Victrola XVI, $200
Mahogany or oak

The instrument by which the value of all musical instruments is measured

Victor
HIS MASTER'S VOICE

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

"The FIRST in the World"

Sonora

CLEAR AS A BELL

Do you wish to be "first" in your locality?

WHEN the jury of experts at San Francisco awards the highest Tone Quality Honor to the Sonora, our representatives and ourselves have the greatest endorsement to our statement that "The Sonora is the first in the world."

Not only this, but we help the Sonora dealer by giving him exclusive territory. His rewards are equal to the amount of energy put into the work. Many Sonora dealers today are the leaders in their respective communities as regards VOLUME of sales and NET PROFITS.

Price, $225.00

Style "Grand."

12" Turntable. Extra Heavy Double-spring Motor, playing half an hour, or ten 10" records, in one winding. Tone Modifier. Sapphire Needle. Diamond Needle. Automatic Starter and Stopper. Multi-playing Needle. Equipment for playing all makes of disc records in the world. Trimmings Gold-plated. Envelope Filing System, with capacity for holding 160 records.

The record library of the world can be played on the Sonora—any make of disc records, whether for diamond, sapphire or steel needle. Sonora motors are NOISELESS, playing 3 to 15 records with one winding. Furthermore, many Sonora machines are equipped with an AUTOMATIC STOP that works perfectly, as well as a Motor Meter and Spring control.

PLAYER-PHONOGRAPH DEVICES.

Patent Just Granted to Walter M. Davis for Electrical Means for Controlling Operation Synchronously of Player and Phonograph.

Walter M. Davis, the well known piano man, temporarily residing in Paris, France, was recently granted Patent No. 1,164,265, on a combined piano player and phonograph, and which relates particularly to devices for starting the player record in predetermined relation to the phonographic record.

This is a supplementary patent to those granted Mr. Davis on May 24, 1910, and January 2, 1912, respectively, in which means were set forth for producing a record of a vocal or other selection upon the disc or record receiving element of a phonograph, and for simultaneously producing a record of the piano accompaniment thereof upon the record sheet of a piano player. In these patents devices are shown for starting the records in predetermined relation and comprise a separable connection in the driving mechanism of the piano player, and electro-magnetic means for closing this connection, said means being controlled by a contact piece inserted in the phonographic record. When these contact pieces come into relation with the metallic needle or stylus of the phonograph a circuit is closed which operates through the magnet to connect the driving mechanism to the player.

It is the object of Mr. Davis' latest patent to provide electrical means for controlling the operation of the driving mechanism of the piano player which shall still be controlled by the phonographic record, but which shall not involve the addition of special electrical connections thereto.

Accordingly the invention contemplates the provision of electro-magnetic connections controlled by the vibration of the stylus of the phonograph for starting the player sheet.

ARRANGE FOR NEW TOLEDO FACTORY

Doehler Die Casting Co., of Brooklyn, Places Contracts for Plant to Be Ready May 1.

The Doehler Die Casting Co., of Brooklyn, N. Y., and Toledo, O., has placed contracts for its new Toledo factory buildings, to contain 70,000 square feet of floor space, consisting of foundry, machine shops and offices.

With these buildings, which are to be ready for occupancy May 1, completed, this company will be in a better position than ever to give its Western patrons the prompt and efficient service which they have heretofore received from its Brooklyn plant.

VICTROLA FOR THE NURSES.

Board of Health of Indianapolis Purchase $100 Instrument for Nurses of City Hospital.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., January 6.—The growing popularity of talking machines is indicated in a newspaper item in a local newspaper under the heading "Nurses to Have Music to Chase Away Gloom." Needless to say, the gloom chaser was to be a talking machine which the Indianapolis Board of Health has decided to buy for the City Hospital.

"The physicians agreed that the nurses should have something more interesting than the paintings on the walls of the hospital wards," the item says in telling why the board allotted $100 for the purchase of the machine.

NEW PHONOGRAPH PLANT FOR TROY.

(Special to The Talking Machine World.)

TROY, N. Y., December 31.—Mayor G. W. Lorimer and Charles Hicks have formed the Lorimer-Hicks Co., and are making arrangements for the erection of a large factory to be utilized in the manufacture of phonographs here. The company will turn out a new machine, the invention of Mr. Hicks.

VICTROLA TEACHES THE DEAF.

E. B. Knight, of the Stewart Talking Machine Co., Indianapolis, Finds Interesting New Use for That Instrument in School for Mutes.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., January 3.—The Victrola as an aid to teaching the deaf is the unique use of the talking machine as found by E. B. Knight, of the Stewart Talking Machine Co., jobber of the Victor line. Mr. Knight recently visited the Indiana

Loraine Rue, a Deaf Girl, in "Butterfly Dance" to Victrola Music.

School for the Deaf, located near Indianapolis, and there he witnessed deaf girls dancing in the gymnasium to the rhythm of the music of a Victrola playing in the center of the floor.

At one end of the gymnasium Mr. Knight saw a girl dancing with her head thrown back—dancing daintily to the rhythm of the music.

"The little girl can neither hear nor speak," an instructor informed Mr. Knight. The girl was doing the "Butterfly" dance and the Victrola was playing "Cecile."

The instructor explained to Mr. Knight that, while deaf, the girls could feel to a certain extent

Swedish Folk Dance by Girls in Indiana School for Deaf.

the beat or the vibration of the music, although, of course, they had to depend on counting for the accuracy of their time and steps.

Richard O. Johnson, president of the school, pointed out to Mr. Knight that Helen Keller gained articulate speech partly through the use of music, and Mr. Johnson hopes to be able to use the talking machine in some way to give his charges a chance for the same achievement, and it is his belief that the vibrations of the playing as felt by the mutes serve to quicken their sense of feeling.

WILL HANDLE THE SONORA LINE.

(Special to The Talking Machine World.)

CLEVELAND, O., December 20.—The furniture concern of C. L. Kaufmann, 3266 West Twenty-fifth street, has opened a music department and will handle exclusively the Sonora phonograph and the Tonk piano.

"LATERAL" OR "VERTICAL" CUT.

Public Should Be Educated to Use These Terms to Distinguish or Define the Two Styles of Records—Terms Used at Present Confusing.

Something ought to be done to educate the public at large to the difference in talking machine records. You are apt to hear of the "Smith-cut," of the "Brown-cut," of the "Sullivan-style" and other terms used to distinguish brands and to disturb the public as to the real character of records.

Analyzing the situation, there are only two styles of records, those in the "lateral-cut" class and those in the "hill-and-dale," or, as we prefer to call them, "vertical-cut," records. It would be for the benefit of the industry, as well as for the promulgation of knowledge, to refer to records as either "lateral" or "vertical," and cut out all the hocus-pocus designations which tend to confuse rather than to assist.

REAL TALKING DOLL THE LATEST.

William Rotter Invents Toy Containing Miniature Talking Machine.

William Rotter, of New York, has patented and is to place on the market a talking doll, the body of which, specially made, contains a phonograph 2½x3½x2 inches in size. A cylindrical record, made of celluloid, is used, and is 1½ inches in width. Such a record will contain forty-one words, the records, of course, being made by a child impersonator, so that the doll will have a "natural" voice. The spring, the train of gears and the governor of the miniature phonograph are all fitted inside the cylinder which holds the record, and by a unique arrangement a circular aluminum case protects the diaphragm, the reproducer moving across the face of the record on its own axis through a groove in the case, which arrangement makes possible the small size of the machine. The sound is emitted from a wire-screened opening in the chest, and the eyes and lips of the doll can be connected with the motor of the phonograph so that motions in keeping with the words can be effected.

PROPOSE PHONOGRAPH RECORD TAX.

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 6.—Among the new suggestions that will figure, it is said, in the calculations of the Ways and Means Committee of the House of Representatives, which body is intrusted with the task of devising additional resources of revenue for the United States Government, is the taxing of phonograph records. Of course, this is largely rumor, but should it be considered, owners of talking machines will make a stiff fight against taxing what has proven one of the most pleasing as well as cheapest forms of entertainment imaginable in the home.

THE WORLD MARKET PLACE.

Help and Situations Wanted Up to Four Lines to Be Printed Free in The World.

There are many firms which are desirous of obtaining the services of salesmen, and there are many salesmen who are desirous of securing good paying positions. The World, therefore, would be the medium to bring them together—the market place, so to speak.

We are going to print Help and Situations Wanted notices free of charge, up to four lines of agate measure. Beyond that matter will be charged for at the rate of twenty-five cents per line.

The advertisement will be inserted and keyed if desired, and all replies will be forwarded to the advertiser without additional cost. This is done purely as a service proposition, and salesmen and employers are invited to make use of this offer.

SURPRISES PLENTIFUL FOR TRADE IN SAN FRANCISCO.

Closing of Canal Results in Placing of New Orders and Arrival of Delayed Goods Causes Some Embarrassment—Holiday Season an Unusual One in Many Particulars—Fred A. Denison New Columbia Manager—Activity of Local Association—Other News.

(Special to The Talking Machine World.)

San Francisco, Cal., December 31,—The holiday talking machine business brought some surprises and, apparently, some disappointments, although all lines have made a substantial gain, as was to be expected, over the same period last year. The season was an unusual one in several ways, the situation being affected by the closing of the Panama Canal just as the heaviest holiday shipments were coming, making it necessary to place new orders, and later to receive some large delayed shipments. Then when the Christmas rush should have started everybody in San Francisco was going to the exposition, and it is believed that the amount of money spent there and in entertainment tended to cut down the volume of business. Moreover, there was more competition in the trade than in previous years. It is hard to tell how large a share of the business was taken by the newer makes of machines, but some of them had quite a large sale, and a good many dealers who stocked up heavily on several makes have more machines than usual to carry into the new year. In fact, the complaint of lack of stock which has always before been heard around Christmas was very little in evidence. A striking feature of the season has been the extremely heavy advertising campaigns carried on by several talking machine manufacturers.

Exposition and Advertising Boost Victor Sales.

Andrew G. McCarthy, of Sherman, Clay & Co., reports a very busy month in the talking machine department, with sales of Victor goods running well ahead of all former records, both for the month and the year as a whole, the business having been greatly stimulated both by the excellent work done at the exposition and by the publicity campaign that has been carried out since. While the season opened with a scarcity of stock, causing some delay in early deliveries, the goods delayed at Panama arrived in good time for the holidays.

Fred A. Denison New Columbia Manager.

The most important change to occur in the local trade in some time is the appointment of Fred A. Denison as Pacific Coast manager for the Columbia Graphophone Co., succeeding W. S. Gray, who had been in charge of this territory since shortly after the fire of 1906. The change took place early in December, with no previous announcement, and was a great surprise to the local trade. Mr. Denison made a short visit to the local office, after which he started on a general tour of the Coast, getting acquainted with the trade in southern California and the North Coast States. He has just returned, and is well pleased with the prospects for business expansion in most parts of his territory. The December business, he says, was the best ever, exceeding last year's by 50 per cent. Mr. Denison has been in charge of the Columbia business in Detroit, Mich., and has had experience in most parts of the East, but says he hopes to remain permanently in California. W. E. Henry, a talking machine man of wide experience, who has lately been residing in southern California, has taken the management of the San Francisco establishment, F. R. Anglemeier remaining as his assistant.

Local Association Broadens Policy.

The new association of San Francisco talking machine dealers had its last monthly meeting December 8, a large number being present from all over the city and near-by towns. The most important action was a decision to admit to membership all employes, as well as the department managers. The prevalent opinion was that such action, besides strengthening the association, would stimulate a livelier interest among the salesmen and keep them more closely in touch with general trade developments, besides tending to eliminate some of the more injurious methods of competition. Action was also taken with a view to stopping abuse of the privilege of taking records home on approval. An interesting meeting is expected in January.

Where Competition Enters.

Clark Wise reports a great season in the talking machine department, attributing his success largely to the advertising of many makes, with facilities to try them out side by side. He is especially enthusiastic over the sales of Edison Diamond Disc machines, which have been one of the great hits of the year and are gaining enormous popularity.

The Hauschildt Music Co. has also been demonstrating competing machines side by side, featuring the Victor, Pathé, Sonora, Edison and Columbia. This has been about the only house in this vicinity handling Pathé machines, and while they have not been on hand long enough for thorough exploitation they are receiving considerable attention.

A. R. Pommer Home from the East.

A. R. Pommer, manager of the Pacific Phonograph Co., agent for Thomas A. Edison, Inc., has just returned from a trip to New York and the Edison factories, where he found things booming. He says it has been rather hard to get enough of the high-priced machines to meet the growing demand. The company is starting work on improvements to its already large quarters on Geary street. Mr. Schwab, the company's Portland, Ore., representative, has been spending the holidays with his family at Provo, Utah.

Lively Demand for the Sonora.

The local office of the Sonora Phonograph Corp. reports a surprisingly good holiday trade, practically cleaning out everything that was in stock, though a fair lot of goods has arrived since. The Nicholls Piano Co. had planned to put in the Sonora line on moving to its new store in the Newman-Magnin Building, but the opening had to be postponed for lack of goods.

Charles Mauzy, in charge of the talking machine business of Byron Mauzy, has had great success this season with an enlarged and improved department, and is building up this branch of the business to a point never reached before.

A. E. Spencer, in charge of the talking machine department of Hale's department store, which was recently greatly improved, says the enlargement was fully justified by the holiday trade.

IMPORTANT COLUMBIA CATALOGS.

Semi-Annual Record Catalog and New Grafonola Book Just Issued—Numerous Text and Design Improvements to Be Found Therein.

The advertising department of the Columbia Graphophone Co. has just issued two new catalogs of vital import to the trade, which indicate the "quality" atmosphere which characterizes every division of the Columbia publicity achievements.

One of these new catalogs is the semi-annual record catalog, which includes all records issued to date. This book contains 416 pages, 384 white pages and thirty-two tinted pages, and is indexed and cross-indexed in such a way that every selection is listed from eight to ten times. Every conceivable division under which a selection may be considered as belonging has been given consideration, and the result is a book which permits of maximum convenience in handling. The tinted pages are devoted to the recordings of the symphony and operatic artists in the Columbia record library. The cover of the new Columbia catalog is vastly superior to former editions, the design being both striking and artistic. The typography is excellent, and the catalog as a whole is deserving of hearty commendation.

The other new catalog, which is also a model of typographical excellence, is devoted to illustrations and descriptions of the complete Grafonola line, accompanied by an interesting story of the development of these popular instruments. A striking feature of this new catalog is the elimination of all names and the substitution of numbers corresponding with the prices. The "Favorite" will be known as "Grafonola 50," the leader as "Grafonola 75," etc.

MAY THE

New Year Be A Happy and Prosperous One

Is the wish extended to our dealers whose favors have made the year just closed the largest by far in the history of our Company, and as evidence of our sincere appreciation we pledge ourselves to an endeavor to improve upon our service and to, through co-operation, make 1916 the best ever.

To our own trade we have proven the value of "Eastern Service." To those whom we have not had the privilege of serving we say: "Try Eastern Service," it is the kind that helps to build a successful and profitable Victor business.

NEW PROBLEMS FOR THE TALKING MACHINE RETAILERS.

Recent Developments in the Trade Require Close Study on the Part of the Dealer, Declares C. B. Noon, Manager of Music Department of Stix, Baer & Fuller Co., St. Louis.

(Special to The Talking Machine World.)

ST. LOUIS, MO., January 8.—"The talking machine business is to-day just beginning as a real business for the retailer," said Manager Noon, of the musical instrument department of the big Stix, Baer & Fuller department store. "I mean that just now the retail dealer must begin to use his business judgment and to watch the corners. Heretofore the business has been largely mapped out for the retailer. He could not go far wrong with the merchandise offered him to retail. Competition was fair, the business has been in good hands, and unethical or unfair dealers did not last long. There has been a good profit in it for the men with energy to get out and hustle.

"Now things look differently to me. There is hardly a day passes but that I am not called on to look at or consult about some new machine. I have examined every machine that has come to my attention, and on these machines are based my forecast as to the future. I believe that to-day the talking machine business stands exactly where the piano business did a few years ago when the avalanche of stencil and cheap instruments was thrown on it. I fear that the talking machine business has before it some of the unpleasant experiences that we of the piano trade can remember. I hope not, however, but that hope is not as strong as the fear.

"I am not passing judgment on any particular machine, but samples have been brought here for my consideration that reminded me, by the sounds that came forth, of fifteen years ago when we marveled that the human voice or the sound of a musical instrument could be reproduced, and someone sitting a few feet away would exclaim: 'Why, that's America!' Some of these machines have had pasteboard sound boxes. Some were tacked together and the lids would not fit. Some have been of very handsome cabinet work and the crudest possible mechanical apparatus. In fact, I have seen many sorts of machines that mean ill for the talking machine business when they are put on the market by some house that looks to first sale profits only. I have seen others that were in every way creditable. There lies the big question. Will the many dealers who know nothing of the talking machine business but who will now be urged to enter this trade be discriminating buyers? Will quality and ethics rule with them, and will it rule with all of the dealers now handling talking machines?

"The more you think of this question the more serious it becomes. I have mapped out my platform. I will stand fairly for quality for all of the talking machines I sell. That is to be the test. I do not mean to say that I would attempt to sell all of the talking machines that I can find that have quality any more than, if the possibility was presented, I would attempt to sell all pianos of quality from these salesrooms. Far from it; but what I mean is that the talking machine that is sold through my department must have quality, for I believe that is vital to a talking machine department and that quality machines will make for the record business, and that the person who sells a machine that is certain to prove unsatisfactory will destroy the confidence of his customers to the extent that he cannot sell them records.

"I hope that I am mistaken and that we will not have to fight out the old question of cut-throat competition as we have in the piano game, but I fear so. I have seen some machines that I would not under any circumstances attempt to sell from here. Also, I have seen some that look good at first hearing and glance, but why be in a hurry to put in something that you want to keep a long time. Every talking machine retailer should remember that the future of one of the greatest businesses in the land is in the hands of himself and his associates or competitors, as he cares to regard them. The responsibility is great, and if the dealers stand firm it will make for the future of ourselves, our salesmen and our industry."

VICTOR DEALERS

LANDAY SERVICE — Victor — His Master's Voice — THE SEAL OF QUALITY — COPYRIGHT

Who desire the support of a Victor Distributor who thoroughly understands and appreciates their problems will do well to let us serve them in 1916.

The House of Landay invites you to submit your problems:

Are you carrying sufficient stock?
Do you need financial assistance to develop your instalment business?
Do you advertise enough?

The above are only a few of the questions our experts will help you solve, and this is only a small part of the service which costs you absolutely nothing.

NEW YORK N. Y.

GREAT TRADE AT PATHEPHONE SHOP.

Holiday Demand So Enormous that the Large Stock Carried Was Cleaned Out Repeatedly.

The Pathephone Shop, 487 Fifth avenue, New York, which handles the products of the Pathé Frères Phonograph Co., New York, exclusively, looked on December 27 as though a cyclone had visited it the previous week. The warerooms were absolutely bare of machines, there being only two $200 Pathephones and three $100 Pathephones in the entire store. Manager McCormick stated that the Christmas machine and record business had been phenomenal, the store being filled with machines five times from Thursday morning to Friday noon and being practically cleaned out of Pathé discs early Friday afternoon. This record indicates the tremendous strides which the Pathé products are making in the local talking machine field.

A NEW EDISON BOOK.

Probably no American in recent years has furnished so much copy for the newspapers as Thomas A. Edison, and now the Macmillan Co., 64 Fifth avenue, New York, has just published a book in what is termed the "True Stories of Great Americans" series, which will be of interest to readers of the World. This is Francis Rolt Wheeler's "Thomas A. Edison."

A personality such as that of Edison is always fascinating, and the author has told in an interesting way the story of Edison's life, including, of course, his accomplishments in varied fields. The human interest in this Edison story is well maintained. It is illustrated, cloth bound, and is sold for fifty cents per copy.

Victor goods are handled exclusively in the talking machine department added to the Powers Furniture Co., of Portland, Ore.

The Victor Talking Machine Company announces an important discovery

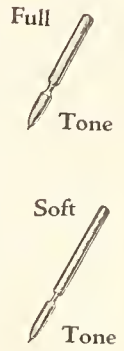
The Victor Tungs-tone Stylus

An improved, semi-permanent, changeable, reproducing stylus of tungsten combining all the desirable features of the Victor system of changeable needles with the added advantage of playing 50 to 200 records without changing.

After searching the earth for better stylus material, a Victor expert discovered the miraculous reproducing and wearing qualities of tungsten. The Tungs-tone Stylus will play from fifty to two hundred records or even more. The life of the Tungs-tone Stylus depends on the character and volume of the records played.

YOU DON'T HAVE TO CHANGE THE TUNGS-TONE STYLUS until it wears out. When this takes place the stylus simply stops reproducing as a signal for a new one. There is no danger of spoiling the record, because, strange to say, tungsten is softer than the record, although its wearing quality is one to two hundred per cent. better than the hardest steel. We cannot explain why—it is one of nature's secrets —a phenomenon. We only know it is true and recommend the Tungs-tone Stylus to all Victor users.

NO NEEDLES TO CHANGE is the chief nostrum of manufacturers of machines operated with a permanent jewel point, but the Victor Company knows what others will learn in time, namely: that no permanent point can be made to last forever on hard disc records. The jewel stylus was a success on the old wax cylinder records, but jewels do wear rough in time, and, if not instantly detected and changed, will quickly spoil a valuable collection of records—a most insidious danger; hence the Victor Steel Needle, to be used but once, was the only practical needle for the new gramophone type of hard record until the discovery of the miraculous properties of tungsten for reproducing styli.



TUNGS-TONE is a trade-name and was coined for the occasion. The new Tungs-tone Stylus is made in SOFT TONE AS WELL AS IN FULL TONE and can be changed instantly, just the same as a steel needle. The virtue of the Tungs-tone Stylus lies in a small cylinder of tungsten projecting from the end of a steel holder in which it is rigidly set.

The tiny cylinders of tungsten reproduce Victor Records better than any other known material. Smooth, strong and full as to tone. The Victor Tungs-tone Stylus fits all Victor sound boxes.

Made in Full Tone and Soft Tone
Boxes of ten, 25c
Packages of four, 10c

Manufactured exclusively by Victor Talking Machine Company, Camden, N. J.

Important warning. Victor Records can be safely and satisfactorily played only with *Victor Needles or Tungs-tone Stylus* on Victors or Victrolas. Victor Records cannot be safely played on machines with jeweled or other reproducing points.

NEW YORK, JANUARY 15, 1916.

ANNOUNCEMENT

The business of The Talking Machine World will be continued by the Estate of Edward Lyman Bill, with the co-operation of the efficient staff which for so long has had charge of the paper, both at the New York headquarters and the various branch offices. James Raymond Bill, the eldest son of the late Colonel Bill, will be actively connected with the business.

NINETEEN SIXTEEN bids fair to be a good year from a business viewpoint, and it will be a high-price year as well, for it seems that everything is soaring skyward, so that all previous price records will be annihilated.

Americans may as well make up their minds that they will have to pay more for everything during the new year.

A good many manufacturing houses in various lines have withdrawn all quotations on supplies on account of the unsettled condition of the markets. But, on the other hand, there is going to be a business activity practically unprecedented in American industrial history. New records of accomplishment will be made in many industries.

It is believed, too, that the present active business conditions are not merely the result of a temporary trade feverishness, due to unusual demands made upon America by the people in the war-torn lands of Europe, but it is argued that America is entering upon an era of prosperity which will last for a long period of years, and that at the close of the war we will not slump immediately into business stagnancy.

The business situation, as the man at The World mast-head views it, is full of opportunity, and the spirit of optimism which is now abroad in the land must be stanchly upheld.

One of the greatest possible helps for the business situation to-day is to encourage prosperity by speaking at all times optimistically of the country's future. In that way wavering confidence is reinforced. And thus strengthened with a vast army of American optimists, who confidently face the future, business will move on all the while to higher points.

IT has been customary for years to use as our barometer the agricultural and mineral productions of the land, but these have been materially reinforced. The banks throughout the country contain more money than ever before.

Prices are better, and the railroads are now placing large orders for betterments, so with a tremendous balance of trade with foreign countries in our favor, which is bringing us almost unlimited wealth, it would seem as if 1916 should be a pretty good year from every viewpoint.

Money, crops, great industries prosperous, railroads busy and a big export trade, are pleasing facts which face American business men at the beginning of the present year, and the deeper those thoughts sink into the mind of every business man the better it will be.

We do not need hold-backers in business. They are only sand in the bearings, and, with a good, healthy, optimistic class of business men to aid, in all probability 1916 will be a record-breaker in every respect, for prosperity is actually here, with no crimp in it, with no one to throw a wrench in the business machinery as it moves resistlessly on.

Surely a perusal of the reports of the great business corporations, reports of banks and of stock quotations should make every talking machine man in this country glad that he is doing business, and should aid him to go ahead and build up his trade to larger proportions.

Every avenue of trade to-day is feeling the inspiring touch of the times, and talking machine men should make the most of the great possibilities which are round about them.

PREPAREDNESS is a word that is perhaps used more now in the general discussions of the country than ever before, and it is assumed that the word will not be relegated to an inactive vocabulary for some time to come.

In business we must be prepared at all times to make the most of the conditions which are round about us. We must be prepared to adjust our plans to fit the exigencies of the times. All of us must be prepared to hold what we have and make a strenuous effort for new advance.

Preparedness really is only foresightedness, and the business man who plans carefully for the new year is always working on the safe side.

At this season there are always readjustments and new policies adopted in the business world.

It would seem as if 1916 would be a year which, so far as America is concerned, will show a continued increase in business.

The latter days of 1915 were days filled with cheer, because the demand for products in the industry which The Talking Machine World covers was unprecedented. It was rush orders everywhere. Manufacturers, jobbers and dealers were reaping big returns during the holiday season, for it must be admitted that the talking machine has become one of the most favored of all Christmas gifts.

The quickened demand during the holiday season shows the result of steady publicity, and the slogan of a talking machine in the home at Christmas has meant nothing more than to arouse public sentiment in favor of the talking machine.

The year which closed was particularly good in many essentials, and for the talking machine trade it was a year of practically unbroken success. All lines looked up toward the close, and while for a time during the early part of the old year the cry of business depression was frequently heard, due perhaps to a multiplicity of reasons, this period has passed, and all sections of the country report prospects for the immediate future as very encouraging.

The training of the American business man is such that he is not easily discouraged by an apparent slowness in trade. He is usually optimistic and always confidently faces the future.

Nineteen sixteen will eclipse any previous year in the history of the talking machine business, because there are new forces constantly coming into the trade which will mean a larger output, as it is a known fact that the great manufacturing houses, notwithstanding their enormous physical properties, were unable to fill the avalanche of orders which came in upon them.

The talking machine trade has shown that it is a live one in every respect, and it is certain that 1916 will show enormous advances.

SO far as The Talking Machine World is concerned, we cannot refrain from expressing our appreciation to our good friends who have made the success of this publication possible.

Letters and telegrams of sympathy have been received at this office from all parts of the country, expressing the sincerest regret at the death of Colonel Edward Lyman Bill, for which, in behalf of his family and the staff of The Talking Machine World, we beg to express our deep appreciation.

We have thousands of readers in this and other countries, and to all of them we desire to express sentiments of appreciation for their approval of our humble efforts. We have endeavored to give the best that is in us to the industry, and to be a constructive force in its development.

Some of our friends are kind enough to say that we have succeeded. Certainly we have been successful in building a trade publication which not only is widely read, but which dealers rely upon for the accuracy of its reports.

Nineteen-fifteen was by far the best year which this publication has ever enjoyed since it was established in January, 1905. For a while it was uphill work to develop a sufficiently strong clientele to support a paper such as this, which necessarily must involve a great outlay to produce, but steadily, as the industry has expanded, our patronage has expanded, and last year was a banner year with us, as with others.

It shall be our constant endeavor to be of ever increasing service to all with whom we come in contact.

New Year's greetings to our many friends, and may their business show a steady increase during 1916!

THE latest reports from Washington would seem to indicate that the Stevens Bill may be enacted into law before the close of the present session of Congress.

There is, however, strong opposition among department store heads, who are ably represented at the capital, and talking machine men should see to it that they put their views in a forceful manner before their Representatives in Congress. Let them know exactly that the talking machine merchants of this country believe in price maintenance which carries with it not only protection to the manufacturers who create a standardized article, but for the public as well.

It is rather significant to note that practically all of the opposition to the Stevens Price Maintenance Bill comes from department store heads, who allege that it places a monopoly in the hands of the manufacturer to the disadvantage of the retailer, and, of course, compels the public to pay the maximum price fixed by the producer.

Some of the arguments are brought out in an interesting manner, but they forget one essential, and that is that the manufacturer of a standardized product is not only benefiting his entire trade by price maintenance, but the public as well, and the public receives a protection through a standardized product, the manufacture of which is conducted on the highest scale, which it cannot secure in bargain counter purchases.

The department stores, which naturally endeavor at all times to feature bargain counter offerings, do not select unknown products. They, themselves, wish to profit by the values and the demand created through standardized articles, and they wish to slaughter another man's assets to draw people to their stores, and then they prate about this bill being contrary to the interests of the public, and constituting an unfair monopoly.

Stuff and nonsense!

One point that interests department store men is to secure standardized articles which they can offer at cut rates with the idea of drawing people to their store, and with the hope, of course, that they will make other purchases on which there is a larger percentage of profit than in the cut-rate articles.

Then, again, they wish to cultivate the belief on the part of the public that if they can offer standardized articles at cut rates they can do it on all, hence leaving the impression that their establishment stands for low rates.

And the department store advocates have the nerve to stand up and say that this bill is contrary to the interests of the jobber and retailer—that distributers who have fixed expenses in their business are alone competent to decide what prices should be placed on articles which they offer for sale.

The arguments which they make are illogical, and it is difficult to imagine how thinking men could be deluded in the slightest by them. When they prate about the public they mean nothing more nor less than self, and if it were self alone that was interested there would be some reason for their line of argument, but by the slaughtering of prices on standardized and trade-marked articles they would wilfully destroy the property which other men have spent years of time and millions of dollars in creating.

Is the Government under which we live not obligated to protect the property rights of its citizens?

Get busy, talking machine men, and do your part to protect your own interests. Do not expect that others will do all the work for you.

Do your part and do it now.

IN order that his legion of friends throughout the country may have some memento of the late Col. Edward Lyman Bill, we are presenting in this issue of The Talking Machine World his latest and favorite portrait, printed on heavy calendered paper, and so prepared that those who wish to do so may preserve the same by framing or mounting. May it serve as a constant reminder of that kindly soul who

". . . turned his clouds about,
And wore their silver lining inside out."

RAPIDITY of Pearsall Victor Service is unusual. There was a time when orders received in the morning went out at night. Now, orders are received, time-checked and usually go out within a few minutes.

This makes a big difference for frequently it saves a FULL day's time.

Dealers who used Pearsall Service during the past rush of a few weeks realize better just what this means, but we will PROVE it to YOU NOW if you will send a test order.

SILAS E. PEARSALL CO.

16 West 46th Street, near Fifth Ave. New York, N. Y.

Death of Col. Edward Lyman Bill

It is with the deepest sorrow that we announce the death of Edward Lyman Bill, editor and publisher of The Talking Machine World and The Music Trade Review, which occurred suddenly at his home, 21 Broadview avenue, New Rochelle, N. Y., on January 1. On Friday night he extended his usually cheery "good night" supplemented by felicitations on the near arrival of the New Year to the members of The World staff, being apparently in the best of health and spirits. On Saturday, New Year's Day, after dinner, he visited the Wykagyl Country Club, returning home at 4.30 p. m. He went to the music room on the second floor, where he was talking with Mrs. Bill over plans for a short vacation some time this month, when he suddenly became ill. A trained nurse was called from a residence opposite, and Dr. Albert H. Moore and a physician from the New Rochelle Hospital arrived quickly, but Col. Bill was beyond their aid. He had been attacked by a cerebral hemorrhage.

Col. Bill was born in Lyme, Conn., June 5, 1862, and was the son of Judge John Wight Bill and Prudence Gallup. He was a blood descendant of William Bill, first Dean of Westminster Abbey and Provost of Eton, and was also descended from Elder Brewster, who came over in the Mayflower in 1620. He was the eighth direct descendant of John Bill, who came to America in 1630. He was educated at the State Normal School of Connecticut and Wesleyan University. After leaving college, he spent several years in teaching and in elocutionary work. Then going West, he became an officer in the first military organization in Dakota Territory, and saw active service on the plains. Later he was elected a police justice and entered business life at Fargo, N. D. During this time he corresponded regularly with several Eastern newspapers. This gave him the newspaper experience that began to shape his career toward journalism. Mercantile business soon became distasteful to him and, returning East, he purchased a part interest in The Music Trade Review, which had been established in 1879 as a semi-monthly. In 1891 he became the sole proprietor of this publication and changed it to a weekly, and from that time its growth and influence have been materially augmented.

In 1905 he established The Talking Machine World, which is the only trade paper in America devoted exclusively to this industry—a publication which has steadily grown in influence and prestige throughout the world. He was an honorary member of the National Talking Machine Jobbers' Association, and actively interested in this organization's welfare. At the last convention held in San Francisco, he was the Association's guest of honor at the Panama-Pacific Exposition festivities.

For some time he was president of the New York Press Club. He was also, at one time, president of the Republican Club of New Rochelle. For many years he had been a member of the New Rochelle Yacht Club, and was at one time vice-president of the Rochelle Park Association. He held membership in the Huguenot Association of New Rochelle, Society of Mayflower Descendants, Sons of the Revolution, the Reform and Wykagyl clubs, the Luther Burbank Society and the Tolland Fish and Game Association. He was a member of every Masonic body in both the York and Scottish rite work, holding membership in the Blue Lodge, Chapter and the Consistory. He was also a member of Bethlehem Commandery, Knights Templar, and was a Shriner, belonging to Mecca Temple.

Col. Bill was very popular with the people of New Rochelle, and time and time again refused to be a candidate for mayor of that city. He was, however, a member of the local Board of Education, a former police commissioner and actively interested in the Fire Department. He was also treasurer of the New York State Commission for the St. Louis Exposition in 1904, being the only representative of a trade paper on that board.

He was appointed as a colonel by President William McKinley on his military staff, and was a personal aide to the President in the McKinley and Roosevelt inaugural parade.

On February 12, 1889, he was married to Caroline Lee, daughter of Senator James L. Raymond, at Lyme, Conn. Mrs. Bill, with her two sons, James Raymond, a senior at Wisconsin University, and Edward Lyman, Jr., and her daughter, Hester, survive him. He also leaves a brother, J. Nelson Bill, who resides in Lyme, Conn.

Col. Bill's home life was an ideal one. He spent most of his leisure time with his family, all of whom possess marked musical and literary inclinations.

* * * *

When a life work is done, when long years of toil have gone unrewarded and a man is patiently awaiting the hour when the scythe shall cut him down, thereby ending his labors and his struggles, it may be in a certain sense reasonable to reckon with death as with a power which steals away that which has been cruel and harsh. It may be possible to feel that Pity has taken a hand and that the Eternal Sleep in its kindness has called to rest one more creature upon whom the burdens of life rested too heavily. But when in the fulness of his life, in the glory of a work which was steadily in its ascendancy, in the possession of mental strength which was the pride of all who loved him and the admiration of all who knew him, Edward Lyman Bill was taken away, the bravest and the most trusting, in their bitter grief, can but question why.

His last words, as he left his office on the last day of the year, to those who had been closely related to him through his long and honorable business life, were spoken with all the genial affection and confidence that on the following Monday morning together they should again meet and pursue the regular tenor of their life. He spoke of the new year which would dawn upon the offices where he had spent such happy days and he had bright hopes for his work and for the work of those whom he had made his associates throughout his beautiful and valuable business career.

None dreamed that already the King of Shadows had selected one of the most brilliant of its vaunted "shining marks" and that never again the master would radiate his splendid intellect, his sympathy, his wisdom and his warmth upon those assembled in the great work of journalism which he had built up, and that he would be seen in his daily haunts no more, snatched as he was without one moment of warning, into another life.

There is some small degree of gratification in the realization that here was one who did not have to receive at his death honors which were denied the living, for no man ever received more glowing tributes to his brain and character, to his feeling for mankind and to his understanding of great subjects than Mr. Bill, who was honored by the greatest individuals and political parties as well as by the music trades and allied industries in which he was for many years one of the most potent factors.

Col. Bill plied his oars steadily through a sea of com-

DEATH OF COL. EDWARD LYMAN BILL.—(*Continued from page* 10.)

mercial journalism, and there was never a voice that did not refer to him as the soul of honor and integrity. He was a great, towering, and unfailing proof that trade journalism, frankly commercial in its nature, could be conducted along lines that were as clean and free from taint as the pulpit. This doctrine he preached through the columns of his papers, he disseminated it through those whom he took into his employ and he proved it daily to those with whom he was engaged in business relations. So completely was he recognized as an unflinching example of purity in business that his name was rarely mentioned where someone did not make the comment that there was no "whiter" man in business. And perhaps this defines it more clearly and subtly than any other expression that might be applied, as his was a white, pure, lovable life, every phase of which was reflected in the career which he had carved out for himself, and every sheet of white paper upon which he wrote his ideas and ideals, his sentiments toward the industries to which he had devoted himself, was enhanced and ennobled by receiving what came from his pen, his brain and his heart.

The optimism of his nature has shone forth resplendently week after week in the editorial columns of The Music Trade Review. His confidence in man and in his work was supreme, and his belief that a man is as he thinks and is a creature of suggestion was never shaken. For this reason he felt a sense of responsibility to his brethren and he lent his best efforts to letting in the bright spots through the clouds when the piano trade was weathering the hardest storms. His encouragement, his intelligent guide-posts, his determined efforts to keep the wearying captains steadfast in hope have been masterpieces in the annals of trade journalism in the entire world, and far beyond the commercial worth of his efforts and achievements was his influence upon the spirits of those who read him and thus came to depend upon him for their strength and support in the hour of sorest need.

As is well known, Col. Bill had learned through military service what devolved upon the man at the head, and his military life well fitted him for the particular line of journalism in which he embarked. It was his knowledge of the financial and political conditions of the world, his wide knowledge of the conditions of this country, which gave him the authority and the faith in the ultimate success of every American enterprise, and with the courage of this conviction supplemented by his knowledge of how to handle forces and how to direct them he wrote himself into one of the largest industrial organizations of the world. Nor was his an acquaintance based upon supposition or imagination. He knew personally the dealers from every part of the country, he was in personal touch with every allied enterprise of Europe, added to which he had a retentive memory which never failed him and the sort of logic which made him understand.

Col. Bill was regarded by many as "easy-going," due to the great suavity of manner, the extraordinary self-control which he ever exercised, but those who knew him more closely, those to whom he showed himself without reserve knew the warmth of his temperament, the enthusiam with which he faced every contingency that arose in his daily life, and the great beauty of spirit which he brought into his very happy family life. They also knew the wrath and indignation which swept him at the sight of things which he regarded as unjust, unkindly and unethical, but he was a strong advocate of living his own life and of never interfering unless asked to do so. He never projected his ideas of private matters through the columns of his papers and never in any way allowed them used for personal reasons. He was a powerful ally and an opponent who aroused respect even as he conquered.

While few men ever devoted themselves with greater concentration to their business lives, Col. Bill always found time for wide interest in other things. He was an authority on many matters pertaining to the world of literature, he interested himself greatly in the civic welfare of New Rochelle, where he lived, and in that city he was held as a man of importance and influence. He had the unusual faculty of possessing a wide understanding of and sympathy for man and mankind, and it always seemed that wherever he carried his personal touch, he carried weight and conviction.

His advice was sought and respected by men in every run of life, and he gave of himself willingly, gladly and without show or egotism, always recognizing himself as the part of a greater thing, never seeking either reward, credit or recompense outside of the ultimate success of the thing in which he had interested himself.

In his own circle he built powerfully and his organization will long reflect the man and his mind, the aims and his methods, and so long as the present generation shall last, whether in the piano or in the talking machine industry, the name of Edward Lyman Bill will be a watchword, an example to be emulated and a memory to be revered. All who knew him will know that every avenue into which his forces have been directed were the better for his having lived.

The influence of Mr. Bill on trade journalism was uplifting in the truest sense of the word. In the early days of the industry when "hold-up" journalism was somewhat in vogue he fought it tooth and nail, believing that the industry would best thrive along the lines of trade honor and trade honesty. Later he fought just as earnestly and successfully the so-called coupon-picture contest advertising, exposing its baneful influence on the industry and showing how it lowered the ethical standards of the trade.

Col. Bill believed in an organized music trade industry, and was the first to support the formation of and helped to organize the National Piano Manufacturers' and Merchants' Associations. He took an active part both personally and through The Review in this movement with the idea of bringing the members of the trade closer together, so that they could work to the common end of uplifting and cleansing the industry of many of the evils which then prevailed. In fact, up to the day of his death he was a steadfast upholder of the value of trade organizations.

Col. Bill was the first to emphasize the importance of technical instruction in the piano trade and ten years ago inaugurated a technical department in The Review, under a competent editor, which has been of the greatest assistance to piano tuners, dealers and superintendents—in fact, to all having to do with the constructive side of the industry. In this connection a large number of technical books were issued by Col. Bill which have had a wide circulation.

With the advent of the player-piano he recognized the important part which it was destined to play in trade history, and he inaugurated a special player section as a monthly feature of The Review, and published a number of technical works bearing on the construction of the various player mechanisms which still command trade favor. More recently he devoted considerable attention to the importance of a higher conception of salesmanship and advertising in all branches of the piano trade.

In fact, Col. Bill had ever been a man of practical ideas, who believed in the importance of constructive work

(*Continued on page* 12.)

DEATH OF COL. EDWARD LYMAN BILL.—(*Continued from page* 11).

in every department of the industry and that the functions of a trade paper were to educate, as well as to convey the news of every happening in the industry.

As James F. Bowers, of Lyon & Healy, so well says in his tribute elsewhere in this paper, Col. Bill possessed an almost prophetic vision along the lines of trade development, and this is shown by the fact that he was the first trade journalist to realize the growing importance of the talking machine industry.

When the talking machine business was in its infancy he started a department in The Review which he devoted to furthering the interests of the talking machine, and in which he predicted its future as a great factor in the musical world. So convinced was he of the future of the talking machine that in 1905 he launched The Talking Machine World, to which he gave a great deal of attention. Through its aid the industry expanded and grew to enormous proportions, and the talking machine progressed from a toy to a dignified instrument that has long been one of the recognized factors in the dissemination of musical knowledge and enlightenment throughout the country.

Manufacturers, jobbers and dealers were given through this publication a new conception of the greatness and possibilities of the industry, and the success of The Talking Machine World itself is evidence that Col. Bill worked along the right lines and laid a sound foundation for the future of his publication and for the industry as well.

He assisted largely in the formation of the National Talking Machine Jobbers' Association, and never missed a convention from the time of its organization. He was made an honorary member at its first convention, and journeyed to the Pacific Coast last year in order to be with the "boys"—for the feeling of affection that existed between Col. Bill and his friends in the talking machine trade was like unto that of a brother's. He worked shoulder to shoulder with the talking machine men to advance their interests in every possible way, and they in turn early recognized the importance of his advice and influence in the development of the industry.

Col. Bill was essentially of a judicial temperament and few men were more consulted by members of the industry on matters of great moment concerning their business difficulties which never seemed to faze him. He was a man of remarkably even temperament, who tossed off with apparent ease those routine annoyances that come up in everyday life and which worry and irritate so many.

He was a man of broad vision, whose opinions rose above the small selfish considerations that dominate so many in this work-a-day world. He disdained subterfuge and underhand methods and always believed in fighting in the open. His friends were countless because his character was so clean and his mentality so inspiring that he possessed a charm of personality which so impressed itself upon those with whom he came in contact, that once an acquaintance was made he was a friend for life.

By the members of the trade who knew him, as well as by his associates of The World, he was looked upon as a true friend and counselor, whose lovable qualities demanded an affection so close and so sacred that it can hardly be described in cold type. He had a big heart, a great love for his fellowmen. He was a Christian in the truest meaning of that word, for he believed in helping humanity along the road to higher achievements.

This philosophy of his has been exemplified frequently in his signed editorials which have long been a feature of The Review, the last one written by Col. Bill appearing in that publication of January 8.

In the field of fiction, Col. Bill wielded a facile pen, being the author of "The Last of the Danvers" and "The Sword of the Pyramids." Another volume which won considerable favor was "Hitting the Thought Trail," a collection of 100 of his best editorials on a diversity of subjects.

As a participant in political affairs in his home town, and at public dinners in the piano trade and elsewhere, Col. Bill had a rare facility in public speaking. His addresses were simple, yet forceful, never tiresome. The tone was lofty, the diction choice, the imagery rich and realistic.

Col. Bill's death leaves a vacancy in the hearts of his associates and co-workers which can never be filled. A "prince among men" and "one of God's noblemen" have been a few of the tributes which his fellowmen have paid him in the course of his successful career, but even these words of appreciation fall far short of properly honoring the memory of this beloved man.

From one end of the country to the other Mr. Bill had won the friendship of piano and talking machine men who recognized the sterling character which had shaped the destiny of a successful trade-paper institution, and which had never swerved from the paths of the Golden Rule as applied to business or personal relations.

Col. Bill's friends in the commercial, social and political worlds who have been so inexpressibly shocked by his sudden death have endeavored by divers means to express in a measure their sorrow and sympathy, but admit their inability to state in mere words just how deeply his passing has affected them individually.

Mr. Bill's splendid qualities not only influenced every department of his business, but were in addition reflected in the members of the staff. It was impossible to be in his presence and be associated with him in the conduct of his daily affairs without being imbued with the sense of honor, righteousness and good will towards all, which formed the basis of his principles. It was impossible to be in close touch with his business activities without realizing that unfairness and ill-feeling were totally foreign to his magnificent manhood. Always lined up on the side of justice and integrity, every man who has had the honor of being associated with Col. Bill in any capacity whatsoever feels that this association has made a better man of him—morally, spiritually and intellectually.

One of our famous poets must have had Col. Bill in mind when he wrote:

"It is not the tear at the moment shed,
When the cold turf has been laid o'er him,
That can tell how beloved was the soul that's fled,
Nor how deep in our hearts we deplore him.

"'Tis the tear through many a long day wept,
Through a life by his loss all shaded;
'Tis the sad remembrance fondly kept,
When all other griefs have faded."

* * * *

The ideals and policies that have made The Talking Machine World so influential and respected in this industry to-day, will be maintained by the capable staff organized by Col. Bill, and inspired by his achievements and aims the policy will be to make The Talking Machine World even a greater power for trade betterment and advancement in the future.

J. B. SPILLANE.

The funeral of Col. Bill

The funeral services of Col. Edward Lyman Bill were held at his late residence, 21 Broadview avenue, New Rochelle, N. Y., on Monday afternoon, January 3, and, despite the fact that two business holidays intervening had made it difficult to get in touch with many of his

DEATH OF COL. EDWARD LYMAN BILL.—(*Continued from page 12.*)

close friends, the reception rooms and halls of the house were crowded with friends, neighbors and business associates of the deceased. The body lay in a plain black casket surrounded and almost covered with masses of bright flowers, tributes from all sections of the country. He appeared to those who so loved and respected him as simply resting in peaceful sleep, to awaken again, instead of having passed to the Great Beyond.

The services were conducted by Dr. Robert Gardner McGregor, pastor of the North Avenue Presbyterian Church, who paid an eloquent tribute to the memory of the departed as a loving husband, a good father, a valuable citizen and an honorable and forceful business man, doing right, without fail, as it was given him to see the right.

In addition to the leading city officials of New Rochelle, those who attended the services included many prominent members of the music trade, who had been associated with Col. Bill for years, and who included, among others, W. J. Keeley, president of the Auto-Pneumatic Action Co.; William Tonk, of William Tonk & Bro.; Henry Behning and Albert Behning, of the Behning Piano Co.; Charles Pfriemer, George W. Gittins, president of Kohler & Campbell; J. A. Le Cato, president of the Standard Pneumatic Action Co.; W. S. Weser, of Weser Bros.; William E. Strauch, of Strauch Bros.; Mark P. Campbell, president of the Brambach Piano Co.; Ben H. Janssen, C. A. Longwell, the Aeolian Co.; Frank C. Decker, president of Decker & Son, Inc.; Charles Muhlenfels, of Wessell, Nickel & Gross; Charles E. Bruno, of C. Bruno & Son, Inc.; Mr. and Mrs. George H. Beverly, William J. Haussler, of M. Hohner; Henry Christman and John Christman, of the Christman Piano Co.; Francis Connor, Max De Rochemont, treasurer of the Laffargue Co.; W. E. Baldwin, of The Music Trade Indicator; D. L. Loomis, of the Music Trades; H. N. McMenimen, managing director of the Pathé Frères Phonograph Co.; J. Newcomb Blackman, president, and F. P. Oliver, vice-president, of the Blackman Talking Machine Co.; Julius Winter, Winter & Co.; L. D. Perry, Ludwig & Co.; E. B. Bogart, The Bogart Piano Co.; John W. Stevens, Mathushek & Sons' Piano Co.; R. C. Rogers, Krakauer Bros.; J. B. Spillane, managing editor of Col. Bill's publications, and the staffs of both The Talking Machine World and The Music Trade Review.

The pallbearers were Dr. Robert Condit Eddy, Henry M. Lester, William A. Trubee, Dr. Edwin H. Codding, Ernest Albert and Hugh M. Harmer.

The floral tributes, which filled to overflowing an open carriage, included elaborate pieces from the Masonic bodies, the New York Press Club, Huguenot Association of New Rochelle, New Rochelle Yacht Club, Republican Club of New Rochelle, Picnic Luncheon Club, Girls' Card Club, Omega Chapter, Delta Gamma Sorority, of the University of Wisconsin, of which Miss Hester Bill is a member; Alpha Iota Chapter, Chi Psi Fraternity, of the University of Wisconsin, J. Raymond Bill's Fraternity, New York Piano Manufacturers' Association, Louis F. Geissler, general manager of the Victor Talking Machine Co.; Talking Machine Men of New York, National Association of Talking Machine Jobbers, C. Bruno & Son, Inc., N. A. Secord, of John Wanamaker, New York; J. Newcomb Blackman; the Behning Piano Co.; the staff of The Review, and numerous other business and personal friends.

The interment was in Beechwoods Cemetery, New Rochelle, immediately after the services, being attended only by the family and immediate friends.

Expressions of Sympathy from the Trade

Letters and telegrams of sympathy on the death of Col. Bill have reached the office of The Talking Machine World in such numbers that it is impossible to print them all. The few reproduced herewith, however, express the general feeling of affection and esteem in which Col. Bill was held.

NEW YORK, January 7, 1916.

Mr. J. B. Spillane, Managing Editor, Talking Machine World, New York.

Dear Mr. Spillane:—I cannot describe the shock and sorrow caused me when I learned of Colonel Edward Lyman Bill's death last Sunday. I feel that I have suffered a personal loss, owing to our long acquaintance, which enabled me often to receive the benefit of his advice and experience.

I can recall, many years ago, the time when Mr. Bill launched the first issue of The Talking Machine World, and his conduct of that valuable medium has been so beneficial to the entire trade that his loss will be most keenly felt.

In him we recognized a man of extrordinary ability with a sterling character, so pronounced that it seemed impossible for him to do anything by word or action that would do other than impress everyone with a sense of respect and admiration.

I have talked with Mr. Bill on many subjects during our long acquaintance and have learned to look to him often for advice and inspiration, knowing that his business ethics were founded on the principles of honorable journalizing and merchandising, and his ideas in general those of the true, patriotic American.

I therefore feel that I can justly share the loss with his family and business associates, and extend to them, not only in my own behalf but that of the officers and employes of our company, our most heartfelt sympathy. The influence of Colonel Edward Lyman Bill will live and should prove an inspiration to his many friends, and I consider it an honor to have been numbered among them.

Very sincerely,
J. NEWCOMB BLACKMAN.

WASHINGTON, D. C., January 6, 1916.

The Talking Machine World, New York.

Dear Sirs:—It is with feelings of deepest sorrow that we write this letter to extend to you our heartfelt sympathy and condolence in the great loss which not only you but the entire trade of our country has sustained in the demise of our dear and highly esteemed friend, Mr. Bill.

The writer counted Mr. Bill among his dearest and best friends, and not only loved Mr. Bill for his wonderful qualities of heart, but admired him intensely for his great and broad qualities of mind as well.

Kindly convey our expressions of sympathy to the family, and believe us to be,

Sincerely yours,
E. F. DROOP & SONS CO.,
E. H. DROOP, Secretary.

PHILADELPHIA, PA., January 5, 1916.

The Talking Machine World, New York.

Gentlemen:—We have heard, with much regret, of the death of your editor and proprietor, Mr. Edward Lyman Bill, and in behalf of our firm and the attaches of our piano and Victrola departments we offer you our heartfelt sympathy. Yours very truly,

GIMBEL BROS.,
R. S. MCCARTHY.

NEW YORK, January 5, 1916.

Mr. J. B. Spillane, New York.

My Dear Mr. Spillane:—The news of our good friend, Col. Bill's, death came to the writer as a blow such as I have not experienced in a long while, and I sincerely sympathize with you in the loss of such a valuable friend and associate.

I know that of words of consolation at such a time probably the less said in your hour of bereavement would be the best. Assuring you that my sorrow is far greater than I can express, I am, Yours sincerely,

H. N. MCMENIMEN.

HOT SPRINGS, VA., January 3, 1916.

The Talking Machine World, New York.

I sympathize deeply with you all in the death of your chief and my friend.

LOUIS F. GEISSLER.

ORANGE, N. J., January 3, 1916.

Mr. J. B. Spillane, New York.

Dear Mr. Spillane:—I cannot tell you how shocked I was when I picked up the paper yesterday morning and read of the sudden death of Mr. Bill.

Please accept for yourself and your associates, and convey to Mr. Bill's family, my most sincere sympathy.

(*Continued on page 14.*)

DEATH OF COL. EDWARD LYMAN BILL.—(*Continued from page* 13).

In the death of Mr. Bill the talking machine industry has lost one of its loyal friends, and one to whom it is much indebted. Sincerely yours,

L. C. McCHESNEY.

ST. LOUIS, Mo., January 3, 1916.

The Talking Machine World, New York.

Gentlemen:—It is with deepest regret and heartfelt sympathy that I have learned of the death of that acknowledged defender of the talking machine industry and the music trades generally—Col. Edward Lyman Bill.

This association will feel deeply the loss of one who has at all times been a friend since its inception, and I wish to extend to you my condolences in behalf of the members of the National Association of Talking Machine Jobbers. Respectfully yours,

E. C. RAUTH, Secretary.

CLEVELAND, O., January 3, 1916.

The Talking Machine World, New York.

Gentlemen:—It is with deepest regret that I read in the morning paper of the death of your Mr. Edward Lyman Bill.

The writer has always had the highest regard and admiration for Mr. Bill, and it certainly was a pleasure to be in touch with him and know him as a friend. His work during the past year as editor of his publications commands the greatest respect and his principles always stood for the highest ideals and straightforward transactions of every nature in the musical industry of this country.

The same may be said of his interest shown in the National Association of Piano Merchants of America, and I extend to his associates my heartfelt sympathy in the loss of this noble character, Mr. Edward Lyman Bill.

With kindest personal regards to your fellow members in business, I remain,

Yours very truly,

HENRY DREHER.

President The B. Dreher's Sons Co.

NEW YORK, January 3, 1916.

The Talking Machine World, New York.

Gentlemen:—It was with the deepest regret that the members of the piano and Victrola departments of Gimbel Brothers' New York store learned of the death of the Hon. Edward Lyman Bill.

We all mourn the loss of so sterling a character, who always stood for everything that was fair and just, and extend our heartfelt sympathy.

GEO. M. MORGAN,	GEO. E. REDDING,
F. E. FITZGERALD,	EL. LAW. BARNES,
CHARLES H. SAMBALINO,	F. M. MARTELL,
H. K. MANCE,	JOHN KELLY,
D. W GORDON,	CHAS. F. FROMM,
CARL H. EICHNER,	J. G. RIORDAN,
RICHARD STROBEL,	J. HAMMERSLAGH,

NEW YORK, January 5, 1916.

Mr. G. Henderson, New York.

My Dear Mr. Henderson:—The death of Mr. Lyman Bill has just been brought to my notice, and I should kindly ask you to convey my condolences to the bereaved family, and also to your office staff.

It is indeed regrettable, and I believe I express the sentiments of the entire musical industry throughout the world, as it is well known that through his energy and good judgment both the piano and talking machine industries have benefited largely, and have succeeded to a great extent through his advice.

Well may I say that his loss will be mourned by the whole musical world. I sincerely hope that his good work will be kept up by your office and be as a monument to his memory and for the new generation.

Yours sincerely, J. A. KRAUS.

ALBANY, N. Y., January 5, 1916.

Mr. Glad Henderson, New York.

My Dear Mr. Henderson:—I have heard indirectly that Mr. Bill passed away. I have not had any authentic statement on this matter, but if such is the case I hope you will extend my sympathy to his family. This surely is a much greater loss to the industry than we realize to-day. Time alone will prove the worth of such a noble character.

Yours very truly,

JOHN L. GATELY.

PITTSBURGH, PA., January 6, 1916.

The Talking Machine World, New York.

Gentlemen:—We are greatly shocked to hear of the sudden death of Mr. Edward Lyman Bill, editor of The World, whom the writer looked upon as a very warm personal friend, and we would be very glad if you will convey to his family our deepest sympathy and respect, and if there is anything we can do we would be very glad to hear from you. Sincerely yours,

J. C. ROUSH,
Standard Talking Machine Co.

NEW YORK, January 4, 1916.

Mr. J. B. Spillane, New York.

Dear Mr. Spillane:—We wish to express our sympathy and sorrow at the death of Mr. Edward Lyman Bill. The writer has personally known Mr. Bill for a number of years and was terribly shocked to see his death announced in last evening's paper.

There was no one man in this country that ever did more for the talking machine industry than Mr. Bill; and everyone, whether small or large, received a square deal through the columns of his paper.

Again expressing our sorrow, and wishing you and his papers the success they deserve, we are, Very truly yours,

WONDER TALKING MACHINE CO., INC.
H. B. McNulty, President.

PATCHOGUE, N. Y., January 3, 1916.

The Talking Machine World, New York.

Gentlemen:—The news of the death of Col. Bill in yesterday's New York Times came as a great shock to the writer, and we hasten to extend to you our profound sympathy. The entire trade has certainly lost a worthy representative leader.

The writer's personal acquaintance with Mr. Bill was always pleasant. He was indeed one of the few men that the small dealer could grasp by the hand and have returned a warmth unfound in many people occupying a position as high as his.

Very truly yours,

JEROME W. ACKERLY.

MOBILE, ALA., January 3, 1916.

J. Newcomb Blackman, New York.

Telegram received. Am shocked to hear of the sudden death of Col. Bill. In his passing we suffer a distinct loss personally, as an association and as an industry. Please convey my heartfelt sympathy to the family.

W. H. REYNOLDS.

Tributes from Chicago

(Special to The Talking Machine World.)

CHICAGO, ILL., January 10.—Universal regret is expressed in the trade here because of the sudden death of Edward Lyman Bill. Even those who had not the privilege of intimate personal acquaintance expressed the deepest admiration for him as a constructive force in the talking machine industry, among which his remarkable personality was reflected in his writings. Here are a few of the tributes paid in talks to The World representatives:

James F. Bowers—"Music trade journalism has suffered a serious blow. One of the greatest lights has gone out. I have known him and Lyon & Healy have known him for a number of years, and we have always found him a cultured, high-class, dependable gentleman. I knew him intimately as a man as well as an editor.

"He was a man of most remarkable breadth of view and kindliness of nature, and in all the years I have known him I have never heard him speak disparagingly of anyone in the trade. In both piano and talking machine lines he exercised a wide and enduring influence. He possessed almost a prophetic vision along the line of trade development, and this is shown by the fact that he was the first trade journalist to realize the growing importance of the talking machine industry. He was largely instrumental in the formation of the National Talking Machine Jobbers' Association, and at its first convention in Buffalo was made an honorary member of the organization. He was present at all subsequent conventions, and his advice was always sought and valued. He was universally admired and respected by every man in the trade. Those who knew him intimately were ever impressed by the wide range of his knowledge. He was one of the most delightful conversationalists I have ever known. His life was gentle and the elements so mixed in him that nature might stand up and say to all the world, 'this is a Man.'"

C. E. Goodwin—"I was greatly shocked to hear of the death of my friend, Edward Lyman Bill, and am conscious of a deep and great personal loss. I have always regarded him as the ideal type of man to conduct a trade paper. He was fearless, fair and clear headed in all of his dealings with every branch of our trade. It is gratifying to know that his publications will be continued without change by an organization thoroughly imbued with his ideals and policies."

F. A. Siemon—"Mr. Bill was a wonderful man—a gentleman in the highest sense of the term and a journalist of most distinguished ability. I spent many delightful hours with him on the journey to the Talking Machine Jobbers' Association Convention in San Francisco last summer. He was a loyal friend to the entire talking machine trade, which will feel his loss most keenly."

L. C. Wiswell—"I cannot find words to express my sorrow at the death of Mr. Bill. Our entire trade esteemed him as an adviser, counselor and friend. We will miss greatly his genial presence at the meetings of the National Talking Machine Jobbers' Association, with which he had been so intimately associated from its inception."

R. J. Keith—"I esteemed it a great privilege to know Mr. Bill, and his loss to the trade cannot be estimated. The members of his family and the staff of his publications have my sincerest sympathy."

W. C. Fuhri—"I last saw Mr. Bill at the funeral of our late president, Mr. Easton, last summer, and was impressed anew with his fine character and tender heartedness of the man. He has exerted a wide influence for good in this trade, and his loss will be keenly felt."

The Superior Tone

of The Aeolian Company's
new phonograph, the

AEOLIAN-VOCALION

THE Advertisement on the two pages following appeared in the September issues of the leading national magazines as a part of the impressive campaign of publicity being conducted on the Aeolian-Vocalion. The campaign as a whole has attracted widespread attention. Thousands of inquiries have been received from all parts of the country, and many from such far-off points as China and the Philippines.

This particular advertisement deals in a suggestive way with the method by whieh the superior tone-quality of the Aeolian-Vocalion has been achieved. The complete story is told in The Aeolian-Vocalion Catalog, probably the most interesting and unusual pieee of eommercial literature ever published.

While the Aeolian-Vocalion has many features that distinguish it from other phonographs, its most important attribute is naturally its tone. Its superiority, in this respect, is immediately apparent to listeners. Curiosity is often expressed, however, as to how this distinctive tone has been attained, and the story of its scientific development has proved to be readily understood and interesting to everyone.

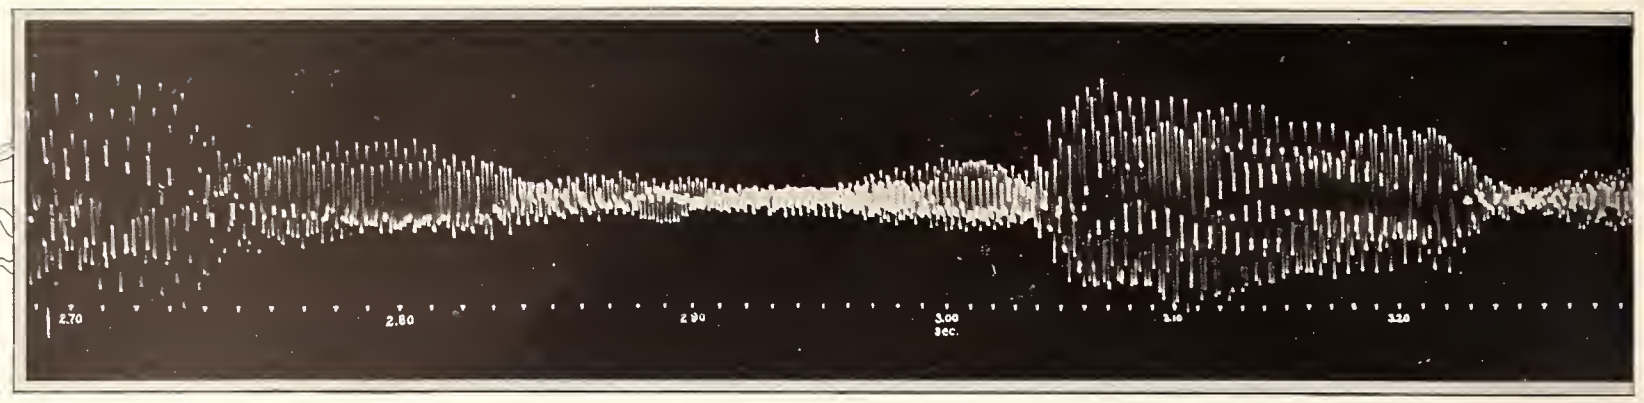
Every fact relating to the tonal development of the Aeolian-Vocalion, whieh is published, is aeeurate and based on the most advaneed scientific knowledge of the present day. The eonelusion that these facts indieate—that the Aeolian-Vocalion is unquestionably the leading phonograph upon the market—is amply supported by the evidence rapidly accumulating from authoritative musical sources, and by the extraordinary suecess this instrument has achieved in the year that it has been before the public.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Such territory is exclusive, thus insuring to the merchant the benefit of all the business he helps to create.

Address the Aeolian-Vocalion Department

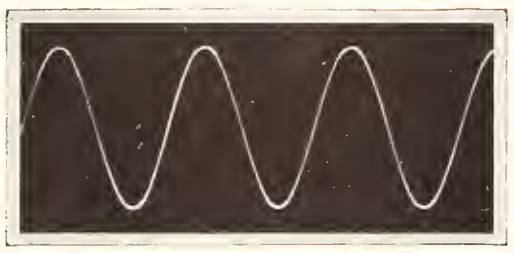
THE AEOLIAN COMPANY
AEOLIAN HALL NEW YORK CITY

CHICAGO OFFICE: FINE ARTS BUILDING, MICHIGAN AVENUE
A complete display of all models of the Aeolian-Vocalion may be seen at this office

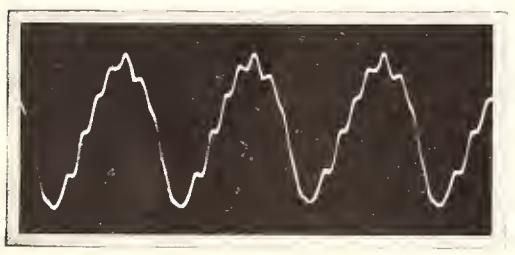


Here is reproduced an actual photograph of the tone waves created by an orchestral rendering of Tschaikowski's "Marche Slave." The duration of the waves shown was 7/10 of a second. The instruments playing were the violins, violas, violincellos, double basses, flutes, clarinets, oboes, French horns, trumpets, and trombones. This illustrates the way in which musical-tones reach our ears—by means of "tone-waves" traversing the atmosphere. Every musical instrument, every combination of instruments and all voices produce their own peculiar waves. The phonograph is simply a scientific device for reproducing these waves, and the nearer

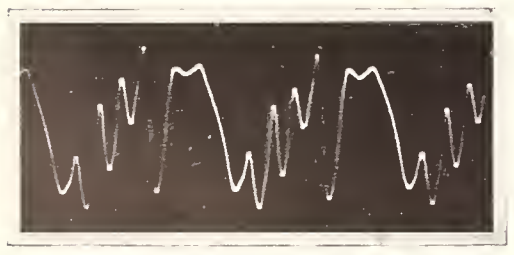
A Wonderful New Phonograph



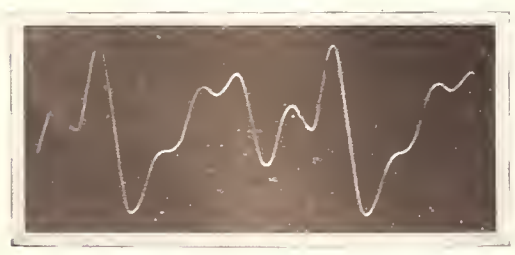
TUNING FORK—The tone of a scientifically mounted tuning fork is absolutely devoid of partial-tones. Hence the tone-wave it creates is entirely free from the irregularities found in other tone-waves which are caused by their partial-waves.



VIOLIN—The tone of the violin has many partial-tones. None of these are aggressively dominant, however, hence the fluent, smooth quality of the instrument. This is shown in the photograph of its tone-wave. There are many irregularities in the wave but they are all too small to influence its general symmetry.



OBOE—Here we have a tone-wave which shows unmistakably a tone of very distinct individuality. The pronounced irregularities of the oboe's tone-wave are caused by the dominance of certain of its partial-tones.



HUMAN VOICE—This tone-wave was created by pronouncing the vowel sound "Ah." The voice is particularly rich in partial-tones, some voices, indeed, containing as many as 40 that are appreciable.

Last winter in New York a new and improved phonograph was announced by The Aeolian Company, the leading organization in the world's music industry.

The standing of this great concern was such; its achievements in developing other musical instruments, of such epochal nature, that this announcement attracted widespread attention. The public, musicians and those interested in the music industry hastened to hear the new instrument.

Nor were any disappointed. All who heard it realized that a new era had dawned for the phonograph. Many have desired to know the *secret* of its extraordinary tone.

There is no secret, however, connected with The Aeolian Company's marvelous success in developing the tone of its new phonograph—The Aeolian-Vocalion.

For years this Company has been studying and applying the principles of tone-production. In its employ are the most able musical and mechanical experts in the music-industry. It maintains complete laboratories for research, both here and abroad. And during the past dozen years it has spent greater sums in experiment and investigation than probably *all other music-manufacturers combined.*

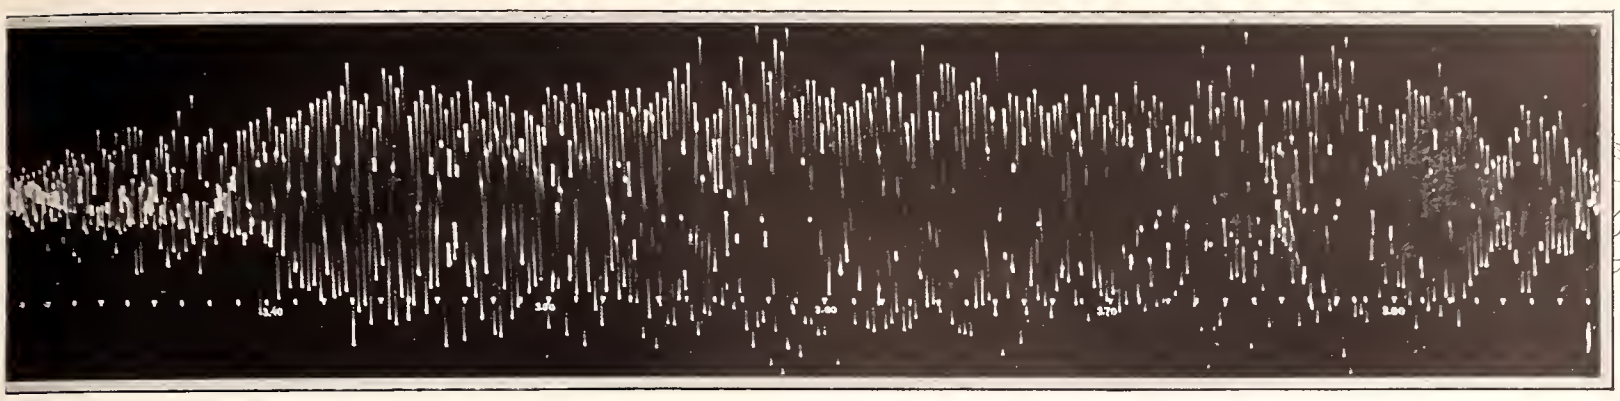
There are many features in The Aeolian-Vocalion that contribute to its pronounced musical superiority and its extraordinary tone. Some of these, like the marvelous Graduola device for *controlling* tone, are entirely novel to the phonograph. Others, like its new and scientific Sound Box and Symphonetic Horn, are in the nature of higher developments of existing features.

How these features have been developed—the origination of some of them in single brilliant inventions, and the slow processes attending the attainment of others, constitutes one of the most interesting stories in musical history.

One phase alone will serve as illustration. On these pages are reproduced actual photographs of *tone-waves.* These are but a few from among hundreds taken in the course of developing The Aeolian-Vocalion.

They were all produced by a patented process—the most perfect known to science—and were made especially and exclusively for The Aeolian Company.

While as has been shown, many factors have contributed to the perfection of The Aeolian-Vocalion, the availability of such means for scientifically analyzing and studying tone, for the first time in musical history, has been of invaluable assistance.



it approaches scientific exactitude in doing so, the more "natural" it sounds. The Aeolian Company has at its command the most perfect means known to science for photographing and analyzing "tone-waves." And it is interesting to know that the tonal perfection of its new phonograph — The Aeolian-Vocalion — is partly due to hundreds of photographs of such tone-waves. These afforded the means for visual comparisons and analyses, so that the superiority of the Vocalion's tone is a tangible, demonstrable fact.

The Aeolian-Vocalion

Tones from the Phonograph you never heard before

Have you heard The Aeolian-Vocalion—that tonal phonograph whose voice is *art?*

If you have never done so a revelation of the music possibilities in this perfected phonograph awaits you.

Tones, so delicately beautiful that they could never be voiced by a phonograph before, enchant the ear. Sweet, full richnesses of round, deep tone sound with the very vibrancy of life. The long familiar meagreness of lower tones has gone. The unmusical metallic phonograph qualities have disappeared, thanks to its marvelous new Sound Box. Because of its wonderful Symphonetic Horn the true, the delicate, the *living* character of each single instrument is preserved and set apart, distinguishing it subtly from the rest.

And while it is doing this, it is permitting you, if you choose, to vary on a single record every changing shade of your passing mood.

Just press the Graduola, that exclusive tone-controlling feature of The Aeolian-Vocalion. You will hear the music melt to your touch, then grow to strength again, graduated delicately by every changing pressure of the hand—and without the slightest muffling or dulling of its qualities.

You are varying infinitely the color and shading yourself—just as you remember the artists themselves to have varied their performances each time they have sung or played for you.

Thus, this great instrument produces tones incomparably more melodious than you have ever heard from phonographs before, and also gives you command of them, lets you express your music-feeling if you wish. But only if you wish, because like other phonographs The Aeolian-Vocalion will *play itself*, without your help, if you prefer it to.

Notwithstanding the marked musical superiority of The Aeolian-Vocalion and the fact that architecturally it sets an entirely new standard, it costs no more than other phonographs of equal capacity.

The Aeolian-Vocalion is made exclusively by The Aeolian Company. Owing to its relatively limited output, it is on exhibition and sale, at present, only in certain cities. To all who write, information as to where it may be seen will be sent. Also there will be mailed a catalog giving styles and prices and containing the most interesting popular treatise on "tone" and "tone-production," probably ever published.

AEOLIAN-VOCALION
STYLE E, $50.

THE distinguishing features of the Aeolian-Vocalion line, which is larger and more complete than that of any other phonograph upon the market, are—the good taste displayed in stock models, and the group of special Art cases which far surpass anything hitherto known in connection with the phonograph.

The stock models reflect the broad experience and ample artistic capacity of The Aeolian Company's department of design and case-making. Utmost care and technical skill are apparent in every detail. Simplicity and the repression characteristic of genuine art are evident in every design.

In the Art Styles the most unusual and artistic case effects are displayed. While some of these are original, others are based upon authoritative Period and other classic models.

No intelligent merchant need be reminded that there is a large clientele in every community that appreciates real beauty and art, and that this clientele constitutes a highly desirable addition to his trade.

Aeolian-Vocalions appeal to all classes. Their prices range from $35 to $2000 as follows: Conventional designs, $35 to $75 without the Graduola. $100 to $350 with Graduola. Art Styles from $375 to $2000 with Graduola and other important and exclusive features.

Columbia Graphophone Company
Woolworth Building, New York

NEW VOCALION CATALOG ISSUED.

Attractive Volume Gives Interesting Details Regarding the New Phonograph Manufactured by the Aeolian Co. and Which Has Proven Popular—Graduola Emphasized.

A catalog of unusual excellence has just been issued by the Aeolian Co., New York, featuring the company's new phonograph, the Aeolian-Vocalion. Although several catalogs devoted to this instrument have been published during the course of the year, this new book is by far the most interesting and valuable that has yet made its appearance. Typographically it is beyond improvement in every detail, and the text and illustrations are equally as worthy of commendation from a trade or musical standpoint.

It was the intention of the Aeolian Co. in preparing this new catalog to have it present the Aeolian-Vocalion as a musical instrument in the true sense of the word, and to that end the reading matter is of keen interest to music lovers.

The first few pages of the new Vocalion catalog feature the prestige of the Aeolian Co. in the musical world, and the fact that the Aeolian organization was ideally equipped in every way to perfect a new type of phonograph. The contents of this section are summed up: "The Aeolian-Vocalion is the logical product of scientific and artistic capability." This section is followed by several pages presenting pertinent paragraphs headed, "The Work of Development," "An Aeolian Triumph" and "A Practical Phonograph with Ideal Qualifications."

The constructional features of the Aeolian-Vocalion are set forth interestingly and informatively, several pages discussing the tone of the Aeolian-Vocalion, the improved sound-box and the Symphonetic horn in a manner free from technical terms. The Graduola, which is one of the most important developments in the phonograph field, is adequately described in two pages.

Following the text matter, which is accompanied by striking sketches, the various models of the Aeolian-Vocalion are illustrated and described. Among these instruments are Styles "D," retailing at $35; "E," at $50; "F," at $75; "G-1," at $100; "H," at $150; "I," at $200; "J," at $225; "K," at $300; art style "Q-K," at $1,250; art style "L," at $375; art style "V-K," at $450; art style "P-K," at $875, and art style "R," at $1,500.

The Aeolian Co. calls attention to the fact that the above named art styles are only a few of the artistic and special designs which have been produced by the Aeolian department of design, which is equipped to manufacture any style of Aeolian-Vocalion to suit individual requirements.

E. C. DAVIES ATTRACTS TRADE.

Novel Advertisement of Diamond Disc Phonographs Results in Good Business.

E. C. Davies, of Dodgeville, Wis., who has the agency for the Edison Diamond Disc machines, secured excellent results from a small advertisement, which he used in the daily press, containing a picture of Thomas A. Edison, with the announcement that "Mr. Edison will show you marvelous discoveries in sound production at the Davies Music Store next week; you are invited." Many responses to the invitation were received in the form of personal calls, and the subsequent demonstration of the qualities of the Edison phonograph resulted in a very agreeable business in machines and records.

WANTS OLD RECORDS FOR SOLDIERS.

Popular Records Which Are No Longer Interesting Wanted for French Hospitals.

A very admirable use for old phonograph records which may have lost some of their original charm is pointed out by Miss May Taylor Morelton, of the Vacation War Relief, 38 West Thirty-ninth street, New York, who has made an appeal for old records and machines to be sent to various hospitals in France to help make things cheerful for the wounded soldiers.

"So many people buy quantities of popular records, play them a short time, and then put them aside for new ones," she says in her appeal. "Just think of the pleasure these would give in a French hospital! There the men have very little to amuse or cheer them during the long, weary days of recovery. Any donation of new or old machines and records will be more than appreciated by hundreds and perhaps thousands of soldiers."

Charitably inclined individuals who are tired of their popular records of the yester-year will probably welcome this opportunity to put these old records to a very humanitarian use.

JOINS THE TRAVELING STAFF.

W. G. Porter to Fill This Post with the New York Talking Machine Co.

W. G. Porter has been appointed a member of the traveling staff of the New York Talking Machine Co., New York Victor distributer, succeeding A. T. Doty, who is no longer connected with the company. Mr. Porter will travel in central Pennsylvania and southern New York, and his first trip has been very successful. Mr. Porter's past experience ideally equips him for his present post, as he has had a thorough training at the Victor Talking Machine Co.'s factory and is well versed in all details of Victor merchandising. His intimate knowledge of the business will enable him to extend to Victor dealers in his territory co-operation of a practical and result-productive nature.

BUYS OUT TALKING MACHINE STOCK.

(Special to The Talking Machine World.)

GREENVILLE, S. C., January 3.—The entire stock of the Talking Machine Co., of this city, has been purchased by John H. Williams, the local piano merchant, who will remove the machines to his own establishment. The Williams Music House will then carry Victor and Columbia records besides all other equipment for these instruments.

Edison Diamond Disc Phonograph Perfect, Say Noted Critics

When the New Edison Diamond Disc Phonograph was placed on the market, Mr. Edison stated that he had at last produced the perfect phonograph. Such a statement from such a man should have been sufficient for the most skeptical, but Mr. Edison himself was not satisfied with a mere statement, so he is proving by public tone tests that what he said is true. He is having concert and operatic artists sing in direct comparison with the Re-Creation of their voices on the Edison Diamond Disc Phonograph.

Newspaper critics of leading musical centers have come forward and confirmed everything Mr. Edison claimed, in such enthusiastic terms as:

CHRISTINE MILLER, Noted Contralto
Singing With Edison Diamond Disc Phonograph

"Just how true and faithful is this re-creation of the human voice was best illustrated when Miss Miller sang a duet with herself, it being impossible to distinguish between the singer's living voice and its re-creation by the musical instrument that bears the stamp of Edison's genius."

BOSTON (MASS.) HERALD.

"Thomas A. Edison has solved perfectly the problem of life-like reproduction of music."

MILWAUKEE (WIS.) EVENING WISCONSIN.

"Except for the volume of sound, the reproduction was as perfect as the original interpretation."

PHILADELPHIA (PA.) PUBLIC LEDGER.

"Record so like voice could not tell difference."

CLEVELAND (O.) LEADER.

"It was almost impossible last evening for the audience to ascertain when Miss Verlet had ceased singing, so perfect were the notes given out by the instrument."

ALBANY (N. Y.) ARGUS.

"It was almost impossible to tell when she (Miss Elizabeth Spencer) stopped and when the phonograph began, except by watching her lips."

ST. LOUIS (MO.) GLOBE DEMOCRAT.

These criticisms speak volumes more than we could say in self praise.

Purely mechanical comparisons are common. Comparison of machine with human voice was unheard-of until Mr. Edison startled the critics with his Re-Creation, preserving all the magic of the living tones. The almost, the near, the approximate are things of the past—

The Perfect Phonograph Is Here

Edison Dealers Are Adding Daily to Their Clientele the Most Cultured and Critical Music Lovers

Why?

Because they know the Edison Diamond Disc Phonograph is the one instrument that actually Re-Creates the human voice in all the magic of the living tones. Nothing less than perfection would satisfy them.

Webster says PERFECT is: "Without defect or lack—complete."

Do you realize the full meaning of PERFECT when applied to the phonograph? Especially when it comes from the most competent, unbiased critics.

Do you want anything short of PERFECT?

If so, you are not interested in the Edison Diamond Disc line, but if you want to sell an instrument "without defect or lack" the Edison Diamond Disc Phonograph is the only one to consider.

Model C 250 Chippendale
Price $250

Judge for Yourself Whether the Edison is Perfect—Hear a Tone Test

Find out about the next tone test recital near you and go hear it. Arm yourself with all the skepticism you can command and we will leave it to you to decide.

Edison tone tests are educating the public to the highest standard of reproduction—to greater dissatisfaction with the "talking machine" product and greater demand for Edison Re-Creation. Constantly increasing sales of Edison dealers prove this.

Model B 250 Modern Renaissance
Price $250

Edison Artists World's Best Musically

The fresh, youthful, full-toned voices of artists who are making their names world famous are at the command of the Edison owner—Alice Verlet, one of the most wonderful of all coloratura sopranos; Jacques Urlus, greatest of Wagnerian tenors; Emmy Destinn, the famous Bohemian dramatic soprano of the Metropolitan Opera Company; Anna Case of the Metropolitan Opera Company, who has one of the sweetest soprano voices in the world; Christine Miller, one of the finest contraltos on the concert stage; Albert Spalding, America's greatest violinist, and over a hundred others.

Our Plans for 1916 Tell How You Can Qualify as a "Re-Creation" Dealer. Get Them.

GOOD STATIONERY IS IMPORTANT.

Every Business House is Judged to Some Extent by the Stationery It Uses, and Strangers Are Guided by Their Impressions.

The first impression made by a business letter goes a long way toward determining what sort of attention the letter will get, and this, of course, applies almost more strongly to the form letter than to any other. Look your letter heads over carefully and figure out what sort of an impression they are apt to make on strangers.

You yourself may know, and your customers may know that your store ranks high in efficiency, good taste and all the other desirable qualities that a good store should have. But how are you going to convey that impression to a stranger?

By having your business stationery carry the suggestion.

It can be done, and easily. Go through your own letter files some day and compare a dozen or so of other people's letter heads. You will find letter heads that are dignified—sometimes too much so. They can be so dignified that they are cold, stiff, repellant—so. there is an extreme to be avoided. You will find other letter heads that fairly sparkle and are in such thoroughly good taste that it's a pleasure to look at them. You will find others that are slovenly and cheap looking. You will, in other words, find that business stationery does make an impression, and a very definite one. Then, in the light of that experience look at your own with a critical eye. If you are satisfied with it—stick to it—otherwise, change it.

There are business houses to-day which continue to use admittedly unattractive stationery for no other reason than that they have used that particular form for so long that it has come to typify the house and is consequently an advertising asset.

It is perfectly true that the stationery of any house after it has been used for a considerable time does acquire a certain advertising value, but is it wise to advertise that you are too indifferent or too lacking in taste to know good stationery when you see it? If you are lacking in attention to the details of your own business isn't it likely your customers may fear that you will similarly be lacking in attention to details which will affect them?

A slip in grammar or the improper use of a word somewhere is regarded as a serious error, but even that may be excused more readily than slovenly stationery. "There's many a slip 'twixt the cup and the lip," and in the various stages of dictation, transcription from notes and the perversity of typewriting machines there are possibilities of trouble which can be readily explained away. A slovenly letter may be attributable to an employe, says the Voice of the Victor, but the house's stationery is attributable only to the house.

HERZOG PROSPERITY BANQUET.

Employes of Herzog Art Furniture Co. and a Number of Prominent Citizens of Saginaw the Guests of the Company at a Banquet Given at the Teutonia.

More than 360 employes and executives of the Herzog Art Furniture Co., with a number of prominent citizens of Saginaw, Mich., where the big Herzog plant is located, as their guests, were present at a "prosperity banquet" given by the heads of the firm at the Teutonia, Saginaw, December 27. The event was held in commemoration of one of the most successful seasons ever experienced by the company and of the sale, during the last two months, of approximately $160,000 in Herzog art furniture.

John L. Jackson, president of the firm, who acted as toastmaster, reported that the year's business would reach $600,000, and with the enthusiastic approval of those in attendance, the million dollar mark was set as a goal for 1916. The banquet tables were arranged in a huge letter "H," and the Herzog orchestra furnished music throughout the evening. Those seated at the speakers' table included John Herzog, manager of the plant; Mr. Jackson, Congressman J. W. Fordney, W. S. Linton, president of the Saginaw Board of Trade; Postmaster William F. Hemmeter, M. N. Brady, Zack Baskin, Robert B. Hudson, J. W. Ippel, Phil. Ittner, Charles A. Khuen, William Seyffardt, W. K. Andrews, Fred Zahner, John Stenglein, A. D. Furong, Louis Liskow and William Robertson.

In the after-dinner speech of Congressman Fordney the facts that the Herzog payroll totals $250,000 and that 1,800 men, women and children are dependent upon the company's business for support were mentioned. Postmaster Hemmeter declared that of the total receipts of his Saginaw office, $47,562, the Herzog Co. paid $3,600. John Herzog was given an enthusiastic ovation by the Herzog employes and emphasized, in his address, the spirit of co-operation that had made the company's success possible. A. C. Warner, head carver at the Herzog factory, and William Perkins, yard foreman, also addressed the firm's guests.

NO PAY UNTIL AFTER THE WAR.

German Talking Machine Firm Offers Full Credit to Customers Until Peace Comes.

Correspondence of the Associated Press from Berlin states that a Breslau firm dealing in talking machines has either decided to go in for long credits or else it expects an early peace.

It advertises its instruments and records on the following terms: "During the war you pay nothing. Beginning four weeks after the war you pay four marks monthly until phonograph and records are paid for."

INCORPORATED.

The Albany Diamond Disc Studio was incorporated with the Secretary of the State at Albany, N. Y., this week, for the purpose of dealing in talking machines. The capital stock is $22,000. The incorporators are: Edward R. Hoffman, Rudolph Horst, Richard M. Nelson, 465 Broadway, Albany, N. Y.

DO IT NOW! YOU HAVE CAPITAL INVESTED IN YOUR STOCK. IT WILL BE SECURE IF THE STEVENS BILL PASSES THE NEXT CONGRESS.

MIDDLE WEST TALKING MACHINE TRADE PHENOMENAL.

Reports from Cincinnati Correspondent to The World Tell of Tremendous Activity in All Departments of the Industry in That City—Reserve Stock Completely Cleaned Out—This Applies to Every Make of Machine—Same Condition in Surrounding Territory.

(Special to The Talking Machine World.)

CINCINNATI, O., January 5.—A rather phenomenal talking machine business is the only way the jobbers and retailers of the Middle West are able to describe the holiday demand for this instrument. Generally speaking, the trade, from a reserve standpoint, is pretty well shot to pieces, and all along the line there is talk of getting extra supplies in storage by early fall in order to prevent a repetition of the shortage of the past two weeks.

Fred J. Empson, inventor of the Graduola feature of the Aeolian-Vocalion, spent part of the holiday week in this city. His principal object in coming to Cincinnati was to view the grave of his wife, who died recently in the West and was buried in Spring Grove Cemetery. Mr. Empson was accompanied by a relative. While here he announced that he would become a resident of Los Angeles, giving up his home in Australia. The visitor was shown considerable attention by Messrs. De Vine and Byars, of the Aeolian Co., and addressed the talking machine force on some of the salient features of his invention. The address was heartily appreciated.

Scarcity of material, particularly brass, is crippling the efforts of the Knabe Bros. Piano Manufacturing Co. in supplying the trade with the Crystola talking machine. Although the latter instrument only appeared in the market in December, Ernest Knabe yesterday stated that the department was rushed to the limit. Should the demand keep up, he was of the impression that a new building would be required before the end of the year.

Mr. Byars, manager of the Vocalion department of the Aeolian Co., reports December business considerably over double that of last December, and 90 per cent. of the business was Vocalions. Three styles were sold out entirely before the 20th of the month, the Style "H" ($150) and the Style "J" ($225) were the two big sellers. The tremendous demand for the Vocalion only stands as a monumental demonstration of the fact that an article of merit, backed by a concern with real prestige and an advertising campaign of forceful and elegant copy, can command the immediate confidence of the thinking public.

The most fascinating part of the 1916 holiday business was the fact that there was small demand for low-priced instruments, a large percentage of the business was cash and practically none of it long time payments. These characteristics surely indicate prosperous conditions generally.

"We have just witnessed the largest rush I have ever had the pleasure of participating in since I have been connected with the Columbia Co.," said Manager Whelen, of the local Columbia store. "In every department records of previous years were smashed and all the old statistics have faded to nothing in the face of the new standards that are being set this year.

"We had a wonderful increase over last year, and had we been able to supply the demand in its entirety the increase would have been far greater. As it was, it kept all departments hustling night and day to deliver as far as possible, and, despite the fact that there were many disappointments, the results were phenomenal, and we believe that all our dealers are satisfied with the total figures.

"The new electric Grafonolas have filled a long-felt want, and the trade, both wholesale and retail, have ordered heavily and have made us realize just how great was the demand for an electric-driven machine. The new year is starting out with a 'boom,' and we anticipate that 1916 will even far surpass 1915, which is going some, as 1915 was some year."

The Starr Piano Co.'s branch is now devoting more attention to the new instrument of that house. New styles are being received and are meeting with approval.

The many patrons of the local Columbia store will miss a familiar face from the sales force. Andy Griffig passed away the latter part of December after a short illness. Mr. Griffig was well liked, always had a smile for everyone, and his loss is felt at the store.

President Summey, of the Cable Company, who features the Victor line, was the one dealer of this line who did not worry during the holiday rush. As early as last July he stored a sufficient supply for his needs, and his expectations as to the demand and the goods on hand were realized.

Just now all dealers are swamped with demands for records. This phase of the business has caused the houses to be as busy during the past week as the salesmen were in disposing of machines.

NEW DIAMOND DISC STUDIO OPENED.

Crowds Attend Opening of New Exhibition Rooms at Gloverstown, N. Y.

(Special to The Talking Machine World.)

GLOVERSTOWN, N. Y., December 20.—A large and commodious studio has just been opened here by the Diamond Disc Co. The new studio, located in the Rose Building at 3 North Main street, is elaborately decorated and no convenience for the benefit of its patrons has been omitted. The largest of the demonstration rooms easily accommodates a score of people. During the evening hours the sales force are in evening dress to meet the visitors and interest them in the phonographs.

INCORPORATED.

The Peruna Recording Laboratories Corp. was incorporated recently at Albany, N. Y., for the purpose of manufacturing and handling master records, musical instruments, talking machines, etc.

Albany—for CAPITAL Service

Read it again—Albany—for CAPITAL Service

Now you have both the black and white of it. This is the sign of Victor stability; it is the sign that you can secure records and machines when you want them—when your customers want them.

We want to dwell on this strongly—1916 will be the biggest Victor year. It means that your Victor profits will be the largest ever IF you are backed up with G-E Service. Don't overlook the fact that several of the most experienced men in the talking machine business—specialists in every instance—are here working heart and hand to further your interests.

Tell us about your problem; one of our experts will help you to solve it.

GATELY-HAIRE COMPANY

John L. Gately, President **James N. Haire, Treasurer**

Albany, N. Y.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., January 8.—A remarkable year has passed for the talking machine business. Of this there is no mistake, as evidenced by the widespread comments one hears among the heads of the various concerns. Everywhere the sales showed an increase over 1914—in some cases a gratifying one, in other instances a phenomenal one. There is no question, at the rate the business has grown, as to what 1916 will show; that seems to be already established. Everyone in the business is looking for a large increase, but none dares speculate as to what the percentage of increase will be. With some of the local concerns there has been a little lull in trade since Christmas, but in other cases the month thus far appears to have made an excellent beginning.

Death of Colonel Bill Regretted.

Throughout the Boston trade there is a feeling of keen loss over the death of Edward Lyman Bill. Some of the members of the trade had known him a long time, but not as many in the talking machine business knew him for so long a period as those of the piano trade, for the reason that the business is so comparatively new. Many who had never had the pleasure of meeting Mr. Bill in person yet knew of him, for no one ever mentioned his name that it did not suggest a remarkable personality. Those who went to San Francisco to attend the talking machine men's convention most pleasantly recall Mr. Bill, and several who then had met him for the first time were loud in their praises of the man. One in Boston who pleasantly recalls Mr. Bill on that occasion is Henry A. Winkelman, manager of the Victor department of the Oliver Ditson Co., who went on that trip with his wife. Mr. Winkelman, it appears, had known Mr. Bill for about nine years, and the latter had often dropped in to see Mr. Winkelman on his visits to Boston. Mr. Winkelman always found Mr. Bill a man of the highest principles, who never allowed any sense of personal gain to stand in the way of his giving the best of himself to the cause of the business which he always sought to advance.

Talking Machine Men Should Get Together.

Up to the present writing the possibility of the Boston Talking Machine Club having a dinner this month looks pretty slim. There was a good excuse in December for not having a dinner, because all the trade were worked to the limit, but now that the holiday rush is over it would seem about time for the boys to again get together. The first meeting proved so enthusiastic that everyone thought it augured well for permanence, but things don't look so rosy now. And it's about the same way with the bowling teams that started off hotly enthusiastic over the prospects of a busy and lively season. For the first month the alleys were just about monopolized by the talking machine fellows, but now some of the teams fail to show up, and unless there is more interest shown there'll be next to nothing doing long before the winter is over Come, boys, get busy, keep the ball a-rolling, and don't forget the festive board at least bi-monthly.

Makes Glowing Reports of Business.

Manager Frederick H. Silliman, of the Pardee-Ellenberger Co., makes a glowing statement of the fine business done in the Edison Diamond Disc outfits during the holidays. The business, too, for the year showed a most satisfactory increase, satisfying alike to Manager Silliman and to Mr. Pardee, head of the Pardee-Ellenberger Co., who was over in town for a few days from New Haven. The highly efficient staff surrounding Manager Silliman remains the same for the year.

Visitors at Eastern Talking Machine Co.

Harry Lauder, who has been playing an engagement at the Shubert Theatre, was a caller at the warerooms of the Eastern Talking Machine Co. while in town. He was accompanied by Charles Frank, his orchestral leader. Lauder's picture with an arrangement of his Victor records formed an attractive window display. Other callers at the Eastern Co. were Tom Brown, of the Six Brown Brothers, of the "Chin Chin" company; both Mr. Stone and Mr. Montgomery, the stars of that show, and their manager, Arthur Houghton; George MacFarlane, who has been playing at Keith's Theatre; Edith Helena, the singer, who has been playing at one of the Loew theatres.

Accident Happened at Bad Time.

Norman Mason, of the wholesale department of the Columbia Graphophone Co., lost more than a week in December by reason of spraining the ligaments of one of his feet, which kept him housed. His accident happened at a bad time, as his business was of large proportions. He is practically entirely recovered, however, at this writing.

Will Attract Many Visitors.

One bit of interesting news along the Talking Machine Row is that the tickets for the great open-air performance of "Elijah," to be given in the spring at the Braves' Field in Alliston, are to be sold at the Eastern Talking Machine Co.'s warerooms. Sam Kronberg, who so successfully managed the "Siegfried" performance at the Stadium last summer, and which was an undertaking of great magnitude, will be in charge of the "Elijah" performance and will have his headquarters with the Eastern Co.

The Lack of Preparedness.

As one looks into the talking machine business the wonder grows that some dealers are so short-sighted as not to make sufficient provision for the enormous demand for goods that sooner or later overtakes them. Reference was made to this situation in a recent issue of The World, but here is a Christmas past and gone and still dealers are entering complaints to Manager Arthur Erisman, of the Columbia, bitterly complaining that had they three times the amount of goods they could have sold them. Mr. Erisman instanced the case of a dealer in New England who early in the season ordered 100 machines at a certain price. He was urged to make the order 300, for he could have had the goods then, but he replied that that was altogether too many, that he would be more than satisfied to get rid of the 100. December had scarcely got under way before the full 100 machines were sold; then he began to clamor for more, but they were not to be had. Could such a man see some of the orders running up into the hundreds of machines on a single order which could not be filled for the holiday trade, and even now are only beginning to be distributed from the factory, he would appreciate the amount of business that has been done through the Boston headquarters of the Columbia Co. If Columbia dealers learn their lesson from the recent experiences they will see to it that such a situation does not exist another season, and when Manager Erisman urges them in midsummer, as he did last year, to place their orders early, and make them big enough to cover emergencies, they will act upon his advice.

In this same connection it is of interest, on the word of Manager Erisman, that no new contracts will be closed with dealers until March 1. During the past few weeks Manager Erisman has been simply deluged with letters from would-be dealers, and there are fully 200 of these applications on file with him at the present time.

Spent Holidays in Washington.

Manager Erisman spent Christmas with his wife's family over in Washington, and on his return home spent a day or more in Philadelphia and

MORE is heard today regarding "quality" of phonograph music than ever before, and the Edison Diamond Disc Phonograph started this general conversation by reason of its admitted superiority. The Edison phonograph is also taken as the basis of ALL phonograph comparison and its tone is admitted to be best.

Aside from its tonal perfection, the artisticness of the cabinet designs enables the Edison Diamond Disc phonograph to harmonize with the most expensive interior furnishings of any home. We are "Exclusively Edison."

THE PARDEE-ELLENBERGER CO., Inc.

BOSTON, MASS. NEW HAVEN, CONN.

"E. D. D. P."

New York, having been away for five days. The Columbia dealers with whom he came in contact were more than surprised and delighted at the amount of business that had been done by Columbia dealers everywhere.

Visiting the Victor Trade.

S. M. Revness, representing the Victor Co., arrived in Boston a few days ago from Camden, N. J., and is making his headquarters at the Parker House. Mr. Revness, who is calling on the local Victor dealers and will be in town for a week or so, is making friends wherever he goes.

Makes Encouraging Report.

Manager Wallace Currier, of the Victor and Edison departments of Chickering & Sons, makes a most encouraging report of business done during the holidays. The increase over the year's output of the previous twelve months showed a splendid gain, and January already has shown up well.

Enjoyed Big Holiday Business.

The Victor department of the Henry F. Miller Co. enjoyed a fine holiday business, thanks to Manager Warren Batchelder and his efficient staff of salesmen. Mr. Batchelder is one of those who succumbed for a time to the ravages of grip, and he was away from business for several days. An addition to his staff is Henry Hallett, who spends most of his time on the outside.

Fred Bond's New Post.

Fred Bond, the Boston baritone, has been placed in charge of the operatic department of the Eastern Talking Machine quarters in Tremont street, and he will have his offices on the third floor. By a shifting about Miss Martha Kadetsky, who had been on the third floor, is now located on the second, and Miss A. Beaumont is back on the first floor, where she will wait on customers.

Home for the Holidays.

Wilbur W. Longfellow came to Boston for the holidays from New Haven, where he is pleasantly located with the Pardee-Ellenberger Co. He paid a call upon his friends in the talking machine department of Chickering & Sons, with which he was associated before going to New Haven.

Another visitor from out of town who was given a cordial greeting locally was Harry Brown, manager of the Berliner Co. at Montreal. Mr. Brown formerly was with the Eastern Talking Machine Co., and his friends in the trade are legion.

Excellent Trade for Past Year.

John Alsen, manager of the Edison and Victor departments of the George Lincoln Parker establishment, makes a good report of the December business, and he and his staff were glad when the Christmas rush was over. Mr. Alsen's business for 1915 was highly creditable to the hustle that is so characteristic of his whole staff.

BONUS FOR COLUMBIA BOSTON STAFF

Every Employe of the Store Profits by the Great Increase in Business Developed During 1915, According to the Promise of Manager Erisman—Bonus Averages 15 Per Cent. of Yearly Salary—Some Excellent Advice.

(Special to The Talking Machine World.)

BOSTON, MASS., January 10.—The forty-two employes of the Boston offices of the Columbia Graphophone Co. are in a merry mood these days because of the wonderful generosity of Manager Erisman, who early last year promised his staff a bonus on the year's business.

Throughout the entire past year the business grew and grew, and the distribution was not confined to those actually on the floor, that is, those daily meeting the customers, but included the bookkeeping force and even the janitor, as it was Mr. Erisman's laudable idea that everyone had played his or her part in developing business. Therefore no one was to be overlooked. The bonus was primarily based on the year's business, the increase alone having more than equaled the total year's business for any year in the history of the Boston office up to 1914, and out of this individual months could be cited which produced as much business as any total year's business up to and including 1912.

To arrange this plan satisfactorily Mr. Erisman was obliged to make several visits over to the home office, for there were many details to take into consideration.

In appreciation of what his splendid staff has been able to accomplish Manager Erisman addressed a well-worded letter to his men. One of the encouraging features of this bonus distribution, the size of which was a great surprise to the employes, is the establishment of bank accounts by several who never before had them. The letter in part says:

"This bonus, which represents approximately fifteen cents on each dollar paid you in the year 1915, should mean more to you than you might see at first glance. It is certainly a splendid investment for one dollar to earn you 15 per cent.—it is more than equal to the enormous profit paid to stockholders in some of the most successful concerns, especially some of the concerns now making war supplies, but I believe it is of greater satisfaction to you to know that war has nothing to do with the bonus you have received from us, except if you should wish to liken some of the hard, conscientious work that you have all done days and nights to war in the trenches; certainly most of you have been on the 'firing line,' but fortunately no one has been 'fired.'"

Mr. Erisman's concluding advice to his men is this: "Study our printed matter; be familiar with every advertisement that we run; know the goods that are displayed in our windows; give the best of service; make no enemies; read every trade paper you can get your hands on, and keep up the splendid pace set by this company."

THE VOCALION CO., BOSTON, OPENS.

Handsome New Quarters at 190-192 Boylston Street Opened to the Public—Handsomely Decorated and Equipped—R. F. Hibshman in Charge—Large Business Is Expected.

(Special to The Talking Machine World.)

BOSTON, MASS., January 10.—The Vocalion Co. of Boston opened its doors to-day at 190-192 Boylston street, and the attractiveness of the store was the prime means of drawing hundreds to the place. Once inside, the admirers of recording instruments enjoyed a demonstration of the Aeolian-Vocalion, which is now widely known in New York, where it has been splendidly exploited by the Aeolian Co., but which is quite new in these parts. The warerooms are large and flooded with daylight, and extend quite a distance back to Park Square, where there is an entrance and large show window. The interior is finished in rose and gray, the woodwork being in the latter tone and the furnishings in the former color. The electric fixtures are in antique bronze, and the whole interior is as cheery and inviting as one could wish. There are numerous demonstration booths, and the various styles of Aeolian-Vocalions are attractively arranged about the warerooms. The manager of this new Boston establishment is R. F. Hibshman, who comes over from New York and has brought with him several men from the New York house.

It is of special interest that the first day's demonstration resulted in the sale of many instruments, and the prospects look most encouraging for a large output.

AN INTERESTING NEW MACHINE.

The Arionola, Manufactured by the Arion Manufacturing Co., Presents Some New Features of Tone Production That Have Proven Exceptionally Successful and Very Popular.

(Special to The Talking Machine World.)

BOSTON, MASS., January 10.—The announcement of the Arion Manufacturing Co. in this issue of The Talking Machine World will doubtless prove interesting to talking machine dealers. The unusual success of the $15 Arionola, which has now been upon the market for two years, has created a widespread demand for larger machines employ-

(*Continued on page* 22.)

Bagshaw and Needles are Synonymous

We are pleased to announce that 1916 is the 45th year in the history of the Bagshaw business.

Ranking as the first makers of talking machine needles, our record to date covers the greatest number of quality needles ever produced by anyone in the world.

Some time ago we shipped over 63,000,000 needles in 10 days, showing conclusively that not only is Bagshaw-quality the world's leader, but for output we likewise stand unsurpassed.

Every time you play a talking machine record, think of Bagshaw.

W. H. BAGSHAW **Lowell, Mass.**

Oldest and Largest Manufacturer
Established 1870

TRADE IN BOSTON AND NEW ENGLAND

(*Continued from page* 21.)

ing the same method of tone reproduction and reflection that was so well received by the general talking machine trade and public.

This method of tone reproduction, which is similar to the construction of a piano, namely, that of the wooden sounding board, is one of the unique features of the Arionola. It produces a tone which is clear and mellow, eliminating any metallic sounds.

After months of experiments, testing and exhaustive study, this company has finally produced a larger machine, built on the same principle as the original. This machine retails for $50 and has a handsome, well finished mahogany case, which fits standard record cabinets. The company has also produced an electric machine for $75 which has the same case and finish as the $50 machine. The company thoroughly tests and absolutely guarantees every phonograph in its line.

Charles F. Simes, sales manager of the Arion Manufacturing Co., is planning to start on an extended trip throughout the United States to introduce these two new models in various territories. The attractiveness of these new machines to the dealers lies not alone in appearance and mechanical excellence, but also in the broad policies of the company's sales plans. Judging from indications these new models will be received by the public with the same enthusiasm with which the little $15 Arionola was greeted.

DOUBLES CAPACITY IN SHORT TIME.

Chas. E. Roat Music Co. Opens Finest Music House in Central Michigan.

(Special to The Talking Machine World.)

BATTLE CREEK, MICH., January 8.—With the formal opening of the large new companion room of the Charles E. Roat Music Co.'s store Battle Creek has the most commodious and up-to-date music establishment in central Michigan. The new department, which was formally opened Friday evening, December 10, proved a revelation to those who have watched the growth of this firm as the Roat Co. has doubled its facilities for handling its rapidly growing business twice in the last sixteen months.

The new department is devoted exclusively to Victrolas, Edison diamond disc phonographs and Apollo player-pianos and completes a very commodious arrangement with a frontage of 40 feet on Main street by 120 feet deep. The very last word in the manner of modern display and equipment has been reached. Five large demonstration booths, tastefully decorated in flat tones of pearl and Kaiser gray with midnight blue tapestries and rugs, luxuriously fitted with easy chairs and a suction air ventilating system, where the intending purchaser may be entertained, prove an attractive feature of the Roat store. In the basement is a well-appointed repair department, shipping room and surplus stock room.

The growth of the Roat concern is little short of remarkable. It started fourteen years ago with one clerk, and now employs fifteen people on the floor, with several outside salesmen. Two years ago Mr. Roat associated with him Forney W. Clement, who has entire charge of the talking machine department. That this particular branch of the business has advanced to its present large proportions is entirely due to his deep interest in musical matters, his thorough business methods, his capacity for painstaking courtesy in serving the public and pleasing a large and growing clientele.

TALKS TO SALES FORCE.

J. F. Collins Talks to Jacob Doll & Sons Salesmen of the Construction and Sales Possibilities of the Pathephone and Pathé Records.

Jacob Doll & Sons, 116 West Forty-second street, New York, have installed three very attractive Unico booths in their warerooms which will be devoted primarily to the display of Pathephones. These booths are finished in French gray and their furnishings harmonize with the general color design.

Frank Hamilton Jones, general manager of the retail stores of Jacob Doll & Sons, is well pleased with the Pathé business which the store is closing, and during the past few weeks there has been a shortage of several of the more expensive models of Pathephones and quite a number of the Pathé records. In order that his sales force may be conversant with the merits of the Pathé product, Mr. Jones invited J. F. Collins, sales manager of the Pathé Frères Phonograph Co., to visit the store and give an interesting talk on the constructional features of Pathephones and Pathé discs to the sales staffs from all of the Doll & Sons stores.

VICTOR CO. LITERATURE.

A group of interesting letters was sent out recently by the Victor Talking Machine Co. to its dealers throughout the country. One division of this literature contained a batch of sales aids for the Victor records in the January supplement. This consisted of hangers, new window streamers, sheets of ready-made advertising electrotypes and proofs of some of the January magazine, educational and farm paper advertising. There was also a series of supplements of new Italian, Mexican, Spanish, Danish, Swedish and Polish records. Incidentally, it may be added that the January Victor supplement is unusually diversified and well calculated to meet with a ready sale.

Other letters to Victor dealers called attention to new repair part catalogs for certain types of Victors and Victrolas, and also gave some pertinent information regarding the proper handling of main springs on the smaller models of Victrolas.

INCORPORATIONS.

The Union Talking Machine Co., 555 Elizabeth avenue, Elizabeth, N. J., has applied for a New Jersey charter to manufacture and deal in phonographs and musical instruments. The capital is $5,000, divided into fifty share of $100 each.

* * *

The Toledo Pathephone Co., Toledo, O., filed articles of incorporation at Cleveland. The incorporators comprise Rob V. Phillips, A. C. Stevenson, F. K. Doty, E. H. Horton and Sholts M. Douglas, with $5,000 capital.

tried by over 2000 talking machine dealers with big results. This is no price-cutting scheme—no catch-penny idea, but a straight, legitimate business proposition. Will bring customers right into your place without any cost. Write me today for full particulars FREE.

W. I. SCHWAB, Mgr. 281 Canal Street PROVIDENCE, R. I.

DETROIT CLOSED GREAT TALKING BUSINESS IN 1915.

Increase of Prosperity Among the Working Classes Resulted in Money in Abundance to Buy Talking Machines and Records—Talking Machine Houses, Without Exception, Report a Most Satisfactory Business, with the Only Complaint a Shortage of Stock.

(Special to The Talking Machine World.)

DETROIT, MICH., January 8.—If space permitted, we could write at length regarding the fine year which Detroit talking machine dealers had—the enormous business transacted during the twelve months just ended and the bright outlook for 1916—but undoubtedly the same thing applies to all other sections of the country, judging from the reports of the orders now on hand at the different factories. But one thing we do want to state: Not only did the people of Detroit buy heavily of talking machines and records but their business was spread among all the dealers, so that the record-breaking business of 1915 means that not one, but all, the dealers received their share. The great trouble was to get enough goods. Victor, Edison, Columbia and Pathé jobbers have more orders on their books right now than will be filled for some time to come.

And so in starting a new year we feel justified in saying that the month of January opens up most auspiciously. The fact that the holiday season was over did not seem to make any difference. Of course, dealers did not have machines to sell, but record business was just as good, if not better, than during holiday week. The hundreds of people who received talking machines for Christmas presents naturally were anxious to get their favorite selections to play. And so, while the scarcity of machines will make that particular department dull until the factories can make shipments, dealers can be consoled with the fact that their record business will be better than ever. And after all, this is the best part of the business because it is practically all cash.

K. Mills, the new manager of the Columbia branch in this city, has already become a booster for Detroit—he likes the town, its people and its spirit of progressiveness. "I never met a finer bunch of dealers," he said. "All of them are live wires and know how to do business on a real commercial basis. The best part of it all is that every one of them is doing a big business. The more I know of these men the better I like them. I know that we will all get along splendidly."

Sam Lind, city sales manager in Detroit for the Columbia, reports: "This has been by far the greatest year in our history. Business was thousands of dollars ahead of expectations. We easily lost $50,000 worth of business by not having the goods."

Robert Barclay, manager of the talking machine department of the J. Henry Ling store, during December had tea served every afternoon in the Japanese room by a young lady dressed in Japanese attire. The idea was very original and proved a popular drawing card.

Louis McHugh, for eight years with the Cable Piano Co. talking machine department, has resigned to take charge of the new Columbia Grafonola department recently installed by the Elliott-Taylor-Woolfenden Co.

Goldberg's new talking machine store at 167 Gratiot avenue is without question one of the finest in the State. It is unusually fine when you consider that it is a half mile from the center of the city. This shop carries the largest assortment of foreign records in the State of Michigan. A formal opening is to be held some time in January.

Sidney Guest, 541 Dix avenue, is certainly enthusiastic about the talking machine business. Although in it a comparatively short time he says he can see great possibilities. He did an enormous holiday business.

M. Adler, 726 Michigan avenue, says he never saw anything like it.

Manager Bloom, of Summerfield & Hecht's talking machine department, did as big a business as any Columbia dealer. This store went after talking machine business—used professional dancers in their windows—and sales were made faster than the firm could get goods. An order in January was placed for Columbia machines that was one of the largest ever given in Detroit.

The J. L. Hudson Co. did a million-dollar business in December. Each department was asked to reach a certain figure. The talking machine department, which is managed by F. K. Andrew and which handles Victor goods exclusively, reached its required figure several days before Christmas. Manager Andrew left Sunday, December 26, for Cleveland, Philadelphia, Camden, N. J., and New York. He was gone until the following Friday morning. He visited some of the leading retailers and jobbers and also the Victor factory, where he went through the various mechanical departments. He came back more enthusiastic and optimistic than ever. He still believes the talking machine business is only in its infancy.

The Detroit Piano Co., formerly in the Valpey Building, has moved to 73 Broadway, where it is now handling talking machines.

At the Grinnell Bros.' department managers' meeting December 31, C. A. Grinnell spoke. He emphasized the importance of giving service to the customer, of giving every customer individual attention and the Grinnell smile. He also said that 1915 was the best year in the history of the company, which included Detroit and all branches.

Frank Bayley, 11 Witherell street, said: "We sold thirty-one Edison talking machines Christmas week without one penny of advertising. It is coming better every day." Mr. Bayley, who for the past five years has been chairman of the entertainment committee of Friendship Lodge, F. & A. M., has resigned after building the membership from 300 to 1,200—a world's record. Mr. Bayley will hereafter give his entire time to business. He will move from his present location in the spring while a new building is being erected on the present site, the completion of which will probably find him back occupying a new store in the building.

On December 21 the J. L. Hudson Co. announced the receipt of over 100 mahogany Victrolas, Model XI, at $100. They sold like wildfire. All were disposed of by Christmas Eve.

The East Detroit Music House, J. E. Schmidt, proprietor, 336 Gratiot avenue, is now selling the Sonora talking machine.

Richard B. Caldwell, of the Pathé Frères Phonograph Co., was a visitor to Detroit early in December on his way East. Manager Harry Shea, of the Pathé Co. of Detroit, reports a splendid trade for 1915—better than he figured on.

With every Edison machine sold at the Wallace Brown Shop, 31 East Grand River avenue, goes "The Wallace Brown Guarantee." This is against any defect of manufacture or finish for one year; the diamond point is guaranteed for life; every Edison record is guaranteed against wear or breakage for six full months. Wallace Brown did a "whopper" business in 1915.

The official opening of the new Victrola and Edison store at 60-62 West Main street, Battle Creek, was formally held on December 10. The store is owned by the Charles E. Roat Music Co.

Max Strasburg is now running two talking machine stores—74 Library avenue and in the Scherer Building.

Boston—Oliver Ditson Co.
New York—Chas. H. Ditson & Co.

YEARS of experience in co-operating with musical instrument dealers particularly fits the House of Ditson to anticipate and fill the requirements of Victor dealers. We know musical instrument conditions and we help you in every way.

Many Victor dealers handle sheet music or musical instruments such as drums, cornets, violins, etc., and there is an advantage here in a saving of freight and express to those who send combination orders for goods of both classes.

What we desire to impress as our greatest service, however, is the vast stock of Victor goods continuously on hand, including machines, records and other supplies, and a service of this kind is not only desired, but is absolutely essential to the dealer who wants to make the most profits during the next two months.

Ditson Victor Service

COMPLIMENT FROM ALMA GLUCK.

William Knabe & Co., New York, received recently the following interesting letter from Alma Gluck, the famous opera soprano, relative to her visit to the company's Victor department:

"While in your shop selecting the pianos for my residence I had the pleasure of seeing your Victor department, upon which I wish to compliment and congratulate you. When Victor records can be played in such attractive surroundings they must be more irresistible than ever."

DO YOUR PART AND DO IT NOW. TELL YOUR CONGRESSMAN HOW YOU STAND ON THE STEVENS BILL SO THAT HE MAY KNOW YOU ARE IN BACK OF HIM. DO IT NOW!

APPOINTED ADVERTISING MANAGER.

Landay Bros., the Well-known Victor Distributers, Announce the Appointment of Herman A. Harris as Advertising Manager of Their Company—Has Had Wide Experience.

Landay Bros., New York, the well-known Victor distributers, have announced the appointment of Herman A. Harris as advertising manager of the company. Mr. Harris assumed his new duties a few weeks ago and was responsible for the splendid Christmas advertising which Landay Bros. used in the local newspapers.

H. A. Harris.

Mr. Harris is a practical advertising man in the true sense of the word, having been associated with the advertising world in various divisions. For some time he was a copy writer for the David Williams Co., New York, prominent technical and trade paper publishers, subsequent to which he was connected with the American Lithograph Co., the largest concern of its kind in the world. Before joining Landay Bros. Mr. Harris was a member of the staff of the Bates Advertising Agency, where he handled a number of important accounts.

In addition to taking care of Landay Bros.' general publicity, which has reached large proportions during the past year, Mr. Harris will co-operate with Landay dealers in the preparation of their advertising campaigns. The remarkable success which Landay's have achieved during the past few years is attributable in a large measure to the excellent advertising which they have used, and as the experience gained from this advertising is at the service of Landay dealers, there will doubtless be considerable interest aroused by the details of the 1916 wholesale campaign of Landay Bros., which will be announced later.

FOREIGN RECORD BUSINESS

Being Carefully Developed by Columbia Co.—New and Attractive Hangers Issued Each Month—Records in 13 Different Languages.

The international record department of the Columbia Graphophone Co., formerly named the foreign record department, has been achieving remarkable results the past few months, and the valuable co-operation which it has extended Columbia dealers has resulted in the steady increase of foreign record sales.

This department recently sent out to Columbia dealers a very attractive record hanger featuring the foreign records for January. It is planned to issue new hangers each month, and the designs will be different for each list. Over sixty records are being issued monthly, and it is not uncommon to have records in thirteen different languages represented in a month's selections. There is now in course of preparation a detailed plan of service which will be at the disposal of Columbia dealers during 1916 to aid them in building up this important branch of their business.

CLOSED BANNER YEAR.

"Nineteen-fifteen was the best year in our history," said Philip A. Ravis, vice-president of the New York Album & Card Co., manufacturer of Nyacco record albums. "We have greatly increased our manufacturing facilities during the past few months, and as 1916 gives every indication of being a prosperous year for all branches of the industry, we have added to the equipment of our plant so that it can handle customers' orders with even greater promptness and dispatch. One of the most pleasing features of our year's sales was the many repeat orders we received for Nyacco metal back albums, which have won praise from our dealers throughout the country."

BREAKS HOMESICK SPELL.

Hoolock Gibbon Perks Up Amazingly When He Hears His Own Jungle Talk.

There is such a thing as being too exclusive, and Hoolock Gibbon, of Borneo, found it was nearly killing him. He is the nearest thing there is to a man that isn't. Up in the Bronx Zoo, in New York, he has had a cage all to himself—like an imprisoned prince.

He doesn't talk low monkey talk, anyway. But he was getting very homesick. And the war made it impossible for Curator Ditmars to import any individual of Gibbon's own social class.

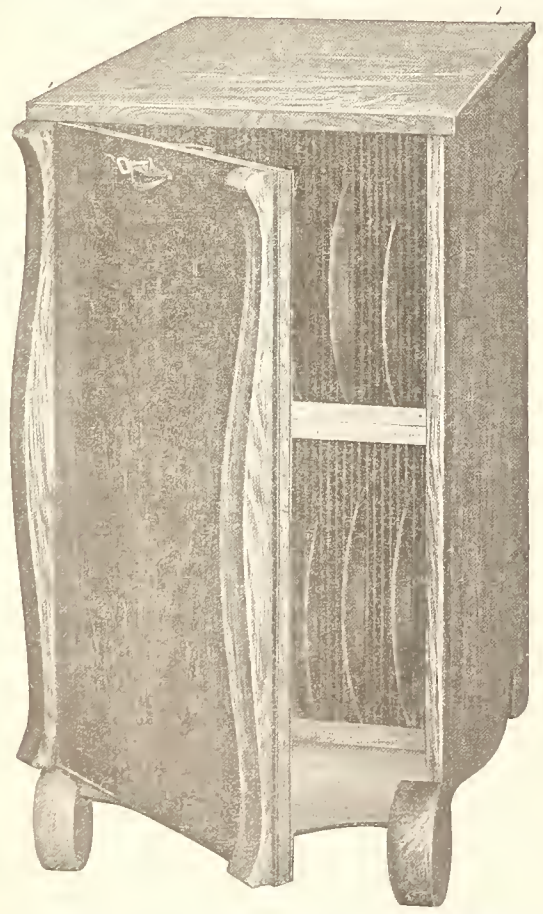
Ditmars' heart went out to the languishing Hoolock Gibbon, so he put a phonograph in his cage, and when Hoolock sang wistful jungle songs or chattered to himself, as perforce one must talk to himself or go mad, the phonograph took down every word of it.

Then the curator turned on his own stuff at him. Hoolock talked back to the machine gaily, perked up amazingly, ordered a double portion of bananas for supper, whereas his appetite has hitherto been very poor, and last night he was singing glee songs of Borneo to the little box that had in it the spirit of home.

RESPECTFULLY SUBMITTED.

Why doesn't somebody put the voice of the people on a few graphophone records?—Exchange.

Reputations will be WON and LOST in 1916



Colonial Style No. 750 Salter Cabinet.

Height, 34 ins.; Top, 21¾ x 18½ ins. Large enough to hold Victor IX, Columbia "Favorite," or any number machine. Felt-lined compartments hold 90 records. Wood Rack, 152 records.

Manufacturers and dealers will enjoy a tremendous business in 1916, but upon the service that they render and the quality of the goods that they sell will rest their business future.

We are not only preparing for a demand far greater than we have ever enjoyed before but also for an even greater degree of quality than we have yet reached. Salter Cabinets have been Quality-Built for many years and always will be.

Here are two of our styles that always sell well.

What Catalogs shall we send you?

Style 166 Salter Cabinet.

Height, 30 ins.; Top is 25 x 20 ins. Will hold any sized machine. Records can be laid on front when down. Felt-lined compartments hold 52 Records. Wood rack holds 96. Any color of mahogany or oak.

SALTER MFG. CO. JOHN F. MORTENSEN President 337-39 N. Oakley Blvd. CHICAGO

If you have not yet equipped yourself to supply Columbia Records by Ysaye, Hofmann, Casals—three of the world's leading instrumentalists—you are missing a considerable portion of your rightful income.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

PUSH THE STEVENS BILL.

National Association of Talking Machine Jobbers Makes Another Strong Appeal to the Trade in Support of the Measure.

(Special to The Talking Machine World.)

ST. LOUIS, MO., January 8.—The National Association of Talking Machine Jobbers, through its secretary, E. C. Rauth, of this city, again urges all Victor dealers and merchants generally to take off their coats and hustle for the Stevens Bill, which was reintroduced in Congress on December 14, 1915, by the Hon. William A. Ayres, of Kansas. This will be very essential if the merchants of the country are going to improve business conditions and protect themselves from the mail order houses and chain stores.

The opposition are working like beavers to defeat this measure, but if the dealers will do their share we will win out at this coming session of Congress.

If you have not already pledged your Congressman, write him again and again until you have his definite reply—either that he is for or against the bill.

The opposition are contending that the Stevens Bill will operate to create a monopoly on trademarked goods. The bill explicitly states that its provisions shall not apply to any article that is produced or controlled by a monopoly.

The following editorial from the St. Louis Post-Dispatch proves, conclusively, that the standard price would not work to the advantage of a monopoly:

"A CONGRESSIONAL AUTOMOBILE TRIP."

"An unnamed Missouri Congressman had a singular experience in driving from this State to Washington City by motor car. He left with a tankful of gasoline for which he paid 11 cents a gallon, but as he renewed his supply en route the price he was compelled to pay increased with a regularity suggesting that for every 100 miles traveled toward the East one cent a gallon is added to gasoline cost. The last stage of his journey into the capital was made on gasoline for which he had to pay 21 cents.

The "Congressman is curious to know why, in going from Missouri to the District of Columbia, the cost of running a motor car should practically be doubled, and may take means to find out. Of course, it is not explained by the transportation charges on the refined gasoline. He will discover that the principal reason is a difference in competitive conditions. In the Mississippi Valley Standard Oil has rivals it is anxious to put out of business."

TALKING MACHINE STOCK DIVIDENDS.

Announcement has been made of a new dividend of 1¾ per cent. on stock of the American Gramophone Co., which will aggregate $45,981. The American Graphophone Co. has declared a dividend of a similar per cent., the total amount to be paid to stockholders being $98,531.

The Lorimer-Hicks Phonograph Co., of Piqua, O., has completed the removal of its plant from its former location on West Ash street to Troy, O.

BANQUET OF BUFFALO ASSOCIATION.

Annual Dinner to Be Held Next Month at the Statler Hotel—Association Comes Out in Support of Stevens Bill for Fixed Prices.

(Special to The Talking Machine World.)

BUFFALO, N. Y., January 8.—The members of the Talking Machine Dealers' Association of Buffalo are now making ready to celebrate the most successful year in the association's career with the annual banquet to be held at the Hotel Statler early in February, on a date yet to be fixed, although Wednesday evening, February 2, has been suggested as the fitting time.

W. J. Bruehl, T. A. Goold and A. Biseinger form the committee in charge of the arrangements and are expected to provide some excellent entertainment. The speakers will include representatives from the headquarters of the prominent manufacturing companies.

The Talking Machine Dealers' Association of Buffalo is lined up solid in support of the pending Stevens bill for the maintenance of prices, and the members of the association have urged the legislative representatives in their various districts, in and out of the city, to support the measure. Several prominent legislators have already agreed to give their support.

Articles of incorporation have been filed for the Fremont Manufacturing Co. by E. M. Titus, F. S. Gannon, Jr., and W. H. Seibert, of 2 Rector street, this city. The new concern is capitalized at $200,000, and will manufacture talking machines.

EDISON TONE TEST IN INDIANAPOLIS.

Over 1,000 People Expected to Witness Edison Diamond Disc Demonstration in That City—Elizabeth Spencer Will Be Star Feature.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., January 8.—With 800 acceptances already received, the Edison Shop is expecting to entertain more than 1,000 persons at a demonstration of the Edison Diamond Disc phonograph which will be given in the Riley Room of the Claypool Hotel Monday night. As in similar demonstrations which have been given the Edison machine in other cities, Elizabeth Spencer, the soprano, will feature the concert by the tone test demonstration.

This invitational concert is only another feature which has brought so much favorable attention to the Edison Shop, which is owned by the Kipp-Link Phonograph Co., distributers of the Edison machine.

The Edison Shop has been giving concerts in its concert hall which have been well attended. This week the records of Christine Miller were featured. Arch Olds, manager of the Edison Shop, reports that the public has displayed great interest in the matinee concerts.

Christman Sons, who recently opened new warerooms at 753 Sixth avenue, New York, have arranged to handle the Edison Diamond Disc line, and a number of sound-proof demonstration rooms are now being constructed to properly present this high-class line. Newspaper advertising will feature the Edison Diamond Disc phonograph.

The Majority of

Cabinet Machine Makers

have found from actual experience that the most economical and convenient packing cases for them to use are the famous

ATLAS 3-PLY VENEER PACKING CASES

Over seventy-five per cent. of the cabinet machines made are packed in these northern hard-wood veneer cases with clear spruce cleats. There must be a good reason—the fact is there are many excellent reasons.

We will gladly furnish convincing facts concerning the superiority of Atlas cases. Write today—only a card is necessary.

NELSON & HALL COMPANY
MONTGOMERY CENTRE VERMONT
New factory at Camden, New Jersey

THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., January 8.—The Philadelphia talking machine trade closed the biggest holiday business it ever experienced. Many firms doubled their business of last year, and all the firms were limited to the amount of goods they were able to receive, and this was in no way nearly equal to the demand. One thing which the dealers as a whole express is the patience of their customers in recognizing conditions, the dealers willing to share with the jobbers and the public willing to patiently wait, and it is this consideration that has made trade active ever since Christmas. The factories shipped goods to the local dealers at the eleventh hour. This was rather a hardship, for it kept firms unable to keep their promises, but they did the best they could and worked until a late hour Christmas Eve to get out the machines that came to their stores late on the afternoon of the 24th.

C. J. Heppe & Son tell me that the Victor Co. delivered to them about ninety machines on December 24 at 5 o'clock in the afternoon, but they put every one to work, and before the store closed the day before Christmas every machine was delivered. Many other firms received large stocks at the same time, but some of them were not able to get them out Christmas Eve, and the delivery wagons were compelled to work Christmas Day.

This was undoubtedly the banner Christmas, and probably it will never be possible again to duplicate it. With records the conditions were not as bad, for the firms had laid in big stocks and the factories seemed to have this part of their business in better command.

Louis Buehn & Co. reported that their business was "overpowering" in December. In fact, their business for the entire year was greatly in excess of any previous year. They say that although they were unable to receive a sufficient number of machines during December to fill all their orders from the dealers complete they received practically no cancelations, which was most gratifying to them. On the other hand, there is still a large shortage in machines and they believe that this condition will continue for some time to come.

The Edison dictating machine had a very heavy business in Philadelphia in December, and while they supplied this machine to a great many firms the month brought them many orders and prospects for the new year after the firms began readjusting things. Among some of the leading firms supplied with the Edison in December were the United States Navy, seventeen to the Franklin D'Olier Co.; a number of machines to the Frank H. Stewart Co.; to Eugene McGuckin; to Arthur Thomas; seven machines to D. L. Ward, the paper firm; a large number to the True Shape Hosiery Co., the Philadelphia Dye Works and many other prominent firms.

N. C. Durand, vice-president of Thomas A. Edison, Inc., division of the Edison dictating machines, was a Philadelphia visitor the past week. January has already started in brisk, the firm having sold forty-three machines the first week.

The Penn Phonograph Co. reports that its December business was very big, and in spite of this the company was unable nearly to meet the wants of its dealers and the public. The heavy shipment that came to it the afternoon before Christmas day was sent to near-by stores, thus helping out these firms, which had been driven almost to despair. The company's Christmas business was very much better than any previous year. It is expecting a very large record business for the next few months and is placing orders accordingly. It has every facility for handling a tremendous stock of records and is going to lay in a very large supply.

Louis Buehn & Co. are at work removing their shipping and packing department from the basement of their warerooms to the first floor.

Walter Eckhart, manager of the Pennsylvania Talking Machine Co., went to New York at the end of last week to see what arrangements could be made to get more stock in Philadelphia. Mr. Eckhart was almost as bad off this year with the Columbia as were other firms with the Victor, not being able to get nearly enough machines to supply his trade. He has built up a tremendous business in this territory, and unless he is able to get more goods it will be useless for him to attempt to hold it. The company had a remarkable business in December. It was greatly ahead of 1914, and in spite of that seemed most discouraging in the amount of business that was lost through inability to get goods. Mr. Eckhart states that when he says that the company had an increase of 100 per cent. the past December it means a whole lot, for its December of 1914 was very big. It finds one gratification in the fact that its dealers have been most considerate in their attitude in view of the existing conditions, and seem to be willing to make the best of the situation, which is prompted no doubt by their recognition of the equitable way in which the company made distribution of the goods it had on hand.

Mr. Eckhart takes a rather cautious view of the future when he says: "We do not dare let our men get on the firing line until we are assured of more product. The question of business is a small matter. Our shortage has been in everything; not only in machines but in records, even down to catalogs. We are very grateful that, under the conditions, we have been able to hold the good will of our accounts. It seems that of late all the

BALDWIN LOCOMOTIVE is now quoted at about 118. What was it a few months ago?

Is there any difference between buying an advancing stock and selling VICTOR goods? You must buy them—somewhere. Selling Victor records during January and February to all the machine sales in December offers an opportunity of unusual profits.

Records cannot be sold, except in few instances, unless the customer hears the selection. You cannot take "advance" orders; you cannot describe "how good" any number is; you cannot do anything but actually DEMONSTRATE the record.

RECORD orders are filled as complete as factory deliveries to us permit. Send your record orders to us and orders for the different types of Victor machines. Orders for repair parts and accessories are filled promptly and correctly.

Test us with any size of order — small or large — so you can see that Buehn Victor Service means a co-operation that is modern in every characteristic.

We will guarantee a larger percentage than any other jobber.

Get the records from Buehn. Buehn Service provides all records when you want them. It is clean-cut, compact service, with the aim of YOUR satisfaction foremost.

Safe to say that you can make up a list of a thousand (1,000) or more records, and you can GET them as fast as hands can pick them from the racks.

Buehn Service is intelligent, efficient, complete and trustworthy.

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

TRADE NEWS FROM PHILADELPHIA.

(*Continued from page 28.*)

machines we were able to keep in stock here were just sufficient for demonstration purposes."

The Columbia Dictaphone business in December was also very large, and the management is highly gratified that it was able to gets its 100 per cent. increase over the corresponding month of the previous year, for such a thing is naturally becoming harder all the time. With the addition of two more salesman to the city force, the company believes it is in fine shape for 1916.

Blake & Burkart, the big handlers here of the Edison, enjoyed a tremendous holiday business, and enter the new year with most encouraging prospects. This firm has fought hard, and its own energy has been the reason for its gratifying success. They are about to occupy the whole of the first floor of their present building, which will double their floor space and give them a fine concert hall. They expect to do considerable campaign work in this line during the next two months, for they believe it is the only way for them to get in direct contact with the people. All of the Philadelphia Edison dealers seem to have done a very satisfactory Christmas business.

The Philadelphia talking machine dealers to a man deeply deplore the death of the editor of The Talking Machine World, for they believe that through his enterprise in their behalf very much good has been accomplished. Mr. Eckhart tells me he was very much shocked when he heard the sad news, for he counted Mr. Bill one of his warmest friends, and will always remember with great pleasure their many talks on the business and the much good advice he received from the late editor—in fact, every member of the trade was greatly shocked and greatly lamented the news of his death.

Proprietor Goldberger has moved his Detroit phonograph salesroom from 236 Gratiot avenue to newer and more commodious quarters at 167 Gratiot avenue.

A WONDERFUL JOURNAL.

The twelfth and final number of the eleventh volume of The Talking Machine World reaches my desk while this column is being prepared for our Talks this week. In my opinion The Talking Machine World is the most wonderful journal of its kind in existence. It has a field all its own and any competitor attempting to enter the field might as well prepare an advance obituary of itself. The World, aside from being the pioneer in the field of the talking machine industry, has done more than any other power in bringing manufacturer and dealer together. It is in this journal that all of the manufacturers of talking machines, records, supplies and everything entering into the making of talking machines, are brought into touch with dealers over the entire world where the talking machine is known or sold. It is a magazine that keeps the live dealer fully posted on all that is new in the industry and is a magazine that does not hesitate to recommend or condemn a product with all the vigor at its command. The World is a wonderful journal at a dollar a year. It's worth a dollar a single number to any dealer. Of the hundreds of journals and magazines reaching this office within the course of the month there is one valued above all the rest, and that is The Talking Machine World. I congratulate the publishers of The World, and will look forward with interest to the succeeding number of the twelfth volume.—R. E. Cord, in the Camden Daily Courier, December 22, 1916.

ANNOUNCES SUCCESS WITH HIS LINE.

(Special to The Talking Machine World.)

St. Louis, Mo., January 10.—J. P. Fitzgerald, sales manager of the Artophone Co., 454 North Boyle avenue, announces that his company is achieving a success with the Artophone that has exceeded his fondest hopes. The holiday sales of the Artophone were so great as to make the most strenuous demands upon the factory output. The Artophone is equipped with all the standard features, and in addition is said to possess an unusually large sound-developing chamber, with a resultant round and mellow tone. The machine stands 45½ inches high, is 24½ inches deep and 18½ inches wide. The Artophone is made in any finish.

The East Detroit Music House, 336 Gratiot avenue, Detroit, has secured the local agency for the Sonora phonograph.

Frank Schultz, who has opened a new piano store at 5354 Seventh avenue, Brooklyn, N. Y., is also handling talking machines.

LONDON COLUMBIA MANAGER HERE.

Louis Sterling, on Visit to Headquarters, Declares That Past Year Was Record One for Company in Great Britain—Prosperity of Working Classes, Due to War, Having Effect.

"Nineteen hundred and fifteen was the best year in the history of the Great Britain division of the Columbia Graphophone Co.," said Louis Sterling, general manager of the European interests of the company, who arrived Sunday on the "Adriatic," accompanied by Arthur H. Brooks, head of the English recording department. "We not only closed the best year in point of sales volume, but also the best in profits, the entire twelve months' business being satisfactory in every respect.

"This gratifying prosperity, notwithstanding the

Louis Sterling.

European war, may be attributed to a number of causes, chief of which is the fact that the working classes of Great Britain are earning more money at the present time than they ever earned before, and what is more important, are spending it freely. Less money is being spent for beverages and similar forms of 'amusement' and more money is being spent on the brightening of the home. The workingmen are buying better furniture for their homes, together with talking machines and pianos to furnish musical entertainment for their families.

"It should also be considered that the Great Britain people as a whole are in no mood to enjoy visits to theatres and other public places. They have loved ones at the front who are ever foremost in their minds, and they prefer to spend their spare time in their own homes. As they are all working harder than ever before, they need some form of amusement, and turn to the talking machine as best suited to entertain the whole family.

"It is interesting to note that the average machine sale in 1915 was 30 to 40 per cent. higher in price than the average sale of the past three or four years. The people recognize the advisability of owning a talking machine at the present time, and realize that they may as well purchase a good one which will give them perfect satisfaction. The present duty of 35 per cent. levied by the English Government on talking machine imports has also decreased the sale of the so-called cheap machines, as this duty makes a material difference in machine prices. As we all know, freight schedules from this country to England have jumped 100 to 300 per cent., all of which contributes to the increased price of machines.

"Record sales in 1915 were enormous and were practically double those of any preceding year. Our entire business showed a very large gain over 1914, our previous banner year, and we have every reason to expect a similar condition this coming year.

"General conditions in England are excellent, contrary to the reports in some of the American newspapers. There is a job for every man in England who wants work, and there is also employment for those women who may desire it. There has been a slight increase in the prices of foodstuffs, which was expected, but even this has been immaterial. There has been no increase in rents, or any general advancement in clothing prices. As a matter of fact, the English workingmen are approaching the American standard of living more closely than at any time in the past.

"The conscription question has not exercised the slightest influence on English business activities, and instead of the nation being divided, as some reports may lead the American people to imagine, there is a general feeling that the conscription measure will place every man on the same basis as his neighbor, and that is exactly what the English people desire."

EDISON TO BE GUEST OF HONOR.

President Wilson Also Invited to Ohio Society's Dinner.

Thomas A. Edison will be the guest of honor at the dinner of the Ohio Society of New York in the Waldorf-Astoria Saturday evening, January 15. "Preparedness for Defence" has been selected as the topic, and will be discussed by speakers of national reputation, including Henry D. Estabrook, the Rev. S. Parkes Cadman and Martin W. Littleton. President Wilson has been invited.

An unusually large number of prominent men will be present and join the Ohioans in New York and from Ohio in honoring Mr. Edison, who is a native of that State.

DEPLORE PASSING OF COLONEL BILL.

Talking Machine Men of Twin Cities Looked Upon Late Editor of The World as Friend of the Industry—Some Expressions of Regret.

(Special to The Talking Machine World.)

ST. PAUL AND MINNEAPOLIS, MINN., January 8.—Announcement of the death of Edward Lyman Bill was received with surprise and genuine sorrow by the piano men and the talking machine dealers of Minneapolis and St. Paul. A brief Associated Press notice was all that the local papers carried, but to the men who knew him this was sufficient, for they carried in their memories all the eluogies that could be said.

Robert O. Foster, of Foster & Waldo, held a high opinion of Mr. Bill as a writer and publisher, and often spoke of him as the head of the piano trade writers. Eugene F. O'Neill, of the Beckwith-O'Neill Co., had known Mr. Bill for many years, as had Laurence Lucker, president of the Minnesota Phonograph Co. Archie Matheis had many pleasant recollections of the dead author from various conventions.

W. J. Dyer, the leading music dealer of the Northwest, had many pleasant recollections of and commended always Mr. Bill's stand for clean advertising.

Even the dealers who had not counted Mr. Bill as a personal friend knew of him by repute and deplored his passing as a distinct loss to the trade.

ADDITION TO VICTOR PLANT.

Ballinger & Perrot are preparing plans for a four-story addition, 274 by 91 feet, and a six-story addition, 76 by 233 feet, that will be erected at Front and Market streets, Camden, for the Victor Talking Machine Co.

The Superba Phonograph Co., of Chicago, has been incorporated with a capital of $1,000 by A. A. Olsen, B. G. Richards and H. G. Bull.

THE TRADE IN NEW YORK CITY AND VICINITY

After closing the best December in the history of the talking machine trade the local dealers started the month of January with the natural assumption that a breathing spell would be in order, and that they would have an opportunity to recover from the strain caused by the remarkable activity of the past few months. Such has not been the case, however, as the great majority of the local distributers and dealers are at the present time almost quite as rushed as they were in the holiday season. As a matter of fact, January, 1916, is proving to be every bit as good as the Decembers of only a few years back, and this healthy condition gives every indication of continuing for some time to come.

Shortage More Acute.

There is only one topic of discussion in the local trade just now, and that is the tremendous shortage of stock which has kept up unabated for the past six months. The scarcity of machines is almost a matter of alarm, as it is now almost impossible to get certain types of machines when they are needed. A fair idea of the extent of this machine shortage may be gleaned from the comments of one leading distributer, who remarked the other day that his company had on file unfilled orders for over 8,000 machines, with very little prospect of catching up with these orders for many months to come.

The record situation is somewhat better, but as January is recognized as one of the biggest record months of the year, it is quite likely that the comparatively slight shortage which exists at the present time will become more acute by the end of the month. Those dealers who had the foresight to place their record orders well in advance have very little complaint to make regarding shipments, but that percentage of the trade which waited until the last moment to give the distributers their record requirements are sorely in need of many of the standard and popular selections.

Efficiency Department Producing Results.

"Nineteen hundred and sixteen has opened up with unusual activity," said R. W. Morey, general manager of the New York Talking Machine Co., Victor distributer. "We have been short of merchandise for many months and as far as machines are concerned January has seen absolutely no diminution of the remarkable Victrola trade of the past year. The record situation is showing the effects of the tremendous record demand which always occurs in January, but the New York Talking Machine Co. placed large orders many months ahead and had an actual stock of 400,000 standard records, which it has carried since last summer to meet the demands of the dealers at this time. There has been absolutely no lull in the business with the passing of the Christmas holidays, and the demand is equally as great at the present time as it was in the fall. Our dealers are becoming better acquainted with our efficiency department, and the results already achieved have proven to many dealers through their increased record sales what a valuable asset this efficiency department really is in developing profitable trade. Quite a number of our dealers have visited our offices the past few weeks to confer with Mr. Moody and his assistants regarding 1916 efficiency plans."

Closed Banner Year.

R. F. Bolton, district manager of the Columbia Graphophone Co., referring to conditions said: "We closed December with the biggest sales of any single month in the history of this division and finished up the year the same way, the total figures showing a very large gain over any preceding year. January has started off with so many orders on hand that there is no question about the month's sales totals being far ahead of 1915. As an indication of the Columbia dealers' confidence in the future it is interesting to note that we have received a larger number of advance orders for delivery in spring months than ever before. In some cases the dealers are planning to place orders within the next thirty days for delivery in July and August in anticipation of their fall requirements. One of the gratifying features of our 1915 business was the high standard of the new representation which the Columbia product secured during the year. We closed deals with live-wire, energetic dealers whose enthusiasm is reflected in the handsome Columbia departments which they have opened. Our sales of electric Grafonolas are steadily increasing, and the general advertising which is being carried on in behalf of these machines is producing excellent results."

Will Inaugurate Series of Recitals.

The Phonograph Corp., of Manhattan, which conducts the Edison Shop, 473 Fifth avenue, is planning to start a series of recitals the end of the month which will embody several distinctive features. A number of prominent artists recording for the Edison Diamond Disc library will be heard at these concerts, which will probably be generally similar to the successful series of recitals held last season. Commenting upon the retail sales the past month Raymond Duncan, of the Edison Shop, stated that Christmas business had exceeded all expectations, and had even run ahead of December, 1914, which had been a phenomenal month. The new Edison Diamond Disc phonograph designed after the Chippendale period and retailing at $250 is meeting with marked favor and is one of the leading sellers in the Diamond Disc line.

Using All Available Sales Space.

The activity at the Pathé Shop, 487 Fifth avenue, may be gleaned from the fact that the management has not yet been able to spare the time or the space to restore the recital hall to its former appearance and uses. In the midst of the holiday rush the recital hall was transformed into an

NEW YORK TALKING MACHINE COMPANY

119 WEST FORTIETH STREET
NEW YORK CITY

THE TRADE IN NEW YORK CITY.

(*Continued from page 32.*)

auxiliary salesroom, and it was expected that after Christmas there would be a sufficient lull to permit of its return to its original purposes. This month's business has provided an agreeable surprise, however, and there has been such a steady demand for Pathephones and Pathé discs that every inch of floor space has been utilized for demonstration and sales purposes. The $200 Pathephone is the popular model of the line, the Pathé Shop finding it well-nigh impossible to keep an adequate stock of these instruments on hand.

Arousing Favorable Interest.

The extensive advertising campaign which the Aeolian Co. has been carrying on in the daily newspapers the past year to present the Aeolian-Vocalion has certainly created keen interest among music lovers regarding this new type of phonograph. Notwithstanding the fact that the Aeolian Co. has placed at the disposal of its Aeolian-Vocalion patrons unlimited display and salesrooms the favorable reception accorded this instrument by the local trade reached such proportions during the holiday season that many patrons were unable to have personal demonstrations of the particular type they wished to purchase, but bought their instruments on the strength of a general demonstration. The Vocalion sales force at Aeolian Hall was greatly enlarged and strengthened for the holiday trade, but even with its new members fell far short of the necessary requirements. The unusual success of the Aeolian-Vocalion in the short while it has been on the market is indeed a tribute to the prestige and methods of the Aeolian Co.

Appropriate Holiday Remembrance.

"The Spirit of the Season" was the title of a unique Christmas and New Year's booklet which the Blackman Talking Machine Co., Victor distributer, sent out to its dealers and friends, accompanied by a handsome leather wallet and card case. The booklet expressed the company's appreciation for the business which its dealers had entrusted to it in 1915, which incidentally was the banner year in the successful career of the Blackman Talking Machine Co.

Piano Houses Feature Graphophones.

The Columbia line, in addition to being well represented in local territory by exclusive talking machine dealers, department stores and furniture houses, is handled by a representative number of high-grade piano houses which are giving the Columbia product active exploitation. Among those piano stores which have closed an excellent Columbia buiness the past year are the following: Aeolian Co., Hardman, Peck & Co., Otto Wissner, O. W. Wuertz, Weser Bros. and others, in all sections of Greater New York.

Publicity Sold Machines and Records.

The joint advertising campaign which was sponsored last month by the dealers handling the products of the Pathé Frères Phonograph Co., and which reached its apex Christmas week, served to inform the local public in a convincing way of the popularity of this line in New York and the adjacent cities. As an example of the profitable results achieved by this publicity Jacob Doll & Sons reported a shortage of all types of Pathephones and Pathé discs in their New York, Brooklyn and Jersey City stores for two weeks preceding Christmas. This healthy condition has continued without interruption, and the Doll stores are enthusiastic boomers of the sales possibilities of the Pathé line.

UDELL DISPLAY AT GRAND RAPIDS.

Showing Full Line at the Klingman Furniture Exhibition Building, with Tom Griffith in Charge of the Complete Display.

For the next two or three weeks Tom Griffith, sales manager of the Udell Works, Indianapolis, Ind., is to be at the display space of Udell furniture at the Klingman Furniture Exhibition Building, Grand Rapids, Mich. The Udell Works is one of the factors of the furniture industry of Grand Rapids, dealers coming from distances as far away as several hundred miles to see the cabinets made by the house.

WM. F. NYE, New Bedford, Mass.

GOES WITH SONORA CORP.

L. S. McCormick, well known in both the wholesale and retail divisions of the talking machine trade, has joined the staff of the Sonora Phonograph Corp., New York, in an important executive capacity. Mr. McCormick was previously manager of the Pathé Shop, 487 Fifth avenue, New York, from which position he resigned last Saturday.

Eight thousand five hundred turkeys and 17,000 quarts of cranberries were distributed among its employes on Christmas Eve by the Victor Talking Machine Co.

A single shipment of fourteen carloads of talking machines left Camden, N. J., recently over the Reading Railway for Western points.

ANNOUNCING THE ARTOPHONE

Here are good and sufficient reasons why YOU should include the ARTOPHONE as one of your standard sellers

¶ Tone arm of universal type, perfectly balanced. Has special adjustment screw to keep soundbox in perfect center, which does not destroy records through imperfect centering of needles.

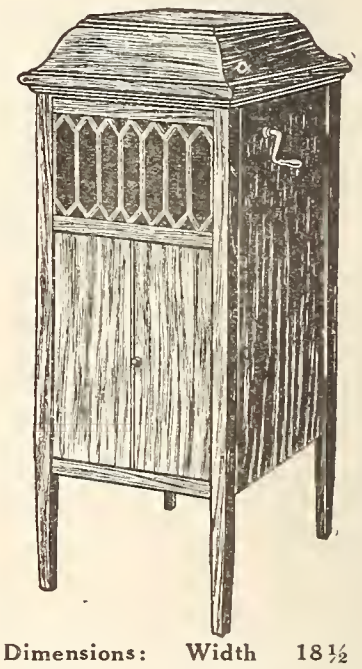
¶ Plays ALL makes of records without any extra attachment and if desired, without change of needle (we furnish jeweled point needles). The Artophone will also play records of ball jeweled point character.

¶ The ARTOPHONE has 7,200 cubic inches of tone developing space, against 4,450 cubic inches in instruments of competitive type, at the same wholesale price. Consequence, a rich, clear volume of tone.

¶ Motor especially constructed, fully nickel-plated (can be shown as talking point), absolutely silent smooth running, double barrel spring, will run full 15 minutes at 78.

¶ The retail price is well below $100.00, the wholesale price, well! one large successful dealer, who purchased 125 ARTOPHONES during the Holiday period, wrote us, "your wholesale price fairly takes one's breath away."

¶ Write us today and by return mail will give you full details of our proposition.



Dimensions: Width 18½ inches; depth 24½ inches; height 45½ inches. Made in any finish.

THE ARTOPHONE COMPANY

DEATH OF JOSEPH H. DODIN.

Well-Known Talking Machine Man Stricken While at Work at Gimbel Bros.

Joseph H. Dodin, in charge of the Victrola department of Gimbel Bros., New York, under Manager George W. Morgan, died in the French Hospital December 29 after being stricken suddenly while at his work. Mr. Dodin had been in poor

Joseph H. Dodin.

health for some time, and the exertion of the holiday season was largely responsible for his collapse. Mr. Dodin had been connected with the talking machine business in New York for many years, and joined the Gimbel department when it was first opened. Previous to going with the Gimbel department Mr. Dodin was for five years connected with the talking machine department of Frederick Loeser & Co., Brooklyn, N. Y., and two years with Driggs & Smith, Waterbury, Conn. He had hosts of friends both among his associates and the members of the outside trade.

Mr. Dodin was thirty-five years old, and is survived by a widow and one child. His brother, Andrew H. Dodin, is connected with the New York Talking Machine Co.

SUFFERS LOSS FROM FIRE.

Carbolic Acid Plant at Spring Lake Destroyed by Fire—Defective Insulation Blamed.

(Special to The Talking Machine World.)

SILVER LAKE, N. J., January 9.—One of the buildings which formed part of the Edison chemical plant here, being used for the manufacture of carbolic acid, was destroyed by fire last evening, the loss being estimated at $5,000. Defective wiring is believed to have caused the fire. Mr. Edison was notified by telephone when the fire started, and he and Mrs. Edison motored from their Llewellyn Park residence to witness it.

When the building was plainly doomed Mr. Edi said said: "This fire won't delay us at all. I'll have that building replaced within forty-eight hours, and before I go to bed to-night I'll have plans drawn for the new machinery." The property was not incorporated and belongs solely to Mr. Edison.

PROTECT YOUR OWN INTERESTS AND URGE THE PASSAGE OF THE STEVENS BILL. DO IT NOW!

GREAT PROSPERITY IN NORTHWEST.

Heavy Demand for Talking Machines and Other Musical Goods Indicates That Money Is Plentiful and That the People Are Confident of Future—All Stocks Depleted During Holidays—Edison Tone Tests Attract Attention.

(Special to The Talking Machine World.)

ST. PAUL, AND MINNEAPOLIS, MINN., January 8.—Without comparison the closing month of 1915 was the best that the talking machine dealers of the Twin Cities have ever known, and the new year is one of joy to them, as a continuance of good trade is presaged by the general prosperity pervading the Northwest.

Just before the holidays W. J. Dyer & Bro. and the Beckwith-O'Neill Co., the two big jobbing houses, were "shot to pieces" by orders. The former had upward of fifty orders which could not be supplied. Beckwith-O'Neill's wholesale stock was a wreck, and they were at their wits' ends to piece out orders by loans from retailers.

Among the retailers of Victrolas, Foster & Waldo were almost swamped at times, and reported the biggest trade ever for December. The J. E. Frank Music Co.'s report was that the increase had been phenomenal. The Cable Piano Co.'s three stores in Minneapolis, St. Paul and Ashland reported excellent business.

The Talking Machine Co.'s store, of which Archie Matheis is manager, had a generally successful trade through and after the holidays, with Prince Lei Lani, of the "Bird of Paradise" company, as a regular feature.

More business was done by the Minnesota Phonograph Co. in December, 1915, than during the entire year 1912, according to President Laurence H. Lucker. The new $20 Edisons are proving an attraction not only in the cities, but many are being shipped into the country. William A. Lucker, who handles the Edison instruments in St. Paul, has discontinued his Victrola department and will concentrate the business on what was his major line. Most interesting events of the past month were the "tone tests" at the Auditorium in Minneapolis and the People's Church, St. Paul, by Richard Czerwonky, concertmeiser of the Minneapolis Symphony Orchestra, and Alice Verlet, the grand opera singer, accompanied by their own records. Christina Miller will duplicate their tests in February, using Edison records.

Robert Souders, the new manager for the Columbia Co. in the Northwestern territory, found himself in deep water over the holiday rush, but is emerging in good condition. The new year opened nicely, and many new accounts are being opened. The Emporium, a large department store in St. Paul, and Howard, Farwell & Co. have added the Columbia line to their talking machine departments, making an even dozen Columbia dealers in the Twin Cities.

Thomas L. Shevlin, the millionaire-lumberman and former Yale football star, whose death was a severe blow to the Northwest and to Yale athletics, was a relative of George C. Beckwith, of the Beckwith-O'Neill Co.

William Fuhri, Western manager for the Columbia Co., was a visitor in St. Paul and Minneapolis, calling on the trade generally as well as on the Columbia dealers. The company has no retail stores in the Twin cities.

Isaac Rosenstein, manager of the talking machine department of the Minneapolis Dry Goods Co., has been under the weather for some time, but has not been in any serious danger.

ACROSS CONTINENT TO MAKE RECORD

D. A. Curry, of "Camp Curry," Yosemite Valley, Cal., Makes Personal Record for Columbia.

The longest trip made to date for the purpose of making a personal record was made by D. A. Curry, proprietor of "Camp Curry," Yosemite Valley, Cal., who journeyed to New York to visit the recording laboratories of the Columbia Graphophone Co. for this purpose. Mr. Curry recorded two personal records, one a vocal song, composed by a member of the camp, "I Am Strong for Camp Curry," and an instrumental march featuring a human call and echo—one of the amusement novelties of the camp. These personal records are to be sold to camp visitors, and it is reasonable to assume that they will afford a valuable advertising medium.

POSITION WANTED.

Thoroughly competent man with nearly twenty years experience in the Talking Machine business, desires position as Manager in Wholesale and Retail business, Edison preferred. Best of references. Address Experienced, care Room 307, Marvin Bldg., San Francisco, Cal.

SWAPS.

5,000 Indestructible U-S records, both two and four minute, guaranteed new, perfect stock. Will trade for Columbia and Victor records and machines. Deninger Cycle Co., Rochester, N. Y.

YOU NEED MY SERVICES.

My age is 25, with 10 years of successful business training. My experience for the past 3½ years as business stimulator for a leading phonograph concern, manager of phonograph shop and a thorough knowledge of fitting up artistically retail shops. Thoroughly understand mechanism of all makes of talking machines. Will be open for position Jan. 24, 1916. Address 303, care The Talking Machine World, 373 Fourth Ave., New York.

SPOT CASH paid from 20 per cent. to 60 per cent. for any quantity or make of used phonographs and records. State price and make. Address Box 304, care The Talking Machine World, 373 Fourth Ave., New York.

WANTED.

Large consumer of talking machine motors open for negotiations for the delivery of considerable quantities of one and two spring motors of American manufacture. Offers must be low and accompanied if possible by illustrations. Reply to "Ready Cash," Box 305, care The Talking Machine World, 373 Fourth Ave., New York.

SALESMEN.

We have a side line for men who call on the phonograph trade. We manufacture the Huskey Record Demonstrating Rooms. Communicate with Huskey Manufacturing Company, Columbia Ave. and Howard St., Philadelphia, Pa.

MANAGER WISHES TO COMMUNICATE.

Expert Phonograph Department Manager, with executive ability, takes this means of getting in touch with retail phonograph dealers and manufacturers. Road experience. Open February 1 for high grade proposition. Address "Box 306," care The Talking Machine World, 373 Fourth Ave., New York.

Disc Talking Machines and records of any make in any quantity

If you have any cut-out or unsalable records and machines to close out or should you wish to dispose of your entire talking machine and record stock, write us for quotations.

Reliable Purchasing Co., 133 Mercer St., New York

CATERING TO THE TASTES OF THE AGED CUSTOMER.

The Star Salesman of John Jones, Inc., Proves That It Will Pay Any Dealer to Specialize in Selections Appealing Particularly to Elderly Customers, and That He Can Win Their Esteem and Permanent Patronage by So Doing—A Lesson for Every Live Dealer.

The attractive salesrooms of the Unique Talker Shop were softly aglow with shaded lamps, the day being stormy, and, despite the inclement weather, humming with after-Christmas activity.

Seated upon a leather-covered divan at one end of the reception hall, a little old lady, garbed primly in black, awaited patiently the attention of the busy clerks. Whether her general air of contentment bespoke the supposition that she was simply waiting for someone, I cannot say; but at any rate she had been there quite an hour when a young fellow with hair the color of a sunset, and with a smile like a May morning, came briskly in on his way to the office, and glimpsed her in her nest among the cushions.

"Is there anything I can do for you?" he asked in his rich baritone.

The little old lady smiled up into his face and nodded. "Yes, I would like to hear some records, but everybody is so busy that I do not seem to have much chance. I was just thinking of trying elsewhere when you came."

"I am sorry," and again that May morning smile lit up his face. "However, if you still have a little more time to spare, we will adjourn to a soundproof booth and, I am sure, hear something that you will like very much. Shall we?"

"We shall, and thank you." And she allowed herself to be escorted to a daintily appointed hearing room, and ere long was seated comfortably in an easy wicker chair in front of a De Luxe model Musicola.

"Now, with your permission, I will play a few records for you on my own responsibility, choosing the selections of which my mother is very fond, and whenever you like anything particularly well, if you will say so, I will lay it aside for you."

The first selection he played for her was "Alice, Where Art Thou?" (Ascher), tenor Ernest Pike.

"Oh, that is lovely!" she said. "I haven't heard that song for years and years. Yes, I will take it, by all means."

Then followed "Blue Danube" waltz (Strauss), American Standard Orchestra, and that, too, was laid aside.

"Annie Laurie" (Scott-Himmelreich), piano, Ferdinand Himmelreich, brought forth an exclamation of sheer delight. "How beautiful! One rarely hears that dear old melody mastered so wonderfully. I wish that also, please."

"Ave Maria" (Bach-Gounod), soprano with violin obligato, Marie Rappold and Albert Spalding, gave birth to the enthusiastic declaration: "What exquisite taste your mother has, dear boy. Let me see," she continued, glancing at the records already chosen, "that makes four, doesn't it?"

The salesman verified her statement, and awaited her further commands.

"I do not think it at all necessary for me to remain to listen further. I desire a dozen selections, so if you will be good enough to let me have eight more that your mother would like I will be very grateful."

This is the list he selected: "Medley of Southern Plantation Songs," New York Military Band; "Beautiful Isle of Somewhere" (Fearis), tenor and baritone, John Young and Frederick J. Wheeler; "Calm as the Night" (Gotze), soprano and baritone, Eliabeth Spencer and Frederick J. Wheeler; "One Sweetly Solemn Thought" (Ambrose), baritone, Thomas Chalmers; "Silent Night" (Gruber), soprano, tenor and baritone, Elizabeth Spencer, John Young and Frederick J. Wheeler; "A Dream" (Bartlett), cornet solo, Ernst Albert Couturier; "La Paloma" (Yradier), Edison Concert Band; Nocturne in E flat (Chopin), violin, Kathleen Parlow. As he returned from the stockroom with the records he had picked out for her, he asked, thinking she would not care to carry bundles, "May I send them for you?"

"No, indeed!" she replied positively; "I cannot wait that long. I want to hear them all as soon as possible, therefore I will take them with me."

He made them up into a neat parcel, which he delivered into her hands with a courtly bow.

"Please accept an old woman's thanks for your interest and courtesy," she remarked, seriously, as they parted, and the salesman thought her eyes grew a little misty as she said it. At all events, the new customer went away happy, the salesman basked in the sunshine of a duty well performed, and the house of John Jones, Inc., had a new and enthusiastic patron.

Entering the office, the salesman glanced at the mahogany desk where the great John Jones sat in state, busy at the task of signing letters, looked toward the typewriting machine, where a new operator plied her trade (the star salesman and Kitty Keys were married on New Year's Day—did you get an announcement?), and grinned. He was in a good humor, you see, for his recent interview with the little old lady had led to the creation of a new idea dealing with the art of catering to the tastes of the aged customer.

"Busy, boss?" he asked, after a few moments of deepest thought.

"Not especially so, son. What is it, another idea?"

"Uh-huh!"

"Come over and tell me about it," invited the proprietor of the Unique Talker Shop, genially extending a holly-garnished box of long, black cigars. The star salesman obeyed the summons gladly, and when his weed was properly aglow and its fragrance duly appreciated, he began:

"I had a most interesting and instructive experience a few minutes ago, and it turned out so profitably as well as pleasantly that it set me thinking. I sold a dozen records to a delightful old lady, and because I happened to know the sort of thing my mother likes best, and taking her tastes as a

guide, I made a very successful sale. I think, boss, that I will have my mother go over the catalogs and pick out the selections that appeal most to the hearts of the old folks; then we can have typewritten lists made and distributed among the clerks for reference in time of need. What do you think of my latest idea?"

"I consider it quite up to your standard, and after what you have done for me in the way of valuable ideas during the past year that means a very great deal."

"Thanks, boss; I'll have that list in a few days, and then we'll know for sure."

As the star salesman returned to his duties he gazed at a card pinned to the wall above his desk, and saluted it gravely. "Here's hoping you know what you are talking about," he said as he plunged headlong into the work that awaited him.

The card:

Another year has come along
To bring you fame and wealth;
To win them you must sing a song,
And learn to help yourself.

HOWARD TAYLOR MIDDLETON.

COURTESY OF AEOLIAN CO. PRAISED.

New York Tribune Publishes Letter Complimenting Its Treatment of Customers.

The value of courtesy in business is demonstrated by a letter concerning the manner in which patrons of the Aeolian Co. are served which appeared in the Ad-Visor column of the New York Tribune—a column devoted to investigation and consequent criticism or praise of advertising merchants in the city. The letter is as follows:

"One would think in a store where mostly the rich people patronize that an ordinary person would scarcely be noticed. On the contrary, I have found that in these stores one receives the most courteous and painstaking attention.

"My husband and I have often spoken of the treatment one receives at the Aeolian Co.'s showrooms, West Forty-second street.

"As you enter the door you are greeted with 'Good morning; what can I do for you?' On one occasion I bought about $8 worth of 75-cent records and needles, etc. I told the saleswoman what kind of music I wanted, and in helping me to select them I was really treated to a musicale, as she played many of the latest hits. I guess she played $20 worth of records, although she had no idea how much I was going to buy.

"Since we have bought our Victrola there several of my friends have bought machines there, and all have spoken of the fine treatment they received.

"I was born and raised in New York City, and I have concluded that the richer the store and its patrons, the better the poor man is treated.

"Mrs. William E. Hunt."

In commenting on the above letter, the editor of the column, Samuel Hopkins Adams, says: "Few letters thus far received by the Ad-Visor have been read and printed with more real pleasure than this little 'human document.'"

STEVENS BILL TO BE DISCUSSED.

Prominent Speakers Will Urge Passage of Bill at Mass Meeting in Madison Square Garden.

A mass meeting in favor of the Stevens Bill will be held in the auditorium at Madison Square Garden, this city, on Wednesday afternoon, January 19, at 3 o'clock. The meeting will be under the auspices of the Conference of Independent Retailers of the Metropolitan District, in conjunction with the Chemical, Drug and Food Exhibition, which will be in progress during the week of January 17-22 at the Garden. Congressmen Griffin, of Brooklyn, and Chandler and Loft, of New York, will address the meeting, as will also Dr. Paul H. Nystrom, author of "Economics in Retailing"; Edmond A. Whittier, secretary of the American Fair Trade League, and Herman Weiss, secretary of Bloomingdale Bros. After the special addresses a general discussion by a representative of each trade will follow. Talking machine dealers, and in fact every merchant interested in the passage of this bill, is invited to attend this conference in order to better understand the significance of this move towards price standardization.

TONE TESTS BRING RESULTS.

What Many Dealers Report—Broadside of Telegrams and Letters to Thos. A. Edison, Inc., Sent to the Trade—Make Interesting Book.

Thomas A. Edison, Inc., Orange, N. J., have just issued a broadside to dealers made up of telegrams, night letters and reports from Edison jobbers and dealers expressing their enthusiasm over the tone test recitals held in their cities. These tests consisted of having concert and opcratic artists stand side by side with the Edison Diamond Disc phonograph and sing in direct comparison with their re-created voices. In some instances the phonograph and the singer would sing in unison, then alternate. Then the singer would sing a second part to that on the phonograph, the artist thus actually singing a duet with herself.

Musicians, music lovers and prominent critics have attended these tone test recitals, armed with all the skepticism they could command and with their trained ears sharpened to catch the faintest deviation in tone quality or enunciation in the re-created voice. To their astonishment they say they found Edison's re-creation absolutely flawless in tone, timbre and artistry.

As evidence that these tone test recitals are producing concrete results, one dealer in a small town reported that he sold seven Diamond Discs in the two days following his recital, all directly traceable to the demonstration given at that time. Another small town dealer reported that he sold two instruments before he left the auditorium where his recital was held and four more immediately after. One happy dealer had the mayor of his city drop in right after his tone test recital and purchase a new Edison Diamond Disc phonograph.

GREETINGS
For 1916

We greet with OPTIMISM the New Year and forecast even greater prosperity for those who are alive to their opportunities. Our DEEP APPRECIATION is extended to those who have made our closing year prosperous.

Once again we say with PRIDE that the bulk of our business has come from hundreds of Dealers, and we have used every effort to safeguard their interests, avoiding neglect of the "old" while receiving and serving the "new."

OUR POLICY for 1916 will be that of FURTHER PROGRESS, using the past not only as a guide to avoid repeating mistakes and considering the best results obtained, but as a starting point for FURTHER IMPROVEMENT.

We will ask and encourage CLOSER CO-OPERATION, not only in our own organization but with everyone with whom we come in business contact. This is bound to produce GOOD RESULTS.

To ENCOURAGE the greatest confidence on the part of our trade, we will endeavor to be BROAD in our POLICY, giving every possible SUPPORT to those who deserve it consistent with good business judgment, whether it be in the extension of credit, shipment of goods or adjustment of claims.

Those Dealers who are merchants and doing their best to run their business HONESTLY will have our FULL SUPPORT, and we will in every way possible refrain from supporting, by extension of credit or otherwise, the Class of Dealer who is a menace to the business and a Bad Debt for all concerned.

No EFFORT or expense will be spared to make OUR SERVICE IDEAL in every respect. With this object in view, give us YOUR HELP by pointing out DEFECTS in our organization that we may thus introduce REMEDIES where necessary.

Yours for a Happy, Healthy and Prosperous New Year.

J. NEWCOMB BLACKMAN,
President.

"Exclusive Victor Distributors"

UNPARALLELED CHRISTMAS TRADE IN ST. LOUIS.

Business Limited Only by Amount of Machines and Records on Hand—Val Reis' Worry About Oversupply Turns to Anxiety on Account of Depleted Stock—R. H. Gordon to Start Pathephone Campaign—Vocalion, Victor and Columbia Sales Extraordinary.

(Special to The Talking Machine World.)

ST. LOUIS, MO., January 8.—Several interesting things happened in the local talking machine world during the last month, chief of which was the unparalleled Christmas trade. Its limits were practically those enforced by the manufacturers through the supply of machines. In many stores $15 models were forced to do service for the $200 sort until delivery could be made of the larger ones. In one store there were just two of the $15 pattern left in the salesrooms and no other kind.

The record business was simply amazing. Firms with six demonstration rooms did not have space for their customers the four or five days before Christmas, and finally the expedient was put into practice of demonstrating the Christmas numbers in certain booths and admitting all who wished special Christmas numbers.

Another event was the opening of the Pathé jobbing warerooms here, an event that quickly made itself apparent.

Included in this chronicle of local events might be mentioned the death of Edward Lyman Bill, editor and owner of The Talking Machine World This is included because in making the monthly calls the correspondent was greeted in each talking machine warerooms by: "I see Mr. Bill is dead Too bad, indeed. Our industry owes much to him." That was the sentiment of such men as E. C. Rauth, of the Koerber-Brenner Music Co.; Irby W. Reid, of the Columbia warerooms; Mark Silverstone, of the Silverstone Music Co., and a score of retailers, all of whom felt that they had lost a real friend.

The talking machine quarters in the new warerooms of the Field-Lippman Piano Stores have been little short of a revelation to many talking machine visitors. The six record demonstration

Vestibule of Talking Machine Department.

rooms on the main floor are so arranged that the saleswoman walks from one to the other next to the record racks. The finish all is in light oak, the plate glass partitions and sides being large and admitting much light. There is little effort toward decoration except the simple adornment that is in keeping with the rest of the store, and this, being in good taste, makes the rooms very restful to the customer. The machine display rooms on the second floor have the same quiet, rational treatment.

First Floor of New Field-Lippman Piano Store on Opening Day.

and convenience and comfort is placed above adornment. Columbia and Victor machines are sold here and the Field-Lippman folk were congratulated at Christmas time because their foresight, early in the fall, had enabled them to gather a large stock of machines for the holiday trade.

Miss Pickel, formerly with the Thiebes Piano Co., is with the record department of the Field-Lippman Piano Stores. Miss Pickel is quite famous locally for her ability to name records called for by number and also to gather those called for by name from the numbered racks without reference to the catalog.

R. H. Gordon, organizer of the Pathephone Co., jobber of the Pathé machines, is getting well settled in his warerooms on the second floor at 810 Olive street. Mr. Gordon and his stock of machines reached here just after December 1, after the Christmas rush had started, and without waiting to get things systematized or actually settled he sallied forth to pick up some of the machine trade that appeared to be crowding in on dealers. And he got a goodly share, too, for a newcomer. Now that the rush is over, Mr. Gordon is getting settled. He is well pleased with the outlook here and with the business obtained so far. In fact, he could not have handled more record business had it been offered to him, for the stock of records that he thought very ample for his first month in a new town is sadly broken. He has readily placed his line with some very reputable houses and has deals pending that he expects to close within a few days with some of the most desirable dealers in the city. Among other questions not yet settled is whether he will open a retail wareroom. He expects to be ready by February 1 to begin an active campaign throughout the Southwest for dealers, and will be glad to open up correspondence at once.

Val Reis, of the Smith-Reis Piano Co., Victor retailer, tells an amusing incident of which he is "the goat," he says. The Smith-Reis Co. until two months ago sold its records from upstairs rooms, but then moved to the first floor. While Mr. Reis was busy with the task of building the demonstration rooms and many other issues that came with the selling out of the great stock of sheet music, he practically let go of the talking machine end. He let the head of the record department make out his own orders, etc. Finally, when Mr. Reis "came back" and looked over the stock reports, as he says, "I was mad clear through. I found that we were running way into the hundreds of some numbers, and, for instance, we had 200 records of 'The Stilly Night,' by Schumann-Heink. I thought that was too many, considering the price of the record, and I told all concerned about it.

Do you want to hear Edison Records Reproduced on other Talking Machines?

THE VICSONIA REPRODUCER IS THE SOUNDBOX THAT WILL DO IT

The **VICSONIA** will reproduce every note, sound wave and minute variation as recorded on the wonderful Edison Disc records with all fullness, sweetness and accuracy of tone. Does not wear the records.

The **VICSONIA** is a revelation in reproducers, and the largest talking machine men in the country who have heard and tested it are enthusiastic over its merits.

The **VICSONIA** fits the Victrola, Grafonola, Crescent and Sonora phonographs, with special type for the Aeolian Vocalion.

Instantly and easily attached. A child can do it. No alterations necessary.

Dealers will find the **VICSONIA** a business builder.

The **VICSONIA** sells in the United States for $7.50 nickel-plated, $8.50 gold-plated, and in Canada for $10 nickel, $12 gold. Liberal discount to dealers. General agents wanted.
One demonstrating model will be forwarded to any dealer's address in the United States for $4, or in Canada $5, cash with order. Money refunded if not satisfactory.

SAN FRANCISCO 62 Post St.

"Christmas Eve I was at my desk when the young man to whom I made the remarks came in, and, saluting, said: 'Mr. Reis, I have the honor to report that I have just lost a sale of "The Stilly Night," by Schumann-Heink, because we have none in stock.'

"I apologized, and when I saw the next record stock sheet I fully realized that the stock clerk understood the value of main floor demonstration rooms better than I had in advance and that he was storing up as early as October for a time when he realized that it would be hard to get records. Our Christmas record sales were phenomenal."

Manager Hallahan, of the Vocalion department at Aeolian Hall, is wonderfully pleased with the results of his first Christmas season in the talking machine business. He came over from the piano end of the game.

"You know," he laughed, "we hardly knew when we had sales made. We would just get under good sail in the demonstration booths when the man would get up and say, 'I must be going; where is the contract?' or, 'Where can I write this check?' We played our machines to capacity audiences in our record demonstration rooms, and the machine booths were crowded for days on end.

"On the first business day of this year the telephone girl was the first on deck. She was greeted by a man who had been admitted by the porter and who was seated on a sofa near the door. He told her he wanted to talk to someone about a Vocalion, and when she began to hustle about to find a salesman he called to her, 'Never mind; I just wanted to leave this; I guess you can turn it in.' It was a check for a $300 machine that had been sent to his home for twenty-four hours' trial on the last evening of the old year. That day also I was ready to go home when a customer came in and signed a contract without making me late in getting out of the store."

At Aeolian Hall all hands are very well pleased with the impression their instrument is making following the more widespread and active canvass. They were confident to begin, because of their belief in the machine and the results of the campaign among musical people, but now they are certain that their special advantages are appreciated by everybody.

H. G. Koerber, president of the Koerber-Brenner Co., states they have just finished the largest year in their history and that the only thing to mar their satisfaction was the unprecedented shortage which prevented assisting dealers as much as desired. "The demand for Victor machines," Mr. Koerber says, "continues even after the holiday period, and it now looks as if January and February would see a record shortage along the lines of that of last year."

The Koerber-Brenner Co. has always acted on the principle that "a thing can't be good for one unless good for all," and has, therefore, played a prominent part in boosting St. Louis. It had a hand in bringing the Democratic convention, and wants to see visitors come to its city. It has been gratifying to see a constantly increasing number of Victor dealers coming to visit St. Louis, and the firm in question wants every Victor dealer to visit the city at some time in the future, and will keep open house at all times and will welcome those who may come as convention visitors.

At the Columbia warerooms C. R. Salmon, speaking for Manager Irby W. Reid, the latter being confined to his home for several days by a mild attack of the grip, said that December was the largest month in the history of the St. Louis warerooms, and it would have been larger had all of the machines of the models in demand been on hand. Mr. Salmon said that shipments en route the first of the year would clear up the Christmas deliveries, enabling the dealers to replace with proper models all of the very small machines sent until larger ones could be obtained from the factory. Because of this practice the shortage of small models became more acute at Christmas time than of the larger models. The record situation, Mr. Salmon said, was in very good shape, despite demands made on the stock that were entirely unprecedented. The Buetner Furniture Co., one of the large time payment concerns of the city, recently has taken on the Columbia machines and made a very good holiday record, despite the fact that it had had this line but a short time.

Retail Manager Coughlin said that the feature of his department was the closing of a number of sales for the Grand machine, the new price made on this model instantly closing several sales that had been hanging fire. Owing to a scarcity of electric models mostly in demand, he said, this class of machine has not had a fair trial this Christmas, but that he noted wtih considerable pleasure that those in use were giving excellent satisfaction.

Ben Phillips, the live wire of the outside sales force of the Columbia force, is receiving congratulations on his record for December, which he modestly says was his best month. He did better than one machine a day for the entire month.

Mark Silverstone, president of the Silverstone Music Co., was another grip victim early this month. Through his spokesman, Mr. Silverstone reported capacity business for the month of December, with stocks in fair shape the first of the month after. Some belated shipments of machines did much to relieve the strain.

The rapid distribution of the Edison disc machine since it came into the field is noticeable by the wide interest shown in the new record lists on their arrival and the constant stream of visitors into the store when the records are due, to hear

PENNSYLVANIA DEALERS MEET.

(Special to The Talking Machine World.)

PITTSBURGH, PA., January 11.—The regular monthly meeting of the Pennsylvania Talking Machine Dealers' Association was held last night in the store of the W. F. Frederick Piano Co., and proved to be the largest and most enthusiastic gathering of the local trade this winter. About twenty-five dealers and managers were in attendance, with President French Nestor presiding.

ELECT 1916 DIRECTORS.

American Graphophone Co.'s Stockholders Elect Directors for the Coming Year.

The annual meeting of the stockholders of the American Graphophone Co. was held Monday afternoon at the company's offices in Bridgeport, Conn. At a previous meeting of the stockholders it was decided to reduce the number of directors from seventeen to eleven, and as the present board consisted of sixteen directors the stockholders at Monday's election reduced the directorate by five, and elected the following directors for the ensuing year: Edward N. Burns, Philip T. Dodge, E. V. Murphy, C. W. Cox, Thomas R. White, Jr., F. J. Warburton, David St. John, John J. Phelps, Mortimer D. Easton, William Johnson and Beekman Winthrop. These directors will meet later to elect officers of the company for the ensuing year.

EXECUTIVE COMMITTEE TO MEET.

Governing Body of the National Association of Talking Machine Jobbers to Meet at the Hotel Knickerbocker, New York, on February 15 and 16.

J. C. Roush, chairman of the press committee of the National Association of Talking Machine Jobbers, announces that the regular winter meeting of the executive committee of that association will be held at the Hotel Knickerbocker, New York, on February 15 and 16, to take up matters of importance and interest to Victor jobbers. The special legislative committee of the association will also meet at the same time and place. Special consideration will be given to the Stevens Bill and means for insuring its passage.

During the Xmas rush this system made good. 1,002 satisfied dealers increased their sales with the only system that locates records instantly, showing their selling value, and cuts out dead ones.

DESIGN No. 75
Made in Quartered Oak and Genuine Mahogany.
Dimen., 18¾ in. wide, 20¼ in. deep, 42¼ in. high.

We manufacture a complete line of cabinets for phonographs in designs suitable for instruments retailing from $15.00 to $250.00.

We solicit inquiries from those purchasing cabinets of their own designs in quantities.

We have had a large experience in building Phonograph Cabinets and we deliver them complete and ready for installation of motor sets and in packing cases that can be used for reshipping the instruments.

We are also prepared to furnish our cabinets equipped with suitable Motors, Tone Arms and Sound Boxes, thus furnishing to our customers a complete line of phonographs tested and ready for use and with our customer's label if desired.

CENTURY CABINET COMPANY

25 West 45th Street, New York City

GREAT VICTORY FOR VICTOR TALKING MACHINE CO.

United States Circuit Court of Appeals Reverses Decision of Lower Court in Victor Co.-Macy Suit, and Recognizes Validity of Victor License Notice.

The United States Circuit Court of Appeals handed down on Tuesday a most important opinion in the case of the Victor Talking Machine Co. vs. R. H. Macy & Co., reversing the decision of the lower court, which had dismissed the Victor Co.'s amended complaint. The decision in this case, which is of the utmost importance to the entire trade and constitutes a signal victory for price maintenance, is as follows:

This cause comes here upon appeal from a decree of the District Court, Southern District of New York, dismissing the bill. Plaintiff is the manufacturer of certain talking machines and sound records, which are covered by patents which it owns. The suit is brought to restrain defendants, who conduct a department store, from selling or offering for sale, or attempting to part with the title and right of possession of any of plaintiff's patented talking machines and sound records. The theory of the bill is that defendant has some of these in its possession, having obtained such possession without the assent, direct or indirect, of complainant, and that defendant has no right to dispose of such machines and records without the consent of complainant and upon the terms which it prescribes.

Upon the filing of the original bill motion was made to dismiss it under the new Equity Rule 29, which is the equivalent of a demurrer under the old practice. Judge Augustus N. Hand granted such motion and filed an opinion 222 F. R. 524. Appeal was taken to this court; we held that even on complainant's own theory his bill failed to make certain allegations which were essential. The dismissal was therefore affirmed, but with leave to amend (225 F. R. 535). The bill was then amended by inserting these allegations. Motion was made to dismiss the amended bill and was granted by Judge Hough, who filed no opinion. although he delivered one, orally. From the order of dismissal this appeal is taken.

LACOMBE, C.J.:

This case presents the familiar one of the manufacturer of a patented article undertaking to extend its use and at the same time regulate the terms and conditions under which it shall be used. It seeks to accomplish this in part by a written contract entered into between itself and every so-called licensed dealer to whom it delivers the possession of instruments or records. This need not be recited, as in substance it is the same as a so-called "License Notice" which is attached to a conspicuous part of every machine. This notice varies only in its statement of the amount of royalty, which, of course, is different for different types of machines. The notice affixed to every instrument of the type known as Victrola XVI reads as follows:

This machine is manufactured by us under our patents hereinafter noted, and is licensed for use only for the term of the patent having the longest term to run, and only with sound records, sound boxes and needles manufactured by us; and our records and sound boxes are licensed only for use with our machines. Only the right to use the said machine is granted to Victor distributers and dealers for demonstrating purposes, with the right to the distributer to assign a like right to regularly licensed Victor dealers at the dealers' regular discount royalty, with the right to the dealers to convey the license to the public to use the said machine only when a royalty of not less than $200 shall have been paid and upon consideration that all the conditions of license shall be strictly observed. A similar right is also granted to the distributer to convey to the public the right to use this machine under the same conditions. No license to use this machine is granted to the public until the full royalty shall have been paid. This machine is not licensed for use for public entertainment for profit; for a license for such public use an extra license fee of ten per cent. (10%) of the full royalty shall be payable. Title shall remain in the Victor Talking Machine Co.; also the right to repossess the said patented goods upon the breach of any of the conditions upon the repayment by the Victor Co. to the user of the royalty paid by him, less 5 per cent. per annum of the full royalty for each year, or fraction of a year, that the user shall have had the use thereof. The Victor Co. also reserves the right for itself and its representatives to inspect, adjust and repair this machine at all reasonable times while in the possession of the user, and to instruct the user in its use, but assumes no obligation so to do. All patent rights are reserved by the licensor except those hereby granted to the licensees upon the performance of the conditions noted. Any excess use, or violation of the conditions, will be an infringement of the said patents. The patents under which this machine is manufactured and licensed for use are, among others, as follows: (here follows a long enumeration of the numbers and dates of issue of various patents) and other United States patents under which this machine or parts thereof are manufactured.

No license is granted to use this machine in any altered or changed condition, or with any parts not manufactured by this company. This machine is licensed for use only in the condition, construction and arrangement in which it is put out by us, and any use of this machine, or parts thereof, in any other or altered construction or arrangement will be construed as a violation of this license. This machine is licensed for use only with needles supplied by the Victor Co.; needles will be supplied by the Victor Co., direct to any licensee of any of its patented machines at wholesale price, upon written request.

This license is good only so long as this label remains on this machine; any erasure, alteration or removal of this label, or of any of the company's labels, or marks attached to this machine, will be construed as a violation of this license. This machine, at the expiration of the patent having the longest term to run, under which it is licensed, shall become the property of the licensee (the machine being then free of the patents, the subject-matter of the license), provided that the licensee shall have faithfully observed the conditions of license, and the Victor Co. shall not have previously taken possession of the machine as herein provided.

An acceptance of this machine is an acceptance of these conditions.

All rights revert to the undersigned in the event of violation.

VICTOR TALKING MACHINE CO., Camden, N .J.

August 1, 1913.

A somewhat similar License Notice is affixed to every sound record or its envelope.

A study of these various documents leads to the conclusion that complainant has undertaken to avoid making such a sale of its machine as would permanently pass it beyond any further control by itself. We think it has succeeded in so doing; this is not a sale outright, or a conditional or restricted sale or any sale at all.

Under the authorities the owner of a patent who manufactures machines under such patent can give the right to use to whom he pleases upon what conditions he may choose to impose. Some of those conditions may involve pecuniary return, such as royalties, rentals for fixed periods, specified lump sum compensation for the whole period. We do not see why he may not give to one person a more restricted right to use than he does to another. The Dick case 224, U. S. 1, establishes the proposition that a restriction to use only with other products of the patentee is legitimate. Of course, the giving to any person of a "right to use" things of this sort is an idle thing, unless the person is also supplied with the physical thing to be used, to hold the same while he is enjoying the use and complying with its terms.

Turning now to the License Notice.. What is granted by the patentee is "only the right to use" the particular machine, unaltered, without parts not manufactured by the Victor Co., maker and owner of the patents and only with records and needles made by the Victor Co., and to use it only so long as the notice unerased and unaltered remains on the machine. The term for which this right to use is granted is a fixed period "for the term of the patent having the longest term to run"—this term is ascertainable with precision by reference to the notice affixed to the machine which enumerates all the patents.

The character of the use is not the same in all cases.

1. To "Victor distributers" there is given a right to use only for "demonstrating."

As the sole result of demonstration is to induce the public to get the machines it may be assumed that these distributers are paid by the Victor Co.

2. To regularly licensed "Victor dealers" there is also given a right to use for "demonstrating" purposes. Sometimes conveyance of such right to use is made directly by the Victor Co. to the licensed Victor dealer. Sometimes the conveyance is made to the "dealer" by the "demonstrator," who by the terms of the notice is expressly authorized to convey such right to the dealer. These dealers, of course, do not use these machines for their personal enjoyment; their demonstrations are given to induce the public to apply for machines and they are paid by a commission on the amount paid by every person who may be induced by them to take one.

3. To the public, i.e., to individuals who wish to use the machines generally.

Apparently such conveyances are not made directly by the manufacturer; they are made by "Victor distributers" or by "licensed Victor dealers," who are expressly empowered to make such conveyances. For each one of such machines the person to whom a right to use the same is granted and a machine delivered, to be by him used, shall pay a lump sum, which varies with the type of machine.

This is called a royalty; in effect, it is a payment in advance covering use for the entire term—down to the expiration of the last patent. During such term the restrictions as to parts, integrity of notice, needles, record, etc., are in force and the manufacturer reserves title in itself. Of course, when the patents expire no such restrictions could be maintained and, therefore, when that time comes any licensee (or user) in whose hands a machine may be, and who has faithfully observed the conditions, shall receive full title to the same.

The documents are long and complicated, but it seems to us that this is what they provide for. We do not know why, under the law and the authorities, a patentee may not thus dispose temporarily of the use and ultimately of the title of a machine made by him and protected by his patent.

The order is reversed.

Fenton & Blount, Philadelphia, Pa., were the attorneys for the Victor Co., and Wise & Seeligsberg appeared for R. H. Macy & Co.

AIDING MUSICAL APPRECIATION.

How the Victrola Is Utilized in Normal Training School in Kansas City—Good Work Done by J. F. Ditzell, Manager of the George B. Peck Co. Victrola Department, Brings Results.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., January 10.—Kansas City is developing a most emphatic inclination towards musical appreciation and culture, which is nowhere more clearly shown than in the public schools. In the past few years there has been an increasing attention to musical instruction particularly observable in the introduction of pianos in practically every school, and more lately with the desire of every school to have a talking machine. These machines are usually purchased by subscription of parents of the pupils, the school board not having yet reached the point where it will supply them. But it seems likely that before long the talking machine will be recognized as quite as indispensable as the piano. The reason for this is the increased attention to the subject of musical appreciation, which can only be inculcated with such various examples of performance and subject as the talking machine provides.

The problem of the dealers, however, has been the expense of soliciting the business. Most of them have been waiting for the psychological moment to arrive, when the subject could be presented without uneconomical loss of salesmen's time.

The psychological moment seems to have arrived.

Shortly after school was resumed following the holidays, J. F. Ditzell, manager of the Victrola department of the Geo. B. Peck Dry Goods Co., received a visit from Miss Emma Serl, instructor in music at the normal training school in Kansas City. Miss Serl inquired as to the most convenient method of giving her pupils a "view" of some of the operas they had been studying. She had been using the Victor Book of the Opera, and naturally turned to a Victrola dealer for advice. Mr. Ditzell invited her to bring her class to the concert room in the store for a special session. Some thirty students, all young ladies preparing for the teaching of music in the public schools, came with Miss Serl. A program had been prepared of selections from the three operas, "Bohemian Girl," "Martha" and "Il Trovatore," that were being studied. Miss Serl lectured on each selection as it was given on the Victrola.

This is the first year that the normal school has been taking up such work; and the importance of the demonstration and service can hardly be overestimated. Not only is the training school itself thus finding the necessity as well as the advantage of the Victrola in class work, but the students are learning their duties in the light of the assistance of the machine and the records. It seems inevitable that in a very short time every school in the city must have a talking machine as a part of the regular equipment.

NEW INCORPORATION.

A. M. Warenberg, M. Freedman and A. S. Levy, of 233 Broadway, this city, have incorporated the Perma Recording Laboratories Corporation, with a capitalization of $300,000. The new concern will deal in talking machine records, pianos, players, novelties, and make master records as well.

KOERBER-BRENNER CO. PROGRESS.

Closed Great Year in 1915—Was One of Expansion for the House and Its Dealers—Big Plans for Year Just Opened Have Been Made.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., January 11.—Few firms have made a better record of advancement in the year just closed than the Koerber-Brenner Music Co., of this city. As Victor distributer it has been most solicitous of the needs of its dealers and has at all times aimed to keep them supplied not only with stock, but with such "service" pointers as would be helpful in developing their business. This co-operation has been much appreciated, and has resulted in the general expansion not only of the house of Koerber-Brenner itself, but of its dealers in the important territory which it controls. The plans for 1916 are bigger and better than for 1915, and this means much, for the Koerber-Brenner Co. is ever on the alert for every means of advancing the interests of its growing constituency. This is unquestionably the secret of its great success. An interesting announcement from the Koerber-Brenner Co. appears elsewhere in this issue of The Talking Machine World.

Arthur Figner, a nephew of Gustavo Figner, of Sao Paulo, Brazil, has connected himself with a talking machine concern in New York City.

All the music of all the world—

Columbia Records TRADE MARK Note the Notes

and most of the fun of it, too.

THE polished surface of Columbia Records is truly the mirror of music. Faithfully reflected and reproduced, it gives back a picture of an artist's rendition as true as life itself.

Just as a still pool in the forest mirrors all the colors of Nature, sparkles in the sunshine, and darkens with the passing shadow of a cloud, so Columbia Records reflect the color, vivacity, light and shade—every fleeting mood or emotion that sets each performance and rendering of a theme apart from all others past or to come.

Columbia Records, played on *any* instrument will be a genuine revelation to those who have not kept pace with recent developments; but playing Columbia Records on the Columbia Grafonola is the one way to bring out fully their tonal possibilities.

Columbia Records go on sale on the 20th of every month. Ask the dealer to place your name on his mailing list for the Columbia Monthly Supplement. Beautiful new booklet "The Columbia Grafonola" free on request. Or write direct to

ADOPTS NEW SELLING POLICY.

Fraad Talking Machine Co. to Assign Protected Territory to Agents for Its Line—Open Handsome Display and Sales Rooms.

The Fraad Talking Machine Co., which recently entered the talking machine manufacturing trade on a large scale, has, with the first of the year, introduced a new policy in the distribution of its output. The plan calls for the appointment of agents throughout the country who will be assigned territory and be protected in the business which comes from that territory.

Considerable interest has already been shown in this plan and several important territories have been assigned.

The Fraad Co. has recently arranged for some additions to its line of talking machines, which include models ranging from $15 up. One of the latest additions illustrated in the company's advertisement in another section of this paper is the Fraad Jr., a small-model cabinet machine with full-size mechanical equipment and designed to hold about sixty records. The junior model is finished either in mahogany or antique ivory as desired.

For the purpose of taking care of the local trade the Fraad Co. has opened attractive showrooms at 1160 Broadway, between Twenty-seventh and Twenty-eighth streets, in the center of the business district, where a complete stock of its various models is carried. The new showrooms are conducted by a competent staff under the personal direction of Daniel Fraad, president of the company, and both the wholesale and retail business is handled therefrom.

WISE TO ORDER PROMPTLY.

Advancing Cost of Paper May Affect Cost of Envelopes and Albums, Declares Clement Beecroft— 1915 Best Year in History.

Clement Beecroft, of Philadelphia, whose line of talking machine specialties ranges from "talker" cabinets to Bagshaw needles, reports that his business during 1915 broke all previous records in volume and quality, and that the prospects for the present year are unusually bright.

Among the specialties handled by Mr. Beecroft with particular success are the Wolf Bros. record envelopes for deliveries, stock and supplements, and the Perfection record holders for cabinet filing purposes. In view of the fact that there is a steady increase in the cost of paper, Mr. Beecroft emphasizes the point that it will pay jobbers and dealers to anticipate their wants in that particular line and order quantities early. By that means present prices and prompt deliveries are assured.

The Clinical Film Co. has been granted a certificate of incorporation by the Secretary of State, Albany, N. Y., to engage in the manufacture of a number of articles, including phonographs, records and supplies. The capital is $500,000.

WE WILL PAY CASH

CHRISTMAS DISPLAY BRINGS TRADE.

Yule-Tide Sentiment and Good Salesmanship Blended in Window Display of Victor Goods by Gately-Haire Co., Albany, N. Y.

Many of the big stores spend thousands of dollars monthly in an effort to take proper advantage of their window displays. Artisticness of window displays as well as salability of the merchandise both tend to dispose of the goods so presented to the public. Considerable attention is directed to window work by the talking machine dealers, and the accompanying example is a photograph of the window of the Gately-Haire Co., Inc., 108 State street, Albany, N. Y. The background was that

Holiday Exhibit of Gately-Haire Co.

of a beautiful painting of the "Wise Men of the East" following the Star of the East, and the unusualness of the display created a great deal of favorable comment.

John L. Gately, president, stated that he can trace many dollars' worth of actual business which came as a response from people seeing the window, and he is of the belief that windows of all dealers should be utilized not only from the window display standpoint but from the salesmanship viewpoint.

A WRITING TALKING MACHINE!

Novel Combination of Edison Phonograph and Telautograph Attracts Crowds in Kansas City—Clever Idea of Manager M. Blackman.

(Special to The Talking Machine World.)

KANSAS CITY, MO., January 2.—Manager M. Blackman, of the Kansas City Edison Shop, headquarters for the Diamond Disc machine, devised a novel window attraction for the recent holiday crowds. He secured a telautograph and mounted it on an Edison phonograph, the wires running down into the body of the machine and through the window-floor out of sight. An operator, hidden from view, watched the crowds passing and wrote pertinent messages to them on the machine, so that a man with a brilliant necktie or a lady shopper with her arms full of bundles would stop in front of the window and suddenly see a message addressed to them personally appear on the roll of paper in the machine. So completely was the illusion carried out that some spectators seemed to have the idea that the machine was actually a part of a new talking machine that could transcribe whatever was on a record! While this idea may seem fantastic, still it is not without the range of possibility that some day a machine may be perfected which will put into written or printed notes whatever may be spoken into it.

DO IT NOW! YOUR INTERESTS ARE VITAL IN SEEING THAT THE STEVENS BILL PASSES THE NEXT CONGRESS. IT MEANS THAT YOUR STOCK WILL BE NON-DEPRECIABLE, BUT IF THE CUT-RATERS WIN, THEN LOOK OUT.

COMBINE PLAYER AND PHONOGRAPH.

Details of the Latest Patent of Edwin S. Votey Which He Has Assigned to the Aeolian Co. of New York—Covers Many Features.

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 8.—The Aeolian Co., New York, is the owner through assignment by Edwin S. Votey, Summit, N. J., of patent No. 1,165,470, for a combined musical instrument, such for example as a piano or player-piano, and a mechanism for the reproduction of the human voice or sounds, as for instance a phonograph or graphophone.

One object of the invention is to provide for a compact and convenient arrangement of a mechanism for the reproduction of the numan voice or sounds, within the casing of the piano where access to said mechanism may be had with facility and convenience for the purpose of adjusting said mechanism when desired, and for changing the records thereof.

A further object of the invention is to combine the two instruments in such a manner that the sounds of said instruments may be properly mingled for the purpose of producing harmonious effects, and to this end the piano is provided with a sound-blending chamber in rear of the sounding board into which chamber the sounds from the human voice reproducing mechanism are conveyed, and from which chamber they are discharged through an opening formed in a wall of the piano casing.

ELECTED VICE-PRESIDENT.

At the annual meeting of the stockholders and directors of the Musical Instrument Sales Co., held on Monday, C. R. Wagner was elected a vice-president of the company. Mr. Wagner has been associated with the company for several years, having achieved signal success as head of its Victor business.

There are no other changes in the officers and directorate of the company, Mr. Wagner being elected to a new position and the present officers continuing for the ensuing year. C. A. Wagner is president of the company.

VICTOR TUNGS-TONE STYLUS.

Important Discovery Announced by the Victor Talking Machine Co. of a New Needle Which Has Remarkable Qualities.

"Victor Tungs-tone Stylus" is the name of an important discovery just announced by the Victor Talking Machine Co., Camden, N. J., this being an improved, semi-permanent, changeable reproducing stylus of tungsten combining all the desirable features of the Victor system of changeable needles with the added advantage of playing fifty to 200 records without changing, and which is referred to in an advertisement elsewhere.

The virtue of the Tung-stone stylus lies in a small cylinder of tungsten projecting from the end of a steel holder in which it is rigidly set. A novel feature of this stylus is that it automatically tells the machine owner when to change the needle, so to speak, for when the tiny cylinder of tungsten is worn off it will not play. In other words, you cannot play the new Victor Tungs-tone stylus in a "worn" condition.

These needles are made in two tones, full and soft, retailing at 25 cents for a box of ten, or for a package of four needles, 10 cents.

TO MAKE DEMONSTRATING ROOMS.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., January 8.—The Huskey Manufacturing Co., 1700 North Howard street, this city, maker of fixtures for drug stores, announces its intention of entering the talking machine field with the Huskey demonstrating rooms. These will be built at its factory in Philadelphia and shipped to the various dealers throughout the country.

In its experience as manufacturer of drug store equipments and fixtures it has drawn different conclusions regarding how the dealer's space should be utilized, and this experience will stand it in excellent stead in the promotion and sale of Huskey demonstrating rooms.

The A. H. Fitch Music Store, of Arkansas City, Kan., recently bought out the stock of machines and records of the Talking Machine Shop at Winfield, Kan.

Bert Woodward, formerly in charge of the Edison phonograph department of the Santa Fe Watch Co.'s store in Topeka, Kan., has accepted a connection with the Kansas City Edison Co.

The Pathé Shop has been opened on Boston avenue, Tulsa, Okla, for a display of Pathephones.

COLONEL BILL'S MEMORY HONORED

By the Chicago Piano and Organ Association, Which Passed Resolutions of Regret at His Death Signed by the Executive Committee.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 12.—At a meeting of the officers of the Chicago Piano and Organ Association the following resolutions to the memory of Edward Lyman Bill were adopted. The signatures include those of the entire executive committee of the organization:

It is with deep and sincere regret that this association learns of the death of Edward Lyman Bill, editor and publisher of The Music Trade Review and The Talking Machine World. The untimely closing of such a useful and kindly life is a sad blow, not only to his beloved family and the industries to which he devoted his great abilities, but to the community at large.

Music trade journalism and the music trade in all its branches owe much to this splendid, kindly, cultured gentleman and are the better for his having lived.

It is, therefore, deemed meet and becoming that this organization, of which he was ever the fast and firm friend, pay this tribute to his memory and that this minute be spread upon the records of the association and a copy suitably prepared be sent to the bereaved family of our late associate and comrade.

"Peace, let him rest, God knoweth best."

EDGAR C. SMITH,
PAUL B. KLUGH,
S. M. WESSELL,
ADAM SCHNEIDER,
JAMES F. BOWERS,
Committee on Resolutions, Chicago Piano and Organ Association.

January 12, 1916.

The Phonoldograph Co., of New York, recently incorporated, has a capitalization of $300,000.

BUILT UP BIG BUSINESS.

E. A. Schweiger Handles the Victor Line Exclusively in Two Stores Across the Bridge.

One of the many successful and live-wire Victor dealers in local territory who have built up their

The Schweiger Store at 1525 Broadway.

business through the use of high-grade and up-to-date methods is E. A. Schweiger, of Brooklyn, N. Y., who is shown in company with his brother in the illustration herewith.

Mr. Schweiger, who handles the Victor line exclusively, has two establishments in the borough across the bridge, one being located at 1525 Broadway and the other at 964 Grand avenue. The former store is shown in the accompanying photograph, and it is indicative of Mr. Schweiger's success with the Victor line that he now occupies the entire building at this address. The second floor is devoted exclusively to sound-proof demonstration booths, which are furnished along the most advanced ideas in store decoration.

When Mr. Schweiger first entered the Victor field he handled several lines of merchandise, such as sporting goods and kindred lines. His Victor business increased so rapidly, however, that he found it imperative to discontinue all other lines with the exception of Kodaks.

FAVOR THE STEVENS BILL.

Members of Lyon & Healy Firm, Constituting State Committee, Expect That Congress Will Pass Measure for Price Maintenance.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 10.—Secretary J. F. Bowers and L. C. Wiswell, manager of the talking machine department of Lyon & Healy, report that excellent progress is being made throughout the State in securing the co-operation of Congressmen to further the passage of the Stevens Bill, which provides for price maintenance. They are the committee of two from Illinois working in favor of this measure, and have been in close touch with the work being done by the various State committees in boosting this bill along. Mr. Bowers calls attention to the benefit of the one-price system as illustrated by the talking machine business, and points out the fact that Steinway & Sons have rigidly adhered to this system, with consequent success.

CLOSING A BIG HOLIDAY BUSINESS.

One of the enterprising talking machine men and talking machine women in the South is Mr. and

Mrs. Roy F. Ott, of Huntsville, Ala., who are pictured in the illustration herewith at the doorway of their very attractive establishment in that town. Mr. Ott has closed a very excellent holiday business with the Victor line, and looks forward to the present year being a prosperous one in every way.

NO MORE WINDING BY HAND - THE MOTROLA DOES IT FOR YOU

Simple to attach—just unscrew the winding rod and put the Motrola in its place.

Adds to the life of the talking machine by keeping the spring from being overwound.

Connected with electric current it winds automatically, insuring true tone and even time by keeping the machine from running down. Cost of operation practically nothing. It can't get out of order.

The Motrola fills a long-felt want on the part of thousands of talking machine owners. This means easy and rapid sales.

Reliable, wide-awake talking-machine dealers—who know a "live" proposition when they see it—are wanted. Are you one of these?

ALABAMA FIRM WINS FIRST PRIZE IN EDISON CONTEST.

Loveman, Joseph & Loeb, of Birmingham, Carry Off $300 Sweepstakes Prize Offered by Thomas A. Edison, Inc., for Best Window Display—Qualities of Records Uniquely Featured.

An interesting feature of Edison week, October 18 to 23, 1915, was the Edison phonograph dealers' window display contest entered into by dealers in practically every part of the United States and some parts of Canada, and which has just culminated in the awarding of the sweepstakes prize of $300 to Loveman, Joseph & Loeb, Birmingham, Ala. This prize was offered by Thomas A. Edison, Inc.

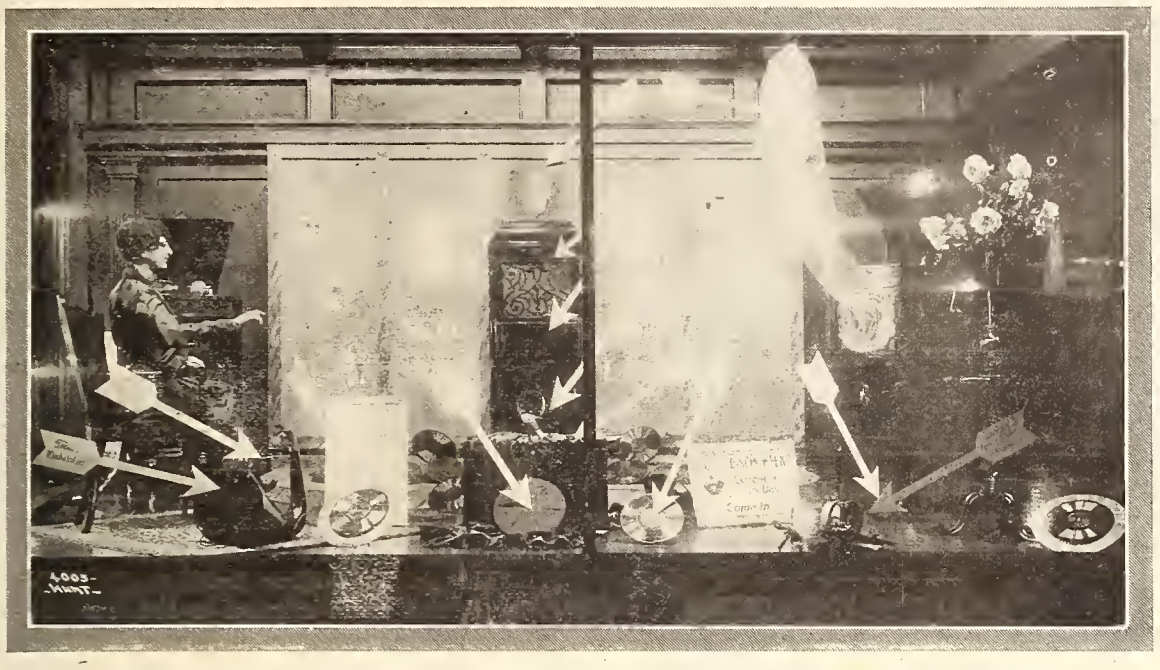
Preliminary to the awarding of the sweepstakes prize, zone prizes of $100, $50, $30 and $20 were awarded by Edison jobbers for the best four displays in their respective zones. The zone prize contest was arranged in accordance with the Edison method of distribution, which assigns to each jobber an exclusive zone, all dealers in that zone being required to order through the specified jobber.

After the winners in each zone had been decided on, the photographs of the winning displays were forwarded to the Edison laboratories at Orange, N. J., for the selection of the sweepstakes winner.

The main features of the winning display were a large panel with the wording "Real Music at Last"; a large phonograph resting with its entire weight on four records, indicating their unbreakableness; the diamond point reproducer shown through a magnifying glass and a vision of Emmy Destinn produced by draping a soft, fluffy material from the front of a phonograph up to and placed about a portrait of the famous singer.

That the decision was left to competent judges is fully indicated by the fact that the gentlemen selected are representative in their craft. They were W. A. Patterson, manager of the New York office of the Saturday Evening Post; A. C. G Hammesfahr, sales manager of advertising for Collier's, and Francis L. Wurzburg, advertising manager of the Cosmopolitan Magazine. These gentlemen met in the rooms of the Advertising Men's League in New York City and rendered their decision January 5.

A display of the photographs from all zone prize winners will be made at the Edison laboratories at Orange for the benefit of dealers at their next general meeting.



Sweepstakes Prize Winner; Edison Dealers' Window Display Contest.

INCREASES ITS FACILITIES.

The Century Cabinet Co. Prepares for a Busy Year During 1916—President Lee on the Outlook—Manufacturing Facilities Increased.

The Century Cabinet Co., 25 West Forty-fifth street, New York, manufacturer of a complete line of phonograph cabinets for the trade, has greatly increased its manufacturing facilities during the past two months in order to adequately prepare for the coming year's activities. At the present time the company's factory capacity is more than double that of 1915, although present indications point to this capacity being none too large for 1916 trade. The company will institute a new departure in its business during the coming year, as set forth in its announcement on another page of this issue of The World.

Referring to the general trade outlook, James T. Lee, president of the company, said: "We were greatly pleased with our sales totals for 1915, as we received orders from members of the trade in all parts of the country calling for good-sized orders for our complete phonograph cabinet line. The letters we have received from our patrons are most encouraging, as they speak in hearty terms of praise of the satisfaction our cabinets are giving, both from an artistic and a constructional standpoint.

VICTOR CO. INSURES EMPLOYES.

Sick and Death Benefits Provided for by New Plan—Every Employe Shares in Insurance.

(Special to The Talking Machine World.)

CAMDEN, N. J., January 10.—The spirit of co-operation and mutual understanding between employer and employe which is becoming more and more prevalent in the business world is demonstrated by an insurance plan just put into operation by the Victor Talking Machine Co. Through the generosity of the officers of the company, an insurance of $1,000 is provided for every employe of the company who has been on the payroll more than five years and who, at death, is in good standing in the Victor Employes' Beneficial Association. For employes of less than five years there is an insurance of $750. The announcement was hailed with delight by the thousands of employes of the big concern.

About three years ago when the beneficial association was established it met with the approval of the board of directors of the company. The officials named the board of directors to run the association's affairs. It was agreed that each employe who died would receive $150 from the association. The company's officials were so impressed with the idea that they decided to give from the company's treasury the additional sum of $500 to a deceased employe, making a total sum of $650. It also was decided that all employes not receiving straight pay should draw $5 weekly in case of indisposition.

Placards were placed about the plant announcing the fact that the association had decided to raise its share of the death benefits to $250 and that the company had agreed to give $750, making a total of $1,000.

PROPOSE CHANGE IN BANKRUPT LAW

Merchants' Association Asks Supreme Court to Have Liquidations Effected by Receivers.

The Merchants' Association of this city is seeking to effect an amendment to the rules governing the liquidation of bankrupt estates. William Fellowes Morgan, president of the association, has outlined the proposed plan in a letter addressed to Justice Charles E. Hughes, chairman of the rules committee of the United States Supreme Court. His suggestion is that the practice of allowing liquidation to be effected by an assignee, who is usually nominated by the bankrupt, be discontinued, and that the settlement of the bankruptcy be made by a receiver, who shall be appointed upon the application of a creditor. This plan, it is claimed, will place the assets of a bankrupt concern in the hands of one who will seek to conserve the interests of the creditors, instead of allowing an assignee to handle the matter, usually to the detriment of the creditors. The letter from President Morgan has been handed to the Chief Justice of the Supreme Court for his attention.

DAYNES-BEEBE MUSIC CO. WINS WINDOW DISPLAY PRIZE.

The advertising department of the Columbia Graphophone Co. has just received from the Daynes-Beebe Music Co., Salt Lake City, Utah, a Columbia dealer, a photograph of a show window which this company displayed during a window-dressing contest sponsored by the Salt Lake City newspapers.

The Very Artistic Display Which Won First Prize at Salt Lake City.

This window, which is shown in the accompanying illustration, was awarded first prize in the music section by the judges of the contest, who stated that the window was one of the finest which was presented to them for their inspection.

The beauty of the window lies in the fact that no single feature of the display predominates, but a happy combination of ideas is utilized in such a way as to make the window display perfect in every respect. It is interesting to note that this window was responsible for a very gratifying number of Grafonola sales.

DAMAGE IN UNPACKING.

In an interesting letter sent to Victor dealers recently W. B. Fulghum, manager of the Victor Talking Machine Co.'s order department, called attention to the advisability of the dealers carefully following the packing instructions which accompany the cabinet Victrolas. It is pointed out that in many instances dealers have damaged one of the posts of the Victrola through careless unpacking.

PATHE PHONOGRAPH JOBBERS BUSY.

In Many Cases a Shortage of Goods Is Reported, Declares R. B. Caldwell, After Recent Tour of Inspection—Pathé Discs Gaining Many Friends—Making Plans for Future.

R. B. Caldwell, of the Pathé Frères Phonograph Co., New York, returned to New York recently after a month's visit to the company's jobbers in the East and West. As this was Mr. Caldwell's first visit to the Pathé clientele, his impressions of his trip are interesting as indicative of the marked success of the Pathé products throughout the country. Mr. Caldwell is experienced in all phases of the talking machine field, having been connected with the industry for many years.

"I was greatly impressed with the fact that our jobbers in all localities were short of goods, notwithstanding the fact that they had placed large orders well in advance of the holiday season." said Mr. Caldwell in a chat with The World. "These orders had all been shipped to the jobbers' dealers in October and November, but by the first of December there was a wide shortage of Pathephones and Pathé discs. This shortage was general, the higher priced Pathephones selling equally as well, and in many localities even better, than the moderate priced models. Pathé discs have won the praise of musicians and music lovers in all sections of the country, and the new additions to our record catalog are meeting with a ready sale.

"The class of jobbers handling the Pathephone line is well worth mention, as the men representing our company are prominent industrially in their respective cities and possessed of ability and aggressiveness. These jobbers are one and all enthusiastic in their predictions for 1916, as they are confident that the next twelve months will witness a country-wide prosperity boom with a commensurate increase in popularity of Pathephones and Pathé discs, which have steadily increased in public favor since their first appearance."

THE GREAT ADVERTISING CAMPAIGN OF THE AEOLIAN CO.

In Behalf of the Aeolian-Vocalion Line, Particularly in the National Magazines, Has Brought Forth a Great Deal of Praise from the Trade and Music Loving Public.

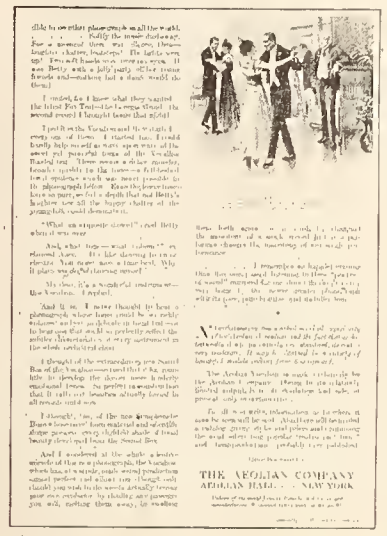
There has been considerable discussion in the local talking machine trade with reference to the splendid advertising being carried by the Aeolian Co. in the local newspapers on behalf of the Aeolian-Vocalion line. This advertising has been educational and creative and has served to impress the music-loving public with the musical merit of the Aeolian-Vocalion.

Any reference to the publicity campaign of the Aeolian Co., however, would be totally incomplete without mentioning the excellent national advertising which it is using in the high-grade magazines to help the Aeolian-Vocalion dealers achieve success with the Aeolian-Vocalion line.

These advertisements are now appearing in the leading national magazines, and it is the Aeolian Co.'s intention to continue them. The advertising is high class throughout, and as each advertisement has a particular aim or purpose it is a definite, concrete campaign without any hit-or-miss factor entering into it.

Three of the recent Aeolian-Vocalion advertisements which have appeared in the national magazines are reproduced herewith, and although the text is hardly legible the general lay-out of the advertisements, together with their headings, will give a fair idea of their true purport.

The full-page copy featuring the Aeolian Art Vocalion Style "R" is an artistic and prestige advertisement, every section of which is in harmony with the character of the instrument advertised. "In the Firelight Glow" is an advertisement in which the human interest appeal is first and foremost. This two-page spread cannot fail to both interest and attract even the casual reader, and from beginning to end there is interwoven a delightful story which leaves the reader in a contented state of mind, but with the thought of the Aeolian-Vocalion uppermost. "I Went to Buy a Phonograph" is a selling advertisement in the truest sense of the term. It is directed to appeal to the man who is contemplating the purchase of a phonograph but has not yet made up his mind as to just when and what he will purchase. It is high class in every particular and is certain to be of assistance to the dealer in interesting his clientele in the many qualities of the Aeolian-Vocalion. With such splendid advertising it is not difficult to account for the success of the Aeolian-Vocalion.



NEW EDISON SHOP IN AUSTIN, MINN.

Elaborate Quarters Opened by Schleuder Paper Co. in Time for the Holiday Trade—Large Recital Hall a Feature.

(Special to The Talking Machine World.)

AUSTIN, MINN., January 6.—The Edison Shop, 124 West Bridge street, erected and owned by the Schleuder Paper Co., of this city, was formally opened to the public last month with a special series of concerts and recitals that attracted many people from near-by towns to hear the music and view the splendors of the new establishment. Building operations for the new edifice were started last July and pushed to completion in time for holiday business. The store throughout is handsomely decorated with the woodwork of the booths and lobbies in natural mahogany.

One of the features is an elaborate concert hall, finished in ivory white and silver gray, with a seating capacity of about 100 people. In the concert hall there are eight panels, each decorated with beautiful water color mural painting.

All the floors are heavily carpeted, art glass is used in profusion, and all the lighting fixtures and exposed metal work are silver-plated. As completed, the new Edison Shop is one of the most elaborate establishments of its kind in the State of Minnesota.

TALKING MACHINE MEN TO MEET.

John E. Hunt, president of The Talking Machine Men, announces that the next meeting of the association will be held in the assembly rooms of the Merchants' Association of New York, in the Woolworth Building, Broadway and Park Place, New York, on the evening of January 26 at 8 o'clock. A number of very important matters will come up for consideration and action, and a large attendance is desired.

AFFIRMS LOWER COURT'S DECISION.

The United States Circuit Court of Appeals on Tuesday handed down an opinion affirming the decision of the United States District Court in the case of the Victor Talking Machine Co. vs. Thomas A. Edison, Inc., which was heard some time ago. This case involved certain patent questions, and the Victor Talking Machine Co. appealed from the decision of the lower court with the result as above mentioned.

NEW FACTORY MANAGER.

C. A. Hanson Apointed Head of Columbia Co.'s Factories—An Able Man of Wide Experience in the Capacity of Executive.

The Columbia Graphophone Co. announced this week the appointment of C. A. Hanson as manager of the company's immense factories at Bridgeport, Conn. Mr. Hanson, who assumed his new duties on Monday, succeeds George W. Funnell, who severed his connection with the company recently and sailed for Europe.

Mr. Hanson is signally qualified to fill the very important post as head of the Columbia factories, as for the past twenty years he was associated with the International Harvester Co. as manager of its most important plants.

The Columbia Co. during the past year has increased its manufacturing facilities tremendously, and with the resources now at his command, including a new building recently erected, Mr. Hanson will be in a position to co-operate with the Columbia trade along the broadest possible lines.

INDORSE HERMAN KLEIN METHOD.

Famous Artists Testify to Practicability of Voice Teaching by Means of Talking Machine Records—Big Educational Factor.

The teaching of singing through the medium of talking machine records accompanied by suitable text books has already proven to be practical through actual experience of both the trade which has handled the system, and of the singers who have used it and indorsed it.

The standing in the musical world of Herman Klein, who is responsible for the creation of the Herman Klein Phono-Vocal method, immediately insured the sincerity of the effort, and subsequent use proved its practicability. The course is outlined by Mr. Klein and, based on the method of Manuel Garcia, consists of twenty lessons presented in ten double-face disc records, which are studied in conjunction with detailed explanations given in an elaborate text book forming part of the course.

Those who have taken occasion to indorse the Herman Klein method include Mme. Tetrazzini, of the Metropolitan Opera Co., who writes: "I have heard the talking machine records of your lessons as taken by pupils, and was much interested. I think your method excellent and that it certainly should produce good results."

Mme. Marie Gay (of the Boston Opera Co.) says: "The remarkable possibilities of the Herman Klein Phono-Vocal method, as a practical aid to those who are teaching or studying the vocal art, appealed to me just as soon as I became acquainted through your courtesy with this system. I can heartily recommend it to teachers and pupils."

Signor Zanatello (of the Boston Opera Co.) says: "I wish to take this opportunity to express my sincere admiration for the Herman Klein Phono-Vocal method. It seems to me that to-day, when such a system can be purchased for a comparatively small sum, the arduous work of both teacher and pupil of the vocal art should materially decrease."

Mme. Lipkowska (of the Metropolitan Opera House) says: "I consider the Herman Klein Phono-Vocal method the best medium for the development of the voice and learning of singing."

Others who have written Mr. Klein in praise of his method are Mme. Adelina Patti; William H. Cummins, of the Guildhall School of Music; Jean deReszke, the noted opera star, and Manuel Garcia.

At the present time the Herman Klein Phono-Vocal method is being presented through the talking machine by the Music Phone Method, 2 West Forty-fifth street, New York.

TO DISCONTINUE APPROVAL RECORDS.

Committee of Buffalo Talking Machine Dealers Works for Elimination of Approval Nuisance.

(Special to The Talking Machine World.)

BUFFALO, N. Y., January 7.—Buffalo talking machine dealers may within the next few days sign an agreement whereby approval records will be discontinued. The wiping out of approval records is almost inevitable, the majority of dealers here feel, and at a meeting of the Talking Machine Dealers' Association held here Tuesday night the matter came up for serious consideration.

Representatives from practically all the houses carrying on an extensive sale of records were more than willing to be heard as opposed to the approval scheme. They all declared, with a few dissenting voices, that the proposition was being vilely abused in Buffalo, and that the situation had reached the point where it must either be put out of existence or the dealers go on losing more each month.

For the past few months dealers have been chalking up substantial sums to the profit and loss column because of the approval record system in vogue in Buffalo, and many have been clamoring that it be cut out altogether. This, it seems, is the general attitude, with a few exceptions.

A committee has been appointed to visit all the local dealers and to have them sign an agreement which will eventually mean the end of the approval system. However, there are those opposed to approval records who would be unwilling to cut them out if all the dealers would not agree to it. Before the swan song can be sung it will therefore be necessary to have all the Buffalo dealers declare that they will discontinue the approval system. This is the big job now confronting the committee.

Indications now are that approval records will "go" in Buffalo, as the feeling is high against them. There is hardly a Main street dealer who has not declared during the latter part of 1915 that the privilege is being abused.

JOINS THE TRITON CO. FORCES.

J. A. Kraus, head of the Triton Phonograph Co., 41 Union Square, New York, calls attention to the fact that, of the low-priced phonographs, the Triton was the first to be presented to the trade, this being done about three years ago. It was originally sold at $10, and Model No. 1 Triton continues to be sold at that price, while the new Triton No. 2 is $15 retail. This house also sells motors, sound boxes, etc. B. Tauber, well known in talking machine circles, has become associated with the Triton Co.

DISTRIBUTORS OF VICTOR PRODUCTS

C. F. LIGHTNER DESCANTS ON SELLING IN ARGENTINA.

Manager of Argentine Branch of Victor Talking Machine Co. Gives Interesting Experiences Bearing Upon Export Trade to That Country Which Is Instructive and Educational.

C. F. Lightner, manager of the Argentine branch of the Victor Talking Machine Co., gives some interesting experiences in The Americas, in which he says that, after fifteen years' experience, starting with early commercial missionary work in the Americas south of the Rio Grande, the changes have been of such magnitude, have shown such rapid development, and such striking improvements, from the exporter's, importer's, manufacturer's, and banker's point of view, that all of us, who have been so long in the field, cannot help taking a certain amount of personal pride, and feel that each one's personal efforts have helped this development, and it is with that feeling that we wish to encourage the great improvement which must still come, to give us the commercial and social position which eventually must exist between these two great continents.

The primary requirements for manufacturers, importers and shippers who wish to get their portion of the business from this great Argentine Republic and Uruguay, whether importing or exporting, is first to get the proper representation, whether they be selling or buying. The representative must speak the language of the country and must adapt himself to the ways of the people he is doing business with, not losing his own personality, which, if worthy of acceptance, will soon make itself felt.

Don't try to tell a customer that his ways of doing business are wrong, for if he is really worth doing business with he will soon grasp any new idea you have dropped, if it is worthy of his consideration.

Don't send either a cheap buyer or salesman, as his transactions are invariably in the same class. Don't let a man come with the sole idea of teaching; the learning end of the game is just as important as the teaching. We all have certain ideas, but the man with good ones always goes away with better ones.

The South American has been much longer in the general importing business than we have in the exporting, and very frequently tells us things we have really known but neglected to practice. The man at home, in charge of a foreign business, must just as essentially know the foreign field as the man who is working it, otherwise his lack of real knowledge is often the greatest obstacle the man in the field has to contend with. Correspondence school knowledge, or even book learning, has never been able to get the best out of a problem, without the real practical knowledge, which can only be gained first hand.

Printed matter and all correspondence should be in Spanish. Don't send your Brazilian literature to the Argentine or vice versa. All illustrated catalogs should give exact metric measurements, also net and gross weights in kilograms.

Packing and shipping instructions must be followed absolutely. Pack in cases capable of standing many rehandlings, and for possible discharging into lighters. Mark all cases plainly with the mark of the consignee. Also mark clearly exact weights in kilograms, net and gross. An error in this direction is liable to cause future trouble to the client and shipper in the way of fines and delays.

Last, but not least, the question of credits and propaganda must be seriously considered before even attempting to enter the field, for if the manufacturer is not prepared to quote liberal terms to firms worthy of consideration, the same as his European competitors, and, furthermore, is not prepared to spend money in making his article known, then experience tells me that it is preferable for him to continue his domestic business, and not look for a place in the export trade.

INCORPORATED IN NEW YORK.

A certificate of incorporation was issued last Friday by the Secretary of State, Albany, N. Y., to the Fremont Manufacturing Co. to engage in the manufacture of talking machines. The capital is $200,000 and the incorporators are E. M. Titus, F. S. Gannon and W. H. Seibert, New York.

* * * * *

The Talking Toys Corp. was granted a certificate of incorporation last week by the Secretary of State, Albany, N. Y., to engage in the manufacture of phonographic mechanisms, motors, etc. The capital is $550,000, and the incorporators are H. Kaufmann, J. Bloom and J. Lawrence Davis, New York.

OPENS NEW STORE.

The A. B. Clinton Co., well-known piano house, which has handled the Victrola line exclusively at its store in New Haven, Conn., for many years, has opened a new store at 231 Asylum street, Hartford, Conn., where the Victor line is also being handled exclusively with a line of pianos.

A $10 BILL FOR YOU

Clear profit in the sale of a single course in

The Herman Klein Phono-Vocal Method

Based upon the famous school of Manuel Garcia

The sale is made to the customer who is already on your books, from a demonstration outfit and practically without effort. No stock to carry, no capital tied up, for orders are filled directly by us.

Ten double-sided records, wonderfully made—twenty lessons —lead the student from the simple scale to the aria, and a comprehensive text book, compiled by Herman Klein, based on the method of Manuel Garcia, explains each step intelligently and interestingly.

This method increases appreciation of music and means more sales of high-class records and machines.

PROVEMENTS

The PATHÉ FRÈRES PHONOGRAPH COMPANY invites parison of its products with any others. The best phonograph of a or two ago is no longer this year's best purchase. The PATHE-ONE is being improved constantly in certain details of construction operation and is already so far in advance of all other phonograph evements that it is easily the pacemaker in the field for all time. lers should take advantage of the rapidly growing PATHÉ ularity, and write us without further delay. Exceptional opportu-es are offered to dealers in districts where we are not represented. PATHÉ AGENCY IS A VALUABLE FRANCHISE.

Pathé Disc Features

—They are all double-faced, including the operatic selections—music on both sides.
—They are the largest made—10½, 11½ and 14 inches.
—They retail from 65c. to $2.50.
—They cannot be ruined in any way by the Pathé Sapphire Ball, as there are no metal points to dig into the surface of the record.
—The music is recorded on the bottom of the record grooves and is reproduced by the Pathé Sapphire Ball in an up-and-down, easy, wave-like motion.
—They are recorded in every musical center of the world by artists of international reputation as well as local.
—They bring to the American public for the first time the opportunity of hearing many artists, musical organizations, bands, story tellers, etc., never before heard in this country—owing to engagements keeping them abroad.
—All in all, they comprise a repertory superior to any other Disc Repertory in the world.

ONOGRAPH Co.

NEW YORK, U.S.A.

Everybody knows the talking machine industry is prospering—but some of you do not realize the marvelous *present rate of growth* of Columbia Grafonolas and Columbia Double-Disc Records, that has made it necessary for us to again increase our factory output.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

SOUTHERN CALIFORNIA NEWS ITEMS.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., January 4.—Los Angeles talking machine dealers have just completed a most successful holiday season; in fact, the largest in their history. Some of the dealers report that their sales ran more to the medium-priced models, and others the larger ones, but all are agreed that the record trade will run at least 20 per cent. more than in any other month of December.

The electrically driven machines are becoming more and more popular, and a great many sales were made both of Victrolas and Grafonolas during Christmas time.

A great deal of credit is due to the jobbing houses for the manner in which they kept the dealers supplied with both records and machines. January 1 found very few record or machine shortages that could not be obtained from the wholesale houses. January has opened up with a brisk record trade, and the prospects are good for a busy and prosperous year.

H. E. Lindsey, manager for the Wiley B. Allen Co.'s talking machine department, says the company has had the most successful season since the department was started. The sales were unusually large, especially in the larger models of Victrolas.

Miss R. A. Johnson, formerly with Sherman, Clay & Co., is now with the Wiley B. Allen Co.

Harry Marcus, connected with the music department of the Emporium, San Francisco, is visiting in the city.

Charles Ruggles, local manager for Sherman, Clay & Co., Victor distributers, has the smile that will not wear off. The reason he gives is that he was able to supply nearly everything that the dealers wanted in his line, and says he still has something left. Mr. Ruggles says this has been the largest Victor year to date.

The retail talking machine department of the Southern California Music Co. had a most prosperous holiday trade, and during the weeks before Christmas its large department was crowded to the limit.

O. A. Lovejoy, manager of the Thomas A. Edison Diamond Disc and Amberola wholesale for the above company, is very enthusiastic over the showing made by his department this fall. Although severely handicapped by the holding up of several large shipments caused by the Panama Canal slide, he was still able to supply a great deal of the heavy demand for Edison goods.

Lewis H. Galantiere, for a long time associated with the Andrews Talking Machine Co., is now with the George J. Birkel Music Co.

NEW INCORPORATION.

The Sterling Phonograph Co. was granted a certificate of incorporation last week by the Secretary of State, Albany, N. Y., to engage in the manufacture of talking machines, devices and accessories. The incorporators are S. Steinberg, A. Boyd and R. Goldman, New York.

Shaffer, Faber & Co., Hagerstown, Md., have secured the agency for the Edison Diamond Disc phonograph.

ARTISTIC WINDOW DISPLAY CARD

Issued by the New York Talking Machine Co. Has Won Praise and Builds Trade.

The New York Talking Machine Co., New York, Victor distributer, issued in December a group of

One of Several Window Cards Issued.

six unusually artistic and striking window display cards, one of which is shown herewith. These show cards are now being displayed by Victor dealers in all sections of local territory, who recognize in them an invaluable aid in featuring the new records for January.

The selection, "The Close of a Perfect Day," which is prominently featured on this display card, has met with a phenomenal sale since the January list made its appearance, and Victor dealers report numerous sales of these records as a direct result of this card.

The illustration used is colored artistically, the design being prepared by the Richardson Illustrating Co., New York. A study of this design reveals the close relation of the thoughts pictured to the name of the song. In fact, this design has won general commendation from art experts because of its pleasing conception and well executed details.

H. L. Bronson and W. R. Arnold have opened a Victrola store at Belle Fourche, S. D. Mr. Arnold, who is in charge of the store, will make a determined campaign on selling this line of instruments.

The Waters Music Co., formerly known as the Melody Shop, has opened a new establishment at 203 East Colorado street, Pasadena, Cal., and has added phonographs to its stock.

OTTO HEINEMAN PHONOGRAPH SUPPLY CO. IN NEW HOME.

Well-Known Manufacturer of Talking Machine Motors, Tone-Arms and Other Parts Established in Elaborately Equipped Quarters at 25 West Forty-fifth Street.

The Otto Heineman Phonograph Supply Co., Inc., manufacturer of talking machine motors, tone arms and sound boxes, which recently moved to larger quarters at 25 West Forty-fifth street, New York, is now completely established in its new home, and with excellent facilities at its disposal has started the new year with the one thought of giving its patrons every possible co-operation and service in developing their respective industries.

Otto Heineman in His Private Office with A. Heineman.

A Corner of the Stock and Display Rooms.

In order that the users of Heineman motors may secure maximum efficiency and convenience in the placing and filling of their orders, Otto Heineman, president of the company, leased large offices in Chicago and also established headquarters at Seattle, Wash. The company previously maintained offices at Chicago, but these were found inadequate for its fast-growing business, and new quarters were secured at 19 West Jackson Boulevard. This division will be known as the Central West division and is under the direction of A. S. Ribolla, who is well known in the Western talking machine and piano trades. Mr. Ribolla has been instructed to give the Heineman clientele in the Central West prompt service in every respect, and it is expected that the Chicago offices will prove of invaluable assistance to the phonograph manufacturers in that territory.

The Otto Heineman Phonograph Supply Co., Inc., will maintain a northern Pacific Coast division at 218 Second avenue S., Seattle, Wash., with Joseph M. Abrams as sales manager. This division was established in recognition of the fast-increasing demand for Heineman products in this section of the country. Additional sales offices are being arranged for, and will be opened within the next month.

The accompanying views will give a fair idea of the splendid lay-out and equipment of the new home of the Otto Heineman Phonograph Supply Co. It is Mr. Heineman's intention to place at the disposal of his customers ample facilities for inspecting and investigating the merits of the Heineman line, and to that end a comfortable and well-furnished display room is now being fitted up adjacent to the stockroom. The general offices of the company are light and cheery, and the remarkable success achieved by the Heineman line in this country is evidenced by the fact that only a few months ago the company transacted its business in a small single office in the downtown business district. The present home of the company is located in the heart of the city's leading business section and is convenient to all modes of travel.

A Section of the General Offices.

PACKING CASE ACTIVITY.

The Nelson & Hall Co., Montgomery Center, Vt., maker of "Atlas" packing cases, which is a case made of Northern hardwood veneer with clear spruce cleats, thus saving weight, which lowers freight bills, is sponsor for the statement that over 50 per cent. of the cabinet machines shipped are boxed in Atlas packing cases. This concern some time ago, in addition to its Montgomery Center, Vt., plant, started a new factory at Camden, N. J., for the purpose of giving better service to clients in this market.

PREPAREDNESS!

¶ Victor dealers will find it to their advantage to adequately prepare for the coming year's activities. Preparedness is 90% of Victor retail success, and without it the other 10% is of little avail.

¶ The first step in this campaign of Preparedness should be the selection of the Victor distributor, best prepared to strengthen your resources, build up your business and increase your profits.

¶ The mere filling of orders does not, by any means, complete our share towards this Preparedness. We fill the orders and incidentally prepare ourselves beforehand to fill them as completely as human endeavor will permit us.

¶ After the order is filled our real work commences. Co-operation and help of a real practical nature is at the disposal of our dealers. No gimcracks or fancy stunts, just plain, honest co-operation. Why not try us with your next order?

G. T. WILLIAMS CO., Victor Wholesale Exclusively, 217 Duffield St., Brooklyn, N. Y.

Unless Every Machine Owner You Know Has $200.00 Invested in Records— You Haven't Scratched the Surface

If your record business doesn't furnish most of your liquid capital—

You are skimming the cream and throwing away the milk.

Record Service is Our Specialty

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg. 220 South State St., Chicago
Telephone: Wabash 5774

The death of Edward Lyman Bill has brought the keenest sorrow to the members of the Western trade and to an immeasurably greater degree to those in the Chicago office of the institutions of which he was the head.

Years of continual association with him had only served to increase the appreciation of his sterling character and well-balanced manhood.

Mr. Bill was deeply devoted to the trade to which he had given years of constructive work, and his constant aim was to aid it in the realization of the highest standards of ethics. These ideals he constantly lived up to himself and insisted upon a like adherence upon the part of his employes.

His life had been, and will continue to be, an inspiration to those who had the priceless privilege of working with him. The Chicago representative and his associates can only say in this depressing hour of sorrow that they have lost not only a kind and considerate employer, but a genuine friend.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 10.—The statement made in the December World that local trade was witnessing the busiest thirty days in its entire history is amply justified by the records of the month. From jobbers and retailers the unanimous report comes that it was not only the biggest month but the biggest year.

All of the jobbers state that in place of the usual after-holiday lull there is exceptional activity. The machine stocks in the dealers' hands were simply annihilated, even old stock that had long encumbered the floor being moved. Although, of course, there was a vast number of unfilled orders carried over, there have been practically no cancelations and only a few readjustments, dealers being afraid to run any risk in tampering with their priority claims. Even record stocks are well cleaned up, and orders for machines and records are coming in very liberally, and in the case of the former advance orders of good volume are being placed.

Although in the local retail departments and stores the buying started unusually heavy, the rush during the fortnight before Christmas was greater than ever and taxed facilities to the utmost. The general opinion is that the prosperity of 1915 in the talking machine trade will be continued to an even greater degree in 1916.

Best Sellers.

Some of the records in biggest demand in Chicago were, according to Victor dealers: "Somewhere a Voice Is Calling," by John McCormack; "Noche Serena," by De Gogorza; "Spanish Dance," by Elman; "My Ain Folk" and "A Perfect Day," by Imperial Quartet of Chicago; "To Lou" and "When You're in Love with Someone Who Is Not in Love with You," and "Stille Nacht, heilige Nacht," by Ernestine Schumann-Heink.

Columbia sellers that are going big are: "I Think We've Got Another Washington" and "Soldier Boy," "America, I Love You," and "I'm Simply Crazy Over You," "I Hear You Calling Me" and "The Rosary," "Back Home in Tennessee" and "I'm All Alone," "Keep the Home Fires Burning" and "On the Road to Happiness," and "Blue Danube Waltz" and "The Three Jewels."

Pathé owners are making a big demand upon that extensive library for the following: "Nights of Gladness" and "Destiny Waltz," "We Parted on the Shore," "Semper Fidelis" and "Les Soldats Dans le Parc," "Stephanie Gavotte" and "Gavotte," "Silent Night" and "Adeste Fidelis," and "Dixie Medley" and "Smiler Rag," banjo solos.

The Edison popular sellers included: "Face to Face with the Girl of My Dreams" and "My Big Little Soldier Boy," "Asleep in the Deep" and "Blue Jay and the Thrush," "Oh, Maritana, Maritana" and "Victoria Regina" (concert waltz), "My Hula Maid" and "Somebody Knows," "Josephine Polka" and "Kalima Waltz," and "Addio del Passato" ("La Traviata").

Will Make Talking Machines.

The well-known house of William Passau & Sons, manufacturers of billiard tables and stove fixtures, of this city, with a branch house in San Francisco, announced this week that it was preparing to enter the field of talking machine manufacture on an extended scale. They will cater to the best class of trade and will offer a thoroughly high-grade line of cabinet machines ranging in price from $75 to $250. Extensive space in the firm's large factory has been set aside for the new department. The company is noted for cabinet work of the highest type, and the machines will, it is stated, be distinctive in the character of the artistic appearance of the various models made.

Furnish Artistic Letter Heads.

The Talking Machine Co. of Chicago is prepared to furnish Victor dealers with letter heads of an unusually artistic character at a very small expense compared with that which the dealers would have to incur in securing the artistic color plate in printing. The beautiful illustration in colors showing a Victrola surrounded by famous Victor artists is an essential feature. The letter head bears, of course, the dealer's imprint. The plan of the Talking Machine Co. in having these letter heads produced in immense quantities gives the dealer mail advertising service of incalculable value at a nominal price.

Death of Hans Schumann-Heink.

The news of the death at San Diego, Cal., of Hans Schumann-Heink, son of the famous opera singer, was received with the deepest regret by the employes of the talking machine department of Lyon & Healy. Six years ago Mr. Schumann-Heink was married to Miss Zelda Marka, who had been for some years one of the most popular of the young women employed in the retail record department. The deceased was in the real estate business in San Diego, and is survived by a widow and two children.

Sonora Makes Headway.

Another evidence of the wonderful progress that has been made in the Western talking machine business is found in the history of the Chicago representation of the Sonora phonograph.

Less than a year ago—February 24, to be exact—William F. Martin, now president of the Sonora Corp. of Illinois, opened a small office on South Wabash avenue. Since that time the office was moved to the second floor of 305 South Wabash avenue, and later the entire top floor of the building at 320 South Wabash avenue was taken. It is in this last location that the wholesale department of the Sonora Phonograph Co. of Illinois is now situated. The retail department is continued at the old address and is doing a very thriving business.

"Our main trouble lies in the matter of delivery," said Mr. Martin to The World. "In the month of December we were utterly unable to completely fill our orders. However, we are making every effort to improve upon this condition of affairs, and it is promised by the end of this month that everything will be in great shape to satisfy all of our dealers right through 1916, which, by the way, I expect to be tremendous."

The Spirit of the New Year

Wide-awake dealers realize that, in order to hold leadership, a store must offer the best service.

Competition is doing its daily work, weeding out those concerns that permit obstacles to stand in the way of pleasing their following.

Now in order to be able to give the best, you must receive the best from your source of supply. Our Service for the coming year will be found to present all the excellent features of past seasons, together with a number of new ideas in the way of accuracy, despatch and convenience which cannot be found elsewhere. Our stock at the present time is practically complete. In the matter of records and accessories we are able to fill the heaviest orders substantially as you write them.

We invite you cordially to avail yourself of our facilities.

Lyon & Healy

CHICAGO

VICTOR DISTRIBUTORS

FROM OUR CHICAGO HEADQUARTERS.

(*Continued from page 57.*)

W. R. Everett, in charge of the agency department of the Western Sonora interests, has arranged for the opening of a number of new agencies immediately upon the receipt of sufficient stocks. "We do not like to start people out on an insufficient basis," said he. "We owe our dealers a chance to make good, and we owe it to the machine itself that either a worthy showing or none at all be made. Our stocks will be in the best of shape, I am happy to say, within a few weeks from now."

Big Wholesale Business.

Fred A. Siemon, assistant manager of the Rudolph Wurlitzer Co., said that the month of December set records in every department of the business, with a big increase in retail over last year, and an even greater wholesale showing over 1914. "Great quantities of our goods we were obliged to express to our dealers," said Mr. Siemon, "and the call for records at the last minute was also such as to require similar measures. Styles XI, XIV and XVI enjoyed the greatest call, in the order named, with XIs predominating to a certain extent. There was also a very considerable increase in the demand for Model XIV."

Howard Wurlitzer a Visitor.

Howard Wurlitzer, of the Rudolph Wurlitzer Co., of Cincinnati, was a visitor at the Chicago house recently, and was much pleased with the showing made in the talking machine department during the holiday season. He predicts a banner year for 1916.

Dealer Moves Victor Store.

A. Schlessinger is moving his Victor department from his store at 1534 Fullerton avenue to 634 North avenue. He will continue his Columbia department at the old address. Mr. Schlessinger is one of the biggest dealers in foreign records in the city, and it has been said that one of the first things that an arrival from the old country does after making his home in Chicago's great Northwest Side is to buy a talking machine and some of the records and songs and dances of his native country from Mr. Schlessinger. His holiday trade was exceptionally large.

Winegar Traveling in the East.

Traveling Representative Charles F. Winegar, of the Chicago Hinged Balance Support & Cover Co., is at present in the East, where he has succeeded in closing arrangements with Eastern manufacturers for the equipment of their machines with the Chicago company's device.

James L. Abbott, who is directing the destinies of the company, reports an ever-widening interest upon the part of manufacturers whose call has been so large as to seriously embarrass the company's manufacturing capacity.

Edison Business Doubled.

"It has been a triumphant year for the Edison Disc," said C. E. Goodwin, manager of the Phonograph Co. "Our sales have doubled the past year, as compared with 1914, and notwithstanding the greatly increased productive capacity it was impossible to supply the demand. However, we expect to get liberal shipments within the next fortnight, which will greatly relieve the situation in this regard. The largest proportion of our sales have been on the $250 and $150 phonographs."

The Solophone in Chicago.

The Chicago office of the Hallet & Davis Piano Co. has received the first shipment of the new Solophone talking machines from the factory in Boston. Manager A. F. Wyman states that a very vigorous campaign will be instituted on the new product in Chicago and the immediate vicinity by their large force of outside salesmen.

To Enter Talking Machine Business.

Announcement was made this week by the National Mercantile & Retailers' Association, 8 South Dearborn street, of its entrance into the talking machine trade. The concern is putting out a line of cabinet machines which will be marketed through its special agents and the regular trade. The concern is capitalized at $100,000, with D. W. McKenzie, president; Walter Caldwell, vice-president, and B. S. McKenzie, secretary and treasurer.

The "OROTUND" SOUND BOX

Combination Attachment Co., 624-626 So. Michigan Ave., Chicago

Incorporated.

The Oak Park Talking Machine Shop, at Oak Park, Ill., a suburb of Chicago, was recently incorporated under the name of the Oak Park Music Shop, with a capitalization of $2,500. Alfred Baumann, the proprietor of the old store, is president of the new company, M. C. Baumann is secretary and O. A. Stoffels is treasurer.

Vitanola Progress.

The Vitanola Co., of 17 North Wabash avenue, Chicago, will next month complete its first year in the trade under the present incorporation, although the Vitanola interests have been prominent in trade activities for some years back. The degree of success attained since last February has been remarkable, and the company starts out upon its second year with valuable prestige and a large clientele. The company has been making some original improvements in the tone-producing apparatus and H. T. Schiff, president of the company, has announced the completion, after arduous months of experimentation, of a new tone arm and sound box of a most superior sort. With this new equipment either the hill-and-dale or lateral-cut style of record can be played without change of equipment and without removing the sound box from the tone arm. This ingenious device is operated in a fraction of a second without necessitating any change or the manipulation of any set screws. All that is required is a twist of the tone arm, thus altering the position of the sound box. Another feature of the sound box is the perfect insulation furnished by an ingenious series of rubber gaskets.

"I want to call the attention of our patrons," said Mr. Schiff, "to the fact that the cost of furnishing our goods so highly finished is increasing all the time. However, our prices will remain the same. Many dealers have written us expressions of appreciation of the service we gave them during the holiday rush season and assured us of their future patronage. We also have received many compliments upon our jewel needles, which we furnish either for playing lateral-cut or for the hill-and-dale style of record."

Lyon & Healy Sales Force Meet.

In accordance with the annual custom, members of the wholesale sales force of the talking machine department of Lyon & Healy got together on Tuesday afternoon of this week, reviewed the work of the past year, and planned the campaign for 1916. There was an excellent dinner at Kuntz-Remmler's, and afterwards the "Ziegfeld Follies" at the Illinois Theatre were taken in.

Those present were: Manager L. C. Wiswell, J. E. Meagher, Walter Roach, E. P. Bliss, H. R. Smith, J. B. L. Ryde, H. T. Landherr, A. Scannell, R. E. Agnew and one outside guest, in the person of R. Fenton, of the Wilson Avenue Talking Machine Shop.

In a chat with The World Mr. Wiswell said that 1916 had proved by far the biggest talking machine year in the history of Lyon & Healy and December the largest month both in the wholesale and retail. "In spite of the shortage in goods, notwithstanding the tremendous increase in the output of the Victor Co., our dealers have been very appreciative of the

manner in which they were treated, and I had not only an avalanche of letters but a number of long-distance calls thanking us for the manner in which we had seen them through. All the indications point to a bigger year in 1916, and we will be in better shape than ever before to care for our customers when we get into our new building the coming spring. We are planning some very marked improvements to Lyon & Healy service, made possible by the immensely improved facilities which will be at our command."

Resume Concerts.

On Monday of this week the daily concerts at Lyon & Healy's Victor Hall were resumed after the famous little Victor Hall had recovered from the holiday rush, during which it had been used as an additional machine salesroom.

Columbia's Biggest December.

At the Chicago office of the Columbia Graphophone Co. Manager C. F. Baer had just been making some interesting comparisons, and found that December was the heaviest in the history of the branch, notwithstanding the fact that some years ago the territory covered was much more extensive than at present. It's been a wonderful year, too, not only notable for the quantity but the quality of the trade. "There never was a time when our dealers went into the new year with such clean stocks," said Mr. Baer. "The scramble for goods was terrific. If we couldn't furnish one finish they would take another. Everything went. The shortage of goods has been terrific, although the factory has done wonders. There have been some notable tendencies. The demand has been for the better goods, the sales of $50 machines down being the smallest percentage of the whole. The electric Grafonolas have been in big demand—more so than we had anticipated. The inquiry was much greater than the supply."

District Manager W. C. Fuhri has just returned from a trip to Minneapolis and St. Paul. The Emporium, in the latter city, has recently become an exclusive Columbia dealer and has fitted up what Mr. Fuhri describes as one of the finest departments in the West. The demonstration rooms are unusually large and the decorations decidedly artistic. The house of Howard Farwell & Co., at Minneapolis, has recently added the Columbia line.

Robert Souders, formerly manager of the Columbia Dallas, Tex., branch, has been given charge of the Minneapolis branch. Mr. Souders' successor at Dallas is E. B. Shiddell, formerly assistant manager there.

Fred A. Dennison, who has been recently promoted from the management of the Detroit store to the important position of Pacific Coast manager, is well remembered in Chicago. Eight or nine years ago he was with the local office in the capacity of correspondent and house salesman.

Plans Record Service Campaign.

"Nineteen-sixteen rounded up the biggest year in our history and December was the largest month," said R. J. Keith, of the Talking Machine Co. "It is futile to speculate on what it would have been had we been able to ship all orders received. However, our loyal dealers, especially those who heeded our injunctions to anticipate the fall and holiday rush, have every reason to be gratified with the efficiency of Talking Machine Co. service under trying conditions. We have received many appreciative letters to this effect. We had literally hundreds of machines coming through from the factory by express at the close. The bills were heavy, but we had to maintain the quality of our service at any cost. The coming year? Well, you would be surprised to know the rapidity with which orders are coming in right now. In spite of the large number of orders held over there have been practically no cancelations. Dealers confronted with bare floors and an active after-holiday business do not care to risk the sacrifice of their priority rank. Moreover, in many instances dealers are actually placing orders now for several months in advance.

"A very notable feature of the year has been the enormous sale of records and the earnest manner in which the majority of dealers have worked to develop this branch of their business. We have planned a systematic campaign of co-operation with our dealers in this regard, and when our plans of record sales promotion are ready for presentation I know that they will meet with enthusiastic approval."

Visitors and Personals.

At the signal of Cupid's chubby finger Miss Ella Katzman, for some years order clerk for the Talking Machine Co., resigned on January 1 and is now Mrs. Charles Roe. Mr. Roe is a promising young electrical engineer of Chicago. Miss Hattie Bonniwell has been promoted to the vacated position.

All of the employes of the Talking Machine Co. received gold pieces and merchandise certificates for Christmas, while the employes sent a magnificent set of dress shirt studs and cuff links to Arthur D. Geissler.

George P. Cheatle, of the Talking Machine Co., returned a few days ago from the Coast fully recovered in health. He was accompanied by Mrs. Cheatle, and spent several delightful weeks on the parental ranch near Sacramento. The staff at the office were given an opportunity to inspect a fox terrier brought home as a souvenir of the trip, and which is described as a dead ringer for the famous Victor dog.

E. L. Barker, who has traveled Illinois and Indiana for the Talking Machine Co., has resigned, as illness in his family makes road work impractical.

W. G. Griffith, of the T. M. Co. forces, spent the

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 60).

holidays at Indianapolis with his mother and his brother, who is the sales manager for the Udell Works, of that city. J. M. Lockeridge holidayed at his father's farm near Newcastle, Ind.

Among the visiting dealers since the holidays were: Mr. Paus, of Noeck & Paus, Sturgeon Bay, Wis.; Charles Brown, Cable-Nelson Piano Co., Kalamazoo, Mich.; F. M. Leslie, Urbana, Ill.; W. H. Haile, of W. H. Wheelock, South Bend, Ind.; R. L. Sonneborn, La Porte, Ind.; George H. Eichholz, Milwaukee; H. V. Benjamin, Benjamin Temple of Music, Danville, Ill.; E. D. Allington, Freeport, Ill.; H. G. Power, manager talking machine department, Taylor Carpet Co., Indianapolis, Ind.

Notable Dictaphone Installation.

Arthur McGrew, district manager of the Dictaphone department of the Columbia Graphophone Co., reports the completion of one of the largest Dictaphone installations in the history of the Chicago office. The big credit mail order department of the Harman Furniture & Carpet Co., at Wentworth avenue and Thirty-ninth street, has been equipped with sixty-one Dictaphones. A great amount of special wiring was necessary to permit a floor plug for each dictator and a drop wire from the ceiling for each typist. The entire office was rearranged so as to segregate the typists and get them all in one division. They are in charge of a manager, who receives all the records and distributes them. In this manner all are kept busy. H. H. Cross was the salesman who handled the deal.

A number of other notable installations have been made in the past two or three months and December, usually a quiet month, was the largest in the history of the department.

Personals and Visitors.

Messrs. Plank, Ratcliff and Calahan, all of the Victor Talking Machine Co., passed through Chicago on their way out to their respective territories following the customary holiday vacation.

Recent visitors to the local trade included R. G. Rosenstom, Sandwich, Ill.; Mr. Raigor, Raigor Art & Music Store, St. Louis, Mo., and Mr. Pearce, McLogan & Pearce, Calumet and Houghton, Mich.

R. P. Keip, of Joliet, Ill., was a Chicago visitor this week. He is an enthusiastic Edison dealer, and reports a most excellent holiday trade.

Recent piano and talking machine dealers visiting the local trade were John E. Moyer, Dixon, Ill.; R. D. Corbaugh, Carrollton, O., and R. J. Outhwaite, of Bloomville, O.

New Columbia Traveler.

An addition to the traveling force of the Chicago office of the Columbia Graphophone Co. has been made in the person of Charles Kennedy. He has done effective work in the wholesale correspondence, and has now been promoted to the position of traveler in northern and central Illinois.

Cupid Threatens Devastation.

Since the holidays several of the competent young record saleswomen at Lyon & Healy's have been sporting sparklers on their dainty fingers. From all reports the exodus will take place in June, Hymen's favorite month.

Victor-Cheney Examination.

A deposition was taken in Chicago on Thursday, Friday and Saturday of last week from John F. McElroy, patent expert for the Cheney interests. Mr. McElroy was examined by Fenton & Blount, counsel for the Victor Co., and Sheridan, Wilkinson, Scott & Richmond, representing the Cheney Talking Machine Co. Another deposition will be prepared from the testimony of Rudolph M. Hunter, patent expert for the Victor Co., and the combined testimony submitted to Judge Carpenter some time in February.

There has been no development in the suit of the American Graphophone Co. vs. the Cheney Talking Machine Co., and this matter will not come up for some months yet.

SUCCESS OF THE PATHE PATHEPHONE SHOP OF CHICAGO.

Although Established Less Than a Year Ago, the New Concern Has Secured a Strong Foothold in the Talking Machine Field in That City.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 7.—One of the most startling successes in the talking machine business during the rather startling year of 1915 was the establishment and remarkable growth of the Pathé Pathephone Shop of Chicago. The Pathé Pathephone Shop, Inc., was organized in the spring of last year by Harry K. O'Neill and Richard E. Rundell. Mr. O'Neill is the son of Arthur J. O'Neill, who is one of the veterans of the trade and widely known in all parts of the country. These two young men were very enthusiastic over the possibilities of the Pathé distributing privilege in Chicago, and upon acquiring sufficient capital immediately organized their company, with Mr. O'Neill, Jr., as president, and R. E. Rundell, secretary and treasurer. In discussing the progress which the house has made, Harry O'Neill recently said:

Exterior of Pathé Pathephone Shop, Chicago.

"During the past year we have met with a most gratifying, even phenomenal, success. Ten months ago our entire business was confined to a little shop on the sixth floor in the Shops Building, 17 North Wabash avenue, Chicago. Since that time our business has grown so rapidly that we have been forced to take on more and more new space. We now occupy a part of the sixth floor of the Shops Building and practically all of the second floor, and are at the present time contemplating the addition of one of the street stores in the same building to accommodate our large record trade.

"At 15 East Adams street, the ground floor of the Republic Building, we have a space of about fourteen hundred square feet, which is used exclusively as a retail store, and is known as the Pathé Pathephone Shop. During the month of December an enormous business was done in this location under the direction of our Mr. McMullen. We have every reason to believe that every month of 1916 will show a corresponding increase over December, 1915.

"We presume that our stock of Pathephones and Pathé discs is the largest single stock in the United States, and it is kept complete all of the time in order to give our dealers the rapid and prompt service which is due them.

"R. E. Rundell, secretary and treasurer of the company, has had charge of the wholesale end of

Peoria, Ill., and Rothschild & Co., of Chicago. Tom Johnson, formerly a traveler for the Edison Distributers in Chicago, has joined our sales force and is traveling in northern Illinois. He is meeting with remarkable success. E. S. Bristoll is our third traveler, and is opening dealers in central Illinois.

"We are expecting many changes in the next year, and we can assure all of our dealers that Pathé Frères have many surprises and special advantages for them during the present year."

COLUMBIA DEMAND IN CANADA

Is Constantly Growing—Rafael Cabanas Was a Recent Visitor From Toronto in an Effort to Get Stock—Other Columbia News.

Rafael Cabañas, general manager of the Canadian division of the Columbia Graphophone Co., with headquarters in Toronto, was a visitor to New York this week to make urgent efforts to secure sufficient stock to take care of the demands of Columbia dealers in Canada. Mr. Cabañas stated that he was greatly impressed with the spirit of optimism and confidence which is evident in all parts of Canada at the present time, particularly in the agricultural districts.

Columbia dealers throughout the Dominion report the closing of the best year in their history, and the fact that Mr. Cabañas felt obliged to visit personally the executive offices to petition for additional stock indicates the extent of Columbia sales in Canada. It is interesting to note that the Canadian division of the Columbia Co. closed a larger business in the December just passed than the entire sales totals of any year prior to 1908. This record is all the more remarkable when it is considered that Mr. Cabañas only assumed his new position a few months ago.

Walter S. Gray, formerly district manager for the Columbia Co. on the Pacific Coast, arrived in New York last week. He will be associated with the sales department in a capacity to be announced later.

Ernest E. Robinson, of the Columbia export department, is receiving the congratulations of his associates upon the arrival at his home of a baby girl. The newcomer already gives indications of rivaling Mary Garden, the famous operatic soprano.

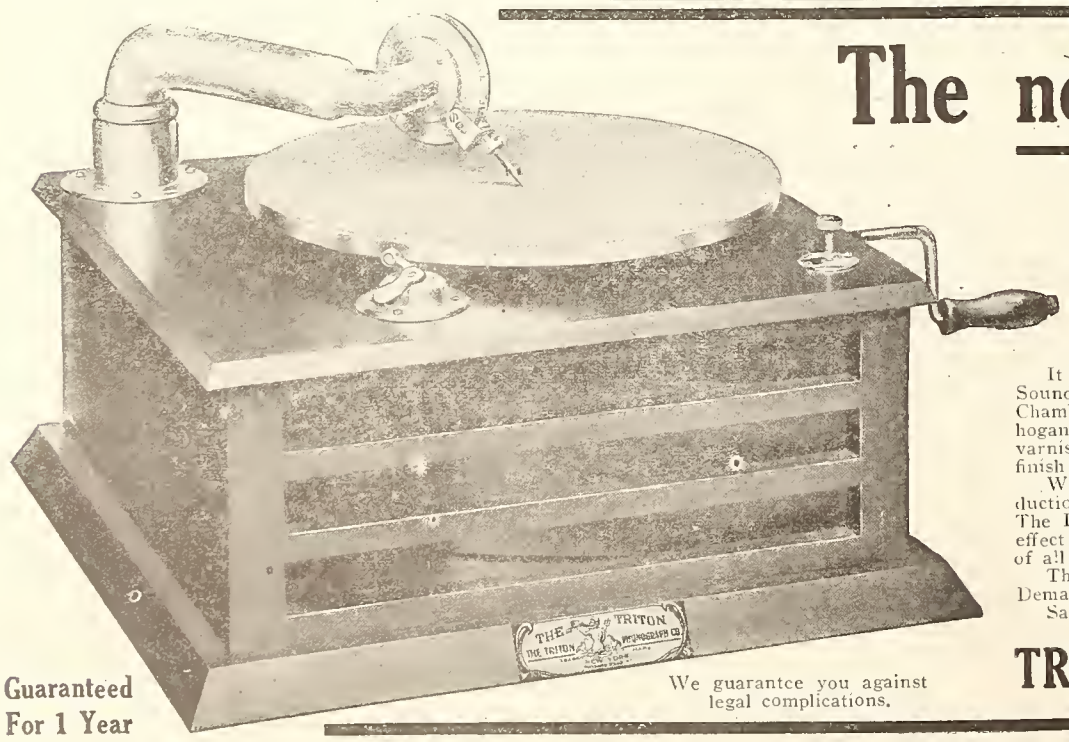
IN TOUCH WITH THE MUSICAL WORLD

Notwithstanding that his cabin is located many miles distant from any residential or business community, the owner of this cabin at Lost Cabin, Wyo., has at his command the same varied musical entertainment as the inhabitants of the large cities. When the accompanying photograph was snapped Schubert's "Serenade," played on a Columbia graphophone, was providing the entertainment for the cabin owner and his visitors, who are to all

Enjoying the Columbia Graphophone.

appearances deeply impressed with the graphophone's musical qualities. The owner of this Columbia graphophone possesses a good-sized library of Columbia records, which aid him considerably in making life in this far-away point something more than a lonely existence. Thus the value of the talking machine is again exemplified.

The Rochester Rex Talking Machine Co., Rochester, N. Y., was incorporated with the Secretary of State at Albany last week for the purpose of handling talking machines and accessories. Capital, $10,000.



The new TRITON No. 2

The enormous popularity of the Triton No. 1 came not alone from its surprising Tone and Compactness—but also because of its simplicity and Ready Portability—as a Companion in the Camp—on the Boat—on Auto Trips—and in Dancing Visits to friends who were without music. But we have had so many requests for a more Pretentious Phonograph for permanent location in the home—that—we have produced the Triton No. 2.

RETAILS FOR $15

It is equipped with the Celebrated Triton Motor—and the Famous Triton Sound Producer—together with our new departure in arranging the Sound Chamber. Housed in a substantial Cabinet—finished in either oak or mahogany—not treated as so many cabinets are—to just a coating of coach varnish—but each cabinet is Hand Polished and Hand Rubbed—making a finish fit to associate with the best furnishings.

We have so arranged our Sound Chamber that the most Accurate Reproductions of the Artists' rendering are given to the record being played. The Pleasing Simplicity of the Cabinet is Accentuated by the Soft-Smooth effect of the finish. Together with this is accompanied the Strong Guarantee of all Triton Productions.

The Retail Price—$15.00—has been made to conform with the Popular Demand.

Sample machine sent for $7.50.

HEAVY INCREASES REPORTED IN MILWAUKEE TRADE.

Some Great Records Made Despite the Shortage of Stock During Holidays—Some Recent Changes of Importance Among the Managers—F. K. Dolbeer, of the Victor Co., a Recent Visitor—E. O. Schmidt Piano Co. Opens New Branch—Other Late News.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., January 8.—Talking machine dealers in Milwaukee and all over Wisconsin met with by far the best holiday business which they had ever experienced. It is not exaggerating to say that the retail business during the year just closed showed a gain of more than 100 per cent. all over the State. One well-known Milwaukee house declares that its increase for the year was exactly 206 per cent., and there are several other local concerns which are not far behind. Business was simply phenomenal during the last three months of the year.

The demand for machines was so active during the holiday period that the shortage in all the well-known lines became decidedly acute. If dealers had been able to secure the machines they could have done almost double the business. Jobbers did their best to divide up their shipments so that all dealers would get a share of the allotment of machines for Wisconsin, but they were able to fill only a portion of their orders.

"Had we been able to secure enough machines from the factory we could have done just double the business," said Harry Goldsmith, secretary-treasurer of the Badger Talking Machine Co., jobber for the Victor goods. "We did our best to satisfy our eustomers and were able to ship machines to everybody, but not within a fraction of the number demanded. The shortage has been so serious that we have not been able to locate a new Victor dealer for months. We are in hopes that we may be able to get the goods so that we can catch up with our orders during the next few months. We are able to get records enough, and our business in this line increased at least 60 per cent. over December a year ago. The talking machine business has developed wonderfully during the past year and the outlook gives promise of still greater things. Dealers everywhere are low on stocks and are beginning to place orders even at this early date for the summer and fall trade. Only to-day we received a staggering big order for machines from a Milwaukee house which wants the goods for its summer and fall trade. I am confident that jobbers for all the other lines of machines are finding business just as good."

Two changes of eonsiderable interest in the Milwaukee talking machine field have just taken place with the retirement of M. Marks, manager of the Victrola and piano departments of the three stores of the Edward Schuster Co., well-known department store concern, and Louis Marks, manager of the Victrola department of the Boston Store. M. Marks and his son, Louis, are going to St. Louis, where they will engage in an entirely different line of business. It is understood that Henry Greenblatt, a member of the Schuster eoncern, will have general supervision of the Victrola departments at the three Schuster stores. The department at the Twelfth and Vliet streets store will remain in active charge of J. H. Becker. The department at the Third and Garfield streets establishment will continue to be in charge of Miss Elizabeth Hughes. The department at the Mitchell street and Sixth avenue store will be in charge of Mr. Myers. Business has been so good at all the departments that various improvements will be made to handle the increased trade. A large concert hall and three new booths will be installed at the Third and Garfield store, and new booths will be put in at the other two stores. No successor to Louis Marks has been announced by the Boston Store management as yet.

The best business in the history of the store was secured during the montn oi December by A. G. Kunde, Columbia jobber and dealer in Milwaukee.

F. K. Dolbeer, credit manager of the Victor Talking Machine Co., stopped over in Milwaukee recently while on a Western trip. While in this city Mr. Dolbeer was the guest of the Badger Talking Machine Co., jobber for the Victor goods. From Milwaukee Mr. Dolbeer visited St. Paul and Minneapolis.

George Hibbard, well-known young Milwaukee musician, formerly in vaudeville with his sister, is now in charge of the Columbia department of the Smith Piano Co., 90 Wisconsn street. An exceptionally fine business is reported by F. D. D. Holes, general manager.

Several more new Pathephone dealers have been located about Wisconsin by Lawrence McGreal, jobber in this State for the Pathé Frères line.

Paul A. Seeger, manager of the Victrola department of the Edmund Gram Piano House, says that the Victor business during December showed a remarkable gain over a year ago, although all previous records were broken at that time.

S. W. Goldsmith, vice-president and general manager of the Badger Talking Machine Co., jobber for the Victor goods, is greatly improved in health and is again on the job. Mr. Goldsmith recently returned from a trip to the Victor factory.

L. C. Parker, manager of the Victrola department at Gimbel Bros.' store, was able to meet the demands of many of his customers as the result of his securing seventy-two Victrolas by express only two days before Christmas. The holiday business at the Gimbel department broke all records.

The Flanner-Hafsoos Music Hause has been meeting with such an active business in Edison machines and records that it has been forced to install two new additional booths in its Edison department on the first floor of the firm's store.

Park Adams, manager of the Premier Talking Machine Co.'s local branch, has been meeting with much success. Mr. Adams recently ran an attractive advertisement in the Daily Reporter, a paper devoted to the interests of the legal profession and real estate men.

The Emil O. Schmidt Piano Co., handling the new Starr line of talking machines, has opened a new branch store at Manitowoc, Wis., where the Starr line will be carried in addition to pianos. J. F. Herzog, brother of Edward Herzog, sales manager of the Milwaukee store, is in charge of the new branch.

The Hoeffler Piano Manufacturing Co., which maintains a successful Victrola department, has moved its store a few doors south of its former location on West Water street. Gustave Spankus, manager of the Victrola department, has arranged some attractive talking machine quarters. The Hoeffler house met with a fine holiday business.

The Gensch-Smith Co., 730 Grand avenue, exclusive Victor shop, broke all its previous sales records during the month of December.

William A. Schmidt, manager of the Phonograph Co. of Milwaukee, jobber for the Edison goods, recently gave the first of a series of Sunday evening concerts ot the Milwaukee Good Fellows' Home, 131 Reed street, conducted under the auspices of the Volunteers of America. The concert was greatly appreciated by the unfortunates in attendance.

Trade at the local Edison Shop, the retail store eonducted under the auspices of the Phonograph Co., was so good during December that stocks were pretty well cleaned up.

Increasing business in the Aeolian-Vocalion caused the Smith Music Store, of Parkersburg, W. Va., to move into quarters in the Union Trust Building. Edgar A. Smith is proprietor.

The Rex Talking Machine Co. has been incorporated in Salamanca, N. Y., with capital stoek of $10,000, and will handle the Rex machines and records in Cattaraugus, Allegheny and Steuben counties, N. Y., and McKean County, Pa.

The Walter Music Co. has opened warerooms in Walton, N. Y., for the sale of Edison Diamond Disc phonographs.

Victor Dealers

Those who relied upon us this season to supply their requirements of Victor merchandise are loudest in their praise of the excellent manner with which their orders were filled.

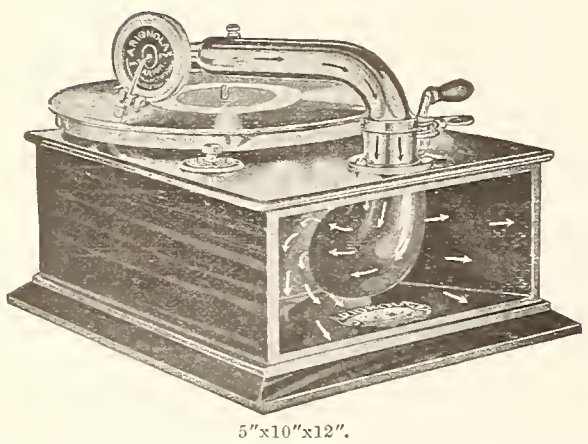
PERFECT TONE REPRODUCTION

is the accomplishment of

The ARIONOLA

UNIQUE IN CONSTRUCTION

WE hereby announce two new Arionola models retailing at $50 and $75 respectively—superior in appearance, construction and tone to any other phonographs at these prices. The phenomenal success of our wonderful low-priced machine has created a demand for larger Arionolas embodying the same method of tone reproduction. This method is an application of the wooden sounding-board principle—long known in the piano—to the phonograph. Unlike other phonographs the sound waves coming from the Arionola are neither shut in nor hampered, thus assuring better enunciation, clearer and more natural tones.



5"x10"x12".

This is the original Arionola having a strong, noiseless motor capable of playing two 12-inch records without rewinding. Finished in veneered mahogany—not stained oak. It gives perfect music at a price within the reach of all.

$15

13½"x17"x20½".

This handsome machine is a larger model of the original opposite. The case is identical to the one shown below—only here the artistic screen has been removed to show method of tone reflection. Both this machine and the one below are equipped with a tone modifier making possible any volume of tone desired. Unique arrangement for oiling and getting at motor instantly.

$50

Each phonograph that goes out of our factory is thoroughly tested and absolutely guaranteed. The same principle of tone reflection is used in all our machines—the same principle that made the original Arionola popular. As has the little one so have the larger Arionolas many unique and superior features not found in other machines.

The electric machine shown here is a musical instrument which is above comparison. It runs on either alternating or direct current and is so entirely different and simple in construction that the usual trouble given by electric machines is eliminated. The case, as the model above, has the finest natural mahogany finish obtainable and is made to fit standard record cabinets.

$75

Most attractive proposition to dealers everywhere. Certain jobbing territory still open. New models ready for delivery Feb. 15th. Write now for full information.

ARION MANUFACTURING CO.

250 Devonshire Street BOSTON, MASS

STEWART PHONOGRAPH CORP. TO MAKE PHONOGRAPHS.

Machinery Being Installed in Wells Street Bridge Building, Chicago—To Make a Phonograph to Retail at $5—Prominent Men Interested in New Enterprise, with J. K. Stewart as President.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 8.—The Stewart Phonograph Corp. is rapidly completing plans for the manufacturing and marketing of a phonograph which will retail at $5. Machinery is now being installed in the Wells Street Bridge Building, Chicago, where several floors will be occupied by the new concern for factory and office purposes.

The company, recently incorporated with a capitalization of $50,000, was organized by J. K. Stewart, who is now its president. He is also at the head of the Stewart-Warner Speedometer Corp., rated as the largest maker of automobile accessories in the world, and the new phonograph company will receive the benefit of his years of experience in the manufacturing and marketing of automobile equipment and supplies.

The Stewart Phonograph, Made by the Stewart Phonograph Corp.

The new phonograph is a well made, durable, and very practical machine, the motor and resonator each being of excellent quality and following generally the construction of similar parts in higher priced machines. It will play any disc record on the market up to and including the twelve-inch, and is said to have an exceedingly good quality of tone. A thorough test was recently made of the reproductive ability of the machine by several experts, and after running the gamut of records, from violin selections to monologues, they pronounced the new phonograph to be excellent from every standpoint.

A large publicity campaign will soon acquaint the public with the new phonograph, and a large organization for the marketing of the machine is being brought together by President Stewart. The general manager of the Stewart - Warner Speedometer Corp., C. B. Smith, is treasurer of the new corporation, and W. Z. Zucker is its secretary.

It will be seen by the above that the Stewart Phonograph Corp. is splendidly equipped with a directorate of successful business men, who are entering the talking machine industry with a business record behind them which speaks for success.

The new company has not only progressive business men behind its inceptive move, but it is equipped with ample capital, so that it is fair to presume that its future operations will be along ambitious and progressive lines.

PATHE LOCAL ACTIVITY.

Pathé Dealers in New York and Vicinity Use Co-operative Advertising—Lists Rapidly Growing in New York Territory.

The rapid strides in popularity that the Pathephone and Pathé discs have achieved in local territory were convincingly summed up in a large newspaper advertisement appearing recently. This advertisement presented the names of some of the Pathé Frères dealers in Greater New York and vicinity, the individual announcements of the dealers being featured in conjunction with a striking and artistic advertisement of the Pathephone Shop, 487 Fifth avenue, New York.

Among the dealers mentioned in this Pathé publicity were: Hardman, Peck & Co., 433 Fifth avenue, New York, and 524 Fulton street, Brooklyn, N. Y.; J. B. Stilwell Co., 316 East Fifty-third street, New York; Jacob Doll & Sons, 116 West Forty-second street, New York; 364 Livingston street, Brooklyn, N. Y., and 146 Newark avenue, Jersey City, N. J.; Henry B. Pye & Co., 2918 Third avenue, New York; George Fennell & Co., 2209 Third avenue, New York; O. W. Wuertz Co., 1518 Third avenue, New York, and 832 Manhattan avenue, Brooklyn, N. Y.; Yonkers Sporting Goods & Novelty Co., 15 Cortlandt street, New York; Frank Steadman, 41 Warburton avenue, Yonkers, N. Y.; Peerless Phonograph Co., 82 Brown place, New York; C. Ludwig Baumann & Co., 1455 Broadway, Brooklyn, N. Y.; Marcus Miller, 351 Fulton street, Jamaica, L. I.; Manhattan Carpet & Furniture Co., Port Richmond, S. I.; C. H. Deitrick, Jersey City, N. J.; G. A. Hoffman & Son, 480 Spring street, West Hoboken, N. J.; East Trenton Bargain House, Trenton, N. J.; C. Harry Sherman, Paterson, N. J.; J. Craig Yeomans, 31 Main street, Newton, N. J.; Joseph P. Cullen, 804 Main street, Boonton, N. J.

DO IT NOW! YOU HAVE CAPITAL INVESTED IN YOUR STOCK. IT WILL BE SECURE IF THE STEVENS BILL PASSES THE NEXT CONGRESS.

CONDITIONS IN MONTREAL.

General Volume of Business Very Satisfactory—New Columbia Department Opened—Sales of "Book of the Opera" Are Very Gratifying.

(Special to The Talking Machine World.)

MONTREAL, CAN., January 6.—The holiday business in Montreal was fully 50 per cent. greater this year than last. Most of the dealers are now busily engaged winding up the past year's business and the finish is sufficiently stirring to make them forget at least temporarily the troubles they have passed through in securing a sufficient stock of machines to fill orders.

W. J. Whiteside, who has taken on the Columbia line, has placed his son, F. L., in charge of the talking machine department. They will utilize the basement, having built four demonstration rooms as a start.

Wilders, Ltd., one of the leading furniture dealers, are advertising a $10 machine and claim to have sold quite a number of them.

Goodwins, Ltd., have enjoyed quite a run on Crescent records, which they sell for 35 cents.

The Berliner Gram-O-Phone Co., Ltd., reports a nice sale of the new Victor "Book of the Opera."

Arthur Blouin has secured the sole agency for the new Edison Diamond Disc phonograph for the city of Sherbrooke, Que., and will carry a stock of both machines and records at his piano parlors, 191 Wellington street.

A STRIKING VICTOR POSTER.

The Victor Talking Machine Co. sent out to its dealers this week an artistic and striking poster featuring a new Victor record, No. 17,902, which has as one of its selections "America, I Love You," one of the most popular songs on the market. Accompanying this poster was a proof of a two-page advertisement which the Victor Co. used in the December 18 issue of the Saturday Evening Post. This advertisement was devoted solely to the new Victor general record catalog.

GENERAL SATISFACTION IN THE BALTIMORE TRADE

Unusually Strong Demand for Both High-Priced Machines and Records—Jobbers and Dealers Now Busy Replenishing Stocks—What the Various Houses Report Regarding Conditions and Prospects—Cash Business a Big Factor—News of the Trade Generally.

(Special to The Talking Machine World.)

BALTIMORE, MD., January 4.—Baltimore talking machine dealers are happy over the amount of business they did last month, and all of them agree that the year was a wonderful one. Underneath this happiness, however, some of them are somewhat disappointed because they were unable to secure sufficient machines to supply the phenomenal demand which the Christmas season brought about. A large majority of those who were unable to get enough machines will be many weeks filling the orders which have accumulated.

The year 1915 proved to be a record breaker in the talking machine business with the Baltimore dealers and distributers. Many of them believed that the final rush would be pretty big and that it would even outdo that of the previous year, but very few of them thought it would be as large as it really proved to be. For this reason some of them were caught short on machines, and they had their troubles. Others purchased just as many machines as they possibly could during the dull season, and these came out very well when the big test came. But even these were given some worry on certain styles.

Not only the holiday rush but the entire year showed that the talking machine purchasers are demanding more machines of the better grade than ever before. This was noticeable to some extent in 1914, but it proved to be even more so during 1915. When the rush came the dealers had very few calls for the cheaper machines. The big sellers were those offered to the public at from $75 to $150, although at the same time a great many $50 and $200 machines were sold.

The rush for records now is on in full force and it is keeping the dealers very busy trying to keep up with this big demand. The records being sold, too, are of the better class, and this shows that the talking machine is fast being considered more seriously by the music loving public as a real musical instrument. Shortage of records in many instances made it very uncomfortable for many dealers. This is due in a large measure to the fact that all of the firms manufacturing machines are not turning out records fast enough to keep up with the ever-increasing public demand.

Manager A. J. Heath, of the Columbia headquarters, was more than pleased with the business done by the branch. "December business," said Mr. Heath, "was the best of the whole year, and it was even greater than the business done in the same month in 1914. I would not like to estimate the amount of business we would have done had we had all the machines and records we could have placed. With all things considered, we are satisfied, and I think we will be able to get a big shipment of records and machines down here at once. Our place is empty. We are cleaned out. When the month opened we had very few low-priced machines on hand, and the situation was unique, for the buying public came along and demanded the high-priced machines from $100 up."

For Cohen & Hughes, Inc., Victor distributers, I. Son Cohen, head of the firm, stated that the business went ahead in December just like it did in all the other months. His business would have been at least 20 per cent. better if he could have obtained machines to supply the demand.

Jess Rosenstein, of the National Piano Co., the Pathé distributer, reports a wonderful business in both Pathé machines and records.

The entire stock of the E. F. Droop & Sons Co., Victor distributer, has been wiped out by the big Christmas rush. All that remains is a few records. W. C. Roberts estimates that had he had $60,000 worth more of goods he could have sold them without any trouble. He has gone to the Victor factory to make arrangements to get more stock in as soon as possible. While away he will give up his business cares for a while and spend a few days in New York.

Mr. Roberts is quite keen on cash business and has been making a special play on it of late. He says that the cash business in December was 50 per cent. greater than the cash business done during any previous corresponding month.

A truly marvelous business was done by the Kranz-Fink Talking Machine Co., which handles both the Victor and Columbia lines. Said Joseph Fink: "Business in December was the greatest ever. By December 10 we had equaled the business done in December, 1914, and the latter part of the month just kept going at such a fast pace that we could hardly keep up with it. One of the pleasing features of our business was the big demand for the $100 machines. High-grade records had the call also. The business done in 1915 doubled that done the previous year."

The Hammann-Levin Co. reports a big talking machine business in Victrolas. With this firm, like many others, it was a question of getting sufficient machines to keep up with the demand. December business left the same month of 1914 far behind, and the year's business also went ahead of that of 1914.

H. R. Eisenbrandt Sons, Inc., Victor distributers, had all they could do keeping up with the big demand during December, and the rush has not subsided as yet.

It was the first Christmas rush the Victor department of William Knabe & Co. has had, as the firm did not add the talking machine to its business until after Christmas, 1914. Milton Boucher, the manager, had sufficient foresight to get ready for a big business, however, and when it came he met it in a fine manner. He had machines stored in every available nook and corner and they held out very well.

With the Hub Piano Co., which handles Columbia machines, the rush was very big.

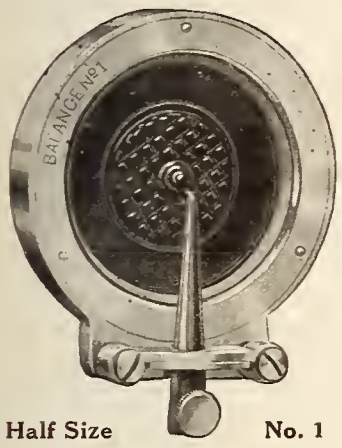
department of The Leader, reports a satisfactory business in the Columbia and Pathé lines.

D. J. Crowley, manager of the talking machine department of The Hub, Charles and Baltimore streets, is very optimistic over the business done. The Edison and Columbia lines are carried, and Mr. Crowley is well pleased with the results shown. A recital is held at the store in a room that seats several hundred people, several times a week, and in this way the machines are being brought to the notice of customers.

A very satisfactory Victrola business was done by the talking machine department in Hochschild, Kohn & Co.'s store. The December business went ahead of the previous year for the same month.

Almost all the large stock of Victrolas Stewart & Co. had before the rush started was wiped out, and the month and year are far in excess of any previous business done by the company. Charles E. Stan, the manager, says that had he not received twenty-two machines on Christmas Eve he would have fallen short. Miss Mollie Griffith again led all others in sales during the month.

Balance Sound Boxes



No. 1
Retail Prices
Nickel Plate $3.00
24k Gold Plate $3.50

ADVERTISING GETS RETURNS.

Publicity of Talking Machine Houses in Montreal—All Lines of Machines in Demand—Talking Machine Man Wins Machine at Raffle—Demonstrating the Diamond Disc.

(Special to The Talking Machine World.)

MONTREAL, QUE., January 6.—In an interview with Miss Havard (one of the partners of the Canadian Graphophone Co.), wholesale distributer in the Province of Quebec for Columbia lines, she reported an excellent all-round trade during the month of December, with exceptionally bright prospects for 1916, and declared she could have sold fully 100 more machines if they had been available.

The Berliner Gramophone Co., Ltd., enjoyed a month of unusual prosperity as compared with December a year ago. The splendid advertising done by this firm was productive of an avalanche of returns. "Will there be a Victrola in your home this Christmas?" was well exemplified.

Among other dealers, Charles Culross remarked that Sonora sales were brisk, while in Columbia lines the demand exceeded the supply. W. J. Whiteside was jubilant over Columbia prospects and gave a cheerful report of holiday sales. The "Leader" style proved the popular selling model. J. W. Shaw & Co. bore out the reports of the various Columbia dealers that trade was all that could be desired and the future exceptionally bright.

Armitage Layton, who has charge of the talking machine department of Layton Bros., was the fortunate winner of a Baby Regent Columbia at a recent church raffle.

The Edison record, "Till the Boys Come Home," and the Columbia, "Keep the Fires Burning Till the Boys Come Home," both experienced a run that was most gratifying to all concerned. In the latter make the Cohen Series and the "Landing of the British Troops in France" are winners.

It is reported that a number of Edison demonstrators from the factory will invade Canada shortly and will make Montreal their headquarters for a time, where they will visit the leading colleges, educational institutions, etc., demonstrating the merits of the new Edison Diamond Disc.

Norman F. Rowell, manager of the C. W. Lindsay, Ltd., Victrola department, states that the month of December was the largest in the history of the firm, as did Layton Bros., Edison and Columbia dealers.

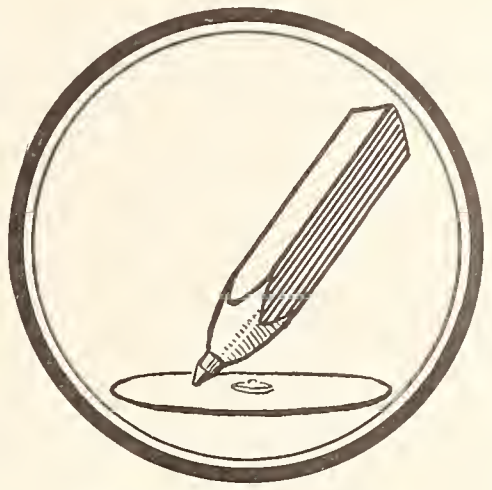
Miss Lapierre, who manages the talking machine department of J. A. Hurteau & Co., Ltd., will shortly visit New York to thoroughly acquaint herself with the merits of the Sonora, which representation this firm has recently acquired.

HIGHLY INTERESTING BROCHURE.

An interesting brochure, entitled "Edison's Laboratory Re-creation of Music," has just been issued by Thomas A. Edison, Inc., Orange, N. J. The subject matter is devoted largely to comments from the newspapers on Edison's achievement in the re-creation of musical sound and bear upon the success of the remarkable series of tone tests being conducted by the Edison organization before leading musical critics. These tests consist of having noted artists of the concert or operatic stage stand side by side with an Edison Diamond Disc phonograph and sing in direct comparison with their recorded voice, to the astonishment of the auditors, who confess their inability to distinguish between the living and the instrumental voice. Portraits of several participating artists, with a cut of the official laboratory model of the Edison Diamond Disc phonograph, furnish the illustrative features of this novel souvenir from the advertising department at Orange.

TO HANDLE THE AEOLIAN-VOCALION.

The Griffith Piano Co., 605 Broad street, Newark, N. J., one of the most successful piano houses in the metropolitan district, has closed arrangements to handle the Aeolian-Vocalion line of phonographs, manufactured by the Aeolian Co., New York. It is planned to give this high-grade phonograph active representation, and extensive publicity will be used to adequately present it to Newark music lovers.



Retails for $1.00

IF you are not carrying the Sonora Multi-Playing Jewel Needle in stock, you should do so.

It sells readily for $1.00, and we authorize you to guarantee it to give perfect satisfaction under daily use for three months.

We supply them to you at a price which permits a satisfactory profit, and will be glad to have you correspond with us on the subject.

The Jewel Needle will save your customers records, and bring out their beauty and harmony in a way not possible to the old-fashioned, scratchy, constantly-changed *steel* needle, now being rapidly discarded by careful people.

Manufacturers of steel needles state that they must be used but once because they wear the record. This is true, and it is also true that they begin to wear the record the minute they start and keep on wearing it more and more.

Write us for sample needle and full information in regard to net prices and the "service work" which we do for those who carry our products in stock.

TO REPRESENT THE SHELTON CO.

A. T. Doty, the Well-known Talking Machine Man, Is Successfully Introducing the Shelton Electric Phonograph Motor to the Trade.

The Shelton Electric Co., 30 East Forty-second street, New York, manufacturer of the Shelton electric phonograph motor ,has appointed A. T. Doty as traveling representative. Mr. Doty will visit the dealers throughout the country, and is now making his first trip in near-by territory.

A. T. Doty.

A. T. Doty is one of the best known members of the local talking machine trade, having been associated with the New York Talking Machine Co., Victor distributer, for more than ten years. He is well versed in all phases of the retail talking machine field and is able to give the dealers practical co-operation in merchandising the Shelton electric motor.

Although Mr. Doty has only been visiting the trade on behalf of the Shelton motor for the past two weeks he has already sent in very large orders which indicate the success that this motor is achieving. Mr. Doty states that the dealers who have carefully tested the motor under the most difficult conditions praise it in every respect, and believe that it will be one of the most successful talking machine accessories which has ever been introduced.

The point which appeals most to the dealers in selling the Shelton electric motor is the fact that it does not disturb the spring motor in any way whatsoever but allows the customer to use either motor as desired. The extreme simplicity of the motor has also won general commendation, together with the fact that it is simply placed inside the cabinet and requires no mechanical adjustment.

TALKING MACHINES IN THE SCHOOL.

Varied Uses in Connection with Teaching Are Pointed Out by Southern Educational Paper.

The January issue of the Educational Monthly, an organ of the Southern Conference for Education and Industry, published at Athens, Ga., contains an admirable presentation of the value of the talking machine in public school work, a field which is being constantly widened and to which more and more attention is being paid by manufacturers. In commenting on particular phases of its usefulness in teaching, the publication says:

"One of the great advances that have been made in our schools during the past few years has been the introduction of the talking machine as an aid to teaching. Many of the best schools in our country to-day use this instrument in their classroom work. We frequently think of it only as an instrument for the presentation of the best in musical art, but it is as often used in the teaching of reading and of the languages as it is for the presentation of music. As a musical instrument it brings to the aid of the teacher the masterpieces of the classical masters. If the music of our schools is planned to increase the capabilities of the child for musical enjoyment, this machine certainly offers an unrivaled field for this work. If it is to be used as an aid to dancing and calisthenics, its possibilities are still greater.

"It will furnish nearly all the programs that a teacher may call for and, with the present improvements that the more modern machines carry, it even becomes an aid in the chorus singing of the school. An important phase of foreign language teaching is the giving of a native accent to the language. This cannot be obtained from any printed book but must come to the child through the ear. In presenting language accents, the talking machine is an invaluable help. Many of our best schools are using it almost exclusively for the teaching of the modern romance languages.

"The Victor Co. has prepared a special catalog for school use. It has selected from its thousands of records those best adapted for special celebrations in our schools; for instance, it presents a program for Arbor Day that includes some of the best lyric music to be found anywhere. In the records which it suggests for use in the celebration of notable birthdays, it offers some of the greatest orations that have ever been known. However this instrument is used in the school, its educational value is undisputed. If it be combined with a talk appropriate to the record being used, its value is greatly enhanced.

"The Victor Co. suggests that short typewritten accounts of the various masterpieces be placed in the hands of the students at the time of presentation of the masterpiece. In this way a knowledge of the composer and of the piece gives to the rendition an enhanced value. The possibilities of the Victrola are almost unlimited, and those schools that have used the instrument for any length of time are most enthusiastic in its praise."

Over 300 phonographs are in use in the public schools of Philadelphia. Most of these machines are made especially for school use, being fitted with what is known as a "school box," and are mounted on wheels, so that they can be taken from one room to another with ease.

ATTRACTIVE WINDOW HANGER.

The Columbia Co.'s advertising department has prepared an attractive window hanger featuring the new record, "Cohen Telephones the Health Department," appearing in the January supplement. This selection, which was composed by Montague Glass, the well-known author, bids fair to soon rival in popularity the first "Cohen" record produced by the Columbia Co., which during the past year and a half has enjoyed a phenomenal sale.

POLICY OF EXPANSION IN CLEVELAND TRADE

Talking Machine Dealers Taking Care of Unusual Volume of Business—Edison Record Tone Tests Attract Much Attention—Big Increase in Pathé Phonograph Sales—Encouraging Reports Regarding General Conditions—Outlook for 1916 Very Bright.

(Special to The Talking Machine World.)

CLEVELAND, O., January 4.—During the past month every talking machine dealer in the city experienced an exceptionally heavy holiday business, and although a big shortage of goods was reported by many, there was a marked increase over the preceding year. The weather was dry and seasonable for shopping, and one dealer sold the total of thirty-two talking machines in one day. The deposits in the banks were unusually large, and, owing to the fact that Cleveland is a big center for industries, there are very few unemployed. Tremendous advertising has been done during the season and many beautiful window displays helped to attract a host of purchasers.

The Phonograph Co., of this city, jobber of the Edison phonographs, is continuing its demonstration policy, and during the past month held a very important demonstration in its salesrooms for all its dealers. This demonstration consisted of a tone test, and Miss Marie Kaiser, Edison artist, and Harold Lyman, flutist, were the assisting artists. Seventy-two dealers from Cleveland territory were present, and in connection with the tone test a lecture was delivered by a mechanical expert, who went over the Edison motor and reproducer, explaining their details. Every dealer was exceptionally well pleased and expressed himself as gaining much valuable information at the lecture. C. C. Koch, of the Edison laboratory, lectured on sound waves and their principles, showing by blackboard illustrations some of the different waves and their formations.

The Phonograph Co., according to L. N. Bloom, secretary, has experienced the most successful year in its history, having an increase of over 100 per cent. over the preceding year.

The Starr Piano Co., which recently entered the talking machine field, reports a heavy holiday business. R. E. Taylor and W. W. Brett were elated over the results.

The Victrola department of the Wade H. Poling Piano Co., under Earle Poling, enjoyed the largest month since the company's inception, and the sales were largely for the higher priced instruments. The outside men helped materially to make December the banner month of the year.

O. E. Kellogg, manager of the H. E. McMillan & Sons Piano Co., has just recovered from a serious illness. He stated that he was well pleased with the outcome of the holiday season. The volume of this December's business was slightly less than that for the same month last year, but the class of business was much higher and terms shorter. Larger down payments were received on all the goods sold, and Manager Kellogg is very well pleased with the result, although he turned down considerable business which did not comply with the new ruling of the company.

The Fischer Piano Co., jobber of the Pathé Frères phonograph, reports that business during the month of December was three times as large as was anticipated, and Manager Caldwell hopes to put in vogue an even more extensive policy. Three new dealers have been added to the company's staff to open new territory in the State.

The Grafonola department of the J. T. Wamelink & Sons Piano Co. was a mecca for many holiday purchasers of Grafonolas, and Manager H. J. Wamelink reported that the record trade was unusually active and hopes to make 1916 the big year in the talking machine trade for the company.

Manager J. J. Schriner, of the talking machine department of the Bailey Co., stated that a big clean-up was made on Victor, Columbia and Edison phonographs. An unprecedented record was made in volume of business and was far in excess of the previous year. The largest number of machines sold in one day in 1914 was seventeen, as compared to thirty-two machines in one day in 1915. Manager Schriner and his splendid sales force were elated over the wonderful results.

The May Co.'s Victrola department was so busy that during the holiday rush four or five men were kept busy all day unpacking Victrolas, and extra delivery facilities were required.

The William Taylor & Sons Co., having one of the finest talking machine studios in the city, excelled any previous holiday season under Manager P. A. Davies.

Robert Osborne, of Orange, N. J., expert Edison demonstrator, is now in this city and hopes to settle here. He gives demonstrations of the Edison Diamond Disc phonograph afternoons and evenings, and is very well pleased with the results already obtained since his arrival.

The Diamond Disc Phonograph Co., new East End Edison dealer, achieved good results during the holiday season. Manager E. A. Friedlander said that nearly all the sales were for the higher priced instruments. With the beautiful store, splendid location and excellent sales force, Manager Friedlander hopes to make 1916 a banner year.

The results obtained by the Eclipse Musical Co. in the last six months of 1915 were far beyond expectations. The company was much pleased with the excellent shipments received from the factory, and while they did not fill all the orders received they far surpassed the shipments of previous years. The Eclipse Musical Co. has received a number of letters from dealers relative to the large increase in business in 1915 over the preceding year. E. B. Lyons spent one week at the Victor factory, and succeeded in getting large shipments of records in great demand among dealers here. C. K. Bennett is now at the factory making arrangements for large shipments of Victrolas and records during 1916.

Manager Schirring, of the Victrola department of the Caldwell Piano Co., stated that the last month in 1915 was the largest in the history of the company.

SOME BIG ADVANCE ORDERS

For Sonora Phonographs Received at the Home Office Tell of Holiday Trade Throughout the Country—Sales Force Increased.

Reports to the home offices of the Sonora Phonograph Corp., 57 Reade street, New York, indicate the fact that nearly all of the Sonora jobbers and dealers were sold out of all types of Sonora phonographs the day before Christmas.

President George E. Brightson, speaking to a representative of The World, commented upon this fact, and stated that the advance orders for January are greatly in excess of December, and that it is going to require every energy to come anywhere near filling the volume of orders.

Mr. Brightson also remarked about the demand for the higher priced models of Sonora phonographs, which indicates a desire on the part of the public to secure expensive musical instruments.

To further help fill the orders of its customers, the Sonora Phonograph Corp. has leased additional floor space and has greatly increased its staff of workmen, as well as its traveling force.

HOW CAMDEN BENEFITS.

(Special to The Talking Machine World.)

CAMDEN, N. J., January 5.—The Victor Talking Machine Co. turned over to the city treasurer the sum of $58,830 for the use of a portion of the south side of the wharf property at Cooper street. The City Council at its last meeting directed that this sum of money be placed in the sinking fund.

THE STEVENS BILL STABILIZES INDUSTRY. IT WILL MAKE TALKING MACHINE STOCKS IN EVERY STORE IN THE LAND WORTH THE INVESTMENT. IF THE CUTRATERS WIN, STOCK VALUES WILL TUMBLE.

LOUIS F. GEISSLER MARRIED.

Bride of the General Manager of the Victor Co. Is the Talented Granddaughter of Horace Greeley, the Great War Editor.

Miss Ida Greeley-Smith, granddaughter of Horace Greeley, was married December 23, at the home of her sister in Orange, N. J., to Louis Frederick Geissler, of Philadelphia.

The ceremony was performed by the Rev. W. Warner Giles and was attended by many out-of-town guests, including a large number from New York. The bride was given in marriage by her father, Col. Nicholas Smith.

Mrs. Andrew Watres Ford, in whose home the wedding took place; Mrs. Hiram Iddings Bearss, wife of Major Bearss, U. S. M. C., and Mrs. Albert Diesinger, Mr. Geissler's daughter by his first marriage, were matrons of honor.

Mrs. Geissler is the youngest daughter of Col. Smith and the late Ida Greeley-Smith. Mrs. Smith was the eldest and favorite daughter of the noted editor, and acted as hostess for him on the famous Greeley farm at Chappaqua during the memorable campaign for the Presidency.

The bride is a young woman of remarkable beauty, with the Greeley fairness of skin, dark brown eyes and a classic profile. She has artistic talent of a high order. Her drawings have been published in magazines and newspapers and her work as a sculptor has attracted favorable attention.

She was educated at the Convent of the Sacred Heart and by private tutors in Beligium, where her family lived for several years. Col. Smith was for years connected with the diplomatic and consular service of the United States.

LOUIS F. GEISSLER.

Courtesy Philadelphia Ledger.

Mr. Geissler is the general manager of the Victor Talking Machine Co. and is a member of the Racquet, Philadelphia Country and Corinthian Yacht clubs, of this city, and of the Bohemian Club, of San Francisco. Mr. and Mrs. Geissler have taken winter apartments at the Ritz-Carlton.

TRADE NEWS FROM TORONTO.

An Extra Good Season in All Lines, According to Report—Gourlay, Winter & Leeming Win First Prize in Edison Window Contest—Sonora Machines Featured Strongly.

(Special to The Talking Machine World.)

TORONTO, ONT., January 6.—Yes, phenomenal is the right adjective to apply to the talking machine business in Toronto as it existed during Christmas week. "Talkers" played a prominent part this year both in the number of machines and records sold, which far outstripped the business of December a year ago. One prominent feature which was very noticeable was a shortage of machines.

The R. S. Williams & Sons Co., Ltd., reports trade good in all lines and collections well up to the average. It is having an extra good season with Edison goods and reports the disc line as gaining new friends among country dealers daily.

John A. Sabine, one of the proprietors of the Music Supply Co., Toronto, the Ontario distributor of the Columbia lines, was a recent visitor to New York. Mr. Sabine visited the head factory of the Columbia Co. in an effort to secure prompt delivery of a number of types of Grafonolas.

Gourlay, Winter & Leeming, Ltd., Toronto, were awarded first prize in the window display contest that was a feature of Edison Week recently.

The Cecilian Co., Ltd., Toronto, of which firm J E. Hoare is the president, is featuring the Sonora phonograph at its retail warerooms and is going strong on newspaper publicity, advertising the many talking points of this machine.

I. Montagnes & Co., who have the Canadian agency for the Sonora, report splendid success in opening up agencies, and the business handled to date has more than exceeded their estimates.

William Thorpe, of New York, president of the Canadian Vitaphone Co., Ltd., Toronto, visited that firm recently in connection with the use of electric motors in its product.

The R. S. Williams & Sons Co., Ltd., Toronto, reports a large sale of gift cards which entitled the holders to visit the Williams showrooms and select their own records.

Thomas Claxton, Ltd., 251 Yonge street, Toronto, got rid of a large number of Grafonolas through the medium of a Christmas Grafonola club.

The Wright Piano Co., Ltd., has opened up handsome retail salesrooms in Strathroy, Ont., and in addition to featuring its own make of pianos and players is exploiting Columbia and Edison lines.

H. T. Schiff, president of the Vitanola Talking Machine Co., Chicago, Ill., was a recent visitor to New York City, where he spent some days calling on the trade and making a number of important arrangements for the furtherance of the business interests of his company.

IF YOU BELIEVE IN MAINTAINING PRICES, WHICH ARE JUST TO THE PUBLIC AND JUST TO ALL, TELL YOUR CONGRESSMAN THAT YOU BELIEVE IN THE STEVENS BILL AND THAT YOU URGE ITS EARLY PASSAGE.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Abundant Business Has Been Experienced in Trade Circles Generally and Especially Prior to Christmas—Lack of Competent Labor Owing to War Demands Hurts Trade Progress—How Musical Instrument Factories Contributed to the Derby Scheme—Invicta Co. Developing Its Export Business—Anent the "Marathon Record"—Two Striking Posters from "His Master's Voice" Co.—Progress of Bull Dog Record Co., Inc.—Some Holiday Music—News of the Month.

(Special to The Talking Machine World.)

LONDON, E. C., January 3, 1916.—In talking machine and musical instrument trade circles generally abundant business has been experienced of late, and more especially is this applicable to the December weeks prior to Christmas. Trade, of course, is by no means within approach of normality, except in one or two isolated cases, for the simple reason that the circumstances do not permit of luxuries which hitherto were largely imported being manufactured in England. The biggest trouble is the labor difficulty, which, it can easily be understood, is becoming more acute each week. The new armies are gradually swallowing up the manhood of the nation, the latest scheme of enlistment—that under Lord Derby's direction—having resulted in drawing from trade an enormous amount of labor which is absolutely irreplacable. This means a very serious pull against the country's trade. While the same restriction of labor affects the output of musical instruments, it is curious to note that the demand is comparatively unaffected. Plenty of money is being made by the millions engaged upon munitions and other necessary work, and to a large extent this surplus cash is being spent—a small proportion on musical instruments, the bulk upon jewelry, expensive clothes, etc., for the workmen's wives and sweethearts.

Officialdom is apparently none too pleased at this, for it is argued that the money should be saved for the benefit of State use. All well and good; but the man who toils twelve hours or more at a stretch maintains his inalienable right, as he puts it, to please himself regarding the laying out of that which he has earned. Hence, luxury manufactures will, I suppose, continue in demand. Certainly the musical instrument trade may pride itself upon having contributed very largely to the forces of the Crown. Factories are working with only 60, 50, in some cases 40, per cent. or less of their normal staff. I know of several instances where the principals of firms have found it necessary to return to the bench in an attempt to maintain an output which will show just a small margin of profit to justify keeping their works open. Every member of one Gramophone house has enlisted under the Derby scheme, and even the director is not out of it! All of which, to my mind, demands some official consideration, especially as a very fair percentage of musical instrument manufactures are for the export trade, thus keeping alive a section of trade which in the national interests reacts beneficially on foreign money exchange.

New Year Greetings.

I would take this opportunity of extending to all my readers a very hearty good wish for happiness and prosperity during 1916, with the added hope that the new year may witness for us a satisfactory adjustment of the world's present conflict.

The Test of Real Patriotism.

An instance of real patriotism came under my notice upon the occasion of a call at the Invicta Record Co.'s warehouse, New Inn Yard, E. C. In course of conversation with one of the directors, Mr. Barton, I learned that every man in the place had enlisted under Lord Derby's system, not excluding my informant. Truly one may say, "Guardsman, to the fore."

A Story of Progress.

The Invicta Record Co., manufacturer of the "Guardsman" double disc, is certainly out to secure a fair share of the trade hitherto the more or less monopoly of our enemies. "Our export business," said Mr. Barton, "is three times that of last year, and we are opening up in different foreign and colonial markets which previously were served by German goods." The company's only trouble, apparently, is how to keep pace with the rapid growth of orders from all parts of the world. As with other firms, its output is restricted by insufficient labor.

Marathon Will Be Revived.

When the long-playing "Marathon" record was held up on account of the parent company being forced into liquidation I ventured to make the statement, in my report, that "though this may be the last of the Marathon Co., it is not the last we shall hear of the Marathon record." I am now in possession of information which leads me to believe my prediction was not far out. At the moment, it being deemed inexpedient to publish full details, I am only permitted to say the Marathon will be shortly revived along lines which will appeal more widely to the public at large than was the case under its old regime. It is planned to publish in 10-inch and 12-inch double-sided form at 18 pence and half a crown, respectively, the records to carry popular vocal and instrumental items by reputable artists. Upon this basis there can be no

question but that the long-playing Marathon record has a great future before it.

Suffer from Fire.

One of the few makers of gramophone horns in this country, W. M. Still & Sons, Ltd., Charles street, London, was unfortunately the victim of a big fire recently. Before subjugation the outbreak had practically gutted the premises, loss of stock, machinery and general damage being estimated at several thousands of pounds.

Two Striking Posters.

Two splendid posters, from paintings by Miss Lucy Hocknell, are to hand from "His Master's Voice" Co. One depicts the interior of a home where, of course, is installed an "H. M. V." instrument, which the father is manipulating. Coming towards the instrument is the little son with a fox terrier under his arm and saying, "Come on, doggie, father says you're the guarantee." Very smart, as all must agree! The other picture shows two "naughty" boys, who, having deserted their bed, may be seen on the stairs listening to "His Master's Voice" playing in the room beyond. This also is finely conceived, and executed, as both are, in colors, should form a special wall or window adornment in every dealer's shop. Unbordered copies on art paper, free of wording and suitable for framing, are to be supplied to dealers for presentation to their best customers.

New Columbia Record by Clara Butt.

An eager record public will learn with pleasure that Mme. Clara Butt has again recorded for Columbia a further record bearing "When All Was Young," from "Faust," English translation. Admirers of the great contralto will find in this record another example of her best efforts in that vocal art which the Columbia Co. has so perfectly crystallized.

A Purely Formal Action.

In the matter of W. H. Reynolds, Ltd., a petition for the winding up has been presented in the High Court of Justice. Being familiar with the facts of the matter as to the company's re-registration since it was taken over by the Utility Trading Co., the trade will recognize the purely formal nature of the petition in question.

A Splendid Record List.

A splendid Christmas program is announced by the Winner Record Co. in the shape of a big record list comprising anthems, carols, hymns, descriptive, sentimental, comic and other selections, both vocal and instrumental, suitable to the season. Business at the Winner works is going strong, and according to all reports the staff is hard put to it to satisfy all demands. Winner quality wins all along the line!

The New Bull Dog Record, Ltd.

The new Bull Dog Record Co., Ltd., recently incorporated here with a capital of £1,000, has made a good commencement on enterprising lines which will form a splendid foundation for its future prosperity. The Bull Dog record is 10-inch double-sided, retailing at the standard price of 18 pence. It is a company with a policy. While catering generously for a big trade on popular lines, the company has not lost sight of the value commercially of securing exclusive artists. In that respect it has made a good start, an instance being the acquisition of Horatio Bottomley, whose name as a lay lawyer, politician, financier, recruiter, etc., is a by-word throughout the country. Mr. Bottomley makes his bow to the great record public for the first time on Bull Dog, for which records a big demand is therefore assured. It should be mentioned that this gentleman's records will not be sold under 2s. 6d.

"Talkers" for the Trenches.

"Music in the Trenches" has of late been the theme of some good editorial advertisements put in the Belfast papers by T. Edens Osborne, of that city. For the boys at the front many instruments and records have been purchased at Mr. Osborne's establishment, and it is interesting to learn that the types most favored are the Columbia hornless models, Nos. 14 and 15.

Refuse to Renew Bechstein License.

On the ground that it is an enemy concern, the two Bechsteins being now in the German army, the London County Council has refused to renew the license of Bechstein Hall, London.

Important Matters Considered.

It was stated in Parliament recently that the question with regard to companies in which all the shareholders and directors are enemies is engaging the attention of His Majesty's Government, and they are particularly considering what steps may be necessary at the end of the war to prevent companies the majority of whose shares are under foreign control from obtaining the status and privileges of English companies. In such cases at present a Board of Trade inspector is appointed. So far 492 inspectors have been appointed, of which 232 act as supervisors and, in eight cases, controllers of such companies.

Revised American Mail Timetable.

A revised timetable for the American mail is notified here. For the Wednesday and Saturday mails it is now necessary to post letters on Monday and Thursday, not later than 8 p. m., at the general post-office, or earlier for registered articles, printed papers, etc. Those interested should apply to any post-office for complete information.

"His Master's Voice" New Publicity Literature.

The month's batch of publicity matter from the Gramophone Co., Ltd., is both choice and varied. First in importance, perhaps, is the new instrument catalog, containing illustrations and particulars of all the types of instruments manufactured. Cabinet grands, table grands, hornless, exterior horn models of choice design and at a variety of prices to suit all, will be found fully explained in this catalog, the printing and general arrangement of which is in accordance with the expensive standard usual

INVICTA RECORD CO., Ltd., 1 New Inn Yard, London, E. C., England

FROM OUR LONDON HEADQUARTERS—(Continued from page 72).

to the "H. M. V." Co.'s productions. An accompanying letter points out that one or two models have been renumbered, and that in view of the price alterations which will come into force on January 1, it is not proposed to send out now normal quantities of the present catalog.

Another piece of interesting matter is a pictorial folder devoted to a special record issue of "The Bells o' Bournville" (Carillon). In all there are four of these beautiful records (double-sided), carrying such favorites as, for instance, "Killarney," "Annie Laurie," "Lead Kindly Light," "Blue Bells of Scotland," etc. I can well imagine that these Carillon records will prove of immense selling power.

In revue music the "H. M. V." people are well to the fore with exclusive artistic rendering of the popular numbers from "Shell Out," "The Only Girl," "Watch Your Step" and "Bric-a-Brac." With the latter is issued an autographed record book containing a series of portraits of the principal artists engaged in this latest revue at the Palace Theatre, London. This portrait book is finely conceived, and as a work of art represents just what music lovers will be proud to possess.

The ordinary supplements of "H. M. V." records continue to satisfy each month the claims of a big public for monthly issues of standard music and that of the world's latest compositions. Since the introduction of the half-a-crown category of records the Gramophone Co. has simply been inundated with business with which it is these days difficult to cope.

Public advertising, too, proceeds apace, creating a busy time for all "His Master's Voice" dealers.

Music for the Holidays.

So far as may be possible under present circumstances, the homes of England will doubtless succumb to the atmosphere and spirit of Christmastide. Music always hath charms, and Zonophonists will find in the company's Christmas bill of fare an excellent and varied number of seasonable selections with which to make merry. Carols, hymns and other sacred music predominate, but do not exclude a fair proportion of sentimental and comic numbers for the Boxing Day program. Although working day and night, the British Zonophone Co. finds it necessary to issue an apology asking for the indulgence of its dealers, who are being supplied as quickly as possible.

William Cooper Bros., Ltd., are now well installed in their new premises at 63 City road, London. It has been a long job, the removal of machines, records, and thousands of machine parts and accessories, etc., necessitating much labor and inconvenience at this busy time of the year. Customers in no wise suffered, however, for the premises at 17 Clerkenwell road will be kept open as heretofore, only Nos. 35 to 43 in that thoroughfare having been closed. Orders for machines, parts, accessories and Coliseum records should be sent to 63 City road, where they will receive prompt attention.

Transferred to South Africa.

W. G. Wickham, at present H. M. Trade Commissioner in New Zealand, will be transferred to South Africa. His successor for New Zealand is R. W. Dalton, of the Commercial Intelligence Branch of the Board of Trade.

No Longer Valid.

Notification is made by the Post-Office that no postage stamps issued during Queen Victoria's reign are now valid, and none in possession of the public can be exchanged after December 31.

ENGLISH WILL REFUND ON CABLES.

Reimbursement of Unexpended Balance Will Be Made on Undelivered Censored Messages.

Great Britain will pay for cablegrams held up by the censors only upon application for a refund from the sender, and under certain conditions, according to information received by the Merchants' Association of this city. Refunds will be made only of the "unexpended balance" and only when said balance is five francs or over. The "unexpended balance" means that part of the original toll which was supposed to cover the cost of delivering the message after it had been put on the wires. In no case will the entire amount of toll be refunded, and cablegrams to Great Britain, Ireland, France, Belgium and Holland will not be considered under this rule. The British Government states that this concession is made solely with the view of mitigating, so far as possible, the inconvenience foreign firms have suffered through their cablegrams being held up by the censors, and that it does not waive any of the rights of censorship which it claims under international agreements. The concession applies to messages to Scandinavia, Russia, Spain, Portugal, Switzerland, Italy and outlying countries.

THE USE OF TRADE-MARKS.

Kinks in Registering Them in South American Countries.

A decision of general interest to American exporters has been handed down by the Appeal Court in Argentina in regard to an alleged unauthorized registration of trade-marks of American concerns by resident dealers, according to Lawrence Langner, a solicitor of patents of this city. It concerns the registration of several well-known American marks, among them American Biograph, Vitagraph, Kalem and other moving picture trademarks of American and European origin.

The marks in question were registered in December, 1912, by a resident named Robledo, the right to them being subsequently turned over to Max Glucksmann, who carries on a large wholesale moving picture distribution business in Buenos Aires. Because of this registration, a firm known as the General Cinematographic Co., an Argentine corporation which had contracts with a number of leading moving picture concerns in this country and Europe, among them the owners of the marks listed above, was unable to handle the films it had contracted for.

Glucksmann succeeded in getting hold of fifteen valuable marks, which he was accused of using as a means of monopolizing the moving picture distribution business of Argentina. He is said to have

killed competition by restraining managers of motion picture theatres who hired the registered films from any other distributer.

The information received by Mr. Langner was to the effect that the Appeal Court held Glucksmann was entitled to the ownership of the marks on a technical ground, which was that the American companies in question were not doing business in Argentina; that the General Cinematographic Co., while representing these concerns, had not itself established its right to the marks, and that the rights of others to the marks had not been established.

According to Mr. Langner, from this decision it would seem that a concern in Argentina representing an American company whose mark has been stolen, does not stand the same chances of success in having unauthorized registrations annulled as is the case where the American company does business itself in Argentina and applies in its own name to have it done. The decision serves to emphasize the importance of trade-mark registration in South American countries by exporters before they begin to do business with those countries.

Business firms in this country often choose trademarks which cannot be registered here, relying upon the protection given to such marks under the common law of the United States. When they go in for export business and attempt to secure foreign registration of their marks they find that in a large number of countries it is not possible to register these marks because they are not registered in the United States. This is especially true of the South American countries, and in such cases the American concern is helpless.

H. E. PARKER HEARD FROM.

The members of the Columbia advertising department were gratified to receive in their Christmas mail a card of remembrance from H. E. Parker, who was connected with the Columbia publicity division for several years prior to joining the English army at the start of the present war. Mr. Parker is in good health and spirits and writes in his usual optimistic and cheery vein.

A new Lester grand piano and a $250 Edison diamond disc phonograph were installed respectively in the parlor and dining room of the Central Hotel, Jefferson City, Mo., by the local music dealer, the Scheel Music Co.

THE JONES MOTROLA.

Another Evidence That Necessity Is the Mother of Invention in the Introduction of This New Device for Running the Talking Machine.

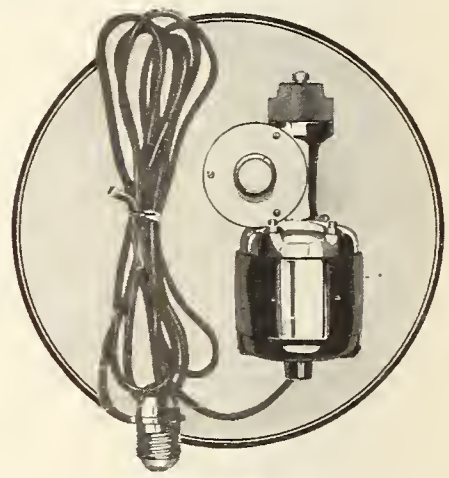
The statement that "necessity is the mother of invention" is again proven in the trade in the placing on the market of the Motrola, a new device, almost weird in its operation, which is attached to the talking machine in place of the usual winding key, and sees to it that the motor is kept constantly wound up by electrical means.

The story of the Motrola is in itself interesting.

Joseph W. Jones.

Joseph W. Jones, president of Jones Motrola, Inc., and who is well known in the trade as the original holder of the basic patents under which the present disc records are made, has a large country home where life was worth living were it not for the fact that the family and guests of Mr. Jones were fond of dancing and his duty was to keep the talking machine wound for the purpose. Mr. Jones, who among other things is responsible for the Jones speedometer and the Jones taximeter for automobiles, believed there might be some way to save physical effort in winding the machine, and constructed the first Motrola for his own private use. The manner in which the device impressed his friends resulted in the formation of a company for the marketing of the Motrola.

The Motrola is small, compact and attractive in appearance, and consists chiefly of a small electric motor with special gearing. The Motrola is attached to any of the standard makes of talking machines simply by removing the winding key and slipping a special wheel over the winding rod. When the Motrola is in place and connected with the electric current it proceeds to wind up the talking machine motor to about three-quarters of its capacity, when the tension of the spring releases a switch and the winding stops. When the talking machine runs down to about half its capacity the reduction in spring tension automatically turns another switch and the winding operation is resumed. By means of the device the spring motor is kept wound at from one-half to three-quarters its capacity, which is claimed to lengthen its life and



The Jones Motrola.

also to insure uniform speed in the turntable. A special button is provided by which the Motrola may be set in motion before the automatic switch is operated, if desired.

The Motrola is so simple in construction that it is practically fool-proof, and among other things prevents the overwinding of the spring. In the event that anything goes wrong with the current or the Motrola itself, it can readily be removed from the machine and the winding key reinserted. There has been a great deal of interest shown in the Motrola since it was first introduced to the trade and its field of operation explained. The general appearance of the device is indicated by the accompanying cut.

KANSAS CITY DEALERS OVERCAME STOCK SHORTAGE.

Cheaper Machines Used as Temporary Substitutes for Higher Priced Models with Considerable Success—What the Various Houses Have to Report Regarding Business for the Past Year and During the Holidays—Expansion to Be the Rule—News of the Month.

(Special to The Talking Machine World.)

KANSAS CITY, MO., January 3.—As a result of the holiday business in the talking machine trade the dealers were pretty nearly cleaned out. Most of the dealers had at the last moment to give temporary relief to would-be purchasers by substituting something that would answer the purpose until the particular machine desired could be secured. Usually a cheaper machine had to act as substitute, for the trade demanded the better class of goods. While the record departments have so far been able to keep well ahead of orders, there will be a tremendous demand during the next few weeks.

Kansas City was tolerably well supplied with the various talking machine makes for the Christmas season. The established dealers in Victrolas, Columbias and Edisons had made careful plans far ahead. The Pathephone entered Kansas City only a few weeks before Christmas. The Starr phonograph had been seen for several weeks, but a supply that could meet the local demand did not arrive until late. The Field-Lippman piano store received a shipment of the Knabe Bros. Crystola the week before Christmas.

E. E. Trower, of the E. E. Trower Music Co., St. Joseph, Mo., spent considerable time in Kansas City the month before Christmas, at the Household Fair, where the Pathephone is being handled. The store did a fine business in the new machine, as did Butler & Sons in Kansas City. The Trower Co. acts only as jobbers, the Pathephone being handled in St. Joseph by Townsend, Wyatt & Weall and Schneitter Bros. at retail.

H. A. Tibbels, proprietor of the finest jewelry store in Emporia, Kan., has entered the talking machine trade by adding a department for Pathephones.

The Starr Piano Co., at Kansas City, received a shipment of phonographs for the Christmas trade, and many were sold. The company, however, has not yet received them in sufficient number to supply the dealers.

"Service" is a watchword at Wunderlich's—and the forethought that provides good service was amply repaid recently. One of our leading bankers was referred there by a friend in the hope of getting certain records. Fortunately the store had the records—and the banker has the notion that the only place to buy talking machine goods is at Wunderlich's. Mr. Wunderlich has a wide acquaintance among the business men of the city, whose thoughts naturally gravitate to him when a music purchase is contemplated.

The Christmas trade at the Edison Shop, Kansas City, was fully up to expectations. Much advertising was done, and the concerts, the programs of which were announced, were attended by crowds that filled the store every afternoon. The retail business of the store has been growing rapidly in the two years since it was established, and the prospects are fine. The mark is set at doubling the 1915 business this year. The wholesale trade has equaled the expectations of M. Blackman, manager of the branch, but far exceeded the expectations of many of the dealers. A "preparedness" letter was sent out early in November and several dealers wrote in after Christmas expressing their regrets that they had not heeded it—they were sold out. Many good agencies were established late in the year, just in time for Christmas trade. One of the best of these, which reported exceptional results, was the Newman Mercantile Co., of Joplin, a large department store.

The $250 Edison machine seems to have been the most popular in demand during the holiday season at Kansas City. One day, for instance, three-fourths of the machines sold were $250. The brown mahogany finish in this class was offered the Kansas City trade just two days before Christmas, and went fine.

The talking machine department of the Schmelzer Arms Co., handling Victrolas, had the largest holiday trade, both jobbing and retail, in the history of the store. For the week before Christmas A. A. Trostler, manager, and his assistants were at work until 1 and 2 o'clock every morning. The last sale on Christmas Eve was an 18 Circassian walnut $400 machine. A large number of machines were sent out by express the day before Christmas. For several days, in fact, nearly everything was sent by express. Wagonloads of machines received by freight were hauled to the store, marked on the wagons, and sent to the express offices.

J. C. Constance, of the Frederickson-Kroh Music Co., Oklahoma City, was a visitor in Kansas City during the Christmas holidays.

E. A. McMurty, manager of the Kansas City office of the Columbia Co., spent Christmas in St. Louis.

The Henley-Waite Music Co. has practically discontinued its talking machine department for the five weeks after Christmas. Miss Jean Kendrick, who has charge of the department, is filling an engagement at the Willis Wood Theatre, having been engaged as soloist there. She will return to the Henley-Waite Co. after the theatrical engagement.

The talking machine department of the George B. Peck Dry Goods Co., under the management of John F. Ditzell, was unable to obtain sufficient machines to handle the Christmas trade, particularly in the fumed oak finish, the Peck store's biggest seller. Mr. Ditzell is working up a large mail order trade.

Several Kansas City dealers are urging others to drop the plan of sending out records for approval. Every firm in the city is now doing that, but a feeling is becoming apparent among some that it is bad business. One firm now refuses to send out less than six, and with an understanding that a third of them must be kept. With some customers, when large numbers are sent, it is demanding that twelve be taken; for, as the manager explained, he cannot afford to make the deliveries with the possibility that only one or two records will be kept. The cost of the delivery amounts to more than his profits.

Harry B. Bibb, manager of the talking machine department of the Jones Store Co., won the cash prize offered by the store management for the department showing the biggest gain in November over the same period of the previous year. His department took a similar prize for the week ending Christmas day and, although the exact figures have not been announced, it is more than probable that the prize for December likewise will be won. Mr. Bibb has managed the department since September 1.

Means & Pearson sold out of the $200 Victrola styles a few days before Christmas. The company tried to obtain more here and was unsuccessful.

W. M. Handley, formerly of Birmingham, is a new retail salesman for the Kansas City branch of the Columbia Co.

The Columbia Co. enjoyed an unexpectedly heavy Christmas business. The retail department and dealers throughout the Kansas City territory called for more machines than could be supplied, although E. A. McMurty obtained a rush express shipment of machines valued at $5,000 a few days before the big holiday. Every shipment billed for the company for December was changed from freight to express to expedite the handling. George F. Standke, in charge of the retail department, made the statement that he could have handled just twice as many machines as were allotted to him.

North Mehornay, manager of the talking machine department of the North-Mehornay Furniture Co., states that the department has grown to such an extent that it far outstrips in volume and profit that of any other special line handled by the company. Mr. Mehornay has three salesmen under him, all of whom devote their time to no other line.

Oscar Mehornay, of the Stout-Mehornay-Duckwall Co., Salem, Ind., was a recent Kansas City visitor. His company makes the boxes for the "Leader" type of Columbia machine. While here he said his company was 7,600 machines behind on its orders from the Columbia Co.

NEW DIAMOND DISC STUDIO OPENED.

(Special to The Talking Machine World.)

PLAINFIELD, N. J., December 31.—A new Diamond Disc studio was opened here last week under the management of Capt. F. W. Vogel and Stephen Haff. The new studio, located at 310 West Front street, has a large recital room, where a series of concerts will be given weekly to demonstrate the qualities of the latest Edison machines. A complete line of machines is on exhibition in the sales department and the supply department has a full stock of the latest records and accessories.

A scrappy salesman may win some arguments, but he'll win mighty few customers.

ESTABLISHED 1868

EDWARD B. JORDAN & CO., Inc.

127-135 DEGRAW ST.—36-60 TIFFANY PL., BROOKLYN, N. Y.

Talking Machine Cabinet Manufacturers

We made the first talking machine cabinets created in this country, and we have specialized in this particular line ever since.

We will submit special designs of talking machine or record cabinets, or quote you from blue prints or samples. We manufacture to order only.

This is a harvest time for foreign record business! The Columbia recordings of music of all nations—vocal, as well as instrumental, issued continually, offer possibilities no talking machine dealer can well ignore.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

TO HANDLE PATHE PHONOGRAPHS IN INDIANAPOLIS.

Tobin Brothers, Formerly of New York, Open Elaborate Quarters in That City—Will Act as Distributers for Indiana, Handling the Pathé Line Exclusively—Exceptionally Heavy Record Demand a Feature of the Holiday Business—All Lines Do Well.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., January 6.—Three brothers, M. A., W. J. and M. P. Tobin, formerly of New York City, this month will open a store at 10 East Washington street to handle Pathé phonographs. Pending the occupancy of their store, the Tobin brothers have had a display of Pathé phonographs at 7 North Meridian street, near the storeroom they will occupy.

Besides doing a retail business, they will act as distributers in Indiana. Although there are several stores handling the Pathé phonograph in Indianapolis, the new Tobin store will be the only store handling the Pathé exclusively. The new store is located in the heart of the shopping district of Indianapolis. It makes the fourth store in the city in which talking machines are sold exclusively, the other stores being the Edison Shop, selling the Edison machines; the Columbia store, the Stewart Talking Machine Co., selling the Victrola, and the Rex store, selling the Rex machine.

At the local Columbia graphophone store the hardest work for several weeks has been to secure sufficient products to fill the growing demand for the Columbia Grafonolas. Manager A. W. Roos had laid in an exceptionally large stock in anticipation of a particularly good season, and needed it all.

The demand for records suitable for the Christmas season was far in excess of expectations, and a spirited revival of the sale of dance records contributed to an enormous record business for the month.

In the Dictaphone department F. J. Clark succeeded in closing several good sales, with the result that December is by far the best month in amount of sales made that the Dictaphone has ever experienced in this territory.

In summing up, Manager Roos is very much pleased with the totals arrived at in cash receipts and sales. Mr. Roos is of the opinion that cash is "looser" in this locality now than it was in the previous year, and there is a much smaller number of delinquent accounts on the books than that which corresponded for the preceding year.

B. C. Fletcher, retail floor manager, reports that the tendency of the public is to buy higher priced machines, on the average, each year.

The Columbia branch operated in Terre Haute under O. D. Standke succeeded in rounding out a remarkably fine December business. Mr. Standke, although having been in charge of the branch only a short time, succeeded in placing on the books nearly twice as much business as was done in the same location last year.

From the reports of all dealers handling talking machines there seems to be no doubt but what the talking machines proved to be one of the most popular, if not the most popular, selection for gift purposes.

E. W. Exley, district manager of the Starr Piano Co., said that the demand for the new Starr phonograph exceeded the supply before Christmas. Business was also good with the Vocalions of the Aeolian Co.

Walter E. Kipp, proprietor of the Edison Shop and manager of the Kipp-Link Phonograph Co., distributers of the Edison disc phonograph, reported a good record for the Edisons and Emerson Knight. The Stewart Talking Machine Co., handling the Victrola, reported a large December trade.

APPOINTED ASSISTANT MANAGER.

A. E. Donovan Now Filling This Position with the Personal Record Department of the Columbia Co.—Manager King a Busy Man.

A. E. Donovan has been appointed assistant manager of the personal record department of the Columbia Graphophone Co. Mr. Donovan has been serving as assistant to Henry D. King, manager of this department, for the past three months and his promotion is based upon the very excellent results which he has achieved during that time.

A. E. Donovan.

Mr. King, who retains the post of general manager of the personal record department, is also manager of the Columbia professional department, and the duties of the latter position have multiplied so rapidly that Mr. King felt obliged to give the greater part of his time to this end of the business. Mr. Donovan will concentrate on the personal record division, which has unlimited opportunities for development.

A new Edison phonograph shop has been opened in Meriden, Conn., by A. D. Elster.

GREAT ACTIVITY IN WINNIPEG.

New Stores and Departments Being Opened in Canadian Northwest—"Unraveling the Tunes" a New Form of Contest—A. G. Farquharson in Charge as Manager—Liberal Advertising Campaigns Secure Results.

(Special to The Talking Machine World.)

WINNIPEG, MAN., January 4.—The talking machine trade is receiving a large share of advertising and window display attention, and as a result there is considerable activity in this branch of the music trade business. Reports received from the various local dealers handling talkers indicate that Santa Claus this year had a strong fondness for talking machines and records of the expensive type.

Ralph Cabañas, manager of the Columbia Graphophone Co. in Canada, with headquarters at the company's factory in Toronto, recently paid his initial visit to Winnipeg. "The only regretful part of my visit here," said he, "is that we cannot possibly deliver all the goods on order. The jobbers and dealers are clamoring for goods, and unfortunately our best efforts will still leave many hundreds of machines undelivered." Mr. Cabañas was most favorably impressed with the activity and life in Winnipeg.

J. A. Banfield, one of Winnipeg's leading furniture dealers, has opened up Columbia graphophone parlors. In connection with the opening of this department was a public concert and contest, the latter being called "Unraveling the Tunes." The record of "Tangled Tunes" was played and a prize given to the person giving the names of the tunes on the record.

Frank Norris, newsdealer, has also opened up a Columbia department under the management of L. Burke.

The Doherty Piano Co.'s Western branch, in its talking machine department, where it features Edison, Columbia, Sonora and other lines, reports existing conditions as splendid and is well satisfied with the amount of sales reported.

A. G. Farquharson, who recently arrived in Winnipeg from Toronto to take charge of the Western Gramophone Co., is now installed in the managerial chair of that firm. T. Nash, manager of His Master's Voice Gramophone Co., Toronto, who has been dividing his time between Toronto and Winnipeg for some months past, arrived with Mr. Farquharson and, after turning over the Victor distributing interests in the West, returned East.

The travelers now returning from the Western Provinces are in much better heart than was the case some months ago. They find that since the results of the harvest have been felt the merchants in small towns especially are now ready to place increased orders, and a good year is expected.

A double-page spread was recently run in a number of the leading Winnipeg dailies in the interest of the Edison phonographs, and the results achieved were splendid.

W. Barton, a new dealer at Fernie, B. C., in addition to handling pianos, has established a talking machine department in his store.

Lansing Khaki Moving Covers

Made for all Sizes of Phonographs.

Write for booklet

Lansing Covers are of the highest quality—heavily padded and quilted. They are made in two grades—with cotton interlining and with felt interlining. Lansing Covers guarantee bruiseless and scratchless cabinets; eliminating excess polishing charges and PAY FOR THEMSELVES during the FIRST month.

The size shown herein is for delivering small machines costing $3.85 each, with cotton interlining (Grade B), and $5.60 with felt interlining (known as Grade A). Samples on receipt of price.

611 Washington St., Boston, Mass.

NEW EDISON PUBLICATION.

House Organ to Be Devoted Exclusively to the Interests of the Edison Diamond Disc Instruments—Greeting from Thomas A. Edison.

The month of December saw a new house publication issued by Thomas A. Edison, Inc., Orange, N. J., manufacturer of the famous Diamond Disc phonograph and the well and widely known Edison Diamond Amberola phonograph. The new monthly will be devoted exclusively to the interests of the Diamond Disc instruments and records and will be edited by Edward C. Boykin, formerly with the New York Evening Journal.

The Edison Phonograph Monthly, which heretofore had covered both disc and Amberola fields, will now devote all its energies toward advancing Amberola interests only. William Bayley will continue as editor.

For its first issue the Diamond Disc organ appeared without a name and carried an invitation to dealers to suggest an appropriate title. It is required that the new name be adopted before the January issue goes to press. On the title page no less a personage than Thomas A. Edison himself holds out a figurative hand of greeting to Edison dealers in a fac-simile of his handwriting, and says:

"A year ago we had a big fire to help us celebrate Christmas. I expect you dealers were a little bit discouraged then, but I am sure you feel differently now. As you know, some people said the Edison was too good to be produced in commercial quantities. They called it a 'laboratory product.' Since the fire we have made some changes that enable us to turn out a product of laboratory quality in practically unlimited quantities. This is one good thing the fire did for us.

"This should be a Merry Christmas for every loyal Edison dealer, and I believe next Christmas will find each of you still better pleased that he is an Edison dealer. Every Edison dealer and jobber has my best wishes. (Signed) Thomas A. Edison."

Typographically the new Edison house organ is most attractive, and very tastefully carried out on a high grade of stock in that warm, creamy tone known as India tint, the whole in full harmony with the high standard of the Edison product.

ACKNOWLEDGMENT.

The Talking Machine World has been in receipt of hundreds of holiday greetings from its friends in this as well as foreign countries. We cordially reciprocate all the good wishes expressed in these cards and thank our friends for their kind remembrances.

George L. Babson, general manager of the Phonograph Corporation of Manhattan, New York, Edison distributer, is receiving expressions of sympathy from his many friends in the trade upon the sudden death of his baby daughter.

TALKING MACHINE NEEDLES

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

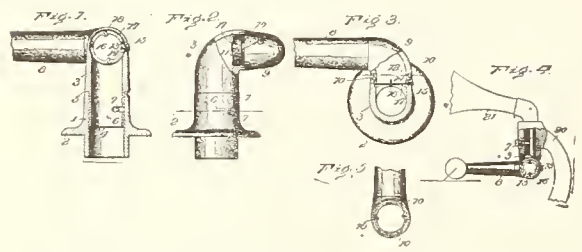
WASHINGTON, D. C., January 8.—TALKING MACHINE.—Clinton E. Woods, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 14,035. (Reissued.)

This invention relates to the sound conveyer employed in talking machines for connecting the sound box with the amplifying horn. This conveyer is frequently referred to in the art as a "tone arm."

One object of the invention is to produce a tone arm that is correctly designed, from an acoustical point of view, and with a continuous and unobstructed passageway for the sound waves from the vibrating diaphragm to the horn.

Another object is the production of a tone arm which shall be free from vibration and free from rattling of the parts, yet capable of universal movement.

A further object is the production of a standardized tone arm—that is, one which can be used to equal advantage on a "visible horn" machine or a



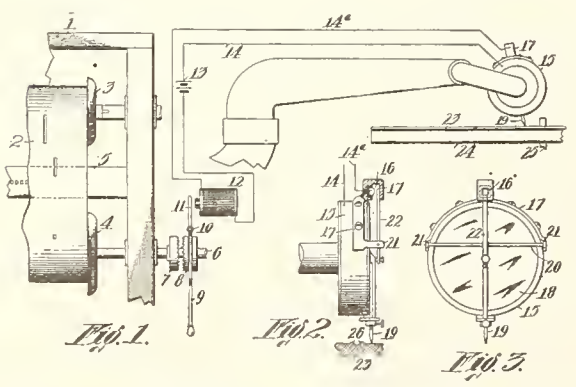
"concealed horn" machine—at the same time being simple and efficient in construction and attractive in appearance.

Figure 1 is a side view of a portion of the so-called "tone arm" or sound conveyer, mounted for use with a "concealed horn" talking machine so-called, showing the mounting therefor in vertical section; Fig. 2 is an end view of the same, looking from the right of Fig. 1, and partly in section; Fig. 3 is a plan view of Fig. 1, partly in horizontal section; Fig. 4 is a side view showing the tone arm in connection with a "visible horn" machine, and Fig. 5 is a sectional view showing details.

COMBINED PIANO PLAYER AND PHONOGRAPH.—Walter M. Davis, Paris, France. Patent No. 1,164,265.

This invention relates to a combined piano player and phonograph, and particularly to devices for starting the player record in predetermined relation to the phonographic record.

In prior Patent No. 958,730, dated May 24, 1910, means are shown for producing a record of a vocal or other selection upon a disc or record-receiving element of a phonograph, and for simultaneously producing a record of the piano accompaniment thereof upon the record sheet of a piano player. Having secured these simultaneous records, it is evident that means must be provided for starting the record of the accompaniment upon the player in predetermined relation to the record of the selec-



tion upon the phonograph. In prior patents Nos. 958,731 and 1,013,589, dated May 24, 1910, and January 2, 1912, respectively, devices are shown for starting the records in such predetermined relation, these devises comprising a separable connection in the driving mechanism of the piano player and electro-magnetic means for closing this connection, said means being controlled by a contact piece inserted in the phonograph record. When this contact piece came into relation with the metallic needle or stylus of the phonograph a circuit was closed which operated through the magnet to connect the driving mechanism to the piano player.

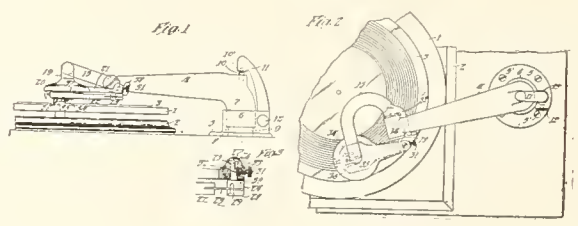
It is the object of the present invention to improve upon the devices shown in prior patents, and to provide electrical means for controlling the operation of the driving mechanism of the piano player which shall still be controlled by the phonographic record, but which shall not involve the addition of special electrical contacts and connections thereto.

Figure 1 is a side elevation showing a portion of a piano player, a portion of a phonograph and the controlling devices for starting the player, and Figs. 2 and 3 are side and front views respectively of the sound box of the phonograph showing the means by which the electro-magnetic circuit is controlled.

PHONOGRAPH OR TALKING MACHINE.—Thomas A. Edison, Llewellyn Park, Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,158,661.

This invention relates to phonographs or talking machines, and the principal object is to provide an improved construction whereby reproducers adapted to operate upon sound records having record grooves of the up and down or hill and dale type, and more particularly reproducers provided with floating weights, carrying the reproducer styluses, are adapted to be fed across the record surface by the coaction of the reproducer stylus and the record groove.

Another object of the invention is to provide an improved mounting for reproducers of the type specified above whereby they may be readily moved



into and out of operative position or held in proper operative position with respect to the record.

Figure 1 is a side elevation of a portion of a phonograph or talking machine embodying one form of the invention; Fig. 2 is a partial plan view of the same, and Fig. 3 is a view partly in side elevation and partly in section of a detail of construction.

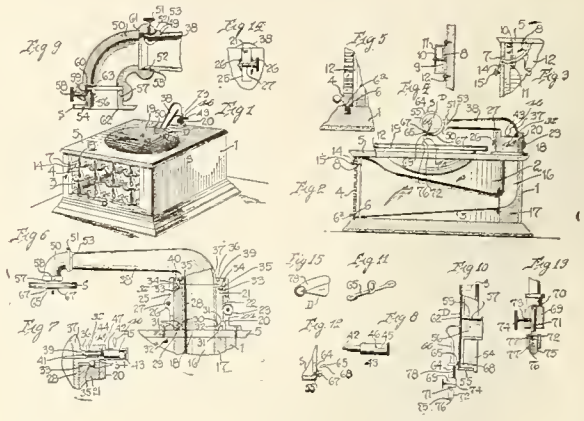
In all of the views like parts are designated by the same reference numerals.

SOUND-REPRODUCING MACHINES. — Annie W. Schmidt, Oakland, Cal. Patent No. 1,158,728.

This invention relates to certain improvements in sound-reproducing machines, and the object of the invention is to provide a device of this general character having novel and improved means whereby a reproduction of sound may be obtained with a maximum of tone quality and whereby the possibility of foreign sounds is substantially eliminated.

The invention consists in the details of construction and in the combination and arrangement of the several parts of the improved machine whereby certain important advantages are attained and the device is rendered simpler, less expensive and otherwise more convenient and advantageous for use.

Figure 1 is a view in perspective of a reproducing machine constructed in accordance with an embodiment of the invention; Fig. 2 is a vertical sectional view taken through the casing or cabinet of the device as herein embodied, with the sound-reproducing mechanism in elevation; Fig. 3 is an enlarged fragmentary sectional view illustrating the mechanism herein embodied for controlling the swinging side member or damper; Fig. 4 is an enlarged fragmentary detail view illustrating the keeper included in the locking mechanism disclosed particularly in Fig. 3; Fig. 5 is an enlarged fragmentary view illustrating in detail the locking means herein embodied for maintaining the swinging side member or damper in closed position; Fig. 6 is an enlarged view, partly in elevation and partly in section, of the sound-reproducing mecha-



nism as herein embodied, the sound box being shown adjusted to an inoperative position; Fig. 7 is an enlarged fragmentary view illustrating the means for holding the supporting arm included in the sound-reproducing mechanism against swinging movement; Fig. 8 is a view in elevation, with a part in section, of the locking member as disclosed in Fig. 7; Fig. 9 is an enlarged fragmentary sectional view of the elbow embodied in the present sound-reproducing mechanism and illustrating the coacting parts in operative connection therewith; Fig. 10 is a view, partly in side elevation and partly in section, of the sound box as herein embodied; Fig. 11 is a view in perspective, detached, of the butterfly mounting employed in connection with the sound box; Fig. 12 is a detail sectional view of the sound box illustrating an anchoring means for the butterfly mounting; Fig. 13 is an enlarged fragmentary view, partly in elevation and partly in section, illustrating certain details of the stylus arm and stylus member; Fig. 14 is a fragmentary detail view illustrating the means for expanding or contracting the barrel as herein embodied, and Fig. 15 is a fragmentary perspective view, on an enlarged scale, illustrating the tube mounting for the diaphragm.

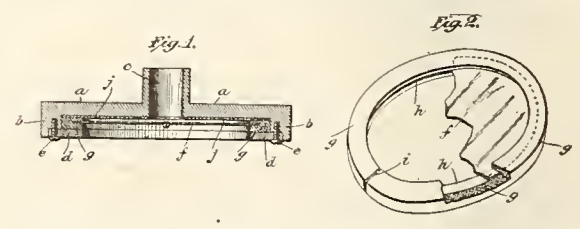
SOUND BOX FOR PHONOGRAPHS.—Clinton B. Repp, New York. Patent No. 1,163,854.

This invention relates to sound boxes for phonographs, and more particularly to the means for insulating the sound box casing so as to exclude the vibrations developed in the diaphragm therefrom.

The main object of the invention is to provide a sound box wherein the edges of the diaphragm will be firmly clamped in position through a medium which will absorb any vibrations passing thereto, which will be weather proof and not susceptible to climatic changes, and which will not deteriorate rapidly through aging.

A further object is to provide a structure of this character wherein the edges of the diaphragm will be completely inclosed by the vibration absorbent body so as to eliminate any possibility of vibrations passing to the metallic portions of the sound box.

A still further object is to provide in a sound box a uni-structural gasket supporting the dia-



phragm which will have a normal tendency to close upon the edge of the diaphragm, thus simplifying its application to the sound box. And a still further object is to provide a sound box wherein the metallic portions within the sound box will be sheathed by a resilient body to prevent the development of sound vibrations in the metallic portions of the sound box adjacent to the sound outlet opening.

The invention consists primarily in a sound box for phonographs, embodying therein a casing having a sound outlet opening therein, a diaphragm

AN ESTABLISHED AND SUCCESSFUL TALKING MACHINE LOCATION FOR RENT in the FIFTH AVENUE BUILDING, which faces Madison Square, at the Junction of Fifth Avenue, Broadway and Twenty-third Street.

THE STORE at Number Nine West Twenty-third Street, with show windows on the Fifth Avenue Building Arcade as well as on the street, IS FOR RENT.

The Fifth Avenue Building is managed by its owners, with whom negotiations can be made direct at their office in the building.

The Fifth Avenue Building Company

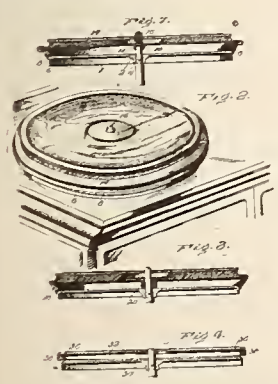
and a cork gasket supporting the edge of said diaphragm, said gasket having oppositely disposed portions adapted to be clamped upon said diaphragm, and means clamping said gasket upon the edge of said diaphragm, and in other novel features of construction.

Referring to the drawings: Figure 1 is a transverse section of a sound box embodying this invention, and Fig. 2 is a detail view in perspective of the packing gasket with the diaphragm therein, said diaphragm being broken away, and said gasket being partly broken away.

SUPPORT FOR TALKING MACHINE RECORDS.—Louis K. Scotford, Chicago, Ill. Patent No. 1,163,566.

This invention relates to turntables, or rather to cushioning supports to be secured to turntables of ordinary talking machines. It is known that a disc record gives out sounds and it has therefore been suggested that the disc record may be used without a sound box.

It is the object of the invention to overcome as far as possible the disc giving out the sounds referred to, except through the proper channel, i. e., the sound box.



It has been proposed to provide the turntable of a talking machine with a rubber covering having nibs or projections under the playing portion of the record. But when any cushion is provided which leaves an air space under the playing part of the record, even though that record may be supported at a number of different points, there is a hollow sound due to the fact that there are some points of the record, opposite the needle, where there is no direct support. The inventor discovered that the use of sponge rubber, particularly when this rubber is secured to a fabric stretched over the revolving disc, overcomes to a large extent the objections above referred to and also that the objections are in a measure overcome by a cushion of rubber stretched or suspended across the turntable so as to support the disc record under the whole part thereof opposite the playing part of the record.

In one of the preferred embodiments of this invention excellent results are obtained by stretching a fabric over the revolving disc with the sponge rubber on the fabric so formed as to contact with the back or under portion of the record opposite the needle. This construction provides a soft, yielding bed on which to lay the record while playing—a bed that will not be rigid, but which will allow the record to "give" more or less freely.

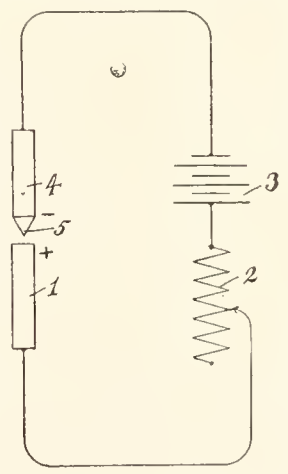
In the accompanying drawings Figure 1 is a sectional view of a turntable having the invention applied thereto. Fig. 2 is a perspective view. Figs. 3 and 4 are sectional views of modified forms.

COATED PHONOGRAPH STYLUS AND OTHER ARTICLE.—Engelhardt A. Eckhardt, Philadelphia, Pa. Patent No. 1,162,285.

This invention resides in articles of iron, steel or other metal, or combination of metal or alloy having a coating of metal, or combination of metals or alloy, alloyed therewith, for the purpose of making the point, edge, surface or the whole mass of such articles hard, hard and abrasive, wear withstanding, or having other desirable properties.

More particularly this invention relates to such an article having such a coating of tungsten, chromium, cobalt, molybdenum, etc., or an alloy of any of these with another metal, or an alloy of one of these with one or more of the others mentioned.

This invention resides in a stylus or needle for use in making phonographic sound records, or for reproducing sounds from sound records. Such a stylus consists preferably of a metallic stylus or needle having at its point and vicinity thereof a coating of tungsten, or tungsten alloyed with the metal of a needle or stylus. Such a stylus or needle is very hard, harder than tungsten itself, and successfully withstands wear and lasts many times longer than the ordinary stylus which, as well known, serves for reproducing from a relatively small amount of sound record and must then be replaced by a new needle. A stylus or needle of the character herein described will serve to reproduce from a very great number of average sized records without any substantial wear. And such a stylus or needle is inexpensive because of the very small amount of tungsten or tungsten alloy or other metal required and from the further fact that the process of making the same is simple and inexpensive.



In the drawing, 4 represents a phonograph stylus or needle having the pointed end 5. It is shown connected by a conductor with the negative terminal of the source of current 3, preferably a source of direct current, as a storage battery or dynamo-electric generator whose positive terminal is connected through the adjustable resistance 2 with the positive electrode 1 of tungsten, tungsten alloy or other suitable material, as molybdenum, cobalt, chromium, etc., or an alloy of any one of these, or an alloy of any one of them with other or others of them.

APPOINTED CHIEF CLERK.

M. M. Reinhard has been appointed chief clerk of the offices of the New York Talking Machine Co., Victor distributer, and will be in direct charge of the accounting and billing departments. Mr. Reinhard has been connected with the company for the past year and has won the friendship and esteem of all his co-workers.

"The LATEST in the World"

Sonora

CLEAR AS A BELL

Do you wish the "last" word in talking machines?

IN the Sonora is built everything that is NEW and practical for securing the best in music, making the SONORA the LAST WORD in talking machine construction anywhere in the world.

Particular attention has been given to the DESIGN of Sonora cabinets, as well as the finishing and general construction. Each cabinet is finished like a high-grade piano, with a brilliancy of appearance that stands out in striking superiority to the average run of phonograph cabinets.

Cabinets are all equipped with the Sonora Tone Modifier, enabling control of tone to fit the size of the room.

Write for the Special Dealers' Proposition for 1916, and secure option on the lucrative profits from your city.

SONORA PHONOGRAPH CORP'N, Manufacturers

GEO. E. BRIGHTSON, President

57 READE STREET NEW YORK

I. MONTAGNES & CO., Ltd., Toronto, Can. PIERSOL CARPET CO., Lancaster, Pa.

What Does This Picture Mean to You?

It illustrates the fact that the New Edison Diamond Disc Phonograph is a scientific and artistic accomplishment, lifted out of the realm of the talking machine into that of the finest musical instruments.

It illustrates a new era in musical history—an artist singing in direct comparison with her own records before phonograph experts who could not distinguish between the living voice and the instrumental Re-Creation. Similar tests have been made in every important musical center of the country with the same result.

WHAT DOES THIS MEAN TO YOU AS A DEALER IN MUSICAL INSTRUMENTS?

Just this—that the Edison Diamond Disc broadens the selling horizon and opens up a new field—the music lover who considers talking machines but mechanical echoes unworthy the title of musical instrument.

NOW, the test for you is:—Get dealers' terms on an instrument that proves its perfection by public demonstration, an instrument of the present *and* the future.

Just a line will do. Address us or the jobber in the list below nearest you.

The TALKING MACHINE WORLD

AND NOVELTY NEWS

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, February 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

"The FIRST in the World"

Sonora

CLEAR AS A BELL

Do you wish to be "first" in your locality?

WHEN the jury of experts at San Francisco awards high Tone Quality Honor to the Sonora, our representatives and ourselves have the greatest endorsement to our statement that "The Sonora is the first in the world."

Not only this, but we help the Sonora dealer by giving him exclusive territory. His rewards are equal to the amount of energy put into the work. Many Sonora dealers today are the leaders in their respective communities as regards VOLUME of sales and NET PROFITS.

"ELITE," $150.00
(Construction and Design Patented)
Circassian Walnut, $50.00 extra.

Golden, Fumed or Early English Oak, Sheraton Mahogany or Mahogany.
12-inch turntable. Extra strong double-spring motor, nickel-plated, playing six 10-inch records with one winding. Tone Modifier. Multi-playing needle. Sapphire needle. Diamond needle. Automatic starter and stopper. Equipment for playing all makes of disc records in the world. Trimmings nickel-plated. Envelope filing system, with capacity for holding 80 records. Compartment at bottom of cabinet for accessories.
Dimensions: Width, 23 in. Height, 46½ in. Depth, 23 in.

The record library of the world can be played on the Sonora—any make of disc records, whether for diamond, sapphire or steel needle. Sonora motors are NOISELESS, playing 3 to 15 records with one winding. Furthermore, many Sonora machines are equipped with an AUTOMATIC STOP that works perfectly, as well as a Motor Meter and Spring control.

WHAT EFFICIENCY MEANS TO TALKING MACHINE MEN.

Efficiency, the Art of Producing Effects, Never Meant More to the Business Man Than It Does To-day—The Degree of Efficiency Acquired and Employed Determines the Extent of Success or Failure Enjoyed or Suffered in Any Trade Venture.

In these days of sumptuously appointed "talker" shops and carefully trained salesmen, to the casual observer the art of efficiency has been brought to such a high standard that no further development seems necessary. That being true, there is all the more reason for concentrated thought upon this important subject. When all talking machine establishments are attractive, it becomes a difficult problem for any one dealer to forge ahead of his fellows. However, it behooves him to do this because, no matter how perfect an establishment may seem, there is always room for improvement, and when these improvements are put into effect they immediately stimulate not only the trade already acquired, but bring new customers into the fold as well.

In the old days of the talking machine business was business. To-day it is more. It does not mean, as it did then, simply being able to sell goods. The great strides this wonderful instrument has made during the past twenty years have created a tremendous demand; this demand has in turn brought keen competition. Competition is a thing to be welcomed with open arms by the efficient dealer, but for the plodder or the shirker it is a millstone round his neck pulling him down below the swirling waters of adversity.

Efficiency and competition are the best of friends and are of the greatest possible assistance one to the other, if sheltered beneath a roof where their talents are appreciated and allowed full scope.

An efficient dealer solicits competition because it brings with it the opportunity to surpass. He realizes that he must do this in order to succeed; he knows full well that fame will come only to the one who, by sheer ability in the art of efficiency, becomes supreme. The axiom with regard to "the survival of the fittest" stares him in the face, and he proceeds accordingly. He has an attractive store, a complete and well arranged stock, and a competent force of clerks; but so has Jones, down the street. Therefore, in order that he may outstrip Jones in the race for success in trade, he must go further than this.

He starts in by studying the manners, methods and means of his customers. He makes it a point to chat with them when they call upon him, playing the role of hospitable host. By doing this with adroitness and skill, he is enabled to acquaint himself with their ways and tastes. He familiarizes himself with their opinions, and, hence, can cater intelligently to their wants.

He does not doubt for a moment that his competitor, Jones, is honest, but he makes up his mind to go him one better and make a specialty of honesty. Realizing that the dishonest tradesman has no chance these days, he makes an appeal to his assistants, emphasizing the fact that in all things, no matter how trivial, he wishes the integrity of his establishment to remain untarnished. As he explains to them, "A store that perpetually maintains a reputation for square dealing, under all conditions, will be pretty sure to get the business plums if there are any."

Courtesy is another thing that is worth specializing, so he has another talk with his employes, in which he instils into their minds the importance of treating patrons not like automatons but folks. He asks them to learn to handle all who come into the store with tact, returning cheerfulness for grouchiness, avoiding all unpleasant arguments when possible to do so, acquiring the art of diplomacy and the habit of the sunny smile.

There is nothing like diplomacy when seasoned with a sunny smile, Mr. Dealer, to make your customers your friends. The efficient dealer realizes this to a greater extent than Jones down the street, hence his growing business and greater prosperity.

Did you ever think about charity as an adjunct to business as applied to your dealings with patrons? It is a charitable act to have a record in stock dear to the heart of your customer, and which he wants very badly, when he asks you for it. If you do not agree with me, experience the humiliation that comes with partly empty shelves, and you will change your opinion. The efficient dealer keeps a complete stock on hand whenever possible, and performs many charitable acts in consequence.

Another thing the efficient dealer does, which is well worth talking about, is to offer prizes for ideas. He conducts a monthly idea contest, in which he offers a first, second and third prize to the three persons among his employes submitting the best ideas during the month. Of course, each idea must have some merit in order that it may be considered at all, but when it shows promise of results it is given a fair trial and rewarded according to its ultimate worth.

Aside from the joy of the contest which this competition instils into his workers, it causes them to realize that the boss has confidence in their ability to help, not only with their hands but with their brains as well, and the fact that, in a sense, they are looked upon as partners, proves most gratifying. It also makes them loyal to the business and engenders a desire to have that business succeed because their ideas are in it. In addition to the monthly competition, there is a gold medal awarded to the worker showing the best record in general efficiency throughout the whole year.

There are not nearly enough dealers who have confidence in the ability of their employes to create new business through the medium of ideas. Call a meeting of your clerks, Mr. Talker Man, some bright morning, when human minds work to the best advantage, and ask for any hints which may be circulating among them eager to be at work in your service. You will be astonished as well as pleased at the result. In every talking machine establishment there are ideas imbedded in the minds of the employes which might be acquired by the proprietor for the asking, but which will probably never reach him until asked for—and that may mean never. A great many clerks of rare intelligence, while realizing that they have valuable suggestions to make which would be of extreme assistance to the firm, hesitate to offer them either through undue modesty or for fear of being considered overzealous.

Some employers do not care to have their subordinates "butt in," having perfect confidence in their own ability to run the business successfully; but, nine times out of ten, these are the fellows who are low in efficiency, and, because of that fact, are not getting their rightful share of trade.

Economy is synonymous with efficiency also because, to be efficient, you must use every facility at your command in the enhancement of your business without allowing the element of waste to enter in and take its toll of your profits. Wastefulness may creep in in many ways. Probably the greatest dissipation of property occurs through the careless handling of goods in the store and in the lack of care displayed in packing them for transit. The efficient dealer makes it a point to show each clerk how a record should be handled and packed, and when misfortune results he knows just what to do in the matter.

While both machines and records of all makes have now reached a point where they are practically foolproof, they still demand a certain amount of consideration, and the efficient dealer sees to it that his employes either give them the treatment they deserve or else depart for other fields of endeavor. A careless clerk is a great handicap to any business, and his fault should be corrected or his services dispensed with.

The efficient dealer is constantly moving forward in the race for trade supremacy. The sun does not set at the end of any day without it sees some advancement made, a new idea incorporated in the business, or a new customer gained.

This is real progress, and can be enjoyed by any talking machine dealer, be he great or small, if he will but specialize in efficiency.

HOWARD TAYLOR MIDDLETON.

TWO NEW BUILDINGS FOR VICTOR CO.

An Addition to the Cabinet Factory and a New Building for Pressing Records Will Be Erected at Camden, Doubling Record Output.

(Special to The Talking Machine World.)

CAMDEN, N. J., February 7.—The Victor Talking Machine Co. will erect a six-story-and-basement addition to its cabinet factory on Market street, Camden, from Delaware avenue eastward, and also a six-story building for record pressing on Cooper street, west of Delaware avenue. The plans are now being prepared by the architects.

The proposed factory extension will completely build up the block from Delaware avenue to Front street and will add 140,000 square feet of floor space to the present cabinet factory, which was recently completed. The group of Victor buildings, with the new extension, will cover nearly thirteen acres.

A tower, 205 feet high, in the center of the Market street facade, will be a striking feature of the new construction. The company's trade-mark, executed in glass and illuminated at night, will be placed looking in four directions from the tower's top. The Flood system of lighting with reflectors will make the illumination effect visible for miles.

Reinforced concrete, with rolled-steel sash and wire glass, will be the construction throughout. The plans also contemplate the veneering of the present cabinet factory on Delaware avenue to harmonize with the new architecture.

The record-pressing building is to be of six stories, of full fireproof construction, 91 by 283 feet, and connected with the main plant by bridges. On account of the nature of the ground this building will be placed on concrete piles. With the new building in operation, it is estimated that the record output of the company will be more than doubled.

DEALERS JOIN IN PUBLICITY.

Talking Machine Houses of Topeka, Kan., Carry on Joint Program of Advertising and Recitals Prior to Visit of Opera Company.

(Special to The Talking Machine World.)

TOPEKA, KAN., February 8.—A remarkable and successful example of co-operation among talking machine houses in this city has been instanced in connection with the local appearance of the San Carlo Grand Opera Company, which will give one performance only, on February 9, and present "Cavalleria Rusticana" and "Pagliacci." The local talking machine houses got together and for a week or more have been running a joint advertisement headed "Announcement Extraordinary" and inviting the public to hear the numbers from the two operas sung by famous artists on the various leading makes of machines.

On Wednesday, Thursday and Friday of last week the day was reserved for a recital at a different store. On Saturday there were two recitals in the afternoon and one in the evening. Those participating in the joint program of advertising and recitals were the J. W. Jenkins' Sons Music Co., featuring the Victrola; the Emahizer-Spielman Furniture Co., featuring the Columbia Grafonola, the Sonora phonograph and Columbia records; the Crosby Bros. Co., with the Edison disc phonograph; the Guild Music Co., and the Mills Stores Co., with the Victrola.

SEVERE STORMS RETARD PACIFIC COAST TRADE.

Talking Machine Dealers' Association of San Francisco Doing Splendid Work in Getting Trade Together—Making Cabinets in Portland—Pacific Phonograph Co. Demonstrating Edisons—Improvements in Sherman-Clay's Oakland Store—News of the Month.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., January 29.—A succession of heavy storms during January has tended to retard the talking machine business, in common with all other lines; but, for all that, sales with nearly all houses are said to be running ahead of last year, and the one complaint is of insufficient stock to meet all demands. It is safe to say that the total business would be quite a bit larger if all the dealers could get as much stock as they want. Prospects for the future are excellent; in fact, some houses already have a lot of business ready to close within the coming month, and with the general industrial and business revival that has set in all over the Pacific Coast this is certain to be a big year.

Dealers' Association Makes Rapid Progress.

The Talking Machine Dealers' Association of San Francisco and Oakland held its regular monthly meeting last month, the trans-bay trade being well represented. The association is certainly getting the dealers together in great shape, and the growth of good fellowship is seen in the practice adopted of meeting at luncheon once a week, quite a lot of the dealers usually being present. The principal question taken up at the meeting was to find a solution for certain practices followed by tricky customers, especially the matter of taking records on approval or buying records and bringing them back to exchange. Many interesting experiences were related in this connection, instances of customers getting a lot of records on approval to use for some special occasion, and then sending them all back, and the common practice of taking records on approval and returning old ones. It was decided to work towards abolishment of the privilege of taking records on approval, and a committee was appointed to decide on definite action.

Sherman, Clay & Co. Improvements in Oakland.

Sherman, Clay & Co. are making some important improvements in their Oakland store, by which their retail talking machine department will be given much more prominence. The talking machine department has formerly been in the basement, but will be placed under the balconies on the ground floor, the sheet music department, which has occupied that space, being moved to the center. A fine set of demonstration rooms is being installed, which will give the house about the finest talking machine department in Oakland. In the San Francisco store a record has been kept for the past year of the number of persons going up in the elevators to the different departments, and comparative figures show a heavy increase for the talking machine and small goods departments for January.

Heavy Machine Demand Continues.

Andrew G. McCarthy, of Sherman, Clay & Co., reports a surprisingly good business in machines under conditions that have existed since the holidays, together with the usual post-holiday rush on records, a good many of which are hard to supply in sufficient quantity. Mr. McCarthy has been elected a director of the Down Town Association, of which Byron Mauzy was recently made president. It is noted that the dealers are all waiting anxiously for the new Victor tungs-tone needles, which have aroused a great deal of interest.

To Make Columbia Cabinets on Pacific Coast.

To lighten the pressure on its Eastern facilities, and at the same time make a material saving in freight, the Columbia Graphophone Co. has just closed a deal to have its cabinets for the Pacific Coast division made at Portland, Ore., the announcement having been received from that city that the contract has been received by the Carman Manufacturing Co., a large furniture establishment. Former efforts have been made to have the cabinets made on the Coast, with only partial success; but the advance of the industry in this section now enables the manufacturers to turn out goods of a quality and finish equal to any in the country, and the new arrangement is regarded as practically permanent.

Fred A. Denison, coast manager for the Columbia, reports a good business for this season, but says there is still a serious shortage of machines. He believes the needs of this territory can be provided for more promptly when the manufacture of the goods in this vicinity is once well under way. W. E. Henry, the local manager, is back at the office after a few days' illness. He says the year has opened better than last year and he has enough business lined up already for February to bring that month ahead of the corresponding period of 1915.

J. E. McCracken New Manager of Edison Shop.

J. E. McCracken has taken over the management of the Edison Shop at 235 Geary street, succeeding Mr. Baley, who has been in charge for a couple of years past, and has left to go East. Mr. McCracken is one of the most thoroughgoing Edison men on the Coast, having been associated with A. R. Pommer, of the Pacific Phonograph Co., for ten years or more, first at Sacramento and later in this city.

Demonstrating the Edison Machines.

The Pacific Phonograph Co. has made several improvements in its offices, enlarging and inclosing the general office. A. Gabler recently arrived here with a company of ten special demonstrators from the Edison laboratories, and has divided the city into districts, in each of which one of the demonstrators is giving everybody a chance to hear the new Edison disc phonograph, giving recitals in churches, hotels, schools, labor union halls, lodges, factories, etc. A big hit lately has been the act of Mayo and Tulley at the Orpheum, who let the Edison do their work in singing alternate verses of their songs. In a couple of weeks Miss Elizabeth Spencer will start out to give Edison tone tests in all the larger towns of the Coast.

Busy Times in Mauzy Department.

Charles Mauzy, manager of Byron Mauzy's talking machine department, is having some new lights put in the department. He announces that this house has gone into the Columbia business in a large way, placing an important contract for machines, and will hereafter keep a full line of machines and records. A large line of Edison and Victor goods is also kept on hand. Byron Mauzy got out the programs for the winter series of municipal concerts in the Exposition Auditorium, and used the back to advertise the Alice Nielsen records.

H. Hauschildt, of the Hauschildt Music Co., made a visit to his Sacramento branch recently, and made arrangements to open a talking machine department there.

NEW GRAFONOLA PRICE CARDS.

The advertising department of the Columbia Co., New York, has prepared for the use of its dealers a set of very attractive Grafonola price cards. Small round wooden stands are furnished with these cards, and the cards and stands are a substantial improvement over the present style. The coloring of the card is green, matching the cloth of the turntable and making a dignified and attractive appearance.

The cards are presented to Columbia dealers with the company's compliments, and additional sets will be furnished as required.

Floyd Evans has resigned his position with the Metropolitan Insurance Co. to enter the employ of the Edison Diamond Disc Studio on North Main street, Gloversville, N. Y.

W. L. Black, East St. Louis, Ill., is developing a very excellent talking machine business in that city.

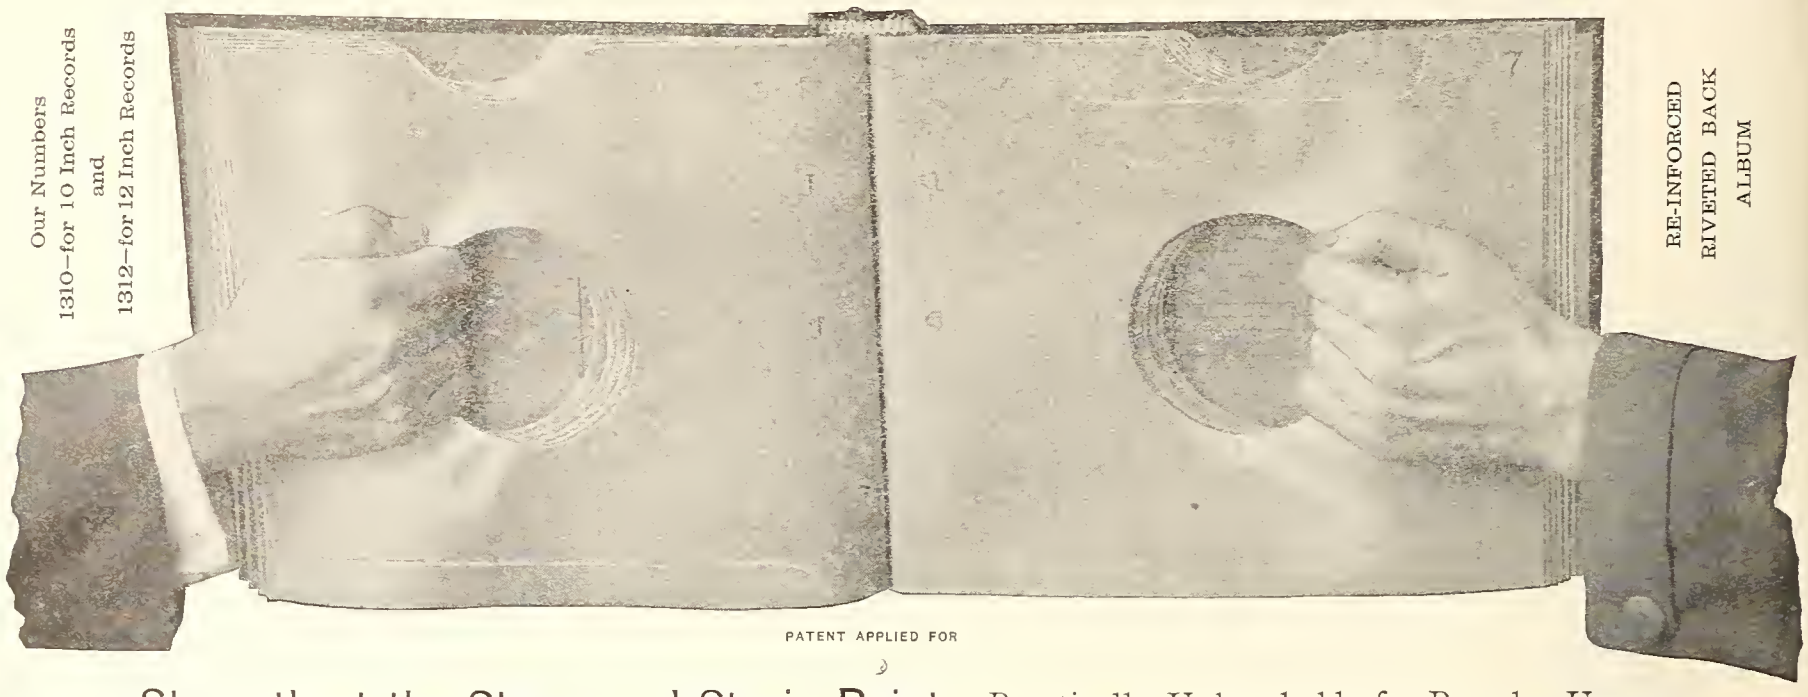
THE PULLING TEST—THE STRENGTH IS THERE

THE STRONGEST ALBUM MADE *AT ANYWHERE NEAR ITS LOW PRICE*



Strength at the Stress and Strain Point. Practically Unbreakable for Regular Usage.

THE WELL-KNOWN "NATIONAL" RECORD ALBUMS ARE ALWAYS THE LEADERS

THE ONLY CONVENIENT AND SAFE WAY TO PROTECT DISC RECORDS

These Albums will pay for themselves in a short time by preserving Records. When full the Albums are flat and even like books. They will fit in a library cabinet or book case, or they will lie flat on one another.

We manufacture disc Record Albums containing 12 pockets to fit the Victrola cabinets Nos. X and XI. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc Records.

For durability, finish and artistic design, our Albums have no equal. They are made in the most substantial manner by skilled workmen. We sell our superb Albums at big discounts to meet competition. Shall we quote prices?

THESE ALBUMS ARE THE BEST FOR VICTOR, COLUMBIA AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

ANNUAL BANQUET OF EDISON CLUB

Held in Newark, N. J., on February 5 Was as Usual a Most Enjoyable Reunion.

There is one day, or rather evening, out of the 300 days of the year when the several thousand employes of Thomas A. Edison, Inc., curb a little of the energy and enthusiasm which pervade the office and factories, which seem surcharged with the industrious spirit of Mr. Edison himself, and that event is the annual banquet of the Edison Club, an organization of Edison employes.

February 5 was the date on which loyal Edison workers this year journeyed to Newark for a general exchange of good fellowship and incidentally the consumption of food prepared by the chef of the Washington hostelry. Mr. Edison's part on the program was the holding of an informal reception, after which Edison vocal and instrumental artists entertained with favorite phonograph selections and the motion picture division featured some of its screen favorites in brief skits.

Every department took a hand in making the evening one to be remembered throughout the year.

The Davis Piano Co., of Alton, Ill., has taken on the Columbia line of talking machines, for which it has arranged attractive quarters.

PHONOGRAPHIC BURGLAR ALARM.

New Device Whereby Police Will Be Called Over the Telephone by a Phonograph, is to be Placed on the Market by New Company.

(Special to The Talking Machine World.)

ROCHESTER, N. Y., January 31.—The International Alarm Co., of Rochester, has filed a certificate of incorporation with the County Clerk. The company is capitalized for $100,000, divided into 2,000 shares, and begins business with $100,000. The directors are Otto Bitter, 39 St. Paul street; Howard C. Marcellus, 407 Chamber of Commerce Building, and John Scheib, 771 St. Paul street.

The company intends to market a burglar alarm which consists of a phonograph connected with the telephone. Any disturbance of a door or window starts the phonograph after the telephone receiver has been removed automatically. For three minutes the phonograph recites the fact of the attempted burglary into the ears of a central office man.

CHOIR PRACTICES WITH GRAFONOLA.

J. F. Hammond, Jr., organist of one of Brooklyn, N. Y.'s, prominent churches, recently inaugurated a new departure in choir training which proved very successful, and which can doubtless be profitably followed by other churches.

A volunteer choir at this church had occasion to render portions of "The Messiah." A volunteer choir with but six rehearsals did not tempt the director, and one of the sopranos suggested the use of a Columbia Grafonola, and the instrument, with "The Messiah" records, was accordingly purchased.

Mr. Hammond, referring to the results of this novel style of rehearsal, said: "The choir would listen to the Grafonola and watch their books, singing their parts softly so as to familiarize themselves with the entrances, flow of parts, etc. Then the Grafonola would be stopped and the portion sung through with the organ, following which the machine was started again and the difference noted."

ANOTHER NEW VICTOR BUILDING.

(Special to The Talking Machine World.)

CAMDEN, N. J., February 10.—Work has been started on razing the two-story dwellings on Pearl street, between Front and Point streets, to make way for another new building for the Victor Talking Machine Co. The new building is expected to be completed in a very short time. Pearl street is a new boundary line for the rapidly growing plant of the Victor Co., which has hitherto not ventured much above Linden street.

OWN PRAYERS AT FUNERAL.

(Special to The Talking Machine World.)

EDWARDSVILLE, ILL., January 29.—A letter received by friends of the Rev. William Hays Scott, a former clergyman, revealed that at his funeral a few days ago in Alameda, Cal., phonograph records of prayers which he had said twelve years ago were played. Scott had given the records to a friend with instructions to have them used at his funeral.

Cousins & Harland have bought out the piano and talking machine business of S. Raney, Hanford, Cal.

NEW YORK, FEBRUARY 15, 1916.

In assuming, as associate editor, a part of the hallowed chair of my late father, I desire only to emphasize, with all fitting dignity, that The Talking Machine World will continue to be dominated by the spirit of the late Colonel Edward Lyman Bill. Indeed, it cannot be otherwise—so indelibly has my father left his individual stamp of "white" journalism upon every one and everything connected with this publication.

The present staff has been shaped into master form by the hand of the late Colonel Bill. The after outcome of this can be nothing short of a reflection of the editor who has so recently been called into God's home—and through the earnest efforts of the staff it will be a mighty true reflection.

Adherence to clean principles of journalism is what enabled my father to mold the present efficient staff, and adherence by that same staff to all that is straightforward in trade journalism is the thing that cannot but maintain The World as a valuable constructive asset to the talking machine industry—as the enduring monument to the fair-minded editor who has left us.

J. RAYMOND BILL.

THE new year is now well on its way, with business conditions in the talking machine trade of the best. There was practically but little lull in January following the unprecedentedly large holiday trade, and reports reaching The World from widely separated sections of the country would indicate that a most optimistic spirit exists in talking machine circles.

There is a constantly broadening tendency in all departments of the trade, and those dealers who are giving serious consideration to progressive plans and policies of business development are winning and are destined to win a large measure of success during 1916.

As the industry grows, competition is becoming keener, and dealers everywhere recognize that attractively arranged stores are an absolute necessity to their success; moreover, that various means must be adopted to interest the public in their establishments and in the products which they are handling. There must be not only well considered publicity, but the importance of recitals at frequent periods should not be overlooked.

There are dealers who have built up a great record business by keeping in touch with customers monthly when the new lists of records come out. There are others who have taken the entire lists to the homes of wealthy people and received large orders. Nothing should be overlooked, for everything counts. The point is that it is the man who is "on the job" constantly—the man who is alert to every opportunity—who is going to reap the largest and most profitable trade harvest this year.

Optimism and confidence are great factors in success, but these are often attributes of the lazy and indifferent man. Right action, however, combined with confidence and optimism will always win out. There must be good, straightforward, sincere application and effort, to become an individual factor in the business world—in other words, to enable one to stand above his fellows in the mercantile world.

THE right of a manufacturer of a patented product to exercise full control over its merchandising was established in a most impressive way in the decision handed down by the United States Circuit Court of Appeals in the case of the Victor Talking Machine Co. versus R. H. Macy & Co., which was reported in the news columns of last month's World.

This case has attracted considerable attention in the talking machine trade because of the importance of the matter at issue, and the decision, so sweeping in its confirmation of the Victor Co.'s contentions, has acted as a virtual stabilizer as far as eliminating interference with the manufacturers' right to regulate the prices and conditions on which his goods may be sold.

The observance of contractional relations between manufacturers and their distributing forces is absolutely necessary in order that the best results may be obtained for all concerned.

The talking machine trade was one of the first to build its business on an adherence to the fixed price policy in merchandising, and the wisdom of this policy has been substantiated by the great measure of success which has attended the development of the industry in all its branches.

Remarkable progress has been made, thanks to the loyalty of the great army of distributers and dealers who have worked in harmonious relations with the great producing companies who have formulated plans for the manufacture and sale of their goods.

In the furtherance of the price maintenance idea loyalty is absolutely necessary, for there are those in various parts of the country who seek from time to time to offer standardized goods at less than the established price, and if this practice were countenanced to the least degree it would undermine the principle upon which the talking machine industry has been so successfully built—it would mean a depreciation of name value, the lowering in the public mind of the quality of the goods, and of the character of the concern that makes them.

It will be observed that it is after the value and quality of a product has been emphasized and established publicly and the demand created from the public that the price-cutter steps in and gets busy. He takes the widely-known article and reduces its price, not for the purpose of increasing its sale, but rather to attract customers on the strength of a bargain price, so that he may sell other products at a greater profit than the standard price goods.

The decision in favor of the Victor Co., upholding the price maintenance principle, will meet with the heartiest approval. It is in line with the most modern conception of correct merchandising. It prevents price anarchy; it insures the distributer and the dealer a fair income, and protects the public against unfair treatment.

The selling rules which have governed the talking machine industry have been wise ones, and it is to be hoped that price stability will ever remain the dominating influence in the talking machine trade.

MONTH after month sees the talking machine exercising a greater influence in educational fields. Whether in the school room, the concert hall, the home, or the church, it has won a commanding position—one that is absolutely unique in its power to instruct and entertain. College professors, eminent musicians and leading men in all walks of life, acknowledge the great debt that is due the talking machine as a factor in disseminating a knowledge of music in all its forms and as a valuable aid in all kinds of educational campaigns. The news columns of the daily papers tell of the part the talking machine is playing in everyday life. The paragraphist has been compelled to shelve his puns about the talking machine, for it has won by sheer merit an unassailable position in the esteem of all interested in the musical, social and literary uplift of our people.

Of course, this recognition would not be possible were it not for the tireless work of our great manufacturers and inventors, who have so developed and perfected the talking machine that it has compelled appreciation by reason of its merits. That the tendency in the manufacturing field is upward and onward goes without saying. It is an American trait, in the manufacturing field at least, not to rest on laurels won, but rather to aim for new accomplishments. This is the foundation upon which new and greater fame is built.

THERE are, unfortunately, not a few people who have no idea of the general value to the community of efficiency in all private undertakings and affairs. They have no conception of the widespread, indirect, community benefits of wealth, wherever owned. Distinguished men, leaders in public life and acting guides to social progress, have been known to declare that the economies of certain modern methods of production were of small value because the benefits were absorbed in a few large fortunes. This idea is at the bottom of much of the antagonism to large organizations; a brief that even though they are more efficient, the efficiency benefits only a few. But the progress of the world is made by the changes in methods which enable a given task to be performed in less time than before, so that either the volume of a given product may be increased, or a portion of the labor previously employed may be transferred to other purposes. The community is interested in the multiplication of products; the more there are the greater the general distribution will be, and the more capital is accumulated and used in production, and the more effective the organization of industry is made, the greater the supply of products will be. Every economic achievement has its final result in more products.

We deplore the destruction of property and the waste of energy in the war because we see it acting as a check upon production, raising the cost of necessaries and halting the progress of the world and yet the waste of inefficiency, of mismanagement, of failure to use the most effective agencies and methods, is as real a hindrance to social progress as the wastage of war.

AS The World closes this month, the executive committee of the National Talking Machine Jobbers' Association is holding its mid-winter meeting in New York, the dates set being February 14 and 15, when a number of important matters are to be up for consideration, particularly the suggestion made at the last conventions of the music trade associations, that the Talking Machine Jobbers' Association should be represented in a national body called a Music Trade Chamber of Commerce.

What action will be taken is not known at this writing, but the merging of associations has not, as far as we can learn, made a strong appeal to the Talking Machine Jobbers' Association.

It is interesting to note that the Edison Jobbers' Association will hold its sessions in New York around the same time as their confrères who handle the Victor products. This is the first time in some years that the jobbers handling the lines of two of the leading talking machine manufacturers have met in the same city at the same time.

PERSISTENT advertising has never yet failed to pay. This has been demonstrated in The World as well as in the leading trade paper in every industry. The article advertised must, of course, have merit, must be truthfully exploited, and when backed by an enterprising organization, success is inevitable. Pertinent to this subject a little talk which appeared recently in Agricultural Advertising conveys a moral worth considering:

"Do not get the idea that advertising you do in your local territories is not helpful. Do not get the idea the advertising of the manufacturer is not helpful. It works sometimes like this:

"Out here in Minnesota you have lots of snow. Each individual flake of snow amounts to little. Taking the flakes together they stretch a wide blanket across the State—a task of gigantic magnitude if put up to one snowflake.

"Advertising works like this. Each little advertisement reaches a few persons, and each succeeding advertisement reaches a few more, and pretty soon you have leavened the territory you are covering with a knowledge of your goods.

"This is the kind of assistance and co-operation you dealers have a right to expect from manufacturers you represent. When you get it, you will find the public will not seem so distant nor hard to get at. By co-operation, manufacturers and dealers are achieving splendid results.

"General advertising is like a great national business card handed to customers and prospects before you call on them. You see actual traceable results of this advertising whenever you call on a man and he says, 'Yes, I know your proposition, and I am glad to hear you are handling it in this territory.'"

THE reintroduction recently in the House of Representatives of the Stevens-Ayres Bill, with a number of important amendments incorporated, has aroused new interest in the efforts being made by a large body of manufacturers and merchants in the talking machine and other trades throughout the country to have this measure, to establish a system of standard one-price, one value goods, passed by Congress. Some of the arguments used by many opponents of the Stevens bill were to the effect that the provision for the maintenance of prices made no allowance for price variations due to transportation charges. This is now overcome. The amended bill specifically permits discounts for cash and for quantity and allowances covering costs of transportation.

YOU can buy the same goods at many places. Some of these places are larger or smaller, but they all sell the SAME goods. Why do you PREFER to go to ONE?

It is because of the service. It is because YOUR desires are not only anticipated but are properly cared for in the most efficient manner.

And the second paragraph explains why

Pearsall Victor Service

has grown so rapidly; why the business has increased by leaps and bounds; and why the number of dealers now RELYING upon Pearsall Service is larger than ever. Why not join this class of fast growing dealers?

Silas E. Pearsall Co.

LECTURES SHOULD BE RECORDED.

Recorder of the University of Pennsylvania Thinks Professors' Talks Should Be Preserved for the Benefit of Future Generations.

(Special to The Review.)

PHILADELPHIA, PA., January 31.—Recorder George E. Nitzsche, of the University of Pennsylvania, has suggested the advisability of making talking machine records of lectures and talks given by the university professors and filing these records in the university archives to be used in instructing future undergraduates. In this way generation after generation of students would receive the benefit of hearing verbatim the lectures of prominent authorities in all branches of learning, even though those authorities might be no longer living. Recorder Nitzsche also suggests that moving pictures of delicate operations performed in the university hospital should be made for the benefit of medical students all over the world.

The idea of recording college lectures, if carried out to an ultimate degree, would make possible a college in the future with no faculty save a battery of talking machines and an attendant to wind them up and change the records as the different classes were in session.

CLINTON CO. HAS NEW DEPARTMENT.

Purchases Business of the Hartford Phonograph Co. and is Building Up a Good Trade in Talking Machines and Records.

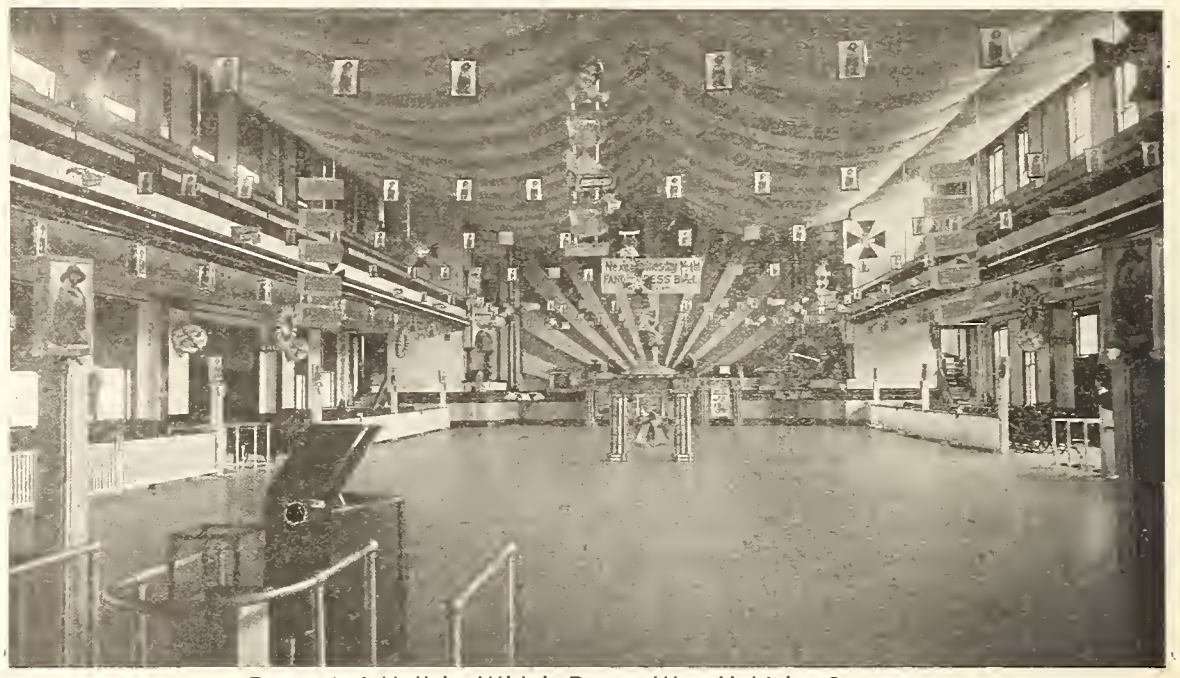
(Special to The Talking Machine World.)

HARTFORD, CONN., February 10.—The A. B. Clinton Co., piano dealer at 231 Asylum street, has purchased the stock and good will of the Hartford Phonograph Co. and has opened a talking machine department in its salesrooms. The Main street store of the Hartford Co. will be discontinued and the Hartford name will not be used, as the prestige of the Clinton Co. is sufficient to warrant an excellent business. Two handsomely appointed demonstration rooms and a large record department have been installed on the main floor of the piano store, and an exhibit of Victor Victrolas is located on the balcony. A special wagon delivery service has been inaugurated for the benefit of the talking machine trade to insure prompt and safe delivery of machines. The Clinton Co. reports that the new line is showing splendid results already.

W. L. Rhein, of Belleville, Ill., has entered the talking machine business and has arranged to handle the Columbia line. Mr. Rhein has conducted a piano store for several years in Belleville.

GRAFONOLA SUPPLIES THE MUSIC AT A NOVEL DANCE.

The National Biscuit Co., at Syracuse, N. Y., recently gave a novel entertainment in the Public Dancing Academy at that city, which it designated as an advertising dance. The decorations consisted of its own advertisements and the music consisted of Prince's Orchestra, through the medium of a Columbia Grafonola. The attractive appearance of the hall may be gleaned from the accompanying photograph, and the originality of the affair was responsible for lengthy accounts in the local newspapers. All of these accounts referred to the important part played by the Grafonola in the evening's enjoyment and the success of the affair.



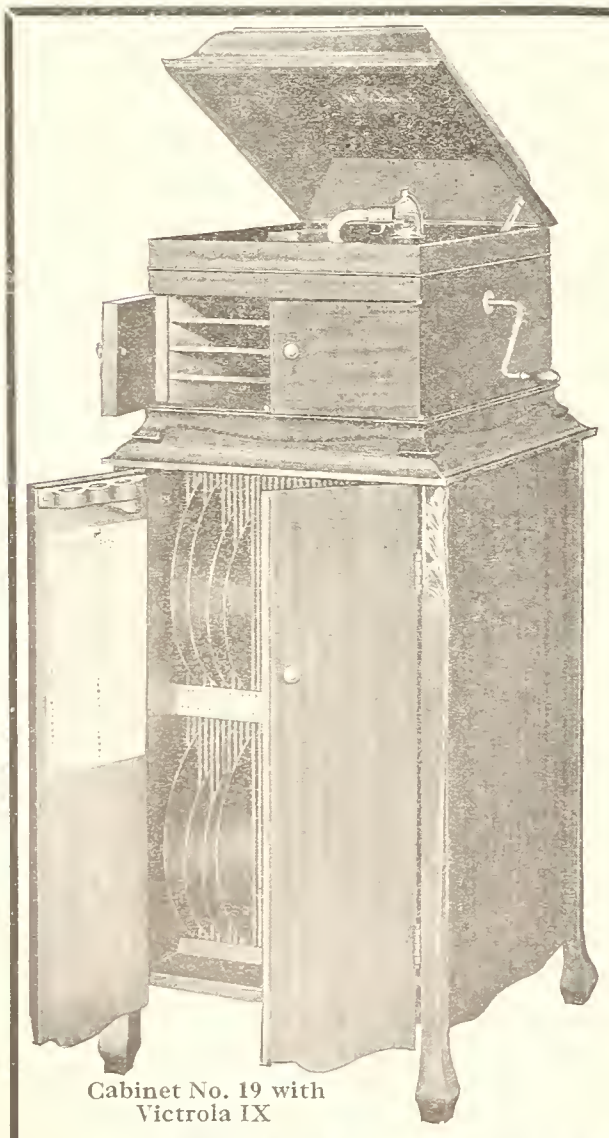
Decorated Hall in Which Dance Was Held in Syracuse.

ENTERS TALKING MACHINE WORLD.

(Special to The Talking Machine World.)

COLUMBIA, MO., February 8.—The Parker Furniture Co., one of the old conservative, high-class furniture houses in this city, has entered the talking machine field and has been doing well with the line of Vitanolas, and recently signed up the Columbia Co. D. B. Robnett is department manager.

The Piano and Talking Machine Exchange has been opened in the Leigh Block, Augusta, Me. C. H. O'Brien, a well-known pianist, is the manager.



Cabinet No. 19 with Victrola IX

Originators of the Felt-Lined Cabinet
Avoid Inferior Imitations.

Two Big Sellers of the Big Selling Line

The two SALTER FELT-LINED Cabinets that lead today and have always been our biggest sellers are the two styles shown here.

The Victor Victrola IX

in combination with **Salter Cabinet No. 19** is always especially attractive to the buyer. In design and finish the cabinet is in perfect harmony with the machine. The felt-lined compartments afford ample protection for records. Built-up top holds machine firmly in place.

The Columbia "Favorite"

is handsomely supplemented by the **Salter Cabinet No. 112**, made especially for this machine, and is a perfect match in every way. Built-up top holds machine firmly in place.

Salter Cabinets are Quality Cabinets

Woolworth Building, New York

THE VICTOR EDUCATIONAL DEPARTMENT MEETS.

Members of This Department, Working in Every Section of the Country, Gather at Camden to Plan for Enlarging the Usefulness of the Victrola in the Public Schools.

The mid-winter meeting of the traveling representatives of the Victor educational department was held at the Victor office in Camden, January 3 to 8. The week's meeting proved to be the most interesting in the entire history of the department. In the past five years trained Victor representatives—teachers, supervisors and musicians—have been sent throughout the country to assist the dealer and primarily to help the teachers. The director of the department, Mrs. Frances E. Clark, called in the various representatives from California, Nebraska, Iowa, Minnesota, Illinois and Ohio. Mrs. Clark, who believes that each representative should be thoroughly equipped in every branch of school work, arranged an interesting series of model demonstrations in the public schools of Camden and Merchantville. Members of the department gave model programs to primary, intermediate, grammar and high school grades, illustrating every branch of school work. Another interesting session was spent under the guidance of Miss Ruth Burchenal, of New York, in going through the familiar folk dances as well as the old English country dances, records of which have recently been made under the direction of Cecil Sharp, the English expert. These old dances, by the way, will be extensively used this year in the many observances of the Shakespeare tercentenary. In round table conferences the Victor educational work was analyzed and many new plans which will add greatly to the Victor prestige were discussed.

Among the social diversions was the concert of the Boston Symphony Orchestra, with a Victor artist, Mme. Melba, as soloist, and the department's banquet at the Ritz Carlton, Philadelphia. The week's meeting closed with an interesting event which was attended by officials and representatives of every department of the Victor Co. Everett E. Worthington gave a brief resumé of the year's Victor work at the Panama-Pacific Exposition. This interesting talk was followed by a lecture by Branson M. DeCou upon the "Art of the Exposition." Mr. DeCou, always genial and substantial, illustrated his talk with beautiful colored slides made from his own photographs of the big fair. This lecture recital has formed a regular part of Mr. DeCou's recent educational campaign and is in great demand in the schools everywhere.

The educational representatives left for their various fields of labor with the knowledge that 3,100 cities and towns now use the Victor as a regular part of school equipment. This year much of the educational work will be extended to schools which already have Victors, bringing to their attention the many wonderful new educational records now available.

JOIN BLACKMAN TRAVELING STAFF.

The Blackman Talking Machine Co., New York, Victor distributer, has added to its staff of traveling representatives Alexander J. Wilkins and James H. Giles. They will succeed Messrs. Burnham and Reinhard, who severed their connection with the company last week.

Mr. Wilkins is well known in the Victor trade, having been associated with the Blackman Talking Machine Co. several years ago, and more recently being a member of the Victor staff of Frederick Loeser & Co., Brooklyn, N.Y. Mr. Giles is well versed in talking machine merchandising, having been connected with the Musical Instrument Sales Co. and the Sonora Phonograph Corp., New York.

HERCULES CO. MOVES.

The Hercules Talking Machine Supply Co., handling talking machine motors, tone arms, turntables, etc., and formerly located at 611 Broadway, moved on February 8 to 32 Union Square East, New York, near Sixteenth street.

EDISON JOBBERS TO MEET.

Association Will Hold Its Annual Meeting at the Knickerbocker Hotel, New York, February 14, 15, 16—Dealers' Convention Coming.

The Edison Jobbers' Association will hold its annual meeting at the Knickerbocker Hotel, New York City, February 14, 15 and 16.

Two days of the convention will be devoted to executive business, when the annual election of officers will take place and the matter of a definite date for the dealers' convention will come up for discussion. The present indications are that this meeting will be held some time in May. Wednesday, the 16th, will be taken up by lectures on sales promotion work. After the close of the meetings in New York the association will journey out to the Edison works at Orange, where they will be accorded an informal reception.

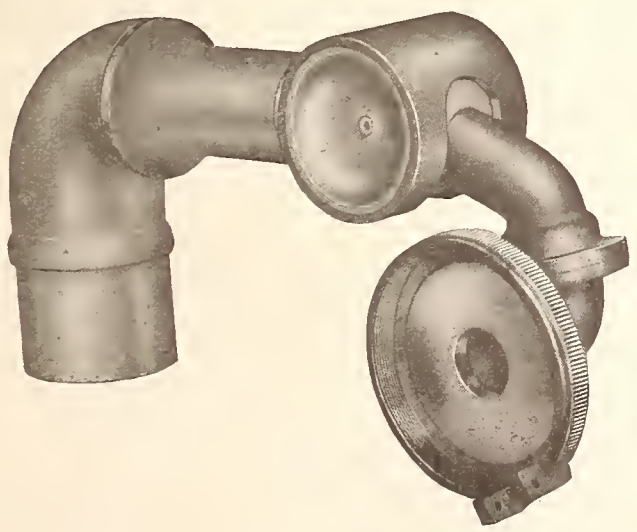
RESOLUTIONS ON COL. BILL'S DEATH.

Press Club and Republican Club Prepare Resolutions of Sympathy on Death of the Late Editor of The Talking Machine World.

The "Old Guard" of the New York Press Club is preparing resolutions of sympathy and condolence on the death of the late Col. Edward Lyman Bill, editor and publisher of The World. The resolutions, suitably engraved, will be presented to Mrs. Bill as a token of the esteem and affection which the members of the Press Club had for Colonel Bill, who at one time was president of the club.

The Republican Club of this city also appointed a committee consisting of Richard W. Lawrence, C. Alfred Wagner and Carl C. Conway to prepare a memorial to his memory.

DO IT NOW! YOU HAVE CAPITAL INVESTED IN YOUR STOCK. IT WILL BE SECURE IF THE STEVENS BILL PASSES THE NEXT CONGRESS.



Doehler Die-Cast

means a more perfect and more economical production of talking machine parts than when machine-finished

Doehler Die-Cast Talking Machine parts can be produced faster than you can use them.

When castings are delivered they will have all holes, slots, etc., accurately located, and a smooth surface ready for buffing, polishing, plating or enameling.

Send us blue prints or models of parts, and let us tell you what the actual cost will be to have them Doehler Die-Cast. Write for our literature.

Edison Triumphant—

JACQUES URLUS
Greatest of Wagnerian tenors, matching his voice with its Re-Creation by the New Edison Diamond Disc Phonograph—Official Laboratory Model.

" . . . impossible to distinguish between the singer's living voice and its Re-Creation by the musical instrument that bears the stamp of Edison's genius," says the musical critic of the Boston *Herald,* of a recent Edison tone test recital.

The instrument was the

New Edison Diamond Disc Phonograph

The One Instrument in all the World capable of sustaining such a test with any artist.

Its Music *Is* Music—the living voice engraved upon a disc and made to respond with all the humanness of life itself. In the words of the Denver *Times,* ". . the great broad vision of the subject without a hint of anything which tended to drag it down from its artistic plane."

Edison Tone Test Recitals Are Convincing Cultured and Critical Music Lovers That Here Is A New Art—

MUSIC RE-CREATION

Re-Creation Is On Every Lip—

What is it?

Let those say who know, who speak with authority and with unbiased tongue:

"That Thomas A. Edison has completely mastered the art of reproducing the human voice was demonstrated by a tone test recital before a large audience of music lovers and critics in the Victoria Theatre last night. It was difficult for many to believe that the instrument was a stock phonograph intended solely for the home and that this instrument should be able to fill an entire theatre. . . ."

Globe Democrat, St. Louis, Mo.

"Edison has found the way to a perfect reproduction of musical sound. . . ."

Evening Wisconsin, Milwaukee, Wis.

"The experiments, which included the sudden halting of the phonograph or the singer so that the audience could not tell whether one or the other was producing the song, evoked considerable comment. . . ."

Philadelphia Inquirer, Philadelphia, Pa.

"The two voices were so identical that when one or the other was stopped, it was impossible to detect it in the audience. It was one of the most unique and wonderful recitals of its kind ever given. In the audience were Cleveland's most cultured musicians. . . . Never before had the audience heard such a comparison."

Cleveland Leader, Cleveland, O.

MARIE RAPPOLD

Metropolitan Opera Company, testing the Re-Creation of her voice by the New Edison Diamond Disc Phonograph—Official Laboratory Model.

Regardless of the combination of singer, record and instrument, the effect is always the same. The records and Phonographs used are identical with those sold by all Diamond Disc dealers. The singers have no special qualifications for the work beyond their recognized abilities as artists of the first rank. Ask us for the date of the next tone test recital near you. Go hear it and be your own judge.

We will consider a few more high class dealers. Write us for particulars. Address your inquiry to

THOMAS A. EDISON, Inc., 279 Lakeside Ave., Orange, N. J.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., February 8.—With the passing of the first month of 1916 the observant talking machine dealer can discern ample signs of a splendid year. January practically everywhere has been productive of good sales and there has been an unusually widespread interest on the part of prospective purchasers which is a good augury. Said one large distributer anent the situation: "It looks to us very much as if there can be double business done by every talking machine concern in New England, and that all this can be accomplished without greatly increasing efforts. In an article I read lately on the talking machine business it stated that if the dealer had his eyes open it was just about impossible for him to dodge the business that would come his way; and we might truthfully say that there are some dealers who close their eyes to the many advantages."

One Hundred Per Cent. Columbia Increase.

Manager Arthur C. Erisman, of the local headquarters of the Columbia Graphophone Co., makes the creditable statement that he has just closed the first month of the new year with considerably more than 100 per cent. increase in business; and when this is compared with January of a year ago, even then a large month, this increase is "some figures." Manager Erisman adds that there are sufficient orders on file at the present time to take the entire allotment of machines that he can get from the factory for the next four months. Additional orders are piling in and are being filed in their rotation, to be filled accordingly. Dealers continue to telegraph and write for machines that have been ordered perhaps only two weeks, and they cannot seem to understand why there should be any delay, not realizing the enormous increase in the Columbia business.

Afternoon Teas at Harvey's Attract Public.

The newly enlarged Victor and Edison departments of the C. C. Harvey Co., at 144 Boylston street, are proving exceedingly popular these days, due in large measure to the innovation introduced by Manager Francis T. White. This innovation is no less than the holding of afternoon teas on Tuesdays and Fridays. While invitations have been widely sent out to the Harvey Co.'s large clientele, everybody who happens along is made welcome, and the visitors are privileged to enjoy really three treats—listening to the best of music on the Edison machines and the Victrolas, partaking of refreshments and feasting their eyes on the superb view across Boston Common and down Tremont street. Moreover, the rooms themselves are so attractive that one instantly feels the influence of an artistic and comfortable environment.

Narrow Escape from Serious Fire.

A destructive fire in the Tremont Theatre on the afternoon of Sunday, January 23, might have resulted seriously for the Eastern Talking Machine Co., at 177 Tremont street, and the Columbia Graphophone Co., at 174 that same thoroughfare. The rear entrance to the Eastern's establishment opens onto an alley, directly opposite to which is the stage door of the theatre, a distance of only a few feet, and it was the stage that suffered all the damage, this being practically destroyed. Several of the Eastern's employes were among the first to discover the fire, and the fire brigade of the house quickly got two lines of hose at work from the windows of the Eastern's building. The boys stood at their post until all danger was past. The Eastern establishment, fortunately, suffered no damage, not even from smoke. Similarly, the Columbia store escaped serious loss. Manager Erisman, who resides in Cambridge, was advised of the fire by telephone from the Herald office, which is close by, the information being that there was absolutely no chance of saving the entire block, as the back of the Columbia store is separated from the foyer of the theatre only by a twelve-foot passage. Mr. Erisman hurried into the city and found that the Boston fire department already was doing effective work from the top of the Columbia's building. A small amount of water trickled into the basement of the store, but at a point where there was no stock. Manager Erisman feels that the Columbia store was saved by the presence of the fire curtain, which confined both fire and smoke to the stage and allowed the firemen to enter the body of the house, from which they were able to fight the fire most effectually.

Aeolian-Vocalion Progress in Boston.

Manager R. F. Hibshman, of the Vocalion Co. of Boston, is highly pleased with the reception given the company's Aeolian-Vocalion, which was introduced to this city about a month ago. That the selection of warerooms at 190-192 Boylston street was a most fortunate one these few weeks have amply proved. Everything about the interior is so attractive and comfortable that passers-by eagerly enter to get a pleasant welcome either from Manager Hibshman in person or from his courteous staff. The house has done some extensive advertising in the daily papers, and this has played a big part in directing attention to the store and its various styles of machines.

More Room for Dictaphone Department.

Owing to the increased business of the Dictaphone department of the Columbia Graphophone Co., Manager Erisman has found it necessary to move this branch of the business from the space it occupied on the second floor to three separate office rooms on the sixth floor of the building, these having been especially secured for this purpose. By this change the second floor, with the exception of the space used by the bookkeeping department, is now given over entirely to the sale and exhibit of machines, and it will not be long before it will be necessary to utilize the entire floor for this purpose. Manager Atwell, of this department, was able to show a 430 per cent. increase over the corresponding month last year, and says he looks for a 500 per cent. increase in his department this current year.

Report Most Prosperous Business.

Business at the Boston headquarters of the Pardee-Ellenberger Co., Inc., 26 Oliver street, is making marked headway. Manager F. H. Silliman says: "We have just closed a very successful year and our business is increasing more rapidly at this time than ever before." The Boston headquarters has just received from the Edison factory some of the Model C $250 disc phonographs in English brown finish, which bid fair to be splendid sellers. The first shipment of this style was disposed of very quickly, and another consignment ordered.

Eastern Co. Want More Stock.

The Eastern Talking Machine Co.'s establishment reports a distinct shortage of goods, which indicates a heavy demand for outfits both in machines and records. Callers at the Eastern headquarters lately have included Fritz Kreisler and M. Journet, both Victor artists, who have lately given concerts here.

Close Fine January Business.

The January business done by the talking machine department of the Henry F. Miller Co. was considerably larger than that of the same month in 1915. Manager Warren Batchelder had quite a busy time of it, and in these few weeks many new customers have been added to the list of Victor enthusiasts. The year promises well for this department of the Henry F. Miller Co.

Edison Tone-Test Recitals.

Miss Helen Clark and Arthur Walsh, both Edi-

Ask any man or woman who heard *Christine Miller* sing in comparison with Edison's *Re*-Creation of her voice

OVER 1800 New Haven music lovers witnessed this remarkable tone test at Shubert Theatre, Monday night, Jan. 31, 1916. Not one could distinguish the living and breathing Christine Miller's voice from Edison's laboratory *Re*-Creation of that self same voice.

THE
EDISON
Diamond Disc

This new Edison invention accomplishes the *Re*-Creation (not reproduction) of all forms of music. May we prove it to you?

Ask for anything. Ask for the most difficult. Ask for violin and piano *Re*-Creations. Let us show you on the Diamond Disc the difference between a Stradivarius and a Guarnerius. Over one thousand wonderful examples of this new art now. New selections on sale weekly.

THE PARDEE-ELLENBERGER CO., Inc.
BOSTON, MASS. NEW HAVEN, CONN.

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 14).

son artists, gave a most successful tone test recital last week at the opening of the new talking machine department of the R. H. White Co.'s large department store. Previous to coming to Boston these artists gave a successful recital at the Edison phonograph department of the Meekins, Packard & Wheat Co.'s Springfield store, subsequently giving another recital at the Worcester store of the Barnard, Sumner & Putnam Co. All of these recitals did much to acquaint the public with the possibilities of the Edison Diamond Disc machines.

To Resume Its Festive Gatherings.

The Boston Talking Machine Club, now that the holiday rush is over, is to resume its festive gatherings, and a dinner is being planned for March. This will be good news to the enthusiastic members who are anxious to see the club make a successful record for itself. The bowling teams, too, are taking on a new lease of life and the alleys are again the rendezvous of a large contingent of talking machine men.

Additions to Columbia Sales Staff.

Several additions to the staff of the Columbia Graphophone Co. have been made lately by Manager Erisman. C. B. Berg is now a special salesman in the European record department; J. B. McFadden is assistant to Mr. Atwell in the Dictaphone department; Stuart Munn is a new man in the wholesale record department; J. Thompson Macdonald has been added to the mail order department, and Miss Jean D. Murray is a stenographer in the Dictaphone department.

Some Personals.

George Curstein, of the Victor Co., passed through Boston a week or so ago.

S. M. Revness, who came to Boston last month in the interests of the Victor business, is still in town, and is likely to remain here for some time longer.

H. R. Skelton, of the Edison Co., who is always a welcome visitor around Boston, where his home is, at present is engaged in special work in the New Haven, Conn., territory of the Pardee-Ellenberger Co.

H. A. Yerkes, district manager, from New York, paid a two days' visit to the Boston offices of the Columbia Graphophone Co. during the month. Another visitor was F. E. Goodwin, head of the Columbia's educational department.

COLUMBIA STAFF IN BOSTON DINES.

Employes of the Columbia Graphophone Co. in That City Enjoy Entertaining Evening—Handsome Watch Presented to Manager A. C. Erisman—Some Excellent Addresses Made by Staff Members and Others.

(Special to The Talking Machine World.)

BOSTON, MASS., February 9.—Nearly fifty employes of the Columbia Graphophone Co. dined a few weeks ago at the Quincy House, and the evening was a highly enjoyable one. The gathering was addressed by representatives of the various departments, including Manager Arthur C. Erisman, T. Norman Mason, W. C. Ellsler, J. F. Luscomb, Fred R. Erisman and J. T. Shaughnessy.

There was a musical program, the contributing talent including H. G. Moeller, J. A. Holohan, Alexander Mitaraki Joseph Madden and John O'Hara. Fred Ballou presided at the piano, and one of the features was an athletic exhibition given by S. B. Bowman.

The evening proved to be one of great surprise for Manager Erisman, who is held in the highest regard by his employes. In return for his many kindnesses and as a token of appreciation for his efforts in securing for them the generous bonus on last year's business (mentioned in The World of last month), he was presented with a beautiful watch, suitably inscribed. The presentation speech was made by Mr. Ellsler, and Mr. Erisman expressed feelingly his deep gratitude for this mark of appreciation on the part of his staff.

The evening, which was a success in every way, was another demonstration of the fine spirit that exists between the Boston department of the Columbia Co. and its employes.

Those sitting around the board with Manager Erisman were: Rosa Baer, Fred Ballou, S. B Bowman, Edna Burdick, John Burke, James Cahill, Marion Cahill, Percy Carter, Arthur Collins, Margaret Collins, Sallie Coombs, Elvira Cragin, J. Q Cragin, H. C. Culberson, Effie A. Dean, R. P. APPEARANCES ARE DECEPTIVE!

This humorous story is going the rounds, and it shows not only the conditions in the industry but offers a novel way of pacifying a dealer whose mental condition is a menace to the nation. A dealer who paid some money for machines, but didn't get them, called on the manufacturer in an angry mood.

The diplomatic sales manager took him in charge and told him to go out and see the pictures for an hour or two and then return, when full information would be forthcoming.

The S. M. was up against it; there wasn't a machine in sight; everything looked dark. When the dealer returned, however, he was shown a dozen cases of goods, all labeled, ready to ship, each one bearing his name, and that cleared the whole situation, and he went away happy. At least happy pro tem., for the cases were empty.

ADVICE FOR FOREIGN SALESMEN.

Traveling Representatives in South America Must Be Exceedingly Careful Concerning Their Mode of Living, Habits and General Deportment to Sell Goods Successfully.

Advice as to the choice of salesmen for Latin America is given in a "Handbook for Export to South America," written by a Canadian Trade Commissioner in South America, and published by the Canadian Department of Trade and Commerce. It shows the opinion of a trade representative of a foreign government, which has issued a very practical handbook on the technique of South American trade for the use of its manufacturers. He says:

"A salesman going to a foreign country should be of exemplary habits. This should be so obvious to anyone that it should be unnecessary even to mention it, but strangely this point is often overlooked; or it may be that a man is sometimes sent abroad, although known to be somewhat unsteady, because he has been found to be successful in securing orders at home. To make such an error as this is fatal.

"Another most important characteristic is that the salesman should possess a modest demeanor. A bumptious man, who will insist on impressing upon present or prospective customers his own and his country's importance, usually succeeds in antagonizing them. Importers in Latin America have grown very tired of hearing commercial travelers from the United States extolling the superiority of their country, its methods and its products. It may safely be said that this failing is responsible for their losing several millions of business every year. A warning may also be given against the excessive use of slang. In South America it is of little avail, much of it not being understood, and too free use is apt to rob the conversation of seriousness and dignity. This does not mean that all American salesmen are objectionable; many of them are highly educated and expert in their business; but since the complaint is frequently heard, it is well to warn Canadian exporters, that they may avoid these mistakes." Even stay-at-home salesmen may find some good advice in these suggestions.

George Washington and BAGSHAW NEEDLES

WHILE George Washington was the father of his country, W. H. Bagshaw was the father of the talking machine needle industry.

The superb Bagshaw-quality is of the "cannot-tell-a-lie" quality, being of surpassing superiority at every angle of manufacture.

63,000,000 in ten days—each one finished exquisitely.

EDISON TONE TEST IN MONTREAL.

Laboratory Experts Give Successful Demonstration in That City—New Victor Tungstone Needle Interests — Berliner Gramophone Co. Donates Gramophone to Hospital in England—Other News of the Month.

(Special to The Talking Machine World.)

MONTREAL, Can., February 8.—A recital and tone test of the new Diamond Disc Edison phonograph, conducted by L. Bourgette and C. R. Woods, experts direct from the Edison laboratory at Orange, N. J., took place at Layton Bros.' recital hall during the past month, and was well attended.

The trade are eagerly looking forward to the appearance on the market of the Victor tungstone stylus, which it is expected will be on sale here shortly.

H. S. Berliner, vice-president and general manager of the Berliner Gramophone Co., Ltd., was in New York recently.

A gramophone with a large collection of Victor records has been donated by the Berliner Gramophone Co., Ltd., to the Moore Barracks Hospital, Shorncliffe, England. Some months ago the attention of the Berliner Co. was called to the fact that a number of convalescents in No. 1 Stationary Hospital France, had, in writing to their homes here, alluded to the fact that there was not a musical instrument in the hospital. On this being brought to the attention of the Berliner Co. it immediately donated a large Victrola and a collection of records. This is not the first instance of this firm's generosity along these lines, as it has already sent across to various hospitals a number of Victrolas and collection of records.

S. Dayan, of Montreal, has patented an attachment for talking machines.

Charles Culross, the Columbia enthusiast, in a recent advertisement said: "Columbia double disc records played on any instrument are indeed a tone revelation to most people. Hear one Columbia record and you will never again be satisfied with any tone less round and rich and natural. 'It speaks for itself.'"

T. Ramsey, in charge of the talking machine department of J. W. Shaw & Co., reports a steadily growing demand for Columbia product.

The Canadian Talking Machine Co. has registered in Montreal.

Layton Bros., Edison dealers, claim the Edison "is a real magnet when it comes to drawing trade," and have had their hands full the past month in supplying the demand. Their Columbia department is also kept on the move filling orders for machines and records.

VISITORS TO EDISON FACTORY.

The Edison organization at Orange, N. J., recently had the pleasure of extending the hand of good fellowship to the following jobbers, dealers and other representatives: H. A. Mosher, R. S. Williams & Sons Co., Ltd., Toronto, Can.; C. B. Haynes, Richmond, Va.; N. G. Griffin and P. R. Hawley, American Phonograph Co., Albany, N. Y.; Albert A. Buehn, Buehn Phonograph Co., Pittsburgh, Pa.; W. O. Pardee and F. H. Silliman, Pardee-Ellenberger Co., New Haven and Boston; A. J. Pommer, Pacific Phonograph Co., San Francisco; Richard Nelson, Diamond Disc Studio, Albany, N. Y.; W. F. L. Rosenblat, Simmons Talking Machine Co., Bristol, Va.-Tenn.; R. B. Cope, Girard Phonograph Co., Philadelphia; Royal W. Daynes, Consolidated Music Co., Salt Lake City; John Albertschardt, The Bargain Store, Tipton, Ind., and M. L. Kortz, Newark, N. J.

ROYALTIES AID IN WAR RELIEF.

Margaret Woodrow Wilson Gives $1,083 Royalty from Columbia Record to Start Training School for Nurses at Sofia.

About a year ago Miss Margaret Woodrow Wilson, the daughter of the President, sang the "Star Spangled Banner" for the Columbia Graphophone Co., and announced that her royalties—25 cents for each record sold—would be donated to the American Red Cross for its war relief work abroad.

At that time the following letter was sent to the company from the chairman of the National Relief Board:

"Gentlemen: Miss Margaret Woodrow Wilson is extending her assistance in aiding the American Red Cross to secure funds to carry on its relief work in the European countries at war. She proposed to turn over to the American Red Cross her entire royalties from the sale of a special record made by her for your company. This royalty amounts to 25 cents on each record. Miss Wilson's general assistance in the aid of the sufferers is accepted with gratitude, and we appreciate the arrangement that your company has made to turn directly over to the American Red Cross, of Washington, the sum of 25 cents from the sale of each record, to be used for the work among the distressed and suffering of all the nations involved in the present war. Yours very truly."

The royalties—$1,083.50—have been sent to Queen Eleonora, of Bulgaria, to start a training school for nurses at Sofia. This work was selected by the National Relief Board for reasons quoted from its letter to Miss Wilson, as follows:

"I have just received from the Columbia Graphophone Co. a check for $1,083.50, representing the first royalties derived from the sale of a record sung by you for the benefit of the Red Cross. Please accept our most hearty thanks for this most generous aid. I feel, if it would meet with your approval, that it would be a great satisfaction to the Red Cross to apply this to a special and very important piece of work. A year ago we promised to the Queen of Bulgaria the services of a very fine trained nurse, Miss Helen Scott Hay, for four years to start a training school for nurses at Sofia. The outbreak of the war caused a postponement of the plan, and we sent Miss Hay in charge of all the nurses that went to Europe, and later she was supervisor of those in Russia. She has now gone to Sofia and is assisting the Queen in organizing this training school."

MILWAUKEE A BUSY TRADE CENTER.

New High Sales Records to Be Established in 1916, Judging from Present Business—Dealers Find Recitals Profitable—Pathephone Co. of Milwaukee Incorporated—To Open Retail Store—Hoeffler Co.'s New Quarters—News of Month Worth Noting.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., February 8.—If the talking machine business in Milwaukee and other Wisconsin points is as active throughout the remainder of the year as it has been during January and the early part of February, 1916 will establish another new high record. The shortage of machines in all lines was so acute during the holiday period that dealers have been in the market every day for anything that they can secure. Local jobbers are doing their best to get machines, but the shipments received from the factories thus far only partly meet the requirements. Jobbers are giving all their dealers a few machines as they arrive, but ten times the number could be disposed of. Jobbers say that they will consider themselves extremely fortunate if they can catch up with all their orders during the coming summer.

General conditions in Milwaukee and about Wisconsin are showing decided improvement, and this has had a most favorable influence on the talking machine trade.

Officials of the Badger Talking Machine Co., jobber in this State for the Victor line, say that dealers all over Wisconsin are sending in orders daily for machines in all the various styles, many of them endeavoring to lay in stocks for the summer and fall trade, but the majority of them are anxious to replenish their depleted stocks in order to meet the present demands of their trade. Applications for new dealers are being received daily by the Badger concern, but it is impossible to locate any new dealers while the shortage of machines is so pronounced.

William A. Schmidt, general manager of the Phonograph Co., of Milwaukee, jobber for the Edison goods, is putting forth every possible effort to partly satisfy at least the demands of his dealers. Mr. Schmidt is now receiving larger shipments of Edison machines and hopes to be able to relieve the shortage soon.

Regular afternoon Edison concerts are being given at the Edison Shop, the retail branch of the Phonograph Co., of Milwaukee, and trade is exceptionally good at the store.

A. G. Kunde, 516 Grand avenue, Columbia jobber and retailer, is finding that the February trade is better than any corresponding period in the history of his store. Several new Columbia dealers have been located in Milwaukee of late.

T. P. Lehrner, an experienced piano and talking machine man, has been placed in charge of the Victrola and piano departments of the three stores of Edward Schuster & Co., Milwaukee department store concern. He succeeds M. Marks, the first manager of the Schuster departments and who put the business upon a sound footing. Mr. Marks, as was announced last month, is now located in St. Louis, where he is engaged in business with his son, Louis Marks, formerly manager of the Victrola department of the Boston Store in Milwaukee. Mr. Lehrner will be in direct charge of the piano and Victrola departments at the Third and Garfield streets store of the Schuster concern, where he will be assisted by Miss Elizabeth Hughes. J. H. Becker will remain in direct charge of the Victrola and piano departments at the Twelfth and Vliet streets store, while D. Meyer will be in charge at the Mitchell street and Sixth avenue store.

The Pathephone Co. has been incorporated in Milwaukee with a capital stock of $20,000 by Lawrence McGreal, Edward Yockey and S. R. Simon. Lawrence McGreal, who has been jobber in Milwaukee and Wisconsin for the Pathé Frères line in Wisconsin, will be in general charge. Mr. McGreal announces that he will move into new quarters soon, where he will have more of an opportunity to display a larger stock of machines than is possible at the present store on East Water street. Mr. McGreal also has plans under way for opening a new retail store here some time next summer, where the Pathephone will be featured. J. F. Collins, general sales manager of the Pathephone Co., was in Milwaukee as the guest of Mr. McGreal on January 27.

Roy Keith, of the Talking Machine Co., of Chicago, was in Milwaukee on February 3.

The Milwaukee Talking Machine Manufacturing Co., of this city, reports a steadily increasing demand for all its various models of the Perfectrola, with a special inclination on the part of the dealers to stock the higher priced models.

The Hoeffler Piano Manufacturing Co., handling the Victrola, is now entirely settled in its new store at 304 West Water street, just south of its former location at 306 West Water street. Gustave Spankus, manager of the Victrola department, has arranged four new attractive booths and now has a fine display of Victor goods.

News has been received in Milwaukee that Norman C. Parker, of Oconomowoc, Wis., has manufactured a new talking machine, which will be known as the Parkerola.

Emil O. Schmidt, 310 Grand avenue, Milwaukee's one-price piano man, who also carries the Starr line of talking machines, manufactured by the Starr Piano Co., has been meeting with an exceptionally fine business at both his Milwaukee and Manitowoc stores.

One of the largest and most representative stocks of Victrolas now on hand in Milwaukee is on display in the talking machine department of Gimbel Bros.' store. Manager L. C. Parker is meeting with the best February business ever experienced by his department.

The Milwaukee Press Club, one of the most unique organizations of its kind in the United States, has just purchased a Style XI Victrola for its handsome new quarters in the Jung Building, the order having been placed with the Edmund Gram Piano House. Paul A. Seeger, manager of the Victrola department at the Gram store, demonstrated the Victrola line to Milwaukee housewives at the big cooking school held in the auditorium during the latter part of January. The Gram house also demonstrated the Stroud Pianola and furnished the instrument for accompanying Miss Alma Hahm, a soprano soloist. Victrola sales at the Gram store have climbed to a new high mark since the opening of the new year.

The J. B. Bradford Piano Co., which carries the Victrola line, has been carrying on an extensive campaign of advertising in the local papers.

The Premier line of machines has been placed with several houses in Milwaukee and about Wisconsin by Park Adams, the enterprising young manager of the Premier Talking Machine Co.'s Milwaukee store.

William P. Gensch, head of the Gensch-Smith Co., 730 Grand avenue, operating an exclusive Victrola shop, has been successfully demonstrating his Victrolas before various club organizations in Milwaukee of late.

INDIAN CAMP ATTRACTS VISITORS.

(Special to The Talking Machine World.)

NEW ORLEANS, LA., February 7.—A feature of the talking machine department of the Maison Blanche is a camp of the Ojibway Indian, with Chief Shomin as the main feature. The camp is an exact reproduction of an Indian village, and is located next to the talking machine section of the store. Manager Hofheinz has taken advantage of the crowds which are attracted to the camp to make some especially good sales of Victrolas, Grafonolas and Edison Diamond Disc machines.

The Nordheimer Piano & Music Co., Ltd., of Toronto, Can., recently featured an attractive program of player-piano and Victrola music in its recital hall. An interesting feature in connection with the same was the combination of the Victrola and player-piano in some concerted numbers.

Victor Dealers

Those who relied upon us this season to supply their requirements of Victor merchandise are loudest in their praise of the excellent manner with which their orders were filled.

AEOLIAN-VOCALION
Headquarters

The AEOLIAN-VOCALION

A Statement by the President of the Aeolian Company

EVER since the announcement through the newspapers and magazines of the Aeolian-Vocalion there have been many surmises as to the policy this Company would pursue in regard to it. As the instrument has become better known and its unusual features recognized, queries from musicians, members of the music-trade and others, regarding our attitude have become so numerous that it has been deemed advisable to make a public statement.

In the first place let me say that the Aeolian-Vocalion was not designed to be what might be called a "popular phonograph;" that is to say, it is not our intention to produce an enormous number annually, or to seek broadcast representation.

We believe the market is already well supplied with the very low-priced instruments, and that these admirably serve their purpose.

But it is with the phonograph that purports to be a serious musical instrument—that is adopted for educational purposes and finds its way into homes where music is known and appreciated—that the Aeolian-Vocalion has entered into competition.

Copyright 1914, 1915, 1916, The Aeolian Co.

A view in the beautiful foyer of the Vocalion display rooms Aeolian Hall, New York

This is not to be construed that the Aeolian-Vocalion is inordinately high-priced, or is not available for the lighter forms of musical entertainment, such as dancing, etc.

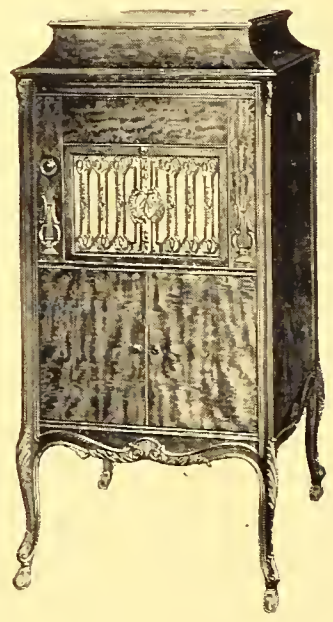
The reverse of this is the case, as its prices are surprisingly moderate, considering its advantages, while its unusual body and depth of tone give it great "carrying" power for dancing. But, as its character is such as to make it appeal most strongly to people of musical taste, the Aeolian-Vocalion will be handled with the conservatism such an instrument deserves.

WE feel, as a matter of fact, that the Aeolian-Vocalion is one of the most important musical instruments that have yet appeared. The phonograph itself occupies a peculiar field. It is the interpreter of all music, instrumental and vocal. It appeals to every taste and is the most practical and broadly useful means of supplying music ever devised.

This Company long ago realized the musical possibilities of the phonograph. And, I may add, that the decision to enter the field as a manufacturer was not made until it had proved its ability to develop these possibilities.

The wide-spread comment that has been made on the obvious superiority of the Aeolian-Vocalion is a significant and gratifying tribute to the musical knowledge and mechanical skill of the men composing the Aeolian experimental staff.

Several years ago I was asked by an acquaintance who had recently returned from a trip around the world, "what was the secret of the Aeolian Company's world-wide success?"



Style K—One of the most beautiful of the conventional models of the Vocalion

The impressive salon of the Vocalion warerooms, Aeolian Hall in New Bond Street, London

He had visited the principal cities of Australia and Europe, and had seen the large Branches we maintain in those cities. Everywhere he went he had found Aeolian instruments in evidence and universally regarded as the leading examples of their respective types.

I replied to his question by stating that while there were undoubtedly many contributing factors, I believed Aeolian success was chiefly due to a spirit that pervades the whole organization and has frequently been commented upon—that of dissatisfaction with present results and the determination to produce *the best*, whatever the instrument or article might be.

THIS spirit is certainly brought to a very pronounced materialization in the Aeolian-Vocalion. I have personally been in almost daily touch with those responsible for it and have been gratified and sometimes even amazed, at their enthusiasm and resourcefulness.

From the period, several years ago, when we first began to investigate the possibility of developing the phonograph musically, until the Aeolian-Vocalion was finally put upon the market, their zeal has never flagged.

During this whole period, hardly a month passed that did not bring to light some new discovery or new application of acoustical principles which would tend to improve the phonograph.

Indeed, the only one of the Aeolian-Vocalion's important musical features not directly attributable to the Aeolian Company's own staff, is the device for controlling tone, known as the Graduola. This was the invention of Mr. F. J. Empson, of Sydney, Australia, the exclusive rights of which we secured two years ago.

In this connection it may not be amiss for me to remove a misconception which is sometimes entertained regarding the Graduola.

Style F—A very popular instrument which retails at $75.00.

WONDERFUL and entertaining as the phonograph is, its value is seriously curtailed unless it possesses some method of tone-control. That manufacturers have recognized this is evidenced by the doors, shutters, etc., with which they have equipped their instruments, the system of interchangeable needles some provide, and by dozens of inventions on record here and abroad.

Mr. Empson's invention provides the only satisfactory method of tone-control yet produced and has been adopted as an exclusive feature of the Aeolian-Vocalion.

While not arbitrary—that is, it may be used or ignored at will—its advantage, when utilized, is two-fold.

It permits the introduction of delicate shadings in tone-color, without actually changing an artist's own technique and expression, and thus obviates record "monotony."

And it compensates for the recognized limitation in the present method of making records, by enabling one to play with extreme delicacy without *smothering* the tone with doors, or losing any of its tints by using very soft needles.

Indeed the Graduola, or some device equally effective, is an essential part of any phonograph which, like the Aeolian-Vocalion, makes its appeal to people of genuine musical taste.

And this is the appeal which the Aeolian-Vocalion is designed to make.

We believe the phonograph has an important mission. But we also know that in the past it has been subject to some measure of criticism, from people who were musical.

In the Aeolian-Vocalion this Company has produced a phonograph which goes far towards meeting this criticism, and it is the requirements of people of genuine musical taste and perception that the Aeolian-Vocalion is designed to supply.

H. B. Tremaine

President of The Aeolian Company

Territory is now being assigned for the representation of the Aeolian-Vocalion. Such territory is exclusive, thus insuring to the merchant the benefit of all the business he helps to create.

Woolworth Building, New York

OPTIMISM PREVAILS IN BALTIMORE "TALKER" TRADE.

Columbia Co. Lists Dealers in Its Ads—Victor Tungs-tone Stylus Creates Interest—Aeolian-Vocalion Sales Growing Continually—January Trade Excellent—Leading Victor Dealers Report Increasing Demand for Their Products—New Pathé Dealers Announced.

(Special to The Talking Machine World.)

BALTIMORE, MD., February 5.—The greatest amount of optimism pervades the talking machine field in this city and State, and with a wonderful January business by all of the firms there is the best of feeling by all persons identified with the business. In the words of one dealer, "there is always a shortage of machines and a cry for more machines, but as each month's business is tabulated we find we have gone ahead as usual." That about represents the situation here.

There is another strong point: the tendency is for higher priced machines, and while there is still a big business done on contract terms, there is a constantly increasing volume of cash business.

The Columbia Co. this month departed from its old custom of having firms use space around its prepared ads on records, and now the names of practically all of the dealers in the city and State are to be found listed in the ads. At the same time there is copy from many of the firms appearing alongside of the big spread.

Big interest is manifested by all of the dealers in the Victor Co.'s new tungs-tone stylus needle. All of the dealers have attractive signs in their show windows announcing the new product, and as a result there is already a big demand for the needle, which is expected to be received in Baltimore within a few days. Many advance orders have been taken for the new point, and the local distributers of the Victor line will have their hands full to handle the business.

A. J. Heath, local manager of the Columbia Graphophone Co., after a ten days' trip through Virginia, West Virginia and North Carolina, is back in Baltimore with glowing reports of the prosperity of that section. "After visiting Norfolk, Richmond and other points through West Virginia and in North Carolina," said Mr. Heath, "I was much impressed with the business we are to expect from these sections. The dealers are all in better shape than they were this time last year, and they feel that this is going to be a big year with them. This section was affected by the European war, and it is now recovering very rapidly.

"Our business in Baltimore has been mighty good, in fact, I might say that it was wonderful. Machines are beginning to come in, and they are going out to the dealers just as fast as they reach here. There is no let-up in orders for machines and records that are coming from the dealers. Many of them are sending in orders to put in big stocks, for they are all pretty well cleaned out from the December and January business. Great times are ahead for us."

Baltimore seems to be taking very well to the new Aeolian-Vocalion, which is handled in this city by the Sanders & Stayman Co., representative of the Aeolian Co. William B. Turlington, the manager, says that a great many of the instruments are being sold and that most of them are or the higher price. The Vocalion is being much talked of on all sides. The January sales were all that could be expected, and there are indications that there will be no let-up in it.

The Hammann-Levin Co. is planning extensive improvements for the first floor of its establishment. The plans provide for the rearranging of the floor space so as to give space for additional booths for the demonstrating of machines. The new booths will be large enough to permit one machine of each style of the Victor line to be placed in the booth and make it possible for the demonstrator to handle the prospect without leaving him. There will also be increased space for the handling of records to meet the constantly growing business of the firm.

All of the department stores and furniture houses throughout the city that have talking machine adjuncts report fine January business.

The past month, both wholesale and retail, proved far better in every way than January of 1915 with E. F. Droop & Sons Co., Victor distributer. W. C. Roberts, the manager, is more than pleased. There has been a big call for higher priced goods. He also reports a great demand for cabinets.

The January business with H. R. Eisenbrandt Sons, Inc., brought about no complaints. In fact, the business was better than the same month of last year.

The same may be said of I. Son Cohen, for Cohen & Hughes, Inc., Victor distributers, who were only held back by the usual situation of not enough machines. Arthur Wertheim has been added to the firm's road force and is at present in the South. Leonard Weber, bookkeeper for the firm, has just returned from a trip through Pennsylvania, and found business coming along in good shape.

F. K. Dolbeer, manager of the credit department of the Victor Co., spent some time at the Cohen & Hughes headquarters. Other dealers were Paul Gale, of the Greenwood Co., Norfolk, Va.; James MacQuhar, manager of the Victor department of S. Kann Sons & Co., Washington; Mr. Holland, manager of the Morse music department, Cumberland, and Mr. Shipley, a Victor dealer of Frederick.

Jesse Rosenstein, for the National Piano Co., the Pathé representative here, finds business moving along well. He announces a new local account in the large furniture house of Gusdorf & Josephs, and also the Graham Music Co., of Graham, Va. Mr. Rosenstein says he has also signed up several other dealers, but is waiting for ratification from headquarters. Mr. Rosenstein also announces that additional machines are coming in and that he has received the new $35 and $50 Pathé models, which are being favorably commented upon. The Reginald de Koven Opera Company and "America, I Love You," records are going well.

THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., February 7.—The talking machine business in Philadelphia in January was only limited to what the manufacturers saw fit to send the dealers. This is not true of any one of the companies, but all of them. There has been a great shortage of Victor machines, but there has been a corresponding shortage of Columbia and Edison machines.

The business for the first month of the year was considerably ahead of last year; at some of the stores the business was doubled in spite of the fact that the factories fell down badly in the supply. With records things have been more satisfactory, for the dealers—being able to feel the pulse of the public—sent in large orders in advance, and in consequence those who have been far-sighted enough are able to supply the demand to their regular customers almost to 100 per cent.

The Victor dealers are looking forward with great pleasure to the placing on sale of the Victor tungs-tone stylus, which they have tried and which they are sure is going to meet a long-felt want. They believe it is going to be a big inducement for the buying of records, and in a smaller way, machines, as it is of that producing and wearing quality which brings out a more perfect tone, and the same needle can be used from fifty to 200 times. There is no doubt this needle will do away with the old needles entirely.

Louis Buehn & Co. report that their January business has shown an increase over last year of about 20 per cent., and they consider this most gratifying considering the conditions. They report that the machine condition is still very unsatisfactory. The Victor Co. made practically few deliveries during the first few weeks of the month, and the number of machines they sent out the latter part of the month was in no way adequate to the requirements. The Buehn Co. reports that the record situation has shown improvement. Their stock keeping system is now showing its effectiveness, and they have been able to fill regular orders with dispatch.

Blake & Burkart have been having a very excellent business on the Edison and are most woefully short of stock. They have found this condition ever since the holidays, which cleaned them out and the factory to the extent that they have been able to get to their dealers only a small percentage of the machines they need. They are especially in need of the $150 machines, which have been their popular sellers. Their record business is also very good, and they have a liberal supply. They have also been doing considerable business with the Edison Ambrol records, but practically nothing with the machines.

They have completely fitted up the offices at the rear of their two stores and they are very neat and attractive. They expect to start concertizing just as soon as business lets up to give them time to make the arrangements, and this month they expect to have a tone-testing contest at either the Ritz-Carlton or the Bellevue-Stratford.

The Penn Phonograph Co. has also enjoyed a very big January business, the best it has ever had. Some new shelving has been added in the rear of its store, and it has a very large supply of records on hand and is in a position to satisfy any reasonable demand. Its stock of machines, however, is limited. It is looking for a very heavy business from this on through the spring.

January was the second biggest month in the history of the Pennsylvania Talking Machine Co., falling only a little behind its past December, and notwithstanding the fact that it did receive a fair supply of machines, it closed the month very much in arrears of what business it would have been possible to get had it been able to secure stock. Mr. Eckhardt, the manager, was in New York the beginning of this week trying to hurry shipments in order that it could as nearly as possible satisfy the big trade that he has built up since he became the head of this company. This house has also been having a very satisfactory business at its other stores, especially the one in Baltimore. It has just had its Philadelphia store entirely recarpeted.

In the Dictaphone department of the Pennsylvania Co. business has been most satisfactory. It went ahead a couple hundred per cent. over December and closed some very big accounts. Four of its men got their Quoto and they are displaying their Quoto buttons with much pride, and are going ahead with the intention of never having them taken away from them. One of the most satisfactory features of the business was the frequency of repeat orders, showing how satisfactory the Dictaphone has been to the former purchasers.

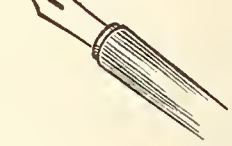
Everyone about the Dictaphone department is making preparations for the coming business show, which will be held next Monday, and the firm expects to have a very liberal display.

H. A. Weymann & Son report that their year of 1915 closed most satisfactory in their talking machine department, in spite of the great scarcity of Victrolas. The improved method installed by the Weymanns for the handling of the Victor records increased their sales sufficiently to overcome the loss of sales in machines.

Harry Weymann says that January ran considerably ahead of last year, and they expect to be in a position this month to catch up on their back

(*Continued on page 22.*)

Pen Your Victor Orders to Penn



There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

WEYMANN

for the best Victor Service in the East

We are now booking orders for Victrolas,
all types, for early deliveries.
May we serve you?

WEYMANN & SON, Inc.

VICTOR DISTRIBUTORS

1010 Chestnut Street Philadelphia, Pa.

We Are Filling Record Orders Practically 100 Per Cent.

FEBRUARY GIVES

us a moment to reflect upon the two greatest examples of "service" ever rendered. George Washington and Abraham Lincoln stand supreme in service to their country.

These two men had nothing more to offer than what was possessed by other people, but their initiative of thought and direction dominated those who lacked the bravery of action.

IN SERVICE TO THE DEALER, the House of Buehn has earned the foremost position. There is no idea on our part to place ourselves in the Hall of Fame with the above mentioned notables, but one fact is positive: Buehn Victor Service is prompt and complete; it works solely for the RETAIL MERCHANT. In machines, records, accessories and repair parts, the evidence of KNOWN deliveries is everywhere.

There is an intelligent understanding of what YOU want, and why you should get Victor goods as ordered; there is the desire on OUR part to have these goods and to deliver them efficiently and promptly.

Victor Records—the bulwark of monthly PROFITS—are delivered practically as ordered. It matters not whether they are vocal, instrumental or foreign records. A test of Buehn Service in February will help your profits for 1916.

The Louis Buehn Co.
Philadelphia's
Exclusive WHOLESALE Victor Distributor

RECORD orders are now being better filled than for several months.

Shipments from the Victor Co. have made it possible for us to fill some orders as well as 90 per cent. Orders for Supplies and Repair parts filled promptly and correctly.

Test us with any size of order—small or large—so you can see that Buehn Victor Service means a co-operation that is modern in every characteristic.

We will guarantee a larger percentage than any other jobber.

THE TRADE IN PHILADELPHIA.

(*Continued from page 20.*)

orders for Victrolas, in addition to being able to take care of new orders being received daily. During the past week they issued a return postal card advising their dealers of certain numbers of records that they have just received from the Victor Co., which resulted in over 100 of them being returned within twenty-four hours of their issue, showing that their dealers appreciate their method of keeping in constant touch with them, so that they get information of records desired.

The Weymanns received a visit last week from C. H. Lichty, the Reading dealer, who was accompanied by his wife and daughter, who were on their way to Florida by boat from Philadelphia.

Norbert Whitley, of the Weymann selling force, has just returned home from Detroit, Mich., after a two weeks' successful trip, and William Doerr is at present having a satisfactory trip through New Jersey. William Brewton, their city and Camden man, has been hustling about the trade from early morning until late at night, and Mr. Weymann says the prospects for business are most encouraging, and every indication points to the fact that the present month will be the largest February they have had in the fifty-two years they have been in business.

Harry Weymann intends making an extended trip through the South about the 15th.

CLEVELAND HOUSE EXPANDS.

P. E. Dietrich & Sons Opened Showrooms Exclusively for Grafonolas and Records.

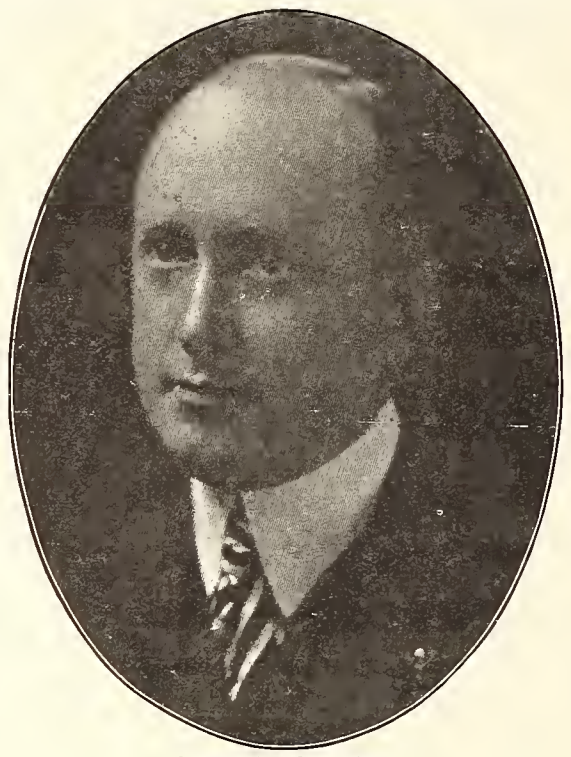
(Special to The Talking Machine World.)

CLEVELAND, O., February 5.—P. E. Dietrich & Sons, 775 East 152d street, this city, have been busy for some time past rearranging the interior of their quarters for the purpose of securing more room. More space has been leased in the same building, and they have opened a salesroom where Grafonolas and records will be handled exclusively, under the direction of Carl and Howard Dietrich. efforts being confined to dealer co-operation from

BELIEVES IN CO-OPERATION.

L. S. McCormick, Sales Manager of the Sonora Phonograph Corporation, Chats of Dealer Co-operation for Sales and Promotion Objects.

L. S. McCormick, who was recently appointed sales manager of the Sonora Phonograph Corp., 57 Reade street, New York, is one of the younger generation of "old-time" phonograph men. His



L. S. McCormick.

first experience was secured while with Thomas A. Edison, Inc., Orange, N. J. Later he was with the Phonograph Corp. of Manhattan, Edison distributer, leaving to become associated with Pathé Frères, New York. The Sonora position followed.

So Mr. McCormick is well equipped with knowledge for the work he is now doing, having been with both manufacturers and jobbers, most of his both sales and promotion viewpoints. "I believe that the dealer," added Mr. McCormick, "should be faithfully served, and my plan of doing business is to put the dealer foremost. It is the dealer who is on the firing line and who is in direct contact with the public. He is familiar with the likes and dislikes of the public, and most dealers are wide-awake enough to put this information to good advantage.

"In the larger cities the methods of doing business are different from the ways and means of getting business in smaller cities, and it is a knowledge of the various methods that enables us to so help the dealers that his sales always exceed his orders. Although our average prices are very high, dealers in small towns are doing as well, proportionately, as dealers in the larger centers, showing that the right sales methods win, irrespective of price. You can count the Sonora Corp. as a loyal supporter of the retail merchant."

RECEIVING MANY COMPLIMENTS.

Charles D. Robinson, who has been doing such good Columbia sales work for A. G. Kunde in Milwaukee, Wis., was a visitor to New York during the holidays. He has been receiving many compliments on the beautiful "hanger" which he has just gotten out, entitled "Ten Golden Rules," being a philosophical dissertation on thinking, knowing, working, learning, helping, speaking, having, being, doing and measuring. This literary effort emphasizes Mr. Robinson's deep study of men and things. It is a mental stimulator.

George Brown, Jr., who handles the Victor, Columbia and Edison lines in Hillsboro, Ill., has secured the services of Mrs. C. A. Nichols as manager of the department. This firm recently sold expensive Columbia Grafonolas to two of the local schools.

Telephones, Stuyvesant 1666, 1667, 1668

FINANCIAL CONDITION EXCELLENT.

The Earnings of the American Graphophone Co. Show Gratifying Increase—Surplus Will Be Used to Strengthen Financial Resources.

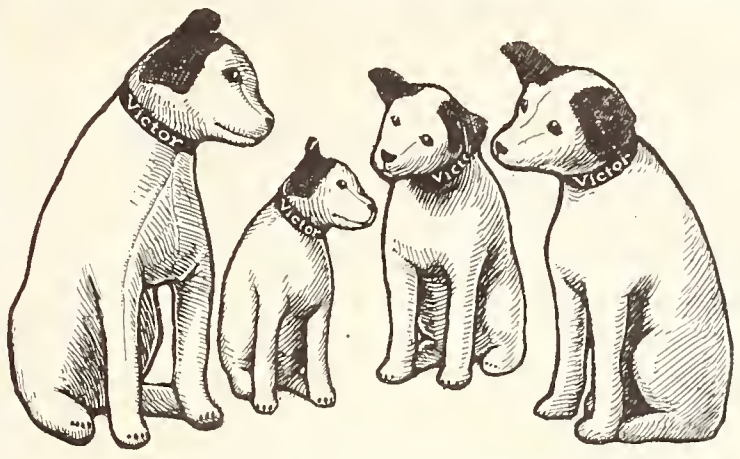
Referring to the general financial position of the American Graphophone Co., Philip T. Dodge, president of the company (and who is also president of the Columbia Graphophone Co.), stated at the meeting of the former company's stockholders, held recently, that while earnings are showing a gratifying increase, it was his opinion that the surplus earnings should be devoted to placing the company in an impregnable financial position rather than the payment of extra or increased dividends at this time. Annual dividends of 7 per cent. on both common and preferred stock, which share equally in dividends after 7 per cent. has been paid on both, are now being paid, and it was believed that regular payments might be increased or an extra dividend declared.

AN EXPOSITION SOUVENIR.

"The Art of the Exposition" Not Only Illustrates and Describes the Architecture, Sculpture and Other Decorative Features of the Panama-Pacific Exposition, but Devotes a Section to the Jobbers' Convention.

There has just been issued, as an attractive memento of the Panama-Pacific Exposition, an elaborately compiled volume on "The Art of the Exposition," and which, in addition to an exhaustive illustrative treatment of the architecture, sculpture, landscape gardening and mural decorations of the exposition, with the notable features beautifully set forth in photogravure, devotes a section to the convention of the National Association of Talking Machine Jobbers, held in San Francisco on July 24 and 25, 1915. The program of the convention, as it covered the ceremonies and entertainment on the exposition grounds, is set forth in full, together with views of the various features of the Victor Co., exhibit, the dancing on the lawn to the music of the Victrola, and the points of interest visited by the jobbers while in San Francisco. A large size panoramic view of the convention delegates is also included in the volume, and thus makes it of particular interest and importance to those of the jobbers and their families who made the trip to the Pacific Coast. The book, which is published by Paul Elder & Co., San Francisco, bears on its cover a replica of the Victor Temple of Music at the exposition, heavily embossed in gold.

Some people tell the truth out of pure cussedness.



"Victor"
TOY DOGS
Made of White Velvet, stuffed, will soon be shipable.

Public Demand Has Brought Out "Victor"

The famous fox-terrier has been officially authorized as a toy. Sales for "His Master's Dog" are assured—also effective window and interior displays.

Victrola stores should place orders now for this new publicity feature. The dogs retail profitably and are good advertising. Buyers already include nearly all of the big New York City Victor and toy dealers.

Made of stuffed white velvet, the four sizes are 12, 15, 17 and 19 inches high. Selling prices are $1, $1.50, $2 and $2.50. The cost is $8, $12, $16 and $20 per dozen respectively.

Samples are on display at the Hotel Breslin Toy Fair. No jobbing arrangements have been made. Better order a spring trial shipment.

J. Henry Smythe, Jr., Manufacturer of "Victor, His Master's Dog"
8 West 40th Street, New York City

EXECUTIVE COMMITTEE TO MEET.

Governing Body of National Association of Talking Machine Jobbers to Convene in New York on February 15 and 16—All Members Welcome—To Discuss Stevens Bill.

The annual mid-winter meeting of the executive committee of the National Association of Talking Machine Jobbers will be held at the Hotel Knickerbocker, New York, on February 15 and 16, at which time the executive committee of the association will also meet to report on and discuss the progress that has been made in support of the Stevens Bill. The meeting will not be confined to members of the committee, but every member of the association is privileged to attend the session.

While in New York the jobbers' committee will also meet with various other associations of the music trade and take action on the Klugh plan for the formation of a Music Trade Chamber of Commerce.

H. N. McMENIMEN HONORED.

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., was honored last week by being elected chairman of the board of directors of the Chamber of Commerce, Plainfield, N. J. Mr. McMenimen has been a resident of this city for many years, and has been a prominent factor in its industrial and civic growth.

C. G. Child, head of the recording department of the Victor Talking Machine Co., was one of the attendants at the wedding of Miss Geraldine Farrar, the noted grand opera star, and Lou-Tellegen, the well-known actor, in New York on February 8.

The El Paso Phonograph Co., of El Paso, Tex., has increased its capital stock from $20,000 to $30,000.

Boston—Oliver Ditson Co.
New York—Chas. H. Ditson & Co.

YEARS of experience in co-operating with musical instrument dealers particularly fits the House of Ditson to anticipate and fill the requirements of Victor dealers. We know musical instrument conditions and we help you in every way.

Many Victor dealers handle sheet music or musical instruments such as drums, cornets, violins, etc., and there is an advantage here in a saving of freight and express to those who send combination orders for goods of both classes.

What we desire to impress as our greatest service, however, is the vast stock of Victor goods continuously on hand, including machines, records and other supplies, and a service of this kind is not only desired, but is absolutely essential to the dealer who wants to make the most profits during the next two months.

Ditson Victor Service

ENVELOPES

are far superior to wrapping paper for wrapping records. Your customers will appreciate this kind of package more than you imagine. We make them of gray or brown kraft with string and button fastener, either printed to your copy or plain. Try our corrugated paper packing boxes. Samples upon request.

NEW HOME OF THE WONDER TALKING MACHINE CO.

Occupying 13,000 Square Feet of Floor Space at 113 Fourth Avenue—Facilities Materially Increase Their Output—Plant in Charge of Competent Executive and Force.

The Wonder Talking Machine Co., manufacturer of the "Wonder" talking machines, has been able to materially increase its output since moving into its new plant at 113 Fourth avenue, New York. The company has been working to capacity the past few months, and the numerous repeat orders which it has received from dealers throughout the country indicate conclusively the satisfaction which the "Wonder" machine is rendering.

In its new home at 113 Fourth avenue (the Fish Building), two views of which are shown herewith, the Wonder Talking Machine Co. occupies 13,000 square feet of floor space, and it is indicative of the company's success that every inch of this space is utilized to execellent advantage. This is a remarkable record in view of the fact that the "Wonder" talking machine has been on the market only eight months.

The visitor to the "Wonder" factory is impressed immediately upon his entrance with the fact that the lighting and working facilities are ideal. Artificial light is very seldom required, and the employes work in an atmosphere of cheer and comfort, which is an invaluable aid to the promotion of maximum efficiency in every department of the factory.

In order that its patrons may secure adequate service from every standpoint, the officers of the Wonder Talking Machine Co. engaged the services of successful factory men whose success was well established. These factory heads have left no stone unturned to increase the excellence of the company's product, and their manufacturing activities are encouraged by the co-operation which they are given by the other branches of the plant.

President McNulty and Secretary Radt are both actively interested in the progress of their company, the former being in close touch with every phase of the manufacturing division and the latter concentrating on the handling of the business and financial ends of the industry. These two capable executives are keenly alive to the future possibilities of the "Wonder" machine and have laid the foundation for a business which should steadily advance each succeeding year.

Columbia Graphophone Company
Woolworth Building, New York

INCREASES CAPITAL TO $1,000,000.

Otto Heineman Phonograph Supply Co. Enters Dictating Machine Field—Also Establishes Export Department—Paul L. Baerwald Appointed Sales Manager—Company Takes Increased Space to Meet Requirements.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., Inc., 25 West Forty-fifth street, New York, manufacturer of talking machine motors, sound boxes, tone arms and other talking machine parts, closed a number of important transactions this month which are in line

Paul L. Baerwald.

with the company's remarkable expansion for the past few months.

In order to take care of its fast growing business and provide for future developments, the company has increased its capital from $750,000 to $1,000,000, this increase being decided upon at a special meeting of the board of directors held last week.

The Otto Heineman Phonograph Supply Co., Inc., has taken over the business of the American Parlograph Co., distributer of the Parlograph dictating machine, which has achieved wide popularity. The company is also planning to market another type of dictating machine, which will embody several distinctive features.

For the past six months Mr. Heineman has been busily engaged in establishing sales offices in the important trade sections of this country, but recognizing the vast possibilities of the export market, he has consummated arrangements to open export offices in the principal States of South America. In addition to marketing the various talking machine parts which the company manufactures for the trade in this country, it is planning to ship to South American countries a complete line of cheaper talking machines which will compare favorably with the machines formerly exported by Germany to South America. This line will not be introduced to the trade in this country, but sold only to South American trade.

Paul L. Baerwald, who is familiar with the talking machine industry from all angles, has been appointed Eastern sales manager of the company with headquarters at the executive offices. Mr. Baerwald spent considerable time at the Heineman factories before joining the sales staff, and the success which he has achieved in his initial trips is due in a considerable measure to the thorough factory training he received, coupled with his pleasing personality and sales ability.

These numerous additions have forced the Otto Heineman Phonograph Supply Co., Inc., to materially increase its executive office space, notwithstanding the fact that it only moved to its present spacious quarters the first of the year. To this end an additional section of the sixteenth floor of the Central Building has been added to the space it now occupies on this floor. This space will be utilized as extra display rooms and private offices and, judging from the company's activities the past few months, more space will soon be needed.

President Otto Heineman states that the factory is working to capacity, and that the vastly increased manufacuring facilities at its command since the first of the year have materially increased its total output.

CONDITIONS IN LOS ANGELES

Satisfactory in the Talking Machine Field Despite Unusually Disagreeable Weather—Dealers May Form a Local Trade Organization—News Happenings of the Month.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., February 3.—In spite of the fact that over thirteen inches of rain fell here during the month of January, business has been exceedingly good both in record and machine sales. The local jobbers have not completely recovered from the enormous Christmas business and are still out of a great many of the best sellers in records and machines. The scarcity of fumed oak machines in all makes necessitated the loaning of machines in other finishes, and nearly all the dealers are behind on their exchanges. Business in general is very good and indications point to a very prosperous season.

O. A. Lovejoy, wholesale manager of the Southern California Music Co. for Thomas A. Edison Co., is leaving in a few days for New York City to attend the convention of Edison jobbers. While in the East Mr. Lovejoy will visit the Edison factory, where he will endeavor to arrange for better facilities on future shipments to the Coast.

The Andrews Talking Machine Co. has recently added the Edison Diamond Disc line and now has a complete stock both of records and machines.

C. H. Booth, manager for Barker Bros., reports a very prosperous business during January. Mr. Booth is very much in favor of the talking machine dealers organizing in Los Angeles, and believes that a great deal of good would come from such an organization.

A. J. Kendrick, representing the Victor Talking Machine Co., of Camden, N. J., is making an extended visit in our city. The heavy rains are keeping him indefinitely in the city, and he has been unable to visit any of the surrounding towns.

J. A. Cook, formerly a road salesman for the Edison Phonograph Co., with headquarters in Chicago, has taken charge of the talking machine section of the Schumann showrooms at State and Wyman streets, Rockford, Ill.

CENTURY CABINET COMPANY

25 West 45th Street, New York City

DETROIT TALKING MACHINE DEALERS ORGANIZE.

Retailers and Wholesalers Form Talking Machine Association with Max Strasburg as President—The Attractive Edison Shop—Grinnell's Victor Display—New Talking Machine Stores Opened During Month—James P. Bradt Makes His Initial Visit.

(Special to The Talking Machine World.)

DETROIT, MICH., February 8.—Undoubtedly the three most prosperous industries to-day are the steel, automobile and talking machine. Detroit is the center of the motor car business and the statements made by the officials of these concerns indicate that 1916 will be the greatest year that industry has ever seen. The talking machine business for January was the greatest it has ever been and the dealers are certain that 1916 is going to break all records for talking machine business. What they are endeavoring to do is to keep on hand all the stock they can afford, because one thing is positively certain—there will be a shortage of instruments before the end of the present year. The various factories are certainly doing their very best to keep up with the orders, but the trouble is that the orders are exceeding the capacities of the plants. Advice to dealers is to "stock up" and "get all the instruments you can *now*. Benefit by last year's experience." The dealers who will profit this year will be those who will have machines to sell.

New Association Formed.

The talking machine dealers in Detroit have finally organized a local association known as the Detroit Talking Machine Association, comprising both retailers and wholesalers. The first regular meeting was held at the Columbia store, Broadway, on January 20. Officers were elected as follows: Max Strasburg, president; Sam Lind, first vice-president; Wallace Brown, second vice-president; Sydney J. Guest, 541 Dix avenue, secretary, and E. K. Andrew, treasurer. Dues were placed at $5 per year and the first man to pay was J. H. Goldberg, Gratiot avenue dealer. A committee of five was appointed to draw up a constitution and by-laws, to be discussed at the next meeting.

Max Strasburg gave an excellent talk on the value of a local association, what could be done toward the elimination of trade evils if everybody would pull together and work in harmony. "You must not expect quick results from such an organization," he said. 'It will take time before we all know each other thoroughly, and then we will be able to get down to real business. The problems that this association should take up relate to the interest proposition, some of us charge interest; others do not; there is the question of allowances for trade-in instruments; these allowances should be more uniform; there is the question of sending records out on approval, and another great question, of giving records with machines at the time of sale. We all have our opinions on these different problems. By talking things over most likely we can conduct our business along more uniform lines." (Mr. Strasburg, by the way, is the oldest talking machine man in Detroit in years of experience—not in age.)

E. K. Andrew, of the J. L. Hudson Co.; Wallace Brown, of The Edison Shop, and Sam Lind were others who talked on the great good that could be accomplished by a live organization. The man who suggested a talking machine association was Sam Lind, of the Columbia Co. He has charge of city sales and as soon as the idea came to him he got in touch with Mr. Andrews, of the J. L. Hudson Co., who immediately got enthusiastic. Others in the trade were asked about it and they all agreed that it would be a good thing. The second meeting of the association was held Monday evening, February 7, at the Columbia store, most of the evening being given over to a discussion of the constitution and by-laws, the payment of dues and acting on new membership applications.

The more one visits the new store of The Edison Shop on Woodward avenue, owned by the Phonograph Co., of Detroit, the more one realizes what a magnificent place it is. The minute you enter the door you become impressed with the Edison machine owing to the gorgeous surroundings and appointments, and as you visit each floor you realize the increasing importance of the talking machine business. Roy Babson Alling has full charge of the Detroit store, which sells at retail in addition to jobbing Edison machines in Michigan. Miss Christine Miller, one of the Edison artists, was in Detroit February 5, 6 and 7, giving a concert on the latter date.

Wallace Brown, of the Wallace Brown Edison Shop, Detroit, reports greater activity at his store in January than any previous month since he has been in business, exclusive of December. "We are still behind in our orders on machines; our record business is improving every day. The outlook for 1916 is great."

The Ecco Phonograph Co. has opened a store in the Hotel Cadillac building, Rowland street side, Detroit, where it will sell at retail in addition to handling its business for American and European business. This concern makes its own machines, having a factory on the west side of the city. The machine retails at $5.

Grinnell Bros. during the first week in February had a window display of Victor records—one of the most attractive ever seen in this city. The entire window contained records which were placed in all sorts of ways, many on the floor, on the walls and strung along on strings. A card in the window said: "31,500 records are on file in this store. There are 23 demonstration rooms."

The thirteenth annual meeting of the branch managers of Grinnell Bros. was held in Detroit the week of January 24 and consumed four and one-half days. Business sessions were held twice daily. All phases of the talking machine and piano business were discussed. Reports of the various managers showed that 1915 was a prosperous year, and everybody seemed optimistic about 1916. There

DETROIT DEALERS ORGANIZE.

(*Continued from page* 29.)

was a banquet on Tuesday night with S. E. Clark acting as toastmaster. On Wednesday evening Grinnell Bros. gave a masquerade dance at Burke's Casino, at which were present all the managers, their wives, officers of the company and the entire force of employes of the Detroit stores. The details were worked out by the Goodfellowship Club.

The American Record Exchange has opened for business at 73 East Columbia street, Detroit. This concern announces: "Victor and Columbia records exchanged for five and ten cents each. Records also bought and sold."

W. D. Trump, Jr., has been appointed manager of the branch of the Max Strasburg Shop, opened at 74 Library avenue, Detroit. This will be the permanent headquarters after the first of April.

Goldberg's phonograph store, Detroit, has moved from 236 to 167 Gratiot avenue. The building is two stories high, both floors being devoted to Mr. Goldberg's business. The soundproof booths are of white enamel with mahogany trimmings. It now ranks as one of the finest exclusive phonograph shops in the Middle West.

The Home Furnishing Co., North Burdick street, Kalamazoo, has added a line of phonographs and records.

At 1588 Michigan avenue is a talking machine store operated by J. W. Nowicki, who handles Columbia goods exclusively. Mr. Nowicki personally gives little attention to this phase of his business, but he has a very able manager in the person of his thirteen-year-old daughter, Emilie, who does all of the buying and the selling. She is a wonderfully clever girl for this business. A complete assortment of English, Polish, German, Russian, Bohemian and Lithuanian records are carried in stock, and this young lady talks enough of all of these languages to take care of customers when they come in. Not long ago she gave the Columbia an order for 2,200 foreign records at one time. "I leave everything about this department to my daughter, Emilie," said her father in talking with The Talking Machine World correspondent. "She handles it better than a grown person; she takes a lot of interest in the department, she speaks all the different languages and knows just what kind of foreign records should be kept in stock."

James P. Bradt, general sales manager of the Columbia Co., was here February 1. He said business all over the country was booming. It was his first visit to Detroit. It made a great impression on him.

OPENS GENERAL REPAIR SHOP.

The Talking Machine Repair and Sales Co., New York, of Which A. H. Dodin Is President, Will Repair All Makes of "Talkers" in Shop Which Was Opened Lately.

The Talking Machine Repair and Sales Co. recently incorporated under the laws of New York to fill what may be termed a long-felt want in the trade. The new concern has opened a shop at 25 East Fourteenth street, New York, and will specialize in repairs of talking machines of all makes and styles for any dealer or his customers. It will tend to remove the difficulties faced by the dealer in a certain line when he had to persuade his jobber to have repaired a machine of another make. The great number of new machines, particularly of the cheaper types, on the market also makes a general repair shop a welcome institution.

Andrew H. Dodin, president and general manager of the new corporation, is, perhaps, the best known repair man in the talking machine field, and has spent about fifteen years at that work. His first work was in Brussels, Belgium, under Albert Durant, the noted European expert, and later spent six years with the New York Talking Machine Co., where he conducted what is declared to be one of the finest repair shops in the trade in the matter of tool equipment and lay-out and in the amount of stock carried.

Mr. Dodin will be in direct charge of all the work of the new corporation, and will be assisted by George Cockrell, long connected with local jobbers as a repair man, who will act as outside representative of the company among the dealers. The interest that has been shown in the new venture makes its success assured.

ISSUE STRIKING VICTOR POSTERS.

The advertising department of the Victor Talking Machine Co. sent out last week to Victor dealers three very attractive and striking posters, two being devoted to the new Tungs-tone stylus and the other to "Mother," one of the most popular songs now in vogue. These posters can be used to excellent advantage by Victor representatives throughout the country, as the general public's interest in the Tungs-tone stylus has been stimulated by the advertising appearing in the national magazines announcing the new needle.

Other literature accompanying these posters included new repair catalogs for the Victor I F.

ACTIVE CONDITION OF THE TRADE IN CLEVELAND.

Volume of Business Increase for the Past Month Over Last Month Ranged Somewhere from 20 to 120 Per Cent.—Talking Machine Men Join Cleveland Music Trade Association—Machines of All Makes in Great Demand—Output Is of Excellent Volume.

(Special to The Talking Machine World.)

CLEVELAND, O., February 7.—The talking machine industry has been one of the most active in this city during the past month. In spite of the fact that there is a shortage of goods, the volume of business increase for the past month over the same month last year ranged anywhere from 20 per cent. to 120 per cent. Such artists as Pablo Casals, Oscar Seagle, Julia Culp and Mischa Elman gave recitals here during the month and thereby created a larger demand for their respective records.

The talking machine men of this city have been taken into the Cleveland Music Trade Association, and with their combined efforts will make this city a more potent factor than ever before in musical matters.

The Euclid Music Co., Victor dealer, reports that the volume of business for January was greater than that of any previous January in the history of the company. A. W. Witter, general sales manager of the concern, expects to take a trip to the factory in the near future.

Manager Morton, of the Columbia Grafonola department at the G. M. Ott Piano Manufacturing Co., Euclid avenue, says: "Conditions in Cleveland are excellent and the demand for Columbia product is good and we are on the job, so why shouldn't we have a big business this year? We will."

The William Taylor & Sons Co.'s Victrola department also reports a record January business. T. A. Davies, manager of the department, just returned from the Victor factory, having had a very successful trip. He stated that no sale of a machine was lost during the holidays, since he had machines of every type of both the Victrola and Grafonola talking machines.

The Wade H. Poling Piano Co.'s Victrola department, under Earle Poling's managership, again attracted much attention by means of its unique window displays, especially featuring the higher grade Victrolas and records.

The Phonograph Co., of this city, Edison dealer and distributer, states that the January business equaled that of December, which was the banner month of any since the inception of the organization.

The Fischer Piano Co., distributer of the Pathé phonograph, has realized excellent results during the past month. The company is now supplying over eighty-five dealers throughout its territory.

Manager J. J. Schreiner, of the Bailey Co.'s talking machine department, states that the business for the past month showed a material increase, despite a marked shortage in the Victrola, Columbia and Edison lines, which the department carries.

The Diamond Dise Talking Machine Co., located in the prominent East End residential district, reports that the business for January was fully as good as that of December. Manager E. A. Friedlander said that every indication pointed to an exceptionally good year's business.

Buesher's Victrola House has been doing some extensive advertising by means of eight large billboards in different sections of the city. The advertising consists of a picture of a large Victrola and a Victor record, with a very practical suggestion, appealing to all classes of people.

The Pathé talking machine department of Stearn & Co. expects to move from the sixth floor to more commodious quarters in the balcony of the building, consisting of a concert hall and eight large demonstrating rooms. Manager C. H. Johnston was very optimistic regarding business conditions.

The Collister & Sayle Co., Victor jobber, is now getting nearly all the models of Victrolas to supply the increasing demands of its numerous dealers. There is a tremendous demand for the new Victor tungs-tone stylus. Jack Kennedy is the wholesale manager and Miss Jeanette Heisa is retail manager.

Business at the Eclipse Musical Co., extensive Victor jobber, has been very large, and the results for January were greater than those of any previous year. The demands have been very large, and it has only been due to the increased shipments of goods from the Victor factory that the dealers were better satisfied than ever before.

During the past month Miss Irene Heasley, formerly connected with the Caldwell Piano Co.'s Victrola department, and Oscar E. Linn, credit man for the Caldwell Piano Co., were married. Manager Schirring, of the Victrola department, entertained the bridal couple and the sales staff and and employes of the company showed their good wishes by means of gifts.

The B. Dreher's Sons Co. reports a trade increase of 33⅓ per cent. over the same month a year ago. The Aeolian-Vocalion has met with excellent success and numerous sales are reported weekly. Manager W. G. Bowie anticipates continued good results during the following months.

The Columbia Graphophone Co., under the energetic managership of G. M. Madson, showed an increase of over 100 per cent. over the same month a year ago. Mr. Madson said that he had to stop opening up new accounts owing to the tremendous demand from the fifty local dealers.

Some of the recent Cleveland dealers were: Mr Raynor, of the Yahrling-Raynor Co., Youngstown, N. Y.; J. E. Leighton, Painesville; George E. Nichols, Nebraska Cycle Co., Omaha; Mr. English. Stewart Talking Machine Co., Indianapolis, Ind.; Bill Gaston, representing the Victor Co.; Mr. Leopold, of May & Leopold, Steubenville, O.; French Nestor, Pittsburgh.

JOINS WATKINS MUSIC CO.

Norman H. Cook, Formerly Manager of Talking Machine Department of Boggs & Buhl, Pittsburgh, Goes with Youngstown, O., Concern—Long Experience in the Business.

(Special to The Talking Machine World.)

PITTSBURGH, PA., February 8.—Norman H. Cook, formerly manager of the talking machine department of the Boggs & Buhl store in this city, resigned on February 1 to become a member of the Watkins Music Co., of Youngstown, O. He was in charge of the Boggs & Buhl department for a year and a half. Mr. Cook learned the talking machine trade from the ground up, and, although a young man, has achieved enviable success in the business. He began his career with the Bennett Piano Co. at Warren Pa., his home town. Following that connection and previous to coming here, he was associated for three years with the W. F. Frederick Piano Co. at Cleveland, O. Mr. Cook's rapid rise and his marked success as manager of the Boggs & Buhl department resulted in his being taken into the firm of the Watkins Music Co. He will leave this city to assume his new duties in Youngstown about the 15th of the month, being followed by the best wishes of his many friends in the trade.

DEATH OF ALBERT C. PHILLIPS.

Son of Walter P. Phillips, Well Known in the Talking Machine Trade, Dies Suddenly In New York—Prominent Newspaper Man.

Albert C. Phillips, a member of the staff of the Financial Bureau of the New York Times and well known in newspaper circles, died suddenly at his home in New York on Tuesday, February 8, in his forty-fifth year. The deceased was the son of Walter P. Phillips, general manager of the original United Press Association, and for many years connected with the Columbia Graphophone Co. as head of the publicity and promotion department. Mr. Phillips, Sr., retired from active business some years ago.

TALKING MACHINE TRADE PROSPEROUS IN ST. LOUIS.

Gratifying Conditions Exist in Missouri—Korber-Brenner Activity—Pathé Wholesale Warerooms—Good Work of Talking Machine Dealers' Association—Great Volume of Victor Advertising—Christine Miller and the Edison—Columbia Co.'s Large Business.

(Special to The Talking Machine World.)

St. Louis, Mo., February 8.—There is decided visible evidence of the prosperity of the talking machine trade in and about this city. New booths, enlarged space and additional forces in talking machine salesrooms are much in evidence.

Take for instance Aeolian Hall, which is giving up that wonderful first floor of the local warerooms, that has always been sacred to grand pianos, fine rugs, settees and comfortable chairs for the music lovers of St. Louis, to record demonstration rooms. Six booths and a stock room have been built and at this writing are being decorated in approved Aeolian Hall style. Sales Manager Halman is especially proud of his selection of electrical fixtures. Talking Machine Manager Hallahan is content with claiming credit for the effectiveness of the booths. This means that the Aeolian-Vocalion has outgrown the cellar, where the talking machine department has been housed for many years, and has been moved to the main floor for record business, in addition to the fourth floor, which was given over to machine sales some months ago.

At the Silverstone Music Co. five additional booths are being constructed as a second story of those on the main floor, and will be reached by a broad artistic stairway which will start from near the front door.

At the Columbia warerooms they have been doing some preparedness work, and Manager Irby W. Reid says they have everything but the munitions. The chief work during the last month has been a complete rebuilding of the record cases in the stock rooms. C. R. Salmon, the wholesale manager, says that the new stock cases will permit the wholesale force to handle the record orders with a great deal more dispatch and accuracy than ever before.

"In the city the greatest trade on single records follows the appearance in the city of an artist with a popular number. Irene Franklin was here and we sold a lot of her records. This week Gus Williams was singing at the Olympic, and we are having a great run on his numbers. We have been doing our advertising mostly along the record lines, and the trade has responded in surprising form," said Mr. Salmon.

E. C. Rauth, of the Koerber-Brenner Music Co., Victor jobber, returned recently from an extended southwestern trip and reports a most excellent business in that section. "The people there have money and they are spending it," he says. "And first they seem to be buying talking machines, and those who have machines from former good crop years are buying records. Everywhere in this middle section of the country business is good and talking machine trade is leading all the rest."

Mr. Rauth is quite an enthusiastic supporter of the interview with C. B. Noon, manager of the musical instruments department of the Stix, Baer & Fuller Dry Goods Co., which was published in last month's Talking Machine World, and he would recommend that all dealers, old and new, read this thoroughly and talk it over with other men of the trade, that they may avert any threatened calamity to the business through the selling of cheap machines that will destroy the standing the business has built for itself while handling only dependable merchandise.

R. H. Gordon, of the Pathé Co., reports considerable progress with his line in the city, and even more progress in his country district. When he came here his machines were on sale only with the Hellrung & Grimm Furniture Co. Now he has stocks in the Lehman Piano Co., on Piano Row; the O'Neil Piano Co., on Grand avenue, in the middle West End, and the Sommers Furniture Co., in Piano Row. He has excellent prospects for further local sales outlets.

The Pathé wholesale warerooms are in the same corridor in the Blackwelder Trust Co. Building as a Justice of the Peace court, and as Mr. Johnson's idea of hospitality is to keep open doors, he sometimes gets on the nerves of the court, despite that body's appreciation of the excellent music. So it often happens that while he is demonstrating to a prospective customer a man acting as though with authority will appear and silently close the corridor doors. Then they remain shut until court adjourns, when they are thrown open again; but, having due respect for the majesty of the law, Mr. Gordon makes sure when court adjourns.

One of the accomplishments of the Talking Machine Association here was the establishment of a rule that the members should not sell machines on instalments without interest on deferred payments. So far, it appears that the members are observing this rule, but the furniture stores are not members. They do not charge interest on furniture payments, and they object to charging interest on talking machines. Recently this put the exclusive talking machine salesmen in hard competition on some sales. Some sales have been made without the question of interest being touched upon, and when the seller objected the managers have been forced to give up the sale. Some uncomfortable interviews for the salesmen have followed. The furniture houses, however, are said to strictly enforce the other rule, that of limiting the records sent on approval to forty-eight hours and requiring that the customer buy at least 25 per cent. of those sent. It is likely that an effort will be made in the near future to adjust the interest complication.

Getting down to the retailer, the reports that are heard are of a most surprising business last month. "We had an excellent Christmas trade," said Manager C. B. Noon, of the Stix, Baer & Fuller Dry Goods Co., "and naturally I figured that January would be rather quiet; but, much to my surprise, we did a capacity business at times. Our month totaled handsomely, and February has started off nicely."

This is practically the report that has been heard

VICTOR DISTRIBUTORS

all along the line. A good many dealers have not yet received all of the machines that they ordered for the Christmas sales, and they are in no haste to deliver large machines where they have small ones out, because they have a steady trade that is eating up their belated shipments about as rapidly as they can get them in. The jobbers say that they will be caught up with the situation by the middle of the month and will be ready to go ahead on new business. The retailers say they are ready to order more as soon as they are promised delivery, and in fact some of them have gone ahead ordering despite delayed shipments. The record situation as to stock seems to be very good indeed.

Manager James Campion, of the Story & Clark Piano Co., who handles the Edison line, is preparing for an active talking machine campaign from that store. He is formulating plans for a ground floor record sales department, and has engaged Miss McKim, of the Famous & Barr staff, who is said to have made a remarkable sales record with Edison machines at the former store.

Again this month was the volume of advertising on behalf of the Victor records noticeable. The morning papers on the day the monthly list was announced seemed to be chiefly Victor records, and the ads continued in the afternoon papers. It is an interesting study to watch the announcements of the new records. The Victor list announcements are duplicated several times in ads of comparatively small space, but there is a large degree of effectiveness in it. The Columbia list is announced in a Columbia warerooms advertisement of liberal space that, too, is effective in its way. The last Edison disc list was announced in a display ad of the Silverstone Music Co. The other dealers complained that there had been a slip somewhere and that they did not have the list in time to join in the advertising.

Miss Christine Miller sang at the Victoria Theatre January 15 in a tone test with the Edison disc machine, and the usual tests were made on the capacity audiences as to whether they could tell which was the human voice and which was the machine when both were singing. It was a feature of this test that the newspapers sent their musical critics to hear this concert, and without exception they expressed wonderment at the performance. Some of the reports were very carefully worded, but the recognition was as complete as could be expected for mechanical music, considering the prejudice that still exists in the minds of those who are accustomed to the "high brow" musical affairs. As one dealer in another line put it, "it would seem that the talking machine has certainly become a musical instrument when the critics will sign their names to articles comparing it to the human voice."

Chris Johnson, formerly of the Columbia warerooms but recently with the talking machine department at the Nugent Department Store, has gone to Logansport, Ind., where he will have charge of a department recently established in a department store in that city. In his new place Mr. Johnson reports to Mr. Oleman, in charge of the Nugent department, which is controlled by the National Talking Machine Sales Co. This department is making an enviable record with Edison and Columbia machines.

H. E. SPEARE IN CHARGE.

H. E. Speare has been appointed manager of the Victor department at the Lord & Taylor store, New York, succeeding W. J. Lynch, who severed his connections with the store last week. This department is under the direction of the Musical Instrument Sales Co., New York.

Mr. Speare was previously manager of the Lord & Taylor Victor department, having been appointed manager of the department when Lord & Taylor moved to their store at Thirty-eighth street and Fifth avenue. Subsequently he was appointed manager of the Victor department of the William Hengerer Co., another store in the Musical Instrument Sales Co.'s chain. Mr. Speare was very successful in both of these important capacities, and is thoroughly familiar with Victor retail merchandising from all standpoints.

FORMAL OPENING IN DALLAS.

Western Automatic Music Co. Featuring the Edison Diamond Disc Phonograph.

(Special to The Talking Machine World.)

DALLAS, TEX., February 5.—The formal opening of the handsome new quarters of the Western Automatic Music Co. at 1604 Elm street, this city, was held yesterday and proved a decided success. The company handles orchestrions and automatic pianos and also features the Edison Diamond Disc phonograph very strongly. It occupies three stories in its new building, two of them devoted to display and salesrooms and offices, and the third to stock storage.

BRINGS McCORMACK TO LIMA, O.

Frank E. Harman, President of the F. E. Harman Co., Victor Dealers, Leading Spirit in Enterprise—Heavy Guarantee Required.

(Special to The Talking Machine World.)

LIMA, O., February 8.—An unusual and praiseworthy enterprise in the line of developing interest in the musical possibilities of the talking machine is to be credited to Frank E. Harman, president of the F. E. Harman Co., which conducts a large Victrola department in connection with its housefurnishing business in this city.

Through Mr. Harman's efforts arrangements have been made to bring John McCormack, the famous tenor, to the Memorial Hall, this city, on March 9, despite the fact that a guarantee of $2,000 was required. Arrangements have been made to afford people from surrounding towns an opportunity to attend the concert, and the Harman Co. is making a special drive on McCormack records and other high-class music features. Mr. Harman's connection with the plan to bring Mr. McCormack to Lima is in itself an excellent advertising stunt, especially as some time ago he was also instrumental in bringing Mme. Tetrazzini to this city. The ticket sale is being handled by the Harman Co.

MUST MAINTAIN LIST PRICE.

The Victor Talking Machine Co. has called the attention of its dealers to an injunction which it recently obtained in the United States District Court, New York, against the Globe Talking Machine Co., New York. This latter concern violated the terms and conditions of its dealer's contract with the Victor Co., according to the complaint filed.

The injunction prohibits the Globe Talking Machine Co. from selling any Victor products at less than the full list price or royalty marked upon each machine and record.

The Houston Phonograph Co., Houston, Tex., which was adjudged bankrupt on October 29, 1915, has applied for a discharge from bankruptcy, and a hearing will be held in Houston on March 10.

NO MORE WINDING BY HAND-THE MOTROLA DOES IT FOR YOU

Last month we announced the Motrola.

While we knew there would be a big demand, we did not realize that the demand was so urgent, as was indicated by the avalanche of inquiries and orders that came in immediately from almost every section of the country.

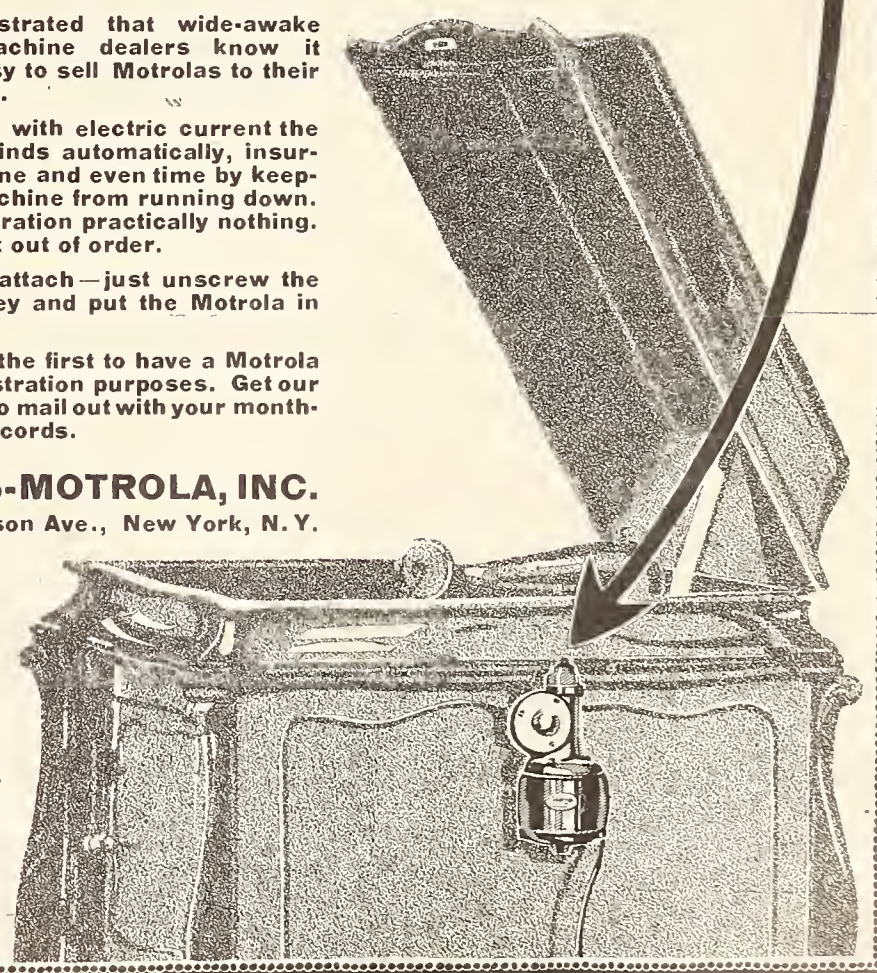
It demonstrated that wide-awake talking machine dealers know it will be easy to sell Motrolas to their customers.

Connected with electric current the Motrola winds automatically, insuring true tone and even time by keeping the machine from running down. Cost of operation practically nothing. It can't get out of order.

Simple to attach—just unscrew the winding key and put the Motrola in its place.

Be one of the first to have a Motrola for demonstration purposes. Get our literature to mail out with your monthly list of records.

JONES-MOTROLA, INC.
171 Madison Ave., New York, N.Y.



Prices, terms and all further information sent on request.

CHEST OF SILVER PRESENTED TO LOUIS F. GEISSLER.

Members of National Association of Talking Machine Jobbers Seize Upon Occasion of Mr. Geisler's Wedding to Express Congratulations, Accompanied by a Beautiful Chest of Silver.

The members of the National Association of Talking Machine Jobbers, in recognition of the many courtesies and kindnesses received at the hands of Louis F. Geissler, the general manager of the Victor Talking Machine Co., seized upon the occasion of Mr. Geissler's recent wedding to present to himself and his charming bride a testimonial of the appreciation and regard in which he is held. To this end President Andrew G. McCarthy appointed a committee consisting of James F. Bowers, of Chicago, chairman; Edwin C. Rauth, of St. Louis, and Arthur A. Trostler, of Kansas City, to make the necessary arrangements.

Chest of Silver Presented to Louis F. Geissler.

The committee selected as a most appropriate gift a beautiful chest of silver consisting of 200 pieces, each of which is marked with a handsome Old Englist capital "G." The chest is of solid mahogany and is in itself a work of art. A handsomely engraved brass plate setting forth the presentation and the occasion is attached to the chest. Accompanying the silver is a beautifully engrossed and illuminated minute or resolution, exquisitely bound in green seal leather, carrying a handsomely executed silver "G." The wording of the text is as follows:

To Louis F. Geissler,

"General Manager Victor Talking Machine Co.

"Dear Mr. Geissler: On this happy and auspicious occasion in your life your friends of the National Association of Talking Machine Jobbers take this opportunity of congratulating you and wishing you well. Your many kindnesses in the past leave bright in our memories the years we have been associated with you.

"We shall ever feel an interest in your welfare, and wish for you what you will undoubtedly command—increasing business success and an ever-widening circle of friends.

"That in your future surroundings you may be reminded of us and our association, we ask Mrs. Geissler and you to accept with these sincere expressions this silver service set as an evidence of the high esteem in which you are held by us, and trust you will be long spared to use it in good fellowship with your host of friends.

"Sincerely yours,

"ANDREW G. MCCARTHY, President.
"HARRY F. MILLER, Vice-President.
"EDWIN C. RAUTH, Secretary.
"WILLIAM H. REYNALDS, Treasurer."

Then follows a list of the members of the jobbers' association.

The testimonial as a whole is well worthy of the minds who conceived it, and is a great credit to both the association and the recipient of its splendid gift.

THE MOTROLA WELL RECEIVED.

The idea of having talking machines wound and kept wound automatically by means of electricity apparently appeals to a great number of retailers and talking machine owners, according to the response that has been made to the announcement of the Motrola by Jones-Motrola, Inc.

The new device, the invention of Joseph W. Jones, of Jones patent fame, has already been described in The World, and arrangements have been made to supply all demands promptly at an early date. One of the most interesting features of the Motrola is that the stock model will fit any of the standard types of machines without alterations, which thereby widens the field of usefulness for the device.

TO MAKE TALKING MACHINES.

The R. S. Howard Co., New York, manufacturer of pianos and player-pianos, is planning to embark in the talking machine field. The company has already shipped instruments to its dealers, and will probably concentrate on the manufacture of machines retailing at $75 to $200.

GATELY-HAIRE CO.'S LOSS BY FIRE.

Offices and Warerooms Completely Destroyed —New Quarters Secured Immediately After Fire and Business Going on as Usual.

(Special to The Talking Machine World.)

ALBANY, N. Y., February 8.—Fire, starting in an adjoining building and working its way into the offices and warerooms of the Gately-Haire Co., Inc., 108 State street, last week, completely destroyed everything owned by the concern. The fire started at 2 o'clock in the morning and John L. Gately, president, was soon at the scene and the customary opening time of the same morning found the company located at 121 North Pearl street. A few days later found the organization backed by rush shipments of machines and records, so that the trade of this territory could hardly notice a delay in the usual prompt work that has been characteristic of G.-H. service.

The maintenance of G.-H. service was accomplished by hard work; many nights the staffs labored way into the bigger hours, and then John L. Gately kept pegging away until about 3 to 4 a. m. This isn't mentioned so as to show hard work, for everyone knows that J. L. delights in work, but it proves that the interest of the Gately-Haire Co. is centered on the dealer and that everything possible was done for his benefit. Mr. Gately also expressed appreciation of the assistance tendered by his many friends.

NEW JOBBING HOUSE IN ATLANTA.

Phonographs, Inc., Organized to Handle the Edison Diamond Disc and Amberola Lines.

Phonographs, Inc., a new jobbing organization handling the Edison Diamond Disc and Edison Diamond Amberola lines exclusively, was incorporated February 8 with headquarters at Atlanta, Ga. Phonographs, Inc., will cover a zone including the States of Georgia, Florida, a large part of Alabama and a portion of Tennessee. W. F. L. Rosenblatt is in charge at Atlanta.

Until his move to Atlanta, Mr. Rosenblatt was associated with the Simmons Talking Machine Co., Briston, Va.-Tenn. He will not entirely sever connections with that organization, for O. Simmons will have an interest in the new company, the present plans of which are to begin business solely as jobbers, then after a suitable location is found open a retail department.

MANY NEW AGENTS APPOINTED.

Interest Particularly Strong In the New Fraad Junior Machine.

The Fraad Talking Machine Co., with headquarters at 225 Lexington avenue, New York, and showrooms at 1160 Broadway, reports the acquisition of a large number of active agents during the month for the various types of talking machines manufactured by the company and that several important exclusive territory deals have been made, one of them for western Canada.

The Fraad Junior, which was announced in The World last month, has proven particularly successful, and the demand for it temporarily swamped the manufacturing facilities. The Fraad Junior, retailing at $35, is an attractive model, of small size but playing 12-inch records and having excellent facilities for the filing of records in the cabinet. In all respects it is proving the leader of the Fraad Talking Machine Co.'s line.

CHANGES IN DIRECTORATE.

There have been a number of changes in the management and executive staff of the Savoy Gramophone Co., New York. At a recent meeting of the stockholders Pottash Bros., well-known Philadelphia business men, bought out the interests of several of the stockholders and were elected directors. Miss Elizabeth R. Nanes, secretary of the company, will personally supervise and direct the manufacturing and marketing of the Savoy machines.

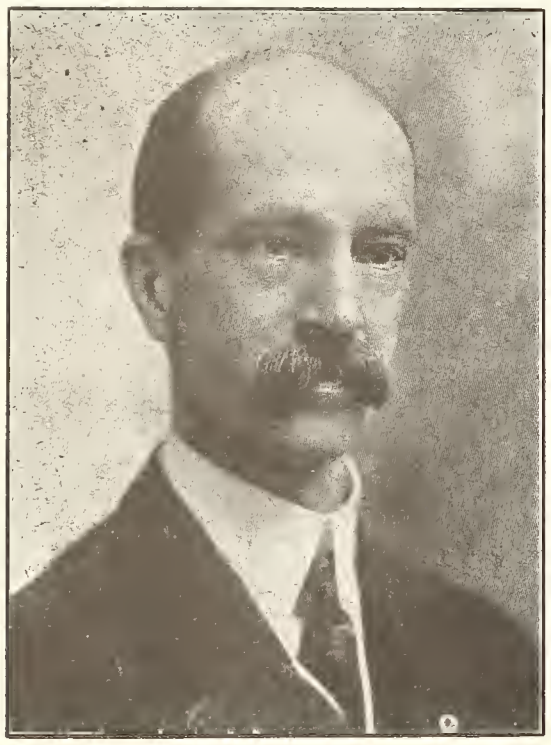
W. H. PENN WITH PATHE.

Well-Known Composer and Publisher Appointed Member of the Technical and Musical Divisions of This Prominent Company.

The Pathé Frères Phonograph Co., New York, announced last week the appointment of William H. Penn as a member of the company's technical



Wm. H. Penn.

and musical divisions. He assumed his new duties on Monday, and will make his headquarters at the Pathé recording laboratories.

Mr. Penn is ideally equipped for his new and important post, as he has been connected with the musical publishing business in all its phases for many years. For ten years he was general manager for Sol Bloom in both his musical publishing and Victor interests, and subsequent to that founded the Penn Music Co., New York, which concern achieved wide success in the publication of popular vocal and instrumental selections.

Mr. Penn has also composed a number of selections which have met with a large sale in this country and abroad, "The Honeysuckle and the Bee" being one of his best known compositions.

In an interview with a representative of The Review, Mr. Penn commented upon the remarkable progress which the Pathé Frères Co. has achieved in the past year, and was greatly impressed with the long list of well-known artists who are included on the Pathé recording staff.

The Columbia Co.'s international record department has just issued its special window hanger for the February records, the following languages being listed on this banner: Bohemian, French, German, Hungarian, Italian, Lithuanian, Norwegian, Polish, Roumanian, Spanish, Mexican, Swedish, Turkish.

NEW MACHINE REFLECTS TONES.

The Reflexophone, Now on the Market, Represents New Principles of Construction.

A talking machine of original design has just been placed on the market by the Reflexophone, Inc., 114 Fifth avenue, New York, under the expressive name of the Reflexophone, indicative of the fact that instead of the sound coming out through an open or concealed horn, as in the usual type of machines, it is reflected by means of a specially shaped chamber and comes out through the top of the cabinet. The machine comes in an attractive cabinet built on the square lines of the Colonial style, and is supplied in mahogany and other finishes. It is solidly constructed, attractive in appearance and will play lateral cut records.

The officers of Reflexophone, Inc., which was organized some time ago, are: John Reynolds, president; Henry Leeds, vice-president, and A. J. Ellis, secretary. Mr. Leeds is well known in the talking machine trade, and the creation of the new machine represents to a great extent his personal work.

Albany—for CAPITAL Service

Upside down this month!

Our rapid growth had a set-back when fire burned us out, but we are getting things into shape and will be in a better position than ever to perform the duties embraced in G-H Service.

It is needless to say what we did to get stock, but our phone and telegraph bills will never be as large again. We had a duty to perform, fire or no fire, for many dealers are now DEPENDING upon our assistance.

Rest assured that a better G-H Service will rise from the ashes of the old, and our activity in getting in shape will make a new record. We're burned but not beaten.

Thank you all for your letters of sympathy and of co-operation.

GATELY-HAIRE COMPANY

Albany, N. Y.

MURATORE AND CAVALIERI TO RECORD FOR PATHÉ.

Distinguished Operatic Tenor and Celebrated Operatic Soprano Consummate Arrangements to Record Exclusively for Pathé Library—Important Move for This Institution.

The Pathé Frères Phonograph Co., New York, announced this week the consummation of arrangements whereby Lucien Muratore, the celebrated tenor, and Lina Cavalieri, the famous soprano, will record exclusively for the Pathé disc library. This important deal had been pending for some time, and with its final completion Pathé dealers are assured of receiving records from two artists whose fame is world wide. Mr. Muratore has not previously recorded for any company.

Lucien Muratore.

Lina Cavalieri.

Mr. Muratore recently completed a season with the Chicago Opera Company, and while appearing with this company received remarkable tributes from the newspaper critics of that city. In fact, he is invariably referred to as one of our greatest tenors.

Mr. Muratore started his professional career on the speaking stage, appearing as leading man for the celebrated French actress, Mme. Rejane. While appearing at the Odeon, Mr. Muratore's voice attracted the attention of one of Paris' leading impresarios, who urged him to give up theatrical work and devote himself entirely to an operatic career.

Mr. Muratore followed this advice, and subsequently started his operatic work that has gained for him the fame which is universally bestowed on him. Among the operas in which Mr. Muratore has sung are "La Carmelite," "Maguette," "Cor Flouri," "Carmen," "Werther," "Mignon," "Armide," "Faust," "Romeo et Juliette," "Monna Vanna," "Dejanire," "Othello" and many others.

Lina Cavalieri's fame is world wide, and she has appeared with a number of the leading opera companies. She is known as "the most beautiful woman on the stage," although her voice has won for her the prominent position which she occupies in the musical world.

The Pathé Frères Co. is to be congratulated upon the addition of Muratore and Cavalieri to its list of recording artists. There will undoubtedly be a world-wide demand for records of these two celebrated artists, particularly those of Muratore, and this is evidenced by a recent article appearing in a Chicago magazine which stated: "It appears that there are two companies trying to complete arrangements with Muratore for an exclusive contract at the present time, and the successful one should reap a fortune, as Marshall Field's told me during the holiday season that they had over 800 calls for Muratore records in the past six months."

NEW SONORA STORE FOR CHICAGO.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—A lease has just been signed by the Sonora Phonograph Corp. for the first two floors of the building at 19 East Jackson Boulevard, which will be occupied by the company in April as a retail store, with J. B. Brooke in charge. About 6,000 square feet of floor space will be occupied and the premises will be handsomely decorated and equipped with every modern service device.

TO MAKE TALKING MACHINES.

Officers of the M. Schulz Co. Interested in New Enterprise of Great Significance to Trade—Particulars Will Be Soon Available.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—Officers of the M. Schulz Co., of Chicago, one of the largest piano manufacturers of the country, are preparing to organize a new talking machine company and engage in manufacturing in this line on a large scale. Otto Schulz, president of the company, said this week that they are not prepared to make any statement regarding the name of the new machines or particulars at this time, but that a great deal of practical preliminary work has been done, the demands of the trade thoroughly studied, and that, from present indications, it will be only a short time when the details of organization will be announced and the new machines will be ready for the market. It is the intention to produce a complete line, ranging from $50 to $250.

It can be safely predicted that the new line, when ready, will be a revelation in point of distinctive features, artistic architectural designs, etc. While it has been known for some time in the trade that a step of this kind was contemplated, the parties interested have been loath to make announcement of their plans until adequate information could be furnished the trade. This announcement, which will shortly be forthcoming, will be awaited with keen interest, as the reputation of the M. Schulz Co. for doing big things in a big way, and the enterprise and solidity of the concern lend significance to any enterprise with which the individuals responsible for its success are identified.

TO INTRODUCE THREE NEW MODELS.

Three new models of Triton phonographs will be announced in a short time by the Triton Phonograph Corp., 41 Union Square, New York. The designs of these, according to J. A. Kraus, general manager, will be of semi-radical lines and will be of such character as to please the ultimate purchasers.

The general offices of the Triton Corp. have been removed from the sixth floor to the street floor, being a part of the entire ground floor of the building which was recently taken by the company. A salesroom fronts on Broadway, and running along the Seventeenth street front is about one-fifth of an acre devoted to the sound box department.

Some American exporters are hurting their business prospects in Jamaica by forgetting that English is spoken there, and not Spanish, the American consular agent at Port Maria, Jamaica, points out in a recent report.

We Know How

To Manufacture for Manufacturers

Are you in need of any parts in the phonograph line? Refer to us.

NEW DIAMOND DISC CATALOG

Just Issued by Thos. A. Edison, Inc., is Unique Departure from Previous Issues.

A unique departure from all previous issues is the new Diamond Disc catalog just issued by Thomas A. Edison, Inc, Orange, N. J. The cover is a highly artistic conception, being a reproduction of the famous painting "Le Concert," by Dominiquin Pinx, done in brown on dull coated stock which enhances the softness of the engraving and adds to the warm, rich tone of the ink. Across the top of the engraving is the title in white, "Music's Re-Creation."

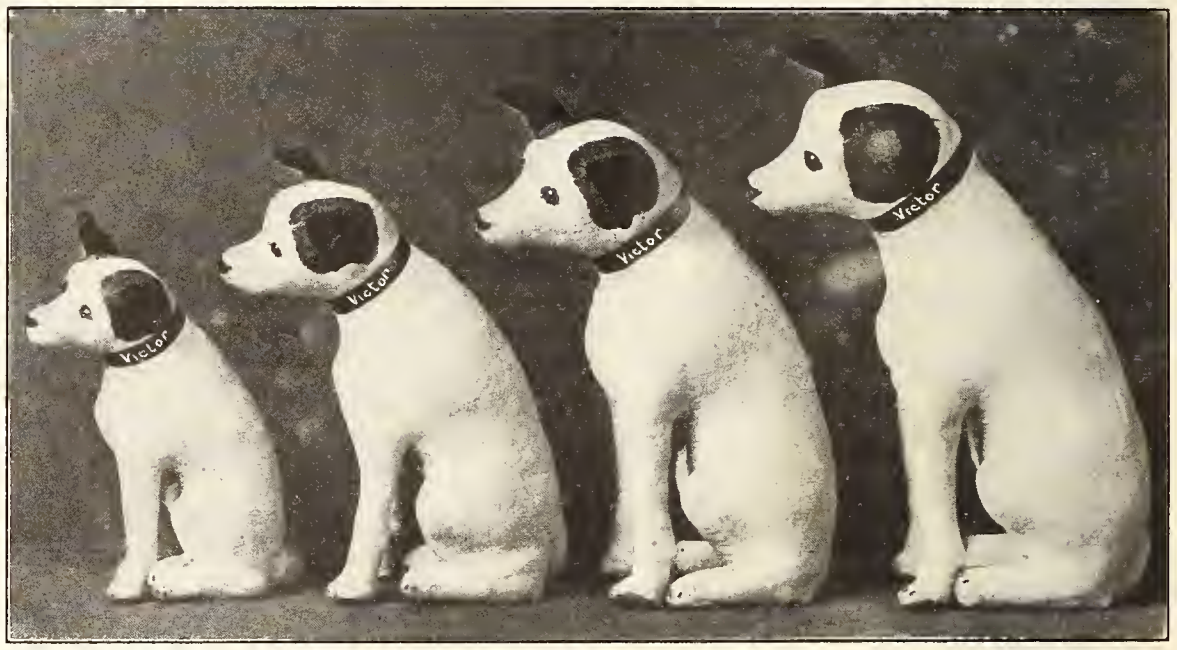
On the first inside page is a portrait of Mr. Edison, and under this "Edison's New Art." Following is a description of what is meant by "Music's Re-Creation," with some reference to the instrument itself, emphasizing its distinctiveness and briefly referring to a few of the important details of construction. After this comes an interesting reference to period furniture, with excerpts from the history of each school and an outline of the characteristics of each. This is followed by two pages devoted to the portraits of noted Edison artists, with brief reference to their musical qualifications. On the last page is a remarkably faithful illustration of the Edison Diamond Disc record, or "Re-Creation," as it is designated.

Interspersed through the reading matter are illustrations of the various Diamond Disc phonograph models beautifully done in natural colors, the entire work being in harmony with the superior quality of the Edison Diamond Disc line.

John F. Steinmetz, president of the Empire Talking Machine Co., Chicago, was crossing the street at Clark and Monroe streets recently just as a big green 12-cylinder limousine decided to do some crossing of its own. The result was a collision in which Mr. Steinmetz got the worst of it. "Two things comfort me," said he. "I escaped with my life, first, and second, it wasn't a 4d."

"VICTOR, HIS MASTER'S DOG," HAS NOW ARRIVED.

"Victor, His Master's Dog," has arrived and has made his first public appearance at the annual Toy Fair, now being held at the Hotel Breslin, New York, where the life-like white and black velvet reproduction of the famous trade-mark has proven a center of attraction and was actually referred to as the successor of the "Teddy Bear."



The Latest "Victor Quartet."

"Victor," with the figure that reflects his fox terrier ancestry, stands in the world-famous attitude, with his head cocked to one side and as natural as can be. The new toy, or ornament, as one may desire, is the idea of J. Henry Smythe, Jr., of New York City, who is known to the trade through the medium of other specialties he has marketed. It is believed that there will be a heavy demand for "Victor," both from talking machine owners and enthusiasts and from those seeking a new toy.

"Victor" is offered in four sizes, retailing at $1, $1.50, $2 and $2.50, and in addition to its value as a selling proposition makes an attractive and lasting store and window ornament. It should score a big success in the talking machine and toy trades.

VICTROLA FOR TUBERCULAR SCHOOL.

(Special to The Talking Machine World.)

HARRISBURG, PA., February 8.—The Susquehanna Open Air School for Tubercular Children has been given a Victrola by the educational committee of the Civic Club. Believing that the talking machine is an important factor in the musical education of school children, the committee hopes to place a machine eventually in every schoolroom in the city.

The Emerson Phonograph Co. has moved its general offices from 120 Broadway to 3 West Thirty-fifth street, New York.

The striking feature of this machine is a remarkably powerful single spring motor, guaranteed to play FIVE 10-inch records with a single winding. 10-inch turntable. All metal parts nickel plated and highly polished. Cabinets finished in Mahogany, Weathered Oak and Early English.
Dimensions—Width 16″; Depth 7″; Length 16″.

Five 10-inch Records

VICTOR FLOAT WINS FIRST PRIZE

In Parade of Camden Business Improvement Association—Gets Loving Cup.

The Business Improvement Association of Camden, N. J., held a mammoth carnival last month, which served to evidence the phenomenal industrial growth of this hustling and thriving city the past few years. The carnival lasted two days and included a number of interesting events, one

The Cup Won by the Victor Co.

of which was the holding of a parade about three miles long.

The Victor Talking Machine Co., whose immense factories are located at Camden, N. J., in accordance with its customary broad policies of industrial activity, took a keen interest in the carnival and contributed in an important measure to its signal success.

In the procession of floats in the parade the Victor Talking Machine Co. presented the very handsome float shown herewith. The float was bedecked with vines, leaves and flags, and, as will be seen by the accompanying illustration, was decidedly novel and original.

First prize was awarded the Victor float by the committee of judges, whose judgment was heartily applauded by the thousands of visitors. The prize consisted of a handsome silver loving cup, suitably engraved and in harmony with the beauty of the Victor float.

The Victor Float, Which Was Awarded First Prize of a Loving Cup.

NEW "PURE ADVERTISING" BILL.

Measure Introduced in House of Representatives by Congressman Edwards Would Prohibit Sending of Misleading or Fraudulent Advertising Through the Mails.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 5.—The bill recently introduced in the House of Representatives by Congressman Charles G. Edwards, of Georgia, and which is designed to prohibit the sending of misleading advertising through the mails, is receiving strong support from the believers in pure advertising in all sections of the country, and particularly in such States where the Printers' Ink statute or similar measures are in effect. It had been hoped by many to have the Printers' Ink statute as it now stands made into a federal measure, but it is believed that the Edwards bill will go far to meet the desired ends.

The bill in full provides: "That if any person, firm, corporation or association, in a newspaper, periodical, circular, form letter, or other publication, publish, distribute or circulate through the mails in the United States or any of its possessions, knowingly makes or disseminates, or causes to be made or disseminated, any statement or assertion concerning the quantity, quality, value, merit, use, the present or former price, the purpose or motive of a sale of any securities, merchandise, articles, commodity, or service, or concerning the method of cause of production or manufacture of such merchandise, articles, or commodity, or the possession of awards, prizes, or distinctions on such merchandise, articles, or commodity, or service, that enter into interstate commerce to mislead, shall be guilty of a misdemeanor, and upon conviction thereof be sentenced to pay a fine of not more than $1,000 or imprisoned for a period not exceeding one year, or both, as the court may direct."

The bill is to go into effect immediately following its passage.

PRAISE FROM A TONE EXPERT.

The Columbia Graphophone Co., New York, received recently a very interesting communication from F. F. Abercrombie, of the Abercrombie Shop, Poughkeepsie, N. Y., who has made a study of tone for more than twenty-five years, which reads:

"I had the pleasure the other day to listen to one of your records, A1859, 'Silent Night, Hallowed Night,' and 'Oh, Come, All Ye Faithful,' by the Columbia Mixed Quartet. If not a business secret, will you kindly let me know who the singers are? Having made a study of tone for the past twenty-five years, I want to say that those four voices are as fine as any I have ever listened to for blend and perfect pitch."

The forces of the Talking Machine Co. of Minneapolis (Archie Matheis, proprietor), Victor dealer, held their annual dinner last Tuesday. The firm was the host to its employes, who thoroughly enjoyed the dinner.

One of the meanest of God's creatures is he who dawdles along the primrose path of life and then begrudges his fellow the fruits of industry.

The new TRITON No. 2

The enormous popularity of the Triton No. 1 came not alone from its surprising Tone and Compactness—but also because of its simplicity and Ready Portability—as a Companion in the Camp—on the Boat—on Auto Trips—and in Dancing Visits to friends who were without music. But we have had so many requests for a more Pretentious Phonograph for permanent location in the home—that—we have produced the Triton No. 2.

RETAILS FOR $15

It is equipped with the Celebrated Triton Motor—and the Famous Triton Sound Producer—together with our new departure in arranging the Sound Chamber. Housed in a substantial Cabinet—finished in either oak or mahogany—not treated as so many cabinets are—to just a coating of coach varnish—but each cabinet is Hand Polished and Hand Rubbed—making a finish fit to associate with the best furnishings.

We have so arranged our Sound Chamber that the most Accurate Reproductions of the Artists' rendering are given to the record being played. The Pleasing Simplicity of the Cabinet is Accentuated by the Soft-Smooth effect of the finish. Together with this is accompanied the Strong Guarantee of all Triton Productions.

The Retail Price—$15.00—has been made to conform with the Popular Demand.

Sample machine sent for $7.50.

Guaranteed For 1 Year

We guarantee you against legal complications.

TRITON PHONOGRAPH CO. 41 Union Square NEW YORK

INCORPORATION PAPERS FILED.

Central Pathé Phonograph Co. Incorporated as Jobbers of Pathé Products.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 8.—Following the return of Harry K. O'Neill from New York, announcement was made that incorporation papers have been filed with the Secretary of State of Illinois for the incorporation of the Central Pathé Phonograph Co., capitalized at $20,000. The officers will be Arthur J. O'Neill, president; Harry K. O'Neill, vice-president and secretary; Arthur D. O'Neill, vice-president and treasurer. The company will fit up wholesale offices and within a short time will be actively engaged in the jobbing of the Pathé Pathephone in Chicago and the Middle West. Two retail stores will also be opened within the Loop district in prominent locations.

MONEY LOST BY INATTENTION.

"I won't buy anything more there," said a man of our acquaintance just the other day, in referring to a retail store. Of course, the inevitable "come-back" was, "Why?" "Because," he said, "they don't seem to care whether they sell me anything or not." There's nothing of the hysterical sister about this man. He's a man's man all through and hates palaver. I think he would smite anybody who attempted to "faire le gentil" with him, but he'd just had enough of that particular store. A little more inquiry and we learn the trouble. It was pure, unadulterated inattention and indifference on the part of the clerks. "But," said our friend, "the proprietor is always the one who is really to blame in such cases. He's 'firing' the old bunch they tell me, but I'll bet that store's got a black eye that they won't get over in years." This is a true story, gentlemen, and the moral's as plain as the nose on our editorial face—which is going some, says the Voice of the Victor. It's a new year. You'll be putting all sorts of ideas into commission in the next few weeks. Just see how high your clerks assay to the ton in courtesy and eagerness to serve.

Running along from year to year without knowing what stock you have on hand is no more businesslike than going along from day to day without knowing what money is in the cash drawer.

RECOGNIZE HIS CAPABILITIES.

Geo. A. Kelly Appointed Floor Manager of New York Talking Machine Co.—One of the Real Veterans of the Victor Business—Has Filled Many Posts with the House.

The New York Talking Machine Co., 119 West Fortieth street, New York, Victor distributer, announced this week the appointment of George A. Kelly as floor manager. Mr. Kelly's new duties in this important capacity will include supervision of the company's service to the dealers, expeditious

Geo. A. Kelly.

handling of the dealers' orders in the house, and prompt delivery to the shipping department. This will be only one of his duties, and the preponderance of his time will be more closely related to the sales end of the business. He will meet the many Victor dealers who visit the company's headquarters the year round, and will answer the thousands of questions intimately relative to the business.

Mr. Kelly is one of the real veterans of the Victor business, having entered the field in 1897. He has been associated with the New York Talking Machine Co. for sixteen years, and has been an important factor in its steady growth and progress.

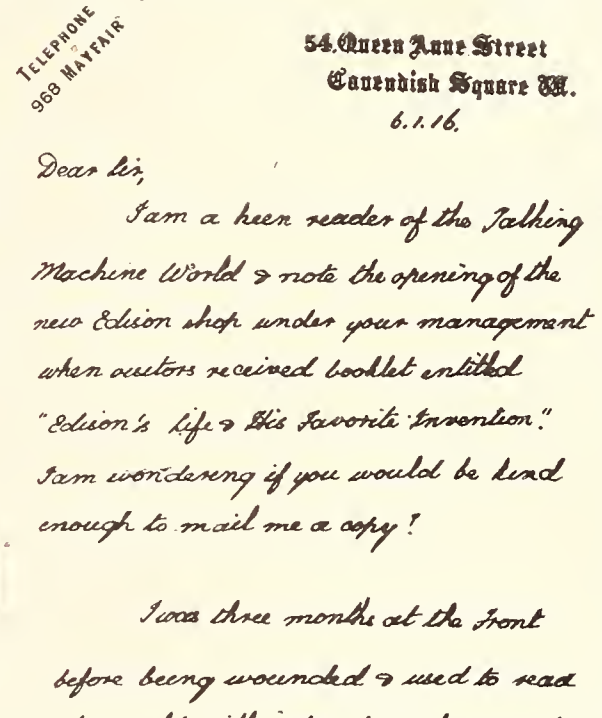
Mr. Kelly started work in the stock room, and in a single year worked his way through till he was placed in charge of the shipping department and stock room, a position which he has filled with signal skill and ability.

His promotion to the post of floor manager is not in the nature of a reward or honorarium for his many years of service, but is a suitable recognition of has capabilities and detailed knowledge of the Victor business. Mr. Kelly has served the New York Talking Machine Co. loyally and faithfully, and his sterling character is evidenced by the fact that every member of the company's executive, sales and office staffs is his friend and admirer. His staff in the shipping department esteem him as a comrade and adviser and a man of unusual executive acumen.

THE WORLD GOES TO THE TRENCHES.

English Soldier Gives Evidence of the Widespread Circulation of This Publication.

The Talking Machine World is read in the trenches! The accompanying illustration shows a letter, received from I. Parsons, Jr., of London, England, which was written to Arch H. Olds, of Indianapolis, Ind., manager of the Edison Shop there. A few months ago The World published an account of the opening of the Edison Shop, where a souvenir booklet was distributed to the visitors. The letter is a request for a copy of the booklet. Mr. Olds has sent a copy of the booklet



TELEPHONE 968 MAYFAIR

54 Queen Anne Street
Cavendish Square W.
6.1.16.

Dear Sir,

I am a keen reader of the Talking Machine World & note the opening of the new Edison shop under your management when visitors received booklet entitled "Edison's Life & His Favorite Invention." I am wondering if you would be kind enough to mail me a copy!

I was three months at the front before being wounded & used to read the World with interest in the trenches!

Apologising for troubling you,

I am,

Yours very truly,

I. Parsons. (junior.)

to Mr. Parsons, who is in London at present convalescing from a wound received "somewhere in France." When a man in the trenches thinks enough of a trade paper to read it, it shows that that trade paper is—well, draw your own conclusions.

At a banquet given for Thomas A. Edison by the Illuminating Engineering Society at the Biltmore, February 10, the inventor was made an honorary member of the society. The honor was a birthday gift that Mr. Edison much appreciated, as he was sixty-nine years old on that day.

MME. CISNEROS WITH PATHÉ

The Famous Operatic Artist to Record Exclusively for the Pathé Disc Library.

The Pathé Frères Phonograph Co., New York, announced this week the consummation of arrangements whereby Eleonora de Cisneros, the famous operatic mezzo-soprano, will record exclusively in the future for the Pathé disc library.

Mme. de Cisneros is well known to music lovers both here and abroad, having appeared with several of the leading opera companies, including the Metropolitan Opera Company, Philadelphia-Chicago Opera Company and others. She has also appeared at numerous concerts and recitals, where she has received hearty commendation from the critics. Her Pathé records will doubtless meet with a ready sale at the hands of Pathé dealers.

CLEVER VICTROLA ADVERTISING.

(Special to The Talking Machine World.)

WHITE PLAINS, N. Y., January 31.—A novel bit of advertising was used by Hunt's Music Store, of 52 Martine avenue, to attract attention to Victor record No. 64412, of "The Little Grey Home in the West," sung by Alma Gluck. The White Plains Chamber of Commerce recently held a banquet at Delmonico's, this city, where the feature of the after-dinner entertainment was a demonstration of the possibilities of the telephone. When San Francisco was called the manager of the Mount Vernon office of the New York Telephone Co. sang "Hello. Frisco," and the response received from the Coast was a Victrola rendition of the Alma Gluck record. Hunt's advertisement tells the story of the dinner, and says, "Like the telephone, the Victrola is universally famous."

Note the Notes

YSAYE'S tone is the master-test of the Columbia Grafonola. The sheer *music* of it almost defies reproduction—yet the Columbia Grafonola gives back to the ear a perfect image of Ysaye's tone-painting—his touch, his soul, his whole art reflected in a tone as truly, thrillingly his own as though the strings of a rare old Cremona were singing under his master-hand.

Gloriously rounded, rich, full and clear, it is Ysaye's tone to the very life that pours out between the opened shutters of the Columbia Grafonola. And it is unmistakably Ysaye himself who is playing—playing on another, greater instrument, "The One Incomparable Instrument of Music" that transforms *records* into *reality*. This quality of TONE is the one great reason why the Columbia is invariably the true musician's choice.

"Hearing is Believing." Base *your* choice on this master-test. There's a Columbia dealer near you who will gladly let Ysaye play for you on the Columbia Grafonola.

COLU

GRAFONOLA

Dealers are glad to respond to requests for the beautiful new Columbia book "The Columbia Grafonola"

rday Evening Post, carries a significant message that record uality of *truth* in tone and feeling that sets them apart from casket of music"—the touchstone to all the music of all the world.

TRUTH

Columbia Records TRADE MARK Note the Notes

DESTINN'S great and noble voice on Columbia Records is one of many beautiful examples of the ***perfect truth*** of Columbia reproduction.

A melody so pure and sweet and lovely soars in each liquid, crystal phrase—a feeling so deep and tender suffuses this matchlessly ***true*** interpretation—that the singer herself is transported in spirit to the senses of the listener. Only the absence of Destinn in person distinguishes record from living reality; to sight—***only***—not to the ***ear***—is Destinn absent.

A thrilling sense of ***presence*** and ***nearness*** is characteristic of Columbia Records by great operatic artists—the result of flawless precision in recording and reproduction.

Played on ***any*** instrument, Columbia Records evidence a quality of ***truth*** in tone and feeling that sets them apart from any others. Columbia Records are records of the ***soul*** of music, not merely of the ***sound*** of music—a clear, unmistakable ***difference*** apparent at once on comparison. And comparison is convincing.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg. 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—The past thirty days in local talking machine circles have been remarkable in no one thing, for the simple reason that every phase of the industry has enjoyed an unusually strong maintenance of holiday business conditions. Of course, the rush of the Christmas season is lacking, but there has been a steady, sustained call for all styles of machines and an equally well balanced demand for records.

Jobbers seem united in declaring that the record situation is unusually bright, and most of them ascribe it to the inclination of the dealers to carry better stocks and push records a little harder.

There has been the usual number of new machine manufacturers entering the field, and at the present rate it will not be long before there will be keen competition in certain grades of goods.

Plans for the spring and summer season are already being made, and dealers are evidently going to push the "take-a-machine-with-you" idea hard to the owners of summer homes this year.

Columbia Co. Activity.

W. C. Fuhri, district manager of the Columbia Graphophone Co., returned this week from an extended Southern trip which covered New Orleans, Mobile, Atlanta and Macon, Ga.; Dallas, Tex.; St. Louis and Kansas City. He found reports of remarkable business all along the line, record-breaking holiday sales and an excellent start on the new year. "Southern conditions have vastly improved the past year," said Mr. Fuhri, "and this fact is certainly reflected in our trade, which I can only refer to as booming with our dealers and branch houses in Dixie." Mr. Fuhri leaves tomorrow for headquarters in New York. In all probability James P. Bradt, sales manager of the Columbia Co., will accompany him on the return trip and visit the Chicago office and some of the Middle Western trade.

Manager C. F. Baer, of the local office, conveyed the news that January trade doubled that of a year ago and was the biggest January in the history of the branch. "The factory is turning out more goods than ever before, and we are shipping out our quota as quick as we get it," said Mr. Baer. "Of course, the situation is getting better, but the manner in which the pace continues is remarkable."

Among the new Columbia dealers recently established by the Chicago office are the following: Hartman Furniture Co., Milwaukee, which is opening a large department and placed an order of unusual magnitude; John Kelly Co., Marion, Ind.; Melzell & McGann, Baraboo, Wis.; L. B. Lovell, Libertyville, Ill.; Addison & Killean Household Furniture Co., Grand Haven, Mich.; Fullenwider Drug Co., Crawfordsville, Ind.; B. J. Hooper, Lake Villa, Ill.; White's Pharmacy No. 2, Clinton, Ind.; I. W. Furby, Onargo, Ill.; Joseph Schrein, 301 West Division street, Chicago.

Celebrate Edison's Birthday.

The Edison Shop held a special concert on Friday, February 10, in honor of the sixty-ninth birthday of Thomas Alva Edison. Included in the program were several of Mr. Edison's favorite selections, including "Ave Maria," Schubert; "I'll Take You Home Again, Kathleen," "Bonnie Sweet Bessie" and the overture from "William Tell."

C. E. Goodwin, of the Phonograph Co., left the latter part of this week for New York City, where he will attend the convention of Edison jobbers at the Knickerbocker Hotel.

One of the new Edison agencies appointed recently is the Haddorff Piano Co., of Rockford, Ill., which has opened a new and elaborately furnished store.

Fine 1916 Start for Lyon & Healy.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, has just returned with his small daughter from a ten days' stay at St. Augustine, Fla., where he went to recuperate from the strain of the big fall and holiday trade. "In looking over the records," said he, "it was naturally a matter of great satisfaction for me to know that the remarkable record for 1915, which was the largest in the history of the talking machine department of Lyon & Healy, had been followed by the largest January in the history of the house. That we have materially topped January of last year is notable, as that month was a big one generally, and was further augmented by the first of the shipments of the new Style XVI. Last month, good as it was, would have been much better had we been able to get more machines. Of course, the shortage has been relieved to some extent, for we have been able to make very fair deliveries on some types, and the situation promises steadily to improve. It was a very remarkable record month, orders showing that stocks were greatly depleted, and large stock orders were placed. Our travelers have been carefully feeling out the dealers, and universally they find that they are all decidedly optimistic. They are jubilant over the big fall and holiday business and have gone into the new year with plans for a more energetic campaign than ever, and generally feel that 1916 is going to be a banner year. Furthermore, they are showing their faith by their works. A large number of them are placing advance orders for five or six months ahead, and in several instances we had dealers specify for the delivery of so many machines a month up to November 1. We are all, of course, eager to get in the new Lyon & Healy Building, and from present indications will be in good operating shape there by April 15, where we will have a department which, in point of equipment and facilities for service, will be a decided eye-opener to the trade."

Mr. Wiswell leaves on Saturday for the East, where, after a visit at the Victor factory, he will proceed to New York to attend the executive committee meeting of the National Talking Machine Jobbers' Association. Afterwards, with Chairman A. A. Trostler, of Kansas City, and other members of the arrangement committee, he will run over to Atlantic City to complete plans for the next annual convention.

Bliss to Philadelphia.

E. P. Bliss, who for several years has been the popular representative of the talking machine department of Lyon & Healy in Illinois, Indiana and Michigan territory, has resigned and gone to Philadelphia, where he has accepted a position with the Louis Buehn Co., well-known Victor distributer of that city. Philadelphia is Mr. Bliss' home, and he took this step in order to be with his father, who is in ill health. He was given a farewell dinner by J. B. L. Ryde, at which his other associates in the department were present.

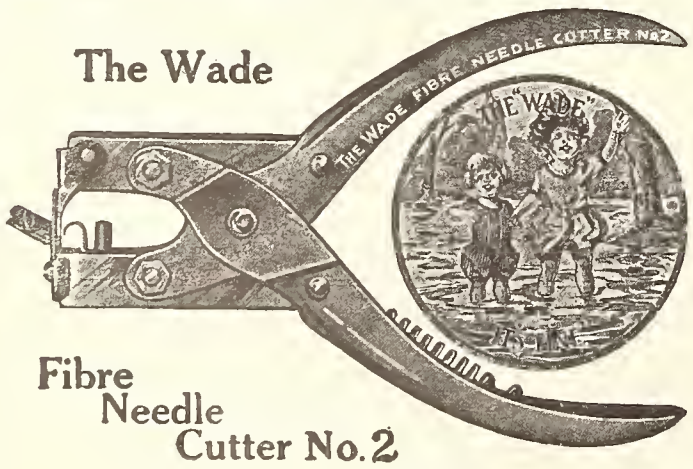
Gabel Factory Increased.

The factory of the Automatic Machine and Tool Co., at 210 North Ann street, Chicago, is being greatly enlarged. The company makes Gabel's Automatic Entertainer, a coin-operated talking machine, which has found a great share of popularity and is operated to great profit in high-grade restaurants, cafes, confectionery stores, etc. The machine operates twenty-four Columbia or Victor discs, and the needles are changed automatically for each selection. A selective device makes it possible for the "man with the nickel" to choose any record he desires.

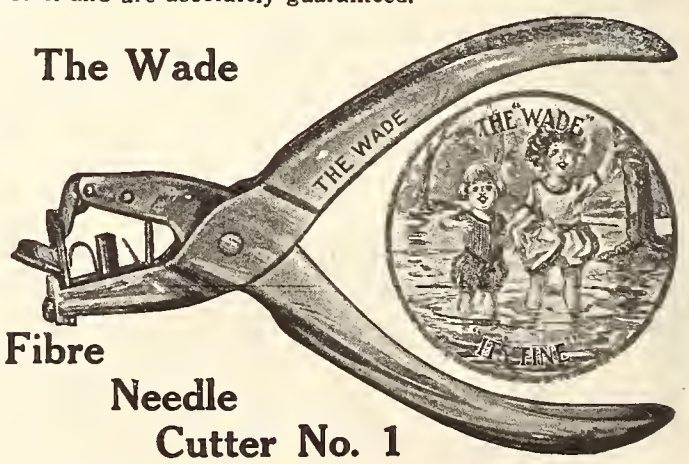
(*Continued on page 46.*)

THE WADE—THE PRACTICAL Fibre Needle Cutter—THE WADE

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.



The WADE has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points from one fibre needle. No. 2 has a double action, making it especially easy to operate. No. 1 is a very popular cutter which has given excellent service. You save more than double the price of the Wade in the repointing of the first 50c. worth of needles.



RETAIL PRICES—No. 1, $1.50; No. 2, $2.00

THE TALKING MACHINE COMPANY

Victor Distributors

12 No. Michigan Avenue - - - - - - - - CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 44).

Adam Schneider, Jr., Heads C. J. Schulze Co.

Adam Schneider, Jr., son of the secretary of Julius Bauer & Co., has acquired an interest in the C. J. Schulze Music Co., of Kenosha, which was incorporated recently for $5,000. It will be remembered that Mr. Schulze was recently killed by an interurban train near Kenosha. Mr. Schneider will be president and general manager of the reorganized concern. Mrs. Schulze will be vice-president and treasurer, and Miss Bush, secretary.

Complete "Orotund" Outfit.

The Combination Attachment Co., 624 South Michigan avenue, is now prepared to furnish the "Orotund" sound box with attachments for enabling it to play hill-and-dale disc records on the various types of machines. It is also prepared to furnish the "Orotund" sound box to manufacturers and jewel points in quantities. The company has received many tributes to the excellence of the reproduction of the "Orotund" and is very much pleased with the outlook for its specialty.

The Singer Phonograph Co.

The Singer Phonograph Co., of Chicago, has been incorporated, with a capital stock of $9,000, by L. L. Bartlett, L. R. Martin and D. C. Bartlett.

Mandel Brothers Not in Talkers.

Mandel Bros., the large department store of this city, have absolutely no interest in the talking machine manufacture or retail business, as was erroneously reported in trade circles last week. The report referred to a smaller concern of Benton Harber, known as I. & M. Mandel.

Cheney-Victor Case.

There will in all probability be no hearing of the Victor vs. Cheney case this month, but early in March Judge Carpenter will hear arguments in his court in the Federal Building, Chicago. The case is being followed with a great deal of interest by manufacturers and dealers throughout the country. Depositions have been taken in Philadelphia from Prof. Cross, of the Boston Polytechnic Institute, and R. M. Hunter, of Philadelphia, both of whom are Victor experts. John F. McElroy, patent expert for the Cheney Co., has also made a deposition and has been examined by the Victor counsel, Fenton & Blount, of Philadelphia. Sheridan, Wilkinson & Scott, of Chicago, represent the Cheney Co.

The action revolves around alleged infringements of patent No. 814,786 (tapering tone arm) and No. 814,848 (amplifying horn improvement).

Incorporated.

The Franklin Sales Co., of Chicago, Ill., has been incorporated, with $2,500 capital, to manufacture and deal in phonographs, talking machines and supplies. The incorporators are M. W. Greene, Max Livingston and Hirsch E. Soble.

Felt-Lined Cabinets Popular.

Everyone realized that the month preceding the last holidays was a very busy period, but perhaps no one better appreciated that fact than John F. Mortensen, president of the Salter Manufacturing Co. "It is a fact," said he, "that we are still making deliveries upon orders that were given us as far back as November. Our factory has been under constant pressure since way last fall, but despite that fact the output has not yet caught up with the demand. Previous to the holidays we endeavored to ship at least a part of the orders received and as the balance of these orders were left standing after the holidays we are now completing them. This volume of business is a very gratifying tribute to the Salter felt-lined cabinet. This idea was originated by us a number of years ago and its manifold advantages were immediately perceived by the buying public. Since that time others inspired by the success we have achieved have imitated us and I regret to say in a very inferior fashion. In many cases the lowest grade of felt is stretched over cardboard division pieces. The results have been that here and there the felt-lined cabinet proposition has suffered, but those who are acquainted with the Salter type of construction are sure of receiving genuine value."

Consolidated Company Incorporates.

The Consolidated Talking Machine Co., 160 North Fifth avenue, has been incorporated with a capital stock of $15,000. E. A. Fearn is president, Edward B. Fublin is secretary and F. A. Righeimer, treasurer. Mr. Fearn was formerly of the concern of Tresch, Fearn & Co., withdrawing about a year ago to take over the premium talking machine business of the late Robert Johns.

Pathé-Pathephone Shop Reorganization.

Following the annual meeting of the Pathé-Pathephone Shop, incorporated last month, a number of important changes were made. New officers were elected and the interests of Harry K. O'Neill and Arthur J. O'Neill were purchased, the latter withdrawing from the company to organize another concern, the details of which are told in another part of The World. The new officers of the Pathé-Pathephone Shop are W. J. Bristol, president; J. C Bristol, vice-president, and R. E. Rundell, secretary-treasurer and general manager. The capital stock was increased from $2,000 to $25,000, and plans made for the rapid expansion of the company's activities. The number of new Pathé dealers who have been instituted by the Pathé-Pathephone Shop has been growing rapidly every month, and Sales Manager Rundell and his associates are kept busy providing them with goods, the orders for which are steadily growing.

"We are very well satisfied with our new arrangements," said Mr. Rundell to The World, "and we are planning to go ahead on a new basis and with greatly increased facilities. We are very well satisfied with the volume of sales accomplished so far this year, and especially pleased with the success which has attended the efforts of our new dealers. The new Pathé records which play from the outside in are satisfactory in every way, and the increased monthly supplement is also a source of considerable pride on our part."

Talking Machine Co.'s Publicity Work.

The Talking Machine Co. has accomplished during the past month some really exceptional work in the matter of providing its dealers with adver-

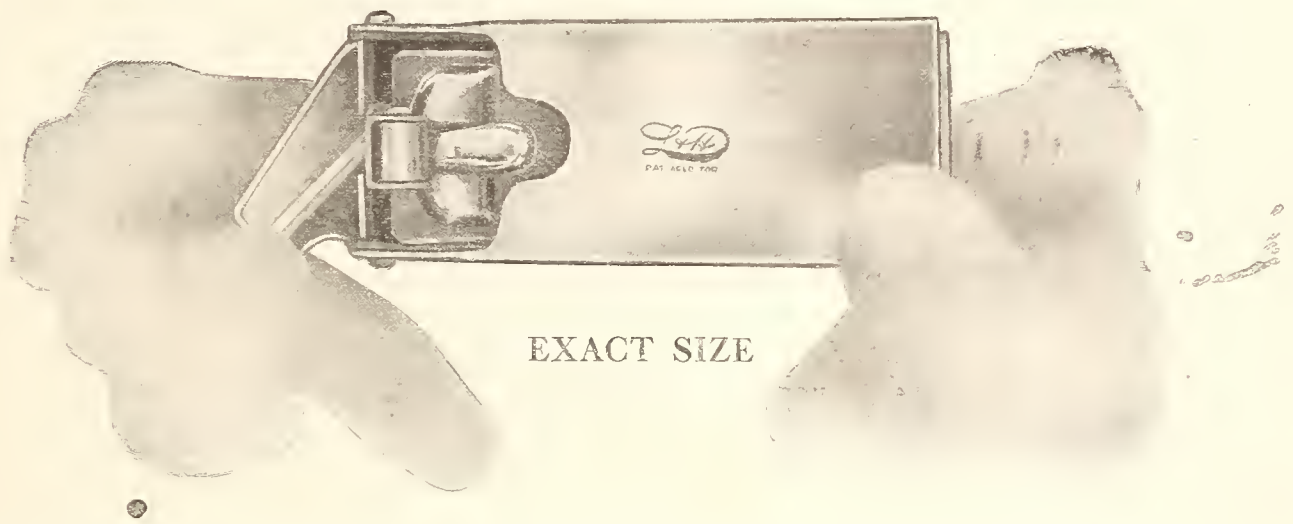
TWO NECESSARY TALKING MACHINE ACCESSORIES

The Lyon & Healy Fibre Needle Cutter and The Dustless Record Cleaner



EXACT SIZE

Over 300,000 Satisfied Users of the Lyon & Healy Fibre Needle Cutters!

Is not that enough to convince you that you ought not wait another minute before writing for our liberal terms of discount and a supply of the Lyon & Healy Fibre Needle Cutters?

The wonderful success of the Lyon & Healy Fibre Needle Cutter is due to the following facts:

The blades are made of the finest grade of tool steel, properly tempered; the upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle and also has a receptacle that receives all the waste. It is very simple and easy to operate and, with ordinary usage, should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre Needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

FRONT VIEW

We give our absolute guarantee with every cutter sold.

RETAIL PRICE $1.50

The everlasting Dustless Record Cleaner is an article that every Victrola owner should have.

It is made from carefully selected Wool Skin with the Wool cut short.

BACK VIEW

It polishes, cleans, prolongs the life of records and makes them look like new. Will positively not scratch the records.

Lyon & Healy

LIBERAL DISCOUNT TO THE TRADE

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 46).

tising literature that is especially effective in the matter of records.

One of the most notable examples of this is the letterhead which that company is providing for a number of its dealers, and which performs the double duty of advertising the individual Victor shop and the Victor talking machine generally. The letterhead consists of reproductions of fourteen of the most popular Victor operatic artists grouped around a Victor XVI, which is printed in its natural colors. Immediately beneath this array of talent comes the imprint of the dealer, and in the lower left hand corner of the sheet is the reproduction of the "Victor Dog" trade-mark.

A special "Chin-Chin" circular is also arranged for the dealer to distribute among his patrons. "Chin-Chin" is now playing at the Illinois Theatre in Chicago, and is spreading the popularity of "Chin-Chin" music throughout the Middle West as effectively as it did in New York when it ran for a year in one of New York City's theatres. Interesting photographs of Montgomery and Stone and other "Chin-Chin" artists are features of the folder.

A similar circular was used in conjunction with the popular records of the music of the "Follies of 1915."

Another branch of the Talking Machine Co.'s service which has received considerable approval from the dealers is the supply of feature cards for windows. These cards are printed on heavy cardboard stock, sometimes done in several colors, and form very attractive supplements for display window work.

D. A. Creed, of the Talking Machine Co., says there has been a phenomenal increase in record sales in the past thirty days.

"Dealers are realizing the business value of a policy that provides for carrying a large stock of records," said Mr. Creed. "They are all beginning to carry larger stocks of the standard sellers and the late 'hits.' Big stocks bring both prestige and bigger business, and the dealer is learning this. We cannot recommend this idea too highly, for all our experience has shown that it is the most advisable thing that a dealer can do to realize the maximum from his business."

R. J. Keith suffered from an annoying attack of tonsillitis the past week, but has now recovered.

S. B. Stilson Injured.

Chicago friends of S. B. Stilson, Grafonola dealer of Gibsonburg, O., will regret to hear of his injury on February 4, when he was struck by an auto while visiting in Cleveland. Mr. Stilson suffered a broken shoulder and his scalp and face were badly cut.

Kreisler Week.

The George P. Bent Co. has announced that the week of February 14 to 19 will be "Kreisler Week." On Sunday afternoon, February 13, Fritz Kreisler will be heard in what is billed as his last appearance at the Auditorium. Mr. Kreisler has furnished the George P. Bent Co. with a list of records which he considers the best reproductions of his art.

Passed Checks on Talker Department.

One of Chicago's versatile "con" men bought a few dollars' worth of records at the talking machine department of the W. W. Kimball Co. last week and ordered them delivered to a fictitious address after receiving the change from a worthless check for $15.

H. L. Flentye Makes Change.

Harry L. Flentye, Jr., has resigned from the Talking Machine Co., Chicago, with which house he has been for the past four years as city and floor salesman. He probably will continue to be identified with the talking machine industry, and is now negotiating with an Eastern manufacturer for Western representation of a new line of goods.

During Mr. Flentye's connection with the Talking Machine Co. he made numerous friends in the Western trade, who will wish him every success in his new undertaking.

Cable Branch Takes on Victor.

The Cable Piano Co., of Danville, Ill., has bought out the Victor license and stock of a dealer at that place and is installing a large talking machine section.

New Store on Milwaukee Avenue.

Edward B. Sajewski has opened a new talking machine and small goods store at 1143 Milwaukee avenue, where he will handle two or three lines of talking machines and records, as well as stringed instruments and other small goods.

Chicago Hinged Cover Co. Enlarges Space.

J. L. Abbott, general manager of the Chicago Hinged Cover Support and Balance Co., announces that his company has made arrangements to take enlarged space at 143 West Austin avenue, Chicago. The demand which has been created following the introduction of the Chicago hinged cover support and balance has proved the necessity of such a device as this, and C. F. Winegar, general traveling representative of that company, is being kept busy in the East demonstrating its merits to a large number of Eastern manufacturers.

Empire Sales Force.

John H. Steinmetz, president of the Empire Talking Machine Co., 429 South Wabash avenue, announces that as a result of the excellent success it has had on the Empire talking machine, it is now organizing a complete sales force of competent men with a view to working the territory intensively. Thomas Griffith will cover the larger cities east of Chicago as far as Rochester, N. Y.

CHARLES BRYAN

25 W. LAKE STREET : CHICAGO

EXPERT REPAIRING FOR THE TRADE A SPECIALTY

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 48).

Fred E. Hoop has for his territory southern Michigan and Indiana, while Harry A. Moore will visit the trade in Illinois and Ohio. Walter B. Long will spread the Empire gospel in Washington, Philadelphia, Baltimore and adjoining territory. So far the Empire has been made in two models, a $75 and a $100 machine, but in response to the general demand the company is now getting out a new line of cabinet machines embracing six attractive models, ranging from $50 to $125 in retail price. These machines will be of extremely practical as well as artistic design and are made with a view of harmonizing with the current styles of living room furniture.

Shipping Needle Cutters by Parcel Post.

Wade & Wade have called the attention of the jobbing trade recently to the fact that if jobbers receive rush orders for the Wade fibre needle cutters they can have them shipped direct from the factory by parcel post, as it only costs a small sum to ship from one to fifty cutters. Supplementing this service is the newly equipped Wade factory, the output of which has been recently increased so as to make it possible for the firm to fill all orders the same day received. S. O. Wade plans to call on the Eastern jobbers the latter part of February.

Big House Takes on Sonora.

The Carlin Music Co., the big East Market street house, of Indianapolis, has just made arrangements to take on the Sonora line. The deal was arranged by William F. Martin.

William E. Everett, who has been in charge of the agency arrangements in Illinois, was on a short trip to New York last week.

Change of Name.

The National Mercantile and Retailers' Association, 8 South Dearborn street, which recently entered the talking machine manufacturing business, has changed the name of the concern to the Playerphone Talking Machine Co. D. W. McKenzie is president.

Starr Phonographs on Display.

C. E. Johnston, manager of the Chicago branch of the Starr Piano Co., at 1228 East Sixty-third street, has placed on display advanced showings of the new Starr phonographs. Some of the new disc records which the Indiana concern is turning out are also to be heard.

Describes Canadian Conditions.

Peculiar conditions exist in the retail talking machine and piano trade of Canada, according to G. L. Stanwood, of Winnipeg, who was in Chicago last week. Mr. Stanwood, who is head of Stanwood's, Ltd., retail dealer in musical instruments, as well as other lines, which specializes largely on talking machines, handling the Columbia, Sonora and Edison discs, made a remarkable statement that right at the present time not only in spite, but because of the European war and Canada's large contribution of men to it, musical instruments are being sold to many people who have not been able to buy heretofore and who were not considered good credit risks if they wished to purchase.

Personals and Visitors.

Among the recent visitors to the local trade were: R. D. Gaston, of the Gaston Music House, Hastings, Neb.; L. H. Walter, Edison dealer, Hillsboro, Tex.; R. T. Outhwaite, Bloomville, O.; Mr. Prange, of Sheboygan, Wis.; A. C. Moore, of the Pellctier Co., Sioux City, Ia.; H. T. Berg, La Crosse, Wis.; Will E. Bannard, of Springfield, Ill.; G. A. White, of Fairbury, and E. S. Goodell, of Beaumont, Tex.

F. S. Spofford, Grafonola dealer in the Republic Building, Chicago, returned recently from a month's vacation in Florida.

Elmer Gay, of the Pettis Dry Goods Co., and H. G. Power, of the Taylor Carpet Co., were two Indianapolis talking machine men in the city.

Opening New Store.

J. H. Buechler, formerly with the Schulz Piano Co., 1540 West Madison street, is to open a new piano and talking machine store at 1546 Larrabee street, to be known as the Grand Piano Co. Mr. Buechler has not yet decided upon the lines that his concern will carry.

Chicago

NEW MANUFACTURERS IN THE FIELD.

Announcement That Passow & Sons Are Now Making Talking Machines Excites Interest —Prominent Manufacturers in Office Furniture Field—General Plans Set Forth.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—The announcement that Passow & Sons, large manufacturers of store and office furniture and billiard tables, of this city, were to make talking machines naturally created a great deal of interest in the trade on account of the size and importance of the house and the great productive facilities furnished at their extensive factories at Twenty-first street and Racine avenue.

In a chat with Louis A. Passow, of the firm, that gentleman explained the circumstances surrounding their entrance into the talking machine field. "Over a year ago," said Mr. Passow, "we began being solicited by various parties contemplating making talking machines and who asked that we make cabinets for them. In every instance the inquiry came from parties who said that the reason they approached us was their desire to make good machines and were attracted by our reputation for superior cabinet work, our expertness in

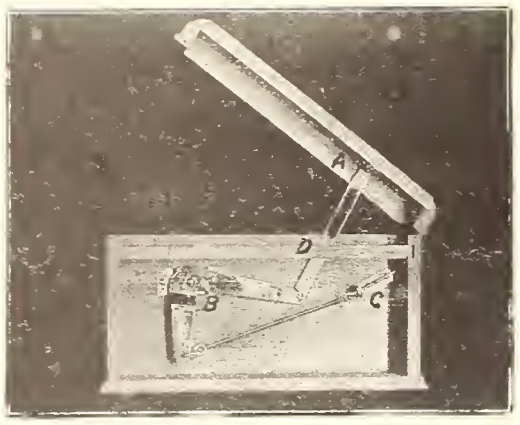
THE LAST WORD IN TALKING MACHINE CONSTRUCTION

The CHICAGO HINGED COVER SUPPORT and BALANCE



Sectional View Showing How It Operates

You Do Not Hesitate To Improve the Tone.
You Do Not Hesitate To Improve the Cabinet.
You Should Not Hesitate To Improve the Cover Support.

We have accomplished something that has not been attained before in high-grade cabinet making, namely the elimination of the weight of the cover when raising or lowering and also balancing same at any point desired. It cannot drop or get out of order. Make us prove this statement by sending for a model or giving you a demonstration on your own cabinet.

CHICAGO HINGED COVER SUPPORT & BALANCE CO. **144 S. Wabash Avenue, CHICAGO**

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 49).

the selection of veneers and the remarkable finish of work of ours which they had seen. Now all this set us to thinking that if our reputation as manufacturers of high-grade cabinet work since 1871 would prove an asset to these people it was something of which we could ourselves take advantage. Then we went carefully into the study of the whole proposition, enlisted the aid of experienced men versed in accoustics and of practical problems relative to the production of high-grade talking machines and the Passow phonograph is the result. Talking machine men who have inspected our models have all congratulated us on the mechanical construction, the tone quality and the equipment of the Passow phonograph, as well as on the artistic character of the cabinets. It is needless to say that in a plant of the great productive capacity of ours we have studied the making of legitimate economies, and because of our great purchasing capacity and long experience can produce a high-grade product at less cost than concerns not similarly equipped. We have devoted large space in our plant to the manufacture of talking machines, and from present indications this will soon have to be greatly increased. Fortunately, we have every facility for adding to our output as the occasion demands."

The general offices of the firm are at their warerooms, which occupy the large building at 832-842 Madison street, and here attractive quarters have been arranged for the display and sale of Passow phonographs. The house intends making a complete line of machines, but has already for the market three attractive models listing at $75, $100 and $150. Some idea of the beauty of the cabinets can be obtained from the illustration in their page advertisement elsewhere in this issue. The two higher priced machines, it will be noted, have the otherwise plain surface of the front panels relieved by delicate pearl inlays which add greatly to the artistic appearance of the case. All models are equipped for playing any lateral cut or hill-and-dale disc records, have an efficient tone regulator, twelve-inch turntables, etc., etc. All are furnished in selected mahogany or quarter sawed oak in the various finishes.

Every time you turn your back on Opportunity the lady says to herself, "I'll never speak to him again as long as I live!"

BRINGS OUT NEW SOUND-BOX.

H. T. Schiff, President of Vitanola Talking Machine Co., a Tireless Worker in Inventive Field — Company Secures Much Larger Quarters on South Wabash Avenue.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—H. T. Schiff is by nature a mechanic. As president of the Vitanola Talking Machine Co. and as one of the chief directors of that rapidly growing institution his duties often carry him for long periods into the strictly commercial side of the business. Whenever he returns from a long trip, however, or at any time when he has a few spare moments he immediately retires to his laboratory, locks himself in and submerges himself in the study of some intricate problem of acoustics.

H. T. Schiff in His Laboratory.

Just recently Mr. Schiff has devoted a great deal of time to this work, and as a result has brought out a new sound box which is exceptionally meritorious. It operates on a floating tone arm and by simply turning it on the arm can be converted from use with lateral cut records to position for playing with the jeweled point and hill-and-dale records. A number of special styles of the Vitanola line will be equipped with this new sound box.

The rapid growth in Vitanola sales has made necessary increased space, and preparations are now being made for the removal from the Shops Building at 17 North Wabash avenue to the third story of the building at 210-12 South Wabash avenue, where large and commodious quarters have been secured. The new space will aid greatly in facilitating deliveries to Vitanola dealers, as well as providing large quarters for their reception when in the city. The new move will also provide much larger quarters for the general offices. This last fact will be especially appreciated by S. S. Schiff, secretary and treasurer of the company, who supervises the auditing and correspondence work. An increase in the company's capitalization has been authorized.

225 Lexington Avenue, New York City

ANNUAL REUNION OF BUFFALO TALKING MACHINE MEN.

Second Prosperity Dinner of Talking Machine Dealers' Association of Buffalo a Great Success—Addresses by R. L. Loud, H. C. Brown, of the Victor Advertising Department, and Others—Officers Elected with W. F. Goold as President—Large Attendance.

(Special to The Talking Machine World.)

BUFFALO, N. Y., February 7.—"To the Victor belongs the spoils," quoth Toastmaster Robert L. Loud last night at the second annual "Prosperity" dinner of the Talking Machine Dealers' Association of Buffalo, when he introduced H. C. Brown, of the advertising department of the Victor Talking Machine Co., of Camden, N. J., to more than 150 proprietors, managers and salesmen of Buffalo and western New York talking machine emporiums.

The Columbia and Edison companies sent letters of regret at not being able to attend the dinner.

Mr. Brown has a message for wholesalers and retailers alike, spilling gems in every sentence. He emphasized the statements with six reels of moving pictures showing activities at the great Victor factories. For almost two hours the talking machine men were carried into Victorland, and not one of the hustlers left the Dutch grill until the 1916 banquet became history with the singing of "Auld Lang Syne."

"We could have shipped millions of Victrolas in December if we had had them, and we feel that it is such gentlemen as you who have been instrumental in building up such a vast business," was one of the opening compliments of Mr. Brown, who was received with applause. "We have no fear for the talking machine industry—the Victor business of the future," said Mr. Brown during the progress of his talk. "The possibilities are unlimited. It wasn't so long ago that old-timers like Mr. Andrews and Mr. Loud were wondering when the business was going to go back, but they don't feel that way now."

Mr. Brown gave a little talk to the young salesmen present when he said: "If it isn't a better game to you than playing billiards or riding around in an automobile, something is wrong. If you are in it solely for the money, something is vitally wrong. If that is your situation, it isn't your game. Get out of it, then. A man can earn what he wants to earn in this game if he goes out to earn it. We have no fears for the future. The possibilities are unlimited."

Mr. Brown declared that the record end of the business was not worked as hard as it might be, and he also pointed out that no machines go out of the Victor factory that are not sold through dealers. He stated that if the president of the Victor Co. wanted a machine he would have to go out into the open market to buy it. "We believe that the dealers have been instrumental in building up this great business, and will not take one cent from them that belongs to them."

Mr. Brown asserted that Victor machines are becoming potent factors in the country's educational system, and that daily they are being installed in schools. He said that the introduction of so many Victrolas into the schools is paving the way for the sale of high-grade instruments to Buffalo's coming generation, the boys and girls of to-day and the men and women of to-morrow.

The speaker in breezy style explained the Victor aim of having its advertising "dominate space." He explained in detail the reason for the catchy "zig-zag" advertising, and declared that it is always banged right home to the reader when glimpsed in a newspaper. He said that newspaper advertising such as the Victor does is really worth while, and eventually referred to the recent full-page Victor campaign.

Mr. Brown deviated long enough to give a little lecture upon the latest Victor product, the tungstone stylus. He declared it has become so popular that the factory cannot manufacture them fast enough.

The dinner marked the second year of life of the growing association, and it was enjoyable because of the great number of new members present who were taken into the fold. Another cheerful tone was lent by the "prosperity" atmosphere that was diffused by both local and out-of-town dealers, who declared business was far ahead of last year.

W. J. Bruehl, manager of the Neal, Clark & Neal Co. talking machine department, furnished the diners with parodies on popular hits which concerned the trade.

Toastmaster Loud hurled many shots down into the assembly and created many laughs. During the evening he deplored the "excessive allowances" some dealers are giving on exchange propositions for old machines, and urged greater co-operation between dealers and the "elimination of cut-throat tactics."

Some pertinent pointers on salesmanship were given the salesmen and others by J. Edward Burton, of the Sheldon School, as well as by Buffalo dealers.

A. E. Germony, newly appointed manager of the William Hengerer Co.'s Victrola department, got an ovation when he was introduced by Mr. Loud, after the toastmaster had stated that Mr. Speare had left the Hengerer Co. to become affiliated with Lord & Taylor in New York.

The menu card was an artistic affair, carrying the Victor, Edison and Columbia trade-marks on the front cover. W. J. Bruehl was chairman of the banquet committee, assisted by A. Biesinger and T. A. Goold.

The 1916 officers of the Talking Machine Dealers' Association are: W. F. Goold, president; W. L. Sprague, vice-president; W. J. Bruehl, secretary, and H. G. Towne, treasurer.

Many of these local and out-of-town hustlers voiced informal remarks at the dinner:

B. E. Neal, Dr. Woodworth, L. A. Bennett, W. J. Bruehl, of Neal, Clark & Neal; C. N. Andrews, E. M. Cogan, E. S. Emens, William Herbert, Fred C. Kraft, Charles G. Wright, H. D. Scrortes, R. G. Richardson, of W. D. Andrews; J. Ottomar Goetz, Thomas J. Farmer, of the J. N. Adam Co.; Charles H. Heinke, Denton, Cottier & Daniels; Jack C. Ross, Harold J. Childs, Robert B. Adams, Alfred F. Macoun, H. E. Speare, A. E. Germony, Manager J. A. Endres, of the William Hengerer Co.; J. D. Cooper, W. W. Wagner, Walbridge & Co.; Frances P. Schunke, of Henry Schunke & Co.; John Bieda, of Bieda Bros.; Frank Ohrenfried, 1645 Broadway; Carl Kaepple, of the Kaepple Piano Co.; Robert L. Loud, H. G. Towne, E. O. Hock, E. W. Heintz, G. W. Cattley, K. C. Schermerhorn, of Robert L. Loud; Albert W. J. Schuler, of Schuler Bros.; Albert Schwegler, L. J. Schwegler, of Schwegler Bros.; T. Amesbury Goold, of Goold Bros.; John F. Keegan, Herman A. and Charles Reinhardt, 1190 Lovejoy street; Charles J. Hereth, 1190 Genesee street; E. R. Burley, A. E. Biesinger, Burley & Biesinger; J. A. Owenhouse, C. Kurtzmann & Co.; Charles Bellanca, Henry Stein, W. L. Sprague, Columbia Graphophone Co.; W. F. Goold, Harry W. K. Miller, of Kobler & Miller; William J. MacFarlane, Canandaigua, N. Y.; Jesse Landaure, Medina, N. Y.; H. C. Webster, Silver Creek, N. Y.; T. F. Young, Lackawanna, N. Y.; C. W. Parker, Dansville, N. Y.; Edward H. Scholter, North East, Pa.; J. S. Downey, Rochester, N. Y.

PREPARE FOR ENORMOUS OUTPUT.

Jos. Wolff, secretary Sonora Phonograph Corp., 57 Reade street, New York, recently returned from a visit to the cabinet factories operated by the company, and the new schedule for 1916 calls for the plants to work nights. This is due to the increasing demand for Sonora machines of all types, 1916 looking to the company to be of a volume that will greatly exceed 1915.

Sterchi Bros., of Bristol, Tenn., have purchased the stock and good will of the Simmonds Talking Machine Co. and will engage in the talking machine business in addition to the furniture line they already carry. The officers of the Simmonds Co., W. L. F. Rosenblatt and O. Simmonds, will enter the talking machine business in Atlanta, Ga.

The Practicability of the Pathé Sapphire Ball
has been conclusively proven.

The old-fashioned steel needles are extremely inconvenient because of the necessity of constant changing.

Many attempts have been made to improve these evils, but all have proven unsuccessful.

The Pathé Sapphire Ball is the solution of this problem. But it is not only an *improvement*, it is a new and better method of reproducing sound.

Instead of the sharp-pointed needle, you have the Pathé Genuine, Permanent, Highly-Polished Sapphire Ball.

Instead of "digging" into and ripping the Sound Grooves, the Pathé Sapphire Ball travels over the Pathé sound grooves in an up-and-down wave-like motion.

The Pathé Sapphire Ball is the ideal method of sound reproduction, because it eliminates the metallic-like tone quality and in no way damages Pathé Discs.

The Effective Pathé Tone Control
gives absolute command of the tone volume.

Some enjoy the soft, soothing tone quality, others like the full, rich volume—the Pathé Tone Control permits tone regulation to suit every individual taste.

The person who desires to phrase a selection to his own liking, may sit beside a Pathephone and by manipulating the Tone Control device, get many pleasing effects—from a soft pianissimo to a crashing fortissimo.

The simplicity of the Pathé Tone Control insures satisfactory performance.

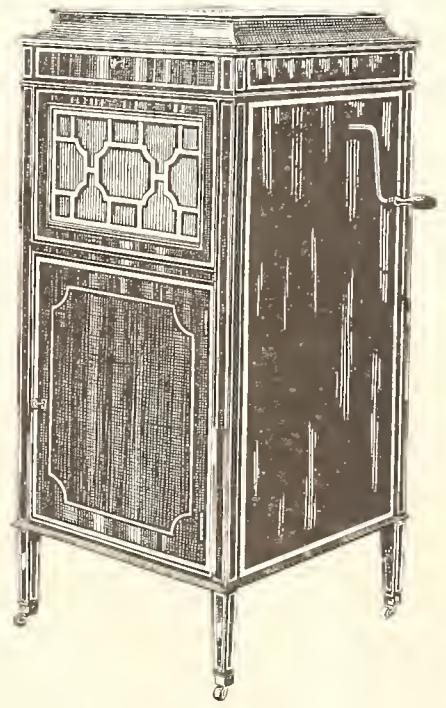
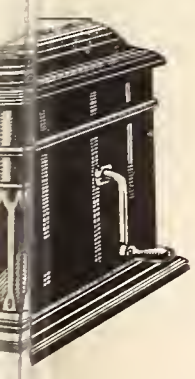
Retail from 65c. to $2.50





The Pathé Disc Repertory Is Unique

Unique, because it offers Americans for the first time the opportunity of hearing and enjoying Europe's great artists, recorded exclusively on the Pathé Discs.

Pathé Frères' recording laboratories are located in practically every musical centre in the world—right at the pulse of all musical activities of both the Eastern and Western Hemispheres.

The Pathé Disc Repertory is superior to all others because of its wide variety of selections, and it is constantly being enlarged so as to be of greater service and value to the music loving public.

All Pathé Discs are double faced and do not deteriorate with constant use. Pathé Discs are impervious to the action of the Pathé Sapphire Ball.

"A Pathé Agency Is a Valuable Franchise"

Dealers are rapidly taking advantage of our agency proposition because they realize the constant growing popularity of the Pathé goods.

Our 1916 National Advertising is going to increase the already great demand, putting dollars and cents into the dealers' pockets.

Write us for complete detailed information—possibly your territory is one in which we are not represented.

But do it immediately—not a day passes that we do not grant a Pathé Agency in some section of the country.

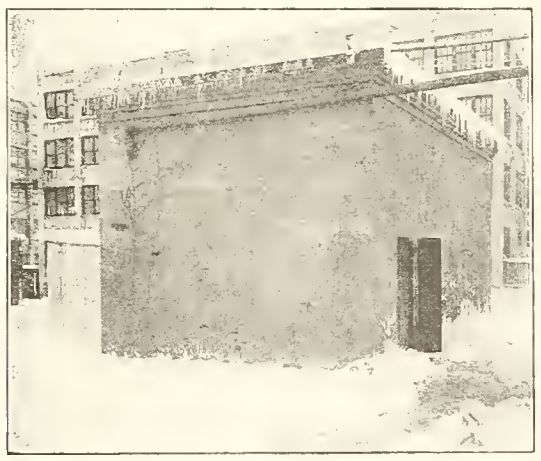
NEW FIREPROOF VAULTS

Recently Erected at the Edison Factory for the Purpose of Housing Disc and Amberol Master Record Molds—Up-to-Date in Every Detail.

As a result of the lessons learned at the time of the great fire of 1914, two unique-looking structures have been erected at the works of Thomas A. Edison, Inc., Orange, N. J., to house disc and Amberol master record molds. While no original records were lost in the fire, it was found prudent to have all master records separately housed.

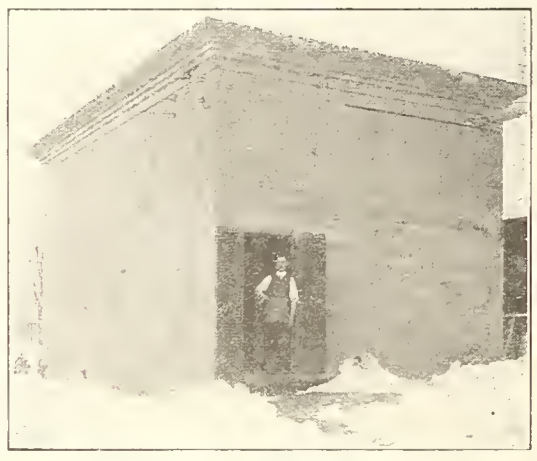


The Edison Diamond Disc Vault.

The odd-looking buildings shown in the illustrations have no windows; they have no chimneys; they have no flag poles; they have no ornamentation. Like two solid huge rocks, they are silent, dark and cold. And yet within they are two of the brightest-lighted, cleanest, best ventilated, evenly warmed buildings in the whole Edison group.

In each building there is just one man—the custodian. His work is to see that the interior is kept as nearly as possible, summer and winter, at a temperature of sixty degrees; that not a particle of dust is allowed to collect; that the ventilation is attended to by means of an electric fan exhaust; but above all, he is to handle most carefully the master records and to see that they are stored away systematically; that a transcript is kept of their number, date of entry, and such other items as are desirable.

To this custodian is entrusted the careful keeping of the original master molds and to him are returned the sub-master molds when the process of manufacture has released them. It takes a man of intelligence, system and reliability to care for these precious molds. Evidently the two men chosen for this work are well fitted for their tasks. The storage capacity of the disc record vault is 40,000 master molds; the capacity of the Blue Amberol vault is 60,000 molds. Here are enshrined the immortal voices of Edison artists; here are kept the imperishable records of instrumental skill on violin, on harp, on piano—on all musical instruments.



The Edison Blue Amberol Vault.

SUCCESS

HONORS FOR THE VICTOR CO.

The Victor Talking Machine Co. features in the January issue of its house organ, the "Voice of the Victor," a two-page spread presenting the awards which it received for its products at the Panama-Pacific Exposition, San Francisco, Cal. The article accompanying the photograph states that the officials of the exposition awarded twenty-two grand prizes to the Victor—fourteen awards from the Liberal Arts division and eight awards from the Educational division.

The awards from the Liberal Arts division are given for original invention and research, Victor records, school records, Victor talking machines, exclusive world renowned talent for record making, school appliances, design and manufacture of cabinets, tone quality, Victor needles, Victrolas, system of changeable needles, tapering tone arm and "goose neck" sound box tube for conducting sound, musical publications and modifying doors for regulating the volume of sound. The awards from the Educationl division were given for American music history, correlation, music and English literature, musical research, musical history, modern languages, dramatics and tone.

The Reynolds Music Co., of Pensacola, Fla., is creating great interest in the Victrola by holding a Story Hour every Wednesday afternoon, at which the children are entertained by the rendition of especially selected records.

Charles Burney and Guy Hedrick, of the Lines Music Co., Springfield, Mo., have been demonstrating the Victrola in Aurora, Mo., with splendid success.

Claude Wheeler, of Columbia, Mo., has sold his jewelry business and is devoting his time to the sales end of the Vitanola Co.'s product.

KANSAS CITY A LIVE TALKING MACHINE TRADE CENTER.

All Dealers Report Splendid Business Outlook—Always "On the Job" in Promotion and Sales-Making Work that is Bringing Results—Many Advertising Novelties Introduced—Wunderlich's Effective Window Display—The News of the Month in Detail.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., February 8.—January, as was to be expected, was not so chock full of talking machine business as the holiday season had been, and the dealers were able to get stock up again in preparation for the resumption of the steady large current of trade. The stocks had indeed been seriously depleted, and a breathing spell was absolutely necessary. It didn't last long, however, for although January was marked by the most severe winter weather of several years, nearly all the dealers report good business for the season.

E. S. Hall, proprietor of the Hall Music Co., 817 Walnut street, is again preparing to consider pianos in trade for Victrolas, having refused such trades during December and January. He had no machines to sell or trade until late in the month. One of his problems is the question of taking players in exchange for talking machines, several prospects for such deals being available. Mr. Hall has recently added a piano department to his establishment, so that he, through modest exploiting of pianos, will be in better shape to move the pianos and players he will receive in exchange for Victrolas. But he is firm in his policy of getting full value for talkers in trade, including some cash.

The talking machine department of the George B. Peck Dry Goods Co. has adopted a striking emblem for use on Victor records. It consists of an arrow-head shaped sticker about three-quarters of an inch long, slightly gilt, on which is embossed the words "Peck's, Kansas City, Mo." It is good publicity.

The branch at Kansas City of the Starr Piano Co., W. E. Rupe, manager, has been made the distributing branch for Middle Western territory for Starr phonographs and records. In preparation for taking on these large additional duties, Mr. Rupe is remodeling the establishment at Elizabeth street and Grand avenue, and has taken practically the entire second floor of the building, doubling the capacity.

Milton G. Dayton has been appointed traveler for the Middle West district, working from the Kansas City office, for the Starr phonograph. Another addition to Mr. Rupe's force in Kansas City is Miss Edith Guyer, who will have duties in the office.

The Edison Shop at Kansas City has been doing since the first of the year an amount of advertising and promotion work rather unusual for the dull month of January—and it is profitable. There were, of course, many people who became interested in talking machines during the holidays who did not buy, and the shop is leaving no stone unturned to find them and get them to buy Edisons. Concerts are given almost daily.

M. M. Blackman, manager of the Edison house at Kansas City, is taking a trip over the territory to get personally acquainted with the dealers, especially the many new ones who have been appointed during the past year. In January fifteen new agencies were established.

Crosby Bros., Topeka, Kan., one of the finest department stores in Kansas, has taken on the Edison phonograph. The department is placed on the mezzanine floor, near the postal department, and opposite and a few feet from the rest room. This popular rest room will therefore be practically an adjunct of the recital room, the visitors getting the benefit of the music. Manager Micksell, of the new department, has been with Crosby's for several years. He took a special course in Edisonology at Kansas City with Mr. Blackman before taking charge. The department was established January 15, though the formal opening has not yet been held.

Wunderlich's, at Kansas City, has been using recently one of the most effective window displays observed for some time. The central feature is an arch supported by pillars; across the arch are the words, "Wunderlich's, the House of Records;" suspended from the center is a disc in which are the words, "The Music Center." On one pillar is a circle containing, "Always a complete line of Victor records;" on the other, "Records sent on approval—ask about the plan." Beneath the arch is one of the original Victor machines, with the dog. Victrolas and records, with a few placards mentioning timely selections, and a Grafonola complete the window.

"I thought the scramble for machines would let up after the holidays," said a Victrola dealer in Kansas City. "But it is just as much of a battle as ever to get them. I ought to have received fifty machines, but got only twelve in January, and am again having to put people off who ask for certain models."

A. A. Trostler, manager of the Victrola department at the Schmelzer Arms Co., secretary of the National Association of Talking Machine Jobbers, leaves Kansas City soon for the meeting of the

executive committee of the association, which will be held in New York City February 15 and 16. Mr. Trostler will also be in Atlantic City, where he is going to complete arrangements for the entertainment of the jobbers at their convention to be held soon. Mr. Trostler is chairman of the entertainment committee, and will probably be a busy man about convention time.

W. C. Fuhri, district manager of the Columbia people, was a visitor at the Kansas City office this week. From here he went to Dallas, Tex.

E. A. McMurty, manager of the Columbia Graphophone Co., leaves the middle of the month for a visit to New York City and the factory of the Columbia Co.

Warren H. Haile is the new manager of the retail trade of the Schmelzer Arms Co.'s Victrola department. He was formerly with George H. Wheelock & Co., South Bend, Ind.

M. L. Bardwell, manager of the Household Fair machine department, is very much pleased with the business his firm has done since the opening last September.

Miss Jean Kendrick, in charge of the Grafonola department for the Henley-Waite Music Co., is ill and has been unable to be at her regular place of business for the past three weeks.

Harry B. Bibb, manager of the talking machine department for the Jones Store Co., reports that business there is so good that before much more work is done more space will have to be given to his department. Mr. Bibb has introduced an advertising novelty in the mailing system of the catalog of new records each month. Instead of placing his catalog of new records in an envelope and mailing them out, he has a piece of heavy paper cut so that when folded it gives the appearance of a circular. On one of these sides is the advertisement of special records the Jones store wishes to advertise; on the other side, the name and address of the person to whom the catalog is going is written. This paper is folded around the catalog and mailed out, the address showing on the outer side. This piece of paper is fastened with a clip at the top and is as secure as an envelope. Mr. Bibb's idea is to increase the effectiveness of the advertising as well as to save the price of envelopes. The various record advertisements are changed each month, as is the catalog.

The Victrola department of the G. W. B. Peck Dry Goods Co. entertained recently forty-six boys and girls, pupils in music of Miss Martin, of the seventh grade of the Jefferson school. Miss Martin has been conducting a chorus class in the school, made up of pupils from various classes; the school has the best orchestra in Kansas City of its kind, it is said, and many of the children show marked musical talent. Miss Martin has been giving the chorus class "The Bohemian Girl" and "Il Trovator," and has gone into more detail with the operas in her seventh grade. The concert with Victrola records was arranged with the co-operation of Manager John F. Ditzell.

The Pathé Meets All Competition

The completeness of the Pathé line enables the dealer to successfully meet the sales arguments of all competing lines.

There is a Pathephone and Pathé disc to suit every patron in your territory. The Pathé disc library is remarkable for its enormous repertoire and excellent quality.

Prosperity is knocking at your door. The Pathé line will give you your share of the promised 1916 profits. We are at your service for further details.

Pathé Distributors

REPORT OF VICTOR ASSOCIATION.

Co-operative Beneficial Association of Victor Employes Proves a Big Success, Due Largely to the Generosity of the Company.

The high degree to which a benevolent association may be developed is indicated in the recent report of the Victor Co-operative Beneficial Association, made up of employes of the Victor Talking Machine Co., Camden, N. J., for the year 1915.

The report indicates that during the year the membership in the association had increased from 5,556 to 6,900 and that the receipts from entrance fees and dues were $18,807.25, in view of which fact, as per agreement, the Victor Co. contributed a like amount to the fund. The disbursements in sick benefits were $23,061.86, in death benefits to twenty-three members $3,450, and in refunds to members $2,046.99, leaving the substantial balance at the end of the year of $26,320.32. The administration expenses, amounting to $3,943.14, were met entirely by the Victor Co., thus leaving the funds of the association intact for benefits. Beginning on January 1, 1916, the death benefits will be increased from $150 to $250.

The officers of the association for the new year are: President, E. F. Haines; vice-president, W. H. Nafey; treasurer, G. W. Jaggers; secretary, E. K. MacEwan, and visiting secretary, F. A. Sparks.

The excellent record of the association is due largely to the generosity of the Victor Co. in not only contributing one dollar to the funds for every dollar contributed by a member, but also in meeting all the administration expenses, a substantial item, which during 1915 exceeded by nearly $500 the total amount paid out in death benefits. The feeling that he will be taken care of when ill and that his family will receive a sum that will at least meet funeral expenses when he dies goes far to make a workman contented, and therefore energetic, which makes the contribution to the fund by the Victor Co. money well invested.

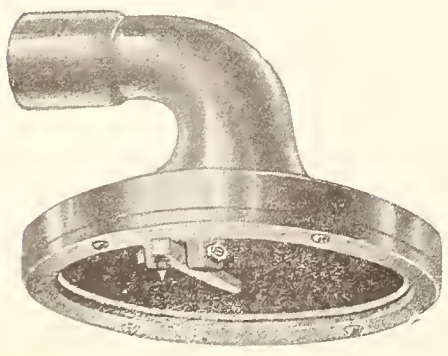
AN INTERESTING LIST OF RECORDS

For the Month of February Issued by Pathé Frères Phonograph Co.

The Pathé Frères Phonograph Co., New York, has issued its February list of new records in supplement form, and the neat and attractive appearance of the supplement has won the commendation of the Pathé dealers. These supplements will be issued monthly to accompany the new record lists, and they will be printed in very large quantities to meet the needs of the Pathé representatives. The name, number and price of each record is accompanied by an adequate description, which adds materially to the supplement's value.

D. Tauber, who recently became associated with the Triton Phonograph Co., leaves in a few days for Chicago, where he will exhibit the three new models of Triton phonographs.

THE VICSONIA REPRODUCES EDISON DISC RECORDS PERFECTLY



The **VICSONIA** fits the Victrola, Grafonola, Crescent and Sonora phonographs, **with special type** for the Aeolian Vocalion.

The **VICSONIA** with its diamond point and wonderful diaphragm will reproduce every note, sound wave and minute variation as recorded on the marvelous Edison Disc records with all fullness, sweetness and accuracy of tone. Does not wear the records.

The **VICSONIA** is a revelation in reproducers, and the largest talking machine men in the country who have heard and tested it are enthusiastic over its merits.

Instantly and easily attached. A child can do it. **No alterations necessary.**

Dealers will find the **VICSONIA** a business builder. **General agents wanted.**

REASONS FOR SONORA PROGRESS

Set Forth Illuminatingly by President George E. Brightson—Advance Based Distinctly on Values—Quality, Not Cheapness, the Motto.

There has been so much discussion regarding the wonderful strides made by the Sonora Phonograph Corporation, 57 Reade street, New York, of which Geo. E. Brightson is president, that a little "inside" information might be of value to the trade. But, as President Brightson says: "There is no secret of Sonora success. We didn't see how cheap we could create a phonograph for obvious reasons. We worked on the plan of getting the best in every kind of material. Where we could spend some money for an improvement on any one of our styles we spent it. Anyone can take value away from a product, but it requires judgment to increase your manufacturing costs in order that the particular style or styles should come up to what, in our opinion, is the proper standard.

"For example, the designs of Sonora cabinets are distinctive. We have neither imitated, copied nor made the slightest attempt to trade on the property of others. Sonora cabinet designs are original. Their cost of manufacture, including every detail, such as the selection of the woods, workmanship and excellent finish, is perhaps excessive. The feat of Sonora motors playing fifteen records is unique, and every feature and part of Sonora construction is thoroughly built and tested at every step. Such devices as automatic stops that really work, motor meters, spring controls, tone modifiers, etc., have been added without increasing the cost to the purchaser.

"Even in the selection of our representatives we have 'selected' rather than taken the many we could have secured. A quality product cannot be handled well except by a quality organization, and the fact that a house handles the Sonora is considered evidence of its prestige and responsibility. I might go on indefinitely enumerating special features of Sonora manufacturing and distributing, but it is hardly necessary. I will say, however, that the Sonora represents my ideal of a phonograph."

Mr. Brightson did not say, however, that it was through his hard work that most of the Sonora achievements were accomplished, nor did he say that his many years of experience as right hand man to John Claflin, the dry goods king, earned for Mr. Brightson the reputation of being one of the few expert merchandising men of the country.

RECORDS FOR ST. PATRICK'S DAY.

Special Supplement of Records Suitable for Ireland's National Holiday Prepared by the Pathé Frères Phonograph Co.

The Pathé Frères Phonograph Co., New York, sent out this week the following letter of importance to Pathé jobbers and dealers:

"Owing to the problem of changing our record product from records playing from the inside out to our present type of record playing from the outside in, the number and the quantity of back orders that we have on hand, we have decided not to get out a regular March supplement.

"It is our intention to concentrate our facilities on pressing the records that are needed in our regular catalog, and in this way allow us to advance our issue of April records to an earlier date.

"We are, however, getting out a special supplement of the following selections which are suitable for St. Patrick's Day:

30073 A—The Distant Shore. Baritone Solo..Alan Turner
B—The Irish Emigrant. Baritone Solo..Alan Turner
30094 A—St. Patrick's March.....Imperial Infantry Band
B—O Canada March.....Imperial Infantry Band
30106 A—Selection 1. "Irish Melodies."..... H. M. Scots Guards
B—Selection 2. "Irish Melodies"..... H. M. Scots Guards
30296 A—The Wearing of the Green.....John Meyers
B—The Bowery Grenadiers.....John Meyers
20000 A—The Dear Little Shamrock. Tenor Solo..... J. C. Doyle
B—The Green Isle of Erin. Contralto Solo..... Carrie Herwin
10063 A—Eileen Allanah. Tenor Solo.....John Bardsley
B—I'm Coming Back to Erin and To You.... Arthur George

"We will have a special supplement in keeping with these popular Irish melodies."

UDELL

There are MORE profits in GOOD cabinets than in machines or records. Udell cabinets not only give profits but are a credit to the other furniture in your customers' homes.

Don't waste time on cheap cabinets any more than you would trifle with cheap machines.

Get the Udell proposition right away; remember we've been making GOOD cabinets from the time that cylinder records were a novelty. We know the field and we KNOW that UDELL cabinets are the BEST for you to sell.

Post a postal to-day.

The Udell Works

1205 West 28th Street
Indianapolis, Ind.

No. 403 (Vertical Interior)
For New Victrola IX. only.

Height 34½ in. Width 19¼ in. Depth 22¾ in. Holds 224 Victor records.
Mahogany.
Quartered Oak.
Average weight crated, 85 pounds.
(If horizontal shelving is desired, order No. 1403.)
(When felt interior is desired, ask for No. 403F.)

IMPORTANT NOTICE

Cabinet 403 is arranged with a rim, which is hinged at the back. This back piece drops down and enables you to slide the new style Victrola IX in. It works very easily and makes a splendid outfit. Nothing to get out of order, and you can put the machine in almost as quick as you could set it on a cabinet without rim.

Cabinets

HEARS HER OWN RECORDS.

Marguerite Farrell Visits the Warerooms of A. C. Wilson in Youngstown, O., and Enjoys Hearing the Columbia Records of Her Voice.

(Special to The Talking Machine World.)

YOUNGSTOWN, O., February 8.—When Marguerite Farrell, who is a headliner in vaudeville circles, visited this city recently she spent quite some time in the warerooms of A. C. Wilson, who handles the complete line of graphophones and records manufactured by the Columbia Graphophone Co., New York.

Miss Farrell Listening to Her Own Voice.

Miss Farrell was particularly interested in Columbia product at the time of her visit, as she only recently recorded several selections for the Columbia library, which have proven very successful. Miss Farrell is well known to theatregoers throughout the country, and her voice has been found particularly adaptable for recording purposes.

Mr. Wilson, upon the occasion of Miss Farrell's visit to Youngstown, took advantage of the opportunity to call attention to her records, and interested a number of his patrons in the various popular songs she has recorded.

MEET WITH SERIOUS INJURIES.

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, was advised this week that the members of the De Koven Opera Company, which recently recorded a large number of records for the Pathé library, had met with serious injuries in a train wreck near Cherokee, Ala. The train in which the company was riding was derailed, more than thirty being injured, including H. L. Waterous, Sol Solomon and Luigi De Francisco. The latter was the musical director at the recordings in the Pathé laboratory.

Action of British Government Against "Luxury Imports" Now a Strong Probability—Embargo Would Affect Music Trade—Serious Shortage of Talking Machine Supplies—A Story from Gallipoli—New Record Lists Full of Interest—Death of H. E. Standish—More Rigid Control of Foreign Firms in Sight—The Rollophone Announced—Invicta Co. Announces New "Citizen Record"—Pathephones for Belgian Soldiers—Increase in "His Master's Voice Prices"—General News

(Special to The Talking Machine World.)

LONDON, E. C., February 3.—In recent reports I have more than once hinted at the possibility of an official move in the direction of legislation to curtail if not entirely prohibit the import of articles which do not directly help the nation in its present gigantic struggle. While we are buying abroad so much in the shape of necessaries, it is felt that the gold payments thus involved should not be increased by the cost of imported luxury goods. It tends to deplete our reserve of gold and also raise the rate of exchange against us. That is one important aspect of the matter. But perhaps the most important lies in the fact that these imports utilize transport space which can be more profitably requisitioned for the carriage of foodstuff and other articles directly useful in the prosecution of the war. The question has latterly become very serious owing to the growing shortage of ships. England possesses a larger mercantile fleet that any three or four nations together, but with hundreds of thousands of troops to transport, with all the equipment necessary for their maintenance in the field, in addition to admiralty requirements, it can readily be understood that the loss on the mercantile side demands very close attention. Large as are resources in ships, they must be husbanded and utilized to the best possible advantage in the national interests. Until this is directed by some carefully organized plan, the enormous increase in freight rates will not tend to diminish. Recognizing the importance of this matter, the British Government has under consideration ways and means to best achieve the exclusion of luxury imports, thus releasing many ships and much valuable space for the transport of necessary products. A decision will be arrived at within the near future, and I am inclined to think it will not be altogether favorable to America, Switzerland, Spain and similarly placed neutral countries.

Embargo Would Affect Music Trade.

When the governmental plan for the restriction of luxury imports is in force it might be found to reflect unfavorably upon the talking machine and music industry generally. Gramophone parts—motors, tone arms, sound boxes, etc.—are largely imported from Switzerland. A considerably smaller portion comes from America, which, however, sends us pretty large consignments of piano actions and keys, metal parts, organs and small musical goods. The recently imposed tariff has militated against increased exports from your side, but there is evidence that we are still spending substantial money in America for articles that, in effect, retard rather than assist in the prosecution of the war.

For the time of year, talking machine trade here is fairly good. As to the future one does not care to hazard a guess, for the labor and material shortage is not improving. There is plenty of work, and more, for all the labor obtainable, the output of records, for instance, being only curtailed by the lack of sufficient men to operate the presses.

Shortage of Machine Parts.

On the machine side matters are even worse. Insufficient supplies of parts from abroad, which the few home manufacturers cannot make good, is responsible for much heartburning among traders who have many orders on their books which they are not in a position to execute. The trade is doing its best under very difficult circumstances, and dealers abroad should not get impatient if some little delay occurs in the execution of their orders.

Great Regret Over Colonel Bill's Death.

The British trade has learned, with great regret, of the sudden death of my old chief, Col. Edward Lyman Bill, who counted many friends on this side. We were quite unprepared for such tragic news, and it may be said that it came as a shock to all who knew him. The spoken words of sympathy, earnest and sincere, emphasize the affectionate regard in which Col. Bill was held. Not a few members of the trade recall their all too infrequent meetings with him, speak of his ever-courteous bearing and consideration in all matters, and lay tribute to his valuable work in talking machine trade journalism. Col. Bill's clean yet forceful writings and published works appealed considerably to British gramophone men, who ever expressed their pleasure in the provision and policy of the deceased gentleman's publications. The kindly personality of Col. Bill won the hearts of us all, and we shall keep in warm remembrance and high regard an unselfish life of devotion to the common weal. *Requiescat in pace.*

THE WINNER RECORD CO., Ltd.

Willowbrook Grove, Camberwell, London, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 59).

Peninsula throws at least one ray of sunshine upon the dark background which envelops other spheres of action. The Turk, it is pleasing to learn, is a clean fighter. The Australians, who for many months wrestled and fought with him under varying circumstances, testify that the Turk is a good fellow and a straight antagonist. They even went so far as to leave in the abandoned trenches written messages of the kindliest farewell. But the crowning testimony of good feeling, says a newspaper correspondent, is the gramophone, which was put in a conspicuous place in the trench on Walker's Ridge, with its disc on and the needle all ready to play "The Turkish Patrol"!

More Rigid Control for Foreign Firms.

Under the cloak of registration, a substantial number of companies whose capital is mainly or wholly of enemy origin have been allowed to continue trading operations in England and her colonies. A goodly number are subject to the direction of Government inspectors, but there is a growing demand that such firms should be more rigidly controlled or altogether suppressed. With this object in view a bill is now before the British Parliament. That it will pass is a foregone conclusion. It will affect the talking machine trade; but more anon.

"His Master's Voice" Panto Program.

Although the art brochure entitled "Supremacy: The Story of 'His Master's Voice,'" which I recently reviewed in these columns, concisely covered the whole field in relation to the superlative merits of the "H. M. V." gramophones and records, the point is again emphasized this month by the supremacy of the company's new record issues covering every phase of music. Titles and artists are in full measure quite exclusive, so that the purchaser of "H. M. V." records naturally feels a just pride in being in a position to entertain friends with an exclusively select program. The present pantomime season offers exceptional scope to record manufacturers, and in the issue of a topical list of successes the Gramophone Co. is well to the fore. George Graves, described as the greatest of all gaggers, in company with Miss Billie Carleton, lays under contribution some of the "Watch Your Step" hits; Murray Johnson, "When the Moon Shines Bright on Charlie Chaplin," "Private Michael Cassidy," "Blue Eyes," and several equally good numbers. With the latter song is coupled that especially popular number, "A Little Bit of Heaven," sung by Walter Jeffries. The best from all the pantomimes are on "His Master's Voice" records, and the company's dealers are naturally busy.

Owing to certain rumors in the trade, the Sterno Manufacturing Co., maker of the famous "Compactophone" instrument, desires to state that it is in no way connected with W. H. Reynolds (1915), Ltd., or the late Utility Trading Co.

Pathephones for Belgian Soldiers.

A paragraph in the December Belgian Review says: "Our sovereign (the Queen of Belgium) never forgets our soldiers; their least wishes are the object of her consideration. That is the reason why sixty Pathephones were distributed in the trenches, each instrument being accompanied with fifty records. This should dispel any peevish humor and tend to liven the long, waiting hours." Many letters of thanks have reached Pathé Frères, through whose generosity the instruments and records were available.

Death of H. E. Standish.

At the comparatively early age of fifty-three the death of H. E. Standish, managing director of the firm of Joseph Wallis & Son, Ltd., has caused general regret in music trade circles, where the deceased gentleman was well known for his conspicuous business ability and good fellowship. He had been connected with the firm for some thirty years, and his loss will be keenly felt.

George Wallis, I learn, has now been appointed as managing director of the company.

New Zonophone Co. Records.

Another bumper list of live selling numbers is announced this month by the British Zonophone Co., Ltd. The front cover of the supplement is adorned with a pictorial representation of that well-known composer-vocalist, Nat D. Ayer, whose records have earned great praise from all sections of the public. This month he contributes two records bearing "Watch Your Step" hits—four of the best. "I Like to Dance with the Girls" and "The Harem Song" on No. 1,566, and "That Charlie Chaplin Walk" and "Oh, Man You'd Hang Around" on No. 1,567. Selection Parts I and II of the new revue, "Shell Out" is brilliantly contributed by the Black Diamond Band, while the Peerless Orchestra is represented by "The Only Girl" overture. With the latter No. 1,557 is coupled "When You're Away." "The Only Girl," sung by Harold Wilde, with orchestra. Ernest Pike, Foster Richardson, Florrie Ford, Sidney Coltham and others of like popularity are all represented in this list. An exceptionally pleasing record is No. 1,569, "Auld Robin Gray," and on the reverse "Robin Adair and Mary of Argyle," played by the Misses Elsie and Dorothy Southgate, whose violin and Mustel organ combination seems really to have caught the public fancy mightily. Altogether a splendid list.

INVICTA RECORD CO., Ltd., 1 New Inn Yard, London, E. C., England

FROM OUR LONDON HEADQUARTERS—(Continued from page 60).

Invicta Co. Issues New Record.

For the introduction of a new record the present does not seem at first sight the most propitious, and it must, therefore, be due to special circumstances that the Invicta Record Co., Ltd., deems it advisable to embark upon a fresh field of commercial endeavor. At present the company confines its activity to "The Guardsman" record, which retails here for fifteen pence. This is certainly excellent value for the money; but, having experienced a strong call for a specially selected list of records, the Invicta people have determined to issue a somewhat superior program on a ten-inch, double-disc at eighteen pence. "The Citizen," as it is christened, will make an early appearance, bearing carefully chosen titles by artists of repute. I am informed that, from the viewpoint of recording, "The Citizen" will represent a standard that may be compared more than favorably with similar-priced discs.

Meanwhile new lists of "The Guardsman" record make an appearance monthly and will so continue. The February supplement contains ten records (twenty titles), comprising some good, up-to-date stuff, mainly vocal. The duets by Messrs. Fanning and Fortune, and by Barrett and Sullivan, call for special commendation. These discs are in good demand, appealing as they do to a very wide public. Dealers on the lookout for a good selling line should ask the Invicta Record Co. for particulars.

Some Winner Advertising.

A smart new advertising idea for the new year is planned by the Winner Record Co., Ltd. It is in the form of sets of playing cards which are to be sold through its dealers at a merely nominal price. The cards are of excellent quality and bear on the back an illustration in colors of the famous Winner trade-mark, similar in design to the label affixed on the center of the records. No better advertisement could surely be devised.

Much on the same lines the Winner people also issue postcards, supplies of which dealers may obtain by applying to the company direct.

New Winner Co. Recordings.

Notwithstanding the heavy demands upon their factory resources, the Winner Record Co. continues to maintain a very high standard of new recordings each month. The January program is a typical example. It contains quite a number of pantomime favorites, as well as a goodly sprinkling of standard music by reputable artists. A glance thereat will reveal to the reader that this company offers a wide choice of good stuff based on known selling costs. Publicity matter, lists, trading terms, etc., may be obtained from the Winner Record Co., Ltd., Willowbrook Grove, Camberwell, London, S.E.

A Strong Advertising Campaign.

The Gramophone Co.'s advertising program embraces a large expenditure covering representation in the chief London and provincial press organs. A good start for 1916 was made, to mention only one instance, by the acquisition early in January of the full front page of London's largest circulated newspaper, the Daily Mail. It was mainly devoted to a selection of the best records by such talent as Tetrazzini, Caruso, Melba, Paderewski, Marie Hall, Landon Ronald (New Symphony Orchestra), Coldstream Guards, Lauder, Robey and others of like eminence. The point—that of "His Master's Voice" absolute supremacy—in association with such a list was too obvious for argument. This evidence of the company's determination to make a stronger effort than ever for the development of trade must be very welcome to its dealers. Notwithstanding that present sales conditions are very pleasing, progress and more progress is the keynote of the "H. M. V." policy.

Later in the month another Daily Mail front page was taken by the company to advertise Mme. Kirkby Lunn's repertoire of "H. M. V." records in connection with the inauguration of a special Kirkby Lunn week. This sales scheme was further extensively advertised and dealers were supported, as usual, with some splendid publicity matter—window bills, etc. The published list of records embraced some special new recordings of this celebrated operatic contralto, whose name in association with "His Master's Voice" records is sufficient guarantee for the unqualified success of the sales week in question.

New "His Master's Voice" Prices.

As previously announced in these columns, "His Master's Voice" instruments have been increased in price as from January 1, and a new instrument catalog, illustrating the different cabinets, hornless, and exterior horn models, with the new prices, was issued to the trade early in last month.

Rollophone, a New Machine.

Bearing the above typically descriptive name, a new hornless model will shortly make it's appearance from the house of W. H. Reynolds (1915), Ltd. In design and general utility the machine embodies some interesting new features. An ingenious automatic arrangement enables the machine to open or close under one action. At the base there is a drawer with holding capacity for about twenty disc records and a separate compartment for needles. Upon opening this drawer the top or lid of the instrument composed of a roll shutter automatically slides back, disclosing the turn-table and arm ready for use. There is a sliding panel at the mouth of the sound chamber, which allows one, in part, to regulate the volume. With its domed top and general good finish, the Rollophone presents a very artistic and substantial appearance. It is put up in oak and will retail at about seventy shillings. Messrs. Reynolds have given us both a unique and powerful instrument in a very compact form, and I have little doubt the reward of their enterprise will be early reaped by a sheaf of good orders. An illustration of the Rollophone is given in the company's advertisement elsewhere in this issue.

Robey Records for Columbia.

The Columbia Co. plays a strong comedy card this month in its announcement of exclusive records by the Prime Minister of Mirth, George Robey. The Columbia presents George Robey this month in a twelve-inch, double-sided record of his current hits—"Where's the Butler" and "What Was There Was Good"—a feast of song and patter in the comedian's richest vein.

A man needs his imagination to help him along.

The Columbia recordings of song hits are real hits—hits as songs and hits as sales.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

STOCK-AND-BOOTH FLOOR PLAN

Evolved by the Pennsylvania Talking Machine Co. Has Been Highly Praised.

The Pennsylvania Talking Machine Co., distributers for the Columbia Graphophone Co., Philadelphia, Pa., recently evolved a very clever stock-and-booth floor plan, which is shown in the accompanying illustration.

Clever Stock-and-Booth Floor Plan.

The plan in brief, as described in the Columbia Record, is as follows: "Stock shelves along wall. Demonstrating booths parallel to shelves. Narrow aisle between. One stock clerk in aisle. Doors connecting booths with stock clerk, soundproof with sliding glass panel. Customer asks through panel for records. Clerk passes in records and closes panels. One clerk can do the job. More served with better service. Salesmen free for sales work. Space saved. Convenience infinitely increased. Neat, attractive, convenient and inexpensive."

IT PAYS TO ADVERTISE.

A golf enthusiast while traveling in England some time ago had a craving one fine Sunday to play, and hunting up a golf club made arrangements with the caddy master for the use of a set of clubs and the privilege to the links.

The caddy master, after carefully reading the signed card with player's name and address, remarked in an inquiring manner: "And where is this place, Philadelphia?" The player answered facetiously: "Philadelphia? That's a little town across the river from Camden, N. J."

The caddy master's face lighted up as though a 500-candlepower light had suddenly been turned on him, and said: "Just across the river from where the Victor talking machines are made. Aye, aye, sir!" Moral—it pays to advertise.

RATES ON PIANOS AND TALKERS.

A proposal has been filed with the Western Classification Committee by E. A. Leveille, freight traffic manager of the National Piano Manufacturers' Association, as follows:

"Pianos and talking machines, mixed carloads, minimum weight 12,000 pounds, second class.

"At present the pianos are charged for at actual weight, subject to a minimum of 10,000 pounds, and the talking machines are charged actual weight at their first class L. C. L. rate.

"Under the proposed item, the rate on the talking machines would be reduced to second class, when shipped with pianos, and their weight included in the minimum of 12,000 pounds, eliminating the minimum on pianos.

"This mixture is not at present permitted in any of the classifications."

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., February 10.—The three oldest sons of George C. Vonnegut presented Public School No. 27, of which they are graduates, with an expensive Victrola, their father presenting a supply of records and needles. This is a precedent which doubtless will be widely copied, as the talking machine is being used more extensively all the time in the institutions of learning here. Several high schools are using talking machines in their foreign language courses.

Competition in its place is all right, and the proper weapon with which to build up business; but retailers should be mindful of the fact that competition means more than the mere cutting of prices. The sort of competition which pays in the long run is of that nature which brings better service, better goods, better value, better management, and earns the good will and continued patronage of the customer without losing profits.

FOLLOW-UP MAILING CARDS

Issued by Pathé Frères Phonograph Co. Are Not Only Artistic but Cleverly Conceived and Should be Prolific in Business Results.

The Pathé Frères Phonograph Co., New York, has just advised its dealers of the completion of a series of follow-up cut-out mailing cards which embody numerous distinctive features, and which constitute an admirable follow-up system for Pathé representatives. H. N. McMenimen, managing director of the Pathé Co., personally spent considerable time in the preparation of this series, and the cards represent the successful consummation of his ideas.

The series consist of six cards, each one of which is separate and distinct from the other. They are entitled "Changing the needle," "Your favorite concert singer," "The Pathé to the heart," "The charm of music," "For perfect dancing" and "The life of the home." The outside of the card presents the famous Pathé trade-mark, the rooster on a disc, with the words "The Pathephone is not an ordinary talking machine. It's a musical instrument." This wording is on the front of all the cards.

When a customer or prospect receives the card it is held in place by two clips, and all that is visible is an artistic colored cut-out picture pertinent to the thought expressed—the dancing card shows a couple dancing, the charm of music presents the "Pied Piper," with children in his wake, etc.

The beauty and distinctiveness of the series lies in the fact that the outside colored illustration gives no clue to the actual contents of the inside. When the clips are removed there is presented an entirely different meaning than the outside of the card would lead one to believe. Instead of the children following the "Pied Piper," the inside of the cut-out portrays the children dancing to the music of a Pathephone. The "Pathé to the heart," instead of being a pretty love scene, as depicted on the outside of the cut-out, reveals itself as a young man in evening clothes listening to a Pathephone. The remainder of the series are equally as ingenious in their conception, and the center pages give an effective discussion of the sales talk presented by the pictures. The series constitutes one of the finest dealer aids which has made its appearance in the trade for quite some time.

Ray Gavin, an employe of the American Graphophone Co., of Bridgeport, admired the various parts used in the construction of the graphophone so much that he took several of the parts home and used them as ornaments. He is now being tried for theft.

JAMES FRAZEE, 38 Cortlandt Street, NEW YORK

OFF FOR THE PACIFIC COAST.

James P. Bradt, Manager of the Columbia Co., and Geo. P. Metzger, Advertising Counsel, Perfect Plans—Also Visit Canadian Points.

James P. Bradt, sales manager of the Columbia Graphophone Co., New York, is now making a long journey through the West and western Canada, en route to the trade on the Pacific Coast. He will be accompanied most of the way by George P. Metzger, advertising counsel.

The cartoon herewith has many subtle meanings, but to those members of the trade who have had occasion to visit the Columbia executive offices the picture of Mr. Bradt handing out enticing cigars brings up memories of similar pleasant occasions.

Messrs. Bradt and Metzger on the Way.

The Kaiser Drug Co., of Ottawa, Kan., is building a new addition to its present headquarters to accommodate the line of Victrolas for which it has lately taken the agency.

R. A. HAWARD GOES TO TOLEDO.

Manager of Talking Machine Department of C. A. House Music Co. Takes Similar Position with Whitney-Currier Co.

(Special to The Talking Machine World.)

WHEELING, W. VA., February 7.—R. A. Haward, for the past fifteen months the efficient manager of the Victrola department of the C. A. House Music Co., of this city, has resigned. On February 1 he assumed the management of the retail Victor department of the Whitney-Currier Co., of Toledo,, O.

Before coming to Wheeling Mr. Haward was with the Musical Instrument Sales Co., in Minneapolis, Minn. During his short stay here he has made a host of friends, who are congratulating him upon his advancement and are wishing him continued success.

HERACO EXCHANGE INCORPORATES.

The Heraco Exchange of West Hoboken, N. J., filed papers of incorporation last week. The concern deals in talking machines, and the incorporated firm will take over the business of an unincorporated company which has been operating under the same name at 615 Spring street, West Hoboken. The new concern has also taken over the business formerly conducted by S. M. Tilton at 610 Bergenline avenue, West New York, and will run it as a branch office. The capitalization is $10,000, the directors of the corporation being Herman R. Raven, C. Leo Henrichs and Frank H. Gaillard.

DEATH OF LOUIS W. A. WESTEE.

Louis William Alphonse Westee, formerly auditor, secretary and treasurer for Thomas A. Edison, Inc., who lived at 11 Gaston street, West Orange, N. J., died on Thursday night of last week at West Caldwell, N. J. Mr. Westee was born in Brooklyn, June 1, 1865, and at one time served as City Auditor of Orange, N. J.

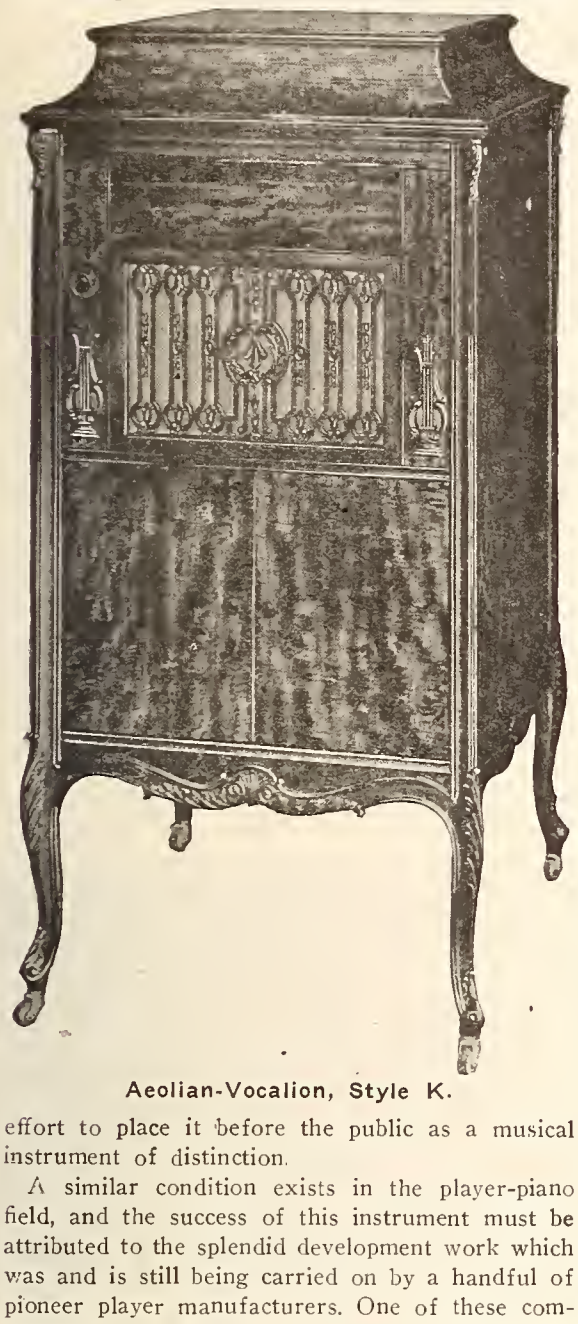
EDUCATIONAL INFLUENCE OF THE TALKING MACHINE

Demonstrated Afresh by the Splendid Work Being Done by the Aeolian Co. in the Development of Its Aeolian-Vocalion Campaign—Some Notable Recitals with Prominent Artists.

In searching for a reason to account for the tremendous advances made by the talking machine in recent years authorities of the industry have almost unanimously ascribed this phenomenal growth to the firm hold which the talking machine has taken in educational and musical circles. The high plane upon which the modern phonograph has been placed is the result of years of consistent effort to place it before the public as a musical instrument of distinction.



Aeolian-Vocalion, Style K.

A similar condition exists in the player-piano field, and the success of this instrument must be attributed to the splendid development work which was and is still being carried on by a handful of pioneer player manufacturers. One of these companies, the Aeolian Co., is generally credited by the piano industry as doing more for the uplift of the player-piano than any other concern in the field. As the manufacturer of the Pianola, it is conducting advertising campaigns in the magazines and newspapers which have been remarkable for their dignity, refinement and educational character, and at a great expense it has given concerts and recitals free of charge for the benefit of the public.

A firm believer in constructive and progressive methods, it was in line with Aeolian policies and plans that the Aeolian-Vocalion, the company's new phonograph, should be introduced to the trade and the public in a manner similar in its general scope to the introduction of the Pianola. The advertising campaigns in behalf of the Aeolian-Vocalion have been referred to in previous issues of The World, but full credit should be given to the excellent work which the Aeolian Co. is doing with this instrument in concert and recital fields.

For several years past the Aeolian Co. has maintained as a regular department of its business a recital division which is under the direction of Gerard Chatfield, a musician of considerable ability. This department has been giving concerts and recitals in Aeolian Hall and before some of the most exclusive clubs and organizations in local territory. Every detail of these concerts is carried out with care and precision, and the character of the music, together with the prominence of the artists appearing, has served to impress thousands of music lovers with the prestige and quality which stand behind the products of the Aeolian Co.

During the past year the Aeolian-Vocalion has been presented at many of these recitals, and has invariably achieved signal success. In almost every instance members of the audience have been so impressed with its musical qualities that they have requested private demonstrations, commenting upon the fact that the concert had placed the instrument before them in a light which they had not heretofore associated with "mechanical" instruments.

During the course of the various recitals the Aeolian-Vocalion is frequently used as a solo instrument, rendering selections by famous artists, and at other times it is presented as a solo instrument with the Pianola playing the accompaniments to the records. This arrangement has attracted considerable attention from many prominent musicians.

The Aeolian-Vocalion has also been remarkably successful when furnishing the music for the classic dances which are given out-of-doors during the summer season. The instrument is also used for the modern dances presented in the Green Room at Aeolian Hall and to illustrate opera talks by prominent lecturers and readers. Two of the instruments used most frequently at the various recitals are shown herewith.

A fair idea of the character of the Aeolian Co.'s recitals may be gleaned from the following list of concerts given during the past few months at which the Aeolian-Vocalion was presented: Cranford Golf Club, Cranford, N. J.; Lockwood Collegiate School, Scarsdale, N. Y.; Bayside Yacht Club, Bayside, L. I., N. Y. (two concerts); Flemington County Fair, Flemington, N. J.; convention of National Jewelers' Association, Aeolian Hall; Country Playhouse, Hastings-on-Hudson, N. Y.; Gedney Farms Hotel, White Plains, N. Y.; Douglaston Country Club, Douglaston, L. I., N. Y.; Asbury Methodist Episcopal Church, Mt. Vernon, N. Y.; Chevalier Eduardo Marzo's lecture, Jersey City, N. J.; Christ Reformed Church, Newark, N. J.; Woodlawn Heights Presbyterian Church, New York; Trinity Methodist Episcopal Church, City Island, N. Y.; Fewsmith Presbyterian Church, Newark, N. J.

BUILT UP A GOOD TRADE.

The Victor Jobbing Business of the Whitney-Currier Co., of Toledo, Doing Well Under Management of C. H. Womeldorff.

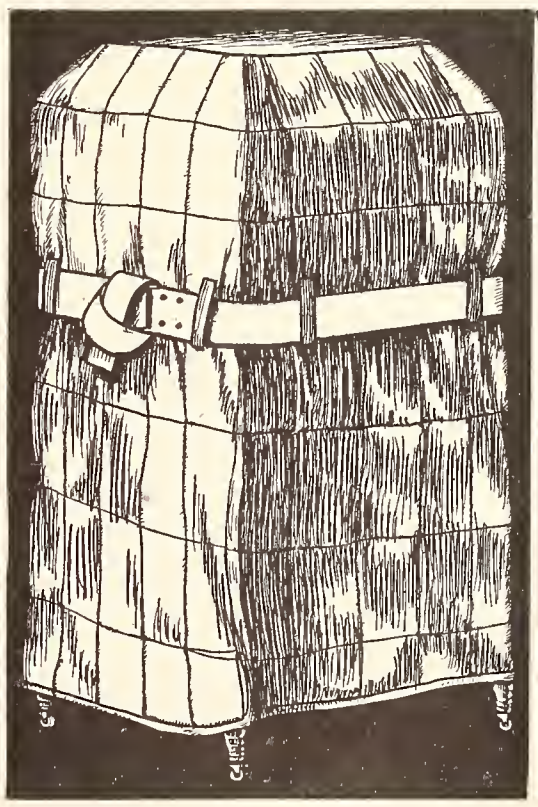
(Special to The Talking Machine World.)

TOLEDO, O., February 8.—One of the most attractively arranged and successfully managed Victor jobbing departments in this section is that of the Whitney-Currier Co., which is conducted by Charles H. Womeldorff. Since taking charge last May he has practically built up a rapidly growing clientele and has made a splendid showing in a business way. Mr. Womeldorff is an old Victor man, having traveled Iowa, Missouri, western Pennsylvania, Oklahoma and Arkansas for the Victor Co. He knows the business from all viewpoints and the needs of the dealers. Much of his success may be attributed to this fact.

INCORPORATED.

The Nolen Accessories Co., which will engage in the manufacture of talking machines, magnetic reproducers and electric contrivances, was incorporated with a capitalization of $5,000 by L. Rommel, F. Spencer Vickery and J. G. Nolen, of 452 Fort Washington avenue, New York.

The Grandola Phonograph Co., Inc., New York, has been incorporated with capital stock of $20,000 for the purpose of manufacturing and dealing in talking machines and musical instruments.



for every machine
(delivery or wareroom)

A complete line of phonograph covers is offered under the B & B trademark, each one being made of the highest quality throughout. **Moving** covers are made of Khaki and Canvas with heavy felt or cotton padding. **Wareroom** covers in Rubber, Linen, Canton Flannel and Mackintosh Fabrics.

Protect your cabinets with B & B covers; don't let them get scratched or dust laden. Fresh goods showing the sparkling varnish finish sell FIRST and give you the bigger profits.

We also have a fine line of CABINETS, PIANO BENCHES and other supplies for both talking machine and piano stores. **Send for prices.**

HONOR THOS. A. EDISON'S BIRTHDAY.

Special Advertising Feature for Dealers—Special Button Worn—Some Factory News.

To fittingly honor the sixty-ninth birthday of Thomas A. Edison, a set of newspaper and display advertising features were issued to Edison Diamond Disc dealers to be used during the week in which February 11, Mr. Edison's natal day, occurred. These consisted of an attractive combination of hanger and bulletin showing Mr. Edison listening to one of his favorite records on the official laboratory model of the Diamond Disc, with a list of several of the records from which he derives the most pleasure; a hanger on one side of which was an announcement that Mr. Edison's birthday would be honored by a special program, and on the other side an announcement for the birthday itself, extending a general invitation for the public to step in and enjoy the honorary concerts; two advertisements of similar character to this double bulletin and an interview with Mr. Edison for use in newspapers.

An interesting and unique feature of Mr. Edison's birthday was the wearing by every employe of the big Orange plant of a button inscribed "EDISON 69." Mr. Edison himself celebrated the day in his usual manner—delving into the mysteries of some baffling problem in his private laboratory.

That the personal welfare of the several thousand employes of Thomas A. Edison, Inc., Orange, N. J., manufacturers of the Edison Diamond Disc phonograph and Diamond Disc records, is a consideration of the organization is evidenced by the lunch room service for the benefit of employes living at a considerable distance from their work.

On the top floor of the big concrete and steel office building tables have been set up where those who bring their lunch may order a la carte in addition to what they bring, while others have the regular table d'hote served from 12 to 1 o'clock.

An interesting feature of lunch time in the Edison dining room is the Diamond Disc concerts given on Mr. Edison's official laboratory model. In addition, there is a grand piano which employes have the privilege of playing and of which they frequently take advantage.

TRADE NEWS FROM PITTSBURGH.

Opening of the New Quarters of the Buehn Phonograph Co., Inc.—Handsomely Fitted Up—The Windsor Co. Rearranges Store.

(Special to The Talking Machine World.)

PITTSBURGH, PA., February 9.—One of the finest talking machine stores in the city has just been completed and occupied by the Buehn Phonograph Co., Inc., at 513 Wood street. It embodies all the latest improvements in construction and equipment

New Home of the Buehn Phonograph Co.

and contains a number of unique features that make it a very handsome addition to Pittsburgh's large list of attractive shops.

The Buehn Phonograph Co., Inc., was formerly located at 713 Penn avenue, and is the local jobbing house for the Edison line of talking machines. The new location is in the busiest center of the downtown district, offering much better advantages than that of the old quarters. The entire building of seven large floors was leased for a long term of years and remodeled throughout along lines that make it most adaptable to the purposes of the company. A marble front with spacious display window was installed, and the exterior of the store is both striking and artistic. The main floor is given over to demonstration parlors and is richly and comfortably furnished. The booths are of the Unico sectional type and are five in number. The second floor is being fitted out as a concert room. It will be finished in the near future, and complimentary recitals will be given regularly. The upper floors are used for offices and the display and storage of instruments. A formal opening of the store will be held soon.

The Windsor Music Co., 300 East Sixth avenue, Tarentum, Pa., is installing one of the finest talking machine departments in that section of western Pennsylvania. Five sound-proof demonstration and display booths are now in the course of construction and will be completed within the next few weeks. They are to be furnished throughout in a very handsome manner. T. B. Windsor, head of the company, states that a greater demand upon this Victor department has made it necessary to install adequate facilities for handling the trade.

The Buehn Phonograph Co., Inc., local jobber of the Edison talking machine, gave a very successful tone recital at Carnegie Hall, Pittsburgh, on Friday evening, February 4. A large number of the Edison dealers from throughout the western Pennsylvania territory attended. The artists were Thomas Chalmers, of the Boston Opera Company, and Mr. Walsh, who played a violin accompaniment. The recital was under the direction of V. E. B. Fuller, of the Edison laboratory. It was brought out effectively that the Edison phonograph reproduces accurately the human voice as well as the musical instrument. The official laboratory model, Edison C 250, was used. Following the recital a dinner was tendered to the Edison dealers at the Fort Pitt Hotel as guests of the Buehn Phonograph Co.

TRADE NEWS OF THE NORTHWEST.

New Grafonola Department of the Emporium at St. Paul a Gem—Handles Columbia Line—Minnesota Phonograph Co.'s Big Edison Business—Foster & Waldo Enlarge Victrola Department—News of the Month.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., February 7.—One of the neatest and one of the largest talking machine marts in the Northwest is the new Grafonola department of the Emporium, the famous St. Paul department store, which was opened December 15. The opening was unheralded by the usual publicity campaign, but proved an instant success. S. A. McLeod, son of one of the Emporium moguls, is the head of the department and has taken over en masse the sales force of the Columbia store in St. Paul, namely, James Mead, Miss Adelaide Moon, William Simpson, late of Toronto, and Clarence Steinbrenner.

In the balcony annex the Emporium has set apart 6,000 square feet for the talking machine department, the space being devoted to a general display room, a small concert hall and four large demonstration rooms. All the furnishings are in mahogany and the general effect is most attractive. At present Manager McLeod handles only the Columbia line, but expects to have a Victor agency by next fall at the latest.

Manager Young, of the St. Paul store, is at the old stand on Sixth street, and is cleaning up the old accounts and pushing the Dictaphone, with which he is having much success.

January's business for the Minnesota Phonograph Co., dealing exclusively in the Edison line, was nearly three times that of the preceding January, says President Laurence Lucker. The country trade is ever widening and the company entertained a large number of country dealers during the big Minneapolis automobile show, one of the big annual shows of the country. F. A. Schleuder opens these days a fine exclusive phonograph shop in the fine little city of Austin, Minn. He will specialize in Edisons.

Foster & Waldo have remodeled one of their floors into a Victrola department. This will give them a main reception room ninety feet in length and fifteen demonstration booths, all the latter having outside frontage. It is about as handily arranged Victrola concern as may be found. Foster & Waldo are pushing the Victrola strongly.

The presence of John McCormack in the Twin Cities at concerts and his active participation in carnival doings greatly stimulated the demand for McCormack records until the dealers are in despair to fill the call from all quarters. Kreisler is due in a week and will give concerts both in Minneapolis and St. Paul.

The Beckwith-O'Neill Co., jobber of the Victor line, has not been able to accumulate a stock and is shipping out goods as fast as they arrive.

The Talking Machine Co., Archie Matheis, general manager, has resumed its attractive series of recitals with the usual success.

Charles A. Gesell, the general Northwestern man for the Victor house, has been in the Twin Cities about ten days looking after the interests of the company.

EDISON DEALER SELLING HELPS.

Thomas A. Edison, Inc., has just issued a new series of dealer selling helps, including a large display hanger of Jacques Urlus, greatest of living Wagnerian tenors, singing with the re-creation of his voice on the Diamond Disc phonograph, one large display hanger showing Mr. Edison listening to his favorite records and giving a list of the records, and two smaller hangers, all artistic examples reflecting the high quality of the Edison product. These were accompanied by the bulletin of records issued in January and intended for use in attractive mahogany frames already supplied dealers, and the latest disc record supplement, which, in addition to the newest records, lists every record issued since the latest record catalog of November, 1915. There was also an exceptionally interesting and valuable issue of the monthly supplement to the retail salesman's sales manual.

COMPLETES FIRST YEAR AS JOBBER.

The G. T. Williams Co., 217 Duffield street, Brooklyn, N. Y., has just completed its first year as a Victor distributer, and G. T. Williams, president of the company, is well pleased with the results achieved by the company. In a chat with The World Mr. Williams said:

"We closed a very satisfactory year and are gratified with the situation from all standpoints. We are deeply appreciative of the loyalty that our dealers have shown and the assistance that they have given us which has made these results possible. We are making plans for the new year which will enable us to give our dealers more efficient service than in the past."

The A. B. C. Talking Machine Corp., graphophones and musical instruments, has been incorporated in New York with capital stock of $10,000 by D. G. Donovan, D. V. Voigt and T. E. Murray, Jr.

FRANK WILSON, OF UTICA, DEAD.

Frank Wilson, confidential secretary and manager of the wholesale and retail departments of the Arthur Ferris Talking Machine Store, in Utica, N. Y., passed away recently after a brief illness. He had been engaged in the talking machine business since his graduation from high school, and had a most promising future. His passing is greatly regretted.

TO MAKE NEW SOUND BOX.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., February 5.—A $100,000 company has been incorporated in Milwaukee by A. J. Hoffman, J. D. Thomsen and H. E. Ransom to exploit the sale of a new sound box for talking machines, which is intended to soften the tone. The new box is the invention of J. H. Ellis, who perfected a new type of diaphragm some time ago. Mr. Ellis has made many inventions in the telephonic and phonographic field.

THE TRADE IN NEW YORK CITY AND VICINITY

The first month of the new year opened up very well indeed for the local talking machine trade, and all factors of the industry are convinced that 1916 will be the best year in the history of the talking machine trade. Only one provision is made, however, and that is that the factories ship enough goods to enable the dealers to properly develop the business which they have been working on during the past year.

There is at the present time an acute shortage of goods of all types and descriptions. This applies particularly to machines, the record situation having improved materially in the past sixty days. The scarcity of machines comprises even the very low priced models which heretofore have not been included in the general shortage of product. It is almost as difficult to secure a $50 machine to-day as a $100 one, and judging from the demands being made upon the dealers the factories will be obliged to materially increase their output in 1916 to cope with the situation.

Factories Shipping More Than Ever.

With all this complaint of scarcity of product, however, there is one phase which must not be overlooked, and that is the fact that the jobbers and the individual dealers are receiving far more machines and records at the present time than they have during any previous period. As one factory representative remarked the other day to a complaining distributer: "You are receiving 50 per cent. more machines right now than you did last year." "That is true," replied the jobber, "but we have orders totaling an increase of 100 per cent. more than last year, so you can realize how small our additional shipments really appear."

Returns from Interesting Trip.

V. W. Moody, sales manager of the New York Talking Machine Co., New York, Victor distributer, returned the first of the month from a fortnight's trip through Pennsylvania and sections of New York State. Commenting upon general conditions Mr. Moody said: "I failed to find a single Victor dealer on the entire trip who had not closed a larger business in January than in January, 1915, and whose business for 1915 had not been greater than that for any preceding year. I found very gratifying results of the proven theories which we have been expounding and working on. Our basic contention is that invariably the dealer who does the largest record business in a town also does the largest total business of any dealer there, proving that it is impossible to do a really large record business without the machine business following. On the other hand, we have frequently found that the dealer who sold more machines than any of his contemporaries was very often not the largest account of the town, proving thereby that record business does not always follow machine business. The new series of display advertising matter which we have been putting out this season is being generally used and greatly appreciated by Victor dealers, who are well pleased with the original ideas this material embodies." As an example of the work done by Mr. Moody on this trip it is interesting to learn that he went over and arranged the record stocks of several Victor dealers, and in one particular establishment received the cordial thanks of the proprietor for placing the stock in such a condition that even "he" could locate a record without inconvenience. Heretofore one stock clerk was the only man who held the key to this stock layout, and if he was absent for any length of time the other clerks were sadly handicapped. Mr. Moody arranged the stock so that maximum efficiency is now available from every standpoint, and the possibility of overstocking or understocking is practically eliminated.

Closed Record January Business.

"January closed so big that there is no question about the prosperous outlook for the new year," said R. F. Bolton, district manager of the Columbia Graphophone Co., New York, in a chat with The World. "As a matter of fact, our sales totals for the month compared very favorably with last December, which is a very unusual comparison to make. There has been a very substantial increase in record business the past few months, and in machines the higher priced models continue to be in greater demand. The electric models are going big, and show the influence of the advertising campaign which we are using in the newspapers. There is an active demand for good, standard concert records, and the dance and popular selections are selling as consistently as ever. Judging from the number of advance orders already received for July and August deliveries in anticipation of fall requirements, it looks as though the dealers are making plans ahead to safeguard their stocks for the fall season. A number of dealers have placed such orders in the last few weeks and practically all of our dealers indicate their intentions of placing orders for their fall needs in the near future. Our company is making plans to take care of this demand by increasing its output during the early part of this year in anticipation of this class of orders."

Inaugurate Artist Recitals.

The Phonograph Corporation of Manhattan, Edison Diamond Disc distributer, which conducts the Edison Shop, 473 Fifth avenue, inaugurated last month the first of its 1916 series of concerts, at which various artists recording for the Edison Diamond Disc library are featured in conjunction with their records. Miss Helen Clarke, a popular contralto, appeared as the soloist at last month's recital, singing in unison with her Diamond Disc records. The recital was a pleasing success and was attended by an enthusiastic assemblage of music lovers. Miss Elizabeth Spencer, who is one of the most popular artists in the Edison Diamond

(*Continued on page 70.*)

Success

You are successful, of course.
Every Victor Dealer is successful.

But, the measure of your success depends upon your preparedness to supply the needs of your patrons and to instantly gratify their desires.

That means a study of your record stock and increasing it where necessary.

Do you know the weak points?

We have served the dealer for over 82 years and will be glad to help you if we may.

Write us to day.

TRADE IN NEW YORK AND VICINITY.

(*Continued from page* 68.)

Disc catalog, will appear at the Edison Shop very shortly to sing in conjunction with her records. January sales at the Edison Shop showed a substantial increase over last year, the new $250 Chippendale model being a prime favorite.

Pleased with Victor-Macy Decision.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., Victor distributer, referring to general conditions said: "The demand for Victor products the past month was very satisfactory, but we were unable to show in actual sales the totals we had expected to, owing to our inability to get satisfactory shipments. We may make up a good deal of this in February, and certainly are in a position to close a banner business if we can get enough goods. The decision in favor of the Victor Co. against R. H. Macy & Co. has had a wonderfully stimulating effect upon the Victor dealers, and inspired in them a general confidence that they will be able to receive the protection which they are entitled to as against unfair competition. The situation also appears to me as one that will not be subject to any material change, at least for some time, if at all. I am firmly convinced that the Victor Co. will be able to sustain its position to the extent of continuing its business on the basis of uniform prices. If general business conditions throughout the country keep up as they are, and we do not get involved in the world conflict, the business the Victor trade will do this year will, by comparison, make it appear as though they had not been doing business in the past."

Planning to Open New Store.

Columbia dealers the past month have been very active in other ways besides closing a phenomenal January business. Several of these dealers have arranged to open new stores, as the success which they achieved in 1915 was so gratifying and impressive that they became fully convinced that a second store would be equally as profitable. One of these concerns is Boehm Bros., which conducts a very successful Columbia store on Pitkin avenue, Brooklyn, N. Y., where it handles the Columbia line in an aggressive, wide-awake manner. This house is now arranging to open a very attractive store at 235 Utica avenue, Brooklyn, N. Y. This store will be opened about the first of next month, and the Columbia line will be handled exclusively.

High-Priced Machines Popular.

"January proved a very satisfactory month and our sales were ahead of expectations," said G. F. Baldelli, of the Pathé Shop, 187 Fifth avenue, which handles the products of the Pathé Frères Phonograph Co. exclusively. "The $200 Pathephone is still our best seller, and we have found it somewhat difficult to secure a sufficiently adequate stock of this model. We have just received a few $100 Pathephones in a mission finish, which is meeting with a ready sale. Pathé disc business has been unusually good, and the records which we are now receiving from the factory are meeting with hearty praise from critical music lovers." The Pathé Shop recently displayed a very attractive show window featuring the Pathé records made by Mme. Marthe Chenal, who is internationally prominent in musical circles. Mme. Chenal has made several Pathé records which are achieving wide success.

Monthly Sales Dinners.

Max Landay, of Landay Bros., Victor distributers, in a chat with The World, stated that January was one of the best months in the history of this very successful institution. Landay Bros. recently introduced a plan whereby all the members of the sales staff gather together monthly at an informal dinner where they discuss plans and policies for the future. This modern idea is serving to greatly increase the efficiency of every individual member of the Landay staff and makes the force as a whole representative of the highest ideals in Victor retail merchandising.

Location Aids Trade.

The Sonora Phonograph Corp.'s very artistic warerooms at 665 Fifth avenue, New York, are proving a Mecca for the many people who are becoming interested in the Sonora product. This store is closing an excellent business, and its location in the heart of the uptown shopping district is proving a material factor in the success which it is achieving.

Did You Lose That Record Sale?

¶ Your customers frequently overlook the number of times you have filled their record orders complete; but remember with annoyance the instances when they were unable to secure one or more favorite records.

¶ It is to your profit and advantage to place your record orders with judgment and precision. Haphazard ordering means annoyance, loss of money and loss of patronage.

¶ Join forces with a Victor distributor who has made a study of the Victor record situation, and is prepared to assist you develop this important division of your business.

¶ Every member of this organization has qualified to serve as a Victor dealer; not merely a traveling representative. They are all willing to assist and co-operate with the Victor retail fraternity, and place their experience at your disposal.

May we not receive a trial order?

G. T. Williams Co., Victor Wholesale Exclusively **217 Duffield St., Brooklyn, N. Y.**

VISITING THE PACIFIC COAST.

J. E. Kelley, Sales Manager of the Shelton Electric Co., Calling on the Trade in the Southwest and Pacific Coast Points.

J. E. Kelley, sales manager of the Shelton Electric Co., New York, manufacturer of the Shelton electric phonograph motor, is now en route to the Coast. Mr. Kelley will visit the talking machine trade in all sections of the South and West, and will spend quite some time in the Far West. In all probability he will be away about four months, during which time he will concentrate on extending co-operation and service to the talking machine dealers in developing their Shelton electric motor business.

J. E. Kelley.

Mr. Kelley has been associated with the Shelton Electric Co. for the past ten years and is thoroughly versed in all phases of modern salesmanship. Since the introduction of the Shelton electric motor a few months ago he has made a careful study of its mechanical and sales possibilities, and his thorough knowledge of the motor has been an important factor in the success he has achieved in local territory. For the past few months Mr. Kelley has been calling on the trade in the East, and has received large orders for the Shelton electric motor. Incidentally he won first prize in a contest held by the company last month for the largest single order for Shelton electric motors, Mr. Kelley's order for 1,200 motors from one dealer being sufficient to win him the coveted honor.

Before leaving for the Coast Mr. Kelley in an interview with The Talking Machine World said: "Wherever I have visited, the talking machine dealers are greatly impressed with the many distinctive features of the Shelton motor. They are well pleased with the fact that it does not disturb the spring motor in any way, and also that it does not require even the turning of a screw to be placed in operation, being simply placed against the turntable. A number of the dealers and repairmen have expressed doubt that a motor of such extreme simplicity could do all that is claimed for it, but a demonstration has changed them from doubters to enthusiasts."

INCREASES VICTOR DISPLAY ROOMS.

(Special to The Talking Machine World.)

WILKES-BARRE, PA., February 8.—Landau's Music & Jewelry Store, 70 South Main street, which handles Victor machines and records, has just constructed six new demonstrating rooms, making nine in all, in order to take care of its fast growing Victor trade. The concern has also put into service a very attractive motor truck which has the world-famous Victor trade-mark prominently displayed. This truck is attracting considerable attention because of its generally artistic design.

TALKING MACHINE MEN MEET.

At First Gathering of New Year Dealers Indorse the Stevens-Ayres Bill for Price Maintenance—New Committees Appointed—Praise Victor Policy of Helping the Dealer.

The Talking Machine Men, the organization of talking machine dealers of New York and vicinity, held their first meeting of the year in the assembly room of the Merchants' Association, in the Woolworth Building, on Wednesday evening, January 26, with an attendance of old and new members that was very gratifying. John E. Hunt, president of the association, presided, and outlined some interesting plans for the future.

During the course of the meeting there was a live discussion of the new Stevens-Ayres Bill for the maintenance of prices on trade-marked articles, and it was decided that each of the dealers send a personal letter to his Congressman in support of the measure, and that the Talking Machine Men, as an organiaztion, express their sentiments in favor of the bill in a letter to E. C. Rauth, secretary of the National Association of Talking Machine Jobbers. The association adopted suitable resolutions in memory of Edward Lyman Bill, editor of The Music Trade Review and Talking Machine World, an honorary member of the Talking Machine Men, and J. H. Dodin, of the talking machine department of Gimbel Bros.

During the meeting a resolution was adopted strongly commending the stand of the Victor Co. for price maintenance and the extensive advertising campaigns and sales helps of that company for the benefit of the dealer.

The following members were appointed on the executive committee of the Talking Machine Men to lay plans for future meetings and look after the financial affairs of the organization: J. Y. Shepard, M. W. Gibbons, Meyer Goransky and Henry Mielke. Associate members of the executive committee: J. T. Coughlan, W. Isaacs, A. Galuchie, Otto Goldsmith, H. Jaffee and M. Streamer. An auditing committee was also appointed, consisting of J. T. Coughlan, M. W. Gibbons and Sol Lazarus.

The next meeting of the Talking Machine Men will be held in the rooms of the Merchants' Association on Wednesday afternoon, February 16.

TO HANDLE TALKING MACHINES.

(Special to The Talking Machine World.)

OLYMPIA, WASH., January 17.—The firm of E. E. Taylor & Co. has discontinued handling pianos and the large stock on hand was disposed of at a special sale held last week. The firm has been in the piano business for the past twenty-five years. The talking machine and small goods line carried by the house will be enlarged and the business will be continued in these instruments.

The Hercules Talking Machine Co., Inc., has been chartered under the laws of New York to enter into the manufacture of motor horns, talking machines, musical instruments, etc. The capital stock of the company is $5,000 and the incorporators are: J. Grossbard, R. and L. M. Scheur.

JOHN McCORMACK AND C. G. CHILD PHOTOGRAPHED.

The accompanying illustration presents two men whose activities in connection with the production of Victor records have contributed materially to the wonderful success of the Victor record library.

John McCormack, the celebrated tenor, who is standing on the upper step, needs no introduction to either the trade or the general public, as his many Victor records have achieved popularity the world over, and have reached sales totals that are almost unbelievable to the average layman.

C. G. Child, manager of the Victor recording laboratories, who is accompanying Mr. McCormack, is not so well known to the general Victor trade, and the public has probably never heard of him. At the same time, however, he has been a very important factor in the remarkable growth of the Victor business and is recognized as one of the world's leading authorities on record manufacture and an expert judge of what is most suitable in music and how it will probably appeal to the public.

The photograph shown herewith was taken last month on the steps of the Victor Lunch Club, subsequent to one of Mr. McCormack's frequent visits to the Victor recording laboratory in connection with the making of several new Victor records.

Messrs. McCormack and Child "Snapped" in Front of Victor Lunch Club.

TRADE-MARK

Why The PATHÉ!

The Pathé proposition affords progressive dealers an opportunity to secure both machine and record trade.

The Pathé Line is Complete

There is a Pathephone and Pathé disc for every class of prospect.

The Pathé franchise is a valuable one, for it means *real* profits.

Be the first in your territory to cash in on this world famous trade-mark.

TRADE-MARK

REFERENDUM ON RESALE PRICES.

Members of Special Committee on Price Maintenance, Reporting to the U. S. Chamber of Commerce, Ask That Referendum Be Taken on the Question of Governmental Legislation Enabling Manufacturers to Fix Prices.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 7.—The board of directors of the Chamber of Commerce of the United States has voted that the report of a special committee of the National Chamber on the maintenance of resale prices shall be submitted to referendum. The committee had reported to the board that it was not able to present a unanimous report. Its chairman is Paul T. Cherington, a professor in the Harvard Graduate School of Business Administration.

A majority recommendation favoring legislation permitting price maintenance was signed by seven of the ten committeemen, two of them, however, modifying their assent by filing a supplementary report. With the majority report came the comment that a National Chamber committee had rendered a report last February favorable to the principles of price maintenance and the majority members saw no reason in any way to modify the conclusions arrived at and given to the chamber at that time, the committee reporting then that it was convinced that legislation permitting the maintenance of resale prices, under proper restrictions on identified merchandise, for voluntary purchase, made and sold under competitive conditions, would be to the best interest of the producer, the distributer and of the purchasing public, or consumer.

The supplementary report signed by two members, who also signed the majority report, recommended that injurious price cutting be included within the scope of the jurisdiction of the Federal Trade Commission over unfair methods of competition.

The supplementary report proposes to insert in Section 5 of the Federal Trade Commission Act in statutory language provisions which will have the following effect:

In regard to products that are identified in their sale to the public by name, brand, or trade-mark—and that are made and sold under competitive conditions: No merchant, firm, or corporation shall offer such articles for sale at a price other than that stipulated by the producer for the original sale of the articles at retail (provided the producer has given due notice of such price to the retailer by mark upon the article or otherwise); with the purpose or effect of (a) Making it unprofitable for other retailers to handle said articles. (b) Promoting the sale of a substitute or imitation. (c) Attracting trade away from competitors, where the result is to injure the reputation of said articles or the good-will of their producers or materially to impair the general distribution of said articles.

While the work of the committee has been confined in its instructions to identified merchandise, it believes that the principle involved in this recommendation is capable of extension to a much wider field and that the predatory cutting of prices on merchandise in general has been and is a favorite method of oppression on the part of unfair business to destroy small competitors and local producers and that legislation could very properly define such practices as an unfair method of competition.

HAS BUILT UP A STRONG BUSINESS.

The Achievements of the Southern Pathé Phonograph Co. of St. Louis Most Marked—The Aggressiveness and Ability of President Harry C. Meek Well Demonstrated.

(Special to The Talking Machine World.)

CINCINNATI, O., February 8.—One of the younger members of the local talking machine fraternity which has achieved remarkable success in the comparatively short while it has been in business is the Southern Pathé Phonograph Co., 426 Elm street, which is the Southern distributer for the products of the Pathé Frères Phonograph Co., New York.

Although this concern only started its activities a little more than a year ago, it has already secured an extensive clientele and is constantly increasing it by the addition of some of the most successful and prominent houses in the local retail trade.

It is only fair to ascribe a considerable measure of the company's success to the aggressiveness, energy and all-around ability of Harry C. Meek, president and general manager of the company. Mr. Meek is a "hustler" in every sense of the word, and is an enthusiastic admirer of the Pathé products.

H. C. Meek.

Mr. Meek's experience in the talking machine field dates back some eleven years, when he joined the forces of the Rudolph Wurlitzer Co., Cincinnati, O. Subsequent to that he traveled for a piano house, and was later appointed manager of the talking machine department of the P. A. Starck Piano Co., Chicago, Ill., leaving there to take charge of the George P. Bent Co.'s talking machine business. When Marshall Field & Co. embarked in the talking machine field Mr. Meek was appointed sales manager, resigning from this connection to organize the Southern Pathé Phonograph Co., which was incorporated with $50,000 capital stock.

STOCK SHORTAGE IN CINCINNATI.

Both Machine and Record Demand Exceeding Supply, Even After Holidays—John McCormack Concert a Huge Success—Knabe-Crystola Proving Popular—New Concerns Entering the Talking Machine Field.

(Special to The Talking Machine World.)

CINCINNATI, O., February 7.—One fact was uppermost in the minds of the talking machine merchants in the Cincinnati territory with the close of January, and that was the factories had not caught up with the demands of the market. There is a general shortage of machines of the more established type, which fact is most felt by the retailers.

Cincinnatians last month had an opportunity to hear John McCormack, a Victor favorite, and the audience at the music hall, for an entertainment of the kind, established a new record. The huge auditorium was filled and some 400 persons occupied the stage. This was, it is believed, the first instance in this part of the country of a demonstration of the kind, and talking machine people are of the opinion that it was solely due to McCormack's popularity, same being gained through his records. McCormack was really the talk of the town for days.

Mr. Byars, manager of the Vocalian department of the Aeolian Co., reports an exceptionally good month for January. The sale of the larger instruments was especially good. He also reports that several good wholesale deals were closed and in every instance the initial order called for the higher priced instruments and few low priced one. These facts are convincing, in his opinion, that there is a growing demand for the higher priced talking machines.

D. Heidenheimer has opened an office in the Perin Building for the distribution of phonographs.

Manager Dittrich, of the Rudolph Wurlitzer Co., said this morning:

"The heavy holiday business undoubtedly had some effect on the record trade in January, but a great deal of the demand can be traced directly to the fact that McCormack and Mischa Elman visited us this month; also, the grand opera season through which we have just passed awakened the interest of thousands of Victrola owners in the Red Seal catalog.

"The greatest problem of the month was how to handle the tremendous crowd of record buyers, and also how to satisfy the many machine buyers when the shortage existed on practically all styles of Victrolas. We increased our help very materially, in fact, devoting two floors of the Wurlitzer Building to record selling, we were able to give the usual 'Wurlitzer service' even under these extraordinary conditions.

"Wholesale trade was extremely active. It is reasonable to expect that the demand for records is universal, and that dealers are quick to take advantage of conditions such as now exist. We are doubling our floor space devoted to wholesale record stock, and all orders are going forward promptly as quickly as they are received."

When asked the same old question, "How is business?" Manager Whelen, of the local store of the Columbia Graphophone Co., said: "Good, exceptionally good, but our totals would be much higher if we could supply the entire demand. However, the factory is rushing out orders now and we expect to be on our feet in a short time and be able to ship all orders on demand." He further stated: "Instead of there being a decrease in the demand since the holidays, it seems to be getting greater, and all indications point to the greatest talking machine year the industry has ever known."

S. H. Nichols, district manager of the Columbia Graphophone Co., and James P. Bradt, general sales manager, visited the Cincinnati store during the latter part of the month on a general trip through the territory.

C. P. Herdman, assistant manager of the local Columbia store, stated that "inasmuch as there were quite a few Columbia artists among the grand opera stars who sang here the past month, there was quite an increase in Symphony record sales."

The Knabe Bros. Co.'s Knabe Crystola department is rushed these days supplying the demand for this new instrument, all of which comes from outside of Cincinnati. No effort has been made as yet to properly introduce the machine in the local territory, William Knabe yesterday stating that this market was right at home and could easily be reached at the proper time.

The Playola Talking Machine Co., of Cleveland, with a capitalization of $25,000, was incorporated last week by H. O. Mierks, O. O. Vrooman, H. A. Beckett, George E. Bradbury and J. E. Splittdorf.

NEW CABINET STYLE READY.

Schloss Bros. Announce New Model to Fit New Victrola IX—Rise in Prices Announced to Become Effective on March 1.

Schloss Bros., the talking machine cabinet specialists, of 637 West Fifty-fifth street, New York, announce that a new style of cabinet designed to fit and match the latest model Victrola IX is now in preparation, and the first of them will be ready for delivery about February 15. The new style will be finished in the usual Schloss Bros. style, both in cabinet work and metal accessories.

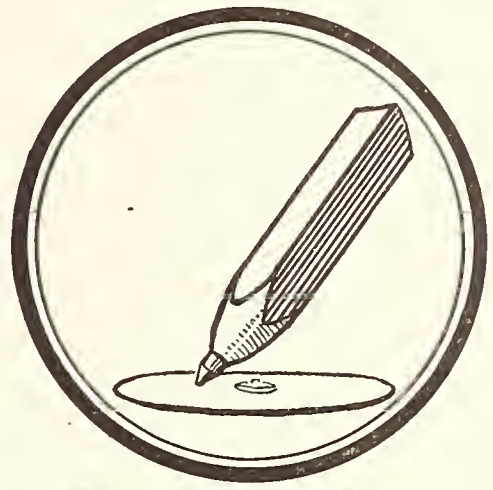
Schloss Bros. also announce an increase in prices for all styles of their cabinets, to become effective on March 1. The increase has been made necessary from the fact that there have been great advances in the cost of cabinet supplies, including the wood, metal parts, stains and other finishing materials. Edwin G. Schloss, in speaking of the price increase, stated: "There is nothing arbitrary in our action, but we have been forced to take it owing to the increased cost in the manufacture of our cabinets. We have been very successful in building up our business through offering quality and cabinets at a fair price. I feel that the trade would rather have that quality maintained at a slightly increased cost than to have the work shirked in order to maintain the old figures."

A VISITOR FROM CANADA.

A. Heller, president of the Canadian Talking Machine Co., Montreal, Canada, was a recent visitor to New York for the purpose of securing supplies and accessories to manufacture talking machines in Canada. The company plans to market a line of machines retailing at $5 to $20.

The firm of Daniel R. Weed & Son has leased a new store on Bank Square, Fishkill-on-the-Hudson, N. Y., and will carry a complete line of the smaller musical instruments, besides featuring the Victrola and Victor records.

H. Reifenberg & Sons, of Carlinville, Ill., recently added the Columbia line of talking machines.



Retails for $1.00

IF you are not carrying the Sonora Multi-Playing Jewel Needle in stock, you should do so.

It sells readily for $1.00, and we authorize you to guarantee it to give perfect satisfaction under daily use for three months.

We supply them to you at a price which permits a satisfactory profit, and will be glad to have you correspond with us on the subject.

The Jewel Needle will save your customers records, and bring out their beauty and harmony in a way not possible to the old-fashioned, scratchy, constantly-changed *steel* needle, now being rapidly discarded by careful people.

Manufacturers of steel needles state that they must be used but once because they wear the record. This is true, and it is also true that they begin to wear the record the minute they start and keep on wearing it more and more.

Write us for sample needle and full information in regard to net prices and the "service work" which we do for those who carry our products in stock.

INDIANAPOLIS TRADE SHOWS NO SIGNS OF DECREASE.

Columbia Monthly Business Increases 25 Per Cent.—Edison Tone Test at the Claypool—Pathé Agency Ready for Business March 1—Good Vocalion Advertising—Recent cent Floods Hindered Trade to an Extent—Story Told by a Stewart Traveler.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., February 2.—The talking machine men are keeping up the strenuous pace that started at the beginning of the holiday season. The records made in January were surprising to the dealers themselves, as they naturally expected business to slow down a great deal. All of the dealers have kept up their newspaper advertising, and this has aided in stirring up business.

It is in the sale of records that the dealers have "caught" a large number of customers. Women who buy records often are accompanied by friends who do not possess machines. A live salesman on the job can easily work up enthusiasm, and with the aid of the owner of a machine can convince the woman without one that now is the time to buy. And the women who received the machines as Christmas gifts are at this time of the year the most enthusiastic "pluggers" a salesman can find.

A. W. Roos, manager of the Columbia Graphophone Co.'s store, says that the January record has been surpassed in the last two years by only two months, and these were the Decembers. There was a large increase in all branches for this January as compared with January a year ago. Mr. Roos said this increase would average more than 25 per cent. The sale of records was exceedingly large.

Mr. Roos took a trip last week to St. Louis, Mo., on personal business. T. A. Lowrie, traveling auditor of the Columbia Co., was at the local branch last week.

Arch H. Olds, manager of the Edison Shop, reports that the recent tone test demonstration of the Edison machine by Elizabeth Spencer, soprano, at the Claypool Hotel, has proved a big success from a business standpoint. The 1,200 persons attending the concert were filled with praise for the Edison machine. When the lights were turned off the audience was led to believe that Elizabeth Spencer was singing, and was then startled by learning that the singer had left the stage in the darkness and that the machine was doing the singing; it caused a sensation.

Mr. Olds is now planning to arrange for a tone test demonstration with some of the local singers. He said the test at the Claypool was responsible in bringing a large number of Edison prospects to dealers throughout the State.

The daily concerts being given in the concert hall at the Edison Shop are growing in popularity. About 1,500 persons attended these concerts during the week. January sales were large.

Tobin Bros., who have the State agency for the distribution of the Pathé phonographs, have been delayed in getting into their store, which they will soon open at 10 East Washington street. They expect to be ready by the first of March. The display room they have occupied at 7 North Meridian street has been filled with prospective customers. Other talking machine dealers in the city have called on Tobin Bros. to welcome them and to extend their best wishes. This is a fraternal spirit that speaks well for the trade of this city.

The Aeolian Co. is continuing its well planned advertising campaign in the newspapers on the Vocalion, and needless to say, the Vocalion is among the leaders in sales of talking machines here.

In the wholesale field Walter E. Kipp, proprietor of the Edison Shop and manager of the Kipp-Link Phonograph Co., distributer of the Edison machine, said that his company was flooded with orders, and the only complaint was the difficulty in getting orders from the factory.

Special arrangements are being made by the Stewart Talking Machine Co., distributer of the Victor line, for the reception of Reinald Werrenrath, baritone, who will be heard in concert here February 15. It will be the first appearance in Indianapolis of Mr. Werrenrath, and the Stewart Co. will not lose the opportunity of giving its dealers the full benefit of the Victor artist's reputation.

The recent flood conditions in Indiana have smashed the traveling schedules of the Stewart Co.'s salesmen, but "high waters" have failed to wash away any of their ingenuity, as indicated by the experience of one of them in southern Indiana.

At a "razorback" station a dozen travelers were kept cooped up for hours on account of a washout on the railroad. The nearest house was a mile and a half away and the nearest town was five miles away.

The travelers became fretful and hungry. Then the Stewart talking machine man got busy. Despite the downpour of rain, he went to the nearest house, where he discovered a Victor, and when he returned he carried a bundle of sandwiches and a Victor machine. Soon the dreary little station was the scene of a lively Victrola concert. Three hours later the washout was repaired, and the conductor of the train, returning to the station, found a merry group around the Victrola instead of a bunch of grouches.

"Well, I've noticed the advertising done by the Victor people, but this beats all," commented the conductor. "It sure is the most practical advertising scheme I've ever seen."

It paid, because the dealers in the neighborhood have been getting results ever since.

Our Customers
can tell you about
Andrews Service

Below is portion of letter just received from one who knows good service:

W. D. ANDREWS, Buffalo, N. Y.

Dear Sir: I want to take this opportunity to thank you most heartily for the way in which you took care of us during the recent shortage. I want you to know we appreciate it and we are going to show you by our orders in the future.

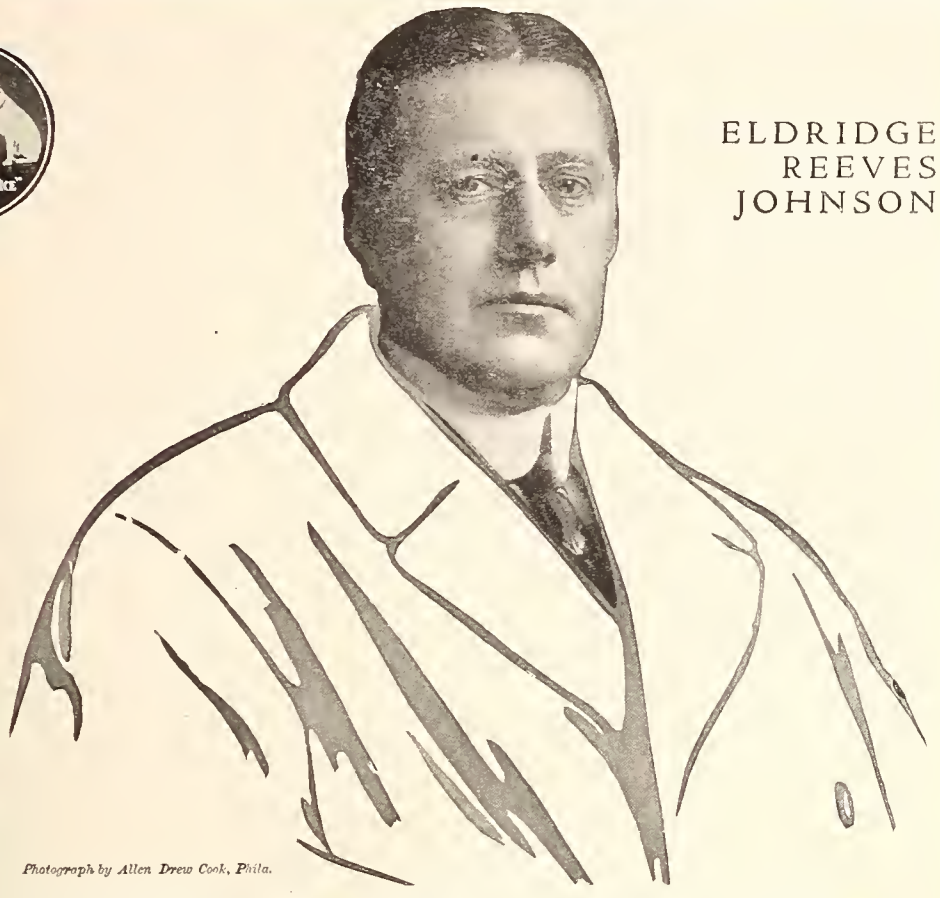
W. D. ANDREWS Buffalo, N. Y.

CARRYING GOOD STOCK OF MICA.

James Frazee, 38 Cortlandt street, New York, who has been connected with the talking machine field for the past two years, has succeeded in securing a large consignment of mica suitable for diaphragms of all shapes and sizes. Mr. Frazee has already received a number of very large orders from talking machine manufacturers, who have been somewhat handicapped in the past by a shortage of this important mineral.

REVIEWS CAREER OF PRESIDENT ELDRIDGE R. JOHNSON.



Photograph by Allen Drew Cook, Phila.

WHEN Mr. Johnson bought out his partner in a little machine-shop in Camden, in 1894, and hung out a shingle announcing that it was all his, he began the business that is now the Victor Talking Machine Company. He had been an expert machinist, earning $2.50 a day, and he wanted to be his own boss. He came of Colonial stock, and had a passion for perfecting things. Still has it. Invented a book-binding machine that helped pay the shop losses. Part of his work was making experimental models for other inventors. One day an early type of talking-machine was brought to him for alterations. It interested him. This particular opportunity didn't have to bruise its knuckles knocking at Mr. Johnson's door. He saw at once that the machine was badly designed. He loved music. He imagined a talking-machine that would reproduce sounds accurately, and he got busy making it come true. Spent $50,000 and nearly three years on this job. In 1898 he perfected a disk that sang—well, it happened to be "Telegraph My Baby"—like a human voice. Victory at last, and Victor became the name of the company organized in 1901 to manufacture it.

Mr. Johnson is not yet fifty, a quiet man of modest, convincing speech and easy to look at. Perhaps, officially, the greatest impresario in the world. All the big artists come to Camden to sing or play for records. Executive duties have compelled him to give up laboratory research, but he probably could work out to-day, with his hands and his wits, every detail of the Victor business better than any one of the 7500 men in his Camden factory. It is his shop. Wrote a book on tarpon fishing, for his own amusement. Good book, too. Says there is nothing spectacular in his success. Just doggedly and everlastingly keeping at it.

In the December issue of that well known national monthly—Everybody's Magazine—there appeared in the section devoted to "Little-Known Faces Behind Well-Known Trade-Marks," a review of the life of Eldridge Reeves Johnson, founder and president of the Victor Talking Machine Co. Its contents are so interesting that it has been reproduced for the benefit of the readers of The Talking Machine World who may not have been fortunate enough to see it in the magazine. Incidentally the photograph of Mr. Johnson is a particularly good one.

STEVENS-AYRES BILL REINTRODUCED.

Fixed Price Measure Is Again Presented to Congress with Many Important Amendments Added—Special Provision Is Made for Transportation Costs and Quantity Buyers.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 7.—Under the title "To protect the public against dishonest advertising and false pretenses in merchandising," Representative Dan V. Stephens, of Nebraska, has reintroduced in the House of Representatives the original Stevens-Ayres bill with a number of important amendments designed to meet the views of many friends of the measure.

The new bill specifically permits discounts for cash and for quantity, and for allowances and rates covering costs of transportation.

A final, new paragraph exempts sales to libraries and other public institutions. There are also drastic provisions against the use of the privileges of the bill in connection with any monopolized product or one concerning which there is any combination between manufacturers.

The latest tally shows 209 members of the House in favor of this legislation. This is but nine less than a majority.

GRAPHOPHONE PATENTS VALID.

American Graphophone Co.'s Suit vs. Aeolian Co. Settled—Validity of Patents Recognized.

The suit instituted some time ago by the American Graphophone Co. vs. the Aeolian Co. in connection with a number of patents was settled out of court recently. The Aeolian Co. recognized the validity of the patents in question, and an agreement respecting their use was reached by the two companies. A decree to this effect was signed last week by Judge Mayer, of the United States District Court. and entered accordingly on the records.

SELECTED VICTROLA FOR SCHOOL.

(Special to The Talking Machine World.)

ROCKLAND, MASS., February 5.—After several days' trial of the Victor Victrola and several other machines, the teachers of the School Street Grammar School voted in favor of the former. The Victrola selected was a $50 machine, and it will be used in the study of music and general educational work. An exact duplicate of the Victrola selected by the School street school has also been purchased by the Women's Auxiliary of the local Y. M. C. A., and will be presented to the local association for gymnasium and concert work. Both Victrolas were furnished by the local dealers, Neal & McCarthy.

BANQUET FOR EMPLOYES.

The employes of the American Talking Machine Co., the Victor talking machine distributer of Brooklyn, N. Y., were entertained at a banquet and theatre party on Friday evening, January 28, by the company, of which R. H. Morris is the head.

Bernard A. Kahn, of New York City, has incorporated his talking machine business under his own name, with a capitalization of $2,000.

ESTABLISHED 1868

EDWARD B. JORDAN & CO., Inc.

127-135 DEGRAW ST.—36-60 TIFFANY PL., BROOKLYN, N. Y.

Talking Machine Cabinet Manufacturers

We made the first talking machine cabinets created in this country, and we have specialized in this particular line ever since.

We will submit special designs of talking machine or record cabinets, or quote you from blue prints or samples. We manufacture to order only.

The Trio de Lutece, the famous ensemble of master soloists, have just made their first recordings—Columbia, of course!

Columbia Graphophone Company
Woolworth Building, New York

NEW COLUMBIA FACTORY TO BE READY ABOUT MARCH 1.

Structure Will Be Most Modern Both in Construction and Equipment—Emergency Hospital for Employes One of the Features—How Additional Space Will Be Utilized.

The Columbia Graphophone Co.'s new factory building, for which ground was broken last October, will be ready for occupancy about the first of next month. This building is one of the largest members of the Columbia Co.'s immense plant, and the following detailed account of its lay-out and equipment appeared in a recent issue of the Bridgeport Telegram:

"This structure, which is 324 feet by 60 feet on the ground and six stories in height, was started on October 4, 1915, and will be ready for occupancy on March 1. This is considered a remarkable record for rapid construction.

"The officers of the Columbia Graphophone Co. placed the safety and comfort of their employes before everything else in the plans of the new building, and it is one of the best lighted and ventilated structures in the country. The latest and best sanitary appliances and conveniences have been installed. The building is absolutely fireproof. A large passenger elevator will do away with the necessity of climbing the stairs to the upper floors of the building.

"The company has installed an emergency hospital and will employ a competent surgeon and trained nurse. In addition to the hospital proper there will be an emergency and rest room on the office floor. The entire equipment and lay out of the building was decided upon only after the company had sent its engineer, R. H. Arnault, on a tour of inspection of the principal factories in the country. The best in each have been adopted in the local factory.

"All the products of the plant will be handled by the most up-to-date conveying system, and the work will be so systematized and laid out that no time will be lost. In addition to the passenger elevator there will be two large freight elevators. Another time saver will be a pneumatic tube system for sending small tools from the tool room to the various parts of the plants. Pneumatic tubes will also be used to convey departmental and inter-departmental correspondence, orders, etc.

"The company has adopted a new plan in installing its polishing and buffing department on the upper floor of the building. This keeps the dust from this department away from the other departments, and the huge suction blowers for ventilation which change the air in this room once every two minutes will force the dust into the upper air instead of nearer the ground, where it might rise and be wafted into other rooms.

"On the first floor will be installed the metal pressing department; on the second the automatic screw machines and drilling department; on the third, hand-screw and milling machines; on the fourth, electric motors, electric graphophone assembling department, mechanical drafting rooms and laboratories. The executive offices will occupy the fifth floor and the polishing and buffing department the sixth. The construction of this new building will necessitate an entire new arrangement of all departments of the plant, and when this is completed it is expected that the output of the company in all divisions will be very greatly increased.

"The new factory contains approximately 120,000 square feet of available floor space. There are over 47,000 square feet of window glass in it. A new feature of the construction is scuttle holes on each floor, so that in case of fire there will be no danger of flooding any of the rooms below. An automatic sprinkler system has been installed, the electric lighting and power wires are all in conduits, and the office, drafting rooms and laboratory have the indirect lighting system."

The Parker Jewelry Co., of Rocky Mountain, N. C., recently took over the talking machine business of the Dawes Music Co. and is now carrying a complete line of Victor Victrolas and Edison Diamond Disc machines. J. M. Fox is manager.

C. E. GORE WITH PATHE FRERES CO.

Experienced Talking Machine Man Joins Sales Staff of Pathé Frères Phonograph Co.

Clarence E. Gore, connected with the E. F. Droop & Sons Co., Washington, D. C., for the past ten years, has joined the sales staff of the Pathé Frères Phonograph Co., New York. Mr. Gore will visit Pathé dealers throughout the country, and will leave for his first extended trip soon. Mr. Gore's past experience ideally equips him to co-operate with Pathé dealers along practical, result-producing lines, as he has been connected with all phases of the talking machine industry—manufacturing, wholesale and retail. For seven years he was connected with the factory of Thomas A. Edison, Inc., and during his ten years with the E. F. Droop & Sons Co. he was a member of both its wholesale and retail departments, seven years with the former and three years with the latter.

C. E. Gore.

SUPERVISORS VISIT EDISON FACTORY.

Supervisors H. L. Marshall, C. S. Gardner, J. E. Curtis, H. R. Skelton and C. W. Burgess, of the Edison forces, who were recent visitors at the factory at Orange, N. J., brought in glowing reports from their respective fields, and started out in the new year to make new and greater records. It is worth noting that Supervisor Curtis, formerly covering the Chicago, Des Moines, Sioux City, Minneapolis and Milwaukee zones, has been transferred to the New York City, Philadelphia, Williamsport, Pa., and Richmond, Va., zones. The territories of the other supervisors are now as follows:

H. L. Marshall—San Francisco, Los Angeles, Spokane, Seattle and Portland zones.

C. W. Burgess—St. Louis, Kansas City, Omaha, Denver, Ogden and Helena zones.

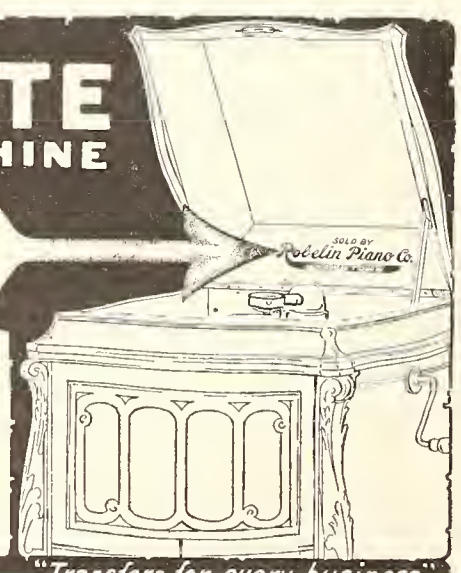
A. P. Burns—New Orleans, Dallas and El Paso zones.

C. S. Gardner—Pittsburgh, Cleveland, Cincinnati, Indianapolis and Detroit zones.

H. R. Skelton—Bangor, Boston, New Haven, Albany and Syracuse zones.

2¢ PLACES YOUR NAME PLATE ON A TALKING MACHINE

SOLD BY Robelin Piano Co. MORRISTOWN



A name plate like above illustration, applied on an instrument, will keep your name and business before the public continuously.

All progressive dealers use this method of publicity.

Delivered in the following styles:	250.	500.	1,000.
Plain gold face letters	$10	$15	$20
Gold face letters with black outline	15	20	25
Solid gold background, black letters and border	20	25	30

Send copy for free sketch. State style and quantity wanted.

HAWAIIAN UKULELES

Next to Victor Goods, now the biggest sellers in the small musical instrument line. The Ukulele is the Hawaiian national instrument, guitar-shaped but smaller. The Ukulele craze is rapidly spreading over the United States—easy for anybody to learn. Can be sold at a low price and still make big profit. We are distributors of the entire output of Jonah Kumalae, the largest maker in the Hawaiian Islands. Kumalae Ukuleles were awarded the gold medal at Panama-Pacific Exposition. Write for illustrated price list.

SHERMAN, CLAY & CO.
163 Kearny Street, San Francisco
Largest Jobbers of Hawaiian Music and Ukuleles in the United States.

H. C. BROWN TALKS ON ADVERTISING.

Advertising Manager of Victor Co. Condemns Free-Space Seekers—Believes in Use of Large Displays to Build Up Future Trade.

H. C. Brown, advertising manager of the Victor Talking Machine Co., Camden, N. J., was the host last week at a dinner given the advertising committee of the Camden Civic Week celebration at the Victor Lunch Club. Immediately after the dinner Mr. Brown gave an address of unusual force and interest, and after referring to Camden as the best city on earth for factories, Mr. Brown said in part:

"I believe in advertising. When a manufacturer or merchant wants a local demand he can get it only by advertising in the newspapers. I don't believe in one and two-inch display advertisements. I believe in going it to the limit. Instead of a small space, try a full-page advertisement, and you will note the remarkable results as compared with the smaller space. The manufacturer who sells to a nation, of course, must reach the people through both newspapers and magazines. The reason so many have failed in this direction is the fact that they use very little advertising in the magazines and then depend upon the newspaper to carry the so-called reading matter without payment.

"I have absolutely no regard for these free-space thieves. Within the past few weeks I have received approximately a dozen requests from theatrical producers offering for a certain price per week to advertise the Victor talking machines in

H. C. Brown.

their plays. Some have gone so far as to ask us to supply a machine without charge and then to pay so much per week for using it on the stage. Moving picture producers on numerous occasions have asked us for similar propositions. But to all of these we tell them frankly that we do not purchase advertising by that method. If they want a Victrola they can do the same as any other person—go to any Victor dealer and purchase a machine at its advertised price, just as you and I, and every other member of the firm, must do if we want a machine.

"On the other hand, if they feel disposed to mention the Victor the favor will be greatly appreciated, but we certainly will not pay a price for that service. The moment we pay for that type of advertising our legitimate advertising loses its value and the public would be justified in losing its faith in our product.

"The great fault with manufacturers and merchants is the fact that they are satisfied to plug along at the same rate of speed without looking into the future. If that were the policy of the Victor Co., we would worry ourselves to our graves. You here to-day remember the great holiday advertising of the Victor Co. in the newspapers and magazines. But you don't know that we spent $250,000 in Christmas advertising in newspapers alone for a product that was greatly oversold long before our advertising began.

"I want to be frank, and will tell you that we would not be satisfied if we did not have orders on hand sufficient to run our plant for several years without taking another order. But we must keep this condition going, and we succeed only by the fact that we are continuing to advertise, and will continue to do so as long as newspapers and magazines are published."

Lansing Khaki Moving Covers

Have your name in bright, bold letters put on your Lansing Covers, so when the machines are being delivered, hundreds will read your name. This strong advertising costs nothing. In addition, Lansing Covers protect machines from dust, scratches, varnish checking and excessive charges for polishing, etc. Size above is the Lansing "Big Boy" with No. 3 strap, for delivering the large machines. Price, Grade B, $6, complete with strap. Send for one today. Booklet listing all sizes and styles sent free.

E. H. Lansing, Mfr., 611 Washington St., Boston, Mass.

DOUBLING CAPACITY OF PLANT.

The Artophone Co., of St. Louis, Has Opened a Large Number of Accounts the Past Month—Line Includes Five Models.

(Special to The Talking Machine World.)

St. Louis, Mo., February 7.—The Artophone Co., 454 North Boyle avenue, which placed on the market last month the Artophone talking machine, is meeting with very pleasing success in the merchandising of its product. In fact, the orders have been received in sufficiently large quantities to warrant doubling the factory capacity, and the company states that it is in a position to take care of all orders from its dealers.

The Artophone line now consists of five models, retailing at $55, $75, $100, $150 and $200. They embody a number of distinctive features, and the artistic designs of their cabinets have won considerable praise from out-of-town visitors.

During the past few weeks the company has signed up more than eighty new accounts, and one well-known dealer placed an order for seventy-eight machines. The sales end is under the direction of J. P. Fitzgerald, sales manager, who is making every effort to extend maximum service and co-operation to Artophone dealers.

INCORPORATED.

The Edison Shop, Inc., of Lynn, Mass., has been chartered, with capital stock of $30,000, for the purpose of manufacturing and dealing generally in phonographs, dictating machines, phonograph records, pianos, player-pianos, organs, organ playing machinery, music rolls, etc. The directors are: William H. Ballard, Marguerite H. Ballard and Francis M. Cook.

MOVING PICTURE SLIDES

Prepared by the Pathé Frères Phonograph Co. for Use of Dealers.

The Pathé Frères Phonograph Co., New York, has just prepared a very attractive series of moving picture slides for the use of its dealers, featuring the various distinctive qualities of Pathephones and Pathé discs. One of these slides is shown herewith, and those Pathé dealers who have tried it out in their local theatres are very enthusiastic over the favorable interest it arouses on the part of the audiences.

A Pathé Motion Picture Slide.

W. H. KELLER & SON SOUVENIR.

William H. Keller & Son, of Easton, Pa., are issuing a handy little pocket memorandum book, bound in limp leather, embossed with their lyre and owl's head trade-mark, containing calendars for 1916 and 1917, and a goodly number of pages for the penciling of appointments, etc., and a reference or two to the quality of the Victrola, which they handle exclusively in addition to their line of Steinway, Kranich & Bach, Estey and Autopiano instruments.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

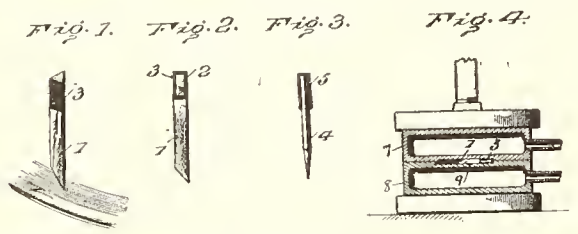
(Special to The Talking Machine World.)

WASHINGTON, D. C., February 8.—NEEDLE FOR TALKING MACHINES AND METHOD OF MAKING THE SAME.—Louis K. Scotford, Chicago, Ill. Patent No. 1,163,567.

This invention relates to improvements in needles for use in talking machines and method of making the same. The object of the invention is to produce a needle which will eliminate the scratching and hissing noise so common in records that have been used for some time.

The invention consists of a needle formed of any desirable substance, such as the ordinary steel or fibre needle, with its shank coated with a deadening substance such, for instance, as rubber, and in the preferred embodiment the needle proper is formed of fibre which is compressed under heat in the act of vulcanizing the rubber to the shank.

In the drawings accompanying and forming part hereof Figure 1 is a perspective view of a fibre needle made in accordance with the invention. Fig. 2 is a vertical section of the same. Fig. 3 is a view of a steel needle having its shank covered with



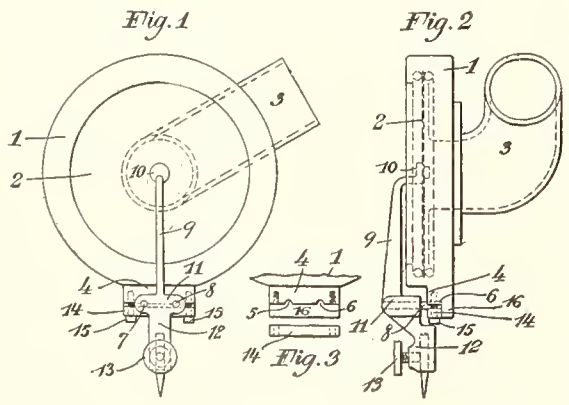
rubber, and Fig. 4 is a diagrammatic view illustrating a vulcanizing press in which the needle may be formed.

SOUND BOX.—William F. Grupe, Jersey City, N. J. Patent No. 1,162,351.

This invention relates to sound boxes for phonographs, graphophones and like devices, and more specifically is directed to the object of attaining a sound box and stylus lever construction for securing improved reproduction of the sounds impressed on the record and for making a record from original sounds.

Another object of the invention is to secure the desired rigidity and improved resiliency of the stylus lever and suspension means by novel means which can be constructed and assembled by workmen of limited ability and at a materially reduced cost.

Another object of this invention is to insure substantial uniformity in the performance of sound boxes, especially when manufactured in large quantities in accordance with this invention. This and other objects are attained by the provision of one or more recesses of predetermined depths within the casing of the sound box, flexible pins or other suitable members of certain lengths extending from the stylus lever into said recesses and a clamping plate for retaining such pins or other members within said recesses to the desired depth

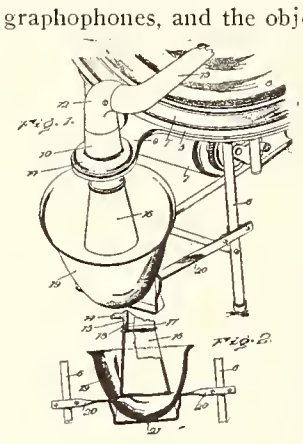


thereof. Preferably, such recess or recesses are open along longitudinal sides thereof and a stop plate is provided to limit the extent of depth of such pin or pins, or other members, within said recesses and also to brace the clamping plate.

Figure 1 is a front side elevation of an embodiment of the invention; Fig. 2 is an end elevation of Fig. 1, and Fig. 3 is a detail front elevation of the abutment portion of the sound box casing.

GRAPHOPHONES. Clinton E. Woods, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,163,120.

The present invention is an improvement in graphophones, and the object of the invention is to

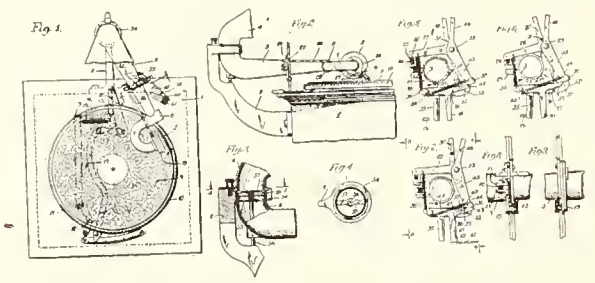


provide a hornless machine of simple, compact and cheap construction, which will emit an increased volume of sound and deliver the sound waves uniformly in all directions.

Figure 1 is a perspective view, partly broken away, of a talking machine provided with the invention, and Fig. 2 is a detailed vertical section, partly in elevation, showing the defleetor and the tube that conveys the sound waves thereto.

TALKING MACHINE WITH REPEAT ATTACHMENT.—Daniel M. Winans, Binghamton, N. Y. Patent No. 1,165,927.

This invention relates to talking machines having mechanism enabling the same to automatically repeat a record, when desired. That is, if the "repeat" mechanism or attachment is set, in this invention, the record being rotated and the reproducing stylus or needle positioned to reproduce the same, the selection will be played; at the termination of the selection the stylus will be lifted from contact with the record and returned immediately to its starting position, whereupon the stylus is again dropped into engagement with the record and the selection repeated. At the termination of the second rendition of the record the machine is automatically stopped. By this invention, these movements are effected by means of a number of levers carried by the tone arm. When the first rendition of the record is completed, in accordance with the preferred form of the invention, a lever carried with the tone arm contacts lightly with the usual latch of an automatic stop mechanism, this latch or trigger being adapted, when subsequently operated, to release the brake and permit



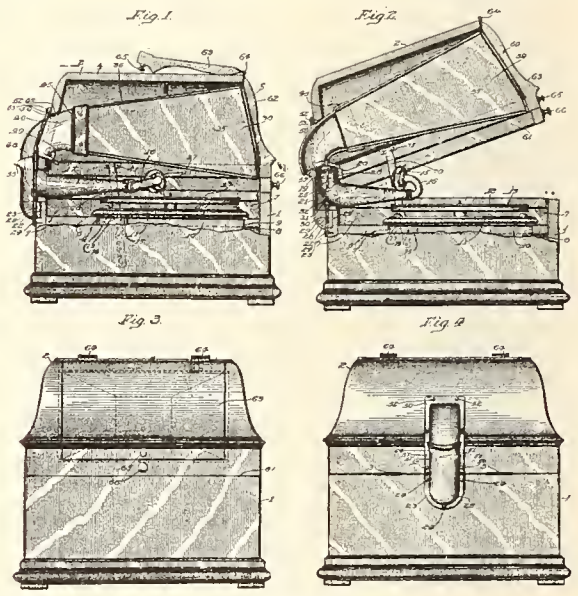
the same to be spring-operated to stop the machine in the well-known manner. In this device, however, the trigger referred to is not operated by the first contact therewith of the lever referred to. Instead, the first light contact of the lever with the trigger results in unlatching another lever and causing the reproducing stylus to be lifted from the record surface. The forward movement of the tone arm simultaneously stops, before the brake release trigger has been operated, and the tone arm is immediately returned, by suitable mechanism, to its starting point, the stylus being held out of contact with the record. A second lever carried by the tone arm now encounters an adjustable stop device, as a result of which other lever means are tripped, replacing the stylus in the record groove at the beginning of the record. The stylus now travels a second time over the record and at the end of this second rendition the first lever referred to again contacts the trigger of the automatic stop device, this time operating the same and stopping the machine.

The object of the invention is to provide a simple and effective mechanism for operating in the manner described, or for causing a record automatically to be repeated, by the coaction of devices movable with the reproducer, with suitable stop devices on the machine.

In the drawings Figure 1 represents a top plan view of a talking machine having preferred repeat attachment; Fig. 2 is a side elevation of the same; Fig. 3 is an enlarged vertical section through the upper end of the tone arm; Fig. 4 is a horizontal section on line 4—4 of Fig. 3; Fig. 5 is a section taken on line 5—5 of Fig. 1, the reproducer being about to complete its first rendition of the record. Figs. 6 and 7 are similar views showing the tripping of the levers at the end of the first rendition and at the beginning of the second rendition of the record respectively, and Figs. 8 and 9 are side elevations of the mechanism shown in Fig. 7 viewed in the direction of the arrows 8 and 9 respectively.

TALKING MACHINE.—Eldridge R. Johnson, Merion, Pa., and John C. English, Camden, N. J., assignors to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,165,414.

The main objects of this invention are to provide an improved compact talking machine, including a cabinet, and sound-reproducing means and sound-amplifying means inclosed thereby; to provide an improved talking machine having a cabinet, a record support and actuating mechanism in the cabinet, and an amplifier secured to the outside of the cabinet and projecting within the cabinet over



the record support; to provide a talking machine having a cabinet comprising a base and a cover therefor, a record support, actuating mechanism and sound-reproducing means carried by the base, and amplifying means carried by the cover; to provide a talking machine, including a cabinet having a movable cover and a door or movable closure carried by the cover.

In the accompanying drawings Figure 1 is a fragmentary side elevation, partly in vertical longitudinal section, of an inclosed talking machine constructed in accordance with this invention, showing the parts in operative position; Fig. 2 a similar fragmentary side elevation partly in longitudinal vertical section, but showing the parts in an inoperative position; Fig. 3 a front elevation of the same, showing the cabinet closed, and Fig. 4 a rear elevation of the same.

SOUND BOX FOR TALKING MACHINES.—Minard A. Possons, Cleveland, O., assignor of one-half to Samuel B. Williamson, same place. Patent No. 1,166,254.

One object of the present invention is to provide a needle-supporting means for the sound box which may either be supplemental to the sound box, or as an attachment thereto, whereby the scraping and metallic sound in the needle is very greatly, if not wholly, reduced, and whereby all of the sound waves of the record are more perfectly reproduced.

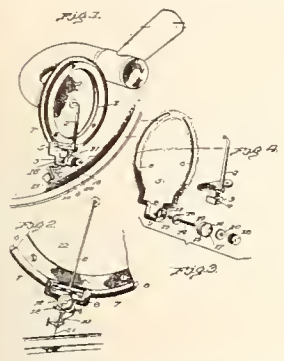
Another object is to so construct the supplemental sound box supporting means that it can be readily attached to the sound boxes now commonly used.

Another object is to provide means for making the reproduction loud or soft, or for modifying the reproduction to any degree between maximum loud and minimum soft, at the will of the operator.

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 78).

A further object is to accomplish the foregoing results by providing a yielding sound box support, which supports the box independently of the diaphragm, and the sound waves are therefore not conveyed to the diaphragm through the box support, as is the case where the weight of the box comes on the diaphragm.

A further object is to combine a particular form of needle with a yielding sound box support which supports the box independently of the diaphragm, and the sound waves are therefore not conveyed to the diaphragm through the box support, as is the case where the weight of the box comes on the diaphragm.

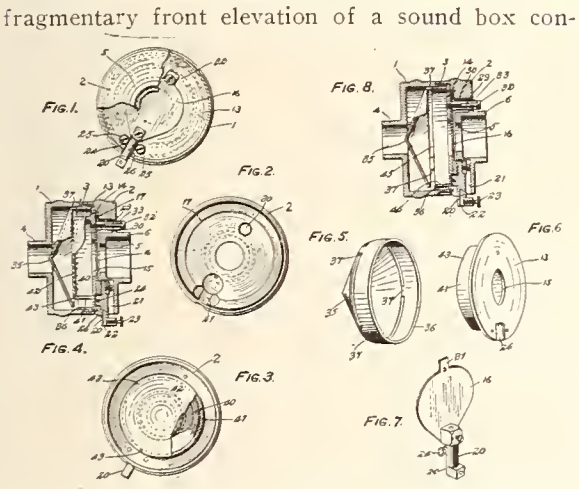


In the accompanying drawings Figure 1 is a perspective view of a sound box with improvement therewith, the same being shown in connection with a section of the record. Fig. 2 is an enlarged edge view of the improvement showing a section of the sound box. Fig. 3 is a perspective view of the improvement showing the parts in their relative separated positions. Fig. 4 is a detached view of an ordinary stylus bar.

Sound Box.—Wilburn N. Dennison, Merchantville Borough, N. J., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,165,395.

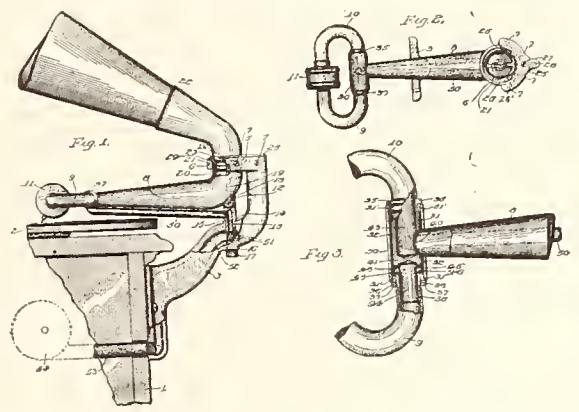
The main objects of this invention are to provide an improved pneumatic sound box; to provide in a pneumatic sound box an improved valve and means for cushioning the same; to provide in a pneumatic sound box improved means for distributing the fluid current, and to provide other improvements as well.

In the accompanying drawings Figure 1 is a fragmentary front elevation of a sound box constructed in accordance with this invention; Fig. 2 is an inside elevation of a portion of the same; Fig. 3 is a fragmentary interior elevation of a portion of the same; Fig. 4 is a fragmentary longitudinal central section of the sound box; Figs. 5, 6 and 7 are perspective views of details of the same, and Fig. 8 is a fragmentary longitudinal central section of a modified form of sound box constructed in accordance with this invention.



Talking Machine.—Wilburn N. Dennison, Merchantville Borough, N. J., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,165,396.

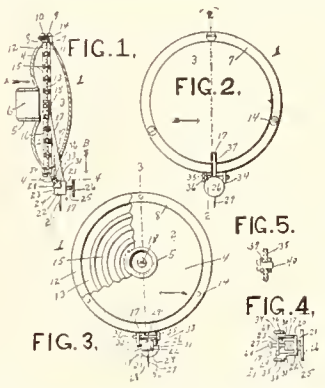
The main objects of this invention are to provide in a pneumatic talking machine improved means for conveying compressed air to the sound box; to provide a pneumatic talking machine of graceful appearance and of compact, strong and durable construction.



In the accompanying drawings Figure 1 is a fragmentary side elevation, partly in vertical section, of a talking machine constructed in accordance with this invention; Fig. 2 a top plan view of a portion of the same, and Fig. 3 an enlarged fragmentary top plan view partially in transverse central section of a portion of the same.

Phonograph Sound Box.—Charles W. Waller, Chicago, Ill. Patent No. 1,166,953.

This invention relates to sound-reproducing boxes for use in connection with sound-recording and reproducing machines, and it is to be understood that the invention is adapted for any purposes for which it is found applicable, and the object thereof is to provide a sound box for phonographs, graphophones or the like, whereby an improved character of sound is produced and in which the vibrations of great frequency will be absorbed or eliminated to remove the objectionable squeaks and similar metallic or foreign sounds.



Another object of the invention is to provide a sound box which shall be simple in construction and inexpensive to manufacture, and in which the diaphragm and most of the stylus arm may be entirely inclosed.

A further object of the invention is to provide a sound box in which the body, stylus head, etc., may be constructed of sheet metal, and the diaphragm of cork, or the like, if desired.

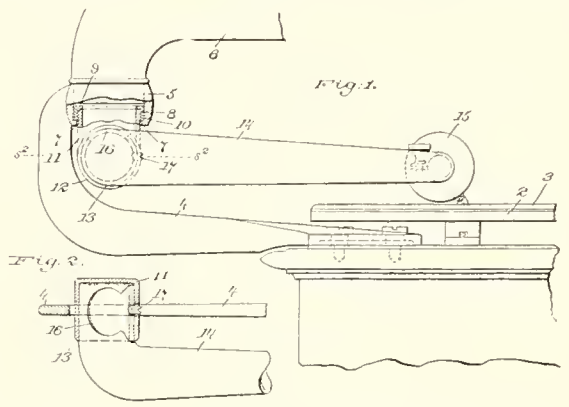
A still further object is to provide a sound box which will prevent the sound waves from escaping into the air from the outside or inoperative side of the diaphragm.

Referring to the drawings, wherein like reference numerals indicate similar parts in the several views, Fig. 1 is a vertical sectional view of a sound box in accordance with this invention, taken on lines 2—2 and 3—3 of Figs. 2 and 3 respectively, looking in the direction of the arrows; Fig. 2 is a front view of Fig. 1; Fig. 3 is a rear view of the same, showing a portion cut away for the purpose of a clearer illustration of the parts, and looking in the direction of arrow A in Fig. 1; Fig. 4 is a top view, partly in section, of the stylus head and support therefor, taken on line 4—4 of Fig. 1 and looking in the direction of arrow B; and Fig. 5 is a vertical sectional view of a section of a modified form of diaphragm.

Talking Machine.—Henry Blake Babson, Chicago, Ill., and Andrew Haug, Caldwell, N. J., assignors to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,168,239.

This invention relates to talking machines and has particular reference to the mounting of the sound-conveying tube connecting the reproducer and horn, this application being a division of application, Serial No. 248,872, filed March 7, 1905.

Ordinarily, the sound-conveying tube or taper arm, as it is generally known, is mounted in a manner to permit free movement of the reproducer in planes parallel and at right angles to the surface of the record, and in providing for such movements of the reproducer various constructions have heretofore been devised, which are objectionable owing to complication and resulting cost of manufacture, accuracy of adjustment required and liability of getting out of order, difficulty of assembling parts, etc.



The present invention is designed to overcome the objections above pointed out, by producing an extremely simple and effective form of mounting, employing a minimum number of parts of simple construction, the assembling or removal of which requires neither skill, experience nor special tools and may be readily accomplished by the average user of a machine of this class.

In the drawings Fig. 1 is a view in side elevation with parts in section, showing the invention applied to a well-known type of talking machine. Fig. 2 is a horizontal sectional view, taken on the line s^2, s^2, of Fig. 1.

INCORPORATED.

The Phonograph Co., Tulsa, Tex., was incorporated, with a capital of $5,000, by J. W. Cunningham, Charles Boetfuhr and H. E. Thomas.

SOME ORDER.

J. D. Flowers, a wealthy lumberman of Dothan, Ala., ordered eight Victrolas within a period of thirty days from the Dahlberg Talking Machine Co., of Montgomery, Ala. Each order called for $50 worth of records. There were two Victrola XVI's and six Victrola XIV's in the order, all of them to be used as Christmas presents to his children. Inlaid in gold or in silver on the top of each were the words, "Christmas, 1915. From Father and Mother."

DO YOUR PART IN SUPPORT OF PRICE MAINTENANCE. GET IN COMMUNICATION WITH YOUR CONGRESSMAN AND SHOW HIM WHY THE STEVENS BILL WILL BE A PROTECTION TO THE PUBLIC AS WELL AS TO LEGITIMATE INDUSTRIES.

SCHOOL CONTEST IN FALL RIVER.

Diamond Disc Machine, Worth $250, Given to Winner in Voting Contest—W. D. Wilmot Gives Unexpected Second and Third Prizes.

(Special to The Talking Machine World.)

FALL RIVER, MASS., February 7.—The Sacred Heart School here won a first prize of a Diamond Disc phonograph, valued at $250, in a voting contest originated by the Evening Herald. The winners rolled up a total of nearly 55,000 votes, which were clipped from the daily issues of the paper. The votes were turned in to W. D. Wilmot, who has the Edison agency here, and after the prize winner was announced Mr. Wilmot made a present of a $100 Diamond Disc phonograph to the Susan H. Wixon School, which finished second, and $50 worth of records to the Samuel Watson School, which finished third, and which already has a phonograph. Mr. Wilmot stated that the second and third prizes, which were entirely unexpected by their recipients, were in the nature of a New Year's present from him to the schools, in recognition of the hard efforts that they had put forth during the contest.

OHIOANS PRAISE EDISON.

Thomas Alva Edison, guest of honor at the annual dinner of the Ohio Society held recently at the Waldorf-Astoria, where Buckeyes discussed preparedness, was lauded for his achievements by all the speakers, including Josephus Daniels, Secretary of the Navy. Charles P. Bruch, president of the society, when a toast was drunk to "the Wizard of Menlo Park," referred to him as the most famous man in the world, a sentiment which was warmly applauded by all present.

CREDIT RATINGS IN AUSTRALIA.

Answering an inquiry as to whether or not there were credit agencies in Australia publishing books containing commercial ratings, the commercial attache of the Department of Commerce at Melbourne reports to the Merchants' Association that no such books exist. The laws of that country are somewhat adverse to such publications and the mercantile agencies do not care to run the risk of possible suits for libel. There are agencies, however, in each leading city which supply individual reports upon firms. The names of some of these agencies and the rates at which they will issue complete reports on the standing of different houses are on file in the office of the association.

The Columbia Phonograph Co. has secured a permit for alterations to its store front at 25 Church street, New Haven, Conn. The changes will cost $200 and will be done by the M. J. Gibbud Co. Work on the alterations will be started immediately.

DO IT NOW! DON'T DELAY PUTTING OFF SEEING YOUR CONGRESSMAN SO THAT HE MAY KNOW THAT HE WILL HAVE YOUR SUPPORT IN THE ADVOCACY OF THE STEVENS BILL. GIVE HIM THE REASONS WHY.

"The LATEST in the World"

Sonora

CLEAR AS A BELL

Do you wish the "last" word in talking machines?

IN the Sonora is built everything that is NEW and practical for securing the best in music, making the SONORA the LAST WORD in talking machine construction anywhere in the world.

Particular attention has been given to the DESIGN of Sonora cabinets, as well as the finishing and general construction. Each cabinet is finished like a high-grade piano, with a brilliancy of appearance that stands out in striking superiority to the average run of phonograph cabinets.

Cabinets are all equipped with the Sonora Tone Modifier, enabling control of tone to fit the size of the room.

Write for the Special Dealers' Proposition for 1916, and secure option on the lucrative profits from your city.

"A Musical Instrument, Not a Mechanical Apparatus."—*Germania Herald,* Milwaukee.

Why the distinction?

Because Thomas A. Edison is the only man who knows the secrets of the Re-Creation of musical sound and these he built into the

New Edison Diamond Disc Phonograph

CHIPPENDALE
Official Laboratory Model

—a "musical instrument" in the highest sense of the term. An instrument that matches the human voice tone for tone —that compares its *Re-Creation* side by side with the *creation* of the voice itself.

Edison Tone Test Recitals are proving to the music lover that the human voice on the Edison *is* human and instrumental tones are Re-Created with equal faithfulness. This means for the Edison dealer an ever increasing demand, led by those who will have nothing short of perfection.

THE TEST OF THE TALKING MACHINE SALESMAN.

Time Is Here When He Is Called Upon to Make Comparisons Based Upon Accurate Mechanical Knowledge of Talking Machine Construction—The Business Sin of Uncertainty—Average Salesman Proves Capable of Meeting the New Situation Successfully.

The problems of talking machine salesmanship are not lessening with the increase of public interest and the investment of capital. On the other hand, the many new machines in the field, some selling at a low figure, are making it increasingly advisable for the salesman with an established house to study the basic principles, the mechanism, the selling points, not only of his machine, but of competing makes as well.

It frequently is necessary for a salesman to answer as directly as possible questions such as, "Why is your motor better than the Blank motor?"—"What real difference does the size of the diaphragm make?"—"Will your motor run as long without winding as the ——— motor?" Not very difficult inquiries, on the surface; but it may be ventured that many an otherwise efficient talking machine salesman would experience some difficulty in answering them fully on the basis of actual knowledge. In point of fact, the possibility has been proved by the experience of careful, want-to-know buyers who investigate several makes before selecting a machine. These buyers find that while most salesmen can demonstrate their own machines effectively, and know reasonably well how the effects are mechanically produced, when it comes to specific statements on one feature or another of construction which may differentiate a $150 machine from a $200 model of the same make, or may distinguish one make from another make, they show hesitancy or cover incomplete knowledge with generalization. And while such generalizations often are excusable on the ground of a desire to avoid comparisons with competing lines, they are perhaps more often due to partial ignorance. When a customer asks directly why one machine is better than another, the salesman may, with perfect business propriety, answer the inquiry as put to him. If he does not feel that his machine is superior to the other in any one particular, it is his privilege to extol another feature to overbalance the comparative weakness; but with a keen customer in hand he will gain no more by evading the question than by gratuitously knocking the rival make.

The Value of Certain Knowledge.

Possibly the worst sin of business ethics that a salesman can commit, and it is a prevalent sin, is destructive confession of a competing product concerning which his knowledge is uncertain. In the constant practice of the art of convincing a customer, salesmen are too apt to overlook the distinction between argument proper and argument plus imagination. If a customer who has listened attentively to a dissertation on faults in a rival machine concerning which he has asked questions, goes then to the competing company and asks for a thorough demonstration, obviously he hears a story quite opposite in some particulars. And with the rival machine before him, his eye assures his intelligence that the first salesman either wilfully misrepresented or displayed ignorance. Whichever it may have been, the customer is likely to look with more favor on the criticized machine, and even if his ultimate decision falls on the first, he will most likely purchase it at a store other than the one where the salesman misrepresented the competing machine.

Until talking machine concerns find it worth while to insist that their salesmen become conversant with at least the main mechanical and technical features of rival makes, that sort of back-and-forth misrepresentation is bound to continue. Instruction in the details of construction of the machine they are to handle is of course essential and is provided for by any concern that seriously enters the selling field, but as yet it appears that even the large organizations have not arranged to have salesmen understand as far as possible the whole field. It is of course practically impossible that a man sell and study simultaneously, but with sufficient inducement a live salesman will go a great deal more deeply into his subject, and will look around a great deal more broadmindedly than many talking machine salesmen apparently are doing to-day.

Making Clever Comparisons.

To be sure, there are brilliant exceptions; many of them. There are salesmen in New York talking machine stores who, without the least intention to knock and without the appearance of knocking, can so comprehensively explain before a customer the principal features of all important machines that when the talk is concluded the customer feels not only ready for and receptive to the arguments favoring the salesman's own machine, but actually prejudiced from a personal standpoint in the salesman's favor. Personality ought not to sell a talking machine that isn't as good as another at the same price, perhaps, but when much may be said on both sides the personal element and the element of broad knowledge will, naturally, help the salesman. A customer cannot help feeling that the salesman who knows the talking machine business thoroughly must also know his personal business well enough to have allied himself with a worth-while house. An accomplished, fact-justified salesman can talk intimately of a dozen competing machines in comparison with his own and give not the slightest impression of destructive criticism. It is the highest art of salesmanship, but it is an art attainable by businesslike determination and the practice of telling the customer what he wants to know.

It may be argued that a small store in a small town cannot be expected to employ salesmen trained in the general knowledge of one line, and particularly in a line so new and so broad as that of the talking machine. The argument is sound, for the most part; but the proprietor of a small store who takes on a line of talking machines can without difficulty secure literature from the manufacturer, and this literature he can offer to his customers together with what information he himself may have time to gather concerning other makes. It is certainly well within the province of his general business, even though he carries a great many different articles, to acquire the broadest possible knowledge in relation to each main line; and certainly there can be nothing but ultimate gain in the acquiring of familiarity with such a popular, moving and comprehensively priced a line as talking machines. The semi-rural customer who knows or thinks he knows pretty much what he wants, and takes exception to claims for the superiority of whatever line a local dealer handles, is ideal material both for the exercise of good salesmanship and for the testing of the advertising results and the general acquired reputation of different machines on the market. The dealer or the dealer's salesman or assistant who demonstrates successfully, either in pushing one line or in explaining the comparative virtues of several, gains the confidence which always brings business, whether on the spot, with his first effort, or the next day, or the next month.

Time for Salesmen to Wake Up.

In such cities as New York or Chicago it goes without saying that the talking machine salesman ought to acquire broad knowledge before attempting the actual diplomatic handling of customers.

E. N. SMITH OPENS NEW STORE.

Parkersburg Music Firm Opens Larger Quarters in Union Truust Building—Featuring the Edison and Aeolian-Vocalion.

(Special to The Talking Machine World.)

PARKERSBURG, W. VA., March 10.—The Smith Music Store recently moved from its lower Market street quarters to a new and larger store in the Union Trust Building, where it is giving special attention to the Edison Diamond Disc and Aeolian-Vocalion machines, for which it has the Parkersburg agency. The new store is beautifully furnished and decorated, the talking machine department being located on the right of the piano department. A large reception booth and two demonstration and sales booths are to be found in this department, a passageway which runs the entire length of the three booths being used to store the supply of records. In front of the booths is a miniature garden, with a porch swing. At one end is a large plate glass mirror, and various colored electric lights are used to help make the talking machine department attractive as well as useful.

A full line of pianos and players is carried by the store, separate demonstration rooms being provided for player demonstrations. A large overhead balcony, capable of seating a large audience, is used for talking machine recitals and tone tests. The proprietor and manager of the store, Edgar N. Smith, has been in the music trade in Parkersburg for the past ten years. He started in business in a store on Fourth street, shortly afterward moving to larger quarters on Market street. His trade eventually grew to such proportions that he was forced to seek a more commodious store, and his latest place was opened last month, an enormous crowd attending the opening. He is a firm believer in the value of publicity, and used a double page spread in the local newspapers to announce the opening of his new store and to call attention to the line of talkers and pianos he carries.

VICTOR ARTISTS IN CONCERT.

Irvin Riesenburger, a Victor dealer at 27 Main St., Flushing, N. Y., recently arranged for the appearance of a number of Victor artists at a concert and dance given for the benefit of St. Michael's Parochial School. This concert was a remarkable success and the hall secured for the purpose was too small to hold the enthusiastic music lovers who were desirous of hearing in person many of the artists whose records they had long admired.

Mr. Riesenburger was congratulated upon the success of the concert, as he had personally arranged every detail and had worked indefatigably to make the program worthy of the rare ability of the Victor artists in attendance.

Among the Victor artists who appeared at the concert were: Albert Campbell, Henry Burr, John Meyer, Arthur Collins, Vess Ossman, Bryan G. Harlan and others.

POPULAR IN CHURCH SERVICES.

(Special to The Talking Machine World.)

NEW LONDON, CONN., March 7.—The First Baptist Church of this city, Rev. Charles R. McNally, minister, is using a Columbia Grafonola in the services every Sunday, and the selections which are rendered are listed on the day's program and are also advertised in the daily newspapers. The names of the Columbia records used are mentioned, together with the artists who recorded them. This novelty in church music has elicited considerable attention from out-of-town visitors, and the members of the congregation seem to be delighted with the music rendered by the Grafonola.

SAN FRANCISCO DEALERS OPPOSE APPROVAL PLAN.

Local Association Passes Resolution Against Trade Evil—Many New Concerns Enter Pacific Coast Trade—Business Continues to Be Unusually Active—Oakland Store Places Large Columbia Order—Shortage of Stock in Some Lines Reported—News of Month.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., March 4.—The rapid growth of the talking machine business on the Pacific Coast continues unchecked, February showing a decided spurt in business nearly everywhere. All the established jobbers or distributing stations give the same report of sales exceeding all records for this time of year, and several concerns new in this territory are opening up with every prospect of success. Scarcity of goods is the general complaint, and it looks as if the increased competition brought about by newcomers in the business would in reality be a great stimulus.

Association Discusses Approval Problem.

The local Talking Machine Dealers' Association met February 9, and the principal matter taken up was a continuation of the previous discussion of goods sent out on approval, the committee appointed for the purpose bringing in a set of resolutions which, with a few minor changes, were put through, declaring the association opposed to the practice of sending records on approval. Many wished to abolish the practice entirely, but some considered that action too drastic. The March meeting will be a banquet, and arrangements are being made for a well attended affair, all the employes of the stores being invited, and a number of interesting speakers will discuss trade topics. It will probably be held on the second Wednesday of March, but the place has not been definitely settled as yet.

Many New Comers Enter Trade.

The establishment of new talking machine concerns is the matter attracting most attention just now. The latest to open here is the Pathephone Shop, under the management of Louis Seely Blachly, formerly of Chicago, at 332 Post street An attractive store has been fitted up and the location, opposite Union Square, should be a good one for the business. The place was opened February 26, and Mr. Blachly is starting an energetic introductory campaign. Arrangements are being made also to conduct a wholesale business, and a good-sized stock of records has been received and will soon be placed in a building on Stockton street. Local people have been getting acquainted with the Pathé for some time, and considerable interest is taken in the new venture.

Another new concern is the Stern Talking Machine Corp., which has just been incorporated, with a capital stock of $50,000, by Ferderick and J. Stern, D. Hadsell, M. Duffy and J. G. Sweet. The company has made all arrangements to handle the Rex talking machine line throughout the Pacific Coast territory. According to present plans, the first store will be on Market street and will be opened about April 1. Other stores will soon be added, and the company will establish a large number of agencies.

Gus Eilers, manager of the talking machine department of the Eilers Music House, has gone East for a visit to several of the manufacturers.

Columbia Co.'s Business Active.

Fred A. Dennison, district manager for the Columbia Graphophone Co., says business is in excellent shape all over his territory, and even better in the South than elsewhere. He spent the early part of the month in Los Angeles, and is now leaving for a visit to Portland, Seattle and Spokane. The northern California district, which was for several years covered by a Sacramento jobber, has been handled since the first of the year direct from the San Francisco office, and Mr. Dennison finds the results much more satisfactory. W. E. Henry, of this office, recently returned from Sacramento. Mr. Dennison finds good talking machine men very scarce on the Coast.

The Dictaphone department is going ahead in great shape. Joseph Johnson is a new man in this department in Oakland, and Miss Mitchell has been added to the local force. An experienced Western man is expected shortly to take general charge of this department.

Kahn Bros. Place Large Order.

Kahn Bros., the Oakland department store, recently placed one of the largest orders ever received by the local Columbia office, and are prepared to get behind this line in a large way. The department is being moved from the third to the ground floor, where a number of rooms are being fitted up in the most modern style. W. C. Henry, son of W. E. Henry, the local manager, is taking charge of this department, having come from Los Angeles for the purpose.

C. J. Schmelzer, of the Schmelzer Arms Co., Victor distributer in Kansas City, was a recent visitor to Sherman, Clay & Co. in this city.

Andrew G. McCarthy, of Sherman, Clay & Co., made a visit to Los Angeles early in February, and is well pleased with the outlook for the Victor line there. For the whole territory, he says he has never seen anything like the way the business is growing.

A. R. Pommer, head of the Pacific Phonograph Co., has been away for a few days on account of illness. At the local headquarters it is stated that they are as far behind in deliveries as they were in December, and can't tell when they will be able to meet the demand.

Kohler & Chase in Oakland.

Kohler & Chase have leased a new location in Oakland, to which they will move in about six weeks, at Fourteenth street near Clay, across the corner from Sherman, Clay & Co. An attractive talking machine department will be fitted up.

J. E. McCracken, the new head of the Edison Shop on Geary street, is too busy to talk these days. He is starting a very strong publicity campaign, and reports business fairly humming.

Shortage of Sonora Stock.

F. B. Travers, manager for the Sonora Phonograph Co., states that he is still badly hampered by lack of stock. He finds retail business very active, and is also doing a good distributive business, but is unable to make the new connections he would like to on account of deliveries. He hopes, however, to have plenty of stock within a couple of months.

Byron Mauzy is still expanding his talking machine department, and has engaged W. C. Hiatt to conduct this part of the business, Charles Mauzy still having general supervision of the talking machine and small goods departments.

A MULTIPLE DISC TALKING MACHINE.

Recent Invention Enables More Than One Disc to Be Played at Same Time.

Playing two or more talking machines at a time as a means for increasing sound volume has often been tried, but generally with poor success. Only a slight difference in the speeds or timing of the two discs results in throwing the melody into a jarring discord, for one record soon plays far ahead of the other, says Popular Mechanics.

To obviate these difficulties, and still secure the larger volume of sound resulting from the use of two or more records at the same time, a Paris inventor has devised a talking machine of a type different from the ordinary kind. All the records are attached to one vertical driving axis, and because of this mechanical connection must necessarily remain in unison throughout the playing of any given piece. Each disc is provided with its own needle and reproducer. All the sound goes into a common horn by means of suitable connecting arms properly pivoted at the large ends. In addition to greater volume, harmony effects may also be secured. This is done by using discs which individually play soprano, alto, bass parts, etc., the whole blending into one medley when run together on the machine.

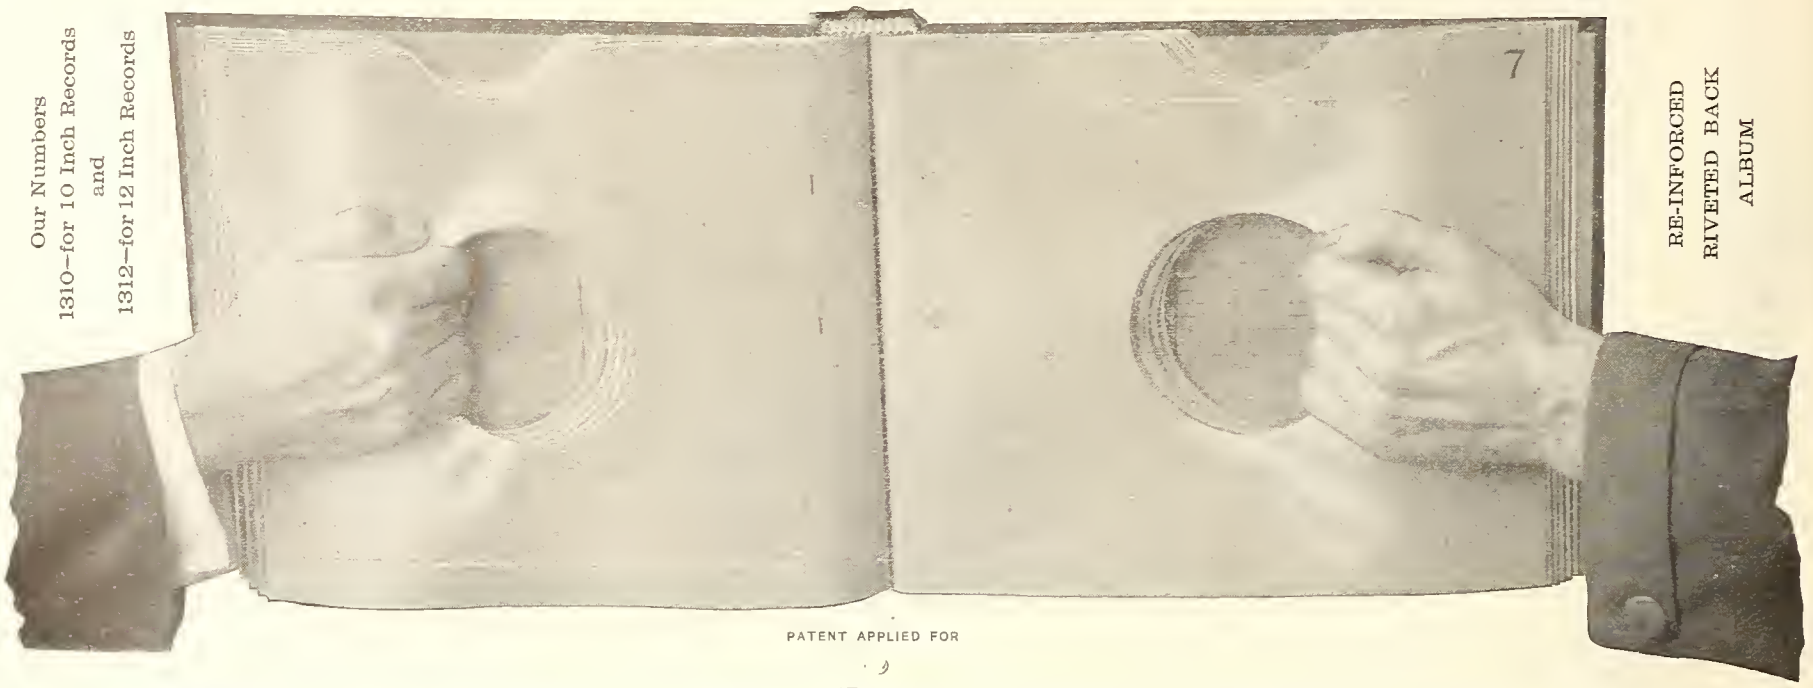
THE PULLING TEST—THE STRENGTH IS THERE

THE STRONGEST ALBUM MADE *AT ANYWHERE NEAR ITS LOW PRICE*



Strength at the Stress and Strain Point. Practically Unbreakable for Regular Usage.

THE WELL-KNOWN "NATIONAL" RECORD ALBUMS ARE ALWAYS THE LEADERS

THE ONLY CONVENIENT AND SAFE WAY TO PROTECT DISC RECORDS

These Albums will pay for themselves in a short time by preserving Records. When full the Albums are flat and even like books. They will fit in a library cabinet or book case, or they will lie flat on one another.

We manufacture disc Record Albums containing 12 pockets to fit the Victrola cabinets Nos. X and XI. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc Records.

For durability, finish and artistic design, our Albums have no equal. They are made in the most substantial manner by skilled workmen. We sell our superb Albums at big discounts to meet competition. Shall we quote prices?

THESE ALBUMS ARE THE BEST FOR VICTOR, COLUMBIA AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

ACTIVITY IN INDIANAPOLIS.

Stewart Talking Machine Co. Makes Increases to Sales Staff—Some Big Deals Closed Recently—Series of Matinee Concerts at the dison Shop Produce Excellent Results—Progress of Pathé Phonograph Shop.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., March 6.—General conditions in the talking machine trade in this city and vicinity are for the most part thoroughly satisfactory. There has naturally been some falling off of business since the holidays, but the fact that a machine shortage still exists has made any drop of business rather welcome temporarily than otherwise. Meanwhile, several of the local companies are making preparations for handling some greatly increased trade in the future.

In the offices of the Stewart Talking Machine Co. new desks and chairs have been added to accommodate the salesmen. The broad rooms in the big six-story building now present a most business-like and attractive appearance. Four years ago the business was conducted in one room and a small warehouse.

The Stewart sales manager is conducting operations for new accounts through a series of separately written letters to the trade. Although more time and money are needed to send such letters, it is believed the personal touch given each one is well worth the investment. Favorable results have thus far attended this extension work, and many sales are now being covered.

Ths Columbia Graphophone Co. has boosted its Indianapolis business by a big contract A. W. Roos, local manager, closed with D. Sommers & Co., one of the largest furniture companies in Indiana.

D. Sommers & Co. are spending a large sum of money installing a beautiful department for the Columbia Grafonola, and it is apparent that the company will go after Columbia business on a big scale.

Mr. Roos spent several days in Chicago recently on official business. He reports that February business was good. In the Dictaphone department advantage is being taken of the local automobile show week to advertise with a well-arranged window display the Indiana automobile concerns and allied business that are using the Dictaphone in their offices.

At the Edison Shop an innovation has been started which promises to be a big drawing card. A series of matinee concerts has been arranged for in which singers of local reputation appear in duets with the Edison records. Mrs. Georgia G. Oakes, a soprano, appeared in the concert February 23, and Glenn O. Frierwood, a baritone, was the singer at the concert March 1. Mrs. Hazel Simmons Bowles, a soprano; Charles McCarthy, a tenor; Mrs. Glenn O. Frierwood, a contralto, and Gaylor Yost, violinist, are the others who are scheduled to appear in the Edison Shop concert hall in the Wednesday afternoon concerts which will be held weekly during March. At the last concert more than three hundred persons attended. Invitation cards announcing the concerts are being mailed out to the public. Arch Olds, manager of the Edison Shop, explained that the appearance of local artists in connection with the Edison records serves to emphasize in a singular manner the human quality of the records and the machine.

At the Pathé Phonograph Store, which was opened recently at 10 East Washington street by Tobin Bros., business is beginning to move along nicely. Three Unit demonstrating booths have been installed and the store presents an attractive appearance. Several out-of-town dealers have been signed up by Tobin Bros. The Tobin Bros. expect to have their store completely fitted up and to be ready to sail in for business by the middle of March. They have already commenced an advertising campaign which promises to bring results.

NEW YORK, MARCH 15, 1916.

THE first month of spring shows a most optimistic spirit regarding business conditions prevailing in talking machine circles throughout the country. The activity in trade which started the closing months of last year has continued uninterruptedly, and, judging from reports reaching The World from various sections, it will quicken as the year grows older.

Not in many years has labor been so universally employed at splendidly remunerative wages as at the present time, and it should be understood that the wage earners of this country are tremendous purchasers of talking machines. At the high wages now prevailing they are able to satisfy their inclinations in various ways, and few instruments appeal to them so strongly for home entertaining purposes as the talking machine.

The demand among the working classes is not emphasized so much in the large establishments as in the smaller stores in the manufacturing sections where dealers have been compelled to keep open at late hours to cater to the demands of working people who desire to purchase talking machines and records.

This is a gratifying condition, and with the excellent prospects which now prevail in this industry it is probable that the output for the present year will exceed that of any year since the industry was launched.

The fundamental policy of price standardization and price stability which have been the dominating influences in the talking machine trade must be jealously guarded and strongly maintained to the end that business advance and business security be insured. Meanwhile there can be no resting on laurels won on the part of manufacturer, distributer or dealer; each has his work cut out for him. Success can only be won by straightforward, sincere application and effort. There must ever be a constant climb toward the top and no resting by the wayside.

THE development of the talking machine industry has been marvelous. There has been an enthusiasm and a go-aheadedness on the part of everyone interested that has been contagious, but it must be remembered that the foundation of its progress has been built upon the price standardization idea which must be supported and adhered to if the business is to continue developing along its present successful lines.

There is good money for the man who enters the talking machine business, but it requires effort, study and concentration to produce the right kind of results. It is necessary in all other trades—why should it not be in the talking machine business? Every business organization—no matter how large or how small—must be resolved to a comprehensive basis in order that success may be attained.

There are many things to learn about talking machines, and the man who "knows it all" will find on careful investigation much which he has left out when considering the business from a narrow viewpoint. This applies not only to a great many dealers, but to salesmanship—one of the most important branches of the industry. A broad knowledge of selling methods is as essential to the proprietor in his work of organization as to the individual salesman in his work of developing business. As competition becomes keener the sales end of the talking machine business becomes vitally important. It entails a more detailed knowledge of the technical end of the business—in other words, the ability to answer successfully every inquiry or argument presented by a prospective purchaser.

THE retail talking machine business has now reached a point where those who have been connected with it since its inception can join with business men in other lines in talking of the "good old days," for the business is changing. Conditions at present are radically different from those that existed even three or four years ago.

The development of the industry has brought forth a demand for a newer, and, one might say, a higher type, of salesmanship. The carrying of the record catalog in the mind and the ability to operate a machine does not permit the modern retailer to rank as a modern salesman. Competition in the talking machine field has reached a point where more or less active knowledge of construction and mechanical operation is required in dealing with the public.

The salesman handling the old-established and standard machines and records has back of him that powerful asset, prestige—a prestige that is held and developed further through the medium of millions of dollars spent annually in advertising. But he must be prepared, should occasion require it, to prove without a doubt that the prestige is deserved; that the value of the machines and records is not wrapped up entirely in advertising.

To the uninitiated one talking machine is much like another, and with the flood of machines now on the market it is necessary that the prospective purchaser have explained to him intelligently the difference between the various models and the reasons for the higher prices. At the present time there are to be found so-called salesmen who are actually unable to tell the customers what the real difference is between a $50 and $200 model of one of the leading makes which warrants the difference in price.

IT is a tribute to the great importance of and the great interest in the talking machine that there exists a desire for more expert knowledge on the part of the public. One prominent New York concern has for years utilized young women for the selling of machines and records, and for the most part their work was satisfactory, for the machines were sold largely by demonstration, and sales women were engaged for their ability to memorize the record lists. Under present-day conditions, however, the company has been compelled to utilize men for the selling of machines and train them adequately for that purpose, while the girls who have been retained have been instructed to confine themselves solely to record sales.

In years past a talking machine buyer for the most part contented himself with an inspection of the general outline of the machine and its playing qualities, and apparently had full confidence in the mechanical construction, and the guarantee of the manufacturer back of it. At present, however, there are many people who have purchased nondescript machines, equipped with weak or noisy motors of cheap construction, sound boxes and metal parts built with price as the first consideration, and as a result have become suspicious. They heard something of one spring, two-spring and three-spring motors, worm gear and cog-drive motors, mica and composition, sound boxes, universal tone-arms and a score of other details. With this imperfect knowledge the purchaser approaches the machine salesman in a "show me" mood, and the latter is called upon to display some real knowledge of the machine he is selling.

Tone is something that can be demonstrated to the satisfaction

of the purchaser, that may be explained and praised much as the salesman wishes, for to the average person—tone in a talking machine means that it sounds pleasantly and that there is an intangible something that makes it so. Metal and wood construction must be explained by facts and hence the demand for the salesman that "knows his business."

THAT talking machine men are realizing the dignity and importance of the business is evident from the fact that every week we are advised of some progressive firm having its warerooms rearranged, and also in every instance the fact is mentioned that separate rooms have been arranged and specially decorated for the purpose of better displaying the various lines of instruments handled. Even in the smaller towns dealers realize that the best results are obtained in a business way when a machine can be tested, and its good points brought out when it is displayed in a separate room away from general stock.

The sound-proof showroom is not exactly an innovation, but rather an evolution following the growing tendency to place the talking machine business on a higher plane rather than looking upon it as a purely commercial proposition. Yet if we consider the matter in a purely commercial light the benefit accruing from the adoption of most improved means for displaying talking machines and bringing their merits to the attention of the buying public through the medium of attractively arranged display rooms will result in larger sales and sufficiently increased profits to pay the cost in a short time of the installation of the most modern wareroom furnishings.

IN a statement issued recently, Louis F. Geissler, general manager of the Victor Talking Machine Co., Camden, N. J., gives some figures which tell of the enormous business transacted by that corporation during 1915. He said:

"We are thankful for an increase in our business over any preceding year of 38½ per cent., and that increase, on an already large business, is indeed remarkable. Our investments during 1915 in factory extensions, buildings and machinery, amounted to $2,650,000, and those contemplated for 1916 will total a very large sum. Our capacity is being steadily and healthfully increased. However, it is our purpose, by advertising and other energetic methods, to keep the demand as far ahead of the supply in the future as has been the case in the past. Upon thought, dealers must agree that however annoying this condition has been, it is a most desirable one and we shall be fortunate to perpetuate it."

After complimenting the dealers on the energetic presentation of their wares, he remarked: "The business outlook for 1916 is glowing with promise; our country was never before, and, on account of world conditions, may never again be in so prosperous a money-making condition for the merchant as it will be during this year." Optimism that is built on a sound foundation.

THE Stevens bill has won the support of progressive manufacturers throughout the country who contend that the maintenance of the retail price is a necessary and legitimate business principle, that it means a benefit to all and works injury to none. The manufacturer who produces a standard article and gives it a trade-mark, or trade name, who spends his money to make that name mean quality in the public mind, should have the right to be protected after he has made that individual name valuable, for it is his property and his alone.

It is a symbol to the public of a certain quality of goods, and the character of the concern that makes them. Any practice therefore that injures the article in the public mind and damages the reputation of the firm is as unfair as the theft of a trade-mark itself. The manufacturer of such an article must put real value into his product; he must make the public want it. He individualizes it and gives it a name to be known by. He must establish a general market, advertise the merits and prices of his goods; he must convince the public that it is worth the price asked, and persuade the people to go to a store and pay the price.

But after the value and quality of this article has been emphasized publicly, and a demand created from the public, the price cutter steps in and gets busy. He takes this widely known article and reduces its price, not for the purpose of selling more of them, but rather merely to attract customers on the strength of a bargain price so that he may sell other products at a greater profit than the standard price goods.

Then other dealers are forced to meet this cut price, hence price demoralization. As Congressman M. Clyde Kelly, of Pennsylvania, said some time since: "Such unfair competition is as bad as outright theft of trade-marks and brands and should be severely frowned upon by the law. It is a case of stealing a man's good name, which, as Shakespeare said, is worse than stealing his purse. The manufacturer's name must mean value or he cannot build a permanently paying business. That value is an asset as valuable as his plant and merchandise. I contend that he has a right to ask and to receive protection from those who would rob him of his value. That protection can only come through the right to maintain a uniform selling price to the buyers of his product."

Speaking further upon how uniform selling prices will benefit the retailer, he said: "Price maintenance does not mean less competition between retailers, it means less unfair competition. There is a competition in the quality of goods and in service just as much as in price. Retailers who sell the same goods from the same factories should not compete in prices. The competition should be between goods of the same class made in other factories.

"That puts the competition on a fair basis, on price, quality and service instead of solely on ability to stand losses until a competitor is driven out of business. It gives the retailer the reward of enterprise, efficiency and honesty, instead of forcing him to descend to the trickery of trade pirates or go out of business."

PEARSALL VICTOR SERVICE.

"BUY your Victor goods in New York" for this city is the centre of the universe. Everything that can work to our advantage is offered by New York. New York is the home of Pearsall Service, located conveniently for shipping and co-operation.

Use logic in your buying. It will help you to secure either machines or records—promptly and quickly. Pearsall Service spells two words—quickness and completeness.

Silas E. Pearsall Co.

18 West 46th St., near 5th Ave. New York, N. Y.

PLAIN GLASS VS. FROSTED GLASS.

Plain Glass in Talking Machine Demonstration Rooms Seems to Be More Satisfactory Than Frosted—How a Dealer Lost a Sale.

Are your soundproof rooms enclosed with plain transparent glass or with a frosted or translucent glass? A dealer said that only once did he find the plain glass a disadvantage. On that occasion a "prospect" had been made a customer for an outfit and had got up from the chair he was sitting on to reach into his pocket for some money. As he stood up he turned around and by doing so brought into his range of vision another customer who had just entered another room. The latter proved to be a friend that he was pleased and surprised to see. He went to him and began chatting. The anxious salesman could see that the conversation was of the line in question and felt and saw, though he could not hear, that the second comer was advising the first one to alter his decision. Such proved to be the case, for he came and announced that he had changed his mind about buying, nor could the salesman close with him. He had decided to buy a second-hand instrument. The man who related the i cident stated that it was the only occasion he had ever regretted the plain glass. Otherwise the plain glass was an advantage. A glance shows when the rooms are occupied. The plain glass also makes the pilfering of records more difficult. Cases have been known where a customer has come in with a grip for the purpose of carrying away stolen records. With one clerk waiting on several customers there is less a feeling of the customer being left alone.

BRING ON YOUR BASEBALL TEAMS.

In view of the spring training at the baseball headquarters in the South, it will interest the trade to know that the Sonora employes in New York are going to be on the diamond this summer with a team that will be "second" only to the Boston Red Sox. If there are any phonograph houses which aspire for baseball honors they can communicate with this team.

DANCE FLOOR HELPS TRADE.

How L. L. Haight Helps to Interest Customers in His Victrola and Grafonola Lines.

(Special to The Talking Machine World.)

McGREGOR, IA., March 1.—One of the most enterprising merchants of this eity is Lorin L. Haight, who has built up a splendid Victrola and

L. L. Haight's Dancing Floor.

Grafonola business in this section. The department is very attractively fitted up, and an excellent line of instruments is displayed. The latest evidence of his enterprise is the addition of a new dance floor, which has proved a tremendous attraction to purchasers as well as a splendid advertisement for his house. The photograph of this new dance floor is shown herewith.

REMOVE TO LARGER QUARTERS.

The Standard Gramaphone Appliance Co., manufacturer of "Standard" record cleaners and other successful talking machine accessories, has moved from 173 Lafayette street to 237 Lafayette street, New York. In its new home the company occupies far more space than it did in the past, and these additional facilities will enable it to take care of its fast-increasing business.

FORMAL OPENING IN DALLAS, TEX.

Western Automatic Music Co. Features Edison and Columbia Lines in New Store.

(Special to The Talking Machine World.)

DALLAS, TEX., March 8.—The Western Automatic Music Co., whose occupancy of its new three-story building at 1604 Elm street, this city, was reported in The World last month, held the formal opening of the new salesrooms on February 29, and attracted the attention of a large number of local music lovers with an elaborate program of classic and popular musie rendered by the Wurlitzer Unit Orchestra and the Edison and Columbia phonographs. The program was continuous from 4 to 10.30 p. m.

One of the features of the new building is the handsome quarters devoted to the display and sale of the Edison Diamond Disc phonographs and the Columbia graphophones. Complete lines of machines and records of both makes are handled, the entire first floor being given over to that branch of the business. Four demonstrating booths are provided, they being finished in pearl gray with artistic inlay. J. C. Brown is manager of the talking machine department.

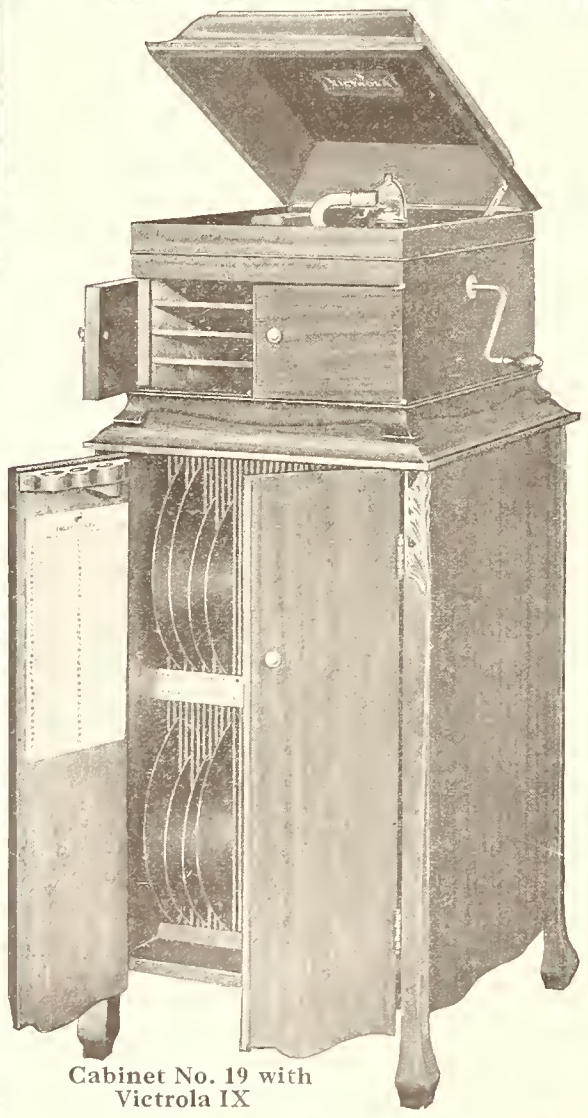
TO CONTINUE ACKERMAN STORE.

Estate of Late Scranton Dealer Announces Appointment of New Manager.

(Special to The Talking Machine World.)

SCRANTON, PA., March 6.—The G. L. Ackerman Estate has announced that the talking machine business of the late G. L. Ackerman, conducted at 537 Linder street under the name of Ackerman & Co., will be continued under the management of Alfred V. Williams, an experienced man and formerly manager of the talking machine department of Stoehr & Fister from the time of its establishment.

John C. Davis, formerly secretary of the Bureau of Health, succeeds Mr. Williams as head of the Stoehr & Fister department.



Cabinet No. 19 with Victrola IX

Originators of the Felt-Lined Cabinet
Avoid Inferior Imitations.

Two Big Sellers
of the
Big Selling Line

The two SALTER FELT-LINED Cabinets that lead today and have always been our biggest sellers are the two styles shown here.

The Victor Victrola IX

in combination with **Salter Cabinet No. 19** is always especially attractive to the buyer. In design and finish the cabinet is in perfect harmony with the machine. The felt-lined compartments afford ample protection for records. Built-up top holds machine firmly in place.

The Columbia "Favorite"

is handsomely supplemented by the **Salter Cabinet No. 112,** made especially for this machine, and is a perfect match in every way. Built-up top holds machine firmly in place.

Columbia Graphophone Company
Woolworth Building, New York

COLUMBIA EXPERT IN TORONTO.

Mechanical Specialist Placed at Service of Dealers—Offers Valuable Advice—New Departments Opened Recently—Canadians Attend Edison Convention in New York.

(Special to The Talking Machine World.)

TORONTO, ONT., March 6.—The factory expert whose services were placed at the disposal of Columbia dealers in Ontario by the Music Supply Co., of this city, is meeting with a cordial reception. Many dealers have written his firm telling of the service it has been to them to have an expert go over their stock and to show the dealers or their assistants how to regulate or make adjustments.

To feature the higher grade types of Columbia Grafonolas to Toronto people, Gourlay, Winter & Leeming, Ltd., held a "Columbia Week." The window, specially treated with floral adornment, was devoted to the Columbia line exclusively.

Whaley & Royce Co., Ltd., which has the exclusive Canadian agency for Truetone needles, reports some nice business in that direction.

The Cecilian Co. in its retail warerooms is featuring the Sonora with splendid results.

I. Montagnes & Co., of Toronto, musical goods importers and Canadian phonograph distributers, have again leased larger premises on the third floor of the same building, where they are now located, running from Yonge street through to Victoria street. They are arranging offices, showrooms and stockroom. Mr. Montagnes and Mr. Van Gilder are both pleased with results in Sonora phonograph business, which has been far in excess of their most liberal calculations.

R. P. Newbigging, head of the Hamilton, Ont., cabinet firm bearing his name, was a recent visitor to New York.

A complete Victrola department has been installed in the new music firm of A. Carey & Sons, 64 King street, West Hamilton, Ont., under the management of Bert Carey, who had been connected with the R. S. Williams & Sons Co., Ltd.

Arthur Mandy, manager of the Phonograph Shop, Ltd., Ottawa, recently had a successful window display featuring the Edison Blue Amberol record of "Little Gray Mother."

Operaphone records to retail at fifty cents are now being featured by the Canadian Phonograph Co. of Toronto, which has arranged for the wholesaling of these records in Canada.

The Nordheimer Piano and Music Co., Ltd., finds its Saturday afternoon Victrola recitals productive of splendid results. Each week sees the appearance of a local celebrity in addition to exploiting the many high-class artists of Victor fame.

Recent Canadian visitors to the annual convention of Edison jobbers, held in New York City at the Hotel Knickerbocker, included H. G. Stanton and G. Petch, of the R. S. Williams & Sons Co., Ltd., Toronto, Canadian Edison jobbers. At this conference Mr. Stanton was unanimously reelected secretary of the Edison Disc Jobbers' Association.

The Arinola Manufacturing Co. of Canada, Ltd., has been incorporated in Toronto with the intention, we understand, of manufacturing in Canada the Arinola machine in its complete form.

Heintzman & Co., Ltd., are featuring with exceptional success Saturday afternoon Victrola recitals, in which the public seems to be intensely interested.

The Toy Products Co., of Canada, Toronto, has placed on the market a child's talking machine, "made in Canada."

JAMES BRATHERTON AS MANAGER.

(Special to The Talking Machine World.)

DETROIT, MICH., March 6.—James Bratherton, formerly with the Max Strasburg Co., this city, has been appointed manager of the wholesale and retail talking business of the Starr Piano Co. here. Mr. Bratherton has had wide experience in all branches of the trade and was for several years connected with the talking machine department of the John Wanamaker Co. in New York.

MME. FITZUI SIGNS WITH PATHE.

Famous Operatic Soprano, Lately Heard in "Goyescas," to Sing Exclusively for the Pathephone—News Creates Great Interest.

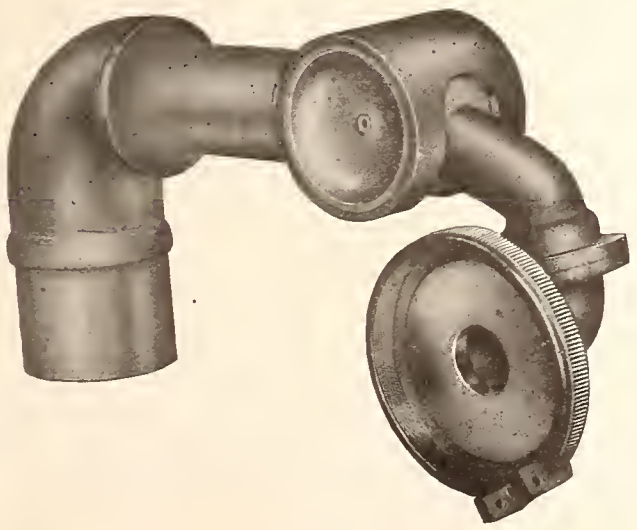
The Pathé Frères Phonograph Co., New York, closed another important artist contract recently when it completed arrangements whereby Mme.

Mme. Anna Fitzui.

Anna Fitzui, the popular operatic soprano, will record exclusively for the Pathé library.

In addition to her previous successes, Mme. Fitzui won the hearty praise of the critics recently when she created the role of "Rosario" in the premiere performance of the Spanish opera, "Goyescas," at the Metropolitan Opera House.

Anna Case, exclusive Edison artist, is sunning down on the beaches of St. Augustine and Palm Beach, Fla., after spending ten days in Bermuda recuperating from an operation for appendicitis.



Doehler Die Castings

are particularly adapted to the economical production of TONE ARMS and SOUND BOXES for Talking Machines.

Cast from permanent steel mould, no machining operation is necessary—all parts delivered ready for plating or enameling and assembling.

DOEHLER DIE CASTINGS are used with entire satisfaction by some of the most widely known makers of Talking Machines because "DOEHLER" product is economical, and "DOEHLER" service is dependable.

Send blue print or sample part for estimate.

DOEHLER DIE-CASTING CO.
BROOKLYN. N.Y.
TOLEDO. OHIO.

Producers of Die Castings in Aluminum, Zinc, Tin, and Lead Alloys
Also manufacturers of Die-Cast Babbitt Bearings and Babbitt-Lined Bronze Bearings

Any Artist Can Prove

ALICE VERLET
the Belgian coloratura soprano, testing Edison's Re-Creation of her brilliant tones.

Edison's Re-Creation of the voice of Anna Case or Arthur Middleton, of the Metropolitan, Thomas Chalmers, of the Boston Opera Company, Alice Verlet, the wonderful Belgian coloratura, or any other artist, is each as indistinguishable from the human original as one drop of water from another.

Noted critics of the leading musical centers of the country say so in their own words, in the columns of their own papers.

They recognize the distinct individuality, the oneness of the

New Edison Diamond Disc Phonograph

THOMAS CHALMERS
of the Boston Opera Company, matching his living voice with Edison's Re-Creation of his virile baritone.

We have the evidence in black and white. For instance, of a recent Tone Test Recital, the New Haven (Conn.) *Register* said: "Many in the audience leaned forward to catch some difference in the voices. But there was none to catch. Miss Miller's own beautiful voice, in all its glowing, pulsing variations, was being matched tone for tone by the instrument. Edison had scored another triumph, it was the idealization of this great man's genius."

Critics of Boston, Philadelphia, New York, Cleveland, Milwaukee, St. Louis, Omaha, Denver, Toronto, San Francisco, Los Angeles, and many other cities say the same, only in different words.

Edison's Re-Creation

Neither artist, instrument nor record are especially selected for tone test recitals. Instruments and records are taken from stock and the artists are the same as are being heard almost every day on the operatic or concert stage. The secret is not in special combinations.

The secret is Thomas A. Edison's and his alone, wrung from nature by countless experiments and unstinted expenditure. To duplicate Re-Creation would require another Edison.

It required an Edison to wipe out the stigma that attached to "mechanical music" and produce in its place his

ANNA CASE
of the Metropolitan, proving the perfection of Edison's Re-Creation of her glorious voice.

New Art— Music Re-Creation

The Instrument of Re-Creation, the New Edison Diamond Disc Phonograph offers you an opportunity you never had before the advent of the New Edison—to deal in a sound reproducing instrument that meets all the demands of the most cultured music lover.

ARTHUR MIDDLETON
of the Metropolitan, comparing his thrilling basso with Edison's Re-Creation of it.

We will consider a few more high class dealers. Address

THOMAS A. EDISON, INC., 279 Lakeside Ave., Orange, N. J.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., March 8.—Rate cutting is one of the things that the leading talking machine houses will not stand for, and because of rumors that have reached the home offices there have been investigations set on foot, with the result that in some cases dealers have been further denied the privileges of representing this or that concern. An instance was called to the attention of The World correspondent a few days ago. Here was a man with an upstairs location on one of the leading thoroughfares who had been doing a good business and had been looking forward to even more prosperous days. But it got noised around that he had not been living up strictly to his contract. It is understood that the charges were found to be true and he was further disqualified from being a dealer for this particular company. In another case a dealer was suspended for a period of time, but he is again in good standing.

Too Many Inactive Dealers.

Quite apart from the rate cutting habit and its demoralizing effect on the talking machine business it is felt in some quarters that there are altogether too many inactive dealers. These are not necessarily confined to the small, isolated places, but are to be found in even as large a city as Boston. These dealers are satisfied to do what to them is a reasonable business, but they do not push for business nor do they exhibit that enthusiasm that is an essential factor in building up a large establishment. These dealers do not watch their stock, either of machines or records, though this defect is more conspicuous along the latter lines. The result is that it too frequently happens that when a certain record is called for the dealer has not got it. Now, such companies as the Columbia, Edison and Victor want only on their lists dealers who are going to show enough enterprise to keep full lists of records, so that always they will be able to supply the demand. It is not impossible, therefore, that as time goes on there will be a gradual elimination of dealers and before a contract is made a prospective representative must give satisfactory assurance that he is going into the talking machine business for all it is worth and will push for new prospects by every legiti mate means.

Manager Arthur Erisman, of the Columbia Graphophone Co., when asked about the foregoing and could he substantiate the arguments, said most emphatically that he could. He added that, so far as price cutting is concerned, there is not much trouble with the large dealers, for they are disposed to abide by the strict rules of legitimate business. The process of elimination, he said, was largely in order that good dealers might become better dealers. The attitude maintained by the Columbia, he says, is in line with a gigantic campaign which the company is now entering upon; and to properly advertise itself the company must have the heartiest co-operation of all its dealers.

Big Increase in Columbia Business.

Mr. Erisman was pleased, in discussing conditions, to state that the business of his headquarters ran 113 per cent. in advance of the February business of a year ago. His office, now on the second floor of the Tremont street headquarters, is admirably adapted to his needs, far more so than the rather cramped quarters on the ground floor. There is a flood of daylight. The Dictaphone department is now located on the top floor of the building and the business is increasing rapidly.

Increase in Edison Diamond Disc Trade.

Manager F. H. Silliman, of the Pardee-Ellenberger Co., is highly optimistic these days over the growth of the Edison Diamond Disc business in his territory. Mr. Silliman was over at the jobbers' convention at Orange, N. J., recently. W. O. Pardee, head of the Pardee-Ellenberger Co., was in town a few days ago and expressed himself as well pleased over the prospects for the current year.

W. J. Fitzgerald Visits the South.

W. J. Fitzgerald, the wholesale manager of the Eastern Talking Machine Co., has been taking a much needed rest, and when he returned a few days ago from a fortnight's trip he looked in the best shape possible. He divided his time between Washington, Atlanta, Ga.; Jacksonville and St. Augustine, Fla.

Increased Facilities at Steinert's.

Manager Royer, of the Arch street quarters of the M. Steinert & Sons Co., one of the large Victor distributing centers of the city, makes the most satisfactory report of business that he has offered in a long time. The business is growing at a surprising rate, and the facilities for meeting the demands of patrons are now as complete as it is possible to make them. By a rearrangement of the floor much more space is now available and a passenger elevator to the record room and the offices on the second floor fills a long-felt want and is generously patronized.

To Feature the Pathé Line.

The Brooks Piano Co., which operates a large retail piano room in the Continental building at the corner of Washington and Boylston streets, has become a Boston dealer for the Pathé line, and in a few days a special department devoted to demonstrating this machine will be ready for the public. William G. Brooks, son of the head of the firm, is an enthusiast over the Pathé Frères phonograph, and he will devote much of his time to exploiting its advantages.

Exhibiting the Columbia Electric.

By way of celebrating the advent of the new electrically-controlled Columbia graphophones Manager Arthur Erisman made an arrangement lately with the Edison Electric Illuminating Co. by which a large display of machines was made in the windows of the Edison Co. in Boylston street. Six different types of Columbia machines were shown, and the exhibit attracted considerable attention. But it was not Boston people alone who had the privilege of seeing such an exhibit, as Manager Erisman similarly had made arrangements for other exhibits in sixteen other stores throughout a large local area, so that by the time the period of exhibition had expired thousands of persons got a new idea of the value of operating a Columbia machine through the medium of electricity.

Miss Pearl Perrett has been added to the staff of the Columbia Graphophone Co. She is devoting her time to demonstrating Columbia outfits outside of the Tremont street establishment. Miss Perrett is a daughter of R. L. Perrett, a former manager of the Providence establishment of the Columbia Co.

Report Large Victor Trade.

The February business at the Victor headquarters at the Boylston street store of the Henry F. Miller Co. made a very creditable showing, and Manager Warren Batchelder is well pleased over the spring prospects. The line of records is a very complete one.

S. M. Revness, who as the representative of the Victor Co., has been in Boston for four or five weeks has shaken the dust of the Hub from off his feet and has hied himself to Worcester, where he will remain for a time

Everybody is happy in the Victor department of the Oliver Ditson Co., where Manager Henry A. Winkelman puts in six busy days each week. Mr. Winkelman was one of the seventy-five men who enjoyed the dinner the other night of the Get-Together Club, made up of the members of the Oliver Ditson Co.

MORE is heard today regarding "quality" of phonograph music than ever before, and the Edison Diamond Disc Phonograph started this general conversation by reason of its admitted superiority. The Edison phonograph is also taken as the basis of ALL phonograph comparison and its tone is admitted to be best.

Aside from its tonal perfection, the artisticness of the cabinet designs enables the Edison Diamond Disc phonograph to harmonize with the most expensive interior furnishings of any home. We are "Exclusively Edison."

THE PARDEE-ELLENBERGER CO., Inc.

BOSTON, MASS. NEW HAVEN, CONN.

"E. D. D. P."

Window Displays Get Results.

In large measure due to artistic window displays of Edison and Columbia outfits, the business of the talking machine department of C. D. Osgood & Co., housefurnishers, has shown a marked increase lately. This department is most ably managed by Chester J. Sylvester, who is one of the most indefatigable workers in the business.

G. L. Parker Rearranges Department.

The talking machine department of George Lincoln Parker, in the Colonial Building, has been entirely rearranged so that now the Edison and Victor outfits are exhibited and demonstrated to far better advantage than formerly. Business continues good with the house.

Howard Shartle, of the Victor forces, has been in town interesting Victor dealers in the record accounting system, which already has been adopted by several of the local dealers, and by which it is possible to know on the instant how a house stands on records. Mr. Shartle was in Boston a year or more ago on the same errand.

Edward Sherman Resigns.

Edward Sherman has resigned from Chickering & Sons' house, where for a time he was connected with the Victor and Edison departments of the business. Mr. Sherman has decided to go into business with his father in another city.

Afternoon Teas Secure Results.

The afternoon teas inaugurated at the C. C. Harvey Co.'s Boylston street establishment are proving quite an innovation, and there are one or two women, good customers, too, who may be seen there quite regularly. Manager Francis T. White has an attractive young woman to dispense refreshments, in which the handsomest china and the most unique silver play a conspicuous and effective part.

Secures the Edison Diamond Disc Line.

Arthur W. Chamberlain, manager of the talking machine department of the Iver Johnson Sporting Goods Co., at 155 Washington street, has added the Edison Diamond Disc machines to his large equipment. He is about to rearrange the fourth floor, which is entirely given over to talking machines, so that there may be several more demonstration booths.

Two visitors to the local trade lately have been F. K. Dolbeer, the credit manager for the Victor Co., and George D. Ornstein, sales manager for the same concern.

NEW EDISON "AMBEROL" DEALERS.

Thomas A. Edison, Inc., Orange, N. J., recently issued a list of some of the new "Amberol" dealers who have taken on the Edison line during the past few weeks. This list reads as follows: Amberol line only—Austin's Pharmacy, Tupper Lake, N. Y.; Grenfell Milling & Elevator Co., Summerberry, Sask., Canada; W. R. Rea, Watson, Sask., Canada; W. M. Thomas, Bowden, N. D.; E. T. Hardham, Oak River, Man., Canada; H. B. Wiebe, Altoona, Man., Canada; W. J. Van Doren, Goodwater, Sask., Canada. Amberola and disc—Kingsport Stores, Inc., Kingsport, Tenn.; E. B. Pohle, Dexter, Ia.; Stephen's Art Store, Quaker City, O.; Veith & Dorn, West New York, N. J.; Smith's Music Store, Parkersburg, W. Va; The Edison Shop, Pardee-Ellenberger, New Haven, Conn.; Elmer Johnston, Baraboo, Wis.

TALKER NEEDLES SENT BY AERO.

A dispatch from the official press representative with the army attempting to relieve the British forces surrounded at Kut-el-Amara to the London papers says:

"Cheery messages come from General Townshend (commanding the forces in Kut-el-Amara). He is sowing vegetable seeds and has asked for talking machine needles. These and other light requirements have been dropped into his camp from an aeroplane. He reports that he has sufficient supplies for a long period."

If we have to steal the steel for Bagshaw Needles

Never in our history, since 1870, have steel conditions been in such shape. We have an immense stock, but Bagshaw needles are made from a steel that is made on our special order exclusively for needles and, notwithstanding our big orders, it is difficult to get. We make millions of needles a month, and are doing our utmost to maintain shipping schedules, but the future presents problems of a serious nature.

Better look over your stocks and book your orders this month.

AN ARTISTIC DEPARTMENT

Is That Devoted to the Pathé Phonograph Line in the Lowry & Goebel Co. Store in Cincinnati—Homelike Atmosphere Prevails.

(Special to The Talking Machine World.)

CINCINNATI, O., March 6.—One of the most attractive talking machine departments in the local trade is the Pathé department in the Lowry & Goebel Co.'s store. This concern, which handles the Pathé line exclusively, is one of the leading furniture houses in this section of the State and has achieved the distinction of catering to a high-grade clientele which appreciates quality in merchandise as the paramount consideration.

Lowry & Goebel Co.'s Pathé Department.

There are four booths in the Pathé department, all of which are furnished artistically and comfortably. The color scheme of the booths is blue, lavender and antique ivory, and the beautiful design on the hand-blocked cretonnes is carried out in the other furnishings.

As a matter of fact, the Lowry & Goebel Pathé department is considered one of the finest "talker" warerooms in this State, and the success which the company has achieved in this department may be attributed in a measure to the home-like, cheerful atmosphere of its booths.

VICTROLA FOR GREAT OUTFIELDER.

(Special to The Talking Machine World.)

WACO, TEX., March 7.—The Victrola department at the Sanger Bros. store was honored recently by a visit from Tris Speaker, a member of the world's champion "Boston Red Sox," and considered the greatest outfielder on the "diamond." Mr. Speaker is a native of Texas, and visited the Sanger Victrola department to select a Victrola for his mother at Hubbard, Tex. He chose a beautiful mahogany, gold-trimmed instrument, hand-carved, Louis XV. design, for which he gave a check for $300. While making out this check Mr. Speaker stated that he could have secured another machine in the East, but he liked the Victrola so well and was so heartily in accord with the business methods of the Victor Talking Machine Co. and Sanger Bros., that he preferred to pay $300 for a Victrola.

REPORTS AN INCREASED DEMAND.

"There has been a great demand for Emerson phonographs from dealers throughout the country," said Henry R. Stern, of the Jos. W. Stern & Co. Sales Corp., New York, distributer of these products. "Owing to the vastly increased production at the Emerson factory, with a consequent saving in cost, we have been able to reduce the wholesale price of these phonographs so that the dealer now has a good margin of profit to work on."

TIMELY RECORD PUBLICITY.

Special Letter Regarding St. Patrick's Day Music Sent to Machine Owners—An Active New Manager in Person of W. H. Haile.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., March 6.—"As Long as the Shamrock Grows Green" is the first phrase of a unique circular letter sent out by the Schmelzer Arms Co. about three weeks before St. Patrick's Day. Believing that if other trades have special days when they may play up on some feature, Warren H. Haile, manager of the retail department of that store, had a large number of circulars printed telling of the Irish records in stock, and mailed out to over 1,000 machine owners on the mailing list. This was not in the form of a catalog, but was blocked as if it were an individual letter.

The body of the circular contains a short synopsis of the origin of Irish music, along with a list of the names of ten or twelve of the more popular Irish songs. An urgent invitation to call and hear these records or to have them sent out is embodied in the last paragraph of the letter. Mr. Haile is a new man with the Schmelzer people, having come to the Kansas City office from South Bend, Ind., where he was connected with George H. Wheelock & Co.

CASH PLENTIFUL IN MILWAUKEE.

Number of Sales Made on Cash Basis Steadily Increasing in that City—Shortage of Machines Still Felt Keenly—New Companies Enter Field—L. C. Parker as a Speaker—Larger Shipments Being Received.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 8.—The talking machine business in Milwaukee and all over Wisconsin during the month of February showed continued activity, and a new high record for the present month is anticipated. General business has shown decided improvement, money is easier, and people are inclined to buy more freely. Milwaukee dealers say that the percentage of cash sales is increasing and that collections are decidedly better. James A. Fetterly, secretary of the retail division of the Merchants and Manufacturers' Association, says that collections in most lines of retail activity are above the normal point and that people are not only paying up their old accounts, but are buying much more freely. Judging from the orders which jobbers are receiving from dealers about the State, business with the average retailer is exceptionally active.

While Milwaukee jobbers in all the leading lines of machines are receiving larger shipments from their factories, the shortage of machines is still acute. Dealers are all being allotted a share of the machines which are arriving, but jobbers say that they could dispose of more than double the stock which they are receiving. Dealers are not only looking for machines to satisfy the present demands of their customers, but they are placing orders for stock intended for their summer and fall trade, for they realize that it is going to be a difficult proposition to secure enough machines at that time. Plenty of records are being received, and the new March records of the different companies are taking unusually well with the trade.

"Business is unusually good and we are unable to get enough Victrolas to meet the demands of our trade," said John H. Becker, manager of the Victrola and piano departments of Edward Schuster & Co. "The outlook is bright, considering the general improvement in all lines of business. February records sold very well, and the new March selections are creating much interest." Miss Adele Nero, assistant to Mr. Becker, has developed into one of the most successful young talking machine sales ladies in Milwaukee and has a fine sales record to her credit.

L. C. Parker, manager of the Victrola department of Gimbel Bros.' store, who has been developing quite a reputation as a speaker, especially along the lines of salesmanship, was one of the leading speakers on this subject at a recent meeting of the Alexander Hamilton Club, held at the Hotel Pfister, Mr. Parker gave an outline of methods by which a sales force produces results, and said:

"It is claimed that a man is worth $2 a day from his collar down and as much more from his head up as he can earn by applying the knowledge that he possesses. He will achieve success in the degree with which he makes use of his knowledge and ability."

The Elginola Talking Machine Corp. has been incorporated in Milwaukee, with a capital stock of $10,000, by Frank Rose, Albert Salomon and S. R. Simon. It is understood that the new concern will engage in the manufacture and sale of talking machines.

The Flanner-Hafsoos Music House, 417 Broadway, has remodeled and enlarged its Edison department, and now has one of the finest departments of its kind among the Milwaukee piano houses. The company has given up half of its first floor quarters to the department and has arranged five attractive new booths. The house is meeting with a fine business in the Edison line.

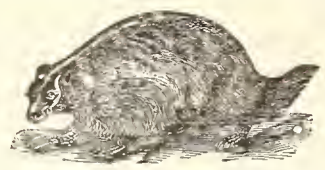
The George H. Eichholz Co., 542 Twelfth street, handling the Victor and Edison lines, has been conducting a consistent campaign of street car advertising during the past year, and its attractive car advertisements have been an important factor in building up the successful trade which the firm now enjoys.

The suit brought some time ago in the Milwaukee Civil Court against William P. Gensch, head of the Gensch-Smith Co., conducting an exclusive Victrola shop at 730 Grand avenue, by Max Lepak, who sought damages of $2,000 for remarks alleged to have been made by Mr. Gensch, was dismissed recently when Mr. Gensch proclaimed Lepak as an honest man.

The Columbia line has been installed in the main downtown store of Stumpf & Langhoff, Ltd., at Grand avenue and Second street. Mrs. C. L. McDonald is in charge of the department and is meeting with a fine business. The Columbia goods are being featured in attractive balcony quarters. The stock of machines and records for the new department was furnished by A. G. Kunde, 516 Grand avenue, Columbia jobber and retailer.

Despite the fact that more Columbia goods are now being shipped into Milwaukee, many more machines than are arriving could be disposed of, according to A. G. Kunde, jobber and retailer, 516 Grand avenue. Business has been so good since last fall that the brisk demand has kept the stock down to an unusually low point. Mrs. Kunde made two trips to Chicago recently and succeeded in securing several consignments of machines. Miss C. Gringes has joined the Kunde sales force.

The shipment of Edison machines and records to Milwaukee is increasing steadily, according to William A. Schmidt, manager of the Phonograph Co. of Milwaukee, jobber in this territory for the Edison goods. Mr. Schmidt says that he is able to ship a few machines to all his dealers and that the shortage is not nearly as acute as it has been. Several new Edison dealers have been located at various points about Wisconsin. Mr. Buehlow has joined the sales force at the Edison Shop, the retail store conducted by the Phonograph Co.



Victor Dealers

Those who relied upon us this season to supply their requirements of Victor merchandise are loudest in their praise of the excellent manner with which their orders were filled.

DEATH OF THOS. R. WHITE, JR.

Thomas R. White, Jr., a vice-president and chairman of the board of directors of the American Graphophone Co., died Feb. 28 at Miami, Fla., where he had journeyed to regain his health after a siege of pneumonia. Mr. White had been connected with the American Graphophone Co. for many years and was one of the foremost figures in the remarkable growth and progress of this company in recent years. He had a broad grasp of every phase of the financial and industrial world and was keenly interested in the affairs of the American Graphophone Co. notwithstanding his many other activities. He was admired and esteemed by his associates, who are deeply affected by his sudden death.

Exclusive Territory

The AEOLIAN-VOCALION

THE representation of the Aeolian-Vocalion is one of the most valuable franchises that the music industry has ever offered. The distinguished character of this new phonograph, the ease with which it sells, the superior clientele it attracts, the strength of the appeal its distinctive features make to the musically cultured as well as to others, and the magnificent publicity it is receiving—are vital factors no intelligent merchant fails to appreciate.

When to these considerations is added the fact that every representative is given exclusive territory, and that in this way he receives *full benefit* from all the business that can be done in his territory, the extraordinary value of Vocalion representation becomes apparent.

Everyone familiar with the phonograph business knows that the situation in this field is undergoing a radical change. The phonograph is becoming more and more popular, but the public is investigating and learning to discriminate.

Progressive merchants, who take advantage of the opportunity to secure representation of the Aeolian-Vocalion, are not only bringing additional business and prestige to their establishments for the present, but because of the protection afforded by the Aeolian exclusive territory policy, are building a permanent and profitable business for the future.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Address the Aeolian-Vocalion Department

"—that afternoon I sang 'Annie Laurie'—not with my own voice, but with my own feeling!"

The AEOLIAN-VOCALION

"THE PHONOGRAPH OF RICHER TONE THAT YOU *CAN* PLAY"

"I HAD stopped for a moment in a music-wareroom and on my journey to the door I paused.

"Someone was singing 'Annie Laurie' behind me, with such a wealth of beauty and expression that I turned. I was listening, not to a human being as I thought, but to a *new* phonograph that I had never heard before—the Aeolian-Vocalion.

"That was a wonderful experience. I was listening to a song whose simple melody is so familiar that naught but the most exquisite voice could stir one with it. And I was stirred to the very depths of my being. So rich, so full of color were the notes that sounded forth that I have never dreamed a phonograph could voice them.

"And so I asked to hear more, but with a smile, the demonstrator inquired—Would I not like to sing 'Annie Laurie' myself, first?

"And then a miracle of music happened. He handed me what he called the 'Graduola' which was attached to this wonderful phonograph. He showed me how, by pressing it, I could melt the tones away to the faintest whisper, or swell them forth to strong, full-throated power.

"So I, who never sang before, sang 'Annie Laurie.' Not with my own voice, *but with my own feeling*, and thrilled with the experience as I knew the artist himself must thrill. No music that I had ever listened to had given me a tithe of such exquisite pleasure.

"Did I buy that wonderful instrument? It's in my home today and I question if money could get it away from me if I could not replace it. With its aid, I, a hitherto dumb musician, sing and play with the voices and the talents of the world's great artists."

▼

The Aeolian-Vocalion is on exhibition and sale at the present only in a limited number of the leading music-stores. Catalog and address of the nearest store will be sent upon request; also particulars as to arrangements for hearing the Aeolian-Vocalion in localities where it is not represented. Address Dept D3.

"The Sweet, Old Song That Made Me a Musician"

"I FIND that I'm a *musician*—must have been, in fact, all my life. Tho' as I have no voice and never learned to *play* any instrument, I've been a *dumb one.*

"Last Tuesday night, my wife and I were at the Jones's. Jones had a new purchase—a phonograph—and he obviously wanted to play it for us. We stood him off until after the last rubber, and then he was no longer to be denied. He simply went and got a record and started the machine.

"And then wife and I had the surprise of our lives. We never had cared very much for phonographs. Wife called them "screechy." Personally, I'm prejudiced against musical machines.

"But this phonograph was *different.* It wasn't screechy, and it *wasn't a mere machine.*

> *" 'Oh! Don't you remember sweet Alice, Ben Bolt?' "*

"With the first notes, I sat upright in my chair. A full-throated, rich *human* voice was singing the old, familiar words. It was *beautiful.* The very melody seemed glorified by the inspiring tones that voiced it.

" 'Come over here and sing this yourself!' said Jones.

"I went to him, not to sing, but to see what the slender tube terminating in a handle, which he had drawn from that wonderful phonograph, could be. It looked interesting.

" 'Hold this in your hands!' said Jones. 'Move the handle in to make the music louder; draw it out to make it softer.' Then he started the record again.

"At first I hardly dared to move the little device in my hands. Presently, however, I gained confidence. As the notes swelled forth and softly died away in answer to my will, I became bolder. I began to *feel* the music.

"It was wonderful! Do you remember how in Du Mauriers' famous story, the hypnotist—Svengali—used Trilby's glorious voice to express his feeling?

"*I was doing the same.* I was using a splendid voice—I know not whose—*to sing with.* And as I sang the old, old song, and fairly trembled with the depth of emotion I was voicing, the fact that I was—must be—a natural musician dawned upon me. And with it came a glimpse of the glorious possibilities open to me by this great new phonograph.

"Violinist, singer, flutist, pianist, orchestra conductor—the whole musical genius of all the world was *mine*, not to hear merely, but to use for the expression of *my own personality.*

"This is the story of my metamorphosis—yesterday, musically dumb and voiceless; today, the most talented and versatile musician imagination could create.

An Invitation

Never can you appreciate the qualities of the Vocalion until you personally have heard it—*played* it. So we invite you to come to Aeolian Hall—to come, not to *buy* a phonograph, necessarily, but to inform yourself about the latest and greatest instrument of the phonographic type.

The VOCALION Line Surpasses Any Other in Beauty and Completeness

THE distinguishing features of the Aeolian-Vocalion line, which is larger and more complete than that of any other phonograph upon the market, are—the good taste displayed in stock models, and the group of special Art cases which far surpass anything hitherto known in connection with the phonograph.

The stock models reflect the broad experience and ample artistic capacity of The Aeolian Company's department of design and case-making. Utmost care and technical skill are apparent in every detail. Simplicity and the repression characteristic of genuine art are evident in every design.

In the Art Styles the most unusual and artistic case effects are displayed. While some of these are original, others are based upon authoritative Period and other classic models.

No intelligent merchant need be reminded that there is a large clientele in every community that appreciates real beauty and art, and that this clientele constitutes a highly desirable addition to his trade.

Columbia Graphophone Company
Woolworth Building, New York

CINCINNATI DEALERS FIGHTING APPROVAL SYSTEM.

Dealers in that City Organize to Combat Practice—Supplies of Goods Coming Along with Satisfying Regularity—New Phonograph Shop Opened—Volker & Co. Take on the Knabe-Crystola—Heavy Sales of Aeolian-Vocalion—General Business Conditions.

(Special to The Talking Machine World.)

CINCINNATI, O., March 6.—One of the interesting developments of the past month was the resumption of a fairly normal supply of goods in most all lines and the ability of the trade, particularly the small dealer, to dispose of his stock almost as soon as it was placed on the floor. Consequently this means a healthy state of affairs.

"Sent on approval" may soon be relegated to the Middle Ages, so far as the Victor dealers about Cincinnati are concerned. Under the leadership of W. A. Davin, of the Cable Co., some of the Victor dealers have formed sort of an organization which includes the Rudolph Wurlitzer Co. One result of this movement has been the elimination on the part of the distributer from his advertisements of statements intimating that Victor goods could be obtained only from one store. The association in time expects to take in all dealers about Cincinnati, and its main object will be to put a stop to sending goods out on approval.

A new retail outlet has been secured by the Edison folks through the Phonograph Shop, which will be opened during the coming week by George Wabnitz, Jr., at 148 East Fourth street. Mr. Wabnitz will deal in Edison Diamond Disc phonographs and records. One of this assistants will be George Meek, who has been identified with the various phonographic lines for quite a number of years.

Volker & Co., Kansas City, have been appointed one of the distributers for the Knabe-Crystola phonograph, according to an announcement to-day by Ernest Knabe, of the Knabe Bros. Co. The latter, in speaking of the Crystola, said: "We are receiving twenty orders for every one we can fill."

The Starr Piano Co.'s factory at Richmond, Ind., is now able to supply its branch houses with a much larger record line.

C. L. Byars, manager of the Vocalion department of the Aeolian Co., reports over 100 per cent. increase in February's business of this year over that of last February. There has recently sprung up a marked increase in out-of-town inquiries concerning the Vocalion. A number of good sales were made by mail and most of them bought the larger instruments.

He reports that, in spite of the fact that he is not pressing the wholesale end of the business at all, yet a number of good dealers have been signed up. The dealers who have had the line several months are reordering with alacrity, and from all indications are finding the Vocalion business a big success.

One Vocalion dealer in central Ohio disposed of his entire initial order within three weeks and placed a substantial order for new instruments—closing his letter with the following remark: "Kindly make us a substantial shipment of catalogs and advertising matter. There seems to be no end of possibilities with the Vocalion line."

Manager Whelen, of the local Columbia store, says: "Business is great, orders are piling in and there seems to be no let-up in the demand since the holidays. There is still a pronounced shortage on account of the fact that as fast as machines come in they are rushed out to the dealers needing them. The dealers throughout the territory realize the wonderful possibilities ahead of them for the coming year and are placing large orders even now for future delivery. There is no doubt in my mind but that great things are ahead of us and all Columbia dealers."

J. Greenfield, one of the best-known typewriter men in the country, has associated himself with the Dictaphone Co. with headquarters in Cincinnati at the local Columbia Graphophone Co. store.

AN INTERESTING ANALYSIS.

Statistics compiled by L. S. McCormick, sales manager of the Sonora Phonograph Corp., 57 Reade street, New York, since he undertook this office, which was announced in last month's World, show that one Sonora phonograph sells twenty more. This unit was arrived at after exhaustive study, both on the part of the Sonora representatives and the home offices. For one phonograph they could trace, they found that 200 machines were sold, but the average totals approximately twenty.

MUSIC FOR WOUNDED SOLDIERS.

Talking Machines and Records Being Sent to English and French Hospitals.

During the past few weeks twenty-one talking machines, 928 records, five mandolins and two guitars have been sent to the wounded soldiers of the allied armies by Miss May T. Moulton, who is working in conjunction with the Vacation War Relief, which was started by Miss Anne Morgan and her friends. Since the beginning of the present winter, Miss Moulton has been hard at work collecting talking machines and other musical instruments, and has supplied them to practically every battle front on which the English and French forces are fighting. Several base hospitals in Egypt, as well as scores of hospitals in France, have been supplied with musical instruments through this work. Appeals for contributions have been generously responded to, the charity forming a natural outlet for old records, of which the owners have tired. Landay Bros. are cleaning and packing the machines and records free of charge, and with each machine is packed a letter of cheer to the men and the officer in charge of them. Each talking machine sent over is accompanied by 700 needles and forty-eight records, and many letters of thanks have been received from the wounded soldiers, whose hours of pain have been made easier because of the music thus furnished to them. Miss Moulton asks that all who wish to help the cause along, either by donations of money, machines or records, send their contributions to her at 38 West Thirty-ninth street, New York City.

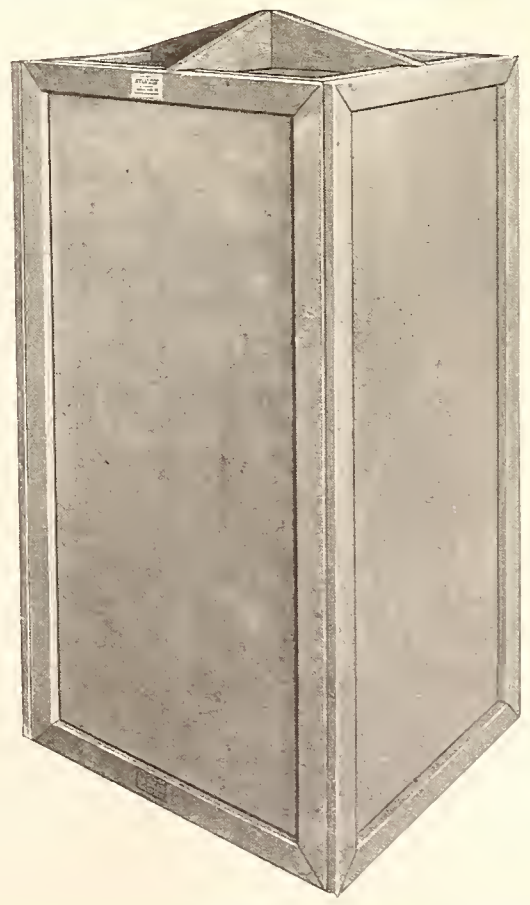
MONTGOMERY CENTER VERMONT



THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., March 5.—Philadelphia has experienced a wonderful talking machine trade in the month of February, the net returns being very much larger than last year, and again limited to the amount of stock that it is possible to secure. But the percentage of loss in this respect was not so great as in January and the dealers are in a better frame of mind. Everything indicates that March is going to keep pace with the first two months of the year, and in fact go them better as it looks as if the factories were straining every effort to supply the dealers with what may be called at least a normal amount of stock.

The talking machine dealers are in excellent shape in Philadelphia at present, and two of our already large merchants are planning within the next month or so to move to very much larger quarters than they now occupy.

G. W. Barnhill to Visit Pacific Coast Cities.

G. W Barnhill, of the Penn Phonograph Co., started for Florida the early part of this week to be gone a few weeks. He expects to make a tour of all the coast cities. John Miller, of the same firm, is at present in Atlantic City, where he has been for several weeks.

The Penn Co. report that their business is very good; much better than it was last year, and they believe that March is going to be very good, at least it has started off in that way. Their machines and records have been coming in in much larger quantities and they are at present filling a much larger per cent. of orders than they did earlier in the year.

Buehn Co. Reports Record Month.

The Louis Buehn Co. report that their business in February was greater than any previous month in the history of their business, with the exception of December 1915 and 1914, and that the outlook for the balance of this year is extremely bright. While machines are coming in to them with much better regularity, they are not yet in a position to supply machines as fast as they are ordered, and they note that the dealers who are getting the best service are those who have a constant order for them standing. They also note that there is still a shortage of some of the best selling records.

Death of Arthur Peterson.

Arthur Peterson, who covered Pennsylvania and New Jersey for the Buehn firm, died recently at his home in Vineland, and was buried at Collingswood, N. J. He had been with the firm for about two years. They feel that they lost a very valuable man, as he thoroughly understood the talking machine business and was well liked by the trade in general. The Buehn firm have taken on a new salesman, E. P. Bliss, Jr. who will cover a part of Mr. Peterson's territory, as well as other sections. He was formerly employed in a similar capacity by the firm of Lyon & Healy, Chicago. Among the visitors to the Buehn firm the past week were J. J. Knies, of Mahanoy City; Mr. Gewehar, of the Gewehar Piano Co., of Wilmington, Del., and Mr. Lewall, of Catasauqua, Pa.

Applications for Columbia Agencies.

The Pennsylvania Talking Machine Co. has been enjoying the general prosperity, a prosperity limited to what stock the Columbia Co. allows it. It is, at the present time, holding more applicants for agencies than ever before in the history of the business, orders and contracts that represent thousands of dollars' worth of business. Until more substantial shipments will come through, it has assumed as its policy to take the best of care of those it already has on its books, which it thinks is only the part of wisdom and fairness. February was a wonderful month with the Pennsylvania Co., showing a very substantial increase over last February, although the increase is insignificant in comparison to the unfilled orders Mr. Eckhardt says the demand continues and will continue, from all indications, above anything that any one has anticipated. A. Thalmayer, who has been identified with the international record department of the Columbia Co., has been placed in charge of the foreign or international record department to succeed N. S. Haim, who resigned. It will make a particular feature of this branch of the business.

Doing a Big Dictaphone Business.

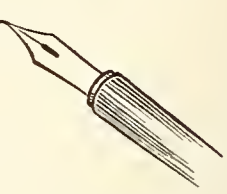
The Dictaphone Department of the Pennsylvania Co. reports that it has had another wonderful month, and the only reason for its not being a larger record breaker was that there were not enough goods to fill the orders. The company has had a great many orders for Dictaphones signed up merely awaiting the arrival of the goods. One of the pleasing features of the Dictaphone business is that it has had such a quantity of reorders. Among its largest installations during the month of February were the following: Whiting, Patterson Paper Co., paper manufacturer; Henry Hitner Sons Co., iron; H. K. Mulford, chemist; the Baldt Steel Co., steel; Campbell, Peacock & Kruger, cement; the Furness Withy Co., steamship agent, and A. T. Baker Co., plush manufacturer.

Plans for Great Business Show.

For years Philadelphia has attempted to have a business show, but with only partial success, but this year it will have a business efficiency show which promises to be of a very productive character, which will be conducted by Frank Tupper, and which will begin at the First Regiment Armory on March 13, to be continued until March 18. It will be one of the greatest exhibitions

(*Continued on page* 22.)

Pen Your Victor Orders to Penn



There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

Penn Phonograph Co., Philadelphia

VICTOR DEALERS

Send your orders for Victor Records to

WEYMANN

for the best Victor Service in the East

We are now booking orders for Victrolas, all types, for early deliveries. May we serve you?

WEYMANN & SON, Inc.

VICTOR DISTRIBUTORS

1010 Chestnut Street Philadelphia, Pa.

We Are Filling Record Orders Practically 100 Per Cent.

A loafing Southern darkey was offered 25c to do some work. He refused, saying: "Why should I work? I have 25c now."

SATISFACTION may come with the possession of "two bits" but we are never satisfied with the work we are doing towards making life easier and more profitable for the dealer.

Week in and week out, while we are working to furnish everything we can in both Victor machines and records, we are also striving to improve upon the methods of handling stock; of anticipating machine and record orders; of caring for the "short" orders; solving transportation problems, as well as the countless details that either make or break a service.

Our policy of "exclusively wholesale" leaves not the slightest thought on the part of any dealer but that our efforts are for HIS BENEFIT, and for his benefit alone. Buehn Service stands as a library of merchandise and post-graduate knowledge that can be secured almost at will.

One of your fellow dealers said: "Buehn Service is as near perfection as an expert organization can make it." You can prove this by submitting a list of records desired, and we want you to include in this selection some of the records that you may have tried to obtain elsewhere. This is a good test, and we know your order will be filled beyond your expectations.

To change the old saying a little: "The proof of the Service is in the filling."

The Louis Buehn Co.

Philadelphia's

Exclusive WHOLESALE

Victor Distributor

Record orders are now being better filled than for several months.

Shipments from the Victor Co. have made it possible for us to fill some orders as well as 90 per cent. Orders for Supplies and Repair parts filled promptly and correctly.

Test us with any size of order—small or large—so you can see that Buehn Victor Service means a co-operation that is modern in every characteristic.

We will guarantee a larger percentage than any other jobber.

THE TRADE IN PHILADELPHIA.

(*Continued from page 20.*)

this city has ever seen. The Tupper Brothers have given shows in New York, Boston and Chicago, and thoroughly understand their business. The Dictaphone Co. has taken a large double space, known as booth numbers 43 and 44. The latest models of the Dictaphones will be shown. The exhibit will be in charge of J. D. Westervelt.

The Edison Dictating Machine has also taken a large double space. Mr. Bostwick, of the Edison Co., will be here during the entire exhibition, and N. C. Durand, vice-president of the company, will be here all day of March 15.

The manager of the Edison Dictating Machine reports that January and February were the two biggest months it has ever had. Among some of its prominent installments in February were with the G. G. Clows firm, the Dodson Coal Co., R. G. Dun, the General Electric, the Philadelphia Electric, and the Parkesburg Iron Co.

Clarence Hopkins has left the employ of the Cunningham talking machine department, and he has been replaced by Martin Socklaugh.

The firm of H. A. Weymann & Son have had a most satisfactory February, although they still find themselves short of certain machines and some of the most popular of the records. Harry Weymann, who has just returned from a ten days' trip through the South, states that the demand upon them is still greater than the supply. They are not finding as much difficulty with their record department which has been at least a hundred per cent. better than last year. Their three representatives are on the road and are sending in some very substantial orders for both records and machines.

The firm of Blake & Burkart, the biggest handlers here of the Edison, are having their new store entirely repapered and repainted at the present time, and as soon as it is completed they expect to give a series of interesting concerts. They have been having a very gratifying business on the Edison machine, as they note have all the other firms handling it in this city.

FROM REAL ESTATE TO OPERA.

Thomas Chalmers Had Planned Business Career Before Realizing Value of Voice.

Thomas Chalmers, one of the popular members of the Boston Grand Opera Co., and who has also won much favor through the medium of the rec-

Thos. Chalmers.

ords he has made for Thomas A. Edison, Inc., started out on the sea of business as a real estate operator, and was doing fairly well when he discovered that he had a baritone voice and was advised by his friends to have it trained.

Mr. Chalmers went to Italy nine years ago, where he studied for several years under Lombardi, and four years ago came back to sing here. His success was immediate, and instead of selling real estate he is now buying it.

The singer is enthusiastic regarding Mr. Edison's accomplishments and delighted with the Diamond Disc recreations of his baritone voice.

CLOSED A BIG FEBRUARY BUSINESS.

(Special to The Talking Machine World.)

DETROIT, MICH., March 7.—H. C. Shea, sales manager of the Pathephone Co. of Detroit, 114 Farner street, Pathé distributers, reports the closing of an excellent business in the month of February. A number of new accounts were opened during the course of the month, and the company, which was one of the first Pathé jobbers in the country, has made arrangements to carry a complete stock of Pathephones and Pathé disc records at all times.

Among the additions to the company's sales staff is Harry A. Russell, formerly connected with the American Phonograph Co., and well versed in all details of phonograph merchandising. Mr. Russell has already commenced work, and is extending real co-operation to the Pathé dealers in this territory.

EDISON PLANS FOR THE FUTURE.

Will Do Some Highly Shocking Things if He Lives Long Enough to Accomplish Them.

Thomas A. Edison, who recently celebrated his sixty-ninth birthday, prepared some years ago the schedule for his future life. Dyer and Martin, the authors of his authorized biography, "Edison: His Life and Inventions," quote him as saying: "From now until I am seventy-five years of age I expect to keep more or less busy with my regular work, not, however, working as many hours or as hard as I have in the past. At seventy-five I expect to wear loud waistcoats with fancy buttons; also gaiter tops; at eighty I expect to learn how to play bridge whist and talk foolishly to the ladies. At eighty-five I expect to wear a full-dress suit every evening at dinner, and at ninety—well, I never plan more than thirty years ahead."

M. J. Harrison, of Richmond, Ind., has been named a charter member of the International Phonograph Dealers' Association, which has its headquarters in New York City.

THE GREAT USED NEEDLE PROBLEM.

The Genius Who Devises Some Use for Worn-out Talking Machine Needles Will Be Crowned with Fame and Fortune—Perhaps.

Great excitement has been caused among the owners of talking machines in Greater New York over a controversy at present running in the New York Sun as to the best method of utilizing worn talking machine needles. The unknown who started the rumpus wrote to the paper a short time ago, and stated that thousands of persons who owned talking machines would be exceedingly interested in a method of turning worn needles into some useful purpose. As soon as his letter was published, the post-office had to add another carrier to the route in order to deliver the mass of answers sent in, each one containing a suggestion as to what to do with the needles.

One of the first suggestions received was to the effect that the needles should be given to glaziers, to be used instead of the triangular zinc brads generally used to keep panes of glass in window frames. This was answered by another genius, who wrote at length and on both sides of the paper, stating that the needles were absolutely useless as a substitute for glazier's brads, but that they should be driven into the heels of shoes, on the side where they wear down, thus preventing fallen arches, ingrowing nails and pigeon toes, at the same time affording the wearer a sort of caulk, similar to that used by humane drivers on snowy days, which would enable the needle-shod pedestrian to stride along the slipperiest of streets without skidding—a sort of non-skid shoe, so to speak.

A budding financier, scenting fortunes in the export trade, suggested a co-operative syndicate of talking machine owners, who would send their worn needles to a central point, whence they would be shipped to Africa and marketed there among the savages for tattooing purposes. A resident of Hensfoot Corners telegraphed in to state that he used his discarded needles to save his apple trees from caterpillars and bugs and things by first daubing a ring of sticky stuff around the tree-trunk, and then sticking the needles into the glutinous matter, butt end down, point end out and so close together that millions of insects, climbing after the fruit, committed suicide when trying to get over the stockade thus formed, the result being that the neighbors' children, who got all the apples one dark night, didn't find a single worm in any of them.

The controversy is still unsettled, and Manhattanites are sitting up nights pondering over the woful waste caused by the apparent uselessness of worn-out needles, and seeking to find some means of converting these worn "points of speech" into a profitable channel. But no matter what use may eventually be found for used needles, one thing is certain, after having once been used to play a record they should not be used over again for the same purpose.

ISSUE NEW PRICE LIST.

Sales Division of the Columbia Co. Announces New Prices for Columbia Electric Grafonolas—Names of Machines Are Also Changed.

The sales division of the Columbia Graphophone Co., New York, has announced a new price list for Columbia electric Grafonolas. This list also changes the designations of these machines, as, in accord with the new policy of naming Grafonolas, the price of the machine constitutes its name.

The new price and name list, with the former designations, is as follows: Style 150E is changed to Style 125E, price $125; Style 160E is now 135E, price $135; Style 200E is now Style 175E, price $175; Style 250E is now changed to Style 225E, price $225.

The new list provides for an increase of only $25 from the prices of the regular Grafonolas to give the purchaser an electric Grafonola. The Columbia electrics have achieved country-wide success, and the new prices will doubtless act as a new impetus to their sale and add materially to their popularity.

GRAVEURE WITH COLUMBIA CO.

Noted Belgian Baritone to Make Records Exclusively for This Company.

The Columbia Graphophone Co., New York, announced recently the consummation of arrangements whereby Louis Graveure, a Belgian baritone of international prominence, will record exclusively for the Columbia record library. Mr. Graveure's first records will be issued shortly, and the prestige which he has attained in musical circles augurs well for the sale of his records.

LEAVE FOR EUROPE.

Louis Sterling, general manager of the European interests of the Columbia Graphophone Co., and Arthur Brooks, head of the English recording laboratory, sailed for England last week on the steamer "Nieuw Amsterdam" after an extended visit to this country.

GEN. PERSHING ATTENDS TONE TEST.

(Special to The Talking Machine World.)

El Paso, Tex., March 6.—Elizabeth Spencer, concert soprano, and Harold Lyman, flutist, from the Edison laboratories at Orange, N. J., recently appeared in an Edison tone test recital in this city. Among the delighted attendants were several United States Army officers on duty along the border. Gen. John J. Pershing was one of these.

REED ARTISTRY IN THE MAKING OF TALKING MACHINES.

Some Remarkably Artistic Creations Turned Out by Dr. Alva Jones, the Noted Technician of Philadelphia—The Principal Features of These Creations Interestingly Described.

The three photographs illustrated herein give a vivid idea of the beauty of reed artistry in the making of talking machines, these being the creation of Dr. Alva D. Jones, a noted technician, with offices at 601 Witherspoon Building and laboratories and experimental station at 1218 Filbert street, Philadelphia, Pa., and who, it will be remembered, is the inventor of the famous Jones Rubbertone reproducer. In addition to being an M.D., he also has the titles of E.E. and M.E., and is famous as a consulting engineer.

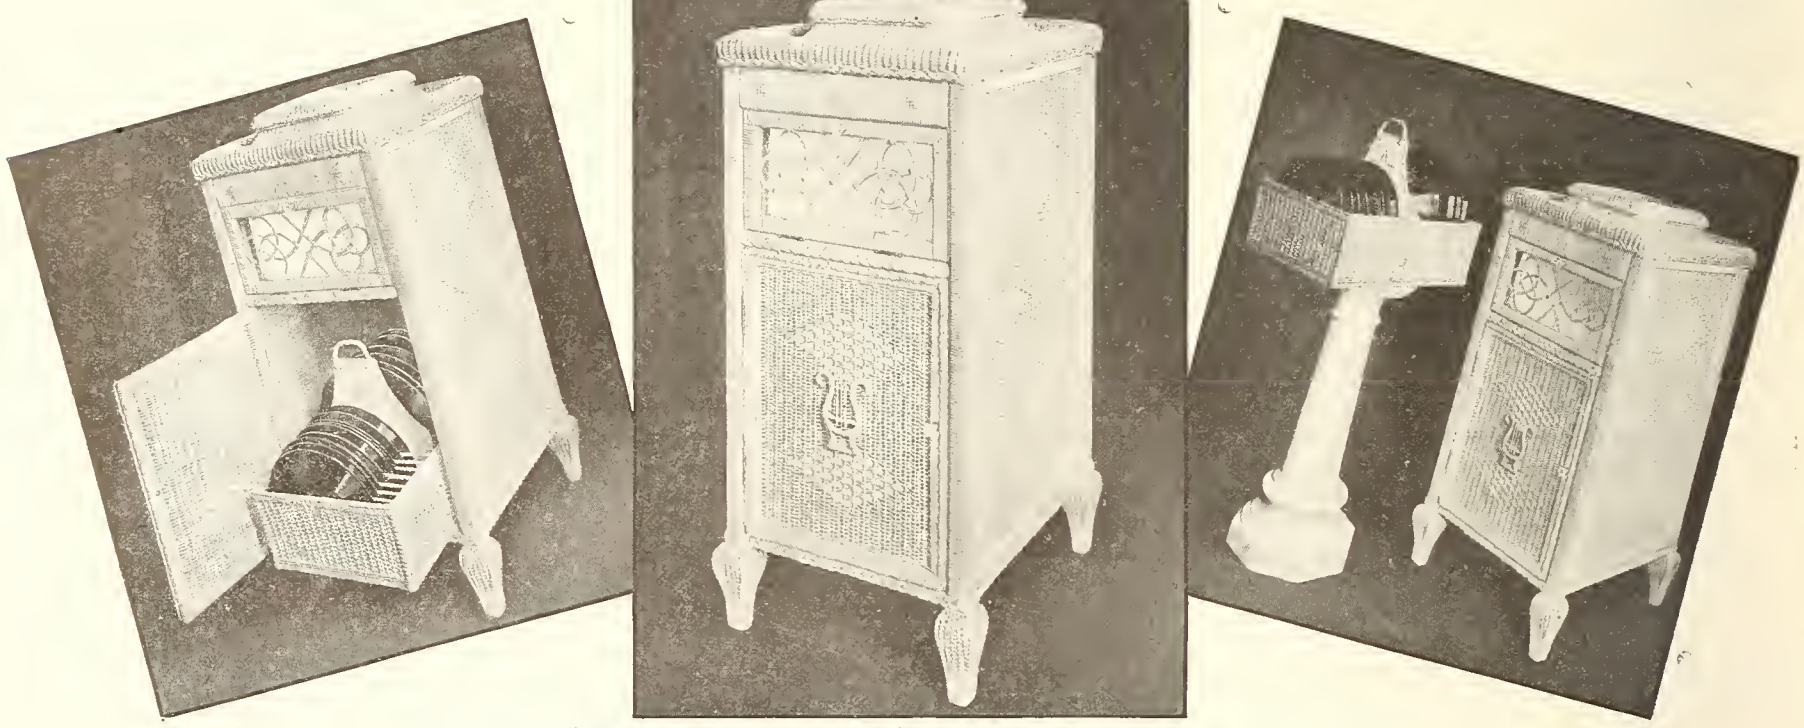
Dr. A. D. Jones.

From these photographs one can see the various effects of the use of this phonograph, one showing the instrument itself closed; another, with the record hamper open, and the third shows the record hamper removed and placed upon a marble pedestal. The utility of this new invention, which is being protected by design and other patents, is far-reaching, as can best be attested by the orders already received, even before the official announcement is made.

In describing this it is better to let Dr. Jones have the floor, for he is as clever in his descriptive conversation as he is in his creative achievements. "The principal feature of my patent," said Dr. Jones, "is that the inventor has discovered a wonderfully valuable function in the use of reed and other plaited materials when used as a talking machine cabinet, having after thousands of tests discovered that board cabinets of the usual type are subject to sympathizing with the vibrations coming from the record, and thereby setting up a tone the coloring of which is foreign to the original tones. Wood is found to be particularly valuable in the piano, which has a tone peculiar to itself and is an instrument within itself. Likewise the violin. Each of these has its own individual characteristics, which characteristics are made up in part of the wood itself, but this condition is entirely different in the talking machine, as the same must be capable of accommodating itself to the characteristics of every known musical instrument as well as the human voice.

"Each and every one of these instruments as well as vocal sounds is distinctly individual, so it is easy to understand that the talking machine cabinet as well as its reproducing instrument or sound box must be entirely void of a predominating tonal characteristic, but must be capable of preserving to their utmost the most delicate musical vibrations without the slightest change of coloring by reason of sympathetic vibratory influences. We must understand that the talking machine is strictly a secondary consideration, and when we listen to it reproduce an original instrument we never for a moment think of anything but the original and its characteristics, which cannot be obtained if the reproducing device has an individual tone, and in my experience, which has been vast in this line, the talking machine and sound reproducing instrument per se, that is, the sound mox, should be made of such material and constructed in such a manner as to be absolutely free from an individual tone in itself, yet that part that must preserve and amplify the original sound must be sufficiently dense to take care of the most delicate shades of music.

"Referring again to my reed cabinet, I wish to say that by reason of it being constructed in sections, although it is made by hand, it will be within the reach of the most modest purchaser, as a great number of craftsmen can work on it at a time, which is an entirely new procedure in the reed industry, and is also the subject matter of a patent. One beauty of the reed machine is that it may be decorated so as to accommodate itself to any furniture or room in the home. The decorations may be changed at will. If the reed is to be left in its natural state, a brush, soap and water makes it look as good as new at any time. It is not subject to being scratched, as the highly polished wood or board cabinets. On account of it being made of rattan, it is practically indestructible. A machine the size of the one shown in the photograph would only weigh twenty or twenty-five pounds complete. The special sound reproducer belonging to this machine is most wonderful, although any standard type of sound reproducing machinery may be fitted into it."



Artistic Creations in Reed Cabinets, Designed and Patented by Dr. Alva D. Jones.

PEERLESS PHONOGRAPH CO. SOLD.

Ricca & Son Purchase Concern Which Was Started by Ben H. Janssen.

The Peerless Phonograph Co., of this city, was recently purchased by Ricca & Son. The purchase included the stock and good will of the company, which was formed originally by Ben H. Janssen to do a jobbing business in the Pathé Pathephone and Pathé records. The new owners of the company will continue the original policy of the company, and the entire executive organization of the Peerless concern has been retained by them. The phonograph business will be kept entirely separate from the manufacturing activities of the Ricca & Son firm.

COLUMBIA CO. ANNOUNCES NEW APPOINTMENTS.

James P. Bradt Becomes General Sales Manager and W. C. Fuhri, United States Manager of That Company—Both Men Admirably Fitted by Experience for Their New Responsibilities.

John A. Cromelin, general manager of the Columbia Graphophone Co., New York, announced last week the appointment of James P. Bradt as general sales manager and W. C. Fuhri as United States manager of the company.

Mr. Bradt was formerly sales manager, and in his new and broader duties he will be in a position to give even closer co-operation to all branches of

James P. Bradt.

the Columbia service and indirectly aid the Columbia dealers throughout the country in achieving greater success than they have had in the past several years.

Every talking machine man who has had the pleasure of meeting Mr. Bradt will rejoice in his broader field of activity, as Mr. Bradt is one of the most popular members of the trade and a man whose pleasing personality and genial smile have

W. C. Fuhri.

won him hosts of friends both here and abroad.

W. C. Fuhri, who was formerly Central West district manager, is one of the oldest employes of the company, and has gained the friendship and esteem of Columbia dealers throughout the West. The creation of the position of United States manager, Mr. Fuhri's new post, became necessary on account of the greatly increased business the Columbia Co. is doing, with a proportionate increase of problems and general work. The appointment of Mr. Fuhri is a logical one, as his many years of exceedingly successful work in the Columbia service has peculiarly fitted him for his new post.

As United States manager Mr. Fuhri's duties will be all that the title implies. He will be in direct authority on all matters pertaining to the company's United States business, and will be the executive office representative of the store managers, through the district managers, in matters of management.

J. FRAME ART JEWELRY

340 Superior St., TOLEDO, O.

IN MEMORY OF THE LATE COL. BILL.

Resolutions of Sympathy are Drafted by the National Association of Talking Machine Jobbers and Will Be Suitably Engrossed.

At the recent meeting of the executive committee of the National Association of Talking Machine Jobbers, in New York, a committee was appointed to draft suitable resolutions to the memory of Edward Lyman Bill. The resolutions, which will be appropriately engrossed and framed by the committee are as follows:

EDWARD LYMAN BILL.

was a man who held a position of honor, dignity and influence unsurpassed in trade paper annals in this or any other country. In this his life was unique. His profession will miss his great leadership. The musical industries in all their branches will with difficulty know where to turn to fill the void left by his untimely passing away. He combined with keen technical knowledge the finest qualities of character and manhood. Colonel Bill's life would have been rounded out in his chosen profession had he limited himself to it, but he gave of his power and ability not only to his splendid papers but to the whole music trade and to numerous civic duties as well. No effort for honesty and uplift in trade advancement ever found him unwilling to assume his full share in it and responsibility for it. Through the warp and woof of the fabric of his calling the thread of his life will be found for the past thirty-six years, and has bettered and gladdened it. His sudden death in the full of a fine activity leaves the profession of trade paper journalism and the musical world in general poorer indeed, and the entire community with more than the customary sense of a deep public loss. The National Association of Talking Machine Jobbers, of which he was a founder and an honorary member, orders that this minute of esteem for his memory be spread upon its records and a copy, suitably prepared, be sent to his sorrowing family and his business associates.

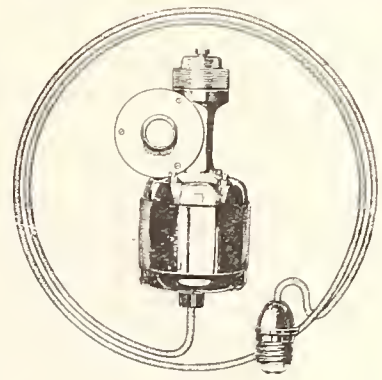
"And the stately ships go down
To their haven under the hill,
But oh, for the touch of a vanished hand
And the sound of a voice that is still."

JAMES F. BOWERS,
HENRY WINKLEMAN,
LOUIS BUEHN,
Committee on Resolutions.

MUSIC AS AN AID TO ACTING.

The many applications of the Edison Diamond Disc are interestingly shown in a recent installation in the Edison motion picture studio at Bedford Park, New York City, as an aid to acting. The direct and immediate effect of music on the emotions, especially "emotional" music, has long been known to psychologists. The directors, as the stage directors are known in motion pictures, are just waking up to the power of music. The director's task is to see that the actor's feelings and thoughts are so expressed that, without words, the audience will "get" them vividly. The exactions of the picture screen call for the highest form of realistic acting. This search for the real feeling has brought forth this reliance upon the Edison Diamond Disc as an emotional excitant.

The B. M. Joy Edison Shop, of Fort Dodge, Ia., recently held a tone test with Miss Helen Rudesill as the soloist.



Are You a Motrola Dealer?

When we announced the MOTROLA we knew there would be a big demand—but we did not know the demand was so urgent.

The flood of inquiries and orders that have come in from almost every section of the country has proved this:

It demonstrated that wide-awake talking machine dealers know it will be easy to sell Motrolas to their customers.

Connected with electric current the Motrola winds automatically, insuring true tone and even time by keeping the machine from running down. Cost of operation practically nothing. It can't get out of order.

Simple to attach—just unscrew the winding key and put the Motrola in its place.

Be one of the first to have a Motrola for demonstration purposes. Get our literature to mail out with your monthly list of records.

Retails for $1.00

IF you are not carrying the Sonora Multi-Playing Jewel Needle in stock, you should do so.

It sells readily for $1.00, and we authorize you to guarantee it to give perfect satisfaction under daily use for three months.

We supply them to you at a price which permits a satisfactory profit, and will be glad to have you correspond with us on the subject.

The Jewel Needle will save your customers records, and bring out their beauty and harmony in a way not possible to the old-fashioned, scratchy, constantly-changed *steel* needle, now being rapidly discarded by careful people.

Manufacturers of steel needles state that they must be used but once because they wear the record. This is true, and it is also true that they begin to wear the record the minute they start and keep on wearing it more and more.

Write us for sample needle and full information in regard to net prices and the "service work" which we do for those who carry our products in stock.

INSURANCE ON VICTOR GOODS.

Victor Talking Machine Co., in Letter to Insurance Company Official, Outlined as Follows Its Policy Regarding the Handling of Machines and Records Damaged by Fire.

In response to a request made by an insurance company official, the Victor Talking Machine Co. recently sent the following written statement regarding its position with respect to settlements of fire losses in which goods of its manufacture were involved. The letter was designed to clear up certain misunderstandings in the West and was forwarded to the proper authorities. The definition of the company's stand was as follows:

"It has not been, is not, and will not be the policy of this company to question the right of insurance companies to take damaged goods of its manufacture in cases where the amount of damage thereto cannot be agreed upon and settlement made for partial loss.

"We do object to damaged goods of our manufacture being disposed of to the public in any way, as we know this can only result in damage to our reputation as manufacturers of high-grade goods. In order to avoid this we are willing to make sacrifices in the nature of allowances to distributers or dealers who suffer fire losses and who cannot otherwise agree with the insurance companies upon the value of the salvage. We think the insurance companies will be glad to extend to us the courtesy of an opportunity to confer with the assured and with the adjuster in cases of dispute, as this would no doubt result in speedy settlement and save the companies loss and expense.

"When machines of our manufacture in the hands of the trade are damaged in such a way that, in the opinion of the assured and of the adjuster, they can be refinished and made marketable, this company stands ready to do this at our factory, supplying new parts at cost and charging only for new material and workmen's time. Certainly, repairs cannot be made in any other way at so low a cost and with as satisfactory results.

"With respect to records in the hands of the trade that have been damaged, but appear to have salvage value, our plan is to offer to make an allowance on such records in exchange for new ones. This enables the assured to make a corresponding allowance to the insurance companies at our expense, and we feel that the distributer or dealer should also be willing, in cases where a large stock is involved, to stand a loss if necessary, so that the questionable goods may not be offered to the public in his vicinity to the damage of our mutual interests. If, however, even this allowance by us does not permit the assured and the adjuster to come to an agreement, we are willing to give any case careful consideration to see if there is any need or justification for a special proposition applying only to that particular case.

"In the case of machines that are damaged beyond repair and records that are burned, broken or otherwise perceptibly damaged, we presume that there can be no question but that they represent a total loss figured at the actual cost to the assured.

"In a few recent cases we have been called upon by adjusters to assist them in the manner indicated above, and we are quite sure that the results have been most satisfactory to all concerned, and especially so to the insurance companies, whose claims were very much reduced through our co-operation."

PHONO-VOCAL METHOD A SUCCESS.

Student Writes Enthusiastic Letter Regarding the Success of the Herman-Klein Phono-Vocal Method of Voice Teaching.

The successful use of any particular system of instruction affords the greatest proof of the practicability of the system in question. The many testimonials from students of singing, and even teachers, regarding the effectiveness of the Klein Phono-Vocal Method of voice culture, based on the use of talking machine records and a comprehensive textbook, and which has back of it all the excellence of the famous school of Manuel Garcia, goes to prove its value.

The manner in which those who have used the system regard its success is indicated by the following letter, recently received by the Music Phone Method, 2 West Forty-fifth street, New York:

Kellogg, Idaho, Dec. 22, 1915.

THE MUSIC PHONE METHOD, New York City:

I expressed my approval of The Music Phone Method on receipt of the same. At that time I valued it at $1,000, but after having studied with it six weeks its value has just doubled. All of my records are jealously guarded and kept under lock and key when not in use. I have expended in the neighborhood of $2,000 with some of the best teachers of vocal music to be found in the West, but still I was not satisfied. I have the well-known fault that most all average singers have got, and that is lack of proper breath and throat control. The trouble of all teachers is that they try to teach how to overcome such faults, but not how to prevent such faults. Now it is clear to anyone with the average brain that it is much easier for a person to keep from getting a sore throat than to doctor and overcome the same when once it has got hold of him. Their excuse for this is that they are afraid of mystifying a pupil, but that is just what they do. I came to this town to get together enough funds to go ahead with my voice, but am pleased to say that the Herman Klein Phono-Vocal Method has solved the financial end of it for me. I have in the Music Phone Method the greatest of all teachers. You are given permission to use this in any way that will help music lovers to take advantage of this great opportunity. I would be pleased to answer any letters from ones who would like a heart-to-heart talk with one of your students. Wishing you all kinds of success, I remain Sincerely yours,

N. S. CLARK.

Those issuing the method have received similar letters from many students and also letters from members of the trade regarding the success of the system as a selling proposition.

NEW CONCERN TO MAKE "TALKERS" IN PHILADELPHIA.

Horace Sheble Is President of the Domestic Talking Machine Corp., Chartered with $200,000 Capital Stock, to Enter Manufacturing Field on Large Scale.

The Domestic Talking Machine Corp. was recently incorporated at Philadelphia, under Pennsylvania State laws, for the purpose of manufacturing talking machines, records and accessories. Its capital stock is $200,000, all of which is said to have been subscribed. The president of the corporation is Horace Sheble, who is a talking machine authority of international distinction.

The company expects ultimately to build its own plant, but for the present large quarters have been

Horace Sheble, President.

secured at Thirty-third and Arch streets, the building in which it is located being one of the finest modern factory plants in the country, being of strictly fireproof construction throughout.

It is the intention of the company to manufacture everything entering into the construction of its product, with the exception of woodwork, so as to enable it to effect every possible saving in manufacturing cost and place on the market a line of low-priced machines that can assume leading proportions in the trade. As the company has ample backing, it is planned to discount all bills and at every angle effect all possible legitimate savings and put them into building up and standardizing the quality of its product.

President Sheble has gathered around him an efficient and loyal staff of specialists, each man to head his respective department and to be in absolute charge. Putting responsibility on capable men Mr. Sheble has found is the only way to secure the best results.

Philip C. Adams has been appointed general sales manager. While the phonograph field is new to him, he is a merchandising man of marked ability, and the sales end of the company has every opportunity of being well handled.

Thomas Kraemer, Supt.

The superintendent of the plant is Thomas Kraemer, who for many years was connected with the Singer Sewing Machine Co. He was also superintendent of the Regina Music Box Co., and later on superintendent of the Hawthorne & Sheble Manufacturing Co. Mr. Kraemer has contributed many patents to the development of the talking machine art and is an authority on mechanical matters and modern shop practices.

The purchasing head of the company is A. C. Wright, who was formerly purchasing agent for the American Graphophone Co., and is considered an expert in his chosen field of work.

The accompanying photographs show the officers of the Domestic Talking Machine Corp.

"Looking over the phonograph field, the success of the various companies has generally been limited to the powers of the men who are actively responsible. Some of the new companies have been started by men unfamiliar with the industry, and it is doubtful to-day," said Mr. Sheble, "if more than a few of the companies engaged in the manufacture of talking machines are making money. It reminds me of a number of years back when the bicycle business was in its prime. Every other bicycle dealer started to buy parts and assemble in order to be classed as a manufacturer, imagining by such a process he could compete with those actually manufacturing. It did not take long for such conditions to seek their own level.

Philip C. Adams, Sales Mgr.

"It is our intention to manufacture machines under our own patents, and through the facilities and ample capital available I believe our company will shortly be prepared to offer most attractive conditions in low-priced talking machines.

"Our plant is at present being equipped throughout with the most modern machinery, so as to enable us to conduct the work we have in mind in a most efficient manner. I do not care to show illustrations of our various types at this time, but they will be ready shortly, when the proper trade announcements will be featured."

The Domestic Talking Machine Corp. starts with a complement of men who have been brought up in the manufacturing business, men who have seen this important business grow from small things to big ones, and who have actively participated in its growth, so the company is exceptionally well fortified from both a managerial and financial standpoint.

A. C. Wright, Purchasing Agt.

INVENTORIES AND STOCK RECORDS.

Should Be Safeguarded, Says F. K. Dolbeer, In Recent Letter.

F. K. Dolbeer, manager of the credit department of the Victor Talking Machine Co., recently sent out a letter to Victor jobbers and dealers impressing upon them the necessity of keeping their inventories and records regarding stock in a safe place in order to protect their insurance. In part Mr. Dolbeer said:

"One of our distributers recently sustained a heavy loss by fire, and the fact that he was in a position to produce a copy of an inventory taken December 31, 1915—together with other papers bearing on the subject—was of material aid in enabling him to promptly prepare a proof of loss which was acceptable to the insurance adjusters, so that a settlement was obtained within ten days from date of fire."

VISITING TRADE IN THE EAST.

A. Anderson, of the credit department of the New York Talking Machine Co., New York, Victor distributer, is making extended trips through the Eastern section of the country in order to investigate general conditions in the respective local territories and call upon Victor dealers. Mr. Anderson has already visited Pennsylvania, Massachusetts and sections of New York State, and will continue these trips indefinitely. These visits will undoubtedly aid the New York Talking Machine Co. to render its dealers an even more efficient degree of co-operation than it has in the past.

The Bailey Furniture Co. has added pianos and talking machines to its line of furniture, the Victor, Edison and Columbia machines being handled under Manager John L. Young.

THE HOME OF LANDAY BROS.

THE TRADE IN NEW YORK CITY AND VICINITY

The month of February was a very satisfactory one for the local talking machine trade, and is best summed up in the remarks of several dealers and jobbers that the sales totals of the month were as large as might be expected for a month that had thirty-one days and no holidays, instead of twenty-nine days and two holidays.

The general situation in the trade shows no material change from last month; February business being far ahead of last year and exceeding that of any February in the history of the local talking machine trade.

There is still a tremendous shortage of machines of all types and classes, and this scarcity of product is becoming more acute day by day. Factories are working to capacity, but the demand has been so far beyond all expectations that human calculations could not foresee it. The record situation is far better than it was a few months ago, and there is very little complaint regarding the shortage of records of any particular class. Standard selections are selling well, and there is a steady call for dance records and the better class of popular selections.

Dealers Interested in Important Problems.

The most interesting features in the local talking machine trade is the fact that the dealers are evincing a keen interest in general matters which are applicable to the talking machine trade from a broad viewpoint. The Stevens bill is attracting the attention of a great many of the local dealers who, in accordance with the request of the National Association of Talking Machine Jobbers, have written to their Congressmen and pointed out that the Stevens bill when enacted will prove beneficial to manufacturer, dealer and consumer, particularly the latter.

Other topics which have been discussed by the local dealers are salesmanship, better terms and a more definite understanding of the "record on approval" question. The dealers are making plans to develop their salesmen along more efficient and result-productive lines than in the past, as they realize that the present prosperity of the talking machine trade can only be maintained by intelligent salesmanship of the very highest type.

A number of the local dealers have expressed their displeasure with the newspaper advertising which makes a feature of "nothing down" and ridiculously low terms. It is more than likely that some action on this matter will be taken by the local association within the near future. The record approval question has always been a thorn in the side of the progressive and wideawake dealer, and this important subject is being discussed from every angle, with the idea of protecting the dealer from losses through the improper use of the "record on approval" privilege.

Stevens Bill Activity.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, Victor distributer, in company with Messrs. Mickel, Rauth and Nestor, of the legislative committee of the National Association of Talking Machine Jobbers, made a special trip to Washington recently in the interests of the Stevens bill. This committee held a number of important conferences with prominent Congressmen with the object in view of obtaining an early hearing for the bill. The members of the committee do not feel at liberty at the moment to disclose their actual plans, except to say that they were successful in enlisting the support of high distinguished officials, and the general outlook for the Stevens bill is extremely favorable. The American Fair Trade League is greatly pleased with the work done by the National Association of Talking Machine Jobbers' committee, and they refer to it as most effective when compared to the efforts of any other organization. Mr. Blackman states that it cannot be urged too strongly, however, that each dealer write to the members of the Interstate and Foreign Commerce Commission, showing their great interest in the holding of an early hearing on the Stevens bill.

The Blackman Talking Machine Co. reports the closing of an excellent February with a good increase over the corresponding month of last year. Mr. Blackman points out that if the company is able to get enough goods to continue this ratio of increase during March and April it will wind up with a very fine business year on April 30.

Attractive Window Display.

Referring to the general outlook and last month's business, Raymond Duncan, of the Edison Shop, 473 Fifth avenue, which is owned by the Phonograph Corporation of Manhattan, said: "February sales were very gratifying, and both phonographs and records shared in the general trade. Our concerts in our auditorium have been well attended, and we have plans now under way whereby a number of prominent artists recording for the Edison diamond disc records will appear at special recitals singing in conjunction with their own records." The Edison Shop is featuring this week a window display which is attracting the favorable attention of all passers-by. This display includes the popular models in the Edison Diamond Disc and Amberola line, while in the center of the window is shown a sectional view of the Diamond Disc reproducer. This is displayed under a magnifying glass, and thousands of people have stopped to examine the display when passing the Edison Shop. Mr. Duncan states that he is planning to install similar educational displays every fortnight as the success of this first display has been phenomenal.

Record-Breaking February Business.

"February business was as big as though the month had thirty-one days and no Sundays or holidays," said R. F. Bolton, district manager of the Columbia Graphophone Co., New York. "Not-

TRADE IN NEW YORK AND VICINITY.

(*Continued from page 30.*)

withstanding the enormous volume of business and the increase over last year, we were still unable to take care of our dealers' requirements, although our manufacturing facilities were increased considerably. Other additions to our factory are now being made, and within the next thirty or sixty days we hope to be able to take care of our dealers' needs promptly. The larger types of machines are still in big demand, and the models selling at seventy-five dollars and upward are easily in the lead. Record business has shown a phenomenal increase, giving ample evidence that our advertising campaign is not only doing us lots of good, but is also proving of vast benefit to our dealers. Judging from the business closed during the first two months of the year, it is very evident that 1916 will be a much larger talking machine year than 1915. Collections are very good, which would testify to the fact that our dealers are enjoying a large measure of prosperity and selling their machines on good terms. Orders for fall are being received in large quantities, and the dealers are making plans far ahead of time to forestall any possible shortage during the latter part of the year."

Better Factory Shipments.

V. W. Moody, sales manager of the New York Talking Machine Co., Victor distributer, in a brief summary of February business said: "Our company still feels the continuous scarcity of all types of machines. Factory shipments were somewhat more substantial during February than the preceding months which enabled us to maintain a proportionate increase over last year. The record situation is good, and the demand for the better class of popular music is evident. This is a pleasing indication, because the customer who buys good substantial music never tires of his instrument, while the owner of a machine who does not appreciate good music often tires of his machine very quickly."

Open New Columbia Department.

Spear & Co., the well-known furniture house which has opened a new building on Thirty-fourth street near Fifth avenue, is maintaining a very attractive talking machine department devoted to the Columbia line exclusively. J. A. Friedman, well-known in the local talking machine trade, is manager of this department, and he has arranged to carry a complete stock of machines and records and give the Columbia line aggressive exploitation.

De Luxe Model in Popular Demand.

"Our sales last month very nearly equaled those of December," said George Thornton, Jr., of the Pathé Shop, 487 Fifth avenue, which handles the products of the Pathé Frères Phonograph Co. exclusively. "The best selling Pathephone during the month was our new $225 DeLuxe model, which is being sold as fast as we can receive the stock from the factory. The artistic lines of this instrument have won praise from all our customers, and we expect this model to be the leading Pathephone in this territory. Record sales were very satisfactory, and the records which are now being produced at our factory are being praised by experts as representative of the highest type of record production. During the past week or two we sold a number of complete sets of operatic music to well-known people in the musical world. Our customers are awaiting with interest the first records made by Muratore, the celebrated tenor, and there will certainly be a big demand for these records." One of the recent additions to the sales staff of the Pathé Shop is George Oliver, formerly connected with Thomas A. Edison, Inc.

Heavy Featuring of Records.

In chatting with a World representative anent business conditions, Charles F. Bruno, C. Bruno & Son, Inc., 353 Fourth avenue, Victor distributers, reports that conditions are fine and that from the sales sheets there is every indication of dealers featuring records in a very heavy way. "Special attention in the record field, I find, is prolific of not only financial results, but when a customer gets into the habit of coming to a dealer's store, and he gets the right kind of service, he is bound to continue business. It behooves dealers, therefore, to maintain a good stock of records so that they won't have to subject their customers to the inconvenience of waiting for several days."

Best February in History.

Thomas H. Fletcher, retail manager of the Aeolian Co., in a chat with The World said: "February was the best month in the history of the retail division of the Aeolian Co. Our Aeolian-Vocalion department achieved phenomenal sales totals, and our figures for the month show a very large increase over February of last year." The Aeolian Co. is conducting a remarkable campaign in the local newspapers on behalf of the Aeolian-Vocalion. This campaign is particularly noteworthy for its dignity and effectiveness, the sales arguments being presented most interestingly.

Active Record Trade.

The G. T. Williams Co., 217 Duffield St., Brooklyn, N. Y., Victor distributer, closed a very satisfactory February, notwithstanding the general shortage of all types of Victrolas. The company reports a very active record market with the dealers enthusiastic regarding the outlook.

Excellent Newspaper Publicity.

The Sonora Phonograph Corporation carried a splendid full page advertisement in the rotogravure section of one of the leading Sunday newspapers. This advertisement presented the Sonora salon at Fifth avenue and Fifty-third street, and also featured the "Invincible" model of the Sonora line. The advertisement was unusually effective, the delicate rotogravure tints being in harmony with the dignified character of the text.

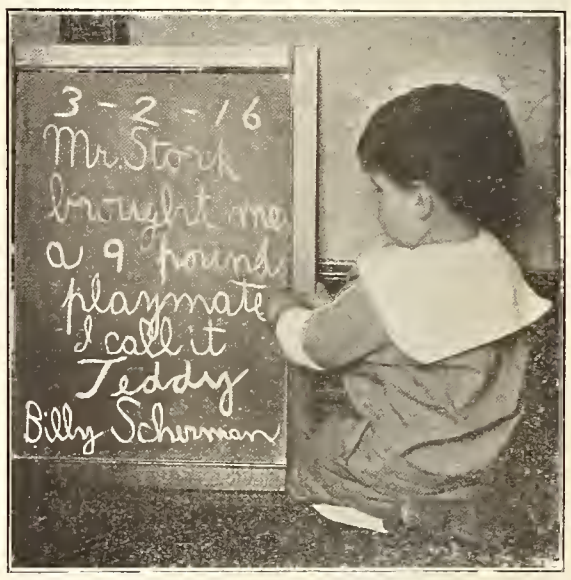
Duplicate Fall Trade.

"Our dealers report an even greater demand for Victrolas and Victor records than they experienced during the fall months," said R. H. Morris, of the American Talking Machine Co., 368 Livingston street, Brooklyn, N. Y., Victor distributer. "We all appreciate, of course, the fact that there is a tremendous scarcity of machines, but it is certainly gratifying to note that our dealers are closing a bigger business than ever before. This also applies to our own institution."

"BILLY" DOES THE ANNOUNCING.

Younger Scherman Tells of the Arrival of a Nine-Pound Advertising Man in the Family —A Decidedly Novel Announcement.

The Columbia Graphophone Co.'s advertising department has achieved distinction throughout the trade because of the originality and individuality of the various publicity ideas which it has sponsored. This idea of originality is characteristic of each and every member of the department,



Billy Scherman and His "News."

which includes William S. Scherman, one of the most popular members in the Columbia executive offices.

Mr. Scherman is so imbued with this doctrine of originality that it was only to be expected that his friends would receive a decidedly original announcement of the arrival at his home on March 2 of a nine-pound baby boy. He did not disappoint his friends, as each one of them received a post card similar to the picture shown herewith. As the text so well sets forth, there are now two boys in the Scherman family, and "Billy" Scherman, who announces the arrival of his new playmate, is already giving indications of following in the footsteps of his father by displaying a keen interest in the Columbia product and a fondness to try out unique, though intensely practical, ideas.

EDISON SPRING WEARS WELL.

There was recently received at the factory of Thomas A. Edison, Inc., Orange, N. J., a set of old style concert phonograph spring barrels for the purpose of having the springs renewed. The spring barrels belong to a machine owned and used by A. M. Neill, of Hatboro, Pa., for the past sixteen years, and the only fault found was that the springs had relaxed. Mr. Neill ordered new springs supplied as soon as possible so that he may again have the use of his phonograph.

The Shelton Motor Increases Machine and Record Sales

Retail Price, $17.50

The Shelton Electric Motor will enable you to sell an "electrified" machine to every prospect who enters your store. It can be used equally as well on a $25 machine as on a $200 machine. It also increases record sales by stimulating the customer's interest in music and creates a new enthusiasm in his machine.

The Shelton Electric Motor is simply placed against the turntable, and does not require even the turning of a screw. It does not interfere with the spring motor in any way, but, on the contrary, ***saves*** the spring. Either motor may be used as desired. Made for any lighting circuit. Instantly attached and is not affected by fluctuation of current.

Patents protected by our own and allied interests. Injunction and accounting will be asked for against any manufacturer or dealer making or selling an infringing motor.

Write to-day to nearest office for dealer discounts and special proposition.

Columbia Graphophone Company
Woolworth Building, New York

UP-STATE VICTOR DEALERS ACTIVE.

V. W. Moody, Sales Manager of the New York Talking Machine Co., Finds on Trip Retailers in New York State and Pennsylvania Making Preparations for Unusual Business.

V. W. Moody, sales manager of the New York Talking Machine Co., 119 West Fortieth street, New York, Victor distributer, returned last week from an extended trip through New York State and Pennsylvania. Mr. Moody's observations and

V. W. Moody.

comments regarding his trip are most gratifying in that they indicate that without an exception Victor dealers throughout this territory are making improvements and preparations for an increased Victor business which is little short of astounding.

As outlined below by Mr. Moody, the activities of many of the Victor dealers visited on this trip will give a good idea of the optimism and prosperity of the entire Victor retail fraternity.

In Rochester, N. Y., Burley & Biesinger, whose home office is in Buffalo, have recently taken over the store of C. Kurtzmann & Co. and are remodeling the entire interior. The store is being redecorated, and the installation of additional booths and record racks has been contracted for, together with an elaborate outdoor electric sign. Sibley, Lindsey & Curr, prominent department store, has moved its Victor department from a basement location to a prominent third floor space, installing new booths and new record racks. Edwards & Co., another large department store, are making very material improvements in their Victor department.

In Syracuse, N. Y., W. T. Crane has taken a new store on Salina street, and is converting the main floor into a Victor department, with sufficient display room for a limited number of art pianos. Leiter Bros., Salina street, are also preparing to make extensive alterations and improvements.

In Binghamton, N. Y., Fowler, Dick & Walker are installing four more booths in addition to their already substantial equipment.

In Wilkes-Barre, Pa., Landau's music and jewelry store has just completed an installation of ten modern booths.

In Scranton, Pa., Stoehr & Fister are making interior alterations and installing two handsome machine exhibition parlors.

In Allentown, Pa., G. C. Aschbach is making one of the most radical alterations of any of the dealers visited by Mr. Moody. This concern has moved its Victor department from the second to the main floor, and a battery of record and demonstration rooms and a magnificent reception salon have been constructed. Hartman & Laushe, who have just entered the Victor business, are installing substantial and modern equipment, and when alterations are completed will have a most attractive store.

In Easton, Pa., the Victor department of W. H. Keller & Son shows a remarkable development that is most gratifying. A few years ago this concern had a very small exhibition of Victor machines and records, with practically no department and situated far back in the extreme end of the store. A short while ago the Victor line was put into the center of the store and a few demonstration rooms installed. Now the company has a Victor department which is one of the finest that can be found in the East. It is located in the most prominent part of the store, and the officers of the store are trying to figure ways and means whereby they can install additional rooms.

The American Vitaphone Co., capitalized at $400,000, was incorporated in Delaware this week for the purpose of engaging in the manufacture of talking machines. The incorporators are: Charles H. Howe and Ira L. Cochrane, of Plainfield, N. J., and Claude Wheeler, Columbia, Mo.

A BIG TALKING MACHINE CENTER

Is the Republic Building, Chicago, Where Eleven Different Machines Are Displayed.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 9.—What is perhaps the most comprehensive display of talking machines in any one building in the Middle West, and perhaps in the country, is to be found in the Republic Building at 209 South State street. Here, under one roof, the talking machine buyer has his choice of eleven machines, which range in size from the small metal variety to the largest cabinet machines. On the ground floor is found the Pathé Shop. On the fourth floor in the establishment of A. H. Rintelman can be found the Vitanola and the Vanaphone. On the fifth floor in the Tone Shop are displayed the Columbia, Edmundson and the Wondertone. On the seventh floor the Columbia is again found in the warerooms of F. S. Spofford. The Sonora phonograph can be had on the tenth floor; the Lyraphone is shown in the Lyraphone office, also on the tenth floor; the Knabe-Crystola on the eleventh floor in the office of Al. Bruckner; the Playerphone on the sixteenth floor, and the Ariol on the seventeenth floor.

INCORPORATED.

The Synchrophone Co., of Chicago, has been incorporated with a capital stock of $15,000. The incorporators are N. D. Cross, W. F. Mayer and J. P Grier. The proposition relates to talking machines in combination with moving picture films.

RECORD SALES A BIG FACTOR IN BALTIMORE TRADE

Recent Visits of John McCormack, Billy Sunday and Others to That City Serve to Stimulate Business—Columbia Graphophone Co. Withdraws from Local Retail Field—Wholesale Trade Excellent—Stock Shortage in Various Lines Being Relieved—News.

(Special to The Talking Machine World.)

BALTIMORE, MD., March 9.—A good talking machine business for February was reported by most of the houses, despite the fact that there was still a shortage of goods by most of the houses and there was not as good a supply of records the first part of the month as the demand required, but toward the latter part of the month the supply came along in good shape.

There were several things that helped to stimulate the sale of records during the week. One was the appearance of John McCormack in a recital at the Lyric. A great deal of space was devoted in the newspapers to him, and many of the firms of the city used advertising space to call attention to his numerous records. All of the shops reported a big sale of the McCormack numbers.

"Billy" Sunday in Baltimore is also aiding record sales, especially those records that have the Homer Rodeheaver hymns. Rodeheaver, who is Sunday's musician, gave quite an interview on people dancing to his music in Philadelphia.

One of the big changes in the local field was the announcement of the passing of the Columbia Graphophone Co. entirely out of the retail business in this city. In future the Columbia headquarters here will handle only wholesale business and take care of distributing to its customers in this city and the field it handles. A. J. Heath, who has brought the business of the Columbia line along by leaps and bounds in the less than a year and a half that he has been here, will remain in charge of the local headquarters of the Columbia.

The Columbia headquarters on North Howard street where both retail and wholesale business was handled by the Columbia and which is a very attractive establishment, will be continued as a retail emporium under the name of the Columbia Grafonola Shop. A. & J. Oldewurtel, the pioneer Columbia dealers in this city, and who conduct Columbia stores at 307 South Broadway and 566 North Gay street, will conduct the Grafonola Shop. The entire Columbia establishment remains at the Howard street shop and an entire new and modern equipment for distributing the Columbia line will be established in a new five-story modern warehouse on West German street.

"Business is good with us," said Mr. Heath. "Despite the cry of shortage of machines, business of February went ahead of February of last year by a good margin. The new Columbia headquarters, which will be strictly wholesale, will permit us to carry ten times the amount of stock on hand and we will also carry the full American and foreign series of records. In a little while there will be no shortage of machines."

The entire Columbia staff will go with Mr. Heath to the new headquarters with the exception of W. E. Collins, who has become assistant manager to Mr. Crowley in the talking machine repartment of the Hub. W. L. Eckhardt, of Philadelphia Columbia headquarters, visited here this week.

For E. F. Droop & Sons Co., Inc., Victor distributers, Mr. Roberts said: "February to us was a disappointment. We failed to get near enough machines and we ran back a little on February of last year. There was also a shortage in records, but toward the end of the month records came along in pretty good shape and that helped to stimulate the business, which was especially noticeable in the increased demand for McCormack records after his appearance here."

Jesse Rosenstein, for the National Piano Co., Pathé distributers, reports a good business in his line, with an increased supply of machines coming in and the customers of the firm are becoming better pleased. Two new firms—the Royal Furniture Co., 510 South Broadway, and William J. Wieland, 3509 and 3511 Eastern avenue—are now handling the Pathé line.

The Sanders & Stayman Co., Inc., the Vocalion representatives, report a big business here. Last week twenty machines of the $100 and $150 style were received, and all were sent out with the exception of two before the close of the same day. The firm is well pleased with the way the line is going. The company will move to its new headquarters the latter part of May.

Cohen & Hughes, Inc., Victor distributers, report a good business, but raise the cry of old—shortage of machines—but the business showed an increase just the same.

H. R. Eisenbrandt Sons, Inc., are unable to meet the great demand for Victor machines, so great is the local demand.

Milton Boucher, manager of the Victrola department of William Knabe & Co., reports that he is short of Nos. 10 and 11 machines. There has been a great increase in the record business.

Five large, sound-proof booths have been installed by the Hammann-Levin Co., dealers in Victor goods. The facilities for handling records also have been doubled. These improvements have been made on the first floor.

G. Fred. Kranz, president of the Kranz-Fink Talking Machine Co., is critically ill with pneumonia at his home. Alarm is felt for his recovery. He is one of the most popular men in the city in both the musical and business world and has a host of friends.

A unique feature of the Junior Assembly ball at the Belvidere last week was the sending out of invitations on a talking machine record. Those who received the records had to have a machine to understand what it was all about, and quite a few machines were sold through the unique scheme.

A new soundproof demonstration booth has been installed in the talking machine department of the Kipp music store at Manhattan, Kan.

PLANS FOR JOBBERS' CONVENTION.

Special Attention to Be Given to Educational Work at the Annual Gathering of the National Association of Talking Machine Jobbers to Be Held at Atlantic City in July.

The tenth annual convention of the National Association of Talking Machine Jobbers will be held at Atlantic City, N. J., the old favorite stamping ground of the jobbers, on July 10, 11 and 12, and for the first time since the conventions have been held at Atlantic City the headquarters will be made at the Hotel Traymore instead of the Chalfonte.

The entertainment committee of the association, of which A. A. Trostler, of the Schmelzer Arms Co., Kansas City, is the chairman, is fast completing arrangements for the convention and is outlining an attractive and ambitious program. Beyond the handling of the routine association business, the tenth convention will be devoted chiefly to educational work and constructive talks on the part of the members of the association and factory officials.

As the program is now mapped out tentatively, the business meetings will be held on Monday and Tuesday afternoons, leaving the mornings open for bathing, sailing or other pleasures in which the conventioners may desire to participate. Wednesday will be "Educational Day," when various talks on the different phases of the business will be listened to.

On Thursday, July 13, the members of the jobbers' association and their families will be the guests of the Victor Talking Machine Co. and will enjoy a special program provided by the company. Judging from past conventions there will be nothing lacking in the line of entertainment.

In view of the plans now under way, it is expected that the annual convention of the National Association of Talking Machine Jobbers for 1916 will be one of the most resultful in the history of the association. No effort will be spared by any of those in charge of the matter to make the convention instructive and profitable as well as entertaining to the many jobbers who are confidently expected to attend.

CLOSES IMPORTANT PATHE DEALS.

J. F. Collins, Sales Manager of Pathé Frères Phonograph Co., Meets with Much Success on Recent Trip Through the South and West—Reports General Wave of Optimism.

J. F. Collins, sales manager of the Pathé Frères Phonograph Co., New York, returned to his desk last week after an extended trip to the leading trade centers in the South and West, when, among other things, he closed several important deals

J. F. Collins.

whereby prominent concerns in this territory will be enrolled in the ranks of the Pathé jobbers. The names of these new distributers will be announced in the near future.

Referring to general conditions, Mr. Collins said: "From the reports I had previously received from our jobbers and travelers I had expected to find a fair measure of prosperity in the sections I visited, but I must admit that I was unprepared to find such a general wave of optimism and splendid industrial activity in every city, regardless of size.

"General conditions are excellent, and Pathé jobbers report the closing of a February far beyond their highest expectations. Pathé dealers are well pleased regarding the outlook for Pathé development, and in Chicago, where the employes of the Pathé Shop gathered for short talks on the Pathé product, optimism was substantiated by the individual enthusiasm of every man. All models of Pathephones are meeting with popular favor, and the American recordings of Pathé discs are being praised on all sides. My trip as a whole was gratifying in every respect."

Mr. Collins' comments regarding conditions are worth more than passing attention, as he is one of the veterans of the talking machine industry although a young man in point of years. He has been associated with every phase of talking machine development and has achieved signal success in his present important post.

THE PERFECTED THORPE MOTOR.

Interesting Development in That Talking Machine Accessory—Plans for New Factory.

Since making the first announcement of his improved electric motor for talking machines, some time ago, Walter Thorpe, 29 West Thirty-fourth street, has made a number of perfections in the motor in the matter of the standardization of parts, and plans are now under way for the equipment of a new factory in Mount Vernon, N. Y., for the manufacture of the motors in a large way. The low voltage on which the motor operates makes it possible to attach it to the ordinary electric light fixture without detracting from the usual value of the light or adding materially to the current consumption. For demonstration purposes the motor is also shown by a double switch with both direct and alternating current, and may be changed from one to the other without any appreciable halt in the operation of the motor or the playing of the record.

There are several new developments in the manufacture and sale of Thorpe electric motors that will be ready for announcement shortly.

TRADE IN SOUTHERN CALIFORNIA.

Coming of Good Weather Brings Thoughts of Spring Business—Shortage Still Exists on Certain Types of Machines—Victor Co. Officials Call on Chas. Ruggles—The Pathephone Shops Opens—Caruso's Gift Stolen.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., March 6.—Now that the rains are over and the weather finally settled down to normal, southern California is looking forward to a good spring business. Reports from most of the local dealers suggests that more business would be done if more stock could be obtained. There are still several finishes of machines in all makes that it is impossible to get on the Coast. A great deal of unjust criticism is being directed toward the dealers from customers who are using other finishes temporarily, while waiting for another machine.

The Birkel Music Co. was closed two days last month on account of the death of Mrs. George J. Birkel.

Eldridge R. Johnson, president of the Victor Talking Machine Co., and L. F. Douglas, vice-president of the same concern, accompanied by Andrew G. McCarthy and Philip T. Clay, of Sherman, Clay & Co., San Francisco, made a short call on Charles Ruggles, the local representative from Sherman, Clay & Co., a few days ago.

A. Graham Cook, the talking machine manager for the Birkel Music Co., exclusive Victor dealers, says business was never better and is on the increase.

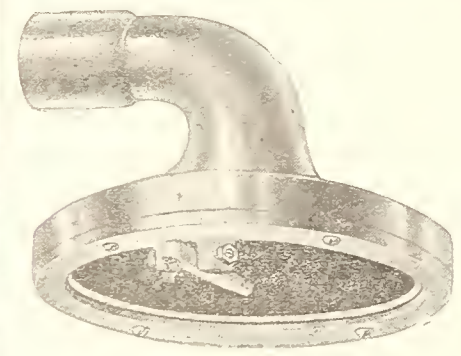
Clifford R. Ely, special representative of the trade promotion and wholesale departments for the Columbia Graphophone Co., is making a visit to the Coast. Mr. Ely is very well satisfied with business conditions in the West and looks for better times soon.

Mr. Hopper, of the Eilers Music House, Seattle, Wash., is making a short visit in Los Angeles. Mr. Hopper says they are opening a new store in Tacoma, Wash.

F. A. Dennison, the new Pacific Coast manager for the Columbia Graphophone Co., who succeeded W. S. Gray, has been in the city the last few days getting acquainted with the trade and looking over this territory in general. Mr. Dennison was formerly manager of the Columbia Co. in Detroit for several years.

A new talking machine store has been opened at 621-23 South Hill street under the name of "The Pathephone Shop." E. M. Bonnell, the well-known talking machine man and entertainer, will be in full charge. Mr. Bonnell is well and very favorably known in the world of music, having vast experience in that line for many years in Los Angeles. The Pathephone Shop will handle Pathephones and records exclusively. It will be one of the most modern and best ventilated parlors in Los Angeles. Daily concerts will be given by the company.

An old-fashioned phonograph presented six years ago to the Rev. James Tonello, 2360 Ivanhoe avenue, by the song bird, Caruso, was stolen from the minister's home late Saturday by an intruder. The machine was the only article taken by the burglar.



The VICSONIA

Puts Edison Record Music at the command of every one owning another leading make of phonograph. Doubles the value of their machine.

The **VICSONIA** reproduces Edison disc records perfectly on Victrola, Grafonola, Sonora and Crescent phonographs. Special type for Aeolian Vocalion.

The **VICSONIA,** with its **WONDERFUL DIAPHRAGM** and jewel point, is a revelation in reproducers.

Tested and endorsed by trade experts.
Easily attached without altering any part of machine.

The **VICSONIA** retails in the United States for $7.50, nickel plated; $8.50, gold plated. Liberal discounts to dealers.

Write for our exclusive territory proposition.

One Vicsonia, Nickel, will be forwarded any dealer in the United States for $4, or in Canada for $5. Cash with order.

POPULAR FOR SCHOOL USE.

How the Columbia "Favorite" Is Utilized in the Huntsville, Ala., School.

(Special to The Talking Machine World.)

HUNTSVILLE, ALA., March 6.—The Roy F. Ott Talking Machine Co. recently installed a Columbia "Favorite" Grafonola in a local school which is giving perfect satisfaction and is proving an important factor in the school's daily work. Referring to this machine, Mr. Ott recently said: "The first thing upon the opening of the school each morning is heard the 'Favorite' as the entire school marches to the tune of a very lively march until each room is closed. The machine is then carried to the chapel, where several operatic selections are played, subsequent to which it is used for calisthenic drills on the playground. At noontime the older girls use it for an enjoyable dance.

Exercising to Music of Grafonola.

"I make a visit to the school every thirty days with several selections from a popular opera or some good violin records, with a general run of educational records. The children are very enthusiastic regarding the machine, and the teachers state that they could not get along without it."

TO ENLARGE ST. CROIX PLANT.

Albert Paillard, Head of the Sonora Factory in Switzerland, Visits New York Headquarters.

Albert Paillard, head of the Sonora factory at St Croix, Switzerland, was a visitor to New York during the first part of the month, where he was in daily consultation with President George E. Brightson and Secretary Joseph Wolff, of the Sonora Phonograph Corp., 57 Reade St.

Plans were consummated with Mr. Paillard that will greatly increase the output of the Swiss plant in order to take care of the rapidly increasing business which is being booked by the Sonora Co.

Mr. Paillard reports no better conditions industrially throughout Switzerland, as far as manufacturing goods is concerned, than those in this country, there being a decided shortage in the necessary metals for the production of motors.

BRITISH FIRM WANTS MOTORS.

A firm in the United Kingdom writes The Talking Machine World that it is desirous of getting in touch with some American manufacturers of talking machine motors and accessories. Full information will be sent to those interested on application. Address The Talking Machine World, 373 Fourth avenue, New York City.

EDISON FEATURES FOR EASTER.

Two Old Easter Carols by the Carol Singers—Notable Artists Represented in Some Classic Numbers Suitable for the Season.

The revival of the old Easter carols has been aided materially by the recording on Edison Diamond Disc records, by the Carol Singers, of two old favorites, "The Happy Bells of Easter Day" and "Let the Merry Church Bells Ring," both carols that have been sung at Easter since time immemorial. The makers of these records consist of a group of vocalists gathered together for the explicit purpose of reproducing these old songs and preserving them for posterity.

In connection with the two carols, the Edison special Easter record list contains a number of other selections that are particularly appropriate to the season. "Agnus Dei," one of the sacred compositions of Bizet, the composer of "Carmen," sung by Marie Rappold, and "He Shall Feed His Flock," a recitative and air from the "Messiah" of Handel, sung by Christine Miller, are two of the most notable of these Easter numbers. Another splendid feature of the list is "I Know that My Redeemer Liveth," from Handel's "Messiah," sung by Julia Heinrich, of the Metropolitan Opera Co. Other selections that are particularly appropriate for the Easter season are Granier's "Hosanna," sung by Arthur Middleton, bass of the Metropolitan Opera Co.; "Coronation March" and "Praise Ye," Sodero's Band; "Ave Maria," Bach-Gounod, Charlotte Kirwan, soprano, and Isidore Moskowitz, violinist; "With Virtue Clad," Marie Sundelius, soprano; "Soft Southern Breeze," Reed Miller, tenor; "Gloria," Twelfth Mass, Mozart, Gregorian Choir; "Hallelujah Chorus," Handel, Oratorio Chorus. Altogether, the Edison Laboratories have almost surpassed themselves with an offering of records that have a most particular appeal at the Easter season.

COLUMBIA USED IN HOTEL.

New Model Concert Grand Attracts Much Attention and Is Used for Hotel Dances.

(Special to The Talking Machine World.)

COUNCIL BLUFFS, IA., March 10.—A Columbia Concert Grand Grafonola, one of the new models of talking machine fashioned after a baby grand piano, attracted much interest Sunday at the Grand Hotel, and again Monday evening, when it furnished the music for the Monday Night Club's dance.

Factory representatives have been demonstrating the Grafonola here for some time. The new model is operated with an electric motor which is the same as that used in the Dictaphone, and has an automatic switch which stops the motor at the end of the record.

INVENTS SHOCK ABSORBER.

A. C. Rutzen Devises Talking Machine Accessory Which Eliminates Rasping Sounds.

(Special to The Talking Machine World.)

CLEVELAND, O., March 10.—A shock absorber for talking machines has been invented by A. C. Rutzen, the inventor of the spring motor, which will eliminate 90 per cent. of the rasping, popping sounds, it is claimed. The device is half as big as a man's thumb, and connects the needle with the sound box. It holds the needle at an angle of 90 degrees, instead of 45, and thereby is supposed to save wear and tear on records.

PROFESSIONAL DEPARTMENT BUSY.

The professional department of the Columbia Graphophone Co., which is established at the recording laboratory, 102 West Thirty-eighth street, New York, has been unusually busy the last few weeks, and Henry D. King, manager of the department, reports the closing of numerous deals with well-known artists in the professional field. The records recently made under Mr. King's direction by Weber & Fields, Bert Williams, Frank Tinney and Miss Marguerite Farrell are all achieving success, and Columbia dealers are ordering them in large quantities.

INCREASING ITS FACTORY OUTPUT.

The Artophone Co. Closed Big Month in February—Many New Jobbing Agencies Established—Good Work of Robert H. Cone.

(Special to The Talking Machine World.)

ST. LOUIS, MO., March 6.—The Artophone Co., 454 North Boyle avenue, closed an unusually good month in February, and at the present time has plans under way to materially increase its factory output, although the capacity of the plant was doubled only a short while ago. Although it has been establishing many new jobbing agencies and on an average of ten new dealer accounts every day, the company has been able to get out all its orders within a week's time.

The Artophone Co. is also organizing a record department, which will be in full swing about May 15, and which will enable the company to supply its dealers with a complete line of records.

The success that the Artophone Co. has achieved may be attributed in a considerable measure to the excellent quality of its product and the splendid executive and sales organization which is directing the company's affairs. During the past few weeks several letters have been received from well-known music lovers in this city praising the Artophone machine and commenting particularly upon the value and quality represented in the No. 55 Artophone which retails at $55.

Robert H. Cone, Jr., president and treasurer of the Artophone Co., is a man of unusual aggressiveness and force. He is thoroughly conversant with all phases of the talking machine industry and is extending to Artophone dealers service and co-operation which is producing profitable results for the individual dealer.

Many a man who in his small village is considered an example for the highest ambition would fail to attract attention in a large city. Many another man whose ambition for power and wealth has never been rewarded in the great city needs only to change his location a few miles, and, presto! he is great and rich on the instant.

John Lewis is now in charge of the talking machine department of the Harless & Frasold store at Gulfport, Miss.

"Masked Marvels"

THERE are no masked marvels in the distributing business. Everything is out in the open, with the exception of the brains back of any house. In spite of our fire, and we are rapidly getting into shape, we are doing more business from ALBANY in a week than has been done before in two months.

This is 866⅔ increase, and in our new quarters, backed by an able staff, we will increase this percentage. Dealers are with with us everywhere, because we actually render SERVICE. There are no plays at substitution; no drawn-out time between letters or orders; no "stalls" in answering questions, nor any other attempt to make your work hard when you are needing the machines and records to make the profits you should get.

Nowhere in this country has a distributor shown such amazing growth as the Gately-Haire Co. Why not find out for yourself why this is so?

GATELY-HAIRE CO.

JOHN L. GATELY, President JAMES N. HAIRE, Treasurer

New Address: 121 North Pearl St.

ALBANY, N. Y.

"Albany—for Capital Service"

THE TRADE IN THE SOUTH.

VIRGINIA TRADE UNUSUALLY ACTIVE.

Higher Priced Machines and Records in Big Demand—Heindl Working to Assist Dealers —"Machines That Play with a Plate."

(Special to The Talking Machine World.)

RICHMOND, VA., March 6.—It is astonishing to note the unusual business conditions existing in the talking machine trade of Virginia. Reports from various parts show an unusual scarcity of stock, while the demand is greatly in excess of any previous year.

An interesting feature in connection with the record trade is the fact that the higher priced records are enjoying the center of most activity from a sales standpoint, while the machines selling from $100 to $200 also have a big market. Dealers report very little trouble from a collection standpoint, this being no doubt due to the fact that there is plenty of money in circulation and that the population of the State is getting its share of the present industrial prosperity.

Louis A. Heindl, of Walter D. Moses & Co., Richmond, Va., Victor distributer, when interviewed by a representative of The Talking Machine World, stated that at the present time every energy is being utilized for assisting the dealer.

"Owing to the shortage of cases," he remarked, "every time we get a shipment we are up against a problem, for we have more orders on hand than the total number of cases received. Many times we are short in our retail department simply to help out a dealer who has a sale that it is necessary to close, but we are believers in service to the dealer."

It seems to be the impression that cylinder records and machines are in great demand among the colored people of the South, but E. Bowman, of C. B. Haynes & Co., of this city, stated that while his house transacts a large business in Edison cylinder records and machines, the colored trade buys very little of this particular class of merchandise. It seems that this trade wants "the machines that play with a plate," and he says that it is seldom that you find anyone of African hue referring to records as being disc records. They are all "plates." Consequently, the sale of Edison Diamond Disc phonographs, for which the Haynes Co. is a wholesale distributer, is big with all classes of trade.

Mr. Bowman went on to say that the stock of cylinder records constantly on hand embraces about 40,000, and that the outlying districts, particularly in the farming section, are an excellent market for this class of merchandise.

J. G. CORLEY DOUBLING WAREROOMS.

Site Has Been Secured for the Erection of an Addition to Present Warerooms—Will Be Devoted Exclusively to Wholesale Trade.

(Special to The Talking Machine World.)

RICHMOND, VA, March 6.—In the minds of the trade there is an association of Richmond and Corley that makes these words synonymous. The trade will be very glad to know that preparations

J. G. Corley.

are now in force whereby the extensive warerooms of the Corley Co. in this city will practically be doubled. Some time ago J. G. Corley, head of this organiation, acquired the land running from the back of his present location on Broad street right through to Grace street, the latter rapidly becoming the high-class business street of the city. Ground will be broken in May, and by September 1 it is the expectation of the company to be well settled so that the fall business can be properly handled. With the new addition the entire wareroom will be 300 feet long. The space in the basement is 150 feet long by 60 feet, and the addition gives a space 150 feet long by 30 feet, a total of approximately 14,000 square feet, which will be devoted exclusively to the promotion of the wholesale end of the Corley Victor business, the latter being under the charge of F. W. Corley and Fred R. Kessnich.

In addition to the use of this big building the company also maintains a large warehouse wherein an adequate stock of both pianos and talking machines are stored.

"Richmond is excellently situated," said F. W. Corley, "so that it can take care of Victor dealers from the South in an efficient manner. We enjoy fine transportation facilities, and by the plan of co-operation that we utilize in not only securing dealers but in holding their confidence in business, we are enabled to show a rapid growth in sales from month to month."

Mr. Corley went on to say that the business situation throughout the South is greatly improved, and his idea is that this will be a banner year.

AS AN AID TO THE SHY.

"As I think back," said Aunt Martha, "I wonder how we can ever get along without the phonograph.

"We would talk for a time to the shy young man caller about the weather, and then we would discuss the coming church picnic and hope we would have good weather for that, but that about used up our topics of conversation.

"It helped a little for me to play two or three pieces on our good, old square piano, but when I swung around on the piano stool—there were not so many piano benches then—we would come to another silent spell; and then pretty soon the shy young man would say:

"'Well, I guess I'll have to be going now.'

"But now," went on Aunt Martha, "why, now when the conversation lags you have the phonograph.

"'Oh, have you heard this?' you say to the shy young gentleman, and then you put on the disc and crank the machine.

"From that time on there is no trouble. In the course of time, when the young man rises to go, you hear not, 'Well. I'll have to be going now,' but this, 'My! I didn't know it was so late,' spoken with animation. He has had a pleasant evening.

"Really, it seems to me that to shy young people the phonograph is nothing less than a blessing. I don't know how we ever got along without it."

The business man who comes in daily contact with the commercial traveler can have but one opinion of him—respect.

DO IT NOW! YOU HAVE CAPITAL INVESTED IN YOUR STOCK. IT WILL BE SECURE IF THE STEVENS BILL PASSES THE NEXT CONGRESS.

213 EAST BROAD STREET, - - RICHMOND, VA.

Victor Repairs

—there's tangible profit in this for the dealer. Factory-trained experts and up-to-date equipment puts us in a position to handle your repairs with profit to you.

COMMENTS ON THE "RECORDS ON APPROVAL" POLICY

Views of an Independent Observer on a Question Now Being Discussed by Talking Machine Dealers Throughout the Country of Interest—Takes Both Sides of the Question in Detail and Makes Some Valuable Sug estions Along Constructive Lines.

[At the present time there appears to be a well-defined movement among talking machine dealers in all sections of the country to cut out the plan of sending out records on approval. In many cases the privilege of testing and selecting records at home has been grossly abused by the customers with the result that the dealers have been forced to curtail or eliminate entirely the approval scheme from their business for their own protection. There is another side to the story, however, and a talking machine owner, who is a reader of The World, offers the following as the view of the customer on the approval privilege. The opinion is worthy of the close attention of the dealer.—EDITOR'S NOTE.]

There is a good deal printed in the columns of The World nowadays about what the dealers have to say regarding the subject of sending records on approval, but nothing is heard of what the consumer thinks of the matter.

As a consumer who has taken out many records on approval, and who owes his present interest in talking machines to this method of selling records, I desire to express a few opinions on the subject, both pro and con, and also to make a few suggestions which may possibly prove valuable to dealers and consumers alike.

To begin with, suppose we marshal the facts in the case, first taking those for records on approval, then following up with those against, and winding up with one or two practical suggestions.

FOR.

1. Many people do not have the time to visit the store and listen to several records.

2. Very few booths are anything like soundproof, therefore it is difficult to hear the reproduction perfectly.

3. Most booths are small and the customer is forced to sit within a foot or so of the machine. This makes it hard to judge a record properly.

4. Attendants often rely on the use of the loud needle to offset distracting noises in the store, and as a result the customer forms an erroneous opinion of the volume of tone.

5. Records played in the home, on the owner's own machine, give the effect that he is paying for, and not a false effect.

6. The store enlarges its customers by selling records on approval, for by this means it serves just so many more people.

7. If the customer invites friends to his house to listen to the records which he has taken out, one or more of these friends may become a possible customer. I know of a case in point. A neighbor of mine who had never heard a talking machine came to my house and listened to some approval records, with the result that in a few weeks she purchased a $100 "talker."

8. There is a psychological basis for the fact that a great deal of the pleasure connected with talking machines lies in playing the records yourself. This pleasure you are debarred from when you hear them in the dealer's store.

9. If other people are waiting a turn to try out records it is trying to a nervous person to endeavor to concentrate his or her attention on the reproduction of a record played in the store. This element of hurry is absent when the records are taken home.

AGAINST.

1. Customers are careless in handling records; they are spread out in piles on a table instead of being kept in envelopes when not being played.

2. Customers use loud needles, or use one needle for several different records.

3. Customers drop the sound box on the record with too much force, driving the point of the needle in the margin or in the grooves themselves.

4. Customers allow the needle to remain on the record after the reproduction is finished, causing the label to become marred.

5. In using the automatic stop customers swing the point of the needle too near the record and frequently scratch the surface.

6. Customers do not always clean their hands from grease or food before using the records, leaving spots which gather gritty dust.

7. Customers crack records and do not report the fact.

8. Customers often return *all* the records taken out without making a purchase.

9. Unless sufficient actual business results from letting out records on approval the cost of handling and the attendant losses will show a debit on the account.

10. Sales of records are sometimes lost through the records themselves being out on approval.

Doubtless, my friends, the dealers could supply many more points against the "on approval" system. They probably know of abuses of which I have not been aware, such as the substitution of records on the part of the customer. Right here let me say that I believe that this whole situation is susceptible of improvement through the medium of education. By this I mean education of the dealer and his clerks as well as of the public.

As charity begins at home so should education likewise. From my own observations I am positive that 50 per cent. of the damage that is done to records is the work of careless or ignorant clerks. It is incredible the way the records are handled in some stores which I have visited. Records are piled on chairs, tables, even on the floor; exposed to dust, heat and injury from striking. They are often wedged so tightly in the racks that they become cracked in the process of moving in or out. Loud needles are used exclusively because of the volume of tone produced. The same needle is used for two or more records just because it is too much trouble to open up a new package.

Let the dealer watch for the conditions which I have outlined, and, having found them, let him call his force together and give them a talk on the proper way to handle stock. It is not necessary to be censorious or sarcastic in this matter; such a course will defeat itself. Remember the human element must be treated with tact. If an offender will not or cannot improve, then eliminate that one from the store force.

Through the clerks the public can and must be educated how to handle records. I am convinced that most of the damage done to records on approval is through ignorance. Too many clerks regard the sale of a machine the same as the sale of a pair of stockings; in other words, something which the customer knows how to use and which he cannot misuse. Now, a talking machine is really a musical instrument, and the average buyer knows little or nothing about the possibilities of abusing it. Clerks should not wait to be asked for information about how to handle machines and records; they should volunteer it, though, of course, the information should be imparted in a tactful manner.

There is another way of educating the public in the proper use of records taken out on approval, and that is through a system of application blanks. Let every customer who takes out records sign one of these blanks each time, and let him live up to the terms therein, and I'll wager he will absorb more or less information in a few months.

Here is a sample form which may be adapted to local needs:

JONES' MUSIC HOUSE, Jonesville, Conn.:
The undersigned makes application for the use of .... records, as per list, to be kept .... days, and agrees to the following conditions:
1. Only fibre or Tungs-tone needles will be used in playing the records.
2. The needle must be lowered *carefully* onto the margin of the record and pushed into the first groove.
3. Records must not be removed from the envelopes and spread on a table while playing. Keep all records covered except the one which is being played.
4. The hands must be free from grease or dust when handling records.
5. All cracked or broken records must be paid for.
6. In case of damage to the label by the needle point, either that record or some other from stock must be kept.
7. .... of the records must be kept, either selected from the lot or from the stock on hand.
8. Records must not be *loaned* to others than the applicant.
9. Do not allow children or incompetent persons to run the machine while trying these records.
10. When not playing the records keep them in their envelopes, flat, in the box in which they are shipped, all the 12-inch ones on the bottom and all the 10-inch ones on top.
Signed .....
Address .....

I respectfully submit the above ideas to my friends, the dealers, as the result of experience gained on the other end of the proposition.

Mr. Dealer:— This Cabinet Sells on Sight— Because

—your customer files or finds any record instantly—adding 50% to enjoyment of his Record Library.

The Simplest, Quickest System ever invented with largest capacity for records—at lowest filing cost. Creates a new interest and starts the overloaded customer to buying records again.

BIG PROFIT FOR YOU

—order a sample to-day naming your Jobber.

Unit Holds 360 Records

Combination Model 1-A-300 adjustable for 10″ and 12″ records. All finishes to match machines.

A One-Section Crown and Base Unit, capacity 360—10″ or 12″ records (Index numbers included), $15.50.

Extra sections for Records, Music Folios, Player Rolls, etc., can be added as required.

Mrs. S——, in Erie, says:
—"My Music Room was full of cabinets and albums—now my 900 records are all in reach and I can locate any one record in a moment. You should sell thousands as I've never seen a system to compare in any way with this—I will need one more section soon."

Special Models for Dealers' Stock

LACK OF TRAINED SALESMEN IS FELT IN ST. LOUIS.

Demand for Salesmen Who Know the Technical Details of Machines Far Exceeds the Supply—Silverstone Holds Educational Meetings for Dealers—Electric Machines Much in Demand—The Advantages of a Good Trade in Records.—Other News.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., March 9.—Whenever a St. Louis talking machine dealer wishes to dream of happiness he outlines his plan for work when he gets an ample stock of machines in his warerooms and is assured that he will have his future orders filled promptly and with the styles of machines that he orders. There are some dealers in St. Louis who have not yet straightened out all of the kinks that got into their trade during Christmas. There is no dealer in St. Louis, so far as a casual inquiry shows, who feels that he can organize an up-to-date, energetic campaign and be assured that he will not have to slow up by the time he is in fairly good working shape.

But there also is another fly in the ointment for the dealer who wants to go ahead. This is the lack of trained, competent, talking machine salesmen. Manager Hallahan at Aeolian Hall voiced this need. He said:

"We recently have put on three men, one who was with us some time ago, and two new ones. The new ones were hired on their personality and we are having school for them and some of the old ones every day. It is impossible to hire desirable men these days who know what a talking machine is in detail. The trade is using up competent men faster than they are being made. A trade campaign must be organized with green men. The business is so new and it recently has changed so that the men who come in for jobs are not really fitted for the work.

"Until recently talking machines were sold as a novelty and the field was so great that actual competition was not the big thing. The really important thing was to convince the prospect that they could afford to buy a talking machine. Now most prospects know that they want a machine, which they regard as a musical instrument. The one big question is what machine to buy. They must be shown where they get the most for their money. The man must know his own machines intimately, inside and out; also he must know the other machines. He must know something about tone and about music.

"All of these things are advancing the salesmanship requirements of the business to a point where it is not possible to pick up a man who has been successful in selling any old thing and expect him to get results."

Mark Silverstone, of the Silverstone Music Co., jobbers of Edison Disc machines, holds the same ideas as to training salesmen, and in organizing his sales force has devoted much time to technical details. Recently he has been much interested in training the retail dealers and their repair men. These dealers are frequently invited to come to the Silverstone Co. warerooms, bring their repair men along, and have any mysteries of the inner workings of the machine explained. The dealers show much interest in these meetings. The first of this month there was an enthusiastic meeting of this sort at the Edison warerooms, at which D. Lossen, a mechanic from the Edison laboratories, was present to explain the changes in the motor and to instruct the newcomers in the rapidly growing army of repair men.

At the Columbia warerooms Manager Irby W. Reid is drawing maps of the excellent prospects for this spring, and says that he has completed all means of preparations except the supply of munitions, but at the rate that machines are coming now he will be able to give less time to the distribution problem and more to advancing business. According to the financial data for this trade district gathered by Mr. Reid, the present year will be the very best ever. His scouts have reported on practically all sections of his division. Wholesale Manager Salmon agrees fully with this view, and says that the city trade alone would have absorbed the entire supply of machines a good part of this winter.

J. J. Bennett, the wholesale ambassador, has finished up some deals in Illinois and is going south to see if Arkansas and Mississippi are living up to their promise of a few weeks ago.

Retail Manager Coughlin is predicting what a sensation he is going to make when he reports his sales of electric machines under the new price-list. The motor, he says, is a decided help in selling higher priced models. His chief worry is the limited supply of small machines for the spring trade, when the low priced machines are in best demand. Owing to floods in this district late last fall and during the winter, there is going to be a good deal of refurnishing of club and boat houses, and the talking machine folk are expecting an unusual run for these goods this spring because the talking machine has become known as a necessity to a club house, especially since the dancing craze has so strong a grip.

But, after all, it is the record business that is making the studious men of the trade and of kindred trades think long and hard. They see in this business a steady, week in and week out, trade that is well worth going after. It is an admitted fact that some of the local piano houses that have ignored the talking machines all along are looking enviously on the line since they have seen what a nice record business means to a house, what it means to have a long string of customers coming in weekly and investing from 60 cents to $5 a

Guaranteed For 1 Year

We guarantee you against legal complications.

The new TRITON No. 2

The enormous popularity of the Triton No. 1 came not alone from its surprising Tone and Compactness—but also because of its simplicity and Ready Portability—as a Companion in the Camp—on the Boat—on Auto Trips—and in Dancing Visits to friends who were without music. But we have had so many requests for a more Pretentious Phonograph for permanent location in the home—that—we bave produced the Triton No. 2.

RETAILS FOR $15

It is equipped with the Celebrated Triton Motor—and the Famous Triton Sound Producer—together with our new departure in arranging the Sound Chamber. Housed in a substantial Cabinet—finished in either oak or mahogany—not treated as so many cabinets are—to just a coating of coach varnish—but each cabinet is Hand Polished and Hand Rubbed—making a finish fit to associate with the best furnishings.

We have so arranged our Sound Chamber that the most Accurate Reproductions of the Artists' rendering are given to the record being played. The Pleasing Simplicity of the Cabinet is Accentuated by the Soft-Smooth effect of the finish. Together with this is accompanied the Strong Guarantee of all Triton Productions.

The Retail Price—$15.00—has been made to conform with the Popular Demand.

Sample machine sent for $7.50.

TRITON PHONOGRAPH CO. 41 Union Square NEW YORK

week. It is predicted that at least two piano houses that have heretofore ignored the talkers will be advertising at least one make of machines by next Christmas. During the last few weeks one piano house that has handled talking machines in an indifferent manner for two years and has ignored the record business has set about stocking the Edison line of records in amounts that will enable it to meet all ordinary demands, and is advertising for record business more strongly than it ever has advertised for talking machine business.

Indeed, the announcements of new lists of records are becoming quite an advertising event. All of the department stores and five or six piano houses advertise the new records of the makes they handle in liberally spaced ads until everyone who reads newspapers must realize that talking machine records mean a great deal. Some extent of the business in St. Louis may be judged by a statement of one wholesale manager of a local house, who said that his "hang-over" orders at the factory recently have averaged 22,000 records.

The Silverstone Music Co. recently asked the buyers of the Edison disc records to vote on the approval privilege extended. The letter explained that the company was installing five new demonstration rooms, and that every convenience would be extended to those wishing to hear the records there. A letter was prepared early in the month stating that the result of the vote was that 3,628 persons had voted for the privilege of having records for twenty-four hours on approval provided they retained 50 per cent. of those taken out and that 2,350 users had voted for "no exchange." As a result, the letter stated that the 50 per cent., twenty-four-hour custom would be continued.

The usual regulation in St. Louis, that approved by the Talking Machine Dealers' Association, is that the records can be retained for forty-eight hours, and that 25 per cent. must be retained. Recently the Stix, Baer & Fuller Drygoods Co., handling Victors and Edison disc machines, started to refuse any trial privilege, but although no loss of patronage was experienced the trial privilege was again resumed.

The Silverstone Co. has its five new demonstration rooms completed, and they greatly improve the appearance of the warerooms, although they are built as a second story of the demonstration rooms on the floor level of the main floor wareroom. They are reached by an easily ascended stairway and instead of dwarfing the other demonstration rooms, as feared, they rather create the impression of a larger room.

Mr. Silverstone did not attend the annual gathering of the Edison jobbers at the factory recently, and in his telegram of explanation he said, "If it is a boy, we will name it Edison." The reply received said, "Your excuse accepted, provided you do not let it occur again next year." In sending word to the jobbers that the boy had been named Mark Edison Silverstone, Mr. Silverstone wrote the chairman, "Mrs. Silverstone fully agrees and accepts the condition you placed upon my excuse."

C. W. Burgess, supervisor of the Central and Western zones for the Edison laboratories, recently was at the Silverstone warerooms getting some pointers.

One of the new Columbia dealers is the Walther, Wymore Furniture Co. at Columbia, Mo., who will install an exceptionally large and well fitted department. Another dealer who starts in well is the Crossin Pharmacy Co. at Eldon, Mo.

Manager R. H. Gordon, of the Pathephone Co., is in high spirits over the progress made by that company since the incorporation a month ago. His greatest trouble, he says, is keeping a stock of records to meet the demands of the trade in this district, which is outstripping all expectations in this regard.

Talking Machine Manager Staffelback, of the Hellrung & Grimm Furniture Co., the chief local retail outlet for the Pathé line, has been conducting his business in an open parlor, thinking that until the line was better established here he could better handle the trade in this way. Recently, however, he has been forced to conclude that demonstration parlors were a necessity. When he sent out the announcement of the last Pathé list of records he was besieged by a crowd that overran his entire talking machine headquarters and kept his demonstration machine going overtime, leaving little opportunity to demonstrate any other records that customers might inquire for. Also, this interfered seriously with his machine sales and demonstrations. So he arranged to build a series of talking machine booths at once.

Some new ventures into the talking machine sales recently have been made by the Thiebes Piano Co., which is selling the Starr machine. F. Beyer & Sons, one of the old piano houses, has ventured into the talking machine field with the Corona. The Field-Lippman Piano Co. is making a showing with the Artophone, which is advertised as the "St. Louis-made machine." This machine, which is made by the Artophone Co., organized here by the Cone family, well known in the local piano trade, has been attracting much attention.

J. W. Milligan, an Edison disc dealer of Carbondale, Ill., was a caller at the Silverstone Music Co. here early this month, accompanied by his bride, this being the first stop on their honeymoon trip.

The Koerber-Brenner Music Co., Victor jobber, is a firm believer in the reports that this section of the country is set for a banner business season, which will include talking machines. Accordingly it has made all plans for a big season and is meeting demands made upon it in excellent manner. It is having a minimum of complaints of service, and finds its dealers loyal and ready to support its efforts to better the trade.

A PECULIAR ACCIDENT.

(Special to The Talking Machine World.)

BELOIT, WIS., March 6.—While waiting on a customer recently A. V. Lyle, the well-known piano and talking machine dealer of this city, suffered a peculiar accident. Mr. Lyle was selecting records for a demonstration when a twelve-inch record, placed in the cabinet without an envelope, rolled out and dropped on Mr. Lyle's toe, injuring that member so badly that an X-ray photograph was necessary. The fact that it was a Julia Claussen record has not diminished Mr. Lyle's admiration for that famous songstress.

NOVEL VICTOR RECITAL ROOM.

Owens & Beers Give Demonstration in Cozy Room Underneath Their Main Floor.

The accompanying photograph, showing the recital hall in the establishment of Owens & Beers, New York, Victor dealers, is a fair example of what may be accomplished by up-to-date methods, even though floor space is at a premium.

The Owens & Beers Recital Parlor.

The Owens & Beers recital hall, which comfortably seats about fifty people, although considerably more than this number are accommodated when the occasion requires, is located beneath the main floor of the store, and the furnishings and decorations are most refined.

Owens & Beers make a specialty of having popular Victor artists appear weekly at their concert hall and render a program of the songs which they have recorded for the Victor library. This program is interspersed with selections on the Victrola, the whole combining to make a very enjoyable afternoon's entertainment.

In front of each seat may be found a pad and pencil, and the auditors are given every convenience to jot down the record numbers of the selections on the program which they may desire to purchase or hear again when the concert is over. The concerts are absolutely free, and such well-known artists as Charles Harrison and Harvey W. Hindermyer have appeared during the past month. The results from this high-grade method of publicity have been responsible in a measure for the rapid growth of the business of Owens & Beers in New York and vicinity.

One to Five Thousand Dollars
Extra Profits Will be Made by Dealers Who Sell Playerphones

The Playerphone sells from $60 to $160, comparing with other talking machines selling from $75 to $250. The Playerphone is a quality, popular price talking machine that will sell promptly when demonstrated to the best of trade. Our cabinets are superior, our motors and equipment first class. The Playerphone plays every record made without change of equipment. The Playerphone Talking Machine Company offers to Dealers terms which enable them to sell the instruments on easy payments and collect their money by the time they pay the Company, and make 100% profit. Dealers who order a sample Playerphone today and get in line for the agency of their locality will reap a harvest. Immediate action required.

REALISTIC MUSIC ON PHONOGRAPH.

"The Pussy Cat Rag" Stirs Up Canine Anger —Collie Nearly Demolishes Machine In Frantic Attempt to Chastise the Felines.

W. H. Turner, a member of the firm of Pettibone Bros. Manufacturing Co., 626 Main street, Cincinnati, O., is the owner of an Edison Diamond Disc phonograph of which he is very proud.

Mr. Turner also has a very fine Scotch collie, wonderfully kind and intelligent. King (the collie) has a superabundance of canine aversion for cats and rats. One has only to say "Cat" or "Rat" in King's presence to make every hair on his back bristle.

Among the many Edison records in Mr. Turner's library is one entitled "The Pussy Cat Rag," which is full of catchy music. At one point in this record the words "Rats" and "Kittie" are pronounced very clearly and distinctly.

One evening not long ago Mr. Turner gave an informal Diamond Disc recital at his home to a number of friends and relatives, among them being a Mrs. B——. Towards the close of the evening Mr. Turner, with the intention of giving his guests something a trifle more lively than the records he had been playing, started "The Pussy Cat Rag."

After it had been playing for a minute or so the basso said, very distinctly and clearly, "Rats," and the soprano replied equally distinctly and clearly, "Kittie, Kittie."

Just a moment later from another part of the house came a sound of scampering and barking and King, the collie, dashed down the steps to the reception hall, where the guests were seated. Barking loudly, King rushed across the room and made a leap for the phonograph from which came the basso's "Rats." Mrs. B——, who was seated nearest the instrument, made a grab for King and caught him by the tail, but not before the collie had pushed his paw through the grill and with one swipe tore aside the silken screen. King continued his frantic efforts to get at the rats and cats he supposed were inside the phonograph. All this time Mrs. B—— bravely held to King's tail with an iron grip. Such a tug-of-war did it become between Mrs. B—— and King's tail that many of the guests feared King's tail wouldn't hold out. Finally, Mr. Turner managed to drag the collie away from the phonograph.

Mr. Turner says that he will chain King the next time "The Pussy Cat Rag" is played.

Jacques Urlus, who sings for the Edison Diamond Disc exclusively, has found another great role in "Parsifal." He sang it for the first time at the Metropolitan on Washington's Birthday.

INCORPORATIONS OF THE MONTH.

The Mel-o-Tone Manufacturing Co. has been incorporated with a capital stock of $5,000 by James A. Harvey, V. B. Mays and E. Griffith Williams. The company's address is said to be 17 North Crawford avenue, Chicago.

The Masterpiece Talking Machine Co. has been incorporated with capital stock of $10,000 to engage in the manufacture and sale of talking machines. J. Godfrey, S. Mandell and A. H. Figner are the incorporators.

The Supertone Talking Machine Co. was incorporated at Albany recently by Emanuel W. Gluckman, Nathan Weissman and Anna Benrens, of New York City. The new concern will manufacture talking machines, its capitalization being $5,000.

The Central Pathé Phonograph Co., with a capital of $20,000, has been incorporated at Chicago by Arthur J., Arthur D. and Harry K. O'Neill.

The Weber Talking Machine Co., which will deal in machines, records and accessories, has been incorporated by A. Oblo and J. H. and G. Weber, of 242 Keap street, Brooklyn, with an initial capital of $5,000.

The Universal Phonograph Co., Hoboken, N. J., was incorporated the past month by the Secretary of State, Trenton, N. J., to engage in the manufacture of phonographs and phonographic supplies. The capital is $125,000, and the incorporators are Fred Kraft, Minnie Kraft and Frederick Heffner.

The Lynn Sales Co. has been incorporated to deal in phonographs and supplies by E. C. Frankell, W. L. Wray and R. A. Brooks, of 177 Belmont avenue, Jersey City, N. J. The capitalization is $20,000.

The Phonograph Co., of New England, capitalized at $25,000, has been incorporated at Boston.

The Riley Talking Machine Co., of Utica, was incorporated by Caroline, Sarah H. and George F. Riley, to deal in talking machines and accessories. The capitalization is $5,000.

The De Loache Phonograph Corp., of Dallas, Tex., recently incorporated with a capital stock of $10,000. The incorporators are: Ira De Loache, B. W. Carrington and D. W. Marshall.

The Stern Talking Machine Co., of San Francisco, Cal., was recently incorporated by F. Stern, J Stern, J. G. Sweet, D. Hadsell and M. Duffy. The capitalization is $50,000.

The Photoplay News Publishing Co., of Rochester, has been incorporated, with a capitalization of $8,000. The company will manufacture talking machines and records. The directors are Leo Bernstein, Bernard Habner and S. Sellinger.

The Tiffany Phonograph Co., of Englewood Cliffs, N. J., was incorporated at Camden, N. J., last week, with a capitalization of $5,000.

American Talking Picture Machine Corp., capital $6,000,000, to manufacture talking machines, picture machines and records for same, was incorporated in Delaware this week. Local Wilmington, Del., incorporators are: Herbert E. Latter, Norman P. Coffin and Clement Megner.

The Ford Talking Machine Co., of Baltimore, Md., has been incorporated with a capitalization of $5,000. The new concern will deal in toys and talking machines.

Four modern demonstration rooms and a large recital hall form part of the equipment of the Malley talking machine parlors in New Haven, Conn. Both the Edison and Columbia machines and records are carried.

The Cornish Co., of Washington, N. J., is about to engage in the manufacture of talking machine cabinets in partial substitution for the organs formerly manufactured.

TALKER THRILLS FIRE FIGHTERS.

Machine in Burning Store Starts Going and Gets Rescuers All Excited, It Appears.

The following thriller comes to The World under a San Francisco date line. The story is almost new:

At a recent fire in a business house at Hanford, Cal., the fire fighters and spectators were startled to hear a man singing in the midst of the flames. It was evidently impossible for rescuers to reach the spot, so several streams of water were concentrated around the source of the sound. The singing then stopped, but the firemen made their way into the building as quickly as possible, expecting to find a charred body. They were not a little chagrined to discover that the song had proceeded from a talking machine, which the heat had apparently set in motion, but had been stopped when the water struck it.

Success comes only by working for it—never by shirking for it.

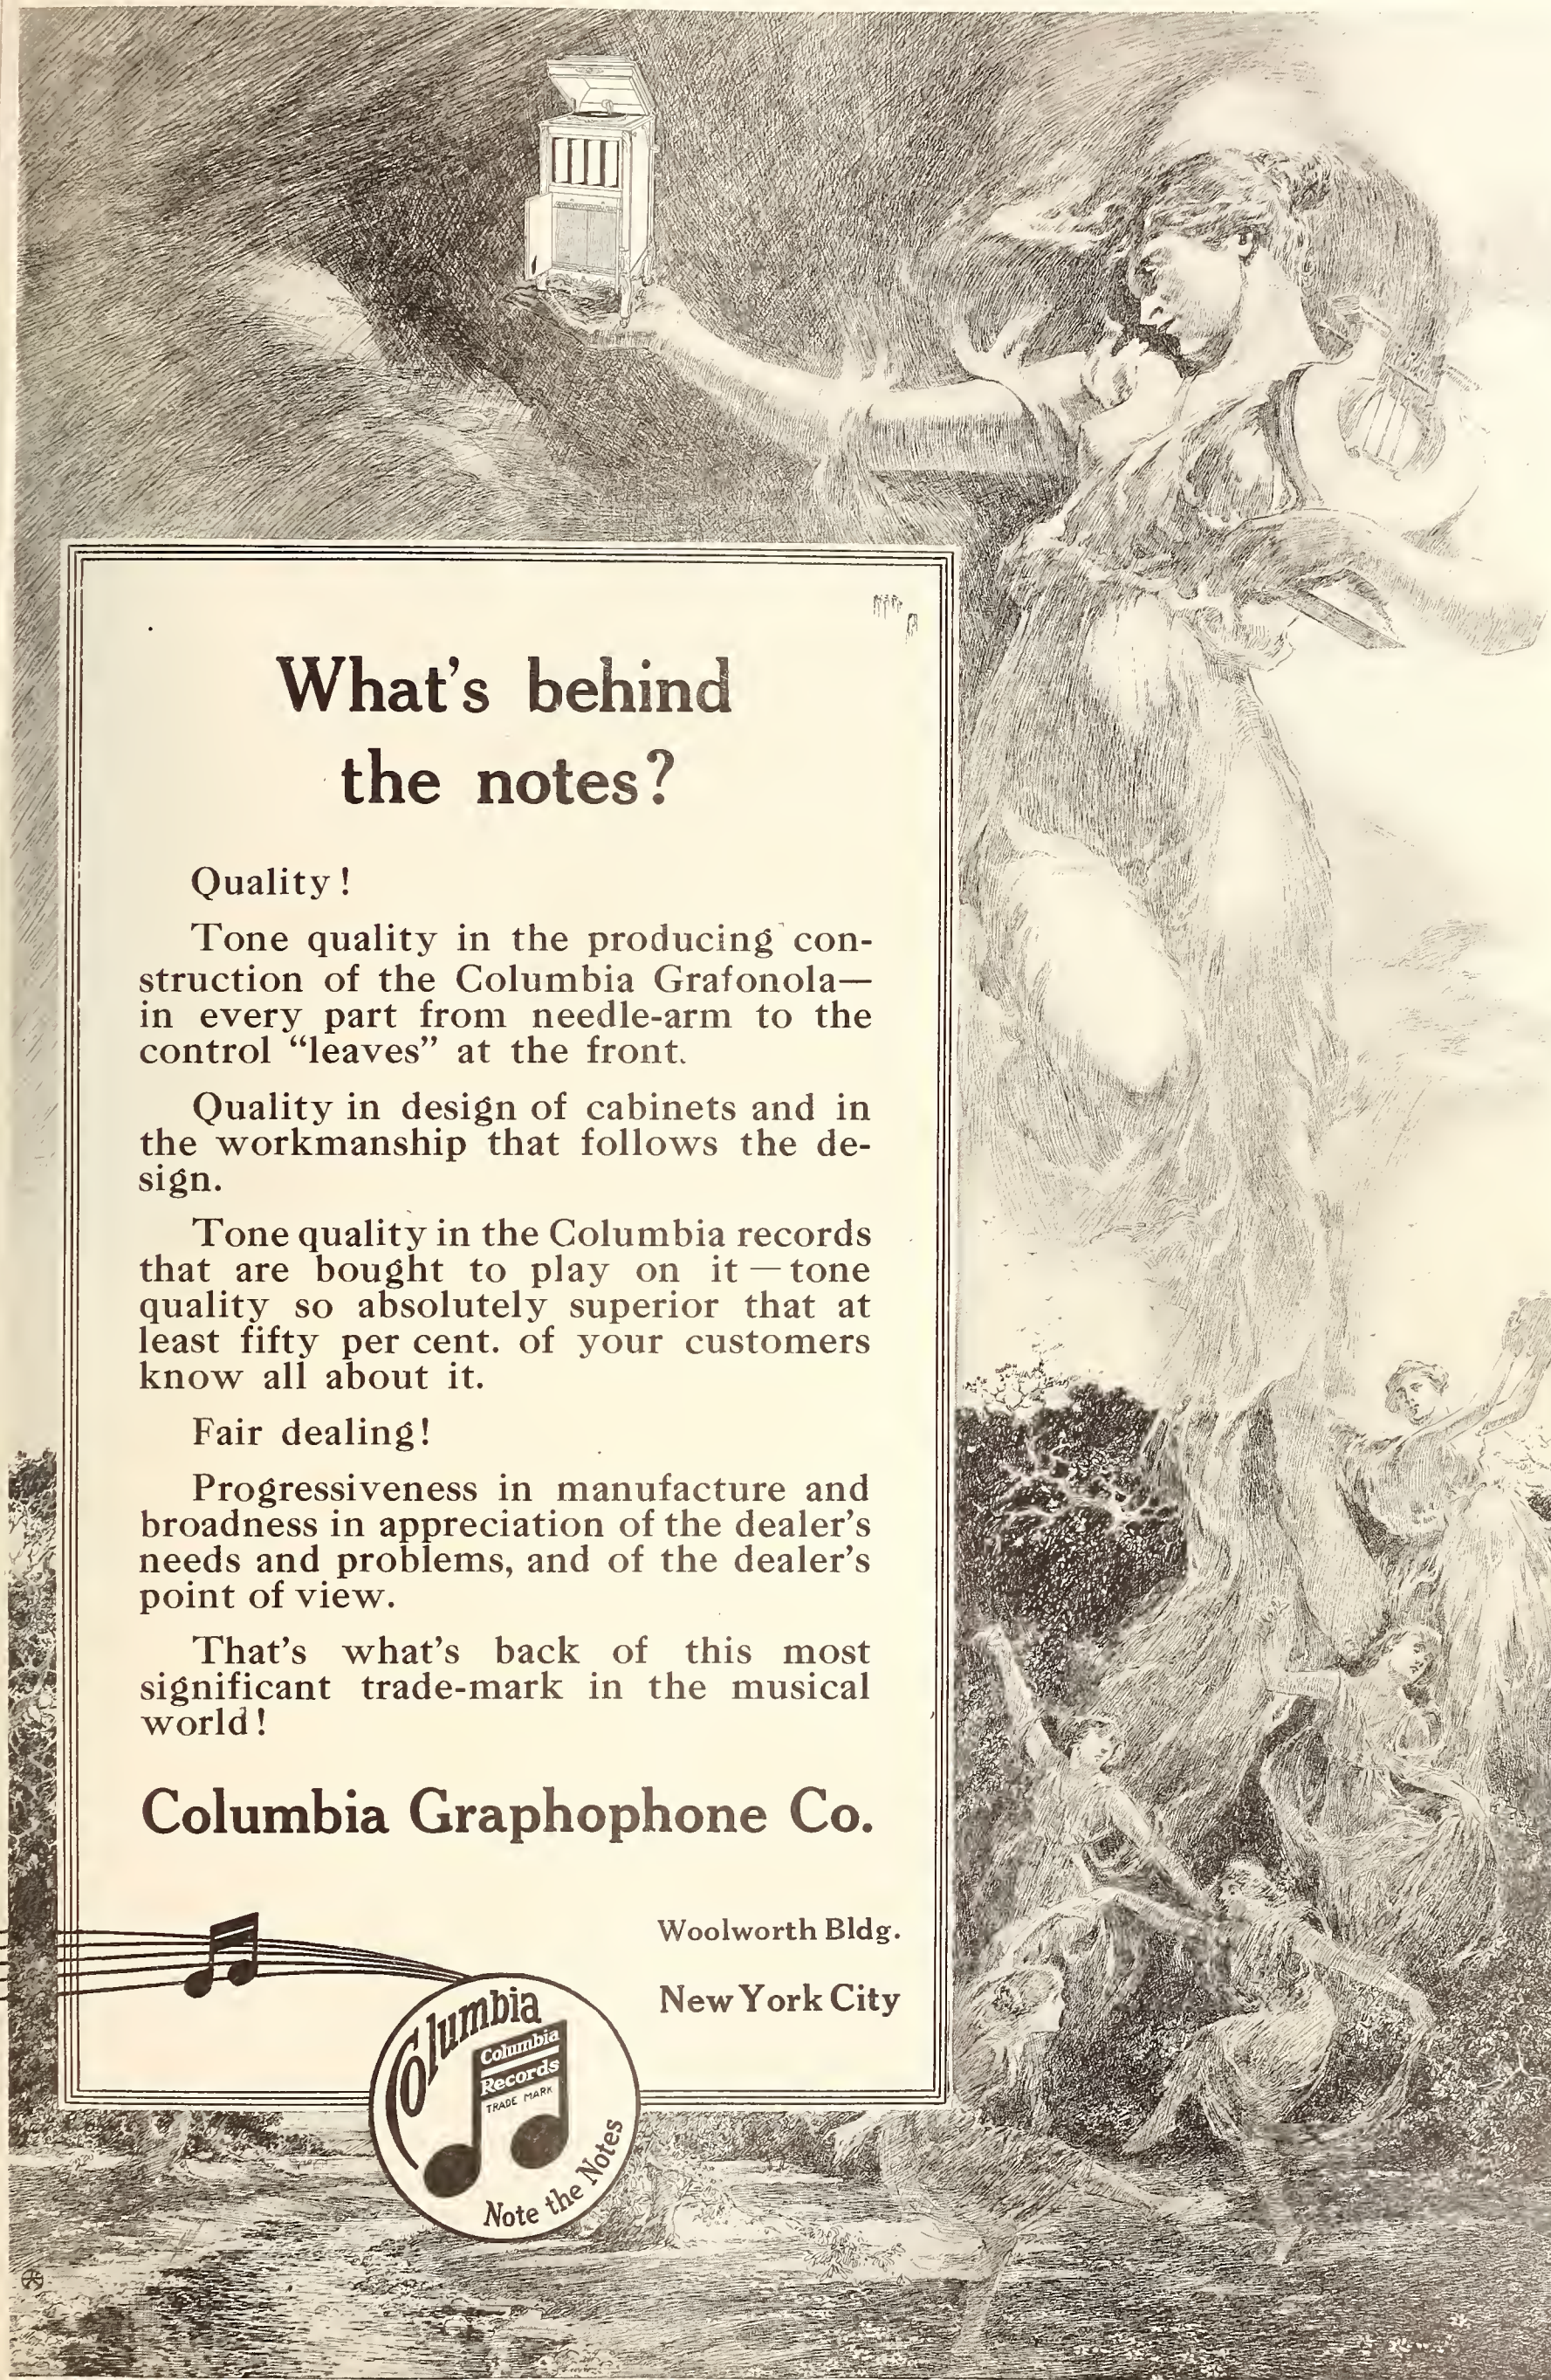
TRADE MARK
Note the Notes



What's behind the notes?

Quality!

Tone quality in the producing construction of the Columbia Grafonola—in every part from needle-arm to the control "leaves" at the front.

Quality in design of cabinets and in the workmanship that follows the design.

Tone quality in the Columbia records that are bought to play on it—tone quality so absolutely superior that at least fifty per cent. of your customers know all about it.

Fair dealing!

Progressiveness in manufacture and broadness in appreciation of the dealer's needs and problems, and of the dealer's point of view.

That's what's back of this most significant trade-mark in the musical world!

JOBBERS VISIT VICTOR FACTORY.

Comm.ttee Representing National Association Calls to Discuss Business Problems.

At the meeting of the executive committee of the National Association of Talking Machine Jobbers held in New York last month a sub-committee was appointed to visit the factory of the Victor Talking Machine Co. in Camden, N. J., and confer with the officials of that company regarding general matters of trade interest. As is always the case, the committee was cordially received by the factory officials and much good was accomplished by the visit. The jobbers' committee included E. C. Rauth, J. N. Blackman, W. H. Reynalds, H. A. Winkelman, G. E. Mickel, J. C. Roush and Charles F. Bruno.

Committee of National Association of Talking Machine Jobbers Photographed at Victor Factory on February 17—Standing, Left to Right—E. C. Rauth, J. N. Blackman, W. H. Reynalds and H. A. Winkelman—Seated, G. E. Mickel, Jos. C. Roush and Chas. F. Bruno.

CLOSED SOME BIG ORDERS ON TRIP.

Thos. F. Walsh, secretary of the Union Specialty & Plating Co., Cleveland, O., was a recent visitor to New York, and in a chat with The World reported a remarkable demand for the specialties turned out by his house. On his present trip he booked the largest business he ever transacted. The growth in demand for the talking machine specialties made by this house has been so continuous that larger manufacturing quarters are necessary.

"We have won the confidence of the trade," said Mr. Walsh, "because we have aimed to give the best of values in our products, and this has been appreciated by manufacturers who have steadily increased their orders."

AGE NO HANDICAP.

When you feel disposed to think that age unfits a man for work, watch how the old tar stands hardships that kill the young seaman, and behold how the gray heads do the great business of the world.

The Burtclay Phonograph Shop has opened very attractive quarters at Bergen Square, Jersey City Heights, N. J.

MEETING A GROWING DEMAND.

Various Models of Fraad Talking Machines Selling Well—The Fraad Junior Style Is in Particular Demand with the Trade.

The Fraad Talking Machine Co., 1160 Broadway, New York, reports a most satisfying demand for the various machines in its well-balanced line, with particular interest being shown by the trade in the Fraad, Junior, full cabineted machine, selling at retail for $35. The Fraad, Junior, is equipped to play all sizes of records up to and including twelve-inch, and the cabinet is supplied with shelves for the filing of a large number of records.

At the present time the Fraad Co. is in a position to meet promptly all demands for machines, having a large and varied stock on hand and within a week or so the factory of the company will have caught up with the demand for the Junior model and be able to supply that model promptly and in quantities as desired.

During the past month or so the Fraad Co. has added a large number of new agencies to its list, and has made a number of important exclusive territory arrangements, one of them taking in a large part of Western Canada, where there is already a good demand for the Fraad line.

ADVERTISING A BIG FACTOR

In Maintaining Trade and Prestige in Public Mind—Victor Policy Highly Commended.

In an interesting article entitled "Advertising When the Factory Is Oversold," which appeared in a recent issue of Printers' Ink, S. C. Lambert cites the Victor Talking Machine Co. as an ideal example of the modern business institution which has the foresight and courage to continue an advertising campaign when its output is far oversold. After calling attention to the fact that a consumer very often gets the impression that a business is not what it used to be because of a cessation of advertising, Mr. Lambert said in part: "The consequence is that, instead of maintaining admitted leadership, the concern may have to drop back on a level with its competitors, or perhaps even be content with second place.

"Rather than let that happen, concerns like the Victor Talking Machine Co. are wise enough to invest a share of their profits in maintaining their standing in the trade and their prestige in the public mind. They do not need orders at the moment, but they *do* need the confidence of the people. An increase in orders may be a temporary embarrassment, but an increase of public confidence can never be anything but an asset.

"I believe the Victor Co. is one of the many concerns which include in their balance sheet the following item: 'Patents, trade-marks, good will, etc., $1.' That, of course, is only a convenient and conventional method of indicating that the assets included in the list are valuable, although the company doesn't choose to estimate their value in definite terms. I have seen the Victor Co.'s trade-mark 'valued' in conversation at anywhere from $1,000,000 to $10,000,000.

"Of course it is obvious that the trade-mark has no value whatever apart from the business which it represents, and even in connection with the business it has a value only to the extent that it is known and recognized. It is the 'commercial signature' of the company, and, like any individual signature, it is worthless unless it is recognized as genuine. A concern which deals with the public—directly or indirectly—can as little afford to permit its trade-mark to be forgotten as it can afford to let doubt be cast upon its credit."

HOW TO HEAR MUSIC INTELLIGENTLY.

School of Fine Arts, U. of A., Offers Free Course in Music to Any School or Club.

(Special to The Talking Machine World.)

FAYETTEVILLE, ARK., March 10.—The School of Fine Arts of the University of Arkansas is sending to any club or school in the State four sets of fifteen talking machine records each, which are sent out to aid "intelligent listening to music," which is encouraged by the School of Fine Arts. Each set of records is accompanied by a typewritten "talk" explaining the music and giving facts regarding its origin, the instrument and singers.

The records can be used on any Victrola talking machine and can be secured free of charge by any school or club.

FEATURING STEWART PHONOGRAPH.

The Stewart Phonograph Co., Chicago, Ill., carried a full-page advertisement in last week's Saturday Evening Post to announce to the general public the Stewart phonograph which retails at $5. This advertisement presented a number of effective selling talks, which pointed out the numerous constructional features of the Stewart phonograph, emphasizing the fact that it is equipped to play all makes of records and is finished in solid, dull-black metal with highly polished nickel-plated trimmings.

One section of the advertisement called attention to the prominence of the Stewart name, stating: "The Stewart name is established all over the world. Millions of dollars are back of it. Stewart products are found on practically every automobile. Everyone knows the Stewart speedometer, the Stewart tire pump, the Stewart vacuum system. It is estimated that 95 per cent. of all automobiles carry one or more Stewart products."

THE MOST MOMENTOUS FACTOR.

"Let us pause in our admiration for the automobile, in our delight in the moving pictures and in our awe of engines of war to consider the fourth most momentous factor that has been introduced into modern life—the recording and reproducing music machines," says the Detroit Journal in a recent editorial.

"What an enormous factor they have become in life. More than one per minute is sold to American homes. The auto, the talking machine and the 'movies' have become necessities. And of the three the talking machine is perhaps giving a higher and better form of intense enjoyment to millions.

"Some musical exclusives affect to despise what they think is the talking machine, having heard one once ragging the scale at a country fair. But gradually each of the most keenly sensitive critics of music succumbs to the magic spell of the high-class record, and they realize that they are in the presence, not of a slap-bang, wang-dang infernal nuisance, but of an instrument as revolutionary in cultural life as anything since the invention of printing."

VICTOR-CHENEY HEARING SET.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 13.—Federal Judge Carpenter has set April 24 as the date for hearing the case of the Victor Talking Machine Co. versus the Cheney Talking Machine Co. The court has received and is examining depositions made by experts at Philadelphia and at Chicago, and after hearing orally from additional witnesses, will give his decision. The matter will not necessitate more than two or three hearings, it is said.

U. S. MAKING INDIAN RECORDS.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 10.—The United States Government is endeavoring to retain for future generations the voice and songs of the American Indian, and talking machine records of the songs and conversation of prominent Indians are being made. The work of making the records is being done by officials of the Smithsonian Institute, and several Indians have been brought from Western reservations to Washington for the purpose of making the original records.

Arithmetic

It costs you so much for rent, bookkeeping, clerical help, light, delivery, selling, advertising, collecting and incidentals.

What you have left over is YOURS.

It may be enough for a Ford or a Fiat.

Most of the expense is FIXED—you cannot lower it. The only thing you can do is to INCREASE the INCOME.

How?

Phonographs? You're doing almost as much as you can for the size of the city.

Records? Doing a good business but clerks not always busy.

Cabinets? Maybe you didn't think of SELLING cabinets before. 20% increase in cabinet sales will show an amazing profit. Sell Herzog Cabinets; well-made; piano finish; well designed; strong; sold at a reasonable price; made for all machines.

Write to-day and get the complete Herzog story, together with a copy of the greatest cabinet catalog ever issued.

DESIGNING SERVICE.—We are designers and builders of talking machine and music cabinets of all kinds. Our corps of expert designers is at the command of any manufacturer or dealer, and this staff will gladly submit original models. Simply give us an idea of the price that you wish to meet and the number wanted, together with any other data that will help us to give you our best efforts.

Herzog Art Furniture Co.

Saginaw, Mich.

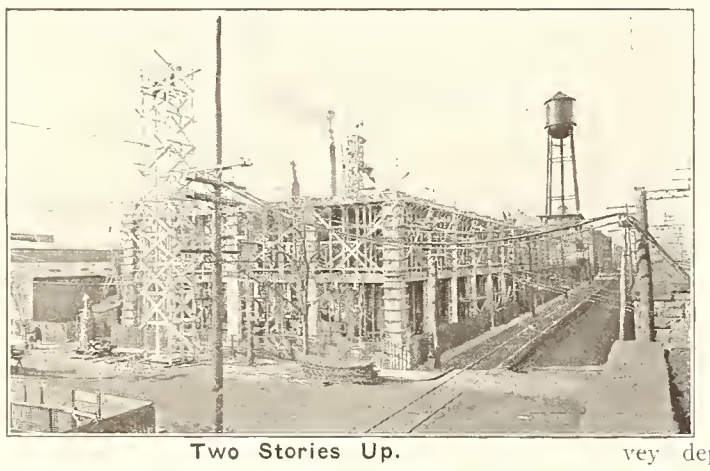
NEW COLUMBIA FACTORY COMPLETED THIS MONTH.

Most Modern Construction and Equipment Represented in the New Plant of the Columbia Graphophone Co. in Bridgeport, Conn.—120,000 Square Feet of Floor Space Available.

The Columbia Graphophone Co.'s new factory building at Bridgeport, Conn., the structure of which was completed this month, will be one of the best-equipped and most up-to-date manufacturing plants in Bridgeport—a city which is recognized as having some of the finest factories in the country.

Laying the Foundation.

The contractors who built this new factory established an enviable record for speedy construction work. The foundation for the new building was laid on October 11, 1915, and in a period of only four months the building was erected from cellar to skylight. The accompanying picture will show by dates the rapid strides made in the construction of this building, and neither expense nor effort was spared to make this factory thoroughly representative of the Columbia Graphophone Co.'s prestige in the talking machine field.



Two Stories Up.

The new Columbia factory building is an immense plant in every particular. It contains approximately 120,000 square feet of floor space, and in order that the employes may be able to work under ideally pleasant and congenial conditions 47,000 square feet of window glass were installed. There is plenty of light on all floors and on all sides of the new building, and indeed every known modern convenience for the employes has been installed in this Columbia factory.

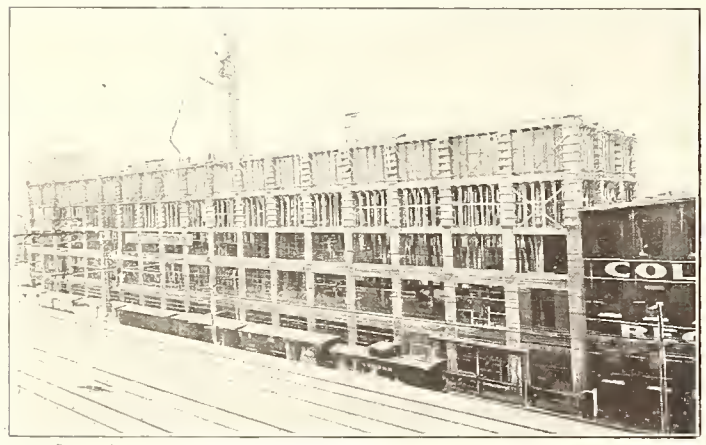
On the first floor of the factory will be installed a metal-pressing department; on the second the automatic screw machines and drilling department; on the third, hand-screw and milling machines; on the fourth, electric motors, electric graphophone assembling department, mechanical drafting rooms and laboratories. The executive offices will occupy the fifth floor, and the polishing and buffing department the sixth.

One of the most interesting features of the equipment of this new factory will be the installation of several systems which will tend to greatly enhance the efficiency of routine factory system. The work will be laid out in such a manner that waste time and motion will be practically eliminated, and several new ideas in various departments will be introduced.

All the products of the plant will be handled by a most up-to-date conveying system, which will be particularly adaptable for use in this new factory. In addition to the passenger elevator there will be two large freight elevators, and another time saver will be a pneumatic tube system for sending small tools from the tool room to various parts of the plant. Pneumatic tubes will also be used to convey departmental and inter-departmental correspondence, orders, etc.

The company has adopted a new plan in installing its polishing and buffing department on one of the upper floors of the building. This will keep the dust from this department away from the other divisions, and the huge suction blowers for ventilation, which change the air in this room once every two minutes, will force the dust out into the upper air instead of near the ground, where it would rise and be wafted into other rooms.

So efficiently has the factory been planned that many manufacturers have visited the new plant seeking for ideas which might be incorporated into other factories in Bridgeport which are being remodeled and enlarged. In addition to the increased output which the factory will afford, the practical and efficient methods of manufacture which are followed will result in reducing to a minimum the overhead charges and costs of manufacturing.



After a Snow Storm.

Among the recent Edison tone tests given in the East was that held at the Sterling Theatre, Derby, Conn., where over 800 people braved a storm to hear Miss Helen Clark match her voice with the Edison Diamond Disc phonograph and records. Arthur L. Walsh, a violinist from the Edison laboratories, also appeared in the recital. Albert H. Yudkin is the Edison dealer in Derby.

Do you expect to see prosperity come in like a freight car loaded with gold nuggets, mined by someone else for your special benefit? You will surely be disappointed.

Remarkable Opportunity

for one with moderate capital to engage in manufacture of talking machines. Big and increasing shortage in present market. Machines can be profitably made in factory fully equipped all ready to start. Location and every facility for most economical production, with lowest transportation cost and quick delivery. For sale at a bargain. Large profits, ready market, prompt returns.

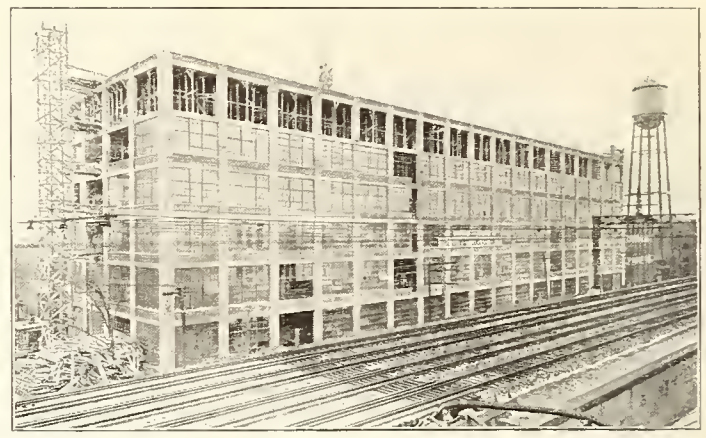
ADDRESS:
"Trustee": Box 37, Wilkes-Barre, Pa.

SPOT CASH paid from 20 per cent. to 60 per cent. for any quantity or make of used phonographs and records. State price and make. Address "Box 304," care The Talking Machine World, 373 Fourth Ave., New York.

GOOD DEMAND FOR LANSING COVERS.

Dealers Appreciate Value of Having Machine Delivered in Perfect Condition.

E. H. Lansing, manufacturer of the famous Lansing khaki moving covers, was in New York the past week in the interests of his products.



Five Floors Enclosed.

Mr. Lansing reports excellent demand for his goods, and stated that dealers everywhere are realizing the value of shipping finely polished cabinets in such a manner that the goods will arrive in the same excellent condition that they leave the polishing-off department.

Henry Lobschutz and Herman Segal, formerly associated with the Symphony Talking Machine Co., have formed a co-partnership under the firm name of the Mutual Talking Machine Co., and will manufacture machines retailing from $10 to $100.

The Elginola Talking Machine Co., of Milwaukee, was incorporated this week with a capitalization of $10,000. The incorporators were: Frank Rose, Albert Salomon and S. R. Simon.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line. Business opportunities 25c. per line.

MANUFACTURING POSITION WANTED—Thoroughly experienced man capable of putting in complete plant for manufacturing vertical cut disc records. Can make the finest master wax. Experienced in latest recording methods. A specialist in electrotyping and backing matrices. Extensive general manufacturing knowledge. Can systematize plant and make eight-inch disc to wholesale for eleven cents, process complete; no experimental work necessary. Can adhere to advance estimates. Address "Box 308," care The Talking Machine World, 373 Fourth Ave., New York City.

SPACE FOR RENT! Will rent space in my jewelry store twenty-five by seventy-five to live man, splendid location for Victrola shop and record exchange on North Woodward Ave., 1¼ mile circle, Detroit, Michigan. Address "Box 313," care The Talking Machine World, 373 Fourth Ave., New York City.

SUPERINTENDENT, FOREMAN OR EXPERIMENTAL MAN—Practical machinist and instrument maker, age 39, possessing executive and inventive ability and a thorough knowledge of spring motors, sound boxes, etc., and all the manufacturing details connected with the low cost production of same, seeks position. Could bring in exclusive patented side line if desired. Address "Box 309," care The Talking Machine World, 373 Fourth Ave., New York City.

A FIRST-CLASS VICTROLA REPAIRMAN, with 15 years' experience in the talking machine business, competent to take charge of any talking machine factory or Victrola department, desires position with a reliable firm. Will go anywhere. Best of references. Address "Box 314," care The Talking Machine World, 373 Fourth Ave., New York City.

ARE YOU LOOKING FOR ME? Wideawake talking machine manager and salesman with 10 years' experience in all makes, prefer Edison line. Experienced window trimmer of proven results; best of references. Answer quick if it is a real manager you want. Address "Box 315," care The Talking Machine World, 373 Fourth Ave., New York City.

LINE WANTED.—Man of long experience and acquaintance with trade wants good line of talking machines to handle in Chicago and West. Have office and all facilities. Address "F. E., 10," care The Talking Machine World, 220 So. State St., Chicago, Ill.

YOUNG LADY, age 25, with 10 years' experience, as manager in talking machine department, wishes connection with reliable concern; salary no object to start. Best of references. Address "Box 316," care The Talking Machine World, 373 Fourth Ave., New York City.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Government Embargo on Cabinet Woods Offers the Final Blow to Talking Machine Manufacturers, Already Heavily Handicapped by the Shortage of General Supplies and of Capable Workmen—"Talkers" Considered as Necessity Rather Than Luxuries—Lieut. E. B. Samuel Killed in Action—Musical Goods in Prize Court—Price-Cutters Restrained—Record Makers Working Hard—Associated Copyrights, Ltd., Organized—Lord Mayor of London Makes Record for Columbia—News of the Month in Detail.

(Special to The Talking Machine World.)

LONDON, E. C., February 29.—Throughout the whole music trade field there is a growing strong adverse atmosphere which overshadows all previously experienced difficulties within memory. Beset with this and that restriction, the future good welfare of the industry bids fair to suffer undue hardships. To successfully overcome first, the almost total extinction of supplies of machines and parts; second, the increasingly great dearth of labor; is in itself an achievement worthy of emphasis as an example of British tenacity and enterprise. But a new element has come upon the scene in the issuance of an official rescript prohibiting, except under license, the importation of furniture wood, hardwood and veneers. This is regarded by gramophone men very seriously—it knocks the bottom out of the trade boat altogether. While there may be felt no very great shortage at the moment, prices have already gone up over 100 per cent., and it is certain the new policy will rush the figure up alarmingly quick. Through this action the Government expects to suppress to a great extent the making of furniture, pianos, gramophones and other musical instruments. Doubtless their aim will be achieved, for with the lack of wood and the upward tendency of prices, it will not pay to produce musical instruments. So serious is the position regarded that prominent members of the trade immediately convened a meeting whereat it was decided to approach the president of the Board of Trade and lay before him the hardships that would be inflicted upon our industry. It was rightly asserted that the gramophone trade might reasonably be regarded to-day not as a luxury so much as a necessity for, during the whole course of this war, mechanical music has provided broadly speaking, the only possible entertainment to the toiling millions who have little or no time for outdoor pleasure; to our wounded lads in hospital; to soldiers at the base and at the rest camps; to isolated garrisons; to our sailor boys ashore and afloat; and in a hundred-and-one other directions. Unmoved by the trade's exportations, the Government has decided that the gramophone business can be dispensed with, and the matter ends. Meanwhile ways and means will doubtless be found to continue as far as may be possible the output of instruments. Very few are constructed in England to-day; most are assembled here from imported parts, aside from the substantial number of complete machines received from America.

Fair Showing Made with Records.

On the record side, trade is making a very fair showing. It would be greater were sufficient labor obtainable. As it is, dealers cannot keep much of a stock, for as quickly as replenished, it is sold out. New recordings are not so noticeable these days. The big companies are keeping up a goodly standard of new issues, but I observe that the smaller firms are content to issue only about half their normal monthly programs of new selections. This is all that is possible with depleted staffs, having regard also to the necessity of completing orders for standard repertory songs and instrumental numbers, for which there is always a satisfactory demand.

Apart from the trade press advertising, a fair amount of gramophone publicity is carried by the popular newspapers and magazines. The firms chiefly in evidence are "His Master's Voice," Columbia, and Pathé Frères, who continue to make a strong advertising appeal to the great talking machine public.

Lieut. Edgar B. Samuel Killed in Action.

It is with deep regret that I have to announce the death, in action, of Second Lieutenant Edgar Barnett Samuel, Sixteenth Battalion Middlesex Regiment. A sympathetic letter from the commanding officer speaks in high words of praise of Mr. Samuel's bravery—almost to recklessness—and of his ever courageous example under the varying fortunes of war. The deceased officer is mourned by a host of trade friends, many letters of sympathy having been received by Barnett Samuel & Sons, Ltd.

The late Mr. Samuel was the elder son of Mr. and Mrs. Nelson Samuel, to whom, in their great loss, The World tenders its respectful condolence. For many years the deceased took a keen interest in the welfare of the working lads of the East End of London, and was actively associated with the work of the Jewish Lads Brigade. On the outbreak of war he joined up as a private and was promoted in turn corporal and sergeant, re-

FROM OUR LONDON HEADQUARTERS—(Continued from page 49).

ceiving his commission last March. He lost his life while out on night patrol duty in France, in performance of his duty to the last.

Musical Goods in Prize Court.

At Liverpool recently the cargoes of several prize ships were sold by auction. Among the various lots catalogued were to be noted gramophones and fittings, organs, mouth organs, accordeons and similar musical instruments. Will the absence of these musical charms tend to prolong the combatant spirit of our enemies?

Fire Causes Little Damage.

My January issue report of the fire at W. M. Still & Son's Charles street premises has evoked a letter from that company which will remove any misapprehension as to their ability to carry on as before. It is, in part, as follows: "We are very pleased to say that our machinery has suffered very little damage, and the loss of stock is comparatively small when taking into consideration the very heavy stocks that we carry. Fortunately, we were able to secure temporary premises directly opposite our old factory, where we have installed our machinery and are carrying on, but unfortunately we have been able to give very little attention to the manufacture of gramophone horns just lately owing to us having placed our resources to the execution of far more important work."

A Trade Commissioner from Australia.

The Board of Trade announces that G. T. Milne, British trade commissioner for Australia, will arrive in London next month (March), and may be consulted by traders with reference to business conditions in the commonwealth. Firms desirous of an interview should make application to Commercial Intelligence Branch of the Board of Trade, Basinghall street, London, E. C. Mr. Milne's visit is particularly opportune at the present time, when British manufacturers are attempting to capture trade hitherto done by other countries in Australia. He is prepared to give advice and information as to the appointment of agents, methods of marketing and distribution, terms of payment, names of probable buyers of British goods, statistics of imports, rates of customs duties, etc.

So runs the innocent official announcement to the press. It all reads very nicely, but one is tempted to inquire how a particular trade can develop export business if its very existence is threatened by government restriction as to the import and export of metal or wood vital to the manufacture of its products?

Columbia Co.'s Victory Over Price Cutting.

Once again the Columbia Graphophone Co. has established in the courts its patent rights against infringement by price-cutting. In this case a Gateshead dealer, G. B. Vanner, was found to be selling the plaintiff company's records at a less figure than the price stipulated thereon. He disregarded clear and sufficient warnings, and the Columbia Co. was therefore forced to sue in the protection of its patent rights. The matter was thoroughly thrashed out in court, and in an exhaustive judgment his lordship held that there had been an infringement. An injunction to restrain defendant from underselling the records was agreed to by the judge, with costs. The plaintiff did not ask for damages.

"Who's Who" on Winners.

Bearing the above inscription, a fine art-paper poster has been issued by the Winner Record Co. It presents characteristic portraits of a few of the famous artists who have contributed to the Winner repertory, and should prove alike valuable as an advertising window bill for dealers as of interest to private collectors of photos of record artists. A good idea well carried out!

Musical Instruments for the Army.

The War Office has recently accepted tenders for the supply of army musical instruments from a number of well known British makers, who are under contract to deliver the instruments within a given time.

New Company Incorporated.

Tape Record, Ltd., capital £1,000. One of the objects of this company is to manufacture and sell records and instruments for producing sound and for recording sound waves, etc. The signatories are H. S. Johansson and E. J. Gladman, of Avenue Chambers, Southampton Row, London, piano manufacturer.

"Rollophone" Proves Popular.

The new instrument, styled the "Rollophone," recently marketed by W. H. Raynolds (1915), Ltd., of this city, has already won great popularity among the trade by reason of its excellent value and unique features of construction. A review of this new table-grand instrument was given in my last report, and dealers on the lookout for a live selling line should refer thereto for full particulars.

Sales-News from "His Master's Voice" Co.

The mere maintenance of its instrument and record output does not occupy the sole attention of the Gramophone Co., Ltd., as with some firms, to the exclusion of what is of equal importance—the sales question. Goods produced does not necessarily mean goods sold. Hence o e may regard the sales ideas bureau of "His Master's Voice" as indispensable as the factory output. Owing to the adverse circumstances of production and consequent scarcity, instruments and records to-day do not require much selling; they sell themselves. But there is the spirit of progression ever present, and although this company finds itself almost unable to meet the heavy demands upon its resources, the constant stream of new selling ideas which it develops each month fully explains the reason thereof. Much care and attention was last month devoted to the inauguration of a Kirkby Lawn sales week, and its success has evi-

GUARDSMAN RECORDS. NEEDLE CUT.

Do You Know that we are manufacturing a Record which is superior to any expensively advertised brand that you handle at about half the cost?

Send for Catalogues, Trade Terms and Agencies to:

THE INVICTA RECORD CO., Ltd., 1 New Inn Yard, London, E. C., England

FROM OUR LONDON HEADQUARTERS—(Continued from page 50.)

dently inspired another excellent scheme. This time it is a special concert week, during which dealers will feature a chosen program of "H. M. V." records and invite their patrons to come and hear them. Supplies of a tastefully designed program, together with striking window slips, etc., have been dispatched to agents, with a promise of liberal advertising in support. A very attractive full page advertisement appears on the front of the Daily Mail, inviting the public to this concert at any "H. M. V." dealers saloon. The company has spared neither time nor money to make the concert week idea a success. In addition to these special sales schemes, new supplementary records appear each month, and selected items from the popular Revues, of which the latest is "Joyland," and the new musical comedy "Tina."

The Latest Winner Record List.

The latest Winner record list may be described as making an appeal to all moods, to all hearts, and to all pockets, so varied is it in choice of titles—what you will at the humble price of ninepence each, i. e., two on one for eighteenpence. 'Twere perhaps invidious in the short space at my disposal to itemize any particular numbers, for much care has been expended upon their selection, and one may reasonably conclude that all have passed the severely critical test of the company's recording expert. It may be said without undue exaggeration that few, if any, poor records find their way to the light of publicity—hence in a measure the Winner reputation!

I cannot refrain however from drawing my readers' attention to the issue of records by Frederick Dawson, who is truly described as one of England's greatest pianists. He is an expert of rare accomplishment, and some of his best performances at the keyboard are happily now available on Winner records. Those who have heard these discs speak in terms of high praise, specially emphasizing the excellent and true piano fidelity of the recording thereof.

Associated Copyrights, Ltd.

This company was registered on February 9 with a capital of £6,000 in shares, objects to take over the businesses carried on by Copyrights, Ltd., and Universal Copyrights, Ltd., to carry on the business of agents for the production, publication and licensing of any literary, musical, dramatic, artistic or other work and for authors, composers, dramatists, artists and publishers, and to adopt agreements with the said old companies and the liquidators thereof. Signatories, E. P. Dennis, Cambridge Park, Wanstead, N. E.; Winifred O. Maddock, 16 Ampthill square, N. W. Private company. The number of directors is not to be more than five, the first are A. Clark, A. J. Mason, L. Sterling, J. E. Hough, and E. J. Marshall. Remuneration as fixed by the company. The Board of Trade authorizes the acquisition by this company of the undertakings of Copyrights, Ltd., and Universal Copyrights, Ltd., the books and documents of which are liable to inspection under Section 2 of the Trading with the Enemy Act, 1914.

TOWER 205 FEET HIGH WILL GRACE NEW VICTOR PLANT.

An Addition to the Present Cabinet Factory and a New Record Pressing Plant, Both Six Stories in Height, Are Being Planned—Novel Fire Escapes a Feature.

The Victor Talking Machine Co. has commissioned Ballinger & Perrot, architects and engineers, to prepare plans for a six-story and basement addition to its cabinet factory on Market street, Camden, N. J., from Delaware avenue eastward; also a six-story record-pressing building on Cooper street west of Delaware avenue.

The extension to the cabinet factory will completely build up the block from Delaware avenue to Front street, and add to the present cabinet factory 140,000 square feet of floor space. When completed this cabinet factory will be one of the largest and most up-to-date woodworking plants in the United States, the total amount of floor space in this group being twelve and eight-tenths acres.

A striking feature of the facade on Market street is a tower 205 feet high located in the middle of the building. This tower will supplant the existing sprinkler-tank tower and will be used for sprinkler and factory water supplies. The trademark of the Victor Talking Machine Co. will be located at the top of the tower on four sides, executed in glass. It is proposed to illuminate this tower at night with the flood system of lighting which will make the tower stand out at night as a beacon light in the darkness. The plans also contemplate the finishing of the present cabinet factory, so that the facade on this street will harmonize with the architecture of the remainder of the building.

The construction of the building will be of reinforced concrete throughout with rolled steel sash frames and windows, glazed with wire glass, and heated and ventilated with blown air, similar to the wing which was completed last year, thus getting the maximum labor efficiency from the employes by providing working quarters which are conducive to these qualities.

The entire group of buildings for the cabinet factory is adequately provided with fireproof escapes in addition to the one main entrance, which will occur under the tower, and communicates with an incline, instead of stairways, which runs through the six stories of the building. This incline is designed to provide means of reaching the various floors and sections of the building and obviates the use of passenger elevators, and is found in practice to be eminently suited for the purpose.

The record-pressing building is to be a six-story, fireproof building, 91 by 283 feet, connected to the grinding building by bridges. This building is, as is usual with all the buildings of the Victor Talking Machine Co., of reinforced concrete construction throughout, of design to harmonize with the type of architecture of the remainder of the plant. On the top of the building will be arranged booths for the testing of records. When completed this building will be large enough to increase the Victor Talking Machine Co.'s output in records far beyond the present maximum production.

JAMES N. HAIRE DIES SUDDENLY.

Treasurer of Gately-Haire Co., Albany, N. Y., Passes Away on Tuesday.

(Special to The Talking Machine World.)

ALBANY, N. Y., March 14.—James N. Haire, treasurer of the Gately-Haire Co., Victor distributers of this city, passed away suddenly on March 14th, much to the regret of the entire industry.

J. N. Haire.

Mr. Haire has been associated with the Gately-Haire Co. since its formation when it took over the business interests of Finch & Hahn. As treasurer, many of the new plans of the concern were created and put into force by him, these helping tremendously in the rapid growth of this house. His associate, John L. Gately, and the members of the staff, are receiving the sympathy of the trade in their tremendous loss.

NEW VICTOR STORE IN BALTIMORE.

Cohen & Hughes, Victor Distributers, Arrange to Open Third Retail Store in That City—Plan Elaborate and Exclusive Quarters.

(Special to The Talking Machine World.)

BALTIMORE, MD., March 14.—Baltimore is going to have one of the most exclusive Victrola stores in this section of the country, according to the announcement of I. Son Cohen, of Cohen & Hughes, Inc., Victor distributers, who already have two stores in this city. This will make the third establishment, and, unlike the other two that handle the Victor line and pianos, the new place will be distinctly a talking machine house, handling exclusively the complete Victor line, and will be located at 14 North Charles street, the most prominent point in the downtown section. The new place will be ready for operation about the latter part of the month. Mr. Cohen stated that no expense would be spared in making the new establishment an institution that would commend itself to all lovers of music.

PENNSYLVANIA DEALERS MEET.

Association Holds Monthly Session in Pittsburgh on Monday—Discusses Trade Topics.

(Special to The Talking Machine World.)

PITTSBURGH, PA., March 14.—The Western Pennsylvania Talking Machine Dealers' Association held its regular monthly meeting last night in the store of the W. F. Frederick Piano Co. There was a large attendance, including a good number of piano dealers who handle talking machines. President French Nestor presided. Trade topics were discussed informally, and the meeting proved a most enthusiastic one. Optimism in regard to the business outlook in the Pittsburgh district was the keynote of the evening.

TALKING MACHINE RECORDS BURN.

$1,000 Worth of Records Destroyed In Fire Which Endangers Fifty Families in Harlem.

An early morning fire recently destroyed $1,000 worth of talking machine records and routed fifty families living at 324 West 125th street, New York, into the street in their nightclothes. The main floor of the building is occupied by the Melophone Co., which operates a talking machine parlor where the latest records may be heard by dropping a coin into the slot. The records which were destroyed were stored in the basement, and made so much smoke that a second alarm was sent in. The cause of the fire is unknown. After an hour of hard work the fire was extinguished, but most of the records had been ruined.

GRAPHITE IN GREAT DEMAND.

Few people begin to realize the range of uses to which graphite is put, says the Scientific American, for it is an essential though minor ingredient in a great number of unsuspected connections as common as that of lead pencils. With many of these the graphite man is himself unfamiliar, beyond the simple fact that this or that manufacturer purchases from him; for in such uses it is apt to represent part of a secret process.

Lead pencils, lubricants for talking machines, electrical conductors, and black polishes and paints are prominent conventional uses, but it is liable to be present pretty much anywhere that anti-friction, unfading blackness, heat resistance, electrical conductivity or non-corrosiveness are desirable properties, and the fact that without graphite the derby hat as we know it could not be, is an example of its importance as an incidental ingredient.

RECIPROCITY.

Brown, who lived in the picturesque suburbs, returned home late one evening, with a package which he deposited on the dining room table. His wife, naturally curious, lost no time in starting to investigate. "What have you been buying, Jimmy?" she asked, taking up the package and untying the string. "A cornet," answered Jimmy; "I have been thinking for some time—" "A cornet?" was the wondering interjection of the wife. "I thought you knew better than to buy a cornet! You know very well that the man next door worries you almost to death with his." "Yes, I know," was the smiling response. "That is the one I bought."

The foolish man "darns" his luck—the wise man "mends" it.

Pick the Profitable Pathé

And repeat the big success its dealers are everywhere enjoying.

The Pathephone will sell easily where other talking machines fail even to create desire.

Persuasion is unnecessary when you demonstrate it—dealers seldom lose a listener, who eventually buys a phonograph.

Awake to the exceptional profit possibilities of the Pathé records—the demand everywhere is tremendous and consistently increasing—ALL owners of other disc machines will want a selection of these "real" records, truly.

Pathé Has Divorced "Perhaps" From Profits.

Write today before the "other fellow."

HIT APPROVAL PLAN IN BUFFALO.

W. D. Andrews & Co. Takes a Definite Stand in the Matter—Dealers' Association Delays Action—Expect Good Business During Lent —Victor & Co. Take Pathephone Agency— Talking Machine as Toastmaster.

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 7.—Talking machine records on approval will likely be a thing of the past if the action of the local dealers is similar to that taken by the W. D. Andrews & Co., one of the largest jobbers and dealers in talking machines in the city. Agitation has been going the rounds for some time in this city to eliminate this abuse of the trade, and the dealers appeared to be unanimous that there was a distinct disadvantage in having their records out on approval, with the chances for sales being daily reduced.

Starting on Monday, March 6, the Andrews store shut off this line of activity by announcing that there would be no more records sent out on approval. This means that only outright purchases will get a record from the Andrews store. Mr. Andrews made the announcement on conspicuous cards throughout the store. The reason for the change in methods was that people taking the records on approval abuse the privilege that was accorded them by the store. Frequently they held the records too long and many times they were turned back in poor condition after the people had used them long enough, declaring that they were not satisfied with them. The fact that the records were held too long frequently blocked sales that might have been made in records that were out only on approval.

It is believed that the other dealers will follow in the wake of the Andrews store. There is a sentiment among them that the approval record method is a rap at the business and will be discontinued. It has been said by one of the dealers here that cases have been known where people with Victrolas have been having concerts in their homes on borrowed records which were procured with the understanding that they were to be purchased, only to have them turned back as not satisfactory after the day's use. Others have been kept at least two weeks.

The matter was considered at the meeting of the Talking Machine Dealers' Association and a referendum vote was decided upon. The vote was never completed, as there was so much discussion both ways on the proposition that the association kept its hands off.

It is expected that the talking machine business will be improved during the Lenten season. At least the dealers expect this, as there are so many people who taboo the public amusements that they will have their own entertainment in their own homes by means of talking machines.

A. Victor & Co. have taken the agency here for the Pathephone, and a fine demonstration room has been fitted up for the talking machines. The company is making a big effort to bring the Pathephone to great popularity in this city and hourly concerts have been arranged as an attraction to draw the people to the store to see and hear the instrument. The advertisements of the company lay stress on the fact that it is not necessary to have the needles changed.

C. P. Chew, representing the Pathé Frères Phonograph Co., was at the Iroquois each day this week to meet the dealers of this city and western New York for the purpose of negotiating agencies for the Pathephone.

Victrola parties are quite popular at many of the clubs throughout the city. The latest to try the experiment for dancing was St. Patrick's Club on the East Side. The club used a Victrola for the dance that was held during the latter part of February, and it proved to be a great innovation: in fact so successful that the club will repeat with another series after the Lenten season.

The approach of the concerts by John McCormack and Mme. Schumann-Heink has given the Neal, Clark & Neal store the cue for advertising the records made by these artists.

Gould Brothers in Main street have reported a splendid business on Victrolas and records.

The Talking Machine Dealers' Association met last Wednesday at the Hotel Statler, the meeting developing into the annual banquet aftermath. Nothing weighty was discussed, but the good attendance in friendly groups talked over daily trade experiences. Secretary Bruehl stated that not one member but who was pleased with the present run of business.

Inability to obtain sufficient machines is the main complaint of members, business being so good in both retail and wholesale ends that dealers are unable to keep up their stocks. In fact business is so good here in the record machine lines that it is injuring the piano trade to considerable extent.

The Buffalo Ad Club, one of the largest organizations of advertising experts in the country, on Saturday at a banquet utilized the phonograph to a unique degree. The ad men, in introducing John Barrett, former United States Minister to Siam, Panama, Argentina and Colombia, as a speaker, did not make him known through the ordinary agency of the toastmaster. Instead, a hidden phonograph in a corner of the room clearly enunciated that both Mr. Barrett and Thomas Thrift, of Cleveland, were scheduled as the speakers. It was a novel idea and was well received.

FIREPROOF RECORD RACKS.

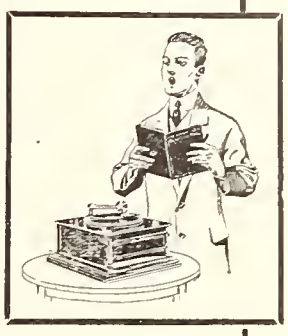
C. J. Ianell, manager of the talking machine department at Bloomingdale Bros., Fifty-ninth street and Third avenue, which handles the Victor and Columbia lines, recently arranged to have installed a set of new record racks which are equipped with rolling doors and which are as fireproof as human ingenuity can make them. The doors lock at night, and the racks provide maximum efficiency and convenience for the members of the sales staff. Mr. Ianell reports the closing of a very satisfactory February, with a phenomenal increase in record business.

A $10 BILL FOR YOU

Clear profit in the sale of a single course in

The Herman Klein Phono-Vocal Method

Based upon the famous school of Manuel Garcia



The sale is made to the customer who is already on your books, from a demonstration outfit and practically without effort. No stock to carry, no capital tied up, for orders are filled directly by us.

Ten double-sided records, wonderfully made—twenty lessons —lead the student from the simple scale to the aria, and a comprehensive text book, compiled by Herman Klein, based on the method of Manuel Garcia, explains each step intelligently and interestingly. It is not a correspondence course but a complete method in itself.

This method increases appreciation of music and means more sales of high-class records and machines. Something more than a side line.

RETAIL PRICE $25, FOR COMPLETE METHOD IN ANY VOICE

EDISON DIAMOND DISC JOBBERS' ASSOCIATION MEETS.

Much Important Business Transacted at Three-Day Session—Officers Elected for Present Year—Banquet Held at the Hotel Knickerbocker—Many Interesting Talks—Those Present.

The annual meetings of the Edison Diamond Disc Jobbers' Association were held at the Knickerbocker Hotel and at the Thimble Theatre, 10 Fifth avenue, New York, on Monday, Tuesday and Wednesday, February 14, 15 and 16. These were well attended by Edison jobbers from all parts of this country and Canada, and many business problems were taken up and discussed in an able manner. Little information was given out to the public, but chats with the various members indicate that these meetings were most important in every way, and that plans are under way to make 1916 an epoch in the distribution of Edison Diamond Disc machines and records.

Monday was devoted to the regular routine meeting, wherein the officers and advisory board were elected, as follows: W. O. Pardee, president; W. B. Smith, vice-president; H. G. Stanton, secretary, and Lawrence Lucker, treasurer. The advisory board consists of H. H. Blish, C. E. Goodwin and N. D. Griffith.

Tuesday was taken up with a conference with the officers from Thomas A. Edison, Inc., Orange, N. J., the officers of the corporation being tendered a luncheon by the association, this being held in the banquet room of the Knickerbocker. In the evening the jobbers were the guests of the factory, a banquet being held in their honor at Sherry's, followed by a theatre party which was given at the Hippodrome.

Wednesday, at the Thimble Theatre, an unusual program was carried out. William Maxwell, vice-president, started the ceremonies with a short chat on "Rough Stuff," and then the other speakers ably reinforced his efforts. John Constable, assistant chief engineer, spoke on "Cruelty to Motors"; W. H. Miller, manager of the recording department, on "Artists"; Delos Holden, general counsel, on "Infringements"; Mr. Boykin, on "Diamond Points"; J. R. Rogers, general traffic manager, on "Traffic"; L. C. McChesney, advertising manager, on "Advertising"; A. C. Ireton, general sales manager, on "Factory Fallacies"; T. J. Leonard, assistant general sales manager, on "Probationary Zones for Dealers," and also talks on "Record Returns," "Mechanical Service," "Applications," "Diamond Amberolas," "Tone Test" and other pertinent subjects, by Messrs. Baldwin, Brown, Davidson, Maxwell, Fuller and others. Mr McChesney also talked on "Booking the Advertising Pictures."

An interesting sales dialogue, entitled "Bought and Partly Paid For" (billed as the first and last time on any stage), was given by Mark Mac Dermott and Miss Miriam Nesbitt, being produced by Frank Smithson, which was followed by motion pictures, "The Voice of the Violin."

On Thursday, February 17, the jobbers took a trip to the Edison factory, where they spent an all-around enjoyable and instructive day.

Among those present were: E. Bowman, C. B. Haynes & Co., Richmond, Va.; H. G. Stanton, R. S. Williams & Son Co., Toronto, Ont., Canada; Walter Kipp, Kipp-Link Phonograph Co., Indianapolis, Ind.; W. B. Smith, L. N. Bloom and A. O. Peterson, of the Phonograph Co., Cleveland, O.; D. W. Schultz, Schultz Bros., Omaha, Neb.; W. A. Meyers, Williamsport, Pa.; H. H. Blish, Harger & Blish, Des Moines, Ia.; Laurence H. Lucker, Minneapolis, Minn.; A. Buehn, Buehn Phonograph Co., Pittsburgh, Pa.; W. O. Pardee, H. L. Ellenberger, of the Pardee-Ellenberger Co., New Haven, Conn.; F. H. Silliman, Pardee-Ellenberger Co., Boston, Mass.; George L. Babson, Phonograph Corp. of Manhattan, New York; F. E. Bolway, Syracuse, N. Y.; Fred Babson and C. E. Goodwin, the Phonograph Co., Chicago, Ill.; N. D. Griffith and P. R. Hanley, American Phonograph Co., Albany, N. Y.; James Chandler and T. E. Dean, Chandler & Co., Bangor, Me.; J. G. Harrison, St. John, N. B.; William A. Schmidt, the Phonograph Co., Milwaukee, Wis.; M. N. Blackman, the Phonograph Co., Kansas City, Mo.; O. A. Lovejoy, Southern California Music Co., Los Angeles, Cal.; Robert L. Proudfit, Proudfit Sporting Goods Co., Ogden, Utah; R. B. Allen, F. S. Heminway and H. H. Curry.

LARGE BUYERS OF SUPPLIES.

The Unit Construction Co. Recently Purchased $30,000 Worth of Glass in One Month—Other Big Purchases for Construction of Unico Booths Being Made at All Times.

Thirty thousand dollars' worth of window glass was recently purchased during one month by the Unit Construction Co., Thirty-first and Chestnut streets, Philadelphia. This house also buys thousands of dollars' worth of felts, woods, varnish, paints, etc., all of which enter into the construction of Unico booths for talking machine and player-piano rooms.

These figures are given to show the magnitude of the operations of this company, and to show that in the field of booth building it has involved thousands of dollars in merchandise of all kinds, to say nothing of the cost of its factory and maintenance.

A feature of the Unico booths is the fast service rendered to the dealer. For example, if a dealer orders a Unico booth, 9 by 9 feet, for his store, all he has to do is to write to the company and the booth will be shipped to him by return express. Through this service it is possible to fit up a store in a few days.

Rayburn Clark Smith, president of the Unit Construction Co., reports that business is excellent and states that the number of big installations have greatly increased during the past few months. Mr. Smith also states that the number of dealers who realize that properly equipped warerooms are necessary for efficient exploitation of talking machines and player-pianos is increasing numerically every week.

NEW COLUMBIA ARTISTS.

Thomas Quinlan, who was recently appointed manager of the Columbia Graphophone Co.'s operatic and concert department, stated this week that several contracts had been closed the past fortnight whereby artists prominent in musical circles both here and abroad will record exclusively for the Columbia Co. in the future. Among these artists is a prominent tenor who has achieved remarkable success at all his appearances. The names of these new artists and their records will be announced in due course. The Columbia Co. is steadily increasing its already large roster of notable artists.

ADD SEVERAL NEW MODELS TO LINE.

The Nanes Art Furniture Co., New York, manufacturer of the Savoy gramophones, has recently added to its line several new models which have been well received by the company's dealers. These new models include a large cabinet machine which will retail at $65 and a complete line of smaller machines.

FOSTER & WALDO HAVE FINE VICTROLA DEPARTMENT.

Quarters in Minneapolis Ideally Arranged for Display and Demonstration of Machines and Records—Various Wholesale and Retail Houses Report Excellent Business.

(Special to The Talking Machine World.)

St. Paul and Minneapolis, Minn., March 6.—Foster & Waldo's new Victrola department is an ideal arrangement. It may not occupy the greatest amount of floor space and there may be some more ornate, but one will travel far to find a more harmonious and effective disposition of space. Nearly a score of demonstration rooms, all with outside lighting and placed around a central court for reception and display purposes, provide an excellent retail plant. The firm has converted one entire floor of its building into the Victrola department, and is going after the business with the energy characteristic of the house.

Exceptionally fine business is reported by Manager Robert Souders, of the Columbia Co. "The February and March sales have held up to the volume of trade we enjoyed preceding the holidays," said Mr. Souders, "and we see no signs of a let-down. We have two men on the road in this territory and will send out more as soon as we can get desirable men. Sales of Columbia instruments in the stores in Minneapolis and St. Paul are most satisfactory to all."

The Minnesota Phonograph Co., specializing in the Edison line, can't find anything but joy in the business.

"Our February sales were nearly double those of the corresponding month of 1915," declared President Laurence H. Lucker. "C. A. Briggs, a well-known salesman, has been added to our staff. Mr. Zellner, of New York, from the Edison head office, will represent the company in this territory and will make his headquarters with the Minnesota Phonograph Co. We are preparing a series of 'tone tests' similar to those of last season and expect to open with Alice Verlet, who made a striking success here before. The tone tests are of great value in stimulating the sale of phonographs."

The Beckwith-O'Neill Co. reports one great drawback in its business, that being the old one—inability to obtain goods. "The shortage is more acute than it was before the holidays," complained Mr. O'Neill. "We can't assemble a full line for show purposes and we are compelled to devise all kinds of schemes to fill orders. But even so this condition probably is better than being overstocked."

St. Paul's big department store, The Emporium, which went into the talking machine business some two months ago on a big scale, is reported as wholly satisfied with its venture.

"We can't get Victrolas fast enough, but otherwise we are quite satisfied with the trade outlook," remarked Manager Shaw, of the Cable Piano Co.'s St. Paul store.

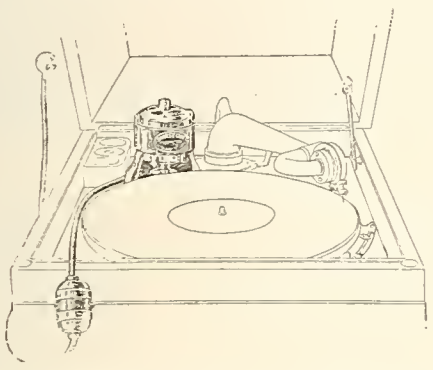
The agency for the Victor Victrola has been secured by the Cable-Shelby-Burton Piano Co., of Birmingham, Ala.

DESCRIBES SHELTON MOTOR.

Interesting Description in the Scientific American of This Electric Motor for Talking Machines Invented by W. G. Shelton.

Under date of February 12 the Scientific American carried the following interesting article, headed "Electric Motor for Phonographs," relative to the Shelton electric motor:

"No longer is it necessary for owners of the conventional phonographs to crank the mechanism in order to play the records, for there has recently been introduced a small electric motor that can be instantly applied to any disc type of phonograph. The motor weighs about three pounds and is made



Shelton Motor on Machine.

to operate on either direct or alternating current. It is provided with a rubber disc which makes a friction contact with the periphery of the phonograph turntable. With the exception of removing the crank handle, no other change is necessary in converting a phonograph into an electric one, using the small motor." The accompanying diagram shows the Shelton electric motor in use on a machine.

W. Gentry Shelton, president of the Shelton Electric Co., New York, and inventor of the Shelton electric motor, is widely known in technical and electrical fields through his numerous inventions, all of which have achieved wide success. Among Mr. Shelton's most popular inventions, all of which bear his name, are a dental engine, high frequency generator, portable vibrator, portable hair dryer, high speed centrifuge, portable hand massage vibrator, electric drink mixer and pedestal machines, vibrators, etc. Mr. Shelton is thoroughly familiar with all phases of electrical construction, and experimented with the Shelton electric phonograph motor for more than a year before placing it on the market. Its remarkable success has well justified his efforts.

OPEN COLUMBIA DEPARTMENT.

Spear & Co., the well-known furniture house, who will open their new home on West Thirty-fourth street next week, will maintain a very attractive talking machine department, handling Columbia products exclusively. J. A. Friedman, a talking machine man of extensive experience, will be in charge of the Columbia division.

"Music for Everybody"

OPERAPHONE RECORDS

Retail at 35 cents.

Are equal to any.

Are 8 inches in diameter.

Are double sided.

Play as long as the average 12 inch records of other makes.

Are vertical cut.

Play with an ordinary steel needle.

Play on any lateral cut record machine with a small attachment which is simple to use and inexpensive.

Our catalog is up-to-date and there are no duplicate titles; the songs are by the popular artists.

The records are the product of our own laboratory and factory.

Send for catalog and latest list.

SUCCESSFUL COLUMBIA CAMPAIGN.

Advertising of High Human Interest Being Used to Help Dealers—Electric Grafonolas Featured with Excellent Results—Exceptional Sales Being Reported.

The Columbia Graphophone Co., New York, is conducting an advertising campaign in the newspapers at the present time that is indicative of the broad policies of co-operation which characterize the service the company is extending its dealers.

Two of the advertisements in this campaign are reproduced herewith, and the human interest appeal in this copy has been a very important factor in the results it is achieving for Columbia dealers.

Up to date the Columbia Co. has used this advertising in a number of the leading trade centers, and, as will be noticed on the proofs of the advertisements, there is room at the bottom of each piece of copy for a list of the city's dealers handling the Columbia product. There is absolutely no cost to the dealers for this advertising, the Columbia Co. including it as a part of its efforts to insure the prosperity of its dealers.

The success of this campaign has been instantaneous, and many Columbia dealers have written the Columbia Co. enthusiastic letters of praise regarding the character and scope of the advertising. The advertisement featuring the Columbia Grafonolas electric has been particularly effective, Columbia representatives closing numerous sales as a direct result of the advertising.

TIFFANY MOTOR CO.

MANUFACTURERS OF ELECTRIC MOTORS FOR TALKING MACHINES

75 FULTON ST. NEW YORK CITY

TALKING MACHINE MEN TO DINE.

Local Association to Hold Annual Banquet at Hotel McAlpin on April 12.

At a meeting of the executive committee of the Talking Machine Men, Inc., held on March 8 at Keene's Chop House, New York, and attended by President John E. Hunt, Secretary Sol Lazarus, J. Y. Young, H. Jaffee, A. Galuchie, Henry Mielke, J. B. Coughlin, Meyer Goransky and R. B. Foster, it was voted to hold the annual banquet of the association at the Hotel McAlpin on April 12 at 7.30 p. m. The members of the talking machine trade in general are invited to attend and the tickets will be $3 each.

At the meeting it was reported that the association was showing a pleasing growth in membership and that the prospects for its future activities were very bright.

TO MAKE THE VICSONIA.

Walter M. Seymour Takes Over Manufacture of New Reproducer.

Walter M. Seymour, who for some time past has been sole sales agent in the United States and Canada for the Vicsonia, a reproducer for playing vertical cut records on various talking machines of leading makes, has taken over the actual manufacture of that reproducer and will, in future, handle it direct from the factory office, 311 East 134th street, New York.

NO OUTSIDE REPRESENTATIVES.

Only Myron J. Schloss and Edwin G. Schloss Authorized to Represent Schloss Bros.

In order to prevent the possibility of a misunderstanding in the trade due to the reported activities of some unnamed person, Schloss Bros., the successful manufacturers of talking machine cabinets at 637-645 West Fifty-fifth street, New York, announce emphatically that the only trade representatives of their house are Myron J. Schloss, president of the corporation, and Edwin G. Schloss, general manager, both of whom are well known locally. No one else has the authority to represent the corporation of Schloss Bros., either in the taking or placing of orders.

REVIEWING VICTOR-MACY CASE.

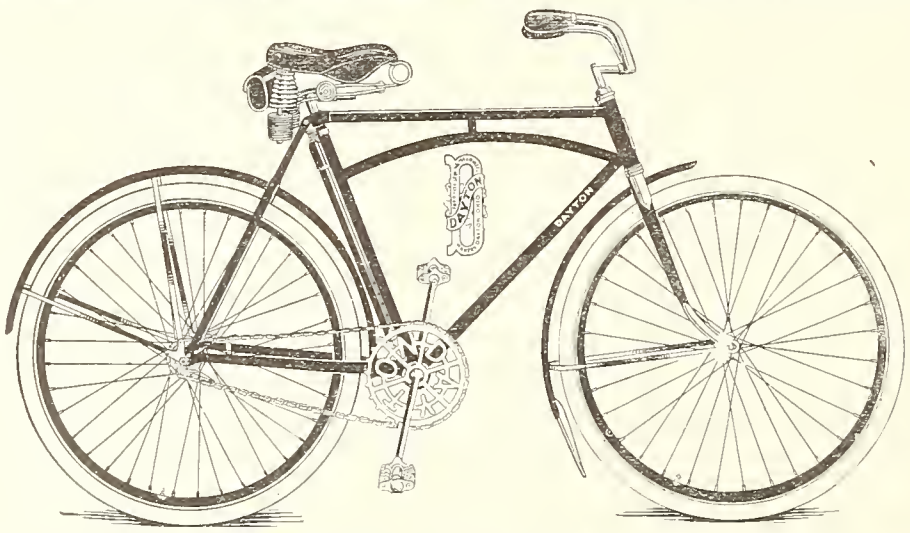
(Special to The Talking Machine World.)

WASHINGTON, D. C., March 8.—The United States Supreme Court decided to-day to review the case of the Victor Talking Machine Co. vs. R. H. Macy & Co., New York, in connection with the right of the store to sell Victor products at cut prices. The Victor Co. won its case before the United States Circuit Court of Appeals on an appeal from a decision in favor of the defendant in the lower court.

VICTOR RECORDS FOR EASTER.

With the opening of the Lenten season the Victor Talking Machine Co. has sent to its dealers elaborate Easter record hangers, bearing substantial lists of records particularly suitable at that season. There was also sent to the trade at the same time special supplements of Victor Easter records for distribution among the retail customers.

The Wall Damm Music Co., of Brazil, Ind., is doing an excellent business in the Edison Diamond Disc line.



WHY DON'T YOU SELL DAYTON BICYCLES, TOO?

Manufacturers, jobbers and dealers are co-operating in a big popularizing movement for "A Million Bicycles in 1916." Why don't you sell your share? There is a nice profit in Dayton Bicycles, as many dealers in musical instruments and supplies have found out to their advantage.

TO VISIT VOCALION DEALERS.

W. H. Alfring to Make Extended Trip Through the West and South—Will Arrange for a Number of New Agencies for That Line—Exclusive Territory Policy Works Out Well.

W. H. Alfring, wholesale manager of the Aeolian-Vocalion division of the Aeolian Co., New York, left Thursday for an extended Western and Southern trip. Mr. Alfring will visit the Aeolian-Vocalion dealers in this territory, and will also consummate a number of deals with prominent concerns which have applied for the Aeolian-Vocalion representation since the first of the year. Before leaving for the West Mr. Alfring briefly discussed the fundamental principles of the Aeolian-Vocalion wholesale campaign and commented upon the policies which dominate this very successful department of the Aeolian Co.'s business. Mr. Alfring said:

W. H. Alfring.

"One of the very first things which the Aeolian Co. decided upon when its wholesale division was organized was the policy of placing the Aeolian-Vocalion line as an exclusive proposition with the leading dealer of a city. We felt that dealers of the high class and standing which is characteristic of all Aeolian representatives would require definite assurance as to the quality of competition. By giving a dealer an exclusive agency we were certain that the quality and prestige of our products would be best maintained at all times.

"The value to the dealer of this exclusive territorial arrangement is naturally very great. He can feature his line with the full assurance that his expenditures and efforts will produce tangible and direct results, and he need never be concerned with the possibility of a competitive music house opening an establishment around the corner; provided, of course, that he exploits and handles the Aeolian-Vocalion as the leading instrument of the phonograph type and gives it a representation commensurate with its quality and musical merit.

"It is not the policy of this company to make frequent changes in the personnel of its dealer organization. We have, therefore, moved with comparative deliberation in the selection of our Aeolian-Vocalion representatives, and every dealer who has arranged to handle the Aeolian-Vocalion has done so with the definite understanding that his appointment will be a permanent one so long as he fulfils his part of the arrangements, and that he will receive the co-operation of the Aeolian Co.'s organization in every single department.

"It is hardly necessary to point out that the Aeolian-Vocalion has been and is being featured in a national advertising campaign of vast magnitude. An impressive list of the leading magazines contains one and two page advertisements devoted to the Aeolian-Vocalion, and this publicity is being turned into profitable sales by our dealers, who, with their exclusive arrangements, are in a position to handle each and every inquiry in their city.

"Since the first of the year we have received numerous applications from successful houses for the Aeolian-Vocalion representation, and on my present trip I expect to close several of these deals. We have been well pleased with the success of our wholesale business to date, and from present indications our 1916 business will be a forerunner for an active wholesale trade with the Aeolian-Vocalion in all parts of the country."

RECORDS POPULARIZE SYMPHONIES.

Talking Machine Has Proven a Great Factor in Arousing and Increasinig Public Interest in the Work of Symphony Orchestras Throughout the Country, Declares Prof. Carl Busch.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., March 8.—Any words coming from Prof. Carl Busch, of this city, in regard to any musical features are always listened to with respect, for Prof. Busch is recognized as the leader of Kansas City music. As a composer he has attained national fame and his name is well known to music lovers throughout the world. He is at present leader of the Kansas City Symphony Orchestra, and it is largely through his efforts that this organization has reached its present efficiency.

In a recent interview he spoke as follows concerning phonographic records:

"There is one influence which is quite unexpectedly helping symphony orchestras to gain popularity. I refer to the records of overtures and symphonies now made by the phonograph companies. In looking over the various catalogs I find that such overtures as Weber's Der Freischutz, Beethoven's Leonore No. 3, the Prelude to Lohengrin, Nicola's Merry Wives of Windsor, Wagner's Tannhauser and Schubert's Rosamond and many others are already made. The recording of symphonies has just begun, but already I find the Andante of Beethoven's Fifth Symphony, the Schubert and Unfinished Symphony complete, one movement of Beethoven's Pastoral Symphony, Schubert's B Minor complete, two movements of Mendelssohn's Italian Symphony, the Jupiter and G Minor Symphonies of Mozart besides movements of Wagner's operas and of the Symphonies of Dvorak, Tschaikowsky and Haydin.

"Nothing could be devised to better prepare the concert-goer for the full enjoyment of symphony performances than the repeated hearings of these records. The prejudice of many against symphony performances is caused by lack of familiarity with the themes which after a few hearings the ear learns to separate from the mass of orchestral harmony. Just as soon as that familiarity is attained just so soon the listener enjoys symphonies in preference to all other forms of music.

"I cannot too highly recommend the repeated hearing of these records as a proper preparation for the full enjoyment of orchestral performances, and it is to be hoped that the record makers will reproduce all the great symphonies, which will be of great advantage to auditors and orchestras."

Announcement

Our change of name is an Accomplished Fact -- Although it is a Small Simple Change, We feel that it serves to Indentify us more strongly with the Great city in which we have had our operations and had the privelege of serving the enormous following of Victor Dealers that we can rightfully call our own

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg. 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., March 10.—The month of February has gone into history and part of March is past, with no special development of note unless it be the remarkable increase which has been shown over the same period of last year. Both the retail and wholesale divisions have enjoyed a really prosperous month, wholesalers uniting in saying there is an increase of about one-third over last last year.

One thing that has been noticeable has been the long-encouraged step upon the part of dealers to lay in a large stock far in advance, and more than one dealer who was disappointed in his shipment last fall is already making preparations for Christmas of 1916.

There have been no particular preferences upon the part of the buying public, and dealers report that all sizes of machines have enjoyed their proportionate share of the demand. The same thing holds true in records, and popular numbers, old standard numbers, operatic and dance selections seem to receive about an equal call. A number of dealers have spoken with some surprise of the continued call for those records of the dance variety, and those who predicted that the fad would die ere this have been genuinely surprised.

The call for accessories has also been good, which is said to be due in great part to the large number of new machines which have been placed on the market recently.

Fuhri's New Post.

W. C. Fuhri, who, as elsewhere reported in this issue, has been appointed United States manager of the Columbia Graphophone Co., leaves a host of friends here who will regret his absence from Chicago while rejoicing in his promotion. Mr. Fuhri came to Chicago from St. Louis, where he had been manager of the local branch, ten years ago on his appointment as district manager, and had made his headquarters here ever since. He is now taking a brief rest in Michigan, but will be in New York to assume his new and improved position about the 15th of the month.

Mr. Fuhri's successor as manager of the Central West district has not yet been appointed, but this will probably be done by April 1.

Good February for Columbia.

C. F. Baer, manager of the Chicago office of the Columbia Graphophone Co., stated that the February business made a remarkable showing in that it was only slightly behind December, while it secured a moderate increase over January. The increase over February, 1915, amounted to 170 per cent. "A notable feature of our local business," said Mr. Baer, "is the results obtained from the very liberal advertising campaign that the company has been pursuing in the Chicago dailies. The effect of this publicity is being felt in an increasing degree each month. The idea of printing the names of all Columbia dealers in Chicago and suburbs has proved very effective, and a number of our dealers tell us that they trace a large number of direct sales to people that come into the store bringing copies of the advertisements with them. A generally satisfactory condition of trade in Chicago is shown by the fact that Edward Blimke, who has for years visited the dealers outside the loop, showed an increase in his sales of over 200 per cent. in January and February.

"The record situation is now in better condition than it has been for months, and we are now able to fill orders from our dealers from 95 to 98 per. cent complete. While there is still a shortage on machines, the situation here, too, is improving. On the higher priced machines we are able to care for our trade fairly well. We have been almost out of the market on the lower priced machines, but the big increase in the capacity of the factory is now beginning to tell and they will soon be able to supply motors for the cheaper machines, and this condition will then be rectified."

New Advertising Manager.

G. I. Stanton is now in charge of the advertising department of the local branch of the Columbia Graphophone Co. He is specializing on the well-organized system of the house in co-operation with the dealers in this territory in advertising and selling matters. He succeeds Mr. Kennedy, who is now traveling for the Chicago office in western Illinois and eastern Iowa.

The Orotund Soundbox.

The Combination Attachment Co., of 624 South Michigan avenue, has increased its manufacturing facilities so that it is able to make prompt shipments of the Orotund sound boxes either separately or in combination with attachments equipping them to play any disc record on any machine. The company is receiving many tributes regarding the excellent tonal qualities of this sound box, and manufacturers entering the market and wishing to work along quality lines would do well to familiarize themselves with the company's product.

Furnish Electric Signs.

The Chicago Talking Machine Co. is mailing to its trade a circular concerning the "Radium Flash" electric sign, which is especially adapted for window use for talking machine dealers. It is a very effective sign, beautifully framed in Circassian walnut, and the legend can be changed daily, or as often as one wishes, by means of the font of "type" which is a part of the outfit. It is 51 inches long, 8¼ inches in height and 6 inches deep and flashes the message to the passer-by. The circular gives a large number of legends calling attention to Victor machines and records, for the benefit of purchasers of these signs.

The Chicago Talking Machine Co., in its monthly budget to dealers, furnishes a copy of a very effective form letter which can be used in diplomatically "punching up" machine owners who have not visited the store to purchase records for several months.

Lyon & Healy Affairs.

The annual dinner and theatre party of the young women employed in the talking machine department at Lyon & Healy's was held on the evening of Tuesday, February 29. An excellent dinner was served at 6 o'clock at the Auditorium Hotel, and after that the party moved on to the Illinois Theatre to enjoy "Chin-Chin." There were forty-eight young women in the party and they were chaperoned by Mr. and Mrs. Marquette A. Healy, Mr. and Mrs. L. C. Wiswell and Mr. and Mrs. J. B. Ryde.

A notable improvement in the service which Lyon & Healy are affording to their dealers was inaugurated this month, and arrangements were completed whereby in the future the handling of all wholesale shipments of machines will be carried on from the principal stockroom at the Lake street warehouse. In this way a great deal of time is saved, as the congestion of Chicago's loop district is avoided, as well as the time required to handle twice. The force at the extra warehouse will also have the opportunity of specializing on machines. The assembling of record orders will continue to be done at the main store, and this force will do nothing else, thus effecting a saving of time in this direction also. Record orders are then combined with machine orders, and the shipment is made at one time.

The month of February with Lyon & Healy showed a 40 per cent. increase over February of last year and, according to Manager L. C. Wiswell, was the best February in the history of the house.

Harry J. Fitzpatrick, formerly of the Victor Talking Machine Co., is now connected with Lyon & Healy as the successor of E. P. Bliss, who resigned recently to go to the East. Mr. Fitzpatrick is now on his first trip through Indiana and Michigan, which territory he will cover.

A new addition to the retail talking machine department is H. G. Bartruff.

R. T. Schenck, who is to open the new talking machine department of W. H. Wheelock & Co. at Peoria, Ill., in a few weeks, is temporarily with Lyon & Healy for the purpose of getting a few pointers on store management.

Sonora Man in Chicago.

Frank J. Coupe, who has charge of the publicity for the Sonora Phonograph Corp., has been in Chicago for the past two weeks working upon the rearrangement of Sonora interests here. The Sonora Phonograph Co. of Illinois will become a branch of the parent organization, and as such

will benefit from the closer relationship which such a move will bring. Mr. Coupe says that all details in this connection have been arranged and enough shipments will be received within the next ten days to fill the $100,000 worth of Western orders that are on file in Chicago and leave a nice surplus stock besides.

William F. Martin, who is in charge of the Sonora destinies in the four States surrounding Chicago, has been kept very busy with the demands which dealers who have been anxious to take on the Sonora line have made upon him. During the past six months the Sonora has made very rapid progress with the general public in the Middle West, and dealers have not been slow to realize it.

Takes Responsible Position.

C. B. Mason has been appointed floor salesman of the Chicago Talking Machine Co., succeeding H. J. Flentye, Jr., resigned. Mr. Mason was formerly assistant credit man in the large department store of M. S. Donaldson, of Minneapolis, and was also associated with Don Preston, manager of the talking machine department of that house.

Three New Firms in the Republic Building.

The American Cyrophone Works, manufacturers of the Cyrophone talking machine, have opened offices on the tenth floor of the Republic Building. Two models are shown, one of the smaller cabinet variety, which is made in part of metal, and the other in a library table form.

In room 1727 G. Weigand & Co. are showing the "Ariel" line. Five models are shown, which include a number of interesting features. The machines are nicely finished and these find a ready market.

The Playerphone Talking Machine Co. has just opened offices on the sixteenth floor, having moved from the Hartford Building. The company manufactures the Playerphone line of machines, which have been preciously described in The World.

Good Record Window.

A. T. Boland, manager of the Grafonola Shop, 14 North Michigan avenue, has had a display in the north window for the past two weeks which has been productive of excellent results in the sales of popular records. As will be seen by the accompanying illustration, photographs of entertainers making Columbia records are connected by streamers with the records themselves in the front of the window.

There are photographs of Irene Franklin, Frank Tinney, Bert Williams, Ray Atwell, Al Jolson,

Attractive Columbia Window.

Chauncey Olcott, Raymond Hitchcock, Weber and Field and Margaret Farrell. In the center of the group is a picture of "Cohen" cut from a theatrical poster, and this is connected with a Cohen record by Joe Heiman & Co. The beauty of the trim is that, while it is exceedingly effective, it is very inexpensive. In fact, Mr. Boland himself constructed most of the properties, including the lattice work and the pedestals supporting the electric globes. It simply shows what a little ingenuity and a little interest in the window display proposition can accomplish, and Mr. Boland's trim is especially worthy of attention because it can be reproduced by dealers in small towns with the facilities they have at hand. Outside of the lattice, the lumber for the posts and the cheese cloth used in covering them, the only outlay was for the service of a sign painter in producing the legend above the display.

Installs Columbia Department.

The Humboldt Furniture Co., of 2412 North avenue, one of the largest concerns outside of the loop, has just added a Columbia department and has fitted up handsome quarters on the first floor of the building, with three demonstration booths. The size of its contract indicates that it is going after the talking machine business aggressively.

"No Records on Approval."

A. B. Miller, Columbia and Victor talking machine dealer at 1124 Sixty-third street, has adopted a rigid "no-records-on-approval" policy, which he says is working out in terms of increased record business. In each of his demonstration rooms appears a placard bearing these statements:

"No records on approval.

"No records exchanged.

"Therefore we can and do guarantee all records."

"After considerable hesitation I adopted this plan last August," said Mr. Miller. "Some of my friends in the trade and many of my customers said that I could not get by with it, but it has proven a success. As a matter of fact, all of my best customers saw the point at once after I had shown them that it was in the protection of their own interests. I have actually got a number of new customers, who have come to my store simply because of the assurance that they will get perfect records. The day before Christmas I sold $180 worth of records, and not one of them came back. The fact that my record business has been much larger since the adoption of this policy than it has ever been before proves its practicability. Machines from $50 to $100 are sold strictly on a ten-

Our phenomenal growth proves our claims conclusively.

Read what one of our many satisfied customers says about our Support, then let us satisfy you.

CHICAGO HINGED COVER SUPPORT & BALANCE CO.,
144 South Wabash Ave., Chicago, Ill.

December 6, 1915.

Gentlemen: I consider that the Empire Talking Machine Co. was especially fortunate in being able to present their new Model B machine to the trade with your Cover Support and Balance as regular equipment, and, in my opinion, this is one of our best features, and one that the dealers can use to advantage, because the buyer will be quick to appreciate its many advantages as compared with the old style cover support. With your support the cover can be raised or lowered with one hand, something that is necessary when holding records, and the weight of the cover is entirely eliminated. With all these advantages your device is so simple that there is no chance for it to get out of order, no matter how long or how often it may be used.

We are enclosing herewith our additional order for 12,000 sets of your cover supports and trust same will have your usual prompt attention.

Wishing you the continued success which you deserve, and assuring you that we appreciate the manner in which you have handled our orders, I am

Yours very truly,
JOHN H. STEINMETZ, President, Empire Talking Machine Co.

Models will be sent to interested manufacturers. Write today

CHICAGO HINGED COVER SUPPORT & BALANCE CO. 144 S. Wabash Avenue, CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 63).

month basis. There is a little wider leverage on the higher priced machines, but I will not sell a $150 machine on less than $12.50 a month, and I insist on at least $15 a month on a $200 machine. I will not sell even the cheapest machines at less than $5 a month. It may seem a little difficult for a dealer to always insist on these terms, but it pays in the long run and eliminates much worry and uncertainty."

Tungs-Tone Needle Soon Here.

One large Victor distributing house made the statement that the long-expected Tungs-tone needle would be delivered in fairly large quantities by the middle of the month.

Following the advertising by the Victor Co. of this new needle, there have been dozens of calls received daily by the downtown retailers, and every one is anxious to secure a supply. It is said that the machines at the Victor factory which have been turning out this product have until recently been limited in number, but are now so greatly augmented as to increase the output sufficiently to make generous initial shipments.

Kimball Department to Move.

On March 15 the talking machine department of the W. W. Kimball Co. will move to the first floor of the new building, and there will occupy temporary quarters consisting of eight private demonstration booths and two large display rooms. When the south half of the new building is completed the department will be moved into it and will probably occupy a portion of the ground floor on the Wabash avenue side. Manager T. J. Cullen reports that business is keeping up very nicely, with all classes of machines selling in a proportionate degree.

Prepares for Holiday Trade.

P. J. Boller, of the Boller Piano Co., 2168 Milwaukee avenue, is a believer in preparedness. Like numerous other dealers during the last holiday season, he was much disappointed by failures in the delivery of goods, and lost a number of sales. This year he is preparing for anything, and so has erected a special storeroom at the rear of his premises, in which he is collecting a stock of machines. Mr. Boller said to The World: "I am taking no chances and am building this little warehouse, which I am making 42 feet long and 22 feet wide. I hope to have $10,000 worth of goods stored by the first day of May, and then I know I will be in fair shape for spring; but my July orders of last year have not yet been filled, so on second thought I do not know as I am a bit too early."

Marie Kaiser at Edison Shop.

Miss Marie Kaiser is to make her appearance at the Edison Shop in a tone re-creation test during the week of March 13-20.

Miss Kaiser is a soprano of exceptionally charming voice and has made a rapid rise to the very first class of sopranos in this country. Miss Kaiser has already made two records for the Edison. They are "Italian Street Song" and "Poor Wandering One." She will sing on the evening of March 16 at the warerooms of the Haddorff Piano Co. at Rockford, Ill., and on Tuesday, March 14, she will sing at the establishment of R. K. Kiep, Joliet, Ill.

C. E. Goodwin, manager of the Phonograph Co., returned last week from an overnight visit at Detroit, Mich., where Miss Christine Miller was heard in a tone re-creation test in the ballroom of the Hotel Pontchartrain. Miss Miller sang under the auspices of the Edison Shop.

Wurlitzer Stocks in Good Condition.

Assistant Manager Noble, of the wholesale talking machine department of the Rudolph Wurlitzer Co., says that there has been a remarkable improvement in receipts of machines from the Victor factories at Camden and that large shipments of all styles have been received recently. This applies, according to Mr. Noble, even to the special finishes and styles.

"There seems to be no let-up in business," said Mr. Noble. "The month of February was much better than February of last year, and the demand has increased proportionately. Very fortunately our supplies are improving right along, and there is every indication that our stocks ere long will be nearer completeness than they have been for a long time."

Six Best Sellers.

The six best Columbia records of the month are reported as follows: "We'll Build a Little Home in the U. S. A." and "The Good Old Days Back Home;" "The Old Folks at Home" and "My Old Kentucky Home;" "Memories" and "My Mother's Rosary;" "Waters of Venice" and "Bridal Blushes;" "Casey's Description of His Fight" and "Casey Takes the Census;" and "A Little Bit of Heaven" and "Where the River Shannon Flows."

"M-o-t-h-e-r" remains the big seller in the Victor popular list, with "Wedding of the Sunshine and the Rose" on the reverse side. Other leaders are gems from "Chin-Chin" and selections from "Maid in America;" "Go to Sleep, My Dusky Baby" and "Rocking Time;" "Stop, Look and Listen" (medley fox-trot) and "When Old Bill Bailey Plays the Ukulele." The big sellers in the Red Seal list are "Somewhere a Voice Is Calling," sung by John McCormack, and "Treue Liebe," sung by Alma Gluck and Paul Reimers.

month have been "Back Home in Tennessee" and "M-o-t-h-e-r;" "Bridal Blushes Waltz" and Lake of the Woods Waltz;" "Andante Pastorale," from "Souvenir des Alpes," and "Berceuse-Jocelyn;" "O du mein holder Abenstern" and "Bonnie Sweet Bessie"; "When Irish Eyes Are Smiling" and "Where the River Shannon Flows."

The six best Pathé sellers the past month have been "Celeste Aida" from "Aida" and hymn, "Song of Triumph;" "Thais Meditation" and "Serenade Pechotsch;" "The Chevy Chase" (fox-trot) and "American Greeting March;" "Brown October Ale" and "Oh See the Little Lambkins Play," from "Robin Hood;" "Mazurka 'Chopin'" and "Petite Valse 'Hollmann';" "A Little Bit of Heaven" and "Mighty Lak a Rose."

Now Chicago Talking Machine Co.

The Talking Machine Co. of Chicago, the well-known Victor distributer, has filed notice with the Secretary of State of Illinois for the change of name to the Chicago Talking Machine Co. This has been done simply in order to identify the company more completely with the city in which it is located. The Talking Machine Co. boasts the distinction of being the oldest talking machine concern in Chicago and one of the oldest in the United States. The change, of course, is only one of name, as the organization is exactly the same as in the past. Furthermore, many dealers have always referred to the house as the Chicago Talking Machine Co., so the change in name simply conforms to what has become a quite established usage in the trade.

R. J. Keith, of the Chicago Talking Machine Co., in speaking of the February business said that it was very satisfactory and that it showed a very large increase over the same month of last year. Of course, the machine shortage still exists, notwithstanding the fact that shipments from the factory are greatly in advance of the corresponding period of last year and are coming forward in increasing quantities now. The principal difficulty at present is to get machines in golden oak, while the word from the factory is to the effect that this condition will be rectified in the near future. February was an exceptionally big record month and the company is continually receiving letters from dealers expressing their appreciation of the constructive work of the Chicago Talking Machine Co. and co-operating with them in the systemization of the record business.

Distinguished Visitors.

Louis F. Geissler, general manager of the Victor Talking Machine Co., was a recent visitor to Chicago. He was accompanied by his bride and was on a trip to some of the larger Middle Western centers.

Walter Stahls, comptroller of the Victor Co., and Mrs. Stahls were visitors.

Represent "Perfectrola" in Chicago.

S. M. Bisbee and Walter Kirchwehn have secured the Chicago agency of the Perfectrola talking machine, of Milwaukee, and have established offices at 160 North Fifth avenue, where they have on display a complete line of that make of machines. Mr. Bisbee was formerly connected with the O'Neill-James Co., and Mr. Kirchwehn is a man of long experience in the trade.

Bright Sayings of Adults.

Riding home I lamps an ad of a phonograph company, which inspires me to say to a pussonal friend of mine: "All these big singers are making a killing warbling for record manufacturers."

"Yep," says p. f., j. l. t., "it's their grand opera-tune-ity."

Stewart Phonograph Co. Busy.

The Stewart Phonograph Co. has received a tremendous volume of orders following the announcement of its $5 phonograph, published a couple of weeks ago. Orders have been received from every corner of the United States and many from foreign shores, with the result that the company's big plant at Wells street and the river is throbbing with activity. The pressure of the business has put a great strain upon the factory output, but by the use of an increased force and overtime work shipments are being made quite promptly. The popularity of the instrument has already exceeded the fondest hopes of its promoter, and the prediction is freely made that the company has now in sight enough work for at least two years to come.

Wade & Wade Activity.

Wade & Wade, of this city, are receiving many expressions of satisfaction from their trade regarding their new No. 1 fiber needle cutter, which has several new features increasing its efficiency, among which is the fact that the blades work parallel to each other. Both the No. 1 cutter, which retails as heretofore at $1.50, and No. 2, retailing at $2, are experiencing a demand that keeps the Wade factory rushed to the utmost.

Lorophone Offices Established.

A. C. Appleton, sales manager of the Lorimer-Hicks Manufacturing Co., of Troy, O., was in Chicago recently, and while here made arrangements whereby the Lorophone Talking Machine Co. will introduce the company's product in four States of the Middle West. In all probability they will be Illinois, Wisconsin, Michigan and Minnesota. The office of the company will be in the State building at the corner of Randolph street and Fifth avenue. The Lorophone is at present being produced in four different models, which have many distinctive features.

Novel Demonstration Device.

The Chicago Hinged Cover Support & Balance Co. is distributing, in response to many hundreds of inquiries for information, a novel device of the shadowgraph variety in the form of a mailing card. It shows just how the Chicago hinged cover support and balance operates and illustrates the changed positions of the lever and the tension of the spring when a talking machine top is raised or lowered. A number of additional manufacturers have included the Chicago hinged cover support in the specifications of their instruments during the past thirty days, and piano bench manufacturers are also planning to use the device.

WADE FIBRE NEEDLE CUTTERS

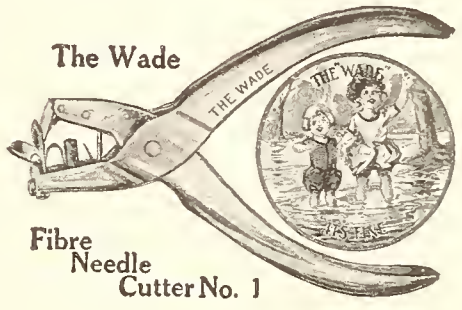
Be sure you get

THE WADE

Our absolute guarantee with every Cutter made

RETAIL PRICES:

No. 1, $1.50; No. 2, $2.00



The blades in the Wade Cutters are made from the best tool steel, scientifically hardened and properly ground. With ordinary use they should last indefinitely without sharpening.

The Wade embodies the right principle worked out through long experience. It is simple, durable and accurate. It trims the needle at the proper angle to get the best results.

The Wade is the most economical Cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points from one Fibre Needle. No. 2 has a double action making it especially easy to operate and affording the most powerful cut of any tool made.

Our service is unsurpassed, a trial will convince you that we can please and satisfy you.

WADE & WADE

3807 LAKE PARK AVE.
CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 65).

tion and general expansion, the Pathé Pathephone Co. is now removing to larger quarters and has taken over 3,000 square feet on the fifth floor of the same building in which it has been located at 17 North Wabash avenue. The new space is being ideally arranged, both as a distributer's office and retail salesrooms. In addition to the general offices, record stockrooms, etc., there is a large reception room, where the entire Pathé line is placed on display, the concert hall and four individual demonstration booths. All of these are being tastefully decorated and very comfortably furnished, so that the Pathephone Co. is now equipped to serve with equal comfort either its retail patrons or its dealers.

Office Manager Frank Tooley has instituted an entirely new office system, which makes for improved facilities for handling wholesale orders and for shipments that involve the minimum of delay. In conjunction with General Manager R. E. Rundell, Mr. Tooley is also arranging for a largely increased stock of records. The company has also perfected a new selling scheme which is said to be entirely new and remarkably effective. The company is affording its dealers supplementary service, which unfortunately cannot be explained here.

"The month of February was the best wholesale month in our history," said Mr. Rundell to The World. "This is due in part to our ability to furnish dealers with the records which they order, and this department has been vastly improved. A number of good local agencies have been arranged by our city salesman, Edward Bristol. Perhaps one of the latest of our out-of-town dealers is the firm of Clemenn & Salzman, of Rock Island, Ill."

Personals and Visitors.

Edward Rice, of the Schiller Piano Co., of Davenport, Ia., was in the city last week, accompanied by his wife. They have just returned from a month's trip to the South, a feature of which was a delightful journey along the Florida coast in a fine yacht owned by Chicago friends.

Miss Douglas, formerly of the talking machine department of Marshall Field & Co., is now with the P. A. Starck Piano Co.

Miss Kiley, for some years with the Siegel & Cooper talking machine department, has accepted a position with the new Sonora store on Jackson Boulevard.

H. B. Levy, Vocalion representative of the Aeolian Co., who makes his headquarters in Chicago, has been on a number of short trips through neighboring States, and in all of them was met with a very encouraging reception.

F. L. Bernard, of Springfield, Ill.; H. G. Kramer, Crown Point, Ind., and E. A. Vaughan, Princeton, Ill., were recent visitors to Chicago. The last-named gentleman recently conducted a campaign in the public schools of Princeton and sold three good-sized machines in the lower grades. He is planning next to equip the high schools.

Mr. Schoonmacher, the new manager of the talking machine department of the Herzfeld-Phillipson Co., of Milwaukee, was in Chicago a few days ago.

Henry Linnig, of Linnig Bros., Peru, Ill., and Orison Young, Grand Forks, N. D., were two visiting dealers this month.

H. W. Main, manager of the talking machine department of Locke & Kuhl, Peoria, Ill., was in Chicago for a few days recently.

Arthur D. Geissler, of the New York Talking Machine Co. and the Chicago Talking Machine Co., spent a week in Chicago and returned to New York with Mrs. Geissler, who had been spending some time with relatives here.

Robert B. Gregory, president of Lyon & Healy, is at Bellaire Heights, Fla.

George Joosten, of Jansen & Joosten, Peoria, Ill., and A. H. Renier, of La Crosse, Wis., were recent visiting dealers.

J. G. Corley, Richmond, Va.; E. W. Hanson, Oelwein, Ia.; J. W. Sturgis, Hugo, Okla.; W. H. Sweetland, Otsego, Mich.; W. H. Aton, Baraboo, Wis.; F. R. Willey, Shelby, Ill.; A. V. Lyle, Beloit, Wis., and E. G. Olson, Wichita, Kan., were recent visiting dealers to the local trade.

Julius Friedrich, Jr., of the Friedrich Music House, of Grand Rapids, Mich., was in the city recently and visited the leading talking machine stores and departments with a view of getting ideas for extensive improvements to be made in their talking machine department. It is to be moved from the third floor to the ground floor and eight handsome demonstration booths built.

Leonard Bros., furniture dealers of Rantoole, Ill., have qualified as Victor dealers.

W. T. Duker, proprietor of a large department store at Quincy, Ill., was in the city recently visiting his daughter, who is attending the Anne Morgan School of Expression here. Mr. Duker installed a Victor department in October and a few weeks ago bought the entire Victor stock of the Ware-Weyland Co., of the same city.

Word has been received in Chicago to the effect that Don Preston, manager of the M. S. Donaldson department store at Minneapolis, is the father of a fine girl who is already giving evidence of marked musical proclivities. Prior to assuming his present position Mr. Preston traveled for the Chicago Talking Machine Co.

West & Neuhaus, dealers in electrical goods at 125 West Madison street, have added a Columbia department, which is in charge of E. W. Richards, formerly of the sales force of the Grafonola Shop on Michigan avenue.

The Magniphone Now on Market.

A. L. Eaton, of the American Can Co., announces that his concern is now placing upon the market the company's all-metal machine, which is known as the "Magniphone."

Knabe-Crystola on Display.

Al Bruckner has opened a salesroom and office on the eleventh floor of the Republic Building, where he is now promoting the Knabe-Crystola machine. Mr. Bruckner has had wide experience in advertising and sales promotion.

Buys Music Store.

George P. Cheatle, the well-known representative for the Chicago Talking Machine Co., has, with his father and brother, purchased the Bernard Music House at Springfield, Ill., and it will be known in the future as the "Music Shop." Mr. Cheatle will have a third interest in the business and will give the others, who will be actively in charge, the benefit of his experience in the talking machine business, but will devote his time to the interests of the Chicago Talking Machine Co., as in the past. Pianos and sheet music will be handled in addition to Victor talking machines and records.

Complete Stock of Repairs.

Charles Bryan, of 25 West Lake street, has built up an unusually large business on talking machine repair parts of all kinds, and is scoring handsome increases from month to month on account of the excellent service he is able to give his trade. Not only is he able to furnish parts for all the established present machines, but has frequent inquiries for parts of the old Talkophone, Hawthorne-Sheble, Zonophone and other machines.

ENTER THE "MUSICTROLA."

Name Adopted for New Talking Machine Manufactured by Passow & Sons and Which is Meeting with Marked Success.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 8.—Passow & Sons, of 832-842 West Madison street, Chicago, have adopted the name "Musictrola" for the new talking machine which they placed on the market last month. They now have ample stocks of the various models and have large quantities coming through their extensive factory. They are, therefore, able to fill all orders promptly. They have already established a number of desirable dealers and are receiving particular recognition of the merit of the "Musictrola" in the number of repeat orders which they are constantly receiving. Passow & Sons' methods are worthy of admiration, as they are only placing their line with responsible dealers and under conditions calculated to secure them adequate and high-grade representation. Moreover, they are endeavoring to conduct their business in line with the best traditions of the talking machine trade. The line at present consists of three attractive styles of cabinet machines, retailing at $75, $100 and $150, and are distinctive because of the excellence of the cases, the result of forty-five years of experience in producing cabinet work of the highest quality. The machines are all equipped for playing any disc record, have an excellent motor, efficient tone regulator and other desirable features.

A DEALER WRITES A LETTER—

"MR. JOHN H. STEINMETZ,
Pres. EMPIRE TALKING MACHINE CO., Chicago, Ill.

Dear Mr. Steinmetz:

The Empire has arrived!—What impression did it make on me, and what is my opinion?
In all my writings to you, I have been 'outspoken,' no 'flowery' talk. So I will tell you frankly, also, in this case
After giving the machine several tests and the minutest examination, I have found the following:
That the Empire Talking Machine is ahead of ANY OTHER machine on the market;
That its manipulation is more convenient and easier than any;
That it plays all records equally well;
That the spring-balanced cover is a great advantage;
That the Tone-modifier is simply great and much appreciated by all that saw it demonstrated;
That the appearance of the Empire $100 model is, at least, equal to that of most $150 models;
That there should be the greatest of success in store, in the very near future, for the Empire;
That I will knuckle down and push and pull and lift and work and use every legitimate effort for the success of the Empire, its head and sub-promoters and distributors (may I include myself?).
The 500 circulars, with address, have arrived and have started work for the Empire at once. What the result will be and how soon will only be seen in the future. Will also start the advertising in local papers now, and otherwise do all I can to further the distribution.

Yours very truly."

PATHEPHONE ON STATE STREET.

New Store Opens on Main Thoroughfare in Chicago—Furnishings Cost Thousands.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 6.—The State Street Pathephone Co., on the first of March opened what is in many ways one of the most remarkable retail stores in the world. It is remarkable mainly for its location, which is at the northeast corner of State and Monroe streets, on the first floor of the Mentor Building. The space occupied measures 27 feet on State street and 50 feet on Monroe street, and is conceded to be one of the choicest corners on what is acknowledged to be the best retail merchandising street in the world.

The lease calls for an annual rental of $25,000 per year for a term of five years, or $125,000 in all. There are thirteen private demonstration booths in all, built around a central corridor and around a mezzanine balcony. There is also a large reception room immediately inside of the State street entrance.

Facing the entrance and parallel to it is a corridor, which leads to the main floor demonstration booths, and the mezzanine booths are located immediately above. The cost of the work runs into several thousand dollars, and the furniture will also cost a similar sum. The venture is being handled by Arthur J. O'Neill and his two sons, Harry K. O'Neill and Arthur D. O'Neill, which family has been identified with the Pathephone since its introduction in this country. The company has been incorporated with a capital stock of $10,000.

The number of persons passing this point is estimated at almost 250,000 per day, and the O'Neills believe that it is just as practicable to sell talking machines under these conditions as it is to sell cigars or clothing.

APPRECIATIVE OF SERVICE.

Policy of Empire Talking Machine Co. Wins Response from Dealers.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 7.—One of the phases of the talking machine business to which the Empire Talking Machine Co. has paid a good share of

Reel Exploiting the Empire.

attention is that of its service to dealers. As a part of this co-operation dealers are furnished with cuts, advertising matter, lantern slides, etc.

The accompanying illustration shows one of the typical lantern slides which are used by Empire dealers through the medium of the motion picture show to familiarize their communities with the Empire machine.

That the results are being produced is testified to by a number of dealers who have written to Mr. Steinmetz, president of the concern, voluntarily expressing their appreciation of the aid which they have received.

Lots of folks pray for good times, but forget to ask for strength to stand prosperity.

DOYLE CO. FEATURING TALKERS.

Enterprising Furniture House Carries Both Victrolas and Grafonolas.

(Special to The Talking Machine World.)

GALESBURG, ILL., March 6.—The Doyle Furniture Co., at Main and Seminary streets, is featuring the Victor and Columbia machines, and recently used a full page ad in the local paper to call attention to the resourcefulness of the talking machine as a means of entertainment. A full line of Victor Victrolas and Columbia Grafonolas is carried by this firm, and a complete supply of the records made by both companies is also in stock. A special feature of the record department of the Doyle Co. is its mail order department, whereby any record ordered is delivered to the customer, through parcel post, within forty-eight hours after the order is received. Every customer of the store is sent the monthly supplements of the new records as they are issued, and by giving careful attention to these details of service it has built up an enviable trade in talking machines in Galesburg and vicinity.

THE WORLD SELLS ITSELF.

Columbia Graphophone Company
Woolworth Building, New York

WITH THE TRADE IN PITTSBURGH.

Talking Machine Department of Rosenbaum Co. Being Removed to New Location—H. H. Buck a Benedict—C. F. Newman in Charge at Boggs & Buhl—Other Changes—Trade Generally Active During Past Month.

(Special to The Talking Machine World.)

PITTSBURGH, PA., March 8.—The talking machine department of the Rosenbaum Co. is being removed from its original location on the ninth floor to the third floor, where entirely new equipment has been installed. The department is among the best in the city, its home being in the newest and finest of Pittsburgh's department stores. It was established a little less than a year ago, when the store was completed, and has proven a marked success. The Columbia line has been carried exclusively up to the present time. With the establishment of the department in its new location, the Edison line has been acquired and will be featured along with the Columbia. Several new additional booths have been installed and the new quarters are being fitted up in a very attractive manner and along the most up-to-date lines.

H. H. Buck, manager of the Rosenbaum talking machine department, was married on February 12 to Miss Edith Abrams, of this city. Mr. Buck is well known in the trade, having occupied an important position with the Columbia Graphophone Co. for a number of years before taking charge of the Rosenbaum department. Miss Abrams had been associated with Mr. Buck in the department since last September.

The Boggs & Buhl talking machine section is now under the direct supervision of C. Frederic Newman, who was recently appointed manager of the piano department. Mr. Newman reports an excellent volume of business in both Victor machines and records.

The Buehn Phonograph Co., Inc., jobbers of the Edison talking machine in this district, are now well established in their handsome new home at 513 Wood street, which was opened last month. The store is now completely furnished in an artistic and luxurious manner throughout. Mr. Buehn reports business very satisfactory and a good number of new Edison dealers in this territory.

The talking machine department of the Schroeder Piano Co. is doing a phenomenal business, Henry F. Schroeder reports. In making a conservative estimate of the improvement over last year, Mr. Schroeder states that the sales of records have increased 30 per cent. and of machines 15 per cent. The Columbia line is handled exclusively.

H. N. Rudderow, manager of the Talking Machine Shop, Jenkins Arcade Building, reports business continuing at a fine level of activity. The Talking Machine Shop gives daily Victrola concerts that have been attracting considerable attention.

George Hards, manager of the W. F. Frederick Piano Co.'s talking machine department, states that trade in the Victor line has reached splendid proportions this month, and that all the machines obtainable are being sold.

Mrs. C. H. Walrath, formerly in charge of the offices of the Kaufmann Bros. piano department, has joined the talking machine section of the "Big Store" as associate to M. Max. Mr. Max, who is also Eastern manager for the Symphony Player Co., New York, N. Y., has spent the greater part of the past month here looking after the large volume of business being handled by the department.

A State charter of incorporation was granted at Harrisburg on March 3 to F. C. Wampler & Son Inc., dealers in Victrolas and pianos at 510 Walnut street, McKeesport, Pa. The capital stock is stated at $25,000. The incorporators were: W. P. Wampler, Harriet C. Wampler and Natalie Schaffer, all of McKeesport.

The Columbia Graphophone Co. has appointed W. D. Montgomery as manager of the sales force in the city and surrounding towns. Mr. Montgomery is a talking machine man of considerable experience, having been previously associated with the Columbia Co. in Pittsburgh for about three years.

CENTURY CO.'S NEW CATALOG.

The Century Cabinet Co., 25 West Forty-fifth street, New York, has just issued a new catalog illustrating the popular models in its extensive line of phonograph cabinets. This catalog is well illustrated and attractively arranged, representing the artistic character of the cabinet designs manufactured by this company.

During the past few months the Century Cabinet Co. has arranged to manufacture cabinets for some of the leading talking machine manufacturers in the country. The company is well equipped to take care of all of the work, as it maintains a very large factory which is up to date in every particular. In addition to carrying a standard set of designs, the Century Cabinet Co. will produce any special cabinet designs which a manufacturer may desire.

The G. A. White Piano Co., of Fairbury, Neb., recently completed four handsome new music rooms in its store, which will be used principally for Victrola demonstrations.

Are You Prepared?

¶ To handle your 1916 Victor trade profitably you will need the co-operation of a Victor jobber who specializes on solving the problems which daily confront the Victor dealer. Such problems as stock, advertising, turn-over, etc., are all included in the

G. T. Williams Service!

¶ This organization is equipped to give Victor dealers practical assistance in developing their business along sound, logical lines.

¶ A trial order will convince you that the word SERVICE means more to this company than any dictionary definition.

Why not learn **our** definition?

EXECUTIVE BOARD OF TALKING MACHINE JOBBERS MEETS.

Executive and Legislative Committees of the National Association of Talking Machine Jobbers Convene—Convention to Be Held in Atlantic City Early in July.

A very busy and resultful meeting of the executive and legislative committees of the National Association of Talking Machine Jobbers was held on Tuesday, February 15, at the Hotel Knickerbocker, New York, with a very satisfactory attendance of committeemen and jobbers in general.

A meeting of the executive committee was held in the morning, at which a number of association and general business affairs were discussed and at which a committee of three, consisting of J. F. Bowers (chairman), P. B. Whitsit and C. F. Bruno, was appointed to attend the meeting of the allied trades on Wednesday for the discussion of the plan for the formation of a Music Trade Chamber of Commerce.

Another committee, consisting of J. N. Blackman, W. H. Reynalds and J. C. Roush, was appointed to visit the Victor Co. factory in Camden and discuss various trade matters with the officials of that company.

A vote of thanks was tendered J. N. Blackman for his prompt action in sending the condolences of the association to the family of the late Col. Edward Lyman Bill at the time of his death, and a committee, consisting of J. F. Bowers, Louis Buehn and H. A. Winkelman, was appointed to draw up formal resolutions of condolence and regret.

The dates for the coming annual convention of the association were fixed as July 10, 11 and 12, at the Hotel Traymore, Atlantic City, a favorite rendezvous of the jobbers. The plans call for a three-day convention, the first two days being devoted to business sessions and the third day to educational work and other pertinent subjects.

At the afternoon session the legislative committee had the floor, the committee consisting of Messrs. Mickel, Roush, Bowers, Nestor, Whitsit, Blackman and Rauth. The work of the committee in support of the Stevens Bill for the maintenance of prices on trade-marked goods was highly commended, and arrangements were made for the collection of the last half of the assessment levied upon association members to carry on the work.

In further support of the Stevens measure, the legislative committee went to Washington in a body the latter part of the week and spent Friday and Saturday in the National Capital working with the Congressmen in support of the bill.

Those present at the meetings included: H. F. Miller, Penn Phonograph Co., Philadelphia, vice-president, who presided in the absence of President A. G. McCarthy; W. H. Reynalds, Mobile, Ala., treasurer; E. C. Rauth, Koerber-Brenner Co., St. Louis, secretary; George E. Mickel, Nebraska Cycle Co., Omaha, Neb.; J. F. Bowers and L. C. Wiswell, Lyon & Healy, Chicago; A. A. Trostler, Schmelzer Arms Co., Kansas City, Mo.; H. A. Winkelman, Oliver Ditson Co., Boston; Louis Buehn, Philadelphia; French Nestor, W. F. Frederick Piano Co., Altoona, Pa.; C. F. Bruno and H. Stadlmair, C. Bruno & Son, New York; F. P. Oliver and J. N. Blackman, Blackman Talking Machine Co., New York; Perry B. Whitsit, Perry B. Whitsit Co., Columbus, O.; J. C. Roush, Standard Talking Machine Co., Pittsburgh, and H. G. Koerber, Koerber-Brenner Co., St. Louis.

Do you need capital to increase your business?

We will pay you cash for acceptable installment contracts on Talking Machines and Pianos.

WRITE FOR DETAILS

HAMILTON INVESTMENT CO., 76 W. Monroe St. CHICAGO, ILL.

KOERBER-BRENNER CO. ACTIVE.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., March 8.—General business with the Koerber-Brenner Co., the prominent Victor distributer, has been thoroughly satisfying during the past month, the volume of orders taxing the company's ability to meet them with deliveries made from the Victor factory. There is still a shortage on certain types of machines, but through careful distribution the burden of stock shortage does not fall too heavily upon the shoulders of any one group of dealers.

H. G. Koerber, president and treasurer, and E. C. Rauth, vice-president and secretary of the company, spent several days in the East last month, attending the meeting of the executive committee of the National Association of Talking Machine Jobbers, of which Mr. Rauth is secretary, in New York, and going later to the Victor factory. Both gentlemen came back to St. Louis full of enthusiasm regarding the future line and particularly the outlook for 1916.

GENERAL IMPETUS TO CLEVELAND TALKER TRADE.

Business Shows Considerable Activity for Various Reasons—Demand for Goods Still Exceeds the Supply—Talking Machine Men Attend Annual Banquet of Music Trade Association and Make Speeches—What the Various Houses Have to Report.

(Special to The Talking Machine World.)

CLEVELAND, O., March 8.—During the past month the talking machine industry in this city has experienced an exceptional impetus, due to various causes. The Cleveland Music Trade Association held its annual banquet on February 24 at the Colonial Hotel, this city, and as the talking machine men were recently taken into the association there was a large coterie on hand, and two prominent talking machine men, namely, C. K. Bennett, manager of the Eclipse Musical Co., and George R. Madson, manager of the Columbia Graphophone Co., were among the leading speakers. Mr. Bennett spoke eloquently on the importance of the passage of the Stevens Bill and Mr. Madson spoke on the subject "Has the Talking Machine Increased Interest in Music?"

The Victrola department of William Taylor, Son & Co., under T. A. Davies' management, reports a phenomenal month's business, and the business for February, 1916, showed an increase of 90 per cent. over the same month a year ago. Not a single sale of a machine has been lost because of shortage of stock.

C. H. Denslow, formerly of the Eclipse Musical Co., and William Bregenzer, formerly of the W. F. Frederick Piano Co., helped materially to achieve the wonderful results attained.

The Phonograph Co., exclusive Edison jobber, again showed a substantial increase over last year's business, and Secretary L. N. Bloom was elated over the month's results. Many tone tests have been made throughout the entire territory, and the publicity campaign has been most successful. The demand seems to be for the higher priced instruments.

March finds the Euclid Music Co. prosperous and doing well. Grant Smith, secretary and treasurer of the company, stated it was the best month in the history of the store. James Card is president of the company and a Rotarian, and he had the rare treat of having Harry Lauder address him before 500 Rotarians gathered for a noonday lunch at the Hotel Statler, this city. "Jimmie, my lad, my new Rotarian song will be out soon on a record, and be sure and sell every Rotarian one; and mind ye now, Jimmie, be sure ye get your money." Mr. Card has, in addition to his present store, procured the rights to open a store in Lakewood, O. and will be known as the Lakewood Music Co., opening April 1, handling the Victrola line exclusively.

The B. Dreher's Sons Piano Co., sole Cleveland representative for the Aeolian-Vocalion, reports that business for the past two months with the Vocalion and Columbia Grafonola was equal to that of the first six months of 1915 business. W. G. Bowie, manager of the department, just returned from his visit to the Aeolian factory in Long Island. After his trip he was more enthusiastic than ever over the Vocalion and reported seven sales shortly after his return.

The J. T. Wamelink & Sons Piano Co., prosperous Columbia Grafonola dealer, reports a good increase in business. S. Tonnsley, who has been affiliated with the different branches of the talking machine industry during the past six years, is in charge of the department.

Harry J. Wamelink, manager of the J. T. Wamelink & Sons Piano Co., was recently elected president of the Cleveland Music Trade Association.

The Diamond Disc Phonograph Co. states that February business evened up with that of January, and especially the sale of the new records. The company features the new Edison lists with the new artists, and Manager E. A. Friedlander says that the new and excellent Diamond Disc recordings have proved exceptionally popular during the past month.

The Columbia Graphophone Co. has again eclipsed the results from business of a year ago, and Manager George R. Madson reports that he had to have more space on the same floor of the Kinney & Levan Building.

The Eclipse Musical Co., extensive jobber of Victrolas, reports that the demand for goods at present is greater than it was during the holiday season, and the Style XI Victrola is very scarce. E. B. Lyons, assistant manager of the company, made a trip through the territory, and reported that everywhere business was booming.

R. A. Alpers, formerly with the Slocum Piano Co., is now on the road for the Fischer Piano Co., jobber of the Pathé Pathephone.

Recent visitors in this city were: Mr. Laurie, auditor of the Columbia Graphophone Co., New York; Charles Logan, of the W. D. Andrews Co., Buffalo, N. Y., and William Maxwell, vice-president of Thomas A. Edison, Inc., Orange, N. J.

A GOOD WAY TO RUIN RECORDS.

Experiment Suggested by Monthly May Demonstrate the Value of the Human Skull as a Sound Box but Will Not Improve Records.

According to a writer in the Electrical Experimenter, the human skull makes a fine talking machine sound box or reproducer, and offers the following formula for discovering if one's particular skull is of the particular material that carries sound:

"Stop up both of your ears with cotton as tightly as possible, so that no sound will be heard from the outside. Now place an ordinary darning needle between your teeth by biting on it hard, taking care that the lips or tongue do not touch the needle. The latter is important, because if either lip or tongue touches the needle the sound will be decreased considerably.

"For the best results the needle itself should project not more than one or one and one-half inch from the mouth. For that reason the darning needle should be broken off about one and one-half inch from its sharp point. It goes without saying that the sharp point should project out of the mouth, while the broken off end should be inside the mouth.

"Now start an ordinary disc phonograph and carefully press down upon the record with the needle's point held at the same angle as the reproducer's needle is held ordinarily. With a little practice one will become proficient in moving the head at the same ratio of speed as the ordinary reproducer arm is moved from the outside of the record toward the inside. As soon as the needle touches the record with sufficient pressure the inside of the head will be filled immediately with music exceedingly loud and clear.

"A curious result of the experiment is that a person standing near by can hear the music, the head acting as a reproducer in this case."

THRIVING PORTLAND DEPARTMENT.

(Special to The Talking Machine World.)

PORTLAND, ORE., March 1.—Henry Jennings & Sons, the prominnt furniture dealers of Portland, Ore., who installed a complete Columbia Grafonola department in December, are building up a splendid business with this line, which they are handling exclusively. The Jennings store is one of the largest devoted to furniture in the Northwest and occupies a quarter of a block, five stories high, in one of the best locations of the city. They are making very attractive window displays of Grafonolas these days.

The Homlyke Phonograph Parlors, at 113 South Main street, Ann Arbor, Mich., were recently opened, a large crowd of visitors attending the opening demonstrations and concerts. The new store is owned by A. S. Lyndon and is under the management of C. E. Stevens.

CLEVELAND

Stewart PHONOGRAPH

The Stewart Phonograph will soon be in the homes of millions.

Why not let your store supply every family in your neighborhood?

This phonograph places within the reach of all the latest and most up-to-date phonograph.

It plays disc records of all sizes—the largest and the smallest.

Many higher priced phonographs do not give a finer or truer reproduction. It is natural, clear, and beautiful.

$5

Already there is an enormous demand for the Stewart Phonograph.

Hundreds of thousands of dollars will be made selling the Stewart Phonographs in your territory.

Every music and phonograph store—you—can get a good big share of these profits by securing representation at once as one of our dealers.

To those who write immediately, we can make a very attractive proposition.

Use the coupon on opposite page or write a letter. Do it now.

A Big Money Maker for Music and Phonograph Stores

A Beautiful, Practical Phonograph at $5

Here is the opportunity of your lifetime.

The Stewart is the phonograph the whole world has been waiting for.

It gives to millions of people the first opportunity to satisfy that great longing to hear and enjoy all of the world's best music at a price they can afford.

It gives you a great big opportunity to make money.

Every person who comes into your store is a logical prospect for a Stewart Phonograph.

The only reason they do not already own one is because never before have they been able to buy a beautiful and practical phonograph at a price within reach of the average purse.

We will still further increase the extensive and established market by conducting a big, aggressive, national advertising campaign.

The first of the advertising series is appearing in the national magazines right now.

Our large sales and advertising co-operative work will create a huge volume of business right in your town.

Why not be a Stewart dealer and get your share of the profits?

Write at once. First come—first served. Use the coupon.

The Achievement of the Century

The Stewart, a practical phonograph at $5, is the achievement of the century.

It plays all records—the highest priced and the lowest priced—the largest and the smallest

Play one in the same room with any other phonograph, and we defy anyone to tell the difference in the quality of music reproduced.

The Stewart Phonograph is new in design. It is all metal. Cylindrically shaped beautifully proportioned, finished in dull black lacquer, the tone arm and trimmings in highly polished nickel, the Stewart is an ornament to the finest home.

It combines the latest and most improved features of phonograph construction.

Stewart—A Famous Name

The name Stewart is already famous throughout the entire civilized world. Nearly every automobile is equipped with one or more Stewart products—the Stewart Speedometer, Stewart Vacuum System, Stewart Warning Signal, etc.

Stewart products are built by the largest manufacturers of automobile accessories in the world. Ninety-five per cent. of all automobiles are equipped with Stewart products and we sincerely believe that in a very short time ninety-five per cent. of all the American homes will be enjoying a Stewart Phonograph.

Columbia Graphophone Company
Woolworth Building, New York

VISITING ARTISTS STIMULATE SALES IN DETROIT.

Strong Demand for Records Follows Appearance of Leading Singers and Instrumentalists —Local Talking Machine Association Prospering—Columbia Co.'s Branch to Move on April 1—Edison Tone Test Recitals Secure Attention—Big Order for Cabinets.

(Special to The Talking Machine World.)

DETROIT, MICH., March 7.—Everything seems to be moving along very satisfactorily in the talking machine business so far as Detroit is concerned. Retailers are selling loads of machines and records and deliveries are coming along better than they have for many months. The jobbers are very well pleased over conditions because both ends of their business are good—deliveries and orders. The fact cannot be denied that the talking machine business has been stimulated during the past few months by the number of prominent musical artists who have given recitals in Detroit—such as Frieda Hempel, John McCormack, Paderewski and others. Especially is this true of the record departments. The special window displays of both Grinnell Bros. and the J. L. Hudson piano store in honor of John McCormack's appearance in Detroit were very attractive and unusual—and they sold a lot of McCormack records. This demonstrates the value of proper window displays—in keeping with what is going on in the musical world.

The Detroit Talking Machine Association is prospering, and the membership increasing. For a new organization there is more than the ordinary amount of co-operation—everybody is boosting and everybody is glad of the organization. It cannot fail to be a great success. The March meeting was held at the Hotel Cadillac.

The Columbia Graphophone Co.'s local branch will move about the first of April to a new location at 400 Woodward avenue, where it will occupy the entire second floor of the new Walker building. Here the company will do a wholesale business only—doing away entirely with its retail department. The new location has three times as much floor space as the Broadway store, and will be arranged to suit the particular needs of the business. The building itself is new and everything in the Columbia store will be new.

There is a lesson to be learned in the slogan adopted by a new Detroit bank—"The Bank That Always Says 'Thank You.'" This should be taught to every sales person in the talking machine business. Courtesy is one of the greatest assets in selling the public. Every talking machine store should adopt the "courtesy" slogan.

Under the auspices of the new Edison Shop of Detroit a recital by Miss Christine Miller was given at the Hotel Pontchartrain on Wednesday evening, March 1, in conjunction with the new Edison Diamond Disc phonograph. Twelve hundred invitations were sent out, and from the tremendous crowd it would seem that everyone receiving an invitation came and brought their friends. Fully one thousand people were turned away owing to the limited capacity of the hall. Verdi D. Fuller, general superintendent of the Edison phonograph laboratory of Orange, N. J., gave the audience a brief history of the phonograph as it developed to the present time. He introduced Miss Miller, who sang "Abide With Me," the phonograph playing the same song; the audience could not tell the record from the voice of Miss Miller. Arthur Walsh, violinist of the Edison studios, rendered a violin solo simultaneously with its reproduction on the phonograph.

The Gardner-White Co., furniture dealers, Mack and Mt. Elliott avenues, this city, is putting in a full line of Columbia machines and records.

The Brunswick-Balke-Collender Co., of Muskegon, Mich., has received an order for 50,000 cases for phonographs turned out by the Edison Co. The order was placed following a personal visit to the Muskegon factory by H. W. Williams, chief inspector of the Orange works; L. Schall, an expert of the finishing department, and C. W. Leist, another Edison expert.

"What's a Fonola" is the headline which of late has been featured very strongly by the Ling Piano House, 78 Library avenue, both in street cars and newspaper advertisements. The caption was originated by Mr. Ling for the purpose of creating interest. When asked what it means, he replied, "When a better talking machine is made than the Grafonola, my name for it will be the Fonola." There are nine sound-proof demonstration rooms in the Ling Piano House, this department being under the management of Robert Barclay.

C. A. Grinnell, of Grinnell Bros., has purchased property on Lake St. Clair for $82,000, which he may use as a country home.

The Ecco Talking Machine Co., Detroit, has increased its capital stock from $6,000 to $15,000.

Wallace Brown, who conducts an exclusive store for Edison talking machines on East Grand River avenue, recently gave a recital, using Miss Maria Kaiser, lyric soprano, of New York City. Mr. Brown has increased his advertising space in the newspapers and theatre programs, and reports that February was an exceedingly good month.

S. A. Lyndon has opened an exclusive talking machine store in Ann Arbor, Mich.

S. E. Lind, of the local branh of the Columbia Co., is now looking after sales outside of Detroit, in addition to city sales. Manager K. Mills says

A Complete PATHÉ Stock

We have made arrangements to carry a complete stock of Pathephones and Pathé Discs on hand—AT ALL TIMES.

OUR DEALERS will receive machines and records without delay.

We Specialize on Service

PATHÉ DEALERS tell us that their Sales are steadily increasing. We are ready to give our patrons real service to help them get their share of this vast Pathé business.

LARGER QUARTERS FOR BADGER CO.

Prominent Victor Distributer of Milwaukee Arranges for More Commodious Store for Its Retail Business—Business Unusually Active.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 8.—The Badger Talking Machine Co., jobber for the Victor goods in Milwaukee and Wisconsin, has just closed a lease at 425 Grand avenue for new and larger quarters for its retail store, now located at 312 Grand avenue. The new establishment, which will be one of the largest exclusive retail Victrola stores in the country, will be ready for occupancy by May 1. Two floors will be available, and between 6,000 and 10,000 square feet of floor space will be utilized. While only preliminary plans have been made, Harry A. Goldsmith, secretary-treasurer of the Badger concern, says that there will be eleven sound-proof booths arranged on the first floor, while on the second floor there will be a large concert hall and five additional booths. The location is in the heart of the Milwaukee retail district, and the Badger concern ought to meet with a most successful business. R. H. Zinke is manager of the company's retail store.

That the retail talking machine business in Milwaukee during the month of February was the heaviest of any previous month, with the exception of last December, in the history of the local trade, is the assertion of Harry A. Goldsmith, secretary-treasurer of the Badger Talking Machine Co. The situation thus far in March has been unusually satisfactory, he says.

George F. Ruez, president of the Badger Talking Machine Co., accompanied by his wife, recently enjoyed a trip through the Southwest. S. W. Goldsmith, vice-president of the Badger concern, is back from a trip through the Southwest, where he visited his friends in the trade at Omaha, Kansas City and other points and endeavored to round up a few extra machines for the Wisconsin trade. Ettore Barili, traveling representative of the Victor Talking Machine Co. in Wisconsin territory, is visiting the Victor factory at Camden, N. J.

TWO NEW PATHE JOBBERS.

L. F. Blackly, of San Francisco, and A. Victor & Co., Buffalo, Will Give the Pathé Products Aggressive Exploitation in These Directions.

The Pathé Frères Phonograph Co., New York, closed two deals this week whereby Louis S. Blackly, 322 Post street, San Francisco, Cal., and A. Victor & Co., Main and Genesee streets, Buffalo, N. Y., will handle the complete Pathé line as distributers. These two new Pathé jobbers are already making arrangements to give the Pathé products aggressive exploitation, and Mr. Blackly has drawn plans for a Pathé shop which will be one of the most artistic talking machine establishments in the "Golden Gate City."

In a chat with The World, H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., commented upon the splendid start of the new year, January and February sales having been far in excess of all expectations. All models of Pathephones are meeting with a steady sale, and the new Pathé disc records have been praised by Pathé dealers everywhere.

LAWMAKERS TO VISIT VICTOR CO.

Both Houses of the Legislature Accept Invitation to Inspect the Victor Plant.

(Special to The Talking Machine World.)

TRENTON, N. J., March 10.—Both branches of the State Legislature have accepted invitations recently sent to them to inspect the plant of the Victor Talking Machine Co. in Camden. The lawmakers will be shown through every part of the enormous factory and will be entertained at luncheon by the officers of the company. Each House appointed a committee to arrange as to the date and other plans, the Senate committee being composed of Senators Rathbun, Edge and Ackerson, and Assemblymen Wolverton, Whitman and Kuhlke were appointed to arrange matters for the Assembly.

No. 403 (Vertical Interior)
For New Victrola IX, only.

Height 34½ in. Width 19¼ in Depth 22¾ in. Holds 224 Victor records.

Mahogany. Quartered Oak.
Average weight crated, 85 pounds.
(If horizontal shelving is desired, order No. 1403.)
(When felt interior is desired, ask for No. 403F.)

IMPORTANT NOTICE

Cabinet 403 is arranged with a rim, which is hinged at the back. This back piece drops down and enables you to slide the new style Victrola IX in. It works very easily and makes a splendid outfit. Nothing to get out of order, and you can put the machine in almost as quick as you could set it on a cabinet without rim.

UDELL Cabinets

Millions of records are made every year to be stored—where? Why don't you put special emphasis upon the selling of Udell Record Cabinets, for a big, profitable market creates itself EVERY YEAR.

Good cabinets give proper profits, to say nothing of satisfactory service. We've been making cabinets since the talking machine record was a curiosity, so you can depend upon the fact that Udell cabinets are BUILT RIGHT.

A complete line of cabinets—for records, player rolls and sheet music.

Post a postal to-day for catalog.

The Udell Works
1205 West 28th Street
Indianapolis, Ind.

Every time you sell an electric Columbia Grafonola to a customer you have made a beautiful profit—you have made a certain and regular record buyer—and you have added one more completely pleased and actively interested customer.

W. E. KIPP DINES EDISON DEALERS.

Head of Kipp Phonograph Co., Indianapolis, Returns from Jobbers' Convention Full of Enthusiasm Regarding the Edison Product and Its Possibilities and Spreads Some of It—Company Moves to New Quarters.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., March 6.—Walter E. Kipp, president of the Kipp Phonograph Co., Edison jobber, returned from a visit to the Edison factory so full of enthusiasm for the Edison machine that he corraled all of his company's Indianapolis dealers and salesmen at a dinner at the German House last night to give them, besides something good to eat, some of his enthusiasm.

After Mr. Kipp had told of his experiences at the Edison factory and had predicted greater Edison triumphs in the improvement of the talking machine. Mr. Kipp got down to brass tacks and sailed into questions concerning local trade conditions, which he said he thought should be improved. Mr. Kipp urged all the dealers and salesmen to work in a spirit of co-operation and to cut out all "mud-slinging" tactics.

A boost for the other fellow, instead of a knock, was Mr. Kipp's idea of how to create better business. He said he desired to see all the dealers in brisk competition, but that he also desired to see only clean-cut methods used.

Every man at the dinner was requested to stand up and introduce himself. By the time the dinner ended, about midnight, everybody was convinced that Mr. Kipp had gained one of his ends at the dinner, namely, that a better feeling of good fellowship had been established among the men who put the Edison machines in the hands of the users.

John Pearson, president of the Pearson Piano Co., and S. Cunningham, of the Pearson Co., were among the other speakers who gave excellent speeches and were able to give the men some valuable pointers.

Among those present were: J. L. Jaxon, S. Cunningham, John S. Pearson, Fred Cunningham, C E. Stout, F. J. Wilking, E. W. Stockdale, H. E. Whitman, R. L. Burtsch, J. C. Prince, G. E. Lyons, S. Jasper and T. H. McVhetters, all of the Pearson Piano Co.; Frank J. Carlin, F. S. Lyons and W. P. Trees, all of the Carlin Music Co.; W. W. Wolf, of the William H. Block Department Store; L. W. Minx and J. N. Hayes, of the E. L. Lennox Piano Co.; Arch Olds, J. T. McDermott, R. A. Izor, George W. Kadel, L. T. Carlin and A. H. Snyder, all of the Edison Shop, and Walter E. Kipp and J. Cartmill, of the Kipp Phonograph Co.

Mr. Kipp said that he intended to have another such meeting within the next few months. He said he expected to make the meetings regular and permanent. This is the first time such a meeting has been held for the Indianapolis men, although the company has held meetings for out-of-town dealers.

The Kipp Phonograph Co. recently moved from its quarters in Massachusetts avenue to 325 North Delaware street, where it occupies a modern three-story building with a floor space of 10,000 square feet. Incidentally, the name of the company has been changed from the Kipp-Link Phonograph Co. to the Kipp Phonograph Co. This action was taken at a recent meeting of the stockholders. E. A. Link, whose name was part of the former name of the company, has not been connected with the company for several years.

The new quarters of the company will enable it to handle its stock much more conveniently, as the old quarters were so small for the business that storage space had to be maintained elsewhere.

BRISTOL & BARBER HAVE THE PATHE.

New York House Added to Important Pathé Distributers in the East.

J. F. Collins, sales manager of the Pathé Frères Phonograph Co., New York, announced recently the consummation of arrangements whereby Bristol & Barber, 115 East Fourteenth street, New York, will be numbered among the Pathé distributers in the East.

Bristol & Barber are prominent in both the piano and talking machine fields and enjoy the confidence of all the dealers with whom they have transacted business in the past years. The firm is enthusiastic regarding the prospects for Pathé business and intends to give this line aggressive exploitation.

CHANGES IN WINNIPEG TRADE.

Andrew Farquharson Takes Charge of Victrola Department of J. J. H. McLean Co.—Talking Machine Men Don Khaki—Electric Machines Popular—General News of Interest.

(Special to The Talking Machine World.)

WINNIPEG, CAN., March 4.—Andrew Farquharson has taken over the charge of the Victrola department of the J. J. H. McLean Co., succeeding Mr. Robinson, who has gone East.

J. B. Cuthbert, of the Grafonola department of the Winnipeg Piano Co., has enlisted for oversea service with the band of the Ninetieth Battalion.

The local talking machine trade now has in its membership two A. G. Farquharsons, neither of them being in any way related to each other. They are Alfred G. Farquharson, manager of the Western Gramophone Co., and Andrew G. Farquharson, in charge of the J. J. H. McLean Co.'s Victrola department.

L. Burke, until recently with the Frank Morris Columbia department, has resigned and is now in charge of the J. A. Banfield Columbia business.

Mrs. Field, an accomplished pianist, is now in charge of the Frank Morris Columbia department.

E. Clegg, who has been connected with Babson Bros., Edison distributers, for some time as shipper, has donned the khaki. H. Stevenson, at one time connected with the Doherty Piano Co. as salesman, is now in charge of the retail department of Babson Bros., succeeding Mr. Gillenan, who has taken charge of the mail order department of that house.

Goulding Bros. & Skinner's Victrola business indicates that the electrically driven machine appeals to the public. Three were sold recently.

Walter Belknap and Miss Robinson, who were both connected with the Doherty Piano Co. some time ago, are now in charge of the Columbia department of Stanwood's, Ltd.

T. Nash, manager of His Master's Voice Gramophone Co., Toronto, visited the local distributing house of Victor lines to see the latter comfortably installed in its new warehouse at 122 and 124 Lombard street.

The Western Gramophone Co., of which firm A. G. Farquharson is the manager, has improved and enlarged its storage and shipping facilities by removing to 122 and 124 Lombard street. The new headquarters are roomy and well lighted. In each of the windows facing on Lombard street are displayed attractive "His Master's Voice" signs. Two showrooms adjoin the office, to the rear of which are the stock and shipping departments.

Christine Miller, who makes Re-Creations for the Edison Diamond Disc, recently had the unique experience of singing for Miss Helen Keller at the home of Mrs. William Thaw in Pittsburgh. As Miss Miller sang Miss Keller lightly placed the fingers of one hand over Miss Miller's lips and rested the other hand on the piano. Miss Keller seemed delighted with what she heard through her fingers.

THE UNION SPECIALTY AND PLATING COMPANY

SPECIALISTS IN PHONOGRAPH PARTS

409 Prospect Avenue, N. W. **CLEVELAND, O.**

BELIEVES IN PREPAREDNESS.

A Sonora Dealer in New York City Places an Order for 600 Machines for Immediate Delivery, of the Retail Value of Neary $60,000—Does Not Intend to Be Caught When the Demand for Talking Machines Is Active.

As an illustration of the popularity of the Sonora phonograph in New York City alone, one of the dealers of the Sonora Phonograph Corp., who occupies ordinary quarters in the city and has only one store, placed his order for 600 machines of mostly large size for practically immediate delivery, the order amounting to nearly $60,000 retail value. This dealer is one of the great many who could not foresee the tremendous demand and popularity of the Sonora last year, and as a consequence was caught with an inadequate supply. He does not intend to be caught in the same position again, and has therefore placed his order for delivery as soon as possible of the styles that are enumerated below. "This is a policy that would be well for other Sonora dealers to follow," added Joseph Wolff, secretary, "as there is no indication that the popularity of the Sonora is going to diminish, but, on the contrary, will greatly increase during the present year."

Below is a copy of the order, which totals almost $60,000:

50	Monarchs,	at $35.00	$1,750
50	Excelsior,	" 50.00	2,500
180	Troubadours	" 75.00	13 500
100	Imperial,	" 100.00	10,000
112	Baby Grands	at $135.00	$15,120
90	Elites,	" 150.00	13,500
10	Grands,	" 225.00	2,250
2	Invincibles,	" 300.00	600
	Total		$59,220

As a number of the models are wanted in special woods, for which additional charges of anywhere from $25 to $75 per machine are made, this order totals considerably over the $60,000.

POSES AS COLLECTOR FOR ROTH.

Bogus Collector Tried to Secure Payments on Victrolas in West New York.

A young man, fraudulently representing himself as a collector for B. H. Roth, Victor dealer at 581 Bergenline avenue, West New York, N. J., recently attempted to collect instalments on machines which had been sold by the Roth store. He made the error of calling at a home where the customer had purchased a Victrola for cash. The customer notified the store, and the police were given a description of the fraud by Mr. Roth. He is about twenty-eight years of age, dark hair and eyes, and wore a dark suit and overcoat and a soft, black felt hat. He is a fluent and pleasant conversationalist, is smooth shaven, and knows something about the talking machine business technically.

Marie Rappold, who makes Re-Creations for the Edison Diamond Disc, recently brought herself fresh laurels in the character of Freia in "Das Rheingold."

ELECTRIC MACHINES POPULAR IN KANSAS CITY.

New Models Proving Quite a Feature with the Various Stores—Shortage in the Higher Priced Machines—Peck Service Department Pays—John F. Ditzell an Athlete—Managers Visit the East—Dealers' Week at Edison Shop—General News of Month.

(Special to The Talking Machine World.)

KANSAS CITY, MO., March 6.—All Kansas City talking machine men are very enthusiastic regarding conditions in their line. Reports are to the effect that business is great and prospects are greater. The sale of the electric machine is getting to be quite an item in all the stores, and most of the heads of the departments are making special efforts to push these machines. Records also are having an unprecedented year, and it is a well-known fact that several stores have been sold out of certain numbers before being able to get another supply from the head office. More space to the departments, additional sales force and more extensive advertising are a few of the results arising from the excessive demand for talking machines in this territory.

Harry B. Bibb, manager of the talking machine department of the Jones Store Co., bemoans the lack of the higher priced machines. Mr. Bibb has had trouble in getting machines of any kind, especially during the first part of the year, but as to the medium priced sellers, that shortage has been decreased. This is not the case, however, according to Mr. Bibb, with the better finished and more expensive models. Oak and similar special woods are hard to get, he says, and this will probably be the case for some time. The Jones Store reports an excellent trade.

A feature at the George B. Peck dry goods store that is being pushed rapidly is that of the service rendered to purchasers. John F. Ditzell, manager of the talking machine department at that place, during the month of February laid special stress on this fact in the advertising space of the newspapers allotted him. Regarding the usefulness of this enterprise Mr. Ditzell says: "It surely has helped our trade. I know of instances where people have advised their friends to buy here on account of that service." Peck's maintains a force of three men to look after this end of the business.

John F. Ditzell, by the way, is a leading athlete at the Kansas City Athletic Club, where he is known as a handball fiend. Mr. Ditzell has been a member of that organization but three years, and in that time has every year reached the finals in the club championship series. He says that after a little more perfection of his game he is going to challenge the following two gentlemen for the championship of the talking machine trade, the game to be played on their own court: Roy Keith, of the Chicago Talking Machine Co. and W. B. Fulghum, manager of the order department at the Victor factory in Camden.

Warren H. Haile, manager of the retail department at the Schmelzer Arms Co., who recently came here from South Bend, Ind., is very much pleased with conditions in Kansas City.

M. W. Bardwell, of the Pathephone department of the Household Fair, announces that his company will probably handle the motor machines, now that the price is to be reduced. He is very enthusiastic regarding the possibilities, and is expecting to make a great showing when it comes to him.

The Jenkins Music Co. is enlarging its talking machine space, remodeling the first floor of its establishment so as to add six new record rooms, making a total of fifteen. The machine sales department will continue to be on the third floor and the record rooms all on the first.

E. A. McMurtry, Kansas City manager of the Columbia Graphophone Co., who has been in the East for the past ten days, reports conditions as very excellent. Mr. McMurtry went on a business trip, mainly in an effort to get goods to fill orders, and visited New York City, Boston, Bridgeport, Pittsburgh and other places in the East.

C. T. Cunningham, traveler for the Edison Co. out of Kansas City, was in the office recently, and remarked on the excellent condition and prospects in his territory, northern Kansas.

Two managers of Kansas City talking machine houses have recently returned from Eastern trips, they being A. A. Trostler, of the Schmelzer Arms Co., who was in New York attending a meeting of the executive committee of the National Association of Talking Machine Jobbers, and M. M. Blackman, Kansas City manager of the Edison Shop, who was a visitor at the Edison factory.

M. M. Blackman, manager of the Edison Shop, announces that beginning Tuesday evening, March 7, his store would start a series of nine evening concerts, with Heinrich Rittmeister, concert master of the Kansas City Symphony Orchestra, as assisting artist. Admission to these concerts will be by invitation only, of which the greater portion will go to machine owners. The concerts will be held at the Edison parlors.

Dealers' week at the Edison Shop in Kansas City was very much of a success, over thirty out-of-town dealers coming from all parts of Arkansas, Missouri and Kansas. Some of those present during this special period are as follows: H. L. Paden, Sr., Atwood, Kan.; H. B. Wiley, Sr., Nevada, Mo.; H. F. Baier, Salina, Kan.; C. L. Smith, Columbus, Kan.; A. E. Luster, Fort Smith, Ark.; E. D. Lape, Coffeyville, Kan.; Hans Peterson, Sylvan Grove, Kan.; Homer Bashore, Sapulpa, Okla.; A. Seifert, Clyde, Kan.; Carl Latenser, Atchison, Kan.; A. A. Proctor, Princeton, Mo.; Mr. and Mrs. J. A. Lampkin, Warrensburg, Mo.; Mr. and Mrs. R. C. Bollinger, Fort Smith, Ark.; I. W. Guisinger, Fayetteville, Ark.; W. R. Lighton ("Billy Fortune"), Fayetteville, Ark.; George A. Hibbard, Medicine Lodge, Ark.; A. K. Snyder, Winfield, Kan.; W. H. Felson, Liberty, Mo.; H. B. Wiley, Jr., Nevada, Mo.; James E. Thornton, Hamilton, Mo.; Fred Jackson, Atchison, Kan.; Miss Jean McDougal, Sedalia, Mo.; Runenberger Bros., Harrisonville, Mo.; L. W. Cahill, of Cahill Bros., Windsor, Mo., and Burke Bros., Columbus, Scammon and West Mineral, Kan.

W. D. ANDREWS, Buffalo, N. Y.

NEW EDISON SALON IN MONTREAL.

Handsome Quarters for the Display of Edison Phonographs Opened in Department Store of Goodwins, Ltd.—Victrola Music Heard Over Transcontinental Telephone—General Business Conditions Most Satisfactory.

(Special to The Talking Machine World.)

MONTREAL, CAN., March 4.—Goodwins, Ltd., one of Montreal's leading department stores, celebrated the birthday of Thomas A. Edison by opening its new Edison salon, where it has five sound-proof booths at the disposal of customers. The opening day saw the disposal of a Model A 100, valued at $137.50, to a prominent local citizen, besides a large number of records. The Edison salon has been placed in charge of phonograph experts from the Edison laboratory, including L. Bourgett and C. R. Woods, assisted by Miss Forest, an experienced talking machine saleslady. Goodwins, Ltd., is using forceful "copy" in the leading French and English daily newspapers directing attention to the fact that it is now handling Edison Diamond Disc machines. Manager Coleman, of the Montreal branch of R. S. Williams & Sons, Ltd., Edison jobbers in the province of Quebec, was instrumental in closing this deal.

Mr. Edison's birthday was celebrated in Canada by the majority of Edison dealers in various ways, mostly by advertising and holding recitals.

At the invitation of the Bell Telephone Co. of Canada, Ltd., Montreal, a select assembly of prominent business men recently met at the Ritz-Carlton Hotel to hear the most wonderful demonstration ever witnessed in Montreal. It constituted the opening of the long-distance telephone across the Dominion of Canada from Montreal to Vancouver, a distance of 4,227 miles, in which Victrolas and Victor records played a most prominent part.

The most dramatic moment of the whole evening was when, after all had talked with Vancouver, the line was switched, and San Francisco was attached to the other end. As distinct as any message sent in this city, the operator's voice as each exchange was passed through answered. Mr. Heller was at the San Francisco end and played records, which were heard as plain as if they were in your own room, ending with the English national anthem.

A heavy demand is still noticeable for A5756, 'Cello Interpretations of Pablo Casals, which were featured in the February list of Columbia recordings.

C. W. Lindsay, Ltd., through the able efforts of Manager Norman F. Rowell, has succeeded in doubling its Victrola business every month since September to date, with the exception of December.

Miss G. Vezina, in charge of the talking machine department of Almy's, Ltd., reports the consummation of some nice business this month to date, including several disposals of various models of Columbias. The concern's Saturday afternoon and evening recitals are being well attended.

Rough Sapphires

for manufacturers of
Needles, Reproducers and Talking Machines

HENRY E. OPPENHEIMER & CO. 1 MAIDEN LANE NEW YORK CITY

The Canadian Graphophone Co., Columbia jobber in the province of Quebec, is well satisfied with trade so far this year (which, by the way, shows a large increase over the correesponding period a year ago). It is not only holding its old accounts but is daily adding new ones.

Recent Sonora agencies placed in Montreal are the following: Charles Culross, J. A. Hurteau & Co., Ltd.; N. G. Valiquette, Ltd.; H. P. Labelle & Co., Ltd., and Ed. Archambault.

Harry Lauder's recent appearance in Montreal showed that he was still as great a favorite as ever, and the Berliner Gramophone Co., Ltd., reports a big business in all its stores for his old and new records.

H. P. Labelle & Cie, Ltd., 147 St. Catherine street, has taken on the representation of the Columbia in addition to the Sonora.

Arthur Blouin, Sherbrooke, Que., is handling a large number of Columbia Grafonolas.

Ed. Archambault is installing a number of sound-proof booths. He features Edison, Sonora and Columbia products.

Layton Bros. have under consideration alterations and additions which will give them still greater facilities for handling an increasing business in Edison and Columbia machines.

THOS. QUINLAN BECOMES MANAGER

Of the Concert and Operatic Department of the Columbia Graphophone Co. with Headquarters at the Recording Laboratory.

The Columbia Graphophone Co., New York, has announced the appointment of Thomas Quinlan as manager of the company's concert and operatic department, with headquarters at the recording laboratory, 102 West Thirty-eighth street, New York. Mr. Quinlan assumed his new duties the first of the month, and has already given unmistakable evidences of his remarkable skill and ability.

Mr. Quinlan is prominent in musical circles both here and abroad, and particularly in Europe, where he achieved unlimited success as an operatic impresario. Mr. Quinlan was the "man behind" the Quinlan Grand Opera Co., which organization established the reputation of bei g a household word throughout Great Britain, South Africa, Australia, New Zealand and the Dominion of Canada. Mr. Quinlan conducted this company twice around the world, traveling 150,000 miles in all. The repertoire of the company consisted of forty operas, and these operas were staged from the largest equipment ever carried by one company. The company's success was tremendous and performances were given before crowded houses in all parts of the world. Mr. Quinlan

Thomas Quinlan.

was also associated with other important musical enterprises in England which achieved renown.

Mr. Quinlan has the personal friendship of all the leading artists in operatic and concert circles, and in his new position with the Columbia Co. he will be able to utilize the same measures of aggressiveness and far-sightedness which contributed so materially to his success abroad.

BOOKED SOME BIG ORDERS.

Philip A. Ravis, vice-president of the New York Album & Card Co., New York, N. Y., manufacturer of Nyacco metal-back albums, returned last week from an extended Western trip. Mr. Ravis secured a good-sized list of orders and states that the dealers are optimistic to an unusual degree. He was impressed with the fact that the trade as a whole is demanding an album of better quality than the average album of several years ago, and states that the dealers are not paying any attention to albums which do not give adequate service to their patrons.

ESTABLISHED 1868

Talking Machine Cabinet Manufacturers

We made the first talking machine cabinets created in this country, and we have specialized in this particular line ever since.

We will submit special designs of talking machine or record cabinets, or quote you from blue prints or samples. We manufacture to order only.

Each buyer and each seller of a Columbia $50 Grafonola is always satisfied—the one with the quality, the other with the profit.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

TALKING MACHINE MEN MEET.

Advocate Passage of Stevens Bill, Appoint New Committees and Listen to Address on Motor Troubles at Interesting Session.

On Wednesday, February 23, a meeting of the Talking Machine Men, Inc., was held in the assembly room of the Merchants' Association, Woolworth Building, New York, with President John A. Hunt presiding. The usual "spirit of action" on the part of those present caused a lively, snappy session.

A petition advocating the Stevens Bill was signed by all. Reports were then made and accepted from the several committee and new men were appointed to serve on the committee on credentials, the committee on membership and the committee on advertising. The latter is a new committee, the function of which is to acquaint the association members with the advertising rates of all the newspapers in and around New York City, with such recommendations as may prove fitting.

Interesting floor discussions followed concerning the matter of the dealer insuring a machine sold on instalments and on the question of extending the organization's roll of members. The president announced that he will devote considerable time during the next month to motoring around New York and neighboring cities in a "pep" movement to increase the members.

A. H. Dodin, president of the Talking Machine Repair and Sales Co. and specialist on the repair of talking machines, talked on the elimination of motor chugging. He will give additional talks of a technical nature at the meetings which are to follow.

In the election proceedings Herman J. Jaffee, of Hoboken, was made vice-president for the State of New Jersey, A. J. Beers was elected as a new member, and the Hotel McAlpin was designated as the place for the next annual banquet in April.

COLUMBIA DEPARTMENT IN DALLAS.

(Special to The Talking Machine World.)

DALLAS, TEX., March 6.—The Will A. Watkin Co., one of the pioneers among the music houses in Texas, recently held the formal opening of its Columbia Grafonola department, where a full line of machines and records is shown and demonstrated under most favorable conditions. The company issued a special folder to mark this important event.

ISSUE ATTRACTIVE DISPLAY CARD.

The Wonder Talking Machine Co., New York, manufacturer of "Wonder" talking machines, has advised its dealers that it now has ready for distribution a very attractive display card, which is also suitable for use as a mailing card to the dealers' prospects. Those dealers who have taken advantage of the company's offer to mail the cards to prospective purchasers are enthusiastic over the results achieved.

OPERATED ON FOR APPENDICITIS.

Harry L. Marshall, Pacific Coast supervisor for Thomas A. Edison, Inc., was operated on at St. Joseph's Hospital, Denver, recently, for appendicitis. As soon as the news of the success of the operation reached the Orange laboratories, Thomas A. Edison, Inc., sent him the following wire:

"We all hope your recovery may be rapid and complete, but you must not run unnecessary risk by leaving the hospital too soon. A few days may make a big difference in your condition but none in your territory. Good luck."

W. C. Wyatt, of the Denver Dry Goods Co., Edison jobber at Denver, did everything possible to make Mr. Marshall comfortable.

The Jewelry Sales Co., of Marshalltown, Ia., has opened a store for the sale of pianos and talking machines at Main and First avenues.

PATHE SECURES FAMOUS SOPRANO.

Eleonora de Cisneros, Grand Opera Star, Signs Contract to Make Records for the Pathé Phonograph Exclusively from Now on.

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, announced this week that arrangements had been completed whereby Mme. Eleonora de Cisneros, the famous operatic mezzo-soprano, will record exclusively for the Pathé disc library in the future.

Mme. Eleanora de Cisneros.

Mme. de Cisneros is well known to music lovers both here and abroad, having appeared with some of the leading opera companies in this country and in Europe. She played important roles for the Metropolitan Opera Co., Manhattan Opera Co. and Philadelphia-Chicago Opera Co., and has also appeared in numerous concerts and recitals. Her performances have won hearty praise from the critics, and Pathé dealers will doubtless find a ready sale for her records.

Albert Spalding, exclusive Edison Diamond Disc artist, played his way to the hearts of Boston recently at a concert at Jordan Hall in the Hub City. H. T. Parker, music critic of the Boston Transcript, paid Spalding a most remarkable tribute.

NEW EDISON SHOP IN AUSTIN, MINN.

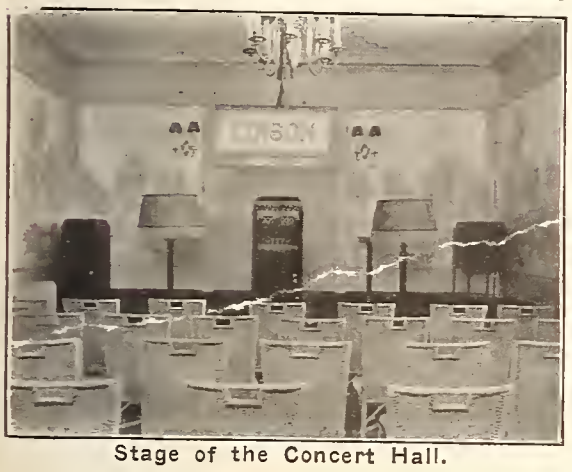
Handsome Quarters for the Display and Sale of Phonographs Opened Recently by the Schleuder Paper Co. in That City.

(Special to The Talking Machine World.)

AUSTIN, MINN., February 29.—The Edison Shop, at 124 West Bridge street, conducted by the Schleuder Paper Co., of this city, which was formally opened to the public recently, continues to be the source of interest to many visitors because of its attractive arrangement. Its completeness emphasizes the enterprise of this company as well as the fact that it is a live Edison dealer and sees a great future in the Edison disc line.

One of the striking features of this building is the concert hall, which seats from seventy-five to one hundred people. The color scheme is ivory white and silver gray, with side wall panels containing beautiful water-color mural paintings. A stage runs across one end of the hall and is twenty-three feet wide by twenty-four feet long.

Leading from the concert hall is a handsomely



Stage of the Concert Hall.

decorated lobby, twenty feet long, and lined with demonstration booths, each one of them being decorated and furnished in a different color scheme. A large stockroom also opens off the lobby and is convenient for the salesmen.

Throughout the building, and particularly in the

View Through the Lobby.

concert hall and booths, special attention has been given to the question of ventilation. The elaborate lighting system includes fixtures silver-plated in a dull silver finish, and all the general hardware in the building is in the same finish to match.

Both before and since the holidays there have been daily concerts given afternoon and evening in the concert hall, which have produced excellent results in the matter of sales.

A. O. Price, of the Compton-Price Piano Co., Coshocton, O., has completed and is now testing out a talking machine, which he claims is radically different from anything at present on the market.

CHANGES AT COLUMBIA OFFICES.

Advertising Department Occupies Space Formerly Used by Record Department.

In order that the various departments at the executive offices may work under efficient conditions and to allow for the increased requirements of its fast-growing business, the Columbia Co. has made several changes in the lay-out of its executive office floor in the Woolworth Building which have already proven their value. The personal record, professional and international record departments have been removed from the Woolworth Building to the Columbia Co.'s record laboratory at 102 West Thirty-eighth street, New York, where they will be in close proximity to the most important division of the company's work.

The space formerly utilized by these departments has been taken over by the advertising department in its entirety. In its new home the advertising division will have increased space, which it needed badly, and as these offices are in a more secluded section of the floor than the executive offices proper, Advertising Manager Baker and the various members of the department will be able to work in comparative quiet and peace. The offices formerly occupied by the advertising department will be utilized as additional space for the financial and export departments.

D. H. Delzell, president of the Columbia Stores Co., Denver, Col., Columbia distributer, was a visitor to the executive offices recently. Mr. Delzell spoke very optimistically of conditions in Colorado, stating that the Columbia dealers in his territory had closed a record-breaking business and are preparing to do an even greater business in 1916. Mr. Delzell congratulated the company on the splendid quality of the records which are being produced, and was particularly well pleased to learn that the company had arranged to materially increase its production the coming year.

EXPOSITION FOR CAMDEN, N. J.

Victor Talking Machine Co. Actively Interested In Plans for Celebration in May.

The Victor Talking Machine Co., one of the leading if not the leading industry of Camden, N. J., is actively interested in the plans for an Exposition of Industry and Civic Celebration in Camden, to be held from May 18 to 27.

The Pennsylvania Railroad plans to advertise this exposition along its right of way and make special rates to attract people to Camden while it is open.

CADMAN AND THE VICTROLA.

Noted Composer. While in Los Angeles, Listens to One of His Own Records at Barker Bros.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., February 28.—During the visit recently of Charles Wakefield Cadman, the eminent composer, to the talking machine department of Barker Bros., and an interesting souvenir of his visit is the photograph taken of Mr. Cadman listening to one of his own compositions being played on a Victrola XVI. Mr. Cadman recently purchased a Victrola XVI from Barker Bros., and is now making his home in Los Angeles. The combined picture of the artist and the instrument will doubtless appeal to many admirers.

C. W. Cadman Listening to His Compositions.

The man who pushes the goods the manager wants pushed is the man who is going to find the way to the front easiest.

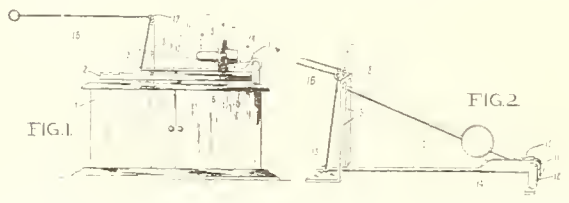
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 8.—SOUND-REPRODUCING MACHINE.—John T. Prout, New York. Patent No. 1,167,838.

The present invention relates more particularly to certain improved attachments for sound-reproducing machines, whereby said machines are rendered of greatly increased efficiency.

According to this invention, after the inauguration of the operation of the machine the tone arm is reset, so that the record in use may start anew. This may be accomplished irrespective of the distance that the stylus has traversed along the effective zone of the disc—that is to say, the record is permitted to be entirely played and then be re-



peated or partially played and the stylus returned to any predetermined distance, and that portion already gone over traversed again by the stylus. The mechanism whereby this is accomplished is of extreme simplicity and may be so designed as to be used in conjunction with records of varying diameters.

In the accompanying sheet of drawings, in which like reference characters are employed to designate like parts throughout the respective views, Fig. 1 is a view in side elevation of a sound-reproducing machine embodying the features of the invention. Fig. 2 is a detail perspective view showing the resetting mechanism.

TALKING MACHINE.—Francesco Cirell, Philadelphia, Pa. Patent No. 1,167,796.

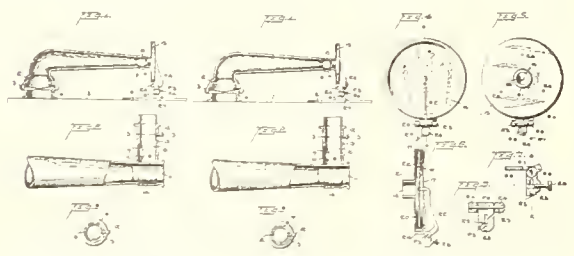
This invention relates to improvements in talking machines, the object of the invention being to provide an improved construction of talking machine which may be used in connection with various styles of records, and provide improved means whereby the sound box may be located at either of two positions relatively to the tone arm.

A further object is to provide improved means whereby the tone may be softened or increased as for supporting the stylus at any angle desired, desired.

A further object is to provide an improved construction of sound box having openings therein, and capable of adjustment relatively to the tone arm to position the stylus at the angle desired.

A further object is to provide an improved construction of stylus bar adapted to support a needle at various angles and positions, employing a single set screw to secure the stylus in any of its operating positions.

In the accompanying drawings Fig. 1 is a view in longitudinal section through the improved tone arm. Fig. 2 is a fragmentary view on an enlarged scale partly in plan and partly in section through the free ends of the tone arm. Fig. 3 is a view in section on the line 3—3 of Fig. 2. Fig. 4 is a view in elevation of the outer face of the sound box. Fig. 5 is a similar view of the inner face of the



sound box. Fig. 6 is a view in section through the center of the sound box taken on line 6—6 of Fig. 4 Fig. 7 is an enlarged view in section through the lower portion of the stylus bar, and Fig. 8 is a view in section on the line 8—8 of Fig. 7.

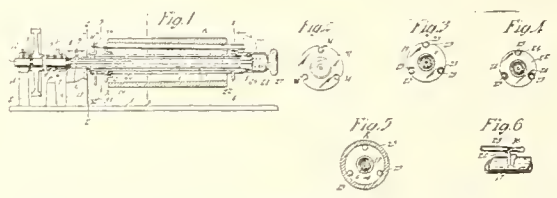
PHONOGRAPH.—Newman H. Holland, West Orange, N. J., assignor to the Jersey Patent Co., same place. Patent No. 1,167,500.

This invention relates to phonographs, and more particularly to an improved record support therefor.

Ordinary phonograph records change in diameter to a considerable extent under different temperature conditions, expanding under heat and contracting under cold, whereas the supports upon which the records are mounted change but little in diameter under the same conditions. As these supports are so constructed that when the records are placed thereon a tight engagement will be maintained between the same and the records, it frequently happens that the latter become so tightly locked in place that it is difficult to remove them without damaging the record surface or breaking the records themselves.

The object of this invention is to provide a record support adapted to firmly hold a sound record or a sound record blank and yet to permit its ready removal. In conformity with this object, a support is provided in which the record-engaging means is movable toward and from the axis of the support so that the said means may be firmly held in engagement with the bore of the record or blank or moved inwardly to permit disengagement of the latter.

Figure 1 represents a vertical longitudinal section through the center of the mandrel of a phono-



graph embodying the invention, a part of the frame of the phonograph being shown in elevation; Figs. 2, 3, 4 and 5 represent sections of the mandrel taken on lines 2—2, 3—3, 4—4 and 5—5, respectively, of Fig. 1; Fig. 6 represents a fragmentary section of a modification of one of the details of construction.

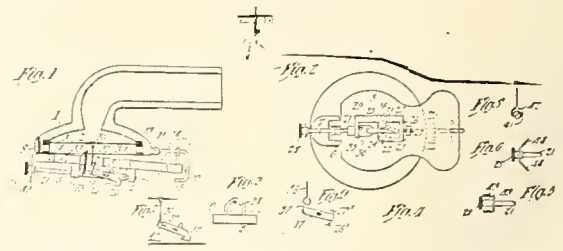
PHONOGRAPH REPRODUCER.—Adolph F. Gall, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,167,489.

This invention relates to phonograph reproducers which are provided with a pair of reproducing styli adapted to track records of different character, as for example, records having 100 and 200 threads per inch respectively, said styli being so mounted that either may, by a simple manipulation, be brought into or out of operative position with respect to the record surface at will. In the invention, the styli are carried by different surfaces of a single stylus lever, the stylus lever being pivotally mounted in such a manner that it may be rotated about an axis substantially parallel with the diaphragm of the reproducer, and substantially parallel to a diameterical plane of the sound record, in which plane is located the sound record groove which the stylus is adapted to track in order that either stylus may be brought into operative position. Preferably, the styli are carried by the top and bottom surfaces of the stylus lever, that is, 180 degrees apart, the lever being pivoted to a member which is rotatable about an axis extending longitudinally of the lever in lugs depending from the floating weight, the tail of the lever being connected to the diaphragm in such a manner that the diaphragm will not be placed under undue stress during the adjustment of the lever to position the stylus. Preferably, stops are provided to limit the rotation of the lever during adjustment to a swing of 180 degrees, and also, preferably, spring means are provided for holding the stylus lever in either adjusted position.

This invention also comprises an improved indicating means for indicating which stylus is in operative position.

In order that the invention may be more fully understood, reference is hereby made to the accompanying drawings, forming part of this specification, in which—

Figure 1 is a central vertical section of a phonograph reproducer embodying the invention, certain parts being shown in side elevation. Fig. 2 is a bottom plan view of the same. Fig. 3 is a detail end view looking from the right in Fig. 1 showing the means for supporting the floating weight. Fig. 4 is a detail end view looking from the left in Fig. 1 showing one form of indicating device. Figs. 5 and 6 are detail views showing modified forms of

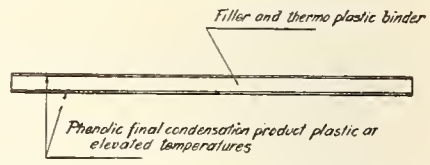


the indicating device. Fig. 7 is a side elevation of the stylus lever showing modified connections to the diaphragm. Fig. 8 is an end view of the same looking from the left in Fig. 7. Fig. 9 is a side elevation of the stylus lever showing a modified form of stylus mounting.

In all of the above figures corresponding parts are denoted by the same reference numerals.

MOLDED ARTICLE.—Jonas W. Aylsworth, East Orange, N. J., assignor to the New Jersey Patent Co., West Orange, N. J. Patent No. 1,167,468.

This invention relates to molded objects, such as sound records, and more particularly to such molded objects as are formed by the method or process described in application, Serial No. 674,289, filed January 30, 1912, of which this application is a division. The said process involves the formation of a surface layer of material upon the smooth polished surface of a metallic plate or other blank mold and the transfer of the same to the surface of the object to be coated under heat and pressure with the firm adhesion or welding of the surface veneer to the object. The surface layer thus formed has a smooth homogeneous surface free from air bubbles, dust particles and the like, and is



of a material which is hard when cold, but sufficiently plastic when heated, to take a clear impression from a mold or die, such a sound record matrix.

PHONOGRAPH MECHANISM.—William Notter and Richard S. Arthur, New York, assignors to the Talking Doll & Novelty Co., Inc., same place. Patent No. 1,167,842.

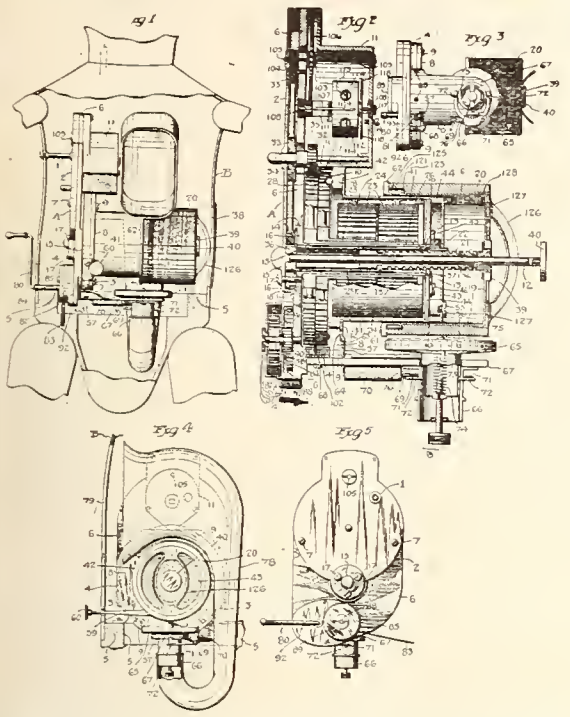
This invention comprises certain improvements in phonograph mechanism, having as objects, among others, to effect a material simplification of such mechanisms, to secure compactness in the construction and relation of the elements, to insure strength and rigidity in the structural parts—more especially in apparatus where the mechanism is carried in projecting relation from a support—to enable the apparatus to be quickly and easily assembled and parts to be readily replaced in event of breakage, to render it in a high degree automatic without introducing complications, to facilitate the insertion and removal of records, and to make the apparatus proof against meddlesome or unskilled manipulation.

The mechanism is more particularly designed for installation in small form in dolls or other toys, clocks, etc., as illustrated for example in Fig. 1 of the accompanying drawings, its compact and sturdy construction, its ability to perform equally well in any position, and the simplicity of its operation especially fitting it for such uses. The apparatus may be made on a larger scale, and part or all of its features may be applied in numerous specifically different ways, for example, in the production of so-called hornless or cabineted machines of small size.

A feature of the mechanism which contributes to the flexibility of external design as well as to the securing of desirable acoustic effects, consists in the possibility of disposing the reproducer at any

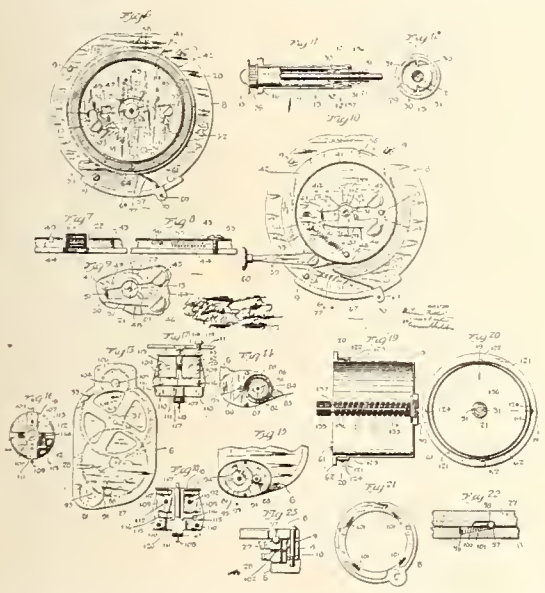
LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 82).

or various points around the record drum, together with the consequent freedom in the matter of the disposition of the sound conveyor or amplifier. In the particular instance herein shown the reproducer is located below the record drum, while the sound



conveyor extends around and above the same, though it will be understood that this orientation is not necessarily fixed, since in the case of a talking doll, for example, the mechanism as a whole may be disposed in any position according to the manner in which the doll is held.

In the accompanying drawings illustrating the invention by means of the embodiment at present believed to be preferable for use in dolls, Fig. 1 is a front elevation of the mechanism in the body of a doll, the doll body being partially sectioned and



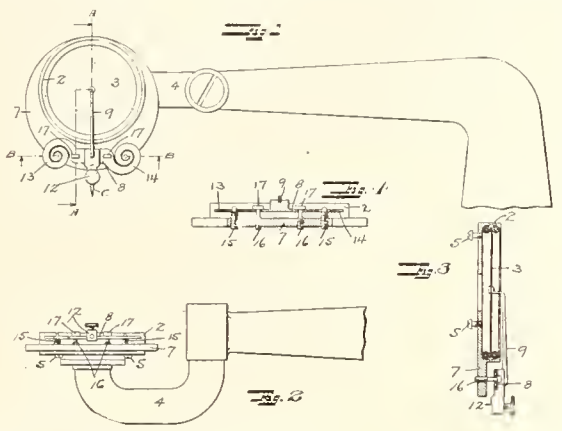
partially broken away; Fig. 2 is a vertical section through the mechanism, taken in the plane of its main axis, the scale being considerably larger than that of Fig. 1; Fig 3 is a bottom plan view of the mechanism on the scale of Fig. 1; Fig. 4 is an elevation looking at the right-hand end of Fig. 1; Fig. 5 is a reverse end elevation; Fig. 6 is a section on the line 6—6 of Fig. 2; Figs. 7 and 8 are sections on the lines 7—7 and 8—8 of Fig. 6; Fig. 9 is a fragmentary elevation showing the feed nut and return dog in midposition, wherein the thread bar is free to be withdrawn; Fig. 10 is a section on the line 10—10 of Fig. 2; Fig. 11 is a detail view showing the central portion of the mechanism partly in section in the plane of the axis and partly in elevation; Fig. 12 is an enlarged cross-section on the line 12—12 of Fig. 11; Fig. 13 is an elevation of the supporting wall, indicating the gearing in a semi-diagrammatic manner; Figs. 14 and 15 are detail sectional views illustrative of the spring tape winder; Fig. 16 is an end view of the governor, partly broken away and in section; Fig. 17 is a side elevation of the governor; Fig. 18 is a central longitudinal section therethrough; Fig. 19 is a section on the line 19—19 of Fig. 20; Fig. 20 is a cross-section through the record drum on the line 20—20 of Fig. 19; Fig. 21 is an inner face view of the plate bearing the balls which hold the winding gear against reverse movement; Fig. 22 is an enlarged section on the line 22—22 of Fig. 21, representing the winding gear, and Fig. 23 is a detail sectional view showing the winding and driving gears and one of the ball devices.

Sound Box.—John S. Ostrom, San Francisco, Cal. Patent No. 1,166,627.

An object of the invention is to provide a sound box which will cause a clear and correct reproduction of the sound.

Another object of the invention is to provide a sound box in which the vibrations are unhampered in their travel between the stylus and diaphragm.

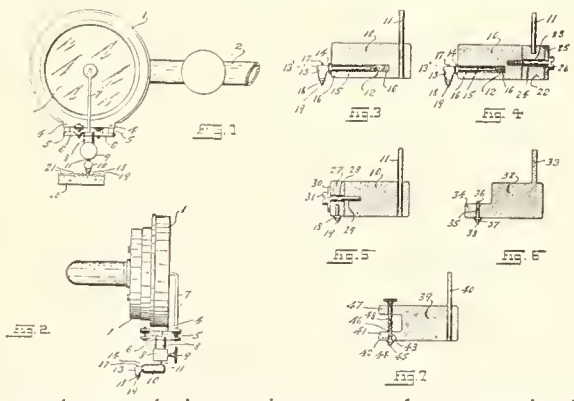
Referring to said drawings, Fig. 1 is a side view of the sound box of the invention mounted on the sound-conducting arm, the sound box being shown



with the stylus at right angles to the arm for purposes of convenience. Fig. 2 is an underneath view of the sound box and arm taken in the position shown in Fig. 1. Fig. 3 is a cross-section of the sound box taken on the line A—A, Fig. 1. Fig. 4 is a cross-section of the sound box taken on the line B—B, Fig. 1.

Adapter Stylus for Phonographs.—Ellis S. Oliver, Newark, N. J. Patent No. 1,168,412. The present invention relates, generally, to improvements in phonograph apparatus, and the invention has reference more particularly to an adapter stylus which will operate to transmit the vertical vibrations produced by the vertical indentations of a sound record disc to produce horizontal vibrations of a diaphragm of a reproducing sound box set in a vertical plane.

It is the principal object of the present invention, therefore, to provide an interchangeable or detachable adapter stylus adapted to be connected with the ordinary needle socket of the vibrator arm of a vertical sound box, in place of the usual type of needle adapted to play horizontal sound record impressions, so that, without other change, the vertical vibrations of the vertical or "hill-and-dale"



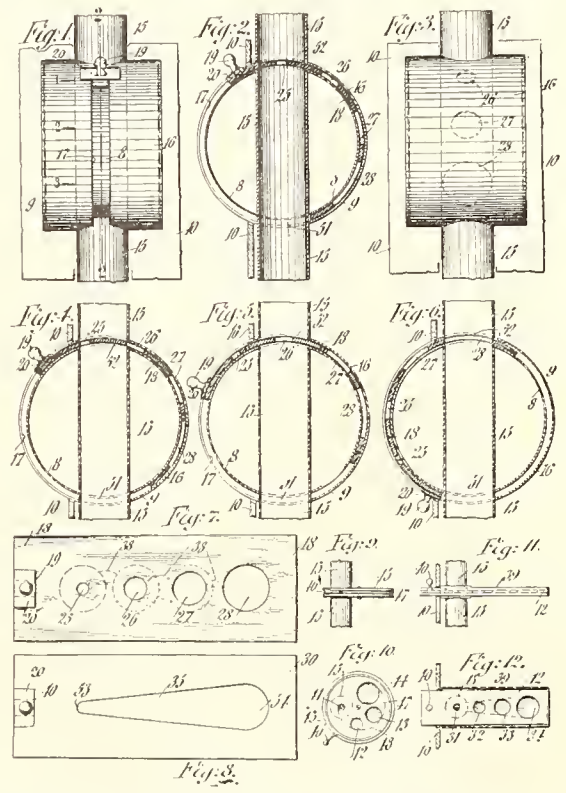
sound record impressions may be transmitted through such adapter stylus to the pivoted vibrator arm and vertical diaphragm of the vertical sound box, so that the latter is adapted to reproduce the sounds recorded upon such type of sound record disc.

Fig. 1 is a face view of a vertical sound box, the vibrator arm of which is equipped with the novel construction of adapter stylus made according to and embodying the principles of the present invention, in this view the said adapter stylus being shown in contact with the vertical sound record impressions of a "hill-and-dale" sound record disc, the latter being shown in section. Fig. 2 is an edge side view of said vertical sound box so equipped. Fig. 3 is a longitudinal vertical section of an adapter stylus made according to and embodying the principles of the present invention, the same being drawn on an enlarged scale. Fig. 4 is a longitudinal section of a codified construction of said novel adapter stylus. Fig. 5 is a similar view of another modified construction of said novel adapter stylus. Figs. 6 and 7 are, respectively, longitudinal sections of still further modified constructions of the novel adapter stylus.

Tone Moderator for Talking Machines.—George E. Brightson, Oyster Bay, N. Y., assignor to the Sonora Phonograph Corp., New York. Patent No. 1,167,972.

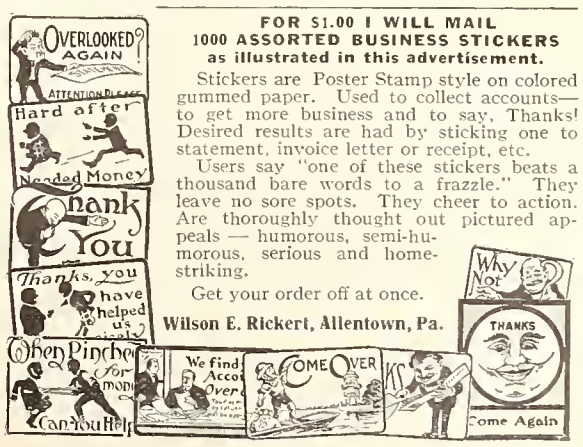
This invention relates to tone moderators for talking machines, and has for its object to provide an improved device which may be conveniently operated, and which serves to eliminate the objectionable feature of phonographs known as "scratch." The device is so arranged that the passage of the sound is not impeded so as to disadvantageously influence the tone produced by the instrument.

In the accompanying drawings Fig. 1 is a front view of the part of the leader through which the sound passes, with the improved tone moderator applied thereto, arranged within the phonograph case and operated from the outside thereof; Fig.



2 is a vertical section taken on line 2—2 of Fig. 1; Fig. 3 is a view of the opposite side of the device from that shown in Fig. 1; Fig. 4 is a section taken on line 2—2 of Fig. 1, but with the valve in a different position from that shown in Fig. 2; Fig. 5 is a similar section with the valve in another position; Fig. 6 is a similar section with the valve in still another position; Fig. 7 is a plan view of the valve, removed from its casing; Fig. 8 is a plan of a modified form of valve; Figs. 9 and 10 are respectively a front view and a plan view, both on a smaller scale than the preceding figures, of another form of valve, in its housings, and Figs. 11 and 12 are respectively a front view and a plan view of another form of the invention.

It is the way you treat a customer that makes the difference between sending him away satisfied and sending him away never to return.



FOR $1.00 I WILL MAIL
1000 ASSORTED BUSINESS STICKERS
as illustrated in this advertisement.

Stickers are Poster Stamp style on colored gummed paper. Used to collect accounts—to get more business and to say, Thanks! Desired results are had by sticking one to statement, invoice letter or receipt, etc.

Users say "one of these stickers beats a thousand bare words to a frazzle." They leave no sore spots. They cheer to action. Are thoroughly thought out pictured appeals — humorous, semi-humorous, serious and home-striking.

Get your order off at once.

Wilson E. Rickert, Allentown, Pa.

SYSTEMATIZER FOR RECORD STOCK.

Interesting Letter Bearing on the Above Sent Out by the Victor Talking Machine Co.

The Victor Talking Machine Co. sent out to its dealers this week a very important letter announcing a systematizer for record stock. The system is outlined by the Victor Co. as follows:

"Realizing the importance and necessity of every Victor dealer and record salesman becoming more familiar with the Victor record catalog, we have at great expense and labor printed a heavily gummed label, containing complete information for every Victor record in the domestic section of the Victor catalog.

"Each label contains: First—A complete cross index of each selection, showing all other records of this selection in the Victor catalog giving the number and by whom made. Second—Record number at each end of label, so that it is always visible.

"When attached to stock envelopes, the service these labels render is invaluable, particularly during the rush hour, or holiday season. As an illustration:

"A customer desires Record No. 17,234, 'The Rosary.' Dealer or salesman (especially if he is a new man) finds no stock of this particular number, but the label on the stock envelope, or card in the bin, immediately informs him that there are eleven other records of 'The Rosary,' and gives him the numbers and the artists. This enables the dealer or salesman to secure such information instantly, without referring to the catalog, and enables him to return to his customer, not 'with regrets,' but with other records of 'The Rosary,' which he may demonstrate and dispose of and thus avoid disappointing the customer. This service cannot be over-estimated."

The Singer Phonograph Co. has been incorporated at Chicago with a capital of $9,000 by Lon L. Bartlett, L. R. Martin and Deral C. Bartlett.

ARTISTIC PATHE HANGER.

The Pathé Frères Phonograph Co., New York, sent out to its dealers this week a very artistic hanger featuring a special list of Pathé discs which go on sale this month. This hanger also served to call the attention of Pathé dealers to the fact that the Pathé Frères Co. had closed an exclusive recording contract with Lucien Muratore, the famous tenor.

The Pathé Frères Co. has conceived a standard form of supplement hanger design which has won the approval of the company's dealers throughout the country. The hanger is dignified and attractive, and presents a pleasing appearance in the dealer's window.

LEWIS BROS. HANDLING VICTROLAS.

The Lewis Bros. Co., of East Liverpool, O., has arranged to handle the complete Victrola line in that city.

Multi-playing Needle. Sapphire Needle. Diamond Needle. Automatic Starter and Stopper. Equipment for playing all makes of disc records in the world. Trimmings Gold-plated. Envelope Filing System with capacity for 110 records.

Dimensions:
Width, 21¼ in. Height, 50 in. Depth, 21¼ in.

" " We Quote

Mr. O. H. Fernbach, Secretary International Award System, who writes from San Francisco to the Sonora Phonograph Corporation under date of February 8, 1916:

> "I beg to inform you that the only Jury which heard and tested all the phonographs exhibited at the Panama-Pacific International Exposition recommended that the Sonora be given a marking for tone quality higher than that given to any other phonograph or talking machine."

Read this over again. Note the words "all the phonographs," "tone quality," "marking" and "higher." Then hear a Sonora and find out for yourself *why* expert judges gave the decision they did.

Would you like to handle the Sonora? Write us and we may be able to make suitable arrangements.

SONORA PHONOGRAPH CORPORATION

GEORGE E. BRIGHTSON, *President*

General Offices and Salesrooms:

57 READE STREET NEW YORK CITY

The INCOMPARABLE NEW EDISON

CHIPPENDALE
Official Laboratory Model

Not an idle assertion but a compelling fact. Here is evidence:

"The genius of Edison stood out supreme last night. . . . It was brought home to the audience superbly, impressively. Those who heard this astounding Tone Test were amazed and mystified, none could tell how this miracle of Re-Creating the human voice had been accomplished, but all were ready and willing to say that it had been done and they had heard it. *Only with Edison's Instrument is a Tone Test possible.* Nothing like it has ever been heard before. It was as daring, as acid-testing a demonstration as any invention has ever been submitted to.

"It was baffling. Had two Christine Millers stood last night beside the cabinet, singing simultaneously, the effect could not have been more perfect. The living and Re-Created voices were one in tone, color, shade and quality. It was a triumph of Edison's genius which made such a marvelous Tone Test possible."

Comment of the *Journal Courier*, New Haven, Conn., on a recent Tone Test.

Music lovers who taboo "mechanical music" are the most enthusiastic Edison owners. Thus, the New Edison has opened up a field untouched by any other sound-reproducing device, and given the Edison dealer the broadest selling horizon possible.

For dealer's terms address us or the jobber in the list below nearest you.

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, April 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

The Transformation

Some years ago the phonograph was an object of amusement, a scientific phenomenon.

Even in its crude state, when it squeaked and scratched, it won its way into the hearts of many, though its friends were matched in number by its enemies, who cordially detested the rasping, metallic, piercing notes that seemed to go on forever.

THOUGH it was not known then, these were the chrysalis days of the phonograph. To-day it is no longer the homely, despised caterpillar, it has been transformed into a gorgeous butterfly.

THE Sonora, by reason of the many unique, exclusive improvements, which are embodied in it, is to-day as different from the phonograph of former times as is the "Pennsylvania" from the "Monitor."

THIS explanation is unnecessary for most of you. It is given for the information of those who formed a dislike for the phonograph years ago, and have never since been enough interested to know what remarkable developments have been made during the past few years.

THE Sonora reproduces sound with almost absolute perfection. There is no harshness, no blurring of notes, no queer clicking or shrill falsetto. Instead, the Sonora pours out beautiful golden tones with a richness and splendor that will utterly amaze those whose conception of a "Phonograph" is based on what they heard years ago.

THE Sonora is a musical necessity for every home. It is the instrument which won the highest rating for tone quality at the Panama-Pacific Exposition. It is the phonograph by which all are judged.

YOU *must* hear it to understand its remarkable perfection. The Sonora speaks for itself.

The Sonora sells itself.

Nine magnificent models:

$35 $50 $75 $100 $135 $150 $225 $300 $1000

WARNING AGAINST RECORD THIEVES

Talking Machine Dealers in Northern New Jersey Suffer Loss of Nearly $500 Worth of Records Through the Work of Clever Crooks

The police of several cities and towns in northern New Jersey have sent out warnings to talking machine dealers in that section to guard against the operations of a pair of thieves with a new system of getting talking machine records without paying for them. The thieves apparently began operations in Plainfield, where they managed to get away with records valued at $160 from the Victor Ideal Music Store in that city and $141 worth of records from the store of the Mathushek Piano Co. in Plainfield. The same pair next visited New Brunswick and called at the store of Raymond Montalvo, where they secured twenty-five Red Seal Victor records, worth $117.

The Chief of Police at Plainfield has sent out a warning against the two men, but the New Brunswick officers received a message after the pair had cleaned up in that city and got out of town.

In each store where the robbery occurred the two men would appear and ask to have some records played, naming the most expensive ones. While one was listening to the records being demonstrated, the other would walk up and down the store and at opportune moments slip a record or two under his coat. The movements of the confederate were covered by the statement that he was expecting some one. The supposed record purchaser always decided to postpone his final decision regarding the records desired and acted in such a plausible manner that the record thefts were not discovered until after the pair were out of reach. According to the police description the pair were about twenty-five years old, have dark complexions, wear dark clothes. It might be well for dealers in New York and vicinity to be on their guard, for the game is not a new one even in the metropolis.

TALKER MUSIC BY WIRELESS

One Talking Machine Can Furnish Music for a Number of Families by Means of a Recently Invented Wireless Apparatus

A young California inventor has designed an apparatus whereby selections played on a talking machine have been transmitted to several neighboring homes which are equipped with special receiving instruments. In some instances the instruments have been installed in the dining room, and by this arrangement the neighbors have been entertained at meal time.

A wireless telephone apparatus upon which the inventor has been working several years is used at his central station. A talking machine, in which the horn is an integral part of the body of the instrument, is used in producing the selections. The slats are removed from the mouth of the horn and within it are placed two ordinary telephone transmitters, from which the sounds are carried by wires to the wireless telephone outfit which, after serving as an amplifier, sends the waves through a cable to the aerial on the roof, when they are discharged into the air.

The waves are caught by the various receiving stations and conveyed by wires to receivers, each of which is fitted with a small megaphone. In several instances head appliances with a pair of receivers were used. In others a single megaphone was sufficient for a group of persons.

SECURES SONORA AGENCY

Thomas Anderson, the well-known furniture dealer of 717 Manhattan avenue, Brooklyn, N. Y., has secured the agency for the Sonora phonograph for his locality, and has installed in his establishment a full line of Sonoras.

The Des Moines Talking Machine Co. has increased its capital from $10,000 to $25,000, and has added an auto truck delivery system to insure proper service in delivery of Victor Victrolas to its customers.

NEXT CONVENTION TO BE BEST EVER

Plans Now Under Way for Consideration of Many Important Business Subjects—C. G. Childs and Howard Shartele to Make Addresses as Will Factory Men and Jobbers

A. A. Trostler, chairman of the arrangement committee for the coming annual convention of the National Association of Talking Machine Jobbers, to be held at the Hotel Traymore, Atlantic City, N. J., on July 10, 11, 12 and 13, declares that the convention will be the best ever held in the history of the association, and that the members who fail to attend will regret it for the rest of their natural lives.

It is planned to make the meeting particularly notable from an educational standpoint and a program of live topics of all sorts, calculated to help all the jobbers in getting the best results out of their business, is now being prepared. Among the questions that will be taken up and discussed are those of operating costs and overhead expense of all sorts, short cuts and efficient methods in handling the talking machine business and other matters of importance and interest.

Among the talks already scheduled will be one by C. G. Childs, manager of the recording department of the Victor Talking Machine Co., who will give the jobbers much useful information and data regarding methods of exploiting and selling records. Howard Shartele, also of the Victor factory, will give a talk on the secret of ordering records successfully, and other members of the Victor Co.'s staff as well as some of the jobbers, will make addresses on matters of trade importance. From the prospects at the present time the convention in all details will be a most notable one.

The plans for the entertainment of the visiting jobbers and their friends will be as original and elaborate as the plans for the meetings, which, to those who have attended the conventions at Atlantic City in the past, has a real and pleasant significance.

MANAGES BIG McCORMACK CONCERT

Frank E. Harman, President of F. E. Harman Co., Lima, O., Develops Some Strong Publicity for His Victrola Department—Tremendous Crowd in Attendance to Hear Noted Tenor

LIMA, OHIO, March 28.—To F. E. Harman, president of the F. E. Harman Co., housefurnishing dealers in this city, who feature the Victrola in an elaborate way, is due the credit for managing one of the most successful recitals ever held in this city. Mr. Harman was instrumental in bringing John McCormack, the noted Irish tenor, to Lima, on March 9, and so great was the attraction that Memorial Hall was jammed with music lovers not only from this city proper, but from many neighboring cities and towns, and many were turned away when the doors were closed.

Previous to the recital the coming of McCormack was heavily advertised by Mr. Harman, and the opportunity was not lost to call attention to the various records in the Victor catalog made by that artist.

After the concert was over Mr. Harman threw open his store as a waiting room for the hundreds waiting to take the electric cars back to their homes, and took the opportunity to give an impromptu Victrola concert with McCormack records. To secure McCormack, Mr. Harman had to put up a guarantee of $2,000, but his foresight was well borne out by the attendance. So tremendous was the crowd that both the police and fire departments were called out to provide protection for the concert-goers. It was about two years ago when Mr. Harman brought Tetrazinni to Lima and the success of that venture was largely responsible for the McCormack concert.

Window Display Made by F. E. Harman in Honor of John McCormack's Visit

WALTER MILLER'S STRANGE RELIC

Manager of Edison Recording Studios Has Unusual and Thoroughly Appropriate Souvenir of Great Fire in Edison Plant

Manager Walter Miller, of the Edison recording studios at 79 Fifth avenue, New York, has in his office a very curious and unusual souvenir. On the morning after the big, disastrous blaze at the Edison manufacturing plant at Orange in 1914, a fire which resulted in a loss of several millon dollars, Mr. Miller was walking about among the ruins. Casting his eye about for some little thing which he might keep as a souvenir of the catastrophe, he came across one of the Amberol cylinder molds, the brass exterior of which had been heated so hot that it had run down to one end in a peculiar sculptural effect. On cooling, the brass had retained this shape. It was some time afterwards that Mr. Miller, on examining the interior of the mold, discovered there the sardonic record title, "One Wonderful Night." Souvenir is the word.

INCORPORATED IN NEW YORK

The Symphonora Phonograph Co. was recently incorporated at Albany with a capitalization of $10,000. The incorporators are E. Smerecky, A. Klug and E. Kotler, of 261 West Twelfth street, New York City.

The Malley Talking Machine Parlors, New Haven, Conn., have four modern demonstration rooms, in addition to a larger recital hall. Edison and Columbia machines and records are carried.

WITH THE TRADE IN TORONTO

Columbia Graphophone Co. Announces a Standardization of Record Prices in Canada—Higher Prices for Needles—Recent Visitors

TORONTO, ONTARIO, April 3.—The Columbia Graphophone Co., this city, has announced to its distributers and dealers a standardization of record prices by which all ten-inch records will be 85 cents and all twelve-inch records $1.25, except grand opera and symphony recordings. In a letter announcing the change the company said: "Owing to our very rapidly increasing Canadian business, we have been obliged to greatly enlarge our factory facilities, and in consequence we are now able to put into operation something we have planned for years—an established standard Canadian price for talking machine records. Not the United States price plus the duty, but a Canadian price based on Canadian output, costs and conditions. Beginning with March 20, when the new April records go on sale, all Columbia ten-inch double-disc records, with the exception of grand opera, will be sold at the standard Canadian price of 85 cents, and twelve-inch double-disc records, except grand opera, at the standard Canadian price of $1.25. Additional equipment is being installed in the record department of the Columbia Graphophone Co.'s factory at Toronto to increase the output by at least one-third. The management has found the greater capacity necessary owing to increased business."

Jos. Wolff, secretary of the Sonora Phonograph Corp., was in Toronto recently calling on I. Montagnes & Co., the Canadian distributers for the products of his company. From Toronto, Mr. Wolff went to Montreal. He expressed himself as being most enthusiastic regarding the development of the Sonora business in Canada.

I. Montagnes & Co. have moved into new quarters in the Ryrie Building at the corner of York and Shuter streets, where they have conveniently arranged offices, display rooms and repair shop to take care of the Sonora business.

Frank Whetsel, manager of the Bell Piano & Organ Co.'s Victrola department up to the time it discontinued, and more recently with Heintzman & Co., has enlisted for overseas service in the 169th Regiment.

The Music Supply Co., of Toronto, distributers of Columbia products, has announced an advance of the price of needles owing to the high cost of steel. The new rates are 50 cents per thousand.

A recent trade visitor was H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., who reported a satisfactory development of the Pathé business in the Dominion.

FINE EDISON STUDIO IN ROCHESTER

Handsome Quarters Opened Last December Enjoy Immediate Business Success—Home-Like Scheme of Decoration Throughout

ROCHESTER, N. Y., April 3.—Among those who have won notable success in the phonograph field of this city is to be included the Edison Diamond Disc Studio, 142-144 East avenue, which is under the management of J. G. Brown,

Edison Diamond Disc Studio, Rochester, N. Y.

who handles the Edison line exclusively. The new store was opened on December 17, 1915, and since that time has enjoyed a splendidly growing business.

The studio is handsomely decorated and furnished as will be seen by the accompanying illustration. The walls and carpet are all gray, and the hangings and portieres are of rich old rose velvet. The four soundproof demonstrating booths are furnished with gray wicker furniture. There is a large display room in front of the store, and the studio is also provided with a recital hall, twenty-five by forty feet, and in which concerts and dances are held twice each week and attract a capacity crowd.

MONEY-MAKING MUSIC

Talking Machine Music Used to Speed Up Workers in Cincinnati Establishment

A dry-cleaning establishment in Cincinnati employing some 300 persons, according to a report in Manufacturers' News, has come to the conclusion that if these people hear music at frequent intervals while they work it will not only make them happier, more contented workers, but that they will do more work than if they were without music. So, following this theory, this enterprising firm has installed throughout the big establishment enough talking machines to keep lively music playing almost all day long. It is like one big entertainment.

The Knebel Jewelry Co., of Columbia, Tenn., has added a full line of Victor machines.

MORE PROOF OF WORLD AD. RESULTS

J. B. Ogden Reports Tremendous Demand Created for His Cabinets and Sales System Through Announcements in This Paper

In a recent letter to The Talking Machine World, J. B. Ogden, manufacturer of Ogden sectional record cabinets and sales system in Lynchburg, Pa., has the following to say regarding the result of advertising in The World:

"We have been 'snowed under' with inquiries from dealers requesting an estimate on sufficient equipment to file their record stock. This is in direct response to February's ad, which shows the pulling power of each issue of The World."

It might be mentioned that Mr. Ogden, since starting in business, has conducted his sales campaign entirely through advertisements in The Talking Machine World, and the tremendous growth of his business is direct proof of the efficiency of that method.

A STUNT THAT SELLS RECORDS

TERRE HAUTE, IND., April 10.—C. I. Abelowitz, in charge of the talking machine department of A. Herz, has hit upon an advertising idea that has been very effective. The scheme consists of small printed slips in bright colors that are attached to the monthly record supplements. For instance, one read, "The best novelty record yet.—17945—Have you heard it? Listen to it. A. Herz, fourth floor."

In discussing the little "stunt," Mr. Abelowitz said, "We have found this scheme to be a big record advertiser, inasmuch as many people would ask to hear a record featured in this way. Record No. 17985, while not so very popular in some places, we have found that through this method two hundred and twenty-five records were sold during the month of March. For April list we are featuring the new Marimba band record and are well stocked with it and we feel quite confident that we will dispose of every one of them."

NEW STORE IN SALT LAKE CITY

The John Elliott Clark Co. has opened an exclusive Victor Victrola shop at 150 Main street, Salt Lake City, Utah. The store is artistically decorated and furnished. A feature of the business will be a specially arranged concert to be given at frequent intervals each week.

A. L. Demorest, Wilmington, Del., writes, "The March issue of The Talking Machine World is a very interesting issue of a very splendid magazine. I enclose stamps for additional copy to be sent to a friend."

ROCHESTER DEALERS' BANQUET

Local Association Holds a Most Successful Affair—Some Interesting Addresses and Excellent Entertainment Among the Features of the Evening—Officers Elected.

ROCHESTER, N. Y., March 28.—First annual banquet of the Rochester Dealers' Association was held at the Hotel Rochester on March 14 and in every way proved a most substantial success, there being over fifty dealers representing the leading lines of talking machines in attendance.

Officers for the year were elected as follows: Raymond C. Fagan, of E. W. Edwards & Son, president; A. P. H. Warren, of the Belcom Music Co., vice-president; William Levis, of the Levis music store, treasurer; Audley Beisinger, of the East avenue Victor shop, secretary, and Emil Keosky, of Gibbons & Stone, Yale Whitney, of the Edison studio, and Arthur W. Oster, of Oster's music store, auditors.

The principal speaker was Frank Jewell Raymond, who chose for his topic "Selling Service." Among the out-of-town visitors were James Neal, of Neal, Clark & Neal, Buffalo; Neil Colwell, of York, Pa., and James McFarlane, of Canandaigua.

At the close of the dinner an entertainment was given. Those who appeared were Margaret Heveron, soprano; Al Raynolds, military comedy act; William Watts, saxophone solos, and Norbert Lucas, violin solos. The banquet hall and tables were decorated with advertising matter and the menu cards were printed in an original manner, all of the courses coming under names affiliated with the talking machine industry.

The purpose of the association is for the betterment of the talking machine industry; a universal and better service for the handling of records and an endeavor to better the service to the public.

PERSONALS FROM TORONTO

H. S. Berliner a Recent Visitor—James P. Bradt's Promotion Pleases Canadian Friends—Appoints New Agencies for Sonora

TORONTO, ONT., April 5.—One of the recent visitors to Toronto was H. S. Berliner, vice-president and general manager for the Berliner Gramaphone Co., Montreal, who reports business as being very satisfactory in view of general conditions.

Many trade friends in Canada of James P. Bradt, New York, are highly pleased with the news of his recent promotion to the important position of general sales manager of the Columbia Graphophone Co. Mr. Bradt was for a number of years in charge of the Columbia Co.'s Canadian business.

Emil VanGilder, of I. Montagnes & Co., Canadian distributors for the Sonora Phonograph Corp., has just returned from a trip to the Maritime Provinces, where he placed several important agencies for the Sonora line of phonographs.

LAWMAKERS' TASTES VARY

Some Canadian Legislators Enjoy Operatic Records and Others Ragtime, at the Expense of the People at Large.

TORONTO, ONT., April 4.—In the course of a description of Dr. Sevigny, newly elected speaker of the House of Commons, and his surroundings H. F. Gadsby, writing in MacLean's Magazine, tells of the part played by the talking machine and the taste of the different speakers in selecting records at the expense of the government. Some of the speakers have favored sentimental selections, some operatic and some comic, while one speaker selected all the $5, $6 and $7 records he could find to be paid for by the people's money. Dr. Sevigny did not have much complaint to make regarding the selections on hand, but for the sake of his constituents substituted the "Marseillaise" and other Quebec favorites for "The Protestant Boy."

WEBB DOING A GROWING BUSINESS

ATLANTA, GA., April 3.—LeRoy Webb & Co., who recently moved into new quarters at 83 Peachtree street, report an excellent business in the Victor line, which they have been carrying for some time. The business has increased to such an extent during the past year that larger quarters were necessary. The new location is occupied jointly with the Windmayer Music Co., dealers in sheet music and supplies. Fred C. Windmayer, manager of this concern, was formerly connected with the Phillips & Crew Co., being in charge of the sheet music department there.

EILERS CO. CHANGES ITS NAME

Will Now Be Known as the Hopper-Kelley Co. Dealers in Talking Machines.

SEATTLE, WASH., April 3.—The Eilers Talking Machine Co. has changed its name to the Hopper-Kelly Co., dealers in talking machines. Since taking over the talking machine department from the Eilers Music House some two years ago, C. H. Hopper and E. P. Kelly have been conducting the business under the old firm name, but upon the opening of their new branch in Tacoma, Wash., the first of the month, it was deemed advisable to change the name of the concern. Mr. Hopper recently returned from a trip to the East, where he inspected the Victor plant at Camden, N. J. He also paid a personal visit to Thomas A. Edison and spent some time at the headquarters of the Columbia Grafonola in New York City.

Avery & Hurrle, of St. Cloud, Minn., have moved into a new store at 14 Fifth avenue South, where they will have a much larger display room for their stock of pianos and talking machines.

Phonograph Insurance

NEW YORK, APRIL 15, 1916

THE spring of 1916 is here, and even if in some sections conditions overhead and underfoot do not seem to bear out the assertion, any perfectly good almanac would prove that spring arrived here almost four weeks ago. With spring well under way, it is merely a step to summer, for the passage of time is readily appreciated by harking back a few days ago when it seems the holiday business was under way.

The idea of summer lassitude in business has long ago gone by the board and the first approach of the hot weather should not be an inducement for the business man to put his feet on the desk or counter and doze until the first frost comes.

Business, and particularly the talking machine and record business, can be carried on almost as successfully in midsummer as during the indoor winter period if the proper preparation is made and the proper effort put into it.

Experience has taught that people on vacation bent are just as anxious, if not more anxious, to listen to good music as they are at home. In the canoe or motor boat or in camp a talking machine and a few records serve to make the hours very pleasant between sunset and the time for lights out, and the demand for the vacationist is not confined by any means to the low-priced machine, for many of the summer homes and bungalows and the yachts of those who prefer the sea are elaborately constructed and furnished and demand the better types of cabinet machines to match the surroundings.

Now is the time for the live talking machine dealer to map out his campaign for summer business. He can get in touch with local clubs and societies that maintain summer camps or clubhouses; with churches, Sunday-schools that provide outings for the children; with the various yacht clubs and in many other directions put out lines that should bring substantial results in machine and record sales.

Talking machine companies themselves offer an abundance of suggestions for developing summer trade and the dealer who does not at least profit by some of them is not doing justice to the manufacturer who offers helpful ideas or to himself.

The first of July is not the time to plan the summer campaign or to send out proper circular matter to organizations or individual prospects. The end of April should see such a campaign well under way, because the warm days bring forth thoughts of vacation time and the equipment that goes to make a vacation worth while.

THIS is an age of ideas. Never before in the history of the world has there been such an urgent and increasing demand for bright thoughts of a commercial nature.

The competition which yearly draws the lines of trade tighter, and sifts men and affairs with a relentless force, turns the business mind upon some new object with which to strike out from the crowded highway into an unbeaten path toward success.

In every office, store and shop throughout the wide world there is somebody who is continually thinking and seeking for an idea which will help his affairs. The clergyman is thinking of an idea which will extend his influence. The physician, as he sits by the bedside, is seeking for some new idea which will aid nature. The banker is puzzling his brain for an idea which will master finance, and talking machine manufacturers and dealers are on the still hunt for ideas to improve their business. It only requires a mere idea, if it is a perfect one, to prepare the foundation for a great success; but, like inventions, ideas which stand the test of practice are rare indeed.

Men who have that peculiar faculty which enables them to so apply old principles to new purposes as to produce a novel idea or method are the sort of inventors whom the world admires and rewards.

It is said that ninety out of every one hundred business men fail who continue in a given line for a term of years, and the majority of those who do succeed will tell you that a new idea which turned the current of their thoughts was the keystone of their prosperity.

AS the talking machine develops and broadens it naturally presents a number of problems for the earnest consideration of a dealer who desires to take advantage to all the opportunities presented to him.

In the case of the established companies there are naturally to be considered the guarantees that have had their worth proven by years of service, guarantees that the dealers have had confidence in. Through the entrance of many new interests in the trade, however, this building of business on a foundation of confidence has been lost sight of, and the old Latin slogan of *caveat emptor* has found an unwelcome place in the talking machine field.

There are those manufacturers who have entered the trade on a substantial business basis, have invested capital and made all plans towards permanence, but there are, unfortunately, others who, dazzled by the fortunes reported to have been made in the manufacture of talking machines, have declared themselves in on those fortunes and with a limited capital or the proverbial "shoestring," have endeavored to place machines of doubtful value on the market.

The dealer in making his purchases should satisfy himself fully that the house he is placing the order with is responsible in the business sense and has at least started out with the idea of remaining in the field permanently. It is the dealer and not the manufacturer who must stand the abuse for unsatisfactory machines. If the manufacturer is the responsible one, he will see that the trouble is remedied promptly, for trouble is liable to occur under the best of conditions. It is a very embarrassing thing, however, for the dealer to have a machine returned to him with a broken motor or unsatisfactory sound box, and then learn that the concern from whom he bought the machine has passed out of existence.

The dealer who of his own free will or through force of circumstances shops around the line of talking machines must realize that there have been many changes in the condition and efforts of the trade during the past year and should exercise an unusual amount of care.

THE loss of valuable talking machine records by theft is becoming so common they demand more than casual attention from dealers and managers. Within the past month several talking machine dealers in New York and vicinity alone have lost quantities of records valued in some cases at $200 or more through the work of an organized system.

Talking machine records are, at times, very easy to hide, especially in the winter when customers wear the usual large coats, but if the salesman is wide awake there should be no rea-

son why the proposed customer should get away with a couple of dozen records. In the first place, the customer cannot listen to a dozen records at one time, and if the salesman keeps track of those he keeps out for testing, counts the accepted ones left in the booth, and files the rejected records away again without delay, the losses should be materially reduced.

The great majority of talking machine owners are honest, but there are enough dishonest ones to make the retailer stay on his guard at all times. The records used for demonstration should be checked carefully in every case. It means a little work, but it also means safety.

THE approval plan in connection with the retailing of talking machine records has been receiving an unusual amount of attention from dealers in all sections of the country during the past few months and the probabilities are that in the very near future the practice will be eliminated in many localities.

In certain cases protests have been made by customers against the discontinuance of the approval plan on the plea that record collections are more satisfactory when made leisurely and in the quiet of the home; that frequently the purchasers do not have the opportunity to visit the store and spend an hour or more making selections, and that certain restrictions should be made that will serve to discourage the record buyers who have abused the privilege.

Although the talking machine men have, for good business reasons, displayed a strong inclination to consider the convenience of the customer, there are too many people who do not appreciate this attitude, and through their abuse of privileges accorded have forced their abandonment.

Careless handling of records, thereby destroying their value, the keeping of records beyond the stipulated trial period, the loaning of the records to friends and neighbors, have all tended to work against the interests of the dealer.

With the modern demonstration booths, and with the talking machine stores for the most part open evenings, the record purchaser who cannot find the opportunity for making selections in the store is in a desperate plight.

THE opponents of the Stevens, or Price Maintenance Bill, are carrying on an active campaign throughout the country, backed to a great extent, by the large department stores and other concerns who believe in price cutting.

It is evident that the advocates of price maintenance must be on the alert to meet the strongest kind of opposition when the Stevens Bill comes up in Congress, for the opponents of the measure are sending out letters and literature in which the purpose and scope of the Bill are grossly misstated.

The statement that the Bill will create monopolies and subject the consumer to other forms of imposition is absurd, and on the face of it the use of the word "monopoly" and "trust" are utilized as a bait to interest politicians and to start a stampede against the Bill. A very timely comment on this development appeared in Printer's Ink recently, which we quote in part:

"Now it ought to be evident by this time that one of the most useful tools in the outfit of the trust-builder is the power to manipulate prices. The keenest weapon in the arsenal of monopoly has always been the exercise of price discrimination. We find it in some form or other in practically every one of the anti-trust cases which have been decided. The power to reduce prices in territory where competition is strong, while maintaining them in the localities where it is weak, has been used over and over again to drive competitors out of business. Whether disguised as an extra quality discount, a rebate or a 'profit-sharing' plan, the result is the same. It simply prevents other concerns from competing on even terms.

"Price-maintenance, on the contrary, will go far toward insuring the opportunity for competition on the even terms of quality and service. So far from encouraging monopoly, it is a bar to the attainment of monopoly by means of unfair price-manipulation. The price that is "fixed" in the sense of being publicly known and universally applied cannot be juggled for an ulterior purpose. It cannot be lowered or increased without making the fact speedily known to everybody concerned, and without making the change applicable to every part of the country alike. The establishment of a one-price-to-all policy is the most cordial invitation to a competitor to come in and give better quality at the same price, while the old system of price-cutting is a warning that the small competitor would better watch out. Subtract from the government's anti-trust cases all the evidence which has to do with price discriminations, rebates, preferential discounts, and the like, and you will have mighty little left to base convictions on.

"It may strike Congress as curious that the retail interests which are fighting this particular measure, and raising the cry of 'monopoly' against it, are themselves the very retail establishments which come closest to being monopolies in fact; and that the dealers who most largely favor it are the very ones which are most in danger of being crushed by monopoly. It may sound strange to hear the big department stores protesting against price-maintenance as a weapon of monopoly, while the small retailers hail it as a protection against monopoly. We only hope that Congress will get the facts straight. Nothing is better calculated to make a full-fledged monopoly howl with anguish than the inability to cut the price in the face of straightforward and vigorous competition on a quality basis."

Members of the talking machine trade throughout the country should make it a point to get in touch with their Congressmen and impress upon them their wishes as well as the wishes of their clientele in favor of the passage of this Bill.

Pearsall Victor Service Is UNIFORM

Remember when electric lights shifted from brightness to dimness several times an hour. Until the light was made uniform, no great demand appeared.

That's the *test* of real service —Uniformity.

We have uniformized Victor Service. You can rely upon us, for more dealers depend upon Pearsall Service than ever before.

Victrolas and records—accent on records—when wanted and as wanted.

Also manufacturers of Die-Cast Babbitt Bearings and Babbitt-Lined Bronze Bearings

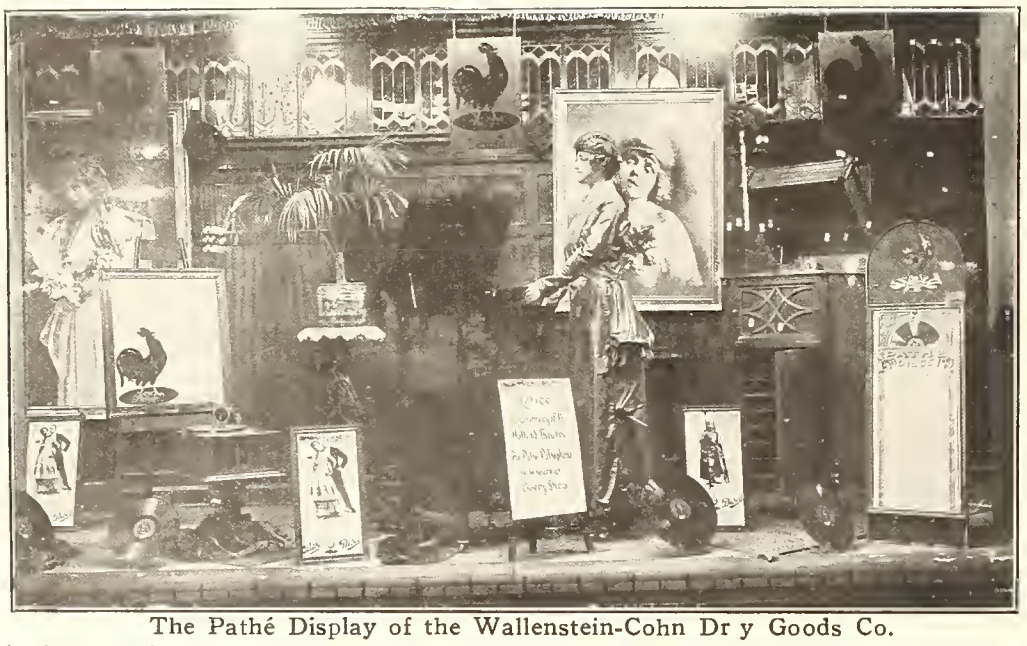
ARTISTIC PATHE WINDOW DISPLAY BY KANSAS DEALER

WICHITA, KAN., April 3.—The Wallenstein & Cohn Dry Goods Co., who operate the Boston Store in this city, recently added a Pathé phonograph department to the fifty-three departments under the roof of its great establishment.

The arrangement was made last December through the E. E. Trower Music Co., Pathé jobbers in St. Joseph, Mo. Arrangements were made to exploit the line in a big way and exclusively. The new department on the third floor of the big building is handsomely equipped with elaborate demonstration parlors and a large recital room where afternoon concerts are given to large audiences.

B. W. Chappell, formerly with the E. E. Trower Music Co., is in charge of this department and much of his success to date has been due to his experience in handling the line and his ability to develop clever exploitation methods.

A recent window display arranged by J. H. DeWitt, decorator for the Boston Store, is illustrated herewith and shows the latest model Pathephones set in a most attractive environment with the Pathé rooster much in evidence.



The Pathé Display of the Wallenstein-Cohn Dr y Goods Co.

The pictures of the noted film actresses shown in the window were secured through co-operation with the Holland Theatre, the leading motion picture theatre in the town, and while the exhibit was in place a Pathephone concert was given in the theatre with special slides shown on the screen, while the machine was played.

LID HOLDER AND AUTOMATIC BRAKE

Interesting Invention of G. T. Buckwalter for Use on Large Types of Cabinet Talking Machines Has Some Excellent Features

ROYERSFORD, PA., April 5.—D. T. Buckwalter, well-known piano and talking machine dealer of this city, has just secured a patent on a new contrivance for talking machines which combines a lid supporter and automatic brake. The lid is so arranged that it rises to the proper height on a pressure of a button and is balanced in the upright position without the aid of any sort of catch. At the same time the raising of the lid serves to apply the brake automatically to stop the turn-table. When a new record is inserted and the brake released the lid can readily be returned to a closed position.

One of the advantages claimed for the invention is when the lid is kept down when the machine is not operating the motor is always allowed to run down and there is no danger of damaging the machine by keeping the spring continually under tension. Mr. Buckwalter has demonstrated the invention very successfully, but has not yet made arrangements for marketing it.

GOOD RESULTS FROM RECITAL

Ivan White, Hanover, Pa., Features Edison Diamond Disc Phonograph and Records Before Big Audience in St. Mark's Chapel, That City

HANOVER, PA., April 4.—Ivan White, who handles Edison diamond disc records and phonographs at 113 Abbotstown street, this city, developed excellent publicity for that line recently when he furnished an Edison diamond disc machine to take the featured part in a concert recital given in St. Mark's Chapel under the auspices of St. Mark's Missionary Society.

The diamond disc machine was used in seven of the nine numbers on the program and was featured in connection with piano, violin, pipe organ and vocal numbers. The program attracted an audience that taxed the capacity of the chapel, and was a subject of a flattering article that occupied nearly two columns in the local paper.

The assisting artists were Viola Brodbeck, soprano; Lela Rudisill, pianist, and Edgar Daniels, violinist. Mr. White was in personal charge of the entertainment.

SALES SHOW SUBSTANTIAL GAIN

Frederic Goodwin, head of the Columbia Co.'s educational division, stated this week in a chat with The World that his department's activities for the first three months of the year had been satisfactory in every respect, the sales showing a substantial gain over last year. Mr. Goodwin recently arranged to considerably enlarge his staff, in order to extend to Columbia dealers an even closer co-operation than they have received in the past. A number of important deals have been closed since the first of the year, and Mr. Goodwin states that prominent educators throughout the country are appreciating more and more the value of the graphophone as an educational factor.

DEALERS FALL-BOARD NAMES

AEOLIAN-VOCALION
REPRESENTATION

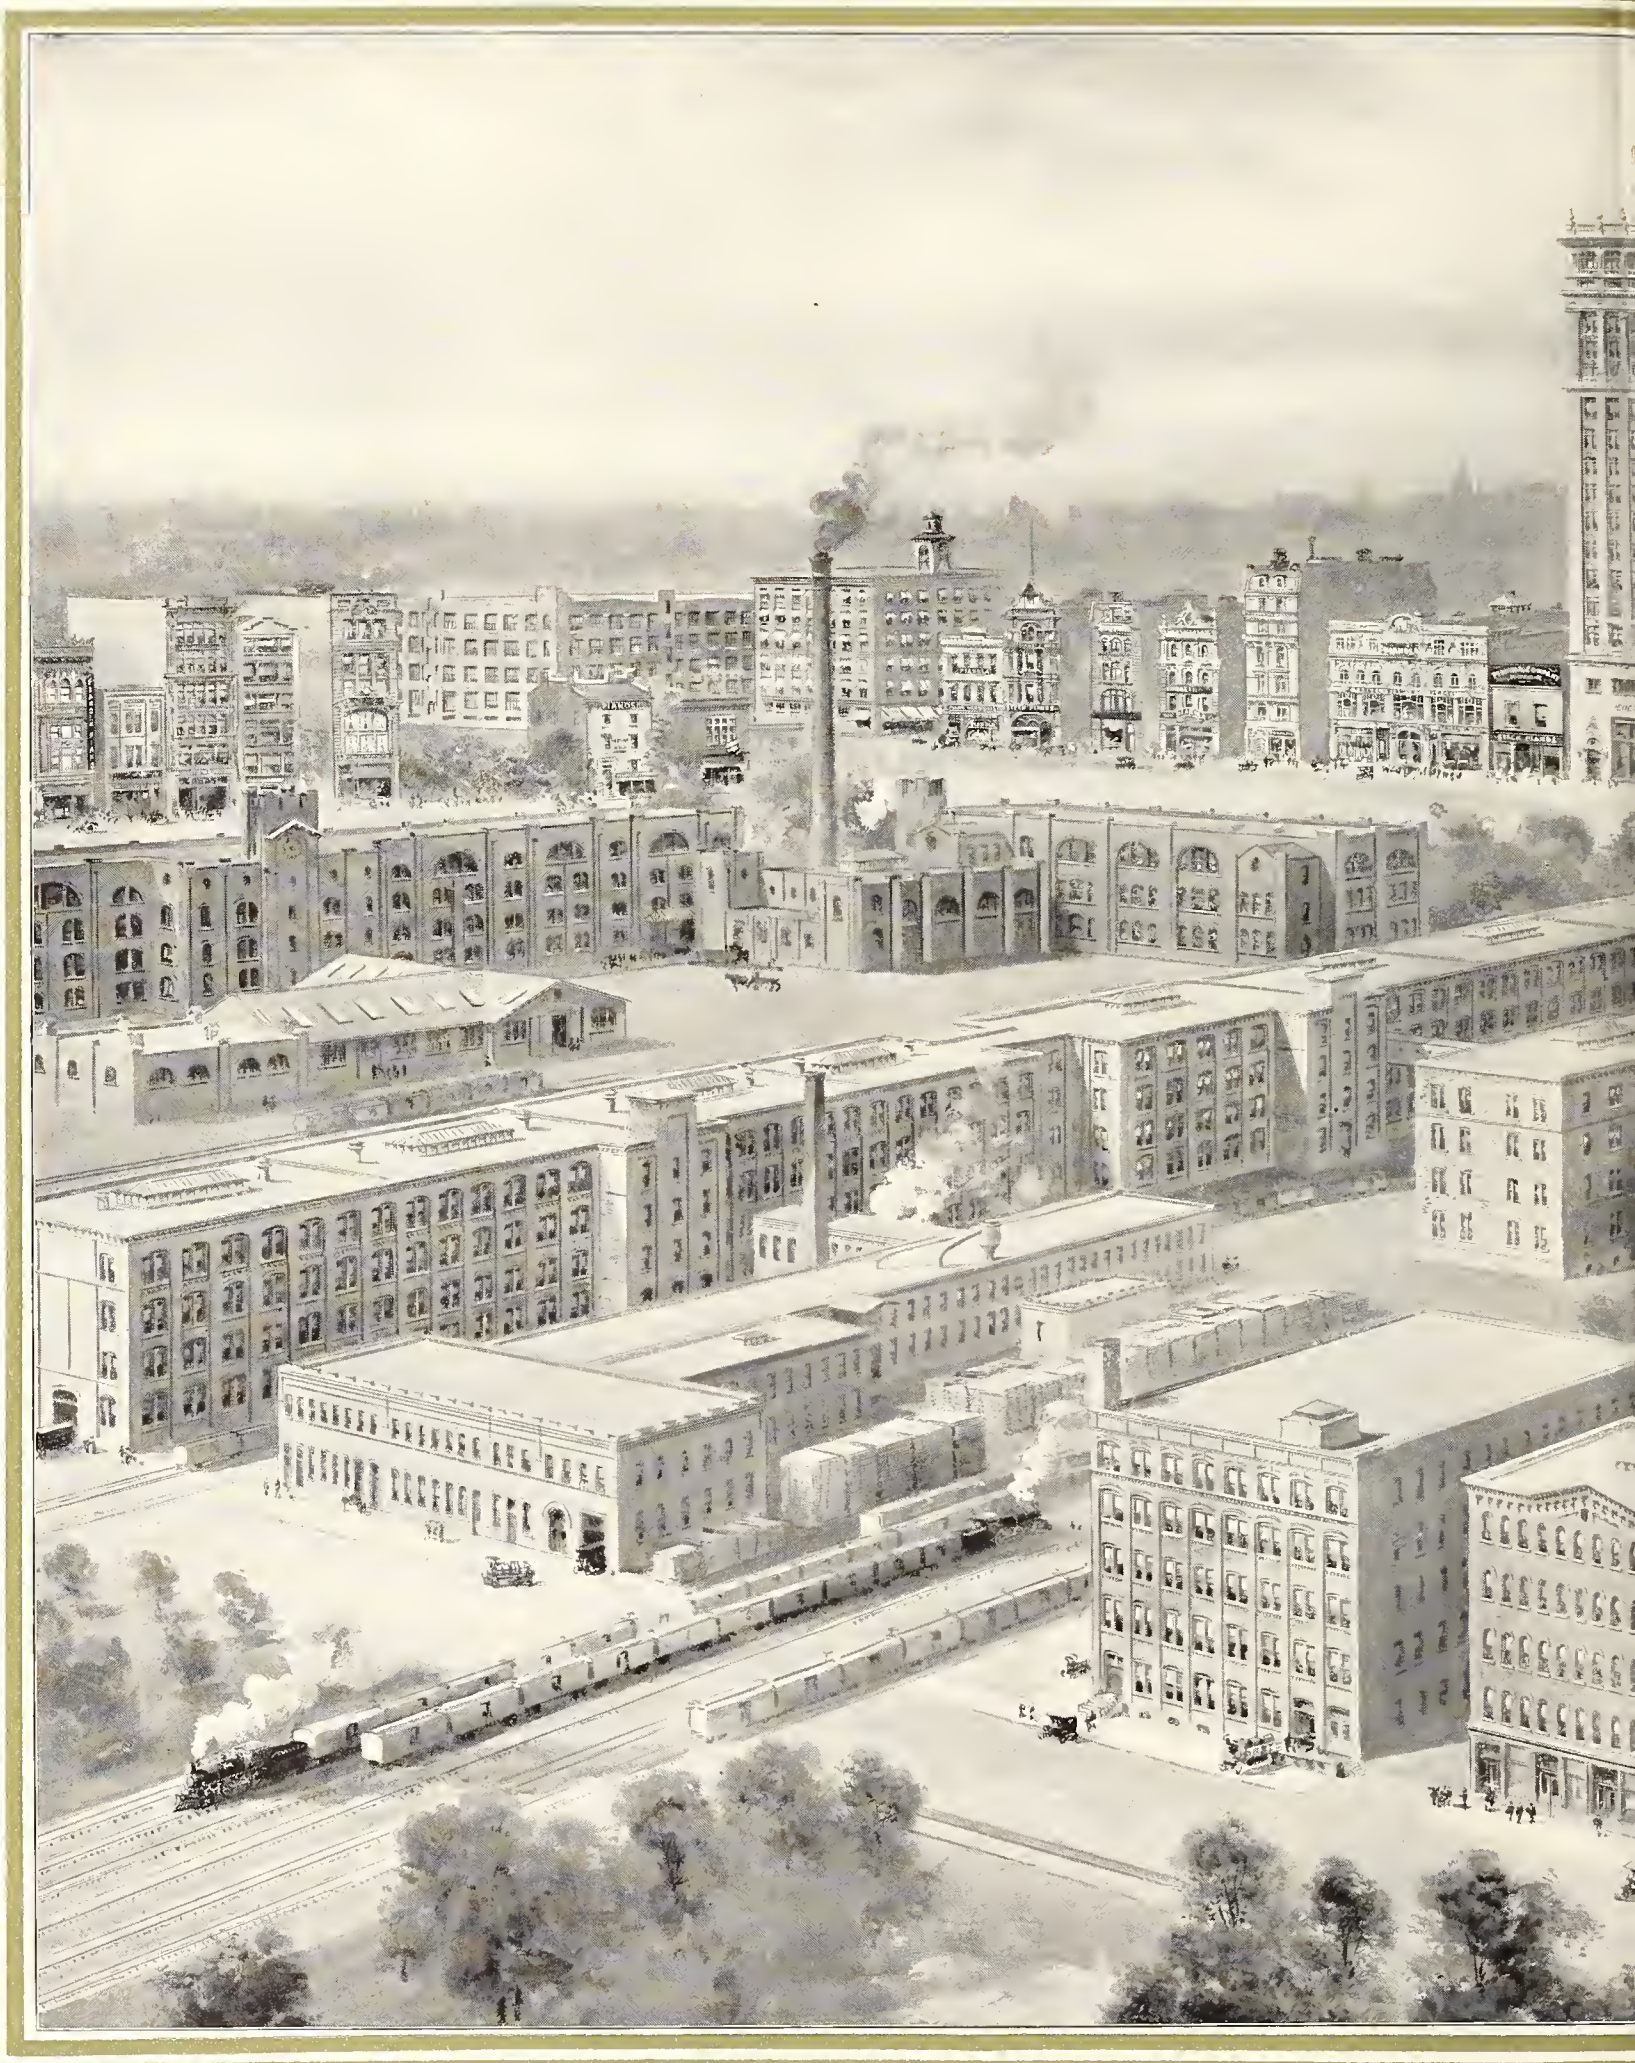
Its Present Value and Promise
for the Future

THE Phonograph business, tho' still comparatively new, is already undergoing the change which is inevitable in every industry. Real competition, without which development and progress is almost impossible, has made itself strongly felt in the field of manufacture and is rapidly becoming more and more apparent in the selling end. The time has come when it behooves every intelligent and far-sighted merchant to face the new condition and make provision for the present and the future.

To the merchant who does this, the opportunity to secure the representation of The Aeolian Company's phonograph—the Aeolian Vocalion—must appeal as the most valuable franchise available in the music-industry. Not only is the Aeolian-Vocalion today far superior to any of the machines of older type, both intrinsically and as a sales proposition, but its leadership in the future is equally assured. During the past twenty-five years, The Aeolian Company, its manufacturers, have been responsible for the most important developments in musical instrument construction. It is therefore safe to assume that the same spirit of initiative, backed by its wide experience and unparalleled equipment, will enable this company to *keep* its phonograph far ahead of all competitors.

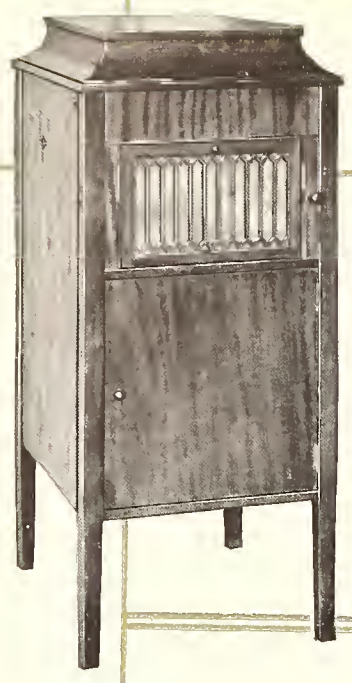
Moreover, the Aeolian policy of *exclusive representation*, which assures to the dealer the benefit of all the business in his territory, is not only a vital consideration at the present but is destined to become more and more important in the years to come.

Valuable territories for representing the Aeolian-Vocalion are still available. Information as to these and full particulars will be furnished to those who inquire.

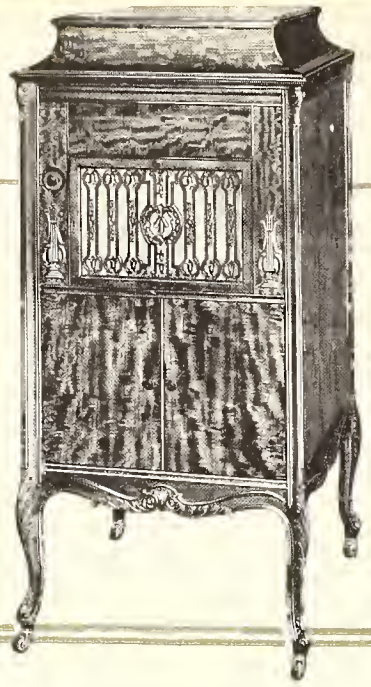


THE Aeolian plants included in this group are Aeolian Hall, New York, the largest musical establishment in the world; Aeolian Hall, New Bond Street, London, and the Aeolian Branches in Berlin, Paris, Melbourne and Sydney, Australia, and other foreign and American cities; the great Aeolian factories at Gotha, Germany, and Hayes, England, as well as the Company's factories in America. All are Aeolian

structures and thus grouped they graphically portray the size and importance of what has been termed Aeolian City. ¶ Aeolian City is the impressive embodiment of the Aeolian spirit—that spirit which for twenty-five years has been the leading influence in the music-industry. Looking at this imposing evidence of supremacy and achievement, the conclusion is inevitable that the most important development in the musical instruments of the future may be anticipated from that organization which has contributed those of greatest value, in the past.



Conventional designs, $35 to $75 without the Graduola



Conventional designs, $100 to $350 with Graduola

THE distinguishing features of the Aeolian-Vocalion line, which is larger and more complete than that of any other phonograph upon the market, are—the good taste displayed in stock models, and the group of special Art cases which far surpass anything hitherto known in connection with the phonograph.

The stock models reflect the broad experience and ample artistic capacity of The Aeolian Company's department of design and case-making. Utmost care and technical skill are apparent in every detail. Simplicity and the repression characteristic of genuine art are evident in every design.

In the Art Styles the most unusual and artistic case effects are displayed. While some of these are original, others are based upon authoritative Period and other classic models.

No intelligent merchant need be reminded that there is a large clientele in every community that appreciates real beauty and art, and that this clientele constitutes a highly desirable addition to his trade.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Address the Aeolian-Vocalion Department

THE AEOLIAN COMPANY

AEOLIAN HALL, NEW YORK CITY

CHICAGO OFFICE: FINE ARTS BUILDING
MICHIGAN AVENUE

A complete display of all models of the Aeolian-Vocalion may be seen at this office

The Vocalion is made in many unusual and effective Art Styles.

First recordings of Louis Graveure in the Columbia May List; also new selections by Godowsky the poetic genius of the piano; also other recordings of various type for every occasion to meet the demand for music. *No chance at all of missing a sale.*

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Records TRADE MARK Note the Notes

SAN FRANCISCO ASSOCIATION HOLDS BIG BANQUET

Many Dealers in Wide District Attend the Session and Listen to Some Excellent Addresses and Discussions—Many Changes of Interest Reported in the Pacific Coast Trade—Interest in Pathé Line—Edison Tone-Tests Attract Much Attention—News of Month

San Francisco, Cal., April 3.—The past month has been a busy one in the talking-machine trade all over the Pacific territory, as weather conditions have been more settled than earlier in the year, permitting a general opening up of the country business, which last month was still showing the effects of winter. The more remote parts of the country are expected to show a great growth this year, as the mining and lumber industries are especially prosperous, and the talking machine has become well established as an amusement feature in places where other high-class amusements are scarce. In the city trade, this department is holding up better than most lines of musical instruments. Goods are still scarce in most lines, but the situation is becoming a little easier than it was.

Local Association Dines

The monthly meeting of the San Francisco Talking Machine Dealers' Association on March 9 was made the occasion for a banquet, which was held at the Chantilly cafe. P. H. Beck, president of the association, set things in motion, but aside from the acceptance of some new members, the regular business procedure was suspended, and Mr. Beck presented W. F. Morton, of Sherman, Clay & Co., as toastmaster. Mr. Morton kept things moving right along throughout the evening, calling on everyone present for a brief talk, and filling the intervals with many pertinent comments and amusing anecdotes. Every dealer in the vicinity of San Francisco was invited, and most of them came, including some from down the peninsula and a large crowd from across the bay. Including the new members, there are now twenty-five firms represented in the association, which takes in practically everybody in the business. The banquet proved a most enjoyable affair to all, and there is a general desire to have it repeated in the future. With all the dealers taking an active interest in the work, the association has already corrected some troublesome abuses, and if they continue to hang together the trade will be placed on a more profitable basis than for a long time past. Those present were: From P. H. Beck & Co., P. H. Beck, R. E. Day, H. T. Ables, J. H. Vejar, C. R. Berglund, George McManus; from Sonora Phonograph Co., F. B. Travers, C. T. Compton; from The Emporium, A. W. White, William Hoffmann; from Byron Mauzy, W. E. Hiatt; from Sherman, Clay & Co., W. F. Morton, E. B. Hunt, B. R. Scott, R. M. Bird; from Wiley B. Allen Co., J. J. Black, F. B. Corcoran, J. R. Scott, Jr.; from the Edison Shop, J. E. McCracken, R. P. Haycock; from Clark Wise & Co., J. J. Buffa, C. F. Lundberg; from Columbia Graphophone Co., Fred Anglemeies; from Hauschildt Music Co., C. M. Moran; and the following: George W. Scott, of Scott's Music Shop; J. Raymond Smith, G. A. Finselen, Jr., F. A. Levy, of the Eilers store; George B. Spivey, of Sherman, Clay & Co.'s Oakland store; C. Anrys and B. F. Murphy of the Wiley B. Allen Co.'s Oakland store; T. B. Watson and B. S. Goldsmith, of the Oakland Phonograph Co.; R. A. Leavitt, of Hauschildt's in Oakland; W. C. Henry, of Kahn Bros., Oakland; R. J. Franck, of Alameda; J. C. Tupper and L. E. Reed, of Berkeley, and Frank E. Baskette, of San Matco.

Numerous Changes Reported

The last month has brought a number of changes in the general talking-machine line-up on the Pacific Coast, due mainly to the introduction of new lines and the injection of new blood into old organizations. Fred A. Dennison, Coast manager for the Columbia, who returned from his Northern trip about the end of the month, reports several changes in that district. George Williams, formerly traveler from the Spokane office, has been made manager, succeeding Charles Jones, who is now manager at Seattle, where there is a great deal of activity in sight. Mr. Dennison made a visit to the South earlier in the month, and N. E. Henry, manager for this vicinity, is calling on the valley trade. The Columbia company has just renewed its lease on its old quarters for a number of years, and is preparing to make a number of improvements in the quarters, which will include a more convenient arrangement of the stock and a comfortable reception-room for customers.

President Johnson, of the Victor Talking Machine Co., spent the latter part of March in San Francisco, but has returned to Pasadena to join his family.

Improvements in Oakland Store

Sherman, Clay & Co. are now making use of the new first-floor as talking-machine rooms in their Oakland store, the improvements to which are nearly complete. Andrew G. McCarthy, of this house, reports a continued increase over last year's business, and says there is still difficulty in getting many lines of goods, especially the Tungs-Tone needles, for which there is a great demand.

Interest in the Pathé Line

Louis S. Blachly, who opened a store here last month for the Pathéphone, is just getting in shape for business, and has been visiting a few of the dealers, among whom he has found considerable interest in the Pathé line, though nothing definite has been done as yet in the matter of agencies.

Gus Eilers, manager of the talking-machine department of the Eilers Music House, has just returned from his trip East, where he found business rushing, and says business here is in very good shape. The Eilers department has recently been considerably enlarged, and changes to the rear of the store have placed it in a more prominent position.

Success of Edison Tone Tests

Miss Elizabeth Spencer, who has been giving tone-test demonstrations with the Edison machine in all the principal towns of the Coast, has just brought her tour to an end at Spokane, Wash., having had a great success all along the route. The demonstrations were given to select audiences, admission being by invitation, and it was notable that in her recital at the Oakland Auditorium the attendance was almost entirely of the automobile crowd. A very successful demonstration was also recently given at Spokane by Thomas Chalmers, of the Boston Opera Co., and Marie Rappold is now on the way here to give a series of tone tests.

A. R. Pommer, of the Pacific Phonograph Co., says business is growing rapidly in the North, and that many new dealers are starting there, as well as in California and Nevada. Mack Bros., of Reno, who recently took up pianos, have added the Edison line, and other new accounts are the Endicott Drug Co., at Oakdale, Cal.; the Morgan Furniture Co., of Livermore, and the new branch of Ellas Marx, at Woodland. Omar Kruschke, of Berkeley, Cal., who has been in the piano business for some time, has joined the Pacific Phonograph Co. as sales manager. He and Mr. Pommer will soon leave on a Northern trip.

The Stern Talking Machine Corp., which was organized here a month ago, has taken a large store in the Federal Hotel building, on Market street opposite Jones. The place is being elegantly fitted up, and a formal opening will soon be held.

M. Klein, formerly with J. Raymond Smith, is now in the talking-machine department of the Wiley B. Allen Co.

J. S. Bailey, formerly manager of the Edison Shop on Geary street, has taken the management of the Edison department for Byron Mauzy, who gives this line special space, while the Victor and Columbia departments are handled by W. E. Hiatt.

C. H. Hopper and E. P. Kelly, who have for two years been operating as the Eilers Talking Machine Co., at Seattle, Wash., have changed the business name to the Hopper-Kelly Co., opening a branch at Tacoma, Wash., which is considered one of the finest talking machine shops in this territory. The company has just placed an exceptionally large order for Columbia goods.

M. Friedman & Co., a local furniture house, are preparing to take on the Victor line.

EDISON DISC ON HISTORIC GROUND

Model C250 Diamond Disc Phonograph Placed in Fort Atkinson (Wis.) Club, on Site of Fort in Black Hawk War of 1833

Memories of the Black Hawk War of 1833 were revived recently through the sale of an Edison Diamond Disc phonograph Model C250 to the Ft. Atkinson Club, Ft. Atkinson, Wis., which has an elaborate clubhouse built over the ramparts of an old fort made famous during the Indian War. Although Ft. Atkinson has a population of only 4,000, Geo. W. Toppins, the Edison dealer in that town, reports that 100 men of the community contributed $30,000 for the building and equipment of the clubhouse, the purchase of the Edison Diamond Disc phonograph giving the final touch of music.

The store of August F. Korn, piano and talking machine dealer, of Michigan City, Ind., which was recently entirely remodeled, is now one of the finest music stores in this section. A full line of high-grade pianos and Victor Victrolas is carried.

A Broad and Fertile Field

Edison dealers enjoy the widest field possible for the sale of a musical instrument.

RE-CREATION—Edison's New Art, has secured for the New EDISON Diamond Disc Phonograph the stamp of unqualified approval from the cultured music lover who turns a deaf ear toward anything that smacks of mechanical reproduction—the critic who will have nothing short of the actual RE-CREATION of musical sound.

Added to this is the fact that every Edison dealer has plenty of "elbow room."

ALBERT SPALDING
America's premier violinist, testing Edison's Re-Creation of his art.

ANNA CASE
of the Metropolitan, proving the perfection of Edison's Re-Creation of her glorious voice.

Edison Dealer Qualifications

The art dealer sells not merely strips of canvas covered with paint, but the incorporated spirit of the genius who stroked the brush, the inexpressible appeal that speaks to the eye as nature herself. And he would not adopt the same sales methods as the dealer in cheap prints.

So the merchant licensed to sell Edison Diamond Disc Phonographs realizes that he is selling more than a device for the mere mechanical reproduction of sound. He realizes that the NEW EDISON and Edison records are but the tangible mediums of the greatest musical achievement of all time—Thomas A. Edison's Re-Creation of the human voice and the sound of musical instruments—a new art that requires sales methods of the highest order.

If you feel qualified to maintain the Edison standard, you might hear something of interest to you by addressing

dramatic soprano of the Metropolitan, singing in direct comparison with Edison's Re-Creation of her golden tones.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., April 7.—March proved an unusually good month in Boston and the dealers in the various types of talking machines felt highly gratified when examining the reports of these four weeks. The more enthusiastic members of the trade are making big predictions as to what the year 1916 will show, and in view of the experience of other years, it is a question if they are so far out in their reckoning. One dealer in speaking of the month's business said it exceeded the entire year's business of four or five years ago, which is some showing, and indicates, too, what the growth is under normal conditions.

Grand Opera Helps Sales

The presence of the Metropolitan Opera Company in Boston for a period of three weeks has accentuated the sale of the records of the prominent operatic stars. The windows of such stores as the Eastern, the Columbia, the Ditson Co. and others are filled with pictures, literature and records all bearing on grand opera and to the uninitiated it is interesting to note the increased sales as an operatic season draws near. These windows are attracting much attention and not an hour of the day passes that there are not crowds renewing acquaintance with the faces of operatic celebrities with whom they are most familiar.

That Talking Machine Club

When one starts to discuss the Boston Talking Machine Club, so enthusiastically born back last October, one must first ask where is it? What has become of it? So far as any activity is concerned it is no more than a name or a memory. Month after month the leaders have tried to arouse an interest in a dinner, but to no purpose; they are not even able to assemble a reasonable number of men for a meeting. Similarly the bowling teams have passed out of existence, for, after a month or two the men lost interest. From the outset the burden of work fell on a few men who were anxious to see the organization succeed and be a recognized factor in the business the same as other trade organizations; but their good intentions have met with discouragement. Now there is an attempt being made to get the boys together for a summer outing, to take place possibly on June 17, and some are even talking of a baseball team to play Saturday afternoons. We'll see!

Joins the Columbia Co. Force

One of the conspicuous additions to the Boston business at this time is Walter S. Gray, who comes here from the Pacific Coast, where he has been located for several years, to join the Columbia Graphophone Co.'s force. He will be connected with the wholesale department and will in every way prove a distinct addition to the company's Boston headquarters, for he is a capable man, possessed of much business tact and a fine personality. Mr. Gray at one time was manager for the Columbia concern at Detroit and he has also traveled in China and Japan making records for the house. While on the Pacific Coast he was in charge of the Columbia exhibit at the fair. He has long had a desire to get into the New England territory, as he has felt that in this section there is a distinct appreciation of music which the Columbia Co. is able to foster and encourage through its products in a most substantial manner.

Steady Advance in Business

Business at the Eastern Talking Machine Co.'s headquarters in Tremont street is showing a great advance week by week and every one of the staff puts in a busy day attending to the wants of customers. Manager Billy Fitzgerald of the wholesale department is preparing for a busy several months and the only spectre that looms up at the present time is his inability to get sufficient goods to supply the demand for Victor outfits. The Eastern has lately put in a complete list of foreign records.

Attended Anniversary Celebration

Frederick H. Silliman, manager of the Boston headquarters of the Pardee-Ellenberger Co., Inc., spent a few days in Maine the early part of the month. Mr. Silliman, with L. H. Ripley and Guy R. Coner, went down to New Haven the latter part of March for the anniversary celebration of the opening of the Pardee-Ellenberger Co.'s store in that city, when a feature of the occasion was a fine dinner tendered by the members of the firm.

W. A. Bragdon is one of the latest additions to the Boston force of the Pardee-Ellenberger Co. He is in the shipping department.

In Charge of Record Department

At the Boylston street warerooms of the Vocalion Co., Miss L. Woodman is now in charge of the Columbia record department, these being the discs which the Vocalion Co. is using for demonstration purposes. Miss Woodman formerly was assistant to Manager Mason of the talking machine department of the Gilchrist Co.

Install Tasteful Demonstration Booths

Charles S. Norris, of 181 Tremont street, who conducts one of the large retail piano warerooms of the city, and who is one of the latest to become a Columbia dealer, has had a series of tasteful demonstration booths installed on the ground floor, which are proving of great value, as the Columbia business of the house is rapidly growing. A feature that is attracting much attention these days is the playing by a young man on an upright and sometimes on a banjo, to the accompaniment of a Columbia graphophone. He has a conspicuous place in the junction of two windows, one of which is open and the sound carries quite a distance and attracts a large and interested crowd.

Arrange Attractive Department

Business in Victor and Edison equipments at the warerooms of George Lincoln Parker, is making a rapid growth with the advent of spring and lately there have been some good sales made by Manager John Alsen and his hustling staff. With the new rearrangement of the suite of rooms a larger state of efficiency is now obtained in all departments of the business.

Congratulations on Promotion

Manager Arthur C. Erisman, of the Columbia Graphophone Co., is being congratulated on all sides for the honor which has come to him in his promotion to the post of district manager of New England, for it is felt that this is a deserved recognition of one of the company's most faithful and efficient employes. This appointment does not mean that Mr. Erisman gives up his present offices, but his duties henceforth will be more defined and of a somewhat different character. He will make occasional trips into the New England field, but his idea is that the best results can be obtained by summoning the outside men to the Boston office for conference, and in coming here they will get into that atmosphere of business efficiency and hustle and economy of time in which Manager Erisman's staff has been so well educated.

Proves Big Drawing Card

The opening of a downtown office for the big "Elijah" performance on the Braves' Field on May 28, at the headquarters of the Eastern Talking Machine Co., has helped to draw a large number of persons and to acquaint them with what the warerooms have to offer in the way of complete Victor outfits. The manager of this big out-door performance is Sam Kronberg, but

The tremendous prestige resulting from the huge artistic campaign for "Re-created music" means a selling power to you that can't help but increase your business.

The Edison Diamond Disc Phonographs mean good music luxury. We are "Exclusively Edison"

THE PARDEE-ELLENBERGER CO., INC.

26 Oliver Street

NEW HAVEN, CONN.
104 State Street

many of the details have been turned over to George Spaulding, who has had some valuable experience with the Boston Opera Company in a publicity way during its last two seasons at the Boston Opera House. Mr. Spaulding has a lot of hustle and is able to be of vast assistance to Mr. Kronberg.

Some Changes in Columbia Staff

There have been some changes in the Columbia Graphophone Co.'s staff which will add to the general efficiency. Miss Pearl Perrett is now outside demonstrating and this week she is at the store of the C. T. Sherer Co., at Worcester. Miss S. E. Nugent has been added to the stenographic force and Miss M. A. McMahon is a new billing clerk. Miss Violet Sanders will take care of the work formerly performed by Miss Margaret Collins, who has been advanced to the position of private secretary to Manager Erisman. her promotion being well earned because of faithful and intelligent attention to business and her general knowledge of it.

Unusual Order for Saskatchewan

Rather an unusual order came to Manager Wallace L. Currier, of the Edison and Victor departments of Chickering & Sons a few days ago. It was for a Victrola to be sent to Outlook, Saskatchewan, B. C., which is about 2,500 miles northwest of Boston. The purchaser was Philip Hood, of the Bank of Montreal, at Outlook. The machine already is on its way and should reach its destination in ten days. Manager Currier reports that the March business showed a large increase over March of last year, and the indications are good for a busy spring trade.

Takes Charge in Manchester

Leroy Webber, who has been associated with the wholesale end of the Columbia Co.'s Boston warerooms, has gone to Manchester, N. H., where he is manager of James A. Scully's talking machine store.

Joins the Traveling Force

E. A. Welch, who has been connected with the retail staff of the Eastern Co., has become a traveling man and is now in the New England field, working in co-operation with William Weale.

Our Noted Visitors

Caruso and Amato, star singers of the Metropolitan Opera Company, dropped in to the Eastern Co.'s warerooms a few days ago and listened to some of their own records.

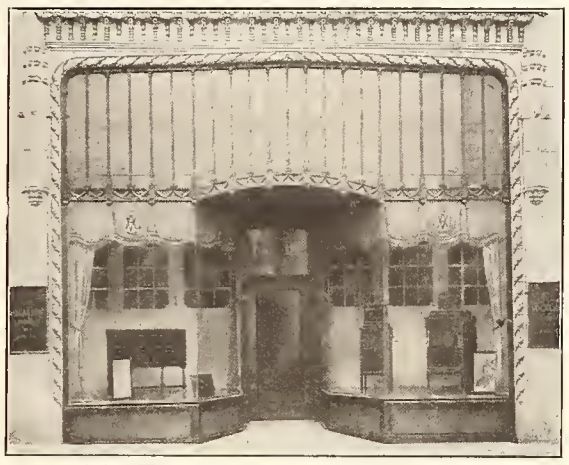
Oliver Ditson Co. Activity

Victor business at the Oliver Ditson Co. is showing some handsome gains these days and Manager Henry A. Winkelman is consequently well pleased. Next month there should be an interesting announcement to make concerning this large house.

VOCALION CO. MEETS WITH SUCCESS IN BOSTON STORE

Double the Amount of Anticipated Business Has Been Done in the First Two Months in the New Store on Boylston Street—A Description of the Headquarters

BOSTON, MASS., April 3.—Success seems to have crowned the efforts of the Vocalion Co. from the very start. When the house opened its doors at 190-192 Boylston street, the officers set a certain amount of business that it expected to do during the first month, during the first three months, and for the first whole year. The staff of employes were imbued with the ideas of their superiors and busily set themselves to work to make good the first month, and to find the place that the Vocalion Co. should occupy in Boston. That the company has made good goes without saying, and the statement was made to The World representative to-day



Main Entrance on Boylston Street.

that the business for the first two months was more than 100 per cent. beyond what had been expected, which is certainly going some for a house that had to make its own place in the talking machine business of this city.

Interior of Ground Floor.

There are many factors that contribute to the success of the Vocalion Co. First it has an instrument whose virtues now need no heralding and this of itself is something that the public has not been slow to recognize. Secondly the management was wise in selecting the location it did, for it is central to everything and on a well-traveled thoroughfare, the Fifth avenue of Boston, one might say. Thirdly in R. S

Demonstration Parlor on Mezzanine Floor.

Hibshman, the president and general manager and J. F. Meade, the treasurer, the company has secured two intelligent, wide-awake and progressive men to steer the Vocalion craft to suc-

The Park Square Entrance.

cess, and one must not overlook the staff of salesmen who have been carefully selected because of their knowledge of the business and their knowledge of human nature.

CLEVER EDISON EXPLOITATION

How the Visit of Mayo and Tally to Los Angeles Was Utilized by Barker Bros. to Demonstrate Edison Re-Creation

Los Angeles, Cal., April 5.—While the popular Empire Theatre quartet was filling an engagement at the Orpheum Theatre, this city, recently, Barker Bros., prominent talking machine and

Emphasizing the Edison Tone

Right to Left: J. W. Boothe, Manager Phonograph Department, Barker Bros.; Harry Tally; A. D. Smith, Advertising Manager; Harry Mayo, R. E. Daynes and Dave Doughty, Salesmen.

piano house, local representative for the Edison Diamond Disc phonographs, took advantage of the opportunity to have Harry Mayo and Harry Tally, of the quartet, appear at this store and demonstrate personally the manner in which their voices have been re-created by the Edison method. The selection used in the demonstration was "At the Ball, That's All."

In connection with the appearance of the quartet at the Orpheum, Barker Bros. carried large advertisements in the newspapers calling the attention of the public to the singing of Messrs. Mayo and Tally at the Orpheum and the manner in which their voices were re-created in the Edison discs.

The accompanying photograph shows Harry Mayo with his arm on the Edison phonograph discussing with Manager Boothe of the Barker Bros. department, the tone-reproducing powers of Mr. Edison's invention. Standing next to Mr. Boothe, with his arm also on the machine, is shown Mr. Tally.

NEW PATHE JOBBER IN MINNEAPOLIS

Northwest Pathephone Co. Incorporated in That City with Mayor at Its Head—Opera Recitals Given at Talking Machine Shop—Columbia Co. Branch Makes Good Record

St. Paul and Minneapolis, Minn., April 5.—If the talking machine dealers of the Northwest were offered any more business than they are getting they would worry, mainly because they can't even now get the goods that they want. General reports among the older dealers are to the effect that the volume of sales is fully fifty per cent. higher than normally is the case at this time of the year. This goes also for the jobbing houses which report excellent business.

A new jobbing house was launched in Minneapolis by the incorporation of the Northwest Pathephone Co. last week. The incorporators are W. W. Dunn, George M. Nye and W. G. Nye, the former Mayor of Minneapolis. The two first named have been operating a retail Pathe shop at 921 Nicollet avenue and will do a general jobbing trade from the same place. The new concern will be capitalized at $100,000, and will establish connections in all parts of the Northwest. A Pathe store in St. Paul is one of the first objects in view.

The entire opera of "Faust" was given by Archie Matheis at his Thursday recital at the Talking Machine Shop. Mr. Matheis, who has developed into a suave and pleasing lecturer, makes a running talk on the opera as the play progresses. "Faust" undoubtedly will be called for again.

Manager Souders of the Columbia Graphophone Co.'s Northwestern headquarters is somewhat elated over the fact that Minneapolis ranked next to New York and Chicago in the amount of dictaphone business in thirty-five cities. The company has transferred its St. Paul office from 17 East Seventh street, where the old retail store was located until taken over by the Emporium, to 137 Endicott Arcade. H. R. Peterson is the local manager.

The Beckwith-O'Neill Co., which supplies the Northwestern dealers with Victrolas, has just one complaint and only one—it can't get enough goods.

Excellent business is reported by the Minnesota Phonograph Co., jobbing in the Edison lines. The totals for each month of 1916 are declared to be far in excess of the 1915 and 1914 figures.

The Oster Bros. Furniture Co., of Birmingham, Ala., will devote a large space to a display of Columbia Graphonolas and records.

Building of the Ditson Company at Boston

DITSON VICTOR SERVICE

The name "Ditson" means music. Music means Ditson. Over 75 years of association with the retail trade of this country give us a knowledge of conditions that is of help to you.

Ditson Victor Service stands foremost in the East. It is for the small dealer, particularly, that we desire most to help, but the small man of to-day soon grows, with intelligent help, to the big man of to-morrow. On our books are many dealers who formerly bought in lots of hundreds and now buy in thousands.

We furnish a complete line of musical instruments, from Accordeons to Zithers, and Books of Music and Sheet Music.

RECITALS HELP CLEVELAND TRADE

Appearance of McCormack, Hempel, Ober and Other Artists Followed by Big Record Sales —Shortage of Stock Still Apparent—Various Concerns Make Excellent Trade Reports

CLEVELAND, O., April 4.—Every one connected with the talking machine trade in this city is well satisfied with the unusual activity displayed at this season of the year. The industry has broadened materially and although up to a short time ago only one or two makes of talking machines had the preference now at least five distinct varieties enjoy popularity. March has proven a phenomenal month in many ways and only for the shortage of goods there would have been even a better showing. The record trade has been stimulated through the recent appearance of such artists as John McCormack, Margarete Matzenauer, Frieda Hempel and Margarete Ober.

The Eclipse Musical Co., exclusive Victor jobbers, reports a very substantial increase over the same month last year, despite the fact that there has been a tremendous shortage on Victrolas from the $75 model up. T. H. Towell, president of the company, just returned from a week's visit to the Victor factory.

The William Taylor & Sons Co., Victrola and Grafonola department under the management of T. A. Davies, has enjoyed one of the largest month's business in the history of the department, being over 100 per cent. in excess of that of last year. The numerous Unico booths handsomely furnished and surrounded by works of art make the department one of the most attractive in the city.

W. G. Bowie, manager of the talking machine department of the B. Dreher's Sons Co., reports excellent success with their two lines, i. e. the Grafonola and the Aeolian-Vocalion. There has been such a rush on Vocalions that the company has received numerous shipments by express.

The Columbia Graphophone Co., according to Manager Madson, has had an excellent month's business. The Columbia Music Shoppe, under E. E. Gott, the former automobile man, has been opened in the exclusive Lakewood residential section. A beautiful Grafonola department has also been opened in the store of the Robert Young Furniture Co. The Columbia Co. now has over 150 dealers in Northern Ohio.

The J. T. Wamelink & Sons Piano Co., Columbia dealers, report an unusually large record sale. G. E. Morton, manager of the Grafonola department of the G. M. Ott Piano Mfg. Co., reports that he is devoting most of his efforts to the electric Grafonolas with great success.

The Phonograph Co., of this city, jobbers of the Edison Diamond Disc phonographs, has continued its tone-test recitals and has had excellent success. Over twenty tone-test recitals have been given recently and the principals in these tests were Madam Marie Kaiser, vocalist, and Alexander Bond, violinst. All these exhibitions were given to capacity houses and very pleasing results have materialized from them.

The Diamond Disc Talking Machine Co., located in the east end of Cleveland, reports business equal to the preceding month. The company is dealer exclusively for the Edison Diamond Disc phonograph, and Manager E. A. Friedlander, formerly manager of the Bailey Co., of this city, is well pleased over the results thus far attained.

The Harmony Music Shoppe Co., dealers in the Victrola, has added two new and beautiful booths and is amply equipped to take care of the increasing demands.

According to Manager Phil A. Dorn, of the Collister & Sayle Co., the Victrola business has been very good and a very heavy demand has prevailed for the new Marimbo band records.

Harry J. Drumm, special representative of the Unit Construction Co., Philadelphia, was in the city. He has taken many orders for the Unico demonstration booths.

The May Co.'s Victrola department built a considerable number of booths a year ago to take care of the large business transacted at that time, but the business has increased to such an extent that the department needs more room to accommodate the increasing demands.

Manager C. H. Johnstone, of the Stearn & Co. Pathephone department, says that March was the largest month's business since the department was opened last October.

HAS ANTIQUE TALKING MACHINE

Edison Phonograph, Made in 1878, Is Hand-Operated and Uses Record of Tinfoil.

FAIRFIELD, IA., April 10.—James F. Wilson, Jr., has a rare relic in the nature of a phonograph. It was purchased from the Edison concern in 1878 by Mr. Wilson's father, the late Senator J. F. Wilson.

The bill of sale is with it and shows that the machine is No. 11 and was called the "Edison Speaking Phonograph." It is about as heavy as a letter press and not quite so large. It looks like a handy household grindstone. Iron and steel must have been cheap in those days and the instrument looks as if it might be dropped out a second-story window without great injury.

The solid steel cylinder is about two inches wide and five in diameter. On this the owner pasted a certain kind of tinfoil, smoothly and carefully. This cylinder is turned by a hand crank while some one talked into the megaphone receiver. When the "record" was completed the operator ground out the message. Mr. Wilson well remembers the machine in operation and states that it produced a remarkably good record, considering the crudity of the machine and the reproducing apparatus.

Records could not be preserved and interchanged, for they were easily destroyed in taking them off from the cylinder. Mr. Wilson is in communication with the Edison concern in order to see if they are interested in preserving the old relic.

DETROIT TRADE STOCKING UP

Talking Machine Men Taking No Chances with Possible Future Shortage of Goods—Local Association Progressing Rapidly—New Concerns Enter the Field and Old Ones Grow

DETROIT, MICH., April 5.—The general situation in the talking-machine trade in Detroit and vicinity is unusually satisfactory and in the majority of cases the business handled by the distributors and dealers in all leading lines is limited only by their ability to secure sufficient stock from the factories, particularly in the matter of machines.

The local talking-machine men who have visited the factories recently have been much impressed with the volume of orders flowing in from all sections of the country and have, in consequence, been inclined to order liberally themselves, in order to prepare for the future.

E. K. Andrew, manager of the talking-machine department of the J. L. Hudson Co., returned April 3 from a week's trip to New York, Camden, N. J., and Philadelphia. While at the Victor factory, he placed a good-sized order for the Hudson concern—sufficient to take care of a good portion of his business until September, and in July will place another order for fall delivery.

At the local Columbia branch Manager Mills says the first three months were the greatest the branch has ever had, including holiday months. He set a high figure for March—and beat it.

At the Pathé headquarters for the State, Manager Harry Shea says that every month shows improvement and that general business is way beyond expectations. Of course, the prosperity of Detroit and of Michigan has something to do with making the talking-machine business so prosperous, although traveling representatives through here lately say that the same percentage of increase applies to every part of the country.

The talking-machine dealers who were members of the Detroit Music Trades Association have withdrawn feeling that membership there was really unnecessary in view of the fact that they now have their own exclusive organization, and not wanting to pay two membership fees. The talking-machine men met March 14 at the Hotel Cadillac with an attendance of thirty-five. Many new applications for affiliation with the organization were reported. The topic discussed was that of charging interest, the outcome being the appointment of a special committee to think it over and report at the April session. The general sentiment exists that to charge interest is a good thing and the right thing to do, but there is some opposition from some of the smaller dealers in the outskirts who naturally feel that they can't do business exactly on the same lines as the down-town dealers, most of whom have unlimited financial backing. A vote was taken and resulted in three to one in favor of charging interest.

Clarence L. Price, special representative of the Victor Talking Machine Co., was a March visitor among local dealers.

Mandel Bros. is a new concern in Benton Harbor, Mich., manufacturing talking machines. The first order was for 1,000 machines, which will be delivered soon. Fifty cabinet-makers are employed.

The Goldberg Phonograph Store, 167 Gratiot avenue, Detroit, held its "spring opening" last month and it was largely attended. This firm handles more foreign records than any store in the State. The store is open evenings to accommodate its large foreign trade. Both Victrolas and Grafonolas are handled.

There is some talk of the Rudolph Wurlitzer Co. opening a large store in Detroit to handle everything from small goods to pianos and talking machines for retail trade.

Crowley, Milner Co., Detroit, has a new talking machine department on the second floor; it is much larger than formerly, and enables this department store to carry more stock than ever.

Frank Bayley, Edison dealer, 11 Witherell street, will move sometime in May, to a new location, which may be permanent, as he has not definitely closed with the firm which plans a new building on the present site. He is endeavoring to keep as close to Woodward avenue and Grand Circus Park as possible.

Max Strasburg will give up his store at Library and Grand River avenues, Detroit, sometime in April, and will thereafter do all business at his new store at 74 Library avenue, which is considerably larger and where the rent is considerably less—despite its being just as good a location.

Robert Barclay, for the past eighteen months in charge of the talking machine department at the J. Henry Ling store, Detroit, has resigned to engage in the real estate business.

Harry C. Shea, of the Pathephone Shop, Detroit, says he is doing very little approval business—does not encourage it—nor has he sold a single instrument at less than the list price.

Gordon Kilmer, 718 Dix avenue, Detroit, the Alma Music Store, Alma, and the Almendinger Music Store in Ann Arbor, are now Pathé dealers in Michigan.

Harry Zickel, of the Cable Piano Co., Detroit, predicts a big future for the electric operated machine—if not soon surely before another two years—and particularly for high-class trade.

H. E. Russell, formerly with the American Phonograph Co., now out of business, has been appointed road ambassador for the Pathephone Co. of Detroit.

Sidney J. Guest, 541 Dix avenue, Detroit, handling Columbia machines, reports a big increase in trade since the theatre in his block opened for business. It is a large house seating 1,500 and is bringing a lot of people to his store.

The Goodfellowship Club, of Grinnell Bros., Detroit, held a smoker at the Alt Heidelberg, Wednesday evening, April 5th.

Grinnell Bros. are giving a series of recitals before lodges, clubs, societies and fraternal organizations in charge of Henry Schumann Heink, son of the famous singer. At these recitals the Duo Art pianola and the Victrola are used. At a recital given before a literary German society on March 31, several selections by his mother were played.

The Cable Piano store, Detroit, has been considerably enlarged on the first floor by building a mezzanine over the top of the present salesrooms, to be used for storing talking machines.

PATHÉ DISTRIBUTORS

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., April 7.—The time seems to have passed when you find the talking machine dealer bubbling over with enthusiasm as he is handed the slip by his bookkeeper showing him the big advance in his business over the previous year. He has had this experience so often that the novelty has worn off, and he is now taking it as a matter of fact, and would be visibly disappointed were it not so.

The month of March in Philadelphia brought to the talking machine dealers business limited to the capacity or ability of the manufacturers to furnish material with which to work. There has been a great shortage of machines and the jobbers and retailers were only able to supply a portion of the demand. Many of the jobbers are holding standing orders for machines, and it is the retailer who places such an order and stands close to the jobbers who can hope to get his wants satisfied to at least a reasonable degree.

There will be two important moves in Philadelphia during the present month. The Louis Buehn Co. will occupy the store at 835 Arch street on or before the first of May, and the Pennsylvania Talking Machine Co. will separate its wholesale business from the retail, and move its wholesale end the coming week to 210-212-214 North Broad street.

The Louis Buehn Co. is at present located at 825 Arch street, so it will not have far to move, but in its new home it will occupy three of the floors, which are 25 by 150 feet, and this will give double the floor space of the present building. This will undoubtedly be the largest amount of floor space in Philadelphia given over to the wholesaling of talking machines. The business of this firm has grown so rapidly within the past year that it found this move absolutely necessary.

The business of the Buehn firm was exceptionally good in March and this is attributed to the fact that it has been able to fill orders in such good shape. Mr. Buehn states: "Unsolicited orders are coming in somewhat in excess of the quantity of machines that we are receiving from the factory."

The Buehn record stock is in very good shape, but in its present quarters it has been somewhat hampered in the handling of this stock. The new quarters are being fixed up in the most modern way with every known appliance to facilitate business, and Mr. Buehn will institute several innovations of his own.

The Talking Machine Co. recently removed its West Philadelphia store from the southeast corner of Fifty-second and Chestnut streets to the northeast corner, where it has a much more attractive-looking store.

William F. Lamb, the Pottstown, Pa., dealer in talking machines, was here the past week. He reports that he has made extensive plans for the enlargement of his department and will install several extra booths.

T. Connelly, the Philadelphia dealer at 2633 Girard avenue, is having a number of extra booths placed in his store at present.

The Penn Phonograph Department reports that the past March was by far the biggest March that the firm has ever had, and that orders are coming in just the same as they did before Christmas. The Penn Co. is much elated over the outlook and believes it will have a heavy spring business, and only hopes the Victor factory will be able to keep it sufficiently supplied to handle it. Harry Miller has just returned from a two weeks' trip to Bermuda, and reports having had a most delightful time. The Penn Co. reports that its record business has increased very much over last year in March.

Walter L. Eckhardt, the head of the Pennsylvania Talking Machine Co., reports that business has been keeping up wonderfully well, and progress is only stopped when the amount of goods is exhausted. The company is promised much better conditions in the very near future. The firm will disassociate its wholesale business from its retail, and will move the former to North Broad street, where it has fitted up large and commodious warerooms for the handling of practically an unlimited amount of stock.

In its new wholesale building the firm will have 13,000 square feet of floor space, which will be devoted exclusively to the stock and storage of all the current types of machines and records. The retail business will be continued at 1109 Chestnut street. Mr. Eckhardt will eventually have his permanent office at the wholesale store.

The Pennsylvania Talking Machine Co. has had its territory extended down to and including Florida. Thus this firm will control the sales in every State along the Atlantic Coast up to New Jersey and as far West as the Mississippi.

The past week the firm were favored by a visit from James P. Bradt, general sales manager of the Columbia; W. C. Fuhri, United States manager, and H. L. Willson, assistant general manager. Mr. Eckhardt has just completed the moving of his Baltimore store from its former location on Howard street to 111 German street, and he has been devoting much attention to the Washington office and territory and to the Atlanta office and territory.

The wholesale department in Philadelphia is now booking orders for summer delivery, and

Pen Your Victor Orders to Penn

There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

Penn Phonograph Co., Philadelphia

1864—ESTABLISHED OVER HALF A CENTURY—1916

VICTOR DEALERS

Send your orders for Victor Records to

WEYMANN

for the best Victor Service in the East

We are now booking orders for Victrolas,
all types, for early deliveries.
May we serve you?

WEYMANN & SON, Inc.

VICTOR DISTRIBUTORS

1010 Chestnut Street Philadelphia, Pa.

We Are Filling Record Orders Practically 100 Per Cent.

BLOCK SIGNALS PROTECT YOUR INTERests when you use Buehn Service. Several high priced experts watch the incoming and outgoing freights with the surveillance of detectives. They work with a knowledge that has been obtained from study and experience, and automatic signals co-operate with them so that tabs reading "out of stock" are seldom utilized.

Speaking from an elementary standpoint, it stands to reason that if we are seldom out of machines and records, that your chances are BETTER of obtaining the machine models and records that you need for your profits. We care for our stock in rather an expensive way, but this extra cost is more than offset by SHIPPING goods when you want them.

The only profit that we can make is on the goods shipped; you can't make any money unless you have the goods, so while the extra expense paid for insuring our stocks may be above the average, we more than offset the expenditure by receiving profits on merchandise that we might not otherwise be able to deliver. This policy helps us both.

Buehn Victor Service in distributing circles is the Pennsylvania of railroad achievement. Again we say: "The proof of the service is in the filling." Why not look over your record stock this afternoon and send us a list of those "you want but cannot get"? Buehn Service will give you a surprise.

THE LOUIS BUEHN CO.

Record orders are now being better filled than for several months.
Shipments from the Victor Co. have made it possible for us to fill some orders as well as 90 per cent Orders for Supplies and Repair parts filled promptly and correctly.

Test us with any size of order—small or large—so you can see that Buehn Victor Service means co-operation that is modern in every characteristic.

We will guarantee a larger percentage than any other jobber.

Philadelphia's Exclusive WHOLESALE Victor Distributor

THE TRADE IN PHILADELPHIA

(*Continued from page* 20.)

from the present aspect of the business dealers will be wise to have their orders booked in advance in order to protect themselves against the same conditions as existed last fall.

The Dictaphone business of the Pennsylvania Co. has shown a fine increase in March, when the firm got a star quota, and five of its salesmen made the quota. It has been doing such a heavy business that it has found some difficulty in getting machines sufficiently fast to supply the demand. It had a fine display at the recent Business Men's Show, and secured much new business and closed a number of accounts upon which they had been working for some time. Manager J. D. Westervelt has been in Harrisburg several days this week.

Among some of the largest orders received by the Dictaphone department in March were: H. K. Mulford Co., Electric Storage Battery Co., R. M. Hollingshead, Camden; the Notaseam Hosiery Co., the Link Belt Co. and the Travelers' Insurance Co., all of which added a number of machines to those already installed, and the biggest orders among new firms were given by Frank Winnie & Sons, the Hungerford Brass & Copper Co., McIlvaine Bros., drugs; F. J. Stokes, chemical engineer; the Ferracut Machine Co., Bridgeton, N. J.; the Lee Tire & Rubber Co., Rayner & Parker, lumber merchants; the Lower Merion Realty Co., and many others. Among the visitors to the Dictaphone offices the past week were Frank Dorian and N. F. Milnor, general sales manager.

H. A. Weymann & Sons have found that the recent literature with which they have kept their trade informed, has been of very great advantage to them. They have cautioned the dealers regarding the ordering of records and they have responded nobly. They have had many evidences of the shortage of goods at some of the houses through letters of praise for the prompt way the Weymann's have been filling their orders almost to 100 per cent. One of these letters from a big retailer noted that he had sent them an order for twenty-four different records that he had been unable to obtain, and was amazed to find that they were able to supply eighteen of them, while he had duplicated the order to another one of the largest dealers, and was able to get only nine records of the lot requested.

The Weymann's have not only found their wholesale business most satisfactory, but also note a big increase in their retail business.

Blake & Burkart enjoyed in March a most satisfactory business on the Edison and they tell me that all of the Edison dealers in Philadelphia have been doing very well, and especially N. Stetson & Co. The new room of the firm has been handsomely papered and decorated and is quite a show place. While their business has been so heavy of late that they have been unable to give any special invitation concerts, they have been having a number of private demonstrations about the city which have been bringing them very good results. Their business is way ahead of what they had ever anticipated, and their factory has been keeping them pretty well supplied with stock. They have less to complain about as to this in the month of March than during the previous two months of the year.

SPALDING'S TRIBUTE TO EDISON

Noted Violinist Tells of the Successful Re-creation of the Tones of His Violin by Means of the Edison Diamond Disc Phonograph

Albert Spalding, the noted violinist and exclusive Edison artist, in a recent interview, had the following interesting remarks to make regarding Edison's re-creation of his playing. Mr. Spalding states:

"Which record do I like the best? I always like best the next one I am going to do. But that's too general. For tonal qualities, for what I find of myself in the record, my favorite is the 'Serenade Meláncolique' (No. 82,067), by Tschaikowsky. This is the one that gives me the most pleasure. And I am very fond of the 'Ave Maria' I made with Madame Marie Rappold.

"I have noticed that Mr. Edison claims to re-create music instead of reproducing it. I will say frankly, the Edison is the only phonograph that makes a violin sound like a violin. Others seem to give a violin the sound of a wind instrument.

"Your tone tests are wonderful. While I have never actually gone tone testing on the road, I have many times played in comparison with my records with really astonishing results. Even my friends noticed the striking fidelity of the tone of the Diamond Disc to the tone of my violin.

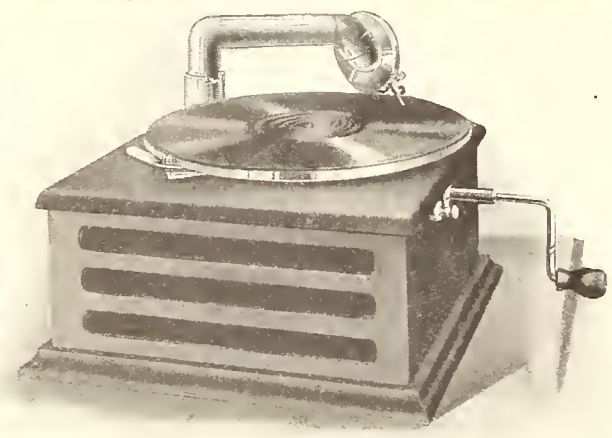
"My violin is a very famous one. It is a Guarnerius del Genu and about one hundred years old and beautifully preserved. It has both the mellowness of age and the fresh tone of a young violin. It is with this violin that I make all of my records for the Diamond Disc. Some times this old violin actually surprises me. I get to wondering where the beauty, the richness and the charm of its tone all come from. It seems so wonderful—and it is wonderful to think of the music that sleeps in a violin."

H. A. Riker is now manager of the talking machine department of the Spring-Holzwarth Co., a big department store of Alliance, O. The department handles the Aeolian-Vocalion and Columbia Grafonola.

Otto J. Bober, of Eau Claire, Wis., is preparing to remodel his store. A room will be added at the rear of his present place of business for the display of Pathé phonographs.

Adolph Lasus, of New Rochelle, N. Y., recently divided his talking machine department from his bicycle and sporting goods department, and now has an up-to-date and attractive talking machine shop.

The Hood & Wheeler Furniture Co., Birmingham, Ala., has added a talking machine department to its business.



"WONDER" No. 2
Price $7.50
Equipped with Universal Tone Arm and Sound Box.
Colonial Mahogany Finished Cabinet. Size 5½x12x12

An Invitation

It will be a pleasure for the sales and factory heads of our company to show our factory to any member of the trade who may be interested in the manufacture of talking machine motors.

The views shown in the accompanying pages form only a very small percentage of the unique and highly instructive phases of motor manufacture. In this factory may be found new types of special machines which I believe can be found in no other factory, and from one end of the plant to the other efficiency and quality of production are the keynotes of our efforts.

We are naturally well pleased with the success of the Heineman "Motor of Quality." Although we have been only engaged in the talking machine business for the past two years in this country, it is gratifying to note that our products have already achieved signal distinction in the talking machine field.

We are always willing to learn, and if any of our friends in the trade, after reading the accompanying story, has any suggestions to make regarding any phase of the motor manufacturing business, they will be accorded careful consideration and attention.

Otto Heineman
President

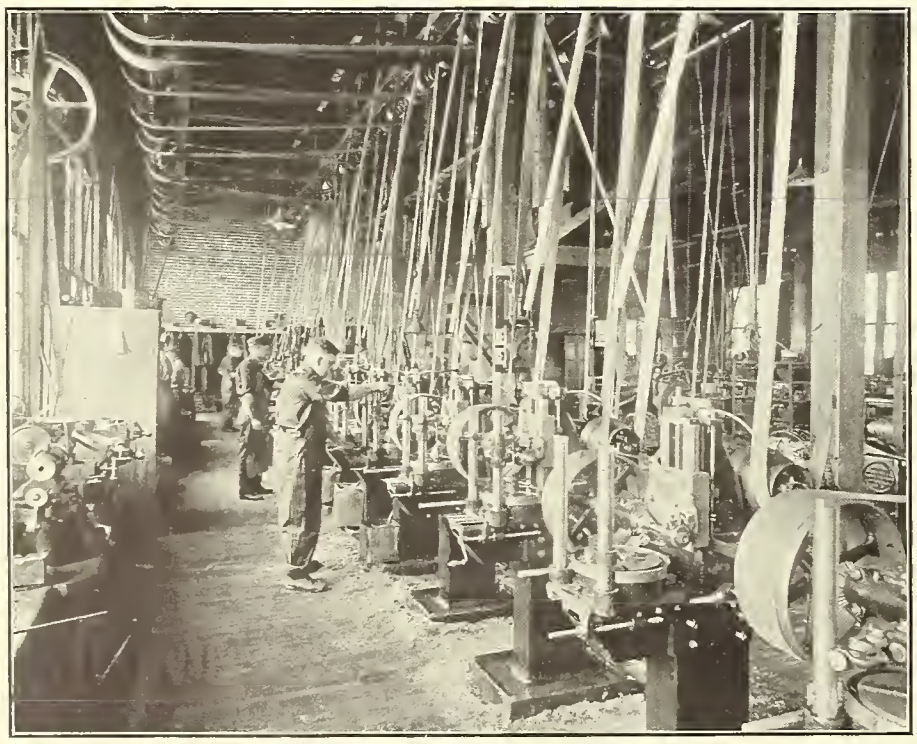
Making Phonograph Motors and Part

A description of the manufacturing of a full line of high-grade talking machine motors and accessories from the raw material in the Heineman American factory is both interesting and instructive. Modern American

Punch Press Department.

methods are closely adhered to in the effort to produce a high-grade product in large quantities.

The first principle of the American manufacturing method is interchangeability, which can be obtained in no other way than by employing the most modern machinery and factory methods. There has been rapid progress in the development of machines and tools during the recent years that has revolutionized many industries. For example, the American-made watch is



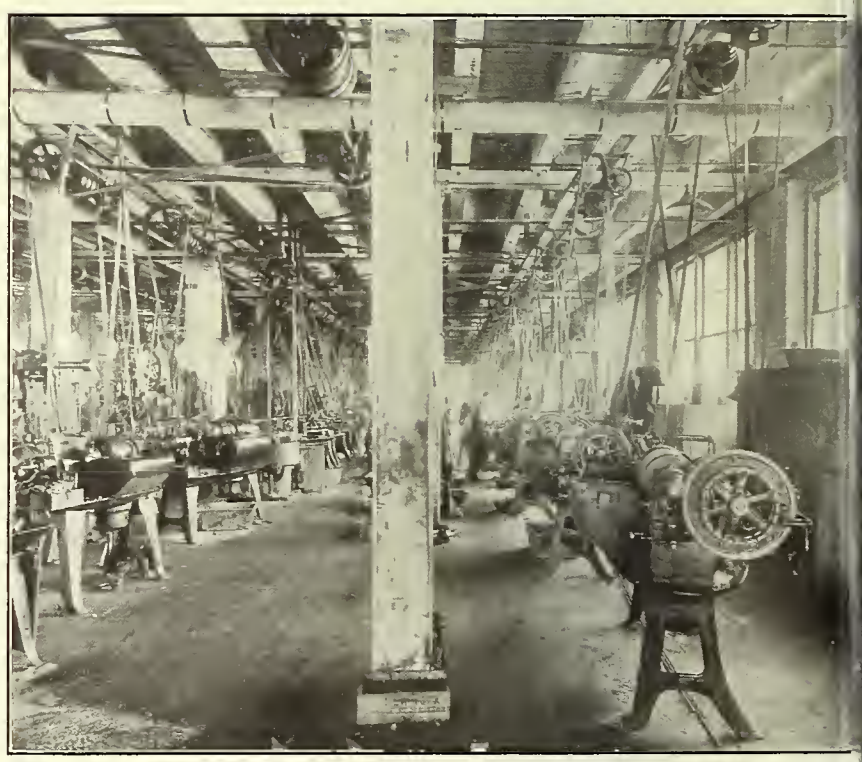
Automatic Gear Cutting Machines.

both reliable and its parts are all interchangeable. The there is the wonderful automobile of to-day, a produ of interchangeable factory methods, produced by th latest and most highly developed machines and tools.

It is natural that American-made talking machir motors and other mechanical parts must be made b similar factory methods to be produced in larg quantities and enjoy the scheme of interchangeabilit

To the skilled mechanic, as well as the uninitiate a superficial examination of a Heineman "Motor c Quality" would fail to indicate the many factor operations and progressive methods which combine t the smoothness of operation and reliability. Also, hasty trip through the Heineman factory would fail t show the fineness of the methods employed.

It is the correct sequence of machining operation extreme accuracy of manufacture, where such accurac



Automatic Screw Machines.

is necessary, and the proper selection of materials tha make these talking machine products successful.

Following the raw material, steel, brass, bronze etc., from the Stockroom through the Heineman factor is indeed interesting, and shows the extensiveness of a plant devoted to this industry.

In the Punch Press Department will be seen long rows of presses, making—from sheet metal—moto frames, gear blanks, spring barrels, turntables and eve the delicate parts of a sound box. One operation afte another, these parts progress until they are ready fo the finish or assembly in the completed apparatus.

A companion department, employing rods instead of sheet metal, is without doubt the most interesting ir the factory. Here are long rows of automatic screw machines taking the rods in long lengths and producing

he Heineman American Factory,

By
Ray H. Manson
Chief Engineer

most complicated pieces nearly finished for use.

One of the most important machine operations on onographs is the cutting of the teeth in gears and ion. The correct design of gear teeth and the iformity of the cutting are paramount features. ecial machines are used in the Heineman factory for s gear cutting. The teeth are formed by "gener- ng" methods so that they will roll together freely and thout noise.

Accuracy of mounting the gears, pinions and speed- gulating governors, as well as all other rotating parts spring motors, requires the use of watch makers' hes of precision, and the checking of important mensions by means of micrometer calipers that gauge the fraction of one-thousandth of an inch.

In addition to the foregoing, are the departments voted to drilling, where the work goes into what is

Conference of Sales and Factory Heads.

t to Right: W. C. Strong, Factory Manager; Sidney Beyland, Assistant Chief Engi- r; Paul L. Baerwald, Eastern Sales Manager; Ray H. Manson, Chief Engineer; S. A. Ribolla, Central West Sales Manager.

alled "jig," which latter is provided with hard steel ushings which make the drilled holes come in the same positions in all like parts. Many of these drilling achines are of special design with multiple spindles, which make it possible to drill all of the holes in one iece at the same time. Here speed is coupled with ccuracy.

The mere drilling operations, however, are not ufficiently accurate for these spring motors, so reaming perations finish the holes to micrometer size and assure nterchangeability with quiet running action.

Motor frames and plates, as well as sound box arts, have many threaded holes for machine screws. These holes are tapped on special machines which operate similar to a drill press, excepting that the tap or cutting tool goes into the drilled hole accurately and to the proper depth, when the machine automatically reverses and the cutting tool is threaded out.

Drilling Department No. 1.

The Heineman factory has a large complement of milling machines for planing surfaces on castings, etc., also hand screw machines for turning metal parts that cannot be handled on the automatic machines heretofore described.

The finishing of the parts in nickel, gold, etc., is done by the most modern methods, giving lasting as well as attractive appearance to the completed Heineman product.

Hand Milling Machines.

Making Phonograph Motors and Parts at the Heineman American Factory

Hand Screw Machines.

All of the careful machining and gauging of parts in the Machine Room of the Heineman factory show to advantage in the motor assembly department. Here the work of putting the component parts of the motor together into a working whole, is done without machinery or any cutting tools whatever. Each motor, regardless of the person assembling the same, is exactly alike, when they come from the particular department. There is a distinction, however, as to the skill of the assemblers on the various designs of motors. It is a rule to keep all of the workmen who are proficient on any one design of motor on that particular job, and in that way secure a greater uniformity of product.

Rigid inspection, in process, as well as of the finished article, is absolutely necessary in a large factory which uses modern machine methods. There can be no "shading" here and adding to another part to get the final results, as in the older hand methods. All parts must come to gauge, and, therefore, are interchangeable in any particular design of motor made to-day or in the future.

The making of Heineman sound boxes and other phonograph parts uses similar machining methods as employed in the production of spring motors. There is a big difference, however, as great skill in assembling and adjusting are necessary in the case of sound boxes, so as to get the utmost in tone quality and latitude. Again, the proper selection of materials plays the most important part.

Motor Assembling Department No. 1

Motor Assembling Department No. 2.

While the foregoing description of factory operation indicates some of the processes employed in making the Heineman phonograph equipment, the most important part must be omitted for obvious reasons—that is, the first-hand knowledge of making of these specialties which comes by long years of experience in this line; also the description of the experimental work on the various details of this equipment and the many special factory methods which form the basis for the Heineman phonograph equipment.

MONEY PLENTIFUL IN MILWAUKEE

With Everybody Working Who Wants to, There Is a Heavy Demand for Talking Machines and Records to Supply Entertainment—Recent Changes in Wisconsin Trade.

MILWAUKEE, WIS., April 10.—The decided improvement which has taken place in the general business field in Milwaukee and about Wisconsin has naturally had a most favorable effect upon the talking machine trade, which is showing a big gain over a year ago. Industrial conditions in Milwaukee are showing more activity than at any time in the past two years, with all the leading machinery manufacturing plants operating practically full time. While a great deal of this activity is due to the large war orders which are being received, yet general business is showing a steady increase. Everybody who wants work can get it, money is easier and people are more inclined to buy in all lines, talking machines included. Practically all the Milwaukee houses report that sales of both machines and records are way above the figures reached in 1915. Conditions about the State seem to be highly satisfactory and dealers are meeting with such a good business that they are continually hammering away upon the jobbers for larger shipments of goods. Not only are most of the retail houses placing orders for goods to meet the present requirements of their trade, but even at this early date they are getting in their orders for fall goods, according to Milwaukee jobbers. There is still a shortage of machines in various styles in most lines and the average dealer does not want to be caught short, as was the case in many instances last fall.

"While shipments of machines are increasing, we could dispose of a great many more than are arriving," said Harry A. Goldsmith, secretary of the Badger Talking Machine Co., jobber for the Victor goods. "Dealers are simply rushing in their orders so that they may replenish their stocks and get in readiness for the fall and winter trade. Present business is so good that the average dealer is being put hard to it to get any stock ahead. We are getting plenty of records and are doing a phenomenal business in this line."

J. Raymond Bill, associate editor of The Talking Machine World, who is spending some time at the Chicago offices of the paper, was in Milwaukee, April 3 and 4, calling upon the trade in this city.

G. A. Schultz, well-known piano and talking machine man of Milwaukee, has joined the sales force in the Edison department at the big store of C. Niss & Sons, Inc. Mr. Schultz is thoroughly familiar with the Edison line, having been at one time associated with the sales force at the Edison Shop.

A. F. Puls, Milwaukee jeweler, located at 202 Public Service Building, has taken on the agency for the Stewart line of talking machines.

Some fine sales of the Dictaphone machines are reported by O. H. Foerster, sales manager of the H. C. Block Co., Milwaukee representative of the Dictaphone line, include the Northwestern Mutual Life Insurance Co. and the Northwestern National Fire Insurance Co., Milwaukee; James Manufacturing Co., Fort Atkinson, Wis., and the B. Heinemann Lumber Co., Wausau, Wis.

Mrs. Frances E. Clarke, formerly supervisor of music in the Milwaukee public schools, now head of the school educational department of the Victor Talking Machine Co., was in Milwaukee last week as the guest of her many friends in this city. The women supervisors and principals of the local schools were entertained by Mrs. Clarke at a dinner at the Hotel Pfister. At the speakers' table were Mrs. Clark, Miss Margaret Canty, supervisor of primary instruction; Miss Helen Poole, supervisor of music; Miss Elizabeth Haisler, principal of the school for exceptional children; Mrs. H. P. Morse, formerly supervisor of elementary manual training. While supervisor of music in the Milwaukee schools, Mrs. Clarke used the Victor with such success in the schools that she not only attracted the attention of the schools all over the United States, but was regarded by the Victor Co. as the leading factor in introducing the Victor in the schools.

Sheriff Merrill Guyant, of Stevens Point, Wis., has purchased a Victrola for the prisoners at the county jail. Sunday afternoon religious services are held at the jail and the Victrola is used to good advantage.

Lawrence McGreal, head of the Pathephone Co., of Wisconsin, jobber for the Pathé Frères line, has moved into new and larger quarters at 185 Fourth street, where he is carrying a large stock of Pathé Pathephones for the retail and wholesale trade.

A. G. Kunde, 516 Grand avenue, Columbia jobber and retailer, has located several new Columbia dealers in Milwaukee recently, among them A. E. Frederick, a south side business man. Trade is exceptionally good at the Kunde store.

In the Victor department of Gimbel Bros.' store, Manager L. C. Parker reports that business has been showing steady, consistent gain for many months.

William A. Schmidt, manager of the Phonograph Co., of Milwaukee, jobber for the Edison goods, says that if business was any better his company would be unable to handle it. Trade with the Edison dealers all over Milwaukee and Wisconsin has been so active that the Milwaukee jobber has been experiencing the busiest period in the history of the company. Many new Edison dealers have been secured of late in Wisconsin territory. The sales force at the Edison Shop, the retail branch of the Phonograph Co., of Milwaukee, has been increased again.

The Edmund Gram Piano House, carrying the Steinway, Aeolian and other instruments, has taken the Milwaukee and Wisconsin agency for the Aeolian-Vocalion line. Several shipments of goods have arrived and the new machines are being enthusiastically received by the Milwaukee public. The Gram house expects to conduct an extensive advertising campaign, featuring the new line.

The Anglo-American Import & Export Co., dealers in talking machines, Dictaphones and accessories, has been incorporated with a capitalization of $5,000 by H. H. Goldblatt, J. Letsch and J. Schechter, of 10 Wall street, New York City.

REFERENDUM ON PRICE MAINTENANCE

The Federal Chamber of Commerce Will Conduct Referendum Among Business Men on the Question of Maintaining Resale Prices

WASHINGTON, D. C., April 3.—The Chamber of Commerce of the United States will conduct a referendum among the business men of this country as to whether or not the Federal Trade Commission shall be authorized to prevent price cutting. A special committee of ten members, headed by Paul T. Cherrington, recently made an exhaustive report on the question of the maintenance of resale prices, full mention of which was made in a former issue of The World. The majority recommendation favored legislation permitting such price maintenance, and was signed by seven of the ten members. The minority reported that they were unable to approve of the principle of price maintenance as being in the public interest.

This referendum, which will be conducted among chambers of commerce, boards of trade and other civic organizations affiliated with the Federal Chamber, will be the thirteenth referendum which has been taken among the business men of this country for the purpose of ascertaining for the benefit of Congress and the President the business opinion prevailing throughout the United States on questions of immediate importance. This will give the business men of this country, all of whom will be affected more or less by the result, an opportunity to go on record as to whether or not American business needs legislation permitting producers of "identified merchandise" to fix the price at which such goods shall be resold.

Forty-five days will be allowed in which to take the vote, and the result of the referendum will be determined in the third week of May.

THE PATHE LINE IN PITTSBURGH

M. H. Pickering & Co. to Become Distributers for Pathé Phonographs in That City

The Pathé Frères Phonograph Co., New York, has closed arrangements whereby M. H. Pickering & Co., Tenth and Penn streets, Pittsburgh, Pa., will act as distributers for the Pathé products in that territory. The Pathé Frères Co. has received numerous applications for the distributing franchise in this important section, the growing popularity of the Pathephones and Pathé discs having been recognized by successful houses in several fields. M. H. Pickering & Co. are already making plans to give the line an aggressive wholesale exploitation in their territory.

GETS EDISON LINE IN PEEKSKILL

The B. Greenfest Co., Peekskill, N. Y., has closed arrangements to handle the complete Edison Diamond Disc line of phonographs and records, and will give these products aggressive exploitation. The store is being refurnished and redecorated to take care of this new stock and to afford additional conveniences for patrons.

VICTROLA FOR U. S. S. "MAINE"

The Koch & Droge Piano Co., Inc., Brooklyn, N. Y., has just disposed of a handsome Victrola to the officers of the U. S. S. "Maine." The sale was made by Geo. Gumpert, who states that the officers are highly pleased with their purchase.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[In this issue of The Talking Machine World there is inaugurated this new department, which we believe will prove of substantial value to the talking machine dealer, especially to the man located away from the larger centers and out of reach of facilities for quick repairing. Often the mechanical troubles of a talking machine are minor ones that, although interfering with the operation of the machine itself, can he adjusted readily if the cause of the trouble is known, and the remedy outlined. Andrew H. Dodin, who will conduct this department each month, ranks as one of the most expert talking machine repair men of the country, and is particularly well-known in the East, where he has heen connected with various prominent distributors hefore opening his own shop recently, at 25 East Fourteenth street, New York. In addition to outlining the common mechanical trouhles of talking machines and their remedies in a special article each month, Mr. Dodin will also answer all inquiries regarding repairs from dealers sent to him in care of this office. This service is absolutely free to readers of The World.—Editor.]

JUMP SPRINGS

Perhaps the greatest trouble of the talking-machine dealer is the so-called jump springs in motors.

Since the start of the talking-machine business, the dealer has been caused endless trouble from the fact that the springs in various types of motors would jump, or knock, during their operation, greatly interfering with the proper demonstration of the machine, and in many cases giving the customer the impression that that particular machine was bad, and sometimes causing the loss of a sale.

In a majority of cases the cause of this jumping, or knocking, is a lack of proper graphite, or lubricant, in the spring cages, and in other cases it is caused by the improper use of vaseline mixed with the graphite.

Vaseline should never be used as a substitute for graphite, or lubricant, in the spring cage.

In a case of this kind, I advise first removing the springs from the cages, washing them thoroughly in gasoline, replacing and lubricating with a mixture of Dixon's powdered graphite and heavy oil, mixed to the consistency of molasses.

In a case of this kind, I advise first removing other causes of jump springs.

SPRING KNOCKING

"Editor, Talking Machine World.

"In several machines of a new make recently I have been troubled with a persistent knock in the spring of the motor, although other working parts are smooth-running and silent. What is the cause of this?"—L. H. B.

Answer.—See the article on Jump Springs printed above. If the lubrication is correct the trouble probably lies in the fact that the spring is too wide or too narrow for the cage. In the first instance the spring jams against the cage until the tension forces it back with a snap, or a knock, and in the latter case too great play permits the spring to rattle. Both troubles are due to the use of a spring that is not of the proper width. There should be about an eighth of an inch difference between the width of the spring and the depth of the cage.—A. H. Dodin.

DEATH OF JOEL SPEAR

Secretary of Spear & Co., Pittsburgh, and Manager of Talking Machine Department of That House Succumbs to Pneumonia

Pittsburgh, Pa., April 3.—Joel Spear, secretary of Spear & Co., the big furniture house in this city and a most successful young business man generally, died at his home here last week of pneumonia. Mr. Spear was born in Plymouth, Ohio, and after graduating from school entered the furniture business in Cincinnati. He came to Pittsburgh in 1900 and three years later, with his brothers, incorporated Spear & Co. Mr. Spear was keenly interested in music and was in direct charge of the Victrola department of Spear & Co.

Talking machines worth more than fifty dollars are to be taxed by the city authorities of Portland, according to recent advices.

CHANGES IN THE PITTSBURGH TRADE

William Frey Appointed Assistant Manager of the Boggs & Buhl Department—Dawson Bros. Piano Co. to Move on May 1—Rosenbaum Co.'s Department Settled in New Quarters

Pittsburgh, Pa., April 7.—William Frey, formerly connected with McKelvey & Co., Youngstown, O., has been appointed assistant manager of the Boggs & Buhl talking machine department. Mr. Frey is experienced in both the Victor and Columbia lines, which the department carries, and his continued success in his new connection is assured.

Manager C. Fred Newman reports the business of the Boggs & Buhl department running well ahead of last year; in fact, each month thus far has shown a consistent gain, both in machines and records. The second anniversary of the department was observed April 3 to 8.

Dawson Bros. Piano Co., located for the past five years at 418 Sixth avenue, are preparing to move into new and larger quarters at 957 Liberty avenue about May 1, and contemplate adding a line of talking machines. An entire building, measuring 120 by 23 feet, with four floors and basement, will be occupied, thus providing ample room for the additional department. With improved location and about four times the space now occupied, this concern is preparing to greatly expand the scope of its business. Negotiations for a line of talking machines are now under way.

The Rosenbaum Co. talking machine department is now comfortably established in its handsome new quarters on the third floor, having been moved the latter part of last month from the eighth. The equipment of the department, including booths, furniture, carpets and hangings, is new throughout. The location and arrangement is excellent, and since the change a steady improvement has been noted in business. The Edison line of machines and records has been added, in addition to the Columbia, which the department originally carried.

Manager George Hards, of the W. F. Frederick Piano Co.'s Victrola department, states that business continues very active and demand for many styles of machines exceeds the supply. The record end of the business is being maintained at a fine level. An unusual display, consisting of records in all languages, is attracting considerable attention to the W. F. Frederick windows.

C. R. Wagner, vice-president of the Musical Instrument Sales Co., of New York, was a recent vistor at the McCreery & Co. Victrola department.

TALKING MACHINE EXPORTS

The Figures for January Presented—Exports Show Increase for the Month

Washington, D. C., April 3.—In the summary of the exports and imports of the commerce of the United States for the month of January, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 4,547, valued at $122,007, were exported for January, 1916, as compared with 813 talking machines, valued at $27,372, sent abroad in the same month of 1915. The total exports of records and supplies for January were valued at $74,672, as compared with $34,760 in January, 1915. For the seven months 20,562 talking machines were exported, valued at $642,638, and records and supplies valued at $501,108 were sent abroad for that period.

HANDLE THE PATHE AS LEADER

Walter Drey & Co., 1553 Third avenue, New York, a new local concern, held the formal opening of their store on April 1. The Pathé line is handled as a leader and Mr. Drey is preparing to use considerable newspaper space to properly present Pathephones and Pathé discs.

Harry Lederman, a well-known piano retailer of New Orleans, La., was seriously injured by an automobile in Alexander, La., recently.

RECORDS FOR PATHE DISC LIBRARY

Miss Grace Hoffman, Who Has Sung with Many Organizations, Has Won a Large Measure of Success as a Soprano Soloist

The Pathé Frères Phonograph Co., New York, has just announced that Miss Grace Hoffman, a soprano of considerable prominence, will record exclusively for the Pathé disc library. Miss Hoffman visited the Pathé recording laboratories last week and her records will be announced in the future.

Miss Grace Hoffman.

Miss Hoffman is a graduate of Smith College and appeared as a soloist with a number of prominent orchestras in the East. For some time past she has been the soloist at the Strand Theatre, New York, where she has won praise from newspaper critics. Miss Hoffman has also appeared in a number of important operatic roles, in which she has commanded favorable notice.

THE TALKING MACHINE ON THE FARM

The Great Value of That Instrument in Providing Entertainment for Those in Isolated Communities Emphasized by Recent Editorial

The value of the talking machine as an entertainer and educator on the farm was strongly emphasized recently in an editorial in Pierce's Farm Weeklies, which rated that modern instrument as one of the chief factors in improving the conditions of farm life and detracting from its isolation. The editorial, which is worth studying, reads as follows:

"It seems to me there is no end nowadays to the commendable plans to improve country life conditions. We are adding modern comforts and conveniences to our farm homes; we are beautifying our rural schools and churches; we are bringing town and country closer together in a diversity of ways and removing the isolation that once characterized life on the farm. Let me call your attention to one of the things which is playing an important part in this praiseworthy work, bringing cheer and pleasure to young and old.

"We have one of the standard makes of talking machines in our home, and nothing gives us all—young and old—greater pleasure. Our assortment of records ranges from 'Believe Me, If All Those Endearing Young Charms,' from the ever-popular 'Bohemian Girl,' and solos by John McCormack, the gifted young Irish tenor, to the always beautiful Barcarolle from 'Tales of Hoffman' and the Intermezzo from 'Cavalleria Rusticana.' My musical education was sadly neglected in my youth. I attended a round-log schoolhouse back in Ohio, and reading, writing and arithmetic were considered sufficient unto the day and were really about all that it was possible to give us, so that I am not as well posted on music as are the young folks of to-day, with their splendid opportunities both in the schoolroom and at frequent concerts. I have to thank the talking machine (which I consider one of the most marvelous inventions of my time) for acquainting me with musical masterpieces which would otherwise be unfamiliar to me. I am not quite as bad as General Grant, who knew only one tune, and that one 'Hail to the Chief,' played every time he made his appearance, but before we installed the talking machine in our home I knew only a few tunes, now I am being educated and entertained at a rapid rate.

"I had an interesting experience out West a few years ago. Business called me to a little settlement twenty-five miles across the sagebrush plains from a railroad station. We made the trip by stage, spending the night at a typical frontier 'hotel,' a two-story frame building, right on the bank of one of the brawling mountain streams which irrigate that country. The next morning, before sunrise, a young rancher reached the hotel, having traveled fifty miles on foot and horseback (coming down the mountain-side on snowshoes) in order to catch the stage back to the railway, where he was to receive a shipment of new records for his talking machine. He had packed the machine up the long, step trail and was spending his winter nights in the company of the best operas and the best singers of the whole world. That talking machine was keeping him in touch with civilization and culture, it was whiling away the long winter nights and giving him an enjoyment otherwise impossible to him.

"My friends, there is not one of us who cannot enjoy the same privilege, thanks to these talking machines. With music in our homes and our schools we are almost certain to have our lives refined and sweetened so that we will confront the future with brighter, cheerier hearts and find greater good in everything that comes our way."

Incorporation papers for the Pueblo Phonograph Co., of Denver, have been filed with the Secretary of State. The incorporators are C. A., A. J. and Gertrude Reynolds; the capitalization of the concern being $25,000.

The Eastern Steel Co. has been awarded a contract for 500 tons of steel for the new building to be erected at the Victor Talking Machine Co.'s plant in Camden, N. J.

"Music for Everybody"

Operaphone Records

The only popular priced records on the market.
Retail at 35 cents.
Are 8 inches in diameter.
Are double sided.
Play only with a *tapering* or *Operatone steel needle.*
Have more music than the 10 inch records of other makes.
These records are made by what is known as the "Vertical" or "Up-down" cut, and are especially designed to be played on vertical cut record playing machines.
Play on all lateral cut record machines with a small attachment required to change position of reproducer; attachments are simple to use and inexpensive.
Our catalogue is up to date; has 72 numbers, 144 different selections.
Twelve new numbers, 24 selections, are added each month.
The records are of unusual quality; and merit attention from a musical and artistic standpoint.
The songs are by popular and well-known artists.
The records are the product of our own laboratory and factory. Dealers: Write for full particulars and catalogue and latest list.

PARDEE-ELLENBERGER CO.'S TWENTIETH ANNIVERSARY

Founding of Widely Known New Haven and Boston Establishments Celebrated by Dinner at the Hotel Taft, Followed by Interesting "Shop Talk"

March, 1916, marked the twentieth anniversary of the establishment of the Pardee-Ellenberger Co., Inc., Boston, Mass., and New Haven, Conn., and this event was celebrated at New Haven when the executive sales force attended the dinner at the Hotel Taft.

The entire staff from Boston and New Haven attended and the whole affair was a tremendous success. After the dinner a little "shop talk" was held, during which W. O. Pardee, president and treasurer of this organization, reviewed the history of the company.

F. H. Silliman, manager of the Boston headquarters, expressed his views regarding the future aspect of the phonograph industry. Other speakers followed with extemporaneous chats. Several musical selections were also rendered. The concluding event of this celebration was a burlesque sales sketch by two of the salesmen, one impersonating a woman buyer.

Steps in the location of this house are as follows:

March, 1896 .....34 Center street
January, 1898 .....155 Orange street
April, 1906 .....96 State street
August, 1911...66 Batterymarch street, Boston
June, 1914 .....26 Oliver street, Boston
November, 1915 .....Edison Shop, New Haven

Officers and Wholesale Sales Staff of the Pardee-Ellenberger Co.
Seated, Left to Right: H. L. Ellenberger, W. O. Pardee, F. H. Silliman. Standing, Left to Right: F. T. Keeney, G. R. Coner, L. H. Ripley and F. S. Boyd.

The following members of the staff chronologically speaking, attended: W. O. Pardee, 1896; H. L. Ellenberger, 1896; F. T. Keeney, 1896; W. H. Ballou, 1898; John Butts, 1899; F. H. Silliman, 1902; E. P. Compton, 1908; G. R. Coner, 1911; L. H. Ripley, 1913; F. S. Boyd, 1914; W. W. Longfellow, 1915; G. L. Burwell, 1915; E. B. Hine, 1915.

VICTROLA AIDS CHILD'S TALENT

SAN MATEO, CAL., April 1.—F. E. Baskette, president of the Baskette Drug Co., which, as usual with the modern drug company, handle a number of important side lines, including the Victor talking machine, is the proud father of a future Anna Pavlowa. Little Lena Baskette is only eight years old, has won wonderful success as a classic dancer and is declared to have developed all her latent talents on her own initiative and by the aid of the music of a Victrola.

Lena Baskette

The best evidence of the child's success is found in the fact that she is in possession of a six-year contract with the Universal Co., the famous motion picture producers, although the average contract made with mature artists is limited to one or two years. The contract was signed after Carl Laemmle, president of the Universal Co., had witnessed Miss Baskette's sketch performance. The company, while the young dancer is in its employ, will also provide for her education, which will include special instruction in the languages, dancing and music.

Mr. Baskette is naturally enthusiastic over the manner in which the Victrola has benefited his little daughter and the excellent effect it has upon children. He has placed a number of those instruments in homes in this section.

NEW TALKING MACHINE DEPARTMENT

Camden Furniture Dealer Secures Aeolian and Columbia Lines

CAMDEN, N. J., April 10.—Howard J. Dudley, furniture dealer on 1125 Broadway, has added a talking machine department to his store, where he will handle the Aeolian-Vocalion, for which he has secured the exclusive agency here, and also the Columbia Grafonola line of machines and records. Demonstration booths have been installed on the main floor. Harry B. Crawford, special Aeolian representative, spent a few days at the store following the opening of the talking machine department, demonstrating the Aeolian-Vocalion.

CALVEARD LEAVES KRAUSGILL CO.

LOUISVILLE, KY., April 10.—Charles S. Calveard, former manager of the Victrola department of the Krausgill Piano Co., recently became associated with the sales force of L'Harmonie Compagnie, at 562 South Fourth avenue. This concern is the only exclusive Victor establishment in the State, and carries a very complete line of Victrolas, over ten thousand numbers appearing in its stock of Victor records.

A. H. BATES APPOINTED MANAGER

A. H. Bates, who has been the factory representative of the Victor Talking Machine Co. in local territory for more than two years, has been appointed manager and buyer of the Victor department in the John Wanamaker store, Philadelphia, Pa. Mr. Bates is thoroughly familiar with every division of Victor merchandising, and is ideally equipped to achieve single success in his new post.

JOE WELCH TO RECORD FOR PATHE

The Pathé Frères Phonograph Co., New York, has closed arrangements whereby Joe Welch, the popular comedian, will make a number of records for the Pathé library. Mr. Welch will record exclusively for the Pathé Co.

THE TRADE IN NEW YORK CITY AND VICINITY

Local trade the past month in talking-machine circles has been very satisfactory, the dealers as a whole reporting the best March in the history of the local business. The establishment of new sales records has been so common the past few months that the dealers almost expect that each month will prove a record breaker as compared to corresponding months in previous years.

The demand for talking machines and records is phenomenal and as the available supply cannot by any means cope with the demand there is every indication that 1916 will prove to be a pacemaker for succeeding years. All factors of the trade are working indefatigably to keep the talking machine business on the high plane it well deserves, and it is gratifying to know that notwithstanding the handicaps which have been caused by stock shortage the individual dealer in practically every instance is conducting his business along high-class lines.

Machine Shortage Continues

There has been no startling development in the local trade the past month. The stock shortage continues, although in certain types of machines there has been a distinct improvement in this respect. This is balanced, however, by a shortage in other types. The record situation is very pleasing, as the factories have practically caught up with the record demand, and there is very little complaint to be heard from the trade in this direction.

The newspapers are being liberally patronized by the local trade, and the character of this copy is in keeping with the prestige and dignity of the talking machine industry. The "nothing-down-and-thirty-days'-trial" style of copy is rapidly being eliminated and a persual of the advertising pages of the leading newspapers shows an inclination on the part of the great majority of talking machine advertisers to feature the higher priced machines along logical and profitable lines.

Anent Victor Advertising

H. C. Brown, advertising manager of the Victor Talking Machine Co., was the guest of honor last month at the regular monthly dinner of the sales staff of Landay Bros., New York, Victor distributors. Mr. Brown delivered one of his usual forceful and intensely interesting addresses, the keynote of his address being the present and future prospects of the Victrola. Mr. Brown commented briefly upon the policy and ideals which direct the destinies of the Victor Company's advertising, and paid a tribute to the aggressiveness of Landay Bros., which is evidenced in the splendid advertising they use in the daily newspapers. Mr. Brown pointed out to the assembled salesmen that their work was being made far easier because of the willingness of their house to materially assist them in developing and creating new business.

Landay Bros. have just inaugurated a mammoth poster campaign which is attracting the attention of the local advertising fraternity. Large posters are being used in Manhattan, Brooklyn and the Bronx, the aim being to feature these posters in the leading residential sections of the Greater City. Landay Bros. also achieved considerable publicity in the parade of floats and trucks which was part of the celebration in Harlem last week. The Landay truck with the Victrola doors was a prominent feature in this parade and was the recipient of enthusiastic applause along the entire route.

March a Record-Breaker

"March was the biggest month in the history of this establishment," said R. F. Bolton, district manager of the Columbia Graphopohne Co., New York, in a chat with The World. "Our sales totals were well in advance of last December, our previous high-water month, and as March usually falls far behind December's figures, we are naturally more than pleased with the showing made last month. Columbia dealers must evidently be closing a healthy, substantial business, as they are pressing us for immediate delivery of their orders, and emphasizing that they need the machines and records for their current sales. It is safe to say, judging from all indications, that 1916 will be a wonderful year for the talking machine business. Our record business has been especially good the past four weeks, showing a higher percentage in the sales totals last month than ever before. The demand for the new Columbia Electric is steadily increasing, and the revised prices have created a new field for our dealers to develop."

Triples Business in First Quarter

Referring to the general activities in the Edison Diamond Disc phonograph line, Geo. L. Babson, manager of the Phonograph Corporation of Manhattan, wholesale distributor for the Edison Diamond Disc products in this territory and which also conducts the Edison Shop, said: "Our wholesale division closed a very satisfactory March, and our business for the first quarter of this year was triple that of our sales during the corresponding period last year. Our dealers report an ever increasing demand for the Edison Diamond Disc phonographs and records, and the models retailing from $150 upward seem to be the most favored.

"We have just been advised by the factory heads of Thos. A. Edison, Inc., that certain material improvements and changes in the manufacture of Diamond Disc records will be ready for announcement in the very near future, and we understand that the new records embodying these changes will be in our hands within a few weeks. Phonograph and record shipments from the factory have been very satisfactory, and

the situation as a whole gives us good reason to believe that the Edison Diamond Disc line is growing in popularity by leaps and bounds.

Rejoins Wholesale Staff

John Y. Shepard, formerly manager of the Victor department of Wm. Knabe & Co., New York, has rejoined the sales staff of the G. T. Williams Co., Brooklyn, New York, Victor distributors. Mr. Shepard was formerly a member of the G. T. Williams travelling staff, and his thorough knowledge of all phases of the Victor wholesale and retail business will enable him to render valuable co-operation to the Victor dealers in his territory, which is an important one in the busy Metropolitan district.

John Y. Shepard

The Columbia in Films

The Columbia department in the store of the Goldburg Furniture & Carpet Co., One Hundred and Sixty-third street and Third avenue., New York, was "filmed" last week as a part of a novel advertising scheme which this progressive house in now introducing in various sections of the Bronx. A moving picture was taken of the many departments in the store incidental to the action of a plot which included the complete furnishing of a home by a newly married couple. Considering that no home is complete without a Grafonola, the store managers arranged for Lawrence Fetik, manager of the Columbia department, to sell the "married couple" a Grafonola 200 with a good-sized library of Columbia records. Among those who witnessed this interesting scene were R. F. Bolton, district manager, and Lester Leverich, of the Columbia advertising division. The reel is now being shown in many of the leading Bronx theatres where it is receiving the attention that is usually accorded a drama or comedy subject and not an advertising film.

The Pathé in Piano Stores

"A noteworthy feature of our local business the past few months," said J. F. Collins, sales manager of the Pathé Frères Phonograph Co., "has been the many new accounts that we have opened with live-wire and progressive piano houses. It would seem from the splendid reports that we have received from our dealers all along the line that the Pathephone is admirably adapted for aggressive exploitation by piano houses, large and small, and the fact that these piano stores are featuring the Pathé line more than ever before is a substantial indication of the success which they are achieving with our product." Among the local piano houses which handle the Pathé Frères product in this territory are Hardman, Peck & Co., Jacob Doll & Sons, Weser Bros., Winterroth Piano Co., O. W. Wuertz and several others. I am pleased to say that our sales totals the past month have far exceeded our expectations in every way.

An Aggressive Victor Dealer

One of the most progressive and up-to-date Victor dealers in Brooklyn, N. Y., is the Adams Music Store, 6964 Third avenue. Less than a year ago Mr. Adams was located at 6950 Third avenue, but his business grew to such an extent that he was obliged to move up the street into a much larger store. He has spent considerable money in installing sound-proof booths and has also put in two very large show windows. Mr. Adams is also planning to occupy the entire building (three stories) and only recently erected an eighteen-foot electric sign on the front of the building.

Stevens-Ayres Bill Activity

J. Newcomb Blackman, president of the Blackman Talking Machine Co., Victor distributor, visited Washington, D. C., last week to further the interest of the Stevens-Ayres bill. Mr. Blackman is a member of the committee of the National Association of Talking Machine Jobbers, which is working indefatigably on behalf of this bill. He conferred with Mr. Whittier, secretary of the American Fair Trade League, and also discussed the measure with Joseph Tumulty, secretary to President Wilson, in reference to getting the President's support. Mr. Blackman stated that he has received word from an authoritative source that some action on the bill will be taken in the near future and that the Interstate and Foreign Commerce Committee which has the bill in hand will probably hold hearings on the measure in a short time. Talking machine men must be on the alert regarding this measure.

A Productive Campaign

The Aeolian Co. has continued its local Aeolian-Vocalion advertising campaign with unabated vigor and force, and the results of this wonderful publicity are not only evidenced in the excellent sales totals achieved at Aeolian Hall, but also in the fact that the Aeolian-Vocalion is becoming more popular among music lovers and musicians day by day. The advertising copy used by the Aeolian Co. has won the hearty commendation of all factors of the industry, and its educational and informative character has served to impress newspaper readers with the musical standing of the modern phonograph.

A New Columbia Dealer

Christman Sons, which recently opened very attractive retail warerooms at 753 Sixth avenue, New York, have closed arrangements to handle the complete Columbia line of graphophones and records. The company plans to construct a number of sound-proof demonstration rooms to properly exploit the Columbia product and will use good-sized advertising space to present the Columbia line to its many prominent patrons.

Additional Record Facilities

Alterations are being made at the wholesale offices of the Silas P. Pearsall offices, Victor distributors, whereby the company's record stock capacity will be greatly increased. These additions are made as a result of intensive work by Thos. F. Green, general manager, whose hobby is complete record service.

Makes Changes in Offices

The New York Talking Machine Co., New York, Victor distributor, has made a number of changes in the layout and arrangement of its general offices which add considerably to the attractiveness of the floor, and permit the executive officers a greater degree of comfort and convenience. Partitions were erected between the offices of the executive staff and the general clerical forces. Additional doors were constructed, and there is no noise or confusion to interfere with the work of General Manager Morey, Efficiency Manager Marbourg and their assistants.

OUTLOOK GOOD IN CANADA

Otis C. Dorian, Assistant Canadian Manager for Columbia Co., on Visit to Headquarters in New York, Declares that Shortage of Stock Is the Chief Worry Over Border

Otis C. Dorian, assistant Canadian manager of the Columbia Graphophone Co., with headquarters in Toronto, was a visitor to New York this week. Mr. Dorian stated that the business outlook is most encouraging and that a shortage of product is the only handicap encountered by the Canadian division of the Columbia Co., as the demand for Columbia machines and records is far in excess of the supply. The general business situation in Canada is showing a marked improvement, although in certain industries there is a scarcity of help owing to the desire of the employes to leave for the front. Recruiting officers are visiting the Columbia factory at frequent intervals, and quite a number of workers in the Columbia plant have volunteered and joined the English army.

The Ansonia Furniture Co., of Ansonia, Conn., has secured the agency for the Reginaphone in that section.

SPECIAL ANNOUNCEMENT

Has it ever occurred to you what it would mean in profits, were you able to offer **your list** of talking machine owners an article that would increase the pleasure and efficiency of their machines 100%; an article that you would be proud to represent, and had the same implicit faith in, that you had in the talking machine you sold them, and which has won for you their good-will, thereby helping you to build the firm foundation of your present business?

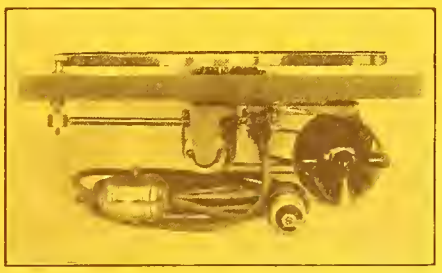
You cannot only increase the profits on your past, but also on your present and future sales, and convert your owners' list into a big tangible asset by representing and handling

VEECO

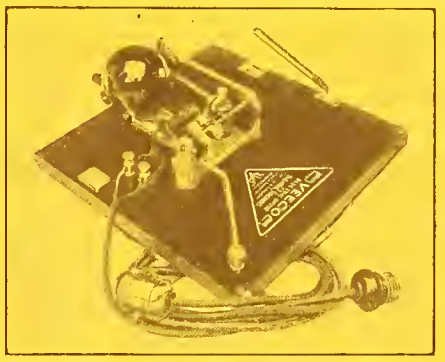
What is Veeco?

It is the first and only practical and complete electric device for talking machines. A glance at the accompanying illustrations and a survey of a few of its many advantages enumerated below will convince.

It is a complete electric power plant in itself, eliminating the spring motor entirely; **not the customary unsatisfactory attachment.**



Price complete, $35.00



NO MORE WINDING
Installation takes five minutes
Made for any current from 6 to 250 volts

NO BROKEN SPRINGS
Operating cost ⅓ of a cent per hour
Runs on A. C. or D. C. without resistance

No running down in the middle of selection
No discordant music due to uneven spring tension
Just clear, clean-cut enjoyment, that's all

VICTOR ELECTRICAL EQUIPMENT COMPANY

248 BOYLSTON STREET, BOSTON, MASS.

ENDORSED AND SOLD BY EDISON ELECTRIC ILLUMINATING CO. OF BOSTON

VICTROLAS AID IN TEACHING PENMANSHIP IN THE PUBLIC SCHOOLS.

The use of the Victor talking machine in the public schools of the country has become widespread, its versatility rendering it exceedingly adaptable to almost every branch of study pursued by the pupils. One of the somewhat unusual uses to which the Victrola has been put in the Hawthorne School, Spokane, Wash., is that of aiding the pupils to learn to write legibly and speedily, the children endeavoring to make the outlines of the letters while keeping time to the music of the Victrola. Frank P. Arnold, supervisor of writing in the public schools of Spokane, is the author of the following article which appeared in the Spokane Review recently:

"Do you remember these words of the old-time schoolmaster: 'Sit up straight, children. Open your copy books to page four. Try to get a perfect copy. Try to get one that looks just like the copy.' The writer remembers his own experiences. He traveled this writing path for years, and went from the public schools unable to write an easy, rapid, legible hand. And such an experience was the fate of the majority who went to school thirty years ago. Only the few acquired the essentials of good writing which are summed up in the following definition: 'The essentials of good writing are legibility, rapidity, ease and endurance.'

"Modern writing instruction is different from the old methods. A visitor steps into a primary room in one of the Spokane schools some morning. He sees what to him is a strange sight. Possibly a Victrola is being used and the children are writing to music. Twenty or thirty little tots are at the board and as the Victrola plays 'Pop Goes the Weasel,' or some other familiar selection which permits quick time, these children make large ovals, keeping almost perfect time. They are taught speed and form and they enjoy it, too."

This indorsement of the Victrola, coming from this well-known authority on modern class-room methods, demonstrates the high place which the Victrola has won for itself in the estimation of the leading teachers and educators of the day.

School Children Learning to Write, Aided by Victor Music.

THE PATHE LINE IN BUFFALO

A. Victor & Co. Featuring the Pathephone Strongly in Advertising and Demonstrations and Are Creating Many New Dealers

BUFFALO, N. Y., April 8.—A. Victor & Co., Main and Genesee streets, who recently became distributers for the products of the Pathé Frères Phonograph Co. are closing a very gratifying business with this well-known line. The company is spending considerable money in advertising the Pathephone and Pathé discs in the local newspapers and states that it demonstrated the machine to more than 3,000 people during March.

The wholesale department has closed contracts with many dealers in this territory who are are benefiting from the company's general advertising campaign. Full page advertisements devoted exclusively to the Pathé line have appeared over the company's signature in the News, Courier and Times of this city, in addition to the use of quite some space in the company's regular advertising. A. Victor & Co. state that they aim to make the Pathephone a familiar name to every music lover in their territory, which is an extensive one.

TRANSMITTED OVER FIFTY MILES

The Boston (Mass.) Record recently published a photograph showing a wireless telephone apparatus which had been installed by Louis M. Stevens, of Brookline, by which music from a talking machine can be transmitted over a radius of fifty miles.

Signor Giuseppe Creatore and his famous band have just recently been added to the galaxy of Edison diamond disc artists. Creatore is one of the most interesting personalities before the musical world to-day.

INSIDE INCIDENTS IN THE RECORDING LABORATORIES

Some of the Factors, Amusing and Annoying, That Enter into the Making of Records, and with Which Neither the Dealer Nor His Customer Is Familiar—"The Old Guard" Still at Work—Ambitious Truck Driving Tenors and Busy Suffragettes Get Real Action

To the dealer or his customer who sits quietly in the store or in the music room and listens critically to the latest product of the recording laboratory there does not come frequently a full appreciation of what that particular record represents, the amount of effort put into its making. The talking machine owner does not stop to consider that the making of that one record required perhaps a dozen trials and that into its final perfection went the most exact science and diplomacy, skill and patience to the highest degree.

The World representative dropped into the recording sanctum of one of the big companies the other day and struck a rare moment. The old stand-bys were making a quartet. Billy Murray, Bill Hooley, Steve Porter and Bill Redmond were singing a new song entitled "Where Did Robinson Crusoe Go with Friday on Saturday Night?" recently featured by Al Jolson at the New York Winter Garden. They sounded O. K. to the reporter; but at the conclusion of the selection he was shown into the testing-room where each record has a trial immediately after it is sung, and here some of the difficulties which beset the path of the producer were revealed to him.

"That wild-man talk is wrong," said the chief critic. "Try it with your voice lower, Ed."

"I tried it that way, and I sounded like a dog-fight," Ed objected. Ed was doing the incidental South Sea Islander jargon between the verse and chorus, to ukulele accompaniment.

"Well, something is wrong. Suppose you do this: suppose you imagine you are the king of the natives, making a speech to your followers —sort of a political speech—and you work up to a climax where you demand, 'Am I right?' and they come in strong with 'Sure you're right, and we're with you!' You need have more swing in that cannibal speech, that's all."

They did it again. The cannibal king got his speech into great shape; but one of the veterans slipped immediately after it, and the king had all his trouble for nothing.

"Had we better make it a solo?" some one suggested.

"No. Try it again."

The director explained: "We are not bothered this way with every song. Sometimes a couple of trials are enough. But the veterans were on this time at that; so that you can never tell. As a matter of fact, though, the better constructed the song—the better the words and music fit together—the easier our job is. The native stuff and one or two other spots threw them out there, but we have it now."

Veterans is the word. The name of Billy Murray has a very familiar sound. Likewise the two other Bills, Hooley and Redmond, and Steve Porter. And here the question presents itself: If these champion popular recorders went over a quartet several times, even after practising it, is it any wonder that hundreds of otherwise capable, even famous singers fail to please the critics of the record laboratory? They come in by dozens—people of all shapes and sizes and from all walks of life, to try their talents and to perpetuate themselves on the discs that circulate all over the world. In some of the laboratories all applicants are given a trial, for it is always possible that the great genius may turn up. But few, very few, are successful. Few are the volunteer records made—and sold.

Recently a truck driver stepped into one of the studios, fired with the desire to sing for posterity, "Gee, I Wish I Had a Girl," as conceived and rendered by himself. He had his chance. Long training had accustomed the reception committee to endure anything, and not a face cracked. But the ordeal was almost too much. The man was musically deluded. Song was not his metier.

On another occasion there entered a brisk, business-like but over-confident woman who had a plan whereby she hoped to circulate propaganda in the form of records made by herself for the good of some cause or other. Her "line" wasn't so bad, but she made a fatal mistake. She ended up as follows: "So you see, it would be a splendid plan for the cause and also fine advertising for you. I would do all the recording myself, and, of course, if I were successful, as I am sure I should be, I would expect you to take me onto the regular staff." The lady is still a volunteer.

The real difficulty of recording for the merciless disc has been brought home not only to the aspiring amateur, but to many professional performers. Confident stage stars find that singing for reproduction on a scientific machine is an art distinct from that of the footlights. Billy Murray explained this:

"In singing for reproduction we have learned a number of tricks and facts unknown to the theatrical performer. We have been taught, for instance, to round out our vowel sounds. If we didn't do that, the reproduction would be flat and unsatisfactory. Many stage singers get into the way of cutting off their vowels, and they can get away with it. Their audience is less critical because it isn't listening in the quiet of a small room, where every small slip is apparent. We are taught to keep perfect time, and there again the professionals of the stage are puzzled. They are not always held strictly to the minute as we are. In singing for the recorder you can't play with rests and pauses to suit your own musical tastes. The selections have been timed to fill a certain period, and any deviation throws things out. Sometimes actors and actresses come into the studio on their way to keep an appointment somewhere else, and are amazed when they have to spend two or three hours making a single record. Even at that, the record is often discarded as imperfect. That is one good reason why you miss some of the well-known stage artists from the talking machine lists."

Along the same lines were Bill Hooley's reminiscences of the days when the "old guard' used to sing "anywhere from thirty to sixty rounds" of "Down Went Maginty," or "The Shade of the Old Apple Tree." Hooley, by the way, is a gentleman of a distinguished presence which accords well with his famous bass voice. Mr. Hooley recalled that he and Steve Porter began making records way back in the infancy of the talking machine, in the year 1898. Steve had nothing in particular to offer in the way of wisdom gained through experience, but his genial countenance radiated the good spirit he has been putting into his records all these years.

"It seems strange sometimes," said Billy Murray, "that with thousands of people ambitious to sing for the records, and few of them being refused a trial, we of the old guard go right on doing most of the songs. But it is a matter of

Do you need capital to increase your business?

WRITE FOR DETAILS

HAMILTON INVESTMENT CO., 76 W. Monroe St. CHICAGO, ILL.

knowledge and practise as well as of ability. We have learned the game. Others are getting on to it, though. Take for instance, our young friend Van Brunt, here."

Our friend Walter Van Brunt, one of the not too numerous youths who have succeeded in making popular records, is twenty-three years old; but he has been singing for one talking machine or another since the more or less tender age of sixteen, when he started in with the Columbia Co. Previous to that he was a choir boy soloist at St. Mark's, New York. Now he has a manager and a marvelous collection of letters from sentimental women, young, middle-aged and old, thanking him for singing as sweetly as he does. One recent note went so far as to term his songs "spiritual caresses."

"It would be interesting to trace these letters," said Van Brunt. "They must come principally from people who are slightly unbalanced."

The Edison Co. signed him up exclusively two years ago. He is a good type of the enterprising as well as talented young singers who are making records for the big producing companies to-day—making records and money for the companies, for the companies' representative dealers, and incidentally for themselves.

But while the so-called popular records are important, and while they sell fast and widely, of course the operatic numbers, concert numbers and instrumental music of the better class are demanding more space in the newspapers every day, and more attention in the recording rooms. With the four or five biggest companies commanding the services and producing the best singing of practically all the grand opera stars, violinists, 'cellists, pianists and dramatic recitative luminaries, the public is taking a more and more active interest in the "big stuff." The reproduction is demanding the attention of the most expert of those who have studied the talking machine. And there are some surprisingly keen, musically letter-perfect gentlemen among those who are supervising the big studios. They know all the operas, German, French, Italian, Spanish. They are students and poets and practical men combined. Let one of them speak for the brotherhood:

"You would be very much surprised to know how often we find that a singer known to fame has been singing phrases or individual notes incorrectly. It is our business, of course, to get everything absolutely right. Well, when after almost a mathematical study of a composer's score we point out to a big singer some slight deviation, he can't believe that he has been wrong. Sometimes he is indignant; but we have always made sure of ourselves before venturing a criticism, so we are always certain of our point. It is the easiest thing in the world for singers to make small mistakes in the long opera scores, or even in selections written for the concert hall; and, of course, ninety-nine people out of a hundred would fail to detect such errors; but we must be ready for the hundredth. We try to be artists and scientists at the same time. In short, we put our best efforts into producing everything with the greatest possible accuracy—with exactness. That is the supreme test and the only real reason or excuse for talking machines—exactness."

"But how about the well-known temperament of the artist—the artistic temperament that is supposed to reign supreme among our greatest musicians? Doesn't that interfere with your work?"

"Not to any extent nowadays. I'm afraid the recording laboratory is a poor place for temperament. We demand too much. We are prepared to find errors and to eliminate them. And we have little trouble with the artists. They are coming to realize that record-making is both an art and a science. Diplomacy is sometimes necessary, but so it is in any other undertaking that amounts to anything. And when they understand that we are interested only in making the best possible, the most faithful records, of what they sing or play, the artists themselves become enthusiastic for perfection. Imperfect records, if they could go out to the public, would certainly do no good and would work harm in every way that I can think of. The records are generally better to-day than they were a few years ago; better than last year. We go ahead, or at least we try to go ahead. When you come to think of it, progress in producing such a thing as the talking machine record is well worth while. Nobody knows how long after we are dead the generations to come may be judging this age by what is contained on the talking machine records it has left behind it."

A VISITOR FROM VANCOUVER

A. J. Dorland, president of Dorland's Music House, Vancouver, Wash., was a visitor this week at the executive offices of the Columbia Co. Mr. Dorland handles the Columbia line in his territory, and is most enthusiastic regarding the success which he has achieved with these products. He commented especially upon the popularity of the new record ejector model which is winning the approval of patrons all over the country.

EDISON PHONOGRAPH FOR THEATRE

Diamond Disc Machine Installed in William Penn Theatre, Pittsburgh, to Supply Music for Photo Drama—Factory Expert in Charge

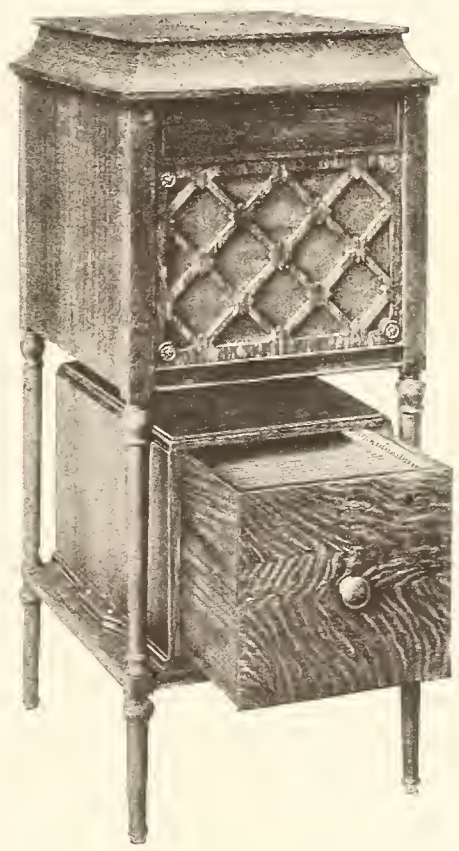
PITTSBURGH, PA., April 11.—An Edison Diamond Disc phonograph was installed this week in the William Penn Theatre, Northside, Pittsburgh, one of the largest and most exclusive motion picture theatres in the city, to be tried out in the presenting of photo dramas. The instrument was shipped direct from the Edison laboratories and is in charge of an expert from the factory. The records as played are appropriate to the action of each play as it progresses. A large pipe organ, which regularly furnishes the music, will also be used. At the end of each feature picture, vocal records sung by stars appearing at local theatres during the week are played. The use of the phonograph in this manner in connection with the motion picture is unique in this city and the result of the try-out is awaited with interest by managers and patrons alike.

Edison Quality

Requires

Salter Cabinets

A record cabinet that is worthy of the handsome Style 100-A Edison machine is the Salter No. 100 Cabinet. Designed especially for it and finished to match, it has furnished complete satisfaction to Edison dealers in all parts of the country and has helped to make many sales. It is quickly and easily fastened to the shelf of the machine by 4 screws. Thirty-two Felt-Lined compartments with index system afford ideal protection and filing facilities. Finished in any color.



SALTER No. 100—Cabinet on Shelf

WE ALSO MAKE Salter No. 150 Inner-Rack which is placed in the interior of the No. 150-A Edison. Easily fitted in and affords Felt-Lined compartments for 32 records.

WE HAVE, IN ADDITION, an ideal "overflow" or storage cabinet that is suited to requirements of Edison dealers. This is our Style 120. Holds 130 Edison records in Felt-Lined compartments.

SUITABLE FOR ALL MACHINES of non-cabinet design is our No. 750 Cabinet. Following Colonial lines and finished in all colors, it has been from its introduction a prime favorite. Felt-Lined compartments hold 90 and wood racks 150 records.

CATALOGS explain all of these styles in detail and give dimensions. Send for one. Now!

Chicago Talking Machine Co.

Victor Distributors

12 N. Michigan Ave.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, April 12.—Middle western jobbers and dealers are continuing to have trouble in securing machine deliveries and are beginning to wonder whether or not conditions in the matter of supply are going to be much improved over last year. This shortness in receipts is especially felt in that class of machines which retail around $100, and dealers in all lines agree that there has been a decided predilection recently upon the part of the public for machines of this description. According to one big dealer, the fancy of the public for fumed and golden oak finishes, which has been prevalent the past sixty days, has shifted back to mahogany and calls are now mainly for that color.

Smaller machines are becoming more active with the jobbers, due in a great part to the intentions of the trade to go after the summer business. This is proven by the larger city concerns and dealers in the resort country.

Among the newer manufacturers there has been a severe and ever increasing shortage of parts, mainly motors. This shortage is due to the inability to secure wire for springs, and to date there appears to be but comparatively little hope that this condition is to be very quickly remedied. One of the largest manufacturers of spring steel in the country has two large mills working to capacity and other spring manufacturers are equally pressed. The supply is far from equalling the demand and there are some who say that prices are going to go up even more within the next four or five months.

The call for records is now mainly for the standard numbers. For instance, Melba's record of "Annie Laurie" has been a tremendous seller. The call for feature records, such as the saxophone and marimba records, has been running into big numbers. There has been a reduction in dance records, but one dealer explains this by saying that dance numbers recently have not been as good as their predecessors. Calls for operatic numbers have also been rather light comparatively speaking.

State Street Pathé Shop Opened

The State Street Pathé Shops, that remarkable enterprise which has seized upon one of Chicago's finest loop corners with the intention of bringing the Pathephone as close to the Chicago public as can possibly be done, has been opened after weeks of preparation and, although the shop is far from completion when details are considered, there has been a volume of business done that bids fair to bear out Manager Harry K. O'Neill's faith in doing business from a location that reaches every one. A rental of $25,000 a year for thirty-seven feet of frontage at the corner of Monroe and State streets is a record-breaker for the talking machine trade of Chicago—that is—for stores that are exclusively talking machine shops, and the experiment is being watched by the entire local trade. In fact, dealers of all kinds have been visitors.

The store is planned in a color scheme of blue, black and gray. Ceilings and side walls are also worked out in black and white. On the main floor there is a general reception and display room. Immediately to the right and left of a centre aisle are four handsome demonstration rooms and back from these are the record rooms, offices, etc. On the mezzanine floor a concert room that will seat seventy people is being completed and on this floor there is also a demonstration room that is devoted to the very highest grade of machines exclusively.

The whole effect is a most pleasing one and many dealers who are planning to remodel or enlarge their places of business are adopting many ideas from it.

H. L. Woodward Shifts

H. L. Woodward, the prominent traveler for Chase & West, Des Moines, Ia., has just been annexed to the forces of the Chicago Talking Machine Co. Mr. Woodward has had a wide experience in the talking machine business. He started out with the Victor Co. at Camden, covering what is known as the western Pennsylvania territory and the State of Wisconsin. After two and a half years' connection with the factory, Mr. Woodward went with Chase & West.

During the six years Mr. Woodward spent with this Western Victor jobbing house, he created a large series of successful dealers on account of his unique methods of service to the dealers. This service involved much in the way of installing efficiency systems, simplifying shipping methods and dignifying advertising appeals. In his new role with the Chicago Talking Machine Co., Mr. Woodward will benefit by this constructive work already done, as he is to travel the Iowa territory and part of Illinois.

Geo. P. Cheatle Leaves Town

Geo. P. Cheatle has just started on a one month leave of absence from the Chicago Talking Machine Co. He will spend the month at Springfield, Ill., with his father and brother, who have just bought out the Bernard Music Shop, of that city, and who will run it as an exclusive Victor house.

Lyon & Healy

Chicago

Largest Victor Distributors

cago Talking Machine Co. is a service boost to help the dealers in their sales of Victor No. 18s. This innovation is in the form of a reproduced long-hand letter which the Chicago Talking Machine Co. has recently received from Fritz Kreisler, the renowned violinist. The letter is printed in sepia on a yellow stock, and needless to say, is an enthusiastic endorsement by Mr. Kreisler, of the Victor No. 18, which he has recently purchased.

The reverse side includes some facts about the Victor No. 18 and also a picture of Mr. Kreisler. The Chicago Talking Machine Co. is supplying the dealers at a nominal cost with large quantities of these letter cards, with the dealers' imprint thereon, in order that the dealers may use them to mail out to prospective talking machine buyers.

In addition to the Kreisler letter and the radium flash Victor sign which is meeting with such an enthusiastic reception, the Chicago Talking Machine Co. is putting out for the dealers' use a neatly printed record sheet which is topped by some truly "snappy pose" pictures from "So Long Letty." The list itself includes selections from the popular productions, "So Long Letty," "Very Good Eddie," "Stop, Look and Listen," "Princess Pat," and "Hip, Hip, Hooray."

Popular Victor Records

The Victor records which are now running strong are: "The Marimba March," with "The Columbia Waltz" on the reverse side, "So Long Letty" with "Here Comes Tootsi" on the reverse side, "Memories" with "One Fleeting Hour" on the reverse side, "Beautiful Isle of Somewhere," by John McCormack; "Steierland," by Alma Gluck and Paul Reimers, and "Pretemoiton aide," from the Queen of Sheba, sung by Caruso.

Columbia Aids Jag Cure

E. P. Lewis, Columbia dealer at Dwight, Ill., has just sold a $225 electric Columbia Grafonola to the Keely Institute at that city. Dwight is the headquarters of the famous Keely gold cure for inebriacy and although there are branches in many other cities, people come from all over the country to Dwight to take the cure. Much has been said of music, both as a preventative and remedial agent, and as alcoholism is now considered more of a disease than a folly, there is no reason why the patients should not be aided in their flight to the shores of Therapa, by the healing strains eminating from the Columbia Grafonola. Mr. Lewis is naturally highly pleased with his sale, which he made under strong competitive conditions.

New Columbia Dealers

The Chicago office of the Columbia Grafonola Co. has established the following new dealers during the past fortnight: Singer Furniture Co., 512 North avenue, Chicago; F. B. Shaffer, Oneida, Ill.; A. Leath & Co., Rockford, Ill.; E. L. Fischer, Readsville, Wis.; E. G. Furnholz, Harvard, Ill., and Starr Furniture Co., 7123-25 South Chicago avenue, Chicago; Joseph C. Smith, Michigan City, Mich.; Laurium Music Shop, Laurium, Mich.; L. S. Childs, Winnetka, Ill.; Standt & Bagge, St. Charles, Ill.; Reinneker Drug Co., Wilmette, Ill., and the Peoples' Outfitting Co., Battle Creek, Mich.

R. J. Winters, Chicago loop representative for the Columbia Co., spoke to a World representative of a very active Columbia trade in the loop, which includes a 400 per cent. increase in the record business. Mr. Winters announced the K. & K. Gift Shop as a new Columbia loop dealer. He also said he finds the new satin finish brown mahogany machines are particularly popular on account of the general style tendency to favor deep brown furnitured rooms.

Hinge People to Incorporate

The Chicago Hinge Cover Support & Balance Co. continues to meet with a success that is characterized by its absence of even a single turn down. Indeed the steady growth of the company's business has induced its backers to incorporate for $25,000, which incorporation will take place before the end of the month.

Columbia Conditions

The "largest March ever" has just passed into history for the Chicago representatives of the Columbia Graphophone Co. Mr. Baer reported a 200 per cent. retail increase as a specific illustration. Shipments, he said, have been satisfactory with the larger instruments, although the medium-priced instruments are being delayed by the prevailing lack of freight service.

H. A. Yerkes, who has recently assumed the new role of district manager for the Chicago branch of the Columbia Co., is taking a ten-day trip through the West, in which he will include Denver and Salt Lake City.

Popular Columbia Records

The Columbia records which the public at this time seem to favor are "Under the Stars," with "Hello Hawaii, How Are You?" on the reverse side; "When You're Down in Louisville," with "Come Where My Love is Dreaming," on the reverse side; "Someday I'll Wander Back Again," with "Will You Love Me When I'm Old," on the reverse side; "Massa's In de Cold, Cold Ground," with "Darling Nellie Gray" on the reverse side ('cello pieces); the Easter selections, "The Palms," with "The Resurrection" on the reverse side, and "It Was in the Time of Roses," with "Have You Forgotten Me," on the reverse side.

The Columbia Co. in Chicago, in order to facilitate record selection on the part of the dealers, are mailing twenty-five sample records, with an order sheet, to each of their Middle Western dealers. These sets of sample records are sent out one month in advance.

News at Lyon & Healy's

In accordance with the modern trend of large houses, that of Lyon & Healy has instituted in behalf of the dealers to whom it jobs, a new service department with R. Agnew in charge. "The Promotion Department" is the strict title of the new department and its purpose is to

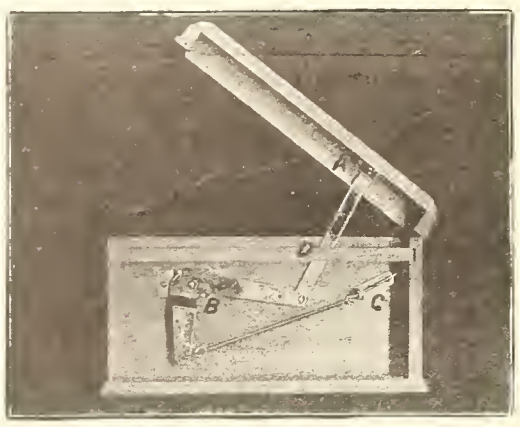
THE COVER WITHOUT A CATCH



Sectional View Showing How It Operates

A Little Home-cooked Comparison

From ancient history, we repeat, "It certainly is a nuisance—everytime the dear girl plays a record on her hornless talking machine, she must lift the cover up and then lower it down—because she doesn't like to leave it open."

From Miss Uptodate, we quote, "You know the cover on this machine is honestly fascinating. Why, I just have to tell the cover to open and shut without helping it at all. It stays anywhere I want it to without so much as a wiggle or murmur."

Of course, the Chicago Hinged Cover Support and Balance is on Miss Uptodate's machine, because this remarkable innovation eliminates the weight of the cover when raising or lowering and also balances at any desired point. It cannot drop or get out of order. We are glad to prove these statements by sending you a model or demonstrating on your own machine.

CHICAGO HINGED COVER SUPPORT & BALANCE CO., 144 S. Wabash Ave., CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 35)

furnish circulars, poster cards and other constructive sales ideas for the dealer's benefit.

The first work of the promotion department has been along the line of poster cards. The four records of the month which "should be the most popular," have been featured in the up-to-the-minute poster style of yellow skies and brilliant stripes. This plan of concentrating publicity upon a few records instead of pushing monthly lists is to be a permanent feature and the dealers are being supplied with neat frames to fit the standard size which has been adopted for the poster cards.

L. C. Schrader, of Ishpeming, Mich., and A. F. Korn, of Michigan City, Mich., are the new Victor dealers announced by Lyon & Healy.

Miss Anna Wood, a popular and experienced "record girl" will leave Lyon & Healy within the next few weeks for matrimonial reasons.

The Victor stock was somewhat damaged by the smoke and water of the fire which sprang up next to the store of the W. H. Aton Piano Co., of Madison, Wis.

G. G. Campbell is the new head of the talking machine department at Hillman's. Mr. Campbell is an enthusiastic and daily inspector of the nine demonstration booths which are now being constructed in Colonial style as the new home of Hillman's talking machine department.

The Tone Test on Tour

In order to acquaint the people in the vicinity of Chicago with the latest tonal achievement of Mr. Edison, Miss Marie Kaiser and Abraham Bond have been traveling Illinois and Indiana, making their concert appearance in conjunction with the Edison Diamond Disc.

Programs of nine or ten selected numbers were given in Moline, Kewanee, LaSalle, Pontiac, Hobart, Gilman, of Illinois, and Gary and South Bend, of Indiana. Miss Kaiser sings several numbers such as "Long, Long Ago," by Bayly; "Juliet's Waltz Song," by Gounod, and "When You're Away," by Victor Herbert, in unison with the re-creation of her voice on the Edison machine. Mr. Bond plays the violin in unison with such as "Meditation from Thais," and "Ave Maria," by Gounod, with the re-creation of these pieces as rendered by the violins of Albert Spalding and Carl Flesch.

This applying of the Edison "acid test," in which the real and the reproduced music are rendered simultaneously, is to be further supplemented by Miss Marie Rappold, who will appear in a tone test May 4 at the North Shore Talking Machine Co.'s concert hall.

Stewart Phonograph Corp. Enlarging

The Stewart Phonograph Corp. has been obliged, because of the wonderful demand for Stewart phonographs, to enlarge the factory facilities and work is now under way on additional buildings at the principal plant of the company on Diversey Parkway. Additional facilities have also been installed at the downtown factory of the company at Wells street and the River, where Manager L. McArthur is making use of every opportunity to bring the output up to the demand. The publicity that attended the entrance of the Stewart Co. into the field has brought startling results and furnished food for conversation among the advertising men in all parts of the country.

Martin on Southern Trip

William F. Martin, head of the Sonora interests in Chicago, leaves soon on a trip through the South as a special representative of the Sonora Phonograph Corp. Mr. Martin will travel as far South as New Orleans and then work eastward on his return trip. Mr. Martin recently returned from a trip to the East, where he succeeded in effecting arrangements that will facilitate deliveries in this territory.

T. R. Johnson, formerly identified with Edison and Pathé interests, has been made office manager of the local Sonora headquarters. Mr. Johnson is very enthusiastic over business prospects and is planning numerous activities on behalf of the Sonora line.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., of New York City, was in Chicago for a few days recently, where he called upon patrons of the company and conferred with S. A. Ribolla, local representative of the Heineman Co.

Geo. D. Mitchell in New Position

George D. Mitchell is an addition to the sales force of the Chicago Hinged Cover Support & Balance Co. Mr. Mitchell has been very successful in his first month of work and has succeeded in equipping the lines of several prominent manufacturers with "the cover without a catch."

Playerphone in New Quarters

The Playerphone Talking Machine Co. moved last week from the temporary quarters on the sixteenth floor to the eighth floor of the Republic Building, where permanent quarters have been fitted up. Besides a general reception and showroom, there are two large private demonstration booths, private offices and clerical department. The acquisition of the added facilities is already proving its worth and the unavoidable delays that were present during the occupation of the temporary quarters have been entirely eliminated.

Expert repairing for the trade a specialty

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 36)

President D. W. McKenzie is perfecting his wholesale salesforce and Playerphone travelers are now working all parts of the Middle West. Sydney De La Vars is covering Michigan and Indiana; George A. Cowen is in Minnesota; A. L. Kugel is taking care of Ohio; L. E. Hotchkiss is kept busy with Pennsylvania and New York; Louis and Van Sickle are in charge of the work in Iowa, and G. E. Candless is showing the "Show Me" State. O. E. Hutchings has been appointed Kansas City jobber and the Oklahoma Book Co. has been appointed Playerphone jobber of the State of Oklahoma.

Some radical changes and improvements have been made in the construction of the Playerphone, particularly in connection with the tone arm and sound chamber. Changes have also been made in the construction and design of the cabinets and President McKenzie announces that some attractive designs in Chippendale and William and Mary periods will be brought out in the near future.

How the Chicago Cubs Enjoyed Their Trip

When the Chicago Cubs left for their training trip to Palm Beach, Fla., a few weeks ago, they were followed with good wishes and gifts from thousands of admiring "bugs." Everything possible for the comfort and convenience of the

Cubs' Special, Showing Victrola's Place

ball tossers was done and prominent in the relief work was Fred. A. Siemon, of the Rudolph Wurlitzer Co. Siemon had installed in the club car of the train a Victrola XVI. with an ample supply of records, a Wurlitzer automatic piano and one of the small, but big-toned, Princess pianos. The Brunswick-Balke-Collander Co. also had a small pool table on board. The hardest-worked of the four was the Victrola, with the other three devices tied for second place. It is rumored that small ivory cubes with mysterious black symbols upon the six faces thereof, were also used on the smooth surface of the pool table, thus creating a new use for said table.

The three grinning billikens by the edge of the piano "fans" will recognize as Pudge Henricks, Mordecai Brown and Rollie Zeider.

Good Business for Edison

The Phonograph Co. of Chicago reports a generous increase in the extent of its business over March of last year. The Phonograph Co. is anticipating even greater prosperity on account of the greater quantities and greater varieties of records which are actually arriving.

Name Plates in Demand

Dealers throughout the Middle West are evidently paying more serious attention to the record business judging from the reports received from name plate manufacturers recently. Joseph Crampton, Jr., director of sales of the Meyercord Co., of this city, said "There has been a remarkable increase upon the part of dealers for transfer, decalcomania and name plates. Dealers all seem to be realizing the value of having their name upon the inside of the cover, knowing that the machine owner generally makes up his mind to buy some new records while he is actually putting some of the old ones on the machine. Another thing, that people to-day are buying talking machines in order to keep up with their neighborhood, is having its effect, and dealers are proving that one owner can pass the good work along to a prospective buyer.

Completes Musictrola Line.

Passow & Sons, makers of the Musictrola, have just completed their line by the addition of four lower-priced machines, retailing respectively at $15, $25, $40 and $50. The $15 and $25 machines are without covers. The $40 and $50 machines have covers and play both lateral cut and hill and dale records. These styles, with the $75, $100 and $150 machines, which have been on the market for several months, are all illustrated elsewhere in this issue. Louis Passow, of the firm, announces that they have all types of Musictrolas coming through the factory in large quantities and are able to make prompt shipments.

Add Six Best Sellers

The heavy demand in the Edison records during the last few weeks has fallen on the following records: "Loading Up the Mandy Lee," and "Some Little Bug is Going to Find You;" "Could the Dream of a Dreamer Come True?" and "Mister Silver Moon;" "Dancing with Ma Honey" and "Twinkle Waltz;" "Ballymooney and Biddy McGee" and "I'm Looking for Antone;" "Where the River Shannon Flows" and "Irish Eyes of Love," and "Ah Fors e Lui" with "Explanatory Talk for Aria" on the reverse side.

The six best sellers in the Pathe library the past few days included: Cavalleria Rusticana, "Intermezzo" and "Spring Song" (Mendelssohn); "Hungarian Rhapsody No. 2" Parts 1 and 2; "Are You From Dixie?" and "Honey Bunch;" "Mon Bijou" and "In the Shadows;" Carmen, "Habanera" and "Soaring Flames," Il Trovatore; "You Go Your Way and I'll Go Mine" and "When I Get Back to the U. S. A."

South Michigan avenue, this city, has issued a very attractive circular of the Orotund sound box, which they manufacture. It is attractively illustrated and tells why and how the Orotund produces the excellent tonal results for which it has become so well known.

Interesting Visitor from Java

A very prominent visitor here recently was L. Zecha, who is proprietor of the Soekaboemische Snelpersdrukkerij, and managing director of the "Mataram" Tea Planting Co. Mr. Zecha's home is at Soekaboemi, a few miles from Batavia, which is the principal city of Java. Mr. Zecha was in Chicago during the course of a trip around the world, and while here looked over the field of musical instruments. He called upon several of the largest piano manufacturers and also examined various automatic instruments, all of which he planned to import to his own country. The man from far away Java also is keenly interested in various new talking machines produced in Chicago. Mr. Zecha said that the Javanese insist upon very high-class music and that the motion picture theatres of Java offer a first-class field for musical instruments of various types. Mr. Zecha will stop at Cincinnati, where he has a son studying lithography and other branches of work at the Cincinnati Technical Institute.

Majestic Phonograph Co. Enters Field

The Majestic Phonograph Co. has been organized and incorporated with a capital stock of $100,000 to manufacture talking machines and has taken temporary quarters on the ninth floor of the McClurg Building at 218 South Wabash avenue. The officers of the company are B. B. Blood, president; J. R. Stafford, secretary, and F. L. Tate, treasurer. Oscar J. Kloer is sales manager. The company is planning at the present time upon four styles of machines, all of which are operated exclusively with electric and storage battery motors. Jewel point needles are also a feature. By the first of May the company will be in its permanent quarters on the fourth floor. The sample instruments, which have been placed on display, include some novel features. The tone chamber passes around both sides of the motor; the top of the machine is raised from one side and a graduating device is also included.

Must Specify Partial Ownership

An inquiry made to "The Friend of the People" department of the Chicago Tribune, is of interest to talking machine men. The letter and answer are as follows:

"Chicago, April 2.—The insurance policy I carry on my furniture has a paragraph stating that the entire policy shall be void if I am not the sole and unconditional owner of the property insured. I am buying a phonograph on a contract which provides that it shall not become my property until it is fully paid for. Does this make my entire insurance invalid?—M. A."

"You should have an indorsement on the policy showing that you are buying the phonograph on such a contract. It is true that companies very frequently waive conditions of the policy, but when tested it has been held that violation of the policy in regard to part of the property may invalidate the whole insurance. Even if the company did not claim the whole insurance was void, it might refuse to pay for damage to the phonograph unless the facts in regard to ownership were shown in the policy."

Highland Kilts Aid Lauder Sales

The talking machine department of Rothschild's offered a novel concert and incidentally benefited its sales by the offering of a free concert of record recitals in costume. Manager Dvorak arranged for the service of J. Coates Lockhart, the tenor soloist of the Kilties Band. The program consisted of a group of songs with piano accompaniment and also accompaniment on the Victor. Mr. Lockhart's interpretation of the Lauder songs in combination with his costume and ability to sing the songs in real Highland accent, interested a large crowd.

Buys Rintelman Needle Interests

H. L. Harris, a prominent motion picture man of Chicago, has acquired the entire rights to the Rintelman four-point noiseless needle patents and is organizing a company for its distribution. "We have not developed our plans completely as yet," said Mr. Harris, "but the needle will be marketed by the Supreme Sales Co. and the product will be marketed under the name of the "Golden-Tone" needle. C. E. Eckles will be general manager and he is working out plans for the manufacturing and distributing departments. We are making a number of improvements and intend to place upon the market a vastly superior article." The offices of the company will be at 207 South Wabash avenue.

Vitanola Co. in New Quarters

The Vitanola Talking Machine Co. is now located in its new quarters on the third floor of the building at 210-212 South Wabash avenue. Although the new quarters take up 10,000 square feet of space they are but temporary and plans are being made by the officers of the company for an even greater expansion in the near future, all of this depending upon the date of completion of factory enlargements. In the Wabash avenue building there is a large space

Sell ALL Talking Machines in ONE

The Playerphone meets every desire in talking machines. It incorporates the final developments in this field. The Playerphone combines the best features that both dealers and customers look for.

The price at which you sell Playerphones is the most unusual feature of all. In performance and appearance it often equals and excels instruments retailing at from one-quarter to one-third more.

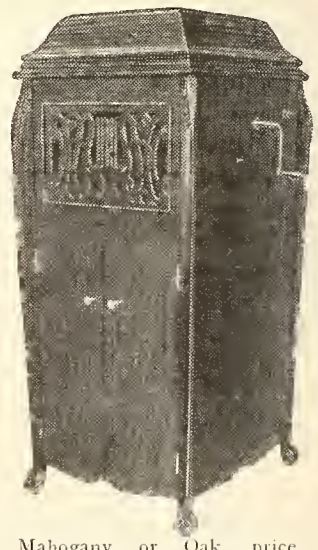
Plays Every Disc Record

In the Playerphone you give your customers an instrument that plays every disc record distinctly and musically. And no change of equipment is necessary to play any of them. The Playerphone has a sapphire ball and a diamond point for "hill and dale" cut records.

PLAYERPHONE

The Quality Talking Machine

Playerphones retail at from $60 to $160. They compare closely to other instruments selling at from $100 to $250. Finished in mahogany or oak they are the utmost in talking machine construction within this range of prices.



Mahogany or Oak, price $160. 50¼ inches high, 24 inches deep, 22½ inches wide. Contains large record albums.

Invest Less—Make More

We extend you liberal terms so that you can sell for cash or on time. You receive your money before paying us. Moreover your profits will amount to about 100 per cent. on your investment. You avoid tying up your money in a big stock, and at the same time make a more liberal profit on each sale. Music dealers can add from $1,000 to $5,000 a year to their profits by selling Playerphones alone.

Full information and prices by return mail.

THE PLAYERPHONE TALKING MACHINE CO., Republic Bldg., Chicago

devoted to reception room and display, the general offices and the private offices of H. T. Schiff, S. S. Schiff and Jeffrey Schiff are to the rear of this in the shipping department.

Calls for Vitanola goods continue to be received in ever-increasing numbers, but despite this work on new styles has proceeded very rapidly.

Personals and Visitors.

C. L. Price, of the traveling forces of the Victor Talking Machine Co., was a visitor to Chicago during the month.

Emil Thiery, prominent in music trade circles of Milwaukee, was in Chicago this week. He will probably engage in the talking machine business.

Mr. and Mrs. Arthur Sweetser, the latter formerly Miss Ruth Gregory, daughter of Robert B. Gregory, president of Lyon & Healy, are the proud parents of a baby boy.

PITTSBURGH JOBBERS ENTERTAIN

Have Local Dealers as Their Guests at Dinner Given at the Fort Pitt Hotel—Association Elects New Officers—Discuss Approval Question and Listen to Good Addresses

PITTSBURGH, PA., April 11.—The Talking Machine Dealers' Association of Pittsburgh held its regular monthly meeting Monday evening, April 10, which was also the occasion of the first banquet of the trade, given by the local jobbers for the retail dealers. There was a full attendance, every house in the city having one representative or more present. Covers were laid for sixty in the English Room of the Fort Pitt Hotel, and an elaborate dinner preceded the business session.

Among other important matters that came before the meeting was the election of officers to fill places left vacant by resignation. President French Nestor, manager of the W. F. Frederick Piano Co., occupied the chair. All present received with much regret Mr. Nestor's announcement that the weight of other duties compelled him to give up the office with which he had been honored during the past year. Mr. Nestor made the principal address of the evening, reviewing the accomplishments of the organization during its one year of existence and forecasting even greater things for the future. In the election which followed, C. L. Hamilton, of the S. Hamilton Co., was named to succeed Mr. Nestor as president. He made a brief but very graceful speech in assuming the chair. Jacob Schoenberger, of Lechner & Schoenberger, was elected treasurer, succeeding Mr. Hamilton. A. R. Meyer, of the Henry Co., was elected secretary, succeeding Norman Cook, formerly manager of the Boggs & Buhl talking machine department, who resigned upon leaving this city recently.

Seventeen new members were then received into the organization. The membership now numbers forty-five, including practically all of the talking machine dealers in Allegheny County. A general discussion of trade topics followed, nearly every one present taking part. The question of cabinet outfits was gone into at length, it being agreed that all advertising of outfits be explicit and in no wise misleading as to value and prices. Another topic was that of sending out records on approval, a large majority favoring the absolute abolishment of this practice. It was brought out that a number of large local houses have already discontinued the approval policy. The discussions were entered into with the greatest of enthusiasm and interest, although no definite action was taken at this time. Preliminary plans were made for the annual outing of the association in July.

VICTROLAS FOR U. S. S. "NEVADA"

Seven Machines of Various Types Included in Order Secured by Lord & Taylor, New York

A recent and important Victrola deal was put through last week by Manager H. E. Speare, of the Victrola department of Lord & Taylor when he sold seven machines of various models to be installed on the United States battleship "Nevada," now at the Brooklyn Navy Yard. The order included four machines of the $75 type and one each of the $100, $150 and $200 models, together with a suitable supply of records.

The Nebraska Cycle Co., Omaha, Neb., Victor distributor, reports a very active trade in its territory. Conditions closely resemble a Christmas demand.

The most significant trade-mark in the world of music. -:- -:- -:-

What do the two tied music notes mean to you as a dealer?

Musical sounds—that's what they meant, and that's all they meant, until we put Columbia on them and then put them on Columbia products.

Soundness—that's what they mean right now: merchandising soundness—soundness of manufacturing method, soundness of selling policy.

The Columbia twin music-note, trade-mark, this prosperous month of April, 1916, stands for prestige—prestige of dealer and manufacturer, in equal quantities, on equal terms.

We don't need to tell you to keep your eye on it—you have unmistakably been doing it.

LARGE ATTENDANCE AT TALKING MACHINE MEN'S DINNER

Members of Local Trade to Number of 250 at Annual Banquet of the Association at Hotel McAlpin—Listen to Some Excellent Addresses and Have Good Time Generally

With over two hundred members of all branches of the talking machine trade of New York and vicinity gathered around the banquet tables in the ballroom of the Hotel McAlpin on Wednesday evening of this week, The Talking Machine Men, Inc., offered unquestioned proof of the growth in the power and scope of that organization, of the fact that the talking machine men are the kind who like to mingle with their fellows in business at intervals, and that the industry has reached the point where a local association assumes genuine importance. At the tables were representatives of the manufacturers', jobbing, retailing and accessory divisions of the industry mingling together in perfect harmony.

Imposing Attendance at Annual Banquet of the Talking Machine Men, Inc., Hotel McAlpin, April 12, 1916

After the discussion of the attractive menu provided by the hotel, John E. Hunt, president of The Talking Machine Men, Inc., assumed the duties of toastmaster and introduced as the first speaker, Wm. H. Weeks, former District Attorney of Putnam County, New York, who had for his subject "Good Fellowship." Mr. Weeks' address was of a general character, at all times interesting and inspiring, though he succeeded in injecting considerable humor into his remarks.

The next speaker was Henry C. Brown, advertising manager of the Victor Talking Machine Co., who began his remarks with an interpretation of what constitutes dominating advertising. "To have your advertising dominate," said Mr. Brown, "does not mean that you must take a full page in the newspaper and say nothing. It means rather that you take whatever

space you can afford, whether small or large, and say something in that space. If you can train the people in your locality to think of your store whenever they want talking machines and records, then your advertising is dominating."

Mr. Brown also held forth at some length on the growth of the Victor Co. since it started in business. He stated that although Mr. Johnson started the business in one small room, the present Victor Co.'s plant, if rebuilt in the form of one-story buildings 100 feet wide, would extend for three and one-half miles. At the present time there are 8,500 employes in the Victor factory, and yet the goods cannot be turned out fast enough. Mr. Brown also emphasized the importance of the Stevens bill to the talking machine trade and ended his interesting talk with a touching tribute to the memory of Edward Lyman Bill, publisher of The Talking Machine World, who was a speaker at last year's dinner of The Talking Machine Men.

Toastmaster Hunt next introduced Marion Dorian, treasurer of the Columbia Graphophone Co., who spoke at considerable length upon the stupendous character of the talking machine business of to-day, giving facts and figures. The speaker traced the development of the talking machine from a position as a toy of the rich some twenty-five years ago, to its present standing as a universal musical instrument, to be found in the homes of the rich and poor alike. He emphasized its educational possibilities and its ability to teach the child under the guise of offering amusement and entertainment.

Mr. Dorian declared that the talking machine business was in no sense temporary, but was permanent and would continue to grow indefinitely. In closing he outlined the Columbia Co.'s policy in its relations with its dealers; its strict adherence to the policy of price maintenance and its interests in the welfare of the trade at large. He also endorsed the Stevens bill, and declared that the bill was a sign of the times and that the price cutter must go. Mr. Dorian also referred humorously to some of General Sales Manager Bradt's troubles. Mr. Bradt joined in the laugh at his expense.

The next speaker was Frank L. Devine, of the Merchants' Association of New York, who dwelt upon the work that trade organizations may accomplish. He expressed the opinion that the annual dues of the talking machine men should be raised above the $3 now charged annually. "You can only get $3 for $3 worth," declared Mr. Devine. "A $3 clerk will do $3 worth of work and a $10 clerk will do $10 worth of work. The members of The Talking Machine Men should support their officers not only morally, but in a financial way that they may carry out plans for the improvement of the trade in general." Mr. Devine also gave some figures regarding New York as a convention city and a manufacturing center, and declared that the manufacturers of this city exceeded those of Philadelphia, Chicago and Boston combined, and that the capital invested and the output of finished products exceeded the total of Philadelphia and Chicago together. He also stated that 37 per cent. of the Federal income tax was collected in New York City.

R. W. Morey, general manager of the New York Talking Machine Co., next addressed the gathering on the broad subject of "Service," which he divided into three sections, namely: safety, courtesy and loyalty, with special emphasis placed upon the value of courtesy in the development of any business. Mr. Morey pointed out that the successful dealer was the one who injected the element of courtesy into his business personally and who, although having a corps of trained clerks, found time to extend a greeting to every customer as she or he enters the store.

W. B. Holland, of the American Fair Trade League, held forth briefly on the evils of price cutting and of the unfair competition developed by that system. Mr. Holland made one excellent point to the effect that the price cutters did not advertise the goods, but traded simply and purely upon the name. It was not just soap or silk or talking machines sold at certain special prices, but special brands of those goods that were offered at an inducement.

The final speaker of the evening was J. Newcomb Blackman, of the Blackman Talking Machine Co., who confined himself chiefly to some humorous remarks and promised that he would talk on the Stevens bill, in which he has taken a great personal interest, at a later meeting of The Talking Machine Men.

Taken all in all, it was the most successful affair yet held by The Talking Machine Men and should prove a means for greatly increasing the membership of and interest in The Talking Machine Men, Inc.

In order that the diners might make notes of matters that interested them during the evening, there was placed at each plate, before the banquet, a convenient pencil with the compliments of Schloss Bros.

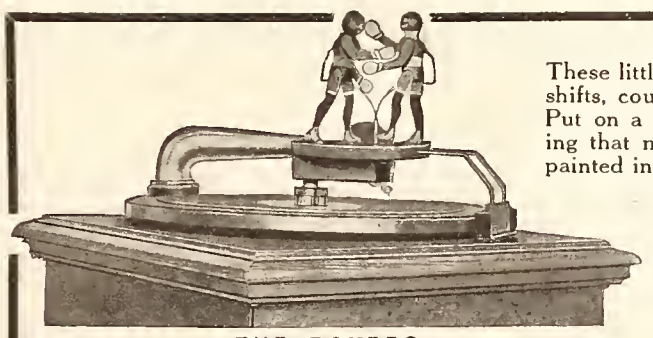
WILL NOT DELAY SHIPMENTS

A fire occurred in the building at 136 Liberty street, New York, causing considerable damage to the stockroom and offices of George A. Smith & Co., Inc., makers of Magnet decalcomanie. It will not, however, inconvenience them in the delivery of goods.

MOVES TO LARGER FACTORY

The Oceanic Import and Export Co., manufacturers of sound boxes, tone arms, etc., formerly located at 154 Nassau street, New York, has moved to larger quarters at 290 Church street, where new machinery is being installed.

The voice of the noted operatic and concert artist, Yvonne de Tréville has been recreated by Thomas A. Edison. Her first recreation was announced in the fifty-fifth supplement to the Edison diamond disc record catalog.



THE BOXERS
PATENTED MARCH 16, 1915.

These little Black Boxers execute all the blows, swings, shifts, counters, and side-steps known—and then some. Put on a good lively record and you'll see some boxing that makes any one scream with laughter. Hand painted in four colors and sold retail for $1.25.

RAGTIME RASTUS, the automatic dancing darky, is the delight of thousands. This is no doubt the fastest selling toy on the market. Hand painted in four colors. Retails for $1.00. Doesn't mar or slow down the machine; doesn't injure records. Excellent window demonstrator. An all-year-round seller, so you can stock up without fear.

RAGTIME RASTUS
PATENTED MARCH 16, 1915.

Toys

Many dealers in the United States and abroad have found "National Toys" the toys for use on talking machines, not only fine window displays, but good all-year-round sellers, and novelties that bring new people to their stores.

These toys do not fit the Edison Machine

Ragtime Rastus retails for $1; The Boxers sell for $1.25; combination of both retails at $1.50. 33⅓% discount in dozen lots. Discount on larger quantities.

Our latest marvelous toy is the Wireless Pup, operated by sound waves. Whistle, and the dog jumps out of his house—entirely by wireless. Built on scientific principles similar to those underlying the art of submarine signaling. Retails at $5. Sample sent for $3.50. We already have filled many repeat orders on the Wireless Pup from talking machine dealers. It is such an unusual novelty that any store with well-to-do trade can sell them.

Send in your order now—get them going in your store and liven things up.

National Toy Company
271 Congress Street, Boston, Mass.

THE TALKING MACHINE'S RIVAL

If Recent Experiments Work Out Successfully Future Generations May Get All the Music They Require from an Electric Bulb

A recent issue of the Editor and Publisher, commenting on some experiments which have been made to convert light waves into sound waves, heads the story with the following couplet:

When every little twinkling light
Shall sing a different tune,
I fear we'll lie awake at night—
Then sleep till almost noon,

and goes on to say:

"The other day a mechanical wizard fabricated an electric light bulb from whose tongue of fire he succeeded in making audible waves of sound to issue. The gulf hitherto existing between acoustics and optics was bridged and the two philosophies joined hands to take a synthetical place among the world's marvels.

"The achievement was at the time heralded far and wide with scare headings, but in reality the thing still rests in the experimental stage, which accounts for our not having heard anything more about it for many weary months and years.

"The magnificent possibilities that lurk in this marvel are, however, simply staggering. When they shall have passed the research period and emerge from their present dormancy to enter into the commercial application that awaits them, the imagination halts in its contemplation of what can be done with the partnership of sound and light.

"If the light of the sun can be converted into collateral sound—but what's the use?

"In a minor key there is a large field for the conversion in the Tungsten filaments and in the flaming arc.

"If to the dazzling light of the modern electric signs, now so attractive to our rural visitors as well as to the natives of our great city, shall be added the resonance of sound, the result will, in many ways, be typical of a healthy boiler factory.

"'Shriekin' will only faintly describe the ultimate condition of things in the new dispensation.

"We may indeed confidently look for an early application of the future developments of the marriage of sound with light in the advertising field that is so sensitive to the enlargement of publicity as a tillable field.

"When the flood of light that streams from theatrical fronts and vaudevillian houses shall take on the speaking voice the megaphone shall hide its head in very shame and dire confusion. The sound of the human barker, for obvious reasons, will no longer be heard in the land.

"Color music will then come into its own and optical sonatas and light songs and words will have their day.

"The society for the suppression of useless noises will necessarily take on a new lease of life and there will be many sighs for the good old days that now seem so unbearable when light and sound were separate entities.

"There is something exceedingly fascinating about talking light, but before inconsiderately embracing it let us take a leaf out of the railroad book and 'stop, look and listen.'"

HOW HE ARRANGED IT

"Bobby," inquired the mother, "did you wash your face and hands before the music teacher came?"

"Yes'm."

"And your ears?"

"Well, Ma," said Bobby, judicially, "I washed the one that would be next to her."

B. H. Buelow, formerly manager of the Edison department in the store of C. Niss & Sons, Milwaukee, Wis., is now connected with the Edison Shop, that city.

SOME HINTS ON SALESMANSHIP

The Salesman Who Understands Human Nature, and Who Concentrates His Entire Energy Upon His Work, Is the Man Who Will Win in the Talking Machine Trade

Some salesmen have individual qualifications which make it easy for them to suggest directly or indirectly the idea they wish their customers to receive. The salesman with the right personality, what we may call a "selling personality," finds it easy to direct the channels of thought of his customers. His whole attitude and expression convey the idea he wishes absorbed, and the customer unconsciously develops a favorable feeling.

In developing suggestive salesmanship, salesmanship which shall act through the indirect expression as well as through the direct, the salesman needs to know his customer's peculiarities. The better you know the individuality of the prospective buyer, the better you can lead his mental processes. The better you can read human nature, the better you can handle the individual buyer. Unless you are able to read human nature in others they will get the better of you. Your customers will prove too much for you.

It is necessary for you to keep the upper hand with the customer if you are to do the leading. This does not mean that you are going to browbeat him, but that you are going to understand him better than he understands you. Yours should be the greater mind if it is going to suggest to the other. Yours should be the self-confident position, but not the overconfident.

If your suggestions of any kind are to carry weight they must be made with enthusiasm. The customer will feel in a minute any lack of faith in your own goods. If you are apathetic, apathy will show in all you say and do about the goods. Competition is too keen for a man to be a success in selling if he feels no enthusiasm over his goods. Buyers are apt to buy that over which they themselves wax enthusiastic. But the buyer will not develop much enthusiasm when the salesman cannot develop it. Enthusiasm suggests enthusiasm and apathy suggests apathy. Without knowing why, the prospective customer who is met by an unenthusiastic salesman will himself fail to continue even the enthusiasm he felt when he came in.

You may talk in strongly favorable language of the article you are trying to sell. The price and the quality may be all you claim, and you perhaps claim enough, but along with your talk will go a sub-conscious suggestion which will unconsciously be absorbed by the buyer, and this suggestion will be one of apathy or of enthusiasm about the goods, just according to your own inner feelings.

Every sale you make is a mental transaction rather than a verbal or a financial one. In order to make the sale it is necessary that you talk and it is necessary for money to change hands. But the talk is merely the medium for the exchange of ideas. The ideas themselves are existent only in the mind. The money end of the deal is only the result of the mental transaction. It is your own mental attitude and the mental attitude of the buyer that are to be considered. The situation is controlled by these mental positions.

There is a great deal of talk about the psychology of salesmanship. That is nothing but the mental side of buying and selling; and, after all, what is there about salesmanship that is important in such a degree as the mental feature?

When salesmanship is regarded from its mental side the consideration may be slightly more technical. It may appear more theoretical. But then nothing is more practical than sound theory.

If we are to suggest definite ideas to a customer through manner and through any direct means, we must see that the conditions are as favorable as possible. In making a distinct and accurate record on the cylinder of a phonograph it is necessary to eliminate all unnecessary noises and to concentrate the desired sound waves in the receiver. In taking a long-distance telephone message where the voice is indistinct it is necessary to concentrate attention. If you are going to get a delicately expressed suggestion registered on the prospect's mind, you must see that there is no conflicting idea in the air, that the suggestion has a clear field and the mind of the recipient is in a favorable attitude. This involves careful operating, but careful work is necessary in order to perform any difficult task, and high-class salesmanship may be filled with difficulties—all of which you can overcome.

In getting an idea before the prospective buyer clearly it is desirable to emphasize its most striking characteristics. Any suggestion that is involved in a maze of detail is not a well-defined suggestion when it reaches its destination and it will probably fail of an effect.

The man who can say "thank you" as though he meant it when he sells you a postage stamp is headed straight for success.

THE EDUCATIONAL VALUE OF THE TALKING MACHINE

By Mrs. Hariette De Ment-Packard, Los Angeles, Cal.

My experience in using talking machine records to illustrate lectures before my students and the public leads me to believe that the discovery of the record as a means for spreading and bettering knowledge is one of the greatest importance to the educational world in this century.

The lesson that is taught by precept is of value; so is reinforcement of that precept by example. It is the illustration of precept, through the work of artists, that makes the record valuable to the pupil.

Those who have had their education in the so-called music centers can hardly appreciate the value of correct ideas of traditional interpretation, but the less fortunate student who by circumstances of environment has never heard an opera, an orchestral interpretation of any of the great compositions, or an artist (beyond the rank of the few reduced to "barnstorming"), he is the one to realize what the record can be to him as an educator.

These "record reproductions"—which coach not only the students in the art of interpretation, but gradually and subtly teach all those fortunate enough to come within hearing—are cultivating an ability that all America has long lacked—the ability to listen to music with intelligence.

Surely, though gradually, with the familiarity resulting from frequently hearing artists interpret great music, the hearer learns to listen, and listening, not only assimilates and appreciates, but becomes even a responsive and "creative listener."

A series of interesting papers recently appeared in the Atlantic Monthly by Robert Haven Schauffler bearing on the subjects of "The Creative Listener," "How to Listen to Music," etc. These articles interested me perhaps more than anything else on the subject that I have ever read, and they also brought me forcefully to think of the value of these reproductions through the medium of talking machine records—a value, not only to people who live in parts of the country where the arts have not yet penetrated (except through pioneer pedagogy in schools and so-called conservatories of music, whose recitals by students and faculty constitute the sole means of disseminating music), but to people in our large cities, where acquaintance with what the public expects to hear is so lacking.

To the Pianola and other player-pianos great honor is due for acquainting the world with the work of orchestral and other instruments, but to my mind the talking machine has brought an advance of incalculable value in contributing the reproduction of the human voice and also the interpretation of the classics gained from years of study by the artists with the masters.

When we begin the education of a child we give the first lessons from pictures. When he progresses we give him books illustrated by artists—the best artists available. When he studies literature as such we frequently benefit him by showing him pictures inspired through a perusal of the subject by artists, who express in color and line the thought of the poem.

The interpreter of music must have the tone-picture of music in his mind quite as definitely as the painter must have the picture of the poem before his eyes before he can interpret or recreate in music the conception of the composer who gave that creation, not in color and outline, nor the poem's tapestry of words, but in music.

The records bring within our reach the most wonderful of all music by the greatest artists the world produces. Can anything be said to add to their value as factors for education? Nothing except this: The talking machine record not only brings music within the reach of everyone, but it can be obtained at such a nominal expense that anyone who will may learn not only the interpretation of the most difficult music, but by carefully listening obtain many valuable lessons in technic.

B & B

Phonograph Covers

$5 each

NOW you can obtain the famous B & B khaki moving cover, so you can deliver your machines less all scratches and plus all of the snappy varnish finish. Illustration shows the cover, and the cover itself will say more than we can say in an advertisement of this size.

Write for one of these to-day—or a dozen. Khaki is going up in price and if you obtain your Fall supply of Covers now, you run no risk of paying more.

WANTED AT ONCE—An expert assembler of high-grade sound boxes. Must have had thorough experience in that line of work. Address "Expert," care The Talking Machine World, 373 Fourth avenue, New York City.

MUSIC PUBLISHERS BOOST RECORDS

Despite Declared Animosity Against Mechanical Music, Publishers Are Now Supplying Special Posters to Help Record Sales

In contrast to the frequent complaints on the part of music publishers that the copyright law does not give them a fair deal in the matter of the protection offered in mechanical reproduction of their music and that the talking machine record and music roll tend to injure the sale of popular songs, it is significant that not only are the majority of music publishers not only anxious but insistent that their publications be recorded in mechanical form. Not only that, but the publishers have for some time past been making efforts to assist in the sale of records and rolls.

In many cases music publishers have watched the list of the talking machine companies and have prepared elaborate display cards and posters for featuring their songs in stores and show windows and have distributed them by the thousand among talking machine dealers at about the time the record has been placed on sale. The special advertising undoubtedly increases record sales materially, especially where it links up the record with a show or an act in which the song is used. That the music publishers may not be accused of acting the spendthrift through an excess of generosity in this particular, it might be mentioned that every one of the standard records sold nets, say, two-cents royalty to the holder of the copyright, which means the publisher himself.

WANTED

A practical and experienced man, who understands all details purchasing parts and assembling talking machines. Salary and percentage of profits will be given the right man. References and past record must be given in confidence to advertiser. Box 800, The Talking Machine World, 373 Fourth Ave., New York.

$2500.00 Buys

Victrola Business; splendid location, clean stock and nicely fitted store, low rent, 75 miles from New York. Address The Talking Machine World, 373 Fourth Ave., New York.

DEBATE ON PRICE MAINTENANCE

H. C. Brown, Advertising Manager of the Victor Talking Machine Co., Takes Affirmative Side Against Percy S. Straus Before Trenton (N. J.) Chamber of Commerce

TRENTON, N. J., April 10.—Issues involved in the maintenance of re-sale prices by legislation were the topics of a debate last evening before the members of the Trenton Chamber of Commerce. The negative side of the debate was taken by Percy S. Straus, president of R. H. Macy & Co., and the affirmative side by Henry C. Brown, advertising manager of the Victor Talking Machine Co. Each speaker talked about two hours and covered the situation from his particular side most exhaustively.

The purpose of the discussion was to inform the chamber on the points raised in the referendum of the United States Chamber of Commerce, and at the close of the debate the Chamber of Commerce voted in favor of Federal legislation permitting maintenance of re-sale prices under proper restriction and went on record as opposed to Federal legislation taking the form of an amendment to the Trade Commission act defining conditions under which price cutting is an unfair method of competition.

The attitude of the local chamber, in short, favors legislation such as embodied in the Stevens bill.

THE FRAUDULENT ADVERTISER

Is Having Hard Lines These Days Owing to the Active Campaign Being Carried on by Advertising Organizations Everywhere

The fraudulent advertiser in every branch of trade is not finding the clear sailing that he did some years ago, owing to the work of the vigilance committees of the various advertising organizations throughout the country in weeding out the real fakers and protecting the interests of the legitimate manufacturer. Among other things the vigilance committees have been after those who make a specialty of "breaking up home" sales in which patented articles and trademarked articles of wide reputation are offered at bargain prices and goods of inferior quality substituted.

In commenting upon the activities of the vigilance committees the Voice of the Victor says, of the work of one of the bodies:

"Some time ago this particular committee noticed that a number of advertisements appeared, which read about as follows: 'Must sell at once my $200 Victrola talking machine. Will accept half price if taken at once.' These advertisements bore the address of a private residence in each case, though the addresses varied from day to day. They were issued every day, first in one paper, then in another.

"A visit was paid to one of the addresses given by the secretary of the vigilance committee, who was invited to sit and listen to the instrument. When he asked the woman who had admitted him if that was the $200 Victrola offered for sale, she said, 'Yes.' The secretary, who was not well-posted on Victor products, examined the instrument and found that it bore a somewhat similar name, but was not a Victrola. When the woman's attention was drawn to this fact, she said that her sister had written the advertisement and 'must have made a mistake.'

"Her visitor, carrying the investigation a little further, discovered two other similar machines hidden behind a curtain in a corner of the room, and thereupon asked the woman how she happened to have so many machines on hand. To this the woman replied that her friends had found her to be such a good saleswoman that they wanted her to sell their machines also.

"The same excuse regarding the advertisement and the extra machines was given at three other flats which were subsequently visited by the vigilance committee, and which were being used as salesrooms by the women. In one flat three machines were found, in another two, and in a third there were four machines.

"The inside history of the case is this: The firm making what the vigilance committee described as 'a cheap imitation of the Victrola,' secures women as local agents in various cities and induces them to advertise as described above. Close inquiry revealed the fact that the woman in this particular case had sold eleven machines in two weeks. The vigilance committee gave her forty-eight hours in which to stop all further advertising of such a nature, on the threat that the case would otherwise be taken to the district-attorney. Result?

"There is a law against the publishing of misleading advertisements in most of the States, by means of which the way of the transgressor can be made too darned hard for comfort."

STATE'S INDUSTRIES GROW

February's Business Report Shows Increase in Many Branches—Workers Have More Money to Buy Musical Instruments

In February the factories of New York State employed 3 per cent. more operatives and paid 4 per cent. more wages than in the month preceding, according to a compilation by the Bureau of Statistics and Information of the State Department of Labor. These figures are based on monthly reports received from 1,300 representative manufacturing establishments, with nearly 500,000 employes.

The payrolls of factories in the State carried 19 per cent. more employes than in February, 1915, and paid 31 per cent. more wages. The dominant factor in the increase in volume of business between January and February was the extension of activities in the metals, conveyance and machinery groups, and in the clothing and millinery group. Smaller, though important, increases were in the wood manufactures group, the textiles group, the paper making industry and by the food, liquors and tobacco group. The stone, clay and glass products registered a distinct loss between January and February.

The metals, machinery and conveyance group paid 57 per cent. more in wages than in February, 1915, and employed 40 per cent more operatives. The furs, leather and rubber goods group paid 33 per cent. more in February than in February, 1915.

Between January and February the metals, machinery and conveyance group increased its employes by 4 per cent. and paid 6 per cent. more wages.

NEW HOME FOR OLIVER DITSON CO.

BOSTON, MASS., April 13.—The Oliver Ditson Co. has just signed a thirty-five year lease on the old Knickerbocker Hotel property at 79 Tremont street, this city. The company is planning to erect a ten-story building on the site and to occupy it in the summer of 1917. Special attention will be given to the layout of the Victrola and musical instrument departments.

Mutual Talking Machine Co.

$1,000 SONORA PHONOGRAPH

The Latest Addition to the Line of the Sonora Phonograph Co. Announced to the Public Has Many Unusual Features That Interest

Public announcement was made recently by the Sonora Phonograph Corporation, 57 Reade street, New York, of its newest and greatest achievement, the "Supreme" Model, retailing at $1,000. This phonograph has many radical improvements in its construction and tone quality, and one of its important features is the wonderful way it reproduces sound from records which are apparently worn out. As will be seen from the illustration, this model possesses a very striking design, being made with a double bulge effect. The first cabinet for this machine took fourteen months to make, which shows the tremendous amount of effort and energy utilized to accomplish this achievement.

Since its announcement, President Geo. E. Brightson has been showered with congratulations not only from dealers but from jobbers and the public.

The first model shown at the Sonora Fifth Avenue salon, at Fifty-third htreet, was purchased within a few hours after it was on exhibition.

A special catalogue will be issued devoted exclusively to the "Supreme" model of the Sonora, and unusual efforts will be made not only by this company, but by its officers, in creating a sale for this that will be in harmony with its wonderful musical quality.

Sonora "Supreme" Model

AMEND UNFAIR COMPETITION LAW

Law Passed in New Jersey in 1913 Now Changed By Striking Out Certain Words

The law which was passed in New Jersey in 1913, prohibiting the use of manufacturers' names or the depreciation of manufacturers' prices *"for the purpose of attracting trade for other goods,"* has been amended by striking out the words italicized above. The original law was passed at the request of the Advertising Men's League of New York, and was tested in the case of Ingersoll vs. Goldstein in the New Jersey Court of Chancery. The court held that the law was in derogation of the common law, and must be strictly construed. A notice in an Ingersoll watch, forbidding its sale at less than one dollar, but not in terms prohibiting the practice denounced by the statute, was insufficient. The amended form of the law, which was approved by Governor Fielder on March 16, reads as follows:

"It shall be unlawful for any merchant, firm or corporation to appropriate for his or their own use a name, brand, trade-mark, reputation or good-will of any maker in whose product said merchant, firm or corporation deals, or to discriminate against the same by depreciating the value of such products in the public mind, or by misrepresentation as to value or quality, or by price inducement, or by unfair discrimination between buyers, or in any other manner whatsoever, except in cases where said goods do not carry any notice prohibiting such practice, and excepting in case of a receiver's sale, or a sale by a concern going out of business."

The employes of the American Graphophone Co. factory at Bridgeport gave a dance on April 8.

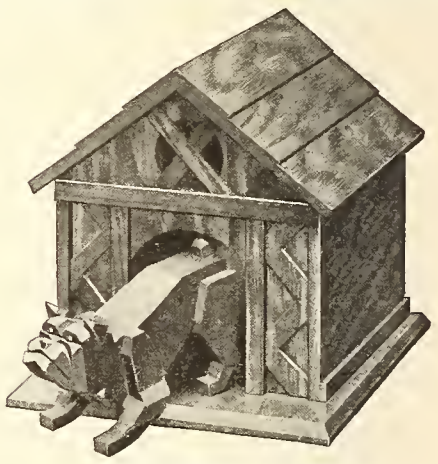
NEW SCIENTIFIC NOVELTY

Recently the National Toy Co., 273-279 Congress St., Boston, Mass., created a new scientific novelty which was named the "Wireless Pup"—"comes when you call him."

This scientific novelty is operated entirely by sound waves, and when the dog is in the kennel any one whistling will cause him to come out. The apparent life in the dog is almost unbelievable and people have to see it work before they believe it.



"The Wireless Pup"

The novelty is retailed at $5, allowing a good profit to the trade.

Another New Triton

Style "C" (Retails $17.50)

Notice the lines on this new model, conforming to all details of good phonograph construction. Cabinets possess a high-grade mahogany finish, and the visible parts are well nickel-plated. Size is 16 x 16 inches square, 11½ inches high.

Each style "C" is equipped with the Triton reversible tone-arm, playing with a mere turn WITHOUT any special attachment—all makes of records, whether lateral or vertical cut.

For the past FOUR years you have been hearing a whole lot about Triton phonographs, and this achievement is our best effort. Consider, too, that we grant exclusive territory to live dealers, and that our discounts are 40% in small quantities and 40% and 10% in large numbers. Write us to-day for territory allotment. Sample machine sent for $12.

Triton Phonograph Co. **41 Union Square New York**

Whether looked at from the view-point of art, reproduction, volume or tone, the Columbia Grafonola 200 is a winner for any line.

Columbia Records TRADE MARK Note the Notes

HOW COMMON SENSE SPELLED SALES SUCCESS

Disciple of "High Brow" Music Had to Give Way to Salesman Who Recognized All Tastes—Catering to Desires of Customer Instead of Forcing One's Opinion on Him

The manager of a successful talking machine shop in an Edison town, which had struck the representative as one of the best managed, smoothest-running in his experience, was asked by a World representative how he had put his organization into such efficient shape.

"It wasn't easy," said the manager. "Less than a year ago this shop was hardly excusing its existence. Sales were nowhere near what sales in a town like this ought to be. To-day the business is O. K. The real reason lay in the methods and personality of the head salesman. Last year I had a man who seemed all right. He certainly knew the records. There wasn't one in the catalog that he didn't know by its first name and its number. His memory was prodigious. He had a suave manner that was attractive to a certain class of the trade. But he didn't produce the business I knew we ought to have; so I watched him carefully, and I discovered why.

"The man's highly developed musical taste interfered with his work. If a customer asked to see the latest rags, he couldn't quite hide a sneer. Have you ever observed that sort of thing at work on a would-be buyer? With intelligent customers it is about the best business-loser going. People don't like to have their tastes questioned in music or anything else. The business man who prefers ragtime, prefers ragtime. He doesn't want Metropolitan opera. He doesn't want any salesman to reform him. So my head salesman's attitude toward the customer who didn't want high class music was losing me business, and I decided to let him go.

"Do you think I went out and hunted up a man who had made a reputation elsewhere? No. I pushed up into the head salesman's job a young chap who had worked as understudy to him. I had observed that his methods were different. And he made good. Simply because he had the right selling idea—the common sense method of handling trade. He didn't stand on a pedestal. He served the customer instead of advising him. He kept his personal opinions in the background until they were called for. He hadn't memorized the entire catalog, but we had a young lady who could pick 'em off the shelves pretty well, and she attended to that part of it.

"The new head man simply tried to understand his patrons' needs. After a time he could ask a few questions, play over a record or two, and gauge his man with almost unfailing exactness. He became a psychological wizard. People began coming back, time after time. They always asked for him, and if he happened to be out, they waited. They are doing that to-day, only more so.

"Sometimes we have three or four people in the reception room waiting for Mr. ——. They want him to wait on them because he wants to wait on them. They want his advice because he doesn't thrust it on them. They may know that he is guiding their choice of records half of the time, but they are glad to let him do so, because he has won their confidence. They take his suggestions in good faith. They are satisfied with the service he gives them. Incidentally, the business hasn't fallen under $4,000 a month for several months, whereas it used to drop below $2,000 under the man who undertook to raise the level of musical appreciation by thinly veiled scoffing at popular stuff.

"And I happen to know that the chap on the job now knows as much about high class music as the other man ever knew. He attends recitals and concerts and the opera. But he realizes that business is business; trade is trade; people are people; that the usual excuse for running a store is the desire for reasonable profits, and that said profits can best be achieved by serving the public agreeably. Personally, moreover, I believe and I think my head salesman believes, that the best way to raise the level of musical appreciation is first to give a man what he thinks he wants and then to work toward what your best judgment tells you he ought to want—if you care to advance the human race in that way. Don't try to sneer or club esthetic tastes into your customer; hand him his esthetics on a silver platter, garnished with diplomatic language. Remember that "the best dishes, once tasted, are their own best argument."

LAW-MAKERS VISIT VICTOR PLANT

CAMDEN, N. J., April 5.—Members of both Houses of the State Legislature were the guests of the Victor Talking Machine Co. here a few days ago. Senator Read, Clerk of the House Jefferys, and Assemblymen Kates, Wolverton and Pancoast acted as a reception committee, in conjunction with the officials of the concern. The visitors were conducted through the entire plant, and were much interested in watching the various processes used in the construction of the Victor talking machine. Luncheon was served in the company's restaurant building on Second street, opposite Cooper Park, where President Eldridge R. Johnson will erect a $130,000 public library as a gift to the city of Camden, and for which the Legislature recently passed an enabling act. State Assessor Baird addressed the visiting law-makers during the luncheon, after which they went to the recording laboratories, where former Judge William N. Runyan, Assemblyman from Union County, sang "A Perfect Day," making an excellent record, which included the applause of the legislators.

Elizabeth Brice and Charles D. King (Brice and King), the popular artists at present with "Watch Your Step" company, have entered into a contract for the making of records for the Columbia Graphophone Co. through Henry D. King, manager of the professional department.

United States Army Pays Tribute

We have recently received a remarkable, unsolicited letter from H. T. Aplington, 2d Lieut., 15th Cavalry, U.S.A., stationed at Ft. Wm. McKinley, Rizal, Philippine Islands.

Lieut. Aplington states that a talking machine purchased by his troop in Texas and shipped in an "Atlas" Packing Case aboard the U.S.A. Transport "Sheridan" to Manila passed through what was probably the severest typhoon ever encountered by a vessel on the Pacific. This typhoon, with its terrific seas and wind of over one hundred miles velocity, necessitated the halting of the vessel for many hours and the tossing, rocking and plunging was more severe than that which falls to the lot of many vessels during their entire career. Of course the "Atlas" case arrived in splendid condition with its contents uninjured.

THIS IS ONE MORE PROOF THAT

CINCINNATI TRADE VERY ACTIVE

Shortage of Popular Goods the Chief Complaint —Phonograph Shop Very Successful—Record Demand on Increase—Other News

CINCINNATI, O., April 4.—Sort of the old story about a shortage of goods and the phenomenal demand for talkers of all lines was the March story so far as Cincinnati was concerned. The trade is anxious to get an excess of machines on hand, but the jobbers and dealers believe this will not come to pass for some time. There appears to be but one exception, the Otto Grau Piano Co., which claims to be accumulating some Victor machines.

At the Cable house last month the business in both machines and records, according to W. A. Davin, was almost on a par with the holiday rush. This department, like all in connection with piano houses, was started rather reluctantly but has proven itself to be so substantial that Mr. Davin now devotes his entire time to that section.

The Phonograph Shop, dealing exclusively in the Edison Diamond Disc machine, which was opened less than a month ago at 146 East Fourth street, has been very successful from the start, according to George Wabnitz, the owner. George Meeks, his assistant, was at Richmond, Ky., yesterday drumming up a new field for Edison machines. Mme. Rappold, one of the Edison artists, will take part in a tone test recital at Emery Auditorium, May 1. Initial preparations are being made for the event. Anna Case, another Edison favorite, recently appeared in a Symphony Orchestra concert. The coming of Miss Case and the opening of the Phonograph Shop were an exciting combination. Mr. Wabnitz was instrumental in securing an insert in the orchestral program which attracted considerable attention.

Manager Dittrich, of the Rudolph Wurlitzer Co., to-day said:

"The feature during the last thirty days in the talking machine business has been the tremendous demand for records. There never is an idle moment in our record department either wholesale or retail, and we have had every reason to congratulate ourselves on the recent increase in our record stock, which has enabled us to take care of the situation in a more satisfactory manner.

"The new Tungs-Tone Stylus is a tremendous drawing card, although the shortage in the Tungs-Tone prevented us taking care of even a part of the tremendous demand.

"The wholesale business is extremely satisfactory in every way. While the machine shortage continues, the record situation can be handled in a satisfactory way, and dealers apparently are making the best of the big demand that exists for Victor records."

Manager Whelen, of the local Columbia store, stated that "Cincinnati has enjoyed another phenomenal month's business and total results went way ahead of March, 1915, despite the fact that there is still a shortage of the small machines up to $50. The larger machines are coming through fairly prompt now and business seems to be limited only to the stock that we can procure from the factory. We can dispose of all we can get and then considerably more."

Mr. Binger, auditor of the Columbia Graphophone Co., spent a few days in Cincinnati during the past month and reports big increases in total results all over the country.

S. H. Nichols, district manager of the Columbia Graphophone Co., spent a day in Cincinnati, and as Mr. Nichols is always gladly welcomed at the Cincinnati store, his visit was entirely too short.

Dealers all over the country are reaping a harvest with

6,000 AT PATHE DEMONSTRATION

Some Excellent Publicity for the Pathephone in Connection with the Recent Style Show Held by Zanesville, O., Dealers

ZANESVILLE, O., April 5.—The H. A. Sturtevant Co., local representatives of the Pathé Frères Phonograph, recently gave an elaborate demonstration of that instrument in connection with the big style show which was held in this city. The company hired the Weller Theatre for two days and gave four performances, the total attendance exceeding 6,000.

R. A. Alpers, traveling representative of the Fischer Co., Cleveland, O., opened the program at each performance with a talk concerning the construction, quality of tone and exclusive features of the Pathephone and gave detailed information regarding the prices of both machines and records. The records themselves were demonstrated most effectively in connection with the playing of violins and other instruments by members of the orchestra.

P. M. Baker has taken over the talking machine business formerly owned by P. T. Eggleston at Waterloo, N. Y.

THE TALKING MACHINE STORE OF THE SMALL VILLAGE

Some Good Advice Upon This Subject from a Veteran Talker Man Which Should Be of Interest to All Dealers Who Contemplate Extending Their Business to the Rural Districts—How a Man with Ideas "Made Good" and Created Enthusiasm in His Town

It was within the cozy confines of a Pullman coach on the Atlantic-by-the-Sea Express, that the great John Jones, proprietor of the Unique Talker Shop, Blanktown, N. Y., unbosomed himself to the writer upon the absorbing subject, "The Talking Machine Store in the Small Village."

We were rolling smoothly along beside the ice-clad Delaware, watching with great interest the attempts of a rakish scooter yacht to keep pace with the flying train. For a mile, at least, it was anybody's race; then, as the engineer slowed down for Wurlington, the white-winged craft forged ahead and disappeared from our zone of observation; not, however, before I noticed, blazoned in huge letters across the mainsail, the words, "Unique Talker Shop, Jr., Port Haines, N. J." I also remembered with pleasure the picture of the skipper, a pretty young girl in white furs, waving us a saucy adieu with a mittened hand jauntily upflung.

"Handles it well, doesn't she?" exclaimed Mr. Jones enthusiastically. "Just as clever with a launch or canoe. Believe me, she's some girl—my assistant manager at Port Haines."

"Port Haines? I'm afraid I don't understand. Am I to infer that you have brought a talker shop to the Jersey wilds?" I asked, with ill-concealed astonishment.

"Oh, pardon me, son," apologized my companion, "I had forgotten you did not know of my last venture. In fact, mentioning it at all just at this time was more or less of a slip on my part; but now that the cat is out of the bag, I'll tell you about it, for I rather think it will make good copy."

I expressed my thanks, and simultaneously reached for my notebook.

"As you have probably noticed, son," he resumed, glimpsing my businesslike preparations, "I can't talk without the friendly companionship of a a good cigar. Let's go forward and smoke."

Comfortably settled within the cushioned depths of his easy chair, something cold in a tall glass at his elbow, and fragrant weed aglow, John Jones sighed in sweet contentment. "This is the life," quoth he.

"About that store at Port Haines?" I queried.

"All right, son; I'm ready when you are." Then, noticing my poised pencil and opened notebook, he began:

"The idea of extending my business to a small village such as Port Haines did not originate with me. My star salesman, as you know, recently took unto himself a wife; deprived me of the best stenographer I ever had, too, when he did it. We had a little confidential chat just prior to that momentous event, in which I assured him that his salary would be materially advanced as became a married man; and, after he had thanked me, he said he had a scheme in his mind that he would like to thresh out with me at my convenience. He explained, incidentally, that there was money in it. 'One good turn deserves another, boss,' he remarked, with that contagious grin of his.

"Well, I let him have his head in the matter of talk. I knew by experience that nine out of every ten of his ideas were money makers, and I felt that it was up to me to sit tight and listen to what he might have to say.

"At the conclusion of our conference it was decided between us that Port Haines was to have a talker shop, and a good one—sort of a junior edition of the Blanktown establishment. That was just six months ago, and now, although we are doing business in a village of not more than one thousand inhabitants, counting chickens and dogs, we are making good, and the future looks as rosy as a June dawn. My star salesman is some boy."

We had crossed the Delaware by now and were swinging swiftly southward, the towns becoming more widely distributed, with the pine barrens close ahead.

"It seemed like a big risk to me at first," continued Mr. Jones, after a short interval of silence, "but I had such faith in S. S. that I gave him carte blanche. As usual, it was a safe bet. He breezed into the picturesque little hamlet on the banks of the dreamy Canrocas Creek one morning a few days after our meeting and called upon the genial storekeeper, who also basked in the sunshine shed by the offices of postmaster and overseer of the poor.

"After asking a few adroit questions, he learned that there was a very desirable location available at the corner of Main and Washington streets. There was a bungalow under course of construction at that point, which, with some alterations, would make an ideal talker shop.

"He next went to see the real estate man who had the property in charge, and made inquiries. Both of these gentlemen fell under the magic spell of my salesman's sunny smile, and, while they expressed themselves as being somewhat skeptical so far as the ultimate success of his project was concerned, they promised to give him all possible assistance. By evening the deal was closed, and it was spread broadcast over the whole countryside that Port Haines was to have a real talker store.

"In a week's time the alterations were completed and stock moved in. This accomplished, a cultured young lady of the village was installed in the store as assistant manager and social hostess. (Apologies to Bob.) That was she you saw on the river. Her idea of recreation is the indulgence in rare sport and unique advertising simultaneously.

"Then S. S. went out after business. While he was making a carefully planned tour of the surrounding country in a Ford car, calling on the farmers and making friends everywhere through the medium of his magnetic personality, his dainty as-

THE STORE IN THE SMALL VILLAGE

(*Continued from page 53.*)

sistant was entertaining the village sewing circle, the girls' sunshine club, the Luther League and the women's thimble bee, serving tea in fragile cups, and thin sandwiches on paper napkins inscribed with the insignia of Unique Talker Shop, Jr., also rendering a skilfully arranged concert of choice records."

We crossed a clearing where a cabin lay sprawled in the snow and a stooped woman weakly plied an axe at the woodpile, while a ragged child clung to her skirts. Then, as we dashed once more amid the pines, a doe and her fawn gazed in mute curiosity at the iron giant thundering past. A moment more and these too disappeared, and again the grim wilderness engulfed us.

John Jones lit his second cigar and resumed: "The plan adopted from the first, both in the store and on the road, was to create enthusiasm. When S. S. called on a farmer, he explained very thoroughly just how badly that farmer and his family needed a talking machine. He simply used the methods employed by every up-to-date salesman, but his pleasing manner and general air of optimism were largely responsible for the satisfactory orders he brought in. Once his prospective customer became in the least interested, he was asked to call at the shop for an hour of good music and good cheer. He was informed that as it was the off season on the farm he could easily get away for that length of time, and as a party of his friends were expected, it would be in bad form socially for him to disappoint them. His wife was told that her chum, Mrs. Browne, had given her word to be among those present, and would expect her also.

"In the capable hands of the assistant manager these parties were a pronounced success from the beginning. By the display of rare tact just the folks who were most apt to be congenial were assembled at the same time, and it soon became quite the usual thing for a matron in Port Haines to ask this question of her spouse, 'Going to lodge or the talker shop to-night, Sam?' and the answer would probably be, 'Well, I'll run down and hear a few records, I reckon; some of the fellows I like are going to be there. I can send my dues over by the boy.'

"The store had not been opened two weeks before the minister called to congratulate us upon our hospitality and to assure us that we were doing real good in the community. It seemed that quite a great deal of the money formerly spent in Holly Hill, the nearest town, for intoxicants, had been diverted to the coffers of our establishment, and in return the young men were becoming enthusiastic record collectors where they once specialized on cigarettes and booze. After this visit of the clergyman, and at his suggestion, S. S. attended a meeting of the school board, while his assistant talked business to the pretty principal and her efficient staff. This resulted in the sale of a machine and a large collection of educational records.

"He sold the chief of the Boy Scouts an instrument, to be used as an accompaniment for drills.

"The Young Men's Christian Associations, not only in Port Haines but in surrounding villages, have been inoculated with the desire for talking machines in their meeting rooms.

"Dances and operatic performances, both of the evening dress and informal varieties, have been given.

"The little weekly paper in the village carries a big advertisement of ours in every edition, containing a list of all the new records as they appear and little items of news interesting to the talker fan.

"S. S. informed me the last time he was in Blanktown that he would soon be in a position to give his customers a tone test, and, as he laughingly expressed it, 'That will put Port Haines on the map.'

"He also stated that he thought I could send another general manager soon, as he had things in such shape that they would about run themselves. Sounds good, doesn't it?

"We are looking forward to a big business throughout the coming summer, owing to the fact that the Canrocas is a stream of surpassing beauty, and during the vacation months motor boating and canoeing are extensively indulged in by people who come to Port Haines for that purpose. We are going to specialize on a small cabinet talking machine of just the right dimensions to fit in nicely with a boating equipment, and our social hostess, herself a nautical expert, will demonstrate the practicability of the instrument as a yachting accessory and the keen delight that can be derived from its use."

"Baggage checked for Atlantic-by-the-Sea!" boomed a deep voice from the aisle as the transfer company's man sped through the train.

The barrens were behind us; the tang of the salt air refreshed our nostrils as we sped across the meadows and into the depot. As we parted beneath the train shed, John Jones invited with great cordiality, "Come up to see us at Port Haines during the height of the season; it may mean another story for you."

I am looking forward to that experience with much pleasure.

HOWARD TAYLOR MIDDLETON.

W. F. LYNCH APPOINTED MANAGER

William F. Lynch has been appointed manager of the Victrola department of Wm. Knabe & Co., New York, succeeding J. Y. Shepard, who has joined the staff of the G. T. Williams Co., Brooklyn, N. Y., Victor distributer.

Mr. Lynch is well known in the local Victor trade, having been manager of the Lord & Taylor department for quite some time. He is well versed in all details of Victor merchandising and is particularly qualified to handle the high-class trade which visits the establishment of Wm. Knabe & Co.

INCREASES FACTORY CAPACITY

The Nanes Art Furniture Co., New York, manufacturers of the Savoy line of talking machines, has just increased its factory capacity in order to take care of existing demands. The company has in course of completion a number of new models of cabinet and table machines which will be announced and placed on the market in a few weeks.

Do You Have a Space

in your store, say about 16x24, that is not working hard enough —that is not earning you as much as you would like it to? You have, eh?—Well, let us tell you

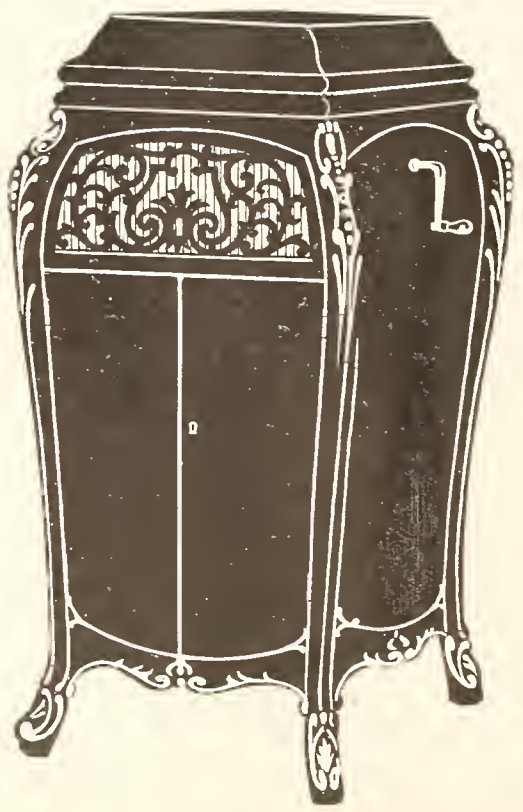
Sonora

will work wonders in that little section, so much, indeed, that it is only a matter of time until it grows to a 32x48.

Sonora

certainly starts things going, it sells, and sells with ease and at a profit; and it stays sold, and you soon begin to realize it is the most profitable thing you have in the store, and you sacrifice space for the best selling thing always.

Now we would like to tell you about the many accounts we have opened up and invariably most of the merchants would have started sooner but thought they didn't have the space. Again



Sonora

dictates to her master, who bows with ease.

We have a grand proposition to offer you and try to induce you to take advantage of just such an occasion as this—You do not have to invest a great lot. We carry the stock and deliver the goods to you—all you have to do is to put on a record and let Sonora Talk for itself.

GREAT PUBLICITY CAMPAIGN

In Behalf of the Aeolian-Vocalion Appearing in Prominent Magazines and Newspapers Attracts Attention—Prestige-Building Copy

The advertising in behalf of the Aeolian-Vocalion which has appeared the past year in the leading magazines and newspapers has been noteworthy from many standpoints, but chiefly because of the

A Recent Aeolian-Vocalion Advertisement

fact that in every phrase and illustration this publicity has been in complete harmony with the standing of the Aeolian Co. in the musical and business worlds. It must be considered that the Aeolian Co.'s prestige is not local or even country-wide, but international and world-wide in its extent, as there is no civilized country on the globe that has not received one or the other of the Aeolian Co.'s products.

The direct and intangible influence of this Vocalion advertising was interestingly discussed by H. Chamberlin, of the Aeolian Co.'s advertising division, who, in a recent interview with The World, said:

"The Aeolian Co. has endeavored to present the Aeolian-Vocalion to the general public in such a way that the position which our company occupies in the piano and musical worlds will be reflected in the steady growth of the Aeolian-Vocalion dealer's business. In other words, we are trying to aid the dealer to capitalize our prestige—to help him make one of his assets the stability and strength which stands behind the Aeolian Co., and which is recognized the world over.

"That we have succeeded in this to a remarkable degree is shown by the sales experiences of most of our Vocalion dealers. In the introduction of this new instrument they have met with little of the sales resistance that usually must be overcome in presenting a new line to the public. The more than twenty years of consistent national advertising by the Aeolian Co. has created an easy market for any Aeolian instrument. Consequently, Vocalion sales are running along as if the public had always known the instrument.

"Many of our Aeolian-Vocalion representatives have told us that they attribute a material measure of their success with the Vocalion line to the unusual strength of Aeolian prestige. They have found their customers impressed with the fact that the Aeolian-Vocalion carries with it far more than the average guarantee of quality and perfection.

"We are planning to extend an even closer co-operation to our dealers in the future than we have in the past, and our publicity campaign will be prepared with one idea in mind of assisting our representatives in profitably developing and extending their clienteles."

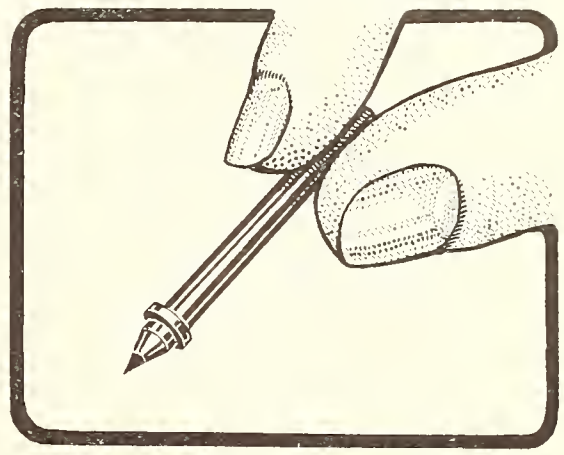
BUSINESS IS OF LARGE VOLUME

Reports Manager McCormick of the Sonora Phonograph Corp.—New $1,000 Sonora Praised by Sonora Dealers Everywhere

"Business is maintaining its huge volume," commented L. S. McCormick, sales manager, Sonora Phonograph Corp., 57 Reade street, New York, when asked for an expression anent business conditions.

"One of the biggest surprises brought before me during my commercial career," he added, "is the unusual reception given the new Sonora $1,000 machine, which has not only been ordered by retail merchants of this city, but dealers throughout the country have evidenced their desire to sell this wonderful example of phonograph construction."

It was Solomon who 2,900 years ago said, "Go to the Ant"—to learn how to hustle. Must humanity, supposedly endowed with "gray matter," still draw her lessons from the most lowly of the creature world? It sometimes seems so.



Sapphire Needles

Jewel Points

for the reproduction of hill and dale cut records.

Here is a sapphire needle that is made scientifically, with true regard for its utility as the connecting link between the record and the phonograph.

Made with a high ideal of jewel craftsmanship—pretty, durable, and exquisitely and perfectly fashioned to draw even the latent powers from the favorite compositions of your customers.

Capacity of our equipment is in the thousands daily, and we can make deliveries as agreed. These readily retail for $1.00.

THE VECCO ELECTRIC DRIVE

Being Put On the Market by Well Known Boston Parties

BOSTON, MASS., April 11.—John A. Davis, of the piano and talking machine firm of Furbush-Davis Piano Co., of Boylston street, has become interested in an electric motor which is designed to be a complete unit. It is called the Vecco Electric Drive and it has been attracting much attention in the windows of the Edison Electric Illuminating Company in Boylston street for a fortnight past. The company has opened quarters at 248 Boylston street and the officers are Charles F. Simes, president, Mr. Simes having had wide experience in the talking machine business; John A. Davis is the vice-president, and H. A. Robbins is the treasurer. The Vecco Electric Drive is properly protected by patents and the display has brought forth much more intimate inquiry at the company's headquarters, where it is being minutely inspected.

The Doehler Die Casting Co. of Brooklyn and Toledo Has Built Up a Large Trade

The Doehler Die Casting Co., Brooklyn, N. Y., and Toledo, O., one of the most successful concerns in the die casting field, was established by H. H. Doehler, its present president and general manager, some twelve years ago, in a very modest way. To-day this company occupies a high position in this field and counts among its customers some of the largest and most prominent manufacturers in the various industries to which the use of die casting is adapted.

This method is an economical one for the production of tone arms and sound boxes for talking machines. Cast under pressure from permanent metallic molds or dies from which an unlimited number of castings may be produced —each and every one uniformly accurate in most intricate details—sharp in outline, smooth in finish and delivered ready for plating or enameling and assembling without any further machining being required.

VICTROLAS FIRST IN AUGUSTA FIRE

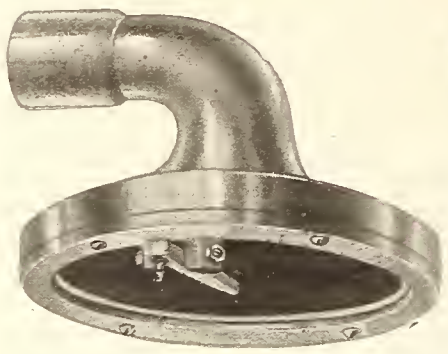
Nine-Tenths of the Victrolas in the Burned District of That City Were Saved by Owners, Declares W. P. Manning—Has Done Much to Elevate Musical Taste in South

AUGUSTA, GA., April 8.—W. P. Manning, head of the W. P. Manning Co., this city, has some interesting incidents to relate regarding the great fire which swept through a large section of that city on March 22nd resulting in a loss of over $8,000,000. "It is interesting to note," declares Mr. Manning, "that about nine-tenths of the Victrolas in the section swept by the fire were saved. It appears that in almost every case the first thought when the flames got dangerously close was of the Victrola and in some cases handsome pictures, expensive furnishings, silverware and even relics which could never be replaced, were abandoned for the purpose of carrying the Victrola to a place of safety.

"In one instance a Victrola XVI was saved in preference to a very handsome piano, both could not be saved. We do not know of anything that speaks higher for the Victrola in our section of the South. It has done so much to elevate the musical standard in our city, and is being more firmly established each day, as is proven by the rush we have had for Victrolas in the past six months. We have done more real Victor business in this length of time than we did the whole of the four years previous. It seems that we can hardly keep them on our sales floor, for as soon as they come in they are sold, as we are selling them faster than we can get them in. It was only yesterday that we had to telegraph an order in for more Victrolas. While this fire would seem to have demoralized business, it has not done so, as the people who were depressed sought the Victrola to liven things up. Despite the great financial loss, the people are looking optimistically to the future."

W. S. Rier is now connected with the Victor Victrola department of the Spring-Holsworth Co.'s store at Alliance, O.

Doubles the Value of the Talking Machine



The VICSONIA

Puts Edison Record Music at the command of every one owning another leading make of phonograph.

SECURE THE SONORA AGENCY

Chas. J. Orth, the Prominent Piano Dealer of Milwaukee, Plans to Feature This Instrument in a Prominent Way in His Locality

MILWAUKEE, WIS., April 5.—The agency for the Sonora line of talking machines, manufactured by the Sonora Phonograph Corporation of New York, has been taken on in Milwaukee by Charles J. Orth, one of the best known piano men and composers in this city. Mr. Orth is the composer of the famous descriptive piece, "In a Clock Store," of which many thousand

Charles J. Orth

phonographic records have been made and the news that he is now selling talking machines will be of interest to thousands of dealers all over the country. When Mr. Orth made a recent trip through the East he was warmly greeted everywhere by talking machine men, who were glad to become acquainted with the composer of "In a Clock Store."

Mr. Orth has arranged special quarters in his store at 274 West Water street for the new Sonora line, where he is displaying a large stock of goods. The well-known piano man and composer is most enthusiastic over the manner in which the Sonora goods are selling in Milwaukee. Peter J. Kraus, formerly a Victor dealer at Port Washington, now a member of the Orth sales force, will be in direct charge of the new Sonora department at the Orth store. Handsome new demonstration booths and other facilities have been provided at the Orth establishment.

The Gotham Shop, dealers in talking machines, has been incorporated at Albany by M. Freedman, S. M. Louis and L. Kurtz, of 135 Broadway, New York City.

The J. A. A. Sohms music store, at Walden, N. Y., is running a series of Victrola concerts afternoons and evenings, which are very popular and which have resulted in some good sales.

NEW STYLE OF NEWSPAPER ADS.

Victor Co. Makes Announcement Regarding Advertising in Daily Papers Which Will Give More Distinctiveness to Its Publicity

The Victor Talking Machine Co. sent out to its dealers this week an announcement of a new style of newspaper advertising which will replace the former irregular sized advertising which has been used in the newspapers throughout the country for a number of years. The new advertising occupies larger space than the former style, and the following letter which was sent to the dealers in company with the proofs of the April advertisements indicates the company's advertising policies for 1916, which, in all ways, is a most comprehensive one.

"We enclose advance proofs of Victor newspaper advertising which will appear in the newspapers of your city during the month of April. Advertisements of the same forceful, dominating character (all of this size) will appear in these papers every week in the year.

"This constitutes a large increase in our newspaper advertising space and takes the place of the irregular shaped advertisements that have been such a feature of your local newspapers for the past four years.

"This increased advertising in the newspapers has been placed with the distinct understanding that Dealers', distributors', or any other talking machine advertising shall not appear on this same page, and we feel sure that all Victor dealers and distributors will welcome this condition, because it will enable each dealer to advertise in some part of the paper and gather equal benefit from the big Victor advertisement.

"The necessity of enforcing this condition is due to the fact that some publishers disposed of all the space beneath the irregular shaped advertisement to one dealer, thus excluding all other dealers, which, as everyone will grant, was unfair and not in harmony with the Victor Co.'s policy of affording every dealer equal benefits from all Victor advertising.

"In many cities, additional newspapers have been added to our previous list, and, in addition to the cities that previously carried Victor advertising in their newspapers, there have been added about 200 other cities, taking in practically every city of 25,000 population, and over, and including quite a number of cities of less population.

"We want you to understand the motive that prompts this enormous increase in our newspaper advertising at this time, when the capacity of the factory is far behind the demand of our distributors and dealers. We do not intend, even in the face of our enormously increased business, that the public shall, even for a moment, lose sight of the fact that the Victor is, and always will be, the supreme musical instrument. We are *not* going to let any parsimonious policy creep in and fool us into believing that our advertising should be curtailed even though we cannot fill our orders.

"In addition to this increase in newspaper advertising, which amounts to many hundreds of thousands of dollars, we have also greatly increased our big national advertising in the magazines, and it is our desire to impress upon every dealer and distributor that we will increase this already stupendous advertising just as fast as the demand increases. If we can, by our example, make all Victor dealers understand that their business and profits will grow with every increase in their advertising, we shall feel that our dealers have awakened to a realization of their opportunities and have determined to get their share of the enormous Victor business which is so general all over the United States, and which is growing bigger and bigger every day."

NEW DIRECTORS FOR SONORA CORP.

At a recent meeting of the Board of Directors of the Sonora Phonograph Corp., 57 Reade street, New York, it was decided to fill certain vacancies that had been in existence on the Board of Directors, and the following now represents the full Directorate of the company: George E. Brightson, S. D. Brightson, Joseph Wolff, Henry P. Chilton and Waldo G. Morse.

TO RECORD FOR COLUMBIA LIBRARY

Harry C. Browne, of "House of Glass" Company, to Make Records for Columbia Library

Henry D. King, manager of the Columbia Graphophone Co's professional department, announced this week the consummation of arrangements whereby Harry C. Browne, leading man with the "House of Glass" company, will record for the Columbia library. Mr. Browne has already completed several records which will be announced in the near future. He is very popular in the musical and dramatic professions, and is a son of Isaac C. Browne, formerly a well-known composer for the banjo.

INCORPORATED

The National Talking Machine Co., manufacturer of sound-reproducing machines and musical instruments, was incorporated this week by Barnet, Simon and Albert Epstein, of 792 Grecne avenue, Brooklyn, N. Y. The capitalization of the new concern is $10,000.

IMPORTANT HEINEMAN ACCESSIONS

C. F. Rubsam in Charge of the Otto Heineman Phonograph Supply Co.'s Export Activities—W. C. Pilgrim Appointed Assistant Factory Manager—Two Important Posts

C. F. Rubsam, who for many years past has been prominent in the dictating and talking machine industries abroad, having been an important factor in these fields in France, has joined the forces of the Otto Heineman Phonograph

C. F. Rubsam

Supply Co., Inc., New York. He is supervising the company's dictating machine division and has also taken charge of the company's export activities. The export department of the Otto Heineman Phonograph Supply Co., Inc., has assumed very imposing proportions the past few months, and the exports to South America, Australia and the Far East have reached large sales totals. The fact that these countries are cut off from their European sources of production is, in a measure, responsible for this very rapid growth of export business, coupled with the fact that the Heineman motors and other talking machine products have scored a big demand in this country the past year.

W. C. Pilgrim, who is well known in London financial circles, having been associated with a number of prominent houses in connection with the development of their domestic and foreign trade, has also joined the staff of the Otto Heineman Phonograph Supply Co., Inc. He

W. C. Pilgrim

has been appointed assistant factory manager with headquarters at the Heineman factory in Elyria, and will supervise the manufacture and shipment of the completed product, working in close co-operation with the home offices.

Arthur D. Vosteen has moved his piano and Victrola store from his residence in Oneida, N. Y., to the Madison Theatre Building.

The Bates Piano Co., Middletown, N. Y., handling pianos and Sonora phonographs, has moved from King street to handsome new quarters at 116 North street, that city.

THE LYRIC PHONOGRAPH NOW READY

New Instrument Original in Design and Possesses a Number of Distinctive Features

The Lyraphone Co. of America, 220 Fifth avenue, New York, of which the active members are M. J. Samuels, vice-president, and T. J. Edwards general manager, announces that it is now in a position to offer the Lyric phonograph to the trade in satisfactory quantities. The Lyric has been on the market for over six months and a number of substantial agencies have already been placed for it.

The designing and building of the Lyric phonograph, which possesses a number of original features, including a round case and a rubber tone arm, represent to a great extent the personal effort of Mr. Samuels, who has had a number of years of active experience in the inventive end of the talking machine business. Mr. Edwards' broad experience in merchandising has already made itself felt in the distribution of the product.

The Lyric is attractive in appearance and enjoys the advantage of having parts of special design, carefully tested and manufactured on dies and machinery made for and owned by the Lyraphone Co. of America.

The increase in business in the Victrola department of the James Black Co.'s store at Waterloo, Ia., has necessitated the enlarging of the space hitherto devoted to this branch of the business. The rooms have been entirely remodeled and refurnished.

Miss Undine Myatt, formerly with the Meyers Bros. Co., has accepted a position with the Huntley-Hill-Stockton Co., of Winston-Salem, N. C., and will have charge of the talking machine department of the store.

Robert Hetzel, of Winimac, Ind., has opened a music store in the Dilts Building, where pianos and players and the Victor machines and records will be carried.

ADVANCE SKETCHES OF THREE NEW ARTOPHONE MODELS

READY FOR DELIVERY JUNE, 1916

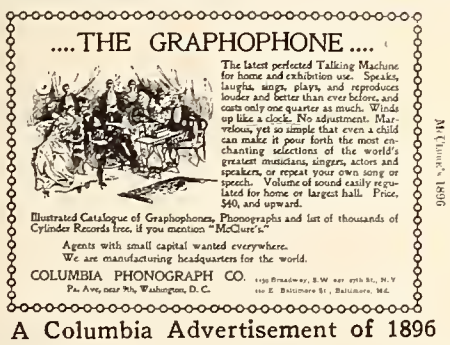
AN INTERESTING CONTRAST

The McClure Publications, Inc., in one of the recent issues of a very attractive advertising book which they publish in connection with their several

The Present Columbia Advertising

successful magazines, reproduced two advertisements over the signature of the Columbia Co. One of these advertisements appeared in the McClure Magazine under date of April, 1896, and the other was a copy of the current advertisement of the



A Columbia Advertisement of 1896

Columbia Co. in the same magazine. A comparison of these two advertisements furnishes most emphatic indication of the tremendous strides which the Columbia organization has made in the past twenty years. In the 1896 advertisement the copy is elementary in many respects when placed alongside present-day advertising, and in one paragraph the company asks for "agents with small capital." At that time the advertising manager of the Columbia Co. received a salary of $150 per month and a 5 per cent. commission on all advertising. Such an arrangement to-day would enable him to retire in a few months.

Closing Out Cabinets ½ Cost

150 Oak and Mahogany cabinets with latest improved ideas for Styles 6 and 9 Victrolas; also 200 fine oak covers for Style 6. For sale, ½ cost, because of other business. Will divide in lots to suit.

H. A. SAGE, 15 MADISON AVENUE DETROIT, MICH.

BOOK ON "MR. EDISON'S NEW ART"

Volume Tells of the Accomplishments of the Inventor in the Re-Creation of Music

"Mr. Edison's New Art" is the title of a most interesting booklet just issued by the Phonograph Division of Thomas A. Edison, Inc., Orange, N. J. The title refers to Mr. Edison's accomplishment in the re-creation of the human voice and the sound of musical instruments. This booklet is a supplement to the new instrument catalog recently issued and to be used by dealers where a complete catalog is not required.

An especially convenient size, 6¼ by 3½ inches, has been adopted for the booklet. This size permits insertion in a No. 6¾ envelope, the standard small size business correspondence envelope, and is readily slipped into the pocket when handed out in the store.

Two colors, black and Persian orange, are used and the stock is a dull tone India tint, making a very pleasing combination. The foreword deals with the special features of the New Edison, including reference to the testing of the "Mr. Edison's New Art" in direct comparison with the actual performances of great artists, which tests have been heard by over one hundred thousand music lovers, musicians and the critics of more than one hundred of America's leading newspapers who "confess [here we quote from the booklet itself] that their trained ears are unable to distinguish between an artist's performance and Edison's Re-Creation of that artist's performance." The balance of the booklet is taken up with illustrations of the various models of the New Edison.

TO HANDLE TALKING MACHINES

L. C. Schraeder, of Escanaba, Mich., will open a music store in Marquette, Mich., in the MacEncroe Block, where a full line of Victor Victrolas and records will be carried.

The Victolumbia Co., incorporated recently, will deal in talking machines, records and accessories with a capital of $6,000. Incorporators: D. M. Cohn, W. Phillips and D. Levine, 1472 Broadway, New York.

CHAS. L. GULICK NOW IN CHARGE

Charles L. Gulick, who has been covering the southern New England States for the Victor Talking Machine Co., has been appointed manager for the Victrola department of the Berlin Department Store, 1013 Broadway, Brooklyn, N. Y. The Berlin store is moving its Victrola department to the ground floor, where three sound-proof booths and other equipment have been installed to take care of growing trade.

W. C. PRICE WITH BRUNO & SON

W. C. Price has joined the staff of C. Bruno & Son, Inc., 353 Fourth avenue, New York, where he will be assistant to Chas. F. Bruno, secretary and treasurer.

Otto J. Boberg, of Eau Claire, Wis., is remodeling his store and after alterations are completed he will put in a full line of Pathé Pathephones for which he has secured the local agency.

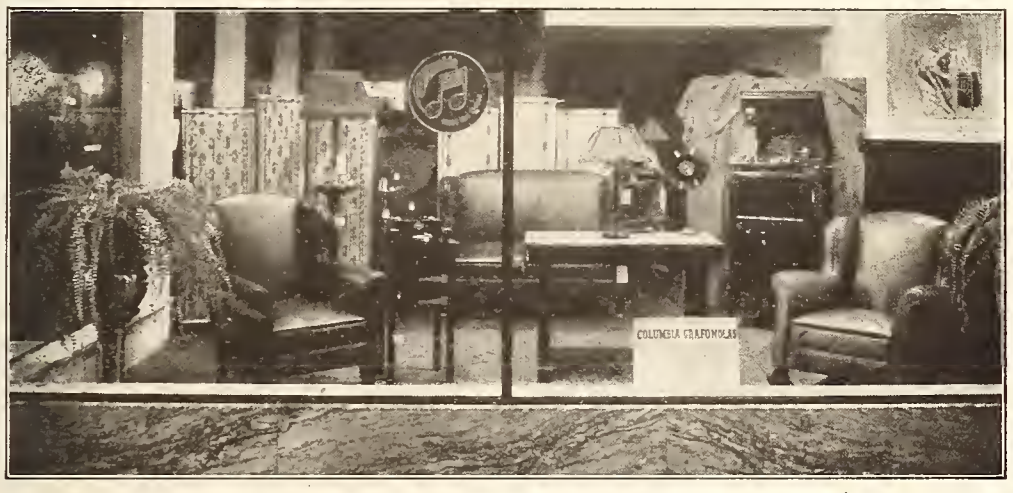
HODGE & SHERMAN HAVE UNIQUE GRAFONOLA DISPLAY

TAMPA, FLA., April 9.—Hodge & Sherman, which is recognized as the largest and most progressive furniture house in this city, is devoting a considerable portion of its window displays to featuring the products of the Columbia Graphophone Co. Hodge & Sherman have handled this line for some little time past, and through the use of aggressive merchandising methods coupled with up-to-date publicity ideas, have established a profitable and fast-growing Columbia clientele in that city.

The accompanying photograph shows one of the finest presented to the local trade this season. It represents practically an entire library, fully furnished, with a Columbia Grafonola prominently displayed. The only advertising in the window is a small card headed "Columbia Grafonolas." This display is an excellent example of the "open-back" window and its powerful appeal.



Artistic Window Display Featuring the Columbia Grafonola

SOUTHERN CALIFORNIA NEWS ITEMS

Increasing Business Creates Great Scarcity in Machines—Fumed Oak in Great Demand—New Diamond Disc House—Other News

LOS ANGELES, CAL., April 4.—Business in Southern California is certainly on the increase, and with only a few exceptions the local dealers report last month as the best March in the history of their business. The only drawback, however, is the scarcity of machines, especially Edison Discs and Victrolas. There are some models in certain finishes that the dealers have hardly been able to get since practically the first of the year.

The great cry in California is for fumed oak, and that is just the finish that the jobbers are unable to give us. There is not a Victrola X or XI fumed oak for sale in Los Angeles, and very few XIV in that finish. This scarcity is very unusual at this time of the year, and shows clearly how trade has increased.

Los Angeles has a brand new talking machine jobbing house, the Diamond Disc Distributing Co., of 340 South San Pedro street. It will handle all the products formerly carried by the Southern California Music Co., which will comprise Edison Diamond Disc and Amberola machines, and records, the Edison dictating machine, also supplies for the above machines. Orson A. Lovejoy, for a great many years at the head of the Southern California Music Co.'s wholesale department, will have complete charge of the new company.

Very recently Chas. Clark, of Pomona, made the Lodge of B. P. O. Elks of that city a present of a Victrola XVI, and a nice assortment of records. Mr. Clark purchased the machine from Brown Bros., of Pomona.

C. H. Davis, Pacific Coast representative of the Tusco Needle Co., has been making a short stay in our city.

Owing to the increase in their business, Barker Bros. have enlarged their talking machine repair shop by the addition of two expert mechanics in that department.

Charles J. Schmelzer, president of the Schmelzer Arms Co., Victor jobbers at Kansas City, Mo., has been in the city for several weeks, making the acquaintance of the local jobbers and dealers. Mr. Schmelzer expressed surprise at the growth of the talking machine business on the Coast in the last five years.

Miss Florence Hinkle, the well-known American soprano, sang for the first time on the Pacific Coast this month. Before giving her concert on the evening of March 24, at the Trinity Auditorium, the soprano visited the talking machine department of the Southern California Music Co., and was photographed listening to her Victor record of "When the Roses Bloom." As an exponent of perfect and refined vocalism, Miss Hinkle substantiated the opinion of many Eastern critics, namely, that she is the foremost of the entirely American trained singers.

Among the distinguished visitors at the general offices of the Sonora Phonograph Corp., Inc., 57 Reade street, New York City, recently, was John Herzog, head of the Herzog Art Furniture Co., Saginaw, Mich., and I. Montagnes, of I. Montagnes & Co., Toronto.

The Chadwick Furniture Co., of Jacksonville, Fla., has secured the exclusive agency there for the Vitanola talking machine.

SYRACUSE

Located right in the heart of New York State is Syracuse, and right in the centre of activity of Syracuse are the warerooms of W. D. Andrews—amidst expresses, traction lines and fast freight service.

V. W. MOODY DINED BY ASSOCIATES

Former Sales Manager of New York Talking Machine Co. Goes to Buffalo to Become Wholesale Manager for Neal, Clark & Neal

V. W. Moody was the guest of honor at a dinner tendered him last Friday evening by the members of the sales department of the New York Talking Machine Co., New York, Victor distributer. his former associates. Mr. Moody left for Buffalo Saturday to become manager of the wholesale division of Neal, Clark & Neal, Buffalo, N. Y., Victor distributer, and Friday's dinner was in the nature of a farewell party.

During his eight years' association with the New York Talking Machine Co., Mr. Moody had won the personal friendship of all his co-workers in the sales division, and as a token of their esteem they presented him on Friday with a beautiful silver loving cup.

The dinner was held at Reisenweber's, and was marked by a spirit of sincerity which was indicative of the fact that Mr. Moody's departure for Buffalo would be a keen individual loss to every man present. Impromptu talks were made by each diner, at the close of which Mr. Moody paid a tribute to the loyalty of the New York Talking Machine Co.'s staff, which had made possible the company's phenomenal success as a Victor distributer.

Dinner Tendered V. W. Moody

Left to right:—R. W. Morey, Jerome Connolly, W. L. Garber, R. G. Craig, Ernest Fontan, V. W. Moody, J. J. Davin, W. D. Marbourg, S. B. Schoonmaker, W. G. Porter, John Connolly.

Among those present at the dinner were W. D. Marbourg, R. G. Craig, Blaine Damon, W. L. Garber, Ernest Fontan, George Kelley, S. B. Schoonmaker, J. J. Davin, W. G. Porter, John Connolly and Jerome Connolly. R. W. Morey, general manager of the New York Talking Machine Co., was present as a specially invited guest of the sales force.

ACTIVITY IN NEWARK TRADE

Various Dealers in Talking Machines Working to Keep Up Interest—Stocks Scarce

NEWARK, N. J., April 4.—There are signs of big Victor business at the Chalmers shop, where a conspicuous window sign one day last week bore the impressive statistical legend: "Sold yesterday. 197 records; largest day's sale, 1,093; sold since Sept. 28, 38,584. Watch the sales. It's proof of the service." Proof is the word. Selling 197 records in the course of an ordinary day's business is justification enough for a sign in the window, even without the 1,093 record, which, of course, dates from the holiday trade. A recent addition to the Chalmers selling force is Frank Lemaiter, late of the Bamberger Department Store and formerly talking machine manager with the Newark Lauter Co. A handsome new Chalmers branch has just been opened in Montclair, under the management of Mrs. Dugan, recently manager of the Summit branch.

Pathé business is excellent at the Doll store, due largely, no doubt, to an advertising campaign involving several full-page ads in the local papers. Newark people who become interested in the Pathé are holding their interest and bringing new customers to the Doll store.

The Griffith store reports having sold nine Vocalions on one Saturday recently, the value averaging over $100 apiece.

Assistant Manager Settle, of the Steger salesrooms, is doing some extensive Victor publicity work, the results of which fully justify his efforts. Through circularization and personal letters he is interesting the Newark public in the Steger efficient service.

The Hahne store's Victor department is doing the usual big business, experiencing difficulty in obtaining enough machines of the popular styles.

At the Bradbury warerooms the Columbia Grafonola and records are being featured with considerable success and a liberal space is now devoted to that department.

ISSUE AN INTERESTING CATALOG

The Wonder Talking Machine Co., which recently bought the entire stock of Phono-Cut records from the Boston Talking Machine Co., announces that it is now ready to place these records on the market, and has issued a catalog listing the various classes of records included in this purchase. These are being placed on the market in connection with the Wonder Talking Machine Co.'s new universal tone arm which will be a part of the equipment of all Wonder machines in the future. The universal tone arm will play all types of disc records.

NEW QUARTERS IN MILWAUKEE

Badger Talking Machine Shop, Exclusively Victor, to Be Located in Handsome New Store About May 1—Details of New Home

MILWAUKEE, WIS., April 6.—The Badger Talking Machine Co. expects to have its Badger Talking Machine Shop, the retail branch of its business, located in its new building at 425 Grand avenue, by May 1, when one of the largest exclusive Victor retail establishments in the United States will be thrown open to the public. The company has a fifteen-year lease for the entire building, two floors and basement, and the structure is being thoroughly remodeled. The new store, when completed, will be equipped with sixteen of the latest type soundproof booths, provided with ceilings of varying heights to afford purchasers acoustic properties as near as possible to those that exist in their own homes. There will be twelve booths on the first floor, besides two large store rooms for records, a cashier's department, a ticket office for musical events, and the manager's and general offices. The second floor will be fitted out with four extra large soundproof record and machine booths, retiring rooms for gentlemen and ladies, and a large recital and concert hall which will seat about 200 people. The entire basement will be used for adjusting and repairing machines, for surplus stock and for the receiving and shipping rooms. Leading from the first floor will be a grand stairway to the second floor and concert hall. Daily concerts will be a feature in the new store and novel ideas have been planned for these afternoon and evening entertainments. R. H. Zinke, enterprising manager of the Badger Victrola Shop, has met with a steadily increasing business since he has been in charge.

OFFER PRIZES FOR STORIES

In the latest issue of Edison "Diamond Points," the Diamond Disc house organ, cash prizes are offered for the two best stories regarding the Diamond Disc submitted to the editor before April 20 by any Edison jobber, dealer, salesman or demonstrator. The stories must be true and recite actual experiences; humorous, romantic or simply interesting, in connection with the exploitation of the Diamond Disc machine or records. The story must not be less than fifty words or more than five hundred. The prize winners will be announced in the May issue of "Diamond Points."

OUTLOOK GOOD IN CANADA

H. N. McMenimen, Managing Director of the Pathé Frères Phonograph Co., Found Industrial Situation Very Satisfactory

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, returned last week from a fortnight's combined business and pleasure trip to Canada. Mr. McMenimen speaks enthusiastically of the industrial situation in Canada, and was particularly impressed with the hearty feeling of goodwill which exists toward this country. The Canadian outlook is most encouraging, and in all business circles confidence in the future is apparent.

MAKING MUSICAL EVENTS PAY

Tying Up the Talking Machine Store with the Important Musical Events in Its District Best Way to Attract Attention—An Example

One of the very best ways to secure the talking and visiting notice of the musical loving and

Maggie Teyte, Columbia Artist

buying public, says the Columbia Record, is to keep in touch with the musical events of your locality and tie up your store to every appearing artist.

From El Paso, Tex., the Tri-State Talking Machine Co., Columbia dealers, has sent photographs of Maggie Teyte and José Mardones, so-

José Mardones, Columbia Basso

prano and basso stars of the Boston Grand Opera Co., now touring the country. These artists were appearing in El Paso and were persuaded to bring the inspiration of their presence to the local Grafonola department. Displays of these photographs in the company's windows and local advertising of the Columbia records of these artists resulted in the inhabitants of El Paso learning again that the Tri-State Talking Machine Co. is the musical center of their burg.

EFFICIENCY THE KEYNOTE OF THE VICTOR ORGANIZATION

High-Class, Expert Workers and the Most Modern Equipment Combine to Produce Efficiency of the Highest Order in the Victor Talking Machine Co.'s Great Plant

An idea of the magnitude of the talking machine industry and its present importance in the industrial life of America may be authoritatively gleaned by a visit to the wonderful plant of the Victor Talking Machine Co., at Camden, N. J.

The series of gigantic buildings which house an army of nearly nine thousand employes, in which every part of the Victor talking machine and records is made in its entirety, and which have grown year after year with unfailing regularity, afford eloquent testimony of the appreciation in which the Victor talking machine products are held throughout the country.

A trip through the various Victor factories conveys a knowledge of the highest kind of efficiency which prevails.

One might easily write a dozen pages describing in detail the thoroughness and system with which every part of the Victor talking machine and records are made; of the interesting work in the recording laboratories; of the superior class of employes to be found in every department of construction; of the remarkable equipment; of the fine mental types of foremen and superintendents; and yet the writer would not be able to convey an adequate idea of the splendid organization and the superior methods which prevail throughout this establishment.

The growth of this company illustrates the value of preparedness and system. Everything is done in a most methodical and effective way. Building after building has been erected, all with the object of securing the highest degree of efficiency and the elimination of lost motion.

Observe the employes and you will find no driving or rushing, but the utmost contentment prevailing, with every employe doing his work as if he liked it and doing it well. Herein is displayed the skill of the general manager of the company as well as the president, officers and directors, who have developed the business in a most systematic way, so that there is a complete welding of the various forces, as there is a welding of the many buildings.

Year after year has seen valuable property purchased and razed and then replaced by massive structures that are not notable alone for their extent and appearance, but for the most modern equipment that it is possible to procure.

The gigantic cabinet building, which, when the new addition is finished, will house six thousand cabinet makers, gives an idea of how the Victor Co. are planning to meet future demands. Further alterations which will add to the height to some of the old-time buildings will increase the resources of other departments, thus the end of this year the various additions made to the Victor plant will, in their superficial area, exceed many completed plants that represent the lifetime efforts of manufacturers in many leading industries.

It is little wonder that the Victor plant is now becoming one of the show places, not only of New Jersey, but of Pennsylvania, for its location in Camden, right across from Philadelphia, makes the Quaker City a claimant on the prestige which the Victor Co. has won throughout the world.

The new office, or executive building, which is now approaching completion, will soon be one of the central points of interest for visitors to the Victor plant. The architectural design is most artistic, as well as effective, in the matter of light and air, and the other essentials necessary for the great executive and office force employed by the Victor Co., numbering about eight hundred people. The building faces Cooper Park, where Eldridge R. Johnson, president of the Victor Co. will erect a $130,000 library as a gift to the city of Camden.

It is rather early to describe this building, for it is still in the contractor's hands and will not be ready for occupancy until sometime in May. The general plan, however, of the various floors gives an idea of the care and precision exercised by General Manager Geissler in providing for the needs of the officers of the company and the large staff of workers. Nothing has been overlooked for their comfort, while with light and air on every side, the matter of health has been a vital consideration.

One of the most interesting features of the new office building is a large recital hall on one of the upper floors, which, with its stage, may be utilized by the company for recitals, in the interest of employes, or to provide for the musical needs of Camden, in which the Victor Co. are so keenly interested. In its size, equipment and acoustic properties, it stands forth as an important acquisition to the music halls of the country.

One interesting feature of the new office building is the arrangement of the roof which permits of its use by the employes for various purposes. The view from the top of the building is unsurpassed, taking in the broad expanse of the Delaware River, which in these days of activity is a busy artery of commerce. It overlooks the great Victor plant which is inspiring in its extent.

The new Victor office building successfully epitomizes the labors of the officers of this company, whose achievements have won universal renown in the larger spheres of industrial activity.

Two useful structures which adjoin the new office building are the restaurant for use of the members of the Victor Co., and the hospital where a nurse and medical attention are provided for the employes. While accidents are not frequent at the Victor plant, yet, should any employe meet with an accident, he is taken to this hospital, which, with its furnishings and its white-capped nurse, is most complete in its ability to provide for the needs of those injured.

Visit this Victor plant, and you cannot come away without being overwhelmed with its magnitude, the efficient manner in which everything is done, no matter in what department, with the modernity of the buildings and their equipment, with the type of satisfied men employed there, with the wonderful results achieved in successful craftsmanship, all resulting in a completed product that reflects in its intrinsic worth the thoroughness of the methods prevailing in every branch of this gigantic enterprise.

THE VIRTUE OF PRICE MAINTENANCE

Some Unusually Convincing Arguments in Support of the Stevens-Ayres Bill Offered by the Columbia Graphophone Co.—The Value of That System Proven by Experience

It is the consensus of opinion in the talking machine trade, says the Columbia Record, that a strict price maintenance system is a great advantage to the manufacturer, and not only to the manufacturer, but to the trade and to the public generally. The dealer recognizes that price maintenance is an insurance against prices being cut by a nearby competitor. Price maintenance to a dealer means the elimination, to a large extent, of the possibility of having a stock of goods left on his hands, without a fair opportunity to dispose of them. It also means that he can figure his profit very nearly to the penny. He is, therefore, the more willing to handle goods where his investment in the stock is insured. The result of this confidence is a benefit to the public in that they are always able to obtain goods protected by price maintenance, and it necessarily follows that when dealers become dissatisfied because of price-cutting and discontinue to handle goods on which there is no price maintenance, the public to that extent is deprived of an opportunity to purchase those goods. The average retail purchaser knows the reputation of a standard article and that it can only be obtained at a uniform, standard price. The unscrupulous price-cutter advertises it at "cut prices" for the express purpose of inducing the public to buy unknown goods of doubtful quality. He uses its reputation and sells it at a cut price as a "bait" to deceive the purchasing public into believing that all other articles for sale in his store may be purchased below regular authorized prices and that they cannot get equal values from their regular dealer, with the result that they buy these other goods at prices that more than compensate him for the loss on the standard article. This not only deceives the public but creates distrust in their minds against their regular dealer of whom they soon grow suspicious when they find that he has charged them more for the same article, and they hesitate before making further purchases from him. Thus the sale of the said article is limited and the retail dealer is ultimately impelled to cease purchasing from the manufacturer which, in turn, reduces or cuts off entirely the profits of the manufacturer, which injures if it does not destroy the good-will of both.

The Stevens-Ayres Bill aims to correct all this. It is intended to provide a remedy for the unfair competition of great trading monopolies with the independent merchants of the country. Its enactment will put a stop to predatory price-cutting, the agency by which the big trusts and monopolies have killed off their small rivals. It is essentially an anti-monoply measure and recognizes the one price to all principle which protects the consumers by assuring them that they are getting articles of proved high quality at a fair and uniform price. It will aid in creating conditions under which the independent dealers will be relieved from the unfair competition of the predatory price-cutters.

The Columbia Graphophone Co. long ago adopted the price maintenance system. It believes that this system protects its dealers and the retail purchaser and insures a standard of values for Columbia Grafonolas and Columbia records. It believes that in recognizing the one-price to all principle, it protects the consumer by assuring him that he is getting articles of proved high quality at a fair and uniform price. It is supporting the bill because it believes that it should have the active interest and co-operation of the talking machine trade and urges its dealers to write at once to their U. S. Senators and Congressmen to support the bill and to use their influence in securing its passage.

F. D. Quinn, a druggist of LaGrange, Ill., has leased a rear end of the building adjoining his drug store for a talking machine department. He will handle the Columbia line.

MARBOURG EFFICIENCY DIRECTOR

Succeeds V. W. Moody in Important Position with New York Talking Machine Co.—Is Thoroughly Familiar with the Trade

W. D. Marbourg, who has been associated with the New York Talking Machine Co., Victor distributor, for the past two years, has been appointed director of efficiency and will also supervise the company's sales work. Mr. Marbourg succeeds V. W. Moody, who resigned to become manager of the wholesale division of Neal, Clark & Neal, Victor distributors at Buffalo, N. Y.

Mr. Marbourg is splendidly equipped for his new position, as he is thoroughly familiar with all phases of the Victor industry, and through his past experience will be able to extend to Victor dealers efficient service and co-opcration. Mr. Marbourg is aggressive and energetic and represents the ideal type of keen, well-posted Victor wholesale man.

R. G. Craig, who has been a member of the company's traveling staff for some time past, will assist Mr. Marbourg in both the efficiency and sales divisions. J. J. Davin has been appointed a member of the traveling staff with Brooklyn as his territory, and by reason of his several years' connection with the company's sales and efficiency department, will be in a position to render real service to Victor dealers in his territory.

NEW QUARTERS IN SPRINGFIELD, ILL.

The Hilmer Piano Co., located at 409 South Fifth street, Springfield, Ill., will move about April 15 to new quarters at 510 East Monroe street. The new location is being remodeled and an enlarged stock of pianos and Pathé Pathephones will be carried in the new store.

SECURES EDISON AGENCY

The Woolven Drug Store, Oswego, Kan., has secured the Labette County agency for the Edison Diamond Disc line. William Matthews will be manager.

ALBANY, N. Y.

THE TRADE IN THE SOUTH

The talking machine situation in the South is reflecting to a great extent the commercial and financial conditions existing in that section of the country. In the Virginias the manufacturing industries have had a substantial boom, the steel and iron mills are working to capacity and new capital is coming in very rapidly. Farming conditions are much better than they were last year, and with these and also in North Carolina the cotton mills and cotton growers have felt for some time the wave of prosperity which has been sweeping over the country during the recent months.

Conditions in Kentucky have suffered somewhat from the rather poor crops, which have been caused by excessive droughts and floods. The Kentucky tobacco trade has been seriously hurt by the present war, and as this is the staple crop of that section general trade is not as good as it might be.

The outlook in Tennessee is very favorable, the manufacturing and trade centres there enjoying a greater volume of business than they have for sometime past, and the prospects for even better business in the immediate future are very bright.

In Georgia the farmers are in much better shape than they were at this time last year, and the trade depression which existed at the beginning of the war has almost entirely disappeared.

The depression in Alabama which existed last year due to the boll weevil coming into the State has been greatly relieved, and since the first of the year business conditions have improved wonderfully. The mining industry of the State is prosperous and there is more money in the agricultural section than there has been for several years.

Reports from Florida show constantly improving conditions. The orange crop has been exceptionally large. The output of garden truck exceeded that of last season to an appreciable degree, and the demand for lumber for building purposes in the North has greatly improved the lumbering industry, turpentine, one of the chief by-products of this industry, selling at record prices.

The increased commercial prosperity has had a decided influence upon the talking machine trade throughout the entire South. The mechanics and farmers have more ready money than they have had for three or four years, and a fair proportion of this ready cash is being invested in talking machines and records.

Reports from dealers throughout this territory are in the main optimistic and in many cases they report a demand which is in excess of the supply. The present activity in the talking machine trade has by no means reached its highest point, and the dealers are enhancing and building up a very profitable and substantial business by means of up-to-date selling methods and judicious and intelligent advertising. Collections are better than they have been for some months, and the demand for the higher class of talking machines is growing constantly.

OBERRY CO. INCREASES CAPITAL

MACON, GA., April 3.—The talking-machine business in this section is in much better shape than it ever has been, according to Manager J. W. Oberry, of the Oberry-Williams Co. This concern has increased its capital, and is preparing to push the Victor line stronger than ever. Manager Oberry reports that farming conditions have greatly improved, and that mercantile activity, which was seriously depressed at the beginning of the war, has entirely recovered. A new million-dollar union depot is now being built in this city.

CORLEY TRADE INCREASING FAST

RICHMOND, VA., April 3.—Frank W. Corley, general manager of the Corley Co., Victor distributor, reports a gratifying trade during the past month. The large and very complete stock carried by this concern has enabled it to give its dealers prompt and up-to-the-minute service on machines, records and supplies. Preparations are now being made to break ground for the addition to its present wareroom, and work on the new building will be rushed as rapidly as possible.

PROSPERITY OBTAINS IN RADFORD

RADFORD, VA., April 3.—H. F. Sembler, local agent for the Victor line, reports a good demand for the higher grade of machines and records. The local talking-machine trade has benefited greatly by the exceptional activity found in the industrial plants here, which are working full time. A short-line railroad, backed by local capital, is being built into outlying sections, and the farmers are doing better than they have for seasons past.

HAMPERED ONLY BY LACK OF STOCK

SUFFOLK, VA., April 3.—The talking machine trade in this city is much better than it was during the corresponding period last year, according to R. O. Chandler, manager of Thompson & Co., Victor dealers. This concern also handles pianos and furniture. Prospects for future business are very good.

HOUSE & CO. REPORT GOOD TRADE

WHEELING, W. VA., April 3.—C. A. House, of C. A. House & Co., is having a difficult time to secure a sufficient number of Victor talking machines to fill the orders which he is receiving. Commercial conditions are very gratifying, large orders having been placed with all of the factories here, and the steel mills are all working to capacity.

DAHLBERG RECEIVING LARGE ORDERS

MONTGOMERY, ALA., April 6.—General conditions in this territory have undergone a wonderful improvement since the first of the year, and Manager Earle W. Dahlberg, of the Dahlberg Talking Machine Co., is working hard to fill the orders being received for the Victor and Columbia line. The talking machine trade was somewhat slack last fall, owing to the effect of the boll weevil in the cotton crop, but the Dahlberg concern overcame this obstacle by giving good service, carrying large stocks, and advertising. Manager Dahlberg recently secured a license from the Victor Co. of Dothan, Ala., which is the livest town in the southeast section of the State, and he anticipates a large business from this point. A full line of Victrolas and Grafonolas is carried.

NOVEL VICTOR DELIVERY TRUCK

NEW ORLEANS, April 5.—The Collins-Pilcher Piano Co., of this city, recently purchased a specially made Packard auto truck, which is used to deliver Victor Victrolas. It is unique in construction, the body being designed by Mr. Collins, and the sides containing signs advertising the Victrola with a reproduction of the famous Victor dog. In a recent interview Mr. Collins stated that business conditions have been especially good since Mr. Cheaney has taken charge of their Victor department, which was about two months ago.

CONDITIONS EXCELLENT IN FLORIDA

TAMPA, FLA., April 7.—The Turner Music Co., one of the leading talking machine houses in this section, anticipates a large spring trade in machines and records, due to the constantly improving com-

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

mercial conditions throughout this section. The recent orange crop exceeded all expectations, turpentine is selling at a very high figure, and lumber is in good demand, and brings uniformly good prices. Manager J. A. Turner reports a large number of sales of higher-priced machines during the past few weeks.

MORRIS PUSHING VICTOR RECORDS

WINSTON-SALEM, N. C., April 3.—J. F. Morris, general manager of the Huntly-Hill-Stockton Co., has just completed the installation of three sound-proof demonstration booths in his store, which will aid in the sale of Victor machines and records. Business so far this year has been exceptionally good. Manager Morris, who made an extended tour during January, is pushing his record department, as he believes that the record end of the business is where the ultimate profits lie.

CONCERTS BOOM RED SEAL RECORDS

NASHVILLE, TENN., April 3.—Forest Traylor, manager of the Victor department of the Castner-Knott Dry Goods Co., reports a flattering outlook for the spring trade, with a leaning towards the higher-priced machines. Several concerts have been given here recently by Victor artists, such as Mme. Schumann-Heink and Fritz Kreisler, besides a joint concert given by Farrar, Werrenrath and Sassoli. These concerts have greatly stimulated the Red Seal business.

CONCORD ENJOYS SUBURBAN TRADE

CONCORD, N. C., April 3.—Manager Bell, of the Bell & Harris Furniture Co., reports a steadily growing business in talking machines and records. The most prominent factor in the trade here is the suburban business which is being done, the farmers and the cotton mill operatives realizing the immense amount of enjoyment which can be obtained through the medium of the talking machine.

KENTUCKY TRADE IS QUIET

LEWISBURY, KY., April 3.—Browning, McReynolds & Co., Victor dealers, report that the talking machine trade in this section is holding its own, notwithstanding the fact that the crops have been greatly affected by both the droughts and the floods which have occurred.

ATTRACTIVE NEWSPAPER ADS

For the first time in many years, with the exception of its full-page advertising during December, the Victor Talking Machine Co. has used newspaper advertising other than its well-known "stepping-stone" copy. This advertising appeared in the local newspapers this week and attracted considerable attention. The text was contained in an attractive border design, the illustration consisting of a Victrola XVIII surrounded by some of the world-famous artists recording for the Victor Co., including Whitehill, Ober, Gadski, Sembrich, Culp and Herbert. The advertisement was three columns wide and fourteen inches high.

NEW GATELY-HAIRE STORE

Victor Distributers of Albany Open Retail Store —Claude B. Haire Now Treasurer

ALBANY, N. Y., April 10.—The new Gately-Haire store, 121 Pearl street, which was opened just prior to the beginning of April, has been doing a capacity business since its opening day. The Gately-Haire Co., Victor distributers, has spared nothing to make their new retail store one of the finest in this section of the country. Six large plate glass demonstration rooms occupy a portion of the main floor, a large part of which is devoted to a reception room. The mezzanine floor contains a lounge room and a dainty music room. Daily concerts will be given to the public and afternoon teas will be held frequently.

Claude B. Haire, son of James N. Haire, the former treasurer of the concern, and who died recently, has taken the position formerly held by his father, and will be actively engaged in the management of the new store.

Ten thousand square feet are devoted exclusively to the sale of Victor Victrolas, the customers being handled by a large staff of competent salesmen. The wholesale and retail departments are connected by an inter-communicating telephone service. The mezzanine floor is devoted to the private office of Mr. Gately and Mr. Haire, as well as the general offices.

So far as the wholesale department is concerned, it is excellently quartered in the basement where everything that helps speed and accuracy can be utilized in the filling of orders. More than 100,000 records are kept in stock.

President Gately in a chat stated, "Keeping a watch on orders shows us that it takes thirty minutes to receive, pack and ship an order, and even in this age of progress this is about the limit of quickness."

The opening ceremonies were well attended and the newspapers called attention to this new Victor emporium as "Albany's most wonderful store."

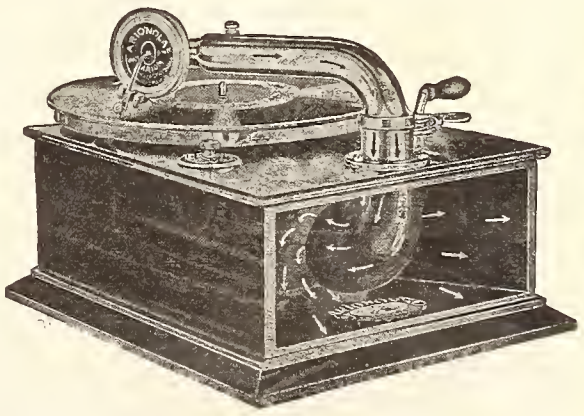
DICTAPHONE'S UNUSUAL USE

The Dictaphone is being put to unusual use by several recent purchasers, judging from the reports of the members of the Dictaphone sales staff. Wah Chang, head of a wealthy smelting company bearing his name, recently purchased six Dictaphones for the use of himself and his executives in China. For some time past he had been unable to secure a competent translator for his letters, but eliminated this difficulty by purchasing the Dictaphones which enable him to send the original Dictaphone cylinders to China, where they are received by his directors, who are also equipped with Dictaphones. A New York lawyer traveling abroad is avoiding the blue-pencil of the military censors by dictating to the Dictaphone and sending the cylinders to his business associates in New York.

A New Principle

as applied to the phonograph has made

The ARIONOLA



the greatest of all low-priced machines. This principle is that of the wooden sounding-board, which permits the tone to come forth clear and unmuffled. In fact, this method of reflection produces many tone qualities lost in other machines. The moderate price of $15 gives perfect music within the reach of all. We invite the most critical comparison with other machines.

The phenomenal success of our wonderful low-priced machine created a demand for larger *Arionolas* employing the same method of tone reproduction. We now manufacture two larger models at $50 and $75 respectively. The higher priced model is run by electricity, operating perfectly on either direct or alternating current. The case is made of fine inlaid mahogany. In fact, the cases of both these machines have the finest natural mahogany finish obtainable and are made to fit standard record cabinets.

Write for full information.

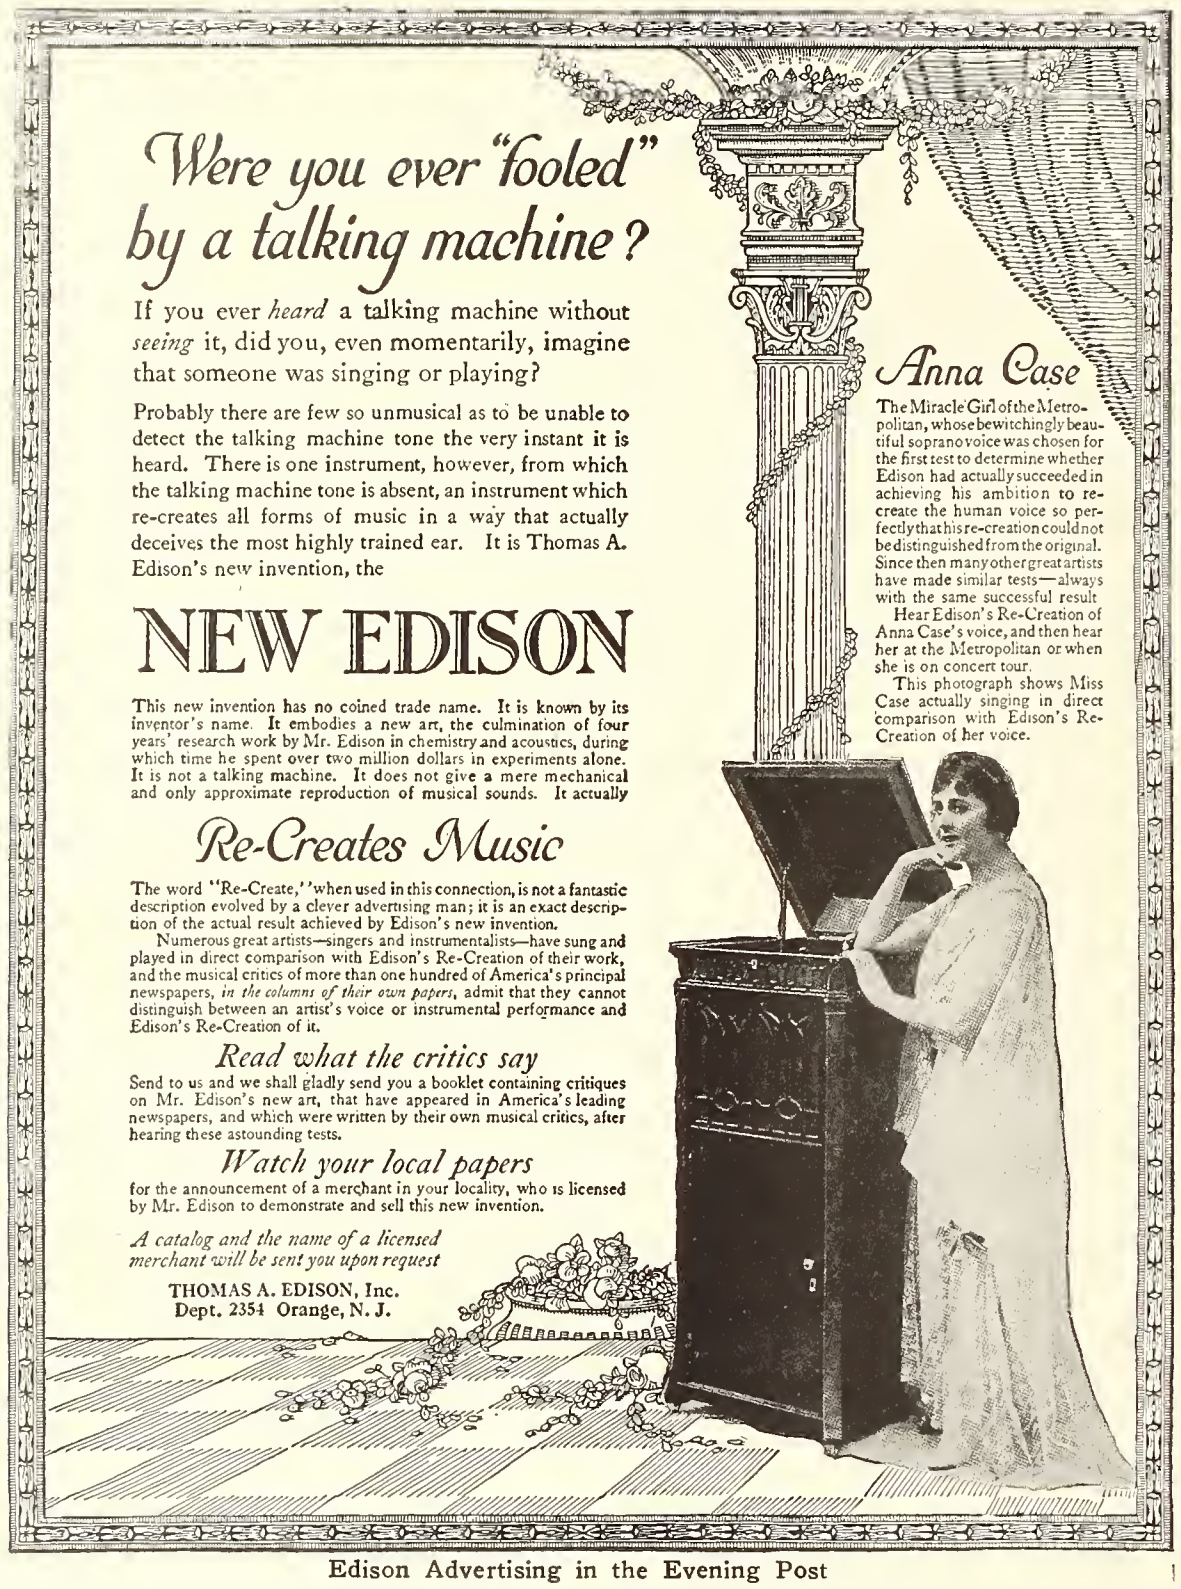
250 Devonshire Street **BOSTON, MASS.**

BIG EDISON PUBLICITY CAMPAIGN

Advertising Campaign in General Magazines of over 5,000,000 Circulation to Begin on April 15 and Run Right Through Summer—Plan for Co-operation of Dealers Throughout Country

With the April 15 issue of the Saturday Evening Post there will be inaugurated an extensive advertising campaign in the interests of the Edison New Diamond Disc Phonographs, the campaign covering a select list of general magazines including in addition to the Saturday Evening Post, Collier's, Literary Digest, Metropolitan, American, Hearst's, Cosmopolitan and McClure's having a combined circulation of about 5,000,000. Other mediums will be added to the list later in the year to carry the message of the Diamond Disc into the homes of the country. The first advertisement of the series, a full page in the Saturday Evening Post of April 15, is reproduced herewith.



Edison Advertising in the Evening Post

In connection with the magazine advertising an elaborate series of newspaper ads have been prepared for the use of the dealer and his local papers to enable him to make up his local publicity with a national campaign. The newspaper ads are of the same general character as those used in the magazine and matrices of the entire ad or electros of the cuts only will be supplied to dealers.

To further supplement the campaign an attractive six-page leaflet has been prepared for the dealer to send out on his mailing list. The leaflet is in two colors and bears the wording "In conformity with the request of Mr. Thomas A. Edison, the merchants licensed by him to demonstrate and sell his new invention for the re-creation of music are extending to all music lovers a special invitation to attend a series of demonstrations." The booklet also calls attention to the national advertising and includes portraits of Albert Spalding, Anna Case and other Edison artists.

The unique feature of the Edison campaign will start in the spring and run right through the summer months when conditions generally are believed to be dull and is taken to indicate that the Diamond Disc has no regard for season and can be profitably exploited at any time.

WORLD'S SALESMANSHIP CONGRESS

Many Leading Lights in the World of Selling Expected to Attend Five-Day Convention Which Will Be Held in Detroit Next July

Plans are now actively under way for a World's Salesmanship Congress to be held in Detroit on July 9, 10, 11, 12 and 13, when the heads and subordinates of many of the leading sales organizations of the country will gather together for a discussion of "Commercial Preparedness." An elaborate program of speeches and discussions has been laid out for the several days of the convention, the subjects being arranged to appeal to executives and salesmen, and some to both branches. Several debates will also be provided for. D. M. Barrett, editor of Salesmanship, is chairman of the Executive Committee in charge of the arrangements for the convention, the committee itself being composed of leading lights in the business world.

NEW INCORPORATIONS

The Durable Phonograph Co., in Manhattan, was incorporated last week with a capitalization of $1,000, by J. O. Murphy, Russell Goldman and A. G. Thaanum, for the purpose of manufacturing talking machines.

The Hooven Sales Corporation, manufacturer of talking machines, has been incorporated by F. H. Butehorn, T. S. Buckingham and J. J. Jansen, Jr., of 1058 East Twelfth street, Brooklyn, with a capitalization of $10,000.

Statement of the ownership, management, etc., required by the Act of August 24, 1912, of The Talking Machine World, published monthly at New York, for April 1, 1916.

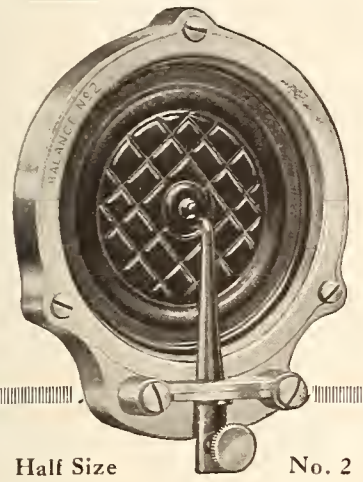
"RE-CREATION HALL" IN BROOKLYN

Savidge & Reed Co. to Handle the Edison Diamond Disc Phonographs at Prominent Location in that City—Will Add Pianos at a Later Date—Plan Frequent Recitals and Tone-Tests

The Savidge & Reed Co., Brooklyn, N. Y., incorporated last week with capital stock of $100,000 by J. H. Link, W. E. Reed and E. G. Savidge, has completed arrangements for leasing a building on Fulton street, Brooklyn, just above Borough Hall, where elaborate quarters will be opened under the name of Re-Creation Hall. The name was chosen in view of the fact that the company will handle the Edison Diamond Disc phonographs and records exclusively in the beginning although the plans also provide for the addition of one or two lines of high grade pianos in the future. The building selected, the address of which will be announced well before the opening, provides for the installation of a large recital hall, with a capacity of 250 people, where elaborate recitals and tone-tests will be given at frequent intervals.



Half Size No. 2

Balance Sound Box

The **NEW** No. 2M Balance Sound Box, with the **IMPROVED** Metalloy Diaphragm, is a revelation for tonal reproduction. Several improvements in the construction have been achieved, although the appearance of the box is practically the same.

The great difference in **TONE** is marvelous. A little sweeter music is obtained; the volume of tone is bigger, and a worn record almost sounds like a new one when the **NEW** No. 2M Balance Box plays it.

This is our biggest selling sound box, for all the opinions of experts indicate that this is the box of extreme musical powers. It is well built, for we spend extra time in its manufacture to make sure that each box is **PERFECT** before it leaves. Your satisfaction is our pleasure, and as many of the leading phonograph houses have signified their choice of Balance No. 2M Box, as **THE** box, you will find that their judgment is correct.

List Prices

Nickel Plate - - - $3.50
24-k. Gold Plate - $4.00

All Edison distributors carry these in stock and can ship promptly.

TRADE BROADENING IN CANADA

Many New Concerns Entering All Departments of Talking Machine Business—Planning to Make Tungs-Tone Stylus in Montreal

MONTREAL, ONT., April 5.—The importance of the talking machine trade in this country is indicated by the growing number of people who are seeking to enter the field as manufacturers, wholesalers or retailers and new concerns are springing up daily throughout the Dominion; in fact, conditions have reached the point where the dealer must show discrimination in making his purchases except in connection with the more prominent lines.

Layton Bros. report that the Edison business continues to increase rapidly and that the recent reduction in the price of Columbia records has resulted in a noticeable increase in sales.

Machinery is now being installed in the factory of the Berliner Gramophone Co., Ltd., for the manufacture of the Tungs-Tone Stylus needles and within a short time will be able to supply the Canadian trade with that desirable product.

Armitage A. Layton, in charge of the talking machine department of Layton Bros., has enlisted with the Ammunition Column of the 66th Battery, Montreal.

I. Montagnes, representing the Canadian distributors of Sonora phonograph, recently made a business trip to Montreal.

The Canadian Graphophone Co., Columbia jobbers for the Province of Quebec, report business conditions very satisfactory.

EDWIN G. SCHLOSS TO VISIT WEST

General Manager of Schloss Bros., Cabinet Manufacturers, to Call on Trade in Principal Cities —A Year of Good Business Expansion

Edwin G. Schloss, general manager of Schloss Bros., manufacturers of talking machine cabinets exclusively, at 637 West Fifty-fifth street, New York, will leave on April 15 for an extended trip through the West, visiting Buffalo, Cleveland, Detroit, Chicago, St. Louis, Louisville, Columbus, Cincinnati, Pittsburgh and other points. In addition to calling upon the trade in the interest of his line of cabinets, Mr. Schloss will also visit several of the big lumber centers for the purpose of expediting the shipment of many thousand dollars' worth of special cabinet lumber that is on order for his house. At the close of the first year of business the activity in the Schloss Bros. factory proves the progress that has been made by this concern through hard work and expert knowledge of cabinet manufacture and an intimate acquaintanceship of the demand and requirements of the trade.

RECORD ARTISTS IN RECITAL

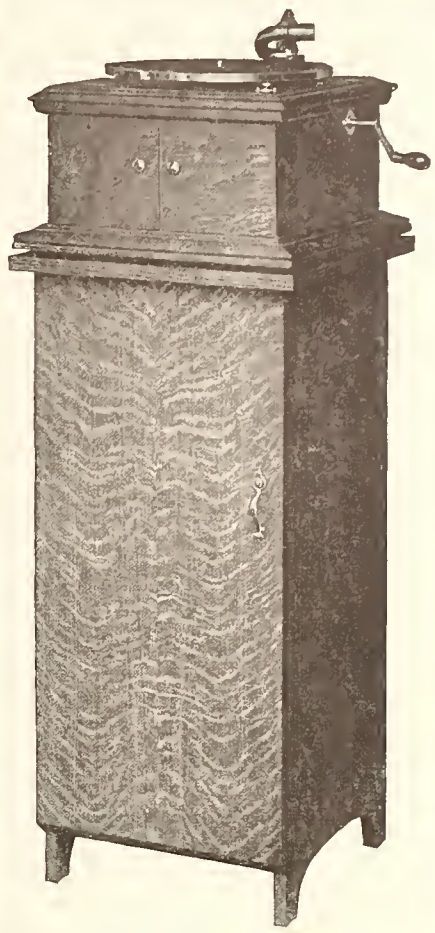
Gunst Piano Co., Corpus Christi, Tex., Features Well-known Singers in Connection with Demonstrations of Victor Records

CORPUS CHRISTI, TEXAS, April 4.—The Gunst Piano Co., that operated a most successful exclusive Victrola department under the management of Gerald Gunst, has secured most satisfactory results through featuring recitals in which well-known record artists appear in person and in conjunction with a demonstration of their records on the Victrola. A recent artist to give a recital in the Gunst store was Chas. W. Harrison, and the demand for Mr. Harrison's records following the recital was of a volume that swamped the facilities of the department.

On May 1 it is the intention of the Gunst Piano Co. to give a recital with Marguerite Dunlap as the featured artist. Other similar events are also in contemplation.

ESTABLISH RECORD EXCHANGE

William J. Ratty has established the Universal Record Exchange at 324 Erie street, Toledo, O., where talking machine records may be exchanged upon the payment of a small fee.



No. 432 (Vertical Interior)

For Victrola VI and Columbia "Eclipse." Height, 32½ in. Width, 15½ in. Depth, 16½ in. Holds 176 Victor or Columbia records. Quartered Oak front. Mahogany front. Average weight, crated, 60 pounds.

This is a leader with us. It's a great little cabinet and it sure does sell.

UDELL

Talking Machine Cabinets

Why a UDELL Record Cabinet?

1st. You get an additional profit out of the transaction.

2nd. You have made a satisfied customer—he has a place to put his machine and a place to file his records.

3rd. You have made a better buyer of new records—because with his UDELL Record Cabinet he knows where every record is, and can lay his hand on it instantly.

4th. This is a field in which we specialize and are recognized as leaders.

5th. Our designs, construction, prices and for all standard makes—and shipping service—make Udell Record Cabinets your best buy.

Drop a line to Record Cabinet Headquarters. Thank you.

Columbia Graphophone Co.
Woolworth Building, New York

TALKING MACHINES GAIN PROMINENCE IN ST. LOUIS

Edison Diamond Disc Phonograph Featured at Lenten Lectures—Knowledge of Music Developed by Talking Machine Proven at Elman Recital—Machine and Record Supply Increasing—Columbia Co. Territory Extended—Other Trade News of the Month

St. Louis, Mo., April 5.—March has been written into the records as one of the very best months the talking machine business in this district ever has experienced. The shipping and billing out of machines and records has been very heavy. In fact, for the first time in probably six months the supply of machines has exceeded the immediate demands and some progress has been made in catching up with the back orders.

In records, too, is the supply coming up to the wholesale demands but it is expected that the filling of the present orders will loosen a considerable quantity of orders that have not been sent to jobbers merely because the retailers have been unable to get the smaller quantities of records already ordered. Strange as it may seem, some of the orders that have been longest unfilled are for standard classic numbers.

Along with the good month and excellent prospects for continued business, the talking machine has been winning some new laurels. Prof. Charles Kunkel, who some times is referred to as the "grand old man of the piano" in St. Louis, assisted by Prof. E. Kroeger, another of the "highbrow music circle," both eminent teachers, has been giving a series of Lenten recitals. This is the usual thing, but always heretofore they have had a vocal number to enliven the program. This year, however, they are using the talking machine. This honor has fallen to the Edison Disc, and the "Ave Maria" was the number on the first program. Sometime during the series of recitals, Mark Silverstone will deliver an address, explaining how the talking machine has reached the stage of development to attract musicians and secure their favorable opinion.

Mischa Elman was here a few nights ago to play his violin. He was greeted by a very large audience and responded to numerous encores. As his third encore, he played the famous "Humoresque." Manager Hallahan, of the Vocalion department at Aeolian Hall, who was among those present, says that the very first strains of this melody brought forth a ripple of applause that spread all over the house for an instant, then instantly quieted to listen to the number. "That meant to me," says Mr. Hallahan, "that the entire audience of several thousand persons recognized his famous piece. That was due, undoubtedly, to the free use of that talking machine record. The same thing constantly is occurring at concerts, showing how the new musical instrument is educating the masses."

Referring to present business, Manager Hallahan said: "We have this week added two salesmen to our staff and now our outside force probably will compare favorably with any piano selling staff in town and they are making it go. At the same time we have made a number of sales in the last few weeks that have no record attached except that of the floor salesman. Pure pickup business. The Vocalion has reached that stage of acquaintance with the public where a man will come in and ask to see a certain style and priced machine."

Aeolian Hall entertained W. H. Alfring, general manager of the Vocalion department, over Sunday recently. He was on his way west to look over some new retail distributing centers and to close the contracts if everything proved satisfactory. He was accompanied here by Harry Levy of the wholesale department, who was on his way South.

At the Columbia warerooms they are congratulating themselves on the addition of Memphis, part of Tennessee, more of Kentucky and the eastern half of Arkansas to the St. Louis trade district. This will mean a nice line of business to be handled from this store and what is a pleasant part of it, practically every town added already is a St. Louis customer for almost everything else and the merchants have rather resented being assigned to another jobbing point for talking machines. The Columbia line is well established in Memphis with a good line of dealers.

Manager Irby Reid was called to Kentucky late in March on a business trip and took that occasion to go to Memphis to look over his new field and get acquainted with his new customers. He was delighted with prospects there.

C. R. Salmon, manager of the wholesale department of the Columbia, expressed himself as delighted with the showing made in March and the excellent prospects for not only a continuance of splendid orders but the present good inflow of machines which would permit soon the shipment of 100 per cent. orders.

A. Coughlin, who came from St. Louis a few months ago as retail sales manager, has severed his connection with the Columbia service and returned to Kansas City.

The Columbia Co. is taking considerable pride in the new salesrooms opened late last month

by the May, Stern Furniture Co., where Columbias are sold exclusively. Miss Sadie Rosenblatt is in charge here. The department is completely fitted with the most approved models of demonstration rooms, well lighted and ventilated and sound proof.

R. L. Wilson, former manager of the Royal Music House in the West End residence district, but more recently city clerk of Webster Groves, has joined the Silverstone Music Co. staff as secretary of the company. Mr. Wilson and Mr. Silverstone are old co-workers in talking machine sales and each knows the other's work. Mr. Wilson will have charge of the office and retail floors, while E. Paden, who has had charge of the offices, will take charge of the wholesale department. The new arrangement is planned by President Silverstone to lighten the detailed work which has accumulated with him as the business of his company has expanded during the last two years.

Anna Case's recent visit here stirred the demand for her records for the Edison machines and incidentally brought a storm of protest against the musical critics. It seems that the music loving public and the critics are hopelessly at odds as to Miss Case and as far as the Edison dealers are concerned, they are inclined to side with Miss Case's admirers, and also that they are strong in their conviction, from the way they have been spending their money.

The moving picture film, "The Soul of the Violin," has made a distinct hit here and it has been widely shown without complaints of the advertising feature, according to the theatre owners.

The John Bresner Co., of Springfield, Ill., is a new Edison dealer, stocking both disc and cylinder machines.

R. H. Gordon, of the Pathephone Co., left the first of the month for a ten days' trip to include Missouri, Illinois and Indiana towns. A part of his mission was to investigate requests from merchants for Pathephone sales privileges, these merchants having been reached by advertising and being anxious to place the line at once. Business at the local wholesale warerooms is developing as rapidly as it can be handled and the supply of machines is getting better. The record business has gone ahead of all expectations and there has not been a time in six weeks when orders could be filled as completely as Mr. Gordon had set for his minimum.

President Koerber, of the Koerber-Brenner Music Co., Victor jobbers, fears that he will become so accustomed to thinking in fractions that when stock becomes plentiful he will hardly know how to act.

"The prospects are excellent," said Mr. Koerber. "Local trade is doing as much as it can do under the circumstances. Unfortunately for this season, when the camping season is so near, we still are short of small machines, especially the VI. We have not been able to catch up with our orders and still owe much stock to our dealers. This debt, we sometimes find hard to explain. The machines now are coming through pretty well and we are very hopeful that we will not get more in debt than we are and will be able to catch up some, although this entire trade district is clamoring for supplies.

"The record situation is greatly improved and we are able to supply many records in full quantities that we have been shipping only in part for a long time.

"I last heard from E. C. Rauth at Birmingham, and he is finding the South in excellent trade condition. The cotton country is recovering from its set back of two years ago in excellent shape and is ready to buy anything that means pleasure."

DEMAND FOR ATLAS PACKING CASES

Nelson & Hall Co. Forced to Build New Factory to Meet the Demand for Their Products—Many Advantages Appreciated by Dealers

During the year 1915 the demand for Atlas Veneer Packing Cases, manufactured by the Nelson & Hall Co., Montgomery Centre, Vermont, showed such an increase that the company has found it necessary to build a new factory in Camden, N. J. In addition to this, it has been necessary to double the output of its factory at Montgomery Centre.

At the present time it is declared a larger percentage of the cabinet style talking machines manufactured in the United States are shipped in Atlas cases. These cases are particularly well adapted for the cabinet style machine. They are made of northern hardwood three-ply veneer and clear spruce cleats, and their strength, lightness and freight-saving qualities have led dealers generally to realize the advantages of having machines shipped in Atlas cases.

The Nelson & Hall Co. is fortunate in being in a position to advise intelligently both old as well as new concerns regarding shipping costs and the best methods and style of packing. We understand inquiries of this nature are welcome.

The company owns its own timber lands and is in a district well favored with shipping facilities for Western as well as Eastern points. It already has enough business on its books to keep the factory running at present capacity until January 1, 1917, but the company is keeping apace with the steadily increasing demand by additions to plant and equipment.

INCORPORATED

The firm of E. A. Schweiger, of Brooklyn, has been incorporated by R. Schweiger, L. Neustadt and E. A. Schweiger, of 904 Jefferson avenue, Brooklyn. The capitalization of the new firm, which will deal in talking machines and musical goods, is $15,000.

The Kipp music store at Manhattan, Kan., has installed a new soundproof demonstration booth in its talking machine department.

STEADY INCREASE NOTED IN TRADE IN BALTIMORE

Demands of Retail Trade Serve to Keep Down Available Stocks—Columbia Graphophone Co. in New Quarters—W. L. Eckhart Covers Large Territory—New Cohen & Hughes Store Ready Soon—Aeolian-Vocalion Proving Very Popular—New Pathephone Dealers Listed

BALTIMORE, MD., April 6.—Talking machine business in Baltimore continues to show increase with the dealers and this despite the shortage of machines. Thousands of dollars' worth of machines are on orders with the distributors here, and they are up against it to make deliveries. Complete line of records, and a very heavy sale during the month, has helped to keep the business receipts ahead of the previous year.

The Columbia Graphophone Co. moved into its new quarters, 111 West German street, this week, and Manager A. J. Heath is now ready for business. This new structure, as told in the March issue of The World, is a five-story building and contains about 14,000 square feet of floor space. About one-sixth of the space will be devoted to the keeping of records.

W. L. Eckhardt, district manager, who makes Philadelphia his headquarters, was in Baltimore a great deal during the past month. Washington and other points have been added to Mr. Eckhardt's territory. P. W. Peck, who travels from the Baltimore headquarters, was in the city during the week. He reports conditions through North Carolina as excellent. Mr. Heath says the month's business was fine.

I. Son Cohen, of Cohen & Hughes, Victor distributors, declared to-day that it took all of his time answering letters and telegrams of his customers, who are pleading for machines. The new Cohen & Hughes store on North Charles street is being rapidly put into shape and is expected to be in use about April 15.

W. C. Roberts, manager for E. F. Droop & Sons Co., Inc., Victor distributors, reports business going ahead, but complains of lack of machines.

Henry Eisenbrandt, of H. R. Eisenbrandt & Son Co., Inc., Victor distributors, said he was doing everything in his power to get more Victor machines. He visited the Camden factory last week and expects to make another trip in a week. For some time past Mr. Eisenbrandt has been giving lectures before various civic bodies on the origin of the talking machine, its wonderful qualities, and why it should be in every home.

The Sanders & Stayman Co., Inc., are highly pleased with the way the Vocalion has been going. They have received several big shipments of machines during the past month, but just as soon as they arrive they are sent out to waiting customers. The firm is getting things in shape to move to its new quarters on North Charles street, which it expects to occupy sometime during May.

Jesse Rosenstein, for the National Piano Co., distributors for the Pathé line, is chock full of optimism, especially in view of the fact that machines are now coming in good shape and he is adding more accounts to his line. The firm last week began demolishing several structures in the rear of its building and will erect a large storehouse to add to the present quarters. The firm announces that it has just signed the following Pathé dealers: Stafford & Bro., 1702-1706 West Pratt street; Rosenthal Bros., 306 and 308 North Eutaw street; Reisinger-Seiler, 612-618 Columbia avenue, and McCready & Co., Annapolis, Md. Mr. Rosenstein also announces that he has added to his staff James S. Matthes, formerly of the Columbia Co., to the wholesale department, and George A. Eldridge, who for a long time was with the Columbia house.

G. Fred Kranz, president of the Kranz-Fink Talking Machine Co., passed into the world beyond about a fortnight ago, and he will be sadly missed for he was one of the most popular men in musical circles of the city. The business will be conducted by Joseph Fink. Mr. Kranz was fifty-six years old, and had a wide circle of friends in all walks of life and was a strong fraternal man.

In addition to a good business in machines, William Knabe & Co. is doing a remarkable business in Victrola records. This business has grown with such strides that several new booths have been installed. Milton Boucher, the manager of the department, reports that March was far ahead of the previous month in both machine and record sales and thinks the business will continue good. W. H. Curtis has been added to the Knabe salesforce.

BUFFALO

RAILROADS: Look at the list of railroads running out of Buffalo: New York Central, West Shore, Lake Shore, Nickel Plate, Wabash, Erie, Pennsylvania, Lackawanna, Grand Trunk, Michigan Central, Lehigh, B. R. & P. and B. & S.

W. D. ANDREWS
BUFFALO, N. Y.

PLACE NEW MACHINE ON MARKET

The Bell Talking Machine Corp., 139th street and Fifth avenue, New York, are now putting on the market a phonograph known as the Schubert Two-Tone Magnetic phonograph. The manufacturers claim that "the name Two-tone has been derived from the fact that the machine has been so constructed as to permit a uniform production of tone where the voice or string music is accompanied by another instrument. In other words, that accompaniments are more distinct than usual." The instruments are in a variety of case designs and are sold at various prices.

ADDITION TO CANADIAN TRADE

TORONTO, ONT., April 5.—A recent addition to the talking machine trade of the Dominion is the Arionola Co., a $50,000 corporation, with F. B. Robins, president; H. M. Frederick, vice-president, and A. F. Schultz, secretary-treasurer. The new company has secured the Canadian rights from the parent concern in the States.

MEMORIALS PREPARED

Following the action taken at the meeting of the talking machine men suitable memorial resolutions have been drawn up by the committee appointed for the purpose and sent to the families of Edward Lyman Bill and J. H. Dodin who died early in the year.

COLUMBIA GRAPHOPHONE CO. EMPLOYES DINE AND DANCE

Staffs of the Executive Offices and the Recording Department Hold Dinner at Henry's, Then Adjourn to the Columbia Headquarters for Dancing

The employes of the executive offices and recording department of the Columbia Graphophone Co., of New York, held a very enjoyable dinner and dance on the night of March 24, which was marked by an informality and good cheer that made the event thoroughly enjoyable.

A number of the company's officials accepted the committee's invitation to attend the dinner and dance, and joined in the festivities with the same vim and ardor as the younger members of the clerical and office staffs. All divisions of the executive offices and recording laboratory were present, and the committee left no stone unturned to give every one a good time from the start of the dinner to the last strains of "Home, Sweet Home."

The dinner commenced at 6.30 P. M., Henry's, a well-known restaurant on Thirty-sixth street, being selected as the most convenient to the recording laboratory where the dance was scheduled to be given. The dinner was well-served, and at its close the entire party adjourned to the Columbia recording department, 102 West Thirty-eighth street, where one of the large recording rooms had been suitably decorated and furnished for dancing purposes. Liberal "waxing" had made the floor as slippery as could be desired by the most enthusiastic terpsichorean artist, and a "Grafonola 200" occupied the post of honor to furnish the music for the evening.

Banquet of the Columbia Forces

No. 1, Edward N. Burns; No. 2, G. C. Jell; No. 3, Clifford R. Ely; No. 4, Henry D. King; No. 5, Edw. M. Baker; No. 6, Wm. S. Scherman; No. 7, Paul Haydn; No. 8, Mortimer D. Easton; No. 9, Frederic Goodwin; No. 10, A. E. Donovan; No. 11, Lester Leverich; No. 12, T. E. Novakoski.

A large supply of the latest Columbia dance records put the gathering in good humor, and the one-step, fox-trot and hesitation were danced to a rhythm and tempo which easily rivalled the performances of the most proficient orchestras. Arthur Wedl, pianist, also contributed to the dancing program, rendering a number of popular selections for the dancing.

At midnight the dance came to a close, every one present reaching the decision that the evening had been a banner event for keen enjoyment and good fellowship.

CO-OPERATES WITH THE DEALER

The New York Album and Card Co., New York, manufacturers of Nyacco metal-back albums, is furnishing its dealers with an attractive enclosure which will enable the dealer to place Nyacco albums before the attention of his customers consistently and regularly. These enclosures are furnished gratis with the dealer's imprint on one side, and the company states that many of the dealers have achieved excellent results from a judicious use of the inserts.

Philip A. Ravis, vice-president of the company, states that the company has been fortunate in securing the raw material they need, but that dealers should anticipate their Nyacco album requirements as much as possible, so that they may be fully prepared to meet all demands.

CURRENT NEWS SELLS RECORDS

How Application of Certain Songs to Events of the Day Serves to Move Dormant Records from the Shelves of the Peck Dry Goods Co., Kansas City—A Plan That Any Live Merchant Might Try with Successful Results

KANSAS CITY, Mo., April 6.—The Peck Dry Goods Co. has been getting in some wonderfully good work recently on record sales; the particularly interesting feature being that the records exploited and sold have often been those which had not previously been going satisfactorily. Some have been real "stickers"—so listen to the plan!

J. F. Ditzell, manager of the department, conceived this plan some time ago; when the diplomatic negotiations with Germany had assumed grave situations. He happened to think of the record "We Take Our Hat Off to You, Mr. Wilson," and it occurred to him that if this especial crisis were solved there would be acclaim for the President, and perhaps a chance to sell some of those records. But if he sold a few, he would sell a lot of them—so he hustled around, and bought up all he could lay his hands on. This was done quietly, without telling anybody his purpose. He had a large advertisement written; and when the morning papers announced the successful termination of that crisis, and all people were enjoying a feeling of relief, he hustled the copy to the newspapers. The afternoon papers carried this advertisement of the record—and the big stock he had accumulated was sold. The record is still in demand.

He has done the same thing with other records, anticipating a piece of news that would be startling, and connecting it up with a record. The latest exploit was in connection with the Mexican matter. When the news of Villa's raid came, Mr. Ditzell anticipated that Funston would be ordered to "get" him, and that soldiers would be sent South. He prepared his advertising, got records from St. Louis, Chicago, anywhere so as to have a big supply on hand, and when the order was published, he immediately ordered the advertisment inserted, and the department began to sell records of "They're on Their Way to Mexico."

Strangely enough, the special drive on such records does not mean a spurt in sales; the records continue to be in good demand for weeks and months after the particular occasion for which they were thus made timely, has passed and been almost forgotten.

The Shortridge Memorial Church, of Butte, Mont., has installed an Edison diamond disc phonograph which will be used in connection with the pipe organ to furnish religious music during the services.

Columbia Graphophone Co.
Woolworth Building, New York

NO COMPLAINT IN INDIANAPOLIS

The Present Talking Machine Business in That Section Exceeds All Previous Records—Building Up Demand for Foreign Records—The Various Lines That Are Selling Well

INDIANAPOLIS, IND., April 8.—Talking machine dealers here are enjoying a business that undoubtedly exceeds all previous records. The wholesalers report that their biggest worry at present is in keeping up their stocks to fill orders.

Walter E. Kipp, of the Kipp Phonograph Co., said that the business in March was several times in excess of the corresponding month last year. "More out-of-town dealers have been calling on us than ever before and they are all crying for the Edison machines. The demand has simply been greater than the supply," said Mr. Kipp.

A similar report of good business was heard at the Stewart Talking Machine Co., which handles the Victor line.

At the Columbia Graphophone Store, A. W. Roos, manager, said that more cash had been taken in during March than in any other month in the history of the company's business in Indianapolis. He said that the record this year in business was about three calendar months ahead of the business done in the corresponding period of last year.

D. Sommers & Co., who recently signed up with the Columbia Co., through Mr. Roos, have been getting excellent results. They have been so pleased at the business that they have already placed an order increasing the original order more than 50 per cent.

Mr. Roos has built up a thriving business in foreign records through Vangel N. Shishcoff, an Americanized foreigner, who sells the Columbia foreign records in an old street-car at 535 West Washington street, the heart of the foreign district in Indianapolis. Shishcoff says that there is a great demand among the Bulgarians in this country for Bulgarian bag-pipe music and he is trying to have some of these records made. Shishcoff advertises in several papers printed in foreign languages and he says he has been getting orders from all parts of the country.

S. H. Nichols, manager of the Pittsburgh district of the Columbia company, visited the local store April 1. The local store has been taken out of the Chicago district and placed under the Pittsburgh district.

At the Pathé Pathéphone store, which was recently opened by Topin Bros., business is picking up nicely. The three brothers have been working on out-of-town dealers and are signing up some live ones.

The Carlin Music Co. has been getting good results with the Sonora line and Frank Carlin has expressed the belief that this machine will soon become one of the best sellers in Indianapolis. The Pearson Piano Co., which handles both the Edison and Victor machines, has been doing extensive newspaper advertising and for the past few weeks has featured a plan by which the first payment down on a machine is not required for thirty days.

The Edison shop has been featuring a similar plan and business there is reported as good. Archibald Olds, manager, has announced that he has resigned his position. Mr. Olds said that he was considering taking up several propositions for himself.

The consistent advertising policy of the Aeolian Co. is building up a fine business for the Vocalion and the local branch reports that the sales are growing in volume every day.

MURATORE AND CAVALIERI MAKING PATHE RECORDS

The accompanying picture, which appeared recently in the daily newspapers, has served to attract considerable attention from laymen and musicians who have very seldom had the opportuunity of viewing at close range two famous artists in a recording laboratory.

The photograph was taken at the laboratory of the Pathé Frères Phonograph Co., New York, when records were being made by Lucien Muratore, the celebrated tenor, and Lina Cavalieri, the popular soprano. Both of these artists recently closed contracts to record exclusively for the Pathé disc library, and their records will be cataloged shortly.

Interesting View in Pathé Recording Laboratory

The picture hardly does justice to the orchestra at the Pathé Frères laboratory, as it is twice as large as the photograph would lead one to believe. Many musicians of the orchestra have been members of the leading operatic companies.

A. L. VAN VEEN & CO. BRANCH OUT

New York Cabinet House Now Building Portable Sectional Demonstrating Booths

Arthur L. Van Veen & Co., 27 Wooster street, New York, who for a number of years past have been successful in the cabinet and wood-working industries, have branched out and are now building portable, sectional demonstrating booths. They have increased their factory facilities to handle this branch of their business.

"During the past few months," said Mr. Van Veen, "we have received contracts for the installation of Van Veen 'bed-set' system booths from a number of talking machine houses, including the local warerooms of the Columbia Graphophone Co., the Sonora Phonograph Co. and the French American Phonograph Co. A special department is maintained which will furnish special designs and turn out special products to meet any desired requirements."

TO OPEN IN BALTIMORE

F. C. Weygandt has sold out his talking machine business at 904 Market street, Wilmington, Del., and will open quarters in Baltimore about June 1, where he will act as distributing agent for the Rex machines.

The Rorabaugh store, in Wichita, Kan., has opened a Victor Victrola department.

Government Restrictions on Importation and Exportation of Talking Machines and Parts Serves to Put Industry in Bad Way—Worse Conditions in Sight—War Adventures Recited on Record—What the New Lists Contain—New Army Marches Popular—Distinguished Service Medal for Columbia Man—Talking Machine Houses Still Advertising—Lockwood Suffers Fire Loss—T. Edens Osborne Still Active—Busy Thieves Steal Four Pianos at Once—Increased Prices for Cylinder Records Announced—Other News of General Interest

LONDON, E. C., ENG., April 2.—From time to time in these columns I have given careful expression to the gramophone trade prospects in relation to the attitude of our Government toward an industry which, if recent events are any criterion, is by no means in its favor. There has been promulgated this and that restriction against the importation and exportation of products, parts and accessories absolutely necessary to the life-maintenance of the gramophone trade. It is useless to deny that the position is a very serious one, and short of prohibition altogether, our industry, in many respects, could scarcely be in a less favorable position. At least, so it was thought, having regard to the ban on certain woods, metals, paper, etc., for importation, and the curious method of inflating the tariff duty by including freight and insurance charges in the invoice value of imported goods. All of which, in conjunction with the increasing dearth of labor, high railway, shipping and insurance rates, is not exactly conducive to the maintenance of musical instrument business. Rightly or wrongly, that is the situation to-day, brought about by the exigencies of circumstances. If there be any cause to apportion blame on the authorities, it is not for me to attempt it; I merely record the facts. There we should have liked to let our troubles rest; it was quite enough to render a continuance of trade extremely difficult, without the latest official decision, news of which is just to hand. And it is a bombshell—nothing more or less than an embargo on the exportation of gramophone records! Not bulky pianos, organs, 'cellos, drums, or the like—just records. Maybe the material embodies certain constituents which would be useful to the enemy. On second thoughts one cannot accept that view, however, since it is a total prohibition, which, of course, precludes even the consignment of records to British colonies or to neutral countries far removed from the war sphere. That being so, one must fall back upon the first suggestion as a possible explanation of the Government's action, and that is the need to economize ships. It seems to be generally accepted that the military and naval call on shipping space must increase rather than decrease as time proceeds. Thousands of ships of all sizes are on war service, and if therefore, we are to maintain "necessary" trade relations with countries abroad, some commerce, regarded officially as "unnecessary," must apparently suffer. With the total elimination of all export trade difficulties talking machine firms will have plenty of time to concentrate upon the improvement of home trade. How ironical it reads to be sure, yet ipso facto, that is in bald language our position to-day! Owing to the recent announcement of this radical embargo, there has not been time to ascertain, even if it were possible to, the official reason, nor have I had an opportunity to glean any information or views from prominent gramophone men. That may come later. Meanwhile it is to be regarded as a certainty that the trade must call a meeting of protest with a view to joint action in approaching the Board of Trade regarding the very disastrous effect the embargo will have upon many established businesses. To have any weight in official quarters the whole trade without exception must join in making a strong protest against this export prohibition. It would be useless to ask for complete revocation of the order. Let that be recognized. What, therefore, can be reasonably expected? Perhaps not a great deal. But I believe the Government might be persuaded to sympathetically consider a proposal to partially raise the ban on record exports to our chief colonies—say, Canada, Australia, New Zealand, South Africa and India, to which countries our exports have of late substantially increased. Let the trade try it out any way. It has some right to know the why and wherefores, and knowing, may be satisfied that the Government has done the only thing possible to be done in what may prove to be an extremely difficult situation.

Since writing the above anent the restriction of luxury exports, the President of the Board of Trade announces that legislation may shortly be expected entirely prohibiting the import of luxury articles from all countries. This comes to hand just prior to the closing of my report for this (April) issue, and I must therefore leave over any comment until later. There is just time to say that the new proposal will forbid imports

FROM OUR LONDON HEADQUARTERS—(Continued from page 73)

of musical instruments, fancy goods, motor cars for private use and similar articles of luxury use. Mr. Runciman, the President of the Board of Trade, declares it to be necessary to restrict bulky luxuries in order to provide room in ships for necessaries. He refers to the shortage of tonnage and avers that while we want exports from the United States, they must be confined to wheat, cotton, meat and other things which we cannot get if space in vessels is taken up with luxuries.

The Winner Record Co.'s New Issues

The Winner Record Co. continues to maintain as usual, the high standing and value of its monthly new issues, and among recent preparations for the presentment of special numbers, we learn that record lovers may soon be in a position to acquire further Winner "gems" by the great Will Evans, whose laughter-creating propensities have justly earned for him the title —King of Comedians.

The Man Who Dined with the Kaiser

Doubtless my readers are fully acquainted with the remarkable exploits of the above gentleman, who, taking his life in his hands, so to speak, made an adventurous journey to and from Constantinople, Sofia, Vienna, Berlin, in quest of "copy" for a London newspaper. By a lucky chance he obtained an invitation to a banquet at the Bulgarian King's residence, upon which occasion the Kaiser was present. And now, the man who dined with the Kaiser has been persuaded by "His Master's Voice" Co. to record some of the most sensational features of his thrilling journey. The spoken words are beautifully clear and provide a most interesting illustration of the adage that truth is often stranger than fiction. It is a twelve-inch record. History will undoubtedly accord it a first place among the many unique issues touching upon the adventurous side of humanity which fill an interesting niche in the work of the Gramophone Co. A special folder, by the way, has been published and therein we find a pictorial representation of the great unknown recording his speech.

British Army Marches

In addition to its usual bumper list of new issues for the month, "His Master's Voice" Co. announces an exceptionally excellent program of all the British army marches played by the finest military instrumental combination extant —the Band of His Majesty's Coldstream Guards. The set is fully authentic and comprises in all twenty-one records, including the army bugle calls. Obviously, a stupendous amount of time, labor and expenditure is involved in the production of this regimental music, and we must affirm that no finer records than these have seen the light of day. That there is a big sales field here goes without saying, for the issue comes at a most opportune time. There can scarcely be a family to-day without relations serving the colors in this or that regiment, of which almost each and all has its own particular march. The public may, therefore, be expected to evince a sure desire to possess the chosen tune to which its son, brother or other relative steps forth along the highway of military life. And then too, he will want "his" record dispatched to the trenches or wherever he may be, for "there" you are sure to find the ubiquitous gramophone.

The wide appeal which these army march records obviously make are therefore unrestricted in sales scope and should result in a veritable harvest of good business for all dealers wise enough to specialize them now.

Parcel Post to Russia

It is expected that the despatch of parcels to Russia by direct service to Archangel will be resumed about the end of April or beginning of May. No parcels will be accepted for transmission to Russia in Europe by the existing route via Canada and Japan after March 15, as the parcels should in ordinary course reach their destination earlier if held over for despatch until the opening of the Archangel route. Parcels cannot be accepted to await the resumption of the service by sea direct to Archangel. For the present parcels for Russia in Asia will continue to be accepted for transmission via Canada and Japan.

A "D. C. M." for Member of Columbia Staff

B. Stichbury, of the motor machine gun service, formerly a member of the Columbia Co.'s Clerkenwell road staff, has been awarded the Distinguished Conduct Medal for brilliant work in action. While it has been difficult to elicit full details of Stichbury's act, we understand that it was during the early gas attacks by the Germans that his superior officer was "gassed" and rendered helpless behind the firing line. In his absence, Stichbury displayed such initiative in controlling the men in charge of the machine gun that the attempts of the Germans to follow up their "gas" were completely baffled.

Advertising in the Daily Papers

Notwithstanding present conditions the daily newspapers still continue to carry a fair representation of talking machine advertisements. Prominent among these are "His Master's Voice," Zonophone, Columbia, Winner and Pathé companies. It goes to prove that home record trade at any rate is by no means dead. The industrial classes are earning substantial wages, and since they have little time for outdoor entertainment, it is but natural that a fair proportion of their surplus earnings should go towards a little indoor enjoyment in the shape of new records.

Lockwood Stock Damaged by Fire

On the morning of March 4, at 6 o'clock, Messrs. Lockwood's City Road warehouse, London, was involved in a rather serious outbreak

of fire which took some two hours to extinguish. Fire and water did considerable damage to the five-story building, and much stock, consisting of machines and records, was rendered unsaleable.

Thos. E. Osborne "On the Job"

The recent temporary suspension of the steamer service between Liverpool and Ireland was utilized by Thos. Edens Osborne of Belfast, in his usual enterprising manner. Editorial advertisements immediately appeared in some of the Belfast papers, pointing out that owing to his large stock Mr. Osborne was in a position to supply machines and records, as usual.

Zonophone News

To complete the catalog list of records issued up to and including March, 1916, the British Zonophone Co. has issued a concise supplement of monthly record issues not included therein.

The usual monthly list (March) just to hand, itemizes a wonderfully choice variety of vocal and instrumental selections which represents a fine program of sellers for live dealers. Every taste is catered to, and the uniform standard of value throughout the list is sufficient criterion of its selling power to please. A particularly choice Mendelssohn record is No. A195 (twelve-inch double), bearing "Slow Movement, Quartet in E Flat," and "Canzonette in E Flat," both exquisitely rendered by the English String Quartet, a famous combination this side, whose first appearance on Zonophone will persuade Zonophonists to emulate the historical comedy, Oliver Twist. The ever-popular musical comedy "San Toy," affords the Black Diamond Band a fine opportunity to display its masterful flexibility of musical effort, which is also apparent in two other records down to its credit. A dozen or so topical numbers figure on the program under review. It is sufficient to say that London's best is on Zonophone records, a term equally applicable to the selections, the artists and the recording.

Daring Thieves Get Away with Pianos

Of late, possibly owing to the darkened streets, van thieves have been particularly busy and have made some big hauls. One of the latest occurred in the Bethnal Green district, where, during the short absence of the driver four iron over-strung upright grand pianos were stolen from the unattended van.

Invicta Record Co.'s Latest List

The first list of the Invicta Record Co.'s new eightpenny double disc, styled the "Citizen," to which I referred last month, is now published. A glance thereat convinces one of the company's determination to uphold its claims regarding the quality and general standard of the "Citizen." A start is made with eighteen carefully chosen records bearing thirty-six titles of known selling value, as, for instance, "Blue Eyes," "A Little Bit of Heaven," "Till the Boys Come Home," "A Little Love, a Little Kiss," "When the Angelus is Ringing," "The Sunshine of Your Smile," "When Irish Eyes are Smiling," and others of equal merit. Of the artists we notice some well-known names whose recordmaking experience over a number of years bespeaks success for the "Citizen." The company lays emphasis on the fact that capital, material and labor employed in the manufacture of these records is throughout all-British. Lists, etc., may be obtained from the Invicta Record Co., Ltd., 1 New Inn Yard, Gt. Eastern street, London, E. C.

Increase Price of Cylinder Records

The only firm of cylinder record makers in Great Britain, the Clarion Co., announce that owing to increased cost of material, labor and other expenses, they have been compelled to increase the price of Clarion cylinders to one shilling each.

Columbia Record by Clara Butt and Sisters

One of the records in the new Columbia supplement may well be described as a historic record since it introduces to the gramophone public the vocal talents of the sisters of Madame Clara Butt. It will be remembered that, on the occasion of the last Clara Butt concert at the Albert Hall, the great contralto presented a new quartet, "The Birth of the Flowers," singing in it with her sisters, Pauline, Hazel and Ethel.

The number, written by Madame Lucette Ryley, and set to music by Madame Liza Lehmann, was hailed by the musical critics as a work of art and generous encomiums were heaped upon the talented singers.

This is the song that has now been recorded by Madame Clara Butt and her sisters on Columbia this month, and it will readily be conceded to be possessed of a more than ordinary interest, not merely because of the presence of the great contralto in a concerted number, but by reason of the talents thus displayed for the first recorded occasion, by the famous singer's sisters.

Tommy's New Marching Song

It is a well-known fact that Tommy sedulously avoids the marching songs that are specially written for him because they do not interpret his own personal feelings. When they are, like "Tipperary" and "Keep the Home Fires Burning" about something he has left behind, then he will give them for all he is worth.

It was because he considered that London's numerous battalions (and there are many more than the average person knows of) were entitled to a marching song of their own, Herbert C. Ridout, the Columbia Co.'s advertising manager, wrote "We're the Boys of Good Old London." Wisely he bore in mind the facts set forth above, and stuck to London and London pure and simple for his sentiments. It was passed on to an officer in the Second London Regiment, who thought so highly of it that he submitted it to Sir Charles Wakefield, the Lord Mayor of London, who assented to its being dedicated to him.

Herman Darewski, the composer of "Joyland," "Push and Go," "Shell Out," and "Business as Usual," set it to a swinging march air and the song was immediately accepted for publication by Messrs. Ascherberg's.

In record form it makes its first appearance on Regal No. G. this month, and judging from the popularity of the song itself, the records should prove really wonderful sellers.

Columbia Graphophone Co.
Woolworth Building New York

IMPORTANT COLUMBIA PROMOTIONS.

H. A. Yerkes Becomes District Manager for Central West, and Arthur C. Erisman Is Appointed to Similar Post in New England

W. C. Fuhri, United States manager of the Columbia Graphophone Co., New York, recently announced a number of important promotions and changes in the Columbia service.

H. A. Yerkes, formerly district manager for New England, has been appointed district manager in the Central West, assuming the position formerly occupied by Mr. Fuhri. Mr. Yerkes' territory remains the same as it was under Mr. Fuhri's direction with the exception of Indianapolis, which is transferred to the territory of Mr. Nichols, district manager of the Pittsburgh territory. Mr. Yerkes' headquarters will be at Chicago, and his new territory allows him unlimited opportunities to exercise his recognized sales and executive ability.

H. A. Yerkes.

Arthur C. Erisman, formerly manager of the Boston headquarters of the Columbia Co., has been appointed district manager for New England, with jurisdiction over the Columbia wholesale divisions at Boston, Mass.; Portland, Me.; Hartford, Conn.; New Haven, Conn.; Springfield, Mass., and Providence, R. I.

Walter L. Eckhardt, district manager, with headquarters at Philadelphia, has been given the additional territory controlled by the Atlanta and Washington wholesale divisions.

In announcing these appointments, Mr. Fuhri expressed his gratification at being able to recognize the valuable services which these men have rendered the company, and the high esteem in which they are held by their associates and co-workers in all divisions of the company's affairs. Both Mr. Yerkes and Mr. Erisman are among the most popular members of the Columbia Co.'s sales division, and have achieved signal success in the various important posts which they have occupied.

There are some very old records on file at the Columbia offices which show that H. A. Yerkes entered the employ of the company as an office boy, with an office boy's salary. Possessed of unlimited geniality and personal magnetism Mr. Yerkes has won the admiration and esteem of all his associates and has steadily advanced to the position he now assumes. It is hardly necessary to point out that Mr. Yerkes is fully equipped to handle his new duties, as his many years of experience have given him an unusual grasp of all matters pertaining to Columbia merchandising.

Arthur C. Erisman.

Mr. Erisman's results at the Boston headquarters have been most remarkable, and his thorough familiarity with every phase of Columbia methods and policies will enable him to extend invaluable co-operation to the branch managers under his direction. He has been associated with the Columbia Co. for a number of years, advancing step by step to the very important post of district manager.

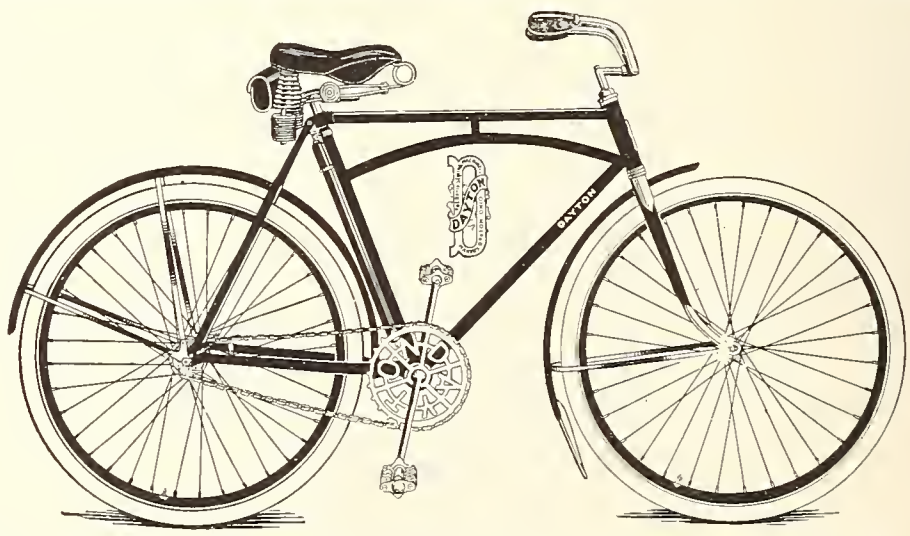
A PROGRESSIVE SYRACUSIAN

Is Frank E. Bolway, the Edison Phonograph Man of New York's Salt City

One of the progressive young men in the phonograph industry is Frank E. Bolway, head of Frank E. Bolway & Son, Syracuse, N. Y. In a chat with Mr. Bolway he states that he has several plans under way which will greatly enhance the distribution of Edison Diamond Disc phonographs in his territory, for which this concern is the wholesale representative. Mr. Bolway is a believer in quality business and in the prestige of the Edison, and an interesting announcement in this connection will appear in these columns later.

INTRODUCE A NEW FEATURE

The Otto Heineman Phonograph Supply Co., Inc., New York, which recently took over the business of the American Parlograph Corp., who marketed the Parlograph dictating machine, is announcing a new feature in this field, consisting of a record-shaving machine fitted with a safety device. This new device permits of the shaving of records with maximum convenience and minimum waste.



Why Don't You Sell Dayton Bicyles, Too?

Manufacturers, jobbers and dealers are co-operating in a big popularizing movement for "A Million Bicycles in 1916." Why don't you sell your share? There is a nice profit in Dayton Bicycles, as many dealers in musical instruments and supplies have found out to their advantage.

GREAT ACTIVITY IN KANSAS CITY

Business, as a Rule, Only Limited by Available Supplies of Machines and Records—Public Institutions Much Interested in Talkers—Special Drives for School Business—New Stores Entering the Field—A. A. Trostler a Busy Bachelor—General News of Month

KANSAS CITY, Mo., April 5.—That the talking machine business in Kansas City and vicinity is in active shape is indicated from the volume of orders that are pouring in on the various jobbers and distributors at a rate that compares most favorably with the holiday rush. The talking machine men are advertising liberally and using original methods for creating demand for both machines and records.

C. A. Fannen, who handles the Victrola in Marysville, Kans., is making preparations to move into better quarters, where he will not only have more room, but will be equipped very nicely for display space.

The smaller towns are taking to the community benefit to be derived from the purchase of a talking machine by a public institution. The Beaver Creek School, a small place near Paola, Kans., recently purchased a Victrola and will use it in connection with educational purposes.

The Jones Store Co. reports March as the largest month in its history, with the possible exception of the holiday rush, during December. Two machines went to Oklahoma last month and H. B. Bibb, manager, sent one machine to North Dakota and one to Montana.

H. B. Levy, representing the Aeolian Co., of Chicago, passed through Kansas City recently on a business trip to the South. When asked regarding the success of the Vocalion, Mr. Levy said: "The Vocalion has taken hold in great shape throughout the different parts of the country where the instrument is being sold. Our company is looking forward to a tremendous business in the months to come."

The marked success of the special accommodations offered school music departments, by the talking machine department of the Geo. B. Peck Dry Goods Co., has led the company to make a general offer to school principals, to bring students to the demonstration room for the concerts this spring. Letters extending this invitation have been sent to every school principal in Kansas City. The attitude of the company, thus encouraging the means of inculcating deeper appreciation of music, has met with cordial response from the school teachers and musicians generally.

The Household Fair is making its first showing of the $200 Pathephone. It has been exhibiting a very classy machine, of the latest type, inlaid with mahogany, and is very much pleased with the attention it has attracted.

Butler & Sons, 610 Minnesota avenue, Kansas City, Kans., report a very large sale of talking machines during the past month.

Crosby Bros., Topeka, Kans., have just completed the improvement of very modern quarters for their Edison department. Six rooms devoted to concerts, demonstrations and record storage, all very beautiful and clever in construction, tend to make this house one of the best looking and most complete in the West.

The Steinola Co., with offices in the Ridge Building, and a plant at Ninth and Denver streets, has been incorporated here and has begun manufacturing and selling a new talking machine called the Steinola. R. H. Deweese is president and G. C. Dixon is head salesman, and D. W. Gist is secretary and treasurer of the new company, which is the first to enter the talking machine manufacturing field in this city.

A line of Columbias has been added to the stock of Charles Reine, 1207 Walnut street, here. Mr. Reine was formerly with the Hoffman Music Co.

J. F. Ditzell, manager of the talking machine department of the Geo. B. Peck Dry Goods Co., added very materially to his mailing list of possible Victrola and record customers recently, by "pulling a new one.' This was a display advertisement offering the April supplement of the Victor Co. to all who would send a coupon, which was part of the advertisement, and who mentioned the kind of machine owned, if any. The advertisement referred to the supplement as a very interesting document for every lover of good music, containing pictures of artists and stories of them and their music. The Peck Co. mailed the supplements to the applicants. The most surprising fact about the names received was that there were very few duplicates of the names already on the company's mailing list.

Many talking machine dealers were in Kansas City during the convention of jewelers of Missouri and Kansas, and called on the jobbing houses. Some of the strongest dealers in the district are jewelers.

The Tungs-Tone needles of the Victor Co. have apparently hit the public just right. The Schmelzer Arms Co., Victor jobbers, is filling orders by precedence of receipt, and sending only one package to a customer.

Miss Jean Kendrick, who for some time has been in charge of the talking machine department of the Henley-Waite Music Co., is no longer connected with that firm.

G. E. Nowlin, proprietor of the Nowlin Music Co., although handling both pianos and talking machines, the Columbia line, is strongly in favor of the latter line as a business builder and declares that the more elaborate the talking machines are made and the greater the range of records available just so much stronger will those machines be in competition with pianos.

A. A. Trostler, manager of the Victrola department of the Schmelzer Arms Co., is about the only bachelor in the talking machine fraternity of Kansas City. This would seem to devolve heavy duties upon him, which it is generally admitted he performs most admirably—performs to the "queen's taste" would indeed be a proper way to phrase it. He is one of the most active members of the Kansas City Club, the social organization of the bankers and such business men, one of the oldest clubs in the city. Mr. Trostler has become a devotee of the greens at the Hillcrest Club, an exclusive organization, with what are said to be the finest links in the West.

L. V. Smith has been appointed assistant to J. F. Ditzell, manager of the talking machine department of the Geo B. Peck Dry Goods Co. Mr. Smith has been with the department a year, and is thoroughly familiar with its policies.

W. J. Eden, representative in the Southwest for the Holland Piano Co., Minneapolis, Minn., while selling pianos, is nevertheless a strong booster for the talking machine and declares that it really stimulates the piano trade, for many people enjoy a combination of talking machine and piano music.

SENDS VICTROLA TO BELGIAN QUEEN

LEWISTON, MONT., April 10.—Father Victor J. van den Broeck recently purchased an expensive Victor Victrola, together with a large assortment of records, and shipped them to Queen Elizabeth of Belgium at La Panne, Belgium, as his personal gift. The Victrola will yield much comfort and diversion to the wounded soldiers in the large hospital at La Panne, which the Queen personally directs.

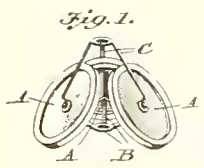
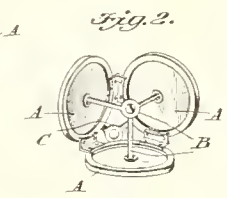
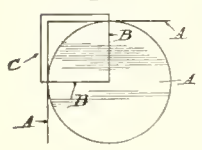
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., April 5, 1916.—SOUND BOX.—Alexander S. Keszthelyi and Frank House, Los Angeles, Cal., assignor by mesne assignment to said Keszthelyi. Patent No. 1,166,602.

This invention relates to improvements in sound boxes utilized in recording and reproducing sounds or sound vibrations, such sound boxes being employed in standard practice in telephony and phonography. In such sound boxes as heretofore customarily constructed a single diaphragm or vibratory member has been employed to receive sound vibrations prior to the recordation thereof, and to reproduce sound vibrations under the action of a suitable mechanism. Such single diaphragm operates vibratorily, principally on a line or in a path of vibration at right angles to its surface. We have determined by experimentation that the true sound wave form comprises motions propagating in all directions, rectangularly related, in fact in the three dimensions of space. In other words, such sound waves are propagated by vibrations in a path at any angle to the surface of the vibrating member, and also in other paths at angles each to the others and parallel with and at angles to the surface of the vibratory member or diaphragm. This propagation of vibration in paths other than a directly radial or rectilinear one, has been established with respect to other forces or manifestations of energy, such as magnetism and light, in which propagation transversely to rectilinear path has been found to occur. With respect to the propagation of sound waves, the contentions as above stated are supported not only by the results which have been obtained in consonance with such theory, but by many authorities, such as Daniell on Physics on pages 433 and 448.







Having determined that sound waves comprise the three directions of motion above pointed out, it was determined to reorganize sound boxes so that the structures thereof might agree in performance with the theory stated. To that end, a sound box has been produced comprising three, or a multiple of three diaphragms, membranes or vibratory members, all set in equal angular relation each to the other, and preferably or approximately in rectangular relation each to the other, whereby such compound and complex motion comprised in the sound wave activity may be sensitively and accurately utilized for a clearer or more full recordation or reproduction of sound combined with better quality thereof. Such plurality or battery of vibratory members constitutes a working unit, all of the vibratory members being positively or rigidly connected together for rigid connection to a common stylus, carbon button or other electrical or electro-magnetic element, or the like, for joint action and service in recordation and reproduction of sound. In its broad aspects, the invention is not concerned in the character and relative arrangement and construction of the means of receiving from or transmitting to the vibratory members the motion incident to recording or reproducing sound. We have devised certain elements of this nature particularly adapted for the practice of this invention, but the same do not enter into the broad invention under present treatment. The several vibratory members are rigidly held in a suitable sound box frame, in the angular relations set forth. And because of the utilization of all the three angularly regulated motions of a true wave form, we are enabled, as above stated, to truly record and truly reproduce sounds without the many defects, distortions and blurs incident to use of sound boxes as customarily produced. It will be manifest that many kinds and qualities of vibratory members may be employed, and many kinds and qualities of connections between the same, both mechanical and electrical, may be employed, within the broad scope of the invention, which contemplates the provision of a plurality of jointly operating or inter-related vibratory members attuned or responsive respectively to the component motions or phases of motion of sound waves.

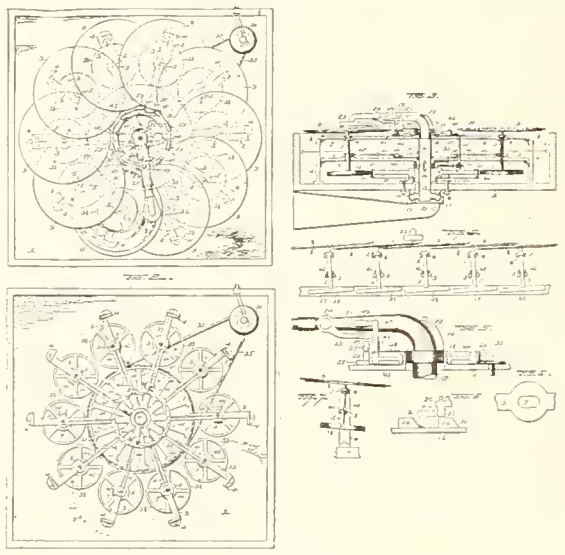
In another application filed later by Alexander S. Keszthelyi, certain modifications, elaborations and pertinent features are disclosed and claimed, such application being for sound boxes, filed February 24, 1914, Serial No. 820,580.

In the drawing, in which we have illustrated without attention to immaterial detail, and also diagrammatically, the embodiment of the invention in certain primitive although operative forms, Fig. 1 is a perspective view of certain sound box features embodying the invention; Fig. 2 is an angularly different view of Fig. 1, and Fig. 3 is a diagrammatic view, illustrating the inter-relation of features or elements shown in Figs. 1 and 2.

TALKING MACHINE.—William H. Daily, Tucson, Ariz. Patent No. 1,168,606.

This invention relates to improvements in talking machines, and more particularly to such as employ a plurality of records which may be played successively, one object of the invention to provide means which will operate automatically to cause the playing of a plurality of records successively without the necessity of shifting the records from their supporting tables.

A further object is to provide a multi-record talking machine with means which will operate automatically to shift the reproducer from one



record to the other, whereby the several records may be played successively.

A further object is to so construct a multi-record talking machine that it will operate automatically to cause the rotation of one record at a time and to shift the reproducer progressively from one record to another

A further object is to so construct the machine that the rotation of one record will be stopped and the rotation of the next record will be started when the reproducer is automatically shifted from one of said records to the other.

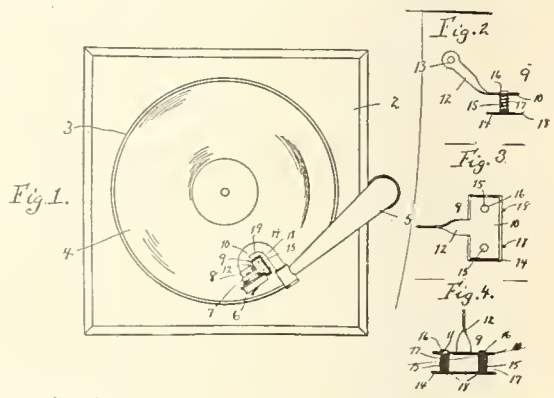
A further object is to so construct a talking machine of the disc record type as to overcome the effect of centrifugal force tending to cause the needle of the reproducer to engage only the outer wall of the record groove, and thus insure the proper and accurate maintenance of the needle in said record groove.

In the accompanying drawings Fig. 1 is a plan view of a talking machine embodying the improvements; Fig. 2 is a horizontal sectional view on the line 2—2 of Fig. 3; Fig. 3 is a transverse vertical section; Fig. 4 is a view partly in section and partly in elevation, showing the relative arrangement and disposition of the record discs and their supporting means, this being diagrammatical in character and showing several discs and their supporting and driving means in a straight line instead of in their normal circular arrangement; Fig. 5 is an enlarged section view, partly in elevation, showing the horn tubes and co-operating parts at the central portion of the machine, and Figs. 6, 7 and 8 are detail views.

SOUND RECORD CLEANER.—James D. Rostron, Germantown, Pa. Patent No. 1,168,910.

This invention relates to new and useful improvements in sound record cleaners, and has for its object to provide an exceedingly simple and effective device of this character which will resiliently hold a cleaning cloth or other suitable cleaning element upon the playing face of the sound record so that the same will be wiped clean just previous to that part which is clean passing beneath the needle, the device being carried by the movable portion of the reproducing machine, whereby the cleaning cloth is carried over the sound record.

Fig. 1 is a plan view of a talking machine, show-

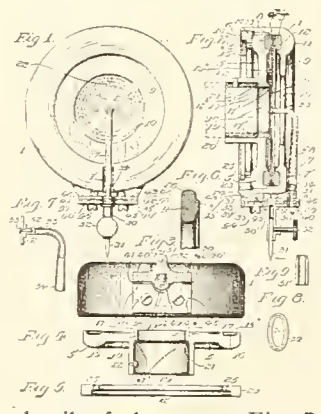


ing the improved sound record cleaner atttached thereto. Fig. 2 is an enlarged side elevation of the sound record cleaner. Fig. 3 is a plan view thereof, and Fig. 4 is a front elevation thereof, a portion of the top plate being broken away.

SOUND BOX FOR TALKING MACHINES.—Wilburn N. Dennison, Merchantville, N. J., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,169,134.

This invention relates to improvements in sound boxes for talking machines, and the objects of this invention are to provide an improved sound box casing, to provide an improved mounting for a diaphragm, to provide an improved stylus bar and mounting therefor, to provide improved means for conducting sound waves from a sound box, to provide adjustable means co-operating with the diaphragm to partially trap and compress a portion of the air in the sound box to improve the reproduction of sound therefrom, to provide a sound box in which the diaphragm will be normally held flexed by an initial pressure when not in operation to counterbalance the pressure which is ordinarily exerted on the diaphragm by the lateral pressure on the stylus due to the propelling action of the record upon one side of the stylus, in carrying the sound box across the face of the record; to make it possible to assemble commercially large numbers of sound boxes with diaphragms held between gaskets with substantially the same pressure.

In the accompanying drawings Fig. 1 is a front elevation of a sound box constructed in accordance



with this invention; Fig. 2 a longitudinal vertical section of the same; Fig. 3 a bottom plan view of the same with a part shown in dotted lines for clearness; Figs. 4 and 5 are longitudinal sectional views of the details of the same; Fig. 6 is a fragmentary transverse section of a detail of the same; Fig. 7 is a fragmentary side elevation, partly in section, of a portion of the same; Fig. 8 a horizontal section on line 8—8 of Fig. 2, and Fig. 9 an enlarged longitudinal section of a portion of the same.

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 78)

ADAPTER-STYLUS FOR PHONOGRAPHS.—Ellis S. Oliver, Newark, N. J. Patent No. 1,169,861.

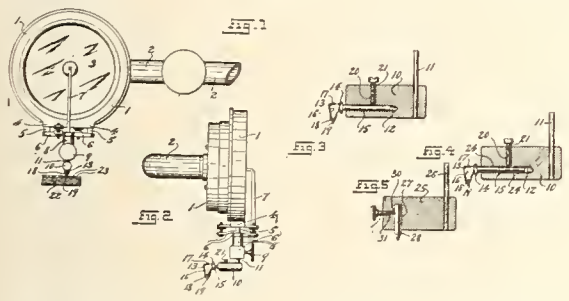
The present invention relates, generally, to improvements in phonograph apparatus; and the invention has reference more particularly to an adapter stylus which will operate to transmit the vertical vibrations produced by the vertical indentations of a sound-record disk to produce the horizontal vibrations of a diaphragm of a reproducing sound-box set in a vertical plane.

It is the principal object of the present invention to provide an interchangeable or detachable adapter stylus adapted to be connected with the ordinary needle-pocket of the vibrator-arm of a vertical sound-box, in place of the usual type of needle adapted to play horizontal sound-record impressions, so that, without other change, the vertical vibrations recorded by the vertical or "hill and dale" sound record impressions may be transmitted through such adapter stylus to the pivoted vibrator arm and vertical diaphragm of the vertical sound-box, so that the latter is adapted to reproduce the sounds recorded upon such type of sound-record disk.

Other objects of the present invention, not at this time more particularly enumerated, will be clearly understood from the following detailed description of the present invention.

The invention is clearly illustrated in the accompanying drawings, in which—

Figure 1 is a face view of a vertical sound-box, the vibrator-arm of which is equipped with the novel construction of adapter stylus made according to and embodying the principles of the present invention, in this view the said adapter stylus being shown in contact with the vertical sound-record impressions of a "hill and dale" sound-record disk, the latter being shown in section. Fig. 2

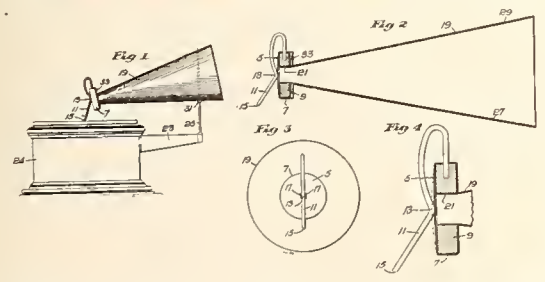


is an edge side view of said vertical sound-box so equipped. Fig 3 is a longitudinal vertical section of an adapter stylus made according to and embodying the principles of the present invention, the same being drawn on an enlarged scale. Fig. 4 is a longitudinal section of a modified construction of said novel adapter stylus. Fig. 5 is a similar view of another modified construction of said novel adapter stylus.

PHONOGRAPH.—Dexter W. Allis, Whitman, and Josiah B. Millet, Boston, Mass., assignors to the Boston Talking Machine Co., Boston, Mass. Patent No. 1,170,134.

This invention relates to phonographs, and among other objects provides a sound reproducing mechanism which is cheap to manufacture and is simple in construction and operation.

Figure 1 is a side elevation of an illustrative phonograph embodying the invention; Fig. 2 on an



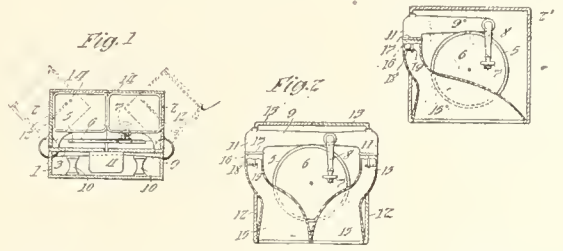
enlarged scale is a vertical section through the sound reproducing mechanism and implifier; Fig. 3 is an end elevation looking toward the right of Fig. 2; and Fig. 4 is a vertical section through the sound producing mechanism on a larger scale than that shown in Fig. 2.

PHONOGRAPH OR TALKING MACHINE.—Delos Holden, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,170,258.

This invention relates to phonographs of the cabinet type having a movable cover which contains the usual horn or sound amplifier.

The principal object is to provide an improved device of this character having one or more covers which may be opened or closed without forming a break in or interrupting the continuity or varying the length of the sound conveying passage or passages through which the sound waves from the reproducer pass to the atmosphere, the generic invention and one species thereof being claimed in an application, Serial No. 763,702 filed on April 26, 1913, and entitled phonographs or talking machines.

Figure 1 is a view partly in vertical section and partly in elevation showing a talking machine em-



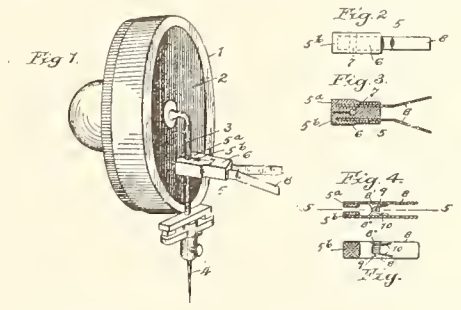
bodying a form of the invention comprising a plurality of covers and amplifiers, the covers being shown in open position in dotted lines; Fig. 2 is a view of the same partly in plan and partly in horizontal section; and Fig. 3 is a view similar to Fig. 2 of a talking machine containing another embodiment of the invention.

METHOD OF REGULATING SOUND-BOX REPRODUCTION.—Emil Greunfeldt, Cleveland, O. Patent No. 1,170,530.

This invention relates to an improved method for regulating the operation of a sound box or reproducer for a phonograph.

The object is to provide a method whereby the operator, merely by engaging resiliently the needle arm of a sound box with a regulating mass and moving the same to and fro there along between the points of connection of said needle arm with the diaphragm and the sound box frame, is able to regulate the essential co-action of the parts to obtain the reproductive effect desired.

Figure I is a perspective view of a sound box for a phonograph or like instrument to which is applied a regulator embodying the invention. Fig. 2 is a side elevation of the regulator. Fig. 3 is a longitudinal sectional view of the regulator. Fig.



4 is a longitudinal vertical section illustrating a regulator embodying the invention but of slightly different form. Fig. 5 is a view on the line 5—5 of Fig. 4.

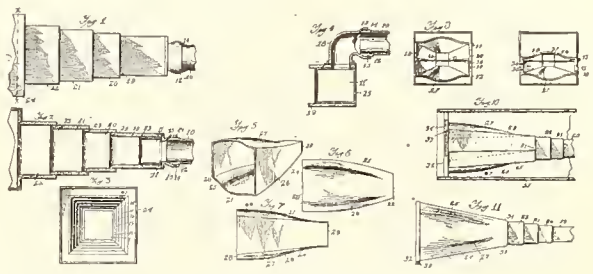
SOUND RESONATOR AND AMPLIFIER.—Forest Cheney, Jamestown, N. Y., assignor to the Cheney Talking Machine Co., Chicago, Ill. Patent No. 1,170,800.

This invention is concerned with sound-reproducing machines, and more especially with those that are designed to reproduce complex sounds of a wide range, such as those of voices, orchestras and musical instruments generally.

This invention is concerned primarily with a novel amplifier made up of a plurality of properly shaped "orchestral sections" located in the proper relative arrangement so that the fundamental vibrations of all the orchestral instruments whose tones are reproduced may be amplified thereby and delivered therefrom in the proper relative arrangements to reproduce harmoniously and fully all the tones of all the instruments or voices employed in making the record.

The invention is further concerned with a novel "violin resonator" to which the amplified air vibrations or sound waves from the "orchestral sections" are delivered, and which by its own vibrations not only further amplifies said sound waves, but also reflects and refracts some of them so as to emphasize and augment the necessary overtones to bring out the richness and peculiar tone color of the various instruments and voices originally employed in making the record. These amplified and resonated air vibrations escape from the resonator and are delivered to the hearers, and in this condition reproduce for them the tones of the original instruments and voices with a marvelous perfection that is vastly superior to that of any sound-reproducing machine constructed prior to the invention.

Figure 1 is a side elevation of an amplifier having a plurality of graduated compartments or "orchestral sections"; Fig. 2 is a central longitudinal section through the same; Fig. 3 is an end view of the "orchestral sections," looking into the large end thereof; Fig. 4 is a central sectional view of the first orchestral section of the amplifier, with the connecting tube entering from the side, instead of at the end, as shown in Figs. 1 and 2; Fig. 5 is a perspective view of the violin-shaped horn or "violin resonator"; Fig. 6 is a plan view of the top or bottom of the same, showing the curved outlines thereof; Fig. 7 is a central longitudinal section of the same, showing the concave top and bottom thereof; Fig. 8 is an elevation of the large



end of a resonator made adjustable so as to vary the size of the large end according to the size of the room or space to be filled, the resonator being shown in its expanded position; Fig. 9 is a similar view, with the resonator in its contracted position, as for a small room; Fig. 10 is a side elevation of the adjustable resonator with the "orchestral-sections" amplifier attached thereto and mounted in a casing; and Fig. 11 is a top plan view of the same, showing the straight sides of the resonator.

The Fowler department store, Binghamton, N. Y., has been enlarged and remodeled. The piano department has been fitted up to resemble a music conservatory studio and seven demonstration booths are installed in the talking machine department. An Estey pipe organ furnishes daily concerts in the auditorium of the store.
