Floral Trade Customs

ORDERS for 2¼-inch pot roses must be for not less than three plants of any one variety at the dozen rate, and not less than 25 of any one variety at the hundred rate; three or more 4-inch at the dozen rate, and ten or more at the hundred rate. For two plants of a variety add 25%, and for one plant of a variety add 50% to the per dozen price.

TERMS—Cash (money order, draft or registered letter) with order will entitle purchaser to extra count in Roses of our selection equivalent to a 5 per cent. discount, or a discount of 3 per cent. may be deducted from remittance. C. O. D. orders must be accompanied with one-third of the amount in cash. Accounts opened only with known or favorably rated correspondents or those furnishing amply satisfactory references.

PACKING—Always free, in light boxes, securely strapped, ventilated in warm weather, well lined in cold weather. From one to two-thirds (and for very distant points all) soil removed and roots carefully wrapped in damp moss and paper.

DELIVERY f. o. b. express car or postoffice at Springfield, Ohio. Weather forecasts always carefully ascertained before forwarding during cold weather.

PARCEL POST is recommended as being usually the most economical and safe method of shipping, this service having proven almost invariably prompt and satisfactory, so that more soil may safely be removed and weight correspondingly reduced. Ascertain your zone distance, approximate the probable weight and make a fair allowance for postage; any excess amount remitted will be refunded or credited after exact weight and postage shall have been ascertained. Special delivery is frequently advantageous; insurance is cheap.

FREIGHT shipment will be made only upon explicit instructions and entirely at risk of purchaser. We assume no responsibility except to deliver properly packed and in good order to depot, bill and route correctly and follow with tracer.

COMPLAINTS will not be recognized unless lodged with us promptly after receipt of goods.

DEPENDABLE DESCRIPTIONS

Word Pictures—Not “hot air” shots aiming to effect the sale of longest blocks of stock; not individual preference or self-aggrandizing comment; **but**, a consensus of opinion compiled from every available domestic and foreign authority, supplemented by observation and experience.

(Abbreviations—See page 4-7).

Aglala—(See Yellow Rambler.)

Alexander Hill Gray—(A. Dickson, 1911.) (T.) Deep lemon-yellow, similar in color to Marechal Niel, more intense as the bloom expands. Large, full flowers with high pointed center and perfect form, freely produced and strongly tea perfumed. Robust, vigorous and erect. Gold Medal N. R. S.

Alida Lovett—(Van Fleet, 1905.) (H. T. W.) Large buds and full blooms of ideal form; bright shell-pink, with rich sulphur at base of petals, in size and form similar to but brighter than Dr. W. Van Fleet; fragrant; long-lived flowers on long, stiff stems; disease resistant. R. Wichuraiana × Souv. du Pres. Carnot.

Amelia Gude—(Lemon, 1923.) (H. T.) Color shade of “Sunburst” with touches of orange on the reverse, a fancy yellow forcer with blooms of an individual beauty not common to the rotund buds of modern varieties. A prolific year-around producer and great keeper; absolutely unique and strongly appealing to the fair sex for table decoration, corsage bouquets, baskets, etc.

American Beauty or **M’me Ferdinand Jamin**—(Ledechaux, 1875.) Rich red, passing to crimson, very delicately veined and shaded; grandly beautiful in size, form and color and surpassingly fragrant. A half century of newer varieties has not sufficed to displace it as a forcing or a garden Rose.

American Pillar—(Dr. W. Van Fleet, 1909.) (C. P.)—Large single flowers of rich rosy-pink, approaching brilliant carmine, just a glint of white at center and golden-yellow stamens, a profusion of bloom almost covering the foliage. Grows thick, vigorous canes and broad dark green leaflets, tough, shining and insect proof. A new and valuable climber originated by the U. S. Government Department of Plant Introduction. Wichuraiana × Setigera.

Anna de Diesbach or **Glory of Paris**—(Lacharme, 1859.) (H. P.) A lovely shell-pink; long pointed buds, very large petals and large, finely formed, compact flowers, very full and double; sweetly fragrant. A vigorous grower and bloomer.

Antoine Rivoire—(Pernet-Ducher, 1896.) (H. T.) Creamy-white, delicately tinted with pink; extra large petals, making a bloom of decidedly distinct and beautiful form; full and double.

LEEDLE SPRINGFIELD ROSES

Augustine Guinoisseau—(See White La France.)

Baby Doll or Tiptop—(Lambert, 1915.) (H. Pol) Brilliant golden-yellow, tipped with clear, bright cerise; lovely miniature "sweetheart" buds and blooms of perfect form and finish, borne in erect panicles and singly; deep, glossy green foliage, narrow, long and sharply pointed; in the Brunner class for corsage and dainty floral work and of even better habit.

Baby Crimson Rambler—(See Erna Teschendorff and Le Poncean.)

Baby Dorothy—(See Maman Levasseur.)

Baby Tausendschoen—(See Louise Welter.)

Balduin—(See Helen Gould.)

Barbara Robinson—(A. Dickson, 1925.) (H. T.) Very vigorous, free-branching, normal hybrid tea foliage; extremely floriferous; bud large and long pointed opening cleanly in all weathers to a well shaped double, high centered cream flower, sweetly scented.

Bessie Brown—(A. Dickson, 1899) (H. T.) Of a distinct type in shape and color and marvelously beautiful. Erect stems; full, deep blooms with enormous petals; white, flushed with pink, growing deeper toward center.

Bess Lovett—(Van Fleet, 1905.) (H. T. W.) Clear bright red, resembling "Climbing American Beauty" in form but much brighter in color; double, full, cupped, most fragrant and lasting flowers of good size; beauty enhanced by large, glossy green foliage.

Betty Uprichard—(A. Dickson, 1922.) (H. T.) Artistic shades of color with varying dominance under different lights, most difficult to portray. The inner face of petal is a delicate salmon-pink to carmine, while the reverse is glowing carmine with coppery sheen and a suffusion of orange; large smooth petals, Verbena perfumed. Vigorous and free branching with sage-green foliage and erect stems carrying elegantly pointed buds, free-flowering from June to frost. Gold Medal N. R. S. and Award of Merit R. H. S.

Black Prince—(W. Paul, 1862.) (H. P.) Intensely dark crimson, approaching black; cup-shaped, large and full; one of the finest of its class and color.

Blue Rambler—(See Veilchenblau.)

Blumenschmidt—(J. C. Schmidt, 1906.) (T.) Pure citron-yellow, outer petals edged tender rose. A sport from M'lle Franzisca Kruger, which it resembles in form and foliage.

Bonnie Prince—(Thos. N. Cook, 1916.) (C. P.) Tausendschoen \times unnamed seedling; type Mme. Alf. Carriere. Bud small, long-pointed; flower medium size, cupped, double, fragrant; white with tinge of yellow in center; borne in clusters. Foliage abundant, medium size, glossy rich green. Very vigorous and hardy climber; blooms profusely in June and occasionally thereafter. Introduced 1924 by Portland Rose Society.

Bon Silene—(Hardy, 1835.) (T.) Bright crimson-rose; large, beautiful buds and blooms with very long petals; a well-known old-time favorite ever fresh and new.

Briarcliff—(B. Greenhouses, 1925.) (H. T.) Habit very vigorous; long, strong stem bearing singly; abundant, dark green foliage; large, pointed bud, one-third longer than parent Columbia; very large flower with high center, fragrant and lasting; deep, true rose-pink at center, lighter on outer petals with a touch of citron-green at base.

Bridesmaid—(Moore, 1893.) (T.) Clear, shining pink; buds of exquisite shape; stems long and stiff; a profuse bloomer. A good forcer, and an outdoor favorite.

LEEDLE SPRINGFIELD ROSES

Captain Hayward—(Bennett, 1893.) (H. P.) Bright scarlet, very vivid in summer and glowing in autumn. Large, full and bold, the outer petals finely reflexed, while the center petals stand up well, making a flower of striking beauty.

Catherine Zeimet or White Baby Rambler—(P. Lambert, 1901.) (D.P.) Pure snow-white double blooms in profuse clusters, making a sheet of white color, with a fragrance similar to Hyacinths. A compact, bushy grower of dwarf habit; foliage dark, glossy and finely cut; ever-blooming and hardy

Champion of the World—(Woodhouse, 1894) (B.) Color of Hermosa, but larger flower. Vigorous and hardy.

Charles Dingee—(See Wm. R. Smith.)

Chatillon—(Turbat, 1923.) (D. P.) Lovely peach-pink, veined and splashed bright crimson, slightly fragrant; bud small and long pointed. Vigorous and bushy with disease resisting foliage; profuse and continuous bloomer Orleans \times seedling; Silver Gilt Medal, 1923; Award of Merit, F. H. S.

Christine Wright—(Hoopes Bros. & Thomas, 1913.) (C. H. T.) Bright wild-rose pink; flowers double and of immense size and perfect form; blooms singly and in clusters; profuse during June and more or less throughout the season; heavy, dark green foliage, immune from disease; strong climbing habit. M'me Caroline Testout \times unnamed seedling.

Climbing American Beauty—(Hoopes Bros. & Thomas, 1911.) (H. T. W.) A seedling from American Beauty with an admixture of Wichuraiana and Tea blood. Same as its namesake in size, color and fragrance, with better blooming qualities, good foliage, and has proven hardy and withstood heat and drought. American Beauty \times Marion Dingee \times Wichuraiana.

Climbing Balduin—(See Climbing Helen Gould.)

Climbing Clothilde Soupert—(Dingee, 1902.) (C. H. Pol.) Ivory-white, shading toward center to silvery-rose; perfectly full and double; rapid climber. abundant bloomer and hardy.

Climbing Devoniensis—(Pavit, 1858.) (C. T.) A sport from the bush Devoniensis, with which it is identical except in climbing habit and greater vigor.

Climbing Etoile de France—(Howard Rose Co., 1914.) (C. H. T.) Brilliant red-crimson velvet, centering to vivid cerise; identical with Etoile de France except in its vigorous habit.

Climbing General McArthur—(H. Dickson, 1923.) (C. H. T.) Sport, with all good qualities of parent; same full, deep, brilliant crimson flowers.

Climbing Gruss an Teplitz—(Storrs & Harrison, 1911.) (C. H. C.) Vivid fiery crimson, an exact duplicate of the bush Rose of this name except that it is a vigorous climber, producing a sheet of dazzling bloom. Superb for pillars.

Climbing Helen Gould—(Good, 1912.) (C. H. T.) Warm watermelon-red, same in color as its parent in bush form, which has long been in popular favor. A welcome climber.

Climbing Kaiserin—(See Mrs. Robert Peary.)

Climbing Killarney—(Geo. Reinberg, 1908.) (C. H. T.) A vigorous climber, otherwise possessing all of the splendid qualities of the parent Killarney.
