What is news?

What is the definition of newsworthiness on English Wikinews for synthesis reporting as it relates to when we publish?

News is:
- About a **specific** event that occured in the past 24 to 72 hours. Example: An earthquake is news. Continental drift is not. A report published yesterday on continental drift is.
- Supported by two or more sources that verify an event that have been published in the past 24 to 72 hours.
