Froyen, island in the North sea, about 35 miles in circumference, and situated near the coast of Norway. Lon. 9° E, lat. 63 46 N.

Frozen or *Arctic ocean*. This is a general and very indefinite term for the seas lying north from Europe, Asia, North America, and around the North Pole.

Fruit's, post office, Callaway co., Mo., 15 ms. W. from St. Louis.

Fruitstown, Columbia co., Pa., 15 ms. N. from Danville.

Frutigen, beautiful town of Switzerland, situated in the canton of Bern, 31 ms. SE. of Friburg.

Fryberg, town, Oxford co., Maine, and the seat of an academy, lying on the north branch of the Saco river, 58 ms. NW. of Portland.

Fryingpan Shoals, off Cape Fear river, N. C.

Fuca, *St. Juan de*, straits of the U. S., on the coast of the Pacific ocean, between the Wakarusa or Quadra and Vancouver's island and the continent. Its southern entrance from the ocean is between Cape Flattery and the island of Quadra. Lon. W. C. 48° W., lat. 48 30 N. There is an almost inextricable confusion of names applied to this gulf, or sound, or strait. Under the head *Quadra* and *Vancouver's Island*, I have made an attempt to remove part of the evil.

Fuego, one of the Cape de Verd islands, in the Atlantic ocean. It is 300 ms. W. of Cape Verd. Lon. 24 30 W., lat. 14 54 N.

Fuen-hou-fou, extensive and populous city of China, in the province of Petcheli, celebrated for the beauty of its streets and triumphal arches.

Fuen-tcheou-fou, commercial city of China, in the province of Chan-si. It is seated on the river Fuen-ho, 250 ms. SW. from Peking.

Fuente-Dueña, town of Spain, in New Castile, seated on the Tajo, 35 ms. SE. of Madrid. Lon. 3° W., lat. 40 14 N.

Fuers, ancient town of France, in the dep. Rhone and Loire, and late province of Forez, seated on the Loire, 23 ms. SW. of Lyons.

Fuessen, town of Suabia, belonging to the bishop of Augsburg, on the Lech, 50 ms. S. E. of Augsburg. Lon. 11 15 E., lat. 47 40 N.

Fuh-chow-foo. See *Toucheou-fou*.

Fuidentall, town of Silesia, in the duchy

Troppaw, seated near the Molra, 16 ms. W. by Sof Troppaw.

Fula, or *Thule*, one of the Shetland islands, W. of Mainland, thought by some to be the Ultima Thule of the ancients.

Fulda, town of Germany, in the territories of Hesse Cassel, with a celebrated abbey, whose abbot is nominally primate of the abbeys of the empire, and sovereign of a small territory between Hesse, Franconia, and Thuringia. It is seated on Fulde, 55 ms. S. of Cassel. Lon. 9 43 E., lat. 50 40 N.

Fulham, village of Eng., in Middlesex, 4 ms. S. of London.

Fullenwidars, post office, Lincoln co., N. C.; by postroad 194 ms. SW. by W. from Raleigh.

Fulton, village, Rowan co., N. C.; 137 ms. by postroad from Raleigh.—Post office, Sumner district, S. C.; by postroad 49 ms. from Columbia.—Court house and post office, Fulton Ill.; by postroad 96 ms. from Vandalia.—

Village of Hamilton co., O., adjoining and above Cincinnati, to which city, though a separate corporation, the village is commercially a suburb.

The town of Fulton is composed principally of a crescent street, in the form of a crescent, corresponding to the opposite course of Ohio river. Fulton is indeed the navy yard of Cincinnati. "There is in this town," (Fulton,) as stated in the Ohio Gazetteer, "two extensive lumber yards, from which Cincinnati and St. Louis are in part supplied; also, three steam saw mills, and the fourth building; but the principal business of Fulton is steamboat building. It contains four ship yards, which launch annually steamboats to an aggregate of from five to six thousand tons. Pop. 2,000 in 1847.—Village, Lawrence tp., Stark co., O.

Canal Fulton, (post office name.)

Fultonham, or *Union*, village, SW. part of Askevington co., O., within one mile of the border of Perry co., 9 ms. SW. of Zanesville, and 9 ms. N. of Somerset. The great road passes through Zanesville, via Somerset, Lancaster, Chillicothe, and West Union, to Maysville.

Funchal, capital of Madeira, situate round a bay, on the gentle ascent of the first hills, in form of an amphitheatre. Lon. 17 6 W., lat. 32 38 N.

Funen, island of Denmark, 340 ms. in circumference, separated from Jutland by a strait called the Little Belt, and from Zealand by the Great Belt. It is remarkably fertile in pasture and grain, and exports to Norway barley, oats, rye, and peas. Odensee is the capital.

Funkstown, village on Antietama, 2 ms. south of Hagerstown. It is a small village, containing 25 or 30 houses in one street along the great road from Hagerstown to Fredericktown.

Furnace, village, Litchfield co., Ct.; by postroad 58 ms. a little N. of W. from Hartford.—Post office, Vermillion tp., NE. part of Huron co., O., 20 ms. NE. of Norwalk, the co. seat, about 25 ms. a little N. of W. from Elyria.

Furnes, town of the kingdom of the Netherlands, 12 ms. E. from Dunkirk. Lon. 2 45 E., lat. 51 4 N.

Furruckabad, district of Hindoostan Proper, contiguous to the W. bank of the Ganges, and surrounded by the dominions of Oude. It is more than 30 ms. in extent, and belongs to

a chief of the Patan Rohilla tribe. Its capital is of the same name. Lon. 79 30 W., lat. 27 28 N.

Furstenburg, principality of Suabia, bounded by the duchy of Wirtemberg, the co. of Hohenburg, by the Brisgaw, the Black Forest, and the lake and bishopric of Constance. In this State the river Danube takes its rise. It is subdivided between Baden, Wirtemberg, and Hohenzollern, Sigmaringen.—Village of the principality of Furstenburg, 14 ms. NNW. from Schafhausen.

Furstenfeld, town of Lower Styria, with a castle, on the river Ausnitz, 50 ms. S. of Vienna. Lon. 16 5 E., lat. 47 23 N.

Furstenwald, town of Germany, in the middle marche of Brandenburg, seated on the Spree, 20 ms. W. of Frankfort on the Oder. It was taken by the Swedes in 1631. Lon. 14 8 E., lat. 52 33 N.

Futtypour Sicri, considerable town of Hindoostan Proper, in the province of Agra, seated under a range of hills, the southern boundary of an immense plain, in which, for the greatest part, not a shrub is to be seen, and the soil is light. It is 42 ms. W. of Agra. Lon. 77 45 E., lat. 27° N.

Fyal, or *Fayal*, one of the Azores or Western Islands. The most considerable place is called Villa de Horta. Lon. 28 36 W., lat. 38 32 N.

Fyers, river of Inverness-shire, in Scotland, which, descending from the S., flows toward Loch Ness.

Fyne, *Loch*, inlet of the Atlantic, in Argyleshire, near 40 ms. in length, noted as the resort of the herring shoals and numerous fishing vessels. It receives and returns a tide on each side of the isle of Arran, which is directly opposite its entrance.

Fyzabad, large city of Hindoostan Proper, in the territory of Oude, of which it was once the capital. It is seated on the Gogra, a large river from Thibet, and is 80 ms. E. of Lucknow, and 500 NW. of Calcutta. Lon. 82 30 E., lat. 29 34 N.

G.

Gabaret, town of France, in the department of Gers, and late province of Gascony, seated on the Gellise, 20 ms. W. of Condom. Lon. 6° E., lat. 44 59 N.

Gabel, town of Bohemia, 45 ms. N. of Prague.

Gabian, village of France, in the dep. of Herault, and late province of Languedoc, famous for its mineral waters.

Gabin, town of Poland, in the palatinate of Rava, 50 ms. NW. of Warsaw. Lon. 19 45 E., lat. 52 26 N.

Gahannah, original Indian name of that branch of Scioto river usually called Big Walnut. This stream rises in the western part of Knox and eastern part of Delaware co. by numerous creeks, which, by a general southern course over the eastern part of Franklin, finally unite and fall into the eastern side of Scioto river a small distance above the line between Franklin and Pickaway counties. Comparative length about 50 ms.

Gaieta, ancient town of Naples, in Terra di Lavoro, at the foot of a mountain, near the sea, 30 ms. NW. of Capua. Lon. 13 47 E., lat. 41 30 N.

Gaillac, town of France, now in the department of Tarn, lately in the province of Languedoc, remarkable for its wines. It is seated on the Tarn, 10 ms. SW. of Alby. Lon. 2 5 E., lat. 43 54 N.

Gaillon, town of Fr., in the dep. of Eure, and late province of Normandy, remarkable for its archiepiscopal palace, which lately belonged to the archbishop of Rouen. It is 5 ms. from Andely, and 22 from Rouen.

Gaines, town, Genesee co., N. Y. The post office is situated north from the western canal, 25 ms., and 48 a little N of W. from Batavia.—Town, Boone co., Ky.

Gainsborough, town in Lincolnshire, seated near the river Trent, over which is a handsome stone bridge. It is 17 ms. NW. of Lincoln, and 151 N. by W. of London. Lon. 36' W., lat. 53 28 N.—Tp. of Lincoln co., U. C.—Village, Frederick co., Va.—Village, Jackson co., Tenn., by post road 74 ms. NE. from Murfreesborough, and 70 NE. by E. from Nashville.

Gainsburg, village, Christian co., Ky., by post road 227 ms. SW. from Frankfort.

Gains's Cross Roads, post office, Culpeper co., Va., by post road 97 ms. SW. from W. C.—Post office in the SE. part of Boone co., Ky., by post road 73 ms. a little E. of N. from Frankfort, and 25 SSW. from Cincinnati.

Gainsville, village in the tp. of Gains, Genesee co., N. Y., 35 ms. a little N. of W. from Rochester.

Gairloch, large bay of Scotland, on the W. coast of Ross-shire. In this bay, which gives name to a tract of land near it, the fishing of cod and other white fish is very considerable.

Galitsch, town of Russia, in the government of Kostroma, on the S. side of a lake of its name, 56 ms. ENE. of Kostroma. Lon. 22 54 E., lat. 57 56 N.

Gall, *St.*, new canton of Switzerland, bordering on the lake of Constance, between the canton of Thurgau and Appenzel.

Gall, *St.*, or *St. Gallen*, town of Switzerland, capital of the canton, of St. Gall. It has a rich abbey, whose abbot formerly possessed the sovereignty of the town. It is seated in a narrow valley, on two small streams, 35 ms. E. of Zurich. Lon. 9 18 E., lat. 47 21 N.

Gallam, town of Negroland, capital of a kingdom of the same name, on the river Senegal.

Gallapagos, group of islands in the Pacific ocean, lying under the equator; the largest 65. ms. long and 45 broad. Lon. W. C. 12° W. This group lies 10° of lon. W. of the province of Ecuador, in S. America; and it may be remarked as curious, that the equator and lon. 90° W. from London intersect very near its centre. There are some mere islets, but the four main islands have considerable extent, and are named Chatham SE., Albemarle W., Bendloes N., and Norfolk in the centre.

Gallatin, tp., Columbia co., N. Y.—See *Anacram*.—Village and seat of justice, Sumner co., Tenn., 27 ms. NE. from Nashville.—Co., Ky., bounded N. by Ohio river, E. by Grant, SE. by Grant and Owen, and SW. by Henry. Length 35 ms., mean width 10, area 350 sq. ms., surface hilly, and soil, where fit for tillage, generally fer-

tile. Chief towns Port William and Warsaw. Pop. in 1820, 6,674, and in 1840, 4,003. Ctl. lat. 38 40 N., lon. W. C. 7 45 W.—Co., Ky., bounded by Wabash river E. and SE., Pope, Franklin W., and White N.; length 36, mean width 33, area 880 sq. ms., surface wavy rather than hilly, and soil productive. Ctl. town Shawneetown. Pop. in 1820, 3,155, and in 1840, 10,760. Ctl. lat. 37 45 N., lon. W. 11 20 W.—Village, Copiah co., Miss., 63 from Monticello.

Gallatin's River, branch of Missouri, rises in the Rocky Mountains, between Yellow Stone and Madison's river, and joins the Missouri a few miles below the junction of Madison's and Jefferson's rivers. Lat. 45 15 N.

Galle, or *Point de Galle*, seaport on the coast of Ceylon, in a rich and beautiful district with a strong fort and secure harbor.

Gallia, co., Ohio, bounded by the Ohio river E. and SE., Lawrence SW., Jackson NW., Athens and Meigs N.; length 36 ms., width 17, area 500 sq. ms., surface generally hilly and broken, though much good bottom land spreads along the Ohio river; soil on the hills sterile. Ctl. town Gallipolis. Pop. in 1820, 7,098, and 1840, 13,444. Ctl. lat. 39° N., lon. W. C. 18 W.

Gaïsee, village of Switzerland, in Rhodex inferior, which is the Protestant division of the canton of Appenzel. It is much resorted to on account of its goat's whey, which is brought from a neighboring mountain.

Galez, town of Bulgaria, seated near the Danube, between the mouths of the Pruth and Sere.

Galashiels, village of Scotland, in Selkirkshire, on the Gala, near its confluence with the Tweed. It is 25 ms. S. by E. of Edinburgh.

Galaso, river of Naples, in Otranto, which rises in the opening near Oria, and falls into the Gulf of Taranto.

Galata, village near Constantinople, or rather a suburb of that city, on the European side of the Bosphorus, opposite the Seraglio, on the NE. side of the inner harbor. It is inhabited by Christians of all sorts, as well as Jews, who exercise their religion publicly; and here wine is sold in taverns, which is not allowed in the city itself.

Galen, tp. and post office in Seneca co., N. Y. The tp. lies NE. from the Clyde river, between Clyde and Montezuma, 20 ms. NE. from Geneva, and about an equal distance N. W. from Auburn.

Galicja, country in the SW. part of Poland, which extends 320 ms. from E. to W., and 290 from N. to S. breadth. It comprises Little Poland, the great part of Red Russia, and a slip of Podolia to the N. of the river Bog. This territory was forcibly seized by the Austrians in 1772 and 1795, and incorporated into the Austrian dominions, under the appellation of the kingdom of Galicia and Lodomeria. The mountainous parts produce fine pasturage, the plains are mostly sandy, but abound in forests and are fertile in corn. The principal articles of traffic are cattle, hides, wax, and honey; and the countries contain mines of copper, lead, iron, and salt, of which the latter are the most valuable. This country is divided into East Galicia and West Galicia, of which the capitals are Lemberg and Cracow.—See *Empire of Austria*.—Provin-

Spain, bounded on the N. and W. by the Atlantic, S. by Portugal, and E. by Asturias and Leon. The air is temperate along the coast, but other places cold and moist. It is thin of people. The produce is wine, flax, and citrons. Here are copper, tin, and lead, and the forests yield wood for building ships. Compostella is the cap-

Galicia, New.—See *Guadalajara*.

Galion, village in Sandusky tp., western part of Madison co., Ohio, 15 ms. westward of Mansfield, 12 eastward of Bucyrus.

Galistio, town of Spain, in Estramadura, 10 ms. N. of Placentia.

Gallipoli, strait between European and Asiatic keys. It forms part of the communication between the archipelago and the sea of Marmora.—

Dardanelles.—Seaport of European Turkey, Romania, the residence of a pacha. It contains about 10,000 Turks, 3,500 Greeks, beside a great number of Jews. It is an open place, with no defence than a sorry square castle, and stands in a strait of the same name, 100 ms. SW. of Constantinople. Lon. 26 59 E., lat. 40 26 N.

—Seaport of Naples, in Terra d'Otranto. This is a great mart for olive oil, and has a manufactory of muslins. It is seated on a rocky island, on the S. shore of the bay of Toronto, and joined to the main land by a bridge, protected by a fort, 15 ms. W. of Otranto. Lon. 18 5 E., lat. 40 2 N.

Gallipolis, village and seat of justice, Gallia co., Ohio, on an elevated second bottom of Ohio river. Lon. 38 50 N. It is the seat of an academy. Pop. of the village and tp. in 1820, 830; in 1830, only 400; but in 1840, 1,413. Lat. 38 55 N., lon. C. 5 8 W.

Gallivan's Ferry, village in Horry district, S. Carolina.

Gallops, or, as they are commonly called, *Gallops Islands*; a group of beautiful small islands in the St. Lawrence, U. C. They are about 30 in number, with a very rich soil, and appertain mostly to the St. Lawrence co., N. Y., and lie opposite to Edwardsburg, in Grenville co., U. C. They extend about 5 ms. below Ogdensburg, and extend to the St. Lawrence 6 or 7 ms.

Gallo, cape of the Morea, the ancient Acritas. Lon. 21 53 E., lat. 36 48 N.—Island of the Pacific ocean, near the coast of Peru, the first place discovered by the Spaniards when they attempted the conquest of Peru. It is also the place where the Buccaneers used to come for wood and water, and to refit their vessels. Lon. W. C. 2 0 W., lat. 2 30 N.

Galam, village in Jackson co., Ill., by post road 15 ms. SSW. from Vandalia.

Galloway, New, borough of Scotland, in Kircubrightshire, on the river Ken, 14 ms. N. of Kircubright.

Galloway, Upper, or *West*.—See *Wigtonshire*.

Galveston, small village of La., on the right bank of Amite river, at the mouth of Iberville, 20 ms. NNE. from Donaldsonville, and 25 SE. from Bayou Rouge.

Galveston bay, bay of Texas, in the Gulf of Mexico, at the mouth of Trinity river. Lon. W. C. 18 0 W., lat. 29 0 N.

Galway, co. of Ireland, in the province of Con-

naught, 82 ms. in length and 42 in breadth, bounded on the N. by the Atlantic and the counties of Mayo and Roscommon, on the E. by Roscommon, West Meath, and King's co., on the SW. by Tipperary, on the S. by Galway bay and Clare, and on the W. by the Atlantic. The river Shannon washes the frontiers of the E. and SE., and forms a lake several miles in length. It contains 136 parishes, and formerly sent 8 members to the Irish Parliament.—Seaport of Ireland, capital of Galway co., on a bay of the same name, on the Atlantic ocean, 40 ms. WSW. of Athlone, and 100 W. of Dublin. Lon. 9 0 W., lat. 53 18 N.—Town in Saratoga co., N. Y., 12 ms. NW. from Ballstown, and 33 from Albany. Pop. in 1820, 2,579.

Galway bay, large bay of Ireland, encircled on the N. and E. by Galway co., and S. by co. Clare; to the W. it is open to the Atlantic ocean.

Gambia, great river of Africa.—See *Africa*, p. 23.

Gambier, village in Knox co., Ohio, on the N. or left bank of Vernon river, 5 ms. E. from Mount Vernon, and 24 ms. due N. of Newark. It is pleasantly situated on high ground, and is the seat of Gambier college. The population of the place is about 300, besides the students, who are usually from 150 to 200. A daily stage runs thence to Mount Vernon. N. lat. 40 24, lon. W. C. 5 25 W.

If the following extracts from the Ohio Gazetteer are correct, Gambier is amongst the most advanced of the seminaries of the U. States W. of the Appalachian mountains:

“The village of Gambier, named after Lord Gambier, is beautifully situated on a high and level ridge of land, encompassed on three sides by Vernon river. Its situation exempts it from most of the diseases of the Western country. It contains between 30 and 40 dwelling-houses, and about 200 inhabitants, exclusive of students. The public buildings are the college, built of cut stone, 190 feet long and 4 stories high; a chapel of the same material, 100 feet long by 66 wide, with a basement; the grammar school, a wooden building 80 feet long and two stories high, used as a school room and dormitories for the senior preparatory department; and Milnor Hall, a brick building, four stories high and about 70 long, with two wings attached, built for the minor preparatory department of the institution, and calculated to accommodate the principal and 80 boys as boarders. The institution, in its different departments, has 12 professors and teachers, and 200 students. Its library composes more than 8,000 volumes.”

Games, tp. in the southern part of Genesee co., N. Y. Pop. in 1820, 1,134.

Gamesville, tp., Genesee co., N. Y.

Gananoqui, river, U. C., falls into the St. Lawrence 18 ms. below Kingston. There is an excellent harbor, with from 12 to 15 feet, water at its mouth.

Gananska, small river, U. C., falls into Lake Ontario, nearly opposite to Genesee co., N. Y. Lon. W. C. 1 15 W. From its mouth there is a carrying place of about 15 ms. to Rice, lake in the river Trent.

Gandersheim, town of Lower Saxony, in the duchy of Brunswick Wolfenbuttle, with a cele-

brated nunnery, 17 ms. SW. of Goslar. Lon. 18 20 E. lat., 51 54 N.

Gandia, seaport of Spain, in Valencia, with a small university, 55 ms. N. of Alicant. Lon. 0 20 E. lat. 39 6 N.

Gandicotta, town of the peninsula of Hindoostan, remarkable for a strong fortress, and a diamond mine near it. It is seated near the river Pelmar, between Gooty and Cuddapa.

Ganges, or *Ganja*, town of Persia, in the province of Erivan, 105 ms. S. by E. of Tefflis. Lon. 45 50 E., lat. 41 10 N.

Ganges, river of Asia, in Hindoostan, called by the Hindoos *Padde*, and *Boora Gongga*, or "the river." From the latter native term, the corrupted name of Ganges is taken. In almost all our maps, this mighty stream is made to rise to the N., and pierce the Himalaya mountains; but Lieut. Webb, being sent in 1808, to explore its sources, ascertained that all the streams above Hurdwar, which rise and mingle to form the Ganges, rise S. from the Snowy mountains. Two main and several minor branches, flow first W., then turn to the S., unite, and piercing a secondary chain of mountains, enter the plains of Hindoostan above Hurdwar. The Ganges now assumes a SE. course, which it pursues 400 ms. to its junction with the Jumna, above Chuprah. Below the mouth of the Jumna, the Ganges flows E. 200 ms., to where it again receives a large tributary stream, the Gogra, from the NW. The general course of the Ganges, below its confluence with the Gogra, is SSE., 500 ms., to the Bay of Bengal. About 40 ms. above its efflux into the Bay of Bengal, the Ganges is joined by the vast volume of the Brahmapootra, or Burrampooter. The entire comparative length of the Ganges is about 1,700 ms.; that of the Brahmapootra is not much less. The united basin of these two great rivers, is about 1,200 ms. in length from NW. to SE., and with a mean width of 500 ms. comprises an area of 600,000 sq. ms. The Ganges, though in many places fordable above its junction with the Jumna, is every where, at all seasons, navigable below Hurdwar. At so great a distance as 500 ms. from the sea, the river is 30 feet deep in the lowest state of its water. The depth it maintains, to the sandbars near its mouth. There is a very strong resemblance between the manner and seasons of floods in the Ganges and Mississippi. In the delta of both, the annual overflow, has reached its height about the first of July. Of the two, the Ganges is a little later, and rises and falls rather more slowly and more regularly than does the Mississippi. In both, the perpendicular height of the inundation decreases, advancing towards their respective recipients. The basin of the Ganges lies between N. lat. 22° and 35°, and within less than one degree, its mouth and that of the Mississippi are separated 180° of lon. See *Burrampooter*, *Jumna*, *Gogra*, &c.

In the annual inundation of this immense river, the country comprised in its delta is overflowed to the extent of more than 100 ms. in width; nothing appearing but villages and trees, excepting very rarely, the top of an elevated spot, the artificial mound of some deserted village, appearing like an island. The rise of the water is, on

an average, 31 feet. In a word, it is, in every respect, one of the most beneficial rivers in the world, diffusing plenty immediately by means its living productions, and secondarily by enriching the lands, affording an easy conveyance for the productions of its borders, and giving employment to many thousand boatmen.

Gangotri, or *Falls of the Ganges*, 300 m NNW. from Delhi. Lon. 76 35 E., lat. 33 8 N.

Gangpour, town of the peninsula of Hindoostan, 225 ms. S. of Patna. It is in the county of Orissa. Lon. 83 57 E., lat. 21 25 N.

Ganjam, town of the peninsula of Hindoostan in one of the northern circars, subject to the English. It lies on the bay of Bengal, between river and the SW. end of Chilka lake. Lon. 85 20 E., lat. 19 22 N.

Gannat, town of Fr., in the dep. of Allier and late province of Bourbonnois, 30 ms. S. Moulins.

Gap, ancient town of Fr., in the dep. of the Upper Alps, and late province of Dauphiny. Gap is seated on the small river Bene, at the foot of a mountain, in which some mineral waters are found that are deemed febrifuge. It is 27 ms. N. of Sistrion. Lon. 6 10 E., lat. 44 33 N.

Garack, island of Asia, in the Gulf of Persia remarkable for the fine pearls fished up on its coasts. Lon. 48° E., lat. 28 15 N.

Gard, dep. of Fr., which comprehends part of the late province of Languedoc. Nismes is the episcopal town.

Garda, town of Italy, in the Veronese, seated at the end of a lake of its own name, 17 m NW. of Verona. Lon. 11 4 E., lat. 45 36 N.

Gardeleben, town of Germany, in the marche of Brandenburg. It has a trade in hops and excellent beer, and is seated on the river Beise, 32 ms. N. by W. of Magdeburg. Lon. 11 35 E., lat. 52 41 N.

Garden, bay on the NE. side of Newfoundland. Lon. W. C. 54 30 E., lat. 49 42 N.

Gardiner, town, Kennebec co., Me., between Cobbesecote, and Kennebec river, opposite Pittstown, and 6 ms. below Augusta. Pop. 1820, 2,053.

Gardiner's Bay, or rather small gulf of Long island, enclosed between Rocky point, Plum island, Gardiner's island, East Hampton, and Sheller island.

Gardner's Cross Roads, post office, Louisa co. Va., 73 ms. NW. from Richmond.

Gardner's Island, at the E. end of Long island, forming part of the tp. of East Hampton Suffolk co., N. Y. It lies nearly in a N. and S. direction, about 4 ms. long, exclusive of a low sandy beach.

Gardner's Inlet, New Hanover, Pacific coast of N. America. Lon. W. C. 51 43 W., lat. 53 35 N.

Gardner's Store, post office, Dallas co., Ala. *Gardner's Tavern*, post office, Hanover co. Va., 20 ms. from Richmond.

Gardner, tp., Worcester co., Mass., on the highland between the sources of the W. branch of Nashua river, and those of Millers river, 60 m NW. from Boston.

Garland, town, Penobscot co., Me., 28 m NW. from Bangor.

Garonne, river of Fr., which has its source in the Pyrenean mountains, and, taking a NW. direction, waters Toulouse and Bourdeaux, below which it is joined by the Dordogne, and thence to the entrance into the Bay of Biscay assumes the name of Gironde. It communicates with the Mediterranean, by its junction with the Royal Canal.

Garonne, Upper, dep. of Fr., which comprehends part of Languedoc. Toulouse is the capital.

Garrard, co., Ky., bounded by Rockcastle E., Lincoln SW., Mercer NW., Kentucky River or Jessamine N., and Madison NE.; length 100 ms., mean width 8, area 220 sq. ms. Chief town, Lancaster. Pop. in 1840, 10,480. Central lat. 37 40 N.; lon. W. C. 7 25 W.

Garrettsville, village, Otsego co., N. Y., on Otsego creek, 75 ms. W. from Albany. — Village on the northeasternmost border of Portage co., O., 18 ms. NE. of Ravenna, the co. seat, and 12 ms. NW. by W. of Warren.

Garrison, town of Ireland, in the co. of Fermanagh, 10 ms. SE. of Ballyshannon. Lon. 43 W., lat. 54 25 N.

Garstang, town of Eng., in Lancashire, on the river Wyre, 10 ms. S. of Lancaster, and 225 NW. of London. Lon. 2 53 W., lat. 53 10 N.

Gartz, town of Pomerania, seated on the river, 13 ms. S. of Stetin. Lon. 14 45 E., lat. 53 N.

Garwood's Mills.—See *East Liberty*, Logan co., O.

Gasconade, river of Mo., rises in Wayne co., encircling sources with those of White, St. Francis, and Merrimac, and, flowing N., enters Missouri about 100 ms. above St. Louis.

Gascony, late province of Fr., bounded on the N. by the bay of Biscay, on the N. by Guienne, on the E. by Languedoc, and on the S. by the Pyrenees. This province, with Armagnac, is now included in the dep. of Gers.

Gaspe, bay of L. C., SW. from Cape Gaspe. The shores are high and rocky.—Cape of L. C., the gulf of St. Lawrence, between Cape Rosier and Cape Gaspe. Lon. W. C. 12 30 E., lat. 48 50 N.

—District of L. C., on the right side of St. Lawrence bay, bounded N. by St. Lawrence, E. by the gulf of St. Lawrence, and S. by Chaleur bay and the province of New Brunswick. New Brunswick, principal town.—Seigniorly, Buckingham co., L. C., 15 ms. SW. from Quebec, on the N. side of Beauvoir river.

Gassaway's Mills, post office, Monroe co., O., on the post road, 144 ms. a little S. of E. from Cincinnati.

Gatehouse, considerable village of Scot., in Kirkcubrightshire, at the mouth of the river Fleet, with a cotton mill. The river is navigable for boats within a short distance of the town. It is 10 ms. NW. of Kirkcubright.

Gates, tp., Monroe co., N. Y., N. from the mouth of Genesee river. Pop. in 1820, 2,643. —Co. of N. C., bounded N. by Va., W. by Chowan river, S. by Chowan co., SE. by Perquimans, and E. by Pasquotank; length 23 ms., mean width 12; area 276 sq. ms. Surface level, and soil partly sandy, or swampy. Chief town,

Hertford. Pop. in 1820, 6,837; and in 1840, 8,161. Central lat. 36 23 N., lon. W. C. 15° E. —C. H. and post office, Gates co., N. C., about 50 ms. SW. from Norfolk, in Va., and 150 NE. from Raleigh.

Gates's Mills, and post office, Mayfield tp., Cuyahoga co., O., nearly on the eastern border of the co., 15 ms. E. of Cleveland, and 15 ms. SW. of Chardon, the co. seat of Geauga co.

Gasston, borough of Eng., in Surrey, 19 ms. S. by W. of London. Lon. 10° W., lat. 51 18 N.

Gavardo, town of Italy, in the Bresciano, seated on the Weise, 7 ms. W. of Lake Garda. Lon. 10 9 E., lat. 44 40 N.

Gaudens, St., town of Fr., in the dep. of Upper Garonne, and late province of Languedoc, seated on the Garonne, 8 ms. NE. of St. Bertrand. Lon. 56° E., lat. 43 1 N.

Gaveren, or *Waveren*, town of Austrian Flanders, seated on the Scheldt, 8 ms. S. of Ghent. Lon. 3 51 E., lat. 50 46 N.

Gavi, town of Italy, in the territory of Genoa, seated on the Lemo, 19 ms. NW. of Genoa. Lon. 8 57 E., lat. 45 40 N.

GAU, or **GAW**, so found as suffix to names of places, is from the old German, and means a district.

Gauley, river of Va., rises in Randolph co., and, flowing nearly W., separates Greenbrier from Kenawha cos., and enters the right side of Kenawha at the Great falls.

Gaults, or "*Gates*," two chains of mountains in Hindoostan.—See *Ghauts*.

Gauthead, W. point of Martha's Vineyard.

GAS, according to Lunnier, is a "word invented by Van Helmont, to designate a liquid incapable of coagulation. It is the name given to aeriform fluids, compressible, elastic, transparent, without color, invisible, incondensable in liquor by cold; intermixible in atmospheric air in every proportion, and having all the apparent properties of air, without capability of performing its functions."

Gaza, ancient and celebrated town of Palestine, 3 ms. from the Mediterranean, with a harbor called New Gaza, 50 ms. SW. of Jerusalem. Lon. 34 45 E., lat. 31 28 N.

GAZETTA, a small Venetian coin, from which comes, by transition, the term gazette. The first publication made in Europe to answer the purposes of what we now call a newspaper, were printed in Venice, and sold per sheet for a *gazetta*; hence the name of one of the greatest aids to human reason.

GAZETTE, now adopted for public prints of a single sheet, with the same meaning as newspaper, but coming from the name of a small Venetian coin called gazetta, for which the first of those sheets printed were sold. Venice, therefore, has the double honor of having originated the first newspaper and of giving to them a general title.

Gearon, or *Jaron*, town of Persia, in Farsistan, in whose territory the best dates of Persia are produced. Lon. 51 17 E., lat. 28 15 N.

Geauga, a lake county of Ohio, bounded E. by Ashtabula, Trumbull SE., Portage S., Cuyahoga W., and Lake Erie N.; greatest length on the eastern border 35 ms., mean length 30, and area 600 sq. ms., as the breadth is four 5-mile townships. In latitude it extends from 41 22 to 41 50

N., and in lon. W. C. from 4 5 to 4 26 W. The SE. part of this co. is drained southerly by the extreme sources of Cuyahoga river the residue slopes towards Lake Erie northwesterly, and in that direction is drained by Chagrin and Grand rivers. The surface of this county is mostly lilly, but soil fertile. Chardon is the county seat; but Painesville is the superior business place of the county, though 3 ms. from the lake shore. Pop. of the co. in 1820, 7,791; in 1830, 15,813; and in 1840, 16,297.

Gebail, town and seaport of Syria, ancient Bayblos, 30 ms. NE. from Beyroot.

Gebhart's, post office, Somerset county, Pennsylvania, by post road 152 miles SSW. from Harrisburg.

Geddes, village, Onondago county, N. Y., 2 ms. SW. from Salina.

Gee's Store, post office, Halifax co., N. C., 116 ms. NE. from Raleigh.

Geste, the capital of the province of Gestrrike, in Sweden, seated on three branches of a river of the same name, which begins to be navigable here, and falls, in a short distance, into a bay of the Baltic. It is the most commercial town in this northern part of Sweden; and its exports are principally iron, pitch, tar, and planks. It is 65 ms. N. by W. of Stockholm. Lon. 17° E., lat. 63° N.

Gegenbach, free imperial city of Suabia, under the protection of the house of Austria. It is seated on the Kinzia, 12 ms. SE. of Strasburg. Lon. 8 2 E., lat. 48 24 N.

Geldiure, town of Suabia, near the river Kocher, with a castle belonging to the lords of Limburg.

Geislengen, an imperial town of Suabia, 17 ms. NW. of Ulm. Lon. 10 3 E., lat. 48 36 N.

Geismar, town of Germany, in the principality of Hesse. Longitude 8 57 E., latitude 51 19 North.

Gelhausen, small imperial town of Weteravia, under the protection of the elector palatine, with a castle, seated on the Kintzig, 25 ms. E. of Hanau. Lon. 9 15 E., lat. 50 7 N.

Gemappe, village of Belgium, 3 ms. W. by S. of Mons.

Gemblours, town of the kingdom of the Belgium; in Brabant, on the Orneau, 22 ms. SE. of Brussels. Lon. 4 51 E., lat. 50 37 N.

Geminiani, St., town of Tuscany, in the Florentino, seated on a mountain, in which is a mine of vitriol, 25 ms. SSW. of Florence.

Gemningen, town of Germany, in the palatinate of the Rhine, 30 ms. E. of Philipsburgh. Lon. 9 13 E., lat. 49 6 N.

Gemund, imperial town of Suabia, with a manufacture of chaplets or beads, which are sent to distant countries. It was taken by the French in August, 1796, and is seated on the Reims, 30 ms. N. by W. of Ulm. Lon. 9 48 E., lat. 48 48 N.—Town of Westphalia, in the duchy of Juliers, seated on the Roer, 24 ms. SW. of Cologne. Lon. 6 48 E., lat. 50 38 N.—Town of Upper Austria, remarkable for its salt works, seated to the N. of a lake of the same name, on the river Draun, 20 ms. SSW. of Lintz.

Genap, town of the kingdom of the Belgium, in Brabant, on the Dyle, 15 miles SE. of Brussels. Lon. 4 40 E., lat. 50 40 N.

Genegantslet, post office, Chenango co., New York.

Genep, or *Gennep*, town of Westphalia, subject to the king of Prussia, and seated on the Nears, ms. SW. of Cleves. Lon. 5 48 E., lat. 51 4 North.

Genesco, town, Livingston co., N. Y., E. from Genesee river, 29 ms. above Rochester, and, by post road, 42 ms. W. from Canandaigua.

Genesee, river, rises in Potter county, Pa., and flowing NNW., enters Alleghany co., N. Y., and continuing that direction 30 ms., turns to NNE 65 ms. through Alleghany, Livingston, and Monroe cos., falls into Lake Ontario 30 ms. NW. from Canandaigua, and, by water, 10 ms. below Rochester. This stream is navigable for large boats 1 ms., to its falls at Rochester. Above the falls it is again navigable at high water to near Angelica, in Alleghany co. The grand Western canal closes the Genesee at Rochester.—County, N. Y. bounded S. by Alleghany and Cattaraugus, W. by Erie and Niagara, N. by Lake Ontario, and E. by Monroe and Livingston cos.; length 52 ms., width 26, area 1,356 sq. miles. The surface of this co. with very partial exceptions, is hilly. The soil is very varied in quality, but may in general be considered as productive in grain, fruits, and meadow grasses. The central part is a kind of table land from which flow the sources of Buffalo and Tonawanta creeks to the W., and Black and Alleghany creeks, branches of Genesee river, to the NE. The Grand canal traverses the northern part of this county, along the Ontario hills. Chief towns, Batavia. Pop. in 1820, 58,693; and in 1840, 59,587. Central latitude 43°, longitude Washington City 1 18 W.—Town, Livingston co.—See *Genesco*.

Geneva, Lake of, ancient *Leman*, a magnificent expanse of water in Switzerland, which from the city of Geneva to Villeneuve, extends 6 ms. in length; and its breadth, in the widest part is 12 ms. It is in the shape of a crescent, of which Switzerland forms the concave and Savoy the convex part.

Geneva, ancient, large, and populous town, capital of a republic of the same name, and member of the Swiss confederacy, near the confines of France and Switzerland. It is seated on the most narrow part of a lake of the same name, where the Rhone issues in two large narrow channels, which soon after unite. This river divides the city into two unequal parts. Geneva, which lies partly in the plain on the borders of the lake and partly on a gentle ascent, is irregularly built. It is the most populous town of Switzerland, containing 24,000 souls. Geneva is 40 ms. NE. Chambery, and 136 NW. of Turin. Lon. 6 4 E., lat. 46 12 N.—Town, Seneca tp., Ontario county, New York, on the NW. margin of Seneca lake. In this vallyage is a bank, an academy, and several manufactories, two printing offices, and several places of public worship. The site is uncommonly fine, rising by gentle acclivity from the lake, and affording an elegant prospect of the lake and adjacent country. It is 16 ms. E. from Canandaigua and 22 W. from Auburn. The pop. about 2,000; by the census of 1830, the tp. contained a pop. of 6,161, and in 1840, 7,073. Lat. 42 54 N., lon. very ne

e meridian of W. C.—Tp., Ashtabula co., Ohio, on Lake Erie. It is the NW. tp. of the co., and the village in it is situated about 12 ms. W. from Jefferson, the co. seat.—Village, Jennings co., Ia., by post road 54 ms. SSE. from Indianapolis.—See *New Geneva*.

Geneviève—See *St. Geneviève*.

Genevois, duchy of Savoy, of which Geneva and its territory were formerly a part. Annecy is the capital.

Gengenback, town of Suabia, 10 ms. SE. of Strasburg. Lon. 7 53 E., lat. 48 28 N.

Gengoux de Royal, St., town of France, in the dep. of Saone and Loire, and late province of Burgundy, remarkable for its excellent wines. It is seated at the foot of a mountain, 17 ms. SW. of Chalons. Lon. 4 43 E., lat. 46 37 N.

Geniz, St., town of France, in the department of Aveiron, 24 ms. NE. of Rhodes. Lon. 3° E., lat. 44 35 N.

Genis, town of Savoy, on the Guier, 12 ms. W. of Chambery. Lon. 5 30 E., lat. 45 40 N.

Genite Bridge, post office, Powhatan co., Va., 17 ms. W. from Richmond.

Genoa, formerly a republic of Italy, now a province of Sardinia, extending along that part of the Mediterranean called the Gulf of Genoa 152 miles; but its breadth is very unequal, being from 8 to 12 ms. Where it is not bounded by the sea, it is bordered from W. to E. by Piedmont, Montebelluna, Milan, Placentia, Parma, Tuscany, and Liguria. It is populous, well cultivated, and fertile, but the inner parts are mountainous, and barren in several places, having neither trees nor grass upon them.—Ancient city of Italy, capital of the province of the same name. It is situated at the bottom of a little gulf, partly on the declivity of a pleasant hill, in consequence of which it appears to great advantage from the sea. It is defended on the land side by a double wall, which, in circumference, is about 6 ms. Genoa is 62 ms. W. of Turin, and 225 NW. of Rome. Lon. 8 45 E., lat. 44 25 N.—Town, Cayuga co., N. Y., on the E. side of Cayuga lake, 26 ms. S. of Auburn. Pop. in 1820, 2,585.—Post office in the southern part of Delaware co., Ohio, about 12 ms. a little E. of N. of Columbus.

GENTILE, a term long applied to those people who were neither Jews nor Christians. It is in its meaning correlative with Pagan, and would seem to be the original meaning of both, to mean ignorant persons, or persons who knew not the truth. The Hebrews," says Webster, "included under the term GENTILE, or NATIONS, all those tribes who had not received the True Faith." Pagan comes from *paganus*, a villager or clown—ignorant person; hence peasant. Heathen again means an inhabitant of the heath; and what is in no slight degree curious is, that the Arabic word *kaffir*, or infidel, means the same as pagan and heathen," and is an inhabitant of huts, the fields, or woods, or, in other words, a savage.

Geo, from Gr. *Gé* the earth, commences many terms in our language, all relating to the earth. *Geocentric*, in astronomy, to express the position of a planet in relation to the earth. *Geocyclic*, any instrument made to represent the motion of the earth round the sun, and in particular to show the phenomena of the seasons by

the parallelism of the axis to itself in all parts of the orbit. *Geodesie*, usually called *surveying*, measuring, and dividing land amongst different proprietors. *Geognosy*, Greek, earth and knowledge. *Geology* has, in fact, the same meaning. *GEOGRAPHY*, Gr., the earth, and *grapho*, to describe. *GEOHYDROGRAPHY*, description of earth and water. *GEOMETRY* Gr., the earth; *metron*, measure. *GEOPONICS*, Gr., equivalent to agriculture; *Georgic*, same meaning; *Geostatic.*, weight of heavy solid bodies, as contradistinguished from Hydrostatics, weight of fluids.

GEOCYCLICK, Greek, *gé*, the earth, and *kyclos*, circle—a name given to any machine showing the motion of the earth round the sun, with the axis of the latter kept parallel to itself.

GEODESY, Greek, *gé*, the earth, and *daio*, to divide—has the same meaning as our common term "surveying;" but the former is most usually applied to extensive geometrical operations, as to measure tracts to procure elements for constructing maps, or to measure a degree of the meridian, or for canals, roads, &c.

GEOGRAPHY, from Greek—*gé*, the earth, and *grapho*, to write—a written description of the earth or its parts.

George, Fort, strong and regular fortress of Scotland, in Inverness-shire, on a peninsula running into the Murray Frith, and completely commands the entrance into the harbor of Inverness.

George, Fort. See *Madras*.

George, lake of N. Y. It lies SW. of Lake Champlain, and is 35 ms. long, but narrow. The adjacent country is mountainous. The scenery around this beautiful sheet of water is high, bold, and extremely romantic. Its vicinity is a favorite resort in summer of the visitants to Ballston and Saratoga springs. It is about 33 ms. long, with a mean width of about 2 ms.—Lake of Florida, in N. lat. 29°, about 25 ms. long and 8 wide. This lake is a mere dilatation of St. John's river, and is generally surrounded by low marshy grounds. What land is of a sufficient height for cultivation is generally of the first-rate quality. The timber, live oak, cabbage, palm, cypress, and pine.

George, St., one of the Azores. The inhabitants are employed in the cultivation of wheat. Pop. about 5,000. Lon. 28° W., lat. 38 39 N.—Island of the U. S., in the strait of St. Mary, that forms the communication between Lake Superior and Lake Huron.

George del Mina, St., best fort on the Gold Coast of Guinea, and the principal settlement of the Dutch in those parts. It is 30 ms. W. by S. of Cape Coast Castle. Lon. 22' W., lat. 5 3 North.

George's, St., small island in the Gulf of Venice, lying to the S. of Venice, to which it is subject. Here is a Benedictine monastery, whose church is one of the finest in Italy.—Largest of the Bermuda islands, in which is the town of St. George, the capital of all the islands. Lon. 65 30 W., lat. 32 45 N.—Island in the Gulf of Mexico, opposite the mouth of the Appalachicola. Lon. W. C. 7 50 W., lat. 29 30 N.

George's Key, St., small island of N. America, off the coast of Honduras. It is likewise called Cassina, or Cayo Cassina. By a convention in

1786, the English logwood cutters were permitted to occupy this island.

George's, post office, St. Francis co., Mo., about 70 ms. a little W. of S. from St. Louis.

Georgesville, village, Franklin co., O., on Darby creek, 13 ms. SW. from Columbus.

Georgetown, village on the left bank of the Ohio river, Beaver co., Pa., immediately above the Va. line, 40 ms. WNW. from Pittsburg.—Village, Mercer co., Pa.—Village, Brown co., O., on the road from West Union to Cincinnati, 40 ms. SE. by E. from the latter, 23 a little N. of W. from the former, and by post road 107 ms. SSW. from Columbus.—Tp., Lincoln co., Me., on the left side of the Kennebec river, at its mouth.—Tp. and village, Madison co., N. Y.—

Town and seat of justice, Sussex co., Del., on the dividing ground between the heads of Indian and Nanticoke rivers, 40 ms. from Dover. Lat. 38 42 N., lon. W. C. 1 37 E.—Town and port of entry, D. C., 3 ms. W. from the Capitol. The site of Georgetown is an acclivity rising by a bold sweep from Potomac river and Rock creek. It is the seat of a Roman Catholic college, which possesses two large buildings, a well-chosen library of 7,000 volumes, and about 150 students.

This town is the mart of considerable commercial business. See art. *District of Columbia*.—

Village, Kent co., Md., on the left bank of Sasfras river, 65 ms. SW. from Philadelphia.—

District of S. C., bounded by the Atlantic ocean SE., by Santee river or Charleston SW., by Williamsburg NW., and by Marion and Horry NE. Length 36, mean width 25 ms.; area 900 sq. ms. Surface generally level, and in part sandy or swampy. Soil of middling quality. Chief town, Georgetown. Pop. 1820, 17,603; 1840, 18,274. Cent. lat. 33 30 N., lon. W. C. 2 25 W.—

Village, seaport, and seat of justice, Georgetown district S. C., on the point between Sampit creek and Black river, near the head of Winyan bay, 60 ms. NE. from Charleston. Lat. 33 21 N. It is well situated for a port of trade, the bar at the mouth of Pedee admitting vessels of 11 feet draught, and having the extensive country watered by the Great Pedee and its branches in the rear. It contains several places of public worship, a bank, and the ordinary buildings necessary for legal purposes.—Village, Warren co., Geo., on the left side of Ogechee river, 60 ms. from Savannah, and 35 above Louisville.—Village, Beaver co., Penn.—Town and seat of justice, Scott, co., Ky., on the left bank of North Elkhorn creek, 15. ms. E. from Frankfort. It contains a court-house, bank, printing office, and several places of public worship. Lat. 38 14 N., lon. W. C. 7 28 W.—Village, Harrison co., O., 6 ms. SE. from Cadiz.—Village and co. seat, in Pleasant tp. of Brown co., O., situated about 7½ ms. from Ohio river, on the road from West Union to Cincinnati, about 105 ms. by postroad SSW. from Columbus, 45 ms. SE. by E. from Cincinnati, 23 SE. from Batavia, and 22 a little N. of W. from West Union, N. lat. 38 58 lon. W. C. 6 42 W. Pop. 1836, 500, in 1840 the tp. contained 1,970.—Village Dearborn co., Ia.—

Called by the Dutch *Stabroek*, town of S. America, in Demarara, on the right bank of Demarara river. Lon. W. C. 19° E., lat. 6 40 N. Pop. 9,000.

Georgetown Cross Roads, post office, Kent co. Md., 3 ms. S. from Georgetown.

Georgia, country of Asia, called by the Persians *Gurdistan*, or more correctly *Koordistan* and by the Turks *Gurtshi*. It is one of the seven Caucasian nations in the countries between the Black sea and the Caspian, and comprehends the ancient Iberia and Colchis. It is bounded on the N. by Circassia, E. by Daghestan and Schirvan S. by Armenia, and W. by Cuban, or the new Russian Government of Caucasia. It is divided into 9 provinces. Of these, 5 form what is commonly called the kingdom of Georgia, and 4 the kingdom or principality of Imeritia. The late reigning prince ceded this country to Russia of his death, which happened in 1800. The hills of Georgia are covered with forests of oak, ash, beech, chesnuts, walnuts, and elms, encircled with vines, growing perfectly wild, but producing vast quantities of grapes, from which much wine and brandy are made. Cotton grows spontaneously as well as the finest European fruit trees. Rice, wheat, millet, hemp, and flax, are raised on the plains, almost without culture. The valleys afford the finest pasturage, the rivers are full of fish, the mountains abound in minerals, and the climate is healthy. The rivers of Georgia, being fed by mountain torrents, are always either too rapid or too shallow for the purposes of navigation. The Georgians are Christians of the Greek communion. The principal mountains are the Caucasus, separating it from Circassia.

Georgia, one of the U. S.; bounded SE. by the Atlantic ocean, S. by Fa., W. Ala., N. by Tenn., and NE. by S. C. Length 380 ms, mean width 150; area within a small fraction 58,000 sq. ms., equal to 37,120,000 acres. Lying between lat. 30 22 and 35° N.

Of all the States of the U. S., Georgia presents the greatest diversity of climate and of vegetable production, indigenous and exotic. Its mountainous northern extremity rises into an elevation favorable to the cereal gramina, whilst its southern extremity, on the branches of Appalachian St. Mary's, and Alamaha, have a climate sufficiently mild to permit the growth, and even profitable culture, of the sugar cane, orange, olive, date, and lemon trees. Between those extreme every valuable vegetable substance produced in the U. S. can be brought to perfection. From the much higher temperature of the seasons on the Atlantic coast than those in the basin of the Mississippi, tender tropical vegetables are cultivated upwards of two degrees of latitude farther N. in the former than in the latter region. Sweet oranges are cultivated in Beaufort district, S. C. Lat. 32 20 N. This fruit ceases in La. at about lat. 30 10 N. Oranges are cultivated along the entire seaboard of Ga., as is the sugar cane. Cotton may, however, be considered as the staple commodity of the State. Ga. is naturally divided into three zones, presenting very distinct and appropriate features. First, the almost flat in many places inundated sea border; the sea hill tract, between the sea border and the falls of the rivers; and, lastly, the hilly and mountainous section above the falls. The first is marked some very productive islands, but generally by marshy or sterile pine wood soil, reaching 80

0 ms. inland. The second, or sand-hill tract, interspersed with much very valuable river alluvion. The third, the most extensive, most fertile, and much the most salubrious part of the State, reaches from the interior of the middle zone to the most limits of the State. On the latter, are cultivated in full perfection all the grains of the U. S., excepted, and an indefinite variety of orchard and garden fruits, and other vegetables. Taken as a whole, this State produces grain, sugar, cotton, tobacco, indigo, &c. The interests of education have received their share of attention in Georgia. A university has been planned and partially established, consisting of Franklin college, already in operation at Athens, and of an academy intended to be located in each co. The latter part of the design remains necessarily incomplete, though several academical establishments have been actually formed. Free schools were projected in 1817, and 200,000 dollars appropriated by the Legislature to carry the enlightened project into effect.

The State is judicially divided into four districts—southern, eastern, middle, and western, similar to other States of the U. S., the Legislature of Ga. consists of a Senate and House of representatives; but elections are more than ordinarily frequent. The members of both Houses are chosen annually by the respective cos. The Governor is chosen biennially by the Legislature. In point of commercial importance, Ga., from the value of her products, holds a high rank; in 1817, her exports amounted to near 9,000,000 of dollars, and in 1836 amounted to upwards of 10,000,000 dollars. A railroad has been projected, and in part executed, to extend from Augusta through the State, in a northwestern direction, to the Tennessee line, on a branch of Tennessee river; another railroad to leave Savannah, and passing by Macon, join the first at the town of Decatur, in De Kalb co.; and a third to leave Brunswick harbor, in Glynn co., and extend SW. by across the State, to its SW. angle, at the junction of the Flint and Chattahoochee river.

10	252,433	
20	340,989	1.31
30	516,823	1.22
40	691,392	1.33

Ratio of increase in 30 years, from 1810 to 1840, 2.74.

Georgia, gulf of the U. S., on the Pacific coast, between the continent and Quadra and Vancouver's land. It extends from Johnson's straits to the straits of John de Fuca, about 250 ms. This so-called gulf is really a strait between the continent of North America and the island of so many names, Quadra and Vancouver's, Queen Charlotte's, and the Wakash nation. The southern entrance to this strait is about 160 ms. N. of the mouth of the Columbia river.—Town of Franklin co., Vt., situated on the E. side of Lake Champlain, about 100 ms. N. of Milton, containing 1,800 inhabitants. *Georgia, Southern*, island of the South Pacific Ocean, discovered by Captain Cook in 1775, and named by him. It is 31 leagues long, and 10 leagues greatest breadth. It seems to abound with rivers and harbors, which the vast quantities of ice render inaccessible the greatest part of the year. The valleys were covered with snow, and the only vegetation observed was a bladed grass, growing in tufts, wild burnet, and a plant, like moss, which sprung from the rocks. Not a stream of fresh water was to be seen on the whole coast. This island lies between 38° 13' and 35° 34' W. lon., and 57° 57' and 54° 57' S. lat.

Georgiensk, capital of the Russian province of Caucasus, as laid down on Black's map, is situated on a higher branch of the Kouma river, at N. 44° 45', lon. 42° 45' E. London, about 140 ms. E. of Soukoum Kaleh, on the Euxine, and 300 ms. southwestward of Astrakhan.

Gepping, town of Suabia, in Wirtemberg, on the river Wills, 25 ms. E. of Stutgard. Lon. 9° E., lat. 48° 44' N.

"GER" is mentioned by Pliny (l. 5, c. 1) as a river in Mauritania Cæsariensis. Ger, or Gher, the Berber language, signifies *between*, and is a very probable etymology of that river. There is a

town in the empire of Morocco, which at this day is called Gher. It lies to the SE. of Fez, between two ridges of Mount Atlas. There is also Cape Gher, on the western coast of Morocco, between Mogador and Santa Cruz."—*Hodgson*.

Gera, town of Germany, in Misnia, with a handsome college, on the river Elster. Lon. 11° 56' E., lat. 50° 50' N.

Geraw, town of Germany, in Hesse-Darmstadt, capital of a district of the same name, 10 ms. NW. of Darmstadt. Lon. 8° 29' E., lat. 49° 45' N.

Gerberoy, town of Fr., in the dep. of Oise, and late province of the Isle of France, 50 ms. N. by W. of Paris. Lon. 1° 54' E., lat. 49° 32' N.

Gerbs, *Gerbi*, or *Zerbi*, island on the coast of Tunis. It bears no other corn than barley, but has large quantities of figs, olives, and grapes, which, when dried, form the principal trade. It depends on the Dey of Tripoli. Lon. 10° 30' E., lat. 33° 56' N.°

Gerbevillers, town of Fr., in the dep. of Meurthe, and late province of Lorraine, on the Agen, 5 ms. from Luneville.

Gergenti, town of Sicily, near the river St. Blaise, 50 ms. S. of Palermo. Lon. 13° 24' E., lat. 47° 24' N.

Gerisau, village of Switzerland on the N. side of the Lake of Schweiz, at the foot of the Rigi. It is a republic, the smallest in Europe. Its territory is two leagues in length and one in breadth, composed entirely of scattered houses and cottages, of a very neat and picturesque appearance. The inhabitants are computed at about 1,200, and are much employed in preparing silk for the manufactures at Basle. This republic is under the protection of the cantons of Lucern, Uri, Schweiz, and Underwalden; and, in case of war, furnishes its quota of men. Gerisau is 12 ms. SW. of Schweiz.

Germain, St., town of Fr., in the dep. of Seine and Oise, and late province of the Isle of France, on the Seine, near a forest, 10 ms. NW. of Paris. Lon. 2° 15' E., lat. 48° 52' N.

Germain's, St., borough of Eng., in Cornwall, near the sea, 10 ms. W. of Plymouth and 224 W. by S. of London. Lon. 4° 24' W., lat. 50° 22' N.

Germain Laval, St., town of Fr., in the dep. of Rhone and Loire, and late province of Forez, remarkable for excellent wine. It is 225 ms. SE. of Paris. Lon. 4° 2' E., lat. 45° 50' N.

German, town, Chenango co., N. Y., 18 ms. W. from Norwich. Pop. in 1820, 2,675.—*Tp.*, Fayette co., Pa., on Brown's creek, 6 ms. W. from Union. Pop. in 1820, 2,379.—*Tp.*, Clarke co., O.—*Tp.*, Montgomery co., O. Pop. 1820, 2,079.—*Western tp.*, Darke co., O.—*Tp.*, Cape Girardeau co., Mo.

German Coast, district of La., on both banks of the Mississippi river, above the parish of Orleans.—See *St. Bernard*.

German Flats, town, Herkimer co., N. Y., on the level point between Mohawk river and West Canada creek. The tp. is named from the extensive alluvial bottoms of the Mohawk. Pop. in 1820, 2,665.

Germanna, village, on Rapid Ann river, in the NE. angle of Orange co., Va., 72 ms. SW. from W. C., and 81 N. from Richmond.

Germano, village in the northeastern part of Harrison co., O., 10 ms. NE. of Cadiz.

German Settlement, post office, Preston county, Va., 170 ms. a little N. of W. from W. C.

Germantown, town, Columbia co., N. Y., on Hudson river, 12 ms. below Hudson.—Village, Philadelphia co., Pa., commencing 6 ms. and extending along the Reading road to Chestnut Hill, 10 ms. N. from Philadelphia. In this fine village is located Mount Airy College, a respectable literary institution.—Village, Fauquier co., Va., 49 ms. from W. C.—Village, Hyde co., N. C., on the N. side of Pamlico sound, 30 ms. SE. by E. from Washington.—Village, Stokes co., N. C., on Dan river, 100 ms. NW. from Raleigh.—Village, nearly on the line between Bracken and Mason counties, Ky., 33 ms. SE. from Cincinnati.—Village, in the SW. part of Montgomery co., O., situated on Twin creek, 13 ms. SW. of Dayton, 4 W. of Miamisburg, and 18 SE. by E. from Eaton, in Preble county. It is a very flourishing village, and, according to the Ohio Gazetteer, it contained in 1836 a population of 1,000.

German ocean, that expanse of water bounded by Germany and France S., by the British islands W., a part of the northern Atlantic N., and by Norway, Jutland, and a part of Germany E.—See *North sea*.

Germany, large country of Europe, bounded E. by Hungary and Russian and Austrian Poland, S. by Italy and Switzerland, W. by France and the Netherlands, and N. by Denmark and the Baltic sea; in length and breadth it is about six hundred miles by a mean of three hundred and seventy, or area of 220,000 sq. miles. From its peculiar constitution and political and moral consequence, we may so far depart from our usual brevity as to give a few general facts of its history. In the ages when Roman power had risen to the highest, the German tribes were free, unsubdued, and braved the conquerors of so many other nations. As the Roman power declined, German power and political consistency increased; and when, in A. D. 476, the Roman empire of the west ceased to exist, it was superseded by the Goths, Alains, Suevi, Lombards, Franks, and other German nations. In succeeding centuries, those new nations changed the ancient order of things, new laws, languages, and political divisions rose, and finally the Emperor Charlemagne, in the year 800, being then at the city of Rome, Pope Leo III. crowned him emperor, in St. Peter's church; and Nicephorus, who was then emperor of the East, consented to this coronation. After the death of Charlemagne, and of Louis le Debonnaire, his son and successor, the empire was divided between the four sons of the latter. Lothario, the first, was emperor; Pepin was King of Aquitaine; Louis, King of Germany; and Charles le Chauve, King of France. This partition was the source of incessant feuds. The French kept the empire under eight emperors, till the year 912, when Louis III, the last prince of the line of Charlemagne, died without male issue. Conrad, Count of Franconia, the son-in-law of Louis, was then elected emperor. Thus the empire went to the Germans, and became elective; for it had been hereditary under the French emperors. The emperor was chosen by the princes, the lords, and the deputies of cities, till the year 1239, when the number of the electors was reduced to seven; one more was added in 1649, and another in 1692; these nine electors continued to the year 1798, when, in consequence of the altera-

tions made in the constitution of the empire, under the influence of France and Russia, they became ten in number; namely, the elector and archbishop of Ratisbon, the elector and King of Bohemia, (the then emperor,) the elector of Bavaria, the elector of Saxony, the elector of Brandenburg, (King of Prussia,) the elector of Hanover, (King of England,) the elector of Wurtzburg, (late grand duke of Tuscany,) the elector of Wirtemberg, the elector of Baden, and the elector of Hesse. Rudolphus, Count of Hapsburg, was elected emperor in 1273. He is the head of the house of Austria, which is descended from the same stock as the house of Lorraine, reunited to it in the person of Francis I., father of the two late emperors, Joseph and Leopold. On the death of Charles VI. of Austria, in 1740, an emperor was chosen from the house of Bavaria, by the name of Charles VII. On the death of this prince, in 1745, the above mentioned Francis, formerly Duke of Lorraine, and when elected Grand Duke of Tuscany, was elected emperor; whose grandson, Francis II., enjoyed the dignity of Emperor of Germany till 1806, when he formally resigned the title and office. At the close of the Saxon race, in 1024, the prerogatives of the emperor were very considerable; but in 1437, they were reduced to the right of conferring all dignities and titles, except the privilege being a State of the empire; of granting dispensations with respect to the age of majority; of erecting cities, and conferring the privilege of coinage; of calling the meetings of the diet, and presiding in them. But, after all, there was not foot of land annexed to this title; for, ever since the reign of Charles IV., the emperors depended entirely on their hereditary dominions as the source of their power, and even of their subsistence. To prevent the calamities of a contested election, a king of the Romans was often chosen in the lifetime of the emperor, on whose death he succeeded to the imperial dignity of course. The emperor (always elected and crowned at Frankfort or the Maine) assumed the title of august, and pretended to be successor to the emperors of Rome. Although he was chief of the empire, the supreme authority resided in the diet, which was composed of three colleges—the college of electors, the college of princes, and the college of imperial towns. The diet had the power of making peace or war, of settling general impositions, and of regulating all the important affairs of the empire; but the decisions had not the force of law till the emperor gave his consent. When a war was determined on, every prince contributed his quota of men and money, as valued in the matriculation roll; though as an elector or prince, he might espouse a different side from that of the diet. All the sovereigns of Germany have an absolute authority in their own dominions, and can lay taxes, levy troops, and make alliances, provided they did not prejudice the empire. They determine all civil causes definitely, unless in some particular cases, in which an appeal may be made. These appeals were two courts, called the Imperial Chamber, at Weimar; and the Aulic Council, at Vienna. The principal religions are the Roman Catholic, the Lutheran, and the Calvinists; but Christians of other denominations are tolerated; and there is a multitude of Jews in all the great towns.

Germany was divided into nine circles, namely: Austria, Bavaria, Suabia, Franconia, Upper and Lower Rhine, Westphalia, and Upper and Lower Saxon: each of these includes several other States; only Bohemia, Moravia, Lusatia, and Silesia, are comprised in the ten circles. Germany late-ly contained 6 archbishoprics and 38 bishoprics; this hierarchy was thrown into confusion by secularizations in 1798, and is not yet restored in order; the Archbishop of Ratisbon is primate and metropolitan of all Germany; the see of Mentz having been moved to Ratisbon. No country has undergone such a variety of changes for the last 20 years as Germany. This account must be considered as what Germany was previous to the year 1806; after which time, in consequence of the formation of the confederation of the Rhine, the Emperor Francis II. resigned his office as Emperor of Germany, which dissolved that ancient constitution; and therefore that confederation may be considered as abolished. By the confederation of 1815, Germany was new modelled, and stands as follows: A permanent diet is formed and holds its sessions at Frankfurt on the Rhine. The States which are entitled to representation in that body are the following:

Statistical table of the Germanic Confederation, from Liechtenstein, giving their respective area in statute square miles, their population, and the military contingents which each is bound to furnish in case of war.

States.	Area in sq. mis.	Population.

See *Zoll Verein*, or "German Customs Union."

Though greatly changed politically, the fundamental constitution of Germany was too deeply radicated in the manners, language, and thoughts of the Germans to admit of any essential revolution in its society, but what arose from gradual melioration in the reasoning power and arts of life of the people. The changes have therefore been political meliorations, and, as such, are still in progress.

NOTE.—It will be seen that, in the aggregates of population contained in this article and that of the *Zoll Verein*, there is a discrepancy; but the cause is the different authorities for the two articles, and in part, no doubt, from difference in time of making the estimates.

According to the Suabian Mercury, the increase in population of the principal cities of Germany was as follows:

Cities.	1821.	1841.
Berlin, Prussia	192,217	315,541
Carlsruhe, grand duchy of Baden	16,021	23,424
Cassel, Electoral Hesse	23,692	31,349
Darmstadt, Ducal Hesse	15,450	29,007
Dresden, kingdom of Saxony	52,000	80,989
Hanover, kingdom of Hanover	24,000	29,000
Munich, Bavaria	60,024	106,351
Stuttgart, kingdom of Württemberg	27,600	42,217
Vienna, Austria	273,242	357,927
Weimar, Ducal Saxony	8,917	11,456

[From the London Morning Chronicle.]

Railroads in Germany.—The year's result of the German railroads at present in activity has been published, and shows an increase of nearly two millions of travellers in 1842, as compared with 1841. The following table will show the number of passengers and the amount (in English money) received for passengers and goods during the month of December, and during the whole of the year 1842:

Names of railroads.	During December, 1842.		During the whole of 1842.	
	Number of passengers.	Money received.	Number of passengers.	Money received.
Linz-Budweis	None.	£1,566	14,274	£23,992
Linz-Gmunden	5,556	1,258	121,155	20,055
Leipzig-Altenburg	8,173	1,072	43,622	5,266
Munich-Augsburg	9,229	1,563	213,647	26,865
Hamburg-Bergedorf	9,315	242	153,648	5,277
Berlin-Stettin	12,135	-	70,880	-
Berlin-Frankfurt	13,278	2,168	35,274	7,285
Breslau Oppeln	14,236	632	139,099	8,633
Manheim-Heidelberg	16,506	522	307,692	9,696
Cologne Aix la Chapelle	17,760	2,439	317,776	39,914
Dusseldorf Elberfeld	19,113	1,153	384,946	-
Brunswick-Harzburg	20,700	2,329	289,454	14,893
Berlin-Anhalt	20,925	5,673	318,639	79,577
Vienna-Stockerau	20,826	1,076	321,490	14,894
Vienna Brunn-Olnutz	21,638	9,416	297,505	110,617
Magdeburg-Leipzig*	-	-	-	-
Leipzig Dresden	24,932	7,465	377,380	98,579
Berlin Potsdam	30,505	1,565	500,906	23,692
Mentz-Frankfort	32,811	1,487	809,012	37,795
Nuremberg-Furth	33,874	402	450,635	5,271
Vienna Raab	36,535	3,795	1,151,393	71,641

The total number of passengers during the month of December (without including Magde-

*Had made no return at the end of January.

burg and Leipsic) was 368,049; the number in the corresponding month of 1841 was 289,864. During the whole year of 1842 the number of passengers was 6,829,002, whereas in 1841 the number was 5,071,342; so that, on the whole year, there appears an increase of 1,757,660. In the returns of several of the lines, the amount received is not specified, owing to their not having made up their accounts for the last quarter at the time the general statement was made up. Approximate calculations have in the mean time been made, according to which the whole number of travellers, along all the lines, has been estimated at 6,870,000, and the amount received 7,000,000 Rhenish florins, or about £583,333; a sum perhaps less than was anticipated by the original estimates of the different companies, but which must still be looked on as large, when the circumstances is taken into account that the majority of the twenty-one railroads enumerated in the above table are still incomplete, or are only portions of a more extensive system, the real traffic of which will not be known until the whole system has been brought into activity. Even those lines which are complete, such as the lines that connect Berlin and Dresden, or Vienna and Olmutz, will probably become much more productive to their proprietors when the other lines now in construction shall have covered all Germany with a net of railroads.

The Linz-Budweis railroad conveys no passengers during the winter months, owing to the accumulation of snow in the mountains, and the consequent impossibility of making the trips with any degree of regularity. Indeed, upon all the German railroads, it will be seen the number of travellers was small in December compared to the monthly average of the year.

The Leipzig-Altenburg line is only the commencement of one which is to connect the chief cities of Saxony with those of Bavaria. The road was partially opened to Altenburg on the 19th of September, and will, in a few months, be further opened to Crimmitchau. The Bavarian Government seems determined that that part of the railroad which will traverse Bavarian ground shall be constructed with the least possible delay. The railroad is to enter the Bavarian territory at Hof, whence it is to pass through Augsburg and Nuremberg, and run on to the southern frontier at Lindau; thus traversing the entire kingdom from north to south, a distance of about one hundred and fifty leagues. The bill for the construction of this railroad has been submitted to the Bavarian Chambers. The expenses of the construction are to be covered by a loan.

The Munich-Augsburg company have declared a dividend for the year, on their shares, of three per cent. We have not heard whether the shareholders have made up their differences with the directors, or whether the company can yet be said to have lost the unenviable distinction of being the worst managed of all the German railroads.

The line, however, which at the present moment justly excites the greatest interest in Germany; and which to England is of more importance than all the other German railroads put together, is the projected line from Hamburg to Berlin, of which as yet only a few miles have been completed, namely, from Hamburg to Bergedorf. The enter-

prising mercantile community of Hamburg were, if we mistake not, the first in Germany to best themselves for the establishment of railroads, but encountered so many obstacles in the jealousy of their neighbors that one plan after another was abandoned in despair. It was at length, however, determined that so much of the line towards Berlin as ran upon their own territory should be executed at all events, and they calculated that when a commencement had been made, they would find it all the easier to overcome *personal* objections. The result has justified that calculation. All opposition on the part of Denmark and Mecklenburg has gradually been overcome, the political difficulties to the undertaking have been all obviated, and nothing now remains but to raise the necessary capital in order to proceed with the construction of the railroad.

In ordinary times there would be no difficulty obtaining, in Hamburg and Berlin, purchasers for all the shares in such an undertaking as a railroad intended to connect the two cities; but at the present time several circumstances contribute to impede the prompt filling up of the subscription list. The calamity which befel Hamburg last May still severely felt there, independently of which Hamburg has largely participated in the effects of that commercial depression under which England has now been suffering for so considerable a time. Many of the citizens of Hamburg have passed from affluence to poverty in consequence of the great fire, and many more are probably still struggling to conceal from the world the state of insolvency to which that calamity has reduced them. Capital is, therefore, necessarily less abundant in Hamburg now than in more prosperous times, and other circumstances contribute just now in Germany to invite the investment of surplus capital in other undertakings. The king of Prussia has projected a colossal system of railroads radiate from his capital towards the extreme points of his kingdom. Many of the lines which he has determined on, and which have received the sanction of the States, however important they may be in a political or military point of view, are not likely to produce much profit to those who would make them at their own risk; the king, in order nevertheless, to ensure their construction, has guaranteed to the capitalists who will undertake them a minimum interest of three and a half per cent. This guaranty fund is not to be extended to the line from Berlin to Hamburg, which has been looked on by the Prussian Government as so secure a speculation that no guaranty from the State would be requisite to induce capitalists to enter upon it. Eventually this anticipation will, I doubt, be fully justified; but in the mean time when they may be called the State railroads in Prussia would by many be deemed a safer investment, the Prussian Government guarantying the dividends on the shares, not merely from the time when the railroads shall have been completed, but from the day when the works commence.

In addition to these circumstances, there are certain local jealousies and rivalries that are exerting such means as they have at their command to delay, if they cannot wholly prevent, the construction of the railroad between Hamburg and Berlin. When the lines now in construction are complet-

ere will be two great lines extending, the one from Trieste, over Vienna, Prague, and Dresden, Antwerp; and the other from Trieste, over Vienna, Breslau, and Berlin, to Hamburg. Should the line to Antwerp be finished sooner than that to Hamburg, there can scarcely be a doubt that the Antwerp line would become the main artery for German commerce, and that much of the trade of Hamburg would be drawn off by her Belgian rival. It may be worth while to present the present state of these two lines to our readers in a tabular form:

Railroads.	Ready.	In construction.
From Trieste to Gloggnitz	-	50 miles.
From Gloggnitz to Olinutz	40 miles.	-
From Olinutz to Prague	-	32 miles.
From Prague to Dresden	-	20 miles.
From Dresden to Magdeburg	30 miles.	-
From Magdeburg to Hanover	20 miles.	{ Not yet opened, but certain to be opened in a few months.
From Hanover to Cologne	-	48 miles.
From Cologne to Antwerp (or Ostend)	40 miles.	-
	130 miles.	150 miles.

Of the line from Trieste to Antwerp, therefore, 130 (German) miles of railroad are complete, and 40 miles remain to be executed; but of the construction of these 150 miles within a brief space of time, there can scarcely be a doubt, now that the Austrian and Belgian Governments have taken their respective lines under their powerful protection. Whether these Governments are acting wisely, in denying themselves with a guaranty which must be the effect of adding to the national debt of their country, time alone can solve.

The following is the present state of the line from Trieste, over Vienna and Berlin, to Hamburg:

Railroads.	Ready.	In construction.
From Trieste to Gloggnitz	-	50 miles.
From Gloggnitz to Leipnick	40 miles	-
From Leipnick to Oppeln	-	20 "
From Oppeln to Breslau	10 "	-
From Breslau to Frankfort on the Oder	-	34 "
From Frankfort to Berlin	10 "	-
From Berlin to Hamburg	-	36 "
	60 miles.	140 miles.

On the former of these lines, it will be seen, a much larger portion of the work has been completed, a larger amount of capital has consequently been invested, and a powerful rival interest is organized, which will do what it can to deter the aid from investing their funds in a railroad from Berlin to Hamburg. Bohemia, Saxony, Hanover, and Prussian provinces on the Rhine, and Belgium are interested, or believe themselves to be interested, in defeating the Hamburgers, and the consequence has been an active paper warfare, which has of late been extended even to England. Calculations are constantly published in the newspapers, with a view to demonstrate the improbability of a remunerating traffic, and a friendly unbusiness is even expressed, lest some unfortunate schemes should be prevailed upon in England to

throw away their money on so hopeless an undertaking. An instance of this occurred in our own paper, on the 8th instant, when an advertisement of some length was inserted in the shape of a letter, purporting to proceed from an Englishman at Berlin, who was made to give expression to sundry apprehensions lest the purses of his confiding countrymen should be laid under contribution. We have no objection to warnings of this sort. John Bull has, in his time, been seduced to invest a deal of his hard-earned money in the purchase of moonshine, and it will be better for him in future to be too cautious than too confident; at the same time, well aware of the quarter whence these warnings proceed, and of the motives that dictate them, we are not inclined to attach much importance to them, or to feel any deep obligation to their authors.

There is no city on the continent in whose welfare England is more interested than Hamburg. Our exports to that city average annually from five to six millions, (nearly the whole being cotton and woollen manufactures and hardware,) and every additional facility of communication with the interior must have the effect of increasing so profitable a trade. The railroads terminating at Antwerp run, moreover, through no part of Germany but the States embodied in the Customs Union; whereas nearly half the line from Hamburg to Berlin passes through Danish and Mecklenburg territory, where the duties on British manufactures are comparatively trifling, and are likely to remain so, neither of these two countries having any manufacturing interests to protect, and both of them being deeply interested in cultivating a commercial intercourse with England, for the disposal of their agricultural produce. The moment either line is complete to Trieste, that line must become the road from England to India, in preference to that over Paris and Marseilles; but there are many reasons why the line from Hamburg, over Berlin, about 900 English miles in length, would be preferable to that from Antwerp, over Dresden and Prague, which would be at least 1,260 English miles long.

The people of Hamburg look to England for some assistance in carrying out their railroad, in the realization of which they think England almost as much interested as themselves. Individual capitalists, however, will be guided by the prospects of profit only; and of all the continental railroads, we know of none that promises better. At the termini of the line we have a population amounting to more than half a million of souls; and although no large city occurs on the way, yet at both extremes the railroad will come into communication with an intercourse of wide extension and first rate importance. The country, moreover, through which the railroad will run is nearly a dead level, and it may be doubted whether there is any railroad of the same length, in any part of the world, in the construction of which fewer natural difficulties have presented themselves, than may be looked for between Hamburg and Berlin. All the railroads terminating at Berlin, and now in activity, have turned out profitable undertakings, and of all the shares are now at a considerable premium.

The companies interested in the steam naviga-

tion from Hamburg to Magdeburg are also active in their exertions to prevent the realization of the railroad from Hamburg to Berlin, though it may be doubted whether the river traffic, particularly with the steamers, would not continue with nearly the present activity, even if the railroad were in full operation. The travellers to Saxony, Bohemia, and Central Germany, would still continue to journey up the Elbe to Magdeburg.

The Leipzig-Dresden line has published its annual report, and a very satisfactory report it is for the shareholders. The dividend for the last year is to be 6 per cent., and the estimates for the coming year promise a considerable increase in the receipts, accompanied by a considerable reduction of expenditure. The receipts of 1842 showed an increase of 50 per cent., as compared with those of 1841. Till recently, this railroad had been working with a single line of rails. The second line is now completed, and will allow a greatly increased activity. Branch lines are spoken of from Leipzig to Chemnitz, and from Dresden to Chemnitz, as likely to be undertaken in the course of the present year.

No German Government is exerting itself more zealously in the cause of railroads at present than that of Austria. The report of the Vienna-Raab Company for the last year appears to have been quite an agreeable surprise to the shareholders, who, if we understand aright the abstract that has appeared in a German paper, have received 5 per cent. interest on their capital, independently of a half per cent. which has been paid over to the reserved fund. The works of the Government, however, will in a short time give increased value to this line. The works for the extension of the line to Trieste are in active progress, and so, at the other extremity, are those for the extension of the Vienna-Olmütz railroad to Prague. A treaty has been concluded with the Saxon Government for the railroad from Prague to Dresden; so far, therefore, as Austria is concerned, the railroad from the Adriatic to the North sea has been provided for. Even during the winter, from five to eight thousand workmen have been constantly at work on the Bohemian part of the line, but on the return of spring it is intended to strain every nerve to accelerate the great undertaking.

A new German railroad, that between Heidelberg and Carlsruhe, will shortly be opened as far as Heidelberg to Langenbrücken, a distance of about 15 miles. Experimental trips have been already performed, but we have not yet seen any account of the railroad having been opened for the use of the public.

In the kingdom of Würtemberg, also, the Government has very splendid schemes, which will probably be realized, but not without imposing a considerable additional debt on the country, in the shape of a guaranty fund to the capitalists who advance their money. There are to be private railroads and State railroads in Würtemberg; the former are to be undertaken by companies, to whom the Government guarantees an interest of 4 per cent. on the capital advanced, reserving to itself, however, the right of buying up the railroads on payment of the money expended on them. The State railroads are to be constructed by the Government, and a loan is to be raised to defray

the expenditure. Among the lines recommended by the committee of the Second Chamber is one to connect the Rhine and the Danube, from which several branches are intended to radiate.

In looking at the immense works now in progress in Germany, it is impossible to forbear from speculating upon the vast results that must in a few years be obtained. With a railroad 900 miles in length it will be quite practicable to travel from Hamburg to Trieste in 40 or 50 hours, and the saving of several days will be effected in the transit of the overland mail from India to England. The whole system of continental travelling, moreover, must undergo a change, for it will be intolerably absurd to make a man waste days at a railroad station on the formalities of his passport when, in the space of time thus lost he might have travelled from the North sea to the Adriatic. Will not even the national character be likely to undergo a modification, when such rapidity of locomotion has become one of the accustomed occurrences of life in every part of the country?

Germany, SE. tp. of Adams co., Pa., on the heads of the Monocacy and Conewago creeks. Pop. 1820, 1,272.—Village, Shade tp., Somerset co., Pa., on the head waters of Shade creek 20 ms. NE. from Somersett.

Gernersheim, town of Germany, in the palatinate of the Rhine, situated near the Rhine, 5 m. W. of Philippsburg. This is one of the cities of Germany appropriated as a barrier fortress, a \$266,400 voted by the diet for the augmentation of its works.

Gers, department of France, in which are comprehended the late provinces of Gascony and Aquitaine.

Gertrudenburg, town, kingdom of the Netherlands, in Brabant, situated at the east extremity of the Biesboch lakes, which are formed by the Maese, and make a good harbor. It is 10 ms. E. of Breda. Lon. 4 52 E., lat. 52 44 N.

Gerumenhi, ancient town of Portugal, in Alentejo, on a hill, near the river Guadiana, 18 m. below Badajoz.

Gestrike, or *Gestricia*, province of Sweden, bounded on the N. by Helsingia, on the E. by the gulf of Bothnia, on the S. by Upland, and on the W. by Dalecarlia.

Gettysburg, village, borough, and seat of justice in Adams co., Pa., 28 ms. SW. of Yorktown, the capital of the co., and 115 westward of Philadelphia, between Rock and Marsh creeks, branch of Monocacy, on a fine elevated site, with a fertile and well-cultivated surrounding country.

Gevaudan, territory of Languedoc, in France, bounded on the N. by Auvergne, on the W. by Rouergue, on the S. by the Cevennes, and on the E. by Velay. It is a mountainous and hilly country, and now forms the dep. of Lozere.

Gever, or *Gower*. See *Goar*, *St.*

Gex, town of Fr., in the dep. of Aine, and in the province of Bresse, seated at the foot of Mount St. Claude, between the Rhone, the lake of Geneva, and Switzerland. It produces excellent cheese

nd is 10 ms. NW. of Geneva. Lon. 6 1 E., lat. 6 20 N.

Geysers, hot springs in Iceland, flowing from the base of a mountain called the Laugerfell. The perpendicular elevation of the Laugerfell, according to Sir John John Stanley, is only 310 feet, but remarkable as rising from a morass, and from being entirely isolated. The Geysers are not regular flowing fountains, but in form of wells. The water is ejected with great force by jets—as the French more expressively describe, by *elancement*. The basin or well of the Grand Geysier is 51 feet in diameter; and, whatever may produce the propulsive force, the power must be very great, as the volume from such an opening is thrown, at intervals, upwards of 100 feet high. Similar to all uncommon and striking phenomena, the wonders of the Geysers have no doubt been overrated; but as they are in reality, they form one of the most astonishing features in physical nature. The terms derived from words signifying *raging*, *roaring*, &c. *Gezira*, town of Diarbeck, in an island formed by the Tigris, 70 ms. NW. of Monsul. Lon. 40 E., lat. 36 36 N.

Ghanah, or *Ghinnah*, town of the empire of Abyssinia, in Africa. It is seated between a lake and the river Niger. It is 90 ms. NE. of the city of Cashna, and 208 S. of Agadez. Lon. 13 12 E., lat. 15 55 N.

Ghants. See *Gants*.

Ghauts, passages or gates, has in the Sanscrit exactly the same meaning as gaps, used in the U.

The Delaware Water and Wind gaps, the high Water and Wind gaps, and all other similar mountain passes, would be designated *ghauts* in Hindostan. This term has, however, been transferred to two long chains of mountains in southern Hindostan, known as the Western and Eastern Ghauts. The word *ghaut*, evidently the original *gate*, is one of those remarkable terms which denote the identity of origin to languages now very diverse; and the term *sund* or *sound*, for water passages between two shores, and *bund* or *bound*, *embankment*, are others not less curious.

The Western Ghauts extend from Cape Comorin, lat. 8° N., to the Taptee river, N. lat. 21°, through 13° of lat.; the direction a little W. of N. Length between 900 and 1,000 ms., with probable elevation of from 1,000 to 4,000 feet above the level of the ocean. A narrow strip of about 70 ms. wide, between this chain and the Indian ocean, constitutes the Malabar coast. The Eastern Ghauts is at no point broken by rivers, and from its eastern slopes flow the sources of the Nerbuddah, the Kistna, and the Godavery, which, crossing Hindostan and piercing the Eastern Ghauts, are lost in the Bay of Bengal, on the Coromandel coast.

The Eastern Ghauts, more rugged and broken than the western chain, commence at N. lat. 16°, separating Mysore from the Carnatic, and extending NNE. about 800 ms., are terminated towards the sources of the Nerbuddah. Where the Eastern Ghauts form the boundary between the Carnatic and the province of Berar, they are almost impassable, and only one pass, that of Salar Ghaut, admits horses or carriages. The general component rock is granite, rising in threatening cliffs to the clouds, in naked and sterile majesty.

The native name of the Eastern Ghauts is Ellacooda.

Ghent, town of the kingdom of Holland. It is seated on four navigable rivers, the Scheldt, the Lys, the Leive, and the Moere, which run through the city. The city is cut by many canals, which divide it into 26 isles, and over the canals are 300 bridges. It has also two navigable canals; the one to Sas van Ghent, the other to Bruges and Ostend, the last of which was destroyed in 1798, by the British. It is 26 ms. NW. of Brussels. Lon. 3 49 E., lat. 51 3 N.—Village, Gallatin co., Ky., opposite Vevay, 65 ms. by water below Cincinnati.

Ghergong, city of Asia, capital of the kingdom of Assam. It is seated on the Degoo, near its conflux with the Burrampooter, 400 ms. NE. of Calcutta. Lon. 93 15 E., lat. 25 55 N.

Gheriah, town of Hindoostan, on that part of the W. side called the Pirate coast. It was lately the capital and principal port of Angria. It is 295 ms. S. by E. of Bombay. Lon. 73 8 E., lat. 17 59 N.

Ghilan, province of Persia, on the SW. side of the Caspian sea, supposed to be the Hyrcania of the ancients. It is very agreeably situated, having the sea on one side, and high mountains on the other; and there is no entering it, but through narrow passes which may be easily defended. Resht is the capital.

Ghilan, *St.*, town of Fr., in the dept. of the North, and late province of French Hainault, seated on the Haina, 5 ms. W. of Mons. Lon. 3 53 E., lat. 50 28 N.

Ghiustendil, ancient Justiniana, and still more anciently Taurecium, sometimes written and pronounced Kistendil, or Gioustendil, famous as having been the birthplace of the Emperor Justinian, is now a town of European Turkey, on a branch of the Esker river, ancient Strymon, and about 20 ms. above and SSW. of Sophia. It is remarkable for its warm and sulphurous baths. N. lat. 42 13, lon. 22 56 E. London.

Ghizni, or *Ghuzni*, city of Asia, in Afghanistan, situated on the slope of the mountains between Cabul and Candahar, about 60 ms. SW. from the former, and 120 NE. by E. from the latter, and at N. lat. 33° lon. 68 30 E. The site is very elevated, and cold excessive in winter. It is now of little consequence, but was from A. D. 1000 to—the seat of a powerful empire, usually called the Sarazen empire of Ghizni.

Gholsonville, village, Brunswick co., Va., 77 ms. SSW. from Richmond.

Giaour.—See *Caffir*.

Giaur Keni, village of Asiatic Turkey, at the mouth of the Hellespont, on the site of the ancient city of Sigaeum, and is sometimes pronounced and written Yeni-Cher.

GIBELINS, or GHEELINGS, and GUELFs, or, as more usually called, *guelfs* and *gibelins*, terms for two factions which long distracted Germany and Italy. Sismondi gives the following historical account of their origin: "Henry V, Emperor of Germany, died childless in 1125, and the Diet of the Empire, which was assembled at Mayence for the purpose of electing a successor, was divided between two rival houses, which had been long opposed to each other, and whose disputes had

spread disorder over Germany and Italy, and whose names became titles of party. The four last emperors before Henry V issued from a house which ruled over Franconia, when, in 1024, Conrad II, *the Salique*, was elected emperor, and who became subsequently known sometimes by the term *Salique*, and at others by that of *Gueibeling*, or *Waibling*, from a castle in the diocess of Augsburg and mountains of Hertsfeld, from which it is probable this house came, and from which its' partisans became known as Gibelins."—See *Guelphs*.

Gibraltar, town of Spain, in Andalusia, near a mountain of the same name, formerly called *Calpe*, which with *Abyla*, on the opposite shore of Africa, were called the pillars of Hercules. Tarick, a general of the Moors, built a fortress here, which he called *Gibel Tarick*; that is, Mount Tarick. Since that time, a town has been built at the foot of this rock, which is strongly fortified. It was formerly thought to be impregnable; but, in 1704, it was taken by the confederate fleet commanded by Sir George Rooke, and has ever since continued in the hands of the English. The strait of Gibraltar is 24 ms. in length and 15 in breadth, and a strong current always runs through it from the Atlantic to the Mediterranean. Gibraltar is 25 ms. N. from Ceuta and 45 SE. from Cadiz. Lon. 5 17 W., lat. 36 6 N.

Gibson, village, Susquehanna co., Pa.—One of the western cos. of Tenn.—See *Trenton*, Gibson, co., Tenn.—Court-house and post office, Gibson co., Tenn., by post road 117 ms. from Murfreesborough.—Tp., and post office, Clearfield co., Pa.

Gideonsville, village, Bedford co., Tenn., 47 ms. southward from Murfreesborough.

Gien, town of Fr., in the dep. of Loiret, and late province of Orleannois, seated on the Loire, 76 ms. SE. of Paris. Lon. 2 43 E., lat. 47 34 N.

Gienzor, town of Barbary, in Tripoli, 10 ms. from the town of Tripoli.

Gierace, town of Naples, in Calabria Ulteriore, seated on a mountain, near the sea, 32 ms. NE. of Reggio. Lon. 16 40 E., lat. 38 13 N.

Giessen, town of Germany, in Ducal Hesse, situated on the Lahn river, about 35 ms. a little E. of N. from Frankfort-on-the-Maine, and 50 ms. NE. by E. from Coblentz, on the Rhine. Giessen is the seat of a flourishing university.

Giga, small island on the west coast of Scotland, between the isle of Skye and the peninsula of Cantyre, in Argyleshire, in which co. it is included. The inhabitants annually export considerable quantities of grain.

Giglio, small island on the coast of Tuscany making part of the State of Sienna, and is 15 ms. W. of Porto Hercole. Lon. 11 16 E., lat. 42 1 N.

Gilbertsville, village on Butternut branch of Unadilla river, 12 ms. SE. by E. from Norwich, and by post road 100 ms. a little S. of W. from Albany.

Gilboa, village on Schoharie river, in the southern angle of Schoharie co., N. Y., and by post road 58 ms. SW. from Albany.

Gilead, village, N. from the Androscoggin river, and in the western part of Oxford co., Me., 90

ms. NW. from Portland.—The Ohio Gazetteer states, that a new town of this name "has been laid out on the SE. or right bank of Maumee river 18 ms. above Perrysburg." Though not so stated, the element, as far as it goes, would place Gilead in Wood co., O., and about midway between Perrysburg and Napoleon.

Giles, court house and post office, Giles co., Va., by post road 272 ms. W. from Richmond.—Co., Va., bounded SW. by Tazewell, NW. by Cabell and Kenawha, NE. by Kenawha river or Greenbriar and Monroe, and SE. by Montgomery; length 75 ms., mean width 30, area 1,900 sq. ms.; surface extremely broken, soil generally sterile. Chief town, Parisburg. Pop. in 1820, 4,522, and in 1840, 5,307.—Central lat. 37 3 N., lon. W. C. 40 W.—Co., W. Tenn., bounded by Alabama S., Lawrence W., Murray N. and Lincoln E.; length 30 ms., mean width 20, area 600 sq. ms. It is chiefly situated in the valley of Richland branch of Elk river. Surface undulating, and soil fertile. Staple, cotton. Pop. in 1820, 12,558, and in 1840, 21,494. Central lat. 35 12 N., lon. W. C. 10° W.

Gill, town, Franklin co., Mass., W. of Connecticut river.

Gillespiesville, town of Liberty tp., Ross co., O., and eastward of Chillicothe.

Gilmanton, town, Strafford co., N. H., 18 m. NE. from Concord. The village is, alternate with Rochester, the seat of justice for the co. Pop. in 1820, 3,527; and in 1840, 3,485.

Gilmanton Iron Works, post office, Strafford co., N. H., 27 ms. NE. from Concord.

Gilmanton, Lower, village, Gilmanton tp. Strafford co., N. H.

Gilmanton, Upper Parish, post office, Strafford co., N. H., 22 ms. NNE, from Concord.

Gilolo, large island, with a town of the same name, in the Archipelago of the Moluccas. It does not produce any fine spices, though it lies near the Spice islands, but much rice; the inhabitants are fierce and cruel. It is seated under the line. Lon. 130° E.

Gilsum, tp., Cheshire co., N. H., 48 ms. SW. by W. from Concord. Pop. in 1820, 601.

Gingen, free imperial town of Suabia, 16 m. N. of Ulm. Lon. 10 13 E., lat. 48 49 N.

Gingee, large and populous town on the coast of Coromandel. It is strong both by art and nature, being seated on a mountain, whose top is divided into three points. It is 33 ms. W. of Pondicherry. Lon. 79 25 E., lat. 11 42 N.

Giodda, or *Giddah*, seaport on the W. coast of Arabia, on the Red sea.—See *Judda*.

Giovannazzo, town of Naples, in Terra di Bari seated on a mountain, near the sea, 10 ms. NW. of Bari. Lon. 16 50 E., lat. 41 26 N.

Gierst, large town of Persia, in Kerman, whose trade consists of wheat and dates. Lon. 57 5 E., lat. 27 30 N.

GIRONDE, so called from the dep. of the same name, a political party in Fr., who gained a trag. fame in the French revolution.

Gironde, dep. of Fr., which includes part of the late province of Guienne, and has Bordeaux for its capital. It extends from the Bay of Biscay up both banks of the Garonne river, having the Landes S., Lot and Garonne E., and Dordogne at

arente N. It is traversed by N. lat., 45°, and its eastern border by the meridian of London. *Gironna*, ancient and strong town of Spain, in Catalonia, on a hill, on the side of the river Onal. Lon. 2 52 E., lat. 42° N.

Giron, St., town of Fr., in the dep. of Arriege, and late province of Cousreans, seated on the S. 3 ms. S. of St. Lisier. Lon. 1 16 E., lat. 53 N.

Girvan, village of Scotland, in Ayrshire, at the mouth of a river of the same name, almost opposite the rock of Ailsa. Here are some manufactures, particularly in the tanning of leather and making of shoes and boots. It is 16 ms. S. W. of Ayr.

Gisbrough, town of Eng., in the North Riding Yorkshire. It is noted for being the first place where alum was made, as it was formerly for its use. It is 4 ms. from the mouth of the Tees, N. W. of Whitby, and 247 N. by W. of London. Lon. 55' W., lat. 54 35 N.

Gisborn, town of Eng., in the West Riding of Yorkshire. Lon. 2 22 W., lat. 53 55 N.

Gisors, town of Fr., in the dep. of Eure, and province of Normandy, seated on the Ept, 28 SE. of Rouen. Lon. 1 43 E., lat. 49 15 N.

Givet, fortified town in the bishopric of Liege, defended in two by the river Maese, 21 ms. SW. of Namur. Lon. 4 34 E., lat. 50 13 N.

Givira, town of Italy, in the Milanese, seated on a lake of the same name, 8 ms. from Anghi-

Giula, strong town of Upper Hungary, on the frontiers of Transylvania, on the Keresblan, 30 SW. of Great Waradin. Lon. 20 40 E., lat. 46 40 N.

Giuliana, town of Sicily, on a craggy rock, 12 N. N. E. of Xacca, and 30 S. S. W. of Palermo.

Giustandel. See *Ghiustendil*.

Glaciers, name given to some very extensive fields of ice among the Alps of Switzerland. These glaciers may be divided into two sorts—the first occupying the deep valleys situated in the bosom of the Alps, and termed by the natives the Valley of the Lower Glaciers; the second, which clothe the summits and sides of the mountains, he calls the Upper Glaciers.

Gadden's Grove, post office, Fairfield district, N. C., 31 ms. N. from Columbia.

Gladly Creek Cross Roads, post office, Randolph co., Va., 60 ms. SE. from Clarksburg, and 223 ms. W. from W. C.

Glamorganshire, co. of S. Wales, 48 ms. long and 26 broad, bounded on the N. by Carmarthenshire and Brecknockshire, on the E. by Monmouthshire, and on the S. and W. by the Bristol channel.

It lies in the diocese of Landaff, contains 10 hundreds, one city, 8 market towns, and 118 parishes, and sends two members to Parliament. Pop. in 1801, 71,525; in 1811, 85,067; and in 1821, 101,737.

Glandfordbridge, or *Brigg*, town of Eng., in Lincolnshire, 23 ms. N. of Lincoln, and 156 N. W. of London. Lon. 23' W., lat. 53 35 N.

Glarus, canton of Switzerland, bounded on the N. by the Grisons, on the S. by the same, the E. by the canton of Uri, and that of Schweitz, and on the

N. by the river Linth. It is a mountainous country, and the chief trade is in cattle, cheese, and butter.

Glanus, large town of Switzerland, capital of a canton of the same name, and seated on the river Linth, 32 ms. SE. of Zurich. The streets are large, and the houses kept in good repair. Lon. 9 1 E., lat. 46 56 N.

Glasgow, large and populous city of Scotland, in Lanarkshire. From its extent, beauty, regularity, and modern improvements, it is undoubtedly the second, if not the first, city in North Britain. Glasgow was originally one parish, but is now, for the benefit of the poor and ease of ministers, divided into eight, with as many churches, besides three chapels of ease. The population of Glasgow, with its suburbs and dependencies, amounted in 1811 to 108,000, now (1843) probably 120,000. It is seated on the N. side of the Clyde, over which are two stone bridges. The river is navigable for vessels of 8 feet water as far as the bridge, but large vessels stop at Port Glasgow or Greenock to unload. It has also the advantage of two canals, beside the great canal that joins the Clyde to the Forth. Glasgow is 44 ms. W. of Edinburgh, and 60 SW. of Perth. Lon. 4 30 W., lat. 55 50 N.—Village and seat of justice, Barren co., Ky., about 91 ms. NE. from Nashville, in Tenn., and 126 SW. from Lexington. N. lat. 37 1, lon. W. C. 8 46 W. In 1840, pop. 505.

Glasgow's Store, post office, Granville co., N. C., 52 ms. N. from Raleigh.

Glasborough, village, Gloucester co., N. J., 20 ms. nearly E. from Philadelphia.

Glastonbury, town of Eng., in Somersetshire, 6 ms. SW. of Wells, and 129 W. by S. of London. Lon. 2 40 W., lat. 51 8 N.—Town, Hartford co., Ct., on the E. side of Connecticut river, about 5 ms. SE. of the city of Hartford. Pop. 1820, 3,114.—Tp., Bennington co., Vt., 9 ms. NE. from Bennington.

Glatz, co. of Germany, seated between Silesia, Bohemia, and Moravia, and surrounded by mountains, which render it very difficult of access. It is 38 ms. long, and 23 broad. It has mines of coal, copper, and iron, good quarries of marble and stone, and fine springs of mineral waters. On the 11th June, 1742, the county of Glatz and all Lower Silesia was ceded by Maria Theresa to the King of Prussia, which cessions were confirmed on December 25th, 1744.—City of Bohemia, and capital of the county of the same name. It is situated at the foot of the mountains which divide that kingdom from Silesia, near the river Neisse. On the top of the hill is an ancient castle; and the Prussians have not only greatly augmented and improved it, but have built a new citadel. It has been frequently besieged and taken. It is 48 ms. SSE. of Breslaw, and 82 ENE. of Prague. Lon. 16 50 E., lat. 50 25 N.

Glencoe, Vale of, valley in Scotland, near the head of Loch Etive, in Argyleshire.

Glen Connell, post office, Cambria co., Pa.

Glencroy, Vale of, wild and romantic tract, near the NE. extremity of Loch Lough, in Argyleshire. The two ranges of mountains which overhang this valley approach each other, and between these the traveller is immured. Their stupendous height, and the roaring of numerous cat-

aracts that pour over their broken surface, produce an effect awfully sublime.

Glengary, co., U. C., bounded on the E. by the line that divides Upper from Lower Canada, on the S. by the river St. Lawrence, and on the W. by the township of Cornwall, running N. 24° W. until it intersects the Ottawa or Grand river, thence descending the said river until it meets the divisional line aforesaid.

Glenuce, town in Wigtonshire, seated on the river Luce, near its entrance into the bay of that name, 16 ms. W. by S. of Wigton.

Glenn's, post office, Gloucester co., Va.

Glenn's Falls, Hudson river, at Glennville The river is here precipitated over a ledge of rocks in a cataract, descending 28 feet in about 3 perches.—Village, on Hudson river, at Glenn's Falls, in the SE. angle of Warren co., N. Y., 3 ms. from Sandy Hill and 50 N. from Albany.

Glenshee, *Spital of*, noted pass of the Grampian mountains, in Scotland, a little south of the point where the counties of Perth, Angus, and Aberdeen meet.

Glennville, village, Schenectady co., N. Y., 27 ms. NW. from Albany.

GLOBE, or **SPHERE**, a solid generated by the revolution of either a circle or a semicircle round their respective axes.

Glockner, one of the peaks of the mountains of Saltzburg. It rises on the confines of Saltzburg, Tyrol, and Carinthia, to the height of 12,760 feet. Lat. 47 4 N., lon. 12 51 E.

Glogaw, town of Silesia, capital of a principality of the same name, and well fortified on the side of Poland. It is seated on the river Oder, 50 ms. NW. of Breslaw and 115 NE. of Prague. Lon. 16 13 E., lat. 51 40 N.

Glomme, longest river of the province of Agherhuys, in South Norway, which flows into the North sea at Frederickstadt, after a comparative course of about 250 ms. a little E. of S.—See *Louken*. It receives the river Worme, which issues from Lake Mioss. It is not navigable in any part of its course from this lake to Frederickstadt, its stream being intercepted by such frequent cataracts and shoals as in some places to render it necessary to drag the trees, which are floated down, over the ground. At least 50,000 trees are annually floated by this river to Frederickstadt.

Gloucester, city of Eng., in Gloucestershire, on the E. side of the Severn, where, by two streams, it makes the Isle of Alney. Here is a good stone bridge over the river Severn, with a quay, wharves, and custom-house, but most of its business is engrossed by Bristol. It is 24 ms. NE. of Bristol and 106 W. by N. of London. Lon. 2 16 W., lat. 51 50 N.—Co. of Eng., 63 ms. in length and 47 in breadth, bounded on the W. by Herefordshire and Monmouthshire, on the N. by Worcestershire, on the E. by Warwickshire and Oxfordshire, and on the S. by Wiltshire and Somersetshire. It contains thirteen hundreds, one city, twenty seven market towns, and two hundred and eighteen parishes. Pop. in 1801, 250,809; 1811, 286,514; and in 1821, 335,843.—Tp., U. C., in the co. of Dundas, is the seventh township in ascending the Ottawa river; it lies eastward also of and adjoining the river Rideau.—Maritime and post town in Essex co., Mass., near Cape Ann,

14 ms. NE. of Beverly, and about 18 ms. fr Salem and Marblehead. Pop. in 1820, 6,388 in 1830, 7,510; and in 1840, 6,350. The vill. has one of the most extensive fishing ports in United States. Thatcher's island, with two lig houses, forms a part of the township.—Township, Providence co., R. I., in the NW. corner the State, having Mass. on the N. and Conn. the W. Pop. in 1820, 2,504.—Small villa Gloucester co., N. J., on the E. bank of the ri Delaware, 4 miles below Philadelphia. Pop. 1840, 2,837.—Co., N. J., bounded by the lantic ocean SE., Cape May, Cumberland, and Salem counties SW., Delaware river NW., Burlington NE.; length 40, breadth 20 ms., 800 sq. ms. Surface level, and, though the soil sandy, tolerably productive. Chief towns, Wobury, Gloucester, and Camden. Pop. in 1823, 090; and in 1840, 25,438. Central lat. 40, lon. W. C. 2 10 E.—Co., Va., bound E. by Mobjag bay, SE. and SW. by York river NW. by King and Queen, and NE. by Midswex and Matthews; length 20, mean width 16 area 320 sq. miles. Surface level, and soil of n dling quality. Chief town, Gloucester. Pop. 1820, 9,678; and in 1840, 10,715. Central 37 24 N., lon. W. C. 32' E.—C. H. and office, Gloucester co., Va., 80 ms. E. from Richmond.—Bay, U. C., is the eastern extremity Lake Huron.

Gloucester Fort, or *Point au Pins*, U. C., first point on the N. shore in the narrows lead from Lake Superior towards the falls of St. M.

Gloucester Factory, establishment of the H son's Bay Company, on a branch of the Alb river. Lon. W. C. 10° W., lat. 51 30 N.

Glover, tp., Orleans county, Vt., 35 ms. NE from Montpelier. Pop. 4,000.

Gloydsborough, village, Hampshire co., Va.

Gluckstadt, town of Lower Saxony, in the du of Holstein, on the Elbe, near its mouth, 30 NW. of Hamburg and 55 N. of Bremen. Lon. 15 E., lat 53 53 N.

Glynn, co. of Georgia, bounded by the Atl ocean on the SE., Camden county or Little Illa river SW., Wayne NW., and Alatum river or McIntosh co. NE.; length 20, width ms., area 400 sq. miles. Surface level, and marshy. Staples, cotton and sugar. Chief to Brunswick. Pop. in 1820, 3,418; and in 18, 5,302. Central lat. 31 18, lon. W. C. 4 42.

Gnaäenhutten, town, Tuscarawas county, O., a Moravian settlement, planted with the pious vi of propagating the Christian religion among the dians, 50 ms. NE. from Zanesville, and 11 soerly of New Philadelphia. This place, often ruptured into the shorter name Connotten, is no quiet village, on a high bank, on the eastern e of Tuscarawas river, and is still a town of e United Brethren.

Gnesna, city of Russia, in Great Poland of which it is the capital. It was the first town th in the kingdom, and formerly more consider e than at present. It is 90 ms. N. by E. of Blaw, and 125 W. of Warsaw. Lon. 17 40 lat. 52 28 N.

GNOSTIQUES, or **GNOSTICS**, from the Gno and signifies "I know," but, by extension, is made to mean *learned, enlightened, illumina*

and endowed with supernatural knowledge. The nostics composed at first a single sect, but in process of time subdivided, and the term became generic, and was applied to several Christian sects, differing from each other, on minor subjects, but agreeing on general principles.

Goa, considerable city of Hindoostan, with a harbor on the coast of Malabar, in the Deccan. It is the capital of the Portuguese settlements in India, and the seat of a viceroy. It stands in an island 22 ms. in length and 6 in breadth, and the city built on the N. side of it, having the conveyance of a fine river, capable of receiving ships of the greatest burden, where they lie within a mile of the town. It is 292 miles S. by E. Bombay. Lon. 73 45 E., lat. 15 28 N.

Goar, St., or Gower, town of Germany, in the circle of the Lower Rhine, subject to the landgrave of Hesse Cassel. It stands immediately under the stupendous rock of Rheinfels. It has a considerable commerce in wines and hides, and is 15 miles E. of Coblenz.

Goat Island, in the State of R. I., near the entrance of the harbor of Newport.—Island in Niagara river, forming a part of Erie co., N. Y.; it overhangs the falls, and divides the water of Niagara river into two unequal portions.

Goave, Petit, or Hispaniola, town of St. Domingo, in the Gonaive channel, 20 miles WSW. from Leogane. Lon. W. C. 4 25 E., lat. 18 25 N.

Gobcein, town of Germany, in the palatinate of the Rhine, 18 ms. SE. of Phillipsburg. Lon. 8 5 E., lat. 40 6 N.

Gobin, St.—See *Fere*.

Goch, town of Germany, in the duchy of Cleves, situated on the Neers, 6 ms. S. of Cleves. Lon. 5 2 E., lat. 51 39 N.

Gociano, town of Sardinia, capital of a co. of the same name, with a castle, seated on the harbor, 25 ms. E. of Alger.

Godalming, town of Eng., in Surry, on the Wye, where it divides into several streams, 4 ms. W. of Guildford, and 54 of London. Lon. 34' V., lat. 51 13 N.

Godavery, or Gongga Godowry, river of the Deccan of Hindoostan, which has its source 90 ms. to the NE. of Bombay. After crossing Dowlatabad and Golconda from W. to E., it runs to the SE., and, receiving the Bain Gongga about 90 ms. above the sea, besides many smaller rivers, separates into two principal channels at Rajamundry; and these, subdividing again, form altogether several tide harbors for vessels of moderate burden, such as Ingeram, Coringa, Yalam, Bandermalana, and Narsapour.

Godmanchester, large village of Eng., in Huntingdonshire, parted from Huntingdon by the river Ouse.

Godwin Sands, famous sandbanks of Eng., off the coast of Kent, lying between the N. and S. Foreland; and as they run parallel with the coast three leagues together, at about two leagues and half distant from it, they give additional security to the Downs.

Goes, or Ter Goes, strong town of the kingdom of the Netherlands, in Zealand, and capital of the land of South Beveland. It communicates with the Scheldt by a canal, and is 20 ms. E. of Middelburg. Lon. 3 50 E., lat. 51 33 N.

Godofroi, sief of Buckingham co., L. C., on St. Lawrence river, between Requetaille and Becancour, 3 ms. above Three Rivers.

Godfrey's Ferry, post office, Marion district, S. C.; by post road 144 ms. E. from Columbia.

Goff's Mills, post office, Steuben co., N. Y., 299 ms. SSW. from Albany.

Goff's Corner, post office, Cumberland co., Me., 34 ms. from Portland.

Goffstown, town, Hillsborough co., N. H. The village is at Amoskeag falls, 15 ms. below Concord. Pop. 1820, 2,173.

Gogra, or Soorjew, large river which rises in Lake Jankee Dhe, in Thibet, in lat. 33 17 N., and, forcing its way through a mountainous country, takes a SE. direction, and unites with the Ganges above Chuprah, in the province of Bahar, after a comparative course of 600 ms.

Gohud, territory of Hindoostan Proper, in the province of Agra, subject to a Rajah, who is tributary to the Poonah Mahrattas. Gwalior is the capital.

Goiaz, one of the Capitania of Brazil, chiefly between the rivers Araquaya and Tocantinas, bounded E. by Maranham, Bahia, and Minas Geraes, S. by St. Paul's, W. by Matogrosso, and NW. and N. by Grand Para. Chief town, Villa Boa.

Golansville, village, Caroline co., Va., 92 ms. SSW. from W. C.

Golconda, country of the Deccan of Hindoostan, between the lower parts of the courses of Kistna and Godavery rivers and the principal part of Dowlatabad. It was formerly called Tellingana, or Tilling, and is subject to the Nizam of the Deccan. It is most remarkable for its diamond mines, the most considerable in the world. Here are also mines of salt, fine iron for sword blades, and curious calicoes and chintzes. Hydrabad or Bag-nagur is the capital. It is doubted by Malte Brun whether there ever were any diamond mines in Golconda.—Celebrated fortress, in a country of the same name, 6 ms. WNW. of Hydrabad, and joined to that city by a wall of communication.

Golcondo, village and seat of justice, Pope co., Ill., on the Ohio river, 31 ms. above the mouth of Tennessee, and 50 ms. below the mouth of Wabash river.

Goldengrove, post office, Greenville district, S. C.

Goldberg, town of Silesia, in the duchy of Lignitz, 35 ms. W. of Breslaw. Lon. 16 23 E., lat. 51 3 N.

Gold Coast, maritime country of Guinea, where the Europeans have several forts and settlements. It reaches from the Gold river, 12 ms. W. of Assine, and ends at the village of Ponna, 8 ms. E. of Acraw.

Golden Island, barren island at the mouth of the river or gulf of Darien, where the Scots attempted to make a settlement in 1698. Lon. 77 10 W., lat. 9° N.

Goldingen, town of Courland, with a castle, seated on the Wela, 60 ms. W. of Mittau. Lon. 22 21 E., lat. 56 48 N.

Goldsbrough, bay of Me., separating the SW. angle of Washington from the SE. angle of Hancock co.—Town, Hancock co., Me., on the E. side of Frenchman's bay, about 50 ms. from Cas-

tine. Pop. 1820, 560. Lat. 44 22 N., lon. W. C. 8 52 E.

Goleita, island of Africa, at the entrance of the bay of Tunis. It is 29 ms. N. of Tunis. Lon. 10 20 E., lat. 37 10 N.

Golnaw, town of Prussian Pomerania, seated on the Ina, 18 ms. NE. of Stetin. Lon. 14 59 E., lat. 53 46 N.

Gombroon, considerable seaport of Persia, in Farsistan, called by the natives Bandar Abassi. It is seated in a bay of the strait of Ormus, 120 ms. SSE. of Kerman. Lon. 56 30 E., lat. 27 28 N.

Goмера, one of the Canary islands, between Ferro and Teneriffe. It has a town of the same name, with an excellent harbor, where the Spanish ships often take in refreshments. Here is corn sufficient to support the inhabitants, and one sugar work, with great plenty of wine and fruits. Lon. 17 3 W., lat. 28 6 N.

Gonaive, island, near that of Hispaniola, having St. Mark's channel NE. and Gonaive channel SW. It is about 35 ms. long and 10 wide, with a town and harbor of the same name.

Gondar, metropolis of Abyssinia, situated on a hill of considerable height, and containing about 10,000 families in time of peace. It is 180 ms. SE. of Sennar. Lon. 37 33 E., lat. 12 34 N.

Gondegama, or *Gondlacomma*, river of the peninsula of Hindoostan, which rises near Combam, forms the nominal boundary of the Carnatic on the N., and falls into the bay of Bengal at Mootapilly.

Gondrecourt, town of Fr., in the dep. of Meuse, and late duchy of Bar, seated on the Orney, 20 ms. S. of St. Michael. Lon. 5 37 E., lat. 48 30 N.

Gondreville, town of Fr., in the dep. of Meurthe, and late province of Lorraine, with a castle and a magnificent hospital. It stands on a hill, on the river Moselle, 8 ms. from Nanci. Lon. 6 9 E., lat. 48 40 N.

Gonnesse, town of Fr., in the dep. of Seine and Oise, and late province of the Isle of France, remarkable for the goodness of its bread, which is brought twice a week to Paris. It is the birthplace of king Philip Augustus, and is seated on the Crould, 10 ms. NE. of Paris. Lon. 2 10 E., lat. 48 58 N.

GONFALON, GONFALONIER, from the Teutonic, *gund*, war. *Gonfalonier* therefore means literally "standard bearer." In Italy, they were papal officers placed in the towns of the patrimony of St. Peter, during the contests between the Emperors and Popes. The office was in many instances of great power, and remains in existence in some of the Italian republics—Lucca, for example.

Gonga, town of Romania, seated near the sea of Marmora, 37 ms. NE. of Galipoli. Lon. 37 31 E., lat. 40 53 N.

Gonjah, kingdom of Africa, between the coast of Guinea on the S. and Tombuctoo on the N., supposed by Major Rennel to be the Conche of M. D'Anville. *Gonjah*, the capital, is 870 ms. W. by S. of Cashna. Lon. 6 10 W., lat. 13 20 N.

Goochland, co. of Va., bounded by James river or Powhatan and Cumberland ces. S. and SW., Fluvanna NW., Louisa and Hanover NE., and Henrico SE. Length 28, mean width 12 ms.; area 336 sq. ms. Surface moderately hilly, and

soil tolerably productive. Chief town, Haderville. Pop. 1820, 10,007; in 1840, 9,760.

Goochland, court-house and post office, Goochland co., Va., 30 ms. W. by N. from Richmond.

Goodwoman's river, falls into the Missouri from the left, 190 ms. above the mouth of the latter.

Good Hope.—See *Cape of Good Hope*.

Goodwin Sands.—See *Godwin Sands*.

Goodwinsville, village, Dinwiddie co., Va.

Goompy, river of Hindoostan Proper, which rises in the Rohilla country, and flowing SE. Lucknow and Jionpour, falls into the Ganges little below Benares.

Goosepond, post office, Oglethorpe co., Ga. 86 ms. NNE. from Milledgeville.

Gooty, or *Gutti*, strong fortress in the peninsula of Hindoostan, formerly the seat of government of a Mahratta prince, and now subject to the British. It is seated on the Pennar, 25 m. S. by E. of Adoni. Lon. 77 35 E., lat. 15 15 N.

Gorcum, town of the kingdom of Holland, and in the province of Holland, which carries on considerable trade in cheese and butter. It is seated at the junction of the Linghe with the Waal, 12 ms. E. of Dort, and 32 S. of Amsteldam. Lon. 4 51 E., lat. 51 51 N.

Gordon's Ferry, post office, Hickman co., Tenn. *Gordonsville*, village, Orange co., Va., at the foot of the South mountain, 45 ms. SW. by W. from Fredericksburg.—Village, Smith co., Tenn. 6 ms. from Carthage, and 56 NNE. from Murfreesborough.

Gore, tp., land of the State, Penobscot co. Me. *Goree*, small island of Africa, near Cape Verde, subject to the French. It is barren, but of great importance on account of its good trade. Lon. 17 25 W., lat. 14 40 N.—Capital of an island of the same name in Holland, 8 ms. SSW. of Briel. Lon. 4 20 E., lat. 51 44 N.

Gores Island, barren and uninhabited island in the North Pacific ocean, so named by Captain Cook, who discovered it in 1778. Cape Upright the SE. extremity, is in lon. 172 50 W., lat. 6 30 N.

Gorgona, island of Italy, in the sea of Tuscan, 8 ms. in circumference, remarkable for the large quantity of anchovies taken near it. Lon. 10° E. lat. 43 22 N.—Island in the South Pacific ocean, 12 ms. W. of the coast of Peru. It is high land, very woody, and some of the trees are proper for masts. It is 10 ms. in circumference and has several rivulets of excellent water. Lon. 77 50 W., lat. 3 20 S.

Gorgontua, remarkable high rock on the N. shore of Lake Superior, lying at a small distance and southerly of the point which forms Michipicoten Bay; to the southward and eastward the rock is hollow, with an opening into it.

Gorham, village, Cumberland co., Me. Pop. in 1820, 2,795. The village is 9 ms. NW. from Portland.—Town, Ontario co., N. Y. Pop. in 1820, 3,991. The village is 10 ms. W. from Geneva.

Goritz, capital of a co. of the same name, in the duchy of Carniola, on the Lisonzo, 16 ms. NE. of Aquileia. Lon. 13 30 E., lat. 46 20 N.

Gorlitz, strong town of Germany, in Upper Lusatia, on the river Neisse, 55 ms. E. of Dresden. Lon. 15 40 E., lat. 51 10 N.

Gortin, post office, Carroll co., O.

Goetze, town of Fr., in the dep. of Moselle, late province of Lorraine. It had a rich ab- previous to the revolution, and is seated on ill, 8 ms. SW. of Metz.

Gosfield, tp., Essex co., U. C., on Lake Erie, from Mersea.

Goshen, town, Cheshire co., N. H., 30 ms. from Concord. Pop. in 1820, 687.—Tp. Addison co., Vt., 33 ms. SW. from Montpel.—Town, Litchfield co., Conn., 7 ms. W. in Litchfield, and 38 NW. from the city of Hartford. Pop. in 1820, 1,586.—Town, Hampshire co., Mass., between Worthington and Conway, about 90 ms. westward from Boston. Pop. in 1820, 632.—Town, Orange co., N. famous for excellent cheese, distant 60 ms. W. from the city of N. Y., and 112 S. of Albany. Pop. in 1820, 3,441. The co. courts are held alternately at the village of Goshen and at Newburg.—Village, Cape May, N. J., by post road, 104 ms. S. from Trenton.—Village, Loudoun co., Va., on the road from Washington to Winchester, 35 ms. from Washington.—Village, Lincoln co., Ga., about 40 ms. above Augusta.—Tp., Tuscarawas co. O., in which lies New Philadelphia, seat of justice for the county. Pop. in 1820, 604, including New Philadelphia.—Tp., Columbiana co., O.—Tp., Montgomery co., O. Pop. in 1820, 1,416.—Tp.,ampaign co., O. Pop. in 1820, 911.—Town, Clermont co., O., 18 ms. NW. from Williamsburg. Pop. in 1820, 755.—Tp. of Clair co., Ill. Pop. 2,000.—Village, north-part of Clermont co., O., 12 ms. N. of Bala, the co. seat, and 22 ms. NE. by E. from Cincinnati.

Goshen Hill, post office, Spartanburg, S. C.

Goshen Mills, post office on Seneca creek, Montgomery co., Md., by post road 32 ms. NW. from W. C.

Goshen, West, tp. of Chester co., Penn., about 10 ms. E. from Downingtown, on some of the banks of Brandywine, and the heads of Chester Creek. Pop. in 1820, 1,309; including the borough of Westchester, and also including West Chester, in 1840, 3,195.—See *Westchester*. Chief town, Westchester.

Goslar, ancient free and imperial city of Lower Saxony, in the territory of Brunswick, seated at the foot of a mountain, near the river Leine. It is 28 ms. S. of Brunswick. Lon. 10 E., lat. 52° N.

Gosport, fortified town of Eng., in Hampshire, on the W. side of the harbor of Portsmouth, over which is a ferry. It is 78 ms. SW. of London. Lon. 13 W., lat. 50 49 E.

Gostynen, or *Gostavin*, town of Poland, in the province of Rava, 36 ms. NE. of Rava. Lon. 40 E., lat. 51 54 N.

Gotha, town of Upper Saxony, capital of a principality of the same name, 18 ms. W. of Erfurt. Lon. 10 52 E., lat. 51° N.—River of Sweden, which issues from Lake Wenner, and falls into the North sea at Gotheburg. The fine canal of the Rattana opens the navigation of Lake Wenner by the Gotha, to Gotheburg.

Gothard, St., one of the highest mountains of Switzerland, in the canton of Uri. It is 9,075

feet above the sea, and 22 ms. S. of Altorf. Though not the highest mountain, it is deemed the principal summit of the Helvetian Alps; for in its vicinity rise the rivers Tesino, Aar, Reuss, and Rhine, which flow hence in every direction.

Gotheburg, or *Gothenborg*, city of Sweden, capital of West Gothland, seated at the mouth of the Gotha, which forms an excellent harbor, the best situate for foreign trade of any in the kingdom, as it lies on the Cattegat. It is 180 ms. SW. of Orebro. Lon. 11 39 E., lat. 57 42 N.

ГОТТИК, or ГОТТИКЕ, whatever relates to the Goths.

Gothland, one of the five general divisions of Sweden; bounded on the N. by Sweden Proper, E. and S. by the Baltic, and W. by the Sound, the German ocean, and Norway. This country is inhabited by a nation celebrated for their excursions and invasions of other countries, which had its origin from Getæ, or Tartars of the Crimea. The Goths had kings of their own till 1132, when they were united to Sweden. It includes nine provinces and the isles of Gothland and Oeland.

Gothland, island of Sweden, in the Baltic, 70 ms. from N. to S., and 25 in its greatest breadth. From its form and situation it has obtained the name of the *Eye of the Baltic*. The soil is fertile, and remarkable for an excellent breed of sheep. Here are fine woods of oak and pine, quarries of excellent stone, and very good limestone. Wisby is the capital.

Gothland, East, province of Sweden, in the division of Gothland, between the Baltic on the E. and Lake Wetter on the W., 80 ms. long and 70 broad. The soil is fertile, and produces abundance of all sorts of grain. It has fine orchards, pastures, lakes, and rivers, forests of oak and birch, iron mines, and quarries of stone and marble. The chief town is Nordkoping.

Gothland, West, province of Sweden, in the division of Gothland, between the lakes Wetter and Wenner, 30 ms. long, and from 25 to 70 broad. The soil and produce are similar to East Gothland. The chief town is Gotheburg.

Gottesburg, town of Silesia, where great quantities of worsted stockings are knit, 16 ms. SW. of Schweidnitz.

Gottingen, city of Lower Saxony, in the duchy of Brunswick. Here George II, of Great Britain, founded a university, which has acquired a very distinguished reputation, and it contains one of the most capital libraries in Europe. The university of Gottingen is amongst the most respectable literary institutions that has ever been formed. Regular professorships are established on every subject which constitute education of the most enlightened of mankind. The number of students rarely falls short of 1,000, sent from every part of Europe. The library exceeds 200,000 volumes. There are also many other literary institutions, and a commandery of the Teutonic order. The woolen manufactures are the principal support of the inhabitants. It is seated on the Lein, 58 ms. S. of Hanover. Lon. 9 53 E., lat. 51 32 N.

Gottingen, province of Hanover, including the city of Gottingen and the principalities of Grubenhagen, Hohenstein, and Elbingeroda, with the bailiwicks of Plesse and Gleichen.

Gotto, group of islands forming a part of the great group of Japan. The Gottos lie between N. lat. 31° and 33°, and between the meridians 127° and 128 E. lon.; they are but imperfectly known.

Gottorp, town of Denmark, in the duchy of Sleswick, capital of the duchy of Holstein Gottorp, seated at the bottom of an arm of the sea called the Sley, 4 ms. WSW. of Sleswick. Lon. 9 26 E., lat. 54 36 N.

Gottisberg, town of Silesia, in the duchy of Schweidnitz, remarkable for its silver mines.

Gouda, or *Turgow*, town of the kingdom of the Netherlands, in Holland, on the Issel, 8 ms. NE. of Rotterdam. Lon. 4 41 E., lat. 52 2 N.

Goudhurst, town of Eng., in Kent, 12 ms. SW. of Maidstone, and 44 SE. of London. Lon. 30' E., lat. 51 8 N.

Governolo, town of Italy, in the Mantuan, seated on the Minchib, 12 ms. SE. of Mantua. Lon. 10 56 E., lat. 45 4 N.

Gouldsborough, bay and village, Hancock co., Me. See *Goldsborough*.

Goura, or *Gura*, town of Poland, in the palatinate of Massovia, belonging to the bishop of Posenania. Lon. 21 50 E., lat. 51 1 N.

Gordon, town of France, in the department of Lot, and late province of Querci, 18 ms. NW. of Cahors. Lon. 1 24 E., lat. 45 43 N.

Goupe, *Riviere de*, stream of Lower Canada, falling into the N. side of St. Lawrence, 45 ms. below Quebec.

Gouverneur, tp., St. Lawrence co., N. Y., on Oswegatchie river.—Village in Gouverneur tp., St. Lawrence co., N. Y., 30 ms. S. from Ogdensburg, and 50 NE. from Sackett's Harbor.

Gournay, town of France, now in the department of Lower Seine, lately in the province of Normandy, remarkable for its fine butter. It is seated on the Epte, 52 ms. NW. of Paris. Lon. 36' W., lat. 49 32 N.

Gourief. See *Guriev*.

Gourock, town in Renfrewshire, on a bay of the Frith of Clyde, with a copper mine in its neighborhood, lately shut up.

Gowdey's Store, post office, Union district, S. C., by post road 95 ms. NW. from Columbia.

Gowensville, village, Greenville district, S. C., 121 ms. NW. from Columbia.

Gower, or peninsular extremity of Glamorgan-shire, in Wales, to the W. of the bay of Swansea. It has very lofty limestone cliffs next the sea, whence large quantities of lime are exported to the English counties across the Bristol channel. The coast abounds with oysters. The land is a fertile tract of arable and pasture.

Gower, or *Gever*. See *Goar*, St.

Gowan, borough and town of Ireland, in the co. of Kilkenny. Lon. 7° E., lat. 52 34 N.

Gowrie, *Curse of*, a fertile tract of country in Perthshire, Scotland, remarkable for the fine crops produced there.

Gozzie, or *Gozes*, island of the Mediterranean, to the S. of the isle of Candia, 12 ms. from Fort Selino.

Gozzo, fortified island of the Mediterranean, 5 ms. NW. of Malta, and belonging to the knights of that island.

GRAAF, from the old German, means governor, judge, commander, &c.

Graaf Reynet, eastern district of the colony the Cape of Good Hope, extending from Stellenbosch.

Grabow, town of Lower Saxony, in the duchy of Mecklenburg, 18 ms. S. of Schwerin. Lon. 11 44 E., lat. 53 26 N.

Graceham, village, Frederick co., Md.

Graciosa, one of the Azores or Western island. It contains about 300 inhabitants, and produces wheat, wine, butter, and cheese. Lon. 27 W., lat. 39 2 N.—Rocky, barren, uninhabited island, one of the Canaries, to the N. of Lancelta. It is 3 ms. long and 2 broad.

Gradista, town of Slavonia, on the frontiers Croatia, on the Save, 20 ms. SW. of Pozege. Lon. 18 39 E., lat. 45 21 N.

Gradiska, strong town of Germany, in the duchy of Goritz, seated on the Lisonzo, 15 ms. SE. of Udina. Lon. 13 14 E., lat. 46 6 N.

Grado, town of Italy, in a small island of the same name, on the coast of Venetian Friuli, ms. E. by N. of Venice. Lon. 13 10 E., lat. 46 N.

Grafton, village of England, in Northamptonshire, between Stony Stratford and Northampton.

—Co. of N. H., bounded by Connecticut river or Vermont, NW. and N., Coos NE., Staff SE., and Hillsborough and Cheshire S.; length 12 ms., mean width 28, area 1,540 sq. ms. Surface broken, hilly, and part mountainous. Soil, where arable, productive in grain and pasturage. Chief town, Haverhill. Pop. 1820, 32,989; and 1840, 43,311. N. lat. 44°, and lon. from V. C. 5½ E., intersect in this co.—Tp, Grafton co., N. H., 20 ms. SE. from Dartmouth college, and 29 NW. from Salisbury. Pop. 1,094.

—Town, Worcester co., Mass., about 45 ms. SW. from Boston. Pop. 1820, 1,154.—Town, Windham co., Vt., 22 ms. S. from Windsor. Pop. 1820, 1,500.—Town, Rensselaer co., N. Y., 12 ms. E. from Troy. Pop. 1820, 1,611.

—Village in the eastern part of Lorain co., Vt., 12 ms. a little E. of N. from Elyria, and 12 ms. NW. from Medina, in Medina co.

Graham's Bridge, post office, Richmond co., N. C., 93 ms. SW. from Raleigh.

Graham's Station, post office, Sutton tp., Meigs co., Ohio. The post office is above Nyesville, a little Letart.

Graham's Store, post office, Albemarle co., Va.

Grainger, co., Tenn., between Chinch and Holston rivers; bounded by Jefferson SE., Knox SW., Claiborne NW., and Hawkins NE.; length 12 ms., mean width 12, area 360 sq. ms.; surface hilly, and soil sterile, except along the margins of the streams. Chief town, Rutledge. Pop. 1820, 7,650, and in 1840, 10,572. Cil. lat. 36 N., lon. W. C. 6 40 W.

Grammont, town of Fr., in the department of Upper Vienne, and late province of Limosin. It is 15 ms. NE. of Limoges. Lon. 1 30 E., lat. 46 1 N.

Grampian Hills, chain of high mountains in Scotland, running from E. to W., nearly the whole breadth of the kingdom. They take their name from the Mons Grampius of Tacitus, where Galgacus waited the approach of Agricola, and where the battle was fought so fatal to the British Caledonians.

Grampound, borough of Eng., in Cornwall. Has a considerable manufacture of gloves, and is situated on the Valles, 40 ms. SW. of Launceston, and 244 W. by S. of London. Lon. 4 49 N., lat. 50 22 N.

Gran, town of Lower Hungary, on the Danube, 87 ms. E. by S. of Vienna. Lon. 18 6 E., lat. 47 46 N.

Granada, province (formerly a kingdom) of Spain, bounded on the N. and W. by Andalusia, on the E. by Murcia, and on the S. by the Mediterranean sea. It is 175 ms. in length, and 75 in breadth. Though a mountainous country the climate is good. This province has the highest mountain in Europe SW. from Mount Blanc, the Mulhassan, rising to 11,250 feet.—City of Granada, capital of the province of Granada, with an archbishop's see and a university. It is built on the hills, and divided into four parts. In one part is the palace of the kings of Spain, and an ancient mosque of the Moorish kings; the Alhambra with many rooms that it is like a labyrinth. In the second is the university; the fourth has nothing considerable; but all the public buildings are magnificent. It is seated near the confluence of the Orochi and Xenil, 125 ms. SW. of Murcia, and 225 S. of Madrid. Lon. 3 30 W., lat. 37 8 N.—*Granada*, island in the West Indies, the principal of the Canadines, situated in lon. W. C. 5 40 E., and between 11 55 and 12 23 N. lat. It is the last of the Windward Carribbees, and 30 leagues NW. of Tobago. The chief port, called Lewis, is on the east side, in the middle of a large bay, with a sandy bottom, and is very spacious.—Town of Nicaragua, in the province of Nicaragua, seated on the Lake Nicaragua. The inhabitants carry on a great trade, by means of the lake, which communicates with the Atlantic ocean. It is 54 ms. SE. of Leon. Lon. W. C. 8 46 W., lat. 12 5 N.

Granada, New, extensive country in S. America, denominated by the Spaniards the new kingdom of Granada, and contains the departments of Guayaca, Cundinamarca, Cauca, and Magdalena. Similar to nearly every section of Spanish and Portuguese America, provincial limits for New Granada, except where formed by seacoasts, are not to be ascertained to any certainty. As a general term, New Granada designates the northwestern part of South America, and, if including the provinces named, it comprises above half a million of sq. ms.; between latitudes 2° S. and 12° N., and lon. 2° W. to 9° E. of W. C.

New Granada was conquered by the Spaniards in 1536. It is so far elevated above the level of the sea that, though it passes the equator, the climate is remarkably temperate. The fertility of its plains is not inferior to that of the richest districts of America; and its higher grounds yield gold and precious stones of various kinds. Its towns are populous and flourishing. The capital is Santa Fe de Bogota. It may be safely stated that no other country can exceed New Granada in the immense variety of soil, surface, and scenery—of mountain and river diversity.

Granby, tp. of Bedford and Richelieu cos., L. on the river a la Tortue, 45 ms. ESE. from Montreal.—Tp., Essex co., Vt. The village is at the head of Moose river, on the road from Coldhall to Brownington, 50 ms. NE. from Mont-

pelier.—Town, Hampshire co., Mass., about 85 ms. W. of Boston. Pop. in 1820, 1,066.—Town, Hartford co., Ct., joining Mass., on the N., and bounded in the W. by the Popponuck mountain. The village is situated about 20 ms. NW. from Hartford.—Town, Oswego co., N. Y., on Oswego river.—Village, Lexington district of S. C., on the right bank of Congaree river, about 2 ms. below Columbia. Granby is at the head of navigation. A bridge has been there erected over the Congaree.—Post office name of Hartford village, in the northwestern corner of Licking co., Ohio, 20 ms. NW. from Newark, and 30 NE. from Columbus.

Grand, post office at Burlington, in Grand tp., northwestern part of Marion co., 18 ms., northwest from Marion, and 9 or 10 SSW. from Upper Sandusky.

Grand Anse, or *Jeremie*, seaport of Hayti, or Hispaniola, on the SW. peninsula. Lon. W. C. 2 55 E., lat. 18 15 N.

Grand Caillou, island on the coast of La., near the southern extremity of the cape, between the Atchafalaya and Lafourche rivers.

Grand Cairo.—See *Cairo*.

Grand Gosier, low and small island, a little W. of N. from the mouth of the Mississippi, lying between Breton island and the S. end of the Chandelers. Lat. 29 31 N., lon. W. C. 12 15 W.

Grand Isle, NW. co. of Vt., formed by the peninsula of Alberg, and S. and N. Hero, with several smaller islands in Lake Champlain. Area about 90 sq. ms. Chief town, North Hero. Pop. in 1840, 3,883. Ctl. lat. 34 47 N., lon. W. C. 4 E.—Village, Grand Isle co., Vt., 77 ms. NW. from Montpelier.—Island in Niagara river, and in Erie co., N. Y., about 6 ms. long and 5 ms. wide where broadest, and contains about 11,000 acres. Surface rising by a gentle acclivity, and soil generally good.

Grand Lick, village, Campbell co., Ky., 76 ms. NE. from Frankfort, and 20 SSE. from Cincinnati.

Grand Manan, island of Washington co., Me., opposite Passamaquoddy bay. Lon. W. C. 10 17 E., lat 44 48 N.

Grand Para, Capitania General of Brazil, and as to extent an empire itself, extending from E. to W. from the mouth of the river Turisana, lon. 31 40 E., to the river Javari, lon. W. C. 5° E., upwards of 1,800 miles, and with a mean width of 700 ms.; area 1,260,000 sq. ms. Over these wide-spread regions, lying between lat. 4° N. and 12° S., the Amazon and its numerous confluent, carry their vast volumes from the interior to the Atlantic ocean. The greatest part of Grand Para is yet in the hands of the native tribes, the European settlements being few, far separated and confined in either pop. or extent.—The capital of the capitania of the same name, is on the right bank of the Tocantinas. It is composed of two contiguous towns, Grand Para and Belem. Pop. 20,000. Lat. 1 30 S.

Grand Coteau, post office, parish of St. Landry, Opelousas, La., 205 ms. NW. from N. Orleans.

Grandpre, town of Fr., in the dep. of Ardenes, and late province of Champagne, seated on the Ayre, 32 ms. E. of Rheims. Lon. 4 55 E., lat. 49 21 N.—Seigniory, St. Maurice co. I.

C., on Lake St. Peter, 18 ms. W. from Three Rivers. It extends from the lake between the Seigniories of Riviere du Loup and Grosbois, or Machiche.

Grandon.—See *Fairport*.

Grande, river of western Africa, not yet well explored, but, as delineated by Arrowsmith, rises about 150 ms. eastward from Sierra Leone, N. lat. 8°. Flowing thence NW. 300 ms. parallel to the opposite coast of the Atlantic ocean, and also to the Gambia river, it turns W. 200 ms., and enters the Atlantic at N. lat. 11°, W. lon. 14°.

Grand River, of Ohio, rises in Trumbull co., and, flowing about 10 ms. nearly N., enters Ashtabula co., and continuing N. about 20 ms., turns nearly at right angles, and enters Geauga co., in which it falls into Lake Erie at Fairport, after an entire comparative course of 50 ms. Grand river is said to be a literal translation of Geauga, the Indian name.—See *Painsville and Fairport*.

Grand River, of Missouri, extreme sources in the southern part of Iowa, from which, in a SSE. direction, the various branches unite, after draining the cos. of Davies, Caldwell, and Livingston, and separating the cos. of Carroll and Chariton from each other, falls into the Missouri river at Brunswick. This stream drains a large part of the NW. section of Missouri.—Another stream of the State of Missouri, the extreme northwestern branch of the Osage river. It rises in the Indian territory, between the Kansas and Neosho rivers, and, pursuing a course a little S. of E. about 150 ms., falls into the Osage in Benton co., near the village of Osage. N. lat. 38 10, lon. 16 25 W. W. C.

Grand River, or *Nipigon river*, U. C., falls into Lake Superior from the N., a little E., opposite Keweenaw point.

Grand River, or *Rio Grande de St. Pedro*.—See *Rio Grande de St. Pedro*, of Banda Oriental.

Grand.—See *Ottawa river*.

Grand Traverse, group of islands in Lake Michigan, opposite to the mouth of Green bay.

Grand View, NE. tp., Washington co., Ohio, so called from an extensive view upon the Ohio river, 30 ms. above Marietta.

Grandville, village, Monongalia co., Va., on Duncard's creek, 12 ms. NW. from Morgantown.

Grand Rio, fine river of Brazil, in Minas Geraes, flows NE., and falls into the Atlantic ocean in lat. 15 25 S., after an entire comparative course of 350 ms.

Grange La, cape of St. Domingo, on the N. side, NE. from the mouth of Yaqui de St. Jago river. Lon. W. C. 5 25 E., lat. 19 54 N.

Granger, co., E. Tennessee.—See *Grainger*.

Granger, tp. on Lake Erie, and on the W. side of Rocky river, in Cuyahoga co., O., 7 ms. W. from Cleveland. Population uncertain.—Tp., Medina co., O., immediately E. from the tp. of Medina, the co. seat.

Granic, or *Granicus*, small river of Natolia, which has its source in Mount Ida, near the ruins of ancient Troy, and falls into the sea of Marmora, to the E. of Lampsaco. It is now the Ousvola.

Granitza, town of European Turkey, near the gulf of Corinth, between Livadia and Thebes.

Grant, co., Ky., bounded by Owen S., Gallatin W., Boone N., and Pendleton E.; length 20 ms.,

mean width 13; area 260 sq. ms. Surface hilly, and soil of middling quality. Pop. in 1820, 1,800; and in 1840, 4,192. Central lat. 38 40 N., lon. W. C. 7 40 W.

Granson, town of Switzerland, in the Pays de Vaud, capital of a bailiwick of the same name, with a castle. Lon. 6 30 E., lat. 46 50 N.

Grantham, borough of Eng., in Lincolnshire on the Witham, 20 ms. S. by W. of Lincoln, at 110 N. by W. of London. Lon. 36' W., lat. 53 59 N.—Tp., Buckingham co., L. C., on the left bank of St. Francis river, 25 ms. S. from Three Rivers.—Tp. in the co. of Lincoln, U. C. lies W. of Newark, and fronting Lake Ontario.

Grantley's, post office, Culpeper co., Va., 6 ms. SW. from W. C.

Grantslick, post office, Campbell co., Ky., 7 ms. NNE. from Frankfort.

Grantsville, village, Greene co., Ga., 52 ms. NNE. from Milledgeville.

Granville, seaport of France, in the dep. of the Channel, and late province of Normandy, partly seated on a rock, and partly on a plain. It is 1 ms. S. by E. of Coutances, and 185 W. of Paris. Lon. 1 32 W., lat. 48 50 N.—Tp., Annapolis co., Nova Scotia, near the mouth of Annapolis river.—Seigniori, Cornwallis co., L. C., on the S. side of St. Lawrence, 80 ms. NE. from Quebec.—Town, Hampden co., Mass., 14 ms. W. Springfield. Pop. in 1840, 1,414.—Town, Washington co., N. Y., on the line which divides this State from Vt., and 60 ms. NNE. from Albany.—Flourishing town, Licking co., O., in the middle fork of Licking river, 32 ms. W. from Zanesville, 26 NE. from Lancaster, and 26 E. from Columbus. Pop. in 1820, 1,472. Lon. 5 35 W., lat. 40 5 N. Granville is amongst the most picturesque villages of O., and stands, like New Lancaster, on the verge between the hilly or alluvial sections of O. The isolated hills, amid which Granville is placed, though not precipitous as are some of those more southwardly, are of the same character of form and isolation. In the village there are two female schools one Episcopalian, and the other Presbyterian, and both apparently well conducted. It is 6 ms. above, or nearly due W. from Newark.—Co., N. C. bounded N. by Va., E. by Warren and Franklin cos., S. by Wake, and W. by Orange and Pearson; length 30 ms., mean width 23; area 690 sq. ms. Surface hilly, though not very broken; soil generally productive. Chief town, Oxford. Pop. in 1820, 18,216; and in 1840, 18,817.—See *Oxford*.—Village, Monongalia co., Va., 329 ms. NW. from W. C.

Granville and Lachenaye, seigniori, Cornwall co., L. C., on the S. side of St. Lawrence bay, 6 ms. below Quebec.

Grasse, town of Fr., now in the dep. of Valais, lately in the province of Provence, seated on an eminence, 15 ms. W. of Nice. Lon. 6 56 E. lat. 43 39 N.—Town of Fr., in the dep. of Aude, and late province of Languedoc, seated on the river Othieu, at the foot of the mountains of Courbiere, 18 ms. SE. of Carcassonne.—River, St. Lawrence co., N. Y., rises in the SE. part of the co., and curving to the W., N., and NE., falls into St. Lawrence river between St. Regis and Long Saut rapids, after a comparative course

out 100 ms. This stream and the Oswegatchie united by a natural canal, 15 ms. SE. from Gendensburg.

Grasse, Baye de, on the N. shore of Lake Ontario, lies to the eastward of Point aux Cheveaux. *Grassy Creek*, post office, Pendleton co., Ky., 12 ms. NW. from Frankfort.

Grassy's Store, post office, Pittsylvania co., Va., 7 ms. SW. from W. C.

Grateley, village of Eng., in Hampshire, on the E. side of Quarley Hill, on the road from Andover to Salisbury.

Gratiot, a very pleasant village on the national road, and on the line between Muskingum andicking cos., 42 ms. E. of Columbus, 12 W. of Mesville, and 16 SE. of Newark.

Gratis, village, Preble co., O., by post road 53 s. SW. by W. from Columbus, and 9 ms. SE. Eaton. The village in which this office is located is named Winchester; which see.

Graz, town of Germany, capital of Stiria, with university. It is seated on the Muehr, 100 ms. N. of Vienna. Lon. 15 30 E., lat. 47 4 N. — Village, Dauphin co., Pa.

Graudentz, town of Poland, in the palatinate of Ulm, on the Vistula, 30 ms. N. of Thorn, and 10 NW. of Warsaw. Lon. 18 52 E., lat. 53 N.

Grave, strong town of the kingdom of Holland, Brabant, seated on the river Maese, 8 ms. S. of meguen. Lon. 5 45 E., lat. 51 47 N.

Grave Creek, village, Ohio co., Va., 12 ms. W. of Wheeling. This town derives its name from a large creek, which rises near the SW. angle of Pa., and, flowing W., falls into Ohio river. The town stands on an elevated alluvial bottom, remarkable for the number and magnitude of aboriginal antiquities.

Gravel Hill, post office, Sussex co., N. J.; by post road 80 ms. N. from Trenton.

Gravelines, strong seaport of Fr., in the dep. of the North, lately in French Flanders. It was ceded to France by the treaty of the Pyrenees, and is seated on the Aa, 12 ms. E. of Calais. Lon. 2 13 E., lat. 50 59 N.

Gravel Point, on Lake Ontario, in Marysburg, between St. Peter's bay and Point Traverse, U. C.

Gravenac, town of Suabia, capital of a co. of the same name, 33 ms. W. of Ulm. Lon. 9 28 E., lat. 48 22 N.

Graven Machren, town of Luxemburg, on the Moselle.

Gravesande, town of Holland, 7 ms. W. of Rotterdam.

Gravesend, town of Eng., in Kent, on the banks of the Thames, and is a place of great resort, being the common landing place for seamen and strangers in their passage to London. It is 12 ms. SE. of London. Lon. 0 27 E., lat. 51 N.

Graves Island, in the SE. part of Lake Simcoe, U. C.

Gravina, town of Naples, in Terra di Bari, 12 ms. SW. of Bari.

GRAVITY, that mysterious, important, and (as far as human reason has been enabled to observe) that action of bodies on each other, though not in strictly that universal law by which every parti-

cle of matter in the universe attracts every other particle, direct as the masses and inverse as the squares of distance. The cause of this appency of matter remains undiscovered—dare we anticipate discoverable by man?

Gravois, Pointe au, is the west point of the Little Detroit, on the north coast of Lake Superior.

Gravois, Rivière au, in the Missassaga land, on the north shore of Lake Ontario, runs into that lake between Burlington bay and the river Credit, U. C.

Graulhet, town of Fr., in the dep. of Tarn, 12 ms. NW. of Castres.

Gray, town of Fr., in the dep. of Upper Saone, and late province of Franche Comte. It carries on a trade in iron, and is seated on the Saone, 25 ms. NE. of Dijon. Lon. 5 41 E., lat. 47 28 N. — Village and tp., Cumberland co., Me. Pop. in 1820, 1,479.

Grayson, co., Va., bounded SW. by N. C., NW. by Washington and Wythe, NE. by Montgomery, and SE. by Patrick. Length 70 ms., mean width 13; area about 900 sq. ms. Surface broken and mountainous; soil generally sterile. Chief town, Greenville. Population in the year 1820, 5,598; and in 1840, 9,087. Central lat. 36 40, lon. W. C. 3 42 W. — Co., Ky., between Green river and Rough creek, bounded S. by Warren, SW. by Butler, W. by Ohio co., N. by Breckenridge, NE. by Hardin, and E. by Hart. Length 36 ms., mean width 16½; area 600 sq. ms. Surface broken, and soil of middling quality. Chief town, Litchfield. Pop. 1820, 4,055; in 1840, 4,461. N. lat. 37° and lon. W. C. 9° W. intersect in this co.

Grayson, court house and post office, Grayson county, Virginia. See *Greenville*, Grayson county, Virginia.

Gray's Thurrock, town of Eng., in Essex, on the Thames, 24 ms. E. of London. Lon. 0 24 E., lat. 51 26 N.

Gray's Store and Post Office, Randolph co., N. C.; by post road 90 ms. W. from Raleigh.

Great Barrington, town, Berkshire co., Mass., about 23 ms. W. of Springfield, on the river Connecticut. Pop. 1820, 1,908.

Great Bay, extensive sheet of water between Stafford and Rockingham cos., N. H., 5 ms. above Portsmouth. It unites with Piscataqua river, and receives Oyster, Lamprey, and Exeter rivers.

Great Bridge, post office, Norfolk co., Va.; by post road 124 ms. SE. from Richmond.

Great Britain, kingdom of Europe, comprising a group of islands lying in the Atlantic ocean, N. from France and NW. from Germany. The term Great Britain is commonly applied in particular to the principal island, containing England and Scotland; but as a general name it includes the entire group of islands, Great Britain proper and Ireland, with the small isles scattered around them. Great Britain, thus extended, lies between N. lat. 50° and 61°, and between lon. from London 2° E. and 10 30 W.

Though the substance of the following tables is in part scattered over this treatise, yet I have concluded to insert them in a condensed form, under the general head, in order to place before the reader

a connected view of the population of this very important empire.

The following statement of the population of the several counties of Great Britain in the years 1801, 1811, and 1821, has been laid before the Imperial Parliament :

ENGLAND.

Counties.	1801.	1811.	1821.
Bedford	63,393	70,213	83,716
Berks	109,215	118,277	131,977
Buckingham	107,444	117,650	134,068
Cambridge	89,346	101,109	121,909
Chester	191,751	227,031	270,098
Cornwall	183,269	216,667	257,447
Cumberland	117,230	133,744	156,124
Derby	161,142	185,487	213,333
Devon	343,001	383,308	439,040
Dorset	115,319	124,693	144,499
Durham	160,361	177,625	207,673
Essex	226,437	252,473	289,424
Gloucester	250,819	285,514	335,843
Hereford	89,191	94,073	103,731
Hertford	97,557	111,654	129,714
Huntingdon	37,568	42,208	48,771
Kent	307,624	373,095	426,016
Lancaster	672,781	828,309	1,052,559
Leicester	131,031	150,419	174,571
Lincoln	208,557	237,891	283,058
Middlesex	818,129	953,276	1,144,531
Monmouth	45,532	62,127	71,833
Norfolk	273,371	291,999	344,368
Northampton	131,757	141,353	163,433
Northumberland	157,101	172,161	198,965
Nottingham	140,350	162,000	186,873
Oxford	109,620	119,191	134,327
Rutland	16,356	16,330	18,487
Salop	167,539	194,293	206,266
Somerset	273,750	303,130	355,314
Southampton	219,656	245,080	282,203
Stafford	239,153	295,153	341,524
Suffolk	210,431	234,211	270,542
Surrey	269,043	323,851	398,658
Sussex	159,311	190,083	232,927
Warwick	208,100	228,735	274,392
Westmoreland	41,617	45,922	51,359
Wilt	185,107	193,828	222,157
Worcester	139,333	160,546	184,424
York, E. R.	139,433	167,353	190,709
York, N. R.	155,506	152,445	183,694
York, W. R.	563,953	653,315	800,848
Totals	8,331,434	9,538,827	11,260,555

WALES.

Counties.	1801.	1811.	1821.
Anglesea	33,806	37,051	45,063
Brecon	31,633	37,735	43,613
Cardigan	42,956	50,260	57,311
Carmarthen	67,317	77,217	90,239
Carnarvon	41,521	49,336	57,955
Denbigh	60,352	64,240	76,511
Flint	39,622	46,518	53,784
Glamorgan	71,525	85,067	101,737
Merioneth	29,506	30,324	33,911
Montgomery	47,978	51,931	59,399
Pembroke	56,280	60,615	74,009
Radnor	19,050	20,900	23,073
Totals	541,546	611,783	717,108

Table of the population throughout the last century in England and Wales.

In the years—

1700	-	-	5,475,000
1710	-	-	5,240,000
1720	-	-	5,565,000
1730	-	-	5,796,000

In the years—

1740	-	-	6,064,0
1750	-	-	6,467,0
1760	-	-	6,736,0
1770	-	-	7,428,0
1780	-	-	7,953,0
1790	-	-	8,675,0
1801	-	-	9,168,0
1811	-	-	10,150,6
1821	-	-	11,978,8

Population of London.

1700	-	-	674,3
1750	-	-	676,2
1801	-	-	900,0
1811	-	-	1,050,0
1821	-	-	1,274,6

SCOTLAND.

Counties.	1801.	1811.	1821.
Aberdeen	123,082	135,075	155,000
Argyll	71,859	85,505	96,000
Ayr	84,306	103,954	127,000
Banff	35,807	36,668	43,000
Berwick	30,621	30,779	33,000
Bute	11,791	12,033	13,000

Sutherland	23,117	23,629	23,000
Wigtown	22,918	26,891	33,000
Totals	1,599,068	1,805,688	2,092,000

England and Wales occupy the southern and much the larger portion of the island of Great Britain, and are situate between 50 and 55 50 lat., and 2° E. and 5 40 W. lon. They form an extensive triangular peninsula, bounded on the sides by the sea, and separated at the northern angle from Scotland by a line which extends to the northeastern corner of the Solway Frith to the mouth of the river Tweed.

England and Wales are divided into shires or counties, most of which are subdivided into hundreds, and these again into parishes, which are both ecclesiastical and civil divisions. Yorkshire is divided into three unequal parts, called Ridings, which are again subdivided into wapentakes. Cumberland, Westmoreland, Northumberland, and Durham, are divided into wards, Kent into lathes, and Sussex into rapes.

The following table contains the names of the counties of England and Wales and their dependencies; their area in square miles and imperial acres; their population at the period of the last general census in 1831; the names of their chief, or, as they are called, county towns; and the number of their Parliamentary Representatives:

TABLE OF COUNTIES.

Name of county.	Represent- ation.	Area in sq. miles.	Area in acres.	Area of arable pasture and meadow land.	Populat ⁿ by the census of 1831.	County towns.
Bedford	2	463	296,320	248,000	95,383	Bedford.
Bucks	3	752	481,280	380,000	145,289	Reading.
Buckingham	3	738	472,320	440,000	146,529	Buckingham.
Bridgwater	3	857	548,480	500,000	143,955	Cambridge.
Buckinghamshire	4	1,052	673,250	594,000	834,410	Chester.
Burton	4	1,330	851,200	550,000	302,440	Launceston.
Cumberland	4	1,523	974,720	670,000	169,681	Carlisle.
Derby	4	1,023	657,920	500,000	237,170	Derby.
Devon	4	2,585	1,654,400	1,200,000	494,168	Exeter.
Devonshire	3	1,006	643,840	573,000	159,252	Dorchester.
Dorset	4	1,097	702,080	500,000	253,827	Durham.
Durham	4	1,533	981,120	900,000	317,233	Chelmsford.
Gloucester	4	1,255	805,120	750,000	386,904	Gloucester.
Gloucestershire	4	1,489	953,000	820,000	278,832	Winchester.
Hertford	3	863	552,320	495,000	110,976	Hereford.
Hertfordshire	3	630	403,200	310,000	143,341	Hertford.
Huntingdon	2	372	238,080	220,000	53,149	Huntingdon.
Huntingdonshire	4	1,557	996,480	900,000	479,155	Maidstone.
Wiltshire	4	1,766	1,130,240	860,000	1,336,854	Leicester.

Under the head of statistics, in the Encyclopedia of Science, Literature, and Arts, it appears that the joint population of England and Wales in 1841 was 15,906,829.

NOTE.—Hampshire (originally Southamptonshire) is now usually called Hants; Berkshire is called Berks; Buckinghamshire, Bucks; Hertfordshire, Herts; Nottinghamshire Notts; Shropshire, Salop; and Wiltshire, Wilts. The Isle of Wight, formerly a part of Hampshire, was made an independent county in 1832. The Isle of Man, the Norman isles, Scilly isles, and Berwick-upon-Tweed, are dependencies of the Crown of England, not attached to any county. Berwick, however, is represented in the imperial Parliament, and subject to the laws and supreme courts of England; Man and the Norman isles have laws, legislatures, and judiciary establishments of their own.

The greatest lineal extent of England is about 367 miles between the Land's End, in Cornwall, and the northeastern coast of Norfolk; from the coast of Dorsetshire to Berwick-upon-Tweed, measured along the second meridian west, the length is 362 miles; from the Land's End to the North Foreland the breadth is 330 miles; from St. David's Head to Lowestoft in Suffolk, about 300 miles; from Lancaster bay to Bridlington bay, in Yorkshire, the breadth is contracted to 110 miles, and from the head of the Solway Frith to Tyne-mouth it is further diminished to 64 miles. The superficial extent amounts to about 57,960 square miles, or 37,094,400 imperial acres.

Ireland will be found noticed under its own proper head.

Scotland.—Scotland occupies the northern portion of Great Britain, and has numerous islands along its western and northern coasts. The longest line which can be drawn on the mainland is 280 ms. from the Mull of Galloway to Dunnet Head, on Pentland Frith, in Caithnesshire. The greatest length on a meridian line is 274 ms. from the Mull of Galloway to Cape Ullath, in Sutherlandshire, and almost exactly on 5 W. of London.

The breadth, from the excessive irregularity of the seacoasts, is very variable, but, if we allow the aggregate area to be 32,200 ms., the mean breadth will be 115. Scotland is divided into thirty-three shires; the respective extent of which, in sq. ms. and population, are shown by the subjoined table, as also the ancient and yet popular names of the districts from which the shires have been formed.

TABLE OF SHIRES.

Shires.	Area in Eng. sq. ms.	Population in 1831.	Ancient districts.
Aberdeen	1,985	177,657	Mar, Formartin, Garrioch, Strathbogie, and Buchan.
Argyle	3,800	100,973	Argyle, Lorn, Cowall, Knapdale, and Cantire.
Ayr	1,600	145,055	Carrick, Kyle, and Cunningham.
Banff	-	48,604	Enzie, Bøyne, Strath, doveran, Strathisla, Balveny, Strathaven, with parts of Moray and Buchan.
Berwick	446	34,048	Merse, Lauderdale, and Lammermuir.
Bute	257	14,151	Bute, Arran, Cumbræas, and Inchmar-nock.
Caithness	618	34,529	Caithness.
Clackmannan	48	14,729	
Dumbarton	230	33,211	Levenax, or Lennox.
Dumfries	1,800	73,770	Eskdale, Annandale, and Nithsdale.
EDINBURGH	360	219,345	Mid-Lothian and Waedale.
Elgin	840	34,231	Moray, Murray, or Murreff.
Fife	504	128,839	Fife.
Forfar	840	139,606	Angus, including Strathmore, Glenisla, Glenesk, &c.
Haddington	250	36,145	East Lothian.
Inverness	4,600	94,797	Moray, Badenoch, Lochaber, Moydart, Gleneig, &c.
Kincardine	317	31,431	Means.
Kinross	83	9,072	
Kircudbright	832	40,590	Galloway, Glenkens, &c.

TABLE OF SHIRES—Continued.

Shires.	Area in Eng. sq. ms.	Population in 1831.	Ancient districts.
Lanark	870	316,819	Clydesdale, or Strathclyde.
Linlithgow	112	23,291	West Lothian.
Naim	200	9,354	Part of Moray.
Orkney and Zetland	1,525	58,239	Orkney and Highland, or Zetland.
Peebles	360	10,576	Tweeddale.
Perth	2,588	142,894	Menteith, Strathearn, Gourie, Strathmont, Stratharn, Glenshee, Ath Bredalbane, Rnock, Balquid, and Glenochy.

Sutherland	1,754	25,518	Sutherland, Strathnaver, Asynt, &c.
Wigtown	451	36,255	West Gallo.
		32,164	2,365,114

It appears from a table under the head of statistics, in the Encyclopedia of Science, Literature and Art, that the population of Scotland was, 1801, 1,599,068; and in 1841, had risen 2,620,610, or had increased to a fraction above ratio of 1.63—equal to 63 per cent. in 40 years.

The following document has fallen into my hands from time to time, and was registered; and is given without comment or guarantee of accuracy. In form it will show how much importance is given in Great Britain to statistics.

General observations on the population of Great Britain.—It appears from the second annual report of the registrar general of births, deaths, and marriages in Eng., in 1840, that the population of England and Wales was, on the 1st of January 1839, 15,666,800. The entire population of the United Kingdom was then about 27,267,844. It is supposed now to amount to 27,774,200, whom 6,080,000 are fencible men, between the age of 20 and 60. The population of Ireland is 10 per cent. of the entire population. France contains about 34,370,000 inhabitants.

The report states that the numbers registered in England and Wales in the year ending June 30, 1839, were—births, 480,540; deaths, 331,000 marriages 121,083. The French returns are not published down to the end of 1837, so that we cannot compare the facts in the two countries.

The number of Jews in England has never been ascertained; it may be rated from the marriages (160) at 20,000; or rather more than double the number of quakers. Five thousand six hundred and twenty-eight men and 16,414 women were married under 21 years of age; or of 1,000 men and 135 women.

In 4,853 marriages, the ages were ascertained more than half, namely, 2,536 men and 2,536 women, were between the ages of 20 and 25; 2,620, and under 30, the men were 1,150, the women

and 137 men and 65 women were above the age of 50. The ingenious table of the chances of marriage, calculated from these facts by the *Scots-Register*, represented the prospects of ladies, now in the winter of their discontent," under a somewhat unfavorable light. But if there are few marriages after the age of 35, there are fewer to be married—fewer in the state of celibacy. If, of 1,000 young women aged 18, 900 will be married, and of 100 virgins at 40, the chances of marriage would be the same at those respective ages.

The registrar general's remarks on the mortality in England and Wales are interesting, as the mortality has never before been deduced from a direct observation of the number of deaths.

The assumption that the rate of increase since 1831 has been the same as from 1821 to 1831, the calculation of whom the deaths might have been entered, may be estimated to have been nearly as follows, at the middle of each of the two first years of registration, under the present law :

Years.	Males.	Females.	Total.
January 1, 1838	7,612,967	7,828,768	15,441,735
January 1, 1839	7,723,924	7,942,876	15,666,800

The deaths registered in the years of which the above mentioned periods are the middle terms, are—

Years.	Males.	Females.	Total.
ending June 30, 1838	170,965	164,991	335,956
ending June 30, 1839	169,112	161,895	331,007

Without correction for omissions, this would give the mortality to have been as follows :

Years.	Males.	Females.	Mean.
1838	1 in 44.5	1 in 47.5	1 in 46.
1839	1 in 45.7	1 in 49.	1 in 47.3
Mean of the 2 years	1 in 45.1	1 in 48.2	1 in 46.6

Assuming that the population may be estimated as above, and that it is unnecessary to allow a greater correction than 2 per cent. for omission in the registrations of deaths, the mean mortality of the two sexes for those two years, will have been about 1 in 46."

The mortality at different ages can only be calculated when the ages of the living have been enumerated at the next census.

The report contains a very interesting return on the state of education.

Almost every marriage is duly registered, and every register of marriage is signed by the parties married; those who are unable of writing their names, and those who are unable, or who write imperfectly, making their marks; therefore, an enumeration of the instances in which the mark has been made, will show the proportion among the married who either cannot write at all, or who write very imperfectly.

It appears from the table that, in fifteen English

counties, and in North and South Wales, more than 40 per cent. of the men were unable to write their names; and in nineteen English counties, in the West riding of Yorkshire and in Wales, more than half the women were similarly deficient; and it will appear from the subjoined abstract of marriages that, in the whole of England and Wales, out of 121,083 couples married, there were 40,587 men and 58,959 women who could not write.

"It is to be observed, that the education of the men, in this respect, appears to be superior to that of the women, the proportions per cent. of those who were deficient being, respectively, 53 and 40 for the whole kingdom, and a superiority being maintained by the men throughout the country.

"It will be observed, that this return indicates a decided superiority with regard to education in the metropolis, as compared with the rest of England and Wales, and next to the metropolis in the north of England; and that the principal deficiency is in Lancashire, Bedfordshire, Monmouthshire, and Wales. But, as I have before observed, the comparative superiority or inferiority of particular portions of the kingdom, must not be hastily inferred from the returns of a single year."

It is evident from the reports, that a considerable number of interesting circumstances are registered respecting every person in the country—the birth, marriage, death, with the date, place, and connections of these important events—important both as elements of economical science, and as data to direct and regulate the transmission of property. "The poor," it has been said, "have no monuments," but, under the provisions of the Registration Act, their names are recorded with those of the highest rank, and may be preserved in the official records of the country through immemorial ages, long after ambitious marbles and bronze statues have been dashed to pieces by the destroyer—Time.

Expense of the church in England.—Colton's recent work on Great Britain furnishes a number of curious particulars in regard to the state of religion and the income of the established church in England, some of which we deem it a matter of interest to notice. Few persons in this country, we apprehend, have a correct knowledge of the immense income of the dignitaries of the church, and a still smaller number are able to appreciate the gross injustice under which a large portion of the people of England suffer, in consequence of the abuses connected with the English religious system.

The church of England is a political institution; the King is its head, and the bishops, who superintend the church, are nominated to their sees by him. By a report made in June, 1834, the annual revenues of the church were stated to be £3,784,985 or \$18,167,928. This, however, is an ex parte statement, and Mr. Colton believes that it is much too low. From some data which he was enabled to obtain, he inclines to the opinion that the actual revenue is not short of £21,817,417, or \$104,723,602. It was stated in a London paper, not long since, that the regular annual income of the archbishop of York is £20,000, independent of fines which occasionally happen to be equal to £100,000. The bishop of London's income is £60,000, and the see of Durham is sta-

ted to yield annually one-half that amount. According to the statements of the reformers, the principal sources of revenue to the church of England are the following:

Church tithes	-	-	£6,881,800
Income of the bishopricks	-	-	207,115
Estates of the deans and chapters	-	-	494,000
Glebes and parsonage houses	-	-	250,000
Perpetual curacies	-	-	75,000
Benefices not parochial	-	-	32,450
Fees for burials, marriages, christenings, &c.	-	-	509,000
Oblations, offerings, and compositions, for the four great festivals	-	-	80,000
College and school foundations	-	-	682,150
Lectureships in towns and popular places	-	-	60,000
Chaplainships and offices in public institutions	-	-	10,000
New churches and chapels	-	-	94,050

Total revenue of the established clergy 9,459,565

This sum, which, in federal money, is \$45,405,912, is monopolized, says Mr. Colton, by 7,694 individuals, a large portion of whom are non-residents and sinecurists. If this amount were divided equally among them all, it would average to each \$6,182; but, according to the report of the royal commission of 1834, £424,796 of the whole sum is dispensed by the incumbents for the compensation of 5,282 curates, who supply their places, averaging for each curate £80, or \$384; that is, the dignitaries who receive from the church an annual income of about \$5,798, upon which they live in idleness and luxury, employ poor curates to do their preaching and praying for them, at a salary short of \$400. Many curates, it is said, do not receive more than £50, and some get no more than £20. Such is the gross injustice of the present established church system of England.

The official estimates of the expenses of the Government of England, setting aside the interest on the national debt, were, for 1835, £14,471,213, a little more than half in excess of the cost of the church. The whole expenses of the American Government do not amount to one-half the expenses of the established church of England. Mr. Colton adds the annexed tabular statement, which possesses great interest.

Comparative expense of the church of England, and of Christianity in all other countries of the world.

Names of the nations.	Number of hearers.	Expenditure on the clergy, per million of hearers.	Total amount of expenditure in each nation.
France	32,000,000	£62,000	£2,000,000
United States	9,600,000	60,600	565,000
Spain	11,000,000	100,000	1,000,000
Portugal	3,000,000	100,000	300,000
Hungary, Catholics	4,000,000	80,000	320,000
Calvanists	1,050,000	60,000	63,000
Lutherans	650,000	40,000	26,000
Italy	19,391,000	40,000	776,000
Austria	18,918,000	50,000	950,000
Switzerland	1,720,000	50,000	87,000

TABLE—Continued.

Names of the nations.	Number of hearers.	Expenditure on the clergy, per million of hearers.	Total amount of expenditure in each nation.
Prussia	10,536,000	50,000	527,000
German small States	12,763,000	60,000	755,000
Holland	2,000,000	80,000	160,000
Netherlands	6,000,000	42,000	252,000
Denmark	1,700,000	70,000	119,000
Sweden	3,400,000	70,000	238,000
Russia, Greek church	34,000,000	15,000	510,000
Catholics & Lutherans	8,000,000	50,000	400,000
Christians in Turkey	6,000,000	80,000	480,000
South America	15,000,000	30,000	350,000
Christians dispersed elsewhere	3,000,000	50,000	150,000
England and Wales	203,728,000	1,455,316	9,949,000
	6,500,000		9,459,000

"Hence it appears the administration of church of Englandism to 6,500,000 hearers, costs nearly as much as the administration of all other forms of Christianity in all parts of the world to 203,728,000 hearers.

"Of the different forms of Christianity the Romish is the most expensive. A Roman catholic clergyman cannot go through the duties of his ministry well for more than 1,000 persons. The masses, auricular confessions, attendance on the sick, and other observances, make his duties more laborious than those of a protestant clergyman would double the number of hearers; add to which, the cost of wax lights, scenery, and other accompaniments peculiar to Catholic worship. Notwithstanding these extra outgoings, we find that the administration of the Episcopalian reformed religion in England to one million of hearers, costs the people fourteen times more than the administration of popery to the same number of hearers in Spain or Portugal, and more than forty times the administration of popery in France.

"Dissenters, like churchmen, are compelled to contribute to the support of the churches of the established religion, besides having to maintain voluntary payments, their own pastors and places of worship. In France all religions are maintained by the State, without distinction; all persons have access to the universities and public schools; in England only one religion is maintained by the State, and all dissenters from the national worship are excluded from the universities and colleges, and from the masterships of grammar schools and other public foundations, endowed by our common ancestors for the general promotion of piety and learning.

"The monstrous excess in the pay of the English clergy appears, from comparing their average income with the incomes of the clergy of equal rank in other countries. In France an archbishop has only £1,041 a year, a bishop £622, an archdeacon £166, a canon or prebend £100, a rector £48, a curate £31. In Rome the income of a cardinal, the next in dignity to the pope, is £400, £500 a year, of a rector of a parish £30, of a curate £17; compare these stipends with the enormous incomes of the English clergy, and, mark:

allowance for difference in the expense of living in respective countries, the disparity in the ecclesiastical remuneration appears incredible." *Great Britain, empire of.* Under this general title I have deemed it relevant to the nature and scope of this treatise to give a synoptical view of the immense regions directly under the government of the British nation.

Category	Territorial or provincial sections.	Area in sq. ms.	Pop.
Europe	{ British islands -	125,240	21,318,743
	{ Hanover -	14,600	1,300,000
Asia	{ British India -	553,000	83,000,000
	{ Cape of Good Hope -	120,000	120,000
America	{ British North America or Cabotia, only the inhabited parts -	240,000	750,000
	{ British West Indies -	9,000	722,000
	{ Guiana -	10,000	100,000
	{ -	1,071,840	107,310,743

In the preceding table, the British settlements on the W. coast of Africa, and the island of St. Helena, are not included, as they add nothing to the power of Great Britain. In India are included the area and pop. actually held and governed by the British; and in America are excluded the suitable wilds yet uninhabited by civilized man. In all these deductions, enough remains to form the most efficient political power that has ever been formed. With the abundance and variety of mineral treasures, her labor-saving machinery, her insular position of the original centre of emigration, the British nation possesses more than the productive force of one-half the human species. How such a machine, composed of detached parts of heterogeneous materials, is calculated to secure individual happiness, or capable of duration, alone can determine. But at the present London much more than ever was the case with Rome, the pivot on which rests the mental, moral, and physical energies of mankind.

My comment on this sublime monument of human genius and industry would or could answer no other purpose than that of weakening the effect on the mind of every liberal reader.

Great Cape, on the N. side, where lake Superior descends into the narrows of the falls of St. Mary.

Grebna, town of European Turkey, in Thessalus, 50 ms. N. by E. from Ioanina, in Epirus.

Greece, country of Europe, included in the empire of the Ottoman Turks. The boundaries of this truly interesting country, as well as the etymology of the name, are equally uncertain. The common opinion of the Greeks themselves derive the national appellation from Graicus, son of

Thessalus. Many sources have been sought for the origin of this people; probability is in favor of the supposition, that the mass of the people originated from Gothic, or Scythian colonies, but, that their civilization, arts, and sciences, were drawn from the cultivated nations of western Asia and NE. Africa. The word Pelasgos signifies a stork, or bird of passage, and is peculiarly applicable to either a nomadic or commercial people, and given with warm and happy felicity of Greek nomenclature. They prided themselves also on the title of Autochthones, children of the earth. Gradually civilized, and quitting the nomadic state, rather by tribes than nationally, new provincial names arose, and in the lapse of successive ages, the primitive names were lost in those of Hellenians, Ionians, Dorans, &c.

We understand commonly by the name of Greece, the country generally so known, and which forms the SW. part of European Turkey. Though I have already observed that this country was peopled by colonies, advancing from the N., I have only, in the present article, included under the name of Greece, divisions admitted by the ancients themselves; but the Greek nation, not only inhabited that part of Europe, they also extended colonies into the S. of Italy, to which they gave the name of Magna Græcia; into Sicily, in which they founded many large and populous cities; on the coast of Africa, W. from Egypt, and particularly into Asia Minor.

The following synopsis will suffice for Greece Proper, and for the principal towns of each section.

Greece was divided into three great portions by the hand of nature; these sections were peninsular Greece, or the Peloponnesus, now Morea, continental Greece and insular Greece.

Peloponnesus was subdivided into the provinces of Argolis, in which were the rivers Inachus, and Erasinus, and the cities of Argos, Mycenæ, and Epidauris. Laconia, with the Eurotas river, and cities of Sparta, Amyclæ, Gythium, and Tænarium. Messenia, with the Pamisus river, and the cities of Stenyclarus and Colonides. Elis, with the Alpheus, Anigus, and Selleis, and the cities of Olympia, Pisa, and Elis. Achaia, watered by the Melas and Crathis rivers, and having the cities of Dyme, Patræ and Ægium. Sicynia, with the river Æsopus, and the cities of Sicyn and Phlius. Corinthus, with the cities of Corinth, Lechæum, and Cenchræ. The last subdivision of the Peloponnesus, was that of Arcadia in the centre, containing the Alphæus, Erymanthus, and Aorian rivers, and the cities of Magalapolis, Mantinea, Tegea, Orchomenus, and Phigalia.

Next followed Greece Proper, or continental Greece, subdivided, advancing from S. to N. into Attica, with the cities of Athens, Elusis, and Marathon. Negaris, with the cities of Megara and Nysæa. Bœotia, with the lake Copais and river Æsopus, and the cities of Thebes, Orchomenus, Cheronea, Tanagra, Eleutheræ, and Thespiæ. Phocis, with the river Cephissus, and the cities of Delphi, Elatia, Cryssa, and Anticyra. Doris, with the city of Cytinium. Locris Ozolæ, with the cities of Amphissa, and Naupactus. Locris Epicnemidii, with the city of Cnemides Locri Opuntii, with the city of Opus. Ætolia, with

the rivers Achelous and Evenus, and the cities of Thermui, Calydon, and Chalcis. Acarnania, with the cities of Arges, Amphiloichicum, Stratus, and Actium. Thessalia, with the rivers Peneus, Onchestus, and Sperchius, and the cities of Larissa, Pharsalus, Phæræ, and Demetrius. Epirus, with the rivers Acheron and Avas, and the cities of Buthrotum, and Nicopolis. Illyria, with the cities of Epidamnia and Apollonia. Macedonia, with the rivers Erigon, Axios, Strymon, and Haliacmon, and the cities of Pella, Edessa, Thessalonica, and Olynthus.

Insular Greece was subdivided into the east, south, and west sections. That of the east contained the islands of Thera, Naxia, Paros, Delos, Myconus, Tenos, Andros, Eeos, Eubœa, Scyros, Thasos, and some smaller groups. That of the south contained Crete and Cythera. In the west were Corcyra, Leucadia, Cephallenia, Dulichium, and Zacynthus.

In this exposition of the States of Greece, Macedonia is included; but it may be observed that it was only after the reign of Philip II., and his son Alexander II., or Alexander the Great, that the Greeks commenced to regard Macedonia as a part of Greece. Before that period the people inhabiting the country called Græcia, and also Hellas, regarded the Macedonians, as well as the Thracians, as Barbarians. Similar observations might indeed be extended to Thessaly, Etolia, Acarnania, Epirus, and Illyria. These countries were slowly, and with the advance of arts, science, and political power, admitted into the list of Grecian States. Taken *in extenso*, Greece was bounded S. by the Mediterranean sea, W. by the Ionian and part of the Adriatic sea, N. by the mountains of Illyria, Macedonia, and Thrace, and E. by Thrace and the Ægean sea. It extended from lat. 35° to 48° N., or about 560 English ms., and from E. to W. 250 ms. wide where broadest. Its area about 40,000 sq. ms.

Greece is formed by a peninsula, bearing a strong resemblance to that of Italy, the Peloponnesus representing Sicily. Nearly parallel to the two opposite coasts, extends a range of mountains with lateral ridges, branching towards each sea. The main chain gradually declines in elevation from N. to S. In the northern part of Greece, the ridges of Pindus, and Parnassus, rise to from 7 to 8,000 feet, while the mountains of Bœotia and Attica, do not exceed from 500 to 1,000 feet. Parallel to the main chain, another rises near the head of the Gulf of Salonica, or the ancient Sinus Thermaicus, and by the local names of Ossa and Pelion, and Oeta and Othrys, extends through Thessaly to the ancient gulf of Artimisium, and is continued through the islands of Eubœa, Andros, Tenos, Myconus, &c. The latter chain is in reality a ramification of the main central chain, which it leaves between the sources of the Haliacmon and Peneus rivers, and first stretching eastward towards the Thermaic gulf, thence turns SE. as already described.

Along the northern frontier of Macedonia, ranges Mount Orbelus, a part of the great chain of Mount Hæmus. From Mount Orbelus, between the sources of the Axios and Strymon rivers, extends an humble but distinct ridge, of which Mount Athos in the Chalcidice was the

utmost southeastern termination. The country of Acarnania, Etolia, and Epirus, are also extremely mountainous.

The Peloponnesus, now Morea, possesses appropriate mountain ridges, of which the principal are Mount Cyllene in the W., and Taygetus near the S. extremity. The whole peninsula however, excessively mountainous. The central land of Arcadia, rising to an elevation which gives it a climate of considerable severity in winter but a most salubrious and delicious atmosphere in spring, summer, and autumn. In brief, all Greece may be viewed as a region rough, but highly conducive to the full development of the human frame and mental faculties.

A country so indented, cannot be supposed abundant in rivers, but though comparatively small, and of limited length of course, many the rivers of Greece are fine mountain streams, and some drain valleys rich with every gift of nature. Advancing from N. to S., we find in Macedonia the three beautiful basins of Strymon, Axios, and Haliacmon. In Thessaly, spreads the basin of the Peneus, now Salympria, celebrated in ancient ages as one of the most inviting spots on earth. The gorge through Mount Ossa, made by the Peneus in its escape to the Ægean sea, is the famous vale of Tempe. The Cephissus river in Bœotia, is remarkable as having no outlet to any sea.

Modern like ancient Greece, is naturally divided into peninsular, insular, and continental Greece.

Continental Greece extends 200 ms. from Cassopia to Sunium, in the ancient Attica, to the mouth of the Gulf of Arta, or Ambracia, in a NW and SE. direction. This country lies in form of a triangle, with a mean width of about 45 ms., and formerly contained the provinces of Attica, Megara, Bœotia, Phocis, Locris, Etolia, and Acarnania. This was the most ancient division of Greece, but at a later period, Thessaly, Epirus, and Macedonia, were included under the general name of Greece. Epirus is now called Albaniam and extends in a direction of NW. and SE., from the Aphas river to the borders of Illyria, 90 ms. with a mean width of 50 ms. from the Ionian sea to the Metzovo mountains. Area 4,060 sq. ms. Thessaly extends from the promontory of Sepion in the SE., to the northern extremity of Mount Pindus, and sources of the Peneus, now the Salympria river, 116 ms.; mean width 35 ms.; area 4,060 sq. ms. Macedonia extends from N. to S. 175 ms.; mean width E. and W. 140 ms.; area 24,360 sq. ms. The island of Negropont, ancient Eubœa, is about 100 ms. long, with a mean width of 12 ms.; area 1,200 sq. ms.; forming, from position, a part of continental Greece.

Insular Greece contains the islands of—

Thus we find that this grand theatre of early history does not equal in area Pennsylvania. Greece in all parts, even in the smallest islands, mountainous, and one-fourth may be deducted from its arable area, leaving only about 33,000 sq. capable of sustaining a dense population. A very interesting subject of discussion would be a comparison between ancient and modern Greece; but our knowledge of either, is too vague to enable us to draw satisfactory conclusions. In want of precision of ancient authors, we are at a loss to decide many important points in the history of this country, during its most prosperous periods. Statistical knowledge, so indispensable to political science, was almost entirely neglected by the historians of Greece, and too much so by Rome. The population of ancient times must be determined by comparative estimates. It is recently, and yet partially, that modern nations have adopted the simple means of enumeration to discover and measure their respective physical force. To enable us to approximate in some measure to a correct view of the population of ancient Greece, we have two military estimates, made at different periods; one by Herodotus, where he details the troops of Greece, at the battle of Platæa, Ante C. 479; and the second, when Philip II, king of Macedonia, was declared generalissimo of all the armies of Greece. In the 28th section of Calliope, Herodotus gives the following table of the military force of Greece at the second Persian invasion—

Spartans, Lacedæmonians, and Helotæ	-	79,500
Athenians	-	8,000
Thebæans	-	1,500
Corinthians	-	5,000
Cidaæans	-	300
Argians	-	600
Ionians	-	3,000
Daurians, Lepreatæ, and Trozenians	-	2,000
Athenians and Tirinthians	-	400
Asiatics, Hermiconians, Eretrians, and Sicyreans	-	1,900
Boeotians and Ampraciata	-	1,300
Argians and Anactorians	-	800
Chalcidians and Eginetæ	-	700
Megareans and Platæans	-	6,000

Auxiliaries from a number of places not named	-	-	-	21,200
Total	-	-	-	129,800

This document, although it does not enable us to fit the proportion between the military and other parts of the population, is, however, precious, as serving to determine the relative force of the States of southern Greece nearly five centuries before our era. Only 108,600 Greeks were actually embodied against the Persians at Platæa, as the northern Greeks joined the invaders. If we allow 108,600 to have been the two-thirds of the military population at that period, then about 145,000 would represent the entire disposable force. Twenty to one, it is probable, as it is in modern times, was about the relative number of troops in the field, and the residue of the population. This would yield an aggregate of 2,896,000, as the mass of inhabitants in Greece, 479 years before our era. If we assume 3,000,000 in round numbers, we find an aggregate of 70 to the sq. m. In Greece, as in every other country, in every age, the increase and decrease of mankind depended more on moral, than physical causes. Great temperance, simplicity of manners, and little use of animals, when superadded to personal freedom, were all favorable to population in the ancient States of Greece; but a powerful check was given to general prosperity by domestic slavery, which prevailed in every part, but particularly in Athens, and Lacedæmon; we have seen, nevertheless, that the former, on a territory of about 500 sq. ms., had at one period upwards of 300,000 inhabitants, or 600 to the sq. m. All Greece thus peopled would have contained a population of more than 26,000,000, but the events of the Peloponnesian and Theban wars, would warrant the conclusion that Greece never at any period contained as many as 3,000,000 of inhabitants.

In Ante C. 337, the assembled States of Greece, at Corinth, named Philip II, King of Macedonia, as generalissimo, and voted a force of 235,000 men. This army, when united to the troops of Macedonia, would have formed a mass of about 300,000 men. Greece and Macedonia were now at the very acme of their conjoint power, and yet three years afterwards, with all this pomp of numbers, Alexander was unable to quit Europe with 50,000 men, when he undertook the invasion of Persia. In fact the Grecian army, at the battle of Platæa, was the most numerous ever assembled by that nation on any occasion whatever. When invaded by the Romans, their armies were generally small, and when the former were commanded by skilful generals, the latter ceded and fell a prey to the invaders. Fifteen centuries after the Roman conquest, the Turks obtained similar success, with even less effective resistance. Since the late sanguinary contest with their Mahometan masters, the number and component material of the population of Greece have become problems of intense interest. Hobhouse gives to modern Attica 25,200 inhabitants; but this estimate is made upon Attica restricted to within Mount Cithæron, on about 350 sq. ms. The Greek revolted provinces are the Morea, Attica, Bœotia, (Livadia,) and a few of the islands. The whole of this extent may amount to

the one-third of all Greece and Macedonia, or to about 14,600 sq. ms. If Attica contains 25,200 inhabitants on 350 sq. ms., the aggregate is 72 to the sq. m.; and, allowing such distributive population to all Greece, the amount would be 3,178,000, a number far above what any evidence we possess would warrant. To many it will appear revolting to be told that there has not yet been, at any moment since their revolt, a population of one million opposed to the Turks; and yet, if such an estimate is erroneous, I am afraid that the error is in excess.

The moral materiel is again a far more important subject of inquiry than mere numbers. Commencing in the N. with Albania, always less civilized than the more southern Greeks, is now inhabited by a race not much above the savage state. "The countries composing Albania," says Hobhouse, "seem, in parts, to have been peopled by an almost uninterrupted succession of barbarians. Illyricum and Epirus are not often mentioned by historians without a notice of the peculiar ferocity of their inhabitants. It was not until the reign of Tharytas, King of the Molossians and Thesprotians, from whom Pyrrhus was fourth in descent, that the Greek language and manners were introduced into the country; which, as it was divided into several petty principalities and republics, could, after all, never have been more than partially civilized. As to the Illyrians, Polybius calls them the enemies of all nations, and no more civilized than the Thracians or the Getæ; and Livy accounts for the superior ferocity of one of the four Roman divisions of Macedonia by the inclemency of their climate, the infertility of their soil, and the vicinity of the barbarians." This picture of the country and its inhabitants is as faithful a representation of both at the present epoch as for ages prior and subsequent to the Roman conquest of Greece. When that conquest was consummated, and Macedonia lay in the direct route from the capital of the empire to the more distant provinces of the east, a military road was opened, and called the Ignatian Way. This road led from Apollonia, Dyrachium, and Aulor, over the mountains, through Lychnidas, Pylon, and Edessa, 250 ms. to Thessalonica. Whilst this thoroughfare existed, some degree of mental improvement must have been superinduced; but the decline of Roman power and subsequent revolution closed to the still barbarous population of Epirus every avenue of intelligence, and as early as the reign of Julian II the decay of its cities was noticed. In 396 Alaric first laid waste the country, and then settled in it with his Goths. The Vandals, as destroyers, had preceded the Goths, but a still more effective revolution was the consequence of the invasion of the Scythian Sclavi. This fierce and rude people crossed the Danube about the middle of the sixth century, supplanted the ancient, and introduced a new and still more barbarous population. In the process of a few succeeding centuries, these rude hordes were expanded and established in Epirus, Macedonia, continental Greece, and the Morea. As the empire of the Romano Greeks declined, the Sclavi formed a powerful kingdom between the Danube and Mount Hæmus, and in the W. embracing Epirus. This kingdom was known by the name of Bulgaria. The Bulgarians invaded Pan-

nonia, in the beginning of the sixth century, defeated the imperial army, and were bribed to retire an expedient which was, in effect, a security for their return. After many attempts and changes of fortune on both sides, the Sclavi were firmly established S. of the Danube, had given their name to the Moesian provinces, Bulgaria, which now designates the country. As early as 655 the Bulgarians advanced towards Constantinople, and reached Varna, from where the impolitic emperor of tribute obtained their momentary retreat, but they were now a nation of southern Europe, and a most formidable scourge to the Romano Greeks. In 810, the emperor Nicephorus invaded Bulgaria, but was encompassed and destroyed with all his army. Three years afterwards the Bulgarians rushed into the empire and besieged Constantinople. Their extreme danger at length roused the Romano Greeks, who were still sufficiently powerful, when in any manner well directed, to repulse these hordes, and they were driven from the empire. In time of peace their intercourse with the Greeks brought the Bulgarians gradually into the pale of Christianity, which, however, produced but little moral change in their sanguinary and barbarous manners. The wealth and weakness of the Romano Greeks incited constant hostility, and in 913 Simeon, King of Bulgaria, was before the walls of Constantinople. Through the greater part of the 10th century the Bulgarians maintained their ascendancy, but in 975 the Romano Greeks had the good fortune to be ruled by a hero, Basil II. This consummate general, though unable to prevent the Bulgarians from, in 994, taking Thessalonica, and rushing in a destructive torrent into Bœotia, Attica, and Peloponnesus, yet, as this invasion, by dispersing, weakened their force, in the face of their now formidable opponent, he in a few years so effectually crushed their power, by reiterated defeats, that in 1017 they submitted to become his subjects.

These Slavonic bands had been now established S. of the Danube upwards of 500 years, and though composed of various tribes and nations, they imperceptibly melted into one mass, or rather into two; the eastern section known as Bulgarians, and the W. as Albanians. They had been independent tribes long enough to change the name of the provinces they inhabited, and as early as the 11th century Roscia, Servia, Bosnia, Croatia, Bulgaria, and Albania, had commenced to supply the ancient provincial names of this part of Europe, and, what was of greatly more consequence, to spread barbarism over the remotest corners of Greece.

To complete its degradation, in 1204 the imperial capital fell into the hands of a French and Venetian force, and a French nobleman placed the throne of Constantine. Centuries before the actual conquest, the Normans, Genoese, Venetians, Catalans, &c., under the general name of Franks, had made the continent and islands of Greece a thoroughfare in their approaches towards and retreat from, the Mahometan countries of Asia and Africa. So deeply influential were those expeditions and consequent commercial intercourse as to give a new language to the eastern part of the Mediterranean, and the lingua Franca became a lasting testimony how far the Latin nations had

planted the Greeks, in the very centre of Greece. In 1303 the Catalans, under the secular name of Amogavares, and admixed with robbers and murderers from Italy, were fixed in the main Greek empire by Michel Paleologus. From the commencement of the 14th to the middle of the 15th century, or for a period of 150 years, the Catalans or Amogavares completed the physical and mental ruin began by the Bulgarians, Serbs, and Albanians. Finally, the Mahometan Turks, already in Europe since 1353, totally subdued the empire by storming Constantinople. Freed by the Turks from Thrace, the Catalans settled in continental Greece, and that fine region became once more partitioned into barbarous principalities of small extent. For several centuries Greece, in respect to civilization and political importance, was in a worse condition than it was during the heroic ages, 2,500 years before. In the darkest period of the heroic ages, Greece had a language; but under the Christian age of desolation, her incomparable language was superseded by barbarous dialects, too rude to admit reduction to written rules. Of all the crowds from the N., E., and W., which trampled the soil of ancient Greece, the Venetians and Genoese alone contributed to arrest the progress of ignorance and barbarism; and even the Venetians and Genoese, better rivals in commerce, their mutual contests increased disorders at the very heart of the Roman Greek empire. In fine, from the age of Constantine to the late revolution, the real Greek and the Greek language were disappearing from the earth, and had not the catastrophe been prevented by fanaticism on all sides, the Greeks, Turks, Albanians, and all other nations inhabiting the Ottoman empire, must have, in the lapse of five centuries, melted into one common mass, and have adopted the language of their conquerors. The Romans had already produced such an effect; but when the Romans justice, liberty, and law, followed the sword; in Turkey all was mere brutal force. From every evidence I have been able to collect, the Morea, continental Greece, Thessaly, Macedonia and Thrace, are now inhabited by a vile mixture of the descendants of Greeks, Romans, Goths, Vandals, Slavi, Spaniards, modern Italians, and Ottomans, with other races of less consequence. A difference of manners, customs, religion, and language, is met with in every petty district. The Scythian character, according to Hobhouse, prevails in the mountainous regions as well as in the Morea, Attica, and Bœotia. It must be obvious, from what has been stated in this article, that to talk of Greeks in Greece is little, if not less absurd than to talk of Romans in Italy. A new national association may arise in Greece, but it cannot be Greek. The real character of a subjugated people is always infinitely better than their situation; therefore, what degrading accounts we read of the mixed inhabitants of Greece ought to be received with liberal allowance for the disadvantages under which they labor. We must exert to find in the Morea and the islands more remains of the ancient Greek manners and character than in continental Greece, as foreign aggression and alloy could reach the former with more difficulty than the latter section of this still very interesting country. This is the fact, as attested by

Hobhouse, Poqueville, the Duke of Choiseuil Gouffier, Chateaubriand, and indeed by almost every traveller. Much of the ancient personal appearance, dress, and manners, are retained even in continental Greece, but the moral base is overturned. Amongst ancient nations, when books were made up in manuscript, and of course excessively dear, the great body of society must have remained ignorant. It was individual rather than national intelligence which gave pre-eminence to ancient Greece; and, when foreign domination crushed the germ of genius, the arts, sciences, and national grandeur, disappeared. I will not say, with Hobhouse, that Greece cannot, in any case, be independent, but must confess that I see but little to hope in their favor. With two great military empires on one side, and a greater commercial empire on the other, and both inimical to their actual emancipation, the Turks are left undisturbed to gain experience in the art of war, and must in the end succeed in resubjugating or exterminating that nation we call Greek. This sanguinary consummation may be averted by the Greeks becoming a dependent on Great Britain, or submitting to a Russian or Austrian Vavode.

Though not very generally fertile, the soil of Greece is more productive than could be expected from a country so broken by mountains. It is more celebrated for fruits than grain. The plains and valleys of Greece produce, however, in sufficient abundance, wheat, barley, rice, maize, millet, and other cerealia. Its fruits are abundant and delicious; the principal species are figs, grapes, apples, &c.

In many places extensive orchards of the white mulberry are cultivated to feed the silk worm. The modern name of the Peleponnesus, the Morea, is derived from *Morus*, the Latin name of the Mulberry tree.

Honey is also amongst the most valuable productions of Greece. That of Attica has been, from time immemorial, celebrated for its peculiar excellence. Cotton and tobacco, in modern times, have been introduced, and are now generally cultivated.

In brief, Greece wants only freedom and release from the deteriorating and murdering despotism of the Turks and national union to again resume her rank amongst the most respectable nations of the world. Considerable advance has been made during the last 70 years, in rousing the Greeks to a recollection of what were once their ancestors, and in anticipation of what they may themselves be, if restored to self-government. Literature has made, if we estimate the many impediments opposed to its advance, astonishing progress of late. Great attention is paid to the ancient and modern languages of Greece—the former distinguished by the title of Hellenic, and the latter by that of Romaic, and differing about as much as Latin and Italian.

Increasing intelligence and reading of their own classic authors have led to a result which was inevitable, a resistance against their ancient and ferocious oppressors. That resistance is now in operation, and lost must that heart be which is not with its every feeling arrayed on the side of the Greeks; would to Heaven we could accompany our sympathies in this case with rational hope; but, alas! dark is the prospect.

Kingdom of Hellas, or Greece—This kingdom forms the southeastern extremity of Europe, and is nearly peninsular, being bounded on three sides by the Archipelago and the Mediterranean sea. Its greatest length from N. to S. is about 172 miles, and the greatest breadth of its continental portion about 150; comprising an area of about 14,000 square geographical miles. It comprises the ancient Peloponnesus, or Morea; the Turkish province of Livadia, and part of those of Carilli and Lepanto, or Eastern and Western Hellas; Eubœa, or Negropont; the Cyclades, and a part of the Sporades.

The kingdom is divided into 10 *nomos*, or shires, which are subdivided into 46 *eparchies*. The following table contains the names of the *nomos* and their chief towns, of which, those to which the star is appended are also the chief towns of the *eparchies*.

Nomos or Shires.	Pop. in 1836.	Towns.
Argolis	89,340	Nauplia,* Argos,* Corinth,* Hydra,* Castri,* Cranidi, Poros,* Damala.
Achaia and Elis	86,879	Patras,* Vostitza,* Kalavrita,* Pyrgos,* Gastuni.
Messenia	61,035	Arcadia,* Phanari,* Modon,* Navarin, Coron, Androussa,* Mavromati,* Colamata.*
Arcadia	80,871	Tripolitza, Caritene,* Prastos,* Hagio, Petro, Leontari.*
Laconia	60,550	Misitra,* Monemrasia,* Vetoilo.*
Acarmania and Etolia	45,900	Vrachori,* Dragomestre,* Missolonghi,* Lepanto,* Carpenitza.*
Lochris and Phocis	43,740	Salona,* Galaxidi, Yei-tun,* Petradjick, Lidariki,* Talanti.*
Attica and Bœotia	74,552	Athens,* Egina,* Megara,* Thebes,* Livadia.*
Eubœa	41,525	Negropont,* Caristo, Scopol, the Islands Skiathos, Skyros, Heliodyromia.
Cyclades	105,134	Hermopolis.* Andros,* Sinos,* or Borgo,* the Islands Mijconi, Delos, Kythnos, Kid, or Zea, Serpho, Milo, Kimoli, or Argentiere, Siphno, or Siphanto, Policandro, Sikinos, Thira, or Santorin, Ios, or Nios, Araphne, or Nauplio, Amorgos, Naxos, Paros, Antiparos, Andros, Syra, Tinos.
	688,826	

Greece, village, Monroe county, N. Y., W. from Genesee river, and 7 ms. NNW. from Rochester.

Greggville, village, Loudon co., Va., 45 miles W. from W. C.

Green, tp., Franklin co., Pa., on both sides of the road from Shippensburg to Chambersburg.—Tp., Clark co., O.—Tp., Clinton county, O.—Tp., Columbiana co., O.—Tp., Fayette county, O.—Tp. of Gallia county, O.—Tp. in Harrison county, O. The post office by the name of Green is situated 8 miles NE. of Cadiz.—Tp. of Richland co., O. Pop. in 1820, 621.—Tp. of Ross county, O., on the E. side of Scioto river. Pop. in 1820, 1,531.—Tp. of Scioto co., O., on Ohio river. Pop. in 1820, 582.—Village and township, Stark co., O. Pop. in 1820, 503.—

Tp., Trumbull co., O., 18 ms. NE. from Warr.—Tp., Wayne county, O., 6 miles NE. from Wooster.

Green Bank, S. from the island of Newfound land, about 150 miles long and 50 wide, lying the form of an ellipsis. Lon. W. C. from 20 to 24 40 E., lat. 45 30 to 46 50 N.

Green Bay, formerly *Bay Puan*, large bay lake Michigan, or more correctly the estuary Fox river. Its form is that of a triangle, extending about 90 ms. from lake Michigan, gradually narrowing from 20 ms. to the confined stream Fox river. The mouth of Green bay is closed, a group of islands.—See *Grand Traverse*. Vessels of 200 tons can navigate this bay, and enter some distance into Fox river.

Green Bay, settlement. This region was colonized by the French when in possession of Canada, about 1700. The majority of the present settlers are descendants of the original settlers.—See *Brown co., Michigan*.

Greenbriar, river of Va., which rises in Pendleton co., Va., and flowing SW. by S. through Pendleton, Bath, Nicholas, and Monroe cos., falls into the Great Kenhawa after a comparative course of 100 ms.—Co. of Va., bounded by Nicholas, Monroe SE., Kenhawa river or Giles SW. Kenhawa NW., and Randolph NE.; length 100 ms., mean width 24, area 1,200 sq. ms.; surface hilly and mountainous generally, with a soil mostly rocky or stony and barren. Chief town, Lew burgh. Pop. in 1820, 7,040, and in 1840, 8,699. N. lat. 38°, and lon. from W. C. 3½° W.; intersect in this co.—C. H.—See *Lewisburg*.

Greenburg, village, Westchester co., N. Y., 20 ms. N. from the city of N. Y.

Green Bush, village, Windsor co., Vt., 68 ms. S. from Montpelier.

Greenbush, town opposite the city of Albany and in Rensselaer co., N. Y. Pop. in 1820, 2,764.

Green Castle, village, Franklin co., Pa., 10 ms. S. of Chambersburg, and 9 N. of Hagerstown, Md. Pop. 1,300.—Village Putnam co., Ind., 46 ms. W. from Indianapolis.

Greencastle, village, Fairfield co., Ohio, 10 ms. NW. from New Lancaster, and 11 SE. from Columbus.

Greene, town, Kennebec co., Maine, 24 ms. SW. from Augusta. Pop. in 1820, 1,890.—Co., N. Y., bounded E. by Hudson river, S. by Ulster, W. by Delaware, NW. by Schoharie, and N. by Albany; length 32 ms., mean width 20, area 640 sq. ms. The surface of this co. is in peculiar manner diversified. Its central parts are occupied by the highest elevations of Kaatsberg rising to near 4,000 feet, and are the highest peaks of the Appalachian or Alleghany range SW. from Hudson river. Around these Alpine summits are many valleys of first-rate land, highly productive in grain, fruits, and pasturage. It is indeed one of the most interesting counties in the U. S. for the richness and variety of its scenery and its mineral and vegetable productions. Chief town, Athen. Pop. in 1820, 22,996, and in 1840, 30,446. C. lat. 42 18 N., lon. W. C. 3° E.—Village Chenango co., N. Y., 12 ms. SW. from Norwich. Pop. in 1820, 2,500.—SW. co. of Pa. bounded by Va. S. and W., by Washington, P.

, and by the Monongahela river E. ; length 32
 ., breadth 12, area 600 sq. ms. ; surface gener-
 ally hilly, with a good soil on the streams and
 one part of the high lands. Chief town, Waynes-
 co. Pop. in 1820, 15,554, and in 1840, 19,
 7. Ctl. lat. 39 50, lon. W. C. 3 15 W.—
 ., Greene co., Penn., on Whitely creek. Pop.
 20, 1,801.—Tp. of Beaver co., Penn., on
 S. side of Ohio river. Pop. in 1820, 1,194.
 —Co., N. C., bounded by Lenoir S., Wayne
 E., Edgecombe N., Pitt NE., and Craven SE. ;
 length 20 ms., mean width 14, area 280 sq. ms. ;
 surface moderately hilly, and soil tolerably pro-
 ductive. Pop. in 1820, 4,533, and in 1840, 6,595.
 Ctl. lat. 35 30 N., long W. C. 45' W.—Co.
 of Georgia, bounded by Oconee river SW., Clarke
 Oglethorpe N., Wilkes E., and Hancock SE. ;
 length 28 ms., mean width 15, area 420 sq. ms. ;
 surface hilly and soil productive. Chief town,
 Greensborough. Pop. in 1820, 1,445, and in
 1840, 11,690. Ctl. lat. See *Greensborough*.—
 ., Alabama, at the mouth of the Tuscaloosa, or
 Black Warrior river, bounded by the Tombigbee
 river W., Pickens and Tuscaloosa N., Perry E.,
 Dallas and Marengo S. ; length 35 ms., mean
 width 20, area 700 sq. ms. ; surface in general
 level. Soil upon the streams highly fertile, but
 the immediate space sterile. Chief town, Erie.
 Pop. in 1820, 4,554, and in 1840, 24,024. Ctl.
 lat. 32 48 N., lon. W. C. 10 40 W.—Co.,
 Miss., bounded by Ala. E., by Jackson co. S.,
 W. by W., and Wayne N. ; length 36 ms., mean
 width 30, area 1,080 sq. ms. ; surface uneven,
 and very hilly. Soil, except in a few places along
 the streams, sterile and timbered—with fine staple
 cotton. Pop. in 1820, 1,445, and in 1840, 1,636.
 Ctl. lat. 31 15 N., lon. 11 32 W. from W. C.
 —Co. E. Tennessee, bounded by N. Car. SE.,
 Meke co. SW., Jefferson W., Hawkins N., and
 Washington E. ; length 32 ms., mean width 22,
 area about 700 sq. ms. ; surface greatly diversified
 by mountain, hill, and dale. The Nolichucky
 river winding through the central parts of the co.,
 leaves much good land. Chief town, Greenville.
 Pop. in 1820, 11,328, and in 1840, 16,076.
 Ctl. lat. 36° N., and lon. W. C. 6° W. ; inter-
 section in this co.—Co. of Ky., bounded by Adair
 SE., Barren SW., Hart W., Hardin NW.,
 and Washington N. ; length 34 ms., mean width
 11, area about 400 sq. ms. ; surface generally
 level, and being drained by Green river and
 its numerous branches, possesses a great proportion
 of good land. Chief town, Greensburg. Pop. in
 1820, 11,943, and in 1840, 13,627. Ctl. lat. see
Greensburg, Greene co., Ky.—Co. of Ohio,
 bounded by Montgomery W. and NW., Clarke
 E., Fayette E., Clinton SE., and Warren SW. ;
 greatest length from E. to W. 26 ms., mean
 width 16, and area 416 sq. ms. ; extending in
 length from 39 34 to 39 51, and in lon. W. C. from
 62 to 7 2 W. The slope of this co. is to the
 S. ; and in that direction the northwestern part
 is traversed by Mad river. Little Miami river
 rising in Madison and Clarke, enters the north-
 western and issues from the southwesternmost part
 of Greene. Cæsar's creek, branch of Little Miami,
 rises in and drains the southeastern angle. Ex-
 cept spring water abounds in this co., the sur-
 face of which is pleasantly diversified. It is

amongst the best farming cos. of the State. Chief
 town, Xenia. Pop. in 1830, 14,801, and in 1840,
 17,528.

Green Creek, village in the southeastern part of
 Sandusky co., Ohio, 8 ms. SE. from Lower San-
 dusky.

Greenfield, town, Franklin co., Mass., on the
 W. bank of Connecticut river, 20 ms. above
 Northampton. The village is the seat of justice for
 the co., and is a prosperous commercial depot.
 Pop. of the tp. in 1820, 1,361.—Village, Hills-
 borough co., N. H., 46 ms. SW. from Concord.
 —Town, Saratoga co., N. Y., 10 ms. N. from
 Balston Spa. Pop. in 1820, 3,024.—Northern
 tp., Bedford co., Penn., principally on the head
 waters of the Frankstown branch of Juniata. Pop.
 in 1820, 1,141.—Village, Erie co., Penn.—
 Village, Nelson co., Va., by post road 114 ms.
 W. from Richmond.—Post office, Fairfield co.,
 Ohio, 5 or 6 ms. NW. of New Lancaster.—
 Western tp. of Gallia co., Ohio.—Village in
 the extreme NE. angle of Highland co., O., 17 ms.
 NW. of Hillsborough, the co. seat, and 21 a little
 N. of W. from Chillicothe. Pop. 500.

Greenford, or *Greenvillage*, village in Green
 tp., northern part of Columbiana co., Ohio,
 20 ms. N. of New Lisbon.

Green Hill, post office, unknown location, Col-
 umbiana co., Ohio.

Greenfield Hill, village, Fairfield co., Ct., 6
 ms. W. from Bridgeport.

Green Garden, post office, Sumner co., Tenn.,
 55 ms. N. from Murfreesborough.

Green Hill, village, Campbell co., Va. ; by
 post road 120 ms. a little S. of W. from Richmond.

Greenland, general name by which are denoted
 the most easterly parts of America, stretching to-
 wards the north pole, and likewise some islands
 to the northward of the continent of Europe, lying
 in very high latitudes. This country is divided
 into East and West Greenland. Greenland was
 for a long time considered as a part of the con-
 tinent of West Greenland, but is now discovered
 to be an assemblage of islands lying between 76 46
 and 80 30 of N. lat., and between 9° and 20° of
 E. lon. It was discovered by Sir Hugh Willough-
 by, in 1553, who called it Greenland, supposing
 it to be a part of the western continent. In 1595,
 it was again visited by William Barentz and John
 Cornelius, two Dutchmen, who pretended to be
 the original discoverers, and called the country
 Spitzbergen, or Sharp Mountains, from the many
 sharp pointed and rocky mountains with which it
 abounds. The only quadrupeds of either East or
 West Greenland are deer, white bears, and foxes.
 To its frozen seas the English and other nations
 repair annually, in the proper season, to fish for
 whales. See *Spitzbergen*.

Greenland, hitherto considered as a part of the
 continent of America, has been determined, by the
 researches of Captain Parry, to be separated from
 that country by a strait, or rather an intricacy of
 straits and islands.—Town, Rockingham co.,
 N. H., on the S. side of Great bay. Pop. 1820,
 634.

Greenlaw, county town of Berwickshire, Eng.,
 on a river that joins the Tweed before it reaches
 Berwick. It is 18 ms. W. by S. of that town.
 Lon. 2 10 W., lat. 55 43 N.

Green Mountains, ridge extending from the Highlands, in N. Y., through Ct., Mass., and Vt., into L. C. In Berkshire co., Mass., a branch leaves the Green mountains, and, stretching S. through Ct., terminates at New Haven. The Green mountains vary in height from 300 to 4,000 feet, with some elevated though highly fertile valleys. Vermont derives its name from this range, the word meaning literally green mountain.

Green Point, in the bay of Quinte, is the north point in Sophiasburg, and lies opposite to John's island, U. C.

Greenock, considerable seaport of Scotland, in Renfrewshire, at the mouth of the Clyde, which here expands into a basin, 4 ms. wide. It is 20 ms. W. of Glasgow. Lon. 4 29 W., lat. 55 54 N.

Green River, post office, Columbia co., N. Y., 30 ms. SE. from Albany.—River of Ky., rises in Lincoln co., and, flowing by a generally western course, through Casey, Adair, Green, Hart, Warren, Grayson, Butler, Ohio, Muhlenburg, Hopkins, Davis, and Henderson cos., falls into Ohio river, after a comparative length of 230 ms. Considerable improvements have been made to facilitate navigation on this river.

Greensborough, town, Orleans co., Vt., on the head of La Moelle river, 30 ms. NNE. from Montpelier.—Town, Caroline co., Md., on a branch of Choptank river, 8 ms. N. of Denton, and 10 ms. E. of Centreville.—Village, Mecklenburg co., Va., about 70 ms. SW. from Richmond.—Village, Guilford co., N. C., 89 ms. NW. from Raleigh.—Village and seat of justice, Green co., Ga., 40 ms. N. from Milledgeville. Lat. 33 34 N., lon. W. C. 6 28 W.—Village, Green co., Ala., 45 ms. NW. from Cahaba.

Greensburgh, tp., West Chester co., N. Y., on Hudson river, 30 ms. above N. Y. Pop. in 1820, 2,064.—Village and seat of justice, Westmoreland co., Pa., 31 ms. E. by S of Pittsburgh, and 264 W. of Philadelphia. Pop. 1820, 770, and in 1840, 800.—Small village, Green co., Pa., on Whitely creek, 18 ms. S. from Brownsville.—Village, Green co., Ky., on the north side of Green river, about 56 ms. SW. of Springfield. In 1840 pop. 585. Lat. 37 20 N., lon. W. C. 8 18 W.

Greensburg, village, Green tp., northern part of Trumbull co., O., 17 ms. N. of Warren, the co. seat, and 19 S. of Jefferson, in Ashtabula co.—Village, Decatur co., Ia., 56 ms. SE. from Indianapolis.

Greensted, village of Eng., in Essex, 1 m. W. of Chipping Ongar.

Greentown, post office, Lake tp., northern part of Stark co., O., 10 ms. N. of Canton, and 20 ms. SSW. of Ravenna.

Greensville, co., Va., bounded by N. C. S., Brunswick W., Dinwiddie NW., Sussex NE., and Southampton E. Length 22, mean width 14 ms.; area about 300 sq. ms. Generally level, and soil of middling quality. Chief town, Hicksford. Pop. 1820, 6,858; in 1840, 6,366.

Greenup, NE. co. of Ky., bounded N. by Ohio, E. by Big Sandy river, S. by Lawrence, W. by Fleming, and NW. by Lewis. Length 43, mean width 14 ms.; area about 590 sq. ms. These limits include what is now Greenup co. Since

1820, the southern part has been erected into Lawrence co., containing 720 sq. ms. Of course when the last census was taken the former co. extended over 1,310 sq. ms. Surface hilly, broken and soil generally of indifferent quality. Chief town, Greenupsburg. Pop. 1820, 4,311, and in 1840, 6,300.

Greenupsburg, village and seat of justice, Greenup co., Ky., on Ohio river, above the mouth of Little Sandy river, and 125 ms. NE. by I from Lexington. Lat. 38 37 N., lon. W. C. 48 W.

Greenville, tp., York co., L. C., on the north side of Ottawa river, 50 ms. from Montreal.—Co. U. C., bounded on the E. by the co. of Dundas, on the S. by the river St. Lawrence, and on the W. by the tp. of Elizabethtown, running N. 24° W., until it intersects the Ottawa or Grand river; thence it descends that river, until it meets the northwesternmost boundary of the co. of Dundas. The co. of Greenville comprehends all the islands near to it, in the river St. Lawrence. It sends one representative to the provincial parliament.—Village, Providence co., R. I., 9 m. from Providence.—Town, Green co., N. Y., on Catskill creek, 16 ms. above Catskill.—Village, Luzerne co., Pa.—Village, Sussex co., N. J., 79 ms. N. of Trenton.—Tp., Somerset co., Pa., on the head branches of Castleman's river, branch of Youghiogany river.—Village, Augusta co., Va., 10 ms. SSW. from Stanton, and 136 m. NW. by W. from Richmond.—Village and seat of justice, Pitt co., N. C., on the left branch of Tar river, 23 ms. above Washington. Lat. 35 35 N., lon. W. C. 0 25 W.—District, S. C., bounded by N. C. NW., Spartansburg E., Laurens SE., and Pendleton SW. Length 4 1/2, mean width 15 ms.; area about 700 sq. ms. Surface mountainous or hilly; soil of the bottom land fertile. Chief town, Greenville. Pop. in 1820, 14,530. Cent. lat. 34 48 N., lon. W. C. 5 2 W.—Town, Greenville district, S. C., on the W. side of the head of Reedy river, 100 ms. above Columbia.—Village, Darlington district, S. C. on Black river, 80 ms. NE. by E. from Columbia.—Town, Green co., Tenn., 60 ms. E. from Knoxville.—Town and seat of justice, Jefferson co., Miss., on Cole's creek, 21 ms. NE. from Natchez.—Town, Muhlenburg co., Ky., on the W. side of Green river, 14 ms. SW. of Hartford.—Village and co. seat, Darke co., O., on the S. side of Greenville, fork of Miami river, 93 m. W. of Columbus, 27 N. of Eaton, and 26 ms. little N. of W. from Troy. N. lat. 40 6, lon. W. C. 7 36 W. Pop. 1830, 160; in 1840, 2,000. It was here that, on August 3, 1795, General Wayne effected the final treaty with the savage which secured the peace and prosperity of the West.

Greenville, Stark co., O. See *East Greenville*.
Greenville, village, Floyd co., Ia., 13 ms. NW. from Louisville in Ky.—Village, Bond co., Ill., 22 ms. W. from Vandalia.—Village, Butler co., Ala., about 70 ms., SE. from Cahaba.—College and post office, Green co., Tenn., near the right bank of Nolichucky river, 75 ms. a little N. of E. from Knoxville.—Court-house and post office, Greenville district, S. C., by post road 110 ms. NW. from Columbia.

Greenville Creek, tributary of the SW. branch of Miami river, running E. past old Fort Greenville. One mile above its mouth and 17 below Greenville, it has a perpendicular fall of 15 feet.

Greenwich, town of Eng., in Kent. It is famous for a magnificent hospital for decayed seamen, and a royal observatory in a delightful park. The hospital is thought to be the finest structure of the kind in the world; the front to the Thames consists of two ranges of stone buildings. These buildings perfectly correspond with each other, and have their tops crowned with a stone balustrade. The observatory was built by Charles II, on the summit of a hill, called Flamstead Hill, from the great astronomer of that name, who was the first astronomer royal. The English compute the longitude from the meridian of this place. Greenwich is seated on the Thames, 5 m. E. of London.—Town, Fairfield co., Conn., on Long Island Sound, about halfway between N. Y. and New Haven. Pop. of the tp., 20, 3,790.—Village, Hampshire co., Mass., 10 ms. from Northampton. Pop. in 1820, 778.—Town, Washington co., N. Y. The village is on Hudson at the mouth of Batterkill, 37 ms. above Albany. Pop. of the tp. in 1820, 3,197.—Village, Cumberland co., N. J., on Cohansy Creek, about 20 ms. SE. of Salem, and 10 SW. of Bridgetown. Pop. in 1820, 890.—Tp., Gloucester co., N. J. Pop. in 1820, 2,699.—Town, Berks co., Penn., on the E. side of Maiden Creek, 8 ms. E. of Hamburg, and 18 NE. of Reading. Pop. in 1820, 1,337.—Village, Charleston district, S. C.—Village, Greenwhich, in the southeastern part of Huron co., O., 18 m. a little E. of S. from Norwalk, the co. seat.

Greenwich, East, village, Kent co., R. I. The site is the seat of justice for the co., and seated on Nassanket bay, 14 ms. S. from Providence. It contains a respectable academy. Pop. in 1820, 1,119; and in 1840, 1,509.

Greenwich, West, tp., Kent co., R. I., on the Muxet river. Pop. in 1820, 1,927; in 1840, 1,115.

Greenwich Village, a suburb of the northern part of the city of N. Y.

Greenwood, tp., Oxford co., Me., 5 ms. NW. from Paris. Pop. 1820, 509.—Tp., Mifflin co., Penn., on the W. side of Susquehanna, and the N. of Juniata; being an angle formed by two rivers. Pop. in 1820, 1,800.—NE. of Perry co., Penn., between the Susquehanna and Juniata.—Village, Columbia co., Penn.—Tp., Columbia co., Penn., between Madison and Sugar Loaf, 12 ms. NNE. from Danville.

Greensburg, village, Beaver co., Penn., 15 ms. W. from Beaver.

Gregory, Cape, of the U. S., on the Pacific Ocean. Lat. 43 23 N.

Gregstown, village, Somerset co., N. J., on the Raritan river, 6 ms. NE. from Princeton.

Grenada, New.—See *Columbia* and *New Granada*.

Grenada, island in the W. Indies, the last of the Windward Caribbees, and 30 leagues NW. of Tobago. It is 20 ms. long and 13 broad, very wooded, and the soil suited to produce sugar, tobacco, and indigo. Central lat. 12 10 N. Lon. W. C. 15 20 E. St. George is the

capital.—City of Central America, in the province of Nicaragua. The inhabitants carry on a great trade by means of the Lake Nicaragua, on which it is seated, 60 ms. SE. of Leon de Nicaragua. Lon. 86 36 W., lat. 12 5 N.

Grenade, town of Fr., in the dep. of Upper Garonne, 17 ms. NW. of Toulouse.

Grenadillas, or *Grenadines*, group of small islands between Granada St. Vincent.

Grenoble, city of Fr., capital of the dep. of Isere. The leather and gloves that are made here are highly esteemed. It is seated on the Isere, over which are two bridges to pass into that part called Perriere, a large street on the side of the river. It is 27 ms. S. of Chambery. Lon. 5 44 E., lat. 45 12 N.

Greenville, point of the U. S. on the Pacific ocean. Lat. 47 50 N.

Greenville's Canal, channel on the Pacific coast of S. America. Lat. 56 30 N.

Greysville, village, Huntingdon co., Penn.

Griersons, Beaver co., Pa.—See *Greensburg*.

Griffinhagan, town of Pomerania, in the duchy of Stetin, on the Oder, opposite Gartz. Lon. 14 42 E., lat. 53 25 N.

Grieffsburg, village, Culpeper co., Va., 90 ms. SW. from W. C. and 100 a little W. of N. from Richmond.

Griffin's Hollow, post office, Anson co.

Griffin's Mills, Erie co., N. Y.

Grimburgan, town of the kingdom of the Netherlands in Brabant, 6 ms. N. of Brussels. Lon. 4 27 E., lat. 50 57 N.

Grimm, town in the electorate of Saxony, on the Muldaw, 10 ms. SE. of Leipsick. Lon. 12 35 E., lat. 51 15 N.

Grimmen, town of Pomerania, 5 ms. S. of Stralsund. Lon. 13 27 E., lat. 54 12 N.

Grimperg, town in the electorate of Treves, 17 ms. SE. of Treves. Lon. 6 59 E., lat. 49 35 N.

Grimby Great, seaport and borough of Eng. in Lincolnshire, 35 ms. NE. from Lincoln.

Grimby, tp., Lincoln co., U. C., on Lake Ontario, W. from Niagara.

Grindstone Ford, village, Claiborne co., Miss., on Bayou Pierre.

Grinstead East, borough of Eng. in Sussex, 20 ms. N. of Lewes and 29 S. of London. Lon. 0 2 E., lat. 51 12 N.

Gripswald, strong town of Pomerania, formerly imperial, with a good harbor and a university. It is seated near the Baltic sea, 15 ms. SE. of Stralsund, and 55 NW. of Stetin. Lon. 13 44 E., lat. 54 4 N.

Grisons, people inhabiting the Alps, and in alliance with Switzerland. They are divided into three parts called the Leagues, which form one republic; namely, the Grey League; the League of the House of God; and that of the Ten Jurisdictions. Throughout the three Leagues the Roman law prevails, modified by the municipal customs. Though no material change has taken place in regard to the interior government of the Grisons, the territory now forms an independent Canton of the Swiss Confederation.—See art. *Switzerland*. The Grisons' country give rise to the extreme fountains of the Rhine and Inn. Chief town, Coire, or Chur.

Grissell's, post office, Columbiana co., O., by post road 176 ms. NE. from Columbus.

Griswold, tp., of N. London co., Conn., on the Thames river, E. side, 8 ms. below Norwich. Pop. in 1820, 1,869.

Grodno, pretty large city of Lithuania, and capital of the government of Grodno, in Russian Poland, and next to Wilna, the best in that duchy. It is situated on the river Niemen, partly on a plain, and partly on a mountain. Grodno is 125 ms. NE. of Warsaw. Lon. 24 15 E., lat. 53 28 N.

Grondines, seigniory, Hampshire co., I. C., on the left side of the St. Lawrence river, 45 ms. above Quebec.

Groll, town of the kingdom of Holland, in Guelderland, and in the co. of Zutland. It is seated on the Slinghe, 15 ms. SE. of Zutphen.

Groningen, populous city of the kingdom of Holland, capital of a lordship of the same name, with a university. It is seated on the rivers Hunes and Aa, at 10 ms. distance from the sea, with which it has a communication by a canal. It is 85 ms. NE. of Amsterdam. Lon. 6 31 E., lat. 53 13 N.—Province of the kingdom of Holland, bounded on the E. by East Friesland, on the W. by Friesland, on the N. by the German ocean, and on the S. by Overysse. It is divided into two parts, of which the town of Groningen and its district are one, and the Omerlands the other.

Grosbois, or *Yamachiche*, seigniory, St. Maurice co., L. C., on the N. side of Lake St. Peter's, 14 ms. W. from Three Rivers.

Gros Isle, island of the State of Michigan, in Detroit river, near its discharge into Lake Erie.

Grossa, island of Dalmatia, in the gulf of Venice, near the coast of the county of Zara. It is 50 ms. in circumference, and belongs to the Venetians.

Grossetto, town of Tuscany, near the sea, 30 ms. SW. of Sienna. Lon. 11 1 E., lat. 42 40 N.

Groton, village and tp., Grafton county, N. H., 15 miles NE. from Dartmouth College. Pop. in 1820, 688.—Tp., Caledonia co., Vt., 18 miles E. from Montpelier. Pop. 500.—Town, Middlesex co., Mass., 35 ms. NW. of Boston. Pop. in 1820, 1,897.—Town, New London county, Conn., on the E. side of the river Thames, nearly opposite to New London. Pop. in 1820, 4,664.—Town in the NE. angle of Tompkins co., N. Y., 15 ms. NE. from Ithaca.—Tp., Huron co., Ohio.

Grotskaw, town of Silesia, capital of a province of the same name, 30 miles NE. of Glatz. Lon. 17 25 E., lat. 50 37 N.—Town of Servia, where the Turks defeated the Germans in 1739. Lon. 21 10 E., lat. 45 10 N.

Grove Hill, village, Warren co., N. C., 75 ms. NNE. from Raleigh.

Groveland, village, Livingston co., N. Y., on Genesee river, 30 miles SW. from Canandaigua. Pop. in 1820, 1,273.

Grove point, N. point, the discharge of Sassafras river into Chesapeake bay, Cecil co., Md.

Groyne, river of Spain, in Galicia, which enters the bay of Biscay at Corunna.

Grubenhagen, town and castle of Lower Saxony, and the chief place of a principality of the same name, belonging to the house of Hanover. In the mountains near it are mines of silver, iron, copper,

and lead. It is 45 ms. S. of Hanover. Lon. 3 E., lat. 51 31 N.

Gruchfeldt, town of Carinthia, with a castle on the river Save. Lon. 15 45 E., lat. 46 7 N.

Grunberg, town of Germany, in Upper Hesse. Here Charlemagne and the kings of the Merovingian race held their court.—Town of Silesia, the principality of Glogau. It is surrounded with vineyards, and has a manufacture of cloth.

Grunde, town of Germany, in the duchy of Brunswick, and in the mountain of Hartz. Lon. 13 35 E., lat. 52 10 N.

Gruningen, town of Lower Saxony, in the principality of Halberstadt, on the river Felke. Lon. 11 41 E., lat. 52 4 N.—Town of Switzerland in the canton of Zurich, capital of a bailiwick of the same name. Lon. 8 43 E., lat. 47 14 N.

Gruyires, town of Switzerland, in the canton of Friburg. It is famous for cheese, and is 15 mi. SW. of Friburg. Lon. 6 43 E., lat. 46 35 N.

Guacockingo, town of Mexico, 30 miles SE. Mexico. Lon. 99 45 W., lat. 19 36 N.

Guadalaviar, ancient *Durias*, river of Spain, rises in the province of Arragon, and flowing S. comparative course 80 miles, turns SE. about 1 mile, and falls into the Mediterranean below the city of Valencia.

Guadalaxara, formerly an intendency of N. Spain, now the State of Jalisco, in the Mexican Republic.—See *Jalisco*.—City of and capital of the State of Jalisco, in the Republic of Mexico, situated on the left bank of the St. Jago or Santiago river, 350 miles NW. from the city of Mexico. Pop. in 1825, 26,000. Lat. 21 1 N., lon. W. 25 59 W.—Town of Spain, in New Castile, seated on the Henares, 30 ms. NE. from Madrid. Lon. 2 47 W., lat. 40 36 N.

Guadaxara, province of Spain, bounded S. by Toledo and SE. by Cuenca. It is drained variously branches of the Tagus.

Gaudaloupe, handsome town of Spain, in the island of St. Martin, on a rivulet of the same name, 34 mi. E. by N. of Truxillo. Lon. 4 45 W., lat. 39 N.—One of the leeward Caribbee islands in the West Indies, between Antigua and Dominica, lon. 62° W. and lat. 16 20 N. The island, which is of an irregular figure, may be about 80 leagues in circumference. It is divided into two parts, a small arm of the sea, which is not above 1 league, and from 15 to 40 fathoms broad. The canal, known by the name of Salt river, is navigable, but will only carry vessels of 50 tons burr. The soil is exceedingly good, and well watered near the sea by rivulets, which fall from the mountains. The French settled in this island in 1635, in whose possession it still remains. Basseterre is the capital.—River of the empire of Mexico, Texas, falls into the gulf Mexico after a course of about 200 ms. Its mouth is 180 ms. W. from that of the Sabine.

Guadalquivir, river of Spain, which rises in the S. part of New Castile, flows through Andalus, and falls into the bay of Cadiz at the town of San Lucar after a comparative course of 350 ms. It is the fifth in size and the most navigable river of the Spanish peninsula. The basin of the Guadalquivir is also the most fertile region in Spain. The cities of Audujar, Cordova, and Seville, are upon its banks.

Guadarama, town of Spain, in Old Castile, remarkable for its great trade in cheese. It is seated in the Guadaram, 25 ms. NW. of Madrid. Lon. 48 W., lat. 41 45 N.

Guadiana, river of Spain, which, having its source in New Castile, crosses Estramadura into Portugal, and, separating Algarva from Andalusia, falls into the bay of Cadiz between Ayamonte and San Pedro Martir, 85 ms. NW. of Cadiz, after an extensive comparative course of 400 miles.

Guadix, town of Spain, in Granada, with a population of 30 ms. E. of Granada. Lon. 2 47 W., lat. 37 4 N.

Guilas, or *Huilas*, province of Peru, N. from Matucana. Central lat. 9° S., nearly due S. from Matucana.

Guaria, La, city of Caraccas. It is the port of the city of Caraccas; is well fortified. The harbor is good and much frequented; 7 ms. N. from Caraccas. Lon. W. C. 9 58 E., lat. 10 48 N.

Gualior, celebrated fortress of Hindoostan, in session of the Mahrattas.—See *Gualior*.

Gualaga, river of Peru, heads with the Caxamarca, flows a little E. of N. between Caxamarca and Grand Para, and falls into the Tunguragua after a comparative course of 400 ms. from lat. 8 to 4 50 S.

Gualdo, town of Italy, in Ancona, 8 ms. NW. of Nocera. Lon. 12 43 E., lat. 43 6 N.

Guam, chief of the Ladrone islands, in the Pacific ocean, 100 miles in circumference. It depends upon the Spaniards, who have a garrison there, but the inhabitants are almost all natives of the country, and reputed to be very skilful in building boats. It abounds with excellent fruit, and the air is wholesome; notwithstanding which the natives are subject to a kind of leprosy. Lon. 15 15 E., lat. 13 5 N.

Guamanga, town of Peru, capital of a province of the same name. It is remarkable for mines of gold, silver, loadstone, and quicksilver. It is 200 miles SE. from Lima. Lon. W. C. 2 45 E., lat. 20 S.

Guanhani, or *Cat Island*, one of the Bahama islands, the first land of America discovered by Columbus in 1492, and named by him St. Salvator. Lon. W. C. 1 30 E., lat. 24 20 N.

Guanapu, small river of the province of Grand Para, falls into the estuary of the Amazon from the south.

Guanare, town of Colombia, in Venezuela, near the borders of Varinas, on Guanare river. Lon. W. C. 7 50 E., lat. 8 25 N. It is 200 ms. SW. from Caraccas and 60 NE. from Truxillo.

Guanaxuato, State of the Republic of Mexico, bounded by Jalisco W., by Xacatecas and San Luis Potosi N., by Queretaro E., and by Mechoacan S.; length and breadth nearly equal, each about 80 miles; 6,255 sq. miles of area. Pop. in 1763, 813,150, lying between 20 30 and 21 10 N. This fine though small and elevated State is entirely on the table land of Anahuac, and is the most populous region of Spanish America. The mountain of Ilanitos, in Guanaxuato, rises to 9,235 feet above the level of the sea, and the whole State lies above it, it is probable, 5,000 feet.

The mine of Valenciana, near the city of Guanaxuato, is the most productive ever yet discovered, exceeding those near Potosi. The products of the

State are, however, considerable in objects of agricultural and manufacturing industry. Guanaxuato contains five cities—Guanaxuato, Salamanca, Celaya or Silao, Leon, and San Miguel el Grand.

Guanaxuato, capital of the preceding State, stands 170 miles NW. from the city of Mexico. Lon. W. C. 23 50 W., lat. 21° N. This city was begun by the Spaniards in 1554; it was raised to the rank of Villa in 1719, and to that of Ciudad in 1641. Population of the city and adjoining mines 90,000. The principal mines are Marsil, Santa Anna, Santa Rosa, Valenciana, Rayas, and Mellado. The ground on which Guanaxuato is built, is above the level of the sea 6,836 feet; Valenciana, at the mouth of the new pit, 7,586 feet; and Rayas, at the mouth of the main gallery, 7,075 feet.

Guanavelica, city of Peru, remarkable for its abundant mines of quicksilver, 140 ms. SE. from Lima. Lon. W. C. 2 51 E., lat. 12 56 N.

Guanhuaco, town of Peru, on the Pacific ocean. It is the port of Truxillo. Lon. W. C. 1 58 W., lat. 8 5 S.

Guanta, province of Peru, on the branches of the Apurimac, lying N. from Guamanga. Ctl. lat. 13° S.

Guardafui, cape of the extreme eastern angle of Africa. Lat. 11 46 N., lon. 51 15 E., 500 ms. E. from the straits of Babel-Mandeb.

Guardarville, seigniory, Hampshire co. L. C., on the N. side of the St Lawrence, 5 ms. above Quebec.

Guardia, or *Guarda*, town of Portugal, in Beira, 138 ms. E. of Lisbon. Lon. 6 37 W., lat. 40 22 N.

Guardia-Alferez, town of Naples, in the Molise, 7 ms. NW. of Larino. Lon. 14 56 E., lat. 41 39 N.

Guarico, cape of Cuba, on the NE. coast. Lon. W. C. 2 38 E., lat. 20 30 N.

Guarochiri, town of Peru. Lon. W. C. 42' E., lat. 11 55 S. It stands 60 ms. NE. from Lima.

Guasco, or *Huasco*, town and seaport of Chili. Lon. W. C. 52' E., lat. 28 29 S.

Guarma, seaport of Peru, 120 ms. NW. from Lima. Lon. 77 49 W., lat. 10 10 S.

Guastalla, town of Italy, in the Mantuan, near the river Po, 15 ms. N. of Reggio. Lon. 10 38 E., lat. 44 56 N.

Guasto, or *Vasto*, town of Naples, in Abruzzo Citereore, on the gulf of Venice, 15 ms. SE. of Lanciano. Lon. 15 6 E., lat. 42 14 N.

Guatemala, New, capital of Central America, and province of Guatemala, with a university. It is situated 25 ms. S. from the site of the former town of that name, which was destroyed June 7, 1773, by a dreadful earthquake, attended by an eruption from the neighboring volcano. New Guatemala is 650 ms. SE. from Mexico. Lon. W. C. 14 10 W., lat. 14 28 N. It is, according to Mr. Stephens, situated on a table land 5,000 feet above the sea. The climate is that of perpetual spring; "and the general aspect," says that traveller, "reminded me of the best class of the Italian cities."

Guatemala, now Central America, bounded by the Pacific ocean SW., Mexico NW., Yucatan, bay of Honduras, and Caribbean sea NE., and by Veragua, in Colombia, SE.; length from NW. to

SE. 1,000 ms. The settled parts are chiefly along the Pacific ocean, and average about 100 ms. in width. The whole of Central America is subdivided into the provinces of Chiapa, Vera Paz, Guatemala, Honduras, Nicaragua, and Costa Rica. The country is excessively mountainous, and volcanoes are numerous, of which about 20 are active. The soil is in general exuberantly fertile. Staples, grain, wax, honey, cochineal, cotton, wool, and particularly the finest indigo made in America. Pop. about 2,000,000.—NW. province of Central America, lies along the Pacific ocean, extending from the intendency of Oaxaca, in Mexico, to the province of Nicaragua, and having Chiapa and Vera Paz NE. It is about 400 ms. long and 50 mean width.

Guaquil, province of Colombia, in New Grenada, lying along the Pacific ocean, on the Guaquil river, and N. side of the gulf of the same name. Pop. about 90,000. Staples, cacao, cotton, tobacco, salt, wax, rice, and honey.—Bay or gulf, extending from Cape St. Helena to Ponta de Picos, upwards of 100 ms., and extending inland in form of a triangle, receiving at its head Guaquil river. The gulf is chequered by numerous islands, one of which, Puna, is of considerable size.—City of Colombia, and capital of the province of the same name, on the W. side of the Guaquil river. It possesses an excellent port. Ship timber abounds in the vicinity, from which many vessels have been built. It is 150 ms. SSW. from Quito. Lon. W. C. 2 50 W., lat. 2 11 S.

Guaquil River, rises in the province of Quito, flows S. 150 ms., and falls into the Guaquil bay below the city of the same name. It is an uncommonly large stream for its length.

Guara, town and seaport of Peru, province of Chancay. Lon. W. C. 1° W., lat. 11 6 S.

Guasacualco, river of Mexico, is a short but important stream, falling into the gulf of Mexico at its extreme southern extension. It rises in Oaxaca, interlocking sources with those of Chimalapa. This is one of the channels of communication mentioned by Humboldt as suitable to unite the Atlantic and Pacific oceans. From the mouths of these two rivers is a distance of about 120 ms.

Guaivari, river of Colombia, in Cundinamarca, rises in the Andes, and flowing SE. by E. 500 ms., falls into the Orinoco. Lon. W. C. 9° E., lat. 4° N.

Guaxaca.—See *Oaxaca*.

Guayquil.—See *Guaquil*.

Guben, town of Germany, in Lower Lusatia, seated on the Neisse, 62 ms. NE. of Dresden. Lon. 14 39 E., lat. 51 58 N.

Gubio, or *Eugubia*, town of Italy, in the duchy of Urbino, with a bishop's see, 82 ms. N. of Rome. Lon. 12 38 E., lat. 43 16 N.

GUELFs, a powerful German house, which possessed large domains in Bavaria and adjacent provinces, and whose princes were known by the name or title Guelfs, or Wolf, hence Guelfs, who rose in opposition to Conrad, the Salique, and became the Papal faction against the German emperors, and against the Gibelins.—See *Giblins*. The name or title Guelf, from the best evidence, came from Guelfo I, brother of Henry II., duke of Bavaria, who, being despoiled of part of his territories by the emperor Conrad, commenced

the faction of the Guelfs, who espoused the Papal cause against the emperors. Sismondi, from an original German chronicle, states that these names commenced to be given as the cries of war after the battle of Winsberg, between Conrad III and Guelfo, December 21st, 1140.

Guellderland, province of the kingdom of Holland, on both banks of the Lower Rhine, bounded by Germany SE., duchy of Cleves and Brabant S., Utrecht W., Zuyder Zee NW., and Overysse NE. The Rhine in this province branches into two streams, or rather three, if we include the Waal; it is therefore subject to violent inundations, which frequently carry ruin and desolation before them. The 52° of N. lat. intersects it near the middle. Chief towns, Nimeguen, Doesburg, and Zutphen. The king of Prussia holds a part of eastern Guellderland.

Guedres, town of the kingdom of the Netherlands, in the territory of the same name. It is ms. NE. of Velno. Lon. 6° E., lat. 51 26 N.

Guarande, town of Fr., in the dep. of Loire, and late province of Bretagne. It carries on a considerable trade in white salt, and is 3 m from the Atlantic, and 250 W. of Paris. Lon. 20 W., lat. 47 10 N.

Gueret, town of Fr., in the dep. of Creuse, a late province of Marche, seated on the Gartamp 35 ms. NE. of Limoges, and 170 S. of Paris. Lon. 1 56 E., lat. 46 10 N.

Guernsey, island on the coast of Normandy subject to Great Britain, but governed by its own laws. It is naturally strong, being surrounded by high rocks, and of a round form, 30 ms. in circumference. The natives speak French, it has been a part of Normandy. Lon. 2 37 W., lat. 49 32 N.—Co., Ohio, bounded on the N. by Tuscarawas, E. by Belmont, S. by Monroe and Morgan, and W. by Muskingum, and NW. by Chocomacon. It is nearly 26 ms. sq., and contains 676 sq. ms. The land is generally hilly and of a moderately good quality; although there are several tracts of excellent land along Well creek, which stream and its branches compose the principal waters. The northward passes through the co., from E. to W., dividing it into two very unequal sections. Chief town, Cambridge. Pop. in 1820, 9,292; in 1830, 18,036; in 1840, 27,748. Ctl. lat. 40 5 N., lon. W. C. 4 30 W.

Gueta, town of Spain, in New Castile, 60 m E. of Madrid. Lon. 1 56 W., lat. 40 22 N.

Guevetlam, city of Guatemala.—See *Soconusco*.

Guiana, large country of S. America, is bounded on the E. and N. by the Atlantic ocean; on other sides its limits are rather indefinite. The term is indeed used vulgarly for the country between Venezuela and Brazil. The British, Dutch, French, Spanish, and Portuguese nations, have settlements in Guiana. British Guiana reaches from the Essequibo to the Corantyn river; Dutch Guiana, from the Cerantyn to the Marou; French Guiana, from the Marou to the Aruay; Portuguese Guiana, from the Aruay to the Amazon; Spanish Guiana is now included in Venezuela. The settlements of the civilized nations are confined to the coast, or to the banks of some of the larger rivers, at a very limited distance inland. Dutch Guiana is more particularly known by the name of Surinam, and that appertaining

France as Cayenne. The principal British settlements are Essequibo and Demerara. The population of the European colonies amounts to about 20,000; of which those of Spain have 30,000; British 100,000, Dutch 80,000, French 20,000. The body of the inhabitants are negro slaves; the whites, in all the settlements, not being computed above 20,000. The seacoast of Guiana is one of the plain of unequalled fertility. Staples—sugar, rice, and cotton.

Guienne, ancient province of Fr., now parcelled into the depts. of Gironde, Lot and Garonne, Gers, Lot, and Aveyron.

Guiaquil, commercial city of Peru, capital of the jurisdiction of the same name. It stands partly on the side and partly at the foot of a hill, which ascends gently towards the river Guiaquil, on which the town stands. It is large and populous, and is 140 ms. N. by E. of Paita. Lon. 81 11 W., lat. 2 11 S.—See *Guaquil*.

Guira, seaport of Terra Firma, on the coast of Guiana. Lon. 66 5 W., lat. 10 35 N.

Guilderland, town, Albany co., N. Y., WNW. of Albany. Pop. in 1820, 2,270.

Guildhall, village and seat of justice, Essex co., Vt., on Connecticut river opposite Lancaster. Pop. in 1820, 600.

Guilford, borough of Eng., and capital of Surrey on the Wey. The Wey is navigable to the Thames, and much timber and corn are carried on it. It is a well built town, 23 ms. WSW. of Croydon, and 30 SW. of London. Lon. 0 15 W., lat. 51 15 N.—Town, Penobscot co., Me., 145 ms. NE. from Portland.—Tp., Somerset co., Me., 40 ms. NE. from Norridge.

Guilford, town, N. H., on Winnipiseogee river, 28 ms. N. from Concord.—Town, Windham co., Vt., 50 ms. S. from Windsor. Pop. 2,000.—Town, New Haven co., Conn., 18 ms. E. by S. of New Haven, on Long Island sound. Pop. in 1820, 4,131.—Village between Unadilla and Chenango rivers, Chenango co., N. Y., 10 ms. E. from Norwich.—Tp., Franklin co., Penn., including the borough of Chambersburg. Pop. 10, 2,421.—Co., N. C., bounded by Randolph S., Rowan and Stokes W., Rockingham N., and Orange E. Length 26 ms; width 25; area 650 sq. ms. Surface hilly, and soil productive. Chief town, Martinsville. Pop. in 1820, 14,511. Cent. lat. 36 5 N., lon. W. C. 3 50 W.—Court house and post office, Guilford co., N. C. 48 ms. W. from Hillsborough, the scene of a hard fought battle between the Americans under General Greene, and the British under Lord Cornwallis, on March 15, 1781.—Tp., in the southern part of Medina co., O.—See *Seville*.

Guilford Village, village, Strafford co., N. H., 10 ms. a little E. of N. from Concord.

Guillaia, St., town of the kingdom of the Netherlands, in Hainault, seated in marshy land, on the river Haisne, 6 ms. W. of Mons. Lon. 3 3 E., lat. 50 27 N.

Guillandiere, fief, Surry co., L. C., on the right bank of St. Lawrence, 16 ms. below Montreal.

Guillaume, Bonhomme seigniory, Hampshire co., L. C., on Jaques Cartier river, and in the township of Demaure, or St. Augustin, 12 ms. NW. of Quebec.

Guillestree, town and castle in the Alps, once belonging to Dauphiny, in France, 9 ms. NE. from Embrum. Lon. 6 36 E., lat. 44 41 N.

Guimaraens, considerable town of Portugal, in the province of Entra-Douero-Minho. The public buildings are magnificent. It is 165 ms. NE. of Lisbon. Lon. 8 21 W., lat. 41 35 N.

Guinea, large region of Africa.—See *Africa*, p. 23, &c.

Guinea, New, or *Papua*, island of the S. Pacific ocean, to the N. of New Holland, from which it is separated by Torres strait. It is next in size to New Holland. It has a length more than 1,200 ms., by a medial breadth of perhaps 300; but the coasts of the eastern part are far from being completely investigated. The northern part is said to have been discovered by the Spaniards, in 1528, who had sailed from Mexico, to explore the Spice Islands. The coasts are generally lofty, and in the interior mountain rises above mountain; but the whole appears covered with luxuriance of wood and herbage. The cocoa, sago, bread-fruit, and plantain-tree, beside most of the trees, shrubs, and plants common to the islands in the S. Pacific ocean, are found here in great perfection. This island is the chosen residence of the singular birds of Paradise, which breed here during the wet monsoon, and in the dry migrate in flocks westward, to the smaller islands, particularly Arroo. The inhabitants make much the same appearance as the New Hollanders. New Guinea lies between the equator and 9 45 S. lat., and in lon. between 130 30 and 148 E. from London. This is one of the great habitable surfaces of the earth, of which civilized man does not even know but partially the outline:

Guincamp, town of Fr., in the dep. of the North Coast, and late province of Bretagne, seated on the Trieu, 13 ms. S. of Treguier. Lon. 3 8 W., lat. 48 36 N.

Guipuscoa, NE. division of the province of Biscay, bounded on the N. by the bay of that name, on the E. by Navarre, on the W. by Biscay proper, and on the S. by Alava. Tolosa is the capital.

Guise, small town of Fr., now in the dep. of Aisne, lately in the province of Picardy, 25 ms. E. of St. Quintin, and 95 NE. of Paris. Lon. 3 42 E., lat. 49 54 N.

Guito, town of Italy, in the Mantuan, seated on the river Mincio, between the lake of Mantua and that of Garda, 15 ms. NW. of Mantua. Lon. 10 40 E., lat. 45 16 N.

Gujerat, often written *Guzerat*, though improperly, as the pronunciation ought to be Goodgerat, peninsula of Hindoostan, having the gulf of Cutch to the N.; the eastern part of the province of Gujerat to the NE.; the gulf of Camberry SE. and S.; and the Indian ocean on all other sides. The peninsula of Gujerat approaches towards a square of about 150 ms. each side, or 22,500 sq. ms. in area. It is also remarkable that the brief rivers of this peninsula flow as from a common centre. For other particulars, see next article.

Gujerat, extensive province or district of Hindoostan, including the peninsula of the same name, and a part of the adjacent country, but like most other sections of Hindoostan, has vague interior limits. It may be considered as generally extend-

ing from N. lat. 21° to 24°, and as bounded N. by Adjemere; E. by Malwah and Kandeish; SE. by Arungabad, and on the W. by parts of Sinde, Cutch, and the Indian ocean. Peninsular Gujerat is indented with small bays, receiving rivers of no great length, but the other parts of the province are watered by some fine streams, as the Topty, Nerbuddah, Mahy, Mehindry, and Sabermatty. The soil and inhabitants of Gujerat are alike various. The soil in parts exuberantly fertile, in others, absolutely desert, with all the intermediate qualities. Among the castes of people, may be named Parsees, Bhattas, Charons, Borahs, Brahmins, Ban-yans, &c.

Gulf Mills, post office, Montgomery co., Penn.

Gulf Stream.—See *Earth*.

Gull Islands, two small islands at the eastern extremity of Long Island Sound, and between Plum and Fisher's islands. On Little Gull island there is a light-house.

Gumbinnen, government of E. or Polish Prussia, E. from Koningsberg. Pop. 350,000.—Town of E. Prussia, and capital of the government of Gumbinnen, 80 ms. E. from Koningsberg.

Gum Springs, village, Orange co., Va., on the S. side of Rapid Ann river, 40 ms. above Fredericksburg.

Gumurginia, town of Romania, on the road from Salonica to Constantinople, and 200 ms. W. from the latter.

Gundava.—See *Cutch Gundava*.

Gunpowder, river of Md., which rises in York co., Pa., and, running in a SE. direction through Baltimore co., falls into Chesapeake bay opposite Poole island.

Guntoor, one of the northern Circars, in the peninsula of Hindoostan. It is also called Mortinazgur and Condavir, and occupies the space between Condapilly, the southmost of the four English Circars, and the N. part of the Carnatic, extending along the seacoast of the bay of Bengal more than 30 ms. The maritime parts of this circar are flat and open, but the interior parts contain some very strong fortresses and posts. It was subject to the nizam of the Deccan, but has been ceded to the English.

Guntzberg, town of Suabia, in the margravate of Burgaw, with a castle, seated on the Danube, 16 ms. NE. of Ulm. Lon. 10 25 E., lat. 48 35 North.

Guntzenhausen, town of Franconia, 5 ms. from Weisseberg. It is seated on the Altmul, near a forest, and subject to the king of Prussia.

Gurk, town of Carinthia, on the river Gurk, 55 ms. E. of Saltzburg. Lon. 14 18 E., lat. 47 12 North.

Guriev, or *Gurieff*, town and province of Russia, on the northern shore of the Caspian sea, and on one of the mouths of the Ural or Jaik river. N. lat. 47°, lon. E. of London 51 10, and 200 ms: a little N. of E. from Astrachan.

Gustavus, tp., Trumbull co., Ohio. The post office is of the same name, and 20 ms. NNE. of Warren, the co. seat.

Gustrow, city of Germany, in the duchy of Mecklenberg Schwerin, and capital of the circle of Wenden. The chief courts of judicature for the duchy are held here. It is 35 ms. NE. of Schwerin. Lon. 12 13 E., lat. 53 57 N.

Gutta, town of Hungary, seated on the E. side of the Danube, opposite the island of Schut, 29 E. by S. of Presburg. Lon. 17 47 E., lat. 48 North.

Gutskow, town of Pomerania, capital of a of the same name, on the Peene, 14 ms. W. Wolgast. Lon. 13 39 E., lat. 54° N.

Guyandot, Big, river of Va., rises in Giles & Tazewell cos., and, flowing NW. between branches of Big Sandy and Great Kanawha, enters Cabell co., turns N., and falls into Ohio river, to an entire comparative course of 100 ms.

Guyandot, Little, creek of Va., between Guyandot and Great Kanawha, forms part of boundary between Cabell and Mason cos.

Guyandot, creek, Lawrence co., Ohio, enters Ohio river nearly opposite to Big Guyandot.—Post office on the Ohio river, Cabell co., Va., post road 375 ms. W. from Richmond, and 4 SW. by W. from W. C.

Guyandot Falls, post office, Cabell co., Va. by post road 382 ms. W. from Richmond.

Guzelizar, ancient Magnesia, town of Asia Turkey, on the Sarabat, ancient Hermus river about 70 ms. NE. from Smyrna. Lon. 27 50 lat. 37 45 N.—See *Gujerat*.

Gwalior, ancient fortress of Hindoostan proper in the province of Gohud, and on a branch of the Jumna. It stands on a vast rock, about 4 ms. length, but narrow, and of unequal breadth, and nearly flat on the top. The sides are so steep to appear almost perpendicular in every part, where it was not naturally so it has been scraped away, and the height, from the plain below is from 200 to 300 feet. This place is considered as Gibraltar of the E.; but in 1780 Major Popham took it, by an unexpected nocturnal escalade. It is 80 ms. S. of Agra. Lon. 78 30 E., lat. 20 North.

Gwinnet, co. of Ga., bounded SW. by the country of the Lower Creeks, W. by the Chatahoochee river, N. by the Chattoochee river, N. by Hall and Walton cos., and SE. by Newton and Henry. Length 35 ms., mean width 26 area 980 sq. ms. Chief town, Lawrenceville. Pop. 1820, 4,589, and in 1840, 10,804. Cent. lat. 33 45, lon. W. C. 7 45 W.

Gynedd, tp., Montgomery co., Pa., on the heads of the Towamensing and Wissahickon creeks, 18 ms. NNW. from Philadelphia. Pop. 1850, 1,589.

H.

Huag, or *Hag*, town of Bavaria, seated on a hill, on the river Inn, 30 ms. E. of Munich. Lon. 12 15 E., lat. 48 18 N.

Habersham, NE. co. of Ga., bounded by C. N., S. C. NE., Franklin and Jackson S. Hall S., and Rabun W.; length 60 ms., mean width 20, area 1,200 sq. ms. Surface generally hilly, and part mountainous. Pop. 1820, 3,1 and in 1840, 7,961. Lat. 34 40 N. and lon. W. C. 7° intersect in this co.

Habesh. "Travellers, both ancient and modern agree in comprehending all the African coast from Egypt to the straits of Babel Mandeb, under the general name of Troglodytica, called a

Ax, Habesh, or New Arabia. There is nothing to prevent us from adopting that interesting division. We have found that neither Nubia nor Abyssinia have any fixed limits; and an Arabian geographer of great weight, Abulfeda, makes a local distinction between the Nile valley, or Nubia and the maritime parts." The nature of the soil and climate of Habesh has in all ages kept the inhabitants in a state of savage barbarism and wretchedness. The hollows of the rocks were, and still are, their ordinary dwellings. Troglodytes, the Greek term for such dwellings, was derived the term *Troglodytes*, "dwellers in caverns." Such rude modes of shelter have been used in many other countries, but the people along the western side of the Arabian gulf are still, in all former ages, Troglodytes. If we include Habesh all the space from Egypt to the straits of Bab el Mandeb, it will exceed a length of 1,500 miles; depth inland uncertain.

Abolichetto, village, Hancock co., Miss., about 75 ms. NE. from New Orleans.

Hacha, small river of Colombia, in Santa Marta.——Town of Colombia, in Santa Marta, on the Caribbean sea, at the mouth of Hacha river. L. W. C. 4 8 E., lat. 11 31 N.

Hacketstown, town, Warren co., N. J., 12 ms. E. from the river Delaware, and 22 W. from Morristown.

Hackensack, village and seat of justice, Bergen co., N. J., and is distant from the city of New York about 15 ms. NW. Pop. 1840, 2,431.——River, N. J., which rises in Rockland co., N. Y., and running a southern course through Bergen falls into Newark bay, near mid distance from New York to Newark.

Hackney, populous village of Eng., to the NE. of London, the first that was accommodated with inns for occasional passengers; from hence Hackney coaches of London derive their name.

Hadamar, town of Germany, in Weteravia, on the Elss, 22 ms. NW. of Mentz. Lon. 8° E. lat. 50 23 N.

Haddam, town, Middlesex co., Ct., on the W. side of Connecticut river, 17 ms. NE. from New Haven, and 8 below Middletown. Pop. 1840, 200.

Haddington, borough of Scotland, in a co. of the same name, on the Tyne, 18 ms. E. of Edinburgh. Lon. 3 39 W., lat. 55 58 N.

Haddingtonshire, or *East Lothian*, co. of Scotland, bounded on the N. and E. by the Frith of Forth, S. by Berwickshire, and W. by Edinburghshire. It is about 27 ms. long from E. to W., and about 17 from N. to S. Here are several convenient harbors, with the advantage of some fishing towns. This co. may be reckoned as fruitful, rich, and pleasant as any in Scotland, or indeed as most in England. The chief towns are Dunbar, Haddington, and N. Berwick, and its principal river is the Tyne, which receives several small streams. Pop. in 1801, 29,986; in 1811, 31,184; and in 1821, 35,127.

Haddonfield, village, Gloucester co., N. J., 8 ms. SE. from Philadelphia, and 6 E. from Gloucester.

Haddenville, village, Goochland co., Va., 35 ms. NW. by W. from Richmond.

Hadersleben, maritime town of Denmark, in

Sleswick, 25 ms. E. of Ripen. Lon. 9 50 E., lat. 55 18 N.

HADGE, or *HADGI*, from the Arabic: a pilgrim who has visited the tomb of Mahomet at Medina, or more particularly the temple called Caaba, at Mecca. Emir Hadge is the title of the commander of a caravan of pilgrims.

Hadley, corporate town of England, in Suffolk. Large quantities of yarn are spun here for the Norwich manufacture; and it had a considerable woolen manufacture, which is now decayed. It is seated on the Bret, 20 ms. SE. of Bury, and 64 NE. of London. Lon. 1 6 E., lat. 52 10 N.

——Village of Eng., in Essex, 5 ms. SW. of Rochford.——Town, Hampshire co., Mass., on the left bank of Connecticut river, opposite Northampton and Hatfield. The town is situated along the river, and, besides many other fine buildings, contains Hopkins's academy, a respectable literary institution. Pop. of the tp. in 1820, 1,461.——Tp. and village, Saratoga co., N. Y., 17 ms. N. from Ballston Spa.

Hadramant, southwestern part of Arabia, on the Indian ocean.

Hadramaut, a large maritime country of southern Arabia, bounded by the Indian ocean S., Mahrah SE., Nedsged N., and Yemen and Mocha W. Central lat. 15° N., E. lon. 50°.

Haerlem, village and tp., SE. angle of Delaware co., Ohio, 19 ms. SE. by E. of Delaware, the county seat, and 20 NNE. from Columbus.

Hæmus Mountains, that vast chain which, continuing the Illyrian Alps, extends through European Turkey to the Black sea, separating the sources of the streams flowing N. into the Danube from those which are discharged SW. into the Adriatic, and S. into the Archipelago.

Concerning the Hæmus chain, Poqueville observes "that Mount Orbelus (see *Orbelus*) seems to be the kernel, the central point of the mountains of Macedonia, and that Scardus or Prissendi, Scornius or Desproto-Dag, Hæmus or Balkan, are but ramifications from it. The giant, however, which spreads around his arms to so great an extent, appears himself to be but an irradiation from the great Alpine chain. It is from these elevated regions, known under the name of the Noric Alps, that we must depart to follow the general system of the mountains; and in examining the summits through this great extent of country, we shall trace their connexion with Orbelus.

"This mountain is covered with perpetual snow. Its centre is granite; as far as its middle region, it is covered with vegetative soil. From its sides flow an infinite number of springs, which are the principals of the rivers that run into the Mediterranean. Besides the leading chains I have mentioned, the inferior branches of Orbelus enclose the valleys of Thrace, through which flows the Hebrus; they form the defiles of Macedonia, and surround the vast basin of Thessaly. Some slope by steep descents towards the sea; others slope gradually to the plains. Olympus, Ossa, the mountains of Attica, Parnassus, and Helicon, are all but secondary chains, or dependencies upon Orbelus. Pindus and the other mountains of Epirus form a part of the system of Orbelus. Pindus will be found to communicate with the mountains of Dalmatia; its branches form the Sagovian

mountains, as well as those of Tamaris and the Acroceranians, while the Little Pindus gives birth to the granitic-calcareous mountains of Souli. The chain that coasts the Arothez ascends to the neighboring chain above the Achelouïs. The arid mountains of Ætolia—those that border the Gulf of Corinth, or that bristle Acarnania—are ramifications of Pindus."

Haf, or estuary of the Oder, large bay of Denmark and Prussia, in Pomerania. It is closed towards the Baltic by the islands of Usedom and Wollin.

Haf, or *Frische Haf*, estuary of the Vistula and Pregel rivers. It is nearly enclosed towards the Baltic by a long, narrow, and sandy point, called *Frische Nehrung*. The *Frische Haf* extends from Elbing to Königsburg, 70 ms., with a mean breadth of 10 ms., and opens into the Baltic by a narrow strait, between Pillau and the NE. point of the *Frische Nehrung*.

Haf, or *Curiche Haf*, estuary of the Memel, in Polish, or E. Prussia. It is in form of a triangle, extending from Labiau to Memel, 70 ms., and formed by a long, narrow, and low sandy point extending from the province of Samland and called the *Curiche Nehrung*. The opening from the *Curiche Haf* into the Baltic is at Memel.

Hagan's Store, post office, Preston co., Va., by post road 152 ms. a little N. of W. from W. C., and 262 NW. from Richmond.

Hagerstown, flourishing inland village and seat of justice, Washington co., Md., in the fertile and well cultivated valley of the Conococheague, near the Antietam creek. It is a well built town, containing about 600 houses, constructed of brick and stone. Pop. in 1840, 3,728. Distant 70 ms. NW. from Washington city, and 71 WNW. from Baltimore.—Village, Monroe tp., northern part of Preble co., Ohio, 10 ms. N. of Eaton, the county seat, and 50 ms. a little S. of W. of Columbus.

Hague, town of the Netherlands, in the kingdom of Holland, which may compare with the handsomest cities in Europe in the beauty of its palaces, its streets, its agreeable walks, and its great trade. It is seated 2 ms. from the sea, and there is a pavement across the sand hills, with trees on each side, which leads to Scheveling, near the sea shore. It is 10 ms. NW. of Rotterdam, and 30 SW. of Amsterdam. Lon. 4 23 E., lat. 52 4 N.—Town, Warren co., N. Y., on the W. side of Lake George. Pop. in 1820, 514.—Tp., St. Lawrence co., N. Y., on St. Lawrence river. Pop. in 1820, 827.—Village, Westmoreland co., Va., by post road 80 ms. SE. from W. C.

Haguenau, town of France, in the dep. of Lower Rhine, and late province of Alsace, on the Motter, which divides it into two parts, 12 ms. N. of Strasburg, and 252 E. of Paris. Lon. 7 53 E., lat. 48 47 N.

Hailbron, free imperial town of Suabia, in the kingdom of Wirtemberg, on the Neckar, over which is a stone bridge, 25 ms. NE. from Stuttgart. Lon. 9 25 E., lat. 49 19 N.

Hainburg, town of Lower Austria, on the Danube, 10 ms. W. of Presburg, and 25 E. of Vienna. Lon. 16 58 E., lat. 48 12 N.

Hain, town of Upper Saxony, in Misnia. It

has a manufacture of cloth, and is seated on Rhedar, 12 ms. NW. of Dresden.

Hainan, considerable island of the Chinese to the N. of the gulf of Cochin China, and to S. of the province of Quang-tong, from which is 12 ms. distant. It is 400 ms. in circumference. The soil of the N. part is level; but in the S. E. are mountains, among which are valleys produce two crops of rice every year. There are mines of gold and lapis lazuli, which last is ried to Canton to paint the porcelain. It produces the same fruits as China, besides sugar, tobacco, cotton, and indigo.

Hainault, province of the kingdom of Belgium, bounded on the N. by Brabant, on NW. by Flanders, on the W. by Artois, on S. by Gambresis, Picardy and Champagne, on the E. by the territories of Liege and Namur.

Hainburg, town of Austria, on the Danube, 35 ms. E. of Vienna. Lon. 17 18 E., lat. 48 14 N.

Haiti, or *Hayti*.—See *Domingo*, St.

Hallam, tp., York co., Penn., on the S. side of the river Susquehanna, and on the SE. side of Codorus creek. Pop. in 1820, 2,062.

Halland, province of Sweden, on the W. coast of Gothland. It is 60 ms. along the coast, not 12 in breadth. Halmstadt is the capital.

Hallaton, town of Eng., in Leicestershire, ms. SE. of Leicester, and 90 ms. N. by E. of London. Lon. 59' E., lat. 52 32 N.

Halle, town of Hainault. It is seated on Senne, 8 ms. SSW. of Brussels. Lon. 4 20 E., lat. 50 46 N.—Considerable city of Upper Saxony, in the duchy of Magdeburg, seated on Sal, 40 ms. E. of Magdeburg. It is famous for its university and salt works. Lon. 12 8 E., lat. 51 36 N.—Free imperial city of Suabia, famous for its salt pits. It is seated on the Koch among rocks and mountains, 37 ms. NE. of Sgard. Lon. 9 52 E., lat. 49 20 N.—Town of Germany, in Tyrol, 6 ms. NE. of Inspruck. Lon. 11 33 E., lat. 47 12 N.

Hallein, town of Germany, in the archbishopric of Saltzburg, seated on the Saltza, among mountains that abound in mines of salt, which are chief riches of the town and country. It is 7 ms. SE. of Saltzburg. Lon. 13 12 E., lat. 47 33 N.

Hallowell, tp. of Prince Edward co., U. C., Lake Ontario.—Village, Kennebec co., Me., on the W. side of the river Kennebec, about 25 ms. above the junction of this river with the Anascoggin, and at the head of tide water. It is now the seat of government for the State, and a very prosperous town; and in 1840 had a population of 4,654. Kennebec river is navigable thus far for vessels of 150 tons burden. It contains, besides the necessary public buildings, a respectable academy. Lon. W. C. 7 5 E., lat. 44 16 N. Distant 44 ms. NE. from Portland.

Hallowell Cross Roads, post office, Kennebec co., Me., near the village of Hallowell, and 12 ms. NE. from Portland.

Hall's Cross Roads, post office, Harford co., Md., 30 ms. NE. from Baltimore.

Hallsville, village, Montgomery co., N. Y., 12 ms. NW. from Albany.—Village, Duplin co., N. C., about 100 ms. SE. from Raleigh.—Village, Colerain tp., NE. part of Ross co., Ohio, about 13 ms. northeastward of Chillicothe.

Halmstadt, strong seaport of Sweden, capital of island situated on a bay of the North sea, 80 m. SSE. of Gotheborg. Lon. 12 48 E., lat. 56 3 N.

Halstead, town of Eng., in Essex, on the declivity of a hill, at the foot of which runs the river, 16 ms. N. of Chelmsford, and 47 NE. of London. Lon. 45' E., lat. 51 59 N.

Halteren, town of Germany, in the bishopric of Munster, seated on the Lippe, 25 ms. SW. of Munster. Lon. 7 27 E., lat. 51 40 N.

Halton, town of England, in Cheshire, near the city, 13 miles NE. of Chester and 184 NNW. of London. Lon. 2 47 W., lat. 53 23 N.

Halva, town of the kingdom of Fez, seated on the coast of Cebu, 8 miles S. of Fez. Lon. 5 5 W., lat. 32 N.

Ham, strong town of Westphalia, capital of the county of Marck, seated on the Lippe, 24 miles S. of Munster. Lon. 7 50 E., lat. 51 36 N.—Town of France, in the dep. of Somme, and late province of Flanders, with a strong castle. It is seated on the river, 48 miles N. of Paris. Lon. 3 6 E., lat. 45 N.—Village of England, in Surry, 1 mile N. of Kingston. Near it is Ham Walks, celebrated by Thomson and other poets.—Tp., Buckinghamshire, on both sides of the NE. branch of the Nicolet river, 50 miles SSE. from Three Rivers.

Ham, *East*, village of Eng., in Essex, adjoining to West Ham. In this parish is a spring, called Miller's Well, the excellent water of which has never been known to freeze or to vary in its height.

Ham, *West*, village of Eng., in Essex, on the river Lea, 4 ms. E. by N. of London.

Hamadan, or *Amadan*, city of Persian Irak, probably the ancient Ecbatana, on the eastern slope of the Elwend, or Tag Aigha mountains, 340 ms. N. by E. from Bagdad. Lon. 46° E., lat. 34 54 N.

Hamah, large town of Syria, seated among hills on the Ass river, ancient Orontes. It is supposed to be the ancient Emessa. The inhabitants have been made for linen of their own manufacture. It is 10 miles SW. of Aleppo. Lon. 34 55 E., lat. 36 3 N.

Hamamet, town of Barbary, on a gulf of the same name, 45 ms. S. of Tunis. Lon. 10 15 E., lat. 36 35 N.

Hamar, town of Norway, in the government of Bergen, 60 ms. NE. of Christiana. Lon. 11 30 E., lat. 60 33 N.

Hameledin Hill, of Eng., near Sturminster, in Dorsetshire.

Halberstadt, town of Lower Saxony, capital of the principality of the same name. It was formerly the capital of the bishopric of Halberstadt now secularized. It is subject to the king of Prussia, and seated on the Hothiem, 32 miles SE. of Brunswick. Lon. 11 24 E., lat. 52 6 N.

Halldenstein, free and independent barony of the principality of the Grisons. It consists of a semicircular plain, between the Rhine and the foot of Mt. St. Gothard, about 5 ms. in length and scarcely 1 in breadth.

Haldimand, co. of U. C., on Lake Ontario.

Halven, town of the kingdom of the Netherlands, in the province of Brabant, on the river Geet, 24 miles west of Middelburg. Lon. 5 4 E., lat. 50 58 N.

Halesford, village, Franklin co., Va., 150 miles N. by W. from Richmond.

Hales-Owen, town of Eng., in Shropshire, enclosed by Worcestershire, 6 ms. E. of Stourbridge. It is the birthplace of Shenstone, and near it is the celebrated seat of the Leasowes.

Halesworth, town of Eng., in Suffolk. It has a trade in linen, yarn, and sailcloth, and about the town is raised a great deal of hemp. It is seated on a neck of land between two branches of the river Blyth, 28 ms. NE. of Ipswich and 101 of London. Lon. 1 40 E., lat. 52 25 N.

Halesburg, post office, Lunenburg county, Va., on the left bank of Meherin river, 40 ms. S. from Petersburg.

Halesburg, village, Lunenburg co., Va.

Half Moon, town, Centre county, Pa., on Bald Eagle river, 18 ms. NW. from Bellefonte. Pop. in 1820, 713.—Village, Saratoga co., N. Y., on the Hudson, above Waterford. Pop. in 1840, 2,631.

Half-way House, village, York county, Va., 15 miles SP. from Williamsburg and 23 NW. from Norfolk.

Halibut Island, island in the N. Pacific ocean, so named by Captain Cook on account of the number of fish of that name they caught there. It is 7 leagues in circumference, and, except the head, is very low and barren. Lon. 164 15 W., lat. 54 48 N.

Halifax, town of Eng., in the West Riding of Yorkshire, in a hilly country, near a branch of the Calder. It is a very large parish, containing twelve chapels of ease, and upwards of 12,000 inhabitants, who are principally employed in the woolen manufacture.—Town and capital of Nova Scotia, begun to be built by the English planters in 1749. It is delightfully seated in Chebucto harbor, which is large enough to shelter a squadron of men of war through the winter. It is 789 ms. NE. from New York. Lon. W. C. 13 30 E., lat. 44 45 N. In Bradford's Boston Atlas, 1842, the pop. of Halifax, Nova Scotia, is stated at 15,000.—Town of Buckingham co., L. C., on the waters of Nicolet and Becancour rivers, 45 ms. SE. of Three Rivers.—Town, Windham county, Vt., situated between Guildford and Whittingham, 25 miles E. from Bennington. Pop. about 2,000.—Town, Plymouth co., Mass., 35 miles SE. from Boston. Pop. in 1820, 749.—Village, Dauphin co., Pa., standing on the E. side of the river Susquehanna, 19 miles N. from Harrisburg.—Co. of Virginia, bounded S. by North Carolina, W. by Pennsylvania, N. by Campbell or Roanoke river, NE. by Charlotte or Roanoke river, and E. by Mecklenburg; length 20, mean width 32 ms., area 960 sq. ms. Surface moderately hilly, and soil productive. Chief town, Banister. Pop. in 1820, 19,060; and in 1840, 25,936. Central lat. 36 45 N., lon. W. C. 1 45 W.—C. H. and post office, Halifax county, Va., by post road 139 miles SW. from Richmond.—County of N. C., bounded SE. by Martin, SW. by Edgecomb and Nash, NW. by Warren, N. and NE. by Roanoke river or Northampton, and E. by Roanoke river or Bertie; length 42, mean width 16 ms., area 672 sq. ms. Chief town, Halifax. Pop. in 1820, 17,237; and in 1840, 19,865. Central lat. 36 18 N., lon. W. C. 40' W.—Town and seat of justice, Halifax county, NC., on the right bank of the Roanoke, 70 ms. by land above the mouth of Roanoke river.

Vessels of 45 tons can ascend to this place, and, when the intended canals and lock around the falls are completed, a batteaux navigation will be opened to the fine country on the Roanoke and Dan rivers for upwards of 130 ms. above Halifax. Lon. W. C. 38', lat. 36 18 N.

Halitz, town of Poland, capital of a territory of the same name in Red Russia, with a castle. It is seated on the Dniester, 46 miles S. of Lemberg. Lon. 25 19 E., lat. 49 20 N.

* *Hall*, co. of Georgia, bounded by Chattahoochee river or Rabun co. NW., Habersham NE., Jackson and Walton SE., and Gwinnett SW.; length 40, mean width 12 ms., area 480 sq. ms. Chief town, Gainesville. Pop. in 1820, 5,086; and in 1840, 7,875. Central lat. 34 10 N., lon. W. C. 7 20 W.

Hambaugh's, post office, Shenandoah co., Va., 100 ms. W. from W. C.

Hamburg, free and imperial city of Germany, in Lower Saxony, consisting of the old and the new town, both nearly equal in size. Most of the houses are built after the manner of the Dutch, and richly furnished within. The principal streets of the old town have long and broad canals, which Elbe, and Alsters, and the latter, before it enters the are filled by the tide. It is seated on the rivers town by sluices, forms a fine basin. Here is a celebrated college, an arsenal, a bank, and a handsome exchange. The inhabitants were estimated till lately at 100,000. Hamburg, from its situation, has eminent advantages for foreign and domestic trade, particularly from its communication by the Elbe with some of the principal navigable rivers of Germany; and hence it is a place of great commercial importance. It is distinguished for its sugar refinery; and it has manufactures of cotton stockings, gold thread, ribands, and velvets. It is 55 ms. NE. of Bremen. Lon. 10 1 E., lat. 53 33 N.

Hamburg, territory of Germany, of which Hamburg is the capital. It consists of the city proper and a circle in the vicinity, the town and bailiwick of Cuxhaven at the mouth of the Elbe, and some scattered villages in Holstein; the whole amounting to about 133 sq. ms., and 130,000 inhabitants. Hamburg, since the Congress of Vienna, has, in conjunction with Frankfort, Lubeck, and Bremen, a vote in the Germanic diet. The character of this city is commercial, and, though possessing an extensive library and many literary institutions, the attention of the inhabitants to objects of science is much less marked than that of any other of the large cities of north Germany.

Hamburg, town, Erie county, N. Y., on Lake Erie, about 15 miles SSE. from Buffalo. Pop. in 1840, 3,727.—Village, Sussex co., N. J., on a branch of Walkill river, 50 ms. NE. from Easton, in Pa.—Thriving village in Berks county, Pa., immediately below the Schuylkill water gap, about 15 miles north from Reading, on the post road to Northumberland.

Hambden, village, Geauga co., O.—See *Hampden*, Geauga co., O.

Hamden, village, Delaware co., N. Y., by post road 104 ms. SW. from Albany.

Hamelburgh, town of Franconia, in the territory of the Abbey of Fulde, seated on the Saab, 28 ms. SE. of Fulde. Lon. 10 12 E., lat. 50 16 N.

Hamelin, strong town of Germany, in the duchy

of Calenberg, at the extremity of the duchy of Brunswick, of which it is the key. It is situated at confluence of the Hamel and Weser, 25 ms. S. of Hanover. Lon. 9 36 E., lat. 52 6 N.

Hamerstein, castle and village of Germany, long to the elector of Treves. The castle seated on a lofty mountain on the E. side of Rhine, 2 ms. N. by W. of Andernach.

Hamersville, village, near the western border Brown county, 6 miles NW. of Georgetown, county seat.

Ha-mi, country situated to the NW. from China. The country of Ha-mi, though surrounded deserts, is accounted one of the most delightful the world. The soil produces abundance of fruits, leguminous plants, and pasture of every kind. The rice which grows here is particularly esteemed in China, and pomegranates, oranges, peaches, raisins, and prunes, have a most exquisite taste. It is a kingdom tributary to that country and its capital is of the same name.

Hami, or *Chamil*, is a region with much resemblance to the oases of Africa, and lies between lat. 40 and 45° and lon. 90 and 95° E. of London. This country is about 1,500 ms. a little of W. from Peking.

Hamilton, town of Scot., in Lanarkshire, seated in a very agreeable plain. The town is situated on the Clyde, 10 miles SE. of Glasgow. Lon. 16 W., lat. 55 58 N.—Tp., Northumberland co., L. C., on Lake Ontario.—Tp., Casper L. C.—Town, Essex co., Mass., 10 ms. N. of Salem. Pop. in 1820, 802.—Co. of N. Y., bounded by Montgomery S., Herkimer SW., W., St. Lawrence and Franklin N., and Essex Warren, and Saratoga E.; length 60, mean width 28 ms., area 1,680 sq. miles. Surface extremely broken, and soil sterile in general. This county was formerly contained in the northern part of Montgomery. Pop. in 1820, 1,251; and in 1840, 1,907. Central lat. 43 40 N., lon. W. C. 3 E.—Village, St. Lawrence co., N. Y., on Lawrence river, on a fine declivity rising from stream. Distant 20 ms. below Ogdensburg.—Village, Madison co., N. Y., on a branch of Cayuga river. The village is on the main road from Cherry Valley to Auburn, 28 ms. SW. from Ica and 42 W. from Cherry Valley. Population in 1840, 3,738.

Hamilton, village of Cattaraugus co., N. Y., on the right bank of Alleghany river, at and below the mouth of Olean. It is laid out in streets running N. and S., and five running east and west. The Alleghany river is there about 100 yards wide, and at seasons of high water navigable for vessels of 8 or 10 tons burden. It is very favorably situated to become an extensive inland mart and thoroughfare between the Northeast and Southwestern States. Distant from Pittsburgh by land 170, by water 260 ms.; from Buffalo, and from navigable water in Genesee river, 110 ms. Angelica, 25 ms.—Tp., Franklin co., Pa., between Back creek and the main E. branch of Conococheague, immediately opposite Chambersburg. Pop. 1820, 1,688.—Village, on the W. bank of the Schuylkill, opposite Philadelphia, in Bloomsbury tp.—Tp., Northampton co., Pa., W. of Blue or Kittaninny ridge, on McMickle's and Chocoma creeks, 20 ms. N. from Easton. Pop. in 1840,

320.—Co. E. Tenn., bounded by Tennessee river E., S., and SW., Marion W., and Bledsoe and Rhea N. Length 28 ms., mean width 18; area 470 sq. ms. Surface hilly in general, and in part mountainous. Pop. 1820, 821; and in 1840, 175. Cent. lat. 35 15 N., lon. W. C. 8 18 W.

—Court-house and post office, Hamilton co., Tenn., 132 ms. SE. from Murfreesborough.—Village, Martin co., N. C.; by post road 120 ms. from Raleigh.—The extreme southwestern part of O., bounded by the Ohio river S., (separating it from Boone and Campbell, cos. of Ky.)

Dearborne co., Ia., W., and by Butler co., O., Warren NE., and Clermont E. Length from W. 30, and mean breadth 16 ms.; the area 480 sq. ms. In extent this co. is in the smaller class of Ohio cos., but in population it exceeds all others in the State. In 1820 the population was 764; in 1830, 52,317, including the city of Cincinnati; in 1840, the aggregate of city and co. amounted to 80,145. In lat. it extends from 39° 39' 20" N., and in lon. W. C. from 7 12 to 13 W. It occupies the base, towards Ohio river, of the southwestern slope of Greene, Warren, Montgomery, and Butler cos., with more diversity of surface than either of the others. When viewed from Ohio river, the hills behind Cincinnati and Fulton have an imposing aspect; but they are in fact only fragments of the buttress of interior country. The two Miamis enter the Ohio, flowing from this county along deep vales. The land is almost invariably productive in grain, storage, and fruits. It is greatly advantaged by Miami canal, which enters or joins the Ohio near the city of Cincinnati. It is, in brief, an example to show what the whole Ohio valley may, and in rational probability will, be at a not very distant day.—Town and co. seat of Butler co., situated on the southern or left bank of the great Miami river, at N. lat. 39 24, lon. W. C. 16 W. The site of this town is amongst the best in O. It is a plain; but on the opposite side of the Miami the hills rise immediately from the river, at the opposite village of Rossville, giving a pleasing variety to the scenery. The Miami canal passes rather more than half a mile eastward of the town, but is united to it by a side-cut and dam. Pop. 1830, 1,079; and in 1840, 1,409.

The two towns of Hamilton and Rossville are connected by a wooden bridge, on stone piers.—Warren co., O. Pop. 1820, 1,069.—Title tp. on the east side of Scioto river, in Franklin co., O. Pop. 1820, 943, of whom 17 were free blacks.

Hamilton College.—See *Cinton*, in Oneida co., N. Y.

Hamilton, Albany co., N. Y.—See *Guilderland*.

Hamilton-ban, tp., Adams co., Pa., between Bush creek and the west limit of the co., commencing about 4 ms. W. from Gettysburg. Pop. 1820, 1,053.

Hamiltonville, village, Huntingdon co., Pa., on the left bank of Juniata river, 15 ms. by land from Huntingdon.

Hammersmith, large village of Eng., in Middlesex, seated on the Thames, 4 ms. W. of London.

Hamont, town of Germany, in the bishopric of

Liege, 17 ms. W. of Ruremonde. Lon. 5 31 E., lat. 41 17 N.

Hampden, tp., Hancock co., Me. Pop. 1,000.—Town, Penobscot co., Me., 10 ms. SSW. from Bangor. Pop. 1820, 1,442.—Co., Mass., bounded S. by Ct., W. by Berkshire, N. by Hampshire, and E. by Worcester. Length 45 ms., mean width 13; area 585 sq. ms. Surface very much variegated by hill, dale, and mountain scenery. Soil fertile and well cultivated. Chief town, Springfield. Pop. 1840, 37,366. Central lat. 42 7 N., lon. 4 30 E.—Village, Geauga co., O., 3½ ms. E. of Chardon, the co. seat, and 12 ms. SSE. of Painesville.

Hampden Sydney College.—See *Prince Edward co.*, Va.

Hampshire, *Hantskire*, or *Hunts*, co. of Eng., bounded on the N. by Berks, on the E. by Surry and Sussex, on the S. by the English channel, and on the W. by Dorsetshire and Wilts. It extends, exclusive of the Isle of Wight, 42 ms. from N. to S., and 38 from E. to W. Pop. in 1801, 219,656; in 1811, 245,080; in 1821, 282,203. See *Southampton*.

Hampshire, co., Mass., on both sides of Connecticut river, bounded by Hampden S., Berkshire W., Franklin N., and Worcester E. Length 38 ms., mean width 14; area 532 sq. ms. Surface most highly diversified by hill, dale, and mountain. Soil generally productive, and well cultivated. Staples, grain, fruit, live stock, and salted provision. Chief town, Northampton. Pop. 1820, 26,477; in 1840, 30,897. Central lat. 42 20 N., lon. W. C. 4 30 E.—Co., L. C., extends along the north side of St. Lawrence river, from about 2 ms. above St. Anne's river to 5 ms. above Quebec.—Co., Va., bounded by Hardy SW., the Potomac river or Alleghany co., Md., NE. and N., and Berkeley and Frederick SE. Length 40 ms., mean width 20; area 800 sq. ms. Surface extremely mountainous, though its river soil is highly productive. Chief town, Romney. Pop. 1820, including Morgan, 10,889; in 1840, 12,295. Cent. lat. 39 18, lon. W. C. 1 45 W.

Hampstead, village of Eng., in Middlesex, 4 ms. NNW. of London, formerly famous for its medicinal waters. It is seated on the declivity of a hill, on the top of which is a fine heath that commands a delightful prospect.—Tp., Queen's co., New Brunswick, on right bank of St. John's river.—Town, Rockingham co., N. H., 36 ms. W. by S. of Portsmouth. Pop. in 1820, 1,098.—Tp., Rockland co., N. Y., 35 ms. NNW. from N. Y. Pop. in 1810, 2,072. The extensive iron works, called the Ramapoo works, are in this tp.—Village, King George co., Va. 67 ms S. from W. C.

Hampton, village of Eng., in Middlesex, on the N. side of the Thames, 14 ms. SW. of London.—Small maritime town, Rockingham co., N. H., about 6 ms. E. of Exeter, between Rye and Newtown. Pop. in 1820, 1,098.—Town, Windham co., Ct., on the E. side of Bigalow's river, 5 ms. N. of Windham. Pop. in 1840, 3,382.—Town, Washington co., N. Y., situated 70 ms. NNE. from Albany. Pop. in 1820, 963.—Seaport and village, Elizabeth City co., Va., on Hampton road, about 20 ms. NW. of Cape Henry, and 10 ms. E. of York, on the York river.

Hampton, of *Minching Hampton*, town of Eng., in Gloucestershire, on the Coteswold Hills, 14 ms. S. of Gloucester, and 90 W. of London. Lon. 2 15 W., lat. 51 36 N.

Hampton Falls, town, Rockingham co., N. H., 10 ms. SW. from Portsmouth. Pop. in 1820, 572.

Hamptonville, town, Surry county, North Carolina, 164 mils, northwest by west from Raleigh.

Hanau, co. of Germany, in the circle of the Lower Rhine, which belongs to its own prince. It is 45 ms., in length, but the breadth is small, bounded on the E. by the co., of Rheinec and the territory of Fulde, on the W. by the cos. of Weissemburg and Solms, and on the N. and S. by the territories of Mentz and Frankfort.—Strong town of Germany, capital of a co. of the same name. It is divided into two towns, the Old and New, and is seated near the Maine, 18 ms. NE. of Darmstadt. Here is a university with several manufactories, and a very considerable traffic. Lon. 8 55 E., lat. 49 56 N.

Hancock, co. of Maine, bounded by the Atlantic ocean S., by Lincoln and Kennebec SW., by Penobscot NW. and N., and Washington E. Its form is very irregular, including the numerous islands and peninsulas SE. from the mouth of Penobscot river. This renders an estimate of its length difficult. From the Fox islands to Schoodic lake is upwards of 90 ms. The area may be estimated, including the islands, 3,000 sq. ms. Chief town, Castine. Pop. in 1820, 31,290. Since the above was written Waldo co. was formed from the southwestern part of Hancock. By the census of 1840 the pop. of the two counties stood thus:

Hancock	-	-	-	28,605
Waldo	-	-	-	41,509

Total of what was Hancock - 70,114
Lat. 44 30 N., and lon. 8 45 E. from W. C., intersect in this city.—Village, Hillsborough co., N. H., 13 ms. E. from Keene. Pop. in 1840, 1,345.—Town, Addison co., Vt., 30 ms. SW. from Montpelier.—Town, Berkshire co., Mass., between Richmond and Lanesborough, on the N. Y. line. Pop. in 1820, 1,165.—Town, Delaware co., N. Y., 22 ms. SW. from Delhi. Pop. in 1820, 525.—Village, Washington co., Md., on the N. side of the river Potomac, 26 ms. W. of Hagerstown.—Co. of Ga., bounded SE. by Washington, SW. by Baldwin, W. by Putnam, NW. by Green, and NE. by Warren; length 22 ms., mean width 20, area 440 sq. ms.; surface rather waving than hilly; soil fertile. Chief town, Sparta. Pop. in 1820, 12,734, and in 1840, 9,659. Ctl. lat. 33 17, lon. W. C. 6 15 W.—Co. of Ky., bounded E. by Breckenridge, S. by Grayson and Ohio, W. by Davies, and N. by the Ohio river. Ctl. lat. 37 50, lon. 10° W. of W. C. Pop. in 1840, 2,581.—Co. of Ohio, bounded W. by Putnam, N. by Wood, E. by Seneca and Crawford, and S. by Hardin. It is 24 ms. sq., area 576 sq. ms.; surface level and soil fertile. It was formed out of the new purchase subsequent to the census of 1820. The features of this co. are peculiar. The Blanchard's fork of Auglaize river rising in Seneca co., pursues a very nearly

western course over Hancock, leaving the large section to the southward; yet the confluents of this same river all flow in a northerly direction and, again to the N. of Blanchard's fork rise numerous branches of Portage river, which also flow northwardly; thus, though the main river in it has a westerly course, the slope of the co. is to the N. Chief town, Finley. Extending in lat. from 4 47 to 41 S, and in lon. W. C. from 6 23 to 6 5 W. It is a sq. of 24 ms.; area 576 sq. m. Pop. in 1840, 9,986.—Co. of Miss., bounded by Lake Borgne S., by Pearl river or La. W., by Marion and Perry N., and by Jackson NE.; length 40 ms., mean width 25, area 900 sq. ms.; surface level in the S., and hilly in the centre and northern parts. Soil, with partial exceptions on the stream sterile and clothed with pine. Chief town, Shield boro. Pop. in 1820, 1,594. Ctl. lat. 30 40 N. lon. W. C. 12 10 W.

Hancock's Bridge, post office, Salem county New Jersey, by post road 66 miles SW. from Trenton.

Hancocksville, village, Union district, South Carolina, by post road 110 ms. NNW. from Columbia.

Hanging Fork, post office, Lincoln co., Ky between Danville and Stamford, 53 ms. SSE. from Frankfort.

Hanging Rock, post office, Hampshire co. Va. by post road 99 ms. WNW. from W. C.—Village, Lawrence co., Ohio, on the Ohio river 18 ms. below the co. seat, Burlington, and above Portsmouth. The vicinity of this place remarkable for the abundance of iron, stone coal and limestone.

Hang-Tcheou-Fou, capital of the province Tche-kiang, in China. It is 4 leagues in circumference, exclusive of its suburbs, and contains more than a million of inhabitants. It is seated on a small lake called Si-hou; has under its jurisdiction 7 cities of the second and third classes, and is 225 ms. SE. of Nanking. Lon. 120 20 E. lat. 30 21 N.

Hankinsonville, village, Claiborne co., Miss about 40 ms. NE. from Natchez.

Hannibal, tp., Oswego co., New York, SW from the mouth of Onondaga river. Population 1820, 935.

Hannibalsville, village in Hannibal tp., Oswego county, New York, 182 miles NW. by W. from Albany.

Hanover, Kingdom of Germany, in the circle of Lower Saxony. It contains Calenberg, Göttingen, Lunenburg, Hoya, Deipholtz, Hildesheim, Osnaburg, Verden, Bremen the city, Bremen duchy, Bentheim, East Friesland, Lingen, Rhein and Meppen. Area 14,600 sq. ms.

Hanover is an aristocratical monarchy, if such terms are admissible. The crown is on the head of one of the sons of George III. The taxes are laid and municipal regulations made by and with the consent of the States, consisting of the nobility, clergy, and deputies of towns.

The country, with the exception of some spots of the Hartz mountains, is a level and almost undeviating plain, in some places extremely fertile. Produce, iron, and copper, and lead from the Hartz; grain, timber, live stock, &c.

The following table shows the provincial divisions, chief towns, population, &c.

Governments.	Chief towns.	Population.
Hanover	{ Hanover - - -	28,000
	{ Hameln - - -	5,000
Hildesheim	{ Hildesheim - -	13,000
	{ Gottingen - -	10,000
Lunenburg	{ Lunenburg - -	12,000
Stade	{ Stade - - -	5,000
Osnabruck	{ Osnabruck - -	11,000
Aurich	{ Aurich - - -	3,000
Embsen	{ Embsen - - -	11,000
Klausthall	{ Klausthall - -	8,000
of the monarchy	- - -	1,550,000

Hanover, fortified city of Germany, the capital of the kingdom of the same name. In its neighborhood are the palace and elegant gardens of Herrenhausen. Hanover is well built, contains upwards of 28,000 inhabitants, and has manufactures of lace, stuff, stockings, ribands, and leather. It is seated on both sides of the Leine, 38 ms. W. of N. of Brunswick. Lon. 9 48 E., lat. 52 2 N.

Hanover, town of N. H., Grafton co., on the bank of the Connecticut. Three ms. S. of the village, and near the same river, stands Dartmouth College, of the most respectable seminaries of education in the U. S. Hanover is 100 ms. NW. of Portsmouth. Pop. in 1820, 2,222.—See *Dartmouth College*.—Town, Plymouth co., Mass., 10 ms. NW. from Plymouth. Pop. in 1820, 111.—Village in Oneida co., N. Y., on Otsego creek, 12 ms. SW. from Utica.—Town, Chataque co., N. Y., on the NE. part of the same co.—Town, Morris co., N. J. Pop. in 1820, 3,503. The village is near the S. branch of the Passaic river, 11 ms. NW. by W. from Newark.—Tp. and village, Burlington co., N. J., on Ancocus creek, 29 ms. NE. by E. from Philadelphia, and 12 ms. E. from Mount Holly.—Town, York co., Penn. Pop. in 1820, 946; in 1840, 1,071. The village or borough is situated between the heads of the Codorus and Conewago rivers, 11 ms. SW. from York.—Tp., Luzerne co., Penn., extending from the Nescopeck mountain and Lehigh river to the Susquehanna river, including on the latter a part of old Wyoming.—Tp., Northampton co., Penn., in the great valley, and on the left side of Lehigh river, between Bethlehem and Allentown.—SW. tp. of the same co., Penn., on the heads of Raccoon creek. Pop. in 1820, 1,147.—Tp., Columbiana co., O.—Village, Harrison co., O., 5 ms. S. from Chillicothe.—Tp., Butler co., O. Pop. in 1820, 112.—Village in the easternmost part of Licking co., O., about 11 ms. E. of Newark, the co. capital.—Co., Va., bounded SW. by Henrico and Loudoun, NW. by Louisa, NE. by North Anna and Pamunkey rivers, or the cos. of Spotsylvania, Stafford, and King William, and SE. by New Kent. Length 40 ms.; mean width 16; area 640 sq. ms. Surface generally hilly; soil sandy in general, though along the streams much excellent alluvion is found. Staples—grain, flour, and tobacco. Chief town, Hanover. Pop. in 1820, 12,677; and in 1840, 14,968. Central lat. 37 4 N., lon. W. C. 0 45 W.

Hanover, New, tp., Montgomery co., Penn., on Swamp creek, branch of Perkiomen, 30 ms. NW. from Philadelphia. Pop. in 1820, 1,320.

Hanover, Upper, NW. tp., Montgomery co., Penn., on Perkiomen creek, 35 ms. NW. from Philadelphia.

Hanover, East, tp., Lebanon co., Penn., on the right side of Swatara, 20 ms. NE. from Harrisburg. Pop. in 1820, 1,871.

Hanover, West, tp. Dauphin co., Penn., on the right side of Swatara, 10 ms. NE. from Harrisburg. Pop. in 1800, 3,015, including that part of East Hanover which lies in Dauphin co., as also Bethel and Rush.

Hanoverton, village in the southwesternmost part of Columbiana co., O., 10 ms. westward of New Lisbon.

Hanover Town, village, Hanover co., Va., 25 ms. NE. from Richmond. Washington academy is located near this town.

HANSE. "If," says Paganel, "we study attentively the etymology of the word *hanse*, we must be convinced that it ought to be written *hanseatique*, and not *anseaticque*; the German word is *hansely*, Danish, *haense*; and the old French (statutes of Paris) *hanser*. This verb in all its forms expresses the contribution paid by a foreigner to obtain mercantile privileges in any city, or the first expense to which any one is exposed on admission into a corporation. The substantive *hanse*, was naturally applied to a confederation of several corporations to maintain mutually their monopoly, or right of *hanse*." Hence the title of *Hanseatic League*.

Hanse Towns, or *Hanseatic League*. In the 13th century, a league was formed between some of the principal cities of Germany, Poland, and the Netherlands, for the protection of trade. It yet subsists, though confined to Lubec, Hamburg, and Bremen. This respectable confederacy laid the foundation for the flourishing state of manufactures and commerce in the N. of Europe, and had no trifling share in preparing the way to the present civilization of Europe.

Hanson, village, Plymouth co., Mass., 38 ms. SSE. from Boston.

Hants, co., Nova Scotia.

Hanuye, town of the kingdom of the Netherlands, in Brabant, 20 ms. SE. of Louvain. Lon. 5 16 E., lat 50 41 N.

Han-yang-fou, populous and commercial city of China, in the province of Hou-quang. It has one city under its jurisdiction.

Hapae, name of four of the Friendly Islands, in the South Pacific ocean. The plantations are numerous and extensive, and some of them are enclosed in such a manner that the fences, running parallel to each other, form spacious public roads, that would appear ornamental in countries where rural conveniences have been carried to the greatest perfection. These islands extend about 19 ms.

Hapsal, seaport of Livonia, in Russia, in the government of Revel, seated on the Baltic, 5 ms. SW. of Revel, opposite the island of Dago. Lon. 22 47 E., lat. 57 4 N.

Hapsburg, ancient castle, now in ruins, on a lofty eminence near Schintznach, in Switzerland, famous for being the patrimony of Rodolph, count

of Hapsburg, who by his bravery and abilities raised himself to the imperial throne of Germany, The remains of it are inhabited by the family of a peasant.—Castle, stands in the canton of Aargau, and on the Aar river, 5 English ms. below Aarau, the capital of the canton, and an equal distance above the junction of the Aar with the Reuss. This was in former ages the residence of the ancestors of the reigning family of Austria.

Haram, ancient Charræ, the Harran of the Scriptures, town of Asiatic Turkey, in the pachalic of Ourpha; about 100 ms. NE. from Aleppo, and 50 E. of the Euphrates river.

Harborough, town of Eng., in Leicestershire, on the Welland, 14 ms. S. of Leicester, and 83 N. by W. of London. Lon. 0 62 W., lat. 53 28 N.

Harburg, town of Lower Saxony, in the duchy of Lunenburg, with a strong castle. It is seated on the Elbe, opposite Hamburg, equally well situated for trade as that city, and is 37 ms NW. of Lunenburg.

Harcourt, town of Fr., now in the dep. of Calvados, lately in the province of Normandy. It is 12 ms. S. of Caen.

Hardeberg, town of Germany, 52 ms. S. of Vienna; it is situated in the duchy of Styria. Lon. 16 12 E., lat. 47 22 N.

Hardeggen, town of Lower Saxony, in the principality of Calenburg, 10 ms. NW. of Göttingen. It has a considerable manufacture of leather.

Hardeman, new co. of Tenn., position and boundaries uncertain.—Court-house and post office, Hardeman co., Tenn., by post road 239 ms. westward from Murfreesborough.

Hardenberg, town of Westphalia, in the duchy of Berg. It is 13 ms. ENE. of Dusseldorp. Lon. 6 43 E., lat. 51 19 N.

Hardenburg, town of Overysel, situated on the Veicht, 10 ms. SW. of Covoorden.—Village, Breckenridge co., Ky.—See *Hardinsburg*.

Hardenburg Mills, Delaware co., N. Y.

Harden's Cove, village, Randolph co., Va., on the E. branch of the Monongahela river, 65 ms. above Morgantown.

Hardensville, village on Racing river, Shelby co., Ky., 9 ms. SW. from Frankfort.

Harderwick, town of the kingdom of the Netherlands, in Guelderland, with a university. It is seated on the Zuyder-Zee, 32 ms. E. of Amsterdam. Lon. 5 40 E., lat. 52 23 N.

Hardin, co. of Ky., bounded by the Ohio river NW., Bullitt, Nelson, and Washington NE., Greene SE., and Hart, Grayson, and Breckenridge SW. Length 55 ms., mean width 20, area 1,100 sq. ms. Surface extremely hilly. Pop. in 1820, 10,498. Central lat. 37 44 N., lon. W. C. 9° W.—Co. of O., bounded by Hancock N., Crawford and Marion E., Union and Logan S., and Allen W. It is 24 ms. sq.; area 576 sq. ms. This co. was formed from the new purchase, and of course not included in the census of 1820. Though level generally, Hardin co. occupies a table land, from which flow streams like radii from a common centre. From its southwesternmost border issue the extreme sources of Miami river, as also those of Scioto river, the latter traversing the co. from W. to E. From the northwestern

angle flow the extreme sources of the Ot branch of Auglaize river, and from the north those of Blanchard's fork. This county lies between N. lat. 40 27, and 40 28, and lon. 6 23 6 50 W. of W. C. Chief town, or co. Kenton.—Village, Shelby co. O., 5 ms. westward of Sidney, the co. seat, and 83 ms. N. by W. of Columbus.—Village, Shelby co. on Loramie creek, 5 ms. SE. from Fort Lora and by post road 93 ms. NW. by W. from lumbus.—Co., W. Tenn., on both sides of Tennessee river; bounded by Ala. SE., N. SW., Henderson co. W. and N., Perry Wayne E.; length 30 ms.; mean width 22; 660 sq. ms. Pop. in 1820, 1,462. Central 35 14 N., lon. W. C. 11 10 W.

Hardinsburg, village, Dearborn co., Ia., post road 101 ms. SE. from Indianapolis.—Town and seat of justice, Breckenridge co., Ia. 45 ms. N. from Russelville, and 110 SW. by road from Frankfort. Lat. 37 47 N., lon. W. C. 21 W.

Hardinsville, village on the right bank of Tennessee river, Hardin co., Tenn., 140 ms. S. by W. from Murfreesborough; and 50 NW. of Florence, in Ala.

Hardiston, tp., Sussex, co., N. J. Pop. 1820, 2,160.

Hardwick, village, Caledonia co., Vt., 21 NE. from Montpelier. Pop. in 1820, 750.—Tp., Worcester co., Mass., on the W. side Ware river, 55 ms. W. from Boston. Pop. 1810, 1,657; in 1820, 1,836.—Town, Warren co., N. J., on the Delaware river, 60 above Easton, in Penn. Pop. in 1820, 3,3—Village, Ryan co., Ga., at the mouth Ogechee river.—Island in Johnson's strait the Pacific coast of N. America. Lon. W. 48 45 W., lat. 50 26 N.

Hardy, co. Va., bounded by Md. NW., Hampshire co. in Va. NE., Shenandoah SE., Rockingham, Pendleton, and Randolph SW.; length 40 ms.; mean width 17; area about 700 sq. r. The S. branch, and various other branches of the Potomac, cross this co. from the SW. to N. The surface is excessively mountainous, and soil rocky, and generally barren. Chief town Moorfields. Pop. in 1820, 5,700; and in 1847, 6,22. Central lat. 39° N., lon. W. C. 2° W.

Hare, large bay on the E. side of the northern peninsula of Newfoundland. Lon. W. C. 19 E., lat. 51 20 N.

HAREM, from the Arabic *harem*, or *hhar*, a sacred place, where in Mahomedan countries particularly Turkey, the women of men of high rank reside.

Harfeur, town of Fr., in the dep. of Lower Seine, and late province of Normandy. It stands at the mouth of the Seine, 36 ms. NW. of Rouen. Lon. 0 19 E., lat. 49 30 N.

Harford, town, Susquehannah co., Penn., between Martin's and Vanwinkle's branches of Tanhannock river, 12 ms. SE. from Montrose. Pop. in 1820, 642.—Co., Md., bounded N. by Penn. NE. by Susquehannah river, SE. by Chesapeake bay, SW. and W. by Baltimore co., Md.; length 30 ms.; mean width 16; area 480 sq. ms. Surface undulating rather than hilly. So productive in grain, pasturage, and fruit. Chi

on, Bellair. Pop. in 1820, 15,924; and in 1830, 17,120. Central lat. 39 33 N., lon. 0 45 E. —Village, Harford co., Md., at the head of Chesapeake river bay and of tide water, 25 ms. NE. of Baltimore.

Hargrove, post office, Pickens co., Ala., by post road 140 ms. NW. from Cahaba.

Harlan, one of the southeastern cos. of Ky., bounded SE. by Va., W. by Knox co., Ky., NW. by N. by Knox and Perry; length 55 ms.; and breadth 12; area 660 sq. ms. It is drained by the several sources of the Cumberland river. N. lat. 36 55 and lon. 6° W. from W. C. intersect in W. C. —Court house and post office, Harlan co., Ky., on Cumberland river, 124 ms. NNE. from Knoxville, in Tenn., and by post road 154 ms. from Frankfort. N. lat. 36 55, lon. W. C. 6° W.

Harlansburg, village on Slippery Rock creek, in the SE. angle of Mercer co., Penn., 50 ms. NW. from Pittsburg.

Harlebec, town of the kingdom of the Netherlands, on the river Lis, 3 ms. NE. of Courtray. Lon. 3 29 E., lat. 50 52 N.

Harlech, town of Wales, in Merionethshire, on the coast of Cardigan bay, and but a poor place, though the co. town, and governed by a mayor. Lon. 28 ms. SSE. of Carnarvon, and 213 NNW. of London. Lon. 4° W., lat. 54 57 N.

Harlesville, village, Marion district, S. C., 120 ms. SE. by E. from Columbia, and 54 SW. from Gettysville, N. C.

Harlem, populous city of the kingdom of Holland. This place claims the invention of printing; the first attempt in the art being attributed to Laurentius Costa, a magistrate of the city. It is situated 10 ms. W. of Amsterdam. Lon. 4 38 E., lat. 52 24 N.

Harlem, Mere, lake of Holland, near Harlem, 10 ms. long and the same broad. It lies between Harlem, Harlem, and Amsterdam. Though it is navigable, it is subject to dangerous storms; on such account the canals from Leyden to Amsterdam were made, which are a safer passage.

Harlem, or Haerlem, village, N. Y. co., on Harlem river, 7 ms. from the City Hall.

Harlem, village, Kennebec co., Me., 15 ms. S. from Augusta. —Tp., Delaware co., O.

Harleston, town of Eng., in Norfolk, on the eastern shore of the river, over which there is a bridge, 16 ms. S. of Norwich, and 100 NE. of London. Lon. 1 10 W., lat. 52 26 N.

Harley's Store, post office, Frederick co., Md.; by postroad 57 ms. NNW. from W. C.

Harling, town of Eng., in Norfolk, on a rivulet between Thetford and Buckingham. It manufactures a little linen cloth, and is 24 ms. SW. of Norwich, and 88 NE. of London. Lon. 58' W., lat. 52 27 N.

Harlingen, seaport of the kingdom of Holland, in West Friesland. The manufactures are salt, bricks, tiles, and all sorts of linen cloth. It is 13 ms. W. of Lewarden. Lon. 5 14 E., lat. 53 14 N. —Village, Somerset co., N. J., 12 ms. S. of Trenton, and 23 ms. N. of Trenton.

Harlow, town of Eng., in Essex, 7 ms. NW. of Chipping Ongar. On a common 2 ms. from the town is a famous annual fair, on the 9th of

September, called Harlow Bush Fair, much frequented by the neighboring gentry.

Harmans, creek of Pa. and Va., rises in Washington co. in the former, and falls into the Ohio river, in Brooke co., in the latter.

Harmony, town, Somerset co., Me., 25 ms. E. from Norridgewock. —Town, Chataouque co., N. Y., S. from Chataouque lake. —Village, Sussex co., N. J.; by post road 70 ms. N. from Trenton. —Village, Butler co., Pa., on Conaquesing creek, 14 ms. SW. by W. from Butler, and 12 NE. by E. from Beaver. —Tp., Clark co., O. —Village and seat of justice, Posey co., Ia., on the left bank of the Wabash. It was settled by the sect called Harmonists, after their removal from Harmony, in Butler co., Pa.

Harmony Grove, post office, Jackson co., Ga., 80 ms. NNW. from Milledgeville.

Haroodjeh, a hilly or rather a mountainous tract of Africa, between Barca and Fezzan, and extending southward from Tripoli. It commences at two or three days' journey SW. of Audjelah, and, presenting a singular, broken, rocky, and desolate region, extends to Fezzan. N. lat. 28° and lon. 20° E. of London intersect near the centre of Haroodjeh.

Harper's Ferry, village, Jefferson co., Va., on the right bank of Potomac river, at the mouth of Shenandoah river, 65 ms. by land above Washington. The justly celebrated passage of the Potomac through the Blue Ridge is at this place. The United States has an armory and manufactory of arms established here.

Harpersfield, town, Delaware co., N. Y., 55 ms. SW. from Albany, and on a creek of Charlotte river, branch of Susquehanna. The village in Harpersfield situated 10 ms. westward of Jefferson, the co. seat, and 16 eastward of Painsville. —Town in the western part of Ashtabula co., O. Pop. 1820, 763.

Harpersville, village, Broome co., N. Y., 20 ms. NE. by E. from Chenango Point.

Harpeth, small river of Tenn., rises in Williamson, and, flowing NW., enters Davidson co., and falls into Cumberland river 35 ms. below Nashville, after a general comparative course of 60 ms. —Village, Williamson co., Tenn.

Harponelly, town of the peninsula of Hindoostan, 152 ms. NNW. of Seringapatam, capital of a district of the same name, in the Mysore country. Lon. 75 28 E., lat. 14 40 N.

Harpswell, tp., Cumberland co., Me., 40 ms. E. from Portland.

Harria, or *Harelinland*, province of Livonia, lying on the NW. part of the Gulf of Finland. Revel is the only town.

Harrington, town, Washington co., Me., 28 ms. W. from Machias. —Tp., Bergen co., N. J. Pop. 1820, 2,296.

Harrisborough, village, Richmond co., Ga., a little below Augusta.

Harrisburg, village, borough, seat of justice for Dauphin co., and seat of government for Pa., is situated on the east bank of Susquehanna river, 96 ms. from Philadelphia, and 35 from Lancaster. The upper part of the site of Harrisburg is a gently swelling hill or high bank between Susquehanna river and Paxton creek. Along the valley of Paxton extends that part of the Pennsylvania canal

which passes Harrisburg—the lower part extending on the level bottom or plain above the mouth of Paxton. The town extends in three streets parallel to the river and several cross streets. The middle part, opposite the bridge, is tolerably well built. The bridge is a fine structure of its kind, resting on stone piers, with a roof. It is composed of two parts, extending over the two channels of the Susquehanna, on each side of an island opposite the town. The State capital is an elegant edifice, erected on the highest part of the hill on which part of the town stands. From the cupola of the State-house is one of the finest inland landscapes in Pa., embracing a wide extent of cultivated country, swelling hills, the meanders of the river, and the adjacent mountains. Beside the State-house or capitol, Harrisburg contains a court-house, market house, and a number of places of public worship. Pop. 1820, 2,990; and in 1840, 5,980.

Harrisburg, village, Lewis co., N. Y.; by post road 152 ms. N. W. from Albany.—Village, Lancaster district, S. C.; by post road 121 ms. N. E. from Columbia.—Village, Catahoola parish, La., 40 ms. a little N. of W. from Natchez.—Village, Pleasant tp., near the SW. angle of Franklin co. and crossing of Darby creek, 15 ms. SW. of Columbus, and 20 ms. N. W. of Circleville.

Harrison, co. of Ohio, bounded by Jefferson E., Belmont S., Guernsey SW., Tuscarawas W., Carroll N., and northern part of Jefferson NE. Greatest length E. and W. 26 ms.; greatest breadth from S. to N. 18; mean breadth 16; and area 416 sq. ms.; extending in lat. from 40 13 to 40 27, and in lon. W. C. from 3 54 to 4 20 W. Chief town and co. seat, Cadiz. Pop. 1840, 20,100. Occupying a part of the height of land between the Ohio and Tuscarawas rivers, the surface of Harrison co. is excessively broken, and, though in very few places precipitous, the hills are steep, with a productive soil. Bituminous coal abounds.—Tp., Cumberland co., Me., 40 ms. N. W. from Portland. Pop. 1820, 789.—Tp., Broome co., N. Y.—Town, Courtland co., N. Y., between the two main branches of the Tionoga river, 30 ms. SW. by W. from Norwich.—Tp., Westchester co., N. Y., 30 ms. NE. from N. Y. Pop. 1820, 994.—Co., Va., bounded by Lewis S., Wood W., Tyler NW., Monongalia NE., and Randolph SE. Length 50 ms., mean width 22; area about 1,100 sq. ms. Surface excessively broken, with high hills. Soil upon the streams in many places highly fertile, but in general rocky or stony, and part barren. Chief town, Clarksburg. Pop. 1820, 10,932; in 1840, 17,670. Cent. lat. 39 20 N., lon. W. C. 3 30 W.—Co., Ky., bounded by Bourbon S., Scott and Owen W., Pendleton N., Bracken NE., and Nicholas E. Length 23 ms., mean width 15; area about 330 sq. ms. Chief town, Cynthiana. Pop. in 1820, 12,271; and in 1840, 12,472. Central lat. 38 30 N., lon. W. C. 7 5 W.—Tp., Gallia co., O.—SE. tp. of Stark co., O.—Tp., Franklin co., O., on Alum creek.—Tp. on the E. side of Ross co. O.—SW. tp. of Dark co., O.—Tp., Muskingum co., O.—Tp., Pickaway co., O., E. from Scioto river.—Tp., Licking co., O., on the S. fork of Licking river.—Village and tp., Champaign

co., O.—Tp., Preble co., O.—Village, and Ia. It is remarkable as standing on the of demarcation between the two States, one being in Hamilton co., O., and the other in D born, Ia., 21 ms. N. W. by W. of Cincinnati, 18 ms. SE. of Brookville, in Ia. The line White Water canal passes through the village.—Village, Knox co., O., 15 ms. SE. from Mc Vernon.—Co., Ia., bounded by Ohio river S. S., and W., Big Blue river SW., Washing N., and Floyd NE. and E. Length 30 ms., m width 14; area about 410 sq. ms. Surface h but soil fertile. Chief town, Corydon. Pop. 1820, 7,875; and in 1840, 12,459. Central 38 14 N., lon. W. C. 9° W.—Village and Harrison co., Ia. Pop. 1,200.—Tp., Fre lin co., Ia., 25 ms. N. W. from Cincinnati. 1 tp. is remarkable for the number and magnitud aboriginal remains found within its limits.—Village, Calloway co., Mo.; by post road 100 W. from St. Louis.

Harrisonburg, village and seat of justice, R ingham co., Va., on one of the branches of S nandoah river, 25 ms. N. E. from Staunton, 40 NNW. from Charlottesville. Lat. 38 31 lon. W. C. 1 41 W.

Harrison's Store, post office, Brunswick Va.

Harrisonville, village and seat of justice, M roe co., Ill., on the left bank of the Mississip opposite Herculaneum, 30 ms. below St. Lo Lat. 38 13 N., lon. W. C. 13 18 W.

Harrisville, village, Butler co., Pa.—Vill Brunswick co., Va.; by post road 57 ms. a li W. of S. from Richmond.—Village, Mec co., O., on the S. side of the co.—Town, H rison co., O., 9 ms. NE. from Cadiz, and 13 NW. from Wheeling. This village stands v near the SE. angle of the co.

Harrisville Reserve, village, Medina co., by post road 90 ms. N. from Columbus.

Harrodsburg, village, Mercer co., Ky., ly on the E. side of Salt river, 30 ms. S. from Fra fort, the capital of the State. In 1840, pop. 1,2

Harrogate, village of Eng., in the West Rid of Yorkshire, in the parish of Knaresborough, ted for medicinal springs, one of which is the stro est sulphur water in Great Britain. It is 206 N. by W. of London.

Harrow, village of Eng., in Middlesex, on highest hill in the co., on the summit of whic the church, with a lofty spire. Here is a celeb ted free school, founded by Mr. John Lyons the reign of Queen Elizabeth. It is 10 ms. WN of London.

Hart, co., Ky., on both sides of Green riv bounded by Barren S., Warren SW., Gray W., Hardin N., and Green E. Length 30 n mean width 11; area 320 sq. ms. Chief tov Madisonville. Surface level, and on both side Green river in great part occupied by that spec of soil denominated barrens. Hart co. has be since 1810, formed out of part of Hardin and E ren cos., and is not included in the census 1810. Pop. 1820, 4,184; and in 1840, 7,0. Cent. lat. 37 18 N., lon. 8 33 W.

Hartford, or *Hertford*, the co. town of H fordshire, Eng., seated on the river Lea, the clf commodities of which are wheat, malt, and wo

ed it sends 5,000 quarters of malt to London weekly by the river Lea.

Hartford, co., Ct., on both sides of Connecticut river, bounded by the State of Mass. N., by Walland E., New London SE., Middlesex and New Haven S., and Litchfield W. Length 32 m., mean width 23; area about 740 sq. ms. Surface very diversified, being traversed by the Connecticut from N. to S., and on both sides of that stream, at a distance of 7 or 8 ms., by chains of very elevated but very distinct mountains, and situated on its western border by a third ridge. The river valleys of the Connecticut and Farmington (see *Farmington*) are exuberantly fertile and highly cultivated. Much of the high land is productive in grain and pasturage. The aspect of the county is indeed that of prosperous and active industry. Chief town, Hartford. Pop. in 1820, 47,234; and in 1840, 55,629. Cent. lat. 40° 50' N., lon. W. C. 4 15 E.

Hartford, city, of capital of Connecticut, and seat of justice for Hartford co., is situated on the east bank of Connecticut river, about 50 ms. above its mouth, 14 ms. above Middletown by rail, and 34 ms. from New Haven. The site of the town rises by rather a steep acclivity from the river to an extensive plain. The main street extends along the latter. A large creek, rising in the Farmington hills, crosses the city nearly at right angles, and is traversed by a substantial bridge to the main street. Surrounded by a thickly populated and well cultivated country. Hartford is a very active and flourishing place; it is at the head of sloop navigation. The amount of shipping loaded here is between 9,000 and 10,000 tons. Public buildings, besides common schools and places of public worship, are a State house, State arsenal, 2 banks, 2 insurance companies, 7 or 8 printing offices, an academy, museum, and an asylum for the deaf and dumb. The Connecticut river is crossed opposite the city by a fine bridge, erected at an expense of upwards of \$100,000. Cent. W. C. 4 22 E., lat. 41 46. Pop. 1820, 47,234; and in 1840, 9,468.

Hartford, town, Oxford co., Me., 12 ms. NE. of Paris. Pop. 1840, 1,472.—Town, Windsor co., Vt., 15 ms. above Windsor. Pop. 2,000.—Tp., Hartford co., Ct., including the city of the same name. Pop. 1840, exclusive of the city, 3,325.—Town, Washington co., N. Y., on a branch of Wood creek, 54 ms. N. from Albany. Pop. 1840, 2,164.—Village and seat of justice, Pulaski co., Ga., on the left bank of Ocklawaha river, 50 mss. SSW. from Milledgeville. Lat. 32 18 N., lon. W. C. 6 37 W.—Village and seat of justice, Ohio co., Ky., on the left bank of Green river, 45 ms. N. from Russelville. Lat. 37 25 N., lon. W. C. 9 46 W.—Town, Trumbull co., Ohio, on the eastern side of the co., 17 ms. NE. by E. from Warren, the county seat.—NW. tp. of Licking co., Ohio; post office name, *Granby*; which see.—Town, Dearborn co., Ia., on Loughery creek, 7 ms. from Lawrenceburg, and 5 from Ohio river.

Hartland, town of Eng., in Devonshire, on the Bristol channel, near a promontory called Hartland point, 28 ms. W. of Barnstable, and 213 W. by S. of London. Lon. 4 31 W., lat. 51 12 N.—Village, Somerset county, Me., by post road 128

miles NNE. from Portland.—Town, Windsor county, Vt., lying on the W. side of Connecticut river, about 9 miles N. of Windsor. Pop. of the tp. 2,400.—NW. town, Hartford co., Conn., on the E. branch of Farmington river. Pop. in 1820, 1,254.—NE. town, Niagara county, N. Y., on Lake Ontario. Pop. in 1820, 1,448.—Village, Huron co., O., 9 ms. SE. of Norwalk, the county seat.

Hartlepool, seaport of Eng., in the co. of Durham. It is 16 miles NE. of Durham, and 254 N. by W. of London. Lon. 1 4 W., lat. 54 47 N.

Hartleton, village and NW. tp., Union county, Pa. Pop. in 1820, 1,239.

Hartley, town of England, in Northumberland, NW. of Tinmouth, where Lord Delaval has constructed a haven, whence coal is shipped to London. Here are large salt, copperas, and glass works; and a canal has been cut through a solid rock to the harbor.

Hart's Grove, village, southwestern part of Ashtabula county, O., 17 miles SW. of Jefferson, the county seat, and 13 or 14 E. of Chardon.

Hart's Store, Albemarle co., Va., by post road 149 ms. SW. from W. C.

Hartville, village on a branch of Wappinger's creek, Dutchess co., N. Y., 12 miles NE. by E. from Poughkeepsie.

Hartsville, village, Buck's co., Pa.—Village, Sumner county, Tenn., 60 miles N. from Murfreesborough.

Hartwick, town, Otsego co., N. Y., 5 ms. SW. from Cooperstown. Pop. in 1820, 2,579.

Hartz, mountainous and forest district, principally in the S. of Hanover, in N. Germany. It is particularly remarkable for the quantity and excellence of its mineral treasures, especially iron, copper, and lead. The annual tenth of the iron mines produces a revenue exceeding 115,000 pounds sterling—upwards of 510,000 dollars.

Hartsgerode, town of Upper Saxony, situated near the Hartz mountains, in the principality of Anhalt Bernburg. Lon. 11 2 E., lat. 51 46 N.

Harutch, or *Haroodje*, a sandy and mountainous desert of Africa, between Fezzan and Barca. The Harutch is in great part composed of black basaltic rocks, or calcareous stones admixed with marine petrifications. Central latitude 28° N., longitude 18° East.

Harvard, town, Worcester co., Mass., 20 miles NE. from Worcester. Pop. in 1820, 1,597.

Harvard College.—See *Cambridge*, Middlesex county, Mass.

Harvey, village, Green co., Penn.

Harvey's Island, island in the South sea. Lon. 151 48 W., lat. 19 17 S.

Harvell's, post office, Dinwiddie co., Va., about 35 ms. S. from Richmond.

Harwich, seaport and borough of England, in Essex. Here the packet boats are stationed that go to Germany and Holland. Harwich is 42 ms. E. by N. of Chelmsford, and 72 ENE. of London. Lon. 1 25 E., lat. 52° N.—Tp., Kent county, U. C., extending between Lake Erie and the river Thames.—Town, Barnstable county, Mass., on Barnstable bay, 9 miles from Chatham, and 8 from Yarmouth. Pop. in 1810, 1,942; in 1820, 1,980.

Harwinton, village and township, Litchfield co., Conn., 23 ms. W. from Hartford.

Hasba', province of Africa, in Barbary, and in the kingdom of Morocco.

Haselfelde, ancient town of Germany, in Lower Saxony.

Haslem, island of Denmark, in the Cattegat, at the entrance of the Baltic, N. of Zealand. Lon. 11 51 E., lat. 56 21 N.

Haslemere, borough of Eng., in Surry, 12 miles SW. of Guildford, and 43 of London. Lon. 38' W., lat. 51 6 N.

Haslingden, town of England, in Lancashire, 16 miles N. by W. of Manchester, and 196 NNW. of London. Lon. 2 16 W., lat. 51 40 N.

Hasself, handsome town of the kingdom of Holland, in Overysse, seated on the Vecht, 5 ms. N. of Zwoll. —Town of Germany, in the territory of Liege, seated on the Demer, 20 miles NW. of Mæstricht.

Hasli, small territory of Switzerland, in the canton of Bern.

Hastenbeck, town in the principality of Calenberg, in Lower Saxony, 5 ms. SE. of Hamelin.

Haste River Mills, Culpeper co., Va.

Hastings, borough of England, in Sussex. It is one of the Cinque Ports, 24 ms. E. of Lewes, and 64 SE. from London. Lon. 46' E., lat. 50 52 N. —Co. of U. C., opposite the bay of Quinte, and W. from Lenox county, extending from the bay of Quinte to Ottawa river.

Halborough, village, Montgomery county, Pa., on Penepack creek, 17 l.s. N. from Philadelphia.

Hatchersville, post office, Chesterfield co., Va., 11 ms. southwardly from Richmond.

Hatche's, village, Onslow co., N. C., by post road 100 ms. NE. from Raleigh.

Hatchy, Big, river, Tennessee and Mississippi, rises in the latter, and, flowing NW., enters Henderson and Madison counties in the former, gradually turns to the W., and enters Mississippi river at lat. 35 30 N.

Hatfield, town, Hampshire co., Mass., 5 miles above Northampton. Pop. in 1820, 823. —Tp., Montgomery county, Pa., on the line between that and Bucks county, 24 miles NNW. from Philadelphia. Pop. in 1820, 756. —Town of Eng., in Herts, on the river Lea, 20 miles NNW. of London. Lon. 10' W., lat. 51 48 N.

Hatfield-Broad-Oak, or *Hatfield Regis*, town of Eng., in Essex, 30 ms NNE. of London. Lon. 20' E., lat. 51 48 N.

Hatherly, town of England, in Devonshire, on a branch of the river Towridge, 6 ms. NW. of Exeter, and 201 W. by S. of London. Lon. 4 9 W., lat. 50 52 N.

Hatley, tp. of Richelieu and Buckingham cos., L. C., on Lakes Memphramagog, Scaswaninepus, and Tomefobi.

Hattem, town of the kingdom of the Netherlands, in Guelderland, seated on the Yessel, 5 ms. SW. of Zwoll.

Hattengen, town of Germany, in the circle of Westphalia, in the county of Marck, seated on the Roer, 17 miles ENE. of Dusseldorp. Lon. 7 14 E., lat. 51 17 N.

Hatteras Cape, North Carolina. It is the salient point of a very long reef of sand extending from Ocracoke to New Inlet. The cape, properly so called is at lon. W. C. 1 30 E., lat. 35 15 N.

Havana, city and seaport on the NW. part of

Cuba, two miles in circumference, and the capital of the island. The houses are elegant, built of stone, and the churches are rich and magnificent. The harbor is capable of containing upwards of 1,000 vessels, and the entrance so narrow that only one ship can enter at a time, is defended by two strong forts, called the Moro and the Punta; there are also many other forts and platforms, furnished with artillery. Here all the ships that come from the Spanish settlements rendezvous for their return to Spain. This city was taken by the English in 1762, but restored to the Spaniards in 1763. It is seated on the W. side of the harbor and watered by two branches of the river Laguna. Lon. W. C. 5 2 W., lat. 23 12 N.

Havana, province of the island of Cuba, comprising the sub-provinces of Matanzas, Trinidad, Santa Espirito, Remedios, and Villa Clara. P. 421,397; of whom 197,768 are whites, 58,500 free colored persons, 14,000 troops, and 25,000 transient. Havana, principal city. —Post office, Greene co., Ala., 53 miles SW. from Tuscaloosa.

Havant, town of Eng., in Hampshire, between Fareham and Chichester, 7 miles NE. of Portsmouth, and 64 W. by S. of London. Lon. 58' W., lat. 50 52 N.

Havel, river of Germany, in Prussia, rises on the southern borders of Mecklenberg, and, contrary to most streams on the great slope of Northern Germany, flows S. a little W. 70 miles to Spandau, where it receives the Spree. The Havel joins the Oder by the canal of Finau, which, leaving the former 20 miles N. from Berlin, unites with the latter at Odersburg. It is 23 miles long, averaging 130 feet by 13 locks. It was begun in 1600, but was not completed until 1751. Below Spandau, the Havel flows nearly SW. about 12 miles to Potsdam, where it abruptly turns to NW. 10 miles and thence again SW. 10 miles to New Brandenburg. At the latter place the canal of Plauen, from the Elbe, branches nearly W. directly to the Elbe, which it joins below Magdeburg. This canal is 17 miles long, and falls towards the Elbe by three locks; width 23 feet. The engineer, M. Havel, under the direction of Frederick II. The canal of Plauen shortens the navigation from New Brandenburg to Magdeburg 76 miles—the distance being 93 miles down the Havel and up the Elbe, but, as we have seen, only 17 miles from river to river. Below New Brandenburg the Havel turns to N. by N. 30 miles, where it falls into the Elbe at Werben. Though only 130 miles in length, the Havel is, from its position, one of the most important rivers in Germany, affording a direct and commodious inland navigation from the Elbe to the Oder.

Havelberg, town of Germany, in the electorate of Brandenburg. It is seated on the Havel, 12 miles NW. of Brandenburg. Lon. 12 26 E., lat. 53 5 N.

Havenstein, small village in Suabia, on the Rhine, 13 ms. NW. of Baden.

Haverford, tp., Delaware co., Penn., on the side of Darby creek, 6 miles W. of Philadelphia.

Haverfordwest, borough of Wales, in Pembrokeshire, 15 miles S. by E. of St. David's, and 329 W. of London. Lon. 5° W., lat. 51 50 N.

Haverhill, town, Grafton co., N. H., on the side of Connecticut river, 35 miles NW. by N.

Hartmouth College.—Considerable town, Essex county, Mass., lying on the NW. side of the river Merrimack, 15 ms. W. from Newburyport, and 32 from Boston. It carries on a brisk trade, foreign and domestic.—Town of Eng., in Suffolk, 5 miles SW. of Bury, and 59 NE. of London. Lon. 28' E., lat. 52 6 N.

Havering Bower, village of Eng., in Essex, 3 NE. of Rumford.

Haverstraw, town, Rockland co., N. Y., on the N. side of Hudson river, 33 ms. N. of New York, 120 S. of Albany.

Havre de Grace, a considerable seaport of Fr., in the dep. of Lower Seine, and late province of Normandy, on the English channel, in a large plain at the mouth of the river Seine. It is a small fortified town, divided into two parts by the harbor, bounded with a wall and other works, and defended by a strong citadel, which, together with foreign trade, makes it one of the most important places in France. It is 45 ms. W. of Rouen, 112 NW. of Paris. Lon. 11' E., lat. 42 29 N.

Havre, village and seaport on the right bank of Susanna river, at its mouth, Harford county, Md., 3 ms. NE. from Baltimore. Lat. 39 35 N., lon. W. C. 58 E.

Haut-rive, town of France, in the dep. of Upper Garonne, and late province of Languedoc, seated on the Arriege. Lon. 1 26 E., lat. 43 26 N.

Hautvilliers, town of Fr., in the dep. of Marne, late province of Champagne, where the best champagne wine is made. It is seated on the Meuse, 20 ms. S. by E. of Rheims.

Haw, river, N. C., which rises in Rockingham near the northern border of the State, and, flowing SE. joins Deep river in Chatham, and forms the NE. branch of Cape Fear river.

Hawesville, village and seat of justice, Hancock co., Ky., situated on the Ohio river, by post road 3 ms. SW. by W. from Frankfort. Lat. 37 50, lon. 9 45 W. of W. C.

Hawaiian Islands.—See *Sandwich Islands*, as explained in article *Australia*, under the head of *Hawaii*, or *Owhyhee*, pp. 114, 115.

Hawick, pleasantly situated town of Scotland, in Berwickshire, seated on the Tiviot, amid woods, rocks, cataracts, and bridges, 15 ms. SW. of Kelso.

Hawke, tp., Rockingham co., N. H., 20 miles S. from Portsmouth.

Hawkebury, river of New Holland, which rises in the mountains far inland, and, flowing E., falls into Broken bay.

Hawkesbury, tp. in the co. of Prescott, U. C., on the Ottawa river, adjoining to L. C.

Hawkins, co. of Tennessee, bounded by Va., N., S. Van co., Tenn., E., Greene and Jefferson S., and W. W., and Claiborne NW. Length 40, mean width 17 ms.; area 480 sq. ms. Surface much broken by hills and mountains. Being traversed by the Holston river in the entire length of the county, and drained by numerous minor creeks, it contains much excellent alluvial soil. Chief town, Rogersville. Pop. in 1820, 10,949; in 1840, 15,035. Central lat. 36 20 N., lon. W. C. 6° W.

Hawley, town, Franklin co., Mass., 14 ms. S. by W. from Greenfield. Pop. 1820, 1,089.

Haw River, post office, Orange co., N. C., by post road 65 ms. W. from Raleigh.

Hawesville, seat of justice, Hancock co., Ky., situated near the Ohio river, 40 ms. a little S. of W. of Brandenburg, and 25 NW. by W. from Hardinsburg. Pop. in 1840, 420.

Hawkshead, town of Eng., in Lancashire, situated in Fourness, 24 ms. NNW. of Lancaster, and 273 of London. Lon. 3 6 W., lat. 54 24 N.

Hawswater, lake of Eng., in Westmoreland, S. of Penrith, 3 ms. long, and half a mile over in some places. It is almost divided in the middle by a promontory of enclosures, so that it consists of two sheets of water.

Hawthornden, ancient building of Scot., a few ms. to the SE. of Edinburgh, famous for some artificial caves cut out of the solid rock. It was the seat of Drummond, the poet and historian.

Hay, town of Wales, in Brecknockshire, between the Wyll and Dulas, 15 ms. NE. of Brecknock, and 151 W. by S. of London. Lon. 3 4 W., lat. 51 59 N.

Hay Bay, in the tp. of Fredericksburg, running southwesterly into East Bay, makes the fork of the N. channel of the Bay of Quinte, U. C.

Haycock, tp. of Bucks co., Pa., on the N. side of Tokickon creek, 22 ms. NW. of Newton. Pop. in 1810, 836; in 1820, 926.

Haye, town of Fr., now in the dep. of Indre and Loire, lately in the province of Touraine. It is memorable for being the birthplace of Des Cartes, and seated on the Creuse, 25 ms. S. of Tours, and 135 SW. of Paris. Lon. 46' E., lat. 46 56 N.

Haylsham, town of Eng., in the co. of Sussex, 12 ms. E. of Lewes, and 58 SE. of London. Lon. 20' E., lat. 50 55 N.

Haymarket, village, Prince William co., Va., at the distance of 38 ms. W. from Washington.—Village, Muskingum co., O., on the E. bank of Muskingum river, 9 ms. above Zanesville.

Haynes, SE. tp. of Centre co., Pa., in Penn's Valley. Pop. in 1820, 2,350.

Hay's Mills, post office, Shenandoah co., Va., about 80 ms. W. from W. C.

Hay's Cross Roads, otherwise called *Haysville*, village, Vermillion tp., eastern side of Richland co., O., 14 ms. E. of Mansfield.

Haysville, village, Franklin co., N. C., by post road 46 ms. NE. from Raleigh.

Hayti.—See *Domingo, Saint*.

Haytien, Cape.—See *Cape Haytien*.

Haywood, co. of Tenn., in the western part of the State, bounded W. by Lauderdale and Tipton, N. by Dyer and Gibson, E. by Madison, and S. by Hardeman and Fayette. Length 30 miles, mean width 22 ms. Big Hatchie river enters the SE. angle, and flows over the county in a direction a little N. of W. The southern branch of Forked Deer river enters the eastern border, and, flowing towards the NW., leaves the county near its NW. angle, where it enters Dyer co. Chief town, Harrisburg, on Forked Deer river. Central lat. 35 36, lon. W. C. 12 15 W.—A western co. of N. C., bounded by Macon W. and SW., by Buncombe SE. and E., and by Smoky Mountain, dividing it from Tennessee, N. Central lat. 35 30 N., lon. 6° W. of W. C. Chief town, Waynesville, 294 ms. a very little S. of W. from Raleigh. The great body of the co. is an elevated mountain valley, drained by different branches of Tennessee river. Soil in general rough, rocky, and barren,

but with some remarkable exceptions near the streams. Pop. in 1820, 4,073; and in 1840, 4,975. Central lat. 35 20 N., lon. W. C. 6 10 W.

—C. H. and post office, Haywood co., Tenn. *Haywood*, C. H. and post office, now *Waynesville*, by post road 293 ms. SW. by W. from Raleigh.—See *Waynesville*.

Haywoodsborough, village, Chatham co., N. C., in the forks of Cape Fear river, 46 ms. above Fayetteville.

Hazlegreen, post office, Madison co., Ala.

Hazlepatch, post office, Knox co., Ky.

Hazleton's Ferry, Knox co., Ia.

Headford, town of Ireland, in the co. of Galway, and province of Connaught, 12 ms. N. of Galway. Lon. 3' W., lat. 22 12 N.

Head of Elk, Md.—See *Elkton*.

Head of Chester, village, Kent co., Md., about 50 ms. E. from Baltimore.

Head of Cove Neck, village in the NE. angle of Queen's co., N. Y., on Long Island, 24 ms. NE. by E. from the city of N. Y.

Head of Sassafras, village, Kent co., Md., about 50 ms. NE. by E. from Baltimore.

Head of Severn, post office, Anne Arundel co., Md., 10 ms. NW. from Annapolis, and 15 S. from Baltimore.

Health, *Seat of*, post office, Granville co., N. C., by post road 58 ms. NE. from Raleigh.

Heath, town, Franklin co., Mass.

Heath Point, SE. extremity of the island of Anticosti, in the Gulf of St. Lawrence.

Hebardsville, village, Athens co., O., 6 ms. S. of Athens, the co. seat, and 20 ms. a little N. of W. of Troy, on Ohio river, at the mouth of Hocking river.

Hebrides, or *Western Islands*, numerous islands on the W. coast of Scot., the principal of which are Skye, St. Kilda, Lewis and Harris, Uist, Cannay, Staffa, Mull, Jura, and Islay. The situation of these islands in the great Atlantic ocean renders the air cold and moist in most of them.

Hebrides, *New*, a cluster of islands, lying in the S. Pacific ocean, discovered by Quiros in 1606, and considered as part of a great southern continent, under the name of Tierra Australia del Espiritu Santo. They were next visited by Bougainville in 1768, who did no more than discover that the land was not connected, but composed of islands, which he called the Great Cyclades. Captain Cook, in 1774, ascertained the extent and situation of the whole group, and gave them the name they now bear. They lie between 14 25 and 20 4 S. lat., and 166 41 and 170 21 E. lon., extending 125 leagues.

Hebron, town of Palestine, seated at the foot of an eminence, on which are the remains of an ancient castle. The sepulchre of Abraham is shown here, which is visited by Christians and Mahometans. It is 25 ms. SW. of Jerusalem.—Town, Oxford co., Me., 9 ms. S. from Paris. Pop. in 1840, 1,254.—Town, Grafton co., N. H., 35 ms. N. from Concord. Pop. in 1820, 572.—Town, Tolland co., Ct., 18 ms. SE. of Hartford. Pop. in 1820, 2,094.—Town, Washington co., N. Y., 50 ms. NNE. from Albany. Pop. in 1840, 2,500.—Village near the southern side of Licking co., O., at the intersection of the Ohio and Erie canal and national road, 9 ms. a little S. of W.

from Newark, the co. seat, 27 ms. W. of Zanesville, and 27 E. of Columbus. This place is real natural and artificial curiosity. Approaching it we are greeted with the view of a commercial port, large warehouses, and numerous boats, while the flat surface presents all the aspect of a low alluvial tract near a seacoast, and yet you are on summit level 400 feet above the Ohio river. Portsmouth. The Ohio and Erie canal depress both ways from near Hebron. It is a very favorable position to study the peculiar geology of Ohio. Pop. in 1836, about 400; in 1840, 473.

Heckla, mountain and volcano of Iceland, rising to about 5,000 feet, 40 ms. SE. from Skalholt.

Hector, town in SW. tp. Tompkins co., N. Y. between Seneca and Cayuga lakes. Population 1820, 4,012.

Hector, *Northwest*, post office, Tompkins co., N. Y., about 18 ms. a little N. of W. from Ithaca.

Hedjas, province of Arabia, the holy land of the Mahometans, extending along the NE. shore of the Red Sea, and including Mecca and Medina. It has Yemen S., and the interminable Nedjed. Hedjas lies generally between N. lat. 20 and 25 and is in great part mountainous and desert.

Hedomora, town of Dalecarlia, in Sweden, seated on the Lake Hafra, famous for the gunpowder made here; it is 55 ms. NW. of Upsal. Lon. 17 7 E., lat. 60 14 N.

Heermund river.—See *Helmund*.

HEGIRA, or "THE FLIGHT," July 16th, A. D. 622.—See article ASTRONOMY, head *Lunar year*. *Hegira*, tp., Berks co., Pa., on the left side of Schuylkill river, commencing 6 ms. above Reading, at the mouth of Cacoosing creek. Pop. in 1820, 3,605.

Heidelberg, village, Lebanon co., Pa., 30 ms. E. from Harrisburg, and about the same distance N. from Lancaster. It is the chief town of Heidelberg, the NE. tp. of the co. Pop. of the tp. in 1840, 2,827.—Tp. in the western part of York co., Pa. Pop. in 1840, 1,528.—City of Germany, in the circle of the Lower Rhine, with celebrated university. It has manufactures of woolen stuffs, carpets, silk stockings, velvet, and soap. It is seated on the Neckar, over which is a bridge, 12 ms. SE. of Mannheim, and 52 S. from Frankfurt. Lon. 8 38 E., lat. 49 21 N.

Heidenheim, town of Suabia, and in the territory of Brentzhall, 22 ms. N. of Ulm. Lon. 10 E., lat. 48 47 N.

Heila, town of Western Prussia, in Poland, the mouth of the Vistula, on the Baltic sea, 12 ms. N. of Dantzic. Lon. 19 25 E., lat. 54 53 N.

Heiligen Have, seaport of Holstein, in Germany, on the Baltic, opposite the island of Fehmarn. Lon. 10 57, lat. 54 30 N.

Heiligoland, island of the German ocean, lying to the King of Denmark; it is seated between the mouths of the Eider and the Elbe. Lon. 8 20 E., lat. 54 21 N.

Heiligenstadt, town of Germany, belonging to the elector of Mentz, capital of the territory of Etchset. It is seated at the confluence of the Gander and Leina, 30 ms. NW. of Eisnach. Lon. 10 14 E., lat. 51 22 N.

Helder, village of Holland, on Walden Point, N. Holland. It stands on the S. side of the entrance to the Texel, and 45 ms. N. from Amst-

di. A fine canal, admitting frigates, has been recently opened from the Helder to Amsterdam.

Helena, St., island in the Atlantic ocean, 27 ms. in circuit, belonging to the Eng. East India Company.—See *Africa*, p. 31. The inhabitants do not exceed 3,000, including near 500 soldiers and 1,000 blacks, who are supplied with corn and manufactures, by the company's ships, in return for refreshments. The town, called Jamestown, is small, situated at the bottom of a bay on the S. side of the island, between two steep dreary mountains. This island has now become classic ground in history, by becoming the place of exile and death of the emperor Napoleon. He arrived at the island October 13, 1815; died on the 5th, and was buried on the 9th of May, 1821; aged 51 years, 10 months, and 20 days. He was born at Ajaccio, Corsica, August 15, 1769. The remains of Napoleon have been disinterred and removed to France, and there now rest.

Helena, village, Phillips co., Ark., by post road 27 ms. from Little Rock.

Helen's, St., town of Eng., in E. Medina, in the Isle of Wight. It has a large bay, and, in a bay with France, is often the station of the royal navy.

Helicon, now Sangara, mountain of Greece, in Thessaly, near the Gulf of Corinth.

Helier, St., little island near the town of the same name, in the bay of St. Aubin, on the S. side of the island of Jersey.—Capital of the island of Jersey, in the English channel, seated in the bay of St. Aubin, where it has a harbor and a stone pier. The inhabitants are computed to be 2,000.

Heligoland, Helgoland, island in the German ocean, about 28 ms. distant from the mouth of the Weser, Elbe, and Eyder. This island has two good harbors, and about 2,000 inhabitants. It has been in possession of the British since 1807. Lon. 7 55 E., lat. 54 11 N.

Hellam, tp., York co., Pa., between Codorus and Grist creeks, and opposite to Marietta, in Lancaster co. Pop. 1820, 2,062.

Hellas, kingdom of Greece.—See latter part of article *Greece*.

Hellerstown, village, Northampton co., Pa., about the size of Stroudsburg, situated in Lower Merion, near the extreme southern angle of the county, and 4 ms. SE. from Bethlehem.

Hellgate, strait of N. Y., between Long Island and Westchester co. It unites Long Island Sound to the East river, 8 ms. from N. Y.

Hellespont, now *Dardanelles*, river or strait uniting the sea of Marmora with that of the Archipelago. It extends in a NE. and SW. direction. See *Dardanelles* and *Galipoli*.

Helmsdale, river of Eng., in Sutherlandshire, which descends from the mountains bordering on Athenshire, and empties itself into the German ocean, where there is a good salmon fishery.

Helmont, town of the kingdom of the Netherlands, in Brabant, in the low countries, with a strong castle; seated on the Aa, 17 ms. SE. of Middel-Duc, and 20 W. of Venio. Lon. 5 37 E., lat. 51 31 N.

Helmsley, or *Helmsley Blackmore*, town of Eng., in the N. Riding of Yorkshire, in Rhidale, on the Rye, 20 ms N. of York, and 220 N.

by W. of London. Longitude 1° W., latitude 54 19 N.

Helmsstadt, town of Brunswick and Lower Saxony, in Germany, with a university, 20 ms. SE. of Brunswick. Lon. 11 16 E., lat. 52 16 N.—Strong maritime town of Sweden, and capital of a province of Holland.

Helmund, river of Asia, in Cabul, or Afghanistan, the Elymander of the Greeks, the Heermund, Hindmend, &c., of the European geographers, has its sources in the mountains of Cabul, interlocking sources with those of the Amou-Deria, and the small western confluent of the Indus. With a general western course of about 600 ms. along the mean lat. of 32° N., the Helmund falls into the lake Zurroh, without oceanic outlet. The basin of the Helmund comprises one of those natural sections of Asia from which no stream flows towards, or is in any wise connected with, an oceanic outlet. The Helmund basin comprises a surface of 116,000 sq. ms.

Helsingborg, or *Elsinburg*, seaport of Sweden, in the province of Gothland, and territory of Schonen, seated on the opposite side of the sound, 7 ms. E. of Elsinore, and 37 S. of Halmstadt. Lon. 13 2 E., lat. 56 2 N.

Helsingfors, town of Swedish Finland, with a harbor reckoned almost the best in the kingdom. It is 150 ms. E. of Abo. Lon. 25° E., lat 60 20 N.

Helsingia, province of Sweden, bounded on the N. by Jemterland and Madelpadia, on the E. by the Gulf of Bothnia, and on the S. and W. by Dalecarlia and Austria. It is full of mountains and forests, and the employment of the inhabitants is hunting and fishing.

Helston, town of Eng., in the co. of Cornwall, on the Cober, near its influx into Mount's bay. It is one of the towns appointed for the coinage of the tin, and the place of assembly for the W. division of the shire. It is seated on the river Low, and is 11 ms. SW. of Falmouth, and 274 W. by S. of London. Lon. 5 15 E., lat. 50 2 N.

Helvoetsluys, seaport of Holland, on the island of Voorn, where the English packet boat always goes. It is but a small place, consisting only of a handsome quay and two or three little streets. Here some of the Dutch men of war are laid up in ordinary. It is 5 ms. S. of the Briel. Lon. 4 23 E., lat. 51 45 N.

Hemlock, lake of N. Y., Livingston co., discharges into Genesee river by Honey creek.

Hemmingford, tp. of Huntingdon co., L. C., 34 ms. S. from Montreal, and adjoining Clinton co., N. Y.

Hempfield, tp., Lancaster co., Pa., on the NE. side of Susquehannah. Pop. in 1810, 3,431; in 1820, 3,339. It is now divided into E. and W. Hempfield.—Tp. of Westmoreland co., Pa. It is situated on the N. side of Big Sewickly creek, about 25 ms. SE. of Pittsburg. The chief town, Greensburg.

Hempsted, or *Hemel Hempsted*, corporate town of Eng., in Herts, among the hills, on a branch of the Coln, 18 ms. SW. of Hertford, and 23 NW. of London. Lon. 15' W., lat. 51 47 N.

Hempstead, village on Long Island, in Queen's co., N. Y., 23 ms. E. of the city. It is situated on the edge of an extensive plain, 16 ms. long, and

varying in width from 1 to about 4 ms. —Co. of Arkansas. Limits and relative position uncertain. Pop. in 1820, 2,489. —Court-house and post office, Hempstead co., Ark., 120 ms. from Little Rock.

Hen and Chickens, group of small islands in the W. part of Lake Erie, and N. from the Bass islands. By the decision of the commissioners appointed to settle the boundary between the U. S. and Canada, the line runs between the Bass islands and the Hen and Chickens.

Henbury, village of Eng., in Gloucestershire, near Bristol, 2 ms. from St. Vincent's Rock.

Henderson, town, Jefferson co., N. Y., on Lake Ontario, between Chaumont bay and St. Lawrence river. Pop. in 1820, 1,919. —Co. of Ky., bounded by Ohio river N., Davies co., Ky., E., Hopkins S., and Union W.; length 36 ms., mean width 16½ ms., area 600 sq. ms. Surface hilly, and soil fertile. Chief town, Henderson. Pop. in 1820, 5,714; and in 1840, 9,548. Central lat. 37 45, lon. W. C. 10 20 W. —Village and seat of justice, Henderson co., Ky., on the left bank of Ohio river, about 200 ms. by water below Louisville, and 44 above the mouth of Wabash river. Lat 37 48 N., lon. 10 22 W.

Henderson's Store, post office, Botetourt co., Va., by post road 206 ms. W. from Richmond.

Henderson, village, Montgomery co., N. C. —Co., Tenn., bounded by Hardin S., Madison W., Carroll N., and Perry E.; length 28 ms., mean breadth 25, area 672 sq. ms. It is drained by the sources of several branches flowing into Tennessee river, and by Forked Deer river. Central lat. 35 37 N., lon. W. C. 11 20 W. Chief town, Lexington.

Hendersonville, Nottaway co., Va., on Little Nottaway river, 45 ms. SW. by W. from Petersburg.

Hendersonville, or *Henderson's Ferry*, village, Newbury district, S. C., 30 ms. above Columbia.

Hendersonville, village in Sumner co., Tenn., 20 ms. N. from Nashville.

Hendrick's Store, post office, Bedford co., Va., by post road 177 ms. W. Richmond.

Hendricksville, village, Westmoreland co., Pa.

Hendrysburg, village, Belmont co., O., 15 ms. westward of St. Clairsville, on the national road.

Heneago, or *Heneagas*, the two most northern islands of the group of the Bahamas.

Henley, corporate town of Eng., in Oxfordshire, on the Thames, over which is a handsome stone bridge, and sends malt, corn, wool, &c., to London by barges. It is 24 ms. SE. from Oxford, and 35 W. of London. Lon. 46' W., lat. 51 35 N. —Town on the Alne, 10 ms. NW. of Warwick, and 202 NNW. of London. Lon. 1 50 W., lat. 52 23 N.

Henley House, station of the Hudson Bay Company, on Albany river. Lon. W. C. 8 5 W., lat. 52 14 N.

Henlopen, Cape, cape of Delaware, opposite to Cape May, in N. J., at the entrance of Delaware bay. Lat. 38 55, lon. 75° W.

Henneberg, co. of Germany, in the circle of Franconia; it is bounded on the N. by Thuringia, on the W. by Hesse, on the S. by the bishopric of Wurtzburg, and on the E. by that of Bamberg. Mainungen is the capital. —Town of Franconia,

in a co. of the same name, with a castle, 34 N. W. of Bamberg. Lon. 10 38 E., lat. 50 40.

Hennebon, town of France, now in the department of Morbihan, and lately in the province Bretagne, seated on the river Blavet, 22 ms. N. of Vannes, and 260 ms. W. by S. of Paris. Lat. 34° W., lat. 47 50 N.

Henniker, village, Merrimack co., N. H., ms. W. from Concord.

Henrichmont, town of France, now in the department of Cher, and late province of Berry. It was the capital of a district which Henry IV gave his minister the duke of Sully. It is seated on the Sandre, 15 ms. NNE. of Bourges.

Henrico, co., Va., bounded by James river N., Chesterfield S. W., Goochland N. W., Hanover and New Kent N. E., and Charles City S. Length 30 ms.; mean width 10; area 300 sq. ms. Surface moderately hilly. Soil generally of middling quality. Chief town, Richmond. Pop. in 1820, exclusive of that of the city of Richmond 11,600; and in 1840, 33,076. Central lat. —S. Richmond.

Henrietta, town, Monroe co., N. Y., on Genesee river, 15 ms. S. from Rochester. Pop. in 1820, 2,181. —Village, Lorain co., O., at near its western border, 11 ms. westward of Elyria, and 133 ms. NE. by E. of Columbus.

Henry, co. of Va., bounded by N. C. S., Patrick co., in Va. W., Franklin N., and Putnam E. It averages about 20 ms. square; area 400 sq. ms. Surface broken, and soil generally rather sterile. Chief town, Martinsville. Pop. in 1820, 5,624; in 1840, 7,335. Cent. lat. 36 36 N., lon. W. C. 2 45 W. —Co. Ga., bounded by Gwinnett N. W., by Newton N. E., Jasper and Jones E., Fayette S., and Flint river W.; 36 ms. long with a mean width of 22; area 792 sq. ms. Central lat. 33 20 N., lon. W. C. 7 25 W. Pop. in 1840, 11,756. —Court-house and post office, Henry co., Ga., by post road 67 ms. NW. by W. from Milledgeville. —Co. of Ky., bounded by Jefferson S. W., Ohio river W., Gallatin N. and NE., Kentucky river, or Owen co. E., and Shelby S. Length 32 ms.; mean width 12½; area 400 sq. ms. Surface hilly and broken, but soil productive. Chief town, Newcastle. Pop. 1840, 9,557. Cent. lat. 38 30 N., lon. W. C. 8° W. —SE. co. of Ala.; bounded by Chatahoocbee river S., Covington W., and Pike N. Length 50 ms. mean width 27; area 1,350 sq. ms. Pop. in 1820, 2,638. Central lat. 31 15, lon. W. C. 9 30 W.

—Village, Monroe, tp., northeasternmost corner of Muskingum co., O. 16 or 17 ms. NE. of Zanesville. —Co. of O., bounded by Putnam S., Paulding SW., Williams NW., Lucas N. and NE., and Wood SE., extending in lat. from 38 to 41 27, and in lon. W. C. from 6 51 to 17 W. It is 24 ms. square; area 576 sq. ms. Maumee river enters its western border a short distance below Defiance, and about 7 ms. from SW. corner, and winding thence by a general NE. by E. course, leaves the co. about 10 ms. of its NE. corner. The Wabash and Erie canal will pass over this county, along the general course of Maumee river. County seat, Napoleon. Pop. in 1840, 2,503. —Court-house and post office, Henry co., Ala.

Henry, Cape, Va., the S. point of the entrance

to the Chesapeake bay. Lon. W. C. 1° E., lat. 36 58 N.

Henry Cross Roads, post office, Sevier co., Tenn., 200 ms. E., from Murfreesborough.

Henry Point, the E. point of Haldimand Cove, (C.), which is formed by it and Point Frederick to the W.

Henshaw, tp. in the NW. part of Trumbull co., O. Pop. in 1820, uncertain.

Heppenheim, town in Germany, in the electorate of Mentz, with a castle and an abbey. Lon. 8 1 E., lat. 49 29 N.

Heraclea, ancient seaport of Romania. It was very famous in ancient times; and there are still considerable remains of its former splendor. It is 5 ms. W. of Constantinople. Lon. 27 58 E., lat. 40 29 N.

Herat, town of Persia, in Khorasan, 160 ms. E. of Mesched. Lon. 61° E., lat. 34 30 N.

Herault, one of the depts. of Fr., so named from a river which falls into the Gulf of Lyons. It includes part of the late province of Languedoc, and the capital in Montpellier.

Herbemont, town of Austrian Luxemburg, with a castle on a mountain, near the river Semoy, 3 ms. NW. of Chiney.

Herborn, town of Germany, in the circle of the Upper Rhine, and territory of Nassau, with a famous university and woolen manufacture, 8 ms. SW. of Dillenburg. Lon. 8 20 E., lat. 50 2 N.

Herculaneum, ancient city of Italy, 5 ms. E. of Naples. It was overwhelmed by an eruption of Mount Vesuvius, AD. 79.—Town and seat of justice, Jefferson co., Mo., 30 ms. below St. Louis, and 30 above St. Genevieve; and 36 from the Æ Burton, in the lead-mine district. It is the chief emporium of the lead made at the various mines in the interior. Lat. 38 18 N., lon. W. C. 85 6 W.

Hereford, capital of Herefordshire, Eng. It is 2 ms. WSW. of Worcester, and 130 WNW. of London. Lon. 2 35 W., lat. 52 4 N.—Town, Buckingham co., L. C., on the headwaters of Connecticut river, and bounded on Vt.—NE. of Berks co., Penn., on the head branches of the Kiomen creek. Pop. in 1820, 1,431.—Village, Baltimore co., Md.

Herefordshire, co. of Eng., nearly of a circular form, bounded on the E. by Worcester and Gloucester, on the S. by Monmouthshire, on the W. by Radnorshire and Brecknockshire, and on the N. by Shropshire. Its length from N. to S. is 46 ms., its breadth from E. to W. 40, and its circumference 220. Pop. in 1801, 97,557; in 1811, 111,654; and in 1821, 129,714.

Herenthals, town of the kingdom of the Netherlands, in Brabant, seated on the Nethe, 20 ms. NE. of Louvain. Lon. 4 54 E., lat. 51 13 N.

Herford, or *Hervorden*, free imperial town of Westphalia, capital of the co. of Ravensberg, with a famous nunnery belonging to the protestants of the confession of Augsburg, whose abbess was princess of the empire. It is seated on the Weser, 17 ms. SW. of Minden. Lon. 8 47 E., lat. 52 9 N.

Hergrundt, town of Upper Hungary, remarkable for its mines of vitriol, which are extremely rich. The miners, who are numerous, have built

a subterranean town. It is 65 ms. N. of Buda. Lon. 18 15 E., lat. 48 30 N.

Heri, island in the Indian ocean, two ms. NNW. of Ternate. It is pretty high, and not more than 2 ms. in circumference, and appears to be in a perfect state of cultivation, and well inhabited.

Herisau, considerable commercial town of Switzerland, in the canton of Appenzel. It is famous for its manufactures of very fine linen and muslin. It is 7 ms. SW. of St. Gall.

Herk, town of Germany, in the bishopric of Liege, seated on a river of the same name, near its confluence with the Demer, 2 ms. W. of Maestricht. Lon. 5 58 E., lat. 50 52 N.

Herkimer, co. of N. Y., bounded by Otsego co., by Oneida and Lewis W., St. Lawrence N., and Hamilton and Montgomery E.; length 90 ms.; mean width 18; area 1,620 sq. ms. This is one of the most diversified cos. in the U. S., extending from lat. 42 50, to 44 7, and very much broken by mountainous or very high hilly ridges. The climates of its two extremes are very different; deep snows frequently cover the ridges drained by the waters of the Black river, when spring blooms in the valley of the Mohawk. The soil is also excessively varied; no land in the U. S. exceeds in fertility the alluvial bottoms of the Mohawk, and that of the two Canada creeks. The body of the pop. exists on the southern half the co., though even on the branches of Black river much good land extends along the streams. Pop. in 1820, 31,017, and in 1840, 37,477. Central lat. 43 30 N., lon. W. C. 2 10 E.—Village and seat of justice, Herkimer co., N. Y., on the left side of the Mohawk, 78 ms. W. from Albany, and 14 below Utica. This town stands upon a most productive alluvial plain, about one mile above the mouth of West Canada creek. Lat. 43 1 N., lon., W. C. 2 3 E.

Hermanstadt, ancient *Cibinium*, or *Hermanopolis*, large and strong town of, and until 1790 the capital of Transylvania. It is seated on the Ceben, 25 ms. E. of Weissemburg, and 205 SE. of Buda. Lon. 24 40 E., lat. 46 25 N.

Hermitage, post office, Prince Edward co., Va., by post road 105 ms. S. W. from Richmond.

Herne, town in Kent, 6 ms. from Canterbury, with a commodious bay, frequented by colliers.

Hernhut, famous place in Upper Lusatia, in the kingdom of Saxony, between Zittaw and Leobau. Here, in 1722, some persecuted Moravian brethren settled in the fields of the village of Berthelsdorf, belonging to Count Zinzendorf, and began to build another village.

Hermon, tp., Penobscot co., Me., 7 ms. W. from Bangor.

Herdosville, town, Scott co., Ky., by post road 33 ms. NE. from Frankfort.

Hernosand, seaport of Sweden, on the W coast of the Gulf of Bothnia. Lon. 17 58 E., lat. 62 38 N.

Heron, *Pass of*, inlet between Mobile bay and Pascagoula sound, and between the main shore of Alabama and Dauphin island.

Herstal, town of Germany, in the bishopric of Liege, with an ancient castle, seated on the Maese, 3 ms. N. of Liege. Lon. 5 40 E., lat. 50 40 N.

Hertfordshire, co., in Eng., deriving its name from Hartford, or Hertford, the county town, and is bounded on the N. by Cambridgeshire, on the E. by Essex, on the W. by Bedfordshire and Buckinghamshire, and on the S. by Middlesex. It is 35 ms. in length, 27 in breadth, and about 190 in circumference. Pop. in 1801, 97,557; in 1811, 111,654; and in 1821, 129,714.

Hertford, town of Eng., and capital of Hertfordshire. It is the seat of the East India college, 21 ms. N. from London.—Co., L. C., on the right side of the St. Lawrence, opposite the island of Orleans, and bounded by Cornwallis NE., and by Dorchester SW.—Co., N. C., bounded by Va.; N., Chowan river NE. and E., Bertie S., and Northampton W.; length 26 ms.; mean width 14; area 364 sq. ms. Surface level, and soil rather sterile generally. Chief town, Winton. Pop. in 1820, 7,712; and in 1840, 7,484. Central lat. 36 20 N. on the meridian of Washington City.

Hertford, village and seat of justice, Perquimans co., N. C., on Perquimans river, 18 ms. NE. from Edenton.

Hertzberg, considerable town of Germany, in the electorate of Saxony, 35 ms. NW. of Dresden. Lon. 13 17 E., lat. 51 41 N.

Herzegowina, part of ancient Illyria, along the NE. side of the Adriatic sea. It extends from about lat. 43° to 44 20 N., and belongs mostly to the Turks.

Hesdin, strong town of France, now in the department of the straits of Calais, and lately in the co. of Artois; it is a regular hexagon, and surrounded with morasses, seated on the Ganche, 25 ms. SSW. of St. Omer, and 165 N. of Paris. Lon. 2 6 E., lat. 50 24 N.

Hesse, a general name for part of central Germany, now parcelled into several small sovereignties, which it is difficult to discriminate and define, as they not only intermingle with each other, but also with many other States of Germany. The principal States of Hesse are the grand duchy of Hesse Darmstadt, electoral Hesse, or Hesse Cassel, and the Landgravate of Hesse Homburg. Taken as a general term, Hesse extends from the extreme southern part of Hesse Darmstadt, on the Neckar, N. lat. 49 25, to the extreme northern part of Hesse Cassel, on the Wesar, N. lat. 51 40. The entire length of Hesse, from Worms, on the Rhine, to Karlshaven, on the Weser, is about 160 English ms; the joint area 8,400 English square miles.

Hesse Darmstadt, grand duchy of Germany, is formed of two unconnected portions, separated by the territory of Frankfort on the Maine, and by a part of electoral Hesse. The part N. of the Maine is bounded W. by Nassau and the Prussian territory of Wetzlar, and on nearly all other sides by electoral Hesse. The other part, S. of the Maine, is bounded N. by the Rhine and Maine, separating it from Nassau, the territories of Frankfort on the Maine and electoral Hesse, E. it borders on Bavaria, S. on Baden, SW. on Rhenish Bavaria, and NW. on the Prussian province of Lower Rhine.

The representative system of government is established in Hesse Darmstadt. Protestantism is the prevailing religion, but all other sects, Jews not excepted, are tolerated.

The Rhine traverses the southern section of the duchy, and unites with the Maine at Mayen. Hesse is politically divided into the following provinces:

Provinces.	Pop.	Chief towns.	Pop.
Upper Hesse	295,000	Giessen	7
Statenburg	230,000	Darmstadt	20
Rhenish Hesse	185,000	Mayence	25
Total	710,000		

Giessen, capital of Upper Hesse, is more worthy of remark, as being the seat of one of the great German universities.—See article *Giessen*.

The territorial extent of Ducal Hesse is about 3,770 sq. English ms., which, with a population of 710,000, gives 188 to the English sq. m.

Hesse Cassel, or electoral Hesse, is bounded the extreme SW. by the river Maine and territory of Frankfort on the Maine, and by the eastern portion of Ducal Hesse, on the W. by the same part of Ducal Hesse and Waldeck, on the N. by the Prussian province of Lower Rhine, and by the province of Gottingen, of Hanover, on the N. and E. by several small German States, and on the S. by the province of Lower Maine, in Bavaria. The territory of Hesse Cassel, with a peculiar irregular outline, is long and narrow; utmost length 160 ms., and area 4,470 sq. ms. English giving not quite 28 ms. for mean width, and some places does not exceed 5 ms. Though the long and narrow southern part is drained by the Rhinzing and other small streams into the Maine, the much larger portion of electoral Hesse is watered by the higher confluent of the Weser.

The Protestant religion gained early ascendancy in Hesse, and is followed by at least four-fifths of the population, though religious liberty is secured to all, and, amongst others, to 506,000 Jews. The Jews and Catholics comprise about one-fifth of the people.

Provinces.	Pop.	Chief towns.	Pop.
Lower Hesse, or Cassel	290,000	Cassel	26
Upper Hesse	105,000	Marburg	7
Fulda	115,000	Fulda	8
Hanau	86,000	Hanau	12
Total	596,000		

Beside the body of electoral Hesse there are two small detached portions of territory politically connected with it—one, Smalcalde, enclosed between Saxe Meiningen and Saxe Gotha; the other Neuhelm, enclosed in the gr. duchy of Hesse Darmstadt.

Hesse Homburg, Landgravate of, enclosed between the duchy of Nassau and the eastern Hesse Darmstadt. This small, though independent State including only a territory of 160 sq. ms. English, a pop. of 20,000 persons, dates its political existence back to 1595, was in 1806 deprived of its rights but was subsequently reinstated by the Congress of Vienna, and stands as a State of Europe.

Divisions.	Pop.	Chief towns.	Pop.
Hiburg Hessenheim	} 20,000 {	Homburg	3,000

Iesse Hadjar, country of Asia, in Arabia.—
S. art. *Asia*, p. 80.

Itekelum, or *Hoekelum*, town of the kingdom of the Netherlands, in Holland, seated on the Rijn, 5 ms. NE. of Gorcum. Lon. 4 55 E., lat. 51 55 N.

Iteusden, a strong town of the kingdom of the Netherlands, in Holland, seated on the Maese, 8 NW. of Bois-le-Duc. Lon. 5 3 E., lat. 51 44 N.

Hexham, town of Eng., in Northumberland. It is seated on the river Tyne. Hexham has a manufactory of tanned leather, shoes, and gloves, and is 22 ms. W. of Newcastle, and 234 NNW. of London. Lon. 2 1 W., lat. 55 3 N.

Heydon, borough of Eng., in the E. riding of Yorkshire, on a river, which soon falls into the Humber, and was formerly a considerable town, but is now much decayed. It is 6 ms. W. of York, and 181 N. by W. of London. Lon. 0 5 W., lat. 53 45 N.

Heylesem, town of the kingdom of the Netherlands, in Brabant, 14 ms. SE. of Louvain. Lon. E., lat. 50 45 N.

Heytesbury, borough of Eng., in Wilts, 20 ms. S. of Salisbury, and 93 W. by S. of London. Lon. 2 8 W., lat. 51 12 N.

Hiaqui, river of Mexico, in Sonora y Sinaloa, empties into the Gulf of California, after a course of 100 ms. Mouth at lat. 27 30 N.

Hilcatstown, village, Middlesex co., N. J., on the N. of Millstone river, 13 ms. NE. from Trenton.

Hiltstown, Montgomery co., Md.—See *Hyattstown*.

Hibernia, village, Calloway co., Mo., about 100 ms. by land W. from St. Louis.

Hickman, SW. co. of Ky., on Mississippi river, bounded N. by Graves, E. by Callaway and Warren, and S. by the State of Tenn. Length 15 ms., and mean breadth 15, area 675 sq. ms. of town, Columbia. Central lat. 36 40 N., lon. W. C. 12° W.

Hickman, co. of W. Tenn., bounded by Lawrence S., Perry W., Dickson N., and Murray E. Length 33, mean width 22 ms., area 726 sq. ms. Soil hilly, and soil varied. Pop. in 1820, 8,968. Central lat. 35 40 N., lon. W. C. 12° W.

Hickory, or *Mount Pleasant*, village, Washington co., Pa., 11 ms. NNW. from Washington. The seat of justice for the co.

Hickory Creek, post office on a small stream of the same name, flowing into Caney Fork, branch of the Cumberland river, Warren co., Tenn., 35 ms. E. from Murfreesborough.

Hickory Grove, Abbeville district, S. C.—Post office, Henry co., Ga., about 70 ms. NW. by land from Milledgeville.—Village, Montgomery co., Mo., by post road 53 ms. W. from St. Louis.

Hickory Hill, Beaufort district, S. C.

Hicksford, village, Greenville co., Va., on the S. of Meherin river, 69 ms. S. from Richmond.

HIEROGLYPHICS, from Gr., *hieros*, *sacred*, and *glypho*, to engrave, meaning, therefore, *sacred en-*

gravings. It is probable that the earliest mode of writing was hieroglyphic, and made a mystery of by the priesthood.

Hieres, town of Fr., in the dep. of Var, and late province of Provence, seated near the Mediterranean sea, but its harbor being choked up, it is considerable only for its salt works. It is a pretty little town, situated in a beautiful country. This town is the birthplace of Massillon, the celebrated French preacher. It is 12 ms. E. of Toulon, and 350 S. by E. of Paris. Lon. 6 20 E., lat. 43 5 N.—Four islands of France, on the coast of Provence; and opposite to the town of the same name. Their names are Porquerolles, Porteous, Bagueau, and Titan, which last is the largest. Between these islands and the continent is the road of Hieres, which is so capacious and excellent that it has afforded shelter for the largest squadrons. It is defended by three forts.

Hiero.—See *Ferro*.

Hiesmes, town of France, in the department of Orne, and late province of Normandy, seated on a barren mountain, 10 ms. from Seez and 90 W. from Paris.

Higginsport, village on the Ohio river, southwestern part of Brown co., Ohio, 6 ms. a little S. of W. from Georgetown, the co. seat, and 4 below Ripley.

Higham Ferrers, borough of Eng., in Northamptonshire. It is seated on an ascent on the E. bank of the river Nen, 25 ms. ESE, of Coventry, and 66 NNW. of London. Lon. 40' W., lat. 52 19 N.

Highgate, village of Eng., in Middlesex, seated on a hill E. of that of Hampstead and 4 ms. N. by W. of London. On the side next to London the fineness of the prospect occasioned several handsome edifices to be built. Here lord chief baron Cholmondely built a free school in 1562.—Village, Franklin co., Vt. on Missisquoi bay, 33 ms. N. from Burlington.

Highland, co. of Ohio, bounded by Adams and Brown S., the northern extension of Brown W., Clinton NW., Fayette N., Ross NE., and Pike SE.; length from E. to W. 25 ms., mean breadth 18, and area 450 sq. ms.; lying between lat. 39 8 and 39 24 N., and lon. W. C. 6 10 and 6 40 W. This co. was correctly named from its peculiar features and position. It is a true table land, from which creeks flow in nearly every direction: the southwestern branch is of Paint from its NE. section, those of Brush creek from the SE., those of White Oak from SW., and the southeastern confluent of Little Miami from the NW. The surface is high, dry, and rolling, with abundant permanent springs. Wheat of fine, and even superior quality its principal staple. County seat, Hillsboro'. Pop. in 1840, 22,269.—Village, Fairfield tp., northwestern part of Highland co., Ohio, 10 ms. N. of Hillsboro', and 34 ms. nearly due W. from Chillicothe.—Tp., Muskingum co., Ohio. Pop. in 1820, 577.

High Rock, post office, Rockingham co., N. C., 69 ms. N. W. from Raleigh.

Hightstown, village, Middlesex co., N. J., on a branch of Mill river, by post road 19 ms. NE. from Trenton, and 25 a little W. of S. from New Brunswick.

Highworth, town of Eng., in Wilts, on a hill

which stands in a rich plain, 36 ms. N. of Salisbury, and 77 W. of London. Lon. 1 40 W., lat. 51 36 N.

Hildburghausen, Saxe, duchy of central Germany, enclosed between Saxe-Meiningen and Saxe-Cobourg. Pop. 30,000.—Town of Franconia and capital of a duchy of the same name. It is seated on the river Werra, and is 22 ms. N. by W. of Cobourg. Lon. 11 5 E., lat. 50 53 N.

Hildesheim, free imperial city of Lower Saxony, in a bishopric of the same name. It is now capital of the province of the same name in the kingdom of Hanover. It is seated on the Irneste, 17 ms. SSE. of Hanover. Lon. 10 10 E., lat. 52 10 N.—Province of Hanover adjoining Gottingen. Pop. 130,000.

Hillah, or *Hellah*, town of Asiatic Turkey, in Irak Arabia, and pachalic of Bagdad, on the right bank of the Euphrates. Lon. 44 13 E., lat. 33 34 N.—See *Asia*, p. 83.

Hilliardstown, village, Nash co., N. C., by post road 70 ms. NE. from Raleigh.

Hillham, village, Overton co., Tenn., by post road 105 ms. NE. from Murfreesborough.

Hillhouse, village, Leroy tp., Geauga co., Ohio, 7 or 8 ms. NE. Chardon, the co. seat, and about like distance SE. of Painsville.

Hillsborough, co., N. H., bounded by Mass. S., Cheshire W., Grafton N., Strafford NE., and Rockingham E.; length 46 ms., mean width 25, area 1,150 sq. ms. Pop. in 1840, 42,494. Ctl. lat. 43 5 N., lon. W. C. 5 12 E. Surface rocky, hilly, and in part mountainous; soil, however, on the streams, and in many other parts hilly, fertile, and productive in grain and pasturage. Chief town, Hillsborough. The preceding area includes that of Merrimack co. recently formed from part of Hillsboro'.—See *Merrimack*.

Hillsboro', village, Washington co., Pa., on the U. S. turnpike road, almost exactly mid-distance between Washington and Brownsville, 11 ms. from each. This village extends in a single street along the road, and contains about 80 inhabitants. According to Schriver's map, it is elevated 1,750 feet above tide water, 917 above the Monongahela at Brownsville, and 1,002 above the Ohio at Wheeling. Lat. 40 6, lon. W. C. 3 2 W.

Hillsborough, town, Hillsborough co., N. H., W. from Contacook river, and 20 ms. W. from Concord. Pop. in 1820, 1,982.—Tp., Somerset co., N. J., 15 ms. W. from Brunswick. Pop. in 1820, 2,885.—Village, Caroline co., Md., on the E. side of Tuckahoe river, 26 ms. SSW. from Chester.—Village, Loudoun co., Va., 40 ms. NW. from Washington.—Village and seat of justice, Orange co., N. C., on Enos river, 45 ms. NW. from Raleigh. Lat. 36 2 N., lon. W. C. 2 8 W.—Village, Jasper co., Ga., by post road 59 ms. NW. from Milledgeville.—Village, Franklin co., Tenn., by post road 60 ms. SSE. from Murfreesboro'.—Village and seat of justice, Highland co., Ohio, on the rocky fork of Paint creek, 36 ms. W. by S. from Chillicothe, and 62 southwesterly from Columbus. Lat. 39 14 N., lon. W. C. 6 36 W. Pop. in 1800, 974. The situation of this town is high and healthy, and the adjacent country rolling rather than hilly, and land productive.—Village, Montgomery co., Ill., 25 ms. NW. from Unadilla.

Hillsbridge, post office, Halifax co., N. C., post road 116 ms. NE. from Raleigh.

Hillsdale, town, Columbia co., N. Y., 18 SE. of the city of Hudson. Pop. in 1820, 2,5

Hill's Store, post office, Randolph co., N. C. about 60 ms. W. from Raleigh.

Hilton, village, Charles co., Md.—Considerable island on the coast of S. C., opposite Beaufort district. It is about 20 ms. in length, and in breadth. Lon. 80 20 W., lat. 32 10 N.

Hiltown, town, Bucks co., Pa., between N. Britain and Rockhill tps., 17 ms. SW. of Newtown.

Himalaya, chain of mountains in Asia, which extends from Cabul along the N. of Hindoostan and is the general boundary of Thibet, throughout the whole extent from the Ganges to the river Testa. Himalah, Himaleh, from the Sanskrit

Hem, snow, the original and present name of this stupendous chain of mountains which separates Hindoostan from Thibet. The Himalah chain branches from the Hindoo Coosh, in the NW. part of India, and in Afghanistan, and inclining SE. rises between the sources of the Ganges and those of Brahmapootra, to the highest peaks yet measured on earth. By the active and scientific operations of Crawford, Colebrook, Webb, and other British officers, the great elevation of this chain has been determined. The following table exhibits the elevation of some of the principal peaks and ghaats or passes:

	Feet
Niti Ghaut, or pass, (see <i>Ghaut</i>)	16,600
Limit of perpetual snow on the side of Thibet	17,000
Limit of perpetual snow on the side of Hindoostan	12,000
Dhawalagiri peak	26,600
Jamootri peak	25,500
Dhaiboon, seen from Catmandoo	24,500
Another peak seen from do.	24,000
Another peak seen from do.	23,500

The singular circumstance [is, if it is really the limit of perpetual snow in the Himalah chain being higher on the southern than northern exposure, is accounted for by the Malte Brun, from the high plateau of Thibet, affording a reflective surface much nearer the summit than does the more depressed plains of Nepal and Hindoostan. In writing the art. *Asia*, in which, at p. 89, 2d ed. head of *Himalaya*, the opinion is expressed, that the Caucasus and Hindoo Coosh are continuations of that system, I find that Humboldt gives the continuation to the Kuen Luen. From such authority in this case there is no appeal; the more the analogies of structure support the statement of the consummate geographer.

Hinchinbrook Island, one of the N. Hebrides in the S. Pacific ocean. Lon. 168 33 E., lat. 17 25 S.

Hinchinbrook, cape of America, on the Pacific ocean, at the entrance of Prince William's Sound. Lon. W. C. 69° W., lat. 60 16 N.—Island of America, in Prince William's Sound, on which the Russians have factory.

Hinckley, town in Leicestershire. It has a large church with a lofty spire, and a considerable stocking manufactory. It is 12 ms. SW. of Leicester, and 91 NNW. of London. Lon. 1 1 W., lat. 52 34 N.

Hinckley, vil., Medina co., O.—See *Hinkley*

Tindlopen, seaport of the United Provinces, Friesland, seated on the Zuyder-Zee, 20 ms. S. of Lewarden. Lon. 5 10 E., lat. 52 58 N.

Tindmend River.—See *Helmund River*.

Tinesburg, town, Chittenden co., Vt., about 15 ms. SE. from Burlington.

Hindoo Coosh, mountains.—See art. *Asia*. This name is applied to the continuation of the Himalayan system, or the Kuen Luen westward from the Indus river, and separating the sources of the Indus and Cabul rivers from those of the Amoo-Deor and Gihon, and thence through the Persic region under other local names.

Hindoostan, or *India*, celebrated country of which, in its most extensive signification, comprehends the tract situated between the Thibetan and Tartarian mountains on the N., the Indian ocean on the S., the Burrampooter and the Bay of Bengal on the E., and the Indian ocean and the Arabian sea on the W. See art. *Asia*, head, *Indostan*. *Kandahor* and *Cashmere* are, though vaguely considered as Hindoostanic regions.—See *Cashmere*, *Kandahor*, and *Asia*.

Hindostan, village in Martin co., Ia., by post road 147 ms. from Indianapolis.

Hinsdale, formerly *Fort Dummer*, town in Hampshire co., N. H., 75 ms. SW. from Concord.

Hinesburg, town in Chittenden co., Vt., by post road 38 ms. a little N. of W. from Montpelier.

Hinesville, village in Patrick co., Va., 280 ms. S. by W. from Richmond.

Hingham, town of Eng., in Norfolk, 12 ms. S. of Norwich, and 97 NE. of London. Lon. 1 10 E., lat. 52 43 N.—Town in Plymouth co., Mass., 19 ms. SE. of Boston. Pop. of the tp. in 1800, 2,857.

Hinkley, village in Medina co., Ohio, about 15 ms. N. from Columbus, and 12 NE. of Medina.

Hinkson's, post office in Boone co., Mo., by post road 102 ms. W. from St. Charles.

Hinsdale, village in Berkshire co., Mass. Pop. in 1820, 822.—Village in Cattaraugus co., N. Y., on Olean creek, 10 ms. N. from Hamilton, on Alleghany river, and 25 SW. by W. from Angelica.

Hinsdale.—See *Hindsdale*.

Hinzuan, *Joanna*, *St.*, one and the principal of the Comora islands, in the Indian ocean. This is a proper place of refreshment for the East India ships, whose crews, when ill of the scurvy, recover, by the use of limes, lemons, and oranges, and from the air of the land. The town where the king resides is at the E. side of the island; and, though it is three-quarters of a mile in length, it does not contain above 200 houses.

Their principal houses are built with stone, with a quadrangle in the middle, and are only one story high. All the other houses, or rather huts, are chiefly composed of plastered reeds; and yet the squares are tolerable structures, very neat and clean in the inside. Lon. 44 15 E., lat. 12 30 S.

See article *Africa*, p. 30.

Hio, town of Sweden, in W. Gothland, seated on the Lake Wetter, 145 ms. SW. of Stockholm, and 25 E. of Falcoping. Lon. 14 0 E., lat. 53 N.

Hiram, village in Oxford co., Me., 34 ms. SW. from Paris. Pop. in 1820, 700.—Village in Warren co., Ohio, about 12 ms. NE. of Ravenna.

Hirsch Horn, town of Germany, in the palatinate

of the Rhine, with a castle. It is seated on the side of a hill, on the Neckar, near Eberbach.

Hirschfeld, town of Germany, in the circle of the Upper Rhine, capital of a principality of the same name, depending on the house of Hesse-Cassel. It is seated on the Fulde, 16 ms. NE. of the town of Fulde, and 32 SE. of Cassel. Lon. 9 50 E., lat. 50 56 N.

Hirberg, town of Silesia, famous for its mineral baths. It is the most trading place in all Silesia, next to Breslaw, there being in the town and suburbs considerable manufactures. It is seated on the Bosar, 44 ms. SW. of Breslaw.

Hirsova, *Hirsowa*, or *Kerschowa*, town of European Turkey, on the Danube, 45 ms. below Silistria, and 64 above Ismail.

Hispaniola, or *Hayti*.—See *Domingo*, *St.*

Hissar, town of Hindoostan proper, and capital of the sub-province of Hurriana. Lat. 28 56 N., lon. 76 0 E.

HISTORY, from Greek, *historia*, knowledge, research, &c. Recital of facts and events. History ranks amongst the highest and most useful of sciences. It is, indeed, the reflector which enables us to account for the present, and shows us what may be the future, by placing before us the past.

Hitchin, large and populous town in Hertfordshire, 15 ms. NNW. of Hertford, and 34 NNW. of London. Lon. 0 10 W., lat. 51 58 N.

Hithe, or *Hythe*, borough of Eng., in Kent. It is one of the Cinque Ports, and had formerly five parishes, but by the choking up of the harbor it is now reduced to one. It is 10 ms. W. of Dover, and 68 SE. of London. Lon. 1 10 E., lat. 51 8 N.

Hiwassee river, a branch of Tennessee, rises in the NW. part of Ga., and, flowing NW., enters Ten., and falls into Tennessee river, after separating McMinn and Rhea cos. from the Cherokee lands.

Hix's Ferry, post office in Lawrence co., Ark.

Hoi-n-gan-fou, city of China, in the province of Kiang-nan, seated in a marsh, and enclosed by a triple wall. This place is very populous, and every thing in it announces a brisk and active trade.

Hoang-Ho.—See *Yellow river*.

Hoang-tcheou-fou, populous and commercial city of China, in the province of Houquang. Its district contains one city of the second and eight of the third class.

Hoboken, ferry and post office on the W. bank of Hudson river, opposite the city of New York, Bergen co., N. J.

Hobart town, a village and settlement formed in 1801 by the British, on Van Dieman's island, of which it is now the capital.—See *Van Dieman's island*.

Hochberg, marquisite of Suabia, in Brisgaw, belonging to the prince of Baden Boursbach.

Hochstet, town of Suabia, on the Danube, 22 ms. NE. of Ulm. Lon. 10 33 E., lat. 38 48 N.

Hockerland, territory of Germany, and one of the circles of Prussia.

Hockhocking, *Great*, river of Ohio, which empties into the river Ohio, 200 ms. below Pittsburg. It is one of the deepest and best boatable streams of any in the country, in proportion to its quantity of water, but is narrow, not exceeding 50 yards in breadth. Near its source, 7 ms. northwardly from Lancaster, is a very romantic cascade in

the stream, the water falling over a stratum of rock of about 40 feet perpendicular height. A flouring mill, five stories high, is erected on this fall; and 24 or 25 ms. below this is another perpendicular fall of 7 feet. Excepting the interruption of the lower falls, and some mill dams latterly erected, this river is navigable about 70 miles. Among the branches of Hockhocking are Rush creek, Sunday, Monday, Margaret's, and Federal creeks.

Hocking, interior co. of Ohio, bounded on the N. by Fairfield and Perry, E. by Athens, S. by Jackson, and W. by Ross cos. It is 26 by 24 ms. in extent, and contains 432 sq. ms. The land is generally hilly and broken. It however contains considerable fertile and valuable land, particularly along the borders of Hockhocking river, which runs across the southeastern quarter of the co. from NW. to SE. The head waters of Raccoon and Salt creeks are also in this co. Chief town, Logan. Pop. in 1820, 2,130; in 1840, 9,741. Central lat. 39 30, lon. W. C. 5 35 W.—Central tp. of Fairfield co., Ohio, in which is situated the town of Lancaster.

Hoddesdon, town of England, in Herts, near the Lea, 3 ms. S. of Ware, and 17 N. by E. of London. Lon. 0 5 E., lat. 51 49 N.

Hoei-tcheou, the most southern city of the province of Kiang-nan, in China, famous for its teas, varnish, and engravings. It is one of the richest cities in the empire, and has six cities of the third class dependent on it.

Hoei-tcheou-fou, commercial city of China, in the province of Quang-tong. Its jurisdiction contains eleven cities of the second and third classes.

Heukelum.—See *Heukelum*.

Hoesht, town of Germany, in the electorate of Mentz, seated on the Maine, 3 ms. from Frankfort.

Hogansburg, village in Franklin co., N. Y., by post road 267 ms. NNW. from Albany.

Hogansburg, post office in Franklin co., N. Y., by post road 231 ms. from Albany.

Hogestown, village in Cumberland co., Pa.

Hog island, below Peach island, is situated in the strait of Detroit, where it opens into Lake St. Clair; the lower end of it is about 2 ms. from Detroit.—Island of Lake Champlain, forming part of Franklin co.

Hogg's Store, post office in Newberry district, S. C., by post road 46 ms. NW. from Columbia.

Hogue, *Gape la*, the NW. point of Normandy, in France. Lon. 1 52 W. lat. 49 45 N.

Hohenlinden, town of Bavaria, 22 ms. E. from Munich.

Hohenlohe, or *Holach*, principality of Franconia, W. of the margravate of Anspach, abounding in wine, corn, wood, and cattle. Since 1809, Hohenlohe forms part of the kingdom of Wirtemberg. The chief town is Obringen.

Hohenmant, town of Bohemia, on the river Meta, 13 ms. E. of Chrudim.

Hohenstein, ancient castle of Upper Saxony, in Thuringia, which gives name to a county. It is situated on a mountain, at the foot of which is the village of Neustadt, 5 ms. NNE. of Nordhausen.

Hohentwiel, fortress of Suabia, surrounded by the county of Nellenburg, on a mountain, 9 ms. ENE. of Shaffhausen.

Hohenzollern, the principality is enclosed between Baden and Wirtemberg, extending about ms. in length, with a very irregular outline, between N. lat. 47 50 and 48 30. The southern part is traversed by the Danube and the north by the Neckar. Territorial extent and population

	Sq. ms.	Inhabita
Hohenzollern Sigmaringen	- 340	38,0
Hohenzollern Hechingen	- 50	15,0
Total	- 390	53,0

Hohenzollern, town of Suabia, in the principality of the same name, the seat of the ancient counts of Hohenzollern. It is seated on a branch of the Neckar, 16 ms. S. by W. of Tubingen. The principality is now divided into the two houses of Hechingen and Sigmaringen. Lon. 9 8 E., lat. 48 23 N.

Hohnstein, town of Upper Saxony, in Misnia, on the river Mulda, 11 ms. NE. of Zwickau.

Hokesville, village in Lincoln co., N. C., post road 157 ms. SW. by W. from Raleigh.

Ho-kien, city of China, of the first rank, in the province of Pe-tcheli, situate between two rivers, 85 ms. S. of Peking. Lon. 116 23 E., lat. 38 40 N.

Hola, town of Iceland, at the mouth of a river on the N. coast. Lon. 19 20 W., lat. 65 40 N.

Holbeach, town of England, in Lincolnshire, 12 ms. S. by E. of Boston, and 109 N. by E. of London.

Holbeck, seaport of Denmark, in the island of Zealand, with a good harbor, from which great quantities of corn are annually exported. It is 30 ms. W. of Copenhagen. Lon. 11 44 E., lat. 55 42 N.

Holden, town in Worcester co., Mass., 6 N. from Worcester. Pop. in 1820, 1,402.

Holderness, town in Grafton co., N. H., on the Merrimack, 35 ms. above Concord. Pop. in 1820, 1,160.

Hole in the Wall, village in Talbot co., Md., ms. S. from Easton.—Remarkable rock in the West Indies, in the island of Abaco. Lon. W. 10 W., lat. 25 50 N.

Holland, province of the kingdom of the same name, bounded by the German ocean W., Zealand S., the Zuyder Zee and province of Utrecht. In point of cleanliness, no country surpasses it, and few come up to it, especially in North Holland and that even in the villages. It has considerable linen and woolen manufactures, and numerous docks for the building of ships. The established religion is Calvinism, but all religious sects are tolerated. Amsterdam is the capital.

Holland, a kingdom of Europe, deriving its title from the name of its most considerable province extending in lat. from 51 15 to 53 35 N., and in lon. from 3 25 to 7 15 E. of London. Greatest length 180 ms. in a direction nearly NE. from the southwestern angle of Zealand to the Dollart bay or mouth of Ems river. The surface generally not simply level, but flat, and presenting a network of bays, rivers, lakes, and canals, is indisputably the most astonishing conquest ever achieved by human talent and labor over the asperities of nature. The following table contains its provincial divisions, extent, and population:

Provinces.	Area in sq. ms.	Pop.	Principal cities.	Pop.
Holland	928	419,424	Amsterdam	202,364
Holland	1,166	456,520	Hague	56,015
Holland	588	137,314	Middleburg	14,709
Holland	542	131,336	Utrecht	43,707
Holland	2,018	315,053	Arnheim	14,509
Holland	1,293	181,361	Zwolle	15,640
Holland	788	65,397	Assen	2,184
Holland	778	162,035	Groningen	30,260
Holland	1,151	212,244	Lieuwarder	20,938
Holland	1,653	349,700	Bois-le-Duc	20,490
Total	10,905	2,460,934		

In the case of Holland, we have on 10,905 sq. m. an aggregate which gives a distributive pop. very near 226 to the single sq. m. Was such a country as Holland now discovered, and in a state of nature, it would be pronounced as scarcely fit at all, habitable, and, in its actual state, gives the most conclusive of all proofs how much the production of countries depends on the application of human labor. Were the 209,000 sq. m. computed in the Spanish peninsula equally populated as Holland, the number on the former would be 234,000; and, were only 2,000,000 of the population of the United States peopled equal to Holland, 2,000,000 would be the living multitude.—See *Article Europe*.

The surface united, of Holland and Belgium, is one natural section, to which all the rivers of consequence are common. Advancing from the N. to NE., the Scheld, Meuse, Rhine, Yssel, and Vecht, all having their sources beyond the limits of those two small kingdoms, traverse the surfaces, and, with innumerable smaller streams and interlocking currents and canals, render both, but Holland more especially, a congeries of islands.

Holland, New.—See *New Holland, Oceanica, Australia, &c.*

Holland, tp., Orleans co., Vt., 56 ms. N. from Montpelier.—Town, Hampden co., Mass., 20 ms. E. from Springfield.

Holland, town, Erie co., N. Y., 20 ms. SE. of Buffalo. Pop. in 1820, 768.

Hollenbeck's, post office, Berkshire co., Mass., 10 ms. W. from Boston.

Holles, town, Hillsborough co., N. H., on the N. side of Merrimack river, between Dunstable and Merrimack tps. Pop. in 1820, 1,543.

Holley, town, Genesee co., N. Y., 10 ms. W. from Albany.

Holiday Cove, village, Brooke co., Va., 30 ms. W. from Washington, Penn.

Holiday'sburg, village of Huntingdon co., Pa., 10 ms. SW. by W. from Frankstown. This village has gained importance from being the point of connection on the Pennsylvania line of canal and railroad of the two modes of transportation. Pop. in 1820, 1,896.

Hollis, town, York co., Me., on Saco river, 10 ms. N. from York. Pop. in 1820, 1,762.

Hollingsworth's Farm, post office, Habersham co., Ga., by post road 137 ms. N. from Milledgeville.

Hollis, town between Nashua and Souhegan rivers, Hillsborough co., N. H., 40 ms. a little W. of S. from Concord.

Holliston, town, Middlesex co., Mass., 27 ms. SW. from Boston.

Holm, town of Eng., in Cumberland. It is a place seated on an arm of the sea, 12 ms. N. of Cocker mouth, and 310 NNW. of London. Lon. 3 19 W., lat. 54 53 N.

Holmesburg, village, Philadelphia co., Penn., on the post and stage road to N. Y., 10 ms. NE. of Philadelphia.

Holmes' Hole, town, Dukes co., Mass., on Martha's Vineyard, 9 ms. from Falmouth. It contains about 70' houses, and 350 inhabitants.

Holmesville, village, Pike co., Mo., 45 ms. NW. from St. Charles.

Holstein, duchy of Germany, bounded by the German ocean on the W., the Baltic on the E., the duchy of Mecklenburg on the SE., that of Bremen, with the river Elbe, on the SW., and Lauenburg, with the territory of Hamburg, on the S. Its greatest length is about 80 ms., and its breadth 60. A great part of this country consists of rich marsh, which being much exposed to inundations both from the sea and rivers, dikes have been raised at a great expense to guard and defend them. Hamburg and Lubeck supply the inhabitants with what they want from abroad; from whence and Altena they export some grain, malt, groats, starch, buckwheat, peas, beans, rapeseed, butter, cheese, sheep, swine, horned cattle, horses, and fish. The manufactures of the duchy are chiefly carried on at Altena, Kiel, and Gluckstadt. Denmark now possesses the whole duchy, the imperial cities excepted. The king of Denmark, as Duke of Holstein and Lauenburg, is a member of the Germanic diet, and entitled to three votes in the general assembly. Holstein canal has its eastern mouth in the gulf of Kiel, between the city of the same name and the fortress of Fredericstort, near the mouth of the small river Lewensan. It passes by Holtenu, Knoop, and Ratmansdorf, joining the Lake Flemhud. Entering the Upper Eyder near Forth, it traverses the city of Rendsburg. The navigation then continues along the Lower Eyder, passing between the cantons of Eyderstedt and Ditmarsen, until terminating in the German ocean a short distance below the town of Tonningen. This canal has in every part a depth of 10 feet, 50 feet width at the bottom, and 100 on the surface. Flemhud lake is 27½ feet above the Baltic, and 22 above the Lower Eyder. There are three locks, on each side of Lake Flemhud. The entire length of this navigation from the Baltic to the German ocean is about 100 Eng. ms.—See *Denmark*, p. 272.

Holston, navigable river in Tenn. It rises in Va., and, running in a SW. direction, passes by Knoxville, and falls into the Tennessee near the town of Maryville.

Holt, town of Eng., in Norfolk, 20 ms. NNW. of Norwich, and 122 NE. of London. Lon. 1 6 E., lat. 53 5 N.

Holt's Store, post office, McMinn co., Tenn., 157 ms. by post road SE. from Murfreesborough.

Holy Island, island of Eng. on the coast of Northumberland, 6 ms. SE. of Berwick. It is 2 ms. long, and one broad. The soil is rocky and full of stones. It has a town and a commodious harbor, defended by a blockhouse. On this island, which is likewise called Lindisfarne, are the ruins

of a stately monastery; and here was anciently a bishop's see, removed with the body of St. Cuthbert, first to Chester le Street, and afterward to Durham.

Holyhead, seaport and cape of Eng., in the isle of Anglesea. It is the most usual place of embarkation for Dublin, there being packet-boats that sail for that city every day, except Tuesday, wind and weather permitting. Holyhead is 93 ms. WNW. of Chester, and 276 N.W. of London. Lon. 4 22 W., lat. 53 19 N.

Holywell, town of Wales, in Flintshire. It takes its name from the famous well of St. Winifred, concerning which so many fables and superstitious notions have prevailed. It is a copious stream, bursting out of the ground with a considerable degree of impetuosity. Besides the cold bath, celebrated for wonderful cures, formed at the spring head, and covered with a beautiful Gothic shrine, it is now applied to the purpose of turning several mills for the working of copper, making brass wire, paper, and snuff, and spinning cotton. It is 10 ms. E. of St. Asaph, and 212 N.E. of London. Lon. 3 21 W., lat. 54 13 N.

Homburg, 150 ms. N. of Frankfort. Lon. 9 26 E., lat. 50 45 N.—See *Hesse Homburg*, art. *Hesse*.

Homburg, town of Germany, in the duchy of Deux Points, between the Moselle and the Rhine, 50 ms. S.E. of Treves. Lon. 7 32 E., lat. 49 16 N.

Homer, town and seat of justice, Cortlandt co., N. Y., on the Tioughnioga creek, branch of Chenango river, 145 ms. W. from Albany. Pop. 1820, 5,504; and in 1840, 3,572. Lat. 42 38 N. lon. 0 47 E.

Homochitto, river, Miss., rises in Hinds and Lawrence cos. flows SW. through Franklin and Amite, and between Wilkinson and Adams cos., falls into the Miss., 44 ms. below Natchez, after a comparative course of 70 ms.

Honan, province of China, bounded on the N. by the province of Petcheli and Chau-si, on the E., Kiangsi and Chantong on the S., by Houquang, and on the West by Chensi. As every thing that can contribute to render a country delightful is found in this province, the Chinese call it Tonghea, the middle flower.

Honan-fou, city of China, in the province of Honan. It has under its jurisdiction one city of the second class and 13 of the third. It is 500 ms. SW. of Peking.

Honduras, large province of Guatemala, capital of Valladolid.—See *America*, p. 55.

Honduras, Bay, or Gulf of, is that part of the Caribbean sea lying betw. Honduras and Yucatan.

Honesdale, a flourishing village, Wayne co., Penn., at the junction of Dyberry creek with the Lackawaxen river, 24 ms. above the junction of the latter with Delaware river, at an elevation above the Atlantic tides of 816 feet. The situation is delightful, and here, as at many other places, canals and roads have produced, almost instantly, a town, with all the attributes of business, wealth, and population, possessing intelligence and independence. Honesdale stands at the point of connexion between the Lackawaxen canal and railroad; by the latter, 17½ ms. eastward from Carbon-dale, and 130 ms. N. from Philadelphia. N. lat. 41 35, lon. 1 44 E. from W. C. Pop. in 1840, 1,086.

Honey Brook, town, Chester co., Penn., the heads of both branches of the Brandywine.

Honey Creek, O., branch of Sandusky riv.—Post office, Henderson co., Ill., about 1 ms. by post road from Indianapolis.

Honeoy, creek, Ontario co., N. Y., outlet of lake of the same name.

Honeyville, village, Shenandoah co., Va., post road 142 ms. W. from W. C.

Honfleur, considerable seaport of Fr., in the department of Calvados, and late province Normandy, with a good harbor and a trade lace. It is 8 ms. N. of Pont l'Evêque, and 1 N.W. of Paris. Lon. 0 15 E., lat. 49 24 N.

Honiton, town of Eng., in Devonshire, on Otter, 16 ms. E. of Exeter, and 156 W. by S. London. Lon. 3 12 W., lat. 50 45 N.

Honolstein, town of Germany, in the elector of Treves. Lon. 7 5 E., lat. 49 48 N.

Hood Island, one of the Marquesas, in the Pacific ocean, discovered and named by Capt. Cook in 1774. Lon. 138 47 W., lat. 9 26 S.

Hoogly, small but ancient city of Hindoostan, Bengal. It is now improving, though still in part in a state of ruin. In the beginning of this century it was the great mart of the export trade of Bengal to Europe. It is seated on an arm of the Ganges, called Hoogly, 26 ms. N. of Calcutta. Lon. 88 28 E., lat. 32 30 N.

Hoogly River, arm of the Ganges, formed by the union of its two westernmost branches, namely the Cossimbuzar and Yellingby rivers. It is the port of Calcutta, and the only branch of the Ganges that is commonly navigated by ships. The Hoogly is the Atchafalaya of the Ganges, and is about 300 ms. in length, following the steep

Hoogstraten, town of the Netherlands, in Brabant, capital of a county of the same name, 15 ms. S. of Breda, and 15 N.E. of Antwerp.

Hookertown, village, Green co., N. C., post road 102 ms. SE. from Raleigh.

Hooksett Falls, and village, Merrimack co., N. H., 8 ms. below Concord.

Hookstown, village, Beaver co., Penn.—Village of Md., 6 ms. NW. from Baltimore, on the road to Reisterstown.—Green co., N. C.—Talbot co., Md., 3 ms. N. from Easton.

Hooper's Cross Roads, Bedford co., Tenn., by post road 70 ms. southwardly from Murfreesborough.

Hoosack, one of the most elevated summits of the Green-mountain range, in Williamstown Berkshire co., Mass.—Tp. of Rensselaer co., N. Y., 30 ms. N. of Albany, on the E. side of Hudson river.

Hoosack River, rises in Bennington co., Vt., flows W., and falls into the Hudson, 8 ms. above Waterford.

Hop Bottom, post office, Susquehanna co., Penn., by post road 150 ms. NNE. from Harburg.

Hopefield, village, Phillips co., Ark., on Mississippi river, opposite Chickasaw Bluff.

Hope, tp., Durham co., U. C., W. from Hargeton, and fronting on Lake Ontario.—Town, Lincoln co., Me., 38 ms. NE. from Wiscasset.—Town in Warren co., N. J., a small Mexican settlement, 22 ms. NE. of Easton, in Pa.

Hopeton, town in Yates co., N. Y., on the

le of Crooked lake, near its influx into Seneca
la, 15 ms. S. from Geneva.

Hopewell, tp. of New Brunswick, in Westmore-
tel co., on a small river flowing into the Bay of
Fidy.—Village in Ontario co., N. Y., be-
tween Canandaigua and Geneva.—Tp. in
Cumberland co., N. J.—Tp. in Hunterdon co.,
N. J., on the NE. side of the river Delaware, 14
E. of Princeton, and 10 N. of Trenton.—
P. in York co., Pa., joining to Md.—Tp. in
Washington co., Pa., about 14 ms. NW. by W.
Washington.—SW. tp. of Cumberland
Pa., between the Blue mountain and Conne-
winnet creek.—Tp. in Bedford co., Pa., on
NE. border of the county, and on both sides
Raystown branch.—Tp. in Huntington co.,
Pa., on both sides of Raystown branch, 12 ms.
S. from Huntingdon.—Methodist meeting-
house, Montgomery co., Md., 17 ms. N. from W.
C.—Village in Fauquier co., Va.—Village in
Yk district, S. S., about 70 ms. a little W. of
from Columbia.—Tp. in Perry co., Ohio, 7
N. from Somerset.—Tp. in Licking co.,
O. Pop. in 1820, 657.—Tp. on the west-
border of Muskingum co., Ohio. Pop. in
10, 1,259.

Hopkins, co. of Ky., bounded by Christian S.,
Cowell SW., Union W., Henderson NW.,
Gen river or Davies N., and Muhlenberg E.
Length 35 ms., mean width 21; area 750 sq. ms.
Chief town, Madisonville. Pop. in 1840, 9,171.
Central lat. 37 42 N., lon. W. C. 10 18 W.

Hopkinsville, tp. in Caledonia co., Vt. 36 ms.
N. from Montpelier.—Village in Powhatan
Va., 20 ms. W. from Richmond.—Village
Warren co., Ohio, by post road 85 ms. SW.
from Columbia.—Town and seat of justice for
Christian co., Ky., on Little river, a branch of
Cumberland river, 36 ms. W. from Russelville.
P. in 1840, 1,581.

Hopkinton, town and tp. in Merrimack co., N.
H. on Contacook river, 8 ms. W. from Concord.
P. in 1840, 2,455.—Town in Washington
R. I. It is situated between Wood and Ashe-
we rivers, and joins Ct.—Village in St.
Lawrence co., N. Y., on a branch of St. Regis
r., 40 ms. E. from Ogdensburg.—Town
Middlesex co., Mass., 30 miles SW. from
Boston.

HORDE, from the same root as *herd*, means a
group under a leader. In geography we most usu-
ally apply the term to the wandering Tartars, Mon-
gols, Calmucs, and other tribes of central Asia.

Horob, mountain in Arabia Petrea, in Asia.

HORIZON, literally Greek, root *horos*, *bounds*,
limit, and, in common language, means what can
be seen of the earth and heavens from any given
point. As far as the latter is concerned, the spec-
tator may imagine himself standing at the earth's
centre, or on a line from the centre to the surface.
The earth may be regarded a point when compar-
ed with the starry heavens, and, therefore, if we re-
gard ourselves standing on a plane infinitely ex-
tended, at right angles to a line from the earth's
centre to the starry heavens, and our body in that
line, our range of vision would not sensibly differ
from our point of vision from the centre or surface,
as in the former case that one hemisphere
would be removed by the supposed plane.

Horn, considerable town of the kingdom of
Holland, in North Holland, with a good harbor on
the Zuyder Zee, 13 ms. NE. of Amsterdam. Lon.
4 59 E., lat. 52 38 N.—Town of the kingdom
of Belgium, in the bishopric of Liege. Lon. 5 55
E., lat. 51 12 N.

Hornbach, town in Germany, in the duchy of
Deux-Ponts. Lon. 7 36 E., lat. 10 49 N.

Hornberg, ancient town of Germany, in the
Black Forest, in the duchy of Wirtemberg, with
a fortress on a mountain. It is seated on the Gut-
lash, 21 ms. NE. of Friburg. Lon. 8 27 E., lat.
48 12 N.

Hornby, town of Lancashire, in Eng., on a
branch of the Lune, with a handsome church.
Lon. 2 20 W., lat. 54 6 N.

Horn, Cape, the most southern part of Terra-
del-Fuego, in South America. Lon. W. C. 9 14
E., lat. 56 0 S.

Horncastle, large town of Eng., in Lincolnshire,
on the river Bane. It is 20 ms. E. of Lincoln, and
136 N. of London. Lon. 0 2 W., lat. 53 14 N.

Hornchurch, village in Essex, 2 ms. E. by S. of
Rumford, of which it is the mother church. A
large pair of horns is affixed to the E. end of the
church, for which tradition assigns a reason too
idle to be repeated.

Horndon, town of Eng., in Essex. It is seat-
ed on a hill, which commands a beautiful prospect,
16 ms. S. by W. of Chelmsford, and 19 E. of Lon-
don. Lon. 0 35 E., lat. 51 32 N.

Horn Island, long narrow bank of sand off the
coast of Mississippi, between Petitebois and Dog
island. It is about 17 ms. long, with a mean
width of half a mile.

Hornellsville, village, Steuben co., N. Y., near
the sources of Canisteo river, about 20 ms. E.
from Angelica.

Hornsey, town of Eng., in Yorkshire, 188 ms.
from London. It is almost surrounded by a small
arm of the sea, and the church having a high
steeple, is a noted sea mark. Not many years ago
there was a street here called Hornsey beck, which
was washed away by the sea, except a house or
two. Lon. 6° E., lat. 54° N.—Town of Eng.,
in Middlesex, 5 ms. N. of London. It is a long
straggling place, in a low valley, but extremely
pleasant, having the New river winding through it.

Hornorsville, village, Culpeper co., Va., by
post road 86 ms SW. from W. C.

Hortown, village on the Eastern Shore of Va.,
Accomac co., about 150 ms. N. by E. from Rich-
mond.

Horry, eastern district of S. C., bounded by
N. Car. NE., the Atlantic ocean SE., George-
town S., and Little Red river or Marion W.;
length 35 ms., mean width 28, area 1,100 sq. ms.;
surface level, and soil generally sandy or marshy,
and sterile. Chief town, Conwaysborough. Pop.
in 1820, 5,025; and in 1840, 5,755. Ctl. lat. 34°
N., and lon. W. C. 2° W., intersect in this city.

Horsehead, post office, Prince George's co., Md.,
35 ms from W. C.

Horseneck, cape of Long Island, extending
into Long Island Sound, NW. from Huntingdon
bay.—Village, Essex co., N. J., on the S.
side of Passaic river, 4 ms. SW. from Patterson.

Horsens, seaport of Denmark, in Jutland, seated
on the bottom of a bay that opens into the Catte-

gate, near the island of Hiarnoe, 125 ms. W. by N. of Copenhagen. Lon. 9 40 E., lat. 55 57 N.

Horse Shoe Bottom, post office, Wayne co., Ky., by post road 136 ms. S. from Frankfort.

Horsham, borough of Eng., in Sussex, 36 ms. S. by W. of London. Lon. 12' W. lat. 51 8 N.—Tp., Montgomery co., Pa., on the S. branch of Neshaminy creek, joining Bucks co. Pop. in 1820, 1,081.

Hosick, river of Vt., Mass., and N. Y., rises in Bennington co., Vt., and Berkshire co., Mass., falls into the Hudson river at the point of separation between Rensselaer and Washington cos., N. Y.—Town, Rensselaer co., N. Y., on Hosick river, 31 ms. N. from Albany.

Hosick Falls, village in the NE. angle of Rensselaer co., N. Y., 28 ms. NE. from Albany.

Hoskinsville, village, Brookfield tp., near the northern border of Morgan co., Ohio, 18 ms. north-eastward of McConnellsville, the co. seat, and about 20 ms. a little W. of S. of Cambridge, co. seat of Guernsey co.

HOSPODAR, title given by the Turkish Government to the officers sent by it to govern Valachia and Moldavia. The title answers to the Slavonic Waiwod. The Hospodars were generally chosen from the Greeks of the Fanar, at Constantinople, chiefly from the families Morouzzi and Souza.

Hot Springs, post office, between Cow Pasture and Jackson's rivers, Bath co., Va., 40 ms. SW. from Staunton, and 183 SW. by W. from Richmond. N. lat. 37 56, lon. W. C. 2 37 W.

Hottentots, and country of.—See *Africa*, pages 26 and 27.

Houat, island of Fr., near the coast of Bretagne. It is 10 ms. in circumference.

Houdan, town of France, now in the department of Eure and Loire, and lately in the province of Beuce, with a manufacture of woolen stockings. It is seated on the Vegre, 10 ms. from Dreux, and 32 SW. of Paris. Lon. 1 41 E., lat. 48 47 N.

Houghton, tp., Norfolk co., U. C., on Lake Erie, W. from Walsingham.

Hounsfield, tp. of Jefferson co., N. Y., on Lake Ontario, including the village of Sackett's Harbor. Pop. in 1820, 3,429.

Housatonick, river of Connecticut. It rises in Mass., and runs through Litchfield co., nearly due S. till it passes N. Milford, thence it flows SE. till it joins the Stratford, and the united stream falls into Long Island Sound near the town of Stratford.

Hounslow, town of Eng., in Middlesex, on a heath of the same name, on which are some powder mills on a branch of the river Coln. Here is a charity school and a chapel. Hounslow is 10 ms. W. by S. of London.

HOUR, the one-twenty-fourth part of the entire natural day, or time of one full revolution of the earth round its axis. At first view *hour* would appear as a purely artificial division of time, and as applied it is such; but there is no doubt when we turn to its original meaning, that it was a general expression for time, and came from the same root as *horizon*. The Lat. *hora*, from the Gr. *ora*, *hour*. Horizon, Gr. *oros*, bounds, limit, or what terminates. The Fr. term *horloge*, (clock,) *horoscope*, &c., have all the same origin.

Houssa, country of central Africa, on the Niger. It is too little known to admit specific description.

Hou-quang, province of China which occupies nearly the centre of the empire. Yangtse-kia river traverses it from E. to W., and divides it into two parts.

Houston's, post office, Rowan co., N. C., post road 138 ms. W. from Raleigh.

Houstonville, village, Pendleton district, S. C. by post road 184 ms. NW. from Columbia.—Village, Iredell co., N. C., by post road 172 ms. W. from Raleigh.

Hou-taheou-fou, city of China, in the province of Tche-kiang. It is 160 ms. NE. of Nanking. Lon. 119 45 E., lat. 30 35 N.

Howard, town, Steuben co., N. Y., on Carter river, 18 ms. W. from Bath.—Tp., Centre co., Penn., on Beach creek, in the northern angle of the co. Pop. in 1820, 1,055.—Co., Mo., lying N. from Missouri river, bounded N. by Chariton, Randolph N., Boone E., and Missouri river, separating it from Cooper S., and E. line W. This co. is nearly a square of 21 n. each side; area 440 sq. ms. N. lat. 39°, a lon. 15 40 W. of W. C.; intersect in this Chief town, Franklin, seat of government of the State. Pop. in 1840, 13,108.

Howden, town of Eng., in the E. Riding of Yorkshire. It gives name to a small district, called Howdenshire, and has a large church like a cathedral. It is seated on the N. side of the Ouse, 15 n. SE. of York, and 179 N. by W. of London. 51' W., lat. 53 46 N.

Howell, tp., of Monmouth co., N. J.

Howland, tp. of Trumbull co., Ohio. E. from Warren. Pop. in 1820, 625.

Hoxter, town of Westphalia, seated on the Weser, 8 ms. NW. of Corwey, 27 ms. NE. of Paderborn. Lon. 9 39 E., lat. 51 50 N.

Hoy, one of the Orkney islands, situated between the island of Pomona and the N. coast of Caithness-shire. It is 10 ms. long. Lon. 3 W., lat. 58 36 N.

Hoya, province of Hanover, with a capital the same name on the Allor, 23 ms. SE. from Bremen.

Hoye, town of Westphalia, capital of a county the same name, subject to the elector of Hanover, seated on the Weser, 13 ms. NW. of Zell. Lon. 9 6 E., lat. 52 57 N.

Hoyleville, village, Lincoln county, North Carolina, by post road 200 miles SW. by W. from Raleigh.

Hua, or *Kahua*, large town of Asia, capital of Cochin-China, with a royal palace. It is seated on a beautiful plain, and divided into two parts by a large river. Lon. 105 5 E., lat. 17 40 N.

Huahine, one of the Society Islands, in the Pacific ocean, 30 leagues from Otaheite. It is ms. in compass, and has a commodious harbor. Lon. 151 1 W., lat. 16 44 S.

Hubbard, tp. of Trumbull co., Ohio. Pop. in 1820, 843.

Hubbardstown, town, Worcester co., Mass. It is situated on a branch of the river Ware, 40 ms. W. from Boston.—Town, Rutland co., Vt., 40 ms. NW. from Windsor.

Hubert, seigniory, Quebec co., L. C.

Tubert, St., town of the kingdom of the Netherlands, in Luxemburg, 20 ms. SE. of Rochefort. Lon. 5 12 E., lat. 50° N.

Juddersfield, town of Eng., in the W. Riding of Yorkshire. It is the mart for narrow cloths, and the plains. It is 42 ms. SW. of York, and 11 NNW. of London. Lon. 1 40 W., lat. 53 4 N.

Hudson Bay, bay of N. America, lying between 51 and 69 N. lat., discovered in 1610 by Captain Henry Hudson. This intrepid mariner, searching after a NW. passage to the Pacific ocean, discovered three straits, through which he intended to find out a new way to Asia. This bay communicates on the N. by two straits with Baffin's bay, on the E. side it is bordered by Labrador, and on the SW. by New S. Wales, and on the W. by New N. Wales. These countries, included under the name of New Britain, abound with animals, whose skins and furs are far superior in quality to those found in less northerly regions.

The natives are called Esquimaux, and northern Indians; and are materially different from all the northern tribes. In 1670, a charter was granted to a company for the exclusive trade to this bay.

This company possess three forts on the S. coast, named James bay, by which name the S. part of Hudson's bay is distinguished; these factories are called Fort, Moose, and Albany; but the former has been abandoned. On the W. side of Hudson's bay, up Hearne's river, is a factory called 'Flamboro', and to the N. of this is York fort and Prince of Wales fort. In December, 1770, Mr. Hearne, in the service of the Hudson Bay Company, set out from Prince of Wales fort to explore a river that

Mr. Esquimaux, who came to the company's factory to trade, had brought to their knowledge; and which, on account of much copper being found in it, had obtained the name of Copper Mine river. Under the convoy of these Indians, he arrived at this river in 1771, and traced it till he was in sight of the Pacific ocean, finding it encumbered with shoals and falls to its mouth, which is at lat. 72 N. By late observations the position of Hearne's river is found much more to the W. than laid down by that traveller.

Hudson, river of New York. The basin of the Hudson, if we include Raritan bay and river, the bay of Newark, with its two confluent rivers, Hackensack and Passaic, and the contiguous part of Long Island sound in the Hudson basin, we have before us a very curious connexion between inland and maritime navigation. Taken with this extension, the Hudson basin reaches from Sandy Hook, lat. 40 30 to the extreme source of the Hudson, in N. lat. 44 5, or above 250 miles in length, and a mean width of 40 ms., exclusive of the W. part of the valley of Mohawk, above the mouth of the Schuylkill river. This latter section includes a parallelogram of 60 miles long and 35 miles wide, the whole basin spreading over an area of 14,600 sq. miles. The Hudson river is navigable for large boats to Hudson, and for sloops to Albany. The river flows to Troy, to which small sloops ascend.

Hudson, one of the most flourishing cities in the State of New York, situate on the E. bank of the Hudson river, in Columbia co., 115 miles N. of the city of New York, and 30 S. of Albany, in the latitude of 42 15 N. The foundation of the first house

was laid in 1783, and in 1800 it contained 4,048 inhabitants; and by the census of 1820, 5,310; and in 1840, 5,672. It is considered the third town in the State in manufactures, and the fourth in commerce. The site rises by a gentle acclivity from Hudson river, and the main street, following the ascent, extends above a mile from the water.

Hudson, village, Caswell co., N. C., by post road 86 miles NNW. from Raleigh.—Town, Portage co., O., 12 ms. NW. from Ravenna.

Hudson's House, factory of Hudson's Bay Company, on Saskashawine river. Lon. W. C. 29 27 W., lat. 53' N.

Hudson's Strait unites the Atlantic ocean to Hudson's bay. This sheet of water, 150 ms. wide where narrowest, and 300 miles where opening to Davis's straits between Cape Chidley S. and Campbell N., stretches NW. by W. between longitudes 4° W. and 14° E. of W. C., on the mean lat. of 64° N. It contains many islands.

Huena, island of the Baltic, 3 miles from the coast of Sweden, and subject to the Swedes, to whom it was ceded by the Danes in 1658. In this island was the observatory of the celebrated Tycho Brahe. It is 6 ms. in circumference; 9 ms. S by E. of Elsinore, and 14 N. by E. of Copenhagen. Lon. 12 38 E., lat. 55 54 N.

Huesca, ancient town of Spain, in Arragon, with a bishop's see and a university. It is seated on the Issuela, 35 ms. NE. of Saragossa. Lon. 2' W., lat. 42 18 N.

Huescar, town of Spain, in the kingdom of Granada, with a castle, 60 miles NE. of Granada. Lon. 2 20 W., lat. 37 45 N.

Huessen, town of Dutch Guelderland, seated on the Rhine, 3 miles S. of Arnheim.

Huetta, old and small town of Spain, in New Castile, 67 miles E. of Madrid. Lon. 1 55 W., lat. 40 22 N.

Hughsville, village, Patrick co., Va., about 75 miles SW. by S. from Fincastle.

Hulingsburg, village, Armstrong co., Penn.

Hull, or *Kingston-upon-Hull*, borough and seaport in the East Riding of Yorkshire. It was built by Edward I., who called it Kingston, and it is seated on the river Hull, on the N. side of the Humber. The harbor is artificial; and here are docks for building and repairing ships. Among the public buildings are the Trinity House, for the relief of seamen and their widows; a custom-house, an exchange, and a town hall. The stone bridge over the river to Holderness was rebuilt in 1787, and consists of 14 arches. Hull sends two members to Parliament, and is 36 miles SE. of York, and 173 N. of London. Lon. 14' W., lat. 53 45 N.

Hull, tp., Plymouth co., Mass., on the S. side of Boston harbor, 9 miles E. from Boston.

Hull's Store, post office, Pendleton co., Va.

Hulmsville, town, Bucks co., Penn.

Hulpen, town of the kingdom of the Netherlands, 9 ms. SE. of Brussels. Lon. 4 37 E., lat. 51 44 N.

Hulst, strong town of Dutch Flanders, seated on a plain which may be overflowed. It has a very fine town-house, 15 miles NW. of Antwerp, and 17 NE. of Ghent. Lon. 4 6 E., lat. 51 18 N.

Humber, river of England, formed by the Trent, Ouse, Derwent, and several other streams. It divides Yorkshire from Lincolnshire, and falls into

the German ocean at Holderness.—River of Newfoundland, flows W. into the gulf of St. Lawrence.—Small river of Upper Canada, in York county, falls into Lake Ontario a short distance W. of York.

Humberstone, tp. of Upper Canada, in Lincoln co., on Lake Erie, between Bertie and Wainfleet.

Hommelstown, town of Dauphin co., Pa., situated on the E. side of Swatara creek, 9 miles E. from Harrisburg, and 27 N.W. from Lancaster. The canal connecting Schuylkill and Susquehanna rivers passes Hommelstown.

Hummoch, island of Asia, in the Indian ocean, about 6 miles long. The rajah is supported in his authority by the Dutch East India Company. It lies five leagues S. of Mindanao. Lon. 125 12 E., lat. 5 27 N.

Humphries, co., Tenn., bounded by Perry S., Tennessee river or Caroline W., Stewart N., and Dickson E.; length 30, mean width 25 ms., area 750 sq. miles. Surface rather varying than hilly. Chief town, Reynoldsburg. Pop. in 1820, 4,067; and in 1840, 5,195. For central latitude, see *Reynoldsburg*.

Humphreysville, village, New Haven co., Conn., on the W. side of Naugatuck, 4 miles above its junction with the Housatonic. This village was named after General Humphries, who first introduced Merino sheep into the United States at this place. It is now the seat of an extensive woolen manufacture.—Village, Chester co., Penn.—Village, Union district, S. C.

HUNGARIANS.—See article **FINNS**. “The Ungres, Ungres, or Hungarians, were a branch of the Hunnic confederacy and of the Uralian race, which, for want of a better name, has been termed *Finnic*. The Hungarian language is an undoubted proof that the mass of the nation consisted of Finno-Uralian tribes.”—*Malte Brun*. Magiars, another national appellation of the Hungarians, seems to be derived from the name of their original country in Asia. It would appear that the primitive word is *khun*, or people, derived from the same root as *khan*, or *king*, to unite or make one.—See article **KING**.

Hungary, kingdom of Europe, included in the empire of Austria, bounded on the N. by Poland and Silesia, W. by Moravia, duchy of Austria, and Styria, S. by Slavonia and Servia, and E. by Wallachia and Transylvania. It is divided into Upper and Lower Hungary; and to these may be added the Bannat of Temeswaer, incorporated into the kingdom of Hungary in 1778. Hungary formerly included Transylvania, Slavonia, Dalmatia, Servia, and Wallachia. The principal rivers are the Danube, Save, Drave, Tresse, Maros, Raab, and Waag. The air is unhealthy, occasioned by the lakes and bogs; but it abounds in all the necessaries of life; and the wine, especially that called Tokay, is excellent. There are mines of gold, silver, copper, and iron; and also of opal, at Czerweniza, which gem is peculiar to this country. There is such plenty of game, that hunting is allowed to all. The inhabitants are well shaped, generous, and brave, but haughty and revengeful, and are estimated at 7,000,000. The trade principally consists of cattle, hogs, sheep, flour, wheat, rye, wool, and wine, and these are almost wholly sent to the Austrian provinces. Almost all the

towns of Hungary have two names, the one German and the other Hungarian, and the language is a dialect of the Slavonian. The government is hereditary in the house of Austria. No country in the world is better supplied with mineral waters and baths; and those of Buda, when the Turks were in possession of it, were reckoned the finest in Europe. Buda is the capital of Lower Hungary, and Presburg of the Upper. Population of Hungary in 1822, including Transylvania and Bannat of Temeswaer, comprised—

Roman Catholics	-	-	-	5,500,
Greek Church	-	-	-	3,400,
Calvinists	-	-	-	1,500,
Lutherans	-	-	-	1,000,
Jews	-	-	-	100,
Total	-	-	-	11,500,

[See article *Austria*]

Hungerford, town of Eng., in Berkshire; 64 miles W. of London. Lon. 1 26 W., lat. 26 N.—Tp., U. C., in Hastings co.

Hungry Bay, N. Y., Jefferson co.—See *Settle's Harbor*.

Hunmandy, town of Eng., in the E. Riding of Yorkshire, 34 miles NE. of York, and 209 N. of London. Lon. 12' W., lat. 54 12 N.

Hunninguen, fortified town of Fr., now in the dep. of Upper Rhine, and lately in the province of Alsace, seated on the Rhine, 5 miles N. of Basle. Lon. 11 40 E., lat. 47 40 N.

Hunterdon, co. of N. J., bounded by Delaware river SW., Sussex co. N.W., Morris NE., Somerset E., and Middlesex and Burlington N. Length 32 ms., mean width 17; area about 500 sq. ms. Surface hilly, but with a soil generally productive in grain, fruits, and pasturage. Capital, Trenton. Pop. in 1820, 28,604; and in 1840, 24,789. The cause of diminution, as stated by this article, in the population of Hunterdon was that a considerable part of the new county of Mercer was taken from the former.—See *Mercer county*. Central lat. 40 30 N., lon. W. C. 2 50 W.

Hunter, town in Green co., N. Y.

Hunterstown, tp. in St. Maurice co., L. C., 25 ms. NW. from Three Rivers.—Village in York co., Pa., 25 ms. W. from York.

Huntersville, village in Pocahontas co., Va.—Village in Lincoln co., N. C., by post road 25 ms. SW. by W. from Raleigh.

Huntingdonshire, co. of Eng., 25 ms. in length and 20 in its broadest part; bounded on the E. and NW. by Northamptonshire, on the E. by Cambridgeshire, and on the SW. by Bedfordshire. Pop. in 1801, 37,568; in 1811, 42,200; and in 1821, 48,771.

Huntingdon, county town of Huntingdonshire, Eng., pleasantly seated on a rising ground, on a river Ouse, over which is a stone bridge to Garmannchester.—Town in Chittenden co., Vt., on the S. side of Onion river, 10 ms. northward of Bristol, and 16 SE. of Burlington. Pop. in 1820, 514.—Town in Fairfield co., Ct., on the E. side of Housatonic river, about 16 ms. N. of Fairfield.

Huntingdon, tp. in Suffolk co., N. Y.—*Huntington*, Suffolk co., N. Y.

Huntingdon, co. of L. C., between the northern boundary of N. Y. and Richelieu and St. L.

the rivers.—Tp. in Hastings co., U. C., N. York. *Thurlow*.
Huntingdon, co. of Pa., bounded SW. by Bedford, NW. by Cambria, N. by Centre, E. by Franklin, and SE. by Franklin; length 48 ms., width 30, and area 1,185 sq. ms. This is a mountainous county, watered by the Juniata and its various branches. Though generally dry and barren, much very excellent soil skirts the streams. Chief town, Huntingdon. Pop. in 1820, 20,142; and in 1840, 35,484. For central see *Huntingdon borough*.

Huntingdon, borough, town and seat of justice, Huntingdon co., Pa., on the left bank of Rays-branch of Juniata, 45 ms. NE. from Bedford. Pop. in 1820, 841; and in 1840, 1,145. 40 31 N., lon. W. C. 1 2 W.—Tp. in Adams co., Pa., on Bermudian creek, 12 ms. E. from Gettysburg.—Town in Luzerne co., Pa., 12 ms. SW. by W. from Wilkesbarre, on Spring creek.

Huntingdon, *East*, tp. in Westmoreland co., between Jacob's creek and Big Sewickly, 10 E. from Greensburg.

Huntingdon, *North*, tp. in Westmoreland co., along Yough river, and between Big Sewickly and Brush creeks.

Huntingdon, *South*, tp. in Westmoreland co., along Yough river, between Big Sewickly and Jacob's creeks.

Huntingdon, village in Carroll co., Ten., by road 150 ms. W. from Murfreesborough.

Hunting Sound, channel of N. C., Carteret co., along Core sound to the main ocean.

Huntington, town in the NW. angle of Suffolk Long island, N. Y. The village is built upon the Long Island sound, and contains an academy. 30 ms. NE. from N. Y. Pop. in 1840, 2. —Village in Laurens district, S. C., 64 NW. from Columbia.—Tp. in Gallia co., Ohio.—Tp. in Ross co., Ohio, W. of Scioto. Pop. in 1840, 1,169.—Tp. in Brown co., Ohio. Pop. in 1840, 2,302.

Huntingtown, village in Calvert co., Md., on Hunting creek, 40 ms. from Annapolis.

Huntsburg, village in Franklin co., Vt., near the line that divides this State from L. C., at the distance of about 12 ms. E. of Lake Champlain.

Village in Geauga co., Ohio, by post road 12 ms. NE. from Columbus.

Hunt's Mills, post office in Hunterdon co., N. J.

Huntsville, small town of Eng., in Somersetshire, at the mouth of the river Parret, 5 ms. N. of Tewkeswater, and 143 W. by N. of London. Lon. 51 11 W., lat. 51 11 N.

Huntsville, village in Otsego co., N. Y.—Village in Surry co., N. C., 15 ms. SW. of Salisbury, the Moravian town.—Village in Laurens district, S. C., 70 ms. from Columbia.

Huntsville, village and seat of justice for Madison co., Ala., 113 ms. S. from Nashville, in Ten. This is a new but very flourishing village, about 12 ms. N. from Tennessee river. Pop. in 1820—

Huntsville, village in Robertson co., Ten. Lat. 34 45 N., lon. W. C. 10 1 W.

Hurdwar, town of the province of Delhi, where the Ganges first enters the plains of Hindoostan. It is 117 ms. N. by E. of Delhi. Lon. 78 15 E., lat. 29 35 N. Hurdwar is taken from the Sanscrit *Dwar*, door, or opening. The town is situated at the lower falls of the Ganges, where that great river passes from the mountainous into the hilly or plain countries of Hindoostan. Below Hurdwar, the Ganges has a constant and uninterrupted navigation to the Bay of Bengal.—See *Ganges*.

Huron, one of the five great lakes, commonly called the lakes of Canada. It is in the form of a triangle, the SW. and NE. sides of which are about 200 ms., that of the SE. 110 ms. Following the indentings of the shores, Lake Huron exceeds 1,000 ms. in circumference. It is almost separated into two lakes, by a chain of islands extending from its NW. to SE. side. This chain retains its Indian name of Manitoulin, or *Islands of the Evil Spirit*. Lake Huron receives the discharge of Lake Superior by St. Mary's strait, that of Lake Michigan by the straits of Michilimackinack, that of Nipissing by the river du François, and discharges the accumulated mass into the river St. Clair.—River of Mich., rises in the interior of the peninsula, and, flowing E., enters Lake St. Clair.—Another river of Mich., rises with the preceding, and flowing SE., falls into Lake Erie immediately S. of the mouth of Detroit river.—River of Ohio, rises in Richland and Crawford cos., and, flowing north, enters Huron county, which it traverses, and falls into Lake Erie, 10 ms. SE. from the mouth of Sandusky bay.—Co. of Ohio, bounded on the N. by Lake Erie, E. by Cuyahoga and Medina cos., S. by Richland, and W. by Seneca and Sandusky cos., in the lately acquired Indian territory. It is 35 by 40 ms. in extent, and contains about 900 sq. ms. It includes all the tract designated by the appellation of Fire lands, besides several tps. N. of Medina co. and W. of Black river. Sandusky bay and Lake Erie skirt the whole northern boundary. Surface rather level, and soil fertile. Chief town, Norwalk. Pop. in 1820, 6,676. Lat. 41 20 N., lon. W. C. 5 40 W.—Tp. in Huron co., Ohio, on the lake shore; distance 47 ms. westerly from Cleveland, and 110 N. by E. from Columbus. Lat. 41 25 N., lon. 5 36 W. Pop. in 1820, 651.

Hurriana, western part of the province of Delhi, Hindoostan proper. Chief town, Hissar. This province passed under British authority in 1809. Central lat. 29° N.

Hurricane Shoals, post office in Jackson co., Ga., by post road 91 ms. NNW. from Milledgeville.

Hurst.—See article *Forest*.

Hurst Castle, castle of Eng., in Hampshire, near Lymington. It is seated on the extreme point of a neck of land which shoots into the sea toward the Isle of Wight, from which it is distant 2 ms.

Hussingabad, town in Hindoostan, in the pro-

vince of Malwa, the eastern division of the Maharrata empire. It is 140 ms. NW. of Nagpour. Lon. 77 54 E., lat. 22 42 N.

Husum, town of Denmark, in the duchy of Sleswick, with a strong citadel and a very handsome church. It is seated near the river Ow, on the German ocean, 20 ms. W. of Sleswick. Lon. 9° E., lat. 54 45 N.

Huttonsville, village, Randolph co., Va., on Roaring creek, and on the road from Clarksburg to Beverly, 35 ms. SSE. from the former.

Huy, town of the kingdom of the Netherlands, in the bishopric of Liege. The Dutch, in 1718, demolished the fortifications, and surrendered it to the bishop of Liege. It is seated on the Maese, 12 ms. WSW. of Liege. Lon. 5 22 E., lat. 50 32 N.

Hyacinthe, St., village of Canada, is, says a traveller, one of the most beautiful villages of Canada East. The prospect from it in summer is splendid, and the scenery in its vicinity beautiful and rural. It contains 222 houses, upwards of 2,500 inhabitants, 1 cotton factory, 1 soap and candle factory, 1 saw mill, 1 grist mill, 7 or 8 taverns, with several mechanics' shops.

Hyannis, bay of Mass., Barnstable co., sets up from the Atlantic ocean between the tps. of Yarmouth and Barnstable.—Town on Hyannis bay, Barnstable co., Mass., by post road 97 ms. SE. from Boston.

Hyattstown, village, Montgomery co., Md., on the road from Frederick to W. C., 33 ms. NW. from the latter, and 15 SSE. from the former. It is a small village, of a single street of about 30 houses along the main road.

Hyde, co., N. C., bounded SE. and S. by Pamlico sound, W. by Beaufort, and N. by Washington and Tyrrell. Length 45 ms., mean width 18, area 810 sq. ms. Surface level, soil marshy, sandy, and generally sterile. Chief town, Germantown. Pop. in 1840, 6,458. Central lat. 35 28 N., lon. 35° E.

Hyde Park, town, Dutchess co., N. Y., on Hudson river, 8 ms. above Poughkeepsie.—Village, Halifax co., N. C., by post road 79 ms. NE. from Raleigh.

Hyderabad.—See *Hydrabad* 2d.

Hydra, island of Greece, the ancient Aristeia. It is a rocky mass, about 3 ms. from Cape Skylla, in the Morea, about 3 ms. by one, and containing a harbor and commercial town. The latter rose from the favorable position of the place for commerce. Previous to the late revolution, the Hydrists had 80 ships, of an average of 300 tons. In 1810 they purchased from the Turkish Government the right of electing their own magistrates, but joined the other Greeks against their common oppressors, and, by their naval skill, did most effectual service. This brought upon the Hydrists, in 1824, the vengeance of their enemies, who attacked and took the island, massacring such of the inhabitants as fell into their hands. In a few days, however, it was retaken, and a most sanguinary retaliation inflicted upon the Turkish garrison.

Hydra, or *Idra*, island of the Grecian Archipelago.

Hydrabad, capital of Golconda, in the Deccan of Hindoostan, seated on a river that falls into the

Kistan, 352 ms. N. by E. of Madras. Lon. 51 E., lat. 17 12 N.—Fort of Hindoostan proper, in the province of Sinde. It is the residence of a Mahometan prince, who is tributary to King of Candahar. It is situated on the Ind not far above the head of the Delta, and in neighborhood of Nusserapour. Lon. 69 30 lat. 25 29 N.

HYDROGEN, hydrography, hydrostatics, hydrodynamics, and several other terms, comes from Greek word *hudor*, water, as a prefix to suffix deciding the particular sense of the term. Hydrogen, one of the constituents of water: combination in the proportions of about 15 hydrogen and oxygen, water is the result. The exact proportions of the two gaseous bases do not appear to have been yet determined by chemists. Combining results, the proportion would appear to be oxygen from 85 to 89 in 100.

Hymettus.—See *Trelo Vouni*.

Hypolite, St., town of France, now in the department of Gard, lately in the province of Languedoc. This town has a good fort, and is seen on the Vidourle, near its source, 12 ms. SW Alais. Lon. 4° E., lat. 43 55 N.

Hythe.—See *Hithe*.

I.

Ibarra, town of Columbia, in Quito, 42 NE. from Quito.

Iberi, lake of S. America, between the Parana and Uruguay rivers. It is rather an overflow country than a real lake.

Iberville, upper mouth of the Mississippi river on the left side. It is a small outlet, leaving the Mississippi 14 ms. below Baton Rouge. Water only enters this channel at high flood. A stream flowing about 20 ms, and receiving from both sides the drain of the adjacent lowlands, Iberville joins the Amite. Schooners drawing 5 feet water ascend the Amite to the mouth of Iberville, and the boats of 2 or 3 feet draught are navigated up the latter to the mouth of the Spanish bayou, 5 or 6 ms.

Iberville, parish, Lou., bounded by the bayou Iberville, Mississippi river, and bayou Plaquemine, N. and NW., Atchafalaya river SW., parish of Ascension SE. and E., and Amite river NE. Length 35 ms., mean width 10, area 400 sq. ms. Surface dead level, and soil exuberant fertile, but, except along the streams, not arable on account of being subject to annual overflow. Staple, cotton. Chief town, St. Gabriel. Pop. 1820, 4,414; in 1840, 8,495. Central lat. 30 N., lon. 14 10 West.

Iberville, or *St. Gabriel*, village on the left bank of the Mississippi, in the parish of Iberville, 18 ms. by water, and 6 by land below the mouth of Bayou Iberville.

Iborg, or *Iberg*, town of Germany, in the circle of Westphalia, and in the bishopric of Osnaburg, 10 ms. SW. of Osnaburg, and 30 NE. of Munster. Lon. 8 20 E., lat. 52 14 N.

Ica, province of Peru, bordering on the Pacific ocean.—Capital of the province of Ica, 140 ESE. from Lima. Lon. W. C. 1 30 E., 13 50 S.

Iceland, large island to the W. of Norway

0 ms. in length, and 150 in breadth, lying between 64 and 66 N. lat. For two months together the sun never sets; and in the winter it never rises for the same space, at least not entirely. The middle of this island is mountainous, rocky, and barren, but in some places there are excellent pastures, and the grass has a fine smell. The ice, which gets loose from the more northern country in May, brings with it a large quantity of food, and several animals, such as foxes, wolves, and bears. Mount Hecla is the most noted mountain, and is a volcano which sometimes throws out sulphureous torrents. Iceland, which is considered by the ancients as the Ultima Thule, or the extremity of the world, and by us as scarcely habitable, once abounded in learning and science, at a time when a great part of Europe was involved in darkness. Their language was the old Gothic or Teutonic, the vernacular language of the Swedes, Danes, and Norwegians, before it branched into the several dialects since spoken by the natives of these three kingdoms.

Ickwell, village of Eng., in Bedfordshire.

Ickleton, village of Eng., in Cambridgeshire.

Ickworth, town of Eng., in Suffolk, 23 ms. W. of Ipswich, and 74 NNE. of London. Lon. 1° E., lat. 52 22 N.

Icolmkill, formerly Iona, a small island of Scotland, and one of the Hebrides, about one mile from the SW. point of the island of Mull. It is 3 miles long and one wide. Icolmkill now contains only about 80 families of poor and ignorant people, amounting in all to about 400; but this neglected spot, during the dark ages, was one of those sacred asylums which even the ferocity of almost all savage warriors was taught to respect. This salutary operation of superstition contributed to preserve in the remote Icolmkill some fragments of science amid general barbarism. It was this little islet that was made the refuge of St. Columba, and from which the Christian religion shed its bright rays over Scotland and its islands.

Iconium, town of Asiatic Turkey, in Caramania; it is now called Konia, and is situated in a valley of the Lycæonian mountains, upon or near a small lake without an outlet. E. lon. 32 40, lat. 38 30, about 300 ms. SE. from Constantinople.

ICONOCLASTES, (*image breakers*.) a sect which arose in the Constantinopolitan Roman Empire. An edict of the Emperor Leo III, the Isaurian, in A. D. 726, against images, and those who used them in Christian ordinances. This sect and its followers long distracted the Christian Church.

Ida, *Mount*, lofty and pointed mountain in the middle of the island of Candia, famous in ancient times. All the cattle that are bred on it are a few stray horses, some sheep, and half-starved goats.

Ida, mountain of Turkey in Asia, in Natolia proper, famous in ancient fable for the judgment of Paris, and for being the resort of the gods during the Trojan war.

Idanha-la-Nueva, town of Portugal, in Beira, 100 ms. SW. of Idanha-la-Vella.

Idanha-la-Vella, town of Portugal, in Beira, upon the river Ponsul, 25 ms. NE. of Castel-Branco, and 25 NW. of Alcantara. Lon. 6 14 W., lat. 39 39 N.

Idria, town of Austria, in Illyria, in the circle

of Adesberg, remarkable for its mines of quicksilver. Lon. 14 8 E., lat. 46° N.

Idstein, town of Germany, in Wetteravia, which is the residence of a branch of the house of Nassau, to whom it belongs. It is 12 ms. NE. of Mentz. Lon. 8 23 E., lat. 50 2 N.

Iekaterinoslaf, Government of Russia, on both sides of the Dnieper, and on the E. reaching the Don; bounded by Taurida and the Azoph sea S., the Cossack territory E., Yorenetz, Kharhof, and Poltava, N., and Kherson W. The length from E. to W. 300 English ms., mean breadth 80, and area 24,000 sq. English ms.

Iekaterinoslaw, capital of the Government of the same name, is situated at N. lat. 48 24 lon., 34 58 E. London, and on the right bank of the Dnieper, about 600 ms. a little W. of S. from Moscow.

Iennicale.—See *Janicale*.

If, island of France, the most eastern of the three before the harbor of Marseilles. It is well fortified, and its port is one of the best in the Mediterranean.

Igis, town of the country of the Grisons, in Cadoca, with a magnificent castle, in which is a cabinet of curiosities and a library. It is 23 ms. SW. of Coire, and 23 S. of Glarus. Lon. 9° E., lat., 46 33 N.

Iglaw, considerable and populous town of Moravia, where they have a manufacture of good cloth, and excellent beer. It is seated on the Iglaw, 40 ms. W. of Brinn, and 62 SE. of Prague. Lon. 15 42 E., lat. 49 8 N.

Iglesias, town in the S. part of the island of Sardinia, with a bishop's see, 37 ms. WSW. of Gagliari. Lon. 8 39 E., lat. 39 18 N.

Ignatius Point, on the N. side of the strait of Michilimacinac, 8 ms. W. from Mackinac island.

Ihor.—See *Johore*.

Ilay.—See *Islay*.

Ilak, or *Jalack*, town of Nubia, on the Nile, supposed by some to be the ancient Meroe. Lon. 36 30 E., lat. 18 48 N.

Ilants, town in the country of the Grisons, capital of the Grey League. It is partly surrounded by walls. Here the general diet of the Three Leagues assembles every third year. It is seated on the Rhine, 17 ms. SW. of Coire.

Ilchester, town of Eng., in Somersetshire, on the Ivel, 16 ms. S. of Wells, and 123 W. by S. of London. Longitude 2 37 W., latitude 50 56 North.

Ildefonso, *St.*, village of Spain, in New Castile, 5 ms. N. of Uzeda, on the river Cogolludo. Here is a magnificent palace, built by Philip V. It is a superb structure, with water works and gardens.

Ildefonso de los Zapotacos, *St.*, town of New Spain, seated on a mountain, 50 ms. NE. of Antequiera. Lon. 27 30 W., lat., 17 5 N.

Ilerton, village of Eng., in Northumberland, 4 ms. S. of Wooler.

Ilyracombe, seaport and corporate town of Eng., in Devonshire. It is seated almost opposite Swansea, in Glamorganshire, 49 ms. NNW. of Exeter, and 131 W. by S. of London. Lon. 4 5 W., lat. 51 14 N.

Ilheos, seaport in Brazil, in Bahia, at the mouth of a river, and on a bay of the same name.

Lon. W. C. 37 18 E., lat. 14 34 S.—Seaport of Brazil, in South America, capital of Rio-Ilo-Ilo. It is seated in a fertile country, and is 150 ms. SSW. of St. Salvador. Lon. 41 25 W., lat. 15 5 S.

Ilheos, or *Rio los Ilheos*, province of South America, subject to Portugal.

Ilkuch, town of Poland, in the palatinate of Cracow, remarkable for its silver mines, mixed with lead. It is seated in a barren country, at the foot of several mountains 15 ms. NW. of Cracow. Lon. 19 40 E., lat. 50 20. N.

Ill, river of Fr., in the former Alsace. The Ill rises westward from and near Basle, in Switzerland, and, flowing nearly parallel to the Rhine about 100 English ms., falls into the W. side of the latter stream at Strasburg.

Ille, town of Fr., now in the dep. of the Eastern Pyrenees, and lately in the province of Rousillon, 10 ms. SE. of Perpignan. Lon. 3 5 E., lat 42 35 N.

Iller, river of Germany, which rises in Tyrol, runs N. through Suabia, passing by Kempten, Memmingen, and Kirchberg, and falls into the Danube at Ulm. The course of this river is very nearly from S. to N., and remarkably parallel to the Leck. The Iller is in the greatest part of its course a boundary between the kingdoms of Bavaria and Wurtemberg.

Illesugaguen, strong town of Africa, in the kingdom of Morocco.

Ill, river of Central Asia, lost in an interior lake without an outlet, called Palcati Nor. Lon. E. 80°, lat 45° N.

Illinois, river, rises near the S. end of Lake Michigan, and taking a SW. course, falls into the Mississippi, 18 ms. above the Missouri.—See *Illinois, State of*.

Illinois, State of the U. S., between Lake Michigan, the Wabash, Ohio, and Mississippi rivers.

	Miles.
Illinois has a boundary on N. lat. 42 30	210
Along Michigan lake and Indiana to Wabash river	216
Down the Wabash to the junction with the Ohio	150
Down the Ohio to its junction with the Mississippi	130
Thence up the Mississippi to the northwest angle of the State	500
Having an outline of	1,206

Area 58,900 sq. ms. = 35,696,000 acres.

Extreme S., N. lat. 37°.

Extreme N., N. lat. 42 30.

Greatest length from the junction of Ohio and Mississippi to N. lat. 42°, 380 ms; mean width, 150 ms.

Illinois is the fourth State of the U. S. in respect to extent of territory, and the first in point of fertility of soil. Excepting Georgia, it is also the State whose climate and seasons differ most at the N. and S. extremities. Extending through 5° of lat., Illinois embraces the greatest extent N. and S. of any section of the U. S., New York only reaching through 4½, and Georgia about an equal distance. The latter is indebted to the greater

inequality of its surface for the superior variety of its climate.

Illinois is a country of very little inequality of surface, compared with its great extent. The low or southern part is rolling rather than hilly; and not one eminence in the State, it is probable, would reach 600 feet above the common level.

In point of soil, Illinois admits a similar classification with Ohio and Indiana; though, in proportion to extent, the former has less wet, irremediable land, and more rich prairie, than the two latter. The State may be considered as rolling in its southern and western, and level in its eastern and northern sections.

In its central parts the prairies almost vie in extent with those of Louisiana, Arkansas, and Mississippi. Their margins are generally composed of rich soil, which, as elsewhere, deteriorates in proceeding from the woods. Extensive, however, are the prairies, the much greater proportion of the State is covered with forest timber of growth suitable to the soil and climate.

The Illinois river is an object, however, though its entire course is within the State of the same name, from some peculiar circumstances, its natural history becomes rather a subject of general than local interest.

In examining the rivers of the Ohio valley flowing from its right slope, we find their currents slow near their sources, and gaining accelerated rapidity in their progress towards their common recipient. The cause of this increased velocity of current has been discussed and explained. This common characteristic distinguishes the Muskingum, Scioto, Great Miami, and Wabash, but does not extend to the Illinois. The latter has many traits peculiar to itself, the most remarkable of which are the irregularity of its bed and the uniformity of its current. What may in strictness be designated the bed of the Illinois is from two to three miles wide and in some places even more. This space would seem to indicate an ancient quantity of water far greater than now flows down that river. In fact, the present appearance of the stream much more resembles a strait rather than a river, in the simple acceptation of the latter term. The water flows gently and in a great measure uniform in all its length. Rapids there exist none worth notice in Illinois, and, except at very low water, but very little local acceleration is any where perceptible.

The country around the southern extremity of Lake Michigan is mostly composed of level swamps intersected by interlocking streams, or rather lagoons. This is more particularly the case between the lake and the heads of the Plien branch of Illinois. Here the face of the globe so nearly approaches to a perfect level as to produce almost stagnation in the waters, and leave them nearly balanced on this table land.

Lake Erie is elevated 565 feet above tide water in the Hudson at Albany. The distance from Lake Erie to Lake St. Clair is 28 ms., from Lake St. Clair to Lake Huron 35 miles, and through the straits Michilimackinac 10 miles, or the entire length of current between Lakes Erie and Michigan is 73 miles. Of this distance, the current is every where gentle, except the efflux of St. Clair river from Lake Huron at Fort Gratiot, where a strong current rather than rapid continues about 2 miles. A

owance of 6 inches per mile is too high an estimate; but in this instance we will assume that we; and consequently allow an elevation of 36½ ft for the surface of Lake Michigan, over that of the, and give to the former 601½, or in round numbers 600 feet above tide water in the Hudson, and about 500 feet above the surface of the gulf of Mexico. The existence of the gulf stream demonstrates that the surface of the gulf of Mexico is elevated at least 100 feet above that of the Atlantic Ocean between the Chesapeake and New York Bays, inclusive. The point of confluence of the Congo and Alleghany rivers, at the city of Pittsburgh, is above the surface of Chesapeake bay within a trifle of 800 feet. All these estimates are based on mathematical operations, or on the result of analogical induction, almost equally certain; and the singular facts are developed, that if channels were open from Pittsburgh into Erie and Michigan, the Ohio would flow into the latter with a current of 200 feet in about 400 miles, and into the former 235 feet in little more than 100 miles. If we allow 361 feet as the difference of level between the water at the mouth of Ohio and the surface of the gulf of Mexico, it is about 230 miles of water between the mouths of Illinois and Ohio, and a fall of 6 inches per mile would amount to 115 feet, which, added to 361, yields 476 feet as the height of the mouth of Illinois above the surface of the gulf of Mexico.

We have already determined that of Lake Michigan to be 600 feet, therefore differing only 36 feet from the Mississippi at its junction with the Illinois.

It has been determined by repeated experiments that loaded boats of considerable size can pass from the Mississippi through Illinois, into the Canadian sea, and *vice versa*. Very little current is found in the small and very short streams which interlock with the sources of the Illinois, and flow to the southern extremity of Michigan; therefore, the sources of Illinois cannot be much above the surface of Lake Michigan. Fifteen or 20 feet is as much as the data before us will justify; of course, the whole volume of Illinois, from a point opposite the head of Chicago river in a distance following the windings of upwards of 400 miles, does not exceed 60 feet.

The face of the globe may in be vain be examined to find any other spot, except the sources of the Amazon and the Rio Negro, in South America, where nature has provided a facility to internal communication of water is equal to that we have this moment surveyed. If we glance an eye over the immense regions thus connected; if we regard the fertility of the soil, the multiplicity of product which characterize these regions; and if we combine those advantages afforded by nature with the moral energy of the free and active people which are spreading their increasing millions over its surface, what a vista through the darkness of future time opens! The view is indeed almost too much for the faculties of man. We see arts, science, industry, virtue, and social happiness, already increasing in these countries beyond what the most inflated fancy would have dared to have hoped thirty or forty years ago.

Civil and political subdivisions of Illinois, with the result of the census of 1820, are annexed.

Counties.	Inhabitants.	Square miles.	No. to square mile.
Alexander	625	410	1½
Bond	2,931	600	5 nearly.
Clark	931	500	2 nearly.
Crawford	3,022	500	6
Edgar			
Edwards	3,444	970	3½

Union	2,362	430	5
Washington	1,517	900	1½
Wayne	1,114	800	1½
White	4,823	830	6 nearly.
	55,211	13,495	4

The foregoing estimate is confined to the southern and settled parts of Illinois. The whole State is calculated to embrace 58,900 square miles; it is obvious, therefore, that comparatively a small part of this State is yet inhabited by civilized settlers. Taken as a whole, however, it is from the tenor of the best information, the most fertile continuous tract of land in the United States, and in a peculiar manner accessible to navigation.

By the census of 1820, there were found in Illinois, whites, 53,788; free colored persons, 506; and slaves, 917; the whole amounting to 55,211, thus classed:

Foreigners not naturalized	-	-	598
Engaged in agriculture	-	-	12,395
Engaged in manufactures	-	-	1,007
Engaged in commerce	-	-	233

Illinois was admitted into the Confederacy as an independent State in 1818. Pop. in 1810, 12,282; in 1820, 55,211; in 1825, (by the State census,) 72,817; and in 1830, 157,445.

The subjoined tables, from the census of 1840, exhibit the population of Illinois.

Whites.—Ages.	Males.	Females.
0 to 5	43,363	44,775
5 to 10	37,278	34,913
10 to 15	31,062	28,496
15 to 20	24,876	24,078
20 to 30	52,580	38,823

Illock, strong town of Slavonia, seated on Danube, 15 ms. from Peterwaradin, and 55 N of Belgrade. Lon. 20 6 E., lat. 45 36 N.

Ilm, or Stadt Ilm, town of Upper Saxony,

co. of Schwartzburg-Rodolstadt, 14 ms. S. of Eurt.

Imene, lake of Russia, in the government of Ngorod, which has a communication with the Lake Ladoga, by the river Volkhof. Lon. 30° E., lat. 50° N.

Imminster, town of Eng., in Somersetshire, in a sandy bottom, among the hills, 137 ms. W. by S. of London. Lon. 2 54 W., lat. 50 55 N.

Imbria, vague name for the regions NE. from the Gulf of Venice. It has in no age been clearly defined. Since 1816, the title of "Kingdom of Illyria" has been given to that part of the Austrian Empire included in Carinthia, Carniola, Friuli, Istria, and Croatia. It is again subdivided into the governments of Laybach and Trieste. Area, 15,500 sq. ms. Pop. 1,060,000.

Imse, river of Germany, rising in the mountains of Bohemia, and, running S., falls into the Danube at Ilstet.

Imstley, East, town of Eng., in Berkshire, on a pleasant valley, between two hills, and excellent lands for feeding sheep. It is 53 m. W. of London. Lon. 1 22 W., lat. 51 32 N.

Imst, town of the kingdom of the Netherlands, in Friesland, on the Weymer, 12 ms. S. of Lewarden, Lon. 5 24 E., lat. 53 1 N.

Imstadt, town of Germany, in Bavaria, seated at the confluence of the Danube and Ills, opposite Passau. Lon. 13 37 E., lat. 48 27 N.

Imstrop, town of Sweden, in West Gothland. Lon. 11 51 E., lat. 57 23 N.

Imten, town of Lower Saxony, in the principality of Lüneburg.

Imthofer, town of Suabia, in the territory of Halte.

Immenstadt, town of Suabia, 20 ms. E. of Lindau. Lon. 10 20 E., lat. 47 35 N.

IMAM, or **IMAUM**, originally an inferior order of ministers of religion amongst the Mahometans, and never nearly to parish priests; but the title in it means priest, as a generic term. The legitimate successor of Mahomet is termed Imaum. The Friar of Imaum, who has the direction of the solemn prayers of that day at noon, is called *Imaum-ul-Imarna*. One of these pretended humble ministers is now sovereign of large territories in both Africa and Asia.—See *Muscal*.

Imbro, woody and mountainous island in the Aegean archipelago. It abounds with game, and is about 20 ms. in circumference.

Immeritia, country of Asia, between the Black Sea and the Caspian, bounded on the S. by Turkey, on the W. by Mingrelia, on the N. by Ossetia, and on the E. by Georgia, of which it is, properly speaking, a part. The Immeritians are of the Greek nation. Their patriarch, who is generally of the royal family, can seldom read or write, and the inferior clergy are not better instructed. Their churches are wretched buildings, scarcely to be distinguished from common cottages, but from a paper hanging over the principal door, and some paintings of the virgin and the saints. Cutais is the capital. Immeritia is now politically subject to Russia, but has its own municipal concerns independent.

Immenhausen, town of Hesse-Cassel, in Germany.

Immenstadt, town of the co. of Konegsegg, in Swabia. It is situated on a small river 14 ms. SE. of Sny.

Imola, populous town of Italy, in Romagna, with a bishop's see; seated on the Santerno, 45 ms. N. by E. of Florence. Lon. 11 45 E., lat. 44 28 N.

Imperial, pleasant town of South America, in Chili, seated on a craggy rock, in a charming country. Lon. 72 35 W., lat. 38 40 S.

Inchcolm, island in the Frith of Forth, near the coast of Fife, but within the co. of Edinburgh.

Inchkeith, desolate little island of Scot., in Edinburghshire, in the Frith of Forth, lying midway between the ports of Leith and Kinghorn. Here is a ruinous fort.

Inchmarnock, beautiful little island of Scot., SW. of the Isle of Bute. It is one mile long, and on the W. side are vast strata of coral and shells. It derives its name of Inchmarnock from a chapel dedicated to St. Marnoc, the ruins of which are still to be seen.

Indapour, seaport of the island of Sumatra. Lon. 100 50 E., lat. 41 50 N.

Independence, tp., Sussex co., N. J. Pop. in 1820, 1,850.—Town in the SE. part of Alleghany co., N. Y., 20 ms. SE. from Angelica.—Tp., Cuyahoga co., O.—Village and seat of justice, Bond co., Ill., on Kaskaskia river, 65 ms. a little N. of E. from St. Louis. Lat. 38 47 N., lon. W. C. 12 11 W.

Inachus, small river of Greece, in the Morea, rising in the mountains S. from Corinth, and, flowing S., passes Argos, and is finally lost in the Gulf of Napoli, near Napoli di Romania.

India, extensive region in Asia, which lies between 66 and 93° E. lon., and 7 and 35° N. lat. Under this name, the Europeans have erroneously included all the countries which lie S. of Tartary, and extend from the eastern frontiers of Persia to the eastern coast of China. But the name of India can be applied, with propriety, to that country only which is distinguished both in Asia and Europe by the name of Hindoostan. The countries to the E. of the river Burampooter, namely, Aracan, Assam, Ava, Burmah, Cambodia, Cochinchina, Laos, Malacca, Pegu, Siam, and Tonquin, which geographers have hitherto distinguished by the name of the Peninsula of India beyond the Ganges, are no more to be considered as belonging to India than the bordering countries of Persia, Tartary, and Thibet.—See *Asia*, *Hindoostan*, *China*, *India*, and *Oceanica*.

Indiana, co. of Pa., bounded by Westmoreland SW., Armstrong W., Jefferson N., Clearfield NE., and Cambria SE.; length 33 ms., breadth 23, area 770 sq. ms.; surface hilly, broken, and soil generally rocky, and, except near the streams, barren. It is separated from the Westmoreland by the Conemaugh river, and mostly drained by the creeks of that name and others flowing into the Alleghany, but on its extreme eastern border the W. branch of Susquehanna has its source. Chief town, Indiana. Pop. in 1820, 8,882; and in 1840, 20,782. Ctl. lat. 40 42 N., lon. W. C. 2 5 W.—Village and seat of justice, Indiana co., Penn., 26 ms. SE. from Kittanning, and 35 NE. from Greensburg. Lat. 40 38 N., lon. W. C. 2 8 W.—Tp., Alleghany co., Pa.

Indiana, State of the U. S., bounded by Ohio river S., the State of Ill. W., Lake Michigan NW., Michigan N., and State of Ohio E.

Indiana has an interior boundary on the Ohio

river opposite Ky., from the mouth of Great Miami to Wabash of - - - 336 ms.
 Up Wabash river to a meridian line, extending from N. lat. 39 23 - - - 150 "
 Along meridian line to Lake Michigan - 160 "
 Along Lake Michigan to N. lat. 41 45 - 32 "
 E. along parallel of N. lat. 41 45 to the NE. angle of the State - - - 110 "
 Due S. to the mouth of the Great Miami 185 "

Having an outline of - - - 973

Area 34,000 sq. ms. ; 2,760,000 acres.

The longest line that can be drawn in Indiana, is from its SW. to its NE. angle, 325 ms.

Its mean breadth between Ohio and Illinois, 150 miles.

Extreme S. at the mouth of Wabash, 37 49.

Extreme N. along the Territory of Michigan, 41 45.

The position of this State, lying lengthwise N. and S., exposes it to considerable vicissitude of seasons and difference of temperature. It is still less than Ohio, marked by bold and prominent scenery. Advancing towards the lowest depression of the Mississippi basin, its surface is in most places monotonous, and in the central and northern parts level and marshy. In every general attribute the two States of Ohio and Indiana have, however, so much resemblance that the same terms of description apply to both. They are in fact, naturally, one undivided part of the right slope of the Ohio valley, and as such might be connected in geographical description.

The prairies which we have found commencing in Ohio, expand in entering Indiana. The central flat, or table land, is also wider in the latter than in the former. The sources of the Ill., Wabash, St. Joseph, and Maumee, are all on this table land. The Maumee is a very remarkable stream. Its two superior branches, the St. Joseph and St. Mary's, unite in Indiana. The St. Mary's river rises in Allen and Mercer cos., in Ohio, and pursues a NW. course of 65 ms. to Fort Wayne. The St. Joseph river rises in Michigan, within less than 20 ms. of the mouth of Maumee, flows 80 ms. SW. to Fort Wayne, unites with the St. Mary's river at that place, and forms the Maumee. The latter literally turns upon its constituents, flows NE. 60 ms., and falls into the SW. angle of Lake Erie.

From the junction of the St. Mary's and St. Joseph rivers, at Fort Wayne, to the navigable sources of the Wabash is not 10 miles.

The country before us is one widely extended, flat, interspersed with small lakes, low long ridges of arable land, and much swamp. Prairies extend themselves between the streams. The waters are sluggish in their descent. The country around the extreme S. bay of Lake Michigan has the appearance of the sea marshes of Louisiana. Low flooded prairies intersected by lakes and interlocking creeks. No eminences are seen; one unbroken horizon encircles the eye. It is the same, timber excepted, at the mouth of the Maumee. I sailed in a very clear morning into the bay at its mouth, and very carefully swept my eye repeatedly around the limit of vision, but none, not the smallest swell in the landscape met my view. The resemblance to many a scene I had previously exam-

ined in Louisiana was indeed striking. The semblance is, however, still more strong at bottom of Michigan, at the NW. part of Indiana.

In proportion to extent, Indiana does not possess as much arable land as does Ohio. The part of both States lying within 100 ms. of the river is, as I have already observed, a continuation of one natural section, and of course similar common physiognomy. This tract would be found to enter Indiana near where its western meridian leaves the Wabash, and, winding through the State between the sources of White and Wabash rivers, would enter Ohio in Mercer co., and follow in the latter State the general course of the river, would merge into Lake Erie between the Blaine and Huron rivers, in Huron co.

This fine margin includes all the hilly and mountainous parts of the rolling tracts of both States, leaving to the NW. the level plains we have already noticed. It will at once be seen, by a glance on a map of the States, that the level region of Indiana is more comparatively extensive than that of Ohio.

The civil and political subdivisions of Indiana are the following, with the result of the census of 1820 subjoined :

Counties.	Inhabitants.	Sq. ms.	Total

* Nearly.

those cos. without an annexed pop. have been formed since 1820, or for some other reason not named in the census of that year.

In a review, however, of the settled parts of Indiana, the cos. of Wabash and Delaware, with the adjacent Indian country, ought to be excluded, as their extent is beyond every reasonable proportion to their pop.; and more, these cos. are mere arbitrary divisions of convenience, occupying the general and otherwise unappropriated parts of the State. Rejecting, therefore, the area of these sections, amounting together to 20,022 sq. m. in the actually inhabited section of Indiana will be restricted to 13,972, say 14,000 sq. ms. De-termining 3,824, the number of persons given by the census as inhabitants of Delaware and Wabash, to 147,178, will yield a balance of 143,354, as a compact mass of pop. in Indiana on 14,000 sq. ms., or a little more than 10 to the sq. m. The preceding was inserted in a former edition of the Geographical Dictionary, and retained as being the progressive population of the State. The progressive pop. of this State has been ex-tremely rapid since 1800, at which epoch it stood at 640. In 1810 the inhabitants amounted to 20,000. The next period of ten years swelled the pop., as we have seen, to 147,178.

This increasing body is composed of whites, 1,475,815; free persons of color, 1,230; and 190,000 slaves. The population of this State in 1825 was estimated at 250,000.

They are classed by the census thus:

Immigrants not naturalized	-	-	833
Engaged in agriculture	-	-	61,315
Engaged in manufactures	-	-	3,229
Engaged in commerce	-	-	429

Subjoined tabular statements exhibit the popu-lation of Indiana by the census of 1840.

Indiana was admitted into the Union as a State, December, 1816.

Indian Old Town, island and tp., Penobscot co., Me., in Penobscot river, just above the great falls. Pop. about 500 Indians.

Indianapolis, village and seat of Government for Indiana, is situated in Marion co, of that State, on the left bank of White river, below the mouth of Fall creek; distant 120 ms. NW. from Cincinnati, and 130 a little W. of N. from Louisville. Indianapolis stands very near the centre of the State, in a very productive tract of country. N. lat. 39 47, lon. W. C. 9 3 W. Pop. 1840, 2,692.

Indian Rivers.—There are several small streams so called in the U. S. One, Washington co., Me., between Addison and Jonesborough; another, N. H., one of the sources of the Connecticut; one in N. Y., the western branch of the Oswegatchie, a

stream of Sussex co., Del., heading with the N. tikoke river, and flowing E. enters Rehoboth bay of the Atlantic ocean, 12 ms. S. from Hen pen; a sound of Florida, on the Atlantic coast N. lat. 27°; and a river of La., a branch of N. river.

Indian River, hundred of Sussex co., Del., Indian river. Pop. in 1820, 1,887.

INDIAN TRIBES.—We insert the subjoined, memoranda, as to the names and population of aboriginal native inhabitants of our interior. So much of the document may be obsolete as fact, but accurate (which we do not vouch for) when written, remains history.

Without vouching for their accuracy, we have continued this article as matter of history on Indian tribes.

A correspondent of the Nashville Republic furnishes the following interesting information respecting the names and numbers of the Indian tribes on the Western frontier, and of those yet remaining within the limits of the several States. It is to be derived from official sources.

The names and numbers of the Indians who have emigrated to the West of the Mississippi are—

Choctaws	-	-	-	-	15,000
Appalachicolas	-	-	-	-	-
Cherokees	-	-	-	-	5,000
Creeks	-	-	-	-	2,000
Senecas and Shawnees	-	-	-	-	-
Senecas (from Sandusky)	-	-	-	-	-
Potawatomes	-	-	-	-	-
Peorias and Kaskaskias	-	-	-	-	-
Piankeshaws	-	-	-	-	-
Weas	-	-	-	-	-
Ottowas	-	-	-	-	-
Kickapoos	-	-	-	-	-
Shawnees	-	-	-	-	1,000
Delawares	-	-	-	-	-

The names and numbers of the Indian tribes resident west of the Mississippi are—

Iowas	-	-	-	-	1,000
Sacs (of the Missouri)	-	-	-	-	-
Omahas	-	-	-	-	1,000
Ottos and Missourias	-	-	-	-	1,000
Pawnees	-	-	-	-	10,000
Camanches	-	-	-	-	7,000
Mandans	-	-	-	-	15,000
Minateres	-	-	-	-	15,000
Assinaboins	-	-	-	-	-
Crees	-	-	-	-	3,000
Grosventres	-	-	-	-	3,000
Crows	-	-	-	-	45,000
Sioux	-	-	-	-	27,000
Quapaws	-	-	-	-	-
Caddoes	-	-	-	-	-
Poncas	-	-	-	-	-
Osages	-	-	-	-	5,000
Kansas	-	-	-	-	1,000
Sacs	-	-	-	-	4,000
Aricarees	-	-	-	-	3,000
Chazeness	-	-	-	-	2,000
Blackfeet	-	-	-	-	30,000
Foxes	-	-	-	-	1,000
Arepehas and Keawas	-	-	-	-	1,000

And there are yet remaining E. of the river in the Southern States a considerable number; the principal tribes are the Seminoles, Creeks, Cherokees, Choctaws, and Chickasaws.

Seminoles (yet remaining east) - - 2,420
 Choctaws do do - - 3,500
 Chickasaws do do - - 5,429
 Creeks do do - - 10,000
 Cherokees do do - - 22,668
 whose stated as Western tribes extend along the
 whole Western frontier. And taking as true the
 opinion of the Department, that the average num-
 ber of an Indian family is *four*, it may be seen
 that number of warriors, by possibility, might be
 brought into the field, and what number on the
 other hand might be required to keep them in
 check.—Nov. 1, 1834.

In an article on the subject of Indian affairs, the
 Wedgeville Journal furnishes some interesting
 facts of information in reference to the numbers of
 several Indian tribes in the United States, and
 their location in the western territory allotted for
 their future residence. This territory is stated to
 be a tract of country about 300 miles wide, west of,
 and adjoining the Arkansas Territory and the State
 of Missouri. Its southern end is based on Red
 river, which there divides the United States from
 Mexico, and the territory is to extend north as far
 as may be wanted; to the River Platte, as at present
 contemplated, or still further up, should it be
 necessary, till the eastern side of it, extending be-
 yond Missouri, may meet the Mississippi, as it
 winds westwardly, in latitude 46. If this contem-
 plated western territory should stop at the River
 Platte, it will be about as large as Georgia was
 when her limits reached the Mississippi. Should
 it extend up to the 46th degree of latitude, it will
 be about 750 ms. long, N. and S., by 300 miles
 wide, as before mentioned.

The allotments already laid out, commence at
 the S. end on Red river. First, and S. of all, is
 that of the Choctaws; next the Creeks and Semi-
 noles; next the Cherokees; and north of these
 the Osages. These occupy in nearly equal por-
 tions that territory, forming nearly a square, that
 lies between the Arkansas Territory and the Mex-
 ican line, each portion extending quite across
 the whole from E. to W.

Northward of these allotments, and after an un-
 appropriated interval of 70 or 80 miles, there is an
 irregular location of a territory about as large as
 the Cherokee lands in Georgia, among the Kansas,
 Shawnees, Kickapoos, Delawares, and other
 tribes in proportion to the lands ceded by them
 east of the Mississippi, and situated so as best to
 consult their several wants. North of these the
 original title is extinguished to part of the land
 west of the Platte, and as much north of that river as
 covers a country larger than the present area of the
 State of Georgia.

The following are all the tribes now located in
 the Western territory, and the number of acres as-
 signed to each.

	No. of acres
Osages	7,564,000
Kansas	6,400,000
Shawnees and Missourians	1,536,000
Half-breeds, Ottobas, Omahas, and Kickapoos	128,000
Total	15,628,000

Assigned to the emigrant Indians, viz :

Choctaws	15,000,000
Creeks and Seminoles	13,140,000
Cherokees	13,000,000
Senecas from Sandusky	100,000
Senecas and Shawnees	96,000
Quapaws	34,000
Ottowas	96,000
Kaskaskias and Peorias	160,000
Weas and Piankeshaws	1,600,000
Shawnees	2,208,000
Delawares	708,000
Kickapoos	
Total	46,202,000

Whole number of acres - 61,830,000

The tribes east of the Mississippi, who have
 agreed to emigrate, and the number of persons of
 each tribe, are as follows :

Seminoles	5,000
Creeks	22,264
Cherokees	9,000
Chippewas, Ottowas, and Pottawato- mies	7,400
Chickasaws	5,600
Ottowas of Ohio	230
Appalachicolas	340
Pottawatomes of Indiana and the Wabash	3,000

The tribes east of the Mississippi, who have
 not yet agreed to emigrate, are stated to be as fol-
 lows :

In the State of New York, viz :

Senecas	2,242
Cayugas	128
Onondagas	490
Delawares	73
Oneidas	1,153
Tuscaroras	278
St. Regis	293
Connewaugas	54

Total - 4,176

At Green Bay, viz :

Oneidas	460
Stockbridges	320
Senecas	5

Total - 725

Wyandots in Ohio	575
Miamies	1,100
Menomonies	3,170
Chippewas and Ottowas of Lake Michigan	5,300
Chippewas	6,800
Cherokees	9,000

Whole number - 30,846

There are thirty different tribes west of the Mis-
 sissippi with whom the United States have treat-
 ies, embracing an aggregate population 156,310
 souls.

There are also forty-nine other tribes west of
 the Mississippi, with whom the United States
 have no treaties. Their numbers amount to about
 156,000.

Indiantown, village, Dorchester co., Md., on the left side of the Choptank river, 3 ms. SW. from New Market—Village, Currituck co., N. C., 59 ms. ENE. from Edenton.—Village in Williamsburg district, S. C., on Cedar creek, 80 ms. NNE. from Charleston.

Indian Wheeling, creek of Belmont co., Ohio, falls into the Ohio river opposite Wheeling, in Va.

Indies, East.—See *Oceanica*.

Indies, West. This misnomer of that elongated insular group between the two sections of America, was imposed by Columbus on his discovery of America, from supposing himself approaching the continent of Asia. The name has been continued by the mere force of habit. In gratitude, and an act of justice due to the illustrious and injured Columbus, these islands have received in the most respectable geographical works, the appropriate name of "The Columbian Archipelago." The English mariners designate them as the Windward and Leeward islands, and the French by a term equally vague, as "The Greater and Lesser Antilles." It is probable, however, that the great American Archipelago will remain to be designated in the U. S. as West Indies. It is very difficult to change an established general term.

Glancing our eye on a map of the whole America, with the West Indies, we at once perceive that the latter is a prolongation of the mountains of Cumana. La Margarita, the Grenadines, Barbados, Martinico, Dominica, Guadeloupe, Grande Terre, Marie Galante, St. Christopher's, St. Eustatius, and the Virgin islands, extend from Cumana in a northerly direction, from lat. 11° to 18 30 N. These small islands, known as the Windward and Leeward islands, and from the aboriginal pop. the Caribbean islands, separate the Atlantic ocean from the Caribbean sea. The straits intervening between them, are inlets of the tropic cur-

rent, or Gulf stream, from the Atlantic ocean, its passage into the Caribbean sea. Porto Rico, St. Domingo, and Jamaica, stretch from 11 35 from W. C., to 1 40 W. of that meridian; Cuba and the Bahamas, opening like forceps, close the southern point of Florida, leaving deep and wide channel, through which the flood escapes from the Mexican gulf into the northern Atlantic. The islands of the West Indies are almost uniformly mountainous in the interior with a sloping border more or less alluvial. Mountains, or coral rocks, line many of their shores exhibiting a strong analogy with the groups Australasia and Polynesia. Lying in great part within, or very near the northern tropic, the climate of the W. Indies varies but little in the different islands, except from difference of level. The mean temperature of the sea coasts is about 78° of Fahrenheit. There are but two seasons in this archipelago; these are the wet and dry. The seasons have no very definite points of separation but in general the dry season continues from the beginning of May to the end of September. The rainy season sets in with October, and continues to the latter part of April. The climate of the whole region is destructive to northern constitutions, and happily to armies in particular. The higher parts of St. Domingo, Jamaica, and Cuba are exceptions; but tracts above 1,400 feet are confined in extent. In a treatise so brief as this, it cannot be expected that we can insert various vegetable products of the West Indies; we can only observe that the numerous islands, from the variety of soil and elevation are capable of sustaining an unexampled variety of trees, plants, and herbs. The most important vegetables cultivated by the inhabitants, are sugar cane, coffee, pimento or allspice, cotton, one species, but many varieties of ignames, potato, maize, and manioc.

No 1.

A statement of the population, produce, and imports and exports of the British West Indies, compiled from official documents :

Islands.	Whites.	Colored.		Sugar.	Coffee.	Rum.	Value of exports to Great Britain.	Value of imports from G. Britain.	Tonnage employed.

mingo, or more correctly Hayti, is in possession of the descendants of Africans, though many Spaniards and some French remain on the island, subjects of the Haytien Government.

Indigirka, large river of Russia, in northern Asia, rises in the Yablonoy mountains, about 170 ms. from the sea of Ochotsk, and flowing a little E. of N. by comparative courses 700 ms., falls into the Northern ocean 350 ms. E. from the mouth of the Lena.

Indore, or *Endore*, modern city of Hindoostan Proper, capital of a territory in the province of Malwa, subject to one of the Poonah Mahratta chiefs, 30 ms. S. of Ougein. Lon 76 5 E., lat. 24 31 N.

Indostan.—See *Hindoostan, Asia, &c.*

Indrapore, Dutch settlement on the W. coast of Sumatra, in the E. Indies, 160 ms. NW. of Bencoolen.

Indre, department of France, including the late province of Berry. It has its name from a river which rises in this dep., and passing into that of Indre and Loire, falls into the Soire between Chinon and Saumur. Chateauroux is the capital.

Indre and Loire, department of France, which include the late province of Touraine. Tours is the capital.

The table No. 1 is inserted as historical and comparative data on the very important subject of the West Indies, and is from the Boston Daily Advertiser.

No. 2, the data more recent and more general than that of No. 1, is taken from Black's Atlas.

The Spanish pop. yet retain the most valuable portion of the West Indies. That nation holds Cuba and Porto Rico, with some neighboring is. The British have procured the next most important portion.

The second island of the West Indies, St. Do-

Industry, town and tp., Somerset co., Maine, 13 ms. W. from Norridgewock.

INTERIM, title of a convention or decree, given in 1548 by the emperor of Germany, Charles V, the declared object of which was to pacify Germany on the subject of religion. The interim stated, and as far as imperial authority went, determined the Articles of Faith, which were to be adopted by Catholics and Protestants, until the religious controversies should be decided on by a general council. This interim had, as might have been, perhaps was, expected, but a limited effect in the accomplishment of its ostensible object. It must, however, have been favorably viewed by a large part of the Protestants, as it was defended by Melancthon; and on the other side, offensive to many of the Catholics, as it was written against by many of their eminent clergy, and amongst others by Robert Cenalis, bishop of Avranches.

INQUISITION, written deeply on human history; an ecclesiastical tribunal established in several Roman Catholic countries, nominally to maintain the purity of Roman Catholic doctrines, but really to sustain political power and repress all free expression of human opinion. This repressive jurisdiction dates its origin back to A. D. 1200; was adopted 1229 by the court of Toulouse, and confided to the Dominicans by Gregory IX., in 1233. Innocent IV. confirmed its empire in 1251 over all Italy, except Naples. In 1448 its authority was completely paramount in Spain. Portugal adopted it in 1557, and 12 years before Pope Paul III. had formed the congregation of this tribunal, under the name of HOLY OFFICE, and Sextus V. confirmed that congregation in 1558.

In countries where the inquisition remains in existence, its power has become in great part nominal, as, like many other outrages against human reason, it has yielded to the power of that very reason it was instituted to trammel and repress, if not to destroy. The inquisition affords, we might say, the most conclusive of all evidence that the Reformation, so called, has not been confined to Protestants, but that it has also pervaded the Roman Catholic church, and influenced all Christianity.

Indus, great river of Hindoostan proper, called by the natives Sinde, or Sindh; formed of about ten principal streams, which descend from the Persian and Tartarian mountains. From the city of Attock to Moultan, or to the conflux of the Chenaub, it is commonly named the river of Attock. This immense river, as laid down on Black's Edinburgh Atlas, (map of Indoostan,) has its extreme source N. of the Himalaya mountains. N. lat. 31°, and lon. 81° E. of London. Flowing thence by comparative courses northwestwardly 500 ms., pierces the Himalaya, curving gradually to SW. 200 miles to Attock, where it receives from the W. the river of Cabul. Below Attock, the course in a distance of 400 ms. is a little W. of S. to the influx of the Gurrah, (Sutledge,) or river of the Punjaub, and thence 500 miles, with a large western curve, the general course from Attock is continued to the Arabian sea, giving to the Indus an entire general course of 1,600 miles.

In the same Edinburgh map, the Sutledge has its remote source in the Lake Rhavan Rhad, to the northward of the Himalayas, and within a few ms.

of the sources of the Indus, and thence flow nearly parallel to the Indus 200 ms., turns to S. pierces the Himalaya, and following the latter general direction 500 miles to its junction with Chenaub, (Ascenes of Alexander's historians) and about 100 further to its influx into the Indus at Mittun. The various confluent rivers which form the Sutledge, Chenaub, or Gurrah, as called in the lower part of its course, are those draining the Punjaub, or country of *Five Rivers*, including Indus, Zelum, Chenaub, Ravee, and Sutledge. See articles *Duab* and *Punjaub*.

It is certainly very unphilosophical, and prone to error, to estimate the rank of rivers by their mere length, the surfaces drained being the far more correct data. As respects the Indus, however, it may be doubted whether we are sufficiently acquainted with the higher part of its valley to determine its rank by either means. As delineated on Black's map of "*Indostan, with part of Cabul*," the entire basin, including the Punjaub, includes a surface of 250,000 square miles.

Mr. Henry Wheaton, in a letter dated Berlin, December 1, 1842, directed to Francis Markoe, Esq., corresponding secretary of the National Intelligencer, and published in the National Intelligencer, March 28, 1842, gives new and very important information as regards the Indus. Mr. Wheaton states that, from a recent survey made by order of the British Government, the Indus is now discharged into the sea, in a great measure, if not entirely, to two mouths; that, owing to the state of such of the channels as are navigable, no vessel drawing above 7 feet of water can now use them.

In latitude, the basin of the Indus extends from 23° 30' to northern tropic, to 38° 30', and in longitude from 65° to 75° E. of London. This fine river drains northwestern Hindoostan, Cabul, Little Tibet, a large extent of Great Thibet, with part of Beloochistan.—See *Chenaub*, &c.

Ingatestone, town of Eng., in Essex, 23 ms. NE. of London.

Ingersoll's Store, NW. part of Tompkins co., N. Y., about 10 ms. from Ithaca.

Inglesville, town, Montgomery county, Va., 5 miles SW. from Lexington, and 235 NE. of Knoxville.

Inglesheim, town of Germany, in the palatinate of the Rhine, remarkable for having been the residence of the emperors, seated on the river Saale, on an eminence, from whence there is a charming prospect, 5 miles SW. of Mentz. Lon. 8° 15' E., lat. 49° 48' N.

Ingleton, town of Eng., in the W. Riding of Yorkshire.

Ingling, town of Fr., in the dep. of Moselle.
Ingolstadt, handsome town of Germany, and the strongest in Bavaria, with a famous university and a fine church. It is seated on the Danube, 5 miles NNE. of Neuburg, and 45 N. by W. of Munich. Lon. 11° 10' E., lat. 48° 46' N.

Ingria, province of the Russian empire, which now forms the government of St. Petersburg. It is 130 miles long, and 50 broad; bounded on the N. by the river Neva and the gulf of Finland, on the E. and S. by the government of Novogorod, and on the W. by that of Livonia.

Inhambariau, kingdom of Africa.—See *Africa*, p. 28, col. 1st.

Inman's Cross Roads, post office, Wayne co., Y., by post road 193 miles NW. from Albany.
Inn, river of Germany, which has its source in the country of the Grisons, at the foot of the mountain Septimerberg. It runs NE. through Tyrol, by Inspruc, and, continuing its course NE. through Bavaria, passes by Kufstein, Vasseburg, Murnau, and other towns, and falls into the Danube between Passau and Instadt. The general course of the Inn is from SW. to NE., and comparative length about 300 miles. The lower part of the Inn separates Bavaria from Austria.

Innaconda, fortress of the Deccan of Hindoostan, the Guntoor Circar, situated on a hill, 46 miles N. of Ongole, and subject to the Nizam of the Deccan.

Innerkeithing.—See *Inverkeithing*.

Innicher, town of Germany, in the Tyrol, situated on the Drave. Lon. 12 17 E., lat. 46 48 N.

Innislochran, or the *Sandy island*, island in the river Shannon, where there was a monastery.

Innisfail, one of the ancient names of Ireland.

Innisfallen, island in the Lake of Killarney, in the county of Kerry, and province of Munster.

Innishannon, town in the co. of Cork, and province of Munster, situated on the river Bandon, 4 miles from Dublin, and 6 from Kinsale.

Innishirkan, island between Cape Clear island and Baltimore bay, in the co. of Cork.

Innishilling, town of Ireland, in the county of Down, with a strong fort; it being a pass of the greatest importance from the N. to the S. of the island. It is seated in the middle of Lough Erne, where that great lake is contracted for about 5 miles to the breadth of an ordinary river. It is 25 miles E. of Ballyshannon. Lon. 6 50 W., lat. 55 N.

Innthal, district of Germany, in the Tyrol, watered by the river Inn. Inspruc is the capital.

Innvierthal, extensive district of the Austrian empire, between the Danube, Inn, and Sabza.

Inowsladslow, strong and considerable town of Poland, and capital of Cujavia, with a fort and palace, where the bishop of Cujavia resides. It is 37 miles NE. of Gnesnia, and 70 W. of Warsaw. Lon. 18 50 E., lat. 52 58 N.

Inspruc, populous town of Germany, in the Tyrol, capital of the district of Innthal, with a strong castle, formerly the residence of the archdukes of Austria. It is seated in a pleasant valley, on the river Inn, 27 miles NW. of Brixen, and 60 S. of Innsbruck. Lon. 11 37 E., lat. 27 10 N.

Instadt.—See *Passau*.

Insterburg, city of Lithuania, in Prussia, where 30,000 inhabitants, who are in number about 3,000, trade principally in beer and grain. Lon. 21 40 E., lat. 54 40 N.

Interlachen, town of Switzerland, 32 miles SE. of Bern.

Inverary, royal borough in Argyleshire, seated on the NW. side of Loch Eyne. It is 75 miles NW. of Edinburgh, and 45 of Glasgow. Lon. 5° 10' W., lat. 56 16 N.

Inverary, small borough in Aberdeenshire, situated on the beautiful and fertile banks of the Don, just above its confluence with the river called Urie-ter. It is 15 miles NW. of Aberdeen.

Inverbervie.—See *Bervie*.

Inveresk, village in Edinburghshire, situated on

the E. side of the mouth of the river Esk, on the Frith of Forth. In 1783, the subterraneous remains of a Roman hypocaust, or hot bath, were discovered here.

Inverkeithing, royal borough in Fifeshire, situated on the Frith of Forth. It has a beautiful bay, with a good harbor, and considerable trade in coal and other articles, and is 18 ms. NW. of Edinburgh. Lon. 3 25 W., lat. 57 0 N.

Inverlochry, ancient castle in the neighborhood of Fort William, in Inverness-shire.

Inverness, royal borough of Scotland, capital of a county of the same name, situated on the S. bank of the river Ness, and overlooking the Frith of Murray. It has a safe and convenient harbor. To the W. of this town is the remarkable vitrified fort called Craig Phadrick; the stones composing its walls appear to have been partly melted by fire. Inverness is 50 ms. NE. of Fort William, and 106 N. of Edinburgh. Lon. 4 10 W., lat. 57 34 N.

Inverness-shire, includes the subdivisions of Badenoch, Lochaber, Inverness-shire, Skie, and Harris, with a small part of Ross-shire and Murray-shire. It is bounded on the N. by Ross-shire; on the E. by Nairnshire, Murrayshire, and Aberdeenshire; on the S. by Perthshire and Argyleshire; and on the W. by the Western sea. It is, exclusive of the isles, about 80 ms. long from E. to W., and 50 broad from N. to S. It abounds with iron ore, and produces plenty of oak and fir; it abounds with pastures, but little corn, and is reckoned one of the most barren counties in Scotland. Pop. in 1801, 74,292; in 1811, 78,336; and in 1821, 90,157.

Inverness, tp. in Buckingham co., L. C., on the waters of Becancour river, 50 ms. SSW. from Quebec.

Ioannina, city of European Turkey, in Albania, on a lake, 40 ms. a little W. of N. from Arta, at N. lat. 39 26. It is situated about 30 ms. inland, and in a direction nearly due E. from the island of Corfu.

“The very existence of such a city as Ioannina,” says Mr. Hobhouse, “seems, until very lately, to be almost unknown, and yet I should suppose it, after Salonica and Adrianople, [he should have added Constantinople, certainly,] to be the most considerable place in European Turkey.”

“This city stands upon the western banks of the lake, at about 2 ms. from its northern extremity. In its utmost length it may be perhaps 2 ms. and a half, and in breadth, though in many places much narrower, nearly a mile. Immediately near the lake, it stands on a flat, but rising and uneven ground. A triangular peninsula juts into the lake, and contains the residence of the Pasha. The houses are, many of them, large and well built, but, from their latticed small windows and large folding doors, have a gloomy and inhospitable appearance from without; being furnished with open galleries, and connected with good gardens in the rear. Many that belong to the higher classes have, however, a lively and pleasant appearance within. Ioannina is a place of much trade for a Turkish city; exports oil, wool, corn, and tobacco, for the ports of the Adriatic and Naples; and for inland circulation through Albania and Roumelia, spun cottons from the plains of Tricala, stocks of guns, and pistols mounted in chased silver, both plain

and gilt, and also embroidered velvets, stuffs, and cloths, which are here better wrought than in any other part of Turkey in Europe. Pop. perhaps 40,000, of which one-tenth are Mahometans, the residue Christians, with a few Jews. This city occupies part of a mountain valley; the lake is in some places bordered by plains, but to the E., N.E., and N., at a short distance, rise mountains of great mass and extent. The vale of Ioannina is about 25 ms. long, and from 1 to 4 wide, and terminated on the SE., S., SW., and W., by a hilly, broken country. It is situated in a mountainous but fertile and romantic region, and has been recently rendered remarkable as being the scene of the power, wealth, tragic adventures, and final catastrophe of Ali Pacha. Since the death of this ferocious chief, the city has been restored to the Ottoman empire."

Ionis, village in Onondago co., N. Y., NW. from Salina, and by post road 167 ms. NW. from Albany.

Ionian, or *Republic of the Seven Islands*. This recently established nominal republic is composed of the islands along the SW. coast of Greece, from 36° to 40°. The seven principal islands, which give name to the State, are, Corfu, ancient Corcyra, Cephalonia, Zante, Santa Maura, Ithaca, Cyriquo, and Taxo. Entire area, about 1,500 sq. ms., and peopled by 200,000 inhabitants. Since the Congress of Vienna, in 1815, the Ionian republic has been abandoned to the British Government.

Iowa, river of the NW. Territory of the U. S., rises with the Des Moines river, and, flowing parallel, falls into the right side of the Mississippi at N. lat. 41°.

Iowa, Territory of the United States. There is some difficulty in giving a descriptive sketch of this Territory, so rapidly approaching its change to that of an independent State of the Union, from our ignorance of the limits which may be assigned to it when erected into a State. We assume, however, as probable, the following boundaries: the State of Missouri S., from the Missouri river to the mouth of Des Moines river, thence up the Mississippi river to the mouth of St. Peter's river, and thence up the latter stream to its great bend, thence in a SSW. direction to the Missouri river, and down the latter to the northwestern angle of the State of Missouri.

Geographically, the preceding limits embrace a zone from 40 33 to 45° N., and in lon. from 13° to 19° W. of W. C.; area about 70,000 sq. ms. The part organized into counties and included in the census, (see table No. 2,) lies westward from the Mississippi river and of Illinois and Wisconsin, extending nearly due N. from the Des Moines river to a little above Prairie du Chien, 190 ms.; mean width 70, and area, 13,300 sq. ms. The whole space, however, included in the designated boundaries in this article extends from S. to N. 310 ms; mean breadth at least 200 ms., and area 62,000 sq. ms. The southern part, and about the fourth of the surface sloping southwardly towards the Missouri river, but the residue declining SE. towards the Mississippi river, and in that direction drained by the rivers Skunk, Lower Iowa, Wabesipicon, Great Maccoquois, Penaqua or Turkey river, Upper Iowa, &c.

TABLE No. 1.

Population of Iowa, distributively and by class census, 1840.

Whites.—Ages.	Males.		Females.	
	Males.	Females.	Males.	Females.
0 to 5	4,380	4,380	4,380	4,380

Ipsala, *Cypsala*, or *Skipislar*, town of European Turkey, on the Maritza, 20 ms. above its mouth, and 45 ms. below Adrianople.

Ipsala, town of Turkey in Europe, on the Iaxartes, 20 ms. SW. of Trajanopoli, and 118 W. of Constantinople. Longitude 26 10 E., latitude 40 North.

Ipsara, ancient *Peyra*, small island of the Grecian Archipelago, 12 ms. NW. from Scio. Pop. about 16,000.

Ipswich, borough and seaport of Eng., in Suffolk, noted as being the birthplace of Cardinal Wolsey, and is seated on the Orwell, 26 ms. SE. from Bury St. Edmunds, and 69 NE. of London. Longitude 1 16 E., lat. 52 8 N.—Seaport and town of Essex co., Mass., on the river Ipswich, 12 ms. from Newburyport, and 10 NW. of Beverly, in lat. of 42 43 N., and lon. of 71 0 W. Pop. 1820, 2,553.

Ira, town in Rutland co., Vt., about 20 ms. from Whitehall, and 96 SSW. from Montpelier.—Town in Cayuga co., N. Y., N. from Seneca river, and about 20 ms. a little E. of N. m. Auburn.

Irac, in Asia, divided into *Irac Arabia* and *Irac Aemi*. *Irac Arabia*, or *Babylonian Irac*, is watered by the Euphrates and Tigris, and is almost under the dominion of the Turks, and forms the chalic of Bagdad. Bagdad is the capital.

Irac Aemi, or *Persian Irac*, province of Persia, bounded on the W. by Irac Arabia and Kussia, on the N. by Aderbeistan and Ghilan, on the E. by Khuzistan, and on the S. by Farsistan. Isfahan is the capital.

Irasburg, village and tp. in Orleans co., Vt., 40 ms. NNE. from Montpelier.

Irbitskaia, town of Russia, in Peru, on the Irbitz river, 140 ms. NE. from Ekaterinenberg. Lon. 50 E., lat. 57 35 N.

Ireby, town of Eng., in Cumberland; it is 10 ms. NE. of Cockermouth, and 299 NNW. of London. Longitude 3 18 W., latitude 54 50 N.

Iredell, co. of N. C., bounded by Mecklenburg Lincoln SW., Burke W., Wilkes NW., Surmountain N., and Rowan E.; length 40, width 20 ms.; area 800 sq. ms. Surface hilly, and in part mountainous; soil fertile. Chief town, Statesville. Pop. 1820, 13,071. Lat 36° and lon. W. C. 4° intersect in the N. part of this county.

Irekin, *Jerkin*, or *Yarkan*, rich and populous town of Tartary, the capital of Bocharia, with a castle. It is the staple town of all the trade carried on between India and the N. part of Asia. The Kalmucks are masters of it, and never disturb any one on account of his religion. It is 8 ms. N. of Cashgur. Lon. 73 25 E., lat. 41 40 N.

Ireland, second most important island of Europe, in latitude extends from Cape Clear, in the co. of Cork, 51 26 N., to Malin Head, in the co. of Donegal, 55 22, and in lon. W. of London from the extreme eastern part of co. Down, 5 40, to the westernmost point of the co. of Kerry, 10 30. The latter is also the westernmost land of Europe. The outlines of the island rudely approach a rhomboid. The greatest length is in a NNE. direction from Cape Clear to Fair Head, only a few miles exceeding 300; the area so near as to admit the adoption of 32,000 English sq. ms., which yields a mean breadth of 140 ms. On Black's atlas it is stated: "The island contains 29,499,550 imperial acres; whereof 14,603,415 acres are cultivated, or capable of cultivation, the remainder being covered with mountains, bogs, and lakes. The sea which separates Ireland from Great Britain varies considerably in breadth. The shortest distance between the two islands is from Fair Head, in Antrim, to the Mull of Cantrian, in Argyleshire, which is 12 ms. From Port Patrick, in Galloway, (Scotland,) to the nearest point of Antrim, it is 22 ms.; from Holy Head (island of Anglesey) to Houth Head it is 60 ms.; and from Carnsore Point, in Wexford, (southeast angle of Ireland,) to St. David's Head, in Wales, about 50 ms. The greatest width of the Irish sea is 130 ms."

The ancient and yet popular, though not official, provincial division of Ireland was into Ulster on the N., Connaught W., Leinster E., and Munster S. Before entering on the existing administrative divisions, (the counties,) we may observe that the climate of Ireland is the superlative of that uniformity of temperature so characteristic of Western Europe, but must premise that, in speaking of this uniformity, we must be understood to mean comparative, as, though the seasons of Ireland, to apply particularly to those of that island, are mild and uniform when compared even with those of England, still the seasons of the former differ greatly, as regards temperature and moisture, with each other. But, with these differences, Ireland is, beyond all comparison in the expanse of the earth of equal polar approach, the most habitable. When preparing the article "Climate" for the Philadelphia edition of Brewster's Encyclopædia, I was at great pains to procure and collate tables of wind and temperature, and found from the document that the mean annual temperature of England, or rather Great Britain, was 46.33, England alone 47.72, Ireland 48.90.

Again, in addition to a higher mean, Ireland has very remarkably less violent extremes than either England or Scotland. The subjoined tabular view of the counties of Ireland, with their respective number of inhabitants, is from Black's atlas, Edinburgh, 1841, though the data in regard to population was from 1831:

In Ulster.

Counties.	Area in English sq. ms.	Population.	Population to sq. m.	County towns.
Antrim	1,186	325,615	274	Carrickfergus.
Armagh	513	220,134	423	Armagh.
Cavan	740	227,933	321	Cavan.
Donegal	1,820	289,149	159	Lifford.
Down	955	352,012	363	Downpatrick.
Fermanagh	736	149,763	203	Enniskillen.
Londonderry	810	232,012	274	Derry.
Monaghan	511	195,536	382	Monaghan.
Tyrone	1,179	304,463	258	Omagh.
Total	8,450	2,286,622	270	

In Connaught.

Counties.	Area in English sq. ms.	Population.	Population to sq. m.	County towns.
Galway	2,360	414,684	133	Galway.

Tipperary	1,533	462,563	292	Clonmel.
Waterford	736	177,054	240	Waterford.
	9,187	2,287,152	mean. 247	

Summary.

Provinces.	Area in sq. miles.	Population.	Population to sq. mi.
Ulster	8,450	2,286,622	270
Connaught	6,765	1,343,514	198
Leinster	7,372	1,892,348	243
Munster	9,187	2,287,152	247
Totals	31,774	7,809,636	245

It may here be noticed that, were the one lion of square miles included by the already or ized States and Territories of the United S half as densely peopled as Ireland, the aggre would be *one hundred and twenty-two million hundred thousand*.

From the foregoing tables, the surface of Ire in our statute acres, would be found 20,335, of which Black's atlas states 14,603,473 acr arable and pasture lands. From these elemer appears that the population exists by the cul tion and pasturage of less than two acres to a dividual.

In its general aspect, Ireland presents some remarkable features. The eastern coast, Cape Clear to Fair Head, though broken by merous small bays and inlets, affords exce havens; yet there are none of those wide and indentings so numerous on the western. From the same south and north points of or but along the Atlantic coast, besides nume lesser inlets, Ireland is broken into penins points by the bays of Dunmanus, Bantry, mare, Ballinskelligs, Dingle, Tralee, Shan Mouth, Galway Bay, Clew Bay, Sligo Bay, egal Bay, Lough Swilley, and Lough Fe. The counties of Cork, Kerry, Clare, Galv, Mayo, and Donegal, all extend long penins projections into the Atlantic ocean. Bee through all past ages and all seasons of the y, by incessant western winds, and washed by whose action, if unequal as to time and sea never cease, the land yields its ever-claimed ute to the water. But, as compensation, if e western winds aid and act in concert with e ocean, they also give to Ireland, as already served, the mildest of all climates so far adva towards the polar extreme, and the most uni of all climates of our planet as to temperature.

The political situation of Ireland is so m matter of hypothesis, that we may well pau the very first aspect of the question. I pause, d leave that solution to time, which time only n solve. It is no risk, however, to say, in adva that there is no other continuous expanse of e or nearly equal area of the earth which comb so much to superinduce national prosperity. above element on its population dates as far in time as 1831, and from the previous rate of increase we may assume, had we not direct mean of calculating, a further accretion; but the subjo table will serve to show the probable existing tulation of the island:

Progressive population of Ireland from 18 to 1843.

Provinces.	Pop. in 1821.	Pop. in 1831.	Decen'l ratio of increase.	Population 1841, according to the ratio of p. 1821-'31.
Ulster	2,001,968	2,286,622	1.14	2,606,000
Connaught	1,053,918	1,343,514	1.27	1,706,000
Leinster	1,785,702	1,892,348	1.06	2,005,000
Munster	2,005,363	2,287,152	1.14	2,607,000
	6,846,951	7,809,636	1.13	8,926,000

Allowing a proportional increase for the last 10 years, gives very near 9,150,000 as the existg

population of Ireland, which probably varies not essentially from the real amount. If we therefore subtract 9,150,000 as the aggregate population, and 1,000 sq. ms. as the nett area, we have 286 as the distributive number per sq. m. These relative numbers and proportions are not offered as positive, but approximative data; and, adopting them without differing to any serious amount from the truth, some very interesting questions on the philosophy of human society arises. Ireland has never been, as far as history has recorded facts on the subject, inhabited by a homogeneous people, either as to nation, policy, race, or language. For upwards of six hundred years, a part of all have submitted to conquest; and for the last three centuries, two conflicting systems of religion have aggravated all other causes of national dissension. Yet, with all these impediments, the people have increased beyond what could have been anticipated by the most profound statist. When most persons speak of national degradation, they mean, if they mean any thing, individual degradation, contending personal character with the loss or want of nationality. The Spaniards, Portuguese, Italians, Greeks, and Poles, and, if possible, to a greater extent than any of the others, the Irish, have suffered by such calumny. The individuals of all these nations are no more obnoxious to such objections than those are who have been their oppressors. If, in regard to energy, the Irish deserve reproach, it is for excess. But, in fact, sweeping aspersions are not history. All great effects must have adequate causes; and effects, as well as the history of Ireland is concerned, so apparently contradictory, are no exceptions. Again, national lamentations, however natural they may be from those of the Prophet Jeremiah over Jerusalem and Judea to this hour, are mere expositions of facts, and never have or ever can arrest the course of events.

All poets are born such, and education and circumstances only enkindle combustible material, and few and far between have been those flaming poets; yet fewer still have been real historians. There is no other phenomena in the range of human progress which demands such a combination of intellectual power, and suitable social position to give that power scope of action, as history. There has never existed another example so rich as that which can admonish mankind as that afforded by Ireland. But where is the historian to perform the task of presenting this example in all its aspects to the world? Where is the person who, to the knowledge of general history, has impartially compared the effects of policy, language, and religion, and human passions influenced by all these, as well as by local position? And to all these advantages the man must possess independent fortune, to place him above what he must encounter or sink under who writes and publishes the story to deserve the title of Ireland.

Ireland; tp., Buckingham co., L. C., on Pitt river, 50 ms. S. from Quebec.—Village, Hampshire co., Mass., 98 ms. W. from Boston.

Ireland, New.—See *Britain, New*.

Irish Sea, that wide strait of the Atlantic ocean between Great Britain and Ireland.

Irish town.—See *Kilkenny*.

Irjeb, town of the country of Cabul, seated

near a western branch of the Indus, 110 ms. SSW. of Cabul. Lon. 68 25 E., lat. 33 20 N.

Irkeu, or *Irkien*.—See *Yarkan*.

Irkoutsk, city of Asiatic Russia, on the Angara river. It is the capital of the vast government of the same name. Lon. 103 30 E., lat. 52 16 N.

Irkutsk, largest and least populous government of the Russian empire, comprising all the E. part of Siberia, from the Northern ocean to the frontiers of China, and from the boundaries of the Government of Tobolsk to the Eastern ocean. This large territory was gradually conquered and appropriated by the Russians in their desultory excursions from Tobolsk. It is divided into four provinces of Irkutsk, Nertshink, Yakutsk, and Okotsk, the extent a little if any under 2,000,000 sq. ms.

Irois, Cape, western extremity of Hispaniola, or St. Domingo.

Iron-acton, village of Eng., in Gloucestershire, at the conflux of the Staure and Laden, which form the river Frome, 10 ms. NE. of Bristol. Much iron has formerly been dug up, and many iron works and great heaps of cinders are to be seen here.

Irondequot, bay of Lake Ontario, Monroe co., N. Y.

Irondequot, creek, Monroe co., N. Y., discharges its waters into the bay of the same name. The Grand Western canal of N. Y. crosses this creek by very expensive and massive works.

Iron Mountain, local term for that ridge of the Appalachian chain which separates N. C. from Tenn.

Iroquois, Pointe aux, St. Lawrence co., N. Y., on the river St. Lawrence, 6 or 7 ms. above the Rapid plat. It is advantageously situated for commanding the passage up and down the St. Lawrence.

Irawaddy, or *Erawady*, or *Irrawady*, or more correctly than either, it is probable, *Iravati*, great river of Asia, yet imperfectly explored. On Arrowsmith's Asia, a river is made to rise in Thibet, at N. lat. 27°, between the Sanpoo, and the Nou Kian of China, which, by the name of Kenpou, flows southward into Assay, and is there named Keen Duem; continuing southward over the Birman empire, enters the gulf of Ava, as the Irawaddy, at N. lat. 16°. The whole northern shore of the gulf of Ava, or Martaban, is a delta, or outlet of rivers. The Irawaddy enters the western, and the Thalu the eastern extremity of this gulf. Cape Negrais was formerly supposed to limit the outlets of the Irawaddy to the westward, but in 1825, during the Burmese war, British soldiers made their way by water from Promé to Aracan, and entered the gulf or bay of Bengal far N. of Cape Negrais. As delineated in Bläck's Atlas, map of Birmah, this river has its most remote sources in the mountains of Anoupectou-miou, southward of the great eastern bend of the Brahmapootra, N. lat. 27 30, and by a general course southward of at least, 900 ms., falls into the gulf of Martaban, N. lat. 16°. From the same authority, the basin of this river, has a length of 800 ms., with a mean width of 200, and area of 160,000 sq. ms. Umarapoura, capital of Birmah, stands on this river, 450 or 500 ms. above its mouth. Like the Ganges, the Irawaddy has its

efflux through a wide delta, on one of the streams of which stands the city of Rangoon.

Iromango, considerable island, and one of the New Hebrides, in the South sea. Lon. 169 20 E., lat. 18 48 S.

Ironam, one of the Hebrides, in the South sea, near Tanna. Lon. 170 26 E., lat. 19 31 S.

Irtysh, large river of Asia, in Siberia, which rises in the country of the Kalmucs, and, running from the S. to W., falls into the Oby. The Irtysh rises upon the table land of Asia, first flows into, and again issues from the lake of Saisan Nor. After a course of about 250 ms. it passes the Altai mountains, and enters Asiatic Russia. Below its passage through the Altai, the Irtysh flows to the NW., by comparative courses, about 1,000 ms., to Samarov, where it unites with the Oby. The Irtysh, augmented by many large tributaries, is in fact the main stream, though the united waters take the name of Oby.

Irville, village in the western part of Muskingum co., O., 12 ms. NW. from Zanesville.

Irvine, or *Irwin*, river of Scotland, in Ayrshire, which, descending from the mountains on the E., passes by Derval, Newmills, Galston, and Riccarton, and falls into the Frith of Clyde, close by the town of Irvine.

Irvine, or *Irwin*, royal borough and seaport of Scotland, Ayrshire, seated at the mouth of a river of the same name, on the frith of Clyde, 15 ms. E. of the isle of Arran, and 60 W. by S. of Edinburgh. Its chief trade is the exporting of coal to Ireland. Lon. 2 41 W., lat. 55 32 N.

Irvine, river of Va., branch of Dan river.—See *Smith's river*.

Irwil, river in Eng., in Lancashire, which rises above Bolton, flows thence to Manchester, and falls into the Mersey, below Flixton.

Irwin, co., Ga., bounded by Fa. S., Early W., Doolen N., Telfair NE., and Appling E.; length 70 ms., breadth 48, area 3,360 sq. ms. The Ocklockonne, Suwanny, and Little St. Illa rivers rise in the co.; the general surface is level. Pop. in 1820, 411; and in 1840, 2,038. Central lat. 31 10 N., lon. W. C. 6 30 W.

Isabella, ancient town of St. Domingo, founded by Columbus, about 90 ms. E by N. from Cape Francois.

Isabella, *St.*, island of the South sea, discovered by the Spaniards in 1568. It lies off the intendancy of Guadalaxara. Lat. 21 50 N.

Isbellsville, village, Todd co., Ky., by post road 218 ms. SW. from Frankfort.

Ischia, island of Naples, ancient *Enaria*, or *Pithecosa*, 15 ms. in circuit, lying 3 ms. off the coast of Terra di Lavoro. It is full of agreeable valleys, which produce excellent fruits; mountains, on which grow vines of an exquisite kind, rivers, and fine gardens.

Ischia, city of Naples, capital of an island of the same name. Lon. 14 2 E., lat. 40 41 N.

Isselstein, town of the kingdom of Holland, Utrecht on the Issel, 4 ms. SW. of Utrecht.

Isenarts, or *Eisenarts*, town of Germany, in Styria, famous for iron mines, 30 ms. NW. of Graz. Lon. 15 4 E., lat. 47 25 N.

Isenach, town of Germany, in the circuit of Upper Saxony, from whence a Saxon prince takes the title of duke. Lon. 9 17 E., lat. 51° N.

Isenburg, large town of Germany, capital of a co. of the same name in the electorate of Trararhe, with a castle, seated on a river, 8 ms. N. by N. of Coblenz. Lon. 7 34 E., lat. 50 32 N.

Principality of Germany, divided between the houses of Hesse-Cassel and Hesse-Darmstadt.

Isenghein, town of the kingdom of the Netherlands, with the title of principality, seated on river Manderla. Lon. 3 18 E., lat. 50 44 N.

Iser, river of Germany, which rises on the confines of Tyrol and Bavaria, and, passing Munich and Landschut, falls into the Danube between Straubing and Passau.

Isere, dep. of Fr., including part of the pro. of Dauphiny. It is so named from a river which rises on the confines of Savoy, and falls into the Rhone above Valence. Grenoble is the capital.

Iserthon, or *Lohn*, town of Germany in the circle of Westphalia, 32 ms. from Cologne, where they manufacture ribands, &c.

Isernia, town of Naples, in Molise, with the title of bishop's see. It is seated at the foot of the M. de la penines, 12 ms. W. of Molise, and 46 N. of Naples. Lon. 14 24 E., lat. 41 36 N.

Isigni, seaport of Fr., in the dep. of Calvados, and late province of Normandy, noted for its cider works, cider, and its butter. It is 15 ms. W. of Bayeux. Lon. 0 59 W., lat. 48 20 N.

Isis.—See *Thames*.

Iskenderoon.—See *Scanderoon*.

ISLAMISM, the proper name of the religion of Mohammed, and that used by the votaries of that faith. The Mohammedans say *al-islam*, from an Arabic word *salamez*, and, as they thus apply it, means "an entire abandonment to God, of person, and all that appertains to person."

Islands, *Bay of*, of New Zealand, at the North extremity of the most northern of the two islands go under that name.

Island Creek, tp., Jefferson co., O.

Islands of Guyandotte, post office. In the list of post offices published at Washington, 1840, this office is placed in Logan co., Va., west of under the head of counties there is no Logan named for Va.

Islay, or *Ila*, island of Scotland, one of the Hebrides to the SW. of Jura. Its greatest length is 25 ms., its breadth 18. The principal village is Bowmore, which has a convenient harbor. The face of the country is hilly. Pop. about 12,000, area 154,000 acres.

Isle aux Petite Bois, small island, Alabama, between the Gulf of Mexico and Pascagoula sound.

Isle aux Crudres, island and seigniory, New Brunswick, L. C., in the St. Lawrence river.

Isle aux Noix, island, L. C., in Sorrel river, about 11 ms. below its efflux, from Lake Champlain.

Isle-Adam, town of Fr., now in the dep. of Seine and Oise, lately in the province of the Ile de France, with a castle, seated on the Oise, 20 ms. N. by W. of Paris. Lon. 2 13 E., lat. 49 18 N.

Isleborough, tp., Hancock co., Me.

Isle of Beeves, island of N. America, in the bay of Campeachy, 17 ms. long and 8 broad. It is fertile, and abounds in cattle and fruits.

Isle-Dieu, small island of France, 14 ms. from the coast of Poitou. It was taken by the English in 1795; but soon after evacuated. Lon. 15 W., lat. 46 55 N.

de-France.—See *France, Isle of*.

Jesus, island and seigniory, Effingham C. It is situated NE. from the island of *Oréal*, with an intervening channel of *St. Lawrence* river.

Jourdain, town of Fr., now in the dep. of *Orléans* and lately in the province of *Armagnac*. It is situated in an island of the river *Saône*, 8 ms. N. of *Orléans*. Lon. 1 2 E., lat. 43 40 N.

of Orleans, island, county, and seigniory, situated in *St. Lawrence* river, commencing 4 miles below *Quebec*.

Rousse, town of *Corsica*, on the seacoast, 12 miles SW. of *Bastia*.

and Vilaine, dep. of France, containing part of the late pro. of *Bretagne*. *Rennes* is the capital.

eben.—See *Eisleben*.

of Wight, county of Va., bounded by *Nantuxet* SE., by *Blackwater* river or *Southampton* W. SW. NW., and *James* river NE.; length 15 miles, mean width 15, area 450 sq. ms. Surface fertile and soil of middling quality. Chief town, *Charleston*. Pop. in 1820, 10,139; and in 1840, 15,000. Central lat. 36 48 N., lon. 20' E.—*Charleston* and post office, *Isle of Wight* co., Va., 12 miles W. from *Norfolk*, and 89 SE. from *Richmond*. Lat. 36 50 N., lon. W. C. 28' E.

Royal, long island of *Lake Superior*, 100 miles long, and 40 wide in some places.

Worth, village of Eng., in *Middlesex*, seated on the *Thames*, 9 ms. W. of *London*.

Verte, seigniory, *Cornwallis* county, L. C., situated on the SE. side of *St. Lawrence*, 104 miles below *Quebec*.

Laborough, tp., *Hancock* co., Me., 1 mile W. of *Castine*.

Islands of Shoals, seven small islands, about nine miles SE. from *Portsmouth*, N. H. They form a part of *Rockingham* county and *Staten* island; they comprise the township of *Gosport*.

de St. John, seigniory, *Devon* co., L. C., situated on the SE. side of the *St. Lawrence*, 45 miles below *Quebec*.

du Portage, seigniory, *Cornwallis* co., L. C., situated on the SE. side of *St. Lawrence*, 85 miles below *Quebec*.

ington, village of Eng., in the county of *Middlesex*, on the N. side of *London*, to which it is contiguous; appears to be of *Saxon* origin, and in the *Conqueror's* time was written *Isledon*, *London*.

Islip, town of Eng., in *Oxfordshire*, 4 miles N. of *St. Albans*. *Islip* was given by *Edward the Confessor* to *Westminster Abbey*, to which it still belongs. By the late inland navigation, it has a communication with the river *Thames*, *Humber*, and *Ouse*, and is its navigation extends to 500 miles through different counties.—*Islip* is situated on *Long Island*, in *Suffolk* county, N. Y., 12 miles E. from *New York* city.

Mail, strong town of *Turkey* in *Europe*; in *Bessarabia*, on the N. side of the *Danube*, 140 miles W. of *Bender*. Lon. 29 47 E., lat. 45 30 N.

id, town of *Turkey* in *Asia*, capital of *Byzantium*, situated on the sea of *Marmora*. Lon. 29 37 E., lat. 40 37 N. It is the *Nicomedia* of the ancients.

Key, imperial town of *Suabia*, seated on the

Isney, 14 miles NE. of *Lindau*, and 62 SW. of *Augsburg*. Lon. 10 3 E., lat. 47 42 N.

Isnîc, town of *Turkey* in *Asia*, in *Natolia*. It is the ancient *Nice*, famous for the first general council here in 325. Nothing remains of its ancient splendor but an aqueduct. Jews inhabit the greater part of it; and it is seated in a country fertile in corn and excellent wine, 75 ms. SE. of *Constantinople*. Lon. 30 9 E., lat. 40 13 N.

ISOCHRONOUS, from Greek *isos*, equal, and *chronos*, time, and most usually applied to the vibrations of a pendulum, supposed to be made in equal time. *Synchronism* comes from the same roots, and has in fact the same meaning, but with the following difference of application: *isochronism* is applied to the vibrations of the same pendulum, whilst *synchronism* expresses the equality of motion of two pendulums.

Isola, seaport town of *Italy*, in *Naples*, in *Calabria Ulteriore*, 18 ms. SE. of *St. Severino*. Lon. 17 26 E., lat. 39 2 N.

Isona, town of *Spain*, in *Catalonia*, seated near a mountain, at the foot of a rivulet.

Ispahan, celebrated city, capital of *Persia*, in the province of *Irac-Agemi*, and thought by some to be the finest city in the East. It stands in the middle of a plain, surrounded on all sides by mountains at 8 miles distance, and on a small river called *Sanderut*, which supplies almost all the houses with water. It is 20 miles in circumference, with well-built houses and flat roofs, on which they walk, eat, and lie, in summer, for the sake of the cool air. The inhabitants were computed at about 1,000,000; but this kingdom having been distracted by civil wars, the principal towns are greatly depopulated. *Ispahan* has 3 large suburbs, called *Juisa*, *Hasenbath*, and *Kebrabath*. Though at a distance from the sea, it carries on a great trade, people of several nations resorting there for the sake of traffic. It is 265 miles NE. of *Bussarah*, and 1,400 SE. of *Constantinople*. Lon. 52 55 E., lat. 32 25 N.

Issel, or *Yssel*, river of the kingdom of *Holland*, which branches off from the *Rhine* below *Huesen*, and running by *Doesburg*, *Zutphen*, *Deventer*, and *Campan*, falls into the *Zuyder Zee*.

Issel, or *Yssel*, *Little*, river of the kingdom of *Holland*, which waters *Ysselstein*, *Montfort*, and *Gouda*, and falls into the *Merwe* above *Rotterdam*.

Issel, or *Yssel*, *Old*, river which rises in the duchy of *Cleves*, and enters the *Issel* at *Doesburg*.

Issequibo, flourishing settlement of the Dutch in *Guiana*, on a river of the same name, and contiguous to that of *Demarara*.

Issoire, ancient town of Fr., now in the dep. of *Puy de Dome*, and lately in the province of *Auvergne*. At *Vernet*, near this town, are found amethysts, of color as beautiful as those of the East, but not so hard. *Issoire* is seated on the *Couze*, near the *Allier*, 13 miles S. of *Clermont*. Lon. 3 25 E., lat. 45 34 N.

Issoudun, town of France, now in the dep. of *Indre*, and lately in the province of *Berry*, with a castle; its trade is in wood, cattle, cloth, hats, and stockings, and is seated partly on an eminence and partly on a plain, 17 miles SW. of *Bourges*, and 135 S. of *Paris*. Lon. 2 6 E., lat. 46 57 N.

Is-sur-Tille, town of France, now in the dep. of *Côte d'Or*, and lately in the province of *Burgundy*.

dy, seated on the Igonn, near the Tille, 12 miles N. of Dijon.

ISTHMUS, Greek, *isthmos*, neck of land between two seas, and uniting two other bodies of land, such as Suez and Panama.

Istria, kind of peninsula of Illyria, lying on the NE. part of the gulf of Venice. It is bounded by Carniola on the NE., and on all other sides by the sea. The air is unwholesome, especially near the coast; but the soil produces plenty of wine, oil, and pasture; there are also quarries of fine marble. Istria now forms a part of the Austrian kingdom of Illyria. Capo d'Istria is the capital.

Italy, one of the finest and most celebrated countries in Europe, bounded on the NNW. and NE. by France, Switzerland, the country of the Grisons, and Germany; on the E. by the gulf of Venice, and on the S. and W. by the Mediterranean; its figure bearing some resemblance to that of a boot. Its length from Aosta, at the foot of the Alps, in Mount Blanc, Savoy, to the utmost verge of Calabria, in Naples, is about 600 miles; but its breadth is very unequal, in some places near 400 miles, in others not above 25 or 30.

The air of Italy is very different, according to the different situation of the countries it contains: in those on the NE. side of the Appenines it is more temperate, but on the SW. it is very warm. In Campagno di Roma and the Ferrarese it is said to be unwholesome, from the lands not being duly cultivated, nor the marshes drained; but in the other parts it is generally pure, dry, and healthy.

The principal rivers are the Po, Tiber, Arno, Adige, Piave, Tagliamento, Var, Ombrone, Carigliano, Volturno, and an immense number of fine but minor streams on both sides of this country. There are several fine lakes, as the Maggiore, Lugano, Como, Garda, Perugia, Bracciano, and Celano. The soil in general is very fertile. It produces a great variety of wines, and the best oil in Europe; excellent silk in abundance; corn of all sorts, but not in such plenty as in some other countries; oranges, lemons, citrons, pomegranates, lamonds, raisins, sugar, figs, peaches, apricots, apples, pears, filberts, chestnuts, &c. Most of these fruits were at first imported by the Romans from Asia, Asia Minor, Greece, Africa, and Syria, and were not the natural products of the soil.

This country also yields good pasture, and abounds with cattle, sheep, goats, buffaloes, wild boars, mules, and horses. The forests are well stored with game; and the mountains have not only mines of iron, lead, alum, sulphur, marble of all sorts, alabaster, jasper, porphyry, &c., but also gold and silver, with a great variety of aromatic herbs, trees, shrubs, and evergreens. Wine, oil, perfumes, fruits, and silks, are the principal articles of exportation; and great sums of money are expended by travellers in the purchase of pictures, curiosities, relics, antiquities, &c.

The established religion is the Roman Catholic; but all sects live unmolested, provided no gross insult is offered to their worship. Their language (a corruption of the Latin) is remarkable for its smoothness, and is said to be spoken in its greatest purity at Florence. Further particulars of this country will be found under the names of its particular divisions.

Italy, as a natural section, is little less defined than if it was really an island, as, were it not limited by the sea, a rim of mountains encircled it on the land side; but, except under the Romans, this country has been at all times politically divided into States, independent of each other, always more or less mutually hostile. No country has ever been so much the theatre of revolution, but, as now constituted, we give from Geography of Laurenaudiere, Balbi, and Humboldt a synopsis of its existing subdivisions.

We here subjoin synoptical tables of the principal divisions of Italy and Sicily.

I. Sardinia, or northwestern Italy, the link-deed, between France and Italy, except when under French power during the changes produced by the great European revolution, has been a kingdom since 1713, and contains the following principal divisions:

Division of Savoy.

Provinces.	Pop.	Chief towns.	Pop.
Savoy proper	129,000	Chambery	
Upper Savoy	38,000	L'Hopital	
Carouge	40,000	Saint Julien	
Chablais	43,000	Thonon	
Faucigny	73,000	Bonneville	
Genevois	77,000	Anney	
Maurienne	54,000	St. Jean de Maurienne	
Tarentaise	42,000	Montiers	
Total	501,000		

Division of Turin.

Provinces.	Pop.	Chief towns.	Pop.
Turin	337,000	Turin	
Biella	98,000	Biella	
Ivree	145,000	Ivree	
Pignerol	114,000	Pignerol	
Susa	70,000	Susa	
Total	764,000		

Division of Coni.

Provinces.	Pop.	Chief towns.	Pop.
Coni	154,000	Coni	
Alba	106,000	Alba	
Mondovi	126,000	Mondovi	
Saluces	136,000	Saluces	
Total	522,000		

Division of Alexandria.

Provinces.	Pop.	Chief towns.	Pop.
Alexandria	97,000	Alexandria	
Æqui	83,000	Æqui	
Asti	115,000	Asti	
Casale	110,000	Casale	
Tortona	51,000	Tortona	
Voghera	91,000	Voghera	
Total	547,000		

Division of Novara.

Provinces.	Pop.	Chief towns.	Pop.
Novara	126,000	Novara	13,000
Verbania	111,000	Vigevano	15,000
Ornavasso	33,000	Domo d'Ossola	1,500
Alghero	66,000	Pallanza	1,500
Sessia	31,000	Varallo	3,000
Verceil	111,000	Verceil	16,000
Total	481,000		

Division of Nice.

Provinces.	Pop.	Chief towns.	Pop.
Nice	100,000	Nice	15,000
Oneille	61,000	Oneille	4,000
Vintimiglia	43,090	Vintimiglia	4,500
Total	204,000		

Division of Genoa.

Provinces.	Pop.	Chief towns.	Pop.
Genoa	226,000	Genoa	80,000
Albenga	55,000	Albenga	4,000
Bobbia	34,000	Bobbia	3,500
Chiavari	99,000	Chiavari	8,000
Spezzia	69,000	Spezzia	4,000
Sarzane	61,000	Sarzane	3,000
Novi	39,000	Novi	8,000
Savona	39,000	Savona	10,000
Total	583,000		

Summary of the continental part of Sardinia.

Division of Savoy	-	501,000 inhabitants.
Division of Turin	-	764,000 do.
Division of Coni	-	522,000 do.
Division of Alexandria	-	547,000 inhabitants.
Division of Novara	-	481,000 do.
Division of Nice	-	204,000 do.
Division of Genoa	-	583,000 do.
Total	-	3,602,000 do.

Sardinia, or that part of the monarchy on the continent which comprises the provinces specified in the preceding tables, is naturally divided into sections of Savoy and Var, westward of the Alps; the higher valley of the Po, and a strip along the Gulf of Genoa, declining rapidly from the Apennine mountains. Savoy is drained into the valley of the Rhone by confluent of the Isere, Susserre, Arve, and other lesser streams, and, physically considered, belongs rather to France than Sardinia. The Var river, which separates Sardinia from France, rises in the maritime Alps, and drains the division of Nice, which is followed eastward by the division of Genoa. The upper valley of the Po constitutes the main body of the monarchy, with its capital at Turin. This part of Sardinia is enclosed on all sides by mountains from which streams flow towards the circumference to the centre of a circle, and uniting from the Po, having a general northern slope. The longest line which can be extended over continental Sardinia would be one from due N. and S., 190 ms. from the mouth of

the Var to that of the Dranze into the Lake of Geneva, and the area being 17,500 sq. ms.; the mean breadth will be 90 ms. In lat. between 43 40 and 46 30. The city of Turin at lat. 45 4, and 7 41 E. London, is not far distant either way from the centre.

The island of Sardinia, separated from Corsica by the straits of Bonifacio, about 8 ms. wide, lies between latitudes 38 50 and 41 16 N., lon. 9 0 E. of London, and N. lat. 40 0, intersect very near the centre of Sardinia. The greatest length of this island is 170 ms., by a line declining slightly to NE. and SW. from due N. and S. Greatest breadth about 85 ms., but the mean is fully estimated at 65 ms.; area about 11,000 sq. ms.

Political divisions of the island of Sardinia.

Provinces.	Pop.	Chief towns.	Pop.
Cagliari	102,000	Cagliari	27,400
Busachi	67,000	Busachi	1,600
Iglesias	39,000	Iglesias	4,600
Isili	47,000	Isili	2,000
Lanusei	26,000	Lanusei	1,400
Nuovo	51,000	Nuovo	3,400
Sassari	58,000	Sassari	19,400
Alghero	28,000	Alghero	7,000
Cagliari	32,000	Cagliari	3,400
Ozieri	40,000	Ozieri	8,000
Total of the island of Sardinia	490,000		
To which add for central Sardinia	3,602,000		
Total of the monarchy	4,092,000		

For all northeastern Italy we may refer to tabular view of Austria, page 117, Nos. 8 and 9. We may, however, in order to preserve connexion, observe that Austrian Italy extends from Lake Maggiore on the W., 240 ms., to the small river Isonzo on the E. Under the general name of Austrian Lombardy, or Lombardo-Venetian kingdom, this fine and most diversified country falls, by a general southern slope, from various locally named sections of the Alps, and is drained, in a direction of their courses, southeastward by, beside many others of lesser note, the Ticin, Adda, Oglio, Mincio, Adige, Brenta, Piave, Tagliamento, and Isonzo. About 100 ms. of the lower channel of the Po winds only a few ms. N. of lat. 45°, and the High Alps, which bound Lombardy on the N., rise about 46 30 N.

TABLE OF AUSTRIAN ITALY.

Government of Milan.

Delegations.	Population.	
	Chief city.	Delegat'n.
Sondrio	3,374	83,451
Como	7,679	335,000
Milan	124,647	463,500
Pavia	21,351	146,000
Lodi	14,882	198,000
Bergamo	29,469	315,000
Brescia	32,911	324,000
Cremona	26,876	176,000
Mantua	23,340	240,000

Government of Venice.

Delegations.	Population.	
	Chief city.	Delegat'n.
Verona	60,000	278,000
Rovigo	7,000	135,000
Padua	47,000	290,000
Vicenza	30,000	293,000
Belluno	8,000	123,000
Treviso	15,000	233,000
Venice	110,000	249,000
Udina	18,000	351,000

General population of Austrian Italy, by nations.

Italians - - - - -	4,163,700
Germans - - - - -	66,500
Jews - - - - -	5,600
Greeks - - - - -	700
Armenians - - - - -	500
Total - - - - -	4,237,000

To the SE. of continental Sardinia, and S. of the river Po, exists the principality of Monaco, duchies of Massa-Carara, Lucca, Parma, Modena, and the Grand Duchy of Tuscany. Each of these States will be briefly noticed under their proper heads. Their general extent and relative position are here given in connexion with the contiguous States.

From the extreme southern angle of Tuscany, near Orbitello, to the northern angle of Parma, on the Po, below Pavia, is, in a direction of NNW., 200 ms. The utmost breadth is about 100 ms., from Piombino to the summit of the Appennines; the mean breadth 65, and area 13,000 sq. ms.; extending in lat. from 42 20 to 45 5. The 11th degree of lon. E. of London traverses this region nearly centrally. Though each State will be found noticed under its proper head, we here insert a tabular synopsis of the whole.

<i>States.</i>	<i>Population.</i>
Massa-Carara - - - - -	29,000
Monaco - - - - -	6,500
Lucca - - - - -	143,000
Parma - - - - -	440,000
Modena - - - - -	350,000
Tuscany - - - - -	1,275,000
Total - - - - -	2,243,500

States of the Holy See, or Papal Territories.— This hierarchy has the Lower Po on the N., Adriatic or Gulf of Venice E., or rather NE., the kingdom of Naples bounds it on the SE., and on the NW. it joins Tuscany and Modena.

From Tenacina, the extreme southern angle on the Mediterranean, to Ferrara, on the Po, the greatest length of the Papal States is about 260 ms., in a direction NW. by N. The breadth is very unequal. From Civit Vecchio to Ancona it is about 150 ms. wide, but from the extreme eastern part of Tuscany to Rimini, the breadth but little exceeds 20 ms.; the mean breadth 60, and area 16,600 sq. ms. Lying between lat. 41 18

and 44 40 N., and lon. 11 40 and 13 14 E. London.

For political and administrative purposes, Papal territories are divided into *delegations*, which as in most other parts of Italy, are named for their capitals, and are designated in the subjoined table:

No.	Delegations.	Pop. of the cities.	Pop. of delegat'n.
1	Bologna	65,000	235,000
2	Ferrara	24,000	250,000
3	Ravenna	24,000	135,000
4	Forlì	16,000	170,000
5	Pesaro	14,000	200,000
	Urbino	11,000	
6	Maceratoc	12,000	230,000
	Camerino	7,000	
7	Fermo	7,000	160,000
	Ascoli	12,000	
8	Spoleto	7,000	180,000
	Rieti	7,000	
9	Viterbo	13,000	410,000
	Civita-Vecchia	7,000	
10	Ancona	30,000	160,000
11	Perugio	30,000	190,000
12	Frosinone	6,000	170,000
	Ponte-Corvo	6,000	
13	Benevento	14,000	200,000
	Total Papal States	-	2,590,000

See *Rome* and *St. Marino*, under their proper heads.

The kingdom of Naples, as often called from its capital, and, for reasons far from obvious, king of the Two Sicilies, comprises all the residue of the peninsula of Italy southward from the Papal Territories, as also the island of Sicily and its satellite border islands, as also the group of Lipari and solitary Pantalaria.

The following synopsis exhibits the provincial divisions of the kingdom of Naples Proper, or Italian part of the monarchy:

Province Naples, or Napoli.

Chief towns.	Population.
Naples - - - - -	335,000
Castelmare - - - - -	15,000
Portici - - - - -	5,000
Puteoli - - - - -	5,000
Sorrenta - - - - -	4,000
Torre del Annunciata - - - - -	5,000
Torre del Greco - - - - -	15,000

Province Terra di Lavoro.

Capua	80,000
Aceria	6,000
Arpino	9,000
Aversa	13,000
Caserta	40,000
Fondi	5,000
Gaeta	15,000
Nola	9,000

Province Principato Citra.

Salerno	11,000
Amalfi	3,000
Nocera	9,000

Province Principato Ultra.

Avellino	13,000
Ariano	10,000
Atripalda	4,000

Province Abruzzo Ultra.

Chief town.	Population.
Teramo	9,000
Citadi Penna	8,000
Teramo	13,000
Azzano	3,000
Cita Ducal	2,000
Monza	4,000
Vito	4,000

Province Abruzzo Citra.

Ceti	13,000
Luciano	12,000

Province Capitanato.

Fia	21,000
Bino	4,000
Lera	8,000
Alfredonia	5,000
Casto Severo	4,000

Province Sannio.

Capobasso	8,000
Castellana	4,000
Castellana	5,000
Castellana	3,000
Castellana	4,000

Province Terra di Bari.

Bari	15,000
Amura	15,000

Mazio	5,000
Polio	4,000
Polio	11,000
Polio	5,000
Polio	15,000
Polio	10,000
Polio	5,000
Polio	6,000
Polio	2,000
Polio	4,000

the island of Sicily, separated from the extreme southwestern part of Italy, or Calabria Ultra,

by the narrow straits of Messina, justifies, by its triangular outline, one of its ancient names—that of Trinacria. The form is a rude approach to a right-angled triangle. The right angle at Cape Passaro, its utmost southern point, N. lat. 36 40. Thence the base extending 160 ms. northwesterly to Cape Marsala, and the perpendicular 120 ms., a little E. of N. to Cape Rasaculmo, N. of the Straits of Messina, N. lat. 38 20. These elements give to Sicily an area of 9,600 sq. Eng. ms. A chain of mountains, evidently a continuation of the Appennines, only interrupted by the Straits of Messina, passes over the northern side of Sicily. Etna, however, a volcanic mass, appears rather detached from the main chain, though rising to near 11,000 feet, an elevation far above that of any other summit of the Appennines.

Though forming a part of the monarchy, Sicily has a separate administrative regimen, and, for political purposes, is divided into 7 intendencies.

Intendencies.	Pop.	Chief towns.	Pop.
Palermo	409,000	Palermo	168,000
Trapani	147,000	Trapani	24,000
Girgenti	291,000	Girgenti	15,000
Caltanissetta	156,000	Caltanissetta	17,000
Saragossa	194,500	Syracuse	15,000
Catania	292,500	Catania	45,000
Messina	240,000	Messina	60,000
Total of Sicily	1,730,000		
To which add for Naples	5,690,000		
	7,420,000		

Names and population of the islands in the vicinity of Sicily.

Alicudi	-	-	260
Basiluzzo	-	-	20

Summary of Italy and the islands of Sardinia, Sicily, &c.

Countries.	English sq. ms.	Pop.	Pop. to Eng. sq. m.
Sardinia, continental	17,500	3,602,000	212, nearly.
Sardinia, island of	11,000	490,000	44½
Modena, Tuscany, &c.	13,000	2,243,500	172
Papal States	16,600	2,590,000	162, nearly.
Austrian Italy	15,400	4,237,000	274
Naples, Italian part	32,500	5,690,000	175
Sicily, &c.	10,000	1,730,000	173
	116,000	20,582,500	177½

Any person who reads attentively the history of the first and second Punic wars must be convinced, on comparing the circumstances attending those wars with the results of the preceding tables, that the territory of Italy and that of the adjacent is-

lands contained a more dense population 2,000 years past than at this time. If, however, the territory of the United States was peopled, equal in proportion to the existing population of Italy, the aggregate would exceed 354,000,000. It may startle many, but I will venture the anticipation, warranted as I consider myself by the *past*, that the *future*, in one century more, will accomplish more than is here shadowed forth.

Italy, SW. town of Yates county, N. York, 20 ms. S. from Canandaigua. Population in 1820, 728.

Itamarica, island of Brazil, in Pernambuco, about 10 ms. long and 2 broad.

Itchen, river of Eng., in Hants, which, rising in the centre of the county, passes by Winchester, and enters the Bay of Southampton at the town of that name.

Itaca, now *Thiaki*, island of the Mediterranean sea, seated between Cephalonia and Santa Maura. Lon. 21 0 E., lat. 38 36 N. It now forms one of the Ionian islands.—Village and seat of justice for Tompkins co., N. Y., at the head of Cayuga lake, about 40 ms. above Cayuga bridge. Pop. of the tp. in 1840, 5,650. Distant by post road—ms. a very little S. of W. from Albany, and 51 SSE. from Geneva. N. lat. 42 27, lon. 0 22 E. of W. C.

Itzehou, town of Germany, in Lower Saxony, in the duchy of Holstein, on the Stoer, 15 ms. NE. of Gluckstadt, and 30 NW. of Hamburg. Lon. 9 30 E., lat. 53 58 N.

Iverdun.—See *Yverdum*.

Ives, *St.*, town of Eng., in Huntingdonshire. It is seated on the river Ouse, over which is a stone bridge, 6 ms. NE. of Huntingdon, and 50 N. by W. of London. Lon. 0 20 W., lat. 52 20 N.—Seaport and borough of Eng., in Cornwall. It is 8 ms. NE. of Penzance, and 277 W. by S. of London. Lon. 5 30 W., lat. 50 18 N.

Ivica, island of the Mediterranean, one of the Balearic or Pithycusæ group, 56 ms. SW. of Majorca. It is about 60 ms. in circumference, is mountainous, but fertile in corn, wine, and fruits, and is remarkable for the great quantity of salt made there. The capital, of the same name, has a good harbor. Lon. 1 25 E., lat. 38 52 N.

Ivingho, village of Eng., in Buckinghamshire, 6 ms. SW. of Dunstable, and 32 NW. of London. Lon. 32 0 W., lat. 51 54 N.

Ivrea, ancient town of Piedmont, capital of Canavez, on the Doria, between two hills, 20 ms. N. of Turin, and 32 E. by N. of Susa. Lon. 7 48 E., lat. 45 22 N.

Ivry, town of Fr., in the dep. of Eure, and late province of Normandy. It is seated on the Eure, 10 ms. N. by W. of Dreux. Lon. 1 28 E., lat. 48 54 N.

Ivy Bridge, village of Eng., in Devonshire, 11 ms. NE. of Plymouth, remarkable for its rural and picturesque scenery; the river Arme runs through the village.

Ivy Mills, post office in Delaware co., Pa.

Izwoorth, village of Eng., in Suffolk. It is 7 ms. NE. of Bury St. Edmunds, and 79 NNE. of London. Lon. 0 51 E., lat. 52 20 N.—Town of Cornwallis county, Lower Canada, 70 ms. below Quebec.

J.

Jaar, river rising near Tongress, in the bishopric of Leige, and, after a NE. course, falls into Maese at Maestricht.

Jablunka, town of Silesia, in the territory of Teschen, 35 ms. SE. of Troppaw. Lon. 18 E., lat. 49 41 N.

Jacca, ancient town of Spain, in Arragon, a river of the same name, among the mountain Jacca, in a very pleasant and fruitful plain, were a part of the Pyrenees, 22 ms. N. of Hue Lon. 0 19 W., lat. 42 36 N.

Jaci-d'Aguila, seaport town on the east coast of Sicily, 10 ms. N. by E. of Catania. Lon. 15 26 E., lat. 37 27 N.

Jackson, or *Hitchcock*, tp. in Hancock co., 25 ms. NW. from Castine.

Jackson, tp. in Lebanon co., Pa., on both sides of Tulpehocken creek, 6 ms. E. from Lebanon and on the dividing line between Lebanon Berks cos.—Town in Washington co., N. Va.—Co. of Ga., bounded by Clark SE., Norton SW., Hall and Habersham NW., and Franklin and Madison NE. Length 25, mean width 18 ms.; area 500 sq. ms. Chief town, Jefferson. Pop. in 1820, 8,355; in 1840, 8,522. Central lat. 34 5 N., lon. W. C. 6 55 W.—Co. of Ten., bounded S. by White, W. by Smith, N. by Monroe co., in Ky., and E. by Overton. Length 28 ms., mean width 18; area 500 sq. ms. Cumberland river crosses this county in an oblique direction from NE. to SW. The surface is more waving than hilly. Chief town, Williamsport. Pop. in 1820, 7,593; and in 1840, 12,872. Central lat. 36 25, lon. W. C. 9 33 W.—Co. of Ohio, around the Scioto salt works, erected in this county in 1816, and bounded by Lawrence, Scioto SW., Pike W., Ross NW., Hocking N., Athens NE., and Gallia SE. Length 30, width 20 ms.; area 490 sq. ms. Surface generally level and broken. Mineral productions, stone coal, salt, or perhaps more correctly salt water. Chief town, Jackson. Pop. in 1820, 3,746; and in 1840, 9,744. Central lat. 39 6 N., lon. W. C. 32 36 W.—Village and seat of justice for Jackson co., Ohio, 28 ms. SE. from Chillicothe, 73 in the same direction from Columbus.—Village in Jackson co., Ohio.—Tp. in the southern part of Franklin co., Ohio.—Tp. in Wayne co., Ohio.—Tp. in Pickaway co., Ohio.—Tp. of Pike co., Ohio. Pop. in 1820, 853.—Tp. in Knox co., Ohio.—Tp. in Champlin co., Ohio.—Tp. in the southern limits of Monroe co., Ohio.—Tp. in Stark co., Ohio.—Tp. in Perry co., Ohio.—Tp. in the western part of Montgomery co., and adjoining the city of Preble, Ohio.—Tp. in Preble co., Ohio.—The northwesternmost tp. of Muskingum co., Ohio.—Co. of Ia., on White river, bounded SE by Scott, S. by Washington, W. by Lawrence, N. by Monroe, N. by Delaware, and E. by Jefferson cos.; length 30 ms., mean width 19; area 57 sq. ms. Chief town, Brownstown. Pop. in 1840, 4,010; and in 1820, 8,961. Central lat. 35 55 N., lon. W. C. 9 0 W.—Village in Jackson co., Ia., 84 ms. southward from Indianapolis.—Co. of Ill., bounded by the Mississippi

, by Randolph NW. and N., Franklin E., Union co. S.; length 30 ms., mean width 24; 720 sq. ms. Chief town, Brownsville. Pop. 820, 1,542; and in 1840, 3,566. Central lat. 37 47 N., lon. W. C. 12 22 W.—Village seat of justice for Cape Girardeau co., Mo., 12 NW. from Cape Girardeau, and about 10 in a direct line from the Mississippi river. Lat. 37 26, W. C. 12 20 W.—Village and seat of justice for Madison co., Ten., on the S. branch of the Deer river. N. lat. 35 58, lon. W. C. 11 W., and 198 ms. by post road a little S. of W. Murfreesborough.—Village on the left bank of the Tombigbee river, Clarke co., Ala., 12 ms. below SE. of St. Stephen's.—NE. co. of Ala., N. of the Tennessee river, bounded by Tennessee river on the N., by Decatur co. SW., and by Franklin and Union cos. N. It is nearly in form of a triangle, bounded by a direct line along Tennessee river, an equal distance on Decatur co., and an equal distance along the S. boundary of Tennessee; area 1,250 sq. ms. Soil on the streams and intervals fertile. Staples, cotton and grain. Pop. in 1820, 1,511; and in 1840, 15,715. Central lat. 34 50 N., lon. W. C. 9 25 W.—Co. of Miss., boundary Mobile co., Ala., E., by the Gulf of Mexico and Hancock SW., and by Perry and Greene cos., Miss., N. Length 42 ms., mean width 30; area 1,250 sq. ms. Surface flat in the S. and hilly in the middle and northern parts. Soil generally fertile, and covered with pine timber. Some good rice, however, lies along the Pascagoula and its branches, which intersect this county, flowing from the NW., N., and NE. Pop. in 1820, 1,682; and in 1840, 1,965.—Village on Pearl river, its source, in Hinds co., Miss., about 100 N. from Natchez. N. lat. 32 18, lon. W. C. 12 57 W.—Village in the parish of Feliciana, La., by post road 163 ms. NW. from New Orleans.—C. H. and post office in Jackson co., Ga., 28 ms. NE. from Chillicothe.—Village in Adams tp., Wayne co., Ohio, 12 ms. N. of Wooster, the county seat.

Jacksonborough, village in Colleton district, S. on the right bank of Edisto river, 34 ms. W. from Charleston.—Village in Scriven co., Ga., at the point between Briar creek and Beaverdam creek, about 70 ms. NW. from Savannah.—Village and seat of justice for Campbell co., in E. Tenn., 50 ms. NNW. from Knoxville. Lat. 36 12 N., lon. W. C. 7 12 W.

Jacksonburg, village in Wayne tp., Butler co., Ohio, 8 ms. N. from Hamilton.

Jackson's river, rises in the S. angle of Pendleton co., Va., and, flowing SSW., enters Bath co., through which it meanders, by comparative courses about 50 ms., and, turning abruptly to NE., joins Cowpasture river, and, together, forms James river.

Jacksonville, village in Tompkins co., N. Y., W. in Ithaca, and by post road 209 ms. W. from Albany.—Village in Lehigh co., Pa., 74 ms. N. by E. from Harrisburg.—Village in Wood co., Va., by post road 459 NW. by W. from Richmond.—Village and seat of justice for Telfair co., Ga., near the left bank of Oakmulgee river, 94 ms. a little E. of S. from Milledgeville. Lat. 31 18 N., lon. W. C. 6 12 W.—Village in Duvall co., E. Flo., on the left bank of St. John's river,

45 ms. NNW. from St. Augustine.—Settlement or town in Violet tp., Fairfield co., Ohio, 18 ms. from Lancaster, on the road from that town to Delaware.—Tp. in Adams co., Ohio, 20 ms. E. from West Union.

Jacobsburg, town in Belmont co., Ohio, 21 ms. from Wheeling.

JACOBITE, partisan of the royal house of Stuart after its expulsion from the English throne in 1688, from *Jacobus*, James II. The term was and is applied to the adherents of the expelled family, and opposers of the revolution which placed William III. and Mary II. on the throne. It is often used as synonymous with tory; which see.

Jacobstown, village in Burlington co., N. J., 16 ms. S. from Trenton.

Jacques Cartier, river in L. C., rises in the intermediate space between the river St. Anne and Jeune, and, flowing SW., falls into the NE. side of St. Lawrence river, in the SE. angle of the barony of Portneuf.—Seignior, Hampshire co., L. C., extending from the N. bank of St. Lawrence river, between the seignior of D'Auteuil and the barony of Portneuf, crossing the rivers Jacques Cartier, Savonnis, and St. Anne.

Jaen, town of Spain, in Andalusia. It is seated in a country producing excellent fruits and very fine silk, at the foot of a mountain, 15 ms. SW. of Bueza. Lon. 3 22 W., lat. 37 38 N.—Province of Spain, in the E. part of Andalusia, bounded W. by Cordova, S. by Granada, E. by Murcia and Granada, and N. by La Mancha. Area 4,730 sq. ms. Pop. about 210,000. Jaen is the capital. Staples, wine, oil, silk, and corn.—City of Colombia, in the province of Jaen, about 300 ms. S. from Quito. Lon. W. C. 1 30 W., lat. 5 25 S.

Jean de Braconeros, province of Colombia, in Quito, bounded N. by Loja and Quixos, E. by Manas, and S. and W. by Peru. Pop. 13,000.—See *Colombia*.

Jaffa, town of Palestine, formerly called Joppa, and entirely fallen from its ancient grandeur. It is 50 ms. NW. of Jerusalem. Lon. 35 0 E., lat. 32 16 N.

Jafnapatam, seaport of Ceylon, whence are exported great quantities of tobacco and some elephants, which are accounted the most docile of any in the world. The Dutch took it from the Portuguese in 1658, and it was taken by the English in 1795. It stands at the N. end of the island, 100 ms. N. of Candy. Lon. 80 10 E., lat. 9 45 N.

Jaffrey, village in Cheshire co., N. H., lying near the boundary line between this State and Mass., about 70 ms. SW. of Portsmouth, and 25 eastward of Connecticut river. Pop. in 1820, 1,339. Great Monadnock mountain is in this tp.

Jagernaut, town of Hindoostan, in the province of Orissa. Here is a famous pagoda, one of the first objects of Hindoo veneration, and an excellent seaport. It stands on the Bay of Bengal, 48 ms. S. of Cattack. Lon. 86 6 E., lat. 19 50 N.

Jagerndorf, town and castle of Silesia, capital of a province of the same name, and seated on the Oppa, 13 ms. NW. of Trappau. Lon. 17 44 E., lat. 50 0 N.

Jaghire, district of Hindoostan, in the Carnatic, subject to the English East India Company. It extends 101 ms. along the coast, from Alemparve on the S., to Lake Pullicate on the N., and is 47

ms. inland in the widest part. Madras is the chief place.

Jago, St., largest and most fertile of the Cape Verd Islands, 10 ms. long and 5 broad. It abounds with high barren mountains, and the air, in the rainy season, is unwholesome to strangers. The animals are beeves, horses, asses, mules, deer, goats, hogs, civet cats, and monkeys. Here are fowls and birds of almost all sorts; and maize, plantains, bananas, pompions, oranges, lemons, tamarinds, pine apples, cocoa nuts, guavas, tar, apples, and sugar canes. It has also some cedar trees and plenty of cotton. Ribeira Grande is the capital, but the governor resides at Porto Praya.

—Capital of Chili, with a good harbor and a royal audience. Beside the cathedral, there are three parish churches and eight monasteries. The inhabitants, about 40,000, are native Americans and Spaniards. Here are several canals, and a dike, by means of which they water their gardens and cool the streets. It is seated in a beautiful plain, at the foot of the Andes, on the river Mapocho. Lon. 71 45 W., lat. 34 10 S.

Jago-de-Cuba, St., formerly capital of the island of Cuba. Lon. W. C. 1 28 E., lat. 20 15 N.

Jalisco, State of the Republic of Mexico, formerly the Intendency of Guadaluaxara, bounded W. by the Pacific ocean, N. by the States of Sonora y Sinaloa and Durango, NE. by Xacatexas, E. by Guanaxuata, and SE. and S. by Mechoacan. Length from N. to S. 320 ms., and breadth E. and W. 250, with an area of 74,280 sq. ms. Pop. in 1825, 944,867. Lying between N. lat. 19° and 24°.

The State of Jalisco is crossed from SE. to NW. by the Rio de Santiago, a considerable stream, which communicates with Lake Chapala, and will, no doubt, in the advance of population, wealth, and civilization, become an important channel of inland commerce from Salamanca and Zelaya to San Blas.

All the eastern part of this State is the table land and western declivity of the Cordilleras of Anahuac. The maritime regions, especially those which stretch towards the great Bay of Bayona, are covered with forests, and abound in excellent wood for ship building. But in this latter country the air is excessively heated and unhealthy. The high interior and eastern part is temperate and salubrious. The difference in elevation from the Pacific coast to the confines of Guanaxuata and Valladolid exceeds 6,000 feet. The volcano of Colima rises in an isolated ridge to upwards of 10,000 feet. It is only, however, occasionally covered with snow. Colima is the most western active volcano known in America. Lon. W. C. 26 0 W., lat. 18 5 N.

The staples of this State are, maize, wheat, cotton, cochineal, and the precious metals. In 1802, the value of its agricultural produce amounted to \$2,599,000, and that of its manufactures to \$3,302,200. The State contains 2 cities, 6 large and 322 small villages. The principal mines are those of Bolanos, Asieutes de Ibara, Hostiotipaquillo, Copala, and Guichichilla.—See *Guadaluaxara*.

Jamaica, island of the W. Indies, discovered by Columbus in 1494. It lies 30 leagues W. of St. Domingo, nearly the same distance S. of Cuba, and is of an oval figure, 170 ms. long and 60 broad, containing 4,080,000 acres. A ridge of hills runs

lengthwise from E. to W., whence numerous rivers take their rise on both sides, and though many of them are navigable, even for barges, yet the cargoes are carried upon many of them in canoes to the remote plantations to the sea side.—See *London West*.

Jamaica, town, Windham county, Vt., 35 SW. from Windsor. Pop. about 1,000.—*Jamaica*, village, Queen's co., Long Island, N. Y., 13 N. E. from New York. Pop. in 1840, 3,781. The village contains an academy and 3 or 4 places of public worship.

Jamana, capital of a principality in Arabia Felix, seated on the river Astan, 150 ms. W. of Elefantine. —*Jamba*, city of the hither India, and the capital of a province of the same name. Lon. 81 55 E. lat. 31 21 N.

Jamboli, territory of Turkey in Europe, bounded by the Archipelago.

Jambi, or *Jambis*, seaport and small kingdom on the E. coast of the island of Sumatra. The Dutch have a fort here, and export pepper here with the best sort of canes. It is 160 miles N. from Bencoolen. Lon. 102 35 E., lat. 59° N.

James bay, the southern extension of the sea between Hudson, or Hudson's bay. It abounds with islands of various extent, and reaches as far as 60° N. as lat. 52° N., receiving a number of rivers, some of which are of great length and magnitude; the principal are Albany, Moose, Hurricane, and Maine.

James, island on the coast of South Carolina, between Stono river and Charleston harbor.

James City, county of Virginia, between York and James river, and bounded by Warwick and James river and Chickahominy river SW., York and Kent NW., and York river and York co. N. Length 23 miles, mean width about 8, area 184 sq. miles. Surface rather waving than hilly. Soil generally sterile. Chief town, Williamsburg. Pop. in 1820, 3,161; and in 1840, 3,779. Cer. lat. 37 15 N., lon. W. C. 15° E.

James Island, island of Africa, 30 miles up the river Gambia, and 3 miles from its nearest shore. Here the English have a fort and a factory. Lon. 16° W., lat. 13 15 N.

James river, river of Virginia, is formed of two branches, Jackson's river and Cowpasture river, both rising in Bath and Pendleton county and uniting in the northern angle of Botetourt county. It thence flows, by comparative courses, SSE. 30 miles to Pattonsburg, where it turns to ENE. 10 miles, to the foot of the Blue Ridge, in Rockbridge co., and receiving from the N. a large accession of water, by the Great Calf-pasture river, turns to SE., and pierces the mountain at lat. 37 35 N. lon. W. C. 2 30 W. From its passage through the Blue Ridge, this noble stream, with many partial windings, but a general comparative course a little S. of E. 270 miles, unites with the Chesapeake bay between Old Point Comfort and Lynnhaven bay. Its mouth, between Hampton and the mouths of Elizabeth and Nansemond rivers, is known by the name of Hampton Roads.

The tide flows up James river to the first falls at Richmond. Ships of the line of the largest class can enter its mouth. Vessels of 40 guns can be navigated to Jamestown, and those of 250 tons to Warwick; smaller vessels of 125 or 130 tons

to Rocketts, about one mile below Richmond. A canal cut round the falls, or rapids, opens a boat navigation 230 miles still higher. John's creek is formed by two branches, John's and Craig's creek proper, both rising in Giles county, in Virginia, at N. lat. 37 20 and 3 30 W. W. C. Both branches flow NE. into Botetourt county, in which they unite, and fall into the river about 15 miles below the junction of the Shenandoah and Cow-pasture rivers, after a comparative course of 40 miles. Sinking creek rises between Pond and Walker's mountains, and between John's and Craig's creeks, in Giles county, flows SW. 25 ms., and falls into the Shenandoah at N. lat. 37 17, and W. lon. 3 30 W. C.

The reader, from a comparison of the relative elevations of any given route hitherto rendered navigable by canals, can easily determine the probability of effecting such an object by either of the routes through the Appalachian ridges.

Jamestown, town, Chautauque co., N. Y., on the outlet of Chautauque lake. Pop. in 1820, uninhabited. — Ancient town in James City co., Va., founded as early as 1607, and made the seat of colonial government; it is situated on the N. side of James river in lat. 37 9 N., and lon. 74 5 W., at the distance of 8 miles S. from Williamsburg, and 32 SE. from Richmond. It is now ruins. — Borough of Ireland, in the county of Wick, seated on the Shannon, 5 miles S. by E. from Carrick, and 73 NW. of Dublin. Lon. 8 29 W. lat. 53 51 N. — Village, Guilford co., N. C., on the post-road 147 ms. NW. from Raleigh. — Village, St. Louis co., Mo., by post road 18 ms. from Charles. — Village, Green co., Ohio, by post road 58 miles SW. by W. from Columbus. — Village, Newport co., R. I., embracing and commencing with Conanicut island. Beavertail light-house is at the S. end of this island. — Village,

Prince Edward co., Va. — Town of Barbadoes, on the W. side of the island.

Jamesville, village, Manlius township, Onondago co., N. Y., 4 ms. E. from Onondago Hollow. — Village, Sumpter district, S. C., 59 ms. eastward from Columbia.

Jasper, county of Georgia, bounded by Newton NW., Morgan NE., Putnam E., Jones S., and Ockmulgee N., separating it from Butts W.; length from N. to S. 28 miles, mean breadth 15, and area 420 sq. miles. Central lat. 33 20, lon. 6 44 W. W. C. Chief town, Monticello. Pop. in 1840, 11,111. — Village and seat of justice, Marion co., Tenn., on Sequachee river, 80 miles SE. from Murfreesborough. Lat. 35 17 N., lon. W. C. 8 28 W.

Jamtland, province of Sweden, bordering on Norway, nearly of a circular form, about 70 miles in length, and 60 in breadth, annexed to the crown of Sweden by the treaty of Roschild, in 1658. It is in general mountainous. The eastern part is a champaign country, watered with several lakes and rivers, which abound with fish. The country produces excellent oats, and abounds in good turnips. It contains alum quarries, sandstone, slate, the lapis ollarius, fine rock crystals, lead ore, two new built copper works, and a place where salt-petre is refined. The inhabitants subsist by agriculture, grazing, hunting, and fishing. They also carry on a considerable trade with the Norwegians.

Janeiro, province of Brazil, bounded by the Atlantic ocean E., SE., and S., St. Paul's SW., and Minas Geraes NW.; length 380 ms., mean width 100, area 380,000 sq. miles. The tropical latitude and exposure to the Atlantic ocean renders this fine province capable of producing most of the vegetable staples of the highest value. Sugar is its chief production. Janeiro is its capital city.

Janeiro, Rio de, city of Brazil, and capital of the province of the same name, stands at the head of a large basin or bay, surrounded by lofty mountains. The opening of the harbor to the ocean is about one mile wide, and is defended by Fort Santa Cruz, built upon an immense mass of granitic rocks. The city rises like the steps or seats in an amphitheatre, and the houses built of stone along straight and well-paved streets, produces a fine effect from the water. It is the mart of an immense and increasing inland trade. Pop. above 100,000. Lon. W. C. 35° E., lat. 22 56 S.

JANISSARY, from the Turkish, and literally means *new troops*. This arm of Turkish power was formed in 1372, by Sultan Amurath II., and was for more than two centuries a most formidable infantry, but gradually degenerated into a turbulent and disorderly corps, and were in 1826 finally suppressed by the Sultan.

JANISSARY, species of Turkish troops. **Janissary, Cape of**, ancient Sigeum promontory, the point on the Asiatic side of the mouth of the Hellespont. The village of Giaur-Keni occupies, it is supposed, the site of the ancient Sigeum. Giaur-Keni is sometimes called Yeni-Cher.

Janna, province of Turkey in Europe, bounded on the N. by Macedonia, on the S. by Livadia, on the W. by Albania, and on the E. by Archipelago. It is the Thessaly of the ancients. Capital, Larissa. — Town of Turkey in Europe, in a pro-

vince of the same name. It is 62 ms. W. of Larissa. Lon. 21 36 E., lon. 39 48 N.

Janikale, Jenikaleh, or Jenikale, town, seaport, and fortress of Russia, in Taurida, and in the straits of Taman. It commands and gives name to the passage strait from the Euxine, or Black sea, into the sea of Asoph. Lon. 36 25 E., lat. 45 21 N.

Janowitz, town of Bohemia, in the circle of Kaushim, famous for a battle between the Swedes and Imperialists in 1645, when the latter were defeated. It is 48 ms SE. of Prague. Lon. 15 38 E., lat. 49 45 N.

Jao-tcheou-fou, city of China, in the province of Kiang-si, seated on the river Po, which, at a small distance, enters the Lake Po-yang.

Japan Islands, of Asia, between 30° and 40° N. lat., and between 130° and 144° E. lon., the largest of which is called Japan, and sometimes Niphon, and gives its name to all the rest, being 600 ms. in length, and from 100 to 150 in breadth. Its capital is Jeddo. For *Japan*, see article *Asia*, pp. 98, 99, and 100.

Japan has been, within this century, visited by several Europeans, who have published their observations. The Russians, Krusenstern and Galownin, and an Englishman, Dr. Ainslie, are the most conspicuous; but it is probable that neither have added much to what Kæmpfer had published long before. Dr. Ainslie, and indeed most European authors who have spoken of the Japanese, represent this people as approaching rather to the European than to the Asiatic standard of character. Nothing, says the doctor, so much offends a Japanese as to be compared to a Chinese. The doctor might have found, in the feelings of his own countrymen towards the French, a very remarkable parallel to Japanese national antipathy. Dr. Ainslie also compliments the Japanese on their propensity to foreign intercourse. This is a most precious sample of description of a foreign people, and ought to afford us a standard of value to estimate similar documents. The Japanese, with a most prudent and praiseworthy caution, have persevered in exactly a contrary course of politics to that of encouraging European intercourse. There is, really, every reason to believe that China and Japan might be opened to the commerce of Europe, with no more restriction than is imposed by European nations amongst themselves, if the Asiatic nations could be assured of the honesty or humanity of Europeans. As long as that insatiable thirst of conquest, and the more absurd and equally insatiable rage of religious proselytism, mark the conduct of Europeans, so long must their introduction into either China or Japan depend on force, and force alone. The example of India is too deeply engraven to be neglected.

Japara, seaport on the N. coast of the island of Java, with a good harbor. It was the capital of a considerable kingdom, till the Dutch made themselves masters of it; and now they have a colony here, and a considerable trade. It is 253 ms. E. by S. of Batavia. Lon. 110 45 E., lat. 6 20 S.

Jaquemel, town of St. Domingo, on a bay of its name, on the S. coast, 32 ms. SSW. of Port au Prince.—See *Jaquemel*.

Jagues, river of the U. S., falls into Missouri, from the N., about lat. 43 N.

Jargeau, town of Fr., in the dep. of Loir-et-Cher, 10 ms. ESE. of Orleans.

Jarisburg, town of Norway, capital of a tract abounding in mines, in the diocese of gerhuys, 5 ms. N. of Tonsberg.

Jarnac, town of Fr., in the dep. of Charente, 20 ms. W. of Angouleme.

Jaromitz, town of Bohemia, seated on the Elbe, 9 ms. N. of Koniggratz.

Jaron, town of Persia, in Farsistan, celebrated for abundance of palm trees, and their exocarp fruit. It is 95 ms. S. by E. of Shiraz. Lon. 53 10 E., lat. 28 15 N.

Jaroslau, town of Poland, in Red Russia, a strong citadel. It is included in the kingdom of Galicia, and seated on the Seine, 55 ms. W. of Lemberg. Lon. 22 43 E., lat. 50 4 N.

Jaroslavl, government of Russia, formerly a province of the government of Moscow. It is 160 ms. in length, and from 30 to 110 in breadth. The capital is of the same name, and a large commercial place, with numerous manufactures, seated on the Volga, 145 ms. NNE. of Moscow. Lon. 39 50 E., lat. 57 35 N.

Jasenitz, town of hither Pomerania, seated on the Oder, 8 ms. N. of Stettin.

Jasper, co., Ga., bounded by Jones S., Hill N., and Newton W., Walton N., Morgan NE., and Putnam E. Length 25, mean width 18, and area 450. This co. lies along the E. side of the Oakmulgee river, and was justly named in honor of sergeant Jasper, who replaced the U. S. soldier on the parapet of fort Moultrie, at Charleston, when shot off by a British cannon in the attack made by Sir Peter Parker. Pop. in 1820, 13,614. In 1840, 11,111. Lat. 33 22 N., lon. W. C. 77 30 W.

Jasque, town of Persia, in the province of Mecran, which gives name to a cape in the Gulf of Ormus. Lon. 57 4 E., lat. 25 40 N.

Jassey, city of European Turkey, capital of Moldavia, on the Pruth, 170 ms. NNE. of Charest. Lon. 27 30 E., lat. 47 8 N.

Java, island of the E. Indies, lying to the S. of Borneo, and separated at its W. end from Sumatra, by the strait of Sunda. It is sometimes called Great Java, to distinguish it from Baly some named Little Java, and is 420 ms. in length, and of various breadth, extending from 103° 118° E. lon., and 6° to 8° S. lat. After several revolutions, Batavia, and parts adjacent to it, have returned to the possession of the Dutch.

Java has always been considered in a high degree unhealthy, but this observation applies directly only to the seacoasts. The interior in many places high, airy, temperate, and healthy. The fruits, grains, and other vegetables, of nearly all climates, are found on this island, but the culture depends upon suitable elevation.

Java head, W. end of Java, towards the S. of Sunda.

Java Sea, lies between Java and Borneo.

Jay, town, Oxford co., Me., 20 ms. NE. of Paris. Pop. in 1820, 1,614.—Tp. Ormsville, Ormsville co., Vt., about 50 ms. N. from Montpelier.—Village, Essex co., N. Y., on Saranac river, 40 ms. SW. from Plattsburg.

Jayme, San, town of Colombia Varinas, on the Aspuri river, 200 ms. SW. from Caraccas. Lon. W. C. 9° E., lat. 7 50 N.

Point, village, Oxford co., Me.

in St., town of Fr., now in the dep., of Mele, formerly in the province of Lorraine. It is seated on the Sare, 12 ms. W. of Deux-Ponts. Lon. 7 12 E., lat. 49 16 N.

in-d'Angely, town of Fr., now in the dep. Lower Chafente, lately in the province Sain-. It is famous for its brandy, and is seated on the Boutonne, 15 ms. NE. of Saintes, and 20 E. of Rochelle. Lon. 0 20 W., lat. 45 31.

in de Laune, St., town of Fr., now in the dep. of Cote d'Or, lately in the province of Burgundy. It is seated on the Saone, 15 ms. SE. of Dijon, and 155 SE. of Paris. Lon. 5 19 E., lat. 47 8 N.

in-de Luz, St., town of Fr., now in the dep. of Lower Pyrenees, lately in the province of Gascony. It is the last next Spain, with a harbor and owes its opulence to the cod and whale fishery. It is seated on a small river, near the mouth of Biscay, 10 ms. NE. of Fontarabia, and 10 N. of Bayonne. Lon. 1 40° E., lat. 43 31.

in-de-Maurienne, town of Italy, in Savoy, and of a co. of the same name, with a bishop's see. It is seated in a valley, on the river Arc, 10 S. by W. of Montier, and 25 NE. of Chambery. Lon. 6 20 E., lat. 45 17 N.

in-Pied-de-Port, St., town of Fr., now in the dep. of the Lower Pyrenees, late province of Guienne. It is seated on the river Nive, at the entrance of those passages or defiles, in the Pyrenees, which in this country are called Ports, and is defended by a citadel upon an eminence. It is 10 ms. SE. of Bayonne, and 30 NE. of Pamplona. Lon. 1 33 E., lat. 43 12 N.

in Rabel, town of St. Domingo, on the sea coast, 12 ms. NE. from St. Nicholas le Mole. Lon. W. C. 3 53 E., lat. 19 55 N.

Rabel Auras.—See *Jibbel Auras*.

River of Scotland, in Roxburghshire, which is called the Teviot, a little below Jedburgh.

Jedburgh, borough of Scotland, in Roxburghshire, on the Jed, near its confluence with the Teviot. It is 36 ms. SE. of Edinburgh. Jedburgh is the principal town of Roxburghshire, and is seated under the head of Jedburgh, in Brewster's cyclopædia, to be the oldest parish in Scotland, and the seat of a monastery, built by David I, in 1138. It is still a very flourishing place, in part, doubt, owing to its favorable position near the great route from London to Edinburgh. It is the seat of very valuable and extensive manufactures. Pop. 5,000. Lon. 2 25 W., lat. 55 31.

Yokohama, capital of all Japan, a city situated on the coast of the island of Nippon. Pop. 100,000. Lon. 140° E., lat. 36 30 N.

Yeddo, town of Arabia.—See *Judda*.

Jefferson, co., N. Y., bounded by Lake Ontario, St. Lawrence river NW., St. Lawrence co. NE., Lewis co. SE. and Oswego S. Lon. 74 47 ms., mean width 25, area about 1,700 sq. ms. Surface broken in the interior, but level towards Lake Ontario and St. Lawrence river. Substratum generally a shell limestone, which is found in many places, particularly near Black river, and Sackett's Harbor, approaches near the sur-

face. Soil much diversified, but generally well calculated for the production of grain and pasturage. Chief town, Sacket's Harbor. Pop. in 1820, 32,952; and in 1840, 60,984. Central lat. 44 30 N., lon. W. C. 2° E.

Jefferson, co., Penn., bounded by Armstrong and Venango W., Warren N., McKean NE., Clearfield SE., and Indiana S.; length 46 ms., mean width 26, and area 1,200 sq. ms. This co. is watered by Sandy-leek creek, Toby's creek, and other branches of Alleghany river. The surface is hilly and broken, and soil generally rocky, or much broken. Some highly fertile soil skirts the streams, but is mostly of a middling quality. Pop. in 1820, 561 and in 1840, 7,253. Central lat. 41 15 N., lon. W. C. 2° W.

Jefferson, co., Va., bounded by the Potomac river NE., by the Blue Ridge, or Loudoun co., SE., Frederick SW., and Berkeley W. and NW.; length 20 ms., mean width 15, area 300 sq. ms. This co., limited on the NW. by the Opequan river, on the NE. by the Potomac, and traversed towards the Blue Ridge by the Shenandoah, and lying in the Great Limestone valley, is one of the most productive grain and fruit counties of Va. Its surface is pleasantly variegated by hill and dale, and well watered. Pop. in 1820, 13,087; and in 1840, 14,082. Lat. 39 28 N., lon. 1 5 W.

Jefferson, co., Geo., bounded by Emanuel S., Washington W., Warren NW., Columbia N., Richmond NE., and Burke E.; length 33 ms., mean width 20, area 660 sq. ms. It is traversed by the main stream, and drained by several branches of Ogechee river. Surface undulating, and soil sandy. Chief town, Louisville. Pop. in 1820, 7,058; and in 1840, 7,254. Central lat. 33 5 N., lon. W. C. 5 42 W.

Jefferson, Co., Alabama, bounded S. by Tuscaloosa, SW. by Pickens, NW. by Marion, N. by Blount, NE. by St. Clair, and SE. by Shelby; length 46 ms., mean width 30, area 1,380 sq. ms. It is traversed by the main stream of the Tuscaloosa. Chief town, Elyton. Pop. in 1840, 7,131. Central lat. 32 38 N., lon. W. C. 10 22 W.

Jefferson, co. of Miss., on the Mississippi river, bounded by that stream NW., by Claiborne N., uncertain on the E., by Franklin S., and Adams SW.; length 30, breadth 18 ms., area 540 sq. ms. Besides the Mississippi river, this co. is watered principally by Fairchild's and Cole's creeks in the centre, and by the sources of Homochitto river and Bayou Pierre towards its eastern extremity. It is bounded along the Mississippi by a selva of low and perfectly level land. This flat is followed at a distance of from 1 to 4 or 5 ms. by what is known as the Mississippi bluffs. With the bluffs commences a surface generally moderately hilly, and covered by a very dense forest, which continues to the utmost eastern limits of the co. The soil of the Mississippi below the bluffs, a deep and highly fertile loam, but mostly subject to annual inundation; the soil of the bluffs, and generally on the waters of Cole's and Fairchild's creeks, is highly productive, but gradually deteriorates towards the branches of Homochitto and Bayou Pierre, and terminates in open pine woods, with a sterile soil. Staple, cotton. Chief town, Greenville. Pop. 1820, 6,822. Central lat. 31 45 N., lon. W. C. 14° West.

Jefferson, co. of E. Tenn, bounded by Sevier SW., Holston river NW., Granger co. N., Hawkins NE., Greene E., and Cocke SE. Length 30, mean width 12 ms., area 360 sq. ms. This co. is traversed by Nolachucky, and bounded by Holston river, and contains much good soil. Chief town, Dandridge. Pop. in 1820, 8,953; and in 1840, 12,076. Central lat. 36 5 N., lon. W. C. 6 35 W.

Jefferson, co., Ky., bounded by Ohio river W. and NW., Henry NE., Shelby E., and Bullitt S.; length 28 ms., mean width 18½, and area about 520 sq. ms. This co. is remarkable, from lying opposite to the Ohio rapids. The surface is waving, though not hilly. Soil highly productive. Chief town Louisville. Pop. 1820, 20,768; and in 1840, 36,346. Central lat. 38 30 N., lon. W. C. 8 20 W.

Jefferson, eastern co., Ohio, bounded N. by Columbiana co., E. by the Ohio river, S. by Belmont, and W. by Harrison. It is 27 ms. long from N. to S., and 20 broad from the Ohio river westwardly, and contains about 500 sq. ms. The principal waters are Yellow creek, Cross creek, and Short creek, besides Ohio river. The soil is generally very fertile, and the climate healthy. Chief town, Steubenville. Pop. 1820, 18,531; and in 1840, 25,030. Central lat. 40 25 N., lon. W. C. 3 48 West.

Jefferson, co., Ia., bounded by Ohio river SE., Clarke SW., Scott W., Jennings NW., Ripley N., and Switzerland NE.; length 25 ms., mean width 15, area about 360 sq. ms. Surface hilly, and soil fertile. Chief town, Madison. Pop. 1820, 8,038; and in 1840, 16,614. Central lat. 38 43 N., lon. W. C. 8 28 W.

Jefferson, co., Ill., bounded by Franklin S., Randolph SW., Washington W., Bond NW., Crawford N., Wayne E., and White SE.; length 35 ms., breadth 34, and area 970 sq. ms. Surface rather level. Pop. 1820, 691; and in 1840, 5,762. Central lat. 38 22 N., lon. W. C. 11 50 West.

Jefferson, co., Mo., bounded by the Mississippi river E., St. Genevieve and Washington cos. S., Franklin W. and NW., and Merrimac river, or St. Louis co., N.; length 30 ms., width 25, area about 650 sq. ms. Surface considerably broken, and soil, except partially, rather sterile. Chief town Herculaneum. Pop. 1820, 1835; and in 1840, 4,296. Central lat. 38 20 N., lon. W. C. 13 10 W.

Jefferson, village, Camden co., Geo., on the right bank of the Great St. Illa, 50 ms. SW. from Darien, and 25 NW. from St. Mary's.

Jefferson, town, Lincoln co., Me., Pop. in 1820, 1,577. Town, Coos co., New Hampshire.—Town, Schoharie co., N. Y., on the most elevated ground between the Susquehannah and Mohawk rivers, 50 ms. SW. from Albany. Pop. in 1820, 1,573.—Tp., Morris co. N. J. Pop. in 1820, 1,231.—Town, Green co., Pa., on Monongahela river, above and along Ten-mile creek, 22 ms., SE. from Washington.—Village, Powhatan co., Va., 32 ms. westerly from Richmond.—Village, Ashe co., N. C., by post road 238 ms. a little S. of W. from Raleigh, and 30 ms. SE. from Abingdon in Va.

Jefferson, village and seat of justice, Jackson

co., Ga., on one of the head branches of Oconee river, 80 ms. N. from Milledgeville, and 20 N. from Athens. Lat. 34 8 N., lon. W. C. 6 52

Jefferson, town and seat of justice, Ashtabula co., Ohio. It contains a brick court-house of 50 feet area, and a school house. It is situated on Mills creek, about 10 ms. from the shore of Lake Erie, 35 ms. N. from Warren. The village is at lat. 41 45 N. Pop. of the tp. 1820, 1 and in 1840, 710.

Jefferson, tp., Guernsey co., Ohio.—Tp. the northern border of Muskingum co., Ohio the right side of Muskingum river. Pop. 1820, 829.—Eastern tp., Franklin co., Ohio 1820, 559.—SE. tp., Ross co., Ohio, on Scioto river. Pop. 1820, 1,407.

Jefferson, eastern tp., Madison co., Ohio, Little Darby creek.—Tp., Logan co., O. Pop. 1820, 1,169.—NW. tp., Fayette co., Pop. 1820, 892.—Northern tp., Scioto co.—Tp., Adams co., Ohio. Pop. 1820, 9.—NW. tp., Preble co., Ohio. Pop. 1820, 876.—One of the central tps., Montgomery Ohio. Pop. 1820, 1,339.—Town, Pike Mo., on the left bank of Missouri river, about 10 ms. above the mouth of Osage river.—Village, Rutherford co., Tenn.

Jefferson, or *Jefferson on Pickaway Plain*, town, Pickaway co., Ohio, in Pickaway Plain on Scioto river, 28 ms. below Columbus, 3 below Circleville, and 16 above Chillicothe.

Jefferson river, NW. branch of Missouri, joins Madison river at lat. 45° N., lon. W. C. 30 45 and forms the Missouri. A short distance below their junction, Gallatin's river enters the stream from the SE.

Jefferson City, village, Cole co., Mo., on the right bank of Missouri river, 15 ms. above the mouth of Osage river. Lat. 38 33 N., lon. W. C. 14 40 W. This place was chosen as the seat of Government of the State of Mo. By the census of 1840, it contained 1,174 inhabitants. In the post office list, 1842, it is stated to be 936 ms. from W. C.

Jeffersonton, village, Culpeper co., Va., on the S. side of Hedgeman's river, 50 ms. SW. by road from Washington.

Jeffersonton, Ashe co., N. C.—See *Jefferson*, Ashe co., N. C.

Jeffersontown, town, Jefferson co., Ky., on a branch of Salt river, 15 ms. SE. by E. from Louisville.

Jeffersonville, town, Clarke co., Ia., at the head of the rapids, and nearly opposite Louisville, Ky. At Louisville, pilots reside here who skillfully conduct boats through the rapids. When necessary, cars or wagons can be also procured to transport goods by land. A good road extends from Jeffersonville to New Albany. Pop. 600.

Jeffries' Store, post office, Nottaway co., Va., by post road 73 ms. SW. from Richmond.

Jehud, or *Joad*, mountainous district in the NW. part of Hindoostan proper, extending from Attock eastward to Bember. It is inhabited by mountaineers, called Gickers, Gehkers, or Kakars.

Jekil Irmak, ancient *Iris*, river of Asia Minor, falling into the Black sea at Samsoun.

Jekyl, small island of Ga., S. of the island of St. Simon's.

mappe, post office, Caroline co., Va., 70 ms. S. from W. C., and 77 NNE. from Rich-
l.

nterland, province of Sweden, bounded on
l. by Angermania, on the E. by Medelpadia,
e S. by Helsingia, and on the W. by Nor-
It is full of mountains.

na, strong town of Upper Saxony, in Thuringia,
with a university. It is seated on the Sala,
ms. SE. of Weimar, and 25 SE. of Erfurt.
12 4 E., lat 51 2 N.

nda, great lake of Russia, in Finland. It dis-
ses its waters into the Gulf of Finland.
nikaleh.—See *Janicale*.

nisei river.—See *Yenisei river*.

nilza, ancient *Pella*, town of European Turkey,
acedonia. It is often written and pronounced
sehe Vardar. It stands on a lake 12 ms.
the head of the Gulf of Salonica, about 24
WNW. from the city of Salonica. Lon. 22
, lat. 40 48 N.

nitz, town of Upper Saxony, in the principal-
Anhalt Dessau, situated on the Muldau,
NE. of Dessau.

skinton, town, Montgomery co., Pa., 10 ms.
Philadelphia, on the post road to Bethlehem.
mer, tp. of Somerset co., Pa., on the Que-
ning creek, on the road from Bedford to
sburg. Pop. in 1820, 1,129.

nerville, village of Somerset co., Pa., on the
road from Bedford to Greensburg, 8 ms. W. from
town.

nersville, village, Chester co., Pa.

nings, co. of Ia., bounded by Jefferson NE.,
and Jackson SW., Delaware NW., and
E. Length 24, breadth 18 ms., area 300
ms. Surface undulating. Soil productive.
town, Mount Vernon. Pop. in 1820,
Lat. 39° N., lon. W. C. 8 30 W.

ning's Ordinary, post office, Nottaway co.,
39 ms. SW. from Richmond.

no, town of Upper Hungary, 20 ms. S. of
Waradin, and 48 NE. of Segedin. Lon.
E., lat. 46 40 N.

emie, town and cape on the N. side of the
ern peninsula of the island of St. Domingo.
town is situate on an eminence, in fertile soil,
ularly excellent for the culture of coffee, 5
V. of St. Domingo. Lon. W. C. 3 5 E.,
8 42 N.

nicho, town of Syria, in Palestine, once a fa-
city. It is now called Herubi by the Arabs,
contains only a few wretched huts, where
beggarly Arabs reside. It is 5 ms. W. of
over Jordan, and 20 E. by N. of Jerusalem.
Town of Lower Saxony, in the duchy of
eburg, situate on the Elbe, 32 ms. NNE. of
eburg.—Town, Chittenden co., Vt., on
a river, 12 ms. S. from Burlington.—
Oyster bay tp., Queen's co., N. Y., 30 ms.
om the city of N. Y.

nicho.—See *Bainbridge*, *Chenango co.*, N.

mah, town of the kingdom of Fezzan, disting-
ed by the numerous herds of sheep and goats
eed around it, and by many majestic ruins,
hibit to the inhabitants of its clay-built cot-
vestiges of greatness to which they are perfect-
ifferent. It is 60 ms. SE. of Mourzook.

Jermourasi, town of A. T., in Natolia, 12 ms.
SSE. from Smyrna. This name is written *Gia-
moubash* in the map published to illustrate the
travels of the Duke of Choiseuil.—See *Giana-
bash*.

Jeromestown, trifling Indian settlement so called,
in Wayne co., Ohio, adjoining its western limit,
on the road from Wooster to Mansfield.

Jromesville, village on Jerome's creek, 1 mile
from the above described settlement, and 15 W.
from Wooster.

Jersey, island in the English channel, 18 ms.
from the coast of Normandy, in France, and 84
S. of Portland, in Dorsetshire. It is subject to
the English, but is still governed by the ancient
Norman laws. It is 30 ms. in circumference, and
difficult of access, on account of the rocks, sands,
and forts erected for its defence. The number of
inhabitants is estimated at 20,000, of whom 3,000
bear arms.

Jersey, village, Steuben co., N. Y., by post
road 240 ms. SW. by W. from Albany.

Jersey City, or *Paulus Hook*, village, Hudson
co., N. J., on Hudson river, opposite N. Y.

Jersey, New, one of the U. S. of America.—See
New Jersey.

Jersey Shore, village Lycoming co., Pa., 12 ms.
above Williamsport, on the W. branch of Susque-
hannah river.

Jerseytown, village, Columbia co., Pa., on
Susquehannah river, above Sunbury.

Jersey, tp. in the western borders of Licking
co., Ohio.

Jerusalem, ancient and famous town of Asia,
formerly capital of Judea, after David had conquered
the Jebusites. It was taken by Nebuchadnezzar
in the reign of Zedekiah, and the Jews were led
captives to Babylon. It was afterwards taken by
the Romans, and ruined, together with the temple,
70 years after the birth of Christ, after sustaining
one of the most remarkable sieges in history. The
emperor Adrian built a new city near its ruins. It
was taken by the Persians in 614, and by the Sar-
acens in 636. In 1099 it was retaken by the Cru-
saders, who founded a new kingdom, which lasted
88 years, under nine kings. Saladin, King of
Egypt and Syria, got possession of it in 1187.
The Turks, who drove away the Saracens in 1217,
have kept possession of it ever since, and call it
El Kods, that is, the Holy City. It is now inhab-
ited by Turks, Arabs, Jews, and Christians. It
stands on a high rock, with steep ascents on every
side except to the N. It is almost surrounded
with valleys, encompassed with mountains, so that
it seems to stand in the middle of an amphitheatre.
It is about 3 ms. in circumference, and includes
Mount Calvary, which was formerly without the
walls. The Christian pilgrims flock here from var-
rious parts, and the inhabitants accommodate them
with lodging and provisions, which is their chief
business; and a bashaw, with a guard of janissar-
ies, always resides here to protect them from the
insults of the Arabs. Jerusalem was taken by the
French, under Bonaparte, in February, 1799. It
is 112 ms. SW. from Damascus, and 45 from the
Mediterranean sea. Lon. 35 26 E., lat. 31 50 N.

Jerusalem, village, Ontario co., N. Y., on the
W. side of Seneca lake, and 38 ms. NE. of Bath.
This was the seat of Jemima Wilkinson, the foun-

dress of a religious sect. Pop. 1820, 1,610.—Village on Long Island, N. Y., in Queen's co., 30 ms. ESE. from N. Y.—Village, Southampton co., Va., on the N. side of the river Nottaway, 63 ms. SW. of Norfolk.

Jesi, town of Italy, in Ancona, on a mountain, near the river Jesi, 17 ms. SW. of Ancona, and 112 NE. of Rome. Lon. 13 16 E., lat. 43 30 North.

Jeso, group of islands on the E. coast of Asia, lying between those of Japan and the Kuriles. The southernmost, called Matmai, lies N. of Naphon. It is governed by a tributary prince, dependent on the empire of Japan, and fortified on the side toward the continent. It is full of woods, and the inhabitants, who live by fishing and hunting, are strong, robust, savage, and slovenly, when compared to the Japanese. The two islands to the NE. of Matmai, Cunachir and Zellany, and likewise the three still further to the NE., called the Three Sisters, are perfectly independent. The Japanese give the name of Jeso to the whole chain of islands between Japan and Kamschatka.—See *Kuriles*.

Jessamine, co., Ky., bounded SE., S., and SW., by Kentucky river, NW. by Woodford, and NE. by Fayette; length 14 ms., breadth 12, area 170 sq. ms. The surface of this co. may be considered level, and soil generally first rate quality. Nicholasville, its chief town, stands nearly in the centre, about 85 ms. almost due S. from Cincinnati. Pop. 1820, 9,297. Central lat. 37 50 N., lon. W. C. 7 18 W.

Jesselmere, town of Asia, in Hindoostan, in the dominions of the Great Mogul. Lon. 72 40 E., lat. 26 40 N.

Jessup, village, in the eastern part of Huron co., Ohio.

Jever, town of Germany, Westphalia, and capital of Jeverland, with a citadel. It is 17 ms. NE. of Aurick, and 30 NE. of Embden. Lon. 7 41 E., lat. 53 33 N.

Jeverland, territory of Germany, in Westphalia, belonging to the house of Anhalt Zerbst.

Jewell's City, village, Conn., New London co., 6 ms. NE. from Norwich.

Jeypour.—See *Joodpoor*.

Jeypoor is the eastern and best part of Adjemere, or Rajepootana, lying almost entirely in the valley of the Jumna, and sloping eastwards. Being traversed almost centrally by N. lat. 27°, the climate admits an immense range of vegetable productions and of minerals; it affords salt, alum, copper, blue vitriol, and verdigris. In 1818, like most other parts of Rajepootana, Jeypoor became dependent on the British.

Jeypoor, capital of the province of the same name, is situated about 150 ms. a very little S. of W. from Agra, and about a like distance SW. of Delhi. It is a city of comparative modern foundation; the streets are straight and spacious and well built. Near this city there is an astronomical observatory, well provided with instruments. The citadel stands on a rock.

Jezdkast.—See *Yezdighast*.

Jibbel Aures, mountainous, well watered, and fertile district of Africa, in the province of Constantia, regency of Algiers. Jibbel Auras becomes very interesting, as containing a remnant

descended from the Vandals. In Arrowsm map of Africa, the Gebel Auras are laid down N. lat. 35° E., lon. 6 30 E., about 200 ms. from Algiers. This is the *Aurias Mons* of midia, and the quarter where Gelimer, king of Vandals, fled after his defeat by Belisarius.

“Mr. Bruce describes a very savage and independent tribe, called Neardie, (perhaps the same whom Abbe Poiret terms Nades, and of whom gives a similar description,) residing near Jibbel Aures, and dwelling in huts of mud and straw. They occupy a very rugged and inaccessible part of country; and the great hazard of attack there was expressed by one of their Maraboutic strong figure of ‘eating fire.’ They have a fair complexion, red hair, and blue eyes. They have the figure of a Greek cross marked with vermilion on their foreheads, and affirm that their ancestors were Christians. They seemed to be more in that relation than in any connexion with the Moors, and Mr. Bruce conceived them to be remnant of the Vandals.”—*Brewster's Encyclopedia*, art. *Barbary*. *Jibbel*, or *Jibcl*, signifies a mountain, and in all names of places in which it is found has relation to mountains.—See *Gibraltar*.

Jibbel Iskel, ancient Mount Cerna, a mountain of Tunis, about 15 ms. SW. from Bizerta.

Jidda, *Judda*, or *Diedda*, seaport of Arabia Felix, on the Red sea, in the Sherifate of Mecca. A very considerable trade is carried on here, the city being a mart between Egypt and India. Ships from Suez seldom proceed further than Jidda, and those from India are not suffered to advance to Suez. The English are particularly favored in the trade of this place, as they pay only 8 per cent. dues of custom, while all others are the subjects of the sultan, pay 10, and are obliged to suffer to discharge this in goods, while all others must produce money. Jidda has no fresh water, and is situated in a barren, sandy district, 34 ms. SW. of Mecca, of which it is the capital. Lon. 39 22 E., lat. 21 29 N.

Jigitonhonka, river of Brazil, in Minas Geraes. It is celebrated for the diamonds found in its bed.

Jihon, or *Gihon*, ancient Oxus, river of Asia, rising in the same mountains with the Indus, and discharging into the sea of Sihon, or Jaxartes. Its SE. sources interlock with those of the Hindemend, ancient Etyma, flowing into the sea of Durrah. The course of Jihon is generally to the NW.; comparative length about 900 ms. This noble stream had probably some former communication with the Caspian, which, if ever so, is now impeded by sand. Before the destructive influence of the Tartars, the country of the Jihon was flourishing and well cultivated. The regions it drains are amongst the finest of central Asia.

Joachim, village, Jefferson co., Mo.

Joachimsthal, town of Bohemia, in the cir. of Saatz, noted for its mines and a manufacture of lace, 15 ms. N. by E. of Elbogen.—Town of Brandenburg, in the Ucker mark, 31 ms. N. E. of Berlin.

Joanna.—See *Hinzuan*.

Joannes, one of the islands in the mouth of the Amazon; it is about 150 ms. long and 100 ms. broad, and is extremely fertile.

Joannina.—See *Ioannina*.

Joanpour, city of Hindoostan proper, capital of

car of the same name in Benares. It is seated on the Goomty, and not far from the confluence of the river with the Ganges; the fort of Joonpour is of a commanding extent, on a high bank overlooking the bridge over the Goomty. It is chiefly in ruins, although formerly it commanded the country from the Ganges to Lucknow. The stone bridge over the Goomty consists of 16 arches, and on the top of it are many little sound principles as to have withstood, for a length of time, the force of the stream, which, in the time of the rains, is very great. The inundations have been known to rise frequently over the bridge, insomuch that, in 1774, a brigade of the British army passed over it in boats. Joann is 49 ms. NW. of Benares. Lon. 84 7 E., 25 45 N.

Johnstown, village, Burlington co., N. J., 17 ms. from Trenton.

Johnatra, kingdom of the island of Java, containing the city of Batavia.

Johnsburg, town of Fr., in the dep. of Lower Rhine, situate on an eminence near the Rhine, 15 ms. SE. of Landau.

Johnsberg, town of Upper Saxony, in Prussia, celebrated for its mines and a considerable manufacture of lace, 18 ms. SSE of Zwickau.

Johnsbury, town of East Prussia, with a castle, seated on the Pych, near the Lake Spirdow, 15 ms. SE. of Koningsberg. Lon. 22 39 E., 53 16 N.

Johnquera, very ancient town of Spain in Catalonia, seated at the foot of the Pyrenees, 20 ms. from Perpignan.

Johnsburg, village, Warren co., N. Y., on the west bank of Hudson's river, about 40 ms. NW. from Glens Falls, and by post road 81 ms. NW. from Albany.

John, tp., Franklin co., Mo.

John's Island, one of those islands on the coast of S. C., formed by the inlets or diverging mouths of the rivers. John's island is formed by the river, and north Edisto inlet. The western part is called Wadmalau. Staple, cotton.

Johnson, post town, Franklin co., Vt., on the Hoosier river, 30 ms. NE. from Burlington.—*Johnson*, N. C., bounded by Sampson S., Cumberland SW., Wake NW., Nash NE., and Wayne E. and SE.; length 32, mean width 20 ms.; area 640 sq. ms. Surface undulating. It is intersected by Neuse river from NW. to SE. Chief town, Smithfield. Pop. in 1820, 9,607; and in 1840, 10,600. For central lat., see *Smithfield*. *Johnson*, N. C.—*Johnson*, Ill., bounded by the Ohio river S., by Alexander and Union N., Franklin N., and Pope E.; length 30, breadth 18 ms.; area 486 sq. me. Surface hilly towards the Ohio river, but becoming more level towards the interior. Soil fertile. Chief town, Wilkesville. Pop. in 1820, 843; and in 1840, 326. Central lat. 37 30 N., lon. W. C. 11 4 W.

Johnsonburg, village, Warren co., N. J., 30 ms. NE. from Easton, in Penn., and 74 N. from Trenton.

Johnson's Creek, post office, Niagara co., N. Y.

Johnson's Mills, post office, Dallas co., Ala., 9 ms. from Cahaba.

Johnson's Springs, post office, Goochland co., Va., 25 ms. NW. by W. from Richmond.

Johnston, tp., Providence co., R. I., 5 ms. N. from Providence.—*Johnston*, Trumbull co., Ohio.

Johnston, Fort, N. C., on the right bank of Cape Fear river, at its mouth.

Johnston's Straits, between the continent of N. America and the island of Quadra and Vancouver, it unites Queen Charlotte's sound to the gulf of Guineea. Lon. W. C. 46° W. lat. 50 35 N.

Johnstown, in the tp., of Edwardsburg, U. C., is situated upon the river St. Lawrence, above the uppermost rapids in ascending to Lake Ontario, and is a mile square. From this town, vessels may be navigated with safety to Queenstown, and to the ports of Lake Ontario. It is nearly opposite Ogdensburg, in N. Y.—Town and seat of justice, Montgomery co., N. Y. The village is situated about 4 ms. N. from the Mohawk, on the outer road from Schenectady to Herkimer, 25 ms. NW. by W. from the former. Lat. 45 N. lon. W. C., 2 19 E.—Village in the SW. angle of Cambria, co., Penn., 40 ms. NW. from Bedford, and 60 E. from Pittsburg.—Small town in the northwestern quarter of Lick-co., O., on the Middle or Raccoon fork of Licking creek, and 17 ms. NW. from Newark, on the road leading to Delaware.

Johnstown Mills, post office, Cambria co., Penn., on the left bank of Little Conemaugh, above the mouth of Stony creek, and 18 ms. N. from Stoystown.

Johore, town of Malacca, in Asia. Lon. 93 55 E. lat. 1 15 N.

Joigny, town of Fr., now in the dep. of Yonne, and lately in the province of Burgundy. Its red wines, though not of the first quality, have a great demand. It is handsomely seated on the Yonne, 17 ms. SSE. of Sens. Lon. 3 36 E., lat. 48° N.

Joinville, ancient and considerable town of Fr., in the dep. of Upper Marne, and lately in the province of Champagne. It is seated on the Marne, 24 ms. SW. of Bar le-duc, and 125 SE. of Paris. Lon. 5 20 E., lat. 48 20 N.

Jolliet, seigniory, Dorchester co., L. C., on the Chaudiere and Echemin rivers, about 24 ms. S. from Quebec.

Jonasville, village, Alleghany co., Md.

Jones, co., N. C., on Trent river, bounded by Carteret SE., by Onslow and Duplin SW., Lenoir NW., and Craven NE. and E.; length 30, mean width 10 ms., area 300 sq. ms. Surface level, and soil generally either marshy or sandy. Chief town, Trenton, 22 ms. W. from Newbern. Pop. in 1820, 5,216; and in 1840, 4,945. Central lat. 35 N., lon. W. C. 0 30 W.—*Jones*, Ga., bounded by Wilkinson and Twiggs SE., Oakmulgee river or Fayette SW., Jasper NW., Putnam N., and Baldwin E.; length 21, width 20 ms., area 420 sq. ms. Clinton, seat of justice, about 22 ms. SW. by W. from Milledgeville. Pop. in 1820, 17,411, and in 1840, 10,065. For geographic position, see *Milledgeville*.

Jonesborough, village and seat of justice, Washington co., E. Tenn., on Limestone creek, branch of French Broad river, about 110 ms. E., from Knoxville. Lat. 36 12 N., lon. W. C. 5 18 W.—*Jonesville*, Jefferson co., Ala., on Tuscaloosa river, 25 ms. N. from Tuscaloosa village.

Jonesburg, village, Camden N. C., by post road 225 ms., NE. by E. from Raleigh.—Village and seat of justice, Union co., Illinois, 22 ms. NW. from Wilkinsonville, on the Ohio river.

Jones's Mills, Cambria co., Penn.

Jones's Store, post office, Halifax co., N. C., 83 ms. NE. by E. from Raleigh.

Jonestown, village, Lebanon co., Penn., on the point above the junction of the two main branches of Swatara creek, 23 ms. nearly E. from Harrisburg.

Jonesville, village, Lee co., Va., near the N. shore of Powell's river, about 65 ms. W. from Abingdon.—Village, Surry co., N. C., by post road 178 ms. NW. by W. from Raleigh.

Jonkioping, town of Sweden, capital of the province of Smoland, and seat of the parliament, or superior court of justice for Gothland. It is seated on the S. side of Lake Wetter, with a strong citadel, 50 ms. NW. of Calmar. Lon. 14 46 E., lat. 57 12 N.

Jonquieres, town of Fr., now in the dep. of Var, and lately in the province of Provence, 1 mile SW. of Aix, and 10 NW. of Marsill. Lon. 5 10 E., lat. 43 20 N.

Joodpoor, city of Hindoostan, and capital of the province of the same name, is situated about 350 ms. SW. by W. from Delhi, and a nearly equal distance a little S. of W. from Agra. N. lat. 26 15, lon. 73 30 E. It is still of considerable size, but destitute of wells or springs, and is supplied with water from a tank cut in a rock.

Joodpoor, or *Marwar*, middle or rather southern part of Adjemere. The name of Joodpoor is derived from that of the capital. The province lies S. from Bicanair, SE. from Jeysubmair, and NW. from Mewar. Territory arid, with lead mines. Slope southwestward towards the Run of Cutch. This province since 1818 has been subject or dependent on the British.

Joppa—See *Jaffa*.

Joppa Cross Roads, post office, Harford co., Md., 17 ms. NE. from Baltimore.—Village, Harford co., Md., on the left bank of Gunpowder river, 16 ms. NE. from Baltimore.

Jordan, river of Turkey in Asia, in Palestine, which rises in Mount Libanus, and running from N. to S., forms two lakes, the one formerly called the sea of Galilee, or the Lake of Tiberias, and the other the Dead sea.—See *Dead sea*; see, also, *Astā*, p. 82.

Jordansville, village, Mecklenburg co., NC., by post road, 172 ms., southwestward from Raleigh.

Jordon, village, Onondaga co., N. Y., on the Western canal, where passed by the outlet of Skeanetas lake, about 10 ms. N. from the village of Skeanetas.

Josselin, town of Fr., now in the dep. of Morbihan, and lately in the province of Bretagne, 25 ms. NE. of Vannes. Lon. 2 23 W., lat. 48° North.

Jouare, town of Fr., now in the dep. of Seine and Marne, and lately in the province of the Isle of France, 10 ms. SE. of Meaux, and 35 E. of Paris.

Joud.—See *Jehud*.

Joux, Valley and Lake of.—See *Jura*, Mount.

Joy, village, Kennebec co., Maine, by post road 110 ms. N. from Portland. Though placed

in Kennebec co., by the Post Office Department, Joy is in Oxford by Tanner's map.

Joyeus, town of Fr., now in the dep. of deche and lately in the province of Dauphine, seated on the Baune.

Juan de la Frontera, St., a town of Chi S. America, in the province of Chiquito, near Lake Guanacho. The territory of this town inhabited by 20,000 native Americans, who tributary to Spain. It contains mines of silver and a kind of almonds that are very delicious. It is seated at the foot of the Andes, 98 ms. of St. Jago. Lon. 65 55 W., lat. 33 25 N.

Juan de Puerto Rico, St., island of the Indies, 50 ms. E. of Hispaniola, and usually called Porto Rico. It is 100 ms. long and 50 broad and belongs to the Spaniards. It is full of high mountains and extremely fertile valleys interspersed with woods and well watered springs and rivulets. It produces sugar, ginger, corn, and fruits, partly proper to the climate, and partly introduced from Spain; there are so many cattle, that they often are killed for the sake of the skins alone. Here are a great number of uncommon trees, and there is a great deal of gold in the N. part of the island. It is commonly said that the air is healthy, and yet, in the reign of Queen Elizabeth, the Earl of Cumberland when he had taken this island, lost most of his men by sickness, and, on that account, was forced to abandon it. It is subject to storms and hurricanes, like the rest of these islands. The capital is of the same name. Lon. 67 4 W., lat. 17 N.

Juan de Puerto Rico, St., capital of the island of the same name, with a good harbor, defended by several forts, seated on the N. coast of the island. Lon. 69 1 W., lat. 18 29 N.

Juan de Uloa. See *St. Juan de Uloa*.

Juan Fernandez, island in the S. Pacific ocean, lying in 83° W. lon., and 33° S. lat., 300 miles W. of Chili. It is uninhabited, but is found extremely convenient to touch at and water. There are instances of two men living alone at difficult times on this island for several years; the one a Musquito Indian, the other Alexander Selkirk a Scotchman, who, having been left on shore in this solitary place by his captain, lived there several years, till he was discovered by Captain Rowley in 1709. From this remarkable history Daniel Foe is said to have derived the hints which he rose to his celebrated production, *The Adventures of Robinson Crusoe*. This island is about 15 ms. long, and about 6 broad—its only safe harbor is on the N. side. It is said to be full of excellent water, and to abound with a great variety of esculent vegetables highly nutritious; besides which Commodore Anson sowed a variety of garden seeds, and planted stones of plums, apricots, and peaches, which were, many years afterwards, informed had thrived greatly, and now, doubtless, furnish a very valuable addition to the natural productions of the spot.

JUBILEE, derived by Webster from the Hebrew, and literally meaning "blast of a trumpet." Amongst the Jews it was the 50th or Sabbath year, one of rest and enjoyment; and when slaves were set free, lands alienated for debt, returned to

original owners, &c. Amongst the nations have derived the word from the Hebrew, it is the time of relaxation and enjoyment.

Jubba, capital of a kingdom of Africa of the same name, subject to the Portuguese. Lon. 43° 0', lat. 50' N.

Jucatan.—See *Yucatan*, *Honduras*, and *Merida*.
Judda, seaport of Arabia Felix, with a fort, on the Red sea, 34 ms. SW. of Mecca, to which it is the port. Lon. 39 22 E., lat. 21 29 N.—See *Jeddo*.

Judenburg, considerable town of Germany, capital of Upper Styria, with a handsome castle. The public buildings, with the square, are magnificent. It was taken by the French in April, 1797; and here an armistice was settled between archduke Charles and Bonaparte. It is seated on the Mueln, 45 ms. W. by N. of Gratz, and 40 ms. SW. of Vienna. Lon. 14 26 E., lat. 47 40' N.

Judith Point, SW. point at the entrance of the Sagansett bay.

Jufoigna, town of the kingdom of the Netherlands, in S. Brabant, on the river Greete, 12 ms. S. of Louvaine, and 16 N. of Namur. Lon. 4° E., lat. 50 45 N.

Juggernaut, celebrated temple of Hindoo superstition, in Orissa, a few ms. E. from the Ohilke.—See *Jaggernaut*.

Jujui, river of S. America, in the province of Tucuman. It rises in the Andes, at lon. 9 E. W. C., and runs under the tropic of Capricorn, and, flowing about 300 ms., falls into the Rio Grande.—The province of the United provinces of Buenos Ayres, copying the peninsula between the Jujui and Rio Grande rivers.

Juigon, town of France, in the department of the Morbihan. Coast, and late province of Bretagne, seated on the small river Arqueon, 12 ms. from the English channel.

Jugora, province of Russia, depending on the government of Archangel.

Julian Alps, in ancient geography called also *Jarnian*, and depending on Noricum and Venetia, now called the Alps of Corinthia and Tyrol.

Juven du Saull, St., town of France, in the department of Yonne, and late province of Burgundy, seated between two mountains covered with vines, near the river Yonne, 5 ms. from Auxerre.

Juchers, formerly duchy of Westphalia, 64 ms. long and 36 in breadth, bounded on the N. by the Guelderland, on the E. by the archbishopric of Cologne, on the S. by Luxemburg and Treves, and on the W. by Limburg. It is subject to the king of Prussia, and is remarkable for the quantity of wood it produces, which is much used in the country.—Town of Germany, capital of the former duchy of the same name, with a strong citadel. It is seated on the Roer, 15 ms. E. of Aix la Chapelle, and 18 W. of Cologne. Lon. 6 50 E., lat. 50 56 N.

Julesburg, village, Burlington co., N. J., 6 ms. from Trenton.

Julesburg, hill of Illinois, N. from Des Moines river, near the mouth of the Kankakie. Lon. 42 6 N.

Jumella, town of Spain, in the province of Murcia, 22 ms. SW. of Murcia.

Jumiege, town of Fr., in the dep. of Lower Seine, and late province of Normandy, on the Seine, 12 ms. SW. of Rouen, and 77 NW. of Paris. Lon. 55' E., lat. 49 24 N.

Junmoo, or *Jumbo*, town of Hindoostan Proper, in the country of Lahore. It is situated on the side of a hill by the river Rawee. This city, though in a decayed state, is a mart of the first note in that part of the country. It is 90 ms. N. of Lahore. Lon. 23 16 E., lat. 32 45 N.

Jumnah, large river of Hindoostan Proper, which rises to the NW. of Delhi, waters that capital as well as the city of Agra, and joins the Ganges 100 ms. below Benares. The Jumnah has its source in the mountains of Cashmere, and flowing SSE. 600 ms., receives the Chumbul from the W., and continuing 200 ms. further joins the Ganges Allahabad. The provinces of Delhi, Agra, Malwa, and part of Allahabad, lie in the valley of the Jumna.

Juniata, tp., Perry co., Penn., on Juniata river, 20 ms. from Harrisburg. Pop. in 1820, 1,748.—River in Pa., the principal branches of which rise in Bedford co. After having joined near Huntingdon, in Huntingdon co., the united stream runs for the most part in an eastern direction till it meets the Susquehannah 10 ms. above Harrisburg. This river affords a channel through which the produce of the adjacent country is conveyed to market, either at Harrisburg, Middletown, Columbia, Baltimore, &c.

Junius, town, Seneca co., N. Y., at the lower end of Seneca lake. Pop. in 1820, 5,113.

Junksilon, seaport of Asia, the principal town of an island on the SW. coast of Malacca. The town is situated on the N. part of the island, and, as a harbor, capable of receiving ships of a moderate size. The island is fertile, 63 ms. long and from 10 to 20 broad. Lon. 93 30 E., lat. 8 40 N. The island of Junksilon is one of the most abundant tin districts of Asia. The mining operations chiefly performed by Chinese. Pop. of the island about 12,000.

Juntas, river of Colombia, Quito, and in the province of Jaen de Bracaniore, rises in the Andes, and flowing E., receives as its name imports numerous branches, changes its name to Santiago, and falls into the Lauricocha at lat. 4 30 S., lon. W. C. 30' E.

Jura, one of the Western isles of Scotland, NE. of Islay, supposed to be 34 ms. long and 10 broad. It is composed principally of vast mountains quite naked, and without a possibility of cultivation; three of them, called the Paps of Jura, are most remarkable; they are of a conic form and stupendous height. The rest of the island is flat, and generally covered with heath.—Department of France, including part of the late province of Franche Comté. It contains mines of iron of a superior quality: mines of copper and lead, and many quarries of black marble, jasper, and alabaster. It takes its name from Mount Jura.

Jura, *Mount*, chain of mountains, which begins in the canton of Zurich, in Switzerland, extends along the Rhine into the canton of Soleure, and the principality of Neuchâtel, branches out toward the Pays de Vaud, separates that country from France, and continues beyond the frontiers of the Genevois as far as the Rhone. In various

parts of the Pays de Vaud this chain forms many elevated valleys; of these the most delightful is the valley of the lake of Joux, upon the top of that part called Mount Joux, it is beautifully chequered with wood, arable, and pasture land; and is watered by two picturesque lakes, the largest of which is called the lake of Joux, and the other lake Brenet. This little vale is very populous, containing 3,000 inhabitants, some employed in making watches, but the greater part in polishing crystals, granites, and marcasites. These parts are much infested with bears and wolves. The descent from this delightful vale, through a variety of hill, valley, wood, and lawn, affords a very extensive prospect of a great part of the Pays de Vaud, the lake of Geneva, with its mountains, and the lake of Neuchâtel.—See *Vosges*.

Jurullo, very remarkable volcano of Mexico, in the State of Mechoacan. Lon. W. C. 24 10 W., lat. 19 9 N. It was formed by an irruption in one night, between September 28th and 29th, 1759. The irruption was preceded by shocks of an earthquake from the month of July. The conical summit rises to 524 feet; and it is asserted that the mountain and adjacent plain yet emit smoke, after an interval of 84 years.

JURY, from *jurare*, sworn. That species of commission which was probably continued from the woods of Germany, and remains a justly cherished institution by the Saxon nations. In criminal cases, it consists of two separate bodies—grand jury, or jury of accusation; and petit jury, or jury of trial.

Jutland, peninsula, the principal part of Denmark, 180 ms. in length and 50 in breadth, bounded on the SE. by the duchy of Holstein, and on the other sides by the German ocean and the Baltic. The air is very cold, but wholesome. The soil is fertile in corn and pastures, and feeds a great number of horses and bees, which are sent to Germany, Holland, &c. It was anciently called Cimbrica Chersonesus, and is supposed to be the country whence the Saxons came that conquered England. It is divided into two parts, called N. and S. Jutland; the latter being the duchy of Sleswich, and lies between N. Jutland and Holstein. The Eyder river has been the boundary between Jutland and Germany since the age of Charlemagne, or upwards of 1,000 years.

Jutrilla, island.—See art. *Navigator's islands*.

Jyepour, city of Hindoostan proper, capital of a territory of the same name, and subject to one of the Rajpoot princes, now a place of great wealth and consequence, being the staple for goods that are brought from every quarter of India. It is 136 miles W. by S. of Agra. Lon. 76 9 E., lat. 26 56 N.—See *Jyepour*.

Jykyl, island.—See *Jekyl*.

K.

[Names that sometimes begin with K, and are not to be found under that letter, may be sought for under the letter C.]

Kabarda, territory of Russia in Europe, between the Terek river and the Caucasus mountains. As laid down on Black's map, Kabarda is bounded S. by the Caucasian mountains, W. by

Circassia, N. by the province of Caucasus, and by Daghestan; but we may observe that the limits of those provinces between the Euxine and Caspian seas are merely nominal. Lon. 45° E. of London and lat. 43° intersect in Kabarda.

Kadhema, seaport of Arabia, in the province of Bahrin. The inhabitants are chiefly employed in the pearl fishery. It is seated on a bay of the Persian Gulf, 170 ms. N. by W. of Lachsa. Lon. 36 E., lat. 28 40 N.

Kaffungen, town and monastery of Germany, in Hesse, near Cassel. Lon. 9 30 E., lat. 51 12 N.

Kaffraria, or *Caffraria*.—See *Africa*, pp. 27, and 28.

Kahua.—See *Hua*.

Kairvan, city of Africa, in Tunis, capital of the government of the same name. It is the second city in the kingdom for trade and population, is 20 ms. W. of Susa. Lon. 10 25 E., lat. 33 10 N. This is the same with *Cairoan*; which see.

Kaia, village of Saxony, near Lutzen, remarkable for a battle between the French and the Prussian armies, May 2d, 1813.

Kaisarich, city of Asia Minor, ancient Cæsarea and capital of Cappadocia. Lon. 35 18 E., lat. 38 41 N.

Kalaar, town of Persia, in Chilan, with a considerable manufacture of silk. Lon. 58 45 E., lat. 36 23 N.

Kaket, town of the country of Georgia, in the province of its name, which comprehends part of the ancient Iberia. It is situated near Mount Caucasus, and 45 miles NNE. of Teflis, 120 NW. of Derbend.

Kalau, town of Lusatia, which has a great trade in wool, 11 ms. SE. of Luckau.

Kalhal, town of Arabia, in the province of Ormus, on a river of the same name, at its entrance into the gulf of Ormus, 80 ms. SE. of Muscat.

Kalis, town of Brandenburg, in the New March, near the frontiers of Poland, 37 miles E. of Stargard.

Kalisoh, city of Poland, capital of a palatinate of the same name. It is seated on the river Parna, surrounded by morasses and walls, 40 miles SE. of Gnesen. Lon. 18 5 W., lat. 52° N.

Kalkas, tribe of Mongols subject to China. They are called Kalkas, or "Black Mongols," to distinguish them from the "Shana Mongols," or Yellow Mongols. The Kalkas reside N. from the Great Mongolian desert.

Kallingburg, seaport of Denmark, in the island of Zealand, seated on an inlet of the Great Belt, the best harbor, next to Copenhagen, on the island. It is 55 ms. W. by N. of Copenhagen. Lon. 11 E., lat. 55 47 N.

Kalmucs, nation of Mongols occupying an immense space of central Asia. This nomadic nation is nominally tributary in part to Russia and in part to China, but, in fact, independent of either. The Kalmucs are subdivided into Sifans, Torgos, Derbetes, and Songares. No doubt, very different nations are by European writers included under this general name; but the Kalmucs are a branch of the great yellow race of central and eastern Asia, and differ as much from the real Tartars of the Caucasian family as a Moor does from a Negro; though absurdly called Tartars by English writers, the Kalmuc language is pure Mongolian, and

words and structure totally different from that of the Tartars. They all live in tents, and remove from place to place in quest of pasturage for their numerous cattle, consisting of horses, camels, cows, and sheep. In person they are of a low stature, and bow-legged, occasioned by their being so continually on horseback, or sitting with their legs beneath them. Their faces are broad and flat, with a large nose, and little black eyes, distant from each other, like the Chinese. They are of an olive color, and their faces full of wrinkles, with very little beard.

KAL-MU-KI is pure Sanscrit, and means "black-ed."—*Rees*, article *PARAVATI*.

Kalmunz, town of Germany, in the circle of Bader. It is 12 ms. from Ratisbon, and situated at the confluence of the Vilz and Nad.

Kabuck, strong town of Poland, in the palatinate of Bracklaw. Lon. 29 18 E., lat. 48 57 N.

Kaluga, now a government of the Russian empire, but it was formerly a province in the government of Moscow. Its principal town, of the same name, is seated on the Occa.

Kamakura, island of Japan, about 3 ms. in circumference, lying on the S. coast of Nippon. It is here they confine their great men when they are committed any fault; and the coast is so steep that they are forced to be lifted up by cranes.

Kamatschinzes is the name of a people in Tartary.

In the year 1629 they were made tributary to Russia, and then led a rambling life. At present their habitations are in the neighborhood of Kask and Abakansk, two ostrogs, situated one on the Yenisei, and the other on the Kan. Even at present time that they submitted to Russia, they were a scanty people, or rather the remains of some ancient nation.

Kambala, *Mount*, ridge of mountains in Thibet, between Lake Palte and the Burrampooter. From the top of this ridge may be seen, to the north, a range of still higher mountains, covered with snow.

The foot of Mount Kambala is 31 ms. S. of Lassa.

Kaminieck, pronounced *Kamineitz*, very strong town of Poland, capital of Podolia. When the Russians seized part of the Polish territories in 1772, this fortress held out a long time, but at last surrendered to their arms. The castle is seated on a rocky rock, 85 miles W. of Bracklaw, and 100 miles of Lemburgh. Lon. 26 30 E., lat. 48 58 N.

Kamtschatka, peninsula of Asia, formed by a range of stony and barren mountains, which run from the SSW. from that part of the continent bounded by the Koraiks. It is bounded by the North ocean, the gulf of Penschinskoi, and by the Straits of Oghotzk; in all probability the Kourili, a range of isles which, in many directions, extend from Japan, are parts of the same natural ridge of Kamtschatka. It is situated between about 40° and 62° N. lat. The soil is stony, full of cold rocks, destitute of any great space of fertile land, and so cold, even in the summer, that the soil is very unfit for culture, and, of itself, does not produce a sufficiency for the cattle. The mountains are for the most part of a low stature, with broad shoulders, large heads, long flat noses, flat noses, small eyes, thin lips, and short

racks. It is seated on the N. side of the river Kamtschatka, 20 ms. from its mouth. Lon. 161 50 E., lat. 56 30 N.

Kamtschatkoi, *Verchni*, town of Siberia, in Kamtschatka, on the river Kamtschatka, 120 ms. SW. of Niznei Kamtschatkoi.

Kan.—See *Khan*.

Kandahor, province of Afghanistan. It is a high but level country, W. from the mountains of Hindoostan.—City and capital of the province of the same name, is situated on the great road from Hindoostan to Persia, and is extensive, commercial, and flourishing.—See *Candahor*.

Kandegheri, town of Hindoostan, in the Carnatic. In 1599 it was the capital of a kingdom called Narsinga, the residence of a Hindoo king, whose dominions extend over Tanjore and Mandurra; and in 1640, a descendant of that prince, who reigned here, permitted the English to form a settlement at Madras. It is 70 ms. NW. of Madras. Lon. 97 24 E., lat. 13 46 N.

Kandy, city of Ceylon, in the interior of the island, 1,400 feet above the level of the sea.

Kanem, town of Africa, in the empire of Bornou, and in a province of the same name, where are bred multitudes of cattle and horses. It is seated on the Gazel, 150 ms. NNW. of Bornou.

Kaniow, strong town of Poland, in the palatinate of Kiow, seated near the Dnieper, 62 ms. S. by E. of Kiow, and 100 NE. of Bracklaw.

Kanisca, strong town of Lower Hungary, capital of the county of Salawar, seated on the Drave, 100 ms. S. by E. of Vienna. Lon. 17 40 E., lat. 46 55 N.

Kankakie river, great SE. source of the Illinois, rises with the headwaters of St. Joseph's of Michigan, flows W., and, uniting with the Desplanes, form Illinois. The country drained by the Kankakie is generally level, and most of it prairie.

Kansas, one of the great southwestern branches of Missouri river. It has interlocking sources with those of Arkansas and Platte rivers, and rises in the intermediate plains, as far W. as lon. W. C. 27 degrees west. Flowing nearly east, the various branches gradually converge, and, after a comparative course of 400 ms., unite, and, forming a noble stream of nearly half a mile wide, continues 100 ms. further, and joins the Missouri at lat. 39 5 N. The junction of those two streams determines the extreme western limit of the State of Missouri. The valley of the Kansas spreads between those of the La Platte and Arkansas, and, stretching its greatest length very nearly E. and W. 500 miles, though in no part much, if any, above 100 wide; the mean width about 80, and area 40,000 sq. ms.

Kan-tcheou, city of China, of the first rank, in the province of Kiang-si, on the Kau-kiang, 840 ms. S. of Peking. Lon. 115 2 E., lat. 25 52 N.

Kao-tcheou, city of China, of the first rank, in the province of Quangtung. In its vicinity is found a kind of marble that represents (naturally) rivers, mountains, landscapes, and trees; it is cut into leaves, and made into tables, &c. Kao-tcheou stands on a navigable river, 36 miles from the sea, and 1,130 SSW. of Peking. Lon. 145 36 E., lat. 40° N.

Kaposwar, fort of Lower Hungary, on the river Kapos, which washes its walls. It is 55 ms. W. of Tolna. Lon. 18 13 E., lat. 46 31 N.

Kara-Amid, Turkish name of Diarbekir, ancient Amida.—See *Asia*, p. 84; also, *Diarbekir*.

Karahissar.—See *Aphion*.

Karadje Bouroun, Turkish name of the most southern point of the Crimea.

Karasu, ancient Pangæus, mountains of European Turkey, between Thrace and Macedonia.

Karasubazar, town of the Crimea, noted for its noble antique bath and an ancient manufacture of leather from the skins of Tauric goats. It is situate on the Karasu, in a delightful valley, 34 miles W. from Caffa.

Karek, or *Garak*, island in the NE. part of the gulf of Persia, 5 miles long, and 2 broad, where ships bound for Bassora generally call for pilots. Lon. 50 26 E., lat. 29 15 N.

Karlesburg, or *Belgrade*, town of the Austrian empire, in Transylvania. It contains about 6,000 inhabitants. Lon. 23 34 E., lat. 46 4 N., 32 ms. N.W. from Hermandstadt.

Karlstadt, town and district of Austrian Illyria. Karlstadt, the capital, stands on a branch of the Save, about 100 miles SE. from Trieste.—Province of Sweden, nearly commensurate with the ancient province of Warmeland.

Karleby, *Gamta*, seaport of Sweden, in East Bothnia, with a trade in hemp, salt, and ship-building, seated on the gulf of Bothnia, near the influx of the river Karleby, 90 miles N. by E. of Christinestadt. Lon. 22 20 E., lat. 63 56 N.

Karleby, *Ny*, town of Sweden, in East Bothnia, on the river Lappajock, 6 ms. from the sea, and 20 S. of Gamia Karleby.

Karlesruhe, city of Germany, in the circle of Suabia, in the Margravate of Baden Darlach, with a magnificent palace. The city is built on a regular plan, and the houses are all as uniform as the streets. It is 12 ms. N. by E. of Baden.

Kars, city and province of Asiatic Turkey.—See *Asia*, p. 83.

Kasan, country of the Russian empire, lying on both sides of the Volga, which now forms the three Russian governments of Kasan, Simbersk, and Penza.—City of Russia, capital of a government of the same name. It has several suburbs, one of them inhabited by Tartars. At one end of the city is a manufacture of cloth for the army. It is also the seat of a university, founded in 1803, occupying a central position between Europe and Asia; it is a mart of extensive trade. It is seated on the rivulet Kasanka, where it enters the Volga, 420 miles N. of Moscow. Lon. 49 8 E., lat. 55 44 N.

Kashgar.—See *Cashgur*.

Kaskaskia, river of Illinois, rising in the E. part of the State, near the W. boundary of Indiana, and, flowing SW. by comparative courses about 250 miles, upwards of 150 of which following the windings of its course, it is navigable for boats. It falls into the Mississippi about 100 ms. above the mouth of Ohio.—Town and seat of justice, Randolph co., Ill., on the right bank of Kaskaskia river, 12 ms. above its mouth. It is built upon a plain, in a prairie.

Kata Vraona.—See *Vraona*.

Katuba, town of Arabia, in Yemen, with a citadel, situate in a fertile country, near a river which runs into the sea at Aden, 75 miles N. of Aden. Lon. 44 32 E., lat. 13 64 N.

Katif, town of Arabia, in the province of Balrin. It is built of rock salt, and stands on the gulf of Persia, 95 ms. N. of Lachsa. Lon. 48 38 E. lat. 27 40 N.

KAT-CHERIF.—See HATI-CHERIFF.

Kauffbeuren, free imperial town of Germany, in the circle of Suabia, in the territory of Kempten. It is seated on the Wardech, 18 ms. N. of Kempten, and 30 S. by W. of Augsburg. Lon. 10 43 E., lat. 47 58 N.

Kavenaugh, village, Wilson co., Tenn.

Kaurzim, town of Bohemia, near Prague.

Kaye's Island, island in the N. Pacific ocean discovered by Captain Cook in 1778. Its N. point is a naked rock, considerably elevated above the land within it. Lon. 131 48 W., lat. 51 N.

Kayersberg, town of Fr., now in the dep. Upper Rhine, and late province of Alsace, 9 n. NW. of Colmar, and 25 NW. of Basil. Lon. 23 E., lat. 48 10 N.

Kayserslautern, town of Germany, in the latitude of the Rhine, on the Lauter, 22 ms. SW. of Worms, and 38 S. by W. of Mentz. Lon. 51 E., lat. 49 20 N.

Kaysersstuhl, town of Switzerland, in the circle of Baden, with a bridge over the Rhine and a castle. It belongs to the bishop of Constance, and is 8 ms. SE. of Zurzach. Lon. 8 24 E., lat. 47 8 N.

Kayserved, or *Keisewert*, town of Germany, in the circle of Westphalia, in the duchy of Beuningen, seated on the Rhine, 8 ms. N. of Dusseldo and 22 NW. of Cologne. Lon. 6 45 E., lat. 51 14 N.

Keene, tp., Cheshire co., N. H., 14 ms. E. of Walpole, and 95 W. of Portsmouth. Pop. 1820, 1,645.—Town and seat of justice, Cheshire co., N. H., 14 ms. SE. of Walpole, and W. of Portsmouth. In the neighborhood of Keene extensive manufacturing establishments have been formed. It is a fine thriving village, on Attitash river. Pop. in 1820, 1,895; and in 1830, 2,610.—Town, Essex co., N. Y. Pop. 1830, 605.—Village, Coshoctoncty, O.; by post road 97 ms. NE. from Columbus.

Keene's Mills, post office, Adams co., Pa., 2 ms. SW. from Harrisburg.

Keenville, village of Northampton co., Pa., the road from Easton to the Lehigh Water Course, 2 ms. from Cherryville.

Keesesville, village, Essex co., N. Y., 157 ms. N. from Albany.

Kehl, strong and important fortress of Germany, in Suabia, seated on the Rhine, over which is a bridge at Strasburg. Lon. 7 53 E., lat. 48 34 N.

Kelloggsville, village, Cayuga co., N. Y., between the heads of Owosco and Skeneateles lakes, 30 ms. NNE. from Ithaca.—Village, Ashuta co., O.; by post road 284 ms. NE. from Columbus.

Kellyvale, post office, Orleans co., Vt., 110 ms. by post road from Montpelier.

Kelso, populous town of Scotland, in Roxburghshire, 20 ms. SW. of Berwick, and 338 N. of London. Lon. 2 18 W., lat. 55 36 N.

Kelvin, small river of Scotland, in Lanarkshire, over which the great canal is conveyed by an aqueduct bridge.

Kempen, town of Germany, in the electoral

Cologne, seated on the Niers, 30 ms. NW. of Cologne. Lon. 6 30 E., lat. 51 18 N.

Kempsville, village and seat of justice, Princess Ann co., Va., on the east branch of Elizabeth river, 10 ms. SE. by E. from Norfolk. Lat. 36 45 N., lon. W. C. 11 E.—Village, Princess Ann, Maryland.

Kempen, free imperial town of Suabia, in the territory of the abbot of Kempen, who is a prince of the empire. The inhabitants are Protestants. It is seated on the Iller, 45 ms. S. by W. of Augsburg. Lon. 10 21 E., lat. 47 49 N.

Ken, river of Eng., in Westmoreland, which is a cataract near its mouth that obstructs the navigation; so that Milthorp, situated below this cataract, is the only port of Westmoreland.—River of Scotland, in Kirkcudbrightshire, that flows to New Galloway, below which it expands into a lake, 4 ms. long and 1 broad. The stream that issues from this lake falls into the river Dee, and their united waters meet the Irish sea at Kirkcudbright.

Kendal, corporate town of Eng., in Westmoreland, 46 ms. S. of Carlisle, and 262 NNW. of London. Lon. 2 52 W., lat. 54 15 N.

Kendall, Perry tp., Stark co., O., 7 ms. W. in Canton, and near the eastern side of Tuscarawas river. It contains 106 inhabitants, and an extensive factory for the fabrication of woolen cloths. In this place and its vicinity are kept several very extensive flocks of sheep, of from 100 to 200 in each.

Kenawha, Great, river of Va. It rises in Ash co., N. C., interlocking sources with those of the Yadkin and Watauga, branches of the Tennessee. This lower part of Kenawha is called New river, enters Virginia, and, being enlarged by a number of tributary streams, runs nearly due N. through Grayson, Wythe, and Montgomery cos.; it thence flows to NW., and joins the Greenbrier; thence it continues nearly NW., till it falls into the Ohio at Fort Pleasant. Its whole course is about 400 ms., and its width at the Ohio about 500 yards.

Kenawha, Little, river of Va., rises in Lewis co., and, flowing NW. through Lewis and Wood cos., falls into the Ohio at Parkersburg, 12 ms. below Marietta.

Kenawha, co. of Va., bounded SE. by Fayette, S. by Logan, W. by Cabell, NW. by Mason and Wood, and NE. by Lewis, Braxton, and Nicholas. Length from S. to N. 70 ms., mean breadth 22; area 1,540 sq. ms.; general slope upward. It is intersected by Kenawha and Elk rivers, and drained by their numerous branches. The surface is extremely broken, and part mountainous. Soil generally rocky and sterile, though presenting some remarkable exceptions. Chief town, Charleston. Pop. 1820, 7,000; but since the epoch Fayette co. was formed from it. Pop. 1850, 13,567. Central lat. 38 28 N., lon. W. C. 30 W.

Kenilworth, town of Eng., in Warwickshire, 5 ms. N. of Warwick, and 95 NW. of London.

Kenmare, town of Ireland, 12 ms. SSW. from Killybegs.

Kennebec, river, which rises in the northern part of Me., and falls into the Atlantic ocean between the bays of Casco and Penobscot. The Kennebec river is formed by the union of the Ken-

nebec proper with the Androscoggin, and drains a basin of 150 ms. in length, with a mean width of 80 ms., embracing an area of about 12,000 sq. ms. The tide flows up the Kennebec to Augusta, 45 ms., and in the Androscoggin to near Durham. Though interrupted by falls and shoals, both branches afford very considerable extent of inland navigation. Teconich falls occur in the Kennebec at Waterville, about 20 ms. above Augusta, but the stream is navigated to a considerable distance higher than that obstruction. Timber is the principal staple brought down either branch of the Kennebec.—Co. of Me., bounded by Lincoln SE. and S., Oxford W., Somerset N., Penobscot NE., and Hancock E. Length 47 ms., mean width 22; area 1,000 sq. ms. Surface hilly, but generally arable, and soil productive in grain and pasturage. Chief towns, Hallowell and Augusta. Pop. 1820, 42,623; in 1840, 55,823. Cent. lat. 44 25 N., lon. W. C. 7 30 E.

Kennebunk, river of York co., Me.—Town and port of entry, on the Atlantic ocean, at the mouth of Kennebunk river, 25 ms. SW. from Portland. The port is good, and tonnage exceeding 10,000 tons. Pop. 1820, 2,145; the town and port in 1840, 5,100.—Village, York co., Me., 25 ms. SW. from Portland.

Kennedy's, village, Brunswick co., Va., 75 ms. SSW. from Richmond.

Kennedysville, post office, Steuben co., N. Y.

Kenet, tp., Chester co., Pa., about 30 ms. SW. from Philadelphia, on the waters of Clay creek. Pop. 1840, 1,221.—River of Eng., which rises among the chalky hills in Wilts, and flows to Newbury, in Berks, where it becomes navigable; it is then augmented by the Lamborn, and runs to Reading, below which it mingles with the Thames.

Kennet Square, village, Chester co., Pa., about 30 ms. SW. from Philadelphia.

Kenoque, fort of the kingdom of the Netherlands, 6 ms. from Dixmude.

Kensington, village of Eng., in Middlesex, 2 ms. W. from London. The extensive gardens, of late years, have become a very fashionable walk.—Tp., Rockingham co., N. H., 14 ms. SW. from Portsmouth.—Vill., Chautauque co., N. Y.

Kensington.—See *City of Philadelphia*.

Kent, one of the cos. of Eng., situated at the SE. corner of the island, and from thence enjoying many advantages. As to the climate of this county, it varies according to the situation of places. There is no region more happily or more beautifully diversified in regard to soil, so that every kind thereof is, some where or other, to be met with in its bounds; and in no shire are any of those soils more fertile than they are in this. The Weald yields a variety of fine timber, particularly of chestnut; the middle part has very rich arable land, annually bearing every species of grain in immense plenty, and these excellent in their several sorts. There are also many beautiful orchards, which produce a variety of fine fruits, and more especially apples and cherries, which were introduced here from Flanders. The many rich commodities produced in this co. is the reason why most of our writers have represented it as in a manner void of manufactures, which, however, as appears upon a strict and impartial examination,

is very far from being the case. Of iron works, there were anciently many; and there are still some where kettles, bombs, bullets, cannon, and such like, are made. The principal rivers, besides the Thames, are the Medway, Darent, Stour, Cray, and Rother. Maidstone is the co. town. Pop. 1801, 307,624; in 1811, 373,995; and in 1821, 426,016.

Kent, co. of L. C., commencing opposite Montreal, and extending down the St. Lawrence about 11 ms., and SE to the boundary of Bedford co. — Co. of U. C., comprehends all the country (not being the territory of the Indians) not already included in the several counties herein described, extending northward to the boundary line of Hudson's bay, including all the territory to the westward and southward of the said line, to the utmost extent of the country commonly known by the name of Canada. — Co. of R. I., bounded by Ct. W., Providence co. N., Narraganset bay E., and Washington S. Length 23 ms., mean width 9; area 207 sq. ms. Surface waving, rather than hilly. Soil productive in fruits, grain, and pasturage. Chief town, Warwick. Pop. in 1820, 10,228; and in 1840, 13,100. Central lat. 41 42 N., lon. W. C. 5 26 E. — Town in Litchfield co., Ct., on Housatonic river, about 45 ms. W. from Hartford. Pop. in 1820, 1,956. — Village in the northern part of Putnam co., N. Y., 15 ms. a little S. of E. from Newburg, and 15 NE. from West Point. — Middle co. of Del., bounded by Delaware bay E., Sussex co., Del., S., Md. W., and Newcastle co. N. Length 32 ms., mean width 20; area 640 sq. ms. Surface generally level, and soil of middling quality. Chief town, Dover. Pop. in 1820, 20,793; and in 1840, 19,900. Central lat. 39 5 N., lon. W. C. 1 25 E. — Co. of Md., bounded E. by Del., SE. by Chester river or Queen Ann co., W. and NW. by Chesapeake bay, and N. by Sassafras river or Cecil co. Length 27 ms., mean width 8; area 216 sq. ms. Surface generally level or moderately hilly. Soil of middling quality. Chief town, Chester. Pop. in 1820, 12,453; and in 1840, 10,842. Central lat. 39 16 E., lon. W. C. 1° E. — Island in Chesapeake bay, belonging to Queen Ann co., Md. It contains nearly 30,000 acres.

Kentaiffe, *Mount*, ridge of mountains in the S. part of Thibet, bordering on Hindoostan proper. On the W. side of this ridge are the two heads of the Ganges, and from its E. side issues the Burampooter.

Kentsinguen, town of Suabia, in the Brigaw, on the river Elz. Lon. 7 57 E., lat. 48 18 N.

Kentucky, one of the central States of the U. S., bounded by Va. E., Ten. S., and the Ohio river W., NW. and N.

Miles.

Kentucky has a boundary on Va., commencing at the mouth of Great Sandy river, and following that stream to its source in Cumberland mountains - - -	60
Thence along Cumberland mountains to the SW. angle of Va., on the N. boundary of Ten. - - -	110
Thence by a line a little N. of W., along the N. boundary of Ten., to Tennessee river - - -	238
Up Tennessee river - - -	12

Thence due W. along the N. boundary of Ten., to the left bank of Mississippi river, and extreme SW. angle of Ky. - -

Thence up the Mississippi river to the mouth of Ohio - - -

Up Ohio, along Ill., to the mouth of Wabash and SW. angle of Ia. - - -

Thence up Ohio river, opposite Ia., to the mouth of the Great Miami, and SW. angle of Ohio - - -

Thence up Ohio river, along Ohio to the mouth of Great Sandy - - -

Having an entire outline of Area 37,680 sq. ms. or 24,115,200 acres.

The greatest length of Kentucky is from the SW. angle of the State, on Mississippi river, the head of Great Sandy river, 380 ms.; mean width 99 ms.

Extreme south, N. lat. 36 30; extreme north at the Great Miami bend, 39 5.

It is obvious, by a simple inspection of its features, that Kentucky must present considerable diversity of soil and climate. On its SE. border it is limited by Cumberland mountain, from which most of its streams take their source. Unlike opposite slope of the Ohio valley, no table land, the true meaning of the term, exists on that which Kentucky is placed.

In point of soil, the State is divisible into three portions: the mountainous, hilly, and level. The mountainous section of Ky. is of small and unimportant extent, being limited to the region toward the sources of Cumberland, Kentucky, Licking, and Great Sandy rivers. If all the SE. angle of the State is taken as mountainous, it will not amount to one-fourth the area of the whole. But, though mountains are not very elevated, this part of the State is very broken, and generally sterile soil.

The second, or hilly section, follows the mountainous, and is much more extensive. The hilly natural subdivision spreads over, in fact, much greater part of the State, reaching from the Ohio river, between Great Sandy and Licking rivers to the border of Tennessee, nearly as low down Ohio, below the mouth of Salt river.

From analogy it might be expected that on the left as well as the right slope of Ohio valley table land would be found. This is not, however, the fact; so far otherwise is the face of the hilly part of Kentucky, that in no part of the United States is the earth so broken by abrupt steeps, nor where the watercourses have cut channels so deep in proportion to quantity of water and length of course. In their natural state, before the settlement of the whites, these vales were overgrown with a thick forest, under which grew brakes of the red cedar, and rendered this part of Kentucky the most impenetrable to the footsteps of man of any part of the North American forest yet attempted. On the level bottoms of Louisiana, the large cane brakes are extremely difficult to pass, but it is on unequal ground that this gigantic grass renders human effort to penetrate its recesses to the last degree painful and slow. The cane brakes, however, were the wild animals they once sheltered, disappeared before civilized man. In Kentucky this fact has been realized in a very striking manner. The buffalo, deer, bear, elk, and the arundo gigantea, the

great part vanished, and in their places farms, orchards, meadows, towns, and villages, have arisen. I have more than once remarked the curious circumstance, that in the Ohio valley most of the hills are fertile to their summits. This characteristic is very striking in that part of Kentucky we have under review; it is so peculiarly so that the hills are, in many places, more fertile than the bottoms. The prevailing timber of the hills is chestnut, hickory, poplar, (*liriodendron tulipifera*), sugar maple, elm, and hackberry. In the bottoms the timber is nearly similar, though larger.

As the rivers advance in their progress toward their common recipient, they pursue, through the mountainous and hilly tracts we have noticed, nearly a W. course, but are all less or more inflected to the northward, at a considerable distance before their final discharge into the Ohio. The uniformity of their curves must have arisen from some cause in the surface of the original plain, into whose surface their channels are worn. The river of the right slope of the basin are remarkable for having courses not deviating much from N. to S. Those of the left, in the lower or inferior part of their courses, flow nearly N.

The rivers of Kentucky are more characterized than are even those of Ohio and Indiana by the depth of the vales or ravines they have formed out of secondary strata over whose surface they flow. The substrata of Kentucky is limestone in the farther part, into which the rivers have worn precious channels.

Below the great bend of its rivers the physiognomy of the country changes from sharp, high hills, narrow, deep, and gloomy valleys, to comparative rolling or even level country. Though on a smaller scale than the expansive tracts of fertile soil on the opposing slope, this part of Kentucky is amongst the most desirable in the United States. It is the only part of Kentucky which assumes any of the attributes of a table land. The soil is extremely fertile, but in many places so shallow as scarce to admit the growth of large crops.

Its base is one immense floor of secondary limestone. This region may be said to occupy the central parts of the State, from the waters of Green river to those of Licking, inclusive, and contains the best peopled part of the State. A deficiency of spring water is felt in many parts of this region—a common deficiency of all places where a preponderance of lime prevails, to the exclusion of other minerals. Water is perhaps in equal quantity, but not equally distributed. Springs of immense volume are common, and are followed by wide spaces where none are to be found.

Advancing SW. through Kentucky, the central part of the basin and we have under review gradually becomes more level and less fertile. The natural timber on the NE. part are *liriodendron*, elm, black locust, honey locust, buckeye, papaw, cotton wood, and wild cherry. This forest growth prevails on the middle waters of Licking and Kentucky. Towards the heads of Salt and Green rivers. It is followed towards Tennessee by the "*Barrens*," an extensive tract wooded by oak, chestnut, elm, &c. The Barrens are interspersed by other species of soil, by which the soil, and what is called the oak knob districts. The latter term much more appropriately describes the character of this section of Kentucky

than does barrens. The hills are here round, gently sloping, and deviate in a striking manner from the common ridge form of a hilly country.

The substratum continues to be, as to the NE., flat imbedded limestone.

Approaching towards the Ohio river, the true superstructure of the basin again appears, as we have seen on the opposing slope. The rivers having found their way from the mountains over the hilly and central table land, their channels become deeper. From Great Sandy to its mouth, the aspect of the two opposing banks of the Ohio river are alike, and all the observations made in any general view or particular survey of Ohio, Indiana, and Illinois, applies with equal correctness to Kentucky. A very hilly, broken border, of about 25 or 30 ms. wide, following the inflections of Ohio river, skirts the State from Great Sandy to the mouth of Cumberland river. This border is the buttress of the Kentucky slope, fractured, if such a term can be admitted, by the abrasion of the waters flowing from the interior. Though not obstructed by falls, or even remarkable rapids, the streams of Kentucky flow with great velocity, occasioned by the considerable inclination of their plane of descent. The space between the mountains and Ohio river has a small declivity, but the great depth of the bed of the latter river has given so much pitch to the water that every stream has formed for itself a channel, whose declivity corresponds to the comparative depression between their sources and recipient. The apex of the hills within 3 or 4 ms. from the Ohio river is little, if any, below that of those far in the interior. The humble elevation of the interior hills is in relation to their base; if taken above Ohio river, their height would nearly correspond to those near that stream.

We may therefore, on leaving Ohio river, conceive ourselves rising rapidly to a level with the general surface. We find the waters flowing in enormous chasms, lined by limestone walls of from 100 to 300 or 400 feet deep. These chasms become less profound as we advance towards the mountain sources. Near the Ohio we meet with innumerable gushing springs of water, which, as we ascend the central table land, become more rare. We again find these fountains increase as we proceed on our way to the mountain border.

Over all the wide extent of Kentucky, the only really level surface of note is the bottoms of Ohio. Those bottoms are, in every place where they occur, perfectly similar in structure, and generally uniform in their texture. But the bottoms on the Ohio, in much the greater part, fall backwards toward the hills, at the base of which small ponds and marshes are frequent. But few instances of a regular acclivity from the water edge exist on the Ohio. In this instance this river differs essentially from most streams on the Atlantic slope, and particularly from the St. Lawrence. These ponds, along the base of the Ohio hills, superinduce bilious complaints in autumn. They are, however, easily drained, and the beneficial consequences of such melioration on the face of nature are felt at Louisville and other places, where such works have been executed.

As the bottom lands of Ohio constitute so remarkable a feature in the topography of the United States, and as Kentucky embraces the largest share

of this species of soil, I have reserved to the present to introduce its particular description. The natural position of Ohio river, and the process of its formation, has been amply discussed. It has been shown that that stream, and all its confluent, owe their existence to the wearing away of a primitive plain. It has been also noticed that this process must have been gradual and of very long continuance.

The vale of Ohio, at the city of Pittsburg, is 460 feet deep, and this depth diminishes in proportion to an advance towards the lower termination of the vale, and at the junction of Ohio and Mississippi rivers the water is but little depressed below the level of the adjacent bottoms.

Evidence of the periodical recession of the water is every where seen in the bottoms. In most places there are two, and in some places three, stages of bottoms, elevated above each other 15, 20, or 25 feet. The first, or lowest stage, is yet subject to immersion at the period of very high floods; the second and third have long ceased to be liable to inundation.

Newport and Covington, the former above and the latter below the mouth of Licking river, opposite Cincinnati, are on first bottoms.

Louisville, at the rapids of Ohio, stands on a first bottom more than usually elevated, but falling in the rear into low ponds.

In general the towns along the margin of Ohio, except at the mouth of rivers, are on second bottoms. Below Louisville, the hills are so much declined in elevation as to render that place a point of separation between the bold and rich scenery above and the more humble and less variegated landscapes below that place. It is also a point where the bottoms commence a change from the stair-form we have described, to the flat and monotonous aspect of the shores of the Mississippi. From the apex of the hills on one side, to those on the other, the distance is about 2 ms.; three-fourths of which is occupied by the river and slopes of the hills, leaving about half a mile, or 880 yards, for the breadth of the bottoms. The length of Ohio is 848, or, in round numbers, 850 ms., which, at half a mile wide, would yield 425 sq. ms. of bottom land. This amounts to only 528,200 acres, much less than is commonly believed, though I am well convinced falls little if any short of the real quantity. As to fertility, no description can much exceed reality; this range is no doubt amongst the most productive in the northern temperate zone. Its natural indigenous forest trees indicate a soil of the very highest strength of production. The most prominent species are oaks, elms, ash, and hickory, of every variety; black and white walnut, liriodendron, sugar-maple, linen, cotton-wood, and sycamore, with an underwood of papaw, dogwood, and spice. Every vegetable which the climate will admit can be produced in abundance. We may dismiss the subject at present by observing that, in point of climate, the Ohio itself ranges through three degrees and forty minutes of latitude. The mouth of Big Beaver being in N. lat. 40 40, and the mouth of Ohio N. lat. 37°. Of this climactic expanse, Kentucky embraces two degrees and eight minutes of latitude.

We have now surveyed Kentucky, and have found the features of nature exhibited on its surface

to be in accordance with those of other parts of basin in which it is situated. We have found much more varied physiognomy than that country is commonly allowed to possess. It is a region indeed, which well deserves the attention of philosopher and statesman; it is interesting to former from its peculiar structure and production and to the latter from its commanding position.

The principal productions of Kentucky wheat flour, Indian corn, salted provisions, stock, tobacco, hemp, and salt. Manufactures of various kinds have risen to considerable extent particularly coarse cloths and cordage. The commercial outlet of Kentucky is the Mississippi river.

The subjoined tables, from the census of 1840 exhibit the population of Kentucky.

The interests of education have received considerable attention in this State; the Transylvania is a comparatively recent, but a really respectable institution. According to a report of the professors in this seminary, dated February 11th, 1822, the school of medicine presents "all the means requisite for a complete course of medical education, conducted in the usual academical form.

"The library of the institution is select and valuable, containing, in various languages, the standard and most esteemed works in medicine, both ancient and modern, with no inconsiderable number of the same rank in the several collateral branches of science; the chemical apparatus is, in many respects, not inferior to any in the U. S.; and the anatomical museum, already rich in matter of instruction, will be rendered much more so by additions which it will receive from Europe in the course of the summer. The lecture rooms are also spacious, comfortable, and commodious.

"Courses of lectures are delivered on all the branches of medicine taught in the oldest schools of our country.

"The price of subsistence is unusually moderate, and accommodations excellent; the situation exceedingly healthy; and in intelligence, morality, and refinement, the society not surpassed by that of any other town in the U. S.

"The lectures will commence annually, on the first Monday in November, and terminate early in the month of March.

"To be entitled to present himself a candidate for the degree of Doctor of Medicine, a pupil must be twenty-one years of age, and have attended two full courses of lectures—one of them, at least, in this institution.

"But any physician who shall have practised his profession with reputation for the term of four years

may become a candidate, after attending one full course of lectures in this school."

The building appropriated to the use of the Transylvania University was burned on the night of May 9th, 1829. About half the books and all the philosophical apparatus were saved Insurance \$10,000.

The charter of a second university, to be located at Danville, was granted by the Legislature in 1819.

Kentucky, river, rises in Floyd co., in the spurs of Cumberland mountain, interlocking with the sources of Licking and Big Sandy, and opposite to those of Tennessee. The general course of Kentucky river is NW., and by comparative courses 200 ms., through or bordering on Floyd, Perry, Estill, Clarke, Madison, Fayette, Jessamine, Garrard, Mercer, Woodford, Franklin, Shelby, Owen, Henry, and Gallatin cos. It enters Ohio at Point William, and in times of flood is navigable by the windings of the stream about 150 ms.

Keratea, village of Greece, in Attica, SE. from Athens about 15 ms. It is inhabited by Albanians, and contains about 250 houses, situated near, though not on the Saronic gulf, and at the foot of a range of mountains called Parne. From a hill behind Keratea Mr. Hobhouse obtained a "commanding prospect, including the southern extremity of the Negropont, Macronosi, or Long island, near the eastern coast, as far as Sunium, and several islands to the S. of that promontory. The two ranges of Hymethus were distinctly seen."

Mr. Hobhouse, upon what authority he does not state, gives the name of Keratea to the spurs of Cithæron N. from Eleusis.

Kerbela, ancient Vologesia, town of Irak Arabia, on the W. bank of the Euphrates, about 50 ms. SW. from Bagdad. Kerbela is also the Meshed Hosein, "*Tomb of Hosein*," the grandson of Mohammed, who was there killed in battle; hence, by the Sheah branch of Islamism, regarded sacred. It is situated on or near the great desert, and a few ms. SW. of the Euphrates.—See *Meshed Ali*, *Meshed Hosein*, and *Meshed*.

Kercolang, island in the Indian ocean, between 80 and 100 ms. in circumference. Lon. 126 31 E., lat. 4 28 N.

Keresoun, ancient Cerasus, town of Asiatic Turkey, on the Black sea, 70 ms. WSW. from Trebisonde.

Kergulen's Land, island in the Southern ocean, visited by Captain Cook in 1779. Lon. 69 37 E., lat. 49 3 S.

Kirkessiah, ancient Circessium, town of ancient Mesopotamia and modern Asiatic Turkey, situated on the eastern bank of the Euphrates, at and below the mouth of the river Khaboor, ancient Chaboras, about 300 ms. NE. by E. of Damascus, and very nearly an equal distance SE. by E. of Scanderoon. This place was remarkable, as being the utmost bounds of the Roman empire on the eastern side of the Euphrates, though on the western side the Roman eagles hovered many ages 100 ms. still lower, at Anatho. The immense extent of Roman power may be in part estimated from the fact that, by any road, it was nearly 1,000 ms. from Anatho to Constantinople.

Kerman, province of Persia, ancient Caramania, lying on the Gulf of Persia. The inhabitants drive a great trade in their wool.—Town of

Persia, capital of a province of the same name called also Caramania. It is 120 ms. NNW. Gambroon. Lon. 55 15 E., lat. 29 20 N.

Kernesville, village, Northampton co., Pa., ms. NW. by W. from Easton.

Kerpen, town of Germany, in the circle Westphalia, in the duchy of Juliers, 14 ms. S. of Juliers. Lon. 6 56 E., lat. 50° N.

Kerry, co. of Ireland, in the province of Munster, 57 ms. long and 45 broad, bounded on E. by the cos. of Limerick and Cork, on the by the Atlantic ocean, on the N. by the Shann which separates it from Thomond, and on the by Desmond and the ocean. It is a mountain country, but in many places are good corn-fields. It contains 84 parishes. Ardferit is the capital.

Kershaw, district of S. C., bounded by S. C. and part of Richland SE., part of Richland SW., Fairfield W., Lancaster NW. and Chesterfield NE., and Darlington E. Lon. 33, mean width 24 ms., area about 800 sq. Surface pleasantly diversified by hill and dale. Soil productive. Chief town, Camden. This district was not returned or reported in the cen. of 1820; we cannot, therefore, show the progress of population in the 20 years preceding 1820 when it was 12,481.

Kerton Pira, river, branch of the Amur, rises in central Asia, in the country of the Kalkas, lat. 49°, lon. 110° E., flows NE. 600 ms., uniting with the Argoun, forms the Amur.

Kertsch, fortress of great importance, which with Jenikale, commands the passage which forms the communication between the sea of Asoph and the Black sea. It is situated on the E. coast of the Crimea, near the N. entrance of the straits Caffra, 12 ms. from Jenikale.

Kesroan, chain of mountains on the coast of Syria, of which Mount Libanus makes a part.

Kessel, town of Prussian Guelderland, with handsome castle, seated on the Maese, between Ruremond and Venlo. Lon. 5 49 E., lat. 15 30 North.

Kesseldorf, village of Germany, in the circle Upper Saxony, 3 ms. below Dresden, remarkable for a victory gained by the King of Prussia over the Saxons, in 1745.

Kesteven, one of the three grand divisions of Lincolnshire, Eng. It contains the W. part of the co., from the middle to the S. extremity.

Keswick, town of Eng., in Cumberland, in a vale surrounded by hills, near the rapid river Greta; near this vale the finest black lead in the world is dug up. It is 25 ms. NW. of Kendal, and NNW. of London. Lon. 3 15 W., lat. 58 30 North.

Keswick, Vale of, Eng., in the S. part of Cumberland. Here is the Lake of Derwent-water. To the N. of this is the lofty mountain of Skiddaw, one of the most distinguished in Eng., and to the S. is the dreary region of Burrowdale.—See *Irrowdale*, *Derwent-water*, and *Skiddaw*.

Ketcham's Corner, post office, Saratoga co., N. Y., 15 ms. N. from Albany.

Kettering, town of Eng., in Northamptonshire, 12 ms. NE. of Northampton, and 75 NW. of London. Lon. 0 59 E., lat. 52 20 N.

Kew, village of Eng., in Surry, 7 ms. W. of S. of London, on the Thames, over which a

bridge of 7 arches to Brentford. Kew gardens are open to the public every Monday, from summer to the end of autumn.

Keweenaw Point, projects far into the S. side of Superior. It is thus distinguished and described by Mr. Schoolcraft: "It has sometimes been confounded, by geographers and travellers, with Point Chegoimegon, which is 130 ms. further W. In coasting round this point, it is estimated to be 90 ms., but canoes shorten the voyage ascending the Portage river, which nearly separates the point from the main shore, and makes the passage of less than a mile into the lake W. from the point. To the E. of this point there is a large bay 12 ms. wide by 20 in length, called Keweenaw, which it is necessary to cross in order to reach the Portage river."—See *Portage river*.

Kholm, town of the Russian Government of Ingria, on two islands of the Lake Ladoga, 60 N. E. of Wiburgh, and 67 N. of Petersburg. 30 25 E., lat. 61 3 N.

Lynton, town in Somersetshire, on the N. W. of Exeter, 5 ms. SE. of Bristol, and 119 W. of London. 2 34 W., lat. 51 24 N.

Lyonsville, village, Charlotte co., Va., on the waters of Meheim river, 70 ms. SW. from Lynchburg.

Key West, small island in the Gulf of Mexico, remarkable as being the most southern settlement in the U. S. It is used as a naval station. Lat. 24 33 N., lon. W. C. 4 38 W.

The following observations and data were extracted from a more detailed communication from J. S. Waterhouse, dated Key West, November 2, 1831, and addressed to Messrs. Gales & Seaton, and published in the National Intelligencer:

KEY WEST, *Flor.*, Nov. 22, 1831.

MESSRS. GALES & SEATON: Immediately after the acquisition of this island became an integral part of the United States, the General Government were sensible of the great importance of this place in a national point of view. It is not only a frontier station, but the key of entrance into the Gulf of Mexico, and commands the communication with the East and West." In its proximity to the West India Islands, and to the South American States, the depth and excellence of its harbor, and the certainty with which the entrance can be commanded, are unequalled by any other place in this southern

part of the world. A large space of ground, formerly covered with dense growth of bushes, weeds, and tall grass, through which the sun's rays never penetrated, and under which the earth's surface never dried, has been cleared, laid out into streets and squares, and occupied by substantial, safe, and airy build-

ings. The circumstance, interesting as a pathological case, deserves mention. The Florida Keys, including this island, are, without an exception, composed of carbonate of lime. The reef itself composed wholly of that substance, and the waters of the sea are saturated with this compound. Medicines will bear me out in the assertion, that an island thus based, and so surrounded, can never, under ordinary contingents, produce pestilential

epidemics. We have now resided constantly in Key West

three years and a quarter, commencing 23d of August, 1828. The extremes of temperature on Fahrenheit's scale have been from 90° (July 11 and August 5, 1830) down to 50°, (on the morning of January 18, 1831,) though the common annual range does not exceed 33°. At no time has the alteration in temperature been otherwise than gradual.

The extremes of atmospheric pressure (ascertained by Adie's sympicrometer) have been from 29.01 inches to 30.28. The rarest state (29.01) occurred 24th September, 1830, during the usual autumnal equinoctial gale. The greatest pressure takes place in the coldest days of winter—often to 30 inches and upwards. But sudden alternations (as indicated by this extremely delicate instrument) seldom exceed 14-100 of an inch.

During the time specified above, the total of deaths in this town and harbor has been 86.

Reckoning the number of inhabitants on this island (including U. S. troops) at 300—deaths of residents in the last 3¼ years, 46—gives the average number of deaths per year, 15—average 5 per cent.

The people and the Government are alike interested in being made acquainted with the truth.

H. S. WATERHOUSE, M. D.

KHAN, a primitive title in the central and northern languages of Asia, evidently the root of the German *konig*, and English *king*. In Tartary, or in central Asia, where the term originated, it is only applied to independent sovereigns, though in Persia it has received a more extended signification, and is applied to commanders in chief of armies and governors or viceroys of provinces; but even there the original power of the word is preserved, as it applies only to those in the highest secondary stations.—See art. *King*.

KHIRGHAKS, conical moveable huts, the temporary residences of the nomadic nations of central Asia. To call a people Khirguses is to call them people of the huts.

Khorasin, country of Asia, along the E. side of the Caspian. It corresponds in part with ancient Hyrcania, or rather the western part of Scythia Intra Imaum.—See *Asia*, p. 86.

Khorkof, government of the Russian empire, formerly comprised in the government of Ukraina-Slovodskaja. Its capital of the same name is seated on the Uda, which falls into the Donetz.

Khosistan.—See *Chusistan*.

Khojund, city of Bucharia, on the Sihon or Jaxartes river, 120 ms. NE. from Samarcand.

Khyber Passes, in Cabul. From Peshawar to Jellalabad is 90 ms. through the Khyber Passes and along the road, which, winding among the hills and on the precipitous banks of the Cabul river, makes the distance much greater than in a direct line. The Khyber Passes (lat. 34 30) are elevated 3,000 feet above the level of the ocean, are 12 ms. in length, and extremely narrow in some places.—*Henry Wheaton*.

Kia-king-fou, city of China, in the province of Tche-kiang, remarkable for nothing but its streets, ornamented by beautiful piazzas, that shelter passengers from the sun and rain. Seven cities of the third class are dependent upon it.

Kiachta, *Kiakta*, town of Asiatic Russia, in the government of Irkoutsk, and on the Selenga

river. It is a point of contact between the Russians and Chinese; the site and environs are barren, mountainous, and deficient in water. The chief pop. are Russian merchants. Lat. 50 30 N. lon. 107 E., and about 200 ms. from Irkoutsk.

Kiang-nan, province of China, bounded on the W. by Honan and Houquang, on the S. by Tche-kiang and Kiang-si, on the E. by the Gulf of Nanking, and on the N. by Chang-tong. It is full of lakes, rivers, and canals; and their silks, japanned goods, ink, and paper, bring higher prices than those of the other provinces. Nanking is the capital.

Kiang-si, province of China, bounded on the N. by Kiang-nan, on the W. by Houquang, on the S. by Quang-tong, and on the E. by Fokien and Tche-kiang. Nan-tchang-fou is the capital.

Kiburg, town of Switzerland, in the canton of Zurich, with a castle. It is seated on the river Theof, 14 ms. NE. of the town of Zurich. Lon. 8 46 E., lat. 47 28 N.

Kidderminster, corporate town of Eng., in Worcestershire, under a hill, on the river Stour, and is the principal manufacturing place in the co., and it was particularly noted for a woollen manufacture called Kidderminster stuffs. Its former trade of stuffs is much declined, on account of the general use of cotton goods; but its carpet manufacture has greatly increased. It is 14 ms. SE. of Bridgenorth, and 125 NW. of London. Lon. 2 18 W., lat. 52 28 N.

Kidwelly, town in Carmarthenshire, in South Wales. It is seated on a creek of the Bristol channel, near the mouth of the Towy. From this town, a canal has been cut to some collieries, whence coal is brought down and exported. It is 8 ms. S. of Carmarthen, and 224 W. by N. of London. Lon. 4 20 W., lat. 50 44 N.

Kiel, strong and considerable town of Germany, in the circle of Lower Saxony, capital of Holstein, with a castle and a university. It stands on a peninsula, in a bay of the Baltic, and has a commodious harbor for ships of the largest size. A canal was begun in 1777, by which the navigation of the Northern sea is to be united with the Baltic, and crosses Holstein by the canal of Kiel and the river Eyder, which passes by Rendsburg, and falls into the German ocean at Tonningen, by which Kiel has become one of the most commercial places in Holstein. Kiel is 37 ms. NW. of Lubec, and 46 N. by E. of Hamburg. Lon. 10° E., lat. 54 20 N.—See *Holstein*. See article *Navigation, Inland*.

Kiema, promontory of Switzerland, on the W. shore of Lake Zug, of which it is remarkable that the ground belongs to the canton of Lucern, the timber to that of Zug, and the leaves to that of Schwytz.

Kien-ning-fou, city of China, in the province of Fokien. At the time of the conquest of China by the Manshurs, it sustained two sieges, and after some time it was taken, and all the inhabitants were put to the sword. Having been since re-established, it is ranked among cities of the first class, and has eight cities of the third class under its jurisdiction. It is 260 ms. SE. of Nang-king.

Kiarnow, town of Lithuania, seated on the Villa, where the duke resides. Lon. 35 21 E., lat. 54 50 N.

Kilbarchan, village of Scotland, in Renfrewshire. It is a manufacturing place, and has extensive bleaching grounds. It is 5 ms. SW. Renfrew.

Kilbeggan, borough of Ireland, in West Meath, seated on the Bosna, and is 44 ms. W. Dublin.

Kilburn, village of Eng., in Middlesex, in vicinity of London, famous for a fine well of mineral water.

Kilda, *St.*, small island of Scotland, one of the Hebrides, 18 leagues to the W. of North 1. A great number of the poor people in this isle live chiefly by fishing and catching wild fowl. St. Kilda is the most westerly island of Great Britain.

Kildare, co. of Ireland, in the province of Leinster, 37 ms. long and 20 broad, bounded on the E. by Dublin and Wicklow, on the W. by Kerry, and Queen's co., on the N. by E. Meath, and on the S. by Catherlough. It is a fertile county, contains 100 parishes, and sends ten members to Parliament.—Town of Ireland, capital of the same name, with a bishop's see. 27 ms. SW. of Dublin. Lon. 6 37 W., lat. 53 9 N.

Kildrumny, town of Scotland, in Aberdeenshire, seated on the Don. Lon. 2 35 W., lat. 56 20 N.

Kilgarren, town of Wales, in Pembrokeshire, on the river Tyvy; near it is a remarkable salt leap, where the fish are caught in great abundance. Above this place are large works for fabricating plates. It is 30 ms. N. of Pembroke, and 40 WNW. of London. Lon. 4 40 W., lat. 52 40 N.

Kilham, town of Eng., in the East Riding of Yorkshire, on the Moulds, and is 36 ms. NE. of York, and 200 N. of London. Lon. 16° W., lat. 54 5 N.

Kilia, fortified town of Turkey, in Europe, in the province of Bessarabia, seated in an island at the mouth of the Danube. It is 86 ms. SW. of Bialogrod, and 290 NE. of Constantinople. Lon. 28 46 E., lat. 45 22 N.

Kilkenny, co. of Ireland, in the province of Leinster, 40 ms. long and 20 broad, bounded on the E. by Catherlough and Wexford, on the N. by Tipperary, on the S. by Queen's co., and on the S. by Waterford. It is one of the most healthy, pleasant, and populous cos. in Ireland, contains 96 parishes, and sends 16 members to Parliament.—Town of Ireland, capital of a county of the same name. It is one of the most populous and commercial towns of Ireland, and consists of the Irish and English town, the last of which is the principal. It once had a bishop, and the cathedral is yet standing. It is 26 ms. N. of Waterford, and 54 SW. of Dublin. Lon. 6 55 W., lat. 52 36 N.—Tp., Leinster co., L. C. 50 ms. NW. from Montreal.—Tp., Coos co., N. H., 8 ms. NE. from Lancaster.—Village, Lawrence co., N. Y.

Killala, seaport of Ireland, in the co. of Mayo, and province of Connaught, with a bishop's see. It is 21 ms. N. of Castlebar. Lon. 9 11 W., lat. 54 15 E.

Killaloe, city of Ireland, in the co. of Clare, and province of Munster, with a bishop's see, seated on the Shannon, over which is a bridge.

ches. Here is a considerable salmon and eel fishery. It is 10 ms. NNE. of Limerick. Lon. 2 W., lat. 52 50 N.

Llarnay, town of Ireland, in the co. of Kerry, province of Munster, on the side of a lake of the same name. Within half a mile of this place are the ruins of the cathedral of Aghadoe, an archbishopric united to Ardferit. It is 143 ms. W. of Dublin.—Beautiful lake of Ireland, in the co. of Kerry, otherwise called Lough Lean, its shores being surrounded by high mountains. It is divided into three parts, called the Lower, Middle and Upper Lake. The Northern or Lower is 6 ms. in length, and from three to four in breadth. The Upper Lake is four ms. in length, and from two to three in breadth. It is almost surrounded by mountains, from which descend a series of beautiful cascades. The islands in this lake are numerous, and afford an amazing variety of picturesque views. The centre lake, which communicates with the upper, is small in comparison with the other two, and cannot boast of equal beauty; but the shores are in many places indented with beautiful bays, surrounded by dark groves of trees. In the several mountains adjacent to the lake are still to be seen vestiges of mines of iron, lead and copper.

Llavan, town of Ireland, and province of Ulster, in the co. of Monaghan, 8 ms. SW. of Monaghan. Lon. 7 26 W., lat. 54 10 N.

Llicrankie, noted pass in Perthshire, near the mouth of the Tummel with the Garry. It is the entrance into the highlands in those parts, and is formed by the lofty mountains impending over the Garry, which rushes through in a deep, rapid, and rocky channel, overhung with precipitous rocks. At present, a fine road gives an easy access to the remote highlands, and the two sides are separated by a fine arch.

Llileagh, borough of Ireland, in the co. of Down, seated on an arm of Strangford Lough, where ships may be sheltered from all winds. The celebrated Sir Hans Sloane was born in this town, and it is 80 ms. N. by E. of Dublin.

Llinaule, town of Ireland, in the co. of Tipperary, and province of Connaught, 14 ms. N. of Tipperary. Lon. 7 26 W., lat. 52 27 N.

Llingly, town, Windham co., Ct. Pop. in 1820, 2,512; in 1820, 2,803. It is situated between the Quinaboag river and R. I., in the NE. corner of the State.—Centre post office, Windham. It is in Killingly tp.

Llington Peak, mountain of Vt., 10 ms. E. of Rutland. It is upwards of 4,000 feet above the level of the Atlantic ocean.

Llingleworth, town, Middlesex co., Ct., on the N. of Island Sound, 20 ms. SW. of New London, and about 25 ms. NE. of New Haven.

Llony, town of Ireland, in the co. of Sligo, 8 ms. S. of Sligo. Lon. 8 25 W., lat. 54 11 N.

Llough, or *Port St. Ann*, seaport of Ireland, in the co. of Down, and province of Ulster, situated on the N. of St. John's point, in the Irish coast, and has a good quay where ships lie very safe. It is a manufacture of salt. It is 76 ms. N. of Dublin.

Llybegs, borough of Ireland, in the co. of Down, with a spacious harbor on the N. side of

Donegal bay. It is 12 ms. NW. of Ballyshannon. Lon. 8 6 W., lat. 54 40 N.

Kilmac-Thomas, town of Ireland, in the co. of Waterford, and province of Munster, 12 ms. SE. of Waterford. Lon. 7 10 W., lat. 52 14 N.

Kilmainham, town of Ireland, situated about half a mile from Dublin. It has a session-house and a jail; and here the quarter sessions are held for the co. of Dublin, and the knights for the shire are elected.

Kilmallock, borough of Ireland, in the co. of Limerick. Lon. 8 34 W., 51 24 N.

Kilmarnock, populous town of Scotland, in Ayrshire, with a manufactory of gloves, carpets, stockings, nightcaps, bonnets, and other woollen goods. It is 15 ms. SW. of Glasgow.—Village, Lancaster co., Va., 10 ms. SE. from Lancaster, C. H., and by post road 115 ms. NE. by E. from Richmond.

Kilmore, town of Ireland, in the co. of Cavan, and province of Ulster, with a bishop's see, 3 ms. SW. of Cavan. Lon. 7 11 W., lat. 54 2 N.

Kiltearn, town of Ross-shire, in Scotland, remarkable for being the burial place of Donald Monro, who gave Buchanan the account of the islands and highlands of Scotland, which he has inserted in his history.

Kilworth, thriving town of Ireland, in the co. of Cork, and province of Munster, at the foot of Kilworth mountains. Below the town runs the river Funcheon, on which stands the castle of Cloughleagh, which has stood seven sieges. Kilworth is 108 ms. SW. of Dublin.

Kimberton, village, Chester co., Pa.

Kimble, post office, Lawrence co., Ohio, by post road 120 ms. a little E. of S. from Columbus.

Kimbleville, post office, Chester co., Pa.

Kimbolton, town of Eng., in Huntingdonshire, 8 ms. NW. of St. Noet's, and 64 N. by W. of London. Lon. 18' W., lat. 52 15 N.

Kimi, town of Sweden, capital of a province of the same name, in E. Bothnia, seated on a river of the same name, where it falls into the gulf of Bothnia, 10 ms. SE. of Tornea.

Kimi Lapmark, province of Swedish Lapland, situated on the frontiers of Russian Lapland.

Kimski, town of Tartary, in Russia, where there is a great number of martens and sables.

Kim, town of Persia, 320 ms. E. of Ispahan.

Kimburn, fortress of the Russian empire, situated at the mouth of the Dneiper, opposite Oczakow.

Kincannon Works, post office, Surry co., N. C., by post road 139 ms. NW. by W. from Raleigh.

Kincardine O'Neal, village of Scotland, in Aberdeenshire, seated on the river Dee, 23 ms. W. of Aberdeen.

Kincardineshire, or *Mearns*, co. of Scotland, bounded on the N. and NW. by Aberdeenshire, on the E. by the German ocean, and on the S. by Angusshire. Its length along the coast is 30 ms., its greatest breadth 20. The only borough in it is Inverhervie.

Kinderhook, creek of Columbia and Rensselaer cos., N. Y. It composed of 2 branches. The S. branch rises near the SE. angle of Columbia co., the N. branch near the SE. angle of Rensselaer co., and each flowing about 25 ms., unite about 2 ms. from the Hudson river, into which

the united stream falls, 5 ms. N. from the city of Hudson.—Town, Columbia co., N. Y., on the E. side of Hudson river, 10 ms. N. of the city of Hudson, and 20 S. of Albany. Pop. in 1820, 3,963.

Kinderhook Landing, village, Kinderhook tp., Columbia co., N. Y., 3 ms. S. from Kinderhook.

Kineton, town of Eng., in Warwickshire. It is 10 ms. SSE. of Warwick, and 88 NW. of London. Lon. 1 24 W. lat. 52 11 N.

KING, Anglo-Saxon *Cyning*; Islandic *Konungr*, Turkish, and other languages of Central Asia, *Khan*, or *Khagan*, a hero, leader, or supreme ruler. It is probably one of the most primitive titles now preserved by man. The origin of this title was no doubt literally "Collector," a leader uniting many into one political body. As little doubt can be entertained but what the title of "mighty hunter," given to Nimrod, is an erroneous translation, and ought to be expressed by some term designating a leader who united scattered tribes into what we would now call "a kingdom." The preposition *con*, found in all the Teutonic, Slavonic, and Turkish languages, has one general meaning. "unite many into one." *Radja* in Sanscrit, *reg* in the Albanian, *ras* in Abyssinian, *rex* in Celtic, *regin* in Islandic, *roi* in French, *rey* in Spanish, &c., are taken as synonymous with king, though the idea the two lists of terms convey is essentially distinct—the latter having the meaning of "chief," or principal, a person standing forth and distinguished from others.

King George's Sound, name given by Captain Cook, in 1778, to the harbor which he discovered on the W. coast of Quadra and Vancouver's Island. Lon. 126 48 W. from London, 49 48 W. from W. C., and lat. 49 33 N. But the natives call it Nootka.—See *Nootka Sound* and *Island*.

King and Queen, co., Va., bounded by Mattaponi river, or King William SW., Caroline NW., Essex and Middlesex NE., and Gloucester SE; length 40 ms., mean width 10, area 400 sq. ms.; surface waving rather than hilly, soil of middling quality. Chief town, Dunkirk. Pop. in 1820, 11,798; and in 1840, 10,862. Ctl. lat. 37 46 N., and on the meridian of W. C.

King and Queen, C. H., King and Queen co., Va., 54 ms. NE. by E. from Richmond.

King-an fou, city of China, in the province of Kiang-si, seated on the banks of a river in a very fertile canton, abounding with gold and silver.

King Creek, village, Barnwell district, S. C.

Kingfield, village, Somerset co., Maine, 119 ms. N. from Portland.

King George, co., Va., bounded by the Rappa hannock river or Caroline co. S., Stafford W., Potomac river N., and Westmoreland E.; length 16 ms., mean width 10, area 160 sq. ms; surface hilly, and soil of a middling quality. Chief town, Hampstead. Pop. in 1820, 6,116; and in 1840, 5,927. Ctl. lat. 38 20 N., lon. W. C. 10 W.—C. H. and post office, King George co., Va., about 75 ms. NNE. from Richmond. Lat. 38 14 N., lon. W. C. 4' W.

King George the Third's Islands, group on the W. coast of America, extending from lat. 56 10 to 58 18 N.

Kinghorn, seaport of Scotland, in Fifeshire, 460

on the Frith of Forth, 9 ms. N. of Leith, on opposite side of the Frith. Lon. 3 W., lat. 5 N.

King's, co. of Ireland, in the province of Ulster, which is 38 ms. long, and 30 broad, bounded on the N. by Westmeath, on the E. by Kildare the S. by Queen's co. and Tipperary, and on the W. by the Shannon, which divides it from common, Galway, and another part of Tipperary. It contains 56 parishes, and sends 6 members to Parliament. It is not so rich as some of the counties, nor is it so well inhabited. The capital, Phillipstown.

Kings, co. of New Brunswick, on both sides of St. John's river, bounded by Charlotte co. by St. John S., and by Westmoreland and Cumberland W.—Co. of N. Y., comprising the western extremity of Long Island, bounded by the Atlantic ocean, W. by the Narrows, York harbor, and E. river, NE. by Queen's co. and E. by Jamaica or Rockaway bay; length 150 ms., mean width 6, area about 50 sq. ms.; surface most delightfully variegated, and under complete cultivation, presenting a very pleasing aspect. The soil in its natural state was sterile, sandy and rocky, but by manure has been rendered generally highly productive in grain, fruits, and garden vegetables. Chief towns, Brooklyn and Flatbush. Pop. in 1820, including Brooklyn, 11,187; and in 1840, 47,613. Ctl. lat. 40 38 N., lon. W. C. 3 W.

Kingsborough, village, Montgomery co., N. Y., 50 ms. NW. from Albany.

Kingsbridge, town of Eng., in Devonshire, is seated at the head of a small inlet of the English channel, 34 ms. S. by W. of Exeter, and 218 WSW. of London. Lon. 3 48 W., lat. 50 20 N.—Crossing place over Harlem river strait, on the road from New York up Harlem river.

Kingsbury, village of Eng., in Herts, the N. of St. Alban's. Here the Saxon kings had a palace.—Town, Washington co., N. Y., situated on the E. side of Hudson river, between Fort George and Argyle tp., and 90 ms. N. of Albany. Pop. in 1810, 2,272; in 1820, 2,272; and in 1840, 2,773.

Kingsclear, town of Eng., in Hampshire, it was the residence of some of the Saxon kings, and is 9 ms. NW. of Basingstoke, and 56 W. S. of London. Lon. 1 9 W., lat. 51 20 N.—C. H. and post office, New Brunswick.

Kingsessing, SE. tp., Philadelphia co., Pa., between Blockly tp., Schuylkill river, Delaware river and Darby creek.

Kingssey, tp., Buckingham co., L. C., on the N. of Francis and the W. branch of Nicolet rivers, about 40 ms. S. by E. from Three rivers.

King's Ferry, post office, Cayuga co., N. Y.—Post office, Monongalia co., Va., 25 ms. N. of land above Morgantown, and 3 below the mouth of Monongahela river.

King's Langly, village of Eng., in Hertfordshire, 5 ms. W. of St. Albans.

Kings, mountain in Lincoln co., N. C., about 20 ms. a little S. of W. from Charlotte, and 35 SE. of E. from Rutherfordton. This mountain was rendered remarkable by a battle fought there on October 7th, 1780, between a party of U. S. militia and of British and Tories. The latter

ated with the loss of Col. Ferguson, their commander, and nearly the whole either killed or prisoners.

Kingsport, post office, Sullivan co., Tenn., by road 255 ms. NE. by E. from Murfreesborough.

Kingsstein, strong fortress of Norway.—See *Alericstadt*.

Kingsston, town, Rockingham co., N. H., 19 SW. of Portsmouth.—Town, Plymouth Mass., on a small bay, near Cape Cod, at the distance of 37 ms. SE. of Boston.—Tp., Addison Vt., 25 ms. SW. from Montpelier.—Town, Ulster co., N. Y., lying on the W. side of Hudson river, 32 ms. S. of the city of Hudson, which was burnt by the British forces in 1777, because at that time one of General Washington's printing-magazines.—Village of Middlesex co., N. H. on Millstone river, and on the road from New Brunswick to Trenton, 15 ms. SW. from the former place.—Village, Luzerne co., Pa., built on a street, opposite Wilkesbarre.—See *Wyoming*.

—Tp., Luzerne co., Pa., around and including the preceding village of the same name.—Village, Talbot county, Md., on the right bank of Patuxent river, 5 ms. NE. from Easton.—Village, Somerset co., Md., 5 ms. N. from the mouth of the Comoke river.—Tp., Delaware co., Ohio, at the headwaters of Alum and Big Walnut rivers, and immediately N. of Sunbury.—Small town situated on the line, but within the co. of Ohio, 10 ms. N. from Chillicothe.—Village and seat of justice, Roane co., Tenn., on the line between Clinch and Holston rivers, 60 ms. S. of Water, and 40 by land below Knoxville.—Village, Morgan co., Georgia, 33 ms. NNW. from Milledgeville.—Town of Jamaica, on the edge of the bay of Port Royal, about a mile in length and a half a mile in breadth. It is a place of good trade. Lon. W. C. 8° E., lat. 17 56 N.

Population about 33,000, of which about 10,000 only are whites.

Kingsston, U. C., occupies the site of old Fort Mifflin, at the head of St. Lawrence river, opposite Wolf Island. This town was laid out in 1757, and is now the most populous in the province. Its situation as an entrepot between Lower Canada, and between Canada and the United States, is very advantageous. The harbor is excellent, and admits vessels of the largest size.

It contains a Protestant and Catholic church, a school-house, jail, hospital, and about 400 dwellings, with 2,000 inhabitants. Distant 35 miles by road NW. from Sackett's Harbor, N. Y. Lon. W. C. 20° E., lat. 44 8 N.

Kingsston-upon-Hull.—See *Hull*.

Kingsston-upon-Thames, a corporate town of England, in Surry. Queen Elizabeth founded here a school; and the Lent assizes are constantly held at this place. The wooden bridge over the Thames is the most ancient on that river, except the London bridge. It is 11 miles SW. of London. Lon. 12° W., lat. 51 27 N.

King-te-ching, town of China, in the province of Szechuan, and district of Jaocheou-fou.

King tree, village, Williamsburg district, S. C., on the Black river, about 65 ms. N. from Charleston.

Kingsville, town, Ashtabula co., O., on Lake Erie, 10 ms. NE. from Jefferson.

King William, county, Virginia, between Mattaponi and Pamunkey rivers, and extends eastward to where those rivers unite, and form York river, and bounded NW. by Caroline county; length 40 miles, mean width 12, area 480 sq. miles. Surface moderately hilly, and soil generally thin, and in part sandy. Pop. in 1820, 9,697; and in 1840, 9,258. Central lat. 37 40 N., lon. W. C. 5° W. —C. H., post office, and seat of justice, King William co., Va., 35 ms. NE. from Richmond—about half way between Mattaponi and Pamunkey rivers.

Kingwood, tp., Hunterdon county, N. J., on the E. side of the Delaware, between Amwell and Flemington.—Village, Preston co., Va., near Cheat river, 20 ms. SE. from Morgantown.

Kiniesnick, village, Lewis county, Ky., by post road NNE. from Frankfort.

Kinross, borough of Scot., in Kinross-shire, on a plain near Loch Leven, screened on the N. by the Ochil Hills. Its manufactures are linen and some cutlery ware; and it is 20 miles N. of Edinburgh. Lon. 3 22 W., lat. 56 15 N.

Kinross-shire, co. of Scot., between the shires of Perth and Fife, and 30 miles in circuit, and its length and breadth nearly equal. It sends one member to Parliament, alternately with the county of Clackmannan. Pop. in 1801, 6,725; in 1811, 7,245; and in 1820, 7,762.

Kinsale, seaport and borough of Ireland, in the county of Cork, and province of Munster. It is a very populous trading place, and has an excellent harbor, 14 ms. S. of Cork. Lon. 8 26 W., lat. 51 41 N.—Village, Westmoreland co., Va., situated on the SW. side of the river Potomac, near the Chesapeake bay.

Kinsman, NE. town of Trumbull co., Ohio.

Kinston, town, Lenoir co.; North Carolina, on the left bank of Neuse river, 40 miles by water above Newbern.

Kintail, peninsula in Ross-shire, situated between Loch Garron and Loch Duich.

Kin-tcheou-fou, city of China, in the province of Hau-quang. Its district contains two cities of the second and eleven of the third class.

Kin-tching, capital of the islands of Licou-kieou, in the China sea, in Cheonli, the S. part of the island. Lon. 146 30 E., lat. 26 2 N.

Kintore, borough of Scotland, in Aberdeenshire, 10 miles W. by N. of Aberdeen. Lon. 2 5 W., lat. 57 8 N.

Kinzua, village, Warren co., Pa., by post road 352 ms. NW. from Harrisburg.

Kiof, town of Polish Russia, and capital of the Ukraine, in a palatinate of the same name, with an archbishop's see and a castle. It is the capital of the Russian government of Kiof, and carries on a considerable trade. It is divided into the Old and New Town, and seated on the W. side of the Dnieper, 180 ms. NE. of Kaminiack, and 335 E. by S. of Warsaw. Lon. 31 51 E., lat. 50 30 N.

Kirk's Mills, post office, Lancaster co., Pa.

Kiof, or *Kiow*, government of the Russian empire, being part of the Ukraine, or Little Russia. It lies on the E. side of the Dnieper, although Kiof, the capital, is on the W. side. This country was conquered by the Tartars, and came again into the possession of the great dukes, but was overrun and possessed by the Cossacks under the pro-

tection of Poland. In 1654, the natives, discontented with John Cassimir, king of Poland, submitted to Russia, and have ever since remained subject to the empire. This government contains 11 districts; and its principal rivers are the Dnieper, Desna, Oster, Udai, Sula, Psol, and Trubesh.

Kiof, or *Kiow*, palatinate of Poland, in that part of the Ukraine which lies on the W. side of the Dnieper. It contains only two districts, and several small towns scarcely worthy of notice; its capital, Kiof, being subject to Russia.

Kio-fou, city of China, in the province of Chang-tong, and district of Yencheou-fou. It is celebrated as the birthplace of Confucius; several monuments are still to be seen here, erected in honor of this eminent man.

Kioge, or *Koge*, seaport of Denmark, in the isle of Zealand, with a good harbor, 10 ms. S. of Copenhagen. Lon. 12 40 E., lat. 59 31 N.

Kioping, town of Sweden, in Wermeland, seated on a small stream that falls at a little distance into the Lake Maelcr. Lon. 16 40 E., lat. 59 38 N.

Kioumzeik, well-built town of Pegu, situated on the river Irrawaddy. It seems to be in a state of improvement, and has a manufacture of cotton cloth, which is the source of its prosperity.

Kirby-Lonsdale, town of Eng., in Westmoreland. It is a large town, with a manufactory of woolen cloth, seated on the Lon, over which is a stone bridge, 10 ms. SE. of Kendal, and 253 NW. of London. Lon. 2 57 W., lat. 54 3 N.

Kirby-Moorside, town of Eng., in the North Riding of Yorkshire. It is seated on the edge of the moors, near the river Dow, 25 miles N. of York, and 225 N. by W. of London. Lon. 1 3 W., lat. 54 20 N.

Kirby-Stephen, town of England, in Westmoreland, near the skirts of the hills which separate this county from Yorkshire, and has a manufactory of stockings. It is seated on the river Eden, and is 9 miles S. of Appleby, and 281 NNW. of London. Lon. 2 30 W., lat. 54 26 N.

Kirchberg, town of Germany, in the circle of Suabia, capital of a territory of the same name, subject to the house of Austria. It is seated on the Danube, 9 ms. S. of Ulm. Lon. 10 12 E., lat. 48 16 N. — Territory of Germany, in the circle of Suabia, belonging to the house of Austria.

Kirchheim, town of Germany, in the circle of Suabia, 25 ms. from Ulm.

Kirchheim Poland, town of Germany, in the circle of Upper Rhine. Lon. 7 49 E., lat. 49 39 N.

Kirguis.—See *Asia*, p. 86.

Kirin, one of the three departments of Mandshuria, bounded on the N. by the river Saghalien, on the E. by the sea, and on the S. by Corea, and on the W. by Leatong. It contains only two or three ill-built cities, surrounded by mud walls. The valuable plant ginseng grows here. — Capital of the province of the same name in Mandshuria, situated on the river Songari, which is here called Kirin; is the residence of a Mantchew general, who is invested with the authority of a viceroy.

Kirkises, *Tartar*, or *Tater*, nation of central Asia. They are divided into three hordes or clans: the Little, Middle, and Great Horde. This widely-extended people inhabit the Asiatic steppes or prairies. According to Mr. Tooke, they derive their

name from Kirghis-Kaisaki, and are a branch of the Kozaks. In their manners they are past and extend from the Volga far to the E. of Aral sea.—See *Asia*, p. 86.

Kirkcaldy, seaport of Scotland, in Fifeshire the Frith of Forth, with a dock yard for small vessels and a cotton manufacture. It is a pretty-ulous, large, well-built town, 10 miles N. of Edinburgh. Lon. 3 8 W., lat. 56 8 N.

Kirkcudbright, seaport of Scotland, in Kirkbrightshire, at the mouth of the river Dee, forms its harbor. It is a small inconsiderable port admirably situated for the fishery and other branches of commerce. It is 60 miles W. of Carlisle, 83 SW. of Edinburgh. Lon. 4 8 W., lat. 55 50 N.

Kirkcubrightshire, co. or stewardry of Scotland which once formed, with Wigtonshire, the province of Galloway. It is bounded on the N. by Ayrshire and Dumfriesshire, on the S. by W. Frith, and the Irish sea, and on the W. by Wigtonshire and Ayrshire. Its extent from N. to S. is 30 ms., and from E. to W. 45 ms. Pop. 1801, 29,211; in 1811, 33,683; and in 1838, 966.

Kirkless, village of Eng., in the West Riding of Yorkshire, in the vicinity of which is the monument of the famous Robin Hood; and on the adjacent moor are likewise two hills called Robin Hood's Butts.

Kirkoswald, town of Eng., in Cumberland, a hill near the river Eden, 9 miles N. by W. of Penrith, and 292 NW. of London. Lon. 2 57 W., lat. 54 48 N.

Kirk's Mills, village, Lancaster co., Pa.

Kirkpatrick, tp. of Scotland, in Dumfriesshire, lying E. of Dumbarton, said to be the birthplace of the tutelary saint of Ireland. The vestiges of the Roman wall, called Graham's, built by Antoninus, extend from the Frith of Forth to this place to the Frith of Forth.

Kirksey's Cross Roads, post office, Edgefield, S. C., 65 ms. westerly from Raleigh.

Kirkville, village, Onondago co., N. Y.

Kirksville, village, Mecklenberg co., N. C., 10 ms. SW. from Raleigh.

Kirkwall, borough of Scotland, capital of Orkney, the principal of the Orkney islands. It is built on an inlet of the sea on the east side of the island, and has a tolerable harbor, with a fortification, on which some guns are mounted for its defence. The most striking object is the stately cathedral of St. Magnus. It is 30 ms. NE. of Thurso, in Caithness-shire. Lon. 2 57 W., lat. 54 50 N.

Kirkwood, tp., Belmont county, Ohio. Pop. 1820, 1,404.

Kirton, town of Eng., in Lincolnshire, 20 miles N. of Lincoln, and 151 N. by W. of London. Lon. 2 8' W., lat. 53 33 N.

Kiskiminitas, a very considerable stream of the Alleghany river, Penn., rises in the mountain valley between the Alleghany and Cheatnut Ridge chains, and, flowing NW., passes through Chestnut Ridge and Laurel Hill, &c., after a comparative course of 75 ms., unites with the Alleghany near midway between the mouth of Mahoning and Pittsburg.

Kiskiminitas, village, Westmoreland co., Pa.

Kismish, island of Asia, at the entrance of the

of Persia, about 50 miles in length, and 5 in breadth, with a remarkable pearl fishery. It is fertile, populous, and 12 ms. S. of Gambroon.

Kishlac, island on the Pacific coast of America, 100 miles long, and about 30 mean width. Lon. N. C. 75° W., central lat. 57 30 N.

Kisti, Asiatic nation, which extends from the highest ridge of Caucasus along the Sundsha rivulet; they are bounded to the W. by the Little Corda, to the E. by the Tartars and Lesguis, and to the S. by the Lesguis and Georgians.

Kite's Mills, post office, Rockingham co., Va., on the main road 149 ms. NW. from Richmond.

Kistna, river of Hindoostan, which falls into the Bay of Bengal, S. of Masulipatam. It is upwards of 650 ms. in length, rising near the Malabar coast.

Kistnageri, town and strong-fortress of Hindoostan, in Mysore, 66 ms. from Arcot.

Kittanning, village and seat of justice, Armstrong co., Pa., on the E. side of Alleghany river, 15 ms. NE. of Pittsburg. Lat. 40 30 N.—Tp., Armstrong co., Pa., including the preceding town, had 1,000 in 1820, 976, exclusive of the village.

Kittatinny Mountains, this range passes through Sussex co., N. J., crosses Delaware river at the Delaware Water Gap, passes through Northampton co., Pa., and, continuing SW., crosses Susquehanna river 5 miles above Harrisburg; separates Perry from Cumberland, and Franklin from Loudoun and Bedford counties, and merges into the Potomac W. from Conecocheague creek, crosses Potomac river between Back creek and Shenendoah Gap. It is finally merged amongst the other mountain ridges of Virginia.

Kittatinny valley is the valley between the Kittatinny range and Blue Ridge. In Pa., this valley is from 8 to 15 ms. wide, and is uniformly composed of a limestone base towards the Blue Ridge, and of clay slate on the side of Kittatinny Mountain. The line of separation between those rock formations crosses Delaware river about 10 ms. above Easton; the Lehigh at the slates about 5 ms. above Allentown; the Schuylkill above the mouth of Maiden creek; the Susquehanna in the neighbourhood of Harrisburg; and the Potomac near the mouth of the Conecocheague. In Va., the line of division nearly corresponds with Opequan Gap, between Jefferson and Berkeley cos. It is a common but very erroneous opinion that the whole of this valley is based on limestone; that rock is, however, confined to the SE. side.

Kittery, town in York co., Me., at the mouth of the scataway river, opposite Portsmouth.

Ki-tcheou-fou, capital of the island of Hainan, stands on a promontory, and ships often anchor at the bottom of its walls. Its district contains three cities of the second and ten of the third rank.

Kutaiah, ancient *Cotyæum*. Lon. 29 52 E., 19 25 N. It is situated on the W. side of the Taurus, ancient Sangarius river, 150 ms. SSE. of Constantinople. Pop. about 50,000.

Kizil Ermack, ancient *Halys*, largest river of Asia Minor, rises in Mount Taurus, within 70 ms. of the Mediterranean sea. Its general course is very N. about 400 ms., to where it falls into the Black sea, near the ancient Naustathmus promontory.

Kislar, or *Kisliar*, considerable town of Asiatic Russia, on the Terek, near its entrance into the Caspian sea. Lat. 43 51 N.

Klattaw, town of Bohemia, 46 ms. SW. of Prague. Lon. 14 6 E., lat. 50 30 N.

Kletenberg, town of Switzerland, seated on the river Aar, 3 ms. from Waldschut. The bishop of Constance exercises the spiritual jurisdiction, but the sovereignty belongs to the cantons. Lon. 8 12 E., lat. 47 35 N.

Klingiestown, village in Schuylkill co., Pa.

Khundert, strong fortress of the kingdom of the Netherlands, in Holland, near the arm of the sea called Hollands Diep. It is 9 ms. SE. of Williamstadt.

Knapdale, mountainous district of Scotland, in Argyleshire, adjoining to Argyle proper, and connected on the S. by a narrow neck of land to the peninsula of Cantyre.

Knaresborough, town of Eng., in the N. Riding of Yorkshire. It is delightfully seated on the river Nid, famous for its medicinal springs, on a rugged rock. Knaresborough is 18 ms. W. by N. of York, and 211 N. by W. of London. Lon. 1 26 W., lat. 54 5 N.

КНИГЪТ originally signified a boy attendant, and subsequently applied to a youth admitted to bear arms, and, finally, a title of distinction conferred by various ceremonies, all, or most of them, however, having relation to the military profession.

Knighton, commercial town of Wales, in Radnorshire, on the Tend, over which there is a bridge, and is 14 ms. W. of Hereford, and 135 NW. of London. Lon. 2 46 W., lat. 52 13 N.

Knightsbridge, Eng., first village from London on the Great Western road. Here is an infirmary for the sick and wounded, called St. George's Hospital, and a considerable manufacture of painted floor cloths.

Knittelfeldt, town of Germany, in the duchy of Styria. It is a small place, 78 ms. from Vienna, seated on the river Muehr. Lon. 14 57 E., lat. 47 29 N.

Knotsford, town of Eng., in Cheshire. There are two towns of this name pretty near together, called the Higher and Lower. It is 7 ms. NE. of Norwich, and 173 NNW. of London. Lon. 2 28 W., lat. 53 20 N.

Knowlton, tp. in Sussex co., N. J., on Delaware river, below the mouth of Pauling's Kill, and about 5 ms. below the Delaware Water Gap.

Knox, tp. in Hancock co., Me., 28 ms. NW. from Castine. Pop. in 1820, 560.—Village in Albany co., N. Y., 21 ms. W. from Albany.—Co. of Ohio, bounded by Richland N., Coshocton E., Licking S., Delaware W., and Marion NW.; length 30, breadth 20 ms.; area 600 sq. ms. It is watered by Owl and Mohiccon creeks. Surface rather level than hilly. Chief town, Mount Vernon. Pop. in 1820, 8,326; and in 1840, 5,722. For central lat. see *Mount Vernon*.—Co. of Ky., bounded SE. by Harlan, SW. by Whitley, NW. by Rockcastle, and NE. by Clay; length 43, mean width 19½ ms.; area 840 sq. ms. This county is watered by Cumberland river and several of its branches. The 37th degree of N. lat. intersects it nearly in the centre. The surface is very hilly in general, and towards the SE. mountainous. Chief town, Barbourville, is about 125

ms. SSE. from Frankfort. Pop. in 1820, 3,661; and in 1840, 29,579. Central lat. 37° 0' N., lon. W. C. 63° 0' W. —Co. of E. Ten., bounded by Sevier SE., Blount S., Roane W., Anderson NW., and Grainger and Jefferson NE.; length 30, mean width 15 ms.; area 450 sq. ms. Holston and Clinch rivers unite at Knoxville, near the centre of this county, and, with the united stream below their junction, afford much excellent land. Chief town, Knoxville. Pop. in 1820, 13,034; and in 1840, 15,485. N. lat. 36°, and lon. W. C. 7° W. intersect in this county. —Tp. in Columbiana co., O. —NE. tp. of Jefferson co., Ohio. —Co. of Ia., between White and Wabash rivers, bounded by Kaskaskia, or Pike and Gibson cos. S., Wabash river W., Sullivan N., and Daviess E.; length 36, mean width 11 ms.; area about 410 sq. ins. Surface level towards the Wabash, but becoming hilly in the interior. Soil generally fertile. Chief town, Vincennes. Pop. in 1820, 5,437. For central lat., see *Vincennes*.

Knoxville, town and seat of justice for Knox co., Ten., on the right bank of Holston river, 22 ms. above its junction with Tennessee, about 200 ms. E. from Nashville. Lat. 35° 50' N. Pop. upwards of 2,000. It is the seat of an academy. A very liberal donation was made by the General Government in favor of the formation of a college at this place. —Village in Jefferson co., Ohio, 12 ms. NW. from Steubenville. —Village in Crawford co., Ga.

Koang-jin-fou, city of China, in the province of Kiang-si, surrounded by high mountains. Its district contains 7 cities of the third class.

Kobi, called by the Chinese *Chamo*, a vast desert of Chinese Tartary, 100 leagues from E. to W., and almost as much from N. to S.

Kodiack, extensive group of islands on the Pacific coast of North America, between lat. 56° 45' and 58° 28' N., lon. W. C. from 74° 15' to 76° 48' W.

Koei-tcheou, one of the smallest provinces in China, bounded on the S. by Quang-si, on the E. by Hou-quang, on the N. by Se-tchuen, and on the W. by Yun-nan. The whole country is almost a desert, and covered with almost inaccessible mountains; it may be justly called the Siberia of China. This province produces the best horses in China. Beside Koei-yang, the capital, it contains 9 cities of the first, and 38 of the second and third classes.

Koei-tcheou-fou, city of great trade, in the province of Se-tchuen. Its district contains 1 city of the second class, and 9 of the third.

Koei-Yang, capital of the province of Koei-tcheou, in China, said to have been formerly the residence of the ancient kings.

Kokenhausen, strong town of Lithuania, subject to Russia. It is seated on the river Dwina, and is 42 ms. E. of Riga. Lon. 26° 3' E., lat. 56° 40' N.

Kola, town of the Russian Government of Archangel, capital of Russian Lapland, with a good harbor on the river Kola, near a bay of the same name, on the Frozen ocean. Lon. 32° 26' E., lat. 68° 34' N.

Kollomenska, town of Russia, pleasantly situated on an eminence near Moscow. Lon. 38° 16' E., lat. 55° 40' N.

Kolokythia, ancient *Gythium*, 25 ms. S. from Misitra. Lon. 22° 34' E., lat. 36° 47' N.

Kolokythia, or *Cololokythia*, ancient *Gytha*, Laconia, a large bay of Greece, in the Morea, closed between two peninsulas, one on the N. terminated by Cape Metapan, that on the E. by Cape St. Angelo. *Kolokythia* is, except the bay of Gibraltar, the most southern bay of continental Europe, extending as far S. as N. lat. 36° 23'.

Kolyrna, or *Rovyma*, large river of Asia, rising N. from the sea of Ochotsk, and running nearly parallel to the Indigherka, falls into the Frozen ocean. Lat. 71° 25' N., lon. 152° 24' E.

Kolyvan, government of the Russian empire, comprehending a part of western Siberia, and formerly included in the Government of Tobolsk. Its capital, of the same name, is seated on the *Tura*. This country has very productive silver mines, which have been called the Potosi of Russia. It lies between the Oby and Irtysh, near the mountains which form the frontiers of Siberia, and a large part of that country from Chinese Tartary.

Kongal, town of Norway, belonging to Sweden, seated on the river Godelba. Lon. 11° 5' E., lat. 58° 30' N.

Kongsberg, town of southern Norway, celebrated for its silver mines. It lies on both sides of the river Lowe, and contains, including the mines, 6,000 inhabitants. *Kongsberg* is 45 ms. SW. of Christiania. Lon. 9° 50' E., lat. 59° 40' N.

Kongswinger, fortress of Norway, on the frontiers of Sweden. It is seated near the river Glora, at the foot of a steep rock.

Kong-tchang-fou, city of China, in the province of Chen-si. It is surrounded by high mountains, where a tomb is seen which the Chinese pretend to be that of Fohi. Its district contains 3 cities of the second, and 7 of the third class. It is 700 ms. SW. of Peking.

Koningsberg, town of Franconia, belonging to Prussia, the house of Saxe-Weimar, three ms. NE. of Schweinfurt. Lon. 10° 44' E., lat. 52° 5' N.

Konigsberg, town of Upper Saxony, in the marquisate of Brandenburg, 47 ms. S. of Stettin. Lon. 14° 45' E., lat. 52° 50' N. —Capital of Polish or Prussia, with a university and a magnificent library, in which is a hall 274 feet long, and 27 feet broad, without pillars to support it, and a handsome library. The town house, the exchange, and the cathedral, are fine structures. The tower of the castle is very high, and has 284 steps to the top, whence there is an extensive prospect.

Here are 18 churches, of which 14 belong to Lutherans, 3 to the Calvinists, and 1 to the Roman Catholics. The town is 5 ms. in circumference, and including the garrison of 7,000 men contains 60,000 inhabitants. It stands on the Pregel, which here falls into the Frische Haf, an inlet of the Baltic. No ships drawing more than 7 feet water can pass the bar, and come up to the town; so that the large vessels anchor at Pillau, a small town on the Baltic, which is the port of *Konigsberg*; and the merchandise is sent in smaller vessels to this place. The trade of *Konigsberg* is very considerable. It is 62 ms. N. of Elbing, and 135 N. of Warsaw. Lon. 20° 45' E., lat. 54° 42' N.

Koningsgratz, town of Bohemia, seated on the Elbe, 35 ms. SW. of Glatz, and 115 N. by the Danube of Vienna. Lon. 16° 8' E., lat. 50° 6' N.

Koningshofen, strong town of Franconia, w

shop's see, 25 ms. NNW. of Bamberg. Lon. 16 E., lat. 50 24 N.

Öttingstein, town of Germany, in the circle of the Saxony, in the territory of Misnia, with an impregnable fort. It is a place of confinement for the prisoners, and is seated on the Elbe, 10 ms. E. of Pyrna, and 10 SW. of Dresden. Lon. 13 E., lat. 51 2 N.—Town of Germany, in the territory of the Lower Rhine, which is strongly fortified. Lon. 8 25 W., lat. 50 5 N.

Öttingslutter, town of Germany, seated in the territory of Brunswick-Wolfenbuttle. Lon. 11 7 E., lat. 52 25 N.

Ölmitz, town of Poland, in Western Prussia, 18 ms. NW. of Culm, and 50 SW. of Dantzic. Lon. 18 16 E., lat. 53 36 N.

Örds.—See *Asia*, p. 82.

Öschan, or *Cochoon*, frontier town and fortress in Persia, in Khorasan, standing near midway between Mern and Astrabad, and about 200 ms. E. of each, and 450 ms. NE. by E. from Teheran. *Öpys*, fortified town of Lithuania, seated on the Dnieper, 18 ms. N. of Mohilet. Lon. 31 2 E., lat. 54 32 N.

Ördofan.—See *Africa*, p. 9, 2d col.

Öriacs, people of Tartary, subject to Russia, inhabit the northern coast of the Gulf of Pensinkoi, and the most northern part of Kamtschatka to the river Anadir. Their country extends toward the river Olomon, (which runs into the Kolyma,) as far as the Indian ocean. Their neighbors are the Kamtschadales, the Tongusians, the Kamouts, and the Tschouktsches.

Öran, Arabic, "to read," adopted as the name, by pre-eminence, of the Mahometan scriptures. Similar to other Asiatic names ending in "it" is pronounced "Korawn." Al Koran is "The Koran."

Örsaw, or *Kosoa*, town of Denmark, in the island of Zealand, with a fort, 45 ms. W. by S. of Copenhagen. Lon. 11 10 E., lat. 55 29 N.

Örtright, town, Delaware co., N. Y., 10 ms. W. of Delhi. Pop. 1820, 2,548.

Örsol, or *Kosta*, fortified town of Silesia, near the river Oder, 17 ms. N. of Ratisbon. Lon. 17 1 E., lat. 50 26 N.

Örsun, or *Korsun*, town of Russia, in the Ukraine, seated on the river Ross. Lon. 31 23 E., lat. 49 3 N.

Östroma, government of the Russian empire, formerly included in that of Moscow. It is divided into the provinces of Kustroma and Unsha. The capital of the former, Kostoma, seated at the mouth of the Volga; the capital of the second is Kostomari, situated on the Unsha.

Ötobu, civil emperor of Japan, who possesses and exercises the whole sovereign power, though the title of Dairi, or Hierarch, is surrounded by the emperor, but deprived since A. D. 1585 of all authority, even that nominally appertaining to his empty station.

Öwei-te-fou, city of China, in the province of Szechuan, seated between two large rivers. The inhabitants treat strangers with uncommon hospitality.

Ökum-Kale, village of A. T., in Anatolia, situated on Cape Janissary, a little within the Hellespont. This place has its name from a castle built by the Turks, and is inhabited chiefly by

Turkish families attached to the garrison. It is a clean neat village, containing about 600 inhabitants. N. lat. 40 1 E., lon. 26 12. The reedy marsh forming the mouth of the Mendere river spreads above Koum-Kale. The Mendere enters the Hellespont about one mile above the village.

Koutaih.—See art. *Asia*, p. 83, 2d col.

Kowno, town of Lithuania, seated on the Wilna and Niemen, 40 ms. W. of Wilna. Lon. 24 12 E., lat. 54 56 N.

Kraanenberg, town of the duchy of Cleves, seated on the declivity of a hill between Nimeguen and Cleves.

Krainburg, town of Bavaria, seated on the Inn, 35 ms. E. of Munich.—Town of Germany, in the duchy of Carniola, seated on the Save, 18 ms. NW. of Laubach.

Krainowitz, town of Upper Silesia, between Ratibor and Troppaw. Lon. 17 49 E., lat. 50 7 N.

Krainslaw, town of Poland, in the province of Red Russia, and palatinate of Chelm, 120 ms. SE. of Warsaw. Lon. 23° E., lat. 51 15 N.

Krapitz, town of Silesia, in the duchy of Oppelim. Lon. 18 10 E., lat. 50 59 N.

Krasnoïarsk, or *Krasnoyarsk*, town of Asiatic Russia, in the government of Tomsk, on the Abakan, a branch of the Yenisey river. Here, according to M. Chappe D'Aueroche, quicksilver frequently congeals by the frost in winter. Lon. 109° E., lat. 62 30 N.

Kreiderville, village, Northampton co., Pa., 10 ms. W. from Bethlehem.

Kregojeratz, lat. 43 44, lon. 20 54 E. of London, town of European Turkey, in Servia, about 80 ms. nearly due S. of Belgrade. It stands on a branch of the Morava river.

Krekith, corporate town of Wales, in Carnarvonshire. It is seated on the Irish sea, near Traeth-Amawar Bay, 13 ms. S. by E. of Carnarvon, and 237 NW. of London. Lon. 4 18 W., lat. 52 57 N.

Krempen, strong town of Denmark, in Holstein, with a castle. It is 5 ms. N. of Gluckstadt, and 30 NW. of Hamburg. Lon. 9 15 E., lat. 53 58 N.

Kremes, town of Austria, seated on the Danube, 35 ms. W. of Vienna. Lon. 15 40 E., lat. 48 18 N.

Krenzenach, town of the Lower Rhine, on the Nahe, 20 ms. SW. of Mentz.

Krumlaw, town of Germany, in Moravia, 50 ms. SW. of Olmutz. Lon. 16 49 E., lat. 48 46 N.

Krutzow, town of Lithuania, 30 ms. SW. of Mozcillaw. Lon. 32 4 E., lat. 54 8 N.

Krylow, strong town of Poland, in the palatinate of Kiof, seated on the Dnieper, 140 ms. SE. of Kiof. Lon. 33 50 E., lat. 48 50 N.

Kubesha, large strong town of Lesghistan, near the western shore of the Caspian sea, situated on a hill between high mountains. Its inhabitants call themselves Franki, (Franks, a name common in the E. to call Europeans,) and relate that their ancestors were brought hither by some accident, the particulars of which are now forgotten. The common conjecture is, that they were mariners cast away upon the coast; but they who pretend to be better versed in their history tell the story

this way: The Greeks and Genoese, say they, carried on, during several centuries, a considerable trade, not only on the Black sea, but likewise on the Caspian, and were certainly acquainted with the mines contained in these mountains, from which they drew, by their trade with the inhabitants, great quantities of silver, copper, and other metals. In order to work these upon the spot, they sent hither a number of workmen to establish manufactures and instruct the inhabitants. The Kooveshes, or Kubeshes, seem to be the most respectable people found between Persia and Russia. They are the merchants and brokers between these countries. In the year 1725, their magistrates, as well as the Usmeri, acknowledged the sovereignty of Russia, but without paying any tribute. Lon. 47 59 E., lat. 42 30 N.

Kudach, strong fort of Poland, in the Ukraine, seated on the river Dneiper. Lon. 35 45 E., lat. 47 58 N.

Kufstein, strong town of Germany, in the Tyrol. It is seated on the Inn, 46 ms. S. by E. of Munich. Lon. 12 5 E., lat. 47 26 N.

Kumaon, district of Indostan, between the Alcananda and Kallee rivers. It is traversed by N. lat. 30°, and lon. from London 80° E. The peak of Rhamnee, one of those of Himalaya, in Kumaon, rises to 22,200 feet, 800 ms. N.W. of Calcutta.

Kunachir.—See *Jeso*.

Kur, ancient Cyrus, river of Persia, which rises in Mount Caucasus, and, passing by Tefflis, falls into the Caspian sea. It is formed by two large branches, the Aras and Kur proper. The Aras and Kur are each about 400 ms. in comparative length, and unite 70 or 80 ms. from their influx into the Caspian. The Kur is completely a mountain stream, with a basin of 350 by 200 ms., and area 70,000 sq. ms., between N. lat. 37 and 43°.

Kurab, town of Asia, in Persia, 2 ms. from the Caspian sea. Lon. 50 15 E., lat. 37 36 N.

Kurchee, town of Asia, in Bokhara, about 100 ms. SE. from the capital. It is a straggling town, a mile long, and has 10,000 inhabitants, situated on a fertile oasis, abounding in grain and fruit. It is, next to Bokhara, the largest town in the kingdom.

Kurgan, river of Asia, which rises in the province of Korasan, and falls into the Caspian sea.

Kurds.—See *Asia*, p. 81 and 82.

Kuriles, chain of islands, extending from lat. 45 to 51° N., running from the southern promontory of Kamtschatka to Japan, in a SW. direction. The inhabitants of the neighborhood of Lopatka, who were themselves called Kuriles, gave these islands the same name, as soon as they became acquainted with them. Spanbug says they are 22 in number, exclusive of the very small ones.

Kursk, government of the Russian empire, formerly part of that of Bielgorod. Its capital, of the same name, is seated on the Tukor, which falls into the Seine or Sem.

Kusma Damianski, town of the Russian empire, in Tartary, 32 ms. NE. of Vasigolorod from the river Volga. Lon. 51 30 E., lat. 56 2 N.

Kusistan, province of Persia, bounded on the N. and E. by Irac-Agemi, on the S. by Farsistan, and on the W. by Irac-Arabia. Suster is the capital.

Kutchuk Minder.—See *Meinder*.

Kuttenburg, town of Bohemia, seated near mountain, remarkable for its silver mines, 35 SE. of Prague. Lon. 15 37 E., lat. 49 56 N.

Kultore, country of Asia, which contains a great number of towns and villages, and is exceedingly populous. Its principal towns are Tonkul Jourkul; those being the residence of its rulers. It abounds in fruits, such as grapes, apples, plum &c. It likewise yields rice, wheat, and other grain.

Kuynder, fortress of the kingdom of the Netherlands, 23 ms. S. of Lewarden. Lon. 5 24 lat. 52 50 N.

Kylburg, town of Germany, in the electoral Treves, seated on the Kyll, 16 ms. NW. of Treves. Lon. 6 37 E., lat. 50 1 N.

Kymeton, town of Eng., in Herefordshire, a good trade in narrow cloth. It is 15 ms. N. of Hereford, and 149 WNW. of London. Lon. 1 2 50 W., lat. 52 12 N.—Village of Eng. Somersetshire, NE. of Somerton. It is natural, for half a mile, with one smooth rock which looks like ice.

L.

Laa, Laab, or Lahab, town of Austria, seated on the Teya, 27 ms. NW. of Vienna. Lon. 16 48 E., lat. 48 48 N.

Labadia, strong town of Italy, in Polesina, near Rovigo, subject to the Venetians. It is seated on the Adige, 20 ms. NW. of Ferrara. Lon. 11 45 E., lat. 45 39 N.

Labar's, post office, Pike co., Pa.

Labia, town of Turkey in Europe, in Servia, 30 ms. SW. of Nissa.

Labiaw, town of Western Prussia, at the mouth of the Deime, near the Curischhaff, with a strong castle, 30 ms. NE. of Koningsberg. Lon. 21 57 E., lat. 54 57 N.

Labourd, late territory of Fr., part of the Basques. It abounds in fruits, and the inhabitants are said to be the first that went to fish for whale. It is now included in the department of the Landes Pyrenees.

LABYRINTH, from Gr. *laburinthos*, place filled with innumerable rooms, alleys, and doors, very much winding, and when in, very difficult of issue.

Lacau Sable.—See *Lake Sable*.

Laccadives, an archipelago of small islands lying SW. of the Malabar coast.

Lac Des Deux Montagnes, seigniory, York Co., L. C., on the left bank of Ottawa river, 25 ms. from Montreal.

Lachawahanock mountain is a continuation of the Shawnee range of Wyoming mountains. It, near the Susquehanna river, is very high and steep, but becomes lower as it extends northwardly. It terminates in Susquehanna co., where it is called the *Moose Mountain*, and a part of *Mount Ararat*.—Valley, extends from the mouth of Lachawahanock creek, up the same, about 100 ms. The soil is of second quality, the land even, forming no level plain of any considerable extent. This, next to Wyoming valley, is the most populous in Luzerne co.

Lachenaye, seigniory, Leinster co., L. C., on the St. John channel, 13 ms. N. from Montreal.

Lachevrotiere, seigniory, Hampshire co., L.

the left bank of St. Lawrence river, 38 ms. W. from Quebec.

Lachine, village of Montreal island, 7 ms. above city of Montreal, L. C. From the interposition of the rapids of St. Louis, Lachine is the upper part of Montreal. A navigable canal, however, now unites the two ports above and below city.

Lackawaxen, river of Pa., a branch of Delaware, Pike co.—Tp., Pike co., Pa., on the waters of Delaware river and Lackawaxen creek, 60 ms. from Easton.

Lac Metasiediach, seigniory, Cornwallis county, Quebec Canada.

Lac Metis, seigniory, Cornwallis co., L. C.

Laconia, now Maina, or Mistra, the southeast part of the Morea, in Greece. The Mainotes, present inhabitants, are a barbarous, rude, and brutish race, though brave, hardy, and indolent. They are a Slavonic colony, and not descendants of the ancient Lacedemonians, according to Chateaubriand.—See *Maina*.

Laconia, village, Harrison co., Ia., 120 ms. S. from Indianapolis.

LACUTRAL, appertaining to a lake. This term has been recently much used in geological works.

Lac Dantre, seigniory, Warwick co., L. C., on the left bank of St. Lawrence river, a short distance above the mouth of Richelieu river.

Ladoga, the largest lake in Europe. It lies between the Gulf of Finland and Lake Onega, receiving, by the river Svir, the discharge of the Volga, and is itself discharged, by the river Neva, into the Gulf of Finland. At the town of Kosken, Lake Ladoga receives the united waters of numerous intricate rivers and lakes of Carelia; and at a Ladoga, near its southern extremity, enters the Volkoj, a fine river flowing from Kinen. The Ladoga is united to the waters of the Volga by a canal, between the sources of the Mista, falling into the Gulf of Ilmen and the Tver, entering the Volga at Ladoga.

Ladoga, New, town of Russia, on Lake Ladoga, at the mouth of the Volkoj river, 56 ms. E. from Petersburg.

Ladogna, or *Lacedogna*, town of Naples, in Campania, with a bishop's see, 60 ms. E. of Naples. Lon. 15 46 E., lat. 41 1 N.

Ladrone, or *Marianne*, islands of the N. Pacific Ocean. They are 11 in number, exclusive of the smaller islets and rocks, and lie in about 140° E. longitude and between 11 and 28° N. lat. They were discovered by Magellan, in 1521. Beside the other things natural to the soil and climate, here is the bread-fruit tree in abundance. The names of the principal islands are Saypan, Tinian, Guam, and Saipan.

Lady Washington, post office, Montgomery county, Pa.

Lafargeville, village, Jefferson co., N. Y., by the road 174 ms. NW. from Albany.

Lafayette, Madison co., O., village formerly called Lawrenceville, on the national road, 21½ ms. west of Columbus, and 5 ms. NE. of London, the co. seat.—Parish, La. Pop. in 1840, 1,100. Vermillion is the capital.

Lafayette, cos.—See the general census summaries in the articles on the respective States, where the name occurs.

Lafourche, river of La., one of the mouths of the Mississippi river. It leaves the main stream a few miles above Donaldsonville, by a mouth of about 80 yards. Though receiving no tributary waters by its banks, in all its length the Lafourche gradually increases in width and depth, and, flowing SE. by S. about 90 ms., falls into the Gulf of Mexico between the island of Timballier and the Saut or Jump passage. Vessels drawing 9 feet water can enter this river, and ascend to the settlements 40 ms. inland.

Lafourche Interior, parish of Louisiana, bounded by the Gulf of Mexico S., Atchafalaya bay and St. Mary's parish W., parish of Assumption NW., St. Charles and St. Bernard NE., and Orleans E. Length 60 ms., breadth 50; area about 3,000 sq. ms. Surface a uniform level. Soil only arable near the watercourses, as the other parts are liable to submersion annually. Staples, cotton and sugar. Pop. in 1820, 3,755; in 1840, 7,303. Central lat. 29 30 N., lon. W. C. 13 40 W.

Lafourche, town of.—See *Donaldsonville*.

Lagny, town of Fr., in the dep. of Seine and Marne, and late province of the Isle of France, with a famous Benedictine abbey. It is seated on the Marne, 15 ms. E. of Paris. Lon. 2 45 E., lat. 48 50 N.

Lagoon, one of the new discovered islands in the S. Sea, inhabited by a race of Indians of a copper color. This island was discovered by Captain Cook. Lon. 139 28 W., lat. 18 47 S.

Lagos, seaport of Portugal, in Algarva, with a castle. Here fleets bound to the Straits usually take in fresh water. It is 120 ms. SE. of Lisbon. Lon. 8 33 W., lat. 37 2 N.

Laguna, capital of Teneriffe, principal of the Canary islands. It is elevated about 2,000 feet above the level of the sea, and situated on a romantic hill or mountain near the sea; is one of the most attractive places perhaps in the world. Lon. 16 20 W., lat. 28 28 N.

Lahn, river of Germany, which rises in Hesse Cassel, and falls into the Rhine above Coblenz.

Lahoon, seaport of Sweden, in the province of Holland, seated near the Baltic, 50 ms. N. of Copenhagen. Lon. 12 40 E., lat. 56 31 N.

Lahore, province of Hindoostan Proper, bounded on the W. by Candahar, on the N. by Cashmere, on the E. by Sirinagur and Delhi, and on the S. by Moulton. It is often called Panjab, or the country of Five Rivers. It is very extensive, and remarkably fertile, affording, in addition to all the necessaries of life, wine, sugar, and cotton wool. In the tract between the Indus and the Chelum are salt mines, wonderfully productive, and affording fragments of rock salt hard enough to be formed into vessels, &c.—See *Panjab*.

Lahore, city, capital of a province of the same name, in Hindoostan Proper. It is a place of high antiquity, and was one of the most considerable cities in the Mogul dominions. Lahore is now the capital of the Seiks, whose name was hardly known till the rapid decline of the Mogul empire, in the present century. Here they have manufactures of cotton cloths and stuffs of all kinds, and of very curious carpets. It is 210 ms. S. of Cashmere, and 290 NW. of Delhi. Lon. 73 45 E., lat. 31 15 N.

Laino, town of Naples, in Calabria Citeriore,

near a river of the same name. Lon. 16 11 E., lat. 40 4 N.

Lairdsville, village, Oneida co., N. Y., 108 ms. NW. by W. from Albany, and 12 ms. from Utica.

Lai-tcheou-fou, city of China, in the province of Chang-tong, with a convenient harbor on the Yellow sea, containing two cities of the first, and five of the third class.

Lake, town in the N. part of Stark co., Ohio. —SW. tp., Wayne co., Ohio. —Tp., Logan co., Ohio. —Tp. and town, Stark co., Ohio, about 130 ms. NE. from Columbus.

Lake Landing, post office, Hyde co., N. C., by post road 213 ms. a little S. of E. from Raleigh.

Lake Maskinonge, seignior, St. Maurice, co., L. C., on St. Lawrence, above Maskinonge river.

Lake of the Woods, lake between Lake Superior and Lake Winnipic, discharging by Winnipic river into the lake of the same name.

Lake Pleasant, tp., Hamilton co., N. Y.

LALA, Turkish, signifying tutor. It is a title of honor, bestowed by the sultan on his vizier and other high officers.

Laland, small island of Denmark, in the Baltic, lying S. of Zealand, from which it is separated by a narrow channel. It is fertile in corn, with which it supplies Copenhagen. Naxkow is the capital.

LAMA, priests of Thibet, whose Pontif Dalai Lama resides at Lassa.

Lambale, town of France, in the department of the N. coast, and late province of Bretagne. It is the chief town of the late duchy of Penthièvre. Lambale has a good trade in cattle, linens, and parchment, and is 37 ms. NW. of Rennes. Lon. 2 21 W., lat. 48 27 N.

Lambertsville, village on the Delaware river, opposite New Hope, Penn., 16 ms. NW. from Trenton.

Lambese, town of France, in the department of the mouths of the Rhone and the province of Provence, 9 ms. N. of Aix. Lon. 5 31 E., lat. 43 40 N.

Lambeth, village of Eng, in Surry, on the Thames, opposite Westminster. By the vast increase of buildings, Lambeth is now joined to the metropolis, in a direction to each of the three bridges. Here is a manufacture of artificial stone, which answers every purpose of stone carving, and extends not only to statues from the finest models, but to every kind of architectural ornaments.

Lamborn, town of Eng., in Berks, on a river of the same name, which falls into the Kennet below Newbury. It is 7 ms. N. by W. of Hungerford, and 68 W. of London. Lon. 1 26 W., lat. 51 30 N.

Lambro Vouni, mountain of Greece, in Attica. See *Trelo Vouni*. Lambro Vouni extends from Trelo Vouni, in broken ridges, to Cape Coloni, ancient Sunium.

Lamego, town of Portugal, in Beira, with a bishop's see and a strong citadel, containing two churches, a hospital, and four convents. It is 50 ms. SE. of Braga, and 150 N. of Lisbon. Lon. 7 30 W., lat. 41 12 N.

Lammermuir, mountainous ridge in Scotland, which divides the co. of Berwick from that of Haddington for above 20 ms. These mountains are, in general, very black and barren, affording but

scanty pasture for the sheep that feed on it. Spoutra Hill is the most elevated of this ridge.

Lamo, island of Africa, on the coast of Mel between the island of Pate and Cape Formosa.

Lamoille, river of Vt., which rises in Caledonia, and runs in various meanders nearly a course through the country, till it falls into Champlain near Milton, and opposite the S. of South Hero.

Lampedosa, desert island on the coast of T. 12 ms. in circumference. It is 50 ms. from T. and 112 from Malta, and has a good harbor, v ships water. Lon. 11° E., lat. 36 10 N.

Lampeter, tp. and post office, Lancaster Pa., on Mill creek, 5 ms. E. from Lancaster.

Lamprey, river and post office, Rocking co., N. H. Lamprey river falls into Great Co. The post office is 37 ms. SE. from Concord.

Lampsaco, ancient town of Natolia. It is ancient Lampsacus, and, according to Hobbs, although containing only 200 houses, it is still be a present worthy of a king. Its vicinity one fine vineyard, enclosed by hedges of pomeate trees. It is situated on the Asiatic sea about 8 ms. S. from Gallipoli, in Europe. 27 20 E., lat. 40 12 N.

Lamspringe, town of Lower Saxony, situated at the source of a river called Laine.

Lanark, borough of Scotland, and the co. of Lanarkshire. Since the introduction of cotton manufacture many new houses have built. It is seated on an eminence, near the Clyde, 22 ms. SE. of Glasgow, and 30 SW. of Edinburgh. Lon. 3 43 W., lat. 55 42 N.

Lanarkshire, co. of Scotland, 48 ms. long 38 broad, bounded on the N. by Dunbarton E. by the cos. of Sterling, Linlithgow, Edinburgh, and Peebles, S. by Dumfriesshire, and W. the shires of Ayr and Renfrew. It is divided 41 parishes, and the number of inhabitants in 1790 was 146,689; in 1811, 191,752; and in 1821, 234,387. It sends one member to Parliament. The river Clyde runs through the whole extent of the co., dividing it into two nearly equal parts, the southern part a mountainous district, generally called Clydesdale. It abounds in lead, iron, and coal.

Lancashire, co. of Eng., bounded on the N. by Cumberland and Westmoreland, E. by Yorkshire, S. by Cheshire, and W. by the Irish sea. It is 44 ms. from N. to S., (including a detached hundred on the NW., called Furness, which is separated from the rest by a creek at the head of Morecambe bay,) and its greatest breadth is 44 ms. It contains 1,150,000 acres, is divided into 6 hundreds and 63 parishes, has 27 market towns, and sends 14 members to Parliament. The number of inhabitants in 1801 was 672,781; in 1811, 830,309; and in 1821, 1,052,859. It is a county palatine, under the title of the duchy of Lancaster, the only duchy of England (that of Cornwall excepted) which is not merely titular. Lancashire is little adapted for a corn country, but is singularly fitted for the growth of potatoes. Among its products is a species of coal, called cannel, far exceeding all other, not only in making a clear fire, but for being capable of being manufactured into candlesticks, cups, standishes, snuff boxes, &c. As a commercial and manufacturing co., it is

rior to any other in the kingdom. Its principal manufactures are linen, silk, and cotton goods, jeans and counterpanes, shalloons, baize, serges, hats, canvass, sacking, pins, iron goods, glass, &c. Of the commerce of the co., it suffices to observe, that Liverpool is the second in the kingdom. The principal rivers are the Mersey, Irwell, Ribble, Loyne, Levern, Wyre, Mer, Rocher, Duddon, Winster, and Ken; and two considerable lakes, Winandermere and Ambleside. It has also numerous canals, and is famous for exhibiting the first regular one in the world, which was begun by the duke of Bridgewater in 1758.

Lancaster, borough of Eng., and the capital of Lancashire, on the Loyne, or Lune, which forms a bar for vessels of moderate burden, and over it are two stone bridges. Along the river side is a quay, also yards for ship building, and a canal from Kendal, winds around the E. part of the town, which is carried over the river by an aqueduct of 5 arches, each of 70 feet span. It is 68 S. of Carlisle, and 235 NNW. of London. Lon. 2 56 W., lat. 54 3 N.

Lancaster, tp. in the co. of Glengary, U. C., on the river St. Lawrence, and the lowest in the province adjoining to L. C.—Town and seat of the county, Coos co., N. H., on Connecticut river, near the site Guildhall, in Vermont, 40 ms. above the mouth college, and 117 N. from Concord. Lon. 1820, 844. Lat. 44 28 N., lon. 5 28 E. Town in Worcester co., Mass., 35 ms. NW. of Boston, and 17 NE. of Worcester. Pop. 1810, 4; in 1820, 1,862.

Lancaster, co. of Pa., bounded by Cecil co., S., by the Susquehanna river SW., Dauphin and Lebanon cos. NW., Berks NE., and Lancaster E. Length 33 ms., width 28, area 928. Lancaster is a very diversified co. in respect both of soil and surface. Several ranges of hills approach the elevation, and rugged aspect of mountains, intersect it from SW. to NE. The creeks flow generally SW. meander through the whole extent, and particularly the Conestoga, have margins of excellent soil. The staple productions are wheat, flour, fruit, whiskey, peach and apple brandy, &c. Chief town, Lancaster. Pop. 1820, 8,36; and in 1840, 84,203. Central lat.—See Lancaster city.

Lancaster, city of Pa., on the great road from Philadelphia to Harrisburg, 62 ms. from the former and 36 from the latter. Lon. W. C. 0 40 lat. 40 3 N. It is laid out in streets intersecting each other at right angles. The site is wavy about a mile W. from Conestoga creek. The Pennsylvania road passes through this city; distant 111 ms. W. C., 37 from Harrisburg, and 61 W. of Philadelphia. The adjacent country is very pleasant and well cultivated. This city contains a college, a court house, jail, a number of places of public worship, and schools. The bulk of the inhabitants are either Germans or the descendants of that people. The trade, commerce, and manufactures of Lancaster, are flourishing. Pop. in 1810, 5,405; in 1820, 6,633; and in 1840, 8,417.

Lancaster, co., Va., bounded by Chesapeake Bay SE., by the Rappahannock river S. and S. W., Richmond NW., and Northumberland NE. Length 23 ms., width 10, area about 230 sq. ma.

At the court house is a post office. Pop. 1820, 5,517; and in 1840, 4,628. Central lat. 37 41 N., lon. W. C. 32' E.—District of S. C., bounded by N. C. N., Wateree river W., Kershaw SE., and Chesterfield E. Length 23 ms., width 20, area 460 sq. ms. Chief town, Lancaster Court House. Pop. 1820, 8,716; and in 1840, 9,907. Central lat.—See Lancaster Court House.—Court house and post office, Lancaster district, S. C., 65 ms. NNE. from Columbia. Lat. 34 40 N., lon. W. C. 3 42 W.

Lancaster, flourishing village and seat of justice for Fairfield co., Ohio. It is handsomely situated near the centre of the co., in Hocking tp., near the source of Hocking river, on the road leading from Zanesville to Chillicothe. It is situated 28 ms. SE. from Columbus, 36 SW. from Zanesville, and 34 NE. from Chillicothe. Lon. W. C. 5 35 W., lat. 39 45 N. Pop. 1840, 3,272.

Lancaster, town, Garrard co., Ky., near Dick's river, about 30 ms. S. from Lexington.—Village, Smith co., Tenn., 38 ms. NNE. from Murfreesborough.

Lancaster's Sound.—See Sir James Lancaster's Sound.

Lancerota, one of the Canary Isles. It is very high, and may be discovered at a great distance. The goats and sheep are pretty plenty, and the valleys produce a little wheat and corn. It is about 15 ms. long and 10 broad. Lon. 13 26 W., lat. 29 14 N.

Lanciano, town of Naples, in Abruzzo Citeriore, with an archbishop's see. It is seated on the Feltrino, 87 ms. NE. of Naples. Lon. 14 50 E., lat. 42 18 N.

Landaff, small place of Wales, in Glamorgan-shire, but honored with the appellation of a city, on account of its being an episcopal see. It is seated on an ascent on the river Taafe, near Cardiff; but the cathedral, a large stately building, stands on low ground. It is 30 ms. NW. of Bristol, and 166 W. of London. Lon. 3 10 W., lat. 51 24 N.—Tp., Grafton co., N. H., on the E. side of Connecticut river, between Bath and Haverhill. Pop. 700.

Landau, strong town of Germany, in the palatinate of the Rhine. It was formerly imperial, but was ceded to the French in 1648. It is seated on the Queich, 9 ms. S. of Newstadt, and 270 E. of Paris. Lon. 8 12 E., lat. 49 12 N.

Landen, town of the kingdom of the Netherlands, on the Becke, 17 ms. NW. of Hoy, and 18 NE. of Namur. Lon. 5 5 E., lat. 52 41 N.—See Neerwinden.

Landernau, town of France, in the department of Finisterre, and late province of Bretagne, seated on the Elhoro, 16 ms. NE. of Brest. Lon. 4 20 W., lat. 48 28 N.

LANDE, Fr., means a large extent of barrens, producing only heath, bramble, briars, stunted timber, &c., from which comes the name at the head of the next article.

Landes, dep. of Fr., including the late territory of Marsan, on the bay of Biscay. It is a barren, sandy country, covered with fern, pines, and the holm tree, of the bark of which corks are made. Monte-de-Marsan is the capital of this department, and Dox the episcopal see.

LANDGRAVE, from the German *land* and *graaf*,

a judge. Originally the *landgraves* were judges, named by the emperors to administer justice in the interior, whilst the *margraves*, or more correctly *markgraves*, exercised similar functions on the frontiers. Insensibly, the landgraves became hereditary, and finally sovereign princes; the title is now more particularly applied to the landgraves of Hesse.

Landgrove, tp., Bennington co., Vt., about 35 ms. NE. from Bennington.

Landguard, or *Pointe aux Pins*, N. side of Lake Erie, is in lat. about 42° 7' 15" N., lon. W. C. 3° 20' W; variation 2° 48' westerly. This point is about 20 ms. E. of the S. Foreland, and bears the only pine timber on this coast.

Landisburg, village, Perry co., Pa., on a small branch of Shareman's creek, 30 ms. NW. from Harrisburg, and 18 NNW. from Carlisle.

Land offices of the United States, arranged in alphabetical order:

Augusta, Perry co., Mississippi.

Land's End, the most westerly point of Britain, and a vast aggregate of moorstone. 54° 40' W., lat. 50° 6' N.

Landsford, village, Chester district, S. C. post road 92 ms. N. from Columbia.

LANDWEHR, from two German words, mea *land* and *war*; literally, *land-guard*, or *militia*. The term is particularly applied to the militia Austria and Prussia.

Lanesborough, town, Berkshire co., Mass is situated in the NW. part of the State, joinin New York.

Lanesburg, town of Ireland, in the co. of Lford, and province of Leinster, situated on the banks of the Shannon, 62 ms. from Dublin. 8° 6' W., lat. 53° 40' N.

Lanesville, village, Susquehannah co., Pa.
Langdon, town, Cheshire co., N. H., on Connecticut river, 40 ms. W. from Concord.

Langeac, small town of France, in the dep Cantal, and late province of Auvergne, seated near the Allier, among the mountains, 36 ms. of Clermont. Lon. 3° 35' E., lat. 45° 5' N.

Langeais, town of Fr., in the dep. of Indre and Loire, and late province of Touraine, seated on the Loire, 12 ms. W. of Tours. Lon. 31° lat. 47° 26' N.

Langeland, island of Denmark, in the sea called the Great Belt. It is 33 ms. long, and scarcely 5 ms. in breadth. It produces plenty of

The principal town is Rutcoping. Lon. 10° E., lat. $55^{\circ} 4' N.$

Lujan, or *Laching*, the capital of the kingdom of Laos, in the further India, 371 ms. N. of London. Lon. $101^{\circ} 51' E.$, lat. $21^{\circ} 10' N.$

Ligon, town of France, in the department of Gironde, and late province of Guienne. It is famous for excellent wine, and seated on the Garonne, 15 ms. N. of Bazas. Lon. $10^{\circ} W.$, lat. $44^{\circ} 30' N.$

Ligport, town of Eng., in Somersetshire. It is seated on a hill, by the river Parret, which is navigable for barges to Bridgewater. It is 10 ms. N. of Bridgewater, and $128^{\circ} W.$ by S. of London. Lon. $3^{\circ} W.$, lat. $51^{\circ} N.$

Ligneres, ancient town of Fr., in the dep. of Marne, and late province of Champagne, and bishop's see. It is seated on a mountain, the sources of the Marne, and its cutlery are in high esteem. This town is thought to be the highest of any in France; and the distance from the towers of the principal church is almost beyond conception. It is 35 ms. NE. of Rheims, and 100 S. by E. of Rheims. Lon. $5^{\circ} 24' E.$, lat. $47^{\circ} 52' N.$

Ligstone, village of Eng., in Hampshire, famous for its harbor, which is capacious enough to receive the whole navy of Eng.; but on account of the narrowness there is no entrance for large ships at low water.

Liguac, late province of France, bounded N. by Querci, Rouergue, Auvergne, and Languedoc, on the E. by Dauphiny and Provence, on the W. by Gascony, and on the S. by the Mediterranean and Rousillon. The clergy and inhabitants were more rich, numerous, and more powerful than in any other place in France. It forms the departments of Aude, Gard, Upper Languedoc, and Herault.

Ligonier, Tp., Preble co., Ohio.

Lion, town of France, in the department of the North Coast, and late province of Bretagne. It is famous for its wine and hemp; and it has several mineral waters. The inhabitants of Lion, Lannion, and the environs, speak the Welsh language, which was probably brought here by the Bretons who took refuge in these parts in the fifth century. Lion is 15 ms. W. of Treguier.

Lion, town of France, in the department of the North, and late province of French Flanders, 15 ms. SE. of Lisle.

Lion, seigniory, Warnick county, Lower Carolina, on St. Lawrence river, 40 miles below New York.

Lionsdown Township, in the co. of Leeds, U. S. It is the 11th tp. in ascending the river St. Lawrence.

Lionsburg, town, Rensselaer co., N. Y., seated on the E. side of Hudson river, near its mouth with the Mohawk river, about 4 ms. N. of Troy, and 9 above Albany. A fine bridge across Hudson river unites Lansingburg and Waterburg. Sloops of small draught ascend thus high. In 1820, 2,035; and in 1840, 3,330.

Lionsburg, tp., Tompkins co., N. Y. Pop. in 1840, 3,631.

Lion, town of Piedmont, on the river Stura, 15 ms. NW. of Turin. Lon. $7^{\circ} 28' E.$, lat. $45^{\circ} 30' N.$

Laon, town of Fr., in the department of Aisne, and late province of Soissonnois, with a castle, and lately a bishop's see. Its principal trade consists in corn and wine. It is advantageously seated on a mountain, 77 ms. NE. of Paris. Lon. $3^{\circ} 43' E.$, lat. $49^{\circ} 34' N.$

Laos, kingdom of Asia, bounded on the N. by China, on the E. by Tonquin and Cochinchina, on the S. by Cambodia, and on the W. by Burmah. This country is full of forests, and abounds in rice, fruits, and fish. Lancion is the capital. — See *Shyam* and *Siam*.

La Petite Nation, York co., L. C., on the Ottawa river, about 70 ms. W. from Montreal.

Lapland, or the extreme northern part of Europe. It is divided into Russian and Swedish Lapland.

Russian Lapland extends E. from Tornea and Tana river to the White sea, under the name of the circle of Kola.

Swedish Lapland embraces the residue, including the extreme North Cape of Europe, and is subdivided into Tornea-Lapmark, Uleab-Lapmark, Pitea-Lapmark, Umea-Lapmark, Jamptland-Lapmark, Assele-Lapmark, and Finmark.

The whole of Lapland stretches over 150,000 sq. ms., of which Sweden possesses about 80,000, with 33,000 inhabitants, and Russia 70,000 sq. miles and 27,000 inhabitants. Lapland may be termed a huge congeries of frightful rocks and stupendous mountains, interspersed, however, with many pleasant valleys, watered by an infinite number of rivulets that run into the rivers and lakes, which discharge themselves into the gulf of Bothnia. The names of the principal lakes in Lapland are the Great Uma, the Great Windel, the Orea-van, the Stor-avan, the Great Lula, the lakes of Kartom, Kali, Torno, Enara, and Linn. Some of these extend 60 leagues in length, and contain a great number of islands; Storavan is said to contain 365; and Enora contains an archipelago of islands so large that no Laplander has lived long enough to visit each particular island. The natives believe this country to be the terrestrial paradise; and, indeed, nothing could be more enchanting than such vast prospects of mountains, hills, forests, lakes, rivers, &c., if the country was in a moderate climate; though even here, in summer, the roses are seen blowing wild on the banks of lakes and rivers, with all the beautiful glow of color which appears in those cultivated in our gardens. But all the intervals between the mountains are not engrossed by these agreeable prospects; great part of the flat country is covered with brown dusky forests of fir and pine trees, and these are often skirted by wide extended morasses, the stagnating waters of which in summer produce myriads of mischievous insects, that are more intolerable than even the cold of winter. The cold in this country is very intense during the winter, freezing even brandy and the watery part of spirit of wine, if the latter is not highly rectified; all the lakes and rivers are frozen to a prodigious thickness, and the whole face of the country covered with snow. The heat of summer is almost as intolerable as the cold of winter. At the northern extremity of the country the sun never sets for three months in summer, and in winter there is an uninterrupted night of the same duration; but this

is qualified in such a manner by a constant revolution of dawn and twilight, by a serene sky, moonlight, and aurora borealis, reflected from the white surface of the earth covered with snow, that the inhabitants are enabled to hunt, fish, and proceed with their ordinary occupations. The country abounds with excellent springs; and is remarkable for some surprising cataracts, in which the water rumbles over frightful precipices, and dashes among rocks with amazing impetuosity and noise. Its soil is generally so chilled and barren that it produces little or no grain or fruit trees of any kind. This sterility, however, is not so much owing to the soil, which is in many places of a rich mould, as to want of industry and the rigor of the climate.

It ought to be remarked, that Lapland derives much of its harsh character from being compared to the more southern and temperate parts of Europe. In itself, it is incomparably the warmest part of the earth so far advanced towards the pole. Even extreme northern Lapland as high as 72° bears large timber trees—a fact existing nowhere else on earth within the northern polar circle.

In stature, appearance, and manners, the Laplanders are evidently a branch of the family so extensively within and contiguous to the arctic regions. The Samoieids, Laplanders, Greenlanders, and Esquimaux, are the great divisions of this race.

Lar, town of Persia, in the province of Lariston, with a castle. It carries on a great trade in silk, oranges, lemons, and tamarinds. Lon. 52 45 E., lat. 27 30 N.

Laracha, ancient and strong town in the kingdom of Fez, seated at the mouth of a river of the same name, with a good harbor. Lon. 5 59 W., lat. 35 40 N.

Laredo, seaport of Spain, on the bay of Biscay, with a large safe harbor. It is 30 ms. W. of Bilbao. Lon. 3 53 W., lat. 43 23 N.

Largentiere, town of Fr., now in the dep. of Ardeche, and late province of Dauphiny.

Largo, town of Scotland, co. of Fife, 6 ms. S. of Cupar, situated on a large bay of the same name.

Largs, village on the W. coast of Scot., memorable for the defeat of the Norwegians in their last invasion of this country with a fleet of 160 sail and an army of 20,000 men, under the command of Haquin, king of Norway.

Larino, town of Naples, in the Molise, 60 miles NE. of Naples. Lon. 15° E., lat. 41 48 N.

Larissa, ancient town of Turkey in Europe, in the province of Janna. It carries on a large trade, and is pleasantly seated on the river Peneus, 50 ms. S. of Salonichi, and 121 N. by W. of Athens. Lon. 22 47 E., lat. 39 48 N.

Laristan, province of Persia, which lies N. of the gulf of Persia. It formerly belonged to the Guebres. Lar is the capital.

Larkanu, town of Hindoostan in Sinde, situated to the westward of that river, and on an outlet of the Indus, about 60 miles NW. of Sehwan. The great road westward into Beloochistan branches from Larkanu, and crosses the mountains to Kelat, by the pass of Belan.

Larrybundar, seaport of Hindoostan proper, at the mouth of a branch of the Indus, called Larrybundar, with a harbor capable of receiving ships of 200 tons burden. Lon. 67 37 E., lat. 24 44 N.

Larta.—See *Arta*.

Larvigen, or *Laurvigen*, seaport town of Norway, capital of a district of the same name. Iron works are among the most valuable in Norway.
La Salle, seigniori, Huntingdon co., L. C. ms. S. from Montreal.

Las Chiapas, formerly a province, now a state of Mexico. It is an interior country, bounded by Guatemala SW., Tabasco NW. and N., Yucatan E., and Vera Paz SE. As laid down on Tananarive map, Las Chiapas is a triangle, each side about 100 miles; area 13,000 sq. ms. On the same map the population is stated at 93,750. The rivers San Juan and Tabasco rise in and traverse Chiapas interior of which is very imperfectly known, bounded by mountains on the SW., and extending towards the gulf of Mexico, this country tending from lat. 15° to 17 30 N., must have a considerable variety of climate and vegetable production. No mines of consequence have been discovered. Chief city, Chiapa Real.

Lassa, or *Lahassa*, city, the capital of Sikkim. It is not large, but the houses are of a spacious and lofty. Seven miles on the E. side of the city is the mountain of Patula, on the summit of which is the palace of the great Lama, the priest and sovereign of Thibet. Lassa is 850 N. by E. of Calcutta. Lon. 91 40 E., lat. 30 30 N.

Lasselsville, post office, Montgomery county, Pa., 10 ms. W. from Johnstown.

Latacunga, town of Peru. Lon. W. C. W., lat. 55° S.

Latakia, formerly *Laudicea*, an ancient and considerable town of Syria, with a harbor. It has become the most flourishing place on the coast and carries on a considerable trade; it is 75 N. by W. of Aleppo, and 245 N. of Jerusalem. Lon. 34 30 E., lat. 35 40 N.

Lattesserie, fief, Hampshire co., L. C., on the Lawrence river, 40 ms. above Quebec.

Latimore, NE. tp., Adams county, Pa., on the waters of Bermudian creek, 15 miles NNE. of Gettysburg.

Latton, village of Eng., in Essex, between Cambridge and Harlow.

Laval, considerable town of Fr., in the dep. of Maine. The inhabitants are computed at 24,000. Linen of all kinds and qualities is manufactured here; and the neighboring quarries produce green marble, or black, veined with white. It is seated on the Maine, 15 miles S. of the town of that name, and 40 W. of Mans. Lon. 42° W., lat. 47 30 N.

Lavamund, or *Lavant Minde*, town of Carinthia, in Austria. It is seated at the conflux of the Drave and Lavamund, 40 miles E. of Clagenfurt. Lon. 15 18 E., lat. 46 44 N.

Lavaur, town of Fr., now in the dep. of Tarn, and late province of Languedoc, on the Agout, 10 ms. NE. of Toulouse. Lon. 1 52 E., lat. 43 40 N.

Laubach, strong town, capital of Carniola, on the river of the same name, in which are the largest crawfish in Europe, 32 miles S. of Clagenfurt, and 155 S. by W. of Vienna. Lon. 14 25 E., lat. 46 24 N.

Lauchingen, town of Suabia, situated on the banks of the Black Forest.

Lauda, town of Germany, in the bishopric of Wurzburg, and 18 ms. SW. of Wurzburg. Lon. 9 45 E., lat. 49 28 N.

Lauder, borough of Scot., in Berwickshire, with a population of 22 ms. S. of Edinburgh. Lon. 3 5 W., lat. 55 36 N.

Lauderdale, small district of Eng., in the co. of Westmorland, through which a river of the same name flows.

Lauderdale, county of Ala., bounded by Tennessee river S. and SW., Tennessee N., and Limestone E.; length 54 miles, mean width 12, area about 700 sq. ms. Surface hilly; soil productive, chiefly cotton. Chief town, Florence. Pop. in 1840, 4,963; and in 1840, 14,485. Central lat. 34 0 N., lon. W. C. 11° W.

Lavello, ancient town of Naples, in Basilicata, the seat of a bishop's see, 30 miles E. by N. of Naples. Lon. 15 55 E., lat. 41 5 N.

Lavelle, or *Lafell*, village in the bishopric of Liege, near Maestricht.

Lavenham, town of Eng., in Suffolk. It has considerable manufactures in serges, shalloons, muslins, and fine yarn. It is seated on a branch of the Great O. R. 12 ms. S. by E. of St. Edmund's Bury, 31 NE. of London. Lon. 51' E., lat. 52 39 N.

Lauterbach, town of Germany, in the duchy of Nassau, seated on the Neckar, 10 miles S. of Bonn. Lon. 9 25 E., lat. 49 3 N.—Small town of Switzerland, in the canton of Basle, seated on the river Birs.

Lauterbach, village of Switzerland in the canton of Zurich, 3 ms. S. by W. of Schaufhausen. There is a celebrated cataract of the Rhine; the water precipitates itself in accumulated masses of 60 or 60 feet perpendicular, raging and foam-foaming with wonderful violence.

Lauterburg, strong town of Germany, in the duchy of Suabia, and one of the four Forest towns, with a ruined castle. It belongs to the House of Austria, and is seated on a rock on the Rhine, which divides it into two parts. Here is a small cataract, noted for the beauty of the scenery. It is 7 ms. E. of Basil. Lon. 8 2 E. lat., 47 15 N.

Laugerfell, mountain of Iceland, containing an extraordinary natural *jet d'eau* called the Great Geyser. The Laugerfell is entirely surrounded by a morass, which extends for a considerable way in every direction, except towards the N., where it is not separated by an interval of more than half a mile from higher mountains. The N. side is perpendicular, barren, and craggy; the opposite one rises with a tolerably gradual ascent; and from this, near its base, we saw a number of columns of steam, mounting to various heights. The lower part of the hill was formed of a number of mounds, composed of what appeared to be clay, or coarse bolus, of various sizes: some of them were yellowish white, but generally of the color of red brick. Interspersed with these, here and there, were large pieces of rock, which had rolled or been washed down by the rains from the higher part of the mountain. On these mounds at irregular distances, and on all sides of them, were the apertures of boiling springs, from some of which were issuing spouts of water, from one to four feet in height; while in others the water rose no higher than the top of the basin, and gently flowed over the margin.—*Hooker's Tour in Iceland*.—See article *Geyser*.

Laughton, village, Westmoreland co., Penn.,

on the road from Bedford to Greensburg, 23 ms. E. from the latter.

Laughton, village of Eng., in Yorkshire, on a high hill, noted for its church, whose tower and spire are not excelled by any Gothic piece of the kind. It is seen in some places at the distance of 60 miles.

Lavigna, town of Italy, in the territory of Genoa. It is seated at the mouth of a river of the same name.

Lavington, town of Eng., in Wilts, 20 ms. NW. of Salisbury, and 88 W. by S. of London. Lon. 2 3 W., lat. 13 51 N.

Launceston, town of Eng., in Cornwall, on a hill near the river Tamar, 28 ms. N. of Plymouth, and 214 W. by S. of London. Lon. 4 35 W., lat., 50 40 N.

Launu, town of Bohemia, on the road from Leipsick to Prague, near the river Eger, 27 ms. NW. of Prague. Lon. 14 20 E., lat. 50 21 N.

Laurel, village, Sussex co., Del., on the N. side of Broad creek, a branch of Nanticoke river, 35 ms. SE. from Easton, in Maryland.

Laurel Hill, post office, Richmond co., N. C., 100 ms. SW. from Raleigh.

Laurel Mountains. In general terms, this range includes the extreme NW. ridges of the Appalachian chain, and reaches from the central parts of Penn. to Ala., under various local names. It is pierced by the eastern branches of Monongahela, by the Great Kenawha, and Tennessee rivers.

Laurenceburg, village, Armstrong co., Penn.—Dearborn co., Ia.—See *Lawrenceburg*, Dearborn co., Ia.—Village, Franklin co., Ky., 10 ms. S. from Frankfort.—Lawrence co., Tenn.—See *Lawrenceburg*, Lawrence co., Tenn.

Laurens. When a name commencing thus, is not to be found, see those commencing with *law*.—

Laurens, tp., Ostego co., N. Y., 15 ms. SW. from Cooperstown.—District, S. C., between Ennore and Saluda rivers, and bounded by Newberry SE., Saluda river or Abbeville SW., Greenville NW., and Ennore river, or Spartanburg and Union NE.; length 30 ms., mean width 23, area 690 sq. ms. Surface moderately hilly, and soil productive. Staple, cotton. Chief town, Laurensville. Pop. in 1820, 17,682, and in 1840, 21,584. Central lat. 34 30 N., lon. W. C. 5 W.—Co., Ga., on both sides of Oconee river; bounded SE. by part of Montgomery, SW. by Pulaski NW. by Wilkinson, N. by Washington, and NE. by Emanuel, and part of Montgomery; length 35 ms., mean width 25, area about 875 sq. ms. Chief town, Dublin. Pop. in 1820, 5,436; and in 1840, 5,585. Central lat. 32½° N., lon. W. C. 6 10 W.

Laurensville, village and seat of justice, Laurens district S. C., 80 ms. NW. from Columbia. Lat. 34 29 N., lon. W. C. 4 58 W.

Lauroicocha, river, S. America, and one of the great constituents of the Amazon. It is formed by innumerable streams flowing from the Andes, between lat. 2° and 10° S. At lat. 5° S. it unites with the Gualaga, and forms the Tunguragua.

Lawrington, village, Marlborough district, S. C.

Lausanne, town of Switzerland, capital of the Pays de Vaud, with a famous college and a bishop's see. Its lofty situation affords the most sublime views in nature, commanding the Lake of Geneva,

the Pays de Vaud, and the rugged coast of Chablais. It is seated between three hills, 30 ms. NE. of Geneva, and 50 SW. of Bern. Lon. 6 50 E., lat. 46 31 N.—Tp., Northampton co., Penn., on the Lehigh river, about 30 ms. above Bethlehem. It includes the greatest mine of anthracite coal yet opened in the U. S. See *Mauchchunk*. Pop. in 1820, 220; and in 1840, 1,590.

Lauterburg, town of Poland, in Western Prussia, in the palatinate of Culm, 50 ms. NE. of Thorn. Lon. 20 39 E., lat. 53 6 N.—Town of Germany, in the circle of the Upper Rhine, but subject to the French. It is 20 ms. SE. of Weissemburg. Lon. 8 26 E., lat. 48 48 N.

Lautrec, town of France, late in the province of Languedoc. It is seated on a mountain, and has an ancient castle.—Town of Germany, in the palatinate, seated at the confluence of the rivers Sauter and Glaun.

Lauzon, seigniory, Dorchester co., L. C., on the right bank of the St. Lawrence river, opposite the city of Quebec.

Lavora, Terra di, province of Naples, in Italy, 63 ms. in length and 3 $\frac{1}{2}$ in breadth; bounded on the W. by Campagna di Roma, on the N. by Abruzzo Ulteriore, and Citeriore, on the E. by the Molise and Principato Ulteriore, and on the S. by Principato Citeriore. It abounds in excellent wines, and all sorts of fruits are found in great plenty. The soil is excellent for tillage, from whence it takes its name, and there are mineral springs and mines of sulphur. Naples is the capital.

Lawahannock, river, Penn., rises in the NE. angle of Luzerne co., and, flowing SW., falls into the Susquehanna river, at Pittstown, 12 ms. above Wilkesbarre.

Lawenburg, duchy of Germany, in the circle of Lower Saxony, subject to the kingdom of Hanover. It is 35 ms. in length, and 20 in breadth.—Considerable town of Lower Saxony, capital of a duchy of the same name. It is seated on the Elbe, 40 ms. SE. of Hamburg. Lon. 10 50 E., lat., 53 26 N.—Town of Pomerania, capital of a territory of the same name Lon. 17 39 E., lat. 54 33 N.

Lawrence, St.—See *St. Lawrence river* and *St. Lawrence co.*, N. Y.

Lawrence, co., Mississippi, bounded NW. and N. by the lately ceded Choctaw territory, E. by Covington, S. by Marion and Pike, and W. by Franklin. Length 60 ms., mean width 21; area 1,260 sq. ms. Pearl river flows through this co., upon the banks of which, and on some of its branches, good land in small quantities is found. The general surface is covered with fine timber, and is hilly and sterile, though well supplied with good water. Chief staples, cotton. Pop. in 1820, 4,916. Central lat., see *Monticello*.

Lawrence, Southern co., Ohio, bounded on bounded on the N. by Jackson, E. by Gallia co., S. by the Ohio river, and W. by Scioto county. It is generally a very hilly and barren tract of country. Symmes's and Indian Guyandot creeks water the eastern parts. It contains about 430 sq. ms. Seat of justice, Burlington. Pop. in 1820, 3,499; and in 1840, 9,738. Central lat. 38 40 N., lon. 5 28 W.—Tp. in the W. border of Stark

co., O.—Tp., Tuscarawas co., O., in which situated the towns of Lawrenceville and Zoar.—Washington co., Ohio.—Co., Ia., bounded Orange S., Owen and Martin W., Monroe Jackson E., and Washington SE. Length ms., width 18, area 378. This county is drained by the E. branch of White river and its affluents. Chief town, Palermo. Pop. in 1840, 4,116. Central lat. 38 50 N., lon. 9 25 W.—Co., West Tenn., bounded by Ala. S., W. W., Hickman N., and Giles E.; length 26; width 22; area 570 sq. ms. Chief town, Lawrence. Pop. in 1820, 3,271. Central lat. 36 N., lon. W. C. 10 30 W.—Co. of Arkansas, boundaries and extent uncertain, but usually called the White River co.

Lawrence, village and seat of justice, Lawrence co., Ark., on the N. side of Black river, about 50 miles above its confluence with White river.

Lawrenceburg, town, Armstrong co., Pa., Alleghany river, 20 ms. NE. from Butler.—Village and seat of justice, Dearborn co., Indiana, ms. below the mouth of the Great Miami, and 10 ms. below Cincinnati. This village is seated on an extensive bottom, liable to inundation at seasons of high flood. Lat. 39 5 N., lon. W. C. 45 W.

Lawrence's Mills, post office, Clinton co., N. Y., by post road 177 ms. N. from Albany.

Lawrenceville, village, Tioga co., Pa., by road 149 ms. NNW. from Harrisburg.—Village, Nansemond county, Virginia.—Village, Montgomery co., N. C., 109 ms. SW. by W. C. 10 Raleigh.—Village, Gwinnett co., Ga., 133 NW. from Milledgeville.—Village on the bank of the Alleghany river, 2 ms. above Pittsburgh. At this place is an arsenal and U. S. military depot.—Village laid out in the year 1818 near the centre of Madison co., Ohio, on State road leading from Columbus to Springfield.

Lawson's, post office, Greenbrier co., Va., post road 316 ms. NW. by W. from Richwood.

Lawsville, town Susquehanna co., Penn., on the N. Y. line, 10 ms. N. from Montrose.

Lawyersville, village, Schoharie co., N. Y., 10 ms. SW. from Albany.

Luzenburg, town of Austria, on a small river, 10 ms. S. of Vienna. Lon. 16 28 E., lat. 48 3 N.

Laytonstone.—See *Low Layton*.

Laybach, town and government of Austria, in the province of Styria. The town stands on a small river, a branch of the same, about 30 ms. NE. from Trieste. Lon. 14 46 E., lat. 46 2 N. Pop. 12,000.

Layton's, village, Essex co., Va., on the right bank of the Rappahannock river, opposite Leesville, in Westmoreland, and 35 ms. by land from Fredericksburg.

Lea, river of Eng., rises near Luton, in Bedfordshire, flows to Hertford and Ware, and, crossing Essex from Hertfordshire and Middlesex, falls into the Thames below Blackwall.

Leacock, town, Lancaster co., Pa. It is situated between Pequea and Conestoga creeks, 10 ms. E. of the city of Lancaster, and 56 W. of Philadelphia. Pop. in 1820, 2,882.

Leadhills, village of Scotland, in Lanarksh.

ing the mountains of Clydesdale, and said to be the highest human habitation in Great Britain. There reside many hundred of miners with their families. These miners, though in a great measure excluded from society by their situation, pay great attention to the cultivation of the mind, and have established a circulating library for the instruction and amusement of the little community belonging to the village, 44 ms. S. from Glasgow.

Leading creek, stream rising in the southern part of Athens co., Ohio, which, after running 15 ms. to the SE., through Meigs co., falls into the Ohio river 17 ms. above Gallipolis.

Leadsville, village, Randolph co., Va., by post road 170 ms. N.W. from Richmond.

Leaf river, southwestern branch of Pascagoula, (see *Leaf*.) Leaf river rises by a number of branches, in the Choctaw country, above N. lat.

Its general course is SE. through Covington and Wayne cos., joins the Chickasawha river, and forms Pascagoula river. The length of the Leaf river is about 100 ms., and is not so long as Chickasawha, the former is probably a larger volume of water from its more numerous branches. Both streams flow from a forest; soil thin and sterile.

Leaf River, post office on the preceding river, Adams co., Miss., 57 ms. SE. from Monticello.

Lakesville, village on Dan river, Rockingham co., N. C., 105 ms. NW. from Raleigh.

Leamington Priors, village of Eng., Warwickshire, a celebrated watering place, 22 ms. SW. from Birmingham, and 90 NW. from London.

Lea tong, or *Chen-yang*, one of the three departments of the Mantshurs, who hence entered and conquered China. *Chen-yang*, or Mougden, its capital.

Leasburg, village, Caswell co., N. C., 85 ms. NW. from Raleigh.

Leatherhead, town of Eng., in Surry, which has a bridge of many arches over the river Mole.

Leatherwood's Store, post office, Henry co., Va., by post road 245 ms. SW. by W. from Richmond.

Leathes-water, called also *Wythburn*, or *Thirlwater*, fine lake of Eng., in Cumberland, and lies S. by E. of Keswick. Its outlet joins the rapid river Greeta at New Bridge, and thus has communication with the lake of Derwentwater.

Leavenworth, village, Crawford co., Inda., on the Ohio river, 68 ms. below Louisville.

Leawava, seaport on the E. coast of the island of Seylon, which yields a great deal of salt. Lon. 6° E., lat. 6 40 N.

Lebanon, town, York co., Maine, on the E. bank of Salmonfall river, about 20 ms. NW. of Newburgh, in N. H. Pop. in 1810, 1,938; in 1830, 2,223.—Town, Grafton co., N. H., 4 ms. SE. of Dartmouth College.—Town, Windham co., Ct., on the W. side of Shetucket river, 10 ms. N. of Norwich, and near the same distance from Windham.—Village, Madison co., N. C., 5 ms. SW. from Utica.—Town, Hunterdon co., N. J.—Co., Pa., bounded by Lancaster, Dauphin SW. and NW., and Berks E.; length 17 ms., width 17, area 288 sq. ms.

The fine co. is drained by the Swatara, Quitapahilla and Tulpehocken creeks, with their branches. Its W. boundary is the Blue mountain, or Kit-

tatiny ridge. The surface exceedingly diversified. The substratum of rather more than one-half its surface is limestone. This formation lies SE. from the Quitapahilla, on the opposite side of that stream. Towards the Blue mountain, the soil is based on clay slate. The Union canal, intended to unite the Swatara to the Schuylkill by their respective branches, the Quitapahilla and Tulpehocken, will pass through the centre of this co. Staples, grain, flour, whiskey, and iron. Chief town, Lebanon. Pop. in 1820, 16,988.—Village, Russell co., Va., by post road 358 ms. a little S. of W. from Richmond.—Village, Washington co., Ga., 14 ms. southward from Milledgeville.—Borough and village, Lebanon co., Pa., situated on the N. side of Quitapahilla creek, 28 ms. W. of Reading, and 25 ENE. of Harrisburg. The streets are regular, and the houses well built, principally with brick and stone.—Village and seat of justice, Warren co., O., containing the usual co. buildings, with a bank, printing office, two market-houses, and a library company, 28 ms. S. from Dayton, and 30 NE. from Cincinnati. Lon. W. C. 7 5 W., lat. 39 25 N.—Tp., Meigs co., Ohio.—One of the southern tps. of Ashtabula co., Ohio.—Seat of justice of Marion co., Ky., 50 ms. SW. from Lexington, and 45 SE. from Louisville. Pop. in 1840, 546.—Village and seat of justice, Wilson co., Tenn., on the road from Nashville to Carthage, 24 ms. from each. Lat. 36 13 N., lon. W. C. 9 14 W.—Village, St. Clair co., Ill., 55 ms. SW. from Vandalia.

Lebeda, seaport of the kingdom of Tripoli, with a good harbor and an old castle. It is seated on the Mediterranean, 85 ms. E. of Tripoli, and is seated on the ruins of Leptis Magna. Lon. 14 50 E., lat. 32 50 N.

Lebrixa, town of Spain, in Andalusia, seated on a territory abounding in corn, wine, and olive trees, which produce the best oil in Spain. It is 12 ms. NE. of St. Lucar. Lon. 5 44 W., lat. 37 8 N.

Lebus, town of Germany, in the circle of Upper Saxony, in the marquisate of Brandenburg, on the Oder, 10 ms. N. of Frankfort, and 43 E. of Berlin. Lon. 14 39 E., lat. 52 31 N.

Lecco, town of Italy, in the Milanese, seated on the E. side of Lake Como, 26 ms. N. of Milan. Lon. 9 21 E., lat. 45 53 N.

Lech, river of Germany, which rises in Tyrol and falls into the Danube below Donawert. The course of this river is very nearly due N., comparative course about 150 English ms. Augsburg, the former capital of Bavaria, is on its bank.

Lechlade, town of Eng., in Gloucestershire, at the confluence of the Lech with the Thames, 28 ms. E. by S. of Gloucester, and 77 W. by N. of London. Lon. 1 35 W., lat. 51 40 N.

Lechnich, town of Germany. It is situated in the circle of the Lower Rhine, and in the electorate of Cologne, 10 ms. SW. of Cologne. Lon. 7 8 E. lat. 50 46 N.

Leck, river of the kingdom of Holland, which branches off the Rhine at Wyckby-Deurstede, and enters the Merve 10 ms. E. of Rotterdam. It is very difficult by verbal description to give an idea of this river. It is one of those interlocking streams peculiar to the deltas of large rivers, and

is in reality a part of the Rhine. Length, about 40 English ms.

Lectoure, town of France, in the department of Gers, and late province of Armagnac, on a mountain, at the foot of which runs the river Gers, 12 ms. E. of Condom. Lon 42° E., lat. 43 56 N.

Ledbury, town of Eng., in Herefordshire. It is inhabited by many clothiers, who carry on a great trade. It is 13 ms. E. of Hereford, and 116 WNW. of London. Lon. 2 17 W., lat. 52 3 N.

Ledesma, town of Spain, in Leon, seated on the Tome, 20 ms. SW. of Salamanca. Lon. 5 31 W., lat. 41° N.

Lee, river of Ireland, which rises on the confines of Kerry, and flows E. to Cork, below which city it forms a fine harbor, and enters St. George's channel.—Village of Eng., in Kent, in the churchyard of which Dr. Halley, the great astronomer, is interred. It is 6 ms. SE. of London.

—Tp., Hancock co., Me., about 27 ms. NW. from Castine. Pop. 1820, uncertain.—Tp., Stafford co., N. H., 15 ms. NW. from Portsmouth.—Town, Berkshire, Mass., about 4 ms. E. of Stockbridge, and 140 W. of Boston.—

Town, Oneida co., N. Y., 10 ms. NW. from Rome.—Tp., Athens co., Ohio.—SW. co., Va., bounded SW. by Tenn., NW. by Cumberland mountain or Ky., and E. by Scott co., Va.

This co. is triangular, extending 45 ms. along Tenn., and 36 along Ky., with an area of about 800 sq. ms. It is intersected by Powell's river, a branch of Tennessee. The surface is generally mountainous or hilly, and soil rocky and sterile. Chief town, Jonesville. Pop. 1840, 8,441. Central lat. 36 5 N., lon. W. C. 6° W.—Court house and post office, Lee co., Va., 487 ms. SW. by W. from W. C.

Leece, populous and most beautiful town of Naples, in Otranto, of which it is the chief place, 10 ms. W. of the Gulf of Venice, and 195 ESE. of Naples. Lon. 18 20 E., lat. 40 36 N.

Lee, Fort, Bergen co., N. J., on the right bank of the Hudson, 9 ms. above Bergen.

Leech Lake, one of the higher tributaries of the Mississippi river, lies about 25 ms. W. of Pakagama falls, and at nearly mid-distance between Rice lake of Red river, of Assiniboin, and the main stream of the Mississippi. By Leech lake and its outlet, with a short intervening portage, a canoe navigation is actually in operation between Mississippi and Red rivers.

Leeds, town of Eng., in the W. Riding of Yorkshire, in a vale, which trade has rendered one of the most populous spots in Eng., and is the principal of the clothing towns in Yorkshire. It is particularly the mart for the colored and white broad cloths, of which vast quantities are sold in its cloth halls. Leeds has a manufacture of camlets, which has declined, and a flourishing one of carpets, resembling those of Wilts and Scotland. Here are also some mills for the cutting of tobacco, and a great pottery. Within 3 ms. of the town are numerous collieries. Leeds has a magnificent stone bridge over the Aire, which is navigable for boats that carry much coal from hence to York and Hull. It is 22 ms. WSW. of York, and 192 N. by W. of London. Lon. 1 29 W., lat. 53 48 N.

Leeds, tp., Buckingham co., I. C., on Becanour river, and between Broughton and Inverness,

40 ms. S. from Quebec.—Co., U. C., is bounded on the E. by the co. of Grenville, on the S. by the river St. Lawrence, and on the W. by the boundary line of the late tp. of Pittsburg, run N. until it intersects the Ottawa or Grand River thence descending that river until it meets the northwesternmost boundary of the co. of Leeds.—Tp. in the co. of Leeds, U. C., 12 twelfth tp. in ascending the river St. Lawrence.—Town, Kennebec co., Maine, on the Atlantic scoggin, 20 ms. SW. from Augusta. Pop. 1,309.—Village, Gloucester co., N. J., on Atlantic ocean.

Leedston, village, Westmoreland co., Va., 15 ms. NW. of Westmoreland court house, and 5 S. from Washington.

Leefooga, one of the Friendly islands, in the Pacific ocean, visited by Captain Cook in 1770. This island is 7 ms. in length, and its breadth in some places not above 3.

Leek, town of Eng., in Staffordshire, seated on some barren moor lands. It is 154 ms. NNW. of London. Lon. 1 55 W., lat. 53 16 N.

Leer, or *Lchr*, town of Westphalia, seated on a river of the same name, 11 ms. SE. of Embs and 24 WNW. of Osnaburg.

Leerdam, town of the kingdom of the Netherlands, seated on the Linghe, 17 ms. NE. of Amsterdam. Lon. 5 13 E., lat. 51 56 N.

Leeroot, fortress of Germany, in the circle of Westphalia, seated at the confluence of the river with the Embs, 10 ms. E. by S. of Embsden.

Leers, town of Germany, in the circle of Westphalia and bishopric of Liege. It is 4 ms. S. of Liege.

Leesburg, village and seat of justice, Louisa co., Va. Lat. 39 5 N., lon. W. C. 33' W., 3 ms. NW. from W. C. The environs of this village are waving rather than hilly. Beside the ordinary buildings. Leesburg must contain 300 houses, and 1,500 inhabitants. The neighborhood is a fertile of good soil, and well cultivated.—Town, Harrison co., Ky., 10 ms. NW. from Paris, and 22 NE. from Frankfort.—Village, Washington co., Tenn., about 80 ms. NE. by E. from Knoxville.—Village, Tuscarawas co., Ohio.—Village, Champaign co., Ohio.—Town, Highland co., Ohio, 31 ms. W. from Chillicothe.

Leesville, village, Schoharie co., N. Y., 55 ms. westerly from Albany.—Village, Campbell co., Va., 165 ms. SW. by W. from Richmond.—Village, Lexington district, S. C., 30 ms. W. from Columbia.—Village, Lawrence co., Ia., 76 ms. SSW. from Indianapolis.

Lectakoo, recently discovered town of South Africa, in the country of the Boshwanas. It was discovered in 1801, and since visited by Dr. I. R. Steynstein and Mr. Campbell. It is supposed to contain from 7,000 to 8,000 inhabitants. Lon. 27° E., lat. 26 30 S.

Lectown, village, Jefferson co., Va., 84 ms. NW. from W. C.

Leeward Islands, that part of the Caribbean islands, in the West Indies, commencing at Dominica and extending to Porto Rico.

Leeuwe, fortified town of the kingdom of the Netherlands, in Brabant, seated in a morass on the Geete, 12 ms. E. of Louvain. Lon. 5 7 W., lat. 50 53 N.

GATE.—See art. *Ambassador*.
Lephorn, city of Tuscany. It has one of the best harbors in the Mediterranean; its commerce is extensive. The Jews, who are numerous and have a handsome synagogue and schools; Greeks and Armenians have churches of their own and no religion is disturbed. According to the latest census, the progressive population of Lephorn is as follows:

-	-	-	-	50,790
-	-	-	-	64,095
-	-	-	-	72,199
-	-	-	-	76,397

There are so many canals that some have given it the title of New Venice. At a little distance is the island of San Francesco, on a small island. The trade consists of foreign goods, as cotton, sugar, cocoa, sulphur, and alum; and in home productions, as silks, wines, oils, straw hats, cloth, juniper berries, oranges, lambs and goats' skins, and coral. In 1741, this city suffered greatly by an earthquake. It is 145 ms. NW. of Rome, and 46 W. of Florence. Lon. 10 28 E., lat. 43 33 N.

Verona, town of Italy, in the Veronese, on the Adige. The town is populous, and carries on a considerable trade, particularly in grain, which is greatly facilitated by means of a canal from the Adige to the Po. It is 24 ms. SE. of Verona.

Le Goupe, seignior, Northumberland co., L. E. of the left side of the St. Lawrence, 54 ms. from Quebec.

Lehigh, river of Pa., the NW. branch of the Delaware. Its extreme northern sources are in the southern part of Wayne co., and in Luzerne and Wilkesbarre. Augmented by many mountain streams, it flows SW. by comparative courses to the mouth of Wright's Mill creek, where it turns to nearly S. by a serpentine course, to a direct distance of about 20 ms. to Lehigh. Here it inflects to SE., and continues in that direction 25 ms. to Allentown or Northampton. At Allentown it once more turns nearly at right angles, and flows NE. 15 ms. to its entrance into the Delaware at Easton. The entire comparative length of this stream is 85 ms. From near its mouth to Trout creek it separates Pike and Luzerne cos. From Trout creek to Rock Eddy falls it separates Northampton from Luzerne co. Between the Rock Eddy falls, to its passage through the Blue or Kittatinny mountain, its course is in Northampton co. Between its passage through the mountain and the mouth of Hockendocque creek, it forms the limit between Lehigh and Northampton cos. Below Hockendocque creek to Bethlehem, it flows through Lehigh, and thence to Bethlehem to Easton, in Northampton.

The Lehigh is truly a mountainous stream, and descends through a series of natural scenes not equalled, if equalled, in the U. S. The following table will exhibit its descent from Stoddartsville to its mouth:

Stoddartsville to the mouth of Nesquehoning creek, about 2 ms. above the Launchchuck	Feet.
Launchchuck - - - - -	845
Nesquehoning to Lehigh Water Gap	160
the Gap to Easton - - - - -	205
	1,210

Lehigh, co., Pa., bounded SE. by Bucks, SW. by Montgomery and Berks, NW. by Schuylkill and Northampton, and NE. by Northampton. Length 25, breadth 13 ms.; area 335. The surface of this co. is highly picturesque and varied. Except the two southeastern tps., Upper Milford and Upper Saucon, the residue of this co. lies in the valley between South mountain and the Blue or Kittatinny mountain. The valley section is nearly equally divided between the limestone and clay slate formations so frequently mentioned under various articles in this gazetteer. The soil, particularly on the limestone tracts, is excellent. The whole co., with but partial exceptions, is well adapted to the culture of grain, grass, and fruits, though in many places the surface is excessively broken. Staples, grain, flour, whiskey, fruit, salted meat, &c. Chief town, Allentown, or Northampton. Central lat. 40 38 N., lon. W. C. 1 25 E. Pop. in 1820, 18,895; in 1830, 22,256; and in 1840, 25,787. Co. seat, Allentown, with a population in 1840 of 2,493. This borough is situated on a beautiful swelling hill, near the right bank of Lehigh river. Lat. 40 34 N., and lon. 1 30 E. W. C.

Lehigh, village in Northampton co., Pa., on the W. bank of the Lehigh river, about half a mile above the mouth of Mahoning creek. It is 36 ms. WNW. from Easton. In the neighborhood of this village are some very strong chalybeate springs. The vicinity is in the highest degree romantic, and, from the elevation of the ground, might become a most salubrious and eligible watering place in summer. The Stone Coal landing, or Mauchchuck, is 3 ms. above, on the same side, on the Lehigh. Near this town stood the old Moravian settlement of Gnaden Hutten, on the N. bank of the Mahoning, about 100 perches from its mouth, where the old church is still standing. Here a treaty of amity was held, in July, 1752, between the Moravian brethren and the Shawnese Indians; and on the 24th of November, 1755, the brothers and sisters were surprised and murdered by a party of French Indians. Their grave is still marked by a large stone, with a most pathetic inscription; the grave is on the hill, to the S. of the village. Nearly opposite Gnaden Hutten, on the E. side of the river, stood old Fort Allen. There is a wooden bridge across the Lehigh, 214 feet long, and 25 feet wide.

Leibnitz, town of Germany, in Styria, seated on the Solm, 16 ms. S. of Gratz.

Leicester, borough of Eng., and the capital of Leicestershire, governed by a mayor. The combing and spinning of wool, and making it into stockings and other articles, is the chief business of this town and neighborhood. A canal passes hence, by Loughborough, to the river Trent. At a Parliament held here in the reign of Henry V, was made the first law for the burning of heretics. In the meadows near the town are the ruins of an abbey, in which Cardinal Wolsey died. In 1811, Leicester contained 23,146 inhabitants. It is seated on the Soar, 23 ms. S. by E. of Derby, and 98 NNW. of London. Lon. 1 8 W., lat. 52 38 N. —Town, Worcester co., Mass., 7 ms. SW. of Worcester, and 54 in the same direction from Boston. It contains several places of public worship, an academy, and an extensive manufactory of wool

cards. It contained 1,181 inhabitants in 1810; and in 1820, 1,252.—Tp. of Livingston co., N. Y., on Genesee river, about 25 miles SE. from Batavia. The villages of Moscow and Mount Morris are in this tp. Pop. in 1820, 1,331.

Leicestershire, co. of Eng., 38 ms. long, and 30 broad; bounded on the N. by Nottinghamshire, E. by the cos. of Lincoln and Rutland, S. by Northamptonshire, SW. by Warwickshire, and NW. by Derbyshire. It contains 522,240 acres, is divided into six hundreds and 196 parishes, has 12 market towns, and sends 4 members to Parliament. In 1811, the number of inhabitants was 150,419. The chief rivers are the Avon, Soar, Wreke, Anker, and Welland; and it has several canals. The sheep bred here and in Lincolnshire are the largest mutton with which the London markets are supplied, and have the greatest fleeces of wool of any in Eng. Nor is the wool less fine on account of its quantity; it has the longest staple in the whole island, some few places excepted. The horses bred, or rather fed here, are the largest in Eng., being generally the great black dray horses, of which great numbers are continually sent to London. The manufacture of stockings is the principal one in the co. Pop. in 1801, 131,081; in 1811, 150,419; and in 1821, 174,571.

Leigh, seaport of Eng., in Essex, on a creek at the mouth of the Thames. It has a good road for shipping, and is 18 ms. SSE. of Chelmsford, and 40 E. of London. Lon. 42' E., lat. 51 31 N.—Town of Eng., in Lancashire, 7 ms. NNE. of Warrington, and 191 NW. of London.

Leighton, village, Lawrence co., Ala., by post road 260 ms. NNW. from Cahaba.

Leighton-Buzzard, town of Eng., in Bedfordshire, on a branch of the Ouse, 18 ms. S. of Bedford, and 41 NW. of London. Lon. 35' W., lat. 51 55 N.

Leinengen, town of Germany, in the palatinate of the Rhine, 70 ms. SW. of Worms. Lon. 8 22 E., lat. 49 30 N.

Leina, river of Germany, which, flowing through Brunswick Lunenburgh, falls into the Aller.

Leinster, eastern province of Ireland, bounded by Ulster on the N., St. George's or the Irish channel on the E. and S., and by the provinces of Connaught and Munster on the W. The capital city of this province, and of the kingdom, is Dublin. It contains 12 cos, viz: Carlow, Dublin, Kildare, Kilkenny, King's co., Longford, Louth, Meath, Queen's co., Westmeath, Wexford, and Wicklow. It is the most level and best cultivated province in the kingdom; containing 2,642,258 Irish plantation acres, 858 parishes, 99 baronies, and 53 boroughs; it is about 124 ms. long, and 74 broad, and extends from 51 45 to 55 45 N. lat. See article *Ireland*.

Leiphaim, town of Suabia, in the territory of Ulm. Its vicinity produces good hops, and it stands on the S. bank of the Danube, 10 ms. NE. of Ulm.

Leipnic, walled town of Moravia, near the river Bezcwa, 14 ms. ESE. of Olmutz.

Leipsic, city of Upper Saxony, in Misnia, with a famous university, and a strong citadel, called Pleyssenburg. It carries on a considerable trade, and has 3 great fairs every year, which last a fortnight each. Its principal manufactures are silk,

gold and silver stuffs, linen and cotton print leather, and paper. The number of inhabitants exceeds 30,000; and the houses, in general lofty buildings. There are 6 handsome colleges belonging to the university, beside the private leges; and the exchange is a fine structure.

seated in a plain, on the river Pleyssse, 60 WNW. of Dresden. Lon. 12 20 E., lat. 51 1

Leiria, town of Portugal, in Estramadura, a bishop's see, with an ancient castle on an eminence. It is 80 ms. NNE. of Lisbon. Lon. W., lat. 39 48 N.

Leisznic, town of Upper Saxony, in Mi with manufactures of cloth, lace, stockings, It is seated on the Mulda, 24 ms. ESE. of Leis and 32 NW. of Dresden.

Leitenberg, town of Upper Saxony, in Thuria, with a castle on a mountain. It is seated the Sorbitz, 11 ms. SSE. of Saalfeld.

Leith, seaport of Scot., on the Frith of Forth ms. NNE. of Edinburgh, of which it is the port is situated at the mouth of the river Leith, which forms the harbor, and divides the town into N. S. Leith, which communicate by a draw bridge. The harbor is secured by a noble stone pier at the mouth of a little river, called the Water of Leith, and is accommodated with an elegant drawbridge and a good quay. The commerce of Leith is considerable; and the vessels employed in London trade are, in general, of a large size the largest ships are those employed in the Greenland whale fishery. To Germany, Holland, the Baltic, are exported lead, glass ware, English woolen stuffs, and a variety of other goods; as to the other countries of Europe, the West Indies and America. Ships of great size are built at port; and here are several extensive ropewalks. There are also flourishing manufactures of leather, glass, window glass, and crystal; a great glass manufactory, a soap work, and some iron foundries. There are three churches in Leith, and an anatomical hospital for disabled seamen. Lon. 3 7 W., 56° N.

Leitrim, co. of Ireland, in the province of Ulster, bounded on the N. by Donegal and the NE. by Fermanagh, on the E. by Cavan and Longford on the SE., Roscommon on the S., and Sligo on the W. It is 42 ms. long, and broad; is a fertile country, and, though mountainous, produces great herds of black cattle, but contains few places of note. It contains 21 parishes.—Co. town of Leitrim, in Ireland; pleasantly situated on the river Shannon, 80 ms. from Dublin, and appears to have been formerly a place of some note. Lon. 8 30 W., lat. 53 57 N.

Leixlip, town of Ireland, in the co. of Kildare, seated on the Liffey, 8 ms. W. of Dublin.

Leman, real name of the fine lake on the western city of Geneva stands. It is commonly the name erroneously called, from the city, *Lake of Geneva*.

Lemay's Cross Roads, post office, Granville N. C., 26 ms. N. from Raleigh.

Lempster, town, Cheshire co., N. H., 30 ms. W. from Concord.

Lemberg, Austrian Poland, or *Leopold*, a great commercial city of Poland, capital of the palatinate of Red Russia, and now of the Austrian kingdom of Galicia and Lodomeria. It is well fortified and defended by two citadels, one of which is on an

ence without the city. The square, churches, public buildings, are magnificent. It has a Catholic archbishop and an Armenian and Greek bishop. It is seated on the Peltu, 90 N. W. of Kamienieck, and a 150 E. of Cracow, 24 26 E., lat 49 51 N.

Limbro, island of the Archipelago, on the coast of Romania, 22 ms. in circumference, with a town of the same name, and a harbor. Lon. 26° E., lat. 40 25 N.

Lingow, town of Westphalia, in the co. of Paderborn. Lon. 9° E., lat. 51 N.

Livingston, village and tp., Essex co., Vt., on Connecticut river, 65 ms. NE. from Montpelier.

Limnos, one of the principal islands of the Archipelago, now called Stalimene. It lies at the entrance of the Dardanelles, and has a town of the same name, which is capital of the island. It is 25 ms. in length, and 15 in breadth, and belongs to the Turks. The soil is pretty fertile, especially in corn and wine, and is famous for an island called Terra Sigiliata, formerly in greater esteem among physicians than at present. It contains about 75 villages, whose inhabitants are all Greek, and are very industrious. Lemnos or Stalimene is but a small town, standing on the declivity of a hill, on the top of which there is a temple, near the sea. It is the see of a Greek bishop, and is 20 ms. SE. of Mount Athos, whose shadow covers it a little before sunset, and 10 W. of Metelin. Lon. 25 28 E., lat. 40 25 N.

Linnon, one of the northeastern tps. of Butler co., N. C.

Lepida, ancient Leptis Parva, or Little Lepis, a town and seaport of Africa, 60 ms. S. from Tunis.

Lena, large river of Siberia, which, flowing in a northerly direction, receives 16 other rivers, and empties into the Frozen ocean by several mouths.

The Lena rises by two great branches, one E. and one W. from the Baikal sea. These branches meet at N. lat. 59°, and after flowing ENE. for 1,000 ms., receives the Aldan from the N., and abruptly turns to a northern course, and it maintains 800 ms., to its influx into the Frozen ocean. The Lena is, after the Jenisey river, the largest and longest river of Northern Siberia.

Its basin lies between lat. 52 and 72° N.

Lencica, strong town of Poland, capital of a province of the same name, with a fort, on a hill.

The nobility of the province hold their diet there. It stands in a morass, on the river Blura, 100 ms. SE. of Gnesna, and 110 N. by W. of Warsaw. Lon. 18 20 E., lat. 52 10 N.

Leham, town of Eng., in Kent. Seated on an eminence, 10 ms. E. of Maidstone, and 47 ESE. of London. Lon. 0 45 E., lat. 51 18 N.

Leinip, town of Germany, in the circle of Westphalia, in the duchy of Berg. Lon. 6 56 E., lat. 51 11 N.

Lenoir, co. N. C., bounded by Jones SE., Wayne SW., Wayne W., Greene N., and Cranston E. Length 20, width 16 ms.; area 320 sq. ms. Surface level; soil tolerably productive. The town, Kingston; stands on the N. bank of the New River, above 50 ms. by water above Newmarket. Pop. in 1820, 6,800; and in 1840, 7,605. Lon. lat. 35 12, lon. W. C. 0 40 W.

Lenoir's, post office, Roane co., Tenn., E. from Murfreesborough.

Lenox, co., U. C., is bounded on the E. by the co. of Addington, on the S. and W. by the bay of Quinte, to the easternmost boundary of the Mohawk village; thence, by a line running along the westernmost boundary of the tp. of Richmond, to the depth of 12 ms., and thence running N. until it meets the N. W. boundary of the co. of Addington. — Town and seat of justice, Berkshire co., Mass., half way between Pittsfield and Stockbridge, and about 20 ms. E. of Hudson river. Besides the ordinary co. buildings and places of public worship, this town contains an academy and foundry for casting hollow iron ware. Pop. in 1840, 1,315. Lat. 42 21 N., lon. W. C. 3 53 E. — Town of Madison co., N. Y., on Oneida lake and Erie canal, about 28 ms. W. from Utica.

Lenox Castle, town, Rockingham co., N. C., 16 ms. E. from Germantown, and 10 SW. from Danville.

Lenoxville, town and seaport of Carteret co., N. C., to the N. from Beaufort, and on a small creek or bay communicating with Core sound, 3 ms. W. from Beaufort.

Lens, town of Fr., in the dep. of the Straits of Calais, and late province of Artois, whose fortifications are demolished. It is 8 ms. NE. of Arras, and 95 of Paris.

Lentini, or *Leontini*, ancient town of Sicily, in the valley of Noto. It was greatly damaged by an earthquake in 1693, and is seated on a river of the same name, 17 ms. SW. of Catania, and 20 N. W. of Syracuse. Lon. 14 15 E., lat. 50 28 N.

Lentzen, town of Germany, in the circle of Upper Saxony. It is 74 ms. from Berlin.

Lenzburg, town of Switzerland, in the canton of Bern, seated on a small river, 8 ms. W. from Baden.

Lenzo, small river of Italy, which rises in the Apennines, and falls into the Po.

Leogane, town and fort of the W. Indies, with a good harbor, on the W. side of St. Domingo. Lon. 72 37 W., lat. 18 38 N.

Leominster, borough of Eng., in Herefordshire. It is famous for its fine wool, and is seated on the Lug, 25 ms. W. by N. of Worcester, and 137 WNW. of London. Lon. 2 35 W., lat. 52 20 N. — Town, Worcester co., Mass., 25 ms. NW. of Concord, and 43 from Boston, nearly in the same direction. Pop. in 1820, 1,800.

Leo, St., small but strong town of Italy, in the duchy of Urbino, on a mountain, near the river Merrechia, 8 ms. SW. of San Marino, and 15 N. W. of Urbino. Lon. 12 25 E., lat. 43 55 N.

Leon, fertile province of Spain, formerly a kingdom, bounded on the N. by the Asturias, on the W. by Galicia and Portugal, on the S. by Estramadura, and on the E. by Old Castile. It is 125 ms. in length and 100 in breadth, and is divided into almost two equal parts by the river Douero. — Small island belonging to Spain. It is separated from the continent by a strait about 10 ms. long. The town of Cadiz is built at its N. W. extremity.

Leon, ancient *Legia*, city of Spain, capital of the province of that name, built by the Romans in the time of Galba. It is an episcopal see, and has

the finest cathedral in all Spain. It was formerly richer and more populous than at present, and boasts the honor of being the capital of the first Christian kingdom in Spain. It is seated between two sources of the river Esra, 50 ms. SE. of Oviedo, and 165 N. by W. of Madrid. Lon. 5 13 W., lat. 42 45 N.

Leon, New.—See *New Leon*.

Leon de Nicaragua, town of Central America, in Nicaragua, the residence of the Governor. It is seated at the foot of a mountain, which is a volcano, at the NW. extremity of the Lake Nicaragua, 30 ms. from the Pacific ocean, and 104 NW. of Niagura. Lon. 88 10 W., lat. 12 25 N.

Leonard le Noblet, St., ancient town of Fr., in the dep. of Upper Vienne, and late territory of Limosin, with a considerable manufacture of paper, and another of cloth for clothing the army. It is seated on the Vienne, 12 ms. NE. of Limoges, and 195 S. of Paris. Lon. 1 32 E., lat. 45 54 N.

Leonardstown, village in St. Mary's co., Md., situated on the N. side of Potomac river, 33 ms. SE. of Port Tobacco, and 68 S. by E. of Washington.

Leonardsville, village, Madison co., N. Y., 95 ms. NW. by W. from Albany.

Leonhart, town of Germany, in the circle of Austria and duchy of Carinthia, 42 ms. E. of Clagenfurt. Lon. 15 23 E., lat. 43 57 N.

Leontini.—See *Lentini*.

Leopold.—See *Lemburg*.

Leopoldstadt, small but very strong town of Upper Hungary, built by the Emperor Leopold in 1665, seated on the Waag, 36 ms. NW. of Neuhäusel, and 62 E. of Vienna. Lon. 18 6 E., lat. 48 35 N.

Lepage, seigniory, Cornwallis co., L. C.

Lepanto, strong and very considerable town of Turkey, in Europe, and in Livadia. It is built on the top of a mountain, in form of a sugar loaf, and is divided into four towns, surrounded by as many walls, and commanded by a castle on the top of the mountain. The produce of the adjacent country is wine, oil, corn, rice, Turkey leather, and tobacco. It is seated on the Gulf of Lepanto, 112 ms. NW. of Athens, and 350 SW. of Constantinople. Lon. 22 13 E., lat. 38 34 N.

Lepanto, Gulf of, ancient sea of Alcyon, or Crissa, a deep bay of Greece, between Roumelia and the Morea, extending inland 80 ms., inclining a little S. of E. The entrance is not more than half a mile. The opposing capes, now called from their castles the Dardanelles of Lepanto, were known to the ancients as Rhion, on the side of Peloponnesus and Anti; Rhion on that of Ætolia. The naval battle of Lepanto was fought outside of the gulf, between Patras and the islands of Cursolari, upwards of 20 ms. W. from the town of Lepanto.

Lepers, Isle of, one of the New Hebrides, in the S. Pacific ocean. Lon. 168° E., lat. 15 23 S.

L'Epinay, seigniory, Devon co., L. C., on the S. side of St. Lawrence river, 30 ms. E. from Quebec.

Leray, tp., Jefferson co., N. Y., on Indian river, 20 ms. NE. from Sackett's Harbor. Pop. in 1820, 2,944.

Leraysville, village, Jefferson co., N. Y., in Leray.

Leria, or *Leiria*, strong town of Portugal, Estramadura, with a castle. It contains 3,000 inhabitants, and was formerly the residence of the kings of Portugal, and is 30 ms. S. of Coimbra, and 60 N. of Lisbon. Lon. 8 46 W., lat. 39 37 N.

Lerici, seaport of Italy, on the E. coast of the Gulf of Spezia, in the territory of Genoa. Lon. 10 55 E., lat. 44 5 N.

Lerida, ancient and strong town of Spain, Catalonia, on a hill, on the river Segra, 15 SW. of Balaguer, and 200 NW. of Madrid. Lon. 0 45 E., lat. 41 44 N.

Lerins, the name of two islands in the Mediterranean, on the coast of France, 5 ms. from Antibes. That nearest the coast, called St. Mary, was guarded by invalids, State prisoners but formerly been sent here. The other is called Honorat.

Lerma, town of Spain, in Old Castile, seated on the Arlanza, with the title of a duchy. Lon. 4 16 W., lat. 42 16 N.

Lernica, town of Cyprus, formerly a large city, appears from its ruins, situated on the S. side of the island, where there is a good road, and a small fort for its defence.

Lero, or *Leros*, anciently Leira, an island of the Archipelago, on the coast of Natolia. Lon. 26 0 E., lat. 37 0 N.

Leroy, village in Genesee co., N. Y., 10 ms. from Batavia.

Lerwick, chief town of the Shetland islands, situated on the east side of Mainland, the principal island. It is the rendezvous of the fishing boats from Britain, Holland, Denmark, and other parts. Lon. 1 30 W., lat. 60 20 N.

Les Eboulemens, seigniory, Northumberland co., L. C., about 60 ms. below Quebec.

Lescar, town of Fr., in the dep. of the Landes, Pyrenees, and late province of Gascony, on the S. 3 ms. NW. of Pau, and 42 SE. of Bayonne. Lon. 0 7 W., lat. 43 17 N.

Lesghistan, part of ancient Albania, now a province of Russia, in the mountains, W. from the Caspian sea. It lies between Daghistan and Georgia. Lat. 42 30 N.

Lessini, group, of which one is Lesina, and another Pharia, one of the ancient group of Absyrtides. See *Absyrtides*.

Leskeard, borough of Eng., in Cornwall, one of the coinage towns for tin. It has a considerable manufacture of yarn, which is chiefly directed of at Exeter. It is 31 ms. ENE. of Truro. Lon. 22 1 W. by S. of London. Lon. 4 36 W., lat. 50 27 N.

Lespare, town of Fr., in the dep. of Gironde, and late province of Guienne, in the environs of which are found transparent pebbles, resembling the diamonds of Alençon, and known by the name of *cailloux de medoc*, medoc stones. It is 31 ms. NW. of Bourdeaux.

Lessard, seigniory, Cornwallis co., L. C., on the S. side of the St. Lawrence.—Seigniory, Devon co., L. C., 45 ms. below Quebec.

Lessines, town of the Kingdom of the Netherlands, in Hainault, on the Dender, famous for its linen manufacture. It is 6 miles NE. of Brussels, and 28 SW. of Brussels. Lon. 3 46 W., lat. 51 40 N.

Lestoff, or *Leostoff*, town of Eng., in Suffolk; the coast is very dangerous to strangers. It is 7 m. S. of Yarmouth, and 115 NE. of London. Lon. 1 45 E., lat. 52 37 N.

Lestwithiel, borough of Eng., in Cornwall. It is seated in a vale, on the Fowey, not far from its mouth into Fowey haven. Formerly ships came as far as the town, but the channel is now stopped up. It is a woolen manufacture, and it is one of the coinage towns. Lestwithiel is 19 ms. WNW. of Plymouth, and 230 W. by S. of London. Lon. 3 8 W., lat. 50 27 N.

Letart, tp. in Meigs co., Ohio.

Lettere, a commercial town of Italy, in the kingdom of Naples, in Principato Citeriore. It is seated on the back of a mountain, 12 ms. NW. of Salerno, and 20 SE. of Naples.

Letterkenny, tp. in Franklin co., Pa. It is situated about 5 ms. NW. of Chambersburg, and 3 S. of Strasburg.

Levana, village on the northern bank of the Ohio river, in Brown co., Ohio. It lies 2 ms. below Fowey, immediately above the mouth of Straight Creek.

LEVANT. This word properly signifies the east, being *sing sun*, but is generally used, when speaking of trade, for *Turkey in Asia*, comprehending Arabia, Syria, Palestine, Egypt, the island of Rhodes, and the adjacent parts. The *Levant seas* are the E. part of the Mediterranean sea. The word comes from the Latin, through the Italian; *levare*, to rise, and has been applied by the ancients to those countries relative to Italy towards the rising sun.

Levant, town in Penobscot co., Me., 10 ms. from Bangor.

Levantine valley, valley of Switzerland, on the eastern side of Italy, lying between Mount St. Gothard and Lake Maggiore; now a part of the canton of Valais.

Leucate, town of Fr., in the dep. of Aude, and in the province of Languedoc, seated near a lake of the same name, 18 ms. S. of Narbonne. Lon. 3 30 E., lat. 43 0 N.

Leuchtenberg, town of Germany, in the upper part of Bavaria, seated on a mountain, near the river Esreimpt, 50 ms. NW. of Ratisbon. Lon. 10 6 E., lat. 49 40 N.

Leuven, town of the kingdom of the Netherlands, in Brabant, seated on the river Gheet, 10 ms. E. of Louvain. Lon. 0 5 E., lat. 50 55 N.

Levana, village in Brown co., Ohio, 102 ms. from Columbus.

Leven, Loch, beautiful lake in Kinross-shire, Scotland, 12 ms. in circumference, and somewhat of a circular form.

Leven, river of Scotland, in Dumbartonshire, issues from Loch Lomond, and, after a meandering course through a delightful vale, enters the estuary of the Clyde below Dumbarton.

Levenworth, village in Crawford co., Ia., on the western bank of Ohio river, 68 ms. below Louisville. According to the Western Navigator, this place is called *Leavenworth*; which see.

Leverett, town in Franklin co., Mass., 10 ms. from Greenfield.

Levings, village in Philadelphia co., Pa., 8 ms. NW. from Philadelphia, on the road to Norristown.

Levi, Isle du Fort, in the river St. Lawrence, in front of the tp. of Edwardsburgh, U. C.; it lies about 5 ms. below Ogdensburg.

Levi, Point, SE. side of St. Lawrence, 2½ ms. E. from Quebec.

Leugne, village of Fr., in the dep. of Upper Saone, and late province of Franche Comté, lying to the E. of Vesoul.

Leuk, town of Switzerland, in the Upper Valais, seated on an eminence, near the Rhone. Lon. 7 39 E., lat. 46 12 N.

Levroux, town of Fr., in the dep. of Indre, and late province of Berry, 35 ms. SW. of Bourges. Lon. 1 40 E., lat. 47 0 N.

Leuse, town of the kingdom of the Netherlands, in Hainault, seated on the Dender, 14 ms. NW. of Mons. Lon. 3 45 E., lat. 50 25 N.

Leutkirch, free imperial town of Germany, in Suabia, seated on a rivulet that falls into the Iller, 42 ms. NE. of Lindau. Lon. 10 12 E., lat. 47 53 N.

Leutmeritz, town of Bohemia, capital of a circle of the same name, seated on the Elbe, 30 ms. NW. of Prague, and 40 SE. of Dresden. Lon. 14 30 E., lat. 50 31 N.

Leutmuhl, town of Germany, in Bohemia, in the circle of Chrudim, 22 ms. E. of Chrudim, and 72 from Prague.

Leutsch, town of Germany, in the duchy of Carinthia.

Lewarden, populous and strong town of the kingdom of the Netherlands, 27 ms. W. of Groningen, and 65 N. by E. of Amsterdam. Lon. 5 32 E., lat. 53 11 N.

Lewenstein, town of Germany, in the circle of Franconia, capital of a county of the same name, with a fortress, 10 ms. E. of Hailborn. Lon. 9 38 E., lat. 49 18 N.

Lewentz, town of Upper Hungary, in the county of Gran, and on a river of the same name. It is 10 ms. N. of Gran. Lon. 18 31 E., lat. 48 21 N.

Lewes, borough of Eng., in Sussex, 30 ms. E. of Chichester, and 49 S. of London. Lon. 0 5 E., lat. 50 55 N.

Lewis, one of the largest of the Hebrides, or Western islands of Scotland, extending about 60 ms. in length, from N. to S., and from 13 to 14 in breadth, and parted by the sea into two divisions, called Lewis and Harries, the former lying to the westward of the other. Area 451,000 acres, lying between lat. 57 54 and 58 28 N. The air is temperately cold, moist, and healthy; great part of the low ground is flooded with lakes; the rest is arable in many places, and has been counted fruitful in oats, barley, rye, flax, and hemp.—Town of the Netherlands, in Brabant, on a morass, 10 ms. from Louvain. Lon. 4 10 E., lat. 50 50 N.

—Town in Essex co., Vt., 60 ms. NE. from Montpelier.—Co. in N. Y., bounded by Oneida S., Oswego SW., Jefferson NW., St. Lawrence NE., and Herkimer E. Length 50 ms., mean width 30; area 1,500 sq. ms. Surface hilly, soil productive in grain and pasturage. Chief town, Martinsburg. Pop. in 1820, 9,227; and in 1840, 17,830. Central lat. 44 10 N., lon. W. C. 3 30 E.—Town in Essex co., N. Y., 6 ms. N. from Elizabethtown.—Co. in Va., bounded by Nicholas S., Kenawha SW., Wood NW.,

Harrison N., and Randolph E. Length 45 ms., mean width 32; area about 1,400 sq. ms. Surface hilly, and soil generally rather barren. Chief town, Westtown. Pop. in 1820, 4,247; and in 1840, 8,151. Central lat. 38 50 N., lon. W. C. 3 40 W. —Town situated on the Ohio river, in Brown co. —Co. of Ky., on Ohio river, bounded by Fleming SW., Mason W., Ohio river N., and Greene E. and NE. Length 28 ms., mean width 14; area 380 sq. ms. Surface hilly, and soil productive. Chief town, Clarksburg. Pop. in 1820, 3,973; in 1840, 6,306. Central lat. 38 40 N., lon. W. C. 6 10 W. —C. H. and post office in Lewis co., Ky., 103 ms. NE. by E. from Frankfort.

Lewis bay, harbor of Yarmouth, Barnstable co., Mass., on the S. shore of Cape Cod.

Lewisberry, village in York co., Pa.

Lewisburg, capital of the island of Cape Breton. It was ceded to the English by the peace of 1763. The fortifications are now demolished. Lon. 61 30 W., lat. 46 50 N. —Village in Preble co., Ohio, 81 ms. SW. by W. from Columbus. —Village in Union co., Pa., on the right bank of Susquehannah river, 7 ms. above Northumberland. —Town and seat of justice for Greenbrier co., Va., 60 ms. W. from Lexington, Rockbridge co. Lat. 37 46 N., lon. W. C. 3 18 W. —Town in Muhlenburg co., Ky., on Green river, 40 ms. SE. from Russelville.

Lewisham, village of Eng., in Kent, on the river Ravensbourn, 5 ms. SE. of London, with an elegant church.

Lewis river, river of the Columbia valley, in the great Western territory of the U. S. It is the main middle fork of Columbia; rises about 30° W. from W. C., lat. 40° N., and, flowing NW. by its various windings 900 ms., joins Clark's river, and forms the Columbia.

Lewis's Store, post office in Spottsylvania co., Virginia, by post road 90 miles SSE. from Richmond.

Lewiston, town in Lincoln co., Me., on the E. side of Androscoggin, 13 ms. above its junction with the Kennebec. Pop. in 1820, 1,312. —Village in Niagara co., N. Y., on Niagara river, opposite to Queenstown, in U. C. Lewiston stands at the head of ship navigation from Lake Erie. A steamboat plies regularly from that place to Sackett's Harbor. Above Lewiston to navigable water, above the falls of Niagara, is about 8 ms. Pop. in 1820, 869; and in 1840, 2,533. —Village in Montgomery co., Mo., 50 ms. westerly from St. Louis.

Lewistown, village and seat of justice for Sussex co., Del., on Lewis creek, about 3 ms. from the light-house at Cape Henlopen. It is inhabited principally by pilots, and supports a small coasting trade. It lies in the lat. of 38 25 N., and lon. of 75 10 W., about 113 ms. S. of Philadelphia. —Village and seat of justice for Mifflin co., Pa., on the N. side of Juniata river, 55 ms. NW. of Harrisburg, and 162 of Philadelphia. Pop. in 1840, 1,006. Lat. 40 37 N., lon. W. C. 0 34 W.

Lewisville, village in Brunswick co., Va., about 70 ms. S. from Richmond. —Village in Chester district, S. C., 72 ms. N. from Columbia. —Village in Blount co., Ten., by post road 176 ms. E. from Murfreesborough.

Lexington, town in Middlesex county, Mass.,

11 ms. NW. from Boston. In this town, Aug. 19th, 1775, the first blood was shed in that Revolution which produced the United States. Pop. in 1820, 1,200. —Town in Green co., N. Pop. in 1820, 1,798. —Village in Erie co.,

—Town and capital of Rockbridge co., Va., about 150 ms. W. of Richmond. It stands about half a mile S. of the N. branch of James river, has about 120 houses, many of them handsome built of brick, a court-house, jail, and Presbyterian and Methodist houses of worship. The pop. is 766, and the town is improving. There is a public arsenal of the State, in which a number of arms is deposited, say 20,000 stand. This town is also noted for its seminaries of learning. Washington College was endowed by the illustrious Washington, whose name it bears, with 100 shares of the James River Company stock, which produce an annual income of \$2,400. It has a considerable library and philosophical apparatus. The faculty are composed of a president, two professors, and a tutor. Andover Academy, for the education of young ladies, has a large and handsome edifice, and teachers in the branches of education commonly taught in our schools. —Village in Rowan co., N. C., on the branch of the Yadkin, 136 ms. W. from Raleigh.

—District of S. C., bounded SE., S., and SW. by Orangeburg, W. by Edgefield, NW. by Newberry, and NE. by Fairfield and Richland, or Broad and Congaree rivers. Length 38 ms., mean width 27; area about 1,000 sq. ms. Chief town, Granby. Pop. in 1830, 8,083; and in 1840, 12,141. Central lat. 33 50 N., lon. W. C. 10 W. —Town and seat of justice for Oglethorpe co., Ga., on Ogechee river, 76 ms. NW. from Augusta. It is the seat of an academy. —Village in Richland co., Ohio, 62 ms. NNE. from Columbus. —Tp. in the northeastern corner of St. Louis co., Ohio, in which is a village of the same name.

—Village in Scott co., Ia., 95 ms. a little E. from Indianapolis. —Post office in Boone co., Mo., 163 ms. W. from St. Louis. —Town and seat of justice for Fayette co., Ky., on Town fork of Elkhorn river, 25 ms. ESE. from Frankfort, and about 90 S. from Cincinnati. Lat. 38 12 N., lon. W. C. 11 W. It contains, besides the ordinary county buildings and places of public worship, a university, academy for the education of young females, a public library, and a masonic hall. The progressive population and improvement of this town has been extremely rapid. Thirty five years ago, it contained about 50 ordinary houses. It is now a splendid town, abounding with elegant buildings, and inhabited by a cultivated and polished people. The manufacturing establishments are on a large scale, and numerous, consisting of nail factories, those of copper and tin, for cotton and woolen goods, grist mills, steam paper mills, rope walks, tanner breweries, and distilleries. Pop. in 1840, 6,900.

Transylvania university is located in this town, and is now a flourishing institution. In 1816 it received its present form, and in 1820 the number of students amounted to 235. —See Kentucky.

—Village and seat of justice for Henderson co., Ten., on Beech river, a small branch entering the Tennessee river from the W., 140 ms. SSE. from Nashville. Lat. 35 38, lon. W. C. 11 3 W. —C. H. and post office in Lexington district, S. C., 12 ms. from Columbia.

Lexington Heights, post office in Green co., N. Y., 50 ms. from Albany.

Lexington Hill, post office in Lillard co., Mo., ms. W. from St. Louis.

Leyden, city of South Holland, seated on the left bank of the Rhine, which here almost extends in a number of small channels. It is surrounded by a brick wall, with 8 gates. A university was founded in 1575, celebrated for its collegerooms, medicinal garden, anatomical theatre, astronomical observatory, and valuable library. The principal church is a superb structure, and the old city, with its town-house, custom-house, and house for the poor, deserve notice. Here are excellent manufactures of cloth, serge, and cambric; and the city produces the best Dutch butter and cheese. It consists of 50 islands, and has 145 bridges, the greater part built of freestone. The inhabitants are estimated at 50,000. In 1807, the university was almost destroyed by the catastrophe of a vesperade, a festival with gunpowder blowing up. Leyden is 15 ms. E. from the German ocean, and 20 SW. from Amsterdam. Lon. 4 28 E., lat. 52 8 N. *Lewis*, town in Lewis county, New York, on Black River, 33 miles north from Utica. Population in 1820, 1,203.

Liakura, ancient mountains of Parnassus. *Liakura* is only a corruption of *Lycoréa*, ancient name of the snowy summits above Delphi.

Lycoréa is not so much a single mountain, as a range of hills, which was once the western boundary of Phocis, and the line of separation of the Locri Ozolæ, and the Locri Opuntii and Epicuriæ, and is now the limit between the districts of Thessaly and Livadia. The two tops have a poetical existence, but the summit of the mountain separated by the chasm of *Castalia* must have those dedicated to Apollo and the Muses, and *Pæonius*, as the mountain itself is not notorious for its singularity. To go from *Castri* to the summit of *Liakura*, there is a rocky path, beginning a little to the E. of the ruined stadium. For the first two or three miles, the ascent leads up a steep course; there is then a plain to the right, in the direction of the *Castalian* precipices. These, and some other flat spots, according to Benjamin Jovian, were cultivated about A. D. 1170, by the Jews, who gave the name of Jerusalem to a village on the mountain. The path continues to ascend a hill covered with pines, then passes over a plain 4 or 5 ms. in compass, to the foot of a high peak, where there is a strong bubbling spring called *Drosogigis*, flowing into a lake a distance of a mile to the SE. Higher than this no traveller has ventured to go. The peak is covered with perpetual snow; and *Wheeler*, who went to the spots mentioned, thought the extreme summit called formerly *Lycoréa*, were as high as *Mount Cenis*. If viewed on a map of that part of Greece, and which extends sufficiently to the N. to embrace the great chain of *Hæmus*, *Parnassus*, *Liakura*, appears simply as a continuation of the mountains, or *Metzovo*. From *Liakura* flows to the E. the branches of the *Bœotian Cephissus*, and to the SW. the petty streams flowing into the bay of *Lepanto*.

Lim-po.—See *Ning-po*.

Lanus, *Lebanon*, the name of mountains of Syria in Asia, between Syria and Palestine, ex-

tending from the Mediterranean sea as far as Arabia.—See *Asia*, p. 81.

Libau, seaport of Courland, on the Baltic, with a harbor. It is 35 miles N. of Memel. Lon. 21 40 E., lat. 56 31 N.

Liberty, tp., Sullivan co., N. Y., on Delaware river.—SW. tp. of Adams co., Pa., on the waters of Middle and Marsh creeks, commencing 4 ms. SW. from Gettysburg. Pop. in 1820, 1,027.—Village, Tioga co., Pa., 123 ms. a little W. of N. from Harrisburg.—Village and seat of justice, Bedford county, Va., on one of the higher branches of Otter river, 25 miles SE. from Fincastle. Lat. 37 16 N., lon. 2 26 W.—County of Ga., bounded by the Atlantic ocean SE., McIntosh S., Alatomaha river SW., Tatnall NW., and Bryan NE.; length 50 miles, mean width 10, area 500 sq. ms. Chief town, Riceborough. Pop. in 1820, 6,695; and in 1840, 7,241. Central lat. 33 48 N., lon. W. C. 4 36 W.—Tp., Trumbull co., Ohio.—Tp. in the S. part of Delaware co., O.—Tp. in the northern limits of Fairfield co., O.—Central tp. of Highland county, O., in which is situated the town of Hillsborough.—Tp. in the northern limits of Clinton co., O.—Large tp. in the SE. quarter of Butler co., O., in which is situated the town of Princeton.—Village, Jefferson tp., Montgomery co., O., 9 miles westerly from Dayton.—Village, Union co., Ia., 85 ms. SE. by E. from Indianapolis.—Village, Casey co., Ky., on Green river, 68 miles S. from Frankfort.—Village, Smith co., Tenn., about 20 miles S. from Carthage, and 50 miles E. from Nashville.—Post office and seat of justice, Amite co., Miss., 45 ms. SE. from Natchez. Lat. 31 21 N., lon. W. C. 13 42 W.

Liberty Corner, village, Somerset county, N. J., 33 miles E. from Easton, Pa., and 26 W. from Newark.

Liberty East, village, Marion co., Tenn., 102 miles SE. from Murfreesborough.

Liberty Hall, village, Pittsylvania co., Va., 121 miles SW. from Richmond.—Pendleton district, S. C., 107 ms. NW. from Columbia.—Village, Morgan co., Ga., about 40 ms. NNW. from Milledgeville.

Liberty Hill, village, Kershaw district, S. C., 25 ms. NNW. from Camden, and 40 NNE. from Columbia.—Village, Greene county, Ala., about 50 ms. SSW. from Tuscaloosa.

Libertytown, village, Frederick county, Md., 10 ms. NE. from Fredericktown.

Libourne, small well-built town of Fr., in the dep. of Gironde, and late province of Guienne. It is one of the staples of commerce of Bordeaux, and is seated on the Dordogne, 20 miles NE. of Bordeaux, and 205 S. by W. of Paris. Lon. 12' W., lat. 44 58 N.

LIBERUM-VETO, "I forbid all further deliberation." The most deadly of the many causes which led to the final dissolution of Poland. It was *Schimsky*, a deputy from Lithuania, who, in the reign of John Casimir, introduced this germ of discord, by which any one member was empowered to suspend the whole deliberations of the Polish legislature.

Lich, or *Lichia*, town of Germany, in the landgrave of Hesse, and co. of Solms, 18 ms. N. of Frankfort. Lon. 8 24 E., lat. 50 15 N.

Lichfield, city of Eng., in Staffordshire, in a fine champaign country, 14 miles SE. of Stafford, and 119 NW. of London. Lon. 1 44 W., lat. 52 54 N.—See *Litchfield*.

Lichstall, handsome town of Germany, in the bishopric of Basle.

Lichtallen, or *Liostal*, town of Switzerland, in the co. of Basil. It is seated on the Ergetz, 8 ms. SE. of Basil. Lon. 7 39 E., lat. 47 29 N.

Lichtenau, town of Germany, in the circle of Westphalia, 9 miles from Paderborn. Lon. 8 23 E., lat. 51 52 N.—Town of Germany, in Hesse Cassel. It is 24 ms. from Naumburg. Lon. 9 28 E., lat. 51 1 N.—Fortress of Franconia, seated on the Revel. It is subject to the city of Nuremberg, and is 17 miles from that city. Lon. 11 12 E., lat. 49 10 N.

Lichtenburg, town of Germany, in the circle of Franconia, the vicinity of which abounds with quarries of marble, and mines of iron and other metals. Lon. 11 41 E., lat. 50 16 N.—Town of Germany, in the circle of Franconia, in the margravate of Cullembach, 20 miles NE. of Cullembach. Lon. 12 2 E., lat. 50 25 N.

Lichtenberg, castle of Fr., in the dep. of Lower Rhine, and late province of Alsace, seated on a rock, near the Vosges mountains, and looked upon as impregnable. It is 12 ms. NNW. of Hagenau. Lon. 7 45 E., lat. 48 55 N.

Lichtenfels, town of Germany, in the circle of Franconia and bishopric of Bamberg, seated on the Maine, 15 ms. NE. of Bamberg. Lon. 11 10 E., lat. 50 20 N.

Lichtensteig, handsome town of Switzerland, the capital of the co. of Tockenurg. It is seated on the Thur, 31 ms. E. of Zurich. Lon. 9 8 E., lat. 47 15 N.

Lichtenstein, principality of Germany, between the Tyrol, Voralberg, and Switzerland.

Lick, central tp., Jackson co., Ohio, so called from the salt lick within its limits.

Licking, interior county of Ohio, bounded on the N. by Knox, E. by Muskingum, S. by Perry and Fairfield, and on the W. by Franklin and Delaware counties. It is 30 ms. long from E. to W., and 24 broad from N. to S., containing 700 sq. miles. Surface pleasantly diversified by hill and dale. Soil highly fertile. It is drained by Licking creek, affording an extensive variety of sites whereon to use the advantage of water power. It abounds also with iron ore, which is already manufactured into hollow ware and bar iron. Chief town, Newark. Central lat. 40 10 N. lon. W. C. 5 30 W.

Licking, river of Ky., rising on Floyd, Pike, and Montgomery counties, and, flowing NW. between or through Bath, Fleming, Nicholas, Harrison, Bracken, Pendleton, and Campbell counties, falls into the Ohio between Newport and Covington, opposite the city of Cincinnati.

Licking, tp., Muskingum co., O., 10 ms. NW. from Zanesville.—Small river of Ohio, draining Licking county, and, flowing ESE., falls into the Muskingum opposite Zanesville.—Tp., Licking county, Ohio.

Licking Creek, post office, in the SE. angle of Bedford co., Pa., 25 miles SE. from Bedford, and 10 ms. N. from Hancockstown.

Lickville, village, Greenville district, S. C., 116 ms. NW. from Columbia.

Licola, lake in the kingdom of Naples, the chief Lucrine Lake, formerly famous for plenty of excellent fish; but, in 1538, an explosion of a volcano changed one part of it into a mountain of ashes, and the other into a morass.

Liconia, village, Harrison co., Indiana.

Lida, town of England, in Kent, one of the Cinque ports. It is 26 ms. from Canterbury, 74 from London. Lon. 58' E., lat. 50 58 N.

Lidd, town of Lithuania proper, in the palatinate of Wilna, situated on the Detta, 56 miles from Wilna. Lon. 25 34 E., lat. 53 50 N.

Liddel, river of England, in Roxburghshire, abounding in fish. It is the only one in that county that flows southward, and falls into Solway Firth near the mouth of the Esk.

Liddisdale, district of Scotland, in Roxburghshire, comprehending the whole southern angle of that county. It admits of little cultivation, and is chiefly employed in pasture.

Lidford, village of Eng., in Devonshire, on the river Lid, 7 ms. N. of Tavistock.

Liefkenstock, fortress of Dutch Flanders, 8 miles from Antwerp. Lon. 4 10 E., lat. 51 30 N.

Liege, formerly a bishopric of Westphalia, now a province of the kingdom of the Netherlands, bounded on the N. by Brabant and Guelderland, on the E. by the duchies of Limburg and Juliers, on the S. by Luxemburg and the Ardennes, and on the W. by Brabant and the country of Namur. It is fruitful in corn and fruits, and contains mines of iron, lead, and coal, besides quarries of marble. 2,900 sq. ms. Pop. 240,000.

Liege, large, ancient, and strong city, capital of the territory of its name. Here the river Meuse is divided into three branches, and, after passing through the city, under several bridges, unites again. Liege is 4 miles in circumference, and has 16 gates; it has also 10 large suburbs. It is 10 miles WSW. of Cologne. Lon. 5 35 E., lat. 50 38 N. Population 50,000.

Lien-tchou, city of China, of the first rank, in the province of Quang-tong. Its territories belong to the kingdom of Tonquin, from which it is separated by mountains. It is seated on the Liang, which forms a convenient harbor for boats. 325 ms. WSW. of Canton. Lon. 108 40 E., lat. 21 40 N.

Lieu-kieu, or *Leoo keoo*, the general name of the islands lying between Formosa and Japan. They form a kingdom, the inhabitants of which are civilized, and of a mild, gay, affable, and temperate disposition. Each island has a particular name; the principal one, called Lieu-kieu, is 126 miles long, and 28 broad; but the others are insignificant. The chief products are sulphur, copper, and shells and mother of pearl. The king is tributary to China. Kint-ching, the capital, in the part of Lieu-kieu, is in lon. 127 30 E., lat. 26 50 N.

Liere, town of the Netherlands, in Brabant, which has a great trade in cattle, seated at the junction of the Great and Little Nethe, 10 miles SE. of Antwerp.

Liesina, island of Dalmatia, in the Gulf of Venice, about 58 ms. long and 12 broad, and abounds in corn, olives, saffron, and wine.—Seaport of Dalmatia, capital of an island of the same name, with a harbor capable of containing vessels of all sorts. Lon. 16 23 E., lat. 43 30 N.

iesse, town of France, in the department of Ane. It is 6 ms. E. of Laon.
iffey, river of Ireland, which rises in the co. Wicklow, runs W. thence into Kildare, where is a cataract near Leixslip, and then, turning N., passes through the co. of Dublin, and by the of that name, below which it enters the Irish sea.
ifford, borough of Ireland, in the co. of Donegal, situate on the Foyle, 22 ms. NE. of Donegal.
light-houses on the coast of the United States. We insert the following tabular statement, as may regard their positions as accurately determined:

List of latitudes and longitudes of light-houses on the coast of the United States, as determined from the preliminary calculations of the coast survey.

* Built since the survey of the harbor was made.

The foregoing determinations are deduced, for the latitudes, from observations made at various stations of the coast survey; and the longitudes, from the three solar eclipses of 1834, '36, and '38, observed at different stations of the survey, all being reduced to the city hall of New York, by the results of the main triangulation, to make that point the starting point of the longitudes; and thence the positions of the light-houses are again deduced, by the results of the proper ulterior operations of the survey; all which are referred to Greenwich by the difference of longitude, determined, as stated, for the city hall of New York.

The foregoing exhibits a number of determinations of light-houses by their geographic latitudes, and their longitudes referred to New York city, and to the observatory of Greenwich, England; as from the latter longitudes are generally calculated by English navigators.

The addition of 2° 20' 24'', difference of longitude between Greenwich and Paris, would reduce the longitudes to the meridian of Paris; and the subtraction of 17° 39' 36'' would refer them to the meridian of the island of Ferro, accepted for the common maps as dividing meridian between the two plani-globes.

These results are, as stated in the superscription to the list, obtained from the preliminary calculations, taken to the nearest second in the arc, (so called,) omitting decimals, which may answer all the purposes of navigation, at the same time that, in the language of the sciences, it is indicating the state of the data and the limits of their corrections, if any, by the fully finished operations of the survey.

F. R. HASSLER.

WASHINGTON CITY, May 9, 1843.

Ligne, town of the kingdom of the Netherlands, in Hainault, on the Dender, 12 ms. NW. of Mons.

Lignerolles, town of France, in the department of Allier, 4 ms. S. of Montluzon.

Lignieres, town of France, in the department of Cher, with a collegiate church and a castle, 24 ms. SSW. of Bourges.

Lignitz, fortified town of Silesia, capital of a principality of the same name. Here is a spacious academy, founded by Joseph I for the instruction of young gentlemen. Lignitz has a considerable trade in cloth and madder, and stands at the conflux of the Katzbach and Schwartzwasser, 32 ms. S. of Glogau. Lon. 16 16 E., lat. 51 11 N.—Government of Prussian Silesia, enclosed by those of Breslaw, Schweinitz, Jawer, Glogaw, and Wolaw.

Ligny, town of the Netherlands, seated on the Orney, 8 ms. SE. of Bar le Duc.

Ligonia, village, Somerset co., Me., 81 ms. N. from Portland.—Post office in the NE. angle of Westmoreland co., Pa.

Ligonton, village, Amelia co., Va.

Ligor, seaport of the peninsula of Malacca, capital of a small territory of the same name, with a magazine belonging to the Dutch East India Company. It is seated on the E. coast. Lon. 100 5 E., lat. 7 40 N.

Ligueil, town of France in the department of Indre and Loire, and late province of Touraine, seated on a brook, in a very fertile country, 23 ms. SSE of Tours. Lon. 59 1/2 E., lat. 47 3 N.

Lillers, town of France, in the department of the Straits of Calais, and late province of Artois, whose fortifications are demolished. It is seated on the Navez, 17 ms. NW. of Arras. Lon. 2 35 E., lat. 50 3 N.

Lillo, fort of Dutch Brabant, on the E. side of the Scheldt, 7 ms. N. of Antwerp. Lon. 4 18 E., lat. 50 30 N.

Lilly Point, village, King William co., Va., 36 ms. NE. from Richmond.

Lima, village, Beaver tp., northwestern part of Columbiana co., Ohio, 15 ms. NE. of New Lisbon.—County seat, Allen co., Ohio, situated on Ottawa river, a branch of Auglaize river, 100 ms. NW. of Columbus, 12 ms. N. of Wapaughkonnetta, and 65 ms. SSW. of Perrysburg, on Maumee river. N. lat. 40 40, lon. 7 7 W. W. City.

Lima, city of and capital of Peru. It is a corruption of the Indian word *rimac*. The Spanish name imposed by the founder is *Ciudad de los Reyes*, or city of the kings. It was founded by Francis Pizarro, in 1535, about 6 ms. from the Pacific ocean and the port of Callao. The streets are laid out in straight lines. The houses are constructed of wood on account of the frequent earthquakes, and are generally low from a similar cause, and the heat of the climate. The centre square and the surrounding buildings are very magnificent. Pop. about 50,000, of whom about 20,000 are whites, the residue mixed races, Indians, negroes, &c.

Independent of the emolument derived from being the capital of the province, Lima derives incalculable advantages as a mart of trade. It is indeed the emporium of one of the richest sections of South America. Its exports are gold and silver; imports, silk, cloths of several kinds, lace, linen, iron ware, &c. Lon. only 8' W. from Washington; lat. 12 2 S. Lon. W. from Cadiz 70 50.

Notwithstanding the frequent earthquakes which destroyed the city in the years 1586, 1630, 1655, 1687, and 1764, Lima occupies an area of 10 ms. circumference, including the suburb of San Lazars. The pop. amounts to 52,627 inhabitants—composed of 292 clergy, 991 religious monks and friars, 572 nuns, 84 beatas, 17,215 Spaniards and white creoles, 3,912 Indians, 8,960 negroes, and the remainder, intermediate classes, mixtures of the others.

Lima, the intendency of, comprehends 74 doctrines, (curacies,) 3 cities, 5 towns, and 173 tps. Pop. 149,112 souls. It is divided into 8 districts.

Lima, province of Peru, extending 300 ms. along the Pacific ocean, and inland to the Andes

about 70 ms.; bounded by the Pacific ocean S. N. by Truxillo, NE. by Guancavelica, and N. by Arequipo.—Town, Livingston co., N. 16 ms. W. from Canandaigua. Pop. 1820, 1,

Limale, town of the kingdom of the Netherlands, in Brabant, seated on the river Dyle, 11 SE. of Brussels. Lon. 4 30 E., lat. 50 45 N.

Limasol, town of the island of Cyprus, sitt on the SE. side, 25 ms. SW. of Famagusta. is the ancient Amathul.

Limavady, town of Ireland.—See *New Limavady*.

Limbourg, or *Limpurg*, town of Germany the electorate of Treves, seated on the Lahn ms. E. of Nassau, and 20 N. of Mentz. Lo 51 E., lat. 50 24 N.

Limburg, province of the Netherlands, bounded on the N. by the duchy of Juliers, on the E. the duchy and the territory of Aix-la-Chapelle, on the S. and W. by the bishopric of Liege, which it is separated by the Maese. It is 42 long and 30 broad, and contains some of the iron mines in the Netherlands, and the soil is good for corn.—See *Luxemburg*.

Limburg.—Here is a manufacture of wo cloths, and it is famous for excellent cheese. seated on a mountain, almost inaccessible, near river Verse, 15 ms. SE. of Liege. Lon. 6 5 lat. 50 38 N.

Lime, town of England, in Dorsetshire.—*Lyme Regis*.

Lime, or *Limen*, village of Eng., in Kent ms. W. of Hithe. It was formerly a port, choked up by the sands.

Lime Creek, Monroe co., Ala.

Limerick, co. of Ireland, in the province Munster, 48 ms. long and 23 broad; bounded the N. by Shannon, on the W. by Kerry, on S. by Cork, and on the E. by Tipperary. It contains 130 parishes, and sent 8 members to Parliament before the Irish union. It is a fertile country and well inhabited, though the W. parts are mountainous.—Town, York co., Me., about 12 W. of the river Saco. Pop. in 1820, 1,377.—Village, Jefferson co., N. Y.—Tp., Montgomery co., Pa., on the NE. side of Schuylkill, 5 E. from Pottsgrove, and 25 W. from Philadelphia. Pop. in 1820, 1,577.

Limerick, or *Louth Meath*, city of Ireland, the co. of Limerick, and the metropolis of the province of Munster. Within a century, it reckoned the second city in the kingdom; present, the linen, woolen, and paper manufactures are carried on here to a great extent; and the port of provisions is very considerable. Population 50,000. It is 40 ms. S. of Galway, and 94 S. of Dublin. Lon. 8 34 W., lat. 52 42 N.

Lime Rock, post office, Providence co., R. I. ms. from Providence.

Limestone, co. of Ala., bounded by Tennessee river SW., Lauderdale co. W., Giles co., in Tennessee, N., and Madison, in Ala., E.; length width 24 ms.; area 560 sq. ms. Elk river passes obliquely through the NW. angle of this co., a beside being washed by Tennessee river along SW. border, it is drained by Limestone, Mud Round Island, and several other fine creeks. The surface is waving rather than hilly, and much

soil is excellent. Staple, cotton. Chief town, Port. Pop. in 1820, 9,871; and in 1840, 37,474. Central lat. 34 50 N., lon. 10 25 W.

Limington, town, York co., Me., on the W. side of Saco river, 4 ms. W. of Standish, and 22 W. of Portland. Population in 1810, 1,774; in 1840, 2,122.

Limmat, river of Switzerland, which is formed at the junction of the Mat and the Linth; the latter issuing from the NW. extremity of the Alps near Wallenstadt, and the latter flowing from the S. The Limmat, continuing its course NW., flows through the Lake of Zurich, and falls into the Aar, below Baden.

Limoges, ancient and considerable town of Fr., capital of the dep. of Upper Vienne, and late territory of Limosin, on the Vienne, 50 ms. NE. of Poitiers, and 110 E. of Bourdeaux. Lon. 1 20 W., lat. 45 50 N.

Limousin, late province of Fr., bounded on the N. by Marche, and the E. by Auvergne, on the S. by Querci, and on the W. by Perigord and Anjou. It is covered with forests of chestnut, and contains mines of lead, copper, tin, and iron, but the principal trade consists in cattle and horses. It now forms the dep. of Upper Vienne. *Limoux*, populous and commercial town of Fr., in the dep. of Aude, and late province of Languedoc. It has a manufacture of cloth, and its environment produces excellent white wine. It is seated on the Aude, 37 ms. W. by S. of Narbonne, and 50 W. of Toulouse. Lon. 2 16 E., lat. 43 4 N.

Limburg.—See *Limbourg*.

Linares, town of Mexico, in New Leon, between Bravo and St. Fernando rivers. Lon. W. 2 20 W., lat. 25 50 N.

Linche, or *Linke*, strong town of Fr., in the department of the North, and late province of French Flanders, seated on a river, 15 ms. SW. of Dunkirk. Lon. 2 20 E., lat. 51° N.

Lincoln, capital of Lincolnshire, on the side of a high hill, on the Witham, which here divides into three streams. The chief trade is in coal, brought by the Trent and Fosslike, and oats and barley, which are sent by the Witham, and there is also a small manufacture of camlets. It is 32 ms. S. of Nottingham, and 133 N. of London. Lon. W., lat. 53 15 N.

Lincolnshire, co. of Eng., 77 ms. long and 45 W. wide; bounded on the N. by the Humber, which separates it from Yorkshire, E. by the German ocean, S. by the Wash and Norfolk, and W. by Cambridge and Northamptonshire, SW. by Rutlandshire, and W. by the cos. of Leicester and Nottingham. It contains 1,783,680 acres; is divided into 30 hundreds and 630 parishes; has 1 city and 31 market towns, and sends 12 members to Parliament. The principal rivers are the Humber, Trent, Witham, Welland, and Ancholm. This county is divided into three districts, called Holland, Lincoln, and Lindsey. Pop. in 1801, 208,557; in 1811, 237,891; and in 1821, 283,058.

Lincoln County, U. C., is a very fine and populous settlement, consisting of 20 tps., containing about 6,000 souls, and furnishes five battalions of militia. It occupies the peninsula between Lake Ontario and Niagara river, Lake Ontario, and the river

Lincoln, tp., Sunbury co., New Brunswick, on

the W. side of St. John's river.—Co., Me., on both sides of the Kennebec, bounded by the Atlantic ocean S., Kennebec bay and Androscoggin river SW., Kennebec co. NW., Hancock NE., and Penobscot bay E. Length 45, mean width 25 ms.; area, exclusive of water, about 800 sq. ms. The surface is extremely indented by bays and rivers. The whole southern and southeastern part is composed of an intricacy of islands and long peninsulas, extending between the rivers and bays towards the ocean. The northwestern and northern sections rise into a finely diversified country. Soil productive in grain and pasturage. Chief town, Wiscasset. Pop. in 1820, 53,189; and in 1840, 63,517. Central lat. 44° N., lon. W. C. 7 35 E.—NW. tp., Hancock co., Me., 27 ms. NW. from Castine.—Tp., Grafton co., N. H., between the sources of the Merrimac and Ammonoosuck rivers, 60 ms. above Concord.—Tp., Addison co., Vt., 21 ms. SW. from Montpelier.—Tp., Middlesex co., Mass. Pop. 1820, 706.

Lincoln, co., N. C., bounded by S. C., S., Rutherford W., Burke NW., Iredell or Catawba river NE., and Catawba river or Mecklenburg E.; length 48, mean width 25 ms.; area 1,200 sq. ms. It is washed, on its northern, northeastern, and eastern borders by Catawba, and drained by Little Catawba and several branches of Broad river. Surface moderately hilly, and soil on the streams excellent. Chief staple, cotton. Chief town, Lincolnton. Pop. in 1820, 18,147; and in 1840, 25,160. For central lat., see *Lincolnton*.—Co., Ga., on Savannah river, bounded by Columbia SE., Wilkes SW., and Savannah river NE.; length 22, mean width 10 ms.; area 220 sq. ms. Central lat. 33 50, lon. 5 33 W. C. Chief town, Lincolnton. Pop. in 1820, 6,458; and in 1840, 5,895.—Co., Ky., bounded by Pulaski SE., Casey SW. and W., Mercer NW., Garrard NE., and Rockcastle E.; length 27, mean width 17 ms.; area 450 sq. ms. It occupies the dividing ground between Green and Dick's rivers; is hilly and broken. Chief towns, Stanford and Crab Orchard. Pop. in 1820, 9,979; and in 1840, 10,187. Central lat. 37 35 N., lon. W. C. 7 20 W.—Co., W. Tennessee, bounded by Madison co., in Ala., S., by Giles co., in Tennessee, W., Bedford N., and Franklin E.; length 25, breadth 23 ms.; area 580 sq. ms. This co. is divided into nearly two equal parts by Elk river. Surface diversified, and soil productive. Staple, cotton. Chief town, Fayetteville. Pop. in 1820, 14,761; and in 1840, 21,493. Central lat. 35 13 N., lon. Washington City 9 28 W.

Lincoln, village, Mercer co., Ky., on Dick's river.—Co., Mo., bounded by Mississippi river E., Cuivre river SE., Montgomery co. SW. and W., and by Pike NW. and N. Length 24 ms., breadth 22; area 528 sq. ms. This co. is drained by Cuivre river. Chief town, Alexandria. Cent. lat. 39°, lon. W. C. 13 32 W. Pop. in 1840, 7,449.

Lincolnton, town and seat of justice, Lincoln co., N. C., on Little Catawba, 150 ms. SW. by W. from Raleigh, and 31 ms. NW. from Charlotte. Lat. 35 27 N., lon. W. C. 4 14 W.—Town and seat of justice, Lincoln co., Ga., 40 ms. NW. from Augusta. Lat. 33 49 N., lon. W. C. 5 45 W.

Lincolnvile, or *Duck Trap*, town, Hancock co., Me., on the W. side of Penobscot bay, 16 ms. W. from Castine.

Lindau, city of Suabia. It is a trading place, seated on an island of the lake of Constance, joined to the main land by a long bridge, 22 ms. ESE. of Constance, and 75 SW. of Augsburg. Lon. 9 41 E., lat. 47 32 N.

Lindau, town and castle of Upper Saxony, in the principality of Anhalt Zerbst, 5 ms. N. of Zerbst.

Lindau, or *Lendow*, town of Brandenburg, in the Prussia, 5 ms. NE. of Ruppin.

Linden, village, Marengo co., Ala.

Lindeness.—See *Naze*.

Lindenfels, town of Germany, in the palatinate of the Rhine, 14 ms. NNE. of Manheim.

Lindisfarne.—See *Holy Island*.

Lindley's Store, post office, Orange co., N. C.; by postroad 59 ms. NW. from Raleigh.

Lindsay's Store, post office, Albemarle co., Va., 80 ms. NW. from Richmond.

Lindsey's Mills, post office, Trigg co., Ky.; by post road 231 ms. SW. from Frankfort.

Lindsleystown, village, Steuben co., N. Y.

Line Creek, post office, Montgomery co., Ala., SE. about 60 ms. from Cahaba.

Lingen, town of Westphalia, in the principality of Munster, capital of a co. of its name. It is seated on the Ems, 48 ms. NNW. of Munster. Lon. 7 25 E., lat. 52 32 N.

Linkeang, city of China, in the province of Kiangsi, on the Yuhu, 410 ms. N. by E. of Canton. Lon. 115° E., lat. 27 58 N.

Linköping, town of Sweden, in E. Gothland, on the river Steng, near the Lake Roxen, 26 ms. W. of Nordköping.

Link Leair, post office, Chenango co., N. Y., 132 ms. W. from Albany.

Linlithgow, borough of Scotland, capital of Linlithgowshire. The chief manufacture is leather and shoes; the woolen and bleaching business is also carried on. Linlithgow is 17 ms. W. of Edinburgh. Lon. 3 33 W., lat. 56° N.

Linlithgow, or *West Lothian*, co. of Scotland, 20 ms. long and 12 broad, bounded on the N. by the Frith of Forth, SE. by Edinburghshire, SW. by Lanarkshire, and NW. by Stirlingshire. The surface is finely diversified with hill and dale, and the chief rivers are the Avon and Amond. It is fertile in corn and pasture, and produces coal, iron, limestone, and lead. Pop. 1801, 17,844; in 1811, 19,451; and in 1821, 22,685.

Linnhe Loch, arm of the sea, on the W. coast of Scotland, which separates the cos. of Argyle and Inverness.

Linnich, town of Germany, in the duchy of Juliers, seated on the river Roer, 5 ms. NNW. of Juliers.

Linos, island in the Mediterranean, on the coast of Tunis, near the Lampedosa, and 12 ms. in circumference. Lon. 12 31 E., lat. 36 50 N.

Lin-tcheou-fou, city of China, in the province of Kiangnan. It has nothing to distinguish it but the excellence of the fruit with which it abounds.

Lintz, town of Germany, capital of Upper Austria. Here is a hall, in which the States assemble, a bridge over the Danube, and several manufactures. It is seated at the confluence of the

Danube and Traen, 42 ms. E. of Passau, and W. of Vienna. Lon. 14 3 E., lat. 48 16 N. Town of Germany, in the circle of the Lower Rhine, and electorate of Cologne, seated on the Rhine, 15 ms. W. of Coblentz, and 18 S. of logne. Lon. 7 10 E., lat. 50 37 N.

Linton, town of Eng., in Cambridgeshire, ms. SE. of Cambridge, and 46 N. by E. of don. Lon. 0 22 E., lat. 52 8 N.

Lipari, the largest, most fertile, and pop. of the Lipari islands, about 15 ms. in circumference. It was celebrated among the ancients; by the description of Aristotle, it appears to have been considered by the sailors in his time, Strombolo is in ours, as a light-house, as its fire were never extinguished. It abounds with currant grape; cotton also grows here; and quantities of pomice are gathered.—A town, capital of the island of Lipari. This town has a garrison, and stands on the S. side of island. Lon. 15 20 E., lat. 38 35 N.

Lipari Islands, group of islands lying in the Mediterranean, to the N. of Sicily, 12 in number and nearly as follows in the order of their names: Lipari, Strombolo, Volcano, Salina, Alicudi, Alicudi, Panari, Volcanello, Vachel, Lisca, Dattolo, and Tila Navi. They are subject to the King of Naples, and bring in a good revenue.

Lippa, town of Hungary, in the banna Temeswar, on a mountain 22 ms. NE. of Temeswar, and 75 of Belgrade. Lon. 22 45 E., lat. 45 51 N.

Lippe, river of Westphalia, which washes Lippehorn, Lipstadt, and Ham, and falls into the Rhine above Wesel.

Lipstadt, considerable town of Westphalia, capital of the co. of Lippe. It was once free imperial, afterwards subject to its own counts, and now to the King of Prussia. It carries on a great trade in preparing timber for building vessels on the Rhine, with which it has a communication by the river Lippe. It is seated on a morass, 17 WSW. of Paderborn, and 30 SE. of Munster. Lon. 8 30 E., lat. 51 42 N.

Liquet, town of Fr., in the dep. of the St. Omer of Calais, and late province of Artois, 12 ms. of St. Omer. Lon. 2° E., lat. 50 43 N.

Liqueo, or *Likeo Islands*.—See *Lieou-Kieo*.

Lis, river of the Netherlands, which has its source in Artois, and running NE. into Flanders, passes by Aaire, St. Venant, Armentiers, Me. Courtray, and Deynse, and then falls into the Scheldt, at Ghent.

Lisbon, considerable city, the capital of Portugal, with a university, a tribunal of the inquisition. It was almost totally destroyed by an earthquake, November 1, 1755. The harbor will contain 10,000 sail of ships, which ride in the greatest safety; and the city, being viewed from the southern shore of the river, affords a beautiful prospect, as the buildings gradually rise above each other. It contained before the earthquake, at most, 100,000 inhabitants; and it is seated on the Tajo, 7 ms. from its mouth, 178 W. by N. of Seville, and 255 S. by W. of Madrid. Lon. 9 5 W., lat. 38 42 N.—Town, Lincoln co., Me., on the Androskoggin, 23 ms. W. from Wiscasset. Pop. 1820, 2,240.—Post office, Grafton co., N. H., by post road about 80 ms. NW. from Concord.

—Town, New London co., Ct., 7 ms. N. from Norwich.—Town, St. Lawrence co., N. Y., 3 m. below Ogdensburg. Pop. in 1820, 930.—

—Village, Lincoln co., Ga., on the right bank of the Savannah river, below the mouth of Broad

Lisburn, borough of Ireland, in the co. of An-

It has a large manufacture of linen cloth, and is seated on the Laggan, 8 ms. SW. of Belfast. Lon. 6° W., lat. 54 41 N.—Village in the western part of Cumberland co., Pa.

Lisica, one of the Lipari islands, 3 ms. from Lilibon. It is a desert spot.

Lisier, St., town of Fr., in the dep. of Arriège, late province of Couserans, on the Satat, 50 SE. of Auch, and 390 SW. of Paris. Lon. 10° E., lat. 42 56 N.

Lisieux, town of Fr., in the dep. of Calvados, late province of Normandy. It has a good manufacture, particularly in linen cloth, and is seated at the confluence of the Touque and Orbec, 12 ms. from the sea, and 40 SW. of Rouen. Lon. 0 20 W., lat. 49 11 N.

Lisle, large, handsome, and strong town of Flanders, in the dep. of the North, and late province of Flanders, of which it was the capital. It is esteemed one of the richest and most commercial towns in France, and the inhabitants are computed amount to 65,000. It is called Lisle (that is, the island) because it was formerly surrounded by marshes. The principal trade is in linens. It is seated on the river Deule, 14 ms. from Tournay, 32 SW. of Ghent, 37 NW. of Paris, and 130 N. of Paris. Lon. 3 9 E., lat. 50 8 N.—Town, Broome co., N. Y., situated near the Tioughneoga river, near its junction with the Chemung, and about 14 ms. NE. of Union. Pop. in 1820, 3,083.—Village and post office, Lisle, Broome co., N. Y. This is a separate post office from that of Lisle, though in the same tp.

Lismore, one of the western islands of Scotland, in the mouth of Loch Linhe, a capacious lake in W. shire. It is a fertile island, 7 ms. long and 1 1/2 broad.

Lisonzo, river of Italy, which rises in Carinthia and falls into the Gulf of Venice, at the harbor of the same name.

Lissa, island in the Gulf of Venice, on the coast of Dalmatia. It produces excellent wine, and is 12 ms. W. of Ragusa. Lon. 17° E., lat. 43 52 N.—Town of Poland, in the palatinate of Posen, of which it is the capital, 50 ms. W. of Kalisz. Lon. 16 50 E., lat. 52° N.

Lissa, village of Silesia, 16 miles from Breslaw. It is seated on the Weisnitz, and remarkable for a great victory gained by the Prussians over the Austrians in 1757.

Litchfield, NW. county of Connecticut, bounded by N. Y. W., Mass. N., Hartford county E., and New Haven SE., and Fairfield SW.; length 38 miles, mean width 22 ms., area 836 sq. ms. Surrounded by very hilly or mountainous. The Housatonic river flows through and the Naugatuck and Fanning-river rise in Litchfield. Though broken, it contains an excellent soil, productive in grain, fruits, and pasturage. Chief town, Litchfield. Pop. in 1820, 41,266; and in 1840, 40,448. Central lat. 41 5 N., lon. W. C. 3 45 E.

Litchfield, village and capital of Litchfield co.,

Conn., 24 miles W. of Hartford, and 44 NW. of New Haven. Pop. in 1810, 4,630; in 1820, 4,610. Lat. 41 44 N., lon. W. C. 4 50 E. The tp. is elevated, and in part mountainous, though well cultivated. Litchfield Great pond, a very curious sheet of water, one of the sources of the Shepang river, affords fine mill seats at its outlet. There are in Litchfield 6 fulling mills, 5 or 6 tanneries, 18 or 20 saw mills, 4 forges, 1 slitting mill, 1 or 2 nail factories, and 14 or 15 places of public worship. This town contains also Morris's academy, a flourishing and very respectable institution. In Litchfield village is a seminary for the education of young ladies, which has long and continues to hold a distinguished rank amongst similar institutions in the United States. The Litchfield Law school was established in 1784, by the honorable Tapping Reeve, and has become one of the most systematic law schools in the United States.

Litchfield, village and tp., Hillsborough county, N. H., 26 ms. S. from Concord.—Tp., Herkimer co., N. Y., 10 miles S. from Utica. Pop. in 1820, 1,730.—Village, Bradford co., Penn., by post road 193 miles N. from Harrisburg.—Village, Grayson co., Ky., 70 ms. SSW. from Louisville.—town, Lincoln county, Me. Population in 1820, 2,120.

Lithuania, former name of an extensive country of Europe, bounded on the S. by Volhinia and part of Red Russia, on the W. by upper Poland, Polacia, Ducal Prussia, and Samogitia, on the N. by Livonia, and on the E. by Russia. It is about 300 ms. in length and 250 in breadth, and is watered by several large rivers, the principal of which are the Dnieper, the Lewina, the Niemen, the Priecz, and the Bogg. It is a flat country like Poland, and the lands are very proper for tillage. The soil is not only fertile in corn, but it produces honey, wood, pitch, and vast quantities of wool. This, perhaps, is the only country in Europe where Jews cultivate the ground. The peasants are in a state of the most abject vassalage. In 1772 the Empress Catharine compelled the Poles to cede to her all that part of Lithuania bordering upon Russia, and including at least one-third of the country. This she erected into the two governments of Polosk and Mohilef. In 1793, in conjunction with the king of Prussia, she effected another partition of Poland, in consequence of which she extended her dominions over the whole of Lithuania. It forms at present the Russian governments of Wilna, Grodno, and Minsk. The name of this country is in Polish Litwania, and pronounced Litvania.

Litiz, village and Moravian settlement, Lancaster co., Pa., about 7 ms. N. from the city of Lancaster. This village was founded in 1757, and, though small, has the appearance of quietness and neatness, characteristic of the sect by which it is inhabited.

Little Beaver Bridge, post office, Columbiana co., O., 55 ms. NW. from Pittsburg.

Little Britain, post office, Orange co., N. Y.—Tp., Lancaster co., Pa. It is situated on the W. side of Octorara creek, in the SE. corner of the county.

Little Compton, town, Newport co., R. I. It is a maritime district, and famous for its dairies.

Little Creek, hundred of Kent county, Del. It

is on the N. side of Jones's river, about 6 ms. from Dover.

Little Cape Capon, creek, Hampshire co., Va.

Little Creek, tp., Sussex co., Del.

Little Darby, considerable western branch of Big Darby, rising in the northwestern quarter of Madison co., Ohio, and running southeastwardly into the western side of Big Darby, opposite Georgesville. Along the borders and westward of this stream are extensive bodies of open prairie land, much of which is fertile and valuable.

Little Egg Harbor, tp. of Burlington county, New Jersey. Soil generally sandy, though well cultivated near the coast. The sandy land in the interior is covered with pine and oak timber. Principal town, Tuckerton. Pop. in 1820, 1,102.

Little Egg Harbor, or *Mullican's river*, rises in Atlantic, Burlington, and Gloucester counties, N. J., by a number of creeks which unite 11 or 12 ms. from the sea, and, separating the counties of Atlantic and Burlington, falls into Little Egg Harbor inlet $2\frac{1}{2}$ ms. SE. from Tuckerton. It is navigable for shallops as high as Basto furnace.

Little Egg Harbor, bay or inlet, a sheet of salt water separated from the ocean by Tucker's island and Long beach. It communicates with the ocean by the Old and New inlet of Little Egg Harbor.

Little Egg Harbor, new inlet, lies $7\frac{1}{2}$ miles due S. from Tuckerton, admits vessels of from 15 to 18 feet draught, many of which during the late war entered and discharged valuable cargoes. The old inlet, to the N. from Tucker's island, is now but little used, except for very light vessels.

Little Falls, flourishing village on the Mohawk river, at what is called the Little Falls in that stream, 8 ms. below Herkimer.

Little Hockhocking, an inconsiderable stream in the S. part of Washington co., Ohio, running into the Ohio river 5 miles below the mouth of Great Hockhocking.—Village, Washington co., Ohio, 116 ms. SE. from Columbus.

Little Indian Creek, small stream of Clermont co., O., putting into the Ohio river 2 miles below Big Indian creek.

Little Miami, river rising in the southwestern corner of Madison county, Ohio, and, after running SW. about 70 miles, across Clark, Green, Warren, and Hamilton counties, joins the Ohio 7 miles above Cincinnati. It is one of the best mill streams in the State; 30 or 40 mills, among which 2 or 3 are paper mills, are already erected upon it. The principal streams running into it are East branch, Shawnee, Obannon, Turtle, Todd's fork, Cæsar's, and Massie's creeks, on the eastern side, and Sugar and Beaver creeks on the W. For navigation it is of little consequence, but for mills is preferable to the Great Miami.

Little Missouri, the name of two rivers of the United States, one a branch of Missouri joining that stream from the SW., 90 miles above the Mandan villages; and the other a branch of Washita, in Arkansas, rises with the Little river of the N., flows E., and falls into the Washita from the W.

Little Plymouth, village, King and Queen co., Va., by post road 60 ms. NE. from Richmond.

Little Red River, post office, Ark., 100 miles from Little Rock.

Little Rest, post office, Washington co., by post road a little W. of S. from Providence

Little River, is the name of several small streams in the United States. Little Red river, a branch of White river, in Arkansas. Little river, one of the constituents of Pedee, rises in North Carolina, and, in part of its course, separates North Carolina from South Carolina. Little river, branch of Savannah river, which it joins 30 miles above Augusta. Little river, in Georgia, falls into Ogeechee 12 ms. above Milledgeville. Little river, Christian county, Ky., which falls into Cumberland river of Indiana, joining Wabash river above Cincinnati. Little North river, a branch of Red river rises in Arkansas, and falls into Red river a distance above the NW. limit of Louisiana. Little river S., another branch of Red river, in Texas, and, flowing E., falls into Red river at the NW. angle of Louisiana.

Little River, post office, Horry district, S. by post road 92 miles E. from Columbia.—Village and post office, Lincoln co., Me., 29 ms. from Portland.

Little Rock, village and seat of justice for Arkansas co., and seat of government, Arkansas. Its new capital is situated on the right bank of Arkansas river, about 120 ms. by land above the mouth of that stream, 400 miles SSW. from St. Louis, and 300 NNW. from Natchez. Lat. $34^{\circ}17'$, W. C. $155^{\circ}55'$ W.

Little Sandy Salt Works, village, Greenup co., Ky., 132 ms. E. from Frankfort.

Littleton, town, Grafton co., N. H., situated on the E. side of the Connecticut river, 45 ms. from Haverhill, and about 40 NW. of Conway. Village and tp. of Middlesex co., Mass., 23 ms. WNW. from Boston. Pop. in 1840, 1,728. Village, Sussex co., Va., 70 ms. SSE. from Richmond.—Village, Warren co., N. C., 67 ms. SE. from Raleigh.—Village and post office in the northern part of Grafton co., N. H., 91 ms. a little W. of N. from Concord.

Little Valley, town, Cattaraugus co., N. Y., 25 ms. NW. from Hamilton, on Alleghany river, and 50 ms. S. from Buffalo.

Little York, village, Montgomery co., Ohio, 77 miles SW. by W. from Columbus.—Village, Hardin co., Ky., 91 ms. SW. from Frankfort.

Littorate, now part of the Austrian kingdom of Illyria, formerly a district of Dalmatia, containing the towns of Trieste, Fiume, Buccari, and Pola to Re.

Litwania.—See *Lithuania*.

Livadia, province of Turkey in Europe, bounded on the N. by Janna, E. by the Archipelago, S. by the Morea, and W. by the Mediterranean. It includes ancient Greece, properly so called, and its capital is Athens.

Livadia, town of European Turkey, in the province of its name; it has a trade in wool, corn, rice, and, according to most gazetteers, is situated near the Gulf of Lepanto, 68 ms. NW. of Athens. Lon. $23^{\circ}20'$ E., lat. $38^{\circ}42'$ N. Livadia is the ancient Lebadea, the Midea of Homer, and is situated on the Gulf of Lepanto, but at least 12 ms. in the interior, and with Mount Libethron intervening. Livadia is built on the steep declivity of a hill, and contains 1,500 houses, inhabited by Greeks, but contains about 100 Turkish

Livadia, as a province, is nearly commensurate with Greece proper, or the Achaia of the Romans, except the Morea.

Livadoastro, bay of ancient Alcyonium Mare, the same eastern angle of the Gulf of Lepanto.

Livadiere, seignior, Hartford co., L. C., 12 SE. from Quebec.

Livenza, river of Italy, in the territory of Venetia, which runs on the confines of Trevisano and Belluno, and enters the Gulf of Venice between the mouth of Piava and the town of Caorlo.

Livermore, town, Oxford co., Me., 18 ms. NE. from Paris. Pop. in 1820, 2,134.

Liverpool, borough and seaport of Eng., in Lancashire. It had but one church, which was a source of ease to Walton (a village 3 ms. off) till near 1699, when an act passed to make the town a distinct parish, and erect a new church; since which time it has been gradually advancing in population. The number of inhabitants in 1773 was 34,407; in 1790, it was 55,732; in 1801, 65,531; and in 1811, no less than 94,376. Its increase was owing to the salt works, but particularly to American commerce; and it is now become, with respect to population and commerce, the second port in the kingdom. It is seated on the river Mersey, and has a harbor, formed by great labor and expense, there being 8 wet docks, secured by large flood gates, bound by keys, and a half in length, where 1,000 vessels, and 100,000 tons of shipping, may lie in the greatest safety. The trade of Liverpool is general, but the principal branch is the African and West India trade. The American, Baltic, and Portugal commerce, is also very great, as well as that of the Greenland fishery; the coasting trade employs a great number of vessels, and many good ships are built.

By the late inland navigation, Liverpool is in communication with the rivers Dee, Ribblesdale, Trent, Humber, Severn, and Thames. Its principal manufactures are fine porcelain, earthenware, watches, and stockings, some glass, iron, and copperas works, many roperies, and upwards of 50 breweries. The exchange is a handsome modern edifice of stone, with piazzas for the merchants, and over it is the town hall. There is also a handsome exchange, a custom-house, an assembly room, an elegant theatre, a library, and a bowling-green on Mr. Howard's plan. Beside the parochial churches, there are ten or more other churches for the established religion; also Roman Catholic chapels and dissenting meeting-houses. We enumerate the asylums for the wretched and unfortunate of every description and denomination, and far exceed our bounds. Liverpool is 48 ms. from Lancaster, and 202 NW. of London. Lon. W., lat. 53 22 N.

Liverpool, tp., Queen's co., Nova Scotia, on the north side of Fundy. — Village, Salina tp., Onondago co., N. Y., 3 ms. from Salina. — Village in the western part of Perry co., Pa., on the right bank of the Schuylkill river, about 30 ms. above Harrisburg. — Village, York co., Pa., 6 ms. N. from York. — Village, Medina co., O., on the west road 170 ms. NE. from Columbus.

Livingston, tp., Columbia co., N. Y., contained 651 inhabitants in 1810, and in 1820, 1,938. It is situated 40 ms. S. of Albany, on the river

Hudson. — Co., N. Y., on both sides Genesee river, bounded S. by Steuben and Alleghany, W. by Genesee, N. by Monroe, and E. by Ontario. Length 30 ms., width 20, area 600 sq. ms. In respect to soil and surface, this is a very diversified country. It is generally hilly and fertile, but exceptions to both these features exist; extensive flats skirt Genesee river, and part of the upland is sterile. This co. was formed from part of Ontario and Genesee. Lat. 42 50 N., lon. W. C. 1 13 E. Pop. 1840, 35,140. — Village, Essex co., N. J., 54 ms. NE. from Trenton. — Co., Ky., bounded by Tennessee river SW., by Ohio river W. and NW., by Trade Water river, or Union co., NE., and Caldwell co. SE. Length 47 ms., mean width 15, area about 720 sq. ms. Cumberland river passes through and enters Ohio river in this co. The surface is generally level, and much of the soil highly fertile. Chief town, Salem. Pop. 1820, 5,824, and in 1840, 9,025. Central lat. 37 18 N., lon. W. C. 11 10 W.

Livingstonville, village, Schoharie co., N. Y., 22 ms. westerly from Albany.

Livonia, province of the Russian empire, which, with that of Esthonia, has been reciprocally claimed and possessed by Russia, Sweden, and Poland, and for more than two centuries has been a perpetual scene of the most bloody wars. It was finally wrested from the Swedes by Peter the Great, and confirmed to the Russians by the peace of Nystadt, in 1721. It now forms the government of Riga, or Livonia, of which Riga is the capital. It is bounded on the N. by the government of Esthonia, on the E. by that of Pskof, on the S. by that of Polotsk and part of Poland, and on the W. by the Gulf of Livonia. It is 250 ms. from N. to S., and 150 from E. to W. The land is so fertile in corn that it is called the granary of the North. Area 21,000 sq. ms. Pop. 600,000.

Livonia, village and tp., Livingston co., N. Y., between Genesee and Hemlock lake, 20 ms. SW. from Canandaigua. Pop. 1820, 2,427. — Village, Washington co., Ia., 97 ms. S. from Indianapolis.

Lizard, the most southern promontory of Eng., whence ships usually take their departure when bound to the westward. Lon. 5 10 W., lat. 49 57 N.

Llanarth, town of Wales, in Cardiganshire, 17 ms. E. by N. of Cardigan, and 212 W. by N. of London. Lon. 4 20 W., lat. 52 13 N.

Llanbèder, town of Wales, in Cardiganshire, on the river Tyvy, over which is a bridge into Carmarthenshire, 24 ms. E. of Cardigan, and 197 W. by N. of London. Lon. 4 8 W., lat. 52 9 N.

Llandilovawr, town of Wales, in Carmarthenshire, on the river Towy. Lon. 3 58 W., lat. 51 55 N.

Llanelly, town of Wales, in Carmarthenshire. It trades much in coal, and is seated on a creek of the Bristol channel. Lon. 4 10 W., lat. 51 43 N.

Llangadoc, town of Wales, in Carmarthenshire, 185 ms. W. by N. of London. Lon. 3 48 W., lat. 51 54 N.

Llangollen, town of Wales, in Denbighshire, 184 ms. from London.

Llangunner, village of Wales, in Carmarthenshire.

shire. Sir Richard Steele had a private seat here, and here he died in 1729.

Llanroost, town of Wales, in Denbighshire, on the Conway, 15 ms. S. of Denbigh, and 222 N.W. of London. Lon. 3 58 W., lat. 53 6 N.

Llantrissant, town of Wales, in Glamorgan-shire, in S. Wales, 10 ms. N.W. of Landaff, and 166 W. of London. Lon. 3 22 W., lat. 51 28 North.

Llanwilling, town of Wales, in Montgomeryshire, near the river Cane, 15 ms. N. by W. of Montgomery, and 179 N.W. of London. Lon. 3 8 W., lat. 52 40 N.

Llanymddydd, town of Wales, in Montgomeryshire, 18 ms. S.W. of Montgomery, and 157 W.N.W. of London. Lon. 3 28 W., lat. 52 19 N.

Llanymdover, town of Wales, in Carmarthenshire, near the Towy, 26 ms. E.N.E. of Carmarthen, and 181 W. by N. of London. Lon. 3 42 W., lat. 51 56 N.

Llaugharn, town of Wales, in Carmarthenshire, in S. Wales, at the mouth of the Towy, 7 ms. S.W. of Carmarthen, and 233 W. by N. of London. Lon. 4 28 W., lat. 51 48 N.

Llobregat, two rivers of Spain, in Catalonia, the least considerable of which falls into the bay of Rosas, but the largest rises in the Pyrenean mountains with the Noguera, and enters the Mediterranean 15 ms. S.W. from Barcelona.

Lloyd's, post office, Essex co., Va., 68 ms. N.E. from Richmond.

Lloydsville, village, Otsego co., N. Y., 90 ms. W. from Albany.

Lo, St., town of France, in the department of the Channel, and late province of Normandy, with a good citadel. It has considerable manufactures of cloths, stuffs, iron, and gold lace. It is seated on the Vire, 12 ms. E. of Coutances, and 125 W. by N. of Paris. Lon. 53' W., lat. 49 6 N.

Loanda, small island of Africa, on the coast of Angola. It is 12 ms. in length, and three-quarters of a mile in breadth. It has a town of the same name, which is the capital of the kingdom of Angola, in South Guinea, with a very good harbor. It belongs to the Portuguese. Lon. 12 25 E., lat. 8 45 S.

Loango, considerable kingdom of Africa.—See *Africa*, pp. 25, 26.

Looans or *Lavora*, town of Genoa, near the sea coast. Lon. 7 58 E., lat. 44 9 N.

Lobau, town of Polish Prussia, with a castle, where the bishop of Culm resides. It is 25 ms. E. of Culm. Lon. 19 E., lat. 53 25 N.

Loboa, town of Spain, in the province of Estramadura, seated on the Guadiana, 22 ms. E. of Badajoz. Lon. 6 22 W., lat. 38 32 N.

Lobos, islands of Peru, near the coast. Lat. 6 25 S.

Locarno, town of Switzerland, capital of a district of the same name, which is one of the four transalpine bailiwicks. It contains 1,500 inhabitants. Locarno was once situated on the lake, and had a port capable of receiving large barks; at present it stands at the distance of a quarter of a mile, which is owing to the accumulation of sand brought down by the torrent Maggia. It is 46 ms. N. of Novara, and 55 N. by W. of Milan. Lon. 8 31 E., lat. 46 10 N.

Lacarno, Lake of.—See *Maggiore*.

Lochaber, bleak, barren mountains, and ged district, in the S.W. part of Inverness-shire.

Lochem, town of Dutch Guelderland, in co. of Zutphen, on the Borrel, 10 ms. E. of phen. Lon. 6 13 E., lat. 52 12 N.

Locher Moss, morass in Dumfriesshire, Scotland, 10 ms. in length and three in breadth. Here vast oak trees, and also canoes and and have been frequently dug up.

Loches, town of Fr., in the dep. of Indre Loire, and late province of Touraine, on the Indre, 15 ms. S. of Amboise, and 20 W. Tours. Lon. 51° E., lat. 47 10 N.

Lochmaben, royal borough of Scotland, in Invernesshire. Lon. 3 19 W., lat. 55 19 N.

Loch Ranza, post office, Montgomery co., 36 ms. easterly from Cahaba.

Lochrida, or *Ocirida*, town of Turkey in Thessaly, in Albania. It is a pretty large place, well fortified; and is 62 ms. S.E. of Durazzo. Lon. 20 40 E., lat. 41 40 N.

Lochta, town of Sweden, in E. Bothnia, on the Gulf of Bothnia, 90 ms. S. of Tornea. Lon. 24 16 E., lat. 64 20 N.

Lochwinnoch, town of Renfrewshire, Scotland, on a lake of the same name, called also Loch Semple Loch, near 3 ms. in length.

Lochy Loch, lake of Scotland, in the S.W. part of Inverness-shire, 10 ms. in length, and from one to two in breadth. From the N.W. waters of Loch Arkek descend into this Loch. Out of it runs the river Lochy, which falls into Loch Eil at Fort William.

Locke, town, Cayuga co., N. Y., 23 ms. S. from Auburn. Pop. in 1820, 1,559.

Lockport, very thriving village of Niagara co., N. Y., on the western or Erie canal, 220 ms. from the canal W. from Utica, and by the canal N.N.E. from Buffalo. Lat. 43 11 N., lon. 78 1 C. 1 43 W. It is at this village that the first series of locks, from Lake Erie, occur in the canal, and brings the water from the Erie canal to that of Rochester, by double locks of 12 ft. each. Lockport, in 1823 had a pop. of 500, it now (1826) exceeds, it is probable 1,000, and in 1840, 9,125. The village is on the high ground above the locks.

Lockwood, village, Sussex co., N. J., 78 ms. N. from Trenton.

Locust Grove, post office, Orange co., Va., on post road, 86 ms. N.W. from Richmond.

Loddon, town of Eng., in Norfolk, 8 ms. S. of Norfolk, and 113 N.E. of London. Lon. 18 E., lat. 52 36 N.

Lodesan, district of Italy, in the duchy of Milan. It lies along the river Adda, and is very fertile and populous. Lodi is the capital.

Lodeve, town of Fr., in the dep. of Hérault, and late province of Languedoc. Its manufactures of cloth render it very rich, but it is seated in a dry barren country, at the foot of the Cévennes, 27 ms. N.W. of Montpellier. Lon. 30 E., lat. 42 37 N.

Lodi, strong town of Italy, in the duchy of Milan, and capital of the Lodesan. It is seated in a pleasant country, on the Adda, 15 ms. N.W. of Placentia, and 20 S.E. of Milan. Lon. 26 E. lat. 45 15 N.

Lodimont, village, Abbeville district, Sth

lina, by post road, 134 ms. W. from Colum-

odomera.—See *Galiccia*.

odrone, town of Italy, in the bishopric of Trent, and on the small Lake Idro, at the place where receives the river Chiese, 31 ms. SW. of Trent. 10 46 E., lat. 46 N.

ofustus Heights, very elevated Bluffs in Adams Miss., on the E. bank of the river Mississippi, 65 ms. below the town of Natchez.

ogan, co. of Va., bounded NW. by Cabell, Cawha N., Fayette NE., Mercer E., Tazewell, and S., and Lawrence co., Ky., W. Pop. 4,309. N. lat. 38°, and lon. 5 W. W. C. Insect in the NW. part of this co. slope NW., drained by the branches of Big Sandy and Guyandotte rivers.

ogan co., Ky., bounded by Tenn., Todd co., W., Muhlenburg NW., Butler N., and Simpson NE. Length 30 ms., mean width 21, area 500 sq. ms. It occupies the high ground between Cumberland and Green rivers. It is drained by the river, branch of Cumberland, and by Big Water and Muddy rivers, branches of Green river.

ogan surface is waving rather than hilly, soil excellent. Chief town, Russelville. Pop. in 1820, 12,23; and in 1840, 13,615. For central lat. Russelville.

ogan, co., Ohio, bounded N. by Hardin, E. by Union, S. by Champaign, SW. by Miami, W. by Shelby, and NW. by Allen. Length 26 ms., breadth 21, area 500 sq. ms. Miami river, Big, Mill, and Darby creeks, and Mad river, rise in this co. The land is, however, tolerably level and fertile. Chief town, Bellefontaine. Pop. in 1820, 3,181, and in 1840, 14,015. Central lat. 40 22 N., lon. W. C. 6 50 W.

ogan, village and seat of justice for Hocking Ohio, on the N. bank of Hocking river, 18 ms. SE. from Lancaster. Lat. 39 36 N., lon. W. C. 5 26 W.

og-house landing, post office, Beaufort co., N. C., 170 ms. S. of E. from Raleigh.

ogowogorod, town of Poland, in Lower Volhynia, seated on the W. bank of the Dnieper. 31 7 E., lat. 50 46 N.

ogronno, town of Spain, in Old Castile, in a country abounding with excellent fruits and wines, and all the necessaries of life. It is seated on the Ebro, 115 ms. N. by E. of Madrid. 2 20 W., lat. 42 29 N.

oire, the principal river of Fr., which rises in the mountains of the Cevennes, in Languedoc, and begins to be navigable at Roanne, is joined to the Seine by the canals of Briare and Orleans, and flows into the Bay of Biscay below Paimboeuf. The basin of the Loire lies in the central and western part of France. This river has a comparative course of about 450 ms., but, like most other rivers of southern and western Europe, has but little navigation.—Dep. of Fr., contiguous to the depts. of Rhone and Isere. Chief town, M. thrisson.

oire and Cher, dep. of Fr., including the late province of Blaisois. It takes its name from the river Loire and Cher, the first of which falls into the Sarte above Angers; and the last empties into the Loire, 5 ms. above the confluence of the latter with the Indre. Blois is the capital.

Loire, Lower, dep. of Fr., containing part of the late province of Bretagne. It has its name from the river Loire, which forms its S. boundary, and then falls into the Bay of Biscay. Nantes is the capital.

Loire, Upper, dep. of Fr., late the province of Velay. It takes its name from the river Loire, which rises near its S. boundary. Puy is the capital.

Loiret, dep. of Fr., late the province of Orleans. It takes its name from a small river that falls into the Loire. Orleans is the capital.

LOMBARDS, from *longobardi*, *long beards*, one of the Germanic nations who partitioned the Roman empire, and in A. D., 568, fixed themselves in Italy, and from whom comes Lombardy as a name for northern Italy. The name or epithet of Lombards, was long applied to the Gibelines, and extended to Italian merchants and usurers who spread themselves over northern and central Europe.

Lombardo, Venetian kingdom, name imposed on Austrian Italy by the Congress of Vienna, in 1815.

Lombardy, name formerly given to part of Italy, and which comprehended almost all the ancient Cisalpine-Gaul. It lies towards the N., and was divided into the Upper and Lower. Upper Lombardy was the western part, and comprehended Piedmont, with its dependencies, and the duchies of Montserrat and Milan. Lower Lombardy, which was the eastern part, comprehended Parma, Modena, Mantua, Ferrara, the Bolognese, the territories of the Church, the Paduan, Vicentin, the Veronese, the Bressan, the Cremase, and the Bergamese. See arts. *Austria* and *Italy*.

Lombardy, village, Amelia co., Va., 50 ms. SW. from Richmond.—Village, Columbia co., Ga., 64 ms. NE. by E. from Milledgeville.

Lombardy Grove, post office, Mecklenberg co., Va., 110 ms. SW. from Richmond.

Lombes, town of Fr. in the dep. of Gers, and late province of Gascony, lately a bishop's see. It is seated on the Save, 27 ms. SW. of Toulouse. Lon. 1° E., lat. 43 39 N.

Lomond, Ben, mountain of Scotland, in the N. of Stirlingshire, about 3,200 feet above the level of the lake at its bottom. From this lofty mountain are seen Loch Lomond, the Clyde, the Forth, Edinburgh, the eastern coast as far as the Cheviot Hills, the isles of Bute and Arran, the rock of Ailsa, Ireland, the mountain of Plynlimmon, in Wales, the Skiddaw in Cumberland, and the hills far beyond it.

Lomond, Loch, beautiful lake in Dumbartonshire.

Lon, or Lune, beautiful and romantic river which rises in Westmoreland, and flowing by Kirby Lonsdale in that co., falls into the Irish sea, below Lancaster. Its banks are beautiful.

London, metropolis of Great Britain, one of the largest and most opulent cities of the world, mentioned by Tacitus as a considerable commercial place in the reign of the Roman Emperor Nero. In its most extensive view, as the metropolis, it consists of the city, properly so called, the city of Westminster, which was once a mile from London, and the borough of Southwark, beside the suburbs in Middlesex and Surry, within what are called the bills of mortality. London and Westminster

are situated in Middlesex, on the N. side of the river Thames. Southwark is situated on the opposite bank, in Surry. The extent of the whole, from Limehouse and Deptford, to Milbank and Vauxhall, is above 7 ms.; but the greatest breadth does not exceed 3.

In the former editions of my Dictionary, attempts were made to describe London, but in this present edition no such attempts were made on any large city, not even those of the United States. Any thing deserving the name of a description of such cities as London, Paris, St. Petersburg, New York, &c.; would demand a volume as large as this treatise. This city now contains a population little, if any, short of *two millions*. There is no rational doubt but that in this city more wealth and other means of human power are concentrated than was ever the case with any other, not excepting Rome. The tide ascends the Thames to the city, the greatest distance inland of any tide of Europe, yielding commercial facilities to the many other causes which have produced this giant city. Lat. 51 31 North.

London, New.—See *New London*.

London, district of U. C., along Lake Erie.—Town of U. C., on the Thames, about 100 ms. NE. by E. from Detroit, and 150 SW. by W. from York. The surrounding country is extremely well adapted to agriculture. Lat. 42 55 N.—Town and seat of justice for Madison co., Ohio, 25 ms. W. by S. from Columbus. Pop. in 1820, 200, but rapidly increasing. Lat. 39 51 N., lon. W. C. 6 30 W.

London Bridge, village in Princess Anne co., Va., 140 ms. SE. from Richmond.

London Britain, tp. in Chester co., Pa., adjacent to the NE. angle of Cecil co., Md.

London Harbor, a bay of the island of St. John, on its north side. Lon. W. C. 13 52 E., lat. 46 26 N.

Londonderry, co. of Ireland, in the province of Ulster, 32 ms. long and 30 broad, bounded on the W. by Donegal, on the N. by the ocean, on the S. and SW. by Tyrone, and on the E. by Antrim. It is a fruitful champaign country. The linen manufacture flourishes through every part of it.

Londonderry, handsome town of Ireland, capital of a county of the same name. It is a modern place, built by a company of London adventurers, in the reign of James I. The principal commerce of Londonderry is with America and the West Indies. It contains 18,000 inhabitants, and is seated on the river Foyle, over which a wooden bridge 1,068 feet in length, and of singular and excellent construction, was erected in 1791. Londonderry is 4 ms. S. of Lough Foyle, and 194 NW. of Dublin. Lon. 7 5 W., lat. 55 4 N.

Londonderry, tp. of Halifax co., Nova Scotia, on Colequid river, 30 ms. above the Bay of Minas.—Town in Rockingham co., N. H., 35 ms. SW. of Portsmouth, and 37 NW. of Newburyport, Mass. It is peopled mostly by emigrants from Ireland, as the name implies.—Town in Windham co., Vt., 27 ms. SW. from Windsor.—Tp. in Chester co., Pa., on the E. side of Octorara creek, between Oxford and Nottingham.—Tp. in Dauphin co., Pa., between Conewa-

go and Swatara creeks, about 15 ms. from Hurg. Pop. in 1810, 2,411; in 1820, 1,629. This and the preceding formed tp. in Dauphin co. previous to the formation of Lebanon co.—SW. tp. of Bedford co., Pa., on creek, between Wills and Little Alleghany mountains.—Tp. in Guernsey co., Ohio. Pop. 1820, 902.

London Grove, town in Chester co., Pa., between New Garden and Oxford, about 40 SW. from Philadelphia.

London Town, village of Anne Arundel Md., on the right bank of South river, 5 ms. from Annapolis.

Longacoming, village in Gloucester co., N. 16 ms. SE. from Philadelphia.

Long bay, that part of the Atlantic coast of U. S. between the mouths of the Pedee and Fear rivers.

Long Beach, on the coast of Monmouth co. J., is a low, sandy island, extending from Barn inlet to Little Egg Harbor.

Longanico, town of the Morea, anciently Olympia, famous for being the place where Olympic games were celebrated, and for the temple of Jupiter Olympus, about a mile distant. It is now a small place, seated on the Alpheus ms. from its mouth, and 50 S. of Lepanto. 22 0 E., lat. 37 30 N.

Longavi, one of the Chilian peaks of the Andes, supposed to be 20,000 feet above the level of the ocean.

Long Bottom, post office in Athens co., Ky. by post road 135 ms. SE. from Columbus.

Long Creek, post office in Caldwell co., Ky.

Longford, co. of Ireland, in the province of Leinster, 25 ms. long and 16 broad, bounded the E. and S. by West Meath, on the NW. by Leitrim, on the NE. by Cavan, and on the W. by the Shannon, which parts it from Roscommon. It is a rich and pleasant country, contains 24 parishes, and sends 10 members to Parliament.—Borough of Ireland, capital of a county of the same name, 70 ms. WNW. of Dublin. Lon. 7 40 W., lat. 53 48 N.

Long Island, an island of N. Y., separated from Ct. by Long Island sound, and divided into 3 counties, King's, Queen's, and Suffolk. It extends from the Narrows E. 140 ms., but is more than 10 broad on a medium. The product of the middle and western parts of the island is carried to New York. This island, in 1810, contained 48,752 inhabitants; in 1820, 56,978; in 1840, 110,406—very nearly doubling in 20 years. A ridge of hills extends along the N. side of Long island, with a declivity towards the south. South of the hills, the descent is more gradual, and terminates in a flat border, sinking imperceptibly in approaching the Atlantic ocean. See the respective counties, for a more particular description of this island.—A name given to sundry unimportant islands in different parts of the world. One near the W. coast of Biliton; one on the SE. coast of Madura; one in Queen Charlotte's sound, on the coast of New Zealand, off the coast of New Guinea, in lat. 1° S.; one on the African coast, in the Indian ocean, lat. 10 25 S.; one in Pen-

bay, coast of Maine. For the latter, see *Isle-bough*.

Long Island sound, kind of inland sea, 25 ms. long and 140 long, extending the whole length of Long island, and dividing it from Ct. It communicates with the Atlantic at both ends of the island.

LONGITUDE as a geographical term, expresses distance on the earth's surface of any two or three places E. and W. of each other, without reference to their difference of latitude. Longitude reckoned from given meridians, and it is to be regarded that the great civilized and scientific nations had not agreed on a common meridian.

Astronomical longitude means an arc of the meridian, comprised between the equinox or first point of Aries, and the place on the ecliptic to which the star or planet responds. Lon. is to be reckoned what right ascension is in regard to the equator. Planetary lon. is of two kinds; *heliocentric*, the point on the ecliptic responding to the place of the planet seen from the sun; and *geocentric*, as seen from the earth.

Long Meadow, town in Hampden co., Mass., on the left side of Connecticut river, 6 ms. below Springfield.

Longmire's Store, post office in Edgefield dist. S. C., 75 ms. SW. by W. from Columbia. Post office in Conecuh co., Ala., 112 ms. S. from Cahaba.

Long point, or *North Foreland*, is a long, narrow peninsula of Walsingham tp., U. C., stretching in a direction nearly E., and lies nearly opposite the town of Erie, in Pa.

Long Prairie, village of Ark., 175 ms. from the Rock.

Long Reach, a remarkable long and straight portion of the Ohio river, stretching 17 ms. along the borders of Washington co., Ohio.

Long Saut, *Isle au*, in the river St. Lawrence, in front of the tp. of Osnabruck, contains from 100 to 1,500 acres; the soil is good. It lies off the NE. angle of St. Lawrence co., N. Y.

Long's Mill, post office in Orange co., N. C., 15 ms. NW. from Raleigh.

Long Swamp, town in Berks co., Pa., on the banks of Little Lehigh creek, 18 ms. NE. from Pottsville.

Longtown, town of Eng., in Cumberland, on the banks of the river, 12 ms. N. of Carlisle, and 307 NW. of London. Village in Rowan co., N. C., by post road 15 ms. W. from Raleigh.

Longueville, town of Fr., in the dep. of Lower Normandy, 23 ms. N. of Rouen.

Longuion, town of Fr., in the dep. of Moselle. It is a considerable iron forge and cannon foundry. It is 10 ms. SW. of Longwy, and 36 NW. of Metz.

Longueil Township, in the county of Glengary, Ontario, the second in ascending the Ottawa river, U. C. *Longueil*, seigniory, Kent co., L. C., extending from St. Lawrence to Richelieu river, and communicating immediately opposite Montreal.

Longueil Barony, that part of the seigniory on the banks of the Sorel.

Longwy, town of Fr., in the dep. of Moselle, on an eminence, on the river Chiers, 36 ms. NW. of Metz, and 160 ENE. of Paris. Lon. 5 44 E., lat. 49 32 N.

Lonicera, village, Baldwin co., Ga., 11 ms. from Milledgeville.

Lons le Saunier, town of Fr., capital of the dep. of Jura. It derives its name from the salt springs in its vicinity, and is seated on the Solvan, 30 ms. SSW. of Dole. Lon. 5 30 E., lat. 46 37 N.

Loo, town of Holland, in Guelderland, 18 ms. N. of Arnheim.

Loochoo Islands, called recently by Mr. Macleod Lew Chew, and by some others Liqueo, Lieikeou.—See *Lieikeou*. Great Loochoo is about 50 by 12 or 15 ms. The climate is represented as most delicious, and the manners of the people as highly civilized. The coasts are dangerous coral banks.

Looe, *East* and *West*, two decayed boroughs of Eng., in Cornwall, separated by a creek, over which is a narrow stone bridge. They are 16 ms. W. of Plymouth, and 231 W. by S. of London.

Lookout, cape, one of those remarkable promontories of N. C. It is the SW. point of Ocracoke bar, and the SW. outlet of Core sound. Lon. W. C. 0 23 E., lat. 34 22 N.—Cape, name of several capes of America: one south coast of Hudson's bay, lon. W. C. 7° W., lat. 56° N.; one in Hudson's bay, lon. W. C. 12° W., lat. 55 30 N.; one on the Atlantic coast of South America, lat. 48 24 S.; and one on the Pacific ocean of North America, 45 32 N.—Mountain, one of the Appalachian ridges, in the NW. part of Ga., terminating near the Suck, in Tennessee river.

Loop, village, Giles co., Va., 275 ms. W. from Richmond.

Loos, town of the kingdom of the Netherlands, in the territory of Liege, 17 ms. W. by S. of Maastricht.

Lopalka, cape, the S. extremity of the peninsula of Kamtschatka.—See *Kuriles*.

Lora, town of Spain, in Andalusia, on the river Guadalquivir, 28 ms. NE. of Seville. Lon. 5 4 W., lat. 37 46 N.—Town of Upper Saxony, in the co. of Hohenstein, 30 ms. N. of Saxe-Gotha. Lon. 10 55 E., lat. 51 30 N.

Loramie, tp. of Shelby co., O.

Lorain, co. of O., bounded N. by Lake Erie, W. by Huron, S. by Richland and Wayne, and E. by Medina and Cuyahoga. Length 30 ms., mean width 23, and area 690 sq. ms. Vermilion and Black rivers rise within this co., and, flowing over it in a northerly direction, fall into Lake Erie. Pop. 1840, 18,467.

Lore, town of Spain, in Granada, 15 ms. N. of Malaga. Lon. 4 35 W., lat. 36 30 N.

Loredo, town of Italy, in Polesino di Rovigo, seated on the Adige, 20 ms. E. of Rovigo. Lovurgana, Sar Vincente de.

Lorentz, store and post office, Lewis co., Va., 348 ms. NW. from Richmond.

Loretto, fortified town of Italy, in the marquiseate of Ancona. The cathedral contains the Casa Santa, or Holy House, in which it is pretended the Virgin Mary lived at Nazareth. It is seated on a mountain, 3 ms. from the Gulf of Venice, 12 SE. of Ancona, and 112 NE. of Rome. Lon. 13 38 E., lat. 43 27 N.—Village, Essex co., Va.; by post road 77 ms. NE. from Richmond.

Lorgues, town of Fr., in the dep. of Var, seated on the Argens, 16 ms. W. of Frejus.

L'Orient, fine seaport of Fr., in Morbihan, on Port Louis. The harbor is deep, sufficient for ships of the first class. Pop. about 18,000; 340 ms. W. by S. from Paris. Lon. 3 21 W. from London, lat. 47 45 N.

Lorrach, town of Suabia, in the Brisgau, 6 ms. NE. of Basel, and 30 S. of Friburg.

Lorrain, late province of Fr., 100 ms. long and 75 broad, bounded on the N. by Luxemburg and Treves, E. by Alsace and Deux Ponts, S. by Franche Comte, and W. by Champagne and Bar. It abounds in all sorts of corn, wine, hemp, flax, and rape seed. There are fine meadows and large forests, with mines of iron, silver, and copper, and salt pits. The principal rivers are the Maese, Moselle, Seille, Meurte, and Sare. This province now forms the depts. of Meurte, Moselle, and Vosges.

Lorraine, town, Jefferson co., N. Y., 20 ms. SSE. from Sackett's Harbor. Pop. 1820, 1,112.

Lossiemouth, town of Scotland, in Murrayshire, at the mouth of the river Lossie, 5 ms. NE. of Elgin, of which it is the port. The harbor will receive vessels of 80 tons, and hence much corn is exported.

Lost River, post office, Hardy co., Va.; by post road 215 ms. NNW. from Richmond.

Lot, river of Fr., which rises in the dep. of Lozere, passes by Mende, Cahors, and Agen, and enters the Garonne. It begins to be navigable at Cahors.—Dep. of Fr., including the late province of Quercy. It takes its name from the river Lot. Cahors is the capital.

Lot and Garonne, dep. of Fr., including part of the late province of Guienne. It is so called from two rivers. Agen is the capital.

Lotbiniere, seigniori, Buckingham co., L. C., on the S. side of St. Lawrence, 40 ms. above Quebec.

Lothian, district of Scotland, now divided into East, Middle, and West Lothian, or *Haddingtonshire*, *Edinburghshire*, and *Linlithgowshire*.

Lotzin, town of Prussia, with a castle, situated on a canal, which joins the Angersberg and Levantin lakes, 78 ms. SE. of Konigsberg.

Louans, small town of Fr., in the dep. of Saone and Loire, and late province of Burgundy, situated in a kind of island between the rivers Seilles, Salle, and Solnan, 18 ms. SE. of Chalons.

Louche, town of Fr.

Loudeac, town of Fr., in the dep. of Cotes du Nord, with an iron forge and a manufacture of thread, 20 ms. S. of St. Brieux.

Loudon, town, Rockingham co., N. H., on the E. side of Merrimack river, 45 ms. NW. of Portsmouth.—Village, Franklin co., Pa., 63 ms. SW. from Harrisburg.—Co., Va., bounded SE. by Fairfax, SW. by Prince William and Fauquier, NW. by Frederick and Jefferson, and NE. by the Potomac river. It is about 20 ms. square, with an area of 400 sq. ms. Surface delightfully variegated by hill, dale, and mountain. Soil excellent. Staples, grain and flour. Chief town, Leesburg. Pop. 1820, 22,702; and in 1840, 20,431. Cent. lat. 39 5, lon. W. C. 0 30 W.

Loudon village, post office, Merrimack co., N. H., 7 ms. from Concord.

Loudonville, town in the southeastern quarter of Richland co., O., 66 ms. NE. from Columbus.

Loudun, town of Fr., in the dep. of Vie 30 ms. NW. of Poitiers, and 155 SW. of P

Loughborough, town of Eng., in Leicester. The chief manufactures are wool-combing hosiery; and it has a trade in coal, &c., by means of a canal from the Trent. It is seated near Soar, 18 ms. N. of Leicester, and 109 NNW London.—Tp. in the co. of Frontenac, U lies in the rear and to the N. of Kingston.

Louisa, town of Finland, with a fortress, bay of the Gulf of Finland. The houses are wood, two stories high, and painted red.—of Va., bounded by Hanover SE., Goochland Fluvanna SW., Albemarle NW., and Orange Spottsylvania N. Length 28 ms., mean 20; area 560 sq. ms. Surface moderately Soil generally fertile. Chief staples, flour tobacco. Pop. in 1820, 13,746; and in 15,433. Cent. lat. 38° N., lon. W. C. 1 1 1 —Village, Lawrence co., Ky.; by post 182 ms. E. from Frankfort.—Court-house post office, Louisa co., Va., 63 ms. NW. Richmond. Lat. 38° N., lon. W. C. 1 1 1

Louisburgh, capital of the island of Cape ton. It was taken by the English in 1758 ceded to them in 1763, since which the fortifications have been destroyed. It has an excellent harbor, near four leagues in circumference. 59 48 W., lat. 45 54 N.

Louisburg, town and seat of justice, France co., N. C., on the E. bank of Tar river, 2 NE. of Raleigh, the capital of the State.

Louis de Ramsey, seigniori, Richelieu co. C., on the SE. side of St. Lawrence, near head of Lake St. Peter's, 6 ms. E. from the mouth of Richelieu river. Lat. 36 4, lon. W. C. 1 1 1

Louis, Fort, strongly fortified island in the Rhine, 12 ms. E. from Hagenau.

Louisiade, group of islands in Australasia or Oceanica, lying SE. from New Guinea, in 10°, lon. E. 150°. This archipelago is very perfectly known. They have been rather more than explored. The natives are black, and covered with wool. The Malay language is unknown.

Louisiana, village and seat of justice, Pickens Mo., 96 ms. N. from St. Louis. It is situated on the Mississippi, at the mouth of Salt river. 39 28 N., lon. W. C. 13 38 W.

Louisiana, State of the United States, bounded by the Gulf of Mexico S. and SE., Mississippi NE., Arkansas N., or rather NW., and Texas W.

Louisiana has an interior limit on the Gulf of Mexico, from the mouth of Sabine to that of Pearl river - - - - - 0
Up Pearl river to N. lat 31° - - - - - 0
Thence along N. lat. 31° to the right bank of the Mississippi - - - - - 10
Thence up that river to N. lat. 33° - - - - - 10
Thence due W., along N. lat. 33°, to the NW. angle of the State - - - - - 18
Thence due S., along 1° of lat., from the 33d to the 32d degree of N. lat. - - - - - 19
Thence down the Sabine to its mouth, or to the SW. angle of the State - - - - - 10

Having an entire outline of - - - - - 112
Area about 48,220 sq. ms., = 30,860,800

the longest line which can be drawn in Louisiana from the mouth of Mississippi to the NW. corner of the State, 380 ms. Its width is very difficult to estimate; 120 ms. is, however, not far from an accurate mean. Extreme S. at N. lat. 28° 36'; extreme N. at N. lat. 33°.

The State of Louisiana contains, perhaps, as much diversity and extremes of soil as any country on the globe of equal extent. It is no misrepresentation to say that, in this State, every kind of soil exists, from the most sterile to the most productive.

The very singular features of Louisiana, and its importance in our topography, will warrant a more largely extended range of descriptive remark than is judged necessary with other sections more fertile in their interior, and more analogous in their exterior features to the contiguous countries. The soil of Louisiana admits of five very distinct varieties: river alluvion, pine forest, prairie, river alluvion, and sea marshes. Of these, the most extensive is pine forest, but the most valuable. In Louisiana, the sea sand alluvion is so limited in extent as not to merit a distinctive classification.

Commencing from the S., the first natural division which presents itself is the sea marsh. This is commensurate with the entire extent of the State, reaching from Pearl to Sabine river. It is most destitute of timber. Its width inland varies from 20 to 30 ms., extending highest into the interior between the streams. All the rivers communicate with the Mississippi, in a less or greater degree, protruding a narrow slip of land along their shores, far beyond the interior of the sea marsh; none, however, extending this elevated border to the Gulf of Mexico. The Atchafalaya has but very little arable land on its shores. Its left bank is above ordinary inundation 4 or 5 ms. from its efflux, the right bank is above annual submersion from the Mississippi, extending 5 ms., with the exception of a few very limited extent, the shores of this river rendered uninhabitable as far down as the mouth of the Teche. The arable shores of the Teche river are continued about 5 ms. down the river, below their junction; the sea marsh then commences, and all further habitable land ceases. About four or five ms. below the mouth of Teche, on the opposite bank, the Atchafalaya receives Bayou Fourche.

This bayou is the drain of the space between the Fourche and Atchafalaya rivers, and forms a narrow border of high land along its banks, which the overflow of the Mississippi very seldom reaches; consequently, all the water which is brought down by the Atchafalaya is here confined in its own volume. This circumstance, though contrary to common opinion in the country.

All the space between the Lower Teche and Lafourche is usually considered subject to annual inundation. It is so in fact, with the exception of the range we have noticed. A chain of low hills lies between the Atchafalaya and Lafourche, through which, by a ferry, is formed the route of communication between the settlements on the Mississippi and Lafourche and those in Lower Louisiana. The sunken flooded character of the shores of these lakes lead to the error we have corrected. In reality, Bayou Bœuf and its confluent

separate in that quarter the inundated tract from the sea marsh.

In the angle between the bay of Atchafalaya and Lafourche river, a number of minor streams head near Bayou Bœuf, and flow S. into the Gulf of Mexico. These small creeks have all arable banks towards their sources, which gradually depress into the sea marsh.

The Lafourche has arable banks about 90 ms. from its efflux from the Mississippi, below which distance the sea marsh encroaches and prevents settlement.

Between the high banks of Lafourche and those of the Mississippi river, with the exception of a few small spots, the intermediate space is occupied by the sea marsh.

The Mississippi proper differs in ordinary phenomena, in no essential respect, except magnitude, from the Lafourche. The banks of both are the highest ground near their beds. The former carries its arable border, with varied width, to the lower end of Plaquemine bend, 3 ms. below Fort St. Philip, where the naked unwooded sea marsh reaches the river bank.

Northeast of the Mississippi, the sea marsh borders the river to Plaquemine bend, where the arable selva commences, which, with a breadth of not more than 700 or 800 yards, intervenes between the river and marsh, to Terre aux Bœufs, 15 ms. below New Orleans. Terre aux Bœufs extends an arable border for about 15 ms., where the sea marsh reaches both its banks and terminates settlement.

Above Terre aux Bœufs the arable border is wider than below that stream, but is confined to the Mississippi banks as far up that stream as the higher parish of St. John Baptiste, opposite lake Maurepas. In the distance from Terre aux Bœufs to St. John Baptiste the marsh is only interrupted in one place. Ten ms. above New Orleans an ancient outlet of the Mississippi pursues a NE. direction, and, singular as it may seem, actually crosses Bayou St. John in the suburb of that name, and continues its original direction by the name of Bayou Gentilly, and falls into the pass of Chef Menteur. Its entire length, about 20 ms. On a small scale this outlet, in its natural state, had an elevated arable wooded border in all its course. With this very partial exemption the marsh reaches within a mean of half a mile from the Mississippi bank. The whole S. and SW. borders of Lakes Pontchartrain and Maurepas form one undivided marsh. This marsh, towards New river, imperceptibly changes to river inundated land.

The general interior boundary of the sea marsh, from what we have seen, proceeding from W. to E., extends from the head of the Sabine, Calcasieu, and Mermentau lakes; from the latter to the western bend of Vermilion, (the right shore of the latter river extending a narrow arable border about 20 ms. lower down,) a range of low hills or high ranges along the left side of the Vermilion, but sinks into the sea marsh 10 ms. above the southern extension of the cultivated opposing margin.

Leaving the Vermilion river, the marsh winds around the inflections of the bays of Vermilion, Côte Blanche, and Atchafalaya, leaving those bays to the SW. and the Teche river to the SE., ad-

vancing in many places to within one or two ms. of the latter. At the junction of Teche and Atchafalaya rivers, we have shown the sea marsh to be bounded inland by Bayou Bœuf, and its constituent branches, between the Atchafalaya and Lafourche rivers. Between the latter and Mississippi more than nine-tenths of the entire space is marsh. The same observation is applicable to all that part of the island of Orleans below the parish of St. John Baptiste.

It would be an interesting operation to determine the extent of the irreclaimable sea marsh. The solution of this problem is impracticable, however, to any great exactitude without extraordinary and unnecessary expense of time and labor. The following estimate will serve for every requisite purpose :

Between the Sabine and Lafourche rivers, is a distance of 180 ms. In this space the sea marsh and bays will average at least 30 ms. in width, producing an area of 5,400 sq. ms., 3,456,000 acres, or near one-ninth part of the superficies of the State.

Northeast of the Lafourche, the sea marsh extends over at least 3,000 sq. ms., or 1,920,000 acres, which, added to 3,456,000, yields 5,376,000 acres, or nearly one-sixth part of all Louisiana.

The distinction between sea marsh and the contiguous soils, arises solely from relative height. There is no part of the maritime shores of the United States which rise so gradually from the surface of the sea as do those of Louisiana. This acclivity is in fact so gentle that the common surface of the country at Opelousas court-house, 70 ms. inland, is not more than 20 feet above the level of the Gulf of Mexico. The very near advance of such a country to the curve of a real sphere will be conceived, when it is considered that 70 ms. contain 369,600 feet ; or that, in round numbers, 400,000 feet has only gained an elevation of 20 feet ; that is 1 of elevation for 20,000 in distance. It is the natural consequence of so gradual an ascent to render the gradations of soil almost imperceptible. Therefore the positive line which separates the sea marsh from the prairies or river inundation cannot be drawn.

The tides in the Gulf of Mexico do not exceed 3 feet, and yet they are perceptible in all the watercourses of Louisiana, Mississippi excepted, as high as N. lat. 30 20. From this arises the singular phenomenon that the tides in Plaquemine and Iberville, approach to within 10 ms. of contact, though upwards of 200 ms., above the head of tide water in Mississippi.

The prairie soil partakes of the quality of the adjacent lands. On the waters of Sabine, Calcasieu, and Mermentau, the prairies have generally a thin sterile soil, whilst on the Vermilion, Teche, and Courtableau, the prairies are almost uniformly fertile. Wherever the waters of Red or Mississippi have flowed, the soil is productive ; and that both these streams have contributed to form the deposit which lines the Teche, Vermilion, and Courtableau, is evident from the texture and alternation of the strata. The evidences of the prevalence of these waters in places far remote from their present influence are seen in digging wells, where the pale blue sediment of the Mississippi is found in contact with the red ochreous earth brought down by Red river.

We have already alluded to the probability, at a former period, the Mississippi and Red did not unite. The soundness of this hypothesis is rendered obvious by the general physiognomy of the country at present. But to an eye which has viewed with careful attention the region between lower Red river, the prairies of Opelousas and the Atchafalaya river, it must be demonstrable that the former river once entered the Gulf through the channel of the present Courtableau, and that a long narrow peninsula extended to the highlands N. of Red river towards the ancient junction. I have traversed this tract in all its extent, and formed the theory we are now reviewing from actual survey. The range of hills which terminates at Red river, no doubt, was once united to the opposing high ground of Avoyelles. The intermediate space is not at this time more than 2 ms.

The elevation of the platform of Avoyelles about 20 or 25 feet above the circumjacent lands ; its length 15 or 16 ms. There exists a small wooded hill, of similar height and structure about 5 ms. S. of Lake Pearl. The hill prairie of Bayou Rouge is the last remaining remnant of the ridge which anciently I suppose contributed to turn Red river southeastwardly. It is at present Lake Pearl, and the Bayou le Meunier and De Glaize, were once an outlet of Red river according to the induction we have assumed. At high water, the overflow of Red river yet passes by that channel. I have myself passed from Red river to Opelousas through an outlet 15 ms. below Alexandria, into Bayou le Mourir, and thence to that stream into Bayou Bœuf, and down that stream to its junction with the Crocodile, or the head of Courtableau river.

When Red river flowed in its ancient channel the channel E. of the Avoyelles was then occupied by the Ouachitta and Catahoula rivers ; consequently, the junction of Red and Ouachitta do not then exist. The latter, it is probable, united with the Mississippi as at present, and the high parts of Atchafalaya was a counter channel between Red and Mississippi rivers.

Whatever may have been, however, the natural revolutions of those streams, the surplus water of Mississippi must, from the superior elevation of that river at time of high water, have found its way to the Gulf of Mexico, as at present.

The river Teche is also one of the ancient outlets of Red river. The Teche is a small, but singular and very interesting stream. Its source is in the Opelousas prairies, near the extreme extension. Draining the prairies, the Upper Teche by the name of Bayou Grand Louis, reaches within 3 ms. of the court-house of that parish, where it forms the port of the higher part of Opelousas. Three-fourths of a mile below the port, or, as it is there designated, Carron's landing, the channel divides into two branches, one passing into Courtableau river by the name of Bayou Carron, and the other continuing SE. forms the lower Teche. When the Mississippi is low, most of the water of Bayou Grand Louis flows into Courtableau, and by that stream into the Atchafalaya ; the contrary, when the Mississippi is elevated to moderate flood, part of the stream of Courtableau flows through the Carron, and is turned into the Teche. So that the water of Bayou Grand Louis

in part that of Bœuf and Crocodile, contribute to the rivers Courtableau and Teche, alternately following the stage of the Mississippi tide of flood. Below its efflux from Bayou Carron, the Teche flows 20 ms., following its windings, receives Bayou Fusillier from Opelousas, and enters Attacapas. At this point the Teche receives no more tributary water; like the Mississippi, its banks are the best adjacent ground; its course in Attacapas is but 115 ms., and, though not augmented by any affluent stream, its volume increases in width from 20 to 200 yards. The tide rises at all times from Iberia, N. lat. 30°, and at dry seasons it is perceptible at the mouth of Bayou Fusillier. Its comparative length of Teche, in Attacapas, is 75 ms. Its banks are the most perfectly uniform of any watercourse I ever examined. I have followed along its entire channel from Bayou Carron to the mouth, and could never perceive a single instance of an abrupt bend, though so very remarkable for extensive curves, even comparatively more than the Mississippi. It may be also noticed, amongst the peculiarities of the Teche river, that its widely sweeping bends are turned towards the Mississippi, or rather Atchafalaya.

At the circumstance which is most worthy of mention in the natural history of the Teche is the nature of its bed. Commencing with the junction of Bayou Carron and Courtableau river, and following the latter to the head of Teche, and down latter to its mouth, the immensity of the channel when compared with the volume of water which enters and flows through it, is every where striking. From the apex of the banks to the surface of the highest water is at all places very considerable, and the distance between the opposing banks four or five times greater than the most extensive breadth of the water. It is nevertheless obvious, on inspection, that, at some former period, the whole channel was filled to overflowing. The waters of Red river were again turned into its ancient course, the Teche would also again assume its former magnitude. It is strikingly obvious, from actual examination, that the entire width of Courtableau could be turned, with a very trifling expense, down the Teche. And it could be shown that nature has afforded equal facility to human art to turn the latter into Vermilion. I have been thus particular in describing the river of this section of Louisiana, in order to enable the reader to comprehend more clearly the differences of the varieties of soil and facility of navigation strikingly existing between the prairies and alluvial river lands, on the streams which have yet, which once had, communication with the Red, Mississippi, and Atchafalaya rivers, and those waters-courses which have not ever had connexion with the controlling waters.

We now proceed to examine the prairies of Louisiana in detail; but, before enumerating the prairies, we ought to review the rivers which drain over their surface.

The Teche we have already examined. The western river of the Teche is the Vermilion. We have mentioned Bayou Fusillier as a branch of the Teche; it is, however, an outlet of the Vermilion, or, perhaps, more correctly, an interlocking channel between the two rivers. The Vermilion rises at Opelousas court-house, and, by the name of Bayou

Bourbée, flows S. 10 ms., divides into two branches, that to the right, continuing S., forms Vermilion; that to the left turns E. into Teche, and is the stream we have noticed as Bayou Fusillier. The Vermilion has a comparative course of 70 ms., receiving several small, but no considerable branches, and falls into the Bay of Vermilion. The woods are scanty on this stream in all its course; both its source and discharge are totally void of timber. Its banks are generally fertile, and, unlike those of Teche, are high, bold, broken, and diversified, above the termination of the timber and commencement of sea marsh.

The Mermentau is a much more considerable stream than either the Teche or Vermilion, and may not unaptly be viewed as the river of the prairies. It is formed by a number of branches, the principal of which are the Queue Tortue, Lacassine, Plaquemine-Brulé, Bayou Cane, and the Nezpicque. The entire length of the Mermentau is about 100 ms., but the wide space over which its branches extend gives it a volume of more magnitude than its length would indicate. The tide rises in Mermentau, in a low state of its waters, above the junction of its principal branches. Below the mouth of Queue Tortue, the Mermentau expands into a long, narrow lake; timber ceases, the sea marsh commences. The river again contracts into a confined channel, and again opens into a lake of 20 ms. long and 10 ms. wide, connected with the gulf by two channels. On the higher branches of Mermentau, the first secondary rock in Opelousas is found; it is a sandstone, loosely compacted.

I have already remarked that the soil of the prairies, beyond the influence of the interlocking waters of Mississippi, becomes of very inferior quality. The correctness of this observation is seen on every branch of the Mermentau. A list of the prevalent timber on the Teche and Vermilion, contrasted with that on the Mermentau, will amply develop the respective quality of the soil.

On the two former streams are found, in abundance, hackberry, sycamore, willow, laurel, magnolia, the black oak, upland white oak, honey locust, mulberry, black walnut, hickory, (several species,) *liriodendron tulipifera*, sweet gum, cotton wood, dogwood, wild cherry, linden, ash, red flowering maple, sassafras, (two species,) laurier almond, elm, (two species,) &c. On the latter soil, sweet gum, linden, black walnut, honey locust, and black oak, *quercus tinctoria*, become rare; the *liriodendron tulipifera* entirely ceases. The prevalent timber trees are—water oak, Spanish oak, black jack, upland shellbark hickory, and pine. On the former space, the underwood is spice, Spanish mulberry, papaw, (*morus scabra*), red elder, large reed cane, and a large muscadine grape vine; on the latter, whortleberry, (two species—*vaccinium stamineum*, and *vaccinium arboreum*), &c. The trees and shrubs common to both, are dogwood, persimmon, holly, (*ilex opaca*), iron wood, horn bean, chincopin, laurier almond, and blackberry briar. Some reed cane is found on the waters of Mermentau, but of humble growth, and of very limited extent.

The live oak is common to both sections, but on the Teche this tree is found as high as Bayou Fusillier, whilst on the Vermilion and Mermentau it ceases 10 or 12 ms. further S. ~

The prairies of Louisiana have been overrated in extent, even including the sea marsh which we have noticed. Their irregular form renders an accurate estimate of their extent difficult. On a former occasion, I carefully calculated the proper prairie land in the State to amount to 3,000 sq. ms., equal to 1,920,000 acres. I am confident that 2,000,000 of acres is a more than sufficient estimate of all the prairie ground in the State; which, if added to the extent allowed for sea marsh, 5,376,000 acres, yields 7,376,000 as the naturally unwooded surface in the State of Louisiana. This is, indeed, a fearful expanse, amounting to almost one-fourth part of the whole area; and of this superficies, not more than one million and a half of acres can be reduced to culture without enormous expense.

We now proceed to examine river inundated alluvion, another species of soil, which, though often confounded with sea marsh, under the term swamp, differs in most respects from either marsh or swamp.

The alluvial banks of the Louisiana rivers are all, in their natural state, more or less subject to inundation; therefore, as used in this place, some explanation is necessary, to show the distinction between grounds casually submerged and those which are so annually, and between those which admit being reclaimed and those which are irretrievably liable to be laid under water.

The distinction between the reclaimable and irreclaimable alluvion does not consist merely in more or less exemption or exposure to water; the respective soils are different in texture and composition. The reclaimable alluvion is an inclined plane, sloping in all cases from the rivers by a very gentle descent; the irreclaimable alluvion is generally a dead level, extending indefinitely into the spaces between the streams. The arable river border is usually composed of a fine, loose, rich soil; the interior plains are composed of a very hard, stiff, and less fertile soil than the river borders; what is vulgarly and very erroneously designated Mississippi swamp, becomes in most places, when laid dry, almost as solid as a stone. Except the sea marsh I have surveyed, very little swamp, in the true intent of the term, exists in Louisiana.

The natural vegetables found on the two varieties of alluvion are strikingly different. The trees ordinarily found most prevalent on the reclaimable river borders are—laurel magnolia, black oak, white oak, red elm, mucilaginous elm, sycamore, honey locust, sweet gum, ash, blackberry, poplar, black walnut, white oak, (two varieties,) white bitter nut hickory, (two species,) cotton wood tree, linden, red maple, box elder, iron wood, horn beam, red bud, wild cherry, sassafras, and laurier almond. The common undergrowth is the large reed cane, spice wood, many different kinds of grape vine and smilax, and a species of cornus called swamp dogwood, yet never found in swampy places, and very seldom on overflowed land.

Another very common, and yet very erroneous opinion, is current respecting the large reed cane of the Mississippi basin. This noble vegetable is supposed to flourish on the annually inundated soil. So far from this being the habitude of that grass, but few vegetables will more certainly or more rapidly perish, if its roots are laid under wa-

ter; it is, perhaps, of all grasses, the one which would continue to vegetate longest without rain. In all my range of observation I never once witnessed a cane of any size or quantity worthy notice on annually flooded lands. I have also uniformly observed that, when the ground covered by a brake became exposed to submersion, the cane perished from the casualty.

In the rear of the river border, and after the cane has ceased, its place is usually supplied by what is designated in the country, by the English name palmetto, in French, latania, a species of chamerops of botanists.

The palmetto is a true dwarf palm, and will resist the effects of water continuing over its roots for some time; but when the depth of the water exceeds 18 inches, or 2 feet, I have, in all cases, observed the disappearance of the palmetto. The soil in which the palmetto predominates is firm, but of harsher texture than that commonly found covered with cane. Much of the sugar land in Louisiana have been, in their natural state, covered by an undergrowth of latania. It is very remarkable that, though in contact, and growing in grounds in many respects analogous, yet cane palmetto very seldom admix to any considerable extent, and in most cases their line of contact is distinct as if drawn by art.

The poke (*phytolacca decandra*) is also a vegetable which obtains the full development of growth on the alluvial river border soil of Louisiana, and is very seldom found on either low inundated ground or in pine woods.

The two trees of Louisiana found on the greatest variety of soil is the sweet gum and persimmon. I have seen those two species of trees on the best and highest parts of the country, admixed with every other kind of timber natural to the respective sections.

The live oak (*quercus virens*, or *quercus pervirens*) may be considered also as a tree which grows only on border alluvion, and never on an alluvion inundated land. I did not include the live oak in the general list, from the confined extent on which this tree is found.

In the basin of Mobile the live oak reaches to lat. 31° nearly. West of Mobile bay, it is not found on the sea coast and a few miles inland. This range is continued nearly to the Mississippi; here the live oak line is inflected to the S., and not found on the Mississippi banks above N. lat. 30 10. It grows on the margin of Atchafalaya, where any spot of high alluvion suits its habitude. On Teche, it reaches to N. lat. 30 23. This is the highest point of lat. attained by that tree West of the Mississippi. On the Mermentau, under the shelter of the Plaquemine woods, it reaches to lat. 30 20. On Lacasine, a few trees only are found; beyond the latter bayou westward, on the waters of Sabine and Calcasieu, the live oak does not exist. I could never perceive a single stem of this tree on any branch of either of the two latter rivers, though in a situation to have detected a remarkable object in the vegetable kingdom. When I made my voyage down the Sabine bayou along the Mexican gulf, I mistook an opening in the ms. W. of Calcasieu for that river, and when I reached its real mouth I mistook it for the Mermentau. At that time I had never been down the latter

below its upper lake, and had been informed that the live oak continued long after the disappearance of every other tree; and had also received information that the live oak grew on the small islands running parallel to the coast; but finding myself in a river without timber of any kind, 30 miles inland, I distrusted the truth of report, until I perceived my mistake by arriving at the settlements of Calcasieu lake. Subsequently I ascertained the correctness of the statement respecting the live oak of Mermentau.

The causes which have operated to limit this tree here, and to so much deflect its line of termination, are to be sought for in the comparatively long winters of Louisiana.

The trees which prevail upon the inundated lands are swamp overcup white oak, red oak, live oak, Spanish oak, large chestnut-leaved oak, cypress, swamp hickory, bastard paccan, seeded honey locust, ash, (two species,) and ivy, (three species.) Three or four nondescript trees form the ordinary underwood, admixed with vines of various genera and species.

Many other trees are naturally produced on both kinds of soil; I have enumerated the principal, those which more particularly serve to designate the texture of the land and vegetable association.

Before quitting this part of our subject, I observe that the timber trees of the river allude in general the same genera and species on the bluff lands, noticed in my survey of the state of Mississippi. It is a subject of real philosophical attention to behold the same vegetabilities associating together on two places in respects so different. To this statement the wood may, from its rarity on the bluff land, be considered almost an exception.

Every person can examine the timber trees of Louisiana and Mississippi without astonishment at the enormous trunks. Dr. Bartram, in his Travels in Florida, speaks in rapture of the majestic column of the laurel magnolia. Where I have seen it, its column is humble, either in respect to elevation or girth, when compared to that of the tree of the tinctoria, liriodendron tulipifera, cypripedium, plantanus occidentalis, or populus angustifolia. Indeed, every tree on the alluvion is far from the ordinary development of its species; not as I have mentioned, but the largest individuals I have seen, were on the soil in question. The gigantic mass of the black oak, poplar, sycamores, cypress, and cotton wood trees of Louisiana, are all within the limits of easy credibility.

To determine the quantity of inundated land in Louisiana is attended with much difficulty, from the intricate involutions of the other species of soil. An allowance of one-half as much surface for inundated, as we have given to sea marsh and prairie, will not produce a result far removed from truthness. The amount estimated for those lands was 7,376,000 acres, one-half of which is sea marsh; the entire surface of sea marsh prairie, river inundated land, will consequently amount to an appalling extent of 11,064,000 acres, or a trifle of 17,300 sq. ms., or nearly three times the surface of New Jersey.

It ought not to be understood that all this wide expanse is equally useless to the purposes of human industry. The irreclaimable sea marsh is, indeed,

worse than useless—it is pernicious; but the prairie, as pasture grounds, and the wooded inundated land, as a resource for timber, permits a greater area of arable ground to be brought into culture. It is, however, a fact, that immense spaces of the superficies of Louisiana must remain uncultivated wastes, until the increase of population and consequent dearthness of land will superinduce recurrence to operations of melioration far beyond either the means or the necessity of the present age.

We now proceed to examine the largest natural division of the soil of Louisiana—the pine forests. It ought not to be understood that, under the general term pine forests is meant places where that tree prevails, to the exclusion of all others; what is intended is, places where the greatest mass of the timber is pine.

The pine lands of Louisiana are divided into four grand sections: the first and most extensive, between Sabine river, Red river, and the prairies of Opelousas. This section embraces more than one-half of the parishes of Opelousas, Rapides, and Natchitoches, and extends to the NW. extremity of the State; the second section lies between Red and Ouachitta rivers, and sweeps over more than seven-eighths of the whole surface of that part of Louisiana included between those two streams. A third pine tract stretches E. of Ouachitta, and near the boundary between Louisiana and Arkansas reaches within 8 or 10 miles of the banks of the Mississippi, and extends S. to near the junction of the rivers Bœuf and Ouachitta. The four parishes of Louisiana, E. of the Mississippi, W. of Pearl, and N. of Lakes Pontchartrain and Maurepas, and Amite river, contain upwards of 3,000,000 of acres, out of which at least 2,500,000 acres are covered with pine. With every due allowance, therefore, the pine lands of the State, taken together, exceed 16,000,000 acres; which, added to 11,064,000 acres, estimated for sea marsh, wet prairie, and pine woods, gives a grand total of 27,064,000, leaving only 3,804,000 for the surface of the arable river alluvion of the State. This limited surface does not include all the productive farming land; some of the intervals between the alluvial bottoms and pine woods have good second rate soil. About 45 miles in length from Bayou Iberville to N. lat. 31°, and 20 miles wide E. from the Mississippi, and a part of the prairie lands of Opelousas, are very productive; but we will soon perceive that five millions and a half are an ample allowance for all the soil of this State capable of advantageous cultivation. This statement will no doubt appear incredible, when compared with the common received opinion on that subject, but the following mathematically determined facts put the question at rest. The river lines in the State, measuring both banks where necessary, are, upon

	Miles.
The Mississippi	946
Pearl river, one side	60
Bogue Chitto, both banks	60
Chifuncte, both banks	50
Tangipao, Tickfoha, Amite, and Comite, united	200
Lafourche	180
Teche	200
Vermilion	150
Mermentau and its branches	250

Calcaissieu	-	-	-	200
Sabine, one bank	-	-	-	150
Red river, and bayous Bœuf and Robert	-	-	-	640
Black Bodcau, Dacheet, and Saline rivers	-	-	-	400
Ouachitta and its confluent	-	-	-	600

Amounting in all to - - - 4,086

This estimate embraces every stream of any consequence in the State, and includes many without any alluvial banks worthy of notice in a geographical point of view; and yet, if the width of half a mile is given to the whole aggregate, the result is 2,043 sq. ms., or 1,307,520 acres. If to this is added as much more for woodland, the result will be 2,615,040 acres; and this again doubled, for all other grounds capable of productive cultivation, the whole will only amount to 5,230,080 acres.

Of this surface, about one-fifth will admit the production of sugar; the residue remaining for all other objects of agriculture suitable to the climate, such as cotton, indigo, tobacco, and the cereal gramina. Of the latter, however, rice and maize are the only species which will flourish on strong alluvial soil, and the former is restricted by a climate not much more severe than will arrest the advance of sugar cane. One pre-eminent advantage of rice arises from the circumstance of its growth on soils too moist for the beneficial cultivation of almost any other vegetable useful to man. Consequently, in the S. of China, along the large rivers of the hither and nether India, of an extensive surface in both Americas, rice has become an important aliment, and must continue to occupy a great part of the labor of mankind; this grain has added at least one-twentieth to the habitable earth, and permitted the increase of the human species in that ratio. Its beneficent results are no where more ample than on the delta of the Mississippi.

I have been more particular in the survey of the delta than would be requisite with a country less peculiar in its features, or whose relative importance in our Confederacy was less apparent.

It must be evident that, in all countries where the only arable land of consequence is river alluvion, settlements must be formed in lines corresponding to the curves of the streams. With the exception of the Mississippi bluff region, noticed in my review of that State, most of the settlements in the pine, sea sand, and sea marsh districts of the U. S., conform to this natural arrangement; of course, habitation becomes dense along the river margins, diminishes receding from their banks, and in a great number of instances leaves wide uninhabited intervals. These effects are, however, more apparent and influential in Louisiana than in any other part of the Southern or Southwestern States.

The settlements in Attacapas, Opelousas, Avoyelles, on Red, Ouachitta, Bœuf, Black, and Mississippi, are uniformly in lines upon the streams, or stretching along the wooded margin of the prairies. That part of Louisiana formed from the Mississippi bluff lands is the only spot in the State where human habitation assumes the scattered relative position to which they conform in the Northern, Eastern, and some of the Western States. It has been shown that Arkansas and Missouri are in these respects in a great degree similar to Louisiana.

The mere position of settlement would in itself be a matter beneath statistical review, but, in the

instance before us, the mechanical arrangement of human location is connected with one of the interesting subjects of inquiry that can offer to philosophical research; that is, the number of man beings which can be enabled to subsist on a given space. It may be assumed, *a priori*, that a dense or even moderately compact population never exist upon any region where the asperities of nature, or moral causes, prevent the production of the greatest part of their aliment on or near the place of residence. If the truth of these propositions are acknowledged, the induction follows, that nature has opposed the concentration of as many numbers of people upon a given space of our State as upon an equal area of Northern territory. Many other natural causes might be adduced in support of this assumption, but it would be needless to select contingent causes to account for an arrangement whose production was so demonstratively and indisputably established upon the durable, it is almost to be said unchanging, laws of matter.

It may be enumerated as one of the peculiarities of the soil of the Southern and Southwestern States to have but little mean between the best and the worst; the latter exceeding in extent even more than does the former in quality.

The principal staples of Louisiana are cotton, sugar and rice. Cotton is general, but sugar and rice confined, particularly the former, to the northern or southern parts of the State. The quantity of sugar made in Louisiana is rapidly increasing; in 1810, it was about 10,000,000 pounds; in 1811, 15,000,000 pounds; and in 1817, upwards of 20,000,000. In Darby's Louisiana, the relative value of rice, and cotton lands are estimated at 250,000 for sugar, 250,000 for rice, and 2,500,000 for cotton.

The civil and political subdivisions of Louisiana are into parishes. Counties do exist in the State, but are confined in their uses to a few judicial purposes, and are unknown in the ordinary municipal regulations of the country.

In Louisiana, more than in any other section of the U. S., population is extended in lines a

watercourses. From the above table, it is seen the twelve parishes along the Mississippi river, by the efflux of Atchafalaya, include upwards of 60,000 inhabitants, leaving only a small fraction than 60,000 for the residue of the State. The settlement along Mississippi, below Atchafalaya, is about 200 ms. in length, and at the ut- even embracing woodland, not averaging, bayou Iberville, more than 3 ms. in width. Iberville, on the E. side of the river, settle- ments are wide. The two parishes of New Feliciana and Iberville, extend over 1,500 sq. ms. If we allow for land actually employed in the pur- pose of agriculture, including tillage and wood- land, 600 sq. ms. below Iberville, and 1,000 along the Mississippi, above Iberville, the aggregate will rather than fall below reality. And, if we then double that extent for all the actually em- ployed agricultural land of the State, we have 1,600 sq. ms. inhabited by 153,407 persons, equal to the sq. m.; and leaving an uncultivated tract of 45,120 sq. ms.

At the census of 1820, the population of Louisiana were found composed of 73,867 whites, 10,476 slaves, and 10,476 free colored persons. Of these, foreigners not naturalized - 3,062 engaged in agriculture - 50,045 engaged in manufactures - 5,797 engaged in commerce - 6,168

subjoined tables exhibit the population of Louisiana, by the census of 1840.

Louisiana was admitted into the Union, as an independent State, at the session of Congress of 1811-'12, and changed its name from that of Territory of Orleans to what it now bears. The majority of the white inhabitants are the descendants of the early French colonists; the next most numerous class is Anglo-Americans, and the residue made up of various nations. Contrary to common belief, there are very few Spaniards in that State. During 34 years that it was held by Spain, it was occupied by the officers of that nation, but never became an object of colonization with the Spanish people.

The varieties in the shades of human society are, perhaps, in no civilized country more marked. Between New Orleans and Sabine river every variety can be seen, from the hunter state to that of the highest refinement of the mercantile and aristocratical. In New Orleans and its vicinity the merchants and planters vie with the most luxurious countries in Europe in their agriculture and manner of living. As the traveller advances westward, this glare gradually vanishes, and in Attacapas, Opelousas, Rapides, Ouachitta, and Natchitoches, the features of society bespeak substantial independence. Still further westward, and much intermingled with the latter settlements, the true pastoral state is seen in its simplest forms. Many of those shepherds are truly wealthy. Beef cattle forms in fact one of the principal interior staples of the SW. part of Louisiana.

This description of Louisiana, written upwards of 30 years past, and when residing in Louisiana, remains substantially correct.

Louisville, town and seat of justice, Jefferson co., Ky., stands on the left bank of the Ohio river, below the mouth of Bear Grass creek, and at the head of the Rapids. In 1810 it contained only 1,357 inhabitants, by the census of 1830, 10,196; and 21,210 by the census of 1840. This fine and flourishing city is situated at N. lat. 38 11, lon. 8 42 W. of W. C. A canal, to pass the rapids of Ohio, extends in front of this city, from Bear Grass creek to Shippingport, below the rapids. With its rapid yet steady growth, the foundations of commerce and manufactures have here been solidly placed.—Town, St. Lawrence co., N. Y., on the right bank of St. Lawrence river, 30 ms. below Ogdensburg. Pop. in 1820, 831.—Town and seat of justice, Jefferson co., Ga., on the Ogechee, 50 ms. SW. from Augusta, and about 50 SE. by E. from Milledgeville. Lat. 33 1 N., lon. W. C. 5 41 W.

Lewistown, village, Talbot co., Md., 10 ms. NE. from Easton.

Loui-tcheou-fou, city of China, in the province of Quang-tong, separated by a narrow strait from the isle of Hainan, where pearls are said to have been formerly fished up. It is 343 ms. SW of Canton.

Lowitz, town of Great Poland, in the palatinate of Rava, 55 ms. E. of Gnesna. Lon. 19° E., lat. 52 26 N.

Louken, river of Sweden, in the province of Aggerhuys, rises in the Dofrine mountains, to the southward of the sources of the Glommen, and, flowing about 150 ms. a little E. of S., falls into the bay of Christiana at that city. The triangular region drained by the Glommen, Louken, and

other lesser rivers, and included in the province of Aggerhuys, extend in lat. from 58½° to 62° covered N. and W. by the Dofrines, and of the S. to the Katgat and Skagerrac gulfs, regarded as the warmest part of the earth in so latitude.

Lou-nghan-fou, city of China, in the province of Chansi, agreeably situated near the source of the river T'so-tsang-ho. It is 375 ms. SW of Peking.

Loung-Loch, great arm of the sea, in Argyre shire, Scotland, which communicates with the Frith of Clyde.

Lourdes, town of France, in the department of the Upper Pyrenees, and late province of Comminges, 15 ms. S. of Tarbes. Lon. 5' W., 43 8 N.

Louth, co. of Ireland, in the province of Ulster, 29 ms. long and 13 broad, bounded on the N. by Armagh and Carlinford bay, on the E. by the Irish sea, on the W. by Monaghan, and on the S. by Meath, from which it is parted by the Boyne. It is a small but fruitful co., and proper to feed cattle, contains 50 parishes, and sends ten members to Parliament. Drogheda is the capital.—Town of Ireland, in a co. of the same name, 19 ms. by W. of Drogheda.

Louth, corporate town of Eng., in Lincolnshire. It is a large well-built town, the market well frequented; here is a free school, founded by Edward VI. It has a new navigation, by means of a brook, the Lud, to the German ocean at Trent creek. It is 28 ms. NE. of Lincoln, and 14 ms. of London. Longitude 0 10 E., latitude 53 10 North.

Louth Township, in the co. of Lincoln, Upper Canada, lies in the W. of Grantham, and fronts the Ontario.

Loutre, Pass a la, one of the outlets of the Mississippi river. It is small, and is the most northern.

Loutre, island and post office, Montgomery co., 68 ms. W. from St. Louis. Lat. 38 4 10 N., lon. W. C. 14° W. Loutre island is in the Mississippi river, opposite Gasconade co., and below the mouth of Gasconade river.—Village, Montgomery co., Mo.

Louvain, large and pleasant city of the province of the Netherlands, Brabant, with a population of 70,000. Its walls are nearly 7 miles in circumference, but within them are many gardens and vineyards. The public buildings are magnificent, and the university consists of a great number of colleges; they formerly made large quantities of cloth, but this trade is now decayed, and it is now chiefly remarkable for its beer, with which it serves the neighbouring towns. It is seated on the Dyle, 14 ms. E. by N. of Brussels, and 40 NE. of Mons. Lon. 4 31 E., lat. 50 53 N.

Louvenstein, fortress of the kingdom of the Netherlands, in Holland, seated at the confluence of the rivers Waal and Maese, on the W. end of an island called Bonmel waert. It is 16 ms. N. of Dort. Lon. 5 13 E., lat. 50 40 N.

Louviers, handsome town of France, in the department of Eure, and late province of Normandy, with a manufacture of cloth, seated on the Eure, 10 ms. N. of Evreux, and 55 NW. of Paris. Lon. 1 13 E., lat. 49° N.

ouvo, town of the kingdom of Siam, 50 ms. N. of the city of Siam. Lon. 100 50 E., lat. 63 N.

well, village, Oxford co., Me., 62 ms. NW. of Portland.

Wilmington, village, Nelson co., Va., 110 ms. from Richmond.

Widore, fine cataract of Eng., in Cumberland, on the E. side of the lake of Derwentwater, in the county of Keswick.

Wells, flourishing manufacturing town of Middlesex co., Mass., at and above the confluence of the Merrimack and Concord rivers. The second factory was erected here in 1822, and prospered so much that it contained, by the census of 1830, 11,000 inhabitants; and by that of 1840, 20,796.

It is well connected with Boston by 25 ms. of railroad, which, with the ordinary rapidity of motion on this species of road, brings the two places nearly equally in the vicinity of each other. The falls of Merrimack river, opposite to which this manufacturing phenomenon has risen, afford unlimited power, which has been reduced to subjection, and is one of the most striking proofs perhaps given to what rapid extent human genius can avail itself of the facilities prepared by nature.

Whill, tp., Lehigh co., Penn., on Jordan river, 12 ms. NW. from Allentown. Pop. in 1870, 703.

Waver Addison, village, Steuben co., N. Y., 20 ms. S. from Bath.

Waver Bartlett, village, Coos co., N. H., 76 ms. N. from Concord.

Waver Blue Lick, post office, Nicholas co., Ky., 12 ms. NE. by E. from Frankfort.

Waver Chanceford, post office, York co., Penn.

Waver Gilmanton, village, Strafford co., N. H., 12 ms. NNE. from Concord.

Waver Marlborough, village, Calvert co., Md., on the E. side of Patuxent river, 30 ms. SSW. of Annapolis, and 24 NW. of St. Leonard's.

Waver Saucon, extreme southern tp. of Northampton co., Penn., on Saucon creek, 4 ms. S. from Bethlehem.

Waver Sandusky, post office, Sandusky co., N. Y., on Sandusky river, 102 ms. N. from Coxsack.

Waver Smithfield, village, Northampton co., N. Y., about 15 ms. NNE. from Easton.

Waver Three Runs, post office, Barnwell dist., S. C.

Wawrzyszew, populous town of Poland, in the palatinate of Rawa, with a strong fortress, seated on the river Warta, 21 ms. S. of Plocksko, and 30 N. of Lodz. Lon. 19 29 E. lat. 52 24 N.

Wax-Layton, village of Eng., in Essex, which, with that of Laytonstone, forms one parish. It is 12 ms. NE. of London.

Wax-Layton's Mills, village, Chesterfield district, S. Yorks., 23 ms. NE. from Columbia.

Wax-Laytonville, village, Lewis co., Va., 365 ms. N. from Richmond.

Wax-Laytonville, fine village of Lewis co., N. Y., on the Wax-Layton creek, near the W. side of Black river, 12 ms. N. from Utica.

Wax-Laytonville, considerable town of Spain, in the kingdom of Granada, seated in a fertile country, on the river Xenil, 18 ms. W. of Granada. Lon. 4 5 W., lat. 37 15 N.—Town of Peru, in

the province Quito, 200 ms. ENE. of Paita. Lon. W. C. 0 10 W. lat. 4 50 S.

Loyalsock, river of Lycoming co., Penn., rises on the southern borders of Bradford, and westward of Luzerne co., heading with the Towanda and Mahopeny rivers, and flowing SW. between Muncy and Lycoming creeks, falls into the W. Branch of Susquehanna, 4 ms. below Williamsport.

Loyalsock, town, Lycoming co., Penn., extending from the W. branch of Susquehanna, between Lycoming creek and Loyalsock river, and including the borough of Williamsport.

Loytz, town of Pomerania, in the co. of Gutzkow, seated on the Pene, 10 ms. above the city of Gutzkow.

Lozere, department of France, including the late province of Gevaudan. It is a mountainous, barren country, and receives its name from one of its principal mountains. Mende is the capital.

Luban, town of the Russian government of Livonia, 70 ms. E. of Riga. Lon. 26 36 E., lat. 56 55 N.

Lubensken Sea, or the *Lake of Luban*, lake of Livonia, toward the confines of Courland and Lithuania. The river Rositta falls into this lake.

Lubben, town of Germany, in Lower Lusatia, capital of a district of the same name, with a handsome castle. It belongs to the duke of Morsenburg, and is seated on the Spree, 60 ms. SE. of Berlin. Lon. 14 25 E., lat. 52° N.

Lubec, city of Germany, in Holstein, or rather enclosed within that duchy, situated on the Trave river, about 14 ms. above its mouth into the Baltic, and about 45 ms. NE. from Hamburg. This city, once the capital of the Hanseatic League, is still one of the imperial free cities. Its territory extends along the Trave about 30 ms.; area 114 sq. English ms. Entire pop. 41,000, of whom 22,000 reside in the city, and 1,000 in the port or village of Travemunde, at the mouth of the Trave. Though sunk, indeed, from its ancient splendor and power, Lubec is still respectable as a manufacturing and commercial city. The adjacent country is in most part a dead level, though the ground on which Lubec stands is something elevated. Lat. 53 51 N., lon. 10 48 E. London. It is probable that there is no other European city which unites ancient or middle age features and those of the present times so completely as Lubec. Hamburg has been more modernized.

Lubec, island in the Indian ocean, near the island of Madura. Lon. 112 22 E., lat. 5 50 S.

Lubeck, town, Washington co., Me., between the Atlantic ocean and Cobscook bay, contiguous to Eastport. The village was commenced in 1815, and, with an excellent harbor, a custom-house, and numerous other commercial advantages, is rapidly increasing. Pop. 1820, 1,430; and in 1840, 2,307.

Luben, town of Germany, in Silesia, capital of a circle of the same name, in the principality of Lignitz, 22 ms. NW. of Breslaw. Lon. 16 28 E., lat. 51 20 N.

Lublin, city of Poland, capital of a palatinate of the same name, with a citadel, a bishop's see, an academy, and a Jewish synagogue. It is seated on the Weiprz, 75 ms. SE. of Warsaw. Lon. 22 45 E., lat. 51 14 N.

Lubow, town of Poland, in the palatinate of Cracow, 50 ms. SE. of Cracow. Lon. 20 36 E., lat. 49 36 N.

Luc, town of France, in the department of Var, and late province of Provence, 25 ms. NE. of Toulon. Lon. 6 25 E., lat. 43 28 N.—Town of France, in the department of Isere and late province of Dauphiny, seated on the river Drome, 32 ms. S. of Grenoble. Lon. 5 48 E., lat. 44 40 N.

Lucanas, town and district of Guancavelica, in Peru, remarkable for its silver mines. Lon. W. C. 3° E., lat. 15° S.

Lucar de Barameda, St., seaport of Spain, in Andalusia. It has a very large fine harbor, well defended, and is seated at the mouth of the Guadalquiver, 44 ms. S. by W. of Seville, and 270 of Madrid. Lon. 5 54 W., lat. 36 58 N.

Lucar de Guadiana, St., strong town of Spain, in Andalusia, with a small harbor on the river Guadiana, 39 ms. NE. of Faro. Lon. 8 16 W., lat. 37 18 N.

Lucar la Mayor, St., town of Spain, in Andalusia, seated on the Guadiana, 10 ms. NW. of Seville. Lon. 5 33 W., lat. 37 36 N.

Lucayas.—See *Bahamas*.

Lucca, town of Italy, capital of a duchy of the same name. It is about 3 ms. in circumference, and surrounded with a wall and other modern fortifications. It is an archbishop's see, and the churches are very handsome. They have also an academy, a university, and an academy of arts and sciences. The inhabitants have a considerable manufactory of silk and gold and silver stuffs. It is seated in the middle of a fruitful plain, surrounded with pleasant hills, near the river Serchio, over which there are two bridges. It is 10 ms. NE. of Pisa, 37 W. of Florence, and 155 N. by W. of Rome. Lon. 10 35 E., lat. 45 50 N.

Lucca, formerly a republic of Italy, lying on the Tuscan sea, about 20 ms. in length, and 10 in breadth. The soil does not produce much corn, but there is plenty of wine, oil, silk, wool, and chestnuts; their oil in particular is in high esteem, and the common people usually eat chestnuts instead of bread. The usual revenues amount to about £30,000 per annum.

Luce, great bay of Scotland, in Wigtonshire, lying to the E. of Mull of Galloway.

Lucera, ancient town of Italy, in the kingdom of Naples, in Capitanata, with a bishop's see, 30 ms. SW. of Manfredonia, and 65 NE. of Naples. Lon. 15 34 E., lat. 41 28 N.

Lucern, one of the cantons of Switzerland, and the most considerable, except Zurich and Berne. It is 30 ms. in length, and 20 in breadth, bounded on the E. by the cantons of Underwalden, Schweitz, and Zug, and on all the other sides by the canton of Berne. The inhabitants of this canton are reckoned about 100,000, and are Roman Catholics. The government was formerly aristocratical, consisting of a Senate of 36, and a council of 64, in which some plebeian burghers were admitted every election; but the Helvetic confederacy, as well as the constitution of the several cantons, is now dissolved, the French having cruelly and unjustly enslaved this brave and virtuous people.

Lucern, capital of the canton of Lucern, in Switzerland. It is divided into two by a branch

of the Reuss, which falls into the lake, on the end of which the town is seated, and commands an extensive prospect. It scarcely contains 3 inhabitants, has no manufactures of consequence and little commerce. The pope has always a vicar resident here. In the cathedral is an organ of a fine tone, and an extraordinary size; the pipe is 40 feet in length, near 3 in breadth, weighs 1,100 pounds. The bridges which the town, round the edge of the lake, are the ionable walk of the place, and remarkable for length. They are decorated with coarse paint representing the histories of the Old Testament, the battles of the Swiss, and the Dance of Death. Lucern is 30 ms. SW. of Zurich, and 35 of Bern. Lon. 8 6 E., lat. 47 5 N.—See art. *Zeroland*.

Lucerna, Lake of.—See *Waldstätter Sea*.

Lucerna, town of Italy, in Piedmont, 15 SW. of Turin. Lon. 7 38 E., lat. 44 52 N.

Lucena, town of Spain, in the kingdom of Andalusia, 30 ms. S. of the city of that name. Lon. 10' E., lat. 38 53 N.

Lucia, St., one of the windward Caribbean islands, in the W. Indies, 22 ms. in length, and in breadth. It consists of plains well watered rivulets, and hills furnished with timber, and several good bays and commodious harbors. There are two high mountains, by which this island is distinguished from a considerable distance. It is 21 S. of Martinico. Lon. 60 45 W., lat. 23 2 N.

Lucia, St., one of the Cape de Verd islands, about 450 ms. W. of the continent of Africa. Lon. 24 32 W., lat. 16 45 N.

Lucignano, town of Italy, in the duchy of Tuscany, 10 ms. S. of Sienna. Lon. 11 11 E., lat. 43° N.

Lucknow, ancient city of Hindoostan, capital of Oude. It is an extensive place, and meanly built; the houses are chiefly mud, and covered with thatch, and many consist entirely of mats and bamboos, and are thatched with leaves of the cocoanut, palm tree, and sometimes with straw. The palace of the Nabob is seated on a high bank near the Goomty, and commands an extensive view both of that river and the country on the eastern side. Those of the British reside in the vicinity. Lucknow is 650 ms. N. of Calcutta. Lon. 81 25 E., lat. 26 35 N.

Lucko, considerable town of Poland, capital of Volhinia, with a citadel and a bishop's see, 50 ms. on the Ster, 75 ms. NE. of Lemburg, and 50 SE. of Warsaw. Lon. 25 30 E., lat. 51 13 N.

Luco, town of Naples, in Abruzzo Citeriore, seated on the Lake Celano.

Lucon, or *Luzon*, town of France, in the department of Vendee and late province of Poitou, and lately an episcopal see, seated in an unwholesome morass, 17 ms. N. of Rochelle, and 50 of Nantes. Lon. 1 5 W., lat. 46 27 N.

Luconia, *Luzon*, or *Manilla*, the chief of the Philippine islands, in the N. Pacific ocean, lies between lat. 12 30 and 19° N., and between longitudes 120° and 124 30 E. London. The outline and form very irregular. Northwards of the city of Manilla it extends 300 ms., with a breadth of 100, area 30,000 sq. ms. From Manilla southwards it extends about 300 ms., in li-

n nearly SE.; outline very irregular, and breadth not exceeding 30 ms., or area 9,000 sq. miles. Entire surface of Luzon, about 40,000 sq. miles. It is separated from Samar by the straits of Surigao. It is not so hot as may be expected because it is well watered by large lakes and the periodical rains which inundate all the plains. There are several volcanoes in the mountains, which occasion earthquakes, and a variety of hot baths. The produce of this island is cotton, wild cinnamon, sulphur, cocoanuts, gold, horses, buffaloes, and game. Philip II, king of Spain, formed a scheme of planting a colony in the Philippine islands, which had been neglected since the discovery of them by Magellan, in 1521. Manila, in this island, was the station chosen for the capital of the new establishments. Hence an active commercial intercourse began with the Chinese, a considerable number of whom settled in the Philippine islands, under the Spanish protection. These supplied the colony so amply with the valuable productions and manufactures of China as enabled it to open a trade with America, and to direct the course of navigation. This trade, at first, was carried on with Callao, on the coast of Peru, but it was afterwards removed to Acapulco, on the coast of New Spain. From this port any vessel may sail one or two ships, which are permitted to carry out silver to the amount of 500,000 dollars, in return for which, they bring back from the East India spices, drugs, China and Japan wares, muslins, chintz, muslins, silks, &c. The inhabitants are a mixture of several nations, besides Spaniards, and they all produce a mixed breed, distinct from any of the rest.—See *Manilla*.

Lixus, ancient Lixus, river of Morocco, falls into the Atlantic ocean at Larache.

Madagascar, region of central Africa, bounded on the N. by Kaarta and Bambara, and N. by the Indian desert. Benown is the capital.—See *Africa*.

Maderburg, town of Germany, in the circle of Upper Saxony, in the duchy of Lawenburg, seated on the Elbe, 5 miles above the town of Lawenburg.

Madgershall, borough of Eng., in Wiltshire, 15 miles N. of Salisbury, and 72 N. by W. of London. Lon. 1 45 W., lat. 51 17 N.

Madwell, borough of Eng., in Shropshire, on the E. side, 29 ms. S. of Shrewsbury, and 138 N.W. of London. Lon. 2 42 W., 52 23 N.—Town in Middlesex, 12 ms. NE. from Springfield.—Town in Madison co., Vt., 16 ms. W. from Windsor.

Madwellville, town in Tompkins co., N. Y., on the E. side of Cayuga lake, at the mouth of Salmon creek, 8 ms. below Ithaca.

Madugano, town of Switzerland, capital of a bailiwick of the same name, in the canton of Tessin. See articles *Tessin* and *Switzerland*. It is very populous, containing 8,000 inhabitants. Lon. 17 ms. NW. of Como. Lon. 8 48 E., lat. 45 14 N.

Madugano, lake of Switzerland, on the Italian side of the Alps, 25 ms. in length, and from 2 to 4 in breadth. It lies between, and yet its surface is 190 feet higher than the lakes Maggiore and Lemano; it is discharged by the little river Tresa into the former.

Lugo, ancient city of Spain, in Galicia. There are springs in this city boiling hot. It is seated on the Minho, 32 miles SE. of Mondonnedo, and 60 SW. of Oviedo. Lon. 8 52 W., lat. 42 46 N.

Luke, St., parish of S. C., situated in Beaufort district.

Lula, town of Swedish Lapland, seated at the mouth of the river Dula, on the W. side of the Gulf of Bothnia, 42 ms. SW. of Tornea. Lon. 21 0 E., lat. 64 30 N.

Lula Lapmark, province of Swedish Lapland, bounded on the N. by Tornea, on the E. by the Bothnia gulf, on the S. by Pithia, and on the W. by Norway.

Lumella, village in Italy, which gives name to the Lumellina, a small district lying on the river Po, belonging to the Duke of Savoy. Lon. 8 42 E., lat. 45 5 N.

Lumberland, tp. of Sullivan co., N. Y., on Delaware river.

Lumberton, village of Robeson co., N. C., on the E. side of Drowning creek, 25 ms. S. of Fayetteville, in Cumberland co.—Village in Burlington co., N. J., 1 m. SE. of Mount Holly.

Lumpkin, co. of Ga. This county has been recently formed out of that part of what was the territory of the Creek Indians, now called "the Gold Region;" it lies westward of Chestatee river, which separates it from Habersham, and occupies that elevated country giving source to the Coosa, Chattahoochee, and Hiwassee, branch of Tennessee river. N. lat. 34 30 and lon. W. C. 7 0 W. intersect in the eastern part of "the Gold Region," at about 150 ms. by the road NNW. of Milledgeville. Chief town, Auraria. Pop. in 1840, 5,671.

LUNAR, from Latin, *Luna*, the Moon.—See art. *Astronomy*.

Lund, town of Sweden, in Gothland, and capital of Sconen, with an archbishopric and a university. It is an inconsiderable place, containing little more than 800 houses, and carries on but little trade. Charles XI. founded a university here, which is its chief support. The cathedral is an ancient irregular building. It is 20 miles SE. of Landsrona, and 225 SW. of Stockholm. Lon. 13 26 E., lat. 55 33 N.

Lunden, town of Germany, in the duchy of Holstein, seated near the Eyder, 36 ms. NNW. of Gluckstadt. Lon. 9 20 E., lat. 54 26 N.

Lundy, island in the mouth of the Bristol channel, near the middle, between Devonshire and Pembrokeshire. Lon. 4 13 W., lat. 51 25 N.

Lundy's Lane, scene of a battle between the army of the United States and that of Great Britain, on the 25th of July, 1814. This is commonly called the battle of Bridgewater.

Lune.—See *Loyne*.

Lunel, town of Fr., in the dep. of Gard, near the river Ridourle. It has excellent muscadine wine, and is 16 ms. E. of Montpellier.

Lunon, town of Westphalia, in the co. of Marck, situated at the conflux of the Zezisk with the Lippe, 20 ms. S. by W. of Munster.

Lunenbourg, duchy of Lower Saxony, and in the kingdom of Hanover, which, including Zell, is separated from Holstein and Lauenburg on the N. by the Elbe. It is about 100 ms. in length and 70 in breadth. It is watered by the rivers Aller, Elbe, and Ilmenau, and part of it is full of heaths and

forests, but near the rivers pretty fertile. Lunenburg is the capital.

Lunenburg, large fortified town of Germany, capital of the duchy of its name. The chief public edifices are—the places for public worship, the ducal palace, three hospitals, the town-house, the salt magazine, the anatomical theatre, and the academy. The salt springs near this place produce great quantities of salt, which bring in a large revenue to the sovereign, and form the chief employment of the inhabitants. It is situated on the Ilmenau, 31 ms. SE. of Hamburg, and 60 N. of Brunswick.

Lunenburg, co. of Nova Scotia, on Mahone bay. —Tp. in Lunenburg co., Nova Scotia. —Village and tp. in Essex co., Vt., on Connecticut river, nearly opposite Lancaster, in N. H. —NE. tp. and village in Worcester co., Mass., on a branch of Nashua river, 45 ms. NW. from Boston. Pop. in 1820, 1,209.

Lunenburg, co. of Va., between Nottaway and Meherin rivers, bounded by Brunswick SE., Mecklenburg SW., Charlotte W., Prince Edward NW., and Nottaway NE.; length 22 ms., mean width 10; area 220 sq. ms. Surface pleasantly diversified, and soil productive. Staples, cotton and tobacco. Chief town, Lewistown. Pop. in 1820, 10,662; and in 1840, 11,055. Central lat. 36 52 N., lon. W. C. 1 7 W. —C. H. and post office, Lunenburg co., Va.

Lunville, town of Fr., in the dep. of Meurte. Its castle, where the Dukes of Lorraine formerly kept their court, as did afterward King Stanislaus, is now converted into barracks. The church of the late regular canons is very handsome; and here Stanislaus founded a military school, a large library, and a fine hospital. Lunville is seated in a plain, between the rivers Vezeouze and Meurte, 14 ms. ESE. of Nancy, and 62 W. of Strasburg. Lon. 6 30 E., lat. 48 36 N.

Lungro, town of Naples, in Calabria Citeriore, chiefly inhabited by Greeks, 35 ms. NNW. of Cosenza.

Lupow, town of further Pomerania, on a river of the same name, 15 ms. E. of Stolpe.

Luray, village in Shenandoah co., Va., 131 ms. SW. by W. from W. C.

Lure, town of Fr., in the dep. of Upper Saone, near the Ougnon, 30 ms. NE. of Besançon.

Lurgan, town of Ireland, in the co. of Armagh, with an extensive linen manufacture, 14 ms. NE. of Armagh, and 67 N. of Dublin.

Lusatia, marquisate of Germany, 90 ms. long and 60 broad, bounded on the N. by Brandenburg, E. by Silesia, S. by Bohemia, and W. by Misnia and Saxony proper. It is divided into upper and lower. Upper Lusatia abounds more in mountains and hills than the lower, in which are many boggy and moorish tracts, yet it is the most fruitful. The breeding of cattle is very considerable, and there is plenty of game; but the products of the country do not supply the necessities of the inhabitants. This want is compensated by its numerous manufactures, particularly those of cloths and linens. Bautzen and Luckau are the capitals.

Lusignan, town of Fr., in the dep. of Vienne, seated on the Vonne, 15 ms. SSW. of Poitiers.

Luso, river of Italy, which rises in the duchy of Urbino, crosses part of Romagno, and enters Venice 10 ms. W. of Rimini.

Lutange, town of Fr., in the dep. of Moselle, 8 ms. SE. of Thionville, and 11 NNE. of Metz.

Luton, town of Eng., in Bedfordshire, situated on the river Lea, 18 ms. S. of Bedford and 31 0 N. by W. from London.

Luttenberg, town of Germany, in Styria, situated on the Stantz, 42 ms. E. by N. of Marchburg.

Lutter, town of Lower Saxony, in the duchy of Brunswick, 10 ms. NW. of Goslar.

Lutterberg, town of Lower Saxony, in the duchy of Brunswick, 20 ms. S. of Goslar.

Lutterworth, town of Eng., in Leicestershire. Lutterworth has an extensive cotton manufacture and many hands are employed in the stock trade. It is seated on the river Swift, 14 ms. from Leicester, and 88 NW. of London.

Lutzelstein, town of Fr., in the dep. of Lower Rhine, with a strong castle, seated on a mountain, 30 ms. NW. of Strasburg.

Lutzen, town of Upper Saxony, in Thuringia. It is seated on the Elster, 7 ms. WSW. of Leipzig.

Luxemburg, province of the Netherlands, bounded on the E. by Treves, S. by Lorraine, W. by Champagne and Liege, and N. by Liege and Prussia. It lies in the forest of Ardennes, and some places is covered with mountains and woods, but, in general, is fertile in corn and wine, and has a great number of iron mines. The principal rivers are the Moselle, Sour, Ourte, and Semois.

Rather more than one-third of both the provinces of Limburg and Luxembourg, with their chief towns, Maestricht and Luxemburg, were ceded to Holland on the final arrangement between the latter and Belgium. The city of Luxemburg is one of the federal fortresses of the German Confederation, though the civil possession of the town and district has been assigned to the King of Holland, as Grand Duke of Luxembourg.

Luxemburg, strong city of the Netherlands, capital of the province of its name. It is divided by the Alsitz into the upper and lower towns, the former almost surrounded by rocks, but the latter seated in a plain. It is 22 ms. WSW. of Treves. Lon. 6 12, lat. 49 37 N.

Luxeuil, town of France, in the dep. of Sarthe. Near it are some mineral waters and warm baths, also an abbey, founded by St. Columban, an Irishman. It is seated at the foot of the Vosges mountains. NE. of Vesoul.

Luxara, strong town of Italy, in the Mantua, near the conflux of the Crostolo with the Po. It is 18 ms. SSW. of Mantua.

Luya and *Chilayos*, province of Peru, E. of the Tunguragua river, and nearly due S. from Cuzco, lat. 5° S.

Luzerne, county, Pennsylvania, bounded by Pike and Northampton, S. by Schuylkill, E. by Columbia, W. by Lycoming, NW. by Bedford, N. by Susquehanna, and E. by Washington. Length 45, breadth 40 miles, area 1,784 sq. ms. Luzerne county is in many respects a very interesting region, and merits a very particular notice in an elementary work.

Its soil and surface are perhaps more varied than any other county of Pennsylvania. The soil of the valleys is in some parts composed of the latest alluvion, but varies from that species to basaltic rock. The mountains are rugged and barren, and in general seem incapable of culture. The

annah river enters the county at its NW. and flows to the SE. by comparative courses to the mouth of Lackawannock river; it turns nearly at right angles, and flows 35 miles by comparative courses to a little N. of Nescopeck, where it enters Columbia.

The following specific description was compiled from the manuscript notes of Isaac A. Chapman,

The country is very mountainous, and the mountains consist principally of ridges running parallel to each other; and, like the other mountains of Pennsylvania, extending nearly parallel to the sea in nearly a SW. and NE. direction. In the valleys between the mountain ridges are the fertile valleys, on which are placed the body of the population of the county. The principal mountains of Luzerne are the following: Wyoming runs on each side of Susquehanna river, forming the valley of Wyoming. The localities of those two ridges are Bullock mountain and Shawaneg mountain NW. The elevation of Bullock mountain 1,000, and that of Shawaneg 850 feet above the Susquehanna river. The summit of one mountain to that of the opposite Wilkesbarre by the road $6\frac{1}{2}$, but by line $5\frac{1}{2}$ miles. At the foot of each mountain are the small hills; consequently, the broken land occupies more space than the real bases of the mountains. At Wilkesbarre, the level plain on the E. side extends about $1\frac{1}{2}$ mile from the river, on the E. side only about a half mile. Upon the E. side of the town of Wilkesbarre is situated Nescopeck mountain, on the N. side of the Nescopeck creek, is a range nearly of similar elevation with those of Wyoming, and parallel to the Nescopeck.

The Nescopeck forms a regular unbroken ridge nearly destitute of timber on its summit, and reaches from the Susquehanna nearly to the N. Hell Kitchen mountain commences at the head of Nescopeck valley, and extends NE. to the Lehigh. It is a high, rocky, and barren mountain, naked of timber on its summit, where only shrubby finds support. From the NW. side of this mountain flows Hell Kitchen creek, a branch of Nescopeck.

Star-leaf mountain is an isolated pyramidal mountain rising from Nescopeck valley. Mahoopeny mountain is a mere spur of Bowman's mountains. Bowman's mountains and Lackawannock mountain.

The Wyoming, Lackawannock, and Buck mountains all produce mineral coal of the anthracite class. It forms an important article of commerce from Luzerne county.

The valleys of Luzerne are the following: Valley of Wyoming, about 20 ms. long and 5 wide, on both sides of the Susquehanna river, enters it at its NE. extremity, through the famous gap in the Shawaneg range. The river traverses the valley in a serpentine course, and leaves it by a gap called Nanticoke falls. In the valley stand the towns of Wilkesbarre and Tionesta, opposite to each other. This is the most fertile valley in the county; the soil is exuberantly fertile.

Nescopeck valley lies on both sides of Nescopeck creek and between Nescopeck and Buck mountains. It is about 20 miles long and 5 wide, and

does not extend to the river. In point of soil, it stands next to Lackawannock valley; but the soil of Nescopeck is somewhat superior.—See *Lackawannock valley*.

Tunkhannock valley is very irregular and crooked, about a mile wide, lessening in some places to half a mile, and about 35 miles long, and reaches from the Susquehanna river into Susquehanna county. In proportion to its width, it is well cultivated and populous.

Mahoopeny valley lies along Mahoopeny creek. It is narrow, irregular, and thinly peopled. Its length about 20 miles from the river. Its opening to the river is in Braintrim township, in the NW. part of the county. All the streams of Luzerne are rapid, and supply, in an indefinite number of places, excellent sites for water works.

About one-fiftieth part of the whole county is already cleared and cultivated, and not more than one-third will admit of agriculture. For pastoral purposes, the proportion to the whole will be larger.

The mountain timber of Luzerne is various species of oak, thinly admixed with yellow, pitch, and white pine, of a small growth. On the hills timber becomes larger and more numerous in species, the oak and pine being mixed with hickory, wild cherry, beach, birch, and hemlock. In the northern parts of the county, 4 or 5 ms. from the Susquehanna, sugar maple is very abundant, and mixed with an immense quantity of beech and hemlock; the latter peculiarly abounding on the low lands. In the southern part of the county the low grounds or valleys generally produce yellow pine, white pine, oak, and hickory, and occasionally buttonwood. Black walnut is common to the dry rich soil of the whole county.

The only minerals yet found in any considerable quantity in Luzerne are iron and coal. Two forges for the manufacture of iron have been erected, one in Lackawannock, the other in Nanticoke valley. Staples of Luzerne—grain, flour, whiskey, lumber and coal. Chief towns, Wilkesbarre, Kingston, and Stoddartsville. Pop. in 1820, 20,027; and in 1840, 44,006.

Luzerne, tp., Warren co., N. Y., on Hudson river, 10 miles W. from Sandy Hill. Pop. in 1820, 1,430 —Tp., Fayette county, Pa., in the great bend of the Monongahela, opposite Ten-mile creek, 12 miles NW. from Union. Pop. in 1820, 1,610.

Luzzaro, strong town of Italy, on the confines of the duchies of Mantua and Gaustalla, near the confluence of the Crostola with the Po. It is 10 miles S. of Mantua. Lon. 10 50 E., lat. 45° N.

Luzzi, town of Naples, in Calabria Citeriore, near the river Crate, 3 ms. S. of Bisignano.

Lybian Desert.—This immense sandy region of Africa is the eastern extension of the Sahara. Though but imperfectly explored, that part of interior Africa between the mountains of Fezzan and the Niger is, however, known not to be so absolutely sterile as even the desert of Barca. Rivers do flow southwardly from the Lybian sands, which must be confluent of the Niger. The Lybian desert is, nevertheless, only a shade less rude than the great western Sahara; barrenness and barbarism reign from the Nile to the Atlantic.—See *Africa*, p. 15, and sequel.

Lycham, town of England, in Norfolk. It is

24 miles W. by N. of Norwich, and 92 NNE. of London.

Lycoming, co., Pa., on the W. branch of the Susquehanna, bounded SE. by Columbia, S. by Northumberland, Union, and Centre, W. by Clearfield and McKean, N. by Potter, Tioga, and Bradford, and E. by Luzerne; length 92, width 25 miles, area 2,290 sq. miles. In many respects, a strong resemblance exists between Lycoming and Luzerne counties, though the former is less mountainous than the latter. Lycoming is traversed from W. to E. by the W. branch of Susquehanna, and drained by numerous large creeks or small rivers, flowing principally from the N. and NE., such as the Sinnamahoning, Kettle creek, Pine creek, Joyalsock, and Muncy creeks. Soil, timber, productions, and staples, nearly the same as those noticed under the head of Luzerne. Chief town, Williamsport. Population in 1820, 13,517. This description includes what is now divided between Lycoming and Clinton; the latter (a new county) comprises western Lycoming. In 1840, the population of the two counties stood thus:

Lycoming	-	-	-	22,649
Clinton	-	-	-	8,323
Total	-	-	-	30,972

Lycoming, tp., Lycoming co., Pa., extending from the W. branch up Lycoming creek, and commencing at Newry, 2 ms. above Williamsport

Lycoming, small river of Lycoming co., Pa., rising in the southern border of Bradford, leading with the Towanda, and flowing SW., falls into the W. branch 2 ms. above Williamsport.

Lydd, populous town of England, in Kent. It is a member of the Cinque port of Romney, and seated in Romney Marsh, 26 miles S. of Canterbury, and 71 SE. of London. Lon. 1 4 E., lat. 50 58 N.

Lydsing, village of England, in Kent, near Gravesend. In this village 600 young Normans, who came over with Alfred and Edward, the sons of Ethelred, after the death of Canute, to take possession of their father's throne, were massacred by Godwin, Earl of Kent.

Lysesse, town of Fr., in the dep. of the North, and late province of Hainault, 15 ms. E. of Landrecy. Lon. 4 10 E., lat. 50 6 N.

Lyman, tp., York co., Maine, 27 ms. N. from York.

Lyme, town, Grafton county, N. H., on the E. side of Connecticut river, between Hanover and Oxford, about 8 miles N. of Dartmouth College. —Town, New London co., Conn., on the E. bank of Connecticut river, and on Long Island sound, 18 miles SW. of New London, in the lat. of 41 25 N., and lon. 72 40 E. —Tp., Jefferson co., N. Y., on Lake Ontario. —Town in the western borders of Huron co., Ohio, about 100 ms. a little E. of N. from Columbus.

Lyme Regis, borough and seaport of Eng., in Dorsetshire. It is seated on the declivity of a craggy hill, on the river Lyme, which runs through it, at the head of a little inlet, and from which it takes its name; and its harbor is formed by a noble pier, called the Cobb. It is 28 ms. E. by S. of Exeter, and 143 W. by S. of London. Lon. 3° W., lat. 53 40 N.

Lymford, lake of Denmark, in Jutland, betw. the provinces of Ripen and Wiborg on the S. Aalborg on the N., extending in a westerly direction from the Cattegat, towards the German ocean and reaching so near the latter as to almost insulate Aalborg. This sheet of water is about 70 ms. long, but full of islands, and of very unequal breadth extending nearly along lat. 57° N.

Lymington, borough and seaport of Eng., in Hants. It is seated about a mile from the chalk hills called the Needles, and the harbor will admit vessels of considerable burden. It is seated on a hill, 12 ms. SSW. of Southampton, and 90 of London. Lon. 1 42 W., lat. 50 45 N.

Lynchburg, town, Campbell co., Va., situated on the S. side of James river, 118 ms. W. of Richmond, and 128 W. by N. of Petersburg. W. C. 2 16 W., lat. 37 18 N. This town has advanced with great rapidity within the last 20 years. It was incorporated in 1805. It is a seaport for the trade of an extensive, fertile, and well-cultivated interior. James river being navigable for batteaux from here to Richmond, tobacco, wheat, flour, hemp, whiskey, and beef are embarked and sent down by water. Pop. 1840, 6,395. A marble manufactory has been also established—a circumstance very indicative of wealth and taste. —Village, Orange co., Ky., 54 ms. NW. by W. from Frankfort. —Village, Lincoln co., Tenn., 50 ms. SSW. of Murfreesborough.

Lynch's Creek, so called, river which rises in N. C., a few ms. W. of Sneadsborough, flowing S., enters S. C. between Lancaster and Chesterfield districts, and, assuming a SE. course, flows through S. C., and falls into the Great South Sea. The entire length of Lynch's creek, by consecutive courses, exceeds 100 ms.

Lynch Lake, Williamsburg district, S. C. —*Lyndeborough*, town, Hillsborough co., N. H., 10 ms. NW. from Amherst. Pop. 1820, 1,800.

Lyndhurst, village of Eng., in Hants, in the New Forest. Here is a seat which belongs to the Duke of Gloucester, as lord warden of the Forest. It is 7 ms. N. of Lymington.

Lyndon, town, Caledonia co., Vt., 33 ms. W. from Montpelier. Pop. 1,100.

Lynesville, village, Granville co., N. C., 10 ms. N. from Raleigh.

Lynn, town, Essex co., Mass., famous for the manufacture of women's shoes, 10 ms. N. of Boston, and 5 SW. of Salem, in the lat. of 42 25 N., and lon. of 70 52 W. —Western tp., Berks co., Pa. It joins Berks and Schuylkill counties, and is situated between West Peuns and West Peunsberg tps.

Lynn Canal, or *Strait*, NW. coast of North America, winds in a northerly direction from the northern extremity of Chatham strait, of which it is in reality a continuance. Lon. W. C. 4 4 W., lat. of its entrance 58 12 N.

Lynn Creek, post office, Giles co., Tenn., 70 ms. S. from Murfreesborough.

Lynnfield, tp., Essex co., Mass., 10 ms. W. from Salem, and 11 N. from Boston.

Lynnhaven Bay, a curve of the Chesapeake, at its southern extremity, between Hampton and Cape Henry.

Lynn Regis, or *King's Linn*, borough at 58°

of Eng., in Norfolk, 42 ms. WNW. of Norfolk, and 106 N. by E. of London. Lon. 24° at. 52 48 N.

Mac River, in the co. of Norfolk, U. C., rises in the tp. of Windham, and, running from thence easterly through the tp. of Woodhouse, empties into Lake Erie, where it has about three feet on the bar. It is a good harbor for batteaux. *Macmsville*, village, in the western part of Lecco., Pa., by post road 80 ms. NE. by E. from Leisburg.

Macnois, late province of Fr., which, with that of Rhone, forms the dep. of Rhone and Loire.

Macons, second city of Fr. for beauty, commerce, and opulence. It is the capital of the dep. of Rhone and Loire, and is seated at the confluence of the Rhone and Saone. It was founded about 42 B. C., by the Romans, who made it the centre of the commerce of the Gauls. About the year 145 it was totally destroyed by fire, but rebuilt by the munificence of Nero. Many antiquities are still observed, that evince its Roman antiquity. Lyons is the see of an archbishop, and, since its recent calamities, contained 150,000 inhabitants, upwards of 30,000 of whom were employed in various manufactures, particularly of silk.

Some of the most exquisite workmanship, in silk, silver, &c. The quays were adorned with magnificent structures. The Hotel de Ville vied with that of Amsterdam; and the theatre was not surpassed by any in Fr. The other principal buildings were, the Hotel de Dieu, the Hospital of Charity, the Exchange, the Custom-house, the Court of Justice, the Arsenal, a public library, and several colleges. The bridge, which unites the city with the suburbs de la Guillotiere, is 1,560 paces long; and there are three other principal suburbs, six gates, and several fine churches. No part of France suffered so much from the revolution as Lyons; its population was reduced to less than 80,000. It is again rapidly increasing, and its population may be seen in the tabular view of France, p. 329, 150,814 inhabitants. This city is 12 S. N. of Vienne, and 220 SE. of Paris. Lon. 4° E., lat. 45 46 N.—Town and seat of justice in Wayne co., N. Y., 16 ms. N. from Geneva, and E. from Canandaigua, and by the canal 117 W. from Utica; lat. 43 5 N. and lon. W. of C. being almost exactly on the meridian of that city. It is elegantly situated on the Grand Western Canal of N. Y., and rapidly improving. Pop. in 1800 of the tp., 3,972.

Macdonald's Creek, in the co. of Lincoln, U. C., discharges itself into Chippewa river, in the tp. of Northburghby, not far above the mouth of that river.

Macdons, Gulf of, that curve of the Mediterranean between Catalonia and the Gulf of Genoa.

Macdonsander, town, Onondago co., N. Y., at the confluence of the Onondago or Oswego and Seneca rivers, 20 ms. NW. from Onondago.

M.

Macatea, one of the Society isles, in the South Pacific.—See *Society Isles*.

Macabra, town of the kingdom of Algiers, seated on the Gulf of Bona, W. of the town of Bona.

Mac Arthurstown, village in the southwestern

part of Athens co., O., and in Elk tp., 25 ms. SW. from Athens, and 30 ms. nearly due E. of Chilli-cothe.

Mac Allister's Cross Roads, post office, Montgomery co., Tenn., 99 ms. NW. from Murfreesborough.

Macao, town of China, in the province of Canton, on an island at the entrance of the bay of Canton. It is defended by three forts. The Portuguese have been in possession of the harbor since 1640. They pay a tribute for the liberty of choosing their own magistrates, exercising their religion, and living according to their own laws; and here, accordingly, is a Portuguese governor, as well as a Chinese mandarin, to take care of the town and the neighboring country. The British and some other European nations have factories in this place. Lon. 113 46 E., lat. 22 12 N.

Mac Callan's Cross Roads, post office, Harrison co., Ia., 110 ms. S. from Indianapolis.

Macarsca, seaport of Dalmatia, with a pretty good harbor, seated on the Gulf of Venice, 25 ms. SE. of Spalatro. Lon. 18 7 E., lat. 43 49 N.

Macas.—See *Majas*.

Macassar, kingdom of Celebes, whence that island is called Macassar.—See *Celebes*.

Macassar, large town of the island of Celebes, capital of a kingdom of the same name. The houses are all of wood, supported by thick posts, and the roofs covered by very large leaves; they have ladders to ascend into them, which they draw up as soon as they have entered. It is seated near the mouth of a large river, which runs through the kingdom from N. to S. Lon. 117 28 E., lat. 5° S.

Macassar, Straits of, between Borneo and Celebes.

Mac Cawley's, post office, Wayne co., Ill., by post road 131 ms. SE. from Vandalia.

Mac Clellansville, village, Camden co., Ga., 214 ms. SSE. from Milledgeville.

Macclesfield, corporate town of Eng., in Cheshire. It is seated at the edge of a forest of the same name, near the river Bolin. It has manufactures of mohair, twist, hat bands, buttons, and thread, and mills for the winding of silk. It is 36 ms. E. of Chester, and 171 NW. of London. Lon. 2 17 W., lat. 53 15 N.

Mac Connellsburg, or *Mac Connellstown*, village of Bedford co., Pa., 19 ms. W. from Chambersburg.

Mac Connellsville, village, Oneida co., N. Y.—Village and seat of justice for Morgan co., Ohio, is situated on the left bank of the Muskingum river, 30 ms. NW. from Marietta, and 25 SSE. from Zanesville. Lat. 39 43 N., lon. W. C. 4 50 W. Pop. of tp. in 1840, 1,518.

Mac Culloh's, post office, Jefferson co., Ohio, 16 ms. from Steubenville.

Mac Cutchensville, village, Pickaway co., Ohio, 30 ms. SSE. from Columbus.

Mac Danielsville, village, Spartanburg district, S. C., 103 ms. NW. of Columbia.

Mac Donnell's, post office, Muskingum co., O., 72 ms. E. from Columbus.

Macdonough, tp., Chenango co., N. Y.

Macedonia, province of Turkey, in Europe, bounded on the N. by Servia and Bulgaria, on the E. by Rumania and the Archipelago, on the S. by Livadia, and on the W. by that country

and Albania. Salonichi, ancient Thessalonica, is the capital.

Macedon, SW. tp. and village, Wayne co., N. Y. The tp. lies along both sides of the western canal, 12 W. from Lyons.

Mac Entire's, post office, Franklin co., Ga., 96 ms. NNE. from Milledgeville.

Macerata, handsome populous town of Italy, in the marquisate of Ancona, near the mountain Chiento, 12 ms. SW. of Loretto. Lon. 13 27 E., lat. 43 20 N.

Mac Farland's, post office, Lunenburg co., Va., about 60 ms. SW. from Richmond.

Mac Gahey's, post office, Rockingham county, Virginia, by post road 139 miles NW. from Richmond.

Mac Grewsburg, village, Adams co., Pa., 32 ms. SE. from Harrisburg.

Machecou, town of Fr., in the dep. of Lower Loire, and late province of Bretagne, seated on the T'enn, 20 ms. SW. of Nantes. Lon. 1 11 W., lat. 47 2 N.

Macherry, town of Hindoostan proper, situated in the province of Mewat, about 72 ms. distant from Delhi.

Machian, one of the Molucca islands, 20 ms. in circumference, and the most fertile of them all. It produces the best cloves, and the Dutch have here 3 inaccessible forts. Lon. 126 55 E.

Machias, maritime tp. and village, Washington co., Maine, on the W. side of Machias river. Lat. 44 44 N., and lon. 67 34 W. The principal village, post office, and seat of justice for the co., is at the falls in Machias river. On the E. branch there is, however, another fine village with a post office. The principal export from this place is lumber. Pop. in 1810, 1,570; that of the tp. and port in 1840, 2,185.

Machicaco, promontory of Spain, in the Bay of Biscay. Lon. 3° W., lat. 43 37 N.

Machynleth, town of Wales, in Montgomeryshire, on the Douay, over which is a stone bridge leading into Merionethshire. It is 57 ms. W. of Montgomery, and 198 NW. of London. Lon. 3 45, lat. 52 24 N.

Mac Intosh, co., Ga., bounded by the Atlantic ocean SE., Alamamaha river, or Glynn, and Wayne SW., and Liberty NW. and NE.; length 40, mean width 14 ms., area 560 sq. ms.; surface level, and soil in part sandy. Chief town, Darien. Staples, sugar and cotton. Pop. in 1820, 5,129; and in 1840, 5,360. Ctl. lat. 31 34 N., lon. W. C. 4 40 W.

Mac Intosh, C. H. and post office, Mac Intosh co., Ga.

Mac Kean, co., Pa., bounded by Clearfield S., Jefferson SW., Warren W., Cattaraugus and Alleghany cos. N., York N., Potter E., and Lycoming SE.; length 42, width 35 ms., area 1,442 sq. ms.; surface hilly, and soil generally of middling quality. Chief town, Smithport. Pop. in 1820, 728; and in 1840, 2,975. Ctl. lat. 41 45, lon. W. C. 1 35 W.

Mac Keansburg, post office, Schuylkill co., Pa., 4 ms. NE. from Orwiesburg.

Mac Keesport, village, Alleghany co., Pa., on the right banks of Youghiogheny and Monongahela rivers, at their junction, 11 ms. SE. from Pittsburg.

Mackenzie's River, or *Unjigah River*, or *River*, an immense stream of N. America, in the Chippewan mountains, lon. W. C. 40 and lat. 52½° N. This is the Elk river, flows NE. to lat. 58°, enters the Athapalake, by which it receives from the NE. a large accession of water. A short distance the Athapalake discharge, the proper Peace river from the SW. The united streams course NNW. to about lat. 61 30, where the whole is lost in Great Slave lake, a body of water tending nearly E. and W. upwards of 300. At the extreme NW. part of the lake Mackenzie river is discharged, which, assuming a course little W. of NW., enters the Arctic ocean at 69° N., and 56° W. from Washington. The true course of this great river passes through of lat., and with its difference of lon. and long., exceeds 2,000 ms. in length.

Mackey's ville, village, Burke co., N. C.

Mac Lecombsborough, village, Hamilton co., 60 ms. NE. from Vandalia.

Mac Leom's Mills, post office, Rutherford Tenn., 14 ms. from Murfreesborough.

Mac Minn, co., Tenn., bounded SE. by Roane, SW. by Hiwassee river, NW. by Blount and NE. by Roane and Blount. It is drained by the various branches of Hiwassee river.; length 30, mean width 20 ms., area 600 sq. surface hilly, and soil varied. Chief town, houn. Pop. in 1820, 1,623; and in 1840, 12,719. Ctl. lat. 35 25 N., lon. W. C. 7 30.

Mac Minnville, town and seat of justice, W. co., Tenn., 70 ms. SE. from Nashville. Lon. 43 N., lon. W. C. 8 42 W.

Mac Nairy, co., Tenn., position uncertain.

Macomb, co., Michigan, bounded E. by Clair river and lake, S. by Wayne co., SW. by Oakland co., NW. by Lapeer, and NE. by Clair; surface moderately hilly, and soil excellent. Pop. in 1820, 869; and in 1840, 9,716.

Mac Neil's Store, and post office, Moore co., N. C., by post road 90 ms. SW. from Raleigh.

Macon, western co., N. C., bounded by the territory of the Cherokee Indians W. and N., Haywood co., N. C., NE. and E., Pickens co., S. C., and Rabun co., Ga., S.; length N. E. to W. 48 ms., mean breadth 18, area 860 sq. ms. Lat. 35 to 35 26, lon. W. C. 5 48 to 5 50 W. It is very nearly commensurate with the higher part of the valley of Tennessee proper, and slopes to NNW. Chief town, Franklin. Pop. in 1830, 5,833.

When Mr. H. S. Tanner published the first impressions of his map of the U. S., the two western cos. of N. C., Haywood and Macon, were delineated and colored so as to include the whole section of the State westward of Buncombe. Subsequent documents enabled Mr. T. to modify his map; from which it now appears that the extreme western part of the State is still in possession of the Creek Indians to the extent of 75 sq. ms. Haywood, Macon, and the adjacent Cherokee co., is an elevated region; the mean height without estimating that of the mountain chains exceed 1,500 feet above the Atlantic tide. Therefore, allowance is made for relative elevation, the winter temperature of Macon will be found as low as that on the Atlantic shore on N. lat. 35°.

Village and seat of justice, Bibb co., Ga., situated on the right or west bank of Oakmulgee river, on the site of old Fort Hawkins. N. lat. 32° 21', lon. W. C. 6 37 W., and 30 ms. SW. of Milledgeville.

Madison, town of France, in the department of Maine and Loire, and late province of Brittany. It is remarkable for its good wine, and is seated on the declivity of a hill, near the town of 35 ms. N. of Lyons, and 188 SE. of Paris.

Madisonville, town, Northampton co., North Carolina.

Madecran, or *Mekran*, extends along the Indian coast, from Cape Jask, at the entrance of the Persian gulf, to the mouth of the Araba river, which separates it from Sinde, in a direction N. E. and W. about 600 ms., along N. lat. 26° 30'. The position and extent corresponds in part with the ancient Gedrosia, but may be found in the list of countries with which we are imperfectly acquainted.—See *Mecran*.

Madecres, river of Africa, which runs across the bottom of Tripoli, and falls into the Mediterranean a little to the E. of Lebeda.

Madecuarrie, river of New Holland, in New South Wales, rises in and flows westerly from the Blue Mountains, and is lost in inland marshes at S. lat. 34° 30'.

Madec Reynold's Store, and post office, Campbell county, Va., 132 ms. SW. by W. from Richmond.

Madeceri, ancient town of Samos, in the Archipelago.

Madecronissi, ancient Helen, small island of the S. from Attica. This little island lies 15 ms. E. from Cape Colonna, and is an oblong of 8 by 1 mile.

Madecules. Dark spots on the face of the sun, called. This class of phenomena are not permanent as are those seen on the Moon. The spots are changeable, and must arise from vibrations in the envelope of that luminary. They have been seen, though rarely, by the naked eye, such was the case in 1816.

Madecungy, tp., Lehigh co., Pa., on the Little North river, between Upper Milford and Weisberg, 5 ms. SW. from Allentown.

Madec Veytown, village, Mifflin co., Pa., 68 ms. W. by W. from Harrisburg.

Madec Ville, Washington co., Ky.—See *Maxwell*, Washington co., Ky.

Madec Williamstown, village, Chester co., Pa., 10 ms. from Philadelphia.

Madeczua, small island on the Red sea, near the mouth of Abex.

Madecagascar, large island of Africa.—See *Africa*, p. 30.

Madecadlena, river.—See *Magdalena*.

Madecawaska, river, settlement, and village of New York, northward of St. John's river. The river *Madecawaska* rises in the highland or mountains, about 15 ms. of the St. Lawrence, and opposite the mouth of Saguenay river, and including several lakes, of which the largest is the Temisquiata, falls into St. John's river after a comparatively short course of SSE. 50 ms. The settlement of *Madecawaska*, included in the co. of Aroostook, was founded in 1840, 1,876 inhabitants. The village of Aroostook, as laid down on Bradford's map of the Atlas, is situated on the point between the

St. John's and Green rivers. N. lat. 47 18, lon. W. C. 8 53 E.

Madberry, tp., Stafford co., N. H., 11 ms. NW. from Portsmouth.

Madensborough, tp. of Buckingham co., L. C., 12 ms. SE. from Three Rivers.

Madeira, island in the Atlantic ocean, 120 ms. in circumference, and 240 N. by E. of Teneriffe; the centre in lat. 32 48 N. The scorching heat of summer and the icy chill of winter are here equally unknown. Spring and autumn reign continually, and produce flowers and fruits throughout the year. Many brooks and small rivulets descend from the mountains in deep chasms or glens, which separate the various parts of the island. The water is conducted by wiers and channels in the vineyards, where each proprietor has the use of it for a certain time; some being allowed to keep a constant supply of it, some to use it thrice, others twice, and others only once a week. As the heat of the climate renders the supply of water to the vineyards absolutely necessary, it is not without great expense that a new vineyard can be planted; for the maintenance of which, the owners must purchase water, at a higher price, from those who are constantly supplied, and are thus enabled to spare some of it. The cedar tree is found in great abundance, and extremely beautiful; most of the ceilings and furniture at Madeira are made of that wood, which yields a very fragrant smell. The dragon tree is a native of this island. The hedges are mostly formed of the myrtle, rose, jessamine, and honeysuckle; while the larkspur, fleur-de-lis, lupin, &c., spring up spontaneously in the meadows. There are very few reptiles to be seen in the island; the lizard is the most common. Canary birds and goldfinches are found in the mountains; of the former, numbers are sent every year to England. This island is well watered and populous. Funchal is the capital.

Madera, river of South America, one of the great southern confluent of the Amazon, rises as far S. as lat. 20° S., interlocking sources with the Pilcomayo and Ucayale, flowing thence nearly due N. to S. lat. 10°; it thence turns to NE., and enters the Amazon at lat. 3° S. The Madera is one of the largest secondary rivers of the globe.—See art. *America*, p. 52.

Madia, or *Maggia*, town, river, valley, and bailiwick of Switzerland, in Upper Vallais. The valley is long and narrow, between high mountains, watered throughout its whole length by the river, and it is the fourth transalpine bailiwick. The town is 10 ms. NW. of Locarno.

Madison, town in Somerset co., Me., on the Kennebeck river, 10 ms. above Norridgewock. Pop. in 1820, 881.—Co. of N. York, bounded by Onondaga W., Oneida lake NW., Oneida co. NE., Otsego SE., and Chenango S. Length 28 ms., mean width 20; area 560 sq. ms. It occupies the dividing ground between the waters flowing into the Chenango and Unadilla branches of Susquehannah; the Chitinoquo, Oneida, and Cazanaserago creeks entering Oneida lake, and some creeks flowing into the Mohawk. The surface is generally hilly, but the soil highly fertile, and productive in grain, pasturage, and fruits. Chief towns, Hamilton, Madison, and Cazenovia. Pop. in 1820, 32,208; and in 1840, 40,008. Central

lat. 43 0 N., lon. W. C. 1 22 E.—Tp. in Madison co., N. Y., on the heads of Chenango river and Oriskany creek, 22 ms. SW. from Utica.—Tp. in Columbia co., Pa., between Greenwood and Derry, 5 ms. N. from Danville.—Co. of Va., bounded SE., S., and SW., by Orange co., or the Rapid Ann river, NW. by the Blue ridge, or Shenandoah co., and NE. and E. by Culpeper. It is about 28 ms. square, and has an area of 784 sq. ms. It is drained entirely by various creeks of the Rapid Ann; the surface is moderately hilly, and soil of middling quality. Staples, flour and tobacco. Chief town, Madison. Pop. in 1820, 8,490; and in 1840, 8,107. Central lat. 38 20 N., lon. W. C. 1 10 W.—Village in Madison co., Va., on Robertson's river, branch of Rapid Ann, 45 ms. W. from Fredericksburg.—Village in Amherst co., Va., on the left bank of James river, opposite Lynchburg.—Co. of Ga., on Broad river, bounded S. by Oglethorpe, SW. by Clark, W. by Jackson, NW. and N. by Franklin, and NE. by Elbert. Length 30 ms., mean width 10; area 300 sq. ms. Surface hilly, but soil productive. Chief town, Danielsville. Pop. in 1840, 5,045.—Town and seat of justice for Morgan co., Ga., 50 ms. NNW. from Milledgeville. Lat. 38 38 N., lon. W. C. 6 43 W.—Co. of Ala., bounded N. by Ten., E. by Decatur, S. by Tennessee river, and W. by Limestone co., Ala. Length 30 ms., mean width 20; area 600 sq. ms. Surface diversified by hill and dale, and soil highly fertile. Staple, cotton. Chief town, Huntsville. Pop. in 1820, 17,481; and in 1840, 25,706. Central lat. 34 50 N., lon. W. C. 9 48 W.—Co. of Ten., bounded by Henderson co. on the E., and drained by the S. and middle forks of Forked Deer river. Cil. lat. 35 37 N., lon. W. C. 11 50 W. Pop. in 1810, 16,530.—Co. of Ky., bounded by Clay, SE., Rockcastle S., Garrard W., Kentucky river, or Jessamine NW., Kentucky river, or Fayette and Clark N., and Estill E. Length 38 ms., mean width 15; area 570 sq. ms. Chief town, Richmond. Pop. in 1820, 15,954; and in 1840, 16,355. Central lat. 37 43 N., lon. W. C. 7 12 W.—Co. of Ohio, bounded on the N. by Union, E. by Franklin, S. by Fayette, and W. by Clark and Champaign counties. It is about 28 miles long from N. to S., by 19 broad from E. to W., and contains 400 sq. ms. This county contains extensive bodies of fine land, well adapted to agriculture and grazing. One of the staples of the county is neat cattle, which are sent to Detroit, Pittsburg, Philadelphia, and other places. Chief town, Loudon. Pop. in 1820, 4,799; and in 1840, 9,025. Central lat. 39 55 N., lon. W. C. 6 26 W.—Tp. in Columbiana co., Ohio.—Tp. in Muskingum co., Ohio, E. from Muskingum river, and containing the village of Haymarket.—Tp. in the NE. part of Highland co.—Village and NE. tp. of Geauga co., Ohio. Grand river traverses through this tp.—Tp. in Richland co., Ohio, in which is situated the village of Mansfield. Pop. in 1820, 552.—Tp. in Licking co., O.—SE. tp. of Franklin co., O.—NE. tp. of Pickaway co., O.—Tp. in Guernsey co., Ohio.—Tp. in Jackson co., Ohio.—NE. tp. of Scioto co., O.—Tp. in Fairfield co., O.—SE. tp. of Clark co., Ohio.—Tp. in Fayette co., Ohio.—Tp. in Montgomery co., Ohio,

W. from Miami river, and adjoining to the c Preble.—Village in Hamilton co., Ohio, 3 ms. SW. from Columbus.—Tp. in Butler co.—NE. tp. in Perry co. O.—Town and seat of justice for Jefferson co., Ia., on the Ohio river ms. above Louisville, and 75 below Cincinnati. Pop. about 1,500. It has already one prison, office, a bank, and three or four places of p wcrship. Lat. 38 44 N., lon. W. C. 8 16 W. Co. of Ia., bounded by Hamilton, Marion, Shi Rush, and Henry.—C. H. and village in Ma co., Ia., 15 ms. E. from Indianapolis.—Co. o on the Mississippi and Illinois rivers, opposit mouth of Missouri. Extent in sq. ms. uncer It is bounded S. by St. Clair and Washing and E. by Bond. Surface in most part level fertile. Chief town, Edwardsville. Pop. in 1 13,550; and in 1840, 14,433. Central lat. 50 N., lon. W. C. 12 50 W.—Co. of fornis a square of 30 ms. each way; area 90 ms.; mostly drained by the higher branches of Francis river. Central lat. 37 25 N., lon. 1 W. of W. C. Chief town, Frederickton. Po 1840, 2,775.

Madison, East, town in Somerset co., Me post road 114 N. from Portland.

Madison's river, branch of Missouri, rises in Chippewan mountains, between the Yellow S and Jefferson's river, and, flowing NE., joins ferson's and Gallatin's rivers, and forms the souri.

Madisonville, village and seat of justice, p kins co., Ky., on the dividing ground between waters of Green and Tradewater rivers, 54 SE. from Shawnectown, and 67 a little N. Clarksville, in Tennessee. Lat. 37 20 N., W. C. 10 22 W.—Village and seaport of the rish of St. Tammany, La., on Chifuncote rive 8 ms. nearly due N., and on the opposite side of Lake Pontchartrain, from New Orleans.

Madras, or *Fort St. George*, fort and tow of the peninsula of Hindoostan, on the coast of C mandel. It is the principal settlement of the glish East India Company on the E. side of the ninsula, and is a fortress of very great exte cluding within it a regular well-built city. close on the margin of the Bay of Bengal, which it has a rich and beautiful appearance. houses being covered with a stucco called chu which in itself is nearly as compact as the marble, and, as it bears as high a polish, is eq splendid. They consist of long colonnades, th open porticos, and flat roofs; and the city con many handsome and spacious streets. But inner apartments of the houses are not much erated, presenting to the eye only white wa which, however, from the marble-like appea of the stucco, give a freshness grateful in s of a country. Ceilings are very uncommon in the rooms. Indeed, it is impossible to find any v will resist the ravages of that destructive insect white ant. There is a second city, called the Black Town, nearly 4 ms. in circuit, sepaed from Madras by the breadth of a proper esple only. Madras, in common with all the Euroan settlements on this coast, has no port for shipg, the coast forming nearly a straight line; and is incommoded also with a high and dangerous r. Madras was taken by the French in 1746, but

ed by the peace of Aix-la-Chapelle. It is 100 N. by E. of Pondicherry, 1,030 SW. by W. of Calcutta, and 758 SE. of Bombay. Lon. 80 E., lat. 13 5 N.

Madre de Dios, island in the Pacific ocean, near the coast of Patagonia, 180 ms. in circumference.

42° W., lat. 51° S. It is the Resolution of English sailors and geographers.

Madre de Popa, town of New Granada, on the peninsula, 50 ms. E. of Carthagena.

Madrid, capital of Spain, in New Castile. The houses are all built with brick, and the streets are broad, and straight, and adorned at proper intervals with handsome fountains. There are 100 towers or steeples, in different places, which contribute greatly to the embellishment of the city. It is seated in a large plain, surrounded by high mountains. Madrid is seated on the river Manzanares, which, though small, is adorned with magnificent bridges. It is 265 miles NE. of London, 790 S. by W. of London, and 625 SSW. of Paris. Lon. 3 20 W., lat. 40 25 N. It is the most elevated capital in Europe, standing on a plain 1,977.84 feet above the level of the Atlantic ocean; consequently, the air in winter is pure and piercing. The atmosphere is, however, generally pure and serene. Pop. about 200,000. Learned institutions of Madrid are numerous and highly respectable. It is 850 miles W. by S. of Rome, and upwards of 1,000 by land.

Madrid, tp. and village, St. Lawrence co., N. on St. Lawrence river, at Point Iroquois, 2 miles above Hamilton, and 12 below Ogdensburg. In 1820, 1,930.

Madrigal, town of Spain, in Old Castile, seated in a plain, fertile in excellent wine, 10 miles from Madrid-del-Campo. Lon. 4 19 W., lat. 41 25 N. Town of South America, in the province of Popayan. Lon. 75 45 W., lat. 50' N.

Madrisio, small town of Italy, in the State of Venice, 32 ms. from Venice.

Mad River, name of a tp. in Clark co., Ohio. In 1820, 734.

Mad River, large eastern branch of the Great River, rising in the northern parts of Logan co., and crossing which, and Clark, and the north-western corner of Green county, it runs in a south-westerly direction, above 50 ms., into the eastern part of Montgomery co., and falls into the Miami river at the town of Dayton.

Madrogam, large town of Africa, capital of Morocco, with a spacious royal palace. The upper part of the house is in the shape of a bell. Lon. 31 40 E., lat. 18° S.

Madura, large town and capital of an island of the same name, in the Indian sea. Lon. 12 49 E., lat. 9 50 N.—Town of the Carnatic, capital of a province of the same name, on the coast of the promandel, 130 miles N. by E. of Cape Comorin, and 303 SW. of Madras. Lon. 78 12 E., lat. 5 55 N.

Madeler, lake of Sweden, 80 miles long and 20 miles wide, between the provinces of Westmania and Northmania.

Madestrom, very extraordinary and dangerous whirlpool on the coast of Norway, in 68° N. lat., in the province of Nordland, and district of Lofoden, near the island of Moskoe, whence it is also called *Moskoestrom*. The mountains of Helseg-

gen, in Lofoden, lie a league from the island of Moskoe, and between these two runs this large and dreadful stream, the depth of which is from 36 to 40 fathoms. When it is flood, the stream runs up the country between Lofoden and Moskoe with a boisterous rapidity; but the roar of its impetuous ebb to the sea is scarcely equalled by the loudest cataract. The whirlpool is of such an extent and depth, that if a ship comes within its attraction it is inevitably absorbed and beat to pieces against the rocks below; and when the water relaxes, the fragments come up again. The intervals of tranquillity are only at the turn of the ebb and flood, and calm weather; they last but a quarter of an hour, its violence gradually returning. When the stream is most boisterous, and its fury heightened by a storm, vessels have been reached by it at the distance of 5 miles.

Maerna, town of Germany, in Tyrol, 23 miles WSW. of Trent.

Maseyk, town of the Netherlands, in the territory of Liege, on the river Meuse, 10 ms. SSW. of Ruremonde.

Maeslandsluys, town of S. Holland, near the mouth of the Meuse, 10 ms. W. of Rotterdam.

Maes river.—See *Meuse*.

Maestricht, city of the kingdom of Holland, and capital of the province of Limburg, about 4 ms. in circumference, seated on the Meuse, opposite Wyck, with which it communicates by a stone bridge. The number of inhabitants is estimated at 18,000.—See article *Luxemburg*. The fortification and situation of Maestricht are such that it is deemed one of the strongest places in Europe. It is 14 ms. NNE. of Liege, and 58 E. of Brussels. Lon. 5 48 E., lat. 50 49 N.

Mafra, town of Portugal, in Estramadura, with a college, founded in 1772. The town is seated near the sea, 18 ms. NNW. of Lisbon.

Magadi, or *Maghery*, town of Hindoostan, in Mysore, seated in a hilly country, abounding in timber trees, stone, and iron, 24 ms. W. of Bangalore.

Magadoxo.—See article *Africa*, p. 29.

Magdalena, river of South America, formed by two large branches rising in the province of Popayan, and near the city of Popayan. Magdalena proper has its source in a small mountain lake about 70 ms. SE. from Popayan, at N. lat. 1 45, and about 45' of lon. E. from W. C. The Canca, or Western branch, rises at the city of Popayan. The two branches, inclining a little to the E. of N., flow nearly parallel down two mountain valleys, to N. lat. 9 30, or upwards of 600 miles. Below their junction the united stream, inclining a little to the W. of N., is finally lost in the Caribbean sea at N. latitude 11°, after a comparative course of nearly 1,000 miles. A branch of the Andes extends from Popayan, between the two branches of this river, which only terminates a few miles above their junction. Neither branch receives any large tributaries, being augmented by mere mountain torrents.

The city of Popayan stands upwards of 5,900 feet above the level of the ocean; therefore, the Magdalena has a fall from its source to the point of discharge of more than 6,000 feet. When compared with length of course, the Magdalena is a very unnavigable stream. Though discharged into

the Atlantic, the extreme SW. sources of the Canca branch of Magdalena rise within 70 ms. of the Pacific ocean, at the bay of Choco.

Magdeburg, duchy of Germany, in Lower Saxony, bounded on the N. and E. by Brandenburg, S. by Anhalt and Halberstadt, and W. by Brunswick. It is divided into four circles—Holz, Saal, Jerich, and Ziesar. The country is in general level, and the parts which are not marshy and overgrown with wood are very fertile. The salt springs are of such richness that they are able to supply all Germany with salt. This duchy belongs to the king of Prussia.

Magdeburg, fortified city of Prussia, capital of the duchy of the same name. It has a handsome palace, a citadel with a fine arsenal, and a magnificent cathedral, which contains the superb mausoleum of Otho the Great. This city is happily situated for trade, having an easy communication with Hamburg by the Elbe; therefore, they carry on manufactures of cotton, linen, &c., to a great extent, but their principal merchandise is silk and woolen. It is the strongest place belonging to his Prussian majesty, where his principal magazines and foundries are established. It is 40 ms. W. of Brandenburg, and 125 SE. of Hamburg. Lon. 11 45 E., lat. 52 11 N.

Magellan, strait of South America, between the continent and island of Terra del Fuego, discovered in 1520 by Magellan, a Portuguese in the service of Spain, since which time it has been sailed through by several navigators; but, the passage being dangerous and troublesome, they now sail to the Pacific ocean round Cape Horn. The Spaniards call the country to the north of this strait Tierra Magallanica. Recent and more accurate information tends to show that the difficulties and dangers of the straits of Magellan have been greatly exaggerated.

Magewille, township, Sunbury county, New Brunswick, on the right side of Saint John's river.

Maggia.—See *Madia*.

Maggiore, or *Locarno*, lake of Italy, partly in the duchy of Milan, and partly in the country of the Grisons, being about 35 ms. in length and 6 in breadth.

Magindanao, lat. 7 6 N., lon. 124 30 E., town and capital of the island of the same name, situated on a deep bay, SW. side of the island. The island severally written Mindanao, Maginda, and Magindanao, is the southern, and, next to Luzon, the most extensive, of the Philippine group, lying between lat. 5½ and 10° N., lon. 125 E. of London, traverses it about 200 ms. The form of this island is very irregular. Extreme length and breadth nearly equal, and about 300 ms.; area 37,500 sq. ms.

Magliano, small but populous town of Italy, in the territory of the Pope, and district of Sabino, seated on a mountain near the river Tiber, 30 ms. SW. of Spoleto, and 30 N. of Rome. Lon. 12 35 E., lat. 42 25 N.

Magnavacca, town of Italy, in the Ferrarese, with a fort, seated at the mouth of the lake of Comacchio, in the Gulf of Venice, 18 ms. N. of Ravenna. Lon. 12 4 E., lat. 44 52 N.

Magnesia.—See *Manachia*.

Magnissa, town of Asia Minor, ancient *Mag-*

nesia. It is still a large, fine, and populous town. Lon. 27 18 E., lat. 38 44 N.

Magny, town of Fr., in the dep. of Seine Ouse, and late province of the Isle of France ms. NW. of Paris. Lon. 1 54 E., lat. 49 11 N.

Magra, river of Italy, which rises in the Apennines, in the valley of Magra, washes Pontoli and Sarzana, below which it falls into the Mediterranean.—Valley in the duchy of Tuscany 27 ms. in length and 15 in breadth.

Magruder's, post office, Prince George's Md., 15 ms. from W. C., and 22 from Annapolis.

Maguelone, lake of Fr., in the dep. of Herault near a town of the same name, which is seated on the coast of the Mediterranean, into which lake enters by a canal, the beginning of the famous capital of Languedoc.

MAGYAROK, proper name of the Hungarians, though Hungary contains other nations, such as Germans, Slovacks, (Sclavonians,) Rousniacs, Red Russians, &c. The Magyars are supposed to be of Turkish origin. United with some Slavonians, (Slovacks,) they entered Hungary about A. D. 884, where they have since remained, and form one of the many nations of civilized Christian Europe. Their respective languages prove a common origin to the Magyars and Slavonians. In the ten centuries of war, migration, and emigration which followed the fall of the Roman empire, there arose a mixture of nations, defying all view of the various fortunes of any one people.

MAHA, great; hence *Maha-Rajah*, Great King. This title was rendered of some notoriety as being recently applied to the sovereign of the British Empire, and Moulton, who was styled "*The Maha-Rajah Runjeet Singh*."

Mahadia.—See *Elmadia*.

Mahalen, town of Egypt, capital of Garbia, carries on a considerable trade in linen, cotton, and sal ammoniac, and the inhabitants have recourse to hatch chickens. Lon. 30 31 E., lat. 31 27 N.

Mahanoy, river of Pa., rises in the northern part of Schuylkill co., in the tp. of Rush, flowing WSW. about 50 ms., falls into the Susquehanna, 11 ms. below Sunbury. About half its course towards its mouth is in Northumberland co.

Mahanoy Mountains are one ridge between Mahanoy and Catawissa rivers, and another between Mahanoy river and Shamokin creeks.

Mahanoy, Little, tp., Northumberland co., Pa., between Line and Mahanoy mountains. Pop. in 1820, 447.

Mahanoy, Lower, tp., Northumberland co., Pa., along the Susquehanna, between Mahanoy and Mahantango rivers. Pop. in 1820, 1,200.

Mahanoy, Upper, tp., Northumberland co., Pa., enclosed by the Scire mountain, the NW. limit of Schuylkill co., Mahantango creek, and the tp. of Lower Mahanoy. Pop. 1820, 1,639.

Mahantango Creek, stream of Pa., rises in the NW. angle of Schuylkill co., and flows WSW. and falls into the Susquehanna, 35 ms. above Harrisburg. For about 12 ms. above its mouth, it separates Dauphin and Northumberland counties.

Mahantango, Lower, tp., in the NW. angle of Schuylkill co., Pa., on Long Pine creek, or branch of Mahantango. Pop. 1820, 937.

Mahantango, Upper, tp. in the NW. angle of Schuylkill co., on Little Mahantango. Pop. in 1820, 863.

Mahanuddy, or *Mahanady*, river of Hindoos, which takes its rise in the NW. part of Bengal, falls by several mouths into the bay of Bengal, at Cattaek. These mouths form an assemblage of low woody islands. At the mouth of the principal channel, near False Point, is a fortified island, named Cajung or Codjung. The bay of the Mahanuddy is between that of the Gangetic and Godavery. The sources of the Saone, a branch of the Ganges, and those of the Nerbuddah, Godavery, and Saone, between N. lat. 20° and the northern tropic.

Mahoning, river of Pa., rises by one large branch in the western part of Jefferson, and by another in the western part of Indiana. These branches interlock with the extreme western branches of the Susquehanna, and, flowing westward, unite at Nicholsburg, in the NW. angle of Virginia; and the united stream, continuing a little to the W. about 20 ms., falls into the Allegheny river, 20 ms. above Kittaning. The entire length of the Mahoning is about 50 ms.

Mahoning, northern tp. of Indiana co., Penn. Pop. in 1820, 1,106.—NW. tp. of Mercer co., Penn., traversed by the Shenango and Mahoning rivers. Pop. in 1820, 1,647.—Large creek and river rising in Columbiana, Stark, Portage, and Trumbull cos., Ohio, enters Penn. at the E. angle of the latter, and joins the Shenango, in Big Beaver, in Beaver co., Penn.—Source of Columbia co., Penn., on the right side of the Schuylkill river, including the village of Danville. Pop. in 1820, 1,478.

Mahratta, name of one political division of the empire of Indostan. In the ancient Hindoo geography, the term *Maharashtra* was given to a division of the Deccan, and from which has come *Matta*. *Khandesh*, *Baglana*, and part of *Berbera* were included in original *Mahratta*, extending west as far as Gujerat and the Nerbuddah, where the *Grassias* and *Bheels* commence. But, as their general name is thus derived, what is now known as *Mahrattas* in modern times is a congregation of *Mahometans*, *Hindoos*, *Rajpoots*, *Pindarees*, and other barbarous tribes. In the reign of *Aurungzebe* until 1761, the *Matta* power increased, but in that year they sustained a most sanguinary defeat, at *Paniput*, by the *Afghans*, under their king, *Ahmed Shah Abdali*. Under the title of *Peshwa*, the nominal sovereign of the *Mahrattas* had long established his residence at *Poona*, in *Berar*, but they were always divided and ill-governed mass. The most military of the chiefs has always been the real sovereign for the time being. In 1802, the *Peshwa* was defeated and dethroned by *Holcar*, sought and obtained British protection, and was reinstated in *Poona* by *General Wellesley*, since duke of *Wellington*. Henceforth, to 1815, the *Peshwa* was completely a dependent or open enemy to the British, and held his place, but in that year was dethroned, and sent into exile at *Pithoor*, in *Allahabad*. The greater part of his territories were taken under direct British rule.

The *Mahratta* power is, however, very far from being extinct in *Indostan*. They have still a nom-

inal representative at *Poona*, and, under the *Guicowar*, the *Mahrattas* yet rule over much of *Gujerat* and *Adjemere*, and the *Rajahpoots* prevail in large sections of *Malwa* and southeastern *Gujerat*.

The British regard the *Mahrattas* and *Seiks* as counterpoising powers to each other, and have little difficulty in fomenting the disputes between two bodies so mutually inimical.

Mahrattas, two large and powerful States of India, which derive their name from *Mahrat*, an ancient province of the *Deccan*. They are called the *Poonah*, or western *Mahrattas*; and the *Berar* or eastern. Collectively, they occupy all the S. part of *Hindoostan* proper, with a large proportion of the *Deccan*. *Malwa*, *Orissa*, *Candeish*, and *Visiapour*, the principal parts of *Berar*, *Guzerat*, and *Agimere*, and a small part of *Dowlatabad*, *Agra*, and *Allahabad*, are comprised within their empire, which extends from sea to sea, across the widest part of the peninsula, and from the confines of *Agra* northward to the river *Kishna* southward, forming a tract of 1,000 ms. long and 700 broad. The western State, the capital of which is *Poonah*, is divided among a number of chiefs or princes, whose obedience to the *paiswah*, or head, like that of the German princes to the emperor, is merely nominal at any time; and in some instances an opposition of interests begets wars, not only between the members of the empire themselves, but also between the members and the head. *Nagpour* is the capital of the eastern *Mahrattas*. Their armies are principally composed of light horse.

Maiden Creek, large branch of *Schuylkill* river, rising in the NW. angle of *Lehigh* co., flows nearly S. through *Lehigh* and *Reading*, and falls into *Schuylkill* 6 ms. above *Reading*.—Tp. of *Berks* co., Penn., along the *Schuylkill*, on both sides of *Maiden creek*.

Maidenhead, corporate town of Eng., in *Berkshire*. It carries on a pretty considerable trade in malt, meal, and timber. It is on the *Thames*, over which is a bridge, 12 ms. E. by N. of *Reading*, and 26 W. by N. of *London*. Lon. 0 40 W., lat. 51 32 N.—Tp. of *Hunterdon* co., N. J. It is situated on the post road, about 6 ms. NE. of *Trenton*.

Maidstone, borough of Eng., and the co. town of *Kent*. It is seated on the *Medway*, a branch of which runs through the town, over which there is a bridge, and enjoys a brisk trade in exporting the commodities of the co., particularly its hops, of which there are numerous plantations around it. Here are likewise paper mills, and a manufacture of linen thread. It is 20 ms. W. of *Canterbury*, and 35 ESE. of *London*. Lon. 0 38 E., lat. 31 16 N.

Maidstone Township, *Essex* co., U. C., lies between *Sandwich* and *Rochester*, upon *Lake Erie*.

Maidstone, tp., *Essex* co., *Vt.*, 53 ms. N. from *Montpelier*.

Maina, district of the *Morea*, ancient *Peloponnesus*, which answers in part to the ancient *Laconia*. It is mountainous and barren, and inhabited by a poor, bold, and hardy race, who have never entirely submitted to the *Turkish* yoke. *Maina*, though sometimes so stated by authors, is not commensurate with ancient *Laconia*, but is

restricted to that mountainous and barren point of land, extending into the Mediterranean, between the Gulfs of Coron and Kolokythia. What may be the numbers of the brigands who inhabit this rude tract is unknown, but their territory does not exceed 30 ms. in length, with 10 ms. in width, or about 300 sq. ms. Maina is, except the point of Gibraltar, the most southern promontory of Europe.—See *Mainotes*.

Maine, river of Germany, which rises in the circle of Franconia, runs by Bamberg, Wurtzburg, Aschaffenburg, Hanau, and Frankfort, and falls into the Rhine at Mentz.

Maine, Upper and Lower, two circles of Bavaria; the former including the principalities of Upper Bamberg, Bareuth, with the northern part of the Upper Palatinate. Lower Maine contains the grand duchy of Wurtzeburg, principality of Fulda, with part of the dutchies of Hesse and Fulda. The two circles were in great part annexations made by the Congress of Vienna, in 1815, and extend over 6,700 sq. ms., and peopled by 860,000 inhabitants.

Maine, or *Mayenne*, dep. of Fr., which includes the late province of the same name. It takes its name from the river Maine, which, soon after its junction with the Sarte, falls into the Loire. Laval is the capital.

Maine, northeastern State of the U. S., bounded by the Atlantic ocean SE., N. H. SW., L. C. NW. and N., and New Brunswick E.

	Ms.
Maine has an external limit on the Atlantic ocean of -	- 200
On Passamaquoddy bay and St. Croix river	100
A frontier curved limit on New Brunswick and Lower Canada -	- 400
A limit in common with New Hampshire of	150

Having an entire outline of - 850
 Its area 35,000 sq. ms., or 22,400,000 acres.
 Extreme south, N. lat. 43 4; extreme north, N. lat. 48°.

The greatest length of Maine is by a line drawn from its SW. to NE. angle, 350 ms. Greatest width, nearly on lat. 45° N., 200 miles.

Extending through 5° of lat., very serious difference of climate is experienced at the two extremities of Maine. The inhabited Atlantic border has a comparatively mild climate. The surface of the State, though not mountainous, may be viewed as rough and hilly. The soil, however, is generally well adapted to the purposes of agriculture, though varying very much in quality. The Atlantic border is indented and chequered more by peninsulas and islands than any other part of the coast of the U. S. This highly diversified zone is followed by another more elevated; the falls of the rivers marking the line of separation. The inhabited part of the State extends about 100 ms. inland, and is followed by a region abounding with lakes, and but imperfectly known.

Beside many of lesser note, Maine is drained by the three fine rivers, Androscoggin, Kennebec, and Penobscot. The two former, are, however in strictness, only one river. See the articles *Kennebec* and *Penobscot*. The sea horder of this State, is in a peculiar manner remarkable for the number and excellence of its harbors; and the ex-

cessive rise and ebb of the tides tends to breach, and preserve the harbors of this and all parts of the coast of the U. S., from Cape more open in winter than could be expected in ordinary cases, from relative lat.

The principal productions of Maine are such as wheat, rye, oats, maize and b meadow grasses, and flax. The immense ir forests supply large quantities of lumber, latter may indeed be viewed as the primary of the State. Its principal ports are Por Hallowell, Penobscot, Bangor, and Eastport Politically Maine was subdivided into the cos

Showing an increase exceeding, by a small fraction, 20 per cent. in 30 years.

This State has, like other sections of New England, paid early and steady attention to the improvement of education. Amongst its principal literary institutions, may be enumerated, Bowdoin College in Brunswick. The Maine Charity School in Bangor, and the Literary and Theological Institution at Waterville. Maine was admitted a State of the U. S., March 3, 1820.

Maine and Loire, department of France, which comprises the late province of Anjou. It has its name from two rivers of the same name. Angers is its capital.

Mareville, town of France, in the department of Eure, and late province of Normandy. Lon. 1 20 E., lat. 49 2 N.

Mainland, the principal of the Shetland Isles, 100 long from N. to S., but its breadth seldom

exceeds six. The face of the country exhibits a prospect of black, craggy mountains, and marshy plains, interspersed with some verdant spots, which appear smooth and fertile. Neither tree nor shrub is to be seen, except the juniper and the heath. The inhabitants are a stout, well made, comely people, the lower sort of a swarthy complexion. The gentry are allowed, by all who have conversed with them, to be most of them polite, shrewd, sensible, lively, active, and intelligent persons; they manufacture a strong coarse cloth for their own use, as also linen. They make likewise, of their own wool, very fine stockings. They export some herrings and other fish, with a considerable quantity of butter and train oil, otter and seal skins, and no inconsiderable quantity of the fine stockings just mentioned. Their chief trade is to Leith, London, Hamburg, Spain, and to the Straits. Kirkwall is the capital.

Mainotes, a people of Greece, in the Morea, inhabiting the district of Maina. As early as the reign of Constantine Porphyrogenitus, during the latter part of the eighth century, the Eleuthero-Laconians had acquired the name of Mainotes. From what nation or nations has sprung this race of savages is uncertain and unimportant, as Cape Tenærus, now Metapan, the most southern extremity of the Morea, has been, from remote antiquity, inhabited by savages, who have been pirates and murderers of all those so unfortunate as to fall into their power. The well known character of these ruffians has gained for them, from the Greeks of the Morea, the title of *Cacavounies*, "*villains of the mountains.*" The existence of a band of cutthroats on the European side of the Mediterranean, even under the Turkish Government, may well excite wonder. The Mainotes, before the late revolution in Greece, were considered sometimes as independent, and at other times as subjected to the Pacha of Tripolizza.—See *Maina*.

Maintenon, town of France, in the department of Eure and Loire, and late province of Beauce, seated on the Eure, between two mountains. It is 5 ms. N. by E. of Chartres. Lon. 1 36 E., lat. 48 31 N.

Maire, Le, strait of S. America, between Staten island and Terra del Fuego, in lat. 55° S. Through this strait ships sometimes sail in their passage to Cape Horn.

Maissy, town of France, in the department of Calvados, and late province of Normandy. Lon. 1 2 W., lat. 49 24 N.

Maixant, St., ancient town of France, in the department of the two Sevres, and late province of Poitou. It carries on a trade in corn, stockings, and woolen stuffs, and is seated on the Sevre, 26 ms. SW. of Poitiers. Lon. 7' W., lat. 46 24 N.

Majas, pronounced and written, but improperly, *Macas*, a district of the province of Majas, and Quijos, in Peru, now part of Colombia. It lies E. from the Andes, on the sources of the Napo, nearly on the meridian of Washington, and from the equator to lat. 2 30 S.

Majorca, island of Spain, 60 ms. long and 45 broad, situate in the Mediterranean sea, between Ivica and Minorca. The whole coast is lined with strong towers. The NW. part is mountainous, the rest produces good corn, olive trees, fine honey, and delicate wine. It has no rivers, though

there are a great many fine fountains and wells. The inhabitants are robust and lively, and make good sailors.

Majorca, strong city, capital of the the island of the same name. The public squares, the cathedral, and the royal palace, are magnificent. It contains 4,000 houses, built after the antique manner, a university, more ancient than celebrated, and 22 churches, besides the cathedral. The harbor is extremely good. It is seated on the SW. side of the island. Lon. 2 30 E., lat. 39 35 N.

Makefield, village, Bucks co., Pa.

Makefield, Lower, tp., Bucks co., Pa., on the Delaware, commencing opposite Trenton, in N. J.

Makefield, Upper, tp. of Bucks co., Pa., along the Delaware, above Lower Makefield.

Macarev, town of Russia, in the government of Niznei Novgorod, situate on the Volga, 24 ms. ENE. of Niznei Novgorod.

Makarief, or *Makaren*, town of Russia, in the government of Kostroma. It is the capital of the province of Unza, and situate on the river Unza, 80 ms. E. of Kostroma. Lon. 44 14 E., lat. 58 50 N.

Maker, village of England, in Cornwall, 7 ms. SE. of St. Germans, on an eminence, forming the W. point of the Hamoaze, at Plymouth. The steeple of the church, called Maker Tower, is a noted sea mark. Lon. 4 10 W., lat. 50 21 N.

Makoonda, town of Hindoostan, in the country of Allahabad, 66 ms. S. of Allahabad, and 110 NNE. of Gurrh. Lon. 84 37 E., lat. 24 33 N.

Mackran.—See *Mecran*.

Malabar, western coast of the peninsula of Hindoostan, lying between 9° and 14° N. lat. It is divided among several petty princes and States. The customs and manners of the inhabitants are very different, as well as the productions. The people are generally of a dark, olive complexion, with long black hair, and good features. In some places they are distinguished into tribes or castes, all of which are brought up to the same employments as their parents. These are the Gentoos, of whom see an account, under the article *Hindoostan*.

Malacca, or *Malaya*, peninsula of Asia, containing several petty kingdoms, bounded on the N. by Siam, E. by the ocean, and SW. by the strait of Malacca, which separates it from Sumatra. It is 560 ms. in length, and 150 in breadth. It produces few commodities for trade, except tin and elephant teeth, but there are a great many excellent fruits and roots, pepper, and other spices, with some precious gums and woods. The pine apples are the best in the world, and the coconuts have shells that will hold an English quart. The inhabitants are fond of navigation, war, plunder, emigration, adventures, and gallantry. They talk incessantly of their honor and bravery, and speak the softest language of Asia, yet they are deemed the most treacherous, ferocious people on the face of the globe. Their religion is a mixture of Mahometanism.

Malacca, seaport, and the capital of a kingdom of the same name, in the peninsula of Malaya, seated on the strait of its name, 480 ms. SE. of Acheen. Lon. 102 5 E., lat. 2 12 N.

Maladetta, most elevated peak of the Pyrenean system of mountains. The crest, often called

"*the Mount Blanc of the Pyrenees*," and particularly Nethon, rises at N. lat. 42 36 lon. 40' E. of London, about 55 ms. a little N. from Balbastro, 100 NE. from Saragossa, a ms. NE. by E. of Venasque. From a notice in the National Intelligencer, April 5, 1843, thence, hitherto regarded as inaccessible, has ascended to its summit, on the 18th of July, by a Russian officer, M. de Tchitacheff, and by him, from barometrical admeasurement, elevated 3,371 French metres, equal to 11,059 Eng. feet, to within a small fraction. From masses of Maladetta flow northwards the sources of the Garonne, and southwards the Segra, a confluent of the Ebro.

Malafia.—See *Asia*, p. 83.

Malaga, seaport and episcopal town of Spain, Granada, with two castles and a good harbor. Commerce is principally in raisins and excise wines; and it has a manufacture of cards. The inhabitants are about 40,000. It is seated on the Mediterranean, surrounded by hills, 70 ms. W. of Granada. Lon. 4 10 W., lat. 36 35 N. Village, Gloucester co., N. J., 30 ms. S. Philadelphia.—Village, Monroe co., Ohio, post road 147 ms. SE. by E. from Columbus.

Malatia, town of Asiatic Turkey, in Alania, seated on the W. side of the Euphrates, 90 WN W. of Diarbekar. Lon. 37 50 E., lat. 37 10 N.

Malawully, town of Hindoostan, in Mysore, with a large mud fort, separated into two parts by a transverse wall. Here is a fruit garden of great extent, planted by the late sultans. It is 27 E. of Seringapatam.

Malchin, town of Lower Saxony, in the county of Mecklenburg, seated on the river Peene, where it forms the Lake Camrow, 22 miles ESE. of Gustrow.

Malcho, town of Lower Saxony, in the county of Mecklenburg, between the Lakes Calpid and Plau, 23 ms. ESE. of Gustrow.

Maldeghina, town of France, in the dep. of the Mayenne, 10 ms. E. of Bruges.

Malden, borough of Eng., in Essex, seated on an eminence, on the river Blackwater. Vessels of a moderate burden come up to the town, but larger ships are obliged to unload at a distance below Blackwater bay. This town carries on a considerable trade, chiefly in corn, salt, coal, iron, and wine. It is 10 ms. E. of Chelmsford, at 27 NE. of London.—Village of Eng., in Surrey, 2 ms. SE. of Kingston, with some gunpowder mills, on a stream that flows from Ewel to Kingston.—Tp. in the co. of Essex, U. C., situated at the mouth of Detroit river, on the E. side of the river, having Colchester to the E. and Huron to the W. and includes the village of Amherstburg.—Town, Middlesex co., Mass., situated between Medford and Lynn, 5 ms. NE. from Boston. It is united to Charlestown by Mystic bridge.

Maldives, a cluster of small islands in the Indian ocean, lying SW. of Cape Comorin. The richest, called Head of the Isles, or Kelly, is in lon. 73 4 E., lat. 7 5 N.; and Maldiva, in which the king resides, is in lon. 75 35 E., lat. 4 1 N. They are innumerable; but all low and sandy, and most of them uninhabited. They are divided into 13 antolons, or provinces, each having its separate governor, who rules with great oppression.

alesherbes, town of Fr., in the dep. of Loire. 26° E., lat. 48 20 N.

alestroit, town of Fr., in the dep. of Morbihan, a province of Bretagne, seated on the Oust, s. E. of Port l'Orient. Lon. 2 23 W., lat. 47 5 N.

aligne, Grand Pointe, U. C., on the river St. Lawrence, is opposite to the Grand Island of St. Regis.

aligne, la Petit Ponte, U. C., on the N. shore of the river St. Lawrence, not far above the lower end of Grand Isle St. Regis.

Alio, Cape of, or *St. Angelo*, cape of the island of Sicily, at the S. entrance of the Gulf of Napoli, s. E. of Malvasia.

Alcollo, one of the largest of the New Hebrides, in the Pacific ocean, lying in 16 15 S. lat., and 167 45 E. lon. It extends 20 leagues from the N. Its inland mountains are very high, and are covered with forests.

Alcolu, as written in English geographical works, or, as written by Mr. D'Urville, *Vanicora*, is a small island that the French discovered under the lamented La Pérouse, were discovered in 1788 or 1879. In 1791, the French government sent out an expedition, under Entrecasteaux, in search of La Pérouse, which, after the death of its admiral, was abortive. The real place of the fatal accident was discovered by a Captain Baudin, who made it known to Europe. This discovery led the French Government to again, in 1800, to send out M. Dumont D'Urville, in the corvette (sloop-of-war) the *Astrolabe*, who, on the 14th of August, 1828, reached and verified the place of the wreck, and erected a monument with the following inscription: "A la Memoire de La Pérouse et de ses compagnons l'*Astrolabe*, 14 Mars, 1791."

Alving West, town of Eng., in Kent, 6 ms. W. of Maidstone, and 30 E. by S. of London. Lon. 1 15 W., lat. 51 20 N.

Alloysville, village, Wilkes co., Ga., by post 32 ms. NE. from Milledgeville.

Almow, small town of Ireland, in the co. of Wick, and province of Munster, seated on the banks of the water, 17 ms. N. of Cork. Lon. 8 32 W., lat. 52 10 N.

Almody, town of the kingdom of the Netherlands, in the bishopric of Liege, on the Recht, 9 ms. S. of Limburg, and 40 N. of Luxemburg. Lon. 6 2 E., lat. 50 18 N.

Almistra, town of Asia, in Natolia, seated at the mouth of a river of the same name, which divides it into the Old and New town. It is 30 ms. S. of Terasso. Longitude 36 15 E., latitude 36 30 N.

Almoe, seaport of Sweden, in the province of Scania, seated on the sound, with a large harbor and a strong citadel. It is 15 ms. SE. of Copenhagen. Lon. 13 7 E., lat. 53 38 N.

Almsbury, borough of Eng., in Wiltshire. It is pleasantly seated on a hill, on the river Avon, and almost surrounds it, over which it has six bridges. It drives a trade in the woolen manufactures. It is 26 ms. E. by N. of Bristol, and 95 W. of London. Lon. 2° W., lat. 51 34 N.

Almoy-Jaraslowitz, town of Russia, in Kaluga province. SW. from Moscow.

Almone, village, Franklin co., N. Y., 25 ms. S. of Albany.

NE. from St. Regis, and 50 NW. by W. from Plattsburg.

Malo, St., seaport of France.—See *St. Malo*.

Maloria, small island of Italy, on the coast of Tuscany, 10 ms. W. of Leghorn. Lon. 10 4 E., lat. 43 43 N.

Malpartido, town of Spain, in Estramadura, 14 ms. S. of Placentia. Lon. 5 30 W., lat. 39 36 N.

Malpas, town of Eng., in Cheshire. It is seated on a high eminence, near the river Dee, 15 ms. SE. of Chester, and 166 NW. of London. Lon. 2 45 W., lat. 53 2 N.

Malplaquet, village of the kingdom of Belgium, in Hainault, 7 ms. from Mons.

Malta, an island in the Mediterranean, between Africa and Sicily, 20 ms. long, and 12 broad. It was formerly reckoned a part of Africa, but now belongs to Europe. It was anciently little else than a barren rock; but such quantities of soil have been brought from Africa, that it is now become a fertile island. They sow, however, but little corn, because they can purchase it cheap in Sicily; but they cultivate large quantities of lemon, cotton trees, and vines, which produce excellent wine. The number of inhabitants is said to be about 90,000, who speak Arabic and Italian. After the taking of Rhodes, the emperor Charles V. gave this island to the grand master of the order of St. John of Jerusalem. By the treaty of Paris, in 1814, this island has been guaranteed to Great Britain. Valette is the capital. It is about 60 ms. S. of Sicily, and 200 E. of Tunis, in Africa. —Tp., Kennebec co., Me., 8 ms. E. from Augusta. Pop. in 1820, 1,054. —Tp., Saratoga co., N. Y.; the principal village 7 ms. W. from Saratoga, and 5 ms. SE. from Ballston Spa. Pop. in 1820, 1,518.

Mallon, borough of Eng., in the N. Riding of Yorkshire, on the Derwent, over which is a stone bridge, and is composed of two towns, the New and the Old, containing three churches. It is a populous place, 20 ms. NE. of York, and 216 N. by W. of London. Lon. 40' W., lat. 54 9 N.

Malvasia, small island of Turkey in Europe, on the E. coast of the Morea, remarkable for its excellent wines that are called malmsey, being brought hence. The capital is Napoli-di-Malvasia.

Malvern, Great, village of Eng., in Worcestershire, 8 ms. W. by S. of Worcester. It had once an abbey, and here are two noted chalybeate springs recommended as excellent in scrofulous complaints.

Malvern, Little, village of Eng., in Worcestershire, seated in a cavity of Malvern Hills, 3 ms. from Great Malvern.

Malvern Chase, an extensive chase of Eng., in Worcestershire, containing 7,356 acres in that co., 619 in Hertfordshire, and 103 in Gloucestershire.

Malvern Hills, in the SW. of Worcestershire, Eng., dividing this part of the co. from Herefordshire. They rise one above another for about 7 ms., and run from N. to S.; the highest point is 1,313 feet above the surface of the Severn, and they appear to be of limestone and quartz.

Malung, a town of Sweden, in the province of Dalecarlia. Lon. 15 20 E., lat. 60 30 N.

Malwa, province of Hindoostan proper, bounded on the W. by Guzerat, on the N. by Agimere, on the E. by Allahabad and Orissa, and on the S. by

Candeish. It is one of the most extensive, elevated, and highly diversified tracts in Hindoostan, and is divided among the chiefs of the Poonah Mahrattas. Ougein and Indore are the principal towns.

Mamars, an ancient town of Fr., in the dep. of Sarte, and late province of Maine, seated on the Dive.

Mamokating, town, Sullivan co., N. Y., containing the village of Bloomingburg, 23 ms. W. from Newburg. Pop. in 1820, 2,702.

Mamaroneck, town, Westchester co., N. Y., on Long Island sound, 23 ms. NE. from N. Y.

MAMELUC, Arabic from Al-mamluch, *possessed by another, or paid slave*, and applied to a military order originally slaves from Circassia and other countries around the Black sea, formed into a body by the Sultans of Egypt, over which in process of time they became sovereigns. Early in the 16th century, they with Egypt fell under the power of Turkey. They were finally suppressed by Mehemet Ali Pacha of Egypt.

Man, island in the Irish sea, 30 ms. long and 12 broad. It contains 17 parishes; and the chief towns are Castletown, Douglas, Peel, and Ramsay. The air is healthy, and the soil produces more corn than is sufficient to maintain the inhabitants, who are a mixture of English, Scots, and Irish. They have a bishop, called the bishop of Sodor and Man; but he has no seat in the British Parliament. The commodities of this island are wool, hides, butter, tallow, black marble, slate, limestone, lead, and iron. Some manufactures of coarse hats, cotton goods, and linen cloth, are carried on in different parts; but its principal trade arises from the herring fishery. It is 12 ms. S. of Scot., 30 N. of Anglesey, in Wales, 35 W. of Cumberland, and 40 E. of Ireland.

Manachia, town of Natolia proper, anciently called Magnesia. It was formerly the capital of the Ottoman Empire, and is seated in a fertile country, at the foot of a mountain, on the river Sarabat, 22 ms. N. of Smyrna. Lon. 27 25 E., lat. 38 45 N.

Manahawkin, village in the southern angle of Monmouth co., N. J., about 55 ms. SE. by E. from Philadelphia.

Manallan, tp., Fayette co., Pa., between the tps. of Redstone and Union, and between Rodstone and Dunlap's creeks. Pop. in 1820, 1,376.

Manaar, small island on the NW. side of the island of Ceylon, and forming a part of that chain of islands and shoals which is sometimes called Adam's Bridge, extending from Ceylon to the Carnatic coast, and separating the Gulf of Manaar from Palk strait.

Manaar, Gulf of, is bounded W. by the Carnatic coast, N. by Adam's Bridge, E. by Ceylon, and on the S. opens into the Indian ocean. If we limit the Manaar Gulf to the latitude of Cape Comorin, it would be about 150 ms. wide between that cape and the coast of Ceylon, with a nearly equal depth towards Adam's Bridge, though narrowing in that direction; area of the whole sheet of water about 12,000 sq. ms. Only vessels of very shallow draught can pass Adam's Bridge.

Manar, island of the N. W. Indies, on the E. coast of the island of Ceylon. The English took it from the Dutch in 1795. Lon. 80 45 E., lat. 9° N.

Manasquam, village, Monmouth co., N. on a small river of the same name, about 50 NE. by E. from Philadelphia, and 10 ms. from Monmouth or Freehold.

Manassy-gap, Loudon co., Va.

Manatou, or **Manatoulin Islands**, are a number of islands toward the northern shore of Lake Huron, stretching from the vicinity of Cabot's Head northwesterly across the lake to Lake George, low the falls of St. Mary.

Manbed, small town of Persia, 160 ms. Ispahan.

Manbone, city of Africa, and capital of kingdom of Siam, seated at the mouth of channel of Mosambique. Lon. 32 19 E., lat. 55 N.

Mancester, village of Eng., in Warwickshire near Atherstone and the river Anker.

Mancha, territory of Spain, in New Castile between the river Guadiana and Andalusia. a mountainous country, and it was here that vantes made Don Quixote perform his chief exploits.

Manchac.—See *Iberville*.

Manche, or **Channel**, dep. of Fr., included part of the great province of Normandy, mostly surrounded by the English channel, Coutances is the capital.

Manchester, large and populous town of England, Lancashire, between the rivers Irk and Irwell, and is a place of great antiquity. It has long been noted for various branches of the linen, and cotton manufactures; and is now principally conspicuous as the centre of the cotton trade, which has been much improved by the invention of dyeing and printing. The labors of a populous neighborhood are collected at Manchester, whence they are sent to London, Liverpool, Hull, &c. These consist of a great variety of cotton and mixed goods, of which they export vast quantities, particularly to the West Indies and the coast of Guinea. The manufacture of tapes and other small wares, of silk goods, and hats, are also carried on at Manchester, from various sources of wealth it has obtained greater opulence than almost any of the trading towns of Eng. Its chief ornaments are the college, the exchange, the collegiate church, another large church, and a spacious market place. By the Irwell, which is an ancient and lofty stone bridge, is a communication with the Mersey, and all the various extensions of inland navigation, particularly the duke of Bridgewater's canal, which is from it. It is 67 ms. WSW. of York, and 182 NNW. of London. Lon. 2 30 W., lat. 53 30 N.—Tp., Nova Scotia, 30 ms. NW. of Cape Canso.—Town Bennington co., Vt. 2 ms. N. of Bennington, and 44 NE. of Troy, N. York.—Town, Essex co., Mass., a few ms. NE. of Beverly.—Town, Niagara co., N. Y., at the cataract of Niagara. A bridge now connects this place with Goat island.—Village, Oneida co., N. Y., 8 ms. SW. by W. from Union.—Town, Ontario co., N. Y., 10 ms. N. of Canandaigua, on the road to the Sulphur Springs, and on Canandaigua outlet.—Village, Elmore co., Md., on the road from Baltimore to Carlisle, 33 ms. from the former and 42 from the latter.—Town, Chesterfield co., Va., on the S.

of James river, opposite Richmond, and 33 N. W. of Williamsburg.—Village, Sumter district, S. C., on Wateree river, about 5 ms. from the mouth of Congaree.—Village and seat of justice, Clay co., Ky., about 120 ms. SE. of Frankfort. Lat., 37 13 N., lon. 6 34 W.

—Village, pleasantly situated on the bank of Ohio, in Adams co., Ohio, about 25 houses, 17 ms. S. by W. from Columbus, and 73 in the same direction from Chillicothe.—Tp., Morgan co., Ohio.—Village, Dearborn co., Inda., 94 ms. SE. from Indianapolis.—Village, St. Louis co., Mo., 17 ms. from St. Louis.

Manchester, East, tp., York co., Pa., between Conowago and Conewago creeks and Susquehanna river.

Manchester, West, tp., York co., Pa., between Conowago and Conewago creeks, and immediately from the borough of York.

Manchester Village, village on the Oriskany river, where crossed by the great western road, Dutchess co., N. Y., 9 ms. a little S. of W. from

Manciet, town of France, in the dep. of Gers, eastern province of Gascony. Lon. 5' W., lat. 43 3 N.

Mandal, seaport town of Christiansand, in Norway. Lon. 7 42 E., lat. 58 2 N.

MANDAN, nation of Indians residing on both sides of Missouri river, at N. lat. 47°, and lon. 102 22 30 W. These geographical elements are at an intermediate distance of 1,284 statute ms., in a direction inflecting 63° from the meridian.

MANDARIN, generally supposed a Chinese, but a Portuguese term, from *mandare*, to command. The Chinese title answering to mandarin is *mandarin*, *public man*, pronounced quan.

Mandersheit, town of Germany, in the circle of Lower Rhine, and electorate of Treves, capital of a county of the same name. It is 24 ms. N. of Treves. Lon. 6 50 E., lat. 50 10 N.

Manding, kingdom of Africa, situated N. from the high mountains, and occupying the table land from which flow to the SW. the Senegal and to the NE. the Niger. It is from this country that a numerous nation of Africans have received their appellation of Mandingos. The centre of Manding is about N. lat. 12°, W. lon. 30, and 500 ms. NE. by E. from Sierra Leone. The Mandingos are found scattered along the coast of the Atlantic ocean, particularly between the Senegal and Gambia rivers.

Mandria, small desert island, in the Archipelago between Samos and Langos. It gives name to a sea near it.

Mandshuria.—See *Mantshuria*.

Mandebach, small village of Suabia, pleasantly situated near the lake of Constance.

Mandredonia, town of Naples, in Capitanata, with a castle, a good harbor, and an archbishop's see. It was burnt by the Turks in 1620; and is situated on a gulf of the same name, 50 ms. N. of Naples, and 100 NE. of Naples. Lon. 16 12 E., lat. 41 35 N.

Mangalore, seaport of Canara, on the coast of Malabar, with an excellent road for ships to anchor in the rainy season lasts. It is inhabited by the Portuguese and Mahometans. It is the most trading port in the kingdom, and the Portuguese have a

factory here for rice, and a large church, frequented by black converts. The adjoining fields bear two crops of corn in a year, and the higher grounds produce pepper, betel nuts, sandal wood, iron, and steel. It is seated on a rising ground, 100 ms. N. by W. of Tellicherry. Lon. 75 24 E., lat. 13 8 N.

Mangea, island in the S. Pacific ocean, about 5 leagues in circumference. Lon. 158 16 W., lat. 28 27 S.

Mangushlak, town of Turcomania, on the E. coast of the Caspian sea. Its commerce is considerable, the neighboring Tartars bringing hither the productions of their own country, and even of Bokharia; such as cotton, yarn, stuffs, furs, skins, and rhubarb. It is 37 ms. SW. of Astracan. Lon. 48 29 E., lat. 44 45 N.

Manhartzberg, the northern part of Lower Austria, separated from the southern by the river Danube, and bounded on the W. by Upper Austria, on the N. by Bohemia and Moravia, and on the E. by Hungary.

Manheim, strong and beautiful city of Germany, in the Grand Duchy of Baden. It is a very regularly built handsome city, containing about 22,000 inhabitants, the streets being all straight, intersecting each other at right angles. The fortifications are good, and the town is almost surrounded by the Neckar and the Rhine. It is 166 ms. below Spire, and 10 W. of Heidleberg. Lon. 8 31 E., lat. 49 26 N.—See art. *Baden*, p. 120.

—Town, Herkimer co., N. Y., on the E. side of Mohawk river, above the mouth of East Canada creek. Pop. in 1820, 1,777.—Tp., York co., Pa. It is situated in the SW. corner of the co., adjoining Md. The chief town is Hanover.

—Town, Lancaster co., Pa., on the W. side of Conestoga creek, between Moravia and Little Conestoga creeks, immediately N. from the city of Lancaster.—Tp., Schuylkill co., Pa., along both sides of the SW. branch of Schuylkill, immediately S. from Onwicksburg.

Manica, inland kingdom of Africa. It lies on the N. Monomatapa, on the E. Sofola, and on the S. and W. unknown regions. This country is little known to Europeans, but it is said to abound with mines of gold, and to have a great number of elephants.

MANICHEAN, or **MANICHEE**, from the name *Manes*, its founder, a sect which rose in Persia, and which, however named, maintained the doctrine of a good and evil principle, many ages more ancient than the period of the life of Manes. The good and evil of the Manicheans were no more than the Ahriman and Oromazes of Zoroaster. The Priscillianists, so called from Priscillian, bishop of Avila, in Spain, it is supposed adopted the doctrines of the Manicheans.

Manickdurg, small town of Hindoostan, in the province of Berar of the Deccan.

Manickpour, town of Hindoostan proper, 68 ms. distant from Lucknow. Lon. 81 45 E., lat. 37 26 N.

Manicougan, river of L. C., rises in the recesses of Labrador, flows into, and again out of, Manicougan lake, and assuming a course of SSW., enters St. Lawrence river nearly opposite the falls of Matane, 200 ms. below Quebec. Its entire comparative course exceeds 300 ms.

Maniel, mountain of St. Domingo, 20 ms. in circumference, and so high and craggy that it is almost inaccessible.

Manilla.—See *Luconia*.

Manilla, large and populous city, capital of Luconia and the other Phillippine islands. Most of the public structures are built of wood, on account of the frequent earthquakes, by one of which, in 1617, a mountain was levelled. In 1625, a third part of the city was overthrown by another, when 3,000 persons perished in the ruins; and the next year there was another less violent. This city is seated on the SE. side of the island, where a large river falls into the sea and forms a noble bay 30 leagues in compass, to which the Spaniards have given the name of Bahi, because the river runs out of the great Lake Bahi, which lies at the distance of six leagues behind it. On the S. it is washed by the sea, and on the N. and E. by the river; being also strongly fortified with walls, bastions, forts, and batteries. Manilla contains about 30,000 souls, who are a very motley race. Lon. 120 53 E., lat. 14 36 N.

Manlius, town, Onondaga co., N. Y., between the Salt lake and Lake Oneida, 42 ms. W. of Whitestown, on Mohawk river.

Manlius Centre, or *Manlius Square*, a very prosperous village, on the great western road, in Onondaga co., N. Y., 34 ms. NE. by E. from Auburn. Manlius Centre, though in the same tp., is a separate post office from that of Manlius village.

Mannahawkin, town, Stafford tp., Monmouth co., N. J., upon the Atlantic coast, containing about 30 dwelling-houses and a Baptist and Methodist meeting-house. It lies 8 ms. from Tuckerton. This is the same place already noticed under the name of Manahawkin.

Manningtree, town of Eng., in Essex, on the river Stour, which is here called Manning tree water. It is 11 ms. W. of Harwich, and 60 ENE. of London. Lon. 1 12 E., lat. 52° N.

Mannsville, village, Jefferson co., N. Y., 148 ms. NW. from Albany.

Manor, tp., Lancaster co., Penn., on the NE. side of Susquehannah river, about 10 ms. from the borough of Lancaster, and occupies the peninsula between the Susquehannah river and Conestoga creek, above the latter.

Manosque, populous town of Fr., in the dep. of the Lower Alps, and late province of Provence, with a castle. It had lately a commandery of the order of Malta, and is seated on the Durance, 10 ms. S. of Foralquier, and 350 S. by E. of Paris. Lon. 5 55 E., lat. 43 51 N.

Manresa, town of Spain, in Catalonia, seated at the confluence of the Cardonera and Llobregat, 15 ms. SE. of Cardona, and 20 NW. of Barcelona. Lon. 1 56 E., lat. 41 36 N.

Mans, town of Fr., capital of the dep. of Maine. It is seated on a high hill, on the Sarte, near its confluence with the Huisne, 20 ms. S. of Alencon, and 75 W. by N. of Orleans. Lon. 0 14 E., lat. 41 58 N.

Mansroar, lake of Thibet, from which (according to Major Rennel) issues the southernmost head of the Ganges. It is 115 ms. in circumference, and lies in about 79° E. lon., and 34° N. lat.

Mansfield, town of Germany, in the circle of

Upper Saxony, capital of a county of the name, 35 ms. SW. of Magdeburg. Lon. E., lat. 51 41 N.—Town of Eng., in Northhamshire. It has a great trade, and is famous for corn and malt, and participates in the same manufacture. It is a pretty large place, seated on the edge of the forest of Sherwood, 10 ms. N. of Nottingham, and 140 N. by W. of London. Lon. 1 9 W., lat. 53 10 N.—

Bristol co., Mass., 30 ms. SSW. from Boston.—Town, Windham, co., Conn., between the Connecticut and Mount Hope rivers, about 18 ms. of the city of Hartford. Pop. in 1810, 2,500; in 1820, 2,993.—Village, Tioga co., N. Y.

—Tp., Burlington co., N. J. It is 8 ms. E. of Burlington.—Town, Warren co., N. C., on the Muscunecunk river, 10 ms, SE. from Charlotte.—Town and seat of justice for Richmond co., containing about 30 houses and 300 inhabitants. It stands 73 ms. NE. from Columbia. N. lat. 40 47 W., lon. 5 33 N.—Village, Loudoun co., Va., 20 ms. by land above Petersburg.

Mansfield Centre, village, Windham co., Vt., 35 ms. NE. from Hartford.

Mansilla, town of Spain, in Leon, 15 ms. W. of the city of Leon. Lon. 4 55 W., lat. 42 30 N.

Mansker's Creek, and post office, Davidson co., Tennessee.

Mantaca.—See *Mataca*.

Mantshuria, vast region in Asia, having a proper S., Mongolia W., the Russian Asiatic territories NW. and N., and the sea of Japan E. The channel of Tartary, or La Perouse strait, separates it from the continent. See *Asia*, p. 93, &c.

Mantes, town of Fr., in the dep. of Seine-et-Oise, and late province of the Isle of France, famous for its wines, and is seated on the Seine, and over it is a bridge, the great arch of which is though elliptic, is 120 feet wide. It is 100 NW. of Paris. Lon. 1 51 E., lat. 49 1 1/2 N.

Mantinæa.—See *Tripolizza*.

Mantua, or *Mantuan*, duchy of Italy, situated along the river Po, which divides it into two parts. It is bounded on the N. by the Venetian empire, on the S. by the duchies of Reggio, Modena, and Mirandola, on the E. by the Ferrarese, and on the W. by the Cremonese. It is 50 ms. long and 27 broad, and fruitful in corn, pastures, and fruits, and excellent wine. The Mantuan comprehends the duchies of Mantua and Sabina, and the principalities of Castiglione, Solferino, and Bosolo; likewise, the co. of Novellara. The principal rivers of this country are the Po, Oglio, and the Minchio.

Mantua, capital of a duchy of the same name in Italy, with a university, seated on an island in the middle of a lake. It has above 16,000 inhabitants. It was greatly noted for its silk and silk manufactures, which are now much decayed. The air in the summer is very unwholesome; and this is formed by the inundations of the Minchio. It was born at a village near this city. It is 100 NE. of Parma, 22 SW. of Verona, and 20 W. by W. of Rome. Lon. 10 50 E., lat. 45 10 N.

Mantua, village on the Schuylkill, opposite Philadelphia upper bridge, and in Blockley township. It is strictly a suburb of Philadelphia; its situation is peculiarly eligible for a summer residence

with inhabitants of the city. The site swells gradually from the Schuylkill, and gives a rich variety to the various buildings and gardens by which it is decorated.

Marantua, flourishing town, situated in the north-western borders of Portage co., Ohio, and through the southeastern quarter of which runs the Cuyahoga river. Besides several common schools, it is a tolerably respectable grammar school. It contains about 93 families and 541 inhabitants. *Marunggen*, town of Franconia, capital of a district belonging to the House of Saxe-Gotha. It is 8 ms. N. of Henneburg. Lon. 10 21 N., lat. 50 46 N.

Maranzanillo, cape, is the salient point of the peninsula, between the bays of Porto Bello and Santo Domingo, in the province of Panama, of the Republic of Colombia. Lat. 9 13 N., lon. W. 79 20 W.

Marble's Store, and post office, Bibb co., Ala. *Maracaibo*, considerable town of S. America, capital of the province of Maracaibo, in Colombia. It carries on a brisk trade in skins and chocolate, which is the best in America; and it has very fine scenery. It is seated W. of the lake of the same name. Lon. W. C. 5 40 E., lat. 10° N.

Maracaibo, province of S. America, in Colombia. It lies around the Gulf of Maracaibo, and contains 48,700 inhabitants, sends two representatives, and, in conjunction with Coro, Truscilla, and Guayaquil, elects 4 Senators to the Colombian Legislature.

Maracaibo, inland sea of Colombia, opens from the Caribbean sea, between Sword point and Cape Parí, and, extending S. about 100 ms. in the form of an ellipse, narrows to a strait opposite to the city of Maracaibo, and again widens to an extensive sheet of water of 100 ms. long, and 70 ms. wide. The gulf reaches from lat. 8 30 to 8 45 N., and is the most extensive indenting of the coast of South America, except the rivers.

Maragal, town of Persia, 42 ms. from Tauris. Lon. 47 52 E., lat. 37 36 N.—*Marach*, See *Marasch*, p. 83.

Maranda, fief of Buckingham co., L. C., on the west side of St. Lawrence, 20 ms. above Quebec, opposite Pointe aux Trembles.

Maranhã, captain generalship of Brazil, bounded NE. by the Atlantic ocean, E. and SE. by the Beira, or the river Parnaiba, SW. by Goias, and W. by Para. It lies between lat. 1° and 9° S. and is watered by the various branches of the Parnaiba, Pinare, and other streams. Cotton, sugar, and sugar, are its primary staples.—A fine fertile island, from the name of which that of the captain generalship is derived, lies at the mouth of the Pinare, and is of an oval form, 30 ms. in length.—Town of Maranhã, on the island of the same name, with a good harbor. Lon. W. C. 36 6 E.

Marano, town of Italy, in Friuli, in a marsh which renders it difficult of access, and at the bottom of the Gulf of Venice, 27 ms. S. by E. of Udine. Lon. 13 5 E., lat. 42 52 N.

Marans, rich town of Fr., in the dep. of Lower Saône, and late province of Angoumois, seated upon salt marshes, near the river Sevre. It carries on a great trade in corn, and is 12 ms. NE. of Rochelle. Lon. 0 55 W., lat. 46 20 N.

Marasch, populous town of Natolia, encompassed by the mountains of Taurus and Antitaurus and the river Euphrates. Lon. 38 25 E., lat. 38 15 N.

Marathon, village of Greece, in Attica, and by the road 20 ms. NE. from Athens, remarkable for a battle fought between the Athenians and Plataeans and the Persians, on the 17th of August 494 years ante Christ, in which the Persians were utterly defeated.—Town and seat of justice for Lawrence co., Ala., on the left bank of Tennessee river, 35 ms. W. from Huntsville. Lat. 34 45 N., lon. W. C. 10 23 W.

Marawina, river of Guiana, which separates Surinam from the French colony of Cayenne. A curious pebble, known by the name of the Marawina diamond, is found here, which, when polished, is often set in rings, &c. It runs into the Atlantic in lon. 53 48 W., lat. 5 58 N.

Marbach, town of Germany, in the circle of Suabia, in the duchy of Wirtemberg, seated on the Neckar. It was burnt by the French in 1693. It is 12 ms. S. of Hailborn, and 13 N. of Stutgard. Lon. 9 25 E., lat. 48 59 N.

Marbella, town of Spain, in Andalusia, seated at the mouth of the Rio Verde, 24 ms. SW. of Malaga. Lon. 5 55 W., lat. 36 29 N.

Marblehead, considerable seaport and town of Essex co., Mass., 4 ms. SE. of Salem, and 19 NE. of Boston, in the lat. of 42 35 N., and lon. 69 50 E. The town contained 5,900 inhabitants in 1810; in 1820, 5,630; and in 1840, 5,575.

Marbletown, town in Ulster co., N. Y. It is situated on the S. side of Esopus creek, about 70 ms. SSW. of Albany.

Marburyville, village in Feliciana, La., 8 ms. E. from St. Francisville, and 83 NW. from New Orleans.

Marca, small island in the Gulf of Venice, 5 ms. from Ragusa, on which it depends. It had formerly a bishop's see; but the town is now in ruins.

Marcellin, St., town of Fr., in the dep. of Isere, and late province of Dauphiny. It is 5 ms. from St. Antoine, and 253 S. by E. of Paris. Lon. 5 32 E., lat. 45 14 N.

Marcellino, small river of Sicily, in the Val-di-Noto, which falls into the sea 2 miles from Augusta.

Marcello, small town of Italy, in Naples, in the province of Bari.

Marcellus, town in Onondaga co., N. Y., 4 ms. NE. from Skeneateles lake.

Marche, late province of Fr., bounded on the N. by Berry, E. by Auvergne, W. by Angoumois, and S. by Limosin. It is 55 ms. in length and 25 in breadth, and is pretty fertile in corn and wine. It now forms the dep. of Creuse.—Town of Fr., in the dep. of Vosges, situate near the source of the Mouzon, 20 ms. S. of Neufchateau, and 40 S. by W. of Toul.

Marcheck, town of Austria, on the March, on the frontiers of Hungary, 23 miles E. by N. of Vienna.

Marchiennes, town of the kingdom of the Netherlands, in the territory of Liege, seated on the Sambre, 4 ms. W. of Charleroy.—Town of Fr., in the dep. of Nord, seated in a morass, on the river Scarpe, 7 ms. ENE. of Douay.

Marciannisi, town of Naples, in Terra di Lavara, 13 ms. NNE. of Naples.

Marcigny, town of Fr., in the dep. of Saone and Loire, near the river Loire, 32 ms. W. of Macon, and 43 S. by W. of Autun.

Markolsheim, town of Fr., in the dep. of Lower Rhine, 25 ms. S. of Strasburg.

Marco, St., seaport of E. Florida, on a river of the same name, at its entrance into Apalache bay, 180 ms. WNW. of St. Augustine. Lon. 84 38 W., lat. 30 18 N.—Town of Naples, in Calabria Citeriore, seated on the Senito, 22 miles N. of Cozenza.

Marcou, St., two small islands in the English channel, near the coast of France, 7 ms. SE. of Cape la Hogue.

Marcus Hook, village in Delaware county, Pennsylvania, on the NW. side of the river Delaware, below Chester, and 20 ms. below Philadelphia.

Mardike, village of Fr., in the dep. of Nord, seated on a canal, to which it gives its name, 4 ms. W. by S. of Dunkirk.

Mardisville, county town of Talladega co., Ala., and seat of a United States land office, situated in the western part of the county. N. lat. 33 25, lon. 9 22 W. of W. C.

Mareb, town of Arabia, capital of a district, in the province of Yemen. It is 100 ms. SE. of Sanaa. Lon. 47 30 E., lat. 15 44 N.

MARECHAL, MARSHAL, from the Ger., *mar*, horse and, *schalk*, servant—minister, prefect, commander of horse, &c.; hence the various applications of the term marshal, from one of the highest military dignities in European armies to U. States marshals.

Maree, Loch, lake of Scotland, in Ross-shire, 18 ms. long, and, in some parts, 4 broad. It contains many small islands, and abounds with salmon, char, and trout.

MAREMMA, ancient Pontine marshes; literally, "sea coast," from *mar*, the sea, and from the same root as marshes. The term is applied in modern Italy to the seacoast, and is not exclusively applied to marshes, though the idea of surface overflowed by the sea is usually connected with it. Very great attention has been given by the Tuscan Government, and with much success, to drain and render habitable and healthy the former deadly maremme on the coast of that government.—See *Pontine Marshes*.

Marengo, village of Italy, in the Milanese, 3 ms. SE. of Alexandria.—Village in Seneca co., N. Y.—Co. of Ala., bounded W. by Tombigbee and Black Warrior rivers, N. by Tuscaloosa co., E. and SE. by Dallas, and S. by Clarke. Length 60 ms., mean width 20, and area 1,200 sq. ms. Surface hilly, and soil, except near the streams, barren, and covered generally with pine timber. Staple, cotton. Chief town, Eagleville. Pop. in 1820, 3,933; in 1840, 17,264. Central lat. 32 16 N., lon. W. C. 10 38 W.

Marennés, town of Fr., in the dep. of Lower Charente, remarkable for the green-finned oysters found near the coast, and the salt it sends to other places. It is 32 ms. NW. of Saintes, and 270 SW. of Paris.

Maretimo, island in the Mediterranean, on the W. coast of Sicily, 12 ms. in circumference. It

has a castle, with a few farm-houses, and produces much honey. Lon. 12 35 E., lat. 38 5 N.

Margaretta, township of Huron county, *Margaret's Islands*, in the North Pacific were discovered by Captain James Magee, ship Margaret, of Boston, in his voyage from chatka, in 1780. Lon. 141 12 E., lat. 24 N.

Margaretsville, or *Boonsborough*, village Washington co., Md., 11 ms. SE. from Hagerstown.—See *Boonsborough*.

Margarita, island near the coast of Colombia, 40 ms. long and 15 broad, discovered by Columbus in 1498. The continual verdure renders it pleasant, but it has no fresh water. It was in 1626 by the Dutch, who demolished the town since which time, it has been in a manner abandoned by the Spaniards. Lon. 64 10 W., lat. 10 N.

Margate, town of Eng., in Kent, in the Thanet. It stands on the side of a hill, has a pier, and is a member of the port of Dover. It is a great resort of company for sea bathing, and the buildings for their accommodation are numerous and handsome. Great quantities of corn are exported hence, and there are regular passages to and from London. It is 17 ms. ENE. of Canterbury, and 71 E. by S. of London. Lon. 1 52 E., lat. 51 24 N.

Margozza, town of Italy, in the Milanese, near a small lake of its name, 40 ms. NW. of Milan.

MARGRAVE, from the German, *marck*, a frontier or border, and *graaf*, judge, or literally, a military governor of a frontier province. From the same root there is little doubt comes marquis. The Marcomanni, so frequently mentioned in Roman history, were so called as *men of the border*.—See *Landgrave*.

Maria, St., island in the Indian ocean, near the E. side of Madagascar. It is 45 ms. long and 7 broad, well watered, and surrounded by rocks. It produces rice, sugar cane, legumes, pine apples, tobacco, &c., and on the coasts are found coral and ambergris. The inhabitants call it *Mahim*. Lon. 50 20 E., lat. 17 0 S.—The southern island of the Azores, which produces plenty of wheat, and has about 5,000 inhabitants, has a town of the same name. Lon. 25 9 W., lat. 36 57 N.—Considerable town of Spain in Andalusia, on the Guadaleta, at the mouth of which is a tower and a battery, 18 ms. N. of Cadiz. Lon. 6 6 W., lat. 36 39 N.—Town of Terra Firma proper. It is seated at the bottom of the Gulf of St. Michael, at the mouth of a navigable river of the same name. Lon. 78 12 W., lat. 7 43 N.

Mariagalante, one of the Leeward Caribbean islands, in the West Indies, subject to the French, extending 16 ms. from N. to S., and 4 from W. to E. It is full of hills, and along the E. shore are lofty perpendicular rocks, that shelter vast numbers of tropical birds. It has several large caves, with many little streams and ponds of fresh water. It is covered with trees, and particularly about the coast with tobacco and the wild cinnamon tree. It is 10 ms. N. of Dominica, and 40 E. of Guadaloupe. Lon. 61 11 W., lat. 15 52 N.

Maria's River, branch of Missouri, which rises in the Rocky mountains at lon. W. C. 35°, and near lat. 50° N. Its general course is

stone Missouri, which it joins about 50 miles to the Great falls.

Mariaville, tp., Hancock co., Me., 40 ms. NE. of Justice. Pop. in 1820, uncertain.

Mari-aux-Mines, town of Fr., in the dep. of Vosges, and late province of Lorraine, divided by the river Leber. It is famous for its mines, and is 25 ms. NW. of New Brisach. Lat. 48 16 N.

Marie, Cape Dame, W. point of St. Domingo.

Marienbourg, town of Germany, in Upper Saxony.

Misnia, remarkable for its rich silver mines, situated among the mountains, on the confines of Silesia, 28 ms. SSW. of Dresden. Lon. 13 49 E., lat. 50 49 N.

Mosna, town of Poland, in west-prussia, capital of a palatinate of the same name. It is seated on the Noget, a branch of the Vistula, 30 miles SW. of Elbing, and 30 SE. of Danzig. Lon. 19 15 E., lat. 54 9 N.

Mouton, in the dep. of the North, and late French Flanders, 10 miles SW. of Charlemont. Lon. 4 49 E., lat. 50 2 N.

Muenstadt, town of Sweden, in W. Gothland, on the Lake Wenner, 35 ms. SE. of Carlscrona, and 162 SW. of Stockholm. Lon. 14 25 58 28 N.

Muenwerder, town of western Prussia, in Pomerania, on the Vistula, 20 ms. SSW. of Marienburg. Lon. 19 5 E., lat. 53 49 N.

Marietta, village, Onondaga county, N. Y. —

High and village, Lancaster co., Pa., on the bank of the Susquehannah river, above the mouth of Little Chiques creek, 13 miles W. from Lancaster. Pop. in 1820, 1,545; and in 1840, 1,428 in the borough. — Village and town, Washington county, Ohio, occupying a peninsula between and above the Ohio and Muskingum rivers, at their junction. The site of Marietta, Ohio, is peculiarly fine; the junction of the two rivers, the extensive bottoms, winding and swelling hills in every direction, and the two villages, Marietta itself, and Harpersburg, at the centre, all afford a picture seldom surpassed in beauty. The extensive remains of ancient works here add greatly to the attraction of the place. It is distant 315 miles NW. from Washington, and 109 SE. from Columbus. Lon. W. C. 4 23 W., lat. 39 25 N. Pop. in 1840, 1,814.

Magnano, town of Italy, in the duchy of Milan, situated on the Lambro, 10 miles S. of Milan.

Mario, St., strong town of Italy, capital of a republic, surrounded by the duchy of Urbino, under the protection of the Pope, with three castles. It chooses its own magistrates and officers, and is seated on a mountain, 10 miles SW. of Rimini, and 14 NW. of Urbino. Lon. 12 33 E., lat. 43 54 N.

Mario, town of Italy, in Campagna di Puglia, with a castle, 10 ms. E. of Rome. Lon. 12 49 E., lat. 51 34 N.

Marion, district of South Carolina, bounded NE. by North Carolina, E. by Little Peedee or Horry river, SW. by Great Peedee and Lynch's creek, and W. by Darlington and Marlborough; length 28 ms., area 1,120 sq. ms. Surface rather level than hilly. Soil sandy, though in places highly productive. Chief town, Springville. Pop. in 1820, 10,201; and in 1840, 13,932. Lon. lat. 34 10 N., lon. W. C. 2 28 W.

Marion, town, Twiggs co., Ga., 35 miles SW. from Milledgeville. — Village, Marion co., Ohio, on the road from Columbus to Perryville, 48 miles NW. from Columbus. — Village, Cole co., Mo., 144 ms. W. from St. Louis. — C. H. and post office, Marion district, S. C., 124 ms. a little N. of E. from Columbia.

Marion, co., Alabama, bounded W. by Monroe co., in Mississippi, and the Chickasaw lands, N. by Franklin co., in Alabama, NE. by Lawrence, and E. by Blount and Jefferson; length 50, mean width 30 ms., area 1,500 sq. ms. It is chiefly drained by the Buttahatchee, branch of Tombigbee. Similar to most sections of the United States south of Tennessee and east from the Mississippi, the productive soil of this county is confined to the banks of streams. Lat. 34° N., and lon. W. C. 11° W. intersect in this county. Pop. in 1840, 5,847.

Marion, county, Mississippi, bounded by Hancock co., in Mississippi, SE., Washington parish, in Louisiana, S., Pike W., Lawrence N., and Perry E.; length 36, mean width 24 miles, area 864 sq. ms. Surface moderately hilly. Soil barren, except near the streams; the prevailing timber, pine. Staple, cotton. Chief town, New Columbia. Pop. in 1820, 3,116; and in 1840, 3,830. Central lat. 31 12, lon. W. C. 12 35 W.

Marion, co., Tennessee, bounded S. by Alabama and Georgia, W. and NW. by Franklin, N. by Bledsoe, and E. by Hamilton and the Cherokee lands; length 32, mean width 18 miles, area 756 sq. miles. Surface hilly, and in part mountainous. This county is drained by Sequatchie river, and occupies the valley between two ridges of the Cumberland mountains. Tennessee river traverses its SE. angle. Chief town, Jasper. Pop. in 1820, 3,888; and in 1840, 6,070. Central lat. 35 13 N., lon. W. C. 6 34 W.

Marion, county, Ohio, bounded on the N. by Crawford, E. by Richland, S. by Delaware and Union counties, and on the W. by Hardin county. It is 33 miles long from E. to W., and 18 broad from N. to S., containing about 530 square miles. This county comprises the height of land between the Sandusky and Scioto rivers. Much of it is open plain, or table land, composing the southernmost of what are called the Sandusky plains. Much of it is, however, heavily timbered, and of a very rich and fertile quality of soil. It is well watered by the Scioto, Little Scioto, and Whetstone rivers, besides numerous smaller streams. Marion county was constituted in January, 1820. In the census of 1820, this county was included in Delaware. Pop. in 1840, 14,765.

Marion, co. of Ky., having Green co. S. and Washington N. Lat. 37 35 N., and lon. 8 0 W. of Washington City intersect in this county. Seat of justice, Lebanon. Population in 1840, 11,032.

Mark, St., seaport in the W. side of St. Domingo, 45 ms. NNW. of Port-au-Prince. Lon. 72 40 W., lat. 19 20 N.

Markham, tp. in the East Riding of the county of York, Upper Canada, fronts Youngstreet, and lies to the northward of York and Scarborough. Here are good mills, and a thriving settlement of Germans.

Markle's Mills, post office, Vigo co., Indiana, by post road 87 ms. SW. by W. from Indianapolis.

Mark, St., seaport in the W. side of St. Domingo, 45 ms. NNW. of Port-au-Prince. Lon. 72 40 W., lat. 19 20 N.

Markham, tp. in the East Riding of the county of York, Upper Canada, fronts Youngstreet, and lies to the northward of York and Scarborough. Here are good mills, and a thriving settlement of Germans.

Markle's Mills, post office, Vigo co., Indiana, by post road 87 ms. SW. by W. from Indianapolis.

Mark, St., seaport in the W. side of St. Domingo, 45 ms. NNW. of Port-au-Prince. Lon. 72 40 W., lat. 19 20 N.

Markham, tp. in the East Riding of the county of York, Upper Canada, fronts Youngstreet, and lies to the northward of York and Scarborough. Here are good mills, and a thriving settlement of Germans.

Markle's Mills, post office, Vigo co., Indiana, by post road 87 ms. SW. by W. from Indianapolis.

Mark, St., seaport in the W. side of St. Domingo, 45 ms. NNW. of Port-au-Prince. Lon. 72 40 W., lat. 19 20 N.

Markham, tp. in the East Riding of the county of York, Upper Canada, fronts Youngstreet, and lies to the northward of York and Scarborough. Here are good mills, and a thriving settlement of Germans.

Markle's Mills, post office, Vigo co., Indiana, by post road 87 ms. SW. by W. from Indianapolis.

Marksborough, village, Sussex, co., N. J., 70 ms. N. from Trenton.

Marksville, village, Avoyelles parish, Louisiana, by post road 340 miles from New Orleans, though in a direct line not quite 140, and can be actually passed in less than 160.

Marlborough, Fort, English factory on the W. coast of the island of Sumatra, 3 miles E. of Bencoolen, and 300 NW. of Batavia. Lon. 102 9 E., lat. 3 49 N.

Marlborough, borough of Eng., in Wilts, on a chalky soil, on the Kennet, 43 miles E. of Bristol, and 74 W. of London. Lon. 1 26 W., lat. 51 23 N.—Tp. in the co. of Greenville, U. C., lies to the northward of Oxford, and is watered by the Rideau.—Tp., Middlesex co., U. C.—Town, Cheshire co., N. H., 11 ms. E. from Connecticut river, and 36 E. from Bennington, in Vermont.—Town, Windham co., Vt., 9 ms. SW. from Brattleborough.—Tp., Middlesex co., Mass., 28 miles W. of Boston.—Town, Ulster co., N. Y., on the W. side of Hudson river, 90 ms. S. of Albany.

Marlborough, town and SE. tp. of Hartford co., Ct., 17 ms. SE. from Hartford. Pop. 1820, 839.—Tp., Montgomery co., Pa., on the SW. limit of Bucks, and in the forks of the Perkiomen, between Upper Salford and Hanover, 35 ms. NW. from Philadelphia.—Village at the NW. angle of Calvert co., Md., on the Patuxent, 45 ms. S. from Baltimore.—District, S. C., bounded N. and NE. by N. C., SE. by Marion district, and SW. by the Great Pedee, or Durlington and Chesterfield districts. Length 30, mean width 15 ms.; area 450 sq. ms. It is washed along its entire SW. border by the Great Pedee, and drained by the various confluent of that river. Staples, cotton and tobacco. The soil sandy, but in many places very productive. Chief town, Bennettsville. Pop. 1820, 6,425; and in 1840, 8,408. Cent. lat. 34 35, lon. W. C. 2 41 W.—Tp. in the northern borders of Delaware co., O., which is situated in the village of Norton.—Court-house and village, Marlborough district, S. C., 94 ms. NE. from Columbia.

Marlborough, East, tp., Chester co., Pa., on the head of Red Clay creek, and enclosed by the tps. of Newlin, Pennsbury, Newgarden, 30 ms. SW. by W. from Philadelphia, and 8 SSW. from Downingstown.

Marlborough, West, tp., Chester co., Pa., W. from East Marlborough, and 10 ms. SW. from Downingstown.

Marlborough, Upper, village and seat of justice, Prince George's co., Md., on the western branch of Patuxent, 12 ms. SE. by E. from Washington, and 15 ms. a little W. of N. from Lower Marlborough.

Marlow, borough of Eng., in Buckinghamshire, on the Thames, over which is a bridge into Berkshire. It has a manufacture of bonelace, and is 17 ms. S. of Aylesbury, and 31 W. of London. Lon. 45' W., lat. 51 35 N.—Village on Ashmelot river, near the centre of Cheshire co., N. Hampshire, 46 miles a little S. of W. from Concord.

Marli, village of Fr., between Versailles and St. Germain. Here was a royal palace, noted for its fine gardens and water works, there being a

curious machine on the Seine which not only plied them with water, but also those of Vers. It is 10 ms. NW. of Paris.

Marmande, town of Fr., in the dep. of Lot Garonne, and late province of Guienne. It rises on a great trade in corn, wine, and by and is scated on the Garonne, 40 ms. SE. of deaux, and 320 S. by W. of Paris. Lon. 1 lat. 44 20 N.

Marmora, sea between Europe and Asia, communicates with the Archipelago by the of Gallipoli on the SW., and with the Black by the strait of Constantinople, on the NE. has two castles—one on the Asian and one on the European side. It is 120 ms. in length at its breadth, and was anciently called the Propontis.

As the ancient name of the strait between the Archipelago and the Marmora sea is more usual in common conversation in the United States either Dardanelles or Gallipoli, the modern name I have thought it necessary to be more particular with this article. There is some difficulty in fixing the limits which the ancients gave to the lespont, from the usual vagueness attending descriptive writing. It is probable, in reality, neither towards the Archipelago nor Marmora do ancient authors consider any particular point where the strait and sea united. If we turn our eye to a map of that part of Asia and Europe, however, it is easy to fix the general boundaries of the strait in question. A line drawn from the Janissary, the side of Asia, to the nearest point of the Chersonesus of Thracia, seems the natural boundary towards the Ægean, and where the two surfaces of the Marmora is changed to a current must decide the commencement of the Hellespont on the side of Gallipoli. Strabo seems to have viewed the Hellespont as a sea, and not as a strait. With the limits I have stated, the Hellespont from Cape Janissary to the opening of the Marmora, above Gallipoli, 36 ms. The current is equal, but, as might be supposed, most violent at the most contracted points. The mean velocity perhaps, falls short of two ms., and at the Icelles and Gallipoli less than one. At the narrowest the current is rapid, particularly in spring season, when the large confluent of the Black sea are overflowed. The winds, according to Hobhouse, blow great part of the year down the strait. This author, like many others, esteeming, I cannot but think, a general theory of phenomena which occurred during his own voyage. The Salset frigate, in which Mr. Hobhouse was, was detained at the Hellespont, was wind-bound at Cape Janissary from the 14th to the 30th of April. The barometer stood, according to his own account, between 60 and 70° during the stay of the frigate at the mouth of the Hellespont. With this height increased, as it is in summer, to between 80 and 100°, the land must become more heated than the water, and of course an aerial current superinduced from the Mediterranean, towards the plain of Russia. If I was to form an opinion from geographical position, I should say that during the winter and spring the wind must be down, but, contrary, during summer and autumn, up the Hellespont; and that the prevalent current must be down, though in not so great a proportion as to one. The depth of the water between

an and Marmora admits the passage of the
st ships of the line.

scenery of its shores, from the description
by Hobhouse, must bear a considerable re-
nance to many places on St. Lawrence. Gen-
rising by acclivities more or less abrupt, the
jects are variegated and fine. From some
as on the European side, and in clear weather,
mits of Ida are visible; but the climate of
ountry, from the prevalence of NE. winds,
remarkable for serenity.

mormora, four islands in the Marmora sea, the
pal of which was the ancient Proconnesus;
wards the outlet of Marmora into the Helles-
and to the NW., off the ancient Cyzicus,
Artaki.—Celebrated cascade of Italy, in
eachy of Spoleto, 3 ms. from Terni.

erne, town of Persia, in the province of Cor-
—Dep. of Fr., including part of the late
ce of Champagne. It takes its name from
r which rises near Langres, and, flowing
joins the Seine a little above Paris. Rheims
archiepiscopal see, but Chalons is the cap-

erne, Upper, dep. of Fr., including part of
te province of Champagne. Chaumont is
pital.

nhull, village of Eng., in Dorsetshire, on
our. The church is an ancient lofty build-
e tower of which fell down in 1710, in the
f divine service, but was handsomely rebuilt.

ro, town of Italy, on the coast of Genoa, in
y of the same name, 8 ms. NW. of Oneid-
d 48 WSW. of Genoa. Lon. 7 41 E.,
55 N.

ogna, town of Romania, near the Mediter-
e, 150 ms. SW. of Constantinople. Lon.
E., lat. 40 59 N.

TONITES.—See *Asia*, p. 81, 2d col.

otier, town of Fr., in the dep. of Lower
and late province of Alsace, with a late
ctine abbey, 18 ms. NW. of Strasburg.
7 33 E., lat. 48 38 N.

ples, tp., Delaware co., Pa., between Dar-
Crum creeks, 14 ms. W. from Philadel-
a. Pop. 1820, 700.

purp, strong town of Germany, in the land-
es of Hesse Cassel, with a university, a pal-
handsome square, and a magnificent town
It is seated on the river Lahn, 15 ms. S.
aldeck, and 47 SW. of Cassel. Lon. 9°
50 35 N.

quesas, group of islands in the S. Pacific
of which the most considerable are St.
ana and St. Pedro. Captain Cook, in his
voyage, lay some time at the first of these,
is situated in lon. 139 9 W., and lat. 9 55
r. Foster says he never saw a single de-
or even ill-proportioned man among the
; all were strong, tall, well-limbed, and ac-
the highest degree. The inhabitants of the
esas, Society, and Friendly islands, Easter
and New Zealand, seem to have all the
origin—their language, manners, customs,
bearing a great affinity in many respects.

group is the northeasternmost of the numer-
er groups of islands spreading on both sides
equator from southeastern Asia, through
of lon. Nukahiva, the main island of the

Marquesas, lies nearly W. from Truxillo, in S.
America; distance about 60° of lon. The French
Government has recently sent a colony, which has
taken formal possession of the Marquesas in the
name of the French nation.—See *Nukahiva*.

Marr's Bluff, post office, Marion district, S.
C., 118 ms. NE. from Columbia.

Marsal, town of Fr., in Meurthe, 17 ms. NE.
from Nancy.

Marsala, town of Sicily, in the Val di Mazzara,
at the W. part of the island, on the promontory
of Lilybæum, 45 ms. SW. from Palermo.

Marsch.—See *Moraw*.

Marsden, village of Eng., in West Yorkshire,
near the source of the Colne, 7 ms. SW. of Hud-
dersfield. Here are some extensive cotton mills,
and the Huddersfield canal passes this place.

Marseilles, flourishing seaport of France, in the
department of the Mouths of the Rhone. The in-
habitants are computed at 90,000. It was so cele-
brated in the time of the Romans, that Cicero
styled it the Athens of the Gauls, and Pliny called
it the Mistress of Education. It is situated on the
Mediterranean, at the upper end of a gulf in which
are many small islands, and is partly on the decliv-
ity of a hill, and partly in a plain. It is divided
into the old town and the new. The first appears
like an amphitheatre to the vessels which enter the
port; but the houses are mean, and the streets
dirty, narrow, and steep. In this part is the prin-
cipal church, built by the Goths on the ruins of
the temple of Diana. The new town is, in every
respect, a perfect contrast to the city, with which
it has a communication by one of the finest streets
imaginable. The other streets and squares, as
well as the public buildings in general, are very
elegant. With respect to commerce, Marseilles
has been eminent since the days of antiquity, and
is now sometimes called Europe in miniature, on
account of the variety of dresses and languages.
The port is a basin of an oval form, 3,480 feet
long, 960 broad at its widest part, with 18 or 20
feet depth of water. In the environs of Marseilles
are near 5,000 little country boxes of the citizens,
called Bastides. In 1640 the plague raged with
great violence in Marseilles, and with still greater
in 1720, when it carried off 50,000 of the inhabi-
tants. The late Lord Gadenstone mentions that
Marseilles was a little republic within itself, that
the citizens elected their own magistrates, and that
the expense of a law suit never exceeded two pence
half penny, which sum was lodged by each party
with the clerks of the court, at the commencement
of every process, after which no further expense
was incurred. Marseilles is 15 ms. S. of Aix, 13
NW. of Toulon, and 362 S. by E. of Paris. Lon.
5 27 E., lat. 43 18 N.

Marseilles, village, Halifax co., Va., 151 ms.
SW. from Richmond.

Marshall's Mills, Huntingdon co., Pa.

Marshallsville, village, Mecklenburg co., Va.,
65 ms. SW. of Petersburg.—Village, eastern
part Baughman tp., Wayne co., Ohio, 14 ms.
NE. from Wooster, and 19 ms. SSW. from
Akron.

Marshallton, village, Chester co., Pa., about 30
ms. SW. by W. from Philadelphia.

Marshfield, town of Eng., in Gloucestershire,
on Coteswood hills, 11 ms. E. of Bristol, and 103

W. of London.—Town, Washington co., Vt., 12 ms. E. from Montpelier.—Town, Plymouth co., Mass., near Marshfield Point, 36 ms. SE. of Boston.

Marshpee, tp., Barnstable co., Mass., on the seacoast, 17 ms. SW. from Barnstable.

Marscio Nuovo, town of Naples, in Principato Citeriore, 21 ms. NNE. of Policastro.

Marscio Vecchio, town of Naples, in Basilicata, near the river Acre, 23 ms. NE. of Policastro.

Marsilly, town of France, in the department of Marne, 10 ms. S. of Suzanne.

Marstrand, rocky island of Sweden, in the Cattegat, lying NW. of the mouth of the Gotha. It is 2 ms. in circumference, and, on account of its strength, is called the Gibraltar of Sweden. The town stands on the E. side, and the harbor is secure and commodious, but of difficult entrance. The inhabitants subsist chiefly by the herring fishery, by the number of ships which in bad weather take refuge in the harbor, and by a contraband trade. It is 23 ms. NW. of Gotheborg. Lon. 11 30 E., lat. 57 59 N.

Marta, town of Italy, in the patrimony of St. Peter, seated on a river of the same name, where it issues from the Lake Bolsena, 10 ms. E. of Castro.

Martaban, city of Pegu, capital of a province of the same name, fertile in rice, fruits, and wines of all kinds. It was a rich trading place before the King of Birmah conquered the country, who caused a number of vessels to be sunk at the mouth of the harbor, so that it is now only to be entered by small vessels. The chief trade is in earthen ware and fish. It is seated on the Bay of Bengal, at the mouth of the Thaluau, 120 ms. SE. of Pegu. Lon. 97 56 E., lat. 16 30 N.

Martago, town of Spain, in Leon, 10 ms. SSE. of Ciudad Rodrigo.

Martapura.—See *Metapura*.

Martel, town of France, in the department of Lot, seated near the Dordogne, 18 ms. E. of Sarlat.

Marthalen, considerable town of Switzerland, in that part of the co. of Kyburg subject to Zurich. It is seated near the Rhine, 6 ms. S. of Shaffhausen.

Martha, St., for names thus written.—See *St. Martha*.

Marthasville, village, Montgomery co., Mo., 66 ms. W. from St. Louis.

Martie, tp., Lancaster co., Pa., on the NE. side of Susquehannah, and the SE. side of Piqua creek.

Marticville, village in the tp. of Martie, Lancaster co., Pa.

Martigues, seaport of France, in the department of the Mouths of the Rhone, and late province of Provence, near a lake, 12 ms. long, and 5 broad, which is navigable throughout, and whence they get very fine fish and excellent salt. Martigues is 20 ms. NW. of Marseilles. Lon. 5 2 E., lat. 43 19 N.

Martin, Cape, promontory of Valencia, in Spain, which separates the Gulf of Valencia from that of Alicante. Lon. 0 36 E., lat. 38 54 N.

Martin, co., N. C., bounded by Beaufort SE., Pitt SW., Edgecombe W., Halifax NW., Roanoke river, or Bertie, N., and Washington E.

Length 35 ms., mean width about 14, area 500 sq. ms. Surface level, and soil either marl or sandy. Its chief town, Williamston, is on Roanoke, 25 ms. N. from Washington. S. cotton. Pop. 1820, 6,320; and in 1840, 7,700. Central lat. 35 50 N., lon. W. C. 15° W.

Martin, co., Ia., bounded by Owen and I. S., Sullivan and Vigo W., Wabash and Del. NW., and Monroe and Lawrence E. Length 24 ms., width 24, area 920 sq. ms. The main branch of White river traverses this co. from to SE, entering at the NE., and leaving it SW. angle. The 39th degree of N. lat. is through the southern extremity. The surface hilly, contiguous to the streams, but level in interior. Much good soil. Pop. 1820, 1,800; and in 1840, 3,875. Central lat. 38 38 N., W. C. 94° W.

Martinico, one of the windward Caribbean islands, in the W. Indies, 40 ms. in length and 100 in circumference. There are many mountains, covered with trees, as well as rivers and fertile valleys, but they will not bear wheat or vines; however, the former is much wanted, for the natives prefer cassava wheat bread. It produces sugar, cotton, ginger, indigo, chocolate, aloes, pimento, plantains, and other tropical fruits, and is extremely populous. Some of the ancient inhabitants still remain, but have several safe and commodious harbors, well fortified. Fort St. Pierre, the principal place, is on the N. side, 61 20 W., lat. 14 14 N.

Martinsborough, now Jonesville, village, co., N. C., on the right bank of Tar river, 20 ms. above Washington.—See *Jonesville*.

Martinsburg, village and seat of justice, co., N. Y., near the W. side of Black river, 30 ms. a little W. of N. from Utica. Lat. 43 44 N., lon. W. C. 1 33 E.—Village, in the northern part of Bedford co., Pa., 27 ms. NNE. from Bedford.—Town and seat of justice in Berkeley co., Va., 19 ms. SW. from Hagerstown, Md., and about 18 NW. of Harper's Ferry, on the Potomac. Lat. 39 27 N., lon. W. C. 1° W.—Village, Knox co., Ohio, by post road 54 ms. from Columbus, and about 15 SE. of Mount Vernon, the county seat. In this village there are high schools, one for males and the other for females.—Morgan county, Ia.—See *Martinsburg*, Morgan co., Ia.—Village, Hopkins co., Ky.

Martin's Creek, village, Northampton co., Va., 10 ms. N. from Easton.

Martin's Mills, and post office, Greene co., eastern part of Richland co., Ohio, 13 ms. S. of E. of Mansfield.

Martinsville, town, Henry co., Va., on the river, 65 ms. S. from Fincastle, and about 15 ms. SW. by W. from Petersburg.—Village and seat of justice, Guilford co., N. C., on Buffalo branch of Haw river. It stands 45 ms. from Raleigh. Lat. 36 1 N., lon. 2 50 W.—Village, southern part of Clinton co., Va., 8½ ms. southward of Wilmington, the county seat, and 13 ms. NW. of Hillsborough, in High co.—Village and seat of justice, Morgan co., Ia., on the right bank of White river, 32 ms. from Indianapolis. Lat. 39 28 N., lon. W. C. 21 W.

Martinsville.—See *St. Martinsville, La.*

Arborano, town in Naples, in Calabria, Cite- 8 ms. from the sea, and 15 S. of Cosenza. 16 20 E., lat. 39 6 N.

Arlere, town of Spain, in Catalonia, seated at confluence of the Noya and Lobragal, 18 NW. of Barcelona. Lon. 1 56 E., lat. 41

Arlos, town of Spain, in Audalusia, with a ss seated on a rock, 8 ms. S. of Anduxar.

Arvejols, commercial town of France, in the tment of Lozere, and late province of Gevau- seated in a valley on the river Colange, 10 NW. of Mende, and 300 S. of Paris. Lon. E., lat. 44 36 N.

Arville, town of France, in the department of e, and late duchy of Bar, seated on the Os- 3 ms. N. of Jametz.

Aryanna Forge, Somerset co., Pa., at the ion of the Quenemahoning and Shade creeks, s. NNE. from the borough of Somerset.

Aryborough, borough of Ireland, capital of n's co., 17 ms. S. of Philipstown. Lon. 7° lat. 53 2 N.

Aryland, village, Otsego co., N. Y., by post 67 ms. W. from Albany.

Aryland, one of the States of the U. S., having Atlantic ocean, Chesapeake bay, and part of SE., other parts of Va. S., SW., and W., N., and Del. E.

the best in the State. The mountainous region includes the residue, and presents the common features of the Appalachian system.

Maryland is the first State of the U. S. SW. of the Delaware river which embraces the three great zones of soil: that of alluvion, hilly, and mountainous. In the annexed table the cos. are distinguished which occupy each zone, respectively.

The alluvial soil is generally level and sandy, but, where due attention has been paid to agriculture, produces good crops of grain, tobacco, and even cotton towards the S. The middle or hilly section, and some of the mountain valleys, are amongst the best parts of the U. S. for the production of grain, grass, and orchard fruit, tobacco, flax, and hemp. The flour and tobacco of some places on the higher waters of the Potomac are justly estimated for their excellence.

Commercially, Maryland is naturally connected with some of the best cultivated, most populous, and wealthy cos. of Pa.; good roads extend from Baltimore to W. C., Fredericktown, and Hagerstown. That to the latter extends up the Potomac to Cumberland, and from thence to Brownsville, Pa. Part of this road has been constructed by the U. S., and is toll free. The distance from Baltimore to Brownsville, by Frederick, Hagerstown, Hancock, and Cumberland, is 212 ms., being the shortest line of connexion between the Atlantic ports and the navigable waters of the Ohio.

Other roads intersect the State of Maryland, and connect it with the neighboring States, particularly Pennsylvania, and facilitate intercommunication with Baltimore. The trade of the Susquehannah is, however, that which enters most at Baltimore, and has contributed greatly to the rapid increase of that city.—See *Baltimore*. The Legislature and people of Maryland seem recently to have awakened to a full sense of the immense advantages naturally flowing down with the stream of the Susquehannah, and also to those to be derived from opening a water communication between Chesapeake and Delaware bays. It has been supposed that the produce already (October, 1822) brought down in the current year from the Susquehannah exceeds in value \$1,000,000, and must annually increase. It is only necessary to examine the position of Baltimore, on a general map of the United States, to perceive its admirable situation as a commercial mart.

Maryland produces in itself iron ore and mineral coal, with inexhaustible masses of limestone and other building stone. Furnaces and forges have been long established in this State. Flour and tobacco are its most abundant and valuable staples. Its manufactures are numerous and increasing. In the value of its shipping, it ranks as the third State of the U. States. In 1815 the tonnage exceeded 156,000. For the interests of education in Md., see *Baltimore*.

In respect to pursuit or employment, the pop. of Maryland in 1820 were thus classed:

Engaged in agriculture	-	-	79,135
Engaged in manufactures	-	-	18,640
Engaged in commerce	-	-	4,771

There were in the State 3,776 unnaturalized foreigners.

Pop. to the sq. m., 37.

Maryland is the most irregular in its form of any of the U. S., and contains the least surface area compared with its outline. It is, also, in point of surface, soil, and climate, very much diversified. All those parts of Maryland lying E. of Chesapeake bay, and W. of that stream, to the head of tide water, may be considered as alluvial in their formation, and comparatively level and fertile. Above tide water the surface rises, though very rapidly, into hills, which reach the foot of the mountains. The soil of this middle zone is	-	-	

Politically, Maryland is thus subdivided :

Counties.	Soil.	Pop. 1820.	Pop. 1840.

Va., on Ward's fork of Little Roanoke, 35 SE. from Lynchburg, and 60 SSW. from second. Lat. 36 57 N., lon. W. C. 1 42 W. *Marysville*, village, Campbell co., Va., by post 60 ms. SSW. from Richmond.—Small town and seat of justice for Union co., Ohio, on creek, 15 ms. SW. from Delaware, and 27 W. from Columbus. Lat. 40 13 N., lon. W. C. 26 W.—Village, Harrison co., Ky., on main NE. fork of Licking river, about 45 ms. and above Newport, opposite Cincinnati, and NE. from Lexington. Lat. 38 33 N., lon. W. C. 6 58 W.—Village and seat of justice, Knox co., E. Tenn., 12 ms. a little W. of S. Knoxville. Lat. 35 46 N., lon. W. C. 7 4

Mazza Siroco, gulf on the SE. side of the island of Malta. The Turks landed here in 1565, when they went to besiege Valetta. It is now defended by two forts, two at the entrance of the gulf, and two at the point of land that advances into the sea of it.

Mazilla, town of Spain, in the province of Navarre, near the river Arragon, 30 ms. S. of Pamplona.

Mascarenhas Islands.—See *Africa*, p. 30, col. 2d.

Mas d'Angenois, town of France, in the department of Lot and Garonne, on the river Garonne, 24 ms. NW. of Agen, and 50 SE. of Bourges.

Mas d'Asil, town of France, in the department of the Gers, on the rivulet Rise, 8 ms. SW. of Auch.

Masafuero, island in the Pacific ocean, 80 ms. from Juan Fernandez. It is high and mountainous, but lowest to the N., and at a distance of about 25 ms. in circumference, and uninhabited except by numerous seals and goats. There is plenty of wood, but difficult to be got off, as heavy surf allows of no good landing place. Lat. 40 W., lat. 33 40 S.

Masbate, one of the Philippine islands, almost in the centre of them. It is 80 ms. in circumference, and the natives are tributary to the Spaniards. Lat. 22 25 E., lat. 11 36 N.

Masbrough, village of Eng., in W. Yorkshire, on the river Don, adjoining the bridge of Rotherham. Here are considerable iron works, where all the hammered and cast iron goods are made, and the most trifling article to a large cannon, of great quantities are exported.

Maschra, the western province of the kingdom of Algiers, 370 ms. long and 130 broad. It is dry, and mountainous, except on the N. side, where there are plains abounding in corn, fruit, and vines. The S. parts are inhabited by independent wandering tribes, particularly the Angad tribe. Capital of the province of the same name, in the kingdom of Algiers, with a strong castle, in which the bey resides. In 1732 it was an inconspicuous place; but is now the only one in the kingdom, which, under the domination of the French, perceptibly increases in prosperity and extent. It is not so large as Tremesan, but surpasses it in beauty, having a great number of good houses and newly erected mosques. It stands in the midst of a fertile and populous district, 45 ms.

ESE. of Oran, and 190 SW. of Algiers. Lon. 40' E., lat. 35 54 N.

Mascat, seaport of Arabia Felix, and the chief town in the province of Omaun, and capital of the dominions of a Mahometan sovereign, to whom it gives the title of "Imaum of Mascat, or Muscat," with a good harbor. It has a castle on a rock, and is very strong both by nature and art, though the buildings are mean. It was taken, in 1508, by the Portuguese, who retained it for a century and a half. The cathedral, built by the Portuguese, is now the king's palace. There is no vegetation to be seen on the sea coast near it, and only a few date trees in a valley at the back of the town, though the inhabitants have all things in plenty. The bazars or market places are covered with the leaves of date trees, laid on beams which reach from the house tops on one side to those on the other. The products of the country are horses, dates, fine brimstone, coffee, and ruinosa, a root that dies red. This city stands on the Gulf of Omaun, about 150 ms. NW. from Cape Rasalgad, and 250 SSE. from the straits of Musseldom. Lat. 23 40, lon. 58 25 E.—See articles *Africa*, p. 28, and *Muscat*, under its own head.

Muscoomy, river of N. H., which rises between Dorchester and Lyme, flows into and carries the water of Muscoomy Pond into Connecticut river, 5 ms. below Hanover.

Mask D'Asil, town of Fr., in the dep. of Ariège, and late co. of Foix, with a late rich Benedictine abbey. It is seated on the rivulet Rise, 8 ms. SW. of Pamiers.

Mask, lake of Ireland, partly in Galway and partly in Mayo, about 12 ms. in length and from 1 to 4 wide, and having no visible outlet. It lies N. from Lake Corril.

Maskelyne's Isles, group of small but beautiful islands, in the S. Pacific ocean, lying off the SE. point of Malicollo, one of the New Hebrides.

Maskinonge, river of L. C., flows from a pond of the same name, on the line between Warwick and St. Maurice cos., L. C., flows SE., and falls into the head of Lake St. Peter's.—SW. seignior of St. Maurice county, Lower Canada, on Lake St. Peter's, on both sides of Maskinonge river.

Mason, tp., Hillsborough co., N. H., 36 ms. S. from Concord.—Co., Va., bounded by Ohio river W. and NW., by Wood NE., Kenawha SE., and Cabell SW.; length 40, mean width 20 ms.; area 800 sq. ms. This co. is washed in its entire length by Ohio, and traversed by Great Kenawha river. Surface very broken and hilly, though much of the soil near the streams is excellent. Considerable quantities of salt are made on Kenawha river, from salt water procured by deep digging. Staples of this co., grain and flour. Chief town, Mount Pleasant. Pop. in 1820, 4,868; and in 1840, 66,777. Lat. 39° N. and lon. W. C. 5° W. intersect in this co.—Co., Ky., bounded by the Ohio river NE., Lewis E., and Fleming SE. and S., Nicholas SW., and Bracken W.; length 18, mean width 14 ms.; area 250 sq. ms. Surface hilly, though very considerable tracts of excellent soil skirt the streams, particularly the Ohio. Staples, grain, flour, whiskey, &c. Chief towns, Washington, and the seat of justice, Marysville. Pop. in 1820, 13,588; and in 1840, 15,719.

Central lat. 38 40 N., lon. W. C. 6 36 W. — Village, Pike co., Mo.

Mason, or *Magon*, river of Louisiana, issues from Grand Lake, immediately N. of the N. boundary of Louisiana, and, flowing a little S. of W. through the annually overflowed alluvion of the Mississippi, in a direct line 80 ms., but by the windings of the stream more than 150 ms., joins the Tensaw about 30 ms. above the junction of the latter with Ouachita.

Mason Hall, village, Orange co., N. C., by post road 52 ms. N.W. from Raleigh.

Masonville, town, Delaware co., N. Y., adjacent to the SE. angle of Chenango co., 26 ms. W. from Delhi. Pop. in 1820, 719.

Massa, populous town of Italy, in Tuscany, capital of a small territory of the same name. It is seated on a plain, 3 ms. from the sea, and 55 W. by N. of Florence. Lon. 10° E., lat. 44' N. — Town of Naples, in Terra-di-Lavora, with a bishop's see, seated near the sea, 20 ms. S. of Naples. Lon. 14 18 E., lat. 40 31 N. — Town of Italy, in the Siennese, on a mountain near the sea, 25 ms. S.W. of Sienna. Lon. 10 48 E., lat. 42 40 N.

Massa, or *Mazzi*, town of the Veronese, in Italy, situated on the N. side of the Po, 40 ms. E. of Mantua. Lon. 11 50 E., lat. 45 20 N.

Massachusetts, State of the United States, having the Atlantic ocean E. and SE., Rhode Island and Connecticut S., New York W., and Vermont and New Hampshire N.

	Miles.
Massachusetts has an exterior boundary on	
the Atlantic ocean of - - -	200
Along Rhode Island - - -	70
Along Connecticut - - -	85
Along New York - - -	50
Along Vermont and New Hampshire -	135
	540

Area, 7,250 square miles, or 4,640,000 acres. Length 190, breadth 94 ms. Lying between lat. 41 31 and 42 52 N.

Massachusetts, in point of soil, is divisible into three distinct zones; mountainous in the west, hilly in the central, and low and sandy in the eastern, or rather southeastern sections. The State is traversed by three ranges of mountains; one along its western border, separating the basins of the Housatonic from the creeks flowing into the Hudson; a second separating the basins of the Housatonic and Connecticut; and a third between the Connecticut basin and the streams discharging E. and SE. into the Atlantic ocean. The last range is not, it is true, a compact ridge, but is nevertheless entitled to the distinction of a mountain, and produces, on the geographical features of the State, all the effect arising from mountain scenery.

East and SE. of this latter ridge, the soil of Massachusetts is comparatively of an inferior quality, and, receding from the mountains towards the sea, imperceptibly sinks from hills to plains, flat, sandy, and sterile. This level and sandy character is, however, in a great degree confined to the SE. cos. In Norfolk, Middlesex, and Essex cos., the hills approach the ocean, and the tide, from the rapid acclivity of the country, ascends but a very short distance inland. Beyond the eastern range

of mountains, the valleys of Massachusetts possess a fine, deep, strong, and, in many places, abundantly fertile soil. The cos. of Berkshire, Franklin, Hampden, and Hampshire, are amongst the most diversified and best cultivated tracts in the S., producing grain, pasturage, and orchard fruit in abundance.

Of mineral productions, iron and marble are the only substances of great value found plentifully in this State. Iron is found in Plymouth, and several other parts of the State; marble is quarried and wrought to considerable extent near Springfield. The fine granite of Chelmsford and Teignmouth is brought to Boston by the Middlesex canal.

In a commercial point of view, Massachusetts is well situated. Its coast is indented by a number of fine bays, of which the harbors of Boston, Salem, and Plymouth, are the principal. Connecticut river traverses the State, and Merrimack enters the ocean in its NE. angle. From the latter stream to Boston harbor, a fine navigable canal conveys the lumber, stone, and other products of its shores, to a profitable market. The obstructions in Connecticut river have been so far removed and remedied by short canals, as to open that stream to boat navigation above the northern limit of Massachusetts.

From the epoch of the first settlement of the colonies of Plymouth and Massachusetts Bay, in which was formed the present Massachusetts, its inhabitants have been distinguished for their early attention to the interests of education. Harvard University, at Cambridge holds the first rank in the literary institutions of the U. S. The theological seminary in Andover, Williams College in Williamstown, and Phillips Academy in Andover are all highly respectable institutions. Academies have been established throughout the State, in almost all the principal towns, and common schools are universal. According to Mr. Morse, there were, in 1741, 401 religious congregations; of these, 366 were Congregationalists, 91 were Baptists, 32 were Friends, 14 were Episcopalians, and 8 Presbyterians.

The manufactures of Massachusetts are extensive and valuable. As early as 1810, their value amounted to near \$22,000,000. With the political changes since that epoch, the manufactures of Massachusetts, like those of other States of the U. S., have fluctuated, but still remain flourishing and respectable. Boston, in respect to tonnage, is the first port and Massachusetts the first State in the Confederacy. With Maine, in 1815, the joint tonnage amounted to upwards of 452,000 tons. The citizens in the seaport towns of this State are generally engaged in the fisheries.

The staple exports are lumber, whale oil, spirits. In 1820, the domestic produce exported amounted to \$3,861,435.

Total population in 1820	- 52; 25
Of this mass were—	
Foreigners not naturalized	- 25
Persons engaged in agriculture	- 6; 60
Persons engaged in manufactures	- 3; 64
Persons engaged in commerce	- 1; 01

The amount in the year 1820 was subdivided into—

In summary, the population of Massachusetts was:
 In 1790 - 378,787
 1800 - 422,845
 1810 - 472,040
 1820 - 522,545
 1830 - 610,408
 1840 - 737,699

Ratio of increase in 50 years, from 1790 to 1840, inclusive, 1.947, within a small fraction; or, for every thousand at the beginning of the period of 50 years, the State contained 1,947 at its termination.

Massachusetts Bay is that part of the Atlantic ocean east from Mass., between Cape Cod, Cape Ann, and the coast.

Massacre Isle, island of Alabama, to the W. from Dauphin island.

Masserne Mountains, from Mount Cerne. This chain has but recently been introduced to public notice, though a very distinct system, and, though unequal in mass or elevation to the Alleghanies or

Appalachian, is very little, if any, less extensive as to range. The Masserne rises first into regular mountain ridges in Missouri, about 70 miles SW. from St. Louis, and, preserving a SW. direction through Missouri, Arkansas, and Texas, is lost towards the Rio Grand del Norte. It is pierced by the Arkansas, Red, Brasso, a Dios, and Colorado rivers. Its geological structure has never been scientifically examined, and the result published. There is a very remarkable parallelism between the Appalachian and Masserne systems, and the very singular curvature produced on its rivers by the former is also produced by the latter. The Massernes are called the Ozark mountains by Hall, as it probably was not known to this author that Ozark is the vulgarism for Arkansas, used by hunters, trappers, &c.

Massera, strong town of Italy, in the kingdom of Naples, in Terra d'Otranto, with a bishop's see, seated at the foot of the Appennines, 16 ms. NW. of Tarento. Lon. 17 20 E., lat. 40 50 N.

Massena, village of St. Lawrence co., N. Y., on the river St. Lawrence. Pop. in 1820, 944.

Masserano, town of Italy, in Piedmont, capital of a small principality of the same name, held by its prince as a fief of the church. It is seated on a mountain, 40 ms. NE. of Turin. Lon. 8 14 E., lat. 45 38 N.

Mastico, or *Cape Mastico*, a cape on the S. side of Scio, one of the islands of the Archipelago.

Masuah, town of Abyssinia, on an island on the coast of the Red sea. The houses in general are built of poles and bent grass, as in the towns of Arabia; and a few are of stone, some of them two stories high. Lon. 39 36 E., lat. 15 35 N.

Masulipatam, seaport of Hindoostan, seated near the mouth of the Kirtna, on the coast of Comorandel. It is 200 ms. N. of Madras. Lon. 81 12 E., lat. 16 8 N.

Mataca, *Mantaca*, commodious bay on the N. coast of the island of Cuba, 35 ms. E. of Havana. Lon. 89 16 W., lat. 23 12 N.

Matagorda, fortress of Spain, seated near the entrance of the harbor of Cadiz.

Matalona, town of Italy, in Naples, and in Terra di Lavoro, 8 ms. NW. of Capua, and 19 W. by S. of Benevento. Lon. 14 14 E., lat. 41 12 N.

Mataman, country of Africa, bounded on the N. by Benguela, on the E. by parts unknown, on the S. by the country of the Hottentots, and on the W. by the Atlantic ocean. There is no town in it, and the inhabitants live in miserable huts, it being a desert country, little visited by the Europeans.

Matamushett, village, Hyde co., N. C.

Matau, or *Mactan*, one of the Philippine islands, where Magellan was killed in 1521.

Mataouaschie River, U. C., runs into the Ottawa river above the river du Rideau.

Matapan Cape, the most southern promontory of the Morea, ancient Tenaerium, between the gulf of Coron and that of Colokythia. Lon. 22 40 E., lat. 36 25 N.

Mataaloo Harbor.—See art. *Navigator's Islands*.

Matarm, large town of Asia, formerly the capital of an empire of that name, in the island of Java. It is strong by situation, and seated in a fertile and populous country, surrounded by mountains. Lon. 111 55 E., lat. 7 15 S.

Mataro, town of Spain, in Catalonia, remarkable for its glass works, seated on the Mediterranean, 15 ms. NE. of Barcelona. Lon. 2 23 lat. 41 36 N.

Matchedash, bay in the eastern part of Lake Huron, into which the river Severn empties, forms a communication with Lake Simcoe, U.

Matcowitz, strong town of Upper Hungary, in the co. of Scepus, seated on a mountain, 185 NE. of Aresburg.

Matelica, town of Italy, in the marquisate of Ancona, 15 ms. S. of Jesi.

Mateowan, the Indian name of Fishkill creek in Dutchess co., N. Y. It is an excellent stream, and near its mouth the Messrs. Scheuch have erected, and for many years have kept in operation, a fine cotton factory, to which they give the name of Mateowan.

Matera, considerable town of Italy, in Naples, and in the Terra d'Otranto, on the Canapuro, 5 ms. NW. of Tarento. Lon. 16 54 E., lat. 59 N.

MATHEMATICS, from the Gr., *Mathema*, science, derivative of *mathamo*, to learn; science par excellence, science of extension.

Matilda Township, in the co. of Dundas, C., is the sixth tp. in ascending the river St. Lawrence. It is opposite the Gallop islands, between Ogdeensburg and Hamilton.

Matildaville, village, Fairfax co., Va., at the mouth of Difficult creek, 17 ms. above W. C.

Matlock, village of Eng., in Derbyshire, situated on the Derwent, 4 ms. N. of Wirksworth.

Matmia.—See *Jeso*.

Matogrosso.—See *Matto Grosso*.

Matopony, river of Va., rises in Spotsylvania, crosses Caroline, thence separates King William from King and Queen, and joins the Pamunkey in Delaware and forms York river.

Matheo, *St.*, town of Spain, in Arragon, 10 ms. from the Mediterranean and 55 N. of Valencia. Lon. 36 W., lat. 40 12 N.

Matthew, *St.*, island of Africa, 420 ms. S. W. of Cape Palmas, on the coast of Guinea. It was planted by the Portuguese, but is now deserted. Lon. 6 10 W., lat. 1 24 S.—See *S. I.* island in the Indian ocean. Lon. 123 51 E., lat. 5 23 S.

Matthews, co., Va., commencing 8 ms. S. from the mouth of the Potomac. It occupies an oval peninsula, between Piankatank and Neversink rivers, having Gloucester co. to the W.; area 40 80 sq. ms. There is a post office at the courthouse. Pop. in 1820, 6,920; and in 1840, 7,200. Ct. lat. 37 37 N., lon. W. C. 45' E.—See *C.* and post office, Matthews co., Va., by post 108 ms. E. from Richmond.

Matto Grosso, captain generalship of Brazil, bounded by the territories of the United Provinces of La Plata S. and SW., Peru W., Amazon N., Para N., the river Araguay or province of Guayana E., and the river Parana or province of St. Paulo SE. It is an immense central province, occupying the country drained by the sources of Paraguay, Madeira, Xingua, and Araguay, extending from lat. 8 30 to 24° S. or upward of 1,100 ms.; and E. and W. from the Araguay to Madeira river, nearly 1,000 ms.

Mattapoisetts, village, Plymouth co., Mass. 10

SSW. from Plymouth, and 66 a little E. of
om Boston.

Watson's post office, Otsego co., N. Y., 74
SW. by W. from Albany.

Wattituck, post office, Suffolk co., N. Y., on
ic bay, 8 ms. SW. from Southold, and 85
om New York.

Wax Bridge, post office in the upper part of
moreland co., Va., 60 ms. by post road S.
W. C.

Wumay, seaport in the island of Jeso, capital
province of the same name, tributary to Japan.
138 55 E., lat. 42° N.

Wururu, seaport of Ceylon, with a small fort.
country round is exceeding wild, and abounds
phants, which are here principally caught for
ation. It is situate on a river, nearly at the
ernmost point of the island, 25 ms. ESE. of
Lon. 80 28 E., lat 5 53 N.—Town of

postan, in the province of Agra, 22 ms.
of Agra, and 70 SSE of Delhi.

Wubal, town and country of Candahar, 70
NE. of Candahar.

Wubeuge, fortified town of Fr., in the depart-
of the Nord. In 1793 the Austrians formed
lockade of this place, but were soon driven
their position. It is seated on the Sambre,
S. of Mons, and 22 ESE. of Valenci-

Wuchchunk, village, Northampton co., Pa.,
the right bank of the Lehigh, 30 ms. by land
Bethlehem. It is the landing for the coal
red on a mountain of the same name. The
tain extends from the village SW., and rises
1,000 feet above the Lehigh. See *North-*
on county, Pennsylvania. Population in
2,193.

Wugerville, town of New Brunswick, in Sun-
co., on St. John's river.

Wuldah, town of Hindoostan, in Bengal, situ-
a river that communicates with the Ganges.
se out of the ruins of Gour, which are in its
borhood, and is a place of trade, particularly
k, 170 ms. N. of Calcutta. Lon. 88 16 E.,
5 3 N.

Wuleon, town of France, in the department of
Pyrenees, 20 ms. WNW. of Pau.—
or of France, in the department of Upper
pynees, 28 ms. SE. of Tarbes.—Town of
ce, in the department of Vendee, with an an-
castle on a rock. It is seated near the river
52 ms. NE. of Rochelle, and 52 NW. of
ers.

Wumee, river, rises in Indiana, flows NE. into
the W. angle of Ohio, through which it contin-
NE., and falls into the extreme SW. exten-
of Lake Erie. About 18 ms. above its mouth
impeded by shoals, occasioned by a series of
s of rock, which cross the river for a distance
ms. It is a fine navigable stream above and
these shoals. Its principal branches, which
ite above the shoals, are St. Mary's, St. Jo-
and Great and Little Auglaize.—Village
eat of justice for Wood co., Ohio, on the
ank of Maumee river, above its lower falls,
nearly opposite Fort Meigs. Lat. 41 33 N.,
W. C. 6 44 W.

Wumee bay is an oval sheet of water, 5 ms.
and about 2 wide, and at the mouth of the

Maumee river. It is united to Lake Erie by two
channels, formed by a small island in the form of
a crescent. The western channel has a depth of
about seven feet.

Maura, *St.*, island of the Mediterranean,
about 50 ms. in circuit, which forms part of the
republic of Seven Islands. It lies near the coast
of Albania, 15 ms. N. of the island of Cephalo-
nia. Lon. 20 46 E., lat 38 40 N.

Maurepas, lake of La. It is formed by a dilata-
tion of the Amite river, and communicates with
Lake Pontchartrain by a strait 7 ms. in length,
called the pass of Manchac. It is of an oval fig-
ure, 12 ms. by 7. It receives from the S. the
Acadian creek, from the W. New river and Amite
river, and from the N. the Tickoshah. Its depth
about 12 feet, but the pass of Manchac admits of
vessels of six feet draught only.

Mauriac, town of France, in the department of
Cantal, famous for excellent horses, seated near
the Dordogne, 29 ms. E. of Tulle, and 38
WNW. of St. Flour.

Maurice, *St.*, river, L. C., which enters the St.
Lawrence from the N., at the town of Three
Rivers.—Town of Switzerland, in the Valais.
It guards the entrance into the Lower Valais from
Bern, and is situate on the Rhone, between two
high mountains, 16 ms. NW. of Martigny.—
Co., L. C., on both sides of St. Maurice river,
and extends along the NE. shore of St. Lawrence
river from 3 ms. above St. Anne river to 6 ms.
above the Majkinonge, or about 58 ms. Its capi-
tal is the town of Three Rivers, the third in size
in Canada.

Maurice, river, N. J., rising in Gloucester and
Salem, and falling into Delaware bay in Cumber-
land co. It is navigable 18 or 20 ms. for vessels
of 100 tons.—Village, Cumberland co., N. J.,
on Maurice river, about 12 ms. SE. from Bridge-
town, and 3 NW. from Port Elizabeth.—Tp.,
Cumberland co., N. J., on Maurice river.

Maurilius.—See *France, Isle of*.

Maurna, one of the Society islands, in the Pa-
cific ocean, 14 ms. W. of Bolabola. Lon. 152
2 W., lat. 16 25 S.

Mautern, town of Austria, on the S. side of the
Danube, opposite Stein, with which it is connect-
ed by a long wooden bridge. It is 11 ms. N. by
W. of St. Polten.

Mauvy, co. of W. Ten, bounded by Giles S.,
Hickman W., Duck river, or Williamson N.,
Bedford E. Length 35 ms., mean width 20; area
700 sq. ms. Surface hilly; soil excellent. Stap-
le, cotton. Chief town, Columbia, 40 ms. SSW.
from Nashville. Pop. in 1820, 22,141; and in
1840, 28,186. Central lat. 35 30 N., lon. W. C.
10 0 W.

Mavra-Malex, near Mount Volcano, small town
of Greece, in the Morea, standing on the site of
the ancient Messene.

Maxfield, village in Penobscot co., Me., 141
ms. NE. from Portland.

Maxwell's Store, post office in Mecklenburg co.,
N. C., by post road 178 ms. SW. from Raleigh.

Maves, *St.*, borough of Eng., in Cornwall, on
the E. side of Falmouth haven, 12 ms. SSW. of
Grampound, and 262 W. by S. of London.

Maxatauny, tp. in Berks co., Pa., on the border
of Lehigh co., and on the Sacony, branch of

Maiden creek, 20 ms. NNE. from Reading. Pop. in 1820, 1,847.

May, Cape.—See *Cape May*.

Maren, town of Upper Saxony, in Misnia, 10 ms. S. of Dresden.

Maximin, St., town of France, in the department of Var, seated on the Argens, 21 ms. N. of Toulon.

May, small island of Scotland, at the mouth of the Frith of Forth, with a light-house, 6 ms. SE. of Anstruther, which is the nearest part of the coast.

May, Cape, cape of the U. S., in N. J., on the N. side of the mouth of the Delaware. Lon. 75 4 W., lat. 39 0 N.

Mayamba, or *Majamba*, town of the kingdom of Loango, capital of a district of the same name. The chief trade is in logwood. It stands at the mouth of the Banna, 110 ms. NW. of Loango. Lon. 9 50 E., lat. 3 20 S.

Maybole, town of Scotland, in Ayrshire, with a manufacture of blankets, seated on an eminence, surrounded by hills, 8 ms. S. of Ayr.

Mayrn, town of Germany, in the territory of Treves, with a castle and a collegiate church; seated on the Nettle, 20 ms. W. of Coblentz.

Mayence.—See *Mentz*.

Mayenne, dep. of Fr., including part of the late province of Maine. It takes its name from a river, which flows S., by the cities of Mayenne and Laval, to that of Angers, where it receives the Sarthe, and soon after joins the Loire. Laval is the capital.—City of Fr., in the dep. of the same name, with a castle on a rock. It is seated on the river Mayenne, 44 ms. WNW. of Mans. Lon. 0 43 W., lat. 48 18 N.

Mayenne and Loire, dep. of Fr., which includes the late province of Anjou. It has its name from two rivers. Angers is the capital.

Mayfield, town in Montgomery co., N. Y., 18 ms. NE. from Johnstown.—Eastern tp., Cuyahoga co., Ohio.—Village in Hickman co., Ky., 275 ms. SW. by W. from Hartford.

Maykiang river.—See *Mecon*.

Mayhew, new village, or missionary station in the Choctaw country, Ala., on a western branch of Tombigbee, about 60 ms. SSW. from Cotton-ginport.

Maynesborough, tp. in Coos co., N. H., 16 ms. E. from Lancaster.

Maynooth, town of Ireland, in the co. of Kildare. Here is a royal college for students intended for the Romish church, and a college for lay students of the same persuasion. It is 12 ms. W. of Dublin.

Mayo, co. of Ireland, in the province of Connaught, 62 ms. long and 52 broad, bounded on the E. by Roscommon, on the S. by Galway, on the W. and N. by the Atlantic, and on the NE. by Sligo. It is a fertile country, and abounds in cattle, deer, hawks, and honey. It contains 75 parishes, and sends 4 members to Parliament. The principal town, of the same name, is much decayed. Lon. 9 39 W., lat. 53 40 N.

Mayo, or the *Isle of May*, one of the Cape de Verd Islands, in the Atlantic ocean, 300 ms. from Cape de Verd, in Africa, about 17 ms. in circumference. The soil in general is very barren, and water scarce. The inhabitants are negroes, who

speak the Portuguese language, and many of go naked. Lon. 23 0 W., lat. 15 10 N.

Mayo, village in Rockingham co., N. C. 7 ms. NW. from Raleigh.

May's Landing, village in Gloucester co. J., on the S. side of Great Egg Harbor river, 4 SE. from Philadelphia.

Mayslick, village in Mason co., Ky., on a bl. of the N. fork of Licking river, 9 ms. S. Washington.

Maysville, formerly called *Limestone*, v. and seat of justice for Mason co., Ky., 63 NE. from Lexington, and 74 SW. from Chi the. It contains the ordinary county building, printing office, glass factory, and several me tile stores. Lat. 38 44 N., lon. W. C. 6 37 Pop. in 1840, 2,741.

Maytown, Lancaster co., Pa.

Mayville, village and seat of justice for C tauque co., N. Y., at the head of Chautauque, 8 miles from Portland, on Lake Erie, and 60 from Buffalo. Lat. 42 16 N., lon. W. 25 W.

Mazagan, strong town of Africa, in the dom of Morocco, seated near the Atlantic, 8 W. of Azamor, and 120 N. of Morocco. L. 15 W., lat. 33 12 N.

Mazanderan, province of Persia, on the Ca sea, bounded by Ghilan NW., Irac Adjem and Khorasan SE. and E. It is a narrow be between the Caspian sea and Elbouz moun of about 60 ms. mean width, and 250 in le from the Ozen river to the bay of Asterabad. posed to the prevailing NW. wind from the pian, Mazanderan is generally an unhealthy ntry; but lying low, and tempered by sea air, is on its latitude a remarkably warm region, alt the successful cultivation of sugar cane. Its central lat. about 36 10 N. Chief towns, A ff and Balfroosh. It is the country of the ar at Taburi, and on coins the modern Persians still ve it the name of Taburistan.—*Burnes*.

Mazara, town of Sicily, capital of a ferti ley of the same name, with a good harbor, 24 S. W. of Trapani. Lon. 12 30 E., lat. 37 5 N.

Meaco, city of the island of Nippon, in Jpn, of which it was formerly the capital. It is the great magazine of all the manufactures in Jpn, and the principal place of trade. The inli ants are said to be 600,000. Lon. 134 2, lat. 35 30 N.

Media, town of Hungary, in the bannat o emeswar, seated on the N. side of the Danub 15 ms. E. of Belgrade. It was dismantled by the Turks in 1738. Lon. 12 0 E., lat. 45 0 N.

Mead, tp. in Crawford co., Pa., contiguous to Meadville. Pop. in 1820, 1,311.—Tp. in elmont co., Ohio, on the Ohio river. Pop. in 18, 1,072.

Made, co., of Ky.

Mead's Creek, post office in Steuben co., N. Y.

Meadow Dale, post office in Greenbrier co., a 257 ms. a little N. of W. from Richmond.

Meadsville, village, borough, and seat of jice for Crawford co., Pa., situated on the E. si of French creek, 25 ms. NW. from Franklin It contains, beside county buildings, an ars al, printing office, a college, and about 150 dwe gh houses. Alleghany college, in this town, is a r

perous institution, and, under the active agency of the Rev. Timothy Alden, its president, has one of the best libraries of any literary institution in the interior of the U. S. By grants from the State of Pennsylvania, and other sources, the college funds are ample. Pop. in 1820, 649; and in 1830, 1,319.

Leadville, village in Halifax co., Va., 153 ms. S. from Richmond.—Village in Franklin co., Va., 70 ms. SW. from Jackson, and 30 SSE. from Natchez.

Leansville, village in Bradford co., Pa.—See *Leanda*.

Leao, small island, one of the Moluccas, in the Indian ocean, with a good harbor. Lon. 127 5 E., Lat. 1 12 N.

Leans.—See *Kincardineshire*.

Leasontown, (query, ought not this to be *Beaumont*?) village in Fayette co., Pa.

Meath, or *East Meath*, co. of Ireland, in the province of Leinster, 36 ms. long and 35 broad, bounded on the N. by Cavan and Louth, on the E. by the Irish sea and Dublin, on the S. by that city and Kildare, and on the W. by West Meath. It contains 139 parishes, and sends 14 members to Parliament. Trim is the capital.

Meath, West, co. of Ireland, in the province of Ulster, bounded on the N. by Cavan, on the E. and E. by Meath, on the S. by King's co., and the W. by Roscommon, from which it is separated by the Shannon, and on the NW. by Longford.

It is one of the most populous and fertile counties in Ireland, contains 62 parishes, and sends 14 members to Parliament. Mullenger is the county town.

Meaux, ancient and lately an episcopal town of France, in the dep. of Seine and Marne, and late prov. of the Isle of France, with a bishop's see, situated on the Marne, which divides it into two parts. 10 ms. NW. of Colomiers, and 25 NE. of Paris. Lon. 2 58 E., lat. 48 58 N.

Mecon, large river of Thibet. It rises in that country, and, flowing SE. through Laos and Cambodia, falls by two mouths into the Eastern ocean, and forms an island below the city of Cambodia, which here gives name to the eastern branch.—See *Cambodia*, *Mecon*, and *May Kiang*.

Mecca, ancient and very famous town of Asia, in Arabia the Happy, seated on a barren spot, in a valley, surrounded with little hills, about a day's journey from the Red sea. It is commonly, though erroneously, supposed that Mecca became an object of religious veneration to the Arabians, from being the birthplace and seat of Mahomet's mission. It was considered a holy city by that peo- ple many ages before the birth of Mahomet. Two miles from the town is the hill where they say Abraham went to offer up his son Isaac. Mecca is governed by a sheref, who is a temporal prince, and his revenue is increased by the donations of Ottoman sovereigns. It is 34 ms. ENE. of Medina, the seaport of Mecca, and 220 S. by E. of Mecca. Its present population about 18,000 or 20,000. Lon. 40 55 E., lat. 21 40 N.

Mechanic, village, Dutchess co., N. Y., 15½ ms. NE. by E. from Poughkeepsie. In this village is a Friends boarding-school capable of accommodating 100 students.

Mechanicsburg, village, Cumberland co., Pa.,

on the southern or lower road from Carlisle to Harrisburg, 8 ms. from the latter.—Village, Campaign county, Ohio, in Goshen tp., head of Little Darby. Distance, 11 ms. E. from Urbanna, and 32 NW. from Columbus. It is a valuable situation for water works.—Village, Liberty tp., on the SE. quarter of Butler county, Ohio, and on the road from Hamilton to Cincinnati.

Mechanicstown, village, Frederick co., Md., 15 ms. N. from Fredericktown.

Mechanics Hill, village, Moore co., N. C., 69 ms. SW. from Raleigh.

Mechanicsville, village, Montgomery co., Md., on the road from Washington city to Unity, 20 miles N. from Washington city, 30 NNW. from Baltimore, 25 SW. from Fredericktown, and 8 NE. from Rockville. The situation of this village is high and healthy. The site elevated about 500 feet above the level of tide water in the Atlantic ocean. Lat. 39 10 N., lon. W. C. 0 1 W.

Mechanicsville, village, Darlington district, S. Carolina.—Name of the post office at Adamsville, Muskingum co., Ohio.—Village, Saratoga co., New York.

Meched.—See *Meshid*.

Mechoacan, ancient province, now a State, of the Republic of Mexico. Whilst the Spanish power existed in Mexico, Mechoacan was known as the intendancy of Valladolid. It is situated on the western declivity of Anahuac, intersected with hills and charming valleys, which exhibit to the eye of the traveller, a very uncommon appearance under the torrid zone—extensive and well-watered meadows. Valladolid enjoys generally a mild and temperate climate, exceedingly conducive to the health of the inhabitants. It is only when we descend the table land of Aric, and approach the coast, that we find a climate in which the new colonists, and frequently even the old inhabitants, are subject to the scourge of intermittent and putrid fevers. The general level, independent of particular mountain summits, differs in relative elevation from the low shores of the Pacific to the fine plain between the hills of Aguasarco, and the villages of Teipa and Petatlan, 6,396 feet above the surface of the ocean.

In this fine country the fruits and grain of the temperate is followed and frequently intermixed with the plants of the torrid zone. Cotton and indigo are its most valuable vegetable staples.

Valladolid contains two cities of considerable magnitude—Valladolid, the capital, and Pascuaro. Tzintzontzan bears the name of a city, but is in reality a poor Indian village. It contains a part of the volcanic regions of Mexico.—See *Tuorilo*. Within its limits are the mines of Zitiquaro, Anganguo, Tlapuxahua, the Real del Oro, and Inguarion.

Mechoacan is from NE. to SW. about 250 ms., with a mean width of 100, area 25,000 sq. miles. It lies between lat. 18° and 20 40 N., and is in a peculiar manner devoid of rivers or harbors. It is bounded by the Pacific ocean W., Jalisco, or Guadalupe NW., Guanajuato N., Queretaro and Mexico E., and Mexico S. and SW.

Mechoacan, capital of the State of the same name, is elevated 6,396 feet above the level of the ocean, at lat. 19 42 N. Snow has been known to fall in its streets. The aqueduct which supplies this city with potable water cost upwards of

900,000 dollars.—See *Mechoacan* and *Valladolid de Mechoacan*.

McConnellsville, village and seat of justice for Morgan co., Ohio.—See *MacConnellsville*.

Mecklin, called by the French *Malines*, town of the kingdom of the Netherlands, on the Dyle. It is a place of very extensive manufactures, producing fine lace, linen, silk, and woolen stuffs; also, leather and hats; 13 ms. S. by E. from Antwerp, and 13 NE. from Brussels.

Meckenheim, town of Germany, in the territory of Cologne, situate on the Erft, 8 miles SW. of Bone.

Mecklenburg, duchy of Germany, in the circle of Lower Saxony, bounded on the N. by the Baltic, E. by Pomerania, S. by Brandenburg, and W. by Holstein and Lunenburg. It extends 135 ms. in length, and 90 where broadest, and abounds in corn, pastures, and game. The country was for many centuries under the government of one prince, but on the death of the sovereign, in 1592, it was divided between his two sons; the eldest retaining the duchy of Mecklenburg-Schwerin, which is considerably the largest share; and the younger obtained the duchy of Mecklenburg-Strelitz. Schwerin is the capital of the former, and New Strelitz of the latter.

Grand duchy of Mecklenburg-Schwerin comprises an area of 4,720 sq. English miles, with an aggregate population of 431,000, and contains the towns of—

	Population.
Schwerin - - - -	12,000
Parchim - - - -	4,000
Ludwigslust - - -	4,000
Butzow - - - -	3,000
Gustrow - - - -	8,000
Boizenbourg - - -	3,000
Wismar - - - -	9,000
Rostock - - - -	17,000

Grand duchy of Mecklenburg-Strelitz comprises an area of 760 sq. English ms., with an aggregate population of 77,000, and contains the towns of—

	Population.
New Strelitz - - -	5,000
New Branburg - - -	5,000
Friedland - - - -	4,000
Stargard - - - -	8,000

Mecklenburg, county, Virginia, bounded by N. Carolina S., by Halifax W., Charlotte NW., Lunenburg NE., and Brunswick E.; length 33 ms., mean width 20, area about 600 sq. miles. This county is traversed from NW. to SE. by the Roanoke. The surface is undulating, rather than hilly. The soil productive. Staples—cotton and tobacco. The chief town, Boydtown, is about 60 ms. SW. from Petersburg. Pop. in 1820, 19,786; and in 1840, 20,724. Central lat. 36 40 N., lon. W. C. 1 10 W.

Mecklenburg, county, North Carolina, bounded by South Carolina S. and SW., by Catawba river or Lincoln co., N. C., NW., Iredell N., Cabarras NE., and Anson SE.; length 45 ms., mean width 18, area about 800 sq. ms. Surface rather rolling than hilly. Soil near the streams excellent, but in the intervals sterile. It is drained by innumerable creeks, flowing SW. into Catawba river. Staples—grain, cotton, and tobacco. Chief

town, Charlotte, 130 miles SW. by W. from Leigh. Population in 1820, 16,895; and in 1840, 18,273. Central lat. 35 15 N., lon. W. C. 42 W.

Meckley.—See *Cassay*.

Mecon, river, which rises in the NE. part of Siam, and flows SSE. through the province of Siam, in China, and the kingdoms of Laos and Cambodia, into the China sea. At the city of Cambray it divides into two branches, which run parallel to each other for above 200 miles, to the sea, the eastern of which is called Cambodia, the western Oubequem. This is the same stream known as Maykiang. On the map of Birmaniam Black's Atlas, this river is marked as rising in eastern Thibet, N. lat 34°, with sources in connection with those of the Blue river, and represented as flowing thence by a general course NW. of SSE 2,000 miles, to N. lat. 10°. Near its source it is named Lat-hou, or Tchatchou, and N. lat. 20° the Hew-Lung-Kiang, and at the mouth of May-Kiang, or river of Cambodia.

Mecran, *Mekran*, or *Beloohistan*, bounded on the N. by Segestan and Candahar, E. by Hindoostan, S. by the Indian ocean, and W. by Persia.—See *Asia*, p. 84, and article *Beloohistan*.

Mecrin, town of Portugal, in Traloso, 15 miles NNE. of Torre de Moncove, and 24 miles of Mirandela.

MEDAL, *metallum*, metal, any piece of gold, silver, or brass, with two faces, struck to preserve the memory of a person or event. Any piece of metal is really a medal, though not so usually regarded.

Medea, town of Algiers, in the province of Constantine, seated in a country abounding in corn, wheat, and sheep, 35 ms. SW. of Algiers.

Medea, or *Mahdia*, town of Tunis, formerly a place of importance, seated on a peninsula on the gulf of Cabea, 100 ms. S. by E. of Tunis.

Medebach, town of the duchy of Westphalia, 15 ms. W. of Corbach.

Medelin, small town of Spain, in Estramadura, seated in a fertile country, on the river Guadiana, 22 ms. E. of Merida. Lon. 5 38 W., lat. 34 4 N.

Medelpadia, maritime province of Sweden, in the Norland, and on the gulf of Bothnia. It is mountainous and woody, with fruitful valleys and extensive pastures. Sundswall is the capital.

Media, now the province of Ghilan, in Persia, once the seat of a powerful empire.

Medemblick, town of the kingdom of the Netherlands, in Holland, seated on the Zuyder Zee, with a good harbor. It is 9 miles N. of Heerwyk, and 22 NE. of Amsterdam. Lon. 3° E., lat. 52 47 N.

Medfield, village, Norfolk co., Mass., 18 miles SW. from Boston.

Medford, village, Middlesex co., Mass., on the Mystic river, 5 miles NW. of Boston.—Village of Burlington co., N. J., by post road 46 miles S. from Trenton.

Medina, town of Arabia Deserta, celebrated for being the burial place of Mahomet. It is a small, poor place, but walled round, and has a large mosque, but nothing like the temple at Mecca; in one corner is a place 14 paces square, with four windows and brass gates, and in the middle is the tomb of Mahomet. It is seated on a plain, about

in palm trees, 200 miles NW. from Mecca. 39 33 E., lat. 24 20 N.

Medina, county, Ohio, lying in the northern part of the State, bounded on the N. by Cuyahoga, E. by Portage, S. by Wayne, and W. by Huron counties. It is 38 miles long from E. to W., and broad from N. to S., containing 760 sq. ms. County seat, Medina. The headwaters of Black and Rocky rivers are the principal streams. Pop. in 1820, 3,082; and in 1840, 18,352. Lat. 41 00' and lon. W. C. 5° W. intersect in this county. Medina, C. H. and post office, Medina co., Ohio, 15 miles NNE. from Columbus.—Town and county seat of justice for Medina co., Ohio, on the sources of the Rocky river, 26 miles SW. from Cleveland. 41 9 N., lon. W. C. 5 6 W.

Medina-Celi, ancient *Arcoberga*, town of Spain, in Castile, capital of a duchy of the same name, 10 miles near the Xalong, 10 ms. SE. of Sigüenza, and 5 SW. of Saragossa. Lon. 2 24 W., lat. 41 20 N.

Medina de las Torres, ancient but small town in Estramadura, with an old castle, seated on the foot of a mountain near Badajoz.

Medina del Compo, ancient Methymna Cumaeis, rich and commercial town of Spain, in the kingdom of Leon. It has great privileges, and is situated in a country abounding with corn and wine, 75 ms. SE. from Zamora, and 75 NW. of Madrid. Lon. 4 24 W., lat. 41 20 N.

Medina del Rio Secco, ancient town of Spain, in the kingdom of Leon, seated on a fertile plain, 50 ms. NW. of Valladolid, and 50 SE. of Leon. Lon. 4 32 E., lat. 42 6 N.

Medina Sidonia, ancient town of Spain, in Andalusia, with a castle, 36 ms. NNW. of Gibraltar, and 20 NE. of Cadiz. Lon. 5 36 E., lat. 36 00' N.

Mediterranean, sea between Asia, Africa, and Europe, extending from the straits of Gibraltar to the coasts of Syria and Palestine, above 2,400 ms., of unequal breadth. It communicates with the Atlantic ocean by the straits of Gibraltar, and with the Marmora by the strait of Gallipoli. There is a current in this sea, and a constant current sets in from the Atlantic through the straits of Gibraltar. It contains many islands, several of them large, as Crete, Corsica, Sardinia, Sicily, Candia, and Cyprus. The eastern part of it, bordering upon Asia, is sometimes called the Levant sea. Lon. 7. to 37° E., lat. 31° to 44° N.

The Mediterranean is the lower valley of that immense basin which penetrates the eastern continent from W. to E. Under the articles *Black Sea*, *Bothe*, *Dnieper*, &c., I have already discussed the parts of this region which are connected with the Black sea. If taken in its utmost extent, the Mediterranean basin extends from the sources of the Nile, about N. lat. 8°, to those of the Dnieper, lat. 55°, or through 43° of lat., equal to 2,988 English ms. Lat. 38° N. is about the mean parallel of the Mediterranean sea itself, though its extremes reach from lat. 31° to 46° N. This great inland sea is not alone a separating water between Europe and Africa, but also between two strongly wasted land tracts, as respects their fitness for human residence. The European side is as remarkable for the number of rivers, deep gulfs, and fertility of soil, as is the coast of Africa for its dull

uniformity of outline, general want of rivers, and aridity of soil. The Nile pours its far-drawn volume into the SE. angle, and a narrow strip of arable surface stretches along the African coast, opposite the western extremity of the Mediterranean; but except the delta of the Nile and the confined tract of Barbary, the far greater part of northern Africa is desert sands and rocks. The African, or, more correctly, the Arabian desert, is again protruded northwards between the Mediterranean and Euphrates. Thus from Tripoli to Cilicia, with very partial exceptions, the Mediterranean is skirted with a wide waste of sand and rocks, extending 1,400 ms. With Asia Minor, these harsh features disappear; and from Cilicia to the Atlantic ocean expand around the Euxine, Marmora, Aegean, Adriatic, and the western Mediterranean, one of the finest regions of the earth.

The Mediterranean is naturally divided into two unequal sections by the projecting coasts of Africa and Italy and the intervening island of Sicily. The western gulf lies in form of a triangle; base 1,200 ms. from the straits of Gibraltar to Calabria, and altitude 500 from the African to the French coast, with an area of 300,000 sq. ms. The eastern Mediterranean extends from the coast of Tunis and Tripoli to that of Syria 1,500 ms., and including the Archipelago and Gulf of Venice will average 500 in width, and comprise an area of 750,000 sq. ms. The whole surface of this sea will therefore exceed a million of sq. ms. The effect of the Mediterranean on the climate of Europe I have slightly noticed in the art. *Earth*.

The straits of Gibraltar have a constant current setting eastward into the Mediterranean. Evaporation on the recipient and the greatly superior area of the Atlantic satisfactorily accounts for this current. Though there is, it is probable, a small tide of attraction in the Mediterranean, it is rendered imperceptible by the constant fluctuating and unequal wind tides. In saltness there is not much difference between the water in the Atlantic ocean and Mediterranean. The surface of the latter has either lowered in the last 2,500 years, or the ancient harbors and coasts have been raised by alluvion. The admission of one of these revolutions is necessary to reconcile to truth the general facts of history.

Medniki, town of Poland, in the province of Samogitia, with a bishop's see, seated on the Warwitz, 40 ms. E. of Memel. Lon. 22 49 E., lat. 55 42 N.

Medua, town in the kingdom of Algiers, seated in a country abounding in corn, fruits, and flocks of sheep. It is 175 ms. SW. of Algiers. Lon. 13° E., lat. 34 45 N.

Medway, river of Eng., which rises in Ashdown Forest, in Sussex; entering Kent, it passes by Tunbridge and Maidstone. It is navigable to Rochester, below which it divides itself into two branches: the western one enters the Thames between the isles of Grain and Shepey, and is defended by the fort at Sheerness; in this branch at Chatham is a station for the royal navy. The eastern branch, called the E. Swale, runs to Milton and Feversham, below which it falls into the German ocean.

Medway, town, Norfolk co., Mass. about 25 ms. SW. of Boston, and about the same distance

NE. of Providence, Rhode Island Population in 1820, 1,523.

Medwi, town of Sweden, in the province of E. Gothland, called the Swedish Spa, on account of its waters, which are vitriolic and sulphureous. The lodging houses form one street of uniform wooden buildings, painted red. The walks and rides are delightful, particularly on the banks of the *Wetter*. It is 3 ms. from *Wadstena*.

Mecziboz, town of Poland in the palatinate of Volhnia, seated on the river *Bog*, 20 ms. S. of *Constantinow*.

Megalapolis—See *Sinano*, village of Greece, in the *Morea*.

Megara, ancient town of Greece, formerly very large, but now inconsiderable. Here are some fine remains of antiquity, 20 ms. W. of *Athens*. Lon. 23 30 E., lat. 38 6 N. *Megara* yet contains a thousand houses, though nearly half are deserted and in ruins. It is situated on two narrow ridges, of a low eminence. The surrounding plain is perhaps 20 ms. in circumference, being limited on the S. by the line of coast extending W. from the ancient port of *Megara*, *Nisea*, now *Dodeca* [Ecclesias, to the N. by a long chain of circling mountains, now the *Long mountains*, *Macriplayi*, branching off north-westward from the hills of *Keseta*, towards the western extremity of *Cithæron* and the bay of *Livadostro*, and on the SW. by a very high range of hills, resting on the extremities of the Northern mountains, formerly the *Gerania*, and now *Dervini Vouni*, or the *Mountain of the Guard*.

Megaritis, province of ancient Greece, bounded by *Bœotia* N., *Attica* E., the *Saronic gulf* S., and *Corinthia* W. The much celebrated *Geranian mountains*, separating the *Megaritis* from *Carinthia*, are the true line of separation between the *Morea* and continental Greece. This district, and indeed all *Megaritis*, is now generally called *Dervini Choria*, of which *Megaritis* and *Koundouri* are the principal places. The *Derviniotes*, though generally *Albanians*, speak the *Romaic* or modern *Greek language*, and amount to perhaps 50,000.

Megen, town of Dutch *Brabant*, seated on the *Maese*, 15 ms. SW. of *Nimeguen*. Lon. 5 26 E., lat. 51 49 N.

Megentheim, town of *Wirtemberg*, in *Francia*, 19 ms. S. by W. from *Wurtzburg*. It appertains to, and is the residence of, the grand master of the *Teutonic knights*.

Megesvar, town of *Transylvania*, capital of a co. of the same name, remarkable for its good wines. It is seated on the river *Kotel*. Lon. 25 20 E., lat. 46 50 N.

Megiere, town of *Transylvania*, subject to *Austria*, 28 ms. N. of *Hernnstadt*. Lon. 24 41 E., lat. 46 53 N.

Meheren, river, Va., rises in *Lunenburg* and *Mecklenburg* cos., and, flowing SE. through *Brunswick* and *Greensville*, enters *Hertford* co., N. C., and 7 ms. below the line contributes to form the *Chowan* by its junction with *Nottaway*.

Mehran, principal of the channels into which the river *Indus* divides itself, near *Tatta*, in *Hindoostan* proper.

Mehun Sur Yevre, ancient town of France, in the department of *Cher* and late province of *Berry*. It is seated in a fertile plain, on the river *Yevre*,

10 ms. NW. of *Bourges*, and 105 S. of *Lon.* 2 17 E., lat. 47 19 N.

Mehun Sur Loire, town of France, in the department of *Loiret*, and late province of *Orleans*, seated on the *Loire*, 10 ms. SW. of *Orleans*. Lon. 1 48 E., lat. 47 50 N.

Meigs, co., Ohio, bounded E. and SE. by the river, S. by *Gallia* and *Athens*, and N. by *Adams*. Length 30 ms., breadth very unequal, from 22, area 400 sq. ms. Surface broken, and some of the soil, particularly near the stream, excellent. Pop. 1820, 4,480; and in 1840 452. Central lat. 39 11 N., lon. W. C.

—SE. tp., *Muskingum* co., Ohio.—*Adams* co., Ohio.

Meigsville, town, *Morgan* co., Ohio, 70 SE. by E. from *Columbus*.—Village, *Randolph* co., Va., by post road 317 ms. NW. from *Chattanooga*.—Village, *Jackson* co., Tenn., by post road 84 ms. NE. by E. from *Nashville*.

Meillerie, village of the duchy of *Chablais*. It is seated on the S. side of the *Lake of Geneva*, in the recess of a small bay, at the foot of the *Alps*, and is a very interesting scene in the *Eloisa* of *Rosseau*.

Meinam, “the *Mother of Waters*,” great river of *Asia*, in *Siam*. This stream which is discharged by numerous mouths into the head of the *Ganges*, has a rather extensive delta, similar to that of the *Ganges*, *Nile*, and *Mississippi*, with regular annual inundations, beginning in *Sept.*, which abate in *December*, and early the ensuing year the river has retired to its lowest level. These phenomena prove a remote and mountainous origin, but the real source of the *Meinam* is yet undetermined with accuracy. “When we advert to the regular inundations, similar to those of the *Nile*, *Ganges*, which are rivers of long course, and other circumstances, we may infer that the *Meinam* has a more distant and higher origin, than the mountains of *Yunan*, in the W. of *China*; and that the *Teutian Alps* furnish its source, in that of *Nouveau* of the *Lamas*. *Keamper* says that the inhabitants on its banks suppose it to rise in the same mountains with the *Ganges*, and that it branches through *Cambodia* and *Pegu*—an account somewhat confirmed by the discovery of the river of *Amur*, which connects the *Meinam*, with the river of *Cambodia*.”—*Rees’ Cyclopædia*, art. *Meinam*.

Meinaw, island in the bay of the *Budme*, or middle *Lake of Constance*, one mile in circumference. It belongs to the *Knights of the Teutonic order*, and produces excellent wine, which was the chief revenue of the commander. It is 1 1/2 N. of *Constance*.

Meinder, ancient *Meander*, river of *Asia Minor*, having its sources in the *Phrygian mountains*. Its numerous branches unite near *Laocœa*, and form a stream of considerable magnitude, which, after a comparative western course of 100 ms., falls into the *Archipelago*, 20 ms. SE. from the island of *Samos*. The *Meinder* is the least river in the *Western part of Asia Minor*.

Meinder, *Little*, or *Kutchuck Meinder*, is the ancient *Caister*, and falls into the *Gulf of Nova* between *Samos* and the peninsula of *Asia*, near the ruins of *Ephesus*. Historic remains give lustre to this little stream, of not more than 50 ms. comparative course.

Meissen, or *Misnia*, margravate of Germany, Saxony, bounded on the N. by the duchy of Saxe, on the E. by Lusatia, on the S. by Bohemia, and on the W. by Thuringia. It is 100 m. in length, and 80 in breadth; and is a very fertile country, producing corn, wine, metals, and minerals that contribute to the pleasure of life. Capital of Dresden.

Meissen, considerable town in the electorate of Saxony proper, and in the margravate of Meissen, with a castle, and a famous manufacture of porcelain. It is seated on the Elbe, 10 ms. S. W. of Dresden, and 37 ESE. of Leipsick. Lon. 13 33 E., lat. 51 15 N.

Meljerda, ancient Bagrada, river of northern Africa, in the province of Tunis. It is the ancient Bagrada, and derived by Hodgson *Bugurda*, a name, Mouse river.

Melaena, now *Kara Bouroun*, cape of Asiatic Turkey, in Anatolia. The whole of that projected part of the continent of Asia which has been distinguished by the name of the peninsula of Paropamisadae is composed of two ranges of gigantic mountains, the first of which, running N.W. to the promontory of Melaena, is the mountain anciently called Corymbus; and the second, stretching westward from the continent, that formerly called Corycus. The mountainous tract is interspersed with thick forests, abounding with every description of game, and also with wild boars. The distance between the two ancient towns of Ceos and Clazomen within the gulf of Smyrna, comparatively low, fertile, and well cultivated. It is the same peninsula now called Chisme.

Chisme and *Myconnesus*.
Melazzo, ancient town of Natolia, on a bay of the Archipelago, 60 ms. S. of Smyrna. Lon. 25 5 E., lat. 37 28 N.

Melbourne, tp., Buckingham co., L. C., between Brompton and Durham, 50 ms. SE. from the Rivers.

Melk, small fortified town of Germany, in the province of Lower Austria. Here is a celebrated Benedictine abbey, seated on a hill, 47 ms. W. of Vienna. Lon. 15 20 E.; lat. 48 11 N.

Melcomb Regis, town of Eng., in Dorsetshire, distant from Weymouth as a port, as a corporation, and is a market town, but is a distinct borough. It is seated on the N. side of an arm of the sea, and is joined to Weymouth by a timber bridge, which has a drawbridge in the middle, to admit the passage of ships into the western part of the river. Melcomb has good streets and yards for the sale of handise, and is 127 ms. WSW. of London. See *Weymouth*.

Melida, town of Italy, in Romagna, 8 ms. SW. of Ravenna.

Meldert, town of the Netherlands, in Brabant, 15 ms. SE. of Lorraine.

Meldorf, town of Lower Saxony, in Holstein, near the mouth of the Myla, 22 ms. NNW. of Ruckstadt.

Mel Drum, town of Scotland, in Aberdeenshire, 15 ms. NNW. of Aberdeen.

Melfi, town of Naples, in Basilicata, with a castle, on a rock, 20 ms. NNW. of Acerenza.

Melgaza, town of Portugal, in Entre Douero e Tejo, with a strong castle, seated on the Minho, 15 ms. N. by E. of Braga.

Melida, island of Dalmatia, in the Gulf of Venice, and in the republic of Ragusa. It is 30 ms. in length, and abounds in oranges, citrons, wine, and fish. It has a Benedictine abbey, six villages, and several harbors.

Melilla, town of the kingdom of Fez on the coast of the Mediterranean. It was taken in 1496 by the Spaniards, who built a citadel; but it was restored to the Moors. It is 115 ms. NE. of Fez. Lon. 2 57 W., lat. 34 58 N.

Melinda, kingdom of Africa, on the coast of Zanguebar. It produces gold, slaves, elephants' teeth, ostriches' feathers, wax, aloes, senna, and other drugs; also plenty of rice, sugar, cocoa nuts, and other tropical fruits.

Melinda, capital of a kingdom of the same name on the E. of Zanguebar, and on the estuary of the Quilmancy river. It has a good harbor defended by a fort; but the entrance is dangerous, on account of the great number of shoals and rocks under water. The inhabitants are Christians and Negroes, which last have their own king and religion, and the number of both is said to amount to above 200,000. It is 470 ms. SW. of Magadoxo. Longitude 41 48 E., latitude 2 15 South.

Melipilla, town of Chili, in a jurisdiction of the same name, 200 ms. N. of Concepcion. Lon. 71 39 W., lat. 33 28 S.

Melita.—See *Malta*.

Melitto, town of Sicily, in Val di Noto, 8 ms. W. of Leoniti.

Melitopol, town of Russia, in the province of Tauris, situate on a lake, 12 ms. from the sea of Asoph, and 108 S. of Catharineslaf. Lon. 83 10 E., lat. 46 22 N.

Melksham, town of Eng., in Wiltshire, with a manufacture of broadcloths, 11 ms. E. of Bath, and 96 W. of London.

Melk, town of Westphalia, in the principality of Osnaburg, 15 ms. E. by S. of Osnaburg.

Meller.—See *Maler*.

Mellingen, town of Switzerland, in the bailiwick of Baden, which, before their late subjugation depended on the cantons of Zurich, and Bern. It is seated in a fertile country, on the river Reuss, 5 ms. S. by W. of Baden.

Melville, tp., Cumberland co., N. J. Pop. 1820, 1,010.

Melton Mowbray, town of Eng., in Leicestershire, 18 ms. NE. from Leicester, and on the small river Wreak, a branch of the Trent, and at the western termination of the Oakham canal.

Meltonsville, village, Anson co., N. C., 132 ms. SW. from Raleigh.

Memel, strong town of Eastern Prussia, with a castle. It has the finest harbor in the Baltic, and an extensive commerce. It is seated on the N. extremity of the Curische Haf, an inlet of the Baltic, 70 ms. in length, which is here joined to the sea by a narrow strait. On the NE. side of the entrance into the harbor is a light-house, erected in 1796. It is 76 ms. NNE. of Koningsberg, and 140 NE. of Dantzic. Lon. 21 40 E. lat., 55 46 N.

Memmingen, strong town of Suabia, near which the emigrants under the Prince of Conde were in August, 1795, defeated by the French republicans. It is seated in a fertile plain, 24 ms.

SE. of Ulm, and 35 SW. of Augsburg. Lon. 10 16 E., lat. 48 3 N.

Memphremagog, lake of N. America, situated partly in the State of Vermont and partly in Canada. It communicates with the river St. Lawrence by the river St. Francis.

Memphis, village, Shelby co., Tenn., on the Mississippi river. It is situated on the site of Old Fort Pickering, and at the mouth of Loosahatchie river.

Mena, a mine or fountain of pessaphalte, or mineral pitch, lying to the NE. of the Lake of Maracaibo.—*Brewster's Encyclopædia*, art. *Caraccas*, p. 231.

Menan, large river in the kingdom of Siam, which runs through it from N. to S., passes by the city of Siam, and falls into the Gulf of Siam below Bancoek. There are several singular fishes in it, besides crocodiles, which are common in these parts.

Menancabo, town in the island of Sumatra. It is the capital of a small kingdom of the same name, and seated on the S. coast, opposite the isle of Nassau, 250 ms. from the strait of Sunda.

Menat, town of Fr., in Auvergne, and in the late diocese of Clermont.

Mende, town of Fr., capital of the dep. of Lezere, and late province of Gervasidan. It is very populous; has manufactures of serges and other woolen stuffs; and is seated on the Lot, 35 ms. SW of Puy, and 210 S. by E. of Paris. Lon. 3 35 E., lat. 44 31 N.

Mendere, small river of Asiatic Turkey, in Anatolia, supposed to be the Scamander of Homer. It rises about 25 ms. S. by E. from the mouth of the Hellespont, and flows from the highest peaks of Ida. From the geography of the Iliad, the eastern branch of this stream ought to be the least, but is found far the most considerable. They unite, however, and are lost in the marshes of the Hellespont, near Koum Kale.

Mendham, town, Morris co., N. J., 7 ms. W. from Morristown. Pop. in 1820, 1,326.

Mendip Hills, mountainous tract of Eng., in the NE. of Somersetshire, famous for its coal, calamine, and lead; the latter said to be of a harder quality than that of other counties. Copper, manganese, bole, and red ochre, are also found in these hills. On their summits are large swampy flats, dangerous to cross.

Mendlesham, small town of Eng., in Suffolk, 18 ms. E. of Bury St. Edmunds, and 82 NE. of London. Lon. 1 12 E., lat. 52 24 N.

Mendocino Cape, cape of N. America, on the Pacific coast. Lon. W. C. 48° W., lat. 40 N.

Mendon, town, Worcester co., Mass., 37 ms. S. W. of Boston, and 12 N. of Providence, R. I. Pop. in 1810, 1,819; in 1820, 2,254.—Tp., Monroe co., N. Y., 12 ms. S. from Rochester. Pop. in 1820, 2,012.

Mendoza, city of Cordova, in the United Provinces of La Plata, at the foot of the Andes, on one of the sources of the Colorado, about 120 ms. SSE. from Santiago in Chili. Lon. W. C. 9 0 E., lat. 33 50 S.

Mendrah, province of the kingdom of Fezzan, with a town of the same name, 60 ms. S. of Mourzook. Although much of the land in this province is a continued level of hard and barren soil, the

quantity of trona, a species of fossil alkali that floats on the surface or settles on the banks of its numerous smoking lakes, has given it a higher importance than that of the most fertile districts.

Meneshould, St., ancient and considerable town of Fr., in the dep. of Marne, and late prov. of Champagne. St. Meneshould is 20 ms. of Chalons, and 110 E. of Paris. Lon. 4 59 E., lat. 2 0 N.

Menia.—See *Munia*.

Menin, strongly fortified town of the kingdom of the Netherlands, in Flanders, seated on the Scheldt. It is 8 ms. SE. of Ypres, and 10 N. of Lisle. Lon. 3 9 E., lat. 50 48 N.

Menomonie, river of Michigan, entering Georgian bay 50 ms. NNE. from Fort Brown. It is navigable for schooners to a considerable distance. Its entire comparative course, about 120 ms.

Mentor, town in Geauga co., Ohio, on the western shore of Lake Erie, W. from Grand river, and opposite Painesville.

Mentz, late archbishopric and electorate of the Palatinate, in the circle of Lower Rhine, bounded the N. by Hesse and Wetteravia, E. by France, S. by the palatinate of the Rhine, and W. by the electorate of Treves. It produces much corn, garden fruits, and abundance of excellent wine. In 1798, this archbishopric and electorate, then the first State of the empire, was moved to Ratisbon, and all other bishoprics were secularized.

Mentz, or *Mayence*, city of Germany, formerly the capital of the late electorate of Mentz, but now one of the four fortified cities of the German Confederation. It is commonly considered, though erroneously, a town of Hesse Darmstadt, because entered on the land side by that duchy. It is well fortified, and deemed to be a barrier fortress. The palace called Martinsburg, is a considerable building, partly ancient and partly modern; and on the opposite side the mouth of the Maine is a castle called Alzeidorita, with its fine gardens and water works. The university, founded in 1477, has lately received considerable improvements. Of the hospitals, that of St. Roch is worthy of notice for its printing-office and manufactures of stuffs and stockings. The city is built in an irregular manner, and plentifully provided with churches. In the cathedral, which is a gloomy fabric, is what they call a treasure, containing a number of clumsy jewels, some robes, and a rich wardrobe of sacerdotal vestments. Mentz is one of the towns which claim the invention of printing. The city of Mentz is now a fortress belonging to the Germanic confederation. It is seated on the Rhine, just below the influx of the Maine, and on the opposite side is the town of Cassel, connected with it by a bridge of boats. It is 22 ms. WSW. of Frankfort on the Maine, and 70 E. by N. of Treves. Lon. 8 10 E., lat. 50 58 N.

Mentz, tp. in Cayuga co., N. Y., on the western shore of the Cayuga canal. The village in Mentz is called Montezuma, 12 ms. NW. from Auburn.

Menuf, town of Egypt, situated in a well-cultivated country, near that branch of the Nile which flows to Rosetta, 40 ms. NNW. of Cairo.

Menzala, town of Egypt, situated near a lake of the same name, 60 ms. long, separated from the Mediterranean by a narrow slip of land. It is 20 ms. SSE. of Damietta, and 73 NNE. of Cairo. Lon. 32 2 E., lat. 31 3 N.

Mequinenza, town of Spain, in Arragon, at the confluence of the Segra with the Ebro, 58 ms. ESE. of Saragossa, and 180 ENE. of Madrid.

Mequinez, city of the kingdom of Fez, and a capital of the empire of Morocco. It is seated in a fertile plain, having a serene and clear air, for which reason the emperor resides in this place in preference to Fez. Mequinez is 58 ms. W. of Fez. Lon. 5 46 W., lat. 33 40 N.

Mercer, town of Fr., in the dep. of Loire and Cher, 15 s. NNW. of Blois.

Mercer, handsome trading town of Germany, in Tyrol, capital of Erschland, seated on the river, 12 ms. W. of Salisbury, and 100 W. by London. Lon. 2 25 W., lat. 51 6 N.

Mercer, village in Somerset co., Me., by post 94 ms. NNE. from Portland.

Mercer, co. of N. J., bounded NW by Hunterdon and Somerset, N. by Middlesex, SE. by Monmouth, S. by Burlington, and SW. by Delaware, separating it from Bucks co., Pa. Length 25 s., general breadth 12, and area about 200 sq. ms. Chief towns, Trenton and Princeton. Central lat. 40 18 N., lon. 2 10 E. of W. C. Pop. in 1820, 21,502.

This new county contains the towns or townships—

Amherst	-	-	-	5,109

Monmouth	-	-	-	4,035
Total				21,502

Mercer, co. of Pa., bounded by Trumbull co., W. by Crawford co., Pa., N. by Venango E., S. by Beaver S. Length 32 miles, breadth 26; area 830 sq. ms. This county is bounded by the Shenango and Neshanoc, branches of the Beaver. Surface moderately hilly, and soil productive in grain, meadow grass, and orchard crops. Staples, grain, flour, whiskey, &c. Chief town, Mercer, 57 ms. a little W. of N. from Pittsburg. Pop. in 1820, 11,681; and in 1840, 32,873. Central lat. 41 15 N., lon. W. C. 3 15 W.

Mercer, village, borough, and seat of justice for Mercer co., Pa., on the W. side of Neshanoc river, 57 ms. a little W. of N. from Pittsburg. Pop. in 1820, 506. Lat. 41 13 N., lon. W. C. 3 15 W.

Mercer, NW. tp. of Butler co., Pa., on the banks of Slippery Rock creek. Pop. in 1820, 641.

Mercer, co. of Ky., bounded by Lincoln SE., Boone S., Washington W., Franklin N., Kentucky river, or Woodford and Jessamine, NE., and Harlan, or Dick's river, E. Length 26 ms., mean breadth 14; area 350 sq. ms. Chief town, Harlan. Pop. in 1820, 15,587; and in 1840, 20,000. Central lat. 37 47 N., lon. W. C. 7 30 W.

Mercer, co. of Ohio, bounded W by Ia., N. by Belmont, E. by Allen and Shelby, and S. by Harrison. Length 25 ms., breadth 24; area 560 sq. ms. The surface of this county is generally level, and part marshy. An extensive inundated tract

in its centre gives source to the Wabash and Miami rivers. The soil, where sufficiently dry for agricultural purposes, is excellent. Pop. in 1840, 8,277. Central lat. 40 34 N., lon. W. C. 7 32 West.

Mercersburg, village in Franklin co., Pa., on the W. branch of Conococheague, 16 ms. SW. from Chambersburg.

Merdin, town of Turkey, in Diarbeck. The country about it produces cotton. It is 45 ms. SE. from Diarbekar. Lon. 39 59 E., lat. 36 50 N.

Merecz, town of Poland, in Lithuania, seated at the confluence of the Berezino and Merecz, 30 ms. N. of Grodno. Lon. 24 10 E., lat. 50 0 N.

Meredith, tp. in Strafford co., N. H. It is about 72 ms. NW. of Portsmouth. Pop. in 1820, 2,416.

—Village in Delaware co., N. Y., 8 ms. N. from Delhi. Pop. in 1820, 1,375.

Meredith Village, village in Strafford co., N. H., 35 ms. N. from Concord.

Mergui, seaport town of the Birman empire, on the Tannaserim river, 6 ms. above its mouth. Lon. 98 23 E., lat. 12 12 N.

Mergui Islands, a group lying off the western coast of Malacca; they extend from N. to S. about 140 ms. along the Malay coast, with a strait intervening of from 12 to 20 ms. wide.

Merida, town of Spain, in Estramadura, said to have been built by the Romans before the birth of Christ. Here are fine remains of antiquity, particularly a triumphal arch. It is seated in an extensive and fertile plain, 45 ms. S. by E. of Alcantara. Lon. 6 4 W., lat. 38 43 N.

Merida, formerly an intendency of Mexico, embracing the peninsula of Yucatan. By the recent political arrangements, the original name is restored, and Yucatan is now one of the States of the Mexican republic.—See *Yucatan*.—City of Mexico, in Yucatan, of which State it is the capital, about 70 ms. NE. from Campeachy. Pop. 10,000. Lat. 20 45 N., lon. W. C. 11 15 W.

Meriden, village in Cheshire co., N. H., 45 ms. from Concord.—Village in New Haven co., Ct., 17 ms. N. from New Haven.

MERIDIAN, from Latin, meridies, for medi dies, medius dies, middle of the day. Great circle of the sphere supposed to pass through the zenith and nadir, and, extending to the heavens, forms a circle having the centre of earth for its centre, and radii infinitely extended, and, of course, dividing the earth into two hemispheres.—See *Longitude*.

Meridiansville, village in Madison co., Ala., 8 ms. N. from Huntsville, and 75 a little W. of S. from Murfreesborough, Ten.

Meridien, village in Madison co., Mo.

Merion, Lower, tp. in Montgomery co. Pa., the lowest of the two tps. of that county, SW. from the Schuylkill. Its E. angle is 5 ms. above Philadelphia.

Merion, Upper, tp. in Montgomery co., Pa., above the preceding.

Merionethshire, co. of N. Wales, bounded on the N. by Caernarvonshire and Denbighshire, on the E. by the co. of Montgomery, on the S. by Cardiganshire, and on the W. by the Irish sea. It is 36 ms. long and 34 broad. The principal rivers are the Dee and Dovy, and it has a great mountain, the Cader Idris, one of the highest in Wales. The air is sharp, but the country feeds great herds

of cattle. Merionethshire contains 6 hundreds, 4 market towns, 37 parishes, and sends 1 member to Parliament. Harlech is the capital. Pop. in 1801, 29,506; in 1811, 30,924; and in 1821, 33,911.

Meritz, *Meritch*, or *Merrich*, an important fortress and city of the deccan of Hindoostan, situated near the N. bank of the river Kistna, 70 ms. SW. of Visiapour.

Meriwether, co. of Ga.

Merk, river of the Netherlands, which, running N. by Breda, afterwards turns W., and falls into the Maese opposite the island of Overflackee, in Holland.

Mermentau river, rises in the prairies of Opelousas, interlocking with the sources of the Calcasieu and Teche. The Mermentau is formed by the Nezpique, Cane, Plaquemine Brulé, and Queue Tortue. This stream may indeed be strictly called the river of Opelousas, as it drains the central parts of that district; and all the intermediate ground between the watercourses, except a very narrow strip of wood on their immediate banks, is prairie. The whole country watered by this river is flat, and totally without stone; not even a pebble is to be seen. The timber in the woods is oak, hickory, ash, sweet gum; in the swamps, cypress, and many other kinds of trees; pine is also found in more or less quantity on all the confluent Mermentau, but towards the NW. sources of the Nezpique this tree is found in great abundance; oak is, however, the principal timber. Below the junction of the Plaquemine Brulé, Cane, and Nezpique, live oak begins to appear, and towards the seacoast is found in considerable quantity, growing upon low ridges, which run parallel to, and appear to have been, at some past time, isles in the gulf. The tide rises in the Mermentau above the junction of Nezpique, Cane, and Plaquemine Brulé; however, when the waters of the Sabine, Calcasieu, and Mermentau, are swelled by rain, and the NW., N., or NE. winds prevail, no tide passes their respective outlets. The soil on Mermentau is generally sterile, though superior in fertility to that on the Calcasieu and Sabine.

Mermentau lake is in every respect similar to those of the Sabine and Calcasieu, except in point of extent, being considerably less extensive than either of the two latter. Mermentau lake is less destitute of timber along its border than the other lakes westward, though the greatest part of the extent in its vicinity is a grassy morass. The outlet from the lake to the sea is about one-fourth of a mile wide, very winding, and in many parts dilated into small lakes. A bar at the mouth prevents the entrance of vessels drawing more than four feet water.

Merom, town and seat of justice, Sullivan co., Ia.—See *Miriam*.

Mero, strong town of Asia, in the peninsula beyond the Ganges, and in the kingdom of Pegu, 140 ms. SW. of the town of Pegu. Lon. 98 36 E., lat. 16° N.

Merou, town of Persia, in Korasan, seated in fertile country, which produces salt, 112 ms. SW. of Bockhara. Lon. 64 25 E., lat. 37 40 N.

Merrimack, river of the U. S., which rises in Grafton co., N. H., and, after running in a SE. direction through the State, enters Mass., near Dunstable. It then makes a sudden turn to the

NE., and empties into the Atlantic ocean at Newburyport. Its course is very crooked, and navigation interrupted by frequent falls and rapids. The Merrimack basin is about 130 m length, with a mean width of 36, and embraces an area of 4,350 sq. ms. The navigation of this stream has been more improved by art than any stream of the U. S. Newburyport stands on the S. side of the bay, at its mouth; vessels of tons ascend to Haverhill, 12 ms. to the head of tide water. From Haverhill to Concord the navigation of the Merrimack is artificially improved. The Middlesex canal was cut from Boston to the banks of the Merrimack, at the falls of Chelmsford. The great feeder of this canal is the Concord river, flowing N. out of Mass., and discharging into the valley of the Merrimack, below Chelmsford. The canal commences above Patucket falls. It is carried over and on the level of Concord river 11 and thence down the sloping intervening ground to Boston harbor. The whole length of this canal is 29½ ms., an entire fall of 1,007 feet, and is divided into 13 locks. The canal is 24 feet wide, with a depth of four feet. The locks are 90 feet by 12 feet, of excellent masonry. Another fall has been raised around Patucket falls, in order to connect the Merrimack with the Middlesex canal. The Middlesex canal does not reach tide water, but below the falls the stream is, though rapid, is navigable, and in 45 ms. falls 100 feet, and reaches the tide at Haverhill. Above the outlet of the Middlesex canal are three other outlets, at several places. The Bow canal cuts off first below Concord; is followed 6 ms. still lower down by Hookset canal; Amoskeag canal cuts off made 8 ms. below Hookset; and in 9 ms. still lower the latter six short cuts have been made round the river, many rapids or falls. Cromwell's falls have been passed by a canal 14 ms. below Amoskeag, and 15 ms. still lower is the Wicase canal. See *Massachusetts* and *New Hampshire*.

Merrimack, co. of N. H., formed recently from the tps. adjacent to and including the State of Vermont, Concord. For central lat., see *Concord*.—*Tip*, of Hillsborough co., N. H.—River of Pa., rises in Franklin co., flows NE. through Philadelphia, and, separating Jefferson from St. Louis, falls into the Mississippi, 5 ms. below the town of St. Louis.—River of Mo.—See *Maramba*.

Merrittstown, village, Fayette co., Pa., on Lap's creek, 5 ms. S. from Brownsville.

Merrittsville, village, Greenville district, S. C., 120 ms. NW. from Columbus.

Merryhill, post office, Bertie co., N. C., 120 ms. NNE. from Raleigh.

Merrymeeting Bay, junction of the Kennebec and Androscoggin rivers, in Maine.

Mersburg, town of the circle of Saxon in Misnia. It has a Lutheran bishopric, and is situated on the Sala, 10 ms. S. of Halle, and 56 ms. of Dresden. Lon. 12 6 E., lat. 51 28 N. It now gives name to a government of Prussia.

Mersea, town of Essex co., U. C., on the River.

Mersey, river of Eng., which rises in the north extremity of the peak in Derbyshire, passes by Warrington, and receives the Weaver at F

where it forms a broad estuary below Liverpool, and enters the Irish sea. This river not only feeds salmon, but is visited by annual shoals of sturgeon, here called sparlings, of a remarkable size and flavor. It is connected by the Staffordshire Canal with the Trent, and in course with the Irish Sea and the German ocean.

Mersey Island, island of Eng., in Essex, between the mouth of the Coln and the entrance of the Mersey water bay. It has two parishes called East Mersey and West Mersey.

Mersburg, town of Germany, in the circle of Westphalia, and bishopric of Constance, seated on the eastern side of the lake of Constance. It is the bishop's usual place of residence, and is 11 ms. from the town of that name. Lon. 9 26 E., lat. 47 45 N.

Mertola, strong town of Portugal, in Alentejo, seated near the Gaudiana, 60 ms. S. of Evora, and 100 SE. of Lisbon. Lon. 7 40 W., lat. 37 41 N.

Merton, village of Eng., near Oxford, situated between two military ways. There were entrenchments in the neighboring woods, supposed to have been thrown up by King Ethelred, or the Danes, which he defeated in 871.—Village of Eng., in the county of Surrey, seated on the Wandel, 7 ms. SW. of London. Nothing remains of its once famous abbey but the east window of a chapel; and the walls which surrounded the premises, which are built of brick, are nearly entire, and include about 60 acres. On the site of this abbey are two calico manufactories and a copper mill; and about 1,000 persons are now employed on a spot once the abode of monastic indolence. Merton is 7 ms. SW. of London.

Meuse, the N. branch of the river Maese, on which stands the city of Rotterdam, in Holland, is seated.

Meuseville, town of Fr., in the dep. of the North, in the late province of French Flanders, seated on the Meuse, 10 ms. SE. of Cassel. Lon. 2 43 E., lat. 50 57 N.

Meru, or **Moorghab**, river rising in the Hindoo mountains, between Balkh and Caubool, and flowing thence northwardly by comparative distance about three hundred ms., is lost in a lake, which does not, as appears represented on some maps, unite with the Jihon. By a mistake of the cartographers, it is made on some other maps the same as the Tedjen, and carried into the Caspian. The Tedjen, according to Mr. Burnes, is a mere stream, and is lost in the sands. "This is not," says that author, "the Herat river, nor is it the same as, for no such great river as appears in our maps has existence"—in this region, he ought to have added.—See **Meru**.

Mesched Ali, one of the sacred places of the Mohammedan sect of Ali, situated on the borders of the Great Desert, about 100 ms. a little W. of S. of Bagdad, and 40 a little E. of S. of Mesed Hadramout. Here Ali, the son-in-law of Mohammed, was slain in battle.

MESMIA, a prefix to many names of places in Eastern Asia, and means literally "The Tomb." **METEOR**, from *metēros*, Greek, high, elevated, signifies, literally, a body which seems to raise itself in the air, from which come meteorology and its cognates.

METROD, from Greek, *meta*, by, and *hodos*, way, or road, and means the manner to arrive at an

end by the most suitable route. Though a common word, it is also a most comprehensive scientific term, and used to distinguish the two great processes of reason—*analysis*, advancing from simple elements to reach unknown truth, and *synthesis*, demonstrating a known truth. In the various sciences, *method* expresses the different classifications adopted by the higher classes of authors.

METRE, French measure of length, founded on measurements made of the meridian, and from supposing this new standard to be the one ten-millionth of the distance from the equator to the poles of the earth. The metre being 3.2809167 English feet, if multiplied by 10,000,000, gives the quadrant of the earth along its meridians 32,809,167 English feet, equal to 6213.8 ms.—See the article **Earth**.

METROPOLIS, from Greek, *meter*, mother, and *polis*, a city—mother city. Originally, this term meant a city from which colonies issued. It was afterwards adopted by the Romans for the principal city of a province. When the Christian Religion became dominant, and the ecclesiastical government was regulated by the civil, the higher episcopal seats, being fixed in the metropolitan cities, took title accordingly, and were henceforth called metropolitan churches.

Meuse, or **Maese**, river of Europe, having its remote sources in the Vosges mountains, and in the Fr. depts. of Upper Marne and Vosges, interlocking with those of the rivers Marne and Moselle, and, flowing thence a little W. of N. 150 ms., over the Fr. depts. of Upper Marne, Meuse, and Ardennes, enters Belgium at or near Charlemont, in the district of Namur, and continuing its northern course to the town of Namur, where it receives the Sambre from the west. In this upper course of about 200 ms., the Meuse passes Commercy, Verdun, and Mezières, in France. Below its junction with the Sambre, the Meuse turns to NE. 30 ms., passes Liège, and thence inclining to NNE. passes Maestricht, Stephenswerd, and Venlo, to Lottum, in the province of Limbourg, and reaches to within 20 ms. of the Rhine. Below Lottum, the two rivers preserve a mean distance from each other of about 15 ms., and gradually curve to the NNW., and finally W., in a distance of 60 ms., to Hensden, on the Meuse and Vic, by Daerstede, on the Rhine. Below the latter, the name of the Rhine is lost in that of Leck, which inclining towards the Maese, both streams are lost in a maze of channels; but one, entering the German ocean between Briel and Rotterdam, is regarded their common mouth, under the name of Meuse. The entire length of this river is about 400 English ms. It is navigable before leaving France, and affords commercial facilities to a very dense population. The Meuse basin lies between N. lat. 48 and 52°.

Meuse, dep. of Fr., including the late duchy of Bar. It takes its name from the river Meuse, or Maese, which, in a NNW. course, traverses the dep. in its greatest length. Bar-le-Duc is the capital.

Mewari, considerable town of Japan, in the island of Niphon, with a royal palace, where the king sometimes resides. It is seated on a hill, at the foot of which are vast fields of wheat and rice, with fine orchards, full of excellent plums.

Mewat, hilly and woody tract of Hindoostan proper, lying on the SW. of Delhi, and on the W. of Agra, confining the low country, along the west bank of the Jumna, to a comparatively narrow slip, and extending westward about 130 miles in length. From north to south it is 90 miles.

Mexico, republic of, an immense region of N. America.

The country out of which this republic has been formed is peculiar as respects the features of its geography. It extends from lat. 15 50 to 42° N., the intermediate space embracing every variety of soil, from the most recent alluvion to mountain valleys, or rather plains, of near 8,000 feet above the contiguous oceans. These elevated plains are again broken and decorated by colossal summits, rising from 12,000 to upwards of 17,000 feet.

In one of those aerial valleys stands the city of Mexico, 7,400 feet above the level of the Gulf of Mexico. From this difference of elevation, and from embracing such an extensive range within and without the tropics, Mexico may be considered as possessing every climate of the earth, and capable of producing every vegetable necessary to the wants or the luxuries of human life. Its metallic wealth is no less abundant than its vegetables. From its bowels are extracted many of the most useful and all the precious metals.

Mexico is perhaps better calculated than any other part of the earth to form a political community capable of producing within its own limits all that the necessities, the arts, or elegancies of society, can demand.

As a viceroyalty of Spain, Mexico was subdivided into the following intendancies:

TABLE No. 1.

Intendancies.	Sq. ms.	Pop.	To sq. m.
Merida or Yucatan	45,000	466,000	10
Vera Cruz	32,000	156,000	5
Oaxaca	34,000	535,000	13 3/4
Puebla	21,000	813,000	33 3/4
Mexico	45,400	1,512,000	33 1/3
Valladolid	26,400	376,000	14
Guadalaxara	74,000	630,000	8 1/2
Guanaxuato	6,900	517,000	74
Zacatecas	18,000	153,000	8 1/2
San Louis Potosi	263,000	335,000	1 1/3
Durango	130,000	160,000	1 2/10
Sonora	147,000	122,000	8/10
New Mexico	44,000	40,000	9/10
Old California	56,000	10,000	17/100
New California	16,000	16,000	1
Total amount	960,000	5,841,000	6

The above table was constructed from the data afforded by Humboldt, in his Political Essay on New Spain, Black's Translation, vol. ii, rejecting fractions. There is some confusion and contradiction in the statements of this author, which diminish their authority; but we may suppose that, in the aggregate, he was nearly correct. Humboldt's estimate is for 1803, or 22 years past. If the ratio of increase given by this author is adopted, Mexico must now contain 8,481,000 inhabitants. If we compare the two countries of the U. S. and Mexico, and allow for the former the advantage of better political institutions, and to the latter superior mildness of climate, we may reasonably con-

cede that their respective rates of increase will be very widely different. In the middle of 1800 the population of the U. S. did not materially differ from 6,000,000; now, August, 1820 amounts, it is probable, to very nearly 11,000,000, but with a small excess above that number. Therefore, if we compare the two masses together, a simple statement of the rules of proportion, might now to possess upwards of 10,700,000 inhabitants; and, making every allowance for ravages of war, it is evident that, if the basis of calculation given by Humboldt is admitted, Mexico must now contain at least eight and a half millions of inhabitants.

TABLE No. 2.

Spanish provincial subdivisions.	Recent divisions into States and territories.	Area in sq. ms.	Pop.
Mexico	Mexico	30,432	1,500,000
Puebla	Queretaro	13,452	700,000
	Puebla de los Angeles	18,441	1,200,000
Guanaxuato	Guanaxuato	6,255	600,000
Valladolid	Mechoacan	24,166	900,000
Guadalaxara	Jalisco	72,389	900,000
Zacatecas	Zacatecas	17,589	800,000
Oaxaca	Oaxaca	32,687	800,000
Yucatan	Yucatan	79,534	800,000
Tabasco	Tabasco	14,676	500,000
Chiapa	Chiapa	18,750	300,000
Vera Cruz	Vera Cruz	27,660	1,400,000
San Louis Potosi	San Louis Potosi	19,017	1,500,000
Interior of the E.	Coahuila y Texas	348,559	2,000,000
	Tauimalipas		
	New Leon		
Interior of the N.	Durango	269,077	2,000,000
	Chihuahua		
Interior of the W.	New Mexico ter.	254,705	1,300,000
	Sonora y Cinaloa		
Old California	California, Lower territory.	57,021	300,000
New California	California, Upper territory.	376,344	300,000
Total amount	-	1,670,535	8,500,000

It may be observed, that in this table (No. 2) are included the three small territories of Coahuila, in Jalisco; Tlascala, in Puebla; and New Mexico, or rather Santa Fe, of New Mexico. Table 1 expresses the area actually peopled, but No. 2 embraces the entire superficies of the Mexican republic. No. 2 is taken in great part from Tancred Borel's map, and exhibits, if correct, how nearly accurate were the estimates appended to No. 1, as respects the progressive population of this country.

The following document is inserted, as we may regard it as the most recent and authentic in respect to what the Government of Mexico regards as the provincial divisions of that country.

The *Diario del Gobierno* of the 10th contains a manifesto of the provisional Supreme Executive (Santa Anna) to the nation, accompanied by a decree for the election of delegates to the Congress which is to convene in the city of Mexico on the 1st of June next. The ratio of representation is one delegate for every 70,000 souls, as probably to the census prepared by the National Institute of Geography and Statistics, as follows:

Departments.	Population.
Mexico	1,388,200
Jalisco	679,111
Puebla	661,122

Departments.	Population.
Yucatan	580,948
Chiapas	513,606
Oaxaca	500,278
Veracruz	497,906
San Luis Potosi	321,840
Texas	273,575
Veracruz	254,380
Guerrero	162,618
Quintana Roo	147,600
Veracruz	147,000
Veracruz	141,206
Veracruz	124,000
Veracruz	120,560
Veracruz	101,108
Veracruz	100,068
Veracruz	75,340
Veracruz	69,693
Veracruz	63,580
Veracruz	57,026
Veracruz	33,439
Veracruz	27,800

7,044,140

about one-half the extent and population of Mexico is within the great river system of the Gulf of Mexico. It is in vain to attempt any specification of the Mexican population, as our data is too meagre to admit decisive estimates. One circumstance is too striking, however, to be omitted. Mexico has no slaves worth notice in a general statistical survey; that class of its population not amounting, at the utmost, to more than 10,000; and only 1 to 584 of the entire body of the people. The civilized Indians form more than two-fifths of the whole, and are the laboring, productive, and industrious, though not the ruling people.

The uncivilized regions of the earth are less known in Mexico. The following account of the manufactures of Mexico is an extract from an English author, and deserves very serious attention.

The two first of the Mexican manufactures are that of cotton and wool, which are established on a very large scale in the cities of Queretaro, Mexico, and St. Michael, in the immediate neighborhood of Mexico. The country itself furnishes cotton and wool in great abundance, it being a common remark of English writers that no part of America produces the ordinary and staple wool of manufactures.

This wool is as easily raised in Mexico as in Lancashire or Lanarkshire. We are now transcribing from a French author who visited Queretaro, Manchester of Mexico, sixteen years ago. "I visited Queretaro," he adds, "with the greatest interest that I might inform myself of the extent of the wool and cotton manufactures, and I am enabled to say that, except the principal towns of Lancashire and England, Queretaro is a manufacturing town of the first rate and magnitude. The manufactures at this period (1803) were divided into factories and workshops, in the latter of which the workmen worked at home at the cost of their masters. There were cotton factories as large as the cotton factories in France, and more than 300 workshops. They had worked up that year about 10 millions worth (in dollars) of woollen cloths, serges, and cotton stuffs."

The next fabric is that of leather, chiefly in tanned which is carried to great perfection. It is

unnecessary to add that the vast plains afford hides in abundance, and that the bark is equally plentiful. The Mexicans thus produce all the leather for their own consumption, and under general commerce might export much.

The linen and silk factories have not as yet attained to any extent, but from no other reason than because Spain, whilst they were dependent upon her, discouraged all linen fabrics, and clandestinely destroyed a most flourishing silk growth. Will it be credited by the people in England, that about forty years ago silk was nearly as plentiful in Mexico as in Asia and Italy; but that the Mexicans, on rising one morning, found all the mulberry trees in the empire cut down, and of course the silk universally destroyed? It seems that the Cadiz merchants, finding their commerce affected, had procured this secret order of the viceroy, who had contrived to execute it with the same secrecy. The history of the world does not furnish a more atrocious example of the true spirit of monopoly.

The manufactory next in order is that of tobacco, which is made into cigars, and in part supplies all Europe. This produce is very great, amounting to nearly \$10,000,000 annually. An article of the first importance, when we consider the quantity consumed in England, and for the supply of which we now depend upon the Americans.

The next manufacture is that of gunpowder, which is equally as considerable as that of tobacco, and which, by the way, proves the nugatory nature of the recent proclamations in Europe against supplying the Independents with stores of war. Gunpowder is as plentiful in Mexico as in England; and all America may hereafter be supplied from that quarter.

Soap and soda are the manufactures next in order, both as to quantity and value; soda being particularly abundant, and so cheaply raised and worked as to become an article of vast future export. This soda very far exceeds in quality any that can be procured from any other quarter, and the French chemists and dyers most sanguinely anticipate that Europe may hereafter draw nearly the whole of her soda from S. America, as she imports her potash from the U. S. Oil, tallow, spermaceti, honey, and wax, abound likewise in every intendency, and must greatly add to the future value of this immense empire to the general commerce of Europe. "In no part of the world," says the French author from whom we are translating, "is there such a variety and abundance of every thing necessary to every want of man as in this kingdom of Mexico; in no country is every thing raised so cheaply."

Besides the manufactures above enumerated, every town almost through this vast empire has its own manufacture, and particularly the large towns in the immediate vicinity of the capital. We have before had occasion to say that the country is in shape like a hat—the high main and table land of Mexico being the crown, and the narrow line of the coast being the rim. In the middle of this crown, or table land, is the city of Mexico, half way, or 300 ms. from Vera Cruz, the Atlantic port, and the same distance from Acapulco, the chief port of the Mexican empire on the Pacific ocean.

The country, as we have before said, is divided into fifteen intendancies, each of which has a sub-

ordinate governor and a bishop's see and cathedral of its own. In all these great cities are seated some manufacture peculiar to the places; some of them are celebrated for their pottery, some for their hats, some for their works in jewelry. Indeed, in this latter work the Mexicans so particularly excel as to rival any manufactory in Europe, not even excepting the establishments in Switzerland and the workmen of the Palais Royale.

In these interesting particulars the reader, we doubt not, will be strongly impressed with the same conclusion with ourselves; namely, how infinitely various and important is the produce, and must be the future exports, of Spanish America, in comparison with those of the U. States; and thence, by a necessary consequence, what a formidable rival the former will be to the latter. And let it not escape our attention, that in the rivalry Great Britain must be the gainer, as her magazine and market are proportionably extended.

See the different States, under their respective heads.

From its position, Mexico has a natural connexion with Asia, Europe, and with every part of North and South America. It is rather deficient in both oceans in good harbors, and, from the elevation of the interior country, it can never derive much benefit from the few rivers which flow from its mountain valleys. The interior and transport commerce is carried on with mules of burden. Goods to the value of upwards of \$18,000,000 are thus annually transported from the Atlantic coast over the interior table land, whilst the flour, hides, and metals, descend from the central table land to Vera Cruz.

Humboldt has shown, that through the city of Mexico, if a canal was otherwise practicable, it would demand from 330 to 340 locks to unite the two oceans, and concludes rationally that land carriage is alone practicable, for useful commercial purposes, between that great city and the opposite oceans. The following condensed view of the rivers of the Mexican empire flowing into the Mexican gulf will close this article.

The following are the principal rivers of Mexico, which are discharged into the gulf of Mexico. No stream of any consequence exists on the western coast of Yucatan; and it is only when reaching the influence of the mountains of Guatemala and Mexico that rivers of much magnitude are found flowing from the interior country.

The Sumasinta is discharged into the bay or gulf Terminos, which is, indeed, rather an estuary of a number of rivers, than a mere bay.

The St. Pedro falls into the bay of Campeachy to the W. of the Sumasinta. Both of these streams rise in the mountainous table land of Guatemala, and are of considerable magnitude; but the interior country, or even the coast, is very imperfectly known.

The Guassacualco is a short but very important stream, falling into the gulf of Mexico at its extreme southern extension. This stream rises in Oaxaca, interlocking with the source of the Chimalapa, within 50 direct miles from its mouth. This is one of the channels of communication mentioned by Humboldt as suitable to unite the waters of the two American oceans. The entire distance from the gulf of Mexico to the Pacific ocean, by the valleys of the two rivers Chimalapa and Guassacualco,

does not exceed 120 miles; but the nature of intermediate country is too little known to the formation of any rational conclusion upon practicability of an artificial connexion of the courses of these rivers.

The Alvarado follows the Guassacualco, like the Sumasinta, is poured into a spacious the recipient of many streams precipitated from high table land of Oaxaca. The Alvarado locks with the sources of the Chicometepec both roll down steeps forming an entire descent upwards of 7,000 feet. We are now arrived to the extensive mountain plains of Anahuac, though within the tropics, in a very temperate climate. The elevations are, however, such as preclude not only much natural, but extensive improvements of the artificial navigation by rivers into the interior. In summer the rivers are exhausted by evaporation, and in winter swollen to torrents. The main spine of the chain of mountains, also approaching so much nearer to the Pacific of Mexico than to the Pacific ocean, renders the rivers in this region much more abridged in length, which enter the former, than those which enter the latter recipient.

The Rio Blanco, the northwestern branch of the Alvarado, rises at the base of the enormous volcanic summit of Orizaba, the Citlaltepalcates Aztecas. It is, I believe, from the Rio Blanco that the immense quantities of pumice stone, which are tered along the shores of the Mexican gulf, are floated. I have seen this substance in great abundance upon the coasts of Louisiana and Texas.

From the Alvarado to the bay of Tampico, a distance of 300 miles, not one deep indenture of the coast, except Tamiagua, exists. The coast of Vera Cruz intervenes, but that entrepot of Mexican commerce and rendezvous of the Spanish navy is built upon a low sandy beach, without either a harbor or fresh water. The coast, indeed, entirely round the gulf of Mexico, with very particular exceptions, is low, sandy, or marshy, and in most places very unhealthy in summer and autumn.

The mouth of the Tampico bay is at N. 122° 20' W., lon. W. C. 21 15'. The Tampico receives the united waters of the Rio Altamira from the dependency of San Louis Potosi and the Toluca or Moctezuema, from the valley of Tenochtitlan, which the city of Mexico is situated. The Toluca is it called in the higher part of its course, and the Moctezuema, is in many respects one of the most remarkable streams of the earth. The valley of Tenochtitlan, from which it flows, cannot be represented than by a saucer turned bottom upwards; the rim representing the spines of the mountains, out of the intervening valley of which it flows. This valley, known by its Aztec name of Tenochtitlan, comprises about 1,700 square miles, of which one-tenth part is covered by lakes in its natural state, only one narrow brook, between very high and precipitous banks, issued from this extraordinary valley, and carried its waters into the Gulf of Mexico.

There are, beside some smaller, five principal lakes—Zumpango, San Christobal, Chalco, Chichimilco, and Tezucuo. They do not lie upon the same level; Zumpango is nearly 30 English feet above that of Tezucuo, and Xochimilco forms a meadow between the two former.

The higher lakes are composed of fresh water, the lowest, that of Tezcuco, is salt. Their proportions and extent, as given by Humboldt, by which they were surveyed, are Xochimilco and Xico, 50 sq. ms., the lake of Tezcuco 80 sq. San Christobal 28, and Zumpango 10 sq. ms. These lakes are supplied by a few small rivers innumerable torrents poured down from the adjacent mountain slopes. The Tezcuco receives rivers of Papolotla, Tezcuco, Teotihuacan, Tepoyacac, (Guadaloupe;) and the Zumpango supplied by the streams of the Pachuca and Otlan; the latter is the largest river of the Mexican valley.

It may be noted as a curious fact that the two of the great river system of the Atlantic, in America, which occupy the extremes of elevation—New Orleans and Mexico—are both subject to partial inundation, and both stand indebted to artificial defence for preservation against the encroachments of water. Mexico stands 7,468 feet above New Orleans, and is, nevertheless, of the cities, most liable to submersion.

Ordinary seasons the quantity of rain which falls at Mexico, according to Humboldt, is nearly equal in perpendicular depth. This enormous quantity of fluid falls also in a short period of time, before any other outlet existed, except the intricate channel of the brook (arroyo) Tequisquiapan; the lower part of this elevated basin was liable to complete submersion.

The Aztec annals have noticed many instances of these destructive inundations, and some remains are shown of very extensive works erected during the existence of the Aztec monarchy, to prevent their effects. One of the Aztec kings, Ahuizotl, lost his life in attempting to escape a flood of water he had himself contributed to the augmentation by some injudicious embankments raised up to prevent such a catastrophe.

Aside many of lesser magnitude, the Spanish historians mention 5 ruinous floods, which intervened in a little more than a century after the conquest of Mexico by Cortes. The first in 1583, during the viceroyalty of Don Louis de Velasco the second in 1580, during the viceroyalty of Martin Enriquez de Alamanza; the third in 1604, under the viceroy Montesclaros; the fourth in 1607, under the viceroy Don Louis Velasco the second; and, fifthly, in 1629, whilst the Marquis de Cerralvo was viceroy.

The peculiar structure of the valley, and such frequent accidents aroused the attention of the Spaniards, and, as early as 1580, galleries or canals for the evacuation were suggested, in order to carry the waters through the gorges of the mountains near Nochistongo into the Tula; but no execution of that kind was effected until 1607, when the viceroy, the Marquis Salinas, employed the engineer, Enrico Martinez, supposed to be a German, to make, in conjunction with some mathematicians, an exact survey of the valley. This survey led to the commencement of the only stupendous hydraulic work, the Desague (Desagüe) of Huehuetoca.

Like all great national undertakings, the administration of the Desague was slow and interrupted. It was commenced on the 28th of November, 1607, by the hand of the viceroy, in the presence

of the Audiencia. It was in the first instance only a deep gallery, upwards of 4 ms. in length, nearly 14 feet in depth, and 11½ feet wide. The water first entered it on the 17th of September, 1608, in less than 10 months from the original undertaking. Could we abstract our minds from the melancholy fact that this stupendous execution was effected by the forced labor of the Indians, we must admire a work which, even now in the most populous nations, could not be considered other than extraordinary. Our admiration is enhanced also by the additional labor performed in the same time to carry the waters from the northern opening of the Desague to the Rio Tula. A dike, upwards of 5 ms. in length, was cut to effect the latter object, and led the superabundant waters of the valley of Tenochtitlan towards the Gulf of Mexico.

A regular and detailed history of this singular work is given by Humboldt, in his description of the Intendency of Mexico, and forms one of the most instructive parts of his Political Essay on New Spain. From this account we find that the Desague, though still unfinished, has eventuated in an enormous open cut (tajo abierto) through the mountains. "The Desague," says Humboldt, "in its actual state, is undoubtedly one of the most gigantic hydraulic operations ever executed by man (from 262 to 328 feet wide, and from 161 to 196 feet deep.) We look upon it with a species of admiration, particularly when we consider the nature of the ground, and the enormous length, breadth, and depth of the aperture. If this cut was filled water 10 metres, (32.8 English feet,) the largest vessels of war could pass through the range of mountains which bound the plain of Mexico to the NE."

From its commencement within the valley to its discharge, (salto,) the Desague is 67,535 feet (12.8 ms.) in length, and in one point 196 feet deep, with a mean width at the top of about 320 feet. The head of the Desague, in the channel of the Rio Guatilan, is 10½ varas, or 29½ feet above, and below the Salto del Rio, or discharge, it is 107½ varas, or 295 feet below the level of the lake of Tezcuco, having an entire fall of 324½ feet. The expense, at various periods, nearly \$6,000,000. Those who wish information more in detail than is in my power to give in this place upon the topography of this remarkable region, will do well to read the third book of the Political Essay. The reading of this valuable document will explain the cause of the unnavigable nature of the Mexican rivers.

The Altamira, or northern branch of the river of Tampico, rises on the arid elevated plains of Zacatecas and of San Louis Potosi more than 2° of lat. N. of the valley of Tenochtitlan. Near the sources of the latter river commences the N. American desert.—See *Coahuila y Texas Xacatecas*.

At the bar of Tamigua, 50 or 60 ms. SE. from the mouth of the Tampico river, commences a range of long sandy islands, which extend parallel to the continent as far as the mouth of the Trinity. The general range of the coast from the Guasacualco to the Tampico, distant from each other upwards of 400 ms., is from SE. to NW.; but at the latter place turns to nearly N., and maintained that direction through nearly 7° of lat., or between 400 and 500 ms.

Having the parched surface of Zacatecas in the rear, the space of 250 ms. from the Tampico to Rio Grande, affords no rivers of any particular consequence. St. Ander and San Fernando are two mountain streams, which rise in Zacatecas and New Biscay, and flowing eastward carry comparatively little water into the Gulf of Mexico. The different structure of the two countries may be conceived from the fact that those two rivers have as great a length of course as have most of those of the Atlantic slope of the U. S., and yet the former hardly can be said to have mouths.

At N. lat. 25 55, W. lon. W. C. 20 30, the Rio Grande del Norte falls into the Gulf of Mexico. This is the first great river flowing from the Mexican interior provinces into the Gulf of Mexico. The Rio Grande, according to most of our maps of that part of America, rises at N. lat. 41 30, lon. 34° W. from W. C.; its mouth, as determined by Humboldt, is at N. lat. 25 55, W. lon. of Paris 99 51; it flows through more than 15° of lat. and 13 30 of lon., having a comparative course of upwards of 1,400 ms., with a general course of nearly SE.

The extent of surface drained by this river, or the quantity of water it yields at its mouth, bears very inadequate proportion to its great length, which, on a comparative scale, would be only exceeded in N. America by the Missouri and Lower Mississippi, united by the St. Lawrence, Saskatchewan, and Unjiga; it exceeds the length of both the Colorado and Columbia, though it is probable that either of the two latter streams carries to its respective recipient more than ten times the mass of water discharged by the Rio Grande. From its source, N. lat. 41 30, to the mouth of its first considerable branch, the Rio Conchos, from New Biscay, N. lat. 30 20, or above 10° of lat., it flows in a very narrow valley, not averaging 100 ms. wide. Below the mouth of the Conchos the river gradually turns to the E. and NE.; here the basin is the widest, being from NE. to SW. above 400 ms. Within this sweep the largest tributary of the Rio Grande, the Rio Puerco, enters from the N., and some distance below its junction, the main stream again resumes its SE. course, which it pursues to its final discharge into the Gulf of Mexico. The Rio Grande drains an area of about 150,000 sq. ms.

As we are now approaching the U. S., and as the phenomena of the climate of the regions watered by the Rio Grande, are necessary elements to determine many problems in the meteorological analysis of the seasons of the former, I here beg leave to quote the observations of Humboldt upon this river and the country it drains.

"It is sufficiently remarkable," says that author, "to see that, after the lapse of two centuries of colonization, the province of N. Mexico does not yet join the intendency of New Biscay. The two provinces are separated by a desert. This desert extends from the Passo del Norte towards the town of Albuquerque, N. lat. 35 40. Before 1680, in which year there was a general revolt among the Indians of New Mexico, this extent of uncultivated and uninhabited country was much less considerable than it is now. There were then three villages, San Pascual, Semillette, and Socorro, which were situated between the marsh of Mu-

erto and the town of Santa Fe. Bishop Tamarit perceived their ruins in 1760, and he found cots growing wild in the fields—an indication of former cultivation of the country.

"The desert of the Muerto is a plain 30 leagues (near 90 ms.) in length, destitute of water. The whole of this country is, in general, of an alarming degree of aridity, for the mountains *de los Matamoros*, situated to the E. of the road from Durango to Santa Fe, do not give rise to a single brook. Notwithstanding the mildness of the climate and the progress of industry, a great part of this country well as Old California, and several districts of Biscay, and of the intendency of Guadalupe, will never admit of any considerable population.

"New Mexico, though under the same latitude with Syria and Central Persia, has a remarkably cold climate. It freezes there in the middle of the year. Near Santa Fe, and a little further N., under the parallel of the Morea, the Rio del Norte is sometimes covered, for a succession of several years, with ice thick enough to admit the passage of horses and carriages. We are ignorant of the nature of the soil of the province of New Mexico, but I do not believe that, under the 37° of latitude, the bed of the river is more than 700 or 800 feet (2,296 or 2,624 feet) of elevation above the elevation of the ocean. The mountains which bound the valley of the Rio del Norte, and even those at the foot of which the village of Taos is situated, lose their snow towards the beginning of July.

"The great river of the North rises in the Sierra Verde, which is the point of separation between the streams which flow into the Gulf of Mexico and those which flow into the South Sea. It has its periodical rises like the Orinoco, the Mississippi, and a great number of rivers of both continents. The waters of the Rio del Norte begin to swell in the month of April; they are at their height in the beginning of May, and they fall towards the end of June. The inhabitants can only ford the river on horses of an extraordinary size during the drought of summer, when the strength of the current is greatly diminished.

"The water of the Rio del Norte, like that of the Orinoco and all the great rivers of South America, is extremely muddy. In New Biscay we consider a small river called Rio Puerco, the mouth of which lies S. from the town of Albuquerque, near Valencia, as the cause of this phenomenon; but M. Tamarit observed that its waters are muddy far above Santa Fe and the town of Taos. The inhabitants of the Passo del Norte have preserved the recollection of a very extraordinary event which took place in 1752. The whole bed of the river became dry all of a sudden for more than 30 leagues above and 20 below the Passo, and the water of the river precipitated itself into a newly formed chasm, and only made its reappearance near the Presidio de San Eleazar. The bed of the Rio del Norte remained for a considerable time dry. The fine plains which surround the Passo, and which are intersected with small canals of irrigation, remained without water, and the inhabitants dug wells in the sand, with which the bed of the river was filled. At length, after the lapse of several weeks, the water resumed its ancient course, no doubt because the chasm and subterraneous conductors were filled up.

the Rio Grande del Norte is the true American, and, except flowing in an opposite direction the two rivers have very strong traits of resemblance.

The angle between the Rio Grande and Red rises a series of streams flowing into the of Mexico. The first of these, from the Rio de, is the Rio Neuces or Walnut river, rising the plains of Texas at N. lat. 31°, W. lon. W. 30, flowing parallel to the Rio Grande 250 it falls into the Laguna Madre N. lat. 27 20 lon. W. C. 21,° draining about 15,000 as.

The shore of the Gulf of Mexico, NE. from Rio Grande, is as remarkable for the abundance as it is S. from that stream for the fertility of its rivers. The Neuces is followed by united streams of the St. Marco and Guadalupe. Probable from the phenomena of the rivers these regions that the substrata are calcareous. A circumstance, quoted from Humboldt, of the mingling of the waters of the Rio Grande, almost induces the supposition of a calcareous base. St. Marks (San Marco) rises in the mountains of Saba, and is remarkable for the number of excessively large fountains—another almost unremarkable of a calcareous formation. It may seem incredible, but it is nevertheless true, that few of this continent are more imperfectly known than the angle between Rio Grande and Red river, and NW. from the Sabine. The names of rivers, as they follow in succession, were communicated to me by a number of persons who had explored the country, and particularly by Mr. Dabot, who resided many years at Nacogdoches, by a French gentleman of the name of La, who also resided a considerable time in Texas. Neither the shores nor interior have ever been surveyed, or even visited, by any scientific explorer. The sources and courses of the river are very imperfectly known; their mere relative positions were all I could procure beyond the extent of my own sphere of observation, which was limited to the waters of the Sabine, which I intercepted at N. lat. 32°, and surveyed from thence to the south.—See art. *Texas*.

It is well known, however, that the rivers from Rio Grande to Missouri, inclusive, have gained, from the configuration of the intermediate country, a very singular corresponding curve. These curves to a map of the rivers of Texas, Arkansas, and Missouri, a regularity which appears artificial. From such a structure that the Colorado of the of Mexico presents so singular an aspect. With a comparative length of 700 ms., the basin of that river does not exceed 60 ms. in mean width. The basins of most rivers make more or less approach to the form of an ellipse, and the difference between the greatest breadth seldom amounts to so great a disproportion as three to one; in the case of the Colorado, the difference is double the ordinary scale of comparison.

The river rises at N. lat. 34° W., lon. W. C. 30, and, flowing southeast by east 500 ms., reaches 150 to the southeast, and about a similar distance to the S., falls into the Gulf of Mexico at N. lat. 29°, W. lon. W. C. 19 40. This river has its regular spring and summer inundations similar to the Rio Grande, and about the

same period. The parched and open nature of the country from which they both flow causes an excessive depression in the latter end of summer and in autumn. Indeed, the overwhelming rains that sometimes deluge, and the long droughts which occasionally parch the interior of Texas, and which extend their effects into La., Ark., and Mo., are amongst the most singular phenomena of physical geography. Whilst I was in La., there intervened near 3 years, I believe, 1800, 1801, and 1802, without rain at St. Antonio de Behar, and over an immense extent of the interior regions. During the 2 first years of that series, the Mississippi did not overflow its banks.

The basin of the Brassos a Dios follows that of the Colorado, and partakes of a similar structure. The sources of the latter are, however, in the mountains of San Saba, upwards of 300 ms. E. of those of the former. The Brassos rises at N. lat. 33° W., lon. W. C. 23°, and, flowing nearly parallel to the Colorado, falls into the Gulf of Mexico after a comparative course of 400 ms., with also a very narrow basin of less than 50 ms. mean width.

The Trinity is the last river of Texas beyond the Sabine. These two streams rise in the same plain S. of Red river, at about N. lat. 32 30, and both flow nearly parallel to each other, with a general course to the S., curving to the eastward by a semi-elliptical sweep; each having a comparative course of about 300 ms.

We may turn and cast a cursory retrospective glance upon the rivers of Texas. I may observe that by the name of Texas is designated all the country between Louisiana and New Mexico, and between the boundary of the U. S. and the Rio Grande and Gulf of Mexico.

Though the coast of Texas is amply indented with bays, many of which are of extent and depth to admit vessels of any draught, the rivers are extremely shallow, and, except during floods, unnavigable. No large falls, or even cataracts, are known to exist. The very slight tides in the Gulf of Mexico, give little aid to the commercial facilities in the confluent rivers.

Similar to the Atlantic coast SW. from New York, that of the Gulf of Mexico is every where low, and either sandy or marshy. This gives a peculiar character to the rivers of both, which distinguish them from such as flow from a rocky or bold shore. Bars of sand or mud interrupt the navigation, more or less, of all the rivers of the world, but in a high degree those whose egress to their recipients is made through shores having but little declination above the water level.

Mexico, State of the Republic of Mexico, bounded by the Pacific ocean SW., by Mechoacan NW. and W., by Queretaro N., and by Puebla de los Angeles E.; length 220 ms., mean width 130, and area about 30,480 sq. ms. It extends from lat. 16 34 to 20 15 N. The state of Queretaro has been recently formed out of the northern part of the late intendency of Mexico.—See *Queretaro*.

More than two-thirds of the former intendency of Mexico are mountainous, in which there are immense plains elevated from 6,560 to 7,550 feet above the level of the ocean. From Chalco, Queretaro, are almost uninterrupted plains of 150

ms. in length, and from 25 to 30 wide; on the low Pacific border the climate is sultry and unhealthy. Near the gigantic summits of Popocatepetl, and Iztaccihuatl, the highest peak of the State of Mexico, the Nevado de Toluca is 15,156 feet above the level of the ocean. The particular valley of Mexico or Tenochtitlan, surrounded by the mountains of Anahuac, is one of the most singular features of our globe. Its form is oval; length about 55 ms., and breadth 38; area about 1,700 sq. ms., of which one tenth is covered by water. Its circumference, 200 ms. The surrounding Cordillera, or porphyritical rim has a mean height of 9,840 feet. In this extraordinary vale or basin are 5 lakes, near one of which the city of Mexico is situated. See articles *Mexico*, *Republic of Queretaro*, and *city of Mexico*.

From the outside of the basin the water flows in every direction towards the Atlantic and Pacific oceans, but from the basin itself, only one outlet exists, carrying the water into the Tula or Moctezuma river. And, what is peculiarly remarkable, this outlet is in a great degree artificial. For the rivers of this State, and for those of the Mexican empire in general, which enter the Gulf of Mexico, see *Mexico*. The sources of the Rio Grande de Santiago rise on the western slopes of the mountains of Anahuac, and cannot be considered a stream of Mexico. The river of Xacalutla rises near Cuernavaca, and drains the southwest part of the State. It is a region which, though exposed to excessive annual rains, the rivers are few in number and comparatively small.

In a region of such difference of level and such excessive difference of moisture, the seasons must also offer almost every change of temperature. The high plains of Anahuac are as remarkable for the purity of the air as are those of the Pacific coast for their insalubrity. The two climates are clearly distinguished by the inhabitants. The cities of the elevated table land are called *ciudades de tierra fria*, or cities of the cold region, whilst those near the coast are designated *ciudades de tierra caliente*, or cities of the hot region. Its most important mines are, La Veta Biscaino de Real del Monte, Zimopan, and Tehuilotepec.

The cities of the State of Mexico are Mexico, Tezcuco, Cuyoacan, Tacubaya, Tucuba, Cuernavaca, Chilpanzinco, Tasco, Acapulco, Zacatula, Lerma, Toluca, Pachuca, &c.

Mexico, *city of*, capital of the intendency of the same name, and of the whole republic, is situated at lat. 19 26 N., lon. W. C. 22 5 W., on or near the W. shore of the Lake Tezcuco, and in the central part of the valley of Tenochtitlan, and also nearly mid-distance between Vera Cruz and Acapulco. The site of Mexico is elevated 7,470 feet above the ocean level. The name of this city, and of the country, is a subject of some doubtful speculation. There is good reason to believe the name, however, to be derived from Meztli, or Huitzilopochtli, the Mexican god of war. The valley was called Tenochtitlan, from Tenochques, a national appellation of the Aztecs. It was founded, according to the Aztec historians, in 1321, precisely two centuries before the Spanish conquest. The ancient city was divided into four quarters, Teopan or Xochimilco,

Atzacualco, Moyotla, and Creepopan; and the limits are preserved in St. Paul, St. Sebastian, St. John, and St. Mary. The present site has for the most part the same direction with the old ones, running from N. to S. and from W. to E. But what gives the new city a peculiar distinctive character is, that it is situated on the continent, between the extremities of the two Lakes of Tezcuco and Xochimilco, and it only receives by navigable canals the fresh water of the Xochimilco. The ancient city was built on an alluvial plain, or rather morass, which has been by the mere operations of nature in five centuries raised to a considerable elevation, and the shores of the lakes restricted. The surface of the city of Tezcuco is 7,468 feet above the level of the ocean, and its waters are salt. Lake Xochimilco is higher, and composed of fresh water. Before the conquest, no city of the world was so subject to destructive inundations as Mexico. This cause has been diminished in its effects and occasioned by evaporation, arising from the destruction of adjacent forests, and more efficaciously by the drain Desagude. See *Republic of Mexico*. Mexico is undoubtedly one of the finest cities ever built by Europeans in either hemisphere," says Humboldt, with the exception of Petersburg, Berlin, Philadelphia, and some quarters of Westminster. "There does not exist a city of the same extent which can be compared to the capital of New Spain, the uniform level of the ground on which it stands, and the regularity and breadth of the streets, and the extent of the public places. The architecture is generally of a very pure style, and there are edifices of very beautiful structure. The exterior of the houses is not loaded with ornaments. The walls are of sorts of hewn stone, (the porous amygdoloid, called tetzoutli, and especially a porphyry of vitreous felspar, without quartz, give to the Mexican buildings an air of solidity, and sometimes a magnificent appearance. There are none of those balconies and galleries to be seen, which so much disfigure all other cities built by Europeans in the Indies. The balustrades and gates are all of cast iron, ornamented with bronze, and the houses, instead of roofs, have terraces, like those in all the other southern countries."

The edifice destined to the school of mines, which the richest individuals of the country have furnished a sum of more than 3,000,000 of francs, (\$554,112,) would adorn the principal places of Paris or London. Two great palaces or mansions have been constructed by Mexican artists, by the academy of fine arts of the capital. One of these palaces in the Quarter della Traspalena is in the interior of the court a very beautiful peristyle of coupled columns. The traveller who admires a vast circumference paved with porphyry flags, and enclosed with an iron railing richly ornamented with bronze, containing an equestrian statue of King Charles IV, placed on a pedestal of Mexican marble, in the midst of the plaza of Mexico, opposite the cathedral and the emperor's palace. It is much less, however, from the grandeur and beauty of the monuments than from the breadth and straightness of the streets, and much less from its edifices than from its uniformity, regularity, and from its extent and position, than

of Mexico attracts the admiration of Europe-

"From a singular coincidence of circumstances," says Humboldt, "I have seen successively, within a very short space of time, Lima, Mexico, Philadelphia, Washington, Paris, Rome, Naples, and the largest cities of Germany. By comparing together impressions which follow in succession, we are enabled to rectify any opinion which we may have too easily adopted. Withstanding such unavoidable comparisons, of which several, one would think, must have proved advantageous for the capital of Mexico, it has become a recollection of grandeur which I principally attribute to the majestic character of its situation and to the surrounding scenery.

In fact, nothing can present a more rich and grand appearance than the valley, when, in a fine morning, the sky without a cloud, and of a deep azure which is peculiar to the dry and rare air of high mountains, we transport ourselves to the top of one of the towers of the cathedral of Mexico and ascend the hill of Chapultepec. A beautiful situation surrounds this hill. Old cypress trunks more than from 49 to 52 feet in circumference, their naked heads above those of the schinus, which resemble in their appearance the weeping willows of the E. From the centre of this solitary summit of the porphyritical rock of Chapultepec, the eye sweeps over a vast plain of carefully cultivated fields, which extend to the very base of the colossal mountains covered with eternal snow. The city appears as if washed by the waves of the Lake Tezcuco, whose basin, surrounding the villages and hamlets, brings to mind the beautiful lakes of the mountains of Switzerland.

Large avenues of elms and poplars lead in every direction to the capital; and two aqueducts, constructed over arches of very great elevation, cross the plain, and exhibit an appearance equally beautiful and interesting. The magnificent convent of Nuestra Señora de Guadalupe appears on the mountains of Tepeyacac, among rocks which shelter a few dates and young Yucca.

Towards the S. the whole tract between Chapultepec, Tacabaya, and San Augustine de las Animas, appears an immense garden of orange, lemon, apple, cherry, and other European fruit trees. This beautiful vegetation forms a singular contrast with the wild appearance of the naked mountains which enclose the valley, among which numerous volcanoes of La Puebla, Popocatepetl, and Xitlacihuatl, are the most distinguished. The cone of these forms an enormous cone, of which the summit is continually inflamed and throwing up smoke and ashes, opens in the midst of eternal snow.

The police of Mexico is good, the streets are clean, and well lighted. The city is supplied with fresh water from two sources: one on Chapultepec hill, and the other near the mountain of Chapultepec separates the valley of Tenochtitlan from the mountains of Lerma and Toluca. To convey this water two great aqueducts have been constructed. The water of Chapultepec enters the city at the Acueducto del Agua by an aqueduct of 10,826 feet, and the water of Santa Fe is brought along Alameda, and discharges near La Traspasa, at the bridge de la Escalera, by an aqueduct of 33,464 feet, or upwards of 6½ ms. The latter stream is most pure.

What is very remarkable, the ancient city was supplied in the same manner, and by aqueducts not less massive or lengthy than those erected by the Spaniards.

In its actual state, Mexico is no doubt considerably the most extensive and best populated city of either America. Its existing population is, however, difficult to fix with any precision, but must, from all concurrent testimony, exceed 180,000.

Mexico, Gulf of, inland sea of N. America, having the Mexican provinces SE., SW., and NW., the U. S. N. and NE., and Cuba E. It extends from lat. 18° to 31° 20' N., and from lon. 97° W. to 21° W. From the mouth of the Alvarado to that of the Appalachicola, in a NE. and SW. direction upwards of 1,000 ms., its mean width from SE. to NW. about 600 ms., superficial area exceeding 600,000 sq. ms. The Gulf of Mexico is connected with the Caribbean sea by the channel of Cuba, and with the Atlantic ocean by the Florida stream. The current generated by the trade winds, and by the rotation of the earth on its axis, is carried into the Mexican gulf by the Cuba channel, and discharged by the Florida stream, the gulf being an immense reservoir.

Mexico, town, Oxford co., Me.—Town, Oswego co., N. Y., on Mexico bay of Lake Ontario, 15 ms. E. from Oswego.—Town, Mifflin co., Pa.; on the left side of the W. branch of Susquehanna, 12 ms. above Millerstown, and 15 below Lewistown.

Meyenburg, town of Upper Saxony, in the marche of Pregnitz, 60 ms. NNW. of Berlin.

Meyenfeldt, town in the country of the Grisons, seated on the Rhine, in a pleasant country, fertile in excellent wine, 15 ms. NE. of Coire. Lon. 9° 36' E., lat. 47° 2' N.

Mezieres, town of France, in the department of Ardennes, and late province of Champagne, with a citadel, seated on the Meuse, 12 ms. NW. of Sedan, and 127 NE. of Paris. Lon. 4° 48' E., lat. 49° 46' N.

Mezen, river of European Russia, rising between the Vyezegda and the Petchora, and flowing parallel to the Dwina into the White sea.

Mezin, town of France, in the department of Lot and Garonne, and late province of Guienne, seated in a country that abounds in wheat, with vines, from which they principally make brandy, and with the cork tree, which they sell both in its natural state and in corks. It is 9 ms. NW. of Condom.

Mezurado.—See *Montserrado*.

Mezzovo.—See *Pindus*.

Mia, or *Mijah*, large town of Japan, seated on the S. coast of the isle of Nippon, with a fortified palace. Lon. 135° 40' E., lat. 35° 50' N.

Miami, river of Ohio, rising in Hardin co., interlocking with the head waters of the Scioto. It runs in a SW. direction above 100 ms., across the western borders of Logan, and through Shelby, Miami, Montgomery, Butler, and Hamilton cos., into the Ohio river, exactly in the SW. corner of the State, by a mouth 200 yards wide. Bordering upon this river are some of the finest arable lands in the State; but its navigation is not easy, on account of the rapidity of the current; it is, however, navigated to a limited extent, 75 ms., and

some of its waters approach so near those of the Auglaize, a southern branch of the Maumee, that a communication is effected between them by a portage of 5 ms. Its mouth is in N. lat. 39 4, and W. lon. W. C. 70 50.

Miami of the lake.—See *Maumee*.

Miami, co., Ohio, bounded on the N. by Shelby, E. by the cos. of Champaign and Clark, S. by Montgomery, and W. by Dark co. It is 21 ms. in extent from N. to S., by 20 from E. to W., and contains about 410 sq. ms. Troy, the county seat, and Piqua, are the principal towns. The principal waters are the Miami river, which runs across it from N. to S., the Southwest branch, and Spring, Honey, and Lost creeks. Soil fertile. Staples, grain and flour. Pop. 1840, 19,688. Central lat. 40 5 N., lon. W. C. 7 10 W.

Miami, tp., Hamilton co., Ohio.—Village, Hamilton co., Ohio, 15 ms. above the mouth of Great Miami river, and 16 W. from Cincinnati.—Tp., Champaign co., Ohio.—Tp., Green co., O.—NW. tp., Clermont co., O.—Western tp., Logan co., Ohio.—Tp., Cooper co., Missouri.

Miamisberg, village, Montgomery co., Ohio, situated on the E. side of Miami river, about 8 ms. below and SSW. of Dayton. In 1840 Miami tp. contained a pop. of 3,259.

Miami University, Oxford tp., Butler county. Ohio.

Michaels, town and seat of justice for Madison co., Mo., on Little Black river, 80 ms. SW. from Cape Girardeau.

Michaels, St. For words under this head, see *St. Michaels*.

Michael de Ibarra, St., town of Peru, in the province of Quito, 60 ms. NE. of Quito.

Michael, Gulf of St., that part of the Pacific ocean which lies to the E. of Panama. It was first discovered by the Spaniards, after their march across the isthmus of Darien.

Michaelsville, village in Hartford co., Md.

Michelonina, country of Prussia, which is part of the circle of Culm, and separated from the other part by the river Dribents. It takes its name from the castle of Michelow.

Michigan, large lake of North America, whose NE. extremity communicates with the NW. end of Lake Huron by the strait of Michilimackinac. It is situated wholly within the limits of the U. S. It is about 340 ms. in length, including the straits of Michilimackinac. Its width varies from 20 to 70 ms. The area covered by this lake amounts to about 15,000 sq. ms. Green bay is connected with it to the NW., and Lake Huron NE. It is navigable for vessels drawing 12 feet water through the straits of Michilimackinac, and within the body of the lake for those of the largest class.

Michigan State. This expanse is composed of two parts, naturally divided or separated. The first is formed by the peninsula between the Lakes Erie, Huron, and Michigan; the second, from the immense former NW. Territory, between the river Mississippi, N. lat. 49°, the river Rain, the Lakes Superior, Huron, Michigan, and the northern limits of the State of Illinois, on N. lat. 42 30.

The second part is merely annexed to the first for temporary purposes of civil government.

The peninsula of Michigan is bounded on
 Lake Michigan - - - -
 On Lake Huron - - - -
 River St. Clair, Lake St. Clair, Detroit river, and Lake Erie, to the N. boundary of Ohio - - - -
 Along the N. boundary of the Ohio to the E. boundary of Indiana - - - -
 Thence due N. along E. boundary of Indiana to the NE. angle of that State - - - -
 Thence due W. along the N. boundary of Indiana to Lake Michigan - - - -

Having an outline of

Area 34,000 sq. ms. = 21,760,000 acres.
 Extreme south, N. lat. 41 35.
 Extreme north, N. lat. 45 20.
 Its greatest length is from N. to S., 260
 its mean breadth 130 ms.

That part of the State of Michigan northward of the lake of the same name is bounded NE. by Grand bay, Lake Michigan, and the straits of Michilimackinac, S. by Menomonie river, and W. by Montreal river, N. by Lake Superior, and NE. by the straits of St. Mary. Its greatest length in an E. and W. direction 330 ms., the straits of St. Mary to the Montreal river its mean width 80 ms., and area 26,400 sq. ms.

SUMMARY.

Peninsular Michigan	-	-	34,000 sq.

of this State is about 500 ms., from the city of Detroit to the mouth of Montreal river.

Of this immense region much remains unknown, and of those parts which have been explored our information is generally imperfect. The peninsular section, though much more correctly delineated on our maps than the more remote and more inaccessible parts of the NW., remains still extremely defective in its representation. It may seem strange, but it is nevertheless a fact, that I was myself the first to publish the names and positions of several of the most important rivers in the very environs of the city of Detroit.

In general description, little will suffice on the whole of this region. It is less variegated than any section of the United States of equal extent. The surface is in a great measure flat, or gently rolling or waving. The peninsula contains some prairie, but is in much the greater part covered with a dense forest. On the trans-peninsular division the prairies are more expansive, and the forests, where they do occur, composed of more humble and less numerous specific material. The soil of the central and southern part of the peninsula is, perhaps, in proportion to extent, equal, if not superior, to any equal continuous area in the United States, the State of Illinois excepted.

In point of climate, it must be obvious that very sensible extremes must be felt in a country stretching over 6½° of lat. ; but these extremes are very little affected in Michigan by inequality of surface. On some maps, mountains are drawn near the sources of the Wisconsin and Fox rivers, where no such elevations exist. The country is there hilly, but by no means mountainous, and towards either the lakes or Mississippi river becomes comparatively level. It is needless, however, to amplify on objects of remote importance, and concerning which our information is at once vague and of doubtful authority; we will, therefore, confine our observations respecting Michigan more particularly to the part contained in the peninsula.

I may merely observe, that this point of land is generally level in its interior, with a sloping border towards the circumscribing lakes and river. Its superstructure is in every respect analogous to the northern parts of Ohio and Indiana. A prolongation of the table land mentioned in my general view of those States passes through Michigan, and reaches to the straits of Michilimackinac. This plain is no doubt underlaid with the same secondary base, reaching from Ohio river; and a similar superstratum is found in Michigan, which spreads over the schist of Ohio, Indiana, and Illinois.

Almost all the rivers of Michigan are precipitated over ledges of either limestone or sandstone rock, a few miles before joining their respective recipients. Above these falls, the country gradually becomes flat and marshy; below it is dry, sloping, and very productive. In one respect, the features of Michigan very essentially differ from those of Ohio and Indiana. In the two latter sections, the mouths of the confluent of Ohio river, surrounded by hills, whose true character I have drawn; whilst in the former the approach to the discharge of its streams is made down a very gradual and but little broken plain. In one instance, the original inclined plain was gradually cut into ravines by the Ohio and

The State of Michigan extends from the southern part of the peninsular part, N. lat. 41 35, to Keweenaw, N. lat. 47 35, or through 6° of lat. In the breadth of Lake Michigan, the length

other streams. In the second instance, the original plain was simply refracted by the formation of a sloping border, whose inclination was greater than the interior and remaining fragment of the primitive level.

It has been seen that Lake Michigan was only elevated above the Atlantic tides about 600 feet. From any data yet procured, no part of the peninsula can be elevated above that lake 200 feet, or 800 feet above the ocean.

The straits of St. Mary, uniting Lake Huron with Lake Superior, has but little current, except at the rapid of St. Mary, a distance of two or three miles. Fifty feet is as much as can be allowed for all the depression from Lake Superior to Lake Huron; giving to the former an elevation above the Atlantic tides of 650 feet.

It will at once be seen, from the elements given, that a Canadian sea is a species of valley, reaching far into the interior of the continent, with an elevation, at its utmost extremity, not so great by 150 feet as the ground on which stands the city of Pittsburg.

I mention these facts in this place, as they present in a striking manner the peculiar structure of the widely-extended connexion between the two great basins of Mississippi and St. Lawrence, and in order to introduce some brief observations on a phenomenon which has excited considerable surprise and observation. It has been found, that in receding from the central parts of New York, and even Pennsylvania, that though advancing into a higher latitude, when proceeding to the margins of Lakes Erie and Ontario, that the seasons became more mild. The quantum of the change, as in all similar cases, has been, no doubt, very much exaggerated; but that such an effect is actually perceptible admits of no serious doubt. The cause remains to be explained. We have already repeatedly adverted to the elevated region which protrudes from New York and Pennsylvania into Ohio, and which gradually depresses, advancing SW., until it finally subsides into a level table land, in the NW. part of Ohio and NE. part of Indiana. In the region skirting the southeastern side of Lake Erie, we have found the summit level of the ridge in question about 1,200 feet in height, whilst that of Lake Erie was not half so much.

Pittsburg is upwards of 200 feet above Detroit, and about on a level with the table land of Michigan. It ought not, therefore, to excite surprise, that places elevated from 500 to 800 feet above others should be more exposed to the action of frost.

The peach tree flourishes on the S. shore of Ontario, whilst it languishes a degree of latitude more southwardly, for the very reasons I have assigned.

In 1818 (in September) I travelled from Buffalo to Albany, and found indications of approaching winter, in proportion to my recession from the level shores of Erie, and entrance on the hilly and broken tracts contained in Seneca, Cayuga, Onondaga, Cortland, Madison, Chenango, Otsego, Schoharie, and Green counties. In my previous route from Buffalo to Detroit, the contrary aspect was very visible, though at a less advanced season. The time of harvest is more than a week earlier at Detroit than at Buffalo, though the difference of latitude is only about 30'. In the central and ele-

vated parts of New York, due E. from D. the seasons differ in length near a month, as has been supposed, from relative E. position, but from relative height and proximate water.

It may not be irrelevant to observe that a remote and doubtful ought never to be resort when those near and obvious will satisfactorily account for the phenomena under examination. Effects of the trade winds have been, by V. and some others, stated to exist far beyond possible actual sphere of influence. It denoted but a very limited knowledge of the physical chemical properties of air, to enable me to conceive that, every thing else equal, the mass of atmospheric air in the higher parts of the Mississippi basin was more liable, from its superior weight, to extend its effects towards the lower of the basin, than for the heated and buoyant air at that lower part to not only resist, but to force a heavier body to recede to the higher superior section.

The progressive population of this fine and naturally favored country has been, from various causes, extremely slow, but is now, since the completion of the N. Y. canal, rapidly increasing. It is within the range of reasonable anticipation that the completion of the N. Y. western canal will produce a flood of emigration to Michigan to the NW. part of the State of Ohio. It is beyond the powers of imagination to conceive a place better adapted for inland commerce than the city of Detroit, nor a finer country for the purposes of agriculture suitable to its climate than the peninsula of Michigan. This paragraph was written in 1818, and retained in order to compare the anticipation with the results since produced.

Progressive population of Michigan.

1810	-	-	-	4,702	
					186 6
1820	-	-	-	8,896	
					31 4
1830	-	-	-	28,004	
					31 1
1834	-	-	-	87,273	
					21
1837	-	-	-	175,000	
					12 1
1840	-	-	-	212,267	

From these data we find that, in 30 years, every 100 at the beginning of the period, were 4,457 at its termination.

Detroit stands at lat. 42 25 N., and long. C. 5 50 W. The site is a gently sloping plain, rising 30 or 40 feet into the centre of the city, and thence spreading into an extensive plain to the rear. The town is yet small, but has an open and prosperous aspect. It contained in 1818, 1,422 inhabitants; and in 1840, 9,102.

Michilimackinac, straits and island of, between Lakes Michigan and Huron. The straits extend about 40 ms. in length, but with very unequal breadth. A gentle current sets through it from Michigan into Huron, which, at the narrowest part of the island, where the strait is restricted to about 4 ms. width, is most sensibly felt. The island

7 ms. in circumference.—See *Michilimackinac*.

Michilimackinac, co., State of Michigan, embracing the foregoing island and adjacent shores. Principal settlement is on the island, which has a court-house, jail, and about 100 houses. The island rises to some considerable height in places, one of which hills is elevated 300 above the level of the lake. The name of this is said to be derived from Michi Mackinaw, at Turtle, from its form. The town is, in summer, a place of very considerable resort, a complete thoroughfare between the lower higher parts of the Canadian sea. It has a custom-house, and is a port of entry.

Michilimackinac, village and seat of justice, Mich., is situated on Michilimackinac island.

Michipicoten, river of U. C., falls into a bay of the same name, in the NE. part of Lake Superior. From the head of this river short portages to the navigable waters of Severn and Moose of James bay.

Middleborough, tp., Plymouth co., Mass., situated at the head of Buzzard's bay, in the lat. of 42 and lon. of 70 40 W., at the distance of 16 E. of New Bedford, and 40 S. of Boston. Large quantities of nails are made here. Smith made from ore found in the tp. Pop. 1820,

Middleborough Four Corners, post office, Plymouth co., Mass., 45 ms. SSE. from Boston.

Middlebrook, village, Augusta co., Va., 10 ms. from Staunton.—Post office, Montgomery Md., on Seneca creek, 35 ms. NW. from

Middleburg, strong city of Holland, capital of the island of Walcheren and of all Zealand. The streets, and public buildings, are magnificently particularly the town house, (formerly a cell of an abbey,) which is decorated with the statues of the ancient counts and countesses of Holland. The inhabitants are computed at 30,000.

The harbor is commodious, and has a communication with Flushing by a canal which will bear the largest vessels. It is 30 ms. NNW. of Ghent, 22 SW. of Amsterdam. Lon. 3 37 E., lat. 51 4 N.—Town of the kingdom of the Netherlands, in Flanders, 5 ms. SE. of Sluys.—

Middleburgh, Schoharie co., N. Y., 10 ms. S. from Maria.—Post office, Union co., Pa., 61 ms. N. from Harrisburg.—Village, Frederick

Co., Md., 20 ms. NE. from Frederick.—Tp., Logan co., O.—Village, Loudon co., Va., on Goose creek, 12 ms. SSW. from Leesburg, and W. by W. from Alexandria.—Village,

Madison co., Ky.—Town, New Haven co., Ct., on a branch of Naugatuck river, 22 ms. NW. from New Haven.

Middlebury, town and seat of justice, Addison co., Vt., 33 ms. NNW. from Rutland, 15 SSE. from Burlington. It stands on the bank of Otter creek, near the falls, 13 ms. from Vergennes. It is a very manufacturing town, the operations of which are facilitated by the power afforded by the falls of Otter. There are cotton factories, one for nails, a number of saw mills, and a machine for sawing wood, a fine quarry of which exists in the village.

It is cut extensively into the various objects to which that fine stone is commonly applied. Beside the common county buildings, this town contains an academy, two printing offices, and a number of places of public worship. This account of Middlebury was written for a former edition of this treatise, and no doubt falls short of the actual advance of the place. Middlebury college has been incorporated since 1800, and, though entirely supported by private bounty, has extensive and elegant buildings. It has a president, 5 professors, 2 tutors, a respectable library of 1,200 volumes, and a philosophical apparatus. Students about 100. Pop. of the village in 1800, 2,138; in 1820, about 2,500; and in 1840, 3,182.—

Middleburg, Middlesex co., N. J.—See *Millstone*.

Middlebury, town, Genesee co., N. Y., between Allen's and Tonewanto creeks, 12 ms. S. from Batavia.—Village, Portage co., O., 187 ms. NE. from Columbus.

Middlebury Village, village on the eastern boundary of Genesee co., N. Y., and on Allen's creek, 15 ms. SSE. from Batavia. This post office is different from that of Middlebury, in the same tp.

Middlefield, town, Hampshire co., Mass., 25 ms. W. from Northampton. Pop. 1820, 755.—Town, Otsego co., N. Y., between Cherry Valley and Otsego Lake. Pop. 1820, 2,579.—Village, in Batavia tp., SE. part of Geauga co., O., about 15 ms. SE. of Chardon, the co. seat, and 30 ms. NE. of Ravenna.

Middle Granville, town, Hampshire co., Mass., 120 ms. W. from Boston.

Middle Haddam, town, Middlesex co., Ct., on the left side of Connecticut river, 10 ms. SE. from Middletown.

Middleham, town of Eng., in N. Yorkshire, on the Eure, 11 ms. S. by W. of Richmond, and 255 NNW. of London.

Middle Island, village, Suffolk co., Long Island, N. Y., about 60 ms. E. from the city of New York.

Middleport, village, Niagara co., N. Y.

Middlesex, co. of Eng., 22 ms. long and 17 broad, bounded on the N. by Hertfordshire, E. by Essex, S. by Surry and Kent, and W. by Buckinghamshire. It contains 179,200 acres; is divided into 6 hundreds and 98 parishes, beside those in London and Westminster; and has those two cities and six market towns. Besides the Thames, Lea, and Coln, which are its boundaries to the SE. and W., Middlesex is watered by several small streams, one of which, called the New river, is artificially brought from near Hertford, for the purpose of supplying London with water. Pop. 1801, 818,129; in 1811, 953,276; and in 1821, 1,144,531.

Middlesex, town, Washington co., Vt., 6 ms. N. from Montpelier.

Middlesex, co., Mass., bounded N. by Hillsborough co., in N. H., NE. by Essex co., in Mass., SE. by Suffolk, Norfolk, and Boston harbor, and SW. and W. by Worcester; length 40, mean width 20 ms., area 800 sq. ms. Surface delightfully variegated. Soil, though varied and rather sterile generally, yields, nevertheless, grain, pasture, and orchard fruits, in considerable abun-

dance. The body of the county is drained by Concord river; the Nashua passes over its NW. and Charles river over its SE. angle. Chief towns, Cambridge and Charlestown. Pop. 1820, 61,476; and in 1840, 106,611. Central lat. 42 28 N., lon. W. C. 5 45 W.

Middlesex canal.—See *Merrimack river*.

Middlesex, co., Ct., bounded by Long Island sound SE., by New Haven SW., Hartford NW. and N., and New London E.; length 28 ms., mean width 12, area 336 sq. ms. Surface generally hilly; soil, like the surface, varied, but generally productive in grain, pasturage, and orchard fruit. Connecticut river intersects it, and separates it into two unequal sections, leaving about two-thirds SW. from Connecticut river. Chief town, Middletown. Pop. 1820, 22,408; and in 1840, 24,879. Central lat. 41 28 N., lon. W. C. 4 20 E.

Middlesex, town, Ontario co., N. Y., on the E. side of Canandaigua lake, and W. from Flint creek, 17 ms. SW. from Geneva. Pop. 1820, 2,718.

Middlesex, co., N. J., bounded E. by Staten Island kills and Raritan bay, SE. by Monmouth, co., SW. by Huntingdon and Burlington, W. by Somerset, and N. by Essex; length 32 ms., mean width 11, area 322 sq. ms. The southwestern part of this co., near Delaware river, is drained by Assampink creek, all the residue is watered by the Raritan and its confluent. Surface is generally uneven rather than hilly. Soil varied, but generally productive in grain, fruits, and pasturage. Chief town, New Brunswick. Pop. in 1820, 21,470, and in 1840, 21,893. The apparent diminution of pop. of Middlesex was produced by the formation of Mercer co., into which latter the southwestern part of the former was incorporated. Central lat. 40 25 N., lon. W. C. 2 34 E.

Middlesex, co., Va., bounded SE. by Chesapeake bay, SW. by Piankatank river, or Gloucester and King and Queen cos., NW. by Essex, and NE. by Rappahannock river; length 35 ms., mean width 6, area 210 sq. ms. Soil sandy and barren. Chief town, Urbana. Pop. in 1820, 4,057, and in 1840, 4,392. Central lat. 37 35 N., lon. W. C. 30' E.

Middle Lister, small island in Lake Erie, lying NW. from the Bass' islands. It is one of the three called the Middle, East, and West Lister, though bearing from each other NE. and SW.

Middleton, town of Eng., in Lancashire; it has the cotton trade in all its branches, a large twist manufacture, and considerable bleaching works. It stands on the Rochdale canal, 6 ms. N. by E. of Manchester, and 139 NNW. of London.—Town, Stafford co., N. H., 28 ms. NE. from Concord.—Town, Rutland co., Vt., 36 ms. W. from Windsor.—Tp., Essex co., Mass., 9 ms. NW. from Salem.—Town, Delaware co., N. Y., on Popachton, branch of Delaware river. Pop. 1820, 1,949.—Tp., Columbia co., O.

Middleton, North, tp., Cumberland co., Pa., including one-half of the borough of Carlisle, and extending on both sides of Connedogwinet from Carlisle to the Blue mountain.

Middleton, South, tp., Cumberland co., Pa., including one-half of the borough of Carlisle, and extending to the South mountain.

Middletown, tp., Rutland co., Vt., on Pokey river, 52 ms. N. from Bennington, and ms. SW. from Rutland.—1 p., R. I., betw Newport and Portsmouth.—City, port of en and seat of justice, Middlesex co., Ct., on right bank of Ct. river, 31 ms. by water above mouth, 15 by land below Hartford, and 25 from New Haven. Beside the ordinary co. bu ings and places of public worship, it contains almshouse, 2 printing offices, and 2 insure companies. Some very important and flourish manufactories exist in this city and vicinity. In 1810, including the tp., 5,382; in 1820, exclusive of the tp., 2,618; the tp., 3,861; and together, 6,681; and in 1840, 3,511.—Village, Orange co., N. Y.—Village, Saratoga co., N. 3 ms. NW. from Waterford, and 14 N. from bany.—Town, Monmouth co., N. J., on small creek near Raritan bay, 20 ms. SE. by from New Brunswick. The tp. contains an emy, and includes Sandy Hook, Middletown po and the Neversink hills. Pop. 1820, 4,369; in 1840, 6,083.—Tp., Delaware co., Pa., tween Ridley and Chester creeks, 15 ms. SW W. from Philadelphia. Pop. 1820, 994.— Bucks co., Pa. Pop. 1820, 1,891.—Vill Dauphin co., Pa., on the point above the junc of Swatara creek with the Susquehanna river 15 ms. below Harrisburg, and 27 NW. from Lan ter. It is an ancient village, chiefly inhabited by Germans. Pop. 1820, 567; and in 1840, 1,000.—Village, Fayette co., Pa., 10 ms. E. from Brownsville, and 6 N. from Uniontown.— Village, Washington co., Pa., on a branch of C creek, 12 ms., NW. from Washington. A beautiful little borough is situated on the ridge between the valleys of Cross and Bu creeks.—Village, Newcaste county, Del., on Apoquinimik creek, 21 ms. SSW. from W ington.—Town, Frederick co., Md., 9 ms. NW. by W. from Frederick.—Village, chester co., Md., between Blackwater and F quaking creeks, 9 ms. SW. from Cambridge.— Village, Frederick co., Va., on Cedar creek 4 ms. SW. from Winchester.—Sullivan, Tenn.—Village, Jefferson co., Ky., 11 m a little N. of E. from Louisville.—Tp. of considerable importance, Butler co., Ohio, on the side of the Miami river, 6 ms. below Franklin, and 14 above Hamilton.

Middletown, town, Delaware co., N. Y.—See *Middleton*.

Middletown Point, village, Monmouth co., N. J., 14 ms. NW. from Shrewsbury.

Middletown Upper Houses, post office, Middlesex county, Connecticut, immediately adjoining Middletown.

Middleville, village, Herkimer co., N. Y., on post road 90 ms. NW. by W. from Albany.

Middleway, village, Jefferson co., Va., by post road 85 ms. NW. from W. C.

Middlewich, town of Eng., in Cheshire, on the Croke, and noted for its salt pits and making salt. It is 24 ms. E. of Chester, and 167 N. of London. Lon. 2 30 W., lat. 53 13 N.

Midhurst, town of Eng., in Sussex, on a small river which almost surrounds it, 11 ms. N. by E. of Chichester, and 50 W. by S. of London. Lon. 45' W., lat. 51° N.

Midway, Liberty co., Ga., a settlement formed by emigrants from Dorchester, Mass.

Miechau, or *Mieczawa*, handsome town of Poland, in Cujavia, seated on the Vistula river, 10 S. by E. of Thorn. Lon. 18 46 E., lat. 52 2 N.

Mifflin, co., Pa., bounded S. and SE. by Juniata co., Huntingdon W. and SW., Centre N., and Union E. Length from SW. to NE. 40 ms., breadth 10, and area 400 sq. ms. N. lat. 40 40 52, W. lon. 22' to 55' W. C. This co. occupies a part of Juniata valley, and on the W. and E. is bounded by that river, and is in the western portion traversed by the Pa. canal. The surface much broken by mountain chains, but contains rich soil in the valleys. Chief town, Lewistown. See the census of 1830 was taken, Juniata co. was formed from the southern part of Mifflin. Total pop. 21,960; pop. Mifflin 1840, 13,092.

Mifflin, tp., Alleghany co., Pa., W. from Mongahela river, and E. of the tp. of St. Clair, and S. SE. from Pittsburg.—Tp., Cumberland co., Pa., between the Conedogwinet and Blue mountains, 14 ms. W. from Carlisle.—Tp., Loching co., Pa., on the N. side of the W. branch of Susquehannah, below the mouth of Pine creek, and 14 ms. above Williamsport.—Tp., Dolphin co., Pa., on Wiconisco creek, 25 ms. from Harri-burg.—Tp., Richland co., Ohio.—Tp., Franklin co., Pa.—The westernmost of Pike co., Ohio.

Mifflinburg, town, Union co., Pa., 5 ms. NW. of New Berlin.—Village in the eastern part of Columbia co., Pa., on the left bank of Susquehanna river, 17 ms. above Danville and 34 below Chesbarre.

Mifflintown, village, Mifflin co., Pa., on the bank of the Juniata river, 44 ms. above Harri-burg.

Milan, city of Italy, capital of the duchy of the name, and the see of an archbishop. It was ancient capital of Lombardy, and also of the kingdom of Italy, Napoleon Bonaparte being crowned king of Italy on May 26, 1805.

The city is 10 ms. in circumference; but the gar-dens are so extensive that it does not con-tain above 140,000 inhabitants. It stands in a beautiful plain, between the rivers Adda and Tesin, which communicate with the city by means of two canals. The citadel, called Castello di Porta Zo-nea, is a place of great strength. Here are 22 schools, a university, several colleges, many fine churches, 230 churches, of which 96 are parochial, 10 convents, 100 religious fraternities, and a great number of hospitals. The cathedral is in the cen-tre of the city, and, next to St. Peter's, at Rome, the most considerable in Italy. This vast fabric is built of white marble, supported by 50 columns, adorned within and without by a prodigious number of marble statues. The college of St. Ambrose has a library which, beside a prodigious number of manuscripts, contains 60,000 printed books; and its superb gallery is adorned with rich paintings. Milan has considerable commerce in wool, especially rice, with cattle and cheese; and manufactures of silk and velvet stuffs, stock-ings, handkerchiefs, ribbons, gold and silver lace, embroideries, woolen and linen cloths, glass, porcelain, and curious works in steel, crystal, agate,

hyacinths, and other gems. It has been many times taken in the wars that have desolated Italy. It is now the seat of an Austrian Viceroy, and capital of the Lombardo-Venetian kingdom or Austrian Italy. It is 165 ms. NW. of Florence. Lon. 9 12 E., lat. 45 28 N.—Village in the NE. part of Dutchess co., N. Y.—Village, Huron co., Ohio, 123 ms. N. from Columbus.

Milan, or the *Milanese*, late duchy and consid-erable country of Italy, included in the late Italian republic. It was bounded on the N. by Switzer-land and the country of the Grisons, on the E. by the republic of Venice and the duchies of Parma and Mantua, on the S. by the duchy of Parma and the territory of Genoa, and on the W. by Piedmont and Montferrat, being 150 ms. in length and 78 in breadth. The soil is every where fertile in corn, wine, fruits, rice, and olives; and there are also plenty of cattle. The rivers are the Secchia, Tesin, Adda, and Oglio. There are likewise several lakes, the three principal of which are Mag-giore, Como, and Lugano. It is a peculiarly fer-tile and productive region, and cultivated with the utmost skill and care. It is now a part of the empire of Austria; which see.

Milazzo, or *Melazzo*, seaport of Sicily, in Val di Demona. It is divided into the upper and lower town. The upper is very strong, and the lower has a fine square, with a superb fountain. It stands on a rock on the W. side of a bay of the same name, 13 ms. W. of Messina. Lon. 15 34 E., lat. 38 12 N.

Milborn-port, borough of Eng., in Somerset-shire. It has manufactures of woolen cloth, linen, and hosiery; and is seated on a branch of the Par-ret, 2 ms. E. by N. of Sherborn, and 114 W. by S. of London.

Milburn, village, Somerset co., Maine, 92 ms. NNE. from Portland.

Mildenhall, town of Eng., in Suffolk, 12 ms. NW. of Bury, and 70 NNE. of London.

Milesburg, or *Milesborough*, village, Centre co., Pa., on Bald Eagle creek, 2 ms. N. from Belle-font, through the mountain gap.

Mileto, town of Naples, in Calabria Ulteriore, 5 ms. from Nicotera.

Milford, town, Hillsborough co., N. H., 27 ms. S. from Concord.—Town, Worcester co., Mass., 18 ms. SE. from Worcester.—Village, New Haven co., Ct., on Long Island sound, 9 ms. SW. from New Haven. The village stands on an excellent harbor for vessels of 200 tons, and the amount of shipping owned there amounts to about 1,500 tons, chiefly engaged in the coasting trade. A fine quarry of marble exists within this tp. Pop. in 1820, 2,785; and in 1840, 2,455.—Town, Otsego co., N. Y., on Otsego creek, 10 ms. below or S. from Cooperstown.—Town, Hunterdon co., N. J., 34 ms. NW. from Trenton.

—Village and seat of justice in Upper Smith-field tp., Pike co., Pa., on the Delaware, 55 ms. above Easton. Lat. 41 18 N., lon. W. C. 2 12 E.—NW. tp. of Bucks co., Penn.—Tp., Mifflin co., Pa., on the Juniata, opposite Mifflin-town, and on Tuscarora and Licking creeks.—Tp., Somerset co., Pa., on Castleman's river and Laurel Hill creek, 5 ms. SW. from Somerset.—Town, Kent co., Delaware, on the left bank of Mispillion creek, 19 ms. S. by E. from Dover.

—Village, Greenville district, S. C., 95 ms. NNW. from Columbus.—Tp., Ashtabula co., Ohio, adjoining the tp. of Jefferson on the SE.
—Small village near the southwestern corner of Union co., in Union tp., Ohio, on the western bank of Darby creek.—Tp., Butler co., Ohio.
—Village, Hamilton co., Ohio.—Village, Miami tp., Clermont co., Ohio, on the E. bank of Little Miami river, 12 ms. from its mouth, and 15 north westerly from Williamsburg.

Milford, Upper, SE. tp. of Lehigh co., Pa.

Milford Haven, deep inlet of the Irish sea, on the coast of Pembrokeshire, generally allowed to be the safest and most capacious harbor in Great Britain. It branches off into 16 deep and safe creeks, 5 bays, and 13 roads, in which it is said 1,000 ships may ride in perfect security, and at a sufficient distance from one another. At the entrance on the W. point, called St. Ann's, is an old light-house and a block-house. Here the earl of Richmond, afterward Henry VII, landed on his enterprise against Richard III. A packet boat sails from hence every day, except Tuesday, for Waterford in Ireland.

Milford Centre, village, Worcester co., Mass., 24 ms. SW. from Boston.

Milfordville, town Otsego co., N. Y., 40 ms. W. from Albany.

Milhaud, town of France, in the department of Aveiron, seated on the Tarn, 50 ms. NW. of Montpelier and 142 S. of Paris. Lon. 3 11 E., lat. 44 3 N.

Millboro', village, Washington co., Pa.

Millborough, village, Bath co., Va., 172 ms. NW. by W. from Richmond.—Village, Sussex co., Va., about 30 ms. SE. from Petersburg.

Millburg, town, Worcester co., Mass., 6 ms. S. from Worcester, on Blackstone river. It is one of the most eligible manufacturing establishments in the co., and manufactories have been established for paper, nails, black lead, woolen cloth, leather, fire arms, mill saws, scythes, &c.

Mill Creek, hundred, New Castle, co., Del.

Mill Creek, village, Berkeley co., Va., 93 ms. NW. from W. C.—Large and valuable mill stream rising in the northern part of Logan co., Ohio, and running from thence in an E. by S. direction into the W. side of Scioto river, 6 ms. below Fulton's creek, Delaware co.—Large mill stream, Butler and Hamilton cos., Ohio, running S. by W. into the Ohio river, immediately below Cincinnati.—Tp., Hamilton co., Ohio, immediately N. from Cincinnati.—Tp., on a creek of the same name, in the eastern part of Union co., Ohio. Much of the soil is rich and fertile.

Milledgeville, town, Baldwin co., Georgia. It is the seat of justice for the co. and capital of the State, on the right bank of Oconee river, about 300 ms. above Darien, and 312 above the mouth of the Alatomaha, and on very uneven broken ground. Lon. W. C. 6 12 W., lat, 33 5 N. It contains the co. and State buildings, a State penitentiary, 2 or 3 printing offices, 2 or 3 places of public worship. Boats of 25 or 30 tons are navigated from this town to Darien. Pop. in 1840, 3,000.

Mille Isles, seigniory, York and Effingham cos., L. C., on the N. of St. John's channel, 20 ms. NW. from Montreal.

Miller, co., Arkansas. Situation and extent certain.—See *Addenda*, art. *Arkansas*.

Millersburg, village, Holmes co., Ohio, ms. from Columbus.—Village, Ripley co., 72 ms. SE. from Indianapolis.—Village, Bourbon co., Ky., on Hinkston's river, 10 ms. P. from Paris and 56 E. from Frankfort.

Millers Creek, post office, Estil county, Kentucky, 75 ms. SE. from Frankfort and 10 E. of Irvine.

Miller's Inn, post office, Nelson co., Ky., ms. SW. from Frankfort.

Miller's Place, post office, Suffolk county, Y., on Long Island, 70 miles E. from the city of New York.

Miller's Tavern, post office, Prince Edward Va., 46 ms. SW. from Richmond.

Miller's River, branch of Connecticut river, in Worcester co., flows W., and enters Connecticut in Franklin co., Mass.

Millerstown, village, Lebanon co., Pa., 5 ms. W. from Lebanon.—Village, Perry co., 1 ms. on the left bank of the Juniata river, 29 ms. at Harrisburg.

Millersville, village, Lehigh co., Pa.

Millesimo, town of the Sardinian States, 30 W. from Genoa.

Mille Vaches, seigniory, Northumberland L. C., 130 ms. below Quebec.

Millfarm, post office, Caroline co., Va., 30 N. from Richmond.

Mill Grove, post office, Mecklenburg co., by post road 134 miles SW. from Richmond.—Post office, Sumter district, S. C., 51 miles to Columbia.

Mill Hall, post office, Centre co., Pa., by road 132 ms. from Harrisburg.

Millheim, post office, Centre co., Pa., 13 ms. E. from Bellefonte.

Millington, village, Morris co., N. J., 53 ms. NNE. from Trenton.

Millport, post office, Erie co., N. Y.—Post office, Perry co., Ia., by post road 160 ms. SE. from Indianapolis.

Millsay, village, Bullock co., Ga., 70 ms. from Milledgeville.

Millsborough, village, Sussex co., Del., on Indian river, 10 ms. SE. from Georgetown.

Millsfield, tp., Coos co., New Hampshire, at midway between Connecticut river and Umbagog lake, 120 miles N. from Concord.

Millstone, river, N. J., SE. branch of the Hudson, rises in Moanmouth, flows NW. across Middlesex, and enters Raritan river in Somerset. This stream is peculiarly remarkable, as being the only one in the United States which rises on the sea sand alluvial formation and flows from it to the primitive, in an inverted order.

Millstone, or *Middleburg*, village, Somerset New Jersey, on Millstone river, 14 miles N. from Princeton, and 10 W. from New Brunswick.

Milthorp, town of England, in Westmoreland, on the Betha, near the mouth of the Ken. As the navigation of the Ken is obstructed by a catcliff near its mouth, Milthorp is the only port in the county, and hence the fine Westmoreland slates and other commodities are exported. It is 8 ms. S. of Thadval, and 255 NNW. of London.

Millville, village, Cumberland county, N. C.

Maurice river, 12 miles E. from Bridgetown.
 —Village, Genesee county, N. Y. —Village,
 King George's co., Va., by post road 90 miles S.
 from Washington city. —Village, Butler county,
 Co., 25 ms. NW. from Cincinnati, and 7 a little
 N. of W. from Hamilton.

Milwood, village on Shenandoah river, Frederick
 county, Va., 11 m.s. SE. from Winchester, and 61
 W. by W. from Washington city.

Milo, ancient *Melos*, island of the Archipelago,
 800 in circumference, with one of the best and
 most harbors in the Mediterranean. It produces
 excellent fruits and delicate wine, abounds in very
 fine cattle, especially in goats; and has mines of
 iron and sulphur. It is 60 miles N. of Candia.
 Lon. 26 6 E., lat. 36 41 N.

Milo, village, Penobscot co., Me., 145 ms. NE.
 from Portland.

Miltenberg, town of Franconia, in the electorate
 of Hesse, seated on the Maine, 20 ms. SE. of As
 fenburg. Lon. 9 19 E., lat. 49 46 N.

Milton Abbey, town of Eng., in Dorsetshire, 14
 ms. NE. of Dorchester, and 112 W. by S. of
 London. Lon. 2 32 W., lat. 50 50 N.

Milton, town of England, in Kent, on the E.
 side of the Medway, and noted for excellent
 wine. It is 14 miles NE. of Maidstone, and 42
 W. of London. Lon. 52' E., lat. 51 22 N. —
 Town of Eng., in Kent, incorporated with Graves
 end from which it is one mile distant. —Town
 of Litchfield county, L. C., in the great bend of the
 river, 35 ms. E. from Montreal. —

Town, Strafford county, N. H., on the Piscataqua,
 15 ms. above Portsmouth. —Town, Chittenden
 county, Vt., on Lake Champlain, at the mouth of
 the Champlain river, 12 miles N. from Burlington. —
 Town, Norfolk co., Mass., opposite Dorchester,
 on the Neponset river, 7 miles S. from Boston. Ves-
 sels of 150 tons ascend thus far. It contains sev-
 eral manufactories and an academy. —Large vil-
 lage, Litchfield co., Conn., 5 miles W. of Litch-

field. In this village there is an elegant Gothic
 church, belonging to the Episcopalians, built after
 the draught of Trinity church, in New York. —

Village, Saratoga co., N. Y., containing the village
 springs of Ballston Spa. —Village on Hud-
 son river, in the SE. part of Ulster co., N. Y., 11
 ms. above Newburg. —Village, Morris co., N.
 Y., 8 miles N. from Trenton. —Town, North-
 Carolina county, Pa., on the left bank of the W.
 branch of the Susquehanna river, 12 miles above
 Cumberland. —Village, Albemarle co., Va.,
 on the Rivanna river, 5 ms. below Charlottesville.

—Village, Rockingham co., N. C. —Village,
 Adams district, S. C., 65 miles NW. from Co-
 lumbia. —Village, Trumbull co., Ohio, by post
 road 192 ms. NE. from Columbus. —Township,
 Wayne county, Ohio, 12 ms. NE. from Wooster.

—Tp., Richland county, Ohio. Pop. in 1820,
 400. —Town, Miami county, Ohio, 8 ms. SW.
 from Troy, and by post road 106 NW. by W.
 from Columbus. —Tp., Jackson co., Ohio. —

Village, Wayne co., Ia. —Village, Gallatin co.,
 Mont., 52 miles northwardly of Frankfort. —Vil-
 lage, Rutherford co., Tenn., 10 miles from Mur-
 fressborough. —Village, Lincoln co., Tenn., 56
 ms. from Murfreesborough.

Milton, or *King's Ferry*, over Cayuga lake,
 Seneca co., N. Y., 20 miles NNW. from Ithaca.

Milton, or *Broadkill*, village, Sussex co., Dela-
 ware, on Broadkill creek, 15 ms. SE. by E. from
 Milford.

Milton's Bluff. —See *Marathon*, Alabama.

Mina, village, Chautauque co., N. Y., by post
 road 374 ms. SW. by W. from Albany.

Minas Bey is a small gulf extending from the
 head of the bay of Fundy eastward into the penin-
 sula of Nova Scotia.

Minas Geraes, captain generalship of Brazil,
 bounded by the Atlantic ocean E., Rio Janeiro
 SE., St. Paul's SW., Goias W., and Bahia, or
 St. Salvador, N.; length 600, breadth 300 miles.
 It is drained by the Parana, St. Francisco, and
 Doce rivers, and traversed from N. to S. by a chain
 of mountains. It produces gold, diamonds, and
 other minerals, with an immense variety of the
 most precious vegetables. Between lat. 14 30 and
 22 30 S. Pop. 369,000.

Minasville, village, Montgomery co., N. Y.,
 35 ms. NW. from Albany.

Minch, great sound, or channel, on the W. coast
 of Scotland. It is bounded on the W. by the is-
 lands of Lewis and Harris, N. and S. by Uist, and
 Barra on the W., and on the E. by the Isle of
 Skye.

Mincio, river of Italy, flowing from the lake of
 Garda, by Mantua, into the Po, 8 miles below that
 fortress.

Mindanao, the largest of the Philippine islands,
 next to Luconia. It is 180 miles long and 120
 broad, and is governed by a sultan, who is abso-
 lute. It is a mountainous country, full of hills and
 valleys; and the mould is generally deep, black,
 and fruitful. The principal town, of the same
 name, is pretty large, and is situated on the eastern
 coast.

Mindelheim, town of Bavaria, with a castle on a
 mountain. It is the capital of a lordship between
 the rivers Iller and Lech, and is 23 miles SW. of
 Augsburg.

Minden, fortified town of Prussia, in Westphalia,
 capital of a principality of the same name. Its con-
 venient situation for trade and navigation, its brew-
 eries, sugar-houses, and wax manufacture, are great
 advantages to the inhabitants. It is seated on the
 Weser, 43 miles E. of Osnaburg. Lon. 8 56 E.,
 lat. 52 19 N.

Minden, western tp. and village, Montgomery
 county, N. Y., on the right bank of the Mohawk.
 —Tp., Monroe co., N. Y., in the NE. part of
 the county. —See *Mendow*.

Mindoro Sea, a sheet of water, having the is-
 land of Borneo SW., Magindanao E., Palawan
 W., and the Philippines NE. and N.; in extent,
 about 400 ms. from NE. to SW., with a breadth
 between Magindanao and Palawan of about 350
 ms. Lat. from 5° to 12° N., lon. 117° to 123° E.
 London.

Mindoro, one of the Philippine islands, 50 ms.
 in circumference, separated from Luconia by a
 narrow channel. It is full of mountains, which
 abound in palm trees and all sorts of fruits. The
 inhabitants are Pagans, and pay tribute to the
 Spaniards.

Minehead, borough and seaport of England, in
 Somersetshire. It is a good harbor on the Bristol
 channel for ships of large burden, and carries on a
 trade in wool, coal, and herrings. It is 31 miles

N. of Exeter, and 163 W. by S. of London. Lon. 3 34 W., lat. 51 12 N.

Minerva, tp., Essex co., N. Y., near the centre of the county. — Village, Mason county, Ky., 77 ms. NE. by E. from Frankfort.

Mine Shibboleth, village and lead mine, Washington co., Mo., about 55 ms. SSW. from St. Louis. Mine Shibboleth, according to Schoolcraft, is one of the most productive lead mines of Mo. The ore of this mine averages 62½ lbs. of metal.

Mingan, group of islands along the northern shore of the Gulf of St. Lawrence.

Mingrelia, province of Asia, which makes part of Ga.; bounded on the W. by the Black sea, E. by Imeritia, S. by a part of Ga., and N. by Circassia. It is governed by a prince, who was tributary to the sovereign of Imeritia, but in 1783 he put himself under the protection of Russia. The face of this country, its products, and the customs and manners of the inhabitants, are similar to those of Ga.

Minho, river of Spain, which has its source in Galicia, near Castro del Rey, and, passing by Lugo, Ortense, and Tey, it then divides Galicia from Portugal, and falls into the Atlantic ocean at Caminha.

Miniato, St., episcopal town of Tuscany, seated on the Arno, 20 ms. SW. of Florence. Lon. 10 45 E., lat. 43 40 N.

Minisink, town, Orange co., N. Y. It is situated on the NE. side of the river Delaware, and joining to N. J. Pop. in 1810, 4,005; in 1820, 5,053.

Minerbino, small town of Naples, in Italy, in Terra di Bari, 26 ms. N. of Cirenza. Lon. 16 19 E., lat. 41 8 N.

MINNESANGERS, the most ancient school of German poets; name from an old German word, *minne*, (love.) The verses of these poets are in the old Swabian dialect of the high German, which, under the line of Hohenstaufen, of Swabia, from A. D. 1127 to 1266, was the court language. The most ancient now known (Minnesanger) was Henry, of Valdeck, about 1170. The fine old German epic poem Niebelungen Lied comes from this school.

Minorca, one of the Balearic group, an island of the Mediterranean, lying 50 ms. to the NE. of Majorca. It is 30 ms. in length and 12 in breadth, and is a mountainous country, with some fruitful valleys, where there are excellent mules. Cittadella is the capital; but greater consequence is attached to the town of Mahon on account of its excellent harbor, which is defended by Fort St. Philip, one of the strongest fortresses in Europe, and on the fate of which the whole island depends. Lon. 3 48 E., lat. 39 50 N.

Minori, town of Naples, in Principato Citeriore, on the Gulf of Salerno, between the town of that name and Amalsi.

Minot, town, Cumberland co., Me., 35 ms. from Portland. Pop. 1824, 2,524.

Minsingen, town of Swabia, in the duchy of Wurtemberg, with a handsome castle. Lon. 9 35 E., lat. 48 32 N.

Minski, town of Lithuania, capital of a palatinate of the same name, with two citadels, one of which is seated in a morass. The country is pretty fer-

tile, and has forests containing vast numbers of bees, whose honey makes part of its riches. Minski is 65 ms. N. of Sluczka, and 100 SE. of Wilna. Lon. 26 48 E., lat. 54 11 N.

Minsk, government of European Russia, between the Dwina and Volhynia. Area 37,000 sq. ms., with a pop. of 957,000

Miolans, fortress of France, in the department of the Lower Alps and late province of Provence, seated on a craggy rock, in the valley of Barcelonnette. Lon. 6 20 E., lat. 45 35 N.

Mioss, lake of Norway, in the province of Hordaland, 80 ms. in circumference. It is divided by a large peninsula, and is from 12 to 18 miles broad. It contains one island, about 10 miles in circumference, fertile in corn, pastures, and woods, and sprinkled with several farm houses.

Miquelon, small desert island, SW. of Cape May, in Newfoundland, ceded to the French by the peace of 1763, for drying and curing their fish. It was taken by the English in 1793. Lon. 53 20 W., lat. 46 42 N.

Miramichi, bay and river of the E. coast of New Brunswick, 60 ms. S. from Chaleur Bay. The river rises about 120 ms. inland, interlocking with the sources of the Shicatahock branch of John's river.

Miranda de Douero, fortified town of Portugal, capital of the province of Tra los Montes, with bishop's see. It is seated on a rock, near the confluence of the Douero and Fresna, 208 ms. N. of Lisbon. Lon. 6° W., lat. 41 40 N.

Miranda de Ebro, town of Spain, in Old Castile, with a strong castle, seated in a country which produces excellent wine, on the river Ebro, of which it is a handsome bridge. It is 34 ms. S. of Bilboa, and 160 N. of Madrid. Lon. 3 13 W., lat. 42 49 N.

Mirande, town of France, in the department of Gers, and late province of Gascony, seated on a mountain near the river Baise. Its principal articles of commerce are wool, down, and geese. Lon. 15 ms. SW. of Auch, and 340 S. of Paris. Lon. 26° E., lat. 43 30 N.

Mirandola, town of Italy, capital of a duchy of the same name. It is a well fortified place, subject to the house of Austria, and 20 ms. NE. of Modena. Lon. 11 19 E., lat. 44 52 N.

Mirbeau, town of France, in the department of Vienne. Its asses have long been famous for their beauty and strength. It is 16 ms. N. of Poitiers, and 175 SW. of Paris.

Mirecourt, town of France, in the department of Vosges, famous for its violins and fine lace. It is seated on the river Modon, 27 ms. S. of Nancy, and 30 SE. of Toul. Lon. 6 4 E., lat. 48 30 N.

Miremont, town of France, in the department of Dordogne. Near it is a remarkable cavern, called Cluseau. It is seated near the river Vizere, 15 ms. E. of Bergerac.

Mirepoix, town of France, in the department of the Upper Pyrennees. It was lately an episcopal town, and is seated on the Cers, 15 ms. N. of Foix.

MIRZA, Arabic, a chief or very prominent person. In the early Mahomedan history, the Khalifs took the title of *Emir al Mumenin*, or *Chief of Chiefs*. *Emir*, or *Mirza*, mean essentially a

thing—a prince or distinguished person in command. Webster derives *emir* from the Arabic; but its root spreads far beyond the Arabic; it is as often a prefix as a suffix, and particularly the Slavonic dialects; hence *Vladimir* and other names. From the same original root evidently comes *miracle*, *mirror*, *mirth*, the original meaning being some thing or person standing forth eminent, or some event out of the ordinary course—a bursting forth, &c.—See *Hadge*, or *Hagi*.

Miseno, cape of Italy, in the Terre di Lavoro, between Puzzoli and Cuma. On it are the ruins of the ancient Misenum.

Miserden, village of Eng., in Gloucestershire, 6 m. N.W. of Cirencester, famous for a park, in a part of which is a mound of a circular form, now overgrown with trees. This was the site of an ancient castle, built in the reign of King John; a part of the moat which encompassed the buildings still to be seen.

Misitra, town of Greece, in the Morea. It is situated on the Vasilipotamo, ancient Eurotas, 2 m. S.W. of the ruins of Sparta, 28 m. S.E. from Tripoli, 100 m. S.W. of Athens, and 99 N. by E. of the city. Lon. 22 30 E., lat. 37 6 N.

Missassaga, river of U. C., runs into Lake Ontario between Le Serpent and Thessalon rivers, on the N. shore.

Missassaga Point, U. C., in the tp. of New York, lies on the W. side of the entrance of the river Niagara, and opposite the fortress of Niagara.

Missassaga Island, U. C., lies opposite the mouth of the Trent, and about the same distance from the portage at the head of the bay of Quinte.

Missassaguigon.—See *Rum River*.

Mississcoui, or *Mississki*, river rising in Canada, in Vermont in Franklin co., whence it flows in a western course to Michiscou or Mississcou bay, a branch of Lake Champlain.

Mississippi River. From the magnitude and importance of this great stream, the following comprehensive view is taken, not alone of its confluence properly so called, but also those in the vicinity of its delta which enter the Gulf of Mexico in the U. S.

The most southwestern stream of the U. S. is the Sabine. This river has its source in the province of Texas, N. lat. 32 30. It flows in a general course nearly S., but curves to the eastward about mid-distance between its source and mouth. At N. lat. 30° it expands into a large bay of 30 m. in length, and from 5 to 8 wide, and, at its lower extremity, again contracts into a river, and discharges into the Gulf of Mexico at N. lat. 29 28, W. lon. from W. C. 15 45.

The Sabine affords no navigation of consequence, having only 3 feet water on the bar at its mouth; the Sabine lake is also shallow, not having more than 4 or 5.

The Calcasieu is the next stream E. of the Sabine. The former rises in the angle between the Red and Red river, flows nearly S. about 120 m., and falls into the Gulf of Mexico 30 m. E. of the mouth of the Sabine. The Calcasieu, similar to the Sabine, expands into a lake, and again contracts into a river channel before its final discharge. The former is also similar to the latter in its navigation, being impeded by a bar and by the shallowness

of its large lake. The mouth of the Calcasieu river is at N. lat. 29 20.

Following the coast of the Gulf of Mexico 12 m. E. from the discharge of the Calcasieu, is found the entrance of the Mermentau. This latter stream is formed by a number of branches, having their sources in the prairies of Opelousas. The general course of the Mermentau is from N.E. to S.W., about 100 m. It is remarkable as possessing similar features to the Calcasieu and Sabine rivers, and similar also in a defective navigation, arising from a bar at the entrance, and by the shallowness of its large lake, neither affording more than 3 or 4 feet water.

An interval of near 60 m. stretches E. of the mouth of the Mermentau to that of the Vermilion, a fine but small stream, rising in Opelousas, but flowing through Attacapas into the Gulf of Mexico, after an entire course of about 80 m. The lands along the Vermilion river are of the first quality, producing cotton, and towards the mouth some plantations of sugar cane have been successfully attempted; but vessels drawing more than 5 feet water cannot enter. The Vermilion enters the Gulf of Mexico at N. lat. 29 45.

The united streams of Atchafalaya, Teche, and Courtableau, form a river of much greater importance and magnitude than any other in the U. S. W. of the Mississippi.

The Atchafalaya is the upper mouth of the Mississippi, and leaves the latter at N. lat. 31°. and W. lon. from W. C. 14 47, by a stream 110 yards wide; its course is a little E. of S., and by its windings 48 m., where it receives the Courtableau from the N.W. Below the Courtableau the Atchafalaya flows 80 m., and is again augmented by the Teche, also from the N.W. After receiving the Teche, the Atchafalaya flows 20 m., where it is lost in a large bay, known by the same name. The Atchafalaya bay is about 23 m. long and 13 wide. It is enclosed on the S.W. by two long narrow points of land, Point Chevreuil and Point au Fer. Between those two points extends a bar, over which there is 9 feet water, and within the bay and river sufficient depth to permit the passage of any vessel to the mouth of the Teche which can pass the bar. The mouth of Atchafalaya is at N. lat. 29 21, W. lon. from W. C. 14 22.

The Teche rises in Opelousas, and, flowing 30 m., enters Attacapas, where it receives a creek from the W., and assumes the form of a river. After entering Attacapas, the Teche continues, by a very winding course of 80 m., a little E. of S., to New Iberia, N. lat. 30 2. The town of New Iberia stands upon the right bank of the Teche, at the head of schooner or sloop navigation. Vessels, however, drawing 5 feet water, can ascend to this place at all seasons. The Teche, below New Iberia, gradually widens from about 30 to 100 yards, and deepens from 5 to 30 or 40 feet. Its stream now turns E.S.E., and continues 90 m., where it mingles its waters with the Atchafalaya.

The Teche is a small but very singular and important stream. In all its length, of about 130 m., it drains one of the most fertile tracts in the U. S. On its upper waters cotton, and towards its mouth sugar and molasses, are the staples produced for market.

New Iberia is a port of entry, and vessels are

frequently cleared out from that place, but the general commercial communication is with the city of New Orleans, through the Atchafalaya, Plaquemine, and Mississippi, or by the Lakes Palourde and Veret, and the Lafourche and Mississippi rivers.

The Plaquemine is an outlet of the Mississippi, 117 ms. above New Orleans. It is only during the seasons of flood that water is discharged into the Plaquemine, which, after a very circuitous course of 15 ms., joins the Atchafalaya. Through the Plaquemine is, however, transported most of the merchandise for the supply of the very flourishing settlements of Attacapas and Opelousas, and by this route is also sent to market the valuable staples of those places.

Boats from 15 or 20 to 50 or 60 tons ascend from New Orleans, and, entering the Plaquemine, pass into the Atchafalaya. Those destined to the lower parts of Attacapas descend the latter river, and enter by the mouth of Teche. Those bound to the central part of Attacapas ascend the Atchafalaya about 20 ms., and thence, by an outlet and Lake Chetimaches, proceed to the Fause Point landing. Here is a portage of 10 or 12 ms., to St. Martinsville, the chief town of Attacapas. Another outlet and a chain of small lakes and bayous (creeks) enable vessels to be conveyed to the upper part of Attacapas and the lower part of Opelousas. Vessels destined for the higher and central parts of Opelousas ascend the Atchafalaya to the mouth of Courtableau, and thence upon the latter river to Lemell's landing, 6 ms., or into bayou Carron, within 4 ms. from St. Landry, seat of justice and chief town of Opelousas.

The Courtableau is a fine little river, formed by the united streams of Crocodile and Bœuf. The two latter creeks unite at N. lat. 30 34. The general course of the Courtableau is SE., about 30 ms. in length. It affords, during high water, part of a very eligible channel of communication between the settlements of Opelousas and the lower part of Rapides with the banks of the Mississippi.

The navigation of the Atchafalaya is entirely obstructed by rafts of timber, above the mouth of the Courtableau. These extraordinary masses of trees commence 26 ms. below the efflux of the Atchafalaya from the Mississippi, and extend by intervals to within 5 ms. of its junction with the Courtableau.

Advancing along the Gulf of Mexico, eastward from the mouth of Atchafalaya, the Lafourche is the first inlet of consequence, in a commercial point of view. In the intermediate distance of 60 ms., several small creeks enter the gulf, but, from their very abridged length, of course, are unimportant.

The Lafourche (the Fork, as its name imports) is an outlet of the Mississippi, and the second from the right in descending from the Atchafalaya, the Plaquemine being the first. The outlet of the Lafourche is at N. lat. 30 6, W. lon. from W. C. 14 1. After leaving the Mississippi, the general course of the Lafourche is SE. by S. 90 ms. It enters the Gulf of Mexico at N. lat. 28 57, W. lon. from W. C. 13 30.

The Lafourche is one of the most important inlets of Louisiana, having 9 feet water on its bar,

and admitting vessels drawing 4 or 5 feet to water in 30 ms. of its efflux. An arable border of extremely productive soil skirts both banks of Lafourche for 60 or 70 ms. from the Mississippi. Cotton and sugar are the principal staples. Most of the produce and merchandise of the settlements along its banks are transported by the Mississippi to and from New Orleans.

Between the mouth of the Lafourche and that of the Mississippi, several inlets admit a boat navigation to New Orleans. The principal of these bays is that of Barataria, by which, and a number of lakes and interlocking streams, a direct communication exists from the Gulf of Mexico to the Mississippi at New Orleans.

The Mississippi itself has three main and two lesser passes or outlets, the most frequent of which is that of the SE., upon the bar of which there are 12 feet water at low tides. Next to that of the SE., that of the SW. is the best entrance. The latter has indeed as great a depth of water as the former. Upon the south pass there are 8 feet water. These three are the chief outlets of the great stream. The West, North, and Pass au Loutre, have from 5 to 8 feet water on their respective bars.

Between New Orleans and Mobile bay a very interesting inland navigation exists, through the Pontchartrain, the Rigolets, Lake Borgne, Pass au Christian, and Pass au Heron. This channel is formed by a chain of islands, the low marshy space NE. of the Mississippi river, and the north shore of La. and Miss. Vessels above five feet draught cannot make this passage, as, over either the shoals of the Pass au Christian or Heron, it is the ordinary depth.

The interior channel is continued to the North of New Orleans, by Lake Pontchartrain, Pass au Manchac, Lake Maurepas, Amite river, and Bayou Iberville, to the Mississippi river, 125 ms. by water above that city. Schooners drawing 5 feet water go up as far as Galvezton, at the confluence of Bayou Iberville and Amite river. From the efflux of the Iberville to the Pass of Heron about 200 ms., 80 of which are to the NW., and 120 to the NE. by E. of New Orleans. Into this extensive channel are discharged, exclusive of the Amite and Mobile rivers, the Tickfoha, into Lake Maurepas; the Tangipao and Chifuncte, into Lake Pontchartrain; Pearl river, into the Rigolets; and the Pascagoula, opposite Horn island. Each of these minor streams afford less or more facilities to navigation, but do not admit vessels of more than 5 feet draught but a very short distance from the sea. Schooners are most commonly used in the commerce of these inlets and shallow rivers. A steamboat plies, however, between New Orleans and Mobile and Blakely.

Mobile bay is a fine sheet of water, of 30 ms. in length, with a mean width of 11 ms. Dauphin island and Mobile point land-lock Mobile bay. The main entrance, with 18 feet of water, lies between the island and point. Pass au Heron, with 5 feet, lies between Dauphin island and the main shore of Alabama. A bar, with only 10 feet of water, crosses Mobile bay, about 5 ms. below the town of Mobile.

Above Mobile town, the bay gradually narrows, and is succeeded by a low sunken tract of 30 ms.

length, and from 3 to 5 ms. wide. Through occasionally inundated tract, beside many streams, meander the Mobile and Tensau rivers—the former being the continuation of the Tombigbee, and the latter of the Alabama river. Vessels drawing 5 feet water are taken as high in the Tombigbee as Fort St. Stephens, and in the Alabama to Fort Claiborne. At each of those two places shoals impede the further navigation of the rivers, respectively, with vessels propelled by sails, though boats ascend and descend, in the Tombigbee, to Cotton Gin port, and in the Alabama to its head, at the junction of Coosa and Apapoosa.

East of Mobile, Pensacola is the first harbor of consequence. The Perdido intervenes, but brings but little water, and terminating in a barren uninteresting country, merits no particular notice.

Pensacola, to its depth of water, is one of the finest havens of the world. Its entrance is at N. lat. 30 23, W. lon. from W. C. 10 20. The distance between Rose island and Carancas point over a bar having 22 feet water, upon a fine sandy bottom. The bay is about 20 ms. in length, with a mean width of about 3 ms. The anchorages in every part a soft mud or sand. No rocky shores or dangerous shoals environ this noble sheet of water. The bay, above the town of Pensacola, is divided into two arms: one, stretching N., reaches the Escambia, and the other, to the NE., the Yellow Water river.

The basin of the Appalachian is remarkable as being the connecting link between the waters which flow into the Gulf of Mexico from those which enter the Atlantic ocean. The Appalachian is formed by two streams, the Chatahochee and the rivers. The former rises in the Appalachian mountains, at N. lat. 35°, interlocking with the sources of Tennessee, Oakmulgee, Oconee, and Savannah rivers, and, flowing SW. by S., through 33° lat., turns thence nearly due S. to N. lat. 30° where it receives the Flint. The latter, an inferior stream to the former, has its sources in the mountains between the Oakmulgee and Chatahochee rivers, at N. lat. 33 40, and, flowing SW. by S. 30 ms., unites with the Chatahochee, and forms the Appalachian.

This latter fine river flows a little W. of S. to N. lat. 29 50, having an entire course of about 70 ms.; its mouth is into St. George's sound.

The basin of the Appalachian affords an inland navigable expanse of 400 ms. in length, with a mean width of 150, and having an area of about 60,000 sq. ms. Though interrupted by some falls and many shoals, the rivers of Chatahochee and the others are navigable almost to their sources, and the mountains of considerable size ascend the Appalachian to its head.

Cotton, tobacco, grain, tar, and lumber, are the principal staples of this basin.

Through all the immense distance from Pensacola to the bay of Espiritu Santo, except the mouth of the Appalachian, there is no inlet of any commercial consequence in a general view.

The fine bay of Espiritu Santo is situated upon the N. W. coast of the peninsula of East Florida, at N. lat. 27 40, W. lon. from W. C. 6 20. There is about 2 feet more water on the bar of Espiritu Santo than upon that of Pensacola, but the coun-

try round the latter remains so imperfectly known that its commercial value cannot be estimated with any certainty at present.

Having followed in regular order the minor streams flowing into the Gulf of Mexico, we now turn to a review of the basin of the Mississippi.

This great stream, forming a river of the first order, deserves particular notice in an elementary work. Under the general term Mississippi, we include not only that river properly so called, but every secondary or confluent body of water which enters into or contributes to augment the mass of the main recipient.

Following this plan, the basin of the Mississippi may be naturally divided into four grand sections: first, advancing from E. to W., the valley of Ohio and its tributary waters; that of Mississippi and its branches; that of Missouri and its branches; and that of the lower Mississippi, below the mouth of Missouri. Of these sections in order.

Ohio valley.—This very important region embraces about 200,000 sq. ms. of area, equal to 128,000,000 of U. S. acres. Its greatest length is from the NE. sources of the Alleghany river to the head of Bear creek, a branch of the Tennessee river, 750 ms. Its greatest breadth, from the sources of the French Broad to those of the Wabash river, 500 ms. In point of climate, it extends from N. lat. 34 0 to 42 30, or through 73° of lat. affording a very considerable difference of seasons and temperature.

It has been long the opinion of the author of this article, an opinion formed from the fruits of many years' observation, that the Ohio basin once formed an immense inclined plane, and that the beds of all the rivers have been formed by abrasion of water. This theory is supported by Mr. A. Bourne, author of a large and valuable map of the State of Ohio. The following is a quotation from a manuscript letter from that gentleman on the subject: "The hills are generally found near the rivers or large creeks, and parallel to them on each side, having between them the alluvial valley, through which the stream meanders, usually near the middle, but sometimes washes the foot of either hill alternately. Perhaps the best idea of the topography of this State may be obtained by conceiving the State to be one vast elevated plain, near the centre of which the streams rise, and in their course wearing down a bed or valley, whose depth is in proportion to their size, or the density of the earth over which they flow. So that our hills, with some few exceptions, are nothing more or less than cliffs or banks, made by the action of the streams; and although these cliffs or banks, on the rivers and larger creeks approach the size of mountains, yet their tops are generally level, being the remains of the ancient plain. In the eastern part of the State some few hills are found, in sharp ridges, similar to those in the Eastern States. The base of the hills is generally composed of limestone, freestone, or sandstone, slate, and gravel, admixed mineral coal, ochre, &c."—*Bourne.*

The author of this article surveyed, in 1815, Pittsburg and its environs, and found the rocks there, as in every other part of the Ohio valley, perfectly parallel to the horizon—of course, speaking technically, floetz formation. The circumstance most conclusive of the fact that the hills

and valleys of this region were formed by abrasion, is the uniformity of elevation and similar material of corresponding strata on the opposing banks of the streams—phenomena every where visible, where the nature of the country will admit accurate observation. The coal strata near Pittsburg are in every place found about 340 feet above low-water level in the rivers of that vicinity.

Embracing the whole Ohio valley in one perspective, it is found divided into two very unequal portions by that river; leaving 120,000 sq. ms. to the SE., and 80,000 on the NW. The Ohio, forming a common recipient for the water of the minor streams of both slopes, flows in a very deep ravine, S. 64° W., 478 geographical, or 548 ms., in a direct line from Pittsburg to the junction of this river with the Mississippi. The entire length of the Ohio, by its meanders, is, by actual admeasurement, 948 ms.

The peculiar features of this river, and its immediate banks, have led to most of the gross misrepresentations respecting the valley in general. The low-water surface of the Monongahela, at Brownsville, has been found to amount to 850 feet above high tide in the Chesapeake bay. Estimating the fall in the Monongahela to be 20 feet from the borough of Brownsville to the city of Pittsburg, would produce 830 feet as the elevation of the latter place above the Atlantic ocean. The apex of the hills in the vicinity of Pittsburg are within a small fraction of 460 feet above the low-water level of the Monongahela, Alleghany, and Ohio rivers. By these elements we have 460 added to 830, or 1,290 feet as the extreme elevation of the hills near Pittsburg above the Atlantic tides. We may therefore, if the correctness of our previous theory is admitted, suppose that the latter elevation was that of this part of the original plain from which the valley has been formed. This elevation evidently declined towards the now mouth of the Ohio, leaving a descent for the waters.

The actual elevation of the present surface of the country adjacent to the great central junction of the Mississippi with its confluent is not determined with the same precision with that of Pittsburg; but, from the length of the Mississippi below the mouth of Ohio, a near approximation may be obtained. From the mouth of Ohio to that of the Mississippi, the distance is within a small fraction of 11,000 ms., which, at $3\frac{1}{2}$ inches to the mile, yields 3,850 inches, 320.8 feet, as the entire depression of the Mississippi river from the mouth of the Ohio to the Gulf of Mexico.

The fall in the Ohio river exceeds that of the Mississippi, and has been estimated at about five inches to the mile; consequently, if we multiply 948 ms., the entire length of Ohio, by 5, we have 4,740 inches, or 395 feet, as the amount of descent in that stream; and, adding 395 to 320.8 feet, we find 715.8 feet as the declivity of the waters from the confluence of the Monongahela and Alleghany rivers, at the city of Pittsburg, to the Gulf of Mexico.

A very remarkable difference is perceptible between the different elevations of Pittsburg above the Chesapeake bay and Gulf of Mexico, the excess of elevation in favor of the latter sheet of water. This apparent phenomenon is explainable on the simplest laws of hydrostatics. The

Gulf stream flows from the Gulf of Mexico towards that part of the Atlantic ocean adjacent to the Chesapeake bay, demonstrating that a difference of level must exist between the extremes, sufficiently great to admit a current of considerable velocity. This velocity has never been very accurately determined; but, if we allow only $1\frac{1}{2}$ inch per mile, will yield in 900 ms. $11\frac{1}{2}$ feet. That the actual fall from Florida channel to the mouth of Chesapeake bay considerably exceeds 100 feet, there can be no rational doubt, when the necessary geographical phenomena are duly examined.

We may, from the data given, consider the level of the Ohio composed of an inclined plane chequered by the deep channels of the rivers, hills, and extensive flats, the whole resting upon a base of secondary formation. In many parts of this interesting region, as in the State of Kentucky, the beds of the rivers are vast chasms, rather than valleys, in the true acceptation of the latter term. The two opposing slopes exhibit some curious contrasts. Though considerably more extensive, the southeastern slope has few external remains of the ancient plain; the northwestern slope, on the contrary, contains immense remains of the former plain. The rivers which enter the main recipient from the former, rising in or near the northwestern ridge of the Appalachian mountains, are precipitous from their sources, flow, as already observed, in very deep channels, while those streams which enter from the northwest rise out of a level, continuous plain, in many places morass, as in part of the States of Ohio and Indiana. The latter rivers are sluggish towards their sources, gaining velocity in their advance towards the Ohio river.

The secondary rivers of the southeastern slope are the Monongahela, Little Kenawha, Great Kenawha, Sandy, Licking, Kentucky, Green, Cumberland, and Tennessee. Those flowing from the northwestern slopes are the Alleghany, Bear, Muskingum, Hockhocking, Scioto, Miami, and Wabash. Of these streams, the Alleghany, in Pennsylvania, flows into N. York, and, winged from N.W. to W. and S.W., again enters Pennsylvania, forming the northwestern, or rather northern constituent of the Ohio. No branch of the Alleghany flows from the high table land; the region it waters is in some parts mountainous, and everywhere hilly; the sources of the Alleghany, however, from the highest point of the valley of Ohio. Advancing westward from the region entered by the Alleghany, the sources of the Bear exhibit the commencement of the great central plain which separates the two great basins of the Mississippi and St. Lawrence. This plain stretches westward, and, widening in extent throughout the States of Ohio, Indiana, and Illinois, reaches the Mississippi river. In its natural state, the valley of Ohio was, in the greatest part of its extent, covered by a dense forest, but the central plain presented a very remarkable exception. As far as the sources of the Muskingum, commenced on savannahs, covered with grass, and devoid of timber. Similar to the plain itself, those savannahs expanded to the westward, and on the waters of the Illinois river opened into immense natural meadows, generally known under the denomination of prairies.

We have dwelt with more minuteness on this general plain than we would otherwise have done, and with a conviction that it affords phenomena highly illustrative of the peculiar structure of that part of North America. It has been shown in this article that the surface of Ohio, at the city of Pittsburg, is 830 feet above the nearest tide water of the Atlantic ocean, and 715.8 feet above the surface of the gulf of Mexico. Lake Erie has been found by actual measurement 565 feet above the tide water of the Hudson at Albany; consequently, the level at Pittsburg is 265 feet above the surface of Lake Erie; the intermediate distance, in a direct line, is 105 ms. Therefore, if a channel was opened in the Ohio river at Pittsburg to Lake Erie, as if it were the bottom of the river, and sloping towards the lake by gradual descent to its surface, the waters of Alleghany and Monongahela would, in place of flowing down Ohio, rush into Lake Erie with the enormous velocity arising from a fall of 565 feet in 105 miles; or upwards of $2\frac{1}{2}$ feet per mile. When these mathematically established facts are contrasted with the circumstance, that the same northwestern waters of Alleghany, those of Lake Chautauque, rise within three miles of the surface of Lake Erie, the singular but real construction of the valley becomes apparent. Nothing but actual measurement could render credible that Pittsburg, situated at the confluence of two streams, each of which, following their meanders, have flown above 200 miles, and one of which, (Alleghany,) having a distance of its sources so near the very margin of Lake Erie, and yet, that the city of Pittsburg should be situated two hundred and sixty-five feet above the surface of the lake.

It is by far the most remarkable feature of the Ohio valley is, that its real slope does not correspond to the courses of its rivers. It is a fact not generally known, that loaded boats at high water can descend from Lake Michigan into Illinois river, and from thence *per versa*. We have seen that Lake Erie was 565 feet above the level of the Atlantic tides. The elevation of Lake Michigan above Lake Erie cannot be accounted for from the shortness and gentle currents of the river, St. Clair river, and straits of Michilimackinac, exceed 35 feet. We may therefore suppose the level of Lake Michigan to be 600 feet as the level of Lake Erie. This would correspond very nearly with that of the Ohio river, between the mouths of Miami and Kentucky rivers. Illinois river, we will see, presents much more the aspect of a canal than that of a river, whilst the central table land we have referred to is so elevated as to produce watercourses whose descent is rapid, and those flowing into Lake Erie are all precipitated over falls before reaching their recipient. During the continuance of a high flood, loaded boats of large tonnage may be navigated from the rapids of Ohio by that river, the Mississippi and Illinois rivers, and through the Indian sea, to the cataract of Niagara, without encountering a single rapid, whilst the direct line between the extremes of this navigation would pass over an elevated ridge. When due attention is given to the real phenomena of the connected basins of the Mississippi and St. Lawrence, the true causes of the apparent anomalies we have noticed are developed. It is at once rendered apparent, that the real slope of the Ohio valley is nearly at right angles to the range of the Appalachian mountains,

and that its lowest line of depression is the channels of the Illinois and Mississippi rivers.

Soil, climate, and productions.—The soil of this interesting section of the earth is by no means so uniform as is generally supposed, though, taken as a whole, it may be considered fertile. The alluvial bottoms of the streams, great and small, are generally a deep loam, exuberantly productive. This rich vegetable earth in many places reaches to the apex of the highest hills. Those hills present, however, great variety of soil; always clothed with timber, though often precipitous, rocky, and sterile. The extreme southeastern part, from the sources of Alleghany to the most southern part of the valley in the State of Alabama, presents a mountainous, or very broken, hilly, tract of country, upwards of 700 miles in length, with a mean width of about 100. The soil is on this region extremely varied; and as it contains at its extremities nearly the greatest contrast of latitude of the valley of which it forms a part, the vegetable productions, natural and artificial, are here also most varied. There are few timber trees known on this continent between N. latitude 34° and 42° , but which are here found. The most prominent and valuable of which are ten or twelve species of oak, hemlock, pine, the *liriodendron tulipifera*; five or six species of hickory and walnut, three species of maple, one of which (the *acer saccharinum*) is amongst the most singular and valuable trees known on this globe; three or four species of ash, with an immense variety of useful trees and shrubs not enumerated. The flora is also highly varied and elegant. Medical plants abound. Spring water is abundant and excellent.

Of naturalized plants, trees, and shrubs, the number and variety preclude a complete specification. Extending through eight degrees of latitude, and presenting a considerable difference of level, the climates admit the cultivation of plants whose powers of resisting the inclemencies, or of profiting by the changes of seasons, are very different. The cereal gramina—wheat, rye, oats, barley, and Indian corn, or maize—are every where cultivated. Meadow grasses flourish best in an advance to the north. In the southern part, even where extensive settlements have been made, meadows are rare, but towards the northward form a large part of rural economy. This observation, though in a more limited extent, may be applied to orchards, and even gardens. Where the crops become very valuable, horticulture is every where neglected, as are orchards, except in the vicinity of cities or large towns. In the region before us, below N. lat. 36° 30', cotton commences to be cultivated as a valuable crop. Some culture of this vegetable extends N. of the assumed limit, but rather for domestic use than as an article of commerce. The quantity and quality of this vegetable is enhanced, soil and exposure being equal in a very near ratio with advance to the south. As we will have more occasion to dilate on this vegetable in the sequel of this article, it would be irrelevant to touch further on the subject in this place.

The orchard trees generally cultivated in the region before us are the apple, pear, peach, plum, nectarine, &c.

The mineral treasures of this region compose a large share of its most valuable productions. Iron,

salt, and mineral coal, are the most valuable and abundant. Iron ore is found in almost every section of this extensive line. The immense masses of mineral coal are very extensive; those near Pittsburg are only the most abundant and best known. It is amongst the most remarkable features in the natural history of the United States, that, from Onondaga, in the State of New York, to the SW. angle of Virginia, the earth appears in every place, at a certain depth, to afford water saturated with *muriate of soda*, (common salt.) This indispensable mineral is found where, if wanting, it could not be obtained without very great expense. Salt is now made at Onondaga, in New York; Conemaugh, in Pennsylvania; and on the Kenawha and other places in Virginia—all in the same range.

The Ohio river bounds the tract we have reviewed as far southward as the mouth of the Great Sandy. Here the former turns almost at right angles, and, pursuing a course something N. of W. to the mouth of the Great Miami, again inflects about SW. by W. to its junction with the Mississippi. This wide curve, in conjunction with a part of the Mississippi, bounds the great limestone expanse of Kentucky and W. Tennessee. This latter region, though adjoining the former, presents features essentially different. The base of the Kentucky section appears to be in great part flætz, or secondary limestone; the face of the earth becomes more monotonous; the rivers flow in many places in chasms, walled on both banks by precipices of limestone. Fresh water, in many places, scarce. Minerals rare, if limestone is excepted. In point of climate and vegetable production, no very material difference appears between the contiguous parts of the two sections under review, except that which arises from soil. In respect to extent and fertility, the soil of Kentucky and W. Tennessee is generally productive, and in a variety of places highly fertile. Vegetables, either indigenous or exotic, are very nearly similar on both sections on the same line of latitude, and of equal exposure and elevation. From a lower surface, cotton and other tender vegetables are cultivated further north, near the Ohio, than towards the northwestern ridges of the Appalachian mountains. The climate of both will be more amply noticed in the sequel of this article.

Respecting the northwestern section of the Ohio valley, a few observations will suffice, after what has preceded respecting that of the SE., and on the review of the whole valley in general. Similar latitudes present in great part similar climate, phenomena, and vegetable products. From the peculiar structure of the northwestern section already delineated, it must be evident that mineral products are rare; and such is the fact. Iron ore is found, though not abundantly, in the NW. part of Pennsylvania and NE. part of Ohio. Mineral coal abounds along the Ohio, and on some other streams, as far down the valley as Cincinnati, and might, it is probable, be obtained in other places, if the earth were perforated to sufficient depth. Indications of *muriate of soda*, and some trifling fragments of sulphate of lime (gypsum) have been discovered, but neither to any considerable extent. In the far greater part, however, of this section of the Ohio valley, few or no indica-

tions of minerals appear. The flatness and peculiar structure of two-thirds of the States of Ohio, Indiana, and Illinois, preclude the exposure of mineral bodies, if such existed. It has been the action of water in wearing deep channels the earth's surface, that mineral bodies have, in most cases, been exposed to human view and use.

In point of soil, climate, and vegetable production, the southwestern section of the Ohio valley has been too highly colored, though favorable many respects to human residence. The range of country within 100 ms. of the Ohio river has been broken into hill and dale, good wholesome water is abundant, but receding to the central table land is in many places wanting. In most essential circumstances, as respects natural phenomena and human economy, strong analogies exist between contiguous parts of the two great sections of Ohio valley, whilst their extremes present a total contrast. It would be mere repetition to dilate further, on what has been given on this subject; the foregoing observation was made in order to draw the reader's attention to features so strongly traced and illustrative of the subject on which we are treating. It has been too generally prevalent, with authors as well as travellers, to represent the Ohio valley as a monotonous surface, uniform in aspect, climate, and fertility; whilst, in all these respects perhaps no equal region of the earth presents, in these points, more marked or more abrupt contrasts, if some very mountainous tracts are excepted.

Valley of the Mississippi Proper.—Before entering upon the physical survey of the particular valley of the Mississippi above its junction with Missouri, it is necessary to take a view of the entire stream which now designates the whole basin.

In our defective state of information, it is impracticable to determine which is the most remote branch of the Mississippi, nor is it, perhaps, an object of much consequence. The latitude and longitude of its source are also undefined. Authorities on that subject differ so much that no great confidence is due to any. It is probable that, like other rivers, no real certainty of the true source or latitude is attainable without extraordinary pains and skill. We may, however, assign N. lat. 48°, and W. lon. W. C. 18°, as a probable source of that great river. Its general course is about SW. 300 ms. to the mouth of the Corbiere, which comes in from the right. Below the Corbiere the Mississippi assumes a southeastern course of 200 ms. to St. Anthony's falls, at the foot of which it receives the St. Peter's, a large tributary stream from the NW. Below the mouth of the St. Peter's, the Mississippi continues SE. 80 ms., and in that distance receives from the left the St. Charles, Chippeway, and Black rivers. Between the mouth of the former occurs Lake Pepin, a mere dilatation of the river. After receiving Black river, the Mississippi curves more to the S., and 80 ms. below the former receives from the left a large branch of the Wisconsin, thence again turning to SE. 100 ms. is joined by Rock river, a stream of considerable size, flowing from NE. to SW., and rising at Lake Michigan. Below Rock river the Mississippi turns to a little W. of S. 100 ms. to its junction with the Lemoine river, a very considerable tributary stream from the NW. One hundred and

ty miles in a southeastern course, below the Lemoine, the Illinois unites with the Mississippi, and 15 ms. lower the latter and Missouri form a junction. the entire length of the Mississippi above the mouth of the Missouri is, by comparative estimate, 995 ms. The country drained by the river is generally rather level than hilly - much of the surface prairie. Except towards its source, no lakes of any considerable consequence are found in any of its confluent. Its waters are tolerably limpid and its current gentle. Though from from accidental circumstances the Mississippi has gained the pre-eminence in giving name to the general recipient, it is, nevertheless, a mere branch, and by no means the principal one of Missouri. Below their junction the united stream flows 198 ms. SE., where it receives an immense accession of water from the channel of Ohio, below which the segregated mass turns a little W. of S., and flows at direction 316 ms., receives the White River, and 14 ms. lower the Arkansas, both from the right. The Yazoo enters from the left, 187 ms. below the mouth of Arkansas, and 211 ms. below the mouth of Yazoo the Mississippi receives its last tributary stream of consequence, the Red River, from the right. Two ms. below Red River the Atchafalaya flows out to the S. From the mouth of Arkansas to the efflux of Atchafalaya the general course of the Mississippi is nearly from N. to S. Below the former the latter assumes a more easterly course, which it pursues 347 ms. to its exit into the Gulf of Mexico. The entire length of the Mississippi, below the mouth of the Ohio, is 1,273 miles by the windings of the river. If one-third is added to its comparative length above Missouri, for its particular meanders, the result will give 1,327 ms., which, added to the 1,273, yields 2,600 ms. as the entire length of the Mississippi, following the bends.

Like all rivers of great length, the Mississippi is exempt from sudden overflows, but subject to annual rise and fall. The periods of these are tolerably regular, but the quantity and direction of the water differ continually, and often to a great extent in two succeeding seasons. The river increases its swell generally in March or the beginning of April. The increase of water, at first rapid, gradually becomes more slow, until the supply beginning to exhaust, the volume commences to diminish or decrease, which, at Natchez, is in a long period of years, from the 15th to the 20th of June, and at New Orleans in the first week in July. The rise is, however, in most years, a lesser and earlier flood, which varies in time much more than that of the spring and summer. In October, November, or December, this lesser flood intervenes; usually in the last days of December and first of January. This lesser flood seldom rises so high as to overflow the banks; and it has been observed that when the earlier flood is more than commonly high the later flood is in proportion lower than usual. The efflux of Plaquemine is the commencement in the delta of the excess and period of the floods.

The velocity of the current of the Mississippi is often greatly mistaken. Taking the motion of the water in the Ohio, the only safe criterion, it is found that the current moves more rapidly than the mass, but even the former does not move by any means with the rapidity usually supposed.

The depth of water in the Mississippi varies of course with the increase and decrease of its floods; but this difference of elevation is more perceptible above than in the delta. At Natchez it is from 30 to 40 feet, at Lafourche about 23 feet, and at New Orleans about 9 feet. There is usually about 12 feet water on the bars of the Northeast and Southwest Passes, in the South and West Passes 9 feet, and in those of the North and Pass à la Loutre 8 feet. Above the Passes the river deepens to upwards of 100 feet. At New Orleans it is upwards of 120; and at the Lafourche 153 feet at high water. There is no place below the mouth of the Ohio where the channel is ever less than 12 feet in depth.

Valley of the Mississippi Proper above the mouth of the Missouri.—In point of area the valley of the Mississippi Proper is not so extensive as that of Ohio, the former only extending over a surface of 180,000 sq. ms. Its greatest length is from the sources of the Mississippi river to the junction of that stream with the Missouri, 650 ms.; and its greatest breadth, from the sources of the Wisconsin to those of Lemoine river, 350 ms.

Before proceeding further, however, with the descriptive geographical detail, it may not be considered irrelevant to review one of those great natural features of North America, without attention to which, no correct conception of its peculiar topography can be obtained. This feature is the great natural meadows known by the name of prairie. In a state of nature, with but very partial exceptions, a dense forest covered all those parts of the continent of North America contained in the Atlantic slope; the lower part of the basin of St. Lawrence, below the head of Lake Erie, and two-thirds of that basin to its extreme northwestern point; N. of the St. Lawrence basin to the 55th degree of N. lat.; four-fifths of the valley of Ohio; the residue of the continent E. of the Mississippi river to the Gulf of Mexico; and W. of that stream from 50 to 100 ms. This enormous forest, one of the largest on the globe, remains yet 19 parts in 20, the efforts of man having made but partial inroads on either its mass or extent. This great forest is bounded on its western limit by another region of much greater area, but with a very different character. The second may be strictly called the grassy section of the continent of N. America, which, from all that is correctly known, stretches from the forest region indefinitely westward, and from the Gulf of Mexico to the furthest Arctic limits of the continent. The two regions are not divided by a determinate limit. In passing from one to the other, the features respectively are so blended that the change is in most places imperceptible, though in some instances extremely abrupt.

In general the prairie region is less hilly, mountainous, or rocky, than that of the forest, but exceptions in both cases are frequent. Plains of great extent exist in the latter, and mountains of no trifling elevation and mass chequer the former section. We are now to approach the survey of regions in which prairie forms no small part of the entire surface, and will, in the sequel, reach oth-

ers, where those seas of grass extend over almost the whole superficies.

The extreme northern source of the Mississippi, strange as it may appear, continues unknown. The nature of the country, indeed, renders precision on this point difficult, without extreme expense of labor and time. We have assumed N. lat. 48° as the source of this great river; its junction with Missouri being at N. lat. 38 50, it flows consequently through 9° of lat. within a trifling faction. The length of the Mississippi above the mouth of the Missouri is still less accurately known than the position of its source, every authority differing from each other on the former subject. That nearly all estimates of its length are overrated, there are many weighty reasons to believe. Compared with the Ohio, on most maps, no essential difference appears when the Alleghany is added to the latter. The actual length of the Ohio, by its meanders, we have shown to be 948 ms., that of the Alleghany is about 250; the two distances united amount to 1,198, say 1,200 ms. For a long period the Ohio itself was estimated at 1,188; more correct information corrected the error. On all maps, and from every information we have seen, the sinuosities of the Ohio are at least as great as those of the Mississippi above the mouth of the Missouri; we may therefore, without much risk of material error, give 1,327 ms. as the maximum length of the Upper Mississippi.

The confluent rivers of the Mississippi, advancing from its source along its right bank, are Leech Lake river, Vermilion, Pine river, Riviere de Corbeau, Elk, Sac, and Crow rivers; these enter above the falls of St. Anthony; below that point are St. Peter's, Upper Iowa, Turkey, Little Maquaqueois, Galena, Great Maquaqueois, Lower Iowa, Lemoine, and a few other streams of little note between the mouth of Lemoine and that of Missouri. From the left the Mississippi receives, advancing from its source, Thornbury river, Round Lake river, Turtle, Portage river, Chevreuil, Prairie, Trout, Sandy Lake river, St. Francis, and Rum rivers. These streams enter above the falls of St. Anthony. Below that point are St. Croix, Chippewa, Black, Prairie, Le Crosse, Wisconsin, Sissinawa, Riviere au Fevre, Rock, Henderson's, and the Illinois. These streams are given, in most part, from the authority of Mr. Schoolcraft, and are also more minutely detailed, from the circumstances that the valley of the Mississippi proper is yet imperfectly known, of great importance in the geography of the U. S., and that the source of intelligence is recent and respectable.

Mr. Schoolcraft estimates the elevation of the sources of the Mississippi at 1,330 feet above the Atlantic. From comparison with our calculations respecting the descent of the Ohio, a very remarkable coincidence appears, though founded upon totally independent data.

The valley of the Mississippi, though contiguous to that of Ohio, exhibits an aspect essentially different. The sources of the latter we have found issuing from an elevated, mountainous, hilly, and broken country; those of the former, on the contrary, flow from an immense marshy plain, in great part devoid of timber. The humble elevation of the region from which the sources of the Mississippi are drawn accounts for the adjacent country

remaining in its primitive state, and fully corroborates the correctness of the theory assumed respecting the valley of Ohio.

One of the first observations which strikes the mind, on a survey of this extensive tract, is general monotony. No chains of mountains, note, or even lofty hills, rise to vary the perspective. Some elevations there are towards the sources of the largest confluent, and a few solitary hills, dignified, for want of contrast, by the absence of mountains. The Mississippi is traversed several falls, such as those of Pecagama, a midway between Sandy and Winnepe lakes N. lat. 47 30, the Little falls, at N. lat. 45°, Big falls, below the mouth of the Sac river, those of St. Anthony, at N. lat. 44°, immediately above the mouth of St. Peter's river. The absence of extensive prairies, when first seen, has an imposing effect upon the mind; but that impression is soon lost, and a dreary void obtrudes its place. Many parts of the Mississippi banks are high, broken, and precipitous; but, taken as a whole, this great valley presents few objects which those can dwell with interest who pass over the rich, ever-varying scenery of Ohio, particularly that of its banks and southeastern slope.

Had the head waters of the Mississippi descended from a mountainous, or even a very high land, similar to that from which flows the Ohio, with a slope of sufficient inclination, the general face of the country drained by the former would have now assumed an aspect similar to that from which flow the head waters of the latter. But in reality, though on a much larger scale the Mississippi resembles those of the NW. slope of the Ohio valley, in the circumstance of flowing from a flat table land, and in gaining ascendancy in depth of channel in their progress towards the respective recipients. It is a feature peculiar, perhaps, to the Mississippi, that the country adjacent to its source, and that near its final discharge are in so great a degree similar in their general physiognomy. A difference of lat. of 19° presents much resemblance in vegetable or stationary mineral production. But according to Mr. Schoolcraft, who visited its sources in the month of May, the migratory water fowl found there at that time of the year are very nearly specifically the same found at its mouth in the months of December, January, February, and March. "It is also deserving of remark," says that writer, "that the sources lie in a region of almost continual verdure."

Climate, soil, and production.—Extending through 9° of lat., the change of climate in the valley of the Mississippi proper is greater than found in any other valley in the basin of which it forms a part, except the more northern part of that of Missouri. So defective is our information respecting the larger tributaries which enter the Mississippi above Missouri, that little more can be added respecting the Mississippi valley in general. Suffice to say, that in point of soil, vegetable and mineral productions, lead excepted, this valley in every respect inferior to that of Ohio. The ordinary timber in similar latitudes is nearly the same in both valleys, but towards the sources of the Mississippi, pine, spruce, cedar, maple, and white oak,

be prevalent timber trees. In fact, the far-
 er part of the upper, and much of the lower
 part of the valley, is composed of prairie, low
 swamps, or lakes. Much good alluvial land, par-
 ticularly on the Illinois, borders the streams, but in
 moderate proportion to what is found in the val-
 ley of Ohio.

In the lower part of the Mississippi valley the
 vegetables cultivated are, in most part, the
 same as found in our middle States generally. The
 climate being rather more severe in a given latitude
 in the Mississippi basin than on the SE. side of
 the Appalachian mountains, some small difference
 in vegetable location may exist, but not to any very
 great amount.

Towards the sources of the Mississippi, the
 rice (*zizania aquatica*) abounds in the swamp
 along the low margins of the rivers and lakes,
 and constitutes no small part of the food of the na-
 tives. Perhaps, in an advanced state of society,
 a species of cerealia, which can be cultivated in
 lands unsuitable to any other vegetable, may be-
 come the resource of civilized man, and, under
 a proper culture, attain a development similar to
 that which has taken place with other grains, such as
 wheat, rye, oats, barley, and maize. In fine, in
 the valley of the Mississippi we find every object
 which our approach to the wide-spreading waste
 which we are now to enter.

*Valley of Missouri, above its junction with the
 Mississippi.*—The Mississippi, having been first
 discovered, has by prescription given name to the
 basin; but the Missouri, above their junc-
 tion, is a stream which has drained a country of
 more than $2\frac{3}{4}$ times the extent of the valley of the
 Mississippi. The error is now without remedy: there-
 fore, though of so much greater magnitude, it
 must, in a geographical point of view, be consid-
 ered as a tributary stream to the Mississippi.

The Missouri river rises in the Chippewan, or, as
 it is absurdly called, Rocky mountains. What
 its pre-eminence called Missouri is not the main
 source, if our maps are even tolerably correct. The
 Yellow Stone river is longer than its rival above
 their junction, and receives larger and longer tribu-
 tary streams. Assuming, however, Jefferson's
 account as the extreme source of Missouri, the latter
 rises at N. lat. 44 20 W., lon. from W. C.
 The general course for about 120 ms. is NE.,
 and then, at that distance several tributary streams,
 it turns N. 120 ms., and about N. lat. 46
 is augmented by Dearborne's river from the
 west.

It thence curves to the NE. 80 ms., to the
 mouth of Maria's river from the NW. Below its
 junction with the Maria's river, the Missouri pur-
 sues an eastern course 150 ms., and thence a
 southerly course of 150 ms., to the mouth of
 the Yellow Stone river. Estimating the distance from
 its source by either branch along the streams, the
 Missouri has flowed, at its junction with the Yel-
 low Stone river, more than 1,000 ms., and has
 drained above 150,000 sq. ms. of surface, mostly
 prairie. Its volume is here, perhaps, as wide and
 deep as at its junction with the Mississippi. After
 leaving the Yellow Stone, the Missouri curves
 to the NE., and thence SE. 200 ms., to the Man-
 dan villages, at N. lat. 47 25. Between the
 mouth of Yellow Stone river and the Mandan vil-
 lages, the volume of Missouri has gained its ex-

treme N. bend at N. lat. 48 20, and has, besides
 many lesser tributaries, received the Little Missouri
 from the right, flowing from SW. to NE. Nearly
 opposite to the mouth of the latter, the Moose riv-
 er, branch of Assiniboin, rises within less than one
 mile from the bank of the Missouri. At the Man-
 dan villages, the Missouri turns directly S., and
 flows in that course through 4 20 of lat., or near
 300 ms. In this distance it has received a few un-
 important tributaries from the left, and from the
 right the large streams of Cannon Ball, Wetar-
 hoo, Sawarcarna, Chayenne, Teton, and White rivers.
 Below the mouth of the latter, the Missouri turns
 to the SE., E., and S., 300 ms., to its junction
 with the La Platte, an immense body of water
 flowing from the W., and heading with the Ark-
 ansas, Lewis's, and Yellow Stone rivers. In the
 latter course, the Missouri has also received from
 the left the Jacques and Great and Little Sioux
 rivers. Below its junction with the Platte, the
 Missouri flows 200 ms. SE., to the mouth of the
 Kansas river, a large tributary flowing from the
 W., and heading between the Arkansas and Platte
 rivers. The Missouri has now gained nearly the
 39° of N. lat., and, turning to a little S. of E.,
 250 ms., joins its vast volume to that of the Mis-
 sissippi, after an entire comparative course of
 about 1,870 miles, and particular course of
 3,000 ms. Between the mouths of the Kansas
 and Mississippi rivers, the Osage, a large branch,
 enters Missouri from the SW. The Osage is a
 considerable stream, rising in the angle between
 the Kansas, White, and Arkansas rivers.

Our geographical knowledge of the various
 branches of Missouri is still more limited than that
 respecting the Mississippi. Of the main stream,
 as high as the Mandan villages, our notices are
 tolerably ample. Lewis and Clarke, Stoddard,
 Brackenridge, Bradbury, and others, have en-
 larged the public stock of information on this inter-
 esting topic; but, with all that has yet been pub-
 lished, a feeble light has been thrown upon those
 immense regions.

The greatest length of the basin of Missouri is
 from the mouth of that stream to the head of Ma-
 ria's river, 1,200 ms.; its greatest breadth from
 the sources of the Platte to a few ms. SE. of the Man-
 dan villages, 700 ms. The outline is too vaguely
 known to admit precision as to the area of this vast
 extent; it must, however, equal, if not exceed,
 500,000 sq. ms., equal to 320,000,000 U. States
 acres.

General features.—Embracing the whole
 valley of Missouri in one view, two remarkable fea-
 tures must command pre-eminence—the turbid
 muddy appearance of the water, and the very great
 difference in length and volume of the confluent
 streams from the right bank, when compared with
 those from the left bank of the main recipient.
 Whilst from the right the Missouri receives such
 vast branches as the Yellow Stone, Chayenne,
 Quicouree, Platte, Kansas, and Osage, from the
 left all the branches are of minor importance. This
 characteristic continues to distinguish the valley
 of the lower Mississippi below the mouth of Ohio,
 where, to the great volumes of the White, Arkans-
 as, and Red rivers, are opposed the very inferior
 streams of the Yazoo, Big Black, and Homochitto.

It would appear that the Mississippi basin is di-

vided into two immense inclined planes, falling from the two opposing chains of mountains, that of the Chippewan and the Appalachian, and that the two planes are in a very near ratio to the respective magnitude and elevation of the chains from which they decline. The line of contact between those planes is formed by the Illinois, and thence by the Mississippi, below the mouth of the former; and if we extend our views beyond the Mississippi basin, Lake Michigan is evidently the continuation of this line of depression to the N., whilst to the SE. the rivers entering the Gulf of Mexico, as far as the Appalachian, inclusive, belong to the Appalachian plane; and to the SW., all streams flowing into the Gulf of Mexico, as far as the Rio Grande del Norte, or even to the Sumasinta, appertain to the plane of Chippewan.

But to return to our particular subject—that of the Missouri valley. It would be useless to give a list of the smaller rivers of this tract, the names of which are hardly known. A general outline is all that ought to be attempted. The Missouri valley is bounded on the W. by the enormous chain of the Chippewan or Rocky mountains, from which flow the sources of the Missouri and most of its largest branches. The exact elevation of the Chippewan, or indeed any of its peaks within the domain of the U. S., have never been determined, and the result made public. The general table land upon which those ridges rest must, from the great length of the Missouri, exceed 3,000 feet. Perhaps about 5,000 feet would be a safe estimate for the general elevation of the whole chain, particular peaks excepted.

The Chippewan partakes, with the adjacent country, the character of nakedness, timber being rare and of stunted growth. Like the Appalachian and most other American mountains, the Chippewan is formed in collateral ridges, with deep intervening valleys. The rivers rise in these valleys, and pierce the ridges in their course. The sources of Missouri extend along the chain through near 8° of lat., or upwards of 500 ms. In this region the main stream and most of its tributaries flow to NE. The sources of Big Horn, a branch of the Yellow Stone river, rise at N. lat. 41 30, whilst Maria's river has its most northern source above N. lat. 48 30. Some of the northern confluent of Missouri probably lie as far as N. lat. 50°.

Missouri leaves the Chippewan by falling over continued ledges of rocks, in a distance of 18 ms., after which this overwhelming mass of water is augmented every few ms. by large tributary waters, without falls or even shoals to its mouth. The channel is deep, and bounded by enormous precipices of rock. The immediate margin of the streams only excepted, this almost interminable expanse is prairie, devoid of timber, and, except the deserts of Arabia, no part of the earth presents an equal surface less inviting to civilized man than the far greater part of the valley of Missouri. Its asperities become more apparent as information respecting its real features expands. The general character of this extensive valley may be completed in few words: that, with some very partial exceptions, it is a wide and arid waste in summer, and over which, in winter, the piercing winds of the N. sweep without impediment, and on which a dense civilized population can never exist.

Climate, soil, and productions.—In so wide extent a very great diversity of climate must necessarily exist. From the considerable elevation of some parts, northern position of others, and open exposure of nearly the whole extent, winters are extremely severe. The whole of valley, a small part of the southeastern extremity excepted, has an aspect and climate with a striking resemblance to the steppes of central Asia, a like those steppes, must forever be thinly peopled.

With the exception of the alluvial banks of streams, the soil is, as far as correct information has been obtained, dry and sterile, which, added to the want of timber, and in many places of great extent water, settlement of an agricultural people is rendered not only difficult but impossible.

The State of Missouri, embracing about 63,000 sq. ms., it is probable, if the advantages of climate are superadded to soil, possesses one-fourth part of the productive surface of this entire valley.

Of the indigenous vegetables of the Missouri valley little can be said. Mr. Bradbury was the only naturalist of sufficient skill to investigate the subject of its botany who ever reached the interior of the valley as far as the Mandan villages, and opportunities of observation were so limited as to preclude extensive research.

It is probable that the mineral treasures of this extensive valley may, in some measure, compensate for its many other disadvantages. Of the quantities of iron ore and mineral coal laid open to the surface along the banks of Missouri, Mr. Bradbury presses himself in raptures. So small a part has been examined, and that so hastily, even by Mr. Bradbury himself, that no conclusive deductions can be made on any branch of the natural history of the valley of Missouri at present.

Valley of the Mississippi below the mouth of the Missouri.—We now approach what may be strictly designated as the tropical region of the valley of the S., though the entire surface of the section under review is not included under that Government. The common recipient, the Mississippi, has been noticed under the head of that river in general. We may therefore observe, that the section under review extends in its greatest length from the mouth of the Mississippi to the sources of the Arkansas, 1,400 ms.; the greatest width of the valley is at the junction of the Mississippi and Missouri to the mouth of the Atchafalaya, 600 ms. The area of no section of the Mississippi basin can be determined with more difficulty than that under review. The sources and length of the two most considerable confluent remain uncertain to a very serious extent. In this article we have assumed 330,000 sq. ms., equal to 211,200,000 acres.

In respect to climate, the lower valley of the Mississippi extends from N. lat. 29°, that of the mouth of the Mississippi, to N. lat. 42°, the sources of the Arkansas river, or through 13° of lat., which is a difference of elevation from the level of the Gulf of Mexico, to at least 5,000 feet. These extremes, when due allowance is made for the difference of elevation, amount to 28° of lat.

The principal confluent of this valley, which enter the main recipient from the right, are, commencing below the mouth of Missouri—Merrimack, St. Francis, White, Arkansas, and Red rivers; those from the left are, commencing below

of Ohio—Kaskamps, Redfoot, Obian, Chick-Forked Deer, Yazoo, Big Black, Homochitid Buffalo rivers.

atures.—The lower valley of the Mississippi most diversified section of the U. S. Every variety of landscape, every trait of natural physiognomy, and an exhaustless source of metallic and valuable production, is here found. This expanse is limited on the E. by a dense forest, and on the W. by the lofty but naked spines of the Chippewannontains.

Receding about 100 ms. from the banks of the Mississippi to the W., and in many places a distance, prairies commence, which, gradually reaching on the forests, finally spread one wide expanse of grass, as on the higher branches of the great basin. The open plains of Arkansas and the rivers are merely a continuation of those of the valley of Missouri, and with similar features.

The immeasurable plains of grass seem destined to remain in all future, as they have been in all former times the empire of ruminant animals, such as the buffalo, deer, wild goat, or antelope, and wild horses.

Following this apparent law of nature, if the prairies should ever become the residence of civilized inhabitants, those inhabitants must be hunters, and not cultivators of the earth. As far as settlements have been made on one side of the grassy desert by the Spanish Americans, and on the other by the people of the U. S., in west Louisiana and elsewhere, effects have followed similar causes, and the traveller finds a rude habitation on the banks of a brook or river, with a field or two, in which a little maize and sweet potatoes are cultivated; and from thence the eye looks over a shoreless sea of grass, on which cat-

tle horses are seen grazing in all directions. This is not the fiction of a sportive imagination—it is a reality which the eye that directs the pen that writes the fact hath seen innumerable times. And here are noted as illustrative of how much man is dependent in his modes of existence, his manners, his political condition, by the soil, climate, and natural phenomena around him; and to the extent of which, as he cannot control, he must submit.

And such is the flexibility of human nature, that what was necessity becomes, by habit, a custom, and the mounted herdsmen of New Mexico, Texas, Louisiana, and Arkansas, would not be in a condition with any other people on earth. On the plains on which they rove are wide, and horsemen know no luxury beyond their herds, and no distinction but that of managing their herds with most adroitness.

Such is the germ of a people which, in the short space of two centuries, will inhabit a surface more equal to two-thirds of all Europe. The mind can detach itself from this truly interesting subject without reflecting, that to the physical similarity between the deserts of Arabia and the steppes of central Asia, with the interminable plains of inland North America, a strong moral resemblance can ever must continue to exist between the primitive inhabitants of those distant regions.

Among the many other features in common between the prairies of Red and Arkansas rivers and the steppes of central Asia, is the prevalence of sulphate of soda, (common salt,) which, as has been observed, renders the water of those rivers brackish.

When we turn our eye to the entire surface of the valley under review, we find it divided into two very unequal portions. The grand recipient, the Mississippi, is seen rolling almost at one extremity; a narrow strip of land, with rivers of very small comparative magnitude, skirt its left bank. This confined border, of about 500 ms. in length, by a mean width of 50 ms., amounting to 25,000 sq. ms., is opposed by an extent of 305,000 sq. ms., watered by the great volumes of White, Arkansas, and Red rivers. Consequently, the valley is divided into two sections, the proportions of which exceed 16 to 1.

Next to the Mississippi itself, the Arkansas river would appear the most prominent object on this almost interminable landscape. When the Missouri is assumed as the principal stream, the Arkansas, in point of length, ranks as its second confluent, being longer than either the Platte, Mississippi proper, or Ohio, which follow in order. The sources of the Arkansas remain unknown, to any precision, but are generally supposed to extend to N. lat. 42°, and W. lon. from W. C. 34°; the position of its mouth has long been sufficiently well known; it enters the Missouri at N. lat. 33 56, and W. lon. from W. C. 14 10. This stream, therefore, winds through upwards of 8° of lat. and 20° of lon. Its length, by comparative course, is about 1,400 ms.; but, by its meanders, must exceed 2,000 ms.

The geography of the Arkansas has now become an object of the first importance, as its channel forms, from the 100th degree of lon. W. of London, to its source, if those sources are S. of N. lat. 42°, part of the limit between the U. S. and the Spanish dominions in America.

From the discoveries recently made by Captain Long, the magnitude of the Arkansas has been hitherto underrated. A large body of water, formerly made to enter Red river, is now found to flow into the Arkansas by the Canadian fork. The Arkansas is more impeded by falls and cataracts than any river of the great inclined plane we have noticed. Issuing from an elevated and mountainous region, the bed of this stream is unnavigable with large boats, except about 600 ms. above its mouth. From thence it flows in a deep and rapid channel, of about 600 yards wide, to its junction with the Mississippi. The particular tributary streams of the Arkansas remain, in great part, imperfectly known. This river now gives name to a State of the U. S.

Next in magnitude of volume and length of course to Arkansas, is Red river. Like its rival, Red river flows from that spine of mountains which, ranging from Mexico northward, assumes local appellations in different places: in Mexico this chain retains the native Aztec name of Anahuac; near the sources of Red and Arkansas rivers it is known as the mountains of New Mexico; and further N. as the Rocky mountains, or the Chippewan.

Red river enters the Mississippi at N. lat. 31 1, and W. lon. from W. C. 14 40.

Great uncertainty reigns over the sources of Red river; but if the information given by Captain Long be correct, and it is entitled to great credit, those waters which originate from N. lat. 32° to 35°, and W. lon. from W. C. from 25° to 28°, which in all our maps are represented as flowing

into the Gulf of Mexico by the Colorado and other streams, on the contrary, are the sources of Red river. By comparative courses, this stream is about 1,000 ms. in length; but, following it by its meanders, is probably 1,500 ms.

Both the Arkansas and Red rivers have their regular periodical inundations, similar to the Mississippi, and enter their recipient at the season of flood, respectively, with an immense body of water, which in no small degree contributes to supply that enormous mass of fluid which annually rolls over Louisiana into the gulf of Mexico. Arising from the saline and ochreous earths through which they flow, the waters of these two great rivers are in a considerable degree brackish; that of Red river so much so, that at Natchitoches, and from thence to its entrance into the Mississippi, it cannot be used either for drinking or for culinary purposes.

The next confluent of the Mississippi in point of magnitude, which enters from the right bank below the mouth of the Ohio, is White river. This latter river, though of greatly inferior length or volume to the two former, is of great importance, from the extent of excellent land it drains. White river rises in the angle between Arkansas and Osage rivers, and has its source mingled with those of both; the latter, also, with those of the Merrimack and St. Francis. White river, after a comparative course of about 400 miles, falls into the Mississippi a few miles above the mouth of the Arkansas.

St. Francis and Merrimack would neither deserve particular notice amid the description of rivers such as we have been surveying, except as flowing from one of the most interesting metallic regions of this globe.

St. Francis rises in the counties of Washington and St. Genevieve, in the State of Missouri, and, flowing S. by comparative course 250 miles, enters the Mississippi about 100 miles by water above the White river.

The Merrimack rises in the highlands between the sources of the St. Francis and those of the Gasconade, a branch of Missouri, flows E. by comparative course 100 miles, enters the Mississippi 18 miles below St. Louis.

It is unnecessary here to notice the soil, climate, or productions of the lower Mississippi valley, as these subjects will come more appropriately under the respective heads of the States of Mississippi and Missouri. A reference is also made to the article of Mississippi State, as respects the confluent of the Mississippi river from its left bank below the mouth of Ohio.

SUMMARY.

	Sq. miles.
Valley of the Ohio - -	- 200,000
Valley of the Mississippi proper	- 180,000
Valley of the Missouri - -	- 500,000
Valley of the lower Mississippi	- 330,000

Total area of the Mississippi basin 1,310,000

We may here remark, that, including the basin of Columbia, the trans-Mississippian territory of the United States amounts to 1,144,843 sq. ms.—equal to 732,699,520 United States acres.

To close the survey of the Mississippi basin, it

only remains to examine the general laws by which the annual floods of the Mississippi are regulated and determined. In order to elucidate this subject it is necessary to combine under one view the tire surface of the basin. This investigation embraces one of the most important questions in physical geography; it is to examine one of the stupendous operations of nature, performed on a scale commensurate with the magnitude of the effect.

In our review of the valley of the Ohio, 30 feet was given as the elevation of the waters at junction of Ohio and Mississippi rivers. From a correct data as to the real length or general course of its waters, no satisfactory calculation can be made as to the absolute elevation of the sources of Missouri. We have assumed in this article 3 feet as the probable height above the respective oceans of the sources of that stream. In an analogy similar to that on which we are engaged, relative elevation is one of the elements most necessary to a correct result. We may remark in this place with sincere regret, that during all the time which our citizens have visited the sources of Missouri, the elevation of not one peak or ridge has been determined and published. We have, however, some facts which enable us, by analogy, to approach an accurate estimate of the heights of the sources of the Missouri. From the extent of cold, and from the late continuance of snow at lat. 45 or 46°, we cannot suppose the base of the Chippewan mountains to be in that region less than 2,300 or 3,000 feet. At the first glance, when it is known the great length of the stream from its discharge into the gulf of Mexico to its remotest sources, so moderate an elevation of the latter may appear too limited; but 3,000 feet would demand very nearly a foot per mile—an enormous descent, much more than double that ordinarily found in rivers. In the foregoing estimate, the absolute height of peaks, or even ridges, is not taken into account.

It has often excited astonishment in those who knew the extent, without duly attending to the structure of the Mississippi basin, that the great delta is not annually submerged.

We now proceed to investigate the causes of the long continuance, and, in common years, the moderate elevation of the Mississippi floods. Reference to a good map will render intelligible what is to follow, and obvious that the peculiar nature and relative position of the respective valleys which compose this great basin are the true causes which prolong the duration and mitigate the height of the annual inundation.

In conducting this review, we may consider the basin subdivided into the four valleys already noticed—that of Ohio, Mississippi proper, Missouri, and lower Mississippi. The relative extent of each has been determined, and the principal streams noticed. If we were to turn an attentive eye to a map of those four sections, and, unaided by any single fact drawn from actual observation, it would follow from theory, from its more southern situation, and from its length extending E. and W. that the valley of the lower Mississippi must discharge its waters, the Ohio valley would follow, upper Mississippi would succeed to Ohio, and lastly, would issue the discharge of Missouri, or last subdivision of the basin; such are, indeed, the facts

would also be evident, from inspection, that of the valley taken separately, nature opposes innumerable obstacles to a simultaneous discharge. The Arkansas rivers flow nearly parallel through 14 degrees of longitude, and yet, in every instance, the discharge of the former precedes that of the latter nearly a month. Red river is the true American Nile, though on a smaller scale. The title has been bestowed on the Mississippi with unparalleled absurdity, except in the single instance of each protruding a delta at their respective mouths, no two rivers could possibly present more contrasted features than does the Mississippi and Nile. In fact, except in one circumstance, very little resemblance exists even between the Nile and Red river; the Nile, in common with the floods of the Nile are discharged by regularity, and as regular depression, which is emblematic in the case with Red river—a circumstance which in a very striking manner distinguishes both the Mississippi river, which rises and falls by regularity, if such a term is admissible.

Near the NW. angle of Louisiana, a chain of lakes commences on both shores of Red river, and continues to skirt that stream upwards of 100 miles. The writer of this article examined these lakes, and found them to be evidently formed in the narrow channels and adjacent low grounds of considerable watercourses, the discharge of which into the river has been gradually impeded by natural obstructions, formed by the sediment brought down at the river. These lakes, as they now exist, are from four or five to thirty miles in length, and from one quarter to three miles wide, and are filled and emptied alternately, as the floods of Red river rise and fall; they are, in fact, real reservoirs, and in the rise of Red river receive great part of the surplus water, and as the river depresses, discharge that surplus slowly, tending very greatly to moderate the rapid emission of the Red river flood into the delta. As far as the writer is informed, this mode is peculiar to Red river, and distinguishes its stream from every other.

Red river, like the Mississippi, has a flood in January; but what may be denominated the annual inundation of that river reaches the delta in February, and continues through March and April. The efflux of Arkansas uniformly succeeds that of Red river, but, from its greater length of course, it drains, and also from the more northerly mountainous country from which its remote sources are drawn, the volume of the former very rarely exceeds that of the latter; though, from different causes, both rivers are alike in yielding their waters by slow and regular discharge. The great mass of the flood of Arkansas reaches the delta in March and April, and is therefore simultaneous with the latter part of that of Red river. Red river, in strictness, forms part of the Arkansas tide, and flows out with the first flux of the stream.

It may here be observed, that all the rivers of the Mississippi basin above N. lat. 37° are liable to be generally frozen. The Mississippi, at St. Louis, is open for years in five passable on the ice with loaded barges by the first week in January. The Ohio, at equal latitude, is not so soon frozen, though the cold is equally intense on the latter, as on

the former river. The causes which produce this apparent anomaly are obvious. The waters of the Mississippi flowing from high latitude are cooled almost to the point of congelation when they arrive at the junction of the Mississippi and Missouri, whilst those of Ohio, in the latitude of St. Louis, flowing nearly from E. to W., demand a longer exposure to frost to become frozen. The gradual melting of the ice and snow above the latitude assumed, (that of 37°,) is another very controlling cause of the slow emission of the general flood.

The Ohio valley, from its compact form, greater comparative descent, and from the medium climate in which it is situated, emits its waters with more irregularity than any stream in the Mississippi basin. The Ohio tide of flood occurs from November until March, inclusive, though perhaps, four years in five, this river yields the principal discharge in the latter month. The floods of this valley are more sudden in their rise, and impetuous in their discharge, than that of any other section of the Mississippi basin. The main tide of Ohio reaches the delta in May. The various streams are, however, so relatively placed, as to render a simultaneous discharge impossible. The effect, therefore, of this river, in producing an augmentation of the floods which inundate the delta, is much lessened in its operation.

The Mississippi proper is still more disadvantageously situated to admit a rapid emission of its waters than the Ohio. Flowing nearly in a N. and S. direction, and through so great a range as 9° of latitude, the more southern confluent must be very much exhausted before those towards the source are relieved from fetters of ice. The great body of the Mississippi tide is, however, coeval with that of Ohio.

It is the accumulation of the waters of the three valleys we have surveyed, and those of the Kansas and Osage branches of the Missouri, which produce what is known as the annual Mississippi inundation. This flood, nine years in ten, reaches the highest point of its elevation at Natchez, between the 10th and 20th of June. Few instances occur, in a long succession of years, in which the waters at that city have not commenced their depression by the first week of July. And yet the heaviest mass afforded by the largest natural section has not yet reached the delta.

Powerful as are the causes which combine to prolong the discharge of the enormous body of waters contained in the three sections of the Mississippi basin we have examined, none contain such controlling impediments to an aggregated and sudden emission as does the Missouri valley above the Platte inclusive.

The Yellow Stone and Missouri spread their sources through 7° of latitude, and, assuming a general course of NE., unite their waters above N. lat. 48°, turn to the E. and SE., and finally assume, at the Mandan villages, a southern course, after having flown through 11° of lon. The Platte pursues a general course from W. to E. above N. lat. 40°, and flows through 14° of lon. It must be obvious, from what has been shown in this article, or by inspection of a good map, that the higher branches of Missouri must remain frozen long after those more southward have commenced their rise,

and nearly as late as the period of high tide on the delta. The mean motion of the entire mass of water, in any of the confluents of the Mississippi, does not much, if any, exceed one mile per hour; therefore, between three and four months are necessary for the passage of water from the extreme sources of the Missouri to the delta of the Mississippi; consequently, though those waters commence their rise in May, they do not frequently reach the delta until late in July, or early in August; of course, at a period when the main spring and summer inundation is very greatly abated, and the water retired within the banks of the Mississippi river.

Though the period of flood is well known to the inhabitants of the delta, and in common years can be calculated within a few days, such is the inequality of the seasons over the whole basin, that no length of experience gives the probable elevation or quantity. In 1800, and in 1801, the waters of the Mississippi, at Natchez, did not attain the height of the banks.

The delta commences at the mouth of Red river, or more correctly at the efflux of the Atchafalaya. At this place is a gorge, through which the overwhelming mass of surplus water is confined to within 3 ms.; but, by the channel of the Atchafalaya, a very large quantity flows out to the right from the main stream, never again to return. One hundred and twenty miles lower flows from the left the Manchac or Iberville. Those two streams, the Atchafalaya and Iberville, bound the delta, and below their efflux, respectively, no water which flows from the Mississippi ever returns; nor are there any bodies of arable land, except upon the immediate banks of the water courses; all beyond is either liable to annual overflow or morass.

We have now included as much of general observation upon the Mississippi basin as is compatible with the necessary brevity of this treatise, and will therefore conclude our review of that subject with a few reflections upon the delta.

It is evident, from either actual view or inspection on a map, that all the space I have designated as within the delta, must have been formed by alluvial deposit; but from that physical fact many conclusions have been drawn, unsupported by the laws of nature, or by the geographical physiognomy of the country.

It is a common belief that the Mississippi frequently changes its bed, and that it flows upon a comparative ridge. Neither of those opinions are correct; the bed of the Mississippi, like that of all rivers, is the deepest valley of the country through which it flows. As high up as the efflux of La Fourche, it is 130 feet deep at low water, and 75 or 80 at Natchez. At New Orleans, the depth exceeds 100 feet. The deepest lakes, in the whole adjacent country, do not exceed 18 or 20 feet, and the very small depression of their surface below that of the Mississippi, shown by the tides, will leave the bottom of the river upwards of 100 feet below that of any other watercourse or lake in the delta. When the Mississippi is reduced to its lowest point of depression, water ceases to flow into the Atchafalaya, Iberville, and Plaquemine; and instances have occurred when the same circumstances took place with the Fourche; and yet, as I before remarked, at the very lowest point of its

depression the Mississippi water, even as high as La Fourche, is 120 feet deep; therefore, to do its channel, that great river must quit a bed of 2,600 feet wide, and 120 feet in depth, to flow below the lowest of its outlets, and about 140 feet below the general level of the delta.

It remains for me to show the causes of the ordinary misconception that the Mississippi does not desert its channel. A glance of the eye, upon a map, will exhibit the sweeping bends of that great river. In an alluvial soil the current, when it strikes against one side of the river, wears away a portion of the bank, and deposits it upon the opposite shore. This enlarged section shows the nature of those currents, which are thrown by points into the bends, or more correctly from a convex to the concave side of the stream. The consequence is, that the decrement of the bank from the bends, and the increment to the point, is rather a little below. If by a large curve of the river two bends approach each other, the intervening isthmus or neck may be worn through by the current, and the river thrown into the new channel. This was the case in three places, since Louisiana was settled by the French; at the mouth of the Yazoo, at that of the Homochitto, and at the Pointe a la Pique. The latter name is derived from the circumstance. The former bed of the river, in the lakes, has in every other respect, except current, a perfect resemblance to the curves of the Mississippi. Besides those lakes, thus formed within the reach of history, several others exist near the Mississippi to attest the still more ancient revolutions of the stream. Such are Lake Concordia, opposite Natchez, Lake St. John, a few ms. above; Lake Joseph, opposite the mouth of Big Black river; Lake Providence, opposite Stack Island; and Grand Lake immediately above the N. line of Louisiana, upon N. lat. 33°.—See *Red River*.

Of these eight lakes, all are on the right side, except one at the mouth of the Yazoo, and one at that of the Homochitto, and all have, as I before observed, the most exact resemblance to sections of the Mississippi.

Receding from that stream beyond the limits of these, the other lakes, within or above the delta, assume a totally different appearance, and have an irregular form of similar bodies of water in other places. Those near the present bed of the Mississippi are monuments attesting the antiquity of the bed. Combining, therefore, the depth of the river with the general features of the delta, and other alluvial tracts above, the conclusion is indubitable that this great river flows in a channel, into which, with the exceptions stated, its waters do not find another outlet to their general recipient more easily than any other given river, the Hudson, Delaware, or Susquehanna, for instance.

We must close these already lengthened observations on the delta of the Mississippi, by a few general remarks upon that stream.

I have already expressed my opinion, that the velocity of the water of that river and of its confluents are overrated. I have formed that conclusion from actual observation, but it may be supported by collateral facts. If any vessel is put in motion, say a steambot, in stagnant water, and its rate of going ascertained, that rate must, as a matter of course, exactly counterbalance a current of

al rapidity. Therefore, if a steamboat could
 ve 6 ms. per hour in still water, it would move
 mile per hour in a current having a velocity of 5
 n per hour. It is very commonly and very con-
 nantly asserted, that the Mississippi moves 4 or 5
 n per hour during the time of high water, and
 steamboats are known to be propelled against
 current 3 or 4 ms. per hour. If these two mo-
 ns are added together, we have 9, 10, or 12 ms.
 hour in still water for these vessels. I have
 n much in steamboats in the most favorable sit-
 ons, and when aided by wind, tide, and steam,
 ms. was the greatest distance I ever knew per-
 ned in one hour by any of these vessels.' Six
 st believe, in calm weather, and stagnant water,
 y nearly their mean rate of motion.

if this latter supposition is correct, and steam-
 bs are propelled up the Mississippi at the rate
 of ms. per hour, it will leave 2 ms. per hour for
 the mean motion of the upper current or surface
 of the Mississippi river, coinciding very nearly
 with what I have before stated. These 2 ms. per
 hour must, however, be considered as the velocity
 of the upper part of the volume of water, and is,
 I have no doubt, more than double that of the en-
 tire mass.

Mississippi, State of the U. S., having the
 Mississippi and Pearl rivers on the W., the 35th
 degree of N. lat. or the State of Tenn. N., the
 State of Ala. on the E., and the Gulf of Mexico
 N. lat. 31°, or La., on the S. The outlines
 of this State are :

	Miles.
From the mouth of Pearl river, along the Gulf of Mexico, to the SW. angle of Ala. - - - - -	80
Along the western boundary of Ala., to the W. angle of that State, on the south- ern boundary of Tenn. - - - - -	320
Thence W., along the southern boundary of Tenn., to the SW. angle of that State, on the left bank of the Mississippi river - - - - -	90
Thence down that stream to N. lat 31° - - - - -	530
Thence due E., along N. lat. 31° and the State of La., to the right bank of Pearl river - - - - -	105
Thence down Pearl river to the place of be- ginning - - - - -	60

Having an entire outline of - - - - - 1,185
 Area 45,760 sq. ms., equal to 29,286,400
 sq. ms. Extreme S., N. lat. 30 8; extreme N.,
 N. lat. 35°. Length from S. to N. 338 ms.;
 width about 135 ms.

The remarkable resemblance in form and geo-
 graphical position between the States of Ala. and
 Miss. is obvious on a first glance of their connect-
 ings. In addition to every other point of simi-
 litude, both have a prolongation towards the
 Gulf of Mexico, below N. lat. 31°, of nearly equal
 length and extent on that gulf.

Of the rivers of the State of Miss., that stream
 which the name of the State is derived claims
 the first rank.

The Mississippi washes the State from N. lat.
 35°, a distance, following the stream, of 530
 ms. The features of the Mississippi have been so
 generally noticed under the preceding head, that no

further notice respecting it is necessary in this
 place.

Next in magnitude and importance amongst the
 rivers of this State is the Pearl. This stream
 rises in the State, about N. lat. 33°, and, flowing
 in a general course nearly S., flows into the Rigo-
 lets between Lakes Borgue and Pontchartrain, at
 N. lat. 30 10, after an entire comparative course
 of about 200 ms. From N. lat. 31° to its mouth,
 the Pearl forms part of the boundary between the
 States of La. and Miss.

The Pascagoula rises in the State of Miss.,
 about N. lat. 32 40, flows in a southern course to
 N. lat. 30 20, and falls into the Gulf of Mexico
 after a comparative course of about 150 ms. The
 main branch of Pascagoula is known by the name
 of Chickasawhay, as far down as 5 ms. S. of N.
 lat. 31°, where it forms a junction with the NW.
 branch, the Leaf river, and from thence to the
 final discharge takes the name of Pascagoula.

Some streams, but of small note, enter the bay
 of St. Louis, between the Pearl and Pascagoula
 rivers.

The sources of the Amite, Tickfoha, Tangipao,
 and Bogue Chito rivers, are in the State of Miss.

Flowing into the Mississippi are the Buffalo,
 Homochitto, Big Black, and Yazoo rivers. Of
 these latter streams, in point of magnitude, the
 first rank is due to the latter. This river has its
 source near the southern boundary of Tenn., in-
 terlocking with the head waters of Tombigbee.
 The Yazoo enters the Mississippi at N. lat. 32 30,
 after a comparative course of about 200 ms.

Big Black river rises about N. lat. 33°, between
 the sources of the Pearl and the Yazoo, flows
 SW. 150 ms., and falls into the Mississippi at the
 Grand Gulf, N. lat. 32 5.

Between the Big Black and Homochitto, the
 Mississippi river receives the water of Bayou
 Pierre, Cole's creek, and St. Catherine creek.
 These creeks are comparatively small, but import-
 ant from their position and the excellence of the
 land they drain. The city of Natchez, though so
 near the bank of the Mississippi, is situated on a
 branch of St. Catherine creek, which has its dis-
 charge 15 ms. below.

The Homochitto river rises about 50 ms. NE.
 from Natchez, flows SW. about 100 ms., and en-
 ters the Mississippi at N. lat. 31 12.

The Buffalo is rather a creek than a river, not
 having a course of more than 25 or 30 ms. This
 stream rises in Amite, and flows W. through
 Wilkinson co., and falls into the Mississippi two
 ms. above Loftus Heights.

The Tennessee river forms a part of the bound-
 ary of the State of Miss., from the mouth of Bear
 creek to the Tenn. line, at N. lat. 35°, about 20
 ms., and ought consequently to be classed as one
 of the rivers of the State.

We have already observed that the sources of
 the Tombigbee were in the State of Mississippi.
 The sources of Tombigbee rise near the Tennessee
 line, flow to the SE., and enter the State of Ala.
 at about N. lat. 33 30.

The State of Miss. has a very confined and in-
 commodious seacoast, of 80 ms. in extent. In this
 distance the Pascagoula is the only inlet by which
 vessels of the smallest size can enter, and in that
 only schooners of small draught, at high water,

can reach the junction of Chickisawhay and Leaf rivers. The Pearl admits no navigation worth mention; and the bay of St. Louis is a mere indentation of the coast, of no practical use in a commercial point of view.

The Mississippi river is the great harbor and outlet of the State.

The State of Mississippi is naturally divided into four grand divisions of soil—the islands in Lake Borgne and the Gulf of Mexico, Pine Forest, Mississippi and other river alluvion, and the Mississippi bluffs.

Advancing from S. to N., first occurs a chain of low sandy islands, lying about 6 or 7 ins. from the main shore. Their names are, ranging from W. to E., the group of the Malheureux (unfortunate) islands, Mary Anne, Cat, Ship, Dog, Horn, and Petite Bois islands.

The opposing shore, once a part of W. Florida, is a level pine forest to the water edge, constituting the second and by far the most extensive superficies of soil in the State. Receding from the shores of the gulf inland, the face of the country imperceptibly swells into hills; and though no part of the State rises into elevations that can be designated mountains, much of its surface is extremely broken.

Next in extent to the pine forest land is the range called the Mississippi bluffs, and, lastly, the more confined but greatly most valuable land—where found above annual overflow, river alluvion. Of these three latter divisions of soil in order.

As we have already observed, the pine forests reach the waters of the Gulf of Mexico, and, we may add, extend, in the intervals between the streams, to the northern extremity of the State. This species of soil, deriving its title from the principal timber it produces, in most places gradually mingles with the river alluvion or Mississippi bluffs, and produces an intermediate soil partaking of the qualities of both, and on which oak, ash, hickory, dogwood, sweet gum, and other trees, intermingle with the pine. This mixed soil and timber is known in the country by the name of interval land, and is often found very productive. The pine lands have hitherto been considered extremely sterile. How far future modes of culture or artificial means may tend to meliorate this species of soil remains an undecided problem.

In the northern parts of the State of Miss., towards Tenn., the pine woods are frequently interrupted by a species of prairie, or rather barrens, on which grow shrub oak and other dwarf bushes, but the soil continues to exhibit the unproductive character of that of the pine woods.

It would not be hazardous much to estimate the extent of these barren tracts at two thirds of the entire area of the State.

In all the length of the State of Miss., from N. lat. 31 to 35°, a range of bluffs extends. These bluffs reach and are washed by the Mississippi in a few places only. Immediately above N. lat. 31° rises the highest of these bluffs, known by the name of Loftus heights, which skirt the river 4 or 5 ms. A very large curve of the Mississippi to the W. leaves an extensive overflow tract along the right bank as high as Ellis's cliffs, where, by an eastern curve of the river, the bluffs are

again washed by the stream, which is also the case at the city of Natchez. Above the latter place the bluffs and river do not again come in contact below the Grand Gulf at the mouth of the Black river. The bluffs again reach the stream at Walnut Hills, below the mouth of the Yazoo, and at the Chickasaw bluffs, immediately at the N. angle of the State.

These bluffs are the mere extension of the comparatively elevated surface of the State of Mississippi over the low grounds of the river of the same name.

When the waters are low, it is found that bluffs are underlaid by a crude concrete of sand pebbles, held in mass by an oxide of iron, whole, no doubt, resting on a secondary base.

The elevation of the bluffs vary, but about feet mean height would not be a serious departure from fact. They are cut into hills by the abrasion of water of the numerous streams which flow through the pine woods in the interior.

What renders these bluffs and hills objectionable is the quality of the soil, which in almost all places, good, and in many exuberantly fertile. Receding from the bluffs, the pine forests imperceptibly encroach, and in some places, at a more or less distance from the river, say in a direct line from 15 to 20 ms., closes the productive border.

The foregoing limit is taken in general; many of the water courses have fertile tracts on their banks, further into the interior of the State, the latter description of land belongs more particularly to river alluvion than to the soil of the bluffs or hills.

The soil of the bluffs and hills is a rich loam, resting on clay; and digging wells has disclosed the fact that the general substratum to the clay is loose sand.

The whole of this fine border of soil, in a great measure, is covered with a dense forest, with an underwood of reed cane, the arundo gigas, many species of vitis, smilax, and other climbing plants, and an infinite variety of more humble vegetables.

A mere list of the most prevalent timber trees will serve to demonstrate the fertility of this tract. These are black oak, white oak, Spanish oak, hickory, ash, willow oak, wild cherry, sweet gum, mulberry, large laurel, beech, fagus pumila, (here a tree often 40 feet in height, and 8 or ten inches in diameter,) black locust, mulberry, persimmon, honey locust, black gum, cotton wood, linden, mucicinus elm, sassafras, sycamore, ash, black walnut, bitternut hickory, nutmeg hickory, and red flowering maple.

Of the more humble trees and shrubs, and other vegetables, the following are most indicative of the fertility of soil: papaw, dogwood, spicewood, Spanish mulberry, buckeye, poke, blackberry, mandarin, and reed cane.

It would swell this article to too great a length to give a mere list of the most interesting vegetable productions of the fine tract under review. The foregoing are inserted as illustrative of its natural fertility.

When compared with the entire area of the State, the productive tract before us is confined in extent; but when we turn our attention to the ex-

vegetables which are or can be produced within its limits, the intrinsic value of the land is rendered apparent.

Indigo, tobacco, and cotton, have in turn been cultivated as staples, and produced in great abundance; the latter has for more than 25 years superseded the two former, and will, in all probability, continue the great staple of this part of the U. S.

Such speculation has been made upon the quantity of cotton which is or can be produced per acre of the bluff lands. The writer of this article, from some personal experience, will undertake to produce 250 pounds of clean cotton as about an average crop.

Cotton, indigo, and tobacco, may be added, to the exotic plants cultivated in the State of Mississippi, Indian corn, (zea maize,) oats, and, as the inhabitants choose, wheat may be produced, but the culture of that grain is seldom attempted. Most garden plants grow luxuriantly, and good gardens are rare. That species of potato the tuberous rooted solanum, commonly called the Irish potato, is cultivated, but does not succeed well, either as to quantity or quality, as the same vegetable does further northward. The sweet potato (*Convolvulus batatas* of Muhlenberg) is produced to the utmost abundance.

Cultivated fruits, the principal are the apple, peach, and fig; the latter, below N. lat. 32°, will not flourish as if natural to the climate. The nectarine, apricot, &c., are cultivated, but not extensively.

Through all the Southern States of the U. S., meadows cannot be correctly said to exist in the State of Mississippi.

Though the winters are in general mild, the seasons are extremely variable. Frequently frosts of sufficient severity to destroy cotton, indigo, tobacco, and other tender plants, as early as the middle of October, whilst perhaps in the next week the flowers of the same vegetables will be in bloom, and in December, and even in January, was the case in the year eighteen hundred and seven.

Winter, however, passes without frost, and seldom without snow, at Natchez. In December, 1800, the thermometer of Fahrenheit fell to 10° below the zero of the scale, in the S. of Natchez, and often, since that period, the cold has been nearly, if not altogether, as severe. This casual severity prevents, to the utmost southern extremity of the State, the cultivation of either sugar cane or the orange tree, vegetables which are, in fact, confined in the delta of the Mississippi to a latitude S. of most parts of the State of Mississippi.

The bluff lands are followed by the river alluvium, which, though less in quantity, is still more productive, where above annual or casual overflow, the bluffs confining, and of consequence preventing the accumulation of the surplus water of the Mississippi in the spring and summer, there is less arable soil on the left bank of the Mississippi river, in the State of that name, than on the right bank in Arkansas Territory and in Louisiana.

Some very wealthy settlements on the left bank do, however, exist, with a soil possessing the fertility of the Mississippi banks. The width of the border varies from half a mile to 200 yards,

and is every where terminated in the rear by overflowed grounds, submerged annually from 1 to 10 or 12 feet.

The natural growth of the river arable border is, in general, sweet gum, different species of oak, ash, and hickory, hackberry, sycamore, &c., with an undergrowth of reed cane, and below N. lat. 31° 30', the palmetto. In the overflowed swamps, the principal timber is cypress, tupelo, different species of oak and hickory, maple sweet gum, and ash. On all other water courses in the State, more or less alluvion occurs; but in all places is confined in extent, and on the streams in the interior, often merges into the interval land or pine forests.

Taken together, the bluff lands and river alluvion amount to about 5,560 sq. ms., equal to 3,558,400 acres. The bluff lands extend from N. lat. 31° to 35°, with more or less width, as the rivers intervene.

Confined as the two foregoing tracts of land are, when compared to the area of the State, of which they form a part, they nevertheless form, in the aggregate, the most extensive continuous tract of productive soil in the United States S. of N. lat. 35, and when its fertility and local advantages are taken into view, it is hazardous no violence to truth to estimate this region as one of the most valuable in the U. S.

The country near Natchez was settled by the French in 1718, and Fort Rosalie built on the bluff, within the now incorporated limits of that city. The first French colony was massacred by the savages, in 1729, and the country remained uninhabited by the whites many years afterwards.

In 1763, Natchez, then considered a part of West Florida, was ceded by Spain to Great Britain, who retained possession until 1781, when that place and all West Florida was conquered by the Spaniards under Governor Bernardo Galvez, and, by the treaty of Paris, West Florida was confirmed to Spain. As the limits of the British and French colonies, and afterward those between the British and Spanish colonies, had never been fixed, the Spanish authorities held Natchez and the adjacent county as an appendage of Florida until 1798, when the city and country were evacuated by the officers and troops of Spain, and the U. S. commissioners took full possession. In 1799 the line of demarcation was completed, and the boundary fixed, which now separates the States of Louisiana and Mississippi between the Mississippi and Pearl rivers.

April 7th, 1798, an act of Congress was passed authorizing the President of the U. S. to appoint commissioners to adjust the limits of the territory W. of the Chattahoochee river.

May 10th, an act was passed for the organization of a government, and the territory named "the Mississippi Territory."

June 9th, 1808, an act passed admitting a delegate from the Mississippi Territory in Congress.

June 17th, the assent of Georgia demanded, for the formation of two States out of the Mississippi Territory. This demand was subsequently acceded to by Georgia.

January 21st, 1815, a petition from the Legislature of the Mississippi Territory laid before Congress, praying admission into the Union on the

same footing with the original States. A committee of Congress reported on this petition favorably, December, 1816.

A law was passed in consequence, March 1st, 1817, authorizing the call of a convention, which was called, and met July, 1817, accepted the terms proposed by Congress, framed a constitution, August 15th, which was accepted by Congress in December following; and the State of Mississippi assumed her station as a member of the United States. Since the period of admission, no event of consequence, in a general view, has taken place in this State.

The appropriated and inhabited part of Mississippi, at the epoch of taking the census of 1820, was subdivided into the following counties; and which, as they may serve to show progressive advance, we insert the data :

Counties.	Inhabitants.	Sq. ms.	To sq. m.
Adams	12,073	480	26
Amite	6,853	960	7
Claiborne	5,963	380	12

Total	75,448	12,720	5

By the census of 1820, the population of Mississippi was found composed of 42,176 whites, 32,814 slaves, and 458 colored persons, and classed thus :
 Engaged in agriculture - 22,033
 Engaged in manufactures - 650
 Engaged in commerce - 294

Mississippi was admitted into the Union as a State, December, 1817.

Population of Mississippi by the census of 1840.

Missolonghi, or more correctly *Mezzalunga*, is or was a town of Greece, in the Turkish province of Xeromene, ancient *Ætolia*. This city, not unaptly called the Venice of Greece, is situated on the SE. side of the salt marsh or shallow which extends between 2 and 3 ms. into the land below *Natolico*, and still 6 ms. beyond *Missolonghi*, into the Gulf of *Lepanto*. *Missolonghi* is distant about 20 ms. from and nearly opposite *Patras* in the *Morea*, and about an equal distance NE. from the islands of *Carzolari*. Lat. 38 26 N., lon. 21 34 E. Though a port of much consequence, the bay or shallow harbor of *Missolonghi* admits vessels of only 3 feet draught. The entrance is defended, or rather obstructed, by a small fort called *Bosillida*, 5 ms. distant from the town. The rows of stakes, placed by the fishermen along the outer line of the shallows, towards deep water, give the appearance of a double coast to *Missolonghi* and its environs, when seen from the Gulf of *Lepanto*. After a siege of 4 months, this devoted place was blown up by its desperate inhabitants on the 23d of April, 1826. The inhabitants preferred death to Turkish mercy. The Turks offered terms, which the in-

habitants refused, and mixed their blood and bones with the ruins of their native city.

Missolonghi, or *Mezalonghi*, a town of Greece in the *Morea*, about 1½ leagues from the Gulf of *Chiarenza*, ancient *Cyllene*, 12 ms. SE. from *Catouni*, ancient *Elis*, and 40 ms. nearly SSE. of *Missolonghi*, in *Roumelia*; lat. 38 2 N., lon. 50 E. *Missolonghi* of the *Morea* contains about 200 houses, scattered along the slope of a mountain, with a well cultivated vicinity. The names of these towns are taken from the Italian, and ought to be written *Mezzolonghi*, and pronounced *Mezzolongee*; the g hard.

Missouri River.—See article *Mississippi River* section, valley of *Missouri*, above its junction with the *Mississippi*.

Missouri, State, one of the U. S., bounded by the State of *Arkansas*, SE. by *Mississippi* river separating it from *Tennessee* and *Kentucky*, and NE. by the *Mississippi* river, separating it from *Illinois*, N. by *Iowa*, and W. by the unappropriated territory of the U. S.

Beginning on the right bank of the *Mississippi* river, at the mouth of *Lemoine* river, thence down the former stream to N. lat. 36°

Due W., on N. lat. 36°, to *St. Francis* river

Up *St. Francis* river to N. lat. 36 30

Due W., in common with the State of *Arkansas*, to a point where a meridian line from the junction of *Missouri* and *Kansas* rivers will intersect at N. lat. 36 30

Due N. along said meridian to the mouth of *Kansas* river

Thence up *Missouri* river to a point where that stream is intersected by a line drawn due W. from the *Old Sac Village* on *Lemoine* river

Thence due E. to the *Sac Village* on *Lemoine* river.

Thence down *Lemoine* river to point of beginning

Aggregate outline - - - - 170

Area within an inconsiderable fraction of 500 sq. ms.—41,600,000 statute acres. Length in lat. between 36° and 40 33, and lon. 12 18 and 18 30 W. from W. C. Length from S. to N. very near 300 ms., and mean breadth 220 ms.

Missouri in point of extent is the third State of the United States, and only falls below *Virginia* and *Georgia*.

Though part of this State is hilly, and some of the hills approach in elevation the dignity of mountains, yet, strictly speaking, no mountains, or detached grounds or chains, exist within the limits of the State.

For every object of human affairs, rivers are the most important features of an inland country, and few regions of the earth of equal extent compare with *Missouri* in the magnitude, number, and navigable facilities of its rivers.

Of these, the first in order is the *Mississippi* and *Missouri*, both of which have been so amplified in our description of the *Mississippi* river, that no further account of them is necessary in this place.

the Lemoine river, though for a few miles forming part of the boundary, can scarcely be said a river of Missouri. The Osage, rising in the territory of Arkansas, and flowing NE. into Missouri, is the most important confluent of the river in the State of Missouri. The Osage's mouth near the centre of the State, where the future seat of government is intended to be fixed. The Osage is a large navigable stream in its length in the State, and waters some excellent and much good land.

Besides the foregoing large streams, the Mississippi receives from the right, below the mouth of Arkansas, Blue Water, Gasconade, and some other streams; and from the left, Grande, Charbon, Good-Woman's, Great Manitou, Otter, and other rivers. The Merrimack enters the Mississippi 18 ms. below St. Louis, but has been nowhere else have been White and St. Francis rivers, which closes the list of the streams of the State of Missouri.

The position of Missouri is in a high degree favorable to commerce, population, and wealth. Extending $4\frac{1}{2}^{\circ}$ of lat., its temperature must vary considerably if uninfluenced by any other cause than its geographic extent. This is not, however, the case, as will soon appear.

In conducting this general survey, I have endeavored, in a particular manner, to delineate those features which influence the meteorological phenomena and the temperature of the seasons, and also point out the great outlines of soil. In respect to Missouri, it will be necessary to deviate from the observance of the plan pursued in describing the former State into its natural sections, according to soil, we will take each of its river basins by itself.

We have seen that the river Mississippi washes Missouri on its NE. and SE. frontier, 550 ms. following the meanders, though, by comparative measurement, the distance along the Mississippi would exceed 350 ms. Though the mere banks of the Mississippi preserve a nearly uniform character in their extent along the front of Missouri, yet, in consequence of difference of climate, the vegetable productions are very different at the two extremes. So much has already been said on the features and quality of the alluvial margins of the Mississippi, that it is needless to amplify on the subject.

Ascending the Mississippi from its mouth, no distance is to be found on its western bank in a distance of upwards of 1,000 ms. Twenty-eight miles above the junction of Mississippi and Ohio, occurs the first rocky bluff on the right bank. It is composed of an enormous projecting precipice of limestone, whose real height above the water has been very satisfactorily determined. This is, no doubt, a continuation of the great limestone formation of the Ohio valley. In Missouri it is a part of the ridge of hills which continues on this point westward, through the State, and ranges between the waters of Arkansas and those of Osage and Kansas rivers; perhaps to the Chippewan mountains. This ridge divides Missouri into two very distinct climates. In the eastern part of the State, along the Mississippi river, the cotton plant is cultivated, though not for family use; as an object of commerce it

offers no great advantage; but above the ridge in question that plant ceases, and a region commences favorable to the production of the cereal gramina.

Near the Mississippi, below the limestone ridge, the banks are in every respect similar to what they have been described in Louisiana. The rear lands, as far as the St. Francis, are analogous to grounds similarly placed in all the distance from the limestone range to the sea marsh.

The St. Francis rises partly in the hills of the limestone ridge, and in part from the drain of the Mississippi. The northeastern branch of that stream appears to have been formed from an ancient outlet of the Mississippi, and to have contained a volume of water much larger than passes by its channel at present. The ordinary distance between the two rivers is about 50 ms., flowing nearly parallel from N. lat. 37° to N. lat. $43^{\circ} 30'$, where the St. Francis, by a gradual curve towards the lower part of its course, joins the Mississippi. The northwestern branch rises near N. lat. 38° , in a very hilly, broken, rocky, and barren tract of country. There are some good lands, but in no quantity commensurate with the extent drained by this river, whose whole length, by comparative course, is 250 ms., one-half in Missouri and the other in Arkansas. Extensive settlements have been made on the sources of the St. Francis and its tributaries.

Black river, the N. fork of White river, rises in the southwestern part of Missouri by a number of branches, of which Strawberry river, Spring river, and Current's river, are the principal. The sources of Black river are in the ridge of hills, or rather mountains, which have been already noticed. The base of country drained by Black river is calcareous, consequently the soil is very productive. The climate, as to temperature, is in no respect essentially different from that of St. Francis. The former, from superior elevation and more exemption from stagnant water, is no doubt much more salubrious than the latter. Like all calcareous regions, that of Black river affords some very large fountains of water, from one of which Spring river takes its name. The surface watered by Black river is about 8,000 sq. ms.

The Merrimack rises near the centre of the State; has its source in the dividing ridge, though its course is nearly E. along its northern slope. The length of the Merrimack is not above 120 ms., by comparative course. Its sources are in a sterile pine forest, and most of its banks partake the character of the soil from which it flows. It is an unimportant stream, in either a geographical or agricultural point of view, though in respect to mineral wealth, one of the most remarkable in the United States.

The mine tract, according to Mr. Schoolcraft, (the best authority on the subject,) extends in length from the head waters of the St. Francis, in a NW. direction, to the Merrimack, a distance of 70 ms., and from the Mississippi, in a SW. direction, to the Fourche à Courtois, a distance of about 45 ms., and covering an area of 3,150 sq. ms. The same author remarks, that it is not in every section of it that lead is to be traced, and he describes the mineral character of the soil, rocks, and other fossil bodies of this tract, as subject to so much variety as to render indications of ore diffi-

cult to reduce to any safe result. - The aspect of the country is sterile, hilly, and, in many places, precipitous. Many highland barrens, level but sterile, chequer the main district. The soil, in general, is a reddish colored, hard, stiff clay, admixed with much siliceous gravel. Nodules of iron ore and pyrites are frequent. The mineral hills are covered in most places by a stunted growth of oaks, principally the post oak, the *quercus obtusiloba* of Michaux. A line of pine separates the sources of St. Francis from those of Merrimack, and passes through the mine tract in a direction from NW. to SE. Though in general the soil of this tract is productive, the banks of some of its streams are very favorable exceptions. This fact is elucidated by the forest trees found on this alluvial soil; which are—sycamore, elm, cotton wood, walnut, maple, buckeye, hackberry, ash, papaw, spice wood, and other trees and shrubbery, indicative of fertile land. Mr. Schoolcraft mentions the fact, of which, from the accompanying remarks, he seems not to have understood the cause. He observes, that, around many of the mines, the earth thrown out and raised from great depth, produce trees and shrubs which are not peculiar to the surface, and instances the cotton wood, or poplar, and beech grapes, the *vitis riparia*, I presume. He states that he frequently saw those vegetables growing near old diggings, where the earth had been raised 30 or 40 feet, and where, previous to those diggings, no such trees or vines existed. It is well known to botanists that the seeds of many, perhaps most plants, if buried at great depths in the earth, will retain their vegetable organization for countless ages. The indestructibility of the seeds of plants is, indeed, one of the most curious subjects of philosophical reflection and research. Mr. Schoolcraft ascribes the cause of the phenomenon to that opprobrium of science, equivocal generation—a supposition at variance with all the laws of analogy, as applied to organized beings. The fact proves, unequivocally, that the country has underwent great changes in its external crust, since the vegetables cited deposited their seeds in the soil, now covered by extraneous and very different bodies.

Here, as in every other place, where silica forms a large part of the soil, the spring water is clear, cool, and, of course, wholesome; and being exempt from the causes that produce disease—stagnant water and decaying vegetables—the mine country is possessed of an atmosphere of the utmost salubrity.

The Osage rises about N. lat. 37°, W. lon. from W. C. 21°, and flows E. a little N., having a comparative course of 400 ms., one-third of which is in Missouri. This river rises in the great western prairies, and, like every stream of that region, exhibits some very productive and a large proportion of sterile land. Its meanders are in the lower part of its course very winding, consequently it contains much alluvial soil in proportion to its length, estimated comparatively.

The banks of the Missouri and Mississippi are uniformly in a high degree productive, and contain, perhaps, one-third of all the valuable arable land of the State. The right shore of the Mississippi is, from Tewapaty bottom to the mouth of the Missouri, in most places, an enormous lime-

stone wall. This distance is about 179 ms. limestone is merely the buttress of the underlying strata of the interior country. The Mississippi flows in a deep channel, whose sides are elevated near 200 feet above its highest surface. The precipitous banks are continued in the Mississippi. The rich alluvial bottoms are at the base of the limestone precipice, and no doubt derive much their fertility from the calcareous *debris* that abrasion of the waters, in past ages, has worn and deposited below.

About one-third part of Missouri lies N. of the Missouri river and W. of the Mississippi river. This point of soil, is much the best part of the State, is more uniformly fertile, though less diversified in surface, than the section S. of Missouri and W. of the Mississippi river. The northern section is also much chequered by small rivers, which generally flow S. into Missouri, and, though not forest land, some extensive and very productive prairies occur. South of Missouri, there exists a medium between the best and worst lands, similar to all those parts of the United States between the Missouri and W. of the Mississippi, the soil extends in lines mostly upon the alluvial banks of rivers, or along the margin of prairies, consequently, can never admit a dense and settled population. This is not so much the case in the northern section; the farms will assume in a quarter something of the promiscuous extent over the face of the country which is characteristic of settlements in the Northern and Eastern States.

Taken as a whole, Missouri, like most new countries in the United States, has been, as a body of arable land, greatly overrated. As a commercial position, if due allowance is made for its present situation, the value of this section of our country has never yet been duly appreciated. The astonishing assemblage of rivers, which surround St. Louis, which designate St. Louis, or some other place in its vicinity, as the future *entrepôt* between the wide extended and far distant portions of our empire, the pursuits of mankind, and their individual means of subsistence, were exclusively agricultural, Missouri could never, in proportion to territory, possess a population equally dense with New York, Pennsylvania, Ohio, Indiana, or Illinois; but in the complex admixture of employments, the illimitable transmission of the products of human labor, arising from the improvement of modern manners and arts, population does not depend for its entire subsistence upon the quality of the soil inhabited by any portion of mankind. Commerce and the plastic arts demand, perhaps, many hands as agriculture. There is, indeed, an employment of human labor where so great a plus is produced as that of agriculture; and in which the industry of a few will so effectually supply the wants of many. It is for this reason that the density of population must, particularly in such places as Missouri, depend as much, not more, upon commercial, mining, and manufacturing pursuits, as upon the operations or results of agriculture. In addition to the apparently inexhaustible stores of lead ore, some of the most abundant iron mines in the world exist on the Missouri river, and in the interior of the State.

ington county, Belvue settlement, in addition lead, says Mr. Schoolcraft, "in the richness and extent of the beds or mines, is no paralleled. The most noted plane is the mountain, where the ore is piled in such enormous masses as to constitute the entire southernity of a lofty ridge, which is elevated 500 or 600 feet above the plain." Water-power to work brass abounds in all directions. It is, however, only one of a number of mines of this really precious of all metallic bodies, which lie scattered over the sources of St. Francis and Merri-rivers.

In the same vicinity, and in fact over the entire tract, ores of zinc abound; a very interesting feature in the mineralogy of Missouri. Zinc is, when so cheaply procured, one of the most useful, answering nearly all the purposes, without destructive qualities of copper. Zinc has been long considered a scarce ore, and, should it be found in large bodies in the Mississippi basin, will be a very important article to the resources of that region.

The most singular circumstance in the mineral history of the interior of N. America is the abundance and extent of the stores of muriate of common salt. Amongst the revolutions effected in the last forty years on the condition of the country, there is none more salutary to private concerns than the change in the price of salt in the interior of this continent. I remember when I applied for W. Pennsylvania and W. Virginia salt procured by transportation from the Atlantic coast.

At a period when money was at least 100 per cent. above its present value, salt cost in those parts five dollars per bushel, at a *minimum* price. Salt is now manufactured in a great variety of places over the face of the earth gave few indications of its existence.

There is good reason to believe that at certain periods the whole basin of the Mississippi is saturated with salt water—a fact which, combined with the abundant existence of limpid fresh water on the surface, is highly consolatory.

Where muriate of soda prevails to such excess, some parts of the Spanish internal provinces, which becomes uninhabitable, cold, and sterile. It is also the case with part of central Asia. In the East, salt is procured generally from the sea, or in substance in mines, as at Gaudaloupe, in France, and more particularly, Wielitzka, near Cracow, in Austrian Poland. In North America, muriate has not been found in solid imbedded masses, though no reasonable doubt can be entertained that the bowels of the earth must contain prodigious bodies of that fossil in its crystallized form in places where it is so very extensively held in solution by water. It may be safely expected that in some future day muriate of soda will be discovered in the Mississippi basin, as in Spain and Italy.

It has been mentioned amongst the mineral resources of Missouri, but I am unacquainted with the extensive body of that fossil yet brought into the market of that State. Mr. Bradbury speaks with enthusiasm of the enormous strata of both coals and iron, which lines many parts of the banks of the Mississippi, but the coal spoken of by this author is generally found above the limits of Missouri.

Many other mineral substances, of less value, have been discovered in Missouri; but so much of the area of the State remains unsettled, that its mineral and vegetable wealth have only commenced their development. From what is known, much may be expected. Few sections of the earth, of equal superficies and of so recent civilized colonization, have exhibited so rich a variety of mineral resources as southern Missouri.

This State is in a peculiar degree remarkable, as forming the connecting link between the forest and meadow or prairie sections of North America. That enormous forest, which may be remarked as covering the entire Atlantic slope, nine-tenths of St. Lawrence basin, all the basins of the Appalachicola and Mobile, and the delta of the Mississippi, and most parts of the left side of its basin, reaches into Missouri, and covers nearly all its southern and southeastern sections. This great body of woods is indented in Ohio, Indiana, and Illinois, by a protrusion of the prairies, which expand, advancing SW., and range through Missouri, S. of the Missouri river. On the west border of that State, on the Osage, and near the junction of the Missouri and Kansas rivers, the prairies usurp much the greater share of the surface of the whole country. Lines of woodland follow the streams, leaving the intermediate spaces open plains. Those lines of timbered ground gradually become more attenuated westward, until nearly one unbroken waste spreads over hundred of miles. The peninsula between Missouri and Mississippi rivers is not so naked of timber as are the sources of the Arkansas, Kansas, and Platte rivers; yet immense prairies occur in the former region also. Over an extent much more than equal to the inhabited parts of the United States and Canada, the winds of the N., W., and SW., breathe over Missouri, without much impediment from mountains, hills, or forest. It will be seen in the sequel that from this exposure arises the peculiarly variable and cold climate which prevails near the junction of the Mississippi and Ohio rivers. If due attention is paid to the physiognomy of the adjacent regions, it will at once be seen that the surface of Missouri is in a peculiar manner liable to extraneous influence. To the SW., for upwards of 1,200 ms., expands an open desert. To the W., as known, the extension of the same desert leaves the earth a void. To the NW., a two-fold cause superinduces a flux of cold air over Missouri—the openness of the immense region in that direction, and the constant volumes of cold, and often frozen water, brought down by the Mississippi and Missouri rivers. It is from these combined causes that such excessive changes are felt, and inequalities of seasons experienced, to extremes scarcely known in any other spot on this planet. It is from this complicated climate that in N. lat. 38 30 the rivers are frozen four years in five before the end of December. Another phenomenon has been observed in Missouri, which in a striking manner distinguishes its seasons from those of Louisiana or the Atlantic slope; that is, the much less moisture in the atmosphere of the former. Though frosts are so rigorous at St. Louis as to render the Mississippi passable on the ice before the beginning of January, in ordinary seasons, yet deep snow or drenching rains are uncommon. The air is commonly

dry, cold, and elastic. In reality, the position of Missouri, Arkansas, and Louisiana, are singularly worthy of philosophic attention. A dense forest covers all the alluvial bottoms of the Mississippi, and those of its confluent. On the east side of that vast recipient, we have seen this forest only terminated by the Atlantic ocean. On the W., it is followed by the prairies or desert we have noticed. Moisture is as remarkably abundant in the forest tracts as it is wanting in the prairies. The natural consequence of the position of places, on the confluence of two regions whose meteorological constitutions are so essentially different, is an exposure to the extremes of both, following the current of air. This is, in an extraordinary degree, the case with Louisiana, where two successive seasons may differ so much, as one to present an almost constant deluge of rain, and the other scarcely affording a single shower. Ascending the Mississippi, the quantity of rain becomes less in a given time, at least as far N. as 42°.

A remark may be made in this place, that what may be designated the rainy and dry seasons are not confined to the tropics. Rain and snow are mere relative terms: therefore, in the U. S. the rainy and dry seasons are nearly as regular in their succession and periods as similar seasons are within the tropics. The difference is rather in the quantity than in the times of rain and fair weather. To this theory Louisiana is the most remarkable exception; and, when viewed in connexion with the adjacent and distant regions, the causes of the aberrations of the seasons of that State are at once to be conceived and clearly understood. It ought, however, to be recollected that we are now making a natural and not a political survey: therefore, in specifying Louisiana, the delta of the Mississippi and contiguous places are meant. It is when making such expansive surveys, and elucidating the phenomena of nature on so large a scale, that the full value of maps can be fully appreciated. Without maps, no enlarged views of the laws of meteorology could ever be formed by any exertion of the human intellects; and it is from neglect of such comprehensive combinations, that so many crude notions on particular climates pass current.

The climate of Missouri is consequently liable to great extremes of heat and cold. The winters of St. Louis are severe—the Mississippi, in ordinary seasons, being frozen before the end of December. The illimitable plains to the SW. and W. of the State leave an open vent to the winds, and superinduce a much greater severity of cold in a given lat. than on the Atlantic coast.

The seasons of Missouri partake of the unsteady character of the climate of the Mississippi basin, and indeed of the continent of North America in general. No two seasons in succession have much resemblance to each other. The occurrence of first frost in autumn, the last in spring, or the quantity and times of rain and snow in winter, are equally uncertain.

In one respect, the climate of Missouri differs essentially from that on the Atlantic slope, in similar latitudes; as we before observed, less moisture falls on the former than on the latter, either as rain or snow. This circumstance has misled many as to the real nature of the climate of Mis-

souri, and has given to it a character of mild the reverse of the fact.

The productions of Missouri have been not both vegetable and metallic. We may merely that the vegetables usually cultivated are found in the middle States generally.

In metallic and other fossil substances, Missouri is perhaps the richest region in the United States. The following catalogue, given by Mr. Seaboard, yields a result which strongly illustrates the mineral wealth of that State, where most of the substances are found:

Metallic substances.—Native iron, red iron, iron sand, native magnet, argillaceous iron, micaceous oxyd of iron, iron pyrites, brown hematite, sulphuret of zinc, sulphuret of lead, granular sulphuret of earthy oxyd of lead, carbonate of lead, sulphuret of antimony, black oxyd of manganese, copper, sulphate of copper.

Saline substances.—Nitrate of potash, muriatic soda, sulphate of magnesia, native alum.

Inflammable and miscellaneous substances.—Sulphur, stone coal, pumice, madrepore, white.

Earthy substances.—Chalk, flint, hornstone, rock, crystal, novaculite, common quartz, radiated quartz, red ferruginous quartz, granular quartz, tabular quartz, hoary quartz, steatite, chalcedony, reddle, yellow earth, opalized agate, agate mineral, plastic white clay, fuller's earth, stalactite, stalagmite, pudding stone, opal, jagged agatized wood, cornelian, sulphate of lime, spar, calcareous spar, bassanite, buhrstone, agate, greenstone porphyry, schorl, ochre, stone.

To the above may be added carbonate of lime in form of limestone and marble.

The lead mines of Missouri are principally in the co. of Washington, but there are also diggings in St. Genevieve, Madison, and Jefferson counties.

The ore is that species called galena by mineralogists; the sulphuret of lead in chemistry. The ore yields about 80 per cent. pure lead. The veins seem inexhaustible, but very irregularly distributed, the veins having no stratification, but both through the other substances in every direction, and of an indefinite thickness. Taken as a whole, the lead district of the State of Missouri is the richest in the production of that metal of any yet discovered.

The lead mines of the State of Missouri deserve some historical notice, from their immensity and national importance.

The West Company was formed by letters under the regency of the duke of Orleans, and the minority of the king of France, Louis XV. dated the 23d of August, 1717, and enregistered the 6th of September following.

Under this company came out to Louisiana in 1719, Philip Francis Renault, son of Phillipe Renault, a noted iron founder at Consobrec, near Maubeuge, in France.

In 1720 Renault and one of his associates, M. Lamotte, discovered the respective mines and bear their names.

Renault worked the mines extensively, but in the end obliged to abandon the undertaking from some fiscal arrangements in France, and returned to his native country in 1742. From his

ed until 1797, or during the long period of 55
et, no attempts of any consequence were made
elt lead in these neglected mines.

1797, a Moses Austin, Esq., from Wythe
Va., made a journey to the lead mines in Lou-
isiana, and obtained a patent from the Spanish
authorities for one league square, in consideration
of erecting a reverberatory furnace. This work
commenced in 1798. Mr. Austin sunk the
regular shaft for raising the ore.

In 1799 this gentleman erected a shot tower,
made shot of approved quality. The latter
was erected under the superintendance of
Bates. Since the foregoing period the lead
mines have continued to attract public attention,
and have been extensively worked. When Mr.
Polk visited this tract in 1818 he enumerated
45 diggings.

What is now the State of Missouri formed a
part of Louisiana, and has undergone the political
vicissitudes of that country, and was amongst the
earliest parts that the French discovered. In 1674
French missionaries, by the names of Jolliet and
La Salle, entered the Mississippi by the route of
the Arkansas, descended the former stream to the
Gulf, and returned to Canada by the Illinois.
The country was visited by M. de la Salle in 1683.
The settlements were made soon after in the
respective regions now comprised in the State of Illi-
nois and Territory of Arkansas, but none in any
now within the State of Missouri.

In 1762, all Louisiana was ceded by France to
Spain, and possession taken in 1769.

Upper Louisiana, now the State of Missouri,
was to be peopled about 1760. The attempt of
settling at the mines by Renault, and its failure
have been seen. In 1762 the present town of St.
Louis was commenced, since which period settle-
ments have gradually, but during the existence of
the Spanish Government slowly advanced. In 1803
the country, with all Louisiana, was ceded to the
United States; and early in 1804 was taken pos-
session of by Major Amos Stoddard.

Louisiana was divided into two territories, that
of Orleans below N. lat. 31, and Louisiana con-
taining the residue of that country. New Orleans
remained the capital of Orleans and St. Louis of
Louisiana.

In 1810 the then Territory of Louisiana con-
tained 20,485 inhabitants, of which 3,011 were
free.

In 1812, when the Territory of Orleans became
the State of Louisiana, Louisiana Territory was
annexed to the Territory of Missouri; and on the
1st of January, 1813, Mr. Edward Hemstead took
part in Congress as delegate. April 3d, 1818,
a bill for the admission of Missouri into the
Union, as a State, received a second reading, and
was committed.

In the bill being brought up for a third reading,
its passage was opposed, unless under condition of
prohibiting the introduction of negro slaves. This
condition defeated the bill in the session of
1818-19, and in the session of 1819-'20, both of
which, particularly the latter, was in a great part
occupied in debates on the subject.

In the former session, March 5th, 1820, an act
was passed permitting the people of Missouri to
hold a convention, which was empowered to frame

a constitution, and adopt such name as they should
choose; and under such constitution, when ap-
proved by Congress, such a State to become one of
the United States, with all the rights and immuni-
ties appertaining to the original States.

The convention of Missouri met at St. Louis,
——, 1820, and formed a constitution, which
was presented to Congress for approval at the
opening of the session of 1820-'21. A clause in
the constitution, excluding from the State free ne-
groes and people of color, gave rise to a long and
violent debate in both Houses, which eventuated
in a resolution of Congress, dated March 3d, 1821,
in the following terms:

*Resolved by the Senate and House of Repre-
sentatives of the United States of America in
Congress assembled, That Missouri shall be ad-
mitted into this Union on an equal footing with
the original States, in all respects whatever, upon
the fundamental condition that the fourth clause of
the twenty-six section of the third article of the
constitution submitted on the part of said State to
Congress, shall never be construed to authorize the
passage of any law, and that no law shall be passed
in conformity thereto, by which any citizen of
either of the States in this Union shall be exclu-
ded from the enjoyment of any of the privileges
and immunities to which such citizen is entitled un-
der the constitution of the United States: Provi-
ded, That the Legislature of the said State, by a
solemn public act, shall declare the assent of the
said State to the said fundamental condition, and
shall transmit to the President of the United States,
on or before the fourth Monday in November next,
an authentic copy of the said act; upon the receipt
whereof, the President, by proclamation, shall an-
nounce the fact; whereupon, and without any
further proceeding on the part of Congress, the ad-
mission of the said State into this Union shall be
considered as complete."*

The Legislature of Missouri, on the 26th of
June, 1821, passed an act of accession to the con-
ditions contained in the foregoing resolution of
Congress, and transmitted the act to the President
of the United States, who, on the 10th day of Au-
gust, 1821, issued his proclamation pursuant to the
tenor of the resolution of Congress and the acces-
sion of the Legislature of Missouri to its provisions,
and Missouri became a State of the United States.

It may not be uninteresting to trace the line
which, by the act of admission of Missouri, bounds
the slaveholding from the non-slaveholding States
and Territories that have been, or may be, formed
beyond the Mississippi. Beginning on the right
bank of that stream, at the mouth of Ohio, and
following the boundaries of the State of Missouri,
up the Mississippi and Lemoine rivers, and thence
to the S.W. angle of Missouri, on the N. boundary
of the Arkansas Territory at N. lat. 36 30, and
thence due W. to the frontier line between the
United States and Spain.

The extent and relative population of Missouri
can be only vaguely calculated, as the outlines and
respective area of the cos. remain unascertained to
any approach to accuracy. The following table
will exhibit, however, the general extent, it is
presumed, sufficiently correct for ordinary purposes.

Civil and political subdivisions of Missouri,
with the result of the census of 1820 annexed;

and which, as has been done in most of the other States, we retain as data to serve in the history of the progressive population of the United States.

The lines of settlement in Missouri ran chiefly along or near the water courses, and if the one-tenth part of the entire area is assumed for the surface actually under culture, I am led to believe will be an ample estimate. This would yield 6,287, or, in round numbers, 6,300 square miles and with a population little exceeding 10 to the square mile.

By the census of 1820, the people of Missouri were found to be composed of 55,988 whites, 376 free colored persons, and 10,222 slaves, and classed thus:

Foreigners not naturalized	-	496
Engaged in agriculture	-	13,559
Engaged in manufactures	-	1,870
Engaged in commerce	-	487

In the number employed in manufactures, it is probable are included about 1,100 persons employed in the lead mines.

Population of Missouri by ages, 1840.

Mobile, river of the U. S., in the State of Ala., is formed by the united streams of Tombigbee and Alabama rivers. The extreme NW. sources of Tombigbee are in the State of Miss., near the S. line of Tenn., from whence the different branches flow SE. into Ala., where, uniting, they form the Tombigbee, which flows nearly due S. to its junction with the Alabama, at N. lat. 31 5. The Tombigbee receives, besides many lesser confluent streams, the Tuscaloosa, or Black Warrior, a large stream from the NE. The entire length of the Tombigbee is about 300 ms. by comparative course.

The Alabama is formed by the united streams of the Coosa and Tallapoosa, which both rise in Ga., and, flowing to the SW., unite at N. lat. 32 23, and from thence to the junction with Tombigbee assumes the name of Alabama. The entire length of the Alabama, from the sources of the Coosa to the head of Mobile river, is, by comparative course, about 400 ms. A considerable branch from the N., called the Cahawba, enters the Alabama about 100 ms., by the windings of the stream, below the junction of the Coosa and Tallapoosa. Cahaba, the seat of government for the State of Ala., is situated at the mouth of the Cahawba river.

The river Mobile is about 40 ms. in length, from the head of Mobile bay to the junction of Tombigbee and Alabama rivers. Within a very short distance of its head, the Mobile divides into two branches: that of Mobile proper to the W., and Tensaw to the E. These never again unite, but flow separately into Mobile bay, with several inlets from one to the other. The islands enclosed between the main branches and the inlets are, in general, liable to inundation.

The Mobile river admits vessels of 12 feet draught in all its length; the Tombigbee, those of 5 feet to Fort Stoddart; and Mobile, those of about 6 feet to Fort Claiborne.

Mobile Bay opens below the mouth of the Mobile and Tensaw rivers, and gradually widens from 4 to 10 or 12 ms., and, extending 30 ms. nearly S., again contracts to about 5 ms., having Dauphin island in nearly the middle of its entrance into the Gulf of Mexico. The main channel, between Dauphin island and the Point of Mobile, has a depth of 18 feet. The channel between the main shore and Dauphin island, known by the name of the Pass au Heron, has only 6 feet. A bar of 13 feet water crosses Mobile bay 3 ms. below the town of that name.

Mobile Point is a long, low, sandy, and narrow peninsula, which bounds Mobile bay on the S., extending from the bay of Bon Secours, the south-eastern extremity of the former, towards Dauphin island, which it approaches to within 3 ms.

Directions for coming into Mobile bay, Mobile, and Blakeley.—In running in for the land or the Bay of Mobile, should you make it to the westward of the bar, the land will appear broken, as it consists of small islands, which occasion several small openings; if to the eastward, the land is uniform as far as Pensacola E., and covered with timber, the beach generally sandy, and quite perceptible in clear weather 8 or 10 ms. distant. Dauphin island, on the western point of the bay, appears high and bluff; Mobile point low and sandy, with a single tree on the extremity, in the form of an umbrella, and thinly wooded for 5 ms. from the

Mistá, a volcanic summit or peak of Peru, in the province of Arequipo. In 1796, according to Mr. von Haenck's narrative, this peak was ascended to its summit by Thadeus Haenck, a Bohemian naturalist, who, by a trigonometrical operation on the sides of Arequipo, determined its perpendicular height above the ocean level to be 20,328 feet.—*Ann. Phil.*, vol. —, No. 44, p. 266.

Mistra, or *Misitra*, village of Greece, in the Peloponnesus, supposed, though erroneously, to be on the coast of Sparta. According to Chateaubriand and Levesque, Mistria is situated 1½ ms. from the ruins of Sparta, and on the W. side of the Eurotas, (the Vasilipotamos river or brook.) Mistria contained a pop. of 15,000—one-third Mahometans, the remainder Greeks and Jews.

Mitcham, village of Eng., in Surry, seated on the banks of the Great Ouse, on which are some snuff mills and 20 printing manufactories. It is 8 ms. SW. of London.

Mitau, strong town of Poland, the capital of the province of Prussia, remarkable for its large ducal palace. It is situated on the Bolderau, 45 ms. E. of Goldingen, and 270 NNE. of Warsaw. Lon. 23 50 E., lat. 53 60 N.

point. There are houses on the point and Dauphin island; before you shoalen into 7 fathoms water, bring Mobile point to bear N. $\frac{1}{2}$ W., and the E. end of Dauphin island to bear NNW $\frac{1}{2}$ W., and steer in NNW.; this course will run you over the bar, on which you will have from 16 to 20 feet water in good tides; after passing a small sand island on your larboard, you are over the bar, and out of danger, with a shoal each side of you, then haul up for the point of Mobile, giving it a berth of 300 or 400 yards, then steer up the bay as tracked on the chart. It is necessary to calculate for the bay currents, as when the tide is flowing you will drift to the westward, and when ebb to the eastward, until you get near Dog river bar, which extends across the bay; when in 11 feet water, and $2\frac{1}{2}$ ms. from the western shore, 7 ms. from Mobile, and 15 from Blakeley, come to for a pilot. In beating across the bay, you can stretch within $2\frac{1}{2}$ ms. of the shore with safety, except opposite Big Point Clear; and in Bonsecour's bay, keep Big and Little Point Clear in range, one N. and the other S. It is also observed, that there is a middle ground shoal of 10 feet water lying to the starboard of the track in running up the bay, and opposite Big Point Clear and Fowl river, which is not shown on the chart.

Mobile Town is situated on the W. or right shore of Mobile bay, near the mouth of Mobile river, upon a bank elevated 18 or 20 feet above the surface of the water in the bay. It is a place of considerable trade, though the entrance to the harbor is inconvenient for vessels drawing more than 8 feet water. A long, narrow, and low island, lies before the town, and extends about 5 ms. above, round which large vessels are obliged to pass, in order to reach the harbor, in which any vessel can enter in safety which can pass the bar, 3 ms. below the island. Mobile is situated at N. lat. 30 44, and W. lon. from W. C. 10 55, and from Greenwich 87 55. Pop., as stated in the census tables for 1840, 12,672.

Mobile, co., Ala., bounded by the Gulf of Mexico S., Mississippi W., Baldwin and Monroe cos., in Ala., N., and West Florida E. Length 58 ms., mean width 45; area 2,600 sq. ms. It occupies that part of Alabama S. from the 31° N. lat., and between the State of Mississippi and territory of West Florida. Surface generally level, or moderately hilly. Soil, with but very partial exceptions, barren, and covered with pine timber. Chief towns, Mobile and Blakeley. Pop. 1820, 2,672; and in 1840, 18,741. Central lat. 30 42 N., lon. W. C. 11° W.

Mocampour, town of the country of Napaul, capital of a district of the same name. It is situated on the E. side of the Napaul, 48 ms. SSE. of Catmandu, and 130 N. of Patna. Lon. 85 37 E., lat. 27 35 N.

Mocha, small island off the coast of Chili. Lat. 38 30 S., lon. W. C. 3 10 E.

Mocha, or *Moka*, town of Arabia, in Yemen, seated on a small bay of the Red Sea, near the strait of Babelmandeb. On each of the points of land, which enclose the road, is a fort; but they are wretched structures. The town is of a circular form, surrounded by a wall, in which are six gates. It carries on a great trade, especially in coffee; and the inhabitants are estimated at 18,000, without

including the Jews, who inhabit the suburbs. English, from Hindoostan, at present engross most exclusively the trade of this place. It is in a barren plain, 140 ms. SSW. of Sane, and SSE. of Mecca. Lon. 44 25 E., latitude 1 North.

Mocksville, village, Rowan co., N. C., by road 190 ms. W. from Raleigh.

Modbury, town of Eng., in Devonshire, w manufacture of plush; seated between two hills ms. SSW. of Exeter, and 208 WSW. of London.

Modena, or *Modenesa*, a duchy of Italy, 64 long and 35 broad, bounded on the W. by Parma, N. by Mantua, E. by the Ferrarese, Bologna and Tuscany, and S. by the republic of Lucca; includes the duchies of Mirandola and Reggio. soil is fertile in corn, wine, and fruits of different kinds. It also feeds a great number of cattle.

Modena, fortified city of Italy, capital of the denese, with a magnificent college. The palace is richly furnished, and contains fine paintings. The inhabitants are estimated at 30,000 is seated between the rivers Secchia and Panola. 34 ms. S. by E. of Mantua, and 60 NNW. of Florence. Lon. 11 12 E., lat. 44 34 N.

Modesttown, village, Accomack co., Va.

Modica, town of Sicily, in Val di Noto, on the river Accellaro, 10 ms. W. of Noto.

Modon, strong town of European Turkey, in Morea, with a safe harbor. It is seated on a promontory projecting into the sea of Sapienza, 1 W. of Coron. Lon. 21 31 E., lat. 36 53 N.

Moers.—See *Meurs*.

Moeskirch, town of Suabia, in the principality of Furstenburg, 18 ms. N. of Constance.

Moffat, town of Scot., in Dumfriesshire, on the river Annan, encompassed on all sides, except the S., by hills of different heights. Its delightful situation and its mineral springs attract much company. It is 20 ms. N. by E. of Dumfries.

Moffat Hills, the highest mountains of the Scot., on the N. border of Dumfriesshire. The highest, the most elevated, is 2,300 feet above the level of the sea. They feed numerous flocks of sheep, and from them descend, in different directions, the Tweed, Clyde, and Annan, whose sources are a little distant from each other.

Moffitt's Mill, post office, Randolph co., N. C., 85 ms. W. from Raleigh.—Post office, Pelham ton district, S. C., 172 ms. NW. from Columbia.

Moffitt's Store, post office, Columbia co., N. C.

Mogador, town of the kingdom of Morocco, a harbor for vessels of a middling size. It is surrounded by walls, with batteries, and at high tide is almost encompassed by the sea. The streets are all in straight lines, and contain a great number of handsome houses. The port is formed by a channel between the mainland and an island about a mile in length. It is 180 ms. WNW. of Morocco. Lon. 9 35 W., lat. 31 28 N.

Mohacs, town in Lower Hungary, in the principality of Buranwar, at the conflux of the Corasse with the Danube, 23 ms. N. by E. of Esseck.

Mogrebins, or *Mogrebi*, "people of the west," terms by which the Arabs and Moors of western Africa are known in Mahometan Asia.

MOHAMMEDANISM, so termed from the personal name of its founder.—See article ISLAMISM in the GIRA, MOSLEM, MUSSULMAN, &c.

hawk, river of N. Y., the great western of the Hudson. The extreme northwestern of the Mohawk is in Lewis co. It thence Oneida co., flows S. 20 ms. to Rome, where ns to SE. about 28 ms. by comparative es, to its first northern confluent, West Can. Here it assumes nearly an eastern course of , to its passage through the Katsbergs, at the falls. It is precipitated at this place over a of rocks.—See article *New York*, section l Western canal. Below the Little Falls, the wks flows, by comparative courses, 70 ms. by E. to its junction with the Hudson at Wa- l. Two ms. above Waterford it is again itated over the Cahocs rocks by a single pitch feet. The Mohawk, besides West Canada, es from the N. East Canada, Chucktananda, me others of lesser note; and from the S. ny creek, and Schoharie river. Its entire rative course, 123 ms. It passes the villages ns of Rome, Utica, Herkimer, Little Falls, heim, Palatine, Canajoharie, Caughnawago, rdam, and Schenectady. Its banks gene- se by an acclivity of more or less inclination, some places, as at Schenectady, Herkimer, and Rome, meanders through extensive al- flats. The soil in most places, particularly of the flats, highly fertile and well cultivated. Great Western canal has been formed along ht shore from opposite Waterford to Rome. Village on the Grand river, or Ouse, U. C., principal village of the Six Nations. This residence of their principal chief, Captain a Brant. The village is beautifully situated, neat church with a steeple, a school house, council house; and not far from it is a grist w mill.

hawk Bay, in Fredericksburgh, U. C., bay nte, lies opposite to the Mohawk settlement, ose to the mouth of the river Appanee.

hawk Settlement, bay of Quinte, U. C., is Richmond, and comprehended between the Shannon and Bowen's creek.

hegan, village of U. C., on the right bank of hames, 5 ms. below Norwich. Here reside nment of the Mohegans.

liccon, large creek of Ohio, rises in Wayne Richland cos., flows S. about 50 ms., and White Woman's river in Coshocton, near the rder of Knox co.—Tp., Wayne co., O. in 1820, 632.

hila, one of the Comora islands, between the d of Madagascar and the continent of Africa. a good road for ships. Lon. 43 50 E., lat. S.

hilf, or *Mogilev*, government of the Russian e, comprising a part of Lithuania, dismem- from Poland in 1772.—Town of Lithu- capital of a Russian government of the same

It has a considerable trade, and is situated e Dnieper, 340 ms. ENE. of Warsaw, and s. S. of Petersburg. Lon. 30 14 E., lat. N.

hrin, town of Brandenburg, in the New 18 ms. NNW. of Custrin.

hrungen, town of Prussia, in the province of and, situate on a lake of the same name, almost surrounds it. It is 56 ms. SSW. of nsberg, and 56 SE. of Dantzic.

Molih, town and fort of Arabia Petrea, on the coast of the Red sea, 130 ms. S. of Acaba, and 180 NW. of Medina. Lon. 33 50 E., lat. 27 30 North.

Moine river, or *Lemoine*.—See boundaries of the State of Missouri.

Moir river, runs into the bay of Quinte, U. C., near the SW. angle of the tp. of Thurlow.

Moir, tp., Franklin co., N. Y.

Mojaisk, town of Russia, 63 miles W. from Moscow.

Moirans, town of Fr., in the dep. of Isere, on the river Isere, 25 ms. SE. of Vienne.

Moissac, town of Fr., in the dep. of Lot, with a trade in corn and flour, seated on the Tarn, near its conflux with the Garonne, 13 ms. NW. of Montauban.

Mola di Bari, town of Naples, in Terra di Bari, seated on the Gulf of Venice, 17 ms. E. of Bari.

Mola di Gaeta, town of Naples, in Terra di La- vora, seated near the sea, 3 ms. NE. of Gaeta.

Mold, town of Wales, in Flintshire. The as- sises are held here. It is 5 ms. S. of Flint, and 201 NW. of London.

Moldau, river of Europe, in Bohemia; it rises in the Winterberg hills, near Ravensburg, within less than 20 ms. from the Danube, at the mouth of the Inn, flowing nearly N. about 100 ms., it unites with the Beraun from the SW. at lat. 50° N. About 5 ms. below the mouth of the Beraun it passes the city of Prague, and joins the Elbe above Melnick, 20 ms. below Prague. The Moldau drains more than half of all Bohemia.—See *Mulldau*.

Moldau, or *Sereth*, river, rises in the Carpathian mountains, in the Austrian province of Bukowine, and flowing SE. falls into the Danube, above the mouth of the Pruth. The Moldau gives name to Moldavia.

Moldavia, province of Turkey in Europe, 270 ms. long, and from 30 to 120 broad; bounded on the N. by Poland, from which it is also divided on the NE. by the Dniester, E. by New Russia and Bessarabia, SE. by Bulgaria, from which last it is parted by the Danube, SW. by Wallachia, and W. by Transylvania. The other principal rivers are the Pruth and Sereth. The W. part is moun- tainous, and there are some uncultivated deserts; but it abounds in good pastures, which feed a great number of horses, oxen, and sheep; it also produces corn, pulse, honey, wax, fruits, with plenty of game and fowls. The sovereign, who is styled hospodar, is tributary to the grand seignor. The inhabitants are Christians of the Greek church. Jassy is the principal town.

Mole, river of England, in Surry, which rises on the borders of Sussex, flows N. to Docking, and, passing beneath Box Hill, is said to disappear in its vicinity and to rise again near Leatherhead; hence it is supposed to derive its name; but the fact is, that a tract of soft ground, two miles in length, called the Swallows, in very dry seasons absorbs the waste water in caverns on the sides of the banks, but not so as to prevent a constant stream from flowing in an open channel above ground. The Mole, proceeding from Leatherhead to Cobham, enters the Thames opposite Hampton Court.

Mole, port of St. Domingo.—See *Nicholas*, St.

Molfetta, town of Naples, in Terra di Bari, seat-

ed on the gulf of Venice, 10 miles W. by N. from Bari.

Molieres, town of France, in the department of Lot, 11 miles N. of Montauban, and 16 S. of Cahors.

Molina, strong town of Spain, in New Castile, seated on the river Gallo, in a territory abounding in pastures, 35 ms. SE. of Siguenza, and 88 ENE. of Madrid. Longitude 1 53 W., latitude 40 50 North.

Molise, territory of Naples, lying between Terradi-Lavora, Abruzzo Citeriore, Capitanata, and Principato Ulteriore. It is in the form of a triangle, whose sides are 49 miles in length, and is a mountainous country, but fertile in corn, wine, saffron, and silk.

Molise, town of Naples, capital of a territory of the same name, but not populous. It is 30 miles N. of Naples. Lon. 14 43 E., lat. 41 36 N.

MOLLAH, title of supreme judges in the Turkish empire. Those of Mecca and Medina have the highest rank. Like all other Turkish officers, the mollahs are removable at the will of the Sultan. The term has, no doubt, the same origin with the Tartar mullah; which see.

Molsheim, town of France, in the dep. of Lower Rhine, and late province of Alsace, seated on the Brusch. It is 10 ms. W. by S. of Strasburg, and 228 E. of Paris. Longitude 7 25 E., latitude 48 32 N.

Moluccas, or *Spice Islands*, cluster of islands in the Indian ocean, lying E. of Celebes. The principal are Ternat, Amboyna, Tydore, Machian, Motyr, and Bachian, the largest of which is hardly 30 miles in circumference. They produce neither corn, rice, nor cattle, except goats; but they have oranges, lemons, and other fruits, and are most remarkable for spices, especially cloves. They have large snakes, which are not venomous, and very dangerous land crocodiles. The natives are idolatrous, but there are many Mahometans. They were discovered in 1511 by the Portuguese, who formed some settlements, but the Dutch drove them away.—See *Banda*.

Mohwitz, town of Silesia, in the province of Grotzka, remarkable for a battle which the Prussians gained over the Austrians in 1741. It is 40 miles S. of Breslaw. Lon. 17 14 E., lat. 50 23 N.

Mombaza, town of Africa, with a citadel, seated in an island of the same name, on the eastern coast opposite to Zanguebar, 75 ms. SSW. of Melinda, and subject to Portugal. Lon. 48° E., lat. 44° N.

Mombaza, country of Africa, subject to the Portuguese; hence they export slaves, gold, ivory, rice, flesh, and other provisions, with which they supply the settlements in Brazil. The king of Melinda, being a Christian, had a quarrel with the Portuguese governor, took the castle of Mombazo by assault, turned Mahometan, and murdered all the Christians, in 1631; but, in 1729, the Portuguese became masters of this territory again.

Mompox, town of Colombia, in New Granada, on the left bank of the Magdalena, about 20 miles above the mouth of the Canca.

Mona and *Moneta*, small group of islands between Hispaniola and Porto Rico.

Mona, island of Denmark, on the Baltic, seated

on the SW. of the Isle of Zealand, from which it is separated by a narrow channel. Lon. 12 3 lat. 55 20 N.

Monacks, village, Montgomery co., Alabama miles by post road E. from Cahaba.

Monaco, small but handsome and strong of Italy, capital of a territory of the same name with a castle, a citadel, and a good harbor. naturally very strong, being seated on a craggy that projects into the sea.

Monadnock, lofty peak of Coos county, N rising to the elevation of 3,254 feet above the top of the ocean.

Monaghan, county of Ireland, in the province of Ulster, 32 miles in length and 22 in breadth on the N. by Tyrone, on the E. by Louth, on the SE. by Louth, and on the W. by Fermanagh. It is full of woods and bogs, and the third part of it is taken up by Lough Erne, which contains 24 parishes.

Monaghan, borough in Ireland, and capital of the county of the same name, 40 ms. SW. of Drogheda, and 60 NNW. of Dublin.—Tp., York Penn., on the S. side of Yellow Breeches creek, joining Cumberland co. Pop. in 1820, 1,150.

MONARCH, from *monos*, sole, and *arcos*, ruler, a generic term, in strictness, means an absolute monarch, but, in a more general sense, applies to any ruler who is alone at the head of a government, however restricted may be his prerogative. It is not, as is usually supposed, applicable to a life only; the intent of the title applies to the person, and not to its periodical extent. The emperors of Russia, Austria, and China; the kings of Great Britain, France, &c.; the popes and sovereign dukes of Italy and Germany, and President of the United States of North America, &c., are all monarchs, however varied and different may be their prerogatives or manner and means of elevation. Webster, in the first sentence of his definition of monarchy, observes that it is "a state of government in which the supreme power is lodged in the hands of a single person."

Monaster, ancient town of Africa, in the kingdom of Tunis, pleasantly seated near the sea, 75 ms. SE. of Tunis. Lon. 11 6 E., lat. 35 20 N.

MONASTERY, house dedicated to religious retirement, and in which unmarried persons, of both sexes, live in community, and includes abbey, priory, nunnery, convent, &c.

Moncalvo, small but strong town of Italy, in the province of Monterrat, seated on a mountain, 12 ms. S. of Casal. Lon. 7 19 E., lat. 45 10 N.

Moncaon, or *Monzon*, very strongly fortified town of Portugal, in Entre-Douero-e-Minho, 26 ms. SE. of Tuy, and 26 N. of Braga. Lon. 8 2 lat. 42 8 N.

Monchabou, city of Asia, in the kingdom of Burman, which, in 1755, was the residence of the king before the court removed to Ava, the present capital, from which it is distant 39 ms. Monchabou was the birthplace of Alompra, the founder of the Burman empire. It is situated at lat. 20 20 N. and lon. 96 56 E.

Moncon, or *Monzon*, strongly fortified town of Spain, in Arragon, seated at the confluence of the Sofa and Cinca, 6 miles S. of Balbastro, and 28 NE. of Saragossa. Lon. 28° E., lat. 42 20 N.

Moncontour, town of France, in the dep. of

Milaine, and late province of Bretagne, 30 ms. of Malo. Lon. 2 36 E., lat. 48 15 N.

Milton, town, Addison co., Vt., 26 ms. S. by Burlington, on Lake Champlain, and 13 N. Vergennes, with 1,500 inhabitants.

Mindogo, river of Portugal, which has its source Guarda, and, crossing the province of Beira, by Coimbra, and falls into the Atlantic ocean at a cape of the same name.

Mindidier, small town of France, in the dep. of Picardy, and late province of Picardy, where there formerly a palace. It is seated on a mountain, 10 S. E. of Amiens, and 57 N. of Paris. Lon. 2 39 W., lat. 49 39 N.

Mindonnedo, town of Spain, in Galicia, in a fertility, on a small river, 60 ms. N. E. of Compostela. Lon. 7 10 W., lat. 43 30 N.

Mindoubleau, town of Fr., in the dep. of Loire, and late province of Blasois. It has a castle, and is 13 ms. N. of Vendome.

Mindovi, town of Piedmont, with a citadel, a university and a bishop's see. It was taken by the French in April, 1766. It is the largest and most populous town of Piedmont, and is seated on a plain near the river Elero, 8 miles N. W. of Turin and 35 S. E. of Turin. Lon. 8 6 E., lat. 44 50 N.

Mindorfe, town of Portugal, in the province of Beira, 30 ms. N. by E. of Portalegra. Lon. 7 21 W., lat. 39 32 N.—Town of Portugal, in the province of Alentejo, 20 miles south of Portalegra. Lon. 7 21 W., lat. 38 47 N.

Mingatz, *Mungatz*, *Munkaish*, &c., town and district of Upper Hungary, on the northern sources of the Teiss, and opposite the higher sources of the Danube, about 100 English ms. S. W. from Lemburg, in Hungary, and 300 a little N. of E. from Presburg. Lon. 48 50, lon. 23° E. of London.

Minghir, town of Hindoostan, in Bahar, with a citadel, seated on the right bank of the Ganges, 80 miles E. by S. of Patna, and 230 N. W. of Calcutta. Lon. 86 36 E., lat. 25 24 N.

Mingolia, so called from the most numerous people who have in all historical ages resided on it, the names of Moguls, Monguls, Mongols, &c. to the widest extent it is, though not very definite line, commensurate with the great table land of Central Asia. Greatest length from the sources of the Indus to those of the Amur rather above 3,000 miles, greatest breadth from the sources of the Indus and Brahmapootra, nearly at right angles to the greatest length, 1,100 ms. The breadth increases advancing to the N. E., but is in no part more than 500 miles, the mean breadth 800 miles, and the surface 5,000,000 sq. miles. From this immense expanse N. lat. 40° nearly central and equal to the one-fifteenth part of the land area, of the world, no water flows. Rivers rise around its vast surface, carrying their volumes in different directions into the Northern or Frozen ocean, Pacific Ocean, Indian oceans and Aral sea.—See article *Asia*, &c. and 88.

Minguls, *Country of the*, or *Western Chinese Tartary*, is bounded on the N. by Siberia, E. by Independent Tartary, S. by the great wall of China and Independent Tartary, and W. by Independent Tartary. The Mongul Tartars have neither towns, villages, nor castles; they wander in hordes, and live under tents, which they remove from one place to another,

other, according as the temperature of the different seasons, or the wants of their flocks require; they pass the summer on the banks of rivers, and the winter at the foot of some mountain or hill which shelters them from the piercing north wind. The Monguls are nominally subject to China, but, in reality, are a free nomadic race. They have been very improperly, by European writers, confounded with the Mandshurs and Tartars, from both of whom they differ essentially in language and manners.—See *Mandshuria*.

Monheim, town of Bavaria, in the principality of Neuburg 8 miles N. of Donawert.

Monikendam, seaport of N. Holland, which has manufactures of soap and silk. It is seated on a gut or frith of the Zuyder Zee, 8 miles N. of Amsterdam. Lon. 4 38 E., lat. 52 28 N.

Monistrol, town of France, in the dep. of Upper Loire, 14 ms. S. W. of St. Etienne.

Μοναχ, from Greek, *alone*, originally, no doubt, applied to persons who not only retired from worldly concerns, but also from all social converse with others, such as anchorites or hermits, but gradually applied to cenobites or monks, who live unmarried, but in community.

Monk's Corner, village in Charleston district, S. C., on Cooper's river, 30 ms. above Charleston.

Monkton, tp., Annapolis co., Nova Scotia.—Tp., Westmoreland co., New Brunswick.—Village and tp., Addison co., Vt., 23 ms. S. of Burlington. Pop. 1,250.

Monmouthshire, co. of Eng., 24 ms. long and 20 broad, bounded on the N. by Herefordshire, E. by Gloucestershire, S. E. by the mouth of the Severn, and W. and S. W. by the counties of Brecknock and Glamorgan. It contains 340,000 acres is divided into 6 hundreds and 127 parishes; has 7 market towns, and sends 3 members to Parliament. Beside the Wye, which parts it from Gloucestershire, the Minnow, which separates it from Herefordshire, and the Rhyney, or Rumney, which divides it from Glamorganshire, this county has, almost peculiar to itself, the river Usk, which divides it into two unequal proportions. Pop. in 1801, 45,582; in 1811, 62,137, and in 1821, 71,835.

Monmouth, borough of Eng., capital of Monmouthshire, at the mouth of the Minnow, which here joins the Wye. Over the former is a very ancient bridge and gateway, once a barrier against the Welsh. It is 18 ms. S. of Hereford, and 120 W. by N. from London. Lon. 2 46 W., lat. 51 49 N.—Town in Kennebec co., Me., 17 ms. W. from Augusta. Pop. in 1820, 1,590.

Monmouth, co. of N. J., bounded on the E. by the Atlantic ocean, S. W. by Burlington, N. W. by Middlesex, and N. by Raritan bay; length 60 ms., mean width about 18, and, exclusive of water, about 1,000 sq. ms. in surface. Its form triangular, and in one part, from Wreck Pond to Allentown, it is 30 ms. wide. Surface in the western and northern part undulating, but towards the ocean level. Soil of middling quality, though in places extremely productive. A very remarkable marl zone crosses this county in a direction from N. N. E. to S. S. W. Chief town, Freehold. Pop. in 1820, 25,038; and in 1840, 32,909. Central lat. 40 5 N., lon. W. C. 2 42 E.

Monmouth.—See *Freehold*.

Monocacy, small but fine river of Pa. and Md. It rises in Adams co. of the former State, and enters the Potomac in Frederick co., of the latter. It drains near one-half of Adams, and almost the entire surface of Frederick co.; comparative length about 50 ms.

Monomotapa, kingdom of the E. coast of Africa, bounded on the N. by Monomugi, on the E. by the Mosambique, on the S. by Sofala and Manica, and on the W. by unknown regions. It is watered by several rivers, of which Zambeza is the chief. It lies between 23° and 33° E. lon., and 14° and 19° S. lat.

Monomugi, kingdom of Africa, lying near the equator, between Abyssinia on the N., Zanguebar on the E., Monomotapa on the S., and Congo on the W. This country is very little known to the Europeans.

Monongahela, river of the U. S., rises in Randolph co., Va., interlocking with the sources of the Great Kenawha, at N. lat. 38 30. Its course is nearly S. 80 ms., to where it receives the W. branch, from Lewis and Harrison cos. Below their junction, the united stream flows SE. 30 ms. to the S. boundary of Pa., which it passes, and 2 ms. lower, receives from the SE. Cheat river, little, if any, inferior in column or length to the Monongahela itself. Cheat river rises in Randolph co., and flows through that and Monongahela cos., enters Pa., and unites with the main stream, as before noticed. The sources of the Monongahela and Cheat are in the western spurs of the Appalachian mountains. Below the mouth of Cheat, the Monongahela flows nearly S. 50 ms., to its junction with the Youghiogheny. The latter rises in the Appalachian mountains, in Alleghany co., Md., interlocking with the sources of the N. branch of the Potomac, flows N. into Pa., passing through Fayette, Westmoreland, and, entering Alleghany co., unites with the Monongahela at McKeesport, after a comparative course of about 100 ms.; 12 ms. below its junction with Youghiogheny, the Monongahela unites with the Alleghany, and forms the Ohio, at the city of Pittsburg. The entire length of the Monongahela river, by comparative courses, is about 170 ms., but, following the meanders of the streams, either along the main or Cheat branch, the length exceeds 200 ms.

The country drained by the Monongahela is in some parts mountainous, and in all hilly.

For down stream navigation, the Monongahela, at high water, is passable with large boats as high as the mouth of the W. branch, and by lighter vessels much higher. Cheat river is navigable into Randolph co., about 50 ms., by comparative course, above its mouth, and the Youghiogheny to the Ohionyle falls, in Fayette co., 60 ms. above its junction with the Monongahela. Extensive improvements have been made on the navigable facilities of the Monongahela. Light steamboats ascend as far as Brownsville.

The various branches of the Monongahela which derive their sources from the western chains of the Appalachian system, similar to the Potomac, claim a more than ordinary share of attention, as presenting the connecting links of a proposed line of canal improvement. Cheat river flows from the northwestern slope of Alleghany mountain, and, draining the eastern part of Randolph co., passes

Chestnut ridge, enters Preston co., and, the navigable stream, continues N. to within 5 from the S. boundary of Pa., turning to the through Laurel hill, and thence NW., crosses S. line of Pa., and unites with Monongahela.

Monongahela, city, borough town of Washington co., Pa., is situated on the left bank of Monongahela river, below the mouth of Pigeon c. It is the same place formerly called Parkison's 18 ms. very nearly due E. of Washington county seat, and very nearly a like distance E. of S. from Pittsburg. Pop. 800.

Monongalia, or *Monongahela*, county of bounded N. by Pa., E. by Preston co., Va., 1 Sandy creek, or Randolph co., SW. by Monongahela river, or Harrison, and W. by Tyler; length 33 ms., mean width 20; area 660 sq. ms. Surface generally extremely hilly, and in part mountainous. The river alluvion, and some of the of the hills highly fertile. The Monongahela Cheat unite in the lower part of the county, both streams traverse it obliquely. Chief town Morgantown. Pop. in 1820, 11,060; and in 17,368. Central lat. 39 30 N., lon. W. 0 West.

Monono, island.—See art. *Navigator's Island*.

Monopoli, town of Naples, in Terra di Bari, on the coast of the Gulf of Venice, 28 ms. ES Bari.

Monpazier, a town of Fr., in the dep. of Gironde, 18 ms. SW. of Sarlat.

Monquegna, or *Monquegaa*, town of Peru, the bishopric of Arequipa, and capital of a territory of its name, adorned with large vineyards. Its whole commerce is in wine and brandy, which are greatly valued. It is 100 ms. SE. of Arequipa. Lon. 71 40 E., lat. 17 34 S.

Monroe, co. of N. Y., bounded by Lake Ontario N., Ontario co. E., Livingston S., and Genesee W. Length 32 ms., mean width 17; area 540 sq. ms. Washed by Lake Ontario on the northern side, crossed nearly in the middle by Genesee river, and at right angles to that stream by the Grand canal, and drained by a number of other creeks, this county occupies a very eligible situation. The surface is generally hilly, with a good soil. Some alluvial flats extend along Lake Ontario and Genesee river. It was, in the census of 1820, included in Genesee and Ontario cos. Chief town, Rochester. Pop. in 1840, 64,902.

Monroe, co. of Pa., bounded by Northampton SE., S., and SW., by Lehigh river separating it from Luzerne N., Wayne co. N., and Pike NE. It forms a trapezium, 40 ms. from E. to W. greatest length, area being 576 sq. ms., the mean breadth would be about 14½ ms. It is mountainous, and drained by the higher branches of the Lehigh N. lat. 41°, and lon. 1½° E. of W. C., intersecting this county. Chief town, Stroudsburg. Pop. in 1840, 9,879.

Monroe, co. of Va., bounded SE. by Botetourt and Giles, SW. by Kenawha river, or Giles, W. by Greenbrier, N. by Nicholas, and NE. by Alleghany and Botetourt. Length 35 ms., mean width 30; area about 450 sq. ms. Surface mountainous, and very hilly. The body of the county lying between Greenbrier and Kenawha river, some very good alluvial soil skirts the streams, though generally rocky and sterile. Chief town, Uniontown. Pop.

320, 6,620; and in 1840, 8,422. Central lat. 32° N., lon. W. C. 3 25 W.

Monroe, co. of Ga., bounded by Pike W., Butts W., and Ocmulgee river separating it from Jasper and Wilkes NE., Bibb SE., and Crawford SW.; length 20 ms.; mean width 15; and area 300 sq. ms. N. lat. 33°, and long. 7° W. of W. C., situated in the eastern part of this county. Chief town, Forsyth, which is situated about 45 ms. S. of W. of Milledgeville. Pop. in 1840, 675.

Monroe, southwestern co. of Flo., extending to the Gulf of Mexico from the Coloosahatchie to Cape Sable, about 110 ms. The inland boundaries too vague to admit definite description. Pop. in 1840, 688.

Monroe, co. of Ala., bounded by Clarke W., Etowah N., Butler NE., Conecuh SE., and S. Baldwin. Length 48 ms., mean width 28; area 1,344 sq. ms. Surface, except near the streams, hilly and covered generally with pine timber. In Alabama, however, meandering through from E. to SW., gives a considerable superficies of rich alluvion. Staple, cotton. Chief town, Wetumpka. Pop. in 1820, 8,838; and in 1840, 10,000. Central lat. 31 30 N., lon. W. C. 10 25 W.

Monroe, co. of Miss., bounded E. by the State of Ala., W. by Tombigbee river, and NW. by the Gulf of Mexico to Nashville. Length 50 ms., mean width 8; area 450 sq. ms. Staple, cotton. Chief town, Cotton Gin Port. Pop. in 1820, 10,000; and in 1840, 9,250. Central lat. 34 10 N., lon. W. C. 11 20 W.

Monroe, co. of E. Ten., bounded by N. Car. E., Cherokee lands S., McMinn W., and Tennessee W. by Blount and Sevier, N. Length 43 ms., mean width 25; area 1,050 sq. ms. Surface hilly, broken, and in part mountainous. It is bounded on one side by the Tennessee, and drained by the Tellico river. Pop. in 1820, 2,539; and in 1840, 12,056. Central lat. 35 32, lon. W. C. 15 W.

Monroe, co. of Ky., bounded by Ten. S., Allen Ky., W., Barren N., Adair NE., and Cumberland E. It occupies the dividing ground between Cumberland and Big Barren rivers. Length 30 ms., breadth 25; area 700 sq. ms. Its chief town, Tompkinsville, is 120 ms. S. from Louisville. Pop. in 1820, 4,956; and in 1840, 6,526. Central lat. 36 46 N., lon. W. C. 8 22 W.

Monroe, co. of Ohio, bounded E. by Ohio river, W. by Washington, W. by Morgan, NW. by Belmont, and N. by Belmont. Length 38 ms., mean width 18; area 516 sq. ms. It is almost entirely hilly and broken, though the soil is generally productive. Chief town, Woodsfield. Pop. in 1820, 4,641; and in 1840, 18,521. Central lat. 39 48, lon. W. C. 4 5 W.

Monroe, SE. co. of Mich., bounded by Lake Erie, Ohio S., the unsettled Indian country W., and Wayne co. N. Length, breadth, and area, uncertain. Surface generally level, and soil productive. It is traversed from the NE. to SE. by the Raisin, Huron of Erie, and some lesser rivers. Chief town, Monroe. Pop. in 1820, 10,000; and in 1840, 9,922. Central lat. 42° N., lon. W. C. 7° W.

Monroe, co. of Ia., bounded by Lawrence S.,

Martin W., Delaware NE., and Jackson E. Length 24 ms., breadth 18, and area 324 sq. ms. Chief town, Bloomington. Pop. in 1840, 10,143.

Monroe, co. of Mo., bounded by Marion NE., Ralls E., Audrain SE., Boone SW. and Randolph W. Length from N. to S. 30 ms., breadth 27, and area 810 sq. ms. N. lat. 39 25, lon. W. C. 15° W. intersect near its centre. It is entirely comprised in the valley of Salt river, and, sloping eastward, is drained by numerous branches of that stream. Paris, the seat of justice, is situated on Crooked river, a confluent of Salt river, 120 ms. NW. of St. Louis. Pop. in 1840, 9,505.

Monroe, co. of Ark., bounded by Phillips E., Arkansas co. S., Jefferson W., Pulaski NW., and St. Francis N. Lat. 34 0 to 34 45 N. Central lon. W. C. 14 25 W. Though the adjacent counties, as laid down by Tanner, are here given, the outlines of this county are too vague to admit an approximate statement of the area. The slope is to SSE., and in that direction traversed by the main volume of White river. Much of the surface liable to annual submersion. The central part is in a direct line about 50 ms. NNW. from the mouth of White river. Pop. in 1830, 461; and in 1840, 936.

Monroe, tp., Hancock co., Me. Pop. in 1820, 732.—Village, Fairfield co., Ct., by post road 54 ms. SE. from Hartford.—Village, Monroe co., Mich., by post road 34 ms. SW. from Detroit.—Village, Sussex co., N. J., 84 ms. N. from Trenton.—Village in Bradford co., Pa., by post road 190 ms. N. from Harrisburg.—Post office, Bucks co., Pa.—Village, Warren co., N. C., 70 ms. SE. from Raleigh.—Village, Walton co., Ga., 66 ms. NNW. from Milledgeville. Lat. 33 46 N., lon. W. C. 7 6 W.—Tp. in the eastern borders of Ashtabula co., Ohio. It is 7 ms. long from N. to S. by 5 broad from E. to W.—The NE. tp. in Muskingum co., Ohio, through which passes the road leading from Zanesville to Coshocton.—Tp., Guernsey co., Ohio, adjoining the N. line of the county.—Tp., Richland co., Ohio.—Village, Highland co., Ohio.—Tp., Licking co., Ohio. Pop. in 1820, 591.—Town in the eastern borders of Butler co., Ohio, 12 ms. NE. from Hamilton.—Western tp. in Pickaway co., Ohio. Pop. in 1820, 653.—Town in Clark co., Ohio, about 10 ms. N. from Fairfield, in Green co.—Tp., Preble co., Ohio.—Tp., Miami co., Ohio, W. of the river Miami. Pop. in 1820, 839.—Village and seat of justice for Overton co., Ten., on a small branch of Obies river, 100 ms. NE. by E. from Nashville. Lat. 36 25 N., lon. W. C. 8 11 W.—Village and seat of justice for Monroe co., Mich., on the right bank of the river Raisin, 40 ms. SW. from Detroit. Lat. 42 2 N., 6 18 W. lon. W. C.

Monroe, or *Southfield*, village, Orange co., N. Y., 19 ms. S. from Newburg. In this township are some very extensive iron works. Pop. in 1820, 2,969.

Monroetown, village, Pittsylvania co., Va., 168 ms. SW. by W. from Richmond.

Monroeville, village, Huron co., Ohio, 120 ms. N. from Columbus.

Monroe Works, post office, Orange co., N. Y.

Mons, ancient, large, and strong city of the kingdom of Belgium, with a considerable manufactur-

of woollen stuffs, and a good trade. It stands partly on a hill and partly on a plain, at the confluence of the Haisne and Trouille, by which the country round it may be overflowed at pleasure. It is 17 ms. NE. of Tournay, 37 W. of Namur, and 143 N. of Paris. Lon. 4 3 E., lat. 50 27 N.

Monsanto, strongly fortified frontier town of Spain, in Estramadura. Lon. 5 50 W., lat. 39 40 N.

Monsaraz, town of Portugal, in Alentejo, seated on the Gaudiana, 25 ms. SW. of Elvas. Lon. 7 32 W., lat. 38 26 N.

Monson, town, Somerset co., Me., 150 ms. NE. from Portland.—Tp., Hamden co., Mass. Pop. in 1810, 1,674; in 1820, 2,126.

Monsterberg, or *Munsterberg*, town of Germany, in Silesia, in a province of the same name, 20 ms. NE. of Glatz, and 27 S. of Breslaw. Lon. 17 16 E., lat. 50 37 N.

Monstier.—See *Moutier*.

Montabour, small fortified town of Germany, in the electorate of Treves, between Coblenz and Limburg. Lon. 7 50 E., lat. 50 30 N.

Montacniac, considerable town of Natolia, on the sea of Marmora. It carries on a great trade, especially in fruits, and is seated on a bay of the same name, 70 ms. SSE. of Constantinople. Lon. 29 10 E., lat. 40 0 N.

Montague Island, one of the New Hebrides, in the S. Pacific ocean, near Sandwich island. Lon. 168 31 E., lat. 17 26 S.

Montaigu, town of Fr., in the dep. of Vendee, and late province of Poitou, 24 ms. W. of Mauléon. Lon. 1 30 W., lat. 47 0 N.

Montague Township, partly in the co. of Grenville and partly in Leeds, U. C., lies to the northward of Wolford, and is washed by the river Raudeau.

Montague, town, Franklin co., Mass., on the left bank of Connecticut river, opposite Greenfield. It is 18 ms. above Northampton. Pop. in 1820, 1,074.—Village, Sussex co., N. J., 93 ms. N. from Trenton.—Village, Essex co., Va.; by post road 72 ms. NE. from Richmond.—Island on the Pacific coast of North America, at the entrance of Prince William's sound. Lon. 60° N., lon. W. C. 77° W.

Montalban, strong town of Spain, in Arragon, with a citadel, seated on the Rio Martin, 44 ms. S. of Sarragossa, and 82 N. by W. of Valencia. Lon. 30' W., lat. 41 9 N.

Montalcino, small town of Tuscany, in the Siennese, on a mountain, 17 ms. SSE. of Sienna, and 45 SE. of Florence. Lon. 11 30 E., lat. 43 7 N.

Montalto, town of Italy, in the marquise of Ancona, on the river Monacio, 10 ms. N. of Ascoli, and 45 S. of Ancona. Lon. 13 30 E., lat. 42 54 N.

Montabras, frontier town of Portugal, in Alentejo, about 31 ms. distant from Lisbon. Lon. 6 24 W., lat. 39 30 N.

Mont a Peine fief, Hertford, co. of L. C., on St. Lawrence, 8 ms. below Quebec.

Montariz, small town of Portugal, in the province of Estramadura. Lon. 8 11 W., lat. 39 30 N.

Montargis, considerable town of Fr., in the dep. of Loiret, and late province of Orleannois,

famous for its excellent mustard and cutlery. It is seated on the river Loire, from which it has a navigable canal to the Seine, near a fine forest ms. S. of Nemours, and 62 S. by E. of Paris.

Montarville, seigniory, Kent co., L. C., between Boucherville and Chambly, 12 ms. E. of Montreal.

Montauban, considerable commercial town of Fr., in the dep. of Lot, lately the episcopal see of the province of Querci. The inhabitants amount to 20,000, and have manufactures of silk stockings and stuffs, serges, shalloons, &c. It is seated on an eminence, on the river Tarn, 20 ms. N. of Toulouse and 30 S. of Cahora.

Montauk Point, east end of Long island Southampton. The light-house is at lon. W 5 6 E., lat. 41 4 N.

Montabazon, town of Fr., in the dep. of Indre and Loire, and late province of Touraine, originally seated at the foot of a hill, on which is an ancient castle, 135 ms. SW. of Paris. Lon. E., lat. 47 1 N.

Montbelliard, a town of France, formerly capital of a principality of the German empire, the same name, between the dep. of the Dordogne and that of the Upper Rhine. It is seated on the foot of a rock, on which is a citadel. It was taken in 1674 by the French, who demolished the fortifications; but it was restored to the prince of Saxe, seated near the Alaine and Daubs, 33 ms. S. of Basle, and 45 NE. of Besancon. Lon. E., lat. 47 31 N.

Mont Blanc, the highest mountain of the Alps, in Savoy, being 15,662 feet above the level of the sea. It is called Mont Blanc from its uncommon white appearance. The summit was deemed inaccessible till 1786, when Dr. Paccard ascended it.

Montblanc, town of Spain, in Catalonia, 15 ms. N. of Tarragona. Lon. 1 5 E., lat. 41 10 N.

Monthrison, town of Fr., in the dep. of Rhodan and Loire, and late province of Forez, seated on the Velize, 40 ms. W. of Vienne, and 250 N. E. of Paris. Lon. 2 27 E., lat. 43 32 N.

Montcallier, town of Italy, in Piedmont, subject to the king of Sardinia, and seated on the river, 5 ms. SE. of Turin. Lon. 7 48 E., lat. 45 7 N.

Montdauphin, town of Fr., in the dep. of the Upper Alps, and late province of Dauphiny, seated on a craggy mountain, almost surrounded by the Durance, 8 ms. NE. of Embrun. Lon. 6 45 E., lat. 44 40 N.

Mont-de-Marson, town of Fr., and capital of the dep. of Landes, and late province of Gascony. It is seated on the Midouse, 30 ms. NE. of Pau. Lon. 30' W., lat. 43 55 N.

Monte-Cassino, mountain of Naples, on the top of which is a celebrated Benedictine abbey. Lon. 13 44 E., lat. 41 39 N.

Montecchio, considerable town of Italy, in the duchy of Reggio, 8 ms. NW. of Reggio. Lon. 15 54 E., lat. 42 8 N.

Monte Christo, town, bay, and cape, on the N. side of St. Domingo. The cape is a high hill in the form of a tent, called by the French Cap la Grange. Lon. 71 50 W., lat. 19 54 N.

Monte Falco, town of Italy, in the duchy of Spoleto, near the river Clitunno, 12 ms. W. of Spoleto.

Monte Falcone, town of Italy, in Friuli, with a

near the river Pouzano, 18 ms. WNW. of
te.
nte Fiascone, town of Italy, in the patrimony
 . Peter, near the Lake Bolsena, 12 miles
 N. of Viterbo.
nte Fossoli, town of Tuscany, in the Pisa-
 3 ms. E. by N. of Leghorn.
ntelinar, town of Fr. in Drome, at the
 ion of the Jabron and Roubion, on the E. side
 Rhone, 100 ms. S from Lyons.
nte Leone, town of Naples, in Calabria Ul-
 e, 12 ms. NNE. of Nicotera.—Town of
 es, in Principato Ulteriore, 9 ms. N. of Ben-
 o.
nte Morano, town of Naples, in Principato
 iore, near the river Calore, 18 ms. S. of Ben-
 o.
ntic-Mor-o-Velho, town of Portugal, in Bei-
 ith a very large castle. It is seated in a very
 country, and is 83 ms. N. of Lisbon. Lon.
 V., lat. 40 5 N.
ntenegio, mountainous district of European
 ey, in Albania.
nterery.—See *St. Carlos de Monterey*.
nte Pelosa, episcopal town of Naples, in
 cata, seated on a mountain, near the river
 nto, 14 ms. E. of Cirenza. Lon. 16 18 E.,
 0 47 N.
nte Pulsiano, episcopal town of Tuscany,
 on a mountain, near the river Chiana, in a
 ry noted for excellent wine, 50 ms. S. by E.
 rence. Lon. 11 49 E., lat. 43 10 N.
ntesa, very strong town of Spain, in Valen-
 it is the seat of an order of knighthood of
 the name, and 5 ms. NW. of Xativa. Lon. 10'
 at. 39' N.
nte Sancto, formerly called Mount Athos, a
 tain of Turkey, in Europe, on the Gulf of
 ssa. It is called Monte Sancto, or the Holy
 t, because there are 22 monasteries thereon,
 hich are 4,000 monks, who never suffer a
 n to come near them. It is 17 ms. S. of
 ichi. Lon. 24 39 E., lat. 40 27 N.
nte Velino, mountain of Italy, supposed to
 e most lofty part of the Appennines, and
 feet above the level of the Mediterranean.
 6 ms. NE. of Rome.
nte Verde, a town of Naples, in Principato
 iore, 10 ms NE. of Conza.
ntevideo, town of South America, near and
 the mouth of Platte river. It is a defective
 seaport, claimed by the Portuguese and by
 ited Provinces of La Plata. The former
 een in possession since 1817. Its supposed
 tion 20,000. Lon. W. C. 20 45 E., lat.
 N.
ntezuma, town, Cayuga county, N. Y., on
 ie canal, 12 miles W. from Auburn. It is
 ishing village.
nt-Ferrand.—See *Clermont*.
nt-Ferrat, duchy of Italy, bounded on the E.
 Milanese and Genoa, on the N. and W.
 edmont, and on the S. by the territory of
 , from which it is separated by the Appen-
 . It contains 200 towns and castles, is very
 and well cultivated, abounding in corn, wine,
 d-silk, and subject to the king of Sardinia.
 is the capital.
ntfort, town of Fr., in the dep. of Seine and

Oise, and late province of the Isle of France, 16
 miles W. of Versailles. Lon. 2 50 E., lat. 48 45
 N.—Town of France, in the dep. of Isle and
 Vilane, and late province of Bretagne. It is seated
 on the river Men, and is 12 miles W. of Rennes.
 Lon. 1 58 W., lat. 48 8 N.—Strong town of
 the kingdom of the Netherlands, in Utrecht, with
 an ancient castle. It is seated on the Yssel, 7 ms.
 S. by E. of Utrecht. Lon. 5° E., lat. 52 4 N.
 —Town of Germany, in the circle of Suabia,
 capital of a county of the same name, subject to
 the house of Austria. It is 16 miles S. of Lindau
 and the Lake of Constance. Lon. 9 54 E., lat.
 47 22 N.

Montgomery, tp., Orange co., N. Y. 12 miles,
 W. from Newberry. At the village there is an
 academy. Pop. in 1820, 5,541.—Tp., Somerset
 co., N. J. Pop. in 1820, 2,405.—Tp., Frank-
 lin co., Pa., on the S. boundary of the county be-
 tween Warren and Antrim.—Township, near
 the eastern border of Richland co., Ohio. Pop.
 in 1820, 704.—Cl. tp., Franklin co., Ohio. Pop.
 in 1820 1,631.—Village, Franklin co., Ohio,
 14 ms. NE from Cincinnati.—Village and seat
 of justice, Montgomery county, Ala., on Alabama
 river, 70 ms. by land from Cahaba. Lat. 32 20 N.
 —Borough of Wales, capital of Montgomery-
 shire. It had a tower and a castle, which were
 demolished in the civil wars. It stands on the side
 of a hill, 24 ms. SW. of Shrewsbury, and 168
 NW. of London. Lon. 3 5 W., lat. 52 26 N.
 —Town and tp., Franklin co., Vt. 40 ms. NE.
 from Burlington.—Tp., Hampden co., Mass.,
 12 ms. NW. from Springfield. Pop. in 1820, 604.

Montgomery, county, New York, bounded by
 Schenectady SE., Schoharie S., Otsego SW.,
 Herkimer W., Hamilton N., and Saratoga E.;
 length and breadth would average about 30 miles
 each, area 900 square miles. This is a very richly
 diversified county. The Mohawk meanders through
 it, dividing it into two unequal sections, leaving
 about one-third part S. from the river. East Can-
 ada creek enters the Mohawk from the N., and,
 for a distance of nearly 15 ms., forms the boundary
 between Montgomery and Herkimer counties. The
 Schoharie river enters at the SE. angle, and, flow-
 ing nearly N., falls into the Mohawk, opposite
 Tripes Hill. The NE. angle of this county is
 watered by the Sacondago branch of the Hudson.
 Except the alluvial plains near the Mohawk, this
 county is generally hilly, but rising in most in-
 stances, particularly S. from the Mohawk, by a not
 very abrupt acclivity; the slopes are arable to the
 summits. The soil partakes of the variety of the
 surface, presenting every transition from the highly
 fertile banks of the Mohawk, Schoharie, and other
 streams, to eminences rocky, and of course sterile.
 Staples—grain, flour, live stock, &c. Chief town,
 Johnstown. Pop. 1820, 37,569. Since 1820, the
 northern part of this county, to the amount of 750
 sq. miles, was erected into the county of Fulton.
 Their respective population in 1840 stood thus:
 Montgomery, 35,818; Fulton, 18,049; and, joint-
 ly, 53,867. Central lat. 43° N., lon. W. C. 2 36 E.

Montgomery, county, Pennsylvania, bounded
 by Philadelphia and Delaware counties SE., Ches-
 ter SW., Berks NW., Lehigh N., and Bucks
 NE.; length 30 miles, with 15, area 450 sq. ms.
 The surface of this county is delightfully variegated

by hill and dale. It is washed by the Schuylkill from its extreme western angle to the boundary of Upper Merion tp., and is drained by Perkiomen and Wissahicon creeks, flowing into the Schuylkill, and by the Pennipack and Tocoony creeks entering Delaware. The W. and Lexington branches of the Neshaminy also rise in Montgomery and Hatfield townships, in this county. The soil is generally productive in grain, fruits, and meadow grasses, and also in garden vegetables. Staples—grain, flour, whiskey, fruit, garden productions, beef, pork, mutton, and various other articles. It is peculiarly remarkable for the production of fine marble.—See *White Marsh*. Chief town, Norristown. Population in 1820, 35,793; and in 1840, 47,241. Central lat. 40 15, lon. W. C. 1 40 E.

Montgomery, tp. and town Montgomery co., Pa., on the NE. boundary, of the co. and on the dividing ground between the sources of the Perkiomen, Wissahicon, and Neshaminy creeks. The village (called Montgomery Square, in this township) is 20 ms. nearly N. from Philadelphia.

Montgomery, county, Maryland, bounded by Potomac river, or by Fairfax and Loudon counties, Va., SW., Frederick co., Md., NW., Patuxent river, or Anne Arundel NE., and Prince George and the District of Columbia SE.; length 28 ms., mean width 18, area 500 sq. miles. Surface hilly and soil various. The county occupies a part of the valley between the first and second Appalachian ridge, and contains some excellent tracts of land, but in general the soil of this county is thin, and rather sterile. Staples—grain, flour, and tobacco. Chief town, Rockville. Population in 1820, 16,400; in 1830, 19,876, but in 1840, 15,446. Central lat. 39 15 N., lon. W. C. 15' W.

Montgomery, county, Virginia, bounded by the Blue Ridge, or Franklin and Patrick SE., Grayson and Wythe SW., Walker's mountain, or Giles co. NW., and Botetourt NE.; length 42 miles, mean width $2\frac{2}{3}$, area 950 sq. ms. It is traversed in its western angle by the Great Kenawha, and drained about two-thirds by that stream and its confluent. The dividing ridge between the Kenawha, James, and Roanoke rivers, traverses this county, Craig's creek and Catawba creek, branches of the former, and Staunton river, a branch of the latter, rise in the NE. of Montgomery. The surface is in part mountainous, and every where hilly and broken. The proportion of good soil but small, when compared to the general area. Chief town, Christiansburg. Pop. in 1820, 8,733. Since 1820, the southern part of this county, between the Iron mountains and Blue Ridge, was erected into a county by the name of Floyd, containing 420 sq. miles. The respective population of the two counties, by the census of 1840, stood thus: Floyd, 4,453, and Montgomery 7,405; jointly, 11,858. Central lat. 37° N., lon. W. C. 3 12 W.

Montgomery, county, North Carolina, bounded by Richmond and Anson S., Cabarras W., Rowan and Randolph N., and Moore E.; length 42 miles, mean width 18, area 756. sq. miles. The Yadkin winds across this county from N. to S., which is drained by that stream and its confluent. Surface rather uneven than hilly. Soil near the streams fertile, but merging into pine barrens, in the intervals. Staples—cotton, grain, flour, and tobacco. Chief town, Tindalsville. Pop. in 1820,

8,693; and in 1840, 10,780. Central lat. 37 N., lon. W. C. 3° W.

Montgomery, county, Georgia, bounded by Ocmulgee river S., by Little Oconee river, or Teocoo, SW., Laurens W. and NW., and Emarion or Great Ohoopie river, NE.; length 40 ms., mean width 24, area 960 sq. miles. The Oconee Oakmulgee form the Alatomaha at the S. extremity of this county. Surface generally level, soil sterile. Chief town, Vernon. Pop. in 1820, 1,869; and in 1840, 9,616. Central lat. 32 20 N., lon. W. C. 5 50 W.

Montgomery, co., Alabama, bounded by Butler S., Wilcox and Dallas W., Alabama river, or Autauga NW. and N., and the Muscogee or Creek lands, NE.; length 50 miles, mean width 30, area 1,500 sq. miles. Surface generally level, and, except near the streams, soil sterile. At the junction of the Coosa and Tallapoosa, and course, the head of Alabama river, is near northern border of this county, which leaves the Coosa at Wetumpka falls, 5 ms. above its mouth. Staple, cotton. Chief town, Montgomery. Pop. in 1820, 6,604. Central lat. 32 10 N., lon. W. C. 9 10 W.

Montgomery, county, Tennessee, bounded by Christian and Todd counties, in Ky., N., by Robertson co., in Tenn., SE., Dickson S., and Sevier SW.; length 40 miles, mean width $17\frac{1}{2}$, area 700 sq. ms. Tennessee river traverses the southern part of this co., and at Clarksville receives from the NE. Red river. The soil is not generally very productive, though in part highly so. Surface uneven rather than hilly. Staples—cotton, grain, flour, &c. Chief town, Clarksville. Population in 1820, 12,219; and in 1840, 16,700. Central lat. 36 30 N., lon. W. C. 10 13 W.

Montgomery, county, Kentucky, bounded by Boone N., and S. by Estil, W. by Clark, NW. by Bourbon, NE. by Bath, and E. by Pike; length 38 ms., mean width 12, area 420 sq. miles. It is drained by the sources of the S. fork of Licking, those of the Red river branch of Kentucky river, and by the creeks of the main fork of Licking. Surface rather uneven than hilly; soil productive. Chief town, Mount Sterling. Pop. in 1820, 9,587; and in 1840, 9,332. N. lat. 38°, and lon. W. C. 30 18 W. intersect in this county.

Montgomery, county, Ohio, bounded by Warren and Butler S., Preble W., Miami N., Chester NE., and Green E.; length 24 ms., width 23, area 480 sq. miles. Surface waving, generally, level, part level. Soil very productive. The main S. fork of Miami river and Mad river all run in this county. Below their junction the main stream turns SSW., and enters the NE. corner of Hamilton county near the village of Franklin. Chief town, Dayton. Pop. in 1820, 15,999; and in 1840, 31,938. Central lat. 39 45 N., lon. W. C. 7 18 W.

Montgomery, co. of Indiana, bounded by Adams S., Parke SW., Fountain W., Tippecanoe N., Boone E., and Hendricks SE.; length 24, mean breadth 21 ms., and area 540 sq. ms. Lat. 38° N. and lon. W. C. 9 50 intersect in this county. It is drained southwesterly by various branches of the Sugar creek. Pop. in 1840, 14,433. The chief town, Crawfordsville, is situated at N. lat. 40 3, lon. W. C. 9 40 W.

Montgomery, county, Illinois, bounded by Bond Madison S., Macaupin W., Sangamon N., Shelby and Fayette E.; length 36, and breadth 25, area 864 sq. ms. Lat. 39 15 and lon. 12 W. of W. C. intersect in this co. Chief town, Springfield. Though rather level, this co. is a fertile land, from which flow towards the S. branches of the Kaskaskias, W., those of Macaupin, and N., those of Sangamon. Pop. in 1840, 4,490.

Montgomery, co., Missouri, bounded by Mississippi river S., Howard co. W., Cuivore river, or Iron N., and St. Charles E.; length 50 miles, and width 35, area 1,850 sq. ms. Surface hilly, general, though with some exceptions. Soil fertile. Pop. in 1820, 3,074; and in 1840, 4,371. Lat. 38 50 N., lon. W. C. 13 55 W.

Montgomery's Ferry, post office, Cumberland county, Penn.

Montgomeryshire, county of Wales, 36 miles long, and 34 broad, bounded on the N. by Merionethshire and Denbighshire, NE. and E. by Shropshire, S. by Radnorshire, SW. by Cardiganshire, and W. by Merionethshire. It contains 500,000 acres, is divided into 9 hundreds and 47 parishes, and has 5 market towns. The number of inhabitants in 1811, was 51,931, and it sends two members to Parliament. Though barren and mountainous in many parts, it has a greater mixture of the vale and plain than several of the Welsh counties. Its riches proceed from its sheep and cattle, the hilly tracts being almost entirely sheep pastures; and the flocks, like those of Spain, are driven from distant parts to feed on them during summer. This county also affords mineral resources, particularly lead; and it abounds in slate and lime, but there is no coal. Its principal rivers are the Severn, Vyrnew, and Tannat. Pop. in 1811, 47,978; in 1811, 51,931; and in 1821, 59,000.

Montgomerysville, village, Gibson co., Indiana.

Monticello, town, Sullivan co., N. Y., 4 miles from Neversink river, and about 40 a little N. W. from Newburg.—Seat of the venerable Thomas Jefferson, Albemarle county, Va., 2 miles from Charlottesville. Lon. W. C. 1 48 W., lat. 38 8 N.—Town, Fairfield district, S. C., 15 miles N. from Columbia.—Village and seat of justice, Jasper co., Ga., 32 miles NW. from Millville. Lat. 33 19 N., lon. W. C. 6 54 W.—Village and seat of justice, Lawrence county, Va., on Pearl river, 90 miles E. from Natchez. Lat. 31 32 N., lon. W. C. 12 55 W.—Town and seat of justice, Wayne co., Ky., 100 ms. S. from Frankfort, and about 4 ms. SE. from Cumberland river. Lat. 36 50 N., lon. W. C. 7 40 W.—Village, Lawrence co., Arkansas.

Montiel, formerly an episcopal town of Spain, near Castile, 18 ms. from Metzara.

Montilla, town of Spain, in the province of Cordova, 51 ms. N. of Granada.

Montivilliers, town of Fr., in the dep. of Lower Normandy, and late province of Normandy, 95 miles N. of Paris. Lon. 20' W., lat. 49 35 N.

Montlouis, town of Fr., in the dep. of the East-Pyrenees, and late province of Rousillon, a strong citadel at the foot of a rock, built by Louis XIV. It is 430 ms. S. of Paris. Lon. 2 30 E., lat. 42 30 N.

Montluet, town of France, in the department of

Ain, and late province of Bresse, seated in a fertile country, on the Seraine, 12 ms. NE. of Lyons, and 205 SE. of Paris. Lon. 5 8 E., lat. 45 49 N.

Montluzon, or *Montlucon*, town of Fr., in the dep. of Allier, and late province of Bourbonnois, seated on the river Cher. 150 ms. S. of Paris. Lon. 2 45 E., lat. 46 22 N.

Montmedi, small but strong town of France, in the dep. of Meuse, and late duchy of Bar, seated on the river Cher, which divides it into the upper and lower town. It is 170 ms. NE. of Paris. Lon. 5 23 E., lat. 49 32 N.

Montmelian, formerly strong town of Savoy, but the French, in 1705, demolished the fortifications. It is 8 ms. SE. of Chamberry, and 27 NE. of Grenoble. Lon. 6 15 E., lat. 45 30 N.

Montmorenci, town of France, remarkable for the tombs of the ancient dukes of Montmorenci. It is seated on a hill, near a large valley, famous for its cherries, and is 7 ms. from St. Dennis, and 10 from Paris.

Montmorenci, Falls of. This fine cataract is in a small river of the same name, which falls into the left side of St. Lawrence, 9 ms. below the city of Quebec. The perpendicular pitch is 246 feet, and being in full view from the St. Lawrence, affords one of the most magnificent scenes in N. America.

Montmorillin, town of Fr., in the dep. of Vienne, and late province of Poitou. It is seated on the river Gartempe, over which it has a handsome bridge 24 ms. SE. of Poitiers.

Montpelier, city of the department of Herault, and late province of Languedoc. It is one of the largest and most beautiful cities in France, and has a citadel, a bishop's see, a university, and a botanic garden, the first established in Europe. The number of inhabitants is computed 30,000; is chiefly famous for its drugs and cordials, perfumed waters, hair powder, and verdigris. This city contains 200 apothecaries, the air is extremely healthy, and many invalids resort hither from all parts to recover their health. Montpelier is seated on a hill, 5 ms. from the Mediterranean, near the Lez, a small navigable river, and on the rivulet Merdanson, which is conveyed into different parts of the city by subterraneous canals. It is 27 ms. SW. of Nismes, 47 NE. of Narbonne, and 380 S. by W. of Paris. Lon. 3 58 E., lat. 43 37 N.—Village and seat of government for the State, in Washington co., Vt., on the NE. side of Onion river, 34 ms SE. of Burlington, on Lake Champlain; and 12 ms. N. of Williamson, in Orange co. Pop. 2,500. Lat. 44 16, lon. W. C. 4 28 E.—Seat of the Hon. James Madison, late President of the United States, in Orange co., Va., 20 ms. NE. from Monticello.—Village, Hanover co., Va., 24 ms. from Richmond.—Village, Richmond co., N. C., 105 ms. SW. from Raleigh.

Montpensier, town of France, in the department of Puy de Dome, and late province of Auvergne, seated on a hill, 210 ms. SE. of Paris. Lon. 3 14 E., lat. 46 4 N.

Mont Pulciano.—See *Monte Pulciano*.

Montreal, town of Sicily, in Val di Mazara, on a rivulet, 5 ms. W. of Palermo, and 50 NE. of Mazara.—Town of Germany, in the territory of

Trèves, seated on the Elz, 20 ms. W. by N. of Coblenz. — Town of Spain, in the province of Arragon, on the Xiloca, 25 ms. NNW. of Teruel, and 40 S. by E. of Calatajud. Lon. 1 2 W., lat. 40 53 N. — Island in St. Lawrence river, at the confluence of that stream and the Ottawa. It forms a co. of the same name, 32 ms. long, but very irregular in width. The soil is very productive, and the surface pleasantly diversified by hill and dale. — City, L. C., on the eastern side of the island of the same name. Montreal is a place of considerable extent and great commercial importance. The houses are generally built in a modern style, in brick or stone, roofed with sheet tin, iron, or copper, and many finished with taste and elegance. The public buildings are numerous. The Seminary of St. Sulpice dates its origin to the era of the French government over Canada, and is a flourishing institution. The Hotel Dieu, a charitable institution, founded by the French in 1644 for the purpose of relieving indigent sick, is still supported and conducted by a superior and 36 nuns. The convent of Notre Dame, also a French establishment, conducted by a superior and 60 sisters, for the instruction of females in all the useful and ornamental parts of their education. The convent of the Grey Sisters is a general hospital for the reception of invalids and aged poor.

This city is the grand depot for the trade of Canada, and receives the inland freights from the St. Lawrence and Ottawa rivers. Its harbor is safe, with from 18 to 26 feet of water. The rapid of St. Mary, 2 ms. below, is a very serious impediment to the entrance of vessels, demanding a strong wind to stem it. Rapids again occur about 4 ms. above the harbor, which entirely prevents any water communication between the city and La Chine. See *La Chine*.

Montreal is 120 ms. above Quebec, and 220 N. by W. from Boston. Pop. upwards of 20,000. Lon. W. C. 3 25 E., lat. 45 31 N. — River of the NW. territory of the U. S., which falls into the SW. part of Lake Superior, and about 60 ms. W. from the Ontanagon. It interlocks sources with the Chippewa and Wisconsin.

Montreal River, a southern confluent of Lake Superior, rises interlocking sources with those of the Menominees and Wolf rivers, branches of Fox river and Green bay, and with those of Chippewa and St. Croix branches of Mississippi river. The country from which those various rivers derive their sources is flat, and chequered with lakes. Short portages intervene between the navigable channels. The general course of Montreal river is to the NW.; comparative length about 100 ms; mouth into Lake Superior, 20 ms. E. of Chegoimegon bay.

Montreal Isle, in the E. end of Lake Superior, is small, and situated between the mouths of the rivers Montreal and Charron, and near the shore.

Montreal, River de, U. C., empties itself into E. end of Lake Superior, a little to the northward of the copper mines, and S. of the river Charron.

Montreuil, strong town of France, in the department of Pas de Calais, seated on a hill, near the mouth of the Canche, 36 ms. S. of Calais, and 42 WNW. of Arras.

Montreuil Bellay, town of France, in the dept. of Mayenne and Loire, seated on the Touet, ms. SSW. of Saumur.

Montrichard, town of Fr., in the dep. of Lo and Cher, with a castle, seated near the Cher, ms. SE. of Amboise.

Montrose, borough and seaport of Scotland, Angusshire, near the estuary of South Esk. The buildings are neat; and the most remarkable the town-house, the church, an elegant episcopal chapel, an hospital for lunatics, and its parish church is the largest in Scotland, except the parish church of Glasgow. A great number of trading vessels belong to this town, and a considerable trade is carried on to the Baltic, Hamburg, Riga, Archangel, &c. The salmon fisheries on the S. Esk, form a valuable branch of commerce. The inhabitants of Montrose are said to be about 10,000, and it is 48 ms. NE. of Edinburgh. Lon. 2 32 W., lat. 56 40 N. — Town and seat of justice, Susquehanna co., Pa., on the high ground from which flow the Wyallussing and Tunkhannoc into the Susquehanna SW., and also numerous creeks to the northward into the same stream near the S. line of N. Y. This is neat village, an elevated site, commanding a fine view of the adjacent country. Lat. 41 48 N., lon. W. C. 1 1 E. — Village, Cumberland co., N. C.

Montrouis, town of St. Domingo, at the head of the Bight of Leogane, 5 leagues E. from Mark.

Mon, St. Michael, strong town of France, the dep. of the Channel, and late province Normandy, built on a rock in the sea, which is cenced at low water. It is 10 ms SW. of Cheranches, and 180 W. of Paris. Lon. 1 36 W. lat. 48 37 N.

Montsujon, town of Fr., in the department of Upper Marne, and late province of Champaigne, 145 ms. SE. of Paris. Lon. 5 16 E., lat. 46 36 N.

Montserado, cape of Africa, on the Atlantic Ocean, and on the Grain coast, N. lat. 6 30, lon. from London 10 20. A river flowing, as supposed, from the Kong mountains, enters the Atlantic ocean immediately N. from Montserado. This river, usually written Mesurado, is projected on Arrowsmith's map of Africa, flowing from N. to SW. 350 ms. Another small stream, about 100 ms. in length, the St. Paul's, is laid down on the same map, and nearly parallel to the Mesurado, about 5 ms. distance. The St. Paul's enters the same bay to the N. from the efflux of the Mesurado.

According to the annual report of the American Colonization Society, made to the annual meeting at Washington, Monday, January 9th, 1826, a slip of ground between Mesurado and St. Paul's rivers, has been purchased by the society, and is represented by the society to be elevated 20 ft. above the river. [Which river? most probably the Mesurado were meant.]

Monsierrat, mountain of Spain, in Catalonia, on which is a famous monastery and chapel, dedicated to the Virgin, resorted to by numbers of pilgrims. It is inhabited by monks of several orders, who entertain all that come out of devotion or curiosity for 3 days gratis. This mountain is said to be 10 ms. in circumference and 5 hi;

the country around it is seen 150 ms. It is 25 NW. of Barcelona.

Monsterrat, one of the leeward Caribbee islands, in the W. Indies, discovered in 1493 by Columbus and so named by him from its resemblance to the mountain mentioned in the preceding article. It is about 9 ms. in length and breadth, and supposed to contain 50,000 acres, and the hills are covered with cedar and other trees. It carries on an extensive trade to England and Ireland in rum, &c.; belongs to the English, and is 30 ms. SW. of Annapolis. Lon. 62 34 W., lat. 16 54 N.

Montville, town, Lincoln co., Me., 30 ms. NE. of Wiscasset.—Town, New London co., Ct., situated about 9 ms. NW. of New London.

Monza, town of Italy, in the Milanese, seated on the Lambro, 8 ms. NE. of Milan. Lon. 9 10 E. lat. 45 33 N.

Monze, Cape, N. lat. 24 55, E. lat. 65 46, is considered as the separating point between Indostan and Makran. From Cape Monze to the Gulf of Oman the shores of the Indian ocean are called the coast of Sind, and W. of the cape, to the mountains of Kerman, Makran. The bay of Coromandel lies between Cape Monze and the delta of the Ganges, has a depth sufficient for vessels of from 100 to 400 tons; the tide rises 12 feet.

Monzigen, town of Germany, in the circle of the Rhine, 12 ms. W. of Creautznach, and 42 E. of Treves. Longitude 7 14 East, latitude 50 N.

Moers, town, Clinton co., N. Y. Pop. 1820.

Mookden.—See *Moukden*.

Mooltan, city of Indostan, now, and since 1818, subject to the Seiks, is situated on the eastern or right side of the Chenaub river, N. lat. 30 15, lon. 74 0 E., about 250 ms. below Lahore, and 400 N. by W. from Delhi. According to Burnes, the city is upwards of three ms. in circumference, and is surrounded by a dilapidated wall. Pop. about 100,000, composed of one-third Hindoos, and the rest Mahometans. The Seiks only maintain a small garrison of 500 men. The inhabitants are chiefly weavers and dyers of cloth. The silk manufacture of Mooltan is called "*kais*," and may be of all colors, and are extensively exported to Makran and India.

The inundations of the Chenaub and its canals often render the vicinity of Mooltan a marsh—well of one year coming down before that of the previous season having dried up. Old canals, which, if repaired, would permit a direct navigation of about 80 ms. into the Indus, which is of great importance as concerns the commerce with countries to the northward of Mooltan, would save a distance of upwards of 300 ms.

The climate of Mooltan differs from that of the countries lower down the Indus; showers of rain are common at all seasons, but from the loose nature of the soil, the dust is intolerable. The date tree abounds in the vicinity of the city, which is otherwise highly cultivated. With the exception, however, of a strip of about two ms. wide along the banks of the Chenaub, a sterile desert of sand hills extends between the Chenaub and Indus. The Persian wheel, for the purposes of irrigation, is much in use, and near the Indus wells are common, but on the Chenaub, only found near canals which branch

from it.—*Burnes*. Lat 29 51 N., lon. 70 40 E. London.

Moon, *Mountains of the*, mountains of Africa, extending between Abyssinia and Monomotapa. They are higher than those of Atlas.

Moon, tp., Alleghany co., Pa., on the county line, and left bank of Ohio, 10 ms. below Pittsburgh.

Moore, tp., Northampton co., Pa., on the head branches of Hockendogge and Monocacy creeks, commencing 8 ms. NW. from Easton, and 2 ms. NW. from Nazareth. Pop. 1820, 1,645.—Co., N. C. bounded by Cumberland SE., Richmond SW., Montgomery W., Randolph NW., and Chatham N. Length 38 ms., width 28, and area about 530 sq. ms. Its form triangular, extending from the Haw river about half way to the Yadkin. Surface hilly, and soil generally thin and sterile, though much good land skirts the streams. Staples, cotton, grain, flour, &c. Chief town, Alfordstown. Pop. 1820, 7,128; and in 1840, 7,988. Central lat. 36 20 N., lon W. C. 2 22 West.

Mooresborough, village, Rutherford co., N. C., by post road 236 ms. Southwest by West. from Raleigh.

Mooresburg, village, Columbia co., Pa.

Moore's Salt Works, post office, Jefferson co., Ohio.

Moorestown, village, Burlington co., N. Jersey, about midway between Philadelphia and Mount Holly, 9 ms. from each.

Mooresville, village, Limestone co., Ala., about 130 ms. N. from Tuscaloosa.

Moorsfield.—See *Moorestown*.

Moorfield, village, Nicholas co., Ky., about 45 ms. NE. by E. from Frankfort.—Town, Harrison co., Ohio, 12 ms. SW. from Cadiz.—Tp., Clark co., Ohio. Pop. 1820, 783.

Moorfields, town and seat of justice, Hardy co., Va., on the right bank of the S. branch of Potomac, 53 ms. SW. by W. from Winchester. Lat. 39°, lon. W. C. 1 56 W.

Moorling's Cross Roads, post office, Pitt co., N. C., by post road 107 ms. SE. by E. from Raleigh.

Moorestown.—See *Moorestown*.

Moorsbury, village of Hawkins co., Tenn., 70 ms. NE. from Knoxville.

Moorshedabad, city of Hindoostan proper, the capital of Bengal before the establishment of the English power. It is seated on the western arm of the Ganges, 120 ms. N. of Calcutta. Lon. 83 28 E., lat. 24 15 N.

Moor's Prairie, post office, Jefferson co., Ill., southwards from Vandalia.

Moorszook.—See *Murzook*.

Moosehead Lake, Somerset co., Me., the main source of Kennebec river, 25 ms. long, and from 3 to 15 wide.

Moosehillock mountain, Grafton co., N. H., 10 ms. E. from Haverhill, and very near the 44th of N. lat. By admeasurement made by Captain Partridge it is 4,636 feet above the ocean level.

Mootapillee, town in the peninsula of Hindoostan, in the Guntoor Circar, at the mouth of the Gondegama. Lon. 80 10 E., lat. 15 45 N.

Moquehua, town and small province of Peru, at the foot of the Andes. Lon. W. C. 6° E., lat. 17 13 S.

Mora, town of Spain, in New Castile, 18 ms. SE. of Toledo. Lon. 3 4 W., lat. 39 36 N.

Morant, Point, the most easterly promontory of Jamaica. Lon. 75 56 W., lat. 17 56 N.

Morat, commercial town of Switzerland, capital of a bailiwick of the same name, belonging to the cantons of Bern and Friburg, 10 ms. W. of Bern, and 10 ms. NE. of Friburg. Lon. 6 53 E., lat. 46 52 N.—Lake of Switzerland, in a bailiwick of the same name. It is 6 ms. long and 2 broad, lying parallel with the lake of Neufchatel, into which it empties itself by the river Broye.

Morataletz, town of Spain, in New Castile, 22 ms. E. of Ciudad Real. Lon. 3 4 W., lat. 40 32 North.

Moratalia, town of Spain, in Murcia, 31 ms. SSW. of Chinchilla. Lon. 1 50 E., lat. 38 31 North.

Morava, or *Moraw*, river of Germany, which has its source on the confines of Bohemia and Silesia. It crosses Moravia, where it waters Olmutz and Hradisch, and, receiving the Teya from the confines of Lower Hungary and Upper Austria, separates those two countries as far as the Danube, into which it falls.

Morave, river of Turkey in Europe, which rises in Bulgaria, and, running through Servia, by Nisaa, falls into the Danube at Semendriah.

Moravia, marquisate annexed to Bohemia, by which it is bounded on the W., by that kingdom and Silesia on the N., by Silesia and Hungary on the E., and by Austria on the W. It takes its name from the river Morava, which runs through it; and hence the sect of Christians called Moravians take their name, their doctrines having been first taught here. Olmutz was the capital, but now Brinn claims that honor.

Moravia is a province of the Austrian empire, including Moravia proper and Austrian Silesia, which has been annexed to it. Moravia proper contains 8,860 sq. ms., and 1,334,000 inhabitants, and Austrian Silesia 1,840 sq. ms., and 347,000 inhabitants. The six circles of Brun, Olmutz, Hradisch, Prerau, Znaym, and Iglau, form Moravia proper, while Austrian Silesia is divided into the circles of Techen and Troppau. The following is the population of the principal towns:

Brun	-	-	-	26,000
Olmutz	-	-	-	11,000
Iglau	-	-	-	11,000
Troppau	-	-	-	10,000
Sternberg	-	-	-	8,000
Nicolsberg	-	-	-	7,600
Techen	-	-	-	5,400
Znaym	-	-	-	5,200
Creinsier	-	-	-	3,200
Fulneck	-	-	-	3,100
Prerau	-	-	-	2,900
Hradisch	-	-	-	1,700

Moravia is intersected by several ranges of mountains, between which are many fertile valleys; and in the N. and S. there are well cultivated plains of considerable extent. The principal river is the March, or Morava, which is navigable, and, after receiving the Theya, runs S., and falls into the Danube above Presburg. This province is not remarkable for its vegetable productions. Corn and flax are raised, but not in great quantities. Hogs and geese are exported in great numbers. Gold

and silver mines were formerly wrought to considerable extent, but at present the most productive minerals of Moravia are those of iron and lead. Coal exists in large bodies, but has not been excavated in proportion.

Moravia presents manufacturing establishments on an extensive scale; woolen, cotton, and silk goods, are made to great amount. About 40,000 pieces of woolen goods are annually produced in the neighborhood of Iglau. The number of persons all Moravia, employed in the woolen manufacture is 16,000 weavers and 24,000 spinners. Textile is made at Rothwasser, and dyeing is extensively carried on at Brun. The cotton works at Iglau give employment to 1,000 individuals. Paper, ther, paper, potash, and glass, are also manufactured in this province. Imports are wool, flax, cotton, oil, and grain.

Moravian Village, U. C., on the river Thames is in the 4th tp. from its mouth; it is a recently built village, of one street, with indifferent work-huts, and a small chapel, inhabited by Indians converted to the Moravian faith, and their parents. After some hesitation, I have concluded to name the following, which was communicated by a judicious correspondent.

"I crossed the Thames at the Moravian town, 75 ms. from Detroit, and spent the night there with two Moravian missionaries from Bethlehem and Nazareth. I think they are governed by very different motives from those which influence mercenary preachers. They tell me they have more hopes of christianizing than of civilizing the Indians. One of these men teaches the males and the other the females. There are about 160 of both sexes and all ages at this place. They express no desire to exchange the native habits of savages for those of civilized life, nor do they inspire a hope, in any place where I travel, that the labor of their civilization and reformation will avail anything but to accelerate their destruction." At Detroit, 22, 1822.

Morbach, or *Murbach*, town of France, in the department of Lower Rhine, 42 ms. SE. of Strasbourg. Lon. 8 25 E., lat. 48° N.

Morbegno, town of the country of the Grisons, in the Valteline, where the governor and the gentry reside. It is the handsomest and most commercial town in the Valteline, and seated on the Adda, 12 ms. SE. of Chiavenna, and 20 NE. of Lecco. Lon. 9 31 E., lat. 46 10 N.

Morbihan, dep. of Fr., including part of the province of Bretagne. Vannes is the capital of this dep., which takes its name from a small bay between that town and the island of Belleisle. Its entrance is narrow, but it expands within, and contains about 30 little islands.

Morcone, town of Naples, in the Molise, 16 ms. SSE. of Molise. Lon. 14 54 E., lat. 41 24 N.

Morea, ancient Peloponnesus, a large peninsula of southern Europe. In ancient times this country was subdivided into Laconia SE., Messenia SW., Elis W., Achaia NW., Sicyonia and Corinthia NE., Argolis E., and Arcadia in the centre. No part of Europe presents a more richly variegated aspect. One scene of river or mountain grandeur succeeds another, under a serene and dignified sky. Though mountainous, its valleys are generally composed of a most productive soil.

this beautiful country has been for a long period ruled by the despotism of the Turkish Government.

Morea, or **Morea**, is, from the Promontory of Malea, the southeastern extremity of Laconia to Rhium, in the NW. part of Achaia, about 400 ms. in length. Between the Chelonites (now the Tornese) and Schyllaeum (now Skilleo) the width is 120 ms. The whole peninsula is so very indented with deep bays as not to average, it is probable, above a mean width of 50 ms.; area about 7,669 sq. ms., including the small surrounding islands. The modern population, as enumerated by Poqueville, amounts to 400,000 Greeks, 20,000 Turks, Jews, and Albanians. Chief towns, Patras, Corinth, Napoli-di-Romania, Corinthe, and Trippolizza. The Morea lies between lat. 36° 2 and 38 18 N.

The names of the Morea did not, as is generally supposed, come from the Italian name of the mulberry tree, but from the Slavonic, and signifies a country near or bordered by the sea.—*Talmeyer*.

Moravia, town, Saratoga co., N. Y., on Hudson river, in the great bend opposite Glen's falls, 15 miles NNE. from Ballston Spa. Pop. in 1840, 1,549.

Moravia, village, Tioga co., N. Y., by post road 239 ms. SW. by W. from Albany.—NE. of Montgomery co., Pa., between Berks co. and Schuylkill creek, 13 ms. NNE. from Philadelphia. Pop. in 1820, 1,890.—NE. tp., Philadelphia co., Pa., 13 ms. NNE. from Philadelphia. SE. tp., Lycoming co., Pa. Pop. in 1820, 6.

Moravia, town of Spain, in Valencia, among the mountains, 80 ms. N. of Valencia.

Moravia, harbor of Eng., a little N. of Whitehaven, in Cumberland, in and about which many remains of antiquity have been dug up, such as urns and stones, with inscriptions on them, and several caverns have been found, called Piet's holes.

Moravia, village, Delaware co., N. Y., by post road 74 ms. SW. from Albany.

Moravia, ancient town of Fr., in the department Seine and Marne, with a castle, seated on the bank, 35 ms. SE. of Paris. Lon. 2 52 E., lat. 48 56 N.

Moravia, village, Washington county, Vt., on the W. river, 7 ms. W. from Montpelier.

Moravia, town of Piedmont, situated on a small stream, which runs into the Po, 16 ms. S. of Turin. Lon. 7 44 E., lat. 44 48 N.

Morgan, co. of Va., bounded by Berkeley SE., Hampshire SW., and on all other sides by the Potomac river, or Md. Length 30, mean width 15, area 450 sq. ms. The extent of this county was by mistake included in Hampshire co.—See Hampshire co., Va. Surface very broken, part mountainous, and all hilly. The only good soil is in the streams. Staples, grain and flour. Chief town, Frankfort. Pop. in 1840, 4,253.

Morgan, co. of Ga., bounded by Putnam SE., Wilkes SW., Walton NW., and the Oconee river, and Clark and Greene, NE. Length 22, mean width 20 ms.; area 440 sq. ms. Its southern limit on the Oconee river is about 30 ms. above Milledgeville. Chief town, Madison. Pop. in 1820, 13,520; in 1840, 9,121.

Morgan, co. of Ten., bounded NW. by Fendress, Campbell NE., Anderson E., Roane SE., Bledsoe S., and White W. Length 45, mean breadth 22 ms., and area 990 sq. ms. N. lat. 35 56 to 36 25, lon. W. C. 7 14 to 8 0 W. It occupies a part of the table land between the valleys of Cumberland and Tennessee rivers. The northern section slopes to the northward, and in that direction discharges the higher sources of the South fork of Cumberland river. The opposite inclination falls to the SE., and is drained by the various branches of Emery's river, a tributary of Tennessee river. The surface of Morgan co., Ten., is elevated and broken. Chief town, Montgomery. Pop. in 1830, 2,582; and in 1840, 2,660.

Morgan, co. of Ohio, bounded N. by Muskingum and Guernsey, E. by Monroe, and S. by Washington and Athens. Length 32, breadth 18 ms.; area 500 sq. ms. Surface very broken and hilly in general, though much of the soil excellent. Staples, grain and flour. Chief town, McConnelsville. Pop. in 1820, 5,297; and in 1840, 20,852.

Morgan, co. of Alabama, bounded by Marshal E., Blount and Walker S., Lawrence W., and Tennessee river N. Length 32, mean breadth 26 ms., and area 832 sq. ms. N. lat. 34 26, and lon. 10 0 W. of W. C. intersect near the centre. Chief town, Somerville. Pop. in 1840, 9841.

Morgan, tp., Greene co., Pa., between the main stream of Ten Mile creek, Ruff's creek, and the boundary between Greene and Washington cos., 8 ms. NE. from Waynesborough. Pop. in 1820, 1,622.—Town, Morgan co., Ohio, including McConnelsville, the county seat.—SW. tp., Butler co., Ohio. Pop. in 1820, 1,546.—Tp., Knox co., Ohio. Pop. in 1820, 1,087.—Tp., Gallia co., Ohio.—Village, Ashtabula co., Ohio., by post road 262 ms. NE. from Columbus.

Morganfield, town and seat of justice for Union co., Ky., 12 ms. SE. from the mouth of Wabash, and 15 SW. from Henderson, on Ohio. Lat. 37 41 N., lon. W. C. 10 48 W.

Morgan's Settlement, post office, Wayne co., Ohio, 93 ms. NE. from Columbus.

Morgan's Store, Montgomery co., N. C., by post road 113 ms. SW. from Raleigh.

Morgansville, village, Nottaway co. Va., 18 ms. SW. by W. from Petersburg.

Morgantown, village, Berks co., Pa., 7 ms. from Reading.—Village and seat of justice for Monongalia co., Va., on the right bank of Monongahela river, 20 ms. SSW. from Uniontown, and 30 by land above Brownsville, Pa. This village is seated on a high bottom of Monongahela river, and contains about 100 dwelling-houses. Lat. 39 33 N., lon. W. C. 3 50 W.—Village and seat of justice for Burke co., N. C., on the right bank of Catawba river, 30 ms. NW. from Lincolnton, Lat. 35 40 N., lon. W. C. 4 42 W.—Village, Blount co., Tenn., on Tennessee river, 30 ms. SW. from Knoxville.—Village, Butler co., Ky., on the left bank of Greene river, 30 ms. NNE. from Russelville.—Village, Clinton co., Ohio.

Morgarten, mountain of Switzerland, between the cantons of Schwyz and Zug.

Morges, commercial town of Switzerland, in the canton of Vaud, and capital of a bailiwick, seated in a beautiful bay of the Lake of Geneva. By its canal, merchandise is transported from Geneva to

other parts. This canal, by the channels of the Morges and Orbe rivers, unites the Lakes of Geneva and Neuf-Chatel, and opens a commercial route through Switzerland from the basin of the Rhone to that of the Rhine. It is 5 ms. WSW. of Lausanne. Lon. 6 42 E., lat. 46 27 N.

Morhange, town of Fr., in the dep. of Moselle, and late province of Lorraine, 200 ms. E. of Paris. Lon. 6 42 E., lat. 48 51 N.

Moriah, village, Essex co., N. Y., on the head of Scroon river, 60 ms. SSW. from Plattsburg, and 103 N. from Albany.

Moriches, village, Brookhaven tp., Suffolk co., N. Y., on the S. side of Long island, 10 ms. W. from West Hampton, and 72 E. from the city of New York.

Morrison's Tan Yard, post office, Mecklenburg co., N. C., by post road 170 ms. SW. from Raleigh.

Morris's Cove, post office, Bedford co., N. C.

Morris's Store, and post office, Richmond co., North Carolina, by post road 114 ms. SW. from Raleigh.

Morlachia, mountainous country in Hungarian Dalmatia, the inhabitants of which are called Morlacks, or Morlacchi. They inhabit the pleasant valleys of Koter, along the rivers Kerha, Cetina, Narenta, and among the inland mountains of Dalmatia. They are said by some to be of Wallachian extraction, but others think their origin involved in the darkness of barbarous ages. The Morlacchi are so different from the inhabitants of the sea coasts in dialect, dress, disposition, and customs, that they seem clearly to be of a different origin.

Morlaix, considerable seaport of Fr., in the dep. of Finisterre, and late province of Bretagne, with a castle, and a tide harbor. The church of Notre-Dame is a singular structure, and the hospital very handsome. The inhabitants carry on a considerable trade in linen, hemp, and tobacco. It is seated on a river of the same name, 30 ms. NE. of Brest. Lon. 3 46 W., lat. 48 33 N.

Morocco, empire of Africa.—See *Africa*, pp. 17 and 18.

Morocco, the city and capital of the kingdom of Morocco, seated in a beautiful valley, or rather plain between the Atlas mountains and the Atlantic ocean, distant about 100 ms. from the latter. Morocco is 90 ms. E. of Mogador, and 400 S. of Gibraltar. Lon. 6 45 W., lat. 31 12 N.

Moron, town of Spain, in Andalusia, seated in a pleasant, fertile plain. In its neighborhood is a mine of precious stones. It is 30 ms. SE. of Seville. Lon. 5 10 W., lat. 37 10 N.

Morotoi, one of the Sandwich isles, 7 ms. WNW. of Mowee. Yams are its principal produce, but it has little wood. The coast on the S. and W. sides forms several bays, which are tolerably sheltered from the trade winds. Lon. 117 14 W., lat. 21 10 N.

Morpeth, borough of Eng., in Northumberland. It is an ill built, straggling place, seated on the N. bank of the Wentsbeck, and on the opposite side is the church and a castle in ruins. It sends two members to Parliament, has a free school founded by Edward VI., and is 15 ms. N. of Newcastle, and 287 N. by W. of London. Lon. 1 28 W., lat. 55 15 N.

Morriches, village, Brookhaven, Suffolk co., N.

Y., on the S. side of Long Island, 72 ms. E. N. Y.—See *Moriches*.

Morris, co., N. J., bounded by Essex Somerset S., Hunterdon SW., Sussex and ren NW., and Passaic N. Length 26, width 19 ms., area about 500 sq. ms. The face of this co. is very pleasantly variegated hill and dale. It is drained by Rockaway other confluent of Passaic river, and also by streams flowing S. into Raritan river. The part is mountainous, but the features of nature come less rugged advancing to the eastward. Pompton and Rockaway rivers unite and for Passaic, on the eastern border of this co., above the celebrated falls of Passaic, at the of Patterson. Soil productive in fruits, grain pasturage. Chief town, Morristown. Pop. 21,368; and in 1840, 25,844. Central 1 53 N., lon. W. C. 2 28 E.

Morris, tp., Huntingdon co., Pa., on the side of Frankstown branch, 12 ms. W. from Huntingdon.—Tp., Greene co., Pa., on Bate Brown's forks of Ten Mile creek, between the boundary of Washington co. and Morgan Greene tps., in Wayne co., 6 ms. NW. Waynesburg.—Tp., Washington co., Pa., 19 ms. N. from the preceding. Pop. 1820, 1,700.

Morris Flats, Madison co., N. Y., between Madison and Cazenova.

Morrison, the northwesternmost tp. of Jackson co., Ohio.

Morristown, town, Orleans co., Vt., 20 ms. from Montpelier.—Town, St. Lawrence New York, nearly opposite to Brockville in Upper Canada.—Village and seat of justice, Morris county, N. J., 19 ms. NW. from Newark. Beside the common co. buildings, it contains an academy and two churches. Pop. 3,524. Lat. 40 47, lon. W. C. 2 30 E.—Pleasant village, Belmont co., Ohio, on the road leading from Wheeling, in Va., to Zanesville, 10 ms. W. from St. Clairsville, and 120 miles from Columbus.

Morrisville, village, Madison co., N. Y., between Madison and Cazenova.—Town, Lancaster co., Pa., opposite Trenton.—Village, Chester co., Pa.—Village, Fauquier co., Va.

Morsona, town of Naples, in the Molise, 100 ms. NE. of Molise.

Mortagne, town of France, in the department of Orne, famous for its serges and tanneries. It is 19 ms. ESE. of Seez, and 70 WSW. of Paris.—Town of France, in the department of Nord, seated at the conflux of the Scarpe and Scheldt, 8 ms. SE. of Tournay.—Town of France, in the department of Lower Charente, seated on the Gironde, 24 ms. SSW. of Saintes.—Town of France, in the department of Vendee, 30 ms. N. of Fontenay le Comte.

Mortain, town of France, in the department of Manche, on the rivulet Lances, almost surrounded by craggy rocks, 20 ms. E. of Avranches.

Mortara, town of Italy, in the Milanese, in the district of Lumello, 22 ms. SW. of Milan.

Mortay, island, the most northern of the Mascarenes, subject to the Sultan of Ternate. It is 600 ms. in circumference, and thinly inhabited with full of sago trees, which are cut by the people of Gilolo. Lon. 128° E., lat. 3° N.

Mich, village of Scotland, in Banffshire, 6 S. of Keith.

on, village, Anson co., N. C., by post 12 ms. SW. from Raleigh.

ledo, town of Spain, in Valencia, on the the ancient Saguntum, with the ruins of a amphitheatre, &c. It is seated on a river the name, 15 ms. N. of Valencia.

town of Arabia, in Yemen, 25 ms. N. by ocha.

mbique, strait or channel of the Indian between the E. coast of Africa and the is-Madagascar. It is narrowest in the mid- it is 240 ms. over.—City of Africa, Mozambique channel, S. lat. 15 10, lon. London. Cape St. Andrew, of Mada- a little S. of E. 350 miles from Mozam- See *Africa*, p. 28.

ch, town of Germany, in the palatinate of with an elegant castle, seated on the 25 ms. ENE. of Heidleberg. Lon. 9 21 49 28 N.

rg, town of Germany, in Carinthia, 6 ms Clagenfurt.—Town of Bavaria, seated onflux of the Amber with the Iser, 9 ms. andshut.

vy.—See *Russia*.

u, formerly a duchy, but now a govern- Russia, bounded on the N. by the govern- Tver, E. by that of Great Volodimir, S. overnments of Kalugo and Resan, and W. of Tver and Smolensko. It is a fruitful and produces abundance of excellent as-

w, city of Russia, capital of the govern- Moscow, and formerly of the whole em- previous to the entry of the French, it was est city in Europe, the circumference with- mpart that enclosed the suburbs, being 20 its population did not correspond with its It contained within the ramparts 300,000 and was the most populous city in the em- withstanding the residence of the court Petersburg.

Several divisions of Moscow are the same ous to the conflagration in 1812. They

The Kremlin, which was in the central est part of the city, surrounded by high stone and brick, 2 ms. in circumference. ision contained the ancient palace of Czars, eter the Great was born, also the cathed- n seven towers, besides other churches, the ial palace, and the arsenal. 2. The Khit- which was much larger than the Kremlin; ned the university, the printing house, and her public buildings, with all the trades- hops. The houses were mostly stuccoed e washed, and was the only street in Mos- which the houses stood close to each other. Bielgorod, or White Town, which ran e two preceding divisions, took its name from wall, by which it was formerly surround- Semlainogorod, which environed all the rec quarters, and was so denominated from ar rampart of earth by which it was encom- The last two divisions exhibited a gro- group of churches, convents, palaces, brick oden houses, and mean hovels. 5. The o, or suburbs, which formed a vast exterior

circle round all the parts already described, were invested by a low rampart and ditch. These sub- ubs contained, besides buildings of all kinds, or- chards, gardens, cornfields, much open pasture, and some small lakes, which gave rise to the Neg- lina. The Moskwa, from which the city takes its name, flows through it in a winding channel, but, excepting in spring, is only navigable for rafts. It receives the Yausa in the Semlainogorod and the Neglina, in the western extremity of the Kremlin; the beds of both these rivulets are nearly dry in summer. Moscow is an entrepot of the inland commerce of Russia, particularly that river which communicates with the Volga, and also by a canal to the Don, which river communicates with the sea of Asoph. This city is 425 ms. SE. of Pe- tersburg. Lon. 37 33 E., lat. 55 46 N.

Moscow, tp., Somerset co., Me., 28 ms. N. from Norridgewock.—Town, Livingston co., N. Y., near the W. side of Genessee river, 30 ms. above Rochester.—Small village containing about 100 inhabitants, in the southern limit of Clermont co., Ohio. It is situated on the N. bank of the Ohio river, 22 ms. southerly from Williamsburg, and 120 southwesterly from Columbus.

Moselle, department of France, including part of the late province of Lorraine. It takes its name from a river which rises in the Vosges, waters Epi- nal and Toul, receives the Meurte below Nancy, and, passing by Metz, Thionville, and Treves, enters the Rhine at Coblentz. Metz is the capital.

Mosenia, town of Persia, in the province of Chusistan, 22 ms. SW. of Suster.

Moskoe.—See *Malestrom*.

Mosque, from the Arab *medsched*, Turkish *meschit*, Italian *moscheta*, Spanish *mezquita*, English and French *mosque*, and means a temple or place of worship. This term comes evidently from the Arab *meschid*, a grave, and which we may find in many Mahometan proper names, as *Meschid Ali*, *Meschid Madre Sulieman*, &c. There is no other fact in history more remarkable than the fact of erecting temples on burial grounds, every where and at all times prevalent.

Mosquito Shore, country of New Spain, on the Atlantic ocean, containing the eastern part of the provinces of Honduras and Nicaragua. In magi- tude it exceeds Portugal; it is well watered by navigable rivers and lakes, abounds in fish, game, and provisions of all sorts, furnishes every necessa- ry for raising cattle and stock, and clothed with woods producing timber for every purpose at land or sea. The soil is superior to that of the West India islands, the climate is more salubrious, and the destructive ravages of hurricanes and earth- quakes have never been known here. The Mos- quito Indians are so situate between morasses and inaccessible mountains, and a coast full of rocks and shoals, that no attempts against them by the Spaniards, whom they mortally hate, could ever succeed.

Moss, seaport of Norway, in the province of Aggerbuys, at the mouth of a river of its name, on the E. side of Christiana bay. Here are many saw mills and a large iron foundry. It is 28 ms. S. of Christiana. Lon. 10 48 E., lat. 58 38 N.

Mosey Creek, post office, Jefferson co., Tenn., by post road 190 ms. E. from Murfreesborough.

Mosoul.—See *Mousol* and *Asia*, p. 84.

Mostagan, ancient and strong town of the kingdom of Algiers, with a castle and a good harbor, 50 ms. NE. of Oran. Lon. 30' E., lat. 36 20 N.

Mostar, considerable town of Turkish Dalmatia, with a Greek archbishop's see. It belongs to the Turks; 20 ms. NE. of Narenta. Lon. 18 37 E., lat. 43 48 N.

Mosul.—See *Mausul*.

Motala, town of Naples, in Terra d'Otranto, with a bishop's see, 15 ms. NW. of Taranto. Lon. 17 14 E., lat. 40 46 N.

MOTES, Anglo-Saxon, public assemblies for legislative or municipal purposes, as Wittenagemote, Folkmote, and Burgemote.

Motherkill, hundred, Kent co., Dela. It is watered by Mothekill creek. The chief town, Fredericka. Pop. 1810, 7,415; in 1820, 7,558.

Mottle Isle, island of Vt., Grand Isle co. It is to the NW. from Grand Isle, and is 8 ms. long and 2 wide.

Motyr, island of Asia, one of the Moluccas, of great value to the Dutch on account of its spices. Lon. 128 20 E., lat. 10' S.

Motril, seaport town of Spain, in Granada, with a good harbor, seated on the Mediterranean, 37 ms. SE. of Granada. Lon. 3 38 W., lat. 36 32 N.

Mouab, seaport town of Arabia Felix, capital of Yemen, seated in a fertile country, 80 ms. S. of Sanaa. Lon. 46 35 E., lat. 16 20 N.

Moudon, one of the most ancient towns of Switzerland, capital of a bailiwick of the same name, in the Pays de Vaud, and formerly of all that part of the country which belonged to the duke of Savoy. It was formerly called Minodum. It is 12 ms. N. by E. of Lausanne. Lon. 6 58 E., lat. 46 41 N.

Mougen, or *Chenyan*, capital of the country of the Mantchew. It is built on an eminence, and walled in by walls 3 leagues in circumference. It is 440 ms. NE. of Peking. Lon. 122 45 E., lat. 41 55 N.

Moulins, episcopal town of Fr., in the dep. of Allier, and late province of Bourbonnois. It has a bridge over the Allier, on which it is seated, and takes its name from the great number of mills (moulins) that were formerly in its neighborhood, and contains above 16,000 inhabitants. Its manufacture of cutlery is in great esteem. It is 30 ms. S. of Nevers. Lon. 3 25 E., lat. 46 34 N.

Moulins-Engilbert, town of Fr., in the dep. of Nievre, and late province of Nivernois. It is seated at the bottom of the mountains of Morvan, and is 5 ms. SW. of Chateau-Chinon.

Moultan, province of Hindoostan proper, bounded on the N. by Lahore, on the E. by Delhi and Agimere, on the S. by Guzerat, and on the W. by Persia and Candahar. Its products are cotton, sugar, opium, galls, brimstone, &c. It was subject to the seiks; but its capital, Moulstan, has been garrisoned by the king of Candahar, ever since 1779.—One of the most ancient cities of Hindoostan proper, capital of a province of the same name. It is of small extent for a capital, but strongly fortified, and has a Hindoo temple of great celebrity. The trade of Moulstan has been greatly lessened, on account of the river having been choked up. Here is a particular sect of Hindoos, called Catry—a tribe of warriors suppo-

sed to be the Catheri or Cathei, with whom ander warred on the banks of the Malli. M is seated on one of the branches of the Indus ms. SW. of Lahore, and 310 SE. of Can Lon. 70 40 E., lat. 29 51 N.—See *Moolta*.

Moultan, South, corporate town of E Devonshire. In the reign of Edward I, S. Moultan had the privilege of sending m to Parliament, and was a royal demesne. governed by a mayor, and has a manufac sers, shalloons, and felt. It is seated Moul, 12 ms. SE. of Barnstable, and 177 S. of London. Lon. 3 55 W., lat. 51 5 N.

Moultan, village, Lawrence co., Ala. *Moultonborough*, town, Stafford co., N N. from Lake Winnipissioege. Pop. 1820,

Mountains.—The following presents a view of the height of the most remarkable ains of the earth:

73	Bass Rock	-	400	Frith of Forth.

The following notices of some colossal isolated peaks of the peninsula of Kamtschatka, seen from Avatscha or Awatscha bay, were made and remitted to Europe by the officers of the Siniavin, a Russian ship, on a voyage of discovery in 1828:

	Feet.
Viluschinjkaja	6,342
Karazkaja	11,468
Avatschankaja, (the burning,) an active volcano.	
Kaselskaja.	
Kluschenskaja, or Kamschatskaja	16,542

The latter visible at the great distance of 160 sea miles.

Mountains.—Those great ribs of the earth admit, though with some vagueness, arrangement in *systems, chains, and isolated peaks*—the latter comparatively rare, and in some cases, where apparently separate, are probably only so about the earth's surface. As a general fact, the mountains of America range with deflection from the meridians, whilst those of the opposing continent deflect from the latitudes. In both cases there are, however, exceptions, of which the Ghauts of India, and Urals separating Europe in part from Asia, are examples.

The Spanish language has, as regards mountains, a decided advantage over any of the other languages of Europe. SIERRA, from the Spanish, for a saw, is applied to a system rising in pointed peaks. NEVADA, Spanish, signifies a mountain crowned with perpetual snow; CORDILLERA, stretched as rope. In each case the names are adjectives, and describe as well as designate the particular mountain under consideration. The American mountains are mostly cordillera.

To give an example of the difference between a *system* and *chain* of mountains, we may bring forward the Appalachian, of the U. S., and the Alps, of Europe. The Appalachian comprise the chains of Blue Ridge, Cumberland, Alleghany, Chestnut, Laurel, Kittatinny, &c. The Alps comprise, with others, the chains of Cottian, between Italy and France, Pennine, between Italy

and Switzerland, Lepontine, Brenner, Julianic, &c. Examples, illustrative of the same distinctive principles, could be drawn, and with tures on a very much more enlarged scale, the mountains of South America and Asia.

An interesting problem on the distance a mountain can be seen on the surface of the earth will be found stated in this volume, note to page 115. We may here add, that when the distance is known and not the height, the latter be deduced by division—both independent of fraction, which varies to a great extent from changes of atmospheric density.

Mountain Creek, post office, Lincoln co. C., 175 ms. SW. by W. from Raleigh.

Mountain Island, village, Scott co., Ky.

Mountain Shoals, village, Laurens district C., 80 ms. NW. from Columbia.

Mount Airy, village, Surry co., N. C. postroad 172 ms. NW. by W. from Raleigh. Village, Bledsoe co., Tenn., 90 ms. east from Murfreesborough.

Mount Bethel, village, Somerset co., N. J.

Mount Bethel, Lower, tp., Northampton Pa., between Delaware river, Plainfield tp. Blue mountain, and Upper Mount Bethel, S. N. from Easton. Pop. 1820, 2,442.

Mount Bethel, Upper, tp., Northampton Pa., above the preceding. Pop. 1820, 2,181.

Mount Carmel, town, Edward's co., Ill. on the right bank of the Wabash, opposite the mouth of the White river.

Mount Clemens, village and seat of justice, Macomb co. Mich., on the left bank of Huron Lake St. Clair, 4 ms. above its mouth, and N. from Detroit.

Mount Clio, village, Sumpter district S. C., 52 ms. E. from Columbia.

Mount Desert, island, Hancock co., Me., constituting a tp. about 40 ms. E. from Castine.

Mount Edgecumbe, prodigious peak, on the W. side of the entrance of Cook's strait, in New Zealand. Its height is supposed to be very inferior to that of the Peak of Teneriffe.

Mount Elon, village, Darlington district S. C., 77 ms. NE. from Columbia.

Mount Etna Furnace, and post office, Berks co., Penn.

Mount Gilead, post office, Loudon co., Va., 43 ms. NW. from W. C.

Mount Henry, village, Montgomery co., Va., 67 ms. NW. from Murfreesborough.

Mount Holly, town, Rutland co., Vt., 20 ms. W. from Windsor. —Village, capital of Burlington co., N. J., situated on the N. side of Abacus creek, about 18 ms. a little N. of Philadelphia.

Mount Hope, village, Orange co., N. Y. —Village, Shenandoah co., Va.

Mount Hope Bay, the NE. extension of Narragansett bay. It communicates with the E. end of W. channels of Rhode Island setting up from the northern extremity of the island, between Bristol and Newport counties into Bristol co., Mass. on the borders of which it receives Taunton river.

Mount Hope Hill, R. I., W. shore of Mount Hope bay, on the point SE. from the village of Bristol. It is remarkable as being the residence of the celebrated Indian king Philip.

- Mount Horeb*, village, Nelson co., Va., about 10 ms. NW. by W. from Richmond.
- Mount Horeb*, village, Jasper co., Ga., 24 ms. W. from Milledgeville.
- Mount Jackson*, village, Beaver co., Penn.
- Mount Joy*, town, Lancaster co., Penn., led by Little Chiques creek E., the SE. limit of Hephzibah co., or Conewago creek NW., and of the royal tp. S.
- Mount Joy*, tp. Adams co., Penn., 5 ms. SE. of Gettysburg, on the N. boundary of Md., between Willalaws and Rock creeks. Pop. in 1820, 935.
- Mount Laurel*, village, Halifax co., Va., 125 ms. SW. from Richmond.
- Mount Morris*, town, Livingston co., N. Y., open the tp. of Sparta and Genessee river, 35 ms. SW. from Canandaigua.
- Mount Morris*, post office, Green co., Penn.
- Mount Mourne*, Iredell co., N. C., 144 ms. W. from Raleigh.
- Mount Murray*, seignior, Northumberland co., Pa., on the left side of St. Lawrence, 75 ms. W. from Quebec.
- Mount Pilot*, Sumner co., Tenn.
- Mount Pisgah*, post office, Iredell co., N. C., 5 ms. W. from Raleigh.—Post office, Wilcox co., Ala., 43 ms. from Cahaba.
- Mount Pleasant*, town and tp., West Chester co., N. Y., on Hudson river, 33 ms. above the city of N. Y. It is the seat of an academy, and contains the village of Singing.—Village, Lancaster co., Penn., 6 ms. W. from Lancaster.—Village, Westmoreland co., Penn. The village is on Jacob's creek, 16 ms. S. from Greensburg.—Village, Wayne co., Penn., on the headwaters of the Waxawenon creek, commencing 5 ms. NW. from the city. Pop. in 1820, 874.—Village Md., on the line between Queen Ann and Caroline cos., within 1 mile of the W. boundary of Del., 12 ms. W. from Dover.—Village, Shenandoah co. Va. 113 ms. westerly from W. C.—Village, Spotsylvania co., Va., by postroad 86 ms. from Richmond.—Village, Halifax co., Va., by postroad 167 ms. SW. from Richmond.—Village, Rockingham co., N. C., by postroad 8 ms. NW. from Raleigh.—Village, Fairfield co., S. C., 44 ms. N. from Columbia.—Village, Baldwin co., Ga., 10 ms. from Milledgeville.
- Mount Pleasant*, village in the S. part of Jefferson co., Ohio, 21 ms. SW. from Steubenville. Containing 120 dwelling houses, 1,468 inhabitants, a printing office, a bank, several stores, a school and market houses of brick, and a brick building house, 92 by 62 feet area, two stories high, belonging to the Friends, beside two others, a house of brick, for Seceders and Methodists, and within six ms. around are 11 flouring mills, 2 saw mills, a paper mill with two vats, and a green cloth factory, beside two common fulling mills. The site of this village is elevated and pleasant, with a well cultivated vicinity. Pop. in 1820, 1,676 in the tp. including the village.—Village, Martin co., Ia., by post road 144 ms. SSW. from Indianapolis.—Village, Maury co., Tenn., 30 ms. SW. from Murfreesborough.—Post office, Wilkinson co., Miss., 123 ms. SW. from Jackson.—Post office, E. Baton Rouge parish, La., 106 ms. NW. from New Orleans.—Mills and post office, Union co., Penn., 46 ms. N. from Harrisburg.
- Mount Prospect*, village, Edgecomb co., N. C., 73 ms. easterly from Raleigh.
- Mount Republic*, post office, Wayne co., Penn.
- Mountsabay*, bay of Eng., on the S. coast of Cornwall, between the Lands End, and the Lizard Point. It is so named from the lofty mountains of Mount St. Michael, which rise within it. Among the rocks, on this part of the coast, breeds the Cornish chough, or red legged crow, noted for stealing and carrying away whatever it finds. In Mountsabay is a considerable pilchard fishery.
- Mount Solus*, post office, Hinds co., Miss., 70 ms. southwardly from Jackson.
- Mountsorrel*, town in Eng., in Leicestershire, so named from a high mount or rock, of a sorrel-coloured stone, extremely hard. Of rough stones, hewn out of this rock, the town is built. It is seated on the Stour, 53 ms. SSE. of Derby, and 105 NNW. of London. Lon. 1 9 W. lat. 52 45 N.
- Mount Sterling*, village, Switzerland co., Ia., 103 ms. SE. from Indianapolis.—Village, Montgomery co., Ky., 35 ms. E. from Lexington.
- Mount Upton*, Village on Unadilla river, opposite the mouth of Butternut creek, Chenango co., N. Y., 10 ms. SE. from Norwich.
- Mount Vernon*, town, Kennebec co., Me., 14 ms. NW. of Augusta, or Kennebec river. Pop. in 1820, 1,293.—Tp., Hillsborough co., N. H., 92 ms. S. from Concord. Pop. in 1820, 729.—Village, Chester co., Penn.
- Mount Vernon*, seat of the late General Washington, and his favorite retreat from the fatigues of public employment; pleasantly situated on the W. bank of the Potomac river, 15 ms. below the city of Washington, and 9 ms., below Alexandria.—Village and seat of justice, Montgomery co., Ga., N. lat. 32 13, lon. W. C. 5 48 W.
- Mount Vernon*, town and seat of justice for Knox co., O., on the N. bank of Owl creek, 20 ms. from its mouth. This "town contains about 80 dwelling houses, 403 inhabitants, a printing office, a brick court house and jail, eight stores, a merchant mill, and a saw mill, and within 6 ms. there are 9 grist and saw mills, 3 carding machines, one of which is for cotton." Distance 40 ms. W. from Coshocton, 54 NW. from Zanesville, and 44 NE. from Columbus. N. lat. 40 24 W. lon. 5 32. Pop. in 1840, village and tp., 2,362.—Village and seat of justice, Rockcastle co., Ky., 75 ms. SE. from Frankfort. Lat. 37 24 N. lon. W. C. 7 10 W.—Village, Bullitt co., Ky., 25 ms. SSE. from Louisville.—Village on the right bank of the Ohio river, Posey co., Ia., 5 ms. above the mouth of Wabash river.—Village, Jefferson co., Ill., by post road 69 ms. S. from Vandalia.
- Mountville*, village, Loudon co., Va., 40 ms. NW. from W. C.
- Mount Washington*, the highest of the peaks of the White Mountains of New Hampshire. Its elevation above the ocean 6,634 feet, as ascertained by Captain Partridge.—Tp., Berkshire co., Mass., 25 ms. SSE. from Lenox.
- Mount Zion*, village, Union co., Ky., by post

road 236 ms. SW. by W. from Frankfort.—Village, Hancock co., Ga., 26 ms. NE. from Milledgeville.—Village, Monroe co., Mo., 176 ms. from St. Charles.

Moura, town of Portugal, in Alentejo, at the confluence of the rivers Ardita and Gaudiana, 87 ms. SE. of Lisbon. Lon. 5 59 W. lat. 38° N.

Mourzook, the capital of Fezzan, in Africa, situated on a small river, and supplied with water from a multitude of springs and wells. Being formerly built of stone, it still retains the appellation of a Christian town; and the medley which it presents to the eye, of the vast ruins of ancient buildings, and the humble cottages of earth and sand that form the dwellings of its present Arab inhabitants, is singularly grotesque and strange. It is surrounded by a high wall, which not only affords the means of defence, but enables the Government to collect, at its three gates, a tax on all goods, (provisions excepted) that are brought for the supply of its people. A caravan sets out annually from Mesurata to this place; and hence the Fezzanners themselves despatch, every year, a caravan to Cashna and another to Bornou. Mourzook is 262 ms. S. of Mesurata, 650 NW. of Bornou, and 710 N. by E. of Cashna. Lat. 27 20 N., lon. 15 5 E.

Mossy, river of Hindoostan, which, crossing the country of Golconda, runs into the Kistna on the confines of the circar of Palnaud.

Moustiers, town of Fr., in the dep. of the Lower Alps, and late province of Provence. It is noted for a manufacture of fine porcelain, and for a once famous pilgrimage, called Our Lady of Beauvezer, seated between two very lofty and craggy mountains. Moustiers is 5 ms. NE. of Riez, and 47 WNW. of Nice.

Mouth of Black River, post office, Cuyahoga co., Ohio, 10 ms. W. from Cleveland, and 146 ms. NNE. from Columbus.

Mouth of Blain, post office, Lawrence co., Ky., 177 ms. E. from Frankfort.

Mouth of Tellico, post office on Tennessee river, where the road crosses between Athens and Maryville, 30 ms. SW. from Knoxville.

Moutier, or *Monstier*, town of Savoy, capital of Tarentesia, with an archiepiscopal palace. It is seated on the Isere, 62 ms. NW. of Turin. Lon. 6 23 E., lat. 45 30 N.

Mouson, ancient town of Fr., in the dep. of the Ardennes, and late province of Champagne, with a late rich Benedictine abbey. It is seated on the Meuse, 8 ms. SE. of Sedan, and 110 NE. of Paris. Lon. 5 10 E., lat. 49 33 N.

Mousul, city of Asiatic Turkey, in the pachalic of Bagdad, on the right bank of the Tigris, opposite the village of Nunia, supposed to be the site of the ancient Ninevah. Mousul is a mart of extensive trade, inhabited by about 35,000 persons, composed of Turks, Greeks, Armenians, Jews, Kurds, and Arabs. Lat. 36 21 N.

Mowee, one of the Sandwich islands, discovered by Captain Cook, is 162 ms. in circumference. A low isthmus divides it into two circular peninsulas, of which the eastern is double the size of the western. The mountains in both rise to a very great height, and may be seen at more than the distance of 30 leagues. The N. shores afford no soundings, but the country presents an appearance of

verdure and fertility. Near the W. point of the smaller peninsula is a spacious bay, with a beach, shaded with cocoa nut trees. The country behind has a most romantic appearance, hills rising in a great variety of peaked forms, their steep sides, and the deep chasms between them, are covered with trees. The inhabitants are computed at 65,000. Lon. 175 56 W. 20 53 N.

Moxahala, or *Jonathan's Creek*, rising in the northern part of Perry co., Ohio, flows E. into Muskingum co., into Muskingum river, which enters 3 ms. below Zanesville.

Muxos, the northern province of the United Provinces of Buenos Ayres, bounded by the tuguese territories NE., Peru N. and NW. Paz W., Cochabamba S., and Chiquitos SE., lying between lat. 12° and 18° S., and between lon. 9° and 16° E. from W. C. It is drained by the Gaupare, Branco, Mamore, and other streams, confluent of the Madeira.

Moyamensing, tp., Philadelphia co., Pa., on the Delaware, between Southwark and the mouth of the Schuylkill, having Passyunk W. Pop. 1810, 2,887; in 1820, 3,963.

Moyenwic, town of France, in the department of Meurthe, and late province of Lorraine, remarkable for its salt pits. It is 3 ms. from Vic, at the SSE. of Nancy.

MOZABIES, a white Mohammedan people of northern Africa of whom Hodgson thus speaks: "The Mozabites are a remarkably white people and profess the Mohammedan religion. They inhabit an Oasis or Egzer of the Sahara about 100 ms. southward of Algiers." Their country is on the southern side or slope of the Atlas mountains. N. lat. 31°.

Mozambique.—See *Africa*, p. 28.

Mozcislow, strong town of Lithuania, capital of a palatinate of the same name, on the Softa, 2 ms. S. of Smolensko. Lon. 32 32 E., lat. 52 28 N.

Msta, river of European Russia, rising in the government of Tver, and flowing NW. into the Volga, nearly opposite Novogorod. It forms a part of the great inland communication between the waters of the Baltic sea and those of the Volga river. It is united to the Tver, at Nischnei Iokshok by a canal which has been formed through the valleys of the Valday hills.

Mucheln, town of Upper Saxony, in Thuringia, 6 ms. N. of Freyburg, and 8 SW. of Muehlberg. This town was burned in 1621 by the imperialists, under the command of Count Tilly. Lon. 11 39 E., lat. 51 15 N.

Muchelney, village of Eng., in Somersetshire, 2 ms. S. by E. of Langport.

Mucidan, town of Fr., in the dep. of Dordogne, and late province of Perigord, seated on the Dordogne, 18 ms. SW. of Perigux.

Mud Camp, post office, Cumberland co., Pa., 150 ms. S. from Frankfort.

Mud Creek, a stream of Ontario co., N. Y., joining the outlet of Ontario Lake, near Lyons. The Erie canal follows the valley of this creek about 16 ms.—Post office, Steuben co., N. Y., 10 ms. E. from Bath.

Muddy River, stream of Illinois, rising in Randolph, Washington, Jefferson, and Franklin

various branches flow SE., and, uniting in one, enter the Mississippi on the limit between the latter and Union co. It is navigable for 30 or 40 ms.—Small river of Ky., rising in Logan and Todd, and, flowing N. between them and Muhlenburg cos., falls into the S. side of the Green river.

Muehr, river of Germany, which rises in the duchy of Salzburg, crosses Styria, passing through Burgenland, Luben, Muehr, and Gratz, and falls into the Drave, near Kanisea, in Hungary.

Muehr, or *Muerau*, considerable town of Germany, in the duchy of Styria, on the river Muehr, 15 N. W. of Gratz, and 40 SW. of Neustadt. Lon. 15 4 E., lat. 47 16 N.

Muzzin.—See *Muzzini*.

Mufti, or *Moufti*, or *Muefti*, Arabic, from *Muf*, to instruct in the truth by responses and oracles. It is the title of the Mahometan high priest amongst the Turks, and who resides in Constantinople. This priest is the sovereign interpreter of the Koran, and his decisions final on all but the Sultan, by whom they are generally, though not always, respected and obeyed.

Muggia, or *Muglia*, town of Italy, in Venetia, with a castle, seated on a gulf of the Adriatic, 5 ms. SE. of Trieste. Lon. 14 2 E., lat. 45 52 N.

Muhlburg, town of Upper Saxony, in the marche of Meissen. It is situated on the Elbe, with a castle, and is 19 ms. NW. of Meissen, and 10 W. of Dresden. Lon. 13 9 E., lat. 51 25 N.

Muhl-Rreis, or *Viertel*, *Quarter of Muhl*, that part of Lower Austria between the Danube and Vienna.

Muhlenburg, co. of Ky., bounded by Muddy river Butler co. SE., Todd S., Christian SW., and by the river or Hopkins W., Deer creek, or Henderson NW., and Green river or Daviess N. Lon. 40 ms., mean width 17, area about 540 sq. miles. Chief town, Greenville. Pop. in 1820, 10,000, and in 1840, 6,964. Lat. 37 16 N., lon. 82 10° W.

Mulrose, town of Upper Saxony, in the middle marche of Brandenburg. It is conveniently seated 19 ms. SW. of Frankfort on the Oder, on the canal, which forms navigable communication between Hamburg to Breslaw.

Murkirk, town of Scotland, in Ayrshire, seated on the river Ayr, and noted for a considerable fishery.

Murphy Creek, post office, Autauga co., Ala., 10 E. from Cahaba.

Murphy Grove, post office, Smith co., Tenn., 10 N. E. from Murfreesborough.

Murphy River.—See *Black Warrior*.

Muldaw, river of Bohemia, which rises on the hills of Moravia, and running by Budweis and Prague, falls into the Elbe at Melnick. Though the Elbe has received the preference, as taking the course of the general stream, Muldaw is considered the principal branch, being much longer, and discharging more and larger tributaries than does the Elbe above their junction.

Mulorf, town of Germany, in the archbishopric of Salzburg, and 40 ms. E. of Munich. Lon. 12 25 E., lat. 48 10 N.

Murder's Hill, post office, Greene co., Ky., 96 W. from Frankfort.

Mulhausen, imperial and Hanseatic town of Germany, in Thuringia, under the protection of the elector of Saxony. It is seated in a fertile country, on the Unstruth, 15 ms. NE. of Eisenach, and 45 E. by S. of Cassel. Lon. 10 49 E., lat. 51 13 N.—Considerable town of France, in Alsace, formerly the capital of a republic in alliance with the Swiss, and entitled to all the privileges of the Helvetic confederacy. The walls of the town enclose a circumference of not more than 2 ms., and its whole territory is confined within a precinct of 8 ms. The town contains 6,000 inhabitants, who are protestants; and there are 2,000 subjects in its adjacent villages. It owes its present flourishing state to its manufactures, which are chiefly of printed linens and cottons. It is well built, adorned with handsome structures, and seated in a pleasant fertile country, on an island formed by the river Ill. It is 15 ms. NW. of Basle, and 20 E. of Befort. Lon. 7 24 E., lat. 47 48 N.

Mulheim, town of Germany, in the electorate of Cologne, seated on the Rhine, 3 ms. from Cologne. Here the few protestants in Cologne are obliged to go to perform divine worship.

MULLAS, or *MOLLAHS*, Tartar priests.

Mull, one of the Hebrides of Scotland, an island of considerable size, being 25 ms. in length, and in some places of equal breadth. There are many good natural harbors; but there is only one village, called Tobermorey, where a fishing station has been lately established by the British society. The soil is, for the most part, rocky and barren; it is in some places, however, fertile in corn and grass, but has no wood; the hills abound with springs, and are covered with cattle; these, with the fishery, and a considerable quantity of kelp, are the only articles of commerce.

Mull of Cantyre.—See *Cantyre*.

Mull of Galloway, rocky promontory, the most southerly point of Scotland, in the county of Wigton.

Mulleras, town of Germany, in the middle marche of Brandenburg, seated on a canal cut between the Spree and Oder, 40 ms. SE. of Berlin. Lon. 14 31 E., lat. 52 14 N.

Mullicohill, village, Gloucester co., N. J., on Raccoon creek, 17 ms. SSW. from Philadelphia.

Mullicuss, or *Little Egg Harbor*, river of N. J., rising in Burlington and Gloucester cos., and flowing SE., falls into Little Egg Harbor, 2 ms. S. from Tuckerton. It is navigable for sloops of considerable burthen as far as the mouth of Wading river. For a distance of 20 ms., in a direct route, it forms the line between Burlington and Gloucester cos.

Mullingar, co. town of West Meath, in Ireland. It holds a great wool mart, is a place of good trade, and formerly sent two members to the Irish parliament. It is seated on the Foyle, 38 ms. W. of Dublin. Lon. 7 50 W., lat. 53 30 N.

Mullose, canal of, in German Prussia. It connects the Elbe and Oder, and extends from Newbruck, on the Spree, to the lake or reservoir of Briesson, near the Oder. It is about 14 ms. in length, with 10 locks.

Multnomah, river of the U. S., in the basin of Columbia; of which latter river the Multnomah is the great SW. branch. It joins the main stream

100 ms. from the Pacific ocean, but is above its mouth too little known to admit specific description.

Mulvia, large river of Africa, which has its source in Mount Atlas, and dividing the empire of Morocco from the kingdom of Algiers, falls into the Mediterranean sea, to the W. of Marsalquivier.

MUMMY.—Arab, *mumia*, from *mum*, *wax*. Term meaning dead bodies reduced to a dry state in order to be preserved from putrefaction. This art dates, or rather cannot be dated, as it was practised before the earliest records were formed.

Muncy creek, stream of Pa., in the southeastern part of Lycoming co., flows, by comparative courses, 25 ms. SW., and falls into the W. branch of Susquehannah, about one mile NW. from Pennsborough.—Town, Lycoming co., Pa., on the W. branch of Susquehannah, on both sides of Muncy creek, including Pennsborough. Pop. in 1820, 1,255.

Munda, ancient town of Spain, in Granada, 30 ms. NNW. from Malaga. Here the sons of Pompey were utterly defeated by Julius Cæsar.

Munden, town of Hanover, at the junction of the Tulda and Werra rivers, and where these streams form the Weser. It is situated 9 ms. NE. from Cassel, and 15 WSW. from Gottingen.

Munderkingen, town of the kingdom of Wirtemberg, in Suabia, 20 ms. WSW. from Ulen.

Mundu, town of Hindoostan, in Malwa, of which it was formerly the capital. It was then 22 ms. in circuit, and contained many monuments of ancient magnificence, but it is fallen much to decay. It occupies the top of a large and lofty mountain, 46 ms. S. of Ougein, and 110 NNW. of Burhanpour. Lon. 75 47 E., lat. 22 50 N.

Munfordville, village and seat of justice, Hart co., Ky., on the right bank of Greene river, opposite Woodsonville, 75 ms. S. from Louisville. Lat. 37 19 N., 8 44 W.

Munglore, town of Candahar, in the co. of Cabul, 125 ms. W. of Cashmere, and 135 E. of Cabul. Lon. 71 15 E., lat. 34 15 N.

Mungulhaut, town of Hindoostan, in Bengal, with a manufacture of coarse cotton cloths, situate on the Durlah, 20 ms. NNE. of Rungpour.

Munich, fortified city, capital of Bavaria, and one of the finest towns in Germany. It contains near 60,000 inhabitants. The houses are high, and the streets spacious, with canals in many of them. The palace of the king is a stupendous structure, magnificently adorned. The cabinet of curiosities, the museum, the library, and the arsenal, merit attention. The cathedral contains the tomb of one of the emperors, in black marble, adorned with statues of bronze. Among the numerous convents, the college formerly belonging to the Jesuits, and the convent of the Theatines, are most worthy of notice. The large market place, in which is the town house, is very beautiful. Here are manufactures of silk, velvet, woolen cloth, and tapestry. Near the city are two other palaces, Nymphenburg and Schlesheim. It is seated on the Iser, 33 ms. ESE. of Augsburg, and 62 S. by W. of Ratisbon. Lon. 11 30 E., lat. 48 10 N.

Munkats.—See *Montgatz*.

Munnerstadt, town of Franconia, in the principality of Wurtzburg, situate on the Lauer, 13 ms. N. of Schweinfurt.

Munypour, capital of the country of the Cas-

say. It is 210 ms. NNW. of Ummerapoor, 410 E. by N. of Calcutta. Lon. 94 40 E. 24 30 N.

Munsingen, town of Suabia, in the kingdom of Wirtemberg, with a castle, 20 ms. W. of U

Munster, province of Ireland, 135 ms. lon. 120 broad; bounded on the N. by Connaught by Leinster, and S. and W. by the Atlantic contains the cos. of Clare, Tipperary, Waterford, Cork, Limerick, and Kerry. The principal is Cork.—Government of Prussia, in the part of Germany, in the circle of Westphalia chief rivers are the Ems, Lippe, Vecht, and kel. The country is level, with some agricultural heights, but no mountains; and it has plains, fine woods, extensive heights that much cattle, and good quarries of stone. merly, and yet, with some changes, is subdivided into the circles of Munster, Tecklenburg, Werdorf, Beckum, Ludinghausen, Koesfeldt, Rechenhausen, Borken, Ahaus, and Steinfurt.—See the view of Prussia.—Considerable city, of the government of the same name. It is surrounded with double ditches and ramparts, and also a strong citadel, which was demolished in 1765, and replaced by a magnificent palace.

famous treaty, called the treaty of Westphalia concluded here in 1648, which ended the wars of 30 years continuance. It is seated Aa, 50 ms. ENE. of Wesel, and 52 WN Paderborn. Lon. 7 49 E., lat. 51 55 N. 18,000.—Town of Switzerland, in the canton of Lucerne, 12 ms. NNW. of Lucerne.—Town of Switzerland, in the canton of Grisons, 15 ms. of Bornio.—Town of Fr., in the dep. of Rhine, 9 ms. WSW. of Colmar.—Village, in Pennsylvania, 5 ms. E. from Ebensburgh.

Munster Eyffel, town of Germany, in the dep. of Juliers, 16 ms. SSW. of Cologne.

Munster Meinfeld, town of Germany, in the electorate of Treves, 12 ms. SW. of Coblenz.

Munsterberg, town of Silesia, capital of the principality of the same name, rich in grain, flax, and hops. It is seated on the Ohlau, 13 ms. W. of Neisse. Lon. 17 3 E., lat. 50 31 N.

Munzenberg, town of Germany, in the dep. of Hesse, with an ancient castle, 8 ms. S. of Giessen.

Murano, town of Austrian Italy, on an island near Venice. Here the famous Venetian glass are made. It stands 3 ms. N. from that city.

Murat, town of Fr., in the dep. of Carcassonne, 12 ms. NW. from St. Flour.

Murcia, province, formerly a kingdom of Spain, bounded on the N. by New Castile, on the E. by Valencia, on the W. by Andalusia and Granada, and on the S. by the Mediterranean. It is 120 long, and 58 broad; and the principal river is the Segura. The soil is dry, and it produces little corn or wine; but there are plenty of oranges, lemons, olives, almonds, mulberries, rice, and sugar. It has also a great deal of silk. The air of this province is very healthful, and the principal town is of the same name.—Populous city of Spain, capital of a province of the same name, with a bishop's see. It has a superb cathedral, the stairs of whose steeple are so contrived, that a man may ride up to the top, either on horseback or in a coach. There are fine gardens about the city in which are the best fruits in Spain. It is at

Segura, 27 ms. N. of Carthage, and 212 of Madrid. Lon. 36° W., lat. 38° 2' N.

de Barrez, town of Fr., in the dep. of Ron, 32 ms. N. by E. from Rhodéz.

Arret, town of Fr., in the dep. of Upper Gascony, and late province of Gascony, seated on the r. of the Garonne, 10 ms. S. of Toulouse. Lon. 1° 18' E., lat. 43° 26' N.

Wettersborough, town, Hertford co., N. C., on the right bank of Meherrin river, about 75 ms. from Petersburg, and an equal distance NW. from Norfolk, in Va.—Town and seat of justice for Hertford co., and until recently seat of Government of Tennessee, between the E. and W. fork of the Meherrin river, 32 ms. SE. from Nashville. Lat. 36° 15' N. The adjacent country is fertile, and productive in grain, cotton, and tobacco. Pop. 1,000.

Castell, episcopal town of Naples, in Basilicata, at the foot of the Appennines, 12 ms. SE. from Benevento. Lon. 15° 45' E., lat. 40° 46' N.

Phreys Settlement, post office, St. Francis, Mo., 70 ms. S. from St. Charles, and 60 from St. Louis.

Murray, NE. tp. and village, Genesee co., N. Y., 12 ms. NE. from Batavia.

Murray Frith, considerable inlet of the sea, on the coast of Scot., between Tarbetness, in Ross-shire, on the N., and Borough Head, in Murray-shire, on the S.

Murrayshire, or *Elginshire*, Scotland, is subdivided into Murray and Strathspey, and is bounded to the E. and SE. by the river Spey, which divides it from Banffshire, on the S. by Aberdeen-shire and Inverness-shire, on the W. by Inverness-shire and Nairnshire, and on the N. by Caithness and the Frith of Murray, being 30 ms. E. to W., and nearly the same from N. to S. The air is salutary, and the winters milder than in other parts in the N. of the kingdom. The S. is mountainous, but abounds with pasture, as in other parts of the country does with corn. Here are several species of firs and oaks. The soil is generally fruitful, and produces the fruits ripe soon. Its principal rivers are the Spey, the Lossie, Nairn, and Findochy, all of which produce vast quantities of salmon. The chief towns are Elgin and Forres. Pop. in 1801, 26,705; in 1811, 28,108; and in 1821, 31,162.

Murray's Mill, post office, Dearborn co., Ia., 12 ms. SE. from Indianapolis.

Murrayville, village, Westmoreland co., Pa., 12 ms. W. from Gettysburg, and 12 ms. W. from Raleigh.

Murhart, town of Suabia, in the duchy of Württemberg, with a Benedictine abbey. It is seated on the river Mur, 8 ms. S. of Hallo. Lon. 10° 15' E., lat. 49° 14' N.

Mocha, populous town of Arabia, in the province of Yemen. It is fortified and surrounded with walls, 18 ms. E. of Mocha.

Muscat, its fleet and trade.—If any of our readers are told that the Sultan of Muscat had a navy as large as ours, they might be very indisposed till they looked at facts. But nevertheless the Sultan has a powerful navy. We gather from the "Digest of existing Commercial Regulations of Foreign Countries, with which the United States have intercourse," (a most valuable work by

the way, printed by order of Congress,) the following statement of the naval force of the Sultan of Muscat:

Names.	Rates.	Where built.	Station.
Liverpool	74	Bombay	Zanzibar.
Shah Allum	56	Bombay	Do
Caroline	40	Rangoon	Muscat.
Prince of Wales	36	Demaun	Do
Henningshaw	36	Cochin	Calcutta.
Piedmontese	32	Muscat	Muscat.
Mossapa	24	Cochin	Do
Rahmani	22	Bombay	Do
Falke	18	Demaun	Bomlay.
Soliman Shah	18	Muscat	Muscat.
Curlew, brig	12	Bombay	Do
Psyche, brig	12	Cochin	Do
Sage, yacht	6	Malabar	Coast Zanzibar.
Vestal	6	Muscat	Muscat.
Elphinstone	6	Bombay	Bombay.

Also 50 *baghelas*, carrying from 8 to 18 guns; and 10 *balits*, carrying from 4 to 6 guns. The *baghela* is a one-masted vessel of from 200 to 300 tons. The *balit* is also a one-masted vessel of 100 to 200 tons. Part of these vessels are used to convoy vessels to the Persian Gulf, and some are in Africa, &c.

Thus it is seen that the Sultan of Muscat is a powerful prince. He possesses a more efficient naval force than all the native princes combined, from the Cape of Good Hope to Japan. His possessions in Africa stretch from Delagado to Cape Guardafui, or from N. lat. 12° to S. lat. 10°; and from Cape Aden, in Arabia, to Ras el Haud; and from Ras el Haud they extend along the northern coast of Arabia, or the coast of Aman, to the entrance to the Persian Gulf; and he claims also the seacoast and islands within the Persian Gulf, including the Bahrein islands and the Pearl fishery contiguous to them, with the northern coast of the gulf as low down as Scindy.

The vessels of the Sultan trade not only with his own ports in Africa, and the valuable islands of Monpeca, Zanzibar, Pemba, and Socotra, but also to Guzerat, Surat, Demau, Bombay, Bay of Bengal, Ceylon, Sumatra, Java, the Mauritius, the Comoro islands, Madagascar, and the Portuguese Possessions, bringing Indian, African, and European articles. About 2,000 vessels are thus engaged in this trade, of which a very large proportion are small craft to be sure. The naval force of the Sultan gives him entire control over all the ports of East Africa, the Red Sea, the coast of Abyssinia, and the Persian Gulf. This force consists, it seems, of between 70 and 80 sail of vessels, carrying from 74 guns to 4. The officers of this force practice lunar observations, and have excellent chronometers.

Since our treaty with the Sultan in 1835, our vessels are beginning to push an advantageous trade there, though they encounter formidable competitors in the British, who enjoy great advantages from their Indian possessions. The exports are gum copal, aloes, gum arabic, ivory, tortoise shell, hides, beeswax, cocoa, rice, ghee, dates, raisins, and a great variety of drugs.—*N. Y. Express*.

From the defects of our general geographical works, we might be led to regard the commercial empire, of which Muscat or Muskat is the capital, as a recently formed State. In 1508 this city was

taken by the Portuguese, who found it then an ancient entrepôt. In the decline of Portuguese power, it fell again into the power of the natives. The city is almost exactly under the northern tropic, about 100 ms. N. W. from Cape Ras el Haud, and 200 SSE. from the straits of Ormus. Muscat is an admirable commercial position.

The importance of this imperfectly known, though really great commercial empire, deserves some more of detail than we intended when we first selected the above extract.

Cape Ras el Haud, or more correctly Ras al Gat, as the word *Ras* signifies a cape, is the extreme eastern point of Africa, and projects towards, and lies almost directly west of Guzerat, in Indostan. The city of Muscat is situated inside of Ras al Gat, towards the north of the Persian Gulf.

Bahrein islands is a group near the southwestern coast of the Persian Gulf, N. lat. 28°, and in which has been for many ages a very productive pearl fishery.

Aden is an ancient city and seaport of Arabia, on its extreme southern coast, about 150 ms. eastward of the straits of Babelmandeb.

Cape Delgado, (sharp point) a promontory of eastern Africa, S. lat. 10°.

Comorro, or Comoro islands, spread across the northern opening of the Mozambique channel, between Cape Delgado and the great island Madagascar.

Following the general inflections of the coasts of Africa and Arabia, from the Comoro islands and Cape Delgado, to the islands of Bahrein, exceeds 4,000 ms. If to this immense line we add 600 ms. of the coast of Asia, from the Gulf of Ormus to the mouth of the Indus, will give 4,600 ms. of seacoast to the Sultan of Muscat.

Let it not be misunderstood that these coasts are barren deserts, for in most parts the reverse is the reality. Arabia, in particular, has been compared to a mantle of serge, with a fringe of gold. A figure applicable to great part of the coasts of Africa, and also of that part of southern Asia between the Persian Gulf and India. This latter region, is in different languages, known as Mekran, or Beloochistan.

Muscogee, county, Georgia.

Mushad.—See *Meshed*.

Musidan, town of France, in Upper Perigord, which sustained a famous siege in 1579. Lon. 20' E., lat. 45 5 N.

Muskingum, river of the United States, in the State of Ohio. This stream is formed by two branches, Whitewoman's and Tuscarawas rivers. The former rises by a number of sources in Richland, Knox, and Wayne counties, interlocking with the head waters of Sciota and Sandusky, entering Ohio and Vermillion and Black rivers, flowing into Lake Erie, passing through Coshocton co., join the Tuscarawas river at the town of Coshocton. The entire comparative length of Whitewoman's river, from its mouth to the extreme source of Armstrong's creek, in Richland county, is about 70 miles, draining one of the most fertile tracts of land in the United States.

The Tuscarawas river has its sources in Harrison, Columbiana, Stark, Portage, Medina, and Wayne counties, interlocking with those of Rocky river and Cuyahoga, flowing into Lake Erie and

Great Beaver, entering Ohio. The Tuscarawas river is 90 ms. in length from the town of Coshocton to its extreme source in Medina county.

Below the junction of Whitewoman's and carawas rivers, the united waters take the name of Muskingum, which flow S. 8 miles through Coshocton, receives from the E. Hil's creek, on the border of Muskingum co., and, continuing a little W. 23 miles to Zanesville, receives Little Creek from the W. After being precipitated a fall of about 7 feet at Zanesville, the Muskingum turns SE. by S., and, flowing 60 ms., enters the Ohio river at Marietta. Between Zanesville its efflux into Ohio, the Muskingum river passes through Muskingum, Morgan, and Washington counties. This river is navigable with large boats to the falls below Zanesville, for boats of considerable size to Coshocton, and for small boats nearly to the source of the Tuscarawas.

The country drained by the sources of the Muskingum is generally level, but becomes more elevated approaching the Ohio river. In point of elevation this river flows from N. lat. 41 7 to N. lat. 38 1. The area it drains nearly circular, about 7,800 miles.

The Muskingum channel has been made navigable for steamboats from its mouth to Dresden, on the northern part of Muskingum co., near which place its improvements join the Great Central canal of Ohio.

Muskingum, county, Ohio, bounded on the north by Coshocton, E. by Guernsey, S. by Meigs, and W. by Perry and Licking counties. It contains 27 miles in extent, and contains about 60,000 acres. Its principal waters are the Muskingum and Licking rivers, Salt, Jonathan's or Moxie, and Wakatomika creeks. In numerous places adjacent to and in the bed and valley of the Muskingum river are extensive and almost inexhaustible beds of stone coal, which the people in the vicinity of Zanesville use as fuel. Surface of the county is hilly and soil sterile. Pop. in 1820, 17,524; in 1840, 38,749. Lat. 40° N. and lon. W. 80° W. intersect very near the centre of this county.

Musselburg, seaport in Edinburghshire, on the Frith of Forth, at the mouth of the river Esk, is 6 miles E. of Edinburgh. Lon. 3 5 W. lat. 56° N.

Mustagam, seaport of the kingdom of Almoravia with a castle, 140 ms. W. from the city of Almeria. Lon. 3' W., lat. 36 30 N.

Musacra, seaport of Spain, in Granada, with a strong castle, seated on a mountain, 27 miles S. of Almeria, and 62 SW. of Carthage. Lon. 3 36 W., lat. 37 11 N.

Musuela, town of Spain, in the province of Badajoz, seated on the banks of the Guadalquivir, 50 ms. N. of Granada.

Muswell Hill, village of England, in Middlesex, 5 miles N. of London. It takes its name from a famous well on the hill which belonged to the fraternity of St. John of Jerusalem, in Chesham wall. This well still belongs to the parish of Chesham-enwall.

MUTHUL, Berber term, derived from *amet*, like a hare, or *Hare river*.

Mutschen, town of Germany, in the circle of Upper Saxony, and territory of Leipsic, in the vicinity of which they find a species of crystal

en diamonds. It is 20 ms. ENE. of Leipzig. Lon. 12 50 E., lat. 51 40 N.

Meden, town of Holland, seated on the Vecht, S. coast of the Zuyder Zee, 7 miles E. of Amsterdam. Lon. 5 1 E., lat. 52 22 N.

Muzin, in Mohammedan countries officers, of the mosques, whose duty is to sound the call, or summons to prayer at the five pre-canonical hours, viz: dawn, or morning, four P. M., sunset, and nightfall.

Myne, formerly the capital of a kingdom in the Peloponnesus, now Morea, which is now reduced to a small village, in which the ruins of the city remain, as described by Pausanius.

Myne, ancient *Myconus*, island of the Archipelago, 30 miles in circumference. The harbor is deep, and deep enough for the largest ships, they may ride secure from the north wind, and the mountains are of great height.

Water is very scarce in summer, but in winter is a large well, the only one in the island. There are plenty of partridges, quails, woodcocks, doves, rabbits, and wheat-ears; also excellent figs. Almost all the inhabitants are Christians, who have 50 churches in all, but many are in ruins, and some monasteries. Lon. 25 51 E., lat. 38 N.

Mystown, village, Lebanon co., Pa., on the road from Harrisburg to Lebanon, 31 ms. E. from Harrisburg.

Myessus, or *Clazomenian Promontory*, ancient name of the long peninsula of Asia Minor, extending NW. between Smyrna and the island of Lesbos. It is terminated towards Mytelene, the ancient promontory of the island of Lesbos, by the ancient promontory of the Kara-bouroun of the Turks.—See *Chisme*.

Myl, island, the most eastern of the Moluccas, of an angular form, with a bold shore. The village is built in the water upon posts; and there are many birds visited by the birds of paradise, which are in great numbers. Lon. 130 3 E., lat. 8 N.

Mysore, country in the peninsula of Hindoostan, between the W. and E. ridges of the Ghauts, extending from 11 30 to 15° N. lat., and in the N. from 74 55 to 78 35 W. lon., but diminishes as it approaches the S. till it ends in a narrow point. The N. side is extremely irregular and in the middle part branches out above a range of mountains beyond that to the E. The country is in general dry, rugged, mountainous, and barren; there are several rivers and mountain torrents, which, by artificial means, serve to water rice fields, gardens, &c. In the forests are many elephants and tigers are common. Oxen, buffaloes, and horses are numerous, and in the NE. part many sheep, but horses and asses are few. The chief products are rice, cotton, pepper, cocoa and betel-nut, sugarcane, butter, and oil. The dominions of the rajah of Mysore are now divided into three districts, Patana to the S., Nagara to the W. and Chattrakal to the NE., so called from the places where the chief officers are situated. The Patana district is by far the largest, and of it there is a much greater extent of territory than ever before subject to the Mysore family.

Mysore, fortified city of Hindoostan, capital of the Mysore family of the same name. It was ruined by the British; but since the English restored the

ancient family in 1799, and made it the rajah's seat of government; a palace has been built, and its renovation will follow of course. Mysore is 10 miles S. of Seringapatam. Lon. 76 50 E., lat. 12 15 N.

Mystic, small river, or rather creek of Massachusetts, falling into Boston harbor. It is navigated with sloops to Medford, 4 miles.—Village, New London co., Ct., 8 miles NE. by E. from New London.

Mytilene, or *Metelin*, ancient Lesbos, island on the W. coast of Asia Minor, between the gulfs of Smyrna and Adramyrium. It is 36 miles long, and from 2 to 12 broad. It is one of the most productive islands in the Turkish empire. Population about 50,000. Between lat. 38 25 and 39 20 N.

Mytilene, city.—See *Castro*, in the Addenda.

Myzensk, town of European Russia, in Orel, on the Oko, 32 ms. below Orel.

N.

Naas, borough of Ireland, in the county of Kildare, where the assizes are held alternately with Athy. It was formerly the residence of the kings of Leinster. It is 17 miles SW. of Dublin, and 26 NW. of Leinster. Lon. 6 42 W., lat. 53 13 N.

Nab, river of Germany, which issues from Mount Fichtelberg, in the principality of Bayreuth, flows S. through the palatinate of Bavaria, and enters the Danube a little above Ratisbon.

Nabal, town of the kingdom of Tunis, celebrated for its potteries. Near it are several remains of antiquity. It is seated near the sea, 32 ms. SSE. of Tunis. Lon. 10 19 E., lat. 53 13 N.

Nabburg, town of the palatinate of Bavaria, on the river Nab, 10 ms. ESE. of Amberg.

Nabijos, a nation of Indians, said to reside between Santa Fe, of New Mexico, and the Pacific ocean. An account of this people appeared in the National Intelligencer of September 14, 1824, extracted from the Missouri Intelligencer. From data there given, the Nabijos are far advanced above the savage state; have relinquished the wandering for the sedentary state of society; have ceased to be hunters, and have become farmers and manufacturers, evincing much skill in both pursuits. To give the true sound of this name in English orthography, it should be written *Nabihos*, as the Spanish *j* has the power of the English *h*. If such a people does actually exist, they deserve to be better known.

Nablous, town of Asiatic Turkey, capital of a country which was the ancient kingdom of Samaria. It is the residence of a scheik, who farms the tribute to the pacha of Damascus. The soil of the country is fertile, and produces a great deal of corn, cotton, olives, and some silk. The inhabitants are such jealous Mahometans that they will not suffer any Christians to remain among them. Nablous is 24 ms. N. of Jerusalem, and 90 SSW. of Damascus. Lon. 35 24 E., lat. 32 20 N.

Naco, town of North America, in the province of Honduras. Lon. W. C. 10 40 W., lat. 15 0 North.

Nacogdoches, village of Texas, about 120 ms. W. from Natchitoches, in Louisiana. It is an in-

considerable place. Lon. W. C. 17 17 W., lat. 31 27 N.

Nadeegsda.—See *Kurilus*.

NADIR, point of the heavens or universe directly under our feet, and directly opposite to the zenith or point directly over our heads.

Næfels, town of Switzerland, in the canton of Glaris.

Narden, strong town of Holland, at the head of the canals of the province, on the Zuyder Zee, 14 ms. E. of Amsterdam, and 15 N. of Utrecht. Lon. 5 9 E., lat. 52 20 N.

Nagera, town of Spain, in Old Castile, with a fort, 3 ms. NW. of Calahorra, and 138 N. of Madrid. Lon. 2 10 W., lat. 42 14 N.

Nagold, town of Suabia, in the kingdom of Württemberg, with a strong castle, 10 ms. W. of Tübingen.

Nagore, town of Hindoostan proper, in the country of Agimere, 40 ms. NW. of Agimere. Lon. 74 10 E., lat. 27 8 N.

Nagpou, city of the deccan of Hindoostan, capital of that part of Berar which is subject to a chief of the eastern Mahrattas. It is a city of modern date, but though extensive and populous, is meanly built, and, excepting a small citadel, is open and defenceless. It is 560 ms. W. by S. of Calcutta. Lon. 79 46 E., lat. 21 8 N.

Nagubanja, town of Hungary, celebrated for its gold and silver mine works, which are of great produce. It is a metal town, and one of the royal free towns, and is 30 ms. NE. of Tamar. Lon. 22 54 E., lat. 48 10.

NAGUR, or in different inflexions, *Nagar*, *Nagore*, *Nuggur*, &c., signifies "town," and terminates many East Indian names.

Nahant, peninsula of Mass., in the SW. part of Essex co., united to the main shore by Lynn beach. It is a delicious and much frequented summer retreat from the neighboring cities and towns, 14 ms. NE. from Boston.

Nahé, river of the palatinate of the Rhine, which, running by Birkenfeld, Oberstein, Kreuzenach, and Bingen, falls into the Rhine.

Nairn, borough and seaport of Scotland, the county town of Nairnshire, and seated at the entrance of the Frith of Murray, 10 ms. E. of Inverness, and 104 N. of Edinburgh. Lon. 3 51 W., lat. 35 33 N.

Nairnshire, small co. of Scotland, bounded on the N. by Murray Frith, on the E. and S. by Murrayshire, and on the W. by Inverness-shire. Its greatest length is not above 12 ms., nor its breadth above 10. It is fruitful, and its corn soon ripens; has several woods of firs, and several lakes and mountains, yet is well peopled. The chief town is Nairn. Pop. in 1801, 8,257; in 1811, 8,251; in 1821, 9,006.

Naksivan, city of Armenia, capital of a province of the same name. It is seated between the towns of Erivan and Taurus. Lon. 45 30 E., lat. 38 40 N.

Namari, mountains of Sicily, in the Val di Demona, between Messina, Taormina, and Melazzo.

Namfio, island of the Archipelago, the ancient *Anaphe*, a little to the E. of that of Santorini. It is 16 ms. in circumference, but has no harbor, nor springs sufficient to water the fields. The inhabitants are all Greeks, and their trade is in onions,

wax, and honey. The ruins of the temple of Iolo are yet to be seen, and consist chiefly of columns. Lon. 26 10 E., lat. 36 15 N.

Namptwich, town of Eng., Cheshire. It is built, and has a large church, in the form of a cross, with the tower in the middle. Here are warm springs, on the banks of a fresh water stream, which are made great quantities of white ale, which article and cheese this town carries on a considerable trade. The principal dairies of Cheshire are in its neighborhood. It is seated on the river, 26 ms. SE. of Chester, and 162 NW. of London. Lon. 2 25 W., lat. 53 6 N.

Namur, co. of the kingdom of Belgium, divided by the river Sambre and Maese into three parts, bounded on the N. by Brabant, on the E. and S. by the bishopric of Liege, and on the W. by Hainault. This province is pretty fertile, and has several forests, marble quarries, and mines of lead, and coal.

Namur, city of Belgium, capital of the county of Namur, between two mountains, at the confluence of the Maese and Sambre, 24 ms. W. of Liege, and 32 SE. of Brussels. Lon. 4 50 W., lat. 50 29 N.

Nanaguagus, small river in the SW. part of Washington co., Me.—Village on the precipitous bank, by post road 179 ms. NE. from Portland.

Naneeville, village, Harrison co., Ia., 10 miles S. from Indianapolis.

Nancy, city of Fr., capital of the department of Meurthe. It is divided by a canal into the old and new town. The first, though irregularly built, is rich and populous, and contains the palace of the ancient dukes of Lorraine; and their tombs, a rich saloon, which adjoins the church of the Cordeliers. The new town, whose streets are perfectly straight, was already one of the finest in Europe before the magnificent works with which Stanislaus I., titular King of Poland and Duke of Lorraine, enriched it. The cathedral is a superb structure. Nancy is seated in a delightful plain, on the river Meurthe, 92 ms. NW. of Basle, and 10 E. of Paris. Lon. 6 10 E., lat. 48 42 N.

Nander, town of Hindoostan, in the province of Dowlatabad, 132 ms. NNW. of Hydrabad.

Nandidroog, strong fortress of Hindoostan, in Mysore, 25 ms. N. by E. of Bangalore, and 10 ESE. of Sera.

Nangasaki, city of Japan, in the island of Kyushu, with a good harbor, and the only one in the empire in which foreign ships are permitted to trade. The inhabitants carry on a great trade with the Chinese and Dutch. The latter are never suffered to come into the city, unless when their ships arrive, and then they deliver up their guns and powder, as pledges of their good behavior. Lon. 1 46 E., lat. 32 32 N. According to Krusenster, he visited Nangasaki in 1804, that city stands on the bottom of a deep bay, W. side of the island of Kyushu. "The entrance of the harbor of Nangasaki is in N. lat. 32 44, and E. lon. 129 45, in the middle of the bay of Kiusiu, which is formed by Cape Nomo to the S., and Cape Sewrote to the N."

Mangira river.—See *Yungar*.

Nangis, town of Fr., in the dep. of Seine-et-Marne, 12 miles W. of Provins, and 14 miles S. of Melun.

Nanjemoy, town and port of entry on Nan

Charles co., Md., 45 ms. S. from Wash-
City.

Nankang, city of China, of the first class, in
province of Kiang-si, seated on the Lake Po-
637 ms. S. of Peking. Lon. 113 58 E.,
33 N.

Nanking, city of China, capital of the province
Kiangnan. It is the largest in China, being 17
miles distant from the great river Yangtse-Chiang,
of which canals are cut so large that vessels may
reach the town. It was formerly the imperial city,
and it was called Nanking, which signifies south-
ward; but since the grand tribunals have been
removed to Peking, it is called Kiang-nan in all
acts. The place is greatly fallen from its
former splendor; for it had a magnificent palace,
which is quite destroyed, as well as many ancient
temples; and a third part of the city itself is
ruined. The streets are narrow, but handsome
and well paved, and on each side are shops neatly
arranged. The public buildings are mean, except
the temples, the city gates, and a tower of por-
celain 200 feet high. They have several manufac-
tories in silk and wool. The number of inhabit-
ants is said to be 1,000,000, without comprehending
the garrison of 40,000 men. Here the physicians
of their principal academy. The inhabitants
were formerly estimated at 2,000,000, the city
measuring above 30 ms. in circumference. It is situ-
ated on the Kiam, 500 ms. SSE. from Peking. Lon.
115 5 E., lat. 32 46 N.

Nangnan, city of China, of the first rank, in
province of Kiang-si. It stands among plant-
ations of sugar cane, near the source of the Kan-
ton, and the foot of the mountain Me-lin, 200
ms. E. of Canton, and 900 SSW. of Peking.
Lon. 113 38 E., lat. 24 48 N.

Nangan-fou, beautiful and populous city of
China, in the most southern part of the province
Kiang-si; it is a beautiful, populous, and com-
mercial city, and much frequented. It contains
in its district 4 cities of the third class. It is 200
ms. by E. of Canton.

Nansemond, co., Va., bounded by Norfolk E.,
York co., N. C., S., Blackwater river, or South-
ampton SW., Isle of Wight NW., and Hampton
NE. Length 33 ms., mean width 20, area
667 sq. ms. Surface generally level, and in part
low. Drummond's pond, one of the feeders of
the James River, is in the SE. angle of
the county. Staples, cotton and tobacco. Chief
town, Suffolk. Pop. 1820, 10,494; and in 1840,
15,000. Central lat. 36 45 N., lon. W. C. 30'
—River of Va., rising in the central part of
James co., flowing NNE, about 25 ms.,
and emptying by a wide bay into James river and Hamp-
den co. It is navigable to Suffolk for vessels
of 100 tons.

Nantasket road, the southern entrance into Bos-
ton harbor. It affords good anchorage in from 5 to
10 fathoms water.

Nanchang-fou, city of China, capital of the
province of Kiang-si. It is the residence of a vice-
roy, and comprehends 8 cities in its district.

Nantes, ancient, rich, and very considerable
city of France, in the department of Lower Loire,
and the province of Bretagne. The bridges over
the Loire, in which are some islands, are almost a
mile in length. The suburbs are so large that

they exceed the city. The inhabitants are com-
puted at 60,000. Since the peace in 1783, Nan-
tes has had a considerable share in the commerce
with the U. S. Large vessels can come no higher
than Port Lunnai, where they are unloaded into
smaller vessels, which go up to Nantes, being a
distance of 12 ms. In 1796 the theatre here took
fire, during a time of performance, and several
persons lost their lives. Nantes is 58 ms. S. by
E. of Rennes, and 217 SW. of Paris. Lon. 1 45
W., lat. 47 13 N.

Nanticoke, creek of Broome co., N. Y., rises
between Chenango and Owego rivers, and falls in-
to the Susquehanna about midway between Owe-
go and Chenango point.—Post office on the pre-
ceding creek, 10 ms. NE. by E. from Owego.
—River of Md., on the eastern side of Ches-
apeake bay. It rises in Del., and runs nearly in a
SW. course through Dorchester co., (Md.) and
enters the Chesapeake on the S. side of Phillips's
point.—Hundred, Sussex co., Del., watered by
the Nanticoke river, from which it derives its
name, and on the W. and S. it joins Md.

Nantmill, East, one of the northern tps. of
Chester co., Pa., on the head waters of French
creek, 35 ms. NW. from Philadelphia.

Nantmill, West, tp., Chester co., Pa., adjoin-
ing the preceding, and the SE. angle of Berks,
and the NE. angle of Lancaster co., on the head
waters of the E. branch of Brandywine.

Nantua, town of France, in the department of
Ain, and late province of Bresse, situated at the
extremity of a great lake of the same name, 18 ms.
SE. of Bourg. Here Charles the Bold was in-
terred.

Nantucket, island of N. America, in Mass.,
the inhabitants of which have a considerable whale
fishery on the coast, and even in Greenland. It
lies to the S. of Cape Cod, and is a low, sandy,
barren island; the inhabitants depend almost entire-
ly on the sea for their subsistence. It contains
about 50 sq. ms., and forms a county with some
small islands. The employment of capital marks
the pursuits of the people; \$600,000 are employ-
ed in upwards of 30 spermaceti works. It con-
tains also two banks and two insurance companies.
Pop. 1820, 7,266; and in 1840, 9,112. Lat. 41
15 N., and lon. W. C. 7° intersect on the island
of Nantucket.

Nantucket, village and capital of the island of
Nantucket, situated on a basin, the N. side of the
island, in the lat. of 41 18 N., and lon. of 70 10
W., at the distance of 120 ms. SE. of Boston. It
is a port of entry. It has one fine harbor, com-
pletely safe from all winds, being so well land-
locked. It has only, however, at low water 7½
feet water on its bar.

Nantwich, town of Eng., in Cheshire; here are
salt springs, from which are made great quantities
of white salt, also a manufacture of cotton and
shoes. The principal dairies of Cheshire are about
this town, and it has a considerable trade in cheese.
It is seated on the Weaver, and by the Chester can-
al, which here forms a broad basin, 26 ms. SE.
of Chester, and 164 NW. of London.

Nan Yang, city of China, of the first rank, in
the province of Ho-nan, seated on a small river,
and surrounded by mountains, 100 ms. S. of
Ho-nan.

Nan-yong, city of China, of the first rank, in the province of Quantong, seated on the Pei-kiang, near its source, 170 ms. NNE. of Canton.

Napaul, country of Asia, bounded on the S. by Bahar, W. by Oude and Rohilcund, NW. by Sirinagur, NE. by the mountains of Himmalaya, which separate it from Thibet, and E. by Bootan. It is tributary to Thibet, and Catmandu is the capital.

Naples, kingdom, comprehending the S. part of Italy, bounded on the NW. by the ecclesiastical States, NE. by the Gulf of Venice, and everywhere else by the Mediterranean. The principal mountains are the Appennines, which traverse this country from N. to S., branching out to the two extremities, and the celebrated volcano Mount Vesuvius. The rivers are numerous, but inconsiderable; the chief are the Garigliano and Volturno. One of the greatest inconveniences to which the kingdom is exposed is earthquakes. The established religion is the Roman Catholic, and the clergy and convents, under the old government, possessed two-thirds of the whole kingdom; but Protestants and Jews are allowed to settle here. The inhabitants of this country have at all times borne but an indifferent character among other nations; gluttony is here a predominant vice, while instances of ebriety are comparatively rare.

Naples, ancient, large, rich, and trading city of Italy, capital of the kingdom of the same name, with a university. It is situated at the bottom of a bay, and is built in the form of a vast amphitheatre, sloping from the hills to the sea. Naples is admirably suited for commerce, and has all the necessaries and luxuries of life in great profusion, and yet trade is in but a languishing condition. The chief articles manufactured here are silk stockings, soap, snuff boxes of tortoise shell, or of the lava of Mount Vesuvius, tables and ornamental furniture of marble. The harbor, which is spacious, is protected by a mole. The bay of Naples is one of the finest in the world, being almost of a circular figure, about 30 ms. in diameter, shut out from the Mediterranean by the island of Caprea, and three parts of it sheltered by the circuit of woods and mountains. Naples was taken by the French in January, 1790, but retaken by the British fleet under Lord Nelson, in June following. In 1806 it was again taken possession of by the French, under Massena, and soon after Joseph Bonaparte was here crowned king of Naples. In 1803 the city suffered much damage by an earthquake. Naples is 110 ms. SE. of Rome, 104 NE. of Palermo, 217 SE. of Florence, and 300 S. by E. of Venice. Lon. 14 20 E., lat. 14 55 N. For Naples, see art. *Italy*, pp. 431, 435.

* *Statistics of Naples*.—The journals of the Two Sicilies published the following census of the population of Naples for 1835, drawn up in consequence of an order of the police ministers. The population of Naples, on the 1st of January, 1835, amounted to 335,386 inhabitants; on the 1st January, 1836, it was 357,283, of whom 166,727 were males, and 190,556 females; the increase was accordingly 1,897 individuals. In 1835 there were in Naples 14 centenarians, 2 men and 12 women, 3 of whom were 105 years old; 31 individuals had committed suicide in the course of that year. The population was divided as follows:

6,843 civil and 1,151 military officers, 2,200 long to public instruction, 3,096 lawyers, physicians and surgeons, 1,022 merchants, artists, and 105,355 mechanics and laborers.

Naples, tp. and village, Ontario co, N. Y. ms. S. from Canandaigua. Pop. in 1820, 18.

Naploose, or *Naplose*.—See *Nablous*.
Napo, river of S. America, rising in Quite flowing SE. falls into the Amazon. Lon. V 4 50 E., lat 3 45 S.

Napoleon, village, Ripley co., Ia., 89 ms from Indianapolis.

Napoli di Malvasia, seaport of European key, and capital of the island of Malvasia. a fine harbor, defended by a good citadel; long wooden bridge, which joins it to the land. It gives name to that excellent wine Malmsey, and was the ancient Epidaurus, for the temple of Æsculapius. It is seated rock, at the entrance of the Bay of Napoli d mania, 38 ms. SE. of Misitra. Lon. 22 E lat. 36 53 N. Napoli di Malvasia stands e site of Epidaurus Limera, a town of La The other city of Epidaurus, much more ger known, belonged to Argolis, and stood on t ronic gulf, opposite the island of Egina, in N 37 38. Epidaurus Limera stood on the e shore of the SE. peninsula of Laconia, N. 36 43.

Napoli di Romania, seaport of European key, in the Morea, on a peninsula, at the h a bay of the same name. It is inhabited by 60 Greeks, besides people of different nations has a large harbor, with a narrow entrance, d ed by a citadel. This town was taken t the Turks in 1715. It is 20 ms. SSW. of Co Lon. 22 44 E., lat. 37 44 N.

Nara, town of Japan, in the island of Ni, with a magnificent castle, 25 ms. NW. of Me

Narasinghapura, town of Hindoostan, i sore, with two considerable temples. It is b built, and stands in a fertile country, on t very, immediately below the influx of the K 20 ms. ESE. of Mysore.

Narberth, town of Wales, in Pembrokes on a hill, 12 ms. NE. of Pembroke, and 242 by N. of London.

Narbonne, city of France, in the dep. of In the time of the Romans, it was the cap of that part of Gaul called Gallia Narbonensis here the emperor Marcus Aurelius was born. Roman inscriptions, in different parts of the are still visible; and the canal from the river through the city, to the Mediterranean, was o by the Romans. Narbonne is famous for its t ey and the cathedral is remarkable for its noble at It is 5 ms. from the Mediterranean, and 80 E of Toulouse. Lon. 3° E., lat. 43 11 N.

Narborough, island of S. America, on the of Chili, so called because Sir John Narbor refreshed his men here, when sent to the m sea in the reign of Charles II. Lon. 74 3° V lat. 45° N.

Narcondam, barren rock rising abruptly e the Indian ocean, uninhabited, and seemingl titute of vegetation. It is about 20 leagues e the Andamans.

Nardo, episcopal town of Naples, in m d'Otranto. In this little town there are 8,00

ants; it is 20 ms. NW. of Otranto. Lon. 18 1, lat. 40 18 N.

Nenta, town of Turkey, in Dalmatia, with a 's see, seated on a gulf of the same name, 46 E. of Ragusa. Lon. 18 27 E., lat. 43 35 N.

Nalla, town of the Deccan, in the province Bar, 72 ms. E. of Burnampour. Lon. 77 34 21 25 N.

Ni, ancient episcopal town of Italy, in Sa- Here are the ruins of a marble bridge, built gustus, one of whose arches was 150 feet and 200 broad; as also of an aqueduct that ant water from a spring at the distance of 15 It contains a great many noble families, and ed on the Nera, 20 ms. SW. of Spoleto,) NE. of Rome.

ova, river of the Russian empire, which is om the Lake Peipus, and watering Narva, nto the Gulf of Finland, 8 ms. below that

It is noted for two picturesque water-falls, usy described by travellers, but far inferior of the Rhine, at Schaffhausen. The breadth river is about 200 feet, and the perpendicular of the falls scarcely exceeds 20 feet.

ragansett, beautiful bay of the U. S., in R. opens between Point Judith on the W., and et to the E., and extending from S. to N. , to the city of Providence, where it termi- and receives Pawtucket and some smaller

It varies in width from 1 to 15 ms.; and uered by R. I., Prudence, and Conanicut. f its minor bays, Mount Hope, receives on river from Massachusetts. The shores d, without being very elevated, and the ad- country picturesque and well peopled. It e opinion, in 1817, of the U. S. Navy com- mers, that this bay afforded the most eligible a naval depot NE. from the Chesapeake.

raguagus, bay of Washington co., Me., re- a small river of the same name, from the part of the co.—Town, Washington co., n the Narraguagus, 37 ms. W. from Ma-

rows, *The*, strait that separates Long Island taten Island, and unites the Atlantic with y of N. Y.

Nassau, *Grand duchy of*, State of Germany, bounded W. by the Rhine, separating it from Rhenish Prussia, N. by Rhenish Prussia, E. by Hesse Darmstadt and Wetzlar, and S. by the Rhine and Mayn, separating it from Frankfurt on the Mayn, and western Hesse Darmstadt. Very

unlike most other German States, Nassau is tolerably compact; length 60, mean breadth 30, and area 1,800 sq. ms., English; and, with an aggregate population of 340,000, has a distributive population of 190 to the sq. m., Eng. Nassau, in latitude, lies between 50° and 50 50 N. Slope westward, and traversed nearly centrally by the river Lahn. The reigning family claims the origin of their greatness into the 10th century; in 1180 they became counts, and now divided into two branches, one sovereign of Holland, and the other of Nassau itself, maintains dignity amongst the monarchs of Europe. The government is representative, composed of two houses, and the country flourishing in its active industry applied to agriculture, mining, manufactures, and commerce. Religion protected, and free to all sects.

The chief towns are—

Wisbaden	-	-	-	7,000
Nassau	-	-	-	2,000
Dillenburg	-	-	-	2,500
Wielburg	-	-	-	2,000
Limburg	-	-	-	3,000

Nassau, town of Germany, in the duchy of the same name, on the river Lahn, 12 ms. SE. of Coblenz. Lon. 7 42 E., lat. 50 18 N.—River of Florida, rising between St. John's and St. Mary's rivers, and flowing parallel to each, falls into the Atlantic ocean between Talbot and Amelia islands, after a comparative course of about 70 ms. Lat. 30 44 N., lon. 81 42 W.—NE. co. of Florida, bounded by St. Mary's river, separating it from Camden co., Ga., N. and W. by Columbia co., Florida, SW., Duval S., and the Atlantic ocean E. Greatest length 38 ms., mean width 15, and area 525 sq. ms. N. lat. 30 30, and 5° lon. W. W. C., intersect in this co. Pop. 1840, 1,892. Chief town, Nassau.—Capital of the island of New Providence. Lon. W. C. 50' W., lat. 24 55 N.—Town, Rensselaer co., N. Y., 15 ms. SE. from Albany. Pop. in 1820, 2,873.

Nata, or *Santiago de los Cabrellos*, city of N. America, in Veragua. Lon. W. C. 3 17' W., lat. 8 22 N.

Natal Coast, or *Caffraria Proper*.—See *Africa*, p. 28. col. 1st.

Natchez, principal town in the State of Mississippi, and the seat of justice for Adams co., lies upon the left bank of the Mississippi river, at lat. 31 33 N., and lon. W. C. 14 30 W. The site is a beautiful and commanding bluff, rising from 100 to 200 feet above the Mississippi river; and, by its peculiar location, is protected from the noisome exhalations of the adjacent low grounds. The edge of the bluff rises into a long narrow ridge, which renders the Mississippi river invisible from the streets of the town. It contains 280 dwelling houses, four places of public worship, one for Roman Catholics, one for Presbyterians, one for Methodists, and one for Baptists; six large warehouses, an elegant court house and jail, 25 dry good stores, two steam saw mills, and a steam aqueduct; a State bank, with a capital of \$900,000, having offices in Woodville and Port Gibson. This is the only banking institution in the State, and by its charter the faith of the State is pledged not to grant any other banking charter until 1840. The sessions of the supreme court, and of the district court in the U. S. are held at present at this place.

During about nine months of the year, from October to the ensuing June, Natchez is a very lively scene of commercial activity. Immense quantities of produce from the regions on Ohio, Mississippi &c., find here a ready and profitable market. Cotton shipped from this port in ordinary seasons exceeds 35,000 bales. The entire cotton shipped from the whole State in 1820-'21, was estimated at 80,000 bales; and that for 1821-'22, supposed to be at least equal to that of the preceding year.

The bills of mortality reported under the superintendence of the board of health, justify the opinion that Natchez is healthy for residents. In sultry summers, the greatest number of deaths amongst persons engaged on the navigation of the Mississippi river.

The following exhibits the actual and prospective pop. of this city:

1810	-	-	-	-	1
1820	-	-	-	-	2
1830	-	-	-	-	2
1840	-	-	-	-	3

Natchez is governed by a mayor, aldermen, and city council, with the ordinary co. justices of peace, who have, in ordinary civil and criminal jurisdiction, concurrent power with the aldermen. It is 322 ms. by water, and 156 by land from New Orleans, 1,613 below Pittsburg, 846 below St. Louis, and 670 below the mouth of the Ca.

Natchitoches, NW. parish of La., bounded by Texas SW. and W., State of Arkansas E., Washitau parish E., Rapides SE., and Opelousas S. Length 140 ms., mean width 75, and area 10,500 sq. ms. Surface generally hilly, particularly between Red and Sabine rivers. Earth near the margin of Red river, the soil is generally sterile, and covered with pine timber. Some of the best, though comparatively small tracts of productive soil, skirt the streams. An extensive body of low ground, subject to annual submersion, extends along Red river, and runs through this parish obliquely. The greatest part of the former inhabitants were settled on the alluvial banks of the river. Besides Red and Sabine, the rivers of Natchitoches are Bodcau, Dacheet, Black river, and Saline. Chief staples, cotton, lumber, and peltry. This description of Natchitoches was written when that parish included all the northwestern part of the State. The space was subsequently divided, and the northern part formed into the parish of Claiborne. The settlements are now extended over the whole surface, and the prospective pop. is shown as follows: In 1820, the whole surface then included in Natchitoches parish had on it 7,486 inhabitants; in 1840, what remained Natchitoches had 14,350; Claiborne, 6,185, and jointly, 21,535. Chief town, Natchitoches. Pop. in 1820, 7,486, and in 1840, 14,350. Central lat. 32° N., lon. W. C. 16 15 W.

Natchitoches, town and seat of justice, for the parish of Natchitoches, La., on the right bank of Red river, at lat. 31 10 N., lon. W. C. 1 10 W. The houses are chiefly contained in one street, running parallel to the river. Pop. about 600. It is 356 ms. NW. from New Orleans by land, through Attacapas and Opelousas, and 177 by water.

Natick, town, Middlesex co., Mass., 18 S. SW. from Boston. Pop. in 1820, 849.

Natividad, seaport of Mexico, in the province of Jalajara, on a bay of the Pacific ocean, 100 W. of Guadalajara. Lon. W. C. 27° W., 20 42 N.

Natolia, country formerly a part of Asia Minor. It is the most western part of Turkey in Asia, bounded on the N. by the Black sea, E. by Carania, S. by the Mediterranean, and W. by the Helipelago and the sea of Marmora. The soil is generally fertile, producing fruits of various kinds, corn, tobacco, cotton, and silk. It is crossed by a chain of mountains, formerly called Taurus, from W. to E., and watered by a great number of rivers. Kiutaia is the capital. Pop. about 5,000,000, composed of Turks, Greeks, Armenians, Jews, and other nations.

Nattam, town and fortress of Hindoostan, in the country of Madura, 18 ms. N. of Madura, 45 SSW. of Trichinopoly.

Nattore, town of Hindoostan, in Bengal, 47 ENE of Moorshedabad.

Natura, group of islands in the southern part of the Chinese sea. The island called Great Natuna, lies about 180 ms. NNW. from Point Api in Borneo, and 350 ms. NE. by E. of Singapore. Lat. 3 50, lon. 108 30 E. London.

Natural Bridge, village, Rockbridge co., Va., 15 ms. SSW. from Lexington, and 176 W. from Diamond.

Navan, town of Ireland, in the co., of Meath, situated at the conflux of the Blackwater with the Liffey, 25 ms. NW. of Dublin.

Navarin, seaport of European Turkey, on the coast of the Morea, with a large harbor, defended by two forts. In 1770, it was taken by the British. It is seated on a hill, 10 ms. N. by E. of Modon, and 17 WNW. of Coron. Lon. 21 E., lat. 37 2 N.

Navarre, kingdom of Europe, lying between France and Spain, and divided into the Upper and Lower. The Upper belongs to Spain, and is 120 ms. long, and 60 broad. Though a mountainous country, abounding in game and iron mines, some valleys produce good corn and excellent wine. It is divided into five districts, the chief towns are Pamplona, Estella, Tudela, Pampelona, and St. Guesca. Lower Navarre belongs to France, and is now the dep. of Lower Pyrenees. It is separated from Spanish Navarre by the Pyrenees, and is a mountainous barren country, 120 ms. long, and 12 broad. From this country the king of France takes the title of king of Navarre. See *Palais, St.*

Navarre, New, province of New Mexico, bounded on the N. by a country unknown, E. by the Mexico Proper, and New Biscay, S. by the Californias, and W. by the Gulf of California. The country was discovered by the Spaniards in 1520. The natives are robust and warlike, and are with difficulty brought to submission; they are in the use of bows with poisoned arrows, clubs of wood, and bucklers. The chief Spanish town is Saltillo.

Navarreins, town of Fr. in the dep. of Lower Pyrenees, seated on the Gave d'Oleron, 26 ms. S. of Bayonne.

Nauen, town of Brandenburg, in the middle of the Havel, 18 ms. WNW. of Berlin.

Nauherberg, town of Germany, in Lower Hesse,

situate on the Eider, 11 ms. WSW. of Cassel. —Town of Germany in the electorate of Mentz, 14 ms. WSW. of Cassel, and 36 SW. of Gottin- gin. It is seated on the Eder. —Town of Upper Saxony, capital of the duchy of Saxe Naumburg, seated on the Sala, 37 ms. NE. of Erfurt, and 60 W. of Dresden. Lon. 12 20 E., lat. 51 12 N.

Navesink. See Navesink-hills.

Navigator's Islands, a cluster of ten islands in the Pacific ocean, discovered by Bougainville, and explored by Perouse in 1787. They are called by the natives Opoun, Leone, Fanfoue, Maouna, Oyalava, Calinasse, Pola, Shika, Ossamo, and Ouero Opoun; the most southerly and easterly of these islands lies in lon. 169 7 W., lat. 14 7 S. Maouna, Oyalava, and Pola, may be numbered among the largest and most beautiful islands of the S. Pacific ocean. They combine the advantages of a soil fruitful without culture, and a climate that renders clothing unnecessary. The inhabitants are a strong and lusty race, scarcely a man to be seen among them less than six feet high, and the women are in proportion. See *Maouna*.

The following document, in regard to the Navigator's islands, was afforded in a letter from Lieutenant Charles Wilkes, dated Nov. 9, 1839: Harbor of Apia, island of Upoln, directed to the Secretary of the United States Navy. The element has been in some degree transposed, but literally copied. The reader will remark the total discrepancy of names, between those of the original article and those given by Lieutenant Wilkes.

	Sq. ms.
The island of Savii contains	- - - 2,700
The island of Upoln	- - - 560
The island of Jutnilla	- - - 240
The island of Monono	- - - 9

The island of Orasurga	- - - 24
The island of Ofoo	- - - 10
Total sq. ms.	- - - 3,641

Among the harbors of Jutnilla, that of Pago Pago is the safest. Of those of Upoln, that of Apia is the most central and best of that island; it is situated on the N. side, in lat. 13 49 S., lon. 171 41 W. London. Of those found on the island of Lavi, Mataatoo is the best; it is situated in lat. 13 28 S., lon. 172 20 W. of London. The harbors are formed by openings or breaks in the reefs which surround the islands, and although not of great extent, are commodious and safe, with the prevailing winds. The coasts may be approached with safety, as the reefs are visible, and the soundings regular. The mean temperature about 76 deg. The S. side of all the islands are cooler and more subject to rain and winds than the north, and do not afford so many harbors and shelters. Vessels visiting these islands can obtain complete supplies of hogs and vegetables. Water is abundant in all the harbors and easily obtained, particularly at Apia. These islands may be visited with safety, at all seasons of the year. From November to March they are most subject to bad weather, when variable winds

prevail. The islands of Upoln is the most central, and being connected with Monono, where the principal chief resides, has the ascendancy over the whole group. The group extends from lat. 13 49 to 14 18 S., and from lon. 169 13 to 172 46 W. London.

The inhabitants reside on or near the seacoast, although at Upoln there are several large villages in the interior. The population as given by Lieut. Wilkes is 56,000, of which he says "about two-thirds are said to be of the missionary or Christian party, and about 10,000 who read or write. Cannibalism is supposed never to have existed at this group."

While transcribing as much of Lieut. Wilkes' notes as were suitable to the Dictionary, the No. of the Foreign Missionary Chronicle for July, 1840, came to hand, containing an article headed "*Navigator's Islands*," and the epigraph "*Triumphs of the Gospel of Peace*"—the element afforded by the Rev. T. Heath. The subjoined geographical information I may add to the preceding:

Aana is one of the three large districts into which the island of Upoln is divided. It forms the westward end of that fine island; the central division of which is called Tumassaga, and the eastward Atna. About 4 miles to the westward of Aana is the small but influential island of Monono, and close to that Apolima its olo or fortress. Farther to the westward, about 12 ms., lies Savaii or Salafai, the largest of the Samour or Navigator's group.

In regard to cannibalism, Mr. Heath observes, "The reader will perhaps not be surprised on being informed that cannibalism was another accompaniment of their wars." Mr. Heath learned from repeated conversations with old and respectable chiefs, though they spoke on the subject with reluctance, that to a certain extent it did exist. The chiefs said "they learned it from Torga, that they never liked it, but that they had sometimes in war, or in seasons of great scarcity, satisfied their revenge, or their hunger, with human flesh; and it was no secret, that a powerful and luxurious chief has sometimes done so in times of peace and plenty." During the recent war, several human victims, particularly boys, were baked and eaten like hogs. Such is, however, 1838, the behavior and apparent character of the people, that a casual visitant would scarcely believe that eight years ago they had thus acted.

Naxkow, town of Denmark, in the Isle of Laland, with a harbor commodious for trade and a plentiful fishery. It is 60 miles SW. of Copenhagen. Lon. 11 31 E., lat. 54 52 N.

Naxos, or *Naxia*, considerable island of the Archipelago, 25 ms in length, and 88 in circumference. It abounds with orange, olive, lemon, cedar, citron, pomegranate, fig, and mulberry trees, and, though it has no harbor, carries on a considerable trade in barley, wine, oil, cheese, figs, cotton, silk, flax, salt, oxen, sheep, and mules. It is inhabited both by Greeks and Latins, has four archiepiscopal sees, and a great many villages; but the whole island does not contain above 8,000 inhabitants. The highest mountain is Zia, which signifies the mountain of Jupiter. This island was anciently famous for a sort of marble called ophitius, from its being spotted like the skin of a ser-

pent, with green and white spots. On the mountains near the coasts of the Mediterranean is found the best emery, whence the neighboring promontory is by the Italians called Cape Smeriglio. The S. side of the island is a town defended by a castle. About a gunshot from hence, is a marble tower on a rock, in the middle of a beautiful stately ruins of marble and granite, probably the ruins of Bacchus's temple. Lon. 26 10 E., 36 41 N.

Naxos, or *Naxia*, capital of the Isle of Naxos. The greatest part of the inhabitants are Greeks. Lon. 25 59 E., lat. 37 8 N.

Nazareth, town of Palestine, famous for being the residence of Jesus Christ, in the early part of his life. It is now nothing but a village, where the monks of St. Francis have a convent. Lon. 35 20 E., 32 30 N.

Nazareth, village in Northampton county, England, belonging to the Unitas Fratrum, or society of Friends. It is situated 10 miles N. of Bethlehem, 8 W. by N. of Easton, on the river Delaware, 53 N. of Philadelphia. In 1800, it contained 1,000 inhabitants, distinguished for their industry and regularity of manners.

Nazareth, Lower, tp., Northampton co., Pa., on the Monocacy creek, 7 ms. NW. from Easton.

Nazareth, Upper, tp., Northampton co., Pa., on the Bushkill and Monocacy creeks, 8 ms. N. from Easton.

Naze, or *Cape Linden*, the most southern promontory of Norway. Lon. 7 20 E., lat. 57 30 N.

Neagh, *Lough*, lake of Ireland, situated in the counties of Armagh, Down, Antrim, Londonderry, and Tyrone. It is the largest in Europe, those of Ladoga and Onega, in Russia, and that of Geneva, in Switzerland, excepted, being 20 miles long, and 15 broad.

Neath, corporate town of England, in Glamorganshire. It is situated on the Neath, over which is a bridge, where small vessels come to load coal. On the other side of the river are the ruins of a fine monastery, and in the neighborhood are several forges and smelting works for copper and coal mines. It is governed by a portreeve, who is sworn in by the deputy constable of the castle of Neath, situated near the Bristol channel, 32 miles NW. of Landaff, and 200 W. by N. of London. Lon. 45 W., lat. 51 43 N.

Neath, river of Wales, in Glamorganshire, which falls into the Bristol channel below the town of Neath.

Neb, river of the Isle of Man, which runs into the Irish sea at Peel Castle.

Nebio, or *Nebbio*, ruined city on the W. side of the island of Corsica.

Nebra, town in the circle of Upper Saxony, Thuringia. It is 12 ms. NW. of Naumburg. Lon. 11 26 E., lat. 51 13 N.

NEBULE, in astronomy, permanent cloudy or dusky spots in the heavens, the objects of unsatisfied wonder until revealed to us by aid of the telescope. Immense clusters of stars, most of them at such immeasurable distances from the solar system as to appear from the earth as dim undefinable spots. The galaxy, or milky-way, is one of these nebule, and our sun supposed, or rather conclusively shown, to be one of its stars. It appears from the catalogues recently made by Sir John F. Herschel,

more than 2,500 of these nebulae are now known to exist. One fact may enable us to appreciate the unfathomable remoteness of these bodies, or rather aggregations, that, in every annual revolution of the earth, we advance to and recede from many without even, through the best telescopes, their appearance being changed by our change of place the whole diameter of the earth's orbit, or hundred and ninety million of miles. Recently, John Herschel has examined the southern nebulae, and added immensely to the catalogue of stars. Sublime and elevated as is the science of astronomy in all its parts, in no other does it expose more phenomena to exercise the faculties of man and excite his highest admiration than on the nebulae.

Neckar, river of Germany, which rises in the Black Forest, crosses the kingdom of Wirtemberg to the palatinate of the Rhine, and falls into the sea at Manheim.

Neckars-Gemund, town of Germany, in the palatinate of the Rhine, seated on the Neckar. Lon. 9° E., lat. 49 26 N.

Neckars Ulm, town of Germany, in the circle of Franconia, seated on the Neckar. It belongs to the grand master of the Teutonic order. Lon. 9° E., lat. 49 22 N.

Nedroma, city of Algiers, remarkable for its magnificent ruins. Lon. 38' W., lat. 35 40 N.

Needham, town of England, in Suffolk, on the coast, and has some trade in Suffolk-blues and silks; and women are employed in spinning and weaving bone lace. It is 10 miles NW. of Ipswich, and 73 NE. of London. Lon. 1 23 E., lat. 51 5 N.

Needham, tp., Norfolk co., Massachusetts. It is situated between Newton and Natick, 12 miles from Boston.

Needles, two rocks of England, in Hampshire, at the Isle of Wight, so called from their sharp points.

Necheheow, or *Nihaur*.—See table, p. 115, 2d column. One of the Sandwich islands, 5 leagues from Atooi. The E. coast is high and rises abruptly from the sea, the rest of it consists of low ground, except a round bluff head on the SE. It produces plenty of yams, and contains about 10,000 inhabitants.

Neerwinden, village of the kingdom of the Netherlands, a little N. by W. of Landen.—See *Landen*.

Nefta, town in the kingdom of Tunis, 250 ms. W. of Tunis. Lon. 9 25 E., lat. 33° N.

Negapatam, city of the peninsula of Hindoostan on the coast of Coromandel. Negapatam is 83 miles S. of Madras. Lon. 79 56 E., lat. 10 61 N.

Negambo, seaport on the W. coast of the Isle of Ceylon. Lon. 83 46 E., lat. 7 30 N.

Negrais, seaport and cape on the east side of the Bay of Bengal, 240 miles WSW. of Pegu. Lon. 93 4 E., lat. 15 50 N.

Negril Point, most westerly promontory of the island of Jamaica.

Negro Cape, promontory of Africa, on the W. coast of Angola, being the most southerly country to which the Europeans usually resort to purchase slaves. Lon. 10 40 E., lat. 15 54 N.

Negro Rio, large river of South America, rises

in the Andes. Lon. W. C. 3° E., lat. 2° N. It flows SE. by E. by comparative courses 1,000 ms., and falls into the Amazon at lon. W. C. 17° E., lat. 3° S. By one of its branches, the Cassiquari, it has a communication with the Orinoco. —River of South America, rising in the Andes of Chili. Lon. W. C. 7° E., and lat. 33° S. It flows SE., and falls into the Atlantic ocean after a comparative course of 500 miles.

Negro's Island, one of the Philippine islands, between Pannay and Zebu.

Negroland, or *Nigritia*, country of Africa, through which the river Niger is supposed to run. It has the great desert of Zahara on the north, and stretches far to the south, but the inland parts are very little known. The Europeans have many settlements on the coast, where they barter European goods for slaves, gold dust, and elephant's teeth.

Negroponte, *Island of*, is ancient *Eubœa*, extends along the ancient Attica, Bœotia, and the country of the Opuntian Locriano, about 100 English ms, with a mean width of not above 10 ms. Its area perhaps 1,000 sq. ms. The surface very much diversified; in some places long alluvial flats, and in others rising into high mountains. This is considerably the largest and most important island in the Archipelago. When under the Athenians, it was regarded as the granary of that republic, and, in every succeeding age, its possession has been regarded as a great national advantage. When the maritime power of Venice supplanted that of the Romano-Greek empire, Negroponte, with Candia and several other islands, fell under the power of the former. Mahomet the II wrested it from the Venetians, who yet retain the vain memorial of former greatness, the standard of the kingdom of Negroponte. This island must ever remain highly valuable from the fertility of its soil and from its commanding position. It is, however deficient in good ports. Negroponte lies between N. lat. 38, and 39 5.

Negroponte, *Straits of*, is more particularly confined to what was in former times the narrowest part of the sheet of water, separating the island of Eubœa from the continent of Greece. This would intend the narrow channel opposite the village of Negroponte; but in this article it is my wish to notice the entire strait from the gulf of Zeitoun SE. into the Archipelago. The entire distance from the extreme NW. angle of the island of Negroponte, to a line drawn from the port of Prasiæ, modern Raphiti, to Cape Rosso, ancient Petalia, is within a trifle of 100 English ms. Within these limits the strait is of very unequal width. From Raphiti to Cape Rosso is about 15 ms.; from this line the strait narrows to Negroponte, where it is less than a half a mile. Beyond Negroponte the water abruptly widens, and, varying from 5 to 10 ms. in breadth, finally terminates in the Gulf of Zeitoun. The shallowness of the water renders the Negroponte of little use as a channel of navigation, though used as such by the small vessels belonging to the inhabitants of the coasts. Though not augmented by the water of the Atlantic ocean, nor perhaps much influenced by the ordinary causes of ocean tides, the Straits of Bonifacio, between Corsica and Sardinia, the Straits of Messina, between Sicily and Italy, and more particularly the

Negroponte, exhibit phenomena which prove a constant variation of surface in the Mediterranean. Long before the days of Aristotle, and down to this time, the ebbing and flowing of the Euripus have arrested attention. From the observations of Wheeler, Hobhouse, and others, and from the natural position and features of its shores, we may very safely consider the very unequal and irregular fluxes of the Negroponte as occasioned principally by wind.

Negropont, strong city, capital of the island of the same name, 30 ms. NE. from Athens, and 260 SW. from Constantinople. Lat. 38 30 N., lon. 24 E.

NEGROPONTE arises from an Italian corruption of three Greek words, and means "the sea of Euripus."

This traveller made a very rapid visit to the town and straits, and viewed the latter from the wooden bridge which unites the continent of Livadia to the island of Negroponte, ancient Eubœa, and has given a confused and unsatisfactory account of what he saw during his brief stay. In one place he observes, "What I saw of Euripus was, that the stream flows with violence, like a mill race, under the bridges; and that a strong eddy is observable on that side from which it is about to run, about a hundred yards above the bridges; the current, however, not being at all apparent at a greater distance either N. or S., yet the ebbing and flowing are said to be visible at 10 or 12 leagues distance at each side of the strait, by marks shown of the rising and falling of the water in several small bays on both coasts. The depth of the stream is very inconsiderable; not much more than four feet. Negroponte stands on a broad flat peninsula, which, projecting into the bays on the main-land, makes the winding of the strait, in some places, look like inland lakes; in others, like rivers, as the breadth enlarges or diminishes. The Bœotian side is high and rocky, where the fort of Carababa has been built, to command the bridge and village. Negroponte contains about 800 mean, low built houses, inhabited by Turks. The mountains to the NW. rise to the region of perpetual snow. The land to the N. and E. of the town is open but well cultivated, that to the S. covered with fine groves of olive trees, and interspersed with orange and lemon gardens. The place is considered extremely unhealthy, and during the summer the heats are almost insupportable."

Nevahand, or *Nohawand*, ancient town of Persia, in Irac Agemi, famous for a battle fought near it, between the calif Omar and Yez Degerd, king of Persia, in A. D. 638, when the latter was defeated and lost his kingdom. It is 170 ms. NW. of Ispahan. Lon. 47 10 E., lat. 32 20 N.

Neidenau, town of Germany, in the electorate of Mentz, situated on the Jaxt. It is 33 ms. ESE. of Heidelberg.

Neidenberg, town of Prussia, with a castle, on a mountain, 75 ms. E. of Culm.

Neilston, village of Scotland, in Rensfrewshire, to the S. of Paisley. It is noted for a cotton manufactory. Lon. 4 20 W., lat. 55 22 N.

Neisse, town of Silesia, surrounded by thick walls and deep ditches. The inhabitants carry on a considerable trade in linens and wine. It is

seated on a river of the same name, 27 ms. N. of Glatz, and 35 SE. of Breslaw. Lon. 17 E., lat. 50 31 N.

Neiva, province of Colombia, in New Granada with a town of the same name. The province lies on both sides of the Magdalena. Neiva, the city is about midway between Popayan and Santa de Bogota.

Nellenburg, town of Suabia, capital of a large tract of the same name, 20 ms. N. of Constance, and 20 NE. of Shaffhausen. Lon. 9 E., lat. 47 59 N.

Nelson, English settlement in N. America, the W. side of Hudson bay, at the mouth of river Nelson, 250 ms. SE. of Churchill fort. belongs to the Hudson Bay Company, who carry on a great trade in beaver and other skins. Lon. 92 35 W., lat. 57 7 N.—Tp., Buckingham Co., L. C., 35 ms. SW. from Quebec.—Tp., York Co., U. C., on Lake Ontario—Town, Chester Co., N. H., 33 ms. SW. from Concord. Pop. 1820, 907.—Town, Madison Co., N. Y. Pop. in 1820, 2,329.—Co., Va., bounded by Jarvis river or Buckingham SE., Amherst SW., the Blue Ridge, or Rockbridge and Augusta NW., and Shenandoah NE. Length 23 ms., mean width area 345 sq. ms. Besides being washed by Jarvis river, it is drained by Rock Fish and Tye rivers. Surface pleasantly diversified by hill and dale. Warminster, the chief town, is about 60 ms. little N. of W. from Richmond. Pop. in 1810, 137; and in 1840, 12,287. Lat. 37 44 N., lon. W. C. 1 47 W.—Co., Ky., bounded N. and SE. by Washington, S. and SW. by Rolling fork of Salt river or Hardin, NW. by Bullitt, and N. by Salt river and Shelby. Length 30 ms., mean width 17, area 510 sq. ms. It extends from the Rolling to the Main fork, and is traversed by the Beech fork of Salt river. Chief town, Bairdstown. Soil productive. Pop. 1820, 16,273. Lat. 37 49 N., lon. W. C. 8 W.—Village and NE. tp., Portage co., Ohio.

Nelson's Ferry, post office, 50 ms. N. of Charleston, S. C.

Nelson's Fort, a British factory, at the mouth of Nelson's river. Lon. W. C. 15 4 W., 57 12 N.

Nelson's River, large river of N. America, in Cabotia or British America. According to all maps, it is very difficult to determine either its length or real source of either the Nelson or St. Lawrence rivers; both are made to be outlets of Lake Winnipic, and consequently the Assiniboine and Saskatchewan are the common sources of both the former streams. Taken as a whole these waters form the third largest river system of America, draining an area of upwards of 1,000,000 400 ms., or 400,000 sq. ms.

Nelsonville, village, Athens co., Ohio, on the hocking river, 14 ms. W. from Athens.

Nehema, name of two small rivers of the U. S., falling into the Missouri between the Plateau and Kansas rivers.

Nemæa, village of the Morea, famous for the Nemæan games anciently celebrated here.

Nemours, town of Fr., in the dep. of Seine et Marne, and late province of the Isle of France, between two hills. It is seated on the Loing,

S. of Fontainebleau, and 15 SE. of Paris.
Lon. 2 37 E., lat. 48 16 N.

Nen, the principal river of Northamptonshire, which rises in the W. part of the co. It is made navigable at Northampton, leaves the co., at Peaborough, and, crossing the Isle of Ely, forms part of the W. boundary of Norfolk, and falls into the Lincolnshire Wash. It likewise communicates by several channels with the Great Ouse.—River, U. C., empties itself into Lake Ontario, in the tp. of Pickering; it runs for a considerable distance in the country through Pickering, Markham, &c., crossing the Yongestreet, and apparently rising in the vicinity of one of the branches of Holland's river, with which it will probably, at some future period, be connected by a canal. This river abounds with fish; at its mouth are good intervals for meadow ground; and it is the back communication from the German settlement in Markham to Lake Ontario.

Nevacastro, fort of Turkey, in Europe, in Romania, where the Turks always keep a good garrison. It is seated in the middle of the strait of Constantinople, 12 ms. from that city. Lon. 29 4 E., lat. 41 10 N.

Neot's, St., town of Eng., in Huntingdonshire. It is a well built town, with a trade in coal. It is seated on the Ouse, over which is a fine stone bridge, 20 ms. WSW. of Cambridge, and 56 W. of London. Lon. 0 30 W., lat. 52 7 N. *Νεοφύτης*, from the Greek νεοφύτος, literally *born*, and applied to pagans or others who received their own religion, and, embracing the Christian, were baptized, and were regarded as spiritually *new-born*.

Nippanose, Lycoming co., Pa.—See *Nippenose*. *Nipaul*, long, narrow kingdom of northern Hindustan, bounded on the N. by the Himalaya mountains, S. by Bahar Oude and Delhi, and E. by Benares. Capital, see *Napani*.

Nippan Island, island of the S. Pacific ocean, opposite Port Hunter, on the S. coast of Norfolk Island, consisting entirely of one mass of sand, and together by the surrounding cliffs, which are composed of hard rocks. The surface was covered with a kind of coarse grass, and upwards of 300 pines were growing on it.

Nippan, tp. in the eastern district, is the eighth in ascending the Ottawa river, and the first tp. on the W. side of the river Rideau, U. C.

Nipissingu.—See *Nipissing lake*.

Neponset, creek of Boston harbor, navigable 4 ms. to Milton, for vessels of 150 tons.—Village on both sides of Neponset river, 6 ms. S. from Boston.

Nepesin, ancient town of Italy, in the patrimony of St. Peter, with a bishop's see, seated on the Trivulzio, 20 ms. N. of Rome. Lon. 11 34 E., lat. 42 47 N.

Nerac, town of Fr., in the dep. of Lot and Garonne, and late province of Guienne. It is situated on the river Baise, which is navigable here, and is divided by that river into great and little Nerac. In the 16th century, the greatest part of its inhabitants embraced the reformed religion, but were obliged to surrender to Louis XIII. in 1621. It is 20 ms. SW. of Agen, and 380 S. by W. of Paris. Lon. 0 13 E., lat. 44 2 N.

Nerbudda, river of India, which issues from the

southern confines of the province of Allahabad, forms the boundary between Hindoostan proper and the deccan, and falls into the Gulf of Cambay, below Baroach. The higher constituent streams of the Nerbuddah interlock with those of the same branch of the Ganges and with those of the Mahanuddy, but pursuing a western course along or about the mean lat. of 22°, the former flows through a deep vale between the Santpoora and Vindhya mountains, and, as already stated, enters the bay of Cambay, after a comparative course of 600 ms.

Nericia, a subdivision of Sweden proper, bounded on the N. by Westmania, on the E. by Sudermania, on the S. by East Gothland, and on the W. by West Gothland. Orebo is the capital, and the most considerable place in it.

Nero, island of the East Indies, the second of the Banda islands, where the Dutch have a fort called Fort Nassau. Here are large serpents, but not venomous, and the mountains are covered with trees, in which are birds of a very singular kind. Lon. 129 45 E., lat. 4 40 N.

Nerchinsk, one of the four provinces of the Russian Government of Irkutsk. Its capital, of the same name, is seated on the Nertcha, which falls into the Selilka.

Nescopeck, river, Luzerne co., Pa., which rises in the southern part of the county, and flows nearly W. into the Susquehannah, opposite the town of Berwick.

Nescopeck mountain, on the N. side of Nescopeck creek, is a range nearly of the same height with those of Wyoming, and parallel to them. It forms a regular and almost unbroken ridge, nearly destitute of timber on its summit; it extends from the Susquehannah nearly to the Lehigh.

Nescopeck, tp., Luzerne co., Pa., on the left bank of Susquehannah river, above and below Nescopeck creek. Pop. in 1820, 1,034.—Village, Luzerne co., Pa., on the left bank of Susquehannah river, above the mouth of Nescopeck creek, and opposite Berwick.

Neshaminy, river, Bucks co., Pa., rising with the Tohican and Perkiomen, and, flowing SE., falls into the Delaware in the SE. angle of the co., 4 ms. below Bristol.

Neshanock, large creek rising in the central part of Mercer co., Pa., and, flowing SW., falls into Big Beaver below the village of New Castle, on the border of Beaver co.—Tp., Mercer co., Pa., above the mouth of Neshanock creek. Pop. in 1820, 1,828.

Nesle, town of Fr., in the dep. of Somme, and late province of Picardy. It is seated on the Lingon, 8 ms. NE. of Royes, and 66 N. by E. of Paris. Lon. 2 59 E., lat. 49 51 N.

Ness, Loch, beautiful lake of Scotland, in Inverness-shire, 22 ms. in length, and, for the most part, 1 in breadth, though sometimes 2. It is sheltered on the NW. by the high mountains of Urquhart and Mealfourvoney, and edged with coppices of birch and oak.

Nestorian Christians.—See *Koordistan*.

Nershinsk, town of Siberia, capital of a province of the same name, but sometimes called Daouria, in the government of Irkutsk, with a fort. The adjacent country is mountainous, but yields excellent pasture for cattle; and there are some considerable lead and silver mines. It is seated at the

conflux of the Nercha with the Shilka, 440 ms. E. of Urkutsk. Lon. 117 34 E., lat. 51 52 N.

Natchez, river of Texas, rises at lat. 32 0 N., and lon. W. C. 17 30 W. It is formed by several branches, the principal of which are the Ayeish, Attoyeaque, Attascocito, Cariso, Nana, and Angeline. It flows a little E of S., and falls into Sabine lake, after a comparative course of about 170 ms. The country drained by the Natchez, though generally sterile, is yet superior to that watered by the Sabine. This river is often called, though erroneously, Rio Nieves, or Snow river. Its name is derived from a tribe of Indians.

Netherlands, or *Low Countries*, country of Europe, anciently called Gallia Belgica, 260 ms. in length, and from 100 to 200 in breadth, bounded on the W. and N. by the German ocean, E. by Germany, and S. by France. In the 9th century, the sons of Emperor Lewis the Pious, having divided the domains of their father, who possessed Germany, France, and Italy, a new kingdom was formed, comprehending Germany and France and a part of the Netherlands. It was called Lothario, but did not long subsist, for it was soon divided into two; and that seated near the Mediterranean was called the kingdom of Burgundy, while the other, to the N., had the name of Austrasia. Neither did this last continue long, it being divided into 17 provinces, under different names, exclusive of the territories of Liege and Upper Guelderland; but they still depended on the empire of Germany, and were called Lower Germany. In process of time, the house of Burgundy purchased many of them, and was about to form them, with Burgundy, into a kingdom, but Charles the Bold, the last duke of Burgundy, being killed by the Swiss in 1477, his part of the Netherlands devolved on Mary, his only child, by whose marriage with the emperor Maximilian the Netherlands were an acquisition to the house of Austria. Emperor Charles V., King of Spain, in 1555, abdicated the sovereignty of the Netherlands, and, soon after, the Spanish crown, in favor of his son Philip. The tyranny of this cruel bigot, Philip II., who endeavored to introduce the inquisition into the Lower Countries, with the barbarities exercised by the Duke of Alva, exasperated the people to such a degree that they threw off the Spanish yoke, and, under the conduct of William I., Prince of Orange, formed the famous league of Utrecht, in 1579, which proved the foundation of the republic of the seven United Provinces. After a long war, (with the interval of a truce of twelve years,) Philip IV. expressly acknowledged the independence of these provinces, by the treaty of Westphalia, in 1648. The other 10 provinces, namely: Brabant, Antwerp, Malines, Namur, Limburg, Luxemburg, Hainault, Flanders, Artois, and Cambresis, remained under the dominion of Spain, but with very favorable stipulations with respect to their ancient liberties. On the accession of a branch of the house of Bourbon to the Spanish monarchy, it was stipulated, in 1714, that the Spanish Netherlands should return to the German branch of the house of Austria; but some considerable parts were obtained, by conquest or cession, by the French and Dutch. The Dutch had part of Brabant, Limburg, and Flanders; the French had Artois and Cambresis, with part of

Hainault, Flanders, and Luxemburg; Austria the rest; and the provinces of Antwerp and lines were included under the name of Austrian. In 1788, Emperor Joseph II. having rejected many innovations, and, enforcing them with violence, a universal spirit of revolt broke out, an army of 40,000 men rose, as if by magic, to support the renunciation of all allegiance, which several of the provinces openly made; a congress formed from the different States, in whom the supreme Government was vested, and, by the treaty of 1789, the Austrians were expelled. The Government, however, was not of long duration, for Leopold II. (the successor of Joseph) was obliged, partly by conciliatory measures, and partly by the mediation of Great Britain, Prussia, and Holland, to recover the entire possession of the Netherlands, the mediating courts having guaranteed the restoration of the ancient Belgic constitution. In 1792, the French overran the Austrian Netherlands; they were driven out of the country in 1794, but they returned in 1794, and subdued every part of it, and in 1795 decreed it, with the territory of Leige and Upper Guelderland, an integral part of the French republic. To this country they restored the name of *Belgium*, and divided it into several departments; but in 1814, agreeably to the treaty of Paris, they evacuated all that part which formerly belonged to Austria and Holland. The Netherlands, or Belgium, is 170 ms. long and 90 in breadth, bounded on the N. by Holland, E. by Germany, SW. by France, and NW. by the German ocean. The principal rivers are the Scheldt, Meuse, Sambre, and Lis, and there are many fine navigable canals. The air is temperate, and the soil extremely fertile, but the mouths of the rivers and harbors are frozen in winter. Brussels is the chief town.—See *Holland*, or *Dutch Netherlands*.

Netherlands, recent kingdom of Europe, formed in 1814, and containing 17 provinces, or 18, the grand duchy of Luxemburg is included. It lies between lat. 49 30 and 53 34 N., and between lon. 2 30 and 7° E. from London. It is bounded N.W. by the German ocean, SW. by France, and E. by Germany. Area 24,400 sq. ms., inhabited by an aggregate population of 5,270,000, or 135 to the sq. m.

Its provinces were:

Holland	-	-	-	75 00
E. Flanders	-	-	-	60 00
W. Flanders	-	-	-	52 00

5,270,000

have inserted the preceding as explanatory of actual condition of the Netherlands, and may refer the reader to the articles *Holland* and *Belgium*. It may be observed that the people of the Prussian and Dutch provinces, and those now included in Belgium, different in language, religion, and manners, were never cordially united under one sovereignty.

Vetschkau, town of Upper Saxony, in Voigtland, situated on the Golsch, 12 miles SW. of Weickau.

Vethon, peak of.—See *Maladetta*.

Nettuno, town of Italy, in Campagna di Roma, near the ruins of the ancient Antium, at the mouth of the Loricina, 24 ms. S. by E. of Rome.

Neva, river of Russia, which issues from the Lake Ladoga, and flows to Petersburg, where it divides into several branches, and enters the Gulf of Finland at Cronstadt. It is formed by the drainage of the vast low country NE. from St. Petersburg, and conveys to the Gulf of Finland the waters of the Lakes Ladoga, Onega, and many others. It is commonly called the Neva between Lake Ladoga and the Gulf of Finland, and is a mere strait of about 100 ms. in length.

Nevada, *Sierras de*, chain of mountains in the West of Spain. Wherever the adjective Nevada is applied to Spanish mountains, it signifies that they are covered with perpetual snow. The Sierra Nevada, of Granada, rises in one peak, the Mont Hassen, to 11,250 feet, and in another, the Monteta, to 10,985 feet above the ocean level. The Mont Hassen is the highest mountain in Europe, and is situated on Mount Blanc.

Neuburg, fortified town of Bavaria, capital of the principality of the same name. It stands on a hill on the Danube, and has two gates, but the fortifications are chiefly gone to decay. The castle is a large building, and contains a hall of extraordinary size, embellished with portraits. It is 32 ms. NNE. of Augsburg, and 60 SW. of Amberg, Lon. 11 13 E., lat. 48 43 N.—Town of Bavaria, seated on the Schwarza, 17 ms. ESE. of Amberg.—Town of Suabia, in Brisgau, seated on the Rhine, 12 ms. S. of Brisach.—Town of Suabia, in the kingdom of Wirtemberg, seated on the Enz, 25 ms. W. of Stutgard.

Neuchateau, town of Fr., in the dep. of Vosges, seated in a soil fertile in corn and good wine, on the river Meuse, 25 ms. SW. of Nancy.

Neuchatel, territory of Switzerland, which, with that of Valleggin, forms one principality, between the Lake of Neuchatel and the borders of France, extending 36 ms. from N. to S., and 18 in its greatest breadth. By the death of the duchess of Savoy, in 1707, the sovereignty of Neuchatel and Valleggin was claimed by Frederick I., of Prussia, as heir to the prince of Orange, and his claim was acknowledged by the States of the country.

Neuchatel, town of Switzerland, capital of a principality of the same name. It contains not more than 3,000 souls, and is situated partly on the plain between the Lake of Neuchatel and the Jura, partly on the declivity of that mountain. The chief article of exportation is wine, which is much esteemed, and produced from the vineyards in its vicinity; and there are here manufactures of printed linens and cottons. Among the many

public works which have been lately executed here are the new town house a superb causeway leading towards the valley of St. Imier. Neuchatel is governed by a great and little council. The first is composed of 40 persons; the second consists of 24 members, comprehending the mayor, who is president. It is 25 ms. NE. of Lausanne, and 25 W. of Bern. Lon. 7° E., lat. 47 5 N.—See article *Switzerland*.

Neuchatel, or *Yverdun*, lake of Switzerland, which takes its name from a town of the same name, stretches about 20 ms in length from the town of Yverdun to that of Neuchatel, in a direction from SW. to NE., at which extremity it has a communication with the Lake of Bienné by a narrow outlet, and is 17 ms. long and 5 broad.

Nevern, village of Wales, in Pembrokehire, near a river of the same name, one mile NE. of Newport. There are several monuments of antiquity in this parish, and among the rest a single stone, of a square form, 13 feet high and 2 broad, with a circular top, charged with a cross, and all the sides are neatly carved with knot work of various patterns.

Nevers, considerable episcopal town of Fr., in the dep. of Nievre, and late province of Nivernois, seated on the Loire, over which it has a handsome bridge. The town is built in the form of an amphitheatre, containing many elegant buildings, among which is the ancient palace in which John Cassimer, king of Poland, expired in 1672. It is 145 ms. SE. of Paris. Lon. 3 14 E., lat. 46 59 N.

Neufchatel, town of Fr., in the dep. of Lower Seine, and late province of Normandy, noted for excellent cheese, commodiously seated on the river Arques, 20 ms. SE. of Dieppe, and 75 NW. of Paris. Lon. 1 30 E., lat. 49 46 N.

Neufchateau, town of Austrian Luxemburg, 27 ms. WNW. of Luxemburg. Lon. 5 30 E., lat. 49 53 N.—Commercial town of Fr., in the dep. of the Vosges, and late province of Lorraine. It is seated in a soil fertile in corn, wine, and all the necessaries of life, on the river Mouzon, 25 ms. SW. of Nancy, and 150 E. by S. of Paris. Lon. 5 47 E., lat. 48 24 N.

Neuhaus, strong town of Bohemia, in the circle of Bechlin, with a castle. Lon. 15 30 E., lat. 48 9 N.—Town of Germany, in the circle of Lower Saxony and duchy of Bremen. It was once a place of great trade, and had a commodious harbor at the mouth of the Oste; but a sand bank accumulating in it at the issue of the Oste into the Elbe, its trade was almost annihilated, and it is now of much less consequence than formerly. It is 19 ms. NNW. of Slade. Lon. 8 27 E., lat. 53 52 N.

Neuhausel, strong town of Upper Hungary, seated in a marshy plain, on the river Neytracht, 15 ms. NW. of Comora, and 40 SE. of Presburg. Lon. 18 10 E., lat. 48 1 N.

Nevin, or *Newin*, town of Wales, in Carnarvonshire. It is seated on the Irish sea, 20 ms. S. by W. of Carnarvon, and 249 WNW. of London. Lon. 4 25 W., lat. 52 52 N.

Nevillsville, village, Clermont co., Ohio, containing about 200 inhabitants, 30 ms. above Cincinnati.

Nevis, one of the leeward Caribbee islands, in

the W. Indies, divided from the E. end of St. Christopher's by a narrow channel. It has but one mountain, which is in the middle, very high and covered with large trees up to the top. Here are springs of fresh water and a hot bath, much of the same nature as those of Bath, in Eng. It is a small island, but very fruitful, and subject to the English. Charleston is the capital.

Neumark, town of Transylvania, on the river Merisch, 56 ms. N. of Clausenburg. Lon. 23 35 E., lat. 47 15 N.—Town of Germany, in the circle of Bavaria, 30 ms. NNW. of Ratisbon. Lon. 12 25 E., lat. 49 18 N.

Neus, river of N. C., which enters Pamlico sound, below Newburn, where it is a mile and a half broad. It rises in Person co., interlocking sources with Dan river branch of Roanoke, and, flowing 100 ms. SSE. through Granville, Orange, Wake and Johnson, enters Wayne co. Here it turns SE. by E. 80 ms. through Wayne, Lenoir and Craven cos., opens by a wide estuary in Pamlico sound. The tides ascend 10 or 12 ms. above Newburn, and for boats this river is navigable to Raleigh.

Neusaltz, town of Silesia, in the principality of Glogau, 12 ms. NW. of Glogau.

Neusidle, town of Hungary, 24 ms. SW. of Presburg, situated on a lake of the same name.—Lake of Hungary, 25 ms. long and 6 broad. It is 16 ms. SSW. of Presburg, almost surrounded by fens, and has in its vicinity the castle of Esterhazy, which is said to rival the palace of Versailles in pomp.

Neusol, town of Upper Hungary. In the adjacent mountains are the greatest copper mines in Hungary. It is seated on the Gran, 22 ms. N. by E. of Schemnitz.

Neustadt, town of Austria. It has the staple right over all goods coming from Italy, and stands on the frontiers of Hungary, 28 ms. S. by W. of Vienna. Lon. 16 18 E., lat. 47 50 N.—Town of Franconia, capital of the lower part of the principality of Bayreuth, with a castle. The library belonging to the church contains many curiosities. It stands on the river Aisch, 32 ms. ESE. of Wurtzburg. Lon. 10 43 E., lat. 49 38 N.—Town of Franconia, in the principality of Wurtzburg, seated on the Salle, 16 ms. N. by E. of Schweinfurt.—Town of Suabia, in the kingdom of Wirtemberg, seated on the Kocher, 12 ms. NNE. of Hailbron.—Town of Upper Saxony, in Misnia, capital of a circle of the same name. It has a castle, two churches, and a mine office, and on a mountain near it is another castle, called Arnshaug. It is seated on the Orla, 46 ms. SSW. of Leipsic. Lon. 11 49 E., lat. 50 45 N.—Town of Brandenburg, in the middle mark. Here are extensive breweries and manufactories of cloth and cutlery. It stands on the Finow canal, 31 ms. NE. of Berlin.—Town of Brandenburg, in the mark of Pregnitz, celebrated for its manufacture of plate glass, seated on the Dosse, 8 ms. ENE. of Havelberg.—Town of Lower Saxony, in the duchy of Holstein, with a castle and a spacious harbor on the Baltic, 20 ms. N. by E. of Lubec. Lon. 10 57 E., lat. 54 10 N.—Town of Lower Saxony, in the duchy of Mecklenburg, with a castle, 17 ms. S. of Schwerin.—Town of Lower Saxony, in the duchy of Brunswick Lu-

nenburg, with a castle, seated on the Leih ms. NNW. of Hanover.—Town of Bavaria, at the conflux of the Apenst with the Dan, 16 ms. E. by N. of Ingolstadt.—Town of Silesia, with a castle, on the river Nab, 27 ms. E. of Amberg.—Town of Moravia, in the circle of Olmutz, 10 ms. NW. of Olmutz.—Town of Silesia, in the principality of Oppeln, 14 ms. W. of Neisse.—Town of Bohemia, in the circle of Pilsen, 35 ms. W. by S. of Pilsen.—Town of Bohemia, 13 ms. NE. of Koniggratz.—Town of Westphalia, in the co. of Mark, 50 ms. ESE. of Dusseldorf.—Town of Germany, in the palatinate of the Rhine, seated on the Spirebach, 14 ms. W. of Spire.

Neustadtel, town of Silesia, in the principality of Glogau, 14 ms. W. of Glogau, and 17 ms. N. of Sagan.

Newville, town of France, in the department of Loiret, 11 ms. NNE. of Orleans. Father Lafaucon has proved by ancient charters the town, and not Poisse, as commonly supposed, was the birth place of St. Louis, otherwise Louis IX.

Newwied, flourishing commercial city of many, in the circle of the Upper Rhine, capital of the principality of Weid. It contains between 7,000 inhabitants. Newwied is 10 ms. N. of Coblenz. Lon. 7 25 E., lat. 50 32 N.

New Albany, village, Bradford co. Pennsylvania, Handsomely situated town and seat of justice, Floyd co., Ia. It is situated on the right bank of the Ohio river, 4 ms. below Louisville, and 2 below pingport, Ky. It contains about 200 houses, 30 inhabitants, a steam saw and grist mill, and a yard. Lat. 38 18 N., lon. W. C. 8 45 W.

New Alexandria, village, Westmoreland co., Pa., on Loyalhanna river, 11 ms. NE. of Greensburg.—Small town of Columbiana co., Pa.

New Amsterdam, town and capital of Berbice, in S. America, on Berbice river, near its mouth.

New Antrim, town, Orange co., N. Y., situated on the post and stage road from N. Y. to Albany, 34 ms. N. by W. of the former, and 33 ms. SE. of Goshen.

Newark upon Trent, borough of Eng., in Nottinghamshire. It is seated on the Trent, over which is a bridge, and once had a handsome castle, now in ruins. Newark has a good trade, governed by a mayor, and sends 2 members to Parliament. It is 17 ms. NE. of Nottingham, and 124 N. by W. of London. Lon. 45 50 E., lat. 53 6 N.

Newark, U. C., is situated on the W. side of the entrance of Niagara river, opposite the falls at Niagara, on Lake Ontario. This town was laid out in the year 1794. It now contains about 80 persons, 2 churches, a jail, and academy. The first provincial Parliament met at this place, and the public officers of Government have been held *pro tempore* here.—Village, Tioga co., N. Y.—Village, Ontario co., N. Y.—Village, seat of justice, Essex co., N. J., situated on the W. side of Passaic river. It has a college instituted in 1792, and carries on the manufacture of shoes in an extensive manner. Newark sits on a plain. The streets are wide, and laid generally in straight lines; the houses are more than their spacious and elegant. It contains two lakes

extensive tanneries, and other manufacturing establishments. Very fine stone quarries exist in vicinity; it is distant 9 ms. W. from N. Y., NNE. from Elizabethtown. Pop. 1810, in 1820, 6,507; and in 1830, 10,953. In 1840 the pop. of this city stood thus:

ward	-	-	-	4,604
ward	-	-	-	4,756
ward	-	-	-	4,286
ward	-	-	-	3,644
Total	-	-	-	17,290

Increase of a fraction above 264 per cent. in 1840.

Clark, town, New Castle co., Del., 14 ms. from Wilmington. — Village, Worcester Co., Va., 25 ms. from Richmond. — Town and seat of justice, Jackson co., Ohio. It is situated near the base of the three principal branches of Lick river, 26 ms. W. by N. from Zanesville, 26 E. from Lancaster, and 33 E. by N. from Columbus. The site of the town is a plain, though not level; the environs pleasant, which, with the beauty of the town, render the whole scene highly agreeable to the eye. It contains several churches, stores, &c., the usual accommodations. Pop. 1840, 2,705. Lat. 40° 4' N., 76° 26' W.

Clark bay, sheet of water extending from St. Andrew's sound to the mouth of Passaic and Hackensack rivers, in a direction of NNE. 2 ms. long and 6 ms. wide.

Clark, town, Berkshire co., Mass., 25 ms. from Lenox.

Clark, town in the southern part of Harford co., O., 6 ms. S. from Cadiz. It is seated on the edge of the tp. line, dividing Cadiz from Shortsville, therefore, partly in both of those two townships. It is 21 NW. from Wheeling. It is the seat of Franklin college. In 1840, pop. 1,439.

Clark, town, or **Tiogatawn**, town, Bradford co., Penn. It is situated near the confluence of Tioga river and the E. branch of the Susquehanna, a situation very convenient to intercept the trade of both rivers.

Clark, village and tp., Green co., N. Y., on the Hudson, 18 ms. below Albany. Pop. 2,036.

Clark, village, Fauquier co., Va., 45 ms. from W. C.

Clark, tp., Bergen co., N. J. Pop. 2,592.

Clark, village and seaport of Mass., in Worcester county, on a small arm of Buzzard's bay. The harbor is rendered secure by Scouticut point, Long Neck, and a small island. The inhabitants are mostly employed in the fishing trade, and in the whale oil, spermaceti, and candles. The town contains a bank, an insurance office, and several places of public worship. In 1820, the population of New Bedford and Fairhaven contained a population of 6,680; having increased in the preceding ten years. Distant 61 ms. from Boston. Lat. 41° 28' N., lon. W. C. 69° E.

Clark, village, Mahoning tp., Mercer co., Pa., 15 ms. SW. from Mercer.

Clark, village and tp., Chenango co., N.

Y. Pop. in 1820, 2,366; and in 1840, 2,086.

— Village and seat of justice, Union co., Pa., on Penn's creek, 11 ms. W. from Sunbury. Lat. 40° 52' N., or very near the meridian of W. C.

Clark, village, Montgomery co., Va.

Clark, capital of Craven co., N. C., situated on the S. bank of the river Neuse, at its junction with the Trent, in the lat. of 35° 20' N., and lon. of 77° 5' W., 35 miles S. of Washington, on Pamlico river, and 81 S. by W. of Edenton, on Albemarle sound. This town is a port of entry, the most populous in the State, and was the seat of government before the Revolution. The quantity of lumber, Indian corn, tar, pitch, and turpentine, exported annually from this town is very considerable. Pop. in 1840, 3,690.

Clark, village, Oneida county, N. Y., 25 ms. from Utica.

Clark, district of South Carolina, bounded by Lexington SE., Saluda river, or Edgefield SW., Laurens NW., Ennoree river, or Union N., and Broad river, or Fairfield NE.; length 25, mean width 20 ms., area 500 sq. miles. Surface rather waving than hilly. Soil productive. Principal staple, cotton. Chief town, Newberry. Population in 1820, 16,104; and in 1840, 18,359. For central lat. see next article.

Clark, town and seat of justice, Newberry district, S. C., 40 ms. NW. from Columbia. Lat. 33° 15' N., lon. W. C. 43° 33' W. — Village, Christian co., Ky. — Village, Burlington county, N. J. — Village, Lycoming co., Pa., on the west bank of Lycoming river, opposite Williamsport.

Clark, fishing town of Eng., in Northumberland, 7 miles E. of Morpeth. It is situated on the N. side of the bay of Newbiggin.

Clark, village, Perry co., Pa., 25 ms. SW. from Harrisburg.

Clark, town, Hillsborough county, N. H. Pop. in 1810, 1,619; and in 1820, 1,686. It is situated on a branch of the Merrimack river, 50 ms. westward from Portsmouth. — Village, Berkshire co., Mass., 119 miles westerly from Boston. — Village, Madison co., N. Y., 30 miles from Utica. — Village, Clark co., Bethel tp., Ohio, on the western side of Mad river, 4 miles SW. from Springfield.

Clark, village, St. Genevieve co., Mo. It stands 2 ms. below St. Genevieve.

Clark, post office, Washington co., Mo., 99 ms. SSW. from St. Louis.

Clark, village, Jasper co., Ga., by post road 63 ms. NW. from Milledgeville.

Clark, town, Worcester co., Mass., 18 ms. WNW. from Worcester. Pop. in 1820, 888.

Clark, tp., Bucks co., Pa., on Neshaminy creek, between Hilltown and Doylestown. Pop. in 1810, 1,474; and in 1820, 1,082.

Clark, Wayne co., O., on Jerome's fork.

Clark, town and city, Middlesex co., N. J., on the S. bank of the river Raritan, 30 ms. NE. of Trenton, and 36 SW. of the city of New York. This city, beside the ordinary county buildings, has five places of public worship for Presbyterians, Episcopalians, Methodists, Baptists, and Dutch Reformed, each one.

Queen's College was formed by the Dutch Reformed church, and intended for the education of

their clergy. It was incorporated in 1770, and since 1810, has been in some respects connected with a theological school founded in the same city.

The site of New Brunswick rises gradually from the bank of Raritan river. The adjacent country is pleasantly diversified and well cultivated. The tide rises some little distance above the town, and steamboats, when not prevented by ice, ply regularly between that place and New York.

Population in 1810—

Newburg, town and tp., Orange county, N. Y. It is situated on the W. side of Hudson river, 5 ms. N. of West Point, and 95 S. of Albany. This is one of the most pleasantly situated towns on the Hudson. The bank rises by a rather bold acclivity, giving a fine view of the river, opposite shore, and adjacent mountains. Any vessel that can pass the bar at Sandy Hook, can reach Newburg. Its trade is active and increasing. Pop. in 1810, 4,627; in 1820, 5,812.

Newburg, corporate town of England, in the Isle of Anglesey, on the river Brant, 15 miles SW. of Beaumaris, and 257 NW. of London. Lon. 4 27 W., lat. 53 10 N.—Village, Penobscot county, Maine, 118 miles NE. from Portland.—Town, Cuyahoga co., Ohio, immediately S. from Cleveland. Pop. in 1820, 756.

Newburn, petty village of Eng., in Northumberland, on the W. side of Newcastle, inhabited by colliers.

Newbury, corporate town of England, in Berkshire. Its poor are chiefly employed in spinning. Newbury is commodiously seated on the river Kennet, 26 miles S. of Oxford, and 56 W. of London. Lon. 1 12 W., lat. 51 25 N.—Town, the capital of Orange co., Vt., on the W. side of Connecticut river, 40 miles N. of Dartmouth College, and 5 ms. NW. of Haverhill, N. H. Pop. 1,362. Lat. 44 4 N., lon. W. C. 4 58 E.—Tp. of Essex county, Mass., opposite Salisbury. Pop. in 1820, 3,671.—Tp., York co., Pa. The tp. is on the point between Susquehanna river and Conewago creek, and the village 5 ms. NW. from York Haven. Pop. in 1820, 1,794.—Town, Gauga co., Ohio.—NW. tp. of Miami county, Ohio. Pop. in 1820, 542.

Newburyport, considerable port of entry and village, Essex co., Mass., situated at the mouth of the river Merrimack, in lat. 42 47 N., lon. 70 47 W., 40 miles N. from Boston, and 22 SW. from Portsmouth, N. H. The site of Newburyport is a gentle acclivity, giving a pleasing aspect to the place, which is heightened by the regularity of the buildings and streets. It contains two banks, two insurance offices, and 6 or 7 places of public wor-

ship. In point of foreign commerce, it is the in the State. In 1815 its shipping amount near 25,000 tons.

Newburyport, chief town of Berrien co., Md. situated at the mouth of St. Joseph's river stands on the shore of Lake Michigan, and on right or north side of the river opposite the village of Saranac. N. lat. 42 5, lon. W. C. W. A little S. of W., about 200 miles from Detroit.

New Canaan, town, Fairfield co., Ct., 30 ms. WSW. from New Haven. Pop. in 1,600; in 1820, 1,682. It contains an academy.

New Canton, village, Buckingham co., Va. on the right bank of James river, 55 miles by above Richmond.—Village, Hawkins co. Tenn., by post road 257 ms. NE. by E. from freesborough.

New Carlisle, town and capital of Gaspe co. L. C., on Chaleur bay.

Newcastle, town of Wales, in Carmarthen on the Tyvy, 17 ms. NW. of Carmarthen, an WNW. of London. Lon. 4 30 W., lat. 52

—Town, Lincoln co., Maine, 45 miles N. Portland, and 12 of Wiscasset, in nearly the direction. Pop. in 1820, 1,243.—Tp., Chester co., N. Y., about 40 miles NNE. New York. Population in 1810, 1,291; in

1,368.—Village, on the southern border of cer county, Pa., on the point above the junction of Shenango and Neshanoc creeks, 16 ms. S. from Mercer.—Village and capital of New

co., Del., situated on the W. bank of the ware river, 6 ms. S. of Wilmington, and 34

of Philadelphia. Pop. of the hundred in 2,438; in 1820, 2,671; and in 1840, 2,73

lies in lat. 39 40 N., lon. 75 18 W. of Lon. and from W. C. 1 27 E.—Village, Hanov

Va., on the right bank of Pamunkey river, 2 NE. from Richmond.—Village, Botetour

Va., by post road 210 miles W. from Richm

—Town and seat of justice, Henry co., Ky. contains the ordinary county buildings; 25

NW. from Frankfort. Pop. in 1840, 528. at 38 25 N., lon. W. C. 8 25 W.—Prince

ward county, U. C. This tp. is situated on the Presqu'isle de Quinte, extending into Lak

tario from the easterly part of the tp. of Cra is a situation well suited for commerce and p

tion, and sheltered from all winds.

Newcastle, county of Del., bounded by Del. river E., Kent co., Del. S., Kent and Cecil

Md. SW., Chester co., Pa., NW., and Del. co., Pa., NE.; length 36 miles, mean wid

area 432 sq. ms. The surface of this co. is generally decorated with hill and dale, though the section is more broken than that of the S.

projected canal to unite the Delaware and apeake bays is to pass across this co. The separation between the primitive and the alluvial formations enters the NE. angle of castle, near Delaware river, and, ranging merges into Md. between Glasgow and F town. Brandywine river and Red and White creeks rise in Chester Pa., co. and, flowing ly S., fall over the primitive ledge into Chris The latter rises also in Pennsylvania, and, ing the NE. angle of Maryland, flows near between Elk river and Whiteclay creek, fall

the ledge, and thence turns to NE. along i
 verge to Wilmington. This range of falls
 ers the water facility found in Newcastle co.,
 he propulsion of machinery, equal to any other
 qual extent in the United States. This natu-
 advantage has been extensively improved on
 Brandywine in particular. The principal sta-
 of Newcastle is flour. Chief town, Wilming-
 —See *Brandywine*. Pop. in 1820, 27,899;
 in 1840, 53,120. Central lat. 39 34 N., lon.
 C. 1 25 E.

Newcastle under-Line, borough of England, in
 orshire. It has a manufacture of hats. It
 large place, with broad paved streets, and is
 us for more stoneware being made near it than
 y other place in England. It is on a rivulet,
 s. from Strafford, and 149 NNW. of London.
 2 2 W., lat. 53 12 N.

Newcastle, or *Newcastle-upon-Tyne*, large bor-
 and seaport of England, in Northumberland,
 ted between the Picts Wall and the Tyne.
 river is so deep that ships of 600 tons burden
 come up to the town in ballast; but the col-
 wait at Shields for their lading, which is
 ight down the river in lighters, from the great
 ries which have for centuries past supplied
 on and most of the southern parts of the
 lom with coal. This is the staple trade of,
 has been the source of great wealth to New-
 . The coals carried thence, annually, are
 uted to amount to 1,187,000 tons; it also
 ufactures steel, iron, glass, woolen cloth, earth-
 re, white lead, milled lead, &c., to a great ex-
 and here is a round tower for the manufac-
 of patent shot. It exports large quantities of
 salt, salmon, butter, tallow, and is so very
 us for its grindstones that scarce a vessel goes
 thence without some of them. Newcastle
 made a borough by William I., and the first
 er for digging coal was granted by Henry III.
 39. It is 34 miles S. of Alnwick, 94 N. of
 s., and 271 N. by W. of London. Lon. 1 37
 lat. 55 3 N.

Newcastle, or *Great Island*, island and town of
 ingham co., N. H., two miles E. from Ports-
 th, at the mouth of Piscataqua river. Pop. in
 1800, 592; and in 1820, 932.

New Charleston, town, Penobscot co., Maine,

 New Philadelphia, and 4 E. from Co-
 on.

New Concord, village, Columbia co., N. Y.,
 s. from Albany.

Newdigate, village of England, in Surry, with
 medicinal spring of the same nature as that of
 pin.

New Durham, tp., Strafford co., N. H., 40 ms.
 N. from Portsmouth. Pop. in 1810, 888; in
 1830, 1,168.

New Egypt, village, Monmouth co., N. J., 35
 NE. by E. from Philadelphia.

New England, name given at an early perod
 the country that lies between Canada and

New York, and which at present comprises New
 Hampshire, Massachusetts, Rhode Island, Con-
 necticut, Vermont, and Maine.

Newenham, *Cape*, rocky point of considerable
 height, on the W. coast of N. America. It was
 discovered by Captain Cook in 1778. Lon. 162
 24 W., lat. 58 42 N.

Newent, town of Eng., in Gloucestershire,
 near a branch of the Severn, 114 ms. WNW. of
 London. Lon. 2 20 W., lat. 51 56 N.

New Fairfield, tp., Fairfield co., Ct. Pop. in
 1810, 772; in 1820, 788. It is situated between
 Brookfield and the State of N. Y.

New Fane, tp. and post town, Windham co.,
 Vt. Pop. in 1810, 1,275; in 1820, 1,400. It is situ-
 ated on the E. side of West river, 8 ms. NW.
 from Fulham.

New Feliciana, parish, La., bounded N. by
 Mississippi, E. by Amite river, or parish of St.
 Helena, S. by East Baton Rouge, and SW. by
 the Mississippi river. Area 650 sq. ms., or 672,-
 000 acres. This parish was, subsequent to the
 census of 1820, divided into East Feliciana and
 West Feliciana; which see.

Newfield, town, York co., Maine, 40 ms. NW.
 from York. Pop. in 1810, 815; in 1820, 1,147.
 —Village, Tompkins co., N. Y., by post road
 210 ms. W. from Albany, and 9 from Ithica.

New Forest, forest of Eng., in Hampshire, situ-
 ated in that part of the co. which is bounded on
 the E. by Southampton Water, and S. by the
 English channel.

Newfoundland, island on the E. coast of N.
 America, between 47° and 52° N. lat. It was
 discovered by Sebastian Cabot in 1496; and, after
 many disputes with the French, it was ceded to
 the English in 1713. Its form is triangular; the
 N. point is separated from Labrador by the strait
 of Belleisle, and from this apex it is 350 ms. in
 length to the base, which is 300 in breadth. It is
 a mountainous, woody country, and very cold, be-
 ing covered with snow five months in the year.
 It seems to have no inhabitants of its own, but in
 the summer time is visited by the Esquimaux In-
 dians. It has several bays and harbors; and there
 are about 500 English families who continue here
 all the year, besides the garrison of St. John, Pla-
 centia, and other forts. In the fishing season,
 which begins in May and ends in September, it is
 much resorted to on account of the great fishing
 banks to the SE. of the island; for here they cure the
 cod, which is carried not only to England, but to the
 Mediterranean, and W. Indies, and elsewhere. In
 winter the chief employment of the inhabitants is
 to cut wood; and the smallest kind, used for fuel, is
 drawn by their large dogs, trained up and harnessed
 for that purpose. There is great plenty of game,
 fish, and fowl, but very little corn, fruit, or cattle.
 St. John is the principal settlement.

Newfound Mills, post office, Hanover co., Va.

New Garden, town, Chester co., Pa., 12 ms.
 W. by N. of Wilmington, Del., and 125 from the
 city of Washington. —Village, Robinson co.,
 N. C. —Tp., Columbiana co., O. —Village,
 Wayne co., Ia., 78 ms. E. from Indianapolis.

New Geneva, village, Fayette co., Pa., on the
 right bank of Monongahela river, below the mouth
 of George's creek, 20 ms. by land above Browns-
 ville.

New Georgia, group of Islands in the Frozen ocean, discovered in 1819 by Captain Parry. Lon. W. C. from 20° to 40° W., lat. from 74° to 76° N.—See *Polar Regions*.

New Germantown, village, Hunterdon co., N. J., 35 ms. N. from Trenton.

New Gilliard, village, Moore co., N. C., 63 ms. SW. from Raleigh.

New Glasgow, town, Amherst co., Va., situated 20 ms. N. of Lynchburg, and 115 ms. W. of Richmond, containing about 20 dwelling houses, principally of wood, and about 200 inhabitants. In this place there is an academy, consisting of two departments, male and female.

New Gloucester, town, Cumberland co., Maine, 30 ms. N. by W. of Portland.

New Goshen, village, Montgomery co., Penn., in the forks of the Perkiomen, 45 ms. NW. from Philadelphia, and 15 ms. S. from Allentown.

New Granada, formerly a captain generalship of Spain, in S. America, now an integral part of the republic of Colombia. It is bounded N. by the Carribean sea, NE. by the former captain generalship of Caraccas, SE. by Brasil, S. by Peru, and W. by the Pacific ocean, extending from 12° N. to 6° of S. lat., and from 10° E. to 2° W. lon. from Washington. The features of nature are on a scale commensurate with the expansive area of this country. It contains the highest mountains yet measured on the western continent, and the alluvial plains near the mouth of the Magdalena.

The Andes of Peru, gradually separating into different ridges, traverse New Granada from SSW. to NNE. A little to the N. of the Equator, three very distinct mountain chains extend, one following the Pacific coast reaches and is continued in the Isthmus of Darien; the second, or middle range, runs nearly N. and S., separating the basins of Magdalena and Atrato, merges into the Carribean sea; the third, or eastern chain, ranges NNE. towards the head of the Gulf of Maricaibo, and separates the confluent of the Magdalena and Orinoco. At about 8° N. lat. the latter chain again divides, one branch turns N. and merges into the Carribean sea at Cape Vela, the other gradually curves to the E. and constitutes the mountains of Caraccas.

The rivers of New Granada are numerous and important. Those flowing into the Pacific ocean are generally short, and, from the great inclination of their planes of descent, rapid in their course. See *Guiaquil*, in the *Addenda*. A communication between the Atlantic and Pacific oceans has been proposed through the St. Juan of the Pacific and Atrato, flowing into the Carribean sea.—See *Atrato*. Between the great northern ridges of the Andes, which we have noticed, rises and flows the Magdalena. This is truly the river of New Granada, having its source at 2°, and entering the Carribean sea at 11° N. lat. It is formed by two great branches, the Magdalena proper and the Cauca. It is rendered in a great degree unnavigable from the rapid descent of its plane.

East from the Andes, in all the length of New Granada, in Cundinamarca, and Quito, spreads an immense plane, across which meanders the innumerable branches of the Amazon and Orinoco.

The principal confluent of the former in Granada are, the Tungaragua, Napo, Ica, Jay, and Negro. Those of the Orinoco, are the Roraima, Ua, Vichada, Meta, and Apure. These rivers, though mere branches of the two mighty rivers of the Amazon and Orinoco, flow by comparative ease from 300 to 700 ms., and are generally navigable. The country over which they flow is, however, yet a wilderness or extensive waste, inhabited by savages.

The climate of New Granada partakes of a diversity of its surface. The elevated tablelands of the valleys of the Andes has been celebrated for its salubrity, whilst the inhabitants of the low alluvial coasts have been found subject to the ordinary malignant diseases incident to such situations in tropical climates.

New Granada has been justly celebrated for its vegetable and mineral wealth. In a country of variety of elevation within the tropics, the diversity of vegetable life must embrace nearly all the valuable fruits and plants useful to man. Silver, platinum, iron, and emeralds, are enumerated amongst its mineral productions.

In the animal kingdom, the condor, the largest carnivorous bird yet known, is in a great degree peculiar to this country.

Population, according to the recent estimate, 1,875,700.—See *Colombia*.

New Grantham, tp., Cheshire co., N. H., 15 ms. NW. from Concord.

New Guinea, or *Papua*, large and important island, lying to the N. from New Holland, from which it is separated by Torres's straits. Though our knowledge of this island, even in its shores, is imperfect, enough, however, has been done to determine its general extent, which is laid down on Black's Atlas, extends from 13° 148° lon. E. from London, in a direction of NW. by W. or SE. by S., 1,300 English miles where widest, it exceeds 300 ms., but if we allow the mean width to be 150, the area will be 19,000 sq. ms. The northwestern part nearly touches the equator, but the mean latitude is about 5°. It appears to be inhabited by Malays and two other more races of Negroes.

New Hugerstown, small town in Tuscarora co., Ohio.

New Hampshire, one of the States of the United States, bounded by the Atlantic ocean S. by Massachusetts S., by Vermont W., Lower Canada N., and Maine E.

It touches, and is washed by the Atlantic ocean.

It thence has a boundary of Maine of 115 miles.

The boundary between New Hampshire and Lower Canada remains uncertain, but is about 100 miles.

Down Connecticut river, in common with Vermont, it is 115 miles.

Along north boundary of Massachusetts it is 100 miles.

Having an entire outline of 475 miles.

Length from SW. to NE. 160 ms.; breadth 100 ms.; area 8,030 sq. ms., or 5,139,200 acres.

Extending from lat. 42 41 to 45 11 N. This State differs more in the relative elevation

parts than any section of the United States, of consequence, its climate and seasons have corresponding excess in their extremes. The border is a sandy beach, followed by hills which increase rather rapidly in elevation. The country rises, indeed, by so rapid an acclivity that it does not rise in the rivers more than from 15 ms. inland. The hilly region is quickly covered by the mountainous. Between the Connecticut and Merrimack rivers, and near the SW. corner of this State, Grand Monadnoc rises amongst other summits to 3,254 feet above the ocean level. Mt. Sunapee is followed by Moosehillock, after attaining an elevation of 4,636 feet. Between the sources of Connecticut, Androscoggin, Merrimack, rise, however, the highest mountains yet measured in the United States. The peaks of the White mountains rise to 6,000 feet above the Atlantic ocean. Taken as a whole, the natural features of New Hampshire are bold, prominent, and, in many places, sublime. If we turn our view to the rugged aspect of the scenery, we would be led to expect much less fertility of soil; but, in fact, few sections of the United States, of equal extent, have more productive soil than is included in New Hampshire. The important vegetable productions are grass, wheat, rye, Indian corn, oats, &c. The manufacturing establishments of N. Hampshire are numerous and increasing. More than 300 iron and woolen manufactures are in operation in this State, and many of them on a very enlarged

scale. The principal manufactures are iron, lumber, pot and pearl ashes, fish, live stock, pork, and flax seed. For civil and political purposes, New Hampshire in 1820, was subdivided into the following counties, to which have been since added Belknap, Carroll, and Merrimack, formed out of parts of Strafford, &c. :

Counties.	Sq. ms.	Pop. 1820.
Belknap	1,680	5,549
Carroll	1,540	32,989
Merrimack	1,200	45,276
Strafford	1,150	53,884

Population to the sq. m. in 1840, 35 very nearly.

New Hampton, tp., Strafford co., N. H., on the Merrimack, 30 ms. above Concord. Pop. in 1810, 1,293; in 1820, 1,500.—Town, Hunterdon co., N. J., 21 ms. N. by W. of Flemington, and 40 N.W. of New Brunswick.

New Hanover.—See *Hanover*, New, tp., Montgomery co., Pa.

New Hanover, co. of N. C., bounded by the Atlantic ocean SE., Cape Fear river, or Brunswick, SW., Bladen W., Sampson NW., Duplin N., and Orson E.; length 50 ms., mean width 25; 1,350 sq. ms. Surface mostly flat, and part marshy. Beside Cape Fear river, which washes the SW. border of the county, New Hanover is drained by Black river and the NE. fork of Cape Fear river. Staples, cotton and tobacco. Chief town, Wilmington. Pop. in 1820, 10,866; and in 1840, 13,312. Central lat. 34 30 N., lon. W. C. 1 0 W.

New Hartford, town and tp., Litchfield co., Ct., 22 ms. W. by N. of the city of Hartford, and 12 ms. NE. of Litchfield, the shire town. Pop. in 1810, 1,510; in 1820, 1,685.—Village, Oneida co., N. Y., 4 ms. W. from Utica.

New Haven, town of Eng., in Sussex, near the mouth of the Ouse, with a small harbor. The entrance of the river is defended by a battery, and the haven is generally made the station of a sloop of war, to intercept the smuggling trade. It is 7 ms. S. by E. of Lewes, and 67 of London.—Town, Addison co., Vt., on Otter creek.

New Haven, co. of Ct., bounded by Long Island sound S., Housatonic river, or Fairfield, SW., Litchfield NW., Hartford N., and Middlesex NE.; length 27 ms., mean width 22; area about 600 sq. ms. This is one of the most pleasantly diversified counties in the United States. It is traversed from SSW. to NNE. by a chain of

mountains of no considerable elevation, which in the vicinity of New Haven city, and is intersected by Connecticut river at Middletown, in Middlesex co. Beside the Housatonic, New Haven is drained by the Naugatuck and Quinipiac rivers. With the exception of some tracts of extent near the sound, the surface is hilly or undulating. The soil productive in grain, fruits and pasturage. Staples, grain, flour, salted provisions, live stock, and many other minor articles sent to the New-York market. Chief town, New Haven. Pop. in 1820, 39,616; and in 1840, 48,582. Central lat. 41 25 N., lon. W. C. 4 0 E.

New Haven, city, seaport, and seat of justice, New Haven co., Ct., situated on the E. side of the bay, formed by the mouth of the Quinipiac river, and about 4 ms. N. from Long Island sound. The old town was laid out in a large square, divided into nine lesser squares, each 858 feet side, separated by 50 feet streets. In the center are two large squares; SE. of which stands Yale College. The general aspect of New Haven is peculiarly pleasing. The site is very nearly a plain, and the streets extending at right angles, with general neatness of the buildings, and intermingled with trees, affords a picture which every traveler must view with interest. Of all the public edifices of this city, Yale College decidedly claims the notice. It was founded in 1701. Its officers consist of a president, nine professors, and five tutors. It is under the government of a board of trustees, composed of the Governor of the State, the lieutenant-governor, and six senior assistants, together with the president and ten clerical fellows. The means of education, in every respect, are probably as ample as in any other literary institution of the United States. The commercial connexions of this city are numerous and important, particularly in the coasting trade. The harbor is good, though only admitting vessels of 10 or 12 feet draft. Before the entrance of a long wharf of nearly a mile, which stretches so far directly across the bay, the harbor was usually filling up. The amount of shipping in the town is about 12,500 tons.—Tp., New Haven co., Ct., and containing New Haven. Pop. in 1820, 8,326.—Town, Oswego co., N. Y., on Mexico bay of Lake Ontario. Pop. in 1820, 898.—Town in the southern border of Huron co., O.—Village, Hamilton co., O., 49 ms. SW. from Columbus.—Village, Gallatin co., Ill., 74 ms. SSE. from Vandalia.

New Holland.—See *Holland*, New.

New Holland, village, Lancaster co., Pa., 3 ms. NE. from Lancaster.

New Hope, town, Solebury tp., Bucks co., Pa., on the right bank of Delaware river, opposite to Berksville, in N. J., 16 ms. above Trenton. At this place a very fine bridge has been constructed over the Delaware.—Town, Wayne co., N. C.—Village, Spartansburgh district, S. C.—Village, Hancock co., Ga., 20 ms. from Milledgeville.

New Iberia, village, Louisiana, parish of St. Martin's, on the right bank of Teche, 43 ms. above its mouth; consisting of one street along the river, or rather road, containing about 40 houses and 100 inhabitants. The bank is here something higher than either above or below; schooners draw 4 or 5 feet water come up to New Iberia at all seasons. Lat. 30° N., lon. W. C. 14 56 W.

Swington, town, Rockingham co., N. H., on E. side of Great bay, 5 ms. NW. from Portsmouth.
Sw Inlet, coast of N. J.—See *Little Egg Inlet*.
Sw Inlet, one of the mouths of Cape Fear river, N. C.
Sw Ipswich, town, Hillsborough co., N. H., 12 ms. N. from Boston, and containing an academy and a number of mills. Pop. 1820, 1,278.
Sw Jersey, one of the States of the U. S., bounded by N. Y. NE., by Hudson river, Staten Island sound, Raritan bay, and the Atlantic ocean SE., Delaware bay SW., and Chesapeake river or Pennsylvania W.

Sw Jersey has an exterior limit of the Atlantic ocean from Cape May to Sandy Hook, of	Miles.	
Sw exterior boundary opposite N. Y., along Raritan bay, Staten Island sound, New York bay, and Hudson river	-	120
Sw common with New York, between Hudson and Delaware rivers	-	60
Sw distance down Delaware river and bay to Cape May	-	45
	-	220
Total	-	445

Sw extreme length, by a line almost due N. from Cape May to the northern angle of the Delaware, is about 120 miles, with a mean width of about 43 ms. Between lat. 38 58 and 41 21 N. the area is 6,851 sq. ms., and 4,384,640 acres.
 Sw The natural geography of New Jersey presents three very marked subdivisions: 1st, sea sand alluvium; 2dly, the hilly or middle section; and 3dly, the mountainous or northern section.
 Sw The sea sand alluvium embraces near one-half of the State. A line drawn from the mouth of the Hudson river to Bordentown, will nearly separate the hilly from the sea sand region. Between the natural limit and the Sussex mountains, the country is delightfully variegated by hill and dale, and well watered. Some of the NW. parts of Camden, Morris, and Bergen cos. are broken into mountain ridges, but the real mountain section of New Jersey is comprised in Sussex co. It must be understood that, in this State, as in Pennsylvania, the intervening distance between the respective mountains is generally an arable valley.
 Sw In reference to the annexed table of the counties it will be seen that nearly one-half of the State is occupied by the sea sand alluvium. This latter gradually declines from the hills, and before reaching the Atlantic ocean, spreads into an almost level plain. The soil is nearly divisible by its various limits with the great subdivisions we have mentioned. On the sea sand alluvium it is generally level and sandy, and in many places marshy. Above the sea sand alluvium, where not mountainous, the soil is generally arable and productive in grain, and pasturage.
 Sw Compared with its latitude, extending 2° and 3° N. of the State of the U. S. possesses such wide extremes of climate. The level sandy plains of its northern extension approximate to the climate of Virginia, whilst the seasons in Sussex co. present a severity approaching those of Vt. and N.

H. The structure of the State renders the cause of these meteorological phenomena obvious.

The staples of New Jersey are grain, flour, live stock, salted provisions, iron; and near New York and Philadelphia an indefinite variety of articles to supply the markets of those cities.

Iron ore is plentifully found and extensively wrought, particularly in Morris co. Iron in bars, and hollow ware are produced in great quantities, and of excellent quality.

Leather and boots, shoes, and saddles, may be considered as forming a large share of the manufactured staples of this State. Newark is emphatically a city remarkable for the quantity and excellence of its shoes. The estimated value of exports in 1810, was upwards of \$7,000,000. No fair view, however, can be given of either the exports or imports of this State, as its two great marts are Philadelphia and New York. The amount of shipping is about 35,000 tons.

Surveys and levels have been taken with so much accuracy, as to ascertain the practicability of executing a navigable canal over New Jersey, and a company has long since been incorporated for that purpose. The points intended to be united are Trenton, on the Delaware, and New Brunswick, on the Raritan. The route was traced by following the Assampink to near its source, and thence by a short cut into Stoney brook, a branch of Millstone river, and down the latter and Raritan to tide water. The very erroneous principle adopted of following the natural channels, has tended to discredit the operations of the New Jersey Canal Company.

The distance from Brunswick to Trenton is about 26 ms., and the highest intermediate summit level 50 feet, between the Assampink and Stoney brook. It is supposed, however, that a summit level but little exceeding 40 feet can be obtained by cutting between the confluence of Assampink and Shippetankin creeks, and Rowley's mill near the confluence of Stoney brook and Millstone river.

An adequate supply of water can be drawn by short feeders from Phillip's springs, Trenton creek, Stoney brook, and Millstone river, all of which are more elevated than the route of the canal, some intermediate sand hills excepted. Sufficient depth of water for a sloop navigation exists at the two extremities of the intended canal.

Estimated expenses:	
Digging 28 ms., at \$20,000 per mile	\$560,000
Lockage, 100 feet, probably less, at \$1,250 per foot	125,000
Feeders, purchase of land and water rights	115,000

Total - - - \$800,000

Upon the importance of the New Jersey canal but one opinion can exist, but, as respects the expenses, it may be doubted whether less than \$1,000,000 could suffice to effect such an object.

If such an inland communication did exist, it is probable, however, that if the intended transmission of coal from the Lehigh and Delaware rivers succeeds, and there is no rational doubt of such success, that such a coal trade alone would, besides the incidental expenses of repairs and superintendance, produce a revenue of more than the interest of \$1,000,000.

For political and other purposes, New Jersey is subdivided into 13 counties. The following table exhibits the relative population with the respective area:

Counties.	Soil.	Area, Sq. ms.	Pop. in 1820.	Pop. Sq. mile.
Cape May	Alluvion	310	4,265	14
Cumberland	Do	450	12,668	28
Salem	Do	312	14,022	45
Gloucester	Do	800	23,089	28½

		6,851	277,575	40

Progressive population. In 1790, New Jersey contained 184,139; in 1800, 211,149; in 1810, 245,560; and in 1820, as above.

The aggregate and classified population is seen in the following table:

Population in 1810.

Free white males	-	-	115,357
Free white females	-	-	111,509
Total whites	-	-	226,866
All other persons, except Indians, not taxed	-	-	7,843
Slaves	-	-	10,851
Total population in 1810	-	-	245,560

Population in 1820.

Free white males	-	-	129,619
Free white females	-	-	127,790
All other persons, except Indians, not taxed	-	-	149
Total whites	-	-	257,558
Free persons of color, males	-	-	6,416
Free persons of color, females	-	-	6,044
Slaves, males	-	-	3,988
Slaves, females	-	-	3,569
Total population in 1820	-	-	277,575

Of these, foreigners not naturalized	-	-	1,529
Engaged in agriculture	-	-	40,812
Engaged in manufactures	-	-	15,941
Engaged in commerce	-	-	1,830

Progressive population of New Jersey.

1790	-	-	184,139
1800	-	-	211,149
1810	-	-	245,562
1820	-	-	277,575
1830	-	-	320,823
1840	-	-	373,306

The population of New Jersey a little more than doubled in the 50-year period, from 1790 to 1840.

Population of New Jersey, by classes, from census of 1840.

New Jersey	177055	174533	10,780	10,264	303	371	373306

New Kent, co. of Va., bounded by James city, Chickahomina river, or Charles city and Henric, Hanover N.W., and Pamunkey river, or William NE.; length 23 ms., mean width 2.30 sq. ms. Surface moderately hilly, soil of middling quality. Chief town, Cummins. Pop. in 1820, 6,630. Lat. 37° 28' N. meridian of W. C. crosses this co. nearly vertically.

New Lancaster.—See *Lancaster*, Fairfield co., Va.

New Lebanon, village, Canaan tp., Columbia co., on the road from Pittsfield to Albany, 24 ms. from the latter place. This town is remarkable for a tepid spring which has become a watering place of much resort. The water, except its temperature 73° of Fahrenheit, differs in no other respect from pure mountain water; it is tasteless and odorless, and used for all common purposes of drinking and washing. The Shakers own 3,000 ac. of land in this tp., and have a very flourishing settlement near Lebanon village. The scenery around Lebanon is peculiarly pleasing, and even sublime.—Village, Camden co., N. C., by post 220 ms. NE. from Raleigh.

New Lexington, village, Richland co., Ohio, on the N. bank of Mohican creek, 10 ms. from Bellefonte.—Village, Knox co., Ohio, 13 ms. E. from Mount Vernon.—Town in the eastern part of the co., on Twin creek, upon the road from Mount Eaton to Eaton. Distance, 6 ms. E. from Eaton, 15 V. from Dayton, and 85 W. by S. from Columbus.—Village, Scott co., Ia., 17 ms. W. from Madison. Salt wells have been dug here to a great depth of 700 feet. It contains about 400000 lbs. of salt, 200 inhabitants, and one newspaper printing office.—See *Lexington*, village, Scott co., Ia. *New Liberty*, village, Owen co., Ky., 40 ms. west road from Frankfort.

New Lewin, tp. of Chester co., Pa., on the W. side of Brandywine creek, 6 ms. SSW. from Downingtown. Pop. in 1820, 914.

New Lisbon, town, Otsego co. N. Y., 10 ms. SW. from Cooper's town. Pop. in 1820, 2,221. —Village, Montgomery co., Md., near the E. side of Cattail creek, branch of the Patuxent, and on Frederick turnpike, 22 ms. W. from Baltimore.

New Lisbon, flourishing village and seat of justice, Columbiana co., O., 35 ms. S. from Warren in Trumbull co., 56 NE. from Pittsburg, and 160 NE. from Columbus. It now contains an elegant suite of co. buildings, a bank, 2 brick meeting houses, 9 or 10 mercantile stores. In the vicinity are a furnace, 4 merchant and 4 saw mills, a paper mill, an extensive woolen factory, a fulling mill, carding machine, and glass factory. N. lat. 40° 49', lon. W. C. 3° 52' W. Pop. in 1820, 746; in 1830, 1,129; and in 1840, 1,490. It is a very thriving place, already possessing numerous manufactories, a bank, 3 public prints, 6 or 8 places of public worship. Its position on the most direct route from the Ohio river to Cleveland, makes it the resort of immense travel, 3 lines of stages pass daily through it, making the arrivals and departures 84 per week. The streets are well paved, and the whole aspect of New Lisbon gives a favorable comparison to it amongst the towns of the interior of the U. S.

New London, town, Hillsborough co., N. H., 30 ms. NW. from Concord. Pop. in 1810, 692, in 1820, 924.

New London, SE. co. of Conn., bounded by R. I. E., by Long Island sound S., by Middlesex co., Conn., W., Hartford and Tolland NW., and Windham N. Length 30 ms. mean width 20, area 600 sq. ms. Connecticut river forms part of its W. boundary; but besides this stream New London co. is in a remarkable manner indented with bays and rivers. Quinebaug and Shetucket unite in this co. and form the Thames, which at Chelsea landing below Norwich receives the Yantic, and forms a very fine and spacious entrance for vessels. Between the Connecticut and Thames beside many of minor importance the Niantic bay opens to Waterford. Between the Thames and Pocatuck, the coast is indented by Pequonock, Mistick, Quiamboc, Stonington, and Wickatequack, Pocatuck bounds the co. and State to the E. The western, or rather the northwestern part of New London is mountainous, and except some marshes near the seacoast, the general surface is hilly, but presents a very pleasing aspect. The soil is productive in fruits, grain, and pasturage. Staples—grain, flour, live stock, lumber, fish, &c. Chief town, New London, Pop. in 1820, 35,943; and in 1840, 44,463. Lat. 41° 30' N. lon. W. C. 4° 47' E.

New London, town, city, seaport, and alternately with Norwich, seat of justice for New London co., Conn., is situated on the W. side of the Thames, 3 ms. above its mouth, 14 ms. below Norwich, and 42 SE. from Hartford. Lon. 4° 0' 48' E., lat. 41° 25' N. Beside the ordinary co. buildings it contains 2 banks, a marine insurance office, 2 newspaper printing offices, and 5 or 6 places of public worship. The shipping in 1818, amounted to near 16,000 tons. Having a depth of 5 fathoms water, the harbor is the best between New York and Newport; and is very seldom obstructed by ice. It is defended by forts Trumbull and Griswold, the former on the New London,

and the latter at Groton, on the opposite side of the river. The narrowness of the entrance renders its blockade easy, which was effected during last war. On a point on the W. side of the harbor is a light-house.—Tp., Chester co., Penn., on Big Elk. Pop. 1,200.—Anne Arundel co., Md, 5 ms. SSW. from Annapolis.—Village, Campbell co., Va., 18 ms. SW. from Lynchburg.—Tp., in the SE. quarter of Huron co., Ohio.—Village and seat of justice, Madison co., O., SW. by W. from Columbus, and 18 ms. E. from Springfield. Lat. 39 50 N., lon. W. C. 6 31 W.—Village, Jefferson co., Ia., on the Ohio river, 30 ms. above Louisville.—Village and seat of justice, Ralls co., Mo., on Salt river, about 100 ms. NW. from St. Louis. Lat. 39 32 N., lon. W. C. 14° W.

New London Cross Roads, village, Chester co., Penn.

New Longuil, seigniory, York co., L. C., 40 ms., W. from Montreal.

New Madison, village, Darke co., O., by post road, 81 ms. a little N. of W. from Columbus.

New Madrid, village and seat of justice, New Madrid co., Mo., 70 ms. below the mouth of the Ohio. It is built on an alluvial bank, something above the ordinary height of the Mississippi banks, contains about 50 houses, and from 250 to 300 inhabitants. Lat. 36 36 N., lon. W. C. 12 24 W. Pop. in 1840, 4,554.

New Madrid, co., Mo., bounded by Mississippi river SE., Ark. S., St. Francis river NW., and Cape Girardeau N. Length 60, mean width 25 ms., area 1,500 sq. ms. Surface one general alluvial plain, arable only near the bank of the Mississippi and the other streams; the residue being liable to annual submersion. Staples—Indian corn, pork, and cotton. Chief town, New Madrid. Pop. in 1820, 2,296. Lat. 36° 30 N., lon. W. C., 12 20 W.

Neuman, village, Pike co., Ga., 52 ms. from Milledgeville.

New Market, town of Eng., in Suffolk, 13 ms. W. of Bury, and 61 N. by E. of London.—Town, Rockingham co., N. H., 15 ms. W. from Portsmouth. The village is at the mouth of Lamprey river into Great bay.—Village, York co., Pa., near the mouth of Conewago creek.—Village, Dorchester co., Md., near the left bank of Choptank river, 12 ms. SSE. from Easton.—Village, Spottsylvania co. Va.—Village, Frederick co., Md., 11 ms. eastward of Frederickstown.—Village, Shenandoah co., Va., on the E. side of Robinson river, 132 ms. W. by S. of Washington, and 50 SSW. of Winchester.—Town, Highland co., O., 42 ms. W. from Chillicothe.—Tp., Highland co. O., including the foregoing village.—Village, Washington co., Ky., on Rolling river, 10 ms. SSW. from Springfield, and 55 SSW. from Frankfort.—Village, Jefferson co., Tenn., 30 ms. NE. from Knoxville, and 15 a little W. of N. from Dandridge.

New Marlborough, town, Berkshire co., Mass., 23 ms. SSE. from Lenox. Pop. in 1820, 1,668.

New Mexico, territory of the Republic of Mexico. This is the most northern of the Spanish settlements in the interior of North America, and extends to N. lat. 42°, but with indefinite limits to the W. On the S. it is bounded by the States of

Coahuila, and Chihuahua; and on the SE Coahuila y Texas. Area about 300,000 sq. Pop. perhaps 180,000.

New Mexico is an ancient Spanish conquest early as 1559, under the Viceroy Velasco e. mero, Durango was a military post. To the end of the 16th century, the then Vic. Count de Monterey, sent Juan de Onate, to Mexico; this general drove away the Indian peopled the banks of the Rio del Norte. Consequently the establishment of that nation, in Mexico, has existed more than two hundred years.

The two provinces of New Biscay, and Mexico, are separated by a desert. This crosses the Rio Grande between the Pas Norte and Albuquerque. The desert of Muerto, is upwards of 100 ms. wide and destitute of water. "The whole of this country," Humboldt, "is in general of an alarming sterility, for the mountains Delos Mansos, situated to the E. of the road from Durango to Santa Fe, do not give rise to a single brook. Notwithstanding the mildness of the climate, and the progress of industry, a great part of this country appears as Old California, and several districts of Biscay, and the Intendency of Guadalaxara never admit of any considerable population. This desert lies in a NE. and NW. direction extends from the Pacific to within 200 ms. of St. Louis, in Mo. It is covered in part with muriate of soda, common salt, and is everywhere extremely cold for the climate. See article *Rio Grande*."

New Mexico, is however with all its desolation a delightful residence. The purity of the air, and the rich scenery of the fertile banks of the rivers, have a fine effect. European grain and fruits grow luxuriantly where the soil is fertile. The dryness of the seasons is favourable to the growth of the grapes, which is peculiarly delicious in that country. Perhaps in the advance of civilization, the barrenness of the North American desert may, from its exemption from rain, become remarkable for its vineyards.

New Milford, town, Lincoln co., Maine, head of Sheepsgut river, 15 ms. N. by W. of Wiscasset.—Town, Litchfield co., Conn., 15 ms. N. of Danbury, and 18 SW. of Litchfield on the NE. side of Housatonic river.—Village, in tp. of the same name, Susquehanna co., Pa.

New Mills, village, Burlington co., N. J., 5 ms. E. of Mount Holly.

Newnham, corporate town of Eng. in Gloucestershire. It is seated on the Severn, 8 ms. N. of Gloucester, and 112 WNW. of London. Lat. 51 23 W., lat. 51 46 N.

New Orleans, capital and chief town of the State of La., stands upon the left bank of the Mississippi river, at N. lat. 30°, and W. lon. W. C. 12 5. It is composed of the city proper, called, and the several Fauxbourgs, (suburbs), the principal of which are St. Mary's, Assumption, and La Course, above the city; Marigny and Declouet below, and Tremé and St. John the rear of the city, towards Bayou St. John.

The city itself is laid out with the streets intersecting each other at right angles. The Fauxbourgs, though in general also regular, devi-

places. Like all other places along the banks of the Mississippi, the ground upon which New Orleans stands falls by a gentle declivity from the margin of the river, until depressed into a swamp or overflown flat in the rear of the town. The city, and its Fauxbourgs, except those of the time and St. John's, stand upon the solid border land between the river and swamp, the medium width of which is 400 yards. The extreme length of New Orleans along the Mississippi is nearly 3 miles—the rivers running opposite in the form of an inverted U. It contains a state house, prison, market place, hospital, principal or town house, a cathedral, or the church of St. John's, Ursuline convent, Episcopal and a Calvinistic church, two theatres, a court house, three insurance offices, banks authorized by the State, a custom house, navy yard, arsenal, barracks, and one fort, the city of St. Charles, situated between the city and Fauxbourg Marigny.

New Orleans is situated 105 miles above the mouth of the Mississippi, 322 by water and 156 land below Natchez, 1,189 below St. Louis, and below the mouth of the Ohio, and 1,933 above the city of Pittsburg. It is ruled by a mayor and city council, elected by the freeholders. This city is admirably situated for a commercial port, having equal facility of intercourse, foreign and domestic. Its markets are excellent, particularly for garden vegetables and for fruits, both local and from the numerous settlements on the great confluent of the Mississippi. The houses and population are both rapidly increasing, as may be seen by the following comparative view of its population of 1810 and 1820:

Population in 1810.

white males	-	-	-	3,586
do. females	-	-	-	2,745
Total whites				6,341
other persons except Indians, not taxed	-	-	-	4,950
slaves	-	-	-	5,961
Total population in 1810				17,242

Population in 1820.

white males	-	-	-	8,268
do. females	-	-	-	5,318
Total whites				13,584
persons of color, males	-	-	-	2,432
Do. do. females	-	-	-	3,805
slaves, males	-	-	-	2,709
do. females	-	-	-	4,646

Total population in 1820				27,176
Foreigners not naturalized	-	-	-	1,500
engaged in manufactures	-	-	-	2,704
do. in commerce	-	-	-	4,574
In 1810 the collective population of the city and parish was 24,552, of whom upwards of 17,000 inhabitants of the city. In 1820, the aggregate of the city and parish was:				
white males	-	-	-	11,675
white females	-	-	-	7,512
foreigners not naturalized	-	-	-	1,542
Total				20,793

Slaves, males	-	-	-	7,331
Slaves, females	-	-	-	7,615
Free persons of color, males	-	-	-	2,835
Do. do. females	-	-	-	4,326

Total of slaves and free colored persons - 22,107

Entire population - 42,900

Population in 1840.

White males	-	-	-	34,908
Do. females	-	-	-	24,616

Total whites - 59,524

Free colored males	-	-	-	8,422
Do. females	-	-	-	10,798

Total free colored - 19,220

Slaves, males	-	-	-	9,804
Do. females	-	-	-	13,650

Total slaves - 23,454

Total population - 102,198

New Orleans was laid out in the spring of 1717, and named in honor of the duke of Orleans, then regent of France, during the minority of Louis XIV. It remained in the hands of the French until 1769, when, together with all Louisiana, it was taken possession of by the Spanish general O'Reilly. It was again given up by Spain to France in 1803, and on the 20th of December of that year delivered to the United States by the French colonel prefect, Laussat.

New Orleans, parish of La., including the city of New Orleans, bounded by the Gulf of Mexico S., the interior of Lafourche and German coast, or Bernard, W., Lake Pontchartrain N., the Rigolets and Lake Borgne NE., and Plaquemine E. Length 80 ms., mean width 16; area 1,300 sq. ms.; lying between lat. 29 14 and 30 12 N.; the surface an almost undeviating plain, and mostly an unwooded grassy morass; the only arable parts the margins of the streams, and a few spots on the seacoast; vegetable productions, cotton, sugar, rice, tobacco, indigo, maize, figs, oranges, peaches, &c. Chief town, New Orleans. Pop. 1820, exclusive of the city, 14,175. Cent. lat. 30° N., lon. W. C. 13° W.

New Paltz, town, Ulster co., N. Y., 15 ms. below Kingston landing, and 7 ms. S. from Poughkeepsie. Pop. 1810, 4,612.

New Paltz Landing, post office, Ulster co., N. Y., on Hudson river, opposite Poughkeepsie.

New Paris, village, Preble co., O.; by post road 92 ms. a little S. of W. from Columbus.

New Philadelphia, village and seat of justice, Tuscarawas co., O. It is situated on the left bank of Muskingum river, on an extensive and beautiful plain, opposite the mouth of Sugar creek. It contains the co. buildings, several stores, and in 1840 pop. 1,885 of village and Goshen tp., in which it is situated. It is 50 ms. NE. from Zanesville.—Village, Hardin co., Ky., 5 ms. from Ohio river, and 35 SW. from Louisville.

New Pittsburg, village in Chester tp., Wayne co., O., 9 ms. NW. from Wooster.

Newport, borough of Eng., in Hampshire, and the chief town in the isle of Wight, with a manufacture of starch. It is seated on the river Cowes, which is navigable for small vessels 17 ms. S. by E. of Southampton, and 91 SW. of London. Lon. 1 16 W., lat. 50 42 N.—Borough of Eng., in Cornwall, 3 ms. N. of Launceston, and 214 W. by S. of London.—Town of Eng., in Shropshire, with a handsome free school, 17 ms. E. of Shrewsbury, and 139 NW. of London.—Town of Eng., in Monmouthshire, on the river Usk, 19 ms. SSW. of Monmouth, and 118 W. by N. of London.—Town of Wales, in Pembrokeshire, at the foot of a high hill, on a bay of the same name, 18 ms. NE. of St. David, and 250 WNW. of London.—Tp. of Buckingham co., L. C.—Town, Penobscot co., Me., 25 ms. W. from Bangor. Pop: 1820, 510.—Town, Cheshire co., N. H., 42 ms. NW. from Concord. Pop. 1810, 1,427; in 1820, 1,679.—SE. co. of R. I., bounded by Bristol co., in Mass., E., the Atlantic ocean S., the southern entrance of Narragansett bay W., and the northern arm of Narragansett bay and Mount Hope bay NW. Length 16, width 12 ms.; area about 100 sq. ms. It is composed of the islands of Prudence, Conanicut, Rhode Island, and a portion of the main shore E. from Narragansett bay. Surface generally waving, and soil, particularly on the island, highly productive. Staples, grain, flour, fish, live stock, &c. Pop. 1820, 15,771; in 1840, 16,874. Cent. lat. 41 35 N., lon. W. C. 5 45 E.

Newport, village, and, alternately with Providence, capital of R. I., 5 ms. from the Atlantic ocean, and on a small but very commodious bay, formed by a projection of R. I. proper and Conanicut island. Lon. W. from Greenwich 71 17, and E. from Washington 5 43, lat. 41 29 N.

The harbor is one of the best on all the Atlantic coast of the United States, and opens before the town into a noble circular basin, easy of access, land-locked on all sides, and commanded by the adjacent heights. Goat island, a small spot of ground at its outer entrance, contains Fort Wolcott and a U. S. navy hospital. The harbor is also defended by two other forts—Fort Green and Fort Adams.

Though much declined from its former comparative importance, Newport is still a flourishing town. The site rises by an elegant acclivity from the harbor, and again declines gradually in the rear, giving the aspect of a delightful swell to the whole place.

Newport contains a state house, market house, theatre, public library, almshouse, five banks, two insurance companies, eleven places of public worship—four Baptists, two Congregationalists, one Episcopalian, one Friends, one Moravian, one Methodist, and one Jewish synagogue.

In 1819 the amount of shipping owned in this town was near 11,000 tons.

The population of the town and that part of its vicinity included in the tp. as it stood in 1810 and 1820 are exhibited in the annexed table:

In 1810:				
Whites	-	-	-	7,277
Colored persons	-	-	-	630
Total	-	-	-	7,907

In 1820:

Whites	-	-	-	-	6,
Colored	-	-	-	-	-
Total	-	-	-	-	7,
And in 1840 aggregate	-	-	-	-	8,

The manufacturing establishments in this town and vicinity are numerous and important, consisting of five or six rum distilleries, one gin distillery, one duck factory, and numerous grain mills.

Newport, town, Herkimer co., N. Y., ms. from Herkimer. Pop. in 1810, 1,605 in 1817, 1,745.—Town, Cumberland co., N. J., 84 SSW. from Trenton.—Tp., Luzerne co., extending from Susquehanna river to Nescio mountain, between Nesqueopec and Hanover. 1820, 764.—Village, Perry co., Pa., 35 SW. from Harrisburg.—Village, Indiana Pa., on the right bank of Conemaugh river ms. NE. from Greensburg.—Village in 1 castle co., Del., 3 ms. SW. of Wilmington, about the same distance NW. of Newcastle has about 300 inhabitants, and carries on a considerable trade in wheat and flour between the cent counties and Philadelphia.—Vill., Ct. co. Md., 40 ms. SSE. from Washington, and ms. SE. from Port Tobacco.—Small river,erty co., Ga., opening from the sea by two mouths St. Catharine's and Sapelo sound. It is navigable for sloops to Riceborough.—Village, Washtenaw co., Ohio, in a tp. of the same name. The village is 11 ms. E. by N. of Marietta.—Village and seat of justice, Campbell co., Ky. Ohio and Licking rivers, above their junction opposite Cincinnati. The site is an elevated plateau. This town contains the common county building, a U. S. arsenal, and an academy, the latter endowed by the Legislature of Ky. with 100 acres of land.—Village, Vermillion co., 100 ms. from Indianapolis.—Town, Cocke's Tenn., on the left bank of French Broad river, 14 ms. E. from Knoxville.—Village, Franklin Mo., on Missouri river, about 60 ms. by land from St. Louis.

New Portage, post office, Medina co., Ohio, on post road 168 ms. NE. from Columbus.

New Portland, tp. and village, Somerset Maine.

Newport Pagnel, town of Eng., in Buckinghamshire. It has a manufacture of bone lace, and is seated on the Ouse, over which it has 2 bridges. 14 ms. ENE. of Buckingham, and 51 NNW. of London. Lon. 43' W., lat. 52 4 N.

New Preston, village, Litchfield co., Ct., 10 ms. SW. by W. from Litchfield, and 43 a S. of W. from Hatford.

New Prospect, village, Bergen co., N. J., on post road 88 ms. NE. from Trenton.

New Providence, town, Essex co., N. H., 12 ms. W. from Newark. Pop. 1820, 768.

New Richmond, village, Ohio tp., Cleves co., Ohio. It stands on Ohio river, 15 ms. N. from Williamsburg.

New river of Eng., for supplying London with water. This river has its rise at Amwell, near Ware, in Herts, and was formed by the great stream of Hugh Middleton, who was obliged, in order to avoid the eminences and valleys in the country, to make it run a course of about 39 ms., to

it over two valleys, in long wooden troughs with lead, that at Bushill being 660 feet in height and 30 feet in height, under which is an spacious enough to admit the largest wagon loaded with hay or straw. In short, over and under this river, which sometimes rises thus high, at others, is conveyed under the ground, runs at considerable currents of land waters, and above and below it a great number of brooks, and water courses. have their passage.

Wawa, river of Va., the former name of Kanawha.—See *Kanhawa*.

Wawa river, small stream of Onslow co., N. C., emptying into the Atlantic ocean by New Inlet, 45 ms. N. from Cape Lookout.—Small river of the north district, S. C., falling into the estuary of the Savannah river 18 ms. E. from Savannah.—

Wawa river, of Lou., draining the angle between the Mississippi and Armita rivers, flows E., and falls into the eastern extremity of Lake Maurepas.

Wawa Rochelle, village, West Chester co., N. Y., planted originally by French Huguenots. It is 10 ms. NE. of the city of New York.

Wawa Rochester, town of Williams co., post office at Rossville; which see.

Wawa Rowley, post office, Essex co., Mass., by road 35 ms. NNE. from Boston.

Wawa Rumbley, village, North tp., Harrison co., Va., Distance 11 ms. northerly from Cadiz, 30 northeasterly from Columbus.

Wawa Rury, borough of Ireland, in the co. of Down, situated on the side of a steep hill, at the foot of which is Newrywater, having over it two stone bridges; and there is a third bridge over a navigational bay, by which it has a communication with Neath and Carlingford bay. It is 49 ms. N. of Dublin. Lon. 6 20 W., lat. 54 15 N.

Wawa Rury, tp., Oxford co., Me., 25 ms. NW. from Newrywater, river of Ireland, which separates the co. of Armagh and Down, and, watering it, enters Carlingford bay.

Wawa Salem, town, Franklin co., Mass., 34 ms. N. of Worcester, and 81 in the same course from Boston.—Village, New London co., Ct., 10 ms. NW. from New London.—Village, Ontario co., N. Y.—Post office, Fayette co., Pa.

Wawa Village, Randolph co., N. C., by post road 10 ms. westerly from Raleigh.—Town near the northern limit of Jefferson co., Ohio, on the headwaters of Indian Cross creek, and 14 ms. W. by road from Steubenville.

Wawa Scotland, village, Albany co., N. Y., 9 ms. from Albany.

Wawa Tusham, village of Eng., in Durham, situated on the Tees, 5 ms. from Darlington.

Wawa Sharon, town, Kennebec co., Me. on the western side of Sandy river, 34 ms. NW. of Augusta, 10 ms. from the river Kennebec.

Wawa Shoreham.—See *Block Island*.

Wawa South Wales, or the eastern coast of New South Wales, extends from Cape York, lat. 10 1/2° S., to Cape Hickes, lat. 38° S., or through 1,870 ms. The coast is followed, after an interval of about 60 ms. by a chain of mountains. The slope between the mountains and shore is found covered by a forest of gigantic timber. This mountain range, like that of the Appalachian in the U. S., is very elevated. Mount York, in New South

Wales, the highest peak yet discovered, is only 3,200 feet, the breadth of the system 58 ms.

At the head of the harbor of Port Jackson, 15 ms. above Sydney, Paramatta, another town, has been founded. Windsor, 35 ms. from Sydney, Liverpool, 18 ms. a little S. of W. from Sydney, and Newcastle, 60 ms. N. from Sydney, are all rising villages. The most northern settlement of this colony is Port Macquarrie, lat. 31 23 S.—See *New South Wales*, p. 111.

New South Wales has been also applied as a name for that part of North America SW. from Hudson's and James's bays, and between Nelson's and Albany rivers. Length along the bay, 500 ms. Central lat. 54° N., lon. 88 W. London.

New Store, post office, Buckingham co., Va., 85 ms. westerly from Richmond.

New Switzerland, village, Switzerland co., O., on the right bank of Ohio river, 65 ms. below Cincinnati. The inhabitants are mostly Swiss emigrants, who have made some not unsuccessful attempts to cultivate the vine.

Newton, town of Wales, in Montgomeryshire, on the Severn, 7 ms. W. of Montgomery, and 169 WNW. of London. Lon. 3 12 W., lat. 52 21 N.—Town of Eng., in Lancashire.—Town of Eng., in Cheshire.—Borough of Eng., in the Isle of Wight.—Tp., York co., I. C., 40 ms. W. from Montreal.—Town, Middlesex co., Mass., on Charles river, 9 ms. W. from Boston.—

Village, Essex co., N. J., by post road 75 ms. NNE. from Trenton.—Town, Fairfield co., Ct., 8 ms. NE. of Danbury, and 25 NW. of New Haven. The tp. contained 3,000 inhabitants in 1810; and in 1820, 2,879.—Village, borough, and formerly seat of justice, Bucks co., Pa., on a small branch of Neshamony river, 26 ms. NNE. from Philadelphia.—Tp., Trumbull co., Ohio.—Tp., Muskingum co., Ohio, containing the village of Uniontown.—Village, Hamilton co., Ohio, in Anderson tp., on the E. side of Little Miami, 6 ms. from its entrance into the Ohio river.—Western tp., Miami co., Ohio. Pop. in 1820, 506.

Newton-Bushels, town of Eng., in Devonshire or the Teign, 15 ms. S. by W. of Exeter, and 188 WSW. of Lon. Lon. 3 38 W., lat. 50 32 N.

Newton Lower Falls, village, Middlesex co., Mass., 9 ms. W. from Boston.

Newtonstewart, town of Scotland, in Wigtonshire, situated on the navigable river Cree, over which there is a handsome bridge, and whose mouth, in Wigton bay, affords a valuable salmon fishery. Several manufactories have been commenced with success in this town. It is 26 ms. E. by N. of Port-Patrick.

Newtown, tp., Rockingham co., N. H., 10 ms. NW. from Newburyport.—Village, Fairfield co., Ct., 25 ms. NW. from New Haven.—Village and seat of justice, Chemung co., N. Y., on Tioga or Chemung river, 21 ms. NW. from Tioga Point, and 37 SW. from Ithica. Lat. 42 7, lon. W. C. 11' E. This village, now called Elmira, is situated at one point of an intended canal communication between the Susquehanna and St. Lawrence basins. It is very remarkable that, though the vicinity of Newtown is in general hilly, approaching to mountainous, a natural valley

extends from Chemung to Seneca lake, the summit level of which is only 59 feet above the level of the Chemung at Newtown, and 885 feet above tide water in Chesapeake bay. The following table will exhibit the respective levels of this route :

Table of ascents and descents from the level of tide water in the Delaware river, to the level of Lake Erie at Buffalo, by the route of the Schuylkill, Union Canal, Susquehanna, and Chemung or Tioga river, Newtown creek, Seneca lake and outlet, and the Grand Canal of New York, from Montezuma to Buffalo.

	Dist. ms.		Rises	Feet.
Philadelphia to Reading	55			186
Summit level between Tulpehocken and Swatara	34	89	do.	310 496
Susquehanna, at the mouth of Swatara	34	123	Falls	220 276
Harrisburg	13	135	Rises	10 285
Sunbury	50	185	do.	200 486
Wilkes-barre	60	245	do.	100 586
Tioga Point	60	305	do.	189 775
Newtown	20	325	do.	51 826
Summit level between the Tioga river at Newtown and Seneca lake	7	332	do.	59 885
Head of Seneca lake	13	345	Falls	445 440
Outlet of Seneca lake	35	380	do.	440
Montezuma, on the Great canal	20	400	do.	69 371
Commencement of Rochester level Along Rochester level to the locks at Lockport	63	463	Rises	126 497
Here commences the Erie level, which extends into that lake	65	528	do.	68 565
	31	559		

Newtown, village, Ottawa co., Michigan, situated on the southern point at the mouth of Grand river into Lake Michigan. N. lat. 42 58, lon. W. C. 9 6 W. Distant about 180 ms. NW. by W. of Detroit.—Tp., Queen's co., Long Island, 8 ms. E. from New York. Pop. in 1810, 2,437; in 1820, near 3,000.—Village, Queen's co., Long Island, in the foregoing tp., 8 ms. E. from New York, on East river. The celebrated species of apple, Newtown pippin, derives its name from this village.—Tp., Gloucester co., N. J., 5 ms. S. from Camden.—Town, Sussex co., N. J., 37 ms. NE. from Easton in Pa.—Tp., Bucks co., Pa., including the borough of Newtown.—Village, Frederick co., Md.—Village, Worcester co., Md.—Village, King and Queen co., Va., 41 ms. NE. from Richmond.—Village, Loudon co., Va., by post road 55 ms. from W. C.—Town, Hamilton co., O., on Little Miami, 6 ms. above its mouth.—Tp., Licking co., Ohio.—Tp., Cumberland co., Pa. Pop. in 1820, 1,144.

Newtown Limavady, borough of Ireland, in the co. of Londonderry, seated near the E. coast of Lough Foyle, 15 ms. ENE. of Londonderry.

Newtown Stevensburg, village, Frederick co., Va., by post road 80 ms. NW. from W. C.

Newtown Trap, village, Frederick co., Md.

New Trenton, village, Franklin co., Ia.

New Vernon, village, Morris co., N. J.

New Village, village, Sussex co., N. J., 56 ms. N. from Trenton.

Newville, village, Herkimer co., N. Y., 79 ms. NW. by W. from Albany.—Village, Cumberland co., Pa., 12 ms. nearly W. from Carlisle.—Village, Barnwell district, S. C., by post road 110 ms. SW. from Columbia.

New Washington, village, Clark co., Ia., 105 ms. SSE. from Indianapolis.

New Windsor, tp., Orange co., N. Y., on W. side of Hudson river, 60 ms. N. of York, and 95 S. of Albany. Pop. in 1810, 2, in 1820, 2,425.

New Woodstock, village, Madison co., N. Y.

New-Year's-Harbor, part of Staten Land, America. Lon. 64 11 W., lat. 54 48 S.

New-Year's-Islands, small islands of S. America, on the N. side of Staten Land. Great numbers of sea lions, seals, &c., resort to these islands.

New York, one of the States of the U. S. bounded SE. by the Atlantic ocean, S. by Jersey and Pennsylvania, W. by Pennsylvania and Lake Erie, and Niagara river, NW. by Lake Ontario and St. Lawrence river, N. by Lower Canada, and E. by Vermont, Massachusetts, Connecticut.

This State, from the peculiar position and of Staten and Long Islands, has a very extensive boundary :

- Commencing at the SW. point of Staten Island, thence up Staten Island sound, New York harbor, and Hudson river, to the NE. angle of New Jersey -
- Along the NE. limit of New Jersey to the Delaware river, at the mouth of Neversink river -
- Up Delaware river, opposite Pennsylvania Thence W. along the N. boundary of Pennsylvania -
- Thence due N. to Lake Erie -
- Down Lake Erie to the head of Niagara river -
- Down Niagara river to Lake Ontario -
- Along the S. shore of Lake Ontario to the head of St. Lawrence river -
- Down St. Lawrence river to lat 45° N. -
- Upon lat. 45° N. to Lake Champlain -
- Up Lake Champlain to Whitehall, at the junction of Wood creek and Poultney river -
- Up Poultney river along Vermont -
- Thence along the W. boundary of Vermont -
- Thence E. along the S. boundary of Vermont -
- Thence along the W. boundary of Massachusetts -
- Thence E. along the S. boundary of Massachusetts -
- Thence along the W. boundary of Connecticut to the mouth of Bryan river, on Long Island sound -
- From Malinicock Point on Long Island, opposite the mouth of Bryan river, to Montauk point, the eastern extremity of Long Island -
- Along the southern shores of Long and Staten Island to the SW. point of the latter -

Having an entire outline of -
This great State extends over 46,060 sq. or 29,440,000 acres.
Length from Staten Island, S. point, to 45°, 340 ms., breadth from SW. angle of Massachusetts to the western boundary 340. 30 to 45° N.

This State, extending over $4\frac{1}{2}^{\circ}$ of lat., and intersected by several mountain ridges, presents a diversity of soil and climate. Though the warm parts are less broken than those of the E. of it, yet the whole State, with very partial exceptions, is either hilly or mountainous.

The Hudson river flows from a mountainous region and is precipitated into a deep valley at its junction with the Mohawk. The Hudson is one of the most remarkable phenomena in the hydrography of the United States. From the mouth of the Hudson and Mohawk to Sandy Hook is a long narrow bay, rather than a river, 100 ms. in length. In this distance two chains of mountains are passed. The banks are for the most part abrupt, rising to 200 or 300 feet; in some places precipitous as the Basaltic rocks along the right bank above the city of New York, and in many other places above and below the High-

lands pass known by the term *highlands* is, in fact, a very remarkable feature in the geography of the State. Enormous walls of perpendicular rock rise on both banks to the appalling elevation of more than 1,000 feet. Broken into great varieties of form, rude and deep valleys, intervening between the gigantic prominences, and the whole covered by a thick forest, affords one of the most extensive landscapes to be found in North America. Here the great primitive ranges pass the ocean, and here the ocean tides find the only passage over this boundary into the interior which exists in the U. S.

The highlands are, in fact, the elongation of the range which passes through Pa., by a very high ridge, dividing Lancaster and Chester counties, and the NW. part of Chester from Berks, the NW. part of Montgomery from Berks, and Bucks from Lehigh, and, crossing Delaware below Easton, and through New Jersey, dividing Sussex county from the other parts of the State, enters N. York, and, following the northwestern parts of Rockland and the southeastern parts of Orange counties, crossing the Hudson above West Point, at the noted place we have reviewed. This chain continues into Connecticut, Massachusetts, and Vermont, forming in Connecticut the rugged hills of Litchfield, in Massachusetts the alpine, but fertile county of Berkshire, and in Vermont the elevated chain which gives rise to that State.

That is known in Virginia, Maryland, and Pennsylvania, by the name of Blue Ridge or South Mountain, which crosses the Potomac below the mouth of the Shenandoah, the Susquehanna below Harrisburg, and the Delaware below the extreme S. point of Wayne county, at what is called the Water Gap, and, following the course of the Delaware river, forms the northwestern border of New York, enters New York at the mouth of the Neversink river, or at the NW. angle of New Jersey. Shawangunk is the termination of this range of the Hudson.

The Kittatinny range is one of the most remarkable of all those which constitute the Alleghany or Appalachian system. The Kittatinny, though of much importance, has not been hitherto correctly shown upon any of our maps. It is the same range which, by several local names, crosses Va. and Md. from the sources of Tennessee and Great

Kanhawa, crosses the Potomac below Hancock, enters Pa., crosses the Susquehanna 5 ms. above Harrisburg, runs NE., and finally enters N. Y. in the NW. part of Sullivan county. The Kaatsbergs is a part, and the most elevated and prominent of the Kittatinny range.

An observation upon the very singular bend in the course of our mountains ought to be made in this place, as this change of direction takes place in N. Y.

If we glance upon the map before us, we find the range which forms the highlands, after passing the Hudson, changes its NE. to a N. course, in Dutchess county, and, winding through Mass. and Vt., enters L. C.

The Shawangunk is most probably continued in the ridges found in the central parts of Dutchess and Columbia counties.

The Kittatinny, forming the NW limits of Sullivan and Ulster counties, in N. Y., preserves the NE. direction into Greene county, where the range turns rather abruptly to the N. and NW., attains its greatest elevation in the town of Windham. Thence it ranges along the SW. part of Schoharie, the SE. of Otsego, along the southern parts of Herkimer and Montgomery, crosses the Mohawk by the Little falls, ranges through Herkimer, where it is known by the local name of the Sacondaga mountain. It thence ranges between the Oswegatche and Black rivers, crosses the St. Lawrence by the Thousand islands.

It has been ignorance of, or inattention to this fact of their true organization, which has introduced so much confusion in the delineation of our mountains. All the minor chains E. of the Hudson pursue a course very nearly N. and S. It has been the erroneously projecting of the mountains of N. H. in a NE. direction which has placed mountains between Maine and Lower Canada, where none exist. I am inclined to consider the mountains of N. H., extending in a direction very nearly N. from where they leave that State, to be identified with the precipices of Quebec, Montmorency, and the Chaudiere.

I have introduced these remarks in this place, in order to explain the strong features of N. Y., and the connexion between its natural geography and that of the adjacent places. We now proceed with the local physiognomy of that State.

We have examined the principal mountains which check the face of N. Y., and we have shown that the greater part of its surface is uneven. The only level tracts are the eastern margin of Long Island, a narrow strip along the S. side of Lake Ontario, and a few confined alluvial bottoms along some of the smaller rivers and creeks. The most marshy part of N. Y. lies in the angle between Lake Champlain and the St. Lawrence river.

It must be obvious that the climate phenomena of N. Y. must be very strongly marked. See *Long Island*, and for detailed description, the respective counties.

In a general view of N. Y., after its natural geography is surveyed, the next most prominent object it presents is its two great canals, which, however, from the general scope of our treatise, we cannot notice in detail.

Table of ascents and descents from tide water, in the Hudson river, at the city of Albany, to the level of Lake Erie, by the route of the great western canal of New York.

	Miles.	Rises	Feet	
Albany to Schoharie creek	42		235	
Rome level, at Herkimer	28	70	132	415
Along that level	65	135		
Montezuma	38	173	45	373
Lyons	24	197	61	434
Rochester level	58	255	65	499
Along that level	66	321		
Lake Erie level at Lockport			66	555
Along that level to Black Rock and into Lake Erie	31	559		

Table of the area of those parts of the U. States and Canada which has been opened to the commerce of the Hudson by the completion of the two N. Y. canals.

	Sq. ms.
Basin of Champlain	5,000
United basins of Oswego and Seneca rivers	7,500
Basin of Erie	27,000
Basin of Michigan	60,000
Basin of St. Clair	7,100
Basin of Huron and Nipising	40,000
Basin of Superior	90,000

From which deduct for water—	
Lake Champlain	1,100
Small lakes in the basins of Genessee and Oswego	240
Lake Erie	15,750
Lake St. Clair	750
Lake Huron	13,000
Lake Michigan	13,500
Lake Nipising	500
Lake Superior	30,000
Smaller lakes and rivers	2,000
	70,140

Remains for land - 166,160
Amounting to 111,129,600 acres.

This expanse nearly equals four times the superficies of the State of New York. Though more than one-third of the space we are surveying is in Canada, it may be here correctly included, as the course of commerce will be but little influenced by national boundaries.

The following tables exhibit the general, detailed, and progressive population of New York.

For political and civil purposes, N. Y. was in 1810 subdivided into cos. as follows, which, in order to show progressive population, is here republished :

Counties*	Pop. in 1810.	Pop. in 1820.
Albany	34,666	38,116
Allegany	8,942	9,330
Broome	8,130	14,394
Cattaraugus	-	4,090
Cayuga	29,843	33,897
Chautauque	-	12,568
Chenango	21,704	31,215

New York, city and county of New York, situated on Manhattan island, between Hudson river, East river, New York bay, and Harlem waterway. Lat. 40 42 N., and lon. 74° W. from London and 3° E. from Washington, 143 miles from Albany, 90 N.E. of Philadelphia, and 210 S.W. of Boston.

The city and county of New York are coextensive and occupy the whole of Manhattan island, which is about 12 ms. long, and averages 1 ms. wide with an area of 18 sq. ms.

The city of New York is composed of the city proper and Greenwich. The compactly built city commences at the battery, or point of connection between the Hudson and East rivers, and gradually becoming more scattered, the buildings extend between three and four miles up each river. The streets in the lower or ancient part are generally irregular, but the more modern streets are generally straight, and intersecting each other at right angles. The boast of New York, and perhaps of the United States, is Broadway, extending 80 feet upwards of 3 ms. No style of building characteristic

ideas characteristic of New York. The private buildings vary, from the old, heavy Dutch mode, to the utmost refinement and convenience of modern architecture.

Columbia College, (King's College before the Revolution,) was founded in 1754; it has a president and five professors.

Its exterior, New York has the most imposing appearance of any city in the United States. The view from the Battery of the harbor, Staten Island, and the adjacent shore of Long Island and New Jersey, has been very justly admired by almost every visitor. The harbor, or, more correctly, harbors of New York, are sufficiently extensive to admit the most numerous assemblage of shipping, and sufficient depth to admit vessels of nearly every largest class. Being open to the tides, it is in the very severest winters rendered inaccessible.

The principal mercantile harbor is that of New York, but the whole shore around from Corlears Hook to Greenwich is generally accommodated with docks for vessels of various descriptions. Steam packets, numerous team and steamboats cross the respective ferries from New York to Staten Island, Staten Island, and New Jersey. Regular lines of steam packets run from that city to Brunswick, the various towns on the Hudson as high as Albany, and to Providence, R. I.

It is in fine a city combining, perhaps, as many advantages as any other on the globe. Its position is admirably adapted to connect the foreign commerce and inland trade of the U. States. Two great canals uniting the basin of the Hudson with that of St Lawrence, by two very important points of contact, will add incalculably to the advantages of this great emporium. It is an astonishing fact that New York is now the largest city in the world in point of shipping tonnage, possessing more than one-half as much as London. In 1816, it amounted to nearly 100,000 tons. The annual custom-house receipts of the city amount to about one fourth part of the revenue of the United States. The revenue of the city itself amounts to near \$500,000 annually.

The following tables present the aggregate and successive population of the city New York.

Population in 1810.

Whites males	-	-	43,448
do. females	-	-	43,102
Total whites	-	-	86,550
Others persons except Indians not freed	-	-	8,137
	-	-	1,686
Total pop. in 1810	-	-	96,373

Population in 1820.

White males	-	-	55,312
do. females	-	-	57,508
Total whites	-	-	112,820
Persons of color, males	-	-	4,194
do. females	-	-	6,174
Slaves, males	-	-	177
do. females	-	-	341
Total pop. in 1820	-	-	123,706

Of these—

Of these, foreigners not naturalized	-	-	5,390
Engaged in agriculture	-	-	386
Engaged in manufactures	-	-	9,523
Engaged in commerce	-	-	3,142
Pop. to the sq. m.	-	-	6,872
The pop. of the city of N. Y. was—			
In 1697	-	-	4,302
1756	-	-	13,040
1790	-	-	33,131
1800	-	-	60,489
1805	-	-	75,770
1810	-	-	96,373
1820	-	-	123,706
1825	-	-	166,086
1830	-	-	202,589
1840	-	-	312,710

From the above, it is seen that the city of New York has more than doubled in the last 20 years, and it is probable that for at least a century in advance, this city will double its population in each 25 years; and if so, will contain—

In 1850	-	-	332,172
1875	-	-	664,344
1900	-	-	1,328,688
1925	-	-	2,657,376

See *Great Britain, London, United States*, and the *introduction to this treatise*.

New York, small town, Albemarle co., Va., 23 ms. W. from Charlotte.—Village, Champaign co., Ohio.—Village, Montgomery co., Tenn., 111 ms. NW. from Murfreesborough.

New Zealand, two large islands in the South Pacific ocean, divided from each other by a strait of about 12 ms. wide. They are each about 600 ms. long, and with a mean width of about 100. Lon. from 181° to 194°, lat. 34° to 38 S. The aborigines are savages. The British Government has formed one or two settlements, in which attempts have been made to introduce the art of civilized life among the natives.—See art. *Australia*.

Neyland, town of Eng., in Suffolk, with a manufacture of saize and baize. It is seated on the Stour, over which is a bridge, 16 ms. SW. of Ipswich, and 57 NE. of London. Lon. 1 5 E., lat. 52 1 N.

Neytracht, town of Upper Hungary, capital of a co. of the same name, with a bishop's see. It is seated on the Neytra, 40 ms. NE. of Presburg. Lon. 17 49 E., lat. 48 28 N.

Nezpique, river of Lou., the W. branch of the Mermentau. It rises about 40 ms. NW. from the town of St. Landre, in Opelousas, flows S., and joins the Plaquemine Brulé to form the Mermentau.

Ngan-King-fou, the capital of the western part of the province of Kiang-nan, in China; its situation is delightful. All the country belonging to it is level, pleasant, and fertile. It has under its jurisdiction only six cities of the third class. Lon. 116 45 E., lat. 30 35 N.

Ngan-lo-fou, rich and populous city of China, in the province of Hou-Quang, containing in its district two cities of the second, and five of the third class. It is 425 ms. W. by S. of Nanking.

Niagara, river, strait of North America, between Lakes Erie and Ontario. It is, strictly speaking, a strait uniting the two lakes. It commences by a rapid, 2 ms. NNW. from the town of Buffalo.

The rapid terminates at or a little below Black Rock, and, assuming a placid current, with a width from a half to one and a half mile, the river flows from Black Rock to the head of Grand Isle, 7 ms. with a course nearly NW. Here it divides into two large branches, which, encircling Grand Isle, again reunite 3 ms. above the falls. Now upwards of a mile wide, and gradually contracting in breadth and increasing in velocity, the whole mass approaches the great ledge, which forms the tremendous cataract of Niagara.

This ledge is itself a part of the vast floetz strata which stretches along the southern shores of Lake Ontario, crosses Niagara river, and reaches to an unknown distance into Canada.

Below Grand Isle the river turns to a course of nearly W., which it continues to the falls, where it abruptly curves to NE., which it continues about a mile, from whence it assumes a northern direction, which, with some partial bends, it continues to Lake Ontario. See the succeeding article, *Niagara Falls*.

Niagara Falls is a cataract in Niagara river, formed by the intersection with that stream of the great ledge noticed in the article *Niagara river*.

The following table exhibits the entire length of Niagara river, and the respective fall from Erie to Ontario.

	Miles.	Fall.
From Lake Erie to the head of the rapids	20	15 ft.
From the rapids to the head of the falls	1½	51
Great fall	-	162
From falls to Lewistown	7	104
From Lewistown to Lake Ontario	7	2
Entire distance and fall	35½	334

Standing on either side of Niagara river above the falls, the aspect of the adjacent country is that of a general level. Nothing announces an approach to the cataract, except the spray and cloud of vapour which rises from the surge below.

The water is precipitated over an immense mass of limestone rock, which forms the bed of the river. The width of the river in a straight line, at the falls, is three-fourths of a mile. But as its principal force is exerted in the centre, the brow of the precipice has been worn in the shape of a horse shoe, and its whole winding width is not less than a mile and a half. This distance is divided by a small woody island, called Goat island, near the American side, which divides the cataract into two. The elevation of this island above the surface of the stream is not very great, but it presents towards the NW. a bold perpendicular front of bare solid rock, the whole height of the cataract. The width of the fall between Goat island and the American side is about one-fifth of the whole, and that of the island itself another fifth, although the quantity of water on the British side is probably ten times as great as on the other. A bridge now connects the N. Y. shore to Goat Island.

The Table rock is a part of the Canada bank, which is on the margin of the great sheet of falling water. It furnishes altogether the most interesting view of the falls. The eye, looking up the river, beholds it tumbling with wild magnificence over the ledges of rocks, which, seen from this

place, seem close together, and appear to constitute a single broken cataract. This immense of waters, greatly increased in its rapidity by descent, and perhaps still more by the contraction of the river, rolls with an apparently instanter motion to the brow of the precipice, and slides over it into the abyss below. The depth of precipice, the roar of the cataract, the mass of waters, and, above all, the inconceivable exertion of power, overwhelm the mind with emotion, sublimity and grandeur, and fill it with new clearer views of the weakness and littleness of man.

From the surface of the stream beneath, on the Canada side, there arises a thick and condensed cloud of vapour, which mounts above the precipice to the height of more than 100 feet. In this weather three primary rainbows are frequently visible at once in various parts of this cloud. They, when the sun is near the horizon, appear as semicircles, and are often of singular lustre and beauty. Beneath the fall lies a thick mass of water, which, for a great extent, covers the surface of the banks of the river below are on the sides perpendicular, of solid rock, and of the height with those above the fall. They consist of this height 7 ms. to Queenstown. Here the cataract is supposed to have commenced after the deluge, and from this place to have worn its way backward to its present spot. No one who enters the ground will doubt for a moment that this has been the case; and those who have lived 20 years on the bank all attest this retrograde motion. These falls are in lat 43 5 N.

The following comparative table exhibits the relative heights of the most remarkable cataracts

Staubbach	-	-	-

Great falls of Potomac, about	-	-	-

Niagara, co., N. Y., bounded by Niagara W., Lake Ontario N., Genessee co. E., and Tonawanto or Erie S. Length 33 ms., mean width 20, area 660 sq. ms. Surface generally broken, though some tracts of level, and even marshy. skirt Lake Ontario and Tonawanto river. The ridge which forms the cataract of Niagara occupies the middle part of this county from W. to E. It is productive in grain and pasturage. The Erie canal passes through its SE. angle. Chief town, Lewistown. Pop. 1820, 22,990; and in 1840, 31,132. This, however, includes Erie co., and the latter was taken from Niagara co. since 1840. Central lat. 40 13 N., lon. W. C. 1 47 W.

Niagara, town and fort, Niagara co., N. Y. at the discharge of Niagara river into Lake Ontario. Lon. W. C. 2 6 W., lat. 43 14 N.

Niagara Falls, post office, 325 ms. a little of W. from Albany, and 20 ms. N. from Buffalo.

Nias, small island in the E. Indies, at the end of Sumatra. Lon. 97° E., lat. 1 10 N.

chano, town of Italy, in the duchy of Parma, 7 ms. W. of Parma. Lon. 10° E., lat. 45 5 N.

caburg, city of Persia, and the largest and best in Korassan, famous for a mine of turquois- in its neighborhood. It is 37 ms. S. of Behed. Longitude 57 48 E., latitude 36 30 N.

caragua, province of N. America, in Guata- ma, or Central America, bounded on the NW. by the Bay of Amoy, on the NE. by Honduras, on the E. by the At- lantic ocean, on the SE. by Costa Rica, and on the W. by the S. Pacific ocean, being about 500 ms. from SE. to NW., and 120 from NE. to SW.

It is one of the most fruitful provinces of Central America, and is well watered by lakes and rivers. The air is temperate and wholesome, and the country produces plenty of sugar, cochineal, and fine chocolate. Leon de Nicaragua is the capital. In the changes and improvements now rapidly advancing on the earth, there is no other country more likely to rise into great national importance than Nicaragua. In the great question of importance, where does nature afford most facilities for forming a navigable channel from the Atlan- tic to the Pacific? All echoes, as yet, respond to Nicaragua.

caragua, lake of N. America, between a pro- vince of the same name and Costa Rica. It is 100 ms. in circumference, has some islands in it, stretching from the city of Leon NW. to SE., and communicates with the Atlantic ocean by the river Juan. See art. *America*, p. 55, and also art. *Isthmus*. The range of Lakes Leon and Nicaragua and the river St. Juan is very nearly parallel NW. to SE., 300 ms., of which a little more than one-third is occupied by the St. Juan, the bay lying between latitudes 10½° and 12½°.

cararia, island of the Archipelago, between Icaria and Tina, ancient called Icaria, 50 ms. in circumference. The inhabitants are of the Greek nation, about 3,000 in number, and apply them- selves to swimming and diving for sponges, and are lost by shipwreck. Lon. 26 30 E. lat. 37 40 N.

castro, episcopal town of Naples, in Cala- bria Ulteriore, 17 ms. S. of Cosenza. Lon. 16 21 W. lat. 39 3 N.

ce, co. of Italy, bounded on the W. by the Var and the maritime Alps, which divide France, on the N. by Piedmont, on the E. by the territories of Genoa, and on the S. by the Mediterranean. It was anciently an appendage of Provence, in France, but has for many years belonged to the king of Sardinia. The in- habitants supply Genoa with timber for ship- building, and carry on a trade in paper, and other articles. It is 60 ms. long and 30 broad, and contains about 125,000 inhabitants.

ce, ancient and considerable city of Italy, capital of a co. of the same name. It is of a singular form, and confined in its situation, being a high rock on the E., the river Paglion on the W., and the Mediterranean on the S.; to which last it is separated by a beautiful and extensive terrace, used as a public walk. The harbor is on the E. side of the rock, and called *Stabia*, from a small river that falls into it. The exports are silk, sweet oil, wine, cordials, rice, oranges, lemons, and all sorts of dried fruits. Lon. 14 ms. E. of the mouth of the Var, and 83 S.

by W. of Turin. Lon. 7 23 E., lat. 43 42 N. —City of Asia. See *Isnic*.

Nicolas, St., town of Fr. in the dep. of Meur- the, and late province of Lorraine, with a hand- some church, dedicated to St. Nicholas, to which pilgrims formerly resorted from all quarters. It is seated on the Meurthe, 5 ms. SE. of Nancy, and 265 E. Paris.—Seaport of Russia, in the government of Archangel, seated at the mouth of the Dwina, on the White sea, 6 ms. S. of Arch- angel.

Nicholas, St., or *Mole St Nicholas*, town, harbor, and cape of the West Indies, at the SW. ex- tremity of St. Domingo, commanding the strait called the Windward passage. The harbor is very capacious at the entrance, and ships of any burden may ride at anchor in the basin, during the greatest storm. It was taken by the English, aided by the French royalists, in 1793. Lon. 73 20 W., lat. 19 15 N.

Nicholas, St., one of the largest of the Cape de Verd islands, between St. Lucia and St. Jago. It is 75 ms. in length, and the land is stony, mountainous, and barren. Lon. 14 10 W., lat. 16 32 N.

Nicholas, co. Va., bounded by Bath NE. and E., Monroe SE. and S., and by Greenbriar W. and NW. Greenbriar passes through this co., from NE. to SW., dividing it into two nearly equal sections. Surface very hilly and moun- tainous. Chief town, Lewisburg. Length 40 ms., mean width 20, area 800 sq. ms. Pop. in 1820, 1,853; and in 1840, 2,515. Central lat. 28 20. lon. W. C. 3 40 W.

Nicholas, C. H., and post office, Nicholas co., Va., by postroad 325 ms. SW. by W. from W. C., and 277 NW. by W. from Richmond.

Nicholas, co., Ky., bounded by Bath SE., Bourbon SW., Harrison W., Bracken NW., Mason NE., and Fleming E. Length 30 ms., mean width 12, area 360 sq. ms. Chief towns, Ellisville, Millersville, and Carlisle. Pop. in 1820, 7,973; and in 1840, 8,745. Central lat. 38 26 N., lon. W. C. 6 42 W.

Nicholasville, town and capital, Jessamine co., Ky., 15 ms. SSW. from Lexington, and 30 SSE. from Frankfort.

Nicholasburg, town of Germany, in Moravia, with a castle, 27 ms. N. of Vienna.

Nicobar Islands, several islands at the entrance of the Gulf of Bengal. They are almost entirely uncultivated; but the cocoanut, the mellori, or lerum, (a kind of bread-fruit,) and other tropical fruits, grow spontaneously to the greatest perfec- tion. The inhabitants are said to be a harmless sort of people, low in stature, but very well made, and surprisingly active and strong. They are naturally good humoured and gay. There subsists among them a perfect equality. A few aged people have a little more respect paid them, but there is no appearance of authority over one an- other. These islands extend northward from the N. point of Sumatra. The largest of them, which gives name to the rest, is 40 ms. in length, and 15 in breadth. Its S. extremity in lon. 94 23 E., lat. 8° N.

Nicojack, remarkable cave, or cavern of the Lookout mountain, in the Cherokee country, out of which flows an immense stream of water. It is

about one mile and a half from Tennessee river, and near where the boundaries of Georgia and Alabama reach that stream.

Nicolayef, city of Russia, in the government of Catharinenslaf, founded by Catharine II., on the S. side of the Ingul, at its conflux with the Bog. The public buildings, and a number of private houses, are constructed of a white calcareous stone, but the rest of the houses are of wood. This place being of easier access by water for vessels than Cherson, it is now the capital of the naval establishment of the Black sea. The admiralty, with a long line of magazines, workshops, wet and dry docks, and every necessary department for shipping, are placed along the banks of the Ingul. It is 30 ms. NNE. of Oczakow, and 45 NW. of Cherson. Lon. 30 46 E., lat. 46 58 N.

Nicolet, river of L. C., rises in Buckingham co., by two sources, which flow NW. between Becanour and St. Francis rivers, unite about 60 ms., and fall into the lower end of Lake St. Peter, 10 ms. above Three rivers.—Seigniorly, Buckingham co., L. C., on Lake St. Perer, and on both sides of Nicolet river.

Nicolo, *St.*, the most considerable and most populous town of the isle of Tremeti, in the Gulf of Venice. It has a harbor, defended by a fortress, in which is an abbey and a church. Lon. 15 37 E., lat. 42 10 N.

Nicomedia, town of Turkey in Asia, in Natolia, now called Ischmich, or Schmit, and written Ismid, Izmid, Is-Nick-Mid, &c. All these are mere inflections of the original names. The Turks have been supposed in many cases to have imposed new names of places, but which change rose from their inability to pronounce the sounds of European languages. The eastern part of the Marmora sea branches into two triangular gulfs, extending eastwards, and terminating by sharp angles. Nicomedia stands on or near the head of the northernmost of these gulfs. It was formerly a large place, as appears by the fine ruins; and now contains 30,000 inhabitants, who consist of Greeks, Armenians, and Turks. It is still a place of consequence, and carries on a trade in silk, cotton, glass, and earthenware. It is the see of a Greek archbishop, and is 50 ms. SE. by E. of Constantinople. Lon. 29 30 E., lat. 40 30 N.

Nicololi, town of European Turkey, in Bulgaria, famous for a battle fought between the Turks and Christians, in 1396, when the Emperor Sigismund was defeated, and had 20,000 men killed. It is seated on the Danube, at the influx of the Osmia, 60 ms. SSW. of Bucharest, and 150 NW. of Adrianople. Lon. 25 43 E., lat. 44 16 N.

Nicololi, an ancient town of Armenia, built by Pompey the Great, in memory of a victory gained over Mithridates. It is seated on the Cerauna, 165 ms. SW. of Erzerum. Lon. 37 55 E., lat. 38 15 N.

Nicosia, strong town, capital of the island of Cyprus, and the residence of a Turkish bashaw, delightfully seated between the mountain Olympus, and a chain of other mountains. It was formerly well fortified by the Venetians, but now the works are in ruins. It is 3 ms. in circumference; and there are plantations of olives, almonds, lemons, oranges, mulberries, and cy-

press trees, interspersed among the houses, which give to the town a delightful appearance. The church of St. Sophia is an old Gothic structure which the Turks have turned into a mosque and destroyed the ornaments. It is 100 ms. N. of Tripoli, and 160 SW. of Aleppo. Lon. 34 54 E., lat. 34 54 N.—Town of Sicily, in the Demona, 12 ms. S. of Cefalù.

Nicotera, town of Naples, in Calabria Ultra near the coast of the Mediterranean, 35 ms. N. of Reggio, and 185 SE. of Naples. Lon. 16 51 E., lat. 38 34 N.

Nicoya, town of Central America, in Costa Rica, situate on the Dispensa, which runs to the Bay of Salinas, where there is a pearl fishery. It is 98 ms. WNW. of Cartago. Lon. 83 45 W., lat. 10 40 N.

Nicsara, town of Asiatic Turkey, in Carmania, and an archbishop's see, 10 ms. N. of Tarsus. Lon. 36 9 E. lat. 39 25 N.

Nidau, town of Switzerland, capital of a canton, in the canton of Bern, with a castle, situated on the Lake of Biel, 15 ms. NW. of Bern.

Nidda, town of Germany, in Wetterau, seated on a river of the same name, 20 ms. S. of Frankfurt.

Nideckan, town of Germany, in the circle of Westphalia, and duchy of Juliers. It is situated on a rocky mountain, and is 13 ms. S. of Juliers. Lon. 6 16 E., lat., 50 46 N.

Nijbadad, small town of Hindoostan Proper, 80 ms. NNE. of Delhi. Lon. 78 41 E. lat. 29 35 N.

Niebla, town of Spain, in Andalusia, seated on the Rio Tinto, 40 ms. W. of Seville. Lon. 5 56 W., lat. 37 26 N.

Niederbieber, village of Germany, in the principality of Wied, 3 ms. from Neuwied. Many valuable antiquities, and the traces of a Roman city were discovered here in 1791.

Niamecz, strong town of Moldavia, between Soczoway and Brassaw, being 25 ms. from Jassy. Lon. 26 16 E., lat. 48 58 N.

Niemen, large river of Poland, which rises in Lithuania, and passes by Bielica, and Grodno, it afterwards runs through part of Samogitia, and Eastern Prussia, where it falls into the arm of the sea, called the Curisch-haff, by several mouths of which the most northern is called the Memel, being the name of the town it passes by. It is united to the Dnieper by the canal of Oginski. See *Oginski*. Below the junction of the Niemen and Vilia, the united stream is generally known as the Memel. The comparative length of the Memel, by either branch is about 250 ms.

Nienburg, town of Germany, in the circle of Lower Saxony, in the duchy of Brunswick-Lüneburg, with a strong castle. It carries on a considerable trade in corn and wood, and is a rich and strong town; is seated on the Weser, 30 ms. NW. of Hanover, and 37 SE. of Bremen. Lon. 9 26 E., lat. 52 45 N.

Nien Closter, town of Lower Saxony, in the bishopric of Schwerin, 3 ms. E. of Wismar.

Nienhuis, town of Germany, in the circle of Westphalia, seated on the Lippe, 20 ms. E. of Liepstadt. Lon. 8 55 E., lat. 51 50 N.

Nieper.—See *Dnieper*.

Niestadt, town of Germany, in Lower Saxony,

duchy of Mecklenburg, 15 ms. S. of Schwe-
Lon. 11 46 E., lat 53 59 N.—Town of
in the Middle Marche of Brandenburg.
and on the Fuyhre, 25 ms. NE. of Berlin. Lon.
E., lat. 52 49 N.

ester.—See *Dniester*.

port, seaport of Austrian Flanders, seated
the German ocean, at the mouth of the Yper-
It is 9 ms. SW. of Ostend, and 16 NE. of
kirk. Longitude 2 45 East, latitude 51 7

ger, large river of Africa, formerly very little
n. In order to ascertain the rise, course, and
nation of the Niger, Mr. Parke was sent out
the African association in 1795. The course
the river, which was formerly supposed to be
E. to W., has been determined by Mr. Parke
W. N. through the country of Mandingo, and
to take an easterly course through the king-
of Bambara, Tombuctoo, Trocur, and Gha-
lo Wangara, where it divides into several
es. The Moors and Arabs call it Neel il
d, or river of Slaves, and Neel Kibeer, or
river. In the rainy season it swells above
links, and floods the adjacent lands. Since
expeditions of Mr. Parke, several subsequent
have been fitted out by the British Govern-
to explore this stream, and to determine its
and point of discharge. All those expedi-
have proved unfortunate and abortive, as to
tain object of research. It is, however, a
ct of no reasonable doubt but that it flows
the Atlantic ocean. Its connexion with the
is rejected by the best geographers. The
lar obscurity and contradictions respecting
great stream which prevail in our books are
pachful to modern science. In 1819 the au-
of this treatise wrote a memoir to show the
bility that the Niger had its outlet in the At-
ocean. This memoir was published in the
frican Magazine. The following is a brief out-
of the arguments there used: Examining a
of northern and central Africa, we perceive
Niger flowing from the Kong mountains, hav-
gs sources about lon 7° W. of London, and
2° N. Pursuing a course of NE. by E. to
buctoo, in lat. 16 30 N., and 1 30 E. of Lon-
Below Tombuctoo, this now considerable
er inclines eastward, gradually inflecting to
e., continues through upwards of 20° of lon
lly lost to science, and leaves the residue of
urse a mysterious subject of hypothesis. The
o mountains and the Niger maintain a very
similar course, leaving a vaguely known in-
of from 3 to 400 ms. The known towns
the Niger are Sego, Silla, Tombuctoo, Housa,
ana, and Ghana. Between lon. 20 and 27°
London, two rivers are laid down, which
irectly towards each other—the Bahr-Kuku,
the Tibboo of Bilma, and the Bahr-Miselad,
the Gibel Komri, or Mountains of the Moon.
of these rivers are discharged into Lake Fitre,
hich recipient a third river is discharged,
nally joins the Niger in the lower Wan-
re. The Kuku, flowing from the N., the Mis-
om the S., and their continuation below
Fitre to the SW., meet the Niger from the
W. Thus Wangara is a complete assemblage of
and is found marshy, full of lakes and in-

terlocking streams, presenting the general aspect of
an estuary,

Thus far the geography of the Niger is certain.
The relative positions are no doubt distorted, but
the leading objects are known to have a real exist-
ence. It is impossible to pay due attention to this
part of the map of Africa, without perceiving the
general source of controversy on the course and
termination of the Niger. Every author who has
written on this stream has given its course from
what he conceived the best source of information.
The existence of a great central African river,
flowing to the E., was known to Herodotus, and
communicated to Europe by some Nassomianians
from the Mediterranean coast. All the Greek and
Roman authors, from Herodotus to Ptolemy, give
the Niger its real course.

Edrisi, an Arabian author, upwards of 15 cen-
turies after Herodotus, first introduced doubt and
confusion into this part of geography, by repre-
senting the Niger flowing westerly. Edrisi was
followed by other Arabian authors. Though lead-
ing to a false general conclusion, the data used by
Edrisi and his followers was correct. They delin-
eated the Niger and Nile as flowing from the same
chain—the latter to the NE., and the former to the
NW. The Niger of Edrisi, and the Arabian au-
thors generally, was most probably the Miselad;
and it is also extremely probable that the very ex-
istence of the great western stream now known as
the Niger was not suspected by these writers. The
Miselad and Bahr-Abiadh, or real Nile, are now
distinctly known to flow from the same mountains,
and exactly as laid down by Edrisi. As soon as
the real Niger was rediscovered, and found flowing
eastward, an interminable controversy ensued, and
yet Europe itself presents a very similar position
to Wangara, in the collected waters of the Danube
above Orsova—the Teiss flowing from the E., the
Save and Drave from the W., and the real Dan-
ube from the N., and all forming the marshy fens
of Temesvaer. Who would suspect the ultimate
termination of the Danube, who only knew the
confluent streams above the mountain pass of
Orsova?

The United States present another instance sim-
ilar to Wangara. The lower Tennessee, flowing
N., meets the Ohio from the NE., and both are
quickly joined by the accumulated waters of Mis-
sissippi and Missouri from the N., W., and SW.
If the courses of Ohio, Cumberland, Tennessee,
Wabash, Mississippi, Missouri, and Osage, were
known, whilst their confluence and continuation
remained undiscovered, a great inland sea would
be supposed to occupy lower Kentucky, lower
Tennessee, and lower Missouri.

In respect to the Niger, whilst the courses of
the main stream, the Bahr-Kulia, and Miselad,
have been developed, their continuation remains
to be explored. Major Rennel, and, after his ex-
ample, many others of less talent, adopted the idea
of an interior Caspian, or an egress by the Egyp-
tian Nile. This school of geographers found an
impassable barrier in a supposed unity of the Kong
and Gibel Komri mountains. Major Rennel him-
self combatted, with much ingenuity, the hypothe-
sis of any communication between the Niger and
Nile, but adopted that hypothesis, already noticed,
of an interior detached recipient. Major Rennel

adopted another hypothesis, now found also incorrect: he supposed the Sahara lower than the valley of the Niger. The southern course of the rivers ought to have at once precluded the existence of such an error.

Another source of controversy arises from the different orthography of the same name. Is it not almost certain that Wassannah, Kassina, Gana, Guinee, Guinea, are not different modifications of the same word, or that these names are derived from a common root? Itineraries yield in almost all instances very erroneous results, as respects distance and relative position.

Combining, therefore, all accounts of the Niger, we are fully justified in considering Wangara or Gongara as an alluvial region, formed by an assemblage of rivers, from which the accumulated mass of waters is discharged by a mountain pass, and that the Atlantic ocean is the final recipient.

Since the preceding was written, I have had the advantage to read Malte Brun. This great geographer adopts the opinion that the Niger debouches into the Atlantic ocean, but assumes from Reichardt the Bight of Benin, and not the Zaire, as the point of final discharge. In book ix, this author admits the possibility of a communication between the Nile and Niger, but similar to that of South America, between the Amazon and Orinoco, by the Cassiquari and Negro rivers. In book lxxvii, Malte Brun recapitulates, with great perspicuity, the arguments by which M. Reichardt supposed the Bight of Benin to be the recipient of the Niger, and, though the former does not actually submit to the opinion of the latter author, it is obvious that his mind felt the force by which the conclusion was supported.

If the Niger is actually discharged by the Bight of Benin, it must have an entire course equal to 45° of a great circle, or upwards of 3,000 ms., and will be, of course, one of the greatest rivers of the earth,

It is now (1843) fully ascertained that the Niger is discharged in the manner suggested above. Every concurrent testimony, indeed, sustains the conclusion that the immense open gulf of western and tropical Africa is the recipient of one or two very great and many minor rivers, of, however, still considerable magnitude.—See *Nile* and *Zaire*.

Nigritia.—See *Negroland*.

Nihau, or *Neeheow*, one of the Sandwich group.—See table 2d col., p. 115.

Nikoping, town of Denmark, capital of the island of Falster, or Hulster, in the Baltic, with a strong fort, 55 ms. SW. of Copenhagen. Lon. $12^\circ 7' E.$, lat. $54^\circ 50' N.$ —Town of Sweden, in Sudermania, 60 ms. SW. of Stockholm. Lon. $16^\circ 40' E.$, lat. $58^\circ 40' N.$

Nile, great river of Africa. Mr. Hodgson, on the name of this most remarkable river, derives it from an original term meaning the sea. The probability is, that in the infancy of languages large rivers would be naturally designated by terms meaning "great waters."—See *Mississippi*. The very name of this interesting stream recalls our ideas to the most primitive times. We involuntarily recur to the dawn of history and geography, not more fabulous or mysterious in their origin than this emblem of time, the Egyptian Nile. Modern science has, however, in part laid open

the hidden sources of this mighty stream, and traced its springs to the central mountains of Africa. A much abused man, (James Bruce,) with industry, gallantry, and some share of talent, penetrated to the source of the middle branch of Nile; but, though entitled to more credit than he received, Bruce was ignorant of the very source of the Bah el Abiadh, or White river, the Nile.

The distance across the higher sources of Nile, from the SW. sources of White river to the head of Tacazzé, is about 1,200 ms., and from the junction of the Nile and Tacazzé to the mouth of the Moon, 700 ms. The whole of the Nile basin spreading in form of an immense triangle, 1,200 ms. base and 700 perpendicular, and an area of 420,000 sq. ms.

Below the mouth of the Tacazzé commences a lower basin, which extends from N. lat. $13^\circ 32'$, over 14° , or, following the winding course of the stream, 1,200 ms.; but the lower basin cannot be estimated above 10 ms. mean width, of course comprises only 12,000 sq. ms. Combining the two basins, this great river drains 432,000 sq. ms.

In one circumstance the Nile is alone; and in that of 1,200 ms. without a confluent is a phenomenon altogether unparalleled in the natural history of rivers.

The most important, however, of the features of this fine stream is the difference of level between the Delta and higher basin. The plains of the Nile are depressed at least 10,000 feet below the level of the land of Abyssinia. Thus, though the Nile flows from S. to N., the climate and vegetable productions of its basin evince a change of temperature reverse to the latitude. This is so far the case in even Upper Egypt, in N. lat. 25° , is more heated than are the mountain valleys of Abyssinia, in N. lat. 10° .

The elevation of flood necessary to inundate Egypt has been increasing. According to Herodotus in Euterpe, 1,700 years before the Christian era, 8 cubits covered the Delta. When Herodotus was himself in Egypt, it demanded 15 cubits, and it now requires 22 to produce a similar effect. Is not the true cause of this revolution found in a gradual diminution of the level of the Mediterranean?

The inundation diminishes as the river approaches its recipient; the inundation is one-sixth more at Assouan, or Syené, than at Cairo, 300 ms. below; and when it rises 27 feet at Cairo, it rises only about 4 at Rosetta and Damietta. This cannot be entered from the sea, at ordinary tides, with more than 7 or 8 feet water by either mouth, but within the bars has generally water for draught of 40 tons to Assouan, and at the lowest is navigable for small boats. Though in great part inhabited by barbarians, the basin of the Nile may be regarded with deep interest amongst the divisions of the habitable earth.

Whether a part of the water of the Nile could not be diverted into the Red sea has long been a subject of hypothesis for ages. It appears to be well authenticated as an historical fact, that a canal did formerly exist along this route, but on the principles constructed is uncertain. From the superior elevation of the Nile in Upper Egypt, or the Red sea, it would deserve very careful study.

termine whether, under the influence of sci-
entific and commercial enterprise, an artificial branch
can be led from Upper Egypt round the moun-
tains to the SE. of Cairo. Such a project was con-
sidered by the Portuguese when in possession of
the East Indian commerce, but neither by them or
has it ever actually attempted.—See *Africa*, p. 9,
Red Sea, *Abyssinia*, &c.

Niles, SW. tp. of Scioto co., Ohio. Pop. in
1850, 524.

Nieuwen, city of Holland, capital of Guelder-
land, with a citadel, an ancient palace, and several
churches. It is also the capital of a country of its name,
situated on the island of Betuwe, the ancient Batavia,
situated on the Waal, 35 ms. SE. of Utrecht,
and 10 NE. of Antwerp. Lon. 5 45 E., lat. 51

15 N.—See *Nismes*.

Nishillen creek, considerable stream, rising in
the northern part of Stark co., Ohio, and running
wholly in a S. direction above 40 ms. into the
eastern quarter of Tuscarawas co., where it unites
with Sandy creek, when the joint stream flows W.
and then into the E. side of Tuscarawas river.

Nishillen, tp., Stark co., Ohio, situated on
the above described creek, northeasterly from Can-

Nisson's Mills, village, Wayne co., Ohio, by
the road 92 ms. NE. from Columbus.

Nit bridges, town, Caroline co., Md.

Nit village, Frederick co., Va., 84 ms. W.
of N. C.

Ning-Koue-fou, city of China, in the province
of Kiang-nan, noted for its manufacture of paper.
It is made of a species of reed, and containing in its
structure 6 cities of the third class.

Ning-fo-fou, called by the Europeans *Liampo*,
an excellent seaport of China, on the E. coast, oppo-
site to Japan, in the province of Tchekieng.
This city has four others under its jurisdiction, be-
cause of its great number of fortresses. It is 850 ms.
from Peking. This city, now called by the Euro-
peans Ningpo, is situated very nearly on N. lat.
and about 150 ms. southwardly from the mouth
of the Blue river. By the late English writers it
is described as a splendid emporium, abounding in
merchandise and built with elegance.

Ningouta, city of Mantshuria, in the department
of Lin. It is surrounded by a wooden wall,
and enclosed by plain stakes driven into the earth.
About this palisade there is another of the same
kind, a league in circumference, which has 4 gates
corresponding to the four cardinal points.

Ningho.—See *Ning-fo-fou*.

Nioa, town of the kingdom of the Netherlands,
situated on the river Dender, with an abbey, 13 ms. W. of
Brussels. Lon. 4 5 E., lat. 50 52 N.

Nioa, island of the Archipelago, to the S. of
Java, anciently called Jos. It is 35 ms. in cir-
cumference, and fertile in corn, but has very little
oil. It has several commodious harbors,
but is remarkable for nothing but Homer's tomb,
said to be buried here. Lon. 25 35 W.,
lat. 43 N.

Nivert, town of France, in the department of
Indre-et-Loire, and late province of Poitou. Its
wines and sweetmeats are much esteemed, and it is noted
for its manufactures of coarse woolen goods. It is
situated NE. of Rochelle. Lon. 33' W., lat. 46 20 N.

Nipegon Lake, U. C., lies to the northward of
Lake Superior, about half way between it and
Albany river, James's bay.

Niphon, largest island of Japan, 600 ms. long
and 150 broad, containing 55 provinces. It was
discovered in 1542 by the Portuguese, who were
cast on shore by a tempest. The chief town is
Jedo. It is 134 ms. E. of China.

Nipissing Lake, lies NE. of Lake Huron, and
is connected with it by the river Francois.

Nishnei Novogorod, town of Russia, in a gov-
ernment of the same name.—*Novogorod Niznei*.

Nisiben, or *Nisbin*, ancient *Nisbis*, very an-
cient and celebrated town of Diarbeck, now only
the shadow of what it was, and seated in a vast
plain, 70 ms. SW. of Diarbekar. Lon. 38 26 E.,
lat. 36 10 N.

Nisita, small island on the coast of Naples,
very fertile, and would be more productive but
for the great number of rabbits. It has a har-
bor, called Porto Pavone.

Nismes, flourishing city of Fr., in the depart-
ment of Gard, and late province of Languedoc.
Here are several monuments of antiquity, of which
the amphitheatre, built by the Romans, is the prin-
cipal. The Maison Quaree, or the square house,
is a piece of architecture of the Corinthian order,
and one of the finest in the world. The temple
of Diana is, in part, gone to ruin. Nismes was
taken by the English in 1417. The population
of Nismes is computed at 50,000. It is seated in
a plain abounding in wine and oil, 12 ms. NW.
of Arles, and 75 NE. of Narbonne. Lon. 4 26
E., lat. 43 51 N.

Niskayuna, village and tp., Schenectady co.,
N. Y. The village is owned and inhabited prin-
cipally by the sect called Shakers. It is 12 ms.
NW. from Albany.

Nissa, or *Nessava*, town of Turkey in Europe,
in Servia, seated on the Moravia, 20 ms. E. of
Precop, and 120 SE. Belgrade. Lon. 22 32 E.,
lat. 43 32 N.

Nith, river of Scotland, in Dumfriesshire, which
issues from a lake in the mountains to the NW.,
and, passing the towns of Sanquhar, Morton, and
Drumlanrig, joins the Cairn a little above Dum-
fries, and their united streams form a fine estuary
in Solway Frith.

Nithsdale, division of Dumfriesshire, Scotland,
lying to the W. of Annandale. It is a large and
mountainous country, and derives its name from
the river Nith. It was formerly shaded with noble
forests, which are now almost destroyed. It yields
lead, and the mountains are covered with sheep
and black cattle.

Nitria, famous desert of Egypt, 37 ms. in
length, on the coast of the Mediterranean sea. It
had formerly a great number of monasteries, which
are now reduced to four; and it takes its name
from a salt lake, out of which is got the natrum of
the ancients.

Nivelle, town of the kingdom of the Nether-
lands, in Brabant, remarkable for its abbey of no-
ble canonesses, whose abbess is styled princess of
Nivelle. The place enjoys great privileges; and
has a manufacture of cambricks. It is 15 ms.
SE. of Brussels. Longitude 4 36 E., lat. 50 35
North.

Nivorno, late province of Fr., between Bur-

gundy, Bourbonnois, and Berry. It now forms the dep. of Nièvre.

Nixabour, town of Persia, in Korasan, 80 ms. SE. of Mesched. Lon. 61 32 E., lat. 35 40 N.

Nixapa, or *Nijapa*, considerable town of Mexico, in Oajaca. The country near it produces a great deal of indigo, cochineal, and sugar. It is 30 ms. SE. of Antiquiera. Lon. W. C. 18 45 W., lat. 15 42 N.

Nixon's, post office, Randolph co., N. C., 81 ms. SE. from Raleigh.

Nixonton, village, Pasquotank co., N. C., on the E. side of Little river, 35 ms. NE. of Edenton, and 13 SW. of Jonesburg, on Pasquotank river.

Nizza-della-Paglia, town of Italy, in Montferat, seated on the Belbo, 15 ms. SW. of Alessandria. Lon. 8 36 E., lat. 45 15 N.

Noanagur, town of Hindoostan proper, situated on the S. coast of the Gulf of Cutch. It is the capital of a district inhabited by a piratical tribe, called Sangarians. It is 300 ms. NW. of Bombay.

Noble, NE. tp. of Morgan co., Ohio.

Nobleborough, town, Lincoln co., Maine, situated on the E. side of Kennebec river.

Noblesville, village, Hamilton co., Ia., 25 ms. N. from Indianapolis.

Nockamixon, tp., Bucks co., Pa., on the SW. side of the river Delaware, between Tinicum and Durham, and opposite Alexandria in N. J. Pop. 1810, 1,207; in 1820, 1,650.

Nocera, ancient town of Italy, in the duchy of Spoleto, at the foot of the Appennines, 18 ms. NE. of Spoleto. Lon. 12 49 E., lat. 43 1 N.

Nocera-di-Pagani, town of Naples, in Terra di Lavora, 15 ms. S. of Naples. Lon. 14 20 E., lat. 40 36 N.

NODE, *knot*, points of the Heavens where the planetary orbits cross the ecliptic. The moon in passing round the earth passes the ecliptic twice, which affords a familiar example of the nodes.

Nogurcot, town of Hindoostan proper, noted for a celebrated pagoda. It lies in the province of Napoul, and is 50 ms. NE. of Catmandu. Lon. 85 12 E., lat. 28 40 N.

Nogayans, name of a Tartar nation which occupy the deserts on the northern side of the Euxine and the Caspian seas, and on the northern side of Mount Caucasus, besides several settlements to the W. and NW. of the Euxine, in such a manner that they occupy the lower part of Volga, the rivers Terek, Kouma, and Kouban, the environs of the Palus Mæotis, the borders of the Tanais, in the peninsula of the Crimea, and the banks of the Borysthenes and the Dniester.

Nogent-sur-Seine, town of Fr., in the dep. of Aude, and late province of Champagne, seated on the Seine, 25 ms. NW. of Troyes. Lon. 3 40 E., lat. 48 30 N.

Nogent-le-Rotrou, pretty populous town of France, in the department of Eure and Loire, and late province of Beauce, seated on the Huisne, 35 ms. NE. of Mans. Lon. 50 E., lat. 48 26 N.

Noir, Cape, promontory of South America, at the S. extremity of Terra del Fuego. Lon. 73 3 W., lat. 54 32 S.

Noirmotier, island of Fr., near the mouth of

the river Loire. It is 17 ms. in length, and breadth, full of bogs, and yet there are good tures. The principal town is of the same name. Lon. 2 10 W., lat. 47° N.

Nola, ancient town of Naples, in Terra di Lavora, 10 ms. NE. of Naples. Lon. 14 26 E., lat. 40 56 N.

Nolachucky, river of Tenn. and N. C., rises in the northern part of Yancey co., of the latter, and, flowing W., enters Washington co. in the former, and, crossing Washington and Greene, joins the French Broad 40 ms. above its junction with the Holston at Knoxville.

Noland's Ferry, post office, Loudon co., 43 ms. from W. C.

Nolensville, village, Williamson co., Tenn., 18 ms. westerly from Murfreesboro.

Noli, town of Italy, in the territory of Genoa, with a good harbor. It is 5 ms. NE. of Portofino and 30 SW. of Genoa. Lon. 8 41 E., lat. 45 18 N.

Nombra-de-Dios, town of Colombia, in the province of Darien, a little E. of Porto Bello, which its once flourishing trade is now transferred to. Lon. 78 55 W., lat. 9 40 N.

NOMADE, Gr., *nomas-nome*, pasturage, one who seeks pasturage. This title was given by the ancients and retained by the moderns, applied to any people whose modes of life were to feed and move from place to place in search of pasturage. The patriarchs and their families, mentioned in Genesis, were Nomades; and it was not till their posterity returned from Egypt that they abandoned and dwelt in houses and towns. The inhabitants of many large sections of the earth are still nomades.

Nomeny, town of France, in the department of Meurthe, and late province of Lorraine, seated on the Selle, 15 ms. N. of Nancy. Lon. 6 14 E., lat. 48 56 N.

Non, Cape, promontory of Africa, opposite the Canary Islands. It was long considered by the Portuguese, in their attempts to explore Africa, as an impassable boundary, denoted by its name, until they doubled it at last, in 1412. Lon. 10 30 W., lat. 28 30 N.

Nona, small but strong town of Hungary, in Dalmatia. It is seated near the sea, 7 ms. W. of Zara. Lon. 16 10 E., lat. 44 35 N.

Nontron, town of Fr., in the dep. of Dordogne, and late province of Perigord, 21 ms. N. of Périgueux, and 30 SSW. of Limoges. Lon. 10 30 E., lat. 45 32 N.

Noopour, town of Hindoostan proper, in the province of Guzerat, 55 ms. E. of Surat, and 111 N. W. of Burhampour. Lon. 73 50 E., lat. 21 11 N.

Noorden, considerable town of Westphalia, 12 ms. N. of Embden. Lon. 7 5 E., lat. 53 4 N.

Nootka.—See *St. George's sound*.

Noquet's bay of Mich., on its SW. coast, sets inland 45 ms.

Norburg, town of Sweden, in Westmanland, 34 ms. N. of Stroemsholm. In its vicinity are the best iron mines in the province. Lon. 12 2 E., lat. 62 2 N.

Norcia, town of Italy in the duchy of Spoleto, seated among the mountains, on the river Tevere, 20 ms. SE. of Spoleto.

ard, dep. of Fr., so named from being the northern in situation. It includes the late provinces of Hainault, Flanders, and Champagne. Douay is the capital.

ordburg, town of Denmark, at the N. extreme of the isle of Alsen, with a castle, 9 ms. W. of Sunderburg.

orden, seaport of Westphalia, in East Friesland, a considerable place of trade, with a good harbor. It is 4 ms. from the German ocean, and 10 ms. of Embden. Lon. 7 13 E., lat. 53 32 N.

ordgau, see Bavaria, Palatinate of.

ordhausen, town of Upper Saxony, Thuringia, with 7 Lutheran churches, with a well and an orphan-house. It has a considerable trade in, and manufactures of, brandy, and rape and linseed oil, with manufactures of marble and alabaster. It is seated on the Zorge, 35 ms. NNE. of Erfurt. Lon. 10 10 E., lat. 51 30 N.

ordheim, town of Lower Saxony, in the principality of Brunswick, situate on the Rhume, in conflux with the Leina 10 ms. N. of Göttingen.

ordkoping, seaport of Sweden, capital of E. Gothland. It is 10 ms. in circumference, but the houses are scattered, and the inhabitants do not exceed 1,200. The river Motala flows through the town, forms a series of cataracts, and is divided into 4 principal streams, which encircle the rocky islands, covered with buildings; but at the extremity of the town it is navigable for vessels. Here are manufactures of woolen paper, and fire arms; some sugar houses, and brass foundry; corn is exported hence in great quantities; and a salmon fishery gives eminent and riches to many of the inhabitants. It is 10 ms. SW. of Stockholm. Lon. 15 50 E., lat. 58 35 N.

ordland, one of the five grand divisions of Sweden, bounded on the N. by Lapland, E. by the Gulf of Bothnia, S. by Sweden proper, and W. by the same and Norway. It contains six counties.

ordling-n, town of Bavaria, fortified in the citadel manner. Here the league of the five circles of the empire was concluded, in 1687. In 1796, it was taken by the French. It is a commercial place, seated on the Eger, 38 ms. W. of Augsburg. Lon. 10 34 E., lat. 48 30 N.

ordmaling, town of Sweden, in Angermania, on the bay of the Gulf of Bothnia, 24 ms. SW. of Umeå and 70 NE. of Hermosand.

ordstrand, island of Denmark, on the W. coast of S. Jutland, 12 ms. long and 5 broad. Its principal town called Hams, 28 ms. W. of Sleswick. Lon. 10 0 E., lat. 54 40 N.

ordfolk, co. of Eng., 77 ms. long and 45 broad, bounded on the N. and E. by the German Ocean, on the SE. and S. by Suffolk, and W. by Bedfordshire and Lincolnshire. It contains 640 parishes; is divided into 32 hundreds, and 100 parishes; has one city and 32 market towns, and sends 12 members to parliament. Pop. in 1701, 273,371; in 1811, 291,999; and in 1841, 344,368. The products vary according to the soil and situation. The lighter arable lands produce barley in great plenty; wheat is cultivated on the strongest soils, and turnips are grown here

in great quantities; much buckwheat is also grown in the light soils, and used for feeding swine and poultry. The fenny parts yield great quantities of butter, which is sent to London under the name of Cambridge butter. The sheep are a hardy small breed, much valued for their mutton. The manufactures of Norfolk are worsted, woolen and silk. Its principal rivers are the Great Ouse, Nen, Little Ouse, Waveney, Yare, and Bure. Norwich is the capital.

Norfolk Island, island in the [Pacific ocean, lying E. of New South Wales, and settled by a colony of convicts, subordinate to that government. It was discovered in 1774, by Captain Cook, who found it uninhabited, except by birds. It is very hilly, but some of the valleys are tolerably large. Mount Pitt, the only remarkable hill 12,000 feet high. The whole island is covered by a thick forest, but has not much underwood, and the principal timber tree is the pine, which is very useful in building, and seems to be durable. The soil, when cleared, may rendered very productive. The cliffs around the coast are 240 feet high, quite perpendicular; and anchorage is safe all around the island, on taking the lee side; but there is no harbor. The settlement was made by a detachment from Port Jackson, 1783, in Sydney bay, on the S. side of the island. Lon. 168 12 E., lat. 29 4. S.—See Australia, p. 112, middle 2d col.

Norfolk, co. U. C., is bounded on the N. and E. by the co. of Lincoln and the river Thames, on the S. by Lake Erie, until it meets the Orwell river; thence by a line running N. 16° W. until it intersects the river Thames, and thence up the said river, until it meets the NW. boundary of the co. of York. It sends, in conjunction with the fourth riding of the co. of Lincoln, one representative to the provincial parliament.

Norfolk, co., Mass., bounded by R. I. SW., Worcester in Mass., W., Middlesex NW. and N., and Suffolk co., Boston harbor and Hull bay NE. Length 30 ms., mean width 13, area about 400 sq. ms. Surface uneven rather than hilly. Soil productive in grain, fruits, and pasturage. Chief town Dedham. Pop. in 1820, 36,452; in 1840, 53,140. Central lat. 42 12 N., lon. W. C. 5 50 E.—Village, Litchfield co., Conn., 35 ms. NW. by W. from Hartford, and 20 ms. N. from Litchfield.—Village, St. Lawrence co. N. Y., by postroad 251 ms. NNW. from Albany.

Norfolk, co. Va., bounded by Hampton Roads and Lynnhaven bay N., by Nansemond co., Va. W., by Pasquotank and Currituck cos., N. C. S., and Princess Anne co., Va. E. Length 30 ms., mean width 20, area 600 sq. ms. Surface level, and in part marshy. Soil generally thin, sandy, or wet and sterile. Pop. in 1820, 15,465; and in 1840, 21,092. Central lat. 36 45 N., lon. W. C. 0 55 E.

Norfolk, town, borough, and port of entry, Norfolk co., Va., on the right bank of Elizabeth river, immediately below the junction of its two branches, and 8 ms. above Hampton roads. Lon. from the Royal Observatory at Greenwich, 76 23 W., and from W. C. 0 37 E. It is the most commercial town of Va.; in 1815, the tonnage exceeded 34,700, and stood next to Charleston of any of the U. S., S. from Baltimore.

Norfolk is connected with the commerce of N. C. by the Dismal Swamp canal. This inland communication opens from Elizabeth river, 9 ms. above Norfolk, and extends through the Dismal Swamp, into Albemarle sound. By means of this canal the produce of an extensive section of N. C. finds a market at Norfolk.

This town contains a theatre, two State banks, a marine hospital, orphan asylum, an academy, Lancasterian school, Athenæum, and 6 or 7 places of public worship. The site is level, and so low in some places as to be marshy; but the streets are commodious, being well paved.

Pop. 1810, whites 4,776, total - - 9,193
 Pop. 1820, whites 4,618, total - - 8,478
 Pop. 1830, whites 5,131, total - - 9,816
 Pop. 1840, total - - - - - 10,172

Norland, one of the five general divisions of Sweden, comprehending the provinces of Gestrikeland, Helsingland, Medelpadia, Heimtland, Herjedalia, Ongermania, and West Bothnia.

Norman Mais, U. C., in the tp. of Newark, empties its waters into Lake Ontario, about the centre of the tp. W. of Niagara fort, called the Four Mile Pond.

Normandy, late province of Fr., bounded on the W. by the Atlantic, N. by the English channel, E. by Picardy and Isle of France, and S. by Perche, Maine, and Bretagne. The Normans, a people of Denmark and Norway, having entered France, under Rollo, Charles the Simple ceded this country to them in 912, which from that time was called Normandy. The English, to which it was long dependent, still keep possession of the islands on the coast, of which Jersey and Guernsey are the principal. It is one of the most fertile provinces of Fr., and abounds in all things except wine, but that defect is supplied by cider and perry. It contains iron, copper, and a great number of rivers and harbors. This province now forms the depts. of Calvados, Eure, Manche, Orne, and Lower Seine.

Normans. See Koch, vol. 1, p. 124.

NORMANS, *Northmen*. The title is from the German, but did not apply exclusively to Germans, but meant Men of the North, and who about A. D. 800 commenced those ravages, inroads, invasions, and conquests which made them known and terrible to the more southern nations of Europe. Danes, Swedes, &c., influenced by a religion and policy alike sanguinary, and many ages in advance of more southern nations in the arts of constructing and navigating ships, these hardy, bold, brave, and better disciplined men of the North swept over much of Germany, Lorraine, France, the British islands, islands in the Mediterranean, southern Italy, and Greece. Sunk in spirit, disorganised, misgovered, and oppressed, the people of western and southern Europe could offer but little resistance to such invaders, who, commencing with incursions, proceeded to conquest. About 864 they founded a State in Russia, at Novogorod, on the Ilmen, which eventuated in the empire of Russia. In the same century their colonies became permanent in northern France, Sicily, and southern Greece. Normandy, in France, and the kingdom of Naples, were thus founded. Their settlements in Greece, more distant from the fountain-head, and exposed to a more warlike resistance, were dis-

sipated. It must be conceded, that, law were these *Vi-Kingr*, they exercised a very extensive and durable influence on European history. One of their more peaceful operations was the colonization of Iceland. But their most salutary never to be reversed, though almost totally looked impressions on the fate of nations, was skill in the construction of sea vessels. Against the wind, or even with a side wind decking ships, were undeniably inventions of early Europe, and used by the Normans 500 years before brought into use by the southern Europeans. Of the three vessels used by Columbus to discover America, only one was decked.

Norridgewoek, town, Somerset co., Me., on the S. side of Kennebec river, 35 ms. N. Augusta. — Village and seat of justice for Somerset co., Me., in the foregoing tp., 35 miles by N. from Hallowell. Lat. 44 35 N., lon. 70 4 E.

Norristown, borough, village, and seat of justice for Montgomery co., Pa., situated on the side of the Schuylkill river, 17 ms. above Philadelphia. It contains the county buildings, and an academy. — Tp., Montgomery co. around the borough of Norristown.

Nortelga, or *Nor Telge*, maritime town of Sweden, in the province of Upland, near which was a forge for making fire arms. It was much improved by the Russians in 1719, who ravaged the country. It is 30 ms. NE. of Stockholm. Lon. 10 44 N. lat. 50 44 N.

North, tp., Harrison co., Ohio, in which is situated the village, or town, of New Rumley. Lon. 1820, 1,118.

North Adams, village, Berkshire co., Mass., a little N. of W. from Boston.

North America, village, Dutchess co., N. Y., 25 ms. E. from Rhinebeck.

North, or *Nord*, dep. of Fr., which comprises the late French provinces of Hainault, Flanders, and the Cambresis.

North Cape, most northern promontory of Lapland, on the coast of Lapland. Lon. 25 47 N. lat. 71 20 N.

North Coast, dep. of France. — See *Coast of Nord*.

North Ferry, small town of Scotland, at the side of the Frith of Forth, at the Queen's passage.

Northallerton, borough of Eng., in the Riding of Yorkshire, on a small brook, which a mile below, runs into the river Wisk. It is built, trading place, 30 ms. NNW. of York. Lon. 223 N. by W. of London. Lon. 1 20 W. lat. 54 23 N.

Northampton, borough of Eng., and the county of Northamptonshire. It is seated on the river Nene, which is navigable to Lynn. It has a market place, a good free-school, and a court house, a grammar school, a hospital, a church, a formary and jail. The principal manufactures are boots and shoes, of which many are made for exportation. This town is 30 ms. SE. of London and 66 NW. of London. Lon. 1 11 W., lat. 52 11 N.

Northampton, co. of Eng., 60 ms. long and 22 where broadest, bounded on the S. by Buckinghamshire and Oxfordshire, W. by the Leicestershire and Warwickshire, NW. by Leicestershire

ndshire, N. by Lincolnshire, and E. by the
ies of Cambridge, Huntingdon, and Bedford.
ains 617,000 acres; is divided into 20 hun-
and 336 parishes; has 1 city and 11 market
w, and sends 9 members to Parliament. In
E. part, near Peterborough, commences a
tract, extending to the Lincolnshire Wash.
this single exception, Northamptonshire is
to contain less waste ground, and more seats
nobility and gentry than any other county.
ducts are, in general, the same with those
er farming counties, but it is peculiarly cel-
rd for grazing land. Horned cattle and other
ls are fed to extraordinary size, and many
of the large black breed are reared. Wood
dyers is cultivated here, but the county is
istinguished for manufactures. The princi-
vers are the Nen and Welland; beside
it, is partly watered by the Ouse, Leam,
ell, and Avon. Pop. in 1801, 131,757;
1, 141,353; and in 1821, 163,433.

Northampton, town, York co., New Brunswick.
p., Rockingham co., N. H., on the Atlantic
7 ms. SW. from Portsmouth. Pop. in 1840,
—Town and seat of justice for Hampshire
ass., on the right bank of Connecticut river,
delightful country, 18 ms. above Springfield,
above Hartford. The aspect of the adja-
country is not only pleasant, but highly ro-
nt. The neighboring mountains, particularly
Holyoke, affords some of the finest land-
p in New England. It contains the county
sps, one bank, one insurance office, a week-
paper, and several manufactories. Pop. in
in the tp., 2,631; in 1820, 2,854; and in
the tp. contained 3,750.—Tp., Mont-
co., N. Y., about 60 ms. NW. of Albany.
in 1810, 1,474; in 1820, 1,291.—Tp.,
county, Pennsylvania. It is situated on the
f Neshaminy creek, 8 ms. SE. from Doyle-
Population in 1810, 1,176; in 1820, 1,411.
—Township, Burlington county, New Jersey,
miles SE. from Burlington. Population in
1810, 4,171; in 1820, 4,833, including Mount

Northampton, or Allentown, town and seat of
for Lehigh co., Pa., on the point above the
fence, between Lehigh river and Little Le-
brook, 6 ms. SSW. from Bethlehem, 18 SW.
Easton, and 55 NNW. from Philadelphia.
situated in a well cultivated and fertile set-
ment. The site is elevated and pleasant. It
has, beside the county buildings, several pla-
worship, and a number of merchant mills.
Principal staple, flour. An elegant wooden
resting on stone arches, has been erected
the Lehigh, on the road to Easton and Beth-
lehem. A substantial bridge, also, crosses Little
Lehigh, on the Philadelphia road. The Lehigh
is turned at nearly right angles by the South
Lehigh. Pop. in 1840, 2,493.

Northampton, co. of Pa., as now limited since
the co. was formed from it, is bounded by
Lehigh SE., Schuylkill and Luzerne
Monroe N., and Delaware river E. Greatest
width from the Delaware river to the western
boundary, 40 ms.; the outline being very irregular, no mean
width can be well determined, and we state the
area 550 sq. ms.

Population in 1840.

Northampton	-	-	-	40,998
Monroe	-	-	-	9,879
Jointly	-	-	-	50,877

The surface, though generally hilly, is as generally
arable. The very remarkable slate and limestone
formation which extends so distinctively from the
Delaware to the Susquehannah, in the Kittatinny
valley, is peculiarly striking in the lower part of
Northampton. The limestone tract skirts the South
mountain, and the argillaceous slate of the Kitta-
tinny, each extending from its respective base
about half way across the valley. Though both
are highly productive in grain, fruits, and pastur-
age, the limestone soil is rather stronger than that
of the slate, and the features of nature less bold on
the former than on the latter formation.

Northampton contains the borough of Easton,
and the villages of Bethlehem, Hellertown, Strouds-
burg, Burlington, Mauchchunk, and Lehigh.
Staples of Northampton co., grain, flour, cider,
whiskey, salted provision, live stock, lumber, and
mineral coal.

Northampton, co. of the Eastern Shore of Va.,
bounded by the Atlantic ocean E., Chesapeake
bay S. and W., and Accomack N. Length 30
ms., mean width 8; area 240 sq. ms. Surface
level, and soil sandy. It occupies the extreme
part of the peninsula, on the E. side of Chesapeake
bay. There is a post office at the court-house.
Pop. in 1820, 7,705; and in 1840, 7,715. Cen-
tral latitude 37 16 N., longitude Washington City
1 18 E.

Northampton, co., N. C., bounded by Virginia
N., Hartford co., N. C., E., Bertie S., and
Roanoke river, or Halifax SW. Length 40 ms.,
mean width 12; area, 480 sq. ms. Pop. in 1820,
13,242; and in 1840, 18,369. Central lat. 36 22
N., lon. W. C. 30' W.

Northampton, C. H. and post office, Northamp-
ton co., N. C., 80 ms. SW. from Norfolk, Va.,
and about 90 NE. from Raleigh. Lat. 36 21 N.,
lon. W. C. 30' W.—Village in the western
borders of Portage co., Ohio, 15 ms. W. from Ra-
venna.

North Attleborough, village, Bristol co., Mass.,
29 ms. SSW. from Boston, and 12 NNE. from
Providence.

North Bend, name of a settlement on the north-
ern bend of Ohio river, 15 ms. below Cincinnati,
and 4 northeasterly from the SW. corner of the
State of Ohio.

North Blenheim, village, Schoharie co., N. Y.,
by post road 55 ms. SW. by W. from Albany, and
about 45 SW. from Schenectady.

North borough, town, Worcester co., Mass., 11
ms. from Worcester.

North Brookfield, tp., Worcester co., Mass.

North Branch, village, N. part of Somerset co.,
N. J., 46 ms. N. from Trenton.

North Bridge, town on Pautucket river, in the
southern part of Worcester co., Mass., 46 ms.
SW. from Boston.

North Bridgetown, village in the NW. part of
Cumberland co., Me., 43 ms. NW. from Portland.

North Bridgewater, No. 1, village, Plymouth
co., Mass., 28 ms. S. from Boston.

North Bridgewater, No. 2, village, Plymouth co., Mass., 20 ms. S. from Boston.

North Carolina, one of the original States of the U. S., bounded E. and SE. by the Atlantic ocean, S. by S. Carolina, W. by Tennessee, and N. by Virginia. Extreme length 420 ms., from the SW. angle of Haywood co. to Cape Hatteras. The area being about 45,500 sq. ms., the mean width must be about 110 ms. The greatest breadth is from Little Inlet, N. lat. 33 50, to the Virginia line, N. lat. 36 30, equal to 160 minutes of latitude, or 184 statute ms. nearly.

Except Georgia, there is no other State in the Union which presents so marked a difference of soil and climate as does N. C. Similar to the other States S. from N. Y. which have an ocean limit, this State is naturally subdivided into the alluvial, hilly, and mountainous sections.

The summary table (No. 4) shows the eastern or alluvial section is peopled by about 12 to the sq. m.; the two colored classes being to the whites as 3 to 4 nearly. On the middle or hilly section, the aggregate population is 19 to the sq. m.; the colored classes being to the whites as 1 to 2 nearly. On the western or mountainous section, the aggregate population is about 10 to the sq. m.; the colored classes being to the whites as 1 to 5 nearly. In the whole State we find that, in 1820, it was peopled by about 14 to the sq. m.; whilst the colored population was to the white in a proportion of 1 to 2 within a very small fraction. Comparing the respective proportions at the two extremes of the period, it appears that, in 1820, for every 100 colored persons there were 184 white, and in 1840 the whites were as 188 to 100.

It must be obvious, on a glance upon a good map of N. C., that the temperature of its seasons must be very much influenced by difference of level from the Atlantic coast to its western section. Without estimating the elevation of the mountain ridges, we may safely allow a difference of 1,000 feet between the ocean level and the table land of the western section. A difference of 1,000 feet in relative height is more than equivalent to 2½° of lat., and accounts for the fact that the seasons of western Virginia and North Carolina are nearly similar to those along the Atlantic coast from N. lat. 38° to 40°.

The salubrity of the air is in a peculiar manner influenced in N. C. by the great difference of its relative level. The middle and mountainous tracts are highly salubrious, and well watered; and indeed a character of healthy is due to the whole State, with the exception of autumnal fevers near the Atlantic shores.

The vegetable productions of this State are perhaps more numerous, specifically, than those of any other State in the U. S. Towards the Atlantic, and as far W. as into the middle section, cotton can be produced as a staple. As the mountain table land is approached, the summers are more contracted, and grain becomes the staple. Fruits of every kind, from the apple to the fig, grow on the diversified surface of N. C. As a commercial State, however, its want of capacious harbors must prevent an advance equal to States more advantageously indented by deep bays and rivers.

Through the sea sand border, the rivers find their way to the sea, over extensive flats and bars,

rendering the coast of this State the least favorable to navigation of any of the maritime States. U. S. Cape Fear river, with 18 feet water its bar, is the best entrance into the interior. C. Extensive canal improvements have been projected, and partially executed; but, hitherto, the trade of the northern waters of N. C. has centred in Virginia, whilst that of the interior of the State has generally found its discharge at Charleston, S. C. Laudable efforts are making to open an easy and direct communication with the interior, which the advance of wealth and population will no doubt ultimately effect.

The interests of education, formerly neglected, are at present fostered in this State. Besides the University of N. C., there are upwards of 50 academies in operation. The government of the State is essentially similar to the other members of our Confederacy, consisting of a Senate and House of Commons, annually chosen. The executive is rather the creature of the Legislature, the people, being chosen by joint ballot of the two Houses. The staples of this State are some of the most important articles of commerce, as tobacco, cotton, and flour, tar, pitch, turpentine, lumber, and rice. Capital, Raleigh. N. lat. 35 44, lon. W. 78 14.

The following tables exhibit the relative population of N. C., with the comparison of the area in sq. ms. of its counties and natural surface, as they stood in 1820, and which, as they serve to determine the progressive population in the period between 1820 and 1840, we retain:

TABLE No. 1.

Population of the alluvial or eastern section of North Carolina in 1820.

Counties.	Area in sq. ms.	Whites.	Free col. persons.	Slaves.
Beaufort	670	5,369	335	3,702

Total N. C.	240047	244823	11227	11505	123546	122271	753419

North Castle, town, West Chester co., N. Y., on the E. side of Hudson river, about 16 ms. from King's bridge.

North Channel, Bay of Quinte, U. C., leads from John's island, southerly, between the tps. of Sophiasburgh, Fredericksburgh, and Adolphus-town.

Northcurry, town of England, in Somersetshire, on the Tone, 20 ms. SW. of Wells, and 134 W. by S. of London. Lon. 3° W., lat. 51° N.

North Clinton, town, Kennebec co., Me.

North East, town, Dutchess co., N. Y., on the E. side of Hudson river, about 90 ms. N. of New York.—Village, Erie co., Pa., in the NE. angle of Erie co., Pa., 15 ms. NE. from the village of Erie.—Village, Cecil co., Md., 46 ms. NE. from Baltimore.

North End, village, Mathews co., Va., by post road 98 ms. E. from Richmond.

North Fairhaven, village, Bristol co., Mass. post road 66 ms. a little E. of S. from Barnstable and 20 ms. SW. from Plymouth.

North Falmouth, village in the SW. p. Barnstable co., Mass., by post road 72 ms. from Boston, and 18 S. from Plymouth.

Northfield, town, Rockingham co., N. H. the Merrimac, 14 ms. above Concord. Pop. 1,304.—Tp. in Staten island, N. Y.—Town, Franklin co., Mass., on the E. bank of Connecticut river, nearly opposite to Greenfield, about 10 ms. W. by N. of Boston.—Tp., Washburn co., Vt.—Village, Essex co., N. J., NW. Newark.—NW. tp. of Portage co., O.

Northfleet, village of Eng., in Kent, seat of the Thames, 1 m. W. of Gravesend, and 21 London. Vast quantities of lime are made here. Great numbers of extraneous fossils have been up here.

North Ford, town, New Haven co., Conn. 15 ms. NE. from New Haven.

North Granville, village, Washington co., N. Y., on Pawlet river, 63 ms. NNE. from Albany.

North Hampton, village, Oxford co., Me. Town, Rockingham co., N. H., 60 ms. SE. from Concord.

North Haven, tp., New Haven co., Ct., 15 ms. N. from New Haven.

North Hempstead, village and seat of justice, in Queens co., N. Y., on Long Island, 20 ms. N. from N. Y. Harborhill, in this town, is the largest land on Long island. Pop. 3,000.

North Hero, town and seat of justice, in Isle co., Vt., on Grand Isle.

Northington, village on Farmington river, 15 ms. W. from Hartford.

North Killingworth, town, Middlesex co., N. H., 15 ms. SSE. from Middletown, and 20 ms. SE. from New Haven.

North Kingston, tp., Washington co., N. H., It is situated on the W. side of Narragansett bay, between E. Greenwich and S. Kingston.

North Learsment, village, Hancock co., Me.

Northlech, corporate town of Eng., in Gloucestershire, with several almshouses and a free grammar school. It is seated on the Lech, 25 ms. S. of Gloucester, and 80 W. by N. of London. Lon. 1° 43' W., lat. 51° 46' N.

North Livermore, village, Oxford co., Me. on Androscoggin river, 60 ms. N. from Portland.

North Marshfield, village, Plymouth co., N. H., 38 ms. SE. from Boston.

North Middleborough, village, Plymouth co., Mass., 41 ms. SSE. from Boston.

North Middleton, village, Bourbon co., Ky., 49 ms. E. from Frankfort.

North Moreland, village, Luzerne co., Pa.

North Mountain, local name for that part of the Kittatinny range which passes between Northumberland and Perry cos., and through Franklin co., Penn.

North Norway, village, Oxford co., Me. 15 ms. NW. from Portland.

North Norwich, village on Chenango river, Chenango co., N. Y., 7 ms. above and N. of Norwich, and by post road 105 ms. W. from Albany.

North Penfield, village, Monroe co., N. Y. 10 ms. NE. from Rochester.

North Plympton, village, Plymouth co., Mass., 3. S. from Boston.

Northport, village, Hancock co., Me., 6 ms. S. Belfast, and by post road 108 ms. NE. from Portland.

North Portland, tp., Somerset co., Maine, 25 W. from Norridgewock.

North Providence, tp., Providence co., R. I., enclosing 4 ms. N. from Providence. It includes the manufacturing village of Patucket, 3 churches, 2 academies, and a bank.

North River, Mass., rising in Pembroke, Plymouth co., and falls into the Atlantic ocean between Marchfield and Scituate. It is navigable for boats of 300 tons 18 ms. to Pembroke.

North River Mills, post office, Hampshire co., 120 ms. NW. by W. from W. C.

North Salem, town, West Chester co., N. Y. It contains an academy.

North Scituate, village, Providence co., R. I., 1. W. from Providence.

North Stonington, town, New London co., Ct., 1. E. from New London.

North Vineyard, tp., Somerset co., Me., 15 W. from Norridgewock.

Northumberland, co. of Eng., which received its name from being situated N. of the Humber. In the Saxon Heptarchy it was a part of the kingdom of the Northumbrians, which contained also the counties of York, Lancaster, Durham, Cumberland, and Westmoreland. It forms the N. extremity of Eng., and is bounded on the E. by the North Sea, on the S. by the bishopric of Durham, on the SW. and W. by Cumberland, and on the NW. and N. by Scotland, from which it is separated by the Tweed. It extends 70 ms. from N. to S., and 50 from E. to W. It lies in the process of Durham, contains 12 market towns and 60 parishes, and sends 8 members to Parliament. Pop. 1801, 157,101; in 1811, 172,161; in 1821, 198,965. The air of this co. is not so cold as might be imagined from the lat. in which it lies; for its situation between two seas, the narrowest part of Eng., gives it the advantage of having the cold moderated by the vapors of the sea, and, for this reason, the snow seldom lies in this co., except on the tops of high hills. The air is very healthful, and the people, who usually live to a great age, are seldom afflicted with sickness. The soil is various, the eastern part which is fruitful, having very good wheat and several sorts of corn, and has rich meadows on the banks of the rivers, but the western part is generally barren, it being mostly healthy and mountainous. The SE. part abounds with pit coal, of which 658,858 chaldrons are computed to be annually shipped from thence to London. There are large quantities of lead and timber. The principal rivers are the Tyne, the Tweed, and the Ure. Alnwick is the county town, but the chief city is Newcastle.

Northumberland, NE. co. of L. C., on the left bank of St. Lawrence river, extending from Hampton indefinitely towards Labrador.—Co. of U. S. 1. W. from Prince Edward and Hastings cos., and extending from Lake Ontario to Rice lake.—Village of Coos co., N. H., on Connecticut river, 120 ms. N. from Concord.—Town, Saratoga co., N. Y., on the right side of Hudson riv-

er, 15 ms. NE. from Ballston Spa. Wilton was cut off from Northumberland since 1810.

Northumberland, co., Pa., bounded by Schuylkill SE., Dauphin S., Susquehanna river, or Union W., Lycoming N., and Columbia NE. Length 35 ms., mean width 13, area 455 sq. ms. This is one of the mountain counties of Pa., and very much diversified in surface. Having so much river, it possesses, notwithstanding its general mountainous aspect, a large proportion of good and considerable first rate soil. Washed by the main Susquehanna, 20 ms. below, and by the W. branch, 20 ms. above Sunbury and Northumberland, produces a range of river soil of 40 ms. in length. To this may be added 10 ms. of the E. branch, between Sunbury and Danville, the whole, including both banks of the latter section, yielding a river line of 60 ms. This alluvial range contains the mass of the population. Contrary to the ordinary course of the Appalachian ridges, the mountains of Northumberland extend nearly E. and W. The principal ridges are, advancing from S. to N., Line mountain, Little Mahoney, Mahoney, and Shamokin, below the junction of the two great branches of Susquehanna; above their confluence, Montours mountain and the Limestone Ridge.

Beside the two fine rivers we have noticed, Northumberland is drained by some large creeks, the principal of which are Mahantango, Mahoney, and Shamokin, entering Susquehanna below Sunbury, and Chillisquaque, Limestone, and Warrior creeks, above Northumberland. Some of those meander through narrow valleys with much good soil. The staple productions of Northumberland are grain, flour salted provisions, lumber, whiskey, and many other articles. Its principal towns are Sunbury, Northumberland, Milton, and Watsonburg. Pop. 1820, 15,424; and in 1840, 20,027. For central lat., see *Northumberland*.

Northumberland, village, Point tp., Northumberland co., Pa. This village is situated on the point above the confluence of the two great branches of Susquehanna river, and opposite Sunbury. Pop. of the tp. in 1820, 1,373. Lat. 40 52 N., lon. W. C. 12' E.—Co., Va., bounded by Potomac river NE., Chesapeake bay SE., Lancaster and Richmond SW., and Westmoreland NW. Length 30 ms., mean width 8, area 240 sq. ms. Surface rather waving than hilly; soil of middling quality. Chief town Bridgetown. Pop. in 1820, 8,016; and in 1840, 7,924. For central lat., see *Northumberland C. H.*, next article.

Northumberland, C. H. and village, Northumberland co., Va., on Presby creek, 96 ms. NE. from Richmond. Lat. 37 56 N., lon. 34' E.

North Village, town Hampden co., Mass., 69 ms. from Boston.

North West River Bridge, village, Norfolk co., Va., 20 ms. S. from Norfolk.

Northwest Territory.—See *Michigan State*.

Northwood, town, Rockingham co., N. H., 20 ms. E. from Concord. Pop. 1810, 1,095; in 1820, 1,260.

North Yarmouth, town, Cumberland co., Me., on Casco bay, 12 ms. N. from Portland. Pop. 1810, 3,925; in 1820, 3,679.

Northwich, town of Eng., in Cheshire. It is seated on the Weaver, near its conflux with the

Dane, and is noted for its salt works. The strata of salt lie about 40 yards deep, and some of them are hollowed into the form of a temple. Vast pits of solid rock salt have been dug here to a great depth, from which immense quantities are raised; and much of it, in its crude state, goes to Liverpool by the river Weaver, to be exported. Northwich is 20 ms. NE. of Chester, and 173 NW. of London. Lon. 2 36 W., lat. 53 16 W.

Norton, village, Essex co., Vt.—Bristol co., Mass., on the W. side of Wading river, 7 ms. NW. of Taunton. Pop. 1810, 1,598; in 1820, 1,600.—Town, Delaware co., O., 9 ms. N. from Delaware, and 34 in the same direction from Columbus.—SE. tp., Medina co., O.

Norton, or *Chipping Norton*, corporate town of Eng., in Oxfordshire. It is 12 ms. SW. of Banbury, and 74 NW. of London. Lon. 1 17 W., lat. 51 55 N.

North Sound, inlet of the sea, on the W. coast of North America, discovered by Captain Cook in his last voyage. There is no good harbor in all the sound, nor even a tolerable station for ships. Lon. 162 47 W., lat. 64 55 N.

Norwalk, town, Fairfield co., Ct., situated on Long Island sound, 12 ms. SW. of Fairfield, and 50 NE. of the city of New York. It contains a newspaper printing office, an academy, and three churches. Pop. 1810, 2,983; in 1820, 3,004.—Town and seat of justice, Huron co., O., 14 ms. from Lake Erie, and 100 NE. from Columbus. Lon. W. C. 5 33 E., lat. 41 16 N. Pop. in 1820, 579.

Norway, kingdom in the north of Europe, the most westerly part of the ancient Scandinavia. It is bounded on the W. and N. by the Northern ocean, E. by Swedish Lapland and Sweden, and S. by the Cattegate, extending from the Naze, in lat. 57 30, to the North Cape, in lat. 71 10. Its breadth, which is very unequal, is from 40 to 280 ms. It is naturally formed into two divisions, namely Northern and Southern or proper Norway, separated from each other by the small Swedish province of Herndahl. It is divided into the governments of Aggerhuys, Christiana, or Christiansand, Berghen, Drontheim, and Finmark—the whole embracing an area of 161,000 sq. ms., with an aggregate pop. of 930,000.

By the treaty of Kiel, January, 1814, Norway, against the free opinion of its people, was transferred from Denmark to Sweden, Denmark receiving, in return, Swedish Pomerania and the island of Rugen. From its rocky soil and northern position, Norway is not populous in proportion to its extent. The inhabitants, like the Swiss mountaineers, are exceedingly attached to their country. In Norway they have a particular code, called the Norway Law, compiled by Grieffelfeld, at the command of Christian V., the great legislator of this country. By this law, the palladium of Norway, the peasants are free, except in some aristocratic estates, near Frederickstadt; and the benefits of this code were visible in the great difference in their appearance between the free peasants in Norway and the enslaved vassals of Denmark, though both were living under the same government. The inviolability of their laws and the integrity of the kingdom were stipulated in the treaty of Kiel. The Norwegian peasants possess much

spirit and fire in their manner; are frank, and undaunted, yet not insolent; never fail yet paying proper respect. Their principal of salute is by offering their hand; and when are given or paid any trifle, the peasants, in of returning thanks by words, or by a bow, hands with great frankness and cordiality. same causes which affect the population of way operate likewise on the state of tillage although in some places vegetation is so quick the corn is sown and cut in six or seven w yet the country does not produce sufficient for its own consumption. It is, however, exceed rich in pasture, and consequently produces cattle. The horses are small, but strong, very tive and hardy. The fisheries, particularly on west coast, find employment and wealth for natives, and supplied the finest sailors for the nish fleet. The principal fish are salmon, ling, and whiting; their livers also yield train and the smallest are given as winter fodder to cattle. The extensive forests of oak and pine duce timber, spars, beams, and planks, beside coal, turpentine, bark, fuel, and even manure the birch (the bark of which is used as a cov for the roofs of houses) not only supplies fuel also a kind of wine. The general exports are low, butter, salt, dried fish, timber, planks, ho horned cattle, silver, cobalt, alum, Prussian copper, and iron. It abounds in lakes and ri the former so large that they appear like inl the sea; but the rivers are in general of a course, except the Gloumen. The mountain numerous, and generally clothed with pines firs. The grand Scandinavian chain, which from S. to N., dividing this kingdom from den, is known by distinct appellations; the are the ridges of Langfiel, Dofrafial, Kolen, Severnoi. The wild animals are the bear, l wolf, fox, and hare; but the most singular cre is the lemming, or Norwegian mouse, of a re color, and about five inches long. These ani proceed in vast numbers from the ridge of Kol the sea, devouring every product of the so their course, and at last seem to devour each o

The inhabitants carry on a considerable with foreign nations. Their exports are co wrought and unwrought; iron cast into can stoves, and pots, or forged into bars; masts, ber, deal boards, planks, marble, millstones, ring, cod, ling, flounders, cowhides, goat s seal skins, the furs of bears, &c., down, feat butter, tallow, train oil, tar, juniper and other of berries and nuts. They have inexhaus quarries of excellent marble, black, white, l grey, and variegated. Gold has likewise found in a small quantity, and a considerable ver mine is at present wrought at Koningsber the risk of his Danish majesty. These were ded by Mr. Coxe, who says that they formerly duced 70,000 pounds, but they now produce 50,000 pounds. The mines of cobalt, and preparation of Prussian blue, are much more ductive.—See particularly, in connexion with way, Lapland, and Sweden, and for general o vations of all those parts, the general article S *dinavia*.

Norway, village, Oxford co., Me., 45 NNW. from Portland.—Town, Herkimer

25 ms. a little E. of N. from Herkimer, NW. by W. from Albany.

Nwich, ancient and populous city of Eng., capital of Norfolk. It is seated on the Yare, it runs through it, and is navigable to Yarmouth without locks. Though, as it has been said, is a populous city, yet there is void enough for another colony; and, from the intermixture of its houses with trees, it is called a city in a wood. Its manufactures are generally sent to London, though considerable quantities are exported from Yarmouth, to Holland, Germany, France, and Norway. It is 43 ms. N. of Ipswich and 109 NE. of London. Lon. 1 20 E., Lat. 52 40 N. Pop. 1811, 37,256.—Tp. of *Nwich* in Oxford co., on the river Thames.—

Nwich, Windsor co., Vt., opposite Hanover, on the Connecticut river, 21 ms. above Windsor. It is the seat of a military academy. Pop. 2,000.—*Nwich*, Hampshire co., Mass., 15 ms. W. from Hampton. Pop. 1820, 849.—Tp., town, seat of justice, Chenango co., N. Y., on the Cayuga river, 49 ms. a little W. of S. from Ithaca and 60 E. from Ithaca. Pop. of the tp. in 1820, 2,550; in 1820, 3,257. Lat. 42 32 N., Lon. W. C. 1 28 E.—Tp., Franklin co., O., on the Scioto river, 8 ms. above Columbus.

Nwich, city and seat of justice, New London co., on Thames river, at the head of tide navigation, 13 ms. above New London, and 38 ms. from Hartford. Lat. 41 34 N., lon. W. C. 1 50 E.

The Thames is formed by the junction, at Chelmsford, of the Shetucket and Yantic rivers. Norwich, the city, is on the Yantic, but is generally considered to include Chelsea landing and the Mill Hill. The Yantic, about a mile above its junction with the Shetucket, is precipitated over a rock which affords admirable facilities for manufacturing establishments, many of which are in operation. Woolen and cotton cloths, morocco and leather, paper, &c., are extensively produced. Saw and flour mills abound. Chelsea is the port, and seat of commercial transactions. Norwich proper is two miles up the river and contains the public buildings. Beacon Hill again W. from Norwich. The scenery around Norwich is highly pleasing, and heightened by the rich, well-cultivated country. Pop. of the city, 10,3528; in 1820, 3,634; city of Norwich, 1840, 4,200.

Nwich, town of Germany, in the circle of Upper Saxony, situated on the Muldau, 18 ms. W. from Dresden. Lon. 13 0 E., lat. 51 2 N.

Nwichengong, town of the Deccan, in the province of Berar, 75 ms. SSW. of Ellichpour. Lon. 13 0 E., lat. 20 32 N.

Nwichburg, town of Russia, in the Government of Novgorod, seated on an island in the Lake Ladoga, at the place where the river Neva proceeds into this lake. It has a good citadel, and was the seat of Ingria before Petersburg was built. It is 35 ms. E. of Petersburg. Lon. 31 9 E., lat. 59 5 N.

Nwich, ancient, large, and handsome town of Sicily, and capital of Val-di-Noto. It was ruined by an earthquake in 1693, but another town was built at some distance from it, called Nota Nuovo.

It is 22 ms. SW. of Syracuse. Lon. 15 19 E., lat. 36 58 N.

Notre Dame des Anges, seigniory, Quebec co., L. C., opposite Quebec.

Nottaway, river, rises in Prince Edward, Notaway, and Lunenburg cos., Va., and, flowing nearly E. between Dinwiddie, Brunswick, and Greenville, into Sussex, there turns to SE., through Sussex and Southampton, joins Blackwater just within the limits of N. C. Entire comparative course 120 ms. Below the junction of the Nottaway and Blackwater, the united streams flow S. about 10 ms., and, uniting with the Meherrin, form the Chowan river.

Nottaway, co. of Va., bounded by Dinwiddie SE., Brunswick S., Lunenburg SW., Prince Edward NW., and Amelia NE. Length 22, mean width 12 ms.; area 264 sq. ms. It is washed in all the SW. borders by the Nottaway, and about half the county drained by the creeks of that river. Its NE. moiety is drained by Flat creek, Deep creek, Winticomock, and others flowing into Appomatax river. Pop. in 1820, 9,658; in 1840, 9,719. Lat. 37 0 N., and lon. W. C. 1 0 W. intersect in this county.

Nottelen, twon of Germany, in the circle of Westphalia, in the bishopric of Munster, 7 ms. W. of Munster.

Nottingham, county town of Nottinghamshire, Eng. It is situated on a rocky eminence, and is a populous and handsome town, distinguished by its spacious market place, and noted for its excellent ale. It is remarkable for its vaults, or cellars, cut into the rock, and in the neighborhood are many coal pits, which afford plenty of fuel, at little expense. Nottingham is seated on a river which communicates with the Trent, 1 m. to the S. It is 16 ms. E. of Derby, and 123 N. by W. of London. Lon. 1 2 W., lat. 52 58 N.—Town, Rockingham co., N. H., 24 ms. NW. of Portsmouth.

Nottingham, tp., Burlington co., N. J. Pop. in 1820, 3,633.

Nottingham, West, town, Hillsborough co., N. H., on the E. side of Merrimack river, 45 ms. N. by W. of Boston.

Nottingham, East and West, the two SW. and contiguous tps. in Chester co., Pa. They are situated on the E. side of Octorara creek, and join Maryland.

Nottingham, NE. tp., Washington co., Pa., on Monongahela river, 18 ms. from Washington.—Town, Prince George's co., Md., on the W. side of Patuxent river, 27 ms. SE. of Washington.—A hilly tp., Harrison co., Ohio, 7 ms. W. from Cadiz. This township contains the village of Moorfield.

Nottinghamshire, co. of Eng., 48 ms. long and 20 broad, bounded on the N. by Yorkshire and Lincolnshire, on the E. by the latter co. and on the S. by Leicestershire, and on the W. by Derbyshire. It lies in the diocese of York; contains 95,000 inhabitants, and sends 8 members to Parliament. No county in England enjoys a pleasanter or healthier air. The principal rivers are the Trent and Idle; the former inferior only to the Severn, Thames, and Humber. Pop. in 1801, 140,350; in 1811, 162,000; and 1821, in 186,873.

Nou Kian, great river of Africa, rising, according to Arrowsmith, in the Thibetian Alps, between the sources of the Blue river, and, flowing thence southeastward towards China, but is there confounded with the numerous and very defectively known streams of the vast region between Bengal and Yemen, by Arrowsmith, the *Nou Kian* continued in the Thaluayan and discharged into the Gulf of Ava. By other geographers, it is the higher *Maykaung*, or Japanese river of Cambodia; but the most probable of all conjectures on the subject is, that the *Nou Kian* and *Meinam* are the same.—See *Meinam*.

Novalle, small, but populous town of Italy, 10 ms. NE. of Padua, and 12 SW. of Treviso. Lon. 12 10 E., lat. 45 29 N.

Novara, ancient and strong town of Italy, in the duchy of Milan, capital of the Novarese. It is seated on an eminence, 12 ms. NE. of Verceil, and 25 ms. W. by S. of Milan. Lon. 8 35 E., lat. 45 25 N.

Nova Scotia, or *Acadia*, province of British N. America, bounded on the W. by the U. S., on the N. by the river St. Lawrence, on the E. by the gulf of that name, and on the S. by the Atlantic and Bay of Fundy, being so indented by the latter that its eastern part forms a peninsula. It extends from Cape Sable, its most southern point, in lat. 43 23 to 49 30 N., and from 60 15 to 67 0 W. lon. In 1784, part of this country was formed into a new province.—See *New Brunswick*. The most part of the country is one continued tract of forest, and the soil, except on the river banks, is thin and barren. Halifax is the capital. Pop. in 1825, about 150,000; and in 1843, calculated at 143,000, of which probably 10,000 were contained in Halifax.

Nova Zemlia, *Nova Zembla*, large and desolate island, lying off the northern coast of Asia, and NE. of Europe, extending from lat. 69° to 76° N. It is about 500 by 240 miles. It is uninhabited, and only visited by fishermen, in summer.

Novellara, town of Italy, capital of a small district of the same name, with a castle, where the sovereign resides. It is 17 ms. E. by N. of Parma, and 20 S. by W. of Mantua. Lon. 11 4 E., lat. 44 48 N.

Novi, town of Italy, in the territory of Genoa, 22 miles NW. of Genoa. Lon. 8 29 E., lat. 44 45 N.

Novi Bazar, town of European Turkey, in Servia, seated near the Oresco, 72 miles W. of Nissa, and 103 S. of Belgrade. Lon. 21 1 E., lat. 43 35 N.

Novigrad, town of Upper Hungary, capital of a co. of the same name, near the Danube, 25 ms N. of Buda.—Town of Dalmatia, with a castle, seated on a lake of the same name, near the Gulf of Venice, 17 ms. E. of Nova, and 25 NW. of Zara.—Strong place of European Turkey, in Servia, seated near the Danube, 35 miles N. of Nissa.

Novogorod, called by pre-eminence *Great Novogorod*, city of Russia, capital of a government of the same name, and shared with Kiev in being one of the cradles of the Russian empire. It was for a long time governed by its own dukes, but was in fact a republic, under the jurisdiction of a nominal

sovereign. Its territory extended to the W. as the frontiers of Livonia and Finland, covered a great part of the province of Archangel, and district beyond the NW. limits of Siberia. The great mart of trade between Russia and the Hanseatic cities, and made the most rapid progress in opulence and population. Its power great, and its situation so impregnable, as to rise to a proverb, Who can resist the *god Great Novogorod*? But in the 15th century independent republic was obliged to submit to *Basilowitz I.*, Grand Duke of Russia. A subject, this city declined slowly, until the coming of *St. Petersburg* completed its ruin. Now about 8,000. *Novogorod* is situated in N. end of the Lake Ilmen, 125 ms. SSE. Petersburg. Lon. 31 45 E., lat. 58 25 N.

Novogorod, Niznei, city of Russia, capital of Government of the same name. The trade considerable, and the shops richly furnished with kinds of foreign and home goods. It is at the conflux of the *Occa* with the *Volga* ms. E. by N. of Moscow. Lon. 46 30 E., 34 N.

Novogorod, Sieverskoi, town of Russia, of a Government of the same name, seated on the *Desna*, 340 ms. SW. of Moscow. Lon. 32 lat. 52 20 N.

Novogrodek, town of Lithuania, capital of a province of the same name, seated on a hill in plain, 80 ms. S. by E. of Wilna. Lon. 26 lat. 53 25 N.

Novomigorod, town of Russia, in the Government of *Catherinenslaf*, 136 ms. WNW. of *therinenslaf*. Lon. 31 44 E., lat. 48 40 N.

Noutra, town of Poland, in the palatinate of Cracow, near which are mines of gold and iron. It is 30 ms. S. of Cracow.

Noxonton, village, Newcastle co., Del., 20 SSW. from Wilmington.

Noya, town of Spain, in Galicia. The trade is in ship-building. It stands at the mouth of the *Tambre*, 15 ms. W. of *Compostella*.

Noyers, town of Fr., in the dep. of Yonne, seated on the *Serin*, 19 ms. ESE. of Auxerre.

Noyon, town of Fr., in the dep. of Oise, the birth place of the famous *Calvin*; and was an episcopal see. It is seated near the *Oise*, 60 ms. NW. of *Soissons*, and 60 N. by E. of *Compiègne*.

Nozeroy, town of Fr., department of *Jura*, seated on a mountain, 20 ms. S. of *Salins*.

Nubia, country of Africa, bounded on the N. by *Egypt*, E. by the *Red Sea*, S. by *Arabia* and *Darfour*, and W. by *Bornou*.—See *Nubia*, p. 11.

Nuddy, river in Hindoostan, is the term applied to many rivers, example "*Maha Muddy*" and *Great River*.

Nuestra Senoke-de-la-Paz, town of S. America, in *Peru*, and the audience of *Los Charcas*. It is seated at the foot of a mountain, in a country abounding with vines and fruits, which begin to be ripe in January. Lon. 64 5 W., lat. 15 50 S.

Nuestra Senora, de la Vittoria, city of Mexico, in *Yucatan*, on the E. side of the bay *Tenochtitlan*. Lat. 18 25 N., lon. W. C. 14 50. About 1000 ms. SSW. from *Campeachy*.

Nava Segovia, town of the East Indies, in the island of Luzon, and one of the Philippines, with a population of 10,000. The Portuguese alcaide, major of the province, resides at this place. It is seated on the mouth of the river Cagayan. Lon. 120° 18' E., lat. 18° 59' N.

Niz, town of Fr., in the dep. of the Cote d'Or and late province of Burgundy, famous for excellent wines. It is seated at the foot of the mountain, 15 ms. SW. of Dijon, and 130 SE. of Paris. Lon. 5° E., lat. 47° 10' N.

Nahiva, principal of the Marquesas or Washington Islands, in the South Pacific ocean. S. lat. 10° 30' lon. W. London, 139 30, and 52 30 W. C. The bearing from the mouth of the Columbia river is S. B. 11 W. distance 3,903 nautical miles, and 4,488 statute miles.—See *Marquesas islands*.

Nancia, anciently a considerable town of Castile in Old Castile, celebrated for a siege of years maintained against the Romans, who at last subdued and destroyed it, in the year 133 C. The ruins of it are still to be seen near the mouth of the river Douero, 4 ms. above the town of Zamora.

NUMISMATICS, NUMISMATOGRAPHY, the science of medals or coined money from the Greek *nomisma*, medal, piece of money, and *grapho* to describe.

Nun, cape of Africa, on the Atlantic ocean, nearly E. from the island of Forteventura. Lon. 28° 30' lon. 10° 50' W.

Nun, or *Ned de Nun*, province of Africa, seated on the S. from the kingdom of Sus, by a sandy desert. The emperor of Morocco pretends to be sovereign of this country, but his authority is only nominal. This vast but desert country is inhabited by different tribes of Arabs, who are scattered over every part capable of cultivation.

Nuncio, the Pope's ambassador to a Catholic prince or State.—See *Ambassador*.

Nunda, town in the northeastern angle of Albany co. N. Y., about 15 ms. NE. from Albany, and by postroad 256 ms. W. from Albany.

Nuneh, village of, on the east side of the Tigris, near the city of Mosul, at N. lat. 36° 27', lon. 43° 20'; 250 ms. NW. from Bagdat, is ascertained to be the ancient Nineveh.

Nundydroog, town of the peninsula of Hindostan, capital of a district, in the Mysore country, its fortress is built on the summit of an inaccessible mountain, 1,700 feet in height, and was besieged and taken by the English under Cornwallis, in 1792. It is 70 ms. N. of Madraspatnam.

Norton, town in Eng., in Warwickshire, 8 ms. by E. Coventry, and 99 NW. of London. Lon. 1° 25' W., lat. 52° 36' N.

Norham, village of Eng., 5 ms. E. by S. of Newcastle, remarkable for its Spinning Feast, an annual festival, instituted by lord and lady Harcourt for the encouragement of virtue and industry.

Norwichey, village of Eng., in Somersetshire, 2 ms. SE. of Frome.

Nuremberg, or *Nuremberg*, city of Germany, in the kingdom of Bavaria, capital of the province of Franconia, with a university. It is a circular city, surrounded by high walls,

flanked with 365 towers, and the river Pegnitz over which are 12 stone bridges runs through the middle, and divides it into two parts. The government is aristocratical; and the townsmen are divided into 8 quarters, each of which has a captain. The burghesses are very industrious, and the best workmen in arts; their maps and prints are in high esteem, as well as their musical and mathematical instruments, nor are they less curious in clock work, and in the several manufactures of iron, steel, ivory, wood, and alabaster. The best toys are made here, which are commonly known in Eng. by the name of Dutch toys. Here is a famous academy for painting, an anatomical theatre, and a public library. It is 55 ms. NW. of Ratisbon, 62 N. of Augsburg, and 250 W. by N. of Vienna. Lon. 11° 12' E., lat. 49° 27' N.

Nurtingen, town of Germany, in the circle of Suabia, in the duchy of Wirtemberg. It is situated on the Neckar, 14 ms. SE. of Stuttgart, and 60 E. of Strasburg. Lon. 9° 12' E., lat. 48° 33' N.

Nusserpour, town of Hindoostan, capital of a district of the same name, 80 ms. NE. of Tatta. Lon. 68° 20' E., lat. 2° 20' N.

Nuttsville, village, Lancaster co., Va., by postroad 82 ms. NE. by E. from Richmond.

Nuys, town of Germany, on the Erfft, 5 ms. SW. of Dusseldorff, and 20 NW. of Cologne. Lon. 6° 52' E., lat. 51° 11' N.

Nyborg, town of Denmark, in the isle of Funen, seated in a commodious bay 10 ms. E. of Odensee. Lon. 10° 40' E., lat. 55° 30' N.

Nyland, province of Sweden, in Finland, lying on the Gulf of Finland, to the W. of Carrelia.

Nymburg, strong town of Bohemia, seated on the river Elbe. Lon. 13° 26' E., lat. 50° 8' N.

Nyon, commercial town of Switzerland in the Pays de Vaud, capital of a bailiwick of the same name, near the Lake of Geneva, 10 ms. NNE. of that city. Lon. 6° 12' E. lat. 46° 21' N.

Nyons, town of Fr. in the dep. of Drome, and late province of Dauphiny, seated on the river Aigues, over which it has a lofty bridge of one arch, the work of the Romans, and a mineral spring named Pontais, and some manufactures of soap and woolen stuffs. It is 8 ms. NW. of Buis. Lon. 5° 15' E., lat. 44° 26' N.

Nysselot, town of Russia, in the government of Livonia. It is seated on the Narova, among large marshes, 20 ms. SW. of Narva, and 69 N. of Wiburg. Lon. 29° 10' E., lat. 61° 56' N.

Nystadt, town of Sweden, in Finland, noted for a peace concluded here in 1721, between the emperor of Russia, and the king of Sweden, and is seated on a bay of the Gulf of Bothnia, 55 ms. NW. of Abo. Lon. 31° 1' E., lat. 61° 10' N.

Nysted or *Nyested*, town of Denmark, in the island of Laland with a considerable trade to the duchy of Mecklenburg and other places of Germany. Lon. 11° 4' E., lat. 54° 43' N.

O.

Oak Flat, post office, Pendleton co., Va.

Oakfusgee, river of the U. S., sometimes called the Tallapoosa. It rises in the mountains of

Ga., and after running through the State in a SW. course, it enters Ala. Thence it passes nearly due S., till it joins the Coosa, and forms the Ala. The united streams are afterwards joined by the Tombigbee, and fall into the Gulf of Mexico, near Mobile.

Oak Grove, post office Westmoreland co., Va., by postroad 83 ms. from Richmond.—Jasper co. Ga., 45 ms. from Milledgeville.

Oak Hall post office, Pickens co. Ala., 176 ms. NW. from Cahaba.

Oakham or *Okeham*, town of Eng., and co., town of Rutlandshire, in the centre of a fertile valley, called the Vale of Catmose, 28 ms. S. by E. of Nottingham, and 98 N. by W. of London. Lon. 0 46 W. lat. 52 42 N.

Oakham, town, Worcester co., Mass., 19 ms. NW. from Worcester.

Oakhampton, or *Ockhampton*, borough of Eng. in Devonshire, on the river Ock, 24 ms. W. of Exeter, and 195 W. by S. of London. Lon. 4 5. W. lat. 50 48 N.

Oak Hill, post office, Green co., N. Y.—Post office, Fauquier co. Va.—Post office, Howard co., Mo.

Oakingham, village, Laurens district, S. C., 92 ms. NW. from Columbia.

Oakland, co., Mich., on Huron of Lake St. Clair, lying NW. from Wayne, and W. from Macomb counties, and about 40 ms. NW. from Detroit. The land of this county is excellent, and since 1818, when the United States lands were sold, settlements have very rapidly progressed.

Oakland, post office, Oakland co., Mich., 35 ms. NW. from Detroit.—Post office, Alleghany co., N. Y., by post road 254 miles westerly from Albany.

Oakland Mills, post office, Anne Arundel co., Maryland.

Oakley, post office, Seneca co., Ohio.

Oakmulga, village, Chesterfield county, Va., 49 ms. from Richmond.

Oakmulgee, river of Georgia, it is a considerable stream, which rises in the Creek country, and, when joined by the Oconee, forms the Alatamaha; the latter falling into the Atlantic ocean between McIntosh and Glynn counties.

Oak Orchard, creek of New York, in Genesee co., rises near the Tonewanto, and flows N. into Lake Ontario. It is one of the feeders of the Erie canal.

Oaktomie, village, Covington co., Miss., 103 ms. SE. from Jackson.

Oakville, village, Buckingham co., Va.

Oakland Mills, post office, Loudon co., Va., 40 ms. W. from W. C.

Oarom, river of South America, in Guiana, the SE. branch of the Paraguay of Orinoco. It heads at N. lat. 4°, and, after flowing NNW. 300 ms., joins the Paraguay.

OASES, in the plural; *oasis*, in the singular, from the Coptic *ouah*, Arab *ulah*, are isolated fertile spots in Africa, entirely surrounded by sandy deserts. The oases are scattered at various distances, and are of unequal relative extent. The existence of these detached vegetable spots has been produced by water either approaching near the surface or actually issuing out in springs. The oases are only on the small scale, and more isolated, what

other parts of Africa are on the large, that panses bordered by deserts.

Oaxaca, State of Mexico, bounded by the Atlantic ocean S., Puebla W. and NW., Vera N. and NE., and Guatamala E.; length from N. to W. 240 miles, mean width 180, and area 34,000 sq. ms. Between latitude 15 40 and 18 North.

This State is one of the most delightful tries on this part of the globe. The beautiful salubrity of the climate, the fertility of the soil, and the richness and variety of its products all combine to minister to the prosperity of its inhabitants; therefore, this province has, from the remotest periods, been the theatre of an advanced civilization. In Puebla, Oaxaca, and Valladolid, the substrata are composed of basalt, amygdaloid, and porphyry; but the Mixtecan and Zapotecan ranges of Oaxaca granite and gneiss are the prevailing rocks. The mountain summits of Oaxaca have not been scientifically determined, but from the circumstances from some of the peaks, the gulf of Mexico and the Pacific ocean are visible, the elevation exceeds 7,000 feet.

The surface of this region, though mountainous, may be considered in general as an inclined plane, sloping from 7,000 feet to the level of the Pacific ocean. Some very remarkable Aztec ruins are found in Oaxaca.—See *Pyramids*, America.

The list of vegetable productions of Oaxaca is commensurate with nearly all plants cultivated by civilized man in the temperate zones and the torrid regions. Its principal rivers are the Chichimeca, falling into the gulf of Tehuantepec, and the Coahuila, entering the Pacific ocean in the Gulf of Mexico.

Its most productive mines are those of Zacatecas, Zolaga, Yxtepechi, and Totomostla.

The cities of Oaxaca are Oaxaca, San Juan de los Rios, and Tehuantepec.

The family of Hernando Cortez are styled the Counts of the valley of Oaxaca. Their province is composed of the four villas del Marquesado, 49 villages, which contain 18,000 inhabitants.

Oaxaca, city of Mexico and capital of the State of the same name, stands on one of the banks of the Chicometepe river, 240 ms. SSE. from the city of Mexico. Lon. W. C. 20 2 W., lat. N. It is the ancient Huaxyacac, called Huastec by early Spanish writers on Mexico, Antequera. It enjoys an atmosphere of peculiar serenity, and the country is subject to earthquakes. Pop. 50,000.

Oban, village of Scot., in Argyllshire, on the seacoast, where there is an excellent station and a custom-house.

Obdach, town of Germany, in the duchy of Prussia, seated at the confluence of the Achse and Traun, 3 miles below the Lake Chienzee, 100 W. of Gratz. Longitude 14 43 E., latitude 47 30 N.

Oberkirch, town and castle of France, in the department of Lower Rhine, and late province of the Netherlands, lately belonging to the archbishop of Cologne, from which place it is 3 ms. distant. Longitude 7 50 E., lat. 48 35 N.

Oberndorf, town of Germany, in the county of Suabia, in the Black Forest, subject to the empire of Austria. It is divided into the Upper and

ow, and seated on the Neckar, 14 miles N. of
Dwell. Lon. 8 45 E., lat. 48 22 N.

ernperg, town of Bavaria, with a castle, seat-
the Inn, 15 miles S. of Passau, to whose
it belongs. Lon. 13 36 E., lat. 48 15 N.

erstein, town of Germany, in the palatinate
the Rhine, capital of a county of the same
seated on the Nahe, 30 miles E. by S. of
res. Lon. 7 26 E., lat. 49 42 N.

erwesel, formerly an imperial town of Ger-
ma, in the electorate of Treves, taken by the
French in 1794, and seated on the Rhine, 40 ms.
N. of Treves. Lon. 7 48 E., lat. 50 1 N.

Obi.—See *Oby*.

Ochian, NW. river of Tennessee, rises in Henry
and Carroll counties, flows SW. by W., and falls
into the Mississippi at N. lat. 35 56.

Ochidos, town of Portugal, in Estramadura, with
a strong castle on a rock, 13 miles E. of Peniche,
18 NNE. of Lisbon.

Ocollah, strong town of Persia, in Irac-Agemi,
and on a branch of the Tigris, near Bassora.

Obskaia, gulf or bay of Siberia, in the Frozen
Sea, about 360 ms. from N. to S., and from 45
to 60 in breadth. Near the middle of its E. side
it opens out the gulf of Tazowskaia, about 140
miles long and 30 broad. The SW. extremity of
the gulf of Obskaia, where the river Oby enters it,
is about 69 15 E., lat. 66 55 N.

Obinsk, town of Russia, in the Government of
Perm, situate on the Kama, 60 ms. N. of Perm.
Lon. 56° E., lat. 58 44 N.

Oby, or *Ob*, river of Siberia, and of the Russian
Empire. It issues from the Lake Altyn, in the
Government of Ischimska, and runs NW. and W. by
the mountains of Narim and Surgut, till it receives the
river from Tobolsk, when it flows N. and NE.
It enters the gulf of Obskaia, after a course of
900 miles. It is navigable almost to its source,
and discharges a large smooth stream, abounding in fish.
Near its source, especially after the influx of the
Irtysh, it forms a great number of islands. Though
the Irtysh gives name to the basin, the Irtysh
is the western great constituent stream, in respect
to the remoteness of source and extent of surface
drained, much the superior stream. But, taken
together, the Oby and Irtysh form one of the great
rivers of the first order. The Irtysh rising as far
north as lat. 43°, and the mouth of the gulf of Oby be-
ing at lat. 73°, the basin extends over 30° of lat.,
and fills the great space between the Ural moun-
tains and the basin of the Jenisey. In their re-
spective extents on the sphere, there is very little
difference comparatively between the Oby and
the Irtysh basins, but either exceeding an area of
100,000 square miles, is, next to the other, far the
largest river of the eastern continent. The Blue
River of China equals either in length of course,
or in the space it fills far behind in surface drained.

Ocana, town of Colombia, in New Granada, on
the eastern branch of the Magdalena. Lon. W. C.
5 E., lat. 8 10 N.

Ocano, town of Spain, in New Castile, seated
on a plain, abounding in all the necessaries of life,
13 miles E. of Toledo. Lon. 2 50 W., lat. 39 52 N.

Ocatahoola, parish, La., bounded by Concordia
to the SE., Rapides S. and SW., and Washitau
to the N.; length 70 miles, mean width 29,
area 2,000 sq. ms.—See *Catahoola*.

Ocatahoola river.—See *Catahoola river*.

Ocatahoola Lake.—See *Catahoola Lake*.

Occa, large river of Russia, which falls into the
Volga, near Nishnei Novgorod.—See *Oka*.

Occoquhan, river, Va., rises in Fauquier, and
flowing E. across that county, and thence between
Prince William and Fairfax, falls into the Poto-
mac about 20 miles below Washington city. It is
navigable for small vessels 15 miles, to Colchester.
—Post office, Prince William co., Va., 20 ms.
SSW. from W. C.

Oceanica.—See *Polynesia*.

Ochrida, town of European Turkey, in Albania,
100 ms. N. from Joanina, on Lake Ochrida, from
which it issues the river Diuro.—See *Lochrida*.

Ochsenfurt, town of Bavaria, in the circle of
Franconia, and in the bishopric of Wurtzburg, on
the Main, 10 miles SE. of Wurtzburg. Lon. 10
10 E., lat. 49 35 N.

Ochsenhausen, town of Germany, in the kingdom
of Bavaria, 14 miles S. of Ulm, and 40 WSW. of
Augsburg. Longitude 10 11 E., latitude 48 10
North.

Ocker, river of Lower Saxony, which rises in
the S. part of the duchy of Brunswick, runs by
Goslar, Wolfenbuttel, and Brunswick, and falls
into the Aller, W. of Guythorn.

Ocklawaha river, the W. branch of St. John's
river of Florida. It is composed of two confluent,
Orange lake river and Ocklawaha proper. "The
Ocklawaha takes its rise out of the Lake Apopka,
about 73 ms. by water above its mouth. At the
outlet of this lake the stream is 15 feet wide and
7 feet deep; but the width and depth of the river are
increasing gradually down to St. John's. The lake
Apopka being but 80 ms. NE. from the bay of Es-
piritu Santo, (Tampa) the Ocklawaha, if improv-
ed, might gradually facilitate the inland communi-
cation between this bay and the Atlantic ocean.
In this direction, the distance from the mouth of
St. John's to the bay is about 260 miles, out of
which, 180 would be by water, and 80 by land.
Above its mouth 16 miles, the Ocklawaha re-
ceives the outlet of Orange lake.

"The banks of this river (outlet of Orange lake)
are represented as lined in many places with well
timbered hammocks. The country through which
it runs the head branches is generally sandy, with a
pine growth; it presents, however, some fine ham-
mocks, and also extensive prairies, subject to be
overflowed in rainy weather. Numerous ponds and
lakes are met with in every direction."—See *Engi-
neer's report, public document, No. 185, p. 13.*

The Ocklawaha heads in the country of the
Seminole Indians, between the sources of St. John's
and those of Amaxuara rivers flowing by a gen-
eral northern course to the influx of Orange lake
outlet. The latter heads between the Santa Fe
branch of Suwanee and Amaxuara rivers, and,
flowing eastwards, joins the Ocklawaha. Below
their junction the name of Ocklawaha and course
of Orange river are maintained to St. John's.
Height of Orange lake above the ocean 41 feet.

Ocklockonne, bay and river. The bay of Ock-
lockonne is in fact the inner part of the larger bay
of Appalachie, and under the latter head the former
has been already noticed, but we may add, from the
engineer's report, that the bay of Ocklockonne "lies
18 miles SE. of St. Mark. Its entrance is much

obstructed by oyster banks; and its bottom may be considered as part of the shoal, which, from Appalachie to Cape St. Blas, impedes approach to the coast. The general width of Ocklockonne bay is $1\frac{3}{8}$ ms., the length $6\frac{1}{8}$. The depth which can be carried through the bay to Ocklockonne river 7 feet at low tide."

Ocklockonne river rises in Georgia, interlocking sources with those of Suwannee, and some confluents of Flint river, draining sections of Baker, Decatur, Irwin, and Lowndes counties, the various branches unite in Thomas after a general southern course of 50 miles; inflecting thence to southwestward 60 ms., and, about middistance, having entered Florida, it again bends to SE. 30 miles to its entrance into Ocklockonne bay. This river sweeps an elliptic curve round to the westward of Tallahassee. Its basin or valley lies between those of Appalachianicola and Oscilla rivers.

Oconee, river, Georgia, NE. branch of the Altamaha. It rises in Hall co., Georgia, and, flowing SSE. about 170 ms., by comparative courses joins the Oakmulgee to form the Altamaha. It is navigable for boats of considerable size to Milledgeville.

Ocracoke Inlet, unites Albemarle to Pamlico sound, on the coast of Tyrrell county, North Carolina. It has a depth of 14 feet upon its most shallow bar.

Ocrida.—See *Loochrida*.

Octararo, creek, Penn., rises in Lancaster and Chester cos., and, flowing SSW., enters Cecil co., Md., and falls into Susquehannah river about 10 ms. above Havre de Grace.

Octararo, post office, Lancaster co., Pa., 52 ms. SE. from Harrisburg.

Ocumara, bay of Colombia, in Venezuela, about about 15 ms. E. from Porto Cavallo.

Oczakow, or *Olchahof*, seaport and fortress of Russia, in the government of Catharinenslaf. It was taken by storm by the Russians in 1788, and was confirmed to Russia by the subsequent peace. This important place is the key to both the Bog and the Dnieper, rivers of great consequence to this part of the empire. It is seated near the Black sea, on the N. side of the estuary of the Dnieper, opposite Kinburn, 50 ms. W. of Cherson, and 190 N. by E. of Constantinople. Lon. $30\ 30$ E., lat. $46\ 35$ N.

ODALISK, Turkish, from *oda*, chamber, wives of the sultans, mothers, also, they may be, but not of the heir apparent. The latter is *Sultana Valide*.

Odena, town of Guinea.—See *George del Mina*.

Odenbach, town of Germany, in the duchy of Deux Ponts, on the Glan, 34 ms. SW. of Mentz.

Odensee, town of Denmark, capital of the isle of Funen. It supplies the greatest part of the army with all their leather accoutrements, and is particularly famous for gloves. Here are also manufactures of cloth, sugar, soap. It is situated on a river, 6 ms. from the bay of Stegestrand, and 90 W. by S. of Copenhagen. Lon. $10\ 17$ E., lat. $55\ 30$ N.

Oder, river of Germany, which has its source in the mountains of Moravia, and flows N. to Oderberg, then passes by Ratibor, Oppeln, Breslau, and Glogau, in Silesia, Crossen, Frankfort,

Lebus, Custrin, and Frinwalt, in Brandenburg, and Gartz, Stettin, Camin, Wollin, Usedom, Wolgast, in Pomerania. Below Stettin it forms a large lake or bay, called Gross Haff, and enters the Baltic sea by three channels, the Peene, Swin, and Diwenow, between which are the islands of Usedom and Wollin.

The Oder is not entirely a river of Germany, largest of its confluent, the Warta, flowing into Poland. The Oder proper rises in Moravia, a 25 English ms. E. from Olmutz, first pursuing a course nearly NE., but gradually curving to N. enters Silesia, and, turning to NNW., describes that fine country nearly 250 ms. It then enters Upper Saxony, through which the residue of its course is continued. The Warta rises in the latinate of Cracow, in Poland, 50 ms E. of Brieg, in Silesia, flows nearly N. 100 English over the palatinates of Cracow, Siradia, and of Kalish, assumes a NW. course, which it pursues, with many partial windings, nearly 200 to Landsberg, where it receives, also from Poland, the Netze. The Netze has its principal source from Lake Goplo Jeziero, between the Warta and Vistula; it first flows NW. 70 English ms. to connecting canal which unites this stream to Vistula below Thorn, and from thence W. 100 ms. to its junction with the Warta, at Landsberg. Below Landsberg the united streams flow a 100 S. of W. about 50 ms. to Kustrin, where they are lost in the main volume of the Oder. Between Kustrin and Oderberg, in a general distance of 100 ms., the Oder is made navigable by a canal a 10 or near the eastern side. The entire length of the Oder, by the Oder proper, is upwards of 400 English ms., and nearly as much following the Warta. The noble valley of the Oder is contained between N. lat. $49\ 25$ and 54° , being about 350 ms. in length, with 150 mean breadth, and draining an area of 52,500 sq. ms. It is united to the Elbe by a canal from between Oderberg and Freyenwalde, into the Havel, and thence down the latter by Freyenwalde, Spandau, and Potsdam, into the Havel above Werben. Another canal joins the Oder to the Spree near Mulrose. See *Havel* and *Spree*; see, also, *Stettin* and *Bromberg*. The Oder is navigable from Brieg, in Silesia, to the Baltic, upwards of 300 ms. A cut called the *Lebus* was begun in 1753, from Kustrin, as a dredging machine, worked by steam, was procured a few years past in England to deepen the bottom at the mouth of the river. The Warta is navigable 200 ms. into Poland. The main navigation passes along the branch called the Netze, as far as Brieg, where commences the canal of Bromberg, constructed between 1722 and 1725, by Brackenrath, under the direction of Frederick the Great. It is 67 feet from the summit level of the Warta to the little river Brahe, at Bromberg.

Oderberg, town of Moravia, on the confines of Silesia, with a castle, seated on the Oder, at the influx of the Elsa, 18 ms. NNW. of Teschen.—Town of Brandenburg, in the middle mark, seated on the Oder, 25 ms. NW. of Custrin.

Odernheim, town of Germany, in the palatinates of the Rhine, seated on the Seltz, 14 ms. S. of Mentz.—Town of Germany, in the duchy of Deux Points, seated on the Glan, near its confluence with the Nahe, 28 ms. SW. of Mentz.

Odessa, fortified town of Russia, in the government of Catherinenslaf, seated on a gulf of the Black sea, 44 ms. W. by S. of Oczakow. Lon. 30 4 E., lat. 46 28 N. This place, formerly an obscure village, was chosen by Catharine II, in 1722, as a suitable place to form a Russian emporium on the Black sea. The bay is spacious, deep, and bottomed with fine sand or gravel. The adjacent regions on the Dnieper, Bog, and Dniester are in a high degree productive. Its advance has been extremely rapid; in 1804 it contained 100,000; in 1820, 36,000; and in 1822, above 100,000 inhabitants. Its chief export staple is tallow. Tallow, hides, &c., are also exported in great quantities. The prospect is fair that Odessa will become one of the greatest marts of the eastern continent.

Oeyipoor, town of Hindoostan, capital of Jushoor, in the province of Orissa. It is 60 ms. NE. of Cuttampour, and 220 NW. of Cattack. Lon. 83 2 E., lat. 22 37 N.

Ohham, town of Eng., in Hampshire, on the Newbury canal, 24 ms. NE. of Winchester, and 12 W. by S. of London.

Ohlsfeld, town of Lower Saxony, in the duchy of Magdeburg, seated on the Aller, 22 ms. NE. of Brunswick.

ŒCUMENIC COUNCIL, Greek, *oikoumenê*, to signify all that is habitable, universal, or general. From its title this council ought to be composed of all the bishops of the Catholic church; but in its ordinary acceptation it only supposes the representation of that church. *Synod* in reality has the same meaning.—See the latter article.

Ohdenburg, or *Soprony-Norwegye*, palatinate of Upper Hungary, commencing about 40 ms. SSE. of Vienna.

Ohderan, town of Upper Saxony, in Misnia, situated near the Flohe, 9 ms. ENE. of Chemnitz.

Ohland, island of Sweden, in the Baltic, separated from the coast of Gothland by a strait 12 miles broad in the narrowest part. It is 80 ms. long, but not more than 9 broad. The N. part is covered with forests and quarries of excellent freestone, and the S. part is more level, and very fertile. Iron ore is abundant in alum mines. Bornholm is the chief town, seated on the strait, 22 ms. ENE. of Almar. Longitude 16 50 E., latitude 56 48 N.

Ohlfell, town of Lower Saxony, in the duchy of Magdeburg, on the Aller, 25 ms. E. of Brunswick. Lon. 11 20 E., lat. 52 27 N.

Ohls, principality of Silesia, forming part of the government of Breslau.

Ohlsnitz, town of Upper Saxony, in the territory of Voigtland, seated on the Elster. Lon. 12 10 E., lat. 50 19 N.

Ohsel, island of the Baltic, on the coast of Livonia, at the entrance of the Gulf of Riga. It is 15 ms. long and 50 broad, and defended by two castles. It formerly belonged to Denmark, but now to Russia. Its capital is Arensburg.

Ohsting, town of Upper Bavaria. It is divided into the upper and lower town, and is seated on the Isar, 8 ms. NW. of Burkausen. Lon. 12 44 E., lat. 48 14 N.

Ohsting, or *Oettingen*, town of Suabia, capital of the county of the same name. It is seated on the river Wertach, 12 ms. NNW. of Donawert, and 35

WNW. of Ingolstadt. Lon. 10 40 E., lat. 48 58 N.

Offa's Dike, an entrenchment cast up by Offa, a Saxon king, to defend England against the incursions of the Welsh. It runs through Herefordshire, Shropshire, Montgomeryshire, Denbighshire, and Flintshire.

Offanto, river of the kingdom of Naples, which rises in the Appennines, passes by Conza and Monte Verde, separates Capitanata from Basilicata and Terri di Bari, and falls into the Gulf of Venice near Barletta. It is the ancient Aufidius.

Offenbach, town of Germany, in the circle of Franconia, on the Main, 5 ms. E. of Frankfort. Lon. 8 48 E., lat. 49 54 N.

Offenburg, town of Suabia, on the Kintzing, 12 ms. SE. of Strasburg, and 28 S. of Baden. Lon. 8 1 E., lat. 48 31 N.

Offida, town of Italy, in the marquisate of Ancona, 26 ms. S. of Loreto. Lon. 13 46 E., lat. 42 53 N.

Offutt's, post office, Hampshire co., Va., 93 ms. NW. from W. C.

Offoo Island.—See *Navigators' Islands*.

Ogden, town, Monroe co., N. Y., 10 ms. a little N. of W. from Rochester. Population 1820, 1,435.

Ogden's, post office, Scott co., Mo.

Ogdensburg, town and seat of justice, St. Lawrence co., N. Y., on St. Lawrence river, on the point below the mouth of Oswegatche. The site of this town is high, bold and pleasing, and the mouth of the Oswegatche affords an excellent harbor. It is the lowest point of ship navigation on St. Lawrence from Lake Ontario. The Gallop rapids commence about 5 ms. below. It is the seat of some mills and manufactories, and stands opposite to Prescott, in U. C., 65 ms. by land NE. from Sackett's Harbor, and about 120 ms. above Montreal. Pop. of the tp. 1840, 2,526.

Ogechee, river of Ga., rising in Greene co., and flowing SE. between the confluent of the Alatamaha and Savannah rivers, falls into the Atlantic ocean by Ossabow sound, 20 ms. S. from Savannah. It passes by Georgetown, in Warren, and Louisville, in Jefferson co.

Oginski canal, between the governments of Bialsk and Minsk, in Russian Poland. It commences in the Iasiolda, which falls into the Prypiez, and thence into the Dnieper, and terminates near Slonim, in the Schara, a branch of the Niemen. It was made navigable in 1784, and completed in 1802. By this canal, and by the Dnieper and Niemen, a water communication is opened between the Baltic and Black seas.

Oglethorpe, co. of Georgia, bounded E. by Elbert and Wilkes, S. by Talliaferro and Greene, W. by Clark, and N. by Madison. N. lat. 34° and lon. 6° W. of W. C. intersect near the NE. angle of this co. Greatest length 32 ms., mean breadth 15, and area 480 sq. ms. Chief town, Lexington. The surface moderately hilly, and soil productive. Staples, cotton grain, &c. Pop. 1820, 14,046; in 1840, 10,868. Cent. lat. 33 54 N., lon. W. C. 6 23 W.

Oguinquit, village, York co., Me.

Ohio, NW. tp. of Alleghany co., Pa., on the Ohio river. Pop. 1820, 1,477.—One of the western tps. of Beaver co., Pa., on and N. from

Ohio river. Pop. in 1820, 1,075.—Co., Va., bounded by Washington and Greene cos., in Pa., E., Tyler co., in Va., S., the Ohio river W., and Brooke co., in Va., N. Length 32, mean width 10 ms.; area 320 sq. ms. The surface of this co. is excessively broken by hills, and yet the soil is almost uniformly productive. Beside the Ohio river, which washes its western border, it is watered by Short creek, Wheeling creek, Grave creek, Fish creek, and Fishing creek. The alluvial bottoms of the Ohio and the above creeks are exuberantly fertile. Staples, grain, flour, pork, beef, live stock, &c. Chief town, Wheeling. Pop. in 1820, 9,182; and in 1840, 13,367. Cent. lat. 40°, lon. W. C. 3 42 W.—Co., Ky., bounded by Butler SE., Green river or Muhlenberg S. and SW., Davies NW., Brackenridge N., and Grayson NE. Length 32, mean width 20 ms.; area 640 sq. ms. Chief town, Hartford. Pop. 1820, 3,879. Cent. lat. 37 30 N., lon W. C. 9 40 W.

Ohio, State of the United States, bounded by the Ohio river or Va. SE., Ohio river or Ky. S., Ia. W., Mich. and Lake Erie N., and Pa. NE.

Miles.

Ohio has an interior boundary on Ohio river, from the mouth of Little Beaver to that of the Great Miami	-	-	-	440
Due N. from the mouth of Great Miami, N. lat. 39 7, to N. lat. 41 35	-	-	-	170
Thence due E. to Lake Erie	-	-	-	80
Thence along the SE. shore of Erie	-	-	-	150
Thence along the western boundary of Pennsylvania	-	-	-	93

Having an entire outline of - - - 933
 Area 40,000, equal to 25,600,000 acres. It extends from 37 30 to 42° N. lat., and from 80 32 to 84 50 W. lon.

The longest line in the State of Ohio, NE. and SW., is 300 ms. Its width between Pennsylvania and Indiana 227 ms.

Though not marked by any of those bold and sublime features which are peculiar only to mountainous countries, Ohio presents some very remarkable traits, which call forth the utmost attention of the statist and philosopher.

For the general features of Ohio, see art. *Mississippi basin*, section Ohio river.

When it is known that the vale in which the Ohio flows is from 300 to 400 feet below the common level of the adjacent country, and when it is also known that an immense table land extends through the State in nearly a NE. and SW. direction, the origin of the phenomena, which serve to form its physiognomy, is easily traced. The rugged appearance of the Ohio banks in all their extent give an idea of unevenness to the State, which an examination of its interior must correct.

Like all other sections of the U. S., Ohio cannot be designated by any general character; and similar to every newly settled part of our country, from the attention of early emigrants being naturally turned towards the best soil, the river alluvial and rich prairie margins have contributed to give too high a coloring to descriptions of its lands.

As far as a general view can be adopted, the following may exhibit the great outlines of the State.

Fifty or sixty ms. from the Ohio river, hilly, and in part very rugged, formed by abrasion of water.

The region immediately in the rear of the is not level, though not rising into hills of any considerable elevation; it is rolling land, and presents features in exact accordance with what must result from the theory we have adopted.

The interior and western part of Ohio may be regarded as elevated, when compared with the Erie or Ohio river, but, with very partial exceptions, the surface is a plain, and, strange to say, may appear to those who have not traversed it, an alluvial plain. No part of the banks of any Atlantic river is more unequivocally alluvial than the site and environs of Columbus, and the only a specimen of the whole adjacent country. Under the heads of *Muskingum*, *Hockhocking*, *Licking*, &c., the singular fact is noticed of the river's rising in or on this interior flat, and flowing towards and not from the hills. An idea that the Ohio hills are a buttress to the plain within is directly contrary to fact. It is an error I must be guilty of having in some measure contributed to sustain.

The third variety is that of the plains, or level land. This natural section contains very various species of soil, from rich river alluvial and productive to sterile oak barrens and marshes; the latter of considerable extent.

Another remarkable natural section of Ohio is along Lake Erie. The slope of the country gradually along Ohio towards the sources of the Muskingum and Cuyahoga. On the latter, a level and much more inclined depression falls towards the lake. This dividing line, for ridges cannot be called, does not conform to the bearings of Erie. At the NE. angle of the State, its course is within 3 miles, whilst towards the source of Maumee, it has receded above 100 miles from the lake.

A series of falls interrupts every river of Ohio flowing into Erie. Those which flow into the Ohio river, except Muskingum, though all are rapid in their descent, none have falls. The small cataract at Muskingum, at Zanesville, is the last water fall in any stream of magnitude, worthy notice, on the northwestern slope of the Ohio basin. It may be of little or no importance, but it is not irrelevant to remark, that on all the vast extent W. from Zanesville to the sources of the Platt and Kansas rivers, and NW. to the sources of the Stone and Missouri rivers, no cataract worthy notice has been discovered. Below the Great Falls, on the southeastern slope, their occurrence is equally rare. The rapids of Ohio and the shoals, in Ten., are only approaches to falls; both are merely strong rapids, the latter only obstructing up stream, both admitting down stream navigation. Indeed, exemption from impediments to commercial intercourse may be constantly kept in view as one of the most felicitous features of the whole Mississippi basin. An exemption to an equal extent can no where else be found on the globe, except in the basins of the Plate, Amazon, and Orinoco rivers, in S. America.

It would be a very interesting solution to determine the relative extent of the various natural sections of Ohio. Such an estimate would be so very uncertain upon the uncertain data we possess, that no satisfactory result can be obtained. It may be observed, that the three sections, hilly, rolling, and level, are nearly of equal extent, or about 1:00

TABLE—Continued.

Ohio is calculated by Mr. Kilbourn, in his Gazetteer, to contain 40,000 sq. ms. That calculation is, no doubt, nearly correct; therefore, allowing for surface, irreclaimable swamps, and other uncultivated tracts, the aggregate of the counties will approach very closely to the real arable land of Ohio.

The progressive population of Ohio is an unmatched phenomenon in the history of colonization. In 1783, the ground now embraced within its limits was one wide waste. In 1790, 3,000 civilized inhabitants were only found on its surface. In 1800, they had increased to 42,156. In 1810, the census presented an abstract containing 227,843. In 1820, the State possessed 581,434 inhabitants. It demands a very limited knowledge of the relation of Ohio, its admirable position, its exuberant soil, and, above all, the effects which must ensue from opening the western canal of New York, to foresee an augmentation of people in Ohio more rapid in the next ten years than in any equal antecedent period.

s. each; and that the whole State is, though usually so, habitable. The result of the settlement of this State proves its general productiveness.

I have been myself over a large part of the southern and northern frontiers of Ohio, and have everywhere found the soil favorable to the purpose of agriculture. No part of what is called barrens, or swamps, in Ohio, are so irreclaimable as the sandy tracts of the Carolinas and Florida, the sea marshes of Louisiana and Texas, or so unproductive as the water-terminable pine tracts which reach from the banks of the Red river.

At every point of position, its locale is in many respects favorable, but its advantages are more appropriate to an interior than exterior communication. The quantity of its arable soil will, no doubt, be determined as it is by many moral causes, superintending a very dense population in Ohio; circumstances, however, common to all, will produce in Ohio, as in Indiana, Illinois, and Michigan, a mass of population far exceeding that of any other equal continent extent in the United States.

The most common mineral productions of Ohio are coal and iron. Coal is found along the Ohio and Muskingum rivers, and iron ore in various parts of the State. Water, impregnated with muriate of soda, (common salt,) has been found, but in no quantity to render the manufacture of soda an object of any considerable value.

The staples of this State are numerous and important, consisting of wheat, rye, oats, Indian corn, apples, pears, cider, live stock, and salted provisions. The most frequented commercial outlets are by the Ohio and Mississippi rivers, to New Orleans; by Lake Erie and Detroit river, to Detroit; by Lakes Erie and Ontario and St. Lawrence river, to Montreal; and by land to Pittsburg, New York, Philadelphia and Baltimore.

The seat of Government is at Columbus, but by far the largest town in the State is the city of Cincinnati, containing, at present, about 47,000 inhabitants. Steubenville, Zanesville, Cleveland, and several others, are flourishing places, containing a population of from 5,000 to 6,000.

The civil and political subdivisions of Ohio are the following, with the result of the census of 1820 recorded, which, in accordance with our general laws we retain, but which, if not adopted in other States would deserve to be so in that of Ohio, from the prodigious increase of population:

Census of 1820.

Counties.	Inhabitants.	Sq. ms.	To sq. m.
Adams	10,406	400	26

Ohio, river of the U. S., the great NE. branch of Mississippi.—See *Mississippi*, section Ohio.

Ohio, southern tp., Gallia co., Ohio. Pop. in 1840, 483.—SW. tp., Clermont co., Ohio. P. in 1820, 2,791.

Ohio *Falls*, in Youghiogeny river, Fayette co., Pa., 11 or 12 ms. NE. from Uniontown.

Oil Creek, creek, Pa., rising in the NE. part of Crawford, and SW. of Warren co., flows S., and falls into the Alleghany river 10 ms. above Frankfort. On it is a remarkable spring, on the waters of which a mineral oil is found to float.—SE. of Uniontown, Crawford co., Pa., 20 ms. NNE. from Uniontown.

Oil Spring, Cattaraugus co., N. Y.

Oisans, town of Fr., in the dep. of Isere, and province of Dauphiny, 28 ms. SE. of Grenoble. Beauvais is the capital. Lon. 6 25 E., lat. 45 30 N.

Oise, dep. of Fr., including part of the late province of the Isle of France.—River which has its source in the Ardennes, and falls into the Seine, near Pontoise. It gives name to the above department.

Okla, river of European Russia, great SW. branch of the Volga. It rises in the governments of Smolensk, Kalouga, and Orel, flows NE. by E., and joins the Volga at Nishnei-Novogorod, after a curvilinear course of 600 ms. It passes by Orel, Kalouga, Kolomna, Riazan, Spask, Kassimov, and Moscow. Mosqua, on which stands Moscow, is one of its northern branches. It is one of the best navigable secondary rivers in Europe, being passable with boats to Orel, near its source.

Oakham.—See *Oakhham*.

Oakingham, or *Wokingham*, town of Eng., in Berkshire, 8 ms. SE. of Reading, and 32 W. of London. Lon. 59' W., lat. 51 25 N.

Ok-lock-one, river, U. S., rises in Georgia, and flows SSW., falls into Ok-lock-one bay and St. George's sound, 40 ms. E. from the mouth of the Chachicola river.—See *Ocklockonne bay* and *Ok-lock-one bay*.

Ok-lock one bay is the extreme inland extension of the Appalachian bay, and receives the Ok-lock-one and St. Mark's rivers. Lat. 30 8 N., lon. W. C. 10 15 W.

Okotzk, province of the government of Irkutzk, Siberia. Its capital, of the same name, is seated on the mouth of the Okota, in a bay of the Eastern Sea.

Oaker's Mills, post office, Hardy co., Va., 103 ms. N. from W. C.

Oldenburg, Grand duchy of, State of Germany, bounded N. by the German sea, E. by the Weser, S. and W. by the kingdom of Hanover. It is 170 English miles from S. to N. with a mean length of 20, or contains 1,400 sq. ms. N. lat. 52 and lon. 8° E. of London, intersects near the centre of the duchy. Oldenburg is a very ancient city of Europe, and was about the beginning of the 5th century united to Holstein by the marriage of Hedwiga of Holstein, with Theodoric the late count of Oldenburg. Their third son, Theodoric, married the widow of Christopher, king of Denmark, and in 1448, was placed on the throne of that kingdom, and received Holstein in fee for the life of his mother. Gerard, the eldest son of Theodoric, transmitted Oldenburg to his succes-

sors, who held it until 1667, when, by the death without heirs of Antony Gouthier, the last duke, it reverted to Denmark. In 1762, by the accession of the Duke of Holstein Gottorp to the throne of Russia, the inconvenience became felt of that great Power possessing a sief of Denmark, and, by a provisional treaty, in 1766, and finally, by a treaty of Cession of 1773, the grand duke, afterwards the Emperor Paul, ceded Holstein to Denmark, and received in exchange Oldenburg and Delmenhorst, which, by the consent of the German States, was erected into a sovereign duchy, in favor of a younger branch of Holstein Gottorp, Paul Frederick, who married the grand duchess, Catherine, daughter of Paul, and sister to the late and reigning emperor of Russia. The sweeping seizure made by Napoleon in 1810, of the countries situated along the North sea with the Free towns of Bremen and Hamburg, the duchy of Lauenberg, city of Lubeck, and intervening places included the duchy of Oldenburg. The grand duke claimed and received the active interference of his brother-in-law. Napoleon offered in exchange, Erfurt, and the lordship of Blankerhaym, which the duke of Oldenburg refused, and left the Russian Emperor the choice of seeing his sister and her children despoiled, or of supporting her rights. The duchy of Oldenburg was, indeed, perhaps the most efficient cause of the violent hatred of Alexander against Napoleon. In 1813, the grand duke was, by the fall of French power, restored with his children. The duchess Catharine was no more; she died in 1812.

The Congress of Vienna, in 1815, confirmed his title of grand duke, and ceded to him the small principality of Birkenfield on the Nahe, between Treves and Worms. The territory of Oldenburg now comprises 34 Eng. sq. ms. with a pop. of 240,000. Chief towns:

Oldenburg, the capital, pop.	-	-	6,000
Delmenhorst, pop.	-	-	1,800
Jever, pop.	-	-	3,000
Eutia, pop.	-	-	3,000

Two small districts in the vicinity of Lubeck, and in the duchy of Holstein, belong to the grand duke rather than to Oldenburg.—See *Birkenfield*.

Oldenburg, town of Westphalia, capital of a country of the same name. It is noted for its horses, and is seated on the Hunta, 22 ms. W. of Bremen, and 45 SE. of Embden. Lon. 8 8 E., lat. 53 7 N.—Town of Lower Saxony, in the duchy of Holstein, seated near the Baltic 30 ms. N. of Lubeck. Lon. 10 47 E., lat. 54 22 N.

Oldendorf, town of Lower Saxony, in the duchy of Lungenburg, seated on the Wenaw and Esca. Lon. 10 35 E., lat. 53 16 N.

Oldendorf, town of Westphalia, in the territory of Schawenburg, seated on the Weser, 28 ms. SW. of Hanover. Lon. 9 31 E., lat. 52 16 N.

Oldenzeel, town in the United Provinces of Overysse, 30 ms. E. of Deventer. Lon. 6 57 E., lat. 52 20 N.

Olderlo, town of Lower Saxony, in the duchy of Holstein, seated on the Trave, 17 ms. W. of Lubeck, and 25 NE. of Hamburg. Lon. 10 18 E., lat. 53 52 N.

Old Fort, village, Centre co., Pa.; by postroad 130 ms. NW. from Harrisburg.—Post office, Burke co., N. C.

Oldham, co. Ky., on O. river, formed from Henry and Jefferson cos., and is bounded by the Ohio river and by the cos. of Henry, Shelby, and Jefferson. Chief town, Westport. Cent. lat. 38 25, lon. W. C. 8 21 W. Pop. 1840, 7,380.

Old Head of Kinsale, cape of the S. coast of Ireland, about 6 miles S. from Kinsale. It is a high rocky promontory, which has been recently rendered distressfully remarkable by the wreck of the *Albion*, 1822.

Oldman's Creek, small stream of N. J., separating Salem and Gloucester cos., and falling into the Delaware about 3 ms. below Marcus Hook.

Old Point Comfort, and post office, is the extreme S. point of Elizabeth City co., Va., about 15 ms. N. from Norfolk. The two opposing points of Willoughby and Old Point Comfort separate Lynnhaven bay from Hampton Roads. The strait between the two points is the real mouth of James river.

Old Town, or *Indian Old Town*, town and island in Penobscot river, Penobscot co., Me. It is an Indian settlement, containing about 200 acres and 300 persons.

Old Town, town, Alleghany co., Md., on the N. side of Potomac river, near the mouth of the SW. branch, 14 ms. SE. of Cumberland, and 134 NW. of Washington.—Village, Ross co., O., 12 ms. NW. from Chillicothe, and 54 a little S. of E. from Columbus.

Olean, town, Cattaraugus co., N. Y., on Alleghany river, at the mouth of Olean creek, containing *Hamilton*; which see. Pop. 1820, 1,047.—Creek, Cattaraugus co., N. Y., flows S., and falls into Alleghany river at Hamilton.

Oleron, isle of France, 5 ms. from the coasts of Aunis and Saintonge. It is 12 ms. long, and 5 broad; is populous and fertile, producing corn and wine, and is defended by a castle. It contains about 10 or 12,000 inhabitants, and on a headland is a light-house, and on its E. side stands a strong castle. In the reign of Richard I., this island was part of the possession of the Crown of England; and here that monarch compiled the code of maritime laws called the laws of Oleron, which are received by all nations in Europe as the ground of all their marine constitutions. Lon. 1 20 W., lat. 46 3 N.—Town of Fr., in the dep. of Lower Pyrenees, and late province of Bearn, on the Cave, 10 ms. SW. of Pau. Lon. 14' W., lat. 43 7 N.

Olesko, town of Poland, in Red Russia, 36 ms. ENE. of Lemburg. Lon. 25 10 E., lat. 50 23 N.

Oley, tp., Berks co., Pa., 8 ms. E. from Reading, and 12 NW. from Pottsgrove.

Olika, town of Poland, in Volhinia, with a citadel, 20 ms. E. of Lucko. Lon. 26 8 E., lat. 51 15 N.

Olanda, or *Pernambuco*, town of Brazil, and capital of Pernambuco, seated on the Atlantic, with a very good harbor.—See *Pernambuco*.

Olita, town of Spain, in Navarre, where their kings formerly resided. It is seated in a fertile country, 20 ms. N. of Tudela. Lon. 1 46 W., lat. 42 22 N.

Oliva, celebrated monastery of Western Prussia, 3 ms. W. of Dantzic. It contains several tombs of the dukes of Pomerania, and is remarkable for the peace concluded in 1660 between the

emperor of Germany, and the kings of Sweden and Poland.

Olivenza, strong town of Portugal, in Alentejo seated near the Guadiana, 13 ms. S. of Elvas, 40 E. of Evora. Lon. 7 4 W., lat. 38 30 N.

Olive, town, Morgan co., O.—Tp., Me. co., O.

Olive Green, tp., Morgan co., O. Pop. 18 300.

Olmedo, town of Spain, in Old Castile, sea on the Adaja, 30 ms. S. of Valladolid. Lon. 29 W., lat. 41 20 N.

Olmutz, commercial town of Moravia, on Morava, 80 ms. N. by E. of Vienna, and 97 of Breslaw. Lon. 17 35 E., lat. 49 26 N.

Olny, town of Eng., in Bucks, with a considerable manufacture of bone lace. It is seated on the Ouse, 12 ms. SE. of Northampton, and NNW. of London. Lon. 54' W., lat. 52 5 1

Olone, island, town, castle, and harbor of J. in the dep. of Vendee, and late province of Poitou 30 ms. NW. of Rochelle, and 258 SW. of Paris. Lon. 1 43 W. lat. 46 30 N.

Olonetz, government of Russia, included merely in the government of Novogorod. In district are some considerable iron works.

Olonetz, town of Russia, in a gov. of the same name, famous for its mines of iron, and its mineral water. It is situated on the river Olonza, which falls into the Lake Ladoga. Lon. 34 20 E., 61 26 N.

Olse, or *Oelse*, strong and considerable town of Silesia, 17 ms. NE. of Breslaw. Lon. 17 26 lat. 51 19 N.

Olsonitz, town of Upper Saxony, in the territory of Voigtland, seated on the Elster, 60 SW. of Dresden. Lon. 12 27 E., lat. 50 40

Olsen, town of Switzerland, capital of a bailliwick, in the canton of Soleure. It is dependent on the bishop of Basle, and is seated a little to the N. of the Aar, between Aarberg and Araw. Lon. 45 E., lat. 47 16 N.

OLYMPIADS, periods of four solar years which intervened between the games observed by the Greeks at Olympia, in the Peloponnesus.

According to the Greek historians they were originally instituted A. C., 1753, by the Idaei Dacæ. They were neglected and revived by turns several centuries; one of their most remarkable restitutions, however, being by Iphitus, son of Praxionides, 884 A. C. During the ensuing century, they again fell to neglect, but were finally restored by Coerebus, A. C. 776, and continued about twelve centuries to be the standard of chronology, amongst the most cultivated nations of the earth.

Olympus, town of ancient Greece, in the Peloponnesus, where were celebrated the famous games every 4th year.—See *Olympiads*.

Olympian Springs, post office and watering place, Bath co., Ky., 10 ms. SE. from Owingsville, and 50 E. from Lexington.

Olympus, mountain of Thrace one of the highest and most considerable in all southern Europe. The ancients supposed its top reached the heavens; and, from that circumstance, placed the residence of the gods there, and made it the court of Jupiter. There are several mountains of the same name.

- Ombrone*, river of Italy, which rises in the Apennines, and falls into the Mediterranean.
- Ombrone*, town of Italy, in the Siennese, between the river Ombrone and the Lake Castigliano, 12 m. S. of Grossetto.
- Omegna*, town of the duchy of Milan, in the Varese, with a castle, 5 ms. N. of Orta.
- Omer, St.*, fortified, large, and populous town of Fr., in the dep. of the straits of Calais, and in the province of Artois, on the Aa, on the side of all, 8 ms. NW. of Aire, and 135 N. of Paris. Lon. 2° 20' E., lat. 51° 45' N.
- Ommen*, town of the kingdom of Holland, in the Overysel, seated on the Vecht, 17 ms. N. of Deventer. Lon. 6° 10' E., lat. 52° 32' N.
- Ommenburgh*, strong town of Germany, in the territory of Mentz, seated on the Othern, 9 ms. S. of Marburg, and 45 NE. of Frankfort. Lon. 8° 3' E., lat. 50° 30' N.
- Ommirabih*, river of Africa, which rises in the Great Atlas, separates the kingdom of Morocco from that of Fez, and entering the Atlantic, forms a spacious bay on the E. side of Azamor.
- Omova*, seaport of Mexico, in Honduras, near the bottom of the Bay of Honduras. Lon. W. C. 87° 40' W., lat. 15° 53' N.
- Umrapoora*.—See *Ummerapoora*.
- Ormsk*, town and fortress of Russia, in the government of Tobolsk, situate at the conflux of the Orm with the Irtysh, 350 ms. SE. of Tobolsk. Lon. 74° 54' E., lat. 54° 14' N.
- Ornecote*, village of Eng., in Staffordshire, 8 m. N. by E. of Cheadle, noted for the rich coprolites in its vicinity.
- Orneehow*, one of the Sandwich islands, in the Pacific ocean, 5 leagues W. of Atooi. Its eastern part is high, and rises abruptly from the sea, but other parts consist of low ground, except a small bluff head on the SE. point. It produces a variety of yams, and of a sweet root called Tee. Lon. 161° W. lat. 21° 54' N.
- Ornegg*, town of Russia, in the government of Archangel, on the river Onega, near the White sea, 80 ms. SSW. of Archangel. Lon. 37° 24' E., lat. 63° 35' N.
- Onega*, lake of Russia, in the government of Archangel. The lake is 100 ms. long, and 40 broad, and has a communication with the Lake Lagoda, by the Svir river.—River in Russia, rising in the government of Olonetz, and flowing NNE. to the SW. extremity of the White sea.—River in Russia, at the mouth of the Onega.
- Orleglia*, principality of Italy, surrounded by the territory of Genoa, but subject to the king of Sardinia. It abounds in olive trees, fruits and wine.—Seaport of Italy, in a principality of the same name, on a small river, 30 ms. SE. of Genoa, and 50 W. by S. of Genoa. Lon. 7° 31' E., lat. 43° 58' N.
- Oneida*, co., N. Y., bounded by Lewis co. N., Hamilton E., Madison SW., and Oswego W.; area 40 ms., mean width 30, area 1,200 sq. ms. The soil is much diversified by hill and dale, soil generally productive. The local position of this county is very remarkable, as it occupies the summit between the waters of the Hudson and St. Lawrence basins. The Mohawk rises in its central sources of Black river flows from its NE. angle into Lake Erie at Sackett's harbor; its western sections are drained by Fish creek, Wood creek, and Oneida creek, flowing into Lake Oneida; and from its extensive southern limits flows the Unadilla branch of the Susquehanna. Chief town Utica, and Rome. Central lat. 43° 13' N., lon. W. C. 1° 34' E. Pop. 1840, 85,310.
- Oneida, Lake*, of N. Y., bounded by Oneida co., E. and NE., by Madison and Onondaga cos. S., and by Oswego co. N. and NW. It is about 20 ms. long from E. to W., with a mean width of 4. The name is continued in the outlet, which, by a very winding course of 16 ms. from the W. end of the lake, joins Seneca river to form the Oswego river. The Oneida lake receives from the NE. Fish creek, from the SE. Oneida creek, and the S. Chittenango creek.
- Oneida Tract*, town, Oneida co. N. Y., W. from Oneida creek, and S. from Oneida lake; 25 ms. W. from Utica.
- One Leg*, a ridiculous name of an eastern tp. of Tuscarawas co., O. Pop. in 1820, 823.
- Ongar*, or *Chipping Ongar*, town of Eng., in Essex, 12 ms. W. of Chelmsford, and 21 ENE. of London. Longitude 0° 16' E., latitude 51° 43' North.
- Ongole*, town of Hindoostan, in the Carnatic, seated on, and near the mouth of a river which falls into the Bay of Bengal, 829 ms. SW. of Calcutta. Lon. 80° 5' E., lat. 15° 30' N.
- Onion*, river, Vt., which rises in Caledonia co., and running nearly in a NW. course, flows into Lake Champlain, near Colchester.
- Onondaga*, lake and river of N. Y., from which the name of Onondaga co. is taken. The river flows W. from the lake, till it meets the Seneca, when its course turns N. to Oswego, where it enters Lake Ontario. It is boatable from its mouth to the head of the lake, except one fall, which causes a portage of 20 yards. Towards the headwaters of this river, salmon are caught in great quantities. It is near the centre of the co. of the same name, and is about 6 ms. by l. The great N. Y. Saline, is on its banks—See *Salina*.
- Onondaga*, co., N. Y., bounded by Madison E., Cortland S., Cayuga SW., Oswego N., and Oneida lake NE. It is about 30 ms. sq., with an area of 900 sq. ms. It includes Skeneateles, Owasco, and Salt lakes, and is watered by Seneca and Oswego rivers, and some of their confluent. The soil is generally fertile. Staples, grain, flour, salt, and gypsum. Chief town, Onondaga. Pop. 1840, 67,911. Lat. 43° N., and lon. W. C. 1° E. intersect in this co.
- Onondaga*, town and seat of justice, Onondaga co. N. Y., 50 ms. W. from Utica. The tp. contains the greatest salt work in the U. S. It abounds also in gypsum. Pop. in 1840, 5,658.—See *Salina*. Lat. 42° 57' lon., W. C. 0° 48' E.
- Onondaga Hollow*, village, Onondaga co., N. Y., 6 ms. S. from Salina.
- Onslow*, tp., Halifax co., Nova Scotia.
- Onslow*, co., N. C., bounded by the Atlantic ocean SE., New Hanover and Duplin cos. W., Jones N. and NE., and Carteret E. Length 35 ms., mean width 20, area 700 sq. ms. It is drained by New river, and is generally flat, with a sterile soil. Chief town, Swansborough. There

is a post office at the court-house. Pop. in 1820, 7,018. Pop. in 1840, 7,527.

Ontanagon, river of Mich., rising with the Ouisconsin with Black river branches of the Mississippi. It flows N., and falls into the Lake Superior, about 90 ms. SW. from Point Keeweenaw. A large mass of native copper has been found imbedded in a rock, near the bank of this stream; estimated recently, from actual inspection by Mr. Schoolcraft, at 2,200 pounds.

Ontario, Lake, one of that grand chain of lakes, which divide the U. S. from U. C. It is situated between lat. 43 15 and 44 N., and lon. 76 and 79 W. Its form is nearly elliptical; its greatest length is from SW. to NE., and its circumference is above 600 ms. Ontario is about 200 ms. from W. to E., with a mean width of 40; area 8,000 sq. ms. The ordinary depth about 450 feet. It abounds with fish of an excellent flavor, amongst which are the Oswego bass, weighing three or four pounds. Its banks in many places are steep, and the lands generally good. It communicates with Lake Erie by the river Niagara. It receives the waters of the Genessee river from the S., and of Oswego, at Fort Oswego, from the SE. by which it communicates, through Oneida lake, and Wood creek, with the Mohawk river. On the NE. this lake discharges itself into the river St. Lawrence. The islands are all at the eastern end, the chief of which are Wolfe, Amherst, Gage, and Howe islands.

Ontario, co. in U. C., consists of the following islands: Amherst island, Wolfe island, Gage island, and all the islands between the mouth of the Gananoqui, to the easternmost extremity of the late tp. of Marysburg, called Point Pleasant.

Ontario, co. of N. Y., bounded E. by Seneca co. and Seneca lake, SE. by Yates co., S. by Steuben, W. by Livingston and Monroe, and N. by Wayne. Length about 30 ms., mean width 18, and 560 in area. Canandaigua outlet and Flint creek drain the central parts of this county. Soil highly fertile. Chief towns, Canandaigua and Geneva. Central lat. 42 54, lon. W. C. 0 20 W. Pop. in 1840, 43,501.

Ontario, town, Wayne co., N. Y., near Lake Ontario, and 22 ms. N. from Canandaigua. Pop. in 1820, 2,233.

Ooch.—See *Ouch*.

Oodipoor, *Odeypoor*, or *Mewar*, the southern section of Rajepootana, occupies a part of the table land, drained to the NE. by different branches of the Chumbull, and to the SW. by those of the Mahy flowing into the Gulf of Cutch. It is well adapted to agriculture, being hilly and plentifully supplied by water; but, previous to 1818, when taken under the protection of the British, ravaged by war.

Oodipoor, capital of the Rajepootana, province of the same name, is, as laid down on Tanner's map of Indostan, situated near the extreme source of the Banass branch of the Chumbull river. N. lat. 29 30, lon. 74 0 E. The site of this city is in a valley surrounded by mountains, accessible only through a narrow defile. This city stands about 400 ms. SW. by W. from Agra, and 300 a little E. of N. from Surat.

Oodoanullah, town of Hindoostan proper, in Bengal, seated on the W. bank of the Ganges, at

the foot of a chain of hills. Here is an elegant bridge over the Ganges, built by the Sultan Suj Oodoanullah is 82 ms. N. by W. of Moorshead. Lon. 87 55 E., lat. 24 58 N.

Oonalaska, one of the islands of the North Archipelago of North America, visited by Captain Cook in his last voyage. It is the largest the Aleutian, or Fox Islands. Lon. 165 0 V lat. 53 5 N.

Oonemak, or *Uniak*, one of the Aleutian, or Islands, between Oonalaska and Alaska.

Oostenalah, river of Ga., which joins the Fwah, and forms the Coosa. The junction of the two streams, as laid down by Tanner, is at N. 34 13, and lon. W. C. 8 21 W., and, in a direct line, about 80 miles SE. by E. from Huntsville, Alabama. The country drained by the Oostenalah is claimed and possessed by the Cherokee Indians.

Ooralsh.—See *Uralsk*.

Oorooop and *Oshesheer*.—See *Kuriles*.

Oostborch, town and fort in Flanders, in the of Cadsand, 4 ms. NE. of Sluys. Lon. 3 29 lat. 51 22 N.

Oostenby, town of Sweden, in the Isle of land, 27 ms. S. of Bornholm.

Opelousas, co. of La., named in the earliest tables St. Landre, bounded by the Gulf of Mexico SW., Sabine river, or the province of Texas, the parishes of Natchitoches and Rapides N., parish of Avoyelles and Atchafalaya river NE., Attacapas SE. Length 110 ms., mean width area 7,700 sq. ms. All the southern, southern, and eastern part of Opelousas is one vast plain. The northwest and northern sections swell into hills of moderate size. In point of soil, it is divisible into three distinct regions. Towards the Gulf of Mexico it is marshy, but rising gradually into arable prairies, with a thin sterile soil. The character of country is followed, advancing N. by an immense pine forest, out of which flow numerous creeks, falling into the Sabine, the Calcasieu river, and the Nezpique rivers, or northern branch of Mermentau. The soil of the pine forest is also sterile. Advancing to the eastern part of the county, washed by the Peche, Boeuf, and Courtableau, a total change takes place; the soil is exuberantly productive, and in part excessively heavy timbered. The northern and eastern parts of Opelousas are covered by a dense forest, and residue open prairies. It is emphatically the southern section of Louisiana, and contains the largest numerous individual flocks of cattle in the United States. Farming is, however, extensively pursued in the eastern part of the county. Staples, corn, beef, tallow, hides, live stock, such as horses, mules, horned cattle, and some sheep. It is watered by the Sabine; Calcasieu, and Upper Teche, flowing into the Gulf of Mexico. A low, unhabitable, and annually overflowed tract, indeed, extends from the arable border of the Teche to the Atchafalaya.—See *Courtableau*, *Louisiana*, *Mississippi*, &c. For the ordinary municipal regulations of that part of Louisiana, it is designated the parish of St. Landré. Pop. in 1810, 10,085; and in 1840, 15,253. For central, see next article.

Opelousas, or *St. Landré*, village and seat of justice for the parish of Opelousas, or St. Landré,

situated on a branch of the Teche river, in theairie Belvue, by postroad 223 ms. NW. from N.leans, and 1,460 from W. C. Lat. 30 31 N.,lon. W. C. 15 6 W. The village is small, butthe situation highly pleasant and healthy. Theacent prairies are more rolling and diversifi-than the extensive plains to the S. and W.,wards the Gulf of Mexico and Sabine.—See *Cu-'s Landing*.

Oporto, or *Porto*, city and seaport of Portugal,Entre Douero e Minho, and a bishop's see. It is,nature, almost impregnable, and is noted for itsong wines, of which large quantities are export-to England, whence all red wines from SpainPortugal are called Port wines. The other chieforts are, oranges, lemons, &c., and linen cloth,Brazil. Its commerce greatly increased after thequake at Lisbon, in 1755; before that time,population was estimated at 20,000, and it isaid to be 60,000. It is seated on the side of aountain, near the river Douero, which forms ancellent harbor, 147 ms. N. by E. of Lisbon. Lon. 8 22 W., lat. 41 10 N.

Oppeln, town of Prussia, in Silesia, capital of aunicipality of the same name. It has a great tradeool, and stands on the Oder, 150 ms. SE. ofslau. Lon. 18 0 E., lat. 50 39 N.

Oppenheim, town of Germany, in the palatinatehe Rhine. The vicinity produces excellente. It is seated on the side of a hill, 12 ms SSE. entz.

Oppenheim, W. tp., Montgomery co. N. Y.,he N. side of the Mohawk. Pop. in 1810,3; in 1820, 3,045.

Oppido, town of Naples, in Calabria Ulteri-at the foot of the Appennines, 25 miles NE. ofio.—Town of Naples, in Basilicata, 5 ms. of Acerenza.

Oppurg, town of Upper Saxony, in Misnia, withtle, 4 ms. WSW. of Neustadt.

Orach, town of European Turkey, in Bosnia,he river Drino, 60 ms. SW. of Belgrade.

Oran, city and seaport of Africa, in the Alge-province of Mascara, with an excellent harbor,t opposite Carthagenia, in Spain. In 1732,paniards became masters of it, and have keptr since.

Oran, town, Onondaga co., N. Y.
