The income from 1 "tan" of rice field in this village is estimated \$ 3600 a year according to Tax Office, and that of half "tan" ^{of vegetable farm} is \$ 1000.

This family's income by farming is estimated \$ 383 monthly, but as she must hire some helping hand, it should be inferred to be \$ 283.

 1. Haruichi demobilized on February 1945 and he used to work as stovedore with very good health until January of this year. But as he can not move his feet, he is absent from his work. Though he consulted a doctor Okujima and the red across hospital at Matsuyama, he could not receive reliable diagnosis. So he is learning to make bamboo-ware having moxa treatment.
 2. As this relief can not raise by standard allowance of present, it is nice that official deliver as early as possible the relief of next month for ration which price was gone up already.
