An Act

To establish a Federal Advisory Council to Support Grandparents Raising Grandchildren.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Supporting Grandparents Raising Grandchildren Act”.

SEC. 2. FINDINGS.

Congress finds the following:

(1) More than 2,500,000 grandparents in the United States are the primary caretaker of their grandchildren, and experts report that such numbers are increasing as the opioid epidemic expands.

(2) Between 2009 and 2016, the incidence of parental alcohol or other drug use as a contributing factor for children’s out-of-home placement rose from 25.4 to 37.4 percent.

(3) When children cannot remain safely with their parents, placement with relatives is preferred over placement in foster care with nonrelatives because placement with relatives provides stability for children and helps them maintain family connections.

(4) The number of foster children placed with a grandparent or other relative increased from 24 percent in 2006 to 32 percent in 2016, according to data from the Department of Health and Human Services.

(5) Grandparents’ lives are enhanced by caring for their grandchildren; the overwhelming majority of grandparents report experiencing significant benefits in serving as their grandchildren’s primary caregivers.

(6) Providing full-time care to their grandchildren may decrease grandparents’ ability to address their own physical and mental health needs and personal well-being.

(7) Grandparents would benefit from better coordination and dissemination of information and resources available to support them in their caregiving responsibilities.

SEC. 3. ADVISORY COUNCIL TO SUPPORT GRANDPARENTS RAISING GRANDCHILDREN.

(a) **ESTABLISHMENT.**—There is established an Advisory Council to Support Grandparents Raising Grandchildren.

(b) **MEMBERSHIP.**—

(1) IN GENERAL.—The Advisory Council shall be composed of the following members, or their designee:

- (B) The Secretary of Education.

President of the Senate.*

One Hundred Fifteenth Congress
of the
United States of America

AT THE SECOND SESSION

*Begun and held at the City of Washington on Wednesday,
the third day of January, two thousand and eighteen*

An Act

To reauthorize the North Korean Human Rights Act of 2004, and for other purposes.

*Be it enacted by the Senate and House of Representatives of
the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the “North Korean Human Rights Reauthorization Act of 2017”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) In 2014, the United Nations Commission of Inquiry (COI) on Human Rights in the Democratic People’s Republic of Korea (DPRK) found that the grave human rights violations still being perpetrated against the people of North Korea, due to policies established at the highest level of the state, amount to crimes against humanity. Crimes include forced starvation, sexual violence against women and children, restrictions on freedom of movement, arbitrary detention, torture, executions, and enforced disappearances, among other hardships.

(2) The COI also noted that the Government of the People’s Republic of China is aiding and abetting in crimes against humanity by forcibly repatriating North Korean refugees back to the DPRK. Upon repatriation, North Koreans are sent to prison camps, tortured, or even executed. The Government of the People’s Republic of China’s forcible repatriation of North Korean refugees violates its obligation to uphold the principle of non-refoulement, under the United Nations Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (as made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)).

(3) Estimates from the COI suggest that between 80,000 and 120,000 people are believed to be imprisoned in political prison camps in North Korea. Another 70,000 are believed to be held at other detention facilities. Prisoners in both situations are subject to harsh conditions, limited food, sexual abuse, and in most cases hard labor.

(4) One of the findings of the COI report was the persecution of religious minorities, especially Christians. There is effectively no freedom of religion in North Korea, only worship of the Kim family. Christians are subjected to particularly acute persecution. It has been reported that Christians in North Korea have been tortured, forcibly detained, and even executed for possessing a Bible or professing Christianity.

(5) North Korea profits from its human rights abuses. A 2014 report from the Asian Institute for Policy Studies suggests that there are nearly 50,000 North Korean workers forced to labor overseas, sometimes without compensation, and for as much as 20 hours at a time. Workers that received compensation were not to be paid more than \$150 per month, which is between 10 to 20 percent of the value of the labor they performed. Based on this report, the regime may profit as much as \$360,000,000 annually from just 50,000 laborers.

(6) On July 6, 2016, the United States imposed sanctions on North Korean leader Kim Jong Un and other senior North Korean officials for human rights violations as required by the North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114–122). This was the first time that the United States had designated North Korean officials for human rights abuses.

(7) The North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114–122) requires the President to impose mandatory penalties under United States law on any person that “knowingly engages in, is responsible for, or facilitates serious human rights abuses by the Government of North Korea”.

(8) Although the United States Refugee Admissions Program remains the largest in the world by far, the United States has only resettled 212 refugees from North Korea since the date of the enactment of the North Korea Human Rights Act of 2004 (Public Law 108–333).

SEC. 3. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States Government should continue to make it a priority to improve information access in North Korea by exploring the use of new and emerging technologies and expanding nongovernmental radio broadcasting to North Korea, including news and information;

(2) the United Nations has a significant role to play in promoting and improving human rights in North Korea and should press for access for the Special Rapporteur on the situation of human rights in North Korea as well as the United Nations High Commissioner for Human Rights;

(3) because North Koreans fleeing into China face a well-founded fear of persecution upon their forcible repatriation, the United States should urge China to—

(A) immediately halt the forcible repatriation of North Koreans;

(B) allow the United Nations High Commissioner for Refugees unimpeded access to North Koreans inside China to determine whether such North Koreans require protection as refugees;

(C) fulfill its obligations under the 1951 United Nations Convention Relating to the Status of Refugees, the 1967 Protocol Relating to the Status of Refugees, and the Agreement on the Upgrading of the UNHCR Mission in the People’s Republic of China to UNHCR Branch Office in the People’s Republic of China (signed December 1, 1995);

(D) address the concerns of the United Nations Committee against Torture by incorporating the principle of non-refoulement into Chinese domestic legislation; and

(E) recognize the legal status of North Korean women who marry or have children with Chinese citizens, and ensure that all such children are granted resident status and access to education and other public services in accordance with Chinese law and international standards;

(4) the President should continue to designate all individuals found to have committed violations described in section 104(a) of the North Korea Sanctions and Policy Enhancement Act of 2016 (22 U.S.C. 2914(a)), regarding complicity in censorship and human right abuses;

(5) the United States currently blocks United States passports from being used to travel to North Korea without a special validation from the Department of State, and the Department of State should continue to take steps to increase public awareness about the risks and dangers of travel by United States citizens to North Korea;

(6) the United States should continue to seek cooperation from all foreign governments to allow the United Nations High Commissioner for Refugees (UNHCR) access to process North Korean refugees overseas for resettlement and to allow United States officials access to process refugees for resettlement in the United States (if that is the destination country of the refugees' choosing); and

(7) the Secretary of State, through diplomacy by senior officials, including United States ambassadors to Asia-Pacific countries, and in close cooperation with South Korea, should make every effort to promote the protection of North Korean refugees and defectors.

To carry out this paragraph, the President is authorized to issue regulations to facilitate the free-flow of information into North Korea.

“(3) RESEARCH AND DEVELOPMENT GRANT PROGRAM.—In accordance with the authorization described in paragraphs (1) and (2) to increase the availability and distribution of sources of information inside North Korea, the President, acting through the Secretary of State, is authorized to establish a grant program to make grants to eligible entities to develop or distribute (or both) new products or methods to allow North Koreans easier access to outside information. Such program may involve public-private partnerships.

“(6) RELIGIOUS MINORITIES.—Efforts to improve information access under this subsection should include religious communities and should be coordinated with the Office of International Religious Freedom to ensure maximum impact in improving the rights of religious persons in North Korea.

SEC. 317. DEPARTMENT OF DEFENSE ENVIRONMENTAL RESTORATION PROGRAMS.

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense has identified nearly 39,500 sites that fall under the installation restoration program sites and munitions response sites.

(2) The installation response program addresses contamination from hazardous substances, pollutants, or contaminants and active military installations, formerly used defense site properties, and base realignment and closure locations in the United States.

(3) Munitions response sites are known or suspected to contain unexploded ordnance, discarded military munitions, or munitions constitues are addressed through the military munitions response program.

(4) The installation restoration program sites and munitions response sites have had significant impacts on state and local governments that have had to bear the increased costs of environmental degradation, notably groundwater contamination, and local populations that have had to live with the consequences of contaminated drinking, including increased health concerns and decreasing property values.

(5) Through the end of fiscal year 2017, the Department of Defense had achieved response complete at 86 percent of installation restoration program sites and munitions response sites, but projects that it will fall short of meeting its goal of 90 percent by the end of fiscal year 2018.

(6) The fiscal year 2019 budget request for environmental restoration and base realignment and closure amounted to nearly \$1,318,320,000, a decrease of \$53,429,000 from the amount authorized in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91).

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the environmental restoration and base realignment and closure programs are important for the protection of the environment, the health of the military and civilian personnel and their families who live and work on military installations, to ensure that current and legacy military operations do not adversely affect the health or environments of surrounding communities;

(2) the Department of Defense and the Armed Forces should seek to reduce the financial burden on state and local government who are bearing significant costs of cleanup stemming from defense related activities;

(3) the Department of Defense and the Armed Forces should expedite and streamline cleanup at locations where contamination is having a direct impact on civilian access to clean drinking water;

(4) the Department of Defense and the Armed Forces should continue to engage with and help allay local community concerns about the safety of the drinking water due to environmental degradation caused by defense related activities; and

(5) the Department of Defense should seek opportunities to accelerate environmental restoration efforts where feasible, to include programming additional resources for response actions, investing in technology solutions that may expedite response actions, improving contracting procedures, increasing contracting capacity, and seeking opportunities for partnerships and other cooperative approaches.

(5) The cumulative impacts of multiple wind farms near a single radar on the ability of the National Oceanic and Atmospheric Administration and the National Weather Service to warn or forecast hazardous weather.

(6) An analysis of whether certain wind turbine projects, based on project layout, turbine orientation, number of turbines, density of turbines, proximity to radar, or turbine height result in greater impacts to the missions of Department of Defense, the National Oceanic and Atmospheric Administration, and the National Weather Service, and if so, how can those projects be better cited to reduce or eliminate NEXRAD impacts.

(7) Case studies where the Department of Defense, the National Weather Service, and industry have worked together to implement solutions.

(8) Mitigation options, including software and hardware upgrades, which the National Oceanic and Atmospheric Administration and the National Weather Service have researched and analyzed, and the results of such research and analysis.

SEC. 334. SURFACE WARFARE TRAINING IMPROVEMENT.

(a) FINDINGS.—Congress makes the following findings:

(1) In 2017, there were three collisions and one grounding involving United States Navy ships in the Western Pacific. The two most recent mishaps involved separate incidents of a Japan-based United States Navy destroyer colliding with a commercial merchant vessel, resulting in the combined loss of 17 sailors.

(2) The causal factors in these four mishaps are linked directly to a failure to take sufficient action in accordance with the rules of good seamanship.

(3) Because risks are high in the maritime environment, there are widely accepted standards for safe seamanship and navigation. In the United States, the International Convention on Standards of Training, Certification and Watchkeeping (hereinafter in this section referred to as the “STCW”) for Seafarers, standardizes the skills and foundational knowledge a maritime professional must have in seamanship and navigation.

(4) Section 568 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328; 130 Stat. 2139) endorsed the STCW process and required the Secretary of Defense to maximize the extent to which Armed Forces service, training, and qualifications are creditable toward meeting merchant mariner licenses and certifications.

(5) The Surface Warfare Officer Course Curriculum is being modified to include ten individual Go/No Go Mariner Assessments/Competency Check Milestones to ensure standardization and quality of the surface warfare community.

(6) The Military-to-Mariner Transition report of September 2017 notes the Army maintains an extensive STCW qualifications program and that a similar Navy program does not exist.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Secretary of the Navy should establish a comprehensive individual proficiency assessment process and include such

an assessment prior to all operational surface warfare officer tour assignments; and

(2) the Secretary of the Navy should significantly expand the STCW qualifications process to improve seamanship and navigation individual skills training for surface warfare candidates, surface warfare officers, quartermasters and operations specialists to include an increased set of courses that directly correspond to STCW standards.

(c) REPORT.—Not later than March 1, 2019, the Secretary of the Navy shall submit to the congressional defense committees a report that includes each of the following:

(1) A detailed description of the surface warfare officer assessments process.

(2) within each category of depot level maintenance and repair for each entities, the amount of the subset of depot maintenance workload that meets the description under section 2464 of title 10, United States Code, that is performed in the public and private sectors by direct labor hours and by dollars;

(3) of the subset referred to in paragraph (2), the amount of depot maintenance workload performed in the public and private sector by direct labor hour and by dollars for each entity that would otherwise be considered core workload under such section 2464, but is not considered core because a weapon system or equipment has not been declared a program of record; and

(C) negative evaluations of a subcontractor in no way obviate the prime contractor's responsibility for successful completion of the contract and management of its subcontractors; and

(2) Required performance evaluations, as part of a government-wide evaluation reporting tool, of individual partners of joint venture-awarded construction and architect-engineer contracts valued at the threshold set forth in section 42.1502(e) of the Federal Acquisition Regulation, to ensure that past performance on joint venture projects is considered in future awards to individual joint venture partners, provided—

(C) the rating clearly identifies the responsibilities of joint venture partners for discrete elements of the work where the partners are not jointly and severally responsible for the project.

(A) where no severable element of the work has been completed;

(B) where the contracting officer determines that—

(i) an insubstantial portion of the contract work has been completed in the preceding year; and

Subtitle A—Committee on Foreign Investment in the United States

SEC. 1701. SHORT TITLE: FOREIGN INVESTMENT RISK REVIEW MODERNIZATION ACT OF 2018.

This subtitle may be cited as the “Foreign Investment Risk Review Modernization Act of 2018”.

SEC. 1702. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress makes the following findings:

(1) According to a February 2016 report by the International Trade Administration of the Department of Commerce, 12,000,000 United States workers, equivalent to 8.5 percent of the labor force, have jobs resulting from foreign investment, including 3,500,000 jobs in the manufacturing sector alone.

(2) In 2016, new foreign direct investment in United States manufacturing totaled \$129,400,000,000.

(3) The Bureau of Economic Analysis of the Department of Commerce concluded that, in 2015—

(A) foreign-owned affiliates in the United States—

(i) contributed \$894,500,000,000 in value added to the United States economy;

(ii) exported goods valued at \$352,800,000,000, accounting for nearly a quarter of total exports of goods from the United States; and

(iii) undertook \$56,700,000,000 in research and development; and

(B) the 7 countries investing the most in the United States, all of which are United States allies (the United Kingdom, Japan, Germany, France, Canada, Switzerland, and the Netherlands) accounted for 72.1 percent of the value added by foreign-owned affiliates in the United States and more than 80 percent of research and development expenditures by such entities.

(4) According to the Government Accountability Office, from 2011 to 2016, the number of transactions reviewed by the Committee on Foreign Investment in the United States (commonly referred to as “CFIUS”) grew by 55 percent, while the staff of the Committees assigned to the reviews increased by 11 percent.

(5) According to a February 2018 report of the Government Accountability Office on the Committee on Foreign Investment in the United States (GAO-18-249): “Officials from Treasury and other member agencies are aware of pressures on their CFIUS staff given the current workload and have expressed concerns about possible workload increases.”. The Government Accountability Office concluded: “Without attaining an understanding of the staffing levels needed to address the current and future CFIUS workload, particularly if legislative changes to CFIUS’s authorities further expand its workload, CFIUS may be limited in its ability to fulfill its objectives and address threats to the national security of the United States.”.

(6) On March 30, 1954, Dwight David Eisenhower—five-star general, Supreme Allied Commander, and 34th President of the United States—in his “Special Message to the Congress on Foreign Economic Policy”, counseled: “Great mutual advantages to buyer and seller, to producer and consumer, to investor and to the community where investment is made, accrue from high levels of trade and investment.”. President Eisenhower continued: “The internal strength of the American economy has evolved from such a system of mutual advantage. In the press of other problems and in the haste to meet emergencies, this nation—and many other nations of the free world—have all too often lost sight of this central fact.”. President Eisenhower concluded: “If we fail in our trade policy, we may fail in all. Our domestic employment, our standard of living, our security, and the solidarity of the free world—all are involved.”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) foreign investment provides substantial economic benefits to the United States, including the promotion of economic growth, productivity, competitiveness, and job creation, thereby enhancing national security;

(2) maintaining the commitment of the United States to an open investment policy encourages other countries to reciprocate and helps open new foreign markets for United States businesses;

(3) it should continue to be the policy of the United States to enthusiastically welcome and support foreign investment, consistent with the protection of national security;

(4) at the same time, the national security landscape has shifted in recent years, and so has the nature of the investments that pose the greatest potential risk to national security, which warrants an appropriate modernization of the processes and

authorities of the Committee on Foreign Investment in the United States and of the United States export control system;

(5) the Committee on Foreign Investment in the United States plays a critical role in protecting the national security of the United States, and, therefore, it is essential that the member agencies of the Committee are adequately resourced and able to hire appropriately qualified individuals in a timely manner, and that those individuals' security clearances are processed as a high priority;

(6) the President should conduct a more robust international outreach effort to urge and help allies and partners of the United States to establish processes that are similar to the Committee on Foreign Investment in the United States to screen foreign investments for national security risks and to facilitate coordination;

(7) the President should lead a collaborative effort with allies and partners of the United States to strengthen the multilateral export control regime;

(8) any penalties imposed by the United States Government with respect to an individual or entity pursuant to a determination that the individual or entity has violated sanctions imposed by the United States or the export control laws of the United States should not be reversed for reasons unrelated to the national security of the United States; and

(9) the Committee on Foreign Investment in the United States should continue to review transactions for the purpose of protecting national security and should not consider issues of national interest absent a national security nexus.

(c) SENSE OF CONGRESS ON CONSIDERATION OF COVERED TRANSACTIONS.—It is the sense of Congress that, when considering national security risks, the Committee on Foreign Investment in the United States may consider—

(1) whether a covered transaction involves a country of special concern that has a demonstrated or declared strategic goal of acquiring a type of critical technology or critical infrastructure that would affect United States leadership in areas related to national security;

(2) the potential national security-related effects of the cumulative control of, or pattern of recent transactions involving, any one type of critical infrastructure, energy asset, critical material, or critical technology by a foreign government or foreign person;

(3) whether any foreign person engaging in a covered transaction with a United States business has a history of complying with United States laws and regulations;

(4) the control of United States industries and commercial activity by foreign persons as it affects the capability and capacity of the United States to meet the requirements of national security, including the availability of human resources, products, technology, materials, and other supplies and services, and in considering "the availability of human resources", should construe that term to include potential losses of such availability resulting from reductions in the employment of United States persons whose knowledge or skills are critical to national security, including the continued production in the United States of items that are likely to be acquired by the

Department of Defense or other Federal departments or agencies for the advancement of the national security of the United States;

(5) the extent to which a covered transaction is likely to expose, either directly or indirectly, personally identifiable information, genetic information, or other sensitive data of United States citizens to access by a foreign government or foreign person that may exploit that information in a manner that threatens national security; and

(6) whether a covered transaction is likely to have the effect of exacerbating or creating new cybersecurity vulnerabilities in the United States or is likely to result in a foreign government gaining a significant new capability to engage in malicious cyber-enabled activities against the United States, including such activities designed to affect the outcome of any election for Federal office.

“(D) OTHER INVESTMENTS.—

“(i) OTHER INVESTMENT DEFINED.—For purposes of subparagraph (B)(iii), the term ‘other investment’ means an investment, direct or indirect, by a foreign person in a United States business described in that subparagraph that is not an investment described in subparagraph (B)(i) and that affords the foreign person—

“(cc) the management, operation, manufacture, or supply of critical infrastructure.

In prescribing such regulations, the Committee shall specify criteria to limit the application of such clauses to the investments of certain categories of foreign persons. Such criteria shall take into consideration how a foreign person is connected to a foreign country or foreign government, and whether the connection may affect the national security of the United States.

“(F) TRANSFERS OF CERTAIN ASSETS PURSUANT TO BANKRUPTCY PROCEEDINGS OR OTHER DEFAULTS.—The Committee shall prescribe regulations to clarify that the term ‘covered transaction’ includes any transaction described in subparagraph (B) that arises pursuant to a bankruptcy proceeding or other form of default on debt.

“(BB) SUBSTANTIAL INTEREST DEFINED.—In this item, the term ‘substantial interest’ has the meaning given that term in regulations which the Committee shall prescribe.
