CHATS WITH YOUR GAS MAN

We want you to limit the amount of gas you use to your exact needs. Here are a few ways to do it:

If you are boiling water, do not heat a quart when a pint is enough. When the water comes to a boiling point and you wish to keep it there, it is not necessary to leave the gas on full to do so. Turn it down. Water violently agitated with a tremendous heat under it is only escaping in the form of steam.

“A watched pot never boils,” they say, because in watching it you remove the cover and part of the heat escapes. Keep the covers of utensils on when it is possible, and have covers fit properly.

Always light the gas after, not before, you have placed the utensil over the burner. Also turn out the gas before, not after taking the utensil off the range. In the course of a year, this little rule in itself will well repay your care.

Directory Service

Directory service is an integral part of our everyday life. There is nothing in any community that offers the vast amount of free public service, such as a directory gives and is giving every day in the year.

It is a great service to print every one's name—your business or occupation, your home and business address—free, without any trouble or expense to you at all.

It is a great public service to furnish this information to a community. In addition to this the directory is a great exposition of the people and their institutions. It contains everything of importance in the community. Every question they may ask is promptly and correctly answered by this ready reference publication, and all this information is constantly available to the public.

This is a service of inestimable value. The directory is a booster—a great economizer of time and effort—a public benefactor and historian.

You can find all the people all the time in your local directory.
