by the Arabs; Geber (8th century) knew nitric acid and sulphuric acid. Theories of the constitution of acids were put forth by Becher (1669), Lemery (1675), and Stahl (1723). After the discovery of oxygen by Priestley, 1 Aug. 1774, Lavoisier (1778) concluded that oxygen was a constituent of all acids; but about 1810 Davy, Gay-Lussac, and others, proved the existence of acids free from oxygen. In 1816 Dulong proposed the binary or hydrogen theory of acids, and in 1837 Liebig applied the theories of Davy and Dulong to explain the constitution of several organic acids. Oxygen acids are now termed anhydrides. An innumerable number of acids have been discovered through the advance of organic chemistry. *Watts*.

ACOLYTES, an inferior order of clergy in the Latin church, unknown to the Greek church for four hundred years after Christ.

ACOUSTICS (from *akouō*, Greek, I hear), the science of sound, so named by Sauveur in the 17th century. The formation of sound in the air by the vibrations of the atmosphere, strings, &c., was explained by Pythagoras about 500 B.C., and by Aristotle, 330 B.C.

The speaking trumpet said to have been used by Alexander the Great, 335 B.C.	Hooke calculated the vibration of sounds by the striking of the teeth of brass wheels, 1681.
Galileo's discoveries, about A.D. 1600.	Sauveur determined the number of vibrations belonging to a given note, about 1700.
His theorem of the harmonic curve demonstrated by Dr. Brook Taylor, in 1714; further perfected by D'Alembert, Euler, Bernouilli, and La Grange, at various periods of the eighteenth century.	Velocity of sound said to be 1473 feet in a second, by Gassendi; 1172 feet by Cassini, Römer and others; 968 by Newton, about 1700.

ACOUSTICS, *continued.*

Chladni (who raised acoustics to an independent science) published his important discoveries on the figures produced in layers of sand by harmonic chords, &c., in 1787, and since.

Cagniard-Latour invented the *sirène* (*which see*), 1819. Biot, Savart, Wheatstone, Lissajous, Helmholtz, Tyndall, and others in the present century have greatly increased our knowledge of acoustics.

ACRE, a land measure, formerly of uncertain quantity, and differing in various parts of the country, was reduced to a standard by Edward I., probably about 1303. In 1824 the standard acre was ordered by statute to contain 4840 square yards.

ACRE, Acca, anciently Ptolemais, in Syria, was taken by the Saracens in 638; by the crusaders under Baldwin I. in 1104; by Saladin in 1187; and again by Richard I. and other crusaders, 12 July, 1191, after a siege of two years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named *St. Jean d'Acrc*. It was retaken by the Saracens in 1291, when 60,000 Christians perished. The nuns, who had mangled their faces to preserve their chastity, were put to death. Acre was gallantly defended by Djeddar Pacha against Bonaparte in July, 1798, till relieved by Sir Sidney Smith, who resisted twelve attempts by the French, between 16 March and 20 May, 1799, when Bonaparte retreated. Acre, as a Turkish pachalic, was seized 27 May, 1832, by Ibrahim Pacha, who had revolted. On 3 Nov. 1840, it was stormed by the British fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000 prisoners, while the British had but twelve killed and 42 wounded; see *Syria and Turkey*.

ACROPOLIS, the ancient citadel of Athens, built on a rock. Near it stood the temple of Minerva, the Parthenon, *which see*.

ACROSTIC, a poem in which the first or last letters of each line, read downwards, form a word, said to have been invented by Porphyrius Optalianus in the 4th century. Double acrostics have been very popular lately (1867).

ACS (Hungary). The Hungarians under Görgey were defeated here by the Austrians and Russians, on 2 and 10 July, 1849.

ACT OF SETTLEMENT, &c.; see *Accession, Succession, Supremacy, and Uniformity Acts*.

ACTA SANCTORUM ("acts of the saints"), a work begun by the Jesuits. The first volume appeared in 1643: the publication was interrupted in 1734, when the fifty-third volume was published, but was resumed in 1846, and has advanced in the order of months as far as October. The writers have been named *Bollandists*, from John Bolland, who published the first two volumes.

ACTINOMETER, an instrument to measure the power of the solar rays, invented by sir J. F. Herschel, and described by him in 1825. See *Sun*.

ACTIUM, a promontory of Acarnania, W. Greece, near which was fought, 2 Sept. 31 B.C. the battle between the fleet of Octavius Cæsar, and that of Marc Antony and Cleopatra, which decided the fate of Antony; 300 of his galleys going over to Cæsar. This victory made Octavius master of the world, and the Roman empire is commonly dated 1 Jan. 30 B.C. (the *Actian Era*). The conqueror built Nicopolis (the city of victory), and instituted the Actian games.

ACTRESSES appear to have been unknown to the ancients; men or eunuchs performing the female parts. Charles II. is said to have first encouraged the public appearance of women on the stage in England, in 1662; but Anne, queen of James I., had previously performed in a theatre at court. *Theat. Biog.* Mrs. Colman was the first actress on the stage; she performed the part of *Ianthe* in Davenant's "Siege of Rhodes," in 1656. *Victor*.

ACTS OF PARLIAMENT, or STATUTES, see *Parliament*. The following are among the most celebrated early statutes:—

Statutes of Clarendon, to restrain the power of the clergy, enacted in 10 Hen. II. 1164.

Provisions of Merton, 1235-6.

Statute of Marlborough, 1267.

Of Bigamy, 1275-6.

Of Gloucester, the earliest statute of which any record exists, 6 Edw. I. 1278.

Of Mortmain, 1279.

Quo Warranto, Oct. 1280.

Statutes of Wales, 1284.

Of Winchester, Oct. 1284.

Of Westminster, 1275, 1285, 1290.

Statute forbidding the levying of taxes without the consent of parliament, 1297.

Magna Charta, 1297.

Of Præmunire, 1306.

Statutes first printed in the reign of Richard III. 1483.

Statutes of the Realm, from Magna Charta to George I., printed from the original records and MSS. in 12 vols. folio, under the direction of commissioners appointed in 1801, 1811-28.

The statutes passed during each session are now printed annually in 4to. and 8vo. Abstracts are given in the *Cabinet Lawyer*.

Between 1823 and 1829, 1126 acts were wholly repealed, and 443 repealed in part, chiefly arising out of the consolidation of the laws by Mr. (afterwards sir Robert) Peel; of these acts, 1344 related to the kingdom at large, and 225 to Ireland solely; and in 1856 many obsolete statutes (enacted between 1285 and 1777) were repealed.

ACTS OF PARLIAMENT, or STATUTES, *continued.*

By the Statute Law Revision Act of 1861, 770 acts were wholly repealed, and a great many partially. By the similar Act of 1863, a great number of enactments were repealed, commencing with the Provisions of Merton, 20 Henry III. (1236), and ending with 1 James II. (1685). The greatest number of acts passed in any one year since 1800, was 570, in 1846 (the railway year); 402 were local and personal, 51 private, and 117 public acts. In 1841, only 13 were passed (the lowest number), of which two were private. In three instances only, the annual number was

under a hundred. The average number of the first ten years of the present century was 132 public acts. In the ten years ending 1850, the average number of acts, of public interest, was 112. The number of *public general acts* passed in 1851 was 106; in 1852, 88; in 1853, 137; in 1854, 125; in 1855, 134; in 1856, 120; in 1857, 86; in 1858, 109; in 1859, 101; in 1860, 154; in 1861, 134; in 1862, 114; in 1863, 125; in 1864, 121; in 1865, 127; in 1866, 122; in 1867, 146. In 1850, 13 Vict. c. 13, was passed to curtail *Repetitions* in statutes.

ACTS, in dramatic poetry, first employed by the Romans. *Five acts* are mentioned by Horace (*Art of Poetry*) as the rule (about 8 B.C.).

ACTUARY, *ACTUARIUS*, the Roman accountant. The Institute of Actuaries founded in 1848, publishes its proceedings in the "Assurance Magazine."

ADAM AND EVE, ERA OF, in the English Bible, 4004 B.C.; see *Creation*.

ADAMITES, a sect said to have existed about 130, and to have been quite naked in their religious assemblies, asserting that if Adam had not sinned there would have been no marriages. Their chief was named Prodicus; they deified the elements, rejected prayer, and said it was not necessary to confess Christ. *Eusebius*. A sect with this name arose at Antwerp in the 12th century, under Tandemus, or Tanchelin, whose followers, 3000 soldiers and others, committed many crimes. It became extinct soon after the death of its chief; but another of the same kind, named Turlupins, appeared shortly after in Savoy and Dauphiny. A Fleming named Picard, revived this sect in Bohemia, about 1415; it was suppressed by Ziska.

ADDA, a river N. Italy, passed by Suwarrow after defeating the French, 27 April, 1799.

ADDINGTON ADMINISTRATION. Mr. Pitt, having engaged to procure Roman Catholic emancipation to secure the union with Ireland, and being unable to do so *as a minister*, resigned 3 Feb. 1801. A new ministry was formed by Mr. Addington, March 1801; after various changes it terminated 11 May, 1804.

Henry Addington,* *first lord of the treasury and chancellor of the exchequer*.
Lord Eldon, *lord chancellor*.
Duke of Portland, *lord president*.

ADELAIDE, the capital of South Australia, was founded in 1836. It contained 14,000 inhabitants in 1850, and 18,259 in 1855. It was made a bishopric in 1847.

ADELPHI (Greek for brothers), several streets on the south side of the Strand, London, erected about 1768 by the brothers, John, Robert, James, and William Adam, after whom the streets are named. ADELPHI THEATRE, see under *Theatres*.

ADEN, a free port on the S. W. corner of Arabia, where in 1837 a British ship was wrecked and plundered. The sultan promised compensation, and agreed to cede the place to the English. The sultan's son refusing to fulfil this agreement to captain Haynes, a naval and military force, under captain H. Smith, of the *Volage*, was dispatched to Aden, which captured it, 19 Jan. 1839. It is now a coal depôt for Indian steamers, &c.

ADIGE, a river in N. Italy, near which the Austrians defeated the French on 26, 30 March, and 5 April, 1799.

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN.† Until the Restoration, there was not in fact any Cabinet. The sovereign was aided by privy councillors, varying

* Born 1757; became viscount Sidmouth in 1805; held various offices afterwards, and died in 1844. His *circular* to the lords lieutenants, dated 27 March, 1817, directing them to adopt severe measures against the authors of blasphemous and seditious pamphlets, was greatly censured, and not carried into effect.

† Till 1850 the cabinet council usually consisted of the following twelve members:—First lord of the treasury; lord chancellor; lord president of the council; chancellor of the exchequer; lord privy seal; home, foreign, and colonial secretaries; first lord of the admiralty; president of the board of trade; president of the board of control; chancellor of the duchy of Lancaster. In 1850, the number was *fifteen*,

in number, the men and offices being frequently changed. The separation of the Cabinet from the privy council became greater during the reign of William III., and the control of the chief, now termed the "*premier*," was established in the reign of Anne. "The era of ministries may most properly be reckoned from the day of the meeting of the parliament after the general election of 1698."—*Macaulay*.† For a fuller account of each, since 1700, see separate articles headed with the name of the PREMIER, given in italics.

and included the secretary-at-war, the postmaster-general, and the chief secretary for Ireland. In the Palmerston-Russell cabinet (*which see*), the president of the poor-law-board replaced the secretary for Ireland. The average duration of a ministry has been set down at four, five, and six years; but instances have occurred of the duration of a ministry for much longer periods: sir Robert Walpole was minister from 1721 to 1742 (21 years); Mr. Pitt, 1783 to 1801 (18 years); and lord Liverpool, 1812 to 1827 (15 years). Several ministries have not endured beyond a few months, as the *Coalition Ministry* in 1783, and the "*Talents*" Ministry in 1806. The "*Short-lived*" Administration lasted 10 to 12 Feb. 1746.

ADMINISTRATIVE REFORM ASSOCIATION derived its origin from a general opinion that the disasters which occurred to the army in the Crimea in 1854-5 were attributable to the inefficient and irresponsible management of the various departments of the state. The association was organised in London, 5 May, 1855. A meeting was held in Drury-lane theatre, on 13 June, and Mr. Layard's motion on the subject in parliament was negatived 18 June following. The association was reorganised in 1856, Mr. Roebuck, M.P., becoming chairman, but soon became unimportant; see *Civil Service*.

ADMIRAL. The title does not appear to have been adopted in England until about 1300, but was previously in use in France. *Sir Harris Nicolas*. Alfred, Athelstan, Edgar, Harold, and other kings, were commanders of their own fleets. The first French admiral is said to have been appointed 1284. The rank of *admiral of the English seas* was first given to William de Leybourne by Edward I. in 1297. *Spelman; Rymer*. The first LORD HIGH ADMIRAL in England was created by Richard II. in 1385: there had been previously high admirals of *districts*—the north, west, and south. The duties have generally been executed by lords commissioners; see *Admiralty*. A similar dignity existed in *Scotland* from the reign of Robert III.: in 1673, the king bestowed it upon his natural son Charles Lennox, afterwards duke of Richmond, then an infant, who resigned the office to the crown in 1703: after the union it was discontinued.—The dignity of lord high admiral of *Ireland* (of brief existence) was conferred upon James Butler by Henry VIII., in May, 1534. The *Admiral of the Fleet* is the highest rank in the Royal Navy, corresponding to that of marshal in the army. We have now 3 admirals of the fleet, 20 admirals, 24 vice-admirals, and 48 rear-admirals (1868); see *Navy*. The first admiral of the United States of America, David G. Farragut, was nominated in 1866.

ADMIRALTY, COURT OF, a court for the trial of causes relating to maritime affairs, said to have been erected by Edward III., in 1357. It was enacted in the reign of Henry VIII., that criminal causes should be tried by witnesses and a jury, some of the judges at Westminster (or, as now, at the Old Bailey) assisting. The judgeship of the admiralty was constituted in 1514, and was filled by two or more functionaries until the Revolution, when it was restricted to one. *Beatson*. The judge has usually been an eminent doctor of the civil law. In 1844 the criminal jurisdiction of this court was removed, and by 20 & 21 Vict. c. 77 (1857), the judge of the Probate court was to be also judge of the Admiralty court. The present judge of the Admiralty court, Dr. Stephen Lushington (appointed in 1838), resigned 1 July, 1867, and was succeeded by Sir Robert Phillimore. The jurisdiction of this court was extended in 1861.

ADMIRALTY OFFICE dates from 1512, when Henry VIII. appointed commissioners to inspect his ships of war, &c. In 1662 the admiralty was first put into commission, the great officers of state being the commissioners. During the commonwealth the admiralty affairs were managed by a committee of the parliament; and at the restoration in 1660, James, duke of York, became lord high admiral; see succeeding changes *below*. In 1688-9, the admiralty was put into commission, and the board appears to have assembled at admiral Herbert's lodgings, in Channel-row, Westminster, he being at that time first lord. In 1830, 1832, and 1836 various changes were made in the civil departments, several offices being

abolished or consolidated with others. In March, 1861, a royal commission recommended the abolition of the board of admiralty and the appointment of a minister of the navy department.

ADMIRALTY, Whitehall. "At the south end of Duke-street, Westminster, was seated a large house, made use of for the admiralty office, until the business was removed to Greenwich, and thence to Wallingford-house, against Whitehall." It was rebuilt by Ripley about 1726; the screen was erected, to conceal the ugliness of the building, by the brothers Adam, in 1776.—Lord Nelson lay in state in one of the apartments on 8 Jan. 1806; and on the next day was buried at St. Paul's.

"ADMONITION TO THE PARLIAMENT," condemning all religious ceremonies but those commanded by the New Testament, was published by certain Puritans in 1571. It was answered by abp. Whitgift. Its presumed authors, Field and Wilcox, were imprisoned.

ADORNO AND FREGOSO, two families, of which the doges were frequently members, and which disturbed Genoa from the 14th to the 16th centuries, the former favouring the emperor, the latter the French king. Their power was annihilated by Andrea Doria about 1528.

ADRIAN'S WALL (to prevent the irruptions of the Scots and Picts into the northern counties of England, then under the Roman government) extended from the Tyne to Solway firth, and was eighty miles long, twelve feet high, and eight in thickness, with watch-towers; built 121. It was repaired and strengthened by Severus, 207—210.

ADRIANOPLE, in Turkey, so named after its restorer the emperor Adrian (who died 10 July, A.D. 138). Near here was fought the battle in which Constantine defeated Licinius and gained the empire, 3 July, 323; also, near here the emperor Valens was defeated and slain by the Goths, 9 Aug. 378. Adrianople was taken by the Turks under Amurath in 1361, and was the capital till the capture of Constantinople in 1453. It was taken by the Russians on 20 Aug. 1829; and restored 14 Sept. same year; see *Turkey*.

ADRIATIC. The ceremony of the doge of Venice wedding the Adriatic sea (instituted about 1173), took place annually on Ascension-day. The doge dropped a ring into the sea from his bucentaur, or state barge, being attended by his nobility and foreign ambassadors. The ceremony was first omitted in 1797.

ADULLAM, a cave to which David fled from the persecution of Saul about 1062 B.C.

(1 Sam. xxii. 1, 2). Mr. Horsman, Mr. R. Lowe, earl Grosvenor, lord Elcho, and other liberals who opposed the Franchise bill in 1866, were termed "Adullamites."*

ADULTERATION OF FOOD was prohibited in England in 1267. Much attention was drawn to it in 1822, through Mr. Accum's book, called "Death in the Pot," and in 1855 through Dr. Hassall's book, "Food and its Adulterations." By an act for preventing the adulteration of food, passed in 1860, parochial chemical analysts may be appointed.

ADULTERY was punished with death by the law of Moses (1490 B.C.; *Lev.* xx. 10)—and by Lycurgus (884 B.C.). The early Saxons burnt the adulteress, and erected a gibbet over her ashes, whereon they hanged the adulterer. The ears and nose were cut off under Canute, 1031. Adultery was ordained to be punished capitally by Cromwell, May 14, 1650: but there is no record of this law taking effect. In New England the punishment for adultery was made capital to both parties, and several suffered it, 1662. *Hardie*. Till 1857 the legal redress against the male offender was by civil action for a money compensation; the female being liable to divorce. By 20 & 21 Vict. c. 85 (1857) the "action for criminal conversation" was abolished and the Court for Divorce and Matrimonial Causes established, with power to grant divorces for adultery and ill usage; see *Divorce*.

ADVENT (*adveniens*, coming). The season includes four Sundays, previous to Christmas, the first being the nearest Sunday to St. Andrew's day (Nov. 30), before or after. Homilies respecting Advent are mentioned prior to 378. Advent Sunday, 1868, 29 Nov.; 1869, 28 Nov.; 1870, 27 Nov.; 1871, 3 Dec.

ADVENTURE BAY, S.E. end of Van Diemen's Land, discovered in 1773 by capt. Furneaux in his first voyage to the Pacific, and named from his ship *Adventure*. It was visited by captain Bligh in 1788.

ADVENTURERS, see **MERCHANTS**.

ADVERTISEMENTS IN NEWSPAPERS, as now published, were not general in England till the beginning of the eighteenth century. A penalty of 50*l.* was inflicted on persons advertising a reward with "No questions to be asked" for the return of things stolen, and on the printer, 1754. The *advertisement duty*, formerly charged according to the number of lines, was afterwards fixed, in England, at 3*s.* 6*d.*, and in Ireland at 2*s.* 6*d.* each advertisement. The duty, further reduced, in England to 1*s.* 6*d.* and in Ireland to 1*s.* each, in 1833, was abolished in 1853.† **ADVERTISING VANS**, a great nuisance, were prohibited in 1853.

ADVOCATE, THE KING'S, (always a doctor of the civil law,) was empowered to prosecute at his own instance certain crimes about 1597. The **LORD ADVOCATE** in Scotland is the same as the attorney-general in England with judicial powers.—It was decided in the parliament of Paris, in 1685, that the king's advocate of France might at the same time be a judge; and in Scotland sir William Oliphant (1612) and Sir John Nesbit (1666) were lord advocates and lords of session at the same time. *Beatson*.—The Advocates' library in Edinburgh was established by sir G. Mackenzie in 1682.

ÆDILES, magistrates of Rome, first created 492 B.C. There were three degrees. The plebeian ædiles presided over the more minute affairs of the state, the maintenance of order, the reparation of the streets, the supply of provisions, &c. *Varro*.

A. E. I. O. U., (for "Austria est imperare orbi universi," "Austria is to rule all the world,") was the motto of the weak and unfortunate emperor, Frederick III. 1440—1493.

ÆGATES ISLES, W. of Sicily: near these, during the first Punic war, the Roman consul, C. Lutatius Catulus gained a decisive victory over the Carthaginian fleet under Hanno, 10 March, 241 B.C. Peace ensued, the Romans obtaining Sicily and a tribute of 3200 talents.

ÆGINA, a Greek island, a rival of Athens, was humbled by Themistocles, 485 B.C.; and taken 455. Its inhabitants, expelled, 431, were restored by the Spartans, 404; they renewed war with Athens 388, and made peace 387.

ÆGOSPOTAMOS, (the Goat-river,) in the Chersonesus, where Lysander, the Lacedæmonian, defeated the Athenian fleet, 405 B.C., and ended the Peloponnesian war.

ÆLIA CAPITOLINA, built on the ruins of Jerusalem by the emperor Adrian, 130.

* During a debate on this bill on 13 March, 1866, Mr. Bright said of Mr. Horsman, that he "had retired into what may be called his political cave of Adullam, to which he invited every one who was in debt, and every one who was discontented," &c. On 19 April, lord Elcho said, "No improper motive has driven us into this cave, where we are a most happy family, daily—I may say, hourly—increasing in number and strength, where we shall remain until we go forth to deliver Israel from oppression." Although their opposition led to the defeat and resignation of the Russell ministry, they declined to take office under lord Derby in July, 1856. They did not vote together uniformly in 1867.

† On 16 Oct. 1860, the whole of the libretto of MacFarren's Opera, *Robin Hood*, was inserted as an advertisement in the *Times* (4½ columns).

ÆMILIA, the name given to the provinces of Parma, Modena, and the Romagna, united to Sardinia in 1860; and now part of the kingdom of Italy.

ÆNEID, the great Latin epic poem, relating the adventures of Æneas, written about 24 B.C. by Virgil, who died 22 Sept. 19 B.C., before he had finally corrected the poem. It was first printed in 1469, at Rome.

ÆNIGMA. Samson's riddle (about 1141 B.C.; *Judges* xiv. 12) is the earliest on record. Gale attributes ænigmatical speeches to the Egyptians. The ancient oracles frequently gave responses admitting of perfectly contrary interpretations. In Nero's time, the Romans had recourse to this method of concealing truth. The following epitaph on Fair Rosamond (mistress of our Henry II. about 1173) is a mediæval specimen:—"Hic jacet in tombâ Rosa mundi, non Rosa munda; Non redolet, sed olet, quæ redolere solet."

ÆOLIA, in Asia Minor, was colonised by a principal branch of the Hellenic race; beginning about 1124 B.C. The Æolians built several large cities both on the mainland and the neighbouring islands; Mitylene, in Lesbos, was considered the capital.

ÆOLIAN HARP. Its invention is ascribed to Kircher, 1650, but it was known before.

ÆOLOPILE, a hollow ball with an orifice in which a tube might be screwed, was used in the 17th century as a boiler for experimental steam-engines.

ÆQUI, an ancient Italian race, were subdued by the Romans, and their lands annexed after a severe struggle, 471-302 B.C.

ÆRAS, see *Eras*.

ÆRATED WATERS. Apparatus for combining gases with water were patented by Thomson in 1807; F. C. Bakevell in 1832 and 1847; Tylor in 1840, and by others. **ÆRATED BREAD** is made by processes patented by Dr. Daughlish, 1856-7.

ÆERIANS, followers of Aerius, a presbyter, in the 4th century, who held that there was no distinction between a bishop and presbyter; that there was no Pasch to be observed by Christians; that the Lent and other fasts should not be observed; and that prayers should not be offered for the dead. *Epiphanius*.

ÆEROLITES, see *Meteors*.

ÆERONAUTICS, AND ÆEROSTATICS, see *Balloons, and Flying*.

ÆESOP'S FABLES, said to have been written about 619, 571, or 565 B.C., no doubt by various persons. Phædrus's Latin paraphrases in Iambics (about A.D. 8) are very elegant.

ÆESTHETICS (from the Greek *aisthesis*, perception), the science of the beautiful (especially in art); a term invented by Baumgarten, a German philosopher, whose work "Æsthetica" was published in 1750.

ÆETHIOPIA, see *Ethiopia*.

"ÆETHIOPICA," see *Romances*.

ÆETIANS, followers of Aëtius, an Arian heretic about 351.

ÆETNA, see *Etna*.

ÆETOLIA, in Greece, a country named after Ætolus of Elis, who is said to have accidentally killed a son of Phoroneus, king of Argos, left the Peloponnesus, and settled here. After the ruin of Athens and Sparta, the Ætoliens became the rivals of the Achæans, and were alternately allies and enemies of Rome.

AFFINITY. Marriage within certain degrees of kindred was prohibited in almost every age and country, but has yet taken place to a considerable extent. The Jewish law is given in *Leviticus* xviii. (1490 B.C.). In the English prayer-book the table restricting marriage within certain degrees was set forth by authority, 1563. Prohibited marriages were adjudged to be incestuous and unlawful by the 99th canon, in 1603. All marriages within the forbidden degrees are declared to be absolutely void by 5 & 6 Will. IV. c. 54, 1835; see *Marriage (of Wife's Sister)*.

AFFIRMATION; see *Quakers*. The affirmation was altered in 1702, 1721, 1837, and in April, 1859.—The indulgence was granted to persons who were formerly Quakers, but who had seceded from that sect, 2 Vict. 1838; and extended to other dissenters by 9 Geo. IV. c. 32 (1828), and 18 & 19 Vict. c. 2 (1855).

AFGHANISTAN, a large country in central Asia, formerly part of the Persian and Greek empires, was conquered by the Tartars about 997.

The Mahomedan dynasty, the Ghaznevides, said to have ruled from 1186 to 1206.
Overthrown by Genghis Khan about 1221, and by Tamerlane, 1398.
Baber conquered Cabul in 1523.
On his death Afghanistan divided between Persia and Hindostan.
The Afghans revolt in 1720; invade Persia and take Ispahan; repulsed by Nadir Shah in 1728, who subdues the whole of the country, 1737.
On his assassination, one of his officers, Ahmed Shah, an Afghan, forms Afghanistan into an independent kingdom, and reigns prosperously, 1747-73.
His son and successor, Timour, died in 1793; whose son, Zemaun, was dethroned and blinded after reigning ten years. Since then the history is a series of broils, crimes, and murders.

Runjeet Sing, the Sikh chief of Lahore, conquers a large part of the country in 1818.
Dost Mahomed becomes ruler, 1829.
[For the Afghan war with England, see *India*, 1838.]
Dost Mahomed takes Herat, May 26; dies after designating his eldest son, Shere-Ali, his successor, 29 May, 1863; a war of succession ensues.
The English remain neutral, June, &c. 1863.
Treachery and anarchy prevailing, June, 1865—April, 1866.
Two rival amers reigning—Shere-Ali at Candahar Afzul Khan, at Cabool,—Sept. 1866.
Afzul Khan recognised by the British government, Feb. 1867.
Army of Shere-Ali defeated and his general slain, about 21 Sept. 1867.
Afzul Khan dies about 20 Oct. 1867.

AFRICA, called *Libya* by the Greeks, one of the three parts of the ancient world, and the greatest peninsula of the universe; said to have been first peopled by Ham. For its history, see *Egypt, Carthage, Cyrene, Abyssinia, Algiers, Morocco, &c.*

Carthage subdued by the Romans 146 B.C.; other provinces gained by Pompey 82.
N. Africa conquered by the Vandals under Genseric, A.D. 429-35, re-conquered by Belisarius, 533-5.
The Saracens subdue the north of Africa, 637-709.
Cape of Good Hope discovered by Diaz, 1487.
Portuguese settlements begun 1450.
English merchants visit Guinea in 1550; and Elizabeth granted a Patent to an African company in 1588.
Dutch colony at the Cape founded, 1650.
Capt. Stubbs sailed up the Gambia, 1723.
Burchard commenced his travels in 1768.
Sierra Leone settled by the English 1787.
Mungo Park made his first voyage to Africa, 22 May, 1795; and his second, 30 January, 1804, and never returned (see *Park*).
Africa visited by Salt, 1805 and 1809; Burchardt, 1812; Hornemann, 1816; Denham and Clapperton, 1822; the brothers Lander, 1830.
The great Niger expedition to start a colony in Central Africa (for which parliament voted 60,000*l.*), consisting of the *Albert, Wilberforce*, and *Soudan* steam-ships, commenced the ascent of the Niger, 20 Aug. 1841; when they reached Iddah, fever broke out among the crews, and they were successively obliged to return, the *Albert* having ascended the river to Egga, 320 miles from the sea, 28 Sept. The expedition was relinquished owing to disease, heat, and hardships, and all the vessels had cast anchor at Clarence Cove, Fernando Po, 17 Oct. 1841.
James Richardson explored the great Sahara in 1845-6, and in 1849 (by direction of the Foreign Office) he left England to explore central Africa, accompanied by Drs. Barth and Overweg. Richardson died 4 March, 1851; and Overweg, 27 Sept. 1852.
Dr. Vogel sent out with reinforcements to Dr. Barth, 20 Feb. 1853; in April, 1857, said to have been assassinated.
Dr. Barth returned to England, and received the Royal Geographical Society's medal, 16 May, 1856. His travels were published in 5 vols. in 1858.
Dr. David Livingstone, a missionary traveller, returned to England in Dec. 1856, after an absence of 16 years, during which he traversed a large part of the heart of S. Africa, and walked about 11,000 miles, principally over country hitherto unexplored. His book was published in Nov. 1857. In Feb. 1858, he was appointed British consul for the Portuguese possessions in Africa, and left England shortly after.
Du Chaillu's travels in central Africa created much controversy and excitement in 1861.

Second expedition of Dr. Livingstone, March, 1858. Captains Speke and Grant announce the discovery of the source of the Nile in Lake Nyanza Victoria, 23 Feb. 1863.
[Capt. Speke was accidentally shot by his own gun while alone near Bath, 15 Sept. 1864.]
Some Dutch ladies unsuccessfully explore the White Nile, and undergo many privations, July, 1863—1864.
The "Universities Mission to east central Africa," consisting of a bishop, Charles F. Mackenzie, bishop of central Africa, and six clergymen and others, started Dec. 1860, and arrived at the Zambesi in Feb. 1861. All died from privations and disease except two, who returned in 1864. The bishop died 31 Jan. 1862; succeeded by Dr. Tozer.
Du Chaillu starts on a fresh expedition, 6 Aug. 1863; after being robbed, and undergoing many privations, returned to London near the end of 1865. He gave an account of his journey at a meeting of the Royal Geographical Society, 8 Jan. 1866.
Dr. Livingstone returns, 23 July, 1864.
Death of Dr. W. B. Baikie, at Sierra Leone, 30 Nov. 1864.
[He was sent as special envoy to the Negro tribes near the Niger by the Foreign Office about 1854. He opened commercial relations with central Africa.]
Mr. (afterwards sir) Samuel Baker discovered a lake, supposed to be another source of the Nile, which he named Lake Nyanza Albert, 14 March, 1864.
Dr. Livingstone appointed British consul for inner Africa, 24 March, 1865.
Narrative of Livingstone's Zambesi expedition 1853-64, published 1866.
Reports of the murder of Livingstone near Lake Nyassa, in Sept. 1866—March, 1867; doubted, July, 1867.
Expedition of E. D. Young in search of Livingstone, sailed 9 July, 1867, returned and reported to the Royal Geographical Society his conviction that Livingstone was alive, 27 Jan. 1868.
AFRICAN ASSOCIATION, for promoting the exploration of central Africa, was formed in June, 1788, principally by Sir Joseph Banks; and under its auspices many additions were made to African geography by Ledyard, Park, Burchardt, Hornemann, &c. It merged into the Royal Geographical Society in 1831.
AFRICAN CHURCH. In 1866 Robert Gray, bishop of Capetown (in consequence of a decision of the privy council; see *Church of England*), declared himself independent, and established synods of the "Church of South Africa."
AFRICAN COMPANY (merchants trading to Africa),

AFRICA, *continued.*

arose out of an association in Exeter, formed in 1588. A charter was granted to a joint-stock company in 1618; a third company was created in 1631; a fourth corporation in 1662; another was formed by letters-patent in 1672; remodelled in 1695. In 1821 the company was abolished.

AFRICAN INSTITUTION, founded in London in 1807, for the abolition of the slave trade, and the civilisation of Africa. Many schools have been established with success, particularly at Sierra Leone.

AGAPÆ (*agapē*, Greek for love, charity), "feasts of charity," referred to *Jude 12*, and described by Tertullian, of which the first Christians of all ranks partook, in memory of the last time when Christ ate with his disciples. Disorders creeping in, these feasts were forbidden to be celebrated in churches by the councils of Laodicea (366), and Carthage (390). They are still recognised by the Greek church, and are held in their original form weekly by the Sandemanians, and in some degree by the Moravians and Wesleyans.

AGAPEMONÉ (Greek, "the abode of love"), an establishment at Charlinch, near Bridgwater, Somersetshire, founded in 1845, where Henry James Prince,* and his deluded followers, formerly persons of property, live in common, professing to devote themselves to innocent recreation and to maintain spiritual marriage. The Agapemoné is described by Mr. Hepworth Dixon in his "Spiritual Wives," published in Jan. 1868.

AGE. Chronologers have divided the time between the creation and the birth of Christ into ages. Hesiod (about 850 B.C.) described the Golden, Silver, Brazen, and Iron Ages; see *Dark Ages*.

	B.C.		B.C.
FIRST AGE (from the Creation to the Deluge)	4004—2349	FOURTH AGE (to the founding of Solomon's Temple)	1490—1014
SECOND AGE (to the coming of Abraham into Canaan)	2348—1922	FIFTH AGE (to the capture of Jerusalem)	1014—588
THIRD AGE (to the Exodus from Egypt)	1921—1491	SIXTH AGE (to the birth of Christ)	588—4
		SEVENTH AGE (to the present time)	B.C. 4—A.D. 1868

AGE. In Greece and Rome twenty-five was full age for both sexes, but a greater age was requisite for the holding certain offices: *e.g.* thirty for tribunes; forty-three for consuls. In England the minority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, fixed at eighteen years; previously to completing which age, Henry VIII. had himself assumed the reins of government, in 1509.—A *male* of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the statute of wills, 7 Will. IV. and 1 Vict. c. 26, 1837, no will made by any person under the age of twenty-one years shall be valid. A *female* at twelve may consent to a marriage, at fourteen she may choose a guardian, and at twenty-one she is of age.

AGINCOURT (N. France), a village, where Henry V. of England, with about 9000 men, defeated about 60,000 French on St. Crispin's day, 25 Oct. 1415. Of the French, there were according to some accounts 10,000 killed, including the dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 1500 knights, and 14,000 prisoners, among whom were the dukes of Orleans and Bourbon, and 7000 barons, knights, and gentlemen. The English lost the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Henry V. soon after obtained the kingdom of France.

AGITATORS (or Adjutators), officers appointed by the English army in 1647, to take care of its interests: each troop or company had two. The protector Cromwell was eventually obliged to repress their seditious power. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions and the forces on the ground, and thus restored discipline. *Hume*.—Daniel O'Connell, called the *agitor of Ireland*, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, 5 July, 1828; the election being declared void, he was re-elected 30 July, 1829. After the passing of the Catholic emancipation bill, he agitated in vain for the repeal of the union, 1834 to 1843.

* Prince was born in 1811; educated for the medical profession and licensed to practise, 1832; gave it up for the Church and entered St. David's College, Lampeter, and there commenced ultra-revivalist movements in 1836; and finally claimed to be an incarnation of the Deity, with corresponding authority over his followers.

On 22 May, 1850, Thomas Robinson sought to recover the possession of his child from the care of its mother (from whom he had separated); the application was refused by the vice-chancellor, to "save the child from the pollution of the parent's teaching."—On 21 Aug. 1838, Miss Louisa Jane Nottidge died, having transferred her property to Mr. H. J. Prince. Her brother, Mr. Nottidge, by an action, recovered from Prince 572*l.*, as having been fraudulently obtained. Extraordinary disclosures were made during the trial, 25 July, 1860. In the autumn of 1860, the Rev. Mr. Price, after several vain attempts, succeeded in rescuing his wife from the Agapemoné. They had both been early supporters of it.

He died 15 May, 1847.—Richard Cobden and John Bright were the chief *Anti-corn-law agitators*, 1841-45.—Mr. Bright became a *Reform agitator* in 1866.

AGNADELLO (N. E. Italy). Here Louis XII. of France gained a great victory over the Venetians, some of whose troops were accused of cowardice and treachery; 14 May, 1509. The conflict is also termed the battle of the Rivolta.

AGNOITÆ (from *agnōia*, Greek, *ignorance*). I. A sect founded by Theophronius of Cappadocia about 370: said to have doubted the omniscience of God. II. The followers of Themistius of Alexandria about 530, who held peculiar views as to the body of Christ, and doubted his divinity.

AGONISTICI (from *agōn*, Greek, *a conflict*), also termed *circulores*, a branch of the Donatists (*which see*) in the 4th century. They preached with great boldness and incurred severe persecution.

AGRA (N. W. India), founded by Akbar in 1566, was the capital of the great mogul; see *Mausoleums*. In 1658 Aurungzebe removed to Delhi.—The fortress of Agra, “the key of Hindostan,” in the war with the Mahrattas surrendered to the British forces, under general Lake, 17 Oct. 1803, after one day’s siege: 162 pieces of ordnance and 240,000. were captured.—In June, 1857, the city was abandoned to the mutineers by the Europeans, who took refuge in the fort, from which they were rescued by major Montgomery and colonel Greathed.—Allahabad was made capital of the N. W. provinces of India, instead of Agra, in 1861.

AGRARIAN LAW (*Agraria lex*) decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by the consul Spurius Cassius, 486 B.C., and occasioned his judicial murder when he went out of office in 485.—An agrarian law was passed by the tribune Licinius Stolo, 376; and for proposing further amendments Tiberius Gracchus in 133, and his brother Cornelius in 121, were murdered. Julius Cæsar propitiated the plebeians by passing an agrarian law in 59 B.C.—In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as *Gracchus Babeuf*, editor of the *Tribun du Peuple*, in 1794. In 1796 he conspired against the directory with the view of obtaining a division of property, was condemned, and killed himself, 27 May, 1797.

AGRICOLA’S WALL, see *Roman Walls*.

AGRICULTURE. “Abel was a keeper of sheep, but Cain was a tiller of the ground,” *Genesis* iv. 2. The Athenians asserted that the art of sowing corn began with them; and the Cretans, Sicilians, and Egyptians made the same claim.

Cato the Censor (died 149 B.C.) and Varro (died 28 B.C.) were eminent Roman writers on agriculture. Virgil’s *Georgics*, 30 B.C. Agriculture in England improved by the Romans about A.D. 27. Fitzherbert’s “*Book of Husbandry*,” printed 1524. Tusser’s “*Five Hundred Points of Husbandry*” 1562. Blythe’s “*Improver*,” 1649. Hartlib’s “*Legacy*,” 1650.

Jethro Tull’s “*Horse hoeing Husbandry*,” 1701. About the end of the 18th century fallowing was gradually superseded by turnips and green crops. In Aug. 1855, a committee presented a report on the best mode of obtaining accurate Agricultural Statistics, which has not been acted on. There were, in 1831, 1,055,982 agricultural labourers in Great Britain, and in Ireland, 1,131,715.

AGRICULTURAL SOCIETIES.—The earliest mentioned in the British Isles was the Society of Improvers of Agriculture in Scotland, instituted in 1723. The Dublin Agricultural Society (1749) gave a stimulus to agriculture in Ireland; its origin is attributed to Mr. Prior of Rathdowney, Queen’s County, in 1731. The Bath and West of England Society established, 1777; and the Highland Society of Scotland, 1793. County Agricultural Societies are now numerous.

London Board of Agriculture established by act of parliament, 1793.

Francis, duke of Bedford, a great promoter of agriculture, died, 2 March, 1802.

Royal Agricultural Society of England established in 1838, by noblemen and gentlemen, the chief landed proprietors in the kingdom, and incorporated by royal charter, 26 March, 1840. It holds two meetings annually, one in London the other in the country; the first country meeting at

Oxford, in 1839. It awards prizes, and publishes a valuable journal. The London meeting at Battersea in June, 1862, was highly successful.

“Chambers of Agriculture” were established in France in 1851.

The Royal Agricultural College at Cirencester organised, 1842; chartered, 1845.

“*History of Agriculture and Prices in England* (1250-1400),” by Professor James T. Rogers, published, June, 1866.

AGRICULTURAL CHEMISTRY.—Sir Humphry Davy delivered lectures on this subject (afterwards published), at the instance of the Board of Agriculture, in 1812; but it excited little attention till the publication of Liebig’s work in 1840, which made a powerful impression. Boussingault’s “*Economie Rurale*,” an equally important work, appeared in 1844. The immoderate expectations from this study having been somewhat disappointed, a partial reaction took place. Liebig’s “*Letters on Agriculture*” appeared in 1859.

AGRICULTURAL HALL, Islington, N. London, chiefly for the meetings of the Smithfield Club. The foundation stone was laid by the president, Lord Berners, 5 Nov. 1861. The hall has been much used for industrial exhibitions, public meetings, equestrian performances, &c.

An exhibition of dogs opened here 24 June, 1862; and of horses and of donkeys, in July, 1864, 1865.

A great reform demonstration was made here, 30 July, 1866.

First annual cattle show, 6 Dec. 1862.

Grand ball to the Belgian visitors, volunteers and garde civique; prince of Wales present, 18 July, 1867.

Cattle show held here, Dec. 1867.

AGRICULTURE, *continued.*

AGRICULTURAL GANGS.—In the spring of 1867, most painful exposures were made of the prevalence of such cruelty and immorality in the gang system

in several of the eastern and midland counties; and in consequence an act was passed 20 Aug. for regulating these gangs, licensing gang-masters, &c.

The following table, drawn up by Mr. William Couling, C.E., in 1827,* is extracted from the Third Report of the Emigration Committee:—

Countries.	Cultivated.	Was es capable of Improvement.	Unprofitable.	Total.
	ACRES.	ACRES.	ACRES.	ACRES.
England	25,632,000	3,454,000	3,256,400	32,342,400
Wales	3,117,000	530,000	1,105,000	4,752,000
Scotland	5,265,000	5,950,000	8,523,930	19,738,930
Ireland	12,125,280	4,900,000	2,416,664	19,441,944
British Islands	383,690	166,000	569,469	1,119,159

AGRIGENTUM (now *Girgenti*), a city of Sicily, built about 582 B.C. It was governed by tyrants from 566 to 470; among these were Phalaris (see *Brazen Bull*); Alcarnanes; Theron who, with his step-father Gelon, defeated the Carthaginians at Himera; and Thrasydæus, his son, expelled in 470; when a republic was established. It was taken by the Carthaginians in 405 B.C., and held, except during short intervals, till gained by the Romans in 262 B.C. From A.D. 825 till 1086 it was held by the Saracens.

AHMEDNUGGUR (W. India), once capital of a state founded by Ahmed Shah, about 149. After having fallen into the hands of the Moguls and the Mahrattas, it was taken from the latter by Arthur Wellesley, 12 Aug. 1803, and annexed to the British dominions in 1817.

AIR or ATMOSPHERE. Anaximenes of Miletus (530 B.C.) declared air to be a self-existent deity, and the first cause of everything created. Posidonius (about 79 B.C.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lbs. to the square inch, was discovered by Torricelli A.D. 1645, and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others, the AIR-GUN of Guter of Nuremberg about 1656; the AIR-PUMP, invented by Otto von Guericke of Magdeburg about 1650; improved by the illustrious Boyle in 1657; and the AIR-PIPE, invented by Mr. Sutton, a brewer of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light and sound by Hooke, Newton, and Derham. The extension of our atmosphere above the surface of the earth, long considered as about 45 miles, was thought by admiral FitzRoy to be only about 9 or 10 miles (1862).—Its composition, about 77 parts of nitrogen, 21 of oxygen, and 2 of other matters (such as carbonic acid, watery vapour, a trace of ammonia, &c.), was gradually ascertained by Priestley (who discovered oxygen gas in 1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737. The researches of Dr. Schönbein, a German chemist of Basel, between 1840 and 1859, led to the discovery of two states of the oxygen in the air, which he calls *ozone* and *autozone*. Dr. Stenhouse's *Air-filters* (in which powdered charcoal is used) were first set up at the Mansion-house, London, in 1854. In 1858, Dr. R. Angus Smith made known a chemical method of ascertaining the amount of organic matter in the air; see *Oxygen, Nitrogen, Ozone, Atmospheric Railway, and Pneumatic Despatch*.—The force of compressed air has been employed in boring the Cenis tunnel (*which sec.*)

* At that period it was computed that the soil of the United Kingdom was annually cropped in the following proportions:—

	ACRES.		ACRES.
Wheat	7,000,000	Nursery grounds	21,210,000
Barley and rye	1,950,000	Inclosed fruit, flower, kitchen, and other gardens	20,000
Potatoes, oats and beans	6,500,000	Pleasure grounds	110,000
Turnips, cabbages, and other vegetables	1,150,000	Land depastured by cattle	21,000,000
Clover, rye-grass, &c.	1,750,000	Hedge-rows, copses, and woods	2,000,000
Fallow	2,800,000	Ways, water, &c.	2,100,000
Hop grounds	60,000		
Forward	21,210,000	Cultivated land	46,540,000

It was reckoned by the Agricultural Committee, that the cultivation of waste lands would yield above 20,000,000. a year. It was calculated in 1854 that there were in England 32,160,000 acres in cultivation, of the annual value of 37,412,000. Since that time, much land has been brought into cultivation; see *Wheat*.

AIX-LA-CHAPELLE (Aachen), a Roman city, now in Rhenish Prussia. Here Charlemagne was born 742, and died 814; having built the minster (796-804), and conferred many privileges on the city, in which fifty-five emperors have since been crowned. The city was taken by the French in 1792; retaken by the Austrians, 1793; by the French, 1794; reverted to Prussia, 1814.

First *Treaty of Peace* signed here was between France and Spain, when France yielded Franche Comté, but retained her conquests in the Netherlands, 2 May, 1668.

The second celebrated treaty between Great Britain, France, Holland, Germany, Spain, and Genoa. (By it the treaties of Westphalia in 1648, of Nimeguen in 1678 and 1679, of Ryswick in 1697, of Utrecht in 1713, of Baden in 1714, of the Triple

Alliance in 1717, of the Quadruple Alliance in 1718, and of Vienna in 1738, were renewed and confirmed.) Signed on the part of England by John, earl of Sandwich, and sir Thomas Robinson, 7 Oct. 1748.

Congress of the sovereigns of Austria, Russia and Prussia, assisted by ministers from England and France, held at Aix-la-Chapelle, and a convention signed, 9 Oct. 1818.

AJACCIO, see *Corsica*.

AJNADIN (Syria). Here the Mahometans defeated the army of the emperor Heraclius, 13 July, 633. They took Damascus in 634.

AKERMAN (Bessarabia). After being several times taken, it was ceded to Russia in 1812. Here the celebrated treaty between Russia and Turkey was concluded in 1826, which secured for the former the navigation of the Black Sea, recognised the Danubian principalities, &c.

AKHALZIKH (Armenia). Near here Prince Paskiewitch defeated the Turks, 24 Aug., and gained the city, 28 Aug. 1828.

ALABAMA, a Southern state, originally part of Georgia, N. America; made an independent state in 1819; commercial metropolis, Mobile. It seceded from the Union by an ordinance passed 11 Jan. 1861, and was reunited in 1865.*

ALAND ISLES (Gulf of Bothnia), taken from Sweden by Russians, 1809; see *Bomarsund*.

ALANI, a Tartar race, invaded Parthia, 75. They joined the Huns in invading the Roman empire, and were defeated by Theodosius, 379-382. They were subdued by the Visigoths, 452, and were eventually incorporated with them.

ALARCOS (Central Spain). Here the Spaniards under Alfonso IX., king of Castile, were totally defeated by the Moors, 19 July, 1195.

ALASKA, the name given to the Russian possessions in North America, purchased by the United States by treaty, 13 March, 1867. Sitka is the principal station.

ALBA LONGA, an ancient city of Italy, said to have been founded by Ascanius, son of Æneas, 1152 B.C. Its history is mythical.

ALBANIA, a province in European Turkey, formerly part of the ancient Epirus. The Albanians became independent during the decline of the Greek empire. They were successfully attacked by the Turks in 1388. About 1443, under George Castriot (Scanderbeg), they baffled the efforts of Mahomet II. to subdue them till the siege of Scutari in 1478, when they partially submitted. Albania became independent under Ali Pacha, of Janina, in 1812, who defeated the Turkish pchas, and governed ably, but cruelly and despotically, till Feb. 1822, when he and his two sons were slain, after surrendering under a solemn promise of safety. A revolt in Albania was suppressed in 1843.

ALBANS, ST. (Hertfordshire), near the Roman Verulam, derived its name from Alban the British protomartyr, said to have been beheaded during the persecution by Diocletian,

* The "*Alabama*," a steam-vessel belonging to the Southern States of North America, was built at Birkenhead, and sailed under a false name from the Mersey, 28 July, 1862. Under the command of captain Semmes it made much havoc in the Federal trading vessels. The *Alabama* was attacked and sunk by the Federal iron-clad *Kearsage*, captain Winslow, near Cherbourg, on Sunday morning, 19 June, 1864. Several of the crew were saved by Mr. John Lancaster in an English yacht.

† Traditions state, that Amulius dethroned his brother, and made Ilia, his daughter, a vestal, to assure his usurpation. Ilia was ravished, and became the mother of twins, for which Amulius ordered her to be buried alive, and her offspring to be thrown into the Tiber, 770 B.C. The little bark in which the infants were sent adrift stopped near mount Aventine, and was brought ashore by Faustulus, the king's chief shepherd, who reared the children as his own, and called them Romulus and Remus. His wife, Acca-Laurentia, was surnamed *Lupa*; whence arose the fable that Romulus and his brother were suckled by a she-wolf. At sixteen years of age, Romulus avenged the wrongs of Ilia and Numitor, 754 B.C., and the next year founded Rome. *Varro*.

23 June, 286. A stately monastery to his memory was erected about 793, by Offa, king of Mercia, who granted it many privileges. Its superior sat as premier abbot in parliament till the dissolution in 1539. Verulam was taken from Cassivelaunus by Julius Cæsar, 54 B.C., and retaken with much slaughter by Boadicea or Bunduica, queen of the Iceni, A.D. 61.

First Battle of St. Albans, when the Lancastrians were defeated, their leader, Edmund duke of Somerset, slain, and king Henry VI. taken prisoner, by the duke of York and his partizans, 22 or 23 May, 1455.
Second battle, queen Margaret totally defeated the

Yorkists under the earl of Warwick, and rescued the king, Shrove Tuesday, 17 Feb. 1461.
St. Albans incorporated by Edward VI. 1553.
Disfranchised for bribery, 17 June, 1852.

St. Alban's raid, see *United States*, 1804.

ALBANY or ALBAINN, the ancient name of the Scottish Highlands. The brother of Robert III. of Scotland was made duke of Albany in 1398. Frederick, son of George III., was duke of York and Albany. He died 5 Jan. 1827.

ALBERT MEMORIALS. The Prince Consort died on 14 Dec. 1861, deeply lamented by the whole civilised world. A meeting to organise a method of receiving contributions for a great national memorial was held at the Mansion-house, 14 Jan. 1862; and a large sum was quickly subscribed. 36,000*l.* had been received on 1 March, and 50,220*l.* on 11 June, 1862.

The nature of the memorial was referred to the queen herself. In a letter to the lord mayor, dated 19 Feb. 1862, sir Charles Grey says, on behalf of her majesty, "It would be more in accordance with her own feelings, and she believes with those of the country in general, that the monument should be directly personal to its object. After giving the subject her matured consideration, her majesty has come to the conclusion, that nothing would be more appropriate, provided it is on a scale of sufficient grandeur, than an obelisk to be erected in Hyde-park on the site of the Great Exhibition of 1851, or on some spot immediately contiguous to it. Nor would any proposal that could be made be more gratifying to the queen herself personally, for she can never forget that the prince himself had highly approved of the idea of a memorial of this character being raised on the same spot in remembrance of the Great Exhibition." In a second letter the queen expressed her intention of personally contributing towards erecting the memorial, that "it might be recorded in future ages as raised by the queen and people of a grateful country to the memory of its benefactor." Shortly after a committee was appointed to fulfil her majesty's desire. As a suitable block of granite could not be obtained, the proposal for an obelisk was given up. The queen approved of the design of Mr. Gilbert G. Scott for an Eleanor Cross, with a spire 150 feet high, accompanied by statues, &c., 22 April; parliament voted 50,000*l.*, in addition to the 60,000*l.* received by voluntary contributions, 23 April, 1863. The sculptors employed are M'Dowell, Foley, Theed, John Bell, and Armistead: material, Sicilian marble. (Jan. 1865.)

Inscription on the "Memorial Cairn" on a high mountain overlooking Balmoral palace:—"To the beloved memory of ALBERT the great and good Prince Consort, erected by his broken-hearted widow, VICTORIA R., 21 Aug. 1862." Upon another dressed slab, a few inches below the above, is this quotation:—"He being made perfect in a short time, fulfilled a long time: for his soul pleased the Lord, therefore hastened he to take him away from among the wicked."—*Wisdom of Solomon*, chap. iv. 13, 14.

A statue of the prince-consort (by Theed) inaugurated at Rosenau, his birth-place, in the presence of the queen and the royal family, 19 Aug. 1865.

"Early years of the Prince Consort": edited by the Hon. C. Grey; published 6 July, 1867.

Another statue by Theed at Balmoral, inaugurated 15 Oct. 1867.

Many other memorials of the prince have been set up throughout the empire.

ROYAL ALBERT HALL OF ARTS AND SCIENCES; The erection of a great building for congresses, concerts, &c., was proposed by the prince-consort at the close of the exhibition of 1851, and an estate at Kensington was purchased; a committee, with the prince of Wales at the head, to erect the building, was appointed 6 July, 1855; circulars soliciting subscriptions were issued April 1866; and the first stone was laid by the queen, 20 May, 1867.

ALBERT MEDAL, to be awarded to persons who endanger their lives by saving others from shipwreck, appointed by royal warrant, 3 March, 1866. The first was given to Samuel Popplestone on 14 May, 1866, for saving life on 23 March previous.

ALBIGENSES, a name given to various persons who opposed the doctrines and corruptions of the church of Rome, living at Albige, in Languedoc, and at Toulouse in the 12th century. They were persecuted as Manichæans, 1163, and a crusade (proclaimed by pope Innocent III.) commenced against them in 1207. Simon de Montfort commanded, and at Bezières he and the pope's legate put friends and foes to the sword, saying, "God will find his own!" At Minerba he burnt 150 of the Albigenes alive; and at La Vaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering other women. He next defeated the count of Toulouse, but was himself killed in 1218. Louis VIII. and IX., kings of France, patronised the crusade; count Raymond was subdued in 1229; and the heretics were given up to the Inquisition. See *Waldenses*.

ALBION (probably derived from *albus* or *alp*, white). Britain is said to have been so called by Julius Cæsar and others, on account of the chalky cliffs upon its coast.

ALBUERA or ALBUHERA, Estremadura, Spain, where a battle was fought between the French, commanded by marshal Soult, and the British and Anglo-Spanish army, under marshal, afterwards lord Beresford, 16 May, 1811. The allies obtained the victory, one of the most brilliant achievements of the war. The French loss exceeded 8000 men previously to their retreat; but the allies lost a large number. The chief brunt of the action fell on the British; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had

mounted a hill, fell,—out of the 57th regiment alone; and the other regiments were scarcely better off, not one-third being left standing; “1500 unwounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill.” *Napier*.

ALBUFERA (Spain, East Central), a lagoon, near which the French marshal Suchet (afterwards duke of Albufera) defeated the Spaniards under Blake, 4 Jan. 1812: this led to his capture of Valencia on 9 Jan.

ALCALA, Spain, near the Roman Complutum. At the university here was printed the Complutensian Polyglott bible, at the expense of cardinal Ximenes 1502-14.

ALCANTARA, an illustrious Spanish military order of knighthood, established in 1156. The sovereign of Spain has been grand master since 1495.

ALCAZAR-QUIVER, near Fez, N. W. Africa, where the Moors totally defeated the Portuguese, whose gallant king Sebastian was slain, 4 Aug. 1578. The Portuguese disbelieved his death and long expected his return; this led to the appearance of five impostors.

ALCHEMY, the forerunner of chemistry: its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an alkahest or universal menstruum, and the elixir of life.* The alchemists assert that their founder was Hermes *Trismegistus* (thrice greatest), an ancient Egyptian king.—Pliny says, the emperor Caligula was the first who prepared natural arsenic, in order to make gold of it, but left it off, because the charge exceeded the profit. Zosimus wrote on the subject about 410. The Arabians cultivated alchemy and were followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, Raymond Lullius, Basil Valentine (born 1394), Paracelsus (died 1541), and others.—In 1404 the craft of multiplying gold and silver was made felony by 5 Hen. IV. c. 4, which act was repealed in 1689. A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1476. *Rymer's Fœd.* Dr. Price, of Guildford, in 1782 published an account of his experiments and brought specimens of gold to the king, affirming that they were made by means of a red and white powder. Being a fellow of the Royal Society, he was required, upon pain of expulsion, to repeat his experiments before Messrs. Kirwan and Wolfe (some say Higgins); but after much equivocation and delay he took poison and died, Aug. 1783.

ALCOHOL. Pure spirit of wine or hydrated alcohol is said to have been obtained by the distillation of fermented liquors by Abucasis in the 12th century; and the dehydration of this liquor to have been partially effected by Raymond Lullius in the 13th century by carbonate of potassium. Alcohol has never been reduced to the solid state, but becomes viscid at very low temperatures. In 1820, Faraday and Hennell obtained traces of alcohol by passing olefant gas (bi-carburetted hydrogen) through sulphuric acid; and in 1862 this process was examined and confirmed by Berthelot; see *Distillation, Spirits, Brandy, Gin, Rum*.

AL-CORAN or AL-KORAN, see *Koran, Mahometanism, &c.*

ALDERMAN. The Saxon *ealdorman* was next to the king and frequently a viceroy: but after the settlement of the Danes the title was gradually displaced by that of *earl*. Aldermen in corporations are next in dignity to the mayor. They were appointed in London (where there are twenty-six) in 1242; and in Dublin (where there are twenty-four) in 1323. Aldermen chosen for life, instead of annually, 17 Rich. II. 1394. Present mode of election established 11 Geo. I. 1725. Aldermen made justices of the peace 15 Geo. II. 1741.

ALDERNEY (English Channel, with Jersey, &c.), was incorporated with the kingdom by William the Conqueror, 1066. The “Race” is celebrated for two fatal occurrences; William of Normandy, son of Henry I. of England, and many young nobles (140 youths of the principal families of France and Britain), were overtaken by a storm, and all lost, 25 Nov. 1120. The British man-of-war *Victory*, of 100 guns and 1160 men, was wrecked here, 5 Oct. 1744; the admiral, sir John Balchen, and all his crew perished. Through this strait the French escaped after their defeat at La Hogue by admiral Rooke, 19 May, 1692.

ALDERSHOT CAMP, a moor near Farnham, about 35 miles from London. In April, 1854, the War office, having obtained a grant of 100,000*l.*, purchased 4000 acres of land for a permanent camp for 20,000 men.

Additional land purchased in 1856.
Barracks since erected for 4000 infantry, 1500 cavalry, and several batteries of artillery. Great improvements in military cookery introduced (see *Cookery*) under the superintendence of captain John Grant, 1857.
Visited by the queen, 19 April, 1856.

The troops returned from the Crimea, reviewed by her, 7, 16 July.
About 15,000 men were stationed here, 1859.
Cost, said to be 1,291,531*l.* up to Feb. 1860.
An industrial and fine-art exhibition, furnished by officers and men and their wives, opened 29 June, closed 14, July, 1864.

* M. Martin Ziegler patented a method of producing a “vital fluid” by combining nitrogen and carbon in a porous cell containing ammonia, immersed in a vessel filled with molasses. The current was to flow through silk threads attached to the vessel.

ALDINE PRESS, that of Aldus Manutius, at Venice, where were printed many of the first editions of the Greek, Latin, and Italian classics, commencing in 1494 with Musæus.

ALE, BEER (and Wine) are said to have been invented by Bacchus; the first in Egypt, where the soil was considered unable to produce grapes. Ale was known as a beverage at least in 404 B.C. Herodotus ascribes the first discovery of the art of brewing barley-wine to Isis, the wife of Osiris.—A beverage of this kind is mentioned by Xenophon, 401 B.C. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. *Tacitus*. Ale-houses are made mention of in the laws of Ina, king of Wessex (A.D. 688). Booths were set up in England 728, when laws were passed for their regulation. Ale-houses were subjected to regulation by 5 & 6 Edw. VI. c. 25 (1551). By 1 James I. c. 9 (1603), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excise duty on ale and beer was imposed by the parliament in 1643, and continued by Charles II. (1660); see *Beer, Porter, Wine*.

ALEMANNI or ALL MEN (*i.e.* men of all nations), hence *Allemand*, German. A body of Sævi, who took this name, were defeated by Caracalla, 214. After several repulses, they invaded the empire under Aurelian, who subdued them in three battles, 270. They were again vanquished by Julian, 356, 357. They were defeated and subjugated by Clovis at Tolbiac (or Zulpich), 496. The Suabians are their descendants.

ALENÇON (N. France) gave title to a count and duke.

ALEPPO, N. Syria, a large town named Bercea by Seleucus Nicator about 299 B.C. The pachalic of Aleppo is one of the five governments of Syria. It was taken by the Turks, A.D. 638, who restored its ancient name Haleb or Chaleb; by Saladin, 1193; and sacked by Timour, 1400. Its depopulation by the plague has been frequent; 60,000 persons were computed to have perished by it in 1797; many in 1827. The cholera raged here in 1832. Aleppo suffered severely from the terrible earthquakes in 1822 and 1830; and has often been the scene of fanatical massacres. On 16 Oct. 1850, the Mahometans attacked the Christians, burning everything. Three churches were destroyed, five others plundered, and thousands of persons slain. The total loss of property amounted to about a million sterling; no interference was attempted by the pacha.

ALESSANDRIA, a city of Piedmont, built in 1168 under the name of Casarea by the Milanese and Cremonese, to defend the Tanaro against the emperor, and named after pope Alexander III. It has been frequently besieged and taken. The French took it in 1796, but were driven out 21 July, 1799. They recovered it after the battle of Marengo, in 1800, and held it till 1814, when the strong fortifications erected by Napoleon were destroyed. They have been restored, since June, 1856.

ALEUTIAN ISLES, in the Pacific Ocean, discovered by Behring, 1741, visited by Cook, and settled by Russians, 1785.

ALEXANDER, ERA OF, dated from the death of Alexander the Great, 12 Nov. 323 B.C. In the computation of this era, the period of the Creation was considered to be 5502 years before the birth of Christ, and, in consequence, the year 1 A.D. was equal to 5503. This computation continued to the year A.D. 284, which was called 5786. In the next year (A.D. 285), which should have been 5787, ten years were discarded, and the date became 5777. This is still used in the Abyssinian era (*which see.*) The date is reduced to the Christian era by subtracting 5502 until the year 5786, and after that time by subtracting 5492.

“ALEXANDRA CASE,” see *Trials*, 1862-64.

ALEXANDRA PARK, Muswell Hill, London, N. purchased by a company, and named after the princess of Wales, was opened with a flower show, 23 July, 1863. A portion of the Exhibition building of 1862 was to be erected here. The work proceeded rapidly in 1864, was suspended in 1865, recommenced in 1866, and made good progress, 1867.

ALEXANDRIA (Egypt), the walls whereof were six miles in circuit, was founded by Alexander the Great, 332 B.C. who was buried here, 322. It became the residence of the Greek sovereigns of Egypt, the Ptolemies, 323.

ALEXANDRIAN CODEX, a MS. of the Septuagint translation of the bible in Greek, said to have been transcribed by a lady named Thecla, in the 6th century, and to have belonged to the patriarch of Alexandria in 1098. It was presented to Charles I. of England in 1628 by Cyrillus Lascaris, patriarch of Constantinople, and was placed in the British Museum in 1753. It was printed in fac-simile, 1786-1821.

ALEXANDRIAN ERA, see *Mundane*.

ALEXANDRIAN SCHOOLS OF PHILOSOPHY. The first school arose soon after the foundation of Alexandria, 332 B.C. It flourished under the patronage of the Ptolemies till about 100 B.C. It included Euclid (300), Archimedes (287-212), Apollonius (250), Hipparchus (150), and Hero (150). The second school arose about A.D. 140, and lasted till about 400. Its most eminent members were Ptolemy, the author of the Ptolemaic system (150), Diophantus the arithmetician (200), and Pappus the geometer (350).

ALEXANDRINES, verses of twelve syllables, first written by Alexander of Paris, about 1164, and since called after him. The last line of the Spenserian stanza is an Alexandrine. In Pope's *Essay on Criticism*, this verse is thus happily exemplified:—

“A needless Alexandrine ends the song,
 That, like a wounded snake, drags its slow length along.”

The longest English poem wholly in Alexandrine verse is Drayton's *Polyolbion*, published 1612-22.

ALFORD (N. Scotland), BATTLE OF. General Baillie, with a large body of Covenanters, was defeated by the marquess of Montrose, 2 July, 1645.

ALGEBRA: Diophantus, said to be the inventor, first wrote upon it, between the 3rd and 5th centuries. It was much cultivated in the 9th century by the Arabs, who brought it into Spain; and in Italy by Leonardo Bonaccio of Pisa, in 1220. In 1494 Luca Paciolo published the first printed book on algebra in Europe. *Serret*. Some of the algebraic signs were introduced either by Cristophe Rudolph (1522-6) or Michael Stifelius of Nuremberg, 1544, and others by Francis Vieta, in 1590, when algebra came into general use. *Moreri*. Descartes applied algebra to geometry about 1637. The binomial theorem of Newton, the basis of the doctrine of fluxions, and the new analysis, 1668. Dean Peacock's “Algebra” is a first-class work.

ALGERIA, see *Algiers*.

ALGESIRAS or OLD GIBRALTAR (S. Spain). Here the Moors entered Spain in 711, and held it till 1344.—Two engagements took place here between the English fleet under sir James Saumarez and the united French and Spanish fleets, 6 and 12 July, 1801. In the first the enemy was victorious, the English losing the *Pompey*; but their honour was redeemed in the latter conflict, the *San Antonio*, 74 guns, being captured. Two Spanish ships fired on each other by mistake, and took fire; of 2000 men on board, 250 were saved by the English. *Alison*.

ALGIERS, now ALGERIA, N.W. Africa; part of the ancient Mauritania, which was conquered by the Romans, 46 B.C.; by the Vandals, A.D. 439; recovered for the empire by Belisarius, 534; and subdued by the Arabs about 690. Population of Algeria; in 1862, 2,999,164.

ALHAMBRA, a Moorish palace and fortress near Granada, S. Spain, founded by Mohammed I. of Granada about 1253. It surrendered to the Christians about Nov. 1491. The remains have been described in a magnificent work by Owen Jones and Jules Gourey, published 1842-5. A fac-simile of a part of this palace in the Crystal Palace at Sydenham, was destroyed by the fire, 30 Dec. 1866.—The Panopticon (*which see*) was opened as a circus, &c., under this name, in March 1858. The Alhambra Palace Company, incorporated in July 1863, applied for dissolution in Jan. 1865.

ALI, SECT OF. Ali married Mahomet's daughter Fatima, about 632, and became vizier, 613; and caliph 655. Ali was called by the prophet, "the lion of God, always victorious;" and the Persians follow the interpretation of the Koran according to Ali, while other Mahometans adhere to that of Abubeker and Omar. Ali was assassinated in 660. †—The Shiite sect have been termed Fatimites from having been supported by an alleged descendant of Ali and Fatima who established a dynasty in Egypt.

ALIENS or FOREIGNERS, were banished in 1155, being thought too numerous. In 1343 they were excluded from enjoying ecclesiastical benefices. By 2 Rich. II. st. 1, 1378, they were much relieved. When they were to be tried criminally, the juries were to be half foreigners, if they so desired, 1430. They were restrained from exercising any trade or handicraft by retail, 1483, a prohibition which was relaxed in 1663.

* He, with his suite, embarked at Oran, and landed at Toulon on 28 Dec. following. He was removed to the castle of Amboise, near Tours, 2 Nov. 1848, and released from his confinement by Louis Napoleon, 16 Oct. 1852, after swearing on the Koran never to disturb Africa again; he was to reside henceforward at Broussa, in Asia Minor; but in consequence of the earthquake at that place 28 Feb. 1855, he removed to Constantinople. In July, 1860, Abd-el-Kader held the citadel of Damascus, and there protected many of the Christians whom he had rescued from the massacres then in perpetration by the Turks. He received honours from the English, French, and Sardinian sovereigns. He visited Paris and London in Aug. 1865.

ALJUBARROTA, Portugal. Here John I. of Portugal defeated John I. of Castile, and secured his country's independence 14 Aug. 1385; see *Batalha*.

ALKALIES (from *kali*, the Arabic name for the plant from which an alkaline substance was first procured) are ammonia, potash, soda, and lithia. Black discovered the nature of the difference between caustic and mild alkalies in 1736.

The fixed alkalies, potash and soda, decomposed, and the metals potassium and sodium formed, by Humphry Davy at the Royal Institution, London, 1807.

Dr. Ure invented an alkalinometer, 1816.

The manufacture of alkalies, very extensive in Lancashire and Cheshire, are based on the decomposition of common salt (chloride of sodium), by a process invented by a Frenchman named Le Blanc, about 1792.

Mr. Losh obtained crystals of soda from brine about 1814. Various modifications of these processes are now in use.

"Alkali works" are defined as works for the manufacture of alkali, sulphates of soda, sulphate of potash, and in which muriatic gas is evolved.

Mr. Wm. Gossage's process for condensing muriatic acid gas patented in 1836. In consequence of the injury to vegetation produced by the alkali works in Lancashire and Cheshire, the Alkali act "for the more effectual condensation [of 95 per cent.] of muriatic acid gas" (or hydrochloric acid) was passed, 28 July, 1863. It came into operation 1 Jan. 1864, and has proved beneficial.

ALKMAER, see *Bergen*.

ALLAHABAD (N. W. Hindostan), the "holy city" of the Indian Mahometans, situated at the junction of the rivers Jumna and Ganges. The province of Allahabad was successively subject to the sovereigns of Delhi and Oude, but in 1803 was wholly incorporated with the British possessions. By treaty here, Bengal, &c., was ceded to the English in 1765.—During the Indian mutiny several sepoy regiments rose and massacred their officers, 4 June, 1857; colonel Neil marched promptly from Benares and suppressed the insurrection. In Nov. 1861, lord Canning made this city the capital of the N. W. provinces.

ALLEGIANCE, see *Oaths*.

ALLEGORY abounds in the bible and in Homer: see Jacob's blessing upon his sons, *Genesis* xlix. (1689 B.C.), *Psalms* lxxx., and all the prophets. Spenser's *Faerie Queene* (1590) and Bunyan's *Pilgrim's Progress* (1678) are allegories throughout. The *Spectator* (1711), by Addison, Steele, and others, abounds in allegories.

ALLIA (Italy), a small river flowing into the Tiber, where Brennus and the Gauls defeated the Romans, 16 July, 390 B.C. The Gauls sacked Rome and committed so much injury that the day was thereafter held to be unlucky (*nefas*), and no public business was permitted to be done thereon.

ALLOTMENTS, see *Land*, note.

ALL SAINTS' DAY (Nov. 1), or All-Hallows, a festival said to have been begun by pope Boniface IV. about 607, and celebrated in the Pantheon at Rome, and established by pope Gregory IV. (about 830) for the commemoration of all those saints and martyrs in whose honour no particular day is assigned. The reformers of the English church, 1549, struck out of their calendar altogether a great number of anniversaries, leaving only those which at *their time* were connected with popular feeling or tradition.

ALL SOULS' DAY (2 Nov.), a festival of the Roman Catholic church to commemorate the souls that are in purgatory, instituted, it is said, at Cluny about 993 or 1000.

ALMA, a river in the Crimea, near which was fought a great battle on 20 Sept. 1854. (See *Russo-Turkish War* and *Crimea*.) The English, French, and Turkish army (about 57,000 men) moved out of their first encampment in the Crimea on 19 Sept., and bivouacked for the night on the left bank of the Bulganac. The Russians (commanded by prince Menschikoff),

mustering 40,000 infantry, had 180 field-pieces on the heights, and on the morning of 20 Sept. were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces under lord Raglan, consisted of 26,000 men; the French of 24,000, under Marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river Alma was crossed, while prince Napoleon took possession of the village under the fire of the Russian batteries. At 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 5000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men killed, and 73 officers and 1539 men wounded (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed, and 54 officers and 1033 men wounded. Total loss of Allies, about 3300.

ALMACK'S ASSEMBLY-ROOMS, King-street, St. James's, London, at first very exclusive, were erected by a Scotchman named Almack, and opened 12 Feb. 1765. They are now termed Willis's rooms from the present proprietors.

ALMANACS (from the Arabic *al manah*, to count).* The Egyptians computed time by instruments; and the Alexandrians had almanacs, and log calendars are ancient. In the British Museum and universities are specimens of early almanacs. Michael Nostradamus the astrologer, wrote an almanac in the style of Merlin, 1556. *Dufresnoy*. Professor Augustus De Morgan's valuable "*Book of Almanacs*," with an index of reference, by which the almanac may be found for every year," was published in March, 1851. Among the earlier and more remarkable almanacs were

ALMANZA (S. E. Spain). Here on 25 April (O. S. 14), 1707, the English, Dutch, and Portuguese forces under the earl of Galway, were totally defeated by the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II.). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

ALMEIDA (Portugal), a frontier town, captured by Massena, 27 Aug. 1810. The French crossed into Spain, leaving a garrison at Almeida, blockaded by the English, 6 April, 1811. Almeida was retaken by Wellington (11 May), who eventually compelled Massena to retire from Portugal, his route being tracked by horrid desolation.

ALMENARA, a village N. E. Spain, where on 28 July, 1710, an English and German army defeated the Spanish army supporting Philip V., the grandson of Louis XIV. of France. Stanhope, the English general, killed the Spanish general, Amezaga, in single conflict; an act almost unexampled in modern warfare.

ALMOHADES, Mahometan partisans, followers of El-Mehedi in Africa, about 1120. They subdued Morocco 1145; entered Spain and took Seville, Cordova, and Granada, 1146-56; ruled Spain till 1232, and Africa till 1278.

ALMONER, an office anciently allotted to a dignified clergyman who gave the first dish from the royal table to the poor, or an alms in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France was the highest ecclesiastical dignity in that kingdom before the revolution, 1789. Queen Victoria's almoner (now the bishop of Oxford) or his sub-almoner distributes the queen's gifts on *Maundy Thursday* (*whicb see*).

ALMORAVIDES, Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohades in 1147.

* The Stationers' company claimed the exclusive right of publishing almanacs in virtue of letters patent from James I., granting the privilege to them and the two Universities; but the monopoly was broken up by a decision of the Court of Common Pleas in 1775. A bill to renew the privilege was lost in 1779. The stamp duty on English almanacs first imposed in 1710, was abolished in August, 1834; since when almanacs have become innumerable, being issued by tradesmen with their goods. Of Moore's (under the management of Henry Andrews, the able computer of the *Nautical Ephemeris*) at one time upwards of 430,000 copies were annually sold. He died in 1820. Of *Foreign Almanacs*, the principal are the "*Almanach de France*," first published in 1699, and the "*Almanach de Gotha*," 1764.

ALMSHOUSES for aged and infirm persons have been erected by many public companies and benevolent individuals, particularly since the abolition of religious houses at the Reformation in the 16th century. A list of them, with useful information, will be found in "Low's Charities of London," ed. 1862.

Cornelius Van Dun founded the Red Lion almshouses, Westminster	1577	Dame Owen's almshouses, Islington, built in 1613 (in gratitude for her escape from an arrow-shot), were rebuilt by the Brewers' company	1839
Emmanuel College, Westminster, founded by Lady Dacre	1594	Bancroft's almshouses, Mile End, were erected	1735
Whittington's almshouses founded in 1621, were rebuilt near Highgate-hill by the Mercers' company	1826	The London almshouses, in commemoration of the passing of the Reform Bill, built at Brixton	1833
The Fishmongers' company founded almshouses in 1618, and rebuilt them on Wandsworth common	1850	Numerous almshouses since erected for printers, bookbinders, &c.	
Haberdashers' almshouses, Hoxton, founded by Robert Aske	1692		

ALNEY, an island on the Severn, Gloucestershire. Here a combat is asserted to have taken place between Edmund Ironside and Canute the Great, in sight of their armies. The latter was wounded, and proposed a division of the kingdom, the south part falling to Edmund. Edmund was murdered at Oxford shortly after it is said by Ædic Streon, and Canute obtained possession of the whole kingdom, 1016.

ALNWICK (Saxon *Ealnwic*), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesco. It has belonged to the Percies since 1310. Malcolm, king of Scotland, besieged Alnwick in 1093, when he and his sons were killed. It was taken by David I. in 1136, and attempted in 1174 by William the Lion, who was defeated and taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparing expense.

ALPACA (or Paco), a species of the S. American quadruped, the Llama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory, &c. (covering 11 acres), was erected at Saltaire, near Shipley, Yorkshire, by Mr. Titus Salt in 1852.

ALPHABET. Athotes, son of Menes, is said to have been the author of hieroglyphics, and to have written thus the history of the Egyptians, 2122 B.C. *Blair*. But Josephus affirms that he had seen inscriptions by Seth, the son of Adam : this is deemed fabulous.

The Egyptian alphabet is ascribed to Memnon 1822 B.C.

The first letter of the Phœnician and Hebrew alphabet was *aleph*, called by the Greeks *alpha*, and abbreviated by the moderns to A. The Hebrew is supposed to be derived from the Phœnician.

Cadmus the founder of Cadmea, 1493 B.C., is said to have brought the Phœnician letters (fifteen in number) into Greece, viz. :—A, B, Γ, Δ, I, K, Λ, M, N, O, Π, P, Σ, T, Y. These letters were originally either Hebrew, Phœnician, or Assyrian characters, and changed gradually in form till

they became the ground of the Roman letters, now used all over Europe. Palamedes of Argos invented the double characters, Θ, X, Φ, Ξ, about 1224 B.C. ; and Simonides added, Ζ, Ψ, Η, Ω, about 489 B.C. *Arundelian Marbles*.—When the E was introduced is not precisely known. The Greek alphabet consisted of 16 letters till 399 (or 403) B.C., when the Ionic of 24 characters was introduced. The small letters are of later invention. The alphabets of the different nations contain the following number of letters :—

English 26	German 26	Greek 24	Turkish 28
French 25	Slavonic 42	Hebrew 22	Sanscrit 44
Italian 20	Russian 35	Arabic 28	Chinese radical characters 214
Spanish 27	Latin 22	Persian 32	

ALPHONSINE TABLES, astronomical tables, composed by Spanish and Arab astronomers, and collected in 1253 under the direction of Alphonsus X. of Castile, surnamed the Wise, who is said to have expended upwards of 400,000 crowns in completing the work ; he himself wrote the preface. The Spanish government ordered the works of Alphonso to be reprinted from the best MSS. ; four volumes have appeared (1863-6).

ALPS, European mountains. Those between France and Italy were passed by Hannibal, 218 B.C., by the Romans, 154 B.C., and by Napoleon I. May, 1800. Roads over Mont Cenis and the Simplon, connecting France and Italy, were constructed by order of Napoleon, between 1801-6 ; see *Simplon*. A sub-alpine tunnel through Mont Cenis to connect Savoy and Piedmont has been in progress since 1857.* In 1859 the "Alpine Club," which consists of British travellers in the Alps, published their first work, "Peaks, Passes, and Glaciers ;" see *Matterhorn*.

* At first the boring was effected by ordinary machinery ; in 1860 steam power was employed ; but afterwards compressed air was used as a motive power with great success. It is confidently expected that the tunnel will be completed in 1870. [Excavated 6374 metres ; to excavate 5845 metres, 31 Dec. 1866.] In 1865 Messrs. Brassey proposed laying down a line of steeply inclined railway for 47 miles, to be used till the tunnel is completed ; see *Railways*, 1867.

ALSACE (N. E. France), formerly part of the kingdom of Austrasia, now the departments of the Upper and Lower Rhine. It was incorporated with the German empire in the 10th century. A portion was restored to France, 1648, and the whole, including Strasburg, in 1697. The precinct of Whitefriars, London, called *Alsatia*, is described in Scott's "Fortunes of Nigel." Its privilege of sanctuary was abolished in 1697.

ALTAR. One was built by Noah, 2348 B.C. (*Gen.* viii. 20); others by Abraham, 1921 (*Gen.* xii. 8). Directions for making an altar are given *Exod.* xx. 24, 1491 B.C. Altars were raised to Jupiter, in Greece, by Cecrops, 1556 B.C. He introduced among the Greeks the worship of the deities of Egypt. *Herodotus*. The term "altar" was applied to the Lord's table for the first three centuries after Christ (*Heb.* xiii. 10). Christian altars in churches were instituted by pope Sixtus I., A.D. 135; and were first consecrated by pope Sylvester. The first Christian altar in Britain was in 634. *Stow*. The church of England terms the table on which the elements are placed an *altar*. Since the time of Elizabeth there has been much controversy on the subject, and the Puritans in the civil war destroyed many of the ancient stone altars, substituting wooden tables. In 1845 it was decided in the Arches Court that *stone altars* were not to be erected in English churches.

ALTER EGO (*another or second I*), a term applied to Spanish viceroys when exercising regal power; used at Naples when the crown prince was appointed vicar-general during an insurrection in July, 1820.

ALT-RANSTADT (Prussia), where the treaty of peace dictated by Charles XII. of Sweden, to Frederick Augustus of Poland, was signed 24 Sept. 1706, o.s. Frederick deposed, in 1704, regained the throne of Poland after the defeat of Charles XII., in 1709.

ALUM is said to have been first discovered at Roccha, in Syria, about 1300; it was found in Tuscany about 1470; was brought to perfection in England by sir T. Challoner, who established large alum works near Whitby in 1608; was discovered in Ireland in 1757; and in Anglesey in 1790. Alum is a salt used as a mordant in dyeing; and also to harden tallow, to whiten bread, and in the paper manufacture. It may be made of pure clay exposed to vapours of sulphuric acid, and sulphate of potash added to the ley; but is usually obtained by means of an ore called alum slate.

ALUMBAGH, a palace with other buildings near Lucknow, Oude, India, taken from the rebels and heroically defended by the British under sir James Outram during the mutiny, Sept. 1857. He defeated an attack of 30,000 sepoy on 12 Jan. 1858, and of 20,000 on 21 Feb. He was relieved by sir Colin Campbell in March.

ALUMINIUM, a metal, the base of the earth alumina, which is combined with silica in clay, and which was shown to be a distinct earth by Marggraff in 1754, having been previously confounded with lime. Oerstedt in 1826 obtained the chloride of aluminium; and in 1827 the metal itself was first obtained from it by F. Wöhler, but was long a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste.-Claire Deville, who in 1856 succeeded in procuring considerable quantities of this metal. It is very light (sp. g. 2.25), malleable, and sonorous; when pure does not rust, and is not acted on by sulphur or any acid except hydrochloric. These qualities will render it very useful when improved processes render it cheaper. In March, 1856, it was 3*l.* the ounce; in June, 1857, 11*s.* or 12*s.*, and it is now much cheaper (1868). The eagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, "*De l'Aluminium*," was published in 1859. An aluminium manufactory was established at Newcastle in 1860, by Messrs. Bell. They obtain the metal from a French mineral, bauxite. Their aluminium bronze, an alloy of copper and aluminium, invented by Dr. John Percy, F.R.S., was made into watch-cases, &c., by Messrs. Reid of Newcastle, in 1862.

AMADIS OF GAUL, a Spanish or Portuguese romance, stated to have been written about 1342 by Vasco de Lobeiro. It was translated and enlarged by De Montalvo, about 1485.

AMALEKITES (descendants of Amalek, grandson of Esau or Edom, the brother of Jacob) attacked the Israelites 1491 B.C., when perpetual war was denounced by God against them. They were subdued by Saul about 1079; by David, 1058, and 1056; and by the Simeonites about 715 B.C.

AMALFI, a city on the gulf of Salerno, Naples, in the 8th century became the seat of a republic, and flourished by its commerce till 1075, when it was taken by Roger Guiscard, and eventually was incorporated with Naples. The Pisans, in their sack of the town in 1135, are said to have found a copy of the Pandects of Justinian, and thus to have induced the revival of the study of Roman law in Western Europe; the story is doubted. Flavio Gioia, a native of Amalfi, is the reputed discoverer of the mariner's compass, about 1302.

AMAZON, West India mail steam ship, left Southampton on her first voyage, Friday, 2 Jan. 1852, and on Sunday morning, Jan 4, was destroyed by fire at sea, about 110 miles W. S. W. of Scilly (ascribed to the spontaneous ignition of combustible matter placed near the engine-room). Out of 161 persons on board, 102 persons must have perished by fire or drowning, 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galliot. Eliot Warburton, a distinguished writer in general literature, was among those lost.

AMAZONIA (S. America) was discovered by Francisco Orellana, in 1540. Coming from Peru, he sailed down the river Amazon to the Atlantic, and observing companies of women in arms on its bank, he called the country Amazonia, and gave the name of Amazon to the river, which had previously been called Maranon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambuscades by their enemies. Their widows resolved to form a female state, and having firmly established themselves, they decreed that matrimony was a shameful servitude. *Quintus Curtius*. They were said to have been conquered by Theseus, about 1231 B. C. The Amazons were constantly employed in wars; and that they might throw the javelin with more force, their right breasts were burned off, whence their name from the Greek, *a*, no, *mazos*, breast. Others derive the name from *maza*, the moon, whom they are supposed to have worshipped. About 330 B. C. their queen, Thalestris, visited Alexander the Great, while he was pursuing his conquests in Asia; three hundred females were in her train. *Herodotus*.

AMBASSADORS. Accredited agents, and representatives from one court to another, are referred to early ages. In most countries they have great privileges; and in England, they and their servants are secured against arrest. England usually has twenty-five ambassadors or envoys extraordinary, and about thirty-six chief consuls, resident at foreign courts, exclusive of inferior agents; the ambassadors and other chief agents from abroad at the court of London in 1865, were 47; in 1868, 43.

The Russian ambassador's being imprisoned for debt by a lace-merchant, 27 July, 1708, led to the passing the statute of 7 Anne, for the protection of ambassadors, 1708.

Two men, convicted of arresting the servant of an ambassador, were sentenced to be conducted to the house of the ambassador, with a label on their

breasts, to ask his pardon, and then one of them to be imprisoned three months, and the other fined, 12 May, 1780.

The first ambassador from the United States of America to England, John Adams, presented to the king, 1 June, 1785; the first from Great Britain to America was Mr. Hammond, in 1791.

AMBER, a carbonaceous mineral,* principally found in the northern parts Europe, of great repute in the world from the earliest time; esteemed as a medicine before the Christian era: Theophrastus wrote upon it; 300 B. C. Upwards of 150 tons of amber have been found in one year on the sands of the shore near Pillau. *Phillips*.

AMBLEF, near Cologne, Germany. Here Charles Martel defeated Chilperic II., and Ragenfroi, mayor of the Neustrians, 716.

AMBOISE (C. France). A conspiracy of the Huguenots against Francis II., Catherine de Medicis, and the Guises, was suppressed at this place in Jan. 1560. On 19 March, 1563, the Pacification of Amboise was published, whereby toleration was granted to the Huguenots. The civil war was however soon renewed.

AMBOYNA, one of the Molucca isles, discovered about 1512 by the Portuguese, but not wholly occupied by them till 1580. It was taken by the Dutch in 1605. The English factors at this settlement were cruelly tortured and put to death, 17 Feb. 1623-4, by the Dutch, on an accusation of a conspiracy to expel them from the island, where the two nations resided and jointly shared in the pepper trade of Java. Cromwell compelled the Dutch to give a sum of money to the descendants of the sufferers. Amboyna was seized by the English, 16 Feb. 1796, but was restored by the treaty of Amiens, in 1802. It was again seized by the British, 17-19 Feb. 1810; and again restored at the peace of 1814.

AMBROSIAN CHANT, see *Chant*, &c.

AMEN, an ancient Hebrew word meaning *true, faithful, certain*, is used in the Jewish and Christian assemblies, at the conclusion of prayer; see 1 *Cor.* xiv. 16 (A. D. 59).

AMENDE HONORABLE, in France, in the 9th century, was an infamous punishment inflicted on traitors and sacrilegious persons: the offender was delivered into the hands of

* Much diversity of opinion still prevails among naturalists and chemists, respecting the origin of amber. It is considered by Berzelius to have been a resin dissolved in volatile oil. It often contains delicately-formed insects. Sir D. Brewster concludes it to be indurated vegetable juice. When rubbed it becomes electrical, and from its Greek name, *elektron*, the term Electricity is derived.

the hangman : his shirt was stripped off, a rope put round his neck, and a taper in his hand ; he was then led into court, and was obliged to beg pardon of God and the country. Death or banishment sometimes followed.

AMERCEMENT, in Law, a fine assessed for an offence done, or pecuniary punishment at the *mercy* of the court : thus differing from a fine directed and fixed by a statute. By Magna Charta a freeman cannot be amerced for a small fault, but in proportion to the offence he has committed, 9 Hen. III. 1225.

AMERICA, * the great Western Continent, is about 9000 miles long, with an area of about 13,668,000 square miles. It is now believed to have been visited by the Norsemen or Vikings in the 10th and 11th centuries ; but the modern discovery is due to the sagacity and courage of the Genoese navigator, Christopher Columbus, † who, after having his scheme long contemptuously rejected, sailed on his first expedition from Palos in Andalusia on Friday 3 Aug. 1492, with vessels supplied by the sovereigns of Spain.

Columbus lands on Guanahani, one of the Bahamas ; takes possession of it in the name of Ferdinand and Isabella of Castile, and names it San Salvador	Friday, 12 Oct. 1492	Worried by the machinations of his enemies, he returns to Spain, 7 Nov. ; his friend, queen Isabella, dies	20 Nov. 1504
He discovers Cuba, 28 Oct. ; and Hispaniola (now Hayti), where he builds a fort, La Navidad	6 Dec. "	He dies while treated with base ingratitude by the Spanish government	20 May, 1506
He returns to Spain, 15 March ; sails from Cadiz on his <i>second</i> expedition, 25 Sept. ; discovers the Caribbee isles.—Dominica, 3 Nov. ; Guadaloupe, 4 Nov. ; Antigua, 10 Nov. ; founds Isabella in Hispaniola, the first Christian city in the New World	Dec. 1493	Solis and Pinzon discover Yucatan	" "
He discovers Jamaica, 3 May ; and Evangelista (now Isle of Pines), 13 June ; war with the natives of Hispaniola	1494	Ojeda founds San Sebastian, the first colony on the mainland	1510
He visits the various isles ; and explores their coasts	1495-6	Subjugation of Cuba by Velazquez	1511
Returns to Spain to meet the charges of his enemies	11 June, 1496	The coast of Florida discovered by Ponce de Leon	1512
Cabot (sent out by Henry VII. of England) discovers Labrador on the coast of North America [he is erroneously said to have discovered Florida, and also Newfoundland, and to have named it <i>Prima Vista</i>]	24 June, 1497	Vasco de Balboa crosses the isthmus of Darien, and discovers the South Pacific Ocean	1513
Columbus sails on his <i>third</i> voyage, 30 May ; discovers Trinidad, 31 July ; lands on Terra Firma, without knowing it to be the new continent, naming it <i>Isla Santa</i>	1 Aug. 1498	Mexico discovered by Fernando de Cordova	1517
Ojeda discovers Surinam, June ; and the gulf of Venezuela	1499	Grijalva penetrates into Yucatan, and names it New Spain	1518
Vicente Yañez Pinzon discovers Brazil, <i>South America</i> , 26 Jan. ; and the river Marañon (the Amazon) ; Cabral the Portuguese lands in Brazil (see <i>Brazil</i>)	3 May, 1500	Passage of Magellan's Straits by him	1520
Gaspar Cortereal discovers Labrador	" "	Conquest of Mexico by Fernando Cortes	1519-21
Columbus is imprisoned in chains at San Domingo by Borbadilla, sent out to investigate into his conduct, May ; conveyed to Spain, where he is honourably received	17 Dec. "	Pizarro discovers the coast of Quito	1526
Columbus sails on his <i>fourth</i> voyage, 9 May ; discovers various isles on the coast of Honduras, and explores the coast of the isthmus, July, &c. ; discovers and names Porto Bello	2 Nov. 1502	He invades and conquers Peru	1532-5
Negro slaves imported into Hispaniola	1501-3	Cartier, a Frenchman, enters the Gulf of St. Lawrence, and sails up to Montreal	1534-5

		Hudson's bay discovered by him	1610
		The Dutch build Manhattan, or New Amsterdam (now New York) on the Hudson	1614
		Settlement in New England begun by capt. Smith	" "

* The name is derived from Amerigo Vespucci, a Florentine merchant, who died in 1512. He accompanied Ojeda in his voyage on the eastern coasts in 1498 ; and described the country in letters sent to his friends in Italy. He is charged with presumptuously inserting "*Tierra de Amerigo*" in his maps. Irving discusses the question in the Appendix to the *Life of Columbus*, but comes to no conclusion. Humboldt asserts that the name was given to the continent in the popular works of Waldseemüller, a German geographer, without the knowledge of Vespucci. To America we are indebted, among other things, for maize, the turkey, the potato, Peruvian bark, and tobacco.

† Christophoro Colombo was born about 1445 ; first went to sea about 1460 ; settled at Lisbon in 1470, where he married Felipa, the daughter of Perestrelo, an Italian navigator ; whereby he obtained much geographical knowledge. He is said to have laid the plans of his voyage of discovery before the republic of Genoa, in 1485, and other powers, and finally before the court of Spain, where at length the queen Isabella became his patron. After undergoing much ingratitude and cruel persecution from his own followers and the Spanish court, he died on 20 May, 1506 ; and was buried with much pomp at Valladolid. His remains were transferred, in 1513, to Seville ; in 1536 to San Domingo ; and in Jan. 1796 to the Havana, Cuba. The original inscription on his tomb is said to have been : "*A Castilla y a Leon Nuevo Mundo dió Colon.*" "*To Castile and Leon Colon gave a New World.*" Humboldt says beautifully, that the success of Columbus was "*a conquest of reflection!*"

AMERICA, BRITISH, see *British America.*

AMERICA, CENTRAL, includes the republics of Guatemala, San Salvador, Honduras, Nicaragua, and Costa Rica (*which see*). They declared their independence 21 Sept. 1821, and separated from the Mexican confederation, 21 July, 1823. The states made a treaty of union between themselves 21 March, 1847. There has been among them since much anarchy and bloodshed, aggravated greatly by the irruption of American filibusters under Kenny and Walker, 1854-5. In Jan. 1863, a war began between Guatemala (afterwards joined by Nicaragua) and San Salvador (afterwards supported by Honduras). The latter were defeated at Santa Rosa 16 June, and San Salvador was taken 26 Oct.; the president of San Salvador, Barrios, fled; and Carrera, the dictator of Guatemala, became predominant over the confederacy.—Population, 1859, about 2,355,000; see *Nicaragua, Darien, and Panama.*

AMERICA, RUSSIAN, sold to the United States for about 400,000*l.*, March, 1867.

AMERICA, SOUTH, see *Brazil, Argentine, Peru, Paraguay, Uruguay, &c.*

“AMERICA,” an American yacht, schooner-built, 171 tons burthen. On 22 Aug. 1851, at Cowes regatta, in a match round the Isle of Wight for a cup worth 100*l.*, open to all nations, she came in first by 8 miles, due to her construction on the wave principle.

AMERICANISMS: a useful dictionary of these expressions was compiled by John R. Bartlett, and first published in 1848.

AMETHYST, the ninth stone upon the breastplate of the Jewish high priest, 1491 B.C. It is of a rich violet colour. One worth 200 rix-dollars, having been rendered colourless, equalled a diamond in lustre, valued at 18,000 gold crowns. *De Boot.*—Amethysts discovered at Kerry, in Ireland, in 1775.

AMIENS, a city in Picardy (N. France): the cathedral was built in 1220. It was taken by the Spanish 11 March, and retaken by the French 25 Sept. 1597. The preliminary articles of the peace between Great Britain, Holland, France, and Spain, were signed in London by lord Hawkesbury and M. Otto, on the part of England and France, 1 Oct. 1801; and the definitive treaty was subscribed at Amiens, on 27 March, 1802, by the marquess of Cornwallis for England, Joseph Bonaparte for France, Azara for Spain, and Schimmelpenninck for Holland.—War was declared again in 1803.

AMMONIA, the volatile alkali, mainly produced by the decomposition of organic substances. Its name is ascribed to its having been procured from heated camel's dung near the temple of Jupiter Ammon in Libya. The discovery of its being a compound of nitrogen and hydrogen is ascribed to Joseph Priestley in 1774. By the recent labours of chemists the oxide of the once hypothetical metal ammonium, and ammonium amalgam, have been formed; and specimens of each were shown at the Royal Institution in 1856 by Dr. A. W. Hofmann, who has done very much for the chemical history of ammonia.

AMMONITES, descended from Ben-Ammi, the son of Lot (1897 B.C.). They invaded the land of Canaan and made the Israelites tributaries, but they were defeated by Jephthah, 1143 B.C. They again invaded Canaan, with an intention to put out the right eye of all they subdued; but Saul overthrew them, 1095 B.C. They were afterwards many times vanquished; and Antiochus the Great took Rabbah their capital, and destroyed all the walls, 198 B.C. *Josephus.*

AMNESTY (a general pardon after political disturbances, &c.) was granted by Thrasylbulus, the Athenian patriot, after expelling the thirty tyrants with the assistance of only thirty friends, 403 B.C. Acts of Amnesty were passed after the civil war in 1651, and after the two rebellions in England in 1715 and 1745.—After his victorious campaign in Italy, Napoleon III. of France granted an amnesty to all political offenders, 17 Aug. 1859. An amnesty, with certain exemptions, was granted to the vanquished southern states of North America by president Johnson, 29 May, 1865. An amnesty for political offences was granted by the emperor of Austria at his coronation as king of Hungary, 8 June, 1867.

AMOY, see *China*, 1853-5.

AMPHICTYONIC COUNCIL, asserted traditionally to have been established at Thermopylæ by Amphictyon, for the management of all affairs relative to Greece. The celebrated council, composed of twelve of the wisest and most virtuous men of various cities of Greece, began 1498 [1113, *Clinton*] B.C., and existed 31 B.C. Its immediate office was to attend to the temples and oracles of Delphi. Its interference caused the Sacred wars, 595-586, and 356-346.

AMPHION, a British frigate, of 38 guns, blown up while riding at anchor in Plymouth Sound, and the whole of her crew then on board, consisting of more than two hundred and fifty persons, officers and men, perished, 22 Sept. 1796.

AMPHITHEATRES, round or oval buildings, said to have been first constructed by Curio, 76 B.C., and by Julius Cæsar 46 B.C. In the Roman amphitheatres, the people witnessed the combats of gladiators, and of wild beasts, &c. They were generally built of wood, but Statilius Taurus made one of stone, under Augustus Cæsar; see *Coliseum*. The amphitheatre of Vespasian (capable of holding 87,000 persons) was built between A.D. 75 and 80; and is said to have been a fortress in 1312. The amphitheatre at Verona was next in size, and then that of Nismes.

AMPHITRITE, THE SHIP, see *Wrecks*, 30 Aug. 1833.

AMPUTATION, in surgery, was greatly aided by the invention of the tourniquet by Morel, a French surgeon in 1674, and of the flap-method by Lowdham of Exeter in 1679.

AMSTERDAM (Holland). The castle of Amstel was commenced in 1100; the building of the city in 1203. Its commerce was greatly increased by the decay of that of Antwerp after 1609. The exchange was built in 1634; and the noble stadthouse in 1648; the latter cost three millions of guilders, then a large sum. It was built upon 13,659 piles. Amsterdam surrendered to the king of Prussia, when that prince invaded Holland, in favour of the stadtholder, in 1787. The French were admitted without resistance, 18 Jan. 1795. The Dutch government was restored in Dec. 1813. A crystal palace for an industrial exhibition was opened by prince Frederick of the Netherlands 16 Aug. 1864.

AMULETS or CHARMS, employed from the earliest times. Amulets were made of the wood of the true cross, about 328. They have been esteemed in modern times.

AMYLENE, a colourless, very mobile liquid, first procured by M. Balard of Paris in 1844, by distilling fousel oil (potato-spirit) with chloride of zinc. The vapour was employed instead of chloroform first by Dr. Snow in 1856. It has since been tried in many hospitals here, and in France. The odour is more unpleasant than chloroform, and more vapour must be used, but it is thought less dangerous.

ANABAPTISTS. The sect arose about 1521, and was known in England before 1549. Münzer, Storck, and other German enthusiasts, taught that infant baptism was a contrivance of the devil, that there is no original sin, that men have a free will in spiritual things, and other doctrines still more wild and absurd. They took arms, committed many violences, and in 1534 seized Münster, calling it Mount Zion, and one Mathias, a baker, to be king. Münster was taken 24 June, 1535, and the chiefs of the Anabaptists were put to death.—On 6 Jan. 1661, about 80 anabaptists in London appeared in arms, headed by their preacher, Thomas Venner, a wine-cooper. They fought desperately, and killed many of the soldiers brought against them. Their leader and sixteen others were executed, 19 and 21 Jan. *Annals of England*.—For the modern Anabaptists see *Baptists*.

ANACHORETS, see *Monachism*.

ANACREONTIC VERSE, of the bacchanalian strain, named after Anacreon of Teos, the Greek lyric poet, whose odes are much prized. He is said to have been choked by a grape-stone in his eighty-fifth year, about 514 B.C. His odes have been frequently translated; Thomas Moore's version was published in 1800.

ANÆSTHETICS, see *Opium*, *Chloroform*, *Ether*, *Amylene*, *Kerosolene*. Intense cold has been also employed in deadening pain.

ANADOLIA (Asia Minor), comprises the ancient Lycia, Caria, Lydia, Mysia, Bithynia, Paphlagonia and Phrygia, (*which see*).

ANAGRAMS, formed by the transposition of the letters of a name or sentence: as *army* from *Mary*, are said to have been made by ancient Jews, Greeks, &c. On the question put by Pilate to Our Saviour, "*Quid est veritas?*" (what is truth?) we have the anagram, "*Est vir qui adest*" (the man who is here); from "*Horatio Nelson*," is "*Honor est a Nilo*" (there is Honour from the Nile).

ANAM, see *Annam*. ANASTATIC PRINTING, see *Printing*, 1841.

ANATHEMA, the sentence of excommunication (1 *Cor.* xvi. 22), used by the early churches, 365; see *Excommunication*.

ANATOMY (Greek, cutting up). The human body was studied by Plato, Xenophon, and Aristotle; and became a branch of medical education under Hippocrates, about 420 B.C. Erasistratus and Herophilus, regarded as the fathers of anatomy, first dissected the human form, as anatomical research had been previously confined to animals: it is said that they practised upon the bodies of living criminals, about 300 and 293 B.C. Galen, who died A.D. 193, was a great anatomist. In England, the schools were long supplied with bodies unlawfully exhumed from graves; and until 1832, the bodies of executed criminals were ordered for dissection.* Pope Boniface VIII. forbade the dissection of dead bodies, 1297.—The first anatomical plates, designed by Titian, were employed by Vesalius, about 1538. Leonardo da Vinci, Raphael, and Michael Angelo, studied anatomy. The great discoveries of Harvey were made in 1616. William and John Hunter were great anatomists, William died 1783, and John 1793. Quain's and Wilson's large anatomical plates were published 1842. Comparative anatomy has been treated systematically by Cuvier, Owen, Müller, Huxley, and others.—The anatomy of plants has been studied since 1680; see *Botany*.

ANCHORITES, see *Monachism*.

ANCHORS are of ancient use, and the invention belongs to the Tuscans. *Pliny*. The second tooth, or fluke, was added by Anacharsis, the Scythian (592 B.C.) *Strabo*. Anchors were first forged in England A.D. 578. Those of a first-rate ship of war (four) will weigh 99 cwt. each, costing 45*ol.* *Phillips*. The Admiralty anchor was introduced about 1841. Improved anchors were made by Pering and Rodgers about 1831; by Porter 1846; by Costell 1848; by Trotman 1853; and by several other persons. Trotman's is attached to the Queen's yacht the *Fairy*. The anchors of the *Great Eastern* are of enormous size. An act for the proving and sale of chain cables and anchors was passed in 1864.

ANCIENT HISTORY commences in the Holy Scriptures 4004 B.C. and in the history of Herodotus about 1687 B.C., and is considered to end with the destruction of the Roman empire in Italy, A.D. 476. Modern history begins with Mahomet (A.D. 622), or Charlemagne (768).

ANCIENTS, see *Councils, French*.

ANCONA, an ancient Roman port on the Adriatic. The mole was built by Trajan, 107. After many changes of rulers Ancona was finally annexed to the papal states in 1532. In 1797 it was taken by the French; but was retaken by the Austrians in 1799. It was occupied by the French in 1832; evacuated in 1838; after an insurrection it was bombarded and captured by the Austrians, June 18, 1849. The Marches (comprising this city) rebelled against the Papal government in Sept. 1860. Lamoricière, the papal general, fled to Ancona after his defeat at Castelfidardo, but was compelled to surrender himself, the city, and the garrison, on 29 Sept. The king of Sardinia entered soon after.

ANCYRA, a town in ancient Galatia, now Angora or Engour, Asia Minor. Councils were held here 314, 358, 375. Near this city, on 28 July, 1402, Timour or Tamerlane defeated and took prisoner the sultan Bajazet, and is said to have conveyed him to Samar-cand in a cage.

ANDALUSIA (S. Spain), a province once part of the ancient Lusitania and Bætica. The name is a corruption of Vandalitia, it having been held by the Vandals from 419 to 421, when it was acquired by the Visigoths. The latter were expelled by the Moors in 711, who established the kingdom of Cordova, which they retained till their final overthrow in 1492.

* By 32 Hen. VIII. c. 42 (1540), surgeons were granted four bodies of executed malefactors for "*anatomyes*," which privilege was extended in following reigns: but in consequence of the crimes committed by resurrection-men in order to supply the surgical schools (robbing churchyards and even committing murder, see *Burking*), a new statute was passed in 1832, which abated the ignominy of dissection by prohibiting that of executed murderers, and made provision for the wants of surgeons by permitting, under certain regulations, the dissection of persons dying in workhouses, &c. The act also appointed inspectors of anatomy, regulated the schools, and required persons practising anatomy to obtain a licence. It repealed the clause of the act of 1828, which directed the dissection of the body of an executed murderer.

ANDERNACH, Rhenish Prussia, once an imperial city. Near here, the emperor Charles the First, while attempting to deprive his nephews of their inheritance, was totally defeated by one of them, Louis of Saxony, 8 Oct. 876.

ANDORRA, a small republic in the Pyrenees, bearing the title of, "the valleys and sovereignties of Andorra," was made independent by Charlemagne about 778, certain rights being reserved to the bishop of Urgel. The feudal sovereignty, which long appertained to the counts of Foix, reverted to the French king, Henry IV., in 1589; but was given up in 1790. On 27 March, 1806, an imperial decree restored the old relations between Andorra and France. The republic is now governed by a council elected for life; but the magistrates are appointed alternately by the French government and the Spanish bishop of Urgel. The population was about 18,000, in 1850. *Guibert*.

ANDRÉ'S EXECUTION, see *United States*, 1780.

ANDREW, ST., said to have been martyred by crucifixion, 30 Nov. 69, at Patræ, in Achaia. His festival was instituted about 359. The Royal Society's anniversary is kept on St. Andrew's day. The Russian order of St. Andrew was instituted in 1698 by Peter I. For the British order, see *Thistle*.

ANDREW'S, St. (E. Scotland), made a royal burgh in 1140. Here Robert Bruce held his first parliament in 1309; and here Wishart was burnt by archbishop Beaton, 1545, who himself was murdered here in 1546. The university was founded in 1411 by bishop Wardlaw. The bishopric originated with the establishment of Christianity in Scotland. The cathedral (built 1159-1318) was destroyed by a mob, excited by a sermon of John Knox, June 1559. Sir R. Sibbald's list of the bishops commences with Killach, 872. The see became archiepiscopal in 1470, and ceased soon after 1689. It was re-instituted in 1844; see *Bishops*.

ANDRUSSOV, PEACE OF (30 Jan. 1667), between Russia and Poland, for 13 years, with mutual concessions, although the latter had been generally victorious.

ANEMOMETER (Greek, *anemos*, the wind), a measurer of the strength and velocity of the wind, was invented by Wolfius, in 1709. The extreme velocity was found by Dr. Lind to be 93 miles per hour. Osler's and Whewell's anemometers were highly approved of in 1844.

ANEROID, see *Barometer*.

ANGEL, an ancient gold coin, weighing four pennyweights, valued at 6s. 8d. in the reign of Henry VI., and at 10s. in the reign of Elizabeth, 1562. The *Angelot*, a gold coin, value half an angel, was struck at Paris when held by the English, 1431. *Wood*.

ANGELIC KNIGHTS OF ST. GEORGE. This order is said to have been instituted in Greece, 456. The *Angelici* were instituted by the emperor Angelus Comnenus, 1191. —The *Angelice*, an order of nuns, was founded at Milan by Louisa Torelli, 1534.

ANGERS (W. Central France), the Roman Juliomagus, possessing an amphitheatre; afterwards Audegarum, the capital of Anjou (*which see*). It was frequently besieged, and many councils were held in it between 453 and 1448, relating to ecclesiastical discipline.

ANGERSTEIN GALLERY, see *National Gallery*.

ANGLESEY, called by the Romans Mona (N. Wales), the seat of the Druids, who were massacred in great numbers, when Suetonius Paulinus took the isle, 61. It was conquered by Agricola, in 78; occupied by the Normans, 1090; and with the rest of Wales annexed by Edward I. in 1284. He built the fortress of Beaumaris in 1295. The Menai suspension bridge was erected 1818-25, and the Britannia tubular bridge 1849-50.

ANGLICAN CHURCH, see *Church of England*.

ANGLING. Allusion is made to it in the Bible; *Amos* iv. 2 (787 B.C.), and by ancient Greek writers.

Oppian wrote his "Halieutics," a Greek epic poem on Fishes and Fishing, about A.D. 198. In the book on "*Hawkyng and Huntynge*," by Juliana Berners or Barnes, prioress of Sopwith, near St. Albans, "emprinted at Westmestre by Wynkyn de

Worde," in 1496, is "*The treatise of fyszshyng with an Angle*." Isaac Walton's "*Compleat Angler*" was first published in 1653.

ANGLO-SAXONS or ANGLES, derive their name from a village near Sleswick, called *Anglen*, whose population (called *Angli* by Tacitus) joined the first Saxon freebooters. East Anglia was a kingdom of the heptarchy, founded by the Angles, one of whose chiefs, Uffa, assumed the title of king, 571; the kingdom ceased in 792. See *Britain*. Cædmon paraphrased part of the Bible in Anglo-Saxon about 680; a translation of the gospels was made by abbot Egbert, of Iona, 721; of Boethius, Orosius, &c., by Alfred, 888. The Anglo-Saxon laws were printed by order of government, in 1840.

ANGOLA (S. W. Africa), settled by the Portuguese soon after the discovery, by Diego Cam, about 1486. Loanda, their capital, was built 1578.

ANGORA, see *Ancyra*.

ANGOULEME, (the Roman Ieulisma,) capital of the province of Angoumois, Central France, W., was a bishopric in 260. Angouleme became an independent county about 856; was united to the French crown in 1308; was held by the English, 1360 to 1372, in the reign of Edward III. The count of Angouleme became king of France as Francis I. in 1515.

ANGRIA'S FORT, see *India*, 1756.

ANGUILLA, Snake Island, West Indies. Settled by the British, 1666. Valuable deposits of phosphate of lime were found here in 1859.

ANHALT, HOUSE OF, in Germany, deduces its origin from Berentobaldus, who made war upon the Thuringians in the sixth century. In 1606, the principality was divided among the four sons of Joachim Ernest, by the eldest, John-George. Thus began the four branches—Anhalt-Dessau (descended from John-George); Zerbst, extinct, 1793; Plotsgau or Coethen, extinct, 1847; and Bernburg,* extinct, 1863. The princes of Anhalt became dukes in 1809.

Leopold (born Oct. 1, 1794), became duke of Anhalt-Dessau, 1817, and of Anhalt-Bernburg 1863. | Heir, his son, prince Frederic, born 29 April, 1831. Population (Dec. 1864), 193,046.

ANHOLT, ISLAND OF, Denmark, was taken possession of by England, 18 May, 1809, in the French war, on account of Danish cruisers injuring British commerce. The Danes made an attempt to regain it with a force which exceeded 1000 men, but were gallantly repulsed by the British force not amounting to more than 150, 27 March, 1811.

ANILINE, an oily alkaline body, discovered in 1826 by Unverdorben among the products of distillation of indigo. From benzole (*which see*) Beclump, in 1856, obtained it by the successive treatment with concentrated nitric acid and reducing agents. The scientific relations of aniline have been carefully examined by several chemists, especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was only in 1856 that Mr. W. A. Perkin showed how a violet oxidation-product (mauve) could be applied in dyeing. Aniline is now manufactured upon a large scale for the commercial production of "Mauve" and "Magenta" (rosaniline) (*which see*), and several other colouring matters.†

ANIMALCULÆ. Leeuwenhoek's researches in 1677 produced the most astonishing revelations. His book, *Arcana Naturæ*, was published at Leyden in 1696. The great works of Ehrenberg of Berlin, on the Infusorial Animalculæ, &c., were issued 1838-57. Pritchard's *Infusoria*, ed. 1861, is a valuable summary of our present knowledge of animalculæ.

ANIMAL MAGNETISM was introduced by father Hehl, a Jesuit, at Vienna, about 1774, and had its dupes in France and England in about 1788-89; ‡ see *Mesmerism*.

ANIMALS, CRUELTY TO. Mr. Martin, M.P., as a senator, zealously laboured to repress it; and in 1824, the *Cruelty to Animals Society* was founded. Mr. Martin's act was passed 1822, and similar acts were passed in 1827, 1835, 1837, 1849, and 1854. Dogs were forbidden to be used for draught in 1839.

ANJOU, a province in France, was inherited by Henry II. of England from his father Geoffrey Plantagenet, count of Anjou, who married the empress Matilda in 1127. It was taken from his son John by Philip of France in 1205; was reconquered by Edward III., and relinquished by him in 1360, and was given by Charles V. to his brother Louis with the title of duke. The university was formed in 1349.

1360. Louis I. duke, invested by the pope with the dominions of Joanna of Naples, 1381; his invading army destroyed by the plague, 1383; he dies, 1384. | 1384. Louis II., his son, receives the same grant, but is also unsuccessful. Louis III., adopted by Joanna; dies 1434. | 1434. Regnier or René le bon (a prisoner) declared

* Alexander, the last duke of Anhalt-Bernburg, (born 2 March, 1805; duke, 24 March, 1834;) died without issue, 22 Aug. 1863, when his duchy reverted to the duke of Anhalt-Dessau.

† After much litigation, the patent of Simpson, Maule, & Nicholson, for aniline colours, was annulled by the House of Lords, 27 July, 1866.

‡ It was a pretended mode of curing all manner of diseases by means of *sympathetic affection* between the sick person and the operator. The effect on the patient was supposed to depend on certain motions of the fingers and features of the operator, he placing himself immediately before the patient, whose eyes were to be fixed on his. After playing in this manner on the imagination and enfeebled mind of the sick, and performing a number of distortions and grimaces, the cure was said to be completed. Hehl for a short time associated with Mesmer, but they soon quarrelled.—Mr. Perkins (who died in 1799) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism;" but Drs. Falcoer and Haygarth put an end to his pretensions by performing many wonders with a pair of *wooden tractors*. *Brande*.

ANJOU, *continued.*

king of Naples, 1435; his daughter, Margaret, married Henry VI. of England, 1445; he was expelled from Anjou by Louis XI., 1474, and his estates confiscated.

Francis, duke of Alençon, brother to Henry III.

of France, became duke of Anjou; at one time he favoured the Protestants, and vainly offered marriage to Elizabeth of England, 1581-82; died 1584.

ANJOU or BEAUGÉ, BATTLE OF, between the English and French; the latter commanded by the dauphin of France, 22 March, 1421. The English were defeated: the duke of Clarence was slain by sir Allan Swinton, a Scotch knight, and 1500 men perished on the field; the earls of Somerset, Dorset, and Huntingdon were taken prisoners. Beaugé was the first battle that turned the tide of success against the English.

ANNAM or ANAM, an empire of Asia, to the east of India, comprising Tonquin, Cochin China, part of Cambodia, and various islands in the Chinese Sea; said to have been conquered by the Chinese 234 B.C., and held by them till A.D. 263. In 1406 they reconquered it, but abandoned it in 1428. After much anarchy, bishop Adran, a French missionary, obtained the friendship of Louis XVI. for his pupil Gia-long, the son of the nominally reigning monarch, and with the aid of a few of his countrymen established Gia-long on the throne, who reigned till his death in 1821, when his son became king. In consequence of the persecution of the Christians, war broke out with the French, who defeated the army of Annam, 10,000 strong, about 22 April, 1859, when 500 were killed. On 3 June, 1862, peace was made; three provinces were ceded to the French, and toleration of the Christians granted. An insurrection in these provinces against the French, begun about 17 Dec. 1862, was suppressed in Feb. 1863. Ambassadors sent from Annam with the view of regaining the ceded provinces arrived at Paris in Sept. 1863, had no success. Three provinces were annexed to the French Empire by proclamation, 25 June, 1867.

ANNAPOLIS, see *Port Royal*.

ANNATES, see *First Fruits*.

ANNO DOMINI, A.D., the year of Our Lord, of Grace, of the Incarnation, of the Circumcision, and of the Crucifixion (Trabeationis). The Christian era commenced 1 Jan. in the middle of the 4th year of the 194th Olympiad, the 753rd year of the building of Rome, and in 4714 of the Julian period. It is now held that Christ was born Friday, 5 April, 4 B.C. This era was invented by a monk, Dionysius Exiguus, about 532. It was introduced into Italy in the 6th century, and ordered to be used by bishops by the council of Chelsea, in 816, but was not generally employed for several centuries. Charles III. of Germany was the first who added "in the year of our Lord" to his reign, in 879.

"ANNOYANCE JURIES," of Westminster, chosen from the householders in conformity with 27 Eliz. c. 17 (1585), were abolished in 1861.

ANNUAL REGISTER, a summary of the history of each year (beginning with 1758, and continued to the present time), was commenced by R. & J. Dodsley. (Edmund Burke at first wrote the whole work, but afterwards became only an occasional contributor. *Prior*.) The similar elaborate work, the "Annuaire des Deux Mondes," began in Paris in 1850.

ANNUALS, a name given to richly bound volumes, containing poetry, tales, and essays, by eminent authors, illustrated by engravings, published annually, at first in Germany, and also in London in 1823. The duration of the chief of these publications is here given:

Forget-me-not (Ackerman's)	1823-48	Amulet	1827-34
Friendship's Offering	1824-44	Keepsake	1828-56
Literary Souvenir (first as "the Graces")	1824-34	Hood's Comic Annual	1830-38

ANNUITIES or PENSIONS, were granted in 1512, when 20*l.* were given to a lady of the court for services done; and 6*l.* 13*s.* 4*d.* for the maintenance of a gentleman, 1536. 13*l.* 6*s.* 8*d.* deemed competent to support a gentleman in the study of the law, 1554. An act was passed empowering the government to borrow one million sterling upon an annuity of fourteen *per cent.*, 4-6 Will. & Mary, 1691-3. This mode of borrowing soon afterwards became general among civilised governments. An annuity of 1*l.* 2*s.* 11*d.* *per annum*, accumulating at 10 *per cent.*, compound interest, amounts in 100 years to 20,000*l.* The Government Annuities and Life Assurances Act was passed in 1864, for the benefit of the working classes; since, it enables the government to grant deferred annuities, on condition that the sum required may be payable in small instalments.

ANNUITY TAX: a tax levied to provide stipends for ministers in Edinburgh and Montrose, and which caused much disaffection, was abolished in 1860, and other provisions made for the purpose. These, however, have proved equally unpalatable.

ANNUNCIATION OF THE VIRGIN MARY, 25th of March, Lady-day (*which see*), a festival commemorating the tidings brought to Mary by the angel Gabriel (*Luke* i. 26): its origin is referred to the 4th and 7th century. The *religious order* of the Annunciation

was instituted in 1232, and the *military order*, in Savoy, by Amadeus, count of Savoy, in memory of Amadeus I., who had bravely defended Rhodes against the Turks, 1355.

ANOINTING, an ancient ceremony observed at the inauguration of kings, bishops, and other eminent personages. Aaron was anointed as high priest, 1491 B.C. ; and Saul, as king, 1095 B.C. Alfred the Great is said to have been the first English king anointed, A.D. 871 ; and Edgar of Scotland, 1098.—The *religious* rite is derived from the epistle of *James* v. 14, about A.D. 60. Some authors assert that in 550, dying persons, and persons in extreme danger of death, were anointed with consecrated oil, and that this was the origin of Extreme Unction (one of the sacraments of the Roman Catholic church).

ANONYMOUS LETTERS, see *Threatening Letters*.

ANTALCIDAS, PEACE OF. In 387 B.C. Antalcidas the Lacedæmonian made peace with Artaxerxes of Persia, on behalf of Greece but principally in favour of Sparta, giving up the cities of Ionia to the king.

ANTARCTIC POLE, the opposite to the north or *arctic* pole ; see *Southern Continent*.

ANTEDILUVIANS. According to the tables of Mr. Whiston, the number of people in the antediluvian world, as it existed previous to the Flood, reached to the enormous amount of 549,755 millions in the year of the world 1482.

ANTHEMS or **HYMNS**, see *Hymns*. Hilary, bishop of Poitiers, and St. Ambrose were the first who composed them, about the middle of the 4th century. *Leuglet*. They were introduced into the church service in 386. *Baker*. Ignatius is said to have introduced them into the Greek, and St. Ambrose into the Western Church. They were introduced into the Reformed churches in queen Elizabeth's reign, about 1565.

ANTHROPOLOGICAL SOCIETY (*anthrōpos*, Greek for man), for promoting the science of man and mankind, held its first meeting on 24 Feb. 1863. Dr. James Hunt, president, in the chair. The "Anthropological Review" first came out in May, 1863.

ANTHROPOPHAGI (eaters of human flesh), see *Cannibals*.

ANTICHRIST (opposed to Christ), 1 *John* ii. 18, termed the "Man of sin," 2 *Thess.* ii. 3 ; of these passages many interpretations have been given, and many myths were current in the middle ages, respecting the incarnation of the devil, &c. The term is freely applied to each other by Roman Catholics and Protestants ; some persons consider that the term is to be given to all who openly or secretly oppose the doctrines of Christ and obedience to his commandments (*Rev.* xii. 17).

ANTI-CORN-LAW LEAGUE, for procuring the repeal of the laws charging duty on the importation of corn, sprang from various metropolitan and provincial associations (1834-8), supported by Messrs. Charles Villiers, Richard Cobden, John Bright, &c ; see *Corn Laws*, and *Protectionists*.

<p>The Anti-Corn-Law League formed at Manchester 18 Sept. 1838 Meetings held in various places March & April, 1841 Excited meeting at Manchester 18 May, " A bazaar held at Manchester, at which the League realised 10,000l. 2 Feb. 1842 About 600 deputies connected with provincial associations assemble in London, Feb.-Aug. " The League at Manchester proposed to raise 50,000l., to depute lecturers throughout the country, and to print pamphlets 20 Oct. " First meeting at Drury-lane Theatre, 15 March, 1843 Monthly meetings at Covent-Garden, commenced 28 Sept. ; great free-trade meetings at Manchester 14 Nov. 1843, and 22 Jan. 1845</p>	<p>Bazaar at Covent-Garden opened 5 May, 1845 Great Manchester meeting, at which the League proposed to raise a quarter of a million sterling 23 Dec. " The Corn Importation Bill having passed, 26 June, the League is formally dissolved ; Mr. Cobden was rewarded by a national subscription, nearly 80,000l. 2 July, 1846 On the accession of the Derby ministry, a revival of the Anti-Corn-Law League was proposed at Manchester, and a subscription was opened, which produced within half an hour 27,520l. 2 Mar. 1852 [The reconstruction of the League was soon deemed unnecessary.]</p>

ANTIETAM CREEK, near Sharpsburg, Maryland, U. S. Here was fought a terrible battle on 17 Sept. 1862, between the Federals under general M'Clellan and the Confederates under Lee. After his victory at Bull Run or Manassas, 30 Aug., Lee invaded Maryland, and was immediately followed by M'Clellan. On the 16th Lee was joined by Jackson, and at five o'clock next morning the conflict began. About 100,000 men were engaged, and the battle raged till night. The Federals were repeatedly repulsed ; but eventually the Confederates retreated and repassed the Potomac on 18 and 19 Sept. The loss of the Federals was estimated at 12,469 ; of the Confederates, 14,000.

ANTIGUA, a West Indian Island, discovered by Columbus in Nov. 1493 ; settled by the English in 1632 ; made a bishopric, 1842. Population in 1861, 36,412.

ANTILLES, an early name of the West Indies (*which* see).

ANTIMONY, a white brittle metal. Compounds of it were early known. It was, and

is still, used to blacken both men's and women's eyes in the east (2 *Kings* ix. 30, and *Jeremiah* iv. 30). Mixed with lead it forms printing type metal. Basil Valentine wrote on antimony about 1410. *Priestley*.

ANTINOMIANS (from the Greek *anti*, against, and *nomos*, law), a name given by Luther (in 1538) to John Agricola, who is said to have held "that it mattered not how wicked a man was if he had but faith." (Opposed to *Rom.* iii. 28, & v. 1, 2.) He retracted these doctrines in 1540. They were condemned by the British parliament, 1648.

ANTIOCH, Syria, built by Seleucus, 300 B.C., after the battle of Ipsus acquired the name "Queen of the East." Here the disciples were first called Christians, A.D. 42 (*Acts* xi. 26). Antioch was taken by the Persians, 540; by the Saracens about 638; recovered for the Eastern emperor, 966; lost again in 1086; retaken by the Crusaders in 1098, and held by them till 1268, when it was captured by the Sultan of Egypt. It was taken from the Turks in the Syrian war, 1 Aug. 1832, by Ibrahim Pacha, but restored at the peace.—The ERA of Antioch is much used by the early Christian writers of Antioch and Alexandria; it placed the Creation 5492 years B.C.

ANTIPODES. Plato is said to be the first who thought it possible that antipodes existed (about 388 B.C.). Boniface, archbishop of Mentz, legate of pope Zachary, is said to have denounced a bishop as a heretic for maintaining this doctrine, A.D. 741. The antipodes of England lie to the south-east of New Zealand, near Antipodes Island.

ANTI-POPES, rival popes elected at various times, especially by the French and Italian factions, from 1305 to 1439. In the article *Popes*, the Anti-popes are printed in *italics*.

ANTIQUARIES. A college of antiquaries is said to have existed in Ireland 700 B.C.

A society was founded by archbishop Parker, Camden, Stow, and others in 1572. *Spelman*.

Application was made in 1589 to Elizabeth for a charter, but her death ensued, and her successor, James I., was far from favouring the design.

The Society of Antiquaries revived, 1707; received its charter of incorporation from George II., 1751; and apartments in Somerset-house granted to it in 1777. Its Memoirs, entitled "Archæologia,"

first published in 1770; present president, earl Stanhope, elected, 1846.

British Archæological Association founded Dec. 1843. Archæological Institute of Great Britain formed by a seceding part of the Association, 1845.

Society of Antiquaries of Edinburgh founded in 1780. Since 1845 many county archæological societies have been formed in the United Kingdom.

The Society of Antiquaries of France (1814) began in 1805 as the Celtic Academy.

ANTI-TRINITARIANS. Theodotus of Byzantium is supposed to have been the first who advocated the simple humanity of Jesus, at the close of the 2nd century. This doctrine, advocated by Arius about 318, spread widely after the Reformation, when it was adopted by Lælius and Faustus Socinus. *Bayle*. See *Arians*, *Socinians*, *Unitarians*.

ANTIUM, maritime city of Latium, now Porto d'Anzio, near Rome, after a long struggle for independence, became a Roman colony, at the end of the great Latin war, 340-338 B.C. It is mentioned by Horace, and was a favourite retreat of the emperors and wealthy Romans, who erected many villas in its vicinity. The treasures deposited in the temple of Fortune here were taken by Octavius Cesar during his war with Antony, 41 B.C.

ANTONINUS' WALL, see *Roman Walls*.

ANTWERP, (French, Anvers) the principal port of Belgium, is mentioned in history in 517. It was a small republic in the 11th century, and it was the first commercial city in Europe till the wars of the 16th and 17th centuries.

APATITE, mineral phosphate of lime. About 1856 it began to be largely employed as manure. It is abundant in Norway, and in Sombrero, a small West India Island.

APOCALYPSE or REVELATION, written by St. John in the isle of Patmos about A.D. 95.*

* Some ascribe the authorship to Cerinthus, the heretic, and others to John, the presbyter, of Ephesus. In the first centuries many churches disowned it, and in the 4th century it was excluded from the sacred

APOCRYPHA. In the preface to the Apocrypha it is said, "These books are neyther found in the Hebrue nor in the Chalde." *Bible*, 1539. The history of the Apocrypha ends 135 B.C. The books were not in the Jewish canon, were rejected at the council of Laodicea about A.D. 366, but were received as canonical by the Roman Catholic church, at the council of Trent on 8 April, 1546. Parts of the Apocrypha are read as *lessons* by the church of England.

There are also Apocryphal writings in connection with the New Testament.

APOLLINARISTS, followers of Apollinaris, a reader in the church of Laodicea, who taught (366) that the divinity of Christ was instead of a soul to him; that his flesh was pre-existent to his appearance upon earth, and was sent down from heaven, and conveyed through the Virgin; that there were two sons, one born of God, the other of the Virgin, &c. These opinions were condemned by the council of Constantinople, 381.

APOLLO, the god of the fine arts, medicine, music, poetry, and eloquence, had many temples and statues, particularly in Greece and Italy. His most splendid temple at Delphi, was built 1263 B.C.; see *Delphi*. His temple at Daphne, built 434 B.C., during a period in which pestilence raged, was burnt A.D. 362, and the Christians were accused of the crime. *Langlet*. The statue of Apollo Belvedere, discovered in the remains of Antium, in Italy, in 1503, was purchased by pope Julius II., who placed it in the Vatican.

APOLLONICON, an elaborate musical instrument, constructed on the principle of the organ, was invented by Messrs. Flight and Robson, of St. Martin's lane, Westminster, and exhibited by them first in 1817. *Timbs*.

APOSTLES (Greek, *apostolos*, one sent forth). Twelve were appointed by Christ, A.D. 31; viz. Simon Peter and Andrew (brothers), James and John (sons of Zebedee), Philip, Nathanael (or Bartholomew), Matthew (Levi), Thomas, James the Less (son of Alphaeus), Simon the Canaanite and Jude or Thaddæus (brothers), and Judas Iscariot. Matthias was elected in the room of Judas Iscariot, A.D. 33 (*Acts* i.); and Paul and Barnabas were appointed by the Holy Spirit, A.D. 45 (*Acts* xiii. 2).

APOSTLES' CREED, erroneously attributed to the apostles, is mentioned by Ruffinus, 390. Irenæus, bishop of Lyons (177), gives a creed resembling it. Its repetition in public worship was ordained in the Greek church at Antioch, and in the Roman church in the 11th century, whence it passed to the church of England.

APOSTOLICI, a sect, the end of the 2nd century, which renounced marriage, wine, flesh, &c. A second sect, founded by Segarelli about 1261, wandered about, clothed in white, with long beards, dishevelled hair, and bare heads, accompanied by women called spiritual sisters, preaching against the growing corruption of the church of Rome, and predicting its downfall. They renounced baptism, the mass, purgatory, &c., and by their enemies are accused of gross licentiousness. Segarelli was burnt alive at Parma in 1300, and his followers were dispersed in 1307.

APOTHECARY (literally, a keeper of a storehouse). On 10 Oct. 1345, Edward III. settled sixpence *per diem* for life on Coursus de Gangeland, *Apothecarius Londoni*, for taking care of him during his severe illness in Scotland. *Rymer's Fœdera*; see *Pharmacy*.

APOTHEOSIS, a ceremony of the ancient nations of the world, by which they raised their kings and heroes to the rank of deities. The deifying a deceased emperor was begun at Rome by Augustus, in favour of Julius Caesar, 13 B.C. *Tillemont*.

APPEAL or **ASSIZE OF BATTLE**. By the old law of England, a man charged with murder might fight with the appellant, thereby to make proof of his guilt or innocence. In 1817, a young maid, Mary Ashford, was believed to have been violated and murdered by a canon by the council of Laodicea, but was again received by other councils, and confirmed by that of Trent, held in 1545, *et seq.* Although the book has been rejected by Luther, Michaelis, and others, and its authority questioned in all ages, from the time of Justin Martyr (who wrote his first Apology for the Christians in A.D. 139), yet its canonical authority is still almost universally acknowledged.

Abraham Thornton, who, in an appeal, claimed his right by his wager of battle, which the court allowed; but the appellant (the brother of the maid) refused the challenge, and the accused escaped, 16 April, 1818. This law was immediately afterwards struck off the statute-book, by 59 Geo. III. (1819).

APPEALS. In the time of Alfred (869-901), appeals lay from courts of justice to the king in council; but being soon overwhelmed with appeals from all parts of England, he framed the body of laws which long served as the basis of English jurisprudence. The house of lords is the highest court of appeal in civil causes. Courts of appeal at the Exchequer Chamber, in error from the judgments of the superior and criminal courts, were regulated by statutes in 1830 and 1848. Appeals from English tribunals to the pope were first introduced about 1151, were long vainly opposed, and were finally abolished by Henry VIII. 1534; see *Privy Council*, and *Justices, Lord*.

APPENZELL, a Swiss canton, threw off the supremacy of the abbots of St. Gall early in the 15th century, and became the thirteenth member of the Swiss confederation, 1513.

APPIAN WAY, a Roman road, made by Appius Claudius Cæcus, while censor, 312 B.C.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, fruiterer to Henry VIII., is said to have planted a great number of the orchards in Kent, and lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 78 varieties of apples in his day (1688). In 1866 there were 1500 varieties in the collection of the Royal Horticultural Society, many not worth cultivation.

APPRAISERS. The valuation of goods for another was an early business in England; and so early as 1283, by the statute of merchants, "it was enacted that if they valued the goods of parties too high, the appraisers should take them at such price as they have limited." In 1854 their annual licence was raised from 10s. to 40s.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. *Stow's Survey*. The apprentice tax enacted 43 Geo. III. 1802. An act for the protection of apprentices, &c. was passed in 1851. The term of seven years, not to expire till the apprentice was 24 years old, required by the statute of Elizabeth (1563), was abolished in 1814. The apprentices of London have been at times very riotous; they rose into insurrection against foreigners on *Evil May-day* (which see).

APPROPRIATION CLAUSE, of the Irish Tithe Bill of 1835, brought forward by lord John Russell, whereby any surplus revenue that might accrue by the working of the act was to be appropriated for the education of all classes of the people. The clause, adopted by the commons but rejected by the lords in 1835 and 1836, was abandoned.

APPROPRIATIONS (property taken from the church), began in the time of William I. The parochial clergy, then commonly Saxons, were impoverished by the bishops and higher clergy (generally Normans) to enrich the monasteries possessed by the conqueror's friends. Where the tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV. complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. Lay appropriations began after the dissolution of the monasteries, 1536.

APRICOT, *Prunus Armeniaca*, from Asia Minor, first planted in England about 1540, by the gardener of Henry VIII.

APRIL, the fourth month of our year, the second of the ancient Romans.

APTERYX (wingless), a bird, a native of New Zealand, first brought to this country in 1813, and deposited in the collection of the earl of Derby. Fossil specimens of a gigantic species of this bird (named *Dinornis*) were discovered in New Zealand by Mr. Walter Mantell in 1843, and since.

APULIA, a province in S.E. Italy, conquered by the Normans, whose leader Guiscard received the title of duke of Apulia from Pope Nicholas II. in 1059. After many changes of masters, it was absorbed into the kingdom of Naples, in 1265.

AQUARI, a sect said to have been founded by Tatian in the 2nd century, who forbore the use of wine even in the sacrament; during persecution they met secretly at night. For this they were censured by Cyprian (martyred 258).

AQUARIUM or **AQUAVIVARIUM**, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as scavengers. In 1849, Mr. N. B. Ward succeeded in growing sea-weeds in artificial sea-water; in 1850, Mr. R. Warington demonstrated the conditions necessary for the growth of

animals and plants in jars of water ; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up under the skilful direction of Mr. D. Mitchell. In 1854, Mr. Gosse published "The Aquarium." Mr. W. Alford Lloyd, late of Portland-road, London, by his enterprise in collecting specimens did much to increase the value and interest of aquaria. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860.

AQUATINT, see *Engraving*.

AQUEDUCT, an artificial watercourse on an inclined plane. Appius Claudius advised and constructed the first Roman aqueduct, as well as the *Appian way*, about 312 B.C. Aqueducts of every kind were among the wonders of Rome. *Livy*. There are now some remarkable aqueducts in Europe : that at Lisbon is of great extent and beauty ; that at Segovia has 129 arches ; and that at Versailles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England (1007 feet in length, and 126 feet high) was completed by T. Telford, and opened 26 Dec. 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830. An aqueduct to supply London with water from the Welsh lakes was proposed by Mr. J. Bateman in 1865.

AQUILA, S. Italy. Near here the Arragonese under the condottiere Braccio Fortebraccio were defeated by the allied Papal, Neapolitan, and Milanese army under Jacob Caldora, 2 June, 1424. Braccio, a wounded prisoner, refused to take food, and died, 5 June.

AQUILEIA (Istria), made a Roman colony about 180 B.C. and fortified A.D. 168. Constantine II. was slain in a battle with Constans, fought at Aquileia towards the close of March 340. Maximus defeated and slain by Theodosius, near Aquileia 28 July, 388. Theodosius defeated Eugenius and Arbogastes, the Gaul, near Aquileia, and remained sole emperor, 6 Sept. 394. Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a synod here in 381. In 452 Aquileia was almost totally destroyed by Attila the Hun, and near it in 489 Theodorich and the Ostrogoths totally defeated Odoacer, the king of Italy.

AQUITAINE, the Roman province Aquitania (S. W. France), conquered by the Romans 28 B.C. ; by the Visigoths, A.D. 418 ; taken from them by Clovis in 507. Henry II. of England obtained it with his wife Eleanor, 1152. It was erected into a principality for Edward the Black Prince in 1362 ; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1418. The province was lost in the reign of Henry VI.

ARABIA (W. Asia). The terms *Petræa* (stony), *Felix* (happy), and *Deserta* are said to have been applied to its divisions by Ptolemy, about A.D. 140. The Arabs claim descent from Ishmael, the eldest son of Abraham, born 1910 B.C. *Gen.* xvi. Arabia was unsuccessfully invaded by Gallus, the Roman governor of Egypt, 24 B.C. In A.D. 622, the Arabians under the name of Saracens, followers of Mahomet (born at Mecca, 570), their general and prophet, commenced their course of conquest ; see *Mahometanism*. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. To them we owe our ordinary (*Arabic*) numerals and arithmetical notation. The Koran was written in Arabic (622-632). The Bible was printed in Arabic in 1671.

ARABIAN NIGHTS' ENTERTAINMENTS (or 1001 Tales) were translated into French by Galland, and published in 1704 ; but their authenticity was not acknowledged till many years after. The best English translation from the Arabic is that of Mr. E. W. Lane, published in 1839, with valuable notes and beautiful illustrations.

ARABICI, a sect which sprung up in Arabia, about 207, whose distinguishing tenet was, that the soul died with the body, and rose again with it.

ARAGON, part of the Roman Tarraconensis, a kingdom, N.E. Spain, was conquered by the Carthaginians, who were expelled by the Romans about 200 B.C. It became an independent monarchy in A.D. 1035 ; see *Spain*.

ARAM, the ancient name of Syria (*which see*).

ARANJUEZ (Central Spain), contains a fine royal palace, at which several important treaties were concluded. On 17 March, 1808, an insurrection broke out here against Charles IV. and his favourite, Godoy, the prince of peace. The former was compelled to abdicate in favour of his son, Ferdinand VII., 19 March.

ARAUSIO (now ORANGE), S. E. France. Through the jealousy of the Roman proconsul Q. Servilius Cæpio, who would not wait for the arrival of the army of the consul C. Manlius, both were defeated by the Cimbræ with much slaughter, 105 B.C.

ARBELA. The third and decisive battle between Alexander the Great and Darius Codomanus decided the fate of Persia, 1 Oct. 331 B.C., on a plain in Assyria, between Arbela and Gaugamela. The army of Darius consisted of 1,000,000 foot and 40,000 horse; the Macedonian army amounted to only 40,000 foot and 7000 horse. *Arrian.* The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory, amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. *Plutarch.*

ARBITRATION. Submission to arbitration was authorised and made equivalent in force to the decision of a jury, by 9 & 10 Will. III. (1698). Submissions to arbitration may be made rules of any court of law or equity, and arbitrators may compel the attendance of witnesses, 3 & 4 Will. IV. c. 42 (1833); see *Ouzel Galley*. The Common Law Procedure Act (1854) authorises the judges of superior courts to order compulsory arbitration; and, by an act passed in 1859, railway companies may settle disputes with each other by arbitration; see *Prud'hommes*.

ARBUTUS. The *Arbutus Andrachne*, oriental strawberry-tree, was brought to England from the Levant about 1724.

ARCADES, or walks arched over. The principal in London are the Burlington-arcade, opened 20 March, 1819; and the Lowther-arcade, Strand, opened at the period of the Strand improvements; see *Strand*, and *Exeter Change*. The Royal-arcade, Dublin, opened June, 1820, was burnt to the ground, 25 April, 1837.

ARCADIA, in the centre of the Peloponnesus, Greece, named after Arcas, a king. The Arcadians regarded their nation as the most ancient of Greece, and older than the moon (*Proseleni*, which word Döderlein conjectures to mean Pre-Hellenic). Pelasgus is said to have taught them to feed on acorns, as being more nutritious than herbs, their former food; for which they honoured him as a god, 1521 B.C. Arcadia had twenty-five kings, whose history is altogether fabulous.

 Arcadia, having joined the Achaean league, on its suppression becomes part of the Roman empire 146

ARCADIANS, a new ultra-conservative French political club, composed of a section of the majority in the chambers, and opposed to liberal measures, even when emanating from the emperor (such as the new press law). It derives its name from Rue de l'Arcade, where its meetings are held: Feb. 1868.

ARCH. It appears in early Egyptian and Assyrian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, constructed under the early kings, about 588 B.C. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention.* —The **TRUMPHAL** arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks in London were erected about 1828. The Marble Arch, which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851) was modelled from the arch of Constantine; see *Hyde Park*.

ARCHÆOLOGY, the science of antiquities; see *Antiquaries*.

ARCHANGEL (N. Russia), a city, is thus named from a monastery founded here, and dedicated to St. Michael in 1584. The passage to Archangel was discovered by the English navigator Richard Chancellor in 1553, and it was the only seaport of Russia till the formation of the docks at Cronstadt, and foundation of St. Petersburg in 1703. The dreadful fire here, by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1793.

ARCHBISHOP (Greek *archiepiscopus*), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople, who presided over the other metropolitans and bishops in the districts attached to those places. The

* The new bridge of Chester, whose span is 200 feet, was commenced in 1829. The central arch of London Bridge is 152 feet; and the three east iron arches of Southwark bridge, which rest on massive stone piers and abutments are, the two side ones 210 feet each, and the centre 240 feet: thus the centre arch exceeds the admired bridge of Sunderland by four feet in the span, and the long-famed Rialto at Venice, by 167 feet; see *Bridges*.

word is first found in the Apology against the Arians by Athanasius, who died 373. The Eastern archbishops have since been styled *patriarchs*. *Riddle*.

Before the Saxons came to England, there were three archbishops: London, York, and Caerleon-upon-Usk; but soon after St. Augustin settled the metropolitan see at Canterbury, 602; see *Canterbury*.

York continued archiepiscopal; but London and Caerleon lost the dignity; see *St. David's*.

The bishoprics in *Scotland* were under the jurisdiction of the archbishop of York until the erection of the archiepiscopal sees of St. Andrew's and Glasgow in 1470 and 1491; these last were discontinued at the Revolution; see *Glasgow* and *St. Andrew's*.

The bishop of Moray, &c., is now (1868) styled *Primus*.

ARCH-CHAMBERLAIN. The elector of Brandenburg was appointed the hereditary arch-chamberlain of the German Empire by the golden bull of Charles IV. in 1356, and in that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France (418-986), and when their territories were divided, the archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and Arles.

ARCHDEACON, a name early given to the first or eldest deacon, who attended on the bishop without any power; but since the council of Nice, his function has become a dignity above a priest. The appointment in these countries is referred to 1075. There are seventy-one archdeacons in England (1868), and thirty-three in Ireland. The archdeacon's court is the lowest in ecclesiastical polity; an appeal lies from it to the consistorial court, by 24 Henry VIII. (1532).

ARCHERY is ascribed to Apollo, who communicated it to the Cretans.

Ishmael "became an archer" (*Gen. xxi. 20*), B.C. 1892
The Philistine archers overcame Saul (1 *Sam. xxxi. 3*).

David commanded the use of the bow to be taught (2 *Sam. i. 18*) 1055

Aster of Amphipolis, having been slighted by Philip, king of Macedon, at the siege of Methone, shot an arrow, on which was written "Aimed at Philip's right eye," which put it out; Philip drew back the arrow with these words: "if Philip take the town, Aster shall be hanged," and kept his word 353

Archery introduced into England previous to A.D. 440

Harold and his two brothers were killed by arrows shot from the cross-bows of the Norman soldiers at the battle of Hastings in 1066

Richard I. revived archery in England in 1190, and was himself killed by an arrow in 1199

The rank of archbishop was early in *Ireland*; see *Ferns*.

Four archbishops were constituted, Armagh, Cashel, Dublin, and Tuam; (until then the archbishop of Canterbury had jurisdiction over the Irish as well as English bishops, in like manner as the archbishop of York had jurisdiction over those of Scotland), 1151.

Of these four archbishoprics two were reduced to bishoprics (Cashel and Tuam) conformably with the stat. 3 & 4 Will. IV. by which also the number of sees in Ireland was to be reduced from twenty-two to twelve (see *Bishops, Cashel, Tuam; Pallium, &c.*) 1833.

The victories of Crecy (1346), Poitiers (1356), and Agincourt (1415), were won chiefly by archers.

Four thousand archers surrounded the houses of Parliament, ready to shoot the king and the members, 21 Richard II. (*Stow*) 1397

The citizens of London formed into companies of archers in the reign of Edward III.; and into a corporate body by the style of "The Fraternity of St. George," 29 Henry VIII. 1538

Roger Aseham's "*Toxophilus, the School of Shooting*," published in 1571

The *long bow* was six feet long, and the arrow three feet; the usual range from 300 to 500 yards. Robin Hood is said to have shot from 600 to 800 yards. The cross-bow was fixed to a stock, and discharged with a trigger.

See *Artillery Company, Toxophilites, &c.*

ARCHES, COURT OF, the most ancient Consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow (*Sancta Maria de Arcubus*), London, where it was formerly held; and whose top is raised on stone pillars built archwise. *Cowell*. Appeals from this court lie to the judicial committee of the privy council, by statute, 1832. The judge, Dr. Stephen Lushington, (appointed in 1828) resigned 1 July, 1867, and was succeeded by sir Robert Phillimore.

ARCHITECTURE (from the Greek *archi-tekton*, chief artificer). The five great orders are,—the Doric, Ionic, and Corinthian (*Greek*);—the Tuscan and Composite (*Roman*). Gothic began to prevail in the 9th century. See *the Orders and Gothic*.

An Architectural Club was formed in 1791. An Architectural Society existed in London in 1808. The ROYAL INSTITUTE OF BRITISH ARCHITECTS was founded in 1834—Earl de Grey, president, 1835-61. The Architectural Society, established in 1831, was united to the Institute in 1842. The Architectural Association began about 1846.

ARCHONS. When royalty was abolished at Athens, in memory of king Codrus, killed in battle, 1044 B.C. (1070), the executive government was vested in elective magistrates called archons, whose office continued for life. Medon, eldest son of Codrus, was the first archon. The office was limited to ten years, 752 B.C., and to one year 683 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshal Alvinzi, fought 15-17 Nov. 1796. The Austrians lost 18,000 men in killed, wounded, and prisoners, four flags, and eighteen guns. The French lost about 15,000, and became masters of Italy. In one contest Bonaparte, in most imminent danger, was rescued by the impetuosity of his troops.

ARCOT (East Indies). This city (founded 1716) was taken by colonel Clive, 31 Aug. 1751; was retaken, but again surrendered to colonel Coote, 10 Feb. 1760; besieged and taken by Hyder Ali, when the British under colonel Baillie suffered severe defeat, 31 Oct. 1780. Arcot has been subject to Great Britain since 1801; see *India*.

ARCTIC EXPEDITIONS, see *North West Passage*, and *Franklin's Expedition*.

ARDAGH, an ancient prelacy in Ireland, founded by St. Patrick, who made his nephew, Mell, the first bishop, previously to 454. This see, once held with Kilmore since 1742, has been held *in commendam* with Tuam (*which see*). It was united with Kilmore in 1839, and with Elphin in 1841.

ARDFERT AND AGHADOE, bishoprics in Ireland long united; the former was called the bishopric of Kerry; Ert presided in the 5th century. William Fuller, appointed in 1663, became bishop of Limerick in 1667, since when Ardfert and Aghadoe have been united to that prelacy. Near the cathedral an anchorite tower, 120 feet high, the loftiest and finest in the kingdom, suddenly fell, 1770.

AREIOPAGUS or **AREOPAGUS**, a Greek tribunal, said to have heard causes in the dark, because the judges should be blind to all but facts, instituted at Athens about 1507 B.C.; also ascribed to Cecrops, 1556. The name is derived from the Greek *Areios pagos*, the hill of Mars, through the tradition that Mars was the first who was tried there for the murder of Halirrhothus, who had violated his daughter Alcippe. The powers of this court were enlarged by Solon, about 594 B.C., and diminished by Pericles, 461 B.C. Paul preached on Mars' hill, A.D. 52 (*Acts xvii.*).

AREZZO, near the ancient Arretium or Arretinum, an Etrurian city, which made peace with Rome for 30 years, 308 B.C., was besieged by Galli Senones, about 283 B.C., who defeated the Roman army Metellus sent to its relief—a disgrace avenged signally by Dolabella. Arezzo was an ancient bishopric: the cathedral founded in 1277. It is renowned as the birthplace of Mæcenas, Petrarch, Vasari, and other eminent men. Michael Angelo was born in the vicinity.

ARGAUM, in the Deccan, India, where sir Arthur Wellesley, on 29 Nov. 1803, thoroughly defeated and subjugated the rajah of Berar and the Mahratta chief Scindiah.

ARGENTARIA, Alsace (now COLMAR, N. E. France), where the Roman emperor Gratian totally defeated the Alemanni, and secured the peace of Gaul, 378.

ARGENTINE (or **LA PLATA**) **CONFEDERATION**, S. America, 14 provinces. This country was discovered by the Spaniards in 1515; settled by them in 1553, and formed part of the vice-royalty of Peru till 1778, when it became that of Rio de la Plata. It joined the insurrection in 1811, and became independent in 1816. It was at war with Brazil from 1826 to 1828, for the possession of Uruguay, which became independent as Monte-Video, and at war with France from 1838-40.

ARGINUSÆ ISLES, between Lesbos and Asia Minor; near these Conon and the Athenian fleet defeated the Spartan admiral Callicratidas, 406 B.C.

ARGONAUTIC EXPEDITION, 1263 B.C. (1225, *Clinton*), undertaken by Jason to avenge the death of his kinsman Phryxus, and recover the treasures seized by his murderer, Æetes, king of Colchis. The ship in which Phryxus had sailed to Colchis having been adorned with the figure of a ram, led to the fiction that the journey was to recover the golden fleece. This is the first naval expedition on record. Many kings and heroes accompanied Jason, whose ship was called *Argo*, from its builder.

ARGOS, the most ancient city of Greece, said to have been founded either by Inachus, 1856 B.C., or his son, Phoroneus, 1807, received its name from Argus, the fourth of the Inachidae, 1711 B.C.

ARGYLE (W. Scotland), bishopric of, founded about 1200, Ewaldus being the first bishop; the diocese, previously united with Dunkeld, ended 1688. Argyle and the Isles is a post-revolution bishopric, 1847; see *Bishoprics*.

ARIAN or ARYAN (in Sanskrit signifying noble, warlike), a term now frequently applied to the hypothetical Indo-Germanic family of nations.

ARIANS, followers of Arius of Alexandria, who preached against the divinity of Christ, about 315, and died in 336. The controversy was taken up by Constantine, who presided at the council of Nice, 325, when the Arians were condemned; but their doctrine long prevailed. It was favoured by Constantius II. 341; and carried into Africa by the Vandals in the 5th century, and into Asia by the Goths. Servetus published his treatise against the Trinity, 1531, and was burnt, 1553. Leggatt, an Arian, was burnt at Smithfield in 1614; see *Athanasian Creed*, *Socinians*, and *Unitarians*.

ARISTOTELIAN PHILOSOPHY: the most comprehensive ever devised by man. Aristotle was born at Stagyra (hence termed the Stagyrite), 384 B.C.; was a pupil of Plato from 364 to 347; became preceptor of Alexander, son of Philip of Macedon, in 342; and died in 322. He divided the circle of knowledge into metaphysics and logic, physics, including part of the science of mind, and ethics. His philosophy was too much exalted by the schoolmen during the middle ages, and too much depreciated after the reformation. His works on natural science contain a vast collection of facts and an extraordinary mixture of sound and chimerical opinions. To him is attributed the assertion that nature abhors a vacuum, an opinion now maintained by eminent modern philosophers.

ARITHMETIC is said to have been introduced from Egypt into Greece by Thales, about 600 B.C. The Chinese used the abacus at an early period. It is asserted that the ancient Hindus adopted a system having ten as a basis.

The oldest treatise upon arithmetic is by Euclid (7th, 8th, and 9th books of his *Elements*), about B.C. 300
The sexagesimal arithmetic of Ptolemy was used A.D. 130
Diophantus, of Alexandria, was the author of thirteen books of arithmetical questions (of which six are now extant) about 156

Notation by nine digits and zero, known at least as early as the 6th century in Hindostan—introduced from thence into Arabia, about 900—into Europe, about 980—into France, by Gerbert, 991—into Spain, 1050—into England 1253
The date in Caxton's *Mirror of the World*, Arabic characters, is 1480

ARIZONA, a territory of the United States, originally part of New Mexico, was organised 24 Feb. 1863; capital, Tucson.

ARK. Monnt Ararat is venerated by the Armenians, from a belief of its being the place on which Noah's ark rested, after the universal deluge, 2347 B.C.; see *Gen.* vi. vii. Some assert Apamea, in Phrygia, to be the spot; and medals have been struck there with a chest on the waters, and the letters NOE, and two doves; this place is 300 miles west of Ararat.

ARKADI, a successful Greek blockade-runner during the Cretan insurrection, was destroyed by the Turkish vessel Izeddin, off Crete, 19 Aug. 1867, after at least 22 successful voyages.

ARKANSAS, originally part of Louisiana, purchased from France by the United States in 1803, was admitted into the Union, 1836, seceded from it 6 May, 1861; conquered, 1865. Several battles were fought in this state in 1862. Capital, Little Rock.

ARKLOW (in Wicklow), where a battle was fought between the insurgent Irish, amounting to 31,000, and a small regular force of British, which signally defeated them, 10 June, 1798. The town was nearly destroyed by the insurgents in May previous.—Native gold was discovered in Arklow, in Sept. 1795. *Phil. Trans.* vol 86.

ARLES (Arelatum, from the Celtic *Ar-lait*, near the waters), S. France, said to have been founded 2000 B.C., a powerful Roman city, was made capital of the kingdom of Provence by Bason in 879; and of the kingdom of Arles or Transjurane Burgundy by Rodolph II. in 933. He was succeeded by Conrad I. 937; and by Rodolph III. 993; who his death, 1032, transmitted it to the emperor Conrad II.

ARMADA, THE INVINCIBLE, collected and equipped by Philip II. king of Spain, for the subjugation of England. The following particulars are taken from Morant's historical account accompanying Pine's engravings of the tapestries formerly in the house of lords, printed 1739.

ARMAGH, N. Ireland, of which it was the metropolis from the 5th to the 9th century, the seat of the first ecclesiastical dignity in Ireland, founded by St. Patrick, its first bishop, about 444, and said to have built the first cathedral 450. Six saints of the Roman calendar have been bishops of this see. In the king's book, by an extent taken 15 James I., it is valued at 400l. sterling a year; and until lately, was estimated at 15,000l. per annum. The see was re-constituted (see *Pallium*) in 1151. *Beatson*. Armagh was ravaged by the Danes on Easter-day, 852, and by O'Neil in 1564.

ARMAGNACS, a political party in France, followers of the duke of Orleans, derived their name from his father-in-law, the count of Armagnac. About 3500 of this party were massacred at Paris in June, 1418, by their opponents, the followers of the duke of Burgundy.

ARMED NEUTRALITY, the confederacy of the northern powers against England, formed by the empress of Russia, 1780; ended, 1781; renewed, and a treaty ratified in order to cause their flags to be respected by the belligerent powers, 16 Dec. 1800. The principle that neutral flags protect neutral bottoms being contrary to the maritime system of England, the British cabinet remonstrated, war ensued, and Nelson and Parker destroyed the fleet of Denmark before Copenhagen, 2 April, 1801. This event and the murder of the emperor Paul of Russia led to the dissolution of the Armed Neutrality.

ARMENIA, Asia Minor. Here Noah is said to have resided when he left the ark, 2347

B.C. Armenia, after forming part of the Assyrian, Median, and Persian empires, became subject to the Greek kings of Syria, after the defeat of Antiochus the Great, 190 B.C.; the Romans established the kingdoms of Armenia Major and Minor, but their influence over them was frequently interrupted by the aggressions of the Parthians. In all their political troubles the Armenians have maintained the profession of Christianity, and their church is governed by patriarchs, not subject to Rome. Since 1715 an Armenian convent has existed at Venice, where books on all subjects are printed in the Armenian language.

ARMENIAN ERA, commenced on 9 July, 552; the ecclesiastical year on 11 Aug. To reduce this last to our time, add 551 years and 221 days; and in leap years subtract one day from 1 March to 10 Aug. The Armenians used the old Julian style and months in their correspondence with Europeans.

ARMILLARY SPHERE, an astronomical instrument composed of brass circles disposed in such a manner that the greater and lesser circles of the sphere may be seen in their natural position and motion. It is said to have been invented by Eratosthenes, about 255 B.C.; and was employed by Tycho Brahe and others.

ARMINIANS or REMONSTRANTS, derive their former name from James Arminius (or Harmensen), a Protestant divine of Leyden, Holland (died, 1609); the latter name from his followers having presented a *Remonstrance* to the states-general in 1610. They separated from the Calvinists, objecting to their views of predestination. Their doctrines were condemned in 1619, at the synod of Dort (*which see*); they were exiled till 1625. The Calvinists were sometimes styled *Gomarists*, from Gomar, the chief opponent to Arminius. James I. and Charles I. favoured the Arminian doctrine.

ARMORIAL BEARINGS became hereditary in families at the close of the 12th century. They took their rise from the knights painting their banners with different figures, and were employed by the crusaders, in order at first to distinguish noblemen in battle, 1100. The lines to denote colours in arms, by their direction or intersection, were invented by Columbière in 1639. Armorial bearings were taxed in 1798, and again in 1808. The armorial bearings of the English sovereigns are given under the article *England*.

ARMORICA, now Brittany, N. France, was conquered by Julius Cæsar, 56 B.C. Many Gauls retired there and preserved the Celtic tongue, A.D. 584; see *Brittany*.

ARMOUR. That of Goliath is described (about 1063 B.C.) 1 Sam. xvii. 5. The warlike Europeans at first despised any other defence than the shield. Skins and padded hides were first used, and brass and iron armour, in plates or scales, followed. The body armour of the Britons was skins of wild beasts, exchanged, after the Roman conquest, for the well-tanned leathern cuirass. *Tacitus*. This latter continued till the Anglo-Saxon era. Hengist is said to have had scale armour, A.D. 449.

ARMS. The club was the first offensive weapon; then followed the mace, battle-axe, pike, spear, javelin, sword and dagger, bows and arrows. Pliny ascribes the invention of the sling to the Phœnicians; see *articles on the various weapons throughout the volume*.

ARMS, see *Armorial bearings*, and *Heraldry*.

ARMS' BILL, for the repression of crime and insurrection in Ireland, was passed 15 Oct. 1831. It was a revival of the expired statutes of George III. The guns registered under this act throughout the kingdom at the close of the first year scarcely amounted to 3000, and the number was equally small of all other kinds of arms. The new Arms' bill passed 22 Aug. 1843. It has been since renewed, but has not been rigidly enforced.

ARMSTRONG GUN, see under *Cannon*.

ARMY. Ninus and Semiramis had armies amounting to nearly two millions of fighting men, 2017 B.C. The first guards and regular troops as a standing army were formed by Saul, 1093 B.C. *Eusebius*. The army of Xerxes invading Greece is said to have been 1,700,000 foot and 80,000 horse: 480 B.C. One of the first standing armies of which we have any account, is that of Philip of Macedon. The army which Darius opposed to Alexander the Great (332 B.C.) is set down as between 750,000 and a million. The first standing army which existed as such, in modern times, was maintained in France by Charles VII. in 1445. The chief European nations have had in their service the following armies: Spain, 150,000 men; Great Britain, 310,000; Prussia, 350,000; Turkey, 450,000; Austria, 500,000; Russia, 560,000; and France, 680,000. Estimated number in Europe in 1863, 6,000,000 soldiers, 1,000,000 horses, 11,000 guns. The European powers are still increasing their armies, 1868.

ARMY, BRITISH, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1633 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1685 the army consisted of 7000 foot and 1700 cavalry. Standing armies were introduced by Charles I. in 1638; they were declared illegal in England, 31 Char. II. 1679; but one was then gradually forming, which was maintained by William III. 1689, when the Mutiny Act was passed; see *Regiments*. Grose's "History of the British Army," was published in 1801. The effective rank-and-file of the army actually serving in the pay of Great Britain on 24 Dec. 1800, amounted to 168,082; and the estimates of the whole army in that year were 17,973,000*l*. The militia, volunteer, and other auxiliary forces were of immense amount at some periods of the war ending in 1815. The strength of the volunteer corps was greatest between the years 1798 and 1804, in which latter year this species of force amounted to 410,000 men, of whom 70,000 were Irish; and the militia had increased to 130,000 men, previously to the regular regiments being recruited from its ranks in 1809; see *Militia*, and *Volunteers*.

ARMY OF OCCUPATION. By treaty, signed 20 Nov. 1815, the allied powers established the boundaries of France, and stipulated for the occupation of certain fortresses by foreign troops for three years.

AROMATIC. Acron of Agrigentum is said to have been the first who caused great fires to be made, and aromatics to be thrown into them, to purify the air, by which means he put a stop to the plague at Athens, 429 B.C.

ARPAD DYNASTY, see *Hungary*.

ARPINUM (now Arpino, S. Italy) the birthplace of Cicero, 3 Jan. 106 B.C.; many remains still bear his name.

ARQUEBUS, see *Fire Arms*.

ARQUES (N. France). Near here the league army, commanded by the duc de Mayenne, was defeated by Henry IV. 21 Sept. 1589.

ARRACAN, a province of N. E. India. Arracan, the capital, captured by the Burmese, 1783; was taken from them by general Morrison, 1 April, 1825. The subjugation of the whole province soon followed.

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person standing mute was declared convicted by an act passed 1772; but in 1827, the court was directed to enter a plea of "not guilty" in such cases; see *Mute*.

ARRAS (N. E. France), the ancient Atrebates, the seat of a bishop since 390. Here a treaty was concluded between the king of France and duke of Burgundy, when the latter abandoned his alliance with England, 22 Sept. 1435. Another treaty was concluded by Maximilian of Austria with Louis XI. of France, whereby Burgundy and Artois were given to the dauphin as a marriage portion; 1482. *Velly*. Arras was held by the Austrians from 1493 till 1640, when it was taken by Louis XIII.

ARRAY. On 23 Dec. 1324, Edward II. directed the bishop of Durham to make "arraier" his men of arms, horse and foot, and cause them to proceed to Portsmouth; thence to proceed to the war in Gascony. *Rymer's Fœdera*. Hallam says that this was the earliest commission of array that he could find, and that the latest was dated 1557. The attempt of Charles I. to revive commissions of array in 1642, founded on a statute of Henry IV., was strenuously opposed as illegal.

ARREST FOR DEBT. The persons of peers, members of parliament, &c., are protected from arrest; see *Ambassadors*; *Ferrars' Arrest*.

Clergymen performing divine service privileged, 50 Edw. III.	1375	Statute abolishing arrest for debt on mesne process, except in cases wherein there is ground to show that the defendant designs to leave the country, 2 Vict.	Aug. 1838
Seamen privileged from debts under 20l., by 30 Geo. III.	1756	By 7 & 8 Vict. c. 96, the power of imprisonment even upon final process, that is judgment debts, is abolished if the sum does not exceed 20l. exclusive of costs, 1844; and by 9 & 10 Vict. c. 95, the judge has no power to punish, except in case of fraud or contempt of court	1846
Barristers privileged from arrest while going to, attending upon, and returning from court, on the business of their clients.		By the Absconding Debtors' Arrest Act, absconding debtors owing 20l. and upwards are liable to arrest	1851
By stat. 29 Char. II. no arrest can be made, nor process served upon a Sunday; this law was extended by Will. III.			
Vexatious arrests prevented by act, May, 1733: Prohibited for less than 10l. on process, 1779: and for less than 20l.	July, 1827		
Arrests for less than 20l. were prohibited on mesne process in Ireland, in June	1829		

ARRETIUM, see *Arezzo*.

ARSACIDÆ, a Parthian dynasty, began with Arsaces about 250 B.C. and ended with Artabanus, killed in battle with Artaxerxes, the founder of the Sassanidæ, A.D. 226.

ARSENAL, a great military or naval repository; see *Woolwich*.

ARSENIC, a steel-gray coloured brittle metal, extremely poisonous, known in early

times. Brandt, in 1733, made the first accurate experiments on its chemical nature. The heinous crimes committed by means of this mineral obliged the legislature to enact regulations for its sale, 1851. In 1858 Dr. A. S. Taylor asserted that green-paper-hangings and dresses prepared from arsenic are injurious to health; which is doubted by some chemists.

ARSENITE SCHISM, see *Eastern Church*, 1255.

ARSON, punished with death by the Saxons, remained a capital crime on the consolidation of the laws in 1827, 1837, and 1861.

ARSOUF (Syria). At a battle here Richard I. of England, commanding the Christian forces, reduced to 30,000, defeated Saladin's army of 300,000 Saracens and other infidels, on 6 Sept. 1191. Ascalon surrendered, and Richard marched to Jerusalem, 1192.

ART ACT, facilitating the public exhibition of works of art, (lent to the president of the privy council), passed April 1866.

ARTEMISIUM, a promontory in Eubœa, near which indecisive conflicts took place between the Greek and Persian fleets for three days; 480 B.C. The former retired on hearing of the battle of Thermopylæ.

ARTESIAN WELLS (from *Artesia*, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water, which has percolated from a higher level, and which rises to that level through the boring tube. The fountains in Trafalgar square and government offices near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1841, after eight years of exertion, by M. Mulot at an expense of about 12,000*l.*, and the well at Passy, which it is said will supply sufficient water for nearly 500,000 persons, was begun in 1855, and completed in 1860 by M. Kind. Messrs. Amos and Easton completed an Artesian well for the Horticultural Society's garden in 1862, which yielded 880,000 gallons of water, at the temperature of 81° Fahr., in twenty-four hours. The well at Kissingen was completed in 1850. Artesian wells are now common.

ARTICHOKES are said to have been introduced from the East into Western Europe in the 15th century, and to have reached England about 1502.

ARTICLES OF RELIGION. On 8 June, 1536, after much disputing, the English clergy in convocation published "Articles decreed by the king's highness" Henry VIII., who published in 1539 the "Statute of Six Articles," decreeing the acknowledgment of transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession. Offenders were punishable as heretics. In 1551 forty-two were prepared. These forty-two were modified by the convocation, and reduced to THIRTY-NINE in Jan. 1563; and they received the royal authority and the authority of parliament in 1571. The *Lambeth Articles*, of a more Calvinistic character, attempted to be imposed by archbishop Whitgift, were withdrawn in consequence of the displeasure of queen Elizabeth, 1595. One hundred and four articles were drawn up for Ireland by archbishop Usher in 1614. On the union of the churches, the Irish adopted the English articles; see *Perth Articles*.

ARTICLES OF WAR were decreed in the time of Richard I. and John. Those made by Richard II. in 1485 appear in "Grose's Military Antiquities." The articles of war now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

ARTIFICERS AND MANUFACTURERS. Their affairs were severely regulated by the statutes of 1349, 1350, 1360, 1549, and especially of 1562. They were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A fine of 100*l.*, and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1736) and other statutes, which were repealed in 1824; see *Workmen*, &c.

ARTILLERY, a term including properly all missiles, now applied to *cannon*. A small piece was contrived by Schwartz, a German cordelier, soon after the invention of gunpowder, in 1330. Artillery was used, it is said, by the Moors of Algeiras, in Spain, in 1343; and according to some historians, at the battle of Crecy, in 1346, when Edward III. had four pieces of cannon. We had artillery at the siege of Calais, 1347. The Venetians employed artillery against the Genoese at sea, 1377. *Voltaire*. Said to have been cast, with mortars for bomb-shells, by Flemish artists, in Sussex, 1543. *Rymer's Fœdera*. Made of brass 1635; improvements by Browne, 1728; see *Cannon*, *Bombs*, *Carronades* (under *Carron*), *Mortars*, *Howitzers*, *Petard*, *Rockets*, *Fire-arms*. The *Royal Artillery regiment* was established in the reign of Anne.

ARTILLERY ASSOCIATION, NATIONAL, held its first annual meeting for prize-shooting at Shoeburyness, July, 1865. Meetings were held in July, 1866, and July, 1867.

ARTILLERY COMPANY OF LONDON, HONOURABLE, instituted in 1585, having ceased, was revived in 1610. It met for military exercise at the Artillery ground, Finsbury, where the London archers had met since 1498; (see *Archery*). In the civil war, 1641-8, the company took the side of the parliament, and greatly contributed towards its success. The company numbered 1200 in 1803 and 800 in 1861. Since 1842 the officers have been appointed by the queen. On the decease of the duke of Sussex in 1843, the prince consort became colonel and captain-general. He died 14 Dec. 1861, and the prince of Wales was appointed his successor, 24 Aug. 1863.

ARTISTS' FUND was established in 1810 to provide allowances for sick, and annuities for incapacitated members. *Artists' General Benevolent Institution*, established 1814.

ARTS. In the 8th century, the circle of sciences was composed of seven liberal arts—grammar, rhetoric, logic, arithmetic, music, geometry, and astronomy. *Harris*. The Royal Society of England (*which see*) obtained its charter 2 April, 1663.

The Society of Arts, to promote the polite arts, commerce, manufactures, and mechanics, originated in the patriotic zeal of Mr. Shipley, and of its first president, lord Folkestone . 1754

FINE ARTS.

First public exhibition by the artists of the British metropolis took place at the rooms of the Society of Arts 1760
Repeated there for several years, till the Royal Academy was founded 1768
Society of British Artists was instituted 21 May, 1823
Their first exhibition opened 19 April 1824

Society for the Encouragement of the Fine Arts founded in Dec. 1858
Art Unions began in France and Germany early in the present century.
The first in Britain was established at Edinburgh.
The Art Union of London, 444, West Strand, was founded 14 Feb. 1837; and chartered 1 Dec. 1846. The Art Union indemnity act was passed 3 Aug. 1844.

ARUNDEL CASTLE (Sussex), built by the Saxons about 800. The duke of Norfolk enjoys the earldom of Arundel, as a feudal honour, by inheritance and possession of the castle, without any other creation. Philip Howard, son of the attainted duke of Norfolk, was made earl of Arundel, by summons, as possessor of this castle, 1580. It was thoroughly repaired by a late duke at a vast expense.

ARUNDELLIAN MARBLES, called also Oxford Marbles; one containing the chronology of ancient history from 1582 to 355 B.C., and said to have been sculptured 264 B.C. They consist of 37 statues, 128 busts, and 250 inscriptions, and were found in the isle of Paros, in the reign of James I., about 1610. They were collected by Mr. W. Petty, purchased by lord Arundel, and given by his grandson Henry Howard, afterwards duke of Norfolk, to the university of Oxford in 1667; and are therefore called also **OXFORD MARBLES**. The characters of the inscriptions are Greek. A variorum edition of the inscriptions, by Maittaire, appeared in 1732, and a fine one by Chandler in 1763; and translations by Selden, 1628; by Prideaux, 1676; see *Kidd's Tracts*; and *Porson's Treatise*, 1789.

ARUNDEL SOCIETY, for the promotion of the knowledge of art, was established in 1848. It publishes fac-similes and photographs.

ARUSPICES, see *Haruspices*.

AS, a Roman weight and coin: as a weight, it was a pound; as a coin, it had different weights, but the same value. In the reign of Servius, the *as* weighed a pound of brass; in the first Punic war, it weighed two ounces, 264 B.C.; in the second Punic war, one ounce, 218 B.C.; and afterwards half an ounce; its value was about three farthings sterling.

ASAPH, St. (N. Wales), a bishopric founded by Kentigern, bishop of Glasgow. On returning into Scotland about 560, he left St. Asaph his successor, from whom the see is named. It is valued in the king's books at 187*l.* 11*s.* 6*d.* By an order in council, 1838, the sees of St. Asaph and Bangor were to have been united on the next vacancy in either; and the bishopric of Manchester created. This order was annulled in 1846. Present income 4200*l.*; see *Manchester*.

BISHOPS OF ST. ASAPH.

1802. Samuel Horsley, died 4 Oct. 1806.
1806. William Cleaver, died 15 May, 1815.

1815. John Luxmore, died 21 Jan. 1830.
1830. William Carey, died 13 Sept. 1846.
1846. Thomas Fowler Short (PRESENT bishop).

ASBESTOS, a native fossil stone, which may be split into threads and filaments, and which is endued with the property of remaining unconsumed in fire. Cloth was made of it by the Egyptians (*Herodotus*), and napkins in the time of Pliny, 74; and also paper. The spinning of asbestos known at Venice, about 1500. *Porta*.

ASCALON (Syria), a city of the Philistines, shared the fate of Phœnicia and Judea. The Egyptian army was defeated here by the crusaders under Godfrey of Bouillon, 12 Aug. 1099. Ascalon was besieged by the latter in 1148, taken in 1153; and again in 1191. Its fortifications were destroyed for fear of the crusaders by the sultan in 1270.

ASCENSION, an island in the Atlantic ocean, 800 miles N. W. of St. Helena, discovered by the Portuguese in 1501 ; and taken possession of by the English in 1815.

ASCENSION DAY, also called Holy Thursday, when the church celebrates the ascension of our Saviour, the fortieth day after his resurrection from the dead, 14 May, 33 ; first commemorated, it is said, 68. Ascension day, 1868, 21 May ; 1869, 6 May ; 1870, 26 May ; 1871, 18 May.

ASCHAFFENBURG, on the Maine, Bavaria, S. W. Germany. Here, on 14 July, 1866, the Prussians defeated the German Federal army, captured the town, and took 2000 prisoners.

ASCOT RACES, see *Races*.

ASCULUM, now ASCOLI, Apulia, S. Italy. Near it, Pyrrhus of Epirus defeated the Romans, 279 B. C. Asculum, a city of the Piceni, with all their country, was conquered by the consul Sempronius 268 B. C. Andrea, general of the emperor, Henry VI., endeavouring to wrest Naples from Tancred, was defeated and slain, A. D. 1190.

ASHANTEES, warlike negroes of West Africa. In 1807 they conquered Fantee, in which the British settlement Cape Coast Castle is situated. On the death of their king, who had been friendly to the English, hostilities began ; and on 21 Jan. 1824, the Ashantees defeated about 1000 British under sir Charles McCarthy at Accra, and brought away his skull with others as trophies. They were totally defeated, 27 Aug. 1826, by col. Purdon. The governor of Cape Coast Castle began a war with the Ashantees in spring of 1863. The British troops suffered much through disease ; and the war was suspended by the government in May, 1864.

ASHBURTON TREATY, concluded at Washington, 9 Aug. 1842, by Alexander, lord Ashburton, and John Tyler, president of the United States : it defined the boundaries of the respective countries between Canada and the state of Maine, settled the extradition of criminals, &c.

ASHDOD, or AZOTUS, (seat of the worship of the Phœnician god, Dagon, which fell down before the ark of the Lord) : captured by the Philistines from the Israelites, about 1141 B. C. (1 *Sam.* v.)

ASHDOWN, or ASSENDUNE, now thought to be Aston, Berks, where Ethelred and his brother Alfred defeated the Danes in 871.

ASHMOLEAN MUSEUM (books, manuscripts, coins, &c.), was presented to the university of Oxford by Elias Ashmole, the herald and antiquary, about 1682. It included the collections of the Tradescants, to whom he was executor. He died at Lambeth in 1692. The Ashmolean Society, Oxford (scientific), was established in 1828.

ASHTAROTH, a Phœnician goddess, occasionally worshipped by the Israelites (see *Judges* ii. 13) about 1406 B. C., and even by Solomon, about 984 B. C. (1 *Kings* xi. 5.)

ASH-WEDNESDAY, the first day of Lent, which in early times began on the Sunday now called the first in Lent. Pope Felix III., in 487, first added the four days preceding the old Lent Sunday, to raise the number of fasting days to forty ; Gregory the Great (pope, 590) introduced the sprinkling of ashes on the first of the four additional days, and hence the name of *Dies Cinerum*, or Ash-Wednesday. At the Reformation this practice was abolished, "as being a mere shadow, or vain show." Ash-Wednesday, 1868, 26 Feb. ; 1869, 10 Feb. ; 1870, 2 March ; 1871, 22 Feb.

ASIA, the largest division of the globe, so called by the Greeks from the nymph Asia, daughter of Oceanus and Tethys, and wife of Japhet. Asia was the first quarter of the world peopled : here the law of God was first promulgated ; here many of the greatest monarchies of the earth had their rise ; and hence most of the arts and sciences have been derived. Its early history is derived from the Bible and from Herodotus, who relates the wars of Cœsus, Cyrus, and others. See *Jews, China, India, Persia, and the other countries*.

ASIA MINOR, now ANADOLIA, comprised the Ionian colonies on the coast, the early seats of Greek civilisation, and the countries Mysia, Phrygia, Lycia, Bithynia, Caria, Lydia, Cappadocia, Galatia, &c., with the cities Troy, Ephesus, Smyrna (*all which see*). From the time of the rise of the Assyrian monarchy, about 2000 B. C., to that of the Turks under Osman, Asia Minor was the battle-field of the conquerors of the world.

ASIATIC SOCIETIES. The "Asiatic Society of Bengal," at Calcutta, was established by sir William Jones in 1784, "the bounds of its investigation to be the geographical limits of Asia." The "Royal Asiatic Society," which has several branches in India, was founded in 1823. It established the "Oriental Translation Fund" in 1828, which has published 83 volumes of Eastern literature (1865).

ASKESIAN SOCIETY (from the Greek *askēsis*, exercise), instituted in March, 1796, by a number of young men for discussing philosophical subjects. Its founders were the afterwards celebrated Wm. Allen, Wm. Phillips, Alex. Tilloch, Luke Howard, W. H. Pepsys, and others. In 1806 it merged into the Geological Society.

ASPERNE, GREAT, a town, and Essling, a village, near the Danube and Vienna, where a series of desperate conflicts took place between the Austrian army under the archduke Charles, and the French under Napoleon, Massena, &c., on 21-22 May, 1809, ending in the retreat of Napoleon on 22 May. The loss of the former exceeded 20,000 men, and of the latter 30,000. The daring marshal Lannes was mortally wounded on 22 May; and died 31 May; the bridge of the Danube was destroyed, and Napoleon's retreat endangered; but the success of the Austrians had no beneficial effect on the subsequent prosecution of the war.

ASPHALT, a solid bituminous substance, probably derived from decayed vegetable matter. The artificial asphalt obtained from gas-works began to be used as pavement about 1838. Claridge's patent asphalt was laid down in Trafalgar-square, Jan. 1864.

ASPROMONTE, Naples. Here Garibaldi was defeated, wounded, and taken prisoner 29 Aug. 1862, having injudiciously risen against the French occupation of Rome.

ASSAM (N. E. India) came under British dominion in 1825, and was surrendered by the king of Ava in 1826. The tea-plant was discovered here by Mr. Bruce in 1823. A superintendent of the tea-forests was appointed in 1836, the cultivation of the plant having been recommended by lord William Bentinck, in 1834. The Assam Tea Company was established in 1839, by whom Chinese labourers and coolies were introduced. After several years, the plantations suffered severely, it is said through over speculation and neglect of the labourers; as a remedy a labour act was passed at Calcutta, about July, 1867.

ASSASSINATION PLOT, said to have been formed by the earl of Aylesbury and others to assassinate William III., near Richmond, Surrey, and restore James II., 14 Feb. 1695-6. It was discovered by Prendergast.

ASSASSINS, or ASSASSINIANS, fanatical Mahometans, collected by Hassan-ben-Sabah, and settled in Persia about 1090. In Syria they possessed a large tract of land among the mountains of Lebanon. They murdered the marquis of Montferrat in 1192; Lewis of Bavaria in 1213; and the khan of Tartary in 1254. They were extirpated in Persia about 1258 and in Syria about 1272. The chief of the corps was named "*Ancient of the mountain,*" and "*Old Man of the Mountain.*" They trained up young people to assassinate such persons as their chief had devoted to destruction. *Hénault*. From them the word *assassin* has been derived.

ASSAY OF GOLD AND SILVER originated with the bishop of Salisbury, a royal treasurer in the reign of Henry I. *Du Cange*. But certainly some species of assay was practised as early as the Roman conquest. Assay was established in England 1354; regulated 13 Will. III. 1700, and 4 Anne, 1705. Assay masters appointed at Sheffield and Birmingham, 1773. The laws respecting assay were amended in 1854 and 1855. The alloy of gold is silver and copper, that of silver is copper. Standard gold is 2 carats of alloy to 22 of fine gold. Standard silver is 18 dwts. of copper to 11 ozs. 2 dwts. of fine silver; see *Goldsmiths' Co*.

ASSAYE (E. Indies). The British army, under general Arthur Wellesley (afterwards duke of Wellington), entered the Mahratta states on the south; took the fort of Ahmednuggur, 12 Aug.; and defeated Scindiah and the rajah of Berar at Assaye, 23 Sept. 1803. This was Wellesley's first great battle, in which he opposed a force more than ten times greater than his own (only 4500 men). The enemy fled, leaving their artillery, ammunition, and stores.

ASSEMBLY OF DIVINES held at Westminster, 1 July, 1643, convoked by order of parliament, to consider the liturgy, government, and doctrines of the church. Two members were elected for each county. They adopted the Scottish covenant, and drew up the directory for public worship, a confession, and the catechisms now used by the church of Scotland. The last (1163rd) meeting was on 22 Feb. 1649; see *Church of Scotland*.

ASSENT, see *Royal Assent*.

ASSESSED TAXES. The date of their introduction has been as variously stated as the taxes coming under this head have been defined—all things have been assessed, from lands and houses to dogs and hair-powder. By some the date is referred to Ethelbert, in 991; to Henry VIII. 1522; and to William III. 1689, when a land-tax was imposed; see *Land*

Tax. The assessed taxes yielded in 1815 (the last year of the war), exclusively of the land-tax, 6,524,766*l.*, their highest amount. These imposts have varied in their nature and amount, according to the exigencies of the state, and the contingencies of war and peace. They were considerably advanced in 1797 and 1801, *et seq.*, but considerably reduced in 1816, and in subsequent years. The last act for the repeal of certain assessed taxes was passed 16 & 17 Vict. c. 90, 20 Aug. 1853, explained and amended by 17 & 18 Vict. c. 1, 17 Feb. 1854.—Acts for the better securing and accounting for the Assessed and Income Taxes, 10 Aug. 1854; see *Taxes*, and *Income Tax*.

ASSIENTO, a contract between the king of Spain and other powers, for furnishing the Spanish dominions in America with negro slaves, began with the Flemings. By the treaty of Utrecht in 1713, the British government engaged to furnish 4800 negroes annually to Spanish America for thirty years. The contract was renewed in 1748, but given up in 1750; see *Guinea*.

ASSIGNATS, a paper currency, ordered by the National Assembly of France to support public credit during the revolution, April, 1790. At one period, eight milliards, or nearly 350 millions of pounds sterling, of this paper were in circulation in France and its dependencies. *Alison*. Assignats were superseded by mandats in 1796.

ASSIZE OF BATTLE, see *Appeal*.

ASSIZE OF BREAD, &c., see *Bread*, and *Wood*.

ASSIZE COURTS (from *assideo*, *I sit*) are of very ancient institution in England, and in old law books are defined to be an assembly of knights and other substantial men, with the justice, to meet at a certain time and place: regulated by Magna Charta, 1215. The present justices of assize and *Nisi Prius* are derived from the statute of Westminster, 13 Edw. I. 1284. *Coke*; *Blackstone*. "The king doth will that no lord, or other of the country, shall sit upon the bench with the justices to take assize in their sessions in the counties of England, upon great forfeiture to the king," 20 Rich. II. 1396. *Statutes, Brough Act*. Assizes are general or special; general when the judges go their circuits, and special when a commission is issued to take cognisance of one or more causes; see *Bloody Assize*.

ASSOCIATIONS, see *National Associations*.

ASSUMPTION, FEAST OF THE, 15 Aug. It is observed by the church of Rome in honour of the Virgin Mary, said to have been taken up to heaven in her corporeal form, body and spirit, on this day, A. D. 45, in her 75th year. The festival was instituted in the 7th century, and enjoined by the council of Mentz, 813.

ASSURANCE, see *Insurance*.

ASSYRIA, an Asiatic country between Mesopotamia and Media, was the seat of the earliest recorded monarchy. Its history is nearly derived from Ctesias, an early Greek historian of doubtful authenticity, Herodotus, and the Holy Scriptures. The discovery by Mr. Layard of the Ninevite antiquities, now in the British Museum, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, sir H. Rawlinson, and other scholars, have drawn much attention to the Assyrians. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates they assign to events in Assyrian history.

ASTORGA (N. W. Spain), the ancient Asturica Augusta, was taken by the French in 1810, and treated with great severity.

ASTRACAN (S. E. Russia), a province acquired from the Mogul's empire in 1554; visited and settled by Peter the Great in 1722.

ASTROLABE, an instrument for observing the stars, said to have been employed by Hipparchus about 130 B.C.; and by Ptolemy about 140 A.D. The modern astrolabe was described by Fabricius in 1513.

ASTROLOGY. Judicial astrology was cultivated by the Chaldeans, and transmitted to the Egyptians, Greeks, and Romans. It was much in vogue in Italy and France in the time of Catherine de Medicis (married to Francis I. of France, 1533). *Hénault*. It is said that Bede, 673-735, was addicted to it; and Roger Bacon, 1214-1292. Lord Burleigh is said to have calculated the nativity of Elizabeth, and she, and other princes, were dupes of Dee, the astrologer. It is stated that Lilly was consulted by Charles I. respecting his projected escape from Carisbrook castle in 1647. *Ferguson*. Astrological almanacs are still published in London.

ASTRONOMY. The earliest astronomical observations were made at Babylon it is said about 2234 B.C. The study was much advanced in Chaldæa under Nabonassar; was known to the Chinese about 1100 B.C.; some say many centuries before; see *Eclipses, Planets, Comets*.

ASTURIAS (N. W. Spain), an ancient principality. Here Pelayo collected the Gothic fugitives, about 713, founded a new kingdom, and by his victories checked Moorish conquest. For his successors, see *Spain*. The heir-apparent of the monarchy has borne the title "prince of Asturias" since 1388, when it was assumed by Henry, son of John I. king of Leon, on his marriage with a descendant of Peter of Castile. In 1808, the junta of Asturias began the organised resistance to the French usurpation.

ASYLUMS, or PRIVILEGED PLACES, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. God commanded the Jews to build cities of refuge, 1451 B.C., *Numbers* xxv.—The posterity of Hercules are said to have built one at Athens, to protect themselves against such as their father had irritated. Cadmus is said to have built one at Thebes, 1490 B.C., and Romulus one at Mount Palatine, 751 B.C.; see *Sanctuaries*.

ATELIERS NATIONAUX (National Workshops), were established by the French provisional government in Feb. 1848. They interfered greatly with private trade, as about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the fearful conflicts in June following; and the system was abolished in July.

ATHANASIAN CREED. Athanasius, of Alexandria, was elected bishop, 326. He firmly opposed the doctrines of Arius (who denied Christ's divinity); was several times exiled; and died in 373. The creed which bears his name is supposed by many to have been written about 340; or to be the compilation of Vigilius Tapsensis, an African bishop in the 5th century. It was commented on by Venatius Fortunatus, bishop of Poitiers in 570. Dr. Waterland's history of this creed (1723) is exhaustive; see *Arians*.

ATHEISM (from the Greek *a*, without, *Theos*, God, see *Psalm* xiv. 1), has had its martyrs. Spinoza was the defender of a similar doctrine (1632-1677). Lucilio Vanini publicly taught atheism in France, and was condemned to be burnt at Toulouse in 1619. Mathias Knutzen, of Holstein, openly professed atheism, and had upwards of a thousand disciples in Germany about 1674; he travelled to make proselytes, and his followers were called *Conscienciaries*, because they held that there is no other deity than conscience. "Though a small draught of philosophy may lead a man into atheism, a deep draught will certainly bring him back again to the belief of a God." *Lord Bacon*. Atheism became the ruling doctrine of the French republic, 1804.

ATHENÆA were great festivals celebrated at Athens in honour of Minerva. One was called Panathenea, the other Chaleea; they are said to have been instituted by Erechtheus or Orpheus, 1397 or 1495 B.C.; and revived by Theseus, who caused them to be observed by all the Athenians, the first every fifth year, 1234 B.C. *Plutarch*.

ATHENÆUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. Celebrated Athenæa were at Rome and Lyons: that of Rome, of great beauty, was erected by the emperor Adrian, 125.—The ATHENÆUM CLUB of London was formed in 1823, for the association of persons of scientific and literary attainments, and artists, and noblemen and gentlemen, patrons of learning, &c., by the earl of Aberdeen, marquess of Lansdowne, Dr. T. Young, Moore, Davy, Scott, Mackintosh, Faraday, Croker, Chantrey, Lawrence, and others; the clubhouse was erected in 1829-30 on the site of the late Carlton-palace; it is of Grecian architecture, and the frieze is an exact copy of the Panathenaic procession which formed the frieze of the Parthenon.—The Liverpool Athenæum was opened 1 Jan. 1799.—At Manchester, Bristol, and many other places, buildings under this name, and for a like purpose, have been founded.—The *Athenæum*, a weekly literary journal, first appeared in 1828.

ATHENRY (Galway). Near here the Irish were totally defeated, and a gallant young chief, Feidlim O'Connor, slain, 1316.

ATHENS, the capital of ancient Attica, and of modern Greece. The first sovereign mentioned is Ogyges, who reigned in Bœotia, and was master of Attica, then called Ionia. Tradition states that in his reign (about 1764 B.C.) a deluge laid waste the country, which so remained till the arrival of the Egyptian Cecrops and a colony, by whom the land was re-peopled, and twelve cities founded, 1556 B.C. The city, said to have been first called Cecropia, was afterwards named Athens in honour of Minerva (Athenē), her worship having been introduced by Erechtheus 1383 B.C. Athens was ruled by seventeen successive kings (487 years), by thirteen *perpetual* archons (316 years), seven *decennial* archons (70 years), and lastly by *annual* archons (760 years). It attained great power, and no other city has had, in a short space of time, so great a number of illustrious citizens. The ancients called Athens *Astu*, the *city*, by eminence, and one of the eyes of Greece; see *Greece*.

ATHLONE, Roscommon, Ireland, was burnt during the civil war in 1641. After the battle of the Boyne, colonel R. Grace held Athlone for James II. against a besieging army, but fell when it was taken by assault by Ginckel, 30 June, 1691; see *Augherin*.

ATMOLYSIS, a method of separating the constituent gases of a compound gas (such as atmospheric air) by causing it to pass through a vessel of porous material (such as graphite); first made known in Aug. 1863, by the discoverer, professor T. Graham, F.R.S., master of the mint.

ATMOSPHERE, see *Air*.

ATMOSPHERIC RAILWAYS. The idea of producing motion by atmospheric pressure was conceived by Papin, the French engineer, about 1680. Experiments were made on a line of rail, laid down across Wormwood Scrubs, London, between Shepherd's Bush and the Great Western railroad, to test the efficacy of atmospheric tubes, the working of the air-pump, and speed of carriages upon this new principle on railroads in June, 1840, and then tried on a line between Croydon and London, 1845. An atmospheric railway was commenced between Dalkey and Killiney, in the vicinity of Dublin, in Sept. 1843: opened 29 March, 1844; discontinued in 1855. A similar railway was proposed to be laid down in the streets of London by Mr. T. W. Rammell in 1857. Mr. Rammell's Pneumatic Railway was put in action successfully at the Crystal Palace on 27 Aug. 1864, and following days. An act for a pneumatic railway between the Waterloo railway station and Whitehall was passed in July, 1865.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The somewhat incoherent labours of his predecessors (such as Wenzel in 1777) were reduced by John Dalton to four laws of combining proportion, which have received the name of "Atomic Theory." His "Chemical Philosophy," containing the exposition of his views, appeared in 1808. Dr. C. Daubeny's work on the Atomic Theory was published in 1850. In his standard of *Atomic weights* Dalton takes hydrogen as 1. Berzelius, who commenced his elaborate researches on the subject in 1848, adopts oxygen as 100. The former standard is used in this country, the latter on the continent.*

ATREBATES, a Belgic people, subdued by Cæsar, 57 B.C.

ATTAINDER, ACTS OF, whereby a person not only forfeited his land, but his blood was attainted, have been numerous. Two witnesses in cases of high treason are necessary where corruption of blood is incurred, unless the party accused shall confess, or stand mute, 7 & 8 Will. III. 1694-5. *Blackstone.* In 1814 and 1833 the severity of attainders was mitigated. The attainder of lord Russell, who was beheaded in Lincoln's-inn-fields, 21 July, 1683, was reversed under William, in 1689. The rolls and records of the acts of attainder passed in the reign of James II. were cancelled and publicly burnt, 2 Oct. 1695. Amongst the last acts reversed was the attainder of the children of lord Edward Fitzgerald (who was implicated in the rebellion in Ireland of 1798), 1 July, 1819.

ATTICA, see *Athens.*

ATTILA, surnamed the "*Scourge of God,*" and thus distinguished for his conquests and his crimes, having ravaged the eastern empire from 445 to 450, when he made peace with Theodosius. He invaded the western empire, 450, and was defeated by Aëtius at Châlons, 451; he then retired into Pannonia, where he died through the bursting of a blood vessel on his nuptials with Ildico, a beautiful virgin, 453.

ATTORNEY (from *tour*, turn), a person qualified to act for others at law. The number in Edward III.'s reign was under 400 for the whole kingdom. In the 32nd of Henry VI. 1454, a law reduced the practitioners in Norfolk, Norwich, and Suffolk, from eighty to fourteen, and restricted their increase. The number of attorneys now practising in England, or registered, or retired, is said to be about 13,000, and the number in Ireland 2000. The qualifications and practice of attorneys and solicitors are now regulated by acts passed in 1843 and 1861.

ATTORNEY-GENERAL, a law officer of the crown, appointed by letters patent. He has to exhibit informations and prosecute for the king in matters criminal; and to file bills in exchequer, for any claims concerning the crown in inheritance or profit. Others may bring bills against the king's attorney. The first attorney-general was William de Gisilham, 7 Edward I. 1278. *Beaton.*

Sir Frederick Pollock	17 Dec. "	Sir John Kerslake	1 July, 1867

ATTRACTION, described by Copernicus, about 1520, as an appetite or appetite which the Creator impressed upon all parts of matter; by Kepler as a corporeal affection tending to union, 1605. In 1687, sir I. Newton published his "Principia," containing his important researches on this subject. There are the attractions of *Gravitation*, *Magnetism*, and *Electricity* (*which see*).

ATTWOOD'S MACHINE, for proving the laws of accelerated motion by the falling of weights, invented by George Attwood; described 1784: he died 11 July, 1807.

AUBAINE, a right of the French kings, which existed from the beginning of the monarchy, whereby they claimed the property of every stranger who died in their country, without having been naturalised, was abolished by the national assembly in 1790; re-established by Napoleon; and finally annulled 14 July, 1819.

AUBEROCHE, Guienne, S. France. The earl of Derby defeated the French, besieging this place, 19 Aug. 1344.

AUCKLAND, capital of New Zealand (north island,) was founded in 1840. The population of the district, in 1857, was estimated at 15,000 Europeans, and 35,000 natives. The seat of government was removed to Wellington on Cook's Strait, Dec. 1864.

AUCTION, a kind of sale known to the Romans, mentioned by Petronius Arbitr (about A.D. 66). The first in Britain was about 1700, by Elisha Yale, a governor of Fort George in the East Indies, who thus sold the goods he had brought home. Auction and sales tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. c. 15 (1845,) the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of 10*l*." In 1858 there were 4358 licences granted, producing 43,580*l*. The abuses at auctions, termed "knock-outs," caused by combinations of brokers and others, excited much attention in Sept. 1866. An act regulating sales of land by auction was passed 15 July, 1867. Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland.

AUDIANI, followers of Audeus of Mesopotamia, who had been expelled from the Syrian church on account of his severely reproving the vices of the clergy, about 338, formed a sect and became its bishop. He was banished to Scythia, where he is said to have made many converts. His followers celebrated Easter at the time of the Jewish passover, attributed the human figure to the Deity, and had other peculiar tenets.

AUDIT-OFFICE, Somerset House. Commissioners for auditing the public accounts were appointed in 1785, and many statutes regulating their duties have since been enacted.

AUERSTADT (Prussia). Here and at Jena, on 14 Oct. 1806, the French signally defeated the Prussians; see *Jena*.

AUGHRIM, near Athlone, in Ireland, where on 12 July, 1691, a battle was fought between the Irish, headed by the French general St. Ruth, and the English under general Ginckel. The former were defeated and lost 7000 men; the latter lost only 600 killed and

960 wounded. St. Ruth was slain. This engagement proved decisively fatal to the interest of James II., and Ginckel was created earl of Athlone.

AUGMENTATION OF POOR LIVINGS' OFFICE, established in 1704. 5597 clerical livings, not exceeding 50*l.* *per annum*, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established.

AUGMENTATIONS COURT, established in 1535 by 27 Hen. VIII. c. 27, in relation to cap. 28 same session, which gave the king the property of all monasteries having 200*l.* a year. The court was abolished by Mary, 1553, and restored by Elizabeth, 1558.

AUGSBURG (Bavaria), originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diets of the empire have been held. In A.D. 952, a council confirmed the order for the celibacy of the priesthood. Augsburg has suffered much by war, having been frequently taken by siege, 788, 1703, 1704, and, last, by the French, 10 Oct. 1805, who restored it to Bavaria in March, 1806.

Augsburg Diet, summoned by the emperor Charles V., to settle the religious disputes of Germany, met 20 June, and separated, Nov. 1530

Confession of Augsburg, compiled by Melancthon, Luther, and others, signed by the Protestant princes, and presented to the emperor Charles V., and read to the diet, 25 June, 1530

Interim of Augsburg, a document issued by

Charles V.: an attempt to reconcile the Catholics and Protestants: it was fruitless and was withdrawn . . . 1548

"Peace of Religion" signed at Augsburg, 25 Sept. 1555

League of Augsburg, for maintenance of the treaties of Münster, Nimeguen: a treaty between Holland and other powers against France, signed 9 July, 1686

AUGURY. Husbandry was in part regulated by the coming or going of birds, long before the time of Hesiod. Three augurs, at Rome, with vestals and several orders of the priesthood, were formally constituted by Numa, about 710 B.C. The number had increased, and was fifteen at the time of Sylla, 81 B.C. The college of augurs was abolished by Theodosius about A.D. 391.

AUGUST, the eighth Roman month of the year (previously called *Sextilis*, or the sixth from March), by a decree of the senate received its present name in honour of Augustus Cæsar, in the year 8, or 27, or 30 B.C., because in this month he was created consul, had thrice triumphed in Rome, added Egypt to the Roman empire, and made an end of the civil wars. He added one day to the month, making it 31 days. The appearance of shooting stars on the 10th of Aug. was observed in the middle ages, when they were termed, "St. Lawrence's tears." Their periodicity was noticed by Mr. Forster early in the present century.

AUGUSTAN ERA began 27 B.C., or 727 years after the foundation of Rome.

AUGUSTIN or **AUSTIN FRIARS**, a religious order, which ascribes its origin to St. Augustin, bishop of Hippo, who died 430. They first appeared about the 11th century, and the order was constituted by pope Alexander IV., 1256. The rule requires poverty, humility, and chastity. Martin Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans. The order appeared in England soon after the conquest. One of their churches, at Austin Friars, London, erected 1354, and since the Reformation used by Dutch protestants, was partially destroyed by fire, 22 Nov. 1862. It was restored, and reopened, 1 Oct. 1865. A religious house of the order, dedicated to St Monica, mother of Augustin, was founded in Hoxton-square, London, 1864.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., 1506, being one of the two courts, the first called the Imperial Chamber civil and criminal, instituted at Worms, 1495, and afterwards held at Spires and Wetzlar, and the other the Aulic council at Vienna. These courts having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURAY (N. W. France). Here, on 29 Sept. 1364, the English, under John Chandos, defeated the French and captured their leader Du Guesclin. Charles of Blois, made duke of Brittany by the king of France, was slain, and a peace was made in April, 1365.

AURICULAR CONFESSION. The confession of sin at the ear (Latin *auris*) of the priest must have been an early practice, since it is said to have been forbidden in the 4th century by Nectarius archbishop of Constantinople. It was enjoined by the council of Lateran in 1215, and by the council of Trent in 1551. It was one of the six articles of faith enacted by our Henry VIII. in 1539, but was abolished in England at the Reformation. Its revival here has been attempted by the church party called Puseyites, Tractarians, or Ritualists.*

* The rev. Alfred Poole, a curate of St. Barnabas, Knightsbridge, was suspended by his bishop from his office for practising auricular confession in June, 1853, the suspension was confirmed in Jan. 1859. Much excitement was created by a similar attempt by the rev. Temple West at Boyne Hill, in Sept. 1858.

AURIFLAMMA or **ORIFLAMME**, the national golden banner mentioned in French history, belonging to the abbey of St. Denis, and suspended over the tomb of that saint, 1140. Louis le Gros was the first king who took this standard from the abbey to battle, 1124. *Hénault*. It appeared for the last time at Agincourt, 1415. *Tillot*. Others say at Montlhery, 1465.

AURORA FRIGATE, sailed from Britain in 1771, to the East Indies, and was never again heard of.

AURORÆ BOREALES AND **AUSTRALES** (Northern and Southern Polar Lights), though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March, 1716, an aurora borealis extended from the west of Ireland to the confines of Russia. The whole horizon in the lat. of 57° N. overspread with continuous haze of a dismal red during the whole night, by which many people were much terrified, Nov. 1765.—Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. Its appearance in the southern hemisphere had been previously doubted.*

AUSCULTATION, see *Stethoscope*.

AUSTERLITZ (Moravia), where a battle was fought between the French and the allied Austrian and Russian armies, 2 Dec. 1805. Three emperors commanded: Alexander of Russia, Francis of Austria, and Napoleon of France. The killed and wounded exceeded 30,000 on the side of the allies, who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Presburg, signed 26 Dec. 1805; see *Presburg*.

AUSTIN FRIARS, see *Augustin Friars*.

AUSTRALASIA, the fifth great division of the world. This name originally given it by De Brosses, includes Australia, Van Diemen's Land, New Guinea, New Zealand, New Britain, New Caledonia, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spaniards as early as 1526; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1605 explored a part of the coast of Panna or New Guinea. Torres, a Spaniard, passed through the straits which now bear his name, between that island and Australia, and gave the first correct report of the latter, 1606. The Dutch continued their discoveries. Between 1642 and 1644, Tasman completed a discovery of a great part of the Australian coast, together with the island of Van Diemen's Land (also called Tasmania). Wm. Dampier, an Englishman, between 1684 and 1690, explored a part of the W. and N. W. coasts. Between 1763 and 1766, Wallis and Carteret followed in the track of Dampier and added to his discoveries; and in 1770, Cook first made known the east coast of Australia. Furneaux, in 1773, Bligh in 1789, Edwards in 1791, Bligh (a second time) in 1792, Portlock same year, Brampton and Alt in 1793, and Bass and Flinders explored the coasts and islands in 1793-9 and discovered Bass's Straits. Grant in 1800, and Flinders again (1801-5) completed the survey. *M'Culloch*.

AUSTRALIA (formerly New Holland), the largest island and smallest continent; estimated area about three million square miles, including five provinces—New South Wales, Victoria (formerly Port Phillip), South Australia, West Australia (or Swan River), and Queensland (*which see*). Population, with Tasmania and New Zealand, in 1863, about 1,366,956.

* The aurora is now attributed by many philosophers to the passage of electric light through the rarefied air of the polar regions. In August and September, 1859, when brilliant aurora were very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroræ were seen at Rome and Basel, and also in Australia.

AUSTRASIA, *Æsterreich* (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, 511, and ended by Carloman becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steamship, sailed from Southampton for New York 4 Sept. 1858, with 528 persons on board. On 13 Sept. in lat. 45° N., long. 41° 30' W., it caught fire through the carelessness of some one in burning some tar to fumigate the steerage. Only 67 persons were saved—upwards of 60 by the *Maurice*, a French barque; the rest by a Norwegian barque. A heartrending account was given in the *Times*, 11 Oct. 1858, by Mr. Charles Brews, an English survivor.

* GOLD DISCOVERY.—Mr. Edward Hargraves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Conobolas, some thirty miles west of Bathurst. On his return home, he examined the soil, and after one or two months' digging, found a quantity of gold, 12 Feb. 1851. He applied to the colonial government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places; and in the first week of July, 1851, an aboriginal inhabitant, formerly attached to the Wellington mission, and then in the service of Dr. Kerr, of Wallawa, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of quartz (from two to three hundred weight), found in the Murroo Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at 4000l. The "Victoria nugget," a magnificent mass of virgin gold, weighing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb. weight was also found. From the gold fields of Mount Alexander and Ballarat, in the district of Victoria, up to Oct. 1852, there were found 2,532,422 ounces, or 105 tons 10 cwt. of gold; and the gold exported up to the same date represented 8,863,477l. sterling. In Nov. 1856, the "James Baines" and "Lightning" brought gold from Melbourne valued as 1,200,000l. The "Welcome nugget" weighed 2013½ ounces; value, 8376l. 10s. 10d.; found at Baker's Hill, Ballarat, 11 June, 1858. Between May, 1851, and May 1861, gold to the value of 96,000,000l. had been brought to England from New South Wales and Victoria.

AUSTRIA, *continued.*

1493. Maximilian I., son of Frederic III. (archduke), emperor; see *Germany*.

EMPERORS.

1804. Francis I. (late Francis II. of *Germany*), emperor of Austria only, 11 Aug. 1804; died 2 March, 1835.

1835. Ferdinand, his son, 2 March; abdicated in

favour of his nephew, his brother Francis-Charles having renounced his rights.

1848. Francis-Joseph, 2 Dec. 1848, emperor of Austria, son of Francis-Charles [born 18 Aug. 1830; married 24 April, 1854, to Elizabeth of Bavaria].

[*Heir*: their son, the archduke Rodolph, born 21 Aug. 1858.]

AUTHORS. For the law securing copyright, see *Copyrights*.

AUTO DA FÉ (Act of faith), the term given to the punishment of a heretic, generally burning alive, inflicted by the Inquisition (*which see*).

AUTOMATON FIGURES (or **ANDROIDES**), made to imitate living actions, are of early invention. Archytas' flying dove was formed about 400 B.C. Friar Bacon is said to have made a brazen head which spoke, A.D. 1264. Albertus Magnus spent thirty years in making another. A coach and two horses, with a footman, a page, a lady inside, were made by Camus for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1649. Vaucanson, in 1738, made an artificial duck, which performed every function of a real one, even an imperfect digestion—eating, drinking, and quacking. He also made a flute-player. The writing automaton, exhibited in 1769, was a pentagraph worked by a confederate out of sight. The automaton chess-player, exhibited the same year, was also worked by a hidden person, and so was "the invisible girl," 1800. Maelzel made a trumpeter about 1809. Early in this century, an automaton was exhibited in London which pronounced several sentences with tolerable distinctness. In July, 1864, the "anthropoglosson," exhibited in St. James's-hall, London, seemed to utter songs.

AUTOTYPOGRAPHY, a process of producing a metal plate from drawings, made known by Mr. Wallis, in April, 1863; it resembled *Nature-printing* (*which see*).

AUXERRE DECLARATION, see *France*, May, 1866.

AVA in 1822 became the capital of the Burmese empire, it is said, for the third time. A British embassy was received here in Sept. 1855.

AVARS, barbarians who ravaged Pannonia, and annoyed the eastern empire in the 6th and 7th centuries, subdued by Charlemagne about 799, after an eight years' war.

AVEBURY, or **ABURY** (Wiltshire). Here are the remains of the largest Celtic or Druidical work in this country. They have been surveyed by Aubrey, 1648; Dr. Stukeley, 1720; and sir R. C. Hoare, in 1812, and by others. Much information may be obtained from Stukeley's "Abury" (1743), and Hoare's "Ancient Wiltshire" (1812-21). Many theories have been put forth, but the object of these remains is still unknown. They are considered to have been set up during the "stone age," *i.e.*, when the weapons and implements were mainly formed of that material.

AVEIN, or **AVAINE** (Luxemburg, Belgium). Here the French and Dutch defeated the Spaniards, 20 May, 1635.

"**A VE MARIA!**" the salutation of the angel Gabriel to the Virgin (*Luke* i. 28), was made a formula of devotion by pope John XXI. about 1326. In the beginning of the 15th century Vincentius Ferrerius used it before his discourses. *Bingham*.

AVIGNON, a city, S. E. France, ceded by Philip III. to the pope in 1273. The papal seat was removed by Clement V. to Avignon, in 1309. In 1348 Clement VI. purchased the sovereignty from Jane, countess of Provence and queen of Naples. In 1408, the French, wearied of the schism, expelled Benedict XIII., and Avignon ceased to be the seat of the papacy. Here were held nine councils (1080—1457). Avignon was seized and restored several times by the French kings; the last time restored 1773. It was claimed by the national assembly, 1791, and was confirmed to France by the congress of sovereigns in 1815. In Oct. 1791, horrible massacres took place here; see *Popes*, 1309-94.

AXE, **WEDGE**, **LEVER**, and various tools in common use, are said to have been invented by Dædalus, an artificer of Athens, to whom also is ascribed the invention of masts and sails for ships, 1240 B.C. Many tools are represented on the Egyptian monuments.

AXUM, a town in Abyssinia said to have been the capital of a kingdom whose people were converted to Christianity by Frumentius in the 4th century, and to have been allies of Justinian, 533.

AYACUCHO (Peru). Here the Peruvians finally achieved their independence by defeating the Spaniards, 9 Dec. 1824.

AYDE, or **AIDE**, the tax paid by the vassal to the chief lord upon urgent occasions. In France and England an *aide* was due for knighting the king's eldest son. One was demanded

by Philip the Fair, 1313. The *aide* due upon the birth of a prince, ordained by the statute of Westminster (Edward I.) 1285, for the ease of the subject, was not to be levied until he was fifteen years of age. The *aide* for the marriage of the king's eldest daughter could not be demanded in this country until her seventh year. In feudal tenures there was an *aide* for ransoming the chief lord; so when our Richard I. was kept a prisoner by the emperor of Germany, an *aide* of 20s., to redeem him, was enforced upon every knight's fee.

AYLESBURY, Buckinghamshire, was reduced by the West Saxons in 571. St. O'Syth, beheaded by the pagans in Essex, was buried there, 600. William the Conqueror invested his favourites with some of its lands, under the tenure of providing "straw for his bed-chambers; three eels for his use in winter; and in summer, straw, rushes, and two green geese thrice every year." Incorporated by charter in 1554.

AYLESFORD (Kent). Here, it is said, the Britons were victorious over the Saxon invaders, 455, and Horsa was killed.

AZINCOUR, see *Agincourt*.

AZOFF, SEA of, the Palus Mæotis of the ancients, communicates by the strait of Yenikalé (the Bosphorus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition composed of British, French, and Turkish troops, commanded by sir G. Brown, arrived at Kertch, 24 May, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikalé which also offered no resistance. On the same evening the allied fleet entered the sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores was destroyed by the Russians to prevent them falling into the hands of the allies.

AZORES, or WESTERN ISLES (N. Atlantic), belonging to Portugal, the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by Vanderberg of Bruges, who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered; and named Azores from the number of goshawks found on them. They were given by Alfonso V. to the duchess of Burgundy in 1466 and colonised by Flemings. They were subject to Spain 1580-1640. The isle Tereira, during the usurpation of don Miguel, declared for Donna Maria 1829 and she resided at the capital Angra, 1830-33. A volcano at St. George's destroyed the town of Ursulina, May, 1808; and in 1811 a volcano appeared near St. Michael's, in the sea, where the water was eighty fathoms deep; an island then formed, gradually disappeared. A destructive earthquake lasting 12 days happened in St. Michael's, 1591.

AZOTE, the name given by French chemists to nitrogen (*which see*).

AZTECS, the ruling tribe in Mexico at the time of the Spanish invasion (1519). In June 1853 two pretended Aztec children were exhibited in London. They were considered by professor Owen to be merely South American dwarfs. They were married in London 1 April, 1867.

B.

BAAL (Lord), the male deity of the Phœnician nations, frequently worshipped by the Israelites, especially by Ahab, 918 B.C. His priests and votaries were massacred by Jehu and his temple defiled, 884 B.C.

BAALBEC, HELIOPOLIS (both meaning "City of the Sun"), an ancient city of Syria, of which magnificent ruins remain, visited by Wood (in 1751), and others. Its origin (referred to Solomon) is lost in antiquity. Here Septimius Severus built a temple to the sun, 200. The city was sacked by the Moslems, 748, and by Timour Bey, 1400.

BABEL, TOWER of, built by Noah's posterity, 2247 B.C. (*Genesis*, ch. xi.) The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was deified after death. *Blair*. The Birs Nimroud, examined by Rich, Layard, and others, is considered by some persons to be the remains of the tower of Babel.

BABEUF'S CONSPIRACY, see *Agrarian Law*.

BABYLONIA,* an Asiatic empire (see *Assyria*), founded by Belus, supposed to be the

* The city of Babylon was at one time the most magnificent in the world. The *Hanging Gardens* are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast arches raised on other arches; and on the top were flat stones closely cemented together with plaster of bitumen, and that covered with sheets of lead, upon which lay the mould of the garden, where there

Nimrod of holy writ, the son of Chus, and grandson of Ham, 2245 B.C. *Lenglet*. Ninus of Assyria seized on Babylon, and established what was properly the Assyrian empire, by uniting the two sovereignties, 2059 B.C. 2233 *Cl*. The second empire of Babylon commenced about 747 B.C.

BABYNGTON'S CONSPIRACY, to assassinate queen Elizabeth, and make Mary of Scotland queen, was devised by John Savage, a soldier of Philip of Spain, and approved by Wm. Gifford and John Ballard, catholic priests. Anthony Babyngton and others joined in the scheme. They were betrayed by Pooley Aspy, and fourteen were executed, 20, 21 Sept. 1586. Babyngton was deluded by a romantic hope that Mary would accept him as a husband.

BACCHANALIA (games in honour of Bacchus) arose in Egypt, and were brought into Greece by Melampus, and called *Dionysia*, about 1415 B.C. *Diodorus*. In Rome the *Bacchanalia* were suppressed, 186 B.C. The priests of Bacchus were called Bacchanals.

BACHELORS. The Roman censors frequently imposed fines on unmarried men; and men of full age were obliged to marry. The Spartan women at certain games laid hold of old bachelors, dragged them round their altars, and inflicted on them various marks of infamy and disgrace. *Vossius*. A tax laid upon bachelors in England, twenty-five years of age (varying from 12l. 10s. for a duke, to 1s. for a common person), lasted from 1695 to 1706. Bachelors were subjected to an extra tax on their male and female servants in 1785.

BACKGAMMON. Palamedes of Greece is the reputed inventor of this game, about 1224 B.C. It is said to have been invented in Wales before its conquest. *Henry*.

BACTRIANA, a province in Asia, was subjugated by Cyrus and formed part of the Persian empire, when conquered by Alexander, 330 B.C. About 254 B.C., Theodotus or Diodotus, a Greek, threw off the yoke of the Seleucidæ, and became king. Eucratides reigned prosperously about 181 B.C., and Menander about 126 B.C. The Greek kingdom appears to have been broken up by the irruption of the Scythians shortly after.

BADAJOZ (S. W. Spain). An important barrier fortress, surrendered to the French, under Soult, 11 March, 1811; was invested by the British, under lord Wellington on 16 March, 1812, and stormed and taken on 6 April following. The French retreated in haste.

BADDESDOWN HILL, or Mount Badon, near Bath, where Bede says the Britons defeated the Saxons in 493; others say in 511 or 520.

BADEN (S. W. Germany). The house of Baden is descended from Herman, regarded as the first margrave (1052), son of Berthold I., duke of Zähringen; but Herman II. assumed the title, Feb. 1130. From Christopher, who died 1527, proceeded the branches Baden-Baden and Baden-Dourlach, united in 1771. Population of Baden, Dec. 1864, 1,429, 199

were large trees, shrubs, and flowers, with various sorts of vegetables. *There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. *Strabo; Diodorus*. Pliny said that in his time it was but a desolate wilderness. Mr. Rich visited the ruins in 1811, and sir R. Kerr Porter in 1818. The laborious researches of Mr. Layard, sir H. Rawlinson, M. Botta, and others, and the interesting relics excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cuneiform or wedge-like character have been translated, principally by col. (now sir Henry) Rawlinson, and published in the *Journal of the Royal Asiatic Society*. In the spring of 1855, he returned to England, bringing with him many valuable relics, drawings, &c., which are now in the British Museum. He gave discourses on the subject at the Royal Institution, London, in 1851, 1855, and 1865.

BADEN, *continued.*

Durlach, 1738; acquired Baden-Baden, 1771, made grand-duke by Napoleon, 1806.
Treaty of Baden.—Landau ceded to France, 7 Sept. 1714.

 1811. Charles Louis Frederic, who died without issue in 1818; succeeded by his uncle,
 1818. Louis William, died without issue in 1830; succeeded by his brother,
 1830. Leopold, died in 1852; succeeded by his second son (the first being imbecile),
 1852. Frederic (born 9 Sept. 1826), regent 24 April, 1852; declared grand-duke, 5 Sept. 1856.
 [*Heir*: his son Frederic William, born 9 July, 1857.]

BAFFIN'S-BAY (N. America), discovered by William Baffin, an Englishman, 1616. The extent of this discovery was much doubted, until the expeditions of Ross and Parry proved that Baffin was substantially accurate in his statement. Parry entered Lancaster Sound, and discovered the islands known by his name, in 1818; see *North-West Passage*.

BAGDAD, in Asiatic Turkey, built by Al Mansour, and made the seat of the Saracen empire, about 762.—Taken by the Tartars, and a period put to the Saracen rule, 1258. Often taken by the Persians, and retaken by the Turks, with great slaughter: the latter took it in 1638, and have held it since.

BAGPIPE, an ancient Greek and Roman instrument. On a piece of ancient Grecian sculpture, now in Rome, a bagpiper is represented dressed like a modern highlander. Nero is said to have played upon a bagpipe, 51. Our highland regiments retain their pipers.

BAHAMA ISLES (N. America) were the first points of discovery by Columbus. San Salvador was seen by him on the night of the 11th Oct. 1492. New Providence was settled by the English in 1629. They were expelled by the Spaniards, 1641; returned 1666; again expelled in 1703. The isles were formally ceded to the English in 1783. Population in 1861, 35,287; in 1867, about, 38,000. The Bahamas profited by blockade-running during the American civil war, 1862-5. Governor, William Rawson, 1864.

BAHAR (N. India), a province (conquered by Baber in 1530), with Bengal and Orissa, a princely dominion, became subject to the English East India company in 1765 by the treaty of Allahabad for a quit-rent of about 300,000*l*.

BAIL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1275) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated in later reigns. It is now accepted in all cases, except felony; and where a magistrate refuses bail, it may be granted by a judge.

BAILIFF, or SHERIFF, said to be of Saxon origin. London had its *shire-reve* prior to the conquest, and this officer was generally appointed for counties in England in 1079. Hen. Cornhill and Rich. Reynere were appointed bailiffs or sheriffs in London in 1189. *Stow*. Sheriffs were appointed in Dublin under the name of bailiffs, in 1308; and the name was changed to sheriff in 1548. There are still some places where the chief magistrate is called bailiff, as the high bailiff of Westminster. *Bum-bailiff* is a corruption of bound-bailiff, every bailiff being obliged to enter into bonds of security for his good behaviour. *Blackstone*.

BAIRAM, or BEIRAM, Mahometan festivals. In 1865 the Little Bairam, following the fast of Ramadan (*which see*), fell on 28 Feb., 1 and 2 March; in 1868, on 26, 27, 28 Jan.; the Great Bairam in 1865, began on 10 May; in 1868, on 10 April.

BAIZE, a species of coarse woollen manufacture, was brought into England by some Flemish or Dutch emigrants who settled at Colchester, in Essex, and had privileges granted them by parliament in 1660. The trade was under the control of a corporation called the governors of the Dutch baize-hall, who examined the cloth previous to sale. *Anderson*.

BAKER AND BAKEHOUSES; see *Bread*.

BAKERIAN LECTURES, Royal society, originated in a bequest of 100*l*. by Henry

Baker, F.R.S., the interest of which was to be given to one of the fellows, for a scientific discourse to be delivered annually. Peter Woulfe gave the first lecture in 1765. Latterly it has been the custom to nominate as the lecture a paper written by one of the fellows. Davy, Faraday, Tyndall, and other eminent men have given the lecture.

BALAKLAVA, a small town in the Crimea, with a fine harbour, 10 miles S.E. from Sebastopol. After the battle of the Alma, the allies advanced upon this place, 26 Sept. 1854.

Battle of Balaklava :—About 12,000 Russians, commanded by gen. Liprandi, attacked and took some redoubts in the vicinity, which had been entrusted to about 250 Turks. They next assailed the English, by whom they were compelled to retire, mainly through the charge of the heavy cavalry, led by brigadier Scarlett, under the orders of lord Lucan. After this, from an unfortunate misconception of lord Raglan's order, lord Lucan ordered lord Cardigan, with the light cavalry, to charge the Russian army, which had reformed on its own ground with its artillery in front. This order was most gallantly

obeyed, and great havoc was made on the enemy; but of 670 British horsemen, only 198 returned. (Termed by Tennyson "The Charge of the Six Hundred.") . . . 28 Oct. 1854
 A sortie from the garrison of Sebastopol led to a desperate engagement here, in which the Russians were vigorously repulsed, with the loss of 2000 men killed and wounded; the allies losing about 600 . . . 22 March, 1855
 The electric telegraph between London and Balaklava completed . . . April, "
 A railway between Balaklava and the trenches completed . . . June, "

BALANCE OF POWER, to assure the independency and integrity of states, and control the ambition of sovereigns; a principle said to have been first laid down by the Italian politicians of the 15th century, on the invasion of Charles VIII. of France. *Robertson*. It was recognised by the treaty of Münster, 24 Oct. 1648. The arrangements for the balance of power in Europe made in 1815, without the consent of the people of the countries concerned, have been greatly set aside since 1830.

BALEARIC ISLANDS, in the Mediterranean, called by the Greeks *Balcarides*, and by the Romans *Balæares*, from the dexterity of the inhabitants at slinging; they include Majorca, Minorca, Iviça, Formentera, Cabrera, Conejera, and other islets. They were conquered by the Romans, 123 B.C.; by the Vandals, about 426 B.C., and formed part of Charlemagne's empire in A.D. 799. They were conquered by the Moors about 1005, and held by them till about 1280, when they were annexed by Arragon; see *Majorca* and *Minorca*.

BALIZE, see *Honduras*.

BALKAN, the ancient *Hæmus*, a range of mountains extending from the Adriatic to the Euxine. The passage, deemed impracticable, was completed by the Russians under Diebitsch, during the Russian and Turkish war, 26 July, 1829. An armistice was the consequence; and a treaty of peace was signed at Adrianople, 14 Sept. following.

BALLADS may be traced in the British history to the Anglo-Saxons. *Turner*. *Adhelme*, who died 709, is mentioned as the first who introduced ballads into England. "The harp was sent round, and those might sing who could." *Bede*. Alfred sung ballads. *Malmesbury*. Canute composed one. *Turner*. Minstrels were protected by a charter of Edward IV.; but by a statute of Elizabeth they were made punishable among rogues, vagabonds, and sturdy beggars. *Viner*. "Give me the writing of the ballads, and you may make the laws." *Fletcher of Saltoun*. The sea-ballads of Dibdin were very popular in the French war; he died 20 Jan. 1833.

BALLARAT, see *Australia*, 1851.

BALLETS began through the meretricious taste of the Italian courts. One performed at the interview between our Henry VIII. and Francis I. of France in the field of the Cloth of Gold, at Ardres, 1520. *Guicciardini*. Ballets became popular in France, and Louis XIV. bore a part in one, 1664. They were introduced here with operas early in the 18th century.

BALLINAMUCK, Longford. Here, on 8 Sept. 1798, the Irish rebels and their French auxiliaries were defeated and captured.

BALLOONS.* A just idea of the principle of the construction of balloons was formed by Albert of Saxony, an Augustin monk in the 14th century, and adopted by a Portuguese Jesuit, Francesco Mendoza, who died at Lyons in 1626. The idea is also attributed to Bartolomeo de Guzman, who died in 1724. The theory of *aëronautics* includes :—1, the power of a balloon to rise in the air; 2, the velocity of its ascent; and 3, the stability of its suspension at any given height. The application of sails and rudders has been duly considered, and judged to be futile.† Fatal accidents to the voyagers have been estimated at 2 or 3 per cent.

* "Astra Castra; Experiments and Adventures in the Atmosphere; by Hatton Turnor," a copious work, appeared in 1865.

† *Aëronautical Society of Great Britain*, founded with the object of fostering and developing *aëronautics* and *aërology*, by the duke of Argyll, Mr. James Glaisher, sir Charles Bright, and others, 12 Jan. 1866.

BALLOONS, *continued.*

- Francis Lana, a Jesuit, proposed to navigate the air by means of a boat raised by four hollow balls made of thin copper, from which the air had been exhausted 1670
- Joseph Galien suggested the filling a bag with the fine diffuse air of the upper regions of the atmosphere 1755
- Henry Cavendish discovered that hydrogen gas is 10·8 times lighter than common air 1766
- And soon after Black of Edinburgh filled a bag with hydrogen, which rose to the ceiling of the room 1767
- Cavallo filled soap bubbles with hydrogen 1782
- Joseph Montgolfier made a silken bag ascend with heated air (first *fire balloon*) Nov. "
- Joseph and Stephen Montgolfier ascend and descend safely by means of a fire balloon at Annonay, for which they received many honours 5 June, 1783
- First ascent in a balloon filled with hydrogen, at Paris, by MM. Robert and Charles, 27 Aug. "

- Second ascent of Charles in a hydrogen balloon to the height of 9770 feet 1 Dec. "
- Mr. Tytler ascended in a Montgolfier balloon at Edinburgh 27 Aug. 1784
- Ascents become numerous: Andreani, 25 Feb.; Blanchard, 2 March; Guyton-Morveau, the chemist, 25 April and 12 June; Fleurant and Madame Thiblé (the first female *aéronaut*), 28 June; the duke of Chartres (Philip Egalité) 19 Sept. "
- The first ascent in England, made by Lunardi at Moorfields, London 15 Sept. "
- Blanchard and Jeffries ascend at Dover; cross the Channel; alight near Calais 7 Jan. 1785
- The first ascent in Ireland, from Ranelagh gardens, Dublin 19 Jan. "
- Rozier and Romain killed in their descent near Boulogne; the balloon took fire 15 June "
- Parachutes constructed and used by Blanchard, Aug. "
- Garnerin's narrow escape when descending in one, in London 2 Sept. 1802
- Sadler, who made many previous expeditions in England, fell into the sea, near Holyhead, but was taken up 9 Oct. 1812
- Madame Blanchard ascended from Tivoli at night; the balloon, being surrounded by fire-works, took fire, and she was precipitated to the ground and killed 6 July, 1819
- Mr. Charles Green's first ascent 19 July, 1821
- Lieut. Harris killed in a balloon descent 25 May, 1824
- Sadler, jun., killed, falling from a balloon, in 1825
- The great Nassau balloon, which had for some time previously been exhibited to the inhabitants of London in repeated ascents from Vauxhall gardens, started from that place on an experimental voyage, having three individuals in the car, and after having been eighteen hours in the air descended at Weilburg, in the duchy of Nassau 7 Nov. 1836
- Mr. Cocking ascended from Vauxhall to try his parachute; in its descent from the balloon it collapsed, and he was thrown out and killed, 24 July, 1837
- An Italian *aéronaut* ascended from Copenhagen, in Denmark; his corpse was subsequently found on the sea-shore in a contiguous island, dashed to pieces 14 Sept. 1851
- Mr. Wise and three others ascended from St. Louis (after travelling 1150 miles they descended in Jefferson county, New York, nearly dead) 23 June, 1859
- Nadar's great balloon (largest ever made) when fully inflated contained 215,363 cubic feet of gas; the car, a cottage in wicker work, raised 35 soldiers at Paris; Nadar hoped by means of screw to steer a balloon in the heavens; his first ascent, with 14 persons, successful 4 Oct. 1863
- His second ascent; voyagers injured; saved by presence of mind of M. Jules Godard; descend at Nieuburg, Hamover 12 Oct. "
- Nadar and his balloon at the Crystal Palace, Sydenham Nov. "
- Society for promoting aerial navigation formed at M. Nadar's at Paris; president M. Barral, 15 Jan. 1864
- Godard's great Montgolfier or fire balloon ascends 28 July and 3 Aug. "
- Ascent of Nadar and others in his great balloon at Brussels 26 Sept. "
- Mr. Coxwell ascends from Belfast in a new balloon; several persons are injured by the balloon becoming uncontrollable; it escapes, 3 July, 1865
- Mr. Coxwell said to have made 550 successful ascents April, 1867
- An aerial screw machine (helicopter) suggested, in Paris, 1863; described by Dr. J. Bell Pettigrew, in London, at the Royal Institution 22 March, "
- Mr. Hodsman crossed the Channel from Dublin and descended in Westmorland 22 April, "

MILITARY APPLICATIONS.

- Guyton Morveau ascended twice during the battle of Fleurus, and gave important information to Jourdain 17 June, 1794
- Balloons were used during the battle of Solferino, 24 June, 1859; and by the Federal army near Washington, in July, 1861

EQUESTRIAN ASCENTS.

- Mr. Green affirms that he ascended from London, on a horse attached to a balloon, though few persons seem to be aware that the experiment was made May, 1828
- He did so from Vauxhall gardens with a very diminutive pony July, 1850
- Lieut. Gale, an Englishman, made an ascent with a horse from the Hippodrome of Vincennes, near Bordeaux. On descending, and detaching the animal from the balloon, the people who held its ropes, from some misconception, prematurely let them go, and the unfortunate *aéronaut* was rapidly borne in the air before he was quite ready to resume his voyage. (He was discovered next morning dashed to pieces in a field a mile from where the balloon was found) 8 Sept. "
- The ascent of Madame Poitevin from Cremorne gardens, near London, as "Europa on a bull" (a feat she had often performed in France), and several ascents on horses, brought the parties concerned before the police-courts on a charge of cruelty to animals, and put an end to experiments that outraged public feeling Aug. 1852
- M. Poitevin ascended on a horse in the vicinity of Paris, about the time just mentioned; was nearly drowned in the sea, near Malaga, while descending from his balloon in 1858, and died soon after.

SCIENTIFIC ASCENTS.

- Gay-Lussac and Biot at Paris, 23 Aug.; Gay-Lussac (to the height of 22,977 feet) 15 Sept. 1804
- Dixio and Barral at Paris (to the height of 19,000 feet. They passed through a cloud 9000 feet thick). 1850
- Mr. Welsh ascends, 17, 26 Aug.; 21 Oct. and 10 Nov. 1852
- Scientific balloon ascents having been recommended by the British Association and funds provided, Mr. James Glaisher commenced his series of ascents, provided with suitable apparatus, in Mr. Coxwell's great balloon, at

BALL'S BLUFF, Virginia, on the banks of the Potomac, North America. On 21 Oct. 1861, by direction of the Federal general C. P. Stone the heroic col. Baker crossed the river to reconnoitre. He attacked the Confederate camp at Leesburg, and was defeated with great loss. The disaster was attributed to mismanagement, and in Feb. 1862, general Stone was arrested on suspicion of treason.

BALLYNAHINCH (Ireland), where a sanguinary engagement took place between a large body of the insurgent Irish and the British troops, under gen. Nugent, 13 June, 1798. A large part of the town was destroyed, and the royal army suffered very severely.

BALMORAL CASTLE, Deeside, Aberdeenshire; visited by her majesty in 1848, 1849, 1850. The estate was purchased for 32,000*l.* by prince Albert in 1852. In 1853 the present building, in the Scotch baronial style, was commenced, from designs by Mr. W. Smith of Aberdeen.

BALTIC SEA, OSTSEE or EASTERN SEA, separates Sweden and the Danish Isles from Russia, Prussia, and Germany. Declared neutral for commerce by treaty between Russia and Sweden 1759, and Denmark 1760. It is often partially frozen. Charles X. of Sweden, with an army, crossed the Belts in 1658, and the Russians passed from Finland to Sweden on the ice in 1809.

BALTIMORE, a maritime city in Maryland, United States, founded in 1729. On 12 Sept. 1814, the British army under col. Ross advanced against this place. He was killed in a skirmish; and the command was assumed by col. Brooke, who attacked and routed the American army, which lost 600 killed and wounded and 300 prisoners. The projected attack on the town was however abandoned. *Alison*. See *United States*, 1861.

BAMBERG (Bavaria), said to have been founded by Saxons, in 804, and endowed with a church by Charlemagne. It was made a bishopric in 1007, and the bishop was a prince of the empire till the treaty of Luneville, 1801, when Bamberg was secularised. It was incor-

porated with Bavaria in 1803. The noble cathedral, rebuilt in 1110, has been recently repaired. Bamberg was taken and pillaged by the Prussians in 1759.

BAMBOROUGH, or Bambug, Northumberland, according to the "Saxon Chronicle," was built by king Ida about 547, and named Bebbanburgh. The castle and estate, the property of the Forsters, and forfeited to the crown, through their taking part in the rebellion in 1715, were purchased by Nathaniel lord Crewe, bishop of Durham, and bequeathed by him for various charitable purposes. The valuable library was founded by the trustees in 1778. The books are lent to persons residing within 20 miles of the castle.

BAMPTON LECTURES (Theological), delivered at Oxford annually, began in 1780, with a lecture by James Bandinel, D.D. The lecturer is paid out of the proceeds of an estate bequeathed for the purpose by the rev. John Bampton, and the lectures are published. Among the more remarkable lectures were those by White (1784), Heber (1815), Whately (1822), Milman (1827), Hampden (1832), and Mansel (1858).

BANBURY, Oxfordshire, a Saxon town. The castle, erected by Alexander de Blois, bishop of Lincoln, 1125, has been frequently besieged. In 1646 it was taken by the parliamentarians and demolished. At Edgecote or Danesmore, near Banbury, Edward IV. defeated the Lancastrians under the earl of Pembroke, 26 July, 1469, and their leader and his brother were soon after taken prisoners and executed. Banbury cakes were renowned in the time of Ben Jonson, and Banbury Cross was destroyed by the Puritans. Cakes were presented to the queen at Banbury, 30 Nov. 1866.

BANDA ISLES (ten), Eastern Archipelago, visited by the Portuguese in 1511, who settled on them, 1521, but were expelled by the Dutch about 1600. Rohun island was ceded to the English in 1616. The Bandas were taken by the latter in 1796; restored in 1801; retaken in 1811; and restored in Aug. 1816.

BANDA ORIENTAL (South America), a portion of the viceroyalty of Buenos Ayres, one part of which, in 1828, was incorporated with Brazil, while another part became independent, as the republic of Uruguay.

BANGALORE (S. India) was besieged by the British under lord Cornwallis, 6 March, and taken by storm, 21 March, 1791. Bangalore was restored to Tippoo in 1792, when he destroyed the strong fort, deemed the bulwark of Mysore.

BANGOR (Banchor Iskoed, or Monachorum), Flintshire, the site of an ancient monastery, very populous, if it be true that 1200 monks were slain by Ethelfrid, king of the Angles, for praying for the Welsh in their conflict with him in 707. *Tunner*.

BANGOR (N. Caernarvonshire). Its bishopric is of great antiquity, but its founder is unknown. The church is dedicated to St. Daniel, who was a bishop, 516. Owen Glendower greatly defaced the cathedral; and the bishop Bulkeley alienated many of the lands, and even sold the bells of the church, 1553. The see is valued in the king's books at 13*l.* 16*s.* 4*d.* An order in council directing that the sees of Bangor and St. Asaph be united on the next vacancy in either, was issued in 1838; but rescinded in 1847. BANGORIAN CONTROVERSY was occasioned by Dr. Benjamin Hoadley, bishop of Bangor, preaching a sermon before George I., 31 March, 1717, upon the text, "*My kingdom is not of this world*" (*John* xviii. 36), in which he demonstrated the spiritual nature of the church and kingdom of Christ. He thereby drew upon himself the indignation of almost all the clergy, who published hundreds of pamphlets.

BANISHMENT, an ancient punishment. By 39 Eliz. c. 4 (1597) dangerous rogues were to be banished out of the realm, and to be liable to death if they returned; see *Transportation*.

BANK. The name is derived from *banco*, a bench, erected in the market-place for the exchange of money. The first was established in Italy, 808, by the Lombard Jews, of whom some settled in Lombard-street, London, where many bankers still reside. The Mint in the Tower of London was anciently the depository for merchants' cash, until Charles I. laid his hands upon the money and destroyed the credit of the Mint in 1640. The traders were thus driven to some other place of security for their gold, which, when kept at home, their apprentices frequently absconded with to the army. In 1645, therefore, they consented to lodge it with the goldsmiths in Lombard-street, who were provided with strong chests for their own valuable wares; this became the origin of banking in England; see *Bank of England*; *Savings Banks*.

BANK OF ENGLAND was projected by William Paterson, a Scotch merchant (*see Darien*), to meet the difficulty experienced by William III. in raising the supplies for the war against France. By the influence of Paterson and Michael Godfrey, 40 merchants subscribed 500,000*l.* towards the sum of 1,200,000*l.* to be lent to the government at 8 per cent., in consideration of the subscribers being incorporated as a bank. The scheme was violently opposed in parliament, but the bill obtained the royal assent 25 April, 1694, and the charter was granted 27 July following, appointing sir John Houblon the first governor, and Michael Godfrey the first deputy governor. The bank commenced active operations on 1 Jan. 1695, at Grocers' hall, Poultry,† issuing notes for 20*l.* and upwards, and discounting bills for 4½ to 6 per cent. The charter was renewed in 1697, 1708, 1713, 1716, 1721, 1742, 1746, 1749, 1764, 1781, 1800, 1808, 1816, 1833, 1844. *Lawson.*

BANNATYNE CLUB, named after George Bannatyne (the publisher), was established in 1823 by sir Walter Scott and others, for printing works illustrative of the history, antiquities, and literature of Scotland, of which about 113 volumes were issued: dissolved, 1860.

BANNERET, KNIGHT, a dignity between baron and knight, anciently conferred by the king under the royal standard. Its origin is of uncertain time: Edmondson dates it 736; but it was probably created by Edward I. John Chandos is said to have been made a banneret by the Black Prince and the king of Castile at Najara, 3 April, 1367. The dignity was conferred on John Smith, who rescued the royal standard at Edgehill fight, 23 Oct. 1642. It fell into disuse, but was revived by Geo. III. for sir William Erskine, in 1764.

BANNERS were common to all nations. The Jewish tribes had standards or banners—*Num. ii.* (1491 B.C.) The standard of Constantine bore the inscription, *In hoc signo vinces*—"By this sign thou shalt conquer," under the figure of the cross. See *Cross*. The magical banner of the Danes (said to have been a black raven on a red ground) was taken by Alfred when he defeated Hubba, 878. St. Martin's cap, and afterwards the celebrated auriflamme, or oriflamme, were the standards of France about 1100; see *Auriflamme, Standards, &c.*

* THE ROYAL BRITISH BANK was established in 1849, by Mr. John McGregor, M.P., and others, under sir R. Peel's joint-stock banking act, 7 & 8 Vict. c. 113 (1844); as an attempt to introduce the Scotch banking system of cash credits into England. On 3 Sept. 1856, it stopped payment occasioning much distress and ruin to many small tradesmen and others. In consequence of strong evidence of the existence of fraud in the management of the bank, elicited during the examination before the court of bankruptcy, the government instructed the attorney-general to file *ex-officio* informations against the manager, Mr. H. Innes Cameron, and several of the directors. They were convicted 27 Feb. 1858, after 13 days' trial, and sentenced to various degrees of imprisonment. Attempts to mitigate the punishment failed (May, 1858); but all were released except Cameron and Esdaile, in July, 1858. In April, 1860, dividends had been paid to the amount of 15*s.* in the pound. The attorney-general brought in a bill called the *Fraudulent Trustees' Act*, 20 & 21 Vict. c. 54, to prevent the recurrence of such transactions.—On 19 April, 1860, a deficiency of 263,000*l.* was discovered in the *Union Bank of London*. Mr. George Pullinger, a cashier, confessed himself guilty of forgery and fraud, and was sentenced to 20 years' imprisonment.—On 18 Feb. 1861, it was discovered that John Durden, a clerk of the *Commercial Bank of London*, had robbed his employers of 67,000*l.*, of which 46,000*l.* might be recovered.—In Dec. 1864, J. W. Terry and Thomas Burch, manager and secretary of the *Unity Bank*, were committed on a charge of conspiracy for fabricating accounts; but acquitted on their trial.

† According to a return to parliament made at the close of Feb. 1826, there had become bankrupt in the four months preceding, 59 banking-houses, comprising 144 partners; and 20 other banking establishments had been declared insolvent. Every succeeding week continued to add from seventy to a hundred merchants, traders, and manufacturers to the bankrupt list. This was the period of bubble speculation, and of unprecedented commercial embarrassment and ruin.

BANNOCKBURN (Stirlingshire), the site of two battles : (1) between Robert Bruce of Scotland and Edward II. of England, 24 June, 1314. The army of Bruce consisted of 30,000 ; that of Edward of 100,000 men, of whom 52,000 were archers. The English crossed a rivulet to the attack, and Bruce having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete : the English king narrowly escaped, and 50,000 were killed or taken prisoners : (2) at Sauchieburn, near here, James II. was defeated and slain on 11 June, 1488, by his rebellious nobles.—A national monument was founded here, 24 June, 1861.

BANNS, in the feudal law, were a solemn proclamation of any kind : hence arose the present custom of asking banns, or giving notice before marriage ; said to have been introduced into the English church about 1200. The proper time of publishing banns in the church has been recently the subject of much discussion (1867).

BANQUETING-HOUSE, Whitehall, London, built by Inigo Jones, about 1607.

BANTAM (Java). Here a British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683. Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814.

BANTINGISM, see *Corpulence*.

BANTRY BAY (S. Ireland), where a French fleet, bringing succour to the adherents of James II., attacked the English under admiral Herbert, 1 May, 1689 : the latter retired to form in line and were not pursued. A French squadron of seven sail of the line and two frigates, armed *en flute*, and seventeen transports, anchored here for a few days, without effect, Dec. 1796. **MUTINY** of the Bantry Bay squadron under admiral Mitchell was in Dec. 1801. In Jan. 1802, twenty-two of the mutineers were tried on board the *Gladiator*, at Portsmouth, when seventeen were condemned to death, of whom eleven were executed ; the others were sentenced to receive each 200 lashes. The executions took place on board the *Majestic*, *Centaur*, *Formidable*, *Téméraire*, and *L'Achille*, 8 to 18 Jan. 1802.

BAPTISM, the ordinance of admission into the church, practised by all Christian sects except Quakers. John the *Baptist* baptized Christ, 30. (*Math.* iii.) Infant baptism is mentioned by Irenæus about 97. In the reign of Constantine, 319, baptisteries were built and baptism was performed by dipping the person all over. In the west sprinkling was adopted. Much controversy has arisen since 1831 (particularly in 1849 and 1850), in the church of England, respecting baptismal regeneration, which the Arches' Court of Canterbury decided to be a doctrine of the church of England. See *Trials*, 1849, and *note*.

BAPTISTS (see *Anabaptists*). A sect distinguished by their opinions respecting (1) the proper *subjects*, and (2) the proper *mode* of baptism : the former they affirm to be those who are able to make a profession of faith ; the latter to be total immersion. There are seven sections of Baptists—Arminian, Calvinistic (or Particular), &c. The first Baptist church formed in London was in 1608. They published their confession of faith in 1689. In 1851 they had 130 chapels in London and 2789 (with sittings for 752,353 persons) in England and Wales. Rhode Island, America, was settled by Baptists in 1635.

BAR (*sur AUBE*), N. E. France. Here the French under Oudinot and Macdonald, were defeated by the allies, 27 Feb. 1814.

BARBADOES, a West India Island, one of the windward isles discovered by the Portuguese about 1600, taken possession of by the English 1605, and settled by sir Wm. Courteen 1624, who founded Jamestown. As many royalists settled here, the island was taken by the parliamentarians in 1652.

BARBARY, in N. Africa, considered to comprise Algeria, Morocco, Fez, Tunis, and Tripoli, with their dependencies. Piratical states (nominally subject to Turkey) were founded on the coast by Barbarossa, about 1518.

BARBERS existed at Rome in the 3rd century B.C. In England, formerly, the business of a surgeon was united to the barber's, and he was denominated a **BARBER-SURGEON**. A London company was formed in 1308, and incorporated, 1462. This union was partially dissolved in 1540, and wholly so in 1745. "No person using any shaving or barbering in London shall occupy any surgery, letting of blood, or other matter, except only drawing of teeth." 32 Hen. VIII. 1540.

BARCA (N. Africa), the Greek Barce, a colony of Cyrene. It was successively subjugated by the Persians, Egyptians, and Saracens. In 1550 the sultan Solymán combined Barca with the newly conquered pashalik of Tripoli.

BARCELONA (N. E. Spain), an ancient maritime city, said to have been rebuilt by Hamilcar Barca, father of the great Hannibal, about 233 B.C. With the surrounding country it was held by the Romans, Goths, Moors, and Franks, and, with the province of which it is the capital, was made an independent country about A.D. 864, and incorporated with Aragon, 1164, the last count becoming king. The city has suffered much by war. The siege by the French, in 1694, was relieved by the approach of the English fleet, commanded by admiral Russell; but the city was taken by the earl of Peterborough in 1706. It was bombarded and taken by the duke of Berwick and the French in 1714, and was taken by Napoleon in 1808, and retained till 1814. It revolted against the queen in 1841, and was bombarded and taken in Dec. 1842, by Espartero.

BARCLAY, CAPTAIN, see *Pedestrianism*.

BARDESANISTS, followers of Bardesanes, of Mesopotamia, who embraced the errors of Valentinus, after refuting them, and added the denial of the incarnation, the resurrection, &c., about 175.

BARDS. Demodocus is mentioned as a bard by Homer; and we find bards, according to Strabo, among the Romans before the age of Augustus. The *Welsh* bards formed an hereditary order, regulated, it is said, by laws, enacted about 940 and 1078. They lost their privileges at the conquest by Edward I. in 1284. The institution was revived by the Tudor sovereigns; and their Eisteddfodds (or meetings) have been and are frequently held; at Swansea, Aug. 1863; at Llandudno, Aug. 1864; in the vale of Conway, 7 Aug. 1865; at Chester, 4 Sept. 1866; at Carmarthen, 3 Sept. 1867. The Gwyneddigion Society of Bards was founded in 1770. Turlogh O'Carolan, the last of the *Irish* bards, died in 1737. *Chambers*.

BARBONES' PARLIAMENT. Cromwell, supreme in the three kingdoms, summoned 122 persons, such as he thought he could manage, who with six from Scotland, and five from Ireland, met, as a parliament, 4 July, 1653. It obtained its appellation from a nickname given to one of its members, a leather-seller, named "Praise-God Barbon." The majority evinced much sense and spirit, proposing to reform abuses, improve the administration of the law, &c. The parliament was suddenly dissolved, 13 Dec. 1653, and Cromwell made Lord Protector.

BARREILLY, province of Delhi (N. W. India), ceded to the East India company by the ruler of Oude in 1801. A mutiny at Bareilly, the capital, was suppressed in April, 1816. On 7 May, 1858, it was taken from the cruel sepoy rebels.

BARFLEUR (N. France), where William, duke of Normandy, equipped the fleet by which he conquered England, 1066. Near it, prince William, duke of Normandy, son of Henry I., in his passage from Normandy, was shipwrecked, 25 Nov. 1120.* Barfleur was destroyed by the English in the campaign in which they won the battle of Crecy, 1346. The French navy was destroyed near the cape by admiral Russell, after the victory of La Hogue, in 1692.

BARI (S. Italy), the Barium of Horace, was, in the 9th century, a stronghold of the Saracens, and was captured by the emperor Louis II., a descendant of Charlemagne, in 871. In the 10th century it became subject to the eastern empire, and remained so till it was taken by Robert Guiscard, the Norman, about 1060. A great ecclesiastical council was held here on 1 Oct. 1098, when the *filioque* article of the creed and the procession of the Holy Spirit were the subjects of discussion.

BARING ISLAND, Arctic Sea, discovered by captain Penny in 1850-1, and so named by him after sir Francis Baring, first lord of the admiralty in 1849.

BARIUM (Greek, *barys*, heavy), a metal found abundantly as carbonate and sulphate. The oxide baryta was first recognised as an earth distinct from lime by Scheele, in 1774; and the metal was first obtained by Humphry Davy, in 1808. *Watts*.

BARK, see *Jesuits' Bark*.

BARLAAMITES, followers of Barlaam, a learned Calabrian monk of the order of St. Basil, who maintained various peculiar tenets, attacked the Greek monks, and supported the Latin against the Greek church in a controversy at Constantinople, 1337, and who acted as the emperor's envoy in an attempt to reconcile the churches in 1339. He died about 1348.

BARMECIDES, a powerful Persian family, celebrated for virtue and courage, were

* With him perished his bride, Matilda, daughter of Fulke, earl of Anjou; the king's natural son, Richard; his niece, Lucia; the earl of Chester, and the flower of the nobility, with 140 officers and soldiers, and 50 sailors, most of the latter being intoxicated, which was the cause of their running upon the rocks. It is said that Henry never afterwards smiled.

massacred through the jealousy of the caliph Haroun-al-Raschid, about 802. His visir Giafar was a Barmecide. The phrase Barmecide (or imaginary) feast originated in the story of the barber's sixth brother, in the Arabian Nights' Entertainments.

BARNABITES, an order of monks, established in Milan about 1530, were much engaged in instructing youth, relieving the sick and aged, and converting heretics.

BARNARD'S, SIR JOHN, ACT (7 Geo. II., c. 8), entitled, "an act to prevent the infamous practice of stock-jobbing," was passed in 1734, and repealed in 1860. Sir John Barnard (born 1685, died 1764) was an eminent and patriotic lord mayor of London.

BARNET, Hertfordshire. Here, at Gladsmore heath, Edward IV. gained a decisive victory over the Lancastrians, on Easter-day, 14 April, 1471, when the earl of Warwick and his brother the marquis of Montacute, or Montague, and 10,000 men were slain. A column commemorative of this battle has been erected at the meeting of the St. Alban's and Hatfield roads.

BAROMETERS. Torricelli, a Florentine, having discovered that water did not rise in a pump through what was supposed to be nature's abhorrence of a vacuum, imitated the action of a pump with mercury, and made the first barometer, about 1643. Pascal's experiments (1646) enhanced the value of the discovery by applying it to the measurement of heights. Wheel barometers were contrived in 1668: pendent barometers in 1695; marine in 1700, and many improvements have been since made. In the *Aneroid* barometer (from *a*, no, and *neros*, watery) no liquid is employed; the atmospheric pressure being exerted on a metallic spring. Its invention (attributed to Conté, in 1798, but due to Vidi, who died in April, 1866), excited much attention in 1848-9. Barometers were placed at N.E. coast stations in 1860, by the duke of Northumberland and others.

BARON, formerly the only title in our peerage, now the lowest. Its original name in England, *Vavasour*, was changed by the Saxons into *Thane*, and by the Normans into *Baron*. Many of this rank undoubtedly had assisted in, or been summoned to parliament (in 1205); but the first precept found is of no higher date than the 49 Hen. III. 1265. The first raised to this dignity by patent was John de Beauchamp, created baron of Kidderminster, by Richard II., 1387. The barons took arms against king John, and compelled him to sign the great charter of our liberties, and the charter of our forests, at Runnymede, near Windsor, June, 1215. Charles II. granted a coronet to barons on his restoration, 1660.

BARONETS, the first in rank among the gentry, and the only knighthood that is hereditary, were instituted by James I. 1611. The rebellion in Ulster seems to have given rise to this order, it having been required of a baronet, on his creation, to pay into the exchequer as much as would maintain "thirty soldiers three years at eightpence a day in the province of Ulster in Ireland." It was further required that a baronet should be a gentleman born, and have a clear estate of 1000*l.* per annum. The first baronet was sir Nicholas Bacon (whose successor is therefore styled *Primus Baronettorum Angliæ*), 22 May, 1611. The baronets of Ireland were created in 1619; the first being sir Francis Blundell.—Baronets of Nova Scotia were created, 1625; sir Robert Gordon the first baronet.—All baronets created since the Irish union in 1801 are of the United Kingdom.

BARONS' WAR, arose in consequence of the faithlessness of king Henry III. and the oppression of his favourites in 1258. The barons, headed by Simon de Montfort, earl of Leicester, and Gilbert de Clare, earl of Gloucester, met at Oxford in 1262, and enacted statutes to which the king objected. In 1263 their disputes were in vain referred to the decision of Louis IX. of France. War broke out, and on 14 May, 1264, the king's party were totally defeated at Lewes: and De Montfort became the virtual ruler of the kingdom. Through treachery the war was renewed; and at the battle of Evesham, 4 Aug. 1265, De Montfort was slain, and the barons were defeated. They, however, did not render their final submission till 1268. A history of this war was published by Mr. W. H. Blaauw in 1844.

BARRACKS (from "*Baraque—Hutte que font les soldats en campagne pour se mettre à couvert*,") were not numerous in these countries until about 1780. A superintendent-general was appointed in 1793, since when commodious barracks have been built in the various garrison towns and central points of the empire.—A report, censuring the condition of many barracks, was presented to parliament in 1858; and great improvements were effected under the direction of Mr. Sydney, afterwards Lord Herbert; see *Aldershot*.

BARRICADES, mounds formed of trees and earth, and for military defence. During the wars of the League in France, in 1588, the people made *barricades* by means of chains, casks, &c., and compelled the royal troops to retire. During the war of the Fronde, a barricade was erected in Paris on 27 Aug. 1648. Barricades composed of overturned vehicles, &c., were erected in Paris in the insurrections of 27-30 July, 1830, and 23-26 June, 1848, when sanguinary conflicts took place.

BARRIER TREATY, by which the Low Countries were ceded to the emperor Charles VI., was signed by the British, Imperial, and Dutch ministers, 15 Nov. 1715.

BARRISTERS are said to have been first appointed by Edward I., about 1291, but there is earlier mention of professional advocates in England. They are of various rank, as King's or Queen's Counsel, Serjeants, &c., *which see*. Students for the bar must keep a certain number of terms at the inns of court, previously to being called; and by the regulations of 1853 must pass a public examination. Irish students must keep eight terms in England.

BARROSA, or **BAROSSA** (S. Spain), where a battle was fought on 5 March, 1811, between the British army, commanded by major-general sir Thomas Graham, afterwards lord Lynedoch, and the French under marshal Victor. After a long conflict, the British achieved one of the most glorious triumphs of the Peninsular war. Although they fought at great disadvantage the British compelled the French to retreat, leaving nearly 3000 dead, six pieces of cannon, and an eagle, the first that the British had taken; the loss of the British was 1169 men killed and wounded.

BARROW ISLAND (N. Arctic Sea), discovered by captain Penny in 1850-51, and named by him in honour of John Barrow, Esq., son of sir John.

BARROW-ON-FURNESS (Lancashire), in 1847, was a village with a population of about 330, which, in 1867, had increased to above 17,000, in consequence of the large manufacture of iron from the ore (hæmatite) found there. On 19 Sept. 1867, new docks were opened in the presence of the dukes of Devonshire and Buccleuch, Mr. Gladstone, and other eminent persons.

BARROW'S STRAITS (N. Arctic Sea), explored by Edwd. Parry, as far as Melville island, lat. 74° 26' N., and long. 113° 47' W. The strait, named after sir John Barrow, was entered on Aug. 2, 1819. The thermometer was 55° below zero of Fahrenheit.

BARROWISTS, a name given to the *Brownists*, *which see*.

BARROWS, circular mounds found in Britain and other countries, were ancient sepulchres. Sir Richard Hoare caused several barrows near Stonehenge to be opened; in them were found a number of curious remains of Celtic ornaments, such as beads, buckles, and brooches, in amber, wood, and gold: Nov. 1808. Many barrows were opened, and interesting discoveries made in Yorkshire in 1866 and 1867, under the superintendence of the Rev. Wm. Greenwell.

BARS in music appear in the madrigals of Bonini, 1607. Their common use in this country is attributed to Henry Lawes, about 1653. *Eng. Cyc.*

BARTHOLOMEW FAIR. The charter was granted by Henry II., 1133, and was long held on ground which had been the site of tournaments and martyrdoms. The shows were discontinued in 1850, and the fair was proclaimed for the last time in 1855. In 1858 Mr. H. Morley published his "History of Bartholomew Fair," with many illustrations; see *Smithfield*.

BARTHOLOMEW, ST., THE APOSTLE, martyred 71. The festival (24 Aug. o.s., 3 Sept. n.s.) is said to have been instituted 1130.

Monastery of St. Bartholomew (of Austin friars) founded by Rahere, a minstrel of Henry II. about 1100
 The hospital founded by him about 1123
 Refounded after the dissolution of monasteries (it then contained 100 beds, with 1 physician and 3 surgeons) 1544
 Incorporated 1546

William Harvey, the physiologist, physician here 1609-43
 Earliest record of medical school 1662
 Hospital rebuilt by subscription 1729
 Medical college founded 1843
 The hospital (since enlarged) contained 580 beds, and relieved about 70,000 patients . . . 1861

BARTHOLOMEW, ST. The Massacre of St. Bartholomew commenced at Paris on the night of the festival (according to Sully, 70,000 Huguenots, or French Protestants, including women and children, were murdered throughout the kingdom by secret orders from Charles IX., at the instigation of his mother, the queen dowager, Catherine de Medicis), 24 Aug. 1572. The number of the victims is differently stated. La Popélonnière calculates the whole at 20,000; Adriani, De Serres, and De Thou say 30,000; Davila states them at 40,000; and Péréfixe makes the number 100,000. Above 500 persons of rank, and 10,000 of inferior condition, perished in Paris alone, besides those slaughtered in the provinces. Pope Gregory XIII. ordered a *Te Deum* to be performed, with other rejoicings.

BARTHOLOMEW, ST., a West Indian Island, held by Sweden. It was colonised by the French in 1648; and has been several times taken and restored by the British. It was ceded to Sweden by France in 1785.

BARTHOLOMITES, a religious order expelled from Armenia, settled at Genoa 1307,

where is preserved in the Bartholomite church the image which Christ is said to have sent to king Abgarus. The order was suppressed by Pope Innocent X. 1650.

BARTON AQUEDUCT (near Manchester) was constructed by James Brindley, to carry the Bridgewater canal over the Irwell, which was done at a height of 39 feet above the river; completed in 1761.

BASHI-BAZOUKS, irregular Turkish troops, partially employed by the British in the Crimean war, 1854-6.

BASIENTELLO (S. Naples). Here the army of Otho II. in an ambuscade, was nearly cut to pieces by the Greeks and Saracens on July 13, 982; the emperor barely escaped.

BASILIANS, an order of monks, which obtained its name from St. Basil (who died 380); was reformed by pope Gregory, in 1569.—A sect, founded by Basil, a physician of Bulgaria, rejected the books of Moses, the eucharist, and baptism, and are said to have had everything in common, 1110. Basil was burnt alive in 1118.

BASILICA, a body of law, in Greek, including the Institutes of Justinian, the Pandects, &c., arranged by order of the emperor Basil, the Macedonian, and his son Leo the Philosopher, 875—911.

BASILIKON DORON (Royal Gift), precepts on the art of government, composed by James I. of England for his son, and first published at Edinburgh in 1599. The collected works of this monarch were published at London, 1616-20, in one vol. fol.

BASLE, a rich city in Switzerland. The 18th general council sat here from Dec. 1431 to May, 1443. Many important reforms in the church were proposed, but not carried into effect: among others the union of the Greek and Roman churches. The university was founded in 1460. Treaties of peace between France, Spain, and Prussia were concluded here in 1795.

BASQUE PROVINCES (N. W. Spain, Biscay, Guipuscoa, and Alava). The Basques, considered to be descendants of the ancient Iberi, were termed Vascones by the Romans, whom they successfully resisted. They were subdued with great difficulty by the Goths about 580; and were united to Castile in the 13th and 14th centuries. Their language, distinct from all others, is conjectured to be of Tartar origin.

BASQUE ROADS (W. France). Four French ships of the line, riding at anchor here, were attacked by lords Gambier and Cochrane (the latter commanding the fireships), and all, with a great number of merchant and other vessels, were destroyed, 11, 12 April, 1809. Cochrane accused Gambier of neglecting to support him, and thereby allowing the French to escape. At a court-martial (July 26—Aug. 4), lord Gambier was acquitted.

BASSANO (N. Italy). Here the Austrians under Wurmser, were defeated by the French under Massena, 8 Sept. 1796.

BASSET, or **BASSETTE**, or *Pour et Contre*, a game at cards, said to have been invented by a noble Venetian, in the 15th century; introduced into France, 1674.

BASSETTERE-ROADS, St. Christopher's, West Indies. Here the French admiral, the comte de Grasse, was repulsed with loss in three desperate attacks on the British fleet, commanded by sir Thomas Graves, 25, 26 Jan. 1782.

BASSORAH, **BASRAH**, or **BUSSORAH** (Asia Minor), a Turkish city, founded by the caliph Omar, about 635. It has been several times taken and retaken by the Persians and Turks.

BASS ROCK, an isle in the Frith of Forth (S. Scotland), was granted to the Lauders, 1316; purchased for a state prison, 1671; taken by the Jacobites, 1690; surrendered, 1694; granted to the Dalrymples, 1706.

BASS'S STRAIT, AUSTRALIA. Mr. Bass, surgeon of the *Reliance*, in an open boat from Port Jackson, in 1797, penetrated as far as Western Port, and affirmed that a strait existed between New South Wales and Van Diemen's Land. Lieutenant Flinders circumnavigated Van Diemen's Land, and named the strait after Mr. Bass, 1799.

BASTARD, a child not born in lawful wedlock. An attempt made in England, in 1236, to legitimate bastard children by the subsequent marriage of the parents, failed, and led to the answer to the barons assembled in the parliament of Merton: *Nolumus leges Angliæ mutari*.—"We will not have the laws of England changed." Women concealing their children's birth deemed guilty of murder, 21 James I., 1624. In Scotland bastard children could not dispose of their moveable estates by will until 1836. A new act, facilitating the claims of mothers, and making several provisions for proceeding in bastardy cases, was passed 1845.

BASTILLE, Paris, a castle built by Charles V., king of France, in 1369, for the defence of Paris against the English; completed in 1383, and afterwards used as a state prison. Henry IV. and his veteran army assailed it in vain in the siege of Paris, during the war (1587—1594). On 14-15 July, 1789, it was pulled down by the populace; the governor and

other officers seized, conducted to the Place de Grève; their hands and heads were cut off, and the heads carried on pikes through the streets.—“The man with the iron mask,” the most mysterious prisoner known, died here, Nov. 19, 1703; see *Iron Mask*.

BATALHA, Portugal. The monastery here was built by John I., of Portugal, as a token of gratitude for his victory over John I., of Castile, at Aljubarrota, 14 Aug. 1385, securing the independence of his kingdom. The monastery has been in course of restoration since 1839.

BATAVIA AND BATAVIAN REPUBLIC, see *Holland*.

BATAVIA, the capital of Java, and of all the Dutch settlements in the East Indies, built by that people about 1619. Taken from the French (who had seized it); and by sir Samuel Auchmuty, 26 Aug. 1811; restored to the Dutch, in 1814.

BATH (Somerset), *Aquæ solis*, a favourite station of the Romans about 44 B.C., then remarkable for its hot springs. Coel, a British king, is said to have given this city a charter, and the Saxon king Edgar was crowned here, A.D. 973.

Bath plundered and burnt in the reign of William Rufus, and again in	1137	Bath philosophical society formed	1817

BATH AND WELLS, BISHOPRIC OF. The see of Wells, whose cathedral church was built by Ina, king of the West Saxons, in 704, was established in 909. The see of Bath was established in 1078. John de Villula, the sixteenth bishop, having purchased the city of Bath for 500 marks of Henry I., transferred his seat from Wells to Bath in 1088. Disputes between the monks of Bath and the canons of Wells about the election of a bishop, were compromised in 1135. Henceforward the bishop was to be styled from both places; the precedence to be given to Bath. The see is valued in the king's books at 53*l.* 1*s.* 3*d.* per annum. Present income, 5000*l.*

Bishops of Bath and Wells.

1802. Richard Beadon, died	21 April, 1824	1845. Richard Bagot, died	5 May, 1854
1824. George Henry Law, died	22 Sept. 1845	1854. Robert John, baron Auckland (PRESENT bishop.)	

BATH ADMINISTRATION. Mr. Pelham and his friends having tendered their resignation to king George II., 10 Feb. 1746, the formation of a new ministry was undertaken by William Pulteney, earl of Bath; which expired on 12 Feb., while yet incomplete, and received the name of the “Short-lived” administration. The members of it were: the earl of Bath, *first lord of the treasury*; lord Carlisle, *lord privy seal*; lord Winchelsea, *first lord of the admiralty*; and lord Granville, one of the secretaries of state, with the seals of the other in his pocket, “to be given to whom he might choose.” Mr. Pelham and his colleagues returned to power. *Cox's Life of Pelham*.

BATH, ORDER OF THE, said to be of early origin, but formally constituted 11 Oct., 1399, by Henry IV., two days previous to his coronation in the Tower; he conferred the order upon forty-six esquires, who had watched the night before, and had bathed. After the coronation of Charles II. the order was neglected until 18 May, 1725, when it was revived by George I., who fixed the number of knights at 37.

The prince regent enlarged the order, forming classes of knights grand crosses (72), knights commanders (180), with an unlimited number of companions	2 Jan. 1815	were annulled; and by new statutes, the order, hitherto exclusively military, was opened to civilians	25 May, 1847
By an order, the existing statutes of this order		Dr. Lyon Playfair and other promoters of the Great Exhibition received this honour	1851

	CONSTITUTION.	Military.	Civil.
1st Class.	Knights grand cross,	50	25
2nd Class.	Knights commanders,	100	50
3rd Class.	Companions,	525	200

BATHS were long used in Greece, and introduced by Agrippa into Rome. The thermæ of the Romans and gymnasia of the Greeks (of which baths formed merely an appendage) were sumptuous. The marble group of Laocoön was found in 1506 in the baths of Titus, erected about 80, and the Farnese Hercules in those of Caracalla, erected, 211; see *Bath*.

BATHS IN LONDON.

In London, St. Agnes Le Clere, in Old-street-road, was a spring of great antiquity; baths said to have been formed in 1502.		A bath opened in Bagno-court, now Bath-street, Newgate-street, London, is said to have been the first bath in England for hot bathing	1679
St. Chad's-well, Gray's-inn-road, derives its name from St. Chad, the fifth bishop of Lichfield	667	Old Bath-house, Coldbath-square, in use	1697
		Pearless (Perilous) Pool, Baldwin-street, City-road, mentioned by Stow (died 1605); enclosed as a bathing place	1743

BATHS, *continued.*

Turkish sweating baths very popular in . . . 1860
 The Oriental baths in Victoria-street, Westminster, were completed in . . . 1862
 PUBLIC BATHS AND WASH-HOUSES.
 The first established by Mr. Bowie in the neighbourhood of the London docks . . . 1844
 The public baths and wash-houses in Liverpool were founded, in 1844, through the instrumentality of Catherine Wilkinson, who in 1832 began to lend her room and appliances to poor people for washing.

Acts were passed to encourage the establishment of public baths and wash-houses, "for the health, comfort, and welfare of the inhabitants of populous towns and districts," in England and Ireland . . . 1846
 In the quarter ending Sept. 1854, 537,345 bathers availed themselves of the baths in London, and in this period there were 85,260 washers
 Public baths and wash-houses have since been established throughout the empire.

BATON, a truncheon borne by generals in the French army, and afterwards by the marshals of other nations. Henry III. of France, before he ascended the throne, was made generalissimo of the army of his brother Charles IX., and received the *bâton* as the mark of the high command, 1569. *Hénault.*

BATON ROUGE, Louisiana, United States, was captured by the Federals, 5 Aug. 1862, after a fierce conflict; see *United States*, 1862.

BATTERIES along the coasts were constructed by Henry VIII. (who reigned 1509-47). The ten floating batteries with which Gibraltar was attacked, in the siege of that fortress, were invented by D'Arcon, a French engineer. They resisted the heavy shells and 32-pound shot, but ultimately yielded to red-hot shot, 13 Sept. 1782; see *Gibraltar*.

BATTERING-RAM, *Testudo Arietaria*, with other military implements, are said to have been invented by Artemon, a Lacedæmonian, and employed by Pericles, about 441 B.C. Sir Christopher Wren employed a battering-ram in demolishing the old walls of St. Paul's church, previously to rebuilding the edifice in 1675.

BATTERSEA PARK originated in an act of parliament passed in 1846, which empowered her majesty's commissioners of woods to form a royal park in Battersea-fields. Acts to enlarge the powers of the commissioners were passed in 1848, 1851, and 1853. The park and the new bridge connecting it with Chelsea were opened in April, 1858.

BATTLE-ABBEY, Sussex, founded by William I., 1067, on the plain where the battle of Hastings was fought, 14 Oct. 1066. It was dedicated to St. Martin, and given to Benedictine monks, who were to pray for the souls of the slain. The original name of the plain was Hetheland; see *Hastings*. After the battle of Hastings, a list was taken of William's chiefs, amounting to 629, and called the *BATTEL-ROLL*; and among these chiefs the lands and distinctions of the followers of the defeated Harold were distributed.

BATTLE, WAGER OF, a trial by combat formerly allowed by our laws, where the defendant in an appeal of murder might fight with the appellant, and make proof thereby of his guilt or innocence; see *Appeal*.

BATTLE-AXE, a weapon of the Celts. The Irish were constantly armed with an axe. *Burns*. At the battle of Bannockburn king Robert Bruce clove an English champion down to the chine at one blow with a battle-axe, 1314. *Hume*. The battle-axe guards, or beaufriers, vulgarly called beef-eaters, and whose arms are a sword and lance, were first raised by Henry VII. in 1485. They were originally attendants upon the king's buffet; see *Yeoman of the Guard*.

BATTLEFIELD, BATTLE OF, see *Shrewsbury*.

BATTLES. Palamedes of Argos is said to have been the first who ranged an army in a regular line of battle, placed sentinels round a camp, and excited the soldier's vigilance by giving him a watchword. *Lenglet*. See *Naval Battles, British*. The following are the most memorable battles, arranged in chronological order; further details of the greater part being given in separate articles; *n.* signifies *naval*.*

BAUGÉ, see *Anjou*.

BAUTZEN, a town in Saxony, near which desperate battles were fought 20, 21, and 22 May, 1813, between the French, commanded by Napoleon, and the allies under the emperor of Russia and the king of Prussia. The struggle commenced on the 19th, with a contest on the outposts, which cost each army a loss of above 2000 men. On the 20th (at Bautzen) the French were more successful; and on the 21st (at Wurschen) the allies were compelled to retire; but Napoleon obtained no permanent advantage from these sanguinary engagements. Duroc was killed at Rachenbach by a cannon ball, on 22 May, to the great sorrow of the emperor and the French army.

BAVARIA (part of ancient Noricum and Vindelicia), a kingdom in South Germany, conquered from the Celtic Gauls (Boii) by the Franks between 630 and 660. The country was afterwards governed by dukes subject to the French monarchs. Tasillon II. was deposed by Charlemagne, who established margraves in 788. The margrave Leopold, 895, father of Arnulph the Bad, is styled the first duke. Guelf of the house of Este was made duke by the emperor Henry IV. in 1071. His descendant Henry the Lion, duke of Saxony, Bavaria, and Brunswick (ancestor of the present Brunswick family, see *Brunswick*), was dispossessed in 1180 by the emperor Frederick Barbarossa (who had been previously his friend and benefactor). Bavaria supported Austria in the contest with Prussia in June, 1866, and took part in the war, and made peace with Prussia 22 Aug.; see *Prussia*. Population, after cessions 1866, 4,774,464.

KINGS OF BAVARIA.

1805. Maximilian-Joseph I. He deserted Napoleon, and had his enlarged territories confirmed to him, Oct. 1813; grants a constitutional charter, 1818; *d.* 13 Oct. 1825.
1825. Louis I., 13 Oct.; abdicated 21 March, 1848; * died 29 Feb. 1868.
1848. Maximilian-Joseph II.; son; born 28 Nov. 1811; dies 10 March, 1864.
1864. Louis II. (son) 10 March; born 25 Aug. 1845; *Heir*: his brother Otho, born 27 April, 1848.

* The abdication of Charles-Louis was mainly caused by his attachment to an intriguing woman, known throughout Europe by the assumed name of Lola Montes, who, in the end, was expelled the kingdom for her interference in state affairs, and afterwards led a wandering life. She delivered lectures in London, in 1859, and thence proceeded to the United States. She died at New York, 17 Jan. 1861.

BAY ISLANDS (the chief, Ruatan), in the bay of Honduras, central America, belonged to Spain till 1821, then to Great Britain, which formed them into a colony in 1852, but ceded them to Honduras, 28 Nov. 1859; see *Honduras*.

BAYEUX TAPESTRY, said to have been wrought by Matilda, queen of William I. It is 19 inches wide, 214 feet long, and is divided into compartments showing the events, from the visit of Harold to the Norman court, to his death at Hastings; it is now preserved in the public library of Bayeux near Caen. A copy, drawn by C. Stothard, and coloured after the original, was published by the Society of Antiquaries in 1821-3.

BAYLEN (S. Spain), where on 20 July, 1808, the French, commanded by generals Dupont and Wedel, were defeated by the Spaniards under Reding, Coupigny, and other generals whose force amounted to 25,000.

BAYONET, the short dagger fixed at the end of fire-arms, said to have been invented at Bayonne, in France, about 1647, 1670, or 1690. It was used at Killiecrankie in 1689, and at Marsaglia by the French, in 1693, "with great success, against the enemy unprepared for the encounter with so formidable a novelty." The ring bayonet was adopted by the British, 24 Sept. 1693.

BAYONNE (S. France), an ancient city. It was held by the English from 1295 till it was taken by Charles VII. The queens of Spain and France met here in 1565 the cruel duke of Alva, it is supposed to arrange the massacre of St. Bartholomew. Charles IV. of Spain abdicated here in favour of "his friend and ally" the emperor Napoleon, 4 May, and his sons, Ferdinand, prince of Asturias, Don Carlos and Don Antonio renounced their rights to the Spanish throne, 6 May, 1808. In the neighbourhood of Bayonne was much desperate fighting between the French and British armies, 10, 11, and 13 Dec. 1813. Bayonne was invested by the British, 14 Jan. 1814; on 14 April, the French made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and lieut.-gen. sir John Hope was wounded and taken prisoner.—A Franco-Spanish industrial and fine-arts exhibition was opened at Bayonne in July, 1864.

BAYREUTH (N. Germany), a margraviate, held formerly by a branch of the Brandenburg family, was with that of Anspach abdicated by the reigning prince in favour of the king of Prussia, 1790. The archives were brought (in 1783) from Plessenburg to the city of Bayreuth, which was incorporated with Bavaria by Napoleon in 1806.

BAZAAR, or covered market, a word of Arabic origin. The bazaar of Ispahan is magnificent, yet it is excelled by that of Tauris, which has several times held 30,000 men in order of battle. In London the Soho-square bazaar was opened by Mr. Trotter in 1816 to relieve the relatives of persons killed in the war. The Queen's bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000*l.*, 27 May, 1829. It was rebuilt, and converted into the Princess's Theatre, opened 30 Sept. 1841. The St. James's bazaar (built by Mr. Crockford) in 1832. The Pantheon made a bazaar in 1834. The London Crystal-palace bazaar, 1858. The most imposing sale termed a bazaar was opened for the benefit of the Anti-Corn-Law League, in Covent-garden theatre, 5 May, 1845; in six weeks 25,000*l.* was obtained, mostly by admission money. The Corinthian bazaar, Argyll-street, Oxford-street (to replace the bazaar at the Pantheon) was opened 30 July, 1867; see *Pantheon*.

BEACHY HEAD, a promontory, S.E. Sussex, near which the British and Dutch fleet, commanded by the earl of Torrington, was defeated by a superior French force under admiral Tourville, 30 June, 1690; the allies suffered very severely. The Dutch lost two admirals, 500 men, and several ships—sunk to prevent them from falling into the hands of the enemy; the English lost two ships and 400 men. The admirals on both sides were blamed; ours, for not fighting; the French, for not pursuing the victory.

BEACONS, see *Lighthouses*.

BEADS were early used in the east for reckoning prayers. St. Augustin mentions them 366. About 1090, Peter the Hermit is said to have made a series of 55 beads. To Dominic de Guzman is ascribed the invention of the Rosary (a series of 15 large and 150 small beads), in honour of the Blessed Virgin, about 1202. Beads soon after were in general use. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited. Beads have been found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. 1309. *Stow*. Beams and scales, with weights and measures, were ordered to be examined by the justices at quarter sessions, 35 Geo. III. 1794; see *Weights and Measures*.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The precept of Pythagoras to abstain from beans, *abstine a fabis*, has been variously interpreted. "Beans do not favour mental tranquillity." *Cicero*. The finer kinds of beans were brought here with other vegetables, in Henry VIII.'s reign.

BEAR-BAITING, an ancient popular English sport, prohibited by parliament in 1835.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews, who were forbidden to mar their beards, 1490 B.C. *Lev.* xix. 27. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards till the time of Alexander, who ordered the Macedonians to be shaved, lest the beard should give a handle to their enemies, 330 B.C. Beards were worn by the Romans, 297 B.C. The emperor Julian wrote a diatribe (entitled "*Misopogon*") against wearing beards, A.D. 362.—In England, they were not fashionable after the conquest, 1066, until the 13th century, and were discontinued at the Restoration. Peter the Great enjoined the Russians, even of rank, to shave, but was obliged to keep officers on foot to cut off the beard by force. Since 1851 the custom of wearing the beard gradually increased.

BEARN, S. France, anciently inhabited by the Beneharri, was held successively by the Romans, Franks, Goths, and Gascons, and became a hereditary viscounty in 819; under Centule I., son of Loup, duke of Gascony. From his family it passed to the houses—of Gabaret, 1134; of Moncade, 1170; of Foix, 1290; and of Bourbon, 1550. It was united to France by Henry IV., 1594; edict issued 1620.

BEAUGÉ, see *Anjou*.

BEAULIEU, ABBEY OF, (reformed Benedictines) founded by king John, in the New Forest, Hampshire, in 1204, and dedicated to the Blessed Virgin, had the privilege of sanctuary. It afforded an asylum to Margaret, queen of Henry VI., after the defeat of the earl of Warwick at Barnet, 14 April, 1471; and also to Perkin Warbeck, 1497.

BEAUVAIS (N. France), the ancient Bellovaci, formerly capital of Picardy. When besieged by Charles the Bold, duke of Burgundy, with 80,000 men, the women under Jeanne Fourquet or Lainé, also de la Hachette, from her using that weapon, particularly distinguished themselves, and the duke raised the siege, 10 July, 1472. In memory of this the women of Beauvais walk first in the procession on the anniversary of their deliverance. *Hénault*.

BECKET'S MURDER.† Thomas Becket, archbishop of Canterbury, was murdered at the altar, 29 Dec. 1170. The king was absolved of guilty knowledge of the crime in 1172, and did penance at the tomb in 1174. The bones of Becket were enshrined in gold and jewels in 1220; but were burned in the reign of Henry VIII. 1539. The Merchant Adventurers were at one time termed "the Brotherhood of St. Thomas à Becket."

BED. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. Feather-beds were in use in England in the reign of Henry VIII. The bedsteads of the Egyptians and later Greeks, like modern couches, became common among the Roman upper classes. The ancient great bed at Ware, Herts, capable of holding twelve persons, was sold, it is said, to Charles Dickens, 6 Sept. 1864. A bedstead of gold was presented to the queen on 2 Nov. 1859, by the Maharajah of Cashmere. Air-beds and water-beds have been made since the manufacture of india-rubber cloth by Clark in 1813; and by Macintosh in 1823. Dr. Arnett's hydrostatic bed was invented in 1830.

BED OF JUSTICE, a French court presided over by the king, whose seat was termed a "bed." It controlled the ordinances of the parliament. The last was held by Louis XVI. at Versailles, 19 Nov. 1787, to raise a loan.

* A bearded woman was taken by the Russians at the battle of Pultowa, and presented to the Czar, Peter I. 1724: her beard measured $1\frac{1}{2}$ yard. A woman is said to have been seen at Paris with a bushy beard, and her whole body covered with hair. *Dict. de Trevoux*. The great Margaret, governess of the Netherlands, had a very long stiff beard. In Bavaria, in the time of Wolfius, a virgin had a long black beard. Mlle. Bois de Chêne, born at Geneva (it was said) in 1834, was exhibited in London, in 1852-3, when, consequently, eighteen years of age; she had a profuse head of hair, a strong black beard, large whiskers, and thick hair on her arms and down from her neck on her back, and masculine features.

† Thomas Becket was born in 1119. His father Gilbert was a London trader, and his mother is stated to have been a convert from Mahomedanism. He was educated at Oxford, and made archdeacon by Theobald, archbishop of Canterbury, who introduced him to the king Henry II. He became chancellor in 1155, but on being elected archbishop of Canterbury in 1162, he resigned the chancellorship, to the great offence of the king. He opposed strenuously the constitutions of Clarendon in 1164, and fled the country; and in 1166, excommunicated all the clergy who agreed to abide by them. He and the king met at Fretville, in Touraine, on July 22, 1170, and were formally reconciled. On his return he re-commenced his struggle with the king, which led to his tragical death.

BEDER (Arabia). Here Mahomet gained his first victory (over the Koreish of Mecca), 623. It was considered to be miraculous.

BEDFORD, a town N.N.W. London, renowned for its many free educational establishments endowed in 1561 by sir Wm. Harpur, a London Alderman. Here John Bunyan preached, wrote "The Pilgrim's Progress," and died (in 1688).

BEDFORD LEVEL, a portion of the great fen districts in the eastern counties, drained in the early part of the 17th century by the earl of Bedford, aided by the celebrated Dutch engineer, sir Cornelius Vermuyden, amid great opposition; see *Levels*.

BEDLAM, see *Bethlehem*.

BEDOUINS, wandering tribes of Arabs, living on the plunder of travellers, &c. They profess a form of Mahomedanism, and are governed by sheikhs. They are said to be descendants of Ishmael, and appear to fulfil the prophecy respecting him, *Gen.* xvi. 12, 1911 B.C.

BEEF-EATERS, see *Battle-axe*.

BEEF-STEAK SOCIETY, the members of which dine together in a room behind the Lyceum theatre, was founded in 1735 by John Rich, patentee of Covent-garden theatre, and George Lambert, the scene-painter, in whose work-room the society originated. Beef-steak clubs existed in 1709 and 1733.

BEER, see *Ale, Porter, Victuallers*.

BEES. Mount Hybla, on account of its odoriferous flowers, thyme, and abundance of honey, has been poetically called the "empire of bees." Hymettus, in Attica, was also famous for its bees and honey. The economy of bees was admired in the earliest ages; and Enmelus, of Corinth, wrote a poem on bees, 741 B.C. There are 292 species of the bee or *apis* genus, and 111 in England. Bees were first introduced into Boston, New England, by the English in 1670, and have since spread over the whole continent. Mandeville's satirical "Fable of the Bees" appeared in 1723. Huber published his observations on bees in 1792. The Apiarian Society had an establishment at Muswell Hill, near London (1860-2). The Ligurian variety of the honey-bee was successfully introduced into England in 1860.

BEES', ST., Cumberland. A monastery was founded here by St. Bega, 650; a grammar school by abp. Grindall, 1583; a clerical training college by bp. Law, 1817.

BEE-TROOT is of recent cultivation in England. *Beta vulgaris*, red beet, is used for the table as a salad. Margraff first produced sugar from the *white* beet-root in 1747. M. Achard produced excellent sugar from it in 1799; and the chemists of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. 60,000 tons of sugar, about half the consumption, are now manufactured in France from beet. It is also largely manufactured in other countries. A refinery of sugar from beet-root has been erected at the Thames bank, Chelsea.

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. In modern times severe laws have been passed against them. In 1572, by 14 Eliz. c. 5, sturdy beggars were ordered to be "grievously whipped and burnt through the right ear;" punished capitally for the 3rd offence. By the Vagrant Act (1824), 5 Geo. IV. c. 83, all public beggars are liable to a month's imprisonment. About 30,000 tramps in England and Wales. *Judicial statistics*, 1865. See *Poor Laws* and *Mendicity Society*. The "BEGGAR'S OPERA," by John Gay, a satire against the government of sir Robert Walpole, was produced at the Lincoln's-inn-fields theatre, 1727, and had a run of 63 nights; see *Gueux*.

BEGUINES, a congregation of nuns first established at Liege, and afterwards at Nivelles, in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive. Some of these nuns imagined that they could in this life arrive at impeccability. The council of Vienne condemned this error, and abolished a branch of the order in 1311. They still exist in Germany and Belgium, acting as nurses to the sick and wounded, &c.

BEHEADING, the *Decollatio* of the Romans, introduced into England from Normandy (as a less ignominious mode of putting high criminals to death) by William the Conqueror, 1076, when Waltheof, earl of Huntingdon, Northampton, and Northumberland, was first so executed. Since then this mode of execution became frequent, particularly in the reigns of Henry VIII. and Mary, when even women of the noblest blood thus perished.*

BEHISTUN, in Persia. At this place is a rock containing important inscriptions in three languages, in cuneiform (or wedge-shaped) characters, which were deciphered and

* Lady Jane Grey was beheaded Feb. 12, 1554. The venerable countess of Salisbury was executed 27 May, 1541. Wh-n directed to lay her head on the block, she refused to do it: saying that she knew of no guilt, and would not submit to die like a criminal. The executioner pursued her round the scaffold, aiming at her hoary head, and at length took it off, after mangling the neck and shoulders in a horrifying manner. She was daughter of George, duke of Clarence. *Hume*.

translated by sir H. Rawlinson in 1844-6, and published in the Journal of the Royal Asiatic Society. Each paragraph commences with "I am Darius the Great King."

BEHRING'S STRAIT, discovered by captain Vitus Behring, a Danish navigator in the service of Russia. He thus proved that the continents of Asia and America are distant from each other about thirty-nine miles, 1728. He died at Behring's island in 1741. In 1788 captain James Cook accurately surveyed the coast of both continents.

BELFAST, capital of Ulster, N. Ireland. Its castle, supposed to have been built by John de Courcy, was destroyed by the Scots under Edward Bruce, 1315; see *Orange*.

BELGIUM, late the southern portion of the kingdom of the Netherlands, and anciently the territory of the Belgæ, who were finally conquered by Julius Cæsar, 51 B.C. Its size is about one-eighth of Great Britain. Its government is a liberal constitutional monarchy, founded in 1831. For previous history, see *Flanders, Netherlands, and Holland*. The population, 31 Dec. 1862, was, 4,836,566; 1865, 4,984,451.

KINGS.

1831. Leopold, † first king of the Belgians; born 16 Dec. 1790; inaugurated 21 July, 1831, at . . . "

* This treaty arose out of the conference held in London on the Belgian question; by the decision of which, the treaty of 15 Nov. 1831, was maintained, and the pecuniary compensation of sixty millions of francs offered by Belgium for the territories adjudged to Holland, was declared inadmissible.

† At the revolution in 1830, the Roman Catholic clergy lost the administration of the public charities, which they have struggled to recover ever since. In April, 1857, M. Decker, the head of the ministry, brought in a bill for this purpose; the principle of which was carried. This led, however, to so much agitation, that the ministry were compelled to withdraw the bill, and eventually to resign.

‡ Leopold married, in May, 1816, the princess Charlotte of Wales, daughter of the prince regent, afterwards George IV. of England; she died in childhood, 6 Nov. 1817.

BELGIUM, *continued.*

Brussels; married 9 Aug. 1832, Louise, eldest daughter of Louis Philippe, king of the French; (she died 11 Oct. 1850). He died 10 Dec. 1865.

1865. Leopold II., son; born 9 April, 1835; married archduchess Maria of Austria, 22 Aug., 1853.

Heir. Leopold Ferdinand, born 12 June, 1859.

BELGRADE, an ancient city in Serbia, on the right bank of the Danube. It was taken from the Greek emperor by Solomon, king of Hungary, in 1086; gallantly defended by John Huniades against the Turks, under Mahomet II., July to Sept. 1456, when the latter was defeated with the loss of 40,000 men. Belgrade was taken by sultan Solyman, 1521, and retaken by the Imperialists in 1688, from whom it was again taken by the Turks, 1690. It was besieged in May, 1717, by prince Eugene. On 5 Aug. of that year, the Turkish army, 200,000 strong, approached to relieve it, and a sanguinary battle was fought at Peterwaradein, in which the Turks lost 20,000 men; after this battle Belgrade surrendered. In 1739 it was ceded to the Turks, after its fine fortifications had been demolished. It was retaken in 1789, and restored at the peace of Reichenbach, in 1790. The Servian insurgents had possession of it in 1806. In 1815 it was placed under prince Milosch, subject to Turkey. The fortifications were restored in 1820. On 19 June, 1862, the Turkish pacha was dismissed for firing on the town during a riot. University established by private munificence, 1863. The fortress was surrendered by the Turks to the Servians about Aug. 1867; see *Servia*.

BELGRAVIA, the south-western district of the metropolis, built between 1826 and 1852 upon land belonging to the marquis of Westminster, who is also viscount Belgrave.

BELL, BOOK, AND CANDLE: in the Romish ceremony of excommunication (*which see*), the bell is rung, the book is closed, and candle extinguished; the effect being to exclude the excommunicated from the society of the faithful, divine service, and the sacraments. Its origin is ascribed to the 8th century.

BELL-ROCK LIGHTHOUSE, nearly in front of the Frith of Tay, one of the finest in Great Britain; it is 115 feet high, is built upon a rock that measures 427 feet in length and 200 feet in breadth, and is about 12 feet under water.* It was erected in 1806-10; it is provided with two bells for hazy weather.

BELLAIR, in north America. The town was attacked by the British forces under sir Peter Parker, who, after an obstinate engagement, were repulsed with considerable loss; their gallant commander was killed 30 Aug. 1814.

BELLEISLE, an isle on the south coast of Brittany, France, erected into a duchy for marshal Belleisle, in 1742, in reward of his military and diplomatic services, by Louis XV. Belleisle was taken by the British forces under commodore Keppel and general Hodgson, after a desperate resistance, 7 June, 1761, but was restored to France, in 1763.

BELLES-LETTRES or **POLITE LEARNING**, see *Academies*, and *Literature*.

BELLMEN, appointed in London to proclaim the hour of the night before public clocks became general, were numerous about 1556. They were to ring a bell at night and cry "Take care of your fire and candle, be charitable to the poor, and pray for the dead."

BELLOWS. Anacharsis, the Scythian, is said to have been the inventor of them, about 569 B.C.; to him is also ascribed the invention of tinder, the potter's wheel, anchors for ships, &c. Bellows were not used in the furnaces of the Romans. The production of the great leviathan bellows of our foundries (suggested by the diminutive domestic bellows) must have been early, but we cannot trace the time; see *Blowing-Machines*.

BELLS were used among the Jews, Greeks, and Romans. The responses of the Dodonaean oracle were in part conveyed by bells. *Strabo*. The monument of Porsenna was decorated by pinnacles, each surmounted by bells. *Pliny*. Said to have been introduced by Paulinus, bishop of Nola, in Campagna, about 400; and first known in France in 550. The army of Clothaire II., king of France, was frightened from the siege of Sens by the ringing of the bells of St. Stephen's church. The second excerption of our king Egbert commands every priest, at the proper hours, to sound the bells of his church. Bells were used in churches by order of pope John IX., about 900, as a defence, by ringing them, against thunder and lightning. First cast in England by Turketel, chancellor of England, under Edmund I. His successor improved the invention, and caused the first tuneable set to be put up at Croyland abbey, 960. *Stow*. The celebrated "Song of the Bell," by Schiller (died 1805), has been frequently translated. The following list is that given by Mr. E. Beckett Denison in his discourse on bells at the Royal Institution, 6 March, 1857.

* Upon this rock, tradition says, the abbots of the ancient monastery of Aberbrothock fixed a bell (the Incheape bell) in such a manner that it was rung by the impulse of the sea, thus warning mariners of their impending danger. Tradition also tells us that this apparatus was carried away by a Dutchman, who was afterwards lost upon the rock, with his ship and crew.

BAPTISM OF BELLS.—They were anointed and baptized in churches it is said from the 10th century. *De Fresnoy.* The bells of the priory of Little Dunmow, in Essex, were baptized by the names of St. Michael, St. John, Virgin Mary, Holy Trinity, &c., in 1501. *Weever.* The great bell of Notre Dame, of Paris, was baptized by the name of duke of Angoulême 1816. On the continent, in Roman Catholic states, they baptize bells as we do ships, but with religious solemnity. *Ashé.*

RINGING OF BELLS, in changes of regular peals, is almost peculiar to the English, who boast of having brought the practice to an art. There were formerly societies of ringers in London. *Holden.* A sixth bell was added to the peal of five, in the church of St. Michael, 1430. *Stov.* Nell Gwynne left the ringers of the bells of St. Martin's-in-the-fields money for a weekly entertainment, 1687, and many others have done the same.

BELOOCHISTAN, the ancient Gedrosia (S. Asia). The capital was taken by the British in the Afghan war, in 1839; abandoned in 1840; taken and held for a short time in 1841.

BELVIDERE EXPLOSION, see *Gumpowder* (note).

BENARES, in India, a holy city of the Hindoos, abounding in temples. It was ceded by the nabob of Oude, Asoph-ud-Dowlah, to the English in 1775. An insurrection took place here, which had nearly proved fatal to the British interests in Hindostan, 1781. The rajah, Cheyt Sing, was deposed in consequence of it, in 1783. Mr. Cherry, capt. Conway, and others, were assassinated at Benares, by vizier Aly, 14 Jan. 1799. In June, 1857, col. Neil succeeded in suppressing attempts to join the Sepoy mutiny; see *India*.

BENBURB, near Armagh (N. Ireland). Here O'Neill totally defeated the English under Monroe, 5 June, 1646. Moore says that it was "the only great victory since the days of Brian Boru, achieved by an Irish chieftain in the cause of Ireland."

BENCOOLEN (Sumatra). The English East India company made a settlement here which preserved to them the pepper trade after the Dutch had dispossessed them of Bantam, 1682. *Anderson.* York fort was erected by the East India company, 1690. In 1693 a dreadful mortality raged here, occasioned by the town being built on a pestilent morass: among others the governor and council perished. The French, under count D'Estaing, destroyed the English settlement, 1760. Bencoolen was reduced to a residency under the government of Bengal, in 1801, and was ceded to the Dutch, in 1824, in exchange for their possessions in Malacca; see *India*.

BENDER, Bessarabia, European Russia, was the asylum of Charles XII. of Sweden, after his defeat at Pultowa by the czar Peter the Great, 8 July, 1709. The peace of Bender was concluded in 1711. Bender was taken by storm, by the Russians, in Sept. 1770; was again taken by Potemkin in 1789, and again stormed in 1809. It was restored at the peace of Jassy, but retained at the peace of 1812.

BENEDICTINES, an order of monks founded by St. Benedict (lived 480-543), who introduced the monastic life into western Europe, in 529, when he founded the monastery on Monte Casino in Campania, and eleven others afterwards. His *Regula Monachorum* (rule of the monks) soon became the common rule of western monachism. No religious order has been so remarkable for extent, wealth, and men of note and learning, as the Benedictine.

* The metal has been valued, at the lowest estimate, at 66,565*l.* Gold and silver are said to have been thrown in as votive offerings.

† The largest bell in England (named Big Ben, after sir Benjamin Hall, the then chief commissioner of works), cast at Houghton-le-Spring, Durham, by Messrs. Warner, under the superintendance of Mr. E. Becket Denison, and the rev. W. Taylor, at an expense of 3343*l.* 14*s.* 9*d.* The composition was 22 parts copper and 7 tin. The diameter was 9 ft. 5½ in.; the height 7 ft. 10½ in. The clapper weighed 12 cwt. *Rev. W. Taylor.*

‡ The bell "Big Ben" having been found to be cracked on 24 Oct. 1857, it was broken up and another bell cast with the same metal, in May, 1858, by Messrs. Mears, Whitechapel. It is rather different in shape from its predecessor, "Big Ben," and about 2 tons lighter. Its diameter is 9 ft. 6 in.; the height 7 ft. 10 in. It was struck for the first time, 18 Nov. 1858. The clapper weighs 6 cwt.—half that of the former bell. The note of the bell is E natural; the quarter-bells being G, B, E, F. On 1 Oct. 1859, this bell was also found to be cracked.

§ The clapper of St. Paul's bell weighs 180 lbs.; the diameter of the bell is 10 feet, and its thickness 10 inches. The hour strikes upon this bell, the quarters upon two smaller ones; see *Clocks*.

Among its branches the chief were the Cistercians, founded in 1098, and reformed by St. Bernard, abbot of Clairvaux, in 1116; and the Carthusians, from the Chartreux (hence Charter-house), founded by Bruno about 1084. The Benedictine order was introduced into England by Augustin, in 596; and William I. built an abbey for it on the plain where the battle of Hastings was fought, 1066; see *Battle-Abbey*. William de Warrenne, earl of Warrenne, built a convent at Lewes, in Sussex, in 1077. "At Hammersmith is a nunnery, whose inmates are denominated Benedictine dames." *Leigh*. Of this order it is reckoned that there have been 40 popes, 200 cardinals, 50 patriarchs, 116 archbishops, 4600 bishops, 4 emperors, 12 empresses, 46 kings, 41 queens, and 3600 saints. Their founder was canonised. *Baronius*. The Benedictines have taken little part in politics, but have produced many valuable works: especially the congregation of St. Maur, who published the celebrated *l'Art de Vérifier les Dates*, in 1750, and edited many ancient authors.

BENEFICE (literally a good deed or favour), or **FIEF**. Clerical benefices originated in the 12th century, when the priesthood began to imitate the feudal lay system of holding lands for performing certain duties: till then the priests were supported by alms and oblations at mass. Vicarages, rectories, perpetual curacies, and chaplaincies, are termed benefices, in contradistinction to dignities, bishoprics, &c. A rector is entitled to all the tithes; a vicar, to a small part or to none.—All benefices that should become vacant in the space of six months, were given by pope Clement VII. to his nephew, in 1534. *Notitia Monastica*. An act for the augmentation of poor benefices, by the sale of some of those in the presentation of the lord chancellor, was passed in 1863.

BENEFIT OF CLERGY, see *Clergy*. **BENEFIT SOCIETIES**, see *Friendly Societies*.

BENEVENTUM (now Benevento), an ancient city in South Italy, said to have been founded by Diomedes the Greek, after the fall of Troy. Pyrrhus of Macedon, during his invasion of Italy, was totally defeated near Beneventum, 275 B.C. Near it was erected the triumphal arch of Trajan, A.D. 114. Benevento was formed into a duchy by the Lombards, 571. At a battle fought here, 26 Feb. 1266, Manfred, king of Sicily, was defeated and slain by Charles of Anjou, who thus became virtually master of Italy. The castle was built 1323; the town was nearly destroyed by an earthquake, 1688, when the archbishop, afterwards pope Benedict XIII., was dug out of the ruins alive, and contributed to its subsequent rebuilding, 1703. It was seized by the king of Naples, but restored to the pope on the suppression of the Jesuits, 1773. Talleyrand de Périgord, Bonaparte's arch-chancellor, had the title of prince of Benevento conferred upon him. Benevento was taken by the French, 1798, and restored to the pope in 1814.

BENEVOLENCES (Aids, Free Gifts, actually Forced Loans) appear to have been claimed by our Anglo-Saxon sovereigns. Special ones were levied by Edward IV. 1473, by Richard III. 1485 (although a statute forbidding them was enacted in 1484), by Henry VII. 1492; and by James I. in 1613, on occasion of the marriage of the princess Elizabeth with the king of Bohemia. In 1615 Oliver St. John, M.P., was fined 5000*l.*, and chief justice Coke disgraced, for severely censuring such modes of raising money. Benevolences were declared illegal by the bill of rights, Feb. 1689.

BENGAL, chief presidency of British India, containing Calcutta, the capital. Its governors were delegated by the sovereigns of Delhi, till 1340, when it became independent. It was added to the Mogul empire by Baber, about 1529; see *India* and *Calcutta*.

BENZOLE, a compound of hydrogen and carbon, discovered by Faraday in oils (1825), and by C. B. Mansfield in coal tar (1849), the latter of whom unfortunately died in consequence of being severely burnt while experimenting on it (25 Feb. 1855). Benzole has become useful in the arts. Chemical research has produced from it *aniline* (*which see*), the source of the celebrated modern dyes, mauve, magenta, &c., and others.

BEOWULF, an ancient Anglo-Saxon epic poem, describing events which probably occurred in the middle of the 5th century, and supposed to have been written subsequent to 597. An edition by Kemble was published in 1833. It has been translated by Kemble, Thorpe, and Wackerbath.

BERBICE (British Guiana, S. America), settled by the Dutch, 1626, who surrendered it to the British, 23 April, 1796, and 22 Sept. 1803; and finally in 1814.

BERENGARIANS, followers of Berengarins, archdeacon of Angers, who about 1049 opposed the Romish doctrine of transubstantiation or the real presence in the Lord's supper. Several councils of the church condemned his doctrine. After much controversy he recanted about 1059, and died grieved and wearied in 1088.

BERESINA, a river in Russia, crossed by the French main army after its defeat by the Russians, 25-29 Nov. 1812. The French lost upwards of 20,000 men, and their retreat was attended by great calamity and suffering.

BERG (W. Germany), on the extinction of the line of its counts, in 1348, was incorporated with Juliers. Napoleon I. made Murat grand-duke in 1806. The principal part is now held by Prussia.

BERGEN (in Germany), BATTLE OF, between the French and allies, the latter defeated, 13 April, 1759.—(In HOLLAND). The allies under the duke of York were defeated by the French, under gen. Brune, with great loss, 19 Sept. 1799. In another battle, fought 2 Oct. same year, the duke gained the victory over Brune; but on the 6th, the duke was defeated before Alkmaer, and on the 20th entered into a convention, by which his army was exchanged for 6000 French and Dutch prisoners in England.

BERGEN-OP-ZOOM, in Holland. This place, whose works were deemed impregnable, was taken by the French, 16 Sept. 1747, and again in 1795. An attempt made by the British under general sir T. Graham (afterwards lord Lynedoch), to carry the fortress by storm, was defeated; after forcing an entrance, their retreat was cut off, and a dreadful slaughter ensued; nearly all were cut to pieces or made prisoners, 8 March, 1814.

BERGERAC, France. Here the earl of Derby defeated the French, in 1344, and here a treaty of peace between the Catholics and Protestants, establishing liberty of conscience, was signed 17 Sept. 1577. It was only temporary.

BERKELEY CASTLE, Gloucestershire, was begun by Henry I. in 1108, and finished in the next reign. Here Edward II. was cruelly murdered by the contrivance of his queen Isabella (a princess of France), and her paramour, Mortimer, earl of March, 21 Sept. 1327. Mortimer was hanged at the Elms, near London, 29 Nov. 1330; and Edward III. confined his mother in her own house at Castle Rising, near Lynn, in Norfolk, till her death.

BERLIN (capital of Prussia, in the province of Brandenburg), alleged to have been founded by the margrave Albert the Bear, about 1163. Its five districts were united under one magistracy, in 1714; and it was subsequently made the capital of Prussia. It was taken by an army of Russians and Austrians in 1760; but they were obliged to retire in a few days. Establishment of the Academy of Sciences 1702; of the University 1810. On 27 Oct. 1806, after the battle of Jena (14 Oct.), the French entered Berlin; and from this place Napoleon issued the famous *Berlin decree* or interdict against the commerce of England, 20 Nov. It declared the British islands to be in a state of blockade, and ordered all Englishmen found in countries occupied by French troops to be treated as prisoners of war. On 5 Nov. 1808, Napoleon entered into a convention with Prussia, by which he remitted to Prussia the sum due on the war-debt, and withdrew many of his troops to reinforce his armies in Spain. The railway to Magdeburg was opened 10 Sept. 1841. The first constituent assembly was held here on 21 June, 1842. An insurrection commenced here in March 1848, and Berlin was declared in a state of siege, 12 Nov. 1848. The continuation of this state was declared to be illegal without its concurrence by the lower chamber, 25 April, 1849. A treaty of peace between Prussia and Saxony, was signed on 21 Oct. 1866; see *Prussia*.

BERLIN WORK, see *Embroidery*.

BERMUDAS or SOMERS' ISLES a group in the North Atlantic ocean, discovered by Joao Bermudas, a Spaniard, in 1522 or 1527, but not inhabited until 1609, when sir George Somers was cast away upon them. They were settled by a stat. 9 James I. 1612. Among the exiles from England during the civil war, was Waller, the poet, who wrote, while resident here, a poetical description of the islands. There was an awful hurricane here, 31 Oct. 1780, and by another, a third of the houses was destroyed, and the shipping driven ashore, 20 July, 1813. Governor, sir Fred. E. Chapman, 1867.

BERNAL COLLECTION of articles of taste and virtue, formed by Ralph Bernal, Esq., many years chairman of committees of ways and means in the house of commons. He died 26 Aug. 1854. The sale in March, 1856, lasted 31 days, and enormous prices were given. The total sum realised was 62,680*l.* 6*s.* 8*d.*

BERNARD, MOUNT ST., so called from a monastery founded on it by Bernardine Menthon in 962. Velan, its highest peak, is about 8000 feet high, covered with perpetual snow. Hannibal, it is said, conducted the Carthaginians by this pass into Italy (218 B.C.); and by the same route, in May, 1800, Bonaparte led his troops to Italy before the battle of

Marengo, 14 June. On the summit of Great St. Bernard is a community of monks, who entertain travellers.

BERNARDINES or **WHITE MONKS**, a strict order of Cistercian monks, established by St. Bernard, of Clairvaux, about 1115. He founded many monasteries.

BERNE, the sovereign canton of Switzerland, joined the Swiss League 1352; the town Berne was made a free city by the emperor Frederick, May, 1218; it successfully resisted Rudolph of Hapsburg, 1288. It surrendered to the French under general Brune, 12 April, 1798. The town has bears for its arms, and some of these animals are still maintained on funds specially provided for the purpose. It was made capital of Switzerland, 1848.

BERRY (the ancient *Biturigum regis*), central France, held by the Romans since the conquest by Cæsar (58-50 B.C.) till it was subdued by the Visigoths; from whom it was taken by Clovis in A.D. 507. It was erected into a duchy by John in 1360, and was not incorporated into the royal domains till 1601.

BERSAGLIERI, the sharpshooters of the Sardinian army, first employed about 1848.

BERWICK-ON-TWEED, a fortified town on the north-east extremity of England, the theatre of many bloody contests while England and Scotland were two kingdoms; it was claimed by the Scots because it stood on their side of the river. It was annexed to England in 1333; and after having been taken and retaken many times, was finally ceded to England in 1482. In 1551 it was made independent of both kingdoms. The town surrendered to Cromwell in 1648, and afterwards to general Monk in 1659. Since the union of the crowns (James I. 1603), the strong fortifications have been much neglected.

BESSARABIA, a frontier province of European Russia, part of the ancient Dacia. After being possessed by the Goths, Huns, &c., it was conquered by the Turks in 1474, and ceded to Russia in 1812.

BESSEMER STEEL, see *Steel*.

BETHLEHEM (Syria) now contains a large convent, enclosing, as is said, the very birth-place of Christ; a church erected by the empress Helena, in the form of a cross, about 325; a chapel, called the Chapel of the Nativity, where they pretend to show the manger in which Christ was laid; another, called the Chapel of Joseph; and a third, of the Holy Innocents. Bethlehem is much visited by pilgrims.—The Bethlehemite monks existed in England in 1257.

BETHLEHEM HOSPITAL (so called from having been originally the hospital of St. Mary of Bethlehem), a royal foundation for the reception of lunatics, incorporated by Henry VIII. in 1547. The old Bethlehem Hospital, Moorfields, erected in 1675, pulled down in 1814, was built in imitation of the Tuileries at Paris. The present hospital in St. George's-fields was begun April, 1812, and opened in 1815. In 1856 extensive improvements were completed under the direction of Mr. Sydney Smirke, costing between nine and ten thousand pounds.

BETHUNE, France, an independent lordship since the 11th century, was annexed to the monarchy by the treaty of Utrecht, 1713, after several changes.

BETTING-HOUSES, affording much temptation to gaming, and consequent dishonesty, in the lower classes, were suppressed by an act passed in 1853 (16 & 17 Vict. c. 119).

BEYROUT (the ancient Berytus), a seaport of Syria, colonised from Sidon. It was destroyed by an earthquake, 566; was rebuilt, and was alternately possessed by the Christians and Saracens; and after many changes, fell into the power of Amurath IV., since when it remained with the Ottoman empire up to the revolt of Ibrahim Pacha, in 1832. The total defeat of the Egyptian army by the allied British, Turkish, and Austrian forces, and evacuation of Beyrout (the Egyptians losing 7000 in killed, wounded, and prisoners, and twenty pieces of cannon), took place 10 Oct. 1840. Sir C. Napier was the English admiral engaged. Beyrout suffered greatly in consequence of the massacres in Syria in May 1860. In Nov. 1860 above 27,000 persons were said to be in danger of starving; see *Syria*.

BHOOTAN, a country north of Lower Bengal, with whom a treaty was made 25 April, 1774. After fruitless negotiations, Bhootan was invaded by the British in Dec. 1864, in consequence of injurious treatment of an envoy; see *India*, 1864-5.

BHURTPORE (India), capital of Bhurtpore, was besieged by the British, 3 Jan. 1805, and attacked five times up to 21 March, without success. The fortress was taken by general Lake, after a desperate engagement with Holkar, the Mahratta chief, 2 April, 1805. This defeat led to a treaty, by which the rajah of Bhurtpore agreed to pay twenty lacs of rupees, ceded territories that had been granted to him, and delivered his son as hostage, 17 April, 1805. On the rajah's death, during a revolt against his son, Bhurtpore was taken by storm, by lord Combermere, 18 Jan. 1826; see *India*.

BIANCHI (Whites), a political party at Florence, in 1300, in favour of the Ghibelines or imperial party, headed by Vieri de' Cerchi, opposed the Neri (or Blacks), headed by Corso de' Donati. The latter banished their opponents, among whom was the poet Dante, in 1302.

BIARCHY. When Aristodemus, king of Sparta, died, he left two sons, twins, Eurysthene and Procles; and the people not knowing to whom precedence should be given, placed both upon the throne, and thus established the first biarchy, 1102 B.C. The descendants of each reigned alternately for 800 years. *Herodotus*.

BIARRITZ, a bathing-place, near Bayonne. Here resided the comtesse de Montijo and her daughter Engénie, now empress of the French, till her marriage, 29 Jan. 1853; since when it has been frequently visited by the emperor and empress.

BIBERACH (Wurtemberg). Here Moreau twice defeated the Austrians,—under Latour, 2 Oct. 1796, and under Kray, 9 May, 1800.

BIBLE (from the Greek *biblos*, a book), the name especially given to the Holy Scriptures. The Old Testament is said to have been collected and arranged by Ezra between 458 and 450 B.C. The Apocrypha are considered as inspired writings by the Roman Catholics, but not by the Jews and Protestants; * see *Apocrypha*.

The most ancient copy of the *Hebrew* Scriptures existed at Toledo, called the Codex Hillel; it was of very early date, probably of the 4th century after Christ, some say about 60 years before Christ. The copy of Ben Asher, of Jerusalem, was made about 1100.

The oldest copy of the Old and New Testament in *Greek*, is that in the Vatican, which was written in the 4th or 5th century, and published in 1586. The next in age is the Alexandrian Codex (referred to the 5th century) in the British Museum, presented by the Greek patriarch to Charles I. in 1628. It has been printed in England, edited by Woide and Baber, 1786—1821.—Codex Ephraemi, or Codex Regius, ascribed to the 5th century, in the Royal Library, Paris; published by Tischendorf in 1843.

The *Hebrew* Psalter was printed at Bologna in 1477. The complete *Hebrew* Bible was first printed by Soncino in Italy in 1488, and the *Greek* Testament (edited by Erasmus) at Rotterdam, in 1516. Aldus's edition was printed in 1518; Stephens' in 1546; and the *textus receptus* (or received text) by the Elzevirs in 1624.

TRANSLATIONS.

The Old Testament, in *Greek*, termed the Septuagint (*which see*), generally considered to have been made by order of Ptolemy Philadelphus, king of Egypt, about 286 or 285 B.C.; of this many fabulous accounts are given.

Origen, after spending twenty-eight years in collating MSS., commenced his *polyglot* Bible at Casarea in A.D. 231; it contained the *Greek* versions of Aquila, Symmachus, and Theodotion, all made in or about the 2nd century after Christ.

The following are ancient versions:—*Syriac*, 1st or 2nd century; the old *Latin* version, early in the 2nd century, revised by Jerome, in 384; who, however, completed a new version in 405, now called the *VULGATE*, (*which see*); the first edition was printed (without date) about 1456; the first dated 1462;—*Coptic*, 2nd or 3rd century; *Ethiopic*, *Armenian*, 4th or 5th century; *Slavonic*, 9th century; and the *Meso-Gothic*, by Ulfilas, the apostle of the Goths, about 360, a manuscript copy of which, called the Codex Argenteus, is at Upsal. The Psalms were translated into *Saxon* by bishop Aldhelm, about 706; and the Gospels by bishop

* In April, 1865, was published a proposal for raising a fund for exploring Palestine in order to illustrate the Bible by antiquarian and scientific investigation. The first meeting was held 22 June, 1865, the archbishop of York in the chair; see *Palestine*.

† The division of the Bible into chapters has been ascribed to archbishop Lanfranc in the 11th, and to archbishop Langton in the 13th, century; but T. Hartwell Horne considers the real author to have been cardinal Hugo de Saucto Caro, about the middle of the 13th century. The division into sections was commenced by Rabbi Nathan (author of a Concordance), about 1445, and completed by Athras, a Jew, in 1661. The present division into verses was introduced by the celebrated printer, Robert Stephens, in his *Greek* Testament (1551) and in his *Latin* Bible (1556-7).

The British and Foreign Bible Society continue to make and print translations of the Bible in all the dialects of the world; see *Polyglot*.

BIBLE DICTIONARIES. The most remarkable are Calmet's "Dictionary of the Bible," 1722-8; Kitto's "Cyclopaedia of Biblical Literature," 1843; and Smith's "Dictionary of the Bible," 1860; see *Concordances*. †

BIBLE SOCIETIES. Among the principal and oldest societies which have made the dissemination of the Scriptures a collateral or an exclusive object, are the following:—

Society for Promoting Christian Knowledge	1698	Sunday School Society	1785
Society for Propagating the Gospel in Foreign Parts	1701	French Bible Society	1792
Society in Scotland, for Promoting Christian Knowledge	1709	British and Foreign Bible Society, §	1804
Society for Promoting Religious Knowledge among the Poor, 1750; Naval and Military Bible Society	1780	Hibernian Bible Society	1806
		City of London Auxiliary Bible Society	1812
		A bull from the Pope against Bible Societies appeared in	1817

BIBLIA PAUPERUM (the Bible for the poor), consisting of engravings illustrating scripture history, with texts, carved in wood, a "block book," printed early in the 15th century, was compiled by Bonaventura, general of the Franciscans, about 1260. A facsimile was published by J. Russell Smith, in 1859.

† He was strangled at Antwerp in 1536, at the instigation of Henry VIII. and his council. His last words were, "Lord, open the king of England's eyes!" 14 editions of his Testament had then been published.

‡ An "Index to the Persons, Places, and Subjects occurring in the Holy Scriptures," compiled by B. Vincent, editor of the present work, is sold by the queen's printers.

§ This society had issued 24,247,667 copies of the Bible or parts of it up to Jan. 1851; in May, 1863, the number had risen to 43,044,334; and in 1867 to 52,669,089. In 1857 they published a catalogue of their library, which contains a large number of remarkable editions of the Bible. The foundation-stone of their new Central hall was laid by the prince of Wales, 11 June, 1866.

BIDASSOA. The allied army under lord Wellington, having driven the French from Spain, effected the passage of this river 8 Oct. 1813, and entered France.

BIDDENDEN MAIDS. A distribution of bread and cheese to the poor takes place at Biddenden, Kent, on Easter Sundays, the expense being defrayed from the rental of twenty acres of land, the reputed bequest of the Biddenden maids, two sisters named Chalkhurst.*

BIGAMY. The Romans branded the guilty party with an infamous mark; and in England the punishment, formerly, was death. An act respecting it was passed 5 Edw. I. 1276. *Viner's Statutes.* Declared to be felony, without benefit of clergy, 1 James I. 1603. Punishable as larceny, 35 Geo. III. 1794; by imprisonment or transportation.

BIG BETHEL (Virginia, U.S.). On 10 June, 1861, the Federals were defeated in an attack on some Confederate batteries at this place.

BILBOA (N.E. Spain), founded about 1300; was taken by the French in 1795. It was delivered from the Carlists by Espartero, assisted by the British, 24 Dec. 1836.

BILL OF EXCEPTIONS. The still existing right of tendering such a bill to a judge, either to his charge, his definition of the law, or to other errors of the court, at a trial between parties, was provided by the 2nd statute of Westminster, 13 Edw. I. 1284.

BILL OF PAINS, &c.; see *Queen Caroline's Trial*. **BILL OF RIGHTS, &c.**, see *Rights*.

BILLIARDS. The French ascribe their invention to Henrique Devigne, an artist, about 1571. Slate billiard tables were introduced in England in 1827.

BILLINGSGATE, the fish-market in London, is said to have derived its name from Belinus Magnus, a British prince, the father of king Lud, 400 B.C., but Stow thinks from a former owner. *Mortimer*. It was the old port of London, and the customs were paid here under Ethelred II., A.D. 979. *Stow*. Billingsgate was made a free market, 1699. *Chamberlain*. Fish by land-carriage, as well as seaborne, now arrives daily here. In 1849, the market was extended and improved, and a new one was erected in 1852, Mr. Bunning, architect.

BILLS OF EXCHANGE were invented by the Jews as a means of removing their property from nations where they were persecuted, 1160. *Anderson*. Bills are said to have been used in England, 1307. The only legal mode of sending money from England, 4 Richard II. 1381. Regulated, 1698; first stamped, 1782; duty advanced, 1797; again, June, 1801; and since. It was made capital to counterfeit bills of exchange in 1734. In 1825, the year of disastrous speculations in bubbles, it was computed that there were 400 millions of pounds sterling represented by bills of exchange and promissory notes. The present amount is not supposed to exceed 50 millions. The many statutes regarding bills of exchange were consolidated by act 9 Geo. IV. 1828. An act regulating bills of exchange passed 3 Vict. July, 1839. Great alterations were made in the law on the subject by 17 & 18 Vict. c. 83 (1854), and 18 & 19 Vict. c. 67 (1855).

BILLS OF MORTALITY FOR LONDON. These bills were first compiled by order of Cromwell, about 1538, 30 Hen. VIII., but in a more formal and recognised manner in 1603, after the great plague of that year. No complete series of them has been preserved. They have been superseded by the weekly returns of the registrar-general, since 1837. The following show the numbers at decennial periods:—

* Tradition states they were born joined together by the hips and shoulders, in 1100, and lived to the age of thirty-four, and died within six hours of each other. Cakes, bearing a corresponding impression of the figures of two females, are given. Hasted deems this tale fabulous, and states that the print on the cakes is of modern origin, and that the land was given by two maiden ladies named Preston. In 1656, Wm. Horner, the rector, was non-suited in an attempt to add the lands termed "Bread and Cheese lands" to his glebe; see *Siamese Twins*.

BINARY ARITHMETIC, that which counts by twos, for expeditiously ascertaining the property of numbers, and constructing tables, was invented by Baron Leibnitz of Leipsic, the celebrated statesman, philosopher, and poet, about 1703. For the *Binary theory* in chemistry, see *Compound Radical*. *Moreri*.

BINOMIAL ROOT, in Algebra, composed of only two parts connected with the signs *plus* or *minus*; a term first used by Recorda, about 1550, when he published his Algebra. The celebrated *binomial theorem* of Newton was first mentioned in 1688. *Hutton*.

BIOGRAPHY (from the Greek *bios*, life, and *graphō*, I write), defined as history teaching by example. The book of *Genesis* contains the biography of the patriarchs; and the Gospels that of Christ. Plutarch wrote the Lives of Illustrious Men; Cornelius Nepos, Lives of Military Commanders; and Suetonius, Lives of the Twelve Cæsars (all three in the first century after Christ); Diogenes Laërtius, Lives of the Philosophers (about 205).—Boswell's Life of Johnson (published in 1790) is the most remarkable English biography.

BIOLOGY, a name given to the science of life and living things, by Treviranus, of Bremen, in his work on Physiology, published 1802-22. Biology includes zoology, anthropology, and ethnology (*which see*). Herbert Spencer's "Principles of Biology," published 1865-67.

BIRCH TREE. The black (*Betula nigra*), brought from North America, 1736. The birch tree known as the *Betula pumila*, introduced into Kew-gardens, England, by Mr. James Gordon, from North America, 1762. The tree known as the *Birch* is now largely cultivated in all the countries of Europe. *Hardy's Annals*.

BIRDS were divided by Linnaeus into six orders (1735); by Blumenbach, into eight (1805); and by Cuvier, into six (1817). The most remarkable works are those published by John Gould, F.R.S.; they are to consist of about 31 folio volumes of coloured plates, &c. They include the birds of Europe, Asia, Australia, and Great Britain, besides monographs on the humming-birds, &c.

BIRKENHEAD (Cheshire), a modern town on the Mersey, opposite to Liverpool. The great dock here was projected by Mr. John Laird, constructed by Mr. Rendell, and opened in Aug. 1847 by lord Morpeth. In 1861 Birkenhead was made a parliamentary borough, and Mr. Laird was elected first representative. Population in 1831, 200; in 1861, 51,649; see *Wrecks*, 1852.

BIRMAN EMPIRE or **EMPIRE OF AVA**, see *Burmese Empire* and *India*.

BIRMINGHAM, formerly Bromwicham and Brummegem (Warwickshire), existed in the reign of Alfred, 872; and belonged to the Bermengehams, at Domesday survey, 1086. There were "many smythes" here in the time of Henry VIII. (*Leland*), but its great importance commenced in the reign of William III. It has been styled "the toyshop of Europe."

BIRTHS. The births of children were taxed in England, viz., birth of a duke 30*l.*, of a common person 2*s.*, 7 Will. III. 1695. Taxed again, 1783. The instances of four children at a birth are numerous; but it is recorded that a woman of Konisberg (3 Sept. 1784),

and the wife of Nelson, a tailor, of Oxford-market, London (Oct. 1800), had five children at a birth; see *Bills of Mortality and Registers*. The queen usually presents a small sum of money to a poor woman giving birth to three or more children at one time.

BISHOP (Greek *episcopos*, overseer), a name given by the Athenians to those who had the inspection of the city. The Jews and Romans had also like officers. St. Peter, styled the first bishop of Rome, was martyred 65. The episcopate became an object of contention about 144. The title of pope was anciently assumed by all bishops, and was exclusively claimed by Gregory VII. (1073-85).

BISHOPS IN ENGLAND * were coeval with the introduction of Christianity. The see of London is said to have been founded by Lucius, king of Britain, 179.

 Church Temporalities Act, for reducing the number of bishoprics in Ireland, 3 & 4 Will. IV. c. 37, passed 14 Aug. 1833

[By this statute, of the four archbishoprics of Armagh, Dublin, Tuam, and Cashel, the last two were to be abolished on the decease of the then archbishops which has since occurred; and it was enacted that eight of the then eighteen bishoprics should, as they became void, be henceforth united to other sees, which was accomplished in 1850: so that the Irish church establishment at present consists of two archbishoprics and ten bishops.]

BISHOPS IN SCOTLAND were constituted in the 4th century. Episcopacy was abolished in 1638; restored by Charles II. 1661; again abolished, 1689. ||

* Bishops have the titles of *Lord* and *Right Rev. Father in God*. The archbishops of Canterbury and York, taking place of all dukes, have the title of *Grace*. The bishops of London, Durham, and Winchester have precedence of all bishops; the others rank according to seniority of consecration.

† *Retirement of Bishops*. In 1856 the bishops of London and Durham retired on annuities. The new bishops held their sees subject to future provision. In 1857 the bishop of Norwich also resigned.

‡ An order in council, Oct. 1833, directed the sees of Bangor and St. Asaph to be united on the next vacancy in either, and Manchester, a new see, to be created thereupon: this order, as regarded the union of the sees, was rescinded 1846.

§ The sees of Bristol and Gloucester were united, 1856.

|| Bishop Rose connected the established episcopal church of Scotland with that form of it which is now merely tolerated, he having been bishop of Edinburgh from 1687 till 1720, when, on his death, Dr. Fullarton became the first post-revolution bishop of that see. Fife (now St. Andrew's, so called in 1844) now unites the bishopric of Dunkeld (re-instituted in 1727) and that of Dunblane (re-instituted in 1731). Ross (of

BISHOPS, AMERICAN. The first was Samuel Seabury, consecrated bishop of Connecticut by four nonjuring prelates, at Aberdeen, in Scotland, 14 Nov. 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, 4 Feb. 1787, and the bishop of Virginia in 1790. Several American bishops formed part of the Pan-Anglican synod, at Lambeth, 24-27 Sept. 1867. The first *Roman Catholic* bishop of the United States was Dr. Carroll of Maryland, in 1780.

BISHOPS, COLONIAL, &c.* By 15 and 16 Vict. c. 52 (1852), and 16 and 17 Vict. c. 49 (1853), the colonial bishops may perform all episcopal functions in the United Kingdom, but have no jurisdiction.

BISMUTH was recognised as a distinct metal by Agricola, in 1529. It is very fusible and brittle, and of a yellowish white colour.

BISSEXTILE, see *Calendar* and *Leap Year*.

BITHYŒIA, a province in Asia Minor, previously called *Bebricia*, is said to have been invaded by the Thracians under Bithynus, son of Jupiter, who gave it the name of Bithynia. It was subject successively to the Assyrians, Lydians, Persians, and Macedonians. Most of the cities were rebuilt by Grecian colonists.

* Between 1847 and 1859, Miss Burdett-Coutts gave 60,000*l.* to endow colonial bishoprics. In 1866 she petitioned parliament, on account of some of the bishops professing independence of the church of England. Since then, colonial bishops have been appointed without intervention of the civil power. Much discussion took place in 1867, through the deposition of Dr. Colenso, bishop of Natal, by his metropolitan, Dr. Gray, bishop of Capetown, and the attempts of the latter to consecrate a new bishop, in opposition to the law; see under *Africa*, and *Church of England*.

down plantations, killing deer, &c. By this act, sending anonymous letters demanding money, &c., was made felony.

BLACK ASSIZE, see under *Oxford*.

BLACK BOOK* (*Liber Niger*), a book kept in the exchequer, which received the orders of that court. It was published by Hearn in 1728.

BLACKBURN, Lancashire, so called in Domesday-book. The manufacture of a cloth called Blackburn cheque, carried on in 1650, was superseded by Blackburn greys. In 1767, James Hargreaves, of this town, invented the spinning-jenny, for which he was eventually expelled from the country. About 1810 or 1812, the townspeople availed themselves of his discoveries, and engaged largely in the cotton manufacture, now their staple trade.

BLACK DEATH, see *Plagues*, 1340 and 1866. BLACK FRIARS, see *Dominicans*.

BLACKFRIARS BRIDGE, London. The first stone was laid 31 Oct. 1760, and it was completed by Mylne, in 1770. It was the first work of the kind executed in England, in which arches, approaching to the form of an ellipsis, were substituted for semicircles. It was repaired in 1834, 1837, 1840. Since 1850 the bridge gradually sank. The old bridge was pulled down: and a temporary one opened for use in 1864. The foundation stone of the new bridge (erected according to a design by Mr. J. Cubitt) was laid by the lord mayor, Hale, 20 July, 1865. The first railway train (London, Chatham, and Dover) entered the city of London over the new railway bridge, Blackfriars, 6 Oct. 1864.

BLACK FRIDAY, 11 May, 1866, the height of the commercial panic in London, through the stoppage of Overend, Gurney, & Co. (limited), on 10 May.

BLACKHEATH, Kent, near London. Here Wat Tyler and his followers assembled 12 June, 1381; and here also Jack Cade and his 20,000 Kentish men encamped, 1 June, 1450; see *Tyler* and *Cade*. Here the Cornish rebels were defeated and Flannock's insurrection quelled, 22 June, 1497. The cavern, on the ascent to Blackheath, the retreat of Cade, and the haunt of banditti in the time of Cromwell, was re-discovered in 1780.

BLACK-HOLE, see *Calcutta*.

BLACK LEAD, see *Graphite*.

BLACK LETTER, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469; Pliny's Natural History being then printed in the new characters.

BLACK-MAIL, a compulsory payment for protection of cattle, &c, made in the border counties, was prohibited by Elizabeth in 1601. It was exacted from the lowlanders by the highlanders, till 1745. It rendered agricultural improvement almost impossible.

BLACK MONDAY, Easter Monday, 6 April, 1351, "when the hailstones are said to have killed both men and horses, in the army of our king Edward III. in France." *Bailey*. "This was a memorable Easter Monday, which in the 34th of Edward III. happened to be full dark of mist and hail, and so cold that many men died on their horses' backs with the cold," 1351. *Stow*. In Ireland, Black Monday was the day on which a number of the English were slaughtered at a village near Dublin, in 1209.

BLACK MONEY, base money.

BLACK MONKS, see *Dominicans*.

BLACK ROD has a gold lion at the top, and is carried by the usher of the Order of the Knights of the Garter (instituted 1349), instead of the mace. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords and acts as their messenger to the commons.

BLACK SEA, THE EUXINE (Pontus Euxinus of the Ancients), a large internal sea between the S.W. provinces of Russia and Asia Minor, connected with the sea of Azoff by the straits of Yenikalé, and with the sea of Marmora by the channel of Constantinople. This sea was much frequented by the Greeks and Italians, till it was closed to all nations by the Turks after the fall of Constantinople in 1453. The Russians obtained admission by the treaty of Kainardji, 10 July, 1774. In 1779 it was partially opened to British and other traders, since which time the Russians gradually obtained the preponderance. It was entered by the British and French fleets, 3 Jan. 1854, at the requisition of the Porte, after the destruction of the Turkish fleet at Sinope by the Russians, 30 Nov. 1853. A dreadful storm in this sea raged from 13 to 16 Nov. 1854, and caused great loss of life and shipping, and valuable stores for the allied armies. See *Russo-Turkish War*. By the treaty of 1856 the Black Sea was opened to the commerce of all nations.

BLACKS, see *Bianchi*.

* A book was kept in the English monasteries, wherein details of the scandalous enormities practised in religious houses were entered for the inspection of visitors, under Hen. VIII. 1535, in order to blacken them and hasten their dissolution: hence possibly the phrase, "I'll set you down in the black book."

BLACKWALL (London), the site of fine commercial docks and warehouses. See *Docks*. The Blackwall railway was opened to the public, 4 July, 1840; the eastern terminus being at Blackwall wharf, and the western in Fenchurch-street.

BLACK WATCH, armed companies of the loyal clans (Campbells, Monros, &c.) employed to watch the Highlands from about 1725 to 1739, when they were formed into the celebrated 42nd regiment, which was formally enrolled "The Royal Highland Black Watch." Their removal probably facilitated the outbreak in 1745. They wore dark tartans, and hence were called *Black Watch*.

BLACKWATER, BATTLE OF, in Ireland, 14 Aug. 1598, when the Irish chief O'Neal defeated the English under sir Henry Bagnall. Pope Clement VIII. sent O'Neal a consecrated plume, and granted to his followers the same indulgence as to crusaders.

BLADENSBURG, see *Washington*, 1814.

BLANK VERSE, see *Verse*.

BLANKETEERS. A number of operatives who on 30 March, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. See *Derby*. Eventually the ringleaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKETS are said to have been first made at Bristol by Thos. Blanket, in the 14th century.

BLASPHEMY was punished with death by the law of Moses (*Lev. xxiv.*) 1491 B.C.; and by the code of Justinian, A.D. 529. It is punishable by the civil and canon law of England, regulated by 60 Geo. III. c. 8 (1819). Daniel Isaac Eaton was tried and convicted in London of blasphemy, 6 March, 1812. Robert Taylor, a protestant clergyman, was tried twice for the same crime. He was sentenced to two years' imprisonment, and largely fined, July, 1831. In Dec. 1840, two publishers of blasphemous writings were convicted.

BLAZONRY. Bearing coats-of-arms was introduced and became hereditary in France and England about 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. *Dugdale*.

BLEACHING was known in Egypt, Syria, India, and Gaul. *Pliny*. An improved chemical system was adopted by the Dutch, who introduced it into England and Scotland in 1768. There are large bleach-fields in Lancashire, Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dumbarton. The application of the gas chlorine to bleaching is due to Berthollet about 1785. Its combination with lime (as chloride of lime) was devised by Mr. Tennant, of Glasgow, who took out a patent for the process in 1798, and by his firm it is still extensively manufactured. In 1822 Dr. Ure published an elaborate series of experiments on this substance. In 1860 bleaching and dyeing works were placed under the regulations of the Factories Act.

BLenheim, or Blindheim, in Bavaria, the site of a battle fought 2 Aug. (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria. The latter were defeated with the loss of 27,000 killed, and 13,000 prisoners (including Tallard). Bavaria became the prize of the conquerors. The British nation gave Marlborough the honour of Woodstock and hundred of Wotton, and erected for him the house of Blenheim.*

BLIND. The first public school for the blind was established by Valentine Haüy, at Paris in 1784. The first in England was at Liverpool, in 1791; in Scotland, at Edinburgh, in 1792; and the first in London in 1799. Printing in raised or embossed characters for the use of the blind was begun at Paris by Haüy in 1786. The whole Bible was printed at Glasgow in raised Roman characters about 1848. A sixpenny magazine for the blind, edited by the rev. W. Taylor, F.R.S., so eminent for his forty years' exertions on behalf of these sufferers, was published in 1855-6. He aided the establishment of a college for the blind of the upper classes at Worcester, in 1866. There is hardly any department of human knowledge in which blind persons have not obtained distinction.† Laura Bridgman, born in

* On 5 Feb. 1861, a fire broke out at this place, which destroyed the "Titian Gallery" and the pictures; the latter, a present from Victor Amadeus, king of Sardinia, to John, the great duke of Marlborough.

† James Holman, the "*blind traveller*" (born 1786, died 1857), visited almost every place of note in the world. His travels were published in 1825. In April, 1858, a blind clergyman, rev. J. Sparrow, was elected chaplain to the Mercers' Company, London, and read the service, &c., from embossed books. Viscount Cranbourne (blind) was the author of many interesting historical essays. He died in June, 1865. On 13 July, 1865, Henry Fawcett, the blind professor of political economy at Cambridge, was elected M.P. for Brighton.

1829, became dumb and blind two years after; she was so well taught by Dr. Howe, of Boston, U.S., as to become an able instructor of blind and dumb persons. By the census of 1851, there were in Great Britain, 21,487 blind persons, 11,273 males; 10,214 females: about one blind in 975.

BLINDING, by consuming the eyeballs with lime or scalding vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. A whole army was deprived of their eyes, by Basil, in the 11th century. See *Bulgarians*. Several of the eastern emperors had their eyes torn from their heads.

BLISTERS, used by Hippocrates (460-357 B.C.), made, it is said, of cantharides (*which see*).

BLOCKADE is the closing an enemy's ports to all commerce; a practice introduced by the Dutch about 1584. The principle recognised by the European powers is that every blockade, in order to be binding, must be effective. The Elbe was blockaded by Great Britain, 1803; the Baltic, by Denmark, 1848-49 and 1864; the gulf of Finland by the Allies, 1854; and the ports of the Southern States of North America by president Lincoln, April 19, 1861. See *Orders in Council*, and *Berlin*.

BLOCK BOOKS, see *Printing*.

BLOCKS employed in the rigging of ships were much improved in their construction by Walter Taylor, about 1781. In 1801, Mark I. Brunel invented a mode of making blocks which was put into operation in 1808, and in 1815 was said to have saved the country 20,000*l.* a year.

BLOIS, France, the Roman *Blesæ*. The count Guy II. sold it with his domains to Louis duke of Orleans in 1391, and eventually it accrued to the crown. The states-general were held here 1576 and 1588, on account of the religious wars; and here Henry duke of Guise was assassinated by order of the king, Henry III., 23 Dec. 1588. The empress Maria Louisa retired here in 1814.

BLOOD. The circulation of the blood through the lungs was known to Michael Servetus, a Spanish physician, in 1553. Cæsalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, or Father Paolo (real name Peter Sarpi), discovered the valves which serve for the circulation; but the honour of the positive discovery of the circulation belongs to William Harvey, between 1619 and 1628. *Freind*.

EATING BLOOD was prohibited to Noah, *Gen. ix.*, to the Jews, *Lev. xvii.*, &c., and to the Gentile converts by the apostles at an assembly at Jerusalem, A.D. 52, *Acts xv.*

BLOOD-DRINKING was anciently tried to give vigour to the system. Louis XI., in his last illness, drank the warm blood of infants, in the vain hope of restoring his decayed strength, 1483. *Hénault*. In the 15th century an opinion prevailed that the declining vigour of the aged might be repaired by

TRANSFUSING into their veins **THE BLOOD** of young persons. It was countenanced in France by the physicians about 1668, and prevailed for many years, till the most fatal effects having ensued, it was suppressed by an edict. It was attempted again in France in 1797, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. *Med. Journ.* "An English physician (Louver, or Lower) practised in this way; he died in 1691." *Freind*.

BLOOD'S CONSPIRACY. Blood, a discarded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, intending to hang him, and had got him to Tyburn, when he was rescued by his friends, 4 Dec. 1670. Blood afterwards, in the disguise of a clergyman, attempted to steal the regal crown from the Jewel-office in the Tower, 9 May, 1671; yet, notwithstanding these and other offences, he was not only pardoned, but had a pension of 500*l.* per annum settled on him by Charles II. 1671. He died in 1680, when in prison for a libel on the duke of Buckingham.

"**BLOODY ASSIZES**," held by Jeffreys in the west of England, in Aug. 1685, after the defeat of the duke of Monmouth in the battle of Sedgemoor. Upward of 300 persons were executed after short trials; very many were whipped, imprisoned, and fined; and nearly 1000 were sent as slaves to the American plantations.

BLOOMER COSTUME, see a *note* to article *Dress*.

BLOOMSBURY GANG, a cant term applied to an influential political party in the reign of George III., in consequence of their meeting at Bloomsbury house, the residence of the duke of Bedford, the chief; the marquess of Stafford, the last survivor, died 26 Oct. 1803.

BLOREHEATH (Staffordshire), where 23 Sept. 1459, the earl of Salisbury and the Yorkists defeated the Lancastrians, whose leader, lord Audley, was slain with many Cheshire gentlemen. A cross commemorates this conflict.

BLOWING-MACHINES, the large cylinders, used in blowing-machines, were erected by Mr. Smeaton at the Carron iron works, 1760. One equal to the supply of air for forty forge fires was erected at the king's dock-yard, Woolwich. The *hot-air blast*, a most

important improvement, causing great economy of fuel, was invented by Mr. James B. Neilson, of Glasgow, and patented in 1828. He died 18 Jan. 1865.

BLOW-PIPE. An Egyptian using one is among the paintings on the tombs at Thebes. It was employed in mineralogy, by Andrew Von Swab, a Swede, about 1733, and improved by Wollaston and others. In 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newman's improved blow-pipes, in 1816, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. The best work on the blow-pipe is by Plattner and Muspratt, 1854.

BLUE was the favourite colour of the Scotch covenanters in the 16th century. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "Edinburgh Review," first published in 1802. The Prussian blue dye was discovered by Diesbach, at Berlin, in 1710. Fine blues are now obtained from coal-tar, 1864; see *Aniline*. **BLUE-COAT SCHOOLS**, so called in reference to the costume of the children. The Blue-coat school in Newgate-street, London, was instituted by Edward VI. in 1552; see *Christ's Hospital*. **BLUE-STOCKING**, a term applied to literary ladies, was originally conferred on a society comprising both sexes (1760, *et seq.*). Benjamin Stillingfleet, the naturalist, an active member, wore blue worsted stockings; hence the name. The beautiful Mrs. Jerningham is said to have worn blue stockings at the *conversaciones* of lady Montagu.

BLUMENAU, Lower Austria; on 22 July, 1866, the Austrians in possession of this place were attacked by the Prussians on their march towards Vienna, a severe conflict was interrupted by the news of the armistice agreed to at Nikolsburg; and the same evening Austrians and Prussians bivouacked together.

BOATS. Flat-bottomed boats, made in England in the reign of William I.; again brought into use by Barker, a Dutchman, about 1690; see *Life-Boat*. A mode of building boats by the help of the steam-engine was invented by Mr. Nathan Thompson of New York in 1860, and premises were erected for its application at Bow, near London, in 1861; see *University*.

BOCCACCIO'S DECAMERONE, a collection of a hundred stories or novels (many very immoral), severely satirising the clergy, feigned to have been related in ten days, during the plague of Florence in 1348. Boccaccio lived 1313—75. A copy of the first edition (that of Valdarfer, in 1471) was knocked down at the duke of Roxburgh's sale, to the duke of Marlborough, for 2260*l.*, 17 June, 1812. This copy was afterwards sold by public auction, for 875 guineas, June 5, 1819.

BODLEIAN LIBRARY, Oxford, founded in 1598, and opened in 1602, by sir Thos. Bodley (died, 28 Jan. 1612). It is open to the public, and claims a copy of all works published in this country. For rare works and MSS. it is said to be second only to the Vatican.

BEOTIA, a division of Greece, north of Attica, known previously as Aonia, Messapia, Hyantis, Ogygia, and Cadmeis. Thebes, the capital, was celebrated for the exploits and misfortunes of its kings and heroes. The term Beotian was used by the Athenians as a synonym for dullness; but unjustly,—since Pindar, Hesiod, Plutarch, Democritus, Epaminondas, and Corinna, were Beotians. The early dates are conjectural; see *Thebes*.

BOGS, probably the remains of forests, covered with peat and loose soil. An act for the drainage of Irish bogs, passed March, 1830. The bog-land of Ireland has been estimated at

3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1849, Mr. Rees Reece took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London.

BOGOTÀ, SANTA FÈ DE, capital of New Grenada (*which see*).

BOHEMIA, formerly the Hercynian forest (Boiemum, *Tacitus*), derives its name from the Boii, a Celtic tribe. It was governed by dukes (Bozivoi the first, 891) till Ottocar assumed the title of king, 1198. The kings at first held their territory from the empire, but at length threw off the yoke: and the crown was elective till it came to the house of Austria, in which it is now hereditary. The original Bohemians term themselves Czechs, and, following the example of Hungary, now call for *autonomy*. Prague, the capital, is famous for sieges and battles. Population in 1857, 4,705,525; see *Prague*.

BOHEMIAN BRETHREN, a body of Christians in Bohemia, appear to have separated from the Calixtines (*which see*), a branch of the Hussites in 1467. Dupin says "They rejected the sacraments of the church, were governed by simple laics, and held the scriptures for their only rule of faith. They presented a confession of faith to king Ladislas in 1504 to justify themselves from errors laid to their charge." They appear to have had communication with the Waldenses, but were distinct from them. Luther in 1533, testifies to their purity of doctrine, and Melancthon commends their severe discipline. They were doubtless dispersed during the religious wars of Germany in the 17th century.

BOII, a Celtic people of N. Italy, who emigrated into Italy, and were defeated at the Vadimonian lake, 283 B.C. They were finally subdued by Scipio Nasica, 191 B.C.

BOILING OF LIQUIDS. Dr. Hooke, about 1683, ascertained that liquids were not increased in heat after they had once begun to boil, and that a fierce fire only made them boil more rapidly. The following boiling points have been stated:—

Ether	94° Fahr.	Nitric acid	187° Fahr.	Oil of turpentine.	312° Fahr.
Alcohol	173 "	Sulphuric acid	600 "	Sulphur	822 "
Water	212 "	Phosphorus	554 "	Mercury	662 "

BOILING TO DEATH, made a capital punishment in England, by stat. 22 Hen. VIII., 1531, repealed in 1547. This act was occasioned by seventeen persons having been poisoned by Richard Roose, otherwise Coke, the bishop of Rochester's cook, two of whom died. Margaret Davy, a young woman, suffered in the same manner for a similar crime, 28 March, 1542. *Stow*.

BOIS-LE-DUC, Dutch Brabant, the site of a battle between the British and the French republican army, in which the British were defeated, and forced to abandon their position

and retreat to Schyndel, 14 Sept. 1794. This place was captured by the French, 10 Oct. following; it surrendered to the Prussian army, under Bulow, in Jan. 1814.

BOKHARA, the ancient Sogdiana, after successively forming part of the empires of Persia, of Alexander, and of Bactriana, was conquered by the Turks in the 6th century, by the Chinese in the 7th, and by the Arabs about 705. After various changes of masters it was subdued by the Uzbek Tartars, its present possessors, in 1505. The British envoys, colonel Stoddart and captain Conolly, were murdered at Bokhara, the capital, by the khau, in 1843. In the war with Russia, begun in 1866, the emir's army was defeated several times in May, and seq. Peace was made 11 July, 1867.

BOMARSUND, a strong fortress on one of the Aland isles in the Baltic sea, taken by sir Charles Napier, commander of the Baltic expedition, aided by the French military contingent under general Baraguay d'Hilliers, 16 Aug. 1854. The governor Bodisco, and the garrison, about 2000 men, became prisoners. The fortifications were destroyed.

BOMBAY, the most westerly and smallest of our Indian presidencies, was visited by the Portuguese in 1509, and acquired by them in 1530. It was given (with Tangier in Africa, and 300,000*l.* in money) to Charles II. as the marriage portion of the infanta Catherine of Portugal, 1662. In 1668, it was granted to the East India company, who had long desired it, "in free and common socage," as of the manor of East Greenwich, at an annual rent of 10*l.* Confirmed by William III. 1689. The two principal castes at Bombay are the Parsees (descendants of the ancient Persian fire-worshippers) and the Borahs (sprung from early converts to Islamism). They are both remarkable for commercial activity.

BOMBS (iron shells filled with gunpowder), said to have been invented at Venlo, in

1495, and used by the Turks at the siege of Rhodes in 1522. They came into general use in 1634, having been previously used only by the Dutch and Spaniards. Bomb-vessels were invented in France in 1681. *Voltaire*. The *shrapnel* shell is a bomb filled with balls, and a lighted fuse to make it explode before it reaches the enemy; a thirteen-inch bomb-shell weighs 198 lbs.

BONDAGE, see *Villanage*.

BONES. The art of softening bones was discovered about 1688, and they were used in the cutlery manufacture, &c., immediately afterwards. The declared value of the bones of cattle and of other animals, and of fish (exclusive of whale-fins) imported into the United Kingdom from Russia, Prussia, Holland, Denmark, &c., amounts annually to more than 300,000*l.* (in 1851 about 32,000 tons). Bone-dust has been extensively employed in manure since the publication of Liebig's researches in 1840.

BONE-SETTING cannot be said to have been practised scientifically until 1620. *Bell*.

BONHOMMES, hermits of simple and gentle lives, appeared in France about 1257; in England about 1283. The prior of the order was called *le bon homme*, by Louis VI.

BONN, a town on the Rhine (the Roman Bonna) was in the electorate of Cologne. It has been frequently besieged, and was assigned to Prussia in 1814. The academy founded by the elector in 1777, made a university, 1784; abolished by Napoleon; re-established and enlarged 1818. Here Albert, our late prince consort, was entered as a student, May 1837.

BOOK (Anglo-Saxon, *boe*; German, *buch*). Books were originally made of boards, or the inner bark of trees: afterwards of skins and parchment. Papyrus, an indigenous plant, was adopted in Egypt. Books with leaves of vellum were invented by Attalus, king of Pergamus, about 198 B.C., at which time books were in volumes or rolls. The MSS. in Herulanæum consist of papyrus, rolled and charred and matted together by the fire, and are about nine inches long, and one, two, or three inches in diameter, each being a separate treatise. The most ancient books are the Pentateuch of Moses and the poems of Homer and Hesiod. The first PRINTED BOOKS (see *Printing*) were printed on one side only, the leaves being pasted back to back.

Books of astronomy and geometry were ordered to be destroyed in England as being infected with magic, 6 Edw. VI. *Stow* . . . 1552
2032 volumes of new works, and 773 of new editions, were published in London in . . . 1839
3359 new works, and 1159 new editions, exclusive of 908 pamphlets, were published in . . . 1852
3553 volumes were published in . . . 1864
In Paris, 6,445 volumes were published in 1842; and 7350 in 1851. See *Bibliography*.

PRICES OF BOOKS.—Jerome (who died 420) states that he had ruined himself by buying a copy of the works of Origen. A large estate was given by Alfred for a book on cosmography, about 872. The *Roman de la Rose* was sold for about 30*l.*; and a homily was exchanged for 200 sheep and five quarters of wheat. Books frequently fetched double or treble their weight in gold. They sold at prices varying from 10*l.* to 40*l.* each in 1400. A copy of *Macklin's Bible*, ornamented by Mr. Tomkins, was declared worth 500 guineas. *Butler*. A yet more superb copy was insured in a London office for 3000*l.* See *Boccaccio's Decamerone*.

BOOK-BINDING.—The book of St. Cuthbert, the

earliest ornamental book, is supposed to have been bound about . . . 650
A Latin Psalter, was bound in oak boards, the 9th century.
A MS. copy of the four Evangelists, the book on which our kings from Henry I. to Edward VI. took their coronation oath, was bound in oaken boards, nearly an inch thick . . . 1100
Velvet was the covering in the 14th century; and silk soon after. Vellum was introduced early in the 15th century; it was stamped and ornamented about . . . 1520
Leather came into use about the same time.
The rolling machine, invented by Mr. Wm. Burr, was substituted for the beating-hammer, and gas stoves began to take the place of the charcoal fires used to heat the gilder's finishing tools . . . about 1830
Cloth binding superseded the common boards generally about . . . 1831
Caoutchouc, or India-rubber, backs to account-books and large volumes, were introduced in 1841
BOOK-HAWKING SOCIETIES (already in Scotland) begun in England in 1851 by archdeacon Wigram (since bishop of Rochester). The hawkers vend moral and religious books in a similar manner to the French colporteurs.

BOOK-KEEPING. The system by double-entry, called originally Italian book-keeping, was taken from the course of Algebra published by Burgo, in the 15th century, at Venice. John Gowghe, a printer, published a treatise "on the keepyng of the famous reconyng . . . Debitor and Creditor," London, 1543. This is our earliest work on book-keeping. James Peele published his *Book-keeping* in 1569. John Mellis published "A Briefe Instruction and Manner how to Keepe Bookes of Accompts," in 1588. Improved systems were published by Benjamin Booth in 1789 and by Edw. Thos. Jones in 1821 and 1831.

BOOK OF SPORTS, see *Sports*.

BOOKSELLERS, at first migratory like hawkers, became known as *stationarii*, from

their practice of having booths or stalls at the corners of streets and in markets. They were long subject to vexatious restrictions, from which they were freed in 1758.*

BOOTHIA FELIX, a large peninsula, the N.W. point of America, discovered by sir John Ross in 1830, and named after sir Felix Booth, who had presented him with 20,000*l.* to fit out his Polar expedition. Sir Felix died at Brighton in Feb. 1850.

BOOTS, said to have been the invention of the Carians, were made of iron, brass, or leather. Leather boots were mentioned by Homer 907 B.C., and frequently by the Roman historians. A variety of forms may be seen in Fairholt's "Costume in England." An instrument of torture termed "*the boot*" was used in Scotland so late as 1690.

BORAX (Boron), known to the ancients, is used in soldering, brazing, and casting gold and other metals, and was called *chrysocolla*. Borax is produced naturally in the mountains of Thibet, and was brought to Europe from India about 1713. Homberg in 1702 discovered in borax *boracic acid*, which latter in 1808 was decomposed by Gay-Lussac, Thénard, and H. Davy, into oxygen and the previously unknown element, boron. Borax has lately been found in Saxony. It is now largely manufactured from the boracic acid found by Hœfer to exist in the gas arising from certain lagoons in Tuscany; and an immense fortune has been made by their owner M. Lardarel since 1818.

BORNOU, an extensive kingdom in central Africa, explored by Denham and Clapperton, who were sent out by the British Government in 1822. The population is estimated by Denham at 5,000,000, by Barth at 9,000,000.

BORODINO, a Russian village on the river Moskwa, near which a sanguinary battle was fought, 7 Sept. 1812, between the French under Napoleon, and the Russians under Kutusoff; 240,000 men being engaged. Each party claimed the victory; but the Russians retreated, leaving Moscow, which the French entered, 14 Sept.; see *Moscow*.

BORON, see *Borax*.

BOROUGH or **BURGH**, anciently a company of ten families living together, now such towns as send members to parliament, since the election of burgesses in the reign of Henry III. 1265. Charters were granted to towns by Henry I. 1132; which were remodelled by Charles II. in 1682-4, but restored in 1688. 22 new English boroughs were created in 1553. Burgesses were first admitted into the Scottish Parliament by Robert Bruce, 1326; and into the Irish, 1365. Acts to amend the Representation of the People in England and Wales passed 7 June, 1832, and 15 Aug. 1867; and the Act for the Regulation of Municipal Corporations, 9 Sept. 1835; see *Constituency*.

BOROUGH-BRIDGE (W. R. of York), the site of a battle between the earls of Hereford and Lancaster and Edward II., 16 March, 1322. The latter, at the head of 30,000 men, pressed Lancaster so closely, that he had not time to collect his troops together in sufficient force, and being defeated and made prisoner, was led, mounted on a lean horse, to an eminence near Pontefract, or Pomfret, and beheaded by a Londoner.

* **BOOKSELLERS' ASSOCIATION**. In 1829 a number of eminent publishers in London formed themselves into an association for the regulation of the trade, and fixed the amount of discount to be allowed, 29 Dec. 1829, and for some years restricted the retail booksellers from selling copies of works under the full publishing price. A dispute afterwards arose as to the right, maintained by the latter, to dispose of books (when they had once become theirs by purchase) at such less profit as they might deem sufficiently remunerative. The dispute was referred to lord chief justice Campbell, before whom the parties argued their respective cases, at Stratheden House, 14 April, 1852. His lordship gave judgment in effect against the association, which led to its immediate dissolution, 19 May following.

BOROUGH-ENGLISH, an ancient tenure by which the younger son inherits, is mentioned as occurring 834. It was abolished in Scotland by Malcolm III. in 1062.

BOSCOBEL, near Donington, Shropshire, where Charles II. concealed himself after his defeat at Worcester (*which see*), 3 Sept. 1651.* The "Boscobel Tracts" were first published in 1660. In 1861 Mr. F. Manning published "Views," illustrating these tracts.

BOSNIA, in European Turkey, formerly part of Pannonia, was governed by chiefs till a brother-in-law of Louis king of Hungary was made king, 1376. He was defeated by the Turks in 1389, and became their vassal. Bosnia was incorporated with Turkey in 1463. Many efforts have been made by the Bosnians to recover their independence. The last rebellion began in 1849, and was quelled by Omar Pasha in 1851.

BOSPHORUS, THRACIAN (now Channel of Constantinople). Darius Hystaspes threw a bridge of boats over this strait when about to invade Greece, 493 B.C. See *Constantinople*.

BOSPORUS (improperly **BOSPHORUS**), now called *Circassia*, near the Bosphorus Cimmerins, the straits of Kertch or Yenikalé. The history of the kingdom is involved in obscurity, though it continued for 350 years. It was named Cimmerian, from the *Cimmeri*, who dwelt on its borders, about 750 B.C.

BOSTON, a N. city in the United States, built about 1627. Here originated that resistance to the British authorities which led to American independence. The act of parliament laying duties on tea, papers, colours, &c. (passed June, 1767), so excited the indignation of the citizens of Boston, that they destroyed several hundreds of chests of tea, Nov. 1773. Boston seaport was shut by the English parliament, until restitution should be made to the East India Company for the tea lost, 25 March, 1774. The town was besieged by the British next year, and 400 houses were destroyed. A battle between the royalists and independent troops, in which the latter were defeated, took place on 17 June, 1775. The city was evacuated by the king's troops, April, 1776. The inhabitants were very zealous against slavery. An industrial exhibition was opened here in Oct. 1856, and lasted two weeks.

BOSWORTH FIELD, Leicestershire, the site of the thirteenth and last battle between the houses of York and Lancaster, 22 Aug. 1485, when Richard III. was defeated by the earl of Richmond, afterwards Henry VII., and slain. Sir Wm. Stanley at a critical moment changed sides, and thus caused the loss of the battle. It is said that Henry was crowned on the spot with the crown of Richard found in a hawthorn bush near the field.

BOTANY. Aristotle is considered the founder of the science (about 347 B.C.). *Historia Plantarum* of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the 15th century. Fuchsius, Bock, Bauhin, Cæsalpinus, and others, wrote between 1535 and 1600. The system and arrangement of the great Linnæus was made known about 1750; and Jussieu's system, founded on Tournefort's, and called "the natural system," in 1758. At Linnæus's death, 1778, the species of plants actually described amounted in number to 11,800. The number of species now recorded cannot fall short of 100,000.† J. C. London's "Encyclopædia of Plants," a most comprehensive work, first appeared in 1829. De Candolle's "Prodromus Systematis Naturalis Regni Vegetabilis" (of which Vol. I. appeared in 1818), is nearly completed (1868). An International Botanical Congress was opened in London, 23 May, 1866, professor A. de Candolle president.

* The king, disguised in the clothes of the Pendrills, remained from 4 to 6 Sept. at White Ladies; on 7 and 8 Sept. he lay at Boscobel house, near which exists an oak, said to be the scion of the Royal Oak in which the king was part of the time hidden with col. Careless. *Sharpe*.

† Robert Brown, who accompanied Flinders in his survey of New Holland in 1803, died 10 June, 1858, aged 85. He was acknowledged to be the chief of the botanists of his day (*facile princeps*).

BOTANY BAY, Australia, was discovered by captain Cook, 28 April, 1770, and took its name from the great variety of plants which abounded on the shore. It was fixed on for a colony of convicts from Great Britain. The first governor, capt. Arthur Phillip, who sailed from England in May, 1787, arrived at the settlement in Jan. 1788. The colony was eventually established at Port Jackson, about thirteen miles to the north of the bay; see *New South Wales*, and *Transportation*.

BOTHWELL BRIDGE, Lanarkshire. The Scotch covenanters, who took up arms against the intolerant government of Charles II., and defeated the celebrated Claverhouse at Drumclog, 1 June, 1679, were totally routed by the earl of Monmouth at Bothwell Bridge, 22 June, 1679, and many prisoners were tortured and executed.

BOTTLE-CONJURER. A conjurer having advertised that he would jump into a quart bottle at the Haymarket theatre, on 16 Jan. 1749, the house was densely crowded and besieged by thousands anxious to gain admittance. The rogue carried off the receipts, the pickpockets had a rich harvest, and the duped crowd nearly pulled down the edifice.

BOTTLES in ancient times were made of leather. The art of making glass bottles and drinking-glasses was known to the Romans at least before 79; for these articles and other vessels have been found in the ruins of Pompeii. Bottles were made in England about 1558. A bottle which contained two hogsheds was blown, we are told, at Leith, in Scotland, in Jan. 1747-8; see *Glass*.

BOUILLON, Belgium, formerly a duchy, was sold by Godfrey, its ruler, to Albert, bishop of Liège, to obtain funds for the crusade, 1095. It was seized by the French in 1672, and held by them till 1815, when it was given to the king of the Netherlands, as duke of Luxemburg. It was awarded to Belgium after the Revolution of 1830.

BOULOGNE, a seaport in Picardy, N. France, was taken by the British under Henry VIII. on 14 Sept. 1544, but restored at the peace, 1550. Lord Nelson attacked Boulogne, disabling ten vessels and sinking five, 3 Aug. 1801. In another attempt he was repulsed with great loss, and captain Parker of the *Medusa* and two-thirds of his crew were killed, 18 Aug. following. In 1804 Bonaparte assembled 160,000 men and 10,000 horses, and a flotilla of 1300 vessels and 17,000 sailors to invade England. The coasts of Kent and Sussex were covered with martello towers and lines of defence; and nearly half the adult population of Britain was formed into volunteer corps. It is supposed that this French armament served merely for a demonstration, and that Bonaparte never seriously intended the invasion. Sir Sidney Smith unsuccessfully attempted to burn the flotilla with fire-machines called catamarans, 2 Oct. 1804. Congreve-rockets were used in another attack, and they set the town on fire, 8 Oct. 1806. The army was removed on the breaking out of war with Austria in 1805. Louis Napoleon (now emperor) made a descent here with about 50 followers, 6 Aug. 1840, without success. On 10 July, 1854, as emperor, he reviewed the French troops destined for the Baltic, and on 5 Sept. following he entertained Prince Albert and the king of the Belgians; see *France*.

BOUNDARY COMMISSIONERS appointed by the Reform Bill, passed 15 Aug. 1867. Viscount Eversley, Russell Gurney, sir John T. B. Duckworth, sir Francis Crossley, and John Walter, first sat 16 Aug. England and Wales were divided into 18 districts, and other arrangements made.

BOUNTIES, premiums granted to the producer, exporter, or importer of certain articles; a principle introduced into commerce by the British parliament. The first granted on corn, in 1688, were repealed in 1815. They were first legally granted in England for raising naval stores in America, 1703, and have been granted on sail-cloth, linen, and other goods.

BOUNTY MUTINY, took place on board the *Bounty*, an armed ship which quitted Otaheite, with bread-fruit trees, 7 April, 1789. The mutineers put their captain, Bligh, and nineteen men into an open boat, near Annamooka, one of the Friendly Isles, 28 April, 1789; these reached the Island of Timor, south of the Moluccas, in June, after a voyage of nearly 4000 miles. Some of the mutineers were tried 15 Sept. 1792; six were condemned and three executed. For the fate of the others, see *Pitcairn's Island*.

BOURBON, HOUSE OF (from which come the royal houses of France, Spain, and Naples), derives its origin from the Archambauds, lords of Bourbon in Berry.

Robert, count of Clermont, son of Louis IX. of France, married the heiress Beatrice in 1272; died 1317; their son Louis I. created duke of Bourbon and peer of France by Charles IV. 1327
 The last of the descendants of their elder son Peter I., Susanna, married Charles, duke of Montpensier, constable of Bourbon, who, offended by his sovereign Francis I., entered into the service of the Emperor Charles V., and was killed at the siege of Rome, 6 May, 1527
 From James, the younger son of Louis I., descended Antony, duke of Vendôme, who married (1548) Jean d'Albret, daughter of Henry, king of Navarre. Their son, Henry IV. born at Pau, 23 Dec. 1553, became king of France, 31 July, 1589
 The crown of Spain was settled on a younger branch of this family, 1700, and guaranteed by the peace of Utrecht (*Rapin*) 1713

Bourbon Family Compact (a defensive alliance between France, Spain, and the Two Sicilies) concluded by M. de Choiseul). 15 Aug. 1761
 The Bourbons expelled France, 1791; restored 1814; again expelled on the return of Bonaparte from Elba, and again restored after the battle of Waterloo, 1815. The elder branch was expelled once more, in the person of Charles X. and his family, in 1830, in consequence of the revolution of the memorable days of July in that year.
 Orleans branch ascended the throne in the person of the late Louis-Philippe, as "king of the French," 9 Aug. 1830; deposed 24 Feb. 1848; and his family also was expelled.
 The Bourbon family fled from Naples, 6 Sept. 1860; and Francis II. lost his kingdom; see *France, Spain, Naples, Orleans, Parma, Condé, and Legitimists*.

BOURBON, ISLE OF (in the Indian Ocean), discovered by the Portuguese about 1545. The French are said to have first settled here in 1642. It surrendered to the British, under admiral Rowley, 21 Sept. 1809, and was restored to France in 1815. *Alison*. An awful hurricane in Feb. 1829, did much mischief. Bourbon was named "Ile de la Réunion" in 1848; see *Mauritius*.

BOURDEAUX, or BORDEAUX (W. France), was united to the dominions of Henry II. of England by his marriage with Eleanor of Aquitaine, 1151. Edward the Black Prince brought John, king of France, captive to this city after the battle of Poitiers in 1356, and here held his court eleven years: his son, our Richard II., was born at Bourdeaux, 1366. Bourdeaux finally surrendered to Charles VII. of France, 14 Oct. 1453. The fine equestrian statue of Louis XV. was erected in 1743. Bourdeaux was entered by the victorious British army after the battle of Orthes, fought 27 Feb. 1814.

BOURIGNONISTS, a sect founded by Antoinette Bourignon, who, in 1658, took the Augustine habit and travelled in France, Holland, England, and Scotland; in the last she made many converts about 1670. She maintained that Christianity does not consist in faith and practice, but in inward feeling and supernatural impulse. A disciple named Court left her a good estate. She died in 1680, and her works, 21 volumes 8vo, were published 1686.

BOURNOUS, the Arabic name of a hooded garment worn in Algeria, which has been introduced in a modified form into England and France since 1847.

BOUVINES (N. France), the site of a desperate battle, 27 July, 1214, in which Philip Augustus of France was victorious over the emperor Otho and his allies, consisting of more than 150,000 men. The counts of Flanders and Boulogne were taken prisoners.

BOWLS or BOWLING, an English game as early as the 13th century. Charles I. played at it, and also Charles II. at Tunbridge. *Grammont*.

BOW-STREET, see *Magistrates*.

BOWS AND ARROWS, see *Archery*.

BOXING, or PRIZE-FIGHTING, the *pugilatus* of the Romans, once a favourite sport with the British, who possess an extraordinary strength in the arm, which gives them superiority in battles decided by the bayonet. A century ago, boxing formed a regular exhibition, and a theatre was erected for it in Tottenham-court:—

Broughton's amphitheatre, behind Oxford-road, built 1742
 Schools opened in England to teach boxing as a science in 1790
 Mendoza opened the Lyceum in the Strand in 1791
 Boxing was much patronised from about 1820 to 1830
 John Gully, originally a butcher, afterwards a prize-fighter, acquired wealth and became M.P. for Pontefract in 1835, died 9 March, 1863
 Desperate conflict at Farnborough between Thomas Sayers, the Champion of England, a light Sussex man, about 5 feet 8 inches high, and John Heenan, the "Benecia Boy," a huge American, in height 6 feet 1 inch. Strength, however, was matched by skill;

and eventually the fight was interrupted, 17 April, 1860. Both men received a silver belt on 31 May following.
 Tom King beat Mace, and obtained the champion's belt, &c. 26 Nov. 1862
 He beat Goss, 1 Sept., and Heenan (nearly to death) 10 Dec. 1863
 A trial, in consequence of the last fight, ensued: the culprits were discharged, on promising not to offend again 5 April, 1864
 Wormald obtained the championship after a contest with Marsden 4 Jan. 1865
 Contest for championship between Mace and O'Baldwin, a giant; prevented by the arrest of Mace 15 Oct. 1867

BOXTEL (in Dutch Brabant), where the British and allied army, commanded by the duke of York, was defeated by the French republicans, who took 2000 prisoners and eight pieces of cannon, Sept. 17, 1794.

BOX-TREE, indigenous to this country, and exceedingly valuable to wood-engravers. In 1815 a large box-tree at Box-hill, Surrey, was cut down, and realised a large sum. Macculloch says, that "the trees were cut down in 1815, and produced upwards of 10,000*l.*" About 1820 the cutting of all the trees on the hill produced about 6000*l.*

BOYDELL'S LOTTERY for the Shakspeare gallery of paintings was got up in 1791 by alderman Boydell, lord mayor of London. Every ticket was sold at the time the alderman died, 12 Dec. 1804, before the decision of the wheel.

BOYLE LECTURES, instituted in 1691 by Robert Boyle (son of the great earl of Cork), a philosopher, distinguished by his genius, virtues, and benevolence. Eight lectures (in vindication of the Christian religion) are delivered at St. Mary-le-bow church, London, on the first Monday in each month, from January to May and September to November.

BOYNE, a river in Kildare, Ireland, near which William III. defeated his father-in-law, James II., 1 July, 1690. The latter lost 1500 (out of 30,000) men; the Protestant army lost about a third of that number (out of 30,000). James fled to Dublin, thence to Waterford, and escaped to France. The duke of Schomberg was killed, shot by mistake by his own soldiers as he was crossing the river, and here also was killed the rev. George Walker, who defended Londonderry, in 1689. Near Drogheda is a splendid obelisk, 150 feet in height, erected in 1736 by the Protestants of the empire in commemoration of this victory.

BOYNE, man-of-war of 98 guns, destroyed by fire at Portsmouth, 4 May, 1795, by the explosion of the magazine; numbers perished. Portions were recovered June, 1840.

BRABANT, part of Holland and Belgium, an ancient duchy, part of Charlemagne's empire, fell to the share of his son Charles. It became a separate duchy (called at first Lower Lorraine) in 959. It descended to Philip II. of Burgundy, and in regular succession to the emperor Charles V. In the 17th century it was held by Holland and Austria, as Dutch Brabant and the Walloon provinces, and underwent many changes through the wars of Europe. The Austrian division was taken by the French in 1746 and 1794. It was united to the Netherlands in 1814, but South Brabant was given to the kingdom of Belgium, under Leopold, 1830. The heir of the throne of Belgium is styled duke of Brabant; see *Belgium*.

BRACELETS were worn by the ancients, and *armillee* were Roman military rewards. Those of pearls and gold were worn by the Roman ladies.

BRADFIELD RESERVOIR, see *Sheffield*, 1864. **BRADFORD**, see *Poison*.

BRADSHAW'S RAILWAY GUIDE was first published by Mr. G. Bradshaw in Dec. 1841. He had previously published occasionally a *Railway Companion*.

BRAGANZA, a city in Portugal, gave title to Alfonso, natural son of Pedro I. of Portugal (in 1422), founder of the house of Braganza. When the nation, in a bloodless revolution in 1640, threw off the Spanish yoke, John, duke of Braganza, was called to the throne as John IV., and his descendants reign over *Portugal* and *Brazil* (*which see*).

BRAHMINS, the highest of the four castes of the Hindoos. Pythagoras is thought to have learned from them his doctrine of the *Metempsychosis*; and it is affirmed that some of the Greek philosophers went to India on purpose to converse with them. The modern Brahmins derive their name from Brahmah, one of the three beings whom God, according to their theology, created, and with whose assistance he formed the world. The modern Indian priests are still the depositaries of the sacred learning of India; see *Vedas*.

BRAINTREE CASE (in Essex), was decided in 1842 by Dr. Lushington, who determined that a minority in a parish vestry cannot levy a church rate.

BRAMHAM (W. R. York): near here the earl of Northumberland and lord Bardolf were defeated and slain by sir Thomas Rokeby, the general of Henry IV., 19 Feb. 1408; and Fairfax was defeated by the royalists under the duke of Newcastle, 29 March, 1643.

BRANDENBURG, a city in Prussia, founded by the Slavonians, who gave it the name of *Banber*, which signified *Guard of the Forest*, according to some; others explain the name as Burg, or city, of the *Brenns*. Henry I., surnamed the Fowler, after defeating the Slavonians, fortified Brandenburg, 926, as a rampart against the Huns, and bestowed the government on Sigefroi, count of Ringelheim, with the title of Margrave, or protector of the marches or frontiers. The emperor Sigismund gave perpetual investiture to Frederick IV. of Nuremberg, of the house of Hohenzollern, ancestor of the royal family of Prussia, made elector in 1417. For a list of the Margraves since 1134, see *Prussia*.

BRANDENBURG HOUSE, Hammersmith, see *Queen Caroline*.

BRANDY (German *Branntwein*, burnt wine), the spirit distilled from wine. It appears to have been known to Raymond Lully in the 13th century, and to have been manufactured in France early in the 14th. It was at first used medicinally, and miraculous cures were

ascribed to its influence. In 1852, 3,959,452, and in 1866, 5,621,930 gallons were imported into the United Kingdom. It is now largely manufactured in Britain.

BRANDYWINE, a river in N. America, near which a battle took place between the British and the revolted Americans, in which the latter (after a day's fight) were defeated with great loss, and Philadelphia fell into the possession of the victors, 11 Sept. 1777.

BRASS was known among all the early nations. *Usher*. The British from the remotest period were acquainted with its use. *Whitaker*. When Lucius Mummius burnt Corinth to the ground, 146 B.C., he found immense riches, and during the conflagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as *Corinthian Brass*. This is well doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper; and the Syriac translation of the Bible says, that Hiram made the vessels for Solomon's temple of Corinthian brass. *Du Fresnoy*. Some of the English sepulchral engraved *brasses* are said to be as old as 1277.

BRAURONIA, festivals in Attica, at Brauron, where Diana had a temple. The most remarkable that attended these festivals were young virgins in yellow gowns, dedicated to Diana. They were about ten years of age, and not under five; and therefore their consecration was called "*dekateuein*," from *deka*, ten; 600 B.C.

BRAY, THE VICAR OF. Bray, in Berks, is famous in national song for its vicar, the rev. Symon Symonds, who is said to have been twice a papist and twice a protestant—in four successive reigns—those of Henry VIII., Edward VI., Mary, and Elizabeth, between the years 1533 and 1558. Upon being called a turn-coat, he said he kept to his principle, that of "living and dying the vicar of Bray." *Fuller's Church History*. The modern song refers to the political changes of the 17th and 18th centuries.

BRAZEN BULL, traditionally said to have been contrived by Perillus, at Athens, for Phalaris, tyrant of Agrigentum, 570 B.C. It had an opening in the side to admit the victims, and a fire was kindled underneath to roast them to death; the throat was so contrived that their groans resembled the roaring of a bull. Phalaris admired the invention, but said it was reasonable the artist should make the first experiment, and ordered his execution. The Agrigentines revolted against Phalaris, cut his tongue out, and roasted him in the brazen bull, 549 B.C.

BRAZIL, an empire in South America, was discovered by Vincent Pinzon in Feb., and Pedro Alvarez de Cabral, a Portuguese, driven upon its coasts by a tempest, April, 1500. He called it the land of the Holy Cross; but it was subsequently called Brazil, on account of its red wood. The French having seized on Portugal in 1807, the royal family and nobles embarked for Brazil, and landed 7 March, 1808. The dominant religion is Roman Catholic; but others are tolerated. Population in 1867, 10,780,000; see *Portugal*.

BREAD. Ching-Noung, the successor of Fohi, is reputed to have been the first who taught men (the Chinese) the art of husbandry and the method of making bread from wheat, and wine from rice, 1998 B.C. *Univ. Hist.* Baking of bread was known in the patriarchal ages; see *Exodus* xii. 15. It became a profession at Rome, 170 B.C. After the conquest of Macedon, 148 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained the monopoly of the baking trade. During the siege of Paris by Henry IV., owing to the famine which then raged, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1594. *Hénault.* In the time of James I., barley bread was used by the poor; and now in Iceland, cod-fish, beaten to powder, is made into bread; potato-bread is used in Ireland. The London Bakers' Company was incorporated in 1307. Bread-street was once the London market for bread. Until 1302, the London bakers were not allowed to sell any in their own shops. *Stow.* Bread was made with yeast by the English bakers in 1634. In 1856 and 1857 Dr. Daughlish patented a mode of making "aërated bread," in which carbonic acid gas is combined with water and mixed with the flour, and which is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1862 a company was formed to encourage Stevens' bread-making machinery.* An act for regulating bakehouses was passed in July, 1863. We give the prices of bread in various years:—

BREAD-FRUIT TREE, a native of the South Sea islands. A vessel under captain Bligh was fitted out to convey some of these trees to various British colonies in 1789 (see *Bounty*), and again in 1791. The number taken on board at Otaheite was 1151. Some were left at St. Helena, 352 at Jamaica, and five were reserved for Kew Gardens, 1793. The tree was successfully cultivated in French Guiana, 1802.

BREAKWATERS. The first stone of the Plymouth breakwater was lowered August 12, 1812. It was designed to break the swell, and stretches 5280 feet across the sound; it is 360 feet in breadth at the bottom and more than thirty at the top, and consumed 3,666,000

* **ASSIZE OF BREAD.** The first statute for the regulation of the sale of bread was 3 John, 1203. The chief justiciary, and a baker commissioned by the king, had the inspection of the assize. *Matthew Paris.* The assize was further regulated by statute in 51 Hen. III. 1266, and 3 Anne, 1710. Bread Act, Ireland, placing its sale on the same footing as in England, 1 Vict. 1838. Bread was directed to be sold by weight in London in 1822; the statute "Assessa Panis" was repealed in 1824; and the sale of bread throughout the country was regulated in 1836.

tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half sterling. The architects were Mr. John Rennie and his son sir John. The first stone of the lighthouse on its western extremity was laid 1 Feb. 1841. Breakwaters have been constructed at Holyhead, Portland, Dover, &c.

BREAST-PLATE. One was worn by the Jewish high priest, 1491 B.C. (*Exod.* xxxix.). Goliath "was armed with a coat of mail," 1063 B.C. (1 *Sam.* xvii.) Breast-plates dwindled to the diminutive gorgets. Ancient breast-plates are mentioned as made of gold and silver.

BRECHIN, Scotland; sustained a siege against the army of Edward III., 1333. The battle of Brechin was fought between the forces of the earls of Huntly and Crawford; the latter defeated, 1452. The see of Brechin was founded by David I. in 1150. One of its bishops, Alexander Campbell, was made prelate when but a boy, 1556. The bishopric, discontinued soon after the revolution in 1688, was revived in 1731.

BREDA, Holland, was taken by prince Maurice, of Nassau, in 1590; by the Spaniards, under Spinola, in 1625; and by the Dutch, in 1637. The "*Compromise of Breda*" was a proposal to Philip II., deprecating his harsh measures in the Netherlands, presented and refused in 1566. Our Charles II. resided here at the time of the restoration, and here he issued his declaration of a free general pardon, 4 April, 1660; see *Restoration*. Breda was taken by the French in 1793. The French garrison was expelled by the burgesses in 1813.

BREECHES. Among the Greeks, this garment indicated slavery. It was worn by the Dacians, Parthians, and other northern nations; and in Italy, it is said, was worn in the time of Augustus Cæsar. In the reign of Honorius, about 394, the *braccarii*, or breeches-makers, were expelled from Rome; but soon afterwards the use of breeches was adopted in other countries, and at length became general.

BREECH-LOADERS, see under *Cannon and Firearms*.

BREHONS, ancient judges in Ireland, are said to have administered justice with religious impartiality, but in later times with a tendency to love of country. It was enacted by the statute of Kilkenny, that no English subject should submit to the Brehon laws, 40 Edw. III., 1365. These laws, however, were recognised by the native Irish till about 1650. A translation of them was proposed in 1852, and a commission appointed.

BREITENFELD, see *Leipsic*.

BREMEN (N. Germany), said to have been founded in 788, and long an archbishopric and one of the leading towns of the Hanseatic league, was allowed a seat and a vote in the college of imperial cities in 1640. In 1648 it was secularised and erected into a duchy and held by Sweden till 1712, when it was taken possession of by Denmark in 1731, by whom it was ceded to Hanover. It was taken by the French in 1757, who were expelled by the Hanoverians in 1758. Bremen was annexed by Napoleon to the French empire in 1810; but its independence was restored in 1813, and all its old franchises in 1815. It became a member of the North German Confederation in 1866. Population of the province, Dec. 1864, 104,091; see *Hanse Towns*.

BRENNEVILLE, N. W. France. Here Henry I. of England defeated Louis VI. of France, who had embraced the cause of William Clifton, son of Robert, duke of Normandy, 20 Aug. 1119.

BRENTFORD, county town of Middlesex. Here Edmund Ironside defeated the Danes, May, 1016. It was taken by Charles I., after a sharp fight, 12 Nov. 1642.

BRESCIA, N. Italy (the ancient Brixia), became important under the Lombards, and suffered by the wars of the Italian Republics, being attached to Venice. It was taken by the French under Gaston de Foix in 1512, when it is said 40,000 of the inhabitants were massacred. It surrendered to the Austrian general Haynau, 30 March, 1849, on severe terms; annexed to Sardinia in 1859.

BRESLAU, in Silesia, was burnt by the Mongols in 1241, and conquered by Frederick II. of Prussia, in Jan. 1741. A fierce battle took place here between the Austrians and Prussians, the latter under prince Bevern, who was defeated 22 Nov. 1757. Breslau was taken: but was regained, 21 Dec. the same year. It was besieged by the French, and surrendered to them Jan. 1807, and again in 1813.

BREST, a sea-port, N.W. France, was besieged by Julius Cæsar, 54 B.C.—possessed by the English, A.D. 1378—given up to the duke of Brittany, 1390. Lord Berkeley and a British fleet and army were repulsed here with dreadful loss in 1694. The magazine burnt, to the value of some millions of pounds sterling, 1744. The marine hospitals, with fifty galley slaves, burnt, 1766. The magazine again destroyed by fire, 10 July, 1784. From this great dépôt of the French navy, numerous squadrons were equipped against England during the late war, among them the fleet which lord Howe defeated on 1 June, 1794. England maintained a large blockading squadron off the harbour from 1793 to 1815; but

with little injury to France. It is now a chief naval station of that country, and from the fortifications and other vast works of late construction it is considered impregnable. The British fleet visited Brest, Aug. 1865.

BRETAGNE, see *Brittany*. BRETHREN, see *Bohemian* and *Plymouth Brethren*.

BRETIGNY, PEACE OF, concluded with France, 8 May, 1360, by which England retained Gascony and Guienne, and acquired other provinces; renounced her pretensions to Maine, Anjou, Touraine, and Normandy; was to receive 3,000,000 crowns, and to release king John, long a prisoner. The treaty not being carried out, the king remained and died in London.

BRETON, see *Cape Breton*.

BRETWALDA (wide-ruling chief), one of the kings of the Saxon heptarchy, chosen by the others as a leader in war against their common enemies. The following are mentioned by Bede (500 to 642), Ella, king of Sussex; Ceawlin of Wessex; Ethelbert of Kent; Redwald of East Anglia; Edwin, Oswald, and Oswy of Northumberland. The title was bestowed upon Egbert, 828; see *Britain*.

BREVIARY (so called as being an abridgment of the books used in the Roman Catholic Service), contains the seven canonical hours, viz.: matins or lauds (began about 3 a.m.), primes (about 6), tierce (about 9), sexte (about 12), nones (about 2 p.m.), vespers (about 4), complines (about 7). The breviary is ascribed to pope Gelasius I. about 492. It was first called the *custos*, and afterwards the breviary; came into use among the ecclesiastical orders about 1080; and was reformed by the councils of Trent and Cologne, and by Pius V., Urban VIII., and other popes. The quality of type in which the breviary was first printed gave the name to the printing type called *brevier* (in which this page is printed).

BREWERS are traced to Egypt. Brewing was known to our Anglo-Saxon ancestors. *Tindal*. "One William Murle, a rich maltman or bruer, of Duustable, had two horses all trapped with gold, 1414." *Stow*. In Oct. 1851, there were 2305 licensed brewers in England, 146 in Scotland, and 97 in Ireland; total 2548: these are exclusive of retail and intermediate brewers. There were 40,418 licensed brewers in the United Kingdom in 1858; the revenue from whom to the state was in that year 81,030*l*. In 1858 in England there were 205 great brewers; see *Alc*, *Porter*.

BRIAR'S CREEK (N. America), near which the Americans, 2000 strong, under general Ashe, were totally defeated by the English under general Prevost, 3 March, 1779.

BRIBERY forbidden, *Deut*. xvi. 19. Samuel's sons were guilty of it, 1112 B.C. (1 *Sam*. viii. 3.) Thomas de Weyland, a judge, was banished for bribery in 1288; he was chief justice of the common Pleas. William de Thorpe, chief justice of the king's bench, was hanged for bribery in 1351. Another judge was fined 20,000*l*. for the like offence, 1616. Mr. Walpole, secretary-at-war, was sent to the Tower for bribery in 1712. Lord Strangford was suspended from voting in the Irish house of lords, for soliciting a bribe, Jan. 1784.

BRIBERY AT ELECTIONS. In 1854 an important act was passed consolidating and amending previous acts relating to this offence, from 7 Will. III. (1695) to 5 & 6 Vict. c. 184.*

BRICKS were used in Babylon, Egypt, Greece, and Rome; in England by the Romans about 44. Made under the direction of Alfred the Great, about 886. *Saxon Chron*. The size regulated by order of Charles I., 1625. Taxed 1784. The number of bricks which paid duty in England in 1820 was 949,000,000; in 1830, above 1,100,000,000; in 1840, 1,400,000,000; and in 1850, 1,700,000,000. The duties and drawbacks of excise on bricks were repealed in 1850. In 1839 Messrs. Cooke and Cunningham brought out their machinery by which, it is said, 18,000 bricks may be made in ten hours. Messrs. Dixon and Corbett, near Newcastle, in 1861, were making bricks by steam at the rate of 1500 per hour. The machinery is the invention of Clayton & Co., London.

* In the case of Cooper v. Slade, it was ruled that the payment of travelling expenses was bribery, 17 April, 1858. An act passed permitting candidates to provide conveyances for voters, but forbidding payment of travelling expenses; see *Elections*.

BRIDEWELL, originally a palace of king John, near Fleet-ditch, London, was rebuilt by Henry VIII., 1522, and given to the city for a workhouse by Edward VI., 1553. The New Bridewell prison, erected in 1829, was pulled down in 1864; that of Tothill-fields was rebuilt in 1831.

BRIDGES were first of wood. The ancient stone bridges in China are of great magnitude. Abydos is famous for the bridge of boats which Xerxes built across the Hellespont, 480 B.C. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built in A. D. 105. Brotherhoods for building bridges existed in S. France about 1180.*

BRIDGEWATER, Somersetshire, was incorporated by king John, in 1200. In the war between Charles I. and the parliament, the forces of the latter reduced part of the town to ashes, 1643. Here stood an ancient castle in which the ill-advised duke of Monmouth lodged when he was proclaimed king in 1685.

BRIDGEWATER CANAL, the first great work of the kind in England, was begun by the duke of Bridgewater, styled the father of canal navigation in this country, in 1759, and opened 1761. James Brindley was the engineer. It commences at Worsley, seven miles from Manchester; and at Barton Bridge is an aqueduct which, for upwards of 200 yards, conveys the canal across the river Irwell. The length of the canal is about twenty-nine miles.

BRIDGEWATER TREATISES. The rev. Francis, earl of Bridgewater, died in April, 1829, leaving by will 8000*l.* to be given to eight persons, appointed by the president of the Royal Society, who should write an essay "on the power, wisdom, and goodness of God, as manifested in the creation." The essays (by sir Charles Bell, Drs. T. Chalmers, John Kidd, William Buckland, William Prout, Peter M. Roget, and the revs. William Whewell and William Kirby) were published 1833-35.

BRIEF, a written instrument in the Roman Catholic church, of early uncertain origin. Briefs are the letters of the pope despatched to princes and others on public affairs, and are usually written short, hence the name, and without preface or preamble, and on paper; in which particulars they are distinguished from *bulls*. The latter are ample, and are always written on parchment. Briefs are sealed with red wax and the seal of the fisherman, or St. Peter in a boat, and always in the presence of the pope. The Queen's letter authorising collections in churches for charitable purposes are called "briefs."

BRILL or **BRIEL**, Holland. A seaport, seized by the expelled Dutch confederates, became the seat of their independence. Brill, given up to the English in 1585 as security for advances made by Queen Elizabeth to Holland, was restored in 1616.

BRISSOTINS, see *Girondists*.

* The Devil's bridge in the canton of Uri, so called from its frightful situation, was built on two high rocks; and many stories have been invented to account for it. At Schaffhausen an extraordinary bridge was built over the Rhine, which is there 400 feet wide: there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it; a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. The bridge was destroyed by the French in 1799.

BRISTOL (W. England), built by Brennus, a British prince, 380 B.C., is mentioned in A.D. 430 as a fortified city. It was called Caer Oder, a city in the valley of Bath; and sometimes Caer Brito, the British city, and by the Saxons Brightstowe, pleasant place. Gildas and Nennius speak of Bristol in the 5th and 7th centuries.

BRISTOL, SEE OF, one of the six bishoprics erected by Henry VIII. out of the spoils of the monasteries and religious houses which that monarch had dissolved, 1542. The cathedral was the church of the abbey of St. Austin, founded here by Robert Fitz-Harding, son to a king of Denmark, and a citizen of Bristol, 1148. It is valued in the king's books at 33*l.* 8*s.* 4*d.* Paul Bushe, provincial of the Bons-hommes, was the first bishop, in 1542—deprived for being married, 1554. The see of Bristol was united by an order in council with that of Gloucester, in 1836, and they now form one see under the name of Gloucester and Bristol. The cathedral (under repair since 1844) was reopened in 1861.

BRITAIN (called by the Romans Britannia, † from its Celtic name Prydhain, *Camden*). The earliest records of the history of this island are the manuscripts and poetry of the Cambrians. The Celts, the ancestors of the Britons and modern Welsh, were the first inhabitants of Britain. It is referred to as the Cassiterides or tin-islands by Herodotus, 450 B.C.; as Albion and Ierne (England and Ireland) by Aristotle, 350 B.C., and Polybius, 260 B.C. Britain, including England, Scotland, and Wales, was anciently called Albion, the name of Britain being applied to all the islands collectively—Albion to only one. *Pliny*; see *Albion, England, Scotland, and Wales*.

BRITANNY, see *Brittany.*

BRITISH AMERICA (see *America*) comprises Lower and Upper Canada, Nova Scotia, New Brunswick, Newfoundland and Prince Edward's Island, Labrador, British Columbia and Vancouver's Island. Population about 3,334,000.

Delegates from the first six provinces met at Quebec on 10 Oct., and agreed to the basis of a Federal union, with the queen as the executive (represented by the governor-general), a legislative council of 96 members for life, and a house of commons of 194 members, 20 Oct. 1864.

The secretary for the colonies, Mr. Cardwell, expressed his approval of the plan, 3 Dec. 1864.

The plan was opposed by New Brunswick, 7 March, 1865.

Messrs. Cartier and Galt came to England, to advocate it, April, 1865.

Act for the union of Canada, Nova Scotia, and New Brunswick, under the name of Canada, brought into parliament by the earl of Carnarvon, 19 Feb., passed 29 March, 1867.

(The British government guaranteed a subsidy of 3,000,000*l.* to complete the interoceanic railway.)

BRITISH ASSOCIATION for the Advancement of Science, was established by sir David Brewster, sir R. I. Murchison, &c. in 1831. Professor John Phillips was secretary till 1863. It holds annual meetings; the first of which was held at York on 27 Sept. 1831. One of its main objects is “to promote the intercourse of those who cultivate science with each other.” It appoints commissions and makes pecuniary grants for scientific research; and publishes annually a volume containing Reports of the proceedings. Kew observatory was presented to the association by the Queen in 1842. Superintendents, Francis Ronalds; the first; John Walsh, 1852; Balfour Stewart, 1859.

BRITISH COLUMBIA (N. America). In June, 1858, news came to California that in April gold had been found in abundance on the mainland of North America, a little to the north and east of Vancouver's Island. A great influx of gold-diggers (in a few weeks above 50,000) from all parts was the consequence. Mr. Douglas, governor of Vancouver's Island, evinced much ability in preserving order. The territory with adjacent islands was made a British colony with the above title, and placed under Mr. Douglas. The colony was

nominated and the government settled by 21 & 22 Vict. c. 99 (Aug. 1858), and a bishop nominated in 1859.—For a dispute in July, 1859, see *United States*. The colony in 1866 was said to be flourishing; and fresh gold discoveries made.

BRITISH INSTITUTION (for the encouragement of British artists, Pall Mall, founded in 1805) opened 18 Jan. 1806, on a plan formed by sir Thomas Bernard. In the gallery (erected by alderman Boydell, to exhibit the paintings executed for his edition of Shakspeare), were annually exhibited pictures by the old masters and deceased British artists, till 1867, when the lease of the premises expired.

BRITISH LEGION, raised by lord John Hay, col. De Lacy Evans, and others to assist queen Isabella of Spain against the Carlists in 1835, defeated them at Hernani, 5 May, 1836, and at St. Sebastian's, 1 Oct.

BRITISH MUSEUM, originated with the grant by parliament (5 April, 1753) of 20,000*l.* to the daughters of sir Hans Sloane, in payment for his fine library, and vast collection of the productions of nature and art, which had cost him 50,000*l.* The library contained 50,000 volumes and valuable MSS., and 69,352 articles of virtu enumerated in the catalogue. Montagu-house was obtained by government as a place for their reception. The museum was opened 15 Jan. 1759, and has since been enormously increased by gifts, bequests, and purchases; viz. the Cottonian, Harleian, and other libraries; the Townley marbles (1805 and 1814); by the Elgin marbles (1816); the Lycian marbles, obtained by sir C. Fellows (1842-6); the Assyrian antiquities, collected by Mr. Austin Layard between 1847 and 1850; the antiquities brought from Halicarnassus (now Budrum), including remains of the celebrated tomb of Mausolus, by Mr. C. T. Newton (Nov. 1858); antiquities from Carthage (1860), Cyrene, Rhodes, and the Farnese palace (1864); and the purchase of the Blacas collection (1867). George II. presented the royal library in 1757; and in 1823, George IV. presented the library collected at Buckingham-house by George III., consisting of 65,250 volumes, and about 19,000 pamphlets. In 1846 the right hon. Thos. Grenville bequeathed to the museum his library, consisting of 20,240 volumes. Great additions to, and improvements in, the buildings have since been made, independently of the annual grant.* The fine iron railing enclosing the frontage, was completed in 1852. The magnificent reading-room, erected by Mr. Sydney Smirke, according to a plan by Mr. Antonio Panizzi, the librarian, at a cost of about 150,000*l.*, was opened to the public, 18 May, 1857. The height of the dome is 106 feet, and the diameter 140 feet. The room contains about 80,000 volumes, and accommodates 300 readers.—The daily increasing library contained in 1860 above 562,000 volumes, exclusive of tracts, MSS., &c. In 1861 the incorporation of the four library catalogues into one alphabet began—three copies being made. The Blacas collection of ancient gems, &c. (collected by the duc de Blacas, about 50 years ago) purchased for 48,000*l.* by parliamentary vote 18 Feb. 1867. The proposed separation of the antiquarian, literary, and scientific collections, was disapproved by a commission in 1860; and a bill to remove the natural history collections to South Kensington was rejected by the commons on 19 May, 1862. A refreshment room for readers was opened 21 Nov. 1864. Mr. Panizzi the librarian resigned and was succeeded by Mr. John Winter Jones, 1866.

BRITTON, an ancient treatise on English law written in French by or in the name of king Edward I. about 1291. Coke attributed the work to John le Breton, bishop of Hereford, who died in 1275. An edition of "Britton," with a translation in English by Mr. F. Nicholls, was published in 1865.

BROAD ARROW, a mark for goods belonging to the royal dockyards or navy, is said to have been ordered to be used in 1698, in consequence of robberies.

"BROAD BOTTOM" ADMINISTRATION. The Pelham administration (*which see*) was so called because it formed a coalition of parties, Nov. 1744.

BROCADE, a silken stuff, variegated with gold or silver, and enriched with flowers and figures, originally made by the Chinese; the manufacture was established at Lyons in 1757.

BROCOLI was brought to England from Italy in the 17th century.

BROKERS, both of money and merchandise, were known early in England. See *Appraisers*. They are licensed, and their dealings regulated by law in 1695-6, 1816, and 1826. The dealings of *stock-brokers*, were regulated in 1719, 1733, and 1736, and subsequently; see *Pawnbroker*, and *Barnard's Act*.

BROMINE (from the Greek *brōmos*, a stink), a poisonous volatile liquid element discovered in salt water by M. Balard in 1826. It is found in combination with metals and mineral waters, but not as yet in the free state.

BRONZE was known to the ancients, some of whose bronze statues, vessels, &c. are in the British Museum. The bronze equestrian statue of Louis XIV., 1699, in the Place Vendôme at Paris (demolished 10 Aug. 1792), the most colossal ever made; it contained 60,000 lbs. Bronze is composed of copper and tin, with sometimes a little zinc and lead. *Ure*. The present bronze coinage, penny, halfpenny and farthing (composed of 95 parts of copper, 4 tin, 1 zinc), came into circulation Dec. 1860.

BROUGHAM, a popular vehicle said to have been invented in 1839, and so named in consequence of its adoption by lord Brougham.

BROWNIAN MOTION. So called from Robert Brown, the celebrated botanist, who in 1827, by the aid of the microscope, observed in drops of dew a motion of minute particles which at first was attributed to rudimentary life, but was afterwards decided to be due to currents occasioned by inequalities of temperature and evaporation.

BROWNISTS or BARROWISTS, the first Independents (*which see*), began with Robert Brown, a schoolmaster in Southwark, about 1580. In 1592 there were said to be 20,000 Brownists. Henry Penry, Henry Barrow, and other Brownists, were cruelly executed for alleged sedition, 29 May, 1593.

BRUCE'S TRAVELS. James Bruce, the "Abyssinian Traveller," set out in June 1768, to discover the source of the Nile. Proceeding first to Cairo, he navigated the Nile to Syene, thence crossed the desert to the Red Sea, and, arriving at Jedda, passed some months in Arabia Felix, and after various detentions reached Gondar, the capital of Abyssinia, in Feb. 1770. On 14 Nov. 1770, he obtained a sight of the sources of the Blue Nile. He returned to England in 1773, and died 27 April, 1794.

BRUGES, Belgium, in the 7th century was capital of Flanders, and in the 13th and 14th centuries had become almost the commercial metropolis of the world. It suffered much through an insurrection in 1488, and the consequent repression. It was incorporated with France in 1794, with the Netherlands in 1814, and with Belgium in 1830.

BRUMAIRE REVOLUTION, see *Directory*.

BRUNANBURG (supposed by some to be near Ford, Northumberland). Anlaf, with an army of Northmen from Ireland and Constantine III. king of Scots landed at the mouth of the Humber; and were defeated with very great slaughter at Brunanburg by Athelstan 937.

BRÜNN, capital of Moravia, since 1641; was entered by the French under Murat 18 Nov. 1805; and by the Prussians 13 July, 1866.

BRUNSWICK CLUBS, established to maintain the house of Hanover and the Protestant ascendancy in church and state, began in England at Maidstone, 18 Sept. 1828; in Ireland at the Rotunda in Dublin, 4 Nov. same year. Other cities formed similar clubs.

BRUNSWICK, HOUSE OF. The duchy of Brunswick, in Lower Saxony, was conquered by Charlemagne, and governed afterwards by counts and dukes. Albert-Azzo II. marquis of Italy and lord of Este, died in 1097, and left by his wife Cunegonde (the heiress of Guelph,

duke of Carinthia in Bavaria), a son, Guelph, who was invited into Germany by Imitza, his mother-in-law, and invested with all the possessions of his wife's step-father, Guelph of Bavaria; see *Bavaria*. His descendant, Henry the Lion, married Maud, daughter of Henry II. of England, and was the founder of the Brunswick family. His dominions were very extensive; but having refused to assist the emperor Frederick Barbarossa in a war against pope Alexander III., through the emperor's resentment he was proscribed at the diet at Wurtzburg, in 1180. The duchy of Bavaria was given to Otho of Wittelsbach ancestor of the family of Bavaria; the duchy of Saxony to Bernard Ascanius, founder of the house of Anhalt; and his other territories to different persons. On this, he retired to England; but at the intercession of our Henry II. Brunswick and Lunnenburg were restored to him. The house of Brunswick in 1409 divided into several branches. Brunswick was included by Napoleon in the kingdom of Westphalia in 1806, but was restored to the duke in 1815.—Population of the duchy of Brunswick in 1858, 273,400; 1864, 293, 388.

BUCCANEERS,* piratical adventurers, chiefly French, English, and Dutch, who commenced their depredations on the Spaniards of America soon after the latter had taken possession of that continent and the West Indies. Their numbers were much increased by a twelve years' truce between the Spaniards and Dutch in 1609, when many of the discharged sailors joined the Buccaneers, and extended the range of their ravages. The first levy of ship-money in England in 1635 was to defray the expense of chastising these pirates. The principal commanders of the first Buccaneers were Montbar, Lolonois, Basco, and Morgan, said to have murdered thousands and plundered millions. The expedition of Van Horn, Ostend, was undertaken in 1603; that of Gramont in 1685; and that of Pointis in 1697.

BUCHANITES (in Scotland): followers of Mrs. Buchan, who about 1779 promised to conduct them to the new Jerusalem, prophesied the end of the world, &c. She died in 1791, when her followers dispersed.

BUCHAREST (in Wallachia). Preliminaries of peace were ratified at this place between Russia and Turkey, it being stipulated that the Pruth should be the frontier of the two empires; signed 28 May, 1812. The subsequent war between these powers altered many of the provisions of this treaty. Bucharest was occupied by the Russians, Turks, and Austrians successively in the Crimean war. The last quitted it in 1856.

BUCKINGHAM PALACE, the London residence of the sovereign. Old Buckingham-house was built on the "Mulberry-gardens," by John Sheffield, duke of Buckingham, in 1703. In 1761 it was bought by George III., who in 1775 settled it on his queen, Charlotte. She made it her town residence; and here all her children, except the eldest, were born. Here were married the duke of York and princess Frederica of Prussia, in 1791; the duke of Gloucester and princess Mary, 1816; the prince of Hesse-Homburg and princess Elizabeth, 1818; and the duke of Cambridge and princess of Hesse the same year. The house was pulled down in 1825, and the present palace commenced on its site. After an expenditure of nearly a million sterling, it was completed, and occupied by queen Victoria, 13 July, 1837. Further improvements were made in 1853. The marble arch, taken down from the exterior of this palace, was re-erected at Cumberland-gate, Hyde-park, 29 March, 1851.

BUCKLERS, used in single combat, are said to have been invented by Præetus and Acrisius of Argos, about 1370 B.C. When Lucius Papirius defeated the Samnites, he took from them bucklers of gold and silver, 309 B.C. The light cuirass of the horse-soldiers called cuirassiers is something akin to the ancient buckler.

BUCKLES were first worn instead of shoe-strings in the reign of Charles II., and soon became fashionable and expensive from the richness of their material; about 1791 they had fallen out of use. Buckles continue to be used in court dress and by persons of rank in most countries of Europe.

BUDA (or **OFEN**), the ancient Aquincum, on the W. bank of the Danube opposite Pesth, and with it, the capital of Hungary. It was taken by Charlemagne in 799; and sacked by Solyman II. after the battle of Mohatz, when the Hungarian king, Louis, was killed, and 200,000 of his subjects carried away captives, 1526. Buda was sacked a second time, when the inhabitants were put to the sword, and Hungary was annexed to the Ottoman empire, 1541. Retaken by the Imperialists, under the duke of Lorraine, and the Malometans delivered up to the fury of the soldiers, 1686. It suffered much in 1848, and was entered without resistance, by the Austrians 5 Jan. 1849. Here the emperor Francis Joseph was crowned king of Hungary, 8 June, 1867; see *Hungary*.

BUDDHISM, the religion formerly of India, and now of a large part of Asia beyond the Ganges and Japan. Buddha (also Bud, Bot, and Poot), or the Wise, flourished about 1000 or 800 B.C. The Buddhists believe that the soul is an emanation from God, and that if it continue virtuous it will return to him on the death of the body; but if not so, that it will undergo various degrees and changes of abode. Buddhism was expelled from India about A.D. 956.

BUDE LIGHT (so named from Bude in Cornwall, the residence of Mr. Goldsworthy Gurney, its inventor), consists of two or more concentric argand gas-burners, one rising above another, which produce a most brilliant flame, like the petals of a rose. The illuminating powers were increased by subjecting manganese, &c., to the action of the flame, in order to produce oxygen and hydrogen gas. This light was patented 1839 and 1841.

* Raynal asserts that the name is derived from a Caribbee word *boucan*, signifying the place where the native savages dried their food by smoke; a custom necessarily adopted by the pirates from their mode of life.

English chancellor of exchequer's annual statement of the finances of the country, from the documents having been formerly presented in a leather bag. The budgets of sir R. Peel in 1842 (including the income-tax) and 1846 (free trade), and of Mr. Gladstone in 1860 (in connection with the treaty with France), are the most important in recent times.

BUENOS AYRES, a republic of S. America. The country was explored by Sebastian Cabot in 1526, and the capital, Buenos Ayres, founded by Don Pedro de Mendoza in 1535. In 1585 the city was rebuilt and recolonised, after several abandonments. Population in 1859 about 350,000; see *Argentine Confederation*.

A British fleet and army, under sir Home Popham and general Beresford, take the city with slight resistance, 27 June; it is retaken 12 Aug. 1806

BUFFOONS were originally mountebanks in the Roman theatres. Their shows were discouraged by Domitian, and abolished by Trajan, 98; see *Jesters*.

BUILDING. In early times men dwelt in caves; wood and clay were the first building materials. Building with stone was early among the Tyrians; in England it may be referred to Benedict the monk, about 670. In Ireland a castle was built of stone at Tuam by the king of Connaught, in 1161; and it was "so new and uncommon as to be called the *Wonderful Castle*." Building with brick was introduced by the Romans into their provinces. Alfred encouraged it in England in 886. It was adopted by the earl of Arundel, about 1598, London being then almost wholly built of wood; see *Architecture*.

Building acts were passed by Elizabeth in 1562, 1580, and 1592; and by Charles II. in 1667. Recent acts are very numerous. The Building Act for the Metropolis, 7 & 8 Vict. c. 84 (1844), was amended in 1855 and 1860.
 Building societies, formed to enable a person

to purchase a house by paying money periodically to a society for a certain number of years, instead of paying rent to a landlord, began about 1836, when an act was passed for their regulation.

BULGARIA, anciently *Moesia*, now part of European Turkey. The Bulgarians were a Slavonian tribe, who harassed the Eastern empire and Italy from 499 to 678, when they established a kingdom. They defeated Justinian II., 687; but were subdued, after several conflicts, by the emperor Basil, in 1018. After defeating them in 1014, having taken 15,000 Bulgarian prisoners, he caused their eyes to be put out, leaving one eye only to every hundredth man, to enable him to conduct his countrymen home. The kingdom was re-established in 1086; but after many changes was annexed to the Ottoman empire, 1396. In Jan. 1861, it was stated that the Bulgarians had seceded from the Greek to the Roman church.

BULL, or EDICT OF THE POPE. The bulla is properly the seal, either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul; and on the other the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Pius V. published a bull against Elizabeth, 25 April, 1570; in 1571 bulls were forbidden to be promulgated in England. The bull *Unigenitus* (beginning with this word) against the Jansenists was issued by Clement XI., 1713; confirmed by Benedict XIII., 1725. The Golden Bull of the emperor Charles IV., so called from its golden seal, was made the fundamental law of the German empire, at the diet of Nuremberg, 1356; see *Brazen Bull*.

BULL-BAITING, or BULL FIGHTING, was an amusement at Stamford in the reign of John, 1209; and at Tutbury, 1374. In the *Sports of England*, we read of the "Easter fierce hunts, when foaming boars fought for their heads, and lusty bulls and huge bears were baited with dogs;" and near the *Clink*, London, was the Paris, or Bear Garden, so celebrated in the time of Elizabeth for the exhibition of bear baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of the late Mr. Windham, who made a speech in favour of the custom, 24 May, 1802. It was made illegal in 1835; see *Cruelty to Animals*. Bull-fights were introduced into Spain

about 1260 : abolished there, "except for *pious* and *patriotic* purposes," in 1784. In June, 1833, ninety-nine bulls were killed at bull-fights at Madrid, ladies present. A bull-fight at Lisbon, attended by 10,000 spectators, on Sunday, 14 June, 1840.

BULLETS of stone were in use, 1514. Iron ones are mentioned in the *Fœdera*, 1550. Lead bullets were made before the close of the 16th century. The cannon-ball in some eastern countries was long of stone. *Ashc.* The conoidal cup rifle-ball was invented by capt. Minié, about 1833 ; a modification of this (conoidal but without cup), by Mr. Pritchett (1853), is used with the Enfield rifle. Other bullets have been since devised.

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1810, principally guided by Mr. Horner and Mr. (afterwards sir R.) Peel, established the conclusion, that paper money is always liable to be over-issued and consequently depreciated, unless it be at all times immediately convertible into gold. This principle has been adopted in British monetary arrangements.

BULL RUN BATTLES, see *Manassas*.

BULWER-CLAYTON TREATY, ratified 4 July, 1850, by which sir Henry Lytton Bulwer on behalf of the British, and Mr. Clayton on behalf of the American government, declared that neither should obtain exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty, and the connection of Great Britain with the Mosquito territory (*which see*), which were settled in 1857.

BUNDSCHUH, see *Jaquerie*.

BUNHILL-FIELDS (originally Bonhill-Field), a burial-ground near Finsbury-square, E. London, termed by Southey the "Campo Santo of the Dissenters;" first used in 1665. Here were interred Thomas Goodwin (1679), John Owen (1683), Isaac Watts, John Bunyan (1688), George Fox, the quaker (1690), general Fleetwood, son-in-law of Cromwell (1692), and Daniel De Foe (1731). *Cunningham*. After some agitation an act for the preservation of the ground as an open space was passed, 15 July, 1867.

BUNKER'S HILL (near Boston, U.S.). Here the British (nearly 3000) compelled the revolted Americans (about 2000) to retreat, 17 June, 1775. It was one of the earliest actions in the war, and the Americans refer to it with pride, on account of their heroic resistance. Ralph Farnham, who was present at the battle, died on 28 Dec. 1860, aged 104½ years. He was introduced to the prince of Wales when in America.

BUONAPARTE, see *France*, 1793, &c.

BURFORD CLUB, the appellation given (according to Mr. Laver, the barrister, a conspirator, see *Laver*) by the Pretender and his agents to a club of Tory lords and others, of which lord Orrery was chairman, and lord Strafford, sir Henry Goring, lord Cowper, Mr. Hutcheson, the bishop of Rochester, sir Constantine Phipps, general Webb, lord Bingley, lord Craven, Mr. Dawkins, lord Scarsdale, lord Bathurst, Mr. Shippen, and lord Gower, were members. This club was said to meet at the members' houses, to form designs against the government. This story was set aside by the solemn declarations of lord Cowper and lord Strafford, that they did not know of its existence. The list of this pretended club was published in the *Weekly Journal*, printed in Whitefriars; but when Read, the printer of the paper, was ordered to appear at the bar of the house, he absconded. March, 1722. *Salmon*.

BURGESSES, from the French *Bourgeois*, a distinction coeval in England with its corporations. They were called to parliament in England, 1265; in Scotland in 1326; and in Ireland about 1365. Burgesses to be resident in the places they represented in parliament, 1 Hen. V. (1413); see *Borough*.

BURGHERS AND ANTI-BURGHERS. In 1732 Ebenezer Erskine and others seceded from the church of Scotland. Differing in regard to the interpretation of the burgess oath, they divided into two sections with the foregoing names in 1747. In 1820 they were reunited as the United Associate Synod of the Secession church, which, on 13 May, 1847, joined the Relief church, together forming the United Presbyterian church.

BURGLARY was a capital offence till 1829. Formerly, he who convicted a burglar was exempted from parish offices, 1699; Statute of Rewards, 5 Anne, 1706; and 6 Geo. I. 1720. Receivers of stolen plate and other goods to be transported, 10 Geo. III. 1770. Persons having upon them picklock-keys, &c., to be deemed rogues and vagabonds, 13 Geo. III. 1772-3. The laws with respect to burglary were amended by Mr. (afterwards sir Robert) Peel's acts between 1823 and 1829; and by the criminal laws of 1861.

BURGOS (Spain), the burial place of the Cid, 1099. Lord Wellington entered Burgos on 19 Sept. after the battle of Salamanca (fought 22 July, 1812). The castle was besieged by the British and allied army, but the siege was abandoned 21 Oct. same year. The fortifications were blown up by the French, 12 June, 1813.

BURGUNDY, a large province in France, derives its name from the Burgundians, a Gothic tribe who overran Gaul in 275, but were driven out by the emperor Probus: they returned in 287, and were defeated by Maximin. In 413 they established a KINGDOM, comprising the present Burgundy, large parts of Switzerland, with Alsace, Savoy, Provence, &c. Gondicar, their leader, the first king. It was conquered by the Franks, 534.—The second kingdom, consisting of a part of the first, began with Gontran, son of Clotaire I. of France, in 561. The kingdom of Arles, Provence, and Transjuran Burgundy, were formed out of the old kingdom.—In 877 Charles the Bald made his brother-in-law Richard the first DUKE of Burgundy. In 938, Hugh the Great, count of Paris, founder of the house of Capet, obtained the duchy. His descendant, Henry, on becoming king of France, conferred it on his brother Robert, in whose family it remained till the death of Philippe de Rouvre, without issue, in 1361. In 1363, king John of France, made his fourth son, Philip, duke; see *Austria and Germany*.

BURIALS. Abraham buried Sarah at Machpelah, 1860 B.C., *Gen.* xxiii. Places of burial were consecrated under pope Calixtus I. in A.D. 210. *Eusebius*. The Greeks had their burial-places at a distance from their towns; the Romans near the highways; hence the necessity for inscriptions. The first Christian burial-place, it is said, was instituted in 596; burial in cities, 742; in consecrated places, 750; in churchyards, 758. Many of the early Christians are buried in the catacombs at Rome; see *Catacombs*. Vaults were erected in chancels first at Canterbury, 1075. Woollen shrouds only were permitted to be used in England, 1666. Linen scarfs were introduced at funerals in Ireland, 1729; and woollen shrouds used, 1733. Burials were taxed, 1695—again, 1783. The acts relating to metropolitan burials were passed 1853, 1854, 1855, and 1857; see *Cemeteries*. Parochial registers of burials, births, and marriages, were instituted in England by Cromwell, lord Essex, about 1538. *Stow*. A tax was enacted on burials in England—for the burial of a duke 50*l.*, and for that of a common person 4*s.*—under Will. III. 1695, and Geo. III. 1783; see *Bills of Mortality*.

BURKING, a new species of murder, committed in Britain, thus named from Burke, the first known criminal by whom it was perpetrated. His victims were killed by pressure or other modes of suffocation, and the bodies, which exhibited no marks of violence, were sold to the surgeons for dissection. He was executed at Edinburgh, 28 Jan. 1829. A monster named Bishop was apprehended in Nov. 1831, and executed in London, 5 Dec. with Williams, one of his accomplices, for the murder of a poor friendless Italian boy named Carlo Ferrari. They confessed to this and other similar murders.

BURLINGTON HEIGHTS. Here a fierce contest took place between the British and the United States American forces, 6 June, 1813. The British carried the heights.

BURLINGTON HOUSE, Piccadilly, London, was built by Denham for lord Burlington, about 1664; and rebuilt by lord Burlington, the architect, about 1731. It was bought for 140,000*l.* by the government, authorised by vote of the house of commons, on 27 July, 1854. In 1857, it became the home of the Royal, Linnean, and Chemical societies. In 1866, sites for buildings for the University of London and the Royal Academy were granted, in the grounds of Burlington House.

BURMESE, or BIRMAN, EMPIRE, founded in the middle of the 18th century by Alompra, the first sovereign of the present dynasty. Our first dispute with this formidable power in 1795, was amicably adjusted by general Erskine. Hostilities were commenced by the British in 1824, and they took Rangoon on May 11. The fort and pagoda of Syriam were taken in 1825. After a short armistice, hostilities were renewed, 1 Dec. same year, and pursued until the successive victories of the British led to the cession of Arracan, and to the signature of peace, 24 Feb. 1826. For the events of this war, and of the war in 1851, see *India*. Pegu was annexed to our Indian empire, 20 Dec. 1852. The war ended 20 June, 1853. In Sept. 1866, the Burmese sovereign was said to have been deposed; there being four claimants for his throne. Rebellion soon suppressed.

BURNETT PRIZES, to be awarded every 40 years to the authors of the two best essays, on "The evidence that there is a Being all powerful, wise, and good, by whom everything

exists, &c.," were founded by Mr. Burnett, a Scottish gentleman, who died 1784, bequeathing monies for the purpose. Various amounts have been paid.*

BURNING ALIVE was inflicted among the Romans, Jews, and other nations, and was countenanced by bulls of the pope; see *Witches*. Many persons have been burned alive as heretics. Sir William Savtre, priest of St. Osyth, London, suffered 9 Feb. 1401. In the reign of Mary, numbers were burned; among others, Ridley, bishop of London, Latimer, bishop of Rochester, and Cranmer, archbishop of Canterbury, at Oxford, in 1555 and 1556.† Bartholomew Leggatt and Edward Wightman were burned for heresy in 1612, by warrant of James I.

BURNING THE DEAD was practised among the Greeks and Romans, and Homer gives descriptions. It was very general about 1225 B.C., and was revived by Sylla about 78 B.C. It is still practised in parts of the East Indies; see *Suttees, Barrows*.

BURNING-GLASS AND CONCAVE MIRRORS. Their power was known to Archimedes, and it is even asserted that by their aid he burnt a fleet in the harbour of Syracuse, 214 B.C. Their powers were increased by Settalla; Tschirnhausen, 1680; Buffon, 1747; and Parker and others more recently. The following experiments were made about 1800, with Mr. Parker's lens or burning mirror, which cost 700*l.*, and is said to have been the largest ever made. It was sold to capt. Mackenzie, who took it to China, and left it at Pekin.

BURWELL FIRE. A number of persons assembled to see a puppet-show in a barn at Burwell near Newmarket, 8 Sept. 1727. A candle having set fire to a heap of straw, seventy-six individuals perished, and others died of their wounds.

BURY ST. EDMUND'S, Suffolk, named from St. Edmund, king of East Anglia, who was murdered by the Danes on 20 Nov. 870, and buried here, and to whom its magnificent abbey was founded. It shares with Runnymede the honour of producing Magna Charta in 1215; it having been prepared here by the barons on 20 Nov. 1214. Henry VI. summoned a parliament in 1447, when Humphrey, duke of Gloucester, was imprisoned, and died here, it is supposed by poison. It was almost consumed by fire in 1608; and was desolated by plague in 1636.

BURYING ALIVE. In Bœotia, Creon ordered Antigone, the sister of Polynices, to be buried alive, 1225 B.C. The Roman vestals were subjected to it for any levity that excited suspicion of their chastity. The vestals buried alive on a charge of incontinence, were Minutia, 337 B.C.; Sextilla, 274 B.C.; Cornelia, A.D. 92. Lord Bacon gives instances of the resurrection of persons who had been buried alive; Duns Scotus being of the number. The two assassins of Capo d'Istria, president of Greece, were sentenced to be immured in brick walls built around them up to their chins, and to be supplied with food in this species of torture until they died, Oct. 1831.

BUSACO, or BUZACO (Portugal). Here the British, under lord Wellington, repulsed the French, under Massena, 27 Sept. 1810. The latter losing one general and 1000 men killed, two generals and about 3000 men wounded, and several hundred prisoners; the loss of the allies did not exceed 1300; the British retreated to the lines of Torres Vedras, which were too strong for Massena to force, and the two armies remained in sight of each other to the end of the year.

BUSHEL. This measure was ordered to contain eight gallons of wheat, 12 Henry VIII. 1520; the legal Winchester bushel was regulated 9 Will. III. 1697; the imperial corn bushel of 2218·192 cubic inches is to the Winchester of 2150·42 as 32 to 31. Regulated by act 5 Geo. IV., June, 1824, which act came into operation 1 Jan. 1826.

* To Dr. W. L. Brown, and to rev. J. B. Sumner, afterwards archbishop of Canterbury, 1815; to rev. R. A. Thompson, and to Dr. J. Tulloch, 1855.

† It is computed, that during the three years of Mary's reign, there were 277 persons brought to the stake; besides those who were punished by imprisonment, fines, and confiscations. Among those who suffered by fire were 5 bishops, 21 clergymen, 8 lay gentlemen, 84 tradesmen, 100 husbandmen, servants, and labourers, 55 women, and 4 children. The principal agents of the queen were the bishops Gardiner and Bonner. The latter is said to have derived a savage pleasure from witnessing the torture of the sufferers.

BUSHIRE (on the Persian Gulf), attacked by sea by sir H. Leeke, and by land by general Stalker, was taken 10 Dec. 1856. The place proved stronger than was expected, and was bravely defended. Brigadier Stopford and col. Malet were killed in a previous attack on the fort at Reshire, 9 Dec. The loss of the British was four officers killed, and one wounded ; five men killed and thirty-five wounded.

BUSSORAH, see *Bassorah*.

BUSTS. This mode of preserving the remembrance of the human features is the same with the *hermæ* of the Greeks. Lysistratus, the statuary, was the inventor of moulds, from which he cast wax figures, 328 B.C. *Pliny*. Busts from the face in plaster of Paris were first taken by Andrea Verrochi, about A.D. 1466. Smaller busts and statuettes are now accurately produced from larger ones by machinery.

BUTCHERS. Among the Romans there were three classes : the *Suarii* provided hogs, the *Boarii* or *Pecuarii* oxen, which the *Lanii* or *Carnifices* killed. The butchers' company in London is ancient, although not incorporated till 1604.

BUTE ADMINISTRATION. John earl of Bute, tutor of prince George (afterwards George III.), formed an administration in May, 1762, which, after various changes, resigned April, 1763. It was severely attacked by Junius and John Wilkes.

John earl of Bute, *first lord of the treasury*
 Sir Francis Dashwood, *chancellor of the exchequer*.
 Lord Grenville, *president of the council*.
 Duke of Bedford, *privy seal*.
 Earl of Halifax, *admiralty*.
 Earl of Egremont and George Grenville, *secretaries of state*.

Lord Ligonier, *ordnance*.
 Henry Fox, afterwards Lord Holland, *paymaster of the forces*.
 Viscount Barrington, *treasurer of the Navy*.
 Lord Sandys, *first lord of trade*.
 Duke of Marlborough, earl Talbot, lord Huntingdon, lord North, &c.

BUTTER. It was late before the Greeks had any notion of butter, and by the early Romans it was used only as a medicine—never as food. The Christians of Egypt burnt butter in their lamps instead of oil, in the 3rd century. Butter forming an important article of commerce as well as food in these countries, various statutes have passed respecting its package, weight, and sale ; the principal of which are the 36th & 38th Geo. III. and 10 Geo. IV. 1829. In Africa, vegetable butter is made from the fruit of the shea tree, and is of richer taste, at Kebba, than any butter made from cow's milk. *Mungo Park*. The import duty of 5s. per cwt. on foreign butter (producing in 1859, 104,587*l.* on 421,354 cwts.) was repealed in 1860.

BUTTONS, an early manufacture in England ; those covered with cloth were prohibited, to encourage the manufacture of metal buttons, 8 Geo. I. 1721.

BUXAR, a town in Bengal near which, on 23 Oct. 1764, major, afterwards sir Hector Monro (with 857 Europeans and 6215 sepoy) gained a great victory over the nabob of Oude, &c., 50,000 in number ; 6000 of these were killed, and 130 pieces of cannon were taken. The loss of the English was trifling.

BY-LAWS, or **BYE-LAWS** (from Danish, *by*, a town), private ordinances made by subordinate communities, such as corporations. These laws must not militate against the law of the land. By 5 & 6 Will. IV. 1834, those made by corporate bodies become valid, if not disallowed by the king's council within forty days after their enactment.

BYNG, HON. ADMIRAL JOHN, was charged with neglect of duty in an engagement with the enemy off Minorca, 20 May, 1756, condemned for an error of judgment, and shot on board the Monarch at Spithead, 14 March, 1757.

BYRON'S VOYAGE. Commodore Byron left England on his voyage round the globe, 21 June, 1764, and returned 9 May, 1766. He discovered the populous island in the Pacific Ocean which bears his name, 16 Aug. 1765. Though brave and intrepid, such was his general ill-fortune at sea, that he was called by the sailors of the fleet "Foulweather Jack."

BYZANTIUM, now *Constantinople*, in the ancient Thrace, founded by a colony of Megarians, under Byzas, 667 B.C. ; but various dates and persons are given. It was taken successively by the Medes, Athenians, and Spartans. In 340 B.C., in alliance with the Athenians, the Byzantines defeated the fleet of Philip of Macedon. During the wars with Macedon, Syria, &c., it became an ally of the Romans, by whom it was taken, A.D. 73. Rebelling it was taken after two years siege and laid in ruins by Severus in 196. Byzantium was refounded by Constantine in 324, and dedicated on 22 May, 330, all the heathen temples being destroyed ; from him it received the name of Constantinople ; see *Constantinople*. **BYZANTINE ART** flourished from the time of Constantine to about 1204. The Byzantine or Eastern empire really commenced in A.D. 395, when Theodosius divided the Roman empire ; see *East*.

CAABA, a sacred black stone, in a temple at Mecca venerated by the Arabs, long before the Christian era. Its guardians, the tribe of Koreish, were defeated by Mahomet and the worship abolished, 623-630.

CABAL (from Italian and Spanish *cabala*, secret knowledge). In English history the term has been applied to the cabinet of Charles II. in 1670; the word Cabal being formed from the initials of their names: sir Thomas, afterwards lord Clifford (C); the lord Ashley (A), (afterwards earl of Shaftesbury); George Villiers, duke of Buckingham (B); Henry, lord Arlington (A); and John, duke of Lauderdale (L).

CABBAGES were brought to England from Holland about 1510, it is said by sir Arthur Ashley of Dorset, and introduced into Scotland by Cromwell's soldiers.

CABBALA, a Jewish system of philosophy or theosophy, deriving its name from a Hebrew word, signifying reception or tradition, said to have been given by God to Adam, and transmitted from father to son by his descendants. It is said to have been lost at the Babylonian captivity (587 B.C.), but to have been revealed again to Ezra.*

CABEIRA (Asia Minor). Here Mithridates, king of Pontus, was defeated by Lucullus, 71 B.C.

CABINET COUNCIL. There were councils in England as early as the reign of Ina, king of the West Saxons, 690; Offa, king of the Mercians, 758; and in other reigns of the Heptarchy. State councils are referred to Alfred the Great. *Spelman*; see *Administrations*. †

CABLES. A machine was invented in 1792, for making the largest, by which human labour was reduced nine-tenths. Chain cables were introduced into the British navy about 1812.

CABOCHIENS, an armed Burgundian faction, including 500 butchers, named from their leader Simonet Caboche, a skinner. They ruled Paris with violence, and constrained the doctors of the Sorbonne to become their allies and the dauphin to recognise them as the "White Hoods," and reformers of the state. They were eventually exterminated by the indignant citizens, in 1418.

CABRIOLETS (*vulgo* Cabs), one-horsed vehicles, were introduced into the streets of London in 1823, when the number plying was twelve. In 1831 they had increased to 165, and then the licences were thrown open. The number in 1862 running in the metropolis exceeded 6000 (of which about 1800 only plied on Sunday). Previous to throwing open the trade, the number of hackney carriages was limited to 1200, when there were few omnibuses.

Cab Strike.—On 28 June, 1853, an act (called Mr. FitzRoy's act) was passed for "the better regulation of metropolitan stage and hackney carriages, and for prohibiting the use of advertising vehicles," by which the cab fares were reduced to 6d. a mile. It came into operation 11 July, and on the 27th a general strike of the London cabmen took place. Much inconvenience was felt, and every kind of vehicle was employed to supply the deficiency. Some alterations (previously agreed on) having been made in the act, the cabs re-appeared on the stands on the 30th.

Cabmen's clubs began at Paddington in Feb. 1859

A London General Cab Company published its prospectus, professing a reformed system, July, 1862

Cabs running in London; in 1855, 3296; in 1867, 6149.

Cab Tragedy.—S. H. Hunt, a servant of Butler and MacCulloch's, seedsman, Covent-garden, London, poisoned his wife and children in a cab, on 7 Nov. 1863; and himself on 9 Nov. at his own house, just before his apprehension.

The cabmen in Paris strike against a company; above 3000 vehicles stopped, 16 June; fierce attack on men who give in; strike subsides, 23 June, 1865

Second Cab Strike.—Metropolitan Streets Act, 30 & 31 Vict. c. 17 (passed 20 Aug.), required hackney carriages to carry lamps; and changed lowest fare from 6d. to 1s. The cab-proprietors and drivers struck at 4 p.m., 3 Dec.; but by the intervention of lord Elcho, an arrangement was made with Mr. Gathorne Hardy, the home secretary, and the strike ceased 4 Dec. 1867

CABUL, or CABOOL, a city of Afghanistan, taken 977 by Subuctajeen, grandfather of Mahomed, founder of the Gaznevide dynasty, and by Nadir Shah in 1738. It was the

* Its supporters assert that the cabbalistic book "Sohar," or "Splendour," a mystic commentary on the Pentateuch, was first committed to writing by Simon Ben Jochai, A.D. 72-110. The true date of the books containing the cabbala is now considered to range from 9th to the 14th centuries and their origin to be the mingling of talmudism with the Greek philosophy termed Neo-Platonism. Some of their dogmas are akin to Christian tenets, such as the trinity, the incarnation, &c. The cabbala exercised much influence upon the mental development of the Jews, and even captivated the greatest thinkers of the 16th and 17th centuries.

† *Cabinet Noir*, or "Dark Closet," a name given to the chamber in which letters entrusted to the French post, were opened for state purposes. The system, which began with Louis XI., was organised under Louis XV., who derived much entertainment from it; and it is said has been only discontinued within the last few years (1863).

capital of the Durani empire at the end of the last century. In 1809 the sovereign Shah Soojah was expelled by Futtah Khan; and in 1818 Cabul came into the hands of Dost Mahomed, a clever and ambitious chieftain. In 1839 the British restored Shah Soojah; but in Nov. 1841 a dreadful outbreak took place. The chief British civil officer, sir Wm. M'Naghten, was massacred, and the British commenced a most disastrous retreat. Of 3849 soldiers, and about 12,000 camp followers, only one European, Dr. Dryden, and four or five natives escaped. In the same year (16 Sept.) general afterwards sir George Pollock retook the town, and rescued lady Sale and many of the prisoners. After destroying many public buildings, he left Cabul 12 Oct. 1842.

CADDEE, or LEAGUE OF GOD'S HOUSE, the league of independence in Switzerland, formed by the Grisons to resist domestic tyranny, 1400 to 1419. A second league of the Grisons was called the Grise or Gray League, (Graubündten), about 1424. A third league, the League of Ten Jurisdictions, was formed in 1436; see *Grisons*.

CADE'S INSURRECTION. Jack Cade, a fugitive Irishman, assumed the name of Mortimer, and headed about 20,000 Kentish men, who armed "to punish evil ministers, and procure a redress of grievances." He defeated and slew sir Humphrey Stafford, at Sevenoaks, 27 June, 1450, entered London in triumph, and beheaded the lord treasurer, lord Saye, and several other persons of consequence, 3 July. The insurgents losing ground, a general pardon was proclaimed, and Cade, deserted by his followers, fled. A reward was offered for his apprehension; he was discovered, and refusing to surrender, was slain by Alexander Iden, sheriff of Kent, 11 July.

CADMIUM, a metal, discovered by Stromeyer and Hermann in 1818.

CAEN (N. France), a place of importance before 912, when it became the capital of the possessions of the Normans, under whom it flourished. It was taken by the English in 1346 and 1417; but was finally recovered by the French 1 July, 1450. Here were buried William the conqueror, (1087) and his queen (1083).

CAERNARVON (N. Wales). In the castle (founded in 1283 or 1284) Edward II. was born, 25 April, 1284; and the town was chartered by Edward I. in the same year. The town suffered by the civil war of Charles, but was finally retained for the parliament.

CÆSAREA, the Roman capital of Judea, built by Herod the Great, 10 B.C. Eusebius the historian was bishop about 315.

CÆSAREAN SECTION, which, it is said, first gave the name of Caesar to the Roman family, is performed by cutting the child out of the womb.*

CÆSARS, see *Rome; Emperors*. The Era of the Cæsars or Spanish Era, is reckoned from 1 Jan. 38 B.C., being the year following the conquest of Spain by Augustus. It was much used in Africa, Spain, and the south of France; but by a synod held in 1180 its use was abolished in all the churches dependent on Barcelona. Pedro IV. of Arragon abolished the use of it in his dominions in 1350. John of Castile did the same in 1383. It was used in Portugal till 1415, if not till 1422. The months and days of this era are identical with the Julian calendar; and to turn the time into that of our era, subtract thirty-eight from the year; but if before the Christian era, subtract thirty-nine.

CÆSIUM (Latin, bluish), a rare alkaline metal, found in some mineral waters by Bunsen in 1861, by means of the "Spectrum analysis," *which see*.

* The case of Alice O'Neal, an Irishwoman, who survived the section, which was performed by a female, is authenticated by Dr. Gabriel King, of Armagh, and surgeon Duncan Stewart, of Dungannon. In Jan. 1847, the operation was performed in St. Bartholomew's hospital, London, on a young woman of diminutive stature, under the influence of ether: but she died the next day. On 9 Dec. 1860, a similar operation was successfully performed by Dr. James Edmunds at Bethnal Green. On the continent the operation is said to have been more frequent and more successful. Cooper's Surgical Dictionary (ed. 1861) contains a table, which, out of 2009 cases, gives a mortality of 55.4 per cent. of the mothers and 29.45 per cent. of the children.

CALABRIA (the ancient Messapia, S.E. Italy), was conquered by the Romans, 266 B.C. It formed part of the kingdom of the Ostrogoths under Theodoric, A.D. 493 ; was re-conquered (for the Eastern empire) by Belisarius, 536 ; subdued by the Lombards and joined to the duchy of Benevento, 572. After various changes, it was conquered by Robert Guiscard, the Norman, 1058, who obtained the title of duke of Calabria, and eventually that of king of Naples ; see *Naples*.

CALAIS (N. W. France), taken by Edward III. after a year's siege, 4 Aug. 1347. It was retaken by the duke of Guise, in the reign of Mary, 7 Jan. 1558, and its loss so deeply touched the queen's heart, as to cause some to say it occasioned her death, which occurred soon afterwards, 17 Nov. same year. “When I am dead,” said the queen, “Calais will be found written on my heart.” It was taken by the Spaniards, April 1594, restored, 1598. Here Louis XVIII. landed after his long exile from France, April 1814.

CALCIUM, the metallic base of lime, was discovered at the Royal Institution, London, by Humphry Davy in 1808.

CALCULATING MACHINES. To avoid errors in computing and printing logarithms and tables of figures, machines to calculate and print have been devised. Pascal, when nineteen years of age, invented one about 1650. The construction of Mr. C. Babbage's machine was commenced at the expense of government, in 1821, and continued till 1833, when the work was suspended after an expenditure of above 15,000*l*. The portion completed is in the library of King's College, London. In 1857, Messrs. E. and G. Schentz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Schentz brought their machine to England in 1854. It was bought for 1000*l*. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857, Messrs. Schentz were engaged to make one for the British government, which is now completed. Mr. Wiberg's machine, exhibited at Paris, Feb. 1863, was much commended. Tables constructed by means of Schentz's machine, and edited by Dr. W. Farre, were published by the government in 1864.

CALEDONIA (now *Scotland*). The name is supposed by some to be derived from *Gael*, or *Gael-men* or *Gadel-doine*, corrupted by the Romans. Tacitus, who died 99, distinguishes this portion of Britain by the appellation of *Caledonia*. Venerable Bede says that it retained this name until 258, when it was invaded by a tribe from Ireland, and called *Scotia*. The ancient inhabitants appear to have been the Caledonians and Picts, tribes of the Celts,

who passed over from the opposite coast of Gaul. About the beginning of the 4th century of the Christian era they were invaded (as stated by some authorities) by the Scythys or Scythins (since called Scots), who, having driven the Picts into the north, settled in the Lowlands, and gave their name to the whole country. Hence the remarkable distinction of language, habits, customs, and persons between the Highlanders and the southern inhabitants; see *Scotland*.

CALEDONIAN CANAL, from the North Sea to the Atlantic Ocean. The act for its construction received the royal assent 27 July, 1803; and the works were commenced same year. The nautical intercourse between the western ports of Great Britain and those also of Ireland to the North Sea and Baltic, is shortened in some instances 800, and in others 1000 miles. A sum exceeding a million sterling was granted by parliament from time to time; and the safe navigation for ships of nearly every tonnage was opened 1 Nov. 1822. It has not paid. CALENDAR, see *Jewish Era* and *calendar*. The Roman calendar, was introduced by Romulus, who divided the year into ten months, comprising 304 days, 738 B.C. This year was of fifty days' less duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not correspond with any fixed season. Numa Pompilius, 713 B.C., added two months; and Julius Cæsar, 45 B.C., to make it more correct, fixed the solar year at 365 days 6 hours, every fourth year being bissextile or leap year; see *Leap year*. This calendar was defective, as the solar year consists of 365 days, 5 hours, 49 minutes, and not of 365 days 6 hours. This difference, in the 16th century amounted to 10 entire days, the vernal equinox falling on 11th instead of 21st March. To obviate this error, pope Gregory XIII. ordained, in 1582, that *that year* should consist of 356 days only (5 Oct. became 15 Oct.); and to prevent further irregularity, it was determined that a year beginning a century should not be bissextile, with the exception of that beginning each fourth century; thus, 1700 and 1800 have not been bissextile, nor will 1900 be so: but the year 2000 will be a leap year. In this manner three days are retrenched in 400 years, because the lapse of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided; see *New Style* and *French Revolutionary Calendar*.

CALENDER, a machine used in glazing various kinds of cloth, was introduced into England by the Huguenots, who were driven by persecution from France, Holland, and the Netherlands to these countries, about 1685. *Anderson*.

CALENDS were the first day of the Roman months. The *Nones* of March, May, July, and Oct., fell on the 7th; and their *Ides* on the 15th. The other months had the *Nones* on the 5th and the *Ides* on the 13th. As the Greeks had no *Calends*, "on the Greek Calends," *ad Græcas Calendas*, meant *never*.

CALICO, cotton cloth, named from Calicut, a city of India, visited by the Portuguese in 1498. Calico was first brought to England by the East India Company in 1631. Calico-printing and the Dutch loom engine were first used in 1676, when a Frenchman established a factory at Richmond, near London. *Anderson*. Calicoes were prohibited to be printed or worn in 1700; and again in 1721, a penalty of 5*l.* was laid on the wearer, and 20*l.* on the seller of calico. In 1831, by the exertions of Mr. Poulett Thompson, afterwards lord Sydenham, and others, the consolidated duty of 3½*d.* on the square yard of printed calico was taken off. Since 1834, the manufacture has been greatly increased by the applications

of science. Cylinders for printing are now engraved by galvanism, and new dyes have been introduced by the discoveries of Liebig, Hofmann, Perkin, &c. ; see *Cotton* and *Dyeing*.

CALICUT, (now Kolikod) S.W. India, the first Indian port visited by Vasco de Gama, 20 May, 1498. It was seized by Hyder Ali, 1766, and taken by the English 1790.

CALIFORNIA (from the Spanish, *Caliente Fornalla*, hot furnace, in allusion to the climate) was discovered by Cortez in 1537 ; others say by Cabrillo in 1542 ; and visited by sir Francis Drake, who named it New Albion, in 1579. California was admitted into the United States in 1850. It is advancing rapidly in wealth and importance, but society is still in a very disorganised state. The population in 1856 was 506,067 ; in 1860, 700,000.

CALIPH (Arabic), Vicar, or Apostle, the title assumed by the sophi of Persia, as successor of Ali, and, since 1517, by the sultan of Turkey, as successor of Mahomet. The caliphat began with Abubeker, the father of the prophet's second wife.

CALIPHS OF ARABIA.		In 775 they were styled caliphs of Bagdad. Haroun-al-Raschid ruled 786-809. See <i>Ommiades</i> and <i>Abbasides</i> .

CALIPPIC PERIOD, invented by Calippus, about 330 B.C., to correct the Metonic cycle, consists of four cycles, or of seventy-six years, at the expiration of which he incorrectly imagined the new and full moons return to the same day of the solar year. This period began about the end of June, third year of 112th Olympiad, year of Rome 424, and 330 B.C.

CALIXTINS, a sect derived from the Hussites, about 1420 demanded the cup (Greek, *Kalix*) in the Lord's supper. They were also called Utraquists as partaking of both elements. They were reconciled to the Roman church at the council of Basle, 1433. Also the followers of George Calixtus, a Lutheran, who died in 1656. He wrote against the celibacy of the priesthood, and proposed a re-union of Catholics and Protestants based on the Apostles' creed.

CALI YUGA, the Hindoo era of the Deluge, dates from 3101 B.C. (according to some, 3102), and begins with the entrance of the sun into the Hindoo sign Aswin, now on 11 April, N.S. In 1600 the year began on 7 April, N.S., from which it has now advanced four days, and from the precession of the equinoxes is still advancing at the rate of a day in sixty years. The number produced by subtracting 3102 from any given year of the Cali Yuga era will be the Christian year in which the given year begins.

CALLAO (Peru). Here, after an earthquake, the sea retired from the shore, and returned in mountainous waves, which destroyed the city in 1687, and on 28 Oct. 1746. The attempt of the Spanish admiral Nuñez to bombard Callao on 2 May, 1866, was defeated by the Peruvians.

CALLIGRAPHY (beautiful writing). Callierates is said to have written an elegant distich on a sesamum seed, 472 B.C. In the 16th century Peter Bales wrote the Lord's Prayer, Creed, and Decalogue, two short Latin prayers, his own name, motto, day of the month, year of our Lord, and of the reign of queen Elizabeth (to whom he presented them at Hampton court), all within the circle of a silver penny, enchased in a ring and border of gold, and covered with crystal, so accurately done, as to be plainly legible. *Holinshed*.

CALMAR, UNION OF. The treaty whereby Denmark, Sweden, and Norway, were united under one sovereign, Margaret of Waldemar, queen of Sweden and Norway, "the Semiramis of the north ;" June, 1397, see *Sweden*. This union was dissolved by Gustavus Vasa in 1523.

CALOMEL ("beautiful black"), a compound of mercury, sulphuric acid, and chloride of sodium, first mentioned by Crolius early in the 17th century. The first directions given for its preparation were by Beguin in 1608.

CALORESCENCE. In Jan. 1865 Professor Tyndall rendered the ultra-red rays of the spectrum of the electric light visible by causing them to impinge on a plate of platinum, which they raised to a white heat. He termed the phenomenon Calorescence ; see *Fluorescence*.

CALORIC, see *Heat*.

CALOTYPE PROCESS (from the Greek *kalos* beautiful), by which negative photographs are produced on paper, is the invention of Mr. Henry Fox Talbot about 1840.

CALOYERS (meaning *good old men*). The monks of the Greek church, of the order of St. Basil. Their most celebrated monastery in Asia is at Mount Sinai, endowed by Justinian (died 565); the European one is at Mount Athos.

CALVARY MOUNT, the place where the Redeemer suffered death, 5 April, A.D. 30; (*Hales*, 31; *Clinton*, 29; others 38); see *Luce* xxiii. 33. Adrian, at the time of his persecution of the Christians, erected a temple of Jupiter on Mount Calvary, and a temple of Adonis on the manger at Bethlehem, 142. The empress Helena built a church here about 326; see *Holy Places*.

CALVES' HEAD CLUB, noblemen and gentlemen, who exposed raw calves' heads at the windows of a tavern, 30 Jan. 1735, the anniversary of the execution of Charles I. An incensed mob was dispersed by soldiers, and the club was suppressed.

CALVI (Corsica). The British forces besieged the fortress of Calvi, 12 June, 1794. After fifty-nine days it surrendered on 10 Aug. It surrendered to the French in 1796.

CALVINISTS, named after John Calvin (or Chauvin), who was born at Noyon, in Picardy, 10 July, 1509. Adopting the reformed doctrines he fled to Angoulême, where he composed his *Institutio Christiane Religionis* in 1533; published in 1536. He retired to Basle, and settled in Geneva, where he died, 27 May, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. In France (see *Huguenots*) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the *Edict of Nantes* in 1598 (*which see*). Calvinistic doctrines appear in the articles of the Church of England and in the confession of the Church of Scotland, and are held by many protestant sects.

CAMALDULES or CAMALDOLITES, a religious order founded at Camaldoli near Florence, by Romuald about 1012.

CAMBIUM REGIS; see *Royal Exchange*.

CAMBRAY (N. France), in the middle ages, the capital of a prince bishop subject to the emperor. Its gives its name to cambrie.

Taken by Charles V. 1544
 By the Spaniards 1595
 By the French and annexed 1667
 Fenelon archbishop 1698
 It was invested by the Austrians, 8 Aug. when the republican general, Declay, replied to the summons to surrender, that "he knew not how to do that, but his soldiers knew how to fight." It was taken by Clairfait, the Austrian general, on 10 Sept. 1798

CAMBRIA, ancient name of Wales (*which see*).

CAMBRIC first made at Cambrey; worn in England, and accounted a great luxury, 1580. *Stow*. Its importation was restricted in 1745; and prohibited in 1758; re-admitted in 1786.

CAMBRIDGE, the Roman *Camboricum* and the Saxon *Granta*, frequently mentioned by the earliest British historians, was burnt by the Danes in 870 and 1010. Roger de Montgomery destroyed it with fire and sword to be revenged of king William Rufus.

The university, said to have been commenced by Sigebert, king of the East Angles, about A.D. 630; lay neglected during the Danish invasions, from which it suffered much; was restored by Edward the elder in 915; and began to revive about 1110
 Henry I. bestows many privileges
 Henry III. granted a charter to the university, 1230 or 1231
 In Wat Tyler's and Jack Straw's rebellion, the rebels entered the town, seize the university records and burn them in the market-place 1381
 University press was set up 1534
 Letters patent granted by Henry VIII.
 Incorporated by Elizabeth in 1571
 The university authorised to send two members to parliament 1603
 The university refuses the degree of M.A. to

CAMBUSKENNETH (Central Scotland). Here Wallace defeated the English under Warrenne and Cressingham, 10 Sept. 1297.

CAMDEN (N. America). Here 16 Aug. 1780, lord Cornwallis defeated the revolted Americans, under Gates. At a second battle, between general Greene and lord Rawdon, the Americans were again defeated, 25 April, 1781. Camden was evacuated and burnt by the British, 13 May, 1781.

CAMEL, DAY OF THE, 4 Nov. 656 (according to some 658 or 659) when Talha and Zobeir, rebel Arab chiefs were defeated and slain by the Caliph Ali. Ayesha, Mahomet's widow, friend of the chiefs, was present in a litter on a camel, hence the name.

CAMERA LUCIDA, invented by Dr. Hooke about 1674; another by Dr. Wollaston in 1807. CAMERA OSCURA, or dark chamber, constructed, it is said, by Roger Bacon in 1297; and improved by Baptista Porta, about 1500; and remodelled by sir Isaac Newton. By the invention of M. Daguerre, in 1839, the pictures of the camera are fixed; see *Photography*.

CAMDEN SOCIETY, established 1838, publishes British historical documents.

CAMERONIANS, a name frequently given to the Reformed Presbyterian church of Scotland, the descendants of the covenanters of the 17th century, the established church, 1638-50.* Charles II. signed the League and Covenant in 1650, in hopes of recovering his kingdoms, but renounced it in 1661, and revived episcopacy. A revolt ensued in 1666, when many covenanters were slain in battle (in the Pentland hills, &c.), and many refusing to take the oaths required, and declining to accept the king's *indulgence*, died on the scaffold, after undergoing cruel tortures. The name *Cameronian* is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. In 1689 they raised a body of soldiers to support William III., who enrolled them under the command of lord Angus, as the 26th regiment, since so famous. In 1712 they renewed the public covenants, and are described in one of their tracts as "the suffering anti-popish, and anti-prelatical, anti-erastian, true presbyterian church of Scotland." They have now between thirty and forty congregations in Scotland.—The 79th regiment (*Cameron Highlanders*), raised in 1793 by Allan Cameron, has no connection with the Cameronians.

CAMISARDS (from *chemise*, Latin *camisa*, a shirt, which they frequently wore over their dress in night attacks), a name given to the more warlike French Protestants in the neighbourhood of the Cevennes (mountain chains in S. France), who defended themselves and attacked their enemies after the revocation of the edict of Nantes, in 1685. They were suppressed in 1704. Their leader, Cavalier, is said to have been made governor of Jersey by William III.

CAMLET, formerly made of silk and camel's hair, but now of wool, hair, and silk. Oriental camlet first came here from Portuguese India, in 1660. *Anderson*.

* They were frequently called *hill-men* or *mountain-men*, and *society people* (from the places and modes of worship to which they were frequently reduced), and McMillanites, from John McMillan, their first minister, after their secession from the church of Scotland on account of its subserviency to the English government, and its declining from its original rigid principles.

CAMP. The Hebrew encampment was first laid out by divine direction, 1490 B.C. (*Numbers* ii.) The Romans and Gauls had intrenched camps in open plains; and vestiges of such exist to this day in England and Scotland. A camp was formed at Hyde Park in 1745 and 1814; see *Chobham* and *Aldershott*.

CAMPANIA (S. Italy), was occupied by Hannibal and various cities declared in his favour 216 B.C.; conquered by the Romans, 213. Its capital was Capua (*which see*).

CAMPBELL'S ACT, introduced by lord Campbell, to compel railway companies to grant compensation for accidents, passed in 1846; amended in 1864. In accordance with it the family of a gentleman killed through the breaking of a rail, obtained a verdict for 13,000*l.* from the Great Northern Railway Company. On appeal the sum was reduced.

CAMPEACHY-BAY (Yucatan, Central America), discovered about 1517, and settled in 1540; was taken by the English in 1659; by the buccaneers, in 1678; and by the freebooters of St. Domingo, in 1685. These last burnt the town and blew up the citadel. The English logwood-cutters made their settlement here about 1662.

CAMPERDOWN: south of the Texel, Holland, near which admiral Duncan defeated the Dutch fleet, commanded by admiral De Winter; the latter losing fifteen ships, either taken or destroyed, 11 Oct. 1797. The British admiral obtained a peerage. He died suddenly on his way to Edinburgh, 4 Aug. 1804.

CAMPO FORMIO (N. Italy). Here a treaty was concluded between France and Austria; the latter yielding the Low Countries and the Ionian Islands to France, and Milan, Mantua, and Modena to the Cisalpine republic, 17 Oct. 1797. By a secret article the emperor gained the Venetian dominions.

CAMPO SANTO (Holy Field), a burial-place at Pisa, surrounded by an arcade erected by archbishop Ubaldo, about 1300, which is celebrated for the frescoes painted on the walls by Giotto, Memmi, and others.

CAMPS, see *Aldershott* and *Chobham*.

CAMPUS RAUDIUS, near Verona, N. Italy. Here the Cimbri were defeated with great slaughter by Marcus and Catulus, 101 B.C.

CANAAN (Palestine), is considered to have been settled by the Canaanites, 1965 B.C. (Clinton, 2088). The land was divided among the Israelites by Joshua, 1445 (Hales, 1602).

CANADA (N. America), was discovered by John and Sebastian Cabot, 24 June, 1497. In 1524, a French expedition under Verazani formed a settlement named New France, and in 1535 Jacques Cartier (a Breton mariner), ascended the St. Lawrence as far as where Montreal now stands; see *Montreal* and *Quebec*.

 That of Amsterdam to the sea 1819-25
 Gauges canal completed 1854
 (See *Ganges*, and *Suez canal*.)

BRITISH CANALS.

The first was by Henry I., when the Trent was joined to the Witham, 1134.
 Francis Mathew in 1656, and Andrew Yarranton in 1677, in vain strongly urged improvement in internal navigation.
 In England there are 2800 miles of canals, and 2500 miles of rivers, taking the length of those only that are navigable—total, 5300 miles. (Mr. Porter, in 1851, says 4000 miles.)
 In Ireland there are 300 miles of canals; 150 of navigable rivers; and 60 miles of the Shannon, navigable below Limerick; in all, 510 miles. *Williams*.
 The prosperity of canals, for a time largely checked by the formation of railways, is now greatly revived.

CANARY ISLANDS (N. W. Africa), known to the ancients as the *Fortunate Isles*. The first meridian was referred to the Canary Isles by Hipparchus, about 140 B.C. They were re-discovered by a Norman named Bethencourt, about 1400; his descendants sold them to the Spaniards, who became masters, 1483. The *canary-bird*, a native of these isles, brought to England about 1500. Teneriffe is the largest island.

CANDLEMAS DAY, 2 Feb. is kept in the church in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, *Luke* ii. 32, "a Light to lighten the Gentiles," &c.), this festival was called Candlemas, as well as the Purification. Its origin is ascribed by Bede to pope Gelasius in the 5th century. The practice of lighting the churches was forbidden by order of council, 2 Edw. VI. 1548; but it is still continued in the church of Rome.

CANDLES.* The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fattened were used for light among the lower classes in England, about 1300. At this time wax candles were little used, and esteemed a luxury; dipped candles were usually burnt. The Wax Chandlers' company was incorporated 1484. Mould candles are said to be the invention of the sieur Le Brez, of Paris. Spermaceti candles are of modern manufacture. The Chinese make candles from wax obtained from the candle-berry tree (*myrica cerifera*). The duty upon candles made in England, imposed in 1709, amounted to about 500,000*l.* annually, when it was repealed in 1831. Very great improvements in the manufacture of candles are due to the researches on oils and fats, carried on by "the father of the fatty acids," Chevreul, since 1811, and published in 1823. At Price's manufactory at Lambeth, the principles involved in many patents are carried into execution; including those of Gwynne (1840), Jones and Price, (1842), and Wilson in 1844, for candles which require no snuffing (termed *composite*). Palm and cocoa-nut oils are now extensively used. In 1860, at the Belmont works 900 persons were employed, and in winter 100 tons (7000*l.* worth) of candles are manufactured weekly. Candles are manufactured at Belmont from the mineral oil or tar brought from Rangoon in the Burmese empire and from Trinidad.

CANDLESTICKS (or *lamp-stands*) with seven branches were regarded as emblematical of the priest's office, and were engraven on their seals, cups, and tombs. Bezaleel made "a candlestick of pure gold" for the tabernacle, B.C. 1491 (*Exod.* xxvii. 17). Candlesticks

* The custom of selling at public auctions *by inch of candle* is said to have been borrowed from the church of Rome, where there is an excommunication by inch of candle, and the sinner is allowed to come to repentance before final excommunication, while yet the candle burns.

were used in Britain in the days of king Edgar, 959, ("silver candelabra and gilt candelabra well and honourably made;") but in 1388 they were not common.

CANDY (Ceylon), was taken by a British detachment, 20 Feb. 1803, who capitulated 23 June, following, anxious to evacuate the place on account of its unhealthiness: on the third day many were treacherously massacred at Columbo. The war was renewed in Oct. 1814; the king was made prisoner by general Brownrigg, 19 Feb. 1815; and the sovereignty vested in Great Britain, 2 March, 1815.

CANICULAR PERIOD, see *Dog-star*.

CANNÆ (Apulia). Here, on 2 Aug. 216 B.C., Hannibal with 50,000 Africans, Gauls, and Spaniards, defeated Paulus Æmilius and Terentius Varro, with 88,000 Romans, of whom 40,000 were slain. The victor sent to Carthage three bushels of rings, taken from the Roman knights. The place is now denominated by some "the field of blood."

CANNIBAL, an Indian term, thought to be a form of Carribal; as Columbus, in 1493, found the Caribs of the West Indies gross cannibals. *Anthropophagi* (man-eaters) are mentioned by Homer and Herodotus; and the practice still exists in the South Sea islands and other savage countries. Cannibals were detected in Perthshire, Scotland, about 1339, and at Milan in 1519.

CANNING ADMINISTRATION.* The illness of lord Liverpool, Feb. led to the formation of this administration, 24-30 April, 1827. He died 8 Aug. following; see *Goderich*.

CANNON. Gibbon described a cannon employed by Mahomet II. at the siege of Adrianople 1453; the bore 12 palms wide; the stone balls each 600 lb.; see *Artillery*.

At Ehrenbreitstein castle, one of the strongest forts in Germany, opposite Coblenz on the Rhine, is a prodigious cannon, eighteen feet and a half long, a foot and a half in diameter in the bore, and three feet four inches in the breech. The ball made for it weighs 180lb., and its charge of powder 94lb. The inscription on it shows that it was made by one Simon 1529

In Dover castle is a brass gun called queen Elizabeth's pocket pistol, which was presented to her by the states of Holland; this piece is 24 feet long, and is beautifully ornamented, having on it the arms of the states, and a motto in Dutch, importing thus—"Charge me well, and sponge me clean—I'll throw a ball to Calais green."

Fine specimens in the Tower of London.

A leather cannon was fired three times in the King's park, Edinburgh—*Phillips*. 23 Oct. 1788

The Turkish piece now in St. James's park, was taken by the French at Alexandria; but was retaken, and placed in the park, March, 1803

Messrs. Horsfall's monster wrought-iron gun was completed in May, 1856, at Liverpool. Its length is 15 feet 10 inches, and its weight 21 tons 17 cwt. 1 qr. 14lb. Its cost was 3,500l. With a charge of 25lb. it struck a target 2000 yards' distance. It has been since presented to government.

Rifled ordnance committee appointed 20 Aug. 1858

Recently great improvements have been made in the construction of cannon, by Messrs. Whitworth, Mallet, Armstrong, and others.

Mr. Wm. G. Armstrong knighted 18 Feb. 1859

He had been working for four years on gun-making, and had succeeded in producing "a breech-loading rifled wrought-iron gun of great durability and of extreme lightness,

combining a great extent of range and extraordinary accuracy." The range of a 32-lb. gun, charged with 5lb. of powder, was a little more than 5 miles. The accuracy of the Armstrong gun is said at equal distances to be fifty-seven times more than that of our common artillery, which it greatly exceeded also in destructive effects. The government engaged the services of sir W. Armstrong for ten years (commencing with 1855) for 20,000l., as consulting engineer of rifled ordnance. 22 Feb. 1859

A parliamentary committee on ordnance was appointed 20 Feb., and reported on 23 July, 1860

Sir W. Armstrong resigned the appointmt. 5 Feb. 1863

The Armstrong gun was said to be very effective in the attack on the Chinese forts at Taku 21 Aug. 1860

Mr. Whitworth's guns and rifles have also been greatly commended.

An American cannon, weighing 35 tons, stated to be the largest in the world, cast in " "

Great endeavours made to improve the construction of cannon, to counterbalance the strength given to ships of war by iron plates; and trials at Shoeburyness, Essex. 1862

Targets of the thickness of the iron sides of the Warrior, three 5-inch plates of wrought iron bolted together, were pierced three times by 156lb. shot from an Armstrong gun smooth bore, 300lb., muzzle-loaded with charges of 40lb. of powder, twice, and once of 50lb. 8 April, "

The Horsfall gun mentioned above, with a charge of 75lb. of powder and a shot of 270lb., smashed a Warrior target 16 Sept. "

Mr. Whitworth's shells were sent through 5 1/2 inch iron plates and the wood-work behind it 12 Nov. "

* George Canning was born 11 April, 1770; became foreign secretary in the Pitt administration, 1807; fought a duel with Castlereagh and resigned in 1809; president of the council in 1820; disapproved of the queen's trial and resigned in 1821; appointed governor-general of India in 1822, but became soon after foreign secretary, and remained such till 1827, when he became premier. He died 8 Aug. same year.

Armstrong's gun "Big Will" was tried and pronounced to be a perfect specimen of workmanship. It weighed 22 tons; its length, 15 feet; range with shot weighing 50lb., 748 to 4187 yards 19 Nov. 1863	National Artillery Association (see <i>Artillery</i>) 1865
Clark's target was destroyed 7 July, "	Duel between a 12 $\frac{1}{2}$ ton 9-inch rifled naval service gun with steel bolt (250lb.) and powder charge of 48lb., and the single gun turret of the "Royal Sovereign" by Capt. Cowper Coles; the equilibrium of the turret base undisturbed by any amount of pounding, 15 June, 1866
Reed's target was tried successfully 8 Dec. "	At Shoeburyness Palliser's chilled metal shot* (250lb.) by 43lb. of powder in a 9-inch muzzle-loading wrought-iron Woolwich rifle gun, is sent through a target of 8 inches rolled iron, 18 inches teak, and $\frac{3}{4}$ inch iron, and about 20 feet beyond 13 Sept. "
The competitive trial between the Armstrong and Whitworth guns began 1 April, 1864	Many experiments made with cannon and targets at Shoeburyness in 1867
Iron-plate commission experiments close 4 Aug. "	The American 15-inch naval gun, with a cast-iron spherical shot 453lb., greatly damages an 8-inch target; other experiments at Shoeburyness 23 July, "
Capt. Palliser, by experiment, has shown that iron shot cast in cold iron moulds instead of hot sand, is much harder and equals steel; he also suggested the lining cast iron guns with wrought iron exits, which is stated to be successful. "	
The competitive trials of Armstrong's and Whitworth's cannon upon the Alfred target-ship at Portsmouth closed 15 Nov. "

CANOE. In the "Rob Roy" a very lightly constructed canoe, "giving the pleasure of a yacht without the expense," Mr. J. Macgregor, in 1865, travelled about a thousand miles on the rivers and lakes of Europe. His second cruise was on the Baltic. The "Octoroon" (16 feet long, 23 inches broad) crossed the channel from Boulogne to Dover, in 11 hours; 19 Aug. 1867.

CANON OF SCRIPTURE, see *Bible.*

CANONISATION, of pious men and martyrs as saints, was instituted by pope Leo III., 800. *Talent.* Every day in the calendar is now a saint's day. The first canonisation was of St. Ulrich, Ulric, in 993. *Hénault.* On 8 June, 1862, the pope canonised 27 Japanese, who had been put to death on 5 Feb. 1597, near Nagasaki, and 25 others on 29 June, 1867.

CANONS, APOSTOLICAL, ascribed by Bellarmin and Baronius to the Apostles; by others to St. Clement, are certainly a forgery of much later date (since 325). The Greek church allows 85, the Latin 50 of them. The first Ecclesiastical Canon was promulgated 380. *Usher.* Canon law of the church was introduced into Europe by Gratian about 1140, and into England in 1154. *Stow;* see *Decretals.* The present *Canons and Constitutions of the Church of England,* collected from former ordinances, were established in 1603 by the clergy in convocation, and ratified by king James I., 1604.—An intermediate class of religious, between priests and monks, in the 8th century, were termed *canons,* as living by a rule.

CANOPUS, see *Alexandria.*

CANOSSA, a castle in Modena, celebrated on account of the degrading penance submitted to by the emperor Henry IV. of Germany, in deference to his greatest enemy, pope Gregory VII. (Hildebrand), then living at the castle, the residence of the great countess Matilda. Henry was exposed for several days to the inclemency of winter, Jan. 1077, till it pleased the pope to admit him, and grant absolution. Matilda greatly increased the temporal power of the papacy by bequeathing to it her large estates, to the injury of her second husband, Guelf, duke of Bavaria.

CANTERBURY (Kent), the *Durovernum* of the Romans, and capital of Ethelbert, king of Kent, who reigned 560-616. He was converted to Christianity by Augustin, 596, upon whom he bestowed many favours, giving him land for an abbey and cathedral, which was dedicated to Christ, 602.† St. Martin's church was the first Saxon Christian church in Britain. The riot at Boughton, near Canterbury, produced by a fanatic called Tom or Thom, who assumed the name of sir William Courtenay, occurred 31 May, 1838; see *Thomites.* The railway to London was completed in 1846.—The **ARCHBISHOP** is primate and metropolitan of all England, and the first peer in the realm, having precedence of all officers of state, and of all dukes not of the blood royal. Canterbury had formerly jurisdiction over Ireland,

* His patent is dated 27 May, 1863. Mr. James Nasmyth had previously suggested the use of chilled iron.

† The Cathedral was sacked by the Danes, 1011, and burnt down 1067; rebuilt by Lanfranc and Anselm, and the choir completed by the prior Conrad in 1130, and in which Becket was murdered, 1170, was burnt 1174. It was rebuilt by William of Sens (1174-78), and by "English William," 1178-84. A new nave was built and other parts, 1378-1410. The great central tower was erected by prior Goldstone about 1495. The gorgeous shrine of Becket was stripped at the reformation, and his bones burnt. Here were interred Edward the Black Prince, Henry IV., cardinal Pole, and other distinguished persons. During the civil war, Cromwell's dragoons used the cathedral as a stable.

CAPE BRETON, a large island, W. coast of N. America, said to have been discovered by Cabot, 1497; by the English in 1584; taken by the French in 1632, but was afterwards restored; and again taken in 1745, and re-taken in 1748. The fortress Louisburg was captured by the English, 26 July, 1758, when the garrison were made prisoners, and eleven French ships were captured or destroyed. The island was ceded to England, 10 Feb. 1763.

CAPE-COAST CASTLE (S. W. Africa). Settled by the Portuguese in 1610; but it soon fell to the Dutch. It was demolished by admiral Holmes in 1661. All the British factories and shipping along the coast were destroyed by the Dutch admiral, De Ruyter, in 1665. It was confirmed to the English by the treaty of Breda, in 1667; see *Ashantees*.

CAPE DE VERDE ISLANDS (N. Atlantic Ocean), belonging to Portugal, were known to the ancients as Gorgades; but not to the moderns till discovered by Antonio de Noli, a Genoese navigator in the service of Portugal, 1446, 1450, or 1460.

CAPE FINISTERRE (S. W. Spain). Off this cape admirals lord Anson and Warren defeated and captured a French fleet under De la Jonquière, 3 May, 1747.

CAPE ST. VINCENT (S. W. Portugal). Sir George Rooke, with twenty-three ships of war, and the Turkey fleet, was attacked by Tourville, with 160 ships, off Cape St. Vincent, when twelve English and Dutch men of war, and eighty merchantmen, were captured or destroyed by the French, 16 June, 1693.—Sir John Jervis, with the Mediterranean fleet of fifteen sail, defeated the Spanish fleet of twenty-seven ships of the line off this cape, taking four ships and destroying others, 14 Feb. 1797. For this victory sir John was raised to the peerage, as earl St. Vincent. Nelson was engaged in this battle.

CAPETIANS, the third race of the kings of France, named from Hugo Capet, count of Paris and Orleans, who seized the throne on the death of Louis V., called the Indolent, 987. *Hénault*. The first line of the house of Capet expired with Charles IV., in 1328, when Philip VI. of Valois ascended the throne; see *France*.

CAPILLARITY (the rising of liquids in small tubes, and the ascent of the sap in plants) is said to have been first observed by Niccolo Aggiunti of Pisa, 1600-35. The theory has been examined by Newton, La Place, and others. Dr. T. Young's theory was put forth in 1805, and Mr. Wertheim's researches in 1857.

CAPITOL, said to have been so called from a human head (*caput*) found when digging the foundations of the fortress of Rome, on Mons Tarpeius, on which a temple was built to Jupiter Capitolinus. The foundation was laid by Tarquinius Priscus, 616 B.C.; the building was continued by Servius Tullius; completed by Tarquinius Superbus, but not dedicated till

507 B.C. by the Consul Horatius. It was burnt during the civil wars, 83 B.C., rebuilt by Sylla, and dedicated again by Lutatius Catulus, 69 B.C. The Roman consuls made large donations to this temple, and the emperor Augustus bestowed on it 2000 pounds weight of gold, of which metal the roof was composed: its thresholds were of brass, and its interior was decorated with shields of solid silver. It was destroyed by lightning 188 B.C.; by fire, A.D. 70, and rebuilt by Domitian. The *Capitoline games*, instituted 387 B.C. to commemorate the deliverance from the Gauls, were revived by Domitian, A.D. 86. The Campidoglio contains palaces of the senators, erected on the site of the Capitol by Michael Angelo soon after 1546.

CAPITULARIES, the laws of the Frankish kings, commencing with Charlemagne (801). Collections have been published by Baluze (1677) and others.

CAPPEL (Switzerland). Here the reformer Ulric Zwinglius was slain in a conflict between the catholics and the men of Zurich, 11 Oct. 1531.

CAPRI (Capræ), an island near Naples, the sumptuous residence of Augustus, and particularly of Tiberius, memorable for the debaucheries he committed during the seven last years of his life, 27-37. Capri was taken by sir Sydney Smith, 22 April, 1806.

CAPS AND HATS.^{*} About 1738, Sweden was much distracted by two factions thus named, the former in the interest of the Russians, and the latter in that of the French. They were broken up and the names prohibited by Gustavus III. in 1771, who desired to exclude foreign influence. His assassination by Ankarström, 16 March, 1792, set aside all his plans for the improvement of Sweden.

CAPSTAN, used to work ships' anchors, is said to have been invented, but more probably was only improved by sir Samuel Morland, who died 30 Dec. 1695.

CAPUA (Naples), capital of Campania, took the part of Hannibal when his army wintered here after the battle of Cannæ, 216 B.C., and it is said became enervated through luxury. In 211, when the Romans retook the city, they scourged and beheaded all the surviving senators; the others had poisoned themselves after a banquet previous to the surrender of the city. Only two persons escaped punishment, a woman who had prayed for the success of the Romans, and another who succoured some prisoners. During the middle ages Capua was successively subjugated by the Greeks, Saracens, Normans, and Germans. It was restored to Naples in A.D. 1424, and was taken 2 Nov. 1860, by Garibaldi.

CAPUCHIN FRIARS, Franciscans, so named from wearing a *Capuchon*, or cowl hanging down upon their backs. The Capuchins were founded by Matthew Baschi, about 1525.

CAR. The invention is ascribed to Erichthonius of Athens, about 1486 B.C. Covered cars (*currus arcuati*) were used by the Romans. The *lectica* (a soft cushioned car), next invented, gave place to the *carpentum*, a two-wheeled car, with an arched covering, hung with costly cloth. Still later were the *carruca*, in which the officers of state rode. Triumphant cars, introduced by Tarquin the Elder, were formed like a throne.

CARACAS (S. America), part of Venezuela, discovered by Columbus 1498. It was reduced by arms, and assigned as property to the Welsers, German merchants, by Charles V.; but for their tyranny, they were dispossessed in 1550, and a crown governor appointed.

^{*} None allowed to sell any hat for above 20*d.* nor cap for above 2*s.* 8*d.*, 5 Henry VII. 1489. It was enacted in 1571 that every person above seven years of age should wear on Sundays and holidays, a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. Excepted: maids, ladies, and gentlewomen, and every lord, knight, and gentleman, of twenty marks of land, and their heirs, and such as had borne office of worship, in any city, town, or place, and the wardens of London companies.

The province declared its independence, 9 May, 1810. In the city Leon de Caracas, on 26 March, 1812, nearly 12,000 persons perished by an earthquake; see *Venezuela*.

CARBERRY HILL (S. Scotland). Here on June 15, 1567, lord Hume and the couderate barons dispersed the royal army under Bothwell, and took Mary queen of Scots prisoner. Bothwell fled.

CARBOLIC ACID (or phenic acid), obtained by the distillation of pit-coal, is a powerful antiseptic. It is largely manufactured for medical purposes, and has been advantageously used at Carlisle and Exeter in the deodorisation of sewage (1860-1); and as a disinfectant during the prevalence of cholera in London in 1866.

CARBON was shown to be a distinct element by Lavoisier in 1788. He proved the diamond to be its purest form, and converted it into carbonic acid gas by combustion.

CARBONARI (charcoal-burners), a powerful secret society in Italy, which derived its origin, according to some, from the Waldenses, and which became prominent early in the present century. It aimed at the expulsion of foreigners from Italy, and the establishment of civil and religious liberty. In March, 1820, it is said that 650,000 joined the society, and an insurrection soon after broke out in Naples, general P  p   taking the command. The king Ferdinand made political concessions, but the allied sovereigns at Laybach assisted Ferdinand to suppress the liberal party, Jan. 1821, and the Carbonari were denounced as traitors. The society spread in France, and doubtless hastened the fall of the Bourbons in 1830 and 1848. It has been frequently confounded with freemasonry.

CARBONIC ACID GAS, a compound of carbon and oxygen, found in the air, and a product of combustion, respiration, and fermentation. The Grotto del Cane yields 200,000 lbs. per annum. No animal can breathe this gas. The briskness of champagne, beer, &c., is due to its presence. It was liquefied by atmospheric pressure by Faraday in 1823. On exposing the liquid to the air it becomes solid, resembling snow.

CARDIFF CASTLE (S. Wales). Here Robert, duke of Normandy, eldest son of William I., is said to have been imprisoned from 1106 till his death, 1135.

CARDINALS, ecclesiastical princes in the church of Rome, the council of the pope, and the conclave or sacred college, at first were the principal priests or incumbents of the parishes in Rome, and said to have been called *cardinales* in 853. They began to assume the exclusive power of electing the popes about 1181. They first wore the red hat to remind them that they ought to shed their blood for religion, if required, and were declared princes of the church by Innocent IV., 1243 or 1245. In 1586 Sixtus V. fixed their number at 70; but there are generally vacancies. In 1860 there were 69 cardinals; in 1864, 59; in Nov. 1867, 52. Nine cardinals (one a Bonaparte) were made, 13 March, 1868. Paul II. gave the scarlet habit, 1464; and Urban VIII. the title of Eminence in 1623 or 1630.* *Ducange*.

CARDROSS CASE, see *Trials*, 1861.

CARDS (referred to the Chinese, Hindoos, and Romans), are said to have been invented in France in 1391, to amuse Charles IV. during the intervals of a melancholy disorder. Piquet and all the early names are French.—Cards first taxed in England 1710. 428,000 packs were stamped in 1775, and 986,000 in 1800. In 1825, the duty being then 2s. 6d. per pack, less than 150,000 packs were stamped; but in 1827 the stamp duty was reduced to 1s., and 310,854 packs paid duty in 1830. Duty was paid on 239,200 packs in the year ending 5 Jan. 1840; and on near 300,000, year ending 5 Jan. 1850. By an act passed in 1862 the duty on cards was reduced to 3d. per pack, and the sellers were required to take out a licence.

CARIA, Asia Minor, was conquered by Cyrus, 546 B.C.; by Dercyllidas, a Lacedæmonian, 397; his successor Hecatomnus became king, 385 B.C.; for his son Mausolus the *Mausoleum* was erected (*which see*). Caria was absorbed into the Turkish empire.

CARIBBEE ISLANDS, see *West Indies*.

CARICATURES. Bufalmaco, an Italian painter, about 1330, drew caricatures and put labels to the mouths of his figures with sentences. The modern caricatures of Gilray, Rowlandson, H. B. (John Doyle ^{ID}=HB), Richard Doyle, John Leech, and John Tenniel are justly celebrated. The well-known "Punch" was first published in 1841. The most eminent writers of fiction of the day and others (Douglas Jerrold, Thackeray, A'Becket, Professor E. Forbes, &c.) have contributed to this amusing periodical.

CARINTHIA, a Bavarian duchy, was annexed to the territories of the duke of Austria, 1336.

fortress, was taken 530, by Cerdic, founder of the kingdom of the West Saxons. Its Norman character has been ascribed to William Fitz-Osborne, earl of Hereford in William I.'s time. Here Charles I. was imprisoned in 1647. Here died his daughter Elizabeth, aged fifteen, too probably of a broken heart, Sept. 8, 1650.

CARIZMIANS (fierce shepherds living near the Caspian), having been expelled by the Tartars, invaded Syria in 1243. The union of the sultans of Aleppo, Hems, and Damascus were insufficient to stem the torrent, and the Christian military orders were nearly exterminated in a single battle, in 1244. In Oct. they took Jerusalem. They were totally defeated in 1247.

CARLAVEROCK CASTLE (S. Scotland), taken by Edward I., July, 1300, the subject of a contemporary poem published, with illustrations, by sir Harris Nicolas in 1828.

CARLISLE (Cumberland), a frontier town of England, wherein for many ages a strong garrison was kept. Just below this town the famous Picts' wall began, which crossed the whole island to Newcastle-upon-Tyne, and here also ended the great Roman highway. Of the great church, called St. Mary's, a large part was built by David, king of Scotland, who held Cumberland, Westmoreland, and Northumberland, from the crown of England. The castle, destroyed by the Danes, 875, restored in 1092 by William 11., was the prison of Mary queen of Scots in 1568.—Taken by the parliamentary forces in 1645, and by the young Pretender, 15 Nov. 1745: retaken by the duke of Cumberland, 30 Dec. same year.—The see was erected by Henry I. in 1132, and made suffragan to York. The cathedral had been founded a short time previously, by Walter, deputy in these parts for William Rufus. It was almost ruined by Cromwell, 1648, and has never recovered its former beauty, although repaired after the Restoration. It has been lately renovated at a cost of 15,000*l.*, and was reopened in 1856. The see has been held by one lord chancellor and two lord treasurers; it is valued in the king's books at 53*0l.* 4*s.* 11*d.* per annum. Present income 4500*l.*

CARLOVINGIANS, the second dynasty of the French kings, 752-987. Charles Martel (715-741) and Pepin, his son (741-752), were mayors of the palace. The latter became king 752; see *France*.

CARLOW (S. E. Ireland). The castle, erected by king John, surrendered after a desperate siege to Rory Oge O'Moore, in 1577; again to the parliamentary forces, in 1650. Here the royal troops routed the insurgents, May, 1798.

CARLSBAD (or Charles's Bath), in Bohemia, the celebrated springs, said to have been discovered by the emperor Charles IV. in 1370.—On 1 Aug. 1819, a congress was held here, when the great powers decreed measures to repress the liberal press, &c.

CARLSRUHE, capital of Baden, built by the margrave Charles William, 1715. A revolution here was suppressed by Prussian aid, and the grandduke returned 18 Aug. 1849.

CARLTON CLUB, Pall Mall (Conservative), established by the duke of Wellington and others, 1831-2.

CARMAGNOLE, a Piedmontese song and dance, popular in France during the reign of terror, 1793-4. The chorus was "Dansons la Carmagnole: vive le son du canon!"

CARMATHIANS, a Mahometan sect. Carmath, a Shiite, about 890, assumed the title of "the guide, the director," &c., including that of the representative of Mahomet, St. John the Baptist, and the angel Gabriel. His followers subdued Bahrein in 900, and overran the east. Dissensions arose amongst themselves, and their power soon passed away.

CARMELITES or WHITE FRIARS, of Mount Carmel, one of the four orders of mendicants with austere rules, founded by Berthold about 1156, and settled in France in 1252. *Hénault*. Their rules were moderated about 1540. They claimed descent from Elijah. They had numerous monasteries in England, and a precinct in London without the Temple, west of Blackfriars, is called Whitefriars to this day, after a community of their order, founded there in 1245.

CARNATIC, a district of Southern Hindostan, extending along the whole coast of Coromandel. Hyder Ali entered the Carnatic with 80,000 troops, in 1780, and was defeated by the British under sir Eyre Coote, 1 July, and 27 Aug. 1781; and decisively overthrown, 2 June, 1782. The Carnatic was overrun by Tippoo in 1790. The British have possessed entire authority over the Carnatic since 1801; see *India*.

CARNATION, so called from the original species being of a flesh colour (*carnis*, of flesh). Several varieties were first planted in England by the Flemings, about 1567. *Stow*.

CARNEIAN GAMES, observed in many Grecian cities, particularly at Sparta (instituted about 675 B.C. in honour of Apollo, surnamed Carneus), lasted nine days.

CARNIVAL (*Carni vale*, Italian, *i.e. Flesh farewell!*), a festival time in Italy, particularly at Venice, about Shrove-tide, or beginning of Lent.

CAROLINA (N. America). Said to have been discovered by Sebastian Cabot in 1498, or by De Leon in 1512. Raleigh formed a settlement at Roanoke in June, 1585, which was broken up in 1586. About 850 English settled here about 1660; and Carolina was granted to lord Clarendon and others in 1663. The cultivation of rice was introduced by governor Smith in 1695, and subsequently cotton. A constitution drawn up by John Locke was abandoned. The province was divided into North and South in 1729; see *America*. The Carolinas were slave states. Great excitement prevailed in them in Nov. 1860, on account of Mr. Abraham Lincoln's election to the presidency of the United States, he being strongly opposed to slavery. South Carolina began the secession from the United States, 20 Dec. 1860: North Carolina followed, 21 May, 1861; see *United States*, 1861-5.

CAROLINE ISLANDS were discovered by the Spaniards in the reign of Charles II. 1686.

CARP, a fresh-water or pond fish, was, it is said, first brought to these countries about 1525. *Walton*. It is mentioned by lady Juliana Berners in 1496.

CARPETS are of ancient use in the East. The manufacture of woollen carpets was introduced into France from Persia, in the reign of Henry IV., between 1589 and 1610. Some artisans who had quitted France in disgust established the English carpet manufacture, about 1750. A cork-carpet company was formed in 1862.

CARPI (N. Italy). Here prince Eugene and the Imperialists defeated the French, 9 July, 1701.

CARRACK or KARRACK (Italian, *Caracca*), a large ship in the middle ages. The Santa Anna, the property of the knights of St. John, of about 1700 tons, sheathed with lead, was built at Nice about 1530. It was literally a floating fortress, and aided Charles V. in taking Tunis in 1535. It contained a crew of 300 men and 50 pieces of artillery.

CARRIAGES. Erichthonius of Athens is said to have produced the first chariot about 1486 B.C. Rude carriages were known in France in the reign of Henry II. A.D. 1547; in England in 1555; Henry IV. of France had one without straps or springs. They were made in England in the reign of Elizabeth, and then called whirlicotes. The duke of Buckingham, in 1619, drove six horses; and the duke of Northumberland, in rivalry, drove eight. Carriages were let for hire in Paris, in 1650, at the Hôtel Fiacre: hence the name, *fiacre*; see *Car*, *Cabriolets*, and *Coaches*.

CARRICKFERGUS (Antrim, Ireland). Its castle is supposed to have been built by Hugh de Lacy in 1178. The town surrendered to the duke of Schomberg 28 Aug. 1689. The castle, surrendered to the French admiral Thurot, 1760; see *Thurot*.

CARRON IRON-WORKS, on the banks of the Carron, in Stirlingshire, established in 1760. The works in 1852 employed about 1600 men. Here since 1776 have been made the pieces of ordnance called *carronades*.

CARROTS and other edible roots were imported from Holland and Flanders, about 1540.

CARTES DE VISITE. The small photographic portraits thus termed are said to have been first taken at Nice, by M. Ferrier, in 1857. The duke of Parma had his portrait placed upon his visiting cards, and his example was soon followed in Paris and London.

CARTESIAN DOCTRINES, promulgated by René des Cartes, the French philosopher, in 1637. His metaphysical principle is, "I think, therefore I am;" his physical principle, "Nothing exists but substance." He accounts for all physical phenomena on his theory of vortices, motions excited by God, the source of all motion. He was born 1596, and died at Stockholm, the guest of queen Christina, in 1650.

CARTHAGE (N. coast of Africa, near Tunis), founded by Dido or Elissa, sister of Pygmalion, king of Tyre, 878 B.C., (869, *Blair*; 826, *Niebuhr*). She fled from that tyrant, who had killed her husband, and took refuge in Africa. Carthage became a great commercial and warlike republic, and disputed the empire of the world with Rome, which occasioned the Punic wars. The Carthaginians bore the character of a faithless people, hence the term *Punic faith*. Cato the censor (about 146 B.C.) ended his speeches in the senate with *Cathago delenda!* "Carthage must be destroyed!" Many councils held here, A.D. 200-535.

CARTHAGENA, or NEW CARTHAGE (S.E. Spain), built by Hasdrubal, the Carthaginian general, 242 B.C.; taken by Scipio, 210. The modern Carthagena was taken by a British force under sir John Leake in 1706; retaken by the duke of Berwick, 1707.—CARTHAGENA, in Columbia, South America, was taken by sir Francis Drake in 1585; pillaged by the French of 1,200,000*l.* in 1697; bombarded by admiral Vernon in March, 1740; and unsuccessfully besieged, April, 1741.

CARTHUSIANS, a religious order (springing from the Benedictines) founded by Bruno of Cologne, who retired with six companions from the world about 1080, to Chartreuse (*which see*), in the mountains of Dauphiné. Their austere rules were formed by Basil VII., general of the order. They appeared in England about 1180, and a Carthusian monastery was founded by sir William Manny, 1371, on the site of the present Charter-house, London; see *Charter-house*. The Carthusian powder, of father Simon, at Chartreuse, was first compounded about 1715.

CARTOONS. Those of RAPHAEL (twenty-five in number) were designed (for tapestries) in the chambers of the Vatican under Julius II. and Leo X. about 1510 to 1516. The seven preserved were purchased in Flanders by Rubens for Charles I. of England, for Hampton-court palace in 1629.* They were removed to South Kensington 28 April, 1865.—The tapestries executed at Arras from these designs are at Rome. They were twice carried away by invaders, in 1526 and 1798, and were restored in 1815.—The Cartoons for the British Houses of Parliament were exhibited in 1843.

CARVING, see *Sculptures*.

CASH-PAYMENTS, see *Bank of England*.

CASHEL (Tipperary, Ireland). Cormack Cuillinan, king and bishop of Cashel, was the reputed founder or restorer of the cathedral, 901. In 1152, bishop Donat O'Danergan was invested with the pall; see *Pallium*. Cashel was valued in the king's books, 29 Henry VIII. at 66*l.* 13*s.* 4*d.* Irish money. By the Church Temporalities act, 1833, it ceased to be archiepiscopal, and was joined to Waterford and Lismore.

CASHMERE, in the Himalayas; was subdued by the Mahometans in the 16th century; by the Affghans in 1752; by the Sikhs in 1819; and ceded to the British in 1846; who gave it to the Maharajah Gholab Singh, with a nominal sovereignty. The true Cashmere shawls were first brought to England in 1666; and are well imitated at Bradford and Huddersfield. Shawls of Thibetian wool, for the omrahs, cost 150 rupees each, about 1650.

CASSANO (N. Italy). Site of an indecisive conflict between prince Eugene of Savoy and the French, 16 Aug. 1705.

CASSATION, COURT OF, the highest court of appeal in France, was established 10 Nov. 1790, by the national assembly.

CASSITERIDES; see *Scilly Isles*.

* They represent—1, the Miraculous draught of Fishes; 2, the Charge to Peter; 3, Peter and John healing the Lame at the Gate of the Temple; 4, the Death of Ananias; 5, Elymas the Sorcerer, struck with blindness; 6, the Sacrifice to Paul and Barnabas, at Lystra; 7, Paul preaching at Athens.

CASTEL FIDARDO, near Ancona, Central Italy. Near here general Lamoricière and the papal army of 11,000 men were totally defeated by the Sardinian general, Cialdini, 18 Sept. 1860. Lamoricière with a few horsemen fled to Ancona, then besieged. On 29 Sept. he and the garrison surrendered, but were shortly after set at liberty.

CASTES, a distinct section of society in India. In the laws of Menu (see *Menu*), the Hindus are divided into the Brahmans, or sacerdotal class; the Kshatriya or Chuttree, military class; the Vaisya, or commercial class; and the Sudras, or sooders, servile class.

CASTIGLIONE (N. Italy). Here the French under Angereau defeated the Austrians, commanded by Wurmser, with great loss, 5 Aug. 1796.

CASTILE (Central Spain). A Gothic government was established here about 800.—Ferdinand, count of Castile, became king, 1035. Ferdinand, king of Arragon, married Isabella, queen of Castile, in 1474, and formed one monarchy, 1479; see *Spain*.

CASTILLEJOS (N. Africa). Here on 1 Jan. 1860, was fought the first decisive action in the war between Spain and Morocco. General Prim, after a vigorous resistance, repulsed the Moors under Muley Abbas, and advanced towards Tetuan.

CASTILLON, Guienne (S. France). Here the army of Henry VI. of England was defeated by that of Charles VII. of France, and an end put to the English dominion in France, Calais alone remaining, 20 or 23 July, 1453. Talbot, earl of Shrewsbury, was killed.

CASTLEBAR (Ireland). French troops, under Humbert, landed at Killala, and assisted by Irish insurgents here, compelled the king's troops under Lake to retreat, 27 Aug. 1798; but were compelled to surrender at Ballinamuck.

CASTLEPOLLARD (Ireland). At an affray at a fair here between some peasantry and a body of police, thirteen persons lost their lives, and many were wounded, 23 May, 1831. The latter escaped punishment.

CASTLES. The castle of the Anglo-Saxon was a tower keep, either round or square, and ascended by a flight of steps in front. William I. erected 48 strong castles. Several hundreds, built by permission of Stephen, between 1135 and 1154, were demolished by Henry II. 1154. Many were dismantled in the civil wars.

CATACOMBS. The early depositories of the dead. The first Christians at Rome met for worship in the catacombs; and here are said to have been the tombs of the apostles Peter and Paul. Belzoni in 1815–18 explored many Egyptian catacombs, built 3000 years ago. He brought to England the sarcophagus of Psammetichus, formed of oriental alabaster, exquisitely sculptured. In the Parisian catacombs (formerly stone quarries), human remains from the cemetery of the Innocents were deposited in 1785; and many of the victims of the revolution in 1792–4, are interred in them.

CATALONIA (W. Spain), was settled by the Goths and Alani, about 409; conquered by the Saracens, 712; recovered by Pepin and Charlemagne. It formed part of the Spanish marches and the territory of the count of Barcelona (*which see*). The natives were able seamen: being frequently unruly, their peculiar privileges were abolished in 1714.

CATALYTIC FORCE. The discovery in 1819 by Thenard of the decomposition of peroxide of hydrogen by platinum, and by Döbereiner in 1825 of its property to ignite a mixture of hydrogen and oxygen, formed the groundwork of the doctrine of Catalytic Force, also termed "action of contact or presence," put forth by Berzelius and Mitscherlich. Their view has not been adopted by Liebig and other chemists.

CATAMARANS (or carcasses), fire-machines for destroying ships; tried in vain by sir Sydney Smith, 2 Oct. 1804, on the Boulogne flotilla destined by Bonaparte to invade England.

CATANIA (the ancient Catania), a town near Etna, Sicily, was founded by a colony from Chalcis, about 753 B.C. Ceres had a temple here, open to none but women. Catania was almost totally overthrown by an eruption of Etna in 1669 and in 1693 was nearly swallowed up by an earthquake: in a moment more than 18,000 of its inhabitants were buried in the ruins. An earthquake did great damage, 22 Feb. 1817. In Aug. 1862, the town was held by Garibaldi and his volunteers, in opposition to the Italian government. He was captured on 29 Aug.

CATAPHRYGIANs, heretics in the second century, who followed the errors of Montanus. They are said to have baptized their dead, forbidden marriage, and mingled the bread and wine in the Lord's supper with the blood of young children.

CATAPULTÆ, military engines of the cross-bow kind, for throwing huge stones as well as darts and arrows; invented by Dionysius, the tyrant of Syracuse, 399 B.C.

CATEAU CAMBRESIS (N. France), where, on 2, 3 April, 1559, peace was concluded between Henry II. of France, Philip II. of Spain, and Elizabeth of England. France ceded Savoy, Corsica, and nearly 200 forts in Italy and the Low Countries to Philip.

CATECHISMS. The catechism of the church of England in the first book of Edward VI. 7 March, 1549, contained merely the baptismal vow, the creed, the ten commandments, and the Lord's prayer, with explanations; but James I. ordered the bishops to enlarge it by adding an explication of the sacraments, 1612. The catechism of the council of Trent was published in 1566; that of the Assembly of Divines at Westminster in 1648. Luther's German catechisms appeared 1529.

CATHARI (from the Greek *katharos*, pure), a name given to the Novatians (about 251), Montanists, and other early Christian sects.

CATHAY, an old name for China.

CATHERINE. The order of knights of St. Catherine was instituted in Palestine 1063. An order of ladies of the highest rank in Russia was founded by Peter the Great, 1714, in honour of the bravery of his empress Catherine. They were to be distinguished, as the name implied (from *katharos*, pure), for purity of life and manners; see *Doeks*.

CATHOLIC MAJESTY. This title was given by pope Gregory III. to Alphonso I. of Spain, 739. *Licenciado*. The title was also given to Ferdinand V. and his queen in 1474 by Innocent VIII. on account of their zeal for the Roman Catholic religion, and their establishment of the Inquisition in Spain.

CATHOLICS, see *Roman Catholics*.

CAT ISLE, see *Salvador*.

CATILINE'S CONSPIRACY. L. Sergius Catiline, a Roman of noble family, having dissolutely squandered his fortune, and having been refused the consulship (65 B.C.), conspired with many of the aristocracy to kill the senate, plunder the treasury, and set Rome on fire. This conspiracy was timely discovered and frustrated. A second plot (in 63), was detected by the consul Cicero, whom he had resolved to murder. Catiline's daring appearance in the senate-house, after his guilt was known, drew forth Cicero's celebrated invective, "Quousque tandem, Catilina!" on 8 Nov. On seeing five of his accomplices arrested, Catiline fled to Gaul, where his partisans were assembling an army. Cicero punished the conspirators at home, and Petreius routed Catiline's forces; the conspirator was killed in the engagement, Jan. 62 B.C.

CATO, SUICIDE OF, at the "era destructive of the liberties of Rome." This Roman philosopher, considering freedom as that which alone "sustains the name and dignity of man," unable to survive the independence of his country, stabbed himself at Utica, 46 B.C.

CATO-STREET CONSPIRACY: a gang of desperate men, headed by Arthur Thistlewood, assembled in Cato-street, Edgware-road, and proposed the assassination of the ministers of the crown, at a cabinet dinner, and the overthrow of the government. They were betrayed by one of their number, arrested 23 Feb. 1820, and Thistlewood, Brunt, Davidson, Ings, and Tidd, were executed as traitors, on 1 May.

CATTI, a German tribe, attacked but not subdued by the Romans; absorbed by the Franks, 3rd century.

CATTLE. The importation of horned cattle from Ireland and Scotland into England was prohibited by a law, 1663; but the export of cattle from Ireland became very extensive. In 1842 the importation of cattle into England from foreign countries was subjected to a moderate duty, and in 1846 they were made duty free; and since then the numbers imported have enormously increased. Horned cattle imported into the United Kingdom 1849, 53,480; 1853, 125,523; 1855 (war), 97,527; 1860, 104,569; 1865, 283,271; 1866, 237,739; see *Smithfield* and *Metropolitan Cattle-market*.

CAUCASUS, a lofty mountain, a continuation of the ridge of Mount Taurus, between the Euxine and Caspian seas. In Mythology, Prometheus was said to have been tied on the top of Caucasus by Jupiter and continually devoured by vultures (1548 B.C.). The passes near the mountain were called *Caucasiæ Portæ*, and it is supposed that through them the Sarmatians or Huns invaded the provinces of Rome, A.D. 447; see *Circassia*.

CAUCUS. An American term applied to a private meeting of the leading politicians of a party to agree upon the plans to be pursued during an election or session of congress. This institution is now a very powerful antagonist to public opinion. The word is said to be derived from "ship"-caulkers' meetings. A "caucus club," is mentioned by John Adams, in 1763. *Barlett*.

CAUDINE FORKS, according to Livy, the *Furculæ Caudinæ* (in Samnium, S. Italy), were two narrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 321 B.C. (after a fruitless contest, according to Cicero). The Roman senate broke the treaty.

CAULIFLOWER, said to have been brought from Cyprus to England about 1603.

CAUSTIC IN PAINTING, a method of burning colours into wood or ivory, invented by Gausias of Sicily. He painted his mistress Glycerè sitting on the ground making garlands with flowers; the picture was hence named *Stephanoplocon*. It was bought by Lucullus for two talents, 335 B.C. *Pliny*.

CAUTIONARY TOWNS (Holland), (the Briel, Flushing, Rammekins, and Walcheren), were given to queen Elizabeth in 1585 as security for their repaying her for assistance in their struggle with Spain. They were restored to the Dutch republic by James I. in 1616.

CAVALIER. The appellation given to the supporters of the king during the civil war, from a number of gentlemen forming themselves into a body-guard for the king in 1641. They were opposed to the Roundheads, or friends of the parliament. *Hume*.

CAVALRY. The Romans were celebrated for the discipline and efficiency of their cavalry. Attached to each Roman legion was a body of 300 horse, in ten turma; the commander always a veteran.—The Persians had 10,000 horse at Marathon, 490 B.C.; and 10,000 Persian horse were slain at the battle of Issus, 333 B.C. *Plutarch*. In the wars with Napoleon I. the British cavalry reached to 31,000 men. Our cavalry force, in 1840, was, in household troops, 1209; dragoons, hussars and lancers, 9524; total, 10,733. In 1867, horse guards 1317; cavalry of the line, 10,023; in depots, 838; in India, 5421; total 17,599; see *Horse Guards*, &c.

CAVENDISH EXPERIMENT. In 1798 the Hon. Henry Cavendish described his experiment for determining the mean density of the earth, by comparing the force of terrestrial attraction with that of the attraction of leaden spheres of known magnitude and density, by means of the torsion balance. *Brande*. The Cavendish Society, for the publication of chemical works, was established 1846.

CAWNPORE, a town in India, on the Doab, a peninsula between the Ganges and Jumna. During the mutiny in June, 1857, it was garrisoned by native troops under sir Hugh Wheeler. These broke out into revolt. An adopted son of the old Peishwa Bajee Rao, Nana Sahib, who had long lived on friendly terms with the British, came apparently to their assistance, but joined the rebels. He took the place after three weeks' siege, 26 June; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, 16 July, at Futtehpore, and retook Cawnpore, 17 July. Sir Colin Campbell defeated the rebels here on 6 Dec. following. A column was erected here, in memory of the sufferers, by their relatives of the 32nd regiment. In Dec. 1860, Nana was said to be living at Thibet; and in Dec. 1861 was incorrectly said to have been captured at Kurrachee; see *India*, 1857.

CAXTON SOCIETY, established for the publication of chronicles and literature of the Middle Ages, published sixteen volumes, 1844-54.

CAYENNE, French Guiana (S. America), settled by the French 1604-35. It afterwards came successively into the hands of the English (1654), French, and Dutch. The last were expelled by the French in 1677. Cayenne was taken by the British, 12 Jan. 1809, but was

restored to the French in 1814. Here is produced the *capsicum baccatum*, or cayenne pepper. Many French political prisoners were sent here in 1848.

CECILIAN SOCIETY, see under *Music*.

CEDAR CREEK AND MOUNTAIN, Virginia, U.S. On 19 Oct. 1864, gen. Sheridan arrived here, and converted the defeat of the Federals by the Confederates under Longstreet into a complete victory. At CEDAR MOUNTAIN gen. Stonewall Jackson defeated Banks, 9 Aug. 1862.

CEDAR TREE. The red cedar (*Juniperus Virginiana*) came from North America before 1664; the Bermudas cedar from Bermudas before 1683; the cedar of Lebanon (*Pinus Cedrus*) from the Levant before 1683. In 1850 a grove of venerable cedars, about 40 feet high, remained on Lebanon. The cedar of Goa (*Cupressus Lusitanica*) was brought to Europe by the Portuguese about 1683; see *Cypress*.

CELERY is said to have been introduced into England by the French marshal, Tallard, during his captivity in England, after his defeat at Blenheim by Marlborough in 1704.

CELESTIAL GLOBE, see *Globes*.

CELIBACY (from *cœlebs*, unmarried), was preached by St. Anthony in Egypt about 305. His early converts lived in caves, &c., till monasteries were founded. The doctrine was rejected in the council of Nice, 325. Celibacy was enjoined to bishops only in 692. The decree was opposed in England, 958-978. The Romish clergy generally were compelled to a vow of celibacy by pope Gregory VII. in 1073-85. Its observance was finally established by the council of Placentia, held in 1095. The privilege of marriage was restored to the English clergy in 1547. The marriage of the clergy was proposed, but negated at the council of Trent (1563).

CELL THEORY (propounded by Schwann in 1839) supposes that the ultimate particles of all animal and vegetable tissues are small cells. Some of the lowest forms of animal and vegetable life are said to be composed of merely a single cell, as the germinial vesicle in the egg and the red-snow plant.

CELTIBERI, see *Numantine War*. CELTS, a group of the Aryan family, see *Gauls*.

CEMETERIES. The burying-places of the Jews, Greeks, Romans, were outside their towns (*Matt.* xxvii. 60). Public cemeteries resembling "Père La Chaise"* at Paris, have been opened in all parts of the kingdom; see *Catacombs*, *Bunhill-fields*.

CENIS, MOUNT, see under *Alps*.

CENSORS, Roman magistrates, who survey and rate the property, and correct the manners of the people. The two first censors were appointed 443 B.C. Plebeian censors were first appointed 131 B.C. The office, abolished by the emperors, was revived by Decius, A.D. 251; see *Press*.

CENSUS. The Israelites were numbered by Moses, 1490 B.C.; and by David, 1017 B.C.; Demetrius Phalereus is said to have taken a census of Attica, 317 B.C. Servius Tullius enacted that a general estimate of every Roman's estate and personal effects, should be delivered to the government upon oath every five years, 566 B.C. In the United Kingdom the census is now taken at decennial periods, of which the latest were in 1801, 1811, 1821, 1831, 1841, 1851 and 1861 (7 April). For the latest census of other countries, see TABLE, facing page 1.

CENTRAL AMERICA, see *America*. A large American steamer of this name was wrecked during a gale in the gulf of Mexico, 12 Sept. 1857. Of about 550 persons only 152 were saved; several of these after drifting on rafts above 600 miles. The loss of about 2½ million dollars in specie aggravated the commercial panic at New York shortly after. The captain and crew behaved heroically.

* Père La Chaise was the favourite and confessor of Louis XIV., who made him superior of a great establishment of the Jesuits on this spot, then named Mont Louis. The house and grounds were bought for a national cemetery, which was laid out by M. Brongniart, and first used on 21 May, 1804.

periodical delivery of the gaol of Newgate, and the trial of offences of greater degree, committed in Middlesex and parts of Essex, Kent, and Surrey; the new district is considered as one county.

CENTRAL HALL OF SCIENCES, see under *Albert*.

CENTURION, the captain, head, or commander of a subdivision of a Roman legion which consisted of 100 men, and was called a *centuria*. By the Roman census each hundred of the people was called a *centuria*, 556 B.C.

CENTURY. The Greeks computed time by the Olympiads, beginning 776 B.C., and the Roman church by Indictions, the first of which began 24 Sept., A.D. 312. The method of computing time by centuries commenced from the incarnation of Christ, and was adopted in chronological history first in France. *Dupin*.

CEPHALONIA, one of the Ionian islands, was taken from the Ætoliens by the Romans, 189 B.C., and given to the Athenians by Hadrian, A.D. 135; see *Ionian Isles*.

CEPHISUS, a river in Attica, near which Walter de Brienne, duke of Athens, was defeated and slain by the Catalans, 1311.

CERBERE, a French gun-brig, with a crew of 87 men, and seven guns, in the harbour of L'Orient, within pistol-shot of three batteries, was captured in a most daring manner by lieut. Jeremiah Coghlan, in a cutter with 19 companions aided by two boats, one of which was commanded by midshipman Paddon. The prize was towed out under a heavy but ineffectual fire from the batteries, 26 July, 1800. *Nicolas*.

CEREMONIES, MASTER OF THE, an office instituted for the more honourable reception of ambassadors and persons of quality at court, 1 James I. 1603. The order maintained by the master of the ceremonies at Bath, "Beau Nash," the "King of Bath," led to the adoption of the office in ordinary assemblies: he died in his 88th year, 1761. *Ashc*.

CERES, a planet, 160 miles in diameter, was discovered by M. Piazzi, at Palermo, 1 Jan. 1801; he named it after the goddess highly esteemed by the ancient Sicilians.

CERESUOLA (N. Italy). Here Francis de Bourbon, count d'Enghien, defeated the imperialists under the marquis de Guasto, 14 April, 1544.

CERIGNOLA (S. Italy). Here the great captain Gonsalvo de Cordova and the Spaniards defeated the duc de Nemours and the French, 28 April, 1503.

CERINTHIANS, followers of Cerinthus, a Jew, who lived about A.D. 80, are said to have combined Judaism with pagan philosophy.

CERIUM, a very rare metal, discovered by Klaproth and others in 1803.

CEUTA (the ancient Septa), a town on N. coast of Africa, stands on the site of the ancient Abyla, the southern pillar of Hercules. It was taken from the Vandals by Belisarius for Justinian 534; by the Goths 618; by the Moors (about 709), from whom it was taken by the Portuguese 1415. With Portugal, it was annexed in 1580 to Spain, which power still retains it.

CEYLON (the ancient Taprobane), an island in the Indian Ocean, called by the natives the seat of paradise. It was invaded by the Portuguese Almeyda, 1505; but it was known to the Romans in the time of Claudius, 41. The Dutch landed in Ceylon in 1602; they captured the capital, Colombo, in 1603. Frequent conflicts ensued between the Candians and the Europeans, and peaceful commercial relations were established only in 1664. Intercourse with the British began in 1713. A large portion of the country was taken by them in 1782, but was restored in 1783. The Dutch settlements were seized by the British; Trincomalee, 26 Aug. 1795, and Jaffnapatam, in Sept. same year. Ceylon was ceded to Great Britain by the peace of Amiens in 1802. The British troops were treacherously massacred or imprisoned by the Adigar of Candy, at Colombo, 26 June, 1803. The complete sovereignty of the island was assumed by England in 1815. The bishopric of Colombo founded 1845. The governor, lord Torrington, was absolved from a charge of undue severity in suppressing a rebellion, May, 1851. The prosperity of Ceylon greatly increased under the administration of sir H. Ward, 1855-60. Sir J. E. Tennent's work, "Ceylon," appeared in 1859. Sir Hercules G. Robinson was appointed governor of Ceylon 7 March, 1865.

CHÆRONEA (Bœotia). Here Greece was ruined by Philip; 32,000 Macedonians defeating 30,000 Thebans, Athenians, &c., 6 or 7 Aug. 338 B.C. Here Archelaus, lieutenant of Mithridates, was defeated by Sylla, and 110,000 Cappadocians were slain, 86 B.C.; see *Coronæa*.

CHAIN-BRIDGES. The largest and oldest chain-bridge in the world is said to be that at Kingtung, in China, where it forms a perfect road from the top of one mountain to the top of another. Mr. Telford constructed the first chain-bridge on a grand scale in England, over the strait between Anglesey and the coast of Wales, 1818-25; see *Menai Straits*.

CHAIN-CABLES, PUMPS, AND SHOT. Iron chain-cables were in use by the Veneti, a people intimately connected with the Belge of Britain in the time of Caesar, 57 B.C. These cables came into use, generally in the navy of England, in 1812. An Act for the proving and sale of chain-cables and anchors was passed in 1864.—**CHAIN-SHOT**, to destroy the rigging of an enemy's ship, were invented by the Dutch admiral, De Witt, in 1666.—**CHAIN-PUMPS** were first used on board the *Flora*, British frigate, in 1787.

CHAINS, HANGING IN. By 25 Geo. II. 1752, it was enacted that the judge should direct the bodies of pirates and murderers to be dissected and anatomised, or hung in chains. The custom of hanging in chains was abolished in 1834.

CHALCEDON, Asia Minor, opposite Byzantium, colonised by Megarians, about 684 B.C. It was taken by Darius, 505 B.C.; by the Romans, 74; plundered by the Goths, A.D. 259; taken by Chosroes, the Persian, 609; by Orchan, the Turk, 1338. Here was held the "Synod of the Oak," 403; and the fourth general council, which annulled the act of the "Robber Synod," 8 Oct. 451.

CHALCIS, see *Eubœa*.

CHALDEA, the ancient name of Babylonia, but afterwards restricted to the S.W. portion. The Chaldeans were devoted to astronomy and astrology; see *Dan. ii. &c.*—The **CHALDEAN REGISTERS** of celestial observations, are said to have been commenced 2234 B.C., were brought down to the taking of Babylon by Alexander, 331 B.C. (1903 years). These registers sent to Aristotle by Callisthenes.—**CHALDEAN CHARACTERS**: the Bible was transcribed from the original Hebrew into these characters, now called Hebrew, by Ezra, about 445 B.C.

CHALGROVE (Oxfordshire). At a skirmish here with prince Rupert, 18 June, 1643, John Hampden, of the parliament party, was mortally wounded. A column was erected to his memory 18 June, 1843.

CHALONS-SUR-MARNE (N.E. France). Here the emperor Aurelian defeated Tetricus, the last of the pretenders to the throne, termed the Thirty Tyrants, 274; and here in 451 Aëtius defeated Attila the Hun, compelling him to retire into Pannonia.

CHAMBERLAIN, early a high court officer in France, Germany, and England. The office of chamberlain of the exchequer was discontinued in 1834. The chamberlain is also a civic officer, as in London, of ancient origin.

LORD GREAT CHAMBERLAIN OF ENGLAND.—The sixth great officer of state, whose duties, among others, relate to coronations and public solemnities. The office was long held by the De Veres, earls of Oxford, granted by Henry I. in 1101. On the death of John De Vere, the sixteenth earl, Mary, his sole daughter, marrying lord Willoughby d'Eresby, the right was established in that nobleman's family by a judgment of the house of peers, 2 Charles I. 1625. On the death of his descendant, unmarried, in July 1779, the house of lords and twelve judges concurred that the office devolved to lady Willoughby d'Eresby, and her sister the lady Georgina Charlotta Bertie, as heirs to their brother Robert, duke of Ancaster, deceased; and that they had powers to appoint a deputy to act for them, not under the degree of a

knight, who, if his majesty approved of him, might officiate accordingly. *Beaton*. The office is now held by the present lord Willoughby d'Eresby (1868).

LORD CHAMBERLAIN OF THE HOUSEHOLD.—An ancient office. The title is from the French *Chambellan*, in Latin *Camerarius*. He has the oversight of the king's chaplains, the officers of the standing and removing wardrobes, beds, tents, revels, music, hunting, and of all the physicians, surgeons, apothecaries, messengers, tradesmen, and artisans retained in his majesty's service. Sir William Stanley, knt., afterwards beheaded, was lord chamberlain, 1 Henry VII. 1485. A vice-chamberlain acts in the absence of the chief; the offices are co-existent. *Beaton*.

CHAMBERS, see *Commerce, Agriculture*.

CHAMBERS' JOURNAL was first published at Edinburgh in Feb. 1832.

CHAMBRE ARDENTE (fiery chamber), an extraordinary French tribunal so named from the punishment frequently awarded by it. Francis I. in 1535, and Henry II. in 1549, employed it for the extirpation of heresy, which led to the civil war with the Huguenots in 1560; and in 1679 Louis XIV. appointed one to investigate the poisoning cases which arose after the execution of the marchioness Brinvilliers.

CHAMBRE INTROUVABLE, a name given to the chamber of deputies elected in France in 1815, on account of its ignorance, incapacity, and bigoted reactionary spirit.

CHAMPAGNE, an ancient province, N.E. France, once part of the kingdom of Burgundy, was governed by counts from the 10th century till it was united to Navarre, count Thibaut becoming king, in 1234. The countess Joanna married Philip V. of France in 1284; and in 1361 Champagne was annexed by their descendant king John.

CHAMP DE MARS,* an open square in front of the Military School at Paris, with artificial embankments on each side, extending nearly to the river Seine. Here was held, 14 July, 1790 (the anniversary of the capture of the Bastille), the "fédération," or solemnity

of swearing fidelity to the "patriot king" and new constitution: great rejoicings followed. On 14 July, 1791, a second great meeting was held here, directed by the Jacobin clubs, to sign petitions on the "altar of the country," praying for the abdication of Louis XVI. A commemoration meeting took place 14 July, 1792. Another constitution was sworn to here, under the eye of Napoleon I., 1 May, 1815, at a ceremony called the *Champ de Mai*. The prince president (now Napoleon III.) had a grand review in the Champ de Mars, and distributed eagles to the army, 10 May, 1852. Here also was held the International Exhibition of 1867, opened 1 April.

CHAMPION OF THE KING OF ENGLAND, an ancient office, since 1377 has been attached to the manor of Scrivelsby, held by the Marmion family. Their descendant, sir Henry Dymoke, the seventeenth of his family who has held the office, died 28 April, 1865, and was succeeded by his brother John. At the coronation of the English kings, the champion used to challenge any one that should deny their title.

CHAMPLAIN, see *Lake Champlain*.

CHANCELLOR OF ENGLAND, LORD HIGH, after the princes of the blood royal the first lay subject. Anciently the office was conferred upon some dignified ecclesiastic termed *cancellarius*, or doorkeeper, who admitted suitors to the sovereign's presence. Arfastus or Herefast, chaplain to the king (William the Conqueror) and bishop of Elmham, was lord chancellor in 1067. *Hardy*. Thomas à Becket was made chancellor in 1154. The first person qualified by education, to decide causes upon his own judgment, was sir Thomas More, appointed in 1529, before which time the officer was rather a state functionary than a judge. Sir Christopher Hatton, appointed lord chancellor in 1587, was very ignorant, on which account the first reference was made to a master in 1588. The great seal has been frequently put in commission; in 1813 the office of *Vice-Chancellor* was established; see *Keeper*, and *Vice-Chancellor*.

' CHANCELLOR OF SCOTLAND, LORD. The laws of Malcolm II. (1004) say:—"The chancellor shall at all tymes assist the king in giving him counsall mair secretly nor the rest of his bodie. . . . The chancellor shall be ludgit neir unto the kingis grace, for keeping of his bodie, and the seill, and that he may be readie, baith day and nicht, at the kingis command." *Sir James Balfour.* Evan was lord chancellor to Malcolm III., Canmore, 1057; and James, earl of Seafeld, afterwards Findlater, was the last lord chancellor of Scotland, the office having been abolished in 1708; see *Keeper*.

CHANCELLOR OF THE EXCHEQUER, see *Exchequer*.

CHANCELLOR'S AUGMENTATION ACT, passed 1863, enabled the lord chancellor to sell the advowson of certain livings in his gift for augmenting poor benefices.

CHANCELLORSVILLE, Virginia, U.S., a large brick hotel, once kept by a Mr. Chancellor, was the site of severe sanguinary conflicts between the American federal army of the Potomac under general Hooker, and the confederates under general Lee. On 28 April, 1863, the federal army crossed the Rappahannock; on 2 May, general "Stonewall" Jackson furiously attacked and routed the right wing, but was mortally wounded by his own party firing on him by mistake. Gen. Stuart took his command, and after a severe conflict on 3 and 4 May, with great loss to both parties, the federals were compelled to recross the Rappahannock. The struggle was compared to that at Hougomont during the battle of Waterloo. Jackson died 10 May.

CHANCERY, COURT OF. Said to have been instituted either in 605, or by Alfred, 887; refounded by William I., 1067 (*Stow*) or 1070. This court had its origin in the desire to render justice complete, and to moderate the rigour of other courts that are bound to the strict letter of the law. It gives relief to or against infants, notwithstanding their minority;

and to or against married women, notwithstanding their coverture; and all frauds, deceits, breaches of trust and confidence, for which there is no redress at common law, are relievable here. *Blackstone*; see *Chancellors of England*. The delays in chancery proceedings having long given dissatisfaction, the subject was brought before parliament in 1825, and frequently since; which led to the passing of important acts in 1852, 1853, 1855, 1858, and 1867, to amend the practice in the court of chancery; see *County Courts*.

CHANDOS CLAUSE, see *Counties*.

CHANTING the psalms was adopted by Ambrose from the pagan ceremonies of the Romans, about 350. *Lenglet*. About 602, Gregory the Great added tones to the Ambrosian chant, and established singing schools. Chanting was adopted by some dissenters about 1859.

CHANTRY, a chapel endowed with revenue for priests to sing mass for the souls of the donors; see *Chanting*. Chantries were abolished in England in 1545.

CHAPEL. There are free chapels, chapels of ease, the chapel royal, &c. *Cowell*. The gentlemen pensioners (formerly poor knights of Windsor, who were instituted by the direction of Henry VIII. in his testament, 1546-7) were called knights of the chapel; see *Poor Knights of Windsor*.—The place of conference among printers, and the conference itself, are by them called a *chapel*, it is said because the first work printed in England by Caxton was executed in a ruined chapel in Westminster-abbey.

CHAPLAIN, a clergyman who performs divine service in a chapel, for a prince or nobleman. About seventy chaplains are attached to the chapel royal. The chief personages invested with the privilege of retaining chaplains are the following, with the number that was originally allotted to each rank, by 21 Hen. VIII. c. 13 (1529):—

Archbishop 8	Earl 5	Knight of the Garter 3	Baroness 2
Duke 6	Viscount 4	Duchess 2	Master of the Rolls 2
Bishop 6	Baron 3	Marchioness 2	Almoner 2
Marquess 5	Chancellor 3	Countess 2	Chief Justice 1

CHAPLETS, the string of beads used by the Roman Catholics in reciting the Lord's prayer, Ave Maria, &c.; see *Beads*.

CHAPTER. Anciently the bishop and clergy lived in the cathedral, the latter to assist the former in performing holy offices and governing the church, until the reign of Henry VIII. The chapter is now an assembly of the clergy of a collegiate church or cathedral. *Cowell*. The chapter-house of Westminster-abbey was built in 1250. By consent of the abbot, the commoners of England held their parliaments there from 1377 until 1547, when Edward VI. granted them the chapel of St. Stephen.

CHARCOAL AIR-FILTERS were devised by Dr. John Stenhouse, F.R.S., in 1853. About the end of the last century Löwitz, a German chemist, discovered that charcoal (carbon) possessed the property of deodorising putrid substances, by absorbing effluvia and gases. Air-filters, based on this property, have been successfully applied to public buildings, &c. Dr. Stenhouse also invented charcoal respirators.

CHARING CROSS. At the village of Charing stood the last of the memorial crosses erected in memory of Eleanor, queen of Edward I., in conformity with her will. She died 28 Nov. 1390. The cross remained till the civil wars in the reign of Charles I., when it was destroyed as a monument of popish superstition. It was restored by the South Eastern Railway Company in 1865. The houses at Charing-cross were built about 1678; alteration began in 1829. The first stone of Charing-cross hospital was laid by the duke of Sussex, 15 Sept. 1831. Hungerford-bridge (or Charing-cross bridge) was opened 1 May, 1845; taken down July, 1862, and the materials employed in erecting Clifton suspension bridge, beginning March, 1863; see *Clifton*.—CHARING-CROSS RAILWAY. The first train passed over it 2 Dec. 1863, and it was opened to the public on 11 Jan. 1864. The new railway bridge, built of iron with brick piers, was constructed by Mr. Hawkshaw.

CHARIOTS. Chariot racing was a Greek exercise. The chariot of an Ethiopian officer is mentioned *Acts* viii. 27. Cæsar relates that Cassibelaunus, after dismissing his other forces, retained no fewer than 4000 war-chariots about his person; see *Carriages*, &c.

CHARITABLE BEQUESTS, &c. Boards for their recovery were constituted in 1764 and 1800, and a board for Ireland (chiefly prelates of the established church), in 1825. The Roman Catholic Charitable Bequests act passed in 1844, and an act for the better administration of Charitable Trusts in 1853, when commissioners were appointed, who have from time to time published voluminous reports. The law relating to the conveyance of land for *Charitable Uses* was amended in 1861.

CHARITABLE BRETHERN, an order founded by St. John of God, and approved by pope Pius V. 1572; introduced into France, 1601; settled at Paris, 1602. *Henault*.

CHARITIES AND CHARITY SCHOOLS are very numerous in this country. The Charity Commission reported to parliament that the endowed charities alone of Great Britain amounted to 1,500,000*l.* annually, in 1840. *Parl. Rep.* Charity schools were instituted in London to prevent the seduction of the infant poor into Roman Catholic seminaries, 3 James II., 1687-8. *Rapin*; see *Education*. Mr. Low's "Charities of London" (2nd edition) was published 1862.

CHARLEROI, in Belgium. Several great battles have been fought near this town, especially in 1690 and 1794; see *Fleurus*. Charleroi was besieged by the prince of Orange, 1672, and 1677; but he was soon obliged to retire. Near here, at Ligny, Napoleon attacked the Prussian line, making it fall back upon Wavres, 16 June, 1815.

CHARLES ET GEORGES. Two French vessels of this name, professedly conveying free African emigrants (but really slaves), were seized by the Portuguese, in Conducia bay, 29 Nov. 1857, sent to Lisbon, and condemned as slavers. They were haughtily demanded by the French government, who, on the hesitation of the Portuguese, sent two ships of war to the Tagus. The vessels were then surrendered under protest; and the emperor of France gave up the free emigration scheme.

CHARLESTOWN (Massachusetts) was burnt by the British forces under general Gage, 17 June, 1775. Charleston taken by the British, 7 May, 1779.

CHARLESTON (South Carolina). The English fleet here was repulsed with great loss, 28 June, 1776. It was besieged by the British troops at the latter end of March, 1780, and surrendered 13 May, following, with 6000 prisoners; it was evacuated 14 April, 1783. Great commotion arose here in Nov. 1860, through the election of Mr. Lincoln for the presidency, he being opposed to slavery. On 12, 13 April, 1861, the war began by the confederates bombarding Fort Sumter; see *United States*. In Dec. 1861, the federals sank a number of vessels laden with stone in order to choke up the entrance to Charleston harbour. Unsuccessful attacks were made on Charleston by the federals between March 1863 and 17 Feb. 1865, when the confederates were compelled to retire; and the federals replaced their standard on fort Sumter, 14 April, the day on which president Lincoln was assassinated.

"CHARTRE CONSTITUTIONNELLE," the French political constitution acknowledged by Louis XVIII., 4-10 June, 1814. The infraction of this constitution led to the revolution of 1830. The amended "Charte" was promulgated by Louis-Philippe, 14 Aug. 1830; and set aside by the revolution of 1848.

CHARTER-HOUSE (a corruption of Chartreuse, *which see*), London, formerly a Carthusian monastery, founded in 1371 by sir Walter de Manny, one of the knights of Edward III., now an extensive charitable establishment. The last prior, John Houghton, was executed as a traitor, for denying the king's supremacy, in May, 1535. After the dissolution of monasteries in 1539, the charter-house passed through various hands till 1 Nov. 1611, when it was sold by the earl of Suffolk to Thomas Sutton for 13,000*l.*, who obtained letters patent directing that it should be called "the hospital of king James, founded in the Charter-house," and that "there should be for ever 16 governors," &c. On the foundation are 80 poor brothers, and 44 poor scholars. Sutton died 12 Dec. 1611. The expenditure for 1853-4 was 22,396*l.*, the receipts 28,908*l.* The school is to be removed to Godalming, Surrey: the last "founder's day" kept in London was 12 Dec. 1867.

CHARTER-PARTY, a covenant between merchants and masters of ships relating to the ship and cargo, said to have been first used in England about 1243.

CHARTERS, granted to corporate towns to protect their manufactures by Henry II. in 1132; called in and modified by Charles II. in 1682; the ancient charters restored in 1698. Alterations were made by the Municipal Reform Act in 1835; see *Magna Charta*, and *Boroughs*. Ancient Anglo-Saxon charters are printed in Kemble's "Codex Diplomaticus," 1829.

CHARTISTS, the name assumed by large bodies of the lower classes, shortly after the passing of the Reform Bill in 1832, from their demanding the people's *Charter*, the six points of which were *Universal Suffrage*, *Vote by Ballot*, *Annual Parliaments*, *Payment of the Members*, *the abolition of the Property Qualification* (which was enacted, June, 1858), and *Equal Electoral Districts*. In 1838 the chartists assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags. A proclamation was issued against them, 12 Dec. Their petition (agreed to at Birmingham, 6 Aug. 1838) was presented by Mr. T. Attwood, 14 June, 1839. They committed great outrages at Birmingham, 15 July, 1839, and at Newport (*which see*), 4 Nov. 1839. They held for some time a sort of parliament called the "National Convention," the leading men being Fergus O'Connor, Henry Vincent, Mr. Stephens, &c. On 10 April, 1848, they proposed to hold a meeting of 200,000 men on Kennington common, London, to march thence in procession to

Westminster, and present a petition to parliament; but only about 20,000 came. The bank and other establishments were fortified by military; successful preventive measures adopted by the government; and the chartists dispersed after slight encounters with the police. The monster petition, in detached rolls, was sent in cabs to the house of commons, and not less than 150,000 persons of all ranks (including Louis Napoleon, now emperor) were voluntarily sworn to act as special constables. From this time the proceedings of the chartists became insignificant.

CHARTREUSE, LA GRANDE, chief of the monasteries of the Carthusian order, situated among the rugged mountains near Grenoble, in France, was founded by Bruno of Cologne, about 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery after the restoration of 1814.

CHARTS AND MAPS. Anaximander of Miletus is said to have been the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent 1489. The first tolerably accurate map of England was drawn by George Lilly, who died in 1559. Gerard Mercator published an atlas of maps in 1595; see *Mercator*.

CHASSEPOT RIFLE, a breech-loader (named after its inventor M. Chassepot), and adopted by the French government in 1866. In April, 1867, 10,000 had been issued to the troops. In his report on the battle of Mentana (*which see*), 3 Nov. 1867, gen. De Failly said, "the chassepot has done wonders."

CHASTITY. The Roman laws justified homicide in defence of one's self or relatives; and our laws justify a woman for killing a man in defence of her chastity; and a husband or a father in taking the life of him who attempts to violate his wife or daughter. In 1000 years from Numa, 710 B.C., to Theodosius, A.D. 394, only eighteen Roman vestals had been condemned for incontinence; see *Vestals, Aere, and Coldingham*.

CHATHAM (Kent), a principal station of the royal navy, the dockyard, commenced by queen Elizabeth. The *Chatham Chest*, for the relief of wounded and decayed seamen, originally established here by the queen and admirals Drake and Hawkins, in 1588, was removed to Greenwich in 1803. In 1667, on the 10th June, the Dutch fleet under admiral De Ruyter, sailed up to this town and burnt several men-of-war; but the entrance into the Medway is now defended by Sheerness and other forts, and additional fortifications were made at Chatham. On 8 Feb. 1861 a violent outbreak of the convicts was suppressed by the military, and many rioters flogged. About 1000*l.* worth of property was destroyed, and many persons were seriously hurt.

CHATHAM ADMINISTRATION,* succeeded the first Rockingham administration in Aug. 1766: after several changes it terminated Dec. 1767.

Earl of Chatham, *first minister and lord privy seal*.
Duke of Grafton, *first lord of the treasury*.
Lord Camden, *lord chancellor*.
Charles Townshend, *chancellor of the exchequer*.
Earl of Northampton, *lord president*.
Earl of Shelburne and general Conway, *secretaries of state*.

Sir Charles Saunders (succeeded by sir Edward Hawke), *admiralty*.
Marquess of Granby, *ordnance*.
Lord Hillsborough, *first lord of trade*.
Lord Barrington, *secretary at war*.
Lord North and sir George Cooke, *joint paymasters*.
Viscount Howe, *treasurer of the navy*.
Duke of Ancaster, lord le Despenser, &c.

CHATILLON (on the Seine, France). Here a congress was held by the four great powers allied against France, at which Caulaincourt attended for Napoleon, 5 Feb. 1814: the negotiations for peace were broken off on 19 March, following.

CHAT MOSS (Lancashire), a peat bog twelve miles square, in most places so soft as to be incapable of supporting a man or horse, over which George Stephenson, the railway engineer, carried the Liverpool and Manchester railway, after overcoming difficulties considered invincible. The road (literally a floating one) was completed by 1 Jan. 1830, when the first experimental train, drawn by the Rocket locomotive, passed over it.

CHATTANOOGA (Tennessee). Near here the federal generals, Sherman and Thomas, defeated the confederate general Bragg, after storming the entrenchments, 25 Nov. 1863. The result was very injurious to the confederates. Bragg retreated into Georgia, and Longstreet into Virginia.

CHAUMONT (on the Marne, France), **TREATY OF**, entered into between Great Britain, Austria, Russia, and Prussia, and signed by these powers respectively, 1 March, 1814. This

* William Pitt, earl of Chatham (the "great commoner"), born 15 Nov. 1708, entered parliament in 1735; became secretary of state (virtually the premier) in the Devonshire administration, Nov. 1756, secretary in the Newcastle administration, Jan. 1757. In 1766 he became premier, lord privy seal, and afterwards earl of Chatham, which lord Chesterfield called a *fall upstairs*. He opposed the taxation of the American colonies, but protested against the recognition of their independence, 7 April, 1778, and died 11 May following.

treaty was succeeded by the celebrated treaty of Paris, 11 April, following, by which Napoleon renounced his sovereignty over France; see *Paris*.

CHEATS were punishable by pillory, imprisonment, and fine, 1 *Hawk*. L.C. 188. A rigorous statute was enacted against them in 1542. Persons cheating at play, or winning at any time more than 10*l.* or any valuable thing, were deemed infamous, and were to suffer punishment as in cases of perjury, 9 *Anne*, 1711. *Blackstone*.

CHEESE. It is supposed by Camden and others that the English learned cheese-making from the Romans about the Christian era. Wilts, Gloucester, and Cheshire make vast quantities; the last alone, annually, about 31,000 tons. In 1840 we imported from abroad about 10,000 tons; in 1855, 384,192 cwt.; in 1866, 872,342 cwt. The duty on foreign cheese, producing annually about 50,000*l.*, was taken off in 1860.

CHELSEA (Middlesex). A council held here 27 July, 816. *Nicolas*. On the site of a theological college founded by James I. in 1609 for theological disputations against popery, but converted by Charles II. in 1682 to its present purpose, stands *Chelsea college*, an asylum for wounded and superannuated soldiers. The erection was carried on by James II., and completed by William III. in 1690. The real projector was sir Stephen Fox, grandfather of the orator C. J. Fox. The architect was sir Christopher Wren, and the cost 150,000*l.* In 1850 there were 70,000 *out-* and 539 *in-pensioners*.—The body of the duke of Wellington lay here in state, 10-17 Nov. 1852.—The physic garden of sir Hans Sloane, at Chelsea, was given to the Apothecaries' company 1721.—The Chelsea waterworks were incorporated 1722.—The first stone of the Military Asylum, Chelsea, was laid by Frederick, duke of York, 19 June, 1801.—The bridge, constructed by Mr. T. Page to connect Chelsea with Battersea-park, was opened in the spring of 1858. The parliamentary borough of Chelsea, created by the Reform act, 15 Aug. 1867, consists of Chelsea, Kensington, Fulham, and Hammersmith.

CHELTENHAM (Gloucestershire). Its celebrated mineral spring was discovered in 1718. The king's-well was sunk in 1778; and other wells by Mr. Thompson in 1806. Magnesian salt was first found in the waters in 1811. The theatre was erected in 1804.

CHEMICAL SOCIETIES. One formed in London in 1780, did not long continue. The present Chemical society was established in 1841; that at Paris was in 1857.

CHEMISTRY was introduced into Europe by the Spanish Moors, about 1150; they had learned it from the African Moors, and these from the Egyptians. In Egypt they had, in very early ages, extracted salts from their bases, separated oils, and prepared vinegar and wine; and embalming was a kind of chemical process. The Chinese also claim an early acquaintance with chemistry. The first chemical students in Europe were the Alchemists (see *Alchemy*); but chemistry could not be said to exist as a science till the 17th century; during which its study was promoted by the writings of Bacon and the researches of Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of *Pneumatic Chemistry*, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Black, Bergman, Stahl, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, ammonia, &c.; and thus commenced a new era in the history of chemistry. He was ably seconded by Lavoisier, Cavendish, Scheele, Chaptal, &c. The 19th century opened with the brilliant discoveries of Davy, continued by Dalton, Faraday, Thomson, &c. *Organic Chemistry* has been very greatly advanced by the labours of Berzelius, Liebig, Dumas, Laurent, Hofmann, Cahours, Frankland,* &c., since 1830; see *Pharmacy*, *Electricity*, *Galvanism*. For the analytical processes termed "*Spectrum analysis*," invented by Kirchhoff and Buusen (1861), "*Dialysis*" (1861), and "*Atmolysis*" (1863), invented by Mr. T. Graham, see those articles.—The *Royal College of Chemistry*, Oxford Street, London, was established in 1845.—The publication of Henry Watts' great "*Dictionary of Chemistry*" began in April, 1863.

CHEQUES, see *Drafts*.

CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V. in 1418, and lost in 1450. Under the direction of Louis XIV., some works were erected here by the great Vauban, which with some shipping, &c., were destroyed by the British, 6, 7 Aug. 1758. The works were resumed on a stupendous scale by Louis XVI.; but their progress was interrupted by the revolution. The breakwater, commenced in 1783, resumed by Napoleon I. about 1803, and completed in 1813, forms a secure harbour, affording anchorage for nearly the whole navy of France, and protected by strong fortifications,

* In 1828 Wöhler succeeded in producing artificially *urea*, a body hitherto known only as a product of the animal organism. Since then, acetic acid, alcohol, grape sugar, various essential oils, similar to those of the pine apple, pear, garlic, &c., have been formed by combinations of the gases, oxygen, hydrogen, and carbonic acid. The barrier formed by chemists between organic and inorganic bodies is thus broken down, though the names are still retained.

increased by the present emperor. On 4, 5 Aug. 1858, the railway and the Grand Napoleon docks were opened, the latter in the presence of the queen of England and court. The British fleet visited Cherbourg, 15-17 Aug. 1865, and the officers and men were treated with much hospitality.

CHERITON DOWN (Hants). Here sir Wm. Waller defeated the royalists under lord Hopton, 29 May, 1644.

CHERRY, the *Prunus Cerasus* (from Cerasus, a city of Pontus, whence the tree was brought by Lucullus to Rome, about 70 B.C.), first planted in Britain, it is said, about 100. Fine kinds were brought from Flanders, in 1540, and planted in Kent.

CHERSON, see *Kherson*.

CHERSONESUS, see *Crimea*.

CHESAPEAKE. At the mouth of this river a contest took place between the British admiral Greaves and the French admiral De Grasse, aiding the revolted states of America; the former was obliged to retire, 1781. The Chesapeake and Delaware were blockaded by the British fleet in the American war of 1812, and the bay was, at that period, the scene of great hostilities of various results.—The *Chesapeake* American frigate, commanded by capt. Lawrence (50 guns, 376 men), struck to the *Shannon* British frigate (38 guns, 330 men), commanded by capt. Philip Vere Broke, after a severe action of eleven minutes, 1 June, 1813. Eleven minutes elapsed between the firing of the first gun and the boarding, and in four minutes more the *Chesapeake* was the *Shannon's* prize. Capt. Lawrence died of his wounds.

CHESS, a game attributed to Palamedes, 680 B.C.; Hyde and sir William Jones refer the origin of chess to India. Caxton printed "the Game and Playe of the Chesse," 1474. The automaton chess-player (a piece of machinery) was exhibited in England in 1769.* A chess congress was held at New York in 1857, and an international one in London in June and July, 1862.

CHESTER (England, N. W.), the British Caerleon and the Roman Deva, the station of the twentieth legion, *Valeria Victricis*, quitted by them about 476. The city wall was first built by Edelfleda, about 908; and Hugh Lupus, the earl, nephew of William I., rebuilt the Saxon castle in 1084, and the abbey of St. Werburgh. Chester was incorporated by Henry III. and made a distinct county. The see was anciently part of Lichfield, one of whose bishops, Peter, removing the seat thither in 1075, occasioned his successors to be styled bishops of Chester; but was not erected into a distinct bishopric until Henry VIII. in 1541 raised it to this dignity, and allotted the church of the abbey of St. Werburgh for the cathedral. This see is valued in the king's books at 420*l.* 1*s.* 8*d.* per annum. Present income 4500*l.*

Chester ravaged by Danes 980
Nearly destroyed by a fire 1471
Taken, after 3 months' siege, for the parliament 1645
Fatal gunpowder explosion 1772
Exchange and town hall burnt 30 Dec. 1862
A projected attack of Fenians on Chester castle was defeated by the vigilance of the authorities and the arrival of the military 11, 12 Feb. 1867

CHICAMAUGA ("the stream of death"), near the Chattanooga, Tennessee, North America. Near here the confederates under general Bragg, aided by Longstreet, totally defeated the federals under Rosencrans, 19, 20 Sept. 1863. The loss was severe on both sides. The credit of the victory was attributed to Longstreet; its fruitlessness to Bragg.

CHICHESTER (Sussex), built by Cissa, about 540. The cathedral was completed about 1108, burnt with the city in 1114, and rebuilt by bishop Seffrid about 1187. The present cathedral was erected during the 13th century. The spire fell 20 Feb. 1861, the foundation of a new one was laid 2 May, 1865, completed June 1866. The cathedral reopened after repairs 14 Nov. 1867. The bishopric originated thus: Wilfrida, archbishop of York, compelled to flee by Egfrid, king of Northumberland, preached the gospel in this country, and built a church in the Isle of Selsey, about 673. In 681 Selsey became a bishopric, and so continued until it was removed to Chichester, then called Cissan-Caester, from its builder, Cissa, by Stigand, 1070. This see has yielded to the church two saints, and to the nation three lord chancellors. It is valued in the king's books at 677*l.* 1*s.* 3*d.* per annum. Present income, 4200*l.*

* A chess-club was formed at Slaughter's coffee-house, St. Martin's lane, in 1747. M. F. A. Danican, known as Phillidor, played three matches blindfolded at the Salopian; he died in 1795. The London Chess-club was founded in 1807, and St. George's in 1833. In Dec. 1861 Herr Paulsen played 10 games at once, of which he won five, and lost one; three were drawn, and one not played out.

CHICORY, the wild endive, or *Cichorium Intybus* of Linnæus, grows wild in calcareous soils. It has been raised to some extent in England as herbage, its excellence in this respect having been much insisted upon by Arthur Young.*

CHIGNON, French for the "back-hair" of ladies. In directions for full dress in 1783, it is said: "The hair large and the chignon low behind." *Lady's Magazine*. Large chignons began to be worn in England in 1866.

CHILDERMAS DAY, 28 Dec., of ancient observance by the Roman Church, in memory of the slaughter of the Holy Innocents. (*Matt. ii.*)

CHILDREN. Many ancient nations exposed their infants,—the Egyptians on the banks of rivers, and the Greeks on highways,—when they could not support or educate them; in such cases, they were protected by the state. The old custom of English parents selling their children to the Irish for slaves, was prohibited by Canute, about 1017. *Mat. Paris*; see *Foundling*, and *Factory Acts*.

CHILI (S. America), discovered by Diego de Almagro, one of the conquerors of Peru, 1535. When Almagro crossed the Cordilleras, the natives, regarding the Spaniards on their first visit as allied to the Divinity, collected for them gold and silver amounting to 290,000 ducats, a present which led to the subsequent cruelties and rapacity of the invaders. Chili was subdued, but not wholly, in 1546. Population in 1865, 1,819,223.

CHILLIANWALLAH, BATTLE OF, India, between the Sikh forces in considerable strength, and the British commanded by lord (afterwards viscount) Gough, fought 13 Jan. 1849. The Sikhs were completely routed, but the loss of the British was very severe: 26 officers were killed and 66 wounded, and 731 rank and file killed, and 1446 wounded. The Sikh loss was 3000 killed and 4000 wounded.† On 21 Feb. lord Gough attacked the Sikh army, under Shere Singh, in its position at Goojerat, with complete success; and the whole of the enemy's camp fell into the hands of the British.

CHILTERN HUNDREDS (viz. Burnham, Desborough, and Stoke), an estate of the crown on the chain of chalk hills that pass from east to west through the middle of Buckinghamshire, the stewardship whereof is a nominal office, with a salary of 20s., conferred on members of parliament when they wish to vacate their seats, as, by accepting an office under the crown, a member becomes disqualified, unless he be again returned by his constituents. The strict legality of the practice is questioned.

CHIMNEY-TAX, see *Hearth*.

CHIMNEYS. Chafing-dishes were in use previous to the invention of chimneys, which were first introduced into these countries, in 1200, when they were confined to the kitchen and large hall. The family sat round a stove, the funnel of which passed through the ceiling, in 1300. Chimneys were general in domestic architecture in 1310. Act to regulate

* Chicory had been for many years so largely mixed with coffee in England, that it became a matter of serious complaint, the loss of revenue being estimated at 100,000*l.* a year. An excise order was issued, 3 Aug., 1852, interdicting the mixture of chicory with coffee. The admixture, however, has since been permitted, provided the word "chicory" be plainly printed on each parcel sold. In 1866 a duty of 3s. per cwt. was put upon English-grown chicory until April 1861; after that date to be 5s. 6*d.* per cwt.

† The duke of Wellington (commander-in-chief) did not think the victory complete. Gough was superseded, and sir C. Napier sent out (March 1849), who did not arrive in India till Gough had redeemed his reputation.

chimney-sweeping, 28 Geo. III. 1789. The *chimney-sweeping machine* was invented by Smart in 1805. A statute regulating the trade, the apprenticeship of children, the construction of flues, preventing calling "sweep" in the streets, &c., passed 1834. By 5 Vict. 1840, it is not lawful for master sweeps to take apprentices under sixteen years of age : and since 1 July, 1842, no individual under twenty-one may ascend a chimney. In 1864, the enforcement of this law was made more stringent, it having been neglected. Joseph Glass, inventor of the sweeping machine now in general use, *not patented*, died 29 Jan. 1868. At the chemical works, Glasgow, is a chimney (there termed a *stalk*) 420 feet in height ; the height of the monument in London being 202 feet ; of St. Paul's, 404 feet.

CHINA, the "Celestial Empire," in Eastern Asia, for which the Chinese annals claim an antiquity of from 80,000 to 100,000 years B.C., is allowed to have commenced about 2500 B.C. ; by others to have been founded by Fohi, supposed to be the Noah of the Bible, 2240 B.C. We are told that the Chinese were acute astronomers in the reign of Yao, 2357 B.C. Towards the close of the 7th century B.C., the history of China becomes more distinct. Twenty-two dynasties have reigned, including the present. The population of China was estimated at 190,348,228 in 1757 ; at 414,607,000 in 1860 ; and at 450,000,000 in 1867.

* He took part (it was said without authority) in arranging the treaty of Tien-sin in June, 1858. He was in consequence condemned to death—by suicide.

† The non-fulfilment of this treaty led gradually to the war of 1856-7.

‡ The emperor Taou-Kwang, who died 25 Feb. 1850, during the latter part of his reign, became liberal in his views, and favoured the introduction of European arts; but his son, the late emperor, a rash and narrow-minded prince, quickly departed from his father's wise policy, and adopted reactionary measures, particularly against English influence. An insurrection broke out in consequence, Aug. 1850, and quickly became of alarming importance. The insurgents at first proposed only to expel the Tartars; but in March, 1851, a pretender was announced among them, first by the name of Tien-teh (Celestial Virtue), but afterwards assuming other names. He is stated to have been a native of Quang-si, of obscure origin, but to have obtained some literary knowledge at Canton about 1835, and to have become acquainted at that time with the principles of Christianity from a Chinese Christian, named Leang-afa, and also from the missionary Roberts in 1844. He announced himself as the restorer of the worship of the true God, Shang-ti, but has derived many of his dogmas from the Bible. He declared himself to be the monarch of all beneath the sky, the true lord of China (and thus of all the world), the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin in Nov. 1860. His followers are termed *Taepings*, "princes of peace," a title utterly belied by their atrocious deeds. The rebellion was virtually terminated 18 July, 1864, by the capture of Nankin, the suicide of the Tien-Wang, and the execution of the military leaders.

§ It was boarded by the Chinese officers, 12 men out of the crew of 14 being carried off, and the national ensign taken down. Sir J. Bowring, governor of Hong-Kong, being compelled to resort to hostilities, applied to India and Ceylon for troops. On 3 March, 1857, the house of commons, by a majority of 19, censured sir John for the "violent measures" he had pursued. The ministry (who took his part) dissolved the parliament; but obtained a large majority in the new one.

CHIOS (now Scio), an isle in the Greek Archipelago, revolted against Athens, 412 B.C. It partook of the fortunes of the Greeks, being conquered by the Venetians, A. D. 1124; by the Crusaders, 1204; by the Greek emperor and Romans, 1329; by the Genoese, 1329; and finally by the Turks in 1594. A dreadful massacre of the inhabitants by the Turks took place 11 April, 1822, during the Greek insurrection.*

CHIPPAWA (N. America). Here the British under Riall were defeated by the Americans under Browne, 5 July, 1814. The Americans were defeated by the British under Drummond and Riall, 25 July following, but Riall was wounded and taken prisoner.

CHIVALRY arose out of the feudal system in the latter part of the 8th century (*chevalier*, or knight, being derived from the *caballarius*, the equipped feudal tenant on horseback). From the 12th to the 15th century it tended to refine manners. The knight swore to accomplish the duties of his profession, as the champion of God and the ladies, to speak the truth, to maintain the right, to protect the distressed, to practise courtesy, to fulfil obligations, and to vindicate in every perilous adventure his honour and character. Chivalry expired with the feudal system; see *Tournaments*. By letters patent of James I. the earl-marshal of England had "the like jurisdiction in the courts of chivalry, when the office of lord high constable was vacant, as this latter and the marshal did jointly exercise," 1623; see *Knighthood*.

CHLORINE (Greek *chloros*, pale green), a gas first obtained by Scheele in 1774, by treating manganese with muriatic (hydrochloric) acid. Sir H. Davy, in 1810, proved this gas to be an element, and named it chlorine. Combined with sodium it forms common salt (chloride of sodium), and combined with lime it forms the bleaching powder and disinfectant, chloride of lime. The bleaching powers of chlorine were made known by Berthollet in 1785. In 1823 Faraday condensed chlorine into a liquid.

CHLOROFORM (the ter-chloride of the hypothetical radical formyl) is a compound of carbon, hydrogen, and chlorine, and was made from alcohol, water, and bleaching powder. It was discovered by Soubeiran in 1831, and its composition was determined by Dumas in 1834. The term "chloric ether" was applied in 1820 to a mixture of chlorine and olefiant gas. Chloroform was first applied as an anæsthetic experimentally by Mr. Jacob Bell in London, in Feb., and Dr. Simpson of Edinburgh in Nov. 1847; and was administered in England on 14 Dec. 1848, by Mr. James Robinson, surgeon-dentist.†

CHOBHAM COMMON, in Surrey. A military camp was formed here on 14 June, 1853, by a force between 8000 and 10,000 strong. The last field-day took place 17 Aug. 1860. Only one serious case of misconduct was reported during all the time.

CHOCOLATE, made of the cocoa berry, introduced into Europe (from Mexico and the Brazils) about 1520, was sold in the London coffee-houses soon after their establishment, 1650.

* The slaughter lasted 10 days: 40,000 of both sexes falling victims to the sword, or to the fire, which raged until every house, save those of the foreign consuls, was burned to the ground. 7000 Greeks, who had fled to the mountains, were induced to surrender by a promise of amnesty, guaranteed by the consuls of England, France, and Austria: yet even they were all butchered! The only exception made during the massacre was in favour of the young and more beautiful women and boys, 30,000 of whom were reserved for the markets.

† A committee of the Royal Medical and Chirurgical Society in July, 1864, after examining statistics, reported that the use of anæsthetics had in no degree increased the rate of mortality.

CHOIR. This was separated from the nave of the church in the time of Constantine. The choral service was first used in England at Canterbury, 677; see *Chanting*.

CHOLERA MORBUS (Asiatic cholera) was described by Garcia del Huerto, a physician of Goa, about 1560. It appeared in India in 1774, and at other times, and became endemic in Lower Bengal in 1817, whence it gradually spread, till it reached Russia in 1830, and Germany in 1831, carrying off more than 900,000 persons, in 1829-30. In England and Wales in 1848-9, 53,293 persons died of cholera, and in 1854, 20,097.

Cholera appears at Sunderland 26 Oct. 1831	Very severe in Constantinople, nearly 50,000 deaths, Aug.; subsides after the great fire, 6 Sept. 1865
And at Edinburgh 6 Feb. 1832	Cases at Marseilles, Toulon, and Southampton, end of Sept. "
First observed at Rotherhithe and Limehouse, London, 13 Feb; and in Dublin 3 March, "	Cholera prevalent at Marseilles, Paris, Madrid, and Naples July-Oct. "
The mortality very great, but more so on the Continent; 18,000 deaths at Paris, between March and Aug. "	An international meeting at Constantinople, to consider preventive measures, proposed, Oct. 1865, met 18 Feb. 1866. At the last sitting the conclusions adopted were that cholera may be propagated, and from great distances; and a number of preventive measures were recommended 26 Sept. 1866

CHORAGUS, an officer who regulated the chorus in Greek feasts, &c. Stesichorus (or Tysias) received this name, he having first taught the chorus to dance to the lyre, 556 B.C. *Quintil.*

CHORUS-SINGING was early practised at Athens. Hypodicus, of Chalcedes, carried off the prize for the best voice, 508 B.C. *Parian marbles*; see *Music*.

CHOUANS, a name given to the Bretons during the war of La Vendée in 1792, from their chief Jean Cottereau, using the cry of the *Chat-haunt*, or screech-owl, as a signal. He was killed in 1794. Georges Cadoudal, their last chief, was connected with Pichegru in a conspiracy against Napoleon when first consul, and was executed in 1804.

CHRISM, consecrated oil, was used early in the ceremonies of the Roman and Greek churches. Musk, saffron, cinnamon, roses, and frankincense, are mentioned as used with the oil, in 1541. It was ordained that chrism should consist of oil and balsam only; the one representing the human nature of Christ, and the other his divine nature, 1596.

CHRIST, see *Jesus Christ*. **CHRIST'S HOSPITAL** (the *Blue-Coat* school) was established by Edward VI. 1553, on the site of the Grey Friars monastery. A mathematical ward was founded by Charles II., 1672. The *Times* ward was founded in 1841. Large portions of the edifice having fallen into decay, it was rebuilt: in 1822 a new infirmary was completed, and in 1825 (25 April) the duke of York laid the first stone of the magnificent new hall. On 24 Sept. 1854, the master, Dr. Jacob, in a sermon, in the church of the hospital, censured the system of education and the general administration of the establishment, and many improvements have since been made. The subordinate school at Hertford, for 416 younger boys and 80 girls, was founded in 1683.—**CHRIST'S-THORN**, conjectured to be the plant of which our Saviour's crown of thorns was composed, came hither from the south of Europe before 1596.

CHRISTIAN ERA, see *Anno Domini*. **CHRISTIAN KNOWLEDGE SOCIETY** was founded in 1698 to promote charity schools, and to disperse Bibles and religious tracts. It has an annual revenue of about 100,000*l.* **MOST CHRISTIAN KING**; *Christianissimus Rex*, a title conferred by pope Paul II. in 1469 on the crafty Louis XI. of France.

CHRISTIANIA, the capital of Norway, built in 1624, by Christian IV. of Denmark, to replace Opslo (the ancient capital founded by Harold Haardrade, 1058), which had been destroyed by fire. On 13 April, 1858, Christiania suffered by fire, the loss being about 250,000*l.* The university was established in 1811. New Storting (parliament house) built 1861-2.

CHRISTIANITY. The name Christian was first given to the disciples of Christ at Antioch, in Syria, 43 (*Acts* xi. 26; 1 *Peter* iv. 6). The first Christians were divided into *episcopi* (bishops or overseers) or *presbyteroi* (elders), *diaconoi* (ministers or deacons), and *pistoi* (believers); afterwards were added *catechumens*, or learners, and *energumens*, who were to be exorcised; see *Persecutions*.

CHRISTMAS-DAY, 25 Dec. (from *Christ*, and the Saxon *mæsse*, signifying the *mass* and a *feast*), a festival in commemoration of the nativity of our Saviour, said to have been first kept 98; and ordered to be held as a solemn feast, by pope Telesphorus, about 137.† In the eastern church, Christmas and the Epiphany (*which see*) are deemed but one and the same feast. The holly and mistletoe used at Christmas are said to be the remains of the religious observances of the Druids; see *Anno Domini*.

CHRISTMAS ISLAND, in the Pacific Ocean, so named by captain Cook, who landed here on Christmas-day, 1777. He had passed Christmas-day at Christmas-sound, 1774. On the shore of Christmas Harbour, visited by him in 1776, a man found a piece of parchment inscribed: "Ludovico XV. Galliarum rege, et d. Boynes regi a secretis ad res maritimas, annis 1772 et 1773." On the other side captain Cook wrote: "Naves Resolution et Discovery de rege Magnæ Britannicæ, Dec. 1776," and placed it in a bottle.

CHRISTOPHER'S, St. (or St. Kitt's), a West India Island, discovered in 1493, by Columbus, who gave it his own name. Settled by the English and French 1623 or 1626. Ceded to England by the peace of Utrecht, 1713. Taken by the French in 1782, but restored the next year. The town of Basseterre suffered from fires, 3 Sept. 1776; also 3 and 4 July, 1867, when the cathedral and nearly all the town were destroyed.

CHROMIUM (Greek, *chrome* colour), a rare metal, discovered by Vaquelin in 1797. It is found combined with iron and lead, and forms the colouring matter of the emerald.

CHROMO-LITHOGRAPHY, see *Printing in Colours*.

CHRONICLES. The earliest are those of the Jews, Chinese, and Hindoos. In Scripture there are two "Books of Chronicles." Collections of the British chronicles have been published by Camden, Gale, &c., since 1602; in the present century by the English Historical Society, &c. In 1858, the publication of "Chronicles and Memorials of Great Britain and Ireland during the Middle Ages," commenced under the direction of the Master of the Rolls. Macray's "Manual of British Historians" was published 1845.

CHRONOLOGY (the science of time) has for its object the arrangement and exhibition of the various events of the history of the world in the order of their succession, and the ascertaining the intervals between them; see *Eras* and *Epochs*. Valuable works on the subject are *L'Art de Vérifier les Dates*, compiled by the Benedictines (1783-1820). Playfair's *Chronology*, 1784; Blair's *Chronology*, 1753 (new editions by sir H. Ellis in 1844, and by Mr. Rosse, in 1856). The *Oxford Chronological Tables*, 1838. Sir Harris Nicolas' *Chronology of History*, 1833; new edition, 1852. Hales' *Chronology*, 2nd edition, 1830; Mr. H. Fynes-Clinton's *Fasti Hellenici* and *Fasti Romani* (1824-50).

CHRONOMETER, see *Clocks*, and *Harrison*.

* It is, traditionally, said that Gregory the Great, shortly before his elevation to the papal chair, passing through the slave-market at Rome, and perceiving some beautiful children set up for sale, inquired about their country, and finding they were English pagans, he is said to have cried out, "Non Angli sed Angeli forent, si essent Christiani;" that is, "They would not be English, but angels, if they were Christians." From that time he ardently desired to convert the nation, and ordered a monk named Austin, or Augustin, and others, to undertake the mission to Britain in the year 596.

† Diocletian, the Roman emperor, keeping his court at Nicomedia, being informed that the Christians were assembled on this day in great multitudes to celebrate Christ's nativity, ordered the doors to be shut, and the church to be set on fire, and 600 perished in the burning pile. This was the commencement of the tenth persecution, which lasted ten years, 303.

CHRONOSCOPE, an apparatus invented by professor Wheatstone in 1840, to measure small intervals of time. It has been applied to the velocity of projectiles and of the electric current. A chronoscope was invented by Pouillet, in 1844, and by others since.

CHUNAR, TREATY OF, concluded between the nabob of Oude and governor Hastings, by which the nabob was relieved of his debts to the East India Company, on condition of his seizing the property of the begums, his mother and grandmother, and delivering it up to the English, 19 Sept. 1781. This treaty enabled the nabob to take the lands of Fyzoola Khan, a Rohilla chief, who had settled at Rampoor, under guarantee of the English. The nabob presented to Mr. Hastings 100,000*l*.

CHURCH (probably derived from the Greek *kyriakos*, pertaining to the Lord, *Kyrios*), now signifies a collective body of Christians, and also the place where they meet. In the New Testament, it signifies "congregation," in the original *ekklesia*. Christian architecture commenced with Constantine, who, after he was settled in his government, erected, at Rome, churches (called basilicas, from the Greek *basileus*, a king); St. Peter's being erected about 330. His successors erected others; and adopted the heathen temples as places of worship. Several very ancient churches exist in Britain and Ireland; see *Architecture; Choir and Chanting; Rome, Modern; Popes*.

CHURCH DISCIPLINE ACT (3 & 4 Vict. c. 86), passed 7 Aug. 1840, enables bishops to issue commissions of inquiry, and on conviction to inhibit clergymen from performing service, &c.

CHURCH OF IRELAND, founded by St. Patrick in the 5th century, united with that of England as the United Church of England and Ireland in 1800. Previously to the Church Temporalities Act of Will. IV. in 1833, there were four archbishoprics and eighteen bishoprics in Ireland, of which two archbishoprics and eight bishoprics have ceased; that act providing for the union or abolition of certain sees, according as the possessors of them died; see *Ireland*, 1867-68, and *Bishops*.

CHURCH OF NORTH AMERICA. The Episcopal church was established in Nov. 1784, when bishop Seabury, chosen by the churches in Connecticut, was consecrated in Scotland. The first convention was held at Philadelphia in 1785. On 4 Feb. 1787, two more American bishops were consecrated at Lambeth. In 1851 there were 37 bishops; see *Pan-Anglican Synod*.

CHURCH OF SCOTLAND. On the abolition of Episcopacy in Scotland in 1638, Presbyterianism became the established religion. Its distinguishing tenets were first embodied in the formulary of faith, said to have been compiled by John Knox, in 1560, which was approved by the Parliament and ratified in 1567, finally settled by an act of the Scottish senate in 1696, and secured by the treaty of union with England in 1707. The church of

benefices in Ireland was 1495, to which there were not more than about 900 glebe-houses attached, the rest having no glebe-houses. An act was passed in 1860 for the union of contiguous benefices. In 1867 the beneficed clergy were estimated at 12,388; curates and other clergy without livings about 7000.

Scotland is regulated by four courts—the general assembly,* the synod, the presbytery, and kirk sessions; see *Presbyterians*. A large body seceded from this church in 1843, and took the name of the “Free Church of Scotland,” (*which see*); see *Bishops in Scotland*.

CHURCH-RATES. The maintaining the church (*i. e.* the building) in repair belongs to the parishioners, who have the sole power of taxing themselves for the expense when assembled in vestry. The enforcement of payment, which is continually disputed by dissenters and others, belongs to the ecclesiastical courts. Many attempts have been made to abolish church-rates. A bill for this purpose has passed the commons only several times since 1855; one was thrown out in May, 1861. One passed by the commons, July, rejected by the lords 8 Aug. 1867. Mr. Gladstone’s compulsory church-rate abolition bill passed in the commons, 25 March, 1868; see *Braintree*.

CHURCH-SERVICES were ordered by pope Vitellianus to be read in Latin 663; by queen Elizabeth in 1558 to be read in English.

CHURCH-WARDENS, officers of the church, appointed by the first canon of the synod of London in 1127. Overseers in every parish were also appointed by the same body, and they continue now nearly as then constituted. *Johnson’s Canons*.

CHURCHYARDS, see *Consecration*.

CHURCHING OF WOMEN is the act of returning thanks in the church by women after child-birth. It began about 214. *Wheatley*; see *Purification*.

CHUSAN, a Chinese isle; see *China*, 1840, 1841, 1860.

CIDER (*Zider*, German), when first made in England, was called wine, about 1284. The earl of Manchester, when ambassador in France, is said to have passed off cider for wine. It was subjected to the excise in 1763 *et seq.* The duty was taken off in 1830. Many orchards were planted in Herefordshire by lord Scudamore, ambassador from Charles I. to France. John Philips published his poem “Cider” in 1706.

CIGAR SHIP, see under *Steam*, 1866.

CILICIA, in Asia Minor, partook of the fortunes of that country. It became a Roman province 67 B. C., and was conquered by the Turks, A. D. 1387.

CIMBRI, a Teutonic race from Jutland, invaded the Roman empire about 120 B. C. They defeated the Romans, under Cn. Papirius Carbo, 113 B. C.; under the consul, Marcus Silanus, 109 B. C., and under Cæpio Manlius, at Arausio, on the banks of the Rhine, where 80,000 Romans were slain, 105 B. C. Their allies, the Teutones, were defeated by Marius in two battles at Aquæ Sextiæ (Aix) in Gaul; 200,000 were killed, and 70,000 made prisoners, 102 B. C. The Cimbri were defeated by Marius and Catulus, at Campus Raudius, when about to enter Italy; 120,000 were killed, and 60,000 taken prisoners, 101 B. C. They were afterwards absorbed into the Teutones or Saxons.

CIMENTO (Italian, *experiment*). The “Accademia del Cimento,” at Florence, held its first meeting for making scientific experiments, 18 June, 1657. It was patronised by Ferdinand, grand duke of Tuscany. The foundation of the Royal Society of London followed in 1660, and the Academy of Sciences at Paris in 1666.

CINCINNATI. A society established in the American army soon after the peace of 1783, “to perpetuate friendship, and to raise a fund for relieving the widows and orphans of those who had fallen during the war.” On the badge was a figure of Cincinnatus. The people dreaded military influence, and the society dissolved itself.

CINNAMON, a species of laurel, is mentioned among the perfumes of the sanctuary, *Ecodus xxx. 23*. It was found in the American forests by Don Ulloa, in 1736, and was cultivated in Jamaica and Dominica in 1788.

CINQUE-CENTO (five hundred); *ter-cento*, &c., see note to article *Italy*.

CINQUE PORTS, on the south coast of England, were originally *five* (hence the name) —Dover, Hastings, Hythe, Romney, and Sandwich: Winchelsea and Rye were afterwards added. *Jeake*. Their jurisdiction was vested in barons, called wardens, for the better security of the coast, these ports being nearest to France, and considered the keys of the kingdom; instituted by William I. in 1078. *Rapin*. The latest lord-wardens were the duke of Wellington, 1828-52; the marquess of Dalhousie, 1852-60; lord Palmerston, 1861-65; earl Granville, appointed Dec. 1865.

CINTRA (Portugal.) Here was signed an agreement on 22 Aug. 1808, between the French and English the day after the battle of Vimeira. As it contained the bases of the

* The first general assembly of the church was held 20 Dec. 1560. The general assembly constitutes the highest ecclesiastical court in the kingdom; it meets annually in Edinburgh in May, and sits about ten days. It consists of a grand commissioner, appointed by the sovereign, and delegates from presbyteries, royal boroughs, and universities, some being laymen. To this court all appeals from the inferior ecclesiastical courts lie, and its decision is final.

convention signed on 30 Aug. following, it has been termed the convention of Cintra. By it Junot and his army were permitted to evacuate Portugal free, in British ships. The convention was publicly condemned, and in consequence a court of inquiry was held at Chelsea, which exonerated the British commanders. Wellington and Napoleon both justified sir Hew Dalrymple.

CIPHER, a secret manner of writing. Julius Caesar and Augustus when writing secret despatches are said to have employed the second or third letter instead of the first, and the same sequence with regard to the others. This cipher was in use till the reign of Sixtus IV. (1471-84), when the secret was divulged by Leon Battista Alberti, and a new sort of cipher sprang up. The father of Venetian cipher was Zuan Soro, who flourished about 1516. *Rawdon Brown.*

CIRCASSIA (Asia, on N. side of the Caucasus). The Circassians are said to be descended from the Albanians. They were unsubdued, even by Timour. In the 16th century the greater part of them acknowledged the authority of the czar Ivan II. of Russia, and about 1745, the princes of Kabarda took oaths of fealty. Many Circassians became Mahometans in the 18th century.

CIRCENSIAN GAMES were combats in the Roman circus (at first in honour of Consus, the god of councils, but afterwards of Jupiter, Neptune, Juno, and Minerva), said to have been instituted by Evander, and established at Rome, 732 B.C. by Romulus, at the time of the rape of the Sabines. They were called the Great games, but Tarquin named them Circensian; their celebration continued from 4 to 12 Sept.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 1 to 3 and 72 decimals; and Lagny (1719) as 1 to 3 and 122 decimals.

CIRCLES OF GERMANY (formed about 1500, to distinguish the members of the diet of the empire) were, in 1512, Franconia, Bavaria, Upper and Lower Rhine, Westphalia, and Saxony; in 1789, Austria, Burgundy, Westphalia, Palatinate, Upper Rhine, Suabia, Bavaria, Franconia, and Upper and Lower Saxony. In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, in 1806 (*which see*).

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 1176. They were afterwards divided into four, with five justices to each division, 1180. *Rapin.* They have been frequently altered. England and Wales are at present divided into eight—each travelled in spring and summer for the trial of civil and criminal cases; the larger towns are visited in winter for trials of criminals only: this is called "going the circuit." There are monthly sessions for the city of London and county of Middlesex.

CIRCULATING LIBRARY. Stationers lent books on hire in the middle ages. The public circulating library in England, opened by Samuel Fancourt, a dissenting minister of Salisbury, about 1740, failed; but similar institutions at Bath and in London succeeded, and others were established throughout the kingdom. There was a circulating library at Crane-court, London, in 1748, of which a catalogue in two vols. was published.—No books can be taken from the British Museum except for judicial purposes, but the libraries of the Royal Society and the principal scientific societies, except that of the Royal Institution, London, are circulating.—The London Library (circulating) was founded in 1841, under the highest auspices, and is of great value to literary men.—Of the subscription libraries belonging to individuals, that founded by Mr. C. E. Mudie, in New Oxford-street, is the most remarkable for the large quantity and good quality of the books: several hundreds, sometimes thousands, of copies of a new work being in circulation. It began in 1842, and grew into celebrity in Dec. 1848, when the first two volumes of Macaulay's History of England were published, for which there was an unprecedented demand, supplied by this library. The hall, having the walls covered with shelves filled with new books, was opened in Dec. 1860. The "Circulating Library Company" was founded in Jan. 1862, and other companies since.

CIRCULATION OF THE BLOOD, see *Blood*.

CIRCUMCISION (instituted 1897 B.C.) was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christ), originally the octave of Christmas, is mentioned about 487. It was introduced into the liturgy in 1550.

CIRCUMNAVIGATORS. Among the most daring human enterprises at the period when it was first attempted, was the circumnavigation of the earth in 1519-22.*

CIRCUS. There were eight (some say ten) buildings of this kind at Rome; the largest, the *Circus Maximus*, was built by the elder Tarquin, 605 B.C. It was an oval figure: length three stadia and a half, or more than three English furlongs; breadth 960 Roman feet. It was enlarged by Julius Cæsar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Cæsar introduced into it large canals of water, which could be quickly covered with vessels, and represent a sea fight. *Pliny*; see *Amphitheatres*, and *Factions*.

CISALPINE REPUBLIC (N. Italy), formed by the French in May, 1797, from the *Cispadane* and *Transpadane* republics, acknowledged by the emperor of Germany to be independent, by the treaty of Campo Formio (*which see*), 17 Oct. following. It received a new constitution in Sept. 1798; was remodelled, and named the Italian republic, with Napoleon Bonaparte president, 1802; and merged into the kingdom of Italy in March, 1805; see *Italy*.

CISPADANE REPUBLIC, with the Transpadane republic, merged into the Cisalpine republic, Oct. 1797.

CISTERCIANS (the order of Citeaux), an order of monks founded by Robert, a Benedictine, abbot of Citeaux, in France, near the end of the 11th century. For a time it governed almost all Europe. The monks observed silence, abstained from flesh, lay on straw, and wore neither shoes nor shirts. They were reformed by St. Bernard; see *Bernardines*.

CITATE. The Russian general Gortschakoff, intending to storm Kalafat, threw up redoubts at Citate, close to the Danube, which were stormed by the Turks under Omer Pacha, 6 Jan. 1854. The fighting continued on the 7th, 8th, and 9th, when the Russians were compelled to retire to their former position at Krajowa, having lost 1500 killed and 2000 wounded. The loss of the Turks was estimated at 338 killed and 700 wounded.

CITIZEN. It was not lawful to scourge a citizen of Rome. *Livy*. In England a citizen is a person who is free of a city, or who doth carry on a trade therein. *Camden*. Various privileges have been conferred on citizens as freemen in several reigns.—The wives of citizens of London (not being aldermen's wives, nor gentlewomen by descent) were obliged to wear minever caps, being white woollen knit three-cornered, with the peaks projecting three or four inches beyond their foreheads; aldermen's wives made them of velvet, 1 Eliz. 1558. *Stow*.—On 10 Oct. 1792, the convention decreed that "citoyen" and "citoyenne" should be the only titles in France.

CITY. (Latin *civitas*, French *cit *, Italian *citt *.) The word has been used in England only since the conquest, when London was called *Londonburgh*. Cities were first incorporated 1079. A town corporate is called a city when made the seat of a bishop and having a cathedral church. *Camden*.

CIUDAD RODRIGO, a strong fortress of Spain, invested by the French, 11 June, 1810, and surrendered to them 10 July. It remained in their possession until it was stormed by the British, under Wellington, 19 Jan. 1812.

CIVIL ENGINEERS, see *Engineers*.

CIVIL LAW. A body of Roman laws, founded upon the laws of nature and of nations,

* The first ship that sailed round the earth, and hence determined its being globular, was Magellan's, or Magelhaen's; he was a native of Portugal, in the service of Spain, and by keeping a westerly course he returned to the same place he had set out from in 1519. The voyage was completed in 3 years and 29 days. Magellan was killed on his homeward passage, at the Philippines, in 1521.

was first collected by Alfrenus Varus, the civilian, who flourished about 66 B.C.; and a digest of them was made by Servius Sulpicius, the civilian, 53 B.C. The Gregorian code was issued A.D. 290; the Theodosian in 438. Many of the former laws having grown out of use, the emperor Justinian ordered a revision of them (in 529-534), which was called the Justinian code, and constitutes a large part of the present civil law. Civil law was restored in Italy, Germany, &c., 1127. *Blair*. It was introduced into England by Theobald, a Norman abbot, afterwards archbishop of Canterbury in 1138. It is now used in the spiritual courts only, and in maritime affairs; see *Doctors' Commons*, and *Laws*.

CIVIL LIST. This now comprehends the revenue awarded to the kings of England in lieu of their ancient hereditary income. The entire revenue of Elizabeth was not more than 600,000*l.*, and that of Charles I. was about 800,000*l.* After the revolution (in 1660) a civil list revenue was settled on the new king and queen of 700,000*l.*, the parliament taking into its own hands the support of the forces both maritime and military. The civil list of George II. was increased to 800,000*l.*; and that of George III., in the 55th year of his reign, was 1,030,000*l.*

In 1831, the civil list of the sovereign was fixed at 510,000*l.*, and in Dec., 1837, the civil list of the queen was fixed at 385,000*l.*

Prince Albert obtained an exclusive sum from parliament of 30,000*l.* per an. on 7 Feb. 1840

CIVIL SERVICE. Nearly 17,000 persons are employed in this service under the direction of the treasury, and the home, foreign, colonial, post, and revenue offices, &c. In 1855, a commission reported most unfavourably on the existing system of appointments, and on 21 May commissioners were appointed to examine into the qualifications of the candidates, who report annually. The civil service superannuation act passed in April, 1859. Civil service for the year (ending 31 March) 1855, cost 7,735,515*l.*; 1865, 10,205,413*l.*; 1867, 10,523,020*l.*

CIVIL WARS, see *England, France, &c.*

CLANSHIPS, tribes of the same race, and commonly of the same name, originated in feudal times; see *Feudal Laws*. They are said to have arisen in Scotland, in the reign of Malcolm II., about 1008. The legal power of the chiefs of clans and other remains of heritable jurisdiction were abolished in Scotland, and liberty was granted to clansmen in 1747, in consequence of the rebellion of 1745. The following is a list of all the known clans of Scotland, with the badge of distinction anciently worn by each. The chief of each respective clan was, and is, entitled to wear two eagle's feathers in his bonnet, in addition to the distinguishing badge of his clan. *Chambers*. A history of the clans by Wm. Buchanan was published in 1775.

CLARE and CLARENCE (Suffolk). Richard de Clare, earl of Gloucester, is said to have seated here a monastery of the order of Friars Eremites, the first of this kind of mendicants who came to England, 1248. *Tanner*. Lionel, third son of Edward III. becoming possessed of the honour of Clare, by marriage, was created duke of Clarence. The title has ever since belonged to a branch of the royal family.*—CLARE was the first place in Ireland for 140 years that elected a Roman Catholic member of parliament; see *Roman Catholics*. At the election, held at Ennis, the county town, Mr. Daniel O'Connell was returned, 5 July, 1828. He did not sit till after the passing of the Catholic Emancipation Act, in 1829, being re-elected 30 July, 1829.

CLARE, NUNS OF ST., a sisterhood, called Minorettes, founded in Italy by St. Clare and St. Francis d'Assisi, about 1212. They were also called Urbanists; their rule having been modified by pope Urban IV., who died 1264. This order settled in France about 1260, and in England, in the Minories without Aldgate, London, about 1293, by Blanche, queen of Navarre, wife of Edmund, earl of Lancaster, brother of Edward I. At the suppression, the site was granted to the bishopric of Bath and Wells, 1539. *Tanner*.

CLAREMONT (Surrey), the residence of the princess Charlotte (daughter of the prince-regent, afterwards George IV.), and the scene of her death, 6 Nov. 1817. The house was originally built by sir John Vanbrugh, and was the seat successively of the earl of Clare, afterwards duke of Newcastle, of lord Clive, lord Galloway, and the earl of Tyrconnel. It was purchased of Mr. Ellis by government for 65,000*l.* for the prince and princess of Saxe-Coburg; and the former, the late king of Belgium, assigned it to prince Albert in 1840. The exiled royal family of France took up their residence at Claremont, 4 March, 1848; and the king, Louis Philippe, died there, 29 Aug. 1850.

CLARENCEUX, the second king-at-arms, said to have been nominated by Thomas, son of Henry IV., created duke of Clarence 1411. His duty was to arrange the funerals of all the lower nobility, as baronets, knights, esquires, and gentlemen, on the south side of the Trent, from whence he is also called sur-roy or south-roy.

CLARENDON, CONSTITUTIONS OF, were enacted at a council held 25 Jan. 1164, at Clarendon, in Wiltshire, to retrench the power of the clergy. They led to Becket's quarrel with Henry II., and were at first condemned by the pope, but agreed to in 1173.

I. All suits concerning advowsons to be determined in civil courts.

II. The clergy accused of any crime to be tried by civil judges.

III. No person of any rank whatever to be permitted to leave the realm without the royal licence.

IV. Laics not to be accused in spiritual courts, except by legal and reputable promoters and witnesses.

V. No chief tenant of the crown to be excommunicated, nor his lands put under interdict.

VI. Revenues of vacant sees to belong to the king.

VII. Goods forfeited to the crown not to be protected in churches.

VIII. Sons of villains not to be ordained clerks without the consent of their lord.

IX. Bishops to be regarded as barons, and be subjected to the burthens belonging to that rank.

X. Churches belonging to the king's see not to be granted in perpetuity against his will.

XI. Excommunicated persons not to be bound to give security for continuing in their abode.

XII. No inhabitant in demesne to be excommunicated for non-appearance in a spiritual court.

XIII. If any tenant *in capite* should refuse submission to spiritual courts, the case to be referred to the king.

XIV. The clergy no longer to pretend to the right of enforcing debts contracted by oath or promise.

XV. Causes between laymen and ecclesiastics to be determined by a jury.

XVI. Appeals to be ultimately carried to the king, and no further without his consent.

CLARENDON PRESS, OXFORD. The building was erected by sir John Vanbrugh, in 1711-13, the expense being defrayed out of the profits of lord Clarendon's History of the Rebellion, the copyright of which was given to the university by his son. The original building was converted into a museum, lecture rooms, &c., and a new printing-office erected by Blore and Robertson, 1826-9. *Sharp*.

CLARION, said by Spanish writers to have been invented by the Moors in Spain, about 800, was at first a trumpet, serving as a treble to trumpets sounding tenor and bass. *Ashe*.

CLARINET, a wind instrument of the reed kind, invented by Denner, in Nuremberg, about 1690.

CLASSIS. The name was first used by Tullius Servius (the sixth king of ancient Rome), in making divisions of the Roman people, 573 B.C. The first of the six classes were called *classici*, by way of eminence, and hence authors of the first rank (especially Greek and Latin) came to be called *classics*.

CLAVICHORD, a musical instrument in the form of a spinnet (called also a manichord); much in use in France, Spain, and Germany, in the 17th century.

CLAYTON BULWER TREATY, see *Bulwer*.

CLEARING-HOUSE. In 1775, a building in Lombard-street was set apart for the use of bankers, in which they might exchange drafts, bills, and securities, and thereby save labour and curtail the amount of floating cash requisite to meet the settlement of the different houses, if effected singly. By means of transfer tickets, transactions to the amount of millions daily are settled without the intervention of a bank note. In 1861, the clearing-house was used by 117 companies, and on May, 1864, it was joined by the Bank of England. The *Railway clearing-house* in Seymour-street, near Euston-square, is regulated by an act passed in 1850.

CLEMENTINES, apocryphal pieces, attributed to Clemens Romanus, a contemporary of St. Paul, and said to have succeeded St. Peter as bishop of Rome. He died 102. *Nicéron*. Also the decretals of pope Clement V. who died 1314, published by his successor. *Bowyer*.

Also Augustine monks, each of whom having been a superior nine years, then merged into a common monk.—CLEMENTINES were the adherents of Robert, son of the count of Geneva, who took the title of Clement VII. on the death of Gregory XI. 1378, and URBANISTS, those of pope Urban VI. All Christendom was divided by the claims of these two pontiffs : France, Castile, Scotland, &c., adhering to Clement ; Rome, Italy, and England, declaring for Urban. The schism ended in 1409, when Alexander V. was elected pope, and his rivals resigned ; see *Anti-Popes*.

CLEPSYDRA, a water-clock ; see *Clocks*.

CLERGY (from the Greek *kleros*, a lot or inheritance) in the first century were termed presbyters, elders, or bishops, and deacons. The bishops (*episcopi* or *overseers*), elected from the presbyters, in the second century assumed higher functions (about 330), and, under Constantine, obtained the recognition and protection of the secular power. Under the Lombard and Norman kings in the 7th and 8th centuries, the clergy began to possess temporal power, as owners of lands ; and after the establishment of monachism, a distinction was made between the regular clergy, who lived apart from the world, in accordance with a *regula* or rule, and the *secular* (worldly) or beneficed clergy. The English clergy write *clerk* after their names in legal documents ; see *Church of England*.

The clergy were first styled clerks, owing to the judges being chosen after the Norman custom from the sacred order, and the officers being clergy : this gave them that denomination, which they keep to this day. *Blackstone*.

As the Druids kept the keys of their religion and of letters, so did the priests keep both these to themselves ; they alone made profession of letters, and a man of letters was called a clerk, and hence learning went by the name of clerkship. *Pasquier*.

BENEFIT OF CLERGY, *Privilegium Clericale*, arose in the regard paid by Christian princes to the church, and consisted of : 1st, an exemption of places consecrated to religious duties from criminal arrests, which was the foundation of sanctuaries ; 2nd, exemption of the persons of clergymen from criminal process before the secular judge, in particular cases, which was the original meaning of the *privilegium clericale*. The benefit of clergy was afterwards extended to every one who could read ; and it was enacted, that there should be a prerogative allowed to the clergy, that if any man who could read were to be condemned to death, the bishop of the diocese might, if he would, claim him as a clerk, and dispose of him in some places of the clergy as he might deem meet. The ordi-

nary gave the prisoner at the bar a Latin book, in a black Gothic character, from which to read a verse or two ; and if the ordinary said, "*Legit ut Clericus*" ("He reads like a clerk"), the offender was only burnt in the hand ; otherwise, he suffered death, 3 Edw. I. (1274).

The privilege was restricted by Henry VII. in 1489, and abolished, with respect to murderers and other great criminals, by Henry VIII. 1512. *Stat.* The reading was discontinued by 5 Anne, c. 6 (1706). Benefit of clergy was wholly repealed by 7 & 8 Geo. IV. c. 28 (1827).

CLERGY CHARITIES.

William Assheton, an eminent theological writer, was the first proposer of a plan to provide for the families of deceased clergy. He died Sept. 1711. *Watts's Life of Assheton*.

Festival of the "Sons of the Clergy," held annually at St. Paul's cathedral, instituted about 1655 ; from it sprang the charity called the "Sons of the Clergy" (clergy, orphan, and widow corporation), incorporated 1 July, 1678.

There are several other charities for relatives of the clergy.

CLERICAL SUBSCRIPTION ACT, passed July, 1865.

CLERK, see *Clergy*.

CLERKENWELL, a parish, N.E. London, so called from a well (*fons clericorum*) in Ray-street, where the parish-clerks occasionally acted mystery-plays : once before Richard II. in 1390. Hunt's political meetings in 1817 were held in Spa-fields in this parish. In St. John's parish are the remains of the priory of the knights of St. John of Jerusalem. Clerkenwell prison was built in 1615, in lieu of the noted prison called the Cage, which was taken down in 1614 ; the then Bridewell having been found insufficient. The prison called the House of Detention, erected in 1775, was rebuilt in 1818 ; again 1844. For the explosion here, see *Fenians*, Dec. 1867. At Clerkenwell-close formerly stood the house of Oliver Cromwell, where some suppose the death-warrant of Charles I. was signed, Jan. 1649.

CLERMONT (France). Here was held the council under pope Urban II. in 1095, in which the first crusade against the infidels was determined upon, and Godfrey of Bouillon appointed to command it. In this council the name of pope was first given to the head of the Roman Catholic church, exclusively of the bishops who used previously to assume the title. Philip I. of France was (a second time) excommunicated by this assembly. *Hénault*.

CLEVES (N.E. Germany). Rutger, count of Cleves, lived at the beginning of the 11th century. Adolphus, count of Mark, was made duke of Cleves by the emperor Sigismund, 1417. John William, duke of Cleves, Berg, Juliers, &c., died without issue 25 March, 1609, which led to a war of succession. Eventually Cleves was assigned to the elector of Brandenburg in 1666 ; seized by the French in 1757 ; restored at the peace in 1763, and now forms part of the Prussian dominions.

CLIFTON SUSPENSION-BRIDGE, over the Avon, connecting Gloucestershire and Somersetshire, constructed of the removed Hungerford-bridge, was completed in Oct. 1864 ; opened 8 Dec. 1864. It is said to have the largest span (702 feet) of any chain bridge in the world. In 1753 Alderman Vick, of Bristol, bequeathed 1000*l.* to accumulate for the

erection of a bridge over the Avon. In 1831 Brunel began one, which was abandoned after the expenditure of 45,000*l*.

CLIMACTERIC, the term applied to certain periods of time in a man's life (multiples of 7 or 9), in which it is affirmed notable alterations in the health and constitution of a person happen, and expose him to imminent dangers. Cotgrave says, "Every 7th or 9th or 63rd year of a man's life, all very dangerous, but the last most." The *grand climacteric* is 63. Hippocrates is said to have referred to these periods in 383 B.C.

CLIO. The initials C. L. I. O., forming the name of the muse of history, were rendered famous from the most admired papers of Addison, in the *Spectator*, having been marked by one or other of them, signed consecutively, in 1713. *Cibber*.

CLOACA MAXIMA, the chief of the celebrated sewers at Rome, the construction of which is attributed to king Tarquinius Priscus (588 B.C.) and his successors.

CLOCK. The clepsydra, or water-clock was introduced at Rome about 158 B.C. by Scipio Nasica. Toothed wheels were applied to them by Ctesibius, about 140 B.C. Said to have been found by Cæsar on invading Britain, 55 B.C. The only clock supposed to be then in the world was sent by pope Paul I. to Pepin king of France A.D. 760. Pacificus, arch-deacon of Genoa, invented one in the 9th century. Originally the wheels were three feet in diameter. The earliest complete clock of which there is any certain record was made by a Saracen mechanic in the 13th century. Alfred is said to have measured time by wax tapers, and to have invented lanterns to defend them from the wind about 887.

CLOGHER (Ireland). St. Macartin, a disciple of St. Patrick, fixed a bishopric at Clogher, where he also built an abbey "in the street before the royal seat of the kings of Ergal." He died in 506. Clogher takes its name from a golden stone, from which, in times of paganism, the devil used to pronounce juggling answers, like the oracles of *Apollo Pythivus*. *Sir James Ware*. In 1041 the cathedral was built anew, and dedicated to its founder. Clogher merged, on the death of its last prelate (Dr. Tottenham), into the archiepiscopal see of Armagh, by the act of 1833.

CLONFERT (Ireland). St. Brendan founded an abbey at Clonfert in 558: his life is extant in jingling monkish metre in the Cottonian library at Westminster. In his time the cathedral, famous in ancient days for its seven altars, was erected; and Colgan makes St. Brendan its founder and the first bishop; but is said, in the Ulster Annals, under the year 571, "*Mæna*, bishop of Clonfert-Brenain, went to rest." Clonfert, in Irish, signifies a wonderful den or retirement. In 1839 the see merged into that of Killaloe; see *Bishops*.

CLONTARF (near Dublin), the site of a battle fought on Good Friday, 23 April, 1014, between the Irish and Danes, the former headed by Bryan Boromhe, monarch of Ireland, who defeated the invaders, after a long and bloody engagement, was wounded, and soon afterwards died. His son Murchard also fell with many of the nobility; 11,000 Danes are said to have perished in the battle.

CLOSTERSEVEN (Hanover), CONVENTION OF, was entered into 8 Sept. 1757, between the duke of Cumberland, third son of George II., and the duke of Richelieu, commander of the French armies. By its humiliating stipulations, 38,000 Hanoverians laid down their arms, and were dispersed. The duke immediately afterwards resigned all his military commands, and the convention was soon broken by both parties.

CLOTH, see *Woollen Cloth*, and *Calico*.

CLOUD, St., a palace, near Paris, named from prince Clodoald or Cloud, who became a

monk there in 533, after the murder of his brothers, and died in 560. The palace was built in the 16th century, and in it Henry II. was assassinated by Clement, 2 Aug. 1589.

CLOUDS consist of minute particles of water, often in a frozen state, floating in the air. In 1803 Mr. Luke Howard published his classification of clouds, now generally adopted, consisting of three primary forms—cirrus, cumulus, and stratus; three compounds of these forms; and the nimbus or black rain clouds (cumulo-cirro-stratus). A new edition of Howard's Essay on the Clouds appeared in 1865.

CLOVESHOO (now Cliff), Kent. Here was held an important council of nobility and clergy concerning the government and discipline of the Church, Sept. 747; and others were held here 800, 803, 822, 824.

CLOYNE (S. Ireland), a bishopric, founded in the 6th century by St. Coleman, in 1431 united to that of Cork, and so continued for 200 years. It was united with that of Cork and Ross, 1834; see *Bishops*.

CLUBMEN, associations formed in the southern and western counties of England, to restrain the excesses of the armies during the civil wars, 1642-9. They professed neutrality, but inclined towards the king, and were considered enemies by his opponents.

CLUBS, originally consisted of a small number of persons of kindred tastes and pursuits, who met together at stated times for social intercourse. The club at the Mermaid tavern, established about the end of the 16th century, consisted of Raleigh, Shakspeare, and others. Ben Jonson set up a club at the Devil tavern. Addison, Steele, and others, frequently met at Button's coffee-house, as described in the *Spectator*. The present London clubs, some comprising 300, others about 1500 members, possess luxuriously furnished edifices, several of great architectural pretensions, in or near Pall Mall. The members obtain the choicest viands and wines at moderate charges, and many clubs possess excellent libraries, particularly the Athenæum (*which see*). The annual payment varies from 6*l.* to 11*l.* 11*s.*; the entrance fee from 9*l.* 9*s.* to 31*l.* 11*s.* The following are the principal clubs (several are described in separate articles):—

CLUBS, FRENCH. The first arose about 1782. They were essentially political, and greatly concerned in the revolution. The *Club Breton* became the celebrated *Club des Jacobins*, and the *Club des Cordeliers* comprised among its members Danton and Camille Desmoulins. From these two came the *Mountain* party which overthrew the Girondists in 1793, and fell in its turn in 1794. The clubs disappeared with the Directory in 1799. They were revived 1848 in considerable numbers, but did not attain to their former eminence, and were suppressed by decrees, 22 June, 1849, and 6 June, 1850. *Bouillet*.

CLUB-FOOT, a deformity due to the shortening of one or more of the muscles, although attempted to be cured by Lorenz in 1784, by cutting the tendo Achillis, was not effectually cured till 1831, when Stromeyer of Erlangen cured Dr. Little by dividing the tendons of the contracted muscles with a very thin knife.

CLUGNY or CLUNY, ABBEY OF, in France, formerly most magnificent, founded by Benedictines, under the abbot Bern, about 910, and sustained afterwards by William, duke of Berry and Aquitaine. English foundations for Cluniac monks were instituted soon after.

CLYDE AND FORTH WALL was built by Agricola, 84. The Forth and Clyde CANAL was commenced by Mr. Smeaton, 10 July, 1768, and was opened 28 July, 1790. It forms a communication between the seas on the eastern and western coasts of Scotland.

CNIDUS, in Caria, Asia Minor: near here Conon the Athenian defeated the Lacedæmonian fleet, under Peisander, 394 B.C.

COACH (from *coucher*, to lie). Beckmann states that Charles of Anjou's queen entered Naples in a *caretta* (about 1282). Under Francis I. there were but two in Paris, one

belonging to the queen, the other to Diana, the natural daughter of Henry II. There were but three in Paris in 1550; and Henry IV. had one without straps or springs. John de Laval de Bois-Dauphin set up a coach on account of his enormous bulk. The first coach seen in England was about 1553. Coaches were introduced by Fitz-Allen, earl of Arundel, in 1580. *Stow*. A bill was brought into parliament to prevent the effeminacy of men riding in coaches, 43 Eliz. 1601.* *Carte*. Repealed 1625. The coach-tax commenced in 1747. Horace Walpole says that the present royal state coach (first used 16 Nov. 1762), cost 7528*l*. The lord mayor's old state coach was not used 9 Nov. 1867; see *Car, Carriages, Chariots, Hackney Coaches, Mail Coaches, &c.*

COAL.† It is contended, with much seeming truth, that coal, although not mentioned by the Romans in their notices of Britain, was yet in use by the ancient Britons. *Brandt*. Henry III. is said to have granted a licence to dig coals near Newcastle-upon-Tyne in 1234; some say earlier, and others in 1239. Sea-coal was prohibited from being used in and near London, as being "prejudicial to human health;" and even smiths were obliged to burn wood, 1273. *Stow*. In 1306 the gentry petitioned against its use. Coal was first made an article of trade from Newcastle to London, 4 Rich. II. 1381. *Rymer's Fœdera*. Notwithstanding the many previous complaints against coal as a public nuisance, it was at length generally burned in London in 1400; but it was not in common use in England until the reign of Charles I. 1625.

1700 consumed in London	317,000 ehal.	1810	980,372 ehal.	1835	2,299,816 tons.
1750	510,000 ditto.	1820	1,171,178 ditto.	1840	2,638,256 ditto.
1800	814,000 ditto.	1830	1,588,360 ditto.	1850	3,638,883 ditto.

1860.—Coal brought to London, 3,573,377 tons east ways; 1,499,899 tons by railways and canals.
1861.— " " " " 5,232,082 tons; in 1862, 4,973,823 tons.

The coal-fields of Great Britain are estimated at 5400 square miles; of Durham and Northumberland, 723 square miles. *Bakewell*. In 1857 about 65½ millions of tons were extracted (value about 16,348,676*l*.) from 2095 collieries; about 25 millions are consumed annually in Great Britain.

Coal obtained in Great Britain and Ireland:—In 1854, 64,661,401 tons; in 1861, 83,635,214 tons; in 1862, 81,638,338 tons; in 1863, 86,292,215 tons (valued at 51,000,000*l*.); in 1864 (from 3268 collieries), 92,787,873 tons; in 1865, 98,150,587 tons; in 1866, 101,030,544 tons.

Mr. Sopwith, in 1855, computed the annual product of the coal-mines of Durham and Northumberland at 14 million tons:—6 millions for London, 2½ millions exported, 2½ millions for coke, 1 million for colliery engines, &c., and 2 millions for local consumption.

By a stipulation in the commercial treaty of 1860, in consequence of the French government greatly reducing the duty on imported coal, the British government (it is thought by many imprudently) engaged to lay no duty on exported coal for ten years. In 1859 about 7,000,000 tons of British coals were exported, of which 1,391,009 tons went to France.

Women were prohibited from working in English collieries in	1842
The consumption of coal in France in 1780, only 400,000 tons, rises to 6,000,000 tons in 1845.	
The United States produced between 8 and 9	

millions of tons: Belgium, 5,000,000; and France, 4,500,000, in 1855
An act for the regulation and inspection of mines was passed in 1860
Duplicate shafts act passed 1862
Coal-pitmen's strikes frequently occur; a long and severe one arose in Staffordshire in 1864
A commission (consisting of the duke of Argyll, sir R. J. Murchison, Dr. John Percy, professor Ramsay, and others) appointed to investigate into the probable quantity of coal in the coal-fields of the United Kingdom, the quantity now consumed, &c. July, 1866

ACCIDENTS.—About 1000 lives are lost annually by accidents in mines.

In 1858, by explosions in coal-mines, 52 persons perished at Bardsley; 20 at Duffryn, near Newport; 52 at Tyldesley, near Leeds; and about 36 in different parts of the country.

1859—5 April, 26 lives were lost at the chain colliery, near Neath, through the irruption of water.

1860—76 lives were lost on 2 March, at Burradon, near Killingworth; 145 at the Risca mine, near Newport, 1 Dec.; and 22 at the Hetton mine, Northumberland, 20 Dec.

1861—11 June, 21 lives were lost through an inundation in the Claycross mines, Derbyshire.

1862—47 lives were lost at Gethin mine, Merthyr Tydvil, S. Wales, Feb. 10; at Walker, near Newcastle-on-Tyne, 15 lives lost, Nov. 22; Edmund's Main, near Barnsley, 60 lives lost, 8 Dec.

1863—13 lives lost at Coxbridge, near Newcastle, 6 March; 39 lives lost at Margam, S. Wales, 17 Oct.; 14 lives lost at Moestig, S. Wales, 26 Dec.

1865—6 lives lost at Claycross, 3 May; 24 at New Bedwely pit, near Tredegar, 16 June; explosion at Gethin mine, Merthyr Tydvil; 30 lives lost, 20 Dec.

1866—Explosion at Highbrook colliery, near Wigan, Lancashire; about 30 lives lost, 23 Jan.; at Dukinfield, near Ashton, 37 lives lost, 14 June; at Pelton Fell colliery, near Durham; about 24 lives lost,

* In the beginning of the year 1619, the earl of Northumberland, who had been imprisoned ever since the gunpowder plot, obtained his liberation. Hearing that Buckingham was drawn about with six horses in his coach (being the first that was so), the earl put on eight to his, and in that manner passed from the Tower through the city. *Rapin*.

† There are five kinds of fossil fuel: anthracite, coal, lignite, bituminous shale, and bitumen. No satisfactory definition of coal has yet been given. The composition of *wood* is 49½ carbon, 6½ hydrogen, 44½ oxygen; of *coal* 82½ carbon, 5½ hydrogen, 11½ oxygen.

COAL, *continued.*

31 Oct. ; at Oaks colliery, Hoyle-mill, near Barnsley ; about 350 persons killed, 12 Dec. ; 28 searchers killed (including Mr. Parkin Jefferock, mining engineer) by fresh explosion, 13 Dec. ; at Talk-of-the-hill, Staffordshire ; about 80 persons perish, 13 Dec. 1867.—Explosion at Garswood colliery, near St. Helen's, 14 lives lost, 29 Aug. ; Shankhouse colliery, Cramlington, Northumberland, flooded ; about 200 men drowned, 1 Nov. ; explosion at Ferndale colliery, Rhondda Valley, near Cardiff ; about 178 lives lost ; attributed to naked lights, 8 Nov.

(For still more fatal accidents, see *Lundhill* and *Hartley*.)

85 lives were lost at Lalle coal-mine, in France, in Oct. 1861.

20,000 colliers on strike in St. Helen's district, March, 1868.

COAL EXCHANGE, London, established by 47 Geo. III. c. 68 (1807). The present building (a most interesting structure) was erected by Mr. J. B. Bunning, and opened by prince Albert 30 Oct. 1849

COAL-WHIPPERS' BOARD, to protect the men employed in unloading coal-vessels from publicans, formed by an act of parliament in 1843, lasted till 1856, when the coal-owners themselves established a whipping office.

COCCETIANS, a small sect founded by John Cocceius, of Bremen, about 1665, who held, amongst other opinions, that of a visible reign of Christ in this world, after a general conversion of the Jews and all other people to the Christian faith.

COCHEREL (near Evreux, N. W. France). Here Bertrand du Guesclin defeated the king of Navarre, and took prisoner the captal de Buch, 16 May, 1364.

COCHIN (India), held by the Portuguese, 1503 ; by the Dutch, 1663 ; taken by the British, 1796 ; ceded to them 1814.—COCHIN CHINA, see *Anam*.

COCHINEAL INSECT (*Coccus cacti*), deriving its colour from feeding on the *cactus*, became known to the Spaniards soon after their conquest of Mexico in 1518. Cochineal was brought to Europe about 1523, but was not known in Italy in 1548, although the art of dyeing then flourished there. In 1858 it was cultivated successfully in Teneriffe, the vines having failed through disease. 260,000 lbs. of cochineal were imported into England in 1830 ; 1,081,776 lbs. in 1845 ; 2,360,000 lbs. in 1850 ; and 3,034,976 lbs. in 1859. Duty repealed 1845.

COCKER'S ARITHMETIC. The work, edited by John Hawkins, first appeared in 1677.

COCK-FIGHTING, practised by the Greeks, was introduced at Rome after a victory over the Persians, 476 B.C. ; and brought by the Romans into England. William Fitz-Stephen, in the reign of Henry II., describes cock-fighting as the sport of school-boys on Shrove-Tuesday. It was prohibited by Edward III. 1365 ; by Henry VIII. ; and by Cromwell, 1653. Part of the site of Drury-lane theatre was a cock-pit in the reign of James I. ; and the cock-pit at Whitehall was erected by Charles II. Till lately there was a *Cock-pit Royal* in St. James's Park ; but the governors of Christ's Hospital would not renew the lease for the building.* Cock-fighting is now forbidden by law. On 22 April, 1865, 34 persons were fined at Marlborough-street police-office, for being present at a cock-fight.

COCK-LANE GHOST, an imposition practised by William Parsons, his wife, and daughter, by means of a female ventriloquist, during 1760 and 1761, carried on at No. 33,

* Mr. Ardesoif, a gentleman of large fortune and great hospitality, who was almost unrivalled in the splendour of his equipages, had a favourite cock, upon which he had won many profitable matches. The last wager he laid upon this cock he lost, which so enraged him, that in a fit of passion he thrust the bird into the fire. A delirious fever, the result of his rage and inebriety, in three days put an end to his life. He died at Tottenham, near London, April 4, 1788.

Cock-lane, London, was at length detected, and the parents were condemned to the pillory and imprisonment, 10 July, 1762.

COCOA or CACAO, the kernel or seed of the tree *Theobroma cacao* (Linn.), was introduced into this country shortly after the discovery of Mexico, where it forms an important article of diet. From cocoa is produced chocolate. The cocoa imported into the United Kingdom, chiefly from the British West Indies and Guiana, was in 1849, 1,989,477 lbs.; in 1855, 7,343,458 lbs.; in 1861, 9,080,288 lbs.; in 1866, 10,308,298 lbs., about half for home consumption.

COCOA-NUT TREE (*Cocos nucifera*, Linn.), supplies the Indians with almost all they need, as bread, water, wine, vinegar, brandy, milk, oil, honey, sugar, needles, clothes, thread, cups, spoons, basins, baskets, paper, masts for ships, sails, cordage, nails, covering for their houses, &c. *Ray*. In Sept. 1829, Mr. Soames patented his mode of procuring stearine and elaine from cocoa-nut oil. It is said that 32 tons of candles have been made in a month from these materials at the Belmont works, Lambeth.

CODES, see *Laws*. Alfenus Varus, the civilian, first collected the Roman laws about 66 B.C.; and Servius Sulpicius, the civilian, embodied them about 53 B.C. The Gregorian and Hermoginian codes were published A.D. 290; the Theodosian code commenced by order of Theodosius II. in 429; and published for the eastern empire in 438. In 447 he transmitted to Valentinian his new constitutions promulgated as the law of the west in 448. The celebrated code of the emperor Justinian in 529—a digest from this last made in 533; see *Basilica*. Alfred's code is the foundation of the common law of England, 887.—The CODE NAPOLEON, the civil code of France, was promulgated from 1803 to 1810. The emperor considered it his most enduring monument. It was prepared under his supervision by the most eminent jurists, from the 400 systems previously existing. It has been adopted by other countries.

CODFISH, see *Holland, 1347.*

COD-LIVER OIL was recommended as a remedy for chronic rheumatism by Dr. Percival in 1782, and for diseases of the lungs about 1838. De Jongh's treatise on cod-liver oil was published in Latin, 1844; in English, 1849.

CŒUR DE LION or THE LION-HEARTED, a surname given to Richard I. of England, on account of his courage about 1192; and also to Louis VIII. of France, who signalled himself in the crusades, and in his wars against England, about 1223.

COFFEE. The tree was conveyed from Mocha in Arabia to Holland about 1616; and carried to the West Indies in 1726. First cultivated at Surinam by the Dutch, 1718. The culture was encouraged in the plantations about 1732, and the British and French colonies now grow coffee abundantly. Its use as a *beverage* is traced to the Persians. It came into great repute in Arabia Felix, about 1454; and passed thence into Egypt and Syria, and thence (in 1511) to Constantinople, where a coffee-house was opened in 1551. M. Thevenot, the traveller, first brought it to France, 1662. *Chambers*.

Coffee brought into England by Mr. Nathaniel Canopus, a Cretan, who made it his common beverage at Balliol college, Oxford, 1647. *Anderson*.

The quantity of coffee imported into these realms in 1852, 54,935,510 lbs.; in 1860, 82,767,746 lbs.; in 1866, 127,044,816 lbs.

The first coffee-house in England was kept by a Jew, named Jacobs, in Oxford . . . 1650
Mr. Edwards, an English Turkey merchant,

brought home with him Pasquet, a Greek servant, who opened the first coffee-house in London, in George-yard, Lombard-street . . . 1652
Pasquet afterwards went to Holland, and opened the first house in that country. *Anderson*.
Rainbow coffee-house, Temple-bar, represented as a nuisance . . . 1657
Coffee-houses were suppressed by proclamation in 1675; but the order was revoked in 1676, on petition of the traders.

COFFERER OF THE HOUSEHOLD, formerly an officer of state, and a member of the privy council, who had special charge of the other officers of the household. Sir Henry Cocks was cofferer to queen Elizabeth. Some of the highest statesmen filled the office up to 1782, when it was suppressed by act of parliament, and the duties of it ordered to be discharged by the lord steward and the paymaster of the household. *Beaton*.

COFFINS. Athenian heroes were buried in coffins of cedar; owing to its aromatic and incorruptible qualities. *Thucydides*. Coffins of marble and stone were used by the Romans. Alexander is said to have been buried in one of gold; and glass coffins have been found in England. *Gough*. The earliest record of wooden coffins amongst us is that of the burial of king Arthur in an entire trunk of oak hollowed, 542. *Asser*. Patent coffins were invented in 1796; air-tight metallic coffins advertised at Birmingham in 1861.

COHORT. A division of the Roman army consisting of about 600 men, divided into centuries. It was the sixth part of a legion, and its number, consequently, was under the

same fluctuation as that of the legions. In the time of the empire the cohort often amounted to a thousand men.

COIF. The serjeant's coif was originally an iron skull-cap, worn by knights under their helmets. The coif was introduced before 1259, and was used to hide the tonsure of such renegade clergymen as chose to remain advocates in the secular courts, notwithstanding their prohibition by canon. *Blackstone*. The coif was at first a thin linen cover gathered together in the form of a skull or helmet, the material being afterwards changed into white silk, and the form eventually into the black patch at the top of the forensic wig, which is now the distinguishing mark of the degree of serjeant-at-law. *Poss's Lives of the Judges*.

COIMBRA was made the capital of Portugal by Alfonso, the first king, 1139. The only Portuguese university was transferred from Lisbon to Coimbra in 1308; finally settled in 1527. In a convent here, Alfonso IV. caused Inez de Castro, at first mistress and afterwards wife of his son Pedro, to be cruelly murdered in 1355.

COIN. Homer speaks of brass money as existing 1184 B.C. The invention of coin is ascribed to the Lydians, whose money was of gold and silver. Both were coined by Pheidon, tyrant of Argos, 862 B.C. Money was coined at Rome under Servius Tullius, about 573 B.C. The most ancient known coins are Macedonian of the 5th century B.C. Brass money only was in use at Rome previously to 269 B.C. (when Fabius Pictor coined silver). Gold was coined 206 B.C. Iron money was used in Sparta, and iron and tin in Britain. *Dufresnoy*. In the earlier days of Rome the heads were those of deities, or of those who had received divine honours. Julius Cesar first obtained permission of the senate to place his portrait on the coins, and the example was soon followed. The gold and silver coinage in the world is about 250,000,000*l.* silver, and 150,000,000*l.* gold. *Times*, 25 June, 1852; see *Gold, Silver, and Copper*.

The first coinage in England was under the Romans at Camalodunum, or Colchester. English coin was of different shapes, as square, oblong, and round, until the middle ages, when round coin only was used. Coin was made sterling in 1216, before which time rents were mostly paid in kind, and money was found only in the coffers of the barons. *Stow*. Queen Elizabeth caused the *base coin* to be recalled and genuine issued in . . . 1560 During the reigns of the Stuarts the coinage was greatly debased by clipping, &c. A commission (lord Somers, sir Isaac Newton, and John Locke) was appointed by William III. to reform the coinage, an act was passed, withdrawing the debased coin from circulation, and 1,200,000*l.* was raised by a house duty to defray the expense . . . 1696 English and Irish money assimilated . . . 1 Jan. 1826 The coin of the realm valued at about 12,000,000*l.* in 1711. *Davenant*. COINING. Originally the metal was placed between two steel dies, and struck by a

hammer. In 1553, a mill, invented by Antoine Brucher, introduced into England, 1562. An engine invented by Balancier, 1617. Great improvements effected by Boulton and Watt, at Soho, 1788. The erection of the Mint machinery, London, began 1811.

COLCHESTER (Essex), *Camalodunum*, a Roman station, supposed birthplace of Constantine the Great; obtained its first charter from Richard I., 1189. Its sixteen churches and all its buildings sustained great damage at the ten weeks' siege. 1648. Two of its defenders, sir George Lisle and sir Charles Lisle, were tried and shot after surrendering. The baize manufacture was established here, 1660. *Anderson*. The railway to London was opened in 1843.

COLD. The extremes of heat and cold are found to produce the same perceptions on the skin, and when mercury is frozen at forty degrees below zero, the sensation is the same as touching red-hot iron. During the hard frost in 1740, a palace of ice was built at St. Petersburg. *Greig*. Quicksilver was frozen hard at Moscow, 13 Jan. 1810. Perhaps the coldest day ever known in London was 25 Dec. 1796, when the thermometer was 16° below zero. On 3 Jan. 1854, the thermometer marked 4° below zero, Fahrenheit; on 25 Dec. 1860, it fell in some places to 18° and in others to 15° below zero; at Torquay, Devon, 20° below zero. From 23 to 30 Dec. the cold was excessive. On 4 Jan. 1867, the thermometer stood at 3° below zero at Hammersmith and Hornsey, near London; on 7 Jan., at 55° above; see *Frosts, Ice, Congelation, Regelation*.

COLDINGHAM, near Berwick, is celebrated for the heroism of its nuns, who, on the attack of the Danes, in order to preserve their chastity, cut off their noses and lips. The Danes burnt the whole sisterhood, with the abbess Ebba, in their monastery, 875.

COLDSTREAM GUARDS. General Monk, before marching from Scotland into England to restore Charles II., raised this regiment at Coldstream, at the confluence of the Leet and Tweed, 1660.

COLENSO CONTROVERSY, see *Church of England*, 1862-8. COLIN, see *Kolin*.

COLISEUM or COLOSSEUM, at Rome, an elliptical amphitheatre, of which the external diameter is 1641 Italian feet, supposed to have been able to contain 80,000 spectators of the fights with wild beasts, and other sports in the arena. It was erected between 75 (some say 77) and 80, by the emperors Vespasian and Titus, at an expense sufficient to have built a metropolis. Its remains are very imposing.

COLLAR, a very ancient ornament. The Roman hero Titus Manlius slew a gigantic Gaul in single combat, and put his *torques* (twisted chain or collar) on his own neck, and was hence surnamed Torquatus, 361 B.C. A collar is part of the ensigns of the order of knighthood. That of the order of the garter is described, and its wearing enjoined, in the statutes of Henry VIII., 24 April, 1522; but a collar had been previously worn by the knights. *Ashmole*. The collar of SS. was adopted by Henry IV., and became a Lancastrian badge; some consider the letters stand for "souveraigne," in reference to his claim to the crown. Some writers consider SS. to be in honour of St. Simplicius, a martyr. The order of the Collar or Necklace (or Annonciada) was instituted by Amadeus VI. of Savoy, about 1360.

COLLECTS, short prayers introduced into the Roman service by pope Gelasius, about 493, and into the English Liturgy in 1548. The king of England coming into Normandy, appointed a collect for the relief of the Holy Land, 1166. *Rapin*.

COLLEGES. University education preceded the erection of colleges, which were munificent foundations to relieve the students from the expense of living at lodging-houses and at inns. Collegiate or academic degrees are said to have been first conferred at the university of Paris, 1140; but some authorities say not before 1215. In England, it is contended that the date is much higher, and some hold that Bede obtained a decree formerly at Cambridge, and John de Beverley at Oxford, that they were the first doctors of these universities; see *Cambridge, Oxford, Aberdeen, Queen's Colleges, Working Men's Colleges, &c.*

COLLODION, a film obtained from the solution of gun-cotton in ether. The *iodised*

collodion extensively employed in photography, was discovered by Mr. F. Scott Archer, and announced in the "Chemist," in March, 1831. On the premature death of himself and wife, a pension of 50*l.* per annum was granted by government to his three orphan children.

COLOGNE (*Colonia Agrippina*), on the Rhine, the site of a colony founded by the empress Agrippina, about 50; became a member of the Hanseatic league, 1260. The Jews were expelled from it in 1485, and the Protestants in 1618, and it then fell into decay. Cologne was taken by the French, under Jourdan, Oct. 1794. The archbishopric secularised, 1801; assigned to Prussia, 1814.

COLOMBO (Ceylon) was fortified in 1638, by the Portuguese, who were expelled by the Dutch in 1666; the latter surrendered it to the British, 15 Feb. 1796. The British troops were murdered here in cold blood by the adigar of Candy, 6 June, 1803. Colombo was made a bishopric in 1845; see *Ceylon*.

COLON (:). The colon and period were adopted by Thrasymachus about 373 B.C. (*Suidas*), and known to Aristotle. The colon and semicolon (;) were first used in British literature in the 16th century.

COLONEL (from Italian *colonna*, a column), the highest regimental military officer. The term had become common in England in the 16th century.

COLONIAL NAVAL DEFENCE ACT, to enable the colonies to take effectual measures for their defence against attacks by sea, was passed in 1865.

COLONIES. The Phœnician and Greek colonies, frequently founded by political exiles, soon became independent of the mother country. The Roman colonies, on the contrary, continued in close connection with Rome itself; being governed almost entirely by military law.—The **COLONIES OF GREAT BRITAIN** partake of both these characters. The N. American colonies revolted in consequence of the attempt at taxation without their consent in 1764. The loyal condition of the present colonies now is due to the gradual relaxation of the pressure of the home government. The population of the British colonies in all parts of the world was estimated, in 1861, at 142,952,243 (of which 135,442,911 belong to the East Indies). The revenue of the colonies was estimated in 1865 to be 51,492,000*l.*, the expenditure, 59,353,000*l.* The act for the abolition of slavery in the British colonies, and for compensation to the owners of slaves (20,000,000*l.* sterling), was passed in 1833. All the slaves throughout the British colonies were emancipated on 1 Aug. 1834. The *Colonial branch mint act* was passed in 1866; see *Bishops, Colonial, and Separate Articles*.

COLORADO, a territory of the United States of North America, was organised 2 March, 1861; made a state, May, 1866; capital, Golden City.

COLOSSEUM, see *Coliseum.* The building in Regent's Park, London, was planned by Mr. Hornor, a land surveyor, and commenced in 1824, by Peto and Grissell, from designs by Decimus Burton. The chief portion is a polygon of 16 faces, 126 feet in diameter externally: the walls are three feet thick at the ground: the height to the glazed dome 112 feet. On the canvas walls of the dome is painted the panoramic view of London, completed in 1829 from sketches by Mr. Hornor taken from the summit of St. Paul's cathedral in 1821-2. The picture covers above 46,000 square feet, more than an acre of canvas. The different parts were combined by Mr. E. T. Parris, who in 1845 repainted the whole. In 1848 a panorama of Paris was exhibited; succeeded, in 1850, by the lake of Thorn in Switzerland; in 1851 the panorama of London was reproduced. In 1848 the theatre with the panorama of Lisbon was added. In 1831, when Mr. Hornor failed, the establishment was sold for 40,000*l.* to Messrs. Braham and Yates. In 1843 it was bought by Mr. D. Montague for 23,000 guineas. *Timbs.* After having been long closed, the building was opened to the public at Christmas, 1856, at one shilling. Under the charge of Dr. Bachhoffner it continued open till the spring of 1864, when it was again closed.

COLOSSUS OF RHODES, a brass statue of Apollo, seventy cubits high, esteemed one of the wonders of the world, was erected at the port of Rhodes in honour of the sun, by Chares of Lindus, disciple of Lysippus, 290 or 288 B.C. It was thrown down by an earthquake about 224 B.C. The figure is said traditionally to have stood upon two moles, a leg being extended on each side of the harbour, so that a vessel in full sail could enter between. The statue was in ruins for nearly nine centuries, and had never been repaired; when the Saracens taking Rhodes, pulled it to pieces, and sold the metal, weighing 720,900 lbs., to a Jew, who is said to have loaded 900 camels in transporting it to Alexandria about 653. *Dufresnoy.*

COLOUR is to light what pitch is to sound, according to the undulatory theory of Huyghens (about 1678), established by Dr. T. Young, and others. The shade varies according to the number of vibrations. The number of millions of millions of vibrations in a second attributed to the red end of the spectrum is 458; to the violet, 727; see *Spectrum.**

COLUMBIA, a federal district round the city of Washington in Maryland: established 1800. In 1862, slavery was abolished in it; see *British Columbia.*

COLUMBIUM, a metal discovered by C. Hatchett, in a mineral named columbite, in 1801. It is identical with niobium, and not with tantalum, as supposed by some chemists. *Watts.*

COMBAT, SINGLE. Trial by this commenced by the Lombards, 659. *Baronius.* It was introduced into England for accusations of treason, if neither the accuser nor the accused could produce good evidence; see *High Constable,* and *Appeal of Battle.*

The first battle by single combat was fought before the king and the peers between Geoffrey Baynard and William earl of Eu, who was accused by Baynard of high treason; and Baynard having conquered, Eu was deemed convicted, and blinded and mutilated, 1096.

The last combat proposed was between lord Ray and David Ramsay, in 1631, but the king prevented it. A trial was appointed between the prior of

Kilmainham and the earl of Ormond, the former having impeached the latter of high treason; but the quarrel having been taken up by the king, was decided without fighting, 1446.

In a combat in Dublin castle, before the lords justices and council, between Connor MacCormack O'Connor and Teig Mac-Gilpatrick O'Connor, the former had his head cut off, and presented to the lords, 1553.

* Some persons (about 65 out of 1154) cannot distinguish between colours, and are termed *Colour blind.* In 1859, professor J. Clerk Maxwell invented spectacles to remedy this defect, which is also called "Daltonism," after John Dalton, the chemist, to whom scarlet appeared drab-coloured.

COMBINATION. Laws were enacted from the time of Edward I. downwards, regulating the price of labour and the relations between masters and workmen, and prohibiting the latter from *combining* for their own protection. All these laws were repealed in 1825, due protection being given to both parties. The act was amended in 1859, when the subject was much discussed, in consequence of the strike in the building trades; see *Sheffield*, and *Strikes*.

COMEDY. Thalia is the muse of comedy and lyric poetry. Susarion and Dolon, the inventors of theatrical exhibitions, 562 B.C., performed the first comedy at Athens, on a waggon or moveable stage, on four wheels, for which they were rewarded with a basket of figs and a cask of wine; see *Arundelian Marbles*, and *Drama*.

Aristophanes called the prince of ancient comedy, 434 B.C., and Menander that of the new, 320 B.C. Of Plautus, 20 comedies are extant; he flourished 220 B.C. Statius Cæcilius wrote upwards of 30 comedies; flourished at Rome 180 B.C. Comedies of Lælius and Terence first acted 154 B.C.

First regular comedy performed in England, about A.D. 1531.

It was said of Sheridan that he wrote the best comedy (the *School for Scandal*), the best opera (the *Duenna*), and the best afterpiece (the *Critic*), in the English language (1775-1779).

COMETS (Greek *comē*, a hair). It is recorded that more than 600 have been seen. Mr. Hind, in his little work on comets, gives a chronological list of comets. The first discovered and described accurately was by Nicephorus, 1337.

At the birth of the great Mithridates two large comets appeared, which were seen for seventy-two days together, whose splendour eclipsed that of the mid-day sun, and occupied the fourth part of the heavens, about 135 B.C. *Justin*.

A grand comet seen 1264. Its tail is said to have extended 100°. It is considered to have reappeared in 1556, with diminished splendour; and was expected to appear again about Aug. 1858 or Aug. 1860. *Hind*.

A remarkable one seen in England, June 1337. *Stow*. Tycho Brahe demonstrated that comets are extraneous to our atmosphere, about 1577.

A comet which terrified the people from its near approach to the earth, was visible from 3 Nov. 1679, to 9 March, 1680.

The orbits of comets proved to be ellipses by Newton, 1704.

A most brilliant comet appeared in 1769, which passed within two millions of miles of the earth. This beautiful comet, moving with immense swiftness, was seen in London; its tail stretched across the heavens, like a prodigious luminous arch, 36,000,000 miles in length. The computed length of that which appeared in 1811, and which was so remarkably conspicuous, was, on 15 Oct. according to the late Dr. Herschel, upwards of 100,000,000 miles, and its apparent greatest breadth, at the same time, 15,000,000 miles. *Philos. Trans. Royal Soc.* for 1812.

One still more brilliant appeared in Sept. Oct. and Nov. 1811, visible all the autumn to the naked eye. Another Dec. 1823.

HALLEY'S COMET, 1682. Named after one of the greatest astronomers of England. He first proved that many of the appearances of comets were but the periodical returns of the same bodies, and he demonstrated that the comet of 1682 was the same with the comet of 1456, 1531, and 1607, deducing this fact from a minute observation of the first-mentioned comet, and being struck by its wonderful resemblance to the comets described as having appeared in those years: Halley, therefore, first fixed the identity of comets, and predicted their periodical returns. *Vince's Astronomy*. The revolution of Halley's comet is performed in about 75 years; it appeared in 1759, and came to its perihelion on March 13; its last appearance was 1835.

ENCKE'S COMET. First discovered by M. Pons, 26

Nov. 1818, but justly named by astronomers after professor Encke, for his success in detecting its orbit, motions, and perturbations; it is, like the preceding, one of the three comets which have appeared according to prediction, and its revolutions are made in 3 years and 15 weeks.

BIELA'S COMET has been an object of fear to many on account of the nearness with which it has approached, not the earth, but a point of the earth's path; it was first discovered by M. Biela, an Austrian officer, 28 Feb. 1826. It is one of the three comets whose re-appearance was predicted, its revolution being performed in 6 years and 38 weeks. Its second appearance was in 1832, when the time of its perihelion passage was 27 Nov.; its third was in 1839; its fourth in 1845; and its fifth in 1852.

DONATI'S COMET, so called from its having been first observed by Dr. Donati, of Florence, 2 June, 1858, being then calculated to be 228,000,000 miles from our earth. It was very brilliant in England in the end of September and October following, when the tail was said to be 40,000,000 miles long. On the 10th of October it was nearest to the earth; on the 18th it was near coming into collision with Venus. Opinions varied as to this comet's brilliancy compared with that of 1811.

THE GREAT COMET of 1861 was first seen by Mr. Tebbutt at Sydney, in Australia, 13 May; by M. Goldschmidt and others in France and England on 29, 30 June. The nucleus was about 400 miles in diameter, with a long bush-like tail, travelling at the rate of 10,000,000 miles in 24 hours. On 30 June, it was suggested that we were in the tail—there being "a phosphorescent auroral glare." A tailless comet was discovered in the constellation Cassiopeia, by M. Seeling, at Athens, on 2 July, and by M. Teimpel, at Marseilles, 2 & 3 July, 1862.

M. Rosa (at Rome) discovered a comet on 25 July, 1862. It was visible by the naked eye in August and September.

Six telescopic comets were observed in 1863, and several in 1864.

A fine comet appeared in the southern hemisphere, and was visible in South America and Australia, in Jan. Feb., 1865.

M. Babinet considered that comets had so little density that the earth might pass through the tail of one without our being aware of it, 4 May, 1857.

COMMENDAM, "a benefice or church living, which being void, is commended to the charge of some sufficient clerk, to be supplied until it may be conveniently supplied with a pastor." *Blount*. By 6 & 7 Will. IV. c. 77 (1836), future bishops were prohibited from holding in *commendam* the livings they held when consecrated.

COMMERCE early flourished in Arabia, Egypt, and among the Phœnicians, see the description of Tyre, 588 B.C., *Ezek.* xxvii. In later times it was spread over Europe by a confederacy of maritime cities, 1241 (see *Hanse Towns*); by the discoveries of Columbus; and by the enterprises of the Dutch and Portuguese; see *the various articles connected with this subject through the volume.*

The first *treaty of commerce* made by England with any foreign nation was entered into with the Flemings, 1 Edw. I. 1272. The second was with Portugal and Spain, 2 Edw. II. 1308. *Anderson*; see *Treaties*. Hertslett's Collection, in 10 vols. 8vo., published 1827-59, has a copious index.

An important commercial treaty was concluded with France in 1860
Chambers of Commerce originated at Marseilles in the 14th century, and similar chambers

were instituted in all the chief cities in France about, 1700
These chambers suppressed in 1791; restored by decree 3 Sept. 1851
The chamber of commerce at Glasgow was established 1783; at Edinburgh, 1785; Manchester, 1820; Hull 1837
Twenty-seven of these chambers of commerce (not including Liverpool, Manchester, and Glasgow) met at Westminster for interchange of opinions on various questions 21 Feb. 1865

COMMISSION, see *High Court of Commission*.

COMMISSIONNAIRES, street messengers in Paris. Those in London were originally pensioned soldiers wounded either in the Crimea or India, first employed in the west-end. They were appointed by a society, founded in Feb. 1859 by capt. Edward Walter, which is now under the patronage of the queen and the commander-in-chief. The charges are regulated by a tariff. In Jan. 1861 the society commenced the gratuitous issue of a Monthly Advertising Circular. In March, 1864, there were 250 commissionnaires in London. In Nov. 1866, about 340. In 17 June, 1865, capt. Walter resigned the superintendance, and a permanent system of administration was formed. In 1865 commissionnaires were first engaged as private night-watchmen.

COMMON COUNCIL OF LONDON. Its organisation began about 1208. The charter of Henry I. mentions the *folk-mote*, a Saxon appellation for a court or assembly of the people. The general place of meeting of the *folk-mote* was in the open air at St. Paul's cross, St. Paul's churchyard. It was not discontinued till after Henry III.'s reign; when certain representatives were chosen out of each ward, who, being added to the lord mayor and aldermen, constituted the court of common council. At first only two were returned for each ward; but the number was enlarged in 1347, and since. This council is elected annually on 21 Dec., St. Thomas's day. A *Common Hall* is held occasionally. The common council supported the prince of Orange in 1688, and queen Caroline in 1820.

COMMON LAW OF ENGLAND, an ancient collection of unwritten maxims and customs (*leges non scriptæ*), of British, Saxon, and Danish origin, which has subsisted immemorially in this kingdom; and although somewhat impaired by the rude shock of the Norman conquest, has weathered the violence of the times. This endeared it to the people in general, as well because its decisions were universally known, as because it was found to be excellently adapted to the genius of the English nation; and accordingly, at the famous parliament of Merton, 1236, "all the earls and barons," says the parliament roll, "with one voice answered, that they would not change the laws of England, which have hitherto been used and approved;" eminently the law of the land; see *Bastard*. The process, practice, and mode of pleading in the superior *courts of common law*, were amended in 1852 and 1854.

COMMON PLEAS, COURT OF, IN ENGLAND, in ancient times followed the king's person, and is distinct from that of the King's Bench; but on the confirmation of *Magna Charta* by king John, in 1215, it was fixed at Westminster, where it still continues. In 1833 the mode

of procedure in all the superior courts was made uniform. In England, no barrister under the degree of serjeant could plead in the court of common pleas; but in 1846 the privilege was extended to barristers practising in the superior courts at Westminster.

COMMON PRAYER, BOOK OF, was ordered by parliament to be printed in the English language on 1 April, 1548. It was voted out of doors by parliament, and the Directory (*which see*) set up in its room in 1644, and a proclamation was issued against it in 1647. With a few changes the English Common Prayer-book is used by the episcopal churches in Scotland and North America.

COMMONS. In 1685, of the 37,000,000 acres of land in England, about 18,000,000 were moorland, forest, and fen. In 1727, about 3,000,000 acres more had been brought into cultivation; and from that time to 1844, by means of 4000 private acts of parliament, about 7,000,000 acres more were enclosed. Since the Inclosure Act of 1845, which established commissioners, another 1,000,000 acres have been enclosed.

COMMONS, HOUSE OF, our great representative assembly, originated with Simon de Montfort, earl of Leicester, who by the Provisions of Oxford ordered returns to be made of two knights from every shire, and deputies from certain boroughs, to meet such of the barons and clergy as were his friends, with a view thereby to strengthen his own power in opposition to that of his sovereign Henry III., 1258. *Stow*; see *Parliament*. The following is the constitution of the house of commons by passing the reform bill in 1832:—

ENGLISH.		Cities and boroughs 14— 29	IRISH.	
County members 144			County members 64	
Universities 4			University 2

WELSH. County members. 15		SCOTCH.	Total 660*	
		County members 30		
		Cities and burghs 23— 53		

In 1859 Mr. Newmarch estimated the constituency of England and Wales at 934,000. It was much increased by the reform act of 15 Aug. 1867.

* In 1844 Sudbury, and in 1852 St. Alban's, were disfranchised for bribery and corruption; each having previously returned two members; the aggregate number of the house then became 656. In 1861, the forfeited seats were thus distributed by act of parliament—two additional to the west riding of York, one additional to South Lancashire, and one to a newly-created borough, Birkenhead.

death of Charles I. and the restoration of Charles II. A republic was established at the execution of Charles I., 30 Jan. 1649,—a new oath called the "Engagement" was framed, which the people were obliged to take.* *Salmon*. Oliver Cromwell was made protector, 16 Dec. 1653; succeeded by his son Richard, 3 Sept. 1658. Monarchy was restored, and Charles II. entered London, 29 May, 1660.

COMMUNION, a name given to the ordinance of the Lord's supper, 1 *Cor.* x. 16. Communicating under the form of bread alone is said to have had its rise in the west, under pope Urban II., 1096. The fourth Lateran council, 1215, decreed that every believer should receive the communion at least at Easter. The cup was first denied to the laity by the council of Constance, 1414-18. The communion service of the church of England was set forth in 1549.

COMPANIES.† Among the earliest commercial companies in England may be named the Steel-yard society, established 1232. The second company was the merchants of St. Thomas à Becket, in 1248. *Stow*. The third was the Merchant Adventurers, incorporated by Elizabeth, 1564. The following are the city companies of London; the first twelve are the chief, and are styled "the Honourable." COMPANIES' ACT, passed 1862, was amended and continued, 20 Aug. 1867.

COMPASS, MARINER'S, said to have been known to the Chinese, 1115 B.C., is ascribed to Marco Polo, a Venetian, A.D. 1260; and to Flavio Gioja, of Amalfi, a navigator of Naples. ‡ Until this time the needle was laid upon a couple of pieces of straw, or small split sticks, in a vessel of water; Gioja introduced the suspension of the needle, 1302. It is also said to have been known to the Swedes in the time of king Jarl Birger, 1250. Its variation was discovered first by Columbus, 1492; afterwards by Sebastian Cabot, 1540. The compass-box and hanging compass used by navigators were invented by William Barlowe, an English divine and natural philosopher, in 1608; see *Magnetism*. The *measuring* compass was invented by Jost Bing, of Hesse, in 1602.

COMPIEGNE, a French city north of Paris, the residence of the Carolingian kings. During the siege, Joan of Arc was captured by the English, 24 May, 1430. The emperor Napoleon III. and the king of Prussia met here on 6 Oct. 1861.

COMPLUTENSIAN BIBLE, see *Polypgot*.

* By this oath they swore to be true and faithful to the commonwealth, without king or house of ords. The statues of Charles were next day demolished, particularly that at the Royal Exchange, and one at the west end of St. Paul's; and in their room the following inscription was conspicuously set up:—"Exit Tyrannus Regum ultimus, Anno Libertatis Anglie Restituta Primo, Anno Dom. 1648, Jan. 30."

† Bubble companies have been formed, commonly by designing persons. Law's bubble, in 1720-1, was perhaps the most extraordinary of its kind, and the *South Sea Bubble*, in the same year, was scarcely less memorable for its ruin of thousands of families. Many companies were established in these countries in 1824 and 1825, and turned out to be bubbles. Immense losses were incurred by individuals, and the families of thousands of speculators were totally ruined. Many railway enterprises (1844-5) may be termed bubbles; see *Law's Bubble*; *South Sea*; *Railways*; *Joint-Stock Companies*.

‡ The statement that the fleur-de-lis was made the ornament of the northern point of the compass in compliment to Charles, the king of Naples at the time of the discovery, has been contradicted.

COMPOSITE ORDER, a mixture of the Corinthian and Ionic, and also called the Roman order, is of uncertain date.

COMPOUND HOUSEHOLDERS, (in regard to the payment of rates) were constituted by the Small Tenements act of 1850. Their position, with regard to the suffrage, caused much discussion during the passing of the Reform act in 1867; and their claims were rejected.

COMPOUND RADICLE, in organic chemistry, is a substance which although containing two or more elements, in ordinary circumstances performs the part of an element. The Radical or Binary theory was propounded by Berzelius, 1833, and by Liebig, 1838; and modified in the nucleus theory of Aug. Laurent, 1836. The first compound radicle isolated was cyanogen (*which see*), by Gay-Lussac, in 1815; see *Ethyl* and *Methyl* as other examples.

COMPROMISE, see *Breda*.

COMTE PHILOSOPHY, see *Positive Philosophy*.

CONCEPTION, IMMACULATE. A festival (on 8 Dec.) appointed in 1389, is observed with great devotion in the Roman Catholic Church in honour of the Virgin Mary's having been conceived and born immaculate, or without original sin. Opposition to this doctrine was forbidden by a decree of Pope Paul V. in 1617; confirmed by Gregory XV. and Alexander VII. *Hénault*. On 8 Dec. 1854, Pope Pius IX. promulgated a bull, declaring this dogma to be an article of faith, and charging with heresy those who should doubt it or speak against it.—The CONCEPTIONISTS were an order of nuns in Italy, established in 1488; see *Santiago*.

CONCERTINA, a musical instrument invented by prof., now sir Charles Wheatstone, about 1825, and improved by Mr. G. Case. The sounds are produced by free vibrating metal springs.

CONCERTS. The Filarmonia gave concerts at Vicenza in the 16th century. The first public subscription concert was performed at Oxford in 1665; the first in London is said to have been in 1672. The Academy of Ancient Music began in 1710; the Concerts of Ancient Music in 1776; and the present Philharmonic Society in 1813; see *Music*; *Crystal Palace*; and *Handel*.

CONCHOLOGY, the science of shells, is mentioned by Aristotle and Pliny. It was first reduced to a system by John Daniel Major, of Kiel, who published his classification of the *Testacea* in 1675. Lister's system was published in 1685; and that of Largius in 1722. Johnston's Introduction (1850) and Sowerby's Manual of Conchology (1842), are useful. Forbes and Hanley's "British Mollusca and their Shells" (1848-53) is a magnificent work.

CONCILIATION COUNCILS, see *Council*.

CONCLAVE. This term is derived from the conclave, a range of small cells in the hall of the Vatican, or palace of the pope of Rome, where the cardinals usually meet to elect a pope, and is also used for the assembly of the cardinals shut up for the purpose. Clement IV. having died at Viterbo in 1268, the cardinals were nearly three years unable to agree in the choice of a successor, and were on the point of breaking up, when the magistrates, by the advice of St. Bonaventura, then at Viterbo, shut the gates of their city, and locked up the cardinals in the pontifical palace till they agreed, 1271.

CONCORDANCE. An index or alphabetical catalogue of all the words and also a chronological account of all the transactions in the Bible. The first concordance was made under the direction of Hugo de St. Caro, who employed as many as 500 monks upon it, 1247. *Abbé Lenglet*. Cruden's Concordance was published in London in 1737. The Index to the Bible, published by the Queen's printers, was prepared by B. Vincent, editor of this volume, and completed in May, 1848.*

CONCORDAT. The name is given to an instrument of agreement between a prince and the pope, usually concerning benefices. The concordat between the emperor Henry V. of Germany and pope Calixtus II., in 1122, has been regarded as the fundamental law of the church in Germany. The concordat between Napoleon Bonaparte and Pius VII., signed at Paris, 15 July, 1801, re-established the Catholic church and the papal authority in France. Napoleon was made in effect the head of the Gallican church, as bishops were to have their appointments from him and their investiture from the pope. Another concordat between the same persons was signed at Fontainebleau, 25 Jan. 1813. These were almost nullified in 1817. A concordat, signed 18 Aug. 1855, between Austria and Rome, by which a great deal of the liberty of the Austrian church was given up to the Papacy, caused much dissatisfaction. In 1868 it was virtually abolished by the legislatures of Hungary and Austria.

CONCUBINES were tolerated among the Jews, Greeks, and Romans, but strictly for-

An index to *Shakspeare*, by Ayscough, appeared in 1799; another by Twiss in 1805; and Mrs. Cowden Clarke's (late Mary Novello) complete concordance to *Shakspeare* (on which she spent 16 years' labour) in 1847. Todd's verbal index to *Milton* was published in 1809.

bidden by Christ (*Mark* x., *1 Cor.* vii. 2). They are mentioned as having been allowed to the priests, 1132; see *Morganatic Marriage*.

CONDENSATION, see *Gas*.

CONDOTTIERI, *conductors* or leaders of mercenaries and their bands, termed free companies or free lancers, became so troublesome in Italy in the middle ages, that the various cities formed a league to suppress them in 1342. Many ravaged France after the peace of Bretigny in 1360.

CONDUITS. Two remarkable conduits, among a number of others in London, existed early in Cheapside. The "great conduit" was the first cistern of lead erected in the city, and was built in 1285. At the procession of Anna Boleyn, on the occasion of her marriage, it ran with white and claret wine all the afternoon, 1 Juné, 1533. *Stow*.

CONFEDERATE STATES OF AMERICA. The efforts of the Southern States for the extension of slavery, and the zeal of the Northern States for its abolition, with the consequent political dissensions, led to the great secession of 1860-1. On 4 Nov. 1860, Abraham Lincoln, the Republican or Abolitionist candidate, was elected president of the United States. Hitherto, a president in the interest of the South had been elected. On 20 Dec., South Carolina seceded from the Union; and Alabama, Florida, Mississippi, Georgia, Louisiana, Texas, Virginia (except West Virginia), Arkansas, Tennessee, and North Carolina, seceded early in 1861. Jefferson Davis was inaugurated president of the Southern Confederacy at Montgomery in Alabama, 18 Feb. 1861. For the events of the war which ensued, and the restoration of the Southern States to the Union, see *United States*, 1861-5.

CONFEDERATION AT PARIS, 14 July, 1790; see *Champs de Mars*, and *Bastille*.

CONFEDERATION OF THE RHINE. The League of the Germanic States, formed by Napoleon Bonaparte, 12 July, 1806, when he abolished the Holy Roman Empire, and the emperor of Germany became emperor of Austria. In Dec. it consisted of France, Bavaria, Wurtemberg, Saxony, and Westphalia; seven grand duchies; six duchies; and twenty principalities. The princes collectively engaged to raise 258,000 troops to serve in case of war, and established a diet at Frankfort. This league terminated with the career of Bonaparte in 1814; it was replaced by the *Germanic Confederation* (*which see*), and see *Germany*.

CONFERENCES. One was held at Hampton Court Palace, between the prelates of the church of England and the dissenting ministers, in order to effect a general union, at the instance of the king, James I. 14-16 Jan. 1604. It led to the new translation of the Bible, now in general use in England; executed in 1607-11. Some alterations in the church liturgy were agreed upon; but these not satisfying the dissenters, nothing more was done.—Another conference of the bishops and presbyterian ministers, with the same view, was held in the *Savoy*, 25 April to 25 July, 1661. The dissenters' objections were generally disallowed, but some alterations were recommended in the Prayer-book; see *Westleyans*.

CONFESSIONAL, see *Auricular Confession*.

CONFESSIONS OF FAITH; or CREEDS, see *Apostles'*, *Nicene* (325), and *Athanasian* (about 434) *Creeeds*.

The confession of faith of the Greek church was presented to Mahommed II. in 1453. This gave way in 1643 to one composed by Mogila, metropolitan of Kiev, which is the present standard of the Russo-Greek church.

The creed of Pius VI., composed of the Nicene creed, with additional articles which embody all the peculiar dogmas of the Roman Catholic church, published by the council of Trent 1564

The church of England retains the Apostles', Nicene, and Athanasian creeds, with Ar-

titles:—42 in 1552; reduced to 39	1563
The confession of Augsburg (that of the Lutherans) was drawn up principally by Melancthon, in 1530, and has since undergone modifications, the last of which is called the "Form of Concord."	1579
The Westminster confession was agreed to in 1643; and adopted by the presbyterian church of Scotland; see <i>Westminster</i>	1647
The congregational dissenters published a declaration of faith	1833

CONFIRMATION, or laying on hands, was practised by the apostles in 34 and 56 (*Acts* viii. 17; xix. 6), and was general, according to some church authorities, in 190. In the church of England it is the public profession of the Christian religion by an adult person, who has been baptized in infancy. It is made a sacrament by the church of Rome.

CONFLANS (near Paris), TREATY OF, between Louis XI. of France and the dukes of Bourbon, Brittany, and Burgundy, 5 Oct. 1465. By its provisions Normandy was ceded to the duke of Berry, and an end was put to the "War of the Public Good." It was confirmed by the treaty of Peronne, 1468.

CONGÉ D'ÉLIRE (permission to elect), the licence given by the sovereign as head of the church, to chapters and other bodies, to elect dignitaries, particularly bishops; the right asserted by Henry VIII. 1535. After the interdict of the pope upon England had been removed in 1214, king John made an arrangement with the clergy for the election of bishops.

CONGELATION, the act of freezing. Ice was produced in summer by means of chemical mixtures, by Mr. Walker, in 1783. The congelation of quicksilver was effected without snow or ice, in 1787. In 1810 Leslie froze water in an air-pump by placing a vessel of sulphuric acid under it. Numerous freezing mixtures have been discovered since. Intense cold is produced by the aëriification of liquefied carbonic acid gas. In 1857 Mr. Harrison patented a machine for manufacturing ice for commercial purposes, by means of ether and salt water, and made large blocks. In 1860, M. Carré devised a method of freezing to 60° below zero by making water in a close vessel absorb and give off the gas ammonia. Siebë's ice-making machine, exhibited at the International Exhibition of 1862, excited much admiration.

CONGREGATION OF THE LORD. A name taken by the Scotch Reformers, headed by John Knox, about 1546. Their leaders (the earls of Glencairn, Argyle, Morton, and others) called Lords of the congregation, signed the first bond or covenant which united the protestants under one association 3 Dec. 1557. *Tytler.*

CONGREGATIONALISTS, see *Independents.*

CONGRESS. An assembly of princes or ministers for the settlement of the affairs of nations or of a people.* The following are the most remarkable congresses of Europe:—

Münster	1643-8	Rastadt	9 Dec. 1797	Laybach	6 May, 1821
Nimeguen	1678	Chatillon	5 Feb. 1814	Verona	25 Aug. 1822
Ryswick	1697	Vienna	3 Nov. "	Paris	16 Jan.—22 April, 1856
Utrecht	1713	Aix-la-Chapelle	9 Oct. 1818	Frankfort (see <i>Germany</i>)	
Soissons	1728	Carlsbad	1 Aug. 1819		16-31 Aug. 1863
Antwerp	8 April, 1793	Troppau	20 Oct. 1820	See <i>Alliances, Conventions, &c.</i>	

The first general congress of the UNITED STATES of AMERICA, preparatory to their declaration of independence, when strong resolutions were passed, also a petition to the king, and an address to the people of England, was held 5 Sept. 1774. The second was held 10 May, 1775; the third, when the independence was declared 4 July, 1776

The first federal American congress, under the constitution, was held at New York; George Washington, president March, 1789

The first congress of the seceding southern

states was held at Montgomery, Alabama, 4 Feb.; it elected Jefferson Davis president of the confederate states on 9 Feb. For political reasons it adjourned on 24 May, to meet at Richmond, in Virginia, on 20 July, 1861

In 1863, the emperor Napoleon invited the sovereigns of Europe to a congress; which was declined by England 25 Nov., and only conditionally acceded to by other powers. He proposed a congress on the affairs of Italy and Rome in Nov. 1867, without effect.

CONGREVE ROCKETS, invented by general sir William Congreve, in 1803, were used with great effect in the attack upon Boulogne, 8 Oct. 1806, when they set a part of the town on fire: they were employed during the French war by "rocket-men."

CONIC SECTIONS. Their properties were probably known to the Greeks, four or five centuries before the Christian era, and their study was cultivated in the time of Plato, 390 B.C. The earliest treatise on them was written by Aristæus, about 330 B.C. Apollonius's eight books were written about 240 B.C. The parabola was applied to projectiles by Galileo, who died 1608; the ellipse to the orbit of planets by Kepler, about 1609.

CONJURATION, see *Witchcraft.*

CONNECTICUT granted to lord Say and Broke, 1630; see *America, and United States.*

CONNOR, Ireland. The bishopric was united to that of Down, 1442. The first prelate, Ængus Macnisius, died 507. The united sees were added to Dromore on the death of its last bishop, 1842, in accordance with the Irish Church Temporalities act, passed 1833.

CONQUEST, the era in British history, when William duke of Normandy overcame Harold II. at the battle of Hastings, 14 Oct. 1066, and obtained the crown which had been most unfairly bequeathed to him by Edward the confessor (Edgar being the rightful heir). William has been erroneously styled the *Conqueror*, for he succeeded to the crown of England by *compact*. He defeated Harold, who was himself a usurper, but a large portion of the kingdom afterwards held out against him; and he, unlike a conqueror, took an oath to observe the laws and customs of the realm, in order to induce the submission of the people. Formerly our judges were accustomed to reprehend any gentleman at the bar who said casually William the conqueror instead of William I. *Selden.* Maclise exhibited forty-two drawings on the events of the Norman conquest, in May, 1857.

CONSCIENCE, COURTS OF, OR OF REQUESTS, first constituted by a stat. of Hen. VII. 1493, and re-organised by stat. 9 Hen. VIII. 1517. These courts were improved and amended by various acts; their jurisdiction in London reached to 5l. and (until superseded by county-courts) to 40s. in other towns. The practice was by summons, and if the party did not appear, the commissioners had power to apprehend and commit; see *County Courts.*—James II. proclaimed liberty of conscience in 1687. *Conscience Clause, see Education.*

CONSCRIPT FATHERS (*patres conscripti*) the designation given to the Roman senators, because their names were written in the registers of the senate.

CONSCRIPTION, a mode (derived from the Romans) adopted for recruiting the French and other armies. On 5 Sept. 1798, a military conscription was ordained in France, comprehending all the young men from 20 to 25 years of age: from these selections were made. The law of 1818 (modified in 1824, 1832 and 1868) required a certain annual contingent from each department. A conscription for 350,000 men took place in Jan. 1813, after the disastrous Russian campaign, and in Dec. same year, another for 300,000 after the battle of Leipsic. The conscription was enlarged and modified by the army bill which was enacted in Feb. 1868.

CONSECRATION. Aaron and his sons were consecrated priests, 1490 B.C. (*Lev. viii.*) The Jewish tabernacle was dedicated 1490 B.C., and Solomon's temple, 1004 B.C. (1 *Kings, viii.*) The consecration of churches was instituted in the 2nd century. Anciently the consecration of popes was deferred until the emperor had given his assent to their election. Gregory IV. desired to have his election confirmed by the emperor Louis, in 828. *Hénault.* The consecration of churches, places of burial, &c., is admitted in the reformed religion. An act relating to the consecration of churchyards was passed 20 Aug. 1867. The form of consecrating bishops in the church of England is set forth in the prayer-book of 1549. *Stow.*

CONSERVATION OF FORCE. The doctrine that no physical force can now be created or destroyed, but may be transferred, is maintained by Faraday, Grove, Helmholtz, Tyndall, and other philosophers; see *Correlation.*

CONSERVATIVES, a name of modern date, is given to, and accepted by a political party, whose leading principle is the preservation of our national institutions. It sprung up in England at the time when the Orange Societies and lodges were discouraged, 1836, and was substituted for Orangemen as a less obnoxious term, and as indicative of milder, but equally constitutional opinions. Conservative has, however, in some measure, changed its signification, and in popular language is now opposed to Liberal. Sir Robert Peel acknowledged himself a conservative when reproached by the Irish party in parliament with being an Orangeman; but the party that afterwards separated from him called their principles conservative in contradistinction to his,—his policy and measures being changed.—The *Conservative Club* was founded in 1840; see *Protectionists.*—The party in the north of the United States which supported the president in his conciliatory efforts to re-establish the Union, Jan. 1866, were termed "Conservatives."

CONSERVATOIRES, a name given to schools for the cultivation of music on the continent. One was established at Naples, in 1537. The singing school at Paris, founded in 1784, and closed in 1789, was re-opened in 1793 as the "Institut National de Musique," and after being re-organised, was re-named "Conservatoire de Musique" in 1795. Under Cherubini (1822–42) it greatly promoted the study of music. The "Conservatoire des Arts et Metiers" was established in 1784. It includes a museum and library, and lectures are given to workmen there.

CONSERVATORS OF THE PUBLIC LIBERTIES. Officers chosen in England to inspect the treasury and correct abuses in administration, 28 Hen. III. 1244. *Rapin.* Conservators were appointed to see the king's peace kept. *Pardon.* Conservators were formally appointed in every sea-port to take cognizance of all offences committed against the peace upon the main sea out of the liberty of the Cinque Ports. *Bailey.*

CONSISTORIES for regulating ecclesiastical discipline and divine worship in the Lutheran church in Germany, were established at the reformation—the first at Wittenberg in 1542; other consistories were established after the peace of Augsburg in 1555.

CONSISTORY COURT, anciently joined with the hundred court; and its original, as divided therefrom, is found in a law of William I., 1079, quoted by lord Coke. The chief and most ancient consistory court of the kingdom belongs to the see of Canterbury, and is called the Court of Arches (*which see*).

CONSOLIDATED FUND was formed by combining the other funds in 1786. On 5 Jan. 1816, the exchequers of Great Britain and Ireland, previously separate, were amalgamated.

CONSOLS, see *Stocks.*

CONSORZIO NAZIONALE, see *Italy*, 1866.

CONSPIRACIES. Among the recorded conspiracies, real or supposed, the following are the most remarkable: see *Rebellions.*

Of the duke of Gloucester against Richard II.	1357	Of Patrick York, an Irish fencing-master, hired by the Spaniards to kill the queen.	1594
Of the earl of Cambridge and others against Henry V.	1415	Of Walpole, a Jesuit, and Edwd. Squyer to poison the queen.	1598
Of Anthony Babington and others against Elizabeth. (See <i>Babington</i>)	1586	Tyrone's insurrection in Ireland.	1599

CONSTABLE OF ENGLAND, LORD HIGH. The seventh great officer of the crown, and, with the earl marshal, formerly a judge of the court of chivalry, called, in the time of Henry IV., *curia militaris*, and subsequently the court of honour. The power of this officer was so great, that in 1389 a statute was passed for abridging it, and also the power of the earl marshal (*which see*). The office existed before the conquest, after which it went by inheritance to the earls of Hereford and Essex, and next in the line of Stafford. In 1521 it was forfeited by Edward Stafford, duke of Buckingham, attainted for high treason, and has never since been granted to any person, otherwise than *pro hac vice* (for this occasion), to attend at a coronation or trial by combat. The only instance of a trial by combat being ordered since this office fell into the hands of the crown, was that commanded between lord Reay and sir David Ramsay, in Nov. 1631; but the king prevented it.—The following were lord high constables at coronations.

<p>Queen Anne, Wriothesly, duke of Bedford 1702</p> <p>George I., John, duke of Montagu 1714</p> <p>George II., Charles, duke of Richmond 1727</p> <p>George III., John, duke of Bedford 1761</p>	<table border="0"> <tr> <td style="font-size: 2em; vertical-align: middle;">}</td> <td style="vertical-align: middle;">George IV. 1821</td> <td rowspan="3" style="font-size: 2em; vertical-align: middle;">}</td> <td rowspan="3" style="vertical-align: middle;">Arthur, duke of Wellington { 1831</td> </tr> <tr> <td style="font-size: 2em; vertical-align: middle;">}</td> <td style="vertical-align: middle;">William IV. 1831</td> </tr> <tr> <td style="font-size: 2em; vertical-align: middle;">}</td> <td style="vertical-align: middle;">Victoria 1838</td> </tr> </table>	}	George IV. 1821	}	Arthur, duke of Wellington { 1831	}	William IV. 1831	}	Victoria 1838

CONSTABLE OF SCOTLAND, LORD HIGH. The office was instituted by David I. about 1147. The holder had the keeping of the king's sword, which the king, at his promotion delivered to him naked (and hence the badge of the lord high constable is a naked sword); and the absolute command of the king's armies while in the field, in the absence of the king. The jurisdiction of this office came at last to be exercised only in dealing with crimes during the time of parliament, which some extended likewise to all general conventions. The office was conferred heritably in 1321 on sir Gilbert Hay, created earl of Erroll, by Robert Bruce, and with his descendants it still remains, being expressly reserved by the treaty of union in 1707. The present earl of Erroll is the twenty-second lord high constable (1868).

CONSTABLES of Hundreds and Franchises, instituted in the reign of Edward I., 1285, are now called high constables. There are three kinds of constables, *high, petty, and special*; the high constable's jurisdiction extends to the whole hundred; the petty constable's to the parish or liberty for which he is chosen; and the special constable is appointed for particular emergencies (as in April, 1848, on account of the Chartists). See *Special Constables*.

CONSTABULARY FORCE. For that of London, see *Police*. The Constabulary of Ireland act passed in 1823, when this species of force was embodied throughout the country. Several subsequent acts were consolidated in 1836.

CONSTANCE, a city in Baden (S. Germany). Here was held the seventeenth general council, 1414, which condemned John Huss; and here he was burnt, 6 July 1415; see *Hussites*.

CONSTANTINA, the ancient capital of Numidia, was taken by the French, 13 Oct. 1837. During the assault on 12 Oct. the French general Damremont was killed. Achmet Bey retired with 12,000 men, as the victors entered Constantina.

CONSTANTINOPLE, formerly Byzantium (*which see*), derives its name from Constantine the Great, who removed the seat of the Eastern Empire, dedicating it 11 May, 330.

 See *Eastern Empire and Turkey*.
 ERA of Constantinople has the creation placed 5508

years B.C. It was used by the Russians until the time of Peter the Great, and is still used in the Greek church. The civil year begins 1 Sept., and the ecclesiastical year in March; the day is not exactly determined. To reduce it to our era subtract 5508 years from January to August, and 5509 from Sept. to the end. *Nicolas*.

CONSTELLATIONS. *Arcturus, Orion, the Pleiades, and Mazzaroth* are mentioned in *Job* ix. 9, and xxxviii. 31, about 1520 B.C. Homer and Hesiod notice constellations; but though some mode of grouping the visible stars had obtained in very early ages, our first direct knowledge was derived from Claudius Ptolemaeus, about A.D. 140. Hipparchus (about 147 B.C.) made a catalogue of forty-eight constellations. Others were added by Tycho Brahe, Hevelius, Halley, and others. The number at present acknowledged is 29 northern, 45 southern, and 12 zodiacal.

CONSTITUENCIES, see *Commons, House of*. CONSTITUENT, see *National Assembly*.

CONSTITUTION OF ENGLAND. It comprehends the whole body of laws by which the British people are governed, and to which it is presumptively held that every individual has assented. *Lord Somers*. This assemblage of laws is distinguished from the term government in this respect—that the constitution is the rule by which the sovereign ought to govern at all times; and government is that by which he does govern at any particular time. *Lord Bolingbroke*. The king of England is not seated on a solitary eminence of power: on the contrary, he sees his equals in the co-existing branches of the legislature, and he recognises his superior in the law. *Sheridan*. Hallam's "Constitutional History of England" was first published in 1827.

CONSTITUTIONALIST PARTY, a name given to or assumed by a combination of seceded Whigs and Conservatives, Aug. 1867.

CONSUBSTANTIATION, see *Transubstantiation*.

CONSULS (meaning colleagues), ROMAN: at the expulsion of the Tarquins, a republic was established, to be ruled by two consuls elected annually: the first being Lucius Junius Brutus and Lucius Tarquinius Collatinus, husband of the injured Lucretia, 509 B.C. The consular power was sometimes superseded by dictators and tribunes.

Government of the Decemviri . . . B.C. 451—449
 Three military tribunes, with consular power . . . 444
 A Plebeian elected consul . . . 366

[In the reign of Tiberius the consuls were nominated by the senate, and the appointment became henceforth honorary.]

The French consulate was established in 1799, when the directory was abolished: on 10 Nov. Bonaparte, Siéyès, and Roger Ducos were

made provisional consular commissioners; and on 13 Dec., Bonaparte, Cambacérès, and Lebrun were made consuls. Bonaparte was made first consul for ten years, 6 May, and for life, 2 Aug. 1802; emperor, 18 May, 1804
 Commercial agents were first distinguished by the name of *consuls* in Italy, in 1485, being appointed by Richard III. A British consul was first appointed in Portugal in 1633

CONTAGIOUS DISEASES ACT for naval and military stations passed June 1866; one for animals passed 1866; renewed 20 Aug. 1867.

CONTINENTAL SYSTEM, the name given to Napoleon's plan to exclude the British merchandise from the entire continent. It began with his *Berlin decree* in 1806, and occasioned the *Orders in Council* (*which see*), and was followed by similar measures.

CONTINUITY. Mr. W. R. Grove, in his address as president of the British Association, on 22 Aug. 1866, at Nottingham, expounded the opinion held by many philosophers, that all the past changes in the world have been produced by the continuous action of the causes now in operation—that "continuity is a law of nature, the true expression of the action of Almighty Power."

CONTRABAND OF WAR, a term said to have been first employed in the treaty of Southampton between England and Spain in 1625. During the struggle between Spain and Holland, both powers acted with much rigour towards ships of neutrals conveying goods to the belligerents. This provoked the resistance of England. A milder policy was adopted by the treaty of Pyrenees, 1650; and by the declaration of Paris, 26 April, 1856. The subject was much discussed during the North American conflict, 1861-4.

CONTRACTORS with Government, disqualified from sitting in parliament, 1782.

CONTRIBUTIONS, VOLUNTARY, to a vast amount have been several times made by the British people in aid of the government. The most remarkable of these, in 1798, to support the war against France, amounted to two millions and a half sterling. Several men of wealth, among others sir Robert Peel, of Bury, Lancashire, subscribed each 10,000*l.*: and 200,000*l.* were transmitted from India in 1799; see *Patriotic Fund*.

CONTROL, BOARD OF. Mr. Pitt's bill, establishing this board for the purpose of aiding

and controlling the executive government of India, and of superintending the territorial concerns of the company, was passed 18 May, 1784. Act amended and the board remodelled, 1793. The president of the board was a chief minister of the crown, and necessarily one of the members of the cabinet. This board was abolished in 1858, when the government of India was transferred from the company to the crown; see *India Bills*, and *India*.

CONVALESCENT INSTITUTION (Metropolitan), at Walton-on-Thames, with children's branches at Hendon and Mitcham, was established in 1840. A convalescent hospital for the east of London was founded at Snarebrook in 1866, greatly due to the exertions of Mrs. Gladstone and Miss Catherine Marsh. The principle has been since strongly advocated.

CONVENTICLES, private assemblies for religious worship, held by Dissenters from the established church; but first applied to the schools of Wickliff. They were strictly forbidden by Elizabeth in 1593, and by Charles II., 1664; and persons attending them were liable to severe punishment. The statutes were repealed by William III. in 1689.

CONVENTION PARLIAMENTS. Two especially distinguished by this term assembled without the king's writ upon extraordinary occasions. The first on 25 April, 1660, voted the restoration of Charles II.; the second met on 22 Jan. 1689, and on 13 Feb. offered the crown to William and Mary. This parliament was dissolved in Feb. 1690; see *National Convention*.

CONVENTIONS, see *Treaties*.

CONVENTS were first founded, according to some authorities, 270. The first in England was erected at Folkstone, by Eadbald, in 630. *Camden*. The first in Scotland was at Coldingham, where Ethelreda took the veil in 670. They were founded earlier than this last date in Ireland. They were suppressed in England in various reigns, particularly in that of Henry VIII., and few existed in Great Britain till lately.* A very great number have been suppressed in Europe in the present century. The king of Prussia secularised all the convents in the duchy of Posen. Don Pedro put down 300 convents in Portugal in 1834; and Spain abolished 1800 convents. Many were abolished in Italy and Sicily in 1860 and 1861; and many in Russia 31 July, 1832, and Nov. 1864.

CONVICTS, see *Transportation*.

CONVOCAION, a general assembly of the clergy in the nation, convened by the sovereign's writ, to consult on the affairs of the church; the writ is directed to the archbishop of each province, requiring him to summon all the bishops, archdeacons, &c. The convocation is divided into two houses, the upper, consisting of bishops; and lower, of deans, prebendaries, archdeacons, and members elected from the lower clergy. The clergy were summoned to meet the king by writ, 23 Edw. I. 1295. The power of the convocation was limited by a statute of Henry VIII., in whose reign the convocation was reorganised. The two houses of convocation were deprived of various privileges in 1716. Formal meetings of the clergy have been held annually since 1854, and attempts have been made to obtain the power of dealing summarily with ecclesiastical affairs, but without effect.

CONVOLVULUS. The Canary Convolvulus (*Convolvulus Canariensis*) came to England from the Canary Isles, 1690. The many-flowered convolvulus in 1779.

COOKERY, an art connected with civilised life. Animals were granted as food to Noah, 2348 B.C., the eating blood being expressly forbidden (*Gen.* ix. 3, 4). In 1898 B.C. a calf was cooked by Abraham to entertain his guests (*Gen.* xviii. 7, 8). "The Forme of Cury" (*i.e.* cookery) is dated 1390. An English cookery-book was printed 1498; † see *Cottager's Stove*.

COOK'S VOYAGES. James Cook, accompanied by sir Joseph Banks, sailed from England in the *Endeavour* on his first voyage, 30 July, 1768; ‡ and returned home after

* In 1597 lady Mary Percy founded a convent at Brussels, which flourished there till 1794, when the nuns were compelled to remove to England. They were received by bishop Milner, and placed at Winchester, at which place they remained till their removal to East Bergholt, in Suffolk, June, 1857. This was the first English conventual establishment founded on the continent after the Reformation.—It is stated that there were 16 convents in England in 1841, 53 in 1861, and 189 in 1865.

† *Military Cookery*.—Capt. Grant devised a system of cooking for the camp at Aldershot, which has continued in successful operation for the service of between 12,000 and 14,000 men. From April to August, in 1857, the plan was subjected to the severe test of cooking for 92,000 men, who marched in and out of the encampment during that period. The consumption of fuel requisite for this system of cooking is one half-pound of coal per man per day, and the official report states the cost to be one halfpenny per man per week for the three daily meals.—Self-supporting *Cooking Depots* for the working classes were set up at Glasgow (by Mr. Thomas Corbett), 21 Sept. 1860; and proved successful in Manchester, London, and other places soon after.

‡ A memorial was presented to the king by the Royal Society in 1768, setting forth the advantages which would be derived to science if an accurate observation of the then approaching transit of Venus over the sun were taken in the South Sea. The ship *Endeavour* was, in consequence, prepared for that purpose, and the command of her given to Lieutenant James Cook. He sailed in July, 1768, touched at Madeira and Rio de Janeiro, doubled Cape Horn, and after a prosperous voyage reached Otaheite, the place of destination, in April, 1769. By a comparison of the observations made on this transit (3 June 1769) from the

having circumnavigated the globe, arriving at Deal, 12 June, 1771. Captain Cook sailed to explore the southern hemisphere, 13 July, 1772, and returned 30 July, 1775. In his third expedition (begun 12 July, 1776) he was killed by the savages of Owhyhee, 14 Feb. 1779. His ships, the *Resolution* and *Discovery*, arrived home at Sheerness, 4 Oct. 1780.

COOPERAGE, an ancient art, probably suggested for preserving wine. The coopers of London were incorporated in 1501.

CO-OPERATIVE SOCIETIES are composed of working-men, having for their object the sale of articles of daily consumption to the members at low prices. The Rochdale Equitable Pioneers Society began in 1844, with a capital of 28*l*. In 1860, the business done amounted to 152,063*l*., the profits being 15,906*l*.. These societies (332 in 1862) are registered pursuant to 13 and 14 Vict. c. 115 (1849). On 31 Dec. 1866, 749 industrial, provident, and co-operative societies were registered. By an act passed in 1867 they are bound to make a return.

COORG, a province (S. India). War broke out between the rajah and the East India Company 1832, which ended by col. Lindsay defeating and deposing the rajah, 10 April, 1834; his territories were soon after annexed to the British possessions. In 1853 the rajah brought his daughter to be educated in England, where she was baptized.

COPENHAGEN (Denmark), built by Waldemar I., 1157, and made the capital 1443; university founded 1479. In 1728, more than seventy of its streets and 3785 houses were burnt. Its palace, valued at four millions sterling, was wholly burnt, Feb. 1794, when 100 persons lost their lives. In a fire which lasted forty-eight hours, the arsenal, admiralty, and fifty streets were destroyed, 1795. Copenhagen was bombarded by the English under lord Nelson and admiral Parker; and in their engagement with the Danish fleet of twenty-three ships of the line, eighteen were taken or destroyed by the British, 2 April 1801. Again, after a bombardment of three days, the city and Danish fleet surrendered to admiral Gambier and lord Cathcart, 7 Sept. 1807. The capture consisted of eighteen sail of the line, fifteen frigates, six brigs, and twenty-five gun-boats, and immense naval stores; see *Denmark*.

COPENHAGEN FIELDS (N. London). Here the Corresponding Society met on 26 Oct. 1796; and the Trades' Union, 21 April, 1834. The fields are now chiefly occupied by the Metropolitan Cattle-market, opened 13 June, 1855.

COPERNICAN SYSTEM, so called from its author Nicolas Copernicus, born at Thorn, 19 Feb. 1473, died 24 May, 1543. A few days before his death, the printing of his book on the "Revolution of the Celestial Bodies" was completed. The system, which resembles that attributed to Pythagoras, was condemned by a decree of pope Paul V. in 1616; not revoked till 1818 by Pius VII.

COPPER. One of the six primitive metals, said to have been first discovered in Cyprus. *Pliny*. We read in the Scriptures of two vessels of fine copper (or brass), "precious as gold," 457 B.C. (*Exra* viii. 27). The mines of Fahlun, in Sweden, are the most surprising artificial excavations in the world. In England, copper-mines were discovered in 1561, and copper now forms an immense branch of trade: there are upwards of fifty mines in Cornwall, where mining has been increasing since the reign of William III. In 1857, 75,832 tons of copper ore were imported, and 25,241 tons extracted. In 1865, 198,298 tons of copper ore were extracted from British mines, and 11,888 tons smelted: 82,562 tons were imported. The Burra-Burra copper-mines, in S. Australia, discovered 1842, brought great prosperity. The first ship to which a sheathing of copper was applied was his majesty's ship *Alarm*, at Woolwich, in 1761, "to preserve her from worms in southern climates:" it gave great satisfaction, and in 1780 all ships in the British navy were copper-bottomed.—About 1850 the electro-type process was first employed to face with copper printing-types and casts from woodcuts.

COPPER MONEY. The Romans, prior to the reign of Servius Tullius, used rude pieces of copper for money; see *Coin*. In England copper money was made at the instance of sir Robert Cotton, in 1609; but was first really coined (when Miss Stewart sat for the figure of Britannia) 1665
Its regular coinage began in 1672, and it was largely issued in 1689
In Ireland, copper was coined as early as 1339; in Scotland in 1406; in France in 1580

Wood's coinage (*which see*) in Ireland commenced in 1723
The copper coinage was largely manufactured at Birmingham, by Boulton and Watt, in 1792
Penny and two-penny pieces were extensively issued 1797. The half-farthing was coined in, but disused (*see farthing*) 1843
10,000*l*. voted towards replacing the copper coinage July, 1855

various parts of the globe on which it was viewed by men of science, the system of the universe has, in some particulars, been better understood; the distance of the sun from the earth, as calculated by this and the transit in 1761, was settled at 108,000,000 miles, instead of the commonly received computation of 95,000,000. *Buller*. It is now computed to be 95,298,260 miles (1865).

COPPER, *continued.*

COPPER-PLATE PRINTING was first invented in Germany, about 1450; and rolling-presses for working the plates about 1545
Messrs. Perkins, of Philadelphia, invented a

mode of engraving on soft steel, which, when hardened, will multiply copper-plates and fine impressions indefinitely (see *Engraving*) 1819

COPPERAS, a mineral composed of copper or iron combined with sulphuric acid (vitriol), found in copper-mines, commonly of a green or blue colour; first produced in England by Cornelius de Vos, a merchant, in 1587.

COPPERHEADS, a name given about 1863 to such members of the Democrat party in the United States as were in favour of peace with the South on any terms.—Copperhead is a poisonous serpent, also named dumb-rattle snake, red viper, &c.

COPTS, in Egypt, the supposed descendants of the ancient Egyptians, mingled with Greeks and Persians. Their religion is a form of Christianity derived from the Eutychians.

COPYHOLDERS, who hold an estate by a copy of the rolls of a manor made by a steward of the lord's court. They were enfranchised by 5 Vict. c. 35, 1841. By the Reform act in 1832, copyholders to the amount of 10*l.* became entitled to a vote for the county. The copyhold acts were amended by 21 & 22 Vict. c. 94 (1858).

COPYING-MACHINES (for letters, &c.) were invented by James Watt in 1778; patented in May 1780; and 150 machines were sold before the end of the year. Wedgwood's "manifold writer" was patented in 1806; and in 1855 Terry patented a copying machine to be combined with the cover of a book.

* This act was confirmed by a decision of the house of lords, and the claim of perpetual copyright was overruled, 22 Feb. 1774. The statute declared the author to have an exclusive right for 14 years, and if at the end of that term he were living, the right to return to him again for the same term of years. Later acts extended the author's right to 28 years, and if living at the end of that time, then to the remainder of his life.

† By this act, the right is to endure for the life of the author, and for seven years after his death; but if that time expire earlier than 42 years, the right is still to endure for 42 years, for which term also any work published after the author's death is to continue the property of the owners of the manuscript.

‡ The important question of a foreigner possessing a copyright in this country was finally decided in the negative by the house of lords, in August 1854, which reversed the decision of the court of exchequer, on an appeal by the defendant in the case of *Boosey v. Jeffrey*. (In 1831, Mr. Boosey purchased the copyright of Bellini's opera, *La Sonnambula*, from which Mr. Jeffrey published a cavatina. Six of the judges were for protecting foreign copyrights, and seven of a contrary opinion.)

Epidamnus (431 B.C.) led to the Peloponnesian war. It was subdued by the Spartans in 373, and by the Romans, 230. At the decline of the eastern empire it fell into the hands of the Venetians about A.D. 1149. The Turks attacked Corfu in 1716, but were gallantly repulsed. It was subdued by the Russian and Turkish fleets in 1799, and formed (with the other isles) into the Ionian republic; see *Ionian Isles*.

CORDELIERS, friars of the order of St. Francis d'Assisi (the Minorites) instituted about 1223. They are clothed in coarse grey cloth, with a small cowl and cloak of the same material, having a girdle of cord or rope, tied with three knots, and hence the name, which was first given to them by St. Louis of France, about 1227. Several members of the French revolutionary party, termed "Cordeliers," established at Paris in 1790, Hebert Cloots, &c., were executed 24 March, 1794.

CORDOVA, the Roman Corduba (S. Spain), founded about 152 B.C., taken by the Goths in 572, and made the capital of an Arab kingdom by Abderahman in 756, who founded the great mosque (now the cathedral) 786. It became eminent for its learned men, and was the birthplace of Seneca and Lucan under the Romans, and of the great Arabian physician Averrhoës. It was rescued from the Arabs by Ferdinand III. of Castile, in 1236, was taken by the French under Dupont and disgracefully ravaged 8 June, 1808; surrendered to Joseph Bonaparte Jan. 1810, and abandoned by the French in 1813.

CORINTH (Greece), a city, said to have been built 1520 B.C., on the ruins of Ephyra. It was defended by an elevated fortress called Acrocorinth, surrounded with strong walls. Its situation was so advantageous, that Cicero named it the *Eye of Greece*, and declared, that of all the cities known to the Romans, Corinth alone was worthy of being the seat of a great empire.—For *Corinth*, in North America, see *United States*, 1862, 1863.

CORINTHIAN ORDER, the richest of the orders of ancient architecture, called by Scamozzi, the virginal order, is attributed to Callimachus, 540 B.C.; see *Abacus*.

CORINTHIAN WAR, began 395 B.C.; received this name, because mostly in the neighbourhood of Corinth; waged by a confederacy of the Athenians, Thebans, Corinthians, and Argives, against the Lacedæmonians. It was closed by the peace of Antalcidas, 387 B.C. The most famous battles were at Coronea and Leuctra (*which see*).

CORIOLI, a Latin city, capital of the Volscians, taken by the Romans, 493 B.C. From his exploits against it, Caius Marcius was named Coriolanus. His story is now deemed mythical.

CORK, (S. Ireland,) built in the 6th century. The principality of the M'Cartys was converted into a shire by king John, as lord of Ireland. The foundation of the see is ascribed to St. Barr, or Finbarr, early in the 7th century. About 1431, this see and that of Cloyne were canonically united; but on the death of bishop Syngé, in 1678, they were separated, the see of Ross having been added to Cork about a century before, 1582. The sees of Cork and Cloyne were reunited (by the act of 1833) 1835.

CORK-TREE, *Quercus suber*, a species of the oak; part of its bark used for stopping bottles. The Egyptians made coffins of cork. The tree grows in great abundance on the Pyrenean mountains, and in other parts of Spain, in France, and in the north of New England. It was brought to England about 1690. A cork carpet company was formed in 1862.

CORN. The origin of its cultivation is attributed to Ceres, who, having taught the art to the Egyptians, was deified by them, 2409 B.C. *Arundelian Marbles*. The art of husbandry, and the method of making bread from wheat, and wine from rice, is attributed by the Chinese to Ching Noungh, the successor of Fohi, and second monarch of China, 1998 B.C. *Univ. Hist.* Corn provided a common article of food from the earliest ages of the world, and baking bread was known in the patriarchal ages; see *Exodus* xii. 15. The first importation of corn, of which we have a note, was in 1347. A law restricting it was made in 1361. Bounties were granted on its importation into England in 1686.—The new LONDON CORN EXCHANGE, Mark-lane, London, erected at an expense of 90,000*l.*, (replacing one established in 1747), was opened 24 June, 1828.

CORNWALL, S.W. extremity of England, originally called *Kernou*, a term connected with the Latin *cornu*, a horn, in allusion to its numerous promontories or projecting points. On the retreat of the ancient Britons, Cornwall is said to have been formed into a kingdom, and to have existed many years under different princes, among whom were Ambrosius Aurelius, and the celebrated Arthur. Cornwall is said to have been made an earldom by Alfred. The eldest son of the British sovereign is born duke of Cornwall; see *Stannary Courts*.

CORONATION CHAIR. In the cathedral of Cashel,

formerly the metropolis of the kings of Munster, was deposited the *Lia Fail*, or Fatal Stone, on which they were crowned. Tradition says, that in 513 Fergus, a prince of the royal line, having obtained the Scottish throne, procured the use of this stone for his coronation at Dunstaffnage, where it continued until the time of Kenneth II., who removed it to Scone; and in 1266 it was removed by Edward I. from Scone to Westminster. A CORONATION OATH was administered by Dunstan, archbishop of Canterbury, to Ethelred II., in 978. An oath, nearly corresponding with that now in use, was administered in 1377, and was altered in 1689.

CORONEA, BATTLES OF. I. (or Chæronea). The Athenians were defeated and their general Tolmides slain in a battle with the Bœotians at Coronea near Chæronea, 447 B.C. II. The Athenians, Thebans, Argives, and Corinthians having entered into a league, offensive and defensive, against Sparta, Agesilaus, after diffusing the terror of his arms, from his many victories, even into Upper Asia, engaged the allies at Coronea, a town of Bœotia, and achieved a great victory over them, 394 B.C.

CORONERS, officers of the realm mentioned in a charter, 925. Coroners for every county in England were first appointed by statute of Westminster, 3 Edw. I. 1275. *Stow*. They are chosen for life by the freeholders, and their duty is to inquire into the cause of unnatural death, upon view of the body. Coroners were instituted in Scotland in the reign of Malcolm II., about 1004. By an act passed in 1843, coroners are enabled to appoint deputies to act for them in case of illness.—20,531 coroners' inquests were held in England and Wales in 1859; 21,178 in 1860; 21,038 in 1861; 20,591 in 1862; 22,757 in 1863; 24,787 in 1864; 25,011 in 1865; 24,926 in 1866 (17,496 males, 7430 females).

CORONETS, caps or inferior crowns of the nobility. The coronets for earls were first allowed by Henry III.; for viscounts by Henry VIII.; and for barons by Charles II. *Baker*. But authorities conflict. Sir Robert Cecil, earl of Salisbury, was the first of the degree of earl who wore a coronet, 1604. It is uncertain when the coronets of dukes and marquesses were settled. *Beatson*.

CORPORATIONS are stated by Livy to have been of very high antiquity among the Romans, by whom they were introduced into other countries. They were planned by Numa, in order to break the force of the two rival factions of Sabines and Romans, by instituting separate societies of every manual trade and profession. *Plutarch*.—MUNICIPAL CORPORATIONS IN ENGLAND. Bodies politic, authorised by the king's charter to have a common seal, one head officer, or more, and members, who are able, by their common consent, to grant or receive in law any matter within the compass of their charter. *Cowell*. Corporations were formed by charters of rights granted by the kings of England to various towns, first by Edward the Confessor. Henry I. granted charters, 1100: and succeeding monarchs gave corporate powers, and extended them to numerous large communities throughout the realm, subject to tests, oaths, and conditions. *Blackstone*. The Corporation and Test act, passed in 1661, was repealed in May, 1828. The Corporation Reform act, for the regulation of municipal corporations in England and Wales, 5 & 6 Will. IV. c. 76 (1835). The Irish Municipal Corporation act, 4 Vict. c. 108, passed in 1840, was amended in 1861.

CORPULENCE. In Germany some fat monks have weighed eighteen stone. *Rendel*.

Mr. Bright, a tallow-chandler and grocer, of Maldon, in Essex, who died in his 20th year. Seven persons of the common size were with ease enclosed in his waistcoat; buried at All Saints, Maldon 12 Nov. 1750

 James Mansfield, died at Dabden, aged 82, weighing 34 stone 9 Nov. 1856
 Mr. Wm. Banting published a letter on corpulence, recommending, from his own experience, as a remedy, great moderation in the use of sugar and starch in diet. 50,000 copies of this letter were speedily sold or given away 1863

CORPUS CHRISTI, a festival in the Roman church, in honour of transubstantiation, kept on the Thursday after Trinity Sunday (*which see*). It was instituted by pope Urban IV. between 1262 and 1264, and confirmed by the council of Vienne in 1311.

“CORRELATION OF THE PHYSICAL FORCES” is the title of a book by Mr. W. R. Grove, F.R.S., who in 1842 enunciated the theory of the correlation or mutual dependence and convertibility into each other of all the forces of nature (*viz.* heat, light, electricity, magnetism, chemical affinity, and motion).

CORRESPONDING SOCIETY OF LONDON, was formed about 1791 to spread liberal opinions and check the severity of the British government, then much alarmed by the

French revolution. Horne Tooke and other members were tried and acquitted, Oct. 1794; see *Trials*, 1794. The meetings of the society at Copenhagen-fields and elsewhere, in Oct. and Nov. 1796, were termed treasonable.—On 21 April, 1798, Messrs. O'Connor, O'Coigley, and others, were tried for corresponding with the French directory; and James O'Coigley was executed as a traitor (protesting his innocence) on 7 June.

CORROSIVE SUBLIMATE, see *Mercury*.

CORRUPT PRACTICES ACT, respecting elections for members of parliament, was passed in 1854, and continued in following years.

CORSICA, an island in the Mediterranean Sea (called by the Greeks *Cyrrnos*), held by the French. The ancient inhabitants were savage, with the character of robbers, liars, and atheists, according to Seneca. Corsica was colonised by Phœceans 564 B.C., and afterwards held by the Carthaginians, from whom it was taken by the Romans, 231 B.C. In modern times it was nominally dependent upon Genoa, until 1768, when it was ceded to France.

During a revolt erected into a kingdom under Theodore, its first and only king . . . 1736
He came to England, was imprisoned in the King's Bench prison for debt, and long subsisted on private friends, but released; he gave in his schedule the kingdom of Corsica to his creditors, and died in Soho . . . 1756
The earl of Oxford wrote the following epitaph, for a tablet near his grave in St. Anne's church, Dean-street:—

“The grave, great teacher! to a level brings
Heroes and beggars, galley-slaves and kings.
But Theodore this moral learn'd ere dead;
Fate pour'd its lesson on his living head,
Bestow'd a kingdom and denied him bread.”

CORTES, the Spanish parliament, originating in the old Gothic councils. The cortes were assembled after a long interval of years, 24 Sept. 1810; and settled the new constitution, 16 March, 1812. This constitution was set aside by Ferdinand VII., who banished many members of the assembly in May, 1814. The cortes were re-opened by him in 1820, and dissolved in 1823; again assembled in 1834, and have since been regularly convened. The cortes of Portugal assembled by virtue of don Pedro's charter, 30 Oct. 1826; they were suppressed by don Miguel in 1828, and restored in 1833.

CORUNNA (N.W. Spain). The British army, about 15,000 men, under the command of sir John Moore, had just accomplished a safe retreat when they were attacked by the French, whose force exceeded 20,000: the enemy were completely repulsed, but the loss of the British in the battle was immense, 16 Jan. 1809. Sir John was struck by a cannon-ball, which carried away his left shoulder and part of the collar-bone, leaving the arm hanging by the flesh; he died universally lamented. The remains of the army hastily embarked at Corunna, Jan. 17, under sir David Baird.

CORUS (Corupedion, or Cyropedium), a plain in Phrygia, Asia Minor, where the aged Lysimachus was defeated by Seleucus, and slain, 281 B.C. These two were the only survivors of Alexander the Great's generals.

CORVÉE, forced labour and service under the feudal system in France, was partially reduced by Louis XVI., at the instigation of Turgot, 27 June, 1787; by the constituent assembly, 18 March, 1790; and totally abolished by the convention, 17 July, 1792. *Bouillet*.

CORYPHÆUS, the principal person of the chorus in the ancient tragedy. The name was given to Tysias, afterwards named Stesichorus, who first instructed the chorus to dance to the lyre, 556 B.C.

COSMOGRAPHY, see *Astronomy* and *Geography*.

COSSACKS, the warlike people inhabiting the confines of Poland, Russia, Tartary, and Turkey. They at first lived by plundering the Turkish galleys and the people of Natolia; but were formed into a regular army by Stephen Bathori, about 1576, to defend the frontiers of Russia from the incursions of the Tartars. They joined the Russians in 1654, and in the great war of Europe against France (1813-15), formed a valuable portion of the Russian army.

COSSOVA, a plain in Servia. Here Amurath I. totally defeated the Christian army (Servians, Hungarians, &c.), Sept. 1389; but was himself killed by an expiring soldier. Here, in 1448, John Huniades was defeated by a Turkish army four times larger than his own.

COSTA RICA, a republic in Central America, established in 1848. It has been much

disturbed by the American filibusters, see *Nicaragua and America, Central*. On 14 Aug. 1859, the president Juan Mora was suddenly deposed, and Dr. José Montealegre made president; Dr. J. Ximenes elected president 3 April, 1863, was succeeded by Dr. Joseph Castro, 8 May, 1866. Population in 1864, 120,471.

COSTERMONGERS, itinerant dealers in fruit, vegetables, fish, &c., deriving their name, it is said, from *costard*, a favourite apple. The London costermongers are useful in relieving the markets when glutted; and it was said, in 1860, that 3,000,000. passed through their hands annually. Previous to fasting and thanksgiving days, they sell the appointed forms of prayers in great numbers. On 22 Nov. 1860, they held a meeting in order to represent to the city authorities the hardships they felt by the police restricting their means of livelihood; and the Metropolitan Streets act was modified on their account, 7 Dec. 1867.

COSTUME, see *Dress*.

COTTAGE. The term was originally applied to a small house without land, 4 Edw. I. 1275. "No man may build a cottage, except in towns, unless he lay four acres of land thereto," &c., 31 Eliz. 1589. This statute was repealed, 15 Geo. III. 1775. By returns to the tax office, in 1786, the number of cottages was 284,459. The number in 1800 was 428,214; the number in 1840 was about 770,000. In 1860 the public attention was much drawn to the deplorable state of cottages in many parts of the country, and the law of settlement was altered in 1865.

The *Cottage's Stove* was designed by captain John Grant, registered Dec. 1849, and presented by him to the metropolitan association for improving the dwellings of the industrious classes. It requires no fixing, is extremely simple in its con-

struction, and all the operations of cooking may be carried on with any description of fuel. 100 lb. of meat and 115 lb. of vegetables have been cooked in one of these stoves with less than 20 lb. of coal; see *Cookery*.

COTTON, a vegetable wool, the produce of the *Gossypium*, a shrub indigenous to the tropical regions of India and America. Indian cotton cloth is mentioned by Herodotus, was known in Arabia in the time of Mahomet, 627, and was brought into Europe by his followers. It does not appear to have been in use among the Chinese till the 13th century; to them we are indebted for the cotton fabric termed nankeen. Cotton was the material of the principal articles of clothing among the Americans when visited by Columbus. It was grown and manufactured in Spain in the 10th century; and in the 14th century was introduced into Italy. Indian muslins, chintzes, and cottons were so largely imported into England in the 17th century, that in 1700 an act of parliament was passed, prohibiting their introduction. Cotton became the staple commodity of England in the present century. About 1841 the "cotton" or "Manchester" interest began to obtain political influence, which led to the repeal of the corn laws in 1846; see *Calico, Muslin, &c.*

Fustian and Velveteen made of cotton, about 1641. *Calico, sheeting, &c.* The fly-shuttle was invented by John Kay, of Bury, 1738; the drop-box by Robert Kay, 1760; spinning by rollers (also attributed to John Wyatt) patented by Louis Paul, 1738; the mule spinning-jenny, by Hargreaves, 1767; the water-frame, by Arkwright, 1769; the power-loom, by Rev. Dr. Edmund Cartwright, 1785; the dressing machine, by Johnson and Radcliffe, 1802-4; another power-loom, by Horrocks, 1803-13. A combing machine was patented by Joshua Heilmann, in 1845.

British muslin (totally superseding that of India) is due mainly to the invention of the MULE (which see) by Samuel Crompton, 1774-9; and to the self-acting mule of Mr. Roberts, 1825.

Calico Printing commenced 1764. *The Steam-Engine* first applied to the cotton manufacture (by Boulton and Watt) 1785. *Bleaching* by means of chloride of lime introduced by Mr. Tennant, of Glasgow, 1798. *Stockings*. The stocking-frame was invented by William Lee, in 1589. *Cotton stockings* were first made by hand about 1730; Jedidiah Strutt obtained a patent for Derby ribbed stockings in 1759; and Horton patented his knoter frame in 1776; Crompton's mule was employed in making thread for the stocking manufacture about 1770. *Cotton Lace—Bobbin-net*. The stocking-frame of Lee was applied to lace-making by Hammond, about 1768; the process perfected by John Heathcoat, 1809.

American Cotton. Previous to 1795, our cotton fibre came from the East and West Indies, the Levant, and a little from the United States. About 1786, the growth of cotton began in Georgia. In 1793, Eli Whitney, an American, invented the saw-gin, a machine by which cotton wool is separated from the pod and cleaned with great ease and expedition. This led to such increased cultivation that the United States soon exported 1,500,000lb. of cot-

ton; in 1795, 5,250,000 lb.; in 1820, 89,999,174 lb.; in 1830, 210,885,358 lb.; in 1840, 487,856,504 lb.; in 1847, 364,599,201 lb.; in 1859, 961,707,264 lb.; in 1866, 1,115, 890,608 lb.; in 1861, 819,500,528 lb.; in 1866, 520,957,440 lb. *Cotton imported from other countries*: In 1847, 110,208,324 lb.; in 1859, 264,281,808 lb.; in 1860, 215,048,144 lb.; in 1861, 437,481,208 lb. *Cotton imported from India*: 1856, 463,000 bales;

Australian Cotton is said by Manchester manufacturers to be superior to the best American cotton, Jan., 1861. A company was formed at Manchester in Sept., 1860, to endeavour to obtain cotton from India, Africa, and other places. It arose out of the *Cotton Supply Association*, formed in 1857. Since

1861, the cultivation of cotton in India, Egypt, Italy, &c., has greatly increased.

Cotton Factories were regulated by acts of parliament passed in 1825, 1831, 1832, and 1844. The hours of labour were limited, and the employment of children under nine years of age prohibited. In 1846, 1724 cotton mills employed 107,500 persons. In 1862, the persons employed were stated to be 451,000: 315,000 in Lancashire.

In 1860, 12,419,096 cwt. of raw cotton was imported, of which 9,963,309 cwt. came from the United States, and 1,822,689 cwt. from India.

The supply of cotton from North America nearly ceased, in consequence of the secession of the southern states from the union in 1860-61. In 1852, Mr. T. Bazley warned the country on the danger of trusting to this source. In May, 1862, he stated that through its failure the loss of the labouring classes was 12,000,000*l.* sterling a year, and that the loss, including the employing classes, might be estimated at nearly 40,000,000*l.* a year.

At a meeting of the noblemen and gentlemen connected with the cotton manufacturing districts at Bridgewater-house, St. James's, on 19 July, 1862, the earl of Derby in the chair, 10,000*l.* were subscribed to the Cotton District Relief fund. The viceroy of Egypt, in London at the time, gave 1000*l.* and the queen gave 2000*l.* on 24 July. Liberal subscriptions flowed in from all parts. On 28 Aug., the lord mayor had received 41,902*l.*

In the Lancashire district (population about 4,000,000) there were receiving parish relief, Sept. 1861,

43,500 persons; in Sept. 1862, 163,498. *Earl of Derby*, 2 Dec. 1862.

In July, 1863, about the value of 700,000*l.* remained of the donations which had been received in money and goods, amounting to about 1,900,000*l.*

On 9 Feb., 1863, the "George Griswold" arrived, containing contributions of provisions, &c., from North America, for the relief of the sufferers in Lancashire.

The Union Relief Act (passed in 1862, and continued in 1863) gave much relief by enabling overseers to borrow money to be expended in public works to be executed by the unemployed workmen.

In Oct. 1864, much distress still existed, and fears were entertained for the approaching winter—90,000 more paupers than ordinary in cotton districts. *Times*, 18 Jan., 1865.

In June, 1865, Mr. Farnall, the special commissioner (appointed in May, 1862), was recalled by the poor-law board, and the famine was declared to be ended. 1,000,000*l.* had been expended in two years. The executive of the Central Relief Fund held their last meeting, 4 Dec. 1865.

COTTONIAN LIBRARY, formed with great labour and judgment by sir Robert Cotton, 1600, *et seq.* He died 6 May, 1631. It was with difficulty rescued from the fury of the republicans during the protectorate, and was secured to the public by a statute in 1700. It was removed to Essex-house in 1712; and in 1730 to Dean's-yard, Westminster, where on 23 Oct. 1731, a part of the books sustained damage by fire. The library was removed to the British Museum in 1757.

COUNCILS. King Alfred, in about 886, is said to have so arranged the business of the nation, that all resolutions passed through three councils. The first was a select council, to which those only high in the king's confidence were admitted; here were debated all affairs that were to be laid before the second council,—bishops and nobles appointed by the king like the present privy council. The third was a general assembly of the nation, called, in Saxon, Wittenagemot, in which quality and offices gave a right to sit, independent of the king. In these three councils we behold the origin of the cabinet and privy councils and the antiquity of parliaments; see *Cabinet, Common and Privy Councils, &c.*

COUNCILS OF THE CHURCH. The following are among the most memorable. Those numbered are the *General Councils*. *Sir Harris Nicolas* in his "Chronology of History" enumerates 1604 councils, and gives an alphabetical list.

Of the church at Jerusalem (<i>Acts xv.</i>)	50	II. Constantinople: 350 bishops attended, and pope Damasus presided	381
Of the western bishops at Arles, in France, to suppress the Donatists; three fathers of the English church attended	314	III. Ephesus, when pope Celestine presided; Pelagius censured	431
I. First Œcumenical or General, at Nice (Constantine the Great presided), decreed the consubstantiality of the Son of God, condemned Arianism, and composed the Nicene creed	325	IV. Chalcedon: Marcian and his empire attended; Eutychianism censured	451
At Tyre, against Athanasius	335	V. Constantinople: pope Vigilius presided; against errors of Origen	553
The first at Constantinople, when the Arian heresy gained ground	337	VI. Constantinople, when pope Agatho presided; against Monothelites,	681
At Rome, in favour of Athanasius	342	Authority of the six general councils re-established by Theodosius	715
At Sardis: 370 bishops attended; Arians condemned	347	VII. Second Nicene council: 350 bishops attended; against Iconoclasts,	787
At Rimini: 400 bishops attended; Constantine obliged them to sign a new confession	359		

COUNCILS OF THE CHURCH, *continued.*

VIII. Constantinople: the emperor Basil attended; against Iconoclasts and various heresies	5 Oct. 869, to 28 Feb. 870	870	union of Greek and Latin churches, 7 May to 17 June, 1274
At Clermont, convened by Urban II. to authorise the crusades: 310 bishops attended		1095	XV. Vienne in Dauphiné: Clement V. presided, and the kings of France and Aragon attended; the order of the Knights Templars suppressed, 16 Oct. 1311; 3 April and 6 May, 1312
IX. First Lateran: right of investiture settled by treaty between pope Calixtus II. and the emperor Henry V.	18 March to 5 April,	1123	XVI. Pisa: Gregory XII. and Benedict XIII. deposed, and Alexander elected, 5 March to 7 Aug. 1409
X. Second Lateran: Innocent II. presided; preservation of temporalities of ecclesiastics, the principal subject; 1000 fathers of the church attended	20 April,	1139	XVII. Constance: Martin V. is elected pope; and John Huss and Jerome of Prague condemned to be burnt
XI. Third Lateran, against schismatics, 5 to 19 March,		1179	XVIII. Basil
XII. Fourth Lateran: 400 bishops and 1000 abbots attended; Innocent III. presided; against Albigenses, &c.	11 to 30 Nov.	1215	XIX. Fifth Lateran: begun by Julius II.
XIII. Lyons; under pope Innocent IV.: emperor Frederick II. deposed,	28 June to 17 July,	1245	Continued under Leo X. for the suppression of the pragmatic sanction of France, against the council of Pisa, &c., till
XIV. Lyons; under Gregory X.: temporary			XX. Trent: the last styled Œcumenical; was held to condemn the doctrines of the reformers, Luther, Zuinglius, and Calvin. (See <i>Trent.</i>)

COUNCILS, FRENCH REPUBLICAN. The council of ANCIENTS was an assembly of revolutionary France, consisting of 250 members, instituted at Paris, 1 Nov. 1795, together with the council of FIVE HUNDRED: the executive was a Directory of FIVE. Bonaparte dispersed the council of Five hundred at St. Cloud, 9 Nov. 1799, declaring himself, Roger Ducos, and Siéyès, consuls *provisoires*; see *France*.

COUNCILS OF CONCILIATION, to adjust differences between masters and workmen, may be established by licence of the secretary of state, by virtue of an act passed 15 Aug. 1867.

COUNSEL are supposed to be coëval with the *curia regis*. Advocates are referred to the time of Edward I., but earlier mention is made of them. Counsel who were guilty of deceit or collusion were punishable by the statute of Westminster, 13 Edw. I. 1285. Counsel were allowed to persons charged with treason by act 8 Will. III. 1696. The act to enable persons indicted for felony to make their defence by counsel, passed Aug. 1836; see *Barristers* and *King's council*.

COUNT, from the Latin *comes*, a companion, and French *comte*; equivalent to the English earl, (whose wife is still termed a countess,) and to the German *graf*; see *Champagne* and *Toulouse*.

COUNTERPOINT (in music), writing the chords to a melody. The earliest specimen of contrapuntal writing extant is by Adam de la Halle in the 12th century.

COUNTESS OF HUNTINGDON'S CONNEXION; see *Whitefieldries*.

COUNTIES or SHIRES. The division of this kingdom into counties began, it is said, with king Alfred; but some counties bore their present names above a century before. The division of Ireland into counties took place in 1562. Lord-lieutenants were appointed in 1549 in England and in 1831 in Ireland. Counties first sent members to parliament, before which period knights met in their own counties, 1285. CHANDOS CLAUSE, Sect. 20 of the Reform act, 2 Will. IV. c. 45 (1832), inserted by the motion of the marquis of Chandos. By it occupiers as tenants of land paying an annual rent of 50*l.* became entitled to a vote for the knight of the shire. It had the effect of increasing the number of tory voters, and in consequence several vain attempts have been made to repeal the clause. It was superseded by the Reform act of 15 Aug. 1867.

COUNTRY PARTY, see *Court Party*.

COUNTY-COURTS or schyremotes, in the time of the Saxons, were the most important tribunals in this country. Alfred is said to have divided England into counties, and counties into hundreds; but the county-courts, the creation of which is generally attributed to him, in 896, seem to have existed at a period long anterior to his reign.

County-Courts, for the recovery of debts under 20 <i>l.</i> , superseding courts of requests, instituted by 9 & 10 Vict. c. 95, in	1846	In 1850 the number of complaints entered at the courts of the sixty circuits was 306,793, for 1,265,115 <i>l.</i> ; in 1857, 744,652 complaints for 1,937,745 <i>l.</i> ; of the 217,173 causes tried, 4297 were for sums between 20 <i>l.</i> and 50 <i>l.</i>
The counties of England and Wales are divided into sixty districts, each district having a county-court, and a barrister as judge, and juries sworn when necessary. Their jurisdiction extended by 13 & 14 Vict. c. 61, to sums not exceeding 50 <i>l.</i>	1850	From 1847 to 1858 judgment was obtained in these courts for 8,309,236 <i>l.</i>
Their proceedings facilitated in	1852 and 1854	An act conferred on these courts equity powers, like those of the court of chancery, in cases relating to sums under 50 <i>l.</i> , to begin 1 Oct. 1865
There are now 60 county-courts in England and Wales.	1868	Their jurisdiction still further enlarged by an act passed

20 Aug. 1867

COURIERS. Xenophon attributes the first to Cyrus; and Herodotus says that they were common among the Persians; see *Esther* iii. 15, about 510 B.C. The Greeks or Romans had no regular couriers till the time of Augustus, when they travelled in cars, about 24 B.C. Couriers or posts are said to have been instituted in France by Charlemagne about A.D. 800. The couriers for letters were employed in the early part of the reign of Louis XI. of France, owing to this monarch's extraordinary eagerness for news. They were the first institution of the kind in Europe, 1463. *Hénault*; see *Post-office*.

COURLAND, a duchy of Livonia, subjected to Poland in 1582, conquered by Charles XII. of Sweden in 1701; Ernest Biren, duke, 1737; his son, Peter, 1769; annexed to Russia, March, 1795.

COURT BARON, an ancient court which every lord of a manor may hold by prescription in some part of the manor. It is supposed to have originated with the nobility. In it duties, heriots, and customs are received, and estates and surrenders are passed. Its jurisdiction was restricted in 1747 and 1833. By the Small Debts act, 1856, lords of the manor were permitted to give up holding these courts.

COURT LEET, an ancient court of record, belonging to a hundred, instituted for punishing encroachments, nuisances, and fraudulent weights and measures, and also offences against the crown. The steward is the judge, and all persons residing within the hundred (peers, clergymen, &c., excepted) are obliged to do suit within this court.

COURT PARTY—COUNTRY PARTY, politicians in the parliaments of England, beginning about 1620. At the end of the 17th century the latter embodied torism and high church principles with a strenuous maintenance of the assumed rights of "the land," as opposed to the innovations of whiggism and the corruptions of the trading interests. Its most distinguished statesman was sir Thomas Hannier (the *Montalto* of Pope's Satires), who died in 1746. *Ashe*.

COURT OF HONOUR. In England the court of chivalry, of which the lord high constable was a judge, was called *Curia Militaris*, in the time of Henry IV., and subsequently the Court of Honour. In Bavaria, to prevent duelling, a court of honour was instituted in April, 1819. Mr. Joseph Hamilton for many years ardently laboured to establish a similar institution in Britain.

COURT OF SESSION, the highest civil tribunal in Scotland, was instituted by James V. by statute, 17 May, 1532. It consisted of 14 judges and a president, and replaced a committee of parliament. In 1830 the number of judges was reduced; and the court now consists of the lord president, the lord justice clerk, and 11 ordinary judges. In 1867 the necessity of renovating this court was asserted by high legal authority.

COURT OF REQUESTS (also called a Court of Conscience) was first instituted in the reign of Henry VII. 1493, and was remodelled by Henry VIII. in 1517. *Stow*. Established for the summary recovery of small debts under forty shillings; but in the city of London the jurisdiction extends to debts of five pounds. *Ashe*. The courts of requests in the principal towns of the kingdom were superseded in 1847 (those of the city of London only excepted) by the County-Courts (*which see*).

COURTRAI (Belgium). Here Robert, count of Artois, who had defeated the Flemings in 1297, was defeated and slain by them, 11 July, 1302. The conflict was named the "Battle of Spurs," from the number of gilt spurs collected.

COURTS MARTIAL are regulated by the Mutiny act, first passed in 1690. The powers of these courts were much discussed in 1867, in consequence of the measures used to suppress the negro insurrection in Jamaica, Oct. 1866.

COURTS OF JUSTICE were instituted at Athens, 1507 B.C. (see *Arciopagus*); by Moses, 1491 B.C. (*Exod* xviii. 25). They existed under various denominations in Rome. For these realms, see *Chancery*, *Common Pleas*, *Exchequer*, *King's Bench*, &c. The citizens of London were privileged to plead their own cause in the courts of judicature, without employing lawyers, except in pleas of the crown, 41 Hen. III. 1257. *Stow*. The rights of the Irish courts were established by the British parliament in April, 1783.

COURTS OF LAW Fees Act, passed 20 Aug. 1867, directs the application of surplus fees towards the expenses of providing the intended new courts of justice. Acts for building the new courts of justice were passed in 1865 and 1866. No plan for their erection has been as yet approved of (April, 1868).

COUTRAS (S. W. France). Here Henry of Navarre totally defeated the duc de Joyeuse and the royalists, 20 Oct. 1587.

COVENANTERS, a name particularly applied to those persons who in the reign of Charles I. took the solemn league and covenant, thereby mutually engaging to stand by each

other in opposition to the projects of the king ; it was entered into in 1638. The COVENANT or league between England and Scotland (the preceding one modified) was solemnly adopted by the parliament, 25 Sept. 1643; and was accepted by Charles II. 16 Aug. 1650, but repudiated by him on his restoration in 1661, when it was declared to be illegal by parliament, and copies of it ordered to be burnt; see *Cameronians*.

It consisted of six articles :

- | | |
|--|---|
| <ol style="list-style-type: none"> 1. The preservation of the reformed church in Scotland, and the reformation of religion in England and Ireland. 2. The extirpation of popery, prelacy, schism, &c. 3. The preservation of the liberties of parliament and the king's person and authority. | <ol style="list-style-type: none"> 4. The discovery and punishment of all malignants, &c. 5. The preservation of "a blessed peace between these kingdoms ;" 6. The assisting all who enter into the covenant :
"This will we do as in the sight of God." |

COVENT GARDEN (London), corrupted from "Convent Garden," having been the garden of St. Peter's convent. The square was built about 1633, and the piazza on the north side and the church were designed by Inigo Jones. The fruit and vegetable markets were rebuilt in 1829-30, from designs by Mr. Fowler (on ground belonging to the duke of Bedford).

COVENT GARDEN THEATRE sprang out of one in Lincoln's-inn-fields, through a patent granted 14 Chas. II. 1662, to sir William Davenant, whose company was denominated the "duke's servants," as a compliment to the duke of York, afterwards James II; see under *Theatres*.—The present theatre by E. Barry was opened 15 May, 1858. The *Floral Hall* adjoining it was opened 7 March, 1860, with the volunteers' ball.

COVENTRY ACT passed, to prevent malicious maiming and wounding, 6 March, 1671, in consequence of sir John Coventry, K.B., M.P., being maimed in the streets of London, by sir Thomas Sandys and others, adherents of the duke of Monmouth, 21 Dec. 1670. Repealed 1828.

COVENTRY (Warwickshire). Leofric, earl of Mercia, lord of Coventry, is said to have relieved it from heavy taxes, at the intercession of his wife Godiva, on condition of her riding naked through the streets, about 1057. Processions in her memory took place in 1851; on 23 June, 1862; and on 4 June, 1866. A parliament was held here in the reign of Henry IV. called *parliamentum indoctum*, or the unlearned parliament, because lawyers were excluded, 1404; and in the reign of Henry VI. another met here afterwards called *parliamentum diabolicum*, from the acts of attainder passed against the duke of York and others, 20 Nov. 1459. The town was surrounded with strong walls, three miles in circumference, and twenty-six towers, which were demolished by order of Charles II. in 1662. The ribbon-makers here suffered much from want of work in the winter of 1860-1. An industrial exhibition here was opened by earl Granville, 19 June; closed by the earl of Clarendon, 21 Oct. 1867. The BISHOPRIC was founded by Oswy, king of Mercia, 656, and had the double name of Coventry and Lichfield, which was reversed by later bishops. It was so wealthy, that king Offa, by the favour of pope Adrian, made it archiepiscopal; but this title was laid aside on the death of that king. In 1075 the see was removed to Chester; in 1102 to Coventry; and afterwards to its original foundation, Lichfield, but with great opposition from the monks of Coventry. Coventry merged into the bishopric of Lichfield (*which see*). *Beatson*.

COW-POCK INOCULATION; see *Small Pox*, and *Vaccination*.

CRACOW, a city in Austrian Poland. The Poles elected Cracus for their duke, who built Cracow with the spoils taken from the Franks, 700 *et seq.* Cracow was taken by Charles XII. in 1702. Taken and retaken several times by the Russians and other confederates. The sovereign was crowned at Cracow until 1764. Kosciusko expelled the Russians from the city, 24 March, 1794; but it surrendered to the Prussians, 15 June, same year, and in 1795 was awarded to Austria. Cracow was formed into a republic in 1815. Occupied by 10,000 Russians, who followed here the defeated Poles, Sept. 1831. Its independence was extinguished; and it was seized by the emperor of Austria, and incorporated with his empire, 16 Nov. 1846, which was protested against by England, France, Sweden, and Turkey; see *Poland*. A dreadful fire laid the greater part of the city in ashes, 18 July, 1850.

CRANES are of very early date, for the engines of Archimedes may be so called. In 1857 a crane had been erected at Glasgow capable of lifting 50 tons.

CRANIOLOGY (OR PHRENOLOGY), the study of the external form of the human skull, as indicative of mental powers and moral qualities. Dr. Gall, the first propounder, was a German physician, born March, 1758, and his first observations were among his schoolfellows. Afterwards he studied the heads of criminals and others, and eventually reduced his ideas to a system, marking out the skull like a map. His first lecture was given at Vienna in 1796; but in 1802 the Austrian government prohibited his teaching. In 1800 he was joined by Dr. Spurzheim; and in 1810-12 they published at Paris their work on the "Anatomy and Physiology of the Nervous System, and of the Brain in particular." Gall died in 1828. The

researches of Gall and Spurzheim certainly led to increased study of physiology. Combe's "Phrenology," first published in 1819, is the popular English work on this subject. Phrenological societies were formed early in London and Edinburgh.

CARANMER, LATIMER, AND RIDLEY, Martyrdom of, see *Protestants*, note.

CRANON, Thessaly, N. Greece. The Macedonians under Antipater and Craterus defeated the confederated Greeks, twice by sea, and once by land, near Cranon. The Athenians demanded peace, and Antipater put their orators to death, among whom was Hyperides, who, that he might not betray the secrets of his country when under torture, cut out his tongue, 322 B.C. and Demosthenes is said to have taken poison shortly after.

CRAONNE (N. France). Here Victor and Ney defeated the Prussians under Blucher, after a severe contest, 7 March, 1814.

CRAPÉ. Its manufacture is of very early date, and it is said some crape was made by St. Badour, when queen of France, about 680. It was first made at Bologna.

CRAVANT, see *Creant*.

CRAYFORD (Kent). Hengist the Saxon is said to have defeated the Britons here, 457.

CRAYONS, coloured substances made into paste, and dried into pencils, were known in France about 1422; and were improved by L'Oriot, 1748.

CREASOTE, or KREASOTE (discovered by Reichenbach about 1833), a powerful anti-septic and coagulator of albuminous tissue, is obtained from the destructive distillation of wood and other organic matters. It is used for the preservation of meat, timber, &c.

CREATINE (from the Greek *kreas*, flesh), the chemical principle of flesh, was discovered in 1835 by E. Chevreul, and has been fully investigated by Liebig and Gregory.

CREATION OF THE WORLD. The date given by the English bible, and by Usher, Blair, and others, is 4004 B.C. There are about 140 different dates assigned to the Creation, varying from 3616 years to 6984. Dr. Hales fixes it at 5411.

CRECY, or CRESSY (N. France), where Edward III. and his son, Edward the Black Prince, and an army of about 36,800, obtained a great victory over Philip, king of France, with about 130,000, 26 Aug. 1346. John, king of Bohemia (nearly blind); James, king of Majorca; Ralph, duke of Lorraine (sovereign princes); and a number of French nobles, together with 30,000 private men, were slain, while the loss of the English was very small. The crest of the king of Bohemia (three ostrich feathers, with the motto *Ich dien*—in English, "I serve,") has since been adopted by princes of Wales.

CRÉDIT FONCIER. A plan of providing loans to landowners was introduced by Frederick the Great of Prussia, in 1763, in some of the Prussian provinces, as the best method of alleviating the distresses of the landed interest caused by his wars. The system consists of lending money to landowners on the security of their estates, and providing the loan capital by the issue of debentures charged upon the aggregate mortgaged estates. There are two modes of carrying out this scheme: (1) by means of an association of landowners; (2) by means of a proprietary public company. The former obtains in Eastern Prussia, but the latter is exclusively found in Western Europe. *Crédit Foncier* companies have been founded in Hamburg (1782), Western Prussia (1787), Belgium (1841), France (1852), England (1863). Similar companies are now formed, or in course of formation, in all the states of Europe, in India, and in our colonies and dependencies. *Henriques*.

CREDIT MOBILIER: a joint-stock company with this name was established at Paris, 18 Nov. 1852, by Isaac and Emile Péreire, and others. It took up or originated trading enterprises of all kinds, applying to them the principle of *commandité*, or limited liabilities; and was authorised to supersede or buy in any other companies (replacing their shares or bonds in its own scrip), and also to carry on the ordinary business of banking. The funds were to be obtained by a paid-up capital of 2½ millions sterling, the issue of obligations at not less than 45 days' date or sight, and the receipt of money on deposit or current account. The society apparently prospered; but was considered by experienced persons a near approach to Law's bank of 1716. In Sept. 1857, several of the directors failed; and in May, 1858, no dividend was paid. Many companies based on its principles were established in London in 1863. In Oct. 1867, E. & I. Péreire withdrew from the management; the company failed, and the capital was said to have disappeared.

CREEDS, see *Confessions of Faith*.

CREMERA, BATTLE OF, see *Fubii*.

CREMONA (N. Italy), a city founded by the Romans, 221 B.C. It became an independent republic in 1107, but was frequently subjugated by its neighbours, Milan and Venice, and partook of their fortunes. It 1859 it became part of the kingdom of Italy.

CRESCENT, a symbol of sovereignty among the Greeks and Romans, and the device of Byzantium, now Constantinople, whence the Turks adopted it. The Crescent has given

name to three orders of knighthood; founded by Charles I. of Naples, 1268; by René of Anjou, in 1448; by the sultan Selim, in 1801; the last is still in existence.

CRESPY (N. France). Here was signed a treaty of peace between Charles V. of Germany and Francis I. of France, 18 Sept. 1544, when the former renounced Burgundy, and the latter Italy.

CRESTS are ascribed to the Carians. There are several representations of Richard I. (1189), with a crest on the helmet resembling a plume of feathers. The English kings had generally crowns above their helmets; that of Richard II. 1377, was surmounted by a lion on a cap of dignity; see *Crecy*. Alexander III. of Scotland, 1249, had a plume of feathers; and the helmet of Robert I. was surmounted by a crown, 1306; and that of James I. by a lion, 1424. In the 15th and 16th centuries, the crest was described to be a figure placed upon a wreath, coronet, or cap of maintenance. *Gwillim*.

CRETE, now CANDIA (*which see*).

CREVANT-SUR-YONNE (N. France). It was besieged by John Stuart, earl of Buchan, with a French army, July, 1423, and relieved by the earl of Salisbury with an army of English and Burgundians; after a severe contest, the French were totally defeated.

CREVELDT, near Cleves (W. Prussia). Here, on 23 June, 1758, prince Ferdinand of Brunswick defeated the French under the count of Clermont.

CRICKET, an ancient English game, said to be identical with the "club ball" of the 14th century. The present rules were laid down in 1774 by a committee of noblemen and gentlemen, including the duke of Dorset and sir Horace Mann. In 1861 the All England Eleven gained and lost games in Australia.

CRIME. About 1856 it was computed that a fifteenth part of the population of the United Kingdom lived by crime. The increase in education and manufactures is gradually reducing this proportion. From 1848 to 1865 there had been no commitment for political offences, such as treason or sedition. The returns of the last thirty-two years show that crime has absolutely and relatively diminished (Sept. 1866); see *Executions* and *Trials*.

The Criminal Justice act authorises justices, with the consent of the prisoners, to pass sentence for short periods, instead of committing them to trial, 1855.

In 1856, the expenses for criminal prosecutions were 194,912*l.* 4*s.* 8*d.* 16 persons were executed for murder in 1856 (four foreigners), 14 in 1857, 11 in 1858 (four foreigners), and 9 (four for wife-murder) in 1859. 2,666 persons were liberated on *tickets-of-leave* in 1856.

On 17 Feb. 1857, of 126 persons thus liberated, 58 were believed to be living honestly.

In 1861, 1862, and 1863, the system was considered to have failed through the numerous crimes committed by *ticket-of-leave*s: it was modified by the Penal Servitude act, in 1864.

Statistics of crime, police, and law, with a report, were first published by government, in 1857.

CRIMEA, or CRIM TARTARY, a peninsula in the Euxine or Black Sea, the ancient *Taurica Chersonesus*, colonised by the Greeks about 550 B.C. The Milesians founded the kingdom of Bosphorus, now Kertch, which about 108 B.C. formed part of the dominions of Mithridates, king of Pontus, whose descendants continued to rule the country under Roman protection till the irruption of the Goths, Huns, &c., about A.D. 258. About 1237, it fell into the hands of the Mongols under Genghis Khan; soon after the Venetians established commercial stations, with a lucrative trade, but were supplanted by the Genoese, who were permitted to rebuild and fortify Kaffa, about 1261. In 1475 Mahomet II. expelled the Genoese, and subjected the peninsula to the Ottoman yoke; permitting the government to remain in the hands of the native khans, but closing the Black sea to Western Europe. In 1774, by the intervention of the empress Catherine II., the Crimea recovered its independence: but on the abdication of the khan in 1783, the Russians took possession of the country, after a war with Turkey, and retained it by a treaty of peace in 1792. The Crimea (now Taurida), was divided into eight governments in 1802. War having been declared against Russia by England and France, 28 March, 1854, large masses of troops were sent to the East, which, after remaining some time at Gallipoli, and other places, sailed for Varna, where they disembarked 29 May. An expedition against the Crimea having been determined on, the allied British, French, and Turkish forces, amounting to 58,000 men (25,000

British), commanded by lord Raglan and marshal St. Arnaud, sailed from Varna, 3 Sept. and landed on the 14th, 15th, and 16th, without opposition, at Old Fort, near Enpatoria, about 30 miles from Sebastopol. On the 20th they attacked the Russians, between 40,000 and 50,000 strong (under prince Menschikoff), entrenched on the heights of Alma, supposed to be unassailable. After a sharp contest the Russians were totally routed. See *Alma* and *Russo-Turkish War*. Peace was proclaimed in April, 1856, and the allies quitted the Crimea 12 July following.

CRIMINAL LAWS OF ENGLAND. Their great severity, pointed out by sir Samuel Romilly, sir James Mackintosh, and others, about 1818, was considerably mitigated by sir R. Peel's acts, passed 1826-8. The criminal law was consolidated in six acts passed in 1861. Some defects were removed by an act passed in 1867.

CRIMISUS, a river in Sicily, near which Timoleon defeated the Carthaginians, 339 B.C.

CRIMPING-HOUSES were used to entrap persons into the army; hence the name of "crimp sergeant." In a riot in London, some of these receptacles were destroyed by the populace, in consequence of a young man who had been enticed into one being killed in endeavouring to escape, 16 Sept. 1794.

CRINOLINE (a French word, meaning stuff made of *crin*, hair) is the modern name of the "fardingale" of the time of queen Elizabeth, hoop-like petticoats made of whalebone, &c., revived in France and England since 1855. They have frequently occasioned loss of life, by coming in contact with fire and machinery. In No. 116 of the *Tatler*, published 5 Jan. 1710, is an amusing trial of the hoop-petticoat then in fashion.

CRIPPLEGATE (London), was so-called from the lame beggars who sat there, so early as the year 1010. The gate was new built by the brewers of London, in 1244; and was pulled down and sold for 91l. in July, 1760. The poet Milton was buried in the church near it, 12 Nov. 1674; see *London*.

CRISPIN AND CRISPIANUS are said to have been two saints, born at Rome, from whence they travelled to Soissons, in France, to propagate the Christian religion. They worked as shoemakers; but the governor of the town discovering them to be Christians, ordered them to be beheaded, about 288. Their day is 25 Oct.

CRITH, (from the Greek *krithē*, a barleycorn or small weight,) a term suggested by Dr. A. W. Hofmann to express the volume-weight of gases; a cube containing 1 litre of hydrogen (0.0896 gramme) to be the unit. Hydrogen being 1 crith, oxygen will be 16, nitrogen 14 criths.

CRITICS. The first society of them was formed 276 B.C. *Blair*. Varro, Cicero, Apollonius, and Aristarchus were ancient critics. In modern times the *Journal des Savans* was the earliest periodical critical work. It was originated by Denis de Sallo, ecclesiastical councillor in the parliament of France, and was first published at Paris, 30 May, 1655, and is still continued. The first work of this kind in England was the *Review* of Daniel Defoe (the term being invented by himself), published in Feb. 1703. The *Waives of Literature* was commenced in 1714, and discontinued in 1722; see *Reviews*.

The legality of fair criticism was established in the English courts, in Feb. 1794, when an action that excited great attention, brought by an author against a reviewer for a severe critique upon his

work, was determined in favour of the defendant on the principle that criticism is allowable, however sharp, if just, and not malicious.

CROATIA was conquered by Coloman, king of Hungary, in 1102, and was with that country united to Austria in 1526. The Croatian diet was abolished in Nov. 1861. The Croats protested against incorporation with Hungary, 25 May, 1867, and their diet (including Croatia and Slavonia) at Agram, was dissolved 27 May.

CROCKERY-WARE, see *Pottery*.

CROCODILES were well fed and revered as divinities by the Egyptians. The emperor Augustus is said to have collected twenty-five at one time in his amphitheatre, where they were killed by gladiators. A fossil crocodile was found at Doddridge, Gloucestershire, in 1806.

CROIX, ST., a W. India Island, purchased from the French by Christian VI., king of Denmark, in 1733; taken by sir Alexander Cochrane, 22 Dec. 1807; restored in 1814.

CRONSTADT, Russia, founded by Peter the Great, 1710, and received its name (Crown-town) in 1721. It was not attacked by the fleets in the war with Russia, 1854-5.

CROPREDY-BRIDGE, near Banbury, Oxfordshire. Here the royalists defeated sir William Waller and the army of the parliament, 29 June, 1644.

CROQUET. This game introduced into Britain about 1850, is said to be a revival of the old *Pall Mall* (*which see*).

CROSIER, a staff surmounted by a cross, borne before an archbishop, was in use in the 4th century. The bearing a crosier before ecclesiastics is mentioned in the life of St. Cæsarea of Arles about 500.

CROSS. That on which the Redeemer suffered on Mount Calvary, was said to have been found at Jerusalem, with two others, deep in the ground, by St. Helena, 3 May, 328 (termed the *Invention of the Cross*); Christ's was distinguished from those of the thieves by a sick woman being cured by touching it. It was carried away by Chosroes, king of Persia, on the plundering of Jerusalem; but was recovered by the emperor Heraclius (who defeated him in battle), 14 Sept. 615, and that day has since been commemorated as "the festival of the Exaltation of the Cross," established in 642.—It is asserted by church writers that a shining cross, two miles in length, was seen in the heavens by Constantine, and that it led him to adopt it on his standard, with the inscription "*In hoc signo vinces*;" "in this sign thou shalt conquer." With this (Labarum) he advanced to Rome, where he vanquished Maxentius, 27 Oct. 312. *Lenglet*.

Signing with the Cross was first practised by Christians to distinguish themselves from the Pagans, about 110; and in the time of Tertullian, 260, it was deemed efficacious against poison, witchcraft, &c.
Crosses in churches and chambers were introduced about 431; and set up on steeples about 568
Maid of the Cross were a community of young women who made vows of poverty, chastity, and obedience, instituted in . . . 1265

Crosses in honour of queen Eleanor were set up in the places where her hearse rested, between 1206 (when she died) and . . . 1307
 Crosses and idolatrous pictures were removed from churches, and crosses in the streets demolished by order of parliament . . . 1641
 The order of *Ladies of the Star of the Cross* was instituted by the empress Eleonora de Gonzaga, wife of Leopold I., in . . . 1668

CROSSED CHEQUES, see *Drafts*.

CROTONA (S. Italy), a city founded by the Achæan Greeks about 710 B.C. Here Pythagoras taught about 520. The Crotons destroyed Sybaris 510.

CROWS. An act passed for their destruction in England (which breeds more of them, it is said, than any other country in Europe), 24 Hen. VIII. 1532. Crows were anciently employed as letter-bearers, as carrier-pigeons are now.

CROWN. An Amalekite brought Saul's crown to David, 1056 B.C. (2 *Sam. i.*) The first Roman who wore a crown was Tarquin the Elder, 616 B.C. The crown was first a fillet tied round the head; afterwards it was formed of leaves and flowers, and also of stuffs adorned with jewels; see *Tiara*.

The crown of Alfred had two little bells attached (872); it is said to have been long preserved at Westminster, and may have been that described in the parliamentary inventory taken in 1649.
 Athelstan's crown resembled an earl's coronet, 929.
 William I. wore his crown on a cap, adorned with points, 1066.
 Richard III. introduced the crosses, 1483.
 Henry VII. introduced the arches, 1485.
 The crown of Charles II., made in 1660, is the oldest existing in England; see *Blood's Conspiracy*.

The crown and regalia of England were pledged to the city of London by Richard II. for 2000*l.* in 1386; see the king's receipt on redeeming them. *Rymer*.

The *Imperial State Crown of England* was made by Rundell and Bridges, in 1838, principally with jewels taken from old crowns. It contains 1 large ruby, 1 large sapphire, 16 sapphires, 11 emeralds, 4 rubies, 1363 brilliants, 1273 rose diamonds, 147 table diamonds, 4 drop-shaped pearls, and 273 pearls. *Professor Tennant*.

CROWN LANDS. The revenue arising from those in England is now nearly all subject to parliament, which annually provides for the support of the sovereign and government. The annual revenue now arising from crown lands is about 284,500*l.* The revenues of the duchies of Cornwall and Lancaster belong to the prince of Wales, and accumulate during his minority. Henry VII. (1485) resumed those which had been given to their followers by the sovereigns of the house of York. The hereditary estates of the crown were largely bestowed on their courtiers by the sovereigns—especially by the Stuarts.

CROWNS AND HALF-CROWNS were coined in England by Edward VI. in 1553. None were coined in 1861, and they will gradually be withdrawn from circulation.

CROYDON, Surrey, granted to Lanfranc, archbp. of Canterbury, about 1070. Archbp. Whitgift's hospital was founded in 1596. The fine old parish church was burnt, 5, 6 Jan. 1867.

CROZIER, see *Crosier*.

CRUCIFIXION. A mode of execution common among the Syrians, Egyptians, Persians, Carthaginians, Greeks, and Romans, usually accompanied by other tortures. Ariarathes of Cappadocia, aged 80, when vanquished by Perdiccas, was discovered among the prisoners, and by the conqueror's orders was flayed alive, and nailed to a cross, with his principal officers, 322 B.C. Jesus Christ was crucified 3 April, A.D. 33. *Bible*. (15 April, A.D. 29, *Clinton*; 28 March, A.D. 31, *Hales*). Crucifixion was ordered to be discontinued by Constantine, 330. *Lenglet*; see *Death*.

CRUELTY TO ANIMALS, ROYAL SOCIETY FOR THE PREVENTION OF, was instituted in

1824. Through its exertions hundreds of cases of cruelty are annually prosecuted. Acts for the protection of animals were passed in 1835 and 1839. A similar society exists in Paris. In 1860 both societies endeavoured to repress vivisection (physiological experiments on living animals).

CRUSADES (French *Croisades*), wars undertaken by the Christian powers to drive the infidels from Jerusalem and the adjacent country, the "Holy Land." They were projected by Peter Gautier, or Peter the Hermit, an enthusiastic French officer of Amiens, who turned pilgrim. On his return from the Holy Land, he deplored to pope Urban II. that infidels should be in possession of the city where Christ had taught. Urban convened a council of 310 bishops at Clermont in France, at which the ambassadors of the chief Christian potentates assisted, and gave Peter the commission to excite all Europe to a general war, 1094. The first crusade was published; an army of 300,000 men was raised, Peter had the direction of it, and Godfrey de Bouillon the command, 1095. *Voltaire*. The warriors wore a red cross upon the right shoulder, with the name of Croisés, Crossed, or Crusaders; their motto was *Volonté de Dieu*, "God's will."—The French government published the Western Historians of the Crusades in a magnificent form (1844-60).

- I. Crusade (1096) ended by Jerusalem being taken by assault, 15 July, 1099, and in establishing Godfrey de Bouillon as king.
- II. Preached by St. Bernard in 1146, headed by emperor Conrad II., and Louis VII. of France. Crusaders defeated; Jerusalem lost in 1187.

CRYOLITE, a Greenland mineral, a fluoride of aluminium and sodium, employed in procuring metallic aluminium in 1855.

CRYOPHORUS, an instrument (invented by Dr. Wollaston about 1812) to demonstrate the relation between evaporation at low temperatures and the production of cold.

CRYPTOGRAPHIC MACHINE, for carrying on secret correspondence, patented 1860.

CRYSTALLOGRAPHY is the science relating to the symmetrical forms assumed by substances passing from the liquid to the solid state. Romé de Lisle published his "Essai de Cristallographie," in 1772; but René-Just Haüy is regarded as the founder of the modern school of crystallography (1801). *Whewell*. Dana, Dufresnoy, and Miller, are eminent modern writers on this subject.

CRYSTAL PALACE, Hyde Park, London; see *Exhibition of 1851*.

CRYSTAL PALACE, Sydenham. The Exhibition building of 1851 having been surrendered to Messrs. Fox & Henderson on 1 Dec. 1851, the materials were sold for 70,000*l.* to a company (formed by Mr. Leach), who soon after commenced erecting the present Crystal Palace on its present site (300 acres having been purchased for the purpose), near Sydenham in Kent, under the direction of sir Joseph Paxton, Messrs. Owen Jones, Digby Wyatt, and other gentlemen. The proposed capital of 500,000*l.* (in 100,000 shares of 5*l.* each) was increased in Jan. 1853 to a million pounds. In addition to the permanent exhibition, there are extensive gardens, with magnificent fountains, &c., illustrations of zoology, geology, botany, ethnology, &c.

CUBIT, a measure of the ancients, by which the ark of Noah was measured (2448 B. C.). *Holden.* The Hebrew sacred cubit was two English feet, and the great cubit eleven English feet. Originally, it was the distance from the elbow, bending inwards, to the extremity of the middle finger. *Calmet.*

CUCKING-STOOL (or DUCKING-STOOL), for shrews: one at Kingston-on-Thames was used in April, 1745; and another at Cambridge in 1780. *Chambers.*

CUCUMBERS, noticed by Virgil and other ancient poets, were brought to England from the Netherlands about 1538.

CUDDALORE (India), on the coast of the Carnatic, was acquired by the English in 1681. It was reduced by the French in 1758, but recaptured in 1760 by sir Eyre Cooté. Again lost in 1781, it underwent a destructive siege by the British under general Stuart, in 1783, which was continued until peace was signed, when it reverted to them, 1784.

CUIRASS, a part of armour much in use by the Greeks and Romans. *Tacitus.* The skins of beasts, and afterwards tanned leather, formed the cuirass of the Britons until the Anglo-Saxon era. It was afterwards made of iron and brass, and covered the warrior from neck to waist before and behind. The cuirass was worn by the heavy cavalry in the reign of Henry III. 1216 *et seq.* Napoleon had several regiments of cavalry wearing cuirasses.

CULDEES (said to derive their name from *cultores Dei*, worshippers of God,) monks of simple and peaceful lives in Scotland and Ireland in early times. They had their principal seat at St. Andrew's; and it is said that in 1185 at Tipperary there was a Culdean abbey whose monks were "attached to simple truth and pure Christian worship, and had not yet conformed to the reigning superstition." They were eventually subjected to the papal yoke.

CULLEN'S-WOOD (Ireland): a horrible slaughter of the English by the Irish took place at a village near Dublin, on Easter or Black Monday, so called from this massacre, 30 March, 1209. The English were a colony from Bristol inhabiting Dublin, whence they went to divert themselves at Cullen's-wood, when the O'Byrnes and O'Tooles fell upon them, and destroyed 500 men, besides women and children.

CULLODEN, near Inverness, where the English, under William, duke of Cumberland, defeated the Scottish rebels headed by the young Pretender, the last of the Stuarts, 16 April, 1746. The Scots lost 2500 men in killed upon the field, or in the slaughter which occurred

in the pursuit, while the loss of the English did not far exceed 200. Prince Charles fled, and wandered among the wilds of Scotland for six months, while 30,000*l.* were offered for taking him, and the troops of the conqueror were constantly in search. He at length escaped from Uist to Morlaix, and died at Rome in 1788.

CULVERIN, cannon so called from the French *coulevrine*, said to have been introduced into England from a French model in 1534. It was originally five inches and a quarter diameter in the bore, and carried a ball of eighteen pounds. *Bailey*.

CUMÆ (S. Italy), an old Greek colony, 1050 B.C., said to have been the residence of the ancient Sibyl, was taken by the Samnites 420 B.C., and annexed by the Romans 338 B.C., and enfranchised.

CUMBERLAND, a N.W. county of England, was granted to Malcolm I. of Scotland in 945, by king Edmund, "on condition that he should be his fellow-worker." It was seized by William I., but restored to Malcolm III., "who became his man," 1072. William the Lion, after his defeat at Alnwick, resigned Cumberland to Henry II., and it was finally annexed to England in 1237.

DUKES.

1726. William Augustus, second son of George II., died 13 Oct. 1765.

1766. Henry Frederic, son of Frederic, prince of Wales, died 18 Sept. 1790.

1799. Ernest Augustus; became king of Hanover 20 June, 1837; died 18 Nov. 1851.

1851. George V., the ex-king of Hanover.

CUMULATIVE VOTE, in parliamentary elections, proposed by Mr. Robert Lowe,* 4 July, during the debates on the reform bill; and rejected, 5 July, 1867, by 314 to 173. By the act passed 15 Aug. 1867 (30 & 31 Vict. c. 102), it was enacted that at a contested election for any county or borough represented by three members, no person shall vote for more than two candidates.

CUNAXA, in Mesopotamia, near the Euphrates, where Cyrus the younger was defeated and slain by his brother Artaxerxes II., against whom he had conspired (401 B.C.), narrated in Xenophon's *Anabasis*. His Greek auxiliaries were successful; see *Retreat of the Greeks*.

CUNEIFORM INSCRIPTIONS (from *cuneus*, Latin for a wedge), in characters resembling arrow-heads, inscribed on bricks or clay-tablets, found at Babylon, Behistun, &c., have lately been deciphered by English and foreign scholars, who date some of them as far back as 2000 B.C. This is impugned by other scholars; see *Assyria, Babylon, Behistun*.

CUNNERSDORF (in Prussia). On 12 Aug. 1759, the king of Prussia, with 50,000 men, attacked the Austrian and Russian army of 90,000 in their camp near this place, and at first gained considerable advantages; but pursuing them too far, the Austrians and Russians rallied, and gained a complete victory. The Prussians lost 200 pieces of cannon and 30,000 men in killed and wounded.

CUPOLA SHIPS, see *Navy of England, 1861*.

CUPPING, a mode of blood-letting. The skin is scarified by lancets, and a glass cup in which the air has been rarified by flame, is immediately applied to it, when the blood usually flows into the cup. This operation was well known to the ancients, and is described by Hippocrates (413 B.C.) and Celsus (20 B.C.). It was common in England about 1820.

CURAÇOA, an island in the Caribbean sea, settled by the Spaniards about 1527, was seized by the Dutch in 1634. In 1800 the French, settled on part of this island, quarrelled with the Dutch, who surrendered it to a British frigate. It was restored to the Dutch in 1802; taken from them by the British in 1807, and again restored in 1814.

CURATES were of early appointment as coadjutors in the Romish church, and are mentioned in England in the 7th century. Among the acts passed for the relief of this laborious class of the clergy are the 12th Anne, 1713, and 36th, 53rd, and 58th Geo. III., and especially the beneficent act 2 Will. IV. Oct. 1831. It appeared by parliamentary reports on ecclesiastical revenues, that there were in 1831, 5230 curates in England and Wales, whose stipends amounted to 424,695*l.* The greatest number of curates in one diocese was Lincoln, 629; and the smallest that of St. Asaph, 43.

CURFEW BELL (from the French *couvre feu*), was introduced into England by Will. I. 1068. On the ringing of the curfew at eight o'clock in the evening all fires and candles were to be extinguished under a severe penalty. *Kapin*. The curfew was abolished 1 Hen. I. 1100. A curfew bell was rung at West Ham so lately as Nov. 1859.

* "At any contested election for a county or borough represented by more than two members, and having more than one seat vacant, every voter shall be entitled to a number of votes equal to the number of vacant seats, and may give all such votes to one candidate, or may distribute them among the candidates as he thinks fit."

CURIATI, see *Rome*, 669 B.C.

CURLING, a Scotch national game with stones on the ice, said to have been introduced from the Low Countries in the 16th century. The Duddingstone curling club was instituted 1795. The royal Caledonian curling club, founded in 1838, owns a large artificial pond at Strathallan, Perthshire.

CURRENTS, from *Corinth*, whence, probably, the tree was first brought to us about 1533. The name is also given to a small kind of dried grape, brought from the Levant and Zante. The duty on these currants (4*s.* 4*d.* per cwt. in 1834) has been reduced to 7*s.* The hawthorn currant (*Ribes Oxycanthoides*) came from Canada in 1705.

CURRENCY ACTS. Those of Sir Robert Peel were passed in 1819 and in 1844.

CURSITOR BARON. This office, formerly attached to the court of exchequer, was abolished in 1856, on the death of the right hon. George Bankes.

CURTATONE, near Mantua, N. Italy. Here the Austrians, under Radetzky, crossed the Mincio, and defeated the Italians after a severe conflict, 29 May, 1848.

CUSHEE PIECES, invented by Richard Leake, the master-gunner of the *Royal Prince* man-of-war, renowned for bravery shown in the engagement with the Dutch admiral Van Tromp, in 1673.

CUSTOM is a law, not written (*lex non scripta*), established by long usage and consent, and is distinguished from *lex scripta*, or the written law. It is the rule of law when it is derived from 1189 downwards. Sixty years' custom is binding in the civil law, and forty years' in ecclesiastical cases.

CUSTOMS were collected upon merchandise in England, under Ethelred II. in 979. The king's claim to them by grant of parliament was established 3 Edw. I. 1274. The customs were farmed to sir Thomas Smith for annual sums varying from 14,000*l.* to 50,000*l.* in the reign of Elizabeth. *Stow*. They were farmed by Charles II. for 390,000*l.* in 1666. *Davenant*. In 1671 commissioners were appointed. The customs were consolidated by Mr. Pitt in 1787. Between 1820 and 1830 so many reductions and consolidations were made in the customs department, that above a quarter of a million was saved in salaries, though the work has enormously increased.—Acts consolidating the customs duties were passed in 1853, 1854, and 1860, whereby the number of articles in the tariff and the amount of the customs, were greatly reduced. Further changes have been made since; the last in Aug. 1867; see *Revenue*. Custom-house officers and officers of excise were disqualified from voting for the election of members of parliament in 1782.

CUSTOS ROTULORUM, keeper of the rolls or records of the sessions of the peace, previously nominated by the lord chancellor, was in 1545 directed to be appointed by a bill signed by the king. The act was confirmed in 1689.

CUSTOZZA, near Verona, N. Italy. Here the Italians were defeated by Marshal Radetzky, 23 July, 1848; and here they were again defeated, 24 June, 1866, after a series of desperate attacks on the Austrian army. The Italians were commanded by their king, Victor Emmanuel, and the Austrians by the archduke Albrecht. The Italian loss was computed to be 720 killed, 3112 wounded, and 4315 missing; the Austrian loss, 960 killed, 3690 wounded, and nearly a thousand prisoners. The Italians soon recrossed the Mincio.

CUTCH (Kachh), W. India, a principality under the political superintendence of the government of Bombay. In consequence of the depredations of the marauding natives, the East India government resorted to hostile measures, which resulted in a stringent treaty with the rao in Jan. 1816. In 1819 he was deposed for misgovernment, and replaced by his infant son, supported by a British contingent. The traffic in children, detected in Dec.

1835, was suppressed by British intervention. Many persons perished by an earthquake in July, 1819. *Thornton.*

CUTLERY, see *Steel.*

CUTTACK (Katak), E. India, a British province ceded to the E. I. company in 1803. Cuttack, the capital, was taken by col. Harcourt, 14 Oct. same year. The Mahrattas conquered it in 1750. *Thornton.*

CUTTING-OUT MACHINES. Wearing apparel was first cut out by machinery in England in the factory of Messrs. Hyams in 1853. The machine, invented by Mr. Frederick Osbourn, consists of a reciprocating vertical knife working through a slot in the table that supports the pile of cloth to be cut. The cloth being pressed up to the edge of the knife by the attendant, the knife will sever it in the direction of the lines marked on the upper layer.

CUZCO, capital of Peru, was entered by Pizarro in Nov. 1533, and taken by him in Aug. 1536, after five months' siege.

CYANOGEN, a colourless gas (composed of nitrogen and carbon), irritating to the nose and eyes, derived from Prussian blue, was first obtained in the free state by Gay Lussac in 1815, being the first instance of the isolation of a compound radicle.

CYCLE of the sun, the twenty-eight years before the days of the week return to the same days of the month; that of the moon is nineteen lunar years and seven intercalary months, or nineteen solar years. The cycle of Jupiter is sixty years. The Paschal cycle, or the time of keeping Easter, was first calculated for the period of 532 years by Victorius, 463. *Blair.* See *Metonic Cycle, Calippic Period.*

CYCLONES, circular whirlwinds, or hurricanes, common in the East and West Indian and Chinese seas, varying from 200 to 500 miles in diameter. Many details respecting them will be found in Reid's "Law of Storms," first published in 1838.

By a great cyclone immense damage was done on sea and land. About 100 ships are said to have been lost, and about 60,000 persons perished, and whole towns nearly destroyed; see *Calcutta* 5 Oct. 1864
 Captain Watson, of the *Clarence*, observing the barometer falling, and foretelling the approach of the cyclone, saved his ship by steering out of its range.

Great cyclone in the Bahamas, at Nassau, New Providence, above 600 houses and many churches and other buildings thrown down; between 60 and 70 persons killed, and a great many ships dismantled 1, 2 Oct. 1866
 Another cyclone at Calcutta, not so destructive, 1 Nov. 1867

CYCLOPÆDIA, see *Encyclopædia.*

CYCLOPEAN MASONRY, a term given to very ancient buildings in Greece, Italy, and Asia Minor, probably the work of the Pelasgi, more than 1000 B.C.

CYDER, see *Cider.*

CYMBAL, the oldest known musical-instrument, was made of brass, like a kettle-drum. Xenophon mentions the cymbal as invented by Cybele, and used in her feasts about 1580 B.C.

CYMRI or KYMRI (hence Cambria), the great Celtic family to which the Britons belonged, and which came from Asia and occupied a large part of Europe about 1500 B.C. About A.D. 640 Dyrnwal Moelmud reigned "*King of the Cymry*;" see *Wales.*

CYNICS, a sect of philosophers founded by Antisthenes (about 396 B.C., *Diog. Laert., Clinton*), who professed to contemn all worldly things, even all sciences, except morality; were very free in reprehending vice, and lived in public with little shame. Diogenes, the eminent cynic, died 323 B.C.

CYNOSCEPHALÆ (*dogs' heads*, so named from the shape of the heights), in Thessaly, where Pelopidas and the Thebans defeated Alexander tyrant of Phæra and the Thessalians, 364 B.C. (Pelopidas being slain): Here also the consul Flaminius totally defeated Philip V. of Macedon, 197 B.C., and ended the war.

CYPRESS, *Cupressus Sempervirens*, a tree originally found in the isle of Cyprus. The Athenians buried their heroes in coffins made of this wood, of which many of the Egyptian mummy-chests were also fabricated. The ancients planted it in cemeteries. The cypress was brought to England about 1441. The deciduous cypress, or *Cupressus disticha*, came from North America before 1640.

CYPRUS, island in the Mediterranean, subject to Turkey, was divided among several petty kings till the time of Cyrus of Persia, who subdued them. It was taken by the Greeks 477 B.C., and ranked among the proconsular provinces in the reign of Augustus. Conquered by the Saracens, A.D. 648; but recovered by the Greeks, in 957. Cyprus was reduced by Richard I. of England, in 1191. He gave it to Guy de Lusignan, who became king in 1192,

and whose descendants reigned till the last, Catherine de Cornano, sold it to the Venetians, 1489. It was taken by the Turks, Aug. 1571, who treated the defenders with great barbarity.

CYR, St., near Versailles. Here a conventual college for ladies was founded by madame De Maintenon, in 1686, where she died, 15 April, 1719. It was made a military college, in 1803.

CYRENAIC SECT, founded by Aristippus the Elder, 365 B.C. They maintained the doctrine that the supreme good of man in this life is pleasure, particularly that of the senses; and said that even virtue ought to be commended only because it gave pleasure.

CYRENE (N. W. Africa), a Greek colony, founded by Battus about 630 B.C. Aristæus, who was chief of the colonists here, gave the city his mother's name. It was also called Pentapolis, on account of its five towns; namely, Cyrene, Ptolemais, Berenice, Apollonia, and Arsinoë. It was conquered by Ptolemy Soter I., who placed many Jews here (286 B.C.). Cyrene was left by Ptolemy Apion to the Romans, 97 B.C. It is now a desert. Some Cyrenaic sculptures were placed in the British Museum in July, 1861.

CYROPEDIUM, see *Corus*.

CYZICUS (Asia Minor). In the Peloponnesian war, the Lacedemonian fleet under the command of Mindarus, assisted by Pharnabazus, the Persian, was encountered by the Athenians under Alcibiades, and defeated with great slaughter, near Cyzicus. Mindarus was slain 410 B.C. *Plutarch*. 408 B.C. *Lenglet*.

CZAR (the title of the emperor of Russia), probably derived from Cæsar, a title said to have been assumed by Ivan Basilowitz after defeating the Tartars, about 1482. The empress is termed czarina, and the eldest son czarowitch.

CZECHS, the native race of Bohemia and Moravia (*which see*). The antagonism between the German and Czechs is milder in Moravia than in Bohemia.

D.

DACCA, N. E. India, a province, acquired to the East India Company in 1765, and ruled under them by a Nawab till its annexation in 1845. *Thornton*.

DACIA, a Roman province, part of Hungary, and the adjoining provinces, after many contests finally subdued by Trajan, 106, when Decebalus, the Dacian leader, was killed. Dacia was abandoned to the Goths by Aurelian, in 270; subdued by the Huns, 376; by Scythians, 566; by Charlemagne, and by the Magyars, in the 9th century.

DAGHESTAN (S. W. Asia), was conquered by the czar Peter, 1723; restored to Persia, 1735; but re-annexed to Russia by Alexander I., 1813.

DAGUERRETYPE PROCESS, invented by Daguerre, and published 1838; see *Photography*.

DAHLIA, a flower brought from Mexico, of which it is a native, in the present century, and first cultivated by the Swedish botanist, Dahl. In 1815 it was introduced into France, and André Thouine suggested improvements in its culture, and it soon became a favourite in Brittany. Georgi introduced it at St. Petersburg; hence the dahlia is known in Germany as the *Georgina*.

DAHOMÉY, a negro kingdom, West Africa, became known to Europeans early in the last century, when Trudo Andati or Guadjor Trudo, a man of energy and talent, was king. He died in 1732, and was succeeded by a series of cruel tyrants: a large part of whose revenue was derived from the slave-trade. Abbeokuta, which was a robber's cave in 1825, is now a strong-walled populous town, inhabited by free blacks; and is consequently opposed by the king of Dahomey. His army has been severely defeated in its attacks on this place, and in one on 16 March, 1864, a great number of his Amazons were slain. During the last few years this kingdom had been visited by Captain Burton and other travellers, who have described the sanguinary customs of the royal court.

DAHRA (Algeria). On 18 June, 1845, above 500 Kabyles at war with the French were suffocated in a cave by smoke, the fire having been kindled by order of general Pelissier, afterwards duke of Malakoff. They had fired on the messenger bearing an offer of a truce. The massacre was condemned by marshal Soult, the minister of war, but justified by marshal Bugeaud.

DAILY NEWS, liberal newspaper, established 21 Jan. 1846.

DAILY TELEGRAPH, penny paper, liberal, established 29 June, 1855.

DAKOTA (North America), organised as a territory of the United States, 2 March, 1861.

DALECARLIANS (Sweden), revolted against Christian of Denmark, 1521, and placed Gustavus Vasa on the throne of Sweden.

DALMATIA, an Austrian province, N.E. of the Adriatic Sea, conquered and made a province by the Romans, 34 B.C. The emperor Diocletian erected his palace at Spalatro, and retired there, A.D. 305. Dalmatia was held in turns by the Goths, Hungarians, and Turks, till its cession to Venice in 1699. By the treaty of Campo Formio in 1797 it was given to Austria, but in 1805 it was incorporated with Italy, and gave the title of duke to marshal Soult. In 1814 it reverted to Austria.

DALTONISM, see *Colour*, note.

DAMASCUS (Syria), a city in the time of Abraham; 1913 B.C. (*Gen.* xiv.), now the capital of a Turkish pachalic.

Taken by David (1040 B.C.), but retaken shortly after, and made the capital of Syria under Benhadad and his successors . . . B.C. 951
 Taken by Tiglath-Pileser, king of Assyria . . . 740
 From the Assyrians it passed to the Persians, and from them to the Greeks, under Alexander; and afterwards to the Romans, about Paul, converted, preaches here (*Act's* ix.) A.D. 52
 Taken by the Saracens, 633; by the Turks in 1075; destroyed by Tamerlane . . . 1400
 Taken by Ibrahim Pacha in . . . 1832
 The disappearance of a Greek priest, named father Tommaso, from here, 1 Feb. 1840, led to the torture of a number of Jews, suspected of his murder, and to a cruel persecution of

that people, which caused remonstrances from many states of Europe.
 Damascus was restored to Turkey . . . 1841
 In consequence of a dispute between the Druses and Maronites, the Mahommedans massacred above 3000 Christians and destroyed the houses, rendering vast numbers of persons homeless and destitute; a large number were rescued by Abd-el-Kader,* who held the citadel . . . 9, 10, 11 July, 1860
 Summary justice executed for these crimes by Fuad Pacha: 160 persons of all classes executed including the Turkish governor; and 11,000 persons made soldiers by conscription, Aug. Sept. „

DAMASK LINENS and **SILKS**, first manufactured at Damascus, have been beautifully imitated by the Dutch and Flemish. The manufacture was brought to England by artisans who fled from the persecutions of Alva, 1571-3. The **DAMASK ROSE** was brought here from the south of Europe by Dr. Linaere, physician to Henry VIII., about 1540.

DAMIENS' ATTEMPT. Louis XV. of France was stabbed with a knife in the right side by Damiens, a native of Arras, 5 Jan. 1757. The culprit endured the most excruciating tortures, and was then broken on the wheel, 28 March.

DAMIETTA (Lower Egypt), was taken by the crusaders 1219; lost 1229; retaken by Louis IX., 5 June, 1249; surrendered as his ransom when a prisoner, 6 May, 1250. The present town was built soon after. Here, it is said, was first manufactured the cloth termed *dimity*.

DAMON and **PYTHIAS** (or *Phintias*), Pythagorean philosophers. When Damon was condemned to death by the tyrant Dionysius of Syracuse, about 387 B.C., he obtained leave to go and settle some domestic affairs, on the promise of returning at the appointed time of execution, and Pythias became surety for the performance of his engagement. When the fatal hour approached, and Damon did not appear, Pythias surrendered himself, and was led away to execution; but at this critical moment Damon returned. Dionysius remitted the sentence, and entreated them to permit him to share their friendship.

DANAI: an ancient name of the Greeks derived from Danaus king of Argos, 1474 B.C.

DANCE OF DEATH. The triumph of death over all ranks of men was a favourite subject with the artists of the middle ages, and appears in rude carvings and pictures in various countries.

The *Chorea Machabeorum* or *Danse Macabre*, the first printed representation, published by Guyot Marchand, a bookseller of Paris . . . 1485
 Holbein's celebrated *Dance of Death* (concerning the authorship of which there has been much controversy), printed at Lyons in 1538, and at Basil . . . 1594
 Many editions have since appeared; one with an introduction and notes published by Mr. Russell Smith . . . 1849
 The term *Dance of Death* was also applied to the

frenzied movements of the Flagellants, who had sometimes skeletons depicted on their clothing about the end of the 14th century.
Dancing mania, accompanied by aberration of mind and distortions of the body, was very prevalent in Germany in 1374, and in the 16th century in Italy, where it was termed *Tarantism*, and erroneously supposed to be caused by the bite of the Tarantula spider. The music and songs employed for its cure are still preserved.

DANCING to the measure of time was invented by the Curetes, 1534 B.C. *Eusebius*. The Greeks first combined the dance with their dramas. Pantomimic dances were first introduced on the Roman stage, 22 B.C. *Usher*. Dancing by cinque paces was introduced into England from Italy, A.D. 1541. In modern times the French were the first who introduced *ballets analogues* in their musical dramas. The country dance (*contre-danse*) is of French origin, but its date is not precisely known. *Spelman*. See *Morice Dance*, *Quadrille*, and *Waltz*.

* Abd-el-Kader visited England in August, 1865.

DANE-GELD, or DANEGELT, a tribute paid to the Danes to stop their ravages in this kingdom; first raised by Ethelred II. in 991, and again in 1003; and levied after the expulsion of the Danes to pay fleets for clearing the seas of them. The tax was suppressed by Edward the Confessor in 1051; revived by William I. 1068; and formed part of the revenue of the crown, until abolished by Stephen, 1136. Every hide of land, *i.e.* as much as one plough could plough, or as *Bede* says, as much as could maintain a family, was taxed at first 1s., afterwards as much as 7s. Camden says that once 24,360*l.* was raised.

DANES, or NORTHMEN; see *Denmark*. During their attacks upon Britain and Ireland they made a descent on France, where, in 895, under Rollo, they received presents under the walls of Paris. They returned and ravaged the French territories as far as Ostend in 896. They attacked Italy in 903. Neustria was granted by the king of France to Rollo and his Normans (North-men), hence Normandy, in 911. The invasions of England and Ireland were as follows:—

First hostile appearance of the Danes	783	Their fleet defeated after a breach of treaty, purchased by money	992
They land near Purbeck, Dorset	787	They land in Essex, and in the west, and are paid money (16,000 <i>l.</i>) to quit	994
Descend in Northumberland: destroy the church at Lindisfarne; are repelled, and perish by shipwreck	8 Jan. 794	A general massacre of the Danes, by order of Ethelred II.	13 Nov. 1002
They invade Scotland and Ireland	795, 796	Sweyne revenges it, and receives 36,000 <i>l.</i> (which he demands as an annual tribute) to depart	1003

DANGEROUS ASSOCIATIONS (IRELAND) BILL; see *Roman Catholic Association*.

DANGEROUS GOODS: an act regulating their deposit and carriage was passed 6 Aug. 1866.

DANNEWERKE, or Dannawirke, a series of earthworks, considered almost impregnable, stretching across the long narrow peninsula of Schleswig, Holstein, and Jutland—said to have been constructed during the “stone age,” long before the art of metal-working. It was rebuilt in 937 by Thyra, queen of Gormo the old, for which she was named “Dannabod,” the pride of the Danes. It was repaired by Olaf Tryggveson between 995 and 1000. Near here the Prussians, helping the duchies, defeated the Danes, 23 April, 1848. The retreat of the Danes from it, 5 Feb. 1864, occasioned much dissatisfaction at Copenhagen.

DANTE'S DIVINA COMMEDIA was first printed in 1472. He was born 14 May, 1265, and died at Ravenna, 14 Sept. 1321. A festival in his honour, at Florence, was opened by the king, 14 May, 1865, when a large statue of Dante by Pazzi of Ravenna was uncovered.

DANTZIC (N. Germany), a commercial city in 997; but according to other authorities, built by Waldemar I. in 1165. Poland obtained the sovereignty of it in 1454. It was seized by the king of Prussia, and annexed in 1793. It surrendered to the French, May, 1807; and by the treaty of Tilsit was restored to independence, under the protection of Prussia and Saxony, July, 1807. Dantzic was besieged by the allies in 1812; and surrendered to them, 1 Jan. 1814. By the treaty of Paris it again reverted to the king of Prussia. By an inundation here, owing to the Vistula breaking through its dykes, 10,000 head of cattle and 4000 houses were destroyed, and a vast number of lives lost, 9 April, 1829.

DANUBE (German, Donau; anciently Ister, in its lower part). Except the Volga, the largest river in Europe, rising in the Black Forest and falling into the Black Sea. Part of Trajan's bridge at Gladova still remains. It was destroyed by Adrian, to prevent the barbarians entering Dacia. Steam navigation was projected on this river by count Szechenyi in 1830, and in that year the first steam-boat was launched at Vienna, and the Austrian

company was formed shortly after. The Bavarian company was formed in 1836. A canal between the Danube and the Main was completed by Louis I. of Bavaria. Charlemagne, in the 8th century, contemplated uniting the Danube and Rhine by a canal. At the peace of 1856 the free navigation of the Danube was secured, and a European commission appointed to make it navigable from Isaktchi to the sea, which has worked with good effect.

DANUBIAN PRINCIPALITIES; WALLACHIA and MOLDAVIA (capitals, Bucharest and Jassy) were united as ROUMANIA, 1859. Population of the two, 1860, 3,864,848. These provinces formed part of the ancient Dacia (*which see*).

Part of Moldavia ceded to Russia	1812	ministers, assassinated as he was leaving the chamber of deputies	20 June, 1862
The provinces having participated in the Greek insurrection in 1821, were severely treated by the Turks; but by the treaty of Adrianople were placed under the protection of Russia	1829	The united chambers of the two principalities meet at Bucharest	5 Feb. "
The Porte appointed as hospodars prince Stirbey for Wallachia, and prince Ghika for Moldavia	June, 1849	Coup d'état of prince Couza against the aristocrats: a plebiscite for a new constitution, 2 May; which is adopted	28 May, 1864

DARDANELLES, THE, are two castles (Sestos, in Romania, and Abydos, in Natolia), built by the sultan Mahomet IV. in 1659, commanding the entrance of the strait of Gallipoli, named Dardanelles from the contiguous town Dardanns.—The passage of the strait was achieved by the British squadron under sir John Duckworth, 19 Feb. 1807; but he repassed them with great loss, 2 March, the castles of Sestos and Abydos hurling down stones of many tons weight, upon the British ships. The allied English and French fleets passed the Dardanelles at the sultan's request, Oct. 1853; see *Hellespont* and *Xerxes*.

DARIC, a Persian gold coin, issued by Darius, hence its name, about 538 B.C. About 556 cents. *Knowles*. It weighed two grains more than the English guinea. *Dr. Bernard*.

DARIEN, ISTHMUS OF, central America, discovered by Columbus, 1494. In 1694, William Paterson, founder of the Bank of England, published his plan for colonising Darien. In consequence a company was formed in 1695 and three ill-fated expeditions sailed there in 1698 and 1699, from Scotland, where 400,000*l.* had been raised. The first consisted of 1200 young men of all classes, besides women and children. The enterprise not having been recognised by the English government, the settlements were threatened by the Spaniards, to whom they were finally surrendered, 30 March, 1700. Paterson and a few survivors from famine and disease, had set off shortly before the arrival of the second expedition. Several years after, a sum of 398,085*l.* was voted by parliament to the survivors as "Equivalent money." A sum of money was also voted to Paterson; but the bill was rejected in the house of lords; see *Panamá*.

DARK AGES, a term applied to the period of time called the *Middle Ages*; according to Hallam, comprising about 1000 years—from the invasion of France by Clovis, 486, to that of Naples by Charles VIII. 1495. During this time learning was at a low ebb.

DARMSTADT, see *Hesse Darmstadt*.

DARTFORD (Kent). Here commenced the insurrection of Wat Tyler, 1381. A convent of nuns, of the order of St. Augustin, endowed here by Edward III., 1355, was converted by Henry VIII. into a royal palace. The first paper-mill in England was erected at Dartford by sir John Spielman, a German, in 1590 (*Stow*), and about the same period was erected here the first mill for splitting iron bars. The powder-mills here were blown up four times between 1730 and 1738. Various explosions have since occurred, in some cases with loss of life to many persons: 12 Oct. 1790; 1 Jan. 1795; and others recently.

DARTMOUTH (Devon). Burnt by the French in the reigns of Richard I. and Henry IV. In a third attempt (1404), the invaders were defeated by the inhabitants, assisted by the valour of the women. The French commander, Du Clastel, three lords, and thirty-two knights, were made prisoners. In the war of the parliament, Dartmouth was taken after a siege

of four weeks, by prince Maurice, who garrisoned the place for the king (1643); but it was retaken by general Fairfax by storm in 1646.

DATES were affixed to grants and assignments 18 Edw. I. 1290. Before this time it was usual at least to pass lands without dating the deed of conveyance. *Lewis*. Numerous instruments of assignment enrolled among our early records establish this fact. The date is determined by the names of the parties, particularly that of the grantor: the possession of land was proof of the title to it. *Hardie*. A useful glossary of the dates given in old charters and chronicles will be found in Nicolas's "Chronology of History."

DAUPHINÉ, * S. E. France, successively held by the Allobroges, Burgundians, and Lombards; was, about 732-4, delivered from the invading Saracens by Charles Martel. After forming part of the kingdom of Arles, it was much subdivided among counts. One of these, Humbert II., ceded Dauphiné and the Viennois to Philip VI., in 1343, for his eldest son, on the condition that the prince should be styled *dauphine*, which took effect in 1349, when Humbert became a monk. Louis Antoine, duke of Angoulême, son of Charles X., the last dauphin who assumed the title at his father's accession, 16 Sept. 1824, died 3 June, 1844.

DAVENTRY, Northamptonshire. Near here Lambert, having escaped from the Tower, was defeated and retaken, in his attempt to enkindle the war, by Monk, 21 April, 1660. The dissenting academy removed here from Northampton in 1752, was transferred to Wymondley in 1789, thence to London as Coward College, and finally united with Homerton and Highbury Colleges as New College, in 1850.

DAVID'S, Sr. (S. W. Wales), the ancient Menapia, now a poor decayed place, but once the metropolitan see of Wales, and archiepiscopal. When Christianity was planted in Britain, there were three archbishops' seats appointed, viz. London, York, and Caerleon upon Usk, in Monmouthshire. That at Caerleon being too near the dominions of the Saxons, was removed to Mynyw, and called St. David's, in honour of the archbishop who removed it, 519. St. Sampson was the last archbishop of the Welsh; for he, withdrawing himself on account of a pestilence to Dôle, in Brittany, carried the pall with him. In the reign of Henry I. the archbishops submitted to the see of Canterbury. *Beatson*. Present income 4500*l*.

BISHOPS.

1800. Lord George Murray, died 3 June, 1803.

1803. Thomas Burgess, trans. to Salisbury, June 1825.

1825. John Banks Jenkinson, died 7 July, 1840.

1840. Connop Thirlwall (PRESENT bishop).

DAVID'S DAY, Sr., 1 March, is annually commemorated by the Welsh, in honour of St. David. Tradition states that on St. David's birthday, 540, a great victory was obtained by the Welsh over their Saxon invaders; and that the Welsh soldiers were distinguished by order of St. David by a leek in their cap.

DAVIS'S STRAIT (N. America), discovered by John Davis, on his voyage to find a N. W. passage, between 1585 and 1587. He made two more voyages for the same purpose, and five voyages to the East Indies. In the last he was killed by Japanese pirates, on the coast of Malacca, 27 Dec. 1605.

DAVY LAMP, see *Safety Lamp*.

DAY. Day began at sunrise among most of the northern nations, at sunset among the Athenians and Jews; and among the Romans at midnight as with us. The Italians in many places, at the present time, reckon the day from sunset to sunset, making their clocks strike twenty-four hours round, instead of dividing the day, as is done in all other countries, into equal portions of twelve hours. This mode is but partially used in the larger towns of Italy; most public clocks in Florence, Rome, and Milan, being set to the hour designated on French or English clocks. The Chinese divide the day into twenty parts of two hours each. The astronomical day begins at noon, is divided into twenty-four hours (instead of two parts of twelve hours), and is the mode of reckoning used in the Nautical Almanack.

DEACONS (literally *servants*), an order of the Christian priesthood, which took its rise from the institution of seven deacons by the Apostles, which number was retained a long period in many churches, about 53. (*Acts vi.*) The original deacons were Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolas. The qualifications of a deacon are mentioned by St. Paul (65) 1st *Timothy* iii. 8-14.

DEACONESSES, or ministering widows, are mentioned in early Christian history. Their qualifications are given in 1 *Tim.* v. 9, 10 (65). Their duties were to visit the poor and sick, assist at the agapæ or love feasts, admonish the young women, &c. The office was discontinued in the Western church in the 5th and 6th centuries, and in the Greek church about

the 12th, but has been recently revived in Germany. The appointment of deaconesses, subject to the parochial clergy, was advocated by the bishop of Ely about 1853, and some were appointed. The Deaconesses' Institution, London, was established in 1861.

DEAD. Prayers for the benefit of the dead were probably offered up in the 2nd century, being referred to by Tertullian, who died 220, and the practice greatly increased soon after. It was protested against by Aerius, and defended by Epiphanius, who died 403. It is renounced by the church of England.

DEAD WEIGHT LOAN acquired its name from its locking up the capital of the Bank of England, which in 1823 advanced 11,000,000*l.* to the government (to construct new ordnance, &c.). The latter engaged to give an annuity of 585,740*l.* for 44 years, which ceased in June, 1867.

DEAF AND DUMB. The first systematic attempt to instruct the deaf and dumb was made by Pedro de Ponce, a Benedictine monk of Spain, about 1570. Bonet, also a monk, published a system at Madrid in 1620. Dr. Wallis published a work in England on the subject in 1650. The first regular academy for the deaf and dumb in Britain was opened in Edinburgh in 1773. In modern times the abbé de l'Épée (1712-89), and his friend and pupil the abbé Sicard of Paris (1742-1822); the rev. Mr. Townsend and Mr. Baker, of London; Mr. Braidwood of Edinburgh; and surgeon Orpen of Dublin, have laboured with much success in promoting the instruction of the deaf and dumb. The asylum for deaf and dumb children was opened in London through the exertions of Mr. Townsend in 1792; one in Edinburgh by Mr. J. Braidwood, in 1810; and one in Birmingham by Mr. T. Braidwood, in 1815. The asylum at Claremont, Dublin, was opened in 1816. In 1851, there were in Great Britain, 12,553 deaf and dumb out of a population of 20,959,477.

DEAL, a cinque port with Sandwich, 1229; a fishing village in the reign of Henry VIII.; its strong castle built 1539 by Henry VIII. Deal was incorporated and made independent of Sandwich, 1699.

DEAN, FOREST OF, Gloucestershire, anciently wooded quite through, and in the last century, though much curtailed, was twenty miles in length and ten in breadth. It was famous for its oaks, the material of our ships of war. Riots in this district, when more than 3000 persons assembled in the forest, and demolished upwards of fifty miles of wall and fence, throwing open 10,000 acres of plantation, took place on 8 June, 1831.

DEAN (decanus), a name commonly given to the arch-presbyter, or eldest presbyter, in the 12th century; originally a military title, an officer over ten soldiers. In the church of England the dean and chapter of a cathedral nominally elect the bishop and form his council. By 13 & 14 Car. II. (1662), a dean must be in priest's orders; previously the office had occasionally been held by a layman, with special dispensation. The ancient office of "rural dean" has been much revived since 1850.

DEBT. Debtors have been subjected to imprisonment in almost all countries and times; and until late years our prisons were crowded with them. In the eighteen months subsequent to the panic of Dec. 1825, as many as 101,000 writs for debts were issued in England. In the year ending 5th Jan. 1830, there were 7114 persons sent to the several prisons of London; and on that day, 1547 of the number were yet confined. On the 1st of Jan. 1840, the number of prisoners for debt in England and Wales was 1732; in Ireland the number was under 1000; and in Scotland under 100. The operation of statutes of relief, and other causes, considerably reduced the number of imprisoned debtors. When the new Bankruptcy act (abolishing imprisonment for debt except when fraudulently contracted) came into operation in Nov. 1861, a number of debtors who had been confined were released.

Arrest of Absconding Debtors bill, 14 & 15 Vict. c. 52, 1852. In 1863 nearly 18,000 persons were imprisoned by order of the county courts : average time, 15 days, amount of debt, 3*l.* 10*s.* ; see *Arrest, King's Bench, Bankrupts, Insolvents, and National Debt.*

DEBUSSCOPE, an instrument of French origin, somewhat similar to the kaleidoscope, said to be useful for devising patterns for calico-printers, &c., made its appearance in 1860.

DECCAN (Dekhan or Dakhan), S. India, was invaded by the Mahometans in 1294. The first independent sultan was Alaudin. The natives revolted, and the dynasty of Bahmani was founded by Hasan Ganga in 1347. About 1686-90, Aurungzebe I. recovered the Deccan, but soon lost great part of it to the Mahrattas. The Nizam al Mulk, his viceroy, became independent in 1717. A large part of the Deccan was ceded to the English in 1818.

DECEMBER (from *decem*, ten), the tenth month of the year of Romulus, commencing in March. In 713 B.C. Numa introduced January and February before March, and thenceforward December became the twelfth of the year. In the reign of Commodus, A.D. 181-192, December was called, by the way of flattery, Amazonius, in honour of a courtesan whom that prince had loved, and had painted like an Amazon. The English commenced their year on the 25th December, until the reign of William I. ; see *Year*.

DECEMVIRI, or Ten Men, appointed to draw up a code of laws, to whom for a time the whole government of Rome was committed, 451 B.C. The laws they drew up were approved by the senate and general assembly of the people, written on ten metallic tables, and set up in the place where the people met (*comitium*). Two more tables were added, 450 B.C. The Decemviri at first ruled well, but the tyranny of Appius Claudius towards Virginia occasioning an insurrection, they were forced to resign ; and consuls were again appointed, 449 B.C.

DECENNALIA, festivals instituted by Augustus, 17 B.C., celebrated by the Roman emperors every tenth year of their reign, with sacrifices, games, and largesses. *Livy*. Celebrated by Antoninus Pius, A.D. 148.

DECIMAL SYSTEM OF COINAGE, WEIGHTS, &c., see *Metric System*.

DECLARATION OF RIGHTS, see *Rights*. DECORATED STYLE, see *Gothic*.

DECORATIVE ART. Its true principles enunciated by A. W. Pugin, in his "Designs," in 1835, have been advanced by Owen Jones, Redgrave, and others. Owen Jones's elaborate "Grammar of Ornament" was published in 1856. A Decorative Art society, founded in 1844, existed for a short time only.

DE COURCY'S PRIVILEGE, that of standing covered before the king, granted by king John, to John de Courcy, baron of Kingsale, and his successors, in 1203. He was the first nobleman created by an English sovereign, 27 Hen. II. 1181 ; and was entrusted with the government of Ireland, 1185. The privilege was allowed to the baron of Kingsale by Will. III., Geo. III., and by Geo. IV. at his court held in Dublin, in Aug. 1821. The present baron is the 29th in succession.

DECRETALS. They formed the second part of the canon law, or collection of the pope's edicts and decrees and the decrees of councils. The first acknowledged to be genuine is a letter of Siricius to Himerus, a bishop of Spain, written in the first year of his pontificate, 385. *Howel*. Certain false decretals were used by Gregory IV. in 837. The decretals of Gratian, a Benedictine (a collection of canons), were compiled in 1150. *Hénault*. Five books were collected by Gregory IX. 1227 ; a sixth by Boniface VIII. 1297 ; the Clementines by Clement V. in 1313 ; employed by John XXII. in 1317 ; the Extravagantes range from 1422 to 1483.

DEDICATION of the Jewish tabernacle took place 1490 B.C. ; of the temple, 1004 B.C. ; of the second temple, 515 B.C. The Christians under Constantine built new churches and dedicated them with great solemnity, in A.D. 331, *et seq.* The dedication of BOOKS (by authors to solicit patronage or testify respect) began in the time of Mæcenæ, 17 B.C., the friend and counsellor of Augustus, and a patron of Horace (*Ode* I. 1).

DEED, a written contract or agreement. The formula, "I deliver this as my act and deed," occurs in a charter of 933. *Fosbrooke*. Deeds in England were formerly written in Latin or French ; the earliest known instance in English is the indenture between the abbot of Whitby and Robert Bustard, dated at York in 1343 ; see *English*.

DEER are mentioned in a will of one Athelstan, dated 1045. Professor Owen thinks that fallow deer are not native, but were introduced here at an early period. There are now in England 334 deer parks, the oldest being probably lord Abergavenny's at Eridge, Sussex. See Evelyn Shirley's "Account of Deer Parks," July, 1867.

DEFAMATION is punishable by fine and imprisonment by statute of 1843. The

jurisdiction of the ecclesiastical courts on this subject was abolished by 18 & 19 Vict. c. 41 (1855).

DEFENCE OF THE REALM ACT passed Aug. 1860, in consequence of the unsettled state of Europe, and the doubtful policy of the emperor Napoleon; see *Fortification*.

DEFENDER OF THE FAITH (*Fidei Defensor*), a title of the British sovereign, conferred by Leo X. on Henry VIII. of England, for his tract on behalf of the Church of Rome (then accounted *Domicilium fidei Catholicæ*), against Luther, 11 Oct. 1521.

DEFENDERS, a faction in Ireland, which arose out of a quarrel between two residents of Market-hill, 4 July, 1784. Each was soon aided by a large body of friends, and many battles ensued. On Whit-Monday, 1785, an armed assemblage of one of the parties (700 men), called the *Nappagh Fleet*, prepared to encounter the *Bawn Fleet*, but the engagement was prevented. They subsequently became religious parties, Catholic and Presbyterian, distinguished as *Defenders* and *Peep-o'-day-boys*: the latter were so named because they usually visited the dwellings of the Defenders at daybreak in search of arms; see *Diamond*.

DEGREES. Eratosthenes attempted to determine the length of a geographical degree about 250 B.C. *Snellius*; see *Latitude* and *Longitude*. *Collegiate degrees* are coeval with universities. Those in medicine are traced up to A.D. 1384; in music to 1463. In Oct. 1863, women were permitted to compete for degrees.

DEI GRATIA, see *Grace of God*.

DEIRA, a part of the Anglo-Saxon kingdom of Northumbria; see *Britain*.

DEISM or **THEISM** (Greek, *theos*; Latin, *deus*, God), the belief in one God, in opposition to the doctrine of the Trinity. About the middle of the 16th century some gentlemen of France and Italy termed themselves *deists*, to disguise their opposition to Christianity by a more honourable appellation than that of *Atheism* (*which see*). The most distinguished deists were Herbert, baron of Cherbury, in 1624; Hobbes, Tindal, Morgan, lord Bolingbroke, Gibbon, Hume, Holcroft, Paine, and Godwin.

DELAWARE, one of the United States of North America, named after lord de la Warre, governor of Virginia, who entered the bay 1610. It was settled by Swedes, sent there by Gustavus in 1627; acquired by the Dutch, 1655; ceded to the English, 1664.

DELEGATES, COURT OF. Appeals to the pope in ecclesiastical causes having been forbidden (see *Appeals*), those causes were for the future to be heard in this court, established by Henry VIII. 1533; soon afterwards the pope's authority was superseded altogether in England. *Stow*. This court was abolished in 1832; and appeals now lie to the Judicial Committee of the Privy Council, as fixed by 3 & 4 Will. IV. c. 41 (1833); see *Arches*.

DELFT (S. Holland), a town founded by Godfrey le Bossu, about 1074; famous for "Delft earthenware;" first manufactured here about 1310. The sale of delft greatly declined after the introduction of potteries into Germany and England. Grotius was born here, 10 April, 1583; and here William, the great prince of Orange, was assassinated 10 July, 1584, by Gerard.

DELHI, the once great capital of the Mogul empire, and chief seat of the Mahometan power in India; it was taken by Timour in 1398. It is now in decay, but contained a million of inhabitants in 1700. In 1739, when Nadir Shah invaded Hindostan, he entered Delhi; 100,000 of the inhabitants perished by the sword, and plunder to the amount of 62,000,000*l.* sterling is said to have been collected. The same calamities were endured in 1761, on the invasion of Abdalla, king of Candahar. In 1803, the Mahrattas, aided by the French, took Delhi; but were afterwards defeated by general Lake, and the aged Shah Aulum, emperor of Hindostan, was restored to his throne with a pension; see *India*, 1803. On 10 May, 1857, a mutiny arose in the sepoy regiments at Meerut. It was soon checked; but the fugitives fled to Delhi on 11 May, and, combined with other troops here, seized the city; proclaimed a descendant of the Mogul king, and committed frightful atrocities. The rebels were anxious to possess the chief magazine, but after a gallant defence it was exploded by order of lieutenant Willoughby, who died of his wounds shortly after. The other heroes in this exploit were lieutenants Forrest and Rayner, and the gunners Buckley and Scully. Delhi was shortly after besieged by the British, but was not taken till 20 Sept. following. The final struggle began on the 16th; brigadier (since sir R.) Archdale Wilson being the commander. Much heroism was shown; the gallant deaths of Salkeld and Home at the explosion of the Cashmere gate created much enthusiasm. The old king and his sons were captured soon after: the latter were shot, and the former after a trial was sent for life to Rangoon, where he died 11 Nov. 1862; see *India*, 1857.

"**DELICATE INVESTIGATION**" into the conduct of the princess of Wales (afterwards queen of England, as consort of George IV.), was commenced by a committee of the privy council, under a warrant of inquiry, dated 29 May, 1806. The members were lord

Grenville, lord Erskine, earl Spencer, and lord Ellenborough. The inquiry, of which the countess of Jersey, sir J. and lady Douglas, and other persons of rank, were the prompters, and in which they conspicuously figured, led to the publication called "The Book;" afterwards suppressed. The charges against the princess were disproved in 1807, and in 1813; but not being permitted to appear at court, she went on the continent in 1814; see *Queen Caroline*.

DELIUM, Bœotia, N. Greece, the site of a celebrated temple of Apollo. Here, in a conflict between the Athenians and the Bœotians, in which the former were defeated, Socrates the philosopher is said to have saved the life of his pupil Xenophon, 424 B.C.

DELLA CRUSCA ACADEMY of Florence merged into the Florentine in 1582.—The DELLA CRUSCA SCHOOL, a term applied to some English persons residing at Florence, who wrote and printed a quantity of inferior sentimental poetry and prose in 1785. They came to England, where their works were popular for a short time, but were severely satirised by Gifford in his "Baviad" and "Mæviad" (1792-5).

DELOS, a Greek isle in the Ægean sea. Here the Greeks, during the Persian war, 477 B.C., established their common treasury, which was removed to Athens, 461.

DELPHI (N. Greece), celebrated for its enigmatical oracles delivered by the Pythia, in the temple of Apollo, which was built, some say, by the council of the Amphictyons, 1263 B.C. The priestess delivered the answer of the god to such as came to consult the oracle, and was supposed to be suddenly inspired. The Pythian games were first celebrated here 586 B.C. The temple was burnt by the Pisistratidæ, 548 B.C. A new temple was raised by the Alcæonidæ. The Persians (480 B.C.) and the Gauls (279 B.C.) were deterred from plundering the temple by awful portents. It was, however, robbed and seized by the Phocians 357 B.C., which led to the sacred war, and Nero carried from it 300 costly statues, A.D. 67. The oracle was consulted by Julian, but silenced by Theodosius.

DELPHIN CLASSICS, a collection of thirty-nine of the Latin authors in sixty volumes, made for the use of the dauphin (*in usum Delphini*) son of Louis XIV., and published in 1674-91. Ausonius was added in 1730. The duc de Montausier, the young prince's governor, proposed the plan to Huet, bishop of Avranches, the dauphin's preceptor; and he, with other learned persons, including Madame Dacier,* edited all the Latin classics except Lucan. Each author is illustrated by notes and an index of words. An edition of the Delphin Classics, with additional notes, &c., was published by Mr. Valpy of London, early in the present century.

DELUGE. The deluge was threatened in the year of the world 1536; and began 7 Dec. 1656, and continued 377 days. *Genesis* vi. vii. viii. The ark rested on Mount Ararat 6 May, 1657; and Noah left the ark 18 Dec. following. The year corresponds with that of 2348 B.C. *Blair*. The following are the epochs of the deluge, according to Dr. Hales:—

Septuagint . . . B.C. 3246	Persian . . . B.C. 3103	Clinton . . . B.C. 2482	Petavius . . . B.C. 2329
Jackson . . . 3170	Hindoo . . . 3102	Playfair . . . 2352	Strauchius . . . 2293
Hales . . . 3155	Samaritan . . . 2998	Usher & Eng. Bible 2348	Hebrew . . . 2288
Josephus . . . 3146	Howard . . . 2698	Marsham . . . 2344	Vulgar Jewish . . . 2104

In the reign of Ogyges, king of Attica, 1764 B.C., a deluge so inundated Attica, that it lay waste for nearly 200 years. *Blair*. Buffon thinks that the Hebrew and Grecian deluges were the same, and arose from the Atlantic and Bosphorus bursting into the valley of the Mediterranean.

The deluge of Deucalion, in Thessaly, is placed 1503 B.C. according to *Eusebius*. It was often confounded by the ancients with the general flood; but considered to be merely a local inundation,

occasioned by the overflowing of the river Peneus, whose course was stopped by an earthquake between the mounts Olympus and Ossa. Deucalion, who then reigned in Thessaly, with his wife Pyrrha, and some of their subjects, are stated to have saved themselves by climbing up mount Parnassus.

A general deluge was predicted to occur in 1524, and arks were built; but the season happened to be a fine and dry one.

DEMERARA AND ESSEQUIBO, colonies in Guiana, South America, founded by the Dutch, 1580, were taken by the British, under major-general Whyte, 22 April, 1796, but were restored at the peace of Amiens, 1802. They again surrendered to the British under general Griffin and Commodore Hood, Sept. 1803, and became English colonies in 1814.

DEMOCRATS, advocates for government by the people themselves (*demos*, people, and *kratein*, to govern), a term adopted by the French republicans in 1790 (who termed their opponents *aristocrats*, from *aristos*, bravest or best). The name *Democrats* was adopted by the pro-slavery party in N. America (the southern states), and the abolitionists were called *Republicans*. Into these two great parties a number of smaller ones were absorbed at the presidential election in 1856. In 1860, the Republicans formed "Wide-awake" clubs

* This beautiful and gifted woman translated *Callimachus* at the age of 23; and also *Anacreon*, *Sappho*, *Plautus*, *Terence*, and *Homer*. She died in 1720.

for electioneering purposes, and succeeded in getting their candidate, Abraham Lincoln, elected president, 4 Nov. ; see *United States*, 1860.

DENAIN (N. France). Here marshal Villars defeated the Imperialist army, 24 July, 1712.

DENARIUS, the chief silver coin among the Romans, weighing the seventh part of a Roman ounce, and value $7\frac{1}{2}d.$ sterling, first coined about 269 B.C., when it exchanged for ten ases (see *As*). In 216 B.C. it exchanged for sixteen ases. A pound weight of silver was coined into 100 denarii. *Digby*. A pound weight of gold was coined into twenty denarii aurei in 206 B.C. ; and in Nero's time into forty-five denarii aurei. *Lempriere*.

DENIS, St., an ancient town of France, near Paris, famous for its abbey and church, the former abolished at the revolution : the latter the place of sepulture of the French kings, from its foundation, by Dagobert, about 630 ; the remains of the saint Denis were placed there in 636. On the 6 Aug. 1793, the republicans demolished most of the royal tombs, and emptied the leaden coffins into the dunghills, melting the lead. By a decree of Bonaparte, dated 20 Feb. 1806, the church (which had been turned into a cattle-market) was ordered to be cleansed out and redecorated as "the future burial place of the emperors of France." On the return of the Bourbons, more restorations were effected, and when the duc de Berri and Louis XVIII. died, both were buried there.

DENMARK (N. Europe). The most ancient inhabitants were Cimbric and Teutones, who were driven out by the Jutes or Goths. The Teutones settled in Germany and Gaul ; the Cimbric invaded Italy, where they were defeated by Marius. The peninsula of Jutland obtains its name from the Jutes ; and the name of Denmark is supposed to be derived from *Dan*, the founder of the Danish monarchy, and *mark*, a German word signifying country. For their numerous invasions of Britain, &c., see *Danes*. Population of the kingdom of Denmark in 1860, 1,600,551 ; of the duchies of Schleswig, Holstein, and Lauenburg, 1,004,473 ; of the colonies, 120,283. By the treaty of peace, signed 30 Oct. 1864, the duchies were taken from Denmark. Schleswig and Holstein were to be made independent, and Lauenburg was to be incorporated, by its desire, with Prussia. For the result, see *Gastein*, and *Prussia*, 1866.

[He is descended from Christian III. and she from Frederick V.; both from George II. of England.]
Heir.: Christian (his son), born 3 June, 1843.

DENNEWITZ (Prussia), here a victory was obtained by marshal Bernadotte (afterwards Charles XIV., king of Sweden), over marshal Ney, 6 Sept. 1813. The loss of the French, exceeded 13,000 men, several eagles, and much cannon; of the allies, 6000. The defeat of Napoleon at Leipsic, on the 18th of October following, closed his disastrous campaign.

DENOMINATIONS, THE THREE (presbyterians, congregationalists or independents, and baptists), were organised in 1727 as an association, with the privilege of direct appeal to the reigning sovereign of Great Britain.

DEODAND (Latin, "to be given to God"): formerly, anything which had caused the death of a human being became forfeit to the sovereign or lord of the manor, and was to be sold for the benefit of the poor. The forfeiture was abolished by 9 & 10 Vict. c. 62 (1846).

D'EON, CHEVALIER, who had acted in a diplomatic capacity in several countries, and been minister plenipotentiary from France in London, was affirmed to be a *female*, at a trial at the King's Bench in 1771, in an action to recover wagers as to his sex. He subsequently wore female attire : but at his death he was proved to be a male.

DEPARTMENTS, see *France*.

DEPTFORD (near London). The hospital here was incorporated by Henry VIII., about 1614, and called the Trinity-house of Deptford Strond ; the brethren of Trinity-house hold their corporate rights by this hospital. On 4 April, 1581, Queen Elizabeth dined at Deptford on board the *Golden Hind*, the ship in which Drake had made his voyage round the globe. The Deptford victualling-office was burnt 16 Jan. 1748-9 ; the store-house, 2 Sept. 1758 ; the red-house, 26 Feb. 1761 ; and the king's-mill, 1 Dec. 1755. Peter the Great of Russia lived at Evelyn's-house, Say's-court, while learning ship-building, &c. in 1698.

DEPUTIES, CHAMBER OF, the title borne by the French legislative assembly, from the restoration of the Bourbons in 1814 till 1852 ; when it took the name of *Corps Legislatif*.

DERBY was made a royal burgh by Egbert (about 828). Alfred expelled the Danes from it and planted a colony in 880. His heroic daughter, Ethelfleda, again expelled the Danes in 918. William I. gave Derby to his illegitimate son, William Peveril. Lombe's silk-throwing machine was set up in 1718 ; and in 1756, Jedidiah Strutt invented the Derby ribbed stocking-frame. The young Pretender reached Derby, 3 Dec. 1745, and retreated thence soon after.*

DERBY ADMINISTRATIONS : the first formed after the resignation of lord John Russell, 21 Feb. 1852.

FIRST ADMINISTRATION, 27 Feb. 1852.

First lord of the treasury, Edward, earl of Derby. †
Lord chancellor, lord St. Leonards (previously sir Edward Sugden).

Phillips. 21 prisoners were indicted at Derby for the murder of several miners in the Red-soil mine ; but were acquitted on the ground that the mischief was not wilful, 23 March, 1834.

† Born 1799 ; M.P. for Stockbridge (as hon. E. G. S. Stanley) in 1820 ; chief secretary for Ireland, 1830-33 ; secretary for the colonies, 1833-4, and 1841-5 ; termed the "Rupert of debate" by Lord Lytton in "the New Timon," 1845 ; succeeded his father as earl of Derby, 30 June, 1851.

DERBY ADMINISTRATIONS, *continued*.

Chancellor of the duchy of Lancaster, William, earl of Devon; succeeded by colonel John Wilson Patten, June, 1867.
 Lord-lieutenant of Ireland, James, earl of Abercorn.

[The earl of Derby resigned through ill-health, 25 Feb. 1868; and Mr. Disraeli reconstituted the ministry; see *Disraeli*.]

DERBY DAY (see *Races*), generally (not always) the Wednesday in the week preceding Whitsunday, the second day of the Grand Spring meeting at Epsom.

DERRICKS are lofty, portable, crane-like structures, used on land and water for lifting enormous loads, and in some cases depositing them at an elevation. They are extensively used in the United States, and were introduced into England as floating derricks for raising sunken vessels, by their inventor, A. D. Bishop, in 1857.

DERRY (N. Ireland), a bishopric first planted at Ardfrath; thence translated to Maghera; and in 1158 to Derry. The cathedral, built in 1164, becoming ruinous, was rebuilt by a colony of Londoners, who settled here in the reign of James I. The see is valued in the king's books at 25*l.* sterling; but it has been one of the richest sees in Ireland. *Beatson*. The see of Raphoe was united to Derry, 1834; see *Bishops*; *Londonderry*.

DESIGN, SCHOOLS OF, established by government, began at Somerset-house, London, in 1837. In 1852 the head school was removed to Marlborough house, and became eventually "the department of science and art"; transferred to south Kensington in 1857. It is under the direction of the committee of council on education.

DESPARD'S CONSPIRACY. Colonel Edward Marcus Despard, a native of Ireland, Broughton, Francis, Graham, Macnamara, Wood, and Wratten, conspired to kill the king, and establish a republic, on the day of opening parliament, 16 Nov. 1802. Above 30 persons including soldiers were taken in custody; of those tried, 20 Jan. 1803, Despard and six others were executed, 21 Feb. He had been a distinguished officer under Nelson.

DETROIT (N. America), the oldest city in the west, was built by the French about 1670.

DETTINGEN (Bavaria), BATTLE OF, 16 June, 1743, between the British, Hanoverian, and Hessian army (52,000), commanded by king George II. of England and the earl of Stair, and the French army (60,000), under marshal Noailles and the duc de Grammont. The French passed a defile, which they should have merely guarded. The duc de Grammont with his cavalry charged the British foot with great fury, but was received with such intrepidity, that he was obliged to give way, and to repress the Maine, losing 5000 men.

DEVELOPMENT (or evolution). Lamarck, the naturalist (who died Dec. 1829), propounded a theory that all animals had been developed from "monads," living minute particles; see *Species* and *Vestiges*. Buffon held a similar doctrine. In 1827 Ernst von Baer of Königsberg demonstrated that all mammals are developed from a minute egg not a hundredth of an inch in diameter.

DEVIZES, Wilts; at Roundway Down, near here, sir William Waller and the parliamentarians were defeated, 13 July, 1643.

DEVONPORT, see *Dockyards* and *Plymouth*.

DEVONSHIRE, the country of the Damnonii or Dumnonii. Odun, earl of Devon, in 878, defeated the Danes, slew Ubbo or Hubba their chief, and captured his magic standard. A bishopric of Devonshire was founded in 909; see *Exeter*.

Richard de Redvers, first earl of *Devon*, son of Baldwin, sheriff of Devonshire, died 1137.
 William Courtenay, the present earl, is descended from Hugh (son of Robert de Courtenay and Mary de Redvers) the 10th earl, who died 1340.

William Cavendish, created first earl of *Devonshire*, 1618.
 William Cavendish (his grandson), created first duke of Devonshire, 1634, from him is descended William Cavendish, the present duke.

DEVONSHIRE AND PITT ADMINISTRATION, formed 16 Nov. 1756; dismissed 5 April, 1757.

First lord of the treasury, William, duke of Devonshire.
 Chancellor of the exchequer, hon. Henry Bilson Legge.
 Lord president, earl Granville.
 Privy seal, earl Gower.

Secretaries of state, earl of Holderness and Wm. Pitt (afterwards earl of Chatham, the virtual premier).
 George Grenville, earl of Halifax, dukes of Rutland and Grafton, earl of Rochfort, viscount Barrington, &c. The great seal in commission.

DEW, the modern theory respecting its formation was put forth by Dr. Wells in his treatise published in 1814.

DEWANGIRI, see *India*, 1865.

DIADEM, the band or fillet worn by the ancients instead of the crown, and consecrated to the gods. At first it was made of silk or wool, set with precious stones, and was tied

round the temples and forehead, the two ends being knotted behind, and let fall on the neck. Aurelian was the first Roman emperor who wore a diadem, 272. *Tillemont.*

DIALS. "The sun-dial of Ahaz," 713 B.C. (Isa. xxxviii. 8). Invented by Anaximander, 550 B.C. *Pliny.* The first dial of the sun seen at Rome was placed on the temple of Quirinus by L. Papirius Cursor, when time was divided into hours, 293 B.C. *Blair.* In the times of the emperors almost every palace and public building had a sun-dial. They were first set up in churches in A.D. 613. *Langlet.*

DIALYSIS, an important method of chemical analysis, depending on the different degrees of diffusibility of substances in liquids, was made known in 1861, by its discoverer, professor Thomas Graham, the Master of the Mint.

DIA-MAGNETISM, the property possessed by nearly all bodies of behaving differently to iron, when placed between two magnets. The phenomena, previously little known, were reduced to a law by Faraday in 1845.

DIAMOND, a hamlet, Armagh, N. Ireland, where was fought the "battle of the Diamond," 21 Sept. 1795, between the "Peep-o'-day-boys" and the "Defenders," and many of the latter were killed. To commemorate this conflict the first Orange Lodge was formed immediately after.

DIAMONDS were first brought to Europe from the East, where the mine of Sumbulpoor was the first known, and where the mines of Golconda, the realm of diamonds, were discovered in 1534. The mines of Brazil were discovered in 1723. From these last a diamond, weighing 1680 carats, or fourteen ounces, was sent to the court of Portugal, and was valued by Mr. Romeo de l'Isle at 224 millions; by others at 56 millions, and at 3½ millions; its true value (not being brilliant) was 400,000*l.*

The great **RUSSIAN** diamond weighs 193 carats, or 1 oz. 12 dwts. 4 gr. troy. The empress Catherine II. offered for it 104,166*l.* 13*s.* 4*d.* besides an annuity for life to the owner of 104*l.* 13*s.* 4*d.*, which was refused; but it was afterwards sold to Catherine's favourite, count Orloff, for the first-mentioned sum, without the annuity, and was by him presented to the empress on her birthday, 1772; it is now in the sceptre of Russia.

The **PITT** diamond weighed 136 carats, and after cutting, 106 carats: it was sold to the king of France for 125,000*l.* in 1720.

The **PIGOTT** diamond (bought by Mr. Pitt, grandfather of Wm. Pitt) was sold for 9500 guineas, 10 May, 1802.

The diamond called the **MOUNTAIN OF LIGHT,** or **KOHINOOR,** was found in the mines of Golconda, in 1550, and is said to have belonged in turn to Shah Jehan, Aurungzebe, Nadir Shah, the Afghan rulers, and afterwards to the Sikh chief Runjeet Singh. Upon the abdication of Dhuleep Singh, the last ruler of the Punjab, and the annexation of his dominions to the British empire, in 1849, the Kohinoor was surrendered to the queen. It was accordingly brought over and presented to her, 3 July, 1850. It was shown in the Great Exhibition, 1851. Its original weight was nearly 800 carats, but it was reduced by the unskilfulness of the artist, Hortensio Borghese, a Venetian, to 279 carats. Its shape and size resembled the pointed half (rose cut) of a small hen's egg. The value is scarcely computable, though two millions sterling have been mentioned as a justifiable price, if calculated by the scale employed in the trade. This diamond was re-cut in London in 1852, and now weighs 102½ carats.

The **SANGI** diamond, which belonged to Charles the Bold, duke of Burgundy, was bought by sir C. Jejeebhoy from the Demidoff family for 20,000*l.* in Feb. 1865.

A diamond, termed the **STAR OF THE SOUTH,** was brought from Brazil in 1855, weighing 254½ carats, half of which was lost by cutting.

INFLAMMABILITY OF DIAMONDS.

Boetius de Boot conjectured that the diamond was inflammable, 1609. *Boyle.*

Discovered that when exposed to a high temperature it gave an acrid vapour, in which a part of it was dissipated, 1673. *Boyle.*

Sir Isaac Newton concluded from its great refracting power, that it must be combustible, 1675.

Averani demonstrated, by concentrating the rays of the sun upon it, that the diamond was exhaled in vapour, and entirely disappeared, while other precious stones merely grow softer, 1695.

It has been ascertained by Guyton, Davy, and others, that although diamonds are the hardest of all known bodies, they yet contain nothing more than pure charcoal, or carbon. Diamonds were charred by the intense heat of the voltaic battery—by M. Dumas, in Paris, and by professor Faraday, in London, in 1848.

DIAMOND NECKLACE AFFAIR.—In 1785, Böhmer, the court jeweller of France, offered the queen, Marie Antoinette, a diamond necklace, for 64,000*l.* The queen desired the necklace, but feared the expense. The countess de la Motte (of the ancient house of Valois) forged the queen's signature, and by pretending that the queen had an attachment for him, persuaded the cardinal de Rohan, the queen's almoner, to conclude a bargain with the jeweller for the necklace for 56,000*l.* De la Motte thus obtained the necklace and made away with it. For this she was tried in 1786, and sentenced to be branded on the shoulders and imprisoned for life. She accused in vain the celebrated Italian adventurer, Cagliostro, of complicity in the affair, he being then intimate with the cardinal. She made her escape and came to London, where she was killed by falling from a window-sill, in attempting to escape an arrest for debt.—De Rohan was tried and acquitted, 14 April, 1786. The public in France at that time suspected the queen of being a party to the fraud. Talleyrand wrote at the time, that he should not be surprised if this miserable affair overturned the throne.

DIANA, TEMPLE OF (at Ephesus), accounted one of the seven wonders of the world, was built at the common charge of all the Asiatic states, 552 B.C.; the chief architect was Ctesiphon. Pliny says that 220 years were employed in completing it. It was 425 feet long, 225 broad, and was supported by 127 columns (60 feet high, each weighing 150 tons of Parian marble), furnished by so many kings. It was set on fire, on the night of Alexander's

nativity, by an obscure individual named Eratostratus, who confessed on the rack, that his sole motive was the desire of transmitting his name to future ages, 356 B.C. The temple was rebuilt, but again burnt by the Goths, in their naval invasion, A.D. 256 or 262.

DICE. The invention of dice is ascribed to Palamedes, of Greece, about 1244 B.C. The game of Tali and Tessera among the Romans was played with dice. Stow mentions two entertainments given by the city of London, at which dice were played.* Act to regulate the licences of makers, and the sale of dice, 9 Geo. IV. 1828.

DICHROÛSCOPE, an optical apparatus, described by the inventor, professor Dové of Berlin, in 1860, who intended it to represent interferences, spectra in different coloured lights, polarisation of light, &c.

DICTATORS were supreme and absolute magistrates of Rome, appointed to act in critical times. Titus Lartius Flavius, the first dictator, was appointed, 501 B.C. Caius Marcins Rutilius was the first plebeian dictator, 356 B.C. This office became odious by the usurpations of Sylla and Julius Caesar; and after the death of the latter, the Roman senate, on the motion of the consul Cæsar, passed a law for ever forbidding a dictator to exist in Rome, 44 B.C.

DICTIONARY. A standard dictionary of the Chinese language, containing about 40,000 characters, most of them hieroglyphic, or rude representations, somewhat like our signs of the zodiac, was perfected by Pa-out-she, who lived about 1100 B.C. *Morrison*; see *Encyclopædia*.

DIEPPE (N. France). This town was bombarded by an English fleet, under admiral Russell, and laid in ashes, July, 1694. It was again bombarded in 1794; and again, together with the town of Granville, by the British, 14 Sept. 1803.

"**DIES IRÆ**" ("Day of Wrath"), a Latin mediæval hymn on the day of judgment, is ascribed to various authors, amongst others to pope Gregory the Great (died about 604); St. Bernard (died 1153); but is generally considered to have been composed by Thomas of Celano (died 1255), and to have been used in the Roman service of the mass before 1385.

DIET OF THE GERMAN EMPIRE (in which the supreme court of authority of the empire may be said to have existed) was composed of three colleges: one of electors, one of princes, and one of imperial towns, and commenced with the edict of Charles IV. 1356; see *Golden Bull*; Würzburg (1180); Nuremberg (1467); Worms (1521); Spire (1529); Augsburg (1530); Ratisbon (1541); Frankfurt (1806, *et seq.*); and *Germany*.

The lady Margaret, his wife, did keepe her chamber to the same intent." The mayor restored to the king of Cyprus 50 marks which he had won from him, saying, "My lord and king, be not aggrieved; for I covet not your gold; but your play." &c. *Stow*.

parole of the day, given by Richard I. of England to his army at the battle of Gisors, in France, 20 Sept. 1198, when the French army was signally defeated. "*Dieu et mon droit*" appears to have been first assumed as a motto by Henry VI. (1422-1461); see *Semper Eadem*.

DIFFERENTIAL ENGINE, see *Calculating Machine*.

DIFFUSION OF GASES. In 1825, Döbereiner observed the transmission of a gas through a crack in a glass vessel, and professor Thomas Graham discovered the passage of gas through porous porcelain and other substances, and established the law in 1832, and to him we are indebted for other discoveries related to this subject; see *Atmolysis* and *Dialysis*.

DIFFUSION OF USEFUL KNOWLEDGE SOCIETY, which published a number of books relating to history, science, and literature, and a useful atlas, in a cheap form, ridiculed as the "Sixpenny Sciences," was established by Lord Brougham, Mr. William Tooke, Mr. Charles Knight, and others, and published its "Library" 1827-48. It patronised the publication of the Penny Magazine and the Penny Cyclopædia.—The Royal Institution of Great Britain was established in 1800, for "the Promotion, Diffusion, and Extension of Science and Useful Knowledge."

DIGEST. The first collection of Roman laws under this title was prepared by Alfenus Varus, the civilian, of Cremona, 66 B.C. *Quintil*. The "Digest," so called by way of eminence, was the collection made by order of the emperor Justinian, 529: it made the first part of the Roman law and the first volume of the civil law. Quotations from it are marked with a ff. *Pardon*.—The "Digest of Law" commissioners signed their first report 13 May, 1867, recommending the immediate preparation of a digest of the English common law, statute law, and judicial decisions.

DIGITS, any whole number under 10: 1, 2, &c., are the nine digits. Arithmetical figures were known to the Arabian Moors about 900; and were introduced by them into Spain in 1050, and thence into England about 1253. In astronomy, the digit is a measure used in the calculation of eclipses, and is the twelfth part of the luminary eclipsed; see *Figures*.

DILETTANTI, SOCIETY OF, established in 1734 by several noblemen and gentlemen (viscount Harcourt, lord Middlesex, duke of Dorset, &c.), who had travelled and who were desirous of encouraging a taste for the fine arts in Great Britain. The society published, or aided in publishing, Stuart's Athens (1762-1816), Chandler's Travels (1775-6), and several other finely illustrated works, having assisted the authors. The members dine together from time to time at the Thatched-house tavern, St. James's.

DIMITY, see *Damietta*.

DIocese. The first division of the Roman Empire into dioceses, at that period civil governments, is ascribed to Constantine, 323; but Strabo remarks that the Romans had the departments called dioceses long before. In England the principal dioceses are coeval with the establishment of Christianity; of 28 dioceses, 20 are suffragan to the diocese of Canterbury, and six to that of York; see *Bishops*, and the sees severally.

DIocLETIAN ERA (called also the era of Martyrs, on account of the persecution in his reign) was used by Christian writers until the introduction of the Christian era in the 6th century, and is still employed by the Abyssinians and Copts. It dates from the day on which Diocletian was proclaimed emperor at Chalcedon, 29 Aug. 284.

DIOPTRIC SYSTEM (from the Greek *dia*, through, and *optomai*, I see), an arrangement of lenses for condensing light in lighthouses, devised by Fresnel, about 1819, based on the discoveries of Buffon, Condorcet, Brewster, and others; see *Lighthouses*.

DIORAMA. This species of exhibition, which had long been admired at Paris, was first opened in London by MM. Bouton and Daguerre, 29 Sept. 1823. It was not successful commercially, and was sold in 1848. The building in Regent's Park was purchased by sir S. M. Peto, in 1855, to be used as a Baptist chapel.

DIPHtherIA (from the Greek *diphthera*, a membrane), a disease resembling croup which has the essential character of developing a false membrane on the mucous membrane connected with the throat. It was named *diphtheritis* by Brétonneau of Tours in 1820. From its prevalence in Boulogne, it has been termed the Boulogne sore-throat; many persons were affected with it in England at the beginning of 1858.

DIPLOMACY, the art of managing the relations of foreign states by means of ambassadors, envoys, consuls, chargés d'affaires, &c.; see *Ambassadors* and *Consuls*. New regulations for the British diplomatic service were issued 5 Sept. 1862.

DIPLOMATICS, the foreign term for the science of Palæography or ancient writings. Valuable works on this subject have been compiled by Mabillon (1681), De Vaines (1774), Astle (1781), De Wailly (1838), and other antiquaries.

"DIRECTORY FOR THE PUBLIC WORSHIP OF GOD" was drawn up at the instance of

the parliament by an assembly of divines at Westminster in 1644, after the suppression of the Book of Common Prayer. The general hints given were to be managed with discretion; for the Directory prescribed no form of prayer or manner of external worship, and enjoined the people to make no responses except *Amen*. It was adopted by the parliament of Scotland in 1645, and many of its regulations are still observed.

DIRECTORY, THE FRENCH, established by the constitution of 22 Aug. 1795, and nominated 1 Nov. was composed of five members (MM. L  peaux, Letourneur, Rewbel, Barras, and Carnot). It ruled in conjunction with two chambers, the Council of Ancients and Council of Five Hundred (*which see*), at the revolution of the 18th of Brumaire (9 Nov. 1799). It was deposed by Bonaparte, who, with Cambac  res and Lebrun, assumed the government as three consuls, himself the first, 13 Dec. 1799; see *Consuls*.

DIRECTORY, the first LONDON, is said to have been printed in 1677. The "Post-office Directory" first appeared in 1800.

DISCIPLINE, ecclesiastical, originally conducted spiritually according to the divine commands in *Matt. xviii. 15, 1 Cor. v., 2 Thess. iii. 6*, and other texts, was gradually changed to a temporal character, as it now appears in the Roman and Greek churches. The "First Book of Discipline" of the presbyterian church of Scotland was drawn up by John Knox and four ministers in Jan. 1560-1. The more important "Second Book" was prepared with great care in 1578 by Andrew Melville and a committee of the leading members of the general assembly. It lays down a thoroughly presbyterian form of government, defines the position of the ecclesiastical and civil powers, &c.

DISCOUNT, see under *Bank of England*.

DISPENSARIES, to supply the poor with medical advice and medicines, began in London with the Royal General Dispensary, established in St. Bartholomew's Close, in 1770. It relieved about 20,000 persons in 1861; about 17,000 in 1866. *Low's Charities*.

DISPENSATIONS, ecclesiastical, were first granted by pope Innocent III. in 1200. These exemptions from the discipline of the church, with indulgences, absolutions, &c., led eventually to the Reformation in Germany in 1517, and in England in 1534, *et seq.*

DISPENSING POWER OF THE CROWN (for setting aside laws), asserted by some of our sovereigns, especially by Charles II. (in 1672 for the relief of nonconformists) and by James II. in 1686, was abolished by the bill of rights, 1689. It has been on certain occasions exercised, as in the case of embargoes upon ships, the Bank Charter act, &c.; see *Indemnity*.

ISRAELI ADMINISTRATION* on the resignation of the earl of Derby through ill-health, 25 Feb., Mr. Disraeli reconstituted the ministry, 29 Feb. 1868; see *Derby Administrations*, III.

First lord of treasury, Benjamin Disraeli.
Lord chancellor, Hugh MacCalmont, lord Cairns.
Lord president of council, John, duke of Marlborough.
Lord privy seal, James, earl of Malmesbury.
Secretaries—home, Gathorne Hardy;—*foreign*, Edward, lord Stanley;—*colonies*, Richard, duke of Buckingham and Chandos;—*war*, sir John S. Pakington;—*India*, Sir Stafford Henry Northcote.
Chancellor of exchequer, George Ward Hunt.
First lord of admiralty, Henry Thomas L. Corry.
Chief commissioner of works, lord John Manners.

President of board of trade, Charles Henry, duke of Richmond.
Chief secretary for Ireland, Richard, earl of Mayo.
President of poor-law board, Wm. Reginald, earl of Devon.

The above form the cabinet.
Postmaster-general, James, duke of Montrose.
Lord great chamberlain, Orlando, earl of Bradford.
Chancellor of duchy of Lancaster, col. John Wilson Patten.
Lord lieutenant of Ireland, James, earl of Abercorn.

DISSECTION, see *Anatomy*.

DISSENTERS, the modern name of the *Puritans* and *Nonconformists* (*which see*). In 1851, in London, the number of chapels, meeting-houses, &c., for all classes of dissenters amounted to more than 554. (The Church of England had 458; Roman Catholics, 35.) The great act (9 Geo. IV. c. 17) for the relief of dissenters from civil and religious disabilities was passed 9 May, 1828. By this act, called the Corporation and Test Repeal act, so much of the several acts of preceding reigns as imposed the necessity of receiving the sacrament of the Lord's Supper as a qualification for certain offices, &c., was repealed. By 6 & 7 Will. IV. c. 85 (1836), dissenters acquired the right of solemnising marriages at their own chapels or at a registry office; see *Worship*.

DISTAFF (or Rock) the staff to which flax or any substance to be spun is fastened. The art of spinning with it at the small wheel, first taught to English women by Anthony Bonavisa, an Italian. *Stow*. St. Distaff's or Rock day, was formerly the first free day after the Epiphany (6th Jan.) because the Christmas holidays were over and women's work was resumed.

* Benjamin Disraeli (son of Isaac Disraeli, author of the "Curiosities of Literature," &c.,) born 21 Dec., 1805; published "Vivian Grey," 1825; M.P. for Maidstone, 1837-41; Shrewsbury, 1841-7; Bucks, 1847-68; Chancellor of Exchequer (see *Derby administrations*), Feb. 1852; Feb. 1858; July, 1866.

DISTILLATION, and the various processes dependent on it, are believed to have been introduced into Europe by the Moors about 1150; see *Alcohol, Brandy*. The distillation of spirituous liquors was in practice in Great Britain in the 16th century. *Burns*. The processes were improved by Adam of Montpellier in 1801. M. Payen's work (1861) contains the most recent improvements. An act to prevent the use of stills by unlicensed persons was passed in 1846. 118 licences to distillers were granted in the year ending 31 March, 1858, for the United Kingdom.

DITCH, see *Expedition*.

DIVINATION was forbidden to the Jews, B.C. 1451. (*Deut.* xviii. 9.) It was common among their neighbours: and is described by *Ezekiel* (xxi. 21) 493 B.C.

DIVINE RIGHT OF KINGS, the absolute and unqualified claim of sovereigns to the obedience of their subjects, a doctrine totally foreign to the genius of the English constitution, was defended by many persons of otherwise opposite opinions, *e.g.*, by Hobbes the free-thinker (1642), by Salmاسius (1640), by sir Robert Filmer (about 1653), in his *Patriarcha*, published in 1680, and by the High Church party generally about 1714; but opposed by Milton (1651), Algernon Sydney, and others.

DIVING-BELL (first mentioned, though obscurely, by Aristotle, about 325 B.C.) was used in Europe about A.D. 1509. It is said to have been used on the coast of Mull, in searching for the wreck of part of the Spanish Armada, before 1662. Halley (about 1721) greatly improved this machine, and was, it is said, the first who, by means of a diving-bell, set his foot on the ground at the bottom of the sea. Smeaton made use of the diving-bell in improving Ramsgate harbour, 1779-88. Mr. Spalding and his assistants going down in a diving-bell in Ireland were drowned, 1 June, 1783. The *Royal George* man-of-war, which was sunk off Portsmouth in 1782, was first surveyed by means of a diving-bell in May, 1817. Latterly it has been employed in submarine surveys. The first diving-belle was the wife of captain Morris, at Plymouth, who descended in one a few years ago.

DIVINING ROD (*virgula divina, baculatorius*), formed of wood or metal, was formerly believed, even by educated persons, to have the property of indicating the position of minerals and springs of water. Instances were alleged in 1851 by Dr. H. Mayo, in his work on "Popular Superstitions."

DIVINITY, see *Theology*.

DIVORCE was permitted by the law of Moses (*Deut.* xxiv. 1), 1451 B.C., but forbidden by Christ except for adultery (*Matt.* v. 31, 32). It was put in practice by Spurius Carvilius Ruga at Rome, 234 B.C. At this time morals were so debased that 3000 prosecutions for adultery were enrolled. Divorces are of two kinds; one, *à vinculo matrimonii* (total divorce); the other, *à mensâ et thoro* (from board and bed). Divorces were attempted to be made of more easy obtainment in England in 1539.

By 20 & 21 Vict. c. 85, the jurisdiction of the ecclesiastical courts respecting divorce, &c., was abolished, and the Divorce and Matrimonial		Sir Cresswell Cresswell died in July; sir James P. Wilde was appointed his successor in Sept.	1863

DIZIER, Sr. (N.E. France). Here a siege was sustained for six weeks against the army of the emperor Charles V., 1544. The allies here defeated the French under Napoleon, 27 Jan. and 26 March, 1814.

DOBRUDSCHA, the N.E. corner of Bulgaria; in 1854, the scene of the earlier incidents of the Russo-Turkish war (*which see*).

DOCTEÆ, a sect of the 1st century, said to have held that Jesus Christ was God, but that his body was an appearance, not a reality.

DOCKS OF ENGLAND. The following are the principal commercial docks:—

Commercial Docks, Rotherhithe, originated about 1660.	London Docks were commenced 26 June, 1802, and opened 20 Jan. 1805.
West India Docks commenced 3 Feb. 1800; opened 27 Aug. 1802, when the "Henry Addington," West Indian, first entered them, decorated with the colours of the different nations of Europe.	East India Docks commenced 1803; opened 4 Aug. 1806.
	St. Katherine's Docks began 3 May, 1827; and 2500 men were daily employed on them until they were opened, 25 Oct. 1828.

DOCKS OF ENGLAND, *continued.*

Victoria Docks (in Plaistow marshes) completed and opened in 1855.
Magnificent docks at Liverpool and Birkenhead erected 1810-57.
Millwall Docks, near London, formally opened, 14 March, 1868.

ROYAL DOCK-YARDS.

Woolwich was an extensive one in 1509.
Deptford dock-yard founded about 1513.
Chatham dock-yard was founded by queen Elizabeth.
Portsmouth dock-yard established by Henry VIII.
Plymouth dock, now Devonport, about 1689. Great fire here, by which the *Talavera*, of 74 guns, the

Imogene frigate, of 28 guns, and immense stores, were destroyed; the relics and figure heads of the favourite ships of Boscawen, Rodney, Duncan, and other naval heroes, which were preserved in a naval museum, were also burnt: the loss was estimated at 200,000*l.*, 27 Sept. 1840.

Sheerness dock-yard was built by Charles II. after the insult of the Dutch, who burnt our men-of-war at Chatham in 1667. A fire occurred at Sheerness dock-yard, on board the *Camperdown*, 9 Oct. 1840.

Milford-Haven dock-yard, 1790; removed to Pembroke in 1814.
The Dock-yard battalions have been named since 1847.

DOCTOR. Doctor of the Church was a title given to Athanasius, Basil, Gregory Nazianzen, and Chrysostom in the Greek church; and to Jerome, Augustin, Ambrose, and Gregory the Great in the Romish church, 373, *et seq.* In later times the title has been conferred on certain persons with distinguishing epithets: viz. Thomas Aquinas (Angelicus), Bonaventura (Seraphicus), Alexander de Hales (Irrefragabilis), Duns Scotus (Subtilis), Roger Bacon (Mirabilis), William Occam (Singularis), Joseph Gerson (Christianissimus), Thomas Bradwardine (Profundus), and so on. *Doctor of the law*, was a title of honour among the Jews. The degree of doctor was conferred in England, 8 John, 1207. *Spelman.* Some give it an earlier date, referring it to the time of the Venerable Bede and John de Beverley, the former of whom, it is said, was the first that obtained the degree at Cambridge about 725.

DOCTORS' COMMONS, the college for the professors of civil and canon law residing in London; the name of commons is given to it from the civilians communing together, as in other colleges. It was founded by Dr. Henry Hervie. In February, 1568, Dr. Henry Hervie, dean of the arches and master of Trinity-hall (a seminary founded at Cambridge chiefly for the study of the civil and canon laws) procured from the dean and chapter of the diocese of London a lease of Montjoy-house and buildings in the parish of St. Bene't, Paul's wharf, for the accommodation of the society. Other courts being held here, the whole place received the appellation of "DOCTORS' COMMONS." The original college was destroyed in the great fire of 1666; in 1672 it was rebuilt on the old site. After the great fire, and until 1672, the society held its courts at Exeter house in the Strand. It was incorporated by charter in June, 1768. *Cooté.* The buildings were pulled down in April, 1867, for a new street. Till 1857 the causes taken cognisance of here were blasphemy, divorces, bastardy, adultery, penance, tithes, mortuaries, probate of wills, &c.; see *Ecclesiastical Courts, Civil Law, &c.*

DOCTRINAIRES, a name given since 1814 to a class of politicians in France (Guizot, duc de Broglie and others), who upheld the constitutional principles, as opposed to arbitrary monarchical power. The party came into office in 1830 under Louis Philippe, and fell with him in 1848. The term has been applied in this country to the writers in the "Westminster Review," (1824, *et seq.*), Bentham, Molesworth, and others.

DODONA, Epirus. The temple of Jupiter here, renowned for its ancient oracle, delivered by the sound of wind in a grove of trees, was destroyed by the Ætoliens, 219 B.C.

DODSON'S ACT (brought forward by Mr. John G. Dodson, and passed 1 Aug. 1861) provides that votes for electing members of parliament for the universities may be recorded by means of polling papers.

DOG. Buffon considers the shepherd's dog as "the root of the tree," assigning as his reason that it possesses from nature the greatest share of instinct. The Irish wolf-dog is supposed to be the earliest dog known in Europe, if Irish writers be correct. Dr. Gall mentions that a dog was taken from Vienna to England; that it escaped to Dover, got on board a vessel, landed at Calais, and, after accompanying a gentleman to Mentz, returned to Vienna. Statute against dog stealing, 10 Geo. III. 1770. Dog-tax imposed, 1796, and again in 1808; in 1866 12*s.* a year realised 219,313*l.* On 29 March, 1867, the assessed taxes on dogs were repealed, and an annual excise duty of 5*s.* was imposed on all dogs more than six months old, to begin on 5 April following. The employment of dogs in drawing carts, &c., in London was abolished, 1839; in the United Kingdom, 1854. *Dog shows* are frequently held in London in 1861; since 1862 at the Agricultural Hall, Islington. A "Dogs' temporary home," Hollingworth-street, London, N., was opened in 1861. About 2200 animals have been sheltered in a year.

DOG-STAR. The canicular or dog-days now commence on 3 July and end 11 Aug. The rising and setting of Sirius or the dog-star with the sun has been erroneously regarded as the cause of excessive heat and of consequent calamities.

DOGE or DUKE: Venice was first governed by a doge named Anafesto Paululio, or Paoluccio, 697; see *Venice*. The Genoese chose their first doge, Simone Boccanegra, in 1339. *Muralori*.

DOGGERBANK (German Ocean). Here a gallant but indecisive battle was fought between the British, under admiral sir Hyde Parker, and the Dutch, 5 Aug. 1781.

DOGGET'S COAT AND BADGE. Thomas Dogget, an eminent actor of Drury-lane, at the first anniversary of the accession to the throne of George I., 1 Aug. 1715, gave a waterman's coat and silver badge to be rowed for by six young watermen in honour of the day, and bequeathed at his death a sum of money, the interest whereof was to be appropriated annually afterwards.

DOIT. A silver Scottish penny, of which twelve were equal to a penny sterling. Some of those struck by Charles I. and II. are in the cabinets of the curious. The circulation of "doydekyns" (small Dutch coins) was prohibited by statute in 1415.

DOLLAR, the German *thaler*. Stamped Spanish dollars were issued from the Mint in March 1797, but called in Oct. following. The dollar is the principal silver coin in the United States of North America.

DOM-BOC or DOOM-BOOK (*Liber Judiciales*), the code of law compiled by king Alfred from the West-Saxon collection of Ina and other sources. Alfred reigned from 871 to 901.

DOME'S-DAY BOOK or DOOM'S-DAY (*Liber Censualis Anglia*), a book of the general survey of England, commenced in the reign of William I. 1080 (some say 1085), and completed in 1086. It was intended to be a register whereby to determine the right in the tenure of estates; and from it the question whether lands be ancient demesne or not, is sometimes still decided. The book is still preserved in the Chapter-house, Westminster-abbey, fair and legible, consisting of two volumes, a greater and lesser, wherein all the counties of England, except Northumberland, Durham, Westmorland, and Cumberland, are surveyed. "This Dome's-day book was the tax-book of Kinge William." *Camden*. It was printed in four vols. folio, with introductions, &c., 1783—1816. The taxes were levied according to this survey till 13 Hen. VIII., 1522, when a more accurate survey was taken, called by the people the New Doom's-Day Book. Photo-zinco-graphic copies of various counties have been published since 1861.

DOMINGO, St., see *Hayti*.

DOMINICA (W. Indies), discovered by Columbus in his second voyage, on Sunday, 3 Nov. 1493. It was taken by the British in 1761, and was confirmed to them by the peace of 1763. The French took Dominica in 1778, but restored it at the subsequent peace in 1783. Their Admiral Villeneuve ineffectually attacked it in 1805. It suffered great damage by a hurricane in 1806.

DOMINICAL LETTER, noting the Lord's day, or Sunday. The seven days of the week, reckoned as beginning on the 1 Jan., are designated by the first seven letters of the alphabet, A (1 Jan.), B, C, D, E, F, G; and the one of these which denotes Sunday is the Dominical letter. If the year begin on Sunday, A is the Dominical letter; if on Monday, G; on Tuesday, F; and so on. Generally to find the Dominical letter call New Year's day A, the next B, and go on thus until you come to the first Sunday, and the letter that answers to it is the Dominical letter; in leap years count two letters. The letters for 1868, E, D; 1869, C; 1870, B; 1871, A.

DOMINICAN REPUBLIC, see *Hayti*, 1844—61.

DOMINICANS, formerly a powerful religious order (called in France, Jacobins, and in England *Black friars*), founded to put down the Albigenes and other heretics by St. Dominic, approved by Innocent III. in 1215, and confirmed by Honorius III. in 1216, under St. Austin's rules and the founder's particular constitution. In 1276 the corporation of London gave the Dominicans two streets near the Thames, where they erected a large convent, whence that part is still called Blackfriars. A Dominican establishment at Haverstock hill near London was consecrated 10 Oct. 1867.

DONATISTS, an ancient puritanical sect, formed about 313—318, by an African bishop, Donatus, who was jealous of Cæcilian, bishop of Carthage: it became extinct in the 7th century. The Donatists held that the Father was above the Son, and the Son above the Holy Ghost. Their discipline was severe, and those who joined them were re-baptized.

DONAUWERTH (Bavaria). Here the French and Bavarians were defeated, by the Duke of Marlborough, after a severe conflict, 2 July, 1704.

DONCASTER (Yorkshire), the Roman *Danum*, the Saxon *Donne ceastre*. The races here (held annually in September) began about 1703; see *Races*.

DONKEY SHOW. An exhibition of donkeys and mules belonging to the upper and lower classes took place at the Agricultural Hall, Islington, 9 Aug. 1864.

DON QUIXOTE, by Saavedra Miguel de Cervantes (born 1547; died 1616). The first part of this work appeared in 1605, and the second part in 1608. It is said that upwards of 12,000 copies of the first part were circulated before the second was printed. *Watts*.

DOOM'S-DAY BOOK, see *Dome's-day Book*. **DORADO**, see *El Dorado*.

DORCHESTER (Oxfordshire) was once a bishopric, founded about 636. The first bishop Birinus was called the apostle of the West Saxons (*which see*). He was succeeded in 650 by Agilbert. In 659 the see was divided by the king. Dorchester remained with Agilbert, and Wina, established at Winchester, in 660 obtained the whole. The see of Dorchester was revived about 764. In 1072 the bishop Remigius de Feschamp removed the see to Lincoln. Much excitement was caused by six labourers of Dorchester being sentenced to transportation 17 March, 1834, for administering illegal oaths.

DORCHESTER (Dorsetshire), the Roman *Durnovaria*, the Saxon *Dornceaster*. Here are found remains of a Roman theatre and of a British camp. Here Jefferies held his "bloody assize" (after Monmouth's rebellion) 3 Sept. 1685.

DORIANS, Greeks, who claimed descent from Dorus, son of Hellen; see *Greecce*. The return of the Dorians, named Heraclidæ, to the Peloponnesus is dated 1104 B.C. They sent out many colonies. To them we owe the Doric architecture, the second of the five orders. It is lighter than the Tuscan.

DORMANS (N. E. France). The Huguenots and their allies, under Montmorency, were here defeated by the duke of Guise, 10 Oct. 1575.

DORT, or **DORDRECHT**, an ancient town in Holland. Here happened an inundation of the Meuse in 1421, through the breaking down the dykes. In the territory of Dordrecht 10,000 persons perished; and more than 100,000 round Dullart, in Friesland, and in Zealand. The independence of the thirteen provinces was declared here in 1572, when William Prince of Orange was made stadtholder. A Protestant synod was held at Dort in 1618 and 1619; to which deputies were sent from England, and the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Arminius, principally upon points of justification and grace. This synod condemned the tenets of Arminius.

DORYLÆUM (Phrygia). Soliman, the Turkish Sultan of Iconium, having retired from the defence of Nicæa his capital, was here defeated with great loss by the crusaders 1 July, 1097. *Michaud*.

DOUAY (N. France), the Roman Duacum, was taken from the Flemings by Philip the Fair in 1297; restored by Charles V. in 1368. It reverted to Spain, from whom it was taken by Louis XIV. in 1667. It was captured by the duke of Marlborough in 1710; and retaken by the French 8 Sept. 1712. This town gives its name to the Roman Catholic edition of the Bible in use, by the consent of the popes, as the only authorised English version; its text is explained by notes of Roman divines. The Old Testament was first published by the English college at Douay in 1609; the New had been published at Rheims in 1582. The English college for Roman Catholics was founded in 1568 by William Allen, afterwards cardinal. *Dodd*.

DOURO, a river (separating Spain and Portugal), which, after a desperate struggle between Wellington's advanced guard under Hill, and the French under Soult, was successfully crossed by the former on 12 May, 1809. So sudden was the movement, that Wellington at 4 o'clock sat down to the dinner prepared for the French general. *Alison*.

DOVER (Kent), the Roman Dubris. Near here Julius Cæsar is said to have first landed in England, Aug. 26, 55 B.C., and its original castle to have been built by him soon after; but this is disputed. The works were strengthened by Alfred and succeeding kings, and rebuilt by Henry II. The earliest named constable is Leopoldus de Bertie, in the reign of Ethelred II., followed by earl Godwin, Odo the brother of William I., &c. In modern times, this office, and that of warden of the Cinque Ports, have been frequently conferred on the prime minister for the time being,—*e. g.*, lord North, Mr. Pitt, lord Liverpool, and the duke of Wellington. The earl of Dalhousie, late governor-general for India, appointed in Jan. 1853, died Dec. 19, 1860. Lord Palmerston, appointed constable March, 1861, died Oct. 18, 1865. Earl Granville appointed Dec. 1865.

DOWER, the gifts of a husband to a wife before marriage (*Genesis xxxiv. 12*). The portion of a man's lands or tenements which his wife enjoys for life after her husband's death. By the law of king Edmund, a widow was entitled to a moiety of her husband's lands or tenements for her life, 941. The widows of traitors, but not those of felons, are debarred their dower by statute 5 Edw. VI. 1551. By the Dower act passed in 1833, the power of the wife over her dower was much diminished.

DOWN (N.E. Ireland). An ancient see, first bishop St. Cailan, in 499. At the instance of John de Courcy, the conqueror of Ulster, the cathedral, consecrated to the Trinity, was rededicated to St. Patrick about 1183. The sepulchre of St. Patrick (buried here in 493, in the abbey of Saul, founded by himself) brought this place into great repute. The see was united with that of Connor in 1441 (see *Connor*); and the see of Dromore was united to both by the Irish Church Temporalities act, 3 & 4 Will. IV. c. 37, Aug. 14, 1833. The cathedral of Downpatrick was destroyed by lord Grey, lord deputy of Ireland; for this and other crimes he was impeached and beheaded in 1541. *Beatson*.

DOWNES, see *Naval Battles*, 1652-3.

DRACO'S LAWS (enacted by him when archon of Athens, 621 B.C.), on account of their severity, were said to be written in blood. Idleness was punished as severely as murder. This code was set aside by Solon's, 594 B.C.

DRAFTS (or cheques). In 1856, drafts crossed with a banker's name were made payable only to or through the same banker. This act was passed in consequence of a decision to the contrary in the case of *Carlou v. Ireland*, Dec. 12, 1855. In 1858 the crossing was made a material part of a cheque, but bankers are not held responsible when the crossing does not plainly appear, and a penny stamp was ordered to be affixed to drafts on bankers, commencing May 25. In the case of *Simmonds v. Taylor*, May, 1858, it had been decided that the crossing formed no part of the draft. The crossing had been erased, and the money paid to the holder of the draft, who had stolen it.

DRAGONNADES, the fierce persecution of the Protestants in the reign of Louis XIV. by dragoons, by the minister Louvois, 1684, was consummated by the revocation of Henry IVth's edict of Nantes, 22 Oct. 1685, which drove 50,000 families from France. *Durray*.

DRAGOONS. The name is supposed to have been derived from dragon, "because mounted on horseback with lighted match he seemeth like a fiery dragon." *Meyrick*. The **DRACONARI** were horse-soldiers, who bore dragons for ensigns. The first regiment of *dragoons* was raised in England, it is believed, in 1681. "King Charles II. at the Restoration established a regiment of Life Guards, to which he added a regiment of *Horse Guards*, and two regiments of Foot Guards; and a third regiment of Foot Guards was raised at Coldstream, on the borders of Scotland. *Captain Curling*.

DRAINAGE OF LAND, in England, is of early date—remains of British works being still extant in the Fens district. The truly national works began in 1621, when Cornelius Vermuyden, the Dutch engineer, was invited to England. Amidst much opposition, he and his successors drained the districts termed the Great Levels; see *Levels*. In the present century great progress has been made in drainage. In 1861 was passed "an act to amend the laws relative to the drainage of land for agricultural purposes"; see *Sewers*.

DRAKE'S CIRCUMNAVIGATION. Sir Francis Drake sailed from Falmouth 13 Dec. 1577, circumnavigated the globe, and returned to England after many perils, 3 Nov. 1580. He was vice-admiral under lord Howard, high admiral of England, in the conflict with the Spanish Armada, 19 July, 1588. He died at Panama, 28 Jan. 1596, during an expedition against the Spaniards.

DRAMA, ANCIENT. Both tragedy and comedy began with the Greeks.

The first comedy performed at <i>Athens</i> , by Susrion and Dolon, on a movable scaffold . . . B.C.	562	Anaxandrides first dramatic poet who introduced intrigues upon the stage; he composed about 100 plays, of which 10 obtained the prize; he died . . . B.C.	340
The chorus introduced . . .	556	Plays were represented by Livius Andronicus, who, abandoning satires, wrote plays with a regular and connected plot. He gave singing and dancing to different performers; he danced himself, and gave the singing to a younger exhibitor . . .	240
Tragedy first represented at Athens by Thespis, on a waggon (<i>Arund. Marb.</i>) . . .	536	The greatest ancient dramatic writers were—Greek, <i>Æschylus</i> , <i>Sophocles</i> , <i>Euripides</i> (tragedy), and <i>Aristophanes</i> (comedy), 525—427; Latin, <i>Plautus</i> and <i>Terence</i> (comedy), 184—160; <i>Seneca</i> (tragedy). . . 7 B.C.—A.D.	65
Thespis of Icaria, the inventor of tragedy, performed at Athens "Alcesteis," and was rewarded with a goat (<i>Pliny</i>). . . .	"		
<i>Æschylus</i> introduced dresses and a stage . . .	486		
The drama was first introduced into <i>Rome</i> on occasion of a plague which raged during the consulate of C. Sulpicius Peticus and C. Licinius Stolo: the magistrates, to appease the deities, instituted games called the "Scenici;" actors from <i>Etruria</i> danced, after the <i>Tuscan</i> manner, to the flute . . .	364		

DRAMA, MODERN, arose early in the rude attempts of minstrels and buffoons at fairs in

France, Italy, and England. Stories from the Bible, represented by the priests, were the origin of sacred comedy. *Warton.*

Gregory Nazianzen, an early father of the Church, is said to have constructed a drama on the Passion of Christ, to counteract the profanities of the heathen stage, about . . .	364	A licence granted to Shakespeare and others . . .	1603
Fitzstephen, in his "Life of Thomas à Becket," asserts that—"London had for its theatrical exhibitions holy plays, and the representation of miracles, wrought by holy confessors;" he died about . . .	1190	Plays opposed by the Puritans in 1633, suspended until the Restoration, in . . .	1660
The Chester Mysteries* performed about . . .	1270	Two companies of regular performers were licensed by Charles II., Killigrew's and sir William Davenant's. The first was at the Bull, Vere-street, Clare-market, which was immediately afterwards removed to Drury-lane; the other in Dorset-gardens, 1662. Till this time, boys performed women's parts; but Mrs. Coleman (the first female on the stage) had performed <i>Ianthe</i> , in Davenant's "Siege of Rhodes," in . . .	1656
Plays performed at Clerkenwell by the parish clerks, and "miracles" represented in the fields, in . . .	1397	Sir William Davenant introduced operas, and both companies united, 1684, and continued together till 1694, when a schism under Betterton led to the opening of a theatre in Lincoln's-inn-fields, the parent of Covent-garden . . .	1695
Allegorical characters introduced in the temp. Henry VI.		Act for the revision of plays and for licensing them previously to being performed . . .	1737
Individual characters temp. Henry VII.		Author's Dramatic Copyright Protection act, 3 Will. IV. c. 15 . . .	June, 1833
Skelton and others wrote "Moralities" about . . .	1500	See <i>Theatres, Covent-garden, Drury-lane, and Copyright.</i>	
The first regular drama acted in Europe was the "Sophonisba" of Trissino, at Rome, in the presence of pope Leo X. (<i>Voltaire</i>) . . .	1515		
First royal licence for the drama in England (to master Burbage, and four others, servants to the earl of Leicester) to act plays at the Globe, Bankside . . .	1574		
Shakespeare began to write about . . .	1590		

DRAMATIC COLLEGE, for the benefit of distressed actors and their children, was proposed 21 July, 1858, at the Princess's theatre, by Messrs. C. Dickens, Thackeray, C. Kean, B. Webster, and others. Mr. Henry Dodd's offer of land and money, with certain stipulations, was declined in 1859. The first stone of the building was laid by the Prince Consort, 1 June, 1860; and on the 29 Sept. 1862, seven annuitants were installed. The central hall was opened by the Prince of Wales, 5 June, 1865. The Queen is the patron. The viceroy of Egypt was present at the annual fête at the Crystal Palace, July 1867, and gave 500*l.* to the college.

DRAPIER'S LETTERS, by dean Swift, published in 1724, against *Wood's Halfpence* (*which see*).

DREADNOUGHT. In this ship, which was in the battle of Trafalgar, 21 Oct. 1805, was established a hospital for the seamen of all nations, by the seamen's hospital society established 1831. The removal of the men to Greenwich hospital was proposed in 1867.

DREAMS are mentioned in Scripture, *e.g.*, Joseph's and Pharaoh's, 1715 B.C. (*Gen.* xxxvii. and xli.), and Nebuchadnezzar's, 603 and 570 B.C. (*Daniel* ii. and iv.). The first attempt to interpret dreams and omens is ascribed to Amphietyon of Athens, 1497 B.C. A remarkable modern instance is attested in the life of Thomas, lord Lyttelton.

Lord Lyttelton dreamt that a young female, dressed in white, solemnly warned him of his dissolution in three days from that time. On the third day his lordship had a party to spend the evening with him, and about the time predicted, he observed to the company present, that "he believed he should jockey the ghost;" but in a few minutes afterwards he was seized with a sudden faintness, carried to bed, and rose no more. He died in 1779, aged 35. Some assert that he committed suicide.

DRED SCOTT CASE; see *United States*, 1857.

DREPANUM (Sicily). Near this place the Carthaginian admiral Aldherbal totally defeated the Roman fleet under Publius Claudius, 249 B.C.

DRESDEN, termed the German Florence, became the capital of Saxony in 1548.†

Bombarded in vain by Frederick . . .	July, 1760	An insurrection on 3 May; suppressed 6 May, 1849	

* The Coventry, Chester, Townley, and other mysteries have been printed during the present century.
† The fine porcelain ware, Dresden china, was invented by M. Boettcher, at the time an apothecary's boy, about 1709. A costly service, each piece exquisitely painted, with battles, &c., was presented to the duke of Wellington by the king of Prussia, in 1816.

‡ The allies, 200,000 strong, attacked Napoleon in his position at Dresden, and the event had nearly proved fatal to them, but for an error in the conduct of general Vandamme. They were defeated with dreadful loss, and were obliged to retreat into Bohemia; but Vandamme pursuing them too far, his division was cut to pieces, and himself and all his staff made prisoners. In this battle, general Moreau received his mortal wound, while in conversation with the emperor of Russia.

DRESS. The attire of the Hebrew women is censured in *Isaiah* iii., about 760 B.C. Excess in dress among the early Romans was restrained by sumptuary laws; and also in England by numerous statutes, in 1363, 1465, 1570, &c. (see *Cap*); and in the reign of Elizabeth, 1574. *Stow*. Fairholt's "Costume in England" contains a history of dress with numerous illustrations derived from MSS., the works of Strutt, &c. A "dress-making company" established in London, 6 Feb. 1865, with the view of improving the condition of the workwomen, was reported doing well in Oct. 1866.*

DREUX (N.W. France). Here Montmorenci defeated the Huguenots under Condé, 19 Dec. 1562.

DRILLING-MACHINES, in agriculture. One was invented by Jethro Tull, early in the last century.

DRINKING-FOUNTAINS. Many were erected in Liverpool in 1857. An Association for their erection in London was formed in April, 1859, by lord John Russell, the earl of Carlisle, Mr. S. Gurney, and others. The first of the numerous fountains since erected is that near St. Sepulchre's church, Skinner-street, on April 21, 1859. The magnificent fountain in Victoria-park, London, was inaugurated by the donor, Miss Burdett Coutts, 28 June, 1862. A remarkable drinking-fountain, the gift of the maharajah of Vizianigram, was inaugurated 29 Feb. 1868.

DROGHEDA (Central Ireland, E.), formerly Tredagh, a place of great importance, having the privilege of coining money. Here was passed Poyning's law (*which see*) in 1494. In the reign of Edward VI. an act was passed for the foundation of a university here. The town was besieged several times in the contests between 1641 and 1691. Cromwell took it by storm, and put the governor, sir A. Aston, and the whole of the garrison, to the sword, 11 Sept. 1649. More than 3000 men, most of them English, perished. It surrendered to William III. in 1690.

DROMORE, BISHOPRIC OF (N.E. Ireland), founded by St. Coleman, first bishop, about 556. By an extent returned 15 James I., this see was valued in the king's books at 50*l*. Jeremy Taylor was bishop of Down and Connor in 1660, and of this see in 1661. In 1842 Dromore was united to Down by the Irish Church Temporalities act of 1833.

DRONTHEIM, capital of Norway, founded by Olaf I. about 998.

DROWNING, an ancient punishment. The Britons inflicted death by drowning in a quagmire, before 450 B.C. *Stow*. It is said to have been inflicted on eighty intractable bishops near Nicomedia, A.D. 370; and to have been adopted as a punishment in France by Louis XI. The wholesale drownings of the royalists in the Loire at Nantes, by command of the brutal Carrier, Nov. 1793, were termed *Noyades*. 94 priests were drowned at one time. He was condemned to death in Dec. 1794. Societies for the *recovery of drowning persons* were first instituted in Holland, in 1767. The second society is said to have been formed at Milan, in 1768; the third in Hamburg, in 1771; the fourth at Paris, in 1772; and the fifth in London, in 1774. The motto of the Royal Human Society in England is: *Lateat scintillula forsan*—"A small spark may perhaps lie hid."

DRUIDS. Priests, among the ancient Germans, Gauls, and Britons, so named from their veneration for the oak (*Brit. deriv*). They administered sacred things, were the interpreters of the gods, and supreme judges. They headed the Britons who opposed Caesar's first landing, 55 B.C., and were exterminated by the Roman governor, Suetonius Paulinus, A.D. 61.

DRUM: the invention is ascribed to Bacchus, who, according to Polyænus, "gave his signals of battle with cymbals and drums." It was brought by the Moors into Spain, 713. *Le Clerc*. The drum, or drum capstan, for weighing anchors, was invented by sir S. Morland, in 1685. *Anderson*.

DRUMMOND LIGHT; see *Lime-light*.

* Sir Walter Raleigh, we are told, wore a white satin-pinked vest, close-sleeved to the wrist, and over the body a brown doublet finely flowered, and embroidered with pearls, and in the feather of his hat a large ruby and pearl drop at the bottom of the sprig in place of a button. His breeches, with his stockings and ribbon garters, fringed at the end, all white; and buff shoes, which, on great court days, were so gorgeously covered with precious stones as to have exceeded the value of 6600*l*.; and he had a suit of armour of solid silver, with sword and belt blazing with diamonds, rubies, and pearls. King James's favourite, the duke of Buckingham, could afford to have his diamonds tacked so loosely on, that when he chose to shake a few off on the ground, he obtained all the fame he desired from the pickers-up, who were generally *les Dames de la Cour*. We may here mention a novel dress, the **BLOOMER COSTUME**, introduced into America in 1849, by Mrs. Ann Bloomer, and worn there by many of the women. It resembled male attire, being an open-fronted jacket and loose trousers, the latter wide like those of the Turk, but gathered in at the ankles. The Bloomer dress was first adopted by a few females in the western parts of London, in August, 1851; but though it was recommended by some American ladies in popular lectures, it was soon afterwards totally discontinued.

DRUMCLOG (W. Scotland). Here the covenanters defeated Graham of Claverhouse, on 1 June, 1679. An account of the conflict is given by Walter Scott, in "Old Mortality."

DRUNKARDS were to be excommunicated in the early church, 59 (1 Cor. vii.) In England, a canon law forbade drunkenness in the clergy, 747. Constantine, king of Scots, punished it with death, 870. By 21 James I., c. 7, 1623, a drunkard was liable to a penalty of five shillings, or six hours in the stocks.

DRURY-LANE THEATRE derives its origin from a cock-pit, which was converted into a theatre in the reign of James I. It was rebuilt and called the Phoenix; and Charles II. granted an exclusive patent to Thomas Killigrew, 25 April, 1662. The actors were called "the king's servants," and ten of them, who were called gentlemen of the great chamber, had an annual allowance of ten yards of scarlet cloth, with a suitable quantity of lace; see *Theatres*.

DRUSES, a warlike people dwelling among the mountains of Lebanon, derive their origin from a fanatical Mahometan sect which arose in Egypt about 996, and fled to Palestine to avoid persecution. They now retain hardly any of the religion of their ancestors: they do not practise circumcision, pray, or fast, and eat pork and drink wine. In the middle of 1860, in consequence of disputes (in which doubtless both parties were to blame), the Druses attacked their neighbours the Maronites (*which see*), whom they massacred, it was said, without regard to age or sex. Peace was made in July; but in the meantime a religious fury seized the Mahometan population of the neighbouring cities, and a general massacre of Christians ensued. Foad Pacha with Turkish troops; and general Hautpoul with French auxiliaries, invaded Lebanon in Aug. and Sept. The Druses surrendered, giving up their chiefs, Jan. 1861; see *Damascus and Syria*.

DUALISM, a term applied to the principles of the advocates for a separate government of Hungary under the emperor of Austria; effected in 1867.

DUBLIN, capital of Ireland, anciently called Ashclod, said to have been built 140. Auliana, daughter of Alpinus, a lord or chief among the Irish, having been drowned at the ford where now Whitworth-bridge is built, he changed the name to Auliana, by Ptolemy called Eblana (afterwards corrupted into Dublana), as a memorial. Alpinus is said to have brought "the then rude hill into the form of a town," about 155; see *Ireland*.

DUBLIN, ARCHBISHOPRIC OF. It is supposed that the bishopric of Dublin was founded by St. Patrick, in 448. Gregory, bishop in 1121, became *archbishop* in 1152. It was united to Glendalagh in 1214. George Browne, an Augustine friar of London (deprived by queen Mary in 1554), was the first Protestant archbishop. Dublin has two cathedrals, Christ Church, and St. Patrick's. The revenue was valued, in the king's books, 30 Hen. VIII. at 534*l.* 15*s.* 2*d.* Irish. Kildare, on its last avoidance, was annexed to Dublin, 1846; see *Bishops*.

DUCAT, a coin so called because struck by dukes. *Johnson*. First coined by Longinus, governor of Italy. *Procopius*. First struck in the duchy of Apulia, 1140. *Du Cange*, Coined by Robert, king of Sicily, in 1240.

DUCKING-STOOL; see *Cucking-stool*.

DUELLING took its rise from the judicial combats of the Celtic nations. The first duel in England, William count of Eu and Godfrey Baynard, took place 1096. Duelling in civil matters was forbidden in France, 1305. Francis I. challenged the emperor Charles V. 1528. The fight with small swords was introduced into England, 29 Eliz. 1587. Proclamation that no person should be pardoned who killed another in a duel, 30 Char. II. 1679.* Duelling was checked in the army, 1792; and has been almost abolished in England, by the influence of public opinion, aided by the prince consort. A society "for the discouraging of duelling" was established in 1845; see *Battel, Wager of, and Combat*.

DUKE, Latin *dux*, a leader. In England, during Saxon times, the commanders of armies were called dukes, *duces*. *Camden*. In *Genesis xxxvi.* some of Esau's descendants are termed *dukes*. *Duke-duke* was a title given to the house of Sylvia, in Spain, on account of its possessing many duchies.

Edward the Black Prince made *duke of Cornwall* 17 March, 1337
 Robert de Vere was created marquis of Dublin and *duke of Ireland*, 9 Rich. 11. 1385
 Robert III. created David, prince of Scotland,

duke of Rothesay, a title which afterwards belonged to the king's eldest son, 1398, and is now borne by the prince of Wales.
 Cosmo de Medici created *grand-duke* of Tuscany, the first of the rank, by pope Pius V. 1569

DULWICH COLLEGE (Surrey) called God's-gift College, founded by Edward Alleyn, an eminent comedian, was completed and solemnly opened 13 Sept. 1619. Alleyn was its first master, and died in 1626. In 1686 Wm. Cartwright, an actor, gave a library and some portraits, and on 20 Dec. 1810 sir Francis Bourgeois bequeathed his collection of pictures, the gallery for which was erected by sir John Soane, and opened in 1812. Sir Francis died 8 Jan. 1811. In 1857, an act was passed by which the college was reconstituted. Two schools were established; and the number of the almspeople increased. In 1860 the annual income was 11,482*l.* New school buildings founded 26 June, 1866.

DUMB, see *Deaf and Dumb*.

DUMBLANE or DUNBLANE (Perth), near which took place a conflict called the battle of

Sheriffmuir, between the royalist army under the duke of Argyle, and the Scots rebels under the earl of Mar, 13 Nov. 1715. Both claimed the victory.

DUNBAR (Haddington). Here the Scottish army and king John Baliol were defeated by Warrenne, earl of Surrey, and Scotland was subdued, 27 April, 1296. Here also Cromwell obtained a signal victory over the Scots, in arms for Char. II. 3 Sept. 1650.

DUNCIAD, the celebrated satirical poem by Alexander Pope, was published in 1728.

DUNDALK (Louth, Ireland). In 1318, at Foughard near this place, was defeated and slain Edward Bruce, who had invaded Ireland in 1315. The walls and fortifications of Dundalk were destroyed in 1641. It was taken by Cromwell in 1649. The first cambric manufacture in Ireland was established in this town by artisans from France in 1727.

DUNDEE (E. Scotland), on the Tay. The site was given by William the Lion (reigned 1165—1214), to his brother David, earl of Huntingdon, who built or strengthened the castle, and erected a large church, the tower of which, 156 feet high, still remains. The town was taken by the English in 1385; pillaged by Montrose, 1645; stormed by Monk in 1651; and was visited by queen Victoria in 1844. It has thriven since 1815, through its extensive linen manufactories; at one of these (Edwards's) a steam explosion took place on 15 April, 1859, when twenty persons were killed. Claverhouse, viscount Dundee (killed 1689), had a house here. The Baxter park, the gift of sir David Baxter, was opened by earl Russell, 9 Sept. 1863. The British association met here, 4 Sept. 1867. Population in 1861, 90,425.

DUNES, see *Dunkirk*.

DUNGAN-HILL (Ireland). Here the English army, commanded by colonel Jones, signally defeated the Irish, of whom 6000 are said to have been slain, while the loss on the side of the English was inconsiderable, 8 Aug. 1647.

DUNKELD (Perthshire) was made a bishopric by David I. in 1127; the ancient Culdee church, founded by king Constantine III., becoming the cathedral. The beautiful bridge over the Tay, erected by Thos. Telford, was opened in 1809.

DUNKIRK (N. France), founded in the 7th century, was taken by the Spaniards, Sept. 1652, and retaken from them by the English and French (after Turenne's victory over them under Condé on the *dunes* (or sands), 14 June, 1658, and put into the hands of the English, 25 June following. It was sold by Charles II. for 500,000*l.* to Louis XIV., 17 Oct. 1662. Dunkirk was one of the best fortified ports in the kingdom; but all the works were demolished in conformity with the treaty of Utrecht in 1713. The French resumed the works, but they were ordered to be demolished at the peace of 1763; but in 1783 they were again resumed. The English attempted to besiege Dunkirk; but the Duke of York was defeated by Hoche, and forced to retire with loss, 7 Sept. 1793. It was made a free port in 1816.

DUNMOW (Essex), famous for the tenure of the manor (made by Robert Fitz-Walter, 1244), "that whatever married couple will go to the priory, and kneeling on two sharp-pointed stones, will swear that they have not quarrelled nor repented of their marriage within a year and a day after its celebration, shall receive a fitch of bacon."*

DUNSE (S. Scotland). Here on 18 June, 1639, by treaty between the Scots commission and Charles I., their demands were acceded to, and they agreed to disband their army. Disputes arose, and the treaty was not carried into effect.

DUNSLINANE (Perthshire). On the hill was fought the battle between Macbeth the thane of Glamis, and Siward, earl of Northumberland, 27 July, 1054. Edward the Confessor had sent Siward on behalf of Malcolm III., whose father Duncan, the thane and usurper had murdered. Macbeth was defeated, and it was said was pursued to Lumphanan, in Aberdeenshire, and there slain, 1056 or 1057.

DUPES (day of), 11 Nov. 1630, when Richelieu energetically and adroitly frustrated the plan for his ruin, formed by the queen Marie de Medicis and Gaston, duke of Orleans, and others, during the king's illness.

DÜPPEL or DYBBÖL. See under *Denmark*, 1864.

DUPPLIN (Perthshire). Here Edward Balliol and his English allies totally defeated the Scots under the earl of Mar, 11 Aug. 1332, and obtained the crown for three months.

* The earliest recorded claim for the bacon was in 1445, since when to 1855 it had only been demanded five times. The last claimants previous to 1855 were John Shakeshanks and his wife 20 June, 1751; they made a large sum by selling slices of the fitch to witnesses of the ceremony (5000 persons). On 19 July, 1855, fitches were awarded to Mr. and Mrs. Barlow, of Chipping-Ongar, and the Chevalier Chatelaine and his lady. The lord of the manor opposed the revival, but Mr. W. Harrison Ainsworth, the novelist, and some friends, defrayed the expense, and superintended the ceremonials. A fitch was awarded in 1860.

DURBAR, an East Indian term for an audience-chamber or reception. On 18 Oct. 1864, a most remarkable durbar was held at Lahore by the viceroy of India, sir John Lawrence, at which 604 of the most illustrious princes and chieftains of the north-west province were present, magnificently clothed. Similar ones were held in 1866 and 1867.

DURHAM, an ancient city, the *Dunholme* of the Saxons, and *Durême* of the Normans. The **BISHOPRIC** was removed to Durham from Chester-le-street in 995; whither it had been transferred from Lindisfarne or Holy Island, on the coast of Northumberland, in 634, in consequence of the invasion of the Danes. The bones of St. Cuthbert, the sixth bishop, were brought from Lindisfarne, and interred in Durham cathedral. The palatine privileges, granted to the bishop by the Danish Northumbrian prince Guthrum, were taken by the crown in June 1836. Durham was ravaged by Malcolm of Scotland in 1070, and was occupied by the Northumbrian rebels in 1569; and by the Scots in 1640. In 1650 Cromwell quartered his Scotch prisoners in the cathedral. Near Durham on 12 (or 17) Oct. 1346, was fought the decisive battle of *Neville's cross* (*which see*). This see, deemed the richest in England, was valued in the king's books at 2821*l.* Present income, 8000*l.*

College founded in 1290; abolished at the Reformation, in 1657
Cromwell established a college, which was suppressed at the Restoration, 1660; present University established in 1831, opened in 1833, and chartered in 1837
Certain reformed ordinances, recommended by a commission, set aside in 1863

1826. Wm. Van Mildert (the last prince-bishop); died 21 Feb. 1836.
1836. Edward Maltby, resigned in 1856; died 3 July, 1859, aged 90.
1856. Charles Thomas Longley; became abp. of York, May, 1860.
1860. Hon. H. Montagu Villiers (trans. from Carlisle); died 10 Aug. 1861.
1861. Charles Baring (PRESENT bishop).

BISHOPS.

1791. Hon. Shute Barrington, died in 1826.

DURHAM LETTER, see *Papal Aggression*. **DUTCH REPUBLIC**, see *Holland*.

DUUMVIRI, two Roman patricians appointed by Tarquin the Proud 520 B.C. to take care of the books of the Sibyls, which were supposed to contain the fate of the Roman empire. The books were placed in the Capitol, and secured in a chest under the ground. The number of keepers was increased to ten (the Decemviri) 365 B.C., afterwards to fifteen; the added five called *quinque viri*.

DWARFS: ANCIENT. Philetas of Cos, distinguished about 330 B.C., as a poet and grammarian, is said to have carried weights in his pockets, to prevent his being blown away. He was preceptor to Ptolemy Philadelphus. *Ælian*. Julia, niece of Augustus, had a dwarf named Copas, two feet and a hand's breadth high; and Andromeda, a freed-maid of Julia's, was of the same height. *Pliny*. Aug. Cæsar exhibited in his plays a man not two feet in stature. *Sueton*. Alypius of Alexandria, a logician and philosopher, was but one foot five inches and a half high; "he seemed to be consumed into a kind of divine nature." *Vos. Instit.*

MODERN DWARFS.—John d'Estrix, of Mechlin, was brought to the duke of Parma, in 1592, when he was 35 years of age, having a long beard. He was skilled in languages, and not more than three feet high.

Jeffrey Hudson, an English dwarf, when a youth of 18 inches high, was served up to table in a cold pie, before the king and queen, by the duchess of Buckingham, in 1626. He challenged Mr. Crofts to fight a duel, but the latter came armed with a squirt. At another meeting the dwarf shot his antagonist dead, 1653.

Count Borowlaski, a Polish gentleman, of great accomplishments and elegant manners, well known in England, where he resided many years, was

born in Nov. 1739. His growth was at one year of age, 14 inches; at six, 17 inches; at twenty, 33 inches; and at thirty, 39. He had a sister, named Anastasia, seven years younger than himself, and so much shorter that she could stand under his arm. He visited many of the courts of Europe, and died in England in 1837.

Charles Stratton (termed general Tom Thumb), an American, was exhibited in England, 1846. In Feb. 1863, in New York, when 25 years old and 31 inches high, he married Lavinia Warren, aged 21, 32 inches high. He, his wife, and child, and Commodore Nutt, another dwarf, came to England in Dec. 1864, and remained there some time.

DYEING is attributed to the Tyrians, about 1500 B.C. The English sent their goods to be dyed in Holland, till the art was brought to them in 1608. "Two dyers of Exeter were flogged for teaching their art in the north" (of England), 1628. A statute against abuses in dyeing passed in 1783. The art has been greatly improved by chemical research. A discovery of Dr. Stenhouse in 1848, led to M. Marnas procuring *mauve* from lichens; and Dr. Hofmann's production of aniline from coal-tar, has led to the invention of a number of beautiful dyes (mauve, magenta red, &c.); see *Aniline*.

E.

EAGLE, an ancient coin of Ireland, made of a base metal, and current in the first years of Edward I. about 1272; was so named from the figure impressed upon it. The *American* gold coinage of eagles, half eagles, and quarter eagles, began 6 Dec. 1792; an eagle is of the value of 10 dollars, or about two guineas.—The *standard of the eagle* was borne by the Persians, at Cunaxa, 401 B.C. The Romans carried gold and silver eagles as ensigns, and sometimes represented them with a thunderbolt in their talons, on the point of a spear, 102 B.C. Charlemagne added the second head to the eagle for his arms, to denote that the empires of Rome and Germany were united in him, A.D. 802. The eagle was the standard of Napoleon I., and is that of Napoleon III.; as well as of Austria, Russia, and Prussia; see *Knighthood*.

EARL, or *comes*, introduced at the conquest, superseded the Saxon ealdorman, and continued the highest rank in England, until Edward III. created dukes in 1337 and 1351, and Richard II. created marquesses (1385), both above earls. Alfred used the title of earl as a substitute for king. William Fitz-Osborn was made earl of Hereford by William the Conqueror, 1066. Gilchrist was created earl of Angus, in Scotland, by king Malcolm III. in 1037. Sir John de Courcy created baron of Kingsale and earl of Ulster in Ireland, by Henry II. 1181.

EARL MARSHAL of England, the eighth great officer of state. This office, until it was made hereditary, always passed by grant from the king. Gilbert de Clare was created lord marshal by king Stephen, 1135. The last lord marshal was John Fitz-Allan, lord Maltravers. *Camden*. Richard II. in 1397 granted letters patent to the earl of Nottingham by the style of *earl marshal*. In 1672, Charles II. granted to Henry lord Howard the dignity of hereditary earl marshal. The earl marshal's court was abolished in 1641. (See *Howard*.)

EARL MARISCHAL of Scotland was an officer who commanded the cavalry, whereas the constable commanded the whole army; but they seem to have had a joint command, as all orders were addressed to "our constable and marischal." The office was never out of the Keith family. It was reserved at the Union, and when the heritable jurisdictions were bought, it reverted to the crown, being forfeited by the rebellion of George Keith, earl marischal, in 1715.

EARRINGS were worn by Jacob's children, 1732 B.C. (*Gen.* xxxv. 4).

EARTH, see *Globe*.

EARTHENWARE, see *Pottery*.

EARTHQUAKES. Anaxagoras supposed that earthquakes were produced by subterranean clouds bursting out into lightning, which shook the vaults that confined them, 435 B.C. *Diog. Laert.* Kircher, Des Cartes, and others, supposed that there were many vast cavities under ground which have a communication with each other, some of which abound with waters, others with exhalations, arising from inflammable substances, as nitre, bitumen, sulphur, &c. Dr. Stukeley and Dr. Priestley attributed earthquakes to electricity. It appears probable that steam generated by subterranean heat contributes to occasion them. An elaborate Catalogue of Earthquakes, (from B.C. 1606 to A.D. 1842) with commentaries on the phenomena, by R. and J. W. Mallet, was published by the British Association in 1858. In 1860 the velocity of their propagation was estimated by Mr. J. Brown at between 470 and 530 feet per second*.

EAST ANGLES, the sixth kingdom of the Heptarchy, was commenced by Uffa, 575, and ended with Ethelbert in 792; see *Britain*. The bishop's see founded by St. Felix, who converted the East Angles in 630, was eventually settled at Norwich (*which see*), in 1094.

EASTER, instituted about 68, the festival observed by the church in commemoration of Our Saviour's resurrection, so called in England from the Saxon goddess *Eostre*. After much contention between the eastern and western churches it was ordained by the council of Nice, 325, to be observed on the same day throughout the whole Christian world. "Easter-day is the Sunday following that fourteenth day of the calendar moon which happens upon or next after the 21st March: so that, if the said fourteenth day be a Sunday, Easter-day is not that Sunday but the next." Easter-day may be any day of the five weeks which commence with March 22 and end with April 25. The dispute between the old British church and the new Anglo-Saxon church respecting Easter was settled about 664.—Easter Sunday; 1868, 12 April; 1869, 28 March; 1870, 17 April; 1871, 9 April.

EASTER ISLAND, in the Pacific Ocean, was discovered by Davis in 1686; it was visited by Roggewein, in 1722, and from him obtained the name it now bears; it was visited by captain Cook, in 1774. At the south-east extremity is the crater of an extinguished volcano, about two miles in circuit and 800 feet deep.

EAST INDIES, see *India*.

EAST SAXONS, see *Britain*, p. 124.

EBELIANS, a German revivalist sect, which began at Königsberg in Prussia, about 1836, its leaders being archdeacon Ebel and Dr. Diestel, who were tried and condemned for unsound doctrine and impure lives in 1839; but the sentence was annulled in 1842, it is said, by royal influence. The sect is popularly termed "Mucker," German for hypocrites. Their theory and practice of spiritual marriage is described by Mr. Hepworth Dixon in his "Spiritual Wives," 1868.

EBIONITES, heretics, in the 2nd century, who seem to have been a branch of the Nazarenes, were of two kinds: one believed that our Saviour was born of a virgin, observed all the precepts of the Christian religion, but added the ceremonies of the Jews; the other believed that Christ was born after the manner of all mankind, and denied his divinity. *Pardon*. Photinus revived the sect in 342.

EBONITE (vulcanised india-rubber), see *Caoutchouc*.

EBRO, a river in Spain—the scene of a signal defeat of the Spaniards by the French, under Lannes, near Tudela, 23 Nov. 1808; and also of several important movements of the allied British and Spanish armies during the Peninsular war (1809 and 1813).

ECCLESIASTICAL COMMISSIONS. One was appointed by queen Elizabeth, 1584; by James I. in Scotland, 1617; by the English parliament in 1641; and by James II. to coerce the universities in 1687. The present Ecclesiastical Commissioners (bishops, deans, and laymen) were appointed in 1835; incorporated in 1836; and their proceedings regulated in 1840 and 1841.

ECCLESIASTICAL COURTS. There existed no distinction between lay and ecclesiastical courts in England until after the Norman conquest, 1066; see *Arches and Consistory Courts*. Till the establishment of the Divorce and Probate courts (*which see*) in 1857, the following were the causes cognisable in ecclesiastical courts: blasphemy, apostasy from Christianity, heresy, schism, ordinations, institutions to benefices, matrimony, divorces, bastardy, tithes, incests, fornication, adultery, probate of wills, administrations, &c.

ECCLESIASTICAL STATE, or STATES OF THE CHURCH, see *Rome, Modern*.

ECCLESIASTICAL TITLES BILL, see *Papal Aggression*.

ECHOES. The time which elapses between the utterance of a sound and its return

must be more than one-twelfth of a second, to form an echo. The whispering gallery of St. Paul's is a well-known example.

ECKMÜHL (Bavaria), the site of a battle between the main armies of France (75,000) and Austria (40,000); Napoleon and marshal Davoust (hence prince d'Eckmühl) defeated the archduke Charles, 22 April, 1809.

ECLECTICS (from Greek, *eklego*, I choose), ancient philosophers (called *Analogetici*, and also *Philalethes*, or the lovers of truth), who, without attaching themselves to any sect, chose what they judged good from each: of them was Potamon of Alexandria, about A.D. 1. *Dryden*. Also a Christian sect, who considered the doctrine of Plato conformable to the spirit of Christianity.

ECLIPSE (the race-horse), see *Races*.

ECLIPSES. Their revolution was first calculated by Calippus, the Athenian, 336 B.C. The Egyptians said they had accurately observed 373 eclipses of the sun, and 832 of the moon, in the period from Vulcan to Alexander, who died 323 B.C. The theory of eclipses is said to have been known to the Chinese before 120 B.C. The first eclipse recorded happened 19 March, 721 B.C., at 8h. 40m. P.M., according to Ptolemy; it was lunar, and was observed with accuracy at Babylon. A list of eclipses to the year 2000 is given in "*L'Art de Vérifier les Dates*."

REMARKABLE ECLIPSES:—

OF THE SUN.		
That predicted by Thales; see <i>Halys (Pliny, lib. ii. 9)</i> , believed to have occurred	28 May,	585

ÉCOLE POLYTECHNIQUE, a military academy at Paris, established in 1794, and reorganised and given its present name on 1 Sept. 1795. The "Journal" (1795-1867) contains profound mathematical papers. The school was reorganised 4 Sept. 1816. The pupils defended Paris in 1814 and 1830.

ECONOMIC MUSEUM (or Museum of Domestic and Sanitary Economy), at Twickenham, open free, was established chiefly by the agency of Mr. Thos. Twining, in 1860. It originated from the Paris exhibition of 1855.

ECUADOR, see *Equator*.

EDDAS, two books containing the Scandinavian mythology (or history of Odin, Thor, Frea, &c.), written about the 11th and 12th centuries. Translations have been made into French, English, &c. MSS. of the Eddas exist at Copenhagen and Upsal.

EDDYSTONE LIGHTHOUSE, off the port of Plymouth, erected by the Trinity-house to enable ships to avoid the Eddystone rock. The first lighthouse was commenced under Mr. Winstanley, in 1696; was finished in 1699; and was destroyed in the dreadful tempest of 27 Nov. 1703, when Mr. Winstanley and others perished. It was rebuilt by act of parliament, and all ships were ordered to pay one penny per ton inwards and outwards towards supporting it, 1708. This lighthouse was burnt in 1755; and one on a better plan, erected by Mr. Smeaton, was finished 9 Oct. 1759. The woodwork of this, burnt in 1770, was replaced by stone.

EDESSA (now Orfat), a town in Mesopotamia, said by some to have been built by Nimrod; by Appian to have been built by Seleneus. It became famous for its schools of

theology in the 5th century, and in 1184, when it was taken by the Saracens, it contained fifteen large churches. Its ancient kings or rulers were named Abgarus and Mannus.

EDGECOTE, see *Banbury*.

EDGEHILL FIGHT (23 Oct. 1642), Warwickshire, between the royalists under prince Rupert and the parliament army under the earl of Essex, was the first important engagement in the civil war. Charles I. was present. The earl of Lindsay, who headed the royal foot, was mortally wounded. The king lost 5000 dead. Owing to the great loss, the action proved indecisive, though the parliament claimed the victory.

EDICTS, public ordinances and decrees, usually set forth by sovereigns; the name originated with the Romans. The PERPETUAL EDICT: Salvius Julianus, of Milan, a civilian at Rome (the author of several treatises on public right), was employed by the emperor Adrian to draw up this body of laws for the Prætors, promulgated 132.

EDICT OF NANTES, by which Henry IV. of France granted toleration to his Protestant subjects, 13 April, 1598, was confirmed by Louis XIII. in 1610, and by Louis XIV. in 1652. It was revoked by Louis XIV. 22 Oct. 1685. This unjust and impolitic act cost France 50,000 Protestant families, and gave to England and Germany thousands of industrious artisans who carried with them the art of manufacturing silks. Some settled in Spitalfields, where their descendants yet remain; others settled in Soho and St. Giles's and pursued the art of making crystal glasses and various fine works in which they excelled; among these, jewellery, then little understood in England.

EDINBURGH, the metropolis of Scotland, derives its name—in ancient records *Dun Edin*, "The hill of Edin"—from its castle, founded or rebuilt by Edwin, king of Northumbria, who having greatly extended his dominions, erected it for the protection of his newly acquired territories from the incursions of the Scots and Picts, 626. But it is said the castle was first built by Camelon, king of the Picts, 330 B.C. It makes a conspicuous appearance, standing at the west end of the town, on a rock 300 feet high, and, before the use of great guns, was a fortification of considerable strength.

EDINBURGH, BISHOPRIC OF, was created by Charles I. when that monarch was in Scotland in 1633; and William Forbes, one of the ministers of Edinburgh, was made first bishop. The king allotted the parishes of the shires of Edinburgh, Linlithgow, Haddington, and a part of Berwick and of Stirlingshire, to compose the see. The sixth and last prelate was Alexander Ross, who was ejected on the abolition of episcopacy, at the period of the revolution, in 1689. Edinburgh became a post-revolution bishopric in 1720; see *Bishops*.

EDINBURGH REVIEW (by Francis Jeffrey, rev. Sydney Smith, Henry Brougham, and other whigs) published first on 10 Oct. 1802.

EDINBURGH UNIVERSITY. A college was commenced by the town council of Edinburgh, in 1581, for which Queen Mary had given the site of ancient religious houses, and Robert Reid, bishop of Orkney, the funds in 1558. In 1582 the university was chartered by James VI. afterwards James I. of England. The first principal was appointed in 1585. The foundation-stone of the new buildings was laid by Francis, lord Napier, grand-master of the masons of Scotland, 16 Nov. 1789. In 1845, the library contained upwards of 80,000 volumes, besides numerous curious and rare MSS. and documents.

EDUCATION, the art of developing the physical, intellectual, and moral faculties of man, has occupied the greatest minds in all ages, Plato, Aristotle, Cicero, Quintilian, Bacon, Milton, Locke, Rousseau, &c. In England the earliest schools for the lower classes were those attached to the monasteries; for the higher classes halls and colleges were gradually founded; see *Oxford and Cambridge*.

William of Wykeham planted the School at Winchester, whence arose his colleges at that place and Oxford	1373
Eton college was founded by Henry VI.	1440
In the thirty years following the reformation education was greatly promoted, and many grammar schools were erected and endowed by Edward VI. and Elizabeth	1535-65

founded the Greycoat school, Westminster, in 1698, and cordially supported parochial charity schools (one established at St. Margaret's, Westminster, 1688).	
Nearly 2000 of these schools established in Great Britain and Ireland, principally by the instrumentality of the Society for the Promotion of Christian Knowledge	1698-1741
Robert Raikes began <i>Sunday Schools</i> about	1781
In 1833 there were 16,828 of these schools, with 1,548,890 scholars.	
Sunday School Union formed in	1802
Joseph Lancaster, a young Quaker, began to instruct the children of the poor	1796
He had 900 pupils before he was 18 years old, and 1000 pupils in	1798

EDUCATION, *continued.*

- To provide teachers, he invented the monitorial system. In consequence of his exertions, the present British and Foreign School Society was founded with the name of the "Royal Lancasterian Institution," &c. . . . 1805
- This being unexclusive, was followed by the institution of the Church of England "National Society for Educating the Poor," on Dr. Bell's system 1811
- Infant Schools* began about 1815
- The Charity Commission, appointed at the instance of Mr. (now lord) Brougham, published their reports on Education, in 37 volumes folio 1819-40
- Irish National School System (to accommodate both Roman Catholics and Protestants) organised mainly by archbishop Whately and the Roman Catholic archbishop Murray 1831
- In 1834, the government began annual grants (the first 20,000*l.*), which continued till 1839, when the Committee of the Privy Council on Education was constituted for the distribution of the money. The grant for Public Education in Great Britain, in 1852, was 150,000*l.*; 1856-7, 451,213*l.*; 1860, 798,951*l.*; 1861, 803,794*l.*; 1864, 705,404*l.*; 1867, 705,865*l.* For Ireland, 1860, 270,722*l.*; 1861, 285,377*l.*; 1863, 316,770*l.* From 1839 to 1860, 3,655,067*l.* were granted for education. The grant for education, science, and art, in 1861, was 1,358,996*l.*; for 1867-8, 1,487,554*l.*
- In 1836, the Home and Colonial School Society was instituted, and about 1843 were formed the Voluntary School Society and the Congregational Board of Education. In 1851, out of a population of 17,927,609, there were 2,466,481 day scholars. Primary schools in Great Britain, 1854, 3825; 1863, 7739.

- A great educational conference took place at Willis's Rooms, the Prince Consort in the chair 22-24 June, 1857
- The Industrial Schools act passed in "
- Middle Class Examinations from the University of Oxford began, June, 1858. The examiners granted the degree of A.A. to many persons at Liverpool, Leeds, &c.; similar examinations from Cambridge took place in the autumn, and are to be continued 1858
- Report of commissioners on popular education (appointed 1838), published 18 March, 1861, led to the Minute of the Committee of the Privy Council on Education, establishing a Revised Code of Regulations, adopted 21 July, 1861, to come into operation, after 31 March, 1862. It decreed regular examinations of the pupils, payment by results, evening schools for adults, and other changes, which raised a storm of opposition from the clergy and schoolmasters. The subject was much agitated in parliament (25, 28 March, 1862); but eventually a compromise was effected, 5 May, 1862
- Official instructions for the administration of the Revised Code issued Sept. "
- "Conscience-clause," founded on the Endowed Schools act, March, 1860, introduced by the Committee of Council on Education for parishes where only one school is required. It provided for the admission of children of Dissenters, and exempted them from religious teaching, and attendance at public worship Nov. 1863
- (Report, 10 June, 1865).
- It has been much opposed by the clergy ever since, and created much controversy in 1866-7
- College and Public School Commission Report, signed 16 Feb. 1864
- Royal Commission appointed, to inquire into the state of education in Scotland. First meeting at Edinburgh 14 Nov. "

EIDOGRAPH, see *Pantagraph*.

EIKŌN BASILIKĒ ("the Portraiture of His Sacred Majesty in his Solitudes and Sufferings"), a book of devotion formerly attributed to king Charles I., but now generally believed to have been written partially, if not wholly, by bishop Gauden, and possibly approved by the king: it was published in 1648, and sold with great rapidity.

EISENACH DECLARATION, see *Germany*, 1859. EISTEDDFODD, see *Bards*.

EL ARISCH, Egypt, captured by the French under Reynier, 18 Feb. 1799. A convention was signed here between the grand vizier and Kleber for the evacuation of Egypt by the French 28 Jan. 1800. He beat the Turks at Heliopolis on 20 March; and was assassinated on 14 June following.

ELBA, ISLE OF (on the coast of Tuscany), taken by lord Nelson in 1796; but abandoned 1797. Elba was conferred upon Napoleon (with the title of emperor) on his relinquishing the throne of France, 5 April, 1814. He secretly embarked hence with about 1200 men in hired feluccas, on the night of 25 Feb. 1815, and landed in Provence, 1 March, to recover the Imperial crown; see *France*, 1815. Elba was resumed by the grand duke of Tuscany, July, 1815.

ELCHINGEN, Bavaria. Here Ney beat the Austrians, 14 Oct. 1805, and became duke of Elchingen.

ELDERS (in Greek, *presbuteroi*), in the early church equivalent with *episcopoi*, or bishops (see 1 *Tim.* iii. and *Titus* i.), who afterwards became a distinct and superior order. Elders in the Presbyterian churches are laymen.

EL DORADO (the "Gilded Man"). When the Spaniards had conquered Mexico and Peru, they began to look for new sources of wealth, and having heard of a golden city ruled by a king or priest, smeared in oil and rolled in gold dust (which report was founded on a

merely annual custom of the Indians), they organised various expeditions into the interior of South America, which were accompanied with disasters and crimes, about 1560. Raleigh's expeditions in search of gold in 1596 and 1617 led to his fall.

ELEASA, Palestine. Here Judas Maccabæus was defeated and slain by Bacchides and Alcimus, and the Syrians, about 161 B.C. (1 *Macc.* ix.)

ELEATIC SECT, founded at Elea in Sicily, by Xenophanes, of Colophon, about 535 B.C. He had been banished to Sicily on account of his wild theory of God and nature. He supposed that the stars were extinguished every morning and rekindled at night; that eclipses were occasioned by a partial extinction of the sun; that there were several suns and moons for the convenience of the different climates of the earth, &c. *Strabo*. Zeno (about 364) was an Eleatic.

ELECTIONS PETITIONS ACT, 11 & 12 Vict. c. 98, passed 1848, amended, 1865. New bill proposing the establishment of two judges to try election petitions brought in, March, 1868.

ELECTOR PALATINE, see *Palatinate*.

ELECTORS for members of parliament for counties were obliged to have forty shillings a-year in land, 8 Hen. VI. 1429. Among the acts relating to electors are the following: Act depriving excise and custom-house officers and contractors with government of their votes, 1782. Act to regulate polling, 1828. Reform in parliament act (see *Reform Bill*), 1832. County elections act, 1836; see *Bribery*. The forty shilling freeholders in Ireland lost their privilege in 1829. By Dodson's act, passed in 1861, university electors are permitted to vote by sending balloting papers.

ELECTORS OF GERMANY. In the reign of Conrad I. king of Germany (912-918), the dukes and counts, from being merely officers, became gradually independent of the sovereign, and subsequently elected him. In 919 they confirmed the nomination of Henry I. duke of Saxony by Conrad as his successor. In the 13th century seven princes (the archbishops of Mentz, Treves, and Cologne, the king of Bohemia, the electors of Brandenburg and Saxony, and the elector Palatine), assumed the exclusive privilege of nominating the emperor. *Robertson*. An eighth elector (Bavaria) was made in 1648; and a ninth (Hanover) in 1692. The number was reduced to eight at 1777 (by the elector Palatine acquiring Bavaria); and was increased to ten at the peace of Luneville, in 1801. On the dissolution of the German empire, the crown of Austria was made hereditary, 1804-1806; see *Germany*.

ELECTRIC CLOCK; see p. 266.

ELECTRICITY,—from the Greek *ἤλεκτρον*, electrum, amber. The electrical properties of rubbed amber are said to have been known to Thales, 600 B.C.; see *Magnetism*.

FRICIONAL OR STATIC ELECTRICITY.

Gilbert records that other bodies besides amber generate electricity when rubbed, and that all substances may be attracted. . . . 1600
 Otto von Guericke constructs the first electric machine (a globe of sulphur), about . . . 1647
 Boyle publishes his electrical experiments . . . 1676
 Stephen Gray, aided by Wheeler, discovered that the human body conducts electricity, that electricity acts at a distance (motion in light bodies being produced by frictional electricity at a distance of 666 feet), the fact of electric induction, and other remarkable phenomena . . . 1720-36
 Dufay originates his dual theory of two electric fluids: one *vitreous*, from rubbed glass, &c., the other *resinous*, from rubbed amber, resin, &c.; and showed that two bodies similarly electrified repel each other, and attract bodies oppositely electrified, about . . . 1733
 The Leyden jar (vial or bottle) discovered by Kleist, 1745, and by Cunnæus and Muschenbroek, of Leyden; Winekler constructed the Leyden battery. . . . 1746
 Desaguliers classifies bodies as electrics and non-electrics . . . 1742
 Important researches of Watson, Canton, Becqueria and Nollet . . . 1740-7
 Franklin announces his theory of a single fluid, terming the vitreous electricity *positive*, and the resinous *negative*, 1747; and demonstrates

- on the double fluid theory, to be 288,000 miles a second; on the single fluid theory, 576,000 miles a second 1834
- Armstrong discovers, and Faraday explains, the electricity of high pressure steam, which produces the hydro-electric machine 1840
- ELECTRIC MACHINES.** Otto von Guericke obtained sparks by rubbing a globe of sulphur, about 1647; Newton, Boyle, and others used glass, about 1675; Hawksbee improved the machine, about 1709; Bose introduced a metallic conductor, 1733; Winckler contrived the cushion for the rubber, 1741; Gordon employed a glass cylinder, 1742; for which a plate was substituted about 1770; Canton introduced amalgam for the rubber, 1751; Van Marum constructed an electric machine at Haarlem, said to have been the most powerful ever made, 1785; Dr. H. M. Noad set up at the Panopticon, Leicester-square, London, a very powerful electric machine and Leyden battery [in possession of Mr. Edwin Clark, 1862] 1855
- The *Hydro-Electric* machine, by Armstrong, was constructed 1840
- The **ELECTROPHORUS**, a useful apparatus for obtaining frictional electricity, was invented by Volta in 1775, and improved by him in 1782
- ELECTROMETER** and **ELECTROSCOPE**, as the terms signify, are apparatus for ascertaining the presence and quantity of electrical excitation. Pith-balls were employed in various ways as electroscopes by Gilbert, Canton, and others. Dr. Milner invented an electrometer similar to Peltier's, 1783. The gold leaf electrometer was invented by rev. A. Bennet, 1789, and improved by Singer, about 1810; Lane's discharging electrometer is dated 1767; Henley's, 1772; Bohlenberger's electro-scope, 1820; Peltier's induction electrometer, about 1848
- GALVANISM, OR VOLTAIC-ELECTRICITY, AND ELECTRO-MAGNETISM.**
- Sulzer noticed a peculiar sensation in the tongue when silver and lead were brought into contact with it and each other 1762
- Madame Galvani observed the convulsion in the muscles of frogs when brought into contact with two metals, in 1789; and M. Galvani, after studying the phenomena, laid the foundation of the galvanic battery 1791
- Volta announced his discovery of the "Voltaic pile," composed of discs of zinc and silver, and moistened card 1800
- By the voltaic pile, Nicholson and Carlisle decompose water, and Dr. Henry decomposes nitric acid, ammonia, &c. "
- Behrens forms a dry pile of 80 pairs of zinc, copper, and gilt paper 1805
- By means of the large voltaic battery of the Royal Institution, London, Davy decomposes the alkali potash, and evolves the metal potassium 6 Oct. 1807
- Zamboni constructs a dry pile of paper discs, coated with tin on one side and peroxide of manganese on the other 1809
- Children's battery fuses platinum, &c. "
- Davy exhibits the voltaic arc 1813
- Wollaston's thimble battery ignites platinum wire 1815
- Multipliers or rheometers, popularly termed "galvanometers," invented by Ampère and by Schweigger, 1820; by Cumming, 1821; De la Rive, 1824; Ritchie (torsion), 1830; Joule (magnetic), 1843.
- Faraday described his discovery of electro-magnetic rotation Jan. 1822
- Ohm enunciates his formulæ relating to the galvanic current. 1827
- Improvement in constructing the *Voltaic battery* made by Wollaston, 1815; Becquerel, 1829; Sturgeon, 1830; J. F. Daniell, 1836; Grove (nitric acid, &c.), 1839; Jacobi, 1840; Smee, 1840; Bunsen (carbon, &c.), 1842; Grove (gas battery), 1842
- Faraday reads the first series of his "Experimental Researches on Electricity" at the Royal Society 21 Nov. 1831
- Faraday demonstrates the nature of electro-chemical decomposition, and the principle that the quantity and intensity of electric action of a galvanic battery depends on the size and number of plates employed 1834
- Wheatstone invents his electro-magnetic chronoscope 1840
- ELECTRO-MAGNETISM** begins with Ørsted's discovery of the action of the electric current on the magnetic needle, 1819; proved by Ampère, who exhibits the action of the voltaic pile upon the magnetic needle, and of terrestrial magnetism upon the voltaic current; he also arranges the conducting wire in the form of a helix or spiral, invents a galvanometer, and imitates the magnet by a spiral galvanic wire 1820
- Arago magnetised a needle by the electric current, and attracted iron filings by the connecting wire of a galvanic battery "
- Induction of electric currents discovered by Faraday and announced 1831
- Faraday discovers the electro-magnetic rotative force developed in a magnet by voltaic electricity, 1831; experiments on the induction of a voltaic current, &c. 1834-5
- Sturgeon makes a bar of soft iron magnetic by surrounding it with coils of wire, and sending an electric current through the wire 1837
- Becquerel invents an electro-magnetic balance "
- Joseph Henry announces his discovery of secondary currents 2 Nov. 1838
- Magneto-electricity applied to electro-plating by Woolwich 1842
- Breguet uses electro-magnetic force to manufacture mathematical instruments, about 1854
- MAGNETO-ELECTRICITY** (the converse of Ørsted's discovery of electro-magnetism), discovered by Faraday, who produced an electric spark by suddenly separating a coiled keeper from a permanent magnet; and found that an electric current existed in a copper disc rotated between the poles of a magnet 1831
- The *Magneto-Electric* machine arose out of Faraday's discovery, and was first made at Paris by Pixii, 1832; and in London by Saxton 1833
- Ruhmkorff's magneto-electric induction coil constructed, about 1850
- H. Wilde's description of his machine, a powerful generator of dynamic electricity, by means of permanent magnets and the magneto-electric machine (constructed in 1865) sent to the Royal Society by professor Faraday and reported 26 April, 1866
- The light (resembling bright moon-light) exhibited on the top of Burlington house, 2 March, 1867
- Dynamo-magneto-electric machines, by Wheatstone and Siemens, described at the Royal Society, Feb.; by Ladd 14 March, "
- "Faraday as a Discoverer," by professor Tyndall, published March, 1868
- ELECTRIC TELFGRAPH.***
- The transmission of electricity by an insulated wire was shown by Watson and others 1747

- sarge, 1744; Betancourt, 1787; Cavallo, 1795; Salva, 1796; Sæmmering, exhibited 29 Aug. 1809; Ronalds 1816
- Ampère invents his telegraphic arrangement, employing the magnetic needle and coil, and the galvanic battery 1820
- F. Ronalds publishes an account of his electric telegraph 1823
- Professor Wheatstone constructs an electro-magnetic apparatus, by which 30 signals are conveyed through nearly four miles of wire, June 1836
- Telegraphs invented by Schilling, Gauss, and Weber (magneto-electric), 1833; by Steinheil and by Masson, 1837; by Morse 1837
- The magnetic needle telegraph patented by W. F. Cooke and (now sir Charles) Wheatstone. (The Society of Arts Albert gold medal was awarded to them in June, 1867) "
- Mr. Cooke set up the telegraph line on the Great Western Railway, from Paddington to West Drayton, 1838-9; on the Blackwall line, 1840; and in Glasgow 1841
- Wheatstone's alphabetical printing telegraph patented "
- The first telegraph line in America set up from Washington to Baltimore 1844
- The murderer Fawell apprehended by means of the telegraph 1845
- The electric telegraph company established (having purchased Cooke and Wheatstone's telegraphic inventions) 1846
- Gutta-percha suggested as an insulator by Faraday 1847
- Over-house* electric telegraphs (first erected at Paris) set up between their premises in the City and West-end by Messrs. Waterlow, in 1857; extended throughout London 1859-62
- House's printing telegraph, 1846; Bain's electro-chemical telegraph, 1846; Hughes's system, 1855; the American combination system (of the preceding), which can convey 2000 words an hour, adopted by the American telegraph company Jan. 1859
- Wheatstone's automatic printing telegraph patented 1860
- Bill to enable the government to buy up and work the electric telegraphs in the United Kingdom, read 2nd time 1 April, 1868
- SUBMARINE TELEGRAPH.
- Professor Charles Wheatstone drew plans of a projected *submarine telegraph* between Dover and Calais, 1840, in 1847
- Mr. John Watkins Brett submitted a similar plan to Louis Philippe without success "
- He obtained permission from Louis Napoleon to make a trial, 1847; took place 28 Aug. 1850
- The connecting wires (27 miles long) were placed on the government pier in Dover harbour, and in the *Goliath* steamer were coiled about 30 miles in length of telegraphic wire, enclosed in a covering of gutta-percha, half an inch in diameter. The *Goliath* started from Dover, unrolling the telegraphic wire as it proceeded, and allowing it to drop to the bed of the sea. In the evening the steamer arrived on the French coast, and the wire was run up the cliff at cape Grinez to its terminal station, and messages were sent to and fro between England and the French coast. But the wire, in settling into the sea-bottom, crossed a rocky ridge, and snapped in two, and thus the enterprise for that time failed.
- New arrangements were soon made, and on a scale of greater magnitude; and the telegraph was opened; the opening and closing prices of the funds in Paris were known on the London stock exchange within business hours, and guns were fired at Dover by communication from Calais 13 Nov. 1851
- Communications complete between Dover and Ostend, and between Portpatrick and Donaghadee May, 1853
- Holyhead and Howth June, 1854
- Paris and Bastia Nov. "
- London and Constantinople May, 1858
- Cromer and Emden "
- Aden and Suez May, 1859
- Malta and Alexandria 28 Sept. 1861
- England and Bombay, opened 1 March, 1865
- Marsala, Sicily, and La Calle, Algeria 21 June, "
- ATLANTIC TELEGRAPH. A plan to unite Europe and America by telegraph was entered at the government registration office in June, 1845, by Mr. J. Watkins Brett, who made proposals to the government, which were not accepted. This plan was attempted to be carried out by a company in 1857 and 1858, with the concurrence of the British and American governments.
- 2500 miles of wire were manufactured, and tested in March, 1857
- The laying it down commenced at Valentia, in Ireland, on 5 Aug. "
- The vessels employed were the *Ningara* and *Susquehanna* (American vessels), and the *Leopard* and *Agamemnon* (British vessels). After sailing a few miles the cable snapped. This was soon repaired; but on 11 Aug. after 300 miles of wire had been *paid out*, it snapped again (and the vessels returned to Plymouth) 11 Aug. "
- A second attempt to lay the cable failed through a violent storm, on 20-21 June, 1858
- The third voyage was successful. The junction between the two continents was completed by the laying down of 2050 miles of wire from Valentia, in Ireland, to Newfoundland. The first two messages, on 5 Aug. were from the queen of England to the president of the United States, and his reply 5 Aug. "
- This event caused great rejoicing in both countries; but, unfortunately, the insulation of the wire gradually became more faulty, and the power of transmitting intelligence utterly ceased on 4 Sept. "
- A new company was formed 1860
- The *Great Eastern* steamer, engaged to lay down 2300 miles of wire, with 25,000 tons burden, sailed for Valentia, Ireland, from the Thames, commanded by capt. Anderson, accompanied by professor Wm. Thomson and Mr. Cromwell F. Varley, to superintend the paying out the cable 15 July, 1865
- After connecting the wire with the land, the *Great Eastern* sailed from Valentia 23 July, "
- Telegraphic communication with the vessel (interrupted by two faults, due to defective insulation, caused by pieces of metal pressed into the gutta-percha coating, which were immediately repaired) finally ceased on 2 Aug. The apparatus for raising the wire proving insufficient, the vessel returned, and arrived at the Medway 19 Aug. "
- Atlantic telegraph company reconstituted as the Anglo-American telegraph company limited March, 1866
- The *Great Eastern*, with a new cable, sailed from the Medway, 30 June; the shore-end at

the difference of longitude. When the *Atlantic* made her first return voyage from Liverpool, a brief abstract of her news was telegraphed to New Orleans at a few minutes *after* noon (New York time); it reached its destination at a few minutes *before* noon (New Orleans time), and was published in the New Orleans papers on the evening of the very day when the ship arrived at New York: the evening papers of New York and New Orleans gave the same news at the same hour (April, 1850).

ELECTRICITY, *continued.*

- Valentia was spliced with the main cable, and the *Great Eastern* sailed, 13 July; 1200 miles of cable had been laid, 22 July; the cable was completely laid at Heart's Content, Newfoundland, and a message sent to lord Stanley, 27 July; message from the queen to president of the United States sent, 28 July; * to which he replied . . . 30 July, 1865
- The last cable of 1865 recovered, 2 Sept.; and its laying completed at Newfoundland 8 Sept. ,,
- The *Great Eastern* arrived at Liverpool 19 Sept. ,,
- Messrs. Samuel Canning, Daniel Gooch, and capt. Anderson knighted . . . Oct. ,,
- [It was stated (in Sept. 1866) that the engineer of the cable passed signals through 3700 miles of wire by means of a battery formed in a lady's thimble.]
- The U. S. congress voted a gold medal to Cyrus Field, for his exertions connected with Atlantic telegraphs . . . 7 March, 1867
- It was stated that there are in work 15,000 miles of electric telegraph wire in Great Britain; 80,000 on the continent of Europe; and 48,000 in America; and altogether about 150,000 miles laid down in the world. July, 1862
- Bonelli's typo-electric telegraph, made known and company established, 1860; and adopted between Liverpool and Manchester, 1863; promised revival . . . June, 1864
- An "electric telegraph" conference, at which 16 states (not Great Britain) were represented, met first at Paris . . . March, 1865
- ELECTRIC CLOCK, &c. Professor Wheatstone invented an electro-magnetic telegraph clock in 1840. Clocks worked by electricity, invented by Mr. Alexander Bain, Mr. Shepherd, and others, appeared in the exhibition of 1851. An electric clock, with four dials, illuminated at night, was set up in front of the office of the electric telegraph company, in the Strand, London, July, 1852. A time ball was set up by Mr. French, in Cornhill, in 1856. In 1860, Mr. C. V. Walker so connected the clock of the Greenwich observatory with that of the South-eastern station, London, that they could be controlled by electricity.
- ELECTRIC LIGHT. Apparatus for regulating the electric light were devised in 1846, and shown by Staite and Petrie in 1848; by Foucault soon after. Jules Duboscq's *Electric Lamp* (the most perfect of the kind) appeared at the Paris exhibition in 1855; and was first employed by professor Tyndall, at the Royal Institution, London, for illustrating lectures on light and colours, in 1856. The works of new Westminster bridge were illuminated by Watson's electric light, in 1858. M. Serrin, of Paris, exhibited his improved electric lamp, in 1862. The *Magneto-Electric* light (the most brilliant artificial light yet produced), by means of apparatus devised by Professor Holmes, was successfully tried in 1858 and 1859, at the South Foreland lighthouse, Dover. In April, 1861, the French government ordered eight lighthouses on their coast to be illuminated by electric light. M.M. Dumas and Benoit constructed an *electric safety lamp* in . . . 1862
- ELECTRIC LOOM. M. Bonelli, of Turin, in 1854, devised a plan of employing magnets and electro-magnets in weaving, thereby superseding the tedious and costly Jacquard system of cards. His loom was set up in London in 1859, and lectured upon at the Royal Institution by professor Faraday, on 8 June, 1860
- ELECTRO-PHYSIOLOGY was not much cultivated after the discoveries of Galvani in 1790, till about 1830, when the researches of Matteucci commenced; all the phenomena of electro-physiology or animal electricity being considered by Volta as due to an ordinary electric current. Fowler experimented on animals with galvanism, 1793; and Aldini, 1796, who produced muscular contractions in a criminal recently executed, 1803; Ure did the same, 1818; Du Bois Raymond lectured on animal electricity at the Royal Institution, and showed the existence of an electric current, developed by action of the human muscles, in . . . 1855
- ELECTROPHONE, invented by Dr. Strehill Wright, for producing sound by electric currents of high tension: one laid before the Royal Scottish Society of Arts . . . 25 April, 1864
- ELECTRO-TINT. Mr. Palmer, of Newgate-street, London, patented inventions by which engravings may not only be copied from other engraved plates, but the engraving itself actually produced, by electrical agency, and one process he termed glyphotography . . . 1841-2
- ELECTRO-TYPE or DEPOSIT. Mr. Spencer, in England, and professor Jacobi, in Russia, made the first successful experiments in this art in 1837 and 1838. Since then, Mr. A. Smee and others have perfected the processes. In 1840, Mr. Rob. Murray applied black-lead to non-metallic bodies as a conducting surface. In 1840, Mr. Ruolz and Mr. Elkington applied it to gilding and silver plating. Since 1850, printing types and woodcuts, and casts from them, have been electrotyped with copper, and the process is now largely adopted in the arts.
- Messrs. C. Wheatstone and F. A. Abel experiment on the application of electricity to *military purposes* in . . . 1861
- The Electro-block company established, 1860; by their processes the enlargement and reduction of engravings, obtained by india-rubber, can be immediately transferred to a lithographic stone, and multiplied at pleasure. Leech's engravings, so enlarged, were coloured by himself, and exhibited in . . . 1862

ELEGY. Elegiac verse (consisting of a hexameter and pentameter alternately) was the first variation from the hexameter or epic measure, used by Tyrtæus and other early poets. The elegies of Ovid and Catullus are celebrated. Gray's "Elegy, written in a country churchyard," was published in 1749.

ELEMENTS were formerly reckoned as four: earth, air, fire, and water. The chemical elements now are about 63 (1868).

ELEPHANT, in the earliest times trained to war. The history of the Maccabees informs us, that "to every elephant they appointed 1000 men armed with coats of mail, and 500 horse: and upon the elephants were strong towers of wood, &c." The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size, presented by

the king of France to our Hen. III. in 1238. *Baker's Chron.* But Polyænus states that Cæsar brought one to Britain 54 B.C., which terrified the inhabitants greatly; see *Knighthood*.

ELEUSINIAN MYSTERIES. The institution of these secret annual religious ceremonies (in honour of Ceres) at Athens, is attributed to Cadmus, 1550, Erechtheus, 1399, or Eumolpus, 1356 B.C. If any one revealed them, he was to be put to death. They were introduced from Eleusis into Rome; lasted about 1800 years, and were abolished by Theodosius A.D. 389. The laws were—1. To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilisation of mankind one of the beneficial effects of the Eleusinian mysteries.

ELGIN MARBLES, derived chiefly from the Parthenon, a temple of Minerva, on the Acropolis at Athens, of which they formed part of the frieze and pediment, the work of Phidias, under the government of Pericles, about 500 B.C. Thomas lord Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; and from him they were purchased by the British government for 35,000*l.* and placed in the British Museum, in 1816. The ship conveying them was wrecked near Cerigo, and Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and recovered them from the sea.

ELIS, a Greek state termed the "Holy Land," in the Peloponnesus, founded by the Heraclidae, 1103 B.C. Here Iphitus revived the Olympic games, 884, which were regularly celebrated after Coræbus gained the prize in 776. The city of Elis was surrendered to the Spartans in a war, 399. Elis joined the Achæan league, 274; and with the rest of Greece was subjugated by the Romans in 146 B.C.

ELL (so named from *ulna*, the arm) was fixed at 45 inches, by king Henry I. in 1101. The old French ell, or *aune*, was 46.790 inches.

ELLYSON GALLERY. In April, 1860, Mrs. Elizabeth Ellison (in conformity with the wish of her deceased husband, Richard), presented to the South Kensington Museum a series of 50 original water-colour drawings, by the first masters.

ELLORA or **ELORA,** Central India; remarkable for its very ancient rock-cut temple; excavated according to Hindoo legends nearly 8000 years ago; but more probably about 800 A.D. The town was ceded to the British by Holkar in 1818, and transferred by them to the Nizam of the Deccan in 1822.

ELOPEMENT. A wife who departs from her husband, loses her dower by the statute of Westm. 1285—unless her husband, without coercion of the church, be reconciled to her. Earlier laws punished elopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, "by a river issuing from two fountains," in the 5th century, and placed over it St. Asicus, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardcar, Drumclive, and others of less note, were also annexed to Elphin, which became one of the richest sees in Ireland. It is valued in the king's books, by an extent returned 28 Eliz., at 103*l.* 18*s.* sterling. The see was united to Kilmore in 1841, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELSNORE, Zealand, Denmark, the station for receiving the Sound dues (*which see*).

ELY, an island in Cambridgeshire, on which a church was built about 673, by Etheldreda, queen of Egfrid, king of Northumberland; she also founded a religious house, filled it with virgins, and became herself first abbess. The Danes ruined the convent about 870; but a monastery was built in 879, on which king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby it became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108, and his successor Hervæus was the first prelate, 1109. It is valued in the king's books at 2134*l.* 18*s.* 5*d.*; present stated income, 5500*l.*

ELZEVIRS, a celebrated family of printers, in Holland, whose reputation is based on fine pocket editions of the classics. Their first book is dated 1683.

EMANCIPATION, see *Roman Catholics* and *Slavery*.

EMBALMING. The ancient Egyptians believing that their souls, after many thousand years, would reinhabit their bodies, if these were preserved entire, embalmed the dead. Some of the bodies, called *mummies*, buried 3000 years ago, are still perfect. "The physicians embalmed Israel," 1689 B.C. *Gen.* 1. 2; see *Mummies*.*

* The most perfect specimens of modern embalming are preserved in the museum of the royal college of

EMBANKMENTS of earth were erected by the ancients, for preservation from their enemies and the inundations of the tide. Those of the Egyptians are described by Herodotus and Strabo. To the Romans are attributed the first dykes of Holland, and the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale's "History of Embanking" first appeared in 1662; see *Drainage*, and *Levels*. Since 1830, millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish *embargar*, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, 14 Jan. 1801; see *Armed Neutrality*.

EMBER WEEKS, instituted, it is said, by pope Callixtus II. (219, 222), to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. In the English church the *Ember days* are the Wednesday, Friday, and Saturday, after—the first Sunday in Lent, Whit-sunday, 14 Sept. (Holy Cross), and 13 Dec. (St. Lucia).

EMBROIDERY is usually ascribed to the Phrygians; but we learn from Homer, and other ancient authors, that the Sidonians particularly excelled in this species of needlework. Mention is made of this art in 1491 B.C. *Exodus* xxxv. 35 and xxxviii. 23; see *Bayeux Tapestry*. Embroidery is now done by machinery. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804. Heilmann's embroidery machine was patented by Köchlin. *Berlin Wool-work* has been much improved of late years by the production of more elegant patterns, first published by Mr. Wittich in Berlin, about 1810.

EMERALD, a precious stone, of a green colour, found in the East and in Peru. It has been erroneously alleged that there were no true emeralds in Europe before the conquest of Peru; but there is one in the Paris Museum, taken from the mitre of pope Julius II. who died in 1513, and Peru was not conquered till 1545.

EMESA, now Hems, Syria, renowned for a temple of the sun, the priest of which, Bassianus, was proclaimed emperor with the name Heliogabalus or Elagabalus, 218. His atrocities led to his assassination, 18 March, 222.

EMIGRANTS. The French aristocracy and clergy (*émigrés*) began to leave their country in July, 1789, at the breaking out of the revolution: their estates were confiscated in Dec. A large number returned in 1802, after the peace of Amiens. Many were indemnified after the restoration in 1815.

EMIGRATION. Phœnician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea; see *Magna Græcia*, *Marseilles*, &c. The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819. Regulations for emigration were made in 1831, and in Jan. 1840, the Colonial Land and Emigration Board was established.

EMINENCE, a title conferred upon cardinals by pope Urban VIII. Jan. 10, 1631, as more honourable than "Excellency." Previously cardinals had the title of *Illustrissimi*. *Ashe*. The grand-master of Malta also obtained this title. *Pardon*.

EMIR, a title of the caliphs among the Turks and Persians, first awarded to the descen-
surgeons, one being the body of the wife of Van Butchell, preserved by John Hunter by injecting campho-
rated spirits of wine, &c., into the arteries and veins; and the other, the body of a young woman, who died
about 1780 of consumption, in the Lock hospital. The method of embalming royal personages in modern
times is fully described in "Hunter's Posthumous Works." He died in 1793.—During the American War
(1861-5) many soldiers' bodies were embalmed and sent home.

dants of Mahomet's daughter Fatima, about 650. *Ricaut*. To such only was originally given the privilege of wearing the green turban.

EMISSION THEORY OF LIGHT (advocated by Newton, about 1672) supposes that individual particles pass from the luminous body to the eye, and that each ray of light passes from the sun to the earth. It is opposed to the *Undulatory Theory* (*which see*) now generally received.

EMLY, an Irish see, said to have been founded by St. Patrick. Emlly was called Imelacabair : St. Ailbe was the first bishop in 448. It is now an inconsiderable village. In 1568, the see was united to Cashel (*which see*).

EMPALEMENT. This mode of executing criminals, mentioned by Juvenal, and often inflicted in Rome, is still used in Turkey and Arabia. In England the dead bodies of murderers were sometimes staked in this manner, previously to being buried ; see *Suicide*.

EMPEROR, from *Imperator* (ruler), a title conferred on victorious Roman generals.

EMPIRICS, a sect of physicians, formed in the 3rd century before Christ, who contended that all reasoning respecting the animal economy was useless, and that experience and observation alone were the foundation of medicine. The sect adopted the principles of Acron of Agrigentum, who flourished about 430 B. C.

ENAMELLING was practised by the Egyptians, Chinese, and other nations, and was known in England in the time of the Saxons. At Oxford is an enamelled jewel, which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about 887. Limoges enamelled ware was popular in the 16th century. Magnificent specimens by Lepee, Elkington, Emanuel, and others, appeared at the exhibition at Paris, 1867. On 19 June, 1862, Madame Rachel sued captain Carnegie for 92*l.* for *enamelling his wife's face* : and was non-suited ; see *Mosaic*.

ENCÆNIA, Greek festivals kept on days on which cities were built and temples consecrated ; and in later times, as at Oxford, at the celebrations of founders and benefactors. *Oldisworth*. They were the origin of church-wakes in England, about 600. They were also feasts celebrated by the Jews on the 25th of the ninth month, in commemoration of the Maccabees cleansing the temple, which had been polluted by Antiochus Epiphanes, 131 B. C.

ENCAUSTIC PAINTING, enamelling by fire. Painting with burnt wax is said to have been known to Praxiteles about 360 B. C. This art was revived by M. Bachelier, 1749, by count Caylus, 1765, and by Miss Greenland, 1785 and 1792.

ENCRATITES, followers of Tatian, about 170, denounced marriage, and abstained from flesh, and from wine even at the Lord's supper.

ENCUMBERED ESTATES ACT, passed July 1849, to enable owners of land or leases in Ireland, subject to encumbrance, to apply to commissioners appointed under it to direct a sale of such property. These commissioners held their first court in Dublin, 24 Oct. 1849, and their last 28 July, 1858. A new court was established under the Landed Estates act (1858). The number of estates sold up to 1858 was 2380, producing twenty-two millions of pounds. In 1854 a similar act was passed for the West Indies.

ENDOSMOSIS. M. Dutochet, about 1826, found that if two fluids, gases or vapours, of unequal density, are separated by an animal or vegetable membrane, the denser will attract the less dense through the medium. This property he called *endosmose*, when the attraction is from the outside to the inside, and *exosmose* when it operates from the inside to the outside. Many natural phenomena are thus more clearly understood. *Brande*.

ENGHIEN or STEENKIRK (S. W. Belgium). Here the British under William III. were defeated by the French under marshal Luxemburg, 24 July, 1692.—The duc d'Enghien, a descendant of the great Condé, was seized in Baden by order of Bonaparte, conveyed to Vincennes, and, after a hasty trial, shot by torch-light, immediately after condemnation, 21 March, 1804. The body was exhumed, 20 March, 1816.

ENGINEERS, formerly called Trench-masters. Sir William Pelham officiated as trench-master in 1622; the chief engineer was called camp-master general in 1634. Captain Thomas Rudd had the rank of chief engineer to the king about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, 25 April, 1787. It has a colonel-in-chief, 16 colonels-commandant, and 16 colonels. *Civil Engineering* became important in the middle of the last century, when Smeaton began the Eddystone lighthouse, and Brindley the Bridgewater canal. Since then the Rennies, Telford, the Stephensons and Brunels, Locke, and others have constructed breakwaters, docks, bridges, railways, tunnels, &c., which are the marvel of our age.

ENGLAND, so named, it is said, by Egbert, first king of the English, in a general council held at Winchester, 829. This appellation had been used as far back as 688, but had never been, until then, ratified by any assembly of the nation. It came from *Angles*, a tribe of Saxons, and *land*, the Saxon for country; see *Anglo-Saxons*. England was united with Wales, 1283; with Scotland in 1603; and the same legislature in 1707, when the three were styled Great Britain. Ireland was incorporated with them, by the act of legislative union, 1 Jan. 1801, and the whole was called the United Kingdom of Great Britain and Ireland. For previous history, see *Britain*, and for further details, population, revenue, &c., see separate articles. *Histories of England*, by Rapin (in English), 1725-31; Thomas Carte, 1747-55; David Hume, 1755-62; Tobias Smollett, 1757-65; John Lingard, 1819-30; Charles Knight, 1856-62.

ENGRAVING on signets is mentioned *Æcod.* xxviii. 11 (B.C. 1491). Engraving on plates and wood began about the middle of the 15th century. Engraving on glass was perfected by Bourdier, of Paris, 1799. The copyright to engravings has been protected by several statutes; among the principal are the acts 16 and 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict. 6 Aug. 1844, and 15 Vict. 28 May, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanised india-rubber, was shown by the electro-printing block company in 1860; see *Lithography* and *Photo-Galvanography*. †

ENGRAVING ON COPPER. Prints from engraved copper-plates made their appearance about 1450, and were first produced in Germany. Masso, surnamed Finiguerra, is considered to have been the first Italian engraver, about 1440. (See *Niello*). The earliest date known of a copper-plate engraving is 1461. Rolling-presses for working the plates were invented in 1545. Of the art of *etching* on copper by means of *aqua-fortis*, Francis Mazzuoli, or Parmegiano, is the reputed inventor, about 1532. *De Piles*. Etching was practised by Albert Durer. The Etching Club was established in 1838.

* William I. and his successors used English in their laws, &c.; it was superseded by Latin in the reign of Henry II. Norman French was not used in law-deeds till the reign of Henry III.
 † In "Lyra Germanica," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

ENGRAVING, *continued.*

ENGRAVING ON WOOD, long known in China, began in Europe with the *brief mahlers*, or manufacturers of playing-cards, about 1400 (see *Printing*). The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Durer (1471-1528) and Lucas Van Leyden (1497). It was much improved in England by Bewick and his brother, and pupils, Nesbitt, Anderson, &c., 1789, *et seq.* The earliest wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date 1423.

ENGRAVING ON SOFT STEEL, to be hardened afterwards, was introduced into England by Messrs. Perkins and Heath, of Philadelphia, 1819.

MEZZOTINTO is said to have been discovered by col. von Siegen, who engraved a portrait of princess Amelia of Hesse in mezzotinto in 1643; it was improved by prince Rupert in 1648; sir Christopher Wren further improved it in 1662.

Aquatinta, by which a soft and beautiful effect is produced, was invented by the celebrated French artist, St. Non, about 1662; he communicated his invention to Le Prince. Barabbe of Paris was distinguished for his improvements in this kind of engraving, 1763. *Châar'-oscuro* engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491 (see *Zinc*, &c.)

ENLISTMENT. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less than twenty-four hours after, and then they are at liberty to withdraw upon their returning the enlistment or bounty money, and 21s. costs. Enlistment is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines; and in 1867, to twelve years; see *Army*, 1867.

ENNISKILLEN (N. W. Ireland). This town made an obstinate defence against the army of Elizabeth, 1595, and against James II., 1689. 1500 Enniskilleners met general M'Carthy with 6000 men (of whom 3000 were slain, and nearly all the rest made prisoners), they losing but twenty men, 30 July, 1689. The dragoon regiment, the "Inniskillingers," is recruited here.

ENOCH, BOOK OF, an apocryphal work, quoted by the fathers, disappeared about the 8th century. A MS. Ethiopic version was found in Abyssinia by Bruce, and brought to England in 1773. Of this archbishop Lawrence published an English translation in 1821, and the Ethiopic text in 1838.

ENSISHEIM (E. France). Here Turenne defeated the Imperial army, and expelled it from Alsace, 4 Oct. 1674.

ENTAIL of estates began with the statute of Westminster, 1285. Subsequent legislation broke the entail in cases of treason (1534), when the estate is to revert to the crown, and of bankruptcy (1833 and 1849), when it is to be sold.

ENTOMOLOGY, the science of insects, mainly based upon the arrangement of Linnæus, 1739. Ray's "Methodus Insectorum," 1705; "Insectorum Historia," 1710. The Entomological Society of London was instituted in 1833.

ENVELOPES for letters came into general use shortly after the establishment of the penny postal system in 1840. Machinery for their manufacture was patented by Mr. George Wilson in 1844; and by Messrs. E. Hill and Warren de la Rue in 1845.

ENVOYS AT COURTS, in dignity below ambassadors, enjoy the protection, but not the ceremonies of ambassadors. Envoys Extraordinary are of modern date. *Wicquefort*. The court of France denied to them the ceremony of being conducted to court in the royal carriages, 1639.

EPACT (Greek, *added*) is the excess of the solar month above the lunar synodical month, 1 day, 11 hours, 15 minutes, 57 seconds, the lunar month being only 29 days, 12 hours, 44 minutes, 3 seconds; and the excess of the solar year above the lunar synodical year (nearly 11 days), the lunar year being 354 days. The number of the Gregorian epact for 1868, 6; 1869, 17; 1870, 28; 1871, 9.

EPERNAY (N. E. France), seat of the trade in champagne, was taken from the League by Henry IV., 26 July, 1592, when marshal Armand Biron was killed.

EPHESUS (in Asia Minor), a city founded by the Ionians about 1043 B.C. It was subdued by Cyrus in 544 B.C.; it revolted from the Persians 501 B.C. and was destroyed by an earthquake in A.D. 17. Paul preached here A.D. 55, 56 (*Acts* xviii. xix.). His epistle to the Ephesians is dated A.D. 64; see *Diana*, *Temple of*, and *Seven Churches*. The third general council was held here in 431.

EPHORI, powerful magistrates of Sparta, five in number, said to have been first created by Theopompus to control the royal power, about 757 B.C.

EPIC POEMS (from Greek *epos*, a song), narratives in verse. Eminent examples:—

Homer's "Iliad" and "Odyssey" (Greek), between 8th and 10th century B.C. (see <i>Homer</i>)		Ovid's "Metamorphoses" (Latin), about A.D. 1	19
Virgil's "Æneid" (Latin) about B.C.		Dante (died 1321), "Divina Commedia" (Italian) published 1472	

EPIC POEMS, *continued*.

Ariosto, "Orlando Furioso" (<i>Italian</i>)	1516	Milton's "Paradise Lost"	1667
Camoens' "Lusiad" (<i>Portuguese</i>)	1569	Voltaire, "Henriade" (<i>French</i>)	1728

Spenser's "Faery Queen"	1590-6		

EPICUREAN PHILOSOPHY. Epicurus of Gargettus, near Athens, about 300 B.C., taught that the greatest good consists in peace of mind springing from virtue, as tending to prevent disquiet; but the name epicurean is given to those who derive happiness from sensual pleasure.

EPIDAURUS (Greece), celebrated for the temple of Asclepius, or Æsculapius, god of medicine, and enriched by gifts from persons healed. The Romans sent an embassy to seek the help of the god during a pestilence, and his worship was introduced at Rome 293 B.C. The temple was visited by Æmilius Paulus, after his conquest of Macedonia, 167 B.C.

EPIDEMIOLOGICAL SOCIETY, established in 1850.

EPIGRAMS derive their origin from the inscriptions placed by the ancients on tombs. Marcus Valerius Martialis, the Latin epigrammatist, who flourished about A.D. 83, is allowed to have excelled all others ancient or modern. The following Latin epigram on Christ's turning water into wine (*John* iii.) is an example:—"Vidit et erubuit lympha pudica Deum." "The modest water saw its God, and blushed." *Crashaw* (died 1650).

EPIPHANY (appearance), a feast (Jan. 6), termed Twelfth Day, celebrates the manifestation of the Saviour, by the appearance of the star which conducted the Magi to the place where he was to be found; instituted 813. *Whately*.

EPIRUS (Northern Greece). Its early history is very obscure.

The first Pyrrhus (Neoptolemus) settled in Epirus, after the Trojan war, 1170 B.C., and was killed in the temple of Delphi, about B.C. 1165	He takes Macedon from Antigonus	B.C. 273
Pyrrhus the Great reigns, 295; he takes Macedon from Demetrius, 290; compelled to yield it to Lysimachus	He unsuccessfully invades Sparta; enters Argos, and is killed by a tile, thrown by a woman	273
He invades Italy; defeats the Romans, 280; again, 279; subdues Sicily	Philip unites Epirus to Macedon	220
He invades Italy again, and is totally defeated by Curius Dentatus at Beneventum	Its conquest by the Romans	167

	Epirus annexed to the Ottoman empire	A.D. 1466
	An insurrection against the Turks put down	1854

EPISCOPACY, see *Bishops*.

EPISTLES or LETTERS. The earliest known letter is that sent to Joab by David by the hands of Uriah, about 1035 (2 *Sam.* xi. 14); see under *Bible*, p. 100. Horace Walpole, renowned for his letters, was born 5 Oct. 1717; died 2 March, 1797. The collection entitled "Elegant Epistles," commencing with Cicero, was published in 1790. It ends with an essay on letter writing by Dr. Johnson.

EPI TAPHS were inscribed on tombs by the Egyptians, Jews, Greeks, and Romans. Mr. T. J. Pettigrew published a collection entitled "Chronicles of the Tombs," in 1857.

EPI THALAMIUM, a nuptial song at marriage. Tisias, the lyric poet, is said to have been the first writer of one. He received the name of Stesichorus, from the alterations made by him in music and dancing, about 536 B.C. *Bossuet*.

EPOCHA, a point of time made remarkable by some event, from which subsequent years are reckoned by historians and chronologers; see *Eras*.

EPSOM (Surrey). The mineral springs were discovered in 1618. The races began about 1711, and have been held annually since 1730.

EQUATOR or ECUADOR, a South American republic, founded in 1831, when the Columbian republic was divided into three; the other two being Venezuela and New Granada. The population of Equator is about 1,040,400, of which 76,000 are in Quito, the capital. Presidents: general Franco, 21 Aug. 1859, defeated in battle by general Flores, Aug. 1860; G. G. Moreno, Jan. 1861; Geronimo Carrion, 4 Aug. 1865.

EQUESTRIAN ORDER in Rome began with Romulus, about 750 B.C.; see *Knighthood*.

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year; about 21 March, the *vernal* equinox, and 22 Sept., the *autumnal* equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for cases respecting sums under 500*l*.

ERAS. The principal are more fully noticed in their alphabetical order.

Common Era (English Bible, <i>Usher</i> , &c.), B.C.	4004	A.D. 313; these, among chronologers, are still used (see <i>Indictions</i>).	
Era of the Jews	3761		
Era of <i>Nabonassar</i> , after which the astronomical observations made at Babylon were reckoned,	B.C.	The Romans reckoned from the building of their city, 753 B.C.; and afterwards from the 16th year of the emperor Augustus (see <i>Cæsars</i>), which reckoning was long used by the Spaniards

ERASTIANISM, the opinions of Thomas Lieber (latinised *Erastus*), a German physician (1524-83), who taught that the church had no right to exclude any person from church ordinances, or to inflict excommunication, &c. Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage, are now termed Erastians.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife is to be henceforth received in the court of chancery. The errors must be corrected with the pen.

ERFURT (Central Germany), was founded in 476; and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitulated to Murat, when 14,000 Prussian troops surrendered, 16 Oct. 1806. In this city Napoleon and Alexander met, and offered peace to England, 27 Sept. 1808. The French retreated to Erfurt from Leipsic, 18 Oct. 1813. A German parliament met here in March and April, 1850.

ERICSSON'S CALORIC ENGINE, see *Heat*, note.

ERIVAN (Armenia), in the 16th century the residence of the shahs of Persia, was taken by the Turks in 1553 and 1582; but recovered by Abbas the Great, 1604. After being several times captured, it was ceded to Persia, 1769. It was taken by Paskewitch in 1827, and annexed to Russia by treaty in 1828.

ERZEROU (Asiatic Turkey), a city built by Theodosius II., 415; taken by the Seljuk Turks in the 12th century, and by the Ottoman Turks in 1517. It was captured by the Russian general Paskewitch in 1829, but restored in 1830. It was almost totally destroyed by earthquakes, 2 June to 17 July, 1859.

ESCHEATS. Land or other property that falls to a lord within his manor by forfeiture or death. The escheator observes the rights of the king in the county whereof he is escheator. *Covel*. In London a court of escheats was held before the lord mayor to recover the property of a bastard who died intestate, for the king; such a court had not been held in the city for 150 years before—16 July, 1771. *Phillips*.

ESCURIAL or **ESCORIAL** (25 miles N.W. of Madrid), the magnificent palace of the sovereigns of Spain, was commenced by Philip II. in 1563, and completed in 1586, at a cost of 6,000,000 ducats. It is built in the form of a gridiron in honour of St. Lawrence, on whose day (10 Aug. 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos, the total length of all its rooms and apartments is above 120 English miles. Alvarez de Colmenar asserts that there are 14,000 doors, and 11,000 windows.

ESPARTO, a Spanish grass, a species of *stipa*, now largely employed in paper-making, was first imported into this country, as we are informed, in 1857. Living plants were received at Newcastle in July 1867.

ESPIERRES (Belgium). At Pont-à-Chin, near this village, the French, under Pichegru, attacked the allied English and Austrian army (100,000 men) commanded by the duke of York, and were repulsed after a long and desperate engagement, losing the advantages gained by the victory at Turcoing, 23 May, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578, and abolished in 1791.

ESQUIRES, among the Greeks and Romans, were armour-bearers to, or attendants on, a knight. *Blount*. In England the king created esquires by putting about their necks the collar of SS, and bestowing upon them a pair of silver spurs. The distinction of esquire was first given to persons of fortune, not attendant upon knights, 1345. *Stow*.

“ESSAYS AND REVIEWS,” by six clergymen and one layman of the church of England

(the Revs. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo. vol. in March, 1860.*

ESSENES, an ascetic Jewish sect at the time of Christ.

ESSEX, KINGDOM OF; see *Britain*.

EARLS OF ESSEX (from *Nicolas*.)

Henry Bouchier (grandson) 1461	Robert Devereux, lord lieut. of Ireland, 1599; censured for misgovernment; conspired against the government; beheaded, 25 Feb. 1601
	Robert, son; died without heir 1646
	Arthur Capel, ancestor of present (26th earl) 1661

ESSLING, BATTLE OF, see *Asperne*.

ESTE, HOUSE OF. Boniface, count of Lucca and duke of Tuscany, about 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II. marquess of Italy and lord of Este, born about 996, who married first Cunegonda of the house of Guelph, by whom he had Guelph, duke of Bavaria, the ancestor of the house of Brunswick (see *Bavaria* and *Brunsvick*); and secondly Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

ESTHONIA or REVEL, a Russian province, said to have been conquered by the Teutonic knights in the 12th century; after various changes it was ceded to Sweden by the treaty of Oliva in 1660, and finally to Russia by the peace of Nystadt in 1721, having been conquered by Peter in 1710.

ETATS, see *States*.

ETCHING, see *Engraving*.

ETHER was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether, from the chloride of tin, by Courtanvaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by *inhaling ether* the patient is rendered unconscious of pain, is due to Dr. Charles T. Jackson, of Boston, U. S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice, under Dr. Jackson's directions (1846); see *Chloroform*, and *Amylene*. The term "ether" was applied to the transparent celestial space by the German astronomer Encke, about 1829, when studying the elements of Pons' comet, discovered in 1818.

ETHICS (Greek term for *Morals*). The works of Plato, Aristotle, and Confucius, contain heathen systems, the New Testament that of Christianity. Paley's *Moral Philosophy* appeared in 1785, and Whewell's *Elements of Morality* in 1845.

ETHIOPIA. The name was applied anciently rather vaguely to countries the inhabitants of which had *sun-burnt* complexions, in Asia and Africa; but is now considered to apply properly to the modern Nubia, Sennaar, and northern Abyssinia. Many pyramids exist at Napata, the capital of Meroë, the civilised part of ancient Ethiopia.

ETHNOLOGY, a branch of Anthropology, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind to each other is of recent origin. Balbi's *Ethnographic Atlas* was published in 1826, and Dr. Prichard's great work, *Researches on the Physical History of Mankind*, 1841-7. The Ethnological Society, established in 1843, publishes its transactions. Dr. R. G. Latham's works, on the Ethnology of the British Empire, appeared in 1851-2. Professor T. H. Huxley gave courses of lectures on Ethnology at the Royal Institution, London, May & June, 1866, 1867.

* The book did not excite much attention at first, but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation 24 June, 1864. The ecclesiastical court sentenced the revs. R. Williams and H. B. Wilson to suspension for one year, and costs, 15 Dec. 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, 8 Feb. 1864. The most remarkable amongst the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, now abp. of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce).

ETHYL, a compound radicle, a colourless gas, with a slightly ethereal odour, a compound of carbon and hydrogen, first obtained in the free state by professor Edw. Frankland in 1849. Several of its compounds with metals take fire on exposure to the air.

ETNA, MOUNT (Sicily). Here were the fabled forges of the Cyclops : and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B.C., and Thucydides speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 125, 121, and 43 B.C. *Livy*.

ETON COLLEGE (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanberry, confessor to Henry VI. (bishop of Bangor, in 1448), was the first provost. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, are elected, on the first Tuesday in August, to King's college, Cambridge, and are removed there when there are vacancies, according to seniority. In Dec. 1860 there were in all 820 scholars ; see *Cambridge*. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill once in three years ; the donations collected on the road (sometimes as much as 800*l.*) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The *montem* was discontinued in 1847. The regatta has taken its place.

ETRURIA (or **TUSCIA**, hence the modern name Tuscany), a province of Italy, whence the Romans, in a great measure, derived their laws customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porsena of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus, 396 B.C. A truce between the Romans and Etrurians for forty years was concluded 351 B.C. The latter and their allies were defeated at the Vadimonian lake 310 ; with the Boii their allies 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining, show the degree of their civilisation ; see *Tuscany*.—*Etruria*, the site of Josiah Wedgwood's porcelain works, &c., was founded in 1771.

EUBŒA, the largest island in the *Ægean* sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, its most valuable foreign possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Cheronea, 338, it became subject to Macedon. It was made independent by the Romans in 194 ; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

EUCCHARIST, thanksgiving, an early name for the Lord's Supper ; see *Sacrament*.

EUCLID'S ELEMENTS. Euclid, a native of Alexandria, flourished about 300 B.C. The *Elements* are not wholly his ; for many of the demonstrations were derived from Thales, Pythagoras, Eudoxus, and others ; Euclid first reducing them to order, and probably inserting many theorems of his own. The *Elements* were first printed at Basil by Simon Grynaeus, in 1533.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it ; one was invented by Dr. Priestley, in 1772.

EUNUCHS, first mentioned among the Egyptians and Assyrians, and said to have been first employed by Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the later Eastern Empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, 14 Sept. 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It was attacked 17 Feb. 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which, however, was Selim Pasha, the commander of the Egyptian contingent.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphues ; the Anatomy of Wit," by John Lyly, published in 1581.

EURASIAN PLAIN, the great central plain of Europe and Asia, so named by ethnologists (1865).

EUROPE, the smallest of the three divisions of the old continent, really an appendage of Asia; area, nearly 3,800,000 square miles; population, 270,000,000, (1861). For the history, see *Greece*, *Rome*, and the modern kingdoms.

EURYMEDON, a river in Pamphylia, near which Cimon, son of Miltiades, destroyed the fleet of the Persians at Cyprus, and defeated their land forces, 466 B.C.

EUSTACE, ST. (Lower Canada). The rebels were defeated here, 14 Dec. 1837, and compelled to surrender their arms. Their chiefs fled.

EUSTATIUS, ST., a West India island, settled by the Dutch, 1632; taken by the French in 1689; by the English in 1690; again by the British forces under Rodney and Vaughan, 3 Feb. 1781. It was recovered by the French under the marquis de Bouillé, 26 Nov. same year; captured by the British, 1801, 1810; restored to the Dutch, 1814.

EUTAW SPRINGS (S. Carolina). Here the Americans were defeated by the British under Arnold, 8 Sept. 1781.

EUTYCHIANS, so called from Eutyches, an abbot of Constantinople, who asserted in 446 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradaeus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EUXINE, see *Black Sea*.

EVANGELICAL, a term applied to a portion of the clergy of the Church of England (also called the low church), who profess to preach the gospel more purely than their brethren, termed the high church party; see *Church of England*.—THE EVANGELICAL ALLIANCE was founded by sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of protestant Christians against Romanism and infidelity. It holds annual meetings. It met in Sept. 1857, at Berlin, where it was well received by the king. The 19th meeting was held at Hull, 3 Oct. 1865; the 20th at Bath, 16 Oct. 1866; the 21st at Amsterdam, Aug. 1867.

EVANGELISTS, preachers of the "gospel," or good news; see *Gospels*.

EVENING SCHOOLS for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala in Wales by the Rev. T. Charles in 1811.

EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, 4 Aug. 1265, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know his rank, but was saved by his timely exclamation, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

EVIL MAY-DAY (1 May, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. "The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to Westminster, but they crying 'mercy, mercy!' were all pardoned by the king (Henry VIII.), which clemency gained him much love." *Delaine*.

EVOLUTION THEORY includes the nebular theory and Mr. Darwin's doctrine of natural selection; see *Development*, and *Progressionists*.

EXALTATION, see *Cross*.

EXAMINATIONS of candidates for employment in the civil service has been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations."

EXARCHS, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, 548. They ruled from 568 to 752, when Eutyclus, the last, was overcome by Astolphus the Lombard.

EXCHANGE, formerly *Burse*, the Royal Exchange being "Britain's Burse;" that at Paris is still named "*La Bourse*," from *bursa*, a purse. One called *Collegium Mercatorum* existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent; see *Royal Exchange*, and *Bills of Exchange*.

EXCHEQUER, an ancient institution, consisting of officers with financial and judicial functions: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III. about 1221. Sir Robert Walpole was the last chancellor of the exchequer who acted judicially (in 1735). The exchequer stopped payment from Jan. to 24th May, Charles II. 1673. *Stow*. The English and Irish exchequers were consolidated in 1816; see *Chancellors of the Exchequers*, and *Tally Office*.

EXCHEQUER BILLS. The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1697, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer, they usually bear a premium. Amount in circulation, 56,974,780*l.* in 1817; in 1854, 16,008,700*l.*

Robert Aslett, a cashier of the bank of England, tried for embezzling exchequer bills, and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 342,697*l.* 18 July 1803.

Mr. Beaumont Smith tried for forging exchequer bills to the amount of 350,000*l.*; pleaded guilty; sentenced to transportation, 4 Dec. 1841.

EXCHEQUER BONDS, a species of public securities, introduced by Mr. W. E. Gladstone, in 1853, have not been well received.

TELLERS OF THE EXCHEQUER. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1826, or by surrender or abolition, in Oct. 1834), there were the four lucrative offices of *tellers* of the exchequer, also abolished, 10 Oct. 1834.

John Jeffreys Pratt, earl and marquess Camden, was appointed a teller of the exchequer, in 1780, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income (amounting in the whole to upwards of a quarter of a million sterling) and placed it at the service of the state, as it annually accrued.

COMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the pre-

ceding paragraph. The first comptroller-general was sir John Newport, appointed 11 Oct. 1834.—34,438*l.* *per annum* have been saved to the state by the retrenchments in this department of the government.

COURT OF EXCHEQUER CHAMBER. Erected by Edward III. in 1357. It was remodelled by Elizabeth, in 1584, and then made to comprise the judges of all the courts. This court is for error from the judgments of the courts of queen's bench, common pleas, and exchequer of pleas in actions commenced therein. Re-modelled by act 11 Geo. IV. & 1 Will. IV. c. 70 (23 July, 1830). The Exchequer office, Westminster, was instituted by Henry IV. in 1399.

EXCHEQUER, COURT OF (*Curia Regis*), instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the common pleas until they were separated, 16 John, 1215. *Coke's Reports*. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.* Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common law between subject and subject. The judges are styled barons, first appointed 1234. There are a chief and four puisne barons: the fifth judge having been added 23 July, 1830. The office of Cursitor Baron was abolished in 1856.

* In process of time the court of exchequer became gradually enlarged in its jurisdiction, until at length it was not merely a revenue court and one at common law between subject and subject, but one in which suits in equity were also instituted. In fact, until the act 5 Vict. c. 5 (1841), the court of exchequer possessed a triple jurisdiction; but by this statute its equity business was transferred to the court of chancery.

EXETER (Devonshire), said to have been early honoured with the name of *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian : its present name is derived from *Excestre*, "the castellated city of the Exe." It was for a considerable time the capital of the West Saxon kingdom. The BISHOPRIC anciently constituted two sees, Devonshire (founded about 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin, and afterwards at St. German's. About 1040 the sees were united. St. Petroc was the first bishop of Cornwall, before 900 ; Ædulphus, the first bishop of Devonshire, 905 ; and Leofric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan : Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see 1049 ; the see was valued in the king's books at 50*l. per annum*. Present stated income 2700*l.*

EXETER CHANGE (London), was built by Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquis of Exeter near its site, opened in 1845, was pulled down in 1862, for the Strand Music-hall.

EXETER COLLEGE (Oxford) was founded by Walter Stapleton, bishop of Exeter, in 1314. The college buildings consist of a handsome quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious and philanthropic institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c. See under *Music*. Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the church of England, on Sundays.

EXHIBITION OF 1851 (THE GREAT EXHIBITION). The original idea of a *National Exhibition** is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It

* Industrial exhibitions began with the French ; *Expositions* having been organised and opened at Paris in 1798, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National

was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking;" see *Crystal Palace*.

Royal commission appointed 3 Jan. 1850
 A subscription list opened, headed by the queen for 100*l*.
 Civic banquets in support of the plan, at London, 21-22 March; and at York 25 Oct. "
 The building* commenced 26 Sept. "
 Many persons admitted to it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs. Fox and Henderson Feb. 1851
 Reception of goods began 12 Feb., and the sale of season tickets 25 Feb. "
 The Exhibition opened by her majesty, 1 May. "
 The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defy calculation.
 The palace continued open above 23 weeks, altogether 144 days (1 May to 15 Oct.), within which time it was visited by 6,170,000 persons, averaging 43,536 a day, whose admis-

sion at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,107*l*, including season tickets, leaving a surplus, after payment of expenses, of about 150,000*l*.

The greatest number of visitors in one day was 109,760 (8 Oct.); and at one time (2 o'clock, 7 Oct.) there were 93,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but (it should be recollected) within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals, as having been gathered together, it may be said, in *one room*.

The Exhibition was closed to the public, 11 Oct. 1851
 A memorial statue of the prince consort, by Joseph Durham, placed in the gardens of the Royal Horticultural Society, uncovered in the presence of the prince and princess of Wales 10 June, 1863

EXHIBITION OF 1862 (INTERNATIONAL). A proposal in 1858 for another great exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The scheme was revived in April 1860, when the prince consort engaged to guarantee 10,000*l*. if 240,000*l*. should be subscribed for by other persons.

A charter granted to the following commissioners: Earl Granville, the marquis of Chaudos, C. W. Dilke, jun., and Thomas Fairbairn 22 Feb. 1861
 The guarantee fund amounted to 349,000*l*. in Nov. 1860, and to 452,300*l*. on 22 Aug. 1862
 The building,† erected at South Kensington, by Messrs. Kelk and Lucas, according to a design by capt. Fowke, made over to the commissioners on 12 Feb. "
 The Exhibition was opened by the duke of Cambridge and royal commissioners, 1 May "
 The fine arts department included a noble collection of paintings and sculptures.
 The jurors' awards of medals were announced in the building on 11 July, 1862

The Exhibition was closed on 1 Nov., when the total number of visitors (exclusive of attendants) had been 6,117,450.

The Exhibition re-opened on 3 Nov. for the sale of goods exhibited; was finally closed on 15 Nov. 1862

The success of the Exhibition was much impaired by the decease of the prince consort, 14 Dec. 1861, and the breaking out of the civil war in the United States of America. The foreign exhibitors in 1851 were 6566; in 1862, 16,456.

Exhibitors at London, in 1851, 14,000; at Paris, in 1855, 24,000; at London, in 1862, 29,000; at Paris, in 1867, 50,000.

EXODUS (Greek, *way out*), a term applied to the departure of the Israelites from Egypt 1491 B.C.; and described in the book of *Exodus*. Chronologers vary in the date of this event: the LXX. give 1614; Hales, 1648; Wilkinson, 1495; Bunsen, 1320 or 1314.

EX OFFICIO INFORMATIONs are those filed by the attorney-general, *by virtue of his office*, without applying to the court where they are filed for leave, or giving the defendant an opportunity of showing cause why they should not be filed. *Cabinet Lawyer*. They were used by the Liverpool administration about 1817-19. William Hone was tried on

Repository, opened under royal patronage in 1828, near Charing-cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1849. Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence, Constantinople, Bayonne, Melbourne, and many other places (*which see*).

* The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (since sir Joseph) Paxton (who died 8 June, 1865), and the contractors were Messrs. Fox and Henderson, to whom it was agreed to pay 79,800*l*. or 150,000*l*. if the building were permanently retained. It cost 176,030*l*. 13*s*. 8*d*. Its length was 1851 feet, corresponding with the year; the width 408 feet, with an additional projection on the north side, 936 feet long, by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about 19 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and 17 acres of glass in the roof, besides about 1500 vertical glazed sashes.

† The main building occupied about 16 acres of ground, and the annexes 7 acres. The south front was 1150 feet long and 55 feet high, and over the east and west fronts rose the two domes 260 feet high. The interior was decorated by Mr. John G. Craze. The building was given up to Messrs. Kelk and Lucas on 31 Dec. 1862, the house of commons having refused to purchase it for 80,000*l*. 2 July, 1863; and the pulling down commenced on 6 July. The domes and other parts of the structure were purchased for erection in Alexandra-park, Muswell-hill, near London (north).

criminal information, Dec. 18-20, 1817, and acquitted. The British bank directors were thus tried, 1857.

EXPEDITIONS. Many are described under their respective heads.

EXTRACT OF MEAT, discovered by Liebig in 1847; a company was formed to manufacture it in South America in 1866.

EXTRADITION TREATY, between Great Britain and France, was concluded in 1843. In Dec. 1865, the French government gave notice of withdrawing from it in six months. It was renewed, with modifications, for six months, 21 May, 1866.

In 1866, M. Lamirand, charged with forgery and fraud against the Bank of France, fled to America. He was pursued, and while at Montreal, on 1 Aug., was arrested under the governor-general's warrant. On 15 Aug., while his examination was still pending, he petitioned the governor-general not to warrant his surrender before he could apply for a writ of *habeas corpus*, and was assured on 17 Aug. that ample time should be allowed for this purpose. On 22 Aug. he was finally committed; and on 24 Aug. his petition for a writ of *habeas corpus* was presented to judge Drummond, twenty-four hours' notice having been given to the representatives of the crown and the Bank of France. After arguments had been heard and the case adjourned until the following day, he was surreptitiously carried off the same night by train to Quebec, and hurried on board a steamer bound for Europe, by virtue of an extradition warrant, purporting to be signed by the governor-general, at Ottawa on 23 Aug. He was conveyed to France, and on 5 Dec. was tried, found guilty, and condemned to ten years' imprisonment. These circumstances led to much discussion, and the Canadian authorities were censured for irregularity and want of discretion. The discussion ended by Lamirand declining British intervention.

EXTREME UNCTION, see *Anointing*.

EYLAU (Prussia), where, on 7-8 Feb. 1807, the French defeated the Russians in one of the most bloody contests of the war. Napoleon commanded in person. Both armies by this and other battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel.

EYRE (old French for *ire*, to go), the itinerant court of justices, the justices in eyre, was instituted by Henry II. 1176; and when the forest laws were in force, its chief-justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is said to have been in 1671. *Beatson.*

F.

FABII. A noble family at Rome, said to have derived their name from *faba*, a bean, because some of their ancestors cultivated this pulse; or to have descended from Fabius, a son of Hercules. They made war against the Veientes, and in an engagement near the Cremera, all the grown up males of the family (306 men) were slain in a sudden attack, 477 B.C. From one, whose tender age had detained him at Rome, arose the noble Fabii of

the following ages. Fabius *Cunctator* (the delayer) kept Hannibal in check for some time without coming to an engagement, 217-216 B.C.

FABLES. "Jotham's fable of the trees (*Judges* ix., about 1209 B.C.) is the oldest extant, and as beautiful as any made since." *Addison*. Nathan's fable of the poor man (2 *Sam.* xii., about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnoo Sarma, or Pilpay, are the most beautiful, if not the most ancient in the world. *Sir William Jones*. The well-known *Æsop's* fables (*which see*), supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of *Æsop*. The fables of Lafontaine (1700) and Gay (1727) are justly celebrated.

FACIAL ANGLE (that contained by one line drawn horizontally from the middle of the ear to the edge of the nostrils, and another from the latter point to the ridge of the frontal bone) was invented by Peter Camper to measure the elevation of the forehead. In negroes this angle is about 70°; in Europeans from 75° to 85°. Camper died 7 April, 1789. His book on "Characteristic Marks of Countenance" was published in 1791.

FACTIONS of the Circus among the Romans, were parties that fought on chariots in the circus, and who were distinguished by their colours, as green, blue, red, and white; to which Domitian added two others, gold and scarlet, about 90. At Constantinople, the higher ranks took part in the games, and the emperors and people generally favoured one colour.

In Jan. 532, a conflict took place, lasting five days, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora, formerly a courtesan. The blues and greens united for a day or two against the emperor, taking *Nika!* (over-

come) for a watchword, from which the sedition has been named. The blues soon repented, and massacred nearly all the greens. The conflict was suppressed by Belisarius with difficulty. The games were abolished for a time.

FACTORIES, supplied with machinery for producing manufactures, have immensely increased in this country since 1815. The Factory act, regulating the hours of labour, &c., was passed in 1833. No child is to be employed under nine years of age, except in silk factories. Similar acts have been passed since; and an act for the extension of the principles of the Factory acts was passed in 1867.

FAIRLOP OAK, with a trunk 48 feet in circumference, the growth of five centuries, in the forest of Hainault, Essex, was blown down in Feb. 1820. Beneath its branches a fair was annually held on the first Friday in July, which originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon.

FAIROAKS, near the Chickahominy, Virginia, the site of two sanguinary indecisive battles between the Confederates, under general Joseph Johnson, and the Federal army of the Potomac, under general M'Clellan, 31 May and 1 June, 1862.

FAIRS AND WAKES, of Saxon origin, were instituted in England by Alfred, 886. *Spelman*. Wakes were established by order of Gregory VII. in 1078, and termed *Feriae*, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, &c. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror.

FALCONRY or **HAWKING** in England cannot be traced with certainty until the reign of king Ethelbert, the Saxon monarch, 850. *Pennant*. The grand seignior at one time kept six thousand falconers in his service. Juliana Berners' book on "Hawkyng and Huntynge" was printed in 1496; see *Angling*. Recent attempts have been made to revive falconry.

FALCZI, PEACE OF, concluded between Russia and Turkey, 2 July, 1711, the Russians giving up Azoph and all their possessions on the Black Sea to the Turks. The Russians were saved from imminent destruction by the address of Catherine the empress. In 1712 the war was renewed, and terminated by the peace of Constantinople, 16 April, 1712.

FALERII, a city of the Falisci, an Etruscan people who joined the Veientes against Rome, and were beaten by Cornelius Cossus, 437 B.C. It is recorded that when the city was besieged by Camillus in 394, a school-master offered to betray to him the children of the principal citizens. On his refusal to accept the offer the citizens from gratitude surrendered. They opposed Rome during the first Punic war; and in 241 B.C. the city was taken and destroyed after a fierce conflict.

FALERNIAN WINE, celebrated by Virgil and Horace, was the produce of Falernus,

or, as called by Martial, Mons Massicus, in Campania. Horace in his *Odes* boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from the same consuls, 14 B.C. The Opimian wine is said to have been kept for 200 years.

FALKIRK (Stirlingshire, Scotland), the site of a victory by the English under Edward I. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 of the latter were slain, 22 July, 1298. A battle was fought at Falkirk Muir between the royal forces and prince Charles Stuart, in which the former were defeated, 17 Jan. 1746.

FALKLAND ISLANDS, a group in the South Atlantic, belonging to Great Britain, seen by Americus Vespucius, 1502, and visited by Davis, 1592; taken possession of by France, 1764. The French were expelled by the Spaniards; and in 1771, Spain resigns them to England. Not having been colonised by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America, the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. Governor, Wm. Cleaver F. Robinson, 1866.

FALLING STARS, see *Meteors*.

FAMILY COMPACT, see *Bourbon*.

FAMILY OF LOVE, a society, called also Philadelphians, from the love they professed to bear to all men, assembled at Brew-house yard, Nottingham. Their founder, David George, an Anabaptist, of Holland, propagated his doctrine in Switzerland, where he died in 1556. The tenets of the society were declared impious, and George's body and books ordered to be burned by the hangman; see also *Agapemone*.

FAMINES. The famine of the seven years in Egypt began 1708 B.C. *Usher; Blair*.

FAN. Used by the ancients; *Cape hoc flabellum, et ventulum huic sic facito*. "Take this fan, and give her thus a little air." *Terence's Eunuchus*, 166 B.C.—Fans, together with muffs, masks, and false hair, were first devised by the harlots in Italy, and were brought to England from France. *Stov*. In the British Museum are Egyptian fan-handles.

FARADISATION, the medical application of the magneto-electric currents which Faraday discovered in 1837. Apparatus for this purpose was first made by M. Pixii, and employed by Dr. Neef of Frankfort.

FARCE, a short comic drama, usually of one or two acts. One by Otway is dated 1677. The best English farces (by Foote, Garrick, Bickerstaff, &c.) appeared from about 1740 to 1780. These species of dramatic entertainment originated in the droll shows which were exhibited by charlatans and their buffoons in the open streets; see *Drama*.

FARMERS-GENERAL, see *Fermiers*.

FARNESE FAMILY became important through the elevation of Alexander Farnese to the papacy as Paul III. He gave his natural son Peter the duchy of Parma, and his descendants ruled there till the death of Antony without issue in 1731. Alexander prince of Parma was governor of the Netherlands in 1579.

FARRINGDON-MARKET, erected by the corporation of London, near the abolished Fleet-market, was opened 20 Nov. 1829.

FARTHING, an early English coin. Farthings in silver were coined by king John; the Irish farthing of his reign (1210) is rare. Farthings were coined in England in silver by Henry VIII. First coined in copper by Charles II. 1665; and again in 1672, when there

was a large coinage of copper money. Half-farthings were first coined in 1843; see *Queen Anne's Farthings*.

FARTHINGALE, see *Crinoline*.

FASTI CAPITOLINI, marble tablets dug up in the forum at Rome, 1547, contain a list of the consuls and other officers from the year of Rome 250 to 765. Other fragments were found in 1817 and 1818. The "Fasti Consulares," from 509 B.C. to A.D. 235, is given at the end of Smith's "Dictionary of Greek and Roman Antiquities."

FASTS, observed by most nations from the remotest antiquity; by the Jews (2 *Chron.* xx. 3); by the Ninevites (*Jonah* iii.); see *Isai.* lviii. A fast was observed by the Jews on the great day of atonement, *Lev.* xxiii. 1490 B.C. The first Christian ministers were ordained with fasting (45), *Acts* xiii. 2. Annual fasts, as that of Lent, and at other stated times, and on particular occasions to appease the anger of God, began in the Christian church, in the second century, 138. The Mahometan fast is termed *Ramadan* (*which see*). Fast days are appointed by the Reformed churches in times of war and pestilence (as 21 March, 1855, for the Russian war, and 7 Oct. 1857, for the Indian mutiny); see *Abstinence*.

FATS are oils solid at ordinary temperatures. The researches of Chevreul since 1811 on their chemical nature are very important; see *Candles*.

FAUGHARD, see *Foughard*.

FAUSTUS, a professor of magic, renowned in cheap books, flourished about the end of the 15th century. Goethe's poem, "Faust," appeared in 1790.

FEASTS AND FESTIVALS. The "Feasts of the Lord," viz., those of the Passover, Pentecost, Trumpets, and Tabernacles, were instituted 1490 B.C. (*Leviticus* xxiii.)

Feast of Tabernacles, celebrated upon the dedication of the Temple of Solomon, 1004 B.C.
Hezekiah (726 B.C.) and Josiah (623) kept the feast of Passover in a most solemn manner.
In the Christian Church the feasts of Christmas, Easter, Ascension, and the Pentecost or Whitsun-tide (*which see*), are said to have been ordered to be observed by all Christians in the 1st century.

Rogation days appointed 469.
Jubilees in the Romish Church were instituted by Boniface VIII. in 1300; see *Jubilees*.
For fixed festivals observed in the Church of England, as settled at the Reformation, *et seq.*, see *Book of Common Prayer*.
Feasts of Charity; see *Agape*.

FEBRUARY (from *Februus*, an Italian divinity), the second month of the year, in which were celebrated *Februa*, feasts on behalf of the manes of deceased persons. This month, with January, was added to the year by Numa, 713 B.C.

FECIALES or FETIALES, twenty in number, heralds of Rome, to denounce war or proclaim peace, appointed by Numa, about 712 B.C.

FEDERAL STATES are those united by treaty as one state, without giving up self-government—as in Switzerland. The Federals were the people of the Northern of the United States of America during the great conflict in 1861-5; their opponents were styled Confederates.

FEEJEE ISLANDS or FIJI, in the Pacific Ocean, about 1500 miles from Sydney. There are 80 islands, the largest about 360 miles in circumference, with 20,000 inhabitants. The islands were offered by the chiefs to the British government, July, 1859; but not accepted. In 1860 the house of commons granted 1680*l.* for expenditure in them.

FELONY, in English law (says Blackstone, in 1765), comprises every species of crime which occasions the forfeiture of land and goods.

FEMALE MEDICAL SCHOOL, London, held its first session in 1865, when courses of lectures were given. Dr. Mary Walker attended Middlesex hospital, in a modified female dress, in 1866. She gave an auto-biographical lecture at St. James's Hall, 20 Nov. 1866.

FENCIBLE LIGHT DRAGOONS, a body of cavalry raised voluntarily in various counties of England and Scotland in 1794, to serve during the war in any part of Great

Britain. This force (between 14,000 and 15,000), which did its duty with much judgment during a period of intense popular excitement, was disbanded in 1800.

FENCING was introduced into England from France. Fencing-schools having led to duelling in England, were prohibited in London by statute 13 Edw. I. 1285. In 1859 there were eight teachers of fencing in London.

FENIANS (an ancient Irish name), a "brotherhood" in the United States and Ireland united to liberate Ireland and establish a republic.* The agitation was begun, it is said, by Stephens in March, 1858, and in 1864 enlistments and secret drillings took place. A convention was formed in 1863 in America. The movement is opposed by the Roman Catholic clergy; see *Ireland*.

FÈRE-CHAMPENOISE (France). Here the French army under Marmont, Mortier, and Arrighi, were surprised and defeated by the allies under the prince of Schwartzberg, 25 March, 1814, after a heroic resistance. Paris surrendered six days after.

FERIÆ LATINÆ, solemn Roman festivals, alleged to have been instituted by Tarquin the Proud, about 534 B.C. The principal magistrates of forty-seven towns of Latium assembled on a mount near Rome, where they and the Roman authorities offered a bull to Jupiter Latialis.

FERMENTATION, termed by Gay-Lussac one of the most mysterious processes in nature: he showed that in the process, 45 lbs. of sugar are resolved into 23 of alcohol and 22 of carbonic acid. His memoir appeared in 1810. In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere.

FERMIERS GENERAUX, officers who farmed the French revenues previous to 1789, frequently with much oppression. Lavoisier and 27 of these were executed 8 May, 1794.

FERNDALE COLLIERY EXPLOSION; 8 Nov. 1867; about 178 lives lost. See under *Coal*.

FERNS (Ireland), an ancient bishopric, once archiepiscopal. St. Edæn was seated here in 598. Leighlin and Ferns were united in 1600; and by the Church Temporalities' act, passed Aug. 1833, both were united to the bishopric of Ossory. See *Ossory*.—FERNs, an order of cryptogamous plants, now much cultivated in Wardian cases; *which see*, and also *Nature-Printing*.

FEROZESHAH (India). The British, commanded by sir Hugh Gough, attacked the entrenchments of the Sikhs, and carried their first line of works, 21 Dec. 1845; but night coming on, the operations were suspended till daybreak next day, when their second line was stormed by general Gilbert, and 74 guns captured. The Sikhs advanced to retake their guns, but were repulsed with great loss, and retreated towards the Sutlej, 22 Dec.; and recrossed that river unmolested, 27 Dec. The British loss was reckoned at 2415.

FERRARA, a city in the Papal States, formerly part of the Exarchate of Ravenna, under the emperors of the East. It was subdued by the Lombards in the 8th century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1208 it fell into the hands of the house of Este (*which see*), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the long-claimed sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Cæsar, became duke of Modena. The French under Massena took Ferrara in 1796; but it was restored to the pope in 1814. An Austrian garrison held it from 1849; it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860.

FERRARS' ARREST. In March, 1542, Mr. George Ferrars, a member of parliament, being in attendance on the house, was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their serjeant to require his release, which was resisted, and an affray taking place, his mace was broken. The house in a body repaired to the lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another

messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrars from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members from arrest. *Holmshed.*

FERRO, the most western of the Canary isles, from whose west point some geographers have taken their first meridian, was known to the ancients, and was re-discovered in 1402.

FERROL (N.W. Spain). Upwards of 10,000 British landed near Ferrol under the command of sir James Pulteney, in Aug. 1800. They gained possession of the heights; notwithstanding, despairing of success, on account of the strength of the works, he re-embarked his troops. His conduct was much condemned. Soult captured Ferrol 27 Jan. 1809.

FESCENNINE VERSES were rude extemporary dialogues, frequently licentious, in favour among the ancient Etruscans at weddings, and still popular in Italy.

FESTIVALS, see *Feasts*.

FÊTE DE DIEU, a feast of the Roman church in honour of the real presence in the Lord's Supper, kept on the Thursday after Trinity Sunday. See *Corpus Christi*. Berengarius, archbishop of Angers, opposed the doctrine of transubstantiation, and to atone for his crime a yearly procession was made at Angers, called *la fête de Dieu*, 1019.

FÊTE DE VERTU, an annual assemblage, chiefly of young persons, to whom were adjudged rewards for industry and virtue. These fêtes, held at Nuneham, in Oxfordshire, begun by Lady Harcourt in 1789, continued till her death.

FEUDAL LAWS. The tenure of land by suit and service to the lord or owner was introduced into England by the Saxons, about 600. This slavery was increased in 1068. The kingdom was divided into baronies, which were given on condition of the holders furnishing the king with men and money. The vassalage, restored, but limited by Henry VII., 1495, was abolished by statute 1660. The feudal system was introduced into Scotland by Malcolm II. in 1008, and the hereditary jurisdictions were finally abolished in that kingdom, 1746-7. The feudal laws, established in France by Clovis I. about 486, were discountenanced by Louis XI. in 1470.

FEUILLANTS, a religious order founded by Jean de la Barrière in 1577 at the abbey of Feuillant, near Toulouse, and settled in Paris in 1587. The *Feuillant club*, formed in Paris by La Fayette and others in 1789, to counteract the intrigues of the Jacobins, was so named from the convent where they met. A body of Jacobins burst into their hall and obliged them to separate, 25 December, 1791; and the club was broken up in 1792.

FEZ (in the ancient *Mauritania*, Africa), founded by Edris, a descendant of Mahomet, about 787, was long capital of the kingdom of Fez. After long-continued struggles, it was annexed to Morocco about 1550. Leo Africanus describes it as containing more than 700 temples, mosques, and other public edifices, in the 12th century.

FICTIONS, see *Romances*.—FICTIONS IN LAW were invented by the lawyers in the reign of Edward I. as a means of carrying cases from one court to another, whereby the courts became checks to each other. *Hume*. Lord Mansfield, in the court of King's Bench, emphatically declared, that "no fiction of law shall ever so far prevail against the real truth, as to prevent the execution of justice," 31 May, 1784.

FIDENÆ, a Sabine city, frequently at war with Rome. It was finally captured and the inhabitants enslaved, 426 B.C. by the Romans, whose ambassadors they had slain.

FIEF, see *Feudal Laws*.

FIELD OF MARCH AND MAY, see *Champ*.—FIELD OF THE CLOTH OF GOLD, a plain near Ardes, near Calais, in France, on which Henry VIII. met Francis I. of France, 7-25 June, 1520. The nobility of both kingdoms displayed their magnificence, and many involved themselves in debt. Paintings of the embarkation and interview are at Windsor castle.

FIFTH-MONARCHY MEN, about 1645, supposed the period of the Millennium to be just at hand, when Jesus should descend from heaven, and erect the fifth universal monarchy. They proceeded so far as to elect Jesus Christ king at London. Cromwell dispersed them, 1653. *Kearsley*. Another rising with loss of life was suppressed, 6 Jan. 1661. Thos. Vener, a cooper, their leader, and 16 others, were executed soon after.

FIG-TREE (*Ficus Carica*) brought from the south of Europe, before 1548. The Botany-Bay fig, *Ficus Australis*, brought from N.S. Wales in 1789.

¹ FIGURES, see *Arithmetic*, and *Digits*.

FILES are mentioned (1 *Sam.* xiii. 21) 1093 B.C. The manufacture of them has attained to great perfection, by means of file-cutting machinery. That set up by Mr. T. Greenwood of Leeds, in 1859, was invented by M. Bernot of Paris. It is said that the price of files made by it is reduced from 3*d.* to 4*d.* per dozen.

FILIBUSTERS, a name given to the freebooters who plundered the coasts of America in the 17th century; see *Buccaneers* and *Nicaragua*.

FILTERERS. A plan for purifying corrupted water was patented by Wm. Wollcott in 1675. Other modes followed. James Peacock's method of filtration was patented in 1791.

FINE ARTS, see *Arts*, *Paintings*, *Sculpture*, *Engraving*, &c.

FINES AND RECOVERIES, conferring the power of breaking ancient entails and alienating estates, began in the reign of Edward IV., but was not, properly speaking, law, till Henry VII., by correcting some abuses that attended the practice, gave indirectly a sanction to it, 1487. Fines and recoveries were abolished in 1833.

FINLAND, a Russian grand duchy, in the middle of the 12th century was conquered by the Swedes, who introduced Christianity. It was several times conquered by the Russians (1714, 1742, and 1808), and restored (1721 and 1743); but in 1809 they retained it by treaty; see *Abo*. Its political constitution was confirmed by the czar in 1800, 1825, and 1855. Population in 1862, 1,746,229. Dreadful famine, whole villages starved, March, 1868.

FINNIAN, see *Fenians*.

FINSBURY PARK, London, N. In 1866, land had been purchased, and preparations for the park began, after many years' discussion.

FIRE is said to have been first produced by striking flints together. The poets supposed that fire was stolen from heaven by Prometheus. Heraclitus about 596 B.C. maintained that the world was created from fire, and deemed to be a god omnipotent.

FIRE-ANNIHILATOR, an apparatus invented by Mr. T. Phillips, and made known by him in 1849. When put in action, steam and carbonic acid are formed, which extinguish flame. It was not successful in practice.

FIRE-ARMS, see *Artillery*, *Cannon*, *Needle-gun*, and *Pistols*. The first small fire-arms were a species of cannon, borne by two men.

FIRE-BRIGADE was established in London in 1832 by Mr. R. Bell Ford, director of the Sun fire-office. It then had 80 men and 19 stations. In 1863 it had 130 men and 20 stations. In May, 1862, a commission recommended the establishment of a fire-brigade, which was effected by the Metropolitan Fire-brigade act, 1865. It is to be supported by a $\frac{1}{2}$ *d.* rate and by contributions from government and from the insurance offices. It came into action, and its energies were successfully tested at the great fire at St. Katherine's docks, 1 Jan. 1866.

FIRE-DAMP INDICATOR, a small apparatus, about the size of a chronometer, invented by Mr. G. F. Ansell, and patented by him in 1865, by which the presence of very small quantities of fire-damp or light carburetted hydrogen gas may be detected in mines. It is an application of the law of the diffusion of gases.

FIRE-ENGINES are said to have been invented by Ctesibius, 250 B.C. They are men-

tioned by Pliny, A.D. 70. A "water-bow" was patented by Thos. Grent in 1632, one was constructed by John Vander Heyden, about 1663. Bramah's engine was patented in 1793; and many others since. Mr. John Braithwaite constructed a steam fire-engine in 1830. A trial of steam fire-engines took place at the Crystal Palace, Sydenham, on 1, 2, 3 July, 1863, when prizes were awarded to a large one by Merryweather and a small one by Shand and Mason.

FIRE-ESCAPES have been patented by David Marie (1766), Joachim Smith (1773), and by many other persons. The Royal Society for the Protection of Life from Fire was first established in 1836; its object was not fully attained till 1843, when it was re-organised, beginning with six escape stations in London; in March, 1859, it possessed 67; in 1866, 85. In 1861 it was stated that 84 lives had been saved by the society's officers. In 1858, 504 fires had been attended, and 57 persons rescued. In 1866, 695 fires had been attended, and 78 lives saved. In Aug. 1867, the plant of the society was virtually presented to the Board of Works, in consequence of the passing of the Metropolitan Fire Brigade act, 1865. Versmann's composition for rendering washing dresses *fire-proof* was published about 1860.

FIRE INSURANCE, see *Insurance*.

FIRE-SHIPS. Among the most formidable contrivances of this kind ever used, was an explosion vessel to destroy a bridge of boats at the siege of Antwerp, in 1585. The first use of them in the British navy was by Charles, lord Howard of Effingham, in the engagement with the Spanish Armada, July, 1588. *Rapin*.

FIRE-WATCH or **FIRE-GUARD**, of London, was instituted Nov. 1791.

FIRE-WORKS are said to have been familiar to the Chinese in remote ages. They were invented in Europe at Florence about 1360; and were exhibited as a spectacle in 1588.

Macaulay states that the fire-works let off in England at the peace of Ryswick, in 1697, cost 12,000*l*. Very grand fire-works were let off from a magnificent building erected in the Green-park, London, at the peace of Aix-la-Chapelle, Nov. 1748.

Exhibition of fire-works in Paris, 31 May, 1770, in honour of the marriage of the dauphin, afterwards Louis XVI.; nearly 1000 persons perished by pressure and drowning, through a panic.

The display of fire-works, under sir Wm. Congreve, at the general peace, and the centenary of the accession of the Brunswick family to the throne, 1 Aug. 1814.

A grand display of this kind (at a cost of 10,000*l*.) to celebrate the peace with Russia, 29 May, 1856.

In consequence of explosions frequently occurring at fire-work makers (particularly one on 12 July, 1858, at Mr. Bennett's in the Westminster-road, Lambeth, when five lives were lost, and about 300 persons seriously injured, and much property destroyed), it was determined to enforce 9 & 10 Will. III. c. 7 (1697), an act to prevent the throwing and forming of squibs, serpents, and other fire-works. An act regulating the making of fire-works was passed in 1860.

FIRES IN LONDON. The conflagration of a city, with all its tumult of concomitant distress, is one of the most dreadful spectacles which this world can offer to human eyes. *Dr. Johnson*; see *Santiago, Liverpool*, 1862, &c.

FIRE-WORSHIPPERS, see *Parsees.*

FIRST-FRUITS were offerings which made a large part of the revenues of the Hebrew priesthood. First-fruits (called *ANNATES*, from *annus*, a year), in the Roman church, originally the profits of one year of every vacant bishopric, afterwards of every benefice, were first claimed by pope Clement V. in 1306, and were collected in England in 1316: but chronologers differ on this point. The exaction was submitted to till the 26th of Hen. VIII. 1534, when the first-fruits were assigned, by act of parliament, to the king and his successors. Mary gave up the Annates once more to the popes (1555); but Elizabeth resumed them (1559). They were granted, together with the tenths, to increase the incomes of the poor clergy, by queen Anne, in 1703. The offices of First-fruits, Tenths, and queen Anne's Bounty were consolidated by 1 Vict. c. 20, 1838; see *Augmentation of Poor Livings*. Annates were long resisted in France, but not totally suppressed till 1789.

FISH, FISHERIES, &c. Laws for the protection of fisheries were enacted by Edward I. in 1284, and by his successors. The rights of the English and French fishermen were defined by treaty in 1839; see *Herring, Whale, and Newfoundland Fisheries*.

FIVE HUNDRED, COUNCIL OF, established by the new French constitution, 22 Aug. 1795, was unceremoniously dissolved by Napoleon Bonaparte, 10 Nov. 1799.

FIVE-MILE ACT, 17 Chas. II. c. 2 (Oct. 1665), obliged non-conformist teachers who refused to take the non-resistance oath, not to come within five miles of any corporation where they had preached since the act of oblivion (unless they were travelling), under the penalty of 40*l.* They were relieved by Will. III. in 1689.

FLAG. The flag acquired its present form in the 6th century, in Spain; it was previously small and square. *Ashé*. It is said to have been introduced there by the Saracens, before whose time the ensigns of war were extended on cross pieces of wood. *Pardon*. The *honour-of-the-flag salute* at sea was exacted by England from very early times; but it was formally yielded by the Dutch in 1673, at which period they had been defeated in many actions. Louis XIV. obliged the Spaniards to lower their flag to the French, 1680. *Hénarult*. After an engagement of three hours between Tourville and the Spanish admiral Papachin, the latter yielded by firing a salute of nine guns to the French flag, 2 June, 1688. *Idem*; see *Salute at Sea*, and *Union Jack*.

FLAGELLANTS. They established themselves at Perouse, about 1268 during a plague. They maintained there was no remission of sins without flagellation, and publicly lashed

themselves. Clement VI. declared them heretics in 1349; and 90 of them and their leader, Conrad Schmidt, were burnt, 1414. In 1574, Henry III. of France became a flagellant for a short time.

FLAGEOLET, see *Flute*.

FLAMBEAUX, FEAST OF, see *Argos*.

FLAMMOCK'S REBELLION, see *Rebellions*, 1497.

FLANDERS, the principal part of the ancient Belgium, which was conquered by Julius Cæsar, 51 B. C. It became part of the kingdom of France in 843, and was governed by counts subject to the king, from 862 till 1369, the first being Baldwin, *Bras de Fer*, who is said to have introduced the cloth manufacture. In 1204, Baldwin IV. became emperor at Constantinople. In 1369, Philip duke of Burgundy married Margaret, the heiress of count Louis II. After this, Flanders was subjected successively to Burgundy (1384), Austria (1477), and Spain (1555). In 1580 it declared its independence, but afterwards returned to its allegiance to the house of Austria. In 1713 it was included in the empire of Germany. France obtained a part of Flanders by treaty in 1659 and 1679; see *Burgundy*, *Netherlands*, and *Belgium*.

FLAT-BUSH, BATTLE OF, see *Long Island*.

FLATTERY CAPE (W. coast of North America), so named by captain Cook, because at a distance it had the deceptive appearance of a harbour, 1778.

FLAVIAN CÆSARS, the Roman emperors Vespasian, Titus, and Domitian, 66-96.

FLAX was brought from Egypt to Gaul about 1 B. C.; and was ordered to be grown in England, by statute 24 Hen. VIII. 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill which was invented in Scotland about 1750; see *Hemp*. In 1851 chevalier Claussen patented a method of "cottoning" flax.

FLEECE, see *Golden Fleece*.

FLEET-PRISON, MARKET, &c. (London), were built over the small river Fleta, now used as a common sewer. In the reign of Henry VII. this river was navigable to Holborn-bridge; and the obelisk in Fleet-street denotes the extent of it in 1775.

FLEET PRISON was founded in the first year of Richard I., and was allotted for debtors, 1640; and persons were committed here who had incurred the displeasure of the Star Chamber, and for contempt of the court of chancery. It was burnt by the prisoners, 7 June, 1780. It was pulled down in 1845 (and the debtors removed to the Queen's Bench prison). The site was sold to the London, Dover, and Chatham railway company for 60,000*l.* on 2 June, 1864. Last vestige removed Feb. 1868.

FLEET-MARKET, originally formed in 1737, was removed, and the site named Farringdon-street in 1829. A new (Farringdon) market was opened 20 Nov. 1829. The granite obelisk in Fleet-street, to the memory of alderman Waithman, was erected 25 June, 1833.

FLEET MARRIAGES. Between the 10th of October, 1704, and 12 Feb. 1705, there were celebrated 295 marriages in the Fleet, without licence or certificate of banns. 20 or 30 couple were sometimes joined in one day, and their names concealed by private marks, if they chose to pay an extra fee. Pennant, at a later period, describes the daring manner in which this nefarious traffic was carried on. He says, that in walking by the prison in his youth, he has been often accosted with, "Sir, will you please to walk in and be married?" And he states that painted signs, of a male and female hand conjoined, with the inscription, "Marriages performed within," were common along the building. This abuse abolished by the marriage act in 1753.

FLETA, an ancient English law treatise, an abridgment of Braeton dated about 1290, said to have been composed in *Fletâ*, in the Fleet prison, by some lawyer.

FLEUR-DE-LIS, the emblem of France, said to have been brought from heaven by an angel to Clovis, he having made a vow that if he proved victorious in a pending battle with the Alemanni near Cologne, he would embrace Christianity, 496. It was the national emblem till the revolution in 1789, when the tricolor (white, red, and blue) was adopted.

FLEURUS (Belgium), the site of several battles:—

Between the Catholic league under Gonzales de Cordova, and the Protestant union (indecisive) 30 Aug. 1622
The prince of Waldeck defeated by Luxemburg, 1 July, 1690
The allies under the prince of Coburg, defeated by the French revolutionary army commanded by Jourdan, who was enabled to

form a junction with the armies of the Moselle, the Ardennes, and the north. (The French used a balloon to reconnoitre the enemy's army, which it is said contributed to their success) 26 June, 1794
Here Napoleon defeated Blucher at the battle of Ligny (*which see*) 16 June, 1815

FLIES. An extraordinary fall of these insects in London covered the clothes of passengers, 1707. *Chamberlain*. In the United States of America the *Hessian fly*, so called from the notion of its having been brought there by the Hessian troops in the service of England in the war of independence, ravaged the wheat in 1777. Before and during the severe attack of cholera at Newcastle in Sept. 1853, the air was infested with small flies.

FLINTS, in form like arrow-heads, and considered by M. Boucher de Perthes to have been shaped by human hands, were found by him in 1847, near Amiens. His theory, which gives a much higher antiquity to man than is usually received, was much opposed; but latterly has been received by some eminent geologists. Many have been since discovered in other countries.

FLOATING BATTERIES, see *Batteries*, and *Gibraltar*, 1781.

FLODDEN FIELD (Northumberland). The site of a battle on 9 Sept. 1513, between the English and Scots; in consequence of James IV. of Scotland having taken part with Louis XII. of France against Henry VIII. of England. James, many of his nobles, and upwards of 10,000 of his army were slain; while the English, who were commanded by the earl of Surrey, lost only persons of small note.

FLOGGING by the Jewish law was limited to forty stripes, "lest thy brother should seem vile unto thee," 1451 B.C. (*Deut.* xxv. 3). Wm. Cobbett in 1810, and John Drakard in 1811, were punished for publishing censures on flogging in the army. By orders issued 9 Nov. 1859, this mode of punishment was very much diminished in the army (see *Army*); and on Dec. following it was ordered that first-class seamen should not be flogged, except after a trial. Still more diminished, in March, 1867; and, by an amendment on the clause in the mutiny bill, flogging was abolished in the army in the time of peace, April, 1868. In 1863, flogging was made a punishment for attempts at garrotting.

FLOODS, see *Inundations*.

FLORAL HALL, adjoining Covent-garden theatre, is a large conservatory, 220 feet long, 75 feet wide, and 55 feet high, erected from designs by Mr. E. M. Barry, and was opened with the volunteers' ball, 7 March, 1860. It was opened as a flower-market, 22 May, 1861. Here was held the west London industrial exhibition, 1 May to 2 Aug., 1865.

FLORALIA, annual games at Rome in honour of Flora, instituted about 752, but not celebrated with regularity till about 174 B.C.

FLORENCE (*Florentia*), capital of Tuscany (*which see*), and, since 1864, of Italy, is said to have been founded by the soldiers of Sylla (80 B.C.), and enlarged by the Roman triumviri. In its palaces, universities, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy and *Accademia della Crusca* (established 1582) were instituted to enrich literature and improve the language of Tuscany; the latter was so named, because it rejects like *bran* all words not purely Tuscan: both are now united under the former name.

FLORES, or Isle of Flowers (one of the Azores, *which see*), discovered by Vanderberg in 1439; and settled by the Portuguese in 1448.

FLORIDA, a peninsula, one of the southern states of North America, first discovered by Sebastian Cabot in 1497. It was visited by Ponce de Leon, the Spanish navigator, 4 April, 1512, in a voyage he had undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them! Florida was conquered by the Spaniards under Ferdinand de Soto in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in 1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1702; and again by general Oglethorpe in 1740; ceded to the British crown in 1763: taken by the Spaniards in 1781; and guaranteed to them in 1783. Revolution in 1810, when the American government took means for occupying the country; and after a tedious negotiation it was finally ceded* by Spain to the United States in 1820-21; and admitted into the Union in 1845. It seceded in Dec. 1860; and was reannexed in 1865; see *United States*.

FLORIN, a coin first made by the Florentines. A *florin* was issued by Edward III. which was current in England at the value of 6s. in 1337. *Camden*. This English coin

* In 1807, the American government purchased Louisiana from the French, of which they contended West Florida formed a part. On the revolution, and in consequence of this purchase, Spain, unable to defend the country, ceded the whole of Florida to the United States, to which it was finally annexed after the negotiation above mentioned.

was called floren after the Florentine coin, because the latter was of the best gold. *Ash.* The florin of Germany is in value 2s. 4d.; that of Spain, 4s. 4d.; that of Palermo and Sicily, 2s. 6d.; that of Holland, 2s. *Ayliffe*. A silver coinage of florins (value 2s.) was issued in England in 1849.

FLOWERS. Our present common flowers were for the most part introduced into England from the reign of Henry VII. to that of Elizabeth (1485-1603). The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by Geo. Morris, in 1792. A very great number have been introduced from America, Australia, the Cape, &c., during the present century.

FLUORESCENCE. When the invisible chemical rays of the blue end of the solar spectrum are sent through uranium glass, or solutions of quinine, horse-chestnut bark, or stramonium datura, they become luminous. This phenomenon was termed "fluorescence" by its discoverer, professor Stokes, in 1852. By means of fluorescence Dr. Bence Jones and Dupré detected the presence of quinoidine (*which see*) in animal tissues; see *Calorescence*.

FLUORINE, a gaseous element, obtained from fluor spar; first collected over mercury by Priestley. Its property of corroding all vessels is so great that it is separated with great difficulty. It was named by Ampère in 1810. Its chemical history was further elucidated by Davy (1809), Berzelius (1824), and succeeding chemists. The corroding property of fluoric acid was employed in the arts in 1760, by Schwankhard of Nuremberg. *Gmelin*.

FLUSHING, SIEGE OF, see *Walcheren Expedition*.

FLUTE. The transverse flute, incorrectly termed the "German" instead of the Swiss flute, was known to the ancients. It was described by Michael Pretorius, of Wolfenbuttel, in 1620, and by Mersenne of Paris, in 1636. It was much improved by the French in the 17th century; by Quantz, Tacet, Florio, Potter, Miller, Nicholson, and others in the 18th. In the present century also the Nicholsons, Boehm of Munich, Godfrey of Paris, Carter, Rockstro, and Rudall and Rose of London, have greatly contributed to the perfection of this instrument. The English flute or *flageolet* was patented by Wm. Bainbridge in 1803, with improvements in 1810 and 1819.

FLUXIONS, a branch of the higher mathematics, invented by Newton, 1665, similar to the differential calculus described by Leibnitz, 1684. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place. The first elementary work on fluxions in

England is a tract of twenty-two pages in *A New Short Treatise of Algebra, together with a Specimen of the Nature and Algorithm of Fluxions*, by John Harris, M.A. London, 1702.

FLYING, ARTIFICIAL. In Greek mythology, Dædalus is said to have attached wings of wax to the body of his son Icarus, who, neglecting the advice of his father, flew so high that the sun melted his wings, and he fell into the Icarian sea. Archytas is said to have made a flying dove, about 400 B.C. Friar Bacon maintained the possibility of the art of flying, and predicted it would be a general practice, 1273. Bishop Wilkins says (1651), it will yet be as usual to hear a man call for his *wings* when he is going on a journey, as it is now to hear him call for his boots! Borelli (about 1670) showed the futility of these speculations. About 1800, sir George Cayley experimented on the subject, and in 1843 Mr. Henson invented a flying machine; but nothing has been devised capable of serving a practical purpose. The motion of birds in relation to aeronautics was much discussed by scientific men in 1867-8. At a meeting of the Aeronautical society, 26 March, 1868, it was stated that a member had actually, by his muscular force, aided by apparatus, risen from the ground and flown horizontally.

FLY SHEETS, see under *Wesleyans*.

FOG SIGNALS. In 1862, much attention was paid to the subject by the Royal commission on Light-houses, &c. The use of bells, steam-trumpets, a battery of whistles blown by steam, the transmission of sound through water, the sirene, &c., were considered.

FOIX (S. France), a county established 1050, and united with Bearn, 1290. About 1494 Catherine de Foix, the heiress, married Jean d'Albret. His descendant, Henry IV., as king of France, united Foix to the monarchy, 1589.

FONT. Formerly the baptistery was a small place partitioned off in a church, within which a large font was placed, where the persons to be baptized (frequently adults) were submerged. Previously, lakes and rivers were resorted to for immersion. Founts are said to have been set up about 167.

FONTAINEBLEAU, near the Seine, France. The royal palace, founded by Robert le Pieux about 999, enlarged and adorned by successive kings, was completed by Louis Philippe, 1837-40. Fontainebleau was entered by the Austrians 17 Feb. 1814. Here Napoleon resigned his dignity, 4 April, and bade farewell to his army, 20 April, 1814.

FONTENOY, near Tournay, in Belgium, the site of an obstinate sanguinary battle on 30 April (11 May, N.S.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland. The king Louis XV. and the dauphin were present. The success of the British at the commencement of it is still quoted as an illustration of the extraordinary power of a column. The advance of the Austrians during several hours at Marengo (14 June, 1800) was compared to it by Bonaparte. The allies lost 12,000 men, and the French nearly an equal number; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died) was carried about to all the posts in a litter, assuring his troops that the day would be their own.

FONTHILL ABBEY, Wiltshire, founded in 1796, the mansion of William Beckford, author of "Vathek," and son of alderman Beckford. He died in 1844. Within this edifice (which alone cost 273,000*l.*) were collected costly articles of vertu and art, and the rarest works of the old masters. The sale of the abbey and its contents to Mr. Farquhar took place in 1819; 7200 catalogues at a guinea each were sold in a few days. On 21 Dec. 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

FOOD, see *Provisions*.

FOOLS, FESTIVALS OF, were held at Paris on the 1st of January, where we are told all sorts of absurdities and indecencies were committed, from 1198 to 1438. Fools or licensed jesters were kept at court in England up to the time of Charles I. 1625.

FORBES MACKENZIE'S ACT (16 & 17 Vict. c. 67) "for the better regulation of public-houses in Scotland," passed in 1853. It permits grocers to sell spirits, &c., as usual, but forbids drinking on the premises, which is to be confined to places duly licensed. Much dram-drinking previously took place in grocers' shops.

FORCE, see *Conservation*, and *Correlation*.

FOREIGNERS, see *Alien*.

FOREIGN ENLISTMENT ACT, 59 Geo. III. c. 69 (1819), forbids British subjects to enter the service of a foreign state, without licence from the king or privy council, and also the fitting out or equipping ships for any foreign power to be employed against any power with which our government is at peace; see *Trials*, 1862, 1863. In 1606, Englishmen were

forbidden to enter foreign service, without taking an oath not to be reconciled to the pope. The act was suspended in 1835 on behalf of the *British Legion* (which see).

FOREIGN JURISDICTION ACTS were passed in 1843, 1865, and 1866.

FOREIGN LEGION. Foreigners have frequently been employed as auxiliaries in the pay of the British government; see *Hessians*. An act (18 & 19 Vict. c. 2) for the formation of a Foreign Legion as a contingent in the Russian war (1855), was passed 23 Dec. 1854.* The queen and prince Albert reviewed 3500 soldiers, principally Swiss and Germans, at Shorncliffe, 9 Aug. 1855. On the peace in 1856, many were sent to the Cape of Good Hope; but not prospering, returned.

FOREIGN OFFICE was established at the re-arrangement of the duties of secretaries of state in 1782. It has the exclusive charge of British interests and subjects in foreign countries. The secretary for foreign affairs negotiates treaties, selects ambassadors, consuls, &c., for foreign countries, and grants passports. The new foreign office, building in the Italian style (designed by Gilbert Scott), was begun in 1864. A portion of it was inaugurated by Mr. Disraeli's reception, 25 March, 1868.

FOREIGN ORDERS. No British subject is permitted to accept a foreign order from the sovereign of any foreign country, or wear the insignia thereof, without her majesty's consent,—regulations published in London Gazette, 10 May, 1855.

FORESTALLING was forbidden by statutes (in 1350, 1552, &c.), all repealed in 1844.

FORESTS. There were in England, even in the last century, as many as 68 forests, 18 chases, and upwards of 780 parks. The New Forest in Hampshire was made by William I., who for that purpose destroyed 36 parishes, pulled down 36 churches, and dispeopled the country for 30 miles round, 1079-85. *Stow*.†

FORESTS, CHARTER OF THE, *Charta de Foresta*, granted by Henry III. in 1217, was founded on *Magna Charta*, granted by king John, 15 June 1215; see *Woods*.

FORFARSHIRE STEAMER, on its passage from Hull to Dundee, on 6 Sept. 1838, was wrecked in a violent gale, and thirty-eight persons out of fifty-three perished. The Outer-Fern Lighthouse keeper, James Darling, and his heroic daughter Grace, ventured out in a tremendous sea in a coble, and rescued several of the passengers.

FORGERY. The forging deeds, or giving forged deeds in evidence, was made punishable by fine, by standing in the pillory, having both ears cut off, the nostrils slit up and seared, the forfeiture of land, and perpetual imprisonment, 5 Eliz. 1562. Since the establishment of paper credit many statutes have been enacted.

He filled up twenty of the notes and deposited them in the hands of a young lady whom he was on the point of marrying, as a proof of his being a man of substance; no suspicion was entertained. One of the artists was the informer. Vaughan was executed at Tyburn 1 May, 1758

FORKS were in use on the continent in the 13th and 14th centuries. *Voltaire*. This is reasonably disputed. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in Italy, and

* The endeavour to enlist for this legion, in 1854, in the United States, gave great offence to the American government. Mr. Crampton, our envoy, was dismissed 28 May, 1856, in spite of all the judicious pacific efforts of lord Clarendon. Lord Napier was sent out as our representative in 1857.

† The commissioners appointed to inquire into the state of the woods and forests, between 1787 and 1793, reported the following as belonging to the crown, viz. :—In Berkshire, Windsor Forest and Windsor Great and Little Park. In Dorset, Cranburn Chase. In Essex, Waltham or Epping and Hainault Forest. In Gloucestershire, Dean Forest. In Hampshire, the New Forest, Alice Holt, Woolmer Forest, and Bere Forest. In Kent, Greenwich Park. In Middlesex, St. James's, Hyde, Bushey, and Hampton-court Parks. In Northamptonshire, the forests of Whittlebury, Salcey, and Rockingham. In Nottingham, Sherwood Forest. In Oxford, Whichwood Forest. In Surrey, Richmond Park. Several of these have been disforested since 1851, viz., Hainault, Whichwood, and Whittlebury.

adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," 1608. Two-pronged forks at Sheffield were made soon after. Three-pronged forks are much more recent. Silver forks came into use in England about 1814.

FORMA PAUPERIS. A person having a just cause of suit, certified as such, yet so poor that he cannot meet the cost of maintaining it, has an attorney and counsel assigned him on his swearing that he is not worth *5*l.**, by stat. 11 Hen. VII. 1495.—This act has been remodelled, and now persons may plead *in formâ pauperis* in the courts of law.

FORMIC ACID, the acids of ants (*formicæ*). Its artificial production by Pelouze in 1831 is considered an event in the progress of organic chemistry.

FORMIGNI (N.W. France). Here the constable de Richemont defeated the English, 15 April, 1450.

FORNOVO (Parma, Italy). Near here Charles VIII. of France defeated the Italians, 6 July, 1495.

FORT ERIE (Upper Canada). This fortress was taken by the American general Browne, 3 June, 1814. After several conflicts it was evacuated by the Americans, 5 Nov. 1814.

FORT GEORGE, Inverness, N.W. Scotland, was erected in 1747, to restrain the Highlanders.—**FORT WILLIAM**, besieged by them in vain in 1746, is now in ruins.

FORTH AND CLYDE CANAL, commenced 10 July, 1768, under the direction of Mr. Smeaton, and opened 28 July, 1790. A communication was formed between the eastern and western seas on the coast of Scotland. A railway-bridge across the Frith of Forth was projected, and a raft launched on June 1866; but the scheme was abandoned.

FORTIFICATION. The Phœnicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Durer first wrote on the science of fortification in 1527; and great improvements were made by Vauban (1707) and others. The new fortifications of Paris were completed in 1846; see *Paris*. In Aug. 1860, the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway, and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment; the estimated expense being 9,500,000*l.*

FORTUNATE ISLES, see *Canaries*.

FORTUNE-TELLING is traced to the early astrologers, by whom the planets Jupiter and Venus were supposed to betoken happiness. The Sibyllæ were women said to be inspired by Heaven; see *Sibyls* and *Gipsies*. In England the laws against fortune-telling were at one time very severe. A declaration was published in France 11 Jan. 1680, of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. *Hénault*. Fortune-tellers, although liable by the acts of 1743 and 1824 to be imprisoned as rogues and vagabonds, still exist in England.

FORTY-SHILLING FREEHOLDERS, see *Freeholders*.

FORUM, at Rome, originally a market-place, became about 472 B.C. the place of assembly of the people in their tribes (the *Comitia*), and was gradually adorned with temples and public buildings.—Near **FORUM TEREBRONI**, in *Mœsia*, the Romans were defeated by the Goths, Nov. 251. After a struggle in a morass, the emperor Decius and his son were slain and their bodies not recovered.

FOTHERINGHAY CASTLE (Northamptonshire), built about 1400. Here Richard III. of England was born in 1450; and here Mary queen of Scots was tried, 11-14 Oct. 1586, and beheaded, 8 Feb. 1587. It was demolished by her son, James I. of England, in 1604.

FOUGHARD, near Armagh, N. Ireland. Here Edward, brother of Robert Bruce, after invading Ireland in 1315, was defeated by sir John Bermingham in 1318. Bruce was killed by Roger de Maupis, a burgess of Dundalk.

FOUNDLING HOSPITALS are ancient. A species of foundling hospital was set up at Milan in 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be the "children of the state."

No Foundling hospital in England when Addison wrote in . . . 1713
London foundling hospital, projected by Thomas Coram, a sea-captain, incorporated, Oct. 1739; opened . . . 2 June, 1756

Foundling hospital at Moscow, founded by Catherine II. in 1763; about 12,000 children are received annually.

FOUNTAINS are apparatus, natural or artificial, by which water is made to spring upwards. The fountain of Hero of Alexandria was invented about 150 B.C. Among the remarkable fountains at Rome are the Fontana di Trevi, constructed for pope Clement XII. in 1735; the Fontana Paolina, erected for pope Paul V. in 1612; and Fontana dell' Acqua Felice, called also the Fountain of Moses. The fountains in the palace gardens at Versailles, made for Louis XIV., and the Grand Jet d'Eau, at St. Cloud, are exceedingly beautiful. There are above 100 public fountains in Paris, the most striking being the Château d'Eau on the Boulevard St. Martin (by Girard, 1811) and that at the Palais Royal. London is not remarkable for fountains; the largest are in Trafalgar-square, constructed in 1845, after designs by sir Charles Barry. There are beautiful fountains at Chatsworth, in Derbyshire, the seat of the duke of Devonshire. The magnificent fountains at the Crystal Palace, Sydenham, were first publicly exhibited on 18 June, 1856, in the presence of the queen and 20,000 spectators.

FOURIERISM, a social system devised by M. Charles Fourier (who died in 1837). The Phalanstery (or association of 400 families living in one edifice) was to be so arranged as to give the highest amount of happiness at the lowest cost. All attempts to realise the system have failed; caused, it is said, by the smallness of the scale on which they were tried.

"**FOUR MASTERS**," a name given to Michael, Conary, and Cucogry O'Clery, and Ferfeasa O'Mulconry, who compiled from original documents the annals of Ireland from 2242 B.C. to A.D. 1616. An edition of these "Annals," printed from autograph MSS., with a translation edited by Dr. John O'Donovan, was published at Dublin in 1851. The "Four Masters" lived in the first half of the 17th century.

FOX, see *Reynard*.

FOX AND GRENVILLE ADMINISTRATION, see *Grenville Administration*.

FOX-GLOVE. The canary fox-glove (*Digitalis canariensis*) came from the Canary islands, 1698. The Madcira fox-glove came here in 1777. The fox-grape shrub (*Vitis Vulpina*), from Virginia, before 1656.

FRANC, the current silver French coin, superseded the *livre tournois* by law in 1795.

FRANCE was known to the Romans by the name of *Gaul* (*which see*). In the decline of their power it was conquered by the Franks, a people of Germany, then inhabiting Franconia, where they became known about 240. These invaders gave the name to the kingdom (*Franken-ric*, Franks' kingdom); but the Gauls, being by far the most numerous, are the real ancestors of the modern French. The present constitution is chiefly based upon the plebiscitums of 21, 22 Dec. 1851; and 21, 22 Nov. 1852. For the dynastic changes, see list of sovereigns, p. 314. Previous to the revolution, France was divided into 40 governments. In 1790 it was divided into 83 departments, and subsequently into 130, including Corsica, Geneva, Savoy, and other places, chiefly conquests. In 1815 the departments were reduced to 86; in 1860 they were raised to 89 by the acquisition of Savoy and Nice.* For details of more important events, see separate articles.

Population in 1859, 67,975; see *Germany*.

FRANKFORT-ON-THE-ODER (N. Germany); a member of the Hanseatic league, suffered much from marauders in the middle ages, and in the thirty years' war. The university was founded in 1506, and incorporated with that of Breslau in 1811. Near Frankfort, on 12 Aug. 1759, Frederick of Prussia was defeated by the Russians and Austrians; see *Cunnersdorf*.

FRANKING LETTERS, passing letters free of postage, was claimed by parliament about 1660. The privilege was restricted in 1837, and abolished on the introduction of the uniform penny postage, 10 Jan. 1840. The queen was among the first to relinquish her privilege.

FRANKLIN, the English freeholder in the middle ages; see "The Franklin's Tale," in Chaucer's *Canterbury Tales* (written about 1364).

FRANKLIN, SEARCH FOR. Sir John Franklin, with captains Crozier and Fitzjames, in H.M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenhithe, on 24 May, 1845; see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety throughout Europe, and numerous expeditions were sent from England and elsewhere in search of them. Quantities of coals, provisions, clothing, and other necessaries, were deposited in such places in the Arctic seas as the crews of the *Erebus* and *Terror* might visit by our own and by the American government, by lady Franklin, and numerous private persons. The *Truelove*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships as late as the previous March, beset or frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her Majesty's government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

1. H.M.S. *Plover*, capt. Moore (afterwards under capt. Maguire), sailed from Sheerness to Behring's Straits, in search 1 Jan. 1848
2. Land expedition under sir John Richardson and Dr. Rae, of the Hudson's Bay Company, left England 25 March, "
[Sir John Richardson returned to England in 1849, and Dr. Rae continued his search till 1851.]
3. Sir James Ross, with the *Enterprise* and *Investigator* (12 June, 1848), having also sailed in search to Barrow's Straits, returned to England (Scarborough) 3 Nov. 1849
4. The *Enterprise*, capt. Collinson, and *Investigator*, commander McClure, sailed from Ply-

- mouth for Behring's Straits 20 Jan. 1850
[Both of these ships proceeded through to the eastward.]
5. Capt. Austin's expedition, viz.: *Resolute*, capt. Austin, C.B.; *Assistance*, capt. Ommanney; *Intrepid*, licut. Bertie Cator; and *Pioneer*, licut. Sherard Osborn, sailed from England for Barrow's Straits 25 April, "
[Returned Sept. 1851.]
 6. The *Lady Franklin*, capt. Penny; and *Sophia*, capt. Stewart, sailed from Aberdeen for Barrow's Straits 13 April, "
[Returned home Sept. 1851.]
 7. THE AMERICAN expedition in the *Advance* and *Rescue*, under licut. De Haven and Dr.

FRANKLIN, SEARCH FOR, *continued.*

- Kane (son of the judge), towards which Mr. Grinnell subscribed 30,000 dollars, sailed for Lancaster Sound and Barrow's Straits; after drifting in the pack down Baffin's Bay, the ships were released in 1851 uninjured, May 25, 1850
8. The *Felix*, sir John Ross, fitted out chiefly by the Hudson Bay Company, sailed to the same locality 22 May, ,,
[Returned in 1851.]
9. H.M.S. *North Star*, commander Saunders, which had sailed from England in 1849, wintered in Wolstenholme Sound, and returned to Spithead 28 Sept. ,,
10. H.M.S. *Herald*, capt. Kellett, C.B., which had sailed in 1848, made three voyages to Behring's Straits, and returned in 1851
- Lieut. Pim went to St. Petersburg with the intention of travelling through Siberia to the mouth of the river Kolyma; but was dissuaded from proceeding by the Russian government 18 Nov. 1851
[The *Enterprise* and *Investigator* (see No. 4 above) not having been heard of for two years.]

11. Sir Edward Belcher's expedition, consisting of—*Assistance*, sir Edward Belcher, C.B.; *Resolute*, capt. Kellett, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. M'Clintock; and *Pioneer*, capt. Sherard Osborn, sailed from Woolwich 15 April, 1852
[This expedition had arrived at Beechy Island 14 Aug. 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS.

- Lady Franklin, from her own resources, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four separate private expeditions:
12. The *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow's Straits 5 June, 1850
[Returned 1 Oct. 1850.]
13. The *Prince Albert*, Mr. Kennedy, accompanied by lieut. Bellot, of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet 4 June, 1851
[Returned Oct. 1852.]
14. The *Isabel*, commander Inglefield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, July 6; and returned Nov. 1852
15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits 1853
16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it Aug. ,,
17. The second AMERICAN expedition, the *Advance*, under Dr. Kane, early in June, ,,
18. The *Phoenix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieut. Bellot, sailed in May; he returned, bringing despatches from sir E. Belcher, &c. Oct. ,,
- The *Investigator* and sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieut. Bellot* was unfortunately drowned in August while voluntarily

conveying despatches to sir E. Belcher. Capt. M'Clure had left the *Herald* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. passage. In Sept. 1851, the ship was again fixed in ice, and so remained till lieut. Pim and a party from capt. Kellett's ship, the *Resolute* (11) fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.

- Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party—namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on Oct. 22, 1854, with the melancholy relics, which have since been deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery.
19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in Oct. 1854
- Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. M'Clure, of the *Investigator*. The vessels had been abandoned in June† when the crews of the *Phoenix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England the captains were all tried by court-martial and honourably acquitted 17-19 Oct. ,,
- Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence in Aug. 21, 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. M'Clure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in May, 1855

* A monument to his memory was erected at Greenwich. His "Journal" was published in 1854.

† Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton 12 Dec. 1856; was visited by her Majesty on the 16th; and formally surrendered on the 30th.

Hartstene, accompanied by a brother of Dr. Kane as surgeon, 31 May, 1855 [On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieut. Hartstene, 18 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]
 The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June 1855, which returned Sept. following. Some more remains of Franklin's party were discovered.
 21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir) F. L. McClintock, R.N. (see No. 11)—sailed from Aberdeen 1 July, 1857; returned 22 Sept. 1859

On 6 May, 1859, lieut. Hobson found at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erebus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 05' N., and long. 98° 23' W.; that sir John Franklin died 11 June, 1847; and that the ships were deserted 22 April, 1848. Capt. McClintock continued the search, and discovered skeletons and other relics. His journal was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.
 Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving. A statue of sir John Franklin, by Noble, set up in Waterloo-place, was inaugurated 15 Nov. 1866.

FRANKS (or freemen), a name given to a combination of the North-western German tribes about 240, which invaded Gaul and other parts of the empire with various success; see *Gaul* and *France*.

FRATRICELLI (Little Brethren), a sect of the middle ages, originally Franciscan monks of the stricter sort. Their numbers increased, and they were condemned by a papal bull in 1317; and suffered persecution; but were not extinct till the 16th century. They resembled the "Brethren of the Free Spirit."

FRAUDULENT TRUSTEES ACT, 20 & 21 Vict. c. 54, was passed in 1857, in consequence of the delinquencies of sir John D. Paul, the British Bank frauds, &c. It was brought in by sir R. Bethell, then attorney-general, and is very stringent.

FRAUNHOFER'S LINES, see *Spectrum*.

FREDERICKSBURG (Virginia, N. America). On 10 Dec. 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of most desperate yet unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

FREDERICKSHALD (Norway). Charles XII. of Sweden was killed by a cannon-shot before its walls, while examining the works. His hand was on his sword, and a prayer-book in his pocket, 11 Dec. 1718.

FREE CHURCH (of Scotland*) was formed by an act of secession of nearly half the body from the national church of Scotland, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been subscribed. In 1853 there were 850 congregations. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.*, from which was paid the sum of 138*l.* each to 700 ministers.

FREE COMPANIES, see *Condottieri*.

FREEDMEN'S BUREAUS, established in the Southern States of North America in March, 1865, to protect the freed negroes. Having the support of martial law, these bureaus became very oppressive, and the act of congress making them permanent was vetoed by president Johnson in Feb. 1866.

FREEHOLDERS. Those under forty shillings per annum were not qualified to vote for members of parliament by 8 Hen. VI. c. 7, 1429. Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV. 1828; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege, passed 13 April, 1829; Reform acts, 1832 and 1867. County elections act, 7 Will. IV. 1836; see *Chandos Clause*.

* The rev. H. Hampton, one of the curates of Islington, having been dismissed, a part of his congregation erected a temporary church. The bishop of London, after inquiry, refused to license it. On this the congregation declared itself to be the *Free Church of England*, March, 1859. Eventually, he left the neighbourhood, and re-entered the establishment.

FREE LABOUR REGISTRATION SOCIETY, established for the benefit of employers and non-unionist workmen, in opposition to trades' unions, about July, 1867.

FREE TRADE principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who was very instrumental in passing these measures, termed "The Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 6th century. Its introduction into Britain has been fixed at 674; many of our Gothic cathedrals are attributed to freemasons. The grand lodge at York was founded 926. Freemasonry was interdicted in England, 1424. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, 30 Sept. 1865. The Freemasons' hall, Great Queen-street, London, was built 1775, and rebuilt in 1866; the charity was instituted 1788.

FRENCH CHURCH, see *Church of France*.

FRENCH LANGUAGE is mainly based on the rude Latin of the nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634), published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362. *Stov.*

FRENCH REVOLUTIONARY CALENDAR. In 1792, the French nation adopted a new calendar professedly founded on philosophical principles. The first year of the era of the republic began at midnight, between 21 and 22 Sept. 1792; but its establishment was not decreed until the 4th Frimaire of the year II., 24 Nov. 1793. The calendar existed until the 10th Nivose year of the republic XIV., 31 Dec. 1805, when the Gregorian mode of calculation was restored by Napoleon.

FRENCH TREATY, the term given to the treaty of commerce between Great Britain and France, signed 23 Jan. 1860, at Paris, by Lord Cowley and Richard Cobden and by the

ministers MM. Baroche and Rouher. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in North America (1861-5).

FRENCHTOWN (Canada), was taken from the British by the American general Winchester, 22 Jan. 1813, during the second war with the United States of America. It was retaken by the British forces under general Proctor, 24 Jan., and the American commander and troops were made prisoners.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt and Italy, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated; see *Stereochromy*.

FRÉTEVAL (central France). Here Richard I. of England defeated Philip II. of France, and captured his royal seal, archives, &c., 15 July, 1194.

FRIDAY, the sixth day of the week; so called from Friga, or Frea, the Scandinavian Venus. She was the wife of Thor, and goddess of peace, fertility, and riches, and with Thor and Odin composed the supreme council of the Gods; see *Good Friday*.

FRIEDLAND (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon, on 14 June, 1807. The allies lost eighty pieces of cannon and about 18,000 men; the French about 10,000 men. The peace of Tilsit followed, by which Prussia was obliged to surrender nearly half her dominions.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1642; and visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who gave them their present name on account of the friendly disposition of the natives, 1773. Subsequent voyagers describe them as very ferocious.

FRIENDLY SOCIETIES originated in the clubs of the industrious classes, about 1793, and have been regulated by various enactments. Other acts were passed in 1858 and 1860. These statutes were consolidated and amended by 18 & 19 Vict. c. 60.

FRIENDS, see *Quakers*.

FRIENDS OF THE PEOPLE associated to obtain parliamentary reform, 1792.

FRIESLAND: EAST (N. Germany), formerly governed by its own counts. On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, and afterwards to the French empire; but it was awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—**FRIESLAND**, WEST, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (sometimes, though rarely, written *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FRIULI (Venetia), made a duchy by Alboin the Lombard, when he established his kingdom about 570. It was conquered by Charlemagne, and Henri, a Frenchman, made duke, who was assassinated in 799, which was the fate of Berengarius, the duke and king of Italy, in 924. The emperor Conrad gave the duchy to his chancellor Poppo, patriarch of Aquileia, in the 11th century. It was conquered by Venice in 1420.

FROBISHER'S STRAITS, discovered by sir Martin Frobisher, who tried to find a north-west passage to China, and after exploring the coast of New Greenland, entered this strait, 11 Aug. 1576. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. This led to a third fruitless expedition. He was killed at the taking of Brest, 1594.

FRONDE, CIVIL WARS OF THE, in France, in the minority of Louis XIV. (1648-53), during the government of the queen Anne of Austria and cardinal Mazarine, between the followers of the court and the nobility, and the parliament and the citizens. The latter were called *Frondeurs* (*slingers*), it is said, from an incident in a street quarrel. In a riot on 27 Aug. 1648, barricades were erected in Paris.

FRUITS. Several varieties of fruit are said to have been introduced into Italy, 70 B.C. *et seq.* Exotic fruits and flowers of various kinds, previously unknown in England, were brought thither between the years 1500 and 1578; see *Gardening*, and *Flowers*.

FUCHSIA, an American plant named after the German botanist Leonard Fuchs, about 1542. The *Fuchsia fulgens*, the most beautiful variety, was introduced from Mexico, about 1830.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Aguada, with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, night came on and put an end to the battle. Next day, Massena was joined by Bessières with a body of the Imperial guard; and on 5 May, the enemy made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

FUGGER, an illustrious German family (the present head being prince Leopold Fugger Babenhhausen), derives its origin from John Fugger, a master weaver in Augsburg in 1370; and its wealth by trade, and by money-lending to monarchs, especially the emperors.

* "The frost this year was terrible. It began in the beginning of Dec. 1683. The people kept trades on the Thames as in a fair, till 4 Feb., 1684.
