Chapter III—Federal Aviation Agency

SUBCHAPTER C—AIRCRAFT REGULATIONS

[Reg. Docket No. 1736; Amdt. 566]

PART 507—AIRWORTHINESS DIRECTIVES

McCaughey Model 2AF36C39/78BF Propeller

As the result of a recent inflight blade failure on a McCaughey Model 2AF36C39/78BF-0 propeller, it has been determined that these blades must be replaced within 25 hours after accumulating the maximum specified hours of service. Pending replacement, the r.p.m. range for continuous operation is being restricted. Accordingly, an airworthiness directive is being issued to require inspection and replacement of these blades.

As a situation exists which demands immediate action in the interest of safety, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days after date of publication in the FEDERAL REGISTER.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 507.10(a) of Part 507 (14 CFR Part 507), is hereby amended by adding the following new airworthiness directive:

MCCAUGHEY: Applies to McCaughey full feathering and constant speed propeller Model 2AF36C39 equipped with Model 78BF blades and those modified to Model 78BFM, but excluding the following: original Model 78BFM blades, those blades having serial numbers with a "Y" suffix, and those blades or blade assemblies which are metal stamped with identification "Pxxxx-3993" along with a 5 digit serial number without a suffix. (Example: P1062-3993, S/N 27236.)

(Note: These propellers may be found on Beech Models 95-55 and 95-A55 aircraft.) Compliance required as indicated.

Because of cracking in the blade threaded shank, accomplish the following:

(a) Propellers with blades having accumulated the maximum time in service as listed in Table I of McCaughey Service Bulletin No. 53 dated March 4, 1963, before the effective date of this AD, must be replaced prior to the accumulation of 25 hours' time in service after the effective date of this AD.

(b) Propellers with blades having accumulated less than the maximum time in service as listed in Table I of McCaughey Service Bulletin No. 53 dated March 4, 1963, on the effective date of this AD, must be replaced prior to the accumulation of 25 hours' time after the maximum time listed in Table I of McCaughey Service Bulletin No. 53 dated March 4, 1963.

(c) Propellers with affected blades that are continued in service regardless of the number of hours service, shall not be operated continuously between 2,250 and 2,400 r.p.m. Aircraft with affected blades installed shall be so placarded within 5 hours' time

in service after the effective date of this AD. The placard may be removed when the blades are replaced.

(d) Identification of propeller blade serial numbers shall be determined in accordance with McCaughey Service Bulletin No. 53 dated March 4, 1963.

(e) Replacement of blades shall be made in accordance with instructions in McCaughey Service Bulletin No. 53 dated March 4, 1963.

(f) Revise the FAA approved Flight Manual to incorporate operating limitations covering the new propeller installed. An AFM Supplement containing this material may be obtained from the airplane or propeller manufacturer.

(McCaughey Service Bulletin No. 53 dated March 4, 1963, including supplemental revisions, and Service Manual 601101 cover this subject.)

This amendment shall become effective May 20, 1963.

(Secs. 313(a), 601, 603; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423)

Issued in Washington, D.C., on May 3, 1963.

G. S. MOORE,

Director, Flight Standards Service.

Title 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

PART 43a—MEMBERSHIP ROLL OF PONCA TRIBE OF NATIVE AMERICANS OF NEBRASKA

Applications, Appeals, and Preparation of Roll

On page 1481 of the FEDERAL REGISTER of February 15, 1963, there was published a notice and text of a proposed amendment of Title 25, Code of Federal Regulations, adding a new Part 43a. The purpose of the regulations is to govern the preparation of a final membership roll of the Ponca Tribe of Native Americans of Nebraska in accordance with the provisions of the Act of September 5, 1962 (76 Stat. 429).

Interested persons were given 30 days within which to submit written comments, suggestions or objections with respect to the proposed regulations.

As the result of comments received within the 30-day period, which were carefully considered, the proposed regulations are hereby adopted with the following changes and are set forth below:

1. To facilitate the completion of the work incident to the preparation of the roll, the phrase "or his authorized representative" has been added to the definition of "Director" in § 43a.1(c).

2. Inasmuch as "Tribe" is defined in § 43a.1(d), the phrase "Ponca Tribe of Native Americans of Nebraska" has been deleted from § 43a.2 and the word "Tribe" substituted therefor.

3. Due to inadequacies in the method of indicating degree of Ponca Indian blood on the April 1, 1934, census roll and the January 1, 1935, supplement thereto, the second sentence of § 43a.3(a)(2) has been deleted and the following language substituted therefor: "All available records will be used in deter-

mining degree of Ponca Indian blood possessed by descendants. Except for Ponca of Oklahoma Indian blood the Indian blood of tribes other than Ponca will not be considered in the computation of degree of Ponca Indian blood."

4. To reflect more clearly the intent of the Congress as expressed in the Act, the language in § 43a.3(b)(1) has been deleted.

5. In order to provide a more reasonable opportunity for interested persons to file applications for enrollment, the time limit allowed in § 43a.4(b) is increased from two to six months.

MILK IN SUBURBAN ST. LOUIS; ST. LOUIS, MISSOURI; AND OZARKS MARKETING AREAS

Notice of Hearing on Proposed Amendments to Tentative Marketing Agreements and Orders

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Colonial Hotel, 300 St. Louis Street, Springfield, Missouri, beginning at 9:00 a.m., local time, on June 4, 1963, and at the Coronado Hotel, Lindell Boulevard at Spring Avenue, St. Louis, Missouri, beginning at 9:30 a.m., local time, on June 5, 1963, with respect to proposed amendments to the tentative marketing agreements and to the orders, regulating the handling of milk in the Suburban St. Louis, St. Louis, Missouri, and Ozarks marketing areas.

The public hearing is for the purpose of receiving evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreements and to the orders.

A proposal to combine under one order the St. Louis, Missouri, marketing area and most of the Ozarks marketing area (a portion of this marketing area would cease to be regulated were the proposal adopted) together with additional territory contemplates termination of Order No. 67 (Ozarks) with a merger of the administrative, marketing service, and producer-settlement funds. This proposal also raises the issue whether the present provisions of either Order 67 or Order 62, if amended in accordance with the proposals set forth below, would tend to effectuate the declared policy of the Act, if they are applied to the marketing area as proposed to be redefined, and if not, what modification of the provisions of either of the orders would be appropriate.

The proposal relative to a redefinition of the Suburban St. Louis marketing area raises the issue whether the provisions of the present order would tend to effectuate the declared policy of the Act, if they are applied to the marketing area as proposed to be redefined and, if not, what modifications of the provisions of the order would be appropriate.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

(ii) One and one-half percent of that contained in skim milk and butterfat received in bulk tank lots excluding that contained in milk received from dairy farmers; less

(iii) One and one-half percent of that contained in milk disposed of in bulk tank lots to other plants excluding milk diverted pursuant to § 1062.8(b);

Provided, That shrinkage of skim milk and butterfat not in excess of the percentages specified herein shall be assigned pro rata pursuant to this subparagraph to skim milk and butterfat, respectively, in approved milk received from producers and from other pool plants and in nonproducer milk;

(4) Disposed of in bulk to any manufacturer of candy, soup, or bakery products who does not dispose of fluid milk, or operate a retail or wholesale outlet; and

(5) The weight of skim milk in fortified skim milk products which is not classified as Class I pursuant to subparagraph (a)(2) of this section.

§ 1062.42 Responsibility of handlers and reclassification of milk.

(a) All skim milk and butterfat shall be classified as Class I milk unless the handler who first receives such skim milk and butterfat proves to the market administrator that such skim milk and

butterfat shall be classified in another class.

(b) Any skim milk or butterfat classified in one class shall be reclassified if used or reused by such handler or by another handler (except a producer-handler) in another class.

§ 1062.43 Transfers.

Skim milk and butterfat transferred or diverted in bulk form as any product designated in § 1062.7 from a pool plant or by a cooperative association in its capacity as a handler pursuant to § 1062.13 (c) and (d) shall be classified as follows:

(a) As Class I milk if transferred to a pool plant unless:

(1) The transferee and transferor handlers claim Class II utilization in their reports submitted pursuant to § 1062.30;

(2) The transferee plant has utilization in Class II of an equivalent amount of skim milk and butterfat;

(b) As Class I milk if moved to the plant of a producer-handler;

(c) As Class I milk (except that contained in cream which is moved to a nonpool plant pursuant to paragraph (e) of this section) if moved to a nonpool plant which is not the plant of a producer-handler unless:

(1) The transferee plant is located within 110 airline miles from the City Hall in St. Louis, Missouri, or in the State of Missouri south of the Missouri River;

(2) The transferor handler claims classification of such skim milk and butterfat in Class II in his report submitted pursuant to § 1062.30;

(3) The operator of the transferee plant maintains books and records showing the utilization of all skim milk and butterfat received in any form at such plant, which are made available if requested by the market administrator for the purpose of verification;

(d) As Class I milk (except that contained in cream which is moved to a nonpool plant which is not subject to the classification and pricing provisions of another order issued pursuant to the Act pursuant to paragraph (e) of this section) if moved to a nonpool plant to the extent of the pro rata quantity of skim milk and butterfat pursuant to the following computations if the skim milk and butterfat, respectively, is not classified as Class I milk pursuant to paragraph (c) of this section:

(i) From the total skim milk and butterfat, respectively, disposed of from such nonpool plant and classified as Class I milk pursuant to the classification provisions of this part applied to such nonpool plant, subtract the skim milk and butterfat received at such plant directly from dairy farmers who are approved to supply Grade A milk and who the market administrator determines constitute the regular source of supply for such nonpool plant;

(ii) From the remaining amount of skim milk and butterfat, respectively, classified as Class I milk at such nonpool plant subtract any Class I milk received in consumer-type packages from a plant fully regulated by this or another Federal order issued pursuant to the Act;

(iii) Prorate the remaining Class I milk to bulk receipts at the nonpool plant which are classified as Class I pursuant to this and other Federal milk orders issued pursuant to the Act;

(iv) The quantity of such Class I prorated to receipts from pool plants subject to this part shall be further prorated to such plants in accordance with the quantities claimed to be moved to such nonpool plant as Class II milk; and

(v) If any skim milk or butterfat is disposed of from the first receiving nonpool plant in the form of bulk milk, skim milk, or cream to another nonpool plant(s), the market administrator shall determine in the same manner the classification of such skim milk and butterfat at the nonpool plant where actually used or processed when necessary to support a claim of Class II classification;

(e) As Class I milk is transferred in bulk form as cream to a nonpool plant unless:

(1) Such cream is transferred without Grade A certification of any health authority;

(2) The handler claims Class II in his report submitted to the market administrator pursuant to § 1062.30 on or before the 7th day after the end of the month within which such transaction occurred;

(3) The buyer maintains books and records showing the utilization of all skim milk and butterfat at his plant which are made available if requested by the market administrator for the purpose of verification; and

(4) Not less than an equivalent amount of skim milk and butterfat was actually used as Class II milk in such buyer's plant.

§ 1062.44 Computation of skim milk and butterfat in each class.

For each month, the market administrator shall correct for mathematical and other obvious errors the reports submitted by each handler and compute the total pounds of skim milk and butterfat, respectively, in Class I milk and Class II milk for such handler, or in the case of a cooperative association for that milk received pursuant to § 1062.13(c) or diverted to a nonpool plant pursuant to § 1062.13(d): *Provided,* That if any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk used or disposed of in such product shall be considered to be a quantity equivalent to the nonfat milk solids contained in such product plus all the water originally associated with such solids.

MINIMUM PRICES

§ 1062.50 Basic formula price.

The basic formula price for each month to be used in determining the price set forth in § 1062.51(a) shall be the average price per hundredweight for manufacturing milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the delivery period, adjusted to a 3.5 percent butterfat basis by a butterfat differential computed by multiplying the Chicago butter price for the preceding month by 0.120. The

basic formula price as adjusted to a 3.5 percent basis shall be rounded to the nearest full cent.

§ 1062.51 Class prices.

Subject to the provisions of §§ 1062.52 and 1062.53, the class prices per hundredweight shall be as follows:

(a) *Class I milk price.* The Class I price shall be equal to the price for Class I milk established for the same month under Federal order No. 30 regulating the handling of milk in the Chicago, Illinois, marketing area, plus 50 cents, and plus or minus the amounts provided in subparagraphs (1) and (2) of this paragraph:

(1) If the utilization percentage calculated pursuant to subparagraph (2) of this paragraph exceeds 130 subtract, or if it is less than 130 add, an amount calculated by multiplying the difference between such percentage and 130 by 2 cents;

(2) For each month calculate a utilization percentage by dividing the net pounds of Class I milk disposed of from all pool plants plus the Class I milk disposed of in the marketing area from nonpool plants, all for the 12-month period ending with the beginning of the preceding month, into the total pounds of producer milk during such 12-month period; multiplying by 100; adding or subtracting, respectively, any amount by which such result is greater or less than a comparable 12-month utilization percentage as computed for the third month preceding; and rounding the resultant figure to the nearest whole percent.

(b) *Class II milk price.* For each month the Class II milk price shall be the higher of an amount computed as follows:

(1) The average U.S. price for manufacturing milk, less five and one-half cents per hundredweight, or

(2) The price reported by the following milk plants to have been paid for milk of 3.5 percent butterfat content for the month, plus 15 cents per hundredweight:

Plant and Location

- Carnation Co.—Mt. Vernon, Mo.
- Kraft Cheese Co.—Springfield, Mo.
- Producers Creamery Co.—Springfield, Mo.
- Litchfield Milk Co.—Litchfield, Ill.
- Pet Milk Co.—Neosho, Mo.

§ 1062.52 Location differentials to handlers.

For approved milk which is received at a country plant or city plant located more than 30 airline miles from the City Hall in St. Louis, Missouri, which is classified as Class I milk, the price specified in § 1062.51(a) shall be reduced at the rate set forth in the following schedule:

Distance (miles)	Rate per hundredweight (cents)
More than 30 but not more than 40	16
For each additional 10 miles or fraction thereof an additional	1

(a) For approved milk which is received at a pool plant located in Springfield, Missouri, the price specified in § 1062.51(a) shall be reduced by 27 cents per hundredweight;

(b) For the purpose of calculating such location differential with respect to approved milk transferred to pool plants, the Class II milk in the transferee plant shall be assigned to nonproducer milk and then to approved milk from other plants in sequence according to the location differential applicable at each plant from which approved milk was received, beginning with the plant having the largest differential.

§ 1062.53 Butterfat differentials to handlers.

If the average butterfat test of Class I milk or Class II milk, is more or less than 3.5 percent, there shall be added to, or subtracted from as the case may be, the price for such class of utilization, for each one-tenth of one percent that such average butterfat test is above or below 3.5 percent, a butterfat differential calculated for each class of utilization as follows:

(a) *Class I milk.* Multiply the Chicago butter price for the preceding month by 0.100 and round to the nearest one-tenth cent.

(b) *Class II milk.* Multiply the Chicago butter price for the month by 0.100 and round to the nearest one-tenth cent.

§ 1062.54 Use of equivalent prices.

If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1062.60 Producer-handlers.

Sections 1062.50 through 1062.54, 1062.70 through 1062.72, and 1062.80 through 1062.88 shall not apply to a producer-handler.

§ 1062.61 Plants subject to other Federal orders.

The provisions of this part shall not apply with respect to skim milk and butterfat disposed of as Class I milk on routes within the marketing area to any city plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act, unless such plant qualifies as a pool plant pursuant to § 1062.11(a) and the Secretary determines that more Class I milk is disposed of from such plant in the St. Louis-Ozarks marketing area than in the marketing area regulated pursuant to such other order. The operator of such plant shall with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require, and allow verification of such reports by the market administrator.

§ 1062.62 Handlers operating nonpool plants.

In lieu of the payments required pursuant of §§ 1062.80 through 1062.88, each handler, other than a producer-handler or one exempt pursuant to § 1062.61, who operates during the month a non-

pool plant from which Grade A Class I milk products are distributed on routes in the marketing area, shall pay to the market administrator on or before the 13th day after the end of each delivery period the amounts calculated pursuant to paragraph (b) of this section, unless the handler elects at the time of reporting pursuant to § 1062.30 to pay the amounts computed pursuant to paragraph (a) of this section;

(a) The following amounts:

(1) To the producer-settlement fund, an amount equal to the value at the Class I price applicable at the location of such handler's plant, of all skim milk and butterfat distributed as Class I milk on routes in the marketing area less the value of such skim milk and butterfat at the Class II price; and

(2) As his share of the expense of administration the rate specified in § 1062.87 with respect to the Class I milk so disposed of in the marketing area.

(b) The following amounts:

(1) To the producer-settlement fund any plus amount remaining after deducting from the value that would have been computed pursuant to § 1062.70, if such handler had operated a pool plant, the sum of: *Provided*, That in calculating the net pool obligation milk transferred to a pool plant shall be priced at the uniform price computed pursuant to this order.

(i) The gross payments by such handler for Grade A milk received during the delivery period from dairy farmers at such plant made not later than the 20th day of the month following the delivery period, less authorized deductions; and

(ii) Any payment with respect to operations of the same delivery period to the producer-settlement funds of other orders issued pursuant to the Act due to the nonpool plant being a partially regulated plant under such other order; and

(2) As his pro rata share of the expense of administration an amount equal to that which would have been computed pursuant to § 1062.87 had such plant been a pool plant, except that if such plant is also a nonpool plant under another order issued pursuant to the Act, the payments due under this subparagraph shall be reduced by the amount of any administrative expense payments under the other order.

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

§ 1062.70 Computation of value of milk.

The value of milk received during each month by each handler who operates a pool plant shall be a sum of money computed by the market administrator as follows:

(a) Multiply the pounds of milk in each class determined pursuant to § 1062.44 by the applicable respective class prices and add together the resulting amounts;

(b) Deduct an amount determined by multiplying by the Class II price adjusted by the applicable butterfat differential the pounds of all receipts required to be reported of other nonpro-

ducer milk defined in § 1062.17(b) including any of the water computed pursuant to § 1062.44;

(c) Deduct an amount determined by multiplying the Class II price adjusted by the applicable butterfat differential the pounds of any non-Grade A fluid milk products (including degraded milk);

(d) Deduct an amount determined by multiplying by the Class II price adjusted by the applicable butterfat differential the pounds of fluid milk products which are received from an unidentified or unverifiable source;

(e) Deduct an amount determined by multiplying by appropriate class price adjusted by the applicable butterfat differential the pounds received from other pool plants in the form of fluid milk products according to the classification determined pursuant to § 1062.43;

(f) Deduct an amount determined by multiplying by the Class II price adjusted by the applicable butterfat differential the pounds of fluid milk products received from a producer-handler;

(g) Deduct an amount determined by multiplying the Class II price adjusted by the applicable butterfat differential times the pounds of milk received from a nonpool plant subject to pricing and pooling provisions of another order if such milk is classified as Class II in the other order;

(h) Deduct an amount determined by multiplying by the Class II price for the preceding month adjusted by the applicable butterfat differential the pounds in inventory of fluid milk products on hand at the beginning of the month;

(i) The amount resulting from the above computations is such handler's "net pool obligation".

§ 1062.71 Computation of aggregate values used to compute the uniform price.

For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content which shall apply to milk received by pool plants located not more than 30 airline miles from the City Hall in St. Louis, Missouri, as follows:

(a) Combine into one total the net pool obligations of all handlers who have made the reports prescribed in § 1062.30 and who are not in default of payments pursuant to § 1062.84;

(b) For each of the months of April, May, June and July subtract an amount equal to 10 cents per hundredweight on the total amount of milk represented by net pool obligations, which amount is to be retained in the producer-settlement fund and disbursed according to the provisions of paragraph (c) of this section;

(c) For each of the months of October, November and December, add one-third of the total amount subtracted pursuant to paragraph (b) of this section;

(d) Add an amount equivalent to the total deductions made pursuant to § 1062.82;

(e) Subtract if the weighted average butterfat content of milk represented

by net pool obligations is more than 3.5 percent, or add if such average butterfat content is less than 3.5 percent, an amount computed by multiplying the producer butterfat differential by the difference between 3.5 and the average butterfat content of milk, and multiplying the resulting figure by the total hundredweight of such milk;

(f) Add an amount equivalent to one-half of the unobligated balance in the producer-settlement fund;

(g) Divide the resulting amount by the total hundredweight of milk for which the blend price shall be paid; and

(h) Subtract not less than four cents nor more than five cents from the amount computed pursuant to paragraph (g) of this section.

§ 1062.72 Notification of handlers.

On or before the 10th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing:

(a) The amount of his net pool obligation computed pursuant to § 1062.70;

(b) The uniform price computed pursuant to § 1062.71 and the producer butterfat differential computed pursuant to § 1062.81; and

(c) The amounts to be paid by such handler pursuant to §§ 1062.84, 1062.87 and 1062.88, and the amount due each handler pursuant to § 1062.85.

PAYMENTS

§ 1062.80 Time and method of payment for milk.

(a) Except as provided in paragraph (b) of this section, each handler shall make payment to each producer and shall be credited as having paid the applicable nonpool plant for milk received during the month as follows:

(1) On or before the last day of each month to each such producer who did not discontinue shipping milk to such handler before the 25th day of the month an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received from such producer during the first 15 days of the month, less proper deductions authorized by such producer to be made from payments due pursuant to this subparagraph;

(2) On or before the 17th day of the following month, an amount equal to not less than the uniform price adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk received from such producer and nonpool plants during the month, subject to the following adjustments:

(i) Less payments made such producer pursuant to subparagraph (1) of this paragraph,

(ii) Less marketing service deductions made pursuant to § 1062.88,

(iii) Plus or minus adjustments for errors made in previous payments made to such producer or plant, and

(iv) Less proper deductions authorized by such producer; and

(v) Plus any amount by which the handler purchased milk from a nonpool plant at less than the uniform price:

Provided, That if by such date such handler has not received full payment pursuant to § 1062.85 from the market administrator for such month, he may reduce pro rata his payments due pursuant to this paragraph by not more than the amount of such underpayment. Payments shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following the receipt of the balance due from the market administrator;

(b) In the case of a cooperative association which has so requested any handler in writing, such handler shall make payment to the cooperative association for milk received during the month from the producer members of such association as follows:

(1) On or before the 25th day of the month an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received during the first 15 days of the month from producer members who did not discontinue delivering milk to such handler before the 25th day of the month, less proper deductions authorized in writing by such cooperative association to be made from payments due pursuant to this subparagraph;

(2) On or before the 14th day of the following month, an amount equal to not less than the uniform price adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk received from such producer members during the month, subject to the following adjustments:

(i) Less payments made such cooperative association pursuant to subparagraph (1) of this paragraph,

(ii) Plus or minus adjustments for errors made in previous payments to such cooperative associations, and

(iii) Less proper deductions authorized in writing by such cooperative association: *Provided*, That if by such date such handler has not received full payment pursuant to § 1062.85 from the market administrator for such month, he may reduce pro rata his payments to the cooperative association by not more than the amount of such underpayment. Payments to the cooperative association shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following the receipt of the balance due from the market administrator;

(c) On or before the 14th day of the following month, each handler shall pay a cooperative association for milk received by him during the month from such association for which the association is the handler not less than the minimum prices for milk in each class subject to the applicable location and butterfat differential.

§ 1062.81 Butterfat differentials to producers.

In making payments pursuant to § 1062.80 for milk received from producers and nonpool plants, the uniform price shall be adjusted by adding or subtracting for each one-tenth of one percent by which the average butterfat content of such milk is more or less, respectively, than 3.5 percent, an amount

equal to the butterfat differential computed pursuant to § 1062.53(b).

§ 1062.82 Location differentials to producers.

In making payments for milk received from producers and nonpool plants at a country plant or a city plant located more than 30 airline miles from the City Hall in St. Louis, Missouri, the uniform price computed pursuant to § 1062.71 shall be reduced at the rate set forth in the following schedule:

Distance (miles)	Rate per hundredweight (cents)
More than 30 but not more than 40	16
For each additional 10 miles or fraction thereof an additional	1

Provided, however, That in making payment for milk received from producers or approved dairy farmers at a pool plant located in Springfield, Missouri, the uniform price computed pursuant to § 1062.71 shall be reduced by 27 cents per hundredweight.

§ 1062.83 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund to be known as the "producer-settlement fund", into which he shall deposit all payments made by handlers pursuant to §§ 1062.62, 1062.84 and 1062.86, and out of which he shall make payments to producers pursuant to §§ 1062.85 and 1062.86.

§ 1062.84 Payments to the producer-settlement fund.

On or before the 12th day after the end of each month, each handler shall pay to the market administrator the amount by which the net pool obligation of milk for such handler pursuant to § 1062.70 exceeds the obligations of such handler pursuant to § 1062.80 for milk received from producers or nonpool plants.

§ 1062.85 Payments out of the producer-settlement fund.

On or before the 13th day after the end of each month, the market administrator shall pay to each handler the amount by which the obligation of such handler for milk received from producers and nonpool plants pursuant to § 1062.80 exceeds the net pool obligation for such handler calculated pursuant to § 1062.70, less any unpaid balances due the market administrator from such handler pursuant to §§ 1062.84, 1062.86, 1062.87 or 1062.88: *Provided,* That if the unobligated balance in the producer-settlement fund is insufficient to make full payment to all handlers entitled to payment pursuant to this paragraph, the market administrator shall reduce such payments at a uniform rate and shall complete such payments as soon as the appropriate funds are available.

§ 1062.86 Adjustment of accounts.

(a) Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses that money is due (1) the market administrator from such handler, (2) such handler from the market administrator, or (3) any producer or cooperative as-

sociation from such handler, the market administrator shall make payments to such handler of any amounts due the handler, or shall notify the handler of any amount due the market administrator or producers or cooperative associations, and such payments shall be made on or before the next date for making payments as set forth in the provisions relating to the payments which were in error.

§ 1062.87 Expense of administration.

As his pro rata share of the expense of the administration of this part, each handler shall pay to the market administrator on or before the 15th day after the end of each month for such two and one-half cents, or such lesser amount as the Secretary may prescribe, for each hundredweight of skim milk and butterfat contained in (a) producer milk, and (b) approved milk (except milk which was subject to another order issued pursuant to the Act).

§ 1062.88 Marketing services.

(a) *Deduction of marketing services.* Except as set forth in paragraph (b) of this section, each handler in making payments to producers, pursuant to § 1062.80, shall deduct five cents per hundredweight, or such lesser amount as the Secretary may prescribe with respect to all milk received by such handler from producers (excluding such handler's own production) during the month, and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to verify weights, samples and tests of milk received from such producers and to provide them with market information. Such services shall be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) *Producers' cooperative associations.* In case producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler, in lieu of the deductions specified in paragraph (a) of this section, shall:

(1) If the cooperative association is not receiving payment for its producer members pursuant to § 1062.80(b), make the deductions pursuant to § 1062.80(a)(2), which are authorized by its producer members, and pay any money so deducted to the cooperative association on or before the 15th day after the end of the month in which the milk was received from producers; or

(2) If the cooperative association is receiving payment for its producer members pursuant to § 1062.80(b), make no marketing service deductions.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1062.90 Effective time.

The provisions of this part, or any amendment to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 1062.91.

§ 1062.91 Suspension and termination.

Any or all provisions of this part, or any amendment to this part, shall be suspended or terminated as to any or all handlers after such reasonable notice as the Secretary may give, and shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

§ 1062.92 Continuing power and duty.

(a) If, upon the suspension or termination pursuant to § 1062.91, there are any obligations arising under this part the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided,* That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate shall:

(1) Continue in such capacity until discharged;

(2) From time to time account for all receipts and disbursements and deliver all funds or property on hand, together with the books and records of the market administrator, or such other person, to such person as the Secretary shall direct; and

(3) If so directed by the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant to this part.

§ 1062.93 Liquidation after suspension or termination.

Upon the suspension or termination pursuant to § 1062.91, the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims any funds which are unpaid and owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1062.100 Unfair methods of competition.

(a) Each handler shall refrain from acts which constitute unfair methods of competition. Practices which shall be considered to be unfair competitive practices shall include but are not limited to: Special payments to producers except to meet the competition; refusal to accept a producer's milk for purposes of co-

ercion; the purchase of milk from a handler regulated under another milk marketing order issued pursuant to the Act if the dairy farmers delivering to such handler are not receiving for such milk the minimum prices established by such order; application of hauling rates in a manner that results in discrimination between producers; supplying goods and services to producers from whom milk is received in a manner which results in discrimination between producers; accepting goods and services from producers or nonpool plants which would reduce the cost of milk purchased.

(b) No cooperative association shall sell or offer for sale the milk of its members at less than the minimum prices established under the provisions of this subpart.

§ 1062.101 Separability of provisions.

If any provision of this part, or its application to any person or circumstance is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

§ 1062.102 Agents.

The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 1062.103 Termination of obligations.

The provisions of this section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved under such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to the following information:

- (1) The amount of the obligation;
- (2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and
- (3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the

said two-year period with respect to such obligation shall not begin to run until the first day of the calendar months following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact material to the obligation on the part of the handler against whom the obligation is sought to be imposed.

NYLON YARN FROM ITALY

Fair Value Determination

MAY 1, 1963.

An investigation was made to determine whether nylon yarn from Italy was being sold in the United States at less than fair value within the meaning of the Antidumping Act of 1921.

I hereby determine that nylon yarn from Italy is not being, nor likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

Statement of reasons. During the period under consideration sales to the United States were made to unrelated firms. Purchase price was calculated by adding to the net, packed, ex-factory selling price the Italian duties and taxes due upon the importation of the raw material used to produce the nylon yarn which were refunded or not collected by reason of the exportation of the nylon yarn; plus the amount of taxes imposed upon the production of the nylon yarn which is rebated by reason of the exportation of the yarn.

Sales of nylon yarn for home consumption in Italy were adequate to form a basis for a fair value comparison. Home market value was calculated by deducting from the net, packed, ex-factory selling price in Italy the usual trade and quantity discounts, the selling commission paid on home market sales, the cost of technical assistance rendered only to customers in the home market, the producer's cost of advertising the customer's finished product, less refunds of fabricating tax, and less an allowance to cover bad debts and certain production cost differentials.

At no time during the period under consideration was the purchase price lower than the adjusted home market value.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

of the Treasury.*

RENAULT AUTOMOBILES FROM FRANCE

Fair Value Determination

MAY 3, 1963.

An investigation was made to determine whether Renault automobiles from

France were being sold in the United States at less than fair value within the meaning of the Antidumping Act of 1921.

I hereby determine that Renault automobiles from France are not being, nor likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

Statement of reasons. In view of the interrelationship between the importer and the manufacturer, a fair value comparison was made between exporter's sales price and adjusted home market price.

In calculating exporter's sales price, deductions were made from the selling price to distributors in the United States for Federal excise tax, inland transportation and freight, United States import duty, marine insurance, entry fee, marine damage and selling expenses.

Adjusted home market price was computed on the basis of the sales price to distributors in France. Deductions were made from such price to allow for home market advertising costs, technical assistance, guarantees, selling expenses, and differences in credit terms. A quantity discount was also allowed to reflect the quantities actually sold in the United States. An addition was made to adjusted home market price to account for the cost of United States specifications.

Exporter's sales price was found to be not lower than adjusted home market price.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

of the Treasury.*

ATOMIC ENERGY COMMISSION

[Docket No. PRM-30-7]

GERARD C. GAMBS

Notice of Denial of Petition for Rule Making

Please take notice that the Commission has denied a petition for rule-making submitted by Gerard C. Gambs of Pittsburgh, Pennsylvania.

By letter of June 21, 1961, Gerard C. Gambs petitioned the Atomic Energy Commission to amend 10 CFR Part 30 to exempt from licensing and other regulatory controls up to 15 millicuries of tritium to be applied to or contained in fish lures in the form of a luminescent paint.

The Commission has determined that, because of the potential radiation exposure to the general public that could

result from widescale use of radioactive materials in household items such as fish lures, it would not be in the public interest to institute the public rule-making procedure requested by the petitioner.

A copy of the petition for rule-making and the Commission's letter of denial are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Dated at Germantown, Md., this 6th day of May 1963.

Please take notice that pursuant to the Initial Decision by an Atomic Safety and Licensing Board dated April 20, 1963, stated to become effective ten days after issuance, the Director of the Division of Licensing and Regulation has issued Construction Permit No. CPCSF-2 to Nuclear Fuel Services, Inc., and the New York State Atomic Research and Development Authority. The permit authorizes construction of an irradiated nuclear fuel processing plant on a 230 acre site within the 3331 acre site of the Western New York Nuclear Service Center located near Ashford, Cattaraugus County, New York. The plant will consist of a process building, a liquid waste tank farm, a liquid waste storage lagoon and a solid

waste burial ground. The permit as issued is set forth below.

Dated at Germantown, Md., this 30th day of April 1963.

For the Atomic Energy Commission.

R. LOWENSTEIN,
Director, Division of
Licensing and Regulation.

[Construction Permit No. CPCSF-2]

1. Pursuant to the Atomic Energy Act of 1954, as amended (hereinafter referred to as the "Act"), and Title 10, Chapter I, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," and pursuant to the Order of the Atomic Safety and Licensing Board, the Atomic Energy Commission (hereinafter referred to as "the Commission") hereby issues a provisional construction permit to Nuclear Fuel Services, Inc. ("NFS") and New York State Atomic Research and Development Authority ("ARDA") for a production facility, namely, an irradiated nuclear fuel processing plant as described in the applications and amendments thereto filed in this matter by the applicants (hereinafter referred to as "the facility"). The facility is a production facility for processing irradiated fuel at the approximate rate of 1,000 kilograms of uranium per day. The facility will process fuel which shall be within the following approximate parameters: maximum burnup—20,000 MWD/tonne, specific power—27.5 MW/tonne, average irradiation time—years, load factor—85 percent, minimum cooling time—150 days.

2. This permit shall be deemed to contain and be subject to the conditions specified in §§ 50.54 and 50.55 of said regulations; is subject to all applicable provisions of the Act, and rules, regulations and orders of the Commission now or hereafter in effect; and is subject to the conditions specified or incorporated below:

A. The earliest date for the completion of the facility is January 1, 1965, and the latest date for completion of the facility is December 31, 1965.

B. The facility shall be constructed and located at the site described in the applications, as amended, at the Western New York Nuclear Service Center, Cattaraugus County, New York.

C. This permit authorizes:

(1) NFS, as lessee of the site; as owner of those portions of the plant in which actual chemical processing will take place; and as the party responsible for the construction of the facility, including site improvements, facilities for the pre-processing storage of irradiated fuel elements and facilities for the storage of radioactive wastes; to construct the facility; and

(2) ARDA, as owner of the site, of the facilities for the pre-processing storage of irradiated fuel elements and for the storage of radioactive wastes, and of other site improvements, to have such facilities and improvements constructed by NFS.

D. If the applicants desire Commission approval of any particular technical specifications for the facility prior to issuance of a license to operate, they may request the Commission to grant such specific approval by appropriate amendment to this permit.

E. On or before March 31, and September 30 of each year, NFS shall file a report, covering the preceding six-month period, with the Director of the Division of Licensing and Regulation, U.S. Atomic Energy Commission, Washington 25, D.C., setting forth the status of completion of construction of the facility and of the research and development program designed to establish the safety of the fuel segmentation process.

3. Upon completion of the construction of the facility in accordance with the terms and conditions of this permit, upon filing

of the additional information needed to bring the original applications up to date, and upon a finding by the Commission that the facility has been constructed and will operate in conformity with the applications as amended and in conformity with the provisions of the Act and the rules and regulations of the Commission, upon filing of proof of financial protection and execution of an indemnity agreement as required by section 170 of the Act, and in the absence of any good cause being shown to the Commission why the granting of a license would not be in accordance with the provisions of the Act, the Commission will issue a Class 104 license to the applicants pursuant to section 104 b. of the Act.

4. This permit is provisional to the extent that a license authorizing operation of the facility will not be issued by the Commission unless the applicants have submitted to the Commission (by amendment of the applications) the complete Final Hazards Summary Report (portions of which may be submitted and evaluated from time to time) and the Commission has found that the final design provides reasonable assurance that the health and safety of the public will not be endangered by operation of the facility in accordance with the specified procedures.

Date of issuance: April 30, 1963.

For the Atomic Energy Commission.

Director, Division of
Licensing and Regulation.

EASTERN AIR LINES, INC.

Order Granting Temporary Suspension and Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of May 1963.

Application of Eastern Air Lines, Inc., Docket No. 14350; for amendment of its certificates of public convenience and necessity for routes 5 and 6 so as to delete Atlantic City, New Jersey. Application of Eastern Air Lines, Inc., Docket No. 14351; for an order authorizing suspension of service at Atlantic City, New Jersey, on routes 5 and 6.

On March 7, 1963, Eastern Air Lines, Inc. (Eastern), filed an application (Docket 14351) pursuant to Part 205 of the Board's Economic Regulations, requesting authority to suspend service temporarily at Atlantic City, New Jersey (Atlantic City), pending final decision on its concurrently filed application (Docket 14350) for deletion of Atlantic City from its certificates for routes 5 and 6.

Eastern, in support of its application, states that the volume and type of traffic generated by Atlantic City does not support existing competitive service by Eastern and Allegheny Airlines, Inc. (Allegheny); that Eastern's top two markets—Atlantic City—Washington and Atlantic City—New York—are extremely short haul—139 air miles and 89 air miles respectively; that it estimates that for the year ending March 31, 1962, its Martin 404 operation at Atlantic City resulted in a loss of \$123,799; that Allegheny currently holds authority to provide one-plane service for 87 percent of Eastern's on-line Atlantic City passengers; that suspension of Eastern's Atlantic City operations will not deprive the public of any significant single-plane or single-carrier services since Allegheny will continue to provide such service for all significant markets; and that suspension of Eastern will permit economies

¹ Atlantic City-Newark distance is 89 miles and Atlantic City-LaGuardia distance is 99 miles.

² Eastern also estimates that such operation with the type of equipment now being used would have resulted in a loss of \$170,495. While we are not relying on the efficacy of Eastern's cost figures, they appear to be reasonable and have not been challenged by any interested party.

for Eastern and will make additional traffic available to Allegheny and thereby aid Allegheny in reducing its subsidy need.

On April 1, 1963, Allegheny filed an answer in support of Eastern's temporary suspension application. Allegheny states, inter alia, that it is certificated to serve Atlantic City as an intermediate point on segment 2 between Washington and New York/Newark and as a terminal point on segment 3 between Pittsburgh and Atlantic City; that its segment 2 authority and Eastern's authority at Atlantic City are duplicative in part, i.e., between Atlantic City, on the one hand, and Washington and New York, on the other; that its segment 2 is the weakest segment on its system; that for the year ended March 31, 1962, the average load on this segment was only 7.2 passengers per mile; that its segment 2 is primarily dependent on revenues generated by Atlantic City; that elimination of Eastern at Atlantic City should bolster Allegheny's segment 2 traffic and thus improve the economies of the segment; and that approval of the Eastern application will eliminate unnecessary duplicative services at Atlantic City, consistent with the Board's established policy of eliminating duplicative short-haul trunkline and local service authorizations. In addition, Allegheny states that it has recently applied for an exemption, Docket 14326, to permit it to serve Atlantic City on its segment 8 between Washington and Boston; and that if the application is granted, this additional service will be added at Atlantic City, without regard to the Board's action on Eastern's suspension application.³

On April 2, the New Jersey Bureau of Aeronautics filed a telegraphic answer, stating that it poses no objection to suspension of Eastern provided that Allegheny increases service to Atlantic City as indicated in its answer of April 1, 1963.

Allegheny is authorized to provide nonstop service in Atlantic City's top three markets (Washington, Pittsburgh, and New York), and single-plane service in Atlantic City's fourth market (Boston).⁴ Appendix A⁵ shows that Allegheny can provide single-carrier service for 88.9 percent of the total on-line O&D traffic generated by Atlantic City during the calendar year 1961, and can carry the remaining 11 percent to and from Washington, Philadelphia, or New York for connecting services beyond those gateways.

Appendix B⁵ shows that the traffic generated by Atlantic City is seasonal; that 69.7 percent of the total traffic generated for the year ended March 31, 1962 traveled during the six-month period April through September, while only

30.3 percent traveled during the other half of the year; that the city's top four markets generated 66 percent of the total O&D traffic during the peak period, the third quarter; and that Eastern carried the bulk of the traffic moving in the three top markets where it competes with Allegheny.

Historically, both Eastern and Allegheny have increased their service at Atlantic City during the summer season to accommodate the seasonal increase in traffic. During the 1962 summer season, Allegheny served Atlantic City on one north-south round trip and four east-west round trips daily. Appendix C⁵ shows that during the third quarter, while Eastern was on strike, these flights accommodated an average of 112 passengers per day. Thus, it appears that Allegheny has demonstrated its ability to substitute adequately for Eastern in this market even during the critical third quarter peak period and should be able to continue to do so.

Upon consideration of the foregoing matters and the present and potential air service needs of the Atlantic City area, we tentatively find and conclude that Eastern's trunkline operation at this point is uneconomic and that Atlantic City's traffic does not justify continuance of Eastern's service; that elimination of Eastern's service at this point will result in little, if any, hardship or inconvenience to the traveling public in that Allegheny is presently authorized to accommodate Atlantic City's traffic and has indicated, by answer filed herein, its willingness to do so; that elimination of Eastern's competitive services at Atlantic City will permit that carrier to effect substantial economies and concurrently strengthen Allegheny in one of its weakest operations by making available to Allegheny a substantial amount of additional revenue; and that the public convenience and necessity require the elimination of Atlantic City from Eastern's routes 5 and 6. Based upon the same considerations, and in view of the lack of opposition thereto, we find it in the public interest to grant Eastern's request for temporary suspension at Atlantic City.

Accordingly, it is ordered, That:

1. Eastern be and it hereby is authorized to temporarily suspend service at Atlantic City, New Jersey, effective as of the date of issuance of this order, until 90 days after final decision on its application in Docket 14350;

2. All interested persons be and they hereby are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and amending the certificates of public convenience and necessity of Eastern for Routes 5 and 6 so as to delete therefrom the intermediate point of Atlantic City, New Jersey;

3. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments set forth herein shall, within 20 days from

the service date, file with the Board, and serve upon all persons hereafter made parties to this proceedings, a statement of objections;⁶

4. If proper objections are filed within the 20-day period specified above, this proceeding shall be set for hearing, and the hearing shall be limited, to the extent practicable and consistent with the public interest, to consideration of issues raised by the objections filed;

5. If no objections are filed within the 20-day period specified above, further procedural steps shall be deemed waived and the matter submitted to the Board for final decision;

6. Copies of this order shall be served upon Eastern Air Lines, Inc., Allegheny Airlines, Inc., the City of Atlantic City, New Jersey, and the New Jersey Bureau of Aeronautics, all of whom are hereby made parties to the proceeding herein; and

7. This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

WORKERS' PETITION FOR DETERMINATION OF ELIGIBILITY TO APPLY FOR ADJUSTMENT ASSISTANCE

Notice of Investigation

Upon petition under section 301(a) (2) of the Trade Expansion Act of 1962, filed

May 1, 1963, on behalf of workers of the Wenonah and Ishkooda Iron Ore Mines at Red Mountain, Alabama, operated by the Tennessee Coal and Iron Division of the United States Steel Corporation, the United States Tariff Commission, on the 3d day of May 1963, instituted an investigation under section 301(c) (2) of the said Act to determine whether, as a result in major part of concessions granted under trade agreements, iron ore (provided for in paragraph 1700 of the Tariff Act of 1930) like or directly competitive with iron ore produced by the aforementioned mines, is being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such mines.

Petitioner has not requested a public hearing. A hearing will be held on request of any other party showing a proper interest in the subject matter of the investigation, provided the request is filed within 10 days after this notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the office of the Secretary, United States Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.
