Headquarters, Fukuoka Military Government Team, APO 929, 25 July 1946

TO: General Headquarters, SCAP, APO 500, (Attn: Natural Resources Section), (Thru Channels).

1. In accordance with basic communication, a thorough and complete investigation has been conducted.

2. On 20 July 1946, a conference was held between Lt.Col. Paul G.McBride, Wing Engineer for the 51th Composite Wing; Mr.Suzuki, the Director of the Fukuoka Liaison Committee; and the undersigned. It was agreed at the time by all concerned that the occupants of Haruga Village will not be so thoroughly dispossessed of their land that they cannot subsist in the manner to which they are accustomed.

3. Approximately one-third of subject property has already been returned to them. In addition, there are two airfields in the vicinity of Haruga Village which are going to be or have already been returned to the Home Ministry. Tachiarai Airfield,(Grid coordinates, 1250 - 1165, Map of Central Japan , 1: 250,000, Sheet No. 45),is to be released in the near future as soon as authorization is obtained. Nishinoura Airfield, (Grid coordinates, 1150 - 1365, Map of Central Japan, 1: 250,000, Sheet No. 45), has already been released and is at present, being used for farm land.

4. The dispossession of subject land constitutes approximately 400 acres while the land the inhabitants of Haruga Village are getting in return, constitutes nearly 1629 acres. Although it may require them to move their homes nearer to the two airfields to necessitate shorter travel space to their fields, they are on the whole, quite satisfied with the land being returned to them. It should also be noted that only one house will be demolished in the process of preparing subject land for a suitable dependent housing site.

5. It is therefore recommended by the undersigned that no further action be taken to find a different site for dependents of the 51th Composite Wing.

SUBJECT: Requisition of Bank Buildings.

TO : Commanding General, Eighth Army, APO 343

1. It is desired that prior to requisition of bank premises by the occupation forces, cognizance be taken of the essential services rendered by such facilities to normal community life. Due to their built-in vaults and other architectural features, the obtaining of alternative buildings usually presents considerable difficulty.

2. It is therefore, desired that procedures be established to screen proposed requisitions of bank buildings to assure that no community or area is deprived of an essential minimum of banking facilities. If the requisitioning of bank buildings is considered unavoidable, sufficient time should be allowed the occupants to secure substitute quarters before occupancy of present quarters is terminated.
