## P R E F A C E

Greenville, North Carolina, is located in the midst of the bright leaf tobacco belt and is a live, progressive, wide-awake business center. The town owns the water works, sewer, and electric light plant, has many miles of granolithic sidewalks and the main street is well paved from the depots through the business part of the town.

**HEALTH**—The health conditions of this part of North Carolina are unsurpassed. The climate is as good as any one could wish.

**SCHOOLS**—The school system in the town of Greenville is one of the best to be found in North Carolina. The town is now erecting a handsome high school building that will be worth, gilding and grounds, \$75,000. Connected with the public school system of the town is a Model School in which four grades of children are taught by the Critic teachers of the Training School.

Located in the town of Greenville is the East Carolina Teachers College, a state institution that has but one purpose in view, viz.: the training of young men and women for efficient service in the public schools of North Carolina.

The public school system of the County of Pitt is one of the best county systems in the State. Each year makes a decided advancement forward in the rural schools of this county. The County of Pitt has an All Time Health Officer who gives his entire services to the public schools and general health conditions of the county.

**RAILROADS**—The town of Greenville is situated at the intersection of the Norfolk-Southern and the Atlantic Coast Line Railroads. There are ten passenger trains passing through Greenville each day, giving ample accommodations to the traveling public. The town of Greenville, situated on Tar River, is touched by the Inland Deeper Water-ways work of the Federal Government, Tar River having been dredged up to Greenville.

**HOTELS**—There are two good hotels in our town. The last one erected, The Proctor, cost over \$800,000. If you come to our town we can take care of you.

**GOOD ROADS**—There has been spent, and is being spent, in Pitt County over \$200,000 in improving the public roads. Greenville is now easily accessible to every part of Pitt County and the adjoining counties. This makes the rich farming lands of this county in easy access to the markets, thus making this county one of the most desirable counties in Eastern Carolina for progressive farmers.

The soil and climate of Pitt County are well adapted to raising corn, cotton, tobacco, potatoes, trucking crops, fruits and vegetables. Stock and poultry raising should become one of the chief industries of our people. The soil is fertile and easily tilled. In no place can a man get a bigger return for his work upon the farm than here. The climate allows farm work for twelve months in the ear. The rainfall is abundant and well distributed throughout the year, thus giving neither floods nor drought.

## GREENVILLE, N. C.

VOL. II

THE PIEDMONT SERIES

1926

NOTE—Patronize those whose names are in large type, for they are the progressive ones and generally leaders in their line.

☞ Index appears in front of special business headings only, for which an extra charge is made.

(\*)—Purpose of star (\*) in front of name is to denote colored persons or firm, but we assume no responsibility for its wrong use; errors often creep in.

# Greenville Now Has Population of 9,059

## Census Just Completed Shows Gain of 3,287 Since Government Figures in 1920

(Special to Daily News)

Greenville, Nov. 17—The census taking to ascertain the population of Greenville, which has been in progress for several weeks under the supervision of an expert in this work, was completed today, showing the city to have 9,059 people living within the confines of the corporate limits. These figures do not include the several hundred people that are here each year for three or four months, engaged in the tobacco industry.

Of this total there are 5,183 whites and 3,871 negroes. This is the first accurate census taken since 1920 at which time Greenville proved to have a population of 5,772, making a total gain within a period of five years of 3,287, which increase is principally among the whites.
