TO HANDLE VICTOR LINE ONLY

Schmelzer Arms Co. Sells Its Edison Line and Will Devote Its Entire Attention to the Victor, Acting as Retailer and Jobber

KANSAS CITY, Mo., April 3.—The Schmelzer Arms Co. has sold its Edison cylinder machine and record business to the Edison Shop of Kansas City, including the stock and good-will. The Schmelzer Co. will prosecute, even more actively than in the past, its business as jobber of Victor goods; it was one of the first of the big distributers of these goods, and has built a tremendous business. It started with the Victor some fifteen years ago. The Edison line was added about eleven years ago and the company did extremely well. In the present situation, however, with the Edison Shop available to handle the cylinder machines and records in connection with its disc business, the Schmelzer Co. was inclined to relinquish the line and devote its entire attention to the Victrolas. The company has a large retail business also. The change will provide more room in the retail and the jobbing departments of the company for the Victor machines and records. A. A. Trostler, manager of the talking machine department, has had charge thereof since its establishment. The February Victor business of the company was the largest February volume the firm ever enjoyed.

RUSHING WORK ON VICTOR BUILDING

CAMDEN, N. J., April 10.—Contractors are working every day, including Sundays, on the construction of the new building for the Victor Talking Machine Co. at Point and Pearl streets. Concrete columns are now being rushed to completion, and the structure has already reached the fourth floor.

The Cable-Shelby-Burton Piano Co., of Birmingham, Ala., has secured the Victor agency.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

Announcing the Waiting List

ORDERS pouring in from all parts of the country are taxing our capacity for production to the uttermost.

SO wonderful has been the public's appreciation of the merits of Sonora, tha the sales have gone far beyond the amounts anticipated by the Sonora Corporation, and even with a manufacturing capacity very many times greater than that of last year, the supply is being forced to the utmost to keep pace with the tremendous demand.

WE suggest, however, that if you are interested, and are in a position to do justice to the selling of an instrument with the wonderful reputation which Sonora has—we suggest that you write us, and we shall be pleased to go into the matter with you.

WE might mention here that a Sonora agency is valuable. We must have the very ablest of representatives, and we carefully choose the best one from about every ten who apply.

IF we can reach an understanding which is mutually satisfactory, we shall be pleased to put your name on the waiting list, and as soon as our increased production makes it possible, we shall make shipments.

THE necessity for issuing an announcement such as this speaks eloquently of the popularity and excellence of the Sonora.

"Supreme"

$1,000

THERE are thousands who love music—who can ***afford*** to buy the finest musical instrument the world affords. These individuals will not willingly permit themselves to own an instrument which is surpassed by that of a neighbor. They know that to own a "Supreme" is an enviable distinction.

AND there is $1,000 worth of value in the "Supreme" and the money has not gone into an ornate gold-finish or ultra-extravagance of construction. The many features unique in this model, the extraordinary inventions that make it a remarkable advance over any phonograph ever made before—these—with the finest of materials and workmanship, make the "Supreme" at $1,000 a ***full value*** product.

THE "Supreme" is typical of all the Sonora models. Each one leads the field at the price asked for it.

THERE are several men, at least, in your vicinity whom you ***know*** *are good prospective customers for a magnificent instrument such as this.*

'TWILL BE A GREAT CONVENTION

Elaborate Plans of Arrangement Committee of National Association of Talking Machine Jobbers for Atlantic City Meeting Now Rapidly Approaching Completion—Educational Features of Unusual Interest to Trade and Large Attendance is Promised

With the annual convention of the National Association of Talking Machine Jobbers less than two months away the Committee on Arrangements is hard at work putting the final touches on a program that even at this early date promises to surpass anything previously enjoyed by the association at its annual meetings.

The Victor Talking Machine Co. is actively interested in the prominent educational features of the convention and has arranged to send the heads of the important departments of the factory to Atlantic City to address and confer with the jobbers. The expert information that will be thus offered to the members of the association will prove invaluable to the future conduct of their respective businesses.

As announced before the dates selected for the convention are July 10, 11 and 12, and the headquarters will be at the beautiful New Hotel Traymore, this being the first time the Atlantic City meeting has been held at that hotel. The present prospects indicate that there will be a record attendance of jobbers and particularly of the principals of the different prominent concerns who have been attracted by the program outlined.

Those who have attended previous conventions of the talking machine jobbers will not have to be advised that the program of entertainment is on par with that provided for the meeting. There will, of course, be the usual elaborate banquet and arrangements have been made to devote many daylight and evening hours to enjoyment of the many attractions offered by Atlantic City, where, as the worthy J. F. Bowers remarked: "Midnight is simply the shank of the evening."

PHONOGRAPH FOR STAGE MANAGER

Machine With Appropriate Records Used to Prompt Chorus Girls at the New York Hippodrome—Saves the Manager's Voice

R. H. Burnside, the general stage manager of the Hippodrome, has hit upon a device whereby his voice is always present on the stage of the big playhouse as a reminder to the girls of the chorus that the management expects them to do their best at all times. He uses a phonograph for this purpose which he has had placed in the prompt entrance facing the back wall so that the sound can be heard on all parts of the vast stage without re-sounding into the audience. Formerly his first assistant stage director, stationed in the entrance, used a code of signals to attract the attention of girls out of step, out of line or out of tune. Now the gentle voice of the skilful director will act as a reminder if any of the army of three hundred pretty girls allows her mind to roam away from the footlights.

It appears that Mr. Burnside has had three records made to suit nearly any contingency that might arise. Parts of the "canned counsel" say "Remember the eyes of five thousand are on you. Smile!" and "Work with the same precision you did the opening night" and "The success of this ballet depends upon you; you're as valuable to us as any principal."

The Diamond Talking Machine Corp., of Rochester, N. Y., was granted a certificate of incorporation by the Secretary of State at Albany, N. Y., recently. The capitalization of the new concern is $10,000, the incorporators being I. Berger and S. and E. Edelstein.

THE QUESTION OF RECORD SERVICE

A Study of the Record Titles, the Work of Various Singers and Other Details Enables Dealer to Better Meet Demands of Customer

"Our system here is to play over every new title that comes in," said a Montreal dealer recently, in discussing some business ideas. "Not only do we try to get a definite idea of the music itself, but of the sentiment of the selection, the record of the artist and a knowledge of the composer. We also endeavor to fix in our minds the names of similar selections or recordings by the same artist.

"We always keep a memorandum of the record numbers that a customer selects and our experience is that the mere act of tabulating the number on a card index fixes in the memory the particular tastes of the customer. Any one can realize the advantage it is to know the musical temperament or preferences of a customer.

"Many customers request us to help them make selections. This requires an intimate knowledge of the record stock as well as of customers, and we know of regular customers that have been developed from mere chance callers by reason of our conscientiously helping them to make a wise choice.

"We do not believe it is good policy to endeavor to sell a customer more records than he or she request. That is to say, as a general policy, but there are the usual exceptions. One who studies his customers soon learns to know the man that will resent your trying to sell him more than he wants and one also soon learns to know the man who will resent your not trying to sell him more than he asks for.

"In a broad way, the dealer who wishes to build up a successful record trade must be prepared to give his customers more than records for their money. He must give them service that can only be given by a thorough knowledge of the goods and of the customers."

ANOTHER COLUMBIA FACTORY

Purchase Large Plant in Bridgeport, Conn., Which Will be Devoted to Record Making

The American Graphophone Co. (Columbia Graphophone Co.), announced last week the consummation of arrangements whereby the company purchased the large factory building at Bridgeport, Conn., which was formerly owned by the Birdsey-Somers Co. This factory is a four-story building which has several acres of land surrounding it, all of which are included in the transfer to the American Graphophone Co. The land involved in this important deal has a frontage of 550 feet on Grant avenue, 323 feet on Summerfield avenue, 621 feet on Barnum avenue and 625 feet on the western side. The factory building is ideally located and equipped and will furnish an invaluable link in the steadily increasing group of Columbia factory buildings.

According to present plans, the Columbia Co. will take formal possession of the new plant about June 1, and it is likely that 3,000 expert workmen will be employed in the factory. This building will be devoted exclusively to record production and the manufacturing facilities at hand will enable the company to materially increase its record production and thus be better able to meet the increasing demands.

WHY THE SALESMAN SHOULD BE PROUD OF HIS WORK

The Selling of Talking Machines Should Be a Profession and the Salesman Who So Regards It Is Climbing Upward on the Ladder of Success

No talking machine salesman can hope to achieve fullest possible success unless he is imbued with a proper sense of pride in his calling. Too many salesmen regard their work merely as a means of making a living. There is no reason why the selling of talking machines should not be regarded as distinctly a profession as is the calling of the doctor or the lawyer. While a collegiate education is not an absolute requisite for a successful salesman, and though the calling carries with it no degree or title, still the real salesman has as much knowledge of his line, gained only by constant study, as has the legal practitioner.

There is a very marked analogy between the salesman and the lawyer. The salesman must plead the case for his particular line, he must convince the jury of his customers that his goods are superior to the ones carried by his competitors.

Both the salesman and the lawyer must depend entirely upon their mental powers to do their work.

Any one can sell newspapers, and it requires but little mental ability to measure off a few yards of calico, or wrap up a couple of collars, but everyone cannot sell talking machines and records correctly.

The *real* salesman believes, and justly so, that he is engaged in a special line of work, that he follows a distinct, dignified, and useful calling, and he takes both pride and pleasure in his work because of that belief.

The man who is proud because he follows and is capable of following a certain line of endeavor, and who takes pride in his work, and in doing it to the best of his ability, will automatically become more successful than the man who feels that he merely happens to be doing certain work because he had no opportunity to engage in other activities, and who believes that so long as he manages to keep his name on the payroll he is accomplishing all that he desires.

The salesman who is proud of his work necessarily has a certain amount of belief in his ability. Pride, rather than the mere lure of a commission, will often force a salesman to tackle an apparently hopeless prospect, and eventually consummate a sale. The salesman who is proud of his work welcomes an opportunity to go after a prospect that some other salesman has given up as being impossible to sell, and every time a sale is made to this kind of a customer the pride of the salesman naturally increases.

Pride is one of the most valuable assets a talking machine salesman can have, for it will make him do things as a matter of course that otherwise would appear to be unnecessary, or even hard to do. Pride will make a salesman keep informed as to the latest developments in his line, so that his customers will find him able to answer all of their inquiries, and answer them authoritatively and truthfully. Pride will keep the salesman on the alert to discover hitherto overlooked prospects and to devise new and original methods of interesting and selling customers.

Pride in his work, and in his line of instruments, will give the salesman an amount of natural enthusiasm which he can impart, in some degree at least, to his customer, thereby adding greatly to the possibility of closing the sale.

The work of the salesman brings him in contact with a class of people who must have sufficient intelligence and breeding to value and appreciate the charms of music. The salesman who feels the proper pride in the dignity and usefulness of his calling will be able to instil similar ideas in the minds of his customers, who will consequently meet and regard him as being on a level of equality with themselves, instead of merely thinking of him as a clerk whose business it was to quote terms and write out order slips.

True pride, justifiable pride, has enabled many a man to overcome obstacles which would otherwise have proved insurmountable. The talking machine salesman who is proud of his work is possessed of a most valuable factor in the accomplishment of lasting success.

ACTIVE CAMPAIGN FOR BUSINESS IN OHIO TERRITORY

Jobbers Representing the Leading Companies Developing Business with Success—Edison Dealers Gather in Cincinnati—2,000 Persons Attend Tone Test Recital—Unprecedented Columbia Demand—Vocalion Trade Shows Increase—Victor Dealers Most Optimistic

CINCINNATI, O., May 3.—A noted gathering of Edison dealers in the Cincinnati territory of the Phonograph Co. took place Monday and Tuesday of this week, the two days' gathering being a succession of events of real interest to merchants dealing in talking machines.

The tone test recital at Emery Auditorium was a remarkable event. There were more than 2,000 persons in the hall to hear Mme. Marie Rappold, assisted by Arthur Walsh, violinist. Quite a number were accommodated on the stage. Those who went with a critical ear came away expressing satisfaction that the voice heard from the tone chamber was the same as the singer who stood before the audience. The program for the evening's entertainment follows:

a. Piangea Cantando, Otello.....*Verdi*
b. Vissi d'Arte, Vissi d'Amore, Tosca.....*Puccini*
Madame Rappold, with Laboratory Re-creations of her voice.

Ave Maria.....*Schbert-Wilhelmj*
Mr. Walsh, with the Laboratory Re-Creations of a Violin Solo, by Mr. Carl Flesch.

The Two Larks.....*Leschetizky*
Laboratory Re-Creation of a Piano Solo, by Mr. Andre Benoist.

a. O Patria Mia, Aida.....*Verdi*
b. Ritorna vincitor, Aida.....*Verdi*
Madame Rappold, with Laboratory Re-Creations of her voice.

Paraphrase on Die Loreley.....*Nesvadba*
Laboratory Re-Creation of performance, by Concert Orchestra.

Dich Theure Halle, Tannhauser.....*Wagner*
Madame Rappold, with Laboratory Re-Creations of her voice.

Meditation, Thais.....*Massenet*
Mr. Walsh, with the Laboratory Re-Creations of a Violin Solo, by Mr. Albert Spalding

A Bedouin Love Song.....*Pinsuti*
Laboratory Re-Creation of a Baritone Solo, by Mr. Arthur Middleton.

Ave Maria.....*Bach-Gounod*
Whispering Hope.....*Hawthorne*
Madame Rappold, with Laboratory Re-Creations of her voice. Obligato by Mr. Walsh.

Immediately after the concert A. O. Peterson, manager of the local branch, marshalled his guests and escorted them to the Sinton Hotel, where a banquet was served; Mme. Rappold and her daughter being the guests of honor. Wm. Maxwell, second vice-president of Thomas A. Edison, Inc., was toastmaster and the health of Mme. Rappold, as well as Mr. Edison, who was hailed as the "Greatest American," was drunk. Verdi E. Fuller had general supervision of the earlier part of the evening's entertainment.

Those to participate in the banquet as well as Tuesday's meeting included the leaders in the social and musical life of this city, as well as many persons of prominence from adjacent towns.

Tuesday's convention brought forth the greatest amount of interest. The dealers came to be instructed and they sat as pupils. Some orators at asking questions were developed. The session was remarkable for the amount of close attention given the leaders by the merchants.

Most of the retailers claim April was not as brisk as anticipated. There was somewhat of a falling off in business all along the line. The merchants made the usual efforts to catch orders and therefore are unable to account for the lack of business during the month just closed.

R. J. Whelen local manager of the Columbia Graphophone Co. reports that he already has enough orders to exhaust the supply for the next two or three months and orders are constantly coming in. He further states: "All the large machines, for which the demand is increasing every day, are coming through promptly, and while there is still a shortage of the smaller machines, the factory has assured us that things will be normal by June 1. We have some twenty odd dealers in Cincinnati and all report good business, which is surely evidenced by the orders they are placing for immediate delivery.

"We have been holding our traveling men in for the past few months but they are now starting out again and report good business all along the line. Outlook for a remarkable year's business is more than favorable and the factory is preparing to handle the increased business which is anticipated."

W. C. Kobin, special Dictaphone representative, spent about two weeks in Cincinnati at the local headquarters at the Columbia Graphophone Co. on West Fourth street, and with the assistance of the local men closed up the month with a boom.

Several of the Columbia artists were soloists at the May festival and considerable interest was manifested in their records on sale at all Columbia dealers. The local Columbia store reports a splendid sale of these records.

Hy. Byars, manager of the Vocalion department of the Aeolian Co., reports a nice increase in April business over the same month of last year. There is a considerable increase in the demand for higher-priced instruments. Indications point to a big May throughout the talking machine trade. Mr. Byars observes that in view of the number of new talking machines coming on the market, it is going to be simply a case of the survival of the fittest. Needless to say Mr. Byars contends that the Vocalion is not going to suffer in the test.

Manager Joseph Dittrich, of the talking machine department of the Rudolph Wurlitzer Co., enthusiastic as ever over the Victor, this morning made the following comment on the trade situation:

"We know of no better way to illustrate the splendid conditions existing in the talking machine business to-day, than to quote the words of a dealer who has just left this office. This dealer was left practically penniless by the great flood of two years ago, and has since overcome all the great obstacles that stood between him and success. In speaking about his requirements in the way of Victrola stock, he said: 'I would no more hesitate in placing an order for a full carload of Victrolas, or for two carloads, as far as that is concerned, than I would have hesitated two years ago in placing an order for six machines.'

"This Victor dealer is located in a town of 13,000 inhabitants and handles Victors exclusively. He has one very strong competitor in the Victor line, and competitors who handle grade machines of various makes. His remarks therefore can be accepted as representing the sentiments of the average dealer under average conditions and further comment is entirely unnecessary.

"The success of the average Victor dealer should be traced not only to the splendid products of the Victor factory and its marvelous and consistent policy, but also to the earnest cooperation that the jobber really extends, and to that splendid medium of information, The Talking Machine World, which is carefully read and treasured by every live up-to-date dealer."

The Knabe Crystola, so far as the territory about the immediate Middle West is concerned, will, hereafter, be handled from the Carew office building, by Manager W. O. Black, as distributor, aided by E. R. Mitchell, formerly retail manager of the Wurlitzer branch at Springfield, O. A complete line of Knabe-Crystolas are handled at the new central office, which overlooks Fountain Square.

WEDDING BELLS IN ASTORIA

Albert I. Ross, talking machine and piano dealer of 212 Main street, Astoria, L. I., N. Y., has announced the recent marriage of his daughter, Miss Ethel E., to Reuben W. Perkal, a prominent builder of Bay Shore, L. I. Mrs. Perkal was long associated with her father in his business as head of the sales staff and was recognized as a competent business woman.

TO ENLARGE EXPORT TRADE

Columbia Graphophone Co. One of Many New England Firms Seeking South American Trade—Barrett Makes Address

BRIDGEPORT, CONN., May 8.—Manufacturers here are preparing to enter the South American export field on a large scale. John Barrett, director-general of the Pan-American Union, and one of the greatest authorities in the United States on South American conditions, made a notable address a few nights ago before the Chamber of Commerce on the opportunities in South America which await New England industries. The Columbia Graphophone Co. is already doing an extensive export business in South America, and is but one of the many large concerns in this section of the country that are seeking to establish better trade conditions throughout the South American continent.

MUSIC SHOP REPAIRS COMPLETED

KOKOMO, IND., May 8.—The Music Shop, which has recently been thoroughly altered and repaired, is now one of the most up-to-date talking machine stores in northern Indiana. In addition to enlarging the orginal store by the addition of extra space, two new soundproof booths have been installed and a large and complete stock of records have been put in.

W. F. Nash, of La Grange, Ind., has secured the Columbia Grafonola agency for Nobel County, and will establish a branch store at Kendallsville, Ind., for the sale of the machines and records.

DEALERS' ADVERTISING BUREAU

Established by the Stewart Talking Machine Co., of Indianapolis—Pictures of Interest to Dealers Under Head of Service—Should Stimulate Trade Interest During the Summer

INDIANAPOLIS, IND., May 5.—A dealers' advertising bureau has been established by the Stewart Talking Machine Co., Victor jobbers of this city. As a spur to summer business this bureau offers Victor dealers an art fan elaborately printed in five colors, bearing the dealer's imprint and advertising on the back, a whistle cut in the design of a Victrola XVIII., on which bird imitations can be played and which opens up to display the dealer's name, and an interesting story booklet showing the delights of a summer camp in the possession of a Victrola.

These three different pieces of advertising are designed to appeal to young and old and all classes of people equally strong. The fan is for broadcast distribution at county fairs, carnivals, or any sort of public gathering, appealing generally to all classes of people during hot weather. The whistle appeals especially to children, although it is a novelty which affords almost an equal amount of pleasure to grown folks. The story booklet finds its strongest interest among those people who can afford to spend vacations on the river, or in the mountains, or at a lake, although it has a certain attraction for people indulging in the more moderate luxury of a picnic or a day's outing.

These three items are offered at reasonable cost to Victor dealers all over the country, and the attractive feature is that the Stewart Co.'s advertising service for the whole summer goes with each purchase of any of these articles. That advertising service includes the preparation of system letters shaped to each dealer's needs, newspaper advertising written for each specific case, and a vast amount of printed circulars for house to house distribution.

Large contracts have been issued for the preparation of this advertising material and the Stewart Co. is looking for enthusiastic returns.

Victor dealers for many years have been inclined to overlook the possibilities of the summer market for Victrolas, but with a trained and able advertising bureau directing summer sales efforts in the way the Stewart Co. has planned, bigger profits should be realized in all parts of the country.

NEW NICKEL-PLATING PLANT

The Phonograph Appliance Co. which recently leased a building on Staten Island, has equipped its factory with a complete nickel-plating plant, and the officials of the company state that orders for more than 500,000 pieces have already been received by this department. In addition to nickel-plating this company is producing a universal tone arm, which is meeting with popular favor, and is also making special parts to order.

PLANS FOR NEW CAMDEN LIBRARY

Building to Be Presented to the City of Camden by President Johnson, of the Victor Co., Is of Imposing Roman Ionic Design

CAMDEN, N. J., May 10.—Final plans have been perfected for the new Cooper Branch of the Camden Free Library, which will be erected and presented to the City of Camden by Eldridge R. Johnson, president of the Victor Talking Machine Co. The library will be located in the centre of Cooper Park and will be surrounded by rows of shade trees. The building, which will be 63 feet wide and 108 feet long, will be of Roman Ionic design, and will be enriched by an impressive seven-bay Ionic colonade, the columns of which will stand twenty-seven feet high and will be approached by a flight of steps stretching the full width of the colonade. The main floor will contain the 50,000 volumes which are to be housed in the library, and also the reading room and librarian's office. Flanking the main room will be the children's room and the reference room. The bookcases will run the whole length of these rooms and will be seven feet high. On the second floor will be two rooms for work or for small meetings, a librarians' rest room, and a large lecture room. The building will be of fireproof construction throughout and the most modern system of heating and ventilating will be installed.

PHONOGRAPH AIDS WITH FILM

Edison Machine, Placed Back of Stage, Lends Realism to Presentation of "The Stolen Voice" at Theatre in Buffalo—Creates Much Interest

BUFFALO, N. Y., May 5.—A large size Edison record machine was used to novel and splendid advantage at one of the city's most fashionable theatres here on Friday and Saturday evenings. Manager Hyman, of the new theater, Victoria, in an effort to make more realistic a photo-production introduced an Edison machine at the juncture, where Robert Warwick, a famed screen star, is shown singing before a large audience in "The Stolen Voice." The house was darkened and from the back of the stage came the strains of an aria from "Pagliacci."

"I didn't know that Robert Warwick was such a good singer," a theatrical man commented in congratulating the manager upon the novel effect produced. The $250 Edison machine was obtained from the store of Schuler Bros., in Main street, and John Shuler was in the audience when the 2,500 listeners applauded the number.

OPENS BRANCH IN TACOMA

SEATTLE, WASH., May 2.—Hopper & Kelly, who handle the Victor, Edison and Columbia lines at Third avenue and University street, this city, have opened an elaborate new branch store at 945 Broadway, Tacoma.

NEW YORK, MAY 15, 1916

TALKING machine dealers everywhere should become keenly alive to the necessity of impressing on their representatives in Congress, and in the Senate, that they are strongly in favor of price maintenance—in fact, that the upholding of this principle of uniform pricing, which is recognized as an incentive to the promotion of business efficiency among merchants, is of vital interest to the public.

It must be kept in mind that the opponents to price maintenance are exceedingly active in organizing and carrying on a stupendous campaign against the enactment of legislation of this nature. It is significant, however, that E. L. Howe, the executive secretary of the National Retail Dry Goods' Association, which has been opposing price maintenance legislation, stated, after visiting Washington last week, that he had received definite information from an entirely trustworthy source, to the effect that the price maintenance bills now before Congress were likely to receive early consideration. He gave it as his view that unless the opponents of price maintenance took a stronger stand than they had yet done, one of the bills would probably become a law.

Whether these views were set forth by Mr. Howe for the purpose of stimulating the opponents of the measure to immediate and definite action matters little. The point is that talking machine men, as well as their friends, should become alive to the necessity of immediate action. They should utilize all forms of public opinion to emphasize that price maintenance is the very foundation of commercial health in the talking machine industry.

Every man who believes in price maintenance should realize that he must do something to counteract the systematic work of the opponents of the proposed law, which is country-wide in its influence.

There is no question to-day confronting the talking machine trade that is of greater importance than that of price maintenance. Without this policy in vogue talking machine men would find not only a depreciation in their present stock values, but a complete demoralization of their business. The cut-raters, if they had their way, would seriously weaken the protection which is vouchsafed the talking machine trade through the policy of price maintenance. Price cutting would undermine the confidence of the public in the talking machine, because purchasers could not receive that protection which is possible to-day through the sale of standardized articles at a uniform price which insures a quality standard.

Price maintenance means protection for the manufacturer, jobber and dealer. It means price stability and quality, while price cutting would mean the destruction of conditions which would inevitably lead to chaos in the trade.

Too many talking machine men are inclined to inaction in this matter; they believe in the "let-John-do-it" idea, forgetting that their interests are vitally involved, and each individual should see to it that he gets in touch with his Congressman, not merely by letter, but personally, if he can.

He should, as a protection to himself and to the public, take every possible means of bringing his views to the attention of our National legislators and not "pass the buck" along. Action is needed right now, and every reader of The World, no matter where he is located, whether in the small village or in the big city, should act at once.

No subject has come up for consideration in years which has such a deep bearing upon the future of the industry as has this question of price maintenance.

Now is the time for every man to stand up and be counted.

IN these days of heavy record demands the average talking machine dealer is at times quite puzzled as to just how much attention he should give to each record customer, both in fairness to his customer and to his own business. It is to be regretted that the "shopper" has for a long time been quite evident in the talking machine field. There are also many men and women, particularly the latter, who believe that the purchase of a 75 cent record or the promise to purchase one at a later date, entitles them to the use of the talking machine dealer's demonstration room, his machines and records and the time of his clerk, for an indefinite period.

Demonstration rooms cost money. They represent an investment in fixtures, furnishings and rent that will pay a profit, moreover, the occupancy of a demonstration room by a shopper frequently means the turning away of another prospective customer who has not time to wait until the room is vacated.

Just how to act is a puzzle for the average dealer.

The customer who stays an hour and buys one cheap record may not have been impressed by the others tested, and appreciative of the courtesy shown, may come back again and place a substantial order. If the customer is treated with a lack of consideration and practically forced to vacate after what may be considered a reasonable time, many prospective sales may be lost.

Much of the uncertainty may be removed through the dealer studying the tastes of his customers. If he prefers vocal selections it might be a waste of time to try and sell him a number of instrumental records, or vice versa. If his previous purchases are entered in a suitable index the clerk is able to put before him the records that will most appeal to him and thereby develop a minimum demonstration into a maximum sale. The clerk for his part should make a definite attempt to find out just what the customer wants instead of picking records at random. A description of a record will frequently serve to guide a customer as to whether he does or does not want it, and thus save the time necessary to play it. It has been found that a courteous questioning after each rejected record as to the why and wherefore of the objection will not only give the salesman a better line on what the customer wants, but also influence the latter to make a selection promptly and not turn the demonstration into a pleasant free entertainment.

When the dealer sees the prospective customer walk out without purchasing one record, and sees a dozen or more records lying about the demonstration room where they have been tried out, it is often hard to dig up enough courtesy to meet the situation.

THE success achieved by the great operatic stars, both in concert and in opera, must unquestionably be attributed to the tremendous educational value of the talking machine. Through the records these artists have become known the country over—they have, in other words, been advertised so fully and completely that it is no longer necessary to tell who they

are; the owners of talking machine know all about them. The records of their voices have acted as advance agents in conveying a knowledge of their capabilities and their repertoire.

The fact undoubtedly stands that the talking machine has made grand opera stars, and not, as some erroneously think, that grand opera stars have made the talking machine. It is only comparatively a few years ago that talking machine manufacturers succeeded in persuading an artist of international prominence to allow his or her voice to be reproduced. Money was not the consideration, but because the artist considered the proceeding undignified. Now lesser lights are clamoring for the privilege of making records in order that their names and abilities may be advertised to the world by means of the talking machine record. Whether or not the talking machine deserves all the credit of making the career of certain grand opera stars, it is quite certain that there are thousands of persons who have by means of the talking machine been educated to such an appreciation of the world's classical music as to take advantage of any opportunity of hearing them. Furthermore, the managers of famous musicians and entertainers are enabled to visit cities and towns at a profit, where a few years ago they would not have paid the bare running expenses of a single night's entertainment.

THE musical season now coming to a close has been a gold mine for many of the great European artists, whose names and records are well known to talking machine users. For instance, John McCormack, during the past season, has scored a most phenomenal success. In New York alone, the Irish tenor has sung eleven times in public which brought in the enormous amount of $65,000. Since last October he has given seventy concerts on the road, and, according to the manager, the gross receipts of these recitals will pass $300,000, while more than three hundred engagements for other concerts have been turned down.

As for talking machine records of McCormack songs, it is said that over a million and a quarter were sold in the year ending March 1. This item moved a friend to say that "his income from royalties equals and perhaps exceeds the combined salaries of the President of the United States, the Governors of New York, Pennsylvania and Illinois, and the Mayors of New York, Boston and Philadelphia." And yet McCormack remains "a normal human being," who does not believe there is any such thing as "artistic temperament."

IN a lengthy and excellent article on the importance of price maintenance written by Charles B. Klein, of the Klein & Heffelman Co., the piano and talking machine dealers of Canton, O., and which was run in a local paper, Mr. Klein gives the talking machine men a new view of the meaning of price maintenance for their own business by offering an illustration of the sales tactics that would prevail were price juggling countenanced in this industry. Mr. Klein makes the very valuable and impressive point that with fixed prices abolished the talking machine dealer would face an increased payroll for clerk hire of many hundred per cent., while at the same time he would face the question of smaller and uncertain profit. Mr. Klein's handling of the situation, which is to be found in another section of The World this month, is well worthy of study by every talking machine man.

THAT present laws may still be depended upon to offer a check to the price cutter is again proven in the case of a firm of wholesale grocers in Baltimore against the Welch Grape Juice Co. The latter concern refused to sell its product to the grocer, who brought suit under the Clayton Act and the Sherman Anti-Trust Law. At the first trial in the Federal Court, Baltimore, the jury disagreed, but at the second trial they found for the Welch Co. on every count. It is probable that the case will be appealed.

MODERN, live ideas in talking machine retailing are an absolute necessity to success to-day. The well managed sales department must have behind it a capably managed business department, where credits and collections are given intelligent consideration. A good collection system is the life blood of business. Too many overlook this fact.

It is a very pertinent question which a wideawake business man recently asked: "If manufacturers see the necessity of elaborate system to help dealers sell their product, why should they not go a little further and extend the system so that it will help these dealers collect somewhat better on accounts made in selling their goods?"

As this business man points out, the correspondence of the collection department of most houses is still very unscientific and puts that department continually at odds with the selling department. The latter department is conducted on principles of graciousness, of extending help in constructing a business, while the collection department has not advanced beyond the old nagging, scolding or cajoling method. To improve the system of collecting is the way out, says our business friend. Show the dealer how to make collections; how to write collection letters; how to talk to the party who owes a past due account and make him see how important it is to live up to his obligations.

Here is surely a great field for the student of better credit and collection work, which has been so often emphasized by The Credit Man's Bulletin, which is doing fine educational work in this special field. Prompt collections mean as much to a business as efficiency in sales. Why not, therefore, if we have elaborate systems to help the retailer in the later, extend the system to help the retailer in the former?

Take the "guesswork" out of your deliveries by using the

Pearsall Victor Service

of New York

DON'T "guess" any more about receiving your shipments of Victor records or supplies, for our entire equipment is at your disposal. Here is an organization that does nothing else but look out for the interests of Victor dealers; an organization that can't help but make good when you want goods. ¶ You can *sell* more records. Let us help you to do it.

Producers of Die Castings in Aluminum, Zinc, Tin, and Lead Alloys
Also manufacturers of Die-Cast Babbitt Bearings and Babbitt-Lined Bronze Bearings

INCREASED ACTIVITY EVIDENT ON PACIFIC COAST

After a Busy April, May Has Opened With Excellent Prospects for Larger Sales in Both Machines and Records—Tungs-Tone Needles Popular—Many Stores Enlarging Their Quarters—Many Visitors During the Past Few Weeks—News of the Month in Detail

SAN FRANCISCO, CAL., May 2.—The first part of April was not very brisk in the talking machine business on the Pacific Coast, but the latter half showed signs of greatly-increased activity. Even the week before Easter, which is a poor week in San Francisco ordinarily, the record sales were satisfactory. This was largely due to the new Easter records on the market and the prominent featuring of them by the progressive shops. The month closed with the brightest of prospects, both in the large cities and country districts. There is not quite as much complaint about shortage of stock either in machines or records. Grand opera records had a fair run during the month, which demand was probably stimulated by some high-class musical attractions here.

Cannot Get Enough Tungs-tone Needles

Charles Mauzy, manager of the Byron Mauzy Victor and Columbia departments, says his department is inconvenienced by being unable to obtain the required amount of Tungs-tone needles. Business in talking machines and records is fully normal for the season. The company had a very beautiful Easter window, displaying talking machines in a setting of Easter lilies and old rose plush draperies.

H. Moorey, assistant auditor of the Columbia Graphophone Co., has just paid a visit to San Francisco in the course of a trip over the Western territory. He reports Columbia business flourishing on the Coast.

James J. Black, manager of the talking machine department of the Wiley B. Allen Co., San Francisco, is expected back from his three weeks' trip to Portland in a few days. He went North to introduce certain changes and improvements in the talking machine department in the Portland store.

A Handsome Easter Display

One of the most strikingly beautiful Easter displays in the talking machine line here was that of the Wiley B. Allen Co. The show window was backed with a fan-shaped trellis entwined with vines and showing a profusion of wisteria blooms, orchids and other rare flowers. C. J. Kendrick, representing the Victor Talking Machine Co. on the Pacific Coast, is back in San Francisco, after a trip over his territory.

To Enlarge Department in San Jose

The Wiley B. Allen Co. is preparing to greatly enlarge its talking machine department in the San Jose store. The whole store is to be renovated and re-decorated, but the chief reason for the alterations is to give more prominent space to the very flourishing talking machine department which has long been handicapped by a lack of space. The company is soon to make changes for increasing the efficiency of their talking machine department in Portland also.

Andrew McCarthy, secretary of Sherman, Clay & Co., and head of the Victor talking machine wholesale activities on the Pacific Coast, is in the Northwest on a trip to visit the company's stores at Seattle, Tacoma, Spokane and Portland. The jobbing business in the Northwest is showing a big improvement.

Awaiting Popular Pathé Model

Louis S. Blackey, of the Pathé Pathephone shop in San Francisco, is expecting the arrival of the new Model No. 25, the $25 machine which will play all records. Business here is good and the new store is a marvel of attractiveness. Mr. Burgee, of the traveling force, has left for a trip through the Northwest in the interests of the Pathé.

Mr. Durant, the accomplished musician, late of the Manhattan Grand Opera Co., has taken the agency for the Pathé and opened a fine little shop at Berkeley, Cal. Mr. Durant has just been making some very successful tone tests at his place, which is located at 2213 Bancroft Way.

F. B. Travers, manager of the Sonora Phonograph Co., San Francisco, is making a trip North, covering Portland, Seattle and other points.

Sonora Business Keeps Up Strong

April business in the San Francisco Sonora establishment has held up strong. The company is short on $100 and $150 models just now, but expects adequate supplies shortly. The new $1,000 Sonora Supreme, which was recently shown in New York, has created considerable interest in the trade here. A machine or two of this type will be brought here and demonstrated to the public in the near future.

Mr. Steers, of the Sonora Co., has just returned from Los Angeles and the South. Mr. Steers is president of the local company.

Mr. Parker, of Bush & Lane, who handle the Sonora in Seattle and Portland, has been visiting in San Francisco for a few days on business in connection with talking machines.

Interesting Edison Tone Test

The Edison Shop, San Francisco, had a very interesting tone test musicale on April 20. This was the first of a new series, and proved of even greater attraction to the public than the others. Special invitations were issued and as a result a very select audience was gathered to appreciate the program rendered. At this test the musicians who participated were local people of accomplished talent, and they were most successful in their achievements. Ruth Brown, soprano; Lowell Moore Redfield, baritone, and Eleanor Snodgrass, violiniste, made the tests.

The Edison re-creation Easter music was well received in this market and helped to keep business up to the average during Lent. The present widow display of the Edison Shop has a special attraction at night when the electrical effects are to be seen. A spotlight, which is concealed from view above, plays upon a handsome Edison phonograph and the outside beholder is at a loss to account for the light.

The talking machine department of the Emporium, which is soon to be enlarged and rearranged in accordance with plans for extensive alterations in the Emporium music department, reports a lively business in opera records. The Columbia and Edison machines only are sold in this department.

A lady customer at the Clark Wise talking machine department came in the other day and said, in reference to a phonograph record, of course: "I Want a Little Love, a Little Kiss." The accommodating salesman instantly responded like a gentleman with: "Step right this way, madam."

We Are in the Market

For Talking Machine Notes, Leases and Contracts Held by Responsible Dealers and Manufacturers. Will Pay the Highest Percentage.

EMPIRE SECURITY COMPANY
208 S. LA SALLE ST. CHICAGO

NEW CONCERN IN HAVANA, CUBA

The Universal Music Co. is a new concern in Havana, Cuba, which has opened a store on Neptune street, that city, for the purpose of handling talking machines and pianos. Charles Echemendia and Saturn Huguet are the heads of the company.

EDISON TRADE IN OMAHA

Schultz Bros., Edison jobbers of Omaha, report that the dealers in that section are finding it difficult to get goods enough to meet their demand in both machines and records. The machine demands appear to be heaviest for those phonographs selling for $100 and more.

Detail of Vocalion Salons in Aeolian Hall During "Vocalion Week."

Here Are Shown a Few of the Art Style Instruments Exhibited.

The AEOLIAN-VOCALION

Its Important Place in the Phonograph Industry

IN the period that has elapsed since its introduction, The AEOLIAN-VOCALION has established itself firmly as the leading high-grade phonograph upon the market. In this position it is practically without competition. This outcome was deliberately planned when The Aeolian Company decided to enter the phonograph industry. Through its possession of vital new phonograph patents, its wide experience in acoustical science, and as the result of innumerable laboratory experiments, its ability to produce a phonograph musically far ahead of any upon the market was beyond a doubt—was indeed a demonstrated fact.

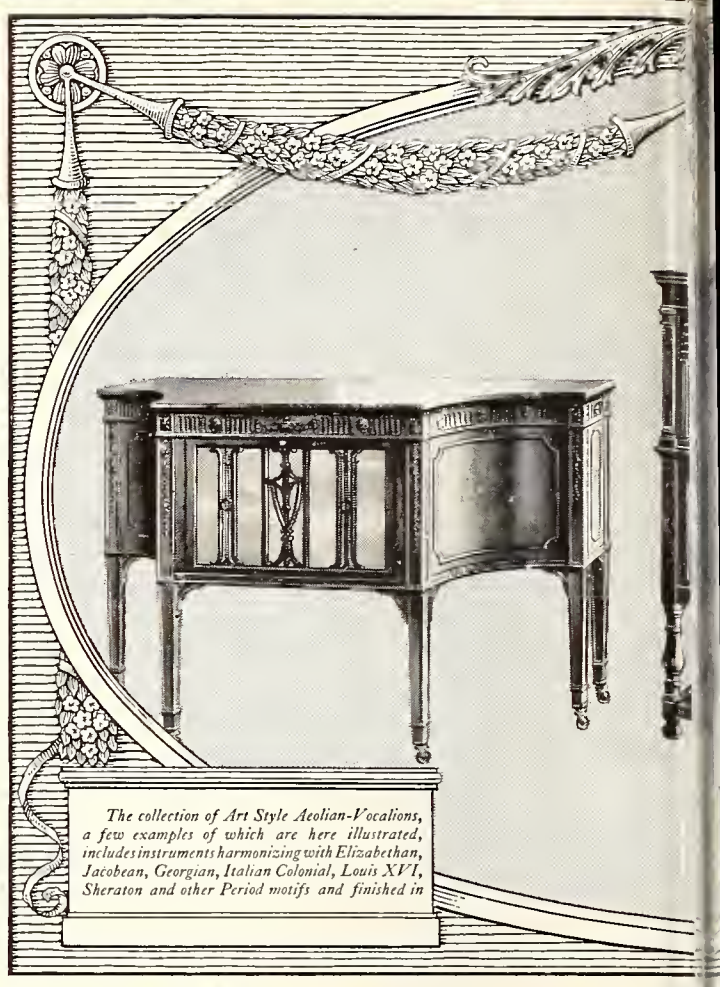
It only remained, therefore, for this Company to utilize its unparalleled facilities for fine case-designing and finishing, to produce a phonograph which from the standpoint of architectural beauty as well as musical excellence should establish a new and higher class or grade.

The extraordinary success of The Aeolian-Vocalion in the past year is the exact measure of The Aeolian Company's success in achieving its purpose. In the phonograph, as in the piano and other similar industries, there is a place and a large and important market for the high-grade product. This place in the phonograph field The Aeolian-Vocalion is filling with signal success.

(*Continued on page 4*)

VOCALION WEEK

VOCALION WEEK, the newspaper announcement of which is here reproduced, was held in New York last month at Aeolian Hall. The exhibition of Art Vocalions, and the four daily recital demonstrations which were the features of the Week, were largely attended and highly successful. While the Aeolian-Vocalion is now generally recognized as the leading instrument of its type, practically no visitors were prepared for either what they heard or saw. The magnificent group of Art instruments aroused the utmost interest, particularly amongst architects and interior decorators who had a special evening given over to them, as well as to visiting dealer-representatives. It is proposed to repeat Vocalion Week in some of the leading cities where the Aeolian-Vocalion is represented.



The collection of Art Style Aeolian-Vocalions, a few examples of which are here illustrated, includes instruments harmonizing with Elizabethan, Jacobean, Georgian, Italian Colonial, Louis XVI, Sheraton and other Period motifs and finished in

VOCALI

AT AEO

During which the superb ar
newest and greatest of all pho

THIS week at Aeolian Hall will he of utmost interest to the music-loving public. Before its close, the now generally recognized fact will be further strongly emphasized that with the advent of the wonderful Aeolian-Vocalion, the phonograph finally emerged from the relatively narrow limits of its earlier development and became a true musical instrument of genuine artistic value and dignified character.

AN ART EXHIBITION

The central attraction of Vocalion Week will be the exhibition of a magnificent group of Art Instruments, wholly beyond and unlike anything heretofore attempted in the manufacture of phonographs.

Here the connoisseur will find genuine objets d'art in furniture—pieces which in design, wood, color and finish reflect the very spirit of the classic periods. No such collection of Art musical instruments has ever been shown before. And the rare beauty of their outward appearance is significant of an equal degree of perfection in their musical and other features.

MUSICAL DEMONSTRATIONS

The second feature of Vocalion Week will be the informal musical demonstrations, taking place each day at specified hours as indicated in the Program.

Just in the measure that this great, new phonograph surpasses in physical art and beauty all previous instruments, so in musical qualities and capabilities it likewise excels. Here, however, written description fails. No

musical art reflected in the exhibited and demonstrated

played upon the Aeolian-Vocalion. It means an entirely new fullness, richness, depth and beauty of phonograph tone.

THE NEW PHONOGRAPH FEATURE

And one last feature of this new phonograph will be demonstrated—in some respects the most important of all. This is the feature of *personal control.*

During the demonstration recitals a performer will show how by means of the Graduola — the exclusive and revolutionary expression device of the Aeolian-Vocalion — anyone may render a record to suit his individual taste. A wonderful privilege added to those the phonograph has hitherto conveyed, this means that anyone may give expression to his own music instincts. It means that record monotony is forever banished. It means that when one cares to use it, there may be given to any record a quality of *livingness* and delicate variety of interpretation, that lifts the hitherto stereotyped phonograph performance directly into the realm of genuine expressive musical art.

AN INVITATION

Aeolian Hall opens its doors to you this week. You may be deeply interested or you may never have felt an interest in the phonograph. Here, however, is something that will attract every lover of the beautiful and of music. The exhibition and musical demonstrations are, of course, free. No obligations of any kind will attach to your visit and the Aeolian Company will be genuinely gratified to entertain you as its invited guest.

Musical Instruments in the World

VOCALION CASES

THE cases of the Aeolian-Vocalion set an entirely new standard for the phonograph. Each one, from the least expensive model to the highest priced Art Style, is the embodiment of true art and good taste. Every detail, every door or moulding is dimensioned, shaped, and treated to fulfill its purpose and that of the instrument. All ornamentation is placed to relieve and at the same time to enhance the simple beauty of the plain areas. Throughout the highest art is manifested, both in the elaborate details of the superb Period designs and in the dignity and repression of the simpler models. In all cases, the finish is of the best. Multiple coats of varnish and repeated hand-rubbing and polishing imparting a depth and richness never hitherto found in phonograph cases.

To the MUSIC-DEALER

THE AEOLIAN-VOCALION offers a most valuable opportunity. The number of firms manufacturing phonographs is already increasing. Competition is growing, and popular demand is depending less and less on the glamour of association with individuals and artists, and more and more on intrinsic merit and demonstrable superiority.

The Aeolian-Vocalion is not only far in the lead today, but the whole history of its manufacturers is a certainty of its remaining so. Moreover, this leadership is obvious at a glance even to the least musically cultured. It is apparent in the most moderate-priced "stock" model—it is overwhelmingly evident in the exquisite Art Styles.

The attention of dealers is directed to the two inside pages of this insert. Vocalion Week there treated was one of the most significant events in the recent history of the phonograph. Any intelligent merchant can estimate for himself the value of a clientele attracted by such instruments.

When in addition it is realized that the Aeolian-Vocalion line is the largest in the industry, ranging from instruments at $35 to $3000, and that Aeolian representation is *exclusive*, insuring the dealer the advantage of all the business in his territory, the tremendous value of this representation becomes apparent.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Address the Aeolian-Vocalion Department

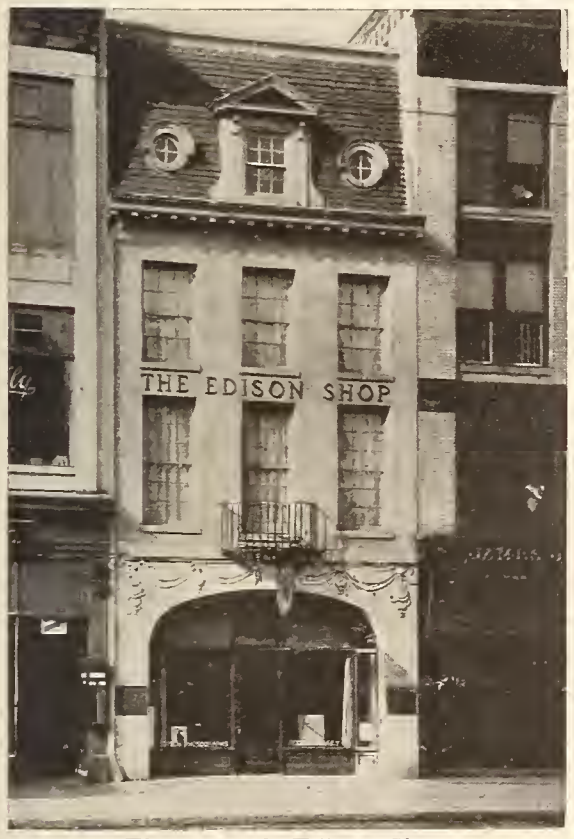
THE EDISON SHOP IN NEWARK

Elaborate Quarters, Coupled with Competent Salesmanship, Is Producing Excellent Results with the Edison Diamond Disc Phonograph in Northern New Jersey—A Novel Sale

NEWARK, N. J., May 6.—April was the best month since December in the Newark Edison Shop. This is not remarkable when one looks over the handsomely furnished shop and talks



The Newark Edison Shop

with the efficient force of salesmen which President Charles O'Connor Sloane, of the Phonograph Sales Co., who runs the store, has gotten together. All the conditions in this well-appointed place are decidedly attractive to trade, and the volume of recent business proves the value of scrupulous care in appearances as well as of dependable goods behind the trade-mark.

The Newark Edison Shop has held many successful tone-tests, with the well-known Edison artists singing, and recently a Newark crowd of 2,000 gathered in the Palace ballroom to hear Marie Rappold in one of these tests. Elizabeth Spencer, Marie Keiser, Charles Harrison, Helen Clark, Vernon Archibald and Arthur Walsh are some of the other singers who have appeared at this shop in tone-tests.

Five Edison salesmen are covering Newark for the Phonograph Sales Co., and four take care of the Montclair branch. A rather novel achievement is the recent sale of an Edison phonograph to a cemetery chapel near New York, for use in funeral services. Business certainly is business. "They held six funerals the first afternoon," said Mr. Sloane, "and were so delighted with the hymns and other service music played by the machine that we hope to sell more for the same purpose."

Main Salon of Newark Edison Shop

TRADE NEWS FROM INDIANAPOLIS

Good Outlook for Pathé Business—Many Dealers Now Handling That Line—Maxwell Pays Visit to Kipp Plant—Other News

INDIANAPOLIS, IND., May 4.—M. P. Tobin, of the Pathé Phonograph Co., Inc., distributors of the Pathé machine in Indiana, is of the opinion that the outlook for Pathé business in the next few months is very good. Mr. Tobin and his two brothers have been putting in some steady work in going after dealers throughout the State since they organized their company several months ago.

Among the dealers signed up are Wolf & Dessauer, of Fort Wayne; H. P. Dahlen, of Terre Haute, and Robert Adair, of Paducah, Ky. Mr. Tobin considers Wolf & Dessauer one of the livest Pathé dealers in this section of the country. They operate one of the leading department stores and are pushing the Pathé machine exclusively.

Mr. Tobin has been carrying on a very systematic advertising campaign that is bringing the Pathé machine before the public in a way that is bound to get results for all the Indiana dealers.

Mr. Tobin has secured the services of R. M. Stevens, of Indianapolis, who has had considerable experience in the talking machine business, to call on the trade.

The results thus far from the retail business in the store at 10 East Washington street, which is the company's headquarters, have been encouraging.

J. L. Peters, of the Fuller-Wagner Music Co., reports that the sale of records continues exceptionally good while the sale of the Victor machines is about normal.

At the Carlin Music Co., the Edison and the Sonora machines are running about even in the point of sales, according to Frank Carlin.

The featuring of the Starr phonograph in the display windows of the Starr Piano Co. is bringing favorable attention to the various interesting features of the Starr machine.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., reports that business in April was very brisk. The company has been featuring both the Edison and the Victor machines.

A full line of both Edison and the Victor machines has been placed in the two branches recently opened in Kokomo and Anderson by the Pearson Piano Co.

Walter E. Kipp, of the Kipp Phonograph Co., distributors of the Edison machine, attended the Edison dealers' convention in Cincinnati, which was held May 1 and 2, and proved a most interesting affair.

William Maxwell, vice-president of Thomas A. Edison, Inc., who attended the convention, came to Indianapolis Wednesday with Mr. Kipp. Mr. Maxwell visited the Kipp plant and he made a talk to the Kipp employes, telling of conditions at the factory and advancing helpful suggestions. Mr. Maxwell spoke of the prosperous conditions throughout the country and he praised Mr. Kipp and the employes for the way in which they were handling the Edison business in this territory.

Mr. Kipp said that the Edison business, both from the wholesale and retail standpoints, was very flourishing with the main complaint being on the difficulty to get orders filled fast enough from the factory.

HELPS TERPSICHOREAN ART

With the commencement of the summer season and a corresponding increase in the demand for dance records the following letter received recently by the Columbia Graphophone Co. from Oscar Duenweg, president of the American Society of Professors of Dancing, has a timely appeal:

"Practice is indispensable for a pupil in dancing and doubly necessary for the teacher. I know of nothing more pleasing than a Columbia Grafonola and Columbia double-disc records. In the retirement of your studio, if you will but listen, it will help you to create new combinations of motion, but this is only one of the pleasures in having that obedient musical servant always awaiting your command. I own a Columbia Grafonola for reasons plus."

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. IT WILL BE THE GREATEST EVER!

MARIE RAPPOLD
Prima donna, Metropolitan Opera Company, proving that Edison has Re-Created her wonderful voice in all its richness.

New York TRIBUNE

April 29

. . . "Edison Snares Soul of Music—Mahogany Prima Donna and Rappold Sing as One on Concert Stage—Voice Blending Startles 2,500.

"Mme. Rappold stepped forward, and leaning one arm affectionately on the phonograph began to sing an air from 'Tosca.' The phonograph also began to sing with exactly the same accent and intonation. It is the latest triumph of Edison."

New York EVENING MAIL

May 2

. . . "The immense auditorium of this temple of musical art was crowded to its capacity by a representative Carnegie Hall audience—musically cultured and musically critical."

"Mme. Rappold of the Metropolitan Opera House, and Thomas A. Edison's new phonograph both sang.

"The ear could not tell when it was listening to the phonograph alone and when to actual voice and reproduction together."

CHIPPENDALE—
Official Laboratory Model

Brooklyn DAILY EAGLE

April 29

. . . "Before an audience of some 2,500 music lovers, Thomas A. Edison exhibited the latest child of his inventive brain yesterday afternoon in Carnegie Hall, and the 2,500 sat enthralled under the spell of a wizardry which reproduced for them a human voice with such fidelity that no one in the audience, hearing also the same music at first hand, could tell which was the real and which the reproduced."

Do you know of *any* other instrument that could sustain such a test?

PHILADELPHIA TELEGRAPH

April 28

. . . "Music lovers of Philadelphia heard last night one of the most marvelous achievements of modern science—a reproduction of the human voice so perfect and unerring that it was impossible to distinguish between it and the real voice of the original singer.

"Madam Marie Rappold, prima donna of the Metropolitan Opera Company, of New York, stood beside a mahogany cabinet which enclosed the most recent model of the Edison Diamond Disc Phonograph in Witherspoon Hall and sang in person, while the same song was reproduced from a record made months before in the Edison laboratory.

ARTHUR MIDDLETON
of the Metropolitan, comparing his thrilling basso with Edison's Re-Creation of it.

"Many in the audience leaned forward to catch some difference in the two voices, but there was none. There was a perfect blend of tone and beauty, the one shading into the other. Here the human qualities of Edison's latest invention stood out vividly."

Re-Creation is an unparalleled achievement and a most valuable asset of the Edison dealer.

The Edison Probationary Zone plan allows each dealer ample territory in which to do a profitable business.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., May 8,—April business for the most part was good in all the local talking machine establishments, and one of the best indices of good business along general lines is seen in the activities of the various express companies. To care for the deliveries in the Boston district alone, says a newspaper article to-day, touching on the records of express companies, it has been necessary for the American Express Co. to add twenty-three auto trucks, while the Adams Express Co. has added forty-five horses to its equipment within a few weeks, and must soon duplicate the order. Mentioned in the list of heavy importations into Boston are talking machines, and these have been arriving by the carloads, and all this for the one local district alone. Who says business isn't booming!

Elated Over Business Conditions

Manager R. S. Hibshman, of the Vocalion Co., and who also is its president, is highly elated over the business which his house has been doing; and the record made a month ago with the company in the local field only a short time, is being more than duplicated now. In the handsome parlors of the concern at 190-192 Boylston street, there are a number of instruments of unique pattern, and as pieces of furniture they are exquisite adornments to any salon. These, of course, represent the highest priced instruments, but they are the ones which are finding a ready sale at the present time, and both Mr. Hibshman, J. F. Meade, the treasurer, and their competent staff are not finding it at all difficult to interest a select line of customers in these handsome types of machines.

Pardee-Ellenberger Prosperity

There's only one report from the Pardee-Ellenberger Co., and that is the best. Manager Frederick H. Silliman, who keeps in the closest touch with his portion of the New England field, says that the demand for Edison goods is rapidly growing and the spring trade promises to exceed anything ever known.

Plans for New Ditson Building

It is now pretty well known in the trade that the Oliver Ditson Co., the large Boston music house and jobbers in Victor goods, is to move from its present location at 150 Tremont street, into a new building soon to be especially constructed at 178-179 Tremont street, the site of the present Knickerbocker Building, which is to be razed early in June. In the plans for the new Ditson Building special attention is to be paid to properly housing the Victor department, which, under the able management of Henry A. Winkelman, has grown to very large proportions. Good and convenient and complete as is the present department, the one in the new building will be even better, and ample provision will be made for growth for some time to come. In moving further up town this Victor department will be in the very center of the talking machine business, and it will have as its nearest neighbors, the Eastern Talking Machine and the Columbia Graphophone companies, as well as others only a bit further away. In every way the change is to be advantageous. The location will still be opposite Boston Common, which means that apart from the fine view from the front windows there will always be the best of light and air.

Educational Sales Talks

The Business Building Club of the Columbia headquarters continues to hold its regular meetings and at the last conference the employes were given a talk on the value of a man or woman knowng the goods which they are engaged in selling. Salespeople are paid for what they know, it was emphasized, and the more completely they are in touch with their work the more valuable they become to their employer, for this intimate knowledge better fortifies them to talk up the goods. Manager Erisman has always been keen on efficiency and he has around him one of the best business staffs that can be found in the city.

Columbia Managers in New England Meet

A meeting of the New England managers of the Columbia Graphophone Co. was held on Tuesday, April 18 at the Boston office of the company, the managers having been called in by New England Manager Arthur C. Erisman, in whose private offices the sessions were held. This was the first time that the New England men had got together and there was much for them to consider. Those present were George P. Donnelly, of Portland, Me.; R. L. Perrett, of Springfield; R. E. Demarest, of Hartford, Conn.; H. M. Blakeborough, of New Haven, Conn., and J. C. Carr, of Providence, R. I. The problems confronting the local manager were discussed at considerable length and the various hardships to be endured through the inability to get sufficient goods was gone into in detail. The value of an intelligent business-like selling organization was emphasized and the advice and suggestions received from Manager Erisman should prove of the greatest value in the subsequent overtures for business throughout New England, for there are few men in the talking machine business to-day who are better informed on details, who have keener perception or who understand human nature than he. It is Mr. Erisman's intention to have these conferences every six weeks.

More Room for M. Steinert & Sons Co.

With such a growing business as one notes at the Arch street Victor quarters of the M. Steinert & Sons Co., it was necessary to have increased quarters and now that all changes and improvements are completed, visitors find one of the most convenient and best-arranged headquarters of any talking machine house in New England. The principal changes have been effected on the second and third floor, Manager Herbert L. Royer having his private offices on this latter one and quite removed from any interference and not as accessible to outsiders as formerly. All the offices, as well as the bookkeeping department, are on this third floor, which is handsomely finished in light woods. The second floor is a positive delight to customers. At the front are a series of new demonstration booths comfortably fitted up, while at the rear are all facilities for the storage for records with a large counter in front which gives it the appearance of an up-to-date shop.

Advertising Manager Baker a Visitor

Manager Arthur C. Erisman, of the Columbia offices, says that April was the biggest month in the history of his department, and at the rate May has opened up there is a strong likelihood that it too will make a great showing. Mr. Erisman had the pleasure a short time ago of entertaining Edward M. Baker, the Columbia's advertising manager, who came over from New York for a few days' conference and to study the series of advertising programs which Manager Erisman has been at work on and which are to be scattered among the New England dealers. Mr. Erisman himself was over to New York lately in conference with some of the company's officials.

Chickering Baseball Team Ready for All Comers

The Chickering & Sons baseball team is all ready to meet its deadly opponents. The men have been carefully selected from among the Victor and Edison staffs and the team's first game was played on April 19, against the South

RE-CREATION—Edison's New Art, has secured for the New EDISON Diamond Disc Phonograph the stamp of unqualified approval from the cultured music lover who turns a deaf ear toward anything that smacks of mechanical reproduction—the critic who will have nothing short of the actual RE-CREATION of musical sound. Added to this is the fact that every Edison dealer has plenty of "elbow room."

(From a recent advertisement by Thomas A. Edison, Inc.)

We can add to, but not strengthen the truthfulness and accuracy of the foregoing. We can say, however, that two P-E Services are at your disposal—each a separate organization of post-graduate experience.

THE PARDEE-ELLENBERGER CO., INC.

Edison Jobbers for New England, with complete wholesale offices at

BOSTON and NEW HAVEN

It would be a star salesman who could substitute something else for a customer's demand for the new records by Louis Graveure, the season's musical sensation. New recordings in the Columbia list for June.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

Quincy A. A. April 19 is a local holiday in Boston, so all the employes of the Tremont street warerooms were anxious to "root" for their team and went to Quincy in one of the large Chickering auto trucks, the trip out and back being one of the pleasant features of the day. On May 30, in the forenoon, the Chickering team will play the Malden All Stars. In between the established dates of the official games the Chickering nine will play a team made up of talking machine boys from the other houses, to be known as the Talking Machine All Stars.

Busy Month with Eastern Co.

Business at the Eastern Talking Machine Co. headquarters is all that could be desired. April was a splendid month and the scarcity of goods proved to be a serious detriment. Manager Billy Fitzgerald is putting in some hard work on his end of the business and showing results, too. J. A. McNabb, the vice-president of the Eastern, was over here from New York for a few days lately, spending most of his time at the local headquarters.

Recital at Boston Press Club

At a recent meeting of the Boston Press Club, the members were entertained with choice selections on a handsome Edison laboratory model machine which had been kindly loaned the club by the F. H. Thomas Co., in Back Bay. The demonstration was in charge of H. L. Armes, the secretary of the club. The F. H. Thomas Co. has been meeting with marked success lately in disposing of the higher-priced Edison outfits.

Singers Record Acts as Advertisement

That a record of a singer should be of such fine reproducing qualities as to result in an engagement for the singer—is what promises to result from the new records of Louis Graveure, the newly discovered Belgian baritone. Lately Fred J. McIsaacs, who each season manages a series of high-class concerts at Tremont Temple, heard this singer's records in the Columbia warerooms and was so delighted that he exclaimed that he must get that artist for one of his next winter's concerts. So it may be that he will be a feature of next winter's popular course at the Temple.

"THE SCIENCE OF MUSICAL SOUNDS"

Interesting and Comprehensive Volume on Important Subject Written by Prof. Dayton C. Miller—Published by Macmillan Co.

It is doubtful if the science of musical sound has ever been treated quite as exhaustively, and certainly it has never been treated so interestingly as in a new volume lately completed by Prof. Dayton Clarence Miller and just published by the Macmillan Co. The new book entitled "The Science of Musical Sounds" is largely a compilation of eight lectures given by Prof. Miller before the Lowell Institute under the general title of "Sound Analysis."

The work, profusely illustrated, takes the reader by comprehensive steps from the definition of sound itself through the characteristics of tone and pitch, methods of recording and photographing sound waves, analysis of harmonic curves, the influence of the horn and diaphragm on sound waves (a chapter that should be of particular interest to those connected with the talking machine trade) and tone qualities of musical instruments, including the flute and other wind instruments, the violin, the voice, the piano and various combinations of them all.

A special chapter is given over to physical characteristics of vowels, their tone qualities and origin, and to word formation, while still another chapter relates to the science and art of music. "The Science of Musical Sound" is so written that it makes an appeal to the layman as well as to the scientist, and for the student who desires to delve deeply into the science there is offered a most imposing list of general references that in itself makes the book of exceptional value.

TO ABOLISH THE TALKER!

Candidate for Arkansas Legislature Will Wage Relentless War on Talking Machines

BATESVILLE, ARK., May 10.—Horace Perrin, an insurance agent of this town, has announced that he will be an independent candidate for the legislature and his platform consists of a single plank, that plank being the promise that if elected, he will introduce a bill into the State legislature making it unlawful to play a talking machine anywhere in the State of Arkansas! While Mr. Perrin claims that he has been assured of the votes of a vast number of citizens who sympathize with him in his endeavor to still forever the "chords" in talking machine records, the talking machine dealers and owners in the State are laying in new stocks of machines and records just the same, seemingly giving no heed to the storm of destruction which is threatening to break around their defenseless heads and machines at almost any time!

Needling Talking Machines With BAGSHAW Needles

is a big job in itself, for it requires a specialized equipment, a training embracing manufacturing and marketing, including practical knowledge of steel in its relation for proper sound reproduction, and workmen skilled in the art of needle manufacture.

Millions of records are played DAILY, and although our new plant has four times the capacity of our former one, we are having all we can do to fill orders.

Bagshaw needles were the FIRST steel needles to be made for talking machines; at the start we determined that Bagshaw needles would be the quality leader, and for many years the accepted standard for needles has been embraced in the one word "Bagshaw."

Be particular about your needles. Bagshaw needles will help in demonstrations, in sales of machines and in the development of a tremendous record business.

FOUNDATION FOR VICTOR BUILDING

Work of Sinking Piles for New Cabinet Manufacturing Building for the Victor Talking Machine Co. Is Progressing

CAMDEN, N. J., May 10.—The work of sinking the piles for the new half million dollar cabinet manufacturing building which will be erected for the Victor Talking Machine Co. at Delaware avenue and Market street is well underway. There will be a thousand of these piles and the cost of sinking them will amount to $25,000, the work being done by the Simplex Foundation Co., of Tacony. The new building will be of reinforced concrete construction, with brick walls, granite base and limestone trimmings and will be six stories in height. It will contain 140,000 square feet of floor space, and will be topped by a tower on the Market street side which will rise to a height of 205 feet, this tower taking the place of the present sprinkling tower, which is to be demolished.

CLOSE BIG SALES MONTH

DETROIT, MICH., May 3.—J. R. Peckham, sales manager of the Pathephone Co. of Detroit, 114 Farmer street, Pathé distributor, reports the closing of a record-breaking month in April, the sales totals far exceeding all expectations, and easily outdistancing any previous month. Several new models of Pathephones are expected to arrive here shortly and Pathé dealers are evincing a keen interest in their advent. Mr. Scarlata, formerly salesman for the Detroit Co., has been appointed traveling representative, and is achieving excellent results.

NEW ARTISTS FOR PATHE RECORDS

Mme. Marie Narelle and Hugh Allan Sign Contracts with That Concern

The Pathé Frères Phonograph Co., New York, announced this week the addition to the company's list of recording artists of Mme. Marie Narelle and Hugh Allan. Both of these artists have signed exclusive Pathé contracts, and their records will be announced in the near future.

Mme. Narelle is an Irish soprano who has acquired considerable prestige as an interpreter of Irish folk songs, Indian and Scotch songs, in addition to a wide repertoire of recognized classical numbers. She accompanied John McCormack upon a recent tour and received hearty praise from the newspaper critics along the route.

Hugh Allan is a baritone who has appeared with prominent opera companies here and abroad, and is well-known in musical circles for his splendid rendition of Neapolitan songs. He has an extensive repertoire and his records will doubtless be well received by Pathé patrons wherever introduced.

WAR RECORDS FOR POSTERITY

According to a despatch from Geneva, Switzerland, Emperor Francis Joseph, of Austria, was recently persuaded to hand his personal ideas about the war down to posterity through talking machine records in German and Hungarian, according to a report in the Swiss newspapers. It is added that the records will not be made public until after the Emperor's death.

HOLD DEBATE ON STEVENS BILL

Talking Machine Men Listen to Interesting Arguments at Kansas City Meeting

KANSAS CITY, MO., May 8.—A "joint debate" on the Stevens bill was the feature of the meeting of the Commercial Club's Public Affairs Committee May 3, at which more than 200 business men were present. C. E. LaVigne, formerly special agent of the Federal Trade Commission, later director of the bureau of investigations of the New York Tribune, now representing the American Fair Trade League, spoke in favor of the legislation now pending, and H. S. Ames, of Dayton, O., took the other side. Charles J. Schmelzer, president of the Schmelzer Arms Co., of Kansas City, distributors of the Victor goods, is the leading exponent of the Stevens bill in the Middle West, and he was largely responsible for the meeting. He sat beside Mr. LaVigne at the speakers' table. Many other talking machine jobbers and retailers were present. Mr. LaVigne spoke fluently and fervently, and made a deep impression. He emphasized that uniform prices for uniform goods, and the development of honest advertising, are the best checks to unfair competition, and the best preventives of monopoly. He gave many specific instances, culled from his experiences in New York, of merchants advertising identified goods at lower than standard prices—and then selling customers other and nondescript goods at higher prices than the same articles could be bought for in legitimate stores.

The Corcoran Ovenshire Co., of Penn Yann, N. Y., is erecting soundproof demonstration booths for talking machines in its store.

TALKING MACHINE MEN, INC., MEET

John E. Hunt, Chosen Unanimously, to Preside as President of Local Talking Machine Dealers' Association for Another Year—Other Officers Re-elected—Great Revival of Interest in the Organization—Membership Grows

The annual meeting and election of officers of The Talking Machine Men, Inc., was held on April 26 in the assembly room of the Merchants' Association of New York, and proved a lively session in many particulars, especially in view of the several important discussions on trade topics. The success of John E. Hunt's work as president of the organization was indicated by the fact that he was re-elected for another term by a unanimous vote due, as the nominating committee reported: "to the fact that Mr.

John E. Hunt, Newly Elected President

Hunt has guided us from the stages of infancy, when he had only twelve active members, to a position of real importance, whch was evidenced by the 244 talking machine men who were present at the recent banquet held at the McAlpin Hotel."

Sol Lazarus and A. Galuchi were re-elected secretary and treasurer, respectively, of the association, and J. T. Coughlin will continue as vice-president for New York and H. Jaffe for New Jersey. A. P. McCoy, of the Fulton, Driggs & Smith Co., Waterbury, was elected vice-president for Connecticut.

Following discussions at previous meetings it was decided that the members of the association should select some emblem for display in their stores to indicate that they were members of that body and therefore advocates of price maintenance and fair business generally. Such an emblem will be presented to the association for adoption at an early date.

The revival in interest in The Talking Machine Men during the past few months has been remarkable, and the best indication of its effect was the attendance of nearly 250 talking machine dealers, jobbers and factory representatives at the annual dinner of the association held recently. It has been proven again that there is a real need for an association of talking machine dealers in New York and that there are a surprising number of interesting and important matters that can be brought before and discussed by such a body with profit to all concerned. Much credit is due to the present officers, who have been re-elected, for this revival of interest and it is to be hoped that the plans made for future activities of the association will be worked out to completion.

The considerable number of twenty-six new members was voted through at the meeting. Supplementary to this move of an aggressive tenor the body decided to introduce such new committees as a committee on entertainment, a press and advertising committee, a purchasing committee, and a legislating committee. These new committees are expected to render valuable information to the members of the organization, as well as constructive assistance in the furthering of the organization's progress.

NEW LINE OF "WONDER" MACHINES

Latest Models Equipped with Universal Tone Arm to Play All Makes of Records

The Wonder Talking Machine Co., 113 Fourth avenue, New York, is now displaying at its showrooms the new line of "Wonder" machines with a universal tone arm and sound box, playing all makes of records. A number of out-of-town dealers have visited the showrooms during the week and are well pleased with the new features of the "Wonder" line. Hugo S. Radt, secretary of the company states that a new electric-driven machine embodying numerous distinctive points will soon be ready.

Samuel Danberg, a former employe of the Carl Hoffman Music Co., of Kansas City, Mo., has opened the Danberg Music Store, 412 East Eleventh street, that city. He handles small goods and talking machines.

The offices of the Crescent Talking Machine Co., which has been located for some time at 99 Chambers street, New York, have been removed to the ground floor of 89 Chambers street, where the company has created a handsome retail wareroom, combining the wholesale offices with it.

EDISON DEALERS ENTERTAINED

Over Two Hundred in Northwest Hold Convention in Minneapolis, Enjoy Banquet, Listen to Good Speeches and Tone Test

MINNEAPOLIS, MINN., May 6.—Nearly two hundred Northwestern dealers in Edison Diamond Disc phonographs assembled yesterday at the Radisson Hotel, Minneapolis, upon invitation of Laurence H. Lucker, Edison Diamond Disc phonograph jobber for the Northwestern zone, for a business conference and an Edison entertainment including a tone test with Mme. Rappold, soloist of the Metropolitan Grand Opera Company.

The program for the convention included talks by men from the factory, an automobile tour of the Twin Cities, pleasure resorts and in the evening a tone test by Mme. Rappold. After the tone test a banquet was held in the Gold Room of the Radisson Hotel, at which William Maxwell, vice-president of Thomas A. Edison, Inc., gave a talk on selling tips and the factory policy. V. E. Fuller talked on tone tests, George Silzer, of Harger & Blish, Des Moines, Ia., spoke on advertising, and other men from the Edison factory addressed the dealers on various subjects. During the banquet the motion picture "Voice of the Violin" was shown.

Honan & Eckhardt, of Ansonia, Conn., have taken the local agency for the Reginaphone.

DEALERS MEET IN KANSAS CITY

Retailers of Edison Diamond Disc Phonographs Hold Interesting Convention in That City—Listen to Good Addresses and Tone Test

KANSAS CITY, MO., May 10.—One of the best get-together affairs held in this section of the country for some time was the recent gathering of the Edison dealers of the Kansas City zone. In response to personal letters and appeals sent out by M. M. Blackman, general manager of the Kansas City agency, a large number of the dealers were present at the Edison Diamond Disc dealers' convention held here on May 9.

The feature of the gathering was the tone-test recital in the evening at the Grand Avenue Temple, where Miss Marie Kaiser, the celebrated soprano from New York City, rendered a number of her favorite songs, with Edison's re-creation of her voice to be heard in comparison.

The meeting was opened at the Edison Shop, starting at 9 o'clock in the morning. Personal instruction was given to salesmen and mechanicians by B. B. Dennis and R. W. Bailey, experts in their respective lines, from which the dealers got many valuable pointers.

The afternoon session was mostly devoted to speechmaking and was held at the Muehlebach Hotel. A "How-Do-You-Do" talk was made by Mr. Blackman, which was followed by a short talk by William Maxwell, second vice-president of the Thomas A. Edison, Inc., on the subject: "Edison Diamond Disc Merchandising Methods." Other speakers of the afternoon and their subjects were as follows: "Motors and Motor Troubles," by B. B. Dennis, traveling expert mechanician; "Financing the Dealer's Paper," by R. T. Pritchard, connected with the Phonograph Co., Chicago; "Intensive Selling or the Value of a Man," M. M. Blackman, manager of the Kansas City office, and "The Voice of the Violin," a private showing of the Edison Diamond Disc advertising film.

A banquet in the evening at the ballroom of the Muehlebach Hotel, attended by the dealers, was an extra feature much enjoyed by the guests. This was followed by the tone-test recital at the Grand Avenue Temple.

NEW DEPARTMENT IN SEATTLE

Grote-Rankin Co. Secures Agency for the Victor Line in That City

SEATTLE, WASH., May 6.—The Grote-Rankin Co. the large furniture firm at Fifth avenue and Pike street, this city, has installed a large and well-equipped Victor department under the management of P. W. Jones, and is featuring this line strongly, both in its advertising and window display.

VICTOR LINE IN PERTH AMBOY

Albert Leon Also Handles the Edison Phonograph in His Department in That City

Albert Leon, a prominent furniture dealer of Perth Amboy, N. J., has secured the agency for the Victor talking machine in that city. Mr. Leon has also for some time past handled the Edison phonograph. C. Arthur Steele is in direct charge of the department.

"JOY BOOTH" AT Y. M. C. A. FAIR

B. M. Joy, of Fort Dodge, Ia., Features the Edison Diamond Disc Phonograph

FORT DODGE, IA., May 6.—One of the features of the Y. M. C. A. County Fair, held recently in this city, was the "Joy Booth" maintained at the fair by B. M. Joy, successor to the Early Music House, and devoted to the exploitation of the Edison Diamond Disc phonograph and records. In addition to the demonstration of records and the distribution of literature during the day, there was held every evening on the vaudeville stage at the fair a tone test with Miss Helen Rudesill, the well-known local singer as the assistant artist. The tone test attracted a great amount of attention and the members of the audiences were registered so that a souvenir of Mr. Edison's life might be mailed to them later. The display also secured excellent results in the way of sales.

FIGHTS FOR THE STEVENS BILL

Julius A. J. Friedrich, Jr., of Grand Rapids, Mich., Working Hard for That Measure—Secures Many Signatures for Petition

GRAND RAPIDS, MICH., May 8.—Julius A. J. Friedrich, Jr., of the Friedrich Music House, this city, is one of the staunch advocates of and hard worker for legislation providing for the maintenance of retail prices on trade-marked goods. Mr. Friedrich, through his personal efforts among the manufacturers, wholesalers and merchants of this city, recently secured forty-six signatures to a petition for price maintenance, the petition being presented to the Chamber of Commerce at a dinner held for the purpose of dscussing that matter.

At the dinner in question there were thirteen speakers, ten of them in favor and three against the proposition. The final vote was unanimous in favor of price maintenance. Mr. Friedrich says that he feels sure the Stevens bill will win out.

The man who prides himself on giving others "a piece of his mind" never seems to secure any peace of mind by the process.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., May 8.—Philadelphia has just passed through another month of remarkable talking machine activity. It was the equal in point of percentage over last year that the trade experienced during the previous three months of the year, and was limited in extent only to the amount of goods that the factories were able to supply.

The shortage of goods is the only complaint that the dealers and jobbers are willing to make, and they have gotten this down to a science wherein they are able to take care of their trade in a way that satisfies them. In the matter of records the supply is a little more satisfactory, and some of the Philadelphia dealers are able to supply the demands upon them almost to a hundred per cent. The reason for this is that they have gotten an almost exact line on what is going to be most salable and they get their work in early.

On Wednesday of last week the Pennsylvania Talking Machine Co. separated its wholesale from its retail end of the business, by moving to the Johns-Mansville Co.'s building at 210 North Broad street. Here the company has taken the entire fourth and fifth floors. The offices of the talking machine department are on the fourth floor of the building, also the offices of the clerical force, the order department and the record department. Manager Eckhardt's office is large and commodious and located at the Broad street front. Adjoining it is the office of C. S. Tay, who has been given the title of assistant manager, and in view of the increased territory Mr. Eckhardt has taken on, Mr. Tay will look fully after the details of the office, thereby giving Mr. Eckhardt time to devote to the trade in the various territories which have developed and grown so very rapidly.

Mr. Eckhardt says the company made the move Wednesday, moving the immense stock of records with amazing ease, everything worked like magic. This concern bought all new equipment for the building. Back of the offices the company has racks that will hold many thousands of records, and the stock and the surplus stock is so arranged that the clerks can lay their hands on any one record almost instantly. This company has a very nice waiting room for purchasers who leave an order, and with remarkable rapidity it will be filled through two sliding doors, the order, the entry into the books and the filling of the order will never suffer the slightest delay in the perfected system. On the fifth floor there is 7,000 square feet of floor space.

On the fourth floor front will be the offices of the Dictaphone department, Manager Westervelt's office being on Broad street and to one end of the Dictaphone school. This will be a new feature of the business. A large room has been set aside for the school with desks upon which are machines, and competent instruction will be given. Back of this room is a very large room for the handling of both talking machines and Dictaphones, as well as the shipping department.

Mr. Eckhardt will place one of the largest electric signs in the city at the front of the building. It will be a flash sign, and will flash alternately Columbia and Grafonola. There will be room on the fourth floor for the carrying of a stock of close to 5,000 talking machines, and the beauty about the new building is the excellent light and other conveniences for the working force.

Messrs. Blake & Burkart, the biggest handlers here of the Edison, report that their business is considerably ahead of last year, and they have no complaint whatever. They are also getting goods in greater quantities and with more regularity. The report from the factory is that they are just as busy as they can be. A. C. Ireton, of the Edison Co., was a recent visitor, as well as Mr. Bryton, of the Edison factory, who is the editor of the house organ of the Edison people.

Blake & Burkart have introduced an innovation that seems to be working out satisfactorily. In their large concert room there are daily social affairs, such as euchres, teas, dances, etc., and the patrons are given the room free from 1.30 to 5.30. The firm furnish the music and everything else necessary for the comforts of the guests, and they are paid through the good will, and they have made many sales on account of this courtesy.

Louis Buehn & Co., who were to have moved to their new building, 835 Arch street, on May 1, have been slightly delayed, and will not move until May 15. Their new building will give them practically double the space they now have. The offices will be on the first floor of the building, in the front portion, and back of that will be a large store room for machines, and in the rear the shipping department. The second floor will be devoted entirely to the record stock, which will be double what it is at present.

Mr. Buehn reports that they have had a very good month in April, which showed a substantial increase over last year. The situation on machines, however, is not very much better, and Mr. Buehn says that they are just as far behind as they ever have been.

Men Behind the Buehn Guns

"Who's Who in Buehn Service" might be the title of this paragraph covering the illustration showing the men who have been responsible for the tremendous growth in the sales of the House of Buehn. Standing from left to right are F. B. Reineck, E. P. Bliss, J. F. Smith, T. Hower and C. W. Miller. Seated is Louis Buehn, president of the organization. All of these men in this group are experts in their particular line.

Todd & Michener, formerly piano men on Columbia avenue, have opened a large piano store at 1306 Arch street, to which they have added Victor talking machines. They carry a full line and a considerable stock of records, and are advertising them extensively. They have a very attractive store and have erected six nicely furnished booths.

MacKintosh Bros., handlers of the Victor, have succeeded A. S. Wilson at Woodbury, N. J.

Alexander Glass, Jr., has opened up very attractive Victor warerooms at Seventy-first street and Woodland avenue.

The Penn Phonograph Co. has enjoyed a highly satisfactory business in April and Mr. Barnhill says that it is the largest April the firm has ever had. The record sales have largely increased. The two records for which the company has the most call at present are Nos. 17,942 and 17,984. The company is very well prepared with records for any orders it may receive, and has also a good stock of machines.

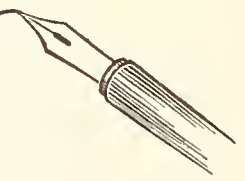
A big fair was recently given in this city for the benefit of the Red Cross of the Central Powers, at which more than $200,000 was secured. Most of the talking machine houses were called upon for contributions, and at Joseph Jacobs' booth alone more than $4,000 was taken in.

Considerable activity is being manifested in Philadelphia to secure the co-operation of the local trade bodies regarding the Stevens Bill. Efforts are being made to have the Rotary Club endorse it. All the jobbers are using their best efforts. Harry Weymann communicated with the Chamber of Commerce, requesting that they take favorable action on the maintenance of a one-price system, and received a reply from the secretary, giving him the assurance that they would vote favorably on the action.

Mr. Baker, of the C. C. Chew Talking Ma-

(*Continued on page* 24)

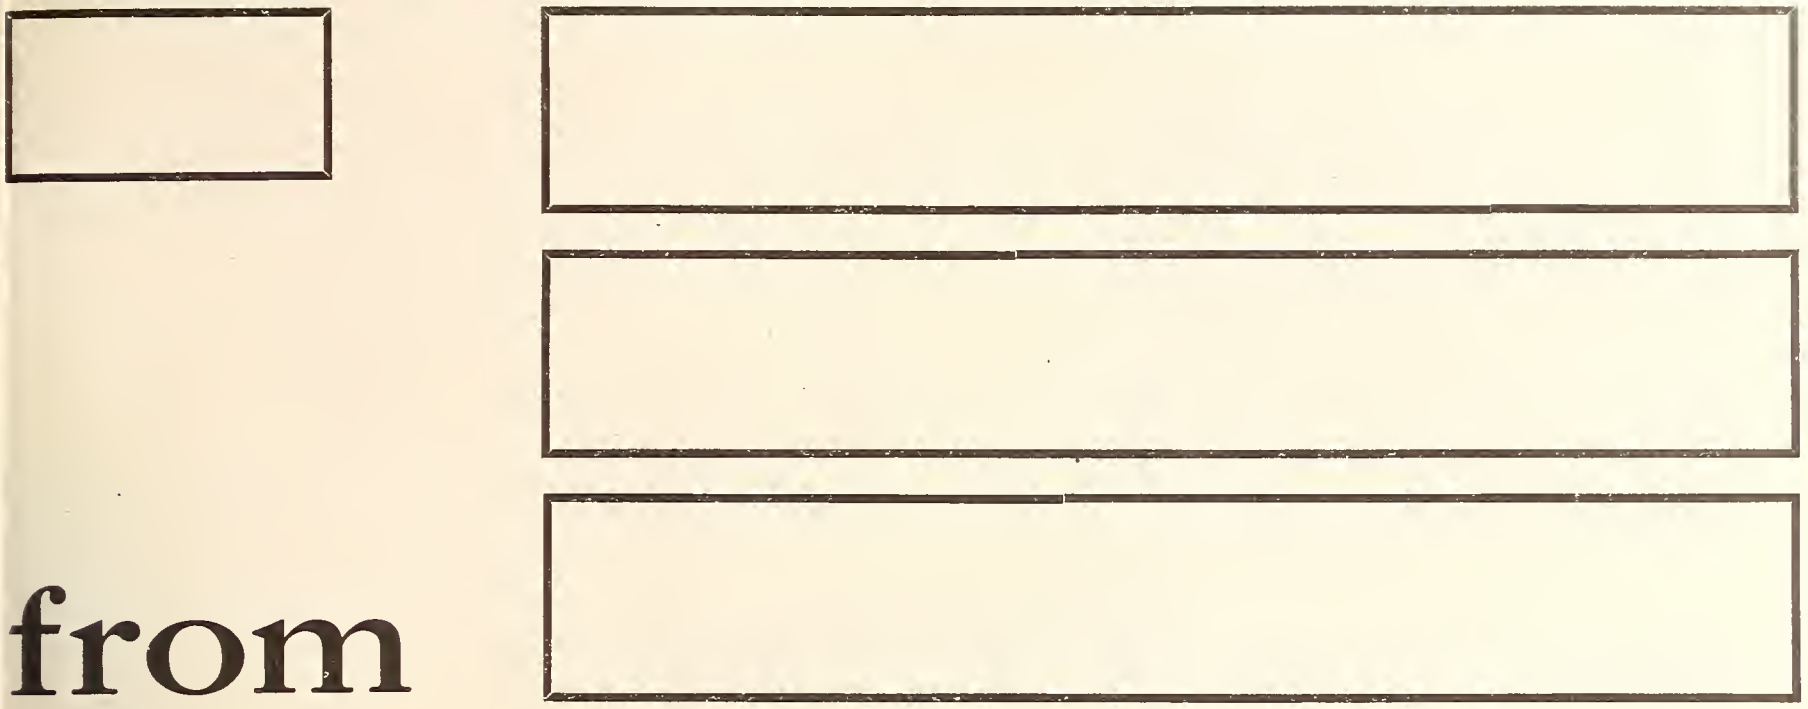
Pen Your Victor Orders to Penn



There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

Penn Phonograph Co., Philadelphia



from 20x60 to 3 times 25x150

THESE diagrams show a tremendous growth in Buehn Service. From 1900, when we had 1200 square feet of floor space, to May 1916, with over *ten thousand* square feet, is a big achievement.

This growth has been secured through effort—an effort to please the people we are working for. A steady continous increase in business, year after year, gives a foundation of permanancy.

So in our new building at 835 Arch Street, we bid you welcome. This is only a few feet away from our previous headquarters and we hope it will be convenient for you to "look us over."

On the first floor are the general offices; private office of our president; directors' room; shipping department and a place for the general storage of about a thousand Victrolas. The second floor is occupied by our Victor record stock, a stock totaling tens of thousands of records, record shipping department and salesmen's headquarters; while the third floor is for storage. Goods come in and go out, easily and economically.

Full details, with illustrations of the new Buehn Building, will appear in next month's World, but in the meantime, come in and see in operation, the Buehn mechanism that helps you to sell more Victor machines and records, by seeing that you actually get them.

THE
LOUIS BUEHN
COMPANY
PHILADELPHIA'S
Exclusive Wholesale
VICTOR DISTRIBUTOR

THE TRADE IN PHILADELPHIA

(*Continued from page 22*)

chine Co., of Camden, N. J., reports the largest Victor business in April in the history of the store and says that there are unusually bright prospects for a big summer business, due to his increased stock and efficiency of service.

H. A. Weymann & Son report that their record stock in the wholesale department is in a most excellent shape and that they can fill up orders almost to the limit. They are filling machine orders that are on schedule as quickly and as fast as the Victor Co. is supplying the goods. He says: "The prospects for the balance of 1916 indicate that it will be a period of the greatest talking machine business that the trade has ever had. It is going to be a banner year from all indications." C. H. Lichty, of Reading, was one of the firm's visitors the past week. The firm's sales force is all on the road and sending in good orders.

The Edison dictating machine has enjoyed a great popularity during April. The business was very much better than last year and ran at least 50 per cent. ahead. Among the firms supplied in April were the General Electric Co., who has the largest installation in Philadelphia, and one of the largest in the country; the Life Insurance Co., the Central National Bank, the Aetna Life Insurance Co., the Charles J. Webb Co., the Yellow Pine Lumber Co., the DeFrain Sand Co., Parkersburg Iron Co., H. A. Hitner & Sons, the United States Cast Iron Pipe & Foundry Co., the J. H. Troup Music House, of Harrisburg, Pa., and L. F. Grammes' Sons, Allentown, as well as many other firms in smaller numbers.

G. M. Austin, manager of the Edison dictating machine, recently had a very commodious office erected for his use just at the rear of the sales rooms; Nelson C. Durand, vice-president of the Edison, was one of his visitors.

Manager Westervelt, of the Dictaphone Co., still has his offices at the Columbia retail warerooms, but is anxiously waiting the finishing of the new department on Broad street. During the last month among the notable installations were: the H. K. Johns-Manville Co., who put in a complete equipment of Dictaphones; the Packard Motor Car Co., the Otto Gass Engine Works, the Drexel Institute, the North Penn Bank, Edward Stern & Co., the Southwark Machine Co., Daucey & Hines, and a great many others. They had the satisfaction of receiving a great many repeat orders from their older users.

STRONG VISITS HEINEMAN OFFICES

Factory Manager of Concern Inspects New York Offices—Modern Methods in Vogue

W. C. Strong, factory manager of the Otto Heineman Phonograph Supply Co., Inc., Elyria,

W. C. Strong

O., was a visitor to the company's executive offices, 25 West Forty-fifth street, New York, this month, spending some time in conference with Otto Heineman, president of the company, relative to enhancing the service and co-operation extended to the Heineman clients.

In a chat with The World, Mr. Strong commented upon the many improvements which have been made at the Heineman factory since the first of the year, and the contemplated additions and enlargements which are now under way. These improvements and changes have been made necessary because of the remarkably rapid growth of the Heineman business, and when they are all completed, the Otto Heineman Phonograph Supply Co. will be in a position to materially increase its output, and serve its customers even more efficiently than it has in the past.

Mr. Strong is particularly well pleased with the progress which the company has made in perfecting its products, and stated that every known system of factory manufacture which had proven its worth by actual test is being utilized at the Heineman factory in order to place this plant on a basis of top-notch efficiency.

MAMMOTH VICTROLA IN TACOMA

TACOMA, WASH., May 8.—Sherman, Clay & Co., have on exhibition at their Broadway store a reproduction of a Victor Victrola ten feet high and four and one-half feet square, which will be used for giving popular concerts in Wright Park this summer. The tone volume of the machine is said to be ten times greater than that of the ordinary Victrola but in obtaining this increased volume of sound nothing has been lost in clearness and naturalness. The machine was constructed by B. A. Almvig and F. C. Lindquist, of Sherman, Clay & Co., and so far as is known no talking machine of any kind exceeds it in size.

THE TRADE IN NEW YORK CITY AND VICINITY

April proved a good month in the local talking machine trade in every particular, coming up to expectations in all instances, while in many cases the sales totals were much better than had been anticipated. The month as a whole was far ahead of last year and a number of the dealers state that their sales showed an increase over March, which is an unusual condition. The local talking machine industry is enjoying an unprecedented era of prosperity, and judging from all indications this will continue for some time to come.

There is still evident an acute shortage of machines, but shipments in April were somewhat better than during the preceding four months, and with the construction of new buildings and a corresponding increase of manufacturing facilities there is every reason to believe that the dealers will receive better service in the near future. The record situation is excellent, and the majority of distributors state they are filling their record orders on a 95 per cent. to 100 per cent. basis.

Record Trade Increasing

The most noteworthy feature of the local talking machine trade at the present time is the close attention which the dealer is paying to the development of his record business. This is, of course, the most profitable division of the retail field, and the progressive dealer has recognized the fact that he cannot devote too much of his time to machine sales and neglect his record department. The machine shortage which has existed the past eight or nine months has also induced the dealer to properly develop his record sales, and it is gratifying to note that the majority of the local dealers have placed their record business on a more efficient basis than for some time past. New systems are being installed which enable the dealer to keep a close watch upon his record sales, and up-to-date methods are being introduced so that the dealer may at all times cater to the individual requirements of his customers along lines which will produce profitable results.

Success of Efficiency Department

The efficiency department conducted by the New York Talking Machine Co., Victor distributor, is achieving splendid results, and several new ideas which were inaugurated last month have received the hearty approval of the company's dealers throughout the country. This is particularly true of the new electric service which the efficiency department announced to the dealers last month. This service provides for the furnishing of one and two-column electros which feature one or two of the popular selling records in the new list. Last month's electro called attention to the new Victor records "Little Gray Home in the West" and "Listen to the Mocking Bird," and W. D. Marbourg, of the New York Talking Machine efficiency department, states that requests for these electros were received from Victor dealers in every State in the Union and in several parts of Canada. This month's electro will present a cartoon by Herb Roth, one of the leading cartoonists, illustrating the new Victor record "I Can Dance With Everybody But My Wife." The electros are furnished to the dealers at a nominal cost, and their general use is reflected in the increased demand for these special records.

Developing Summer Trade

"April sales were equal to those of March," said R. F. Bolton, district manager of the Columbia Graphophone Co., in a chat with The World. "This is an unusual condition, especially as March was the best month in the history of our business. As a matter of fact April's business was ahead of last December, which furnishes a good indication of the activities of Columbia dealers in this territory. Judging from the reports sent in by our dealers there will be no let up with the advent of the warm weather, as we are receiving large orders for graphophones and records to be delivered on and after July 1. Many of our representatives have already started aggressive campaigns to sell machines for camp, bungalow and boating use, and there is no doubt but that this class of trade will prove a profitable field for this summer for the wide-awake, aggressive dealer. Machine shipments from the factory are steadily improving and the record situation is rapidly approaching normal. A pleasing feature of our business last month was the excellence of our cash collections which were remarkably good for a spring month. Summing up the situation as a whole there seems to be a stability and strength to the local talking machine trade which augurs very well for the future."

Best Month in History

J. F. Collins, general sales manager of the Pathé Frères Phonograph Co., New York, stated this week that the month of April was the best in the history of the company. The local trade was an important factor in this splendid record, as the popularity of the Pathephones and Pathé discs is rapidly increasing in this territory. Mr. Collins states that the demand for the new records issued by the company has far exceeded expectations, and Pathé dealers are enthusiastic in their praises of the records which are now being announced.

Held Monthly Dinner

The sales force of Landay Bros., Victor distributor, held their monthly dinner May 4, at which Ernest John, of the Victor Talking Machine Co., was the guest of honor. Mr. John brought with him the moving pictures taken some time ago at the Victor Talking Machine Co.'s factory and these pictures were shown to the members of the Landay staff. Mr. John explained various sections of the pictures as they were flashed on the screen, and at the close of the evening every one present expressed amazement at the wonderful scenes which had been shown, stating that they had never appreciated the magnitude and tremendous scope of the Victor manufacturing plant. This dinner was the final one of the 1916 spring season, and they will be resumed in September, when the meetings will be held fortnightly until December, and monthly till next May. The value of the Landay sales dinners is unquestioned as they promote a spirit of co-operation which is reflected in the high personnel of the Landay sales force.

New Columbia Dealer

One of the recent additions to the ranks of Columbia dealers in this territory is the Gotham Shop, which opened a very attractive establishment on Monday at 59 Nassau street, in the heart of the downtown business district. This store will handle the Columbia line exclusively, six booths having been constructed for the display and demonstration of Columbia Graphophones and records. Irwin Kurtz, who is at the head of this establishment, is an enthusiastic believer in the future of the Columbia line and is planning an aggressive campaign among the downtown business people.

Activity in High-Priced Models

Raymond Duncan, of the Edison Shop (owned by the Phonograph Corporation of Manhattan), referring to April business said: "We were very well satisfied with our April sales as there was a general activity throughout the month which has even continued in May. Although our complete line is in demand, the $250 Chippendale model continues to be one of our leading designs. Our patrons also seem to be interested in the new lacquer model which we placed in our window last week as soon as it was received from the factory. This design retails for $300, and we have already received a number of orders for it from our customers. Our record trade is excellent, with the better class of records the most consistent sellers."

1916 a Banner Year

The Blackman Talking Machine Co., Victor distributor, closed its fiscal year on April 30, and J. Newcomb Blackman, president of the company, referred to the company's activities as follows: "Our sales totals for the year showed a substantial increase over 1915 and were satisfactory except to the extent that our business would and could have been much larger had we been able to get larger shipments of Victrolas. The business done, however, represents the largest in the history of our business career.

"I believe the coming summer months will

(*Continued from page 26*)

provide an opportunity which progressive dealers should take advantage of, to shape their policy for the next busy season and that they should consider the advisability of concentrating their efforts on one line. The trend of affairs in the talking machine business, as in most other successful retail shops, is toward specialization. Many people have the impression that the department store is driving the small merchant out of business. One has only to note the great success of the specialty shops to know that this is not true. These shops when managed by the proprietor can and should represent the same efficiency of service, and this combined with the economy made possible by a much lower overhead expense, opens a great opportunity to the small merchants. Specialization in the talking machine business means a concentration of the dealer's capital, thought and efforts on one line, which in many cases has enabled him to give better service and show a correspondingly better profit. The talking machine business must broaden and I am confident that the leading makes of machines will be best sold in exclusive shops. It is this trend in representation that I think the dealer should consider seriously in shaping his policy and putting his shop in order for the business next fall."

Aggressive Victor Manager

William F. Lynch, who was recently appointed manager of the Victor department of Wm. Knabe & Co., is achieving excellent results in this important post. Mr. Lynch is well qualified to handle the Victor trade in the Knabe warerooms as he has had a number of years' experience in the Victor retail business. He states that the Knabe clientele appreciates the higher-priced Victrolas and the better class of records, and he is accordingly concentrating his efforts on building up this particular trade.

Wm. F. Lynch

Enlarge "Talker" Warerooms

S. Baumann & Co., Forty-sixth street and Eighth avenue, have recently enlarged their Columbia department and it is now one of the most attractive and well arranged talking machine warerooms in that section of the city. This company is one of the most successful retail houses in the Times Square district and they have built up a Columbia business which should steadily increase in the enlarged department.

Open New Store

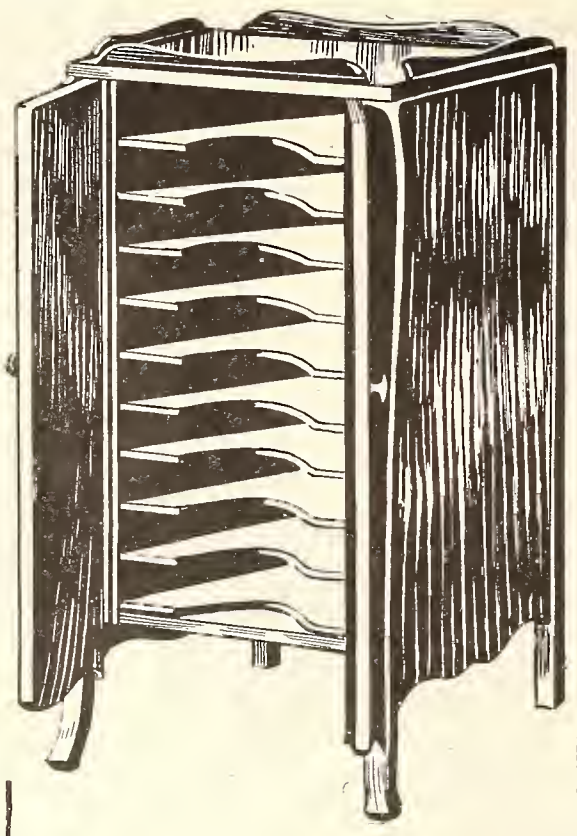
Winterroth & Co., a well-known local piano house, has opened a new store at 609 West One Hundred and Eighty-first street, and is featuring the Pathé line. They are giving the Pathé products aggressive representation and as their store is located in the city's best residential district, there is every liklihood that an excellent Pathé clientele will be developed.

A Visitor from the South

E. R. DuBose, of Chamberlain, Johnson & DuBose, Atlanta, Ga., Victor dealers, was a visitor to New York this week, spending some time at the headquarters of the New York Talking Machine Co., Victor distributors. Mr. DuBose, who was accompanied by Mr. Jones, of their organization, spoke very encouragingly of the present business situation in Atlanta, stating that conditions have shown a steady improvement since the first of the year. The Victor business in Atlanta is gaining rapidly and the company's sales for April were considerably ahead of their anticipations.

Another Pathé Store

Walter Drey & Co., which opened a store at Third avenue and Eighty-ninth street, a few months ago, has opened a new store at 1528 St. Nicholas avenue. This company is featuring the Pathé line as a leader in both establishments, and is also handling the Wonder talking machines.



Every Victor Dealer

Should order these Cabinets at this special price

You will be able to sell these splendid Landay No. 990 Cabinets, very easily. We have never seen a cabinet as well made or as finely finished at the price. They are made to retail at $18.00 and are worth more. We make a special price to all Victor dealers of only

$9.90 each

These Cabinets are made of fine mahogany veneer on all four sides and top. They fit the No. 9 Victrola perfectly, and are also equipped with a special shaped moulding which makes the Victrola and the Cabinet look like one unit.

Do not take our word that the fine appearance of these cabinets will help you sell more Victrola No. 9's, but order a sample at once. If you do not like it, send it back. We will be glad to make a refund.

We have sold several hundred in the past few months and the unanimous opinion is that they are the finest cabinets of the kind yet placed on the market.

Telegraph or telephone us at once. Cabinets will be shipped f. o. b. New York or free deliveries to any dealer in Greater New York.

We show herewith a cabinet with a Victrola 9. This will give you a fair idea of its fine appearance, and its substantial qualities.

Illustration shows cabinet in use with Victrola IX.

THE POWER OF ITERATION

Getting a Thought Into the Mind of the Other Fellow Again and Again Is Real Advertising

Most of the thoughts that will impress people are thoughts which they themselves have had or nearly had. The thought that pursues the beaten path through the human mind is the thought that oftenest finds a lodging place there.

When we tell a man that which he knows already, he agrees with us and admires our insight. The art is in the telling—in bedecking the thought anew.

Theodore Roosevelt has been credited with having "discovered" most of the Ten Commandments. But he has done more. He has dramatized them.

We knew about the Ten Commandments, but as he staged them, one after another, in new surroundings, their force was impressed upon us anew, for old thoughts are like old friends—they are more welcome.

All of which is merely the iteration of the power of iteration, says Associated Advertising. So many of us want to argue with the prospect in our anxiety to sell him—want to try to get new thoughts into his mind when the old thoughts he has been having all his life can be brought into play and made to dove-tail with that which we want him to believe!

To get the thought into the mind of the other fellow again and again—sugar-coated, maybe, or dramatized—but to get it there again and again until it becomes as familiar as an old friend—after all, that is real advertising.

NEW DIAMOND DISC FOLDER ISSUED

Designed to Be Mailed by the Dealer and Support General Advertising Campaign

An attractive folder in two colors, captioned "Do You Dislike Talking Machines?" has just been issued by Thomas A. Edison, Inc., for the use of their dealers in connection with the campaign of magazine and newspaper advertising now being carried on in the interests of the Edison Diamond Disc phonograph. The folders bear portraits of Julia Heinrich and Jacques Urlus, singing in conjunction with the Edison, tells briefly of Mr. Edison's work in the recreation of music and reproduce a number of favorable newspaper comments on the Diamond Disc machine and records.

THE DANGER OF KNOCKING

It is a generally accepted business principle at the present time that it never pays to knock your competitor or the line of goods that he is selling.

Knocking is no longer looked upon as a favorable means of trying to win business and the knocker generally is viewed with suspicion. A dealer who asserts that the line handled by his competitor is cheap and inferior is usually suspected of underhanded dealing and the customer reasons that a merchant who will attempt to strike a competitor in the back will not hesitate in taking an unfair advantage of one who trades with him. There was a time when these underhanded tactics were indulged in by practically every merchant, but the ethics of modern business demand a higher degree of astuteness and cleverness in selling merchandise.

It is now recognized that it is not necessary to run down a competitor's line in order to boost the goods that you are selling, says the Edison Monthly. Indeed, it is considered that this is the poorest and costliest kind of business policy. It is only necessary to show a customer that your line of goods is superior to the line of your competitor in order to make a sale.

The Sympholion Co. was incorporated at Albany, N. Y., this week, for the purpose of dealing in talking machines and musical instruments. Incorporators, J. W. Nutt, S. W. Case and E. H. Gammans, of 354 Clinton street, Brooklyn, N. Y. The capitalization is $5,000.

THE OPPORTUNITIES IN THE TALKING MACHINE FIELD

Young Man Who Enters the Field To-day Will Find Important Work to Do and a Big Future Awaiting Him—Familiarity with Machines and Records Essential to Progress

The young man who enters the talking machine field to-day as a clerk or a salesman has every opportunity to create a lasting success for himself if he will remember that he must work out success for the store where he is employed, if he would achieve success for himself. The stepping stone to success for the young talking machine salesman lies in making himself valuable to his employer—so valuable, in fact, that his absence from the store will be seriously felt.

The average talking machine store, employing a force of probably a half dozen clerks, offers an unusual opportunity for a young man to become thoroughly acquainted with every phase of the business, an opportunity which does not exist in many other lines of industry where large forces are employed and where the average employe can only master the details connected with his own department. The valuable clerk is the one who knows all about the store's business—he is clerk, window trimmer, card writer, ad writer, assistant manager and assistant buyer—or if he is not actually all of these things, he is possessed of the knowledge and ability to be any one or all of them upon comparatively short notice.

Probably the first position offered to the young man who is desirous of entering the talking machine business is one where his work consists largely of caring for the stock. This position, unimportant as it may seem, offers a very valuable opportunity to obtain knowledge which will be of much benefit to him as he advances in the business. Aside from seeing that the stock of records is well kept, and that missing numbers are ordered promptly in order that the stock may always be full, the young clerk should familiarize himself with the numbers and titles of the multitude of records which are in constant demand.

His work will also give him a comprehensive knowledge of the titles and composers of not only the standard classical compositions, but also of the more popular numbers, and by endeavoring to learn something concerning these compositions and the men who wrote them the stock clerk can obtain a fund of musical knowledge which will not only be of great value to him, but which also will afford him real pleasure and satisfaction.

After becoming familiar with the records—the goods which he eventually will sell, if he advances—the clerk should endeavor to master the rudiments of salesmanship. He should cultivate a neat and pleasing appearance, he should master the art of approaching prospective customers in a pleasant and affable manner. He should become thoroughly imbued with the thought that he is there to please the customer and to give the customer whatever the customer may desire. Having mastered these details his attention should be directed to creative salesmanship—to the art of creating a desire in the mind of the customer for records which otherwise would not be sought for. Here the knowledge which he has obtained in the record department will be of inestimable value. Having once sized up the musical taste evinced by the customer, his knowledge of records and of selections will enable the clerk to suggest other records similar to the one for which the customer asks, and in this way the young salesman's order book will show figures which are greatly in excess of the amount which would be shown had the customer simply been sold only those records for which a direct inquiry was made.

Next should come a knowledge of talking machines themselves. The making of talking machines has developed into an almost exact science, and the young salesman should thoroughly ground himself in the basic principles which enter into their making. He should learn something about the construction of motors, tone arms, sound boxes, turn tables, reproducers, needles and reproducing points, and should understand their relative importance in regard to the machine as a whole.

He should not only become thoroughly familiar with the particular machine which is being handled by his firm, but he should also know something about all of the larger competing lines, so that he may talk intelligently and authoritatively to the prospective customer who may be prejudiced in favor of a machine not sold in the store. And most important of all, he should remember that the true salesman never finds it necessary to knock a competing machine. If the talking machine is a good and useful article, then all talking machines must be of at least some value. If every salesman handling a single make of machine was to claim that all machines except the one he sold were of no value, the customer, if he but made the rounds of the different salesmen, would speedily come to the conclusion that all machines were of no value, for in the course of his travels every machine on the market would have been represented to him as being of little good and practically worthless.

This brand of salesmanship belongs to a bygone age. The modern salesman should work on the theory that all talking machines are useful, that they all are capable of furnishing enjoyment and pleasure to their owners. If the salesman will but keep this idea firmly in mind, he can speedily convince the prospective customer that a talking machine is a good thing to have. and once having clearly made this point the proficient salesman will not find it hard to point out the points of excellence contained in the particular machine which he is selling. Here is where a knowledge of the different makes of machines is absolutely essential in order that the salesman may point out, without knocking, but merely for the purpose of comparison, the differences represented by the different standard makes.

Having learned these things the young man should next direct his attention to the routine work of the store. He should keep himself posted on up-to-date follow-up methods. He should become familiar with the many ways whereby the customer may be kept interested in the new records which are constantly being produced, he should study means whereby prospective customers may be created, and he should give careful attention towards the maintenance and increasing of the idea of service to his customers, so that they will appreciate the fact that his store is seeking in every possible way to aid them to get the fullest satisfaction and enjoyment out of the talking machines which they possess.

These briefly sketched ideas are the fundamentals which will enable the aspirant for success in the talking machine field to climb upward and onward, with increasing pleasure to himself and increasing benefit to his concern. These are the steps which have been used by those men who to-day are successful in the talking machine industry, and these same steps must be trod by the new recruits who would emulate the success of those who have preceded them.

INCORPORATED

Flemish-Lynn Phonograph Co., Hackensack, was incorporated with the Secretary of State of New Jersey on May 3, to deal in phonographs and acquire patents for same. Capital, $2,500,000. Edward O. West, Cornelius H. Zeliff, Hackensack, and Burt C. Suydam, Woodbridge, are the incorporators.

Your Summer Business

Summer trade is getting ripe. How are you planning to pick it?

We have made plans for you. Order a quantity of art fans and Victrola whistles to be passed out at public gatherings and send our story booklet to a special list of prospects. With the filling of every order for this special literature goes advertising service for the whole summer. That means we will prepare free of charge for your use system letters, newspaper advertising, and all sorts of direct literature marked with your name and your personality. Our bureau's skillful work will make business boom for you.

The art fan is handsomely printed in five colors on the face and bears the dealer's own name on the back. The whistle appeals to young and old alike; it is shaped and colored like a Victrola XVIII and opens to display honest arguments and the dealer's name. The story folder is prepared for encouraging sales of portable Victrolas; it tells an enthusiastic story of camp life in which the hero is a Victrola VI. The dealer's name appears in tasteful type.

Offer Good Until June Fifth

The uncertainty of paper prices forces us to set a time limit on quotations for this advertising. Until June 5th you may take advantage of this offer at the following prices and be assured of prompt delivery and the service of our advertising bureau for the whole season.

PRICES: Whistles $9.80, Fans $7.40, Story Booklets $1.85—lots of five hundred. These quotations are for the material at actual cost, so that for larger quantities prices may be estimated in same proportion. Prices include charge for printing a dealer's name on each piece.

Order advertising now. Benefit by double offer.

It is a significant fact that most of the popular artists of the day sing the real hits of the day for the Columbia. Witness "Where Did Robinson Crusoe Go With Friday on Saturday Night," Al Jolson's greatest hit sung by Al Jolson himself (Columbia Double-Disc Record A 1976).

LIVELY NEW ASSOCIATION WORKING IN PORTLAND, ORE.

Interest on Deferred Payments and a Standard of Valuation for Second-Hand Machines Some of the Subjects to Be Handled by New Organization—All Lines of Machines in Demand in Pacific Northwest—Changes Among the Managers and Salesmen—General News

PORTLAND, ORE., May 6.—Many happenings of interest have taken place in talking machine circles of Portland during the past month, many of which give indications of a great increase in the volume of this business in the immediate future.

One of the most important of these is the formation of the Portland Retail Talking Machine Dealers' Association. The first meeting of this association was held at the Portland Chamber of Commerce, at which time the following officers were elected: E. B. Hyatt, of the Hyatt Talking Machine Co., president; Perry Graves, of the Graves Music Co., secretary and treasurer. One of the chief objects of this association is to foster a spirit of business cooperation among the dealers in this vicinity. Many interesting topics were brought up for discussion, the principal one being a proposal to charge interest on installment accounts or deferred payments. However, this was not decided upon until the second meeting, which was held May 1, when it was decided after May 15 interest would be charged. L. D. Heater, manager of the Columbia Co., was elected vice-president, and an investigating committee was elected to investigate complaints among the dealers, also the same committee was empowered to compile a list of old-type machines and the value of the various types when taken in exchange toward new machines. By this, the association hopes to correct the evil of price cutting, by an overallowance on old machines, making this allowance uniform among the dealers. It is confidently expected that all members will derive great benefits resulting from the activities of this association. J. J. Black, manager of the Wiley B. Allen Co., San Francisco, Cal., who has been in Portland for the past two weeks, was greatly instrumental in drawing the dealers together and much credit and thanks are due him for his successful efforts in this connection.

L. D. Heater, manager of the Columbia Graphaphone Co., has been conducting an extensive selling campaign among the country dealers in Oregon territory, personally interviewing a number of them and to date has received some very fine orders. Mr. Heater informs us that the business shows a marked increase over the previous years and his prospects for the summer season are of the brightest.

A. Burroughs, traveling salesman for the Columbia Graphophone Co., has just returned from a successful trip in Southern Oregon and is now transferred to the Los Angeles store.

The showrooms of Messrs. Lipman Wolfe & Co. have been remodeled and several new demonstrating rooms added. This company will in the future carry a complete line of Victor and Columbia goods, under the able management of Miss F. Isaacs, thus making this department of their large store one of the most important in the city.

E. E. Deffenbaugh, late retail salesman for the Columbia Graphophone Co., has assumed the management of the talking machine department of the Bush & Lane Piano Co., who handle the Grafonola, Victrola and Sonora machines. The business of this department has already greatly increased and Mr. Deffenbaugh reports rosy prospects for the future. E. J. Borgum, who lately filled this position, has left to devote his energies to the piano business.

Mr. Hartman, formerly manager of the Meier & Frank Co.'s talking machine department, has accepted the management of the Hopper & Kelly's new department in Tacoma, Wash. This vacancy is being filled by C. D. Johnson, who formerly handled the talking machine line for the Seiberling Lucas Music Co.

The Reed-French Piano Co., which has heretofore been an exclusive Columbia dealer, has now added the full line of Edison talking machines and with both complete lines it can expect a prosperous business.

E. B. Hyatt, owner of the Hyatt Talking Machine Co., one of the largest and best established concerns in the city, who handle a complete line of Victrolas, Grafonolas and Edisons, states that he has had a large increase in this business in the past year and prospects look good for the coming season.

The Eilers Talking Machine Co. has added a live talking machine man to its force in the person of I. E. Jessen, formerly with the Wiley B. Allen Piano Co. Mr. Jessen will act as manager, and from his past record will undoubtedly increase the business of his department. Miss Kathryn Crysler, late manager of the Eilers Talking Machine Co., was married on April 27 to Geo. Hatchkiss Street, popular singer and vocal teacher. Their many friends wish them much happiness.

The talking machine department of Graves Music Co. has made almost a complete change in their sales force with the exception of Manager Perry Graves, and they now have some good live boosters. They have also made a change in their store which gives them an entrance on Morrison street as well as Fourth street, this giving them more window space.

C. P. Little, manager of the Victor department at Sherman, Clay & Co.'s store, tells us of a steady increase in business.

The Pacific Phonograph Co., representative of the Edison line, is conducting a most successful campaign among the dealers and has added several to its list. Under the auspices of the Eilers Talking Machine Co., a most wonderful demonstration concert and tone test was held at the White Temple, Miss Elizabeth Spencer singing together with a re-creation of her voice upon the Edison phonograph. The Edison Co. has also been holding a school for the benefit of its dealers, instructing them in the assembling and repair of its machines. D. W. Schwab, manager, says that the attendance at these classes shows how greatly the dealers and their employes have appreciated this interesting innovation.

The Schwan Piano Co., handling the Columbia line exclusively, reports a fine business for the past month.

Miss Baker, in charge of the H. Jennings & Son Columbia department, reports the largest month in her department since its installation last November.

THE RECORDING TROUBLES OF THE OPERA STAR

In Singing for the Records, Things, Vocally, Are What They Are and Not What They Seem—Some Recording Secrets the Average Man Doesn't Appreciate—The Story of the Cuckoo

Last month Talking Machine World readers were given some inside facts regarding the experiences of the "old guard" of recording artists such as Steve Porter and Billy Murray, in the making of records, mostly of a popular nature, and herewith are presented some new and unusual facts regarding the same general subject of recording, with the grand opera artists to the fore.

With the records selling at about a dollar the purchaser is chiefly concerned with the music itself and little with the singer, beyond desiring that the singing is good. When it comes to high priced records, however, those listed at several dollars, the purchaser is deeply interested in the artist who did the recording and is therefore unusually critical regarding his work. If the dealer could understand all the difficulties of high-class recording and explain all those details to his customer, certain particular selections would take on a new interest—an interest direct from the laboratory.

When The World representative stepped into the Columbia laboratory the other day Andres DeSegurola, of operatic fame, was singing. Standing near the screen which shuts off from chance visitors the mysterious method of actual recording, the well-known singer was throwing himself entirely into this new art—an art quite different from that of the stage—that he might produce the most perfect possible rendering of a song which in record form would go out all over the world and be played before all manner of people, from the "mighty potentates of civilized Europe and the semi-barbic East," to the near-cannibal kings of those South Sea Isles. The same beautiful airs that stir a super-civilized opera audience in New York will delight the eager ear of the dusky warrior squatted beside his smouldering camp fires. The savage may not comprehend the nice shades of musical tone that Signor DeSegurola strives so earnestly to impart to his singing, but the rendering will give a precise feeling intended by the composer.

These things artists such as DeSegurola know, and it is for the satisfaction of the keenest critic, as well as for the pleasure of the average music lover, that he works so unremittingly. With these ideas in mind—with this ideal before him as he sings into the mouth of a tin horn—is it at all remarkable that the artist can detach himself absolutely from his surroundings and put his entire musical self into the making of a record? He forgets the laboratory with its almost comical combination of high-chairs, on which the violinists, 'cellists, French horn artists and all the rest of the accompanying orchestra members sit. He knows subconsciously that even as he is putting his whole mind on the singing, each of these musicians is concentrating likewise on his own musical contribution; and so under the expert, even inspired guidance of the leader, the music is recorded through the half-dozen horns that convey it to the delicate surface of the wax test-record. The performance is at first sight strange; it is even laughable—until the observer considers what the result is to be and how indeterminately wide will be the effects of the finished record.

Along the line of what may be termed musical efficiency in record making, Vernon Stiles, who recently signed with the Columbia Co., expressed convictions and a purpose even more fully fitting to the new art than the average recording singers' comprehension has enabled him or her to understand.

Absolutely Perfect Singing Essential

"I used to be a scientific farmer," said Mr. Stiles. "I learned that in cultivating one vegetable or another, or one fruit or another, methods had to be adapted to circumstances. You can't produce the same good results, in even slightly differing climates, with identical methods. Soil, water supply, sunlight, length of seasons, all have to be considered. So in singing for the recording devices so marvelously worked out by our mechanical geniuses, methods must adapt themselves to conditions and to mechanical laws. Singing that sounds perfect from a stage in such a great auditorium as that of the Metropolitan Opera House, may reproduce very imperfectly from the record. Acoustics, volume of sound, pronunciation, determine the quality of tone when the receptive process is reversed and the needle reproduces faithfully what the singer has given forth. The slurred sibilant, for instance, a final "s" left off a word in a song, is often unnoticeable in the concert hall, but let a singer slur a sibilant when recording for the talking machine and he will either have to try again or give up. The average conditions under which talking machine records are played—in relatively small rooms or halls, and in comparative quiet—necessitate the perfect enunciation of every syllable. Listening to a record in your home, you can fairly feel the personal presence of the artist himself. It is the difference between talking with a man face to face, gazing into his eyes and observing every change of expression, and sitting anywhere from twenty to two hundred feet away from him in the theatre, forum or opera house.

"My first records were a revelation to me. I had realized something of the difference between recording and concert singing, but lack of actual experience resulted in surprising tonal effects. At times my voice burst forth with great harshness; at other times the enunciation was imperfect, though in this latter respect I had done fairly well. It is a fascinating study for any one with patience plus a desire to achieve perfection. The theatrical value of personality in appearance, of course, has no value, just as in moving pictures the voice contributes nothing to the effect. Musical tone—faithfulness to the

FRAAD JR.—RETAIL PRICE, $35.00

composer's idea alone—matters. They said to me when I first stood before a recording horn, 'Forget that you have sung in a dozen different lands in half a dozen languages, and concentrate so absolutely on this one song that your tones, your interpretation, may be all that you can make them."

"It is no doubt true that the artistic temperament makes trouble for the director," said another singer, whose records sell widely, "but as a matter of fact when even the extremely temperamental arist comes to realize how much depends on painstaking patience, no one is more anxious than he to work hard and to follow the suggestions which the director offers out of his experience and his knowledge of the new art."

The Adventure of the Cuckoo

A humorous side of serious recording came suddenly to light one morning when Lucy Gates was singing a little song called "The Cuckoo Clock," by G. A. Grant-Schaefer. The orchestration provided for imitations of the cuckoo's call by the piccolos, but the distribution of the orchestra made it impossible for the piccolos to approach the recording device so that the "cuckoos" would have sufficient volume in the places, where they were scheduled for solo business. So a little pneumatic cuckoo instrument shaped like two blackboard erasers fastened back to back, with a sort of accordion effect between them, was brought into play, and one of the musicians who wasn't otherwise employed stood beside the singer, and, holding the innocent-looking device in the throat of a horn, squeezed one end at the proper moment. A cuckoo in flesh, or in the feathers, lays more stress on one of its two simple notes than on the other; but the cuckoo machine did not know which note to favor, and favored the wrong one. Also it outraged its manufacturer by failing to sound like the bird, accent or no accent. Lucy Gates laughed. The record had to be made again. This time the cuckoo was still more unnatural and developed a squeak with rare burlesque possibilities. Miss Gates refused to be serious. The performance was temporarily halted while the entire orchestra offered suggestions on the proper squeezing of a cuckoo machine. One after another essayed to shame nature with the instrument—and did. Finally mechanical genius came to the aid of art, and a gentleman who sat on one side of the highest high-chairs got down and fixed the bird with a nail. Then the record-making proceeded, with the result that if this cuckoo song as finally perfected is ever played in a forest, or wherever cuckoos themselves live when not employed in popping in and out of grandfathers' clocks, no doubt a large flock of the wierd birds will come and nest in the talking machine.

COLUMBIA PUBLICITY

To Feature Prominent Artists in National Publicity—Columbia Sign for Dealers

Beginning with the advertising appearing in next month's national magazines, the Columbia Co. is inaugurating a new thought in general publicity which combines both co-operation and attractiveness. This advertising will feature two of the famous and most prominent artists who record exclusively for the Columbia library. It is planned to make the advertising in each magazine different and distinctive, and to continue this series indefinitely. Such well-known artists as Oscar Seagle, Louis Graveure, Corinne Rider-Kelsey and Felice Lynne will be featured in the first month's series.

The Columbia Co.'s advertising division has prepared for free distribution among Columbia dealers, a large muslin sign measuring two and one-half by five and one-half feet, and displaying the popular Columbia "notes" with the inscription "Columbia double-disc records." This sign is suitable for use in many ways, and is particularly adaptable for display in windows, store interiors and at fairs, carnivals, etc.

Edw. M. Baker, advertising manager of the Columbia Co., has been visiting the Columbia headquarters in near-by territory.

TALKER MUSIC BY WIRELESS

Boston Wireless Operator Sends Music Produced by Edison Diamond Disc Phonograph Over a Radius of Two Hundred Miles

BOSTON, MASS., May 10.—The sending of music through the air by wireless has become an accomplished fact and has been developed to a practical basis by Harold J. Power, of the American Radio and Research Corporation, who is in charge of the wireless station at Tufts College, this city. Mr. Power has been very successful in his experiments in this connection and music sent by his station has been picked up by steamers two hundred miles and more to sea. The most astonishing results have been secured during the past fortnight or so.

In his experiments Mr. Power uses an Edison Diamond Disc phonograph for the purpose of producing the music, and declares that the purity of its tones have had much to do with the success of the experiments.

Operators at various stations along Cape Cod and any number of amateur wireless operators around Boston have reported that they heard quite clearly the music in the air.

Speaking of his invention, Mr. Power declared that he believed the time was not far distant when the experiment station at Tufts College would be able to play "The Star Spangled Banner" to the Kaiser's radio operators stationed at Berlin.

He said that soon he would try playing grand opera to wireless operators at sea and would make use of such voices as Emmy Destinn, Marie Rappold, Jacques Urlus and Anna Case for their entertainment.

Edison Diamond Disc Phonograph in Use in Wireless Room at Tufts College

Service and Success

Victor dealers who realize that the successful retail Victor store is founded on *service,* will find it profitable to let this organization assist them in developing their business.

WILLIAMS CO. SERVICE

will enable the Victor dealer to give his customers real service from every standpoint. Many a customer has been lost because of a shortage of certain records at a time when they were most needed. Perhaps our service will help you retain the good-will of some patrons.

Every member of this organization stands ready to co-operate with our dealers at all times. Our experience is at the service of Victor dealers, for we believe in the old adage "Service Spells Success."

May we not serve you?

G. T. WILLIAMS CO., *Victor Wholesale Exclusively*

217 Duffield Street :: Brooklyn, N. Y.

Frederick's
THE HOUSE OF SERVICE

Victor Distributors

at Pittsburgh, Pennsylvania

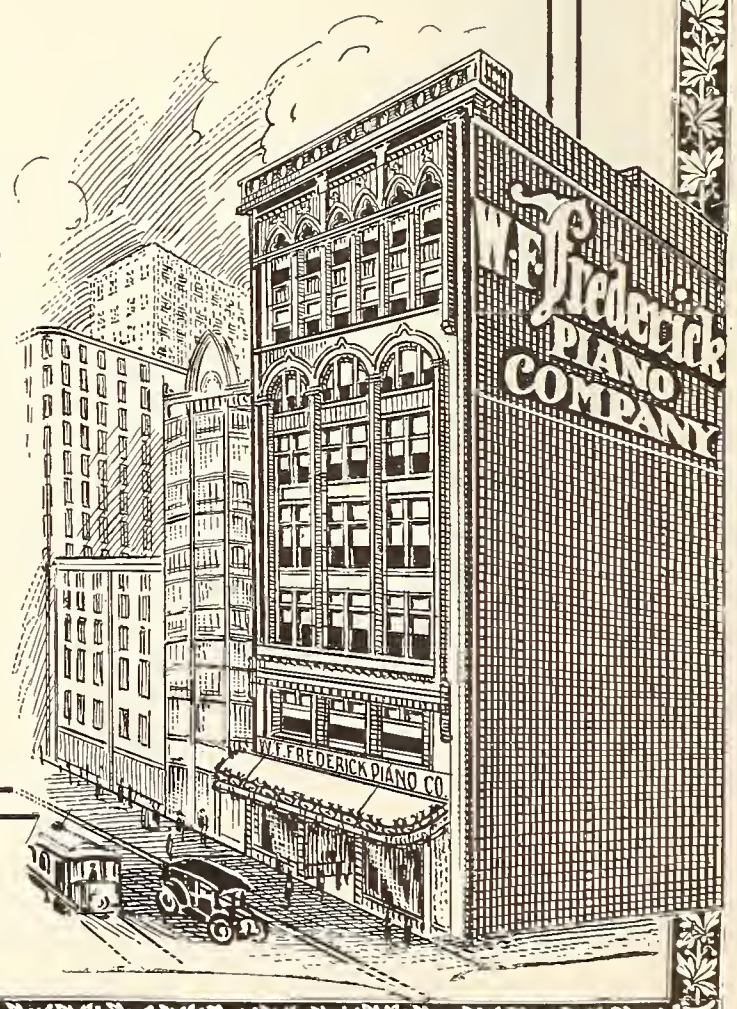
THE Victor Talking Machine Company has arranged with *Frederick's* to distribute Victor Products from Pittsburgh, thereby greatly enlarging their wholesale representation in the city. Victor dealers in Pittsburgh and District may now more nearly supply their rapidly growing demand through the home distributors without the delay and expense incident to shipments from distant points.

In keeping with our fixed policy of operating only in a large way, we have installed at Pittsburgh perhaps the most modern and commodious Victor Jobbing Department to be found in any city in the country, and have made every necessary preparation to render a service of real helpfulness to our dealers.

We solicit a personal visit and a thoughtful comparison of our facilities with the next best you know of. Meantime a mail or phone order will prove that we deliver value beyond the mere cost of merchandise billed.

W. F. FREDERICK PIANO CO.
635-637 SMITHFIELD ST.
PITTSBURGH, PENNSYLVANIA

We shall be glad to place your name upon our mailing list to receive the trade letters and service bulletins published by our Dealer Service Department.



FIRE NO HANDICAP TO MAYER

Progressive Piano Dealer of Paris, Tex., Replaces Burned Store with Corrugated Iron Headquarters for Victor Victrolas

When Ashley B. Cohn, vice-president of Hardman, Peck & Co., New York, visited Texas upon his recent trip, he spent some time at Paris, Tex., where Henry P. Mayer, head of the

Ruins of H. P. Mayer's Store

music house bearing his name, had conducted one of the most up-to-date piano and Victrola warerooms in the Lone Star State.

Mr. Cohn reached Paris just after a fire had devastated the entire business section of that city, and destroyed practically every retail store of any prominence, including Mr. Mayer's es-

The New Store—Mr. Mayer in Doorway

tablishment. Mr. Mayer has handled the Hardman, Peck line for many years, being one of the oldest accounts on the company's books, and as he had made it a point to carry a representative stock at all times, his loss in the fire totaled approximately one hundred pianos and player-pianos, with a large amount of musical merchandise and a substantial stock of Victrolas and Victor records.

Although his warerooms were completely destroyed, Mr. Mayer with characteristic Western energy and pluck started to look about for a new store within an hour after the fire was under control, and in the course of a day and a half was established in the warerooms shown in the accompanying photograph. The exterior of the store is constructed of corrugated iron, and although the interior hardly allows Mr. Mayer sufficient room for display purposes, he is planning to utilize it as temporary headquarters until he can arrange for the construction of a new building.

In the illustration shown, Mr. Mayer may be seen in the doorway of his new home with a violin in his hand, the latter being the only portion of his stock saved, aside from one Hardman piano which defied the fire, smoke and water.

FILING SYSTEMS FOR FOLLOW-UPS

Suggestions of Value for Those Who Have Not Paid Attention to Following Up People to Whom They Have Sold Talking Machines

The dealer who does not keep the names and addresses of the people to whom he has sold phonographs or records and who does not make every effort to induce instrument owners to maintain their interest and remain steady purchasers of records is neglecting a profitable branch of his business. To make it profitable, however, it is not sufficient merely to keep the names of those to whom you have sold machines. It is essential that you have a definite plan by which you can follow them up and, by consistently calling their attention to the activities in the talking machine world, keep their own interest in music and phonographs in a state of activity.

In order to show a customer from the very beginning that you give service it is a good plan to have a filing system by which you can keep informed as to the likes and dislikes of your various customers as far as phonograph records are concerned. The card to be used in connection with this system should contain spaces for the name and address of each person who has bought a machine or records from you. Further, it should have classifications relating to the variety of records preferred by the person whose name it contains. At one glance you should be able to learn whether the person listed prefers classical or popular music; vocal or instrumental music, and the names of his favorite singer and composer. Other useful classifications will suggest themselves as the dealer gives the subject consideration and the system may be so handled that the dealer will have at his command a complete catalog of the musical preferences of every person who has ever bought a phonograph or records at his store.

A customer, knowing that the information he has given you is on file, will expect occasional notifications from you and, when they come, he will regard them more as a personal favor on your part than as part of a scheme to keep him an active record purchaser. The notifications you send will be based on the contents of the monthly list of new records or such special lists as may be sent out from time to time. Where there are records on the lists that seem to meet the desires of certain of your customers, as these desires are indicated on the cards in your filing system, you will do well to send such customers a few lines on a postal card, calling their attention to the fact that you have received some new records by their favorite singer, composer, etc. Where customers have telephones it would be better to use this method of communication, says the Edison Phonograph Monthly, for it brings you into direct personal touch and has proven very effective wherever it has been tried.

REVENUE TAX RULING

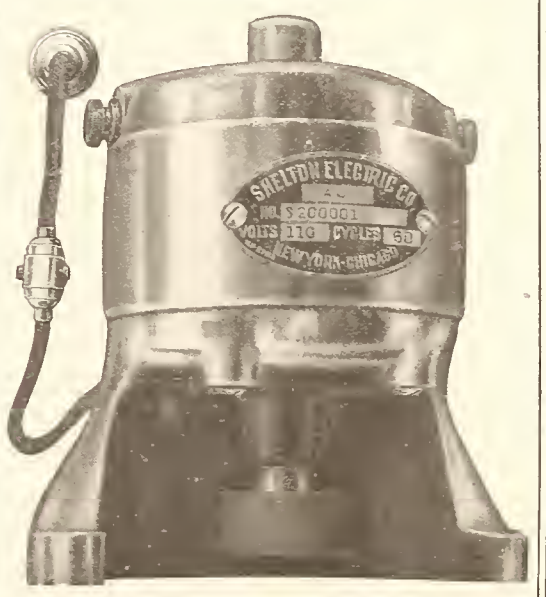
Bank Acceptances Do Not Require Stamps, Says Commissioner Gates

WASHINGTON, D. C., May 1.—The Acting Commissioner of Internal Revenue, David A. Gates, has decided that revenue stamps are not required on bank acceptances, and the Federal Reserve Board has instructed the banks of the reserve system that stamps are no longer needed on drafts, acceptances, overdrafts and post-dated checks. The text of the decision follows:

"In view of the decision made by the Supreme Court of the United States in the case of the United States vs. Isham (17 Wall, 496), that 'the liability of an instrument to a stamp duty, as well as the amount of such duty, is determined by the form and face of the instrument, and cannot be affected by proof of facts outside of the instrument itself,' this office is of the opinion that drafts, acceptances, overdrafts and post-dated checks are not taxable under the above act as promissory notes, even though they are used in such a way as to perform some of the functions of a promissory note."

If you can make the customer feel your enthusiasm about the goods you can induce him to buy. If you have no enthusiasm you cannot make sales.

Only One Answer!



Retail Price $17.50

If a customer should ask to have his phonograph electrified, what would be your answer?

There is only *one* answer—

The Shelton Electric Phonograph Motor

Why?

Because this motor electrifies perfectly all the leading types of machines without even changing a screw, and also preserves the spring motor.

Chicago Talking Machine Co.

Victor Distributors

12 North Michigan Avenue, Chicago

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., May 10.—The talking machine business this month has kept up its remarkable pace proportionately—that is while naturally showing some falling off due to the rapid approach of gentle summer—it still shows a big, round, whooping increase over the corresponding period of last year.

The old and established companies seem to be still pressed to the utmost to fill their orders notwithstanding the flood of new machines coming on the market, who also seem to be getting quite a lot of business. A new factor has entered the situation in that a few—it must be admitted—a very few of the debutantes are getting away from a slavish imitation of the case designs of the old companies and are striking out along lines of their own.

Lyon & Healy in New Quarters

Lyon & Healy are now installed in the company's new building at the northeast corner of Jackson boulevard and Wabash avenue, and visitors agree that it is one of the finest things that the music trade can boast of. The various departments are settling rapidly in their respective accommodations, but the department to first complete the work of removal and get back to actual business was Department H—the Victor section.

Manager L. C. Wiswell, of the talking machine department, has made his plans so well that, like a modern military body, the members of that division marched into the new building, each to his respective place, and were able to begin active work almost at once. The department occupies the entire second floor as well as considerable space upon the first floor and a large part of the ninth.

The retail machine department is on the main floor and directly to the left of the Wabash avenue entrance and, although the furnishings have not yet been entirely installed, it is plain to see that they will be very handsome when completed. The retail record department is located in the front half of the second floor. There are twenty-three private record rooms that are arranged in such a fashion as to offer easy ingress for either the patrons or the young women who sell the records. Especially constructed doors, double windows and a system of electric lights which indicate what rooms are occupied and what room desires attention from the sales force, are some of the unique features of this thoroughly modern department. There is a special service department comfortably furnished at which saleswomen explain installment contracts and how to open a regular account. There is also a credit and adjustment room, where records can be returned for credit or adjustment and repairs arranged for. Some idea of the size of the record department can be gained from the information that the record counter stretches almost sixty feet straightaway. To the east of the record department come the general offices, including Mr. Wiswell's private office, and behind that, on the Jackson boulevard side, are the wholesale sales department. Running parallel to these sections and toward the inside of the building is the record stock room, where an immense stock can be handled with a minimum of trouble and a maximum of facility. The records are kept in sectional racks which are elastic and which can be adjusted to the demand for the various sections. On the ninth floor space has been apportioned, where certain of the machine stocks are kept. In addition to this space there is a special warehouse arrangement which permits of the immediate reshipment of machines and avoids the necessity of being hauled to the main building.

The concert hall, in which will be continued the Victor concerts and which drew thousands of people to the old building, is located on the ground floor and immediately off the Jackson boulevard entrance. It will accommodate over 200 people. It is beautifully decorated in delicate shades of green and white and doubtless will be patronized by even greater crowds than were always present at "Victor Hall."

"Naturally I am very much pleased with the change," said Mr. Wiswell to The World. "We have got what we have wanted for so many years—that is plenty of space. On the second floor alone we have an acre and we will now be able to work out some ideas of service which have been of necessity postponed until now."

Talking Machine Co. of America Organized

The Talking Machine Co. of America has opened offices on the eighth floor of the Steger Building, and has begun active work on the manufacture and distribution of the "America" line of talking machines. D. J. Clark is one of the prime movers in the enterprise.

Can You Solve This Puzzle? We Have Given Up

A piano trade publication of Chicago, which recently incorporated a talking machine "section" in its columns has perpetrated the following:

"A high-class Edison Grafonola was put to extraordinary use the other night in a Buffalo motion picture house, when it was made to represent the voice of one of the movie actors, Robert Warwick, appearing in 'The Stolen

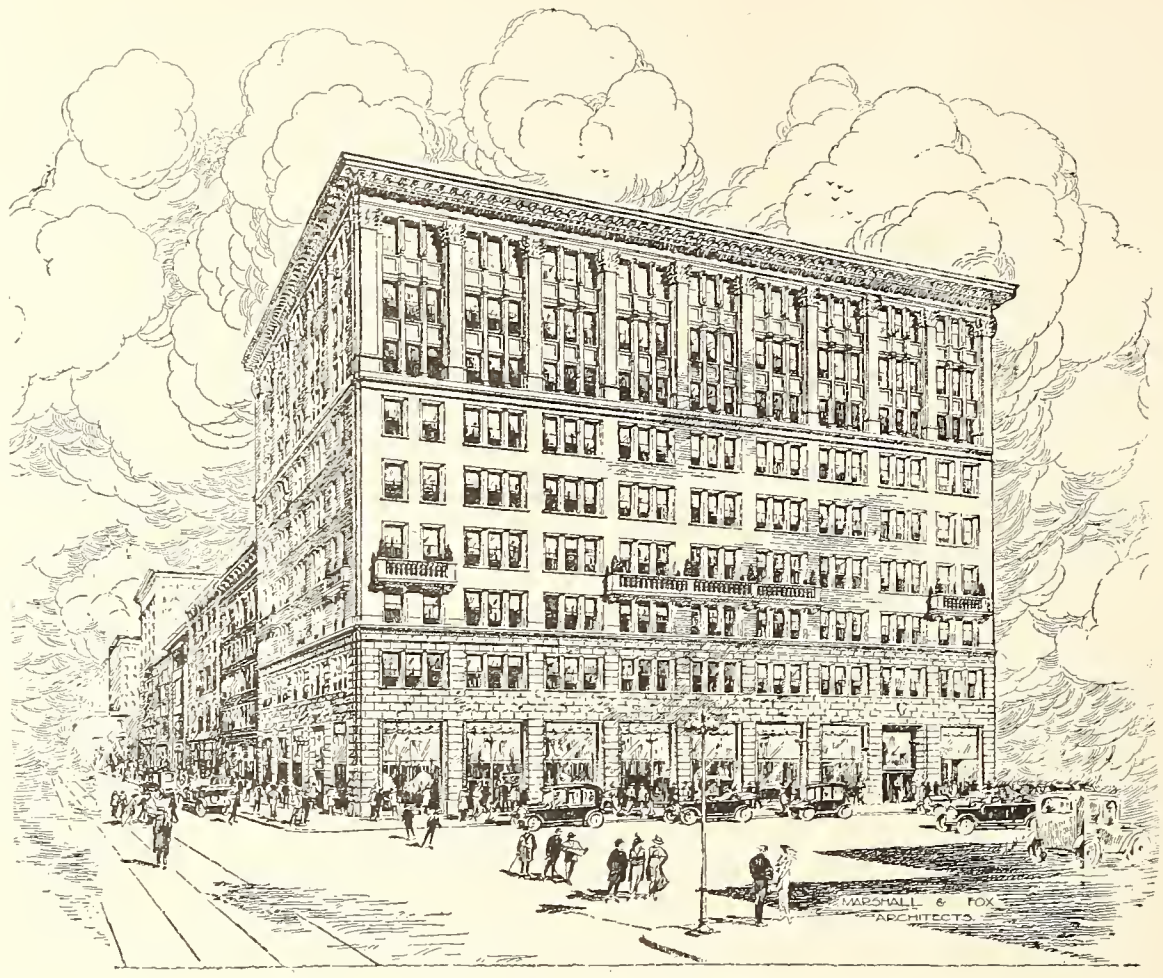
WADE & WADE, 3807 Lake Park Ave., Chicago, Ill.



New Lyon & Healy Building

Wabash Avenue *at Jackson Boulevard*

Here is a fitting home for Victrolas and Victor Records. Here are modern, improved facilities which assure the utmost promptness and care in filling and shipping orders.

For instance, a great spiral conveyer connects all floors of the building with the shipping room; as soon as a package is made up, it is delivered almost instantly, to the waiting auto-truck and started on its way to you.

This splendid building enables us to carry larger and more complete stocks. Daylight floors, 96 x 171 ft. in size, are devoted solely to the sale and display of Victrolas and Records.

Here you find them in a perfect setting. Advanced ideas, the fruit of unequalled experience, will be found in our methods of SERVICE.

These splendid modern facilities assure SERVICE, such as you appreciate, such as will assure you of the increased patronage of the people of your community.

Lyon & Healy

Chicago

Victor Distributors

Voice.' In this film there is one scene, where Mr. Warwick is supposed to be singing before a large audience. When this scene was reached the film stopped while the Victrola was quickly put in place, and the audience enthusiastically applauded the introduction of the talking machine in the picture. An aria from 'Pagliacci' was played and sung."

Perhaps it's an effort to be impartial, but in that case what about the Pathé, the Sonora and a dozen others. Perhaps they've "scooped" us and there's been a merger and we never even heard the rumors. And then again, the exchange editor may have been careless in reading his clippings. "The last theory is the most specious and I feel sure, my dear Watson, that this one will prove correct. At any rate, a most interesting case."

A Publicity Specialist

Gabriel Andre Petit has opened a studio at Room 324 Athenaeum Building, Chicago, where he will devote his time to designing trade-marks, letterheads, catalogs, transfers and case designs for the music trade. Mr. Petit has enjoyed a thorough education in the art schools of Chicago and Paris, and in addition has had practical experience in the music trade.

"Golden Tone" Needle Launched

H. L. Harris, president of the Supreme Sales Co., of South Wabash avenue, Chicago, has completed arrangements for the marketing of the company's "Golden Tone" needle and has begun active work on its promotion.

"The material of which our needle is made," said Mr. Harris, "is a mineral product, which is cut the same as a diamond, and which has practically the same degree of hardness. Its toughness and its elasticity, together with the nature of its composite material, creates a perfect tone transmission. Temperature has no effect upon it and its use permits the user to secure any degree of volume. We are offering our goods to the dealers in what we consider the most attractive form for sales and display that has ever been witnessed in the accessory division of the talking machine industry. Each needle is packed in a small jewel box the same as a ring or any other piece of jewelry. We have made up a large supply of our goods and hope to be able to take care of all of the sample orders, at least, immediately."

Empire Talking Machine Co. Moves

The Empire Talking Machine Co., 429 South Wabash avenue, Chicago, has moved from the third floor of the same building to larger quarters upon the fourth floor. The new location provides facilities that have been much needed for several months past, for the growth of this company has been a remarkable one.

President John H. Steinmetz is busily engaged with the work of preparing a new line of case designs, each one of which has evoked a great deal of admiration from those who have been privileged to see the models.

The Talk Sing Co., Incorporated

The Talk Sing Co., of Chicago, which was recently incorporated with a capital stock of $25,000, by E. F. Driver, John W. Hake, Erwin W. Scott, Dudley F. Dorsett and others, is a concern that will manufacture advertising novelties in which are embodied talking machine mechanisms. The novelties are in the form of dolls, etc., which call attention to cigars, etc.

Incorporated

The Chicago Hinged Cover Support & Balance Co. has been capitalized by Frank E. Levanseler, James L. Abbott, Leonard J. Hall and others, with a capital stock of $25,000. The movement is necessitated by the rapid growth of this unique business. The company makes a hinged balance and cover support that is now being widely used by talking machine manufacturers. It has proved to be very popular and has come to be referred to in trade parlance as "the cover that needs no catch."

Announces New Motor

H. T. Schiff, president of the Vitanola Talking Machine Co., after six months of arduous work, has announced the perfection of an electric motor that apparently solves all of the difficulties that hitherto existed in this direction.

"The theory of the device is grouped around a pivot," said Mr. Schiff, "which operates upon the rim of the turn-table. This pivot is equipped with a spring contact device that automatically absorbs any inaccuracy in the diameter of the turn-table. The device has been tried out on currents varying from eighty-five to 285 volts, and absolutely no difference has been observed in the result. The motor operates with either direct or storage battery at a remarkably small expense, so that it can be used on goods designed either for country or city trade. Although the motor runs 2,000 revolutions a minute, the speed is absorbed by the small perimeter of the pivot. The device is also equipped with a mechanical governor to take up any other possible difference in the strength of the current. The motor is very simple and durable and we anticipate a great success with it. We also have on hand a large supply of high-grade nickel-plated Swiss motors, which we have been able to secure in sufficient numbers to supply outside manufacturers."

New Interview with Farrar

In their monthly bulletin of Helpful Hints and Happy Hunches, the Chicago Talking Machine Co. includes a neat folder descriptive of an interview with "the woman of records and reels," as Geraldine Farrar is therein dubbed. Miss Farrar told Mr. Ellis, of the editorial staff of the Chicago Talking Machine Co., that she was quite infatuated with her Carmen pictures.

"They give me an opportunity to act the part of Carmen, as I think it should be acted without having to think of saving my breath and strength for singing the lines," quotes the diva.

"Did they have to take the scene of the fight in the cigarette factory more than once?" asked the interviewer.

"No, indeed!" was the reply. "Once was quite

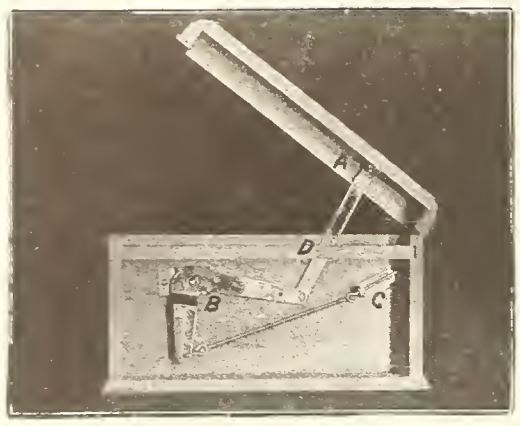
WE ALSO SELL COMPLETE ELECTRIC OR SPRING MOTOR PHONOGRAPHS—WHOLESALE ONLY

THE COVER WITHOUT A CATCH

THE COVER THAT NEEDS NO CATCH



Showing How It Operates

IT needs no catch simply because it catches itself. That is, it is self-controlled. Its own weight, reacting upon itself through simple mechanical principles, robs it of its weight. Thus it makes fingers, records and the top itself safe from being shattered by dropping.

Simple, safe and easily applied. An effective talking point and a great feature.

CHICAGO HINGED COVER SUPPORT & BALANCE CO., 144 S. Wabash Ave., CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 37)

sufficient, fortunately. The poor young actress who took the part of the cigarette girl was laid up for three days after my fight with her. And the scenery—well, I absolutely demolished it. They would have had to make the setting all over if they had had to retake the scene. However, they had four cameras taking this particular scene, so they secured a good picture the first time."

Then the scribe, who, by the way, was going through his novitiate with remarkable eclat, lead Geraldine out on the subject of Victor records. She averred that they had been a splendid help and inspiration to her and that she deems them wonderful reproductions of her voice. In response to a request she promised to send a list of her favorite records. This she did a few days later and here they are: Wonnevoller Mai (Come Joyous Month of May)—87,127; Annie Laurie—88,052; My Old Kentucky Home—88,238; Believe Me If All Those Endearing Young Charms—87,025. Operas: Tosca-Vissi d'arte d'amor—88,192; all records of "Carmen" and "Butterfly;" two records with Mr. Fritz Kreisler playing the violin obligato: Mignon-Connais-tu le pays?—88,538, and Mighty Lak' a Rose—88,537.

Columbia Staff Meetings

About the 18th of each month the sales staff of the Chicago branch of the Columbia Co. has a banquet at the Palmer House. Those present include the district superintendent, the Chicago manager, the various salesmen and the heads of all departments having anything to do with the marketing of Columbia goods. They not only discuss general matters, but go over the advanced bulletin for the following month, get the ideas of the different members as to the amount of business they will do and place the order with the factory at Bridgeport accordingly. They also discuss the monthly sheet sent to all the branches in which the criticisms of the various numbers are asked for, together with any suggestions as to desirable records, etc. Manager C. F. Baer is very enthusiastic regarding the advantage of these meetings and cites many instances of the beneficial results both direct and resulting from the general spirit of co-operation and bon camaraderie.

Getts Piano House Adds Victor Goods

The Chicago Talking Machine Co. has just made an important new account in the Getts Piano House, of Grand Forks, N. D., one of the most energetic music concerns in that section. George W. Getts, head of the business, was a Chicago visitor this week.

Majestic Co. in New Quarters

The Majestic Talking Machine Co. has completed removal into its new quarters on the fourth floor of the McClurg Building, 218 South Wabash avenue. Commodious offices have been built as well as display rooms and a concert hall. There are also sound proof rooms, where the entire line can be displayed and demonstrated. The work of factory organization has now been completed and Sales Manager Oscar J. Kloer is now taking care of the applications which the company has received.

Wade Products in Big Demand

S. O. Wade, of Wade & Wade, reports that he is very much pleased with the way that the fibre needle cutter business keeps up—also the big demand they are having for their oil, greases and furniture polish, especially the spring barrel lubricant, which is proving a wonderful success in eliminating the sticking of the springs.

Tel-A-Tone Co. Established

W. C. Beckwith and A. F. Anderson have organized the Tel-A-Tone Talking Machine Co., and have opened offices on the sixth floor of the Republic Building. The company will be incorporated for $10,000 and will make a line of machines ranging in price from $40 up.

Velvatone Talking Machine Co. Organized

The Velvatone Talking Machine Co. has been incorporated with a capital stock of $100,000 to manufacture a complete line of talking machines which will range in retail price from $50 to $250. Offices have been opened on the fourth floor of the building at 330 South Wabash avenue, and active work on the production and the distribution of the line has already begun. C. H. Bartholomee, who has been connected with the piano and music trade all his life, has been chosen as president and treasurer. T. D. Huff, a prominent attorney, is vice-president. Paul B. Armstrong will act as secretary, a position for which he is especially fitted following his wide experience in the piano trade. Mr. Armstrong was for a long time head of the piano department of Sears, Roebuck & Co.

Columbia Items

H. A. Yerkes, recently appointed district superintendent of the Middle Western territory succeeding W. C. Fuhri, now United States manager, leaves next week on an extensive trip. Mr. Yerkes is getting well initiated into his new duties and in so far as he has been able to survey the field he has been highly satisfied not only with the volume of business coming to hand from all Columbia branches and jobbers in his division, but for the prospects of an unusually large year's business.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 38)

Edward M. Baker, advertising manager of the Columbia Co., spent several days at the Chicago office this week.

In order to care for the steadily increasing local wholesale trade and to work the city more intensively, several changes have been made in the sales force. P. G. Winters, who has formerly had the loop district, will cover the extensive North and South side territory, especially that known as the lake front territory outside of the loop. This includes some of the best dealers in the city and Mr. Winters will undoubtedly be able to do much creative work. This will render great assistance to Edward Blimke, who has had practically all the territory outside of the loop and will enable him to cover more thoroughly the great number of dealers still under his charge.

F. F. Dawson, formerly of the Lincoln Grafonola Co., Columbia jobber, of Lincoln, Neb., has been secured to look after the loop wholesale trade. He is a man of long and practical experience and is rapidly forming acquaintances with the big loop dealers.

Clifford Ely, who has heretofore confined himself mostly to the East, will now give the majority of his time to Chicago and the Middle Western district in selling and promotion work. He will make his headquarters at the Chicago office.

Additional space has been taken on the seventh floor of the building at 12 North Michigan avenue, by the company, giving them almost double the amount of room at present occupied by the machine stock.

A. A. Stevenson, inspector in the Dictaphone factory at Bridgeport, is now at the Chicago office in the course of a trip among the Columbia branch stores and the Dictaphone agencies. He is both giving and getting points on repair and installation matters and the Chicago office is joyfully taking advantage of his long experience and skill.

A large number of new Columbia dealers have been established the past month in the territory covered by the Chicago office. Here is a partial list: W. W. Jacobs Music House, Hoopston, Ill.; Hunt's Drug Store, Wautona, Wis.; W. W. Doyle, Beardstown, Ill.; Waldheim & Co., Milwaukee, Wis.; John T. Gill, Fairbury, Ill.; Maysville Furniture Co., Maysville, Wis.; Henry Baer, Whitewater, Wis.; F. A. Thompson, Schulzberg, Wis.; Ward Beauchamp, Andrews, Ind.; Grossman Bros., Argon, Ind.; Bruett Piano Co., Madison, Wis. Also the following new Chicago new accounts: Naples Jewelry Co., 925 South Halsted street; Griffin Music Co., 627 South State street; J. Oehl, 2305 Milwaukee avenue, and Simon Bros., South Chicago, Ill.

Personals and Visitors

Among the visiting dealers the past month were A. K. Andrews, Jr., of the J. L. Hudson Co., Detroit, Mich.; E. P. Taylor, president, and H. G. Power, manager, Taylor Carpet Co., Indianapolis, Ind.; J. S. Mitchell, secretary of L. S. Donaldson Co., Minneapolis, Minn.; J. C. Baxter, Davenport, Ia.; J. Heyman, Heyman Co,, Grand Rapids, Mich.; W. Wiegand, Wiegand Bros., Racine, Wis.; J. Friederick, Friederick Music House, Grand Rapids, Mich., and W. E. Bernard, Springfield, Ill.

D. C. Preston, manager of the talking machine department of Donaldson's department store, Minneapolis, Minn., was here on his way to the East, where he expected to spend a few days at the Victor factory at Camden. Mr. Preston said that business was good and that the new baby, which recently made its advent at his home, was excellent. Continuing his conversation, he said that collections were picking up and that the new baby was also picking up everything in reach of its dainty fingers.

Arthur D. Geissler, of the New York Talking Machine Co. and the Chicago Talking Machine Co., spent several days in the city after a brief sojourn at French Lick Springs, Ind., and left for New York early this week.

A. G. Barnett has been appointed assistant to B. H. Jefferson, advertising manager of Lyon & Healy.

Miss Young, who has also been with the advertising department of Lyon & Healy for a considerable length of time, was married recently. Her name now is Mrs. Kohler.

Orotund Progresses and Moves

Compelled by the steadily increasing amounts of business received by the Combination Attachment Co. on their Orotund sound box and attachments for playing hill and dale records, the company has moved from its old location on Michigan avenue to larger and more centrally located quarters at Suite 524, Republic Building, at Adams and State streets. General Manager William Tures says that they are daily establishing agencies and adding dealers to their lists and it appears that 1916 will prove a very memorable one for the Orotund.

Aids the Key Hitters

Chicago is encouraging the fair typists to type to the rythm of syncopated melody, as will be observed from the following, swiped bodily from the Chicago Examiner of April 15.

"Business men, take notice. If your stenographers are slow in their typing, put some canned music in your office. For it was demonstrated yesterday before the annual conference of schools affiliated with the University of Chicago that typists can work faster to ragtime music than otherwise.

"Twelve girls of the Hyde Park High School sat at typewriters before the conference. A fast one-step was played on the phonograph.

"'Rat-ta-tat-ta-tat-ta-tee-dee-dle-dum,' went the music.

"'Dear Sir: Your letter received, and in reply,' wrote the girls in record time.

"Miss Frances Perlstein, a teacher at the school, said she had discovered the new use for ragtime music by observing a pupil seated by a window from whence strains of a hand organ floated in. The pupil wrote much faster, Miss Perlstein declared, while the music was going than when it had stopped. This led to further experiments, and now it is proposed to put a phonograph in the school room."

To Make Talking Machines

The announcement of the Brunswick-Balke-Collander Co. that they are prepared to make talking machine cabinets for the trade, is a matter of unusual interest. The great plant at Dubuque has a capacity of 400 machine cabinets a day and the factory at Muskegon, Mich., can turn out 200 a day. The Dubuque plant is devoted entirely to the manufacture of talking machine cabinets. There are four one-story buildings over 800 feet long and over 100 feet wide, giving a total floor space of about 400,000 feet. This remarkable plant is literally a daylight factory, with saw-tooth roofs, and has a remarkable equipment of the latest modern machinery and equipment, including the latest type of varnish dry kilns, varnish spraying devices, etc. The plant and its grounds cover eighty acres and 5,000,000 feet of lumber are kept constantly on hand. The plant has its individual

The "Orotund" Sound-Box

Attention! Talking Machine Dealers, Jobbers & Mfrs.

The "Orotund" Sound-Box improves the tone of any talking machine. It positively reduces the scratching surface noise, as well as eliminates the hard, metallic, thin, nasal tones and produces mellow, rich, smooth music.

"Remember! The Sound-Box is the heart of the talking machine!"

The "Orotund" combination can be fitted to play any make of disc record on any disc talking machine, producing superior results to any other condition.

Samples to Dealers—No. 1 "Orotund" for playing lateral-cut records, nickel or gold finish $2.50

No. 2-V or 3-C "Orotund," with jewel points and elbow, complete for playing hill and dale cut records on the high-grade machines $3.50

IMPORTANT—Mention the make of record and machine on which you wish to use the outfit.

"Built by Tone Specialists"

SUCCESS in the talking machine field to-day must rest on one condition alone—*definite merit.* Talking machine principles are neither mysteries nor monopolies, but their successful application rests on *scientific understanding* backed by long experience in musical instrument *building.* These truths are positively exemplified in

The MAGNOLA

the talking machine produced under the auspices of the M. SCHULZ CO. who for a quarter-century have built highest grade pianos and player-pianos and whose record is unequalled for consistent high endeavor and acknowledged success.

The MAGNOLA represents no alleged new discoveries in acoustics or physics. It is the embodiment, rather, of principles tried and proven and its excellences rest on the *perfected* application of these principles.

The Wonderful Magnola Tone Reflector

secures absolute clearness of reproduction extending to every syllable of a song or speech, every note of every instrument in a band or orchestra. The MAGNOLA plays all disc records—lateral or hill and dale cut—with equal facility.

Case Designs—The illustrations on this page plainly show the fidelity to period and beauty of appearance of our case designs. The eminent designer whom we secured to draft the architectural features of our cases has fully lived up to his reputation.

Catalog and dealer proposition are yours for the asking. Get them from

electric plant. Nine hundred men are employed at the Dubuque plant alone.

Martin Nystrom, the superintendent of the talking machine cabinet and piano case department of the immense corporation, has been associated with it for eight years, and previous to that had many years' experience as superintendent for one of the leading piano factories during which he obtained a wide reputation as an artistic and original case designer.

W. J. Bristol Dies

W. J. Bristol, president of the Pathe-Pathephone Co., of Illinois, died April 15, after a short illness. Interment was at Rockford, Ill. The company will continue under the direction of the same interests as heretofore, R. E. Rundell continuing as sales manager.

Stewart Capacity Increasing

The factory output of the Stewart Phonograph Corporation is now mounting up to a tremendous figure and orders are being filled far more rapidly than ever before. The same remarkable commercial management that has built the Stewart-Warner business up to its high standing in the motoring world is making itself felt in the talking machine division of the Stewart interests. Work is now being carried on at a systematic high speed and wholesale orders, which hitherto have been obliged to wait quite a length of time before being filled, are now being taken care of in a very few days.

Six Best Sellers

The six best sellers in the Victor library this month were: "Wake Up, America" and "Are You Half the Man Your Mother Thought You'd Be"; "Luana Lou" and "Some Sort of Somebody"; "I Can Dance with Everybody But My Wife"; "Listen to the Mocking Bird," Gluck; "The Old Refrain," John McCormack, and "Kangaroo Hop Fox Trot" and "Merry Whirl One Step."

The six best Columbia sellers were as follows: Prologue from "Pagliacci," Louis Gravieure and Vision Fugitive, from "Herodiade," Louis Graveure; "Just You" and "A Little Love, a Little Kiss," Maggie Teyte; "When Cupid Calls" and "On the Shore at Le Lei Wi"; "Sweet Cider Time When You Were Mine" and "Give a Little Credit to Your Dad"; "So Long Letty" and "Cumberland" and "Ladder of Roses."

The six best sellers in the Pathé list for May were: "So Long Letty" and "Rackety Coo," from "Katinka"; "The Ladder of Roses," from "Hip, Hip, Hooray" and "Pretty Edelweiss," from "Alone at Last"; "I Hear You Calling Me" and "She's the Daughter of Mother Machree"; "You'll Always Be the Same Sweet Girl" and "Robin Adair"; "A Perfect Day" and "Underneath the Stars"; and "A Little Love, A Little Kiss" and "Kangaroo Hop."

The Edison six best sellers included, "Girl Who Smiles" and "Universal Fox Trot" "And the Great Big World Went 'Round and 'Round" and "When I Get Back to the U. S. A."; "Ai nostri monti," Il Trovatore; "Nightingale Song" and "Sleep and the Roses"; "Could the Dreams of a Dreamer Come True" and "Cohen at the Telephone."

Goodwin at Excelsior Springs

C. E. Goodwin, manager of the Phonograph Co., returned this week from a vacation spent at Excelsior Springs, Mo., where he enjoyed golf and other forms of "re-creation." While in Missouri. Mr. Goodwin took the opportunity to call on M. M. Blackman, head of the Edison jobbing interests in Kansas City.

Upon his return to Chicago Mr. Goodwin said: "I returned to find our April record showing a very nice increase over April of last year, and an especially large volume of sales on model C-250. This model is in Chippendale and one of the handsomest things we put out.

"We have re-engaged Marie Kaiser for 'tone test' demonstrations, beginning May 11." Madam Marie Rappold demonstrated the Edison in a tone re-creation concert held at the Women's Club in Evanston, recently. The affair was under the auspices of the North Shore Talking Machine Co. and was highly successful.

Hillman's Department Reorganized

The talking machine department of Hillman's department store has been reorganized and taken over by the National Talking Machine Sales Corporation. This concern is a large Boston syndicate, which operates between seventy and eighty talking machine departments in large stores throughout the country. The concern handles the Edison, Columbia and Victor lines, but as a rule only two lines in any one department.

Hillman's department has been placed in charge of G. G. Campbell, a man of wide experience in this line of work. He is assisted by Russell Hicks. Over 1,200 square feet have been placed at his disposal and nine large soundproof booths are being completed. The department, under Mr. Campbell's direction, will shortly institute some sale plans which will undoubtedly make it a big factor in the downtown talking machine trade.

BUY CHASE & WEST LICENSE

The Chicago Talking Machine Co., Purchases Stock and Good-Will of Victor Wholesale Business of Chase & West, Des Moines, Ia.—Will Work State Intensively

CHICAGO, May 4.—Announcement is made by the Chicago Talking Machine Co. of the purchase of the Victor jobbers' license of Chase & West, Des Moines, Ia., together with the entire wholesale stock and the good will of the business. Harry L. Woodward, who has been with Chase & West almost since the inception of the business, has gone with the Chicago Talking Machine Co. and will cover his old territory in Iowa and Illinois. Chase & West will continue as Victor retail dealers, will buy exclusively of the Chicago Talking Machine Co., and have written a strong letter to their former wholesale customers recommending them to deal with the purchasers and saying very fine things about the company's service. The deal was consummated the latter part of last month by Messrs. Dan Creed and R. J. Keith, of the Chicago Talking Machine Co., who spent practically a week in Des Moines for the purpose. Messrs. West and Linn, the proprietors of Chase & West, will greatly enlarge the retail Victor department and will add several new booths. C. N. Reindfleisch and W. O. Welker, who have traveled for Chase & West in the past, will be retained and added to the retail staff of that firm.

INCORPORATED

The Seaboard Sales Co., Cleveland, O., dealing in talking machines, has been incorporated with a capitalization of $25,000.

COLUMBIA REC

For Sum

YOU would prefer to read three definite words about record deliveries right now than forty pages about demand and prestige—even if Shakespeare wrote every line of it.

We know it, and here are those three words.

ORDERS FILLED PROMPTLY.

This is the first time in two years we could print those three words, and they look good to us.

Now please take time to read the rest of this before you begin telegraphing.

TAKE THIS PREDICTION AS DATING FROM ABOUT JUNE 5.

We wanted to make the announcement a month ago—everything looked safe and sure and every-

RD DELIVERIES

Demand

body was wanting to know. But we waited until we could discount every possible delay—and now you can go to it.

We had to turn things inside out to get this far, if you care to know. Extensions, amounting to several millions of dollars, have been made, and one entire modern factory building bought outright and turned over to record work, rather than wait for more new buildings to be completed.

This will be a fairly busy summer for Columbia dealers. You will be able to enjoy yourselves considerably better making deliveries than you have for quite some time explaining why you couldn't. Your understanding patience has been as much appreciated as your enthusiastic boosting.

Fine Cases For the Manufacturing Trade

One of the largest manufacturers of Pianos in the Middle West, operating a large plant that is known as a model factory, will consider contracts for the making of cases for talking machine manufacturers. Wide experience, unusual buying facilities (especially with reference to lumber and veneers) and unquestioned financial standing.

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

JUMP SPRINGS
(Continued)

There are many other causes for jump springs other than improper lubricating as outlined in my article in the April issue.

As an illustration I will select the Victor V Motor Type A. M., which has the triple spring cage in which two main springs are placed in a one-piece cage, the cage with gear being separate. The part numbers I use are those of the Victor Co. in their repair part catalog for this motor.

The spring hooks (3065) in the sleeve (1670 A) may have become forced or strained out of place to such an extent that they will bind on the spring cage shaft (3050 A) so that the springs will be prevented from unwinding freely—causing jumps. **Remedy**—File off backs of hooks with a round file.

The spring cage caps (No. 3011, No. 3012 A and No. 3048) when replaced by incompetent repairmen are very often bent inward by being hammered too hard; of course they will then press against the springs and prevent them uncoiling properly—the result is jump springs. In this particular type of motor it very often happens that the two inside caps (No. 3011-No. 3048) have become dished or bent so much that the edges of the two spring cages will touch and scrape against each other in revolving—another cause for jumps. **Remedy**—Use Victor Tool No. 1489 to replace the inside caps Nos. 3011 and 3048 and use a rawhide hammer for all the pounding necessary to replace the outside cap No. 3012 A.

The brass bushing (3026) in the barrel arbor bracket (3025) when jammed up tight against the cap (3012 A) forces the winding ratchet (3017 A) against the casting hanger and binds the entire cage—causing jumps. **Remedy**—Alway allow a little end play for the cage; be sure that this little brass bushing is not set in too close to cap.

If a new gear (3006) has been put on the single cage (3005) be sure that the heads of the gear rivets (3007) do not extend above bottom level of cage so that the spring in uncoiling will catch on them—causing jumps.

If these several points are carefully taken care of and the proper lubricant is used there is no reason why you should be troubled with jump springs in this type of motor.

A Special Word of Help to all Victor Dealers

Be sure and tighten up the 1024 screw in turntable spindle gears on all new machines which you unpack. They seem to have an inclination to persist in unscrewing themselves—allowing the gear to drop until it catches on teeth of spring cage—in many cases spoiling both gears on your first attempt to run the machine.

In my article for next month I will write a few lines on the causes of spring jumps in the motor of the present Victor Victrola 9 Type F, which seems to have been giving dealers some trouble of late.

"EDITOR, Talking Machine World:

"Dear Sir—The dealer from whom I purchased my Victrola advised me to write to you for your opinion about the way it runs. It makes a knocking noise while playing and will not play one 12-inch record through unless I rewind it. I have had this machine about two years but have never had it repaired."—J. O., Kingston, N. Y.

ANSWER.—Knocking noise is caused by lack of graphite in spring cages. If machine has a double or triple spring motor the cause of its not playing a full record is no doubt because one spring is broken. Motor should be thoroughly cleaned and graphited at least once a year. Advise sending same to your nearest dealer."—A. H. Dodin.

"EDITOR, Talking Machine World:

"Dear Sir—I have recently repaired several Columbia motors, single spring type, and in two of them have replaced broken springs but cannot make them play a 12-inch record. What is the cause of this? Both new springs that I used were of Columbia make."—D. K.

ANSWER.—Columbia springs are made in different lengths. It is very important that you always replace with the same length spring. They are always stamped on one end with a number. Put in a new spring of the same number and you should have no trouble.—A. H. D.

"EDITOR, Talking Machine World:

"Dear Sir—Can you tell me if the shape of the governor ball makes any difference in the running of a motor?"—M. B., Newark, N. J.

ANSWER.—No difference—it being understood

that all the balls on governor are the same size, weight and shape. The shape of the ball in some cases will depend upon the amount of space you have in which to place governor, in relation to the casting, and should be determined at the time of designing the motor.—A. H. Dodin.

A VISITOR FROM SWITZERLAND

Frederic Hermann Thorens, a member of the firm of Hermann Thorens, Ste. Croix, Switzerland, arrived in New York last week for a short visit. Mr. Thorens will visit the firm's patrons in this country, and acquire an intimate knowledge of conditions on this side of the Atlantic. Hermann Thorens manufactures parts of talking machines, the most important item of its business being the production of talking machine motors.

The Hannah Drug Store, at Mangum, Okla., has taken on a full line of Victor Victrolas and records. Several sales have been made.

CHICAGO BRANCH FOR OPERAPHONE

Record Manufacturers Open Offices in the Insurance Building, That City

The Operaphone Manufacturing Corp., manufacturers of the Operaphone records, with headquarters at 300 Fifth avenue, New York, has opened a branch in the Insurance Building, Chicago, Ill., for the purpose of taking care of the Western trade. H. H. Brunt and D. W. Harris will be in charge of the Western office.

The Operaphone Corp. has also opened a downtown branch at 102 Chambers street, under the management of H. F. Thornell.

SECURE THE VICTOR AGENCY

Watkins Bros., Bristol, Conn., have secured the local agency for the Victor talking machines and records, having bought the stock of Quality Bassett, who will confine his efforts in future to the Edison line.

GRAFONOLAS ON SPECIAL TRAIN

Three Columbia Machines Find Place on Exhibit Train Sent Out by Government

WASHINGTON, D. C., May 9.—When the special twelve-car train of educational exhibits on preparedness, operated by the Government, left this city recently for a tour of the country, three large Columbia Grafonolas and a liberal supply of records were to be found in one of the cars, for the purpose of providing entertainment and attracting attention to the exhibit. When the President and Mrs. Wilson visited the train before it left they were greeted with an impromptu concert on the Grafonola, with "Hail to the Chief" as a feature.

AN EPOCH—
Revealing A New Era Musical!

AT LAST—
Re-Creation, Not Reproduction!

THE GOLDEN TONE—

Noiseless and Everlasting!

NEEDLE that will play any and every record!

A needle Supreme for All machines!

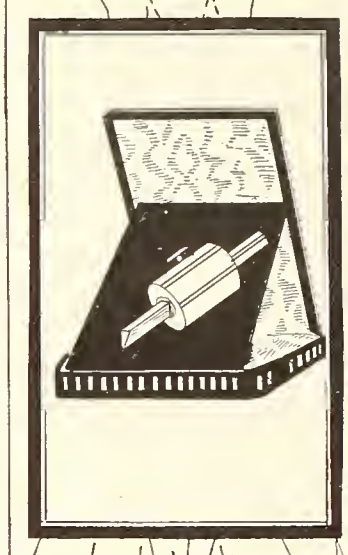
A needle that means the absolute abolition of all harsh, scratchy, screechy tones, to say nothing of the annoyance caused by the troublesome necessity of changing points. A needle with which you are able to hear REAL MUSIC, such as has never before been produced by any machine in the world.

A needle paramount in every particular scheme of reproduction in that it is adaptable in fulfilling every possible requirement. Like the chameleon it becomes instantly acclimated to the color scheme—to the touch and tone of any melody or musical maneuver.

A needle that **Re-Creates!**

And it never wears out!

And it is sold under just that guarantee and certificate of warranty.



THE ACID TEST—

The Proof of Supremacy!

YOU can adjust the **Supreme Golden Tone Needle** at any time, graduating it from the softest, sweetest and most mellow tone to the full volume of a brass band.

This tone shading possibility permits of effects never before thought of, projects sound pictures never before conceived and transmits all tones unadulterated, unblemished and true to nature.

It is distinctive and remarkable.

It transplants you to another sphere—another world, wherein all things are melodiously beautiful and rapturously perfect. You marvel and are enchanted.

It makes you live the music!

And who knows best your desires, wishes, whims and fancies?

The Golden Tone opens the way to perfect Re-creation of symphonies and other pretentious forms of music, which could never even be attempted with reproducing points known in the past.

DEALERS!

The most remarkable proposition ever offered you is the exclusive sales rights in your territory on this heaven-sent invention. Write Quick—Wire Now!

THE SUPREME GOLDEN TONE NEEDLE

$5.00 Retail

A Musical Miracle!

DEALERS!

This sensational little instrument needs little or no sales talk. It sells itself—for the proof is in the hearing. And it plays Any Record—Any Machine!

THE Supreme Golden Tone Needle is a scientific miracle. It does not "ride" but **Simply Floats Over The Record Without Wear**—with effects so exquisite that once you have played it, you will never again be satisfied with any other needle.

Address all communications to the

Supreme Sales Co.
207 So. Wabash Ave.

ITS beautiful, faultless tone—so natural and life-like that it absorbs you—and its ability to adapt the renditions of all artists, all melodies, all everything to acoustic conditions of any room or area makes it Supreme in the field of reproduction.

BIG TRADE BODY IN PITTSBURGH

Talking Machine Men Interested in Central Mercantile Council, Organized to Eliminate Trade Abuses, Etc.—Supporting the Price Maintenance Measures—Trade Active

PITTSBURGH, PA., May 8.—The talking machine dealers of this city have come forward with other business men's associations to form a central trade body which promises to be one of the most effective and far-reaching of its kind ever attempted here. A meeting was held recently and a temporary organization was formed under the name of the Central Mercantile Council of Pittsburgh. Among the organizations represented were the Talking Machine Dealers' Association of Pittsburgh, the Pittsburgh Credit Men's Association, the Retailers' Board of the Chamber of Commerce, and some fifteen others. The purpose of the new trade body will be to take up trade abuses, to obtain favorable legislation, local, State and national, and to remedy any troubles now exsting in the various lines of business. A resolution was adopted assuring the Chamber of Commerce of the organization's support of the Ashurst-Stevens bill in Congress. The official purposes of the body are to be defined by a committee appointed with instructions to report to the different trade bodies which are represented. L. Friedl, local manager of the Columbia Graphophone Co., was appointed on the committee, to which is also entrusted the task of forming a permanent council.

The Victrola department of the W. F. Frederick Piano Co. is doing a fairly satisfactory volume of business, Manager George Hards reports. This department is pushing the record end of its business in a very aggressive manner, and the result has been a nice gain each month. One of the large windows of the Frederick store has been given over to a unique exhibit, consisting of an attractive arrangement of machines and large reproductions of records, measuring five feet in diameter. This display is one of the most striking featured here in some time.

French Nestor, manager of the wholesale department, and George Hards, manager of the retail department of the W. F. Frederick store, left on May 9 for a visit to the Victor factory and to a number of dealers and jobbers in New York City. They will remain away about a week.

The Talking Machine Shop, in the Jenkins' Arcade Building, has furnished the latest Edison Diamond Disc phonograph to the William Penn Theatre, Northside, Pittsburgh, one of the finest motion picture houses in the city. This instrument is being used in connection with momentous photo dramas, and has proven a decided success. Special records, in keeping with the action of the plays, have been supplied, thus adapting the music to the needs of the pictures in an unusually successful manner.

Manager C. Fred Newman, of the Boggs & Buhl Victrola department, reports a marked increase in business over April a year ago, and states that a steady gain is shown in both instrument and record sales. The annual "remnant sale" of Boggs & Buhl is stimulating trade in the talking machine section this week by bringing into the store an extraordinarily large number of patrons. Several new salespeople have been taken on recently.

A recent event of note was the marriage of Emil Hadd, manager of the McCreery & Co. Victrola department, to Miss Hazel Dunn, formerly associated with the talking machine section of the Schroeder Piano Co. and the McCreery department. Mr. and Mrs. Hadd have been made the recipients of the best wishes of their many friends in the trade.

May, Stern & Co., the prominent local furniture house, has opened a Columbia talking machine section in their handsome new store at 914-920 Penn avenue, Pittsburgh. An entire floor is devoted to the new department, five handsome parlors having been installed.

The Talking Machine Dealers' Association held a business session on Monday evening, May 8, which was well attended by the trade. Discussion of the question of sending records on approval was continued from the previous meeting. Among other matters brought up was the plans for the annual outing of the association, to be held in July. Several new members were taken into the organization.

The Victor Electrical Equipment Co.,
248 Boyleton St.,
Boston, Mass.
Attention of Mr. Davis.

Dear Sirs:

For the past two weeks you have been demonstrating in our Boyleton Street windows the Veeco motor, which is used for the operation of victrola and other talking machines electrically.

Our investigation of this device, made during the period of the demonstration, has proved to us that it is mechanically an excellent product and is commercially valuable. We, therefore, would like to make arrangements with you to carry this motor as a part of our regular merchandising selling plan and will request you to see Mr. C. H. Crockett, our Purchasing Agent, as soon as possible in order to make a suitable arrangement for its sale in our nineteen different offices.

This is the only electric talking machine motor which we have yet seen that has been demonstrated to us as being both mechanically and commercially successful.

Please give this matter your immediate attention in order that the sale may start as soon as possible.

Yours very truly,

Supt. Appliance Department

Progress

The buying public is quick to appreciate improvement in any f of endeavor and anxious to be benefited thereby. This is the rea for the sudden growth of distribution and popularity of the Patheph and Pathé Discs. The nation wide recognition of these improveme has been capitalized upon by many business men who have been sighted enough to appreciate the remunerative possibilities in sel Pathephone and Pathé Discs.

The famous Pathephone and Pathé Discs are the most rema able phonograph developments since the original phonograph it They command a new respect for phonographic music. One of most remarkable features of the Pathephone is its departure fr the use of the sharp metal needle. On the Pathephone, there ***no needles to change*** when playing Pathé Discs.

Pathé Sapphire Ball

The highly polished Sapphire Ball which is used to reproc Pathé music, cannot dig nor wear the disc and after being pla over a thousand times, there is no wear that can be noticed e with the use of the microscope. The polished round ball and semi-circular groove in which it travels, are two of the secret ***really natural*** sound reproduction.

The source of the music is at the ball, from which it is carried to resonant all-wood tone chamber. The Pathé Sapphire Ball and wood tone chamber are likened to the violin. The ball reproduces music and the Pathé tone chamber or sounding board amplifies strengthens it just as the violin string produces the music and the v wood tone chamber increases and amplifies its tone.

The Pathé Tone Control allows a perfect adjustment of ***vol*** according to the will or mood of the player.

Pathé Discs

Pathé Discs are recorded in every musical centre in the world by ists of international and American fame—such artists as Ruffo, ıratore, Cavalieri, Fitzui, De Cisneros, Slezak, Weil, Ober, Urlus, rvis, Boninsegna, Koralek, Giorgini, Constantino, Lauder, Sammarco. e enormous Pathé Disc repertoire is kept strictly up to date. Nothing spared in the construction of these records to make them the most rable, and at the same time, the truest to the artists' original rendi-ns. They are most practical because they never lose their musical e qualities—they *never* wear out. They are the largest discs made. e large disc makes possible long sound waves. Long sound waves e truer music. Prices 65c to $4.00. All double-faced, including eratic selections.

Pathephone cabinets are all artistically and conservatively designed, nished in all of the popular finishes. Prices $15 to $225. Pathephones $25 and up are *equipped to play all makes of disc records per-tly.*

Pathé Dealers

Many successful music dealers are selling the Pathephone and Pathé scs, both of which are proving a source of steady income. In a very ort length of time, Pathé service and co-operation have helped to velop small agencies into big Pathé distributors:

The Pathephone is a winner because it requires but little more than monstration to sell it. Its wonderful tone and many other merits instantly appreciated by the prospective buyer. You should lose no ne in writing to learn more about the Valuable Pathé Franchise that aits live dealers.

Write to-day and let us tell you more about the famous Pathephone d life-like Pathé Discs.

ONOGRAPH CO.
CT, NEW YORK

NEW MANAGER FOR EDISON WORKS

C. E. Fairbanks, a Man of Wide Experience, Takes Important Post on May 1—Tells of First Experience with the Phonograph

C. E. Fairbanks, formerly works manager for the Gilbert & Barker Manufacturing Co., of Springfield, Mass., assumed a similar position with the Thomas A. Edison phonograph works on May 1, where he will have under his direct supervision over 3,500 employes.

While in Springfield, Mr. Fairbanks was president of the Executive Club and vice-president of the Aero Club, of that city, and became widely known through those connections. He leaves a host of friends in Springfield who have

C. E. Fairbanks

extended him best wishes for success in his new position.

In reference to his connection with Thomas A. Edison, Inc., Mr. Fairbanks had the following to say:

"My coming to the Edison phonograph works is somewhat accidental in itself, and yet I cannot help but go back to a winter's night thirty-one years ago. At that time I was living on a farm. Through the weekly newspapers and the talk of my elders I had heard of the wonderful talking machine. There was some division of opinion as to whether it was newspaper talk or in reality would do what was claimed for it, namely, talk. The opportunity to verify the statements came to me when an exhibitor brought one of these machines to a near-by town. I went on horseback with others to hear it. We each paid 50 cents for the privilege. Everyone was, of course, impressed with the marvelous fact that this piece of mechanism had a human voice. I stayed after the crowd left and helped pack it up, so that I might get a near view of it. Of course it was wonderful that such a machine could have been invented, but only a superman could do that. He was not of the earth, earthy; he somehow belonged, in my opinion, at least, above in the clouds. I was more interested in the mechanism—the various parts that some man had fashioned and put together, so that it might have a soul, and that night I determined to 'make things,' and now thirty-one years afterward, I find myself in this bee-hive of 'making things' under the leadership of this superman who gave a soul to a machine. Others may have chained the lightning, and made steam and other forces our obedient servants, but only a superman could devise a means for catching and preserving forever and sending out again, that intangible individualistic expression of the soul—the human voice, and to-day the phonograph is even more wonderful than it was thirty-one years ago. Now it has not only a soul, but an educated one. It is easy to catch the spirit which prevails here, and our slogan will be 'quality first.'"

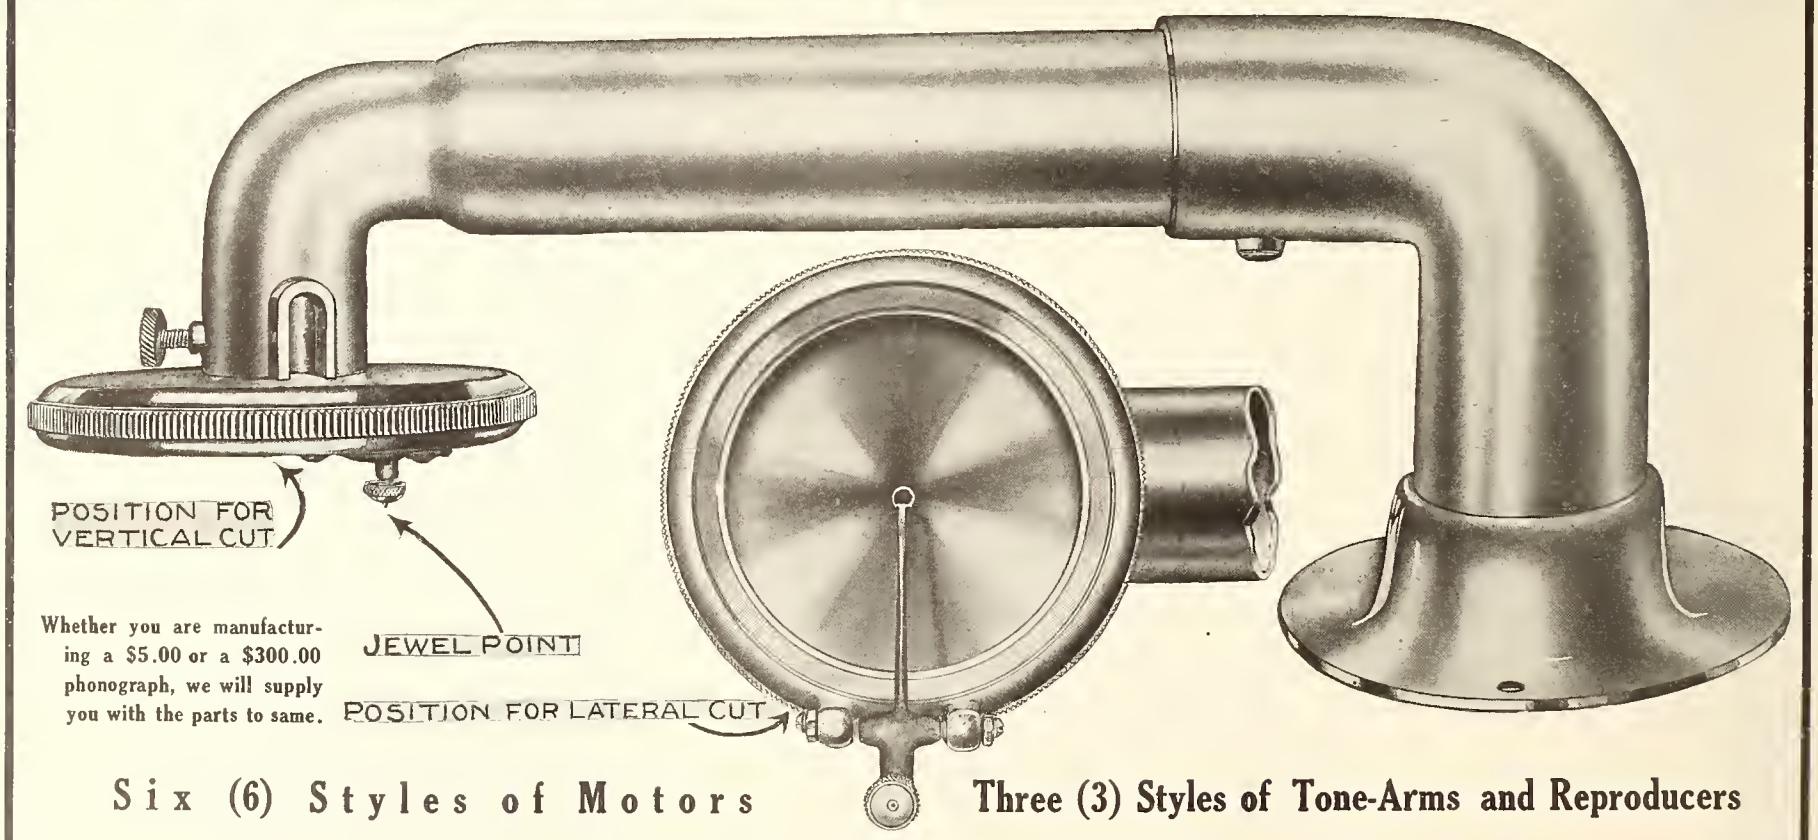
FORMAL OPENING IN LANCASTER, PA.

Lancaster, Pa., May 9.—One of the interesting musical events in this city recently was the formal opening of the new store of the Home Music Co., at 9 North Queen street, which was spread over two days, Saturday and yesterday, and attracted much attention.

The new company handles the Columbia Grafonolas and records exclusively, and the store is elaborately equipped and handsomely fitted up to take care of trade of the better sort. In connection with the formal opening the Home Music Co. carried artistic full page advertisements in the daily papers.

W. F. Duffold & Co. are conducting a handsome talking machine store at 318-320 East Washington street, New Castle, Pa., handling a complete line of Columbia machines and records.



Whether you are manufacturing a $5.00 or a $300.00 phonograph, we will supply you with the parts to same.

"SUPREME" SONORA INTRODUCED

Recital Held on Tuesday Afternoon, April 25, to Demonstrate $1,000 Instrument

The formal introduction of the new "Supreme" Sonora phonograph which sells at $1,000, took place at the Sonora Salons, 668 Fifth avenue, New York, on Tuesday afternoon, April 25, before a most select audience.

Miss Queenie Smith Dancing to Music of Supreme Sonora

In sending out the invitations to the demonstration, George E. Brightson, president of the Sonora Phonograph Corp., declared that the newest instrument would prove a revelation to those who heard it for the first time and before the conclusion of the program, those who attended agreed with him.

One of the particularly interesting features of the program was the exhibition of dancing given by Miss Queenie Smith, premier dancer of the Metropolitan Opera House Ballet School, to the accompaniment of music from the "Supreme" Sonora. Refreshments were served to the audience during the intermission. At the end of the Salon, a stage specially arranged with reference to its acoustic properties was set up, whereon the Sonora was placed. The novel arrangement and stage setting can be seen in the photograph shown herewith. The setting was simple, but very artistic, and won favorable comment.

ENTER TALKING MACHINE FIELD

The Franz Bruckner Mfg. Co., 105 East Twenty-ninth street, New York, which is well known in the musical instrument industry as a violin manufacturer of many years experience, has entered the talking machine field, and is manufacturing a line comprising four machines. At the present time, the company is specializing on the sale of a $15 model, known as the "Conqueror."

ENTER TALKING MACHINE FIELD

New Talking Machines Produced Under Auspices of M. Schulz Co. Officers Show Variety in Case Designs and Some New Features

CHICAGO, ILL., May 8.—The new talking machines of the Magnola Talking Machine Co., a corporation officered by the principals of the M. Schulz Co., one of the large piano manufacturing concerns in the country, are now on exhibition at the company's general offices and wholesale warerooms at 711 Milwaukee avenue, this city. The case designs and cabinet work are excellent, as twenty-five years' experience in piano case production can not but have its effect on a product of this nature. While there will probably be other models introduced later, those at present ready for announcement include styles ranging from $75 to $200 in retail price—all cabinet machines. There's one in the Sheraton style, another in the Queen Anne, an Adam design and a beautiful Louis XVI. retails for $150. It is furnished in either mahogany, oak or burled walnut.

There are a number of special features about these machines, but one on which the company puts particular stress is the "tone reflector," built in accordance with science of sound board construction. All types of Magnolas are equipped for playing both lateral cut and hill and dale records.

REPORTS GROWING DEMAND

The Fraad Junior Proving a Live Feature of the Fraad Talking Machine Co.'s Line—Lease Two Additional Floors on Broadway

The Fraad Talking Machine Co., 1160 Broadway, New York, reports that there is a steady increase in the demand for various machines manufactured by that company particularly the Fraad Junior, the small sized full cabinet machine introduced recently.

The Fraad Co. in order to handle the business properly has made arrangements to take over the two upper floors of the Broadway address, where at the present time they occupy the store and basement. The extra space will be used for the storage and assembling of machines. Daniel Fraad, president of the company, is now giving his full personal attention to the business with excellent results.

Recently a fire in the basement of the Fraad store threatened for a time to wipe out a large part of the stock on hand, but by quick work the flames were confined to one section of the basement and the loss limited to a few hundred dollars.

INCREASE INSTRUCTING STAFF

The mechanical instructing staff maintained by Thomas A. Edison, Inc., for the benefit of Edison dealers has been increased by the addition of two new instructors. George A. Cummings has been assigned to territory on the Coast, and E. E. Bedford will care for the dealers in the Atlanta zone. Both are skilled phonograph mechanics, and their work will be very advantageous to dealers who appreciate the importance of understanding how to handle the mechanical difficulties that arise in their business.

The members of the staff of the Edison mechanical instructors are now distributed as follows: Edward Trautwein, Bangor, Boston, New Haven, Albany and Syracuse zones; J. E. Knipper, New York, Philadelphia, Williamsport and Richmond zones; James Finlayson, Cleveland, Cincinnati, Detroit, Indianapolis and Pittsburgh zones; E. B. Bedford, Atlanta zone; A. E. Schiller, Chicago, Milwaukee, Minneapolis, Des Moines and Sioux City zones; D. Lawson, St. Louis, Kansas City, Omaha, Denver, Ogden and Helena zones; Joseph McCloskey, New Orleans, Dallas and El Paso zones; George A. Cummings, Los Angeles, San Francisco, Portland, Seattle and Spokane zones.

Keeping Pace With the Times

Requires alertness and an occasional jump. Both are necessary in the long run for success.

Lack of alertness on the part of the Distributor, sometimes causes the Dealer to fall behind.

Have you been able to hold the pace? If not, now is the time for you to jump.

The going has never been so hard or the pace so fast as during the past year. Notwithstanding this fact, our dealers have been able to keep abreast of it.

There must be a reason. There is, and a good one.

We are always on the alert

Blackman Talking Machine Co.
97 Chambers St Near Church St. New York

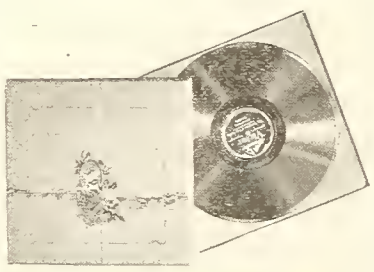
FOR XMAS. VICTOR BUSINESS

Along with the widespread Victor activity comes an interesting new enterprise in the nature of a specially designed wrap for paper boxes in which records for Christmas trade are sold. Holly-decorated boxes for this purpose have already been used, but the special wrap, showing the design reproduced herewith, will interest enterprising dealers, particularly as it is said that they have official approval. These novel box-wraps are manufactured by Augur, Swyers & Machold, Printing Arts Building, New York City, and sold either direct to the dealer or to the box-maker.



Artistic Christmas Box

The Pettit Jewelry Store, of Downs, Kans., has added the Pathé Pathephone to its stock.

Just Received

VICTOR CO. ANNOUNCES 10% WAGE INCREASE

All Factory Employes of the Company, with Exception of Executives, to Participate in Increase —Generous Action Entirely Voluntary on Part of the Company

CAMDEN, N. J., May 12.—Not so very long ago the Victor Talking Machine Co. voluntarily put into effect a new working schedule which served to reduce the hours of the employes without change in the wage scale. This act resulted in an increase of considerably over a million dollars annually in the payroll of the company. Hardly had the favorable comments over this generous action of the Victor Co. died down, however, than there was issued, under date of May 11, a notice of a general 10 per cent. increase in the wages of all factory employes, with the exception of certain executives, and which became effective on May 8. The increase was an entirely voluntary act on the part of the Victor Co., and was made without solicitation. It simply reflects, to a marked degree, the spirit with which the Victor Co. has always dealt with its employes and the success of which is indicated by the loyalty of those employed by the company and the practical absence of the usual labor troubles that frequently bother large manufacturers. The notice sent out by the company, and which explains in detail the reasons for the increase, is as follows:

NOTICE

After a thorough and lengthy consideration of the subject the Victor Co. has found it practicable to decide upon an increase of 10 per cent. in wage rates of all factory employes except in the offices, the superintendents, foremen and straight time employes.

Change effective May 8, 1916.

This increase is made possible by the increase in demand for Victor goods and the splendid response to the company's appeal for efficient co-operation by its employes upon the occasion of the recent change to an eight-hour day. It must be borne in mind, nowever, that the Victor Co.'s products are not among the commodities that rise in retail price when the cost of manufacturing increases. Owing to the general increase in the cost of materials, the cost of manufacturing has been greatly increased durthe past year, but the company does not receive any more money for its goods.

VICTOR TALKING MACHINE CO.

RIGHT TO TRADE MARK ABSOLUTE

B. V. D. Co. Wins Friendly Suit Over Label—Judge Hand Decides Issue Placed Before Him by Agreement with New York Merchandise Co.—Decides Advertisements of Other Goods Must Not Refer to Branded Article

Judge Learned Hand, in the United States District Court, last week handed down a decree that the use of the "B. V. D." label in any manner in advertising other merchandise of a similar character was contrary to the rights in the trade-mark of the B. V. D. Co., a decision of interest to the talking machine trade.

The decree was made after a hearing in the Federal Court Building on April 28, on a motion by Briensen & Schrenk, solicitors for the complainant New York Merchandise Co., composed of Philip Waslansky, Victor Price and Joseph Hattenbach. The case was placed before Judge Hand for final adjudication by the mutual consent of both companies, and without the formalities of a court procedure.

It was stated at the hearing that the New York Merchandise Co. had advertised its goods in catalogs, placards and other mediums as being similar to the B. V. D. article, of having the same style as the B. V. D. Complaint against this practice was made by the B. V. D. Co. and the matter was carried before the court.

Judge Hand said: "The B. V. D. Co. is the sole and exclusive owner of the trade mark 'B. V. D.' and as owner thereof it is entitled to be protected against the use by others of expressions such 'B. V. D. Styles,' or 'Same Style as B. V. D.' or other like or similar expressions when used in catalogs, announcements, advertisements or placards in referring to underwear bearing other labels than 'B. V. D.'

"The defendants having heretofore issued a catalog in the name of the New York Merchandise Co., in which underwear not bearing the B. V. D. label and not made by the B. V. D. Co. was offered for sale as 'Men's Crossbar Nainsook Drawers: same style as 'B. V. D.,' two dozen of a size in a box. Special,' shall not hereafter issue any other or further catalogs or circulars containing said expression, 'Same style as B. V. D.,' or any similar expression.

"Further decreed that the defendants notify every person or concern to whom said catalogs have heretofore been sent or issued to the effect that the phrase 'Same style as B. V. D.' is withdrawn with respect to the men's crossbar nainsook drawers offered on page thirty-three of the original catalog, and that dealers having heretofore purchased such merchandise are cautioned not to use the trade-mark 'B. V. D.,' either alone or in such phrases as 'B. V. D. style,' 'Same style as B. V. D.,' or similar expressions as representing merchandise purchased from the New York Merchandise Co."

Philip Waslansky said this week that the adjudication made by Judge Hand was a result of a friendly suit agreed to by both companies in an effort to settle the controversy without recourse to litigation. The company would withdraw its advertisements of such nature and would notify its customers of the change, he said.

EDISON PUBLICITY IN THE HERALD

The New York Herald in its anniversary number, published May 7, contained a full page devoted to Thomas A. Edison and the many products which his factories in West Orange are producing. A full history of the experiments necessary to perfect the Edison Diamond Disc phonograph was given, besides a general description of the phonograph and its ability to re-create music. Other Edison products such as the Edison dictating machine, and Edison motion pictures, were described.

OPEN VICTOR DEPARTMENT

ENCOURAGING TRADE.

Methods of the Australian Commission Prove Satisfactory

Trade commissions for junketing purposes are largely things of the past. The dominating idea now is to put into the field men who know how to study markets and bring or send back home knowledge that may be of direct value to those interested. One of the most satisfactory efforts made by foreign countries to develop trade with the United States has come about through the Government of New South Wales, Australia. A special commissioner was first sent to America some twenty years ago. Following this a trade commission was appointed and an office established in San Francisco. The past two years have proved to be so satisfactory, as demonstrated by the San Francisco office, that the Government has given that office authority to establish branches in any of the States of this country or Canada in which they deem it wise to do so. The work of these offices is described as follows:

1. To generally supply information about all matters regarding Australia.

2. To do whatever seems advisable in the direction of securing sale for Australian products in this country.

3. To put American business men in touch with Australian business men so that mutually beneficial trading may be brought about.

The cost of the San Francisco office and the New York branch is about £7,000 a year, but the trade results have been so far in excess of the cost that the policy of the Government is to extend the commission's operations.

ELECTRIC BULBS FOR NEEDLES

An ingenious substitute for a talking machine needle was discovered recently by some sailors in the United States Naval Station at Guantanamo Bay, Cuba. A group of the seamen had ordered a machine from the United States, but when it arrived, found that no needles had been sent with it. They were bemoaning their inability to play the records which came with the machine when a sailor appeared carrying a number of electric light bulbs. Out of curiosity he started the machine and pressed the tip of one of the bulbs against the record. The record began to play very distinctly and the machine was operated for several days in this manner, until some needles were secured. What happened to the records after they had been subjected to this "electric light" form of playing is not stated. Necessity has been the mother of some strange children, but it is doubtful if tungsten bulbs will ever successfully rival Tungs-tone needles!

UNUSUAL ACTIVITY IN CLEVELAND

Electric Grafonolas in Great Demand—Prospects for Summer Business Very Good—Mme. Rappold Gives Edison Diamond Disc Tone-Test—Other News of the Month

CLEVELAND, OHIO, May 8.—The unusual activity prevalent in the talking machine industry in this city has not waned during the past month; in fact, from the various reports there are many methods used to keep the industry alive. Many industries have voted a wage increase to their employes and the city is in a very prosperous condition.

Many dealers and jobbers report a shortage in goods and, in view of the fact that many dealers are already placing orders, the jobbers are very optimistic.

The Grafonola department of the Wm. Taylor & Sons Co. enjoyed another excellent month's business during April, and Manager T. A. Davies says that there was an enormous increase over the same month last year.

Manager G. E. Norton, of the Grafonola department of the G. M. Ott Piano Mfg Co., says that the electric Grafonolas have been in great demand during the past month. He says that he expects a heavy summer business.

The Columbia Graphophone Co., under Manager Madson, had the second largest month's business in the history of the company. Many merchants have already placed their fall orders and but for the shortage in goods a most phenomenal business would have been consummated. Manager Madson in his short history with the Columbia Graphophone Co., of this city, has built the business until it is in the front rank. The Home Furniture Co., of Toledo, is about to open a new Grafonola department and H. R. Goldy, formerly with the Columbia Graphophone Co., will be in active charge.

H. Fraiberg, the prosperous Columbia dealer, has opened a new store in the east end.

The Phonograph Co., of this city, Edison Diamond Disc distributor, reports a very good month's business. Many tone tests have been given recently, the most prominent being by Mme. Marie Rappold, Metropolitan Opera star, at Columbus May 3.

During the past month four special mechanics, of the White Auto Co., of this city, purchased Style C 250 Edison Diamond Disc phonographs from the Phonograph Co.

The Starr Piano Co. is building a new phonograph factory in Richmond, Ind., a beautiful structure 255 feet long and 55 feet wide and six stories high.

The Collister & Sayle Co., of this city, Victor distributor, reports business very good, although there has been a marked shortage in goods. Manager H. A. Dorn says that the record business is exceptionally good.

The Eclipse Musical Co., extensive Victor distributor, reports an enormous increase over the same month last year. General Manager C. K. Bennett took a business trip to Akron, and E. B. Lyons attended to important business in Toledo and Detroit. All the dealers throughout the territory report satisfaction with the excellent service extended them.

The Hueter Jewelry Co., Victor dealer, is planning to increase the space for the Victrola business. Manager Hueter says that he anticipates increased business and since he believes in "preparedness" will be ready for the increasing demands.

"Music for Everybody"

Operaphone Records

The only popular priced records on the market.
Retail at 35 cents.
Are 8 inches in diameter.
Are double sided.
Play only with a *tapering* or *Operatone steel needle.*
Have more music than the 10 inch records of other makes.
These records are made by what is known as the "Vertical" or "Up-down" cut, and are especially designed to be played on vertical cut record playing machines.
Play on all lateral cut record machines with a small attachment required to change position of reproducer; attachments are simple to use and inexpensive.
Our catalogue is up to date; has 72 numbers, 144 different selections.
Twelve new numbers, 24 selections, are added each month.
The records are of unusual quality; and merit attention from a musical and artistic standpoint.
The songs are by popular and well-known artists.
The records are the product of our own laboratory and factory. Dealers: Write for full particulars and catalogue and latest list.

Operaphone Manufacturing Corporation
Office: Fifth Avenue Building, Madison Square, New York

SOME HISTORIC RECORDS

Are Those Made by Edwin Booth Now the Property of His Son-in-Law

Ignatius Grossman, the son-in-law of Edwin Booth, has in his possession one of the most valuable sets of phonographic records in the world, for they contain the voice of the great actor himself. Not very long before his death Booth recorded Hamlet's soliloquy, one of Iago's great speeches, and Richelieu's famous "Curse of Rome."

An endeavor was made by an official of Thos. A. Edison, Inc., to induce Mr. Grossman to take the records out of the storage warehouse in which they are carefully preserved, and to play them in his presence. The object of the experiment was to determine whether or not these original records could be used to make new reproductions—whether the voice could be transferred to the regular master records. But it was found that the voice, though wonderfully clear and distinct was too faint for recording purposes. There was, however, the same magnificent quality which has made countless numbers sit breathless and spellbound until the last echo had rolled away. What a wonderful thing it would have been if the public could once more have heard perhaps the greatest Hamlet of them all moralize upon the evils of inaction, the villainous Iago uttering his poisonous sentences and the great Cardinal defying the mandates of his king.

THE UNITED TALKING MACHINE CO.

The Secretary of State at Trenton, N. J., issued a certificate of incorporation to the United Talking Machine Co., of Newark, on May 6. The capitalization of the concern, which will manufacture and deal in talking machines, is $125,000. The incorporators are W. L. Glorieux, T. Frederick Crane, Leopold Singer and Irvington and Andrew Martin, of Newark.

VICTOR CO ISSUES ANNUAL REPORT

CAMDEN, N. J., May 1.—According to the annual report of President Johnson, made public at the recent annual meeting of the Victor Talking Machine Co., the undivided profits of that concern for the year ending December 31, 1915, amounted to $14,605,483, an increase of $4,713,045 over the undivided profits for the previous year. This increase is almost equal to the capitalization of the concern, which is approximately $5,000,000.

MELOPHONE CO. LEASES LOFT

The Melophone Talking Machine Co. leased a loft at 380 Lafayette street, this city, from the L. J. Carpenter Co., for a term of years, the deal being closed last Saturday.

Trade An
Extrao

A Remarkable Triumph In Talking Machine Production

There's something new just starting in the talking machine business and it's so big that everybody—both old and new in the trade—will sit up and rub their eyes.

Next month—June, 1916,—The Domestic Talking Machine Corporation will put out a brand new line of talking machines. This line is not only new, but it is distinctly ***different*** from anything heretofore shown.

We are making this announcement to the trade so that live dealers will be advised what's what when they see our big consumer advertising which has already been placed with several big national magazines.

A Different Sound-Box

The sound box of the Domestic is nothing less than a talking machine triumph. Made in our own plant, under our own patents, the **Mozart,** we believe, reproduces clearer and more musically than any other, absolutely irrespective of price.

The Wonderful Motor

The domestic will be equipped with the Silent-Service Motor, a masterpiece of our own design and construction. It operates quietly, evenly and with the smoothness of a fine watch.

Large ALL WOOD Cabinets

The cabinets will be made entirely of wood, inside and out—sound chambers and all.

There is no tin, steel, cast iron, or other metal employed in the Domestic Cabinet to rattle or rasp.

Strictly High-Class Finish

There is nothing cheap or ordinary-looking about the Domestic. High polished selected oak or mahogany, to harmonize with the finest furniture, heavy nickeled trimmings, every detail perfect throughout.

6 Reasons for the Assured Success of This Unbeatable Line

1. The men back of the Domestic are men who are known by their accomplishments and who are experienced talking machine people. They know the business absolutely.

2. The Domestic plant is strictly modern in all departments. Ideal conditions prevail where workmen are encouraged to do their utmost.

3. **Everything entering into the Domestic is manufactured complete in our own plant (except woodwork which can be obtained more advantageously from specialists in this line.)**

4. The Domestic plant is equipped with the most modern machinery, tools and dies that money can buy, much of it having been designed exclusively for the production of the Domestic.

5. The Domestic plans and equipment contemplate the largest output yet attempted in the low-priced field.

6. The Domestic merchandising methods are so perfected that everybody in any way associated with our product is assured of close co-operation, big returns and an absolutely square deal.

Domestic
TALKING MACHINE

ouncement
dinary!

The Low Prices and Great Values of the Domestic Will Startle Everybody

The biggest surprise of the year will be the retail prices of the Domestic line. They play and look, even down to the minutest detail, like machines costing 150% to 300% more. Nothing so attractive has ever been offered, and unless there is a manufacturing revolution, it will never be surpassed. And the consumer will not get it all either. The profit will come quickly and easily and will be such as to make it more than a winning line for any live dealer.

Music lovers who have expensive machines will take a Domestic down to camp with them this summer.

People who can't afford a luxury-priced machine and who wouldn't have a *toy* will buy a Domestic on sight and sound.

Everyone who hears the Domestic side by side with other machines will buy the Domestic on merit.

Big Advertising Campaign Is Starting

We are not asking dealers to stock up on our promises to advertise—we're advertising ***first.*** The contracts have already been placed.

The first big Broadside will appear in June—it will be an ad with a wallop.

Other big magazines will follow. It will be big display, and results should be correspondingly big.

Proposition to Dealers

Well-established, reputable dealers can make a very profitable connection by acting immediately. Our contract will prove a very valuable franchise, as we anticipate limiting the number of our dealers so that each will harvest by returns. We urge immediate action.

EDISON TONE TEST AT CARNEGIE

Over 2,500 Invited Guests Hear Marie Rappold and Arthur Walsh Demonstrate the Re-Creation of the Tones of the Voice and the Violin —Audience Proves Enthusiastic

One of the most elaborate tone tests of the Edison Diamond Disc phonograph and records yet held in New York occurred on Friday afternoon, April 28, at Carnegie Hall, under the auspices of the Phonograph Corporation of Manhattan. Invitations were sent out to a select list of people and the result was that the large auditorium was filled with between 2,500 and 3,000 people, a number of prominent society members occupying the various boxes.

The artists who took part in the tone test were Marie Rappold, soprano, and Arthur Walsh, violinist, and a demonstration of the re-creation of the voice and the violin tone by Thos. A. Edison aroused the enthusiasm of the audience, which was offered numerous opportunities for making strict comparisons between the tones as developed by the artist and as reproduced by the Diamond Disc phonograph. A large number of Edison Diamond Disc dealers in the metropolitan district were also present at the tone test.

EDISON DISC DEALERS DINED

Guests of Phonograph Corporation of Manhattan at Banquet at Hotel McAlpin—Messrs. Wilson and Maxwell Speak

On Friday evening, April 28, the Phonograph Corporation of Manhattan entertained about one hundred and fifty of its dealers in the metropolitan district at a banquet at the Hotel McAlpin, where in addition to a number of interesting addresses a motion picture film "The Voice of the Violin" was shown. Among those who made speeches during the evening were Wm. Maxwell, vice-president, and C. H. Wilson, general manager of Thos. A. Edison, Inc. Several dealers present also made short speeches, every one of them of a most enthusiastic nature.

FOLK AND COUNTRY DANCES

Special List of Music for Such Dances Just Announced by Victor Talking Machine Co.

The Victor Talking Machine Co. announced this week a special list of folk and country dances played by the Victor Military Band. These new records consist of a collection of old English country dances, collected by, arranged and recorded under the direction of Cecil J. Sharp, England's well-known authority upon old English dances, and a new list of folk dances by Elizabeth Burchenal, one of America's leading exponents of folk dancing. A special order blank listing these new records was sent out to Victor dealers this week.

WILLIAMS WITH ACKERMAN & CO.

The business of the late G. L. Ackerman, conducted at 537 Linden street, Scranton, under the name of Ackerman & Co., Edison jobbers, is to be continued under the management of Alfred V. Williams, formerly manager of the phonograph department of Stoehr & Fister, Scranton.

INSTALL SOUNDPROOF ROOM

The warerooms of the Christman Piano Co., 753 Sixth avenue, New York, were considerably enhanced in attractiveness this week by the construction of four soundproof demonstration rooms which will be used for both player-pianos and talking machines. Three of the rooms will be used for demonstrating the Edison Diamond Disc phonographs and records and Columbia Graphophones and records, and the fourth room will display the new Christman player-grand.

ARRANGE FOR NEW WINDOW DISPLAY

The Victor Talking Machine Co. will shortly announce to the trade a new store or window display, consisting of a mammoth "Victor Dog," which will be most attractively designed. The size and appearance of this "dog" will make it a welcome addition to the Victor dealer's establishment.

TAYLOR TO HANDLE EDISON LINE

E. E. Taylor & Co., of Olympia, Wash., who have conducted a piano business in that city for the past twenty-five years, recently disposed of their entire stock of pianos at special sale and made arrangements to handle Edison Diamond Disc and Diamond Amberola phonographs and records exclusively at the old stand.

RECOVERING FROM OPERATION

CAMDEN, N. J., May 1.—M. H. Holden, head of the employment department of the Victor Talking Machine Co., who underwent an operation for appendicitis last week, is on the road to a speedy recovery. The operation was performed by Dr. Paul M. Mecray, chief surgeon of the Cooper Hospital, who states that it was entirely successful.

RETURNS FROM WESTERN TRIP

Arthur D. Geissler, vice-president of the New York Talking Machine Co., New York, Victor distributor, returned last week from a trip through the Middle West. Mr. Geissler, who spent some time at Chicago, commented upon the healthy condition of the Victor business throughout the country, which is reflected in the tremendous demand for all Victor products.

VICTOR CO. ISSUES NEW SERIES OF STREET CAR ADVERTISING CARDS

In order that the millions of people who travel daily on the street cars of the country may be duly impressed with the importance of the Victrola, whether or not they see the big Victor announcements in the many magazines, the Victor Talking Machine Co. has prepared a series of four new street car cards printed in brilliant colors for the use of the dealers. The four cards, which are illustrated herewith, divide interest between machines and records, and where twenty-five or more cards are used by a dealer they will be supplied with his imprint prominently featured on them.

UNIQUE EDISON DEMONSTRATION

Some Clever Ideas Used by Local Dealers to Demonstrate the Edison Diamond Disc

For uniqueness in demonstrating the New Edison Diamond Disc phonograph and presenting its possibilities to the public, James O. Thornton, Edison dealer at Hamilton, Mo., seems to take the prize.

Just recently this progressive town of Hamilton held its winter Chautauqua in the Knights of Pythias Hall. Mr. Thornton was called upon to furnish some of the program. How he complied with the request is best stated in his own words:

"At the back of the platform we hung a large American flag behind which we put a C-250. For the band number on the program we had about twenty young fellows, all Hamiltonians, so arranged on the platform that the Edison could play freely. Each fellow had his real instrument, his music rack and his music, and to all appearances it was a real musical organization about to begin its program. As conductor, I took my place after the band had assembled, made a brief announcement to the audience, turned to my band, tapped the music rack for attention, raised my baton and off we went. We used Record No. 50145—'The American Patrol March.' Many in the audience confessed afterwards that they would not have known but that it was a real band. During the rendition every member of the band, with serious face and demeanor, imitated as best he could the action required to play his particular instrument. It was a distinct hit. Every one thought it was a real band playing.

"After this we gave a violin solo, using the recreation of 'Ave Maria,' by Carl Flesch. This was posed and acted by one of the boys with a violin with twine strings. The lights were dim, the young fellow entered into the spirit of the selection, and in the dim light it was impossible to believe anything else than there was a real artist performing on a priceless Strad for our delectation. The illusion was perfect. Many in the audience said that they were deceived. It takes gravity and serious attention to make the action a success. We are going to use this stunt in our demonstration visits to other towns in the near future.

"Then we gave what might be called an old playlet. It was 'An Old Sweetheart of Mine.' We used Record No. 50211, by Harry E. Humphrey. For this we hung portieres for a background, in front of which was a small table bearing an old-fashioned oil lamp with a shade, the lamp lighted, the auditorium in darkness. When the lines 'Turn it low to rest me of' were reached, the young fellow who sat smoking at the table turned out the oil lamp. At the same instant a spotlight was turned upon him, remaining until the close. Then the portieres were parted to admit the wife, who stood still until the words 'To greet the living presence of that old sweetheart' were reached, when he extended his arms to her and she flew into them. Then all lights were instantly extinguished for about five seconds to give them time to leave the stage, after which the full light was again turned on. It took splendidly. The Edison certainly did itself proud and I advise other Edison dealers to try something of the kind. Everybody in Hamilton is talking about the New Edison."

It's better to believe all you say than all you hear.

SUCH IS FAME

One of the Parsons picture houses showed a current-event picture last week. Among the events was a glimpse of Caruso, the noted tenor, leaving America. When the smiling face of Caruso was thrown on the screen a young woman turned to her father and said: "Father, who is Caruso?" The father scratched his head and thought at length and finally said: "Why, don't you know? He was shipwrecked and cast up on an island." "Oh, yes, I do remember reading about that," said the daughter.—Kansas City Star.

The Boston Book Co., manufacturer of talking machine record albums, has been granted a certificate of incorporation by the Secretary of State at Albany, N. Y.; the incorporators being Henry and Lillie Gelbspan and Julius Alter, of Brooklyn, N. Y. The capitalization of the concern is $2,500.

VICTOR H. EMERSON

When Victor H. Emerson Says He Will Solve a Phonographic Problem—He Does It

In the Phonograph Industry he speaks with the voice of authority. His rare inventive genius backed by 17 years experience as General Manager of the Recording Department of one of the largest phonograph companies has made his achievements possible.

Some months ago he promised that he would produce a record which could be played on any type of Phonograph, vertical or lateral. He said, "I will produce a universal record."

He has done exactly that thing. It is no longer a theory, it's a fact. We are producing these records in increasing volume. Our production is not a promise. it's a reality.

The possibilities of this 25-cent record business are tremendous. Small investment, satisfactory profits, quick turnover are the merchandising advantages of the Emerson proposition.

The Emerson 25 cent Records, full 7 inch, music both sides, are in a class by themselves. Playing three-fourths the time of a standard 10-inch record. Never before has such a record value been offered the public at such a price.

Remember, the Emerson Records are universal and can be played on all types of machines without an attachment (except one with a positive feed). They produce equal tone volume whether the sound box is in the vertical or the horizontal position.

This, Mr. Dealer, is your opportunity to add a line of popular-priced records on which you make a quick turnover and a liberal profit. Order from the list on the opposite page—it includes the very selections the public are waiting to buy. Be the first to feature Emerson Records in your locality. Order to-day and we will deliver immediately. There are no attachments needed with Emerson Records.

OMPANY—3 West 35th St., New York

THE VICTROLA UTILIZED IN REST-ROOM OF CHALMERS CO.

Proves a Great Source of Pleasure and Education to the Employes of This Prominent Automobile Manufacturing Concern Located in Detroit

DETROIT, MICH., May 6.—The Victrola is being used to good advantage in the rest room of the Chalmers Motor Co., of this city. The accompanying photograph shows the Victrola in this rest room, and judging from the interest which is being manifested in the selection of the next Victor record, the instrument is a source of considerable enjoyment.

A number of the leading local manufacturers have purchased Victrolas for use in rest or recreation rooms, and they state that the instruments not only provide unlimited entertainment but the wide diversity of the Victor record library is being reflected in the growing appreciation of music which is apparent in many instances among the employes.

Showing the Victrola in Use in the Rest Room of the Chalmers Motor Co., Detroit, Mich.

Leroy Wedd and Fred C. Windmayer have opened a talking machine store in Atlanta, Ga., handling the Victor and Edison machines. Sheet music will also be carried.

Don't use big advertising space just so people will consider you a big advertiser. Use the amount of space you can afford to use and stop there.

NEW CREDIT MEN'S ASSOCIATION

Organization for the Protection of Conditional Credit Men Incorporated

The Conditional Credit Men, Inc., was granted a certificate of incorporation recently by the Secretary of State, Albany, N. Y. This association was formed for the protection of all conditional credit men, regardless of whether they do business under conditional sales agreements, chattel mortgages or lease contracts. It will take care of all legislative matters. Retail dealers in all lines will be asked to join the new association, including piano and talking machine dealers.

The attorney for the Conditional Credit Men, Inc., is Clarence M. Davis, a New York lawyer, who spent some time last month at Albany opposing obnoxious legislation which would injure and inconvenience retailers selling under conditional sales agreements.

The incorporators are George Farrar, representing the Brunswick - Balke - Collender Co.; Alexander H. Babcock, who is a temporary incorporator and will be replaced by a representative of the Herring-Hall-Marvin Safe Co.; Stuart H. Walker, representing Hall's Safe Co.; Charles A. Spencer, representing the Hobart Manufacturing Co., Troy, O., and Frank J. Shetter, of the U. S. Slicing Machine Co., Laporte, Ind.

Mr. Davis states that while it has not been definitely decided, it is the opinion that the membership fee will be $15 per year.

MME. RAPPOLD TOURING FOR EDISON

Prima Donna Giving Series of Tone Tests With Edison Diamond Disc Phonograph

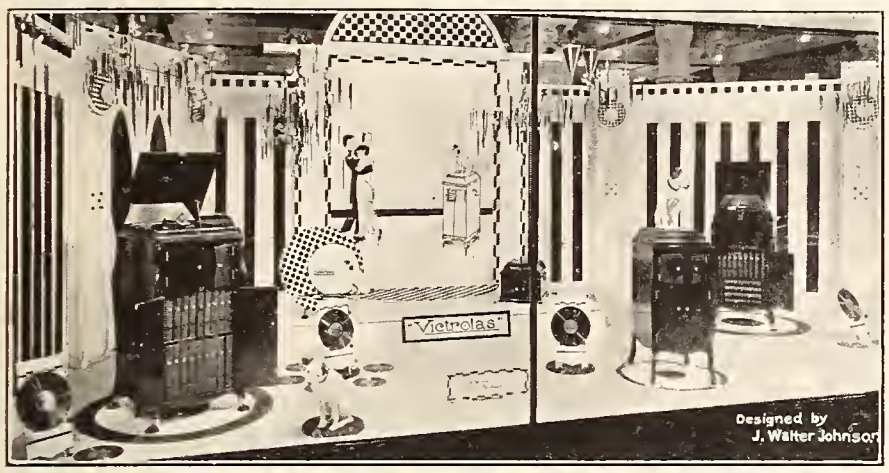
Madam Marie Rappold, prima donna soprano of the Metropolitan Opera Co., has been giving a series of tone tests in connection with the Edison Diamond Disc Phonograph. On April 25 she appeared at Carnegie Hall, New York City; on the 26th at Rochester, Philadelphia on the 27th, Newark on the 28th, at Cincinnati on the 1st of May, Chicago on the 4th, Minneapolis on the 5th, and her further itinerary included St. Paul on May 8, Birmingham on May 10, with Dallas, San Francisco, Denver and Toronto to follow. Her demonstrations have been received with great interest and enthusiasm and have been a decided boost for the Edison Diamond Disc phonographs everywhere.

The Columbia advertising department has just prepared for the use of Columbia dealers a new series of attractive car cards of unique and original design. These cards present an artistic set of illustrations which, by reason of their distinctiveness, are well calculated to attract the favorable attention of passengers.

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. IT WILL BE THE GREATEST EVER!

ARTISTIC WINDOW DISPLAY MADE BY PORTLAND HOUSE

PORTLAND, ORE., May 5.—This is a black and white window display installed a short time ago by J. Walter Johnson, display manager of the Wm. F. Powers Furniture Co., of this city, which attracted a good deal of attention and proved a big ad for their Victrola department.



Black and White Window Display of the W. F. Powers Furniture Co.

The background was ideal for showing merchandise of this kind. Notice how the machines stand out—and the picture doesn't do the display justice either. The W. F. Powers Co. has only been in the Victrola business since Christmas, but has had a good many attractive displays which reflect credit on the creative ability of Mr. Johnson, who is a firm believer in the value of window displays to increase sales.

TO DISTRIBUTE STARR PHONOGRAPH

Starr Phonograph Sales Co. to Open Offices at 56 West Forty-fifth Street, New York—Will Cover Large Territory—Officers of the Company Are Men of Wide Experience

The Starr Phonograph Sales Co. has leased a loft on the fourteenth floor of the building at 56 West Forty-fifth street, New York, and will act as distributors for the territory embracing New Jersey, New York and New England, with the Starr phonographs and records manufactured by the Starr Phonograph Co., of Richmond, Ind. Henry Gennett, president of the Starr Piano Co., is also president of the Starr Phonograph Sales Co., of which F. W. Abendschein will be vice-president and manager, and F. Elliott Wood, secretary and traveling representative. The new quarters will be opened about May 20. An active selling campaign will be started as soon as the new offices are opened.

GRAFONOLA VANQUISHES HARMONICA

Lisbonites Now Trip the Light Fantastic to the Strains of a Columbia Grafonola

From a dealer in Lisbon, O., C. W. Ourant, comes this excellent story:

"Lisbon boasts of a small social club, where the swains and benedicts took their sweethearts and wives once or twice a week for an impromptu dance. The music for these affairs was furnished by a one-piece orchestra made up of the common or garden variety of harmonica known as the mouth organ. On state occasions the town band officiated.

"Weekly and semi-weekly dances stretching over a period of years is more than the constitution of an ordinary mouth organ can bear. One night, in the middle of a dance, with a last despairing A sharp squeak played in B flat, it gave up the ghost. Great sorrow on the part of the club and business of appointing a committee to go down to Ourant's next day and purchase a new mouth organ.

"The committee duly waited on Mr. Ourant, told him of their sorrow and that they wanted to adopt another mouth organ to take the place of the defunct one. Mr. Ourant immediately scented a Columbia prospect. He told the committee that he did not carry harmonicas, but he had something which was infinitely better, a Columbia Grafonola and an ample supply of Columbia dance records. While the committee went into conference, Mr. Ourant put a catchy dance tune on one of his machines, says the Columbia Record. The conference ended there because you can't confer when your feet insist upon waltzing.

"Our friend Ourant explained to the club members the advantages of a Columbia over a harmonica, and showed them just how much they could save by dispensing with the band entirely. Five minutes' talk ended with the purchase of a $35 Grafonola, and $15 worth of records. Enthusiasm reigned supreme. The committee insisted upon carrying the machine along with them and toting the records as well.

"Result, $50 rung up on Mr. Ourant's cash register and a live addition to his mailing list of an actively dancing club and Columbia enthusiasts."

TO MAKE TALKING MACHINES

MARION, O., May 10.—A new concern, which has been incorporated by T. J. Hartle, W. W. Klinefelter and C. G. Smith, has been organized here and will manufacture talking machines. The company will operate under the name of the Eclipse Mfg. Co., and has been capitalized at $10,000.

The Victorlina Phono. Co., formerly located at 261 Broadway, New York, has changed its name to the Mascot Talking Machine Manufacturing Co., and has moved to new quarters at 66 West Thirty-seventh street.

HOW THE BIG MONEY IS MADE

Some Interesting and Pertinent Facts on Business Development Offered in the "Voice of the Victor"—No Such Thing as a Dull Season for the Really Live Dealer

"How the 'Big Money' Is Made" is the title of the following interesting and pertinent editorial, which appeared in a recent issue of the "Voice of the Victor," and which is well worth the careful consideration of all talking machine dealers:

"You will help a child on a climb, but on a level stretch you don't need to. Your business is the child of your brain and the way to climb a hill is not to sit down and think about how steep or how long it is, but to throw out your chest and 'beat it' at a good lively clip. It's a lot more fun to get to the top and then sit down for a few minutes to enjoy the view, than it is to waste those few minutes in dawdling up the road.

"Everything is relative in this world—including hills. On the prairie a fifty-foot elevation looks like quite a hill, but out among the Rockies a fifty-foot elevation isn't a hill—it's only a bump.

"Everything is relative. The Victor dealer has learned that there is no such thing as a dull season, but it would be idle to deny that there is less business done some months than others. That's the time to help your 'child.'

"April and May are not summer months by any means, but they're near enough to it so that they afford the best possible opportunity for maturing summer plans and setting them in motion; but don't overlook the fact that spring is here now.

"'Christmas comes but once a year' is true enough; but so do taxes, birthdays and the good old summer-time. You can make this summer or this spring most anything you please, but once it's gone by you can't make anything of it.

"It can be the best and most successful summer or spring you have ever known, provided you wish to make it so. When a man wants a thing badly enough he will get it. When he doesn't, he won't—and shouldn't.

"That may sound rather like a platitude, but it's worse than that—it's a fact. Every man is a sort of idea factory, and no factory produces anything if the machinery stands idle. One 'factory' may be less well equipped than another and the thing to do then is not to be scared at the other fellow's equipment, but to get busy and work overtime.

"What's more, no factory can deliver the goods until it has spent time, effort and money in preparing the goods for delivery; after that it's easy to cash in.

"There was an exceedingly wide-awake dealer in talking to us just now. Jerome Ackerly, of Patchogue, N. Y. A live wire. It was a pleasure to quit writing for a few minutes and talk to him.

"'You know,' he said, 'in retail business, if there's something that ought to be done to-day, but doesn't get done—it's gone—lost! You never will get around to it again.'

"That's precisely the point. If you don't make the most of this summer or this spring, while it's here, there will be no chance to make up the loss. The year's fat profits can be pulled down quite considerably if May, June, July and August is loafing time in your store.

"This will be the most wonderful year in the history of the trade. Look around. The conditions are right for a world-beater. There are probably fewer idle men to-day than there have ever been before. You will see smiling faces to-day, where a year ago you were greeted with a frown. Prosperity is in the air as, indeed, it ought to be, for this country has received a most extraordinary influx of wealth, the effects of which are just becoming apparent. Given such conditions, together with a greatly increased output on our part, and it is evident that the Victor dealer's cash register will be playing the liveliest tunes that ever were heard.

"It won't be safe to assume that you'll be able to get everything you want in the line of goods. It takes time to build new buildings and equip them with machinery, and here at the factory we can watch the steady piling-up of business so that we can make a very accurate forecast.

"Victor dealers will have a lot more goods to do business with; trade conditions are vastly better than they have been in years. We know almost to a dollar how much business each individual dealer does. We see and know so many hundreds—or thousands—of our dealers who have made the Victor line a source of rich profit. We know their methods. We know that if an opportunity ever gets by them it's an accident, and that is why it is that we urge every dealer to make the most of every season, every month, every hour, every day. There's big money in it, and we want every single dealer to get his full share."

EDWIN G. SCHLOSS HAS GOOD TRIP

Finds Trade Conditions Very Satisfactory in the Middle West

Edwin G. Schloss, the general manager of Schloss Bros., well-known talking machine cabinet manufacturers, returned recently from an extended trip through the Middle West, going as far as Chicago, St. Louis and Louisville and visiting intermediate cities. In addition to placing large orders for supplies, Mr. Schloss has considerable occasion to use his own order book for he found things very active, despite the upset condition in certain cities due to strikes or impending strikes. Last week Mr. Schloss made a flying trip through the New England States.

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. IT WILL BE THE GREATEST EVER!

THE TRADE IN THE SOUTH

The continued progress which the Southern States have made both in agricultural and industrial affairs is strikingly reflected in the increased activity which is shown in the talking machine trade all through the Southern section of the country. In Kentucky the crop outlook, while not as good as might be wished, will be overcome somewhat by the increased acreage which was planted. More stock is being raised in this section than hitherto, which is a helpful factor.

Manufacturing activity in Tennessee continues strong. The corn planting season is about over, and nearly 15 per cent. more land has been planted this year than ever before, the land being unusually well prepared. The small fruit crop is excellent and wheat and clover promise big results.

In Alabama the mining industry is active, a larger cotton acreage is in sight, and the handicap of a diminished fertilizer supply is being rapidly overcome. The strawberry crop is abundant and early vegetables are growing nicely.

Rain is badly needed in Georgia, though long staple cotton is doing well. The boll weevil has made its appearance, but no serious damage is expected; in fact, the general outlook is steadily bettering.

Crop conditions in Florida are good, though lack of rain has cut down the vegetable and strawberry output. The citrus harvest was good, the citrus canker now being under control. More attention is being given all the time to the raising of cattle, with very favorable prospects in this direction.

Ninety per cent. of the cotton has been planted in North Carolina, though lack of fertilizer will cut down the yield of crops. The tobacco crop is not exceptional, due to lack of rain. The Texas wheat crop is looking well, though the weather is rather cool for corn and cotton, most of the latter being planted by now.

The lumber industry in Mississippi has had a decided boom and the excellent showing in pedigreed live stock and the cotton and corn crop, have resulted in prosperous times in this section. The cane crop in Louisiana is good and the growers are jubilant over the prospects of a tariff on sugar. There has been plenty of rain in this section, which has benefitted everything except strawberries, which have been rendered unfit for shipment thereby.

Conditions in northern Virginia are good. Wheat is making good progress, the corn planting is well under way, and the live stock has come through the winter in good condition The potato crop in the east shore section was started late and is not above the average. The lack of potash is being felt and rain is needed badly. Backward weather will delay the crops somewhat.

The diversification of crops is becoming apparent more and more throughout the entire South, and the experiences of recent years have taught planters the inadvisability of depending solely on the cotton crop. The general industrial conditions are much better than they have been for some years and the talking machine trade is profiting directly and materially thereby. The love for good music is firmly inculcated in the Southern mind, and the people generally have been quick to appreciate the opportunity which the talking machine affords for a fuller indulgence in the pleasure of musical entertainment, all of which seems to assure the permanency and prosperity of the talking machine trade in the Southland.

WHY SOUTHERN VICTOR DEALERS SHOULD ORDER NOW

By Frank W. Corley, General Manager, The Corley Co., Inc., Richmond, Va.

Your experience as a Victor dealer insures the knowledge that this product is over-sold during most every month of the year, but particularly are you aware of the very acute shortage that exists during the fall months. With the country in its present prosperous state, you can appreciate that this condition will be more in evidence this year than heretofore, and therefore you can expect the largest trade in the history of your business during the coming fall months.

With this in view, the question resolves itself into a problem, and if you expect to profit by this general trade condition, it is obvious that the problem of obtaining the goods must be solved. In our opinion, the only solution to this is to place your orders now for June, July and August deliveries, and although we cannot promise or guarantee a definite delivery of these orders, especially on certain styles, it is certainly more probable that you will obtain the goods in time for fall trade, than if you waited and placed the orders at a somewhat later date.

At the same time that your order is placed for machines, attention should also be given the record stock and equipment. It should be remembered that the standard records are equally as salable stock as machines, in fact, from 50 per cent. to 70 per cent. of the talking machine business to-day is in records and this percentage is increasing constantly, hence, these standard selections should be ordered in advance for this trade, in proportion to the machines. Thousands of dollars are lost every year by the dealers' inability to supply records of this character. Your foresight in having them in stock, will mean extra profit in your business.

The profit on records is the same as on machines. Our opinion, based on a careful study of the business in the past and at the present time, leads us to believe that from now on, the record department will be the key on which the success or failure of the talking machine dealer hinges.

CONDITIONS IN SAVANNAH

Manager of Talking Machine Department of Lindsay & Morgan Co. Tells of Fifty Per Cent. Increase in Business

SAVANNAH, GA., May 7.—Chatting about business B. F. Reusing, manager Victor department, Lindsay & Morgan Co., this city, says: "Our business for the twelve months prior to March 31, 1916, was about 50 per cent. ahead of the same period of the previous year. The sale of Victrolas seemed to run to $100, $150 and $200 styles of machine, though we did sell a number of the smaller types, and, taken altogether we feel that we had a satisfactory year.

"The Victor business at the present time in Savannah is a little bit slow, because this is just between seasons, and it is slow in all mercantile lines in the city at the present time. However, present indications are that the month of May, 1916, will greatly exceed that of 1915, and we are laying our plans for a much larger year than the one we just closed."

The Houston Music Co., of Houston, Tex., carrying the Victor and Edison lines, reports a constantly increasing trade. The store is in charge of Harry H. Houston, general manager, assisted by P. H. Lamb.

THOS. EGAN TO RECORD FOR PATHE

Popular Irish Tenor Signs Contract to Make Records Exclusively for Pathé Frères

The Pathé Frères Phonograph Co., New York, has received many gratifying letters from its dealers throughout the country relative to the company's addition to its lists of artists of Thomas Egan, the popular Irish tenor. Mr.

Thomas Egan

Egan signed a contract recently to record exclusively for the Pathé library, and his first records will be ready in the near future.

The name of Thomas Egan is well and favorably known throughout Europe, as he appeared at the leading opera houses on the Continent and in Great Britain, where he achieved unusual success.

HERMAN HELPING SONORA DEALERS

Assistant Sales Manager of the Sonora Corp. Helping to Create Better Business

One of the younger generation of talking machine men is A. J. Herman, who has been with the Sonora Phonograph Corp. almost since its inception. He is assistant sales manager of this organization and believes that much of his ability is the result of coaching on the part of Geo. E. Brightson, president, and Jos. Wolff, secretary.

A. J. Herman

Mr. Herman makes a specialty of giving service to dealers, cooperating with them in every way to assist them in securing the greatest profit from their sales.

Although a comparatively young man, Mr. Herman has witnessed the recent tremendous development in the talking machine industry. He is of the opinion that the surface of the market is just about being scratched, and that possibilities for the future are unlimited.

Chancey Glenn, proprietor of a piano store on Scioto street, Urbana, O., and who also has the Edison Diamond Disc agency for this section, has added a sheet music department to his store.

What was good enough for our fathers may be good enough for the present generation, but we are not satisfied with it.

SALES AIDS FOR COLUMBIA DEALERS

Interesting and Valuable Volume, Compiled by the Columbia Co.'s Advertising Department, Featured Window Displays Prominently

The Columbia Graphophone Co.'s advertising department has just issued a number of selling helps for its dealers which can be used to excellent advantage. These include a handsome window display featuring special records from the latest list, a new window transparency and music on Columbia records. The new window display is intended to last from two to three months, and new cards featuring monthly records will be sent to the dealers for insertion in the display cut-out. The new window transparency is designed in gold and blue, and its striking conception makes it of distinct value from an advertising standpoint.

The employes of the American Graphophone Co.'s factory at Bridgeport, Conn., were the guests of the company at a complimentary dance tendered them as a house-warming incidental to the occupancy of the new addition to the Columbia factories in that city. The dance was a signal success, the factory fire department having charge of all the arrangements, and paying careful attention to every detail. The guests included the employes, their wives and friends.

The Bureau of Foreign and Domestic Commerce reports that an inquiry has come in from Siberia from a dealer who desires samples and price lists of talking machine disc records used to teach the English language to Russians. Full information may be obtained by addressing the Department at the district office, Room 409 Custom House, New York City, mentioning foreign trade opportunity No. 20,844.

WANTED—Thoroughly competent phonograph man to take charge of assembling. Must have a technical and practical knowledge of all phonograph parts and be fully acquainted with and able to detect imperfections. Only those who can fill these requirements need apply, stating age, experience, references and salary expected. Address "A," The Talking Machine World, 373 Fourth Ave., New York City.

TALKING MACHINE TRADE IN ST. LOUIS IN FINE SHAPE

Increasing Demand for Better Class of Machines and Records—The Musical Standing of the Talking Machine Appreciated—New Columbia Managers—Many Dealers Visiting Jobbers—New Pathé Accounts Opened—Victor Repair Service—Edison Publicity

St. Louis, Mo., May 7.—The talking machine business in St. Louis is in better shape at this writing than for many months. Supplies of both machines and records are coming through in excellent shape, trade is increasing in leaps and bounds and the selling situation is very generally satisfactory. Collections, too, are very good, in fact seldom have they been better. There also is an increasing demand for the better class records, the kinds that people become attached to and which make for the continued use of the talking machines instead of the craze while a popular song lasts.

There are fewer complaints this month. There is said to be something of a shortage of the small machines, such as are in demand at this season for club houses and summer homes, but this need is not serious.

The most interesting development of this year has been the acceptance of the talking machine as a musical instrument by musicians and a willingness to accept it for concert numbers where excellent, human talent was not obtainable. This was noted last month in the concert of Profs. Kunkel and Kroeger, two of the best known pianists and teachers in this city. This entertainment was given according to program and Mark Silverstone was on the program for a talk on the Edison Diamond Disc phonograph which was used. These two ultra-ethical musicians praised the machine's part in their program. This recital, because of the standing of the two chief performers, was properly reviewed in the musical columns and the phonograph was mentioned.

In this connection might be mentioned the advertising for the Aeolian-Vocalion, which is attracting considerable attention in this section. This advertising is placed squarely on the musical qualities of the machine. The control of the tone also is strongly mentioned.

The announcement by Manager Irby Reid, of the Columbia warerooms, recently, that Ben F. Philipps had been made retail manager, was a welcome one to the talking machine circle, for the trade likes to see a man rewarded for exceptional performances. Mr. Philipps long ago made his reputation as an outside

B. F. Phillips

C. R. Salmon

salesman and for years has maintained a pace that few others, if any, have equaled in this town. Mr. Philipps has been with the Columbia Co. for eleven years. He came to St. Louis from New York during World's Fair year, when just a boy, and has been making his way since. He was the first talking machine salesman in this community to buy an automobile for his own use in his business, and he says that he found this a very profitable venture. He would bring his prospects into the warerooms at his or the customer's convenience and when immediate delivery was demanded he would take both customer and machine back home at the same trip and stop long enough to start the machine going. On clean-up days, he could visit all of his kickers in a few hours, iron out the troubles and still have time to sell a few machines in addition.

Another Columbia hustler is C. R. Salmon, manager of the wholesale department, who has been with Manager Reid for several years. He traveled for a while but recently has devoted his time entirely to the office work and looking after the chief city customers. Mr. Salmon has won for himself a place as one of the well qualified machine men of this jobbing center.

Manager Reid, of the Columbia Co. is much pleased with his new territory, Memphis and vicinity. This territory formerly bought in Atlanta, which was not at all satisfactory to the trade, which is naturally St. Louis trade territory. The first month's dealings with the Memphis dealers has been entirely satisfactory. Practically all of the shipments so far have been by river, which saves the Memphis dealers more than half of the freight cost on these shipments.

Miss Margaret Suddendorf, recently with the Aeolian Co.'s music roll department, is a new floor saleswoman at the Columbia warerooms. Miss Suddendorff is familiar with the Columbia line, having sold the machines and records in Minneapolis.

Kleekamp Bros. Piano Co., Grand avenue and Arsenal street, is a new Columbia dealer. This firm recently has sold Victors exclusively. Another new dealer is Luther T. Adams, of Herrick, Ill., a piano dealer.

Samuel Fields, manager of the talking machine department of the Gus Blas Dry Goods Co., at Little Rock, Ark., was here for several days the first of the month, buying Victor and Columbia machines for his store. The company has found the Arkansas capital an excellent point for retail trade and has been doing a heavy business for several years.

Mark Silverstone, president of the Silverstone Music Co., Edison jobbers, is planning a trip to the Edison factories late this month. He had planned to leave the first, but was delayed through changes being made at the store. Following the changes in the office force through

(*Continued on page 66b*)

(*Continued from page 66a*)

which R. L. Wilson was placed in charge of the office and selling floor, and Mr. Peden made wholesale manager, some material changes were found necessary. The last of these is the entire rearrangement of the record stock rooms on the third floor to make room for the rapidly increasing library. By the time this is completed Mr. Silverstone believes that he will have an organization that will continue to run smoothly regardless of his daily presence.

The Edison machine recently appeared on the street placards. The advertisement is placed by the Silverstone Co., but it does not say so. Sales Representative Mitchell, of the Silverstone Co., arranged the first of the month to give a musical recital on the Edison before the Illinois School Teachers' convention at Jacksonville.

The Concordia Music House on Pine street, this city, recently advanced themselves into Class A as Edison dealers. Zwick & Bro., of West Frankfort, Ill., are new dealers.

Wholesale Manager Peden reports a letter from an Illinois dealer who had just concluded a cash sale of an Edison disc and a cylinder machine to the same customer.

Lawrence Lucker, an Edison jobber at Minneapolis, recently was a caller at the Silverstone warerooms. He was talking when one of the salesmen entered the room and the latter recognized his voice from having heard it on the Edison jobbers' record and called him by name. Mr. Lucker was making a social call, being anxious to see how other Edison jobbers conducted their business.

The Victor repair expert was a visitor to local dealers last month and his calls were very welcome. Speaking of this branch of the Victor service, Val Reis, of the Smith-Reis Piano Co., said: "We found the presence of this mechanical expert of benefit to every person in our talking machine department. Practically every employe had questions that the expert was needed to decide definitely and authoritatively. The clear understanding of these points has put new life into every one of the force. It really surprised me to see how many questions the record department could raise and I realize fully how much better the machine salesmen must feel, now that they are qualified to answer fully some questions over which they had doubts themselves."

J. W. Medairy is in charge of the talking machine department at the Stix, Baer & Fuller Dry Goods Co., since the retirement of C. B. Noon. Mr. Mediary is a talking machine enthusiast and is endeavoring to push his department to the front. He sells Victors and Edison Diamond Disc machines.

R. H. Gordon, of the Pathephone Co., says that his company is more than satisfied with the new accounts being opened in the St. Louis trade territory. He says that most of the accounts are opened by request of the prospective dealer and that he and his force of salesmen have had little time to search for prospective retailers. In many instances the new dealers are merchants who have been persuaded to stock a few cheap machines and have become tired of these and at the same time have realized the possibilities of selling standard machines.

The growth of the record business, in this trade district, Mr. Gordon says, is a continual surprise and now that the factory shipments are more liberal, he is meeting all demands of this sort and the office and shipping room force is kept going at top speed.

Charles Balmer, one of the best known piano salesmen in the city, and one of the veterans, has transferred his energies to the talking machine field and is a floor salesman at Nugents' Dry Goods Co. talking machine department, where Columbia and Edison disc machines are sold.

WARNING NOTICE

Mr. Harry J. Watson is reported to have recently been in Toledo soliciting subscriptions for The Talking Machine World. We hereby give notice that Mr. Harry J. Watson is not and never has in any way been associated with our journal.

The Talking Machine World.

EMERSON PHONOGRAPH CO. CHANGES

Transfers Manufacture and Sale of $3 Phonograph to Another Company—Will Concentrate on Record Business in Future

The Emerson Phonograph Co. announces that it has discontinued the manufacture and sale of the $3 phonographs direct, but has turned over this proposition to the Flemish Phonograph Co., Brooklyn, N. Y., whom it has licensed to manufacture and sell a similar machine at the $3 price. The Emerson Co. will in the future devote its energies to the making and merchandising of its ten and twenty-five cent records and will also bring out the Emerson Electrolier Phonograph, which was recently demonstrated publicly for the first time.

VICTOR CO. PAYS EXTRA DIVIDEND

Common Stock Is Given Dividend of 25 Per Cent. in Addition to Regular Dividend

CAMDEN, N. J., May 1.—The Victor Talking Machine Co. declared an extra dividend of 25 per cent. on its common stock last week. This dividend is an extra one, and is in addition to the regular quarterly dividend of five per cent. An extra ten per cent. dividend was declared in January, this last dividend being the largest one ever paid by the concern. Dividends on the common stock so far this year amount to 45 per cent. The last reported bid for the stock is $1,025 per share, with no stock offered.

Kalder & Scattergood, of Sturgis, Mich., has been incorporated to manufacture talking machine accessories, with a capitalization of $1,000.

WELL-EQUIPPED FOR BUSINESS

Domestic Talking Machine Corporation Has a Modern and Well-Equipped Plant in Philadelphia for Producing New Line of Talking Machines—Backed by Men of Wide Experience in the Trade and Its Development

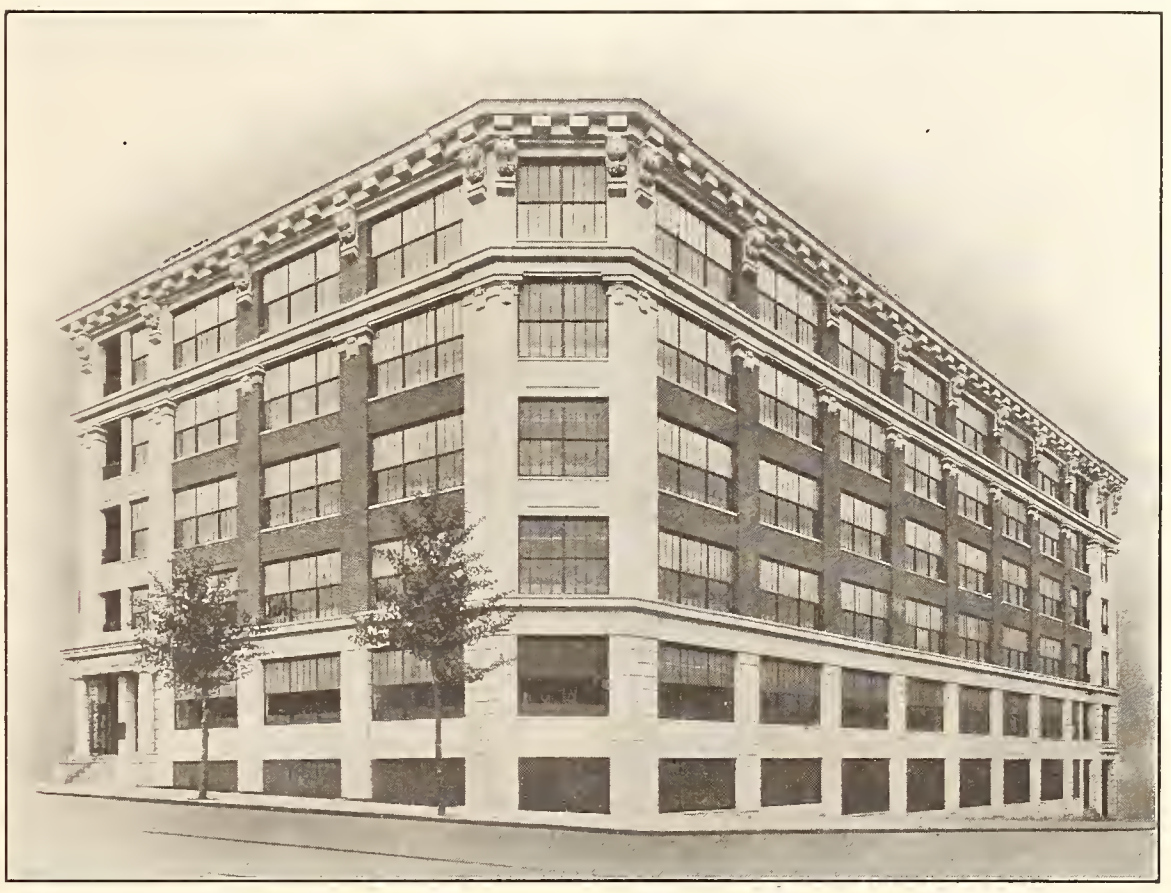
PHILADELPHIA, PA., May 8.—The Domestic Talking Machine Corporation, the organization of which was referred to in The World recently, announces that it is now ready to market the first of the machines from its factory in this city.

The company begins business under most favorable auspices, for in addition to a well-equipped plant, the men directing the affairs of the corporation have been large factors in the talking machine trade in the past and understand what is required and how to produce it.

Evidence of the fact that the Domestic Talking Machine Corp. has come to stay, and grow as it stays, is found in the large modern plant of fire-proof construction, fully equipped and designed to promote manufacturing efficiency to a high point. The machinery now installed has been especially designed and is believed to represent the last word in that line.

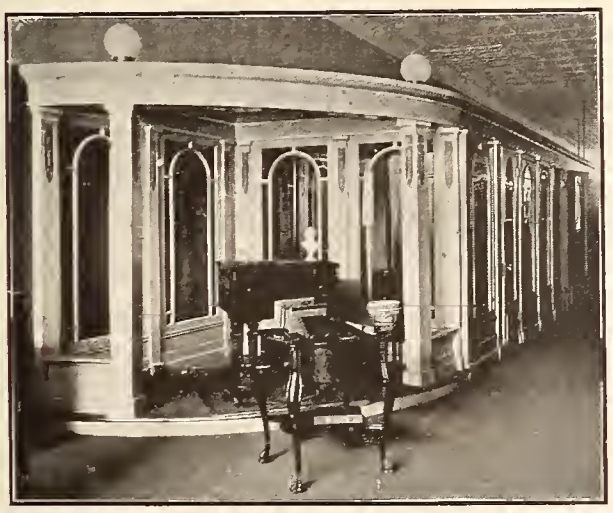
The business has been thoroughly departmentized, both in manufacturing and selling, and each division is under the personal direction of men who have spent years in the various divisions of the trade. All parts of the Domestic machines, except the cabinets, will be made under one roof, thus assuring the maintenance of a specified fixed standard in construction.

The Domestic Corp. also announces that plans have been made for a national advertising campaign of large proportions which will start in the magazines for June, the advertising being of the sort calculated to bring business direct to the dealer.



Factory of the Domestic Talking Machine Corporation

Van Veen Sectional Bed-Set Demonstration Booths



A Recent Van Veen Installation for Columbia Graphophone Co., N. Y.

Any one can erect booths as easily as a bed (no skilled labor required). One of our leading designs shown herewith. Booths shipped on short notice *anywhere*. Room sizes, any multiple of 3 feet, one of our standard section sizes. High-grade finish, will match your sample if desired.

A department is devoted to specially designed booths to match the architecture of showroom interiors, and will furnish designs and quote prices promptly if furnished with elevation drawing or photograph of interior. Sound-proof construction. Mail your requirements for prices and descriptive circulars.

A. H. MAYERS OPENS NEW STORE

Adolph H. Mayers, the well-known local talking machine dealer, held the formal opening of his new store at 783 Ninth avenue, near Fifty-third street, on Wednesday of this week, Mr. Mayers having removed recently from 790 Ninth avenue, where he had been located for a number of years, to the new address. Mr. Mayers, who specializes on the Victor line, also conducts a retail store at 1983 Broadway

CONGRATULATIONS

Max Landay, of Landay Bros., New York, Victor distributors, is receiving the congratulations of his many friends in the trade upon the arrival at his home on Easter Sunday of a baby boy, who has been christened Robert Bruce Landay. Mr. Landay is now the proud father of two sons, Donald Malcolm Landay already giving indications of rivaling some of the Victor Co.'s world-famous vocal talent.

The shortest and best rule for the achievement of success is this: "Get results!"

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. IT WILL BE THE GREATEST EVER!

GATELY-HAIRE HOUSE-WARMING

Recently Opened Warerooms of Albany Victor Jobbers Are Commodious and Up-to-Date

The Gately-Haire Co., Inc., the energetic Victor distributor, in Albany, N. Y., of which John

New Quarters of Gately-Haire Co.

L. Gately is president, recently house-warmed its new quarters, located near the Albany station of the New York Central. The accompanying illustration shows the beauty of the exterior of these warerooms and wholesale quarters, this being taken at the time when an Easter window display was showing.

Two floors and basement are occupied by this concern, the first floor being the general retail warerooms; the basement, the wholesale department, where are stored the machines and records, the second floor being devoted to the general offices, ladies' rest room and several private offices. No idea as to the length of these quarters can be gleaned from this picture, the length being nearly two hundred feet, thus giving the company all the elbow room it needs at present.

A NEW VICTORY FOR FIXED PRICES

Welch Grape Juice Co. Wins Out in Suit Brought Against It for Refusing to Supply Product to Price Cutting Concern

The principal of price maintenance in retail sales has again been upheld by the Courts and although the decision will be appealed as it stands, it is a most interesting one. The case was that of Frey & Co., wholesale grocers of Baltimore, Md., who brought suit against the Welch Grape Juice Co., under the Clayton act and the Sherman anti-trust law, based on the refusal of the Welch Co. to supply its products to the jobbing house, which cuts prices on its goods. The case was tried twice, the jury disagreeing on the first occasion and finding for the Welch Co. in every particular at the second trial.

The case was submitted on two counts. The first rested on the question of whether or not there existed, in the light of the first clause of the Sherman anti-trust law, an agreement, understanding or combination, between the Welch Grape Juice Co. and its jobbing distributors, by which the resale price of its product was fixed; and if such were the fact, whether the grape juice company cut off Frey because he cut the resale price and refused to enter into such illegal combination, agreement or understanding.

The second count was under the Clayton act and referred to the jury the question of whether or not the Welch Co. had discriminated against Frey by returning a certified check accompanying its demand for grape juice in January, 1915, accompanied by a letter in which the company not only refused to sell him at the jobbing price, but offered to let him have goods if he wished them at the retail price. This letter, it was contended by the Welch Co., was simply a polite way of refusing to deal with Frey as a jobber.

The Frey Co. has always insisted that it means to test the merits of this case to the finish. It still has two similar cases pending, respectively, against the Beechnut Packing Co. and Cudahy & Co., and whether it will rest its fate on the trial of those cases or carry an appeal in the Welch case to the Supreme Court is not yet stated.

All of the stock in the Des Moines Talking Machine Co. has been bought by B. Van Stight and J. L. Heilsing, who have formed a partnership in its ownership.

TO RECORD FOR THE PATHE CO.

The Pathé Frères Phonograph Co., New York, announced last week the consummation of arrangements whereby the Stanley Quartet will record exclusively in the future for the Pathé record library. The first records by this quartet will appear shortly.

The Stanley Quartet is well known in musical circles, and recently appeared at a dinner of the Music Club, given at Delmonico's, before a distinguished gathering of famous artists, including Kreisler, Gadski and others. James Stanley is the leader of the Stanley Quartet, the other members being Joseph Mathieu, Louis MacMahan and Flora Hardie.

James P. Bradt, general sales manager of the Columbia Co., returned to his desk last week after a fortnight's stay at Old Point Comfort, Va. Mr. Bradt is in the best of health and spirits, and apparently benefited considerably from his stay in the Sunny South.

TRADE IN SOUTHERN CALIFORNIA

Shortage of Stock Being Rapidly Remedied—Near Approach of Vacations Will Increase Demand for Outing Machines—Recent Sales of Importance—Some Staff Changes

Los Angeles, Cal., April 29.—April has been a very successful month for all local talking machine dealers, although hardly up to the standard set by the preceding months.

Nearly all dealers are now supplied with all models and all finishes of talking machines, something they have not had for over six months. There is still a shortage, however, in their record stocks, as it seems nearly impossible to obtain some of the best of the standard sellers. All of the jobbers are promising full stocks by June 1, and on account of the diminishing of business during the summer months, the dealers should all be ready for the fall rush with full catalogs.

The vacation months are drawing near, and already has the demand begun for the outing machines. The absolute certainty of fine weather in Southern California from now until October makes this district the most popular one of the country for the "talkers" as an outside amusement and it is a common sight to see an auto party making for the beach or mountains with a talking machine as an entertainer.

J. W. Boothe, manager of the piano and talking machine departments for Barker Bros., is in the East, where he is visiting the piano factories whose lines he handles, as well as the talking machine factories and also some of the larger retail stores. Mr. Boothe will return about May 10.

Jack Reeves, formerly with Sherman, Clay & Co., Victor jobber, in Los Angeles, has returned from a trip around the world, and is making a short stay in our city.

One of the recent notable musical events was the appearance of the celebrated Italian tenor, Guido Ciccolini, at the Orpheum during the last two weeks. He is making records for the Edison Diamond Disc at present.

Miss Alice Brown, who has been with the Columbia Co. for the last fifteen years as manager of their retail department, is now with the Southern California Music Co.

The Wiley B. Allen Music Co. has been doing a fine business this last month, especially in the XI. and XIV., fumed oak.

FEATURING LATEST SONORA MODEL

An unusual and elaborate catalog has been issued by the Sonora Phonograph Corp., of 57 Reade street, New York, which is exclusively devoted to the latest achievement of this house, the thousand-dollar Supreme model. No expense has been spared in the creation of this volume, the printing being of the most artistic quality. The work was planned by the officers of the Sonora Corp. and created by the Redfield Advertising Agency, of New York, which is co-operating with the Sonora Corp. in the promotion of publicity. Some striking paragraphs from this volume follow:

"With any type needle—sapphire, diamond, steel or multi-playing—the Sonora Supreme will play any disc record with the living warmth and the human tone of the original harmony. The range of melody it opens is boundless.

"The parts of the Sonora Supreme are perfectly co-ordinated, for only by flawless arrangement of the parts can perfection of the whole be attained. The art of phonography is based on the art of mechanics. A machine capable of reproducing the lightest tone-shade and the most vigorous harmony must be a machine with a supreme mechanism.

"Such is the Sonora Supreme. In its devices for tone-rendition and tone-control it is unique, a masterpiece of the new phonography."

The Durable Phonograph Co., manufacturer of phonographs, talking machines, etc., has been incorporated by J. O. Murphy, Russell Goldman and A. G. Thaanum, of New York City.

Sonora

Multi-Playing Jewel
Needle

GIVE the record a *chance!*

Don't complain about the scratchy sound when it is the needle that is at fault.

The Sonora multi-playing jewel needle lengthens the life of the record. It saves the bother of constantly changing needles.

FAR harder than steel is this jewel needle. Without losing its effectiveness it can be used over and over. The beauty of the sound is materially improved by its use, because it fits the record exactly and this is essential for accurate sound reproduction.

Sells readily for $1. It is guaranteed to give thorough satisfaction in daily service for three months. This is a profitable article for you to handle.

HOW PRICE MAINTENANCE SAVES MONEY FOR RETAILERS

Chas. B. Klein, in Live Article in Support of Stevens Bill, Explains That the Juggling of Prices on Machines Would Necessitate Hiring of More Expensive Salesmen

The effect on the talking machine trade if the Stevens bill or a similar measure fails to pass and the price cutter becomes the dominating power, has been ably set forth in an interesting article on price maintenance written by Chas. B. Klein, of the Klein & Heffelman Co., Canton, O., the prominent piano and talking machine dealers. Mr. Klein states that he has had twenty years' experience in selling pianos under the "any old price plan," and he therefore appreciates the maintenance of prices on talking machines.

Mr. Klein's article, which in its entirety is too lengthy to be used, is being run in instalments in the Sunday edition of the Canton Repository. He sums up the situation which would prevail in the talking machine field were fixed prices eliminated, in the following excerpt:

"The leading makes of talking machines are now sold to the consumer by the retailer at a uniform price all over the country. You can send a ten-year-old boy into any store in the country, who are authorized agents for the best-known makes of talking machines, with $200 cash in his pocket to buy a machine and he will do as well as you could yourself. He will pay neither more or less than $200 for a $200 phonograph or talking machine. The price and models being standardized, no dealer could vary the price or substitute other models without detection.

"But who would think of sending a ten-year-old boy to buy a $200 article not standardized, and which had no uniform fixed price?, such, as for instance, a piano. If the uniform fixed price was removed from Victor and other talking machines, the bars let down and each dealer privileged to fix his own price and the price cutter given full play, what would happen? What would be the effect on the consumer and on the dealer and on the sales people? If the manufacturer could not devise some plan to control the resale price by special contract with the retailer or by establishing his own selling agencies in every selling center, this is what would happen and would be necessary if the retailer was to get the same net margin on sales he is now getting.

"First, the manufacturer would have to destroy all means of identifying the present models and the prices now attaching to them. The, at present, $200 model, for example, would be given a different shape or appearance in the case design, and the dealer would then mark it to sell at, say, $250.

"Then when Mr. Shrewd Buyer came in and asked for a price reduction because he is a prominent citizen or because of the prestige added to the establishment by having such a substantial citizen as a customer, he gets it for, say, $190, but only on his sacred promise not to tell any one; then when Mr. Plain Citizen or Working Man came in to buy the same model, and not being an adept in the noble art of dickering, he pays $225 or $240, and in some cases $250.

"After a while the Plain Citizen discovers that he has paid $20, $30 or $40 more for the same machine than did the other citizen.

"He goes back to the store in just rage and the poor talking machine salesman, who is perhaps a mere boy, and has had no other experience than selling at a uniform price, his sales methods being heretofore as free from subterfuge as that of a postage stamp salesman, trembles and makes a feeble attempt to explain and fix up matters, but fails utterly.

"The customer goes out storming, denouncing the whole concern as a crooked bunch, and vowing never again to buy another cent's worth at that store, and proceeds to advertise the fact and to tell his friends all about it.

"Then the dealer sees a great light; he now realizes that the cut-price game requires different handling than does the fixed and uniform price plan. He now realizes that while he has heretofore under the uniform price plan run his phonograph or talking machine department profitably with the aid of a young, inexperienced and low-price salesman, he now requires a veteran, and one who is experienced with this particular method of salesmanship, one who has the qualities of a Hannibal ready at all times to meet the surprises of any sudden exigency or situation. His salary will be more than he has been paying the inexperienced salesman, but he must have him; he figures that he will get enough extra price over and above what the young and inexperienced salesman would get to more than make up for his extra cost. He finds and hires his man and gives him full charge.

"Mr. Jones comes in and buys the same type of machine sold to the prominent citizen, but Jones pays $200 with a promise not to tell any one about the cut-price. Later on Brown comes in and also buys a machine of the same type and pays $240, with a promise not to tell any one about the cut price. Later on Brown discovers that he paid $40 more for the same machine than did Jones. He, like the plain citizen, gets angry, and justly so, as he thinks, for did not that lying salesman tell him that $240 was a very special and confidential price, not made to everybody? He goes back intending to clean up that store and to denounce that salesman as a liar to his face, and make him own up and confess his perfidy.

"But Jones is not dealing with the boy salesman as did the plain citizen, he is now against the real thing, a product of the cut-price system. The conversation runs something like this:

Brown (trembling with rage)—"Say, didn't you tell me that $240 was a very special and confidential price for that machine I bought?"

Salesman (in a soft, musical voice)—"I did."

Brown—"And didn't you tell me that no one ever bought that same machine for less than $240?"

Salesman (pleasantly)—"That's exactly what I said."

Away with the Winding Crank!

"If only we didn't have to wind all the time."

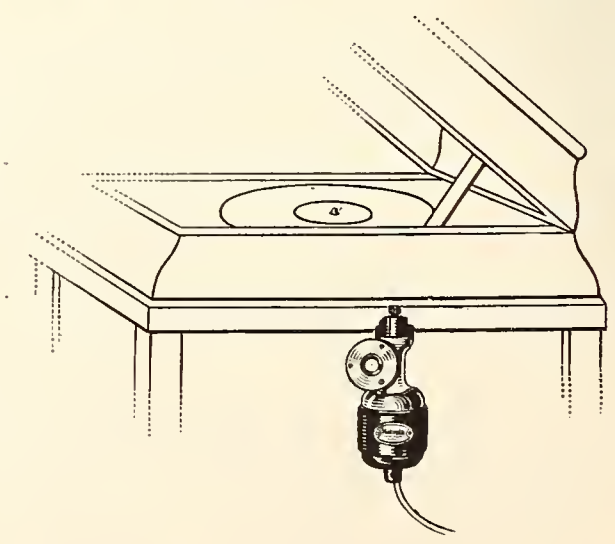
How many times your customers have said this!

The Motrola does away with winding by hand—makes complete the enjoyment of every selection.

Simple to attach—just unscrew the winding crank and put the Motrola in its place. Connected with electric current it winds automatically, insuring true tone and even time. Costs practically nothing to run. It can't get out of order.

Be one of the first to have a Motrola for demonstrating purposes.

Prices and all other information sent on request



JONES-MOTROLA, Inc.
171 Madison Avenue **New York, N. Y.**

Brown—"Didn't you sell Jones that same identical d——d machine for $200?"

Salesman (looking at Brown like a fond mother looks at her baby)—"No, I didn't."

Brown (screaming with rage)—"WHAT?"

Salesman—"Now look here, Brown, I didn't think you were that kind of a man. I liked you because I thought you intelligent and a gentleman, and when I learned that your father and my father used to go to school together, I just went the limit on price and gave you a $250 machine for $240, and I was called down good and proper by the head of the house for doing it—and now that is all the thanks I get from you for doing it."

Brown (puzzled)—"But didn't you sell Jones this same machine for $200?"

Salesman (looking at Brown triumphantly)—"No, I didn't sell Jones the same machine for $200, but I did sell Jones a second-hand machine of the same type for $200."

Brown (weakening)—"But I saw the machine and it looked as new as mine does."

Salesman—"Yes, exactly so; you see we used it for demonstration purposes, besides it was out on trial several times. I had the case all polished up and made to look like new, but the works are badly worn. Jones didn't notice that, and he thinks it is new, but for heaven's sake, Brown, don't tell Jones about it. He is not cheated, for he has his money's worth."

Brown (apologetically)—"Well, I just told my wife that you didn't look like a man who would take any unfair advantage of me, but just to keep her satisfied I promised her I would come in and see you about it the next time I was uptown."

Salesman—"I am glad you came in and gave me a chance to explain."

Brown—"I didn't intend to ever spend another dollar in this store, but I see that I was mistaken, and by the way, my neighbor is going to buy a machine and I am going to tell him not to buy it of anyone but you, because I know you will treat him right."

Salesman—"I appreciate your kindness, but for heaven's sake you didn't tell him what you paid for your machine, did you?"

Brown—"No, I didn't."

Salesman—"Well, don't tell him. Just say to him that you paid $250 and when I sell him I will just hand you a 'five spot' for your trouble."

Brown—"Thanks, I am glad I came. I will caution my wife not to tell anybody about Jones' machine."

"But later on Brown's wife told a dear friend in strict confidence about Jones' second-hand machine, that friend told another in strict confidence, that friend another, and finally some friend told Mrs. Jones in confidence, because she felt that it was her duty to do so.

"Jones hears of it and is furious, like Brown, he goes back to the store to clean up things and make that salesman look like 30 cents, but he is also reckoning without his host. Here is the way Jones cleans up things:

Jones—"Did you sell me that machine for new?"

Salesman (gaining time to marshall his wits)—"That is a funny question. What makes you ask that?"

Jones (angrily)—"There is nothing funny about it. You sold me a second-hand machine for new, didn't you?"

Salesman—"Who told you that?"

Jones—"I didn't intend to tell you, but I found out that you said to Brown that mine was a second-hand machine."

Salesman—"I am glad you came in and gave me a chance to explain. You know, Jones, you promised not to tell anyone how much you paid for your machine; besides I had trouble with the head of the house. He didn't want to let your sale go through because we were losing money on it, but I got him to consent when I explained that your good-will and influence was valuable to the house, but that's what I get for trying to treat you right. You see, it was like this: When Brown came in with blood in his eye, kind-of-sudden like, I had to do something, and do it darned quick, so I just told him that your machine was second-hand to keep him satisfied. What else could I tell him? But I am surprised at you. I thought you had more confidence in my honesty than that; besides you have the reputation of being an expert mechanic. Can't you see that your machine is new, absolutely new?"

Jones—"I didn't tell a soul about the price. If anyone told it, it must have been my wife. I said to her I didn't believe that it was a second-hand machine, but just to keep her satisfied I promised her I would come up and see you about it. I see your position and don't blame you for saying what you did, but I will keep this confidential, and say, by the way, I am going to bring up a friend who wants to buy a machine like mine. My wife didn't want me to bring him up until I saw you about that second-hand business. She was afraid you would cheat him, but I will explain it to her and it will be all right."

"Jones and Brown are fooled. If any more talk of their being cheated reaches them they will just 'say nothing and look wise,' each one feels a secret satisfaction in having received a better deal than did the other and each one feels grateful to that salesman and will recommend him to their friends and maybe after many years they will make up and spend their remaining days trying to figure out who was the goat. Under the Stevens bill this salesman could not sell a $200 model for $240, and neither could he represent and sell a second-hand machine for a new one, thus the consumer is protected.

"This kind of salesmanship talent is rare and costs the dealer more than the other kind, but the dealer adds the extra cost to the average price he receives for his machine, and again the consumer pays the retailer the retailers' cost plus a fair profit and plus the cost of the waste or lost motion resulting from price cutting.

"To prove that this kind of salesmanshp is rare and in great demand, I need only cite the notorious fact that all over this country there is a crying demand by piano dealers for salesmen, real salesmen, who can make good in the cut-price system. Did any one ever hear of a crying demand for salesmen who could make good in the sale of standardized articles, with uniform price, such, as for instance, talking machines?

"The result is that when the average consumer buys a $200 article under the cut-price plan he pays the dealer a larger average gross margin of profit than he pays to the dealer when he buys under the present uniform price system. In other words, the expense per cent. of selling a $200 non-protected article is much greater than the expense per cent. of selling a $200 talking machine under the uniform price plan.

CONTRACT FOR NEW PATHE FACTORY

Large Seven-Story Building to be Erected on Grand Avenue, Brooklyn, N. Y.

The Pathé Frères Phonograph Co., New York, has awarded the contract for the erection of a seven-story factory building, one hundred feet by eighty-five feet, on Grand avenue, Brooklyn, N. Y. Work is already under way, and the contractors have received instructions to rush the building to completion.

This additional manufacturing plant was made necessary by the remarkable strides which the Pathé Frères Phonograph Co. has made in the past year. The new building will be up to date in every particular, and will afford the company an opportunity to materially increase its production in every department.

KANSAS CITY PROVING BUSY TALKING MACHINE CENTER

Using Victrola for Concert Work—Smith, Barnes & Strohber Has the Columbia Line—Featuring Billy Sunday Records—Means & Pearson Co. Makes Change—Other Items

KANSAS CITY, Mo., May 6.—Conditions in the local talking machine field continue to be excellent. The Easter trade was very good, notwithstanding the demands of the fair sex for new apparel. Practically every dealer in town declared that the business was holding up in great shape. While other industries seem to be affected by the late spring which this territory is experiencing, the talking machine folks are doing volumes of business. The cry now is that of the past five months—"We want more stock!"

E. J. Scheusler, who has been connected with the Nowlin Music Co. for some time, is now located in Des Moines, Ia., connected with Davidson Bros.

S. R. Holdren, formerly connected with the Wells Music Co., of Paola, Kans., has returned there after an absence of some time in North Dakota, and has opened a store handling Victrolas.

The Means & Pearson Piano Co., 1217 Grand avenue, has sold its rooms at that place to the E. B. Guild Music Co., of Topeka, Kans., and that firm is now located there. The Victrola franchise, which Messrs. Means and Pearson had at that place has been retained by the Guild Co. The room has been altered and redecorated and is now one of the most attractive piano and talking machine rooms in the city. Messrs. Means and Pearson immediately opened a store at 205 East Tenth street, and have taken on a Columbia franchise.

When the announcement was made that the Smith, Barnes & Strohber Piano Co. was to make Kansas City a distributing point for the Southwest territory, much interest was aroused as to whether or not they would carry talking machines. The curiosity was satisfied when two classy little booths were installed on the first floor, which are to be devoted to demonstrations of the Columbia machine. In addition to this there are two more on the second floor. George T. Johnston, who is the local manager, will have charge of this department, pending the appointment of a manager.

John F. Ditzell, manager of the talking machine department of George B. Peck's Co., is very much gratified with the results his department is receiving from the invitations sent out urging the broader use of the Victrola for concert work. And to Mr. Ditzell, one exceptional point is the fact that many are coming in unsolicited, which leads him to believe that the Peck Co.'s offer is appreciated by the public.

The Wunderlich Piano Co., which handles the Victor machine, recently presented one of the most novel window displays seen here for some time. The entire exhibition was built on Indian relics. The floor was covered with striped red and black blankets, familiar to every squaw. Pictures of Indian maidens were set on dark brown pedestals in the window. Large Indian shields, eight old Indian flutes and an old ceremonial drum composed the unique part of the display. A brown Victrola XVI. was in the background.

The Starr Piano Co. at Kansas City has been invited by a group of manufacturers to participate in a series of demonstrations that will continue until all grocery and food stores of Kansas City are visited, the piano company to supply the entertainment feature of the program with phonographic music. The other members of the group are food manufacturers; the demonstrations will be given in the afternoons, 2 to 9, and each grocer will send out invitations to his own patrons. There will be four a week.

D. W. McKenzie, president of the Playerphone Talking Machine Co., Chicago, Ill., recently paid a visit to the local field. He was placing agents in the Southwest territory.

With the addition of a large piano department to the Jones store Co., immediately adjoining the Victrola department of that company, much needed room was gained, for when the piano department was built, four new booths were put in for Victrola and record demonstrations. Harry Bibb, manager, has been pleading for more space ever since Christmas, but on May 1 got the first additional inch. This will make seven booths for use, and allows more floor space for exhibition purposes. The week preceding Easter was, according to Mr. Bibb, "The best since the holidays."

Two local talking machine houses which are featuring the Billy Sunday records are the George B. Peck Dry Goods Co., and the Schmelzer Arms Co., both Victrola dealers. The famous evangelist came to Kansas City on May 1 for a visit of seven weeks, and no sooner had he landed here than these two firms began exploiting the records of the songs made famous by Mr. Rodeheaver, the Billy Sunday songster.

When Billy Sunday came to Kansas City on May 1, the Schmelzer Arms Co. packed up a Victrola XVIII., and sent it out to the mansion where the Sunday party is staying. The first record played for Mr. Sunday was "An Old Country Fiddler Hears Billy Sunday," and the athlete evangelist enjoyed it so much that he requested another hearing of it immediately. Along with the machine, which will remain at the Sunday residence until the party departs, was sent a large selection of records.

FREIGHT EMBARGO HITS MILWAUKEE

Talking Machine Men Suffer Greatly Through Holding Up of Shipments from the Factories —Big Real Estate Boom in Progress—Opera Season Helps the Record Trade

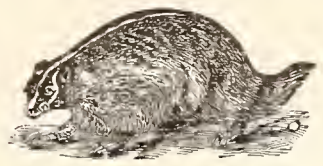
MILWAUKEE, WIS., May 10.—The ever-increasing difficulty experienced by Milwaukee talking machine dealers in getting stocks of machines and records from the East, because of the acuteness of the freight embargo and car shortage situation, is the only unfavorable feature of an exceedingly good business condition. For a time the embargo resulted only in delaying deliveries, but instances have come to notice where deliveries are not being made at all. The express lines have been resorted to by dealers to get immediate delivery of the goods needed most, but it is obvious that profits are rather short when express bills are considered.

The Railroad Commission of Wisconsin has interested itself in the car shortage situation and a few days ago issued an appeal to the railroads, shippers and receivers, to co-operate more closely with a view to making the best of the conditions brought on by embargoes at Eastern terminals. The commission says there is much waste by reason of the failure of shippers to load cars up to the maximum weights. Small loading actually amounts to the loss of services of many cars, and cars are precious.

"Business is fine and getting better" is the report from every talking machine dealer. The bouyant spirit in business generally is reflected in the large increase in sales. Competition is keen and with the entrance of new manufacturers into the field, competition will grow even keener. The business done by representatives of the low-priced machines does not seem to have affected the business of the regular dealers to an appreciable extent. It is figured that people who buy the cheap boxes probably would never buy a regular machine. However, the effect of the cheap goods may turn to good advantage, for each purchaser is a future prospect for a real talking machine.

Milwaukee's prosperity may be noted from the building inspector's report showing that building operations during the first four months of 1916 were $2,000,000, or nearly 100 per cent. in excess of the volume of the same period of 1915. Talking machine dealers see a prospect in every new home that is built. Likewise, the numerous large hotels, clubs and similar buildings being erected this year furnish plenty of prospects, for to-day no institution of this kind is complete without a battery of talking machines.

The two-day engagement of the Boston Grand Opera Company in Milwaukee, May 1 and 2, created fine business in Columbia records, many of which are made by artists of this company. Artists who had been little known previously were brought into the public eye, and Columbia dealers used newspaper display space to good advantage in connecting up the Boston singers with Columbia records.



PERSONAL SERVICE

The members of our Company are always available and will gladly see you personally or write you at any time we can possibly serve you.

Why not communicate at once with us?

BADGER TALKING MACHINE CO. 135 Second Street MILWAUKEE, WIS.

VICTOR DISTRIBUTORS

The Edison Shop, the retail branch of the Phonograph Co., of Milwaukee, Edison jobber, has added two salesmen to its local staff and is greatly extending its retail business. The new men are H. Fuerstenau and Walter Junkerman, young men of the "live wire" type who have lost no time in getting things under way.

James Schoonmaker has been appointed manager of the talking machine department of the Boston Store, in this city, under the policy of the management to make a feature of the music departments. About $5,000 is being expended for remodeling the space occupied by the department, and for new demonstrating booths, record cabinets and other accessories. It is planned to make the department one of the most inviting places in Milwaukee. Mr. Schoonmaker has been associated with the Boston Store organization for several years, and the appointment as manager is in the nature of a promotion for merit.

The Edmund Gram Music House, 414-16 Milwaukee street, is now devoting its talking machine department to the sale of the Aeolian-Vocalion and the Columbia, which was taken on shortly after the Gram house contracted with the Aeolian Co. for the exclusive representation in this city. Paul Seeger, manager of the talking machine department, left May 3 for the East to spend some time at the Aeolian plant and to rest. He is accompanied by his wife and plans to make a short tour of large Eastern cities before returning to Milwaukee. There was an interesting contest at the Gram house for the honor of being the "first purchaser" of an Aeolian-Vocalion. The palm went to Bernard Fahy, of the Concrete Builders' Association, who was just fifteen minutes ahead of Miss Catherine Grothey, of Chapman's, in closing the purchase. The Gram house is experiencing the effect of the freight embargo and can hardly get enough machines to supply the demand.

The Badger Talking Machine Shop, "Milwaukee's Exclusive Victrola Store," moved into its new quarters at 425 Grand avenue, on May 1, and at this time is still busy with the arrangement of stocks and the hundred and one other things that go with moving. The new store is one block west of the old location, 312 Grand avenue. It affords more than 7,500 square feet of floor space, divided into two floors and basement. The advertisements announcing the removal say that this is "The largest exclusive Victrola store in America." The feature of the new store is the recital hall, which seats 300 comfortably. On the main floor are the general and private offices, twelve demonstration booths, reception and waiting room, cashier department and ticket office, and stock rooms for records. There are four extra large booths on the second floor, supplementing the large recital hall. The basement is devoted to receiving and shipping, repair and inspection departments. The Victor jobbing business is still conducted at the old stand, 135 Second street. Harry A. Goldsmith, secretary of the company, is enthusiastic over the condition of business in both retail and jobbing lines, and like others, says the only disquieting feature of the situation is the difficulty in getting enough machines and records to go around.

The Sonora line made its first bow to the public of this city, or a select portion thereof, on the evening of April 25, when Charles J. Orth, 274 West Water street, gave a recital before the members of Daniel Webster Council, 1472, Royal Arcanum, and their friends, in Odd Fellows' Hall. Mr. Orth used the Sonora phonograph and player, and was assisted by Mme. Anne Janzer, soprano; Evelyn Winter, violin, and Harry Ransom, whistler. The phonograph's part of the program aroused great enthusiasm. Mr. Orth plans to repeat the program before Garfield Lodge, Knights of Pythias, later this month, and has many calls from fraternal organizations.

W. W. Warner, the well-known piano and talking machine dealer of Madison, Wis., who died recently, left an estate valued at $240,000. Charity is liberally recognized in the disposition of the funds.

NEW COMBINATION OUTFIT

The Nanes Art Furniture Co., New York, manufacturer of Savoy gramophones, has placed on the market a new combination outfit, consisting of the No. 25 Savoy, with a cabinet to match. This combination has met with popular favor in the short while it has been on the market, and the factory is working steadily to keep pace with the orders.

The St. Louis (Mo.) Star recently published a photograph of the downtown store of Hellrung & Grimm, agents for the Pathé Pathephone, with a description of the Pathephone and a short history of the concern.

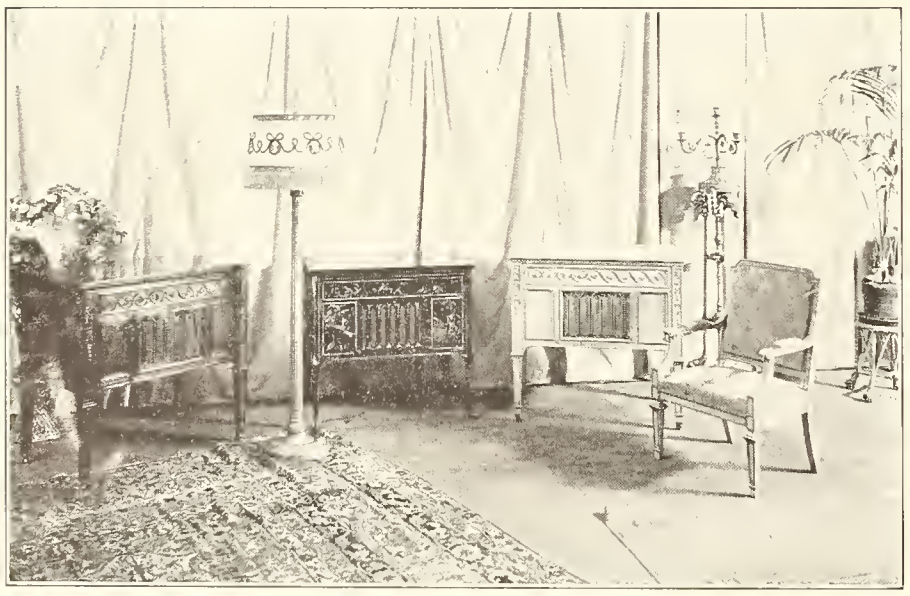
AEOLIAN-VOCALION WEEK PROVES A GREAT SUCCESS

Special Advertising, Displays and Demonstrations Features of the Week—Salons at Aeolian Hall Beautifully Decorated—Special Art Styles of Vocalions Attract Attention

Aeolian-Vocalion week, which was introduced recently by the Aeolian Co., New York, proved to be the most successful event which this company has sponsored in quite some time. During the past year or two the Aeolian Co. has launched numerous special weeks devoted to distinctive musical programs or featuring new lines of instruments, and every one of these "weeks" has been successful from every standpoint. Aeolian-Vocalion week, however, far outdistanced its predecessors from every standpoint, and materially enhanced the prestige of the Aeolian Co. in the phonograph and artistic worlds.

Vocalion Salons During Aeolian-Vocalion Week

Aeolian-Vocalion week introduced to the public an exhibition of a group of original Aeolian-Vocalion art styles, accompanied by a musical program rendered four times daily. Large-sized advertisements appeared in all of the daily newspapers announcing Aeolian-Vocalion week, and the dignified and quality character of this publicity served to impress the general public that Vocalion week would be an event of more than passing interest. Illustrations of a few of the more popular Aeolian-Vocalion art styles were presented in the newspaper advertising, and a cordial invitation was extended to everyone to visit the Aeolian salons at Aeolian Hall, where the musical program would be presented free of charge.



A Group of Art Styles

Visitors to the Vocalion headquarters on the third floor of Aeolian Hall found the salon beautifully decorated, with the art instruments, twenty in number, grouped around the floor, according to the art periods they represented. An old-fashioned Colonial garden had been constructed at one end of the salon, adjoining which was a reproduction of a typical music room in a country home, furnished with an Aeolian-Vocalion, a Pianola and other appropriate furniture. In this garden the musical program was given, the artistic beauty of the scene making a fitting background for the entertainment, which was under the supervision of Gerard Chatfield, of the Aeolian recital department.

In addition to the twenty art style Aeolian-Vocalions, there was also on exhibition the complete regular line of Aeolian-Vocalion models, the entire display representing a group of phonographs ranging in price from $35 to $2,500, one of the most comprehensive talking machine exhibits ever shown.

The art instruments were divided into three groups; the instruments in group one harmonizing with the furniture of early English character, such as Elizabethan, Jacobean, William and Mary and others. Included in this group were instruments in gray, French walnut, gray oak and rich dark brown oak. Group two comprised instruments suitable for rooms with furniture of Louis XVI. or Adams character. This group included one of the most beautiful Vocalion styles on exhibition, a model in Japanese black and gold lacquer, which won the admiration of all the visitors. Group three presented instruments designed to harmonize with Adam, Sheraton and Hepplewaite furniture. Among these instruments were a Style R Vocalion in mahogany and shaded satin wood inlay. Another instrument of striking beauty was a white enamel Aeolian-Vocalion which was made to order for a prominent local financier. These art styles of Vocalions represent advanced ideas in the realm of distinctive phonograph design construction. The company is utilizing the service of a staff of skilled artists and decorators to make the Aeolian-Vocalion a musical instrument of distinctive character, and last week's display emphasized the remarkable strides which it has made in the past year.

In addition to the presentation of a musical program four times daily, the company repeated the program three nights during the week in response to the requests of many patrons who were unable to be present in the day time. All of these concerts, afternoon and evening, were attended by capacity audiences, who were enthusiastic in their approval of the Vocalion's musical and distinctive qualities.

One of the week's special events was Friday night's program, when a large number of architects and decorators were present as the company's guests. B. G. Knight, of the Aeolian art division, who has been an important factor in the production of Aeolian-Vocalion art styles, made an interesting address at the commencement of the program, which was keenly appreciated by the professional men in attendance.

The program for Aeolian-Vocalion week was as follows: "Spanish Dance No. 2," record by Pablo Casals, Miss Louise V. Stallings, demonstrating the use of the Graduola; "Angel's Serenade," soprano selection by Miss Stallings, accompanied by the Aeolian-Vocalion; "Primrose," petit ballet in three episodes, by Miss Ruth Cramer, danseuse, the Aeolian-Vocalion furnishing the music; "Spring's Singing," by Miss Stallings, with Pianola accompaniment.

Miss Stallings Demonstrating the Graduola

EDISON DIAMOND DISC IN HAVANA

Exclusive Agency for That Line Secured by the Harris Bros. Department Store

The exclusive agency for the Edison Diamond Disc phonograph in Havana, Cuba, has been secured by the big department store of Harris Bros., which has given over a very large department to that line with Adolfo Arango and A. Guzman in charge. The Edison Diamond Disc phonograph has been particularly well received in Havana and frequent demonstrations have been held.

DEATH OF GEORGE BLACKMAN

George Blackman, a brother of J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, Victor distributor, died suddenly on April 20 from pneumonia. Mr. Blackman had been associated with the talking machine industry a number of years ago, and was well known in the local trade. He is survived by a wife and child. The funeral services were held on Sunday, April, 23, from his late home.

The Rinker Book & Stationery Co., of North Platte, Neb., is featuring the Victor line of machines and records with great success in that territory.

Stimulates your entire business and increases your record sales

AN ELABORATE OPERA WINDOW

Eilers Music House, in Spokane, Marked the Arrival of the Boston Opera Co. in that City With $1,500 Display of Machines and Records

SPOKANE, WASH., May 2.—During the recent visit of the Boston Opera Co. to this city, the Eilers Music House presented one of the most attractive window displays which has been shown in the local talking machine trade for some time past. The company featured the Columbia line of graphophones and records to excellent advantage, and the accompanying photograph will give a fair idea of the originality and effectiveness of the display.

Attractive Window Display of Eilers Music House

It is stated that this window featured about $1,500 worth of goods. The gown on the figure in the window is valued at more than $500, and the tapestry to the left in the picture and the vase in which the flower rests are both articles of considerable value and were appreciated as such.

One of the striking features of the display is a Columbia electric Grafonola, which has achieved signal success in this territory. This window sold Columbia graphophones and records in addition to providing an ideal publicity medium.

RECORD ANNOUNCES ELOPEMENT

Denver Girl Breaks the News to Her Parents by Means of a Talking Machine Disc

DENVER, COLO., May 8.—A new use for the talking machine has been discovered by a young lady here. Miss Hazel Israels eloped recently with Robert Christ, of the Triangle Film Co., and instead of notifying her parents of the elopement by a telephone or telegraph message, the young folks bought a record of a song ending with the words, "Goodby, everybody, I got married to-day," and sent it to the bride's parents. The record was delivered at the Israels' home while a dance was going on there, at which the guests had been worried over the non-appearance of Miss Israels. The record served to explain her absence and the soothing effect of the music produced the forgiveness of her parents.

TALKING MACHINE EXPORTS

The Figures for February Presented—Exports Show Increase for the Month

WASHINGTON, D. C., May 8.—In the summary of the exports and imports of the commerce of the United States for the month of February, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 4,575, valued at $105,892, were exported for February, 1916, as compared with 1,470 talking machines, valued at $36,880, sent abroad in the same month of 1915. The total exports of records and supplies for February were valued at $64,930, as compared with $40,672 in February, 1915. For the eight months 25,140 talking machines were exported, valued at $748,530, and records and supplies valued at $566,038 were sent abroad for that period.

TALKING SIGN CO. INCORPORATED

The Electric Talking Sign Co., of New York City, was issued a certificate of incorporation by the Secretary of State at Albany last week. The concern will manufacture electrical display advertising devices. The capitalization is $150-000, the incorporators being C. A. Gardner, A. S. Reid and O. M. Rogers, of 608 Dearborn street, Chicago, Ill.

SPEEDING UP THE WESTERN UNION

Scientists have discovered that music will make hens lay more, make cows give more milk and even typists run their machines more swiftly. This good work should continue until a portable talking machine for messenger boys is produced.

Columbia Records TRADE MARK Note the Notes

Do you know that our Foreign Record Department issues records in thirty-eight (38) different languages, and that thousands of Columbia dealers in this country are making good, regular money on these records?

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

BALTIMORE BUSINESS ACTIVE DURING PAST MONTH

Cohen & Hughes Open Exclusive Victor Store—Have Also Taken Lease on New Building Now Being Erected—Columbia Headquarters Now Doing Wholesale Business Exclusively—Big Demand for Aeolian-Vocalions—New Warehouse for National Piano Co.

BALTIMORE, MD., May 5.—Several very important events marked the April business in Baltimore, which was very good in all quarters and gratified those dealers that were able to get sufficient machines and also pleased others, who were only able to get part of their demands.

One of the big events of the month was the opening of the exclusive Victor store by Cohen & Hughes, on North Charles street. This establishment is one of the finest in point of arrangement and attractiveness that Baltimore boasts of. Its location, as well, is one of the best and it gives the Victor line another fine place in one of the most important thoroughfares in the retail shopping and downtown business district. White enamel booths with Colonial furniture and potted plants give the place a very restful atmosphere. The front of the store has the first half circular show window effect in Baltimore. The new glass permits those on the outside to have an unobstructed view of what is going on within and those in the store also have a clear vision of the outside. Each of the booths carry the Victor models and a full line of Victor records is also on hand. A handsome lounging room with easy chairs greets the visitors at the entrance. Henry Little is in charge of the branch, which was the third Cohen & Hughes store to be opened in Baltimore.

Another noteworthy announcement was that by Cohen & Hughes for a new building at 220 and 222 North Howard street, which will house the various lines carried by the firm and especially a big stock of Victor goods, for the firm is Baltimore's largest Victor distributor. The structure will be a five-story affair with basement and the lot is 30 by 100 feet, while the building will be 70 feet deep. The new location will place the firm in another ideal spot in the very heart of the retail shopping district. The firm has taken a fifteen-year lease on the structure and the rental for the period is said to be $175,000. I. Son Cohen, who trades as Cohen & Hughes, is well pleased with both of his recent ventures.

Howard Weber is on a tour of Pennsylvania and Arthur Wertheim is touring in the South with the Victor lines for the firm.

A. J. Heath, manager of the Columbia headquarters at Baltimore, is a most happy man due to the volume of business done in April. "Last month," said Mr. Heath, "was the greatest April business we ever did and it is only sligthly behind December of 1915, which is the greatest month's business ever done in Baltimore. We are looking forward to a good May business, for we expect to receive a big shipment of machines."

This was the first month that the Columbia headquarters did not do any retail business and by devoting itself to the wholesale end greater results were accomplished. Mr. Heath believes it is the best move that could have been made when the headquarters gave up the retail store for now he and his force are in better position to handle and take care of the wants of the Columbia dealers.

James P. Bradt, general sales manager of the Columbia Co., spent several days in Baltimore and was highly pleased with the business being done here. At one time he was in charge of the Baltimore headquarters and he feels proud of the record his "old spot" is making.

Oden Jester, who was in charge of the retail floor for the Columbia Co., is now the city salesman for the headquarters. P. W. Peck is looking after the Carolina territory for the Columbia Co. from the local headquarters.

Wonderful sale was had in records during the month by the Columbia line, especially with A 5793, the prologue from "Pagliacci" and Vision Fugative from "Herodiade.

W. C. Roberts, for E. F. Droop & Sons Co., Victor distributor, reports April business ahead of the same month last year, but still wants more machines. He has a big stack of orders for Styles 10 and 11 and is hoping for a big shipment of them this month and he feels that this May will go ahead of last year. Edward H. Droop, of the firm, visited the Victor headquarters during the month. William Reiser, of the Droop salesforce, made a tour of the customers in Pennsylvania.

Both the wholesale and retail talking machine business with H. R. Eisenbrandt Sons, Inc., is booming, reports Albert Eisenbrandt. He says that they are selling all the machines they can get their hands on. The establishment is very busy and all the employes are being kept on the move.

The Sanders & Stayman Co., sole representatives of the Aeolian-Vocalion in this section, reports that the demand for these machines continues big. William B. Turlington, the manager, says that almost all the machines being sold are of the higher price.

Jess Rosenstein, of the National Piano Co., Pathé distributor, is highly gratified with the business being done by his line. His new warehouse, which adjoins the rear of his salesroom, is rapidly nearing completion and this will give him added facilities to handle the line. New customers are expected to be announced shortly. Records are also coming in well and the Pathé dealers are well satisfied with the line.

With William Knabe & Co., the Victrola business was fair during April, reports Milton Boucher, the manager of the department. Records of the songs used by the Billy Sunday workers have been selling exceptionally well since the evangelist left Baltimore.

GOOD BUSINESS IN DETROIT

Real Estate Boom Has Not Affected the Talking Machine Trade—Dealers' Association Holds Meeting to Discuss Approval System—Friedrich Working for Stevens Bill

DETROIT, MICH., May 9.—No doubt everybody in the trade by this time has heard more or less about the wonderful real estate boom in Detroit—the wonderful prosperity of the motor car industry—and how these industries are making inroads upon the piano and other lines of trades, where merchandise is sold on the instalment basis. However, the writer after a thorough investigation can report that this prosperity is in no way affecting the talking machine business. During the month of April dealers more than held their own on machine business while the demand for records was stronger than ever. The "proof of the pudding" is the fact that every dealer has fond difficulty in getting more records of the popular hits.

The Detroit Talking Machine Dealers Association had a very interesting meeting in April at the Hotel Cadillac, devoting most of the evening to a discussion of whether or not the approval plan is a good plan to continue. There is quite a change among the dealers on this subject as compared to a year ago. The writer can remember last year, when most any dealer would tell you that it was really necessary to sell records on approval—because they did not have enough booths to take care of all the people that would otherwise come down. But at the present time, the dealers feel just the opposite; they contend that while the approval plan does sell more records, it also carries with it a lot of evils and additional expenditures. Summing up this problem, suppose by the elimination of the approval system, dealers do not sell as many records, they must remember that they won't have as many expenses either, so that their net profit will really be as great—if not greater.

The association held another meeting Monday evening, May 8, at the Hotel Charlevoix. Previous to the meeting, they sat down to a fine banquet as the guests of A. A. Grinnell, a director in the hotel company, and also treasurer of Grinnell Bros., who are the Victor distributors in Detroit.

The Independent Talking Machine Shop, 302 Liggett Building, Detroit, has recently opened up for business selling a talking machine at $59.75.

Julius A. J. Friedrich, Jr., of the Friedrich Music House, Grand Rapids, Mich., has been doing some very effective work in that city for the passage of the Stevens bill. The Association of Commerce recently held a meeting to thoroughly discuss this bill. Mr. Friedrich passed around a petition sent him by the Victor Co.. and succeeded in getting forty-six prominent business men to sign it in one day. When the bill was voted upon by the organization it passed unanimously. There wasn't a single argument given as to why the Stevens bill should not pass.

E. K. Andrew, of the J. L. Hudson talking machine department, Detroit, has made several business trips during the past thirty days. His first trip was through the East and his second trip was through the Middle West. Mr. Andrew wanted to learn what the other cities were doing and he benefited greatly.

The Columbia Graphophone Co. has moved its wholesale branch in this city from 114 Broadway to 401 Woodward avenue. It can well be proud of these new quarters which are ideal for the purpose. Wholesale business only will be transacted in the future by the Detroit branch. District Manager Mills and City Sales Manager Lind are very much pleased with the change and say that the new quarters cannot fail to serve as an inspiration to all those connected with the Columbia branch.

Max Strasburg, now at 74 Library avenue, says that business is coming along nicely and that he is exceedingly well satisfied with the change in locations.

WE MAKE

Tone Arms and Sound Boxes

For all makes of Talking Machines

ALSO

Attachments for Victor, Pathé, Edison and Columbia Machines

Let us tell you about them before placing your orders

The Union Specialty and Plating Company

SPECIALISTS IN PHONOGRAPH PARTS

409 Prospect Avenue, N. W. CLEVELAND, O.

W. W. Gunn, who recently opened a music store at 794 Woodward avenue, is handling the Sonora phonograph. This phonograph is now being distributed in Detroit by dealers on both the east and west side.

Harry C. Shea has tendered his resignation as manager of the Pathephone Co., of Detroit, 114 Farmer street, and has been succeeded by J. R. Peckham, formerly in the talking machine business on the Pacific Coast. Mr. Peckham will have the active management of the wholesale as well as the retail business. The Pathephone Co. has the Michigan wholesale selling rights for the Pathephone.

Clarence Gennett, treasurer of the Starr Piano Co., also maker of the Starr phonograph, was in Detroit on April 28.

Frank Bayley will hereafter be located at 114 Broadway, Detroit, having taken a lease on the former premises of the Columbia store. Mr. Bayley is a live-wire Edison dealer and he says he is selling more of them every month.

The Ecco Talking Machine Co., 224 Twenty-first street, Detroit, is busy manufacturing its new machine which retails at a low price.

R. B. Alling, manager of the Edison Shop and the Phonograph Co., of Detroit, reports that retail and wholesale business is quite up to expectations and that the number of State dealers is constantly getting larger and larger. Mr. Alling is after "quality" dealers in preference to "quantity."

NEW EDISON CUT CATALOG

Thomas A. Edison, Inc.. have just issued a new catalog of advertising cuts for dealers' use in connection with their advertising in newspapers, programs, leaflets, etc. This new catalog covers over 150 subjects, including cuts of every model of the New Edison and the Edison Diamond Amberola, together with special display cuts of home scenes including a New Edison or Diamond Amberola, portraits of Mr. Edison, portraits of the various Edison artists, dance cuts, etc.

A FRANK DISCUSSION OF THE "ON APPROVAL" EVIL

The Handicap to the Talking Machine Trade Represented by Sending Records on Approval Is Explained by the Following Article—The Sealed Record Plan Discussed

Much has been said recently in The World regarding the growing evil of the "record-on-approval" policy which has grown to such dimensions in the talking machine trade. An interesting article on this subject, which appeared in Printer's Ink, makes a special appeal because of its timeliness. It reads:

"Almost without exception every trade is troubled more or less by bad buying habits. 'Our customers demand it' it the usual explanation given. Goods on approval, cancellation of orders in progress, returned goods, trade-outs, too long credits, 'rush' orders, unnecessary sales on installments, etc., are some of the privileges which are most commonly abused, and which frequently grow into bad buying habits. 'Customers demand them'—and the customer is king. Therefore they persist in spite of the fact that they are individually recognized as detrimental to the interests of both buyer and seller alike . . . .

"Manufacturers in many different lines will be interested in the efforts which are being made in the talking machine trade to overcome the habit originally encouraged by a few over-zealous dealers, of demanding records on approval. By slow degrees the practice has grown, until leading distributors assert that it constitutes an actual danger to the future development of the industry. The life of a talking machine record—so far as perfect reproduction of sound goes—is limited. Each time a record is played its period of usefulness is shortened, and a record which has been out on approval half a dozen times without finding a purchaser is not going to give perfect satisfaction to the man who does finally buy it. If he gets three or four of these partly worn-out records he loses interest in his machine, and stops buying records altogether. That is the most serious thing that can happen, for the prosperity of the talking machine industry is coming more and more to depend upon continued record sales.

"It does not help matters, in so far as the goods-on-approval question is concerned, that the talking machine dealers got themselves into their present predicament by zeal in promotion work. As the talking machine trade developed it was but natural that dealers in all parts of the country should push the demonstration of their instruments in the home just as the demonstration of sewing machines, carpet sweepers, vacuum cleaners, etc., has long been carried on along the same lines. Indeed, in the case of home entertainers of the phonograph class there was an especially good reason for home demonstration in that such an instrument almost invariably displays its tonal qualities to better advantage in the environment of a private residence than in a store, devoid of satisfactory acoustic properties and with the distracting noises of street traffic, etc., nearby.

"In many instances it has not been the custom to confine the home demonstration of an instrument to the presentation by an outside salesman; rather has the prospect been encouraged to receive the musical treasure box into his home for a few days—preferably 'over a holiday' or during a 'week end'—and to try it in his own way, at his leisure and in the company of members of the family, neighbors and friends. For such a try-out, a collection of records must needs be sent with the instrument and a customer educated to this method of selection at the outset very naturally desires to continue it when it comes to placing the repeat orders which are so largely responsible for the unwavering prosperity of the talking machine trade.

"With the growth of this 'on suspicion' business many talking machine distributors have, however, suddenly found themselves in deep water. Nor is it merely that a heavy investment is incurred, although this consideration weighs, as may be surmised when it is explained that it is nothing unusual for a talking machine dealer to have out on approval at one time as many as 1,200 records, ranging in price from 65 cents to $7.50 each. Any business man can appreciate the burden of bookkeeping that this involves, and on top of that there is swollen delivery expense by reason of the fact that most approval prospects ask to have records sent to their homes for trial and called for at a stated time or upon notification.

"External rather than internal, though, are the difficulties that have suddenly made this question of goods on approval the issue of the hour in this field. The dealers might have stood for the heavy overhead involved in this method of selling, but what has raised the question of whether the practice is really worth while is the losses incurred owing to the damaged or unsalable condition in which a considerable share of approval goods are returned by careless prospects. Almost every dealer has his own tale of woe, with variations as to his troubles in this direction. Stories of records retained for long periods and then returned with no purchases; of approval records almost worn out by repeated playings with heavy needles; and of damage to records for which the 'borrower' would assume no responsibility, make up a dire chapter. . . .

"Some talking machine record distributors have adopted the obvious solution of putting in force an iron-clad rule to allow no records to go out on approval and in some cities an effort has been made to induce all the local dealers to subscribe to an agreement to this effect. Nevertheless, all is not plain sailing. In the average city it has been found that there is a certain proportion of the merchants who do not incline thus to bind themselves, and even in the case of an individual concern that firmly believes in the principles of the thing it happens now and then that a request for records on approval is

BUFFALO

RAILROADS: Look at the list of railroads running out of Buffalo: New York Central, West Shore, Lake Shore, Nickel Plate, Wabash, Erie, Pennsylvania, Lackawanna, Grand Trunk, Michigan Central, Lehigh, B. R. & P. and B. & S.

EXPRESS COMPANIES: Four express companies will give you a complete service: American, National, Adams and the Wells Fargo.

Doesn't it stand to reason that we mean what we say when we remark: Andrews' Victor Service is FAST and COMPLETE.

W. D. ANDREWS
BUFFALO, N. Y.

WHY SUBSTITUTE?

EXPERIENCE and experiments have proven that the great majority of mica substitutes become worn out or "tired" after playing several hundred times. This is substantiated by the results of tests made by tonal experts.

Write for a copy of "Why Substitute?"

JAMES FRAZEE
30 Church Street, New York

received from a good customer, to offend whom might be questionable judgment.

"What makes the whole problem so particularly perplexing is that in the case of talking machine records there are certain good sound reasons for giving the prospect his head in the matter of a try-out such as would not apply in the case of photo cameras or automobiles or other wares that require expert manipulation to best show their paces. Any owner of a talking machine can play a record quite as satisfactorily as the professional salesmen, and experience has proved in repeated instances that out of a given number of records in recital a prospect will buy a greater number if heard in his own home than if listened to at a music store. Then too, there are incidental considerations, such as the fact that callers at a home where records are records on trial frequently order records that they have heard in this way.

"Those distributors who seek to curb the evils of the approval system without uprooting the entire plan of introducing goods into the homes have had some success by inducing customers to sign an agreement whenever a collection of records is taken out of a store 'on loan.' In some cities distributors have cooperated in the adoption of a uniform draft of an agreement. There are usually three or four main stipulations in such a contract. First, the prospect agrees to return unaccepted records within a reasonable time—forty-eight hours is a favored time limit, this permitting the withdrawal of records from stock over Sunday. Second, a promise is made to take from the consignment minimum purchases of a certain amount or a certain number of records—33 1-3 per cent. of the total valuation being a sales guarantee that is used by many dealers. Third, the recipient of the records obligates himself to return rejected records in good condition or to pay for any that are worn or damaged while in his possession. In order to aid beforehand in settling the questions that might arise as to what constitutes reasonable wear and tear in the case of records played on trial, some dealers add the agreement to be signed a fourth stipulation to the effect that the records shall be played only with needles of a type believed to impose little or no wear on the playing surface.

"More ingenious yet are the trade-retention schemes which have been devised by distributors who are determined to eliminate entirely the withdrawal of records on approval. One antidote that has been almost universally adopted is the provision at the talking machine store of individual sound-proof booths, where a prospect may try in seclusion the records in which he is interested, playing each selection over several times if he prefers, but taking from the store only such numbers as are bought and paid for. A variation of this plan, introduced in some quarters, is the demonstration by telephone. Any telephone subscriber is enabled to listen to any desired numbers from the record catalogue, and discs chosen as the result of such long-range demonstration are immediately delivered C.O.D. or on charge account.

The "Sealed Record" Plan

"But by long odds the most significant plan—and the plan which gives greatest promise of ultimate success—is that which involves the exclusive sale of new records in sealed envelopes. 'People are getting the habit of demanding records on approval,' says the distributors who are advocates of the 'sealed record' plan. 'Very well; we shall proceed to develop a counter-habit which shall act as an antidote. We shall not directly attack the habit of records on approval; in fact we shall say nothing about it. On the contrary, we will advertise the fact that our records are sold *only under seal,* which guarantees that every one is in perfect condition. We will educate our customers to demand records under seal, to look for the seal before they buy a record—in short, to develop the habit of buying only *new* records. They will not ask for records on approval, because they will know that we can't break the seal and still sell the record as new. In brief, instead of trying to break up the bad habit by direct action, we will try to substitute a good habit in place of it.'

"One of the large Victor distributors, who controls his own retail outlets, asserts that the plan has enabled him to do away entirely with the practice of sending records on approval. He has advertised it widely in the newspapers, and the retail salespeople are able to meet any ordinary objection by showing the sealed record and explaining its purpose. Of course, any desired records are demonstrated in the stores, but none go out of the stores except on purchase and under seal. By attacking the problem in a positive, constructive way, he has practically solved it, so far as his own business is concerned. All of which suggests the possibility that certain other buying habits may be overcome by the process of developing counter-habits. It is just as easy to establish a good habit as a bad one, though it may not always seem to be so."

BREAK RECORDS FOR RETAIL ADS

Emahizer-Spielman Co., of Topeka, Kan., Celebrates 50th Anniversary in a Big Way

KANSAS CITY, Mo., May 4.—To be able to pick up a daily newspaper and discover a section of fourteen pages occupied by one firm, sounds almost impossible. Yet in Topeka, Kan., the residents of that bustling Western city, discovered in their Topeka Daily Capital of April 17 a complete fourteen-page exploitation of the goods handled by the Emahizer-Spielman Furniture Co.

It is further interesting to note in this remarkable example of advertising enterprise that talking machines played a prominent part. In addition to handling pianos and furniture, the Emahizer-Spielman Co., specialize in Columbia and Sonora products, both of which composed an important and imposing part of the company's publicity exhibit.

The general plan of the section was unique enough to delude the reader into believing he was reading a regular section of the paper. Each page was devoted to articles sold by the firm, but carefully distributed in this strictly "advertising copy" were columns of "news matter," which dealt in a breezy manner with notes of interest concerning the articles exhibited.

This advertisement has attracted attention throughout the entire country, as it stands in a class by itself for large scale display. The Topeka Daily Capital is the publication owned by Governor Capper and it has a very large circulation in and around Kansas.

INCORPORATED

The General Accessories Co., Inc., has been chartered with a capital stock of $75,000 to engage in the manufacture and sale of talking machines, magnetic reproducers, phonographs, chemicals, etc. The incorporators are R. Parr, H. J. Vredenbergh and F. H. Vickery.

ESTABLISHED 1868

Columbia Graphophone Co.
Woolworth Building, New York

ANOTHER COLUMBIA FACTORY

Three-Story Addition to Present Factory Being Planned—Second Addition Since the First of the Year—Will Be Ready July 1

The American Graphophone Co. recently awarded a contract to Samuel Austin & Son Co. for the erection of a three-story addition to the Columbia plant at Bridgeport, Conn., making the second large building addition to the factory this year. The proposed building will be 400 feet long and 25 feet wide.

The addition is an extension of the building where the offices were located before the factory was rearranged. The building will be used for manufacturing purposes and will also contain the shipping department. The work started on April 20 and the contract calls for completion within two months from that date. The building will be entirely of brick, steel and wood, along modern lines and of fireproof construction.

CATALOG OF VICTOR DANCE RECORDS

Up-to-Date Listing of Dance Music in New Volume—Hints on Dancing by the Castles

There has just been issued by the Victor Talking Machine Co., Camden, N. J., a new booklet devoted entirely to Victor records for dancing, which has been brought up to date in every particular, and includes the many new Victor dance records issued in the past year. The cover bears portraits of Mr. and Mrs. Vernon Castle, and pictures of those famous dancers executing various steps, also occupy several pages of the booklet itself. The various popular dances, such as the one-step, combination waltz, fox-trot, tango, etc., are described in detail. With the lengthy list of music included in the volume, it is a most interesting one.

OPENS NEW YORK OFFICES

The Castle Phonograph Co. has opened New York offices at 53 Maiden Lane, and is planning to merchandise a complete line of phonographs retailing from $25 to $150. For the present, it will concentrate on developing a market for the $25 model, which is known as Style E. The sales division is under the direction of C. M. Mayers, who has already sent out three men to visit the trade.

WITH THE TRADE IN MONTREAL

Heavy Demand for Marimba Band Record—What Victor Advertising Means—Offer to Remove Talking Machines for Customers

MONTREAL, QUE., CAN., May 4.—The Berliner-Gram-O-Phone Co., Ltd., Montreal, report an exceptional large demand for record No. 17,-928, by the Blue and White Marimba Band.

The John Raper Piano Co., Ottawa, Ont., have twelve soundproof Victrola demonstrating rooms and are handling a large volume of business of this line.

Orme, Ltd., Ottawa, Ont., in a recent advertisement, said: "It costs money to advertise! The Victor Co. bears this in mind when advertising a record. It must be a good record. It would be a serious mistake and a waste of money to recommend anything but a good record. Think this over when you read above."

Patriotic decorations predominated at Steven-son Hall recently when a most successful Easter bazaar was held for the benefit of the Homeopathic Hospital. An Edison disc machine, loaned by Layton Bros., supplied music during the afternoon.

The Berliner Gram-O-Phone Co., Ltd., Montreal, for the convenience of those of its customers who were moving on April 29 and May 1, placed their delivery trucks at the disposal of all owners of Victrolas and Gram-O-Phones. Trained men were in charge, thus preventing possible injury to instruments or records. There was no charge for this service and a large number of its clientele availed themselves of the firm's generosity.

OCCUPYING NEW QUARTERS

The general offices, display rooms and warerooms of the Melophone Talking Machine Co., formerly at 40 Cooper Square, New York, have been moved to 380-384 Layfayette street, corner Great Jones street. The new quarters occupy 8,000 square feet of space.

F. B. Guarnier, general manager, states that this move was made necessary by the constantly increasing business and he expects by the end of the present year to even require additional space. One of the motors that this house is making is a single spring straight gear motor playing five 10-inch records at one winding.

ANNOUNCE NEW DEPARTMENT

CEDAR RAPIDS, IA., May 2.—Denecke's, the big department store of this city, recently ran elaborate full-page advertisements in the local papers and called public attention by other means to the grand opening of the new Aeolian-Vocalion and Grafonola, recently established on the first floor of the company's store. The various exclusive features of the Vocalion were strongly emphasized by both text and illustrations and the Grafonola and Columbia records also came in for a full share of attention.

NEW EDISON PUBLICATION

The latest house publication issued by Thos. A. Edison, Inc., is "Along Broadway," the initial issue of which appeared in April. This is the third Edison house organ to make its appearance and is for distribution among owners and prospective owners of Edison machines. In addition to the musical news of New York, it will contain the very latest items concerning the Re-Creation of music, as evolved by the Edison Diamond Disc Phonograph.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

Of The Talking Machine World, published monthly at New York, N. Y., for April 1, 1916.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Puhlic, in and for the State and county aforesaid, personally appeared August J. Timpe, who, having heen duly sworn according to law, deposes and says that he is the Business Manager of the Talking Machine World, and that the following is, to the hest of his knowledge and helief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid puhlication for the date shown in the ahove caption, required hy the Act of August 24, 1912, emhodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and husiness managers are:
Puhlisher—Estate of Edward Lyman Bill, Caroline L. Bill, Executrix, Rochelle Park, New Rochelle, N. Y.
Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Managing Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Associate Editor—J. Raymond Bill, 373 Fourth avenue, New York City.
Business Manager—August J. Timpe, 373 Fourth avenue, New York City.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.) Caroline L. Bill, Rochelle Park, New Rochelle, N. Y.

3. That the known hondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of honds, mortgages, or other securities are: (If there are none so state.) None.

4. That the two paragraphs next ahove, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the hooks of the company but also, in cases where the stockholders or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and helief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to helieve that any other person, association, or corporation has any interest direct or indirect in the said stock, honds, or other securities than as so stated hy him.

5. That the average number of copies of each issue of this publication sold or distrihuted, through the mails or otherwise, to paid subscribers during the six months preceding the date shown ahove is.....(This information is required from daily publications only.)

AUGUST J. TIMPE,
Business Manager.

Sworn to and suhscrihed hefore me this 29th day of March, 1916,

(Seal). EUGENE R. FALCK,
Notary Puhlic, 1053.

The Royal Proclamation Prohibiting the Importation of Talking Machines, Accessories and Component Parts, Will Paralyze the Industry Unless Some Liberal Policy Is Put in Force—Members of the Trade Much Concerned Over the Situation—Leading Musical Instrument Firms Unite for Action—Said Board of Trade Will Give Consideration to Claims—Death of Pathé Manager—Louis Sterling Talks of American Trip—Winner Record Co. Announce Exchange Plan—to Hold Music Trades' Exposition—The News of the Month in Detail

LONDON, E. C., April 24.—"As and after the 27th day of March, 1916, subject as hereinafter provided, the importation into the United Kingdom of the following goods is hereby prohibited: * * * musical instruments, including Gramophones and Pianolas and other similar instruments and accessories, component parts and records therefore.

"Provided always, and it is hereby declared, that this prohibition shall not apply to any such goods which are imported under license given by or on behalf of the Board of Trade, and subject to the provisions and conditions of such license."

So runs the royal proclamation which, in its very simplicity of language, contrasts almost ironically with its actual death-dealing results to the whole music trade field of endeavor.

The recent prohibition of musical instrument exports pales in its effect before that of prohibition of imports. Without imports of component parts upon which the industry almost wholly depends for its existence, British musical instrument firms will have neither goods for the maintenance of foreign trade nor home trade. The question of the exports prohibition, therefore, is of little moment at the present time, although it conjures up an extraordinarily inept attitude on the part of "the powers that be" when we are one day informed that no instrument goods must be exported or imported, and the next day urged by British Consulate and Home Government officials to wake-up to the splendid openings for trade in this or that country!

Be that as it may, the increasing difficulties of the trade have at last reached a stage when it is a question of life or death. We realize, appreciate to the full, and desire to assist in every possible way, the difficult path of those who control the destiny of the British Empire. But we do not recognize any necessity to kill an industry in which millions of pounds sterling are invested and thousands of hard working citizens earn their daily bread. This is the view of the whole trade without exception. It is not a selfish attitude; it cannot be so described when hitherto flourishing concerns have loyally denuded their financial and labor resources to a point which seriously threatens the efficiency and maintenance of their commercial life. No! In its legitimate protest against such drastic official action, the trade is very properly concerned, not so much against affording to the Government all possible assistance within reasonable limits, as to preserve in the national interests a nucleus of its commerce upon which, if weak, foundation it will one day again rise to pre-wartime importance and prosperity. If the government is determined to pursue a policy of wilful repression, it is time to call a halt—energetically and forcefully with our whole and united strength. We are favored with no exact official reason for a move of such serious import as total prohibition. Examine the implied cause, one finds that it centres around the necessity to conserve shipping space for cargoes of greater national importance than musical instruments. A very strong reason, but is it all? There is an undercurrent at work which takes its time in official quarters that the public is spending money on musical instrument purchases which ought rather to be invested in war loans. I am not sure that this view has not at one time or other actually been put forward. Again, I go so far to admit that it is a proper view. But—within limits! Music, whatever way we regarded it before the war, is to-day a necessity. For which opinion I do not feel called upon to substantiate in detail; it is too obvious from a medical and recreative viewpoint. Anyway, the soothing influence of music is generally recognized as necessary for wounded sailors and soldiers, in the trenches and rest camps, on board warships, and other warlike quarters, where it—and it only—is available to relieve the monotony of existence. Ask the seven-long-days-a-week workers who have no time for outside pleasure what they think of music, ask any one these days—you get the same answer—the provision of music is a power beyond value!

We do not ask for any preferential or favorable treatment—we merely ask for justice. As time passes and German submarine activity increases, ships become more valuable. There ought to be room, though, for such small im-

FROM OUR LONDON HEADQUARTERS—(Continued from page 81)

ports of component parts as we require for the maintenance of home trade, leaving out of consideration the seemingly inevitable loss of export business. During the year 1915 we imported close upon 2,000 organs and harmoniums, about 1,300 pianos and 60,000 small musical instruments. These totaled in value £92,000 odd. The total value of imports of component parts, musical instrument accessories, etc., was £225,000. Accepting the repression of export business and asking only sufficient for the maintenance of home trade, it is safe to say the latter figure could be cut down by half. The cessation of imports of complete instruments of a bulky nature might of necessity be a wise provision, and although it will bear hardly in some quarters, would, I think, be met by the trade in the right spirit. Prominent men of the trade are moving in the matter with a view to securing some modification of the government's serious action. Any prospect of the embargo on imports being removed seems hopeless, but it is thought there may be some little prospect of persuading the Board of Trade to ease the situation so as to allow of certain necessary component parts to be imported and thus preserve an industry which, these times, has need of all the encouragement possible consistent with national interests.

Musical Instrument Firms Unite for Action

Several important musical instrument firms are already united in action. Prior to a meeting at the Midland Grand Hotel, London, a deputation waited upon the Board of Trade authorities with a view to ascertaining the position of things. Their reception was not encouraging and they returned with the information that the proclamation was absolute and that it had been framed only after very careful consideration of the national interests. If this be the case, the trade outlook is indeed serious. The meeting decided upon close action to bring strong pressure upon the government in the hope that it may relent to an extent sufficient to prevent a total closing down of the musical industry, and a guarantee fund to cover the necessary expenses involved quickly reached £1,000. Committees were formed for immediate action and preparations are by now well forward to lay before the president of the Board of Trade all information concerning the disastrous effect of the prohibition on the industry throughout this country. There will be organized a protest sufficiently strong, we hope, to move the government to relent and open the door wide enough to permit of the importation of life-giving parts and accessories. The British musical instrument trade has in the past waged many successful campaigns against legislation and trade evils, but never before has it met with so formidable an obstacle as the present prohibition. The task now to be undertaken is one of portentious moment, not only to manufacturers and wholesalers, but to the many thousands of music shop keepers throughout the land. In this protest every man who receives or earns a penny by way of sales, wages or otherwise, is vitally affected by the government's plan and should therefore unite in the strongest possible action to secure fair play. Hesitate not in the manner of doing it but DO IT!

Later News Favorable

Since writing the above, news is to hand that inclines one to hope the Board of Trade will give further consideration with regard to claims for a partial lifting of the import prohibition. It is felt that the disastrous position in which the trade is placed by this legislation must give the Government pause before the very loyal and just suggestions which have been put forward with a view to a compromise. The most favored idea at present is that a percentage of last year's imports, based upon each company's figures, should be conceded as a means to save the trade from total extinction. This plan would take the form of excluding complete instruments in favor of the importation of certain very necessary parts and accessories. Nothing more definite can be said at the moment.

Music Trades' Convention, May 22-25

The sixth British Music Trades' Convention will be held this year from May 22-25, inclusive, the chosen venue being Harrogate, where was held the first music convention, in 1911. Full details will shortly be made known in the form of a brochure, which is available to all interested in the movement.

Closed Under Trading with Enemy Act

Orders have been made by the Board of Trade under the Trading with the Enemy Act, requiring the following businesses to be wound up: Carl Lindstrom, Ltd., 77 City Road, E. C.; Fonotipia, Ltd., 1 Broad street place, E. C.; Andres Bros. & Co., Ltd., 85 Chiswell street, E. C. The above are all London talking machine and record firms.

Diamond Disc Record Co. Moves

The Diamond Disc Record Co., Ltd., has removed from the historical 81 City Road Building to 12 Emerald street, Holburn, London, W. C. W. Denville Simons, the company's late manager, is now with the Pathé Frères corporation.

Pathé Manager a "Sussex" Victim

You all know just when and how the cross-channel steamer "Sussex" was torpedoed by a German submarine. Many passengers' names figured in the "missing" list, and among them we regret to read the name of G. Menke, manager at the London branch of Pathé Frères, Ltd. Although special search was instituted on both sides of the channel, no news of Mr. Menke has yet come to hand, and it is feared

THE INVICTA RECORD CO., Ltd., 1 New Inn Yard, London, E. C., England

FROM OUR LONDON HEADQUARTERS—(Continued from page 82)

he went down with the fore part of the ship.

To Enter Bonds of Matrimony

A certain prominent talking machine man who has come to be regarded in a paternal sense in relation to the trade, is, we learn, about to enter the bonds of matrimony. The happy event is said to be not far distant. It has naturally evoked general interest, not to say pleasure, in trade circles where "the subject" of this necessarily brief reference is so well known as almost to render needless the mention of his name. In my next report, perhaps, I may be permitted to lift the veil of anonymity, which at present our friend desires to wear.

A Music and Allied Trades Exhibition

A plan to hold a music and allied trades exhibition in London is on foot and is meeting with some influential support. The time selected will be during the month of July, the visitors' month. According to present arrangements it is hoped to secure representation of every section of the music trade, and there will also be transport, insurance and publicity sections. While, of course, such an undertaking properly launched would even in war time receive, we believe, ample support, it is to be feared that recent legislation may entail some modification of the trade's interest in the matter. With the prospect of supplies being further restricted, and exports curtailed, we doubt whether the original plan, praiseworthy as it is, can now be carried out in its entirety.

Winner Record Co. Exchange Scheme

Records have generally been selling so well of late that the need of exchange schemes may be said to be diminishing. In every company's list, however, there is a substratum of records which for some reason or other hang fire from the selling viewpoint. When ordering new records the dealer is naturally placed at a disadvantage, perhaps, by lack of musical knowledge or neglect to study local conditions, but whatever the reason, he regards with suspicion any company refusing facilities of reasonable exchange. These salient facts are recognized by all the large companies who have instituted a regular system of periodical exchange. The Winner Record Co.'s policy is a two-to-one exchange of new (unsold) Winner records, and most other makes of records be they worn out or broken, four new Winners must be ordered for each one returned; i.e., three to be paid for: one free. The spring exchange has just been put into effect with very satisfactory results. Dealers had the option of ordering under this scheme any records from the company's catalog, including presumably the very latest issues, which comprise selections from recent popular revues, as for instance, "Follow the Crowd," "Toyland," "Bric-a-Brac," and similar productions. Notwithstanding that a large part of the factory is confined to the production of Government work, the Winner Co. is, by reason of its large resources of manufacture, able to maintain an output of records ahead of normal times in both quantity and quality.

Louis Sterling Home from America

With a full quiver of happy news regarding American talking machine prosperity, and a very reasonable feeling of satisfaction at finding trade on this side so well maintained under the present unfortunate conditions, Louis Sterling, the European general manager of the Columbia Graphophone Co., is safely back from what is at times a hazardous voyage across the pond. He avers that Columbia sales in America are considerably ahead of any previous year and is inclined to the belief that the increased earnings of the people as a result of America's expanding trade will tend to prolong the talking machine season much beyond the usually accepted period. Things in general are very healthy and Mr. Sterling speaks very optimistically of the future general trade of the United States.

It is no secret that he was surprised to find Columbia trade in England—and this applies generally to the British talking machine situation—so well maintained. The Columbia factory at Wandsworth, London, is working as hard as ever, and despite its liberal resources of output, is scarcely able to keep pace with the continuously heavy demand for Columbia products. Well, well, we are glad to see him back again, and perhaps still more so to learn the good news he had to impart.

Big Run on Easter Records

Although Eastertide will have passed by the time these lines appear in print, it reminds one that festivals of this sacred period afford the various gramophone firms an excellent opportunity to demonstrate the ubiquity of mechanical music suitable to any and every occasion. "Records for Easter-time" is the subject of a special announcement, public and otherwise, by "His Master's Voice" Co., who enterprisingly draw attention to its splendid program covering a wide and varied choice of suitable music. Large advertisements in the newspapers gave prominence to the records in question; hymn and oratorio numbers, and at the same time spoke in modest terms of the tonal purity of the recordings. Of the artists mentioned in connection with these Easter items, it is sufficient to indicate but a few names, as, for instance: Caruso, Clara Butt, Kirkby Lunn, Robert Radford and the Westminster Cathedral Choir, Evan Williams, Percival Allen, Clarence Whitehall, Mayfair Orchestra in association with Aimee Maxwell, and George Baker with organ, celeste and bells; Leeds Festival Choir, etc. A marvellous one-program concentration of talent—unsurpassed!

New Provisions to Bankruptcy Act

Two important post-dated provisions of the 1914 Bankruptcy Act came into force on April 1. Henceforth, a bankrupt who has within two years of his failure contributed to that end by gambling or rash speculations, is liable to prosecution, which contingency also applies if his books do not properly disclose the state of his affairs during the two years preceding his failure. This latter provision is applicable only to traders who have failed on a previous occasion, and it does not apply if the liabilities are less than £100 or if the debtor can show that the omission was honest and excusable With all these loopholes of escape the bankrupt can scarcely feel very nervous, we should imagine!

The Registration of Firms' Bill

The object of the Registration of Firms' Bill, which has reached its second Parliamentary reading, is to provide for the registration of all firms and persons carrying on business under names other than their own. It is a very necessary piece of legislation which one can only hope will speedily pass into law.

Thos. Edens Osborne Still Active

In common with other traders, the recent scarcity of shipping facilities and consequent delays in replenishing stock has been felt by the well-known Belfast factor, Thos. Edens Osborne, who, however, as usual, makes good capital out of it by public announcement in the local press when the goods do arrive. His happily conceived announcements continue to remain quite an interesting feature of the Belfast newspapers.

Death of E. S. Stansfield

I much regret to have to report the passing of an old journalistic colleague in the person of E. S. Stansfield, editor of The Talking Machine News, this city. He died quite suddenly after a brief illness, on March 12 at Canvey Island, where for several years past he had been a well-known and popular figure. The news of his death has evoked much sympathy in trade circles, and for ourselves we shall miss greatly his genial and ever jovial greeting.

Records of Elgar's "Starlight Express"

The above new production, with music by Sir Edward Elgar, recently made its bow to an enthusiastic public at Kingsway Theatre, London, and as may be imagined, recordings of its fairy-like music were not long in forthcoming. The Gramophone Co., Ltd., were quick to appreciate the big prospects of this attractive play and, as usual, secured the services of original artists to make a series of records under the baton of Sir Edward Elgar himself. Algernon Blackwood, the author, is to be congratulated upon securing the master service of such a world-renowned composer, who in this case, has inspired a truly happy conception with an appealing spirit in true sympathy with the author's ideals. The vocalists are Miss Agnes Nicholls and Charles Mott, the creator of the organ grinder character in the play. A splendid set of "H. M. V." records are now available.

At the instance of the Gramophone Co., Sir Edward Elgar met a representative gathering of newspaper musical critics at a luncheon given

FROM OUR EUROPEAN OFFICE

(*Continued from page 83*)

at the Savoy Hotel, London, where the records were successfully demonstrated to the complete satisfaction of a highly critical audience. Throughout most of the reviews published on the following days in the leading newspapers there ran a note of pleasureable surprise at the wonderful standard of tonal purity of these "H. M. V." records, which were the object of much praise. The public demand is in consequence, very heavy.

The Newest Zonophone Records

The artistic standard of Zonophone records, judging from the latest batch to hand, continues, if anything, to improve month by month to an elevation quite beyond compare. Of the most recent supplement which includes issues of new records for April and May, one can assert positively that for all round quality and value it exemplifies in a remarkable way the justness of the oft-repeated slogan that Zonos are "The records the public will have." Such names as Sidney Coltham, Mary Law, Bessie Jones, Herbert Payne, G. H. Elliott, George Formby, the Misses Elsie and Dorothy Southgate, Black Diamond Band, etc., speak eloquently of Zono success in combination with the provision of operatic and standard music and the prompt issue of topical numbers. Space precludes mention of the many excellent records listed this month, but a real achievement meriting special commendation is the "Festival of Empire," on two double records, played by the famous Black Diamond Band. It consists of a choice medley of national tunes of the British Empire. Both are records of world-wide appeal and needless to say ample provision has been made for big sales.

OBTAIN CONTROLLING INTEREST

The Doehler Die-Casting Co., of Brooklyn, N. Y., and Toledo, O., begs to announce to the trade that it has acquired a controlling interest in the American Die-Casting Co, of Newark, N. J., which will hereafter be known as the Doehler Die-Casting Co., of New Jersey. Its present management remains unchanged.

This plant, housed in an up-to-date factory building, conveniently located, equipped with modern die-casting machinery and appliances, and under most efficient management, is well adapted to the Doehler policy of quality production, and dependable service now obtaining at their Brooklyn and Toledo plants."

The Victrola department of the James Black Dry Goods Co., Waterloo, Ia., has been carrying on a very active advertising campaign in the local papers, in which their full line of Victrolas has been featured in a most interesting and attractive way.

Major W. H. Zinn recently presented F. H. Watson, county supervisor of public schools, of Anniston, Ala., with a Victor Victrola, to be used in his visits to the schools in his district.

BREAK "NO APPROVAL" AGREEMENT

St. Paul Department Store Notifies Dealers that It Would Not Follow that Rule—Demand for All the Best Known Lines

ST. PAUL, MINN., May 4.—St. Paul dealers have broken away from the rule of "no approval" signed last fall. A big department store last week notified the other dealers that on May 1 the agreement was off and the other dealers thereupon considered that the rule was not binding on any one. While this was going on in St. Paul the Minneapolis dealers met April 26 in the Elks Club and appointed a committee to prepare rules for restricted approval. It is believed that all the Minneapolis dealers will sign.

Victrolas X. and XI. in dark fumed oak are in great demand in the cities and in the entire territory. It is quite impossible to supply the demand.

Laurence H. Lucker, the Edison Diamond Disc jobber, reports that the first four months' business in 1916 was equal to eight months' business in 1915, and that there is a continued growth of sales every month. He reports a shipment of $10,000 of Edison discs to the Stone Piano Co., Grand Forks, and an equal shipment to the same company at Fargo, as well as placing a $12,000 account with Fred Russell at Duluth.

Manager Robert Sowders, of the Columbia Phonograph Co., having only jobbing matters to look after, finds plenty to do, but not so many different things on his hands. The Columbia, he says, is pursuing the even tenor of its way to all parts of his territory, with business quite away ahead of that of last year.

The only limit to the Victor business in the Northwest territory is the ability to get stock, according to the Beckwith-O'Neil Co. It is impossible to obtain the goods ordered. The country dealers implore and pray for goods, and scores want to open accounts. Many dealers report an increase of 100 per cent. in their business for the first four months of 1916 compared to 1915.

And still the Victor people are advertising directly and indirectly. Robert Wilkinson, of the educational department, spent the last week in April in the public schools of St. Paul and Minneapolis teaching the teachers how to use talking machines in school work.

GIVE RECITAL IN WILKES-BARRE

The Bevan Piano Co., 38 North Main street, Wilkes-Barre, Pa., has been making a special drive on high-class records in that section. Some time ago the company gave an elaborate Victrola recital in the local armory and attracted quite a crowd.

EDWARD JORDAN & CO. ENLARGING

Edward B. Jordan & Co., cabinet makers, of Brooklyn, N. Y., are planning a four-story addition to their factory at 127 DeGraw street.

NEWS OF THE CANADIAN TRADE

Misleading Advertisers Severely Arraigned by Court in Recent Talking Machine Case—Victrola for Lieut. Governor's Residence—Tremendous Increase in Demand for Machines and Records of Leading Makes

TORONTO, ONT., May 1.—Considerable interest has been aroused recently in a case before the Court of General Sessions here of Rex vs. Stevenson, growing out of a charge of fraudulent advertising. The action grew out of a sale of a talking machine by E. E. Stevenson, this city, who manufactures a line he calls "The Victoria." The purchaser of the machine, J. D. Booth, instituted proceedings against Stevenson and his agent, Mrs. Felstein, in the Police Court and they were committed on the charge of fraud The trial resulted in the acquittal of Mrs. Felstein and the finding guilty of Stevenson by the jury, after a charge by Justice Coatsworth in which he gave a severe arraignment of that class of advertising calculated to deceive, such as announcements offering talking machines of the "Victrola" style for sale. Sentence is suspended on Stevenson.

The Canadian Phonograph Co. is at present featuring the Operaphone double-disc records very successfully in this section, selling them three for $1.

A Victrola XIV. was recently installed in the Government House, this city, for the use of the Lieutenant-Governor's residence.

E. Van Gelder, of I. Montagnes & Co., Canadian distributors of Sonora phonographs, recently paid a most successful business visit to the Maritime Provinces. Montagnes & Co. has now opened a repair department for Sonora machines in charge of an expert from New York.

A number of men connected with the talking machine departments of the Toronto music houses had a get-together evening recently, at which an informal dinner was followed by a most pleasing musical program. The affair was held at the St. Charles Hotel.

John A. Sabine and Chas. R. Leake, who in 1911 formed the Music Supply Co. to wholesale Columbia products in Ontario, report that the statement for the past year ending March 31, showed a volume of business thirteen times greater than that done the first year.

The Thomas Organ & Piano Co., Woodstock, Ont., who make piano and organ benches, have just begun the manufacture of disc talking machine cabinets to fit the prominent types of machines.

J. E. Maloney, of Perth, Ont., reports an unusually satisfactory sale of Edison Diamond Disc and cylinder phonographs and records, as well as Columbia Grafonolas, there being a good demand for the higher priced machines.

The Nordheimer Piano & Music Co., Ltd., recently held their final Victrola recital of the season. The series of recitals has been productive of excellent business. The recent reduction in the prices of certain lines of Columbia goods has brought about such a tremendous increase in record sales that the local branch of the company has been unable to meet the demand. The Canadian factory is now being enlarged to take care of this increase.

The Toronto Grafonola Co. recently had an elaborate exhibit of Columbia machines at the Ideal Home Show recently held in this city.

UKULELES

The biggest sellers in the small musical instrument business. Why handle inferior machine-made American imitations when you can get at similar prices the genuine hand-made instruments of

Jonah Kumulae, Honolulu

The old, thoroughly seasoned native Hawaiian Koa of which they are constructed is greatly superior to any other wood in tone quality—Kumulae instruments have no superior in this respect.

ATLANTIC CITY CROWDS ATTRACTED

The Latest Sonora Product "Supreme" Shown By the Sonora Phonograph Agency on the Boardwalk Attracts Considerable Attention

ATLANTIC CITY, N. J., May 4.—One of the attractive spots on the Boardwalk during Easter week was the Sonora Salon, which was opened last October, and in which a very attractive line of Sonora phonographs were demonstrated to

Exterior Sonora Display Rooms

a constant stream of visitors. The salon was beautifully decorated with palms and blooming flowers on Easter Day, when as an additional attraction the Sonora "Supreme," the new $1,000 Sonora phonograph, was shown to an admiring crowd of people who expressed pleasure at its perfect tone and beautiful cabinet work.

The Sonora agency in this city reports a fine business, and it has been difficult to fill orders from people who desire Sonoras. A recent purchaser was the local High School, which selected a $150 Sonora.

Millions of people from all over the world pass this store on Atlantic City's promenade—the Boardwalk—and it would be hard to conceive of a building so well situated to advertise this product. Among the 200,000 visitors on Easter Day were George E. Brightson, president, and L. S. McCormack, general sales manager of the Sonora Phonograph Corp., who assisted Sales Manager Edward F. Jardine in introducing the Sonora "Supreme" to thousands of visitors.

LARGER QUARTERS IN YORK, PA.

W. P. Swartz, who handles Victor talking machines at 135 West Market street, York, Pa., has found his business developing to such a point that two new demonstration booths had to be installed to take care of it.

PORTLAND, ORE., DEALERS ORGANIZE

Talking Machine Men in that City Form Association with E. B. Hyatt as President

PORTLAND, ORE., May 1.—Practically all the representative talking machine dealers of this city met recently at the Chamber of Commerce for the purpose of forming a Talking Machine Dealers Association. At the first meeting E. B. Hyatt, manager of the Hyatt Talking Machine Co, was elected president and Perry Graves, of the Graves Music Co., was elected secretary and treasurer. The new association will take an active part in eliminating certain features of the trade that work against the interests of the dealer, such as sending out records on approval, failure to charge interest on instalments, questionable advertising, etc.

ORAPHONE CO. BUYS FACTORY SITE

NEW ORLEANS., LA., April 17.—The Oraphone Co. has just perfected and placed on the market a new talking machine. This concern, which was recently incorporated, announces that it will manufacture its own motors shortly. J. Henry Blanche, head of the firm, announced last week that he had leased a factory site at 508 South Peters street. The general salesroom has been established at 609 Common street.

RETURNS FROM VISIT TO THE SOUTH

Thos. A. Edison returned last week from his usual winter sojourn in Florida. He had a most enjoyable time in the South and came back in splendid physical condition. It is said that during his stay in the South the "Wizard" made records of the songs of his favorite birds. This, the newspapers say, he accomplished by a silent recording phonograph which he invented.

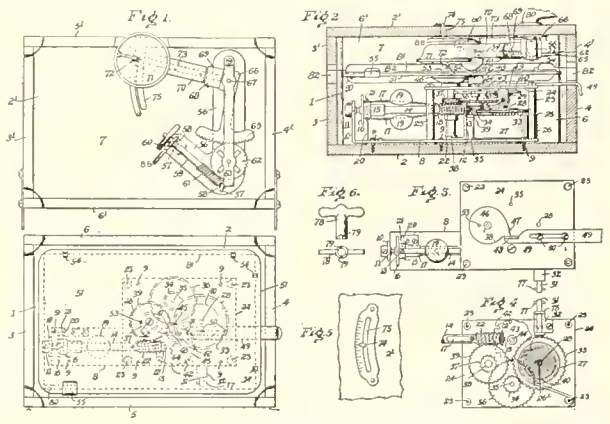
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., May 6.—SOUND RECORDING AND REPRODUCING MACHINE.—Berthold A. Baer, Philadelphia, Pa. Patent No. 1,171,082.

This invention relates to sound recording and reproducing machines, and the object thereof is to produce, first—a machine wherein a card or similar article can be mounted for the purpose of having a record produced thereon by a moving needle point which is vibrated by the action of sound waves; second—a machine wherein a record is produced on a card or similar article by a recorder and the identical record reproduced by substituting a reproducer for the recorder; third—a machine for producing a record on a card or similar article and at the same time marking the card for the purpose of fixing the position for the orderly reproduction of the record from the card; fourth—a machine wherein the recording and the reproducing can be interrupted, stopped and continued at the will of the operator; fifth—a machine provided with an index for informing the



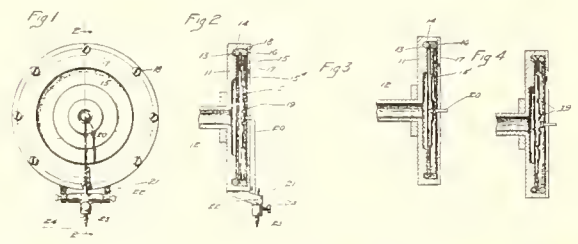
operator of the position of the record on the card.

In the accompanying drawings, Figure 1, is a plan view of the machine with the lid open; Fig. 2, is an elevation with the lid down; Fig. 3, is a plan view of the governing mechanism; Fig. 4, is a plan view of the operating mechanism; Fig. 5, is a plan view of the indicator; and Fig. 6, is a key.

SOUND REPRODUCING APPARATUS.—Forest Cheney, Chicago, Ill., assignor to the Cheney Talking Machine Co., same place. Patent No. 1,170,803.

The principal object of this invention is to provide a new and improved sound reproducer especially adapted for use in gramophones. Other objects are to provide an improved diaphragm for a sound reproducer; to provide a sound reproducer with its diaphragm so formed as to reproduce sounds from a record with a superior proportioning and quality of the various component tones.

As is well known to those skilled in the art, the sound waves thrown off by the diaphragm of a

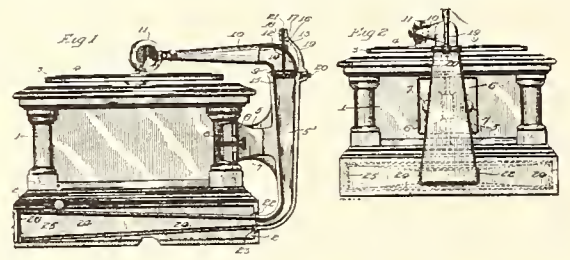


sound reproducer do not ordinarily combine the tone giving components in the proper proportion as they occurred initially in the sound from which the record was derived. To this defect is due the unnaturalness of the sounds coming from such a sound reproducer. It has been determined, as the result of much study and experiment, that by certain modifications of the diaphragm, the necessary overtones can be reinforced or accentuated so as to bring out the full richness and peculiar tone color of the various instruments and voices originally employed in making the record. Instead of making the diaphragm as a plane disk of sheet material, it is formed in shallow annular steps and in this way the desired result is attained.

Referring to the drawings: Fig. 1 is an elevation of the improved sound reproducer; Fig. 2 is a vertical section of the same along the line 2—2 of Fig. 1; Fig. 3 is a corresponding vertical section of a modified form of the device; Fig. 4 is a similar section of a further modification.

WASHINGTON, D. C., May 6.—TALKING MACHINE.—John C. English, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,173,104.

The main objects of this invention are to provide an improved talking machine of simple, compact, durable and efficient construction; to provide in a talking machine an improved mounting for a



swinging sound box arm, and improved sound amplifying means.

In the accompanying drawings Fig. 1 is a fragmentary side elevation partly in a vertical section of a talking machine constructed in accordance with the invention, and Fig. 2 is a rear end elevation of the same.

SOUND REPRODUCER.—Edmund S. Geer, New York. Patent No. 1,173,501.

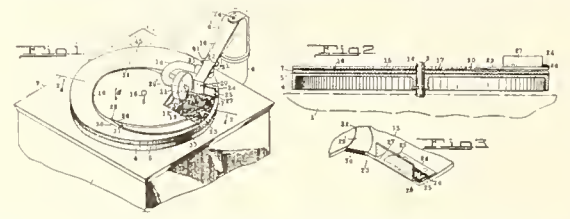
This invention relates to sound reproducing apparatus, and with respect to certain more specific features thereof, to so-called repeating means therefor.

The invention has for one of its objects to provide a simple and practical device of the character above referred to.

Another object of this invention is to provide a device which will automatically and rapidly restore the reproducer needle or stylus to initial position on a sound reproducing record to cause the latter to be replayed.

Another object of this invention is the provision of light and durable mechanism for accomplishing the preceding object.

In the accompanying drawings, wherein is shown



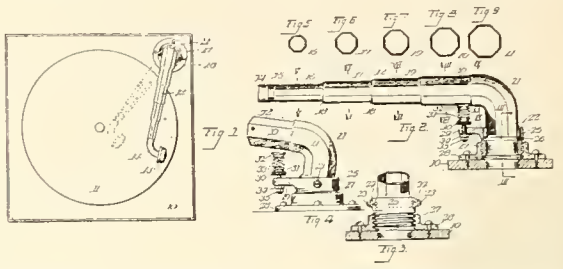
one of various possible embodiments of this invention, Fig. 1 is a view in perspective of a sound reproducing machine embodying this invention; Fig. 2 is a vertical sectional view taken approximately on the line 2—2 of Fig. 1; and Fig. 3 is a view in perspective of certain details of the invention.

SOUND REPRODUCING MACHINE.—Forest Cheney, Chicago, Ill., assignor to the Cheney Talking Machine Co., same place. Patent No. 1,170,802.

This invention is concerned with sound reproducing devices, and primarily with the construction and mounting of the swinging tone arm, which connects the sound box mounted on the end thereof with the amplifying horn, which horn is ordinarily rigidly mounted, and must have a connection with the tone arm by which the latter can swing in a horizontal plane to permit the needle to move from the edge to the center of the disc record, and which must also be capable of swinging vertically to permit the disengagement of the needle from the disc.

One feature of the present invention consists of a specific modification of the generic invention in orchestral sections shown in application No. 682,989, filed March 11, 1912, and in the application of said invention to the tone arm, said invention being specifically shown in the aforesaid application, No. 682,989, as applied to the stationary amplifying horn.

Another feature of the invention consists in the employment of a novel spring adjustment for the tone arm by which the weight of the outer end thereof and of the sound box can be counter-



balanced or neutralized, thus regulating the pressure of the needle upon the disc.

A third feature of the invention resides in the novel mounting of the tone arm upon the casing to which the amplifying horn is connected.

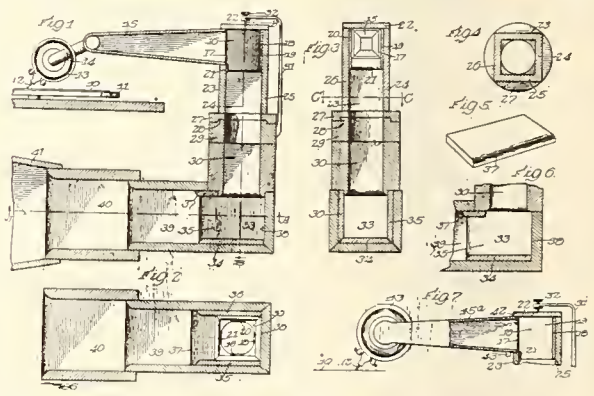
To illustrate invention: Fig. 1 is a top plan view of a sound reproducing machine having the invention applied thereto; Fig. 2 is a longitudinal section through the tone arm on an enlarged scale; Fig. 3 is a detail of a portion thereof in section on the line III—III of Fig. 2; Fig. 4 is a detail showing the tone arm lifted to disengage the needle from the record; and Figs. 5, 6, 7, 8 and 9 are vertical sections through the tone arm on the lines V—V, VI—VI, VII—VII, VIII—VIII and IX—IX, respectively, of Fig. 2.

SOUND REPRODUCING MACHINE.—Forest Cheney, Chicago, Ill., assignor to the Cheney Talking Machine Co., same place. Patent No. 1,170,801.

This invention is concerned with certain improvements upon the "orchestral sections" shown in application No. 682,989, filed March 11, 1912, for Letters Patent of the United States, said "orchestral sections" being designed to reinforce or augment the air vibrations set up by the diaphragm and more perfectly reproduce the tones of the various orchestral instruments or voices to whose range or register the sections are adapted.

In the "orchestral sections" shown in the aforesaid application, which are of a generally cubical construction, open at both ends, the vibrations or sound waves enter one end and pass out of the other, the various sections being grouped so that their vibrating sides are parallel to each other and to a common axis, a complete set of sections presenting, as it were, the general effect of a flaring horn or bell, but square instead of circular, in cross section, and with the rectangular inner walls arranged in parallel steps.

In this improved construction, instead of having all of said sections parallel to the same axis, there are made one or more turns, or right angles, as it were, in the general direction in which the air vibrations or sound waves pass, and at each turn is placed a modified orchestral section, which is called a "mechanical throat," as it is provided with a palate and has the general effect of modifying the clear, forcible and somewhat colorless tones



produced by the straight orchestral sections, and clouding or restraining them sufficiently to give a more human tone to the voices and a more characteristic tone to the reproductions of the various instruments.

Fig. 1 is a central longitudinal and vertical section through a portion of a sound reproducing machine embodying the invention and containing a pair of the mechanical throats; Fig. 2 is a horizontal section on the line A—A of Fig. 1; Fig. 3 is a vertical section on the line B—B of Fig. 1; Fig. 4 is a horizontal section of the line C—C of Fig. 3; Fig. 5 is a perspective view of one of the palates detached, on an enlarged scale; Fig. 6 is a view of the lower mechanical throat shown in Fig. 1, but slightly modified in a manner to be explained;

DOES IT INTEREST YOU?

The cuts which appear in this department, you can have for fifty cents, which is less than cost price. This offer good for thirty days only, and please address our patent department.

and Fig. 7 is a view similar to Fig. 1, and showing the upper mechanical throat, but with the connections to the tone arm slightly modified.

GRAPHOPHONE.—Arthur Laurencich, Washington, D. C., assignor of three-fourths to William F. Yates, New York. Patent No. 1,172,717.

The primary object of this invention is to provide a graphophone which shall be peculiarly adapted for use by children as a toy.

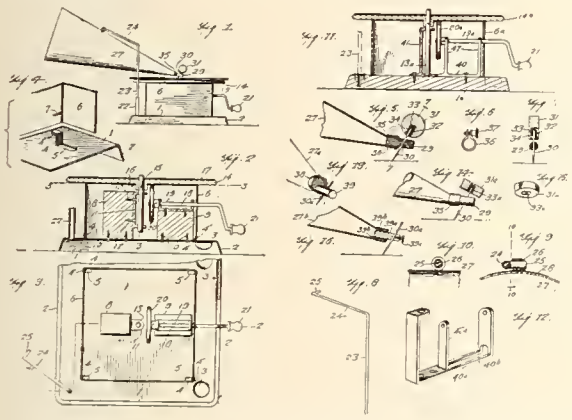
To this end, the great desideratum, of course, is simplicity and consequent cheapness of construction, so that the graphophone-toy may not be of prohibitive cost, but may be manufactured at a low figure and sold at a nominal sum, at a substantial profit.

At the same time, the object is, with cheapness of construction, to provide a structure which shall present all reasonable durability.

Additionally, it is an object to provide a graphophone-toy, for use with disc records, which will, in operation, be musical to the ear of the auditor, and in which the tone shall be clear and distinct.

A further object is to provide a graphophone in which all noise, such as rattling or clicking of machinery, shall be eliminated, thereby insuring a more satisfactory playing of the records.

A further object is to eliminate the use of the spring motor, which characterizes the customary graphophone now on the market. A spring motor is always getting out of order, after a period of



use thereof, and needs cleaning, etc., to maintain the same in proper condition, and, besides, the spring motor makes more or less noise in operation. It is, therefore, the object of this invention to substitute means whereby the disc-supporting table may be manually revolved, with a minimum of effort and a maximum of ease.

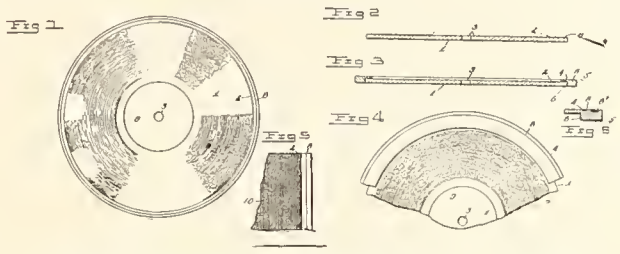
The different views of the drawing may be briefly described as follows:

Fig. 1 is a side elevation of the preferred form of this invention; Fig. 2 is a vertical sectional view on the line 2—2, Fig. 3. Fig. 3 is a top plan view, on the line 3—3, Fig. 2, looking downward; Fig. 4 is a fragmentary sectional detail view of the base and the casing, showing the manner of their assemblage; Fig. 5 is a fragmentary sectional detail view of the horn, reproducer-needle, etc.; Fig. 6 is a detail view of a clamp that may be used around the reduced end of the horn; Fig. 7 is a sectional view on the line 7—7, Fig. 5; Fig. 8 is a detail perspective view of the rod from which the horn is suspended; Fig. 9 is a fragmentary sectional detail view of the horn and its support; Fig. 10 is a section on the line 10—10, Fig. 9; Fig. 11 is a vertical sectional view of a slightly modified form of graphophone; Fig. 12 is a perspective detail view of a slightly modified form of bracket, which may be substituted for that shown in Fig. 11; Fig. 13 is a fragmentary detail view showing a slightly modified form of support for the reproducer-needle; Fig. 14 is a fragmentary detail view of a horn and a slightly modified form of weight for the reproducer-needle; Fig. 15 is a detail view of the weight shown in Fig. 14; Fig. 16 is a fragmentary sectional detail view of a slightly modified form of support for the reproducer-needle.

PITCH ASCERTAINING ATTACHMENT FOR SOUND REPRODUCING RECORDS.—Thomas I. Kane, Kane, Pa. Patent No. 1,172,533.

The primary object of this invention is to facilitate the use of the phonograph, graphophone and other similar music reproducing instruments, as an accompaniment in the teaching of music, and especially in the teaching of absolute pitch, by providing means for ascertaining the correct pitch at which any record element was produced.

A further object of this invention is to provide for applying this improvement, comprising the means of ascertaining the correct pitch, by a separate attachment, which may be made and sold as an independent article of manufacture, and applied to existing sound reproducing records now in common use, or the invention may be applied to the record during its manufacture.



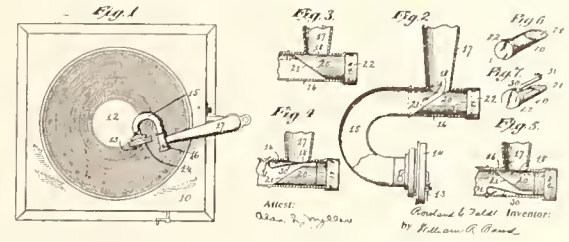
Another object of this invention is to facilitate the application of this improvement, comprising the means of ascertaining the correct pitch, to any record now in use by the student of music, or by any operator of sound reproducing instruments.

Fig. 1 is a plan view of a disc record with the pitch groove inscribed thereon. Fig. 2 is a centrally sectional elevation of the record showing the pitch groove inscribed thereon. Fig. 3 is a view similar to Fig. 2, showing a modification of the invention comprising a detachable ring, having the pitch groove inscribed thereon. Fig. 4 is a fragmentary plan view of a portion of the record with the modification, comprising the detachable ring applied thereto. Fig. 5 is a fragmentary side view of a portion of a cylinder record with the pitch groove inscribed thereon. Fig. 6 is an enlarged detail view of a section of the detachable ring with modification, comprising an annular recess on the top surface adapted to be filled with a softer composition such as wax from which cylinder records are made.

SOUND CONTROLLER FOR PHONOGRAPHS.—Rowland E. Faldl, New York. Patent No. 1,172,346.

This invention relates to sound controllers for phonographs and similar sound reproducing devices, and more particularly to means for regulating the volume of sound issuing from such an instrument and reducing the number of metallic vibrations existing therein, and its novelty consists in the construction and adaptation of the parts, as will be more fully hereinafter pointed out.

Most phonographs and similar instruments are provided with a sound box taking the vibrations from the needle. This in turn, communicates with a sound box tube which is closed by any suitable means, and just before its termination a tube leading to the horn is inserted, forming an elbow with the sound box tube. The closure for the part of the tube beyond such elbow is usually a flat plate or disc threaded into the tube. The purpose of this invention is to provide this part of the sound box tube with a readily insertible controller which will extend far enough into the tube to govern the port leading to the horn to vary the extent of its opening. At the same time the controller is made of such material that the metallic vibra-



tions are to a great extent absorbed at that point and the sounds delivered through the horn are made softer and more harmonious.

In the drawings, there is illustrated a preferred form of the invention and its connection with a phonograph.

Fig. 1 is a plan view of a phonograph provided with controller; Fig. 2 is a transverse section through the end of the sound box tube and the adjacent part of the horn, showing the controller in place with the port leading to the horn practically open; Fig. 3 is a view similar to Fig. 2 but with the controller in such a place that the horn port is practically closed; Fig. 4 is a view similar to Fig. 2 but showing a modified form of controller; Fig. 5 is a view of the same parts, but showing the controller in a different position; and Figs. 6 and 7 are miniature perspective views of the two forms of the controllers.

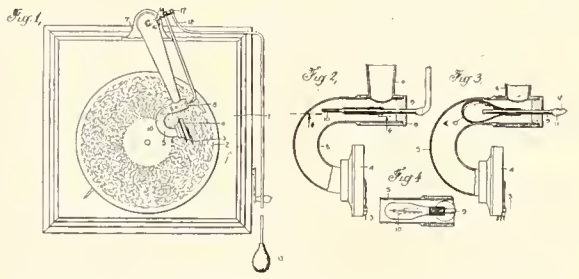
SOUND CONTROL FOR TALKING MACHINES.—Vincent W. Weczerzick, New York. Patent No. 1,173,758.

This invention relates to attachments for talking machines and particularly to an improved device for controlling the volume of sound thereof.

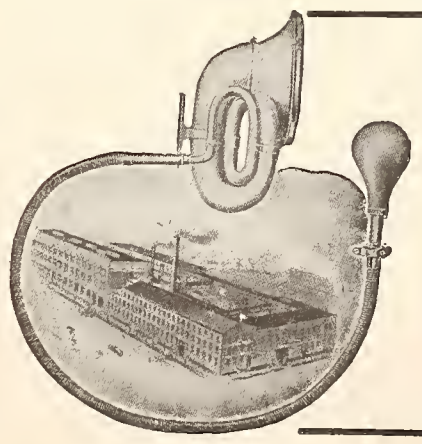
Another object in view is to provide a device for controlling the volume of sound arranged in the gooseneck of the talking machine or at some other convenient point in any part of the quantity or volume of sound tube, whereby the tone is affected according to the movement of the controlling device.

A still further object in view is to provide a pneumatic bulb in the sound tube or the gooseneck of the talking machine and connected therewith a tube and bulb whereby the bulb in the sound tube or gooseneck may be inflated or deflated at will and to any extent for varying the volume of sound according to the particular temperament of the person operating the device.

In the accompanying drawings: Fig. 1 is a top plan view of a talking machine with an embodi-



ment of the invention applied thereto; Fig. 2 is a sectional view through a gooseneck and part of the sound tube of a talking machine with an embodiment of the invention positioned therein; Fig. 3 is a view similar to Fig. 2 but with the control bulb distended; Fig. 4 is a detail fragmentary sectional view on line 4—4 of Fig. 2 showing the width of the bulb as distended as being less than the width of the gooseneck.



TONE ARMS
TURNTABLES

For many years we have been the only manufacturers of good metal phonograph horns, and recently we have added equipment for making Tone Arms and Turntables of highest quality.

These products are made to your specifications only. Ask for estimates.

NEW FOREIGN CATALOGS

Issued by the Columbia Co. Emphasize the Demand Existing for Records in a Foreign Tongue in this Country

The Columbia Graphophone Co.'s International record department has recently issued a

Columbia Foreign Catalog Covers

series of new catalogs which are noteworthy for the beauty of their cover designs and the diversity of their contents. This department is leaving no stone unturned to co-operate with Columbia dealers throughout the country, and the success it is achieving is evidenced in the many letters of commendation which the department has received from Columbia representatives in all sections.

Three of these new catalogs are shown herewith, and as the cover of each book is designed in four or five colors it produces a striking effect that cannot fail to attract the attention of visitors to the store.

The German-Austrian catalog contains over 650 selections, vocal and instrumental, folk songs, national patriotic airs, operatic and popular music. In this catalog are violin records by Christeta Goni and Irene Stolofsky, two phenomenal girl violinists.

The French catalog lists fifty operatic, concert and instrumental pieces. The Republican Guard Band, which is internationally popular, and A. J. Harpin, one of the best-known French bassos in Canada and this country, are represented in this catalog.

SUCCESS WITH THE PATHEPHONE

Hugh McLean, of McLean Bros., 384 High street, Holyoke, Mass, a successful furniture house of that city, was a visitor to New York this week. McLean Bros. opened a talking machine department a few months ago which has achieved gratifying success. The products of the Pathé Frères Phonograph Co. are handled exclusively in this department, and Mr. McLean states that the demand for Pathephones and Pathé discs has far exceeded expectations. The new Pathé records are meeting with marked favor while the Pathephones retailing at $100 and upwards are proving very popular.

WEBB DOING A GROWING BUSINESS

ATLANTA, GA., May 5.—LeRoy Webb & Co., who recently moved into new quarters at 83 Peachtree street, report an excellent business in the Victor line, which they have been carrying for some time. The business has increased to such an extent during the past year that larger quarters were necessary. The new location is occupied jointly with the Windmayer Music Co., dealers in sheet music and supplies. Fred C. Windmayer, manager of this concern, was formerly connected with the Phillips & Crew Co., being in charge of the sheet music department there.

NEW BIG STORE IN NEW YORK

Samuel A. Sherman has opened an elaborate talking machine store at 3138 Third avenue, New York, near 116th street, with his brother, M. Sherman, in charge. The store, which is in a prominent location, is equipped with six demonstrating booths and carries a full line of Victor and Columbia machines and records.

The Elipse Manufacturing Co., of Marion, O., has been incorporated to manufacture talking machines, with a capital of $10,000.

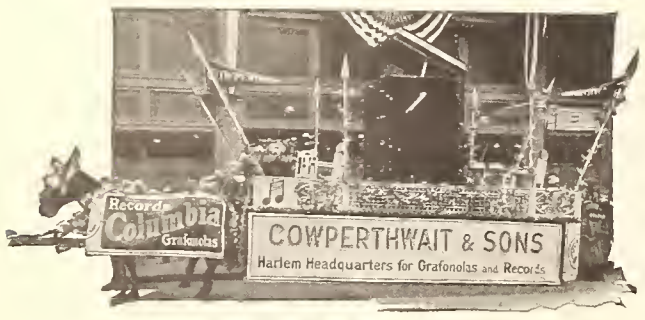
COLUMBIA FLOAT IN HARLEM PARADE

Cowperthwait & Sons Feature the Columbia in Recent Carnival Held in This City

At the recent parade of trucks and floats in the Harlem carnival, one of the most attractive displays was that presented by Cowperthwait & Sons, Third avenue and One Hundred and Twenty-first street, the well-known and popular furniture house.

For some time past Cowperthwait & Sons have maintained a Columbia department which has achieved a large measure of success, and in order to gain valuable publicity for this department, the store management decided to feature the Columbia line on their parade float.



The Cowperthwait Float

The result of this decision is evidenced in the photograph of the Cowperthwait float shown herewith. A giant "Grafonola" formed the keynote of the display, and the accompanying artistic decorations and distinctive color schemes won hearty praise from the thousands of spectators along the route of the parade.

W. G. GASTON APPOINTED

The Victor Talking Machine Co. has announced the appointment of W. G. Gaston as traveling representative in local territory, succeeding A. H. Bates, who has been appointed manager and buyer of the Victrola section of John Wanamaker's, Philadelphia. Mr. Gaston is thoroughly familiar with Victor policies and methods, having previously been traveling representative for the Victor Co. in Ohio territory.

NEW EDISON DEALERS

Thomas A. Edison, Inc., in a recently issued bulletin called attention to the following lists of dealers who have arranged to handle Edison products; Disc and Amberol dealers—B. L. Conchar, Springfield, Mass.; Frank Bangs, Dodge City, Kas.; Puffinburg Furniture Co., Wilkinsburg, Pa.; Rosser-Smith Furniture Co., Pratt, Kas.; Mrs. T. Kaiser, Muscoda, Wis.; Western Automatic Music Co., Dallas, Texas; Cooey-Bentz Co., Wheeling, W. Va.; Jones & Briles, Chariton, Pa.; J. B. Currie, Mt. Ayr, Ia.; T. J. Thomas, Aberdeen, Wash.; Turner Bros. Pharmacy, Sidney, Mont.; J. P. Nelso, Yankton, S. D.; F. J. Davis, Fayette, Ia.; Miller Mercantile Co., Memphis, Tenn. Previous disc dealers taking on Amberol: A. L. Arvidson Piano Co., Denver, Colo.; C. C. Morrison, Barron, Wis.; Runnerburger Bros. & Co., Harrisonville, Mo.; Easterbrook Bros., Saybrook, Ill.; W. Hamachek, Jr., Kewaunee, Wis.; H. W. Thompson & Co., Hackensack, N. J. New dealers, Amberol only: Lenhart Drug Co., Bismarck, N. D.; Turtle Lake Drug Co., Turtle Lake, N. D.; Owl Drug Store, Rowan, Mont.; Willis Wolfe, Meade, Kas.; Fedullo Music Co., Philadelphia, Pa.; F. B. Houghton, Ottawa, Kas.; Peter E. Schulstad, Dogden, Minn.; D. McGregor, Morewood, Ont., Can.; T. D. Wootin, Lumber City, Ga.; Herzog & Spindler, Chicago, Ill.; M. Rabin, Chicago, Ill.; Levy Bros., Newburgh, N. Y.; E. I. Stroman, Uvalde, Tex.; A. W. Hanson, LaCrosse, Wis.

OPEN NEW COLUMBIA DEPARTMENT

Manchester, N. H., April 17.—James A. Scully opened a new talking machine department on the second floor of his store at 1097 Elm street last week, which is said to be the largest and most modern department of its kind in this section of the State. Five demonstration rooms, forty demonstrating machines and three attendants are in the department. The Columbia Grafonola is handled exclusively, and a complete stock of Columbia records is carried in the store. The opening of the new department was announced in large three-quarter page advertisements which appeared in the daily press.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

What your customers buy

MEN and women who purchase phonographs are naturally somewhat interested in the mechanical construction of the machine. But they come to buy accurate sound reproducing mechanism *as a whole*, and not a collection of gears, levers, springs, needles, etc.

THIS is why it is unnecessary for Sonora to elaborate on the details of construction. Each individual part of this instrument has its work to do, and that it does it correctly is proven by thousands of tests before the part goes into the finished machine.

THAT the motor costs more to make than most complete machines; that our patented tone control is where it should be—at the sound source; that the cabinet work is of a remarkably superior nature, etc., etc., these are trivial compared with this one big outstanding fact—

THE magnificent perfect *tone* of the Sonora won for it the highest rating at the Panama-Pacific International Exposition; and—because of this magnificent perfect *tone*—our enlarged and re-enlarged factories are taxed to the utmost to keep pace with the tremendous demand.

If you are interested in representing the Sonora in your territory we suggest that you write us at once

More Distinctive Than a Strad

ALBERT SPALDING
America's premier violinist, proving that the full richness of his interpretations is Re-Created by The New Edison.

The genius of the great Stradivari did not produce a violin so distinctive from other violins as

The NEW EDISON

is distinctive from all other sound reproducing instruments.

In no other field of scientific, artistic or mechanical endeavor has so distinctive an achievement been made as by Edison in the development of his new art, by which all forms of music are literally Re-Created — nothing which the human mind can conceive possesses so great a distinction among similar articles as Edison's new invention has achieved in the field of sound reproduction.

This distinctiveness extends to the sales policy and methods of Edison dealers, who are Edison dealers because of their fitness to properly present The New Edison to the most sensitive music lover. We welcome correspondence with dealers of equal calibre.

Address us direct or the jobber in the list below nearest you.

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, June 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

The Color-Camera of Sound

HAVE you ever overheard a conversation on the subject of phonographs when the people talking were unaware that you were interested in the sale of these instruments in any way?

IF you have, you will have been impressed by the feeling of the people towards the Sonora. Invariably it is recognized as the leader of all phonographs. And every Sonora owner is such a staunch and enthusiastic advocate of the merits of his machine that you cannot fail to understand that here is something quite different from the ordinary run of inanimate commercial products.

The beauty, the naturalness, the life-like sound-photography of the Sonora is what accounts for this.

With a Sonora at home the possessor can have repeated at will the greatest triumphs of famous musical artists.

SO well does the Sonora accomplish its function that it stirs wonderfully even those who ordinarily would be apathetic at a *good* performance.

Those who investigate, even casually, cannot but perceive that the marvelous tone of the Sonora has built for it a wonderful reputation such as is possessed by no other phonograph.

The Sonora is better than "*good*." The Sonora is *unusual*.

Why it is, is revealed by a study of its structural features.

That it is, is of vital importance to all those of you who wish to sell the finest, the most desirable, and the most highly regarded products, and wish to build up a lasting business.

Correspondence regarding agencies is invited.

MONDAY BEST COLLECTION DAY

Collecting Plan Worked Out by Fergusson Music Co. That Should Appeal to Other Talking Machine Dealers—Getting Money First

Practically all talking machine dealers have been vexed with the problems of collection. As a result many have found short cuts, and systems which have changed the collection situation into a decidedly more remunerative thing. Right along this line is a collection tip which E. M. Howard, of the Fergusson Music Co., Newport News, Va., has sent The World.

"We had some difficulties in keeping collections up to par until one day an idea struck me. I gathered a few statistics from our collection books and discovered that our collector had good results on Monday, fair on Tuesday and poor on Wednesday. In other words, Monday was the ideal time for a 'home run drive.'

"I had the bookkeeper route out and subdivide all the collection cards in eight individual districts. We have four salesmen, a collector and three other available men, making eight in all. We start out on Monday morning bright and early at 7.30 and beat the other collectors to it, and get our money all collected in by noon Monday, that is, the ones we have collected from. The idea is that everybody has money on Monday morning and if we go for money while customers have it we get it. The results have shown so wonderful the past few months that I want the entire 'Trade' to know this little tip. Because after all getting the money is the principal feature in the entire business."

HELPS THE SAFE AND SANE FOURTH

Public More Inclined to Buy Talking Machine Records Than Fireworks, Says Victor Co.

In sending out to its dealers advance lists of records suitable for Fourth of July celebrations on July 4, the Victor Co. paid the following tribute to a nation-wide tendency towards a safe and sane Fourth. A letter to the dealer says: "Every Fourth of July there is more and more money being spent for records instead of for fireworks, and Victor dealers have learned to make quite a little preparation for celebrating the nation's birthday."

GROWING TRADE IN NEW CASTLE, PA.

W. F. Dufford & Co., Inc., of That City, Featuring Both Edison Diamond Disc and Columbia Lines with Growing Success

New Castle, Pa., June 4.—W. F. Dufford & Co., Inc., 320 East Washington street, this city, who have a complete talking machine department in their home furnishing store, report a most satisfactory business in that city. The company started with the Columbia line of machines and records, and after six months secured the agency for the Edison Diamond Disc and Amberola phonographs and records for New Castle and vicinity, which line they have been featuring very strongly and successfully.

The business of the department has reached such a point that a motor delivery wagon is used exclusively for delivering talking machines and records, and for doing other hauling connected with that department.

HE WANTED A SLOGAN AND GOT IT

"I want a slogan," said the manufacturer of phonograph records. "Something that will convey the idea that our records never wear out."

The advertising man lit a fresh cigarette and thought for eight seconds by the clock.

"How will this do?" he asked. "One of our dance records will outlast the best hardwood dancing floor ever built."

A HANDSOME FLORAL FLOAT

Sherman, Clay & Co. Attract Attention with Handsome Display in Causeway Celebration Parade Held in Sacramento, Cal., Recently

Sacramento, Cal., June 2.—One of the features of the big parade and pageant held in this city recently during the four day "Causeway" celebration was the elaborate floral float entered by the local house of Sherman, Clay & Co., and which is illustrated herewith. The float was designed by W. Thornberg, of the piano department of Sherman, Clay & Co., and over 6,000 red and white carnations were used in working out the design. Miss E. Travers, one of the leading musicians connected with the store, stayed at the piano throughout the line of march and played the instrument almost continuously. A Victrola XVI. was also one of the features of the float.

The Sherman, Clay & Co. Carnation Float

The float attracted much attention and favorable comment, and the company's name in flowers on the sides proved an excellent advertisement.

The "Causeway" celebration was held to commemorate the opening of the new causeway or road here for motorists which will save them thirty-five miles on the trip from Sacramento to San Francisco and attracted wide attention and large crowds.

QUICK RECOVERY FROM FIRE

Charles H. Schefft & Sons, Milwaukee, Secure New Stock on Short Notice, After Heavy Loss—Now Rebuilding Former Quarters

Milwaukee, Wis., June 6.—Charles H. Schefft & Sons, 849 Third street, Victor dealers, were practically wiped out by fire on Sunday evening, May 28, but a brand new stock has been obtained and the company will do business on the second floor of the building until the effects of the conflagration are removed. The Schefft company's loss is about $7,500, with insurance of about 75 or 80 per cent., so it can be seen that it was badly hit. With characteristic energy, however, the Scheffts started at once to rebuild their fortunes and in a month or so will again be found at the old stand. The fire was one of a series of Sunday evening fires in the upper Third street business district, which is said to be the mark of a youthful incendiary. The Schefft company and others occupying the block were the fifth mark of the boy, who has not yet been captured.

HANDSOME QUARTERS IN VANCOUVER

The Kent Piano Co., Ltd., of That City, Remodeling Building—Talking Machine Department Moved to Ground Floor Location

Vancouver, B. C., June 5.—The Kent Piano Co., Ltd., of this city, has completed plans for the remodeling of its entire building. The changes include the removal of the talking machine department, which has, up to the present time, occupied the mezzanine floor, to a more promising position on the ground floor, where, besides five demonstrating rooms for records, there will also probably be three special sales rooms for machines. The woodwork of the booths will be of high quality and they will be provided with leaded plate glass panels in the doors and walls. The company is now featuring the Edison Diamond Disc phonograph with great success.

COMPLAINTS AS A FACTOR IN BUSINESS BUILDING

When a Customer's Complaint, Whether Real or Fancied, Receives Proper Consideration from the Man Who Made the Sale, a Steadfast Friend Is Generally Gained for the House

"There are nothing like complaints to help business," declared a talking machine salesman, who had spent some years in the retail end of the business and knows the conditions therein. "By that I do not mean that faulty instruments that produce nothing but complaints cause a dealer to expand," he explained, "but a few complaints with the average high grade house, properly handled, will result in a cementing of friendships that are valuable assets. Every complaint should be handled by the salesman who sold the machine, with the manager helping if necessary, and not be left to a disinterested clerk to settle.

"In the first place, the salesman in closing a sale has become more or less friendly with the purchaser. In the second place, he knows, or should know, about the instrument, and his friendship with the customer will enable him to meet the latter on a basis that is calculated to influence a satisfactory settlement. His knowledge of the instrument on the other hand enables him to judge about how just the complaint is, and frequently to suggest a remedy without resorting to a personal examination. By having the man who sold the instrument meet the complainant and handle the complaint, the purchaser has no chance to gain the impression that the salesman is trying to dodge the issue; that he had a premonition that the instrument was not going to stand up properly, and having received the money in payment therof, was afraid to meet the purchaser and discuss any trouble.

"There will be complaints about talking machines as long as these instruments are made. Some of these complaints are more or less imaginary, but some are real. There is no machine made in the world that will not at some time or other develop trouble, for in a factory employing hundreds of men there is always the human equation to be reckoned with. The salesman, however, who realizes these facts goes right to the point and in adjusting the complaint proves that his house stands back of the instrument sold, and is willing to make good, for any faults in construction or regulation. It is frequently proved that the customer who has a complaint adjusted promptly and pleasantly becomes a far stronger booster for that particular house than the customer whose instrument has given perfect satisfaction, and has had no reason to test the faith of the salesman and his guarantee.

When, however, on the other hand, a complaint is handled by a clerk in the office without any knowledge of the existing conditions, and who is entirely out of sympathy with the customer, it frequently happens that even a just complaint is handled so unsatisfactorily that the customer is disgusted and does not hesitate to tell his friends of the fact. A man in the talking machine business should be prepared to stay in the business for a long time and the proper treatment of dissatisfied customers is one of the factors that lead to that long business life, for such treatment means developing friends that soon become excellent "boosters."

DETROIT HOUSES GOING AFTER THE SUMMER BUSINESS

Many Small Machines and Records Being Sold in Vacation Districts of Michigan—Wholesalers Busy—J. E. Schmidt Opens New Sonora Store—Limit Placed on Approval System—Attractive Window Displays of Talking Machines—Association Members Dine

DETROIT, MICH., June 6.—Two words practically express the unanimous sentiment regarding the trade of local dealers selling talking machines: they are "above normal." Here and there you find a dealer who will tell you that he is getting enough goods, but most of them report that they could sell more goods were they able to get them. The statement made by K. Mills, manager of the Detroit branch of the Columbia Graphophone Co., just about "hits the tack on the head". He said that the talking machine business was no longer done in certain seasons but that it was an all-year business. In winter months people want music in their homes, while during the summer months there is a big increased sale of records and machines to people who want to use them in their summer places. Michigan is probably one of the greatest States in the country for fishing and summering on account of its numerous chain of inland lakes, to say nothing of the four great lakes on which it is located. This means that in every part of the State there are summer homes—and the great bulk of them have talking machines of some kind to afford entertainment.

The four jobbers located in Detroit are Grinnell Bros. (Victor), Columbia Graphophone Co. (Columbia), the Phonograph Co. of Detroit (Edison), and the Pathé Phonograph Co. (Pathé), they are unanimous in reporting excellent business.

The quarters of Grinnell Bros., 231 Cass avenue, Detroit, have been considerably enlarged so as to permit of carrying more cabinets as well as records. C. H. Grinnell is in charge of this department.

It is not an uncommon thing nowadays to see one and two full windows devoted to displays of talking machines and records. The writer can recall a few years ago when very little space was given to this industry, whereas now the full line is shown. The Peoples Outfitting Co., Heynz Bazaar, Elliott-Taylor-Woolfenden Co., and Summerfield & Hecht, recently had very attractive displays of talking machines in full window space.

For the retailing of Sonora phonographs exclusively, John E. Schmidt, proprietor of the East Detroit Music House, 336 Gratiot avenue, has opened a store at 607 Woodward avenue, in the Arcadia Auditorium building. The location is excellent for high class trade.

Among the well known representatives here during the past few weeks were: C. L. Price, of the Victor Talking Machine Co.; W. O. Pardee, president of the Edison Disc Jobbers' Association; Edward Lyon, of the Eclipse Talking Machine Co., Cleveland; Harry Fitzpatrick, of Lyon & Healy, Chicago; W. C. Griffith, of the Chicago Talking Machine Co., and Mr. Conover, of the Wurlitzer Co., Chicago.

Henry S. Doran, of the Doran Phonograph Co., and R. B. Alling, manager of the Edison Shop, 254 Woodward avenue, Detroit, participated in the thirteenth annual boat cruise of the Detroit Board of Commerce, June 8 to 13.

E. K. Andrew, manager of the J. L. Hudson Co.'s talking machine department, will leave on June 13 for a motor trip through the East. He will be gone one month. His wife, mother and father will accompany him.

Place Limitations on Approval System

The Detroit dealers doing an approval business have virtually agreed upon a uniform contract which customers will be required to sign. It requires customers to retain at least 33 1/3 per cent. of all approval records; to return the undesired ones within twenty-four hours; no records costing over $3 will be sent out on approval. It is fully believed that these new regulations will tend to minimize the approval evil and the number of abuses. Later on more rigid requirements will be put into effect. In this respect the opinions of dealers seem to differ. Some members believe it is best to do things gradually, while others believe in making the change quickly and generally and at the same time. "What's the sense of doing things by halves; why not set your policy, let the public know what it is and then stand by it," said one dealer.

A. A. Fair is now on the road through Michigan for the Columbia Graphophone Co., and is doing splendid work for that institution. Mr. Fair for the past twenty-four months has been associated with Grinnell Bros. at the main store.

"When you say Edison you think of Wallace Brown" is the latest slogan to be adopted by Wallace Brown, 31-33 East Grand River avenue, Detroit.

Larry Dow has resigned as salesman with the Wallace Brown Edison Shop to assume the management of the phonograph department of the Frank Bayley piano store, 74 Broadway.

Large crowds are attending the Thursday afternoon recitals at Grinnell Bros.' Victrola parlors. The Ford Hawaiian Quintet was the attraction the first week, and resulted in a brisk trade thereafter for Hawaiian music.

A Handsome Department

One of the finest talking machine departments in the city is that on the fourth floor of the new building of the Peoples Outfitting Co., Griswold and Shelby streets, in charge of

People's Outfitting Co.'s Fine Department

Mr. Sidney Hart. The entire fourth floor is given over to pianos, players and talking machines, there being nine handsome booths for the latter department.

Harry W. Wolfe, William H. Goldblum, A. J. Wolf and C. H. Schmeltz comprise the officers and stockholders of the Voxloa Co., which has filed articles of association with the Secretary of State for $25,000, of which $2,500 has been paid in in cash. The Voxloa will be a musical instrument to retail at $125 to $250—all period cabinets.

J. Henry Ling has appointed Paul Kuhl to manage the talking machine department, 78 Library avenue, Detroit.

The May meeting of the Detroit Talking Machine Dealers' Association was preceded by a banquet at which the members were the guests of Grinnell Bros., Victor jobbers in Michigan, at the Hotel Charlevoix. A vote of thanks was later tendered to the officers of this firm for their hospitality. As for the business meeting, it proved an interesting one. A motion was carried unanimously authorizing the secretary in behalf of the organization to write the Michigan congressmen of its approval of the Stephens price maintenance bill.

Edward Fell Jardine, who handles the Sonora phonograph on the Boardwalk, Atlantic City, has secured the exclusive agency there for the Stewart phonograph.

BOOKKEEPING FOR TALKING MACHINE DEALERS

By Edmund V. Bragdon

The talking machine dealer, when he decides to go into business, at the same time decides to invest a certain amount of money in that business. Let us say, for example, that this amount is $4,000. With one-half of this amount, he purchases his stock in trade. The other half he puts into a bank. Now if he is a careful man, he deposits the total amount of his sales and keeps an exact record of the amounts and purpose of each withdrawal from the bank. When his bank book is balanced, if it should not be in exact agreement with his cash balance, he starts an immediate investigation to find out the reason and he is particularly tickled if he "gets one" on the bank.

But what about his other $2,000 that he converted into stock? Does he keep an equally careful record of his receipts and disbursements here? This is just as truly his money as the amount that he deposited in the bank and yet the average dealer is content to take inventory perhaps once a year, and using this inventory figure, to say, "I have purchased so much, I have so much on hand, therefore I have sold the difference." How do you know that you have sold the difference? How do you know that there are not thefts, either by employes or customers, or that goods are not leaving your store daily which have not been billed to your customers?

A system of bookkeeping has been devised and is in successful operation in a number of stores that is particularly adapted to the talking machine business, due to the fact that your sales prices never change. Every purchase bill, when it has been properly checked, is extended on the face of the bill at sale prices, and your record, machine or sundries' account is charged with this amount. Your jobber is credited with the amount of his invoice to you, and the difference between the cost and selling price is credited to a loading account. The total of the day's or month's sales is credited to your record, machine and sundries accounts, and the balance in these accounts will at any time show the amount of your inventory of stock on hand. The credit balance in the loading account will always represent the load on the stock on hand plus your accumulated gross profit on sales. Provision must, of course, be made for unloading credits to the merchandise accounts on account of returns to jobbers and for breakage.

By this method inventories may be taken as frequently as desired and if they do not always tally with your ledger accounts, it is conclusive evidence that goods have disappeared from your shelves without proper return to yourself.

Another most important matter is the proper recording of your charge and installment customers' accounts. There is perhaps no easier way in which to make bad friends than to send a man a bill for an amount that he has already paid. It is a reflection on the store which is not soon forgotten, and which needs a lot of explanation as to just how it happened. In most stores it will be found necessary to keep a separate ledger for each class of accounts. In addition to these, an account in your general ledger, which reflects the condition of the total of each class of accounts is the best means of keeping a check on these accounts that has been devised. This is technically known as a controlling account, and if the total of the individual accounts is in agreement with the balance of this account you are assured of two things; first, that all goods sold to these classes of customers have been charged, and second, that all payments by these customers have been credited. There is no proof, however, that Mr. Brown's payment has not been credited to Mr. Jones, and great care in posting should be exercised here.

Duplicate sales tickets should be used and each sale should be legibly recorded for your subsequent distribution in the sales book. This may be done briefly as, for instance:

2—10″ D. F.	$1.50
1—10″ R. S.	1.00
1—12″ B. L.	1.50

Stock ruled columnar books answer all requirements for your purchase and sales books and stock ruled loose leaf ledger sheets should be used in your customers' ledgers.

The criticism of this system that will be uppermost in the minds of many dealers will be that it requires time to keep the records in this way. Work of this nature in a very short time becomes mechanical. You do not have to stop and think where you will enter this bill or that sale, you know without thinking and the day's business can be taken care of in a few minutes the next morning. You spend the time now in balancing your bank book, and consider it well spent; why not spend some time in balancing your inventory? It will save you money and a proper record of your customers' accounts will save you friends.

NAMM & SON'S NEW DEPARMENT

Prominent Brooklyn Store Has Handsome New Quarters for the Display and Sale of the Victor and Edison Diamond Disc Lines

A. I. Namm & Son, the well-known department store of Brooklyn, N. Y., recently held a formal opening of its renovated talking machine parlors which are located directly at the subway entrance on Hoyt street. The new talking machine department covers a space of 5,000 square feet. It is equipped with a long suite of sound-proof rooms and handsome display rooms for machines, and the company handles both the Edison Diamond Disc and Victor lines in a large way and with much success.

As a feature of the opening there was distributed an elaborate Vernon Castle dance portfolio, showing the famous dancers going through their steps to the music of Victor records.

DICTATING WHILE ON AUTO TRIP

Edison's Dictating Machine Proves Boon to Busy Men Who Motor From Country Homes to Business—Saves Much Time

Through the genius of Thos. A. Edison in creating and developing the Edison dictating machine, combined with the latest creation of the automobile engineers, the busy man now finds it possible to spend the time going to and from his office in caring for certain of his business details.

In the New York American recently it was stated in an illustrated article that Arthur Brisbane, editor of the Evening Journal, and one of the best known newspaper men in the country, had installed an Edison dictating machine in his automobile, and on his way into town from his Long Island home each morning managed to dictate much of his editorial matter and other details of a like nature. Mr. Brisbane stated that with the car going thirty miles an hour it was possible to dictate clearly and without unusual effort. After the dictating machine had been installed Mr. Brisbane took his car over to the Edison laboratories in Orange to show the great inventor what had been accomplished. Mr. Edison tried the new system of "working while you ride" and was most enthusiastic about it.

NEW YORK, JUNE 15, 1916

IN four short weeks from the time this issue of The World reaches its readers, the members of the National Association of Talking Machine Jobbers and their families and friends will be assembled at Atlantic City for what is firmly expected to be the most important and successful convention in the history of that active organization.

As has been announced it will be distinctly an educational convention. Beyond the actual business of the association demanding official attention, the time of the session will be given up to matters designed to impart to the jobbers and their associates a better understanding of the business, together with ways and means for improving sales and advertising methods, all calculated to send the association members home with much material that will mean more business and greater profits for them in the future.

In connection with the educational work, the Victor Co. has as usual been most liberal in its offering of experts. Department heads will in person attend the convention and explain to the jobbers the intimate features of those particluar departments of the factory with which they are connected. On the other hand, the members of the association will be called upon to describe new sales methods.

From every standpoint the convention should be well worth remembering, and the inducements offered should help to bring out an attendance of jobbers that will overshadow previous gatherings of this kind.

In the serious matter of education, however, the subject of recreation is not to be lost sight of, and the Committee of Arrangements will see to it that the time spent outside of the meeting room will contribute its fullest measure of enjoyment. The jobbers know Atlantic City and Atlantic City knows the jobbers, which should make it quite evident that those who attend the convention will not necessarily have to wander about lonesome and discontented.

The Jobbers' Association has always been like one big family, rather than a gathering of competitors. Wives and families are considered necessary adjuncts to the success of the meeting, and the spirit that pervades the association and its members alone makes it worth while for one to attend the convention in an endeavor to assimilate some of that spirit and bring it away with them.

Here's to the biggest and best convention the National Association of Talking Machine Jobbers has ever had!

THE day of the carelessly arranged, poorly equipped and dirty talking machine store is past and the man who seeks real prominence in this branch of the music trade nowadays must of necessity maintain showrooms that measure up to the high character of the product he offers for sale.

The talking machine is no longer a novelty and cannot be offered as such. The purchaser to-day knows what machine she or he wishes to buy. There is nothing mysterious about it. The purchaser is buying a medium for producing music in the home and goes to the store not so much to see and inspect as to select. In other words, the customer realizes that the machine will do this and that and that the price is so much, and is chiefly interested in the records. It thus will be explained that the dark and dusty store, lacking in privacy or refinement, is not calculated to cause the prospective purchaser to make the most desirable selections.

On the other hand the cozy demonstrating booth, soundproof, well ventilated and lighted and with comfortable chairs influences the customer to stay longer and to spend more time in choosing the records he most desires. This may bring forth the argument that being so comfortable the customer wastes time, but the fact still remains that the man and woman who can select records at their ease are more inclined to stay and hear and buy records that otherwise would never have been thought of when selections are made in the open store and under less favorable conditions.

The talking machine companies have themselves been largely responsible for bringing about this new condition in the stores. They have emphasized the value of an attractive store, have published pictures of them and otherwise encouraged the man who has sufficient gumption to spend some money in the equipment of his establishment. A fine store may mean a heavy investment, but it tends to place the talking machine on the high plane it deserves, and may result in an increased volume of business that would soon offset the investment through greater profits. Then, too, having a fine store which is recognized as the musical center in his section, the dealer is in a better condition to meet and successfully combat the competition that is developing.

THE members of the talking machine trade, especially the jobbers who have worked so hard to develop sentiment favorable to resale selling price maintenance on trade-marked goods, can now be congratulated on the fact that the Chamber of Commerce of the United States reports the recent referendum vote on that subject by its members to have resulted in 639 votes for, and 237 votes against, Federal legislation, "permitting the maintenance of resale prices under proper restrictions on identified merchandise for voluntary purchase made and sold under competitive conditions." This vote gives those in favor of price maintenance a full two-thirds majority.

The idea of having the Trade Commission Act amended so that the Federal Trade Commission could prevent price cutting did not appeal as strongly to the voters, who registered as 549 in favor of such amendment and 289 against. Meanwhile those who favor price maintenance as covered by the Stephens Bill, should not let the matter rest, for the subject is now under the consideration of the House Committee on Interstate and Foreign Commerce. J. Newcomb Blackman attended the recent hearings as representative of the National Association of Talking Machine Jobbers. The fight will be a hot one and the talking machine men should do their part toward making it successful. One and all must get busy and keep in close touch with their Representatives in Washington, impressing on them their desire that the standard price principle embodied in the Stephens Bill be enacted into law at the present session of Congress.

TO those who visit talking machine stores, especially in the larger cities, it is evident that proprietors, managers and salesmen are for the most part enthusiastic and capable men who realize the value of their trade and seek to sell machines and records, rather than simply take the orders that the tremendous advertising of the manufacturer forces upon them. Under such conditions the exhibition of poor salesmanship becomes all the more pronounced and for that matter less excusable.

A week or so ago a member of the staff of The World was

desirous of securing a certain record. He dropped into one of the talking machine stores in Upper New York, was greeted by the young salesman in an indifferent way and who asked without enthusiasm what was wanted. Upon being informed, the salesman meandered to the record rack in the rear and succeeded after some search in finding the record desired, and placed it on the machine for demonstration. After the machine started, the salesman closed the door of the booth and lost himself for the space of five minutes or so leaving The World man to stop the machine after the record was through playing.

Upon the visitor emerging from the booth, record in hand, the salesman approached and asked casually, "Do you want it?" Being answered in the affirmative, he took the record and the money, broke the latter, and packed the former to prevent breaking, handed the change and record to the customer without even a "thank you" and turned away. And this young man, were he looking for a position in another store, would probably say that he was a salesman.

The World man likes music and would have been glad to have listened to other numbers on the new list and may have purchased one or two. In fact, he purchased another record the same evening at another store, where he had heard it demonstrated. But the youthful salesman in the first place, judging from his attitude, condemned the purchaser for spoiling an otherwise peaceful and restful evening. Only an apology from The World man for daring to come into the store was necessary to make the farce complete.

The store in question has an attractive display of machines with a plentiful supply of posters, signs and other printed matter furnished by the manufacturer. Although the June list had been already on sale for three days the May announcement was still in place. The interior was attractive, and this, too, was hung with the manufacturer's announcements. In other words, the manufacturer's advertising was depended upon to bring the customer to the store and interest him sufficiently to enter. The interior was calculated to interest him still more in the manufacturer's product, but the attitude of the salesman did not bear out the signs.

The trouble with a certain class of dealers seems to be that they have gotten into a rut. The tremendous advertising campaigns of the manufacturers have produced such wonderful results that the dealer feels that all he is required to do is to supply the products to those who insist on having them.

This type of dealer ordinarily does not stop to think that if he can make a fair living through handing out records to those who come in and demand them that he could make a real profit if he would make an effort to "sell" a few records. While there are no figures to base an assertion, it is very evident that at least two records could be sold through interested demonstrating to one sold on its name. In other words, if a printed list will bring in a customer for one record, intelligent salesmanship should be able to sell him two more.

It is indeed fortunate for the industry that the great majority of retailers regard the selling of talking machines as they would that of any other merchandise and take advantage of the many distinct opportunities offered by this trade, such as the great advertising and fixed prices, to make a substantial profit.

ONE of the most important educational works to be announced by the Victor Co. is that of a special course in music free for ambitious Victor record salesmen. The Victor Co., through "The Voice of the Victor" offers to provide a correspondence course on music, or will convey the required information in some other suitable way, to all Victor record salesmen who advise the company of their desire to take such a course through enrolling in the class.

It is thoroughly recognized that a knowledge of music is practically essential to the good talking machine salesman, and the more accurate and broad this knowledge just so much more valuable the salesman becomes to himself and to the house employing him. For the salesman to be able to talk intelligently of the better class of music, to make suitable selections for customers without blunder and with an accurate knowledge of what he is about, means that he is contributing his bit toward maintaining the talking machine business on its present high plane.

Incidentally, the Victor Co. is to be congratulated on the broad-minded spirit they show in the matter of developing, indirectly, better record service for both their dealers and machine owners through more general musical education of salesmen.

RALPH STARR BUTLER, associate professor of business, in a lecture at the University of Wisconsin, defined advertising as the merchant's greatest need.

"The man who says he does not believe in advertising does not know what he is talking about," he said. "If he really believed what he says, he would tear down his sign, board up his windows, cover up his shelves, make kindling out of his store windows, and do business with intending customers through a hole in the wall. Newspaper advertising is only one form of advertising; all forms are good and they all work together to one end—the sale of goods.

"The merchant who is looking toward the largest success can no more do without advertising than he can do without his sign, his store windows, his display of goods, his service, his courteous clerks, his reputation, and the thousand and one other things that go to make up advertising.

"Advertising is a modern necessity, and the merchant who refuses to limit his business horizon does not try to fool himself by thinking that he can get along without it."

The "LOW VISIBILITY" of Pearsall Victor Service

Service is most efficient when it isn't obtrusive. It's being there, working in harmony with yourself and your salesmen, that counts.

We have made a careful study of your needs, and our specialization on "summer records" will help you hit the business target of profits.

When we add a customer, we add a friend, for we specialize upon co-operation. It is "what you want" that counts with us, and our entire energies are to this end. To know Pearsall Service is to like it, so won't you let us explain how we work to your entire satisfaction?

ASSOCIATIONS TO IMPROVE PACIFIC COAST CONDITIONS

San Francisco and Portland Associations Plan to Co-Operate—Former Body Progressing Rapidly—Extensive Improvements in Columbia Quarters in San Francisco—Encouraging Reports from the Interior—Victor Line for the Emporium—New Stores Open

San Francisco, Cal., June 3.—All branches of the talking machine business here say that May sales showed an increase over the corresponding month of 1915, as did the earlier months of the year. The only difficulty seems to be in getting sufficient goods to supply the needs of the trade. The demand is running strongly to high priced machines, which is a very gratifying feature to the dealers. Record business keeps up in good shape, notwithstanding the departure of many families on vacations to the country, which is largely due to the fact that a good many people have talking machines at their suburban homes and continue to buy records while away, while others take machines with them to the mountains and seashore.

Enthusiastic Meeting of Dealers' Association

The May meeting of the San Francisco and Oakland Talking Machine Dealers' Association was one of the most enthusiastic ever held here. The meeting was held in the concert room of the Edison Shop, with James J. Black in the chair, owing to the absence of President P. H. Beck. Mr. Black had just returned from Portland, Ore., where he assisted the trade in forming an organization, and he brought a message from that body asking permission to co-operate with the local association for the betterment of trade conditions on the Pacific Coast as a whole. Mr. Black explained that the Northern organization is in a strong position, being formed not only as a talking machine dealers' association, but also as a branch of the Portland Chamber of Commerce. Several of the newer departments of this city and Oakland were represented at the meeting, some of which expressed a desire to become members, applications being received from the John Breuner Co., prominent furniture dealers of Oakland, who have installed a large talking machine department; the H. C. Capwell Co., Oakland department store, which has a very attractive Edison shop; Harry Warburton, formerly with Sherman, Clay & Co., in Oakland, who recently succeeded Omer N. Kruschke in Berkeley, and the Pathé Pathephone shop on Post street, San Francisco. The question of interest on deferred payments on talking machines was discussed at considerable length, and the concensus of opinion seemed to be in favor of charging interest. Several members stated they thought it would be a good thing if the manufacturers would include a clause in their contracts with dealers making it obligatory for them to charge interest all over the country.

Improvements in Columbia Quarters

Extensive improvements are in progress at the local warerooms of the Columbia Graphophone Co., following the closing of a long-term lease on the present quarters, which warrants a thorough renovation and the refitting of the place in keeping with the rapid strides being made in a business way. The old partitions in the front portion of the establishment have all been removed and the space under the new arrangement will be utilized to much better advantage. Near the entrance is a large display and demonstration room for the benefit of visiting dealers. Adjoining it is a similar room devoted to the dictaphone department. Next comes private offices for General Manager Fred A. Dennison and Local Manager W. E. Henry. This front portion is separated from the general offices by a large reception room. Mr. Dennison says business continues to run substantially ahead of the corresponding period of last year, although there is still a shortage of some styles of machines, particularly the smaller types. He expects to spend a vacation in Southern California this month.

Fine New Columbia Department in Sacramento

W. E. Henry has been making frequent visits to the Columbia dealers in the interior towns of California, and he reports some notable additions in certain places, principally Sacramento. In that city a splendid new department was recently opened by the Weinstock, Lubin Co., the largest mail order concern in the State. The new section has commodious quarters on the second floor of the large establishment, and is handsomely equipped throughout. A complete stock of Columbia machines and records was on hand for the formal opening, which was one of the most elaborate events of its kind ever held in the Capital City. As a special feature the Knickerbocker Club quartet of San Francisco rendered several numbers, supplementing the wide range of records played on the Columbia Grand Grafonola. Besides the prominent representation given the Columbia line by the Weinstock-Lubin interests, the Wassermann-Gattman Co., of the same city, has increased the facilities of its exclusive department and is making a very creditable showing.

C. W. Davis, Manager of Edison Shop

One of the notable events of the past month was a change in management of the Edison Shop on Geary street. John E. McCracken, who was in charge of the establishment for several months, decided to resume his former duties with the Pacific Phonograph Co., namely, selling Edison products to dealers, and he was succeeded at the Edison Shop by C. W. Davis.

P. H. Beck Retires

On account of poor health, P. H. Beck has given up the active management of the Kohler & Chase talking machine department for a time and is taking a well earned vacation.

Pleasing Outlook for Fall and Winter

Upon his return from an inspection trip in the San Joaquin Valley, A. R. Pommer, of the Pacific Phonograph Co., stated that he found Edison dealers generally very optimistic over the prospects for an excellent fall and winter business, their hopes being well founded on the bounteous crops of the Valley. Mr. Pommer was accompanied by Omer N. Kruschke, new general manager of the Pacific Company. John E. McCracken, traveler for the company, is sending in some nice orders from the Northwest, and Mr. Pommer says business is fully up to expectations all along the line.

Emporium Secures Victor Line

The stock and fixtures of G. W. Scott's talking machine store in the Richmond District were recently taken over by the Emporium, including his contract with the Victor Talking Machine Co., which gives the Emporium the Victor line in addition to its Columbia and Edison representation. A. W. White, manager of the Emporium department, says business is keeping up splendidly for this time of the year. He is looking forward to larger quarters for his part of the business toward the end of the year when extensive additions about to be started by the concern are completed.

New Victor Department Opened

The most prominent addition made to the local talking machine trade in many months was the opening recently of a large, exclusive Victor section by M. Friedman & Co., who operate one of the largest furniture stores in the down-town business district of San Francisco. The new department is under the management of D. M. Browne, who was formerly connected with the trade in Los Angeles. It is

We Are in the Market

EMPIRE SECURITY COMPANY
208 S. LA SALLE ST. CHICAGO

The only change in Columbia dealers profits during the last month has been an improvement.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

located on the ground floor of the big furniture establishment, occupying large and prominent space near the main entrance, where five modern demonstration rooms have been installed, each one carrying out a different color scheme and style of furnishing, but all blending into a harmonious whole. Since taking on the line, the company has featured Victor products extensively in its window displays and advertising, and reports business starting out very encouragingly.

Scott Takes Over Scott Store

The old quarters at 607 Clement street, formerly occupied by G. W. Scott, have been secured by J. R. Scott, who, by the way, does not happen to be a relative of the former proprietor, and will be re-opened as a talking machine establishment. The new owner has been connected with the Wiley B. Allen department for some time.

Plan to Attend Jobbers' Convention

Andrew G. McCarthy, of Sherman, Clay & Co., president of the National Talking Machine Jobbers' Association, expects to attend the convention in Atlantic City in July, and is making his plans accordingly. Philip T. Clay, of the company, will attend the convention also. He left for Arizona the latter part of May with his family, expecting to go on to New York and other Eastern points before returning.

F. B. Travers, manager of the Sonora Phonograph Co., of San Francisco, has gone South after a short stay at headquarters here, following an extended trip in the Northwest.

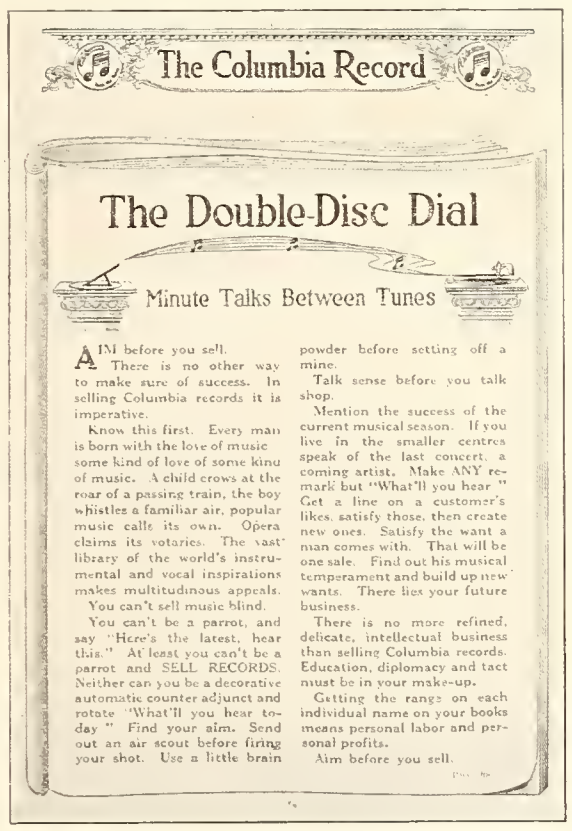
The Hauschildt Music Co. has moved to a new location in Sacramento, Cal., and contemplates adding a stock of talking machines at its branch store in that city.

Mme. Rappold Gives Edison Tone Test

At Scottish Rite Hall on the afternoon of May 28, a large audience heard the voice of Mme. Marie Rappold in dual form. The diva was there herself, and on the stage with her was an Edison Diamond Disc phonograph on which her records were played.

INTRODUCE NEW FEATURE

Herewith is reproduced in miniature a page from the Columbia Record, house organ of the Columbia Graphophone Co., which embodies a new idea in this publication. An interesting series of talks will be prepared by the editor of



The Columbia Record

The Double-Disc Dial

Minute Talks Between Tunes

AIM before you sell.

There is no other way to make sure of success. In selling Columbia records it is imperative.

Know this first. Every man is born with the love of music some kind of love of some kind of music. A child crows at the roar of a passing train, the boy whistles a familiar air, popular music calls its own. Opera claims its votaries. The vast library of the world's instrumental and vocal inspirations makes multitudinous appeals.

You can't sell music blind.

You can't be a parrot, and say "Here's the latest, hear this." At least you can't be a parrot and SELL RECORDS. Neither can you be a decorative automatic counter adjunct and rotate "What'll you hear today." Find your aim. Send out an air scout before firing your shot. Use a little brain powder before setting off a mine.

Talk sense before you talk shop.

Mention the success of the current musical season. If you live in the smaller centres speak of the last concert, a coming artist. Make ANY remark but "What'll you hear." Get a line on a customer's likes, satisfy those, then create new ones. Satisfy the want a man comes with. That will be one sale. Find out his musical temperament and build up new wants. There lies your future business.

There is no more refined, delicate, intellectual business than selling Columbia records. Education, diplomacy and tact must be in your make-up.

Getting the range on each individual name on your books means personal labor and personal profits.

Aim before you sell.

the Columbia Record for use in the Double Disc Dial, this house organ within a house organ.

The Columbia Record has made remarkable progress the past year and each issue contains informative material which can be used by Columbia dealers to excellent advantage. It is understood that plans are now under way for even further enhancing its value.

VICTROLAS LEAD BIG DRILL

Fourteen Thousand School Children of Tacoma Go Through Annual Out-Door Evolutions to Music of Talking Machines—Giant Victrola Proves a Great Attraction to Public

TACOMA, WASH., June 1.—Last Monday the Tacoma school children held their annual Stadium Day festival in the Tacoma Stadium with about 14,000 children taking part in drills, exercises, folk dances, etc. In several of the features all the children drilled as one body and all the evolutions were made to the accompaniment of music from the Victrola. Forty-eight instruments of that make having been placed in the public schools of this city by Sherman, Clay & Co.

The giant Victrola constructed by B. A. Almvig and F. C. Lindquist, of the local store of Sherman, Clay & Co., and which was described in The World last month, continues to prove a great attraction at various public affairs in this city. The cabinet is ten feet high and four and one-half feet square, and the volume of sound produced makes it especially suitable for out of door work.

About June 15 it is the intention of the company to place the mammoth Victrola in Wright's Park, one of the largest parks here. The instrument will be placed on a large cedar stump about twelve feet in diameter and high enough so that it can be seen and heard a block or more away.

The Sherfrey Jewelry Co., of Council Grove, Kan., has secured the agency for the Victor-Victrola line of talking machines and records, and is featuring the line prominently in the local press.

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. IT WILL BE THE GREATEST EVER!

We Are Not Going into the Manufacture—

and sale of Talking Machines, BUT, we will make cabinets and cases for a limited number of responsible manufacturers.

For prices, send specifications, volume of business and blue prints, if possible.

We can create original and distinctive case designs for you.

DEALERS—
Who would be interested in a line of quality pianos at sale-able prices should write us.

Chute & Butler Piano Company
PERU, INDIANA

Putting Dealers on Their Mettle

Under the Probationary Zone policy of Thomas A. Edison, Inc., the dealer assumes responsibilty for a specified zone of operations in such a way that he is likely to do more business than under any other plan. Under the Probationary Zone Plan the dealer has ample opportunity to show how good a dealer he can be and how closely he can cultivate his zone when working under as ideal a plan as we can at present conceive.

After the dealer has complied with the liberal conditions of the Probationary Zone Plan, and has been accepted by the company, the immense Orange Factories, the highly efficient Edison organization and a most satisfactory service are placed at his back and he is given every incentive to make good.

Complete details of the Edison Probationary Zone Plan may be obtained by addressing the nearest Edison jobber in the list on the back cover of this issue, or

Thomas A. Edison, Inc.
279 Lakeside Ave., Orange, N. J.

Marie Rappold, Metropolitan Opera Company and Albert Spalding, greatest American violinist, proving the absolute likeness of Mr. Edison's Re-Creation with their original rendition of a great solo with violin obligato.

Marketing A Distinctive Product

From the factories of Thomas A. Edison, Inc., at Orange, N. J., the NEW EDISON and EDISON RE-CREATIONS are shipped daily to all parts of America and many parts of the world.

These instruments, and records of great artists' performances, are but the tangible mediums of a wonderful new art—Music's Re-Creation. Mr. Edison's new art is the recording of every iota of humanness of the voice and the peculiar characteristics of musical instruments by which they are distinguished one from another; and the subsequent Re-Creation which is so absolutely like the original that the musically trained ear cannot say which is which when brought into immediate comparison with each other.

Is it any wonder that a product of such marked distinctiveness receives the unqualified approbation of the leading music critics of America?

Marie Rappold, prima donna soprano Metropolitan Opera Company, and Christine Miller, celebrated concert contralto, demonstrating how perfectly their voices have been Re-Created by Mr. Edison in a famous duet.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., June 5.—The month of May made a good showing at practically all of the local talking machine houses and June has made an encouraging start. This is the time when there is a large demand for the low and intermediate priced outfits such as are suitable for summer camps and bungalows and there are many orders in for shipments during the next few weeks to seashore and mountains. In many cases it is difficult to procure goods by some of the houses, but this is a cry that has been heard for some time past.

Decorated for Preparedness Parade

Although there were none of the local trade taking part in the Preparedness Parade, about all of the houses which have window space made a display of the Stars and Stripes and otherwise carried suggestive decorations. This was especially true of M. Steinert & Sons Co., Oliver Ditson Co., Columbia Graphophone Co., Eastern Talking Machine Co. and several other places. Some of the Boston houses already have inaugurated the Saturday half-holiday and 5 o'clock closing and by the first of July probably all of the houses will get into line.

Conference of New England Columbia Dealers

Thanks largely to the conference a few weeks ago between a group of the New England Columbia dealers and Manager Arthur Erisman, the Columbia business is making an unusually large showing in this territory and dealers who have not been doing a great deal have suddenly woke up and are seeing their business from a new angle. More dealers, too, are coming to see the necessity of keeping a full stock of records so that they won't hereafter have to tell a customer that they haven't it in stock. Manager Erisman was over in New York the other day and held several conferences with the Columbia officials, all looking to a further pushing of business.

Well Satisfied with Business Progress

Manager R. S. Hibshman, of the Vocalion Co., is well satisfied over the business that he and his staff have been able to do during May. A number of high-priced machines have been sold to prominent people in Greater Boston. The parlors of this company are kept in the most attractive way and the window displays are always simple and tasteful. Manager Hibshman was over in New York for a few days. He has leased a house in Winchester into which he will shortly move. Since coming to Boston he and his family have been living in Hingham.

J. F. Meade, the vice-president of the company, who came over with Mr. Hibshman when the Boston warerooms were first opened, no longer makes his headquarters here, but in New York, but makes periodical trips over here.

The New Oliver Ditson Building

Manager Henry A. Winkelman, of the Victor department of the Oliver Ditson Co., has been eagerly interested in the plans for the new Oliver Ditson Building, at 178 and 179 Tremont street, as drawn by C. Howard Walker, the Boston architect. He is to have a fine suite of rooms for the Victor business, which, under his able supervision, is making rapid strides. The Victor department will lack for nothing in the way of conveniences and appointments and for the company's customers it will be a distinct pleasure to patronize the warerooms.

Increased Business Makes Demand on Stock

The Eastern Talking Machine Co. did a large business during May. This is one of the local houses that finds it hard to get an adequate amount of Victor talking machines to meet the demand. All the boys of the company are eagerly looking forward to their vacations and as usual a group of them will go to their camp at Southport, Me., which has been the scene of much hospitality the past several summers.

More Room for Columbia Co.

Owing to the need of increased quarters the Columbia Graphophone Co. has leased an additional suite on the second floor of its Tremont street building and extensive alterations will soon be under way so that the company can take possession as early as possible. Manager Erisman reports the local May business to have been the biggest in any single month.

W. O. Pardee's Western Trip

W. O. Pardee, of the Pardee-Ellenberger Co., Inc., of New Haven, when he was over in Boston a while ago, spoke enthusiastically of his Western business trip from which he had just returned. Mr. Pardee found conditions quite good in the cities he visited and he saw constant evidences of the hold that the Edison proposition in particular has on the talking machine dealers of the country. Every one with whom he talked was enthusiastic over the prospects for the rest of the year.

Many Callers at C. C. Harvey Co.'s

The Edison and Victor departments of the C. C. Harvey Co. are being "discovered" by a number of new people, who are rapidly falling into line as Harvey customers. Manager Francis T. White reports business as unusually brisk. Mr. White is planning to build himself a new home out in Wollaston.

Doing Well with the Edison Line

Since taking on the Edison Diamond Disc line the Iver Johnson Sporting Goods Co.'s establishment has added largely to its business and Manager Arthur W. Chamberlain has found the new demonstration booths installed several weeks ago a much-needed factor in the equipment of the fourth floor.

H. R. Skelton Seriously Ill

The many friends of Harland R. Skelton, of the Thomas A. Edison Co.'s staff will be sorry to learn that he has been seriously ill at his home in Roslindale, with appendicitis. He was seized while in another city and he was brought home as quickly as possible. At last accounts he was making good recovery.

Closed a Good Sale

Manager Warren Batchelder, of the Victor department of the Henry F. Miller Co., made a good sale the other day of two $300 Victor outfits to one woman. One was for her own household and the other was a gift for a member of her family.

Business Active at Parkers

John Alsen, in charge of the Victor and Edison departments of the George Lincoln Parker establishment says he finds business coming along fairly well these days. He and his staff are on the job early and late and they have some choice prospects on which they are working.

Now Makes His Home in Winchester

Fred Erisman, of the staff of the Columbia Graphophone Co., and brother of Arthur Erisman, manager of this large Boston house, has moved his goods and chattels from Jamaica Plain to Winchester, on the north side of Boston, where he is most comfortably settled.

Have You Met Him?

Have you met Frederick H. Silliman, manager of the Boston headquarters of the Pardee-Ellenberger Co., in his new Mitchell car? He is now the possessor of a handsome one and is quite expert in handling it. Although he has owned it only a few weeks, he has run the car several thousands of miles.

Starts the Vacation Season

Floyd Kinsley, of the Edison and Victor departments of the C. C. Harvey Co., is away

RE-CREATION—Edison's New Art, has secured for the New EDISON Diamond Disc Phonograph the stamp of unqualified approval from the cultured music lover who turns a deaf ear toward anything that smacks of mechanical reproduction—the critic who will have nothing short of the actual RE-CREATION of musical sound. Added to this is the fact that every Edison dealer has plenty of "elbow room."

(From a recent advertisement by Thomas A. Edison, Inc.)

We can add to, but not strengthen the truthfulness and accuracy of the foregoing. We can say, however, that two P-E Services are at your disposal—each a separate organization of post-graduate experience.

THE PARDEE-ELLENBERGER CO., INC.

Edison Jobbers for New England, with complete wholesale offices at

BOSTON and NEW HAVEN

from business for a few weeks and has gone to northern New York, where he has a camp, beautifully situated in the midst of a pine grove and with a beautiful outlook.

A Visitor from Chicago

A welcome visitor to Boston has been F. E. Levanseler, president of the Chicago Hinged Cover Support & Balance Co., of Chicago. Mr. Levanseler is here for the Institute of Technology commencement, he being a member of the class of '73, the fourth class to be graduated from this great technical school.

Meeting with Success in This Line

H. T. Leeming, general manager of the Solophone Co., which is represented in Boston by the Hallet & Davis Co., was in Boston a while ago visiting the local offices. The Hallet & Davis house has been meeting with much success in handling this new type of talking machine.

WINS SPURS AS SALESMAN

Leo E. G. Shatney Is Scoring a Success as Vocalion Salesman

BOSTON, MASS., June 6.—Among the staff of the Vocalion Co., at 190 and 192 Boylston street, this city, there is one, Leo E. G. Shatney, who has come into considerable prominence because of his marked ability as a Vocalion salesman. Mr. Shatney came to Boston from New York, where he was with the Aeolian Co. for nine years, and it was largely because of his knowledge of human nature and his cleverness in handling customers that he was especially chosen for the Vocalion Co., when it opened its doors in Boston several months ago.

L. E. G. Shatney

As a growing youth Mr. Shatney had planned to take a course at the University of Maine. At that time he was living with his family in Bangor. Circumstances so shaped themselves that he was obliged to go to work and he began his business career as a bookkeeper with the Arthur E. Guth Piano Co., in Bangor. He remained there two years and then went to Portland, where he soon made himself a valued employe with Cressey & Allen, as a piano salesman. Believing that a knowledge of sheet music would be of advantage he came to Boston and quickly found a place with a local music publishing house. His next move was over to New York. There he became associated with Landay Brothers, and it was from this house that he went with the Aeolian Co.

Mr. Shatney therefore knows the music business in its several branches quite thoroughly and the fact that he is a musician of no mediocre ability counts for much in dealing with customers. He has made a special study of talking machines and is an enthusiastic booster for the Vocalion. Mr. Shatney is a man of culture, refinement and affability, attributes that have played an important part in helping him to attain success as a Vocalion salesman.

BUILDING UP A LARGE TRADE

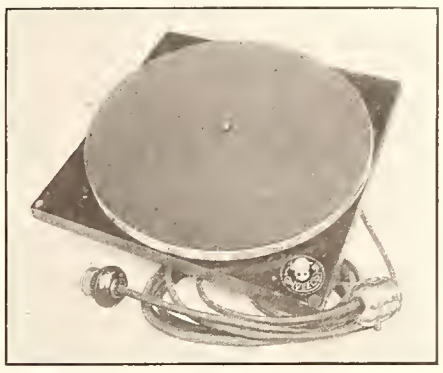
Electric Drive for Talking Machines Manufactured by the Victor Electrical Equipment Co., Boston, Grows in Favor—Some Features

BOSTON, MASS., June 8.—A product that is meeting with success with the dealers is what is called the Veeco, an electric drive for talking machines, manufactured by the Victor Electrical Equipment Co., 248 Boylston street, this city, in which, so far, the volume of business has been greatly in excess of the production. Before it was placed on the market it was tried out in every conceivable manner, for instance, the Edison Electric Illuminating Co., of Boston, exhausted every known experiment on the electric drive before it decided to introduce the Veeco and to make arrangements for its sale in its nineteen offices throughout eastern Massachusetts.

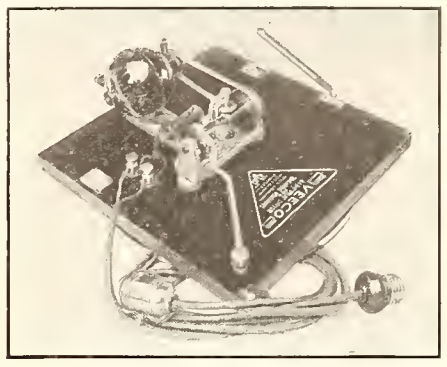
John A. Davis

Some of the features of the Veeco are: can be installed by anyone in five minutes; runs on either alternating or direct current from 100 to 125 volts without extra resistance and can be supplied for from six to 250 volts; fluctuation of current does not affect tempo or pitch; will not heat or give trouble; runs quietly; weighs little; is simple in construction and requires no care; has a range of from twenty to 120 revolutions per minute and can be started and stopped at will.

John A. Davis, general manager, and Chas. F. Simes, general sales manager, are both well trained in the talking machine line, Mr. Davis being a retail merchant and Mr. Simes formerly sales manager of a Boston talking machine manufacturing company. They are young men, energetic, and are in the habit of working along efficient lines, so the wonderful success of the Veeco is not only due to the merit of the article, but is also assisted greatly by the way these men have diligently worked.



The Veeco Equipment



Reverse View of Veeco Equipment

INCORPORATED

The Harmonola Co., manufacturer of talking machines and accessories, was granted a certificate of incorporation by the Secretary of State at Dover, Del., last week. The incorporators are E. W. DeBower and T. D. Fitzgerald, of Chicago, Ill., and Frederick Arnd, of Evanston, Ill., the capitalization being $1,000,000.

LAUGHING AT TROUBLE

Laughing at trouble isn't as hard as it sounds; nor are the people who suggest it utterly hard-hearted and unsympathetic. It is just a philosophic and utilitarian principle suggested by wise folk who know that a tooth always aches most when you have nothing better to do than to think about it.

USE BAGSHAW-MADE BEST-MADE NEEDLES

The first half minute of the playing of any record determines the SALE. Your needles should be of the best quality so that your customers hear music as it was originally sung.

All records can be played with Bagshaw needles and those who are Bagshaw devotees know this.

Remember, that the House of Bagshaw produced the first needles, creates the finest quality in needles, and does the biggest volume of business.

Oldest and Largest Manufacturer.

RUNNING DOWN RECORD THIEVES

Efforts Being Made by Eastern Talking Machine Dealers to Get Hold of a Gang Who Are Operating Extensively Throughout the Country—Some Recent Developments

There has been considerable complaint among the Eastern talking machine dealers regarding the thievery of talking machine records. Several dealers in New Jersey have suffered from the work of a band of thieves whose methods were outlined in last month's World. Other dealers have told us that they too have lost records from time to time and it seems as though there are several groups of thieves at work in various parts of the East.

H. C. Lansell, traveling representative of the Blackman Talking Machine Co., Victor distributor, recently made a trip up-State, and found that quite a number of dealers had been victimized by two young fellows who worked the following scheme:

One of them, after hearing a number of records, would purchase one record giving in payment a bill of a large denomination. The clerk not having change was obliged to be absent from the store for a few moments and when she returned the customer informed her that he wanted the record sent to a certain young lady in that town, giving a name and address. An hour later he returned stating that he had met this young lady and that he would take the record with him. He also asked to hear some other records and after buying one or two more gave another large bill in payment which also required the clerk's absence from the store. A few hour's later it was discovered that thirty-five records ranging in price from $3 to $7 were missing from stock.

These thieves wear balmacaan coats that have false pockets which are actually big bags, and they are able to drop the records into these pockets without unduly changing the shape of the coat.

In another city the thieves were "double-crossed" when they took the records which they had stolen and hid them near the railroad tracks. They were observed, however, and were followed to the telegraph station, where they sent a telegram to a man in Cortland street, New York, advising him that the records would be shipped that night. Through a slip-up the thieves managed to escape but the records were recovered by the village constable.

It may be interesting to Philadelphia dealers to learn that one of the thieves was overheard to remark that their destination would be Philadelphia and the surrounding territory.

The J. R. Reed Music Co., of Austin, Tex., which carries a full line of Victor Victrolas and records, reports a constantly increasing trade.

NEW ARTISTS TO RECORD FOR PATHE

Rudolph Ganz and Dr. Steinberg Join a Notable Roster

The Pathé Frères Phonograph Co. announced recently that it had made arrangements whereby a number of well known artists will record for the Pathé disc library. Among these are Rudolph Ganz and Dr. Bernhardt Steinberg. Mr. Ganz is one of the foremost pianists in the world and enjoys an enviable reputation both here and abroad. Dr. Steinberg is connected with the Temple Beth El, New York, and is the recognized authority in America on traditional Jewish music.

Records by these new artists and several well known singers will shortly be announced by the Pathé Frères Co. in addition to a comprehensive list of operatic music recorded by internationally prominent artists. The Pathé staff of artists includes many famous foreign stars who have never appeared in America, but are under exclusive contract with the Pathé Frères Co. in Europe.

PHONO SPRING LUBRICANT

Ilsley-Doubleday & Co., of New York, prominent in the paint and varnish trade, have perfected a graphite phono spring lubricant for talking machine motors, main springs, gears, etc., which is achieving wide success. The company has sold large quantities of this lubricant to talking machine manufacturers, who find it most satisfactory.

CHANGES IN THE CLEVELAND TRADE

Cleveland Piano Co. Succeeds the Wade H. Poling Piano Co.—Talking Machine Men to Attend New York Conventions—All Lines of Machines and Records in Strong Demand

CLEVELAND, O., June 6.—Reports from the local talking machine trade for May indicate that this branch of the music business is continuing to expand steadily despite the claims of stock shortage and the inability of jobbers in certain lines to establish new dealers.

A number of the local talking machine men who also handle pianos are preparing to attend the convention of the National Association of Piano Merchants in New York later this month. The Victrola department of the William Taylor Son & Co. store under the management of T. A. Davies, continues to progress, and recently a number of good record racks have been added to take care of the increased record stock. Mr. Davies took an extended business trip through the West last month and incidentally visited the new Lyon & Healy store in Chicago, where he says he received a number of good business tips. Mr. Davies also called at the Hudson store in Detroit, and later visited New York and Philadelphia.

On June 1 the Wade H. Poling Piano Co. was succeeded by the Cleveland Piano Co., of which Wade H. Poling is president, A. E. Smith, the prominent piano tuner, vice-president, and W. G. Fowler, secretary and treasurer. Earle Poling, formerly manager of the Victrola department of the Poling Piano Co., is assistant treasurer of the new corporation.

The May Co.'s Victrola department handled an excellent month's business during May, especially in the record department. Dan J. Nolan, manager of the May Co. department, will attend the Convention in New York, and will be accompanied by A. F. Wilson, one of the salesmen who won the convention trip for good salesmanship.

The Phonograph Co., of this city, distributers of the Edison Diamond Disc phonographs, reports business very good and have achieved increasing results by means of the publicity campaign inaugurated some time ago. Sales Manager L. N. Bloom has been unusually active in furthering the development of the Edison work here and the various tone tests and special demonstrations have helped greatly to create interest among music lovers.

The Diamond Disc Phonograph Co., under E. S. Friedlander's managership, said that owing to the better shipments of records from the Edison factory there has been a marked increase in business. Mr. Friedlander expects to attend the Edison Convention in New York on June 22 and 23 and get information which will help the industry in this city.

The Starr Piano Co., recently entering the talking machine field, has made much progress in this city. Salesmanager Brett has placed a number of agencies in this district.

The Eclipse Musical Co., extensive Victor distributers in this city, have again shown marked gains in their output. T. H. Towell, head of the company has just returned from a visit to the Victor factory. E. B. Lyons, assistant salesmanager, went to Minneapolis on a special business trip. Every preparation has been made to take care of the increasing business, including extensions to the record department. Several practical and artistic window displays were in evidence in the windows of the Eclipse Musical Co. during the month.

Manager Phil H. Dorn, of the Collister & Sayle Co., Victrola distributers, said that there was a very heavy demand for goods, but there was also a heavy shortage on particular models of Victrolas. However, business was much better than last year, and a special rush was made on two records, i.e., "Marimba Band," No. 18040, and "She Sang Aloha to Me," by Roy Dixon and Lyric Quartet No. 18032.

Manager Morton, of the Grafonola department of the G. M. Ott Piano Co., says that business with the Columbia product is very good. Mr. Morton specializes in the selling of electric Grafonolas and has sold many of the higher priced instruments.

Specialization

—is the key-note of successful business today. *We* would not attempt to manufacture a talking machine—but we *can* tell you anything you want to know about packing and shipping them.

AN ANNOUNCEMENT *of* INTEREST

TO DEALERS, JOBBERS AND MANUFACTURERS IN THE PHONOGRAPH TRADE

Domino Records
DE-LUXE

The first fifty Domino "quality" records, embracing one hundred selections, are now ready. The list is composed of both popular and standard selections rendered by some of the best known phonograph artists and some of the finest instrumentalists.

The Domino Records are the products of a highly aimed and finely equipped effort to produce *a popular priced* record of a quality which will stand comparison with any records on the market. The size is a convenient one—seven inches in diameter—and carrying about two and one-half or more minutes of sound.

Among the popular artists represented in the first list are such names as Henry Burr, Arthur Collins, Byron Harlan, Vess Ossman, Billy Golden and Inez Barbour, all widely and favorably known in the phonograph world.

Domino Records are double-disc and of vertical cut. The list price of *thirty-five cents* (three for one dollar) allows a good margin of profit to dealer and jobber and means a large volume of sales on a product of such quality. Dealers will be supplied with the highest class of selling helps, such as lists, price cards, hangers and suggestions for window trims.

We invite inquiry from all who are interested. Lists and full information will be sent on request.

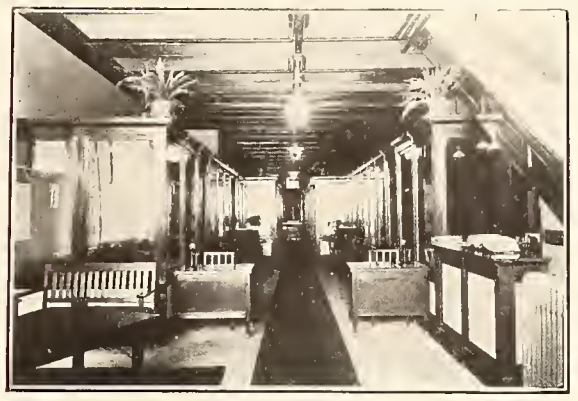
The new store has been laid out with special



View on Second Floor of Badger Shop

regard to the demands of the business and includes four extra large soundproof demonstration booths on the second floor for the showing of machines, and twelve booths on the ground floor for the demonstration of Victor records. For the convenience of those who cannot visit the store and want special service a large telephone switchboard with numerous trunk lines has been installed and goods will be sent out on telephone order.

Despite the action taken by dealers in various sections against the approval plan, the Badger Co. announces the "Badger Record Service Club, which provides that its members shall receive the records on approval each month and return those not desired within forty-eight hours. Free repair and delivery service are also offered.

The sales organization of the Badger Talking Machine Co. includes Richard H. Zinke, manager; Wm. C. Schmidt, assistant manager; Flora Krech, head saleslady; E. R. Sweeney, James M. Cox and Otto F. Leidel, salesmen; Manda Maderski, Berna Dette Kane and Franc Timme, salesladies; James B. Foley and Edw. R. Schreiber, repair men; Florence Remeeus, telephone record service; Wm. Powers, delivery; Margaret Schaefer, cashier, and ten or more other people employed in the office and as messengers.

The Badger Shop will soon be incorporated by a separate organization to distinguish it from the Badger Talking Machine Co., the Victor distributer at 135 Second street. The capital stock will be $50,000 and the board of directors and stockholders will be identical in each concern.

The accompanying illustrations give an excellent idea of the interior of the new store, together with a view of the exterior at night, showing the handsome electric sign running up the front.

WITH THE TRADE IN WINNIPEG

Babson Bros. Remove Mail Order Department to Larger Quarters—Western Gramophone Co. Concentrating on Record Business

WINNIPEG, MAN., June 5.—Babson Bros., jobbers and dealers in Edison phonographs and records have removed their mailing department from Carlton street, to the Keewayden Building on Portage avenue, East, where they will have larger quarters. F. C. Cross has recently joined the staff of the company.

Ralph Cabanas, manager of the Columbia Graphophone Co., in Canada, was recently a visitor to Winnipeg, stopping off on his way to the Pacific Coast.

A number of out-of-town dealers have recently visited the new warerooms of the Western Gramophone Co. This concern, owing to the shortage of machines, is concentrating on records with considerable success.

TALKING MACHINE FOR CONVICTS

TRENTON, N. J., June 2.—Richard Hughes, head keeper of the New Jersey State Prison, has installed a talking machine in the death house to cheer the spirits of the condemned prisoners. In the New Jersey State Prison the men in the death house never leave their cells from the time they enter until they go to their doom, unless they are pardoned or their sentences are reversed or commuted. The records are of the lively sort.

OZOKERITE PRICES ADVANCED

SALT LAKE CITY, UTAH., May 22.—A report from Soldier Summit states that a carload of ozokerite per day is being shipped from the mines there. Ozokerite is a mineral wax which is used in the manufacture of talking machine records, and is found only in Utah and in Galacia, Austria. Since the European supply has been stopped, on account of the war, the price has advanced from 12 cents a pound to 60 cents.

HUNTER-TUPPEN CO.'S PUBLICITY

In connection with the opening of their enlarged talking machine department, the Hunter-Tuppen Co., of Syracuse, N. Y., carried full-page advertisements in the local Sunday papers in which they dwelt on the extent and completness of their department, and the extensive line of Victrolas and Victor records carried in their establishment. The advertisements were admirably constructed and well arranged, and should have been prolific of excellent results.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., June 6.—The talking machine business during May was a repetition of the other four months of the year, limited to the amount of goods that the dealers were allowed by the manufacturers, with the necessity of turning away business that would have brought the dealers' profits up to a surprising amount, and yet they are fully satisfied that they have been able to enjoy a very good profit on the month, and to start a new month with the assurance that during the six months of the year they were going to show a satisfactory increase over last year.

Louis Buehn & Co. in Their New Home

Louis Buehn & Co. moved to their new place the middle of the past month and are now fully established in quarters where they will be able to properly care for at least double the amount of business they could conveniently handle at their former home. They have a very attractive show window in their present store, and have utilized it to good advantage, and the interior is arranged in a most convenient way and with all modern improvements. Mr. Buehn says: "The story of the month of May is merely a repetition of previous months this year. It was the best May we have ever had, and almost double what it was last year, and we would have been able to have done considerably more had we been able to get the goods. Our record stock is in a most excellent condition, and we are practically filling all orders complete. Machines are coming through a little bit better, but not yet in any satisfactory quantities. The outlook is extremely good for the entire summer. All our dealers are anxious to stock up, which makes the future look very bright from the jobbers' standpoint, and no doubt the retailers see a prosperous season before them."

Alexander Glass, Jr., who recently opened a very fine Victor store at Seventieth and Woodland avenue, has been doing a very flourishing business.

The Henricks Co., at Nineteenth and Venango streets, contemplate adding three additional demonstrating rooms to their present equipment, and also a small recital hall. There is every evidence that this firm is making good in their talking machine department.

There is a general feeling in Philadelphia among the jobbers and retailers that there should be a dealers' association organized here, with the jobbers interested in the proposition, as far as the formation and maintenance of such an association is concerned, but not to participate in any shape or form as officers or in the disposition of any matter. They could be members, but only in an advisory capacity. As there are between forty and fifty Victor dealers alone in Philadelphia, it is easy to see, by including all talking machine dealers, what a large and substantial association could be organized. In conversation with many jobbers and dealers one finds it only remains for somebody to take the initiative—a man that the others would be willing to follow.

Edison Dealers to Get Together

The retail dealers of the Edison in Philadelphia have organized themselves with the object of furthering the cause of that line. August Von Bernuth, of N. Stetson & Co., is at present the chairman of the Edison dealers and a committee has been formed which will, in turn, elect directors. The intention of the association is to try to have every dealer, as near as possible, to work for a uniform service to the customers and take up such matters as come up from time to time as to the policy of working in this territory. Every Edison dealer in this section has appended his name to the association roll.

Blake & Burkart, at Eleventh and Walnut streets, report that their business has been most satisfactory. They did not do as much as they could have done had they been able to get the goods. They report that the demand for records has been enormous. The company's output of records is getting larger all the time, and Mr. Burkart says: "From what we can understand, it is hard for the Edison company to keep up with the demand. Both members of the firm were in New York and at the Edison factory on Thursday of last week. They are having a new hardwood floor laid in their new addition to their store at 1102 Walnut street.

Busy Times With Pennsylvania Co.

The Pennsylvania Talking Machine Co. is fully settled at present in their new North Broad street home, and every part of the work of establishing themselves is now finished except for the big electric sign in front of it, which is to be put in place in a few days. C. S. Tay has just returned from a trip up the State, where he reports that he found all their dealers in a most satisfactory condition, except in the town where there was a big coal strike projected, and where their dealer was a little dubious as to the future. In those towns where there had been a strike, now that it is settled the people are beginning to spend their money again. The bankers up the State, says Mr. Tay, tell him that they have more money in the banks than they have had in a long time.

The Pennsylvania Co. opened up a very nice account with Miller & Kades, of Harrisburg, Pa. Manager Eckhardt is contemplating a trip to Atlanta, Ga., on the 15th of this month. The firm reports that their wholesale business in May was splendid, and that they have been booking a very large number of fall orders. The retail end of the company's business, which remains at the old Chestnut street address, has been more than holding its own over last year. They have established as a new agent Edward H. Burr, 2448 Frankford avenue, who will handle Columbia products exclusively. Mr. Eckhardt expects to take a cottage at Atlantic City for the summer very shortly.

The dictaphone department of the Pennsylvania Co. removed to the new building the early part of the past week, and while it is not fully established, it has things in good working order, and the school is in operation, with typewriters of all the most used machines installed for the use of dictating machine learners. The school is in the front part of the fourth floor, just back of the offices, and the service department is on the same floor at the rear of the school.

Penn Phonograph Co.'s Big Business

The Penn Phonograph Co. report that their business has been as good as usual, and that May has shown the same percentage of increase as the previous four months of the year. Their stock in both machines and records is in very good shape. The firm have engaged a suite of rooms at the Traymore in Atlantic City for the convention next month.

Among visitors in Philadelphia the past week were G. C. Aschbach, of Allentown, and Edgar Lewall, of Lewall Bros., Catasaqua. When they reached Philadelphia they were escorted by the Penn Phonograph Co.'s out-of-town representative, L. P. Brown, for a tour of inspection through the Victor factory. Mr. Aschbach has just spent several thousand dollars in fixing up his department, on both the second and the street floors. Both of these gentlemen report that they have brought their business considerably ahead of last year.

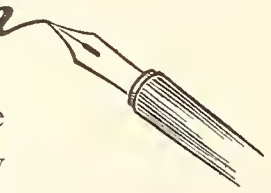
H. A. Weymann & Sons report that their business has been most satisfactory all through the month of May, and has practically doubled in record sales over May of last year.

At a dinner which the Girard Phonograph Co., Edison jobber in this city, gave to its dealers, the matter of an organization of Edison dealers came up and a committee to draft a constitution, by-laws, etc., was appointed. This committee consisted of Messrs. von Bernuth, of Stetson & Co.; Blake, of Blake & Burkart; Murdock, of the Ludwig Piano Co.; Carter Ramsdell, of Ramsdell & Son, and Homer Davis, of George B. Davis & Co.

Jacob R. Rose has just been appointed local sales manager and distributer for Emerson records in Philadelphia and adjacent territory. Mr. Rose is conversant with the sales features of these products and is planning to give his dealers practical co-operation.

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12. It WILL BE THE GREATEST EVER!

Pen Your Victor Orders to Penn



There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

Penn Phonograph Co., Philadelphia

The Inside Story of Buehn Service

HERE are some photographs giving a vivid idea of just what the "inside" is of Buehn Service—as far as the eye can see. These show the equipment of the new Buehn Building at 835 Arch Street, Philadelphia, Penn., with over 10,000 square feet of space—ten times the space that Buehn Service occupied not so very long ago.

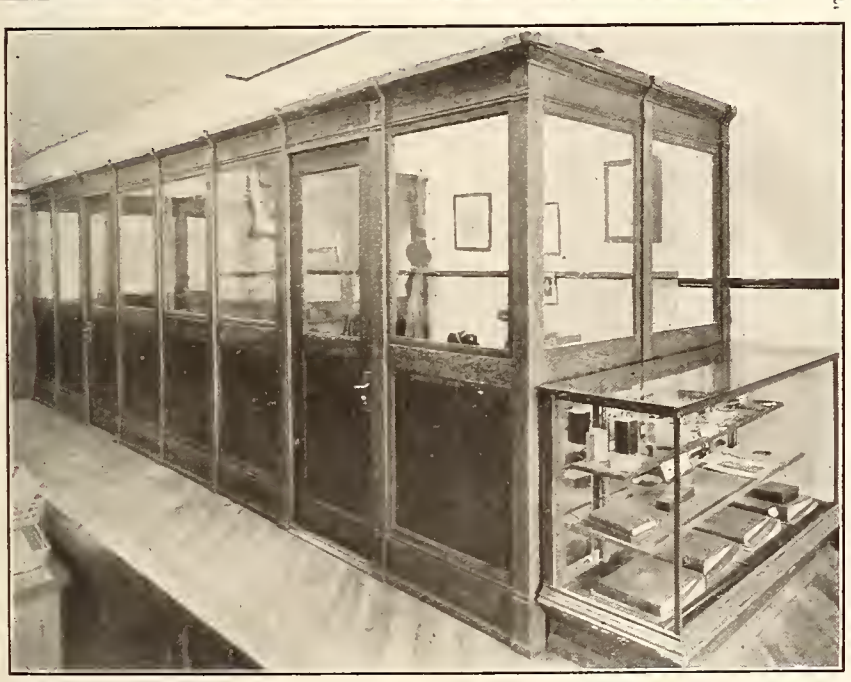
You can see that, as far as efficiency goes in the physical make-up of equipment, that it is all found in the Buehn Building

You cannot see from any photograph, nor can you determine from any form of so-called "character-reading," to just what extent the members of Buehn Service are efficient. But you know that Buehn Service is progressing rapidly because of its serviceable service. There is a humanness in our efforts to please that is gratifying to a merchant.

If you have ever studied "salesmanship" you will realize the importance of having the best man in his class doing the particular kind of work for which he is best qualified. All Buehn members are specialists, and there isn't a man here who hasn't some kind of talent. Even the Buehn window-washer prides himself as being the best window-washer in Philadelphia.

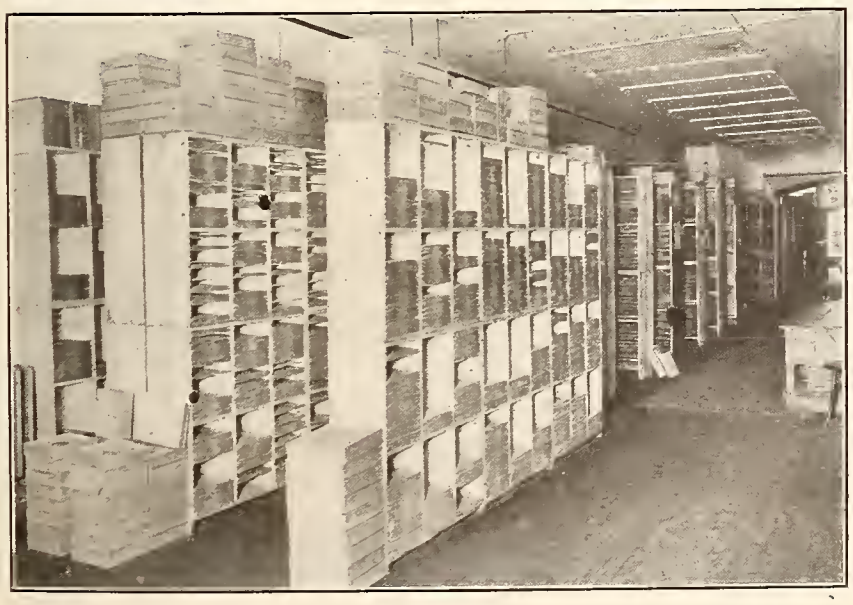
A spirit like this cannot be purchased; it must be created by men who take such a delight in working to please customers, that he puts himself on the plane of efficient service under all conditions.

Is it any wonder that our customers like to help us grow?



THE LOUIS BUEHN COMPANY

PHILADELPHIA'S Exclusive Wholesale VICTOR DISTRIBUTOR



SUMMER TRADE IN THE NORTHWEST

Demands for Machines and Records for Vacation Resorts—Heavy Call for Victor Goods—Souders Off on Boosting Trip—Other News

St. Paul and Minneapolis, Minn., June 6.—'Tis well with the talking machine folks in the Northwest. Their May business showed a total gain of about 35 per cent. on the average and there is every indication that June and the following summer months will hold well ahead of the 1915 marks. The summer, perforce, will note a slowing down, but with the demands from the lake and outing resorts and camps there will be sufficient business to keep everything moving nicely. Merchants who handle various classes of musical instruments agree without dissent that the talking machine departments have shown the most life and the best returns from effort and advertising.

The Beckwith-O'Neill Co., Northwestern jobbers in the Victrola lines, reports that it has all the company can attend to for the time being and is not opening any new Twin City accounts. This concern is not stocked up on all lines as yet, but are not nearly as hard pressed as during the holidays and immediately after. Possibly the summer will arrange matters so that this company may get its stock in the shape that is desired.

Robert Souders, manager for the Columbia Graphophone Co., is off on a far Western trade tour, with scores of Minneapolis business men. The party goes West to Great Falls, Mont., on the Great Northern, and returns on the Northern Pacific, traveling some thousands of miles, and Mr. Souders expects to make every mile count. Before leaving he reported that the Minneapolis Dry Goods Co., the New England Furniture Co., and Harrman's, had put complete Columbia lines in their talking machine departments. These big stores have had some Columbia machines by way of experiment, but now show everything that the home factory produces.

The news from the Edison headquarters, Lawrence H. Lucker, manager, is of the most optimistic kind. Since the big convention of Columbia dealers, early in May, President Lucker, of the Minnesota Phonograph Co., is the proudest man in the State.

The Fries-Patterson Co., handling the Lyric line of instrument, is now located at 721 Marquette avenue.

GOLD MEDAL FOR SHELTON MOTOR

High Award for Talking Machine Attachment at Panama-California Exposition

W. Gentry Shelton, president of the Shelton Electric Co., New York, manufacturer of the Shelton electric phonograph motor, announced this week that the company had been awarded a gold medal, the highest award by the Committee of Judges at the Panama-California Exposition, San Diego, Cal. The company is maintaining a comprehensive exhibit at this exposition, including the Shelton electric phonograph motor, electric vibrators, hair dyers and other inventions to Mr. Shelton's credit. During the past few years the Shelton Electric Co. has been represented at practically all of the leading expositions, and its exhibit has always received the highest award in its respective class.

CHARLEY CHAPLIN BUYS VICTROLA

Noted Comedian Selects Instrument from Southern California Music Co.—Purchases Large Selection of All Sorts of Records

Los Angeles, Cal., June 5.—After having successfully completed arrangements with the Mutual Co., negotiating one of the greatest contracts yet entered into by a motion picture firm, Charlie Chaplin returned to Los Angeles, where he is to open up his new studio.

A few days ago he strolled into the store of the Southern California Music Co. and purchased a Victrola for his apartments at the Athletic Club.

The records he selected are a remarkable collection, varying from the lighter music to the heaviest classic; including symphonies and grand opera, one of his favorites being the orchestral number by Debussy, entitled "Nymphs and Swans." That he thoroughly enjoyed making the selection was evidenced by the intense interest he took and the pleasure he displayed in listening.

It is not generally known, except to his nearest friends, that Mr. Chaplin is a composer of considerable ability and plays very well both the 'cello and piano. Some of his best numbers have been successfully published.

MUSIC'S BENEFICENT INFLUENCE

H. G. Stanton, general manager of R. S. Williams & Sons Co., Ltd., Edison distributers, of Toronto, in a recent letter to the Daily Star of that city, criticised the statement made by the Canadian Bank of Commerce in the course of a letter on commercial conditions (referring particularly to the importance of thrift), that musical instruments were really non-essentials. Mr. Stanton controverted this statement in a most complete and exhaustive way, pointing out the influence of music in times of war, as well as in times of peace, as a stimulator to great achievements, and as a source of happiness and enjoyment in the home. The letter was admirably written and a very fitting rejoinder to the rather weak arguments made by the bank official.

"Music for Everybody"

Operaphone Records

The only popular priced records on the market.

Retail at 35 cents.

Are 8 inches in diameter.

Are double sided.

Play only with a *tapering* or *Operatone steel needle.*

Have more music than the 10 inch records of other makes.

These records are made by what is known as the "Vertical" or "Up-down" cut, and are especially designed to be played on vertical cut record playing machines.

Play on all lateral cut record machines with a small attachment required to change position of reproducer; attachments are simple to use and inexpensive.

Our catalogue is up to date; has 72 numbers, 144 different selections.

Twelve new numbers, 24 selections, are added each month.

The records are of unusual quality; and merit attention from a musical and artistic standpoint.

The songs are by popular and well-known artists.

The records are the product of our own laboratory and factory. Dealers: Write for full particulars and catalogue and latest list.

Operaphone Manufacturing Corporation

Office: Fifth Avenue Building, Madison Square, New York

First recordings by Florence Macbeth are in the Columbia July list—the best numbers from the repertoire of one of America's greatest coloratura sopranos.

HEARINGS ON THE STEPHENS BILL

Advocates of Price Maintenance Measure, Including Talking Machine Jobbers, Offer Arguments in Its Support Before House Committee on Foreign and Domestic Commerce

WASHINGTON, D. C., June 1—Advocates of the Stephens bill to legalize price fixing on branded articles of merchandise by the manufacturers of such articles were present at the hearings this week before the House Committee on Interstate and Foreign Commerce.

A number of prominent Victor distributers journeyed to Washington to attend the hearings, including J. Newcomb Blackman, Blackman Talking Machine Co., New York; Geo. E. Mickel, Nebraska Cycle Co., Omaha, Neb.; E. C. Rauth, Koerber-Brenner Co., St. Louis, Mo.; French Nestor, W. F. Frederick Co., Pittsburgh, Pa.; H. R. Eisenbrandt, Eisenbrandt & Sons Co., Baltimore, Md. Henry Mielke represented the Talking Machine Men, the talking machine dealers' associations of New York, New Jersey and Connecticut.

The first witness called was Paul Nystrom, formerly connected with the University of Wisconsin, as an economist and at present a manufacturer in New Jersey. Mr. Nystrom gave five reasons for the passage of the Stephens bill, namely, that it would reduce trade friction and waste, reduce the cost of distributing goods, equalize conditions of competition between large and small dealers, and affect no one adversely, except the price cutter, and prove beneficial to the buying public.

Mr. Nystrom was followed by J. Newcomb Blackman, who has worked indefatigably in the interests of the Stephens bill. Mr. Blackman's arguments in behalf of the measure were based on sound logic and were particularly impressive in view of the current era of prosperity in the talking machine industry, which is attributable, in a large degree, to the one-price system that has been followed by the leading manufacturers. Mr. Blackman pointed out concrete instances showing the necessity for price fixing and the harm caused by price cutting, and his arguments as a whole seemed to carry considerable weight.

Other witnesses were heard during the course of the hearing, including representatives of many industries, favoring the passage of the Stephens bill, and Mrs. Julia Heath, president of the Housewive's League, an organization of country-wide influence.

The opponents of the Stephens bill will be heard later in the month, subsequent to which it is likely that those favoring the measure will be heard in rebuttal.

TO MAKE PHONOGRAPHS

The Phonola Co., Inc., Brooklyn, N. Y., has been chartered under the laws of New York for the purpose of manufacturing and dealing in phonographs and musical instruments. The incorporators are F. B. Maerkle, E. W. Ladd and A. O. Wilde, and the capital stock $5,000.

M. Friedman & Co., of San Francisco, Cal., has opened a Victor department in their Post street store, more than half of the first floor there being devoted to sound-proof booths for demonstration purposes.

VICTOR DOG COMPLIES WITH LAW

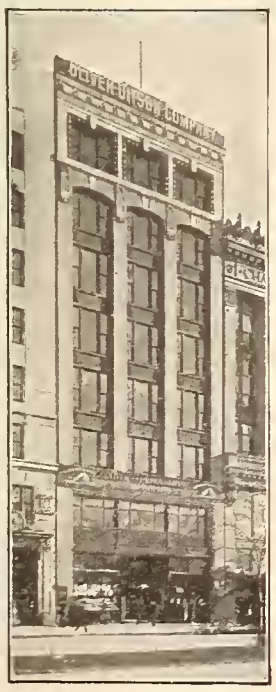
Is Placed on Sidewalk in Huntsville, Ala., Duly Muzzled and Chained

HUNTSVILLE, ALA., June 1.—The Ott Talking Machine Co., this city, attracted considerable attention and created much amusement recently when a large sized Victor dog was placed at the edge of the sidewalk in front of the company's store, and chained securely to the light pole there. The dog was equipped with a large muzzle to comply with the new city ordinance which provides that all dogs must be muzzled or they will be shot. The dog bore, stenciled on his back, the words "Ott Talking Machine Co.," with "Victrolas" spelled down both his sides.

MUST BE OF GOOD ADDRESS

It is necessary that a clerk in a store should be of good address; that is, that he must not seem over-important, foppish, slow and indifferent on one side, or untidy, ignorant and a rattle-head on the other, but can present himself to his prospective customer in such a manner that the latter will at once acquire a good impression. This cannot be assumed for effect, but must be natural. Notice a clerk of this type for a few moments. He smiles you a welcome, he greets you with an extended hand, or a friendly bow, he speaks cheerfully of some light topic of the day.

The talking machine department of the Getts Piano Co., Grand Forks, N. D., is being remodeled, new record cabinets and demonstration rooms being installed.



Building of the Ditson Company at Boston

DITSON VICTOR SERVICE

The name "Ditson" means music. Music means Ditson. Over 75 years of association with the retail trade of this country give us a knowledge of conditions that is of help to you.

Ditson Victor Service stands foremost in the East. It is for the small dealer, particularly, that we desire most to help, but the small man of to-day soon grows, with intelligent help, to the big man of to-morrow. On our books are many dealers who formerly bought in lots of hundreds and now buy in thousands.

We furnish a complete line of musical instruments, from Accordeons to Zithers, and Books of Music and Sheet Music.

ILSLEY'S
Graphite Phono Spring Lubricant

The Perfect Lubricant for Talking Machine Motors, Mainsprings, Gears, Etc.

To lubricate and insure smooth, easy and noiseless running of mainsprings, remove springs from spring barrel or cup and wash thoroughly with benzine or gasoline (this will remove all the old lubricant), allow them to dry, and then apply liberally ILSLEY'S GRAPHITE PHONO SPRING LUBRICANT, working it thoroughly between the coils of springs. This practically overcomes friction, which usually is the cause of jump spring, spring knocking, etc. For springs one inch wide use about six or eight ounces of lubricant for each spring.

STEWART CO. OFFICES MOVED

Directing Offices of the Stewart Talking Machine Co., Indianapolis, Now Located in the Company's Wholesale Branch in the Heart of the Retail Business District in That City

INDIANAPOLIS, IND., June 6.—The general directing offices of the Stewart Talking Machine Co., the Victor distributers in this city, have been moved from the fourth floor of the Lemcke Annex to the second floor of the Stewart Co.'s wholesale branch.

New Home of Stewart Talking Machine Co.

The new department is elegantly fitted up in keeping with the furnishings of the rest of the building. A mahogany balustrade and counter face a visitor as he ascends the broad staircase. Behind are arranged the desks of the bookkeepers, stenographers and the office manager. A. M. Stewart's comfortable quarters are screened from the main office by a partition of translucent glass. This move completes the furnishing of the six-story building for the firm's use. The building now houses ample warerooms, demonstrating rooms, bookkeeping department and general office, sales and advertising department, record storerooms and packing and shipping departments.

The Stewart Building is located in the heart of the Indianapolis wholesale district. It is within a three-minute trip from the farthest freight depot and offers marvelously speedy service by reason of its location. Punctual and thorough service is further assured by a trained organization that has its superior nowhere in the country.

SUMMER ACTIVITY IN LOS ANGELES

Machines and Records Being Bought for Vacation Use—Fred R. Sherman and Phil T. Clay Among Visitors—F. S. Allen to Attend Conventions—New Edison Dealers Appointed

LOS ANGELES, CAL., June 5.—The summer months are with us once more and in consequence of the usual migration to the pleasure resorts, business has dropped off to some extent, especially in records. The usual number of small machines are being purchased by the vacation colony to carry along as entertainers. As an outdoor attraction the "talker" is becoming more and more popular every season.

Most of the local jobbers are gradually getting their stocks in shape again, and the outlook for fall is very promising.

Fred R. Sherman and Philip T. Clay, of Sherman, Clay & Co., San Francisco, both spent a few days in Los Angeles while passing through last week. Mr. Sherman visited the San Diego fair, while in southern California, and Mr. Clay continued on to Prescott, Ariz., to visit his family. Both gentlemen intend making the round trip by motor.

H. E. Lindsey, manager of the talking machine department of the Wiley B. Allen Co., is enjoying a three weeks' vacation in Portland, Ore., his old home. Mr. Lindsey formerly was connected with the above house in Portland.

F. S. Allen, proprietor of the Musical Record Shop, is making a trip East in order to attend the National Association of Piano Merchants' convention at New York, June 21 and 22. While in the East Mr. Allen will make a visit to the Victor and Edison factories.

The Mercantile Co., of Long Beach, Cal., the largest department store of that city, has recently taken over the talking machine agencies from the Hawthorn & Broderson and Carlton Music Co., and will be exclusive Edison dealers in the future.

The Diamond Disc Distributing Co., of 340 South San Pedro street, has just received a car load of machines and now have a full supply of all models and finishes. O. A. Lovejoy, the manager, reports business good and he established several exclusive Edison agencies last month. They have been very busy getting their new quarters in shape and now have one of the best equipped wholesale houses on the Coast. C. H. Yates, lately with the Phonograph Co., of Kansas City, Mo., has connected with the traveling force of the above company.

ARRANGE FOR NEW STORE

The Naeve Bros. Music House, of Davenport, Ia., has closed a lease for a new store at 220 Harrison street, where, in addition to pianos and small goods, they will make a special feature of Columbia Grafonolas and records.

The Whitehall Phonograph Shop has opened elaborate quarters at 32 Whitehall street, Atlanta, Ga., and will feature the Edison Diamond Disc Phonograph.

GOOD LOCATION HELPS

Attractive Quarters Opened by Acme Music Store in Rutherford, N. J.—Handles the Victor Line—Establishment Well Located

The Acme Music Store, which opened very attractive warerooms in Rutherford, N. J., a few weeks ago, reports satisfactory business, although it has only started its sales and advertising campaign. The Victor line is handled exclusively at this new store, which is located at the junction of several car lines from surrounding towns. The proprietor of the store, F. Brunner, has made it as comfortable as possible, and proposes to have the public use it in a way as a meeting place or waiting room.

Front View of Acme Music Store

The interior of the Acme Music Store is furnished and decorated most attractively, there being a "place for everything and everything in its place." The accompanying photograph showing the first window display of the new store indicates that this important item of publicity will receive careful attention. As a matter of fact, a number of window displays are now in course of completion, which will be unusually artistic.

GOOD MAY REPORT IN INDIANAPOLIS

Figures for Month Approach Those of December—Dealers Generally Optimistic—Talking Machines Fill Vacation Needs—Furniture Stores Carrying on an Active Campaign—General News of the Local Trade

INDIANAPOLIS, IND., June 3.—A. W. Roos, local manager of the Columbia Graphophone Co. store, reports that the May business was "almost unbelievably good." In fact the total of business was so lightly under that of December, 1915, that, figuring the season of the year, the month just passed is, in Mr. Roos's opinion, the best month the company ever experienced.

This happy increase was not confined to any particular department of the business but fine increases showed up in the wholesale, retail and Dictaphone sales department. Also the cash receipts held their own and were way above the average month of May.

Mr. Roos says that he finds nothing but optimism displayed by the dealers in the various towns in his territory and without exception every dealer on the books is doing a greatly increased business over all previous records obtainable. The outlook seems to be particularly good for a summer with no dull months and a wonderfully big fall and winter season.

S. H. Nichols, district manager of the Columbia Co., with headquarters at Pittsburgh, visited the Indianapolis branch on June 1, on one of his periodical visits of inspection of his stores.

Dealers are overjoyed at the way the summer business is opening up, as during the summer months they sell a great number of instruments to customers who are fortunate enough to have a summer camp or cottage to go to, and they have found in increasing numbers that a talking machine is one of the most pleasant companions to have when away from the noise and bustle of the city. Business of this kind is, of course, entirely increase, so far as the regular routine sales of the store are concerned.

Walter E. Kipp, of the Kipp Phonograph Co., distributer of the Edison machine, makes a report on May business similar to Mr. Roos. Mr. Kipp said that thus far the summer business seemed better than usual and it looked as though the talking machine business this fall would be unusually brisk.

The Edison Shop is still featuring its matinee concerts and nearly always has a large number of persons in the store. The concerts have produced a fine list of prospects.

All of the piano dealers handling talking machines are getting a fair share of the summer business, which is being featured in most of newspaper advertising, pointing out the joy of having a talking machine in the canoe or summer camps.

A number of the leading furniture stores, including Oilar Bros., who handle the Pathé; the Taylor Carpet Co., which handles the Victrola; D. Sommers, who handles the Columbia, and the William H. Block Co., a department store, which handles the Edison, have all been featuring their talking machine departments in their advertisements.

TALKING MACHINE IN DEATH HOUSE

Used to Cheer Up Condemned Men in the New Jersey State Prison at Trenton

TRENTON, N. J., June 5.—Richard Hughes, head keeper of the New Jersey State Prison, has installed a phonograph in the death house to cheer the spirits of the condemned prisoners. In the New Jersey State Prison the men in the death house never leave their cells from the time they enter until they go to their doom, unless they are pardoned or their sentences are reversed or commuted. The phonograph records are of the lively sort.

MANUFACTURERS!

The "Ideal" Tone Arm and Sound Box

We will reproduce your ideas of a tone arm and sound box (universal and others) for your exclusive use at the lowest prices consistent with high quality materials and good workmanship, if you will

Send us your Ideas or Suggestions

Our factory, covering many thousands of square feet, is equipped with automatic machinery and a plating plant of the most improved character. Here we produce tone arms and sound boxes at a cost, we believe, far below that of any other manufacturing organization in the country.

If you want to use an exclusive type of tone arm or sound box, send us rough drawings and we will submit our quotations.

Your requirements will receive prompt and careful attention. Write us *to-day*.

All parts furnished in nickel, gold, silver or oxidized plating.

EMIL BAUER JOINS FORCE

Of the Domestic Talking Machine Corporation, Philadelphia—Well Known in Trade

Emil Bauer, well known in the talking machine industry, has become connected with the Domestic Talking Machine Corporation, Thir-

Emil Bauer

ty-third and Arch streets, Philadelphia, Pa., being in the department of distribution, which is in charge of P. C. Adams, sales manager.

Mr. Bauer is unusually well known in the East and has many personal friends in a great many cities. He was with the Oliver Ditson Co. in an important capacity, later on going with the Keen-O-Phone Co., being with the latter concern from the start until it discontinued business. "I made a careful investigation of the products of the Domestic Corporation and what they are offering to the dealers made such an impression upon me that I simply had to become a Domestic ambassador," added Mr. Bauer.

The Wilmot Music House, Fall River, Mass., recently gave an Edison tone test, which brought some excellent business.

E. M. BAKER RETURNS FROM TRIP

Reports Prosperous Conditions in the West—Speaks Particularly of Denver

Edw. M. Baker, advertising manager of the Columbia Graphophone Co., returned to his desk late last week after a trip as far west as Denver. When it is considered that Mr. Baker covered this ground in ten days, some idea of how fast he traveled may be realized. He spent several days in Chicago, acquainting himself with conditions in that city, and then visited Lincoln, Neb., and Kansas City, Mo., en route to Denver. In a chat with The World Mr. Baker commented upon the remarkably prosperous era which is now current in Denver. This is attributable to the increased demand for tungsten, which has resulted in booming the prices for this metal. The steady rise in the price of silver has also influenced this prosperity, which to all indications will be of long duration. Mr. Baker secured at first hand an intimate knowledge of conditions in the West, which will enable him to give invaluable co-operation to Columbia dealers in the preparation of the company's publicity.

TALKER NEWS FROM KANSAS CITY

Farney Bros. Buy Out Edison Agency of E. H. Hollister in Hutchison, Kan.—C. F. Kaiser, Victor Dealer, Attends Convention

KANSAS CITY, Mo., May 22.—J. J. Farney and Eli Farney have purchased the Edison phonograph agency in Hutchinson, Kan., from H. E. Hollister and are now proprietors. Mr. Farney recently came back from attending the Edison dealers' gathering in Kansas City.

C. F. Kaiser, Victor dealer in Ottawa, Kan., has been in Kansas City the past week attending the convention of the pharmacists of the State. Mr. Kaiser has been entertained by his nephew, John Dietrich, a young college student of this city. Mr. Dietrich recently won a competitive examination for entrance into West Point, an achievement of which Mr. Kaiser is proud.

VICTOR LITERATURE FOR JUNE

Elaborately Prepared Poster of Foreign Records and Special Educational Advertising for June Just Sent to the Dealers

In the budget of advertising matter sent to its dealers by the Victor Talking Machine Co. for the purpose of calling public attention to the June records there are included two particularly interesting hangers, one of them devoted to the June foreign records, with the national colors of the nations represented in the lists reproduced at the top of their respective columns with brilliant effect. This hanger is nearly six feet long and should attract immediate attention. The other hanger includes a list of ten Victor records which should be in every home and which are presented in a most attractive form. In the June budget there is also found the reproduction of the advertisement that will be shown in the various educational magazines in June to emphasize the value of the Victor in the schools.

EDISON TO RAISE WORKMEN'S WAGES

WEST ORANGE, N. J., May 29.—Efforts are being made, according to Vice-President Robert Bachman, to readjust the piece rates in the Edison Diamond Disc factory here, so that the employes may make more money. The company has decided that the prices paid on certain classes of work were too low, and the employes have been advised that there would be no restrictions placed on them as to the limit of work which they turned out.

The Eagle Talking Machine Co., Inc., of Wilmington, Del., registered with the Secretary of State of New York to acquire the business of Abraham Strauss, 77 John street, New York.

DON'T FAIL TO ATTEND THE NATIONAL TALKING MACHINE JOBBERS' ASSOCIATION CONVENTION AT ATLANTIC CITY, JULY 10, 11 AND 12.

BIG WURLITZER EQUIPMENT

Order Placed With the Unit Construction Co., of Philadelphia, for Columbus Store

On May 11 the Unit Construction Co., of Philadelphia, Pa., received a special order from the Rudolph Wurlitzer Co., of Columbus, O., covering an entire equipment of booths, offices and display rooms.

The finish of the warerooms was to be in silver gray oak and many of the booths were ordered in special dimension sizes. It is said that this entire equipment was shipped from Philadelphia and installed at Columbus within three weeks, which is record time and shows what can be done by a concern like the Unit Construction Co., which specializes in this service.

BUILDING A GOOD TRADE IN HOLYOKE

HOLYOKE, MASS., June 5.—McLean Bros., of this city, the well-known furniture house, which recently arranged to handle the products of the Pathé Frères Phonograph Co., New York, is closing an excellent business in this line, and has made plans for an aggressive summer campaign.

Reognizing that window display is a most

McLean Bros.' Pathephone Window Display

important factor in modern retail merchandising, this concern recently prepared a very attractive window which is shown herewith. This display was remarkably successful, and as a matter of fact was responsible for the sale of all the Pathephones which McLean Bros. had in stock at the time the window was prepared.

McLean Bros. report a very healthy Pathé record business, and state that their patrons are more than pleased with the new recordings issued monthly by the Pathé Frères Co.

GOING AFTER RECORD BUSINESS

By Concentrating on the Exploitation and Sale of Records the Talking Machine Dealer Can Do Much to Offset Any Possible Loss of Business Through Scarcity of Machines

Despite large additions to the factories of the various talking machine companies, it is still quite apparent that the demands for the more popular style of machines cannot be met in full, it being physically impossible to take care of the volume of orders coming from dealers and distributers. It is pleasing to note, however, that the supply of records is increasing at a very satisfactory rate, and it is now possible for the majority of distributers and jobbers to fill close to 100 per cent. of record orders received from local dealers.

Under such conditions it would seem that the dealers would be inclined to concentrate on record business. In other words, instead of putting forth unusual efforts to sell machines that cannot be delivered for some months, it would seem that the same amount of effort directed toward record sales should have a most beneficial result. There has already been a tremendous number of machines sold—enough in fact to make the supplying of records for those machines alone a great business for the dealer who is wide awake.

The means for increasing record sales are numerous, and there have been enough plans tried successfully to afford the dealer many ideas to work on. Weekly recitals, for instance, is the most common and yet most successful form of record publicity, especially if the selection of records featured is carefully made. The recital plan is particularly effective in introducing new record lists, as they come out. Even in his local advertising the dealer should devote the entire space to a description of the popular records, and if he does feature a machine, make it a model that he has in stock or that can be readily obtained.

The following up of former machine purchasers by mail, telephone, or best of all, personal calls, is also a most excellent method for increasing interest in records. Even an owner who has neglected his machine for several months may be encouraged to renew his interest in talking machine music, if he can be prevailed upon to listen to some of the newer records. Moreover, by paying particular attention to the record business, the average dealer will find himself so busy that the shortage of machines will not prove the bugbear that it does under ordinary conditions. With Preparedness, Presidential politics and international crisis in the air, the live dealer will find many opportunities for rescuing apparently dead records from the shelves and featuring them so that they apply to some current event of national or international importance. This plan has been tried and has worked well in every instance.

In connection with the shortage of machines above referred to, the following official comment by the Victor Co., regarding the shortage of goods makes interesting reading: "The shortage of Victor products is traceable to purely natural causes and a continually increasing demand, all of which goes to show that the Victor dealer may look forward with the utmost confidence to a period of prosperity which shall surpass all his previous experiences. We are making every possible effort we can to increase the quantity of our output, but there is much that the Victor dealer himself can do to relieve the situation. Better salesmanship will simplify matters very considerably. When the dealer is short on X's or XI's it is up to the salesman to satisfy customers with a IX, a XIV or a XVI. This can be done. It is being done every day in the year. The type of Victrola that any customer selects depends very largely upon the way that customer is handled by the salesman who waits upon him, and if this is borne in mind the shortage can be relieved very appreciably."

PATHÉ SUPREMACY

In Europe, Pathé supremacy in the phonograph business has been acknowledged for twenty years.

Here in America the Pathé name is rapidly assuming the same significance.

Pathé accomplishment, Pathé quality, and Pathé service all give the Pathé line an individuality possessed by it alone.

TALENT KNOWN INTERNATIONALLY

Pathé Frères was the first phonograph manufacturer in the world to employ high-priced operatic talent. Many of the great Pathé artists are favorites in America.

In this advertisement are illustrated six prominent Pathé artists. Equally well known and included in the Pathé library are such internationally famous singers as:

PARVIS, La Scala, Milan.
NOTÉ, Grand Opera, Paris.
BURZIO, La Scala, Milan.
BASSI, Covent Garden, London.
ALBANI, La Scala, Milan.
ALBERS, Opera Comique, Paris.
AFFRE, Grand Opera, Paris, Covent Garden, London, New Orleans.
SAMMARCO, La Scala, Covent Garden, Manhattan Opera House.
DE CISNEROS, Metropolitan, Chicago Grand Opera Company.
ANCONA, Chicago Grand Opera Company, Boston Opera.
BONINSEGNA, La Scala, Metropolitan, Boston Opera.
PINI-CORSI, Metropolitan Opera Company.
JOURNET, Metropolitan Opera Company.
BURRIAN, Metropolitan Opera Company.
SPARKES, Metropolitan Opera Company.
VALLANDRI, Opera Comique, Paris.
DIDUR, Metropolitan Opera Company.
GALVANY, La Scala, Milan.
TITTA RUFFO, Metropolitan Opera Company.
URLUS, Metropolitan Opera Company.

As well as such specialty talent as DR. BERNHARD STEINBERG, Temple Beth-El, the recognized authority on traditional Jewish Music.

THOMAS EGAN, the Famous Irish Tenor.
MARIE NARELLE, Concert and Irish Ballads, Indian Songs.
GRACE HOFFMAN, Mezzo Soprano.

Enjoy these famous artists, as they can be enjoyed from Pathé Discs only.

And they form but a small part of the vast assemblage of talent listed by Pathé, many under exclusive contracts.

In addition are numerous artists and musical organizations of the first rank in Europe, who have never been heard in this country, because their contracts keep them abroad. Pathé brings this vast assemblage of European talent *to you*.

PATHEPHONES

Don't buy *half* a phonograph! Get the Pathephone which plays all makes of disc records. Pathephones equipped to play any make of disc record, $30.00 to $225.00.

We have a most attractive proposition to

PATHÉ FRÈRES

29 WEST 38th ST

Demand for New—Better

HEARD ON PATHÉ DISCS ONLY

Because these can be heard on Pathé Discs only, because Pathé offers the American Public not alone America's best, with which they are already familiar, and also the Old World's best—the Pathé dealer can satisfy that never-failing demand for "Something New"—"Something I have not heard"—"Something I can have exclusively."

As fast as opportunity permits, these wonderful Old World Discs are being reproduced for the most appreciative and liberal buyer in the world—The American.

SAPPHIRE BALL

That's another exclusive feature of Pathé superiority. Pathé Discs are played with a round jewel, a little globular sapphire which rides over the face of the Pathé Disc with practically no friction and no ripping, as in the case of sharp steel needles.

Friction means wear—where there is an absence of friction there is no wear. A single Pathé Sapphire Ball has been used for twenty years and is as good to-day as it was in the beginning. There are no bothersome needles to change.

1000 TIMES NOT WORN

You can't take a sharp pointed piece of metal such as a steel needle and bring it in contact with a softer surface of rubber or casein without friction—*wear*—instantly commencing.
The absence of friction in the case of the Pathé sapphire ball played disc permits you to play a Pathé record *one thousand* times, and it's just as sweet in tone—just as full in volume—just as complete in detail—as it was when new.

THAT WONDERFUL RICH "STRADIVARIUS" TONE

Violin Wood Sound Chamber! All Wood, No Metal!

Imagine a tin violin! No metal or part metal sound chamber can give "The Mellow of the 'Cello." Pathephone sound chambers are built entirely of selected seasoned *Matured Wood* like a violin. The result is a sound chamber which collects, develops and delivers all the full rich sweetness of the instrument.

PATHÉ DISCS
65c to $4.00

All double-faced, ***including all grand opera discs by the greatest artists.*** Pathé Frères Phonograph Company is the only manufacturer in America who also makes ***all operatic*** records ***double-faced. Double value*** for the money!

ANNUAL OUTING OF THE BLACKMAN CO. EMPLOYES

Held on June 3, Was a Most Enjoyable Event—Hudson Trip Followed by Dinner at Murrays—Annual Distribution of Profits to the Employes

The seventh annual outing and banquet of the employes of the Blackman Talking Machine Co., Victor distributers, took place on Saturday, June 3, and notwithstanding the inclement weather proved to be the most enjoyable outing that this company has yet held. Good fellowship and camaraderie reigned supreme, and at

Officers of Blackman Talking Machine Co.

Left to Right: John L. Spillane, J. Newcomb Blackman, James F. Ashby, Fred P. Oliver and Frank Roberts

the close of the day the employes and their guests were enthusiastic in their praises of President Blackman's hospitality.

The Blackman outing is one of the institutions of the local trade, and each year J. Newcomb Blackman, president of the company, endeavors to provide for his employes a day's fun and entertainment that will leave a pleasant memory for a long time to come. With this end in view he has arranged different programs each year and the outings have included baseball games, accompanied by other outdoor sports, trips to Coney Island and similar pleasure-bent excursions.

The 1915 program comprised a trip up the Hudson on a chartered steam yacht, dinner at Murray's, followed by a visit to the Palace Theatre. This program proved so successful last year that the employes unanimously voted for a repetition this year. Mr. Blackman made his arrangements accordingly, and informed the employes that every detail of the 1915 program with additional trimmings would be the order of the day on June 3.

The outing started at 1 o'clock and the officers, employes and their guests assembled at the foot of Warren street and went on board the yacht "Marion." This yacht was the scene of last year's outing and the employes welcomed it with delight. As it was built to accommodate 150 people and the Blackman party numbered forty-five, there was ample room for everybody and plenty of space for the dancing devotees to illustrate the latest steps in the modern dances. A Victrola VI, with a good sized library of Victor dance records, furnished the music for the terpsichorean artists, and on the home trip the Blackman double quartet, led by L. W. Bishop, was very much in vogue.

At 6 o'clock the Blackman party adjourned

Mr. and Mrs. Oliver, Mr. and Mrs. Blackman and A. Blackman

to the Egyptian Room at Murray's, where last year's dinner had taken place. The guests being familiar with the culinary triumphs of this restaurant, had carefully trained for the dinner, and needless to say, did full justice to it.

At the close of the dinner Mr. Blackman announced the distribution of profits to the employes who had been in the company's employ during the past fiscal year. This profit-sharing plan was introduced by Mr. Blackman at the first outing seven years ago, and provides for the distribution of bonuses to all employes who have been associated with the company for one year. Mr. Blackman believes that his co-workers should share the profits of his business with him, and devised this plan so that each one could feel that he or she was working for their individual interest. Before distributing the bonuses Mr. Blackman thanked his staff for their co-operation and loyalty which had

The "Marion" and the Blackman Party

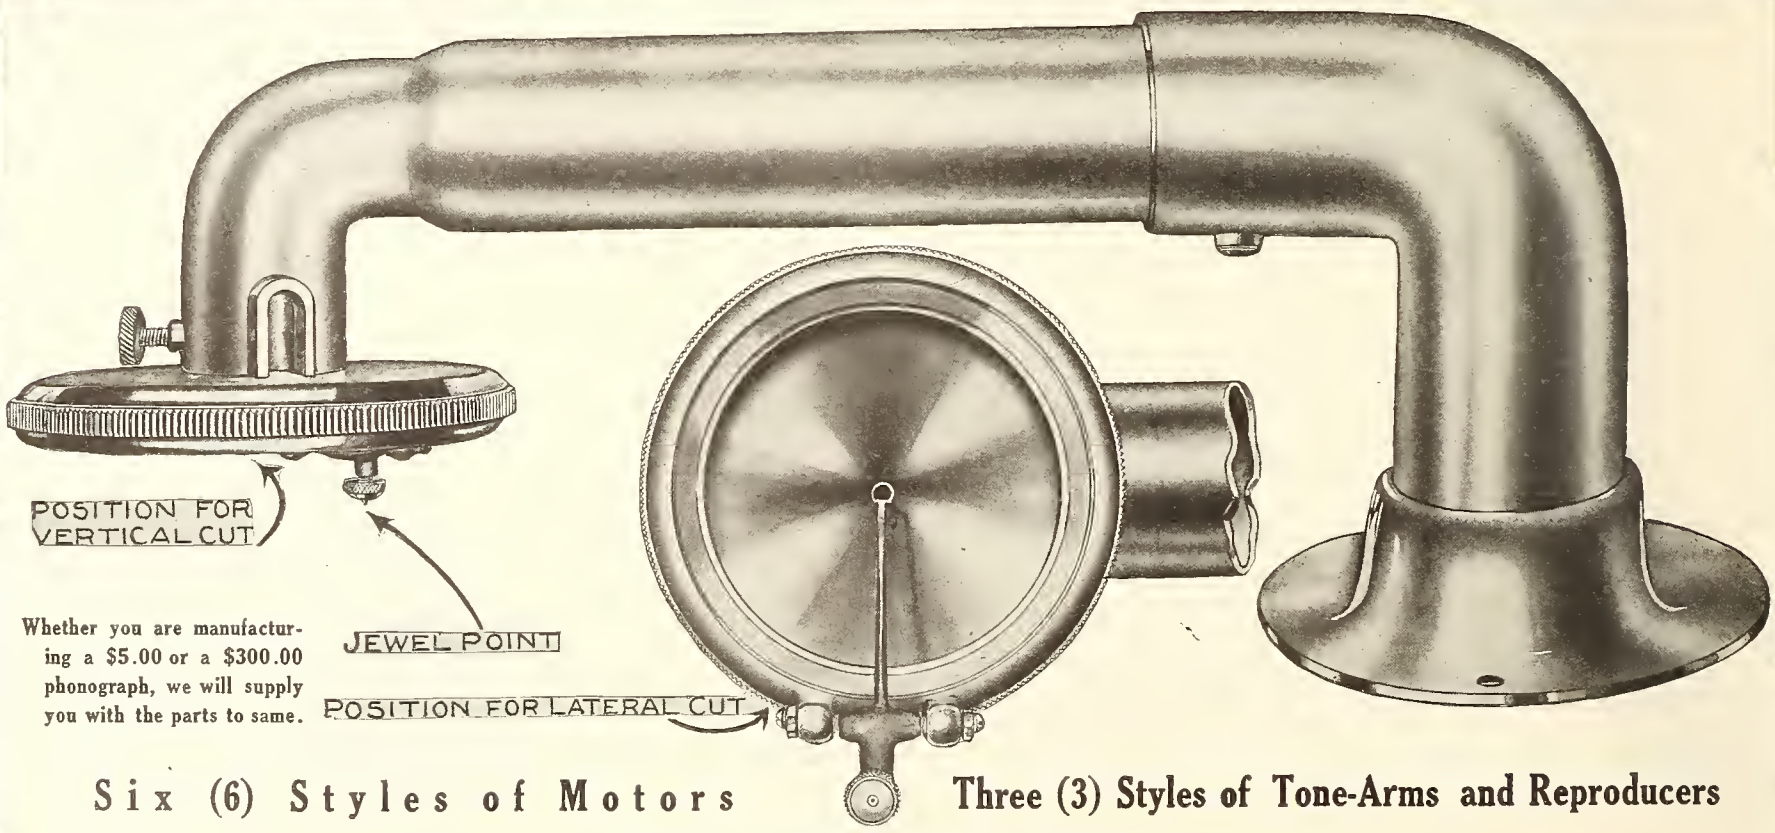
made possible the closing of the best year in the company's history.

Seventeen employes shared in this profit distribution, including Fred P. Oliver, vice-president and general manager; Frank Roberts, secretary; John L. Spillane, assistant secretary; James F. Ashby, assistant treasurer; George Thau, L. W. Bishop, H. C. Lansell, John Mills, John Hanley, Miss L. D. Peters, Miss M. Hennig, Miss R. Dunker, A. D. Robbins, Robert Harkins, Chas. Cornwell, Chas. Marquis and Frank Tillinghast. Mr. Blackman paid a tribute at this time to Mr. Oliver, who has just finished his first year as vice-president and general manager of the company, and who has achieved wonderful success in this post.

Incidentally Mr. Blackman also announced that a dividend to stockholders had been declared and took pleasure in stating that several of the officers and employes were numbered among the stockholders, including Messrs. Oliver, Roberts, Spillane, Ashby and Thau.

After the dinner the Blackman party visited the Palace Theatre, where choice orchestra seats had been reserved.

The moral effect of these outings is certainly far reaching, for they promote a spirit of co-operation and friendliness which can be secured in no other way. They bring the employes closer together and help in welding together an efficient organization.



Whether you are manufacturing a $5.00 or a $300.00 phonograph, we will supply you with the parts to same.

Independent German-American Talking Machine Co., Inc., 56 BLEECKER ST NEW YORK

Domestic

TALKING MACHINE

TRADE DOMESTIC MARK

DECLARATION

OUR "trade announcement extraordinary" in the last issue of Talking Machine World evidently touched the vital spot of the trade. The response clearly showed the necessity for a line of high grade, exclusive-patent machines which would sell at a price to meet the desires of the multitude.

This month we fulfill our promise to place before the trade our remarkable line. As it is impossible to do the line justice by the pictures which follow, we want to emphasize below some of the very important points.

First—The sound reproduction of the Domestic is a revelation. It is superb in tone, unusual in volume and is accuracy itself in bringing out the subtones in minute detail, the higher notes without screeching, the lowest without gutteral intonation. In fact, the Domestic has already been called "*The Talking Machine that doesn't sing through its nose.*"

Second—The Domestic represents a new departure in manufacturing and marketing. Every part of the machine (excepting the cabinet) is being manufactured in our own shops under the most efficient methods and by the best labor-saving machinery that can be devised.

But the saving will all be in manufacturing economies, not in quality of materials. Every single detail, from the marvelous Domestic Sound Box and Silent Service Motor to the beautiful finish of the cabinets, is perfect. Even the quality of the wood is selected for its attractive appearance. No skimping anywhere.

Where the Dealer Comes In

The first Domestic advertising, until territorial agencies can be established everywhere, will be for direct mail orders.

But get this point—These mail orders will be cleared through Domestic Agents who will receive their profits just as if they made the sale in their store.

Can you conceive anything more liberal than this? Can you think of any plan that would give you a better foundation for the development of a big talking machine business?

The beginning of the Domestic extensive advertising campaign will be a full page in the Saturday Evening Post in the issue of June 24th It will be a knockout. The $10.00 model will be featured, and it will arouse everyone who has longed for a fine talking machine, but who could not afford a luxury.

While the Domestic is not a luxury, no musical or artistic taste is too luxurious to be fully satisfied with it. Everyone in the business knows the economic demand that exists for such machines as these. Everyone in the trade will want to be in on it, and we will have to be just a little bit particular. We want only live houses that will support our advertising, and whom we can in turn support by advertising. In localities where dealers can properly look after their entire district we shall grant exclusive territory.

Get in touch with us at once if you are to have a front seat when the curtain goes up June 24th.

A dealer contract with us is a valuable franchise.

Columbia Records TRADE MARK Note the Notes

NUMEROUS TRADE CHANGES PLANNED IN ST. LOUIS

Brunswick-Balke-Collender Co. Among Those to Open New Stores—Interest Regarding Fate of Departments—Much Improvement in Conditions Generally Reported—"Combination" Advertising Plentiful—Miss Florence Conveux New Manager—News of Month

St. Louis, Mo., June 10.—It appears now that the talking machine map of St. Louis will be pretty generally changed by this fall. The first of the changes is the opening of a store at 1118 Olive street by the Brunswick-Balke-Collender Co., in which the Brunswick talking machine made by this company will be featured. The Brunswick has not been on the market here.

There are rumors that another exclusively talking machine store will be opened later in the summer. Another feature that is causing much discussion is the fate of the talking machine departments in the dry goods stores when the latter, or part of them, give up pianos. Recently the Stix, Baer & Fuller Dry Goods Co. separated their talking machine and piano departments, placing the talking machines, the Victor and Edison lines, in charge of J. W. Medairy. This apparently provides for this department when the pianos go, as rumor says that they will soon.

Business for May has been all that could be asked under the conditions of the earlier months of the trade. Also the shipping conditions have been better and jobbers are filling orders 100 per cent. except for a few of the most popular machines. As a result, the retailers are getting busy more earnestly than for many months because stocks are accumulating on them and it is not a question with them of "What can we sell?" but a question of "What must we sell?"

The record business, too, has been in excellent shape and there has been a lively demand for current songs and a fair demand for the classical numbers. Perhaps the dance business is slipping some in proportion to other business, but the volume of the dance records has not lessened. Wherever you go, the sales managers are talking of increased sales over a year ago and of better stocks that will permit them to get busy on an earnest campaign.

Ben F. Phillips, the new retail sales manager at the Columbia warerooms, reports that his first month at a desk shows an increase over a year ago.

Miss Clementine McKimm is back at the Silverstone Music Co., after a short stay with the Famous & Barr Co. and Story & Clark.

One of the results of the freer distribution of machines is that the retailers are beginning to do some advertising on their own hook. The Stix, Baer & Fuller Dry Goods Co. has printed the largest ad of any strictly local dealer here. This ad, a full quarter page in a morning paper, presented the most popular styles of Victor machines of the various prices by cut and description. Also a combination rate with specified number of records was given.

The combination price of small machines, cabinet and records has given rise to considerable advertising here of late that looks like cut rates on talking machines, but which, of course, the dealer explains is a cut only on the cabinet. In one ad recently, a cut of $7 was made in the listed price of machine, records and cabinet that totaled list, less than $40. Taking all of that from the price of the cabinet made it look, to those who read between the lines, like it was a mighty cheap cabinet to start with and perhaps had been marked up a bit for this event.

At the Nugent & Bro. Dry Goods Co. department, Miss Florence Conreux has been appointed manager, vice Charles Balmer. This department sells Columbia and Edison machines, and while it is the newest of the pretentious departments of the city, it has been doing a nice business.

Miss Conreux is one of the pioneers of the St. Louis talking machine women. She began in this city under Mr. Fuhri, when this Columbia official was manager of the local warerooms. She left the city, but in a few months came back and naturally sought the Columbia service again, which she left to join the Nugent force and the present promotion follows. Miss Conreux's method of success is very simple. She understands her line, having made a study of it. Also she is an accomplished saleswoman. In conversation with The World correspondent, she illustrated her methods thus: "This morning a prospect was handed to me and when I saw it was in the downtown district, I put on my hat and coat and went after it. I made the sale, too, a very nice one." That day happened to be the worst day of the late spring, cold, rainy and dreary. But all of that meant nothing to Miss Conreux when she wanted a sale, or if it did mean anything it was merely that there was less likelihood of her being needed at the store. She was hired as a floor saleswoman, but she won her spurs by taking neglected prospects and going after the business. This department is conducted by the National Talking Machine Sales Corp., and Miss Conreux is working under the district supervision of Mr. Wilson.

At the Silverstone Music Co., where Mark Silverstone, the president, continues his monthly announcements of 100 per cent. increase in jobbing trade over a year ago, there is much optimism. This is founded on more than the mere monthly reports. Mr. Silverstone is just back from an Eastern trip on which, in addition to Edison headquarters and a conference with Mr. Edison, he visited Baltimore, Philadelphia, Old Point Comfort and various other points of interest. In each of these places he looked up the leading Edison dealers and gave their shops the "once over," but without disclosing his identity, as he wanted to learn by observation only and, besides, he was chiefly on pleasure. He found these dealers optimistic and when he got home he found that Retail Sales Manager Schlude had been doing a holiday business during his absence. Also that the wholesale department had signed two such notable dealers as the Hannibal Music Co., at Hannibal, Mo., and the Hollenburg Music Co., at Pine Buff, Ark., and that the Concordia Music House in this city had changed its classification to that of Class A dealers. This ought to be enough to make a man comfortable.

The best news, to the salesfolk, that Mr. Silverstone brought home with him was that most of the wrinkles had been ironed out of the record factory and that the output would be kept at a maximum, or 48,000 daily. The record situation has been rather trying on the nerves of the sales force.

IMPORTANT COLUMBIA MOVE

Conductor Polacco, of the Metropolitan Opera Co., Engaged to Supervise Special Instrumental and Operatic Vocal Selections

The Columbia Graphophone Co., New York, announced recently that Georgio Polacco, the famous conductor of the Metropolitan Opera Co., had been engaged to supervise a special series of instrumental and operatic vocal selections.

Mr. Polacco is one of the best known conductors in the world and his readings of operatic scores have received recognition both here and throughout the famous musical centers of Europe.

GOES INTO ANOTHER FIELD

W. D. Marbourg, connected for the past two years with the sale and efficiency departments of the New York Talking Machine Co., New York, Victor distributer, resigned from this position this week to join the staff of the foreign department of the Guaranty Trust Co., New York. Mr. Marbourg's successor has not yct been appointed.

TALKING MACHINE COMPANY, INC.
380 - 382 - 384 Lafayette Street, New York

Manufacturers of reliable motors for reliable phonographs and of the Melophone and Liberty Phonographs.

CONVENTION PLANS NOW COMPLETE

Business Sessions of N. A. T. M. J. to Be Held on Monday and Tuesday, July 10 and 11—Wednesday to Be Educational Day—Conventioners to Visit and Inspect Victor Factory

The plans for the annual convention of Talking Machine Jobbers, to be held at the Hotel Traymore, Atlantic City, on July 10, 11 and 12, are now practically complete and it is believed that the efforts of those in charge of the arrangements will result in one of the most interesting and successful conventions ever held by the association—a convention that no member can afford to miss.

As has been announced previously, the convention will be a noteworthy one for the valuable educational features that have been planned, features that will not only give the jobber a better understanding of the construction of the product he is handling, but will also offer new and valuable tips on advertising and selling methods.

The program of the convention as laid out provides that the first two days, Monday and Tuesday, will be devoted to the business sessions of the association. These sessions are to be held during the afternoon, which is somewhat of an innovation, as the business sessions of previous conventions have always been held during the morning. The roll call and the reading of reports, also unfinished business, will be presented at the first session. The second session—Tuesday—will consist of the nomination and election of officers, committee appointments, new business, etc. The annual convention banquet will be held on Tuesday evening at the Hotel Traymore.

Wednesday will be known as Education Day. The Victor Co. is laying plans to make this a most profitable day. There will be three sessions on that day, morning, afternoon and evening. The morning and afternoon sessions are to be devoted to talks (some of which are to be illustrated) by various Victor factory heads. There will be a talk on records by C. G. Childs, director Victor recording laboratory, and others. The evening session will probably be in the form of a musical entertainment. Some of the Victor artists and either the Victor orchestra or some other band will favor the jobbers with selections now recorded on Victor records. An exposition of each selection—why it should sell as a record—will no doubt be given.

Thursday is to be Victor Day at the factory, and the entire convention is to make the pilgrimage to the Victor factory, for the purpose of making a tour of the entire plant.

COLUMBIA AIDS FOR THE DEALERS

Window Transparency and Cut-Out Designed to Assist the Retailer in Featuring the New Records as They Are Issued

Two recent dealer helps prepared by the advertising department of the Columbia Graphophone Co. are shown herewith. These helps consist of a window transparency and window cut-out.

The window transparency has gold lettering and the famous Columbia notes on a handsome

blue transparent background. It is intended for use on the Columbia dealer's window, and its attractive form makes for general attention.

The new window cut-out is twenty-eight inches high, in blue, gold, white and black, and is designed to announce the latest song hits. The cut-out stands like an easel in any part of the window, and new cards featuring monthly records will be sent out to the dealers in time for each monthly display.

OPTIMISTIC OVER STEPHENS BILL

E. C. Rauth Returns from Washington Well Pleased with Outcome of Stephens Bill Hearing—Tells of Trade Conditions at Southern Points

St. Louis, Mo., June 10.—E. C. Rauth, vice-president of the Koerber-Brenner Music Co., Victor jobbers, got back early this month from a highly successful Southern trip which he terminated in Washington where, as a member of the committee of the Talking Machine Jobbers' Association, he assisted in presenting evidence before the Senate Committee conducting hearings on the Stephens Bill. Mr. Rauth was greatly pleased with the outcome of this hearing, especially with the evidence of Mrs. Heath, of the Housewives' League, and other women who represented the consumers. They pleaded for the bill because its protection for trade marked articles would enable the manufacturers to protect quality and depend upon quality alone to sell their goods. This feature, said Mr. Rauth, made a hit with the Senators.

Mr. Rauth is very optimistic over business conditions generally and he says that the difference in the feeling existing in the South and Middle West to-day is the opposite of that a year ago, and that there is every indication to believe that talking machine jobbers can do business this year under only limitations of stocks of machines and records. Also he reports that the trade generally is slow to accept doubtful quality machines, and that danger from this sort of merchandise is not as acute as was feared.

NEW COLUMBIA DEPARTMENT OPENED

Jackson, Miss., June 12.—The Heidelberg Furniture Co., of Central Capital street, opened a Columbia Grafonola department last week. Afternoon recitals were given, and, in addition to refreshments, which were served to all who attended, a Columbia double disc record was presented to each guest as a souvenir of the occasion.

EDISON AT RECITAL CONCERT

The Edison Diamond Disc Phonograph was featured very successfully at a recent concert recital given by the Young Men's Organized Bible Class of the United Brethren Chapel, Hanover, Pa., through the energy and courtesy of Ivan White, Edison dealer, of 113 Broadway, Hanover. The Edison Diamond Disc machine was used as a solo instrument and also to the accompaniment of violin and piano music.

APPOINTED COLUMBIA DISTRIBUTER

Omaha, Neb., Jun 5.—The Schmoller & Mueller Piano Co., of this city, has been appointed a distributer by the Columbia Graphophone Co., New York. This important deal was closed by W. C. Fuhri, United States manager of the Columbia Co., upon his recent visit to this city, and a very large order for Columbia merchandise has been placed by the Schmoller & Mueller Piano Co. The latter concern will serve the Columbia dealers in this section, and is now making arrangements for a most efficient plan of co-operation.

PRICED AT $25 RETAIL

In their efforts to produce a phonograph to measure up to the demand for a good music reproducing machine in general, the Lyraphone Co. of America has incorporated in the Lyric phonograph a special type of reproducer, a rubber tone arm and a motor of their own design, all of which are offered at $25 retail.

The W. H. Marion Music House, of Mt. Airy, N. C., agent for the Columbia Grafonola line, reports a growing business.

Triton Supplies for Manufacturers

We are manufacturers of motors, tone arms, sound-boxes and other accessories for Talking Machines.

Herewith are shown two types of *Triton Motors,* No. 1, a single spring motor, and No. 3 motor, a double spring worm drive. Both are well made, and are good value for their respective uses.

Tone Arms, two styles, No. 1 and No. 3, both UNIVERSAL tone arms, playing any type of record with a mere turn without attachments. Tone Arm No. 3 works on swivel and can be turned up after record is finished playing.

Immediate deliveries on quantity orders. Write for quotations.

LEADERSHIP

1200 TITLES of REX RECORDS

We are the leaders in manufacture of American made up and down (or vertical) cut disc records. We have 1200 titles on the Rex Record list, in 10 and 12 inch sizes. You should be looking for a new and paying investment, so get on our "Band Wagon" and be with the leaders.

Mr. Dealer, note:—

In an opinion by Judge Thomas just filed in the U. S. District Court, Southern District, N. Y., in American Graphophone Co. vs. Gimbel Bros., defense of non-infringement is sustained; i. e., Gimbel Bros. were sued by American Graphophone Co. for selling Rex and Keen-o-phone Records of a 10 and 12-inch size, plaintiff claiming this was an infringement of a certain McDonald patent owned by them. Gimbel Bros. defense of non-infringement won hands down.

Now Preparedness First

We have prepared a good substantial catalog of 1200 selections and we add about 25 titles (10 to 15 double face records) each month—new and popular selections.

Rex 10 inch double face records, retail for 75c. each.

Rex 12 inch double face records, retail for $1.00 and $1.25

Rex records play with a permanent jewel point.

Rex records play on all lateral cut record machines with the aid of a small attachment.

Rex records are the product of our own laboratory and factory.

If you are interested in a live up-to-date record (up and down cut) of superior quality write for terms and particulars.

Machines

Yes, we build a machine and we manufacture every part of it in our own factory. (See illustrations opposite). We have three (3) new types under way.

Samples ready July 15th next, and will be demonstrated at our New York Display Rooms, 35 West 31st Street.

Deliveries can be made August 15th

We Want 25 New Jobbers by September 1st—LIVE ONES

SPECIAL FOR EDISON CONVENTIONERS

CHICAGO, ILL., June 12.—Special car arrangements for the accommodation of the Edison men who are to go to the Edison convention, to be held in New York at the Hotel McAlpin, June 22 and 23, have been made by C. L. Goodwin, manager of the Phonograph Co. Mr. Goodwin announces that the train will leave June 21 at 5.40 p. m., from the Park Row station, and will go via the Michigan Central to Niagara Falls, where there will be a short stop over. From there the travelers will proceed to New York City by the Empire Express.

The Nationola Co., of Cleveland, O., has been incorporated with a capitalization of $25,000.

The Melodograph Corp. of New York was incorporated at Albany this week with a capital of $1,500,000, for the purpose of making talking machines.

SUBMARINED SONORAS RUN O. K.

When the steamer "Marion," puffing its way from New York to South Norwalk, struck a rock and sank, it wasn't the only thing that went down. A shipment of Sonora phonographs which was on board went along.

After soaking in many feet of water for two days the phonographs were fished out, and being put to a test, the motors were found to be as good as ever, just as though the briny deep was their natural element.

This striking illustration of the sturdiness of the motor and the entire phonograph gave a demonstration of Sonora excellence.

TO OFFER RECORDS AND MACHINE

Although the Fraad Talking Machine Co. has only been in the trade about a year, it nevertheless has been active in establishing for itself a live position. Practically every month new models have been added and this month the company announces that within a short time it will have a large list of Fraad ten and twelve-inch records. The recent incorporation of the company and the announcement of another new machine which will be on the market very soon are further progressive steps.

RECORDS FOR INDEPENDENCE DAY

"Victor records for Fourth of July" is the title of an effective and attractive booklet recently issued by the Victor Co., for distribution among its dealers. This booklet, as its name implies, contains a list of records particularly suitable for Independence Day use, and with the nation-wide movement for a "safe and sane Fourth," Victor dealers will have large sales.

AMERICAN CAN CO. ENTER FIELD

CHICAGO, ILL., June 12.—The first announcement of the entrance of the American Can Co. interests into the national talking machine industry, was made this week by Allen L. Eaton, sales manager of the Charles W. Shonk Co., at whose plant in Maywood the machines are being made. The new machine, known as the "Mag-Ni-Phone" will be described in a later issue of The World.

The United States Circuit Court of Appeals handed down a decision last week in the case of the American Graphophone Co. vs. the American Parlograph Co., affirming the decision of the lower court, which denied the injunction and damages requested by the plaintiff.

INTRODUCING THE PHONOLAMP

New Line of the Electric Phonograph Co. Consists of Elaborate Lamps Fitted With Talking Machines in Base—Some of the Features

The time-honored expression to the effect of liking music with one's meals, bids fair to become more than a mere figure of speech through the entrance into the talking machine field of the Electric Phonograph Co., with demonstration rooms at 29 West Thirty-fourth street, New York, and factory at Mount Vernon, N. Y.

The name of the company implies that it is making an electric phonograph but it is marketing its product in a different style to anything that is on the market, for it has prepared magnificent lamps in metal, wood, wicker and other materials, each containing at its base a complete talking machine. The name given to this talking machine is "Phonolamp."

The Phonolamp

These electric talking lamps are most elaborate in design and construction and are equipped with handsome shades or domes, and with three electric lights. From the clear mica reproducer in the base, the tone is carried upwards through the stem of the lamp, which acts as a concealed horn, and at the top is reflected downwards by means of a globe and thereby producing a tone of unusual clarity. The distribution of the tone of the talking machine by this means has an effect that is both pleasing and unusual, for the circular character of the globe serves to "spread" the tone, until it seems to come from all parts of the room, at one time, instead of from one particular point.

In order to permit the changing of records and needles, one-half of the base of the lamp is divided into two concealed doors, which may be swung out as desired, and permit of the free access to the interior, which is designed to accommodate all standard records.

The talking machine is operated by means of an improved electric motor, measuring only 1¾ inches in height, but which has an even speed and can be easily regulated when desired.

In placing the new "Phonolamp" on the market, the manufacturer claims that there is no practical expense for operation. The lamp itself compares favorably in all ways with those sold solely for their attractive and illuminating giving qualities, and when music is not desired, may be used simply as a table lamp. The same current that runs the lamps is used for the motor which, when in operation, does not interfere with the light. This motor operates on all currents of any cycle.

The "Phonolamp" can be had in a number of original designs at various prices, several of the models being shown in an announcement of the manufacturer on another page, and it is stated that quantity orders may be filled in a very short time.

ST. LOUIS DEALERS TAKE ACTION

Associated Talking Machine Dealers' Association of That City Drafts and Agrees Upon Rules Governing the Charging in Interest on Deferred Payments, the Regulation of the Approval System and a Basis of Payments

St. Louis, Mo., June 9.—The Associated Talking Machine Dealers' Association met recently in the Associated Retail Merchants' Headquarters. The meeting was called with a view of discussing prices of instruments taken in trade, but after the discussion had been underway for some time, it was decided that it was too broad to reach a decision on without further consideration. Also that it was best to discuss such questions on a full stomach. So it was decided to have a special meeting at 6.30 P. M., June 27, in one of the banquet rooms of the Missouri Athletic Association. It is expected that twenty-five firms will be represented at this meet and then the trade-ins will be thoroughly threshed out. The instruments reported as trade-ins at the first discussion included all makes of talking machines from the metal horns down to those of day before yesterday, pianos, player-pianos, outside players, all of good, bad and indifferent quality.

However, the members of the association reached one agreement among themselves. That was that the association should no longer be a secret society. As a result, the trade rules are made public. When the association was organized these were carefully guarded. Now they are offered to help dealers in other cities who may be trying to get together. As to the 75 per cent. return privilege on records sent on approval, it may be said that several retail shops are refusing to permit more than a 50 per cent. return. Also some firms are insisting on stiffer payment terms than those mentioned, but recently there has been no complaint of the minimum here given being cut. The agreement follows:

St. Louis, Mo., Feb. 29, 1916.

Talking Machine Dealers: For your convenience we have prepared the following summary of agreements entered into by talking machine dealers during the past two years. The agreements are placed in this form so that they may be more readily referred to by yourselves and your employes.

Very truly yours,
The Associated Retailers of St. Louis.

ADOPTED NOV. 6, 1914

1

That on and after August 5th, 1914, no talking machines, records and accessories be sold on deferred payments except on contract bearing interest at 6 per cent. per annum from date of sale. All interest to be collected monthly.

2

a—Records sent on approval are not returnable if kept in customer's possession longer than 48 hours except in the case of the original purchase of records with machine when a maximum of one week will be allowed.

b—At least 25 per cent. of the number of records sent on approval must be kept by the customer.

c—Records purchased, either at the store or from approvals, are not returnable for credit, refund or exchange.

It is further agreed that a slip reading as follows be furnished to dealers at cost to be inserted with each package of records sent on approval:

Records as shown on the accompanying list are sent on approval for the convenience of our customers. They should be carefully handled and must be returned to the store within 48 hours. Not more than 75 per cent. of the number of records sent on approval may be returned to the store.

Associated Talking Machihe Dealers.

It is further agreed that the following basis of minimum initial and monthly payments be adopted:

Machines Valued at	Minimum First Payment	Minimum Monthly Payment
$500.00	$50.00	$25.00
450.00	45.00	25.00
400.00	40.00	20.00
350.00	35.00	20.00
300.00	30.00	15.00
250.00	25.00	10.00
225.00	25.00	10.00
200.00	15.00	10.00
150.00	10.00	8.00
100.00	10.00	6.00
75.00	7.50	5.00
60.00	6.00	5.00
50.00	5.00	5.00
40.00	5.00	4.00
35.00	5.00	4.00
25.00	5.00	3.00
15.00	5.00	2.00

ADOPTED JULY 9, 1915

It is agreed that service of adjusting and oiling machines should be given free for not more than six months and that machines should be guaranteed against defects in parts or workmanship for the same period.

ADOPTED TUESDAY, FEB. 8, 1916

It is agreed that whenever a smaller machine is turned in on the purchase of a larger one, full value will be allowed if exchange is made within six months after original purchase.

After six months they will be accepted with the reduction of a rental charge of 5 per cent. per month with a maximum of $4.00 per month

MOTORING TO MUSIC

From Bellefontaine, O., comes the news that local motorists have hit upon a plan of adding enjoyment to evening automobile rides. Small talking machines are placed inside the tonneau, and the ride is enlivened by the music which purrs forth from the machine.

DECLARE FIRST DIVIDEND

The first dividend of 10 per cent. will be paid to the creditors of the Houston Phonograph Co., Houston, Tex., on June 10.

A REAL VETERAN OF THE TRADE

Clement Beecroft Established Many Jobbers in Business Over a Score of Years Ago When Talking Machines Were New—Sold Thousands of Horns—Now Features Specialties

It was not at all easy to interest the members of the music trade in talking machines when

Clement Beecroft

Clement Beecroft first became connected with the business twenty-one years ago. The veterans of those days had a new proposition to offer and had to overcome the prejudices that were naturally developed by a new thing.

Mr. Beecroft can recall some strenuous arguments to induce the musically trained piano merchant to even listen to what might then be truthfully called "that squeaky thing." However, some of America's largest jobbers bought their first talking machine from this veteran in the business. For years he sold by far the largest number of metal horns in America, as he sold practically the total requirements of all the large talking machine manufacturers and also to most of the jobbers.

Horns became passé, however, and for the past five or six years Mr. Beecroft, with headquarters in Philadelphia has given attention to the sale of record and machine cabinets, record envelopes, needles and other specialties. Mr. Beecroft's long standing in the trade and his wide acquaintance among jobbers has served to lighten his labors in this connection materially.

The Humandia Talking Machine Co., manufacturer of talking machines, records and needles, was recently granted a certificate of incorporation by the Secretary of State at Wilmington, Del. The capitalization of the concern is $100,000.

AN INTERESTING ANNOUNCEMENT

The Domestic Talking Machine Corporation Tells of the Liberal Selling and Advertising Methods That Will be Followed in Marketing the Domestic Talking Machines

Last month the Domestic Talking Machine Corporation stated that they would make a startling announcement in this issue. Their promise is more than fulfilled on pages 35, 36, 37 and 38.

The description of the Domestic machines and the accompanying illustrations are so unusual that they will doubtless create great activity in the popular price market.

The corporation has inaugurated a most original selling plan for the benefit of all dealers, who join hands with the firm in marketing the Domestic. Not only is the advertising of the Domestic in the leading publications to be of the broadest character, but it is to be so conducted that the Domestic dealer gets not only a general benefit, but a direct profit on all sales made in his territory.

The Domestic Talking Machine Corporation states that the machines, both in cabinet design and sound box, are covered by exclusive patents of Domestic origin and Domestic ownership. The factory has been installed on a basis to produce perfect machines in large quantities at the very smallest manufacturing cost. This does not mean skimpy purchasing of parts, but an exact organization of economizing factors, all parts of the Domestic, except the cabinets, being made in the Domestic factory.

An advantage enjoyed by the Domestic is the acquaintance of everybody active in the talking machine field with Horace Sheble, who is the president and director general of the Domestic Corporation. In speaking about the present prospects of the machine market, Mr. Sheble said that the influx of the so-called "cheap talking machines" did not concern them in the least—that there was a wide-open door and a very increasing demand for a thoroughly constructed, beautifully finished machine of perfect tonal qualities, and that is what they had achieved in the Domestic, coupled with a liberal profit and co-operative selling methods for the dealer.

J. P. BRADT'S INTERESTING TRIP

James P. Bradt, general sales manager of the Columbia Graphophone Co., New York, returned to his desk last Friday after a visit to Washington, Baltimore and near-by points in Pennsylvania. Mr. Bradt was accompanied by Walter Eckhardt, district manager for the Columbia Co. in this territory, and Frank Dorian, general manager of the Dictaphone divisions; the trip being made in Mr. Eckhardt's automobile, which averages fifty miles an hour under ordinary conditions. Mr. Bradt was well pleased with the splendid representation which the Columbia product is receiving in this territory, and found a spirit of co-operation and optimism which was most gratifying.

Chicago's Great Preparedness Demonstration

A Lesson for You

YOUR Preparedness should mean more than just getting a stock of goods—it must mean a feeling of complete confidence and security—not only in your distributors ability to handle your orders—but in his help to you in every detail of your business.

That's what we strive to do.

Chicago Talking Machine Co.

VICTOR DISTRIBUTORS

12 N. Michigan Avenue Chicago

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., June 11.—Local trade circles, both in the wholesale and retail divisions, continue to be very well pleased with business conditions as they have existed during the past thirty days. The call for machines has been steady and well distributed throughout the various sizes, while records are also enjoying a demand that is impartial in nature.

The dealers are now making their plans for summer business and many of them have found that the proposition on the part of the public of taking away a machine to the summer home has grown so steadily that the field has become rich enough to demand close attention. A number of new manufacturers have completed their plans for entering the field and numerous sample machines are to be seen in Chicago, many of which are very interesting, showing many new features and forming considerable addition to Chicago's wholesale offerings in this line.

Manufacturers of newer machines, who have had considerable difficulty in getting supplies, report that the stringency is letting up and that materials are coming in more rapidly.

Chicago Talking Machine Co. List Popular

The standard lists as compiled by the Chicago Talking Machine Co., which contain the "gems of the entire catalog," has made a "hit" with the followers of that distributer. The numbers that are included in this catalog are those which have actually proven themselves to be the best sellers. They have been selected with care from a business standpoint as well as the standpoint of the buying public and certainly could easily be of infinite value to any one in the talking machine trade. The records are classified according to size and nature and it is very easy to select any record or class of records desired.

Some Changes and New Stores

The Geo. P. Bent Co. has added a talking machine department to its new store at Forest Park and has taken on the Victor line. C. R. Rhoades is manager and Chas. Batinger his assistant.

Arthur Copp, formerly manager of the Wilson avenue Pathé Shop, and Louis M. Spoerlein, are opening a new store at 6750 Sheridan road, Rogers Park. They are carrying the Victor line.

I. Eacutt has taken over the Victor agency and stocks of Miller's on East Sixty-third street and has established Joe Weller as manager. Miller's is now located in a new store a few doors away, where the Columbia line is featured.

They Say That ———

G. P. Ellis, of the Talking Machine Co., never hurried faster in his life than he did recently when he received a telegram from R. A. Shiverick, of Scruggs, Vandervoort & Barney, of St. Louis, that read: "Fire all on seventh floor. Leave midnight." So Ellis caught a late train in high hopes of getting large order for restocking the big St. Louis store's talking machine department. The next morning Ellis landed in St. Louis and found no fire. The same morning Shiverick landed in Chicago and found no Ellis there to meet him. It was all on account of an error in transmission. The wire should have read: "Arrive Alton seven-forty. Leaving midnight."

They say that a wise dealer—one of the kind that knows absolutely everything about his business, called on a local jobber last week. One of the office force handed him one of those records used for display purposes which, though looking like the real stuff, hasn't a note in its whole make-up. It was labeled "Drum Solo," and was supposed to be something new. The dealer tried it and got one long screech. He was then informed that the particular record required a special needle and he was accordingly handed a needle wrapped in tissue paper. The result was a long scrape and he then admitted that there were probably some records in the catalog that he didn't understand fully.

Talker Men for Preparedness

The talking machine men showed the piano men up for a grape-juice sorority June 3, which was Chicago's Preparedness Day. The Geo. P. Bent Co. had a good showing and so did the Rudolph Wurlitzer Co. The Talking Machine Co.'s men, under Capt. Keith's command, made a brave picture as they marched down Michigan avenue and set a record by keping the line straight and at the same time keeping in step. In addition to the gallant captain there marched G. P. Ellis, C. L. Morey, C. B. Mason, Pete Q. Griffiths, Geo. Denig, Richard Johnson, Fred Morrash, L. Winkles, Ed. Reich, Sam Wade, Albert Poblawski and Henry Schlegl. After the little stroll they rested their feet under a dining table at the University Club, where they were the guests of Mr. Keith at dinner.

Samuels with Passow

D. B. Samuels, formerly Western representative of the Lyraphone Co. of America, of New York City, has been appointed traveling representative of Passow & Sons, of Chicago, and will promote the "Musictrola" line in Indiana and neighboring territory.

He is now upon his first extended trip. Mr.

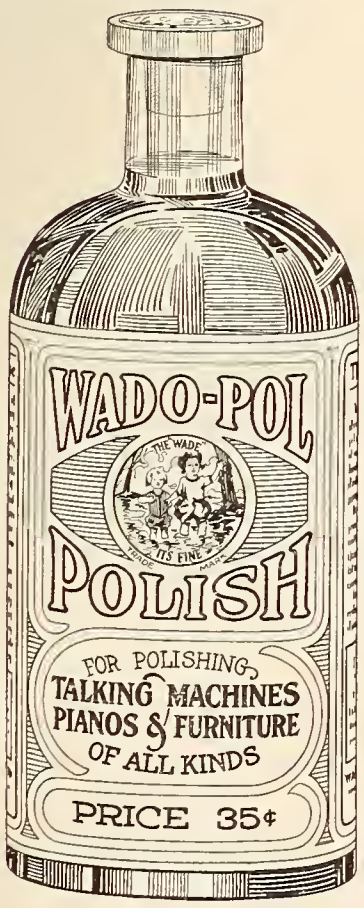
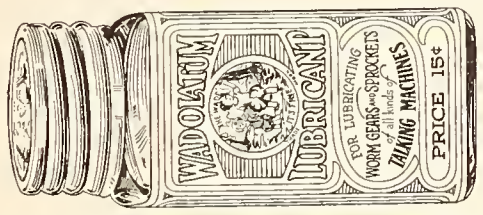
Wade & Wade Accessories For Talking Machines



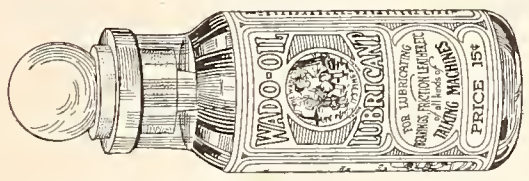
The **Wade Polish** leaves a perfectly dry, hard, glossy finish.



This is the **Grease** for the spur gears and worm gears, and eliminates the gritting and grinding noise.

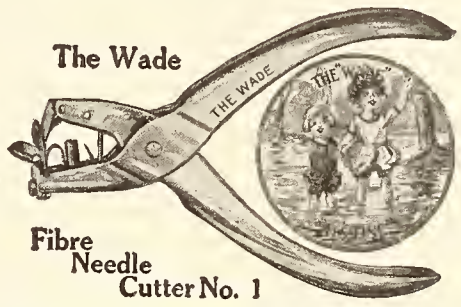
We also manufacture a light grease to be used in spring barrels to prevent the springs from sticking and releasing irregularly. This grease does not get hard or dry out.

Further information upon application.

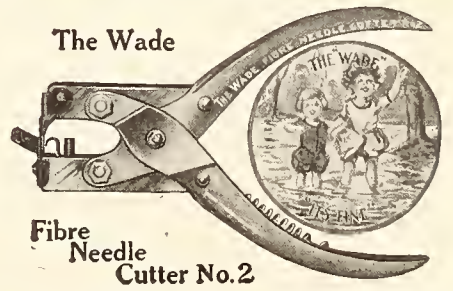


Notice the Patent Dropper

This is the **Oil** for close-fitting bearings on Talking Machines, typewriters, or any other fine machines.



The New Improved No. 1 Wade Fibre Needle Cutter in which the upper and lower blades work parallel to each other.



The No 2 Wade Cutter is still as popular as ever and the demand for them steadily increases.

A trial order will convince you that we have the accessories *the* people want

WADE & WADE, 3807 Lake Park Ave., Chicago, Ill.

Reproduction of a pen and ink drawing of a section of the Lyon & Healy Waiting Room for Men and Women. The vaulted, arched ceiling rests on heavy columns executed in Caen stone. The ribs, running across the ceiling from pier to pier, are ornamented in Arabesque relief with lustre mosaic inlays typifying music. The soft coloring of the Caen stone, the Arabesque relief, and the furnishings, make this one of the most distinctive and attractive waiting rooms.

An Invitation

The conveniences of the beautiful new Lyon & Healy Waiting Room for Men and Women, are at the Free Service of all engaged in the Music Trades.

You are invited to make this place your headquarters in Chicago.

This is your room; use it as often as you please. We instructed our architects to design it especially for your convenience.

Here is a central location for you to make appointments and meet your friends.

Here are desks and stationery, and the necessary quiet, so that you may write without being disturbed.

Here you will find the daily papers, magazines, railway time-tables, comfortable chairs and tables, especially for your use. A good place to "rest up" after the rush of business.

Here, also, are telephones in sound-proof booths—you may talk "long distance" to the folks at home, if you wish.

Make use of this central meeting place, here in this pleasant atmosphere of music.

Have your mail addressed "Care of Lyon & Healy Waiting Room," and it will be held until you call.

This room is yours—you will find it ideally adapted to your purposes.

LYON & HEALY

New Building

Wabash Avenue at Jackson Boulevard, Chicago

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 47)

Samuels is a talking machine man of long experience, as he first became interested in the proposition almost twenty years ago, and later, when traveling through South America, he took an active interest in the trade. He enjoyed the unique experience of seeing the aboriginal natives of Bolivia, Chile and Peru hear a talking machine for the first time. They, of course, believed it was magic.

Vitanola Quarters Enlarged

Another increase in the quarters of the Vitanola Talking Machine Co., of 210-212 South Wabash avenue, has been made necessary by the rapidly growing business of this house. The concern at present occupies as general offices and stock rooms, the entire third floor of the building. Now the company has secured the entire fourth floor, which will mean an increase of over 7,000 square feet of space.

The Phonoparts Co., which is owned by the same interests, has also been doing a very large business in tone arms, sound boxes, etc., and the Phonoparts Co. will soon bring out a large stock of the new "Playrite" electric motors.

Velvatone Co. Acquires Plant

The Velvatone Talking Machine Co., of which C. H. Bartholomee is president and treasurer. and Paul B. Armstrong, secretary, has acquired the use of the plant of the Stevens Piano & Organ Co., at Marietta, O., and has already put it into operation. This factory is well equipped and can easily produce 20,000 talking machines of average size per year. The first instruments have been received and a number of sales already made. The company will also make the "Bartholomee" phonograph, which is designed especially for the trade. Both lines will contain some special features, the nature of which has not yet been announced.

Good Business Necessitates Expansion

The continued increasing Columbia business in local territory has made necessary a considerable increase in the size of the Columbia quarters in the Ward Building, and Manager C. F. Baer has fortunately been able to arrange for an addition to the present space enough room to handle almost double the stocks of machines and records that have been taken care of hitherto. Over half a million records will now be carried in the Chicago distributing quarters, which news is doubtless very welcome to Columbia dealers, most of whom have enjoyed a phenomenal business in this department of their activities. Deliveries will also be much facilitated because of a new scheme that A. Mortenson, who is in charge of the stocks, has instituted. This idea consists of a continuous handling route, receipts coming in on one side of the building on one set of elevators and the shipments going out on the other side of the building on another set of elevators. Oftentimes the goods stop but a very short time in going through the routine of checking, sorting, etc., before they are on their way to the dealer, after being received.

The call for Columbia machines has been pretty well distributed through the whole line, and record calls have been similarly spread through the catalog. Stocks of the Columbia electric machine have been practically exhausted and certain of the special styles are quite low. The new Style 250 Grafonola in burl walnut has been received and has met with universal admiration.

The work of boosting "a Grafonola for vacation days" will soon be under way, in fact, dealers are ordering considerable quantities of the smaller machines already. Dealers are also planning some extensive advertising of Columbia machines in preparation for good sales in this direction.

Some New Columbia Dealers

The Humboldt Furniture Co., which has opened a new store at Lawrence and Kedzie avenues, has installed a Columbia department and will carry the full line of Grafonolas and Columbia records. Charles J. Larson, Jr., of 7757 South Halsted street; Samuel Rudnick, of 350 East Kensington avenue, Kensington; Hassmer Bros., 905 Belmont avenue, and Wilson & Lescher, 1961 North Halsted street, are also new Columbia standard bearers in Chicago. Other new Columbia dealers in territory contiguous to Chicago are Thomas Mee, Jr., Clinton, Ill.; Bode Bros., Kenosha, Wis.; Jacobs Music House, Fort Wayne, Ind; J. C. Berryman, Broadhead, Wis., and Baber & Rankin, Peru, Ind.

Babson Bros. Adopt "Sunlight Saving"

Babson Bros. have decided to "push the clock ahead" in accordance with the "sunlight-saving" plan. A local daily, in its editorial columns, said the following:

"The proprietors of the firm of Babson Bros. were impressed with the merits of the 'sunlight-saving' idea. Doubtless their 500 employes had been reading and thinking about it. The employers laid the proposition before the employes and asked their opinion. A large majority of the employes voted to start an hour earlier and quit an hour earlier during the summer months. The plan is in effect, and so far all are well pleased. It will continue in that office until a majority ask for a change.

"The incident illustrates how much might be done in the way of 'sunlight saving,' with all its evident benefits in reduction of industrial and personal expense and to health by giving more sunlight hours in the open air, by the human beings in any industrial plant or particular industry just giving a little thought to the subject and taking such action as their intelligence directs. Governmental action is desirable to avoid legal complications, but much may be done without waiting for it."

Personals and Visitors

E. N. Burns, first vice-president of the Columbia Graphophone Co., was in Chicago this month, and in addition to making several visits to the local Columbia offices, spent a good deal of time at the national political conventions.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 49)

R. F. Bolton, district manager of the Columbia Co. in New York State, and J. C. Button, Dictaphone manager in New York State, were also prominent visitors to Chicago this month.

Jesse Hand, Lake Geneva, and Mr. Bode, of Bode Bros., Kenosha, were visiting Wisconsin dealers in town recently.

J. C. Baxter, Davenport, Ia.; Thor Norberg, Moline, Ill., and both members of the firm of Kesselman & O'Driscoll, of Milwaukee, Wis., were recent visiting dealers.

Two Michigan dealers in town were Mr. Ashworth, of the Webber-Ashworth Co., of Cadillac, and Mr. Hubble, of Hubble Bros., Monroe.

Robert Elbel, of South Bend, Ind.; Mr. Milliken, of Milliken & White, Bay City, Mich., and Mr. Getts, of the Getts Music House, of Grand Forks, N. D., were visiting dealers to the trade recently.

S. O. Wade, of Wade & Wade, reports that he is very much pleased with the way the orders are coming in for the Wade fibre needle cutters. He is also very optimistic over the prospects of a handsome fall trade.

William E. Hoschke, president of the Crescent Talking Machine Co., of New York, was in Chicago recently.

Mr. McNamara, who is president and manager of the Union Phonograph Supply Co., of Cleveland, was a prominent supply man visiting the local trade recently.

The offices of the Tel-A-Tone Co. were incorrectly reported in last month's World as being on the sixth floor of the Republic Building. The item should have read that the offices are on the sixth floor of the Tacoma Building.

William Knabe, vice-president, Knabe Bros., Cincinnati, makers of the Knabe Crystola machines, is in Chicago this week.

R. B. Corcoran, manager of the record department of the Geo. P. Bent Co., is bereaved of his father, who died recently.

Chicago friends of Miss Uhl, who has been with Chase & West, of Des Moines, for many years, will sympathize with her in the recent death of her father, who was run over by an automobile.

Talking Machine Shop Plans New Home

The Talking Machine Shop, located in the Steger Building, which has for years been one of the most successful retail enterprises in the local trade, will occupy, September first, the three-story and basement store located at 234 South Wabash avenue.

The building, until recently, was occupied by the Boston Piano Co., and previous to that was for many years occupied by J. O. Twichell, who was one of Chicago's best known piano dealers. The new building is only next door to the Steger Building on the Wabash avenue side and, therefore, the old patrons of the Shop will have no difficulty in learning the new location. The new shop will be one of the largest exclusive talking machine stores in the Middle West, and C. L. Davidson and G. W. Davidson say that they plan to make it the most successful. On the first floor there will be the reception and show rooms, together with six commodious sales booths. In the rear will be the record room and shipping department. A handsome staircase will lead from the first floor to the basement, where a concert hall seating 125 people, will be built. The second floor will contain the general offices and bookkeeping department as well as eight sales booths, three of which will be large machines sales rooms. The third floor will be devoted to machine and record stocks, etc.

"We intend to do our level best to make this the banner Victor store of Chicago," said G. W. Davidson.

The Buick Was Jealous

Decoration Day being particularly appropriate for all sons of Columbia to get out and celebrate, R. G. Winter, of the local wholesale sales department of the Columbia Graphophone Co., invited A. T. Boland, local retail manager; C. R. Ely, who is doing special promotion work for the Columbia Co., and W. W. Parsons, out for a trip to Indianapolis in his new Buick speed demon. Everything went lovely on the way down to the Hoosier capital, but on the return the Buick was jealous of the way that Resta's Peugeot had flown around the track at the Memorial Day races, and blew a few tires. Winter, as owner of the car and purchaser of the gas, let the deadheads do the work and stood by with his little hammer.

Victor for Two Cable Piano Stores

The Cable Piano Company, of Bloomington, Ill., is moving into fine new quartes at Main and Market streets in that city. Incidentally it has acquired the Victor license of E. E. Fenn and Manager Berquist is arranging a fine talking machine department.

Arrangements have also been made by the Cable Piano Co. for the Victor line at the company's new store at Wheaton, Ill.

New Empire Styles

In an announcement made this month by the Empire Talking Machine Co., the new styles of the Empire line are presented to the trade. They include some very noteworthy designs and are sufficiently varied in their nature as to afford a machine for every demand. The cases possess an exceptionally fine finish and veneers have been selected and matched with undeniable care. Certain improvements in construction that make the new designs stronger, although not a bit heavier, are also included in these late models. John H. Steinmetz, president of the concern, has arranged for an exhibition of the line at the Klingman Furniture Exhibition Building at Grand Rapids, Mich., during the month of July.

Incorporated

Albertus Niehuis & Co., Inc., of Chicago, have been incorporated with a capital stock of $5,000, and will engage in the talking machine business. The incorporators are Albertus Niehuis, Minnie R. Moulton and Jakobus H. Niehuis.

THE Brunswick Phonograph embodies a great many improvements, several of which are exclusive to this new instrument. We believe this to be the virtuoso of reproducing instruments—the master musician. When you see it and hear it you will understand. You will note how it reproduces the quality and beauty of any record. No trouble at all to demonstrate this triumph.

You only need to place the Brunswick beside any other phonograph. Play the same record on each in turn. That test will convince you—that test will convince your customers. It will, we believe, soon place the Brunswick on top.

This new-day instrument plays any disc record, vertical or lateral cut. No extras to buy—it comes completely equipped.

The cabinet and motor are of exceptional excellence. We have cut costs enormously by our efficiency methods and tremendous output.

We have nine great factories. We em-

ploy 5,000 people. We are one of the largest users of hard woods in the world.

Very few have use for so many expert cabinetmakers and skilled mechanics. Our company has specialized in cabinet work for 76 years. We save enormously in scores of ways. So prices like these become possible on cabinets of super-elegance. There are no finer in all the world —no choicer woods—no more masterful cabinet work. The beauty of Brunswick models dominates all others.

Now consider the demand for the Brunswick Phonograph that will follow our first great announcements in the magazines. But don't wait for that. Some other aggressive dealer may get the Brunswick agency where you are located if you do.

We have 60 branches in all parts of the United States and in Canada from which to serve you. Investigation costs nothing —delay may mean the loss of this valuable agency.

J. K. Stewart Dies Suddenly

John K. Stewart, head of the Stewart Phonograph Corporation, and founder of the Stewart-Warner Speedometer interests, died at his home in Long Island recently following a stroke of paralysis. The deceased was forty-six years old and is survived by a widow and two children. The work of the Stewart Corporation will continue as before, although changes will necessarily be made in the directorate of the company. The production at the Stewart plant has been radically increased and wholesale orders are now receiving prompt attention.

Six Best Sellers of the Month

The six best Victor records, according to local jobbers, are: "My Old Kentucky Home," "Cohen at the Telephone" and "Goldstein Goes in the Railroad Business," "Fair Hawaii" and "She Sang 'Aloha to Me,'" "Yaaka Hula Hickey Dula" and "I Can Dance with Everybody but My Wife," "Otilia March" and "Guatemala-Panama March" and "Alice, Where Art Thou?" and "Come Back to Erin."

Calls from Columbia followers are coming in thick on "Underneath the Stars" and "Hello, Hawaii;" "So Long, Letty;" "When Its Orange Blossom Time," "Ladder of Roses," "On the Shore at Le Lei Wi," "Wake Up, America," "Good-Bye, Good Luck, God Bless You;" "Memories," "My Mother's Rosary," "I'm Going Back to Oregon" and "Now Is the Time."

The six best sellers in the Pathé library this month were: "Underneath the Stars" and "Young America, We're Strong for You," "On the Beach at Waikiki" and "Kohala March," "Poet and Peasant" and "Paradiso from L'Africaine," "Hello, Hawaii, How Are You?" and "Loading Up the Mandy Lee," "The Star Spangled Banner" and "Old Folks at Home."

Six of the best sellers at Edison stores were: "I Love a Piano" and "That Hula Hula," "America, I Love You" and "Molly Dear, It's You I'm After," "Back Home in Tennessee" and "Hello, Frisco!"

Tresch, Fearn & Co.

Tresch, Fearn & Co., which house is one of the few in the local trade handling Victor, Columbia and Edison machines, has signed a lease on enlarged quarters at 157 West Madison street and before very long will move from the old quarters at 160 North Fifth avenue, where it has been for a number of years. The concern will have one of the finest stores in that part of the Loop when everything is completed. The concern has not yet announced the taking on of any additional lines.

Cheney Cases Postponed

Both the suits of the Victor Talking Machine Co. vs. the Cheney Talking Machine Co., and that of the American Graphophone Co. vs. the Cheney Talking Machine Co., which allege infringements of patents, have gone over to the fall term of the Federal Court and it will not be until then that any decisions can be obtained.

D. R. McKenzie Announces New Style

D. R. McKenzie, president of the Playerphone Talking Machine Co., in a recent interview, said: "When there are now so many manufacturers making talking machines or phonographs of one sort or the other, it is difficult for the casual observer to distinguish the one of merit from those which in some cases, seem to be made only to sell. There are, however, a lot of good machines being sold, and the choice between them cannot be made without pretty careful investigation into the distinctive qualities of each. The latest model of the Playerphone, the Chippendale design, is such a superb piece of historically correct, mahogany period furniture, all metal parts being finished in gold, that it excites the enthusiasm of everyone who sees it. An electric motor, started and stopped by the position of the tone arm, operates it, or a large spring motor running twenty-five minutes, is optional. The tone arm is so constructed that it can be made to play any kind of disc record by a mere turn of the arm and the fitting of the point proper for the record; there are no sharp angles in the balanced tone arm, just sweeping curves, which, I believe, is the only technically correct line of conveying musical sound."

Some of the new distributers of the Playerphone are: the Scott-Halliburton Co., Oklahoma City; E. M. Moyer, Monessen, Pa.; Oklahoma Book Co., Oklahoma City, Okla.; J. W. Crowdus Drug Co., Dallas, Tex.; Flechsig-Albrecht Co., Pittsburgh, Pa.; Williams-Davis-Brooks & Hinchman Sons, Detroit, Mich.; Reifsnyder & Sons, Lancaster, Pa.

L. E. Hotchkiss, Playerphone traveler in the territory east of Pittsburgh, has returned from a profitable trip that lasted over three months. He is very enthusiastic over the new styles in the Playerphone line and looks forward to the fall trade in that section with optimism.

A simple but effective window display that caught the attention of the visiting delegates to the Republican and Progressive Conventions, as well as the Preparedness Day paraders, the Memorial Day marchers and the Suffragist sisterhood, was the window shown herewith. The display was that of the Grafonola Shop and was arranged by Retail Manager A. T. Boland.

The "properties" were very simple and easily procurable and the attractiveness of the window was mainly due to the artistic draping in the background of Old Glory.

J. P. FITZGERALD'S NEW POST

St. Louis, Mo., June 5.—J. P. Fitzgerald, formerly general sales manager of the Artophone Co., in now associated with the Mozart Talking Machine Co., which is one of the newer companies in the Western talking machine trade. Several well known furniture manufacturers have become connected with this concern, and it is now turning out a considerable number of machines per month.

The company is specializing at the present time on the production of a machine which retails at $55, and is equipped to play any make of record. They also have another model to retail at $100 and expect to have a complete line ready in a very short while. Mr. Fitzgerald is in charge of sales and has closed a number of important contracts during the past six weeks.

SOME INDIANAPOLIS BRIEFLETS

Indianapolis, Ind., June 8.—The Central Music Exchange, 18 Pembroke Arcade, report a nice business in machines and records. Their record exchange plan is meeting with success and it is the probable intention of the management to install a complete line of the popular "Musictrola" talking machines and records for the fall trade.

J. L. Peter, manager of the Fuller-Wagner Music Co., made a flying trip through Indiana, Kentucky and Ohio in the interest of the talking machine department, and reported an exceptionally good outlook. The rural districts are becoming interested and in the near future a large per cent. of the talking machine sales will be made in the farming districts.

HANDLES THE PATHE IN MEMPHIS

One of the recent additions to the talking machine establishments of Memphis, Tenn., is the store of the L. H. Floyd Co., 26 Monroe avenue, featuring the Pathé phonograph.

The Dawn of a New Era!

STOP

—THAT MONOTONY OF MONOTONE with a perfectly practical, simple set screw system with which you can shade the tone from a whisper to a brass band.

STOP

—THAT WHIRR AND BRRRR OF CONTACT with a noiseless needle that does not "ride," but simply floats over the record without wear — The Golden Tone.

STOP

—STICKING TO ONE MAKE OF RECORDS and make your selection from any catalogue — any manufacturer who can offer you the melodies of your heart's desire.

STOP

—THAT SCREECHY, SCRATCHY, TIN PAN EFFECT with a needle that will give you the supreme clarity of tone—a clean crystal thoroughness and naturalness.

STOP

—CHANGING NEEDLES by using The Golden Tone, a needle good for all time, any time, on any and all machines.

THE GOLDEN TONE

Of The Supreme Noiseless Needle

Really marks an epoch in reproduction—inasmuch as reproduction really becomes Re-Creation—revealing a new era musical.

A needle's value is represented by what it WILL do and what it will NOT do.

Here Is What the Supreme Needle Will Do

It will play Any and Every record.
It will prove its Supremacy on All machines.
It will abolish all harsh, screechy, scratchy tones.
It will abolish the ridiculous necessity of changing points.
It will adapt itself to the acoustic conditions of Any Room or Area.
It will shade the tone from a Whisper to a Brass Band.
It will bring out all the Naturalness, Thoroughness and Clarity of tone.
It will Re-Create.
In fact, it will do a hundred-fold things that no other needle on the market comes near accomplishing.

—And Here Is What It Will Not Do

It will not scratch and mutilate the records, regardless of make or brand.
It will not ruffle your sensitive nerves with the rasp of that something, which has held back the sale of many a machine.
It will not distort the real and natural.
It will not wear out!—and it is sold under just that guarantee and certificate of warranty.

* * *

A Glorious Harvest for Dealers

Who are alive to the wants and demands of real music lovers. Music dealers from all over the country are writing, 'phoning and wiring for larger quantities of these little musical miracles, exclusive territory and our remarkable literature. Each order filled in order received, but *we are not selling territory.* Exclusive rights for The Golden Tone are based on quantity orders.

$3.50 Wholesale — **$5.00** Retail

Address All Communications to the

SUPREME SALES COMPANY
College Building, Adams and Wabash
CHICAGO, U. S. A.

STOP

—THE DISPLAYING OF PHONOGRAPHIC MECHANISM in all of its nudeness by gowning it with a golden mantle after your own ideal — put your own mood in the music.

STOP

—THAT MECHANICAL REPRODUCTION and enjoy, with The Golden Tone, absolute Re-Creation, possible through its adjustments to the acoustic conditions of any room or area.

STOP

—THAT DISTORTION OF THE REAL AND NATURAL by the failure of past needles to acclimate themselves to the touch and tone of any musical maneuver.

STOP

—BEING SATISFIED with mere records of sounds and performances. Let The Golden Tone give you the records you have longed for — of genius, art, personality and nature.

STOP

—THAT PHONOGRAPHIC RASP, which has ever ruptured your sensitive nerves in the past, with a needle that is noiseless and toneful.

OPENING OF LYON & HEALY'S PALATIAL NEW BUILDING

An Idea of the Perfection of the Arrangement for Handling the Wholesale Business of Victor Victrolas, Records and Accessories May be Estimated from the Illustration and Description of This Handsome Department Appearing on These Pages of The World

CHICAGO, ILL., June 10.—"If I should die before I wake, I pray the Lord my work's all right," warbled some one who is not imbued with the modern idea of system even of the saner kind.

A Lyon & Healy man, who was showing a visitor through the talking machine department in the beautiful new building at Wabash avenue and Jackson boulevard, remarked that if every person in Department H should be suddenly choked off, of an evening, a new crew could come in the next morning, take up the work just where the late lamenteds left it and carry it on without a hitch.

It is the purpose of this article to give some idea of the perfection of the arrangement for handling the wholesale business in Victor Victrolas and records and talking machine accessories. An illustrated article covering the retail department will appear next month.

It should be said right here that the dealer who does not inspect this wonderfully equipped talking machine store is doing himself an injustice. Both in the wholesale and retail he will find many wonderful things in the way of stock arrangement, methods of handling reserve stock, plans for handling and showing goods and unique service ideas, all of which have been developed as a result of experience of years in the talking machine business.

L. C. Wiswell and his associates in the department and in the house are now for the first time fully able to realize their ideals regarding the handling of an up-to-date talking machine business.

It may be of interest first to trace the course of an order from receiving to shipping. All dealers' mail is received in the mailing department, where it is instantly assorted and sent by special automatic tubes direct to the talking machine department. Here the order is immediately entered by the order clerk and promptly handed to the stock department, where, through the installation of the latest scientific arrangement of record stock bins and the convenient disposition of tables, the order is filled with dispatch and then passed to the packing department. While the goods are being packed a bill, or invoice, is being compiled by the special bill clerk. Invoices are always included with each shipment, thus enabling the dealer to promptly and accurately check up the goods with his order when received. After the invoice is included with the goods, the shipment is put in a spiral conveyer and within a fraction of a minute arrives in the shipping department in the basement, where after proper record is made it is placed upon an hydraulic elevator, lifted to the loading platform and then taken by one of the fast fleet of motor trucks to the freight depot for shipment to the destination.

The entire wholesale department is located on the second floor of the new building with the exception of the repair shop and retail reserve stock, which is on the ninth floor, and the big general wholesale machine stock maintained in the warehouse on the West Side.

The first view shown in this connection is that of the wholesale sales room, which occupies a large space in the rear of the second floor. It is literally a daylight room with windows extending along both sides. As will be seen by the photograph a complete line of Victor goods is here shown. On the left will be seen the entrance to the record demonstration rooms.

No. 1—Section of Wholesale Talking Machine Salesrooms

These are devoted entirely to the wholesale purposes and are entirely separate from the thirty-three demonstration booths of the retail talking machine department. Two of these booths which appear in the illustration, are Unicos made by the Unit Construction Co., of Philadelphia, many of which have been sold by Lyon & Healy to Western dealers. These booths are not only used for playing over the new monthly records and also stock records for

(*Continued on page* 58)

No. 3—Accessory and Advertising Bins, Showing Cupboard System

No. 4—General Offices of Department H

No. 5—Repair, Adjustment and Polishing Department

LYON & HEALY'S PALATIAL HOME

(*Continued from page 57*)

dealers, but are also used by the dealers themselves who can bring customers in to Lyon & Healy's and sell them on the spot. They can also, of course, send their customers to Lyon & Healy for machines or records, which they have not in their limited stocks and the merchants are always given credit for these sales.

Figure two is a view of only a part of the wholesale record stock and serves to illustrate the method of carrying surplus stock at the top of each bin. At some future time a more detailed account will be given of the remarkable system of handling the record stock by means of the specially devised flag system, which automatically indicates when replenishment is needed. It will be noticed, however, that this system of shelving is flexible. The racks are not only of sectional construction but the small shelves themselves are movable—thus allowing the space devoted to each particular record to be changed according to the decrease or increase of its selling power and adapting that shelf to hold anywhere from five to five hundred records at a time.

Cut number three illustrates one of the most interesting places in the department. The cupboards with drop doors are used for accessories of all kinds and protect the goods, of course, from dust and dirt. This system prevents soiling of goods or packings. The vertical cupboards contain a vast stock of advertising matter furnished by the Victor Co. for distrbution to dealers. This literature costs the Victor Co. a tremendous amount of money and Lyon & Healy believe that it should be not only kept in condition, but in such order as to enable them to maintain the highest standard of promptness in meeting the dealers' demands.

Merchants familiar with the comparatively limited facilities furnished by the old department in the building which Lyon & Healy occupied for a quarter of a century at Wabash avenue and Adams street will smile when they gaze at the photograph of the general offices of Department H. Light and beautiful it is and Manager L. C. Wiswell, his assistant, J. B. L. Ryde, and the large corps of clerks and stenographers are indeed happy in their new environment.

Floral Victrola, Gift of L. F. Geissler, General Manager of Victor Talking Machine Co., for Lyon & Healy Opening

Cut number five shows the novel arrangement of the repair, adjustment and polishing department on the ninth floor. Each repair man has a separate room to himself for the repairing and testing of machines. The men can thus not only pursue their work independently and without interruption, but the testing is, of course, more accurate and the workers are free from the trying nervous effect of several machines playing different ditties at the same time. As already stated the major part of the balance of the ninth floor is taken up with the reserve stock for the retail department.

The manner of handling the wholesale machine stock is wonderful. The stock is kept in a large warehouse on West Lake street, near Sheldon, and the deliveries can be made from here much quicker, it is claimed, than from the loop, as the congestion and hindrance to traffic in that section of the city is thus avoided. One large Packard truck is used for delivering goods to dealers in the city.

Mention should not be omitted of the conveniences afforded the employes of the department. These include luxurious appointed lavatories and locker rooms, that for the women employes, containing provisions for their comfort and convenience not usually found in many of the largest wholesale establishments.

Notable, indeed, was the formal opening of th enew building, which took place the week of May 22. The floral offerings were profuse and most notable of these was a magnificient Victrola, "life size," which greeted the visitors as they entered the store from the Wabash avenue entrance. Five thousand carnations, a large quantity of sweet peas and much smilax was used in its construction. It was the gift of Louis F. Geissler, general manager of the Victor Talking Machine Co. and was greeted with continual choruses of admiration on the part of the visitors. Among the other floral offerings coming directly to the talking machine department were beautiful baskets of flowers from the Geo. P. Bent Co. and the Wilson Avenue Talking Machine Store, a wonderful bouquet of roses from the Chicago Talking Machine Co. and four beautiful bouquets from F. D. Hall, of Chicago, the celebrated inventor of the fibre needle. During the mornings of opening week there were Victor recitals, as there now are all day, in the Lyon & Healy concert hall on the first floor, while in the afternoon vocal and instrumental artists of distinction were heard, quite a few of whom were Victor artists.

INCORPORATED

TROY, O., June 9.—The Lorimer-Hicks Co., manufacturers of the Lorophone talking machine, has been incorporated for $150,000. G. W. Lorimer is president, C. B. Hicks, vice-president and S. W. Hetherington, secretary and treasurer. Fred Nichols and E. W. Bowyer are, with the officers, directors.

YOUR CUSTOMERS WILL WANT THIS

CONVENTION OF EDISON DEALERS

Edison Phonograph Retailers from All Sections of the Country to Gather at the Hotel McAlpin, New York, to Discuss Business and Enjoy Elaborate Entertainment

The second annual convention of the Edison phonograph dealers will be held at the McAlpin Hotel in New York City on Thursday and Friday, June 22-23. A notification regarding the date of the gathering was sent to Edison dealers throughout the country some time ago and the interest that has been manifested in the convention indicates that it will be attended by dealers from coast to coast. The program that will be presented in connection with the gathering is original in many respects and has been planned along lines that are much broader than those bounding the majority of such affairs. While matters of the highest importance to Edison phonograph dealers will be brought up for consideration, they will be presented in a way that will make them interesting and entertaining.

The first session will commence at 1.30 o'clock Thursday afternoon and it will be opened with the usual addresses attendant upon the organization of such a gathering. Among the features of the program will be the presentation of an original play, written by an experienced dramatist, by a small company of professional actors. The plot reveals the proper manner of demonstrating and selling an Edison phonograph. In addition to the play, a tone test recital, in which a number of eminent Edison artists will participate, will be given, and "The Voice of the Violin," an Edison motion picture, in which the phonograph is featured, will be shown, and advice on the best way to book it in motion pieture houses will be given.

On Thursday night a banquet for the dealers will be held in the largest banquet room of the MeAlpin, and it will be served according to the high Edison standard. During the course of the dinner an elaborate cabaret show will add to the entertainment. After the banquet a number of widely known Edison artists will appear in a concert and, later in the evening, the guests will have the opportunity of meeting them. The banquet will be a convivial affair, replete with good fellowship.

It is safe to say that each dealer who attends the eonvention, not only will find pleasure and entertainment, but information and inspiration that will increase largely his business efficiency and bring him material profits. The foremost authorities in the eountry on the various phases of phonograph production and marketing will be present and they will give the dealers the advantage of their years of research and experience.

Unless something unforeseen occurs, Thomas A. Edison will be present in person and each dealer will have an opportunity to meet him. The inventor has an important message for every dealer and it will be delivered, whether or not Mr. Edison is present, by William Maxwell.

GRADED LIST OF VICTOR RECORDS

Revised Edition Just Sent to the Trade—Full of Valuable Information

The Victor Talking Machine Co. sent out to its dealers this week a revised edition of its book, "The Graded List of Victor Records for Children in Home and School," eontaining a complete list of all educational records issued by the company, a large amount of valuable information formerly contained in small leaflets and a long list selected from the general catalog, the total eomprising nearly one thousand records. An explanatory note has been appended to each record, and the whole list is carefully graded for sehool use.

This book is interestingly illustrated throughout, and a section entitled "Suggestions for using the Victor and Victor records in the schools" eontains a wealth of invaluable information for everyone associated with education in its many phases. The contents of this section are indicated in the various headings which include "Choosing records," "Teaching the song material," "Folk songs, familiar songs, ballads, art songs," "Reading and story telling," "Correlating with literature," "Physical education and recreation," "Some of the things you can teach with the Victor," and others.

This book is given additional weight because of the tremendous advances which the Victor Co. has made in the educational domain the past few years. There is not a single State in the Union in which Victor school product has not been adapted by the schools of one or more city, and the innumerable ways in which the Victor may be utilized in the school room are outlined in this new publication, with its vast amount of timely record material.

J. G. Corley, Victor Jobber of Richmond, Va, was a visitor in New York reeently, where he transacted some important business. He paid a visit to the Victor plant at Camden, N. J., while in the North and placed large orders.

THE VOCALION IN DALLAS, TEXAS

Titche-Goettinger Co. Opens Fine Department in That City Under the Management of Don Peyton—Also Aet as Distributers

DALLAS, TEX., June 10.—One of thc most clabborate departments devoted to the sale of the Aeolian-Vocalion in this section of the country, was opened on May 22, in the big department store of the Titche-Goettinger Co., under the management of Don Peyton, formerly with the Aeolian Co., New York.

The department is located on the sixth floor of the Annex. The three demonstrating rooms are in ivory finish and fitted with double strength glass. Each room is finished in a different color scheme, one in gray, another in old rose and the third in a beautiful shade of blue.

In addition to handling the Vocalion in a retail way in Dallas, the company is also the distributer for that instrument in north Texas. This firm also handles the Columbia Grafonolas in that department here.

PROSPERITY IN THE MIDDLE WEST

Says R. F. Bolton, District Manager of Columbia Co., Who Recently Returned from Trip

R. F. Bolton, district manager of the Columbia Graphophone Co., with headquarters at 83 Chambers street, New York, returned Monday from a trip through the Middle West, which included a visit to Chicago, Kansas City, St. Louis and Pittsburgh. Mr. Bolton made this trip in order to acquaint himself at first hand with conditions in this territory, so that he may be able to present additional plans or ideas of service and co-operation to the dealers in the East.

Referring to his trip, Mr. Bolton commented upon the general era of prosperity which is current in the Middle West, and stated that Columbia dealers are closing a healthy, profitable business, which gives every indication of continuing through the summer. Mr. Bolton noticed with pleasure the prestige and standing in their respective communities of the dealers handling the Columbia line, and the splendid representation Columbia products are receiving. He spent some time with H. A. Yerkes, district manager in the Central West, who is achieving the same measure of success in that section of the country as he did in the East.

TO CONCENTRATE ON WHOLESALE

CHICAGO, ILL., June 13.—The Pathé Pathephone Shop, which has been located for some time at 15 East Adams street, and which has been operated by the Pathé Pathephone Co., withdrew from business this month. R. E. Rundell, manager of the company, said that the move followed the company's policy of better concentrating upon the wholesale department of its activities.

ENTERS TALKING MACHINE FIELD

DAYTON, O., June 12.—The Thomas Manufacturing Co., which has long been known as an extensive manufacturer of lighting systems and other specialties, has equipped a large part of its plant with elaborate machinery for making talking machines. Already a complete line of attractive instruments are on the market, and through the national sales organization system which the Thomas Manufacturing Co. controls, the company anticipates a vigorous and immediate marketing of its line.

INCORPORATED

R. L. Kenyon, Inc., of Mexico, N. Y., has been granted a certificate of incorporation by the Secretary of State, Albany, N. Y., to engage in the manufacture of cabinets and phonographs. The capital of the concern is $50,000.

ADDITIONAL SONORA QUARTERS

The Sonora Phonograph Co., 57 Reade street, New York, has leased additional quarters at 138-140 Duane street.

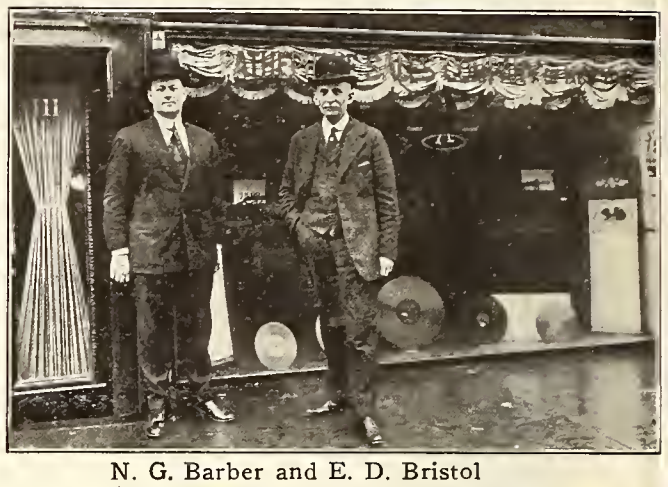
A LIVE FIRM OF DISTRIBUTERS

Experience of N. G. Barber and E. D. Bristol in Music Trade Standing Them in Good Stead as Heads of the Pathephone Sales Co., New York, Distributers of the Pathé Line of Machines and Records

Views herewith show the interior of the new wareroom just created by the Pathephone Sales Co., of New York, 111 East Fourteenth street, New York, as well as the two officers of the corporation, N. G. Barber, treasurer, and E. D. Bristol, president (from left to right).

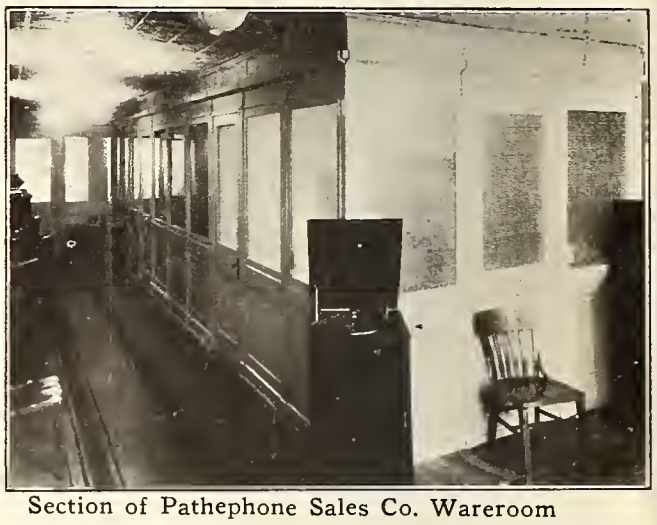
As distributers in New York for the Pathé line of machines and records, it is the intention of these men to render the greatest possible value in the way of service that will be a direct assistance to the many dealers of this territory. For many years Messrs. Bristol & Barber, as co-partners, have given piano dealers a first-class bench and stool service, and the experience gleaned in this work gives them a specific knowledge of what dealers need in co-operation.

N. G. Barber is the managing director of the Pathephone Sales Co., and Mr. Bristol takes entire charge of Bristol & Barber, piano bench



N. G. Barber and E. D. Bristol

and cabinet distributers. Assisting Mr. Barber is C. H. Kilmer, a talking machine man of considerable experience.



Section of Pathephone Sales Co. Wareroom

"It is only a few months to the Christmas holidays," added Mr. Barber, "and I would urge dealers to secure as much stock as possible, for it is evident that the demand this year will be larger than last."

IMPORTANT PATHE CANADIAN DEAL

Manufacturing and Distributing Rights Secured by Pathé Frères Phonograph Co., Ltd.

E. A. Widmann, president of the Pathé Frères Phonograph Co., New York, announced this week that an importnat deal had been consummated which provided for the company's Canadian distribution along lines allowing for material expansion and development.

According to the terms of this deal the Pathé Frères Phonograph Co. of Canada, Ltd., will have the entire distributing rights for the Pathé products in the Dominion of Canada, and will also manufacture Pathephones and Pathé discs in a Canadian factory to be located at Toronto. The executive offices of the Pathé Frères Phonograph Co. of Canada will also be located at Toronto, and all plans have been completed for the formation of a manufacturing and sales organization which will enable the company to give maximum service to the dealers in Canada.

W. J. Craig, James Markham and N. G. Valiquette, all of whom are prominent in Toronto business circles, are the executives in the new Canadian company, and it is understood that the Pathé Frères Phonograph Co. in New York is actively connected with the Canadian organization.

In order that the Canadian company may inaugurate immediately its service campaign to the dealers, the Pathé Frères Phonograph Co. in New York shipped to the Canadian company this week eight cars of Pathephones and Pathé discs. The new Canadian factory is being rushed to completion and will afford the new company ample facilities to handle trade in the Dominion.

MYRON J. SCHLOSS ON THE ROAD

Myron J. Schloss, president of Schloss Bros., the prominent talking machine record cabinet manufacturers of New York, left last week on an extended business trip through the South and West during the course of which he will call on the trade in Philadelphia, Baltimore, Washington, Pittsburgh and other cities.

At the Schloss Bros. factory the activity continues unabated, the demand for all styles of cabinets being unusually strong. The wheel cabinet is proving one of the features of the summer trade, due both to its attractive appearance and its convenience. The company has lately received orders from all sections of the country, including the Pacific Coast, for all their various cabinet styles to match the leading models of machines.

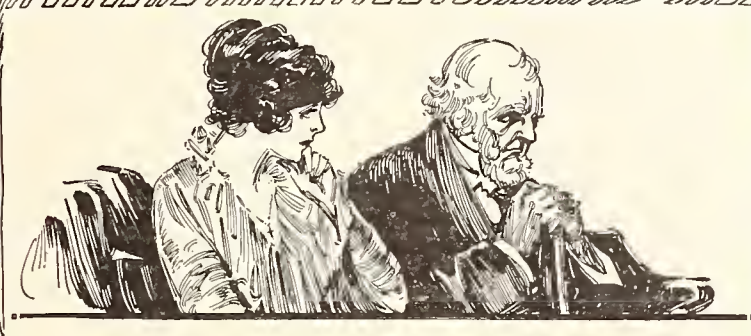
GOOD OROTUND DISPLAY

CHICAGO, ILL., June 10.—The Combination Attachment Co., makers of the Orotund sound boxes and attachments for playing any type of record on machines adapted primarily for playing lateral cut records, are now nicely settled in their new quarters in the Republic Building, where they have excellent facilities for demonstrating their product, together with a completely fitted up laboratory for Mr. Tures, the acoustical expert and inventor of the Orotund.

In a display window on the ground floor lobby of the Republic Building, a beautiful display of the Orotund in the various adaptations is made.

TALKING MACHINE BUSINESS for sale in Newark; factory, 2-story brick building, 22x65, with all necessary machinery; an office in the centre of the city, beautifully fitted up, two desks, typewriter and different other furnishings; about 100 different kinds of cabinet talking machines; will sell all or in parts, or will take in a partner, an able business man; am connected in other business and have no time to attend the above. Address TALKING, 810 Broad street, Newark, N. J.

A Distinctly Individual Advertising Plan for Talking Machine Dealers



The Soul of Music

THAN music there is no pleasure possible that has a more far-reaching influence for good upon us. Still we do not nearly take what we should from the music of the world. We, therefore, as a nation and as a people, do not benefit as we might from a good that is ours to take.

A Victrola or an Edison

in your home will enable you and the children to personally benefit from the great fund of music which the world offers. These wonderful instruments make it possible for you to render every kind of music in all the beauty and power of the composer's original conception.

You should come in and hear these instruments. Know their wonderful interpretative powers. No obligation to buy. Your time will be well spent.

LENORD
PIANO AND MUSIC COMPANY
POSTOFFICE BLOCK
MIAMI ARIZONA

ABOVE we reproduce one advertisement from our new Talking Machine Selling Campaign. Because of their beauty and effectiveness in illustration and text, and from our years of experience in intimate touch with the Talking Machine trade, we know this series is something which every progressive dealer can use mighty effectively in creating sales.

Here is the first opportunity the Talking Machine Dealer has had to secure a series of distinctly individual advertisements that he can call his own.

These talks are built for use in newspapers, or on the back of our copyright, colored mailing cards. The names of any make of machines you carry can be inserted in each advertisement. Only one dealer in a community to be closed. If you want it—write *now*, for particulars.

Williams Book Co., 533 Main street, Worcester, Mass.

THE PATHEPHONE IN INDIANAPOLIS

Tobin Bros. Very Energetic and Successful in Handling That Line Both Wholesale and Retail—Have Handsome Store—Good Publicity

INDIANAPOLIS, IND., June 5.—Among the active factors in the local talking machine field are Tobin Bros., who several months ago became Indiana distributors for the Pathé phonographs and records and who opened a retail store in one of the choicest locations in the retail district of this city. M. P. Tobin is head of the concern and is assisted by his two brothers, all of whom have been extremely busy and very successful ever since entering the business.

J. F. Collins, general sales manager of the

Tobin Bros.' Attractive Quarters

Pathé Frères Phonograph Co., who was in Indianapolis recently, highly complimented Tobin Bros., on the arrangement and location of the store and the manner in which the company was conducting its business.

Mr. Tobin is at present working a new and interesting advertising stunt by distributing gratis, a song entitled "At Home, With My Pathé Pathephone," the words and music written by Ervin R. Miller, a local composer. The music is written in lively one-step rhythm and should prove popular.

APPOINTED FACTORY DISTRIBUTERS

W. R. Anderson & Co., 220 Fifth avenue, New York, have been appointed factory distributers for the Domino records, manufactured by the Domino Phonograph Co., New York. They have perfected a competent sales organization and have made far-reaching plans whereby the dealers throughout the country will receive prompt and efficient service and co-operation.

The Domino record is manufactured by men who have been associated with the talking machine industry for many years, and the first lists of these records present the names of artists who have achieved country-wide fame. The Domino record is a "hill and dale record" and will play on all machines constructed to reproduce this type of record. It is a double-faced record and the library will include all classes of music, new supplements being issued monthly.

MAKING TALKING MACHINE PARTS

The Consolidated Phono Parts Corp., which has taken over several large concerns in the talking machine field, is now producing tone-arms, sound boxes and all talking machine parts at its factory in New York. This plant occupies many thousand square feet in the building at 142 West Fourteenth street and the company is making a specialty of turning out parts to order. Harry Davis is in direct charge of sales, and has already closed contracts involving many thousands of parts.

Eldridge R. Johnson, president of the Victor Talking Machine Co., has leased Castle Wall, the property of Myron H. Oppenheim, for a summer residence. The property is located on a hill just west of the railroad, between Hollywood and Elberon, N. J.

AN ADVERTISING TRIUMPH

E. C. Plume, Former Member of Trade, Now of Sunlight of Publicity Fame, Produces Remarkable Series of Syndicated Talking Machine Newspaper Ads and Folders

CHICAGO, ILL., June 10.—The E. C. Plume Co., 417 South Dearborn street, this city, is just out with a very remarkable series of talking machine advertisements for the dealers' use. The advertisements are entirely out of the ordinary, both as to text and illustrations—both being the work of artists in their respective lines. They are furnished the dealer for insertion in his local papers complete, save for the insertion of the dealers name and that of the machine or machines offered. Before embarking in his present business, Mr. Plume was for fifteen years a very prominent member of the talking machine trade, and the knowledge of conditions thus gained have, of course, been at the disposal of the trained experts who have designed these advertisements. They are also furnished in attractive folder form for direct mailing. The company is also nearly ready with a new series of piano and musical instrument ads which far surpass anything the company has done in this line in the past. The company also has ad services for practically every line of merchandise.

UNION PHONOGRAPH SUPPLY CO.

Is New Name of the Old Union Specialty and Plating Co., Makers of Talking Machine Accessories—Moves Into New Quarters

CLEVELAND, O., June 12.—W. J. McNamara, president of the concern formerly known as the Union Specialty & Plating Co., announces that it has changed its name to the Union Phonograph Supply Co. The concern manufactures tone arms and sound boxes for all makes of talking machines, and due to the constantly increasing business which it is doing it has secured new quarters at 1100 West Ninth street, where a building containing over 50,000 square feet of space has been made ready for occupancy. On another page of this issue will be found an announcement of the removal of the firm into its new headquarters.

FILE INCORPORATION PAPERS

The Mutual Talking Machine Co. received a charter of incorporation this week from the Secretary of State at Albany, N. Y. The capital of the concern is $15,000 and the incorporators are H. Segal, H. Lobschutz, Maurice Richmond and W. Phillips. The last two named incorporators are connected with the Enterprise Music Co., prominent in music publishing circles, and this company will be actively associated with the Mutual Talking Machine Co. in the future. The company will manufacture machines, cabinets and parts.

The Victor Victrola department of the Hoffman music store, of Wooster, O., is now in charge of S. Townsley, who was formerly connected with the Victrola department of John Wanamaker, New York City. Mr. Townsley assumed his new duties last week and is optimistic over the outlook.

TRANSCONTINENTAL TONE TESTS

Madame Marie Rappold Completes Country Wide Demonstration Tour With the New Edison Diamond Disc Phonograph at a Tone Test Held in Seattle, Wash.

SEATTLE, WASH., June 3.—May 31 saw the wind-up in this city of the Transcontinental tone test tour which the new Edison Diamond Disc phonograph and Mme. Marie Rappold, prima donna soprano of the Metropolitan Opera Co., were the principal participants. The tour beban in Rochester, N. Y., on April 26.

On April 28 Mme. Rappold, Verdi E. D. Fuller, general supervisor for, and Arthur Walsh,

Mme. Marie Rappold

violinist of the Edison laboratory, gave a tone test before 2,500 music lovers at Carnegie Hall, New York. The tone test was then given belarge audiences in Newark, N. J.; Philadelphia, Cincinnati, Columbus, Evanston, Ill.; Minneapolis, St. Paul, Birmingham, Dallas, Pueblo and Greeley, Colo.; Pasadena, San Diego, Los Angeles, San Francisco and finally this city. The tour covered in all nearly 12,000 miles and some 30,000 people made up the composite audience. The accompanying illustration shows Mme. Rappold posing with the new Edison in the store of Laurence H. Lucker, Minneapolis.

NEW QUARTERS FOR GRAFONOLA CO.

CLEVELAND, O., June 12.—The Grafonola Co., of 913 Euclid avenue, has leased the retail store room on the first floor in the new Hotel Statler addition on upper Euclid avenue, for a term of ten years, at a reported rental of $10,000 per year. The new quarters, which include a mezzanine floor and the basement, will contain approximately 6,000 square feet of floor space. The concern recently increased its capitalization from $25,000 to $50,000, the increase being in common stock.

HILLSDALE, NEW JERSEY

VICTOR DEALERS DINED IN BUFFALO

Neal, Clark & Neal Give Banquet to Introduce V. W. Moody, the New Sales Manager of the Company—Interesting Addresses Made

BUFFALO, N. Y., June 9.—Over sixty Victor dealers in Buffalo and neighboring cities and towns in New York, Pennsylvania and Ohio were the guests of Neal, Clark & Neal, the prominent Victor distributors of this city at a banquet given on May 25 in the Dutch grill of the Hotel Statler, for the purpose of introducing V. W. Moody, who recently came from New York City to become sales manager for Neal, Clark & Neal.

Following the banquet proper the dealers listened to illuminating and interesting addresses on trade topics from Mr. Moody, who talked on the "Opportunities and Possibilities of Victrola Dealers and Distributors."

In the course of his address Mr. Moody brought out a number of interesting points which greatly impressed the dealers present. He cited concrete instances where dealers had achieved success with the Victor line by the use of good sound business methods, and also pointed out where other dealers had failed because they had not recognized that the Victor business required specialization and concentration in order to be profitable.

Mr. Moody illustrated how the Victor dealers can build up a profitable record business and emphasized the fact that record sales constitute an unfailing barometer of a dealer's success. He told the dealers that they should study the regular Victor catalog and the records themselves and know what the good things are and just what the good points of a record consists of. He devoted a little time to the discussion of stock systems, and as Mr. Moody is recognized as one of the foremost authorities in this country in this particular division of the Victor business, his suggestions were received with interest.

Mr. Moody's address was marked by frequent applause as he emphasized various points which the average Victor dealer is inclined to overlook in the conduct of his daily business, and one of Mr. Moody's timely Southern stories gave a humorous finish to one of the most valuable and interesting discussions that the local trade has ever heard.

The other speakers were O. C. Neal, of Neal, Clark & Neal, who acted as toastmaster; L. I. Brennenarc, of the educational department of the Victor Talking Machine Co., who pointed out the opportunities for placing the Victor in the schools and the benefits that were gained through that means in the development of business generally and who stated that the average dealer did not appear able or willing to go after that trade properly. The last speaker was Arthur F. Sheldon, the noted salesmanship expert and head of the Sheldon School, who offered some general points on good salesmanship.

On the day following the banquet the dealers were taken on a sightseeing trip to Niagara Falls by the Neal, Clark & Neal Co.

CENSUS BUREAU ISSUES STATISTICS ON MUSIC INDUSTRY

Preliminary Statement of Facts Obtained in Piano, Talking Machine and Organ Trade Census of 1914 Published by the Census Bureau—Some Amusing Figures

WASHINGTON, D. C., June 3.—A preliminary statement of the general results of the 1914 census of manufactures for the piano, organ, phonograph, graphophone and talking machine industry has been issued by Director Sam L. Rogers, of the Bureau of the Census, Department of Commerce. It consists of a statement of the quantities and values of the various products manufactured, prepared under the direction for the uninitiated, but to members of the trade acquainted with the actual facts give reason for humorous comment due to the glaring insupposed to represent gains and losses.

Reports were received from 339 establishments which manufactured pianos and organs of these establishments, including the materials, music rolls and other supplies manufactured by them, amounted to $68,769,476. At the census of 1909 there were reported 380 establishments, thus a decrease of 41 in the number of establishments and 1.8 per cent in the value of products.

In addition, in 1914, seven establishments, engaged primarily in other industries, manufactured pianos and organs, materials and supplies valued at $38,167, and 10,428 player attachments.

The number of pianos of all kinds manufactured decreased from 364,545 in 1909 to 325,893 in 1914, or 10.6 per cent. and the value decreased from $58,493,846 to $56,266,362, or 3.8 per cent. The decrease in this branch of the industry is due entirely to the falling off in the output of upright pianos without player attachments.

In the manufacture of organs there was a falling off in number, but a decided increase in value, the number having decreased from 65,335, in 1909 to 42,806 in 1914, or by 34.5 per cent. while the value increased from $5,309,016 to $6,378,912, or by 20.2 per cent.

Corresponding to the increase in the number of pianos with player attachments reported, there was a considerable increase in the value of perforated music rolls manufactured, namely, from $216,159 in 1909 to $853,357 in 1914, or 285.5 per cent.

A great increase is shown in the manufacture of phonographs, graphophones, talking machines, records and blanks. The output of these machines increased from 344,681 with a value of $5,406,684, in 1909, to 515,154, with a value of $15,290,491, in 1914, or by 49.4 per cent. in number and 182.8 per cent. in value. The records and blanks, although increasing but little in number, increased in value from $5,007,104 to $11,111,418 or by 121.9 per cent.

Thomas F. Hennessey has secured the Edison Diamond Disc agency for Oswego, N. Y., and has received his first shipment of machines.

Jobbers, get in for your contracts early. Distributors, be on the jump and get in on the ground floor. Dealers, make the most of "your chance" while it is still open.

WRITE TO FIND OUT ABOUT THE NEW MONEY-MAKER

To increase the dealer's profit, we are making new, double disc records, which we will be ready to ship about the middle of July. NO, they aren't small ones—they are in the popular ten and twelve inch sizes. Several hundred numbers in the first list.

Progress means moving ahead. That's why, in every issue of the World, we put out something NEW. We prove in ***concrete*** form that we are ***constantly*** "going ahead."

Our line of machines retail from ***ten to two hundred dollars.*** Our Pride is the Fraad Jr., a cabinet machine which retails at ***thirty-five dollars.***

The machine proposition we offer to dealers means an increased total in the dealer's sales and an increase of sales means an increase in profits.

Our organization specializes on delivery. "Peppy" delivery service not only brings lots of new business, BUT it keeps our present dealers "busy all the time." We keep our machines "ready to ship."

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World which was started with the April issue, is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. A talking machine out of order often reflects both upon the maker and dealer, and yet frequently the trouble is so slight that the simple knowledge of repairs will permit of the machine being put into proper running order, quickly and practically without expense. In the large cities talking machine repair shops are, of course, available, but this department should prove of particular value to the out-of-town talking machine men.

Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

The average dealer expects that when he unpacks a new machine it should run perfectly when he puts on the first record, and seems very much surprised and loud in his condemnation of the particular manufacturer of it, when he finds that the springs jump or it varies in pitch or has some other fault that motors are heir to.

When we buy an automobile or a fine Swiss watch we would not think of accepting them unless the automobile was tried out many times or the watch was timed to the second—so why should we think that a machine, which might possibly have been in its respective packing case for two or three months, knocking around storehouses, freight cars and express wagons, to be absolutely right without first looking it over and readjusting it.

The dealer, by using a little judgment, will save himself a lot of useless trouble by making it a rule to examine every motor in the new machines he unpacks, and I suggest that he follow the little points I am giving, in the order named:

1—Wipe off vaseline from spirals of governor shaft and turntable spindle with cheese cloth.

2—Take small screwdriver and test all screws, particularly the governor bearing screws and the governor gear screw, also the screws holding motor to board.

3—Be sure that all bits of cabinet wood excelsior or other packing material are removed from all parts of the motor, especially the gear teeth.

4—Oil all bearings, gear teeth and governor check leather or felts.

5—Put pure vaseline on spirals and winding gears.

6—Wind up motor and let it run down two or three times—this will distribute the graphite all through the coils of the springs and prevent them jumping.

If these points are followed out with all new machines you will prevent many repetitions of the troubles you have had in the past.

To continue my article in the May issue, in reference to Victor-Victrolas IX, Type F motors, will say that I have had many dealers ask me the cause of the jump or knock in the spring cages in this particular motor.

I can best explain these causes as I have found them by outlining my method of repairing those that have been sent to me for adjustment.

I first examine the springs (by examining, I mean take them out of the cage and clean off old graphite with gasolene), see that they are not cracked in any place, put them back in cage and put in new graphite mixture.

Before putting spring cage caps into place I make sure that they are perfectly straight—not bent so that they press against the spring.

I then see that the tangs on the cage are perfectly straight—sometimes smooth them off with emery cloth and then take winding shaft and emery off any ridges or rough spots where the sleeves of the cage touch it.

Reassembling motor, oiling all parts and putting vaseline on spirals completes the work. Then wind up springs and test. If the little details are followed out and the work done with care and judgment, there is no reason why you should have any trouble with this motor, and I will say that I find it one of the best running motors that I know of, and from a repairman's view, one of the simplest to repair and adjust.

"Mr. A. H. Dodin,

"Care The Talking Machine World,

"New York.

"Dear Sir—On several machines that I have had recently, none of which might be termed standard makes, I have had considerable difficulty in adjusting the speed. I operate the speed regulator as directed, but it does not respond readily. For instance, if I desire to slow down the motor, the regulator does not appear to work until it acts as an absolute brake and stops the machine. Can you give me any advice as to how to adjust the speed regulator to get the best results?—L. W. B."

ANSWER.—It is a very difficult matter to definitely locate your troubles without examining the machine in question. There are so many different styles of speed regulators in use at present on motors, which as you say, are not of standard make, that without knowing the exact method of speed control used it would be foolish for me to try, in this limited space, to describe the troubles which might happen to any or all of them.

Could you let me know the name of machine or the manufacturer of them and I will be pleased to give you further information?—A. H. Dodin.

"Repairs, Talking Machine World, New York,

"Gentlemen—I have read with interest your articles on the lubricating of the spring with graphite. Would appreciate it if you could advise me of the most suitable oil to be used for other parts of the motor, such as the gears, or, if oil is the best substance.—M. M."

ANSWER.—The best oils I can recommend for use on talking machine motors are Wado-Oil, manufactured by Wade & Wade. There are a number of very good oils on the market, suitable for talking machine motors and are used very successfully: the Wado-Oil, manufactured by Wade & Wade, Chicago, and the Victor lubricating oil, put out by the Victor Talking Machine Co., of Camden. These and other suitable oils may be obtained from almost any talking machine dealer.—A. H. Dodin.

D. L. Sinter, Philadelphia, Pa.—Your letter will be answered personally by mail within a few days.—A. H. Dodin.

"Repair Department, The World, New York,

"Gentlemen—I have a machine of foreign make on which the reproducer worked very well when it was new. Recently, however, the reproducer blasts on ordinarily high notes and otherwise proves unsatisfactory. It has not been dropped or otherwise damaged to my knowledge. Will you kindly suggest what may be the trouble with the soundbox?—C. J. S."

ANSWER.—Blasts in a reproducer are caused by several reasons, as follows: the rubber insulators or gaskets become dry and hard, leaving the diaphragm loose in its setting; the screws holding the needle arm to frame work loose, permitting the arm to become loose on its bearing points; the wax which is placed at the point of contact of the needle arm to the diaphragm may become cracked or the screws holding the metal back (or in some cases a face ring is used which presses against the gasket), may not be tight. If you look over all these points carefully, replace gasket if necessary and tighten all screws, I should say that the soundbox will reproduce perfectly.—A. H. Dodin.

PATHE JOBBERS TO MEET JUNE 19

It is understood that the jobbers throughout the country representing the Pathé Frères Phonograph Co., New York, will convene in New York the week of June 19, and hold their first annual convention. A number of important matters will be discussed at this convention, and it is expected that every Pathé jobber will be in attendance.

Carl Noelke, piano and Victor dealer of La Crosse, Wis., has enlarged his quarters through the erection of a two-story addition.

BUFFALO

RAILROAD — EXPRESS — STEAMSHIP

Look at the list of railroads running out of Buffalo; New York Central, West Shore, Lake Shore, Nickel Plate, Wabash, Erie, Pennsylvania, Lackawanna, Grand Trunk, Michigan Central, Lehigh, B. R. & P. and B. & S.

Four express companies will give you a complete service: American, National, Adams & Wells-Fargo.

Boat lines touch a great many cities, on the Lakes, and Andrews' Service can catch any boat on fifteen minutes' notice.

Doesn't it stand to reason that we mean what we say when we remark: Andrews' Victor Service is ***Fast*** and ***Complete.***

ANDREWS

A FACTORY WHERE EFFICIENCY IS THE WATCHWORD

Plant of the Brunswick-Balke-Collender Co., in Dubuque, Ia., Which Is Being Devoted to the Manufacture of Talking Machines, Unusually Well Equipped According to Modern Ideas —Time and Labor Saving Devices Used—Machines in the Making—Interesting Review

CHICAGO, ILL., June 10.—The question that is invariably asked by the trade nowadays when the announcement has been made of a new concern entering the talking machine manufacturing field, is "Will it be able to make deliveries?" There need be little doubt as to the ability in this respect of the Brunswick-Balke-Collender Co.

Peculiar conditions surround the talking machine debut of this great corporation. It might almost be said that this concern came into this line fully equipped. When the company decided to bring out the Brunswick talking machine it was potentially ready. In its well-equipped plants at Muskegon, Mich., and Dubuque, Ia., this company had been making cabinets for other talking machine manufacturers for some time. In fact, although this has not been generally known, quite an amount of installing had been done. Not only had this concern had the collective experience of years of cabinet making, but in charge of the piano case and talking machine cabinet departments was a man who had had years of experience in piano factories and was a thoroughly equipped acoustician as well as an expert case designer. It is the purpose of this article to give some idea of the company's plant at Dubuque, where something like 16,000 Brunswick talking machines are now in progress of construction, and where a great many more will be put in work in the course of a week or two. These instruments will be ready for shipment, in considerable quantities, on August first.

The plant at Dubuque is an unusual one in many ways. It has been possible for the company to do there what it could not do in larger cities, because of the disproportionate cost of land. The factory buildings themselves occupy from eight to ten acres, while the whole plant, including lumber yards, auxiliary buildings and

Where the Covers Are Made

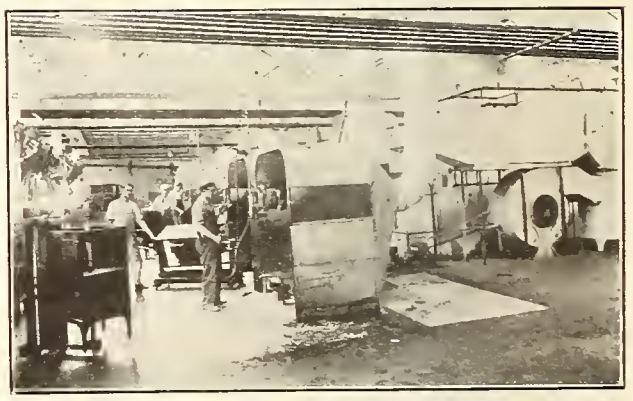
land provided for the purpose of future expansion, covers something like thirty-five acres. There are four-one-story buildings each 800 feet long by something over a 100 feet wide, giving a total space, including auxiliary buildings, of somewhere between 350,000 and 400,000 square feet. The plant is on the main line of the Great Western and connects directly with the Illinois Central, Chicago, Milwaukee & St. Paul and C. B. & Q. railroads. The yards contain at all times at least two and one-half million feet of lumber, giving plenty of time for further weather seasoning before admission to the dry kilns. Speaking liberally, the plant is run by

Two City Blocks of Phonograph Cabinets at Dubuque factory

electric power and compressed air. In the big power house at the north end of the plant there are two immense 400 horsepower boilers, hydraulic equipment for running the veneer presses and an immense air compressor for supplying the varnish sprayers, etc. There is also an isolated electric lighting plant. The machines throughout the plant are run by individual motors, supplied by power current from the city plant. The plant has its own fire protection and its own fire company organized among the employes, and an artesian well 1,209 feet deep, which furnishes an excellent fluid for quenching internal as well as external fires. Adjoining the power plant is a completely equipped machine shop for repairing tools, die making and the like. The big dry kilns, which are also located at this north end of the plant have a capacity of 250,000 feet of lumber, which is brought into the kilns from the yards on transfer trucks. The kilns are of the very latest and most approved construction and there is a remarkable apparatus for testing the lumber for moisture. If the test shows a greater percentage of moisture than that approved as a result of experience, the lumber is put back in the kilns.

One of the most interesting places of the whole plant is the immense veneer store room. When The World man visited it, he was told that there were something like two million feet of mahogany, 500,000 feet of quarter sawed oak, a couple of million feet of poplar, besides a few other little items which are forgotten.

From the dry kilns the lumber is run on trucks across other trucks, which are in effect clever, movable pontoon bridges, into the mill room. It would take much more space that is here available to give the slightest idea of the superb equipment of this most important department of the plant. It is hardly necessary to state that a concern like the Brunswick-Balke-Collender Co. does nothing in a slipshod way. If to-day, John Ehrenpreis, the efficient manager of the Dubuque plant, looks over his machinery and decides that every machine constitutes the last word in the perform-



A Section of the Varnish Department

ance of its particular function, well and good; but if to-morrow he is shown something new and which impresses him as being better, it is a ten to one shot that an order is immediately placed for the new and better.

There are automatic lathes that are wonderful.

The dust collecting system the company believes to be the most perfect yet devised. It carries

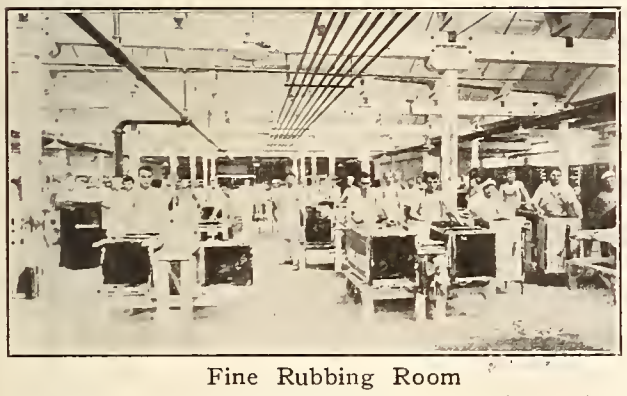
Martin Nystrom

dust away from possible contact with the lungs of the workers and prevents shavings and debris from littering the floor. Every kind of saw for doing every kind of sawing is in evidence and there is a big shop just full of automatic saw-

Veneering Department

filing machines. A dull saw is the worst criminal known around a B.-B.-C. plant.

There are automatic gluing machines of special design and which are said to be the largest on record. There is a special machine for



Fine Rubbing Room

clamping dove-tail glue joints, panel gluers, and a new "glue printing" device that stipples just the right amount of glue on without any slop-over. The type of hydraulic veneer presses used in this plant are a study in themselves. After the work has been veneered and glued, up it goes into the humidifier kiln equipped with an automatic device which controls the exact amount of moisture permitted.

In the great assembling room, as elsewhere in the plant, the most perfect system prevails. "Doubling back," with its consequent waste of labor and increased cost, is an error which all the skill of the great corps of mechanical engineers employed by the Brunswick-Balke-Collender Co. must constantly work to avoid.

The lay-out of the Dubuque plant in one-story buildings exclusively promotes this desired ideal to the highest possible degree.

With these few remarks about the avoidance of the "doubling back" error cometh the finishing departments. After the staining and filling, everything, which means the shellac and four varnish coats, is done by spraying. For every one of these processes there is a separate set of spraying booths and for every varnish coat a drying room. For every finishing process there is a separate crew. Certainly no "doubling back" here. Great machines are provided for the coarse rubbing, but the fine rubbing is done by hand rubbers. At the completion of each process there is an exacting inspection. After a visit to the trimming department, where the hardware and hinges are put on, the oilers take charge. Here the most minute defect in finishing is corrected. But still a final inspection is made.

The installation room, where the tone arms, sound boxes, motors, turn tables, etc., are put in place, is 100 feet by 200 feet in size and in the center is a large soundproof testing room, where every machine is played and goes through a rigid examination to ascertain if its musical education is complete and it is entitled to a diploma from the tone inspector.

Contiguous to the installation room is the experimental laboratory.

The extensive shipping department is in the extreme south end of the plant where the finished product is loaded direct onto the cars just as the lumber and other supplies are unloaded at the extreme north end of the plant. The progress from raw material to finished product is continuous and unbroken.

There is one feature of the plant that is undesirable from the viewpoint of the newspaper man. The saw-tooth roofing—just one big slanting skylight after another—makes it impossible to get a photograph of the buildings that does not make them look like a succession of lumber piles. But when you see the buildings themselves—ah, that is different. They are really beautiful and they look light and airy.

All sorts of comforts are provided for the employes. There are half a dozen billiard tables, together with card and checker tables—no charge either. Every noon this "department" is crowded. Furthermore, there is a spacious lunch room, where a big round wholesome, satisfying meal, soup, meat, vegetables and dessert is served for fifteen cents.

The B.-B.-C. plant is the pride of the thriving city of 40,000 people, and Fridolin J. Herr, the well-known Dubuque architect who designed it and superintended its construction, has received important commissions because of the fame of this masterpiece in industrial construction. The entire plant, it should be noted, is devoted to the construction of talking machines and cabinets.

Martin Nystrom, the manager of the phonograph department of the Brunswick-Balke-Collender Co., has been connected with the company for eight years. Prior to that he was superintendent of one of the notable piano plants of the country, a position he won after long service in all branches of piano manufacture.

His skill as a case designer attracted the attention of the Brunswick-Balke-Collender Co. and when this concern entered the field of piano case manufacturing he was put in charge of that department. But he has not forgotten his practical knowledge of acoustics gained in his years of piano building, and for several years he has been experimenting in a quiet way with the view of ultimately producing talking machines. He found the Brunswick-Balke-Collender Co. quick to accept his viewpoint and the remarkable resources of the big concern were placed at his disposal. Mr. Nystrom divides each week about equally between the Dubuque plant, the piano case plant at Muskegon, where talking machines will also be made, and the general offices in Chicago. He has the hearty co-operation at Dubuque of Mr. Ehrenpreis, who took charge of the plant there on its construction a few years ago, going from Chicago, where he had been in charge of one of the company's factories for years.

The various Brunswick phonograph models can now be inspected at the company's warerooms at 629 South Wabash avenue, this city. They exhibit a remarkable variety of case designs and constructional features, which evidently make a strong appeal to dealers who have inspected them.

DINNER TO HAYWARD CLEVELAND

Columbia Graphophone Co. Staff Gives Dinner to Member of Auditing Department at Keen's Chop House—Those Present at the Event

Hayward Cleveland, of the Columbia Graphophone Co., New York, was the guest of honor at a dinner held on June 1 at Keen's Chop House, New York. This dinner was given by the members of the Columbia Co.'s staffs in

Hayward Cleveland

the different sections of the city, many of whom had been associated with Mr. Cleveland for a number of years.

For over eighteen years Mr. Cleveland had been a member of the Columbia Graphophone Co.'s retail selling division, and during that time had not only achieved success from a merchandising standpoint, but had also aided materially in making successful talking machine men of the younger members of the company's staffs.

Mr. Cleveland is now a member of the auditing department, with headquarters at the company's executive offices in the Woolworth Building, and Thursday's dinner was in the nature of a testimonial from his former associates. The dinner was a success from start to finish, and telegrams of felicitation were received by Mr. Cleveland from members of the company's staff in different sections of the country, who had been associated with Mr. Cleveland in the past.

A number of informal addresses were made at the dinner, and there was a spirit of good cheer which evidenced the high esteem in which Mr. Cleveland is held by his co-workers. As a matter of fact Mr. Cleveland's admirers are scattered around the globe, for several of the men who worked under his direction now occupy very responsible positions at foreign points. Those at the dinner were Frederic E. Goodwin, J. C. Ray, L. U. Shapter, Walter Forbush, D. J. Fountain, Harry Foster, Courtland Shaw, Wm. Button, Donald Stewart, Clarence Seward, Harold Tuers, Philip Mardillo, George Stevens, Robert Trowsdale, Prescott and Horace Cleveland, John Affitica, A. Bazin, Walter Brunner, John Conway, Louis Miller, Walter Hard, J. A. Armstrong. Arthur Fields, of the Columbia recording staff rendered a number of vocal selections, accompanied by Mr. Franklin.

PATHE DISTRIBUTERS IN ST. PAUL

The Pathé Frères Phonograph Co., New York, announced this week the consummation of arrangements whereby G. Sommers & Co., of St. Paul, Minn., will become Pathé distributers in the Northwest. This concern, which is one of the most successful merchandising houses in its territory, has perfected plans for an aggressive Pathé campaign and will have a staff of more than twenty men on the road at all times.

K. R. MOSES SALES MANAGER

Of the Amberola Division of Thos. A. Edison, Inc., Orange, N. J.

K. R. Moses, well known in the phonograph industry, was recently appointed sales manager of the Amberola division of Thos. A. Edison, Inc., Orange, N. J. A close student of industrial and economic conditions, Mr. Moses has paid particular attention to the development of efficient merchandising, and in his new capacity, the Amberola division is already showing signs of a good growth. This news is rather startling to many people who do not realize that cylinder records and machines are in demand in many sections of the country.

K. R. Moses

The Wichita Piano Exchange, of 120 South Main street, Wichita, Kan., will move on June 15 to 153 North Main street, and is featuring a removal sale of pianos, talking machines and other musical goods.

THE PATHE LINE IN KANSAS CITY

E. E. Trower Music Co., of St. Joseph, Mo., Opens Quarters in That City and Will Handle Pathephones, Both Wholesale and Retail

KANSAS CITY, Mo., June 5.—Kansas City's "Music Row" is to have an addition. Fourteen years of music experience have brought E. E. Trower from St. Joseph to Kansas City, where he has been "snooping" round for the last three months for a suitable location for the E. E. Trower Music Co. He finally selected 913 Grand avenue, in "Music Row." The music company of St. Joseph was both wholesale and retail; in Kansas City it will have the added distinction of being the sole agent for the Pathé phonographs. Mr. Trower has been a Pathé jobber for the district of the Southwest since September, 1915.

The room Mr. Trower has selected is one of the best on Grand avenue, and being large, will afford space for a concert room in the front and booths in the back. The booths will be of glass and white enameled woodwork. William C. Junkins will have charge of the retail department; J. Roy Spence will have the management of the record department.

Mr. Trower is going to attend a meeting of all the Pathé jobbers of the United States, which will be held in New York, June 17.

COLUMBIA LITERATURE

New Booklet Issued Describing Complete Grafonola Line

The advertising department of the Columbia Graphophone Co. has just prepared for distribution a neat and attractive Grafonola booklet which can be used to excellent advantage in circular and follow-up work. This booklet contains the complete line of Grafonolas now on the market, together with a brief description. The machines are shown clearly and distinctly, and as the booklet was arranged with convenience of handling as the prime consideration, prospective purchasers cannot fail to be interested in its contents. The Grafonolas illustrated and described in this publication are Nos. 15, 25, 35, 50, 75, 85, 100, 150, 200, 125E, 175E, 225E and 350. There are also shown two types of horn machines, Grafonolas 25H and 60H. The Columbia Grafonola line is now designated so that the name of the machine indicates the price, and it has been found that this method is satisfactory in every way.

MEMBER OF ADVISORY COMMITTEE

J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York Victor distributer, has been appointed a member of the Advisory Committee of the American Fair Trade League, in recognition of the indefatigable efforts he has been making to assist the league in its work in behalf of the Stephens bill.

NEW CONCERN IN KANSAS CITY

KANSAS CITY, Mo., June 5.—When the Architects & Engineers' Supply Co., at present situated at 923 Walnut street, changes its quarters to a place on Grand avenue, this city will have added another talking machine dealer to its list. James T. Clenny, president and treasurer of the Architects & Engineers' Supply Co. has announced that it will be sole jobber and retail agent for the Playerphone in this territory. The firm will operate under the name of the Playerphone Co., and will handle, besides the Playerphone, records and talking machine supplies.

TALKING MACHINE EXPORTS

The Figures for March Presented—Exports Show Increase for the Month

WASHINGTON, D. C., June 5.—In the summary of the exports and imports of the commerce of the United States for the month of March, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

Talking machines to the number of 3,107, valued at $88,416, were exported for March, 1916, as compared with 1,600 talking machines, valued at $47,334, sent abroad in the same month of 1915. The total exports of records and supplies for March were valued at $98,231, as compared with $55,576 in March, 1915. For the nine months 28,247 talking machines were exported, valued at $836,946, and records and supplies valued at $664,269 were sent abroad for that period.

TALKING MACHINE LEAGUE NOTES

N. Y. Talking Machine Co. Team Sends the G. T. Williams Nine Down to Defeat

The baseball nine representing the New York Talking Machine Co., Victor distributer, played its first game on Saturday and defeated the team wearing the colors of the G. T. Williams Co., Brooklyn, N. Y., Victor distributer. The game was marked by heavy hitting by the winners, and some interesting batting averages were achieved. Brickley and H. Miller pitched for the New York T. M. Co., with W. Miller on the receiving end. A number of games with talking machine houses have been arranged for the next few months, and H. Miller is in charge.

PROMOTION FOR EDMUND F. SAUSE

Leaves Columbia Export Department to Become Associated with W. C. Fuhri

W. C. Fuhri, United States manager of the Columbia Graphophone Co., New York, sent out this week to the members of the Columbia service the following announcement:

"Edmund F. Sause, who has just started his twelfth year in the Columbia service, will be associated with me beginning June 1.

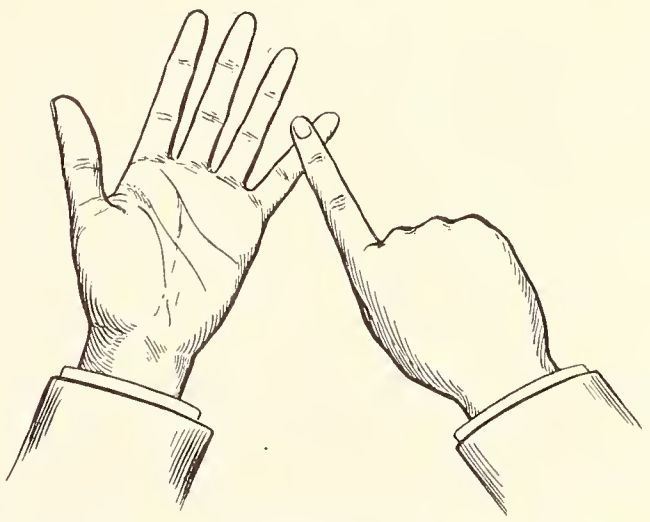
E. F. Sause

"Mr. Sause leaves the export department, where he has been uniformly successful and this in spite of the peculiarly difficult and adverse general conditions existing in practically all of the foreign countries.

"His many friends will be gratified that his new work will give him a larger and more immediately productive field of usefulness. I know that you will extend to Mr. Sause the same spirit of friendly co-operation that has always existed in the Columbia Co., and which has contributed so greatly to its success."

Articles of incorporation were filed last week with the Secretary of State at Albany for the Universal Talking Machine Co., of New York. The concern will manufacture and sell talking machines for domestic and export trade. Incorporators are Wm. H. Dean, Walter B. Craighead and Jas. Bloomfield.

Here's the Point!



Send us your orders for Victrolas now

During the coming months you should stock up for the busy season.

It is not true that opportunity knocks at every man's door but once. At least not in the case of the Victor dealer. It knocks at his door this time every year.

In fact it's there NOW.

Let us help you take advantage of it on this occasion.

EDISON PHONOGRAPH AS SERENADER

Unique Publicity Stunt for the Summer Put Into Force by Loveman, Joseph & Loeb, Birmingham, Ala.—Busy Every Night

Messrs. Loveman, Joseph & Loeb, Edison dealers at Birmingham, Ala., have adopted a most unique and timely method of demonstrating the new Edison during the summer months. Summer is the time for serenading and this enterprising firm is taking full advantage of that fact by serenading the music lovers of Birmingham a la Edison.

"It's simply the carrying out of an idea born and bred in the head of Leo Loeb, of Loveman, Joseph & Loeb, to make the slumbers of Birmingham people sweeter, and to add pleasure to the hours of families gathered on the front verandas for the summer evenings," said the Birmingham News in a recent issue. "The sweet music, made possible by Thomas A. Edison, will be wafted on the summer breezes."

Messrs. Loveman, Joseph & Loeb call this innovation their "Serenader." It is a new Edison mounted on the chassis of an electric runabout, as can be noted in the accompanying illustration. Dealers should find this plan worthy of consideration.

Loveman, Joseph & Loeb's Twentieth Century Serenader

THORPE ELECTRIC MOTORS
FOR TALKING MACHINES (Operates on all currents)
WALTER THORE, Manufacturer, 29 West 34th Street, NEW YORK CITY

SONORA INTRODUCES NEW MODELS

New models are announced by the Sonora Phonograph Corp, and the line is now remarkably complete as to price range and machine style. The newcomers are "Melodie," $45; "Barcarolle," $60, and "Laureate," $190.

The names and prices of the group of models now comprising the Sonora line are: "Melodie," $45; "Barcarolle," $60; "Troubadour," $75; "Imperial," $100; "Baby Grand," $150; "Elite," $175; "Laureate," $190; "Grand," $225; "Invincible," $350; "Supreme," $1,000.

A. E. GARMAIZE BECOMES MANAGER

A. E. Garmaize has been appointed manager of the export department of the Columbia Graphophone Co., New York, succeeding Edmund F. Sause, who has been appointed to an important executive post in the United States division. Mr. Garmaize is ideally fitted for his new position, as he has been associated with the Columbia Co.'s export department for six and one-half years, and is thoroughly familiar with every phase of export requirements. He has visited all the South American countries, and has also made frequent trips to Cuba in the interests of Columbia export activities. He has won the friendship and esteem of Columbia dealers throughout the world, and will have unlimited opportunities to extend Columbia dealers maximum service and co-operation.

DECISION IN INTERESTING SUIT

U. S. District Court Holds, in Action of Columbia Graphophone Co., Against Gimbel Bros., That MacDonald Patent Was Not Infringed by Defendants in Selling Certain Records, and Dismisses Complaint

Judge Thomas, of the United States District Court, New York, handed down a decision last week in the case of the American Graphophone Co. vs. Gimbel Bros., New York, which had been argued some time ago. The bill of complaint was dismissed on the grounds that Gimbel Bros. had not infringed the MacDonald Graphophone grand patent involved in this suit, although he did not attack the validity of this patent, which formed the basis of the suit.

Gimbel Bros. had bought and offered for sale Pathé, Rex and Keen-o-phone records, which the American Graphophone Co. contended infringed the MacDonald graphophone grand patent and accordingly entered suit.

Judge Thomas in his decision referred to the MacDonald graphophone grand patent as covering both process and product, and based his decision primarily on the process division of the patent claims. Referring to the non-infringement of the patent in this respect, Judge Thomas said in part:

"The defendant purchased its records in the open market ready made and without any knowledge on its part as to how they were made, and no evidence has been introduced, other than a claimed inference or conjecture as to the complete process by which these records were made, although there is some evidence that the different records were made by different operations; either directly or indirectly with the manufacture of the records.

"And this brings us to the substantial question involved—has the defendant infringed the claims in controversy by purchasing, in the open market, records ready made without knowledge on its part as to how they were made, and without any charge or pretense that the defendant has been guilty of any act of contributory infringement? Claim 4 is, in express terms, for a process or method. A process is a mode of treatment of certain materials to produce a given result.

"But a process patent is not infringed by selling the product, and the vendee of a product which had been made in infringement of a patented process cannot be held liable to the patentee, or in any extent to be an infringer. Similarity or even identity in appearance of a product is not sufficient, and the charge of infringement can only be sustained by certain proof that the defendant used the process of the patent. The process and the product are but one, and it may well be assumed that the product results from the use of the process described in the patent, and that the patent is not one which may be produced in any other way. A case directly in point is Downes vs. Teter-Heany Development Co., decided by the Circuit Court of Appeals for the Third Circuit, in which it was distinctly held that where a patent includes claims for a process and also for the product of such process, the latter are to be construed in connection with, and are limited in scope by the former, and are not infringed unless the process claims are also infringed."

A number of minor patents were also involved in a second American Graphophone Co. vs. Gimbel Bros. suit decided by Judge Thomas. These included the Phillips patent for a record holder and the Sheble needle box patent, both of which were held invalid. Judge Thomas also held that no infringement was shown of the Emerson adjustable sound box patent, the Hawthorne phonograph patent, the Mac Donald diaphragm, the Kraemer adjustable sound box and the MacDonald swinging tone arm patents.

H. M. HULL MARRIED

Miss Ruby Spaulding, Well Known in Talking Machine Circles, Married to Popular Traveling Representative of the Aeolian-Vocalion

A real romance of the talking machine industry saw its finale Thursday of last week, when H. M. Hull, traveling representative for the Vocalion division of the Aeolian Co., New York,

H. M. Hull

was married to Miss Ruby Spaulding, well known in local talking machine circles. The ceremony was held at St. Bartholomew's Church, Forty-fourth street and Madison avenue, New York, and was attended by a large number of relatives and friends. Miss Peri Spaulding, of the Aeolian Co.'s retail talking machine department, was a bridesmaid, and Allen Killifer, coach at Columbia University, was best man. The ceremony was performed by Dr. George W. Hull, of Millersville, Pa., father of the groom.

H. M. Hull has been associated with the Aeolian Co. for the past nine years and prior to joining the traveling staff of the Aeolian-Vocalion division was a member of the traveling force of the wholesale music roll department. He is one of the most popular members of the wholesale trade, and has the friendship of dealers from coast to coast. Mr. Hull has achieved signal success with the Aeolian-Vocalion line, and has established a number of important agencies since the first of the year.

Miss Spaulding was for a number of years manager of the talking machine department at Aeolian Hall, and more recently was associated with Ormes on Fifth avenue. She numbers among her friends members of the talking machine industry in all sections of the country and is also popular in the local piano trade.

USING TRAILER DELIVERY

Dealers Find the Trailers Made by the DeKalb Wagon Co., Useful for Delivery Purposes

DeKalb, Ill., June 8.—Another business in which is reflected the growing prosperity of the talking machine trade, is that of the DeKalb Wagon Co., of this city, makers of trailers for delivery purposes.

"We are feeling strongly the growth of the talking machine industry," said E. S. Hunt, treasurer and manager of the company, in a recent interview. "For a long time we have been supplying piano dealers with trailers whereby they can hitch the same on to their automobiles and make deliveries, but about a year ago inquiries as to the capacity of our trailers for the delivery of talking machines began coming in and since that time our business in this direction has been decidedly on the increase. We are now making two styles suitable for talking machine deliveries, each of which will hold three Victrola XVI's or similar machines. The advantage of our system is quite apparent, as the dealer can use the same automobile which he uses for soliciting business for delivering the machines sold. The trailer is so light and serviceable that it can be taken almost anywhere.

"Our Style B has a capacity that is slightly increased over our Style A, but either one is completely serviceable for talking machine dealers.

"The prices are $40 and $45 except where roller bearing axle is specified, charges being $10 and $12.50 additional.

"Dealers who have used our products speak highly of them."

INCREASE THE PRICE

C. M. Mayers, sales manager of the Castle Phonograph Co., New York, announced this week that the retail price of the company's Model "E" has been increased from $25 to $30. This was found necessary because of the tremendous advance in the costs of raw material and labor. Mr. Mayer states that this model has achieved unusual success in the short while on the market, and is proving a ready seller with the dealers. Mr. Mayers recently returned from a successful Western trip.

PATHE JOBBERS AT HEADQUARTERS

Energetic Wholesale Representatives of Pathé Frères Phonograph Co. Keep in Close Touch with the Various Departments

During the past few weeks a number of the prominent jobbers handling the products of the Pathé Frères Phonograph Co., New York, have visited the company's executive offices to

H. F. Ricca, Jesse Rosenstein, H. J. Brennen

confer with the sales department regarding the shipment of merchandise, introduction of new styles, etc. These jobbers have all been enthusiastic in their predictions for the business outlook for the rest of the year, stating that their Pathé business to date has far exceeded all expectations.

A group of these live-wire jobbers who visited headquarters recently is shown in the accompanying illustration. They include Jesse Rosenstein, National Piano Co., Baltimore, Md.; H. J. Brennen, M. H. Pickering & Co., Pittsburgh, Pa., and H. F. Ricca, of the Peerless Phonograph Co., New York. These callers spent some time listening to the new Pathé records and expressed their admiration of the records now being produced.

EDISON TRADE IN NEWARK, N. J.

NEWARK, N. J., June 5.—The Phonograph Shop, at 861 Broad street, this city, has been doing an exceptionally good business since its opening. Charles O'Conor Sloane, president of the company, reports that the Edison Diamond Disc phonograph recitals held each afternoon have proven very successful in developing business. The building of the company, specially designed to meet the demands of the business, permits of the holding of the recitals with a maximum of comfort and convenience.

WORLD WIDELY AND WELL READ

In enclosing a subscription to The Talking Machine World, F. W. Matthews, of Hollywood, Cal., formerly connected with recording laboratories in the East, says: "I want to take this occasion to thank you for the wonderful service you gave in the matter of the want ad you inserted in recent issues of The World. The answers were many and of inestimable value to me, and prove how widely and well read your journal is."

A PROGRESSIVE TACOMA HOUSE

Is That Opened by the Hopper-Kelly Co. in the Temple of Music Building

TACOMA, WASH., June 3.—Handling a complete line of standard makes of talking machines and planning free weekly concerts, and an unusually fine service department for the handling and distributing of records, the Hopper-Kelly Co. has opened a new store in the Temple of Music Building, 945 Broadway. The store has been completely remodeled and is one of the most attractive musical centers in Tacoma.

C. H. Hopper and E. P. Kelly are the partners associated in the enterprise. The company has one store in Seattle and the new quarters in Tacoma are being operated as an entirely separate business. The firm carries a complete stock of Victor, Columbia and Edison products.

It is in their service department that the Hopper-Kelly Co. plans to excel. An abundant stock of records of all makes is carried and the firm has a regular service by which the latest records are received in Tacoma at the earliest possible moment.

The store is fitted up with five record rooms and three salesrooms. The interior of the store is furnished tastefully with handsome rugs and draperies, the general color scheme being a handsome shade of gray and the decorations being most artistic.

Among the features of the new store are the free public concerts every Saturday night, which are held in the recital hall of the Temple of Music Building. At these concerts music lovers have an opportunity to enjoy the latest and highest class music as rendered by the leading artists on the different phonographs.

The formal opening of the store was in April and a splendid celebration was held at that time.

KILLEA GETS HONORABLE MENTION

ALBANY, N. Y., May 29.—William J. Killea, Victor dealer at 74 South Pearl street, received honorable mention for original advertising in the "Voice of the Victor" this month. At the time of the Villa raid on Columbus, N. M., he wrote an advertisement in the form of a news item, headed "They're on Their Way to Mexico," which is the title of one of the Victor records. The story described the record.

LIST OF PATRIOTIC RECORDS

Always endeavoring to assist its dealers in developing new fields for record sales, and especially at opportune times, the Victor Co. advised its representatives this week of the compilation of a special list of Victor records, suitable for Fourth of July presentation. This list is made up of selections already to be found in the regular catalog, but the company is preparing a special hanger and supplement to be used in advertising these particular selections.

M. B. Fergusson has opened a talking machine store at 2301 Jefferson avenue, Newport, Va.

THE TRADE IN NEW YORK CITY AND VICINITY

The most noteworthy feature of the local talking machine trade in May was the excellent record business reported by the majority of dealers. For the past few months manufacturers and distributers have told their dealers that it would be to their advantage to pay closer attention to the development of their record department; especially in view of the fact that the shortage of product has been concentrated on machines. The dealers as a whole have recognized the wisdom of this advice, and the results of their efforts are indicated in the record sales total for the month of May, which shows a substantial increase as compared with last year.

The month of May was generally satisfactory, all factors of the industry showing a large gain over 1915. The shortage of machines has abated somewhat although the demand for the $75 and $100 models is still far in advance of the supply. There is also a scarcity of the moderate priced machines, due, of course, to the start of the summer season, which brings with it a call for machines for camping and general vacation purposes.

Working in Behalf of Stephens Bill

The local trade is evincing considerable interest in the passage of the Stephens bill which will permit price fixing of patented articles under specified conditions. The talking machine dealers recognize that this bill has the support of the most progressive and successful trade organizations in the country, and also realize that the wonderful success of the talking machine industry may be attributed, in a large degree, to the one-price policies adopted and sponsored by the leading talking machine companies. The Talking Machine Men, the local dealers' organization, has been an earnest supporter of the Stephens bill since the time it was first introduced in Congress, and Henry Mielke, secretary of this association, visited Washington on May 30 to attend the hearings before the House Interstate and Foreign Commerce Committee on the bill.

A number of out-of-town jobbers were also present at these hearings, and Mr. Mielke was well pleased with the fact that the advocates of this measure presented conclusive arguments regarding its merits.

Getting Summer Business

With the advent of warm weather there has been, of course, a slight falling off in the general talking machine business, but comparatively speaking, this falling off has been far less than in other retail lines. Many of the local dealers have perfected aggressive, far-reaching campaigns, to garner all possible summer trade in their respective localities, and there is no doubt but that these campaigns will be productive of profitable results. This is particularly true in connection with record sales, as the summer season stimulates a demand for various classes of records that are particularly adaptable for warm weather months.

Efficiency Department's Activities

The efficiency department of the New York Talking Machine Co., Victor distributer, is continuing its excellent work and is turning out dealer helps which cannot fail to prove valuable, if used consistently. The company is issuing this month a very attractive window card featuring the Victor record, "Shades of Night," as sung by the Sterling Trio. This record is also used in the special electro service which was introduced a few months ago, and which has achieved remarkable success. As indicative of the popularity of the New York Talking Machine Co.'s dealer aids it is interesting to note that the special supplement envelope service which has been used for the past year has shown an increase of 100 per cent. since the issuance of the March supplement. Referring to general business, the company points to the fact that it has received many letters from Victor dealers in the East, stating that they are contemplating increasing their facilities in order to handle fall trade. This speaks volumes for the prosperity and stability of Victor business.

Collections in Splendid Shape

"The month of May was by far the best May in our history," said George A. Baker, assistant manager of the Columbia Graphophone Co., 83 Chambers street, New York. "A source of considerable gratification to all of us was the fact that record sales were ahead of April, and machine sales would have also shown a gain over that month, if it were not for the shortage of stock. As a rule May is considerably behind April in the total business closed, and we are therefore well pleased with the net results for this May. Collections last month were far ahead of April, indicating the prosperity and strength of the individual dealer's business. There is no apparent let-up in the machine and record demand, but on the contrary we are receiving large orders for July and August delivery."

Artistic New "Columbia" Store

The accompanying illustration will give an idea of the beauty of the new store opened a short while ago by Mrs. E. Byrne DeWitt, at 1398 Third avenue, New York. This store is

DeWitt's Attractive Room

handling the Columbia line exclusively and every effort will be made to give patrons maximum service and co-operation in the selection of machines and records.

Aggressive Bronx Dealer

E. H. Smith, the well-known Victor dealer in the Bronx is now completely settled in his new store at 163d street and Southern boulevard. This store is one of the finest Victor establishments above the Harlem River and Mr. Smith's lengthy experience in the talking machine business has enabled him to build up a profitable business through the use of efficient methods coupled with excellent service.

New Cabinet a Success

Landay Bros., New York, Victor distributers, are achieving gratifying success with the new cabinet which they introduced a few weeks ago. This cabinet is designed to fit the No. IX Victrola, and Landay Bros. state that their Victor dealers have found it a source of complete satisfaction to themselves and also to their customers.

Unusual Window Displays Attract Attention

The Edison Shop, 473 Fifth avenue, New York (controlled by the Phonograph Corporation of Manhattan), has been presenting a series of unusual window displays which have won commendation from many passers-by along Piano Row. This week's window was very attractively arranged, one of the features being a handsomely colored display card which invited the public to visit the store's recital hall and hear the duet, "Whispering Hope," sung by Marie Rappold and Christine Miller. This card brought many music lovers to the auditorium in the Edison Shop, and also resulted in numerous sales of this popular Edison Diamond Disc record. Among the machines shown in this window was the Chippendale, official laboratory model, and the Edison Diamond Disc $100 and $200 models. In a chat with The World, Raymond Duncan, of the Edison Shop, commented upon the excellence of the Edison Diamond Disc records now being received from the factory, stating that surface noises have been entirely eliminated in the records now being placed on the market.

TRADE IN NEW YORK AND VICINITY

(*Continued from page 72*)

New Uptown Pathé Dealer

One of the many recent additions to the lists of Pathé dealers in local territory is the Secord Piano Co., which opened warerooms last week at 3493 Broadway, corner of 143d street. N. A. Secord, head of this concern, was formerly manager of the piano department of John Wanamaker, New York, and is one of the best known piano men in the country. His new store is attractively furnished and decorated, and considerable space in the warerooms will be devoted to the presentation of the Pathé product. This store is located in the heart of the uptown residential district and the Secord Piano Co. will doubtless build up a profitable Pathé business.

Way Ahead of Last Year

G. T. Williams, president of the G. T. Williams Co., Brooklyn, N. Y., Victor distributer, referring to general conditions, said: "May was a very satisfactory month, showing a nice increase over last year. Our dealers seem to be optimistic regarding the summer outlook and tell us that their business is keeping up very well indeed for this time of the year.

Leases Adjoining Store

The Weber Talking Machine Co., which recently opened an exclusive Columbia store at 281 Broadway, Brooklyn, N. Y., has found it necessary to lease the adjoining store in order to handle the business in this locality. The company is carrying a complete stock of Columbia graphophones and records and in its new home will have ample facilities for handling its fast growing trade.

Closing High Grade Business

Hardman, Peck & Co., 433 Fifth avenue, New York, one of the leading piano houses in the city, has been closing a very fine Edison Diamond Disc business. This company caters to a high-class trade, which appreciates the musical quality of the Edison Diamond Disc product, especially the new records which are now being turned out by the Edison factory.

Consistent Advertising Campaign

Henry B. Pye & Co., which has been handling the Pathé line for some time past, is devoting a good-sized portion of their advertising in the local newspapers to this department. They call attention to the many distinctive qualities of the Pathephone and emphasize the fact that the Pathé disc library embodies every class of music, including recordings by many world-famous artists. This concern is one of the leading furniture houses in the Bronx and has an extensive neighborhood clientele.

EDISON IN PREPAREDNESS PARADE

A feature of the Citizens' Preparedness Parade that was held in New York quite recently, which attracted particular attention, was the appearance among the marchers of Thomas A. Edison, who paraded over the entire route at the head of the Naval Consulting Board, of which he is chairman. Mr. Edison, although in his sixty-ninth year, marched with surprising vigor and was greeted enthusiastically by the crowds throughout the line of march.

TALKING MACHINE MEN, WHO AM I?

I am more powerful than the combined armies of the world.

I am more deadly than bullets, and have wrecked more homes than the mightiest of siege guns.

I steal in the United States alone over $300,000,000 each year.

I spare no one, and find my victims among the rich and poor alike; the young and the old; the strong and the weak; widows and orphans know me.

I massacre thousands upon thousands of wage-earners in a year.

I lurk in unseen places, and do most of my work silently. You are warned against me, but you heed not.

I am relentless. I am everywhere; in the home, on the street, in the factory, at railroad crossings and on the sea.

I bring sickness, degradation and death, and yet few seek to avoid me.

I destroy, crush and maim. I give nothing, but take all.

I am your worst enemy.

I am Carelessness.

ONE ON US

A contribution from our subscription department: "Please discontinue The Talking Machine World. I find no fault with the magazine, which I greatly admire for its constructive, upbuilding policy in aiding the trade, but the fact is I am no longer in the talking machine business and besides I'm married."

The American Talking Film Corp., manufacturer of motion picture talking machines, was incorporated recently with a capitalization of $2,500 by J. J. Comer, Walter I. Patton and H. P. and A. J. Elliott, all of whom are residents of Chicago, Ill.

There is quality in Boston Albums. Each one is made in one piece and without seams. No glue or paste used. Envelopes are locked in a metal back, and cannot sag. Every special feature patent and cannot be found in any other album.

LOOK FOR ACTIVE SUMMER TRADE

Cincinnatians Are Buying Talking Machines and Records in Good Volume—Leading Jobbers Tell of Conditions Which Are Satisfactory Despite Unevenness in Retail Field

CINCINNATI, O., June 4.—No high spots were touched by the talking machine trade during the past thirty days. The situation was inclined to be a little quiet, which is the general predicament of all lines in the Middle West just now. The best illustration, showing what the people are doing with their money, is to be found among the building associations. Their treasuries are literally swamped with coin and the officers are unable to find places to invest it.

Manager Dittrich, of the talking machine department of the Rudolph Wurlitzer Co., summarizes the Victor situation as follows:

"All signs point to an extremely active summer, to a record-breaking fall and a holiday demand that will exceed anything ever thought possible in the past. Most dealers have already placed orders for their requirements in Victrolas for the balance of the year, and it is of great importance that dealers who have not already done so to place their orders immediately for their future requirements. Advance orders this year are more than double what they were last year, and it does not take a very far-sighted dealer to foresee the inevitable result of such a condition. Every mail is bringing in advance orders, and as there is a limit to the output of the factory, the inevitable must happen in the case of those dealers who do not anticipate their requirements.

"Record business continues active, and orders show that dealers everywhere are renewing and increasing their stock in evident anticipation of a most active summer demand. A number of orders for record demonstration booths have been received during the last thirty days, indicating that the short breathing spell given dealers by the slight slackening of trade, incidental to the hot weather, has enabled them for the first time to take stock of the situation and realize their shortcomings.

"We are preparing to meet the situation with vastly increased facilities, and we know that we do not over-estimate the requirements of our dealers."

From a comparative standpoint the Vocalion department of the Aeolian Co. exceeded last year's May business, which, in a way, is a gratifying method of looking at the situation. The month was a fairly busy one. The manager, Charles L. Byers, left Friday night for Atlanta to visit his father, who is seriously ill.

R. J. Whelen, local manager of the Columbia Graphophone Co., says: "Business is good and we are well pleased with the May totals, as they are far in excess of last year's totals for May. There was some decrease in the retail business during the fore part of the month, but the latter part made up for that. Wholesale business keeps up remarkably and the demand for our machines seems to be greater than ever before in our history." He further stated that the traveling men were back on the job and report business good all along the line. "Machines are now coming through from the factory and we believe when the new factory is in working order all orders will be filled promptly."

S. H. Nichols, district manager of the Columbia Graphophone Co., spent a day in Cincinnati going over the fall campaign and getting the traveling men started out after fall orders.

The new six-story home of the Starr phonograph may be ready for occupancy within another month.

The Knabe Crystola phonograph, which now includes a $200 instrument, is being handled by five houses in this city and Covington.

Louis Ahaus, one of the original Victor salesmen about Cincinnati, who had charge of the talking machine department of the Lyric piano Co., is now with the Rudolph Wurlitzer Co.

The "Safety First" train, here during the past week, carried a Columbia Grafonola in every car for the entertainment of the attaches of the train as well as the visitors.

The Nationola Co., Cleveland, dealing in talking machines, was incorporated during the past week for $25,000 by J. R. Juringus, E. C. Fox, N. E. McIntyre, A. Allen and E. Leary.

LOCATED IN THEIR NEW QUARTERS

Arthur L. Van Veen & Co., manufacturers of Van Veen demonstration booths, are now located in their new home in the Marbridge Building, Broadway and Thirty-fourth street, New York, where they have at their disposal considerably better facilities than were afforded them in their former quarters.

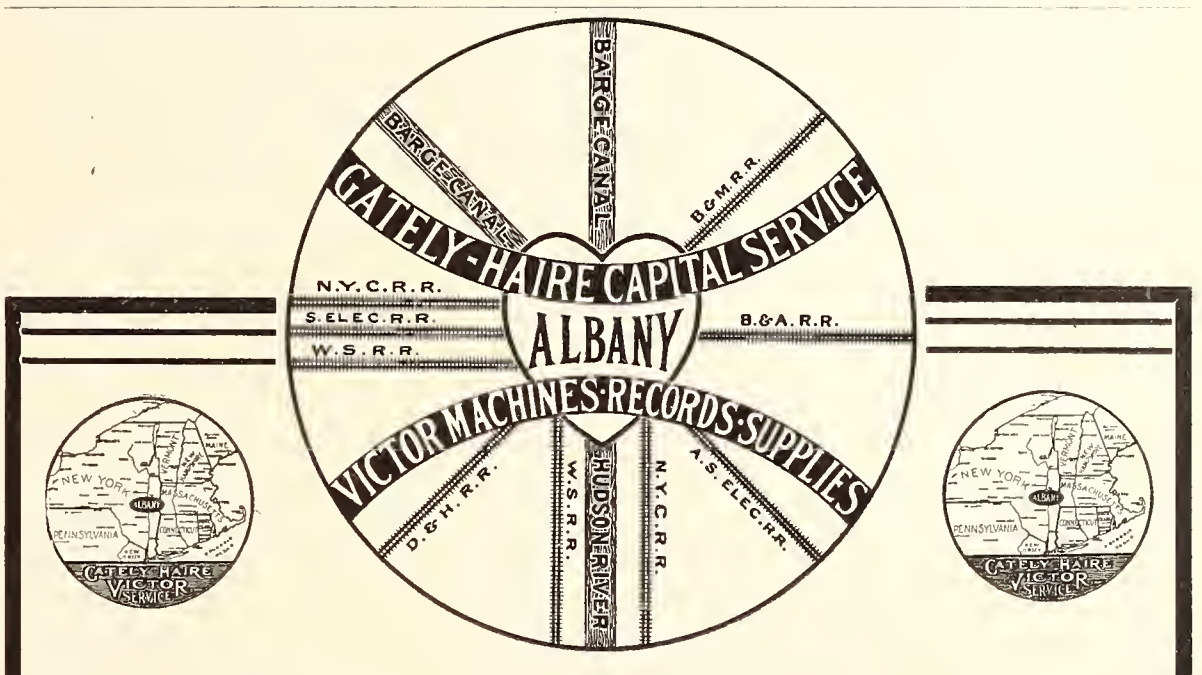
Mr. Van Veen stated this week that the company had received a number of repeat orders for Van Veen booths from dealers in different sections of the country, who were well pleased with the booths they had originally ordered. Among the recent contracts completed by Van Veen & Co. were the installation of Van Veen booths in the new stores of Krakauer Bros., 125 West Forty-second street, New York, and Christman Sons, 753 Sixth avenue, New York.

SCORING QUITE A SUCCESS

E. W. Fortiner, for three years field representative of the Victor Talking Machine Co., who recently made connections with the sales department of the Stewart Talking Machine Co., Victor jobber, of Indianapolis, is scoring a success with that enterprising house. Mr. Fortiner's wide acquaintance among the trade is regarded as a distinct asset. His addition to the Stewart forces has greatly strengthened the service-to-dealers of that company.

VICTOR DEALER ENLARGES

The Suburban Quality Shop, of Danvers, Mass., has been enlarged, a new demonstration room having been installed for the display of Victor Victrolas and records. Manager Quigley reports an excellent business.



ALBANY is right in the heart of things, as you will see from the above "baseball." PLANT ADDITIONS SOON READY

Additions Being Made to Heineman Plant at Elyria, O., Will Increase Output 200 Per Cent.—Tremendous Demand for Goods

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., 25 West Forty-fifth street, New York, manufacturer of motors, tone arms and sound boxes, stated this week that the various additions to the company's plant at Elyria, O., which had been started some time ago, were fast nearing completion, and that the new departments would be ready by July 1.

With the addition of these new departments for manufacturing and assembling, the Otto Heineman Phonograph Supply Co. will be in a position to increase its output by 200 per cent. For the past six months, the immense Heineman factory at Elyria, O., has been working to capacity, but the tremendous success achieved by the company's products has resulted in the receipt of orders of unusual magnitude. Mr. Heineman has been working indefatigably to give every one of his clients maximum co-operation and service, and the recent addition to his factory facilities will enable him to adequately take care of the remarkable volume of business which his company is receiving from the leading talking machine manufacturers in all sections of the country.

The Secretary of State at Albany, N. Y., granted a certificate of incorporation last week to the Mutual Talking Machine Co., dealer in talking machines and records. The capitalization is $15,000, the incorporators being H. Segal, W. Phillips and M. A. Richmond, of Hollis, L. I.

TALKING MACHINE FOR ORPET JURY

Court Grants Permission for Installation of Machine in Jury Room During Trial

WAUKEGAN, WIS., June 5.—One of the interesting preliminary features of the trial of Will Orpet for the murder of Marian Lambert, during the efforts to secure a jury, was the permission given by Judge Donnelly to James O'Shea, one of the jurors, who has a music store in Washington, Wis., to bring a talking machine into the jury room. The court, however, suggested that the records include religious and operatic suggestions, as well as ragtime, in order that everybody might be pleased.

The Hough Organ Co., of Bay City, Mich., has leased a three-story building on Washington street, near First street, for the manufacture of talking machines.

THE TRADE IN THE SOUTH

"DINNER DANCE" DISPLAY A HIT

Original Method for Calling Attention to Victor Danee Records Proves a Big Drawing Card for the Rhodes-Mahoney Co.

CHATTANOOGA, TENN., June 1.—One of the most clever advertising stunts in the interests of the Victor dance records was recently "pulled off" by the Rhodes-Mahoney Co., of this city, which concern has on several previous occasions had some effective exhibits for encouraging the purchase and use of Victrolas and records to meet the demands of the dance craze.

For the purpose of arousing public curiosity and interest the display was widely advertised as a "dinner dance" and at the appointed time a large crowd gathered. The curtains of the window were pulled back to disclose a well appointed dining room with two couples seated at the table. A regular course dinner was served by a negro waiter in full view of the audience in the street, and between courses one or the other of the young couples took the opportunity of dancing in one corner of the room to the music of the Victrola. The waiter incidentally added a few bits of comedy through his pantomime.

The "show" lasted for two hours, and special police had to be called to handle the crowd in the street. Before the curtains were drawn on the scene both "ladies" pulled off their wigs and stood forth, revealed as two of the prominent young men of the city. The dinner was widely and favorably commented on in the local papers.

NEW EDISON STORE IN ATLANTA

Atlanta, Ga., May 29.—Phonographs, Inc., local Edison jobber, is going to have one of the finest Edison homes south of the Mason and Dixon line. O. Simmons, head of the concern, states that the new home, situated at the corner of Ellis and Peachtree streets, in the best business section of Atlanta, will be ready for occupancy on October 1. The lower floor will be equipped with sound-proof rooms and recital hall, together with a private office and mezzanine balcony. There will be also a ladies' rest room. The second floor will be devoted to the wholesale department, the bookkeeping and mailing departments.

TAKES CHARGE IN NEW ORLEANS

H. L. O'Brian, who was formerly connected with the recital department of the Aeolian Co., New York, and more recently was a member of the staff of the Brooklyn store, and floor salesman in the Aeolian-Vocalion department, has taken charge of the Vocalion department of the D. H. Holmes Co., Ltd, New Orleans, who recently closed arrangements to handle the Aeolian-Vocalion line. He expects to develop a profitable market.

SPRING FESTIVAL AT RICHMOND

RICHMOND, VA., June 8.—We have recently had in our community the great spring festival, which is given each year by the Wednesday Club, one of the oldest musical organizations of the entire South. This year the following artists appeared in these concerts and scored tremendous successes: Pasquale Amato, Olive Kline, George Coeplan, Sophie Braslau, Giovanni Martinelli, Julia Culp, Anna Case and Richard Haggeman, director of the Metropolitan Orchestra.

Over 10,000 people heard the three great concerts, which is the largest attendance in the history of the club. Undoubtedly this great attendance is due primarily to the education of the public, which has been caused by the advent of the talking machine; it should not, however, be taken that all of the benefit has been derived by the public from the talking machine inasmuch as the dealer has profited immeasurably through their sale; therefore, the great festivals have well correlated in this work. The increase in the record business due to the stimulus given by the concerts has been tremendous, the sales of records by the artists who appeared doubling, and in some instances, trebling.

Inasmuch as the South has been particularly favored this year with many visits from the great Metropolitan artists of the country, who make records for the Victor, this advantage has naturally accrued to the benefit of the entire Victor dealership of this section of the country. In return for the evident help that the dealers are receiving, they, on their part, should make every effort to promote to a successful conclusion, spring festivals, concerts of great artists, and local musicals, as the result, in so far as they are concerned, is of necessity, obliged to bring direct returns.

BIG TONE TEST IN BIRMINGHAM

Over 2,500 Members of Birmingham Society Pack Jefferson Theatre for Occasion—Held Under Auspices of Loveman, Joseph & Loeb —Convention of Edison Dealers Also Held

BIRMINGHAM, ALA., June 3.—One of the musical events in this city recently was the tone test recital given at the Jefferson Theatre under the auspices of Loveman, Joseph & Loeb. Mme. Marie Rappold was the leading artist and her demonstration of the re-creation of her voice through the new Edison phonograph was enthusiastically received.

The recital was arranged largely through the efforts of J. L. Baskin, manager of the phonograph department of Loveman, Joseph & Loeb, who is a man of long experience in the phonograph field, having built up his department until it is one of the most important in the big store.

The Jefferson Theatre, with a seating capacity of about 2,500, was crowded to the doors by the society of Birmingham, and over 300 people were turned away for lack of space. The recital itself was under the direction of Verdi E. B. Fuller. In addition to Mme. Rappold's singing, Arthur Walsh, from the Edison laboratories also played violin selections in unison with the Diamond Disc phonograph. The feat of Mme. Rappold in apparently singing duets with herself was especially appreciated by the audience.

Phonographs, Inc., the Edison jobbers for the Atlanta zone, took advantage of the opportunity and held a dealers' convention in Birmingham the same day as the recital. There was a very successful business session held in the afternoon, and this was followed by a banquet in the evening at the Hotel Tutwiler. Some of the dealers present were Leo Loeb, J. L. Baskin, Verdi E. B. Fuller, A. Walsh, C. R. Lee, W. L. F. Rosenblatt, O. Simmons, W. B. Word, Winship Nunnally, Custis Guttenberger, Carl Laverty, W. C. Strickland, A. A. Keyes, J. D. Fleming and E. E. Bedford.

The new store of the DeLoache Phonograph Corp., located at 1701 Elm street, Dallas, Tex., recently opened is considered one of the most modern talking machine sales rooms in the Southwest. Ira DeLoache is president of the concern.

We Admit—"There's a Reason"

If you are looking for close co-operation—

you'll find OUR VICTOR SERVICE QUICK and satisfactory in every way

LOW FREIGHT RATES, FULL AND COMPLETE STOCKS and ADVANTAGEOUS LOCATION for prompt deliveries, enable us to replenish your stock QUICKER—and at LESS SHIPPING COST to you.

To Secure Maximum Utility From an Automobile Should Get

THE DeKALB TRAILER

One of these attached to any make of automobile will completely solve your delivery and receiving problems

Length, 7 ft.; width, 40 in.; sides 8 in. deep. Solid steel axle, hickory wheels, with either steel or rubber tires. Best quality steel springs. Painted auto black and equipped with draw bar that is quickly attached to any car. Weight, 400 lbs. Easy running and easily handled.

Send a postal for details. It's certainly worth your business' while

DeKALB WAGON COMPANY

DeKalb, Illinois

GENERAL ACTIVITY IN MONTREAL

Edison Diamond Disc Phonograph in Recital for Red Cross—M. H. Browne Co. Moves—Record Stars to Appear in Concert—New Stores Being Opened—After Summer Trade

MONTREAL, QUE., June 5.—The Edison Diamond Disc phonograph was recently featured at a musicale at the Gayety Theatre in Sherbrooke, Que., in aid of the Red Cross Society. The machine and records were supplied by Arthur Bloin, a music dealer of that city, and the event was widely advertised.

The M. H. Browne Co., representing the Dictaphone Co., has removed to 58 Beaver Hall Hill, this city.

Arthur L. Mandy, formerly with the R. S. Williams Sons Co., Ltd., and more recently manager of the Phonograph Shop, Ltd., Ottawa, Ont., has enlisted in the Canadian contingent and is now taking the officers' training course at Kingston.

H. C. Fortier, of the well-known Quebec distributing house of P. T. Legare, Ltd., recently returned from a visit to New York and other cities in the United States.

Anna Case, the Edison artist; Louis Graveure, the Columbia star, and Maggie Teyte, the Victor favorite, are all scheduled for a recital in Montreal shortly.

P. H. Lobelle & Co., Ltd., furniture dealers of this city, report continued success with the Columbia and Sonora lines of phonographs.

It is reported that N. H. Phinney & Co., of Halifax, N. S., have opened a branch salesroom in Kentville, N. S., featuring the Edison and Columbia lines.

Almy's, Ltd., reports some excellent business in Columbia machines, selling at $85 and $100, besides many sales in the cheaper types. Miss Vezina is in charge of this department.

The Berliner Gramophone Co., Ltd., is at present featuring some attractive camping scenes in its show window to stimulate summer Victrola business.

Geo. A. House, direct from the Edison laboratories, has recently been demonstrating the new diamond disc phonograph in the Maratime Provinces.

ATTRACTIVE VICTOR DISPLAY

Dealers in New York State pay particular attention to window displays and one of the best musical instrument displays shown recently was the display of Finch & Hahn, Troy, New York, this being created under the direction of Frank H. Burdick, manager. This window appeared sometime ago, it being in the nature of an Easter window showing. The effect produced by thousands of electric lights and many Easter lilies, each with a lighted center, together with a proper showing of various models of Victrola machines, all of which was beautifully reinforced by trellis work, caused nearly all passers-by to stop and spend some time viewing the magnificent showing.

TWO INTERESTING LETTERS

Received by Columbia Co. Which Tell Their Own Story of Product Efficiency

The Columbia Graphophone Co., New York, received recently the following letter from Flore Revalles, of the Serge de Diaghileff Ballet Russe, relative to the efficiency of Columbia dance records.

"Though a newcomer to your country, I have been more than interested in your wonderful talking machine records that have been brought to my notice. My curiosity has been so great that I have been using your dance records for my rehearsals with the utmost satisfaction, and I think it is due you to say I think all who dance can have much satisfaction from your Grafonolas and records, as their tempo, rhythm and musical qualities simply are charming and of great assistance."

Another interesting letter was sent to the Columbia Co. by E. A. Hungerford, department secretary of the Central Branch of the Y. M. C. A., Brooklyn, N. Y., the finest Y. M. C. A. building in the country. This letter reads in part as follows:

"I am writing to express to you our great satisfaction at the results we are getting from our Columbia Grafonola. It is in constant use in the building and is a source of a great deal of pleasure to our members. We would not be without it for anything in the world."

INCORPORATED

The Harrolla Talking Machine Co., of Newark, N. J., was incorporated recently for the purpose of manufacturing talking machines and cabinets, with a capitalization of $100,000.

D. A. White, of the White Furniture Co., Mebane, N. C., has installed a large Edison Diamond Disc phonograph in his factory for the use of the employes there.

TRANSFER NAME-PLATES

CHICAGO

ARGUMENTS PRESENTED IN PRICE-CUTTING CASE

Elisha K. Camp Argues Appeal of Boston Store in Action Brought by Columbia Graphophone Co.—Makes Some Interesting Contentions and Cites Numerous Precedents

The appeal of the Boston Store, of Chicago, from the interlocutory decree entered by the United States District Court, on September 27, 1915, against the Boston Store, its officers, servants, etc., *pendente lite*, enjoining the Boston Store from cutting prices on Columbia records, came on recently for argument before the Circuit Court of Appeals, Seventh Circuit, in Chicago.

The Boston Store was represented by Moritz Rosenthal, Henry H. Kennedy, Joseph W. Moses, Julius Moses, Hamilton Moses, Walter Bachrach and S. Sidney Stein. The appeal was argued by Hamilton Moses.

The Graphophone Cos. were represented by Elisha K. Camp, Daniel N. Kirby, Taylor E. Brown and Clarence E. Mehlhope. Mr. Camp and Mr. Kirby argued the appeal for the Graphophone Cos. In his argument Mr. Camp said:

"The fundamental, chief and controlling question in this case is the one which was thus stated by Judge Geiger in the Court below:

" 'Can a patentee, upon a sale of a patented article, by contract require of his immediate vendee the observance of price restrictions upon resale?'

" 'It is the question,' says Judge Geiger, 'which in the Victor case, 123 Fed. 424, was somewhat more broadly stated to involve these facts: "the bill very clearly shows that appellant said to the jobber: 'we are unwilling to part with the whole of our monopoly. There are no terms on which we will give you an unrestricted right to deal in our machines. However, if you choose to pay our price for a limited right, we will place our machines in your hands, to be sold by you or by dealers under you, to the public at not less than $25 each,' and that the jobber explicitly accepted this offer.' "

"This is not a case like the Sanatogen case (Bauer vs. O'Donnell, 229 U. S. 1) where the defendant was not under contract with complainant to maintain prices and *where the patentee made an outright sale of his patented article without restriction of any kind,* allowing the patented article to pass out of the monopoly without committing by proper agreement, the one to whom the article came, to the observance of an obligation on his part and then tried to recall it or to claim that by 'notice,' he burdened the article with such a reservation; but this is a case where the patentee, through its authorized agent acting within the scope of its authority as its representative, made a conditional or restricted sale of the patented articles in question by contract directly with the defendant, and the latter expressly agreed, *at the very instant of the sale,* to observe the said conditions and restrictions which were reasonable and lawful and which required the defendant to observe the resale price fixed by the patentee, through its said agent. The patentee expressly reserved and retained part of his patented monopoly to sell and did not attempt to go beyond this, or by a 'mere notice,' as in the Sanatogen case, to burden the patented article with a restriction or reservation not imposed at the very instant of the sale. The defendant, Boston Store, having expressly agreed by contract, to observe the restrictions aforesaid, we contend that those restrictions should be enforced whether the contract be regarded as constituting a valid agreement in and of itself, or, as merely evidencing the extent to which the patentee has retained a part of his monopoly right to sell, and has granted a restricted right to resell. It is also our contention that the case comes squarely under the ruling in Bement vs. Harrow Co., 186 U. S. 70, where the Supreme Court said (p. 91):

" '* * * The general rule is absolute freedom in the use or sale of rights under the *patent* laws of the United States. The very object of these laws is monopoly, and the rule is, with few exceptions, that ANY CONDITIONS that are not in their very nature illegal with regard to this kind of property, IMPOSED BY THE PATENTEE AND AGREED TO BY THE LICENSEE, for the right to manufacture or use or sell the article, WILL BE UPHELD BY THE COURTS. The fact that the conditions in the contract keep up the monopoly does not render them illegal.'

"It is our further contention that, as held by Judge Geiger, the patentee can say:

" 'I will manufacture the patented articles myself and I will sell to no one except on condition that he observe a resale price, to be fixed by me.' "And, he can do so, for the reason that the article, because of its embodiment of the invention, has been made a subject of lawfully restrictive, price bargaining; and the Wall Paper and Dr. Miles Medical cases, 212 U. S. 233, 220 U. S. 393, are most persuasive in supporting such view. The language of the Supreme Court in the Miles case (see p. 401) could give no clearer recognition to the full right of the patentee to bargain for price restriction. The statement is almost made in plain words, that if the proprietary medicine were a patented article, the contract there in question would, as between the parties, receive the protection of the patent laws as construed in the Bement case."

"Accordingly Judge Geiger was right in holding:

" 'That Dick vs. Henry and Bement vs. Harrow Co., Victor vs. The Fair, and the other cases, *supra,* so far as they permit a patentee, *while exercising* any of his three co-ordinate monopoly rights, by proper amendment, to reserve such portion thereof as he sees fit, have not been overruled by Bauer vs. O'Donnell; but that, after he has once allowed the patented article to pass out of the monopoly without committing, by proper agreement, the one to whom the article comes, to the observance of an obligation on his part, he cannot then recall it or claim that, by a notice, he burdened the article with such reservation.'

"What the patentee did was what was expressly held to be lawful and proper by the Circuit Court of Appeals of the Eighth Circuit, in National Phonograph Co. vs. Schlegel, 128 Fed., 733, and by the District Court, Eastern District of Pennsylvania, in United States, vs. Keystone Watch Case Co., 218 Fed. 502, before Buffington, Hunt and McPherson, Circuit Judges. Speaking for the Court in the Schlegel case, Judge (now Mr. Justice) Van Devanter said:

" 'An unconditional or unrestricted sale by the patentee, or by a licensee authorized to make such sale, of an article embodying the patented invention or discovery, passes the article without the limits of the monopoly and authorizes the buyer to use or sell it without restriction; *but to the extent that the sale is subject to any restriction upon the use or future sale* the article has not been released from the monopoly, but is within its limits, and, as against all who have notice of the restriction, is subject to control of whoever retains the monopoly. This results from the fact that the monopoly is a substantial property right conferred by law as an inducement or stimulus to useful invention and discovery, and that *it rests with the owner to say* what part of this property he will reserve to himself and what part he will transfer to others, and *upon what terms he will make the transfer.*'

"Mr. Justice Lurton quoted this opinion with approval, in delivering the opinion of the Supreme Court in the Mimeograph case (Henry vs. Dick, 224 U. S. 1).

"Speaking for the Court in the Keystone Watch case, Judge McPherson said (p. 514):

" 'The defendant company attempted to restrict the prices at which the wholesaler or jobber might sell, to the retailer, and to this end made a direct agreement with the jobber. *As we understand the decisions, such an agreement was within the company's lawful rights.* Certain material parts of the Howard watch were covered by *bona fide* patents taken out and used for a lawful purpose, and *as the owner of these patents the company had a right to make a direct agreement with the jobbers whereby a minimum price was fixed at which the jobber might sell.* Bement vs. Harrow Co., 186 U. S., 70, 22 Sup. Ct., 747, 46 L. Ed., 1058; Henry vs. Dick Co., 224 U. S. 1, 32 Sup. Ct., 364; 56 L. Ed., 645, Ann. Cas., 1013, D., 880.

"But the company went further, and by mere notice to the retailer, accompanying the box in which the watch was sold by the jobber, attempted to fix the minimum price at which the retailer might sell to the consumer. *No direct agreement was made with the retailer.* When the company sold the watch to the jobber it had fully exercised its right to vend, and had no right to use the notice subsequently given in order to control the price at which the retailer might sell. Bauer vs. O'Donnell, 229 U. S., 1, 33 Sup. Ct., 616, 57 L. Ed., 1041, 50 L. R. A. (N. S.), 1185.'

"The jobber, not being the agent of the patentee, could not create privity between the patentee and the retailer. Therefore when the retailer bought subject to mere notic, he got articles which then passed out from under the monopoly.

"The Supreme Court cited the Harrow case with approval in its last word on this subject, namely, the Sanatogen case, *supra.*

"It is important to note also that in refusing to grant the writ of certiorari asked for in the Waltham Watch Co. case (Waltham Watch Co. vs. Keene, 232 U. S., 724), the Supreme Court did not modify its ruling in the Harrow case to the effect, as already stated, that A PATENTEE, BY CONTRACT, MAY FIX THE PRICES ON HIS PATENTED PRODUCT. The defendant Keene in that case was not a party or a privy to the Waltham Watch Company's price maintenance contract. It is expressly stated in Judge Ray's opinion (202 Fed., 235), (at p. 230) that

" 'There is no allegation or stipulation that the defendant has purchased any of these movements from the complainant or that the complainant sold him any.'

"In two of the strongest opinions on the subject which we have found, this Court has clearly defined the rights of a patentee and the public policy declared by the patent laws. In the first of these, Victor Talking Machine Co. vs. The Fair, 123 Fed., 424, Judge Baker, writing the opinion of this Court said (p. 426):

" 'Within his domain, the patentee is Czar. The people *must take the invention on the terms he dictates or let it alone for* 17 *years. This is a necessity from the nature of the grant.* Cries of restraint of trade and impairment of the freedom of sales are unavailing, because for the promotion of the useful arts the Constitution and Statutes authorize this very monopoly. * * * The patentee may agree with one that he will not exclude him from making, with another from using, and with yet another *from selling* devices that exemplify the principles of his invention; * * * he may subdivide as he pleases and offer to sell or lease in the most fanciful parcels on the harshest terms; * * * whether purchasers and tenants come or not is purely his own concern; * * * if purchasers or tenants do come, the Courts will enforce the terms of the sale or lease; * * * he cannot be compelled to part with his own except on inducements to his liking.'

"In the other, Rubber Tire Wheel Co. vs. Milwaukee Rubber Works Co., 154 Fed., 358, Judge Baker, also writing the opinion of this Court, said (p. 362, italics ours):

" 'Under its constitutional right to legislate for the promotion of the useful arts, Congress passed the patent statutes. The public policy thereby declared is this:—Inventive minds may fail to produce many useful things that they would produce if stimulated by the promise of a substantial reward; what is produced is the property of the inventor; he and his heirs and assigns may hold it as a secret till the end of time; the public would be largely benefitted by obtaining conveyances of these new properties; so the people through their representatives say to the inventor: Deed us your property, possession to be yielded at the end of 17 years, and in the meantime we will protect you absolutely in the right to exclude every one from making, using, or vending the thing patented, without your permission. Bloomer vs. McQuewan, 14 How., 539, 548, 14 L. Ed., 532; United States vs. American Bell Telephone Co., 167 U. S., 224, 17 Sup. Ct., 809, 42 L. Ed., 144; Bement vs. National Harrow Co., 186 U. S., 70, 22 Sup. Ct., 747, 46 L. Ed., 1058; Good vs. Daland, 121 N. Y., 1, 24 N. E. 15; Fuller vs. Berger, 120 Fed., 274, 56 C. C. A., 588, 65 L. R. A., 381; Victor Talking Machine Co. vs. The Fair, 123 Fed., 424, 61 C. C. A., 58, Rupp-Wittgenfeld Co. vs. Elliott, 131 Fed., 730, 65 C. C. A., 544. Congress put no limitations, excepting time, upon the monopoly. Courts can create none without legislating. The monopoly is of the invention, the mental concept as distinguished from the materials that are brought together to give it a body. Use of the materials, as noted above, may be enjoined as injurious to the public; but that does not invade the monopoly. *Use of the invention cannot be had except on the inventor's terms. Without paying or doing whatever he exacts, no one can be exempted from his right to exclude. Whatever the terms, courts will enforce them, provided only that the licensee is not thereby required to violate some law outside of the patent law, like the doing of murder or arson.*'

"The opinion of the Supreme Court of Washington in Fisher Flouring Mills Co. vs. Swanson, 137 Pac., 114, 76 Washington, 649, contains a very interesting discussion of the question of price fixing (though not of patented articles), and concludes with this strong argument in favor of the practice:

" 'Finally, it seems to us an economic fallacy to assume that the competition, which in the absence of monopoly benefits the public, is competition between rival retailers. The true competition is between rival articles, a competition in excellence, which can never be maintained if, through the perfidy of the retailer who cut prices for his own ulterior purposes, the manufacturer is forced to compete in prices with goods of his own production, while the retailer recoups his losses on the cut price by the sale of other articles, at, or above, their reasonable price. It is a fallacy to assume that the price cutter pockets the loss. The public makes it up on other purchases. The manufacturer alone is injured, except as the public is also injured through the manufacturer's inability, in the face of cut prices, to maintain the excellence of his product. Fixing the price on all brands of high-grade flour is a very different thing from fixing the price on one grade of high-grade flour. The one means the destruction of all competition and of all incentive to increased excellence. The other means heightened competition and intensified incentive to increased excellence. It will not do to say that the manufacturer has not interests to protect by contract in the goods after he has sold them. They are personally identified and morally guaranteed by his mark and his advertisement.' "

There's A Fine Profit for You in MOTROLAS

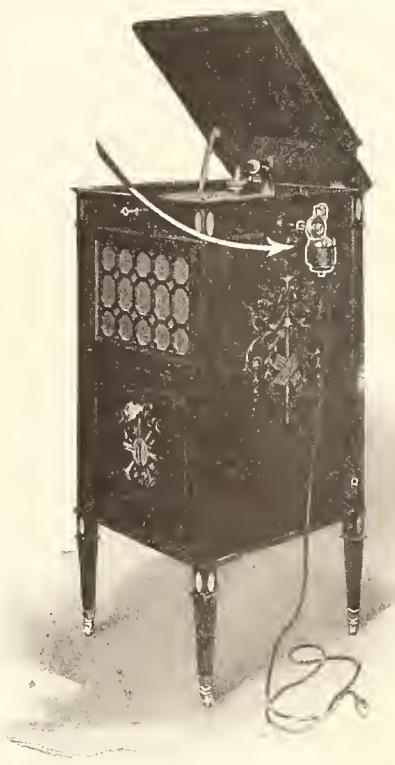
THEY sell fast—because they are *necessary* for the *complete* enjoyment of the instrument.

No more winding by hand—the Motrola does it for you. Simple to attach—just unscrew the winding crank and put the Motrola in its place. Connected with electric current it winds automatically, insuring true tone and even time.

Costs practically nothing to run. It can't get out of order.

Be one of the first to have a Motrola for demonstrating purposes. A sample Motrola will be sent on 10 days' trial to any responsible dealer.

Prices and all other information sent on request.



If you are in the vicinity of New York—on a convention trip or otherwise—we will consider it a pleasure to demonstrate the Motrola to you if you will call at our office.

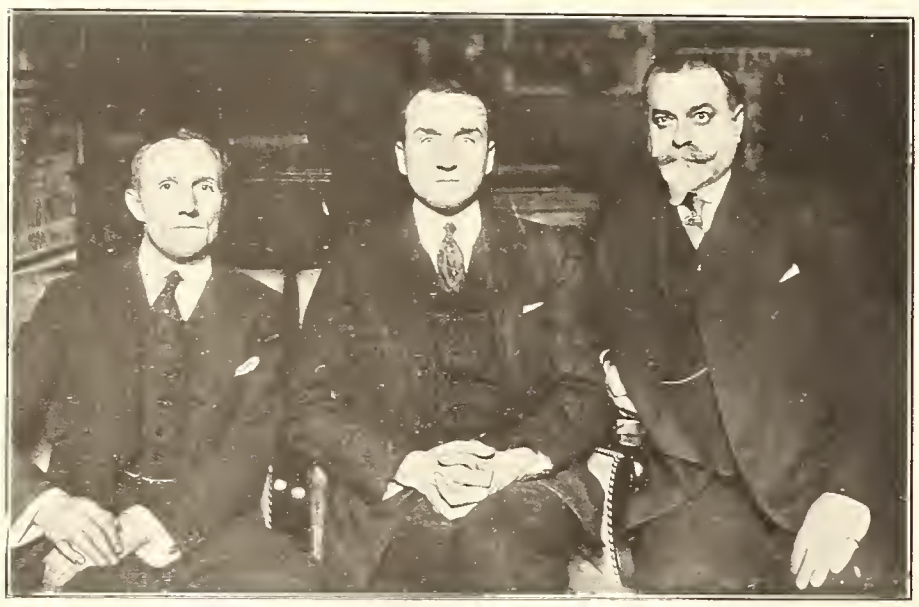
NEW PATHE OFFICERS ELECTED

E. A. Widmann Becomes President, J. E. Pathé, Vice-President; G. W. Case, Jr., Secretary, and T. E. La Montagne, Treasurer

The annual meeting of the stockholders of the Pathé Frères Phonograph Co., New York, was held last week at the company's executive offices, 29 West Thirty-eighth street, New York, and subsequent to the transaction of general routine matters, the following officers for the ensuing year were elected: Eugene A. Widmann, president; Jacques Emile Pathé, vice-president; George W. Case, Jr., secretary; T. E. La Montagne, treasurer.



New Officers of the Pathé Frères Phonograph Co.
Left to Right—George W. Case, Jr. Secretary; Eugene A. Widmann, President; T. E. La Montagne, Treasurer

Mr. Widmann was previously secretary and treasurer of the company, and his election to the presidency of the company is in acknowledgment of his untiring and indefatigable efforts to place the Pathé Frères Phonograph Co. in the high position it now occupies in the phonograph and commercial worlds. Mr. Widmann is a keen business man and an able financier and before he joined the executive forces of the Pathé Frères Co. several years ago was prominent in other branches of mercantile life.

Jacques Emile Pathé, the newly elected vice-president, is a son of Emile Pathé, of the Pathé Frères Co., Paris, France. He is an officer in the French army, and was last week wounded in the fighting at Verdun. He is convalescing rapidly, however, and expects to rejoin his regiment in a short while. Mr. Pathé's second son was also wounded some time ago while fighting with the French army.

George W. Case, Jr., has been patent counsel for the Pathé Frères Phonograph Co. for a number of years, and is recognized as one of the best informed members of the phonograph industry's legal division. He will continue in this capacity in addition to occupying the important post of secretary. T. E. La Montagne is a leading figure in the city's financial circles, although he is now devoting the greater portion of his time to Pathé Frères Phonograph Co. activities.

The four officers and the following business men, many of whom are prominent in their respective spheres, constitute the Pathé Frères directorate: Otto Doll, Herman A. Metz, Robert W. Crawford, Joseph F. Collins, H. N. McMenimen, W. Herman Rose, Louis M. Cohen.

ADVOCATE PRICE MAINTENANCE

Kansas City Chamber of Commerce Votes Favorably on Referenda Sent by National Chamber—C. J. Schmelzer Joins in Debate

Kansas City, Mo., June 6.—The Kansas City Commercial Club has voted favorably on both the referenda of the National Chamber of Commerce with reference to maintenance of resale prices and unfair competition. The first proposition was about Federal legislation permitting such maintenance of resale prices, the second recommending legislation giving the Federal Trade Commission authority to prevent price cutting in interstate and foreign commerce.

The club had submitted both referenda to its members, and their vote was favorable to both propositions. Tuesday evening, May 16, there was a meeting of the board of directors of the club, at which a formal vote was taken—which also resulted in favor of both proposals.

There was a heated debate before the board of directors, in which C. J. Schmelzer, president of the Schmelzer Arms Co., distributor of Victor talking machines, championed the Stephens bill, and the price maintenance referendum. One of Mr. Schmelzer's opponents in the debate was L. H. Austin, representative of the National Chamber of Commerce, who had been called on by opponents of the bill to state certain arguments against it.

OFFER NEW MODEL PATHEPHONE

Latest $100 Instrument Is Finished in Chinese Lacquer Design—Is Very Attractive

The Pathé Frerès Phonograph Co., New York, has added to its line a new model of its $100 Pathephone which is finished in a Chinese lacquered design. This model is the same size as the $100 Pathephone in mahogany and other finishes, but the originality and artistic conception of the design has served to attract the attention of numerous music lovers.

COLUMBIA CO. BUSINESS ACTIVE

W. C. Fuhri Brings Pleasing Reports on Conditions From the Middle West—May Business Breaks Month's Record—R. F. Bolton on Western Trip—Exchanging Views with Trade

"Business conditions in the Middle West are excellent, and give every indication of permanence," said W. C. Fuhri, United States manager of the Columbia Graphophone Co., who returned late last week from a trip through this territory. "Wherever I visited, there was a feeling of confidence in the industrial outlook which augurs well for the future." Mr. Fuhri returned to New York in his automobile, making the trip from Chicago in eight days, and stopping at Buffalo and Cleveland en route. He expects to remain in the East for some time, as his permanent headquarters will be at the company's executive offices in the Woolworth Building.

The Columbia Co.'s sales totals for the month of May reached a high water mark for this month, showing the same remarkable gain over last May that each month this year has registered over 1915's corresponding month. Work on the new factory additions is being rushed, and the new building which was purchased last month will be occupied by the Columbia Co.'s employes during the course of the month.

R. F. Bolton, district manager of the Columbia Co., with headquarters at 83 Chambers street, New York, left June 1 for a visit to the company's wholesale divisions in the Middle West. Mr. Bolton, who will be away about ten days, will take advantage of the opportunity offered him to exchange views and ideas with his co-workers in this section, and this trip will doubtless enable him to introduce a number of new plans for the extension of further co-operation to Columbia dealers in local territory. The Western managers will also learn just how the New York offices have been able to achieve new sales total records month after month.

NEW EDISON DEALERS

Twenty-eight Sign During the Past Month to Handle Edison Diamond Amberola

Thos. A. Edison, Inc., announces that twenty-eight dealers have during the past month signed the agreement under which they are licensed to sell the Edison Diamond Amberola. Of this number twelve will handle the Amberola line exclusively, and six who have been handling only the Diamond Disc line will take on the cylinder line. The remaining ten dealers have taken both the disc and cylinder lines. The new cylinder dealers in the three classes are:

Amberola Only—W. W. Miller, Consecon, Ont., Can.; Lovins, House Furnishing Co., Mahnomen, Minn.; Whitney & Demoney, Columbia City, Ind.; R. E. Behm, Pittsburg, Pa.; Malloy Drug Co., Van Hook, N. D.; Stein Jewelry and Music Co., Geneseo, Ill.; J. R. Crain, Florence, Kan.; J. D. TORONTO MARKET VERY ACTIVE

Montagnes & Co. Seek Larger Shipments of Sonora Phonographs—Wright Piano Co. Opens Store in London, Ont.—Big Poster Campaign for Columbia—Cabanas in West

TORONTO, CAN., June 5.—I. Montagnes & Co., the Canadian distributers of Sonora phonographs, report unusual activity for these instruments. They are at present featuring the Sonora "Supreme," the Canadian price for which is $1,500, and are distributing an elaborate booklet describing this instrument. I. Montagnes, head of the company, recently spent some time in New York at the Sonora headquarters arranging for larger shipments.

The Wright Piano Co., Strathroy, Ont., has opened retail salesrooms in London, Ont. This company is featuring the Columbia graphophone and records.

The Music Supply Co., distributers of Columbia goods in this city announce an elaborate poster campaign in the interests of the Columbia line which is expected to stimulate summer business materially.

The Burnett Piano & Grafonola Co. is the title of a new concern recently registered in Toronto.

Ralph Cabanas, manager of the Canadian division of the Columbia Graphophone Co., with headquarters in this city, is now in the West, and upon returning will visit all the large cities from Ft. William and Port Arthur to the Coast. In his absence Otis C. Dorian, assistant manager, is in charge.

The Edison Diamond Disc phonograph furnished by the R. S. Williams & Sons Co., Ltd., was one of the features at a recent concert held in Massey Hall, Toronto, in the interests of "Bantam's Battalion." Alice Verlet, Vernon Archibald, Glenn Ellison and Fred Van Epps appeared in person at the recital and sang in unison with their voices as re-created by the Diamond Disc phonograph.

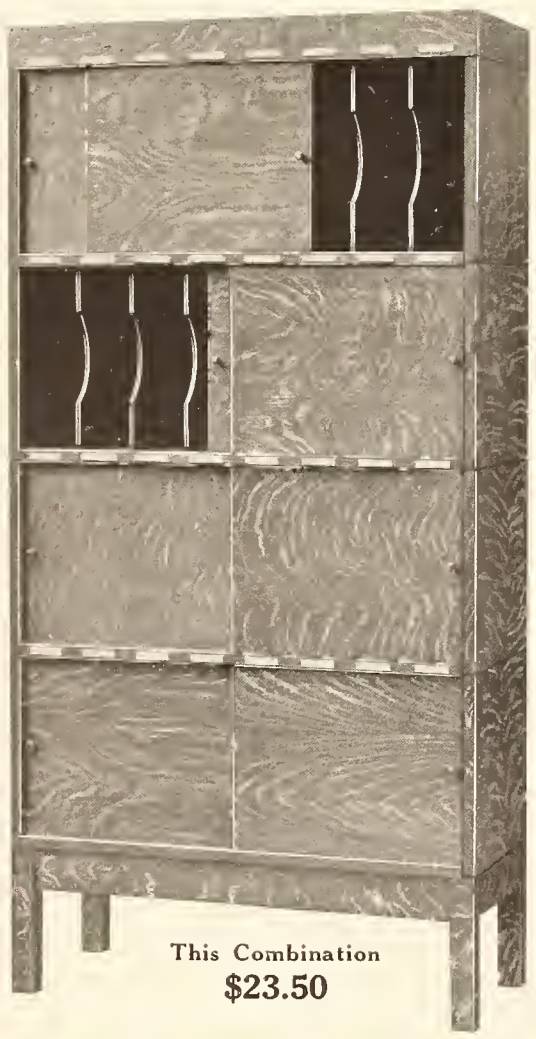
OPEN A FACTORY IN NEWARK, O.

Art Cabinet Specialty & Manufacturing Co. Recently Incorporated to Make Talking Machines and Cabinets in That City

NEWARK, O., June 1.—The Art Cabinet & Specialty Manufacturing Co., manufacturers of talking machines and special cabinets, has incorporated a new company with a capital of $15,000, the incorporators being G. M. Scharr, Columbus, O.; Geo. Hayden and C. W. Miller, Newark, O.; J. A. Kettering and L. C. Wogan, of Marion, O.

The company has leased a temporary plant in this city, but is looking for a new location and adequate factory facilities to meet its future requirements.

A Good Filing Cabinet for the Price of a Good Record



This Combination
$23.50

Send for descriptive Circular No. 50

EFFECTIVE WINDOW DISPLAY MADE IN MINNEAPOLIS

MINNEAPOLIS, MINN., June 5.—At the time of the appearance of the Boston Grand Opera Company in this city, the local headquarters of the Columbia Graphophone Co., 414 Nicollet avenue, prepared the window display shown in the accompanying illustration. This window won very favorable mention from the local trade, and was even commented upon by several newspapers. The photographs of the opera stars in the window gave a personal touch to the display, which added considerably to its effectiveness. The window as a whole, is, of course, pertinent to the visit of the Boston Grand Opera Company, and Columbia dealers in this territory have found it to their advantage to use displays of this character whenever the occasion is presented.

Columbia Co.'s Window Display During Visit of Boston Opera Co.

COMMENTS ON EDISON TONE-TESTS

Interesting Volume of Press Comments on the Demonstrations of the Edison Diamond Disc Phonograph and Records Just Issued

Thos. A. Edison, Inc., has just issued a most interesting volume which emphasizes the value and success of the "re-creation" tone tests that have been held throughout the country. The book in question contains reproductions of comments on the tone tests which have appeared in the daily papers in all sections of the country, all the comments being of a most favorable nature. In connection with the newspaper articles there are shown portraits of several of the leading artists who have figured in the tone tests which proved the success of the Edison method of re-creation.

NEW VICTOR DEALERS' CATALOG

The Victor Talking Machine Co. sent out to its dealers recently a new numerical catalog listing all records which were issued up to and including the April supplement. In this numerical catalog, extra pages are provided for pasting in the new records issued every month, and six divided spaces before each number afford a most convenient method for keeping track of the demand for each particular record.

Other literature mailed this week by the Victor Co. included the regular June supplement of new Victor records and supplements of new German, Hebrew, Hungarian, Italian, Polish, Portuguese, Russian, Swedish and Spanish records.

NEWS FOR THE BASEBALL FANS

The Blackman Talking Machine Co., 97 Chambers street, New York, Victor distributor, will have a uniformed baseball "nine" on the "diamond" this season, and games are now being booked with teams representing other jobbers and talking machine houses in this territory. The schedule already calls for games with the teams from the American Talking Machine Co., Brooklyn, N. Y.; New York Talking Machine Co., New York; G. T. Williams Co., Brooklyn, N. Y., and the Columbia Graphophone Co.'s distributing division, New York. George Thau is manager of the Blackman team.

COLUMBIA CO. FILES SUIT

The Columbia Graphophone Co., New York, has filed suit in the United States District Court against the Emerson Phonograph Co., alleging that the latter has infringed the Jones patent in the production of Emerson records.

NO SEASONS IN KANSAS CITY TALKING MACHINE TRADE

Demand for Machines and Records Shows No Signs of Break—J. F. Ditzell Breaks Hand—R. L. Burke Joins Rotary Club—Joe Mullen Goes with Wunderlich—Improvements in Jones Department—Dealers Favor Interest Charge on Talking Machine Sales

KANSAS CITY, Mo., June 5.—The talking machine business in Kansas City is no longer a matter of seasons, but has become a question of being able to supply the great demand for instruments at all times. Some of the stores report trade as strong as that of the holiday months, while others remark on the firmness of the business, expressing surprise at the wonderful way in which it is holding up. Kansas City, as a whole, has suffered from a very late spring, but this has seemed to be of aid to the talking machine dealers. With the opening of the summer season it is expected that a number of cheaper grade instruments will be sold to meet the demand of the out-of-door contingent.

John F. Ditzell, manager of the Victrola department of the George B. Peck's store, is suffering from a broken hand, which was injured while participating in a baseball game on the Kansas City Athletic Club's field, of which he is a member.

R. L. Burke, proprietor of the R. L. Burke Music Co., Joplin, Mo., was one of the charter members of a Rotary Club, recently organized in Joplin, Mo. Mr. Burke represents the piano and talking machine industry in that city.

The recently organized Steinola Co. reports that it is making excellent progress.

A man who gives expression to the thoughts of many dealers in this section is E. S. Hall, proprietor of the Hall Music Co., who said, "I find it is harder to get instruments than it is to sell them. Notwithstanding the many brands of talking machines now on the market, I find a dandy business with my Victrolas." Mr. Hall has a location that is very unique, and which he believes is one of the best in the city. One window of his store faces the street, while the other side is exposed to the lobby of one of the largest down-town office buildings.

Joe Mullen, who for the past twelve years has been in charge of the talking machine department of the Carl Hoffman Music Co., is now with the Wunderlich Music Co.

James H. Hamilton is the new wholesale representative for the Thomas A. Edison, Inc., in the Missouri territory, working out of Kansas City. He succeeds Charles H. Yates, who left for the Western Coast recently.

The Schmelzer Arms Co. reports its sale of records as equalling the winter standard and are very much pleased with the showing. Orders have been coming in from the out-of-town cities asking for the Billy Sunday records.

Since the opening of the piano department of the Jones Store Co., the arrangement of the Victrola quarters has been somewhat altered. The booths have been moved around and squared together, and although the department looks a trifle smaller, it really is much better, as it gives it a more secluded section and furthers its resemblance to a separate part of the store. The piano salesmen who work outside of the store are being used as prospect-getters for the Victrola department, and Harry H. Bibb, manager of that department, reports some good sales. The reverse is also true, however, and quite often a talking machine salesman can "tip" off a piano man, with a resultant benefit.

Ever since "Billy" Sunday has been in Kansas City each Victrola dealer has been flooded with requests for music by the famous Homer Rodeheaver. And they are all glad to say that the supply of these records is holding up very well.

Expert Schwenker, of the mechanical department of the Victor Co., recently called on the Victor dealers in this territory and gave them advice regarding the Victor motor. Other technical points regarding the instrument was also expounded.

Several Kansas City dealers have mentioned the subject of cash payments on talking machines as compared to time sales. Three or four volunteered information that there should be some method of allowing something to the person who pays cash for his machine. "There is absolutely no incentive for a person to lay down $150 for an instrument when all he needs is cash enough to make the first payment," said a prominent dealer recently. "I believe that there is but one way to handle this, and that is for the manufacturers to make a clause in their contracts with the dealers regarding the same. In no other way will we ever be able to handle the situation."

An item of unusual interest in the music instrument field of Kansas City is that the stock of the Carl Hoffman Music Co. was purchased on June 1 by the Wunderlich Music Co. This did not, however, include the Victrola and Columbia franchises, both of which were forfeited. It is not known whether either company will release these franchises and allow someone else to open in Kansas City, but the report is that this will not be done.

M. M. Blackman, resident manager of the Edison Co., reports an excellent business in this territory. He recently returned from a two weeks' trip over the territory, during which time he visited Iola, Ft. Scott, Columbus, Clinton, Springfield, Joplin and other intervening points.

GENERAL EXPANSION THE RULE IN MILWAUKEE TRADE

Many New Concerns Handling Talking Machines and Records—Aeolian-Vocalion Makes Formal Bow to the Public—A. G. Kunde on Merchants' Excursion—Important Addition to Schuster & Co.'s Staff—Emil O. Schmidt to Move—Other News of Interest

MILWAUKEE, WIS., June 5.—The talking machine business in all lines in this city is keeping up at a rate that is apparently only limited by the inability of the wholesalers and retailers to secure sufficient stock in certain lines. New concerns and new machines have entered the field but the old stand-bys are still holding their own in good shape.

The Aeolian-Vocalion made its formal bow to a select audience of Milwaukee musicians on May 31, when Edmund Gram, 414-416 Milwaukee street, "christened his new baby," the Edmund Gram parlor grand, a new product of the Edmund Gram Piano Co., manufacturers. Aeolian-Vocalion selections were interspersed with the classical music on the piano by Robert Adams-Buell. Mr. Gram accompanied Vocalion vocal selections on his new grand after the formal program was ended.

A. G. Kunde, Columbia distributer, 516 Grand avenue, spent the week of June 4 on the annual excursion of the Merchants' and Manufacturers' Association, which sent ninety prominent Milwaukee business men on a tour in a special train through northern Illinois, eastern Iowa and southern Wisconsin for six days. Mr. Kunde is the only representative of the music trades on this year's trip.

The Gether Piano Co., recently incorporated by Milwaukee interests, has opened a piano and talking machine store at 625 Grand avenue, and is pushing the Empire talking machine.

J. H. Becker, manager of the piano and talking machine department of the big Twelfth street store of Edward Schuster & Co., reports a record-breaking May business, and is confident that June will be even better. Mr. Becker has been fortunate in obtaining the services of Miss Blanche Brewster, an accomplished pianist, who is devoting much of her time to the Victrola business and has introduced some new "stunts" in accompanying Victor records on the piano and player-piano. Miss Brewster arranged a splendid program of patriotic music for the afternoon of Memorial Day and the audience overflowed the recital hall, necessitating a second performance, which lasted until the store gong rang and had to be cut short. The result of the new arrangement has been that piano owners have become Victrola enthusiasts and Victrola owners have become piano enthusiasts, with a corresponding increase in the sales of each. A. Meyer, who handles the same department in the big South Side store on Mitchell street, also reports an excellent run of business.

J. C. Berryman has opened a music shop at Brodhead, Wis., and is meeting with good business in the Columbia and other lines, which heretofore have not had adequate representation in the extreme southern part of Wisconsin.

George L. Hibbard, manager of the Columbia department of the Smith Piano Co., 90 Wisconsin street, Milwaukee, is using his big six-cylinder Cole to excellent advantage in running down prospects. Mr. Hibbard is not literally running them down, but has established a fine record for getting there before the other fellow.

The Edmund Gram Music House, 414-416 Milwaukee street, reports a list of Aeolian-Vocalion sales which is rather astonishing, considering the fact that the line has been before the Milwaukee public only two months. The Gram talking machine business for May was by far the largest of any month in the history of the department, barring only December of last year. One of the best sales of the month was that of a Style J Vocalion and a Style B Steinway grand to A. G. Wells, prominent grain man of DePere, Wis., the sales aggregating $1,500. Paul Seeger, manager of the department, spent two weeks at the Aeolian factories in New York, and is now able to extol the merits of the line to the best advantage, having received minute instruction in all the inner workings of the Vocalion.

Emil O. Schmidt, 310 Grand avenue, Milwaukee, who will move to his new store in the new Palace Hippodrome building at Grand avenue and Sixth street, about June 15 or 20, has incorporated the business under the name of Emil O. Schmidt Piano Co., with a capital stock of $25,000. Henry M. Steussy, a well known business man of New Glarus, Wis., has become associated with Mr. Schmidt and will take an active part in the management, devoting most of his attention to the talking machine department, which represents the Pathé.

Gustave Spankus, manager of the talking machine department of the Hoeffler Piano Mfg. Co., Milwaukee, has resigned to become a member of the Victrola staff of the Boston Store, Milwaukee. H. R. Bruder succeeds him as manager at Hoeffler's.

A. L. Towne & Son, Waterloo, Wis., are new Pathé dealers reported by the Pathephone Co., of Milwaukee.

The Milwaukee branch of the W. W. Kimball Co., Broadway and Mason streets, is doing a fine business in Edison machines and reports several exceptional sales of the more expensive styles to Milwaukee business men.

"Victrola business is the best we have ever experienced," is the good word coming from L. C. Parker, manager of the talking machine department of Gimbel Bros., Milwaukee. The fumed oak cabinets are very much in demand and hardly enough can be obtained to fill orders. Mr. Parker says the $150 Victrola is the leader of them all in number of sales, although the $100 style is not far behind. Among the best sales reported by Mr. Parker are: Albert C. Downing, illustrious potentate of Tripoli Temple, Nobles of the Mystic Shrine, $250 Victrola; Fred Zwaska, champion of Milwaukee golfers, $150 Victrola.

Stampf & Langhoff, Ltd., who have been operating a large department store at Grand avenue and Second street, in addition to six men's stores in various parts of the city, will discontinue the department store about July 1. The store has been representing the Columbia.

The Premier Talking Machine Co., 220 West Water street, is one of the heavy advertisers in Milwaukee newspapers and as a result is getting a good share of the business. The concern is wholesale and retail distributers of the Premier for Wisconsin.

The Elginola Talking Machine Co., of this city, is making a strong bid for patronage, not only in Milwaukee but throughout the State. Frank Rose, general manager, has spent much of his time on the road and reports good wholesale as well as retail sales.

Word has been received in Milwaukee that the Automatic File & Index Co., Green Bay, Wis., is largely extending its facilities, particularly in the department devoted to talking machine and music cabinets. A two-story addition, 40 by 100 feet, is now under way.

Thomas P. Ratcliff, representing the educational department, and G. F. Floyd, Wisconsin traveling representative of the Victor Talking Machine Co., spent the week of May 15-20 in Milwaukee assisting the Badger Talking Machine Shop on the occasion of its formal opening.

The Hannah Drug Store, at Mangum, Okla., has added a full line of Victor-Victrolas, records and supplies.

Despite Restrictions Due to Governmental Action on Supplies the Talking Machine Trade in England Continues to Exist—Difficulties Are Many But Efforts Are Being Made to Solve Them—Members of Trade Keeping in Touch with Developments—Congratulations on J. E. Hough's Marriage—Music Trade Men to Meet in Convention—Budget of His Master's Voice News—Pathé Frères May Manufacture in England—New Columbia Records by Mme. Clara Butt—News of Month

LONDON, ENG., E. C., June 4.—Notwithstanding the exigencies of present circumstances, it is a matter for some gratification that the British talking machine trade continues to exist. As is well known official action would tend to confine to this country alone such trade as with the restriction of supply parts, gramophone manufacturers are able to cultivate. In other words, the business activity of ourselves and of our buyers from overseas, is seriously threatened. The total extinction of trade in musical instruments is scarcely possible; though to be sure, our commercial path is strewn with formidable obstacles. Difficulties are made to be overcome. By concentrated effort, it is within common recognition that so far, the trade has demonstrated fully its ability to protect the interests of our industry, and if to-day it is up against a bigger proposition in the recent prohibition of imports and exports, we may rest assured that every effort is being put forth to obtain reasonable concessions from the powers that be.

The Musical Industries' Emergency Committee has amalgamated with the Music Trades Convention, and much good work has already been accomplished under the energetic secretaryship of M. E. Ricketts, of the Gramophone Co., Ltd. Sir Guy Granet, representing the Board of Trade Restriction of Imports Department, lent a sympathetic ear to the views and opinions of a representative deputation from the Music Trades Convention, and by request, he has since received some valuable data as to the component parts absolutely necessary for musical instrument manufactures, and is also in possession of a compromise proposition anent the amount of tonnage which could be dispensed with in the event of the granting of restricted licenses. It may be assumed that as the Government very naturally desires to maintain its trade sources of revenue, it will not readily restrict altogether the trading proclivity of a community which has millions of pounds sterling capitalized and disburses large sums in wages to thousands of employes. Some evidence that this view is not unreasonable is found in the fact that manufacturers have so far experienced no great difficulty in obtaining export licenses. We may, therefore, without detriment to further and persistent representations in official quarters, adopt a sanguine anticipation that matters will not become as bad as some would have us believe. Nevertheless, it is very necessary to continue a strong propaganda against any further inroads into the welfare of the musical instrument trade, and to this end, it is expected that all live dealers will respond by exercising their best efforts in support of those who are giving so much time and trouble to the protection of trade interests.

Present Trade Satisfactory—Outlook Not Bright

It is pleasant to note that from all sources reports indicate that talking machine trade in general continues to maintain a fairly steady position. All things considered, the sales of records are particularly good, especially in the industrial centers where the purchasing power of the masses would seem to be only restricted by its desire to lend financial aid in the prosecution of this terrible war. The class of record that is most in demand varies considerably, according to local conditions. Bulk sales are represented by topical ditties, the lighter type of music, etc., but of the whole a very respectful percentage of sales may be classified under the heading of standard works, ballads and the serio-sentimental items. Musical comedy and revue music is in fair demand, which also may be said of the classical record issues.

On the machine side, things are still in an unsettled state, and may be expected to so continue. There is a shortage of all supplies, and what few instruments are available would seem to be sold before they are made, judging by advance bookings, and the almost frantic letters manufacturers receive from their dealers asking for deliveries.

Since the introduction in Parliament of a bill for securing general service from all men of military age, it is feared that the output of musical goods may be still further curtailed. It is, of course, inevitable!

J. E. Hough Married

The indication given in my last report of the prospective marriage of a leading British gramophone record manufacturer, is now au fait accompli. It is no less a personage than our old friend, J. E. Hough, the father of the trade,

Willowbrook Grove, Camberwell, London, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 85)

whose marriage with a lady of sweet mien, Mrs. Harriet Marland, was solemnized last month at St. Luke's Parish Church, West Norwood. The happy event was preceded by an interesting ceremony, the memory of which Mr. Hough will cherish all his life. It consisted of a presentation by the whole staff of the Edison Bell Works of a silver tea and coffee service, an illuminated address and gold wrislet watch with band of particularly choice design. In his acknowledgment, it was obvious that Mr. Hough was much moved by the feeling of affection displayed by his employes toward himself, and in this sense he gave ample evidence of his appreciation, especially remarking upon the symbol of the illuminated address which for his own part represented a band between them that could never be broken while he lived.

Attended by a wide circle of trade and private friends and relatives from all parts of the country, the wedding itself passed off pleasantly and smoothly. The bride was given away by Robert Marland, and as best man, Harold Hough acquitted himself well.

During the reception held at Willoughby Hall, close by the church, Mr. and Mrs. J. E. Hough clasped the hand of friendship and received the congratulations of some one hundred and fifty guests, whose presence, it may be said, stood for some, if totally inadequate, recognition of the wide popularity and general esteem in which the bride and bridegroom are held. On behalf of Mr. Hough's many American friends, and from myself, I would take this opportunity of extending hearty felicitations upon the happy ceremony and in spirit raise a glass to toast long life, prosperity and happiness to bride and bridegroom!

The recording band of J. E. Hough, Ltd., under the baton of Victor Willis, provided an excellent musical program during the wedding breakfast and between the speeches, which latter by the way, were couched in terms of especial warmth. In reply to the usual toasts, Mr. Hough gave free rein to his thoughts which, though of a kindly, humorous turn, revealed at times a sense of emotion typical of his high character and general good nature. To all those who had assisted in the ceremony he paid handsome tribute, but it was very evident that what touched him the most, if one may be permitted to say so, were the many expressions of loyalty and affection from his extensive staff. He gave himself free expression to these feelings and assured his employes that he fully reciprocated their manifestation of respect and love.

The unavoidable absence of His Worship the Mayor of Lambeth, due to matters connected with the Royal Command in reference to a military contingent, was feelingly referred to by Mr. Hough.

Through her "worser" half, Mrs. Hough intimated her grateful thanks for the warmth with which all had received her, and she very rightly felt that she had not come amongst strangers.

A number of well-known vocalists and variety artists were present as friends of Mr. Hough, and, perhaps, needless to say, rose to the occasion with special contributions from their repertory.

The gramophone trade was strongly represented by manufacturers, factors and dealers, a list of whom only the restrictions of space forbid.

Of the presents, a real fine array was made of almost everything most prized by a newly married couple. If they represented some criterion of the general esteem in which Mr. Hough and his good lady are held, then it is unmistakably sincere.

Again, hearty congratulations and good wishes!

Sixth British Music Convention

The Sixth British Music Convention was held this year at Harrogate, from May 22-25 inclusive. Owing to the necessity of posting my matter earlier than in pre-war times, I am precluded from sending a report until next month. The advance program, however, affords some idea of the subjects which the various sections of the convention will lay under discussion. The trade meets this time under exceptional circumstances and will have before it many difficult problems to elucidate. Among the subjects down for discussion may be mentioned "Standardization of Manufacture and Trade Methods," "British Trade Overseas," "The Adoption of a National Schedule of Minimum Sheet Music Prices," "The Hire Purchase System," etc. Various papers touching upon important trade conditions after the war will be read and fully discussed. Altogether, the convention has planned a busy time, and one may perhaps be permitted to express the hope that practical effect will duly be given to its findings.

Taxation Does Not Affect Home Entertainment

The introduction of an entertainment tax by the British Government gives T. E. Osborne, of Belfast, scope for a timely press announcement. Perhaps no other trader makes such good use of topical events as our Belfast friend, who on this occasion devotes his press advertisements to reminding the public that taxation does not affect home entertainment by means, of course, of the gramophone!

Pathé Frères in England

The great French house of Messrs. Pathé Frères, we learn, has in contemplation the manufacture of its products on this side of the Channel. Factory preparations are proceeding apace!

Captured Even the Dialects

FROM OUR LONDON HEADQUARTERS—(Continued from page 86)

pearean scholars, Professor Brandt, in the course of a Shakespeare tercentenary address, disclosed the fact that before the war "Junior inquirers into English philology were systematically sent from Germany to England to make gramophone records of English and Scottish dialects." Really!

Leading Seaman Tomsett, D. S. M.!

In honor to the above gentleman who had been in its employ for some five years, the Columbia Graphophone Co. recently gave a little complimentary dinner at the Café Marguerite, London. Louis Sterling occupied the chair and was ably supported by other Columbia officials. Tomsett was on a mine-sweeper somewhere in the North Sea. Two mines became entangled in the gear—two brave men volunteered to release them. One was Tomsett. The terrible operation cost him an arm; yet he freed that mine! In vivid and thrilling words, the story is told in verse by Herbert C. Ridout, and it makes fine reading of how Tomsett won the Distinguished Service Medal.

Wide Variety in New Record Program

If, as the Zonophone Co. says in their latest bulletin, "Variety is the spice of life," its new record program will afford much pleasure in the huge camp of Zonophone dealers. Obviously, the list under review will make a very wide appeal if only by reason of its choice and varied selection of selling titles. The popular lyric tenor, Sidney Coltham, delivers himself well of "Love in her Eyes" and "Where'er You Walk" (Handel), and as usual, the Black Diamond Band presents some exquisitely played contributions—overture part 1 and 2 of "Endure to Conquer" and selections from "Tina," a recent musical comedy success on this side. The foregoing are twelve-inch double records. The ten-inch items bristle with selling value and include further records by the Black Diamond organization. Mr. Hatherley Clarke, counter tenor (with chorus and orchestra), contributes two fine numbers, "White Wings" and "Little Sweetheart, Come and Kiss Me," which will unquestionably please the public. Two "side-splitters" by Whitlock and Bluff teem with pure unadulerated humor, "Shipwrecked" and "Schmidt and the Special Constable" being well calculated to enjoy enormous sales. Jack Pleasants, Nat D. Ayer, Florrie Ford and Charlie Collins are other popular artists who help to endorse the spice-of-life-variety claim.

Filling Orders for Grammavox Records

The Sound Recording Co. advises me it is in a position to fill orders for Grammavox records promptly, and pay special attention to inquiries from overseas. The company undertakes applications for export licenses and can, of course, only accept orders subject to the granting of such licenses. Many new vocal and instrumental records have been issued and its complete catalog covers a very wide field of musical taste.

France's Exports of Musical Instruments

Despite the life struggle in which she is engaged, France still manages to produce and export goods to quite a considerable amount. Musical instrument exports, for instance, reached in 1915 the respectable value of £519,600, an advance over the previous year of something like £110,000! To America the value of these exports in 1915 was close upon £40,000.

Getting Ready for Trade After the War

It is reported that in order to neutralize the Allies' trade plans for a boycott of German goods after the war, German manufacturers are establishing business houses in and incorporated under the laws of Switzerland!

Wm. Boosey Fails of Election

Wm. Boosey, of Messrs. Chappell & Co., pianoforte manufacturers and music publishers, London, who put up a gallant fight as an independent candidate for the parliamentary division of Tewkesbury, unfortunately failed to win a majority of votes. Better luck next time!

"His Master's Voice" News

Hereunder is briefly summarized the more important news received this month from the Gramophone Co., Ltd.:

An innovation of special value these sunny days is the provision of dummy records wherewith the dealer can make a fine window array and save the real records which warp and thus become unsalable when placed in a hot window. To all "H. M. V." dealers a dozen is offered free of charge.

First records of "The Bing Boys Are Here," the latest Alhambra "Revue," are ready and their prompt issue merits commendation. They are made by the versatile composer-singer, Nat D. Ayer, who is responsible for all the music of this attractive Revue. Throughout, the recording is superb and will satisfy the most critical ear.

The one and only Caruso, who records exclusively for the "H. M. V" Co., contributes no less than six new records this month. One is tempted to ask—what matters if Covent Garden Opera is closed, when here, in record form, is the great artist himself giving of that peerless voice which has so enchanted the world? I will not attempt to gild fine gold, suffice it to say that the famous tenor receives full justice at the hands of the "H. M. V." recording expert.

With the May supplementary list—full of good selling titles—goes a specially worded letter to dealers pointing out the vast scope which exists for the cultivation of strong summer trade. Outdoors, the gramophone will this year be more in evidence than ever. It, therefore, behooves all who would make hay while the sun shines to prepare to gather in a rich harvest of sales.

Up-to-date with its methods and with its productions, the Gramophone Co. continues, as usual, the issue of some fine sales-publicity literature, window bills, shop-hangers, etc. Of the latter category, a series of new artistic posters is announced. As a matter of fact they may well be termed pictures for, pleasingly executed in colors, their artistic effect is such as to represent an ornamental adornment on the walls of any dealer's demonstrationg rooms. The artist's photo is superimposed on a suitable design in colors, the whole justifying the purchase of a special frame. These pictures are free to dealers who will give them a prominent display.

Mention should be made of the fact that "His Master's Voice" Co. is well to the fore with its daily newspaper and other press advertisements. All special issues of new records are given suitable publicity and needless to say the record shipping department has little, if any, time to think matters over.

To Issue Playing Card Sets

Some two or three issues back, I mentioned in these columns the Winner Record Co.'s intention to issue a series of playing-card sets. These, I now learn, are ready. The cards are manufactured by the well-known firm of De La Due & Co., whose work is of the finest quality. the back of each card bears the famous Winner trade mark in colors, the words being picked-out in gold, and the whole strikingly relieved on a background of crimson. Each pack is put up in a special case, the whole being priced at a nominal figure to dealers for resale at a profit. It is a fine advertising plan and those interested should write for sample card, terms, etc., to the Winner Record Co., Ltd., Willowbrook Grove, Camberwell, London, S. E.

Records by Historic Band

It is not generally known that the Third Reserve Battalion Scots Guards Band of drums, fifes, bugles and bagpipes marched the Seventh Division of the British army in Flanders up to the Battle of Ypres, one of the most desperate and bloody battles of the war. They stayed too in the fighting line for a period, doing ambulance and other work, during which time several were killed and wounded.

When they returned to England to rest, the Invicta Record Co. with admirable enterprise, secured the services of this famous band for the making of a series of fine records. The fifes, drums, bugles and bagpipes have all recorded in a realistic manner, and the records are ex-

FROM OUR LONDON HEADQUARTERS—(Continued from page 87)

pected to command enormous sales.

"Brave Women Who Wait" is one of England's biggest songs at the present moment, and on "Guardsman" records seems likely to break all records.

The Invicta Recod Co. has been busily recording during the past month and intends to continue in anticipation of a record season. Owing to additions at the factory they are in a position to deliver a million more records this season than they did last.

New Columbia Records by Clara Butt

The Columbia Co. announces a magnificent record of "The Rosary" by Madame Clara Butt, who in this famous song chant seems to have surpassed herself in beauty and expression of delivery. The recording does full justice to Madame Butt's wonderful voice, and the Columbia officials naturally point with pride to the wide eulogy which their enterprise has evoked. W. H. Squire, Sir Henry J. Wood, Miss Carrie Herwin and much other first class talent contribute to the latest Columbia program, which also includes "out first" records from London's latest Revues—"Follow the Crowd," "Toyland," etc.

High Class Winner Publicity

A batch of high class publicity matter from the Winner Record Co. affords me the opportunity of mentioning that British record houses are, if gradually, coming to realize the importance of presenting their postal sales-arguments along lines which will command attention. Hitherto, any old kind of paper, printing and get-up was deemed sufficient for the purpose. But this reproach no longer holds good with the better class firms. A typical example is the steady improvement noticeable in connection with the Winner advertising matter, which for general quality is all that one could desire. Well written, telling display and generally pleasing to the eye, its value is unquestionably tenfold, and well calculated to successfully achieve its object of stimulating the sales of Winner's, which latter, by the way, shows no sign of diminishing, season notwithstanding.

BIG STORES FAVOR STEPHENS BILL

Leading Department Stores of the Country Favor Maintenance of Resale Prices

WASHINGTON, D. C., June 5.—The Stephens Bill for maintenance of resale prices is continually growing in popular favor. Hitherto it has been supposed that the larger department stores of the country were opposed to the bill, but the American Fair Trade League has proved that this supposition is false by a statement which is to be submitted to Congress, and in which it is stated that some of the largest department stores in the country have been won over to the Stephens bill legalizing uniform price contracts as sound public policy.

The league in its statement says that among the big stores in favor of the plan are B. Altman & Co., who announced its support in a letter declaring that the Stephens bill should be satisfactory to all merchants; John Wanamaker, who personally signed a petition in favor of the measure; James McCreery & Co. and Bloomingdale Bros., of New York; Lamson Bros. Co., of Toledo; the Strouss-Hirshburg Co., of Youngstown, and others of America's greatest merchants who aligned themselves with John Sheppard, Jr., the head of Sheppard, Norwell Co., of Boston, and the Sheppard Co., of Providence, in support of honest advertising methods.

"Monarchs of Music" was the heading of a remarkably strong two-page spread used by the Victor Talking Machine Co. in a recent issue of the Saturday Evening Post. This advertisement referred to the "monarch" as Caruso, the world-famous tenor, who is under exclusive contract with the Victor Co., and the Victrola XVIII., retailing at $350. The reading matter used in these two pages was brief and pithy, calling attention to the sweetness and mellow beauty of Victrola tone, and the mighty army of world-great Victor artists.

EDISON DEALERS TO MEET

From all indications every dealer who attends should derive considerable benefit therefrom, for he will learn about practical methods of marketing the New Edison.

DIDUR TO RECORD FOR PATHE

Leading Basso of Metropolitan Opera Co. Signs Contract With Pathé Frères

The Pathé Frères Phonograph Co., New York, announced last week the consummation of arrangements whereby Adam Didur, leading bass of the Metropolitan Opera Co., New York, will record exclusively for the Pathé library. Mr. Didur will make his first records in the near future, and his popuarity both here and abroad should insure the favorable reception of his recordings.

Mr. Didur, who has been associated with the Metropolitan Opera Co., for the past eight years, created the title role in the Russian opera "Boris Godounow," by Mossorgsky, the celebrated Russian composer. He achieved a noteworthy success in this role, which added to the laurels he had won in Europe and in this country. The Pathé Frères Co. regard Mr. Didur's acquisition as an important link in their fast growing chain of operatic stars under exclusive contract.

ISSUES "WAKE UP, AMERICA" POSTER

Thos. A. Edison, Inc., Provides Record Selling Aid for the Dealers

Thos. A. Edison, Inc., in line with the policy of developing the demand for new records, has just issued a most striking poster for the use of dealers featuring the preparedness song "Wake Up, America" (Edison Diamond Disc record No. 50,347; Blue Amberol record No. 2,919). The poster, measuring 14x20, has the title in large letters under a handsomely designed heading, while just below is shown a soldier in continental uniform calling to the charge. The poster should prove of real value in developing interest in the record in question.

USE ENVELOPE STOCK SYSTEM

Among the local Victor dealers who installed this month the record envelope stock system introduced some time ago by the New York Talking Machine Co., Victor distributer, are Saul Birns, 111 Second avenue, New York, and B. Guy Warner, Bedford avenue, Brooklyn, N. Y. Both of these dealers are well pleased with the results obtained from the use of this system, as it eliminates guess work and enables the dealer to buy records from actual sales statistics.

EXPECT BUSY SUMMER IN BALTIMORE

Business Outlook Continues Excellent—The Hub to Handle Talking Machines—Sanders & Stayman's New Quarters—J. M. Mann to Install Victor Line—Leading Concerns Make Splendid Reports Regarding Business

BALTIMORE, MD., June 5.—Indications are that the talking machine dealers in this city will be busily engaged all summer. Although one of the summer months has started they report that there has not been the least let-up in business and all that is hindering some of them is an inability to secure sufficient machines to supply the enormous demand. This is particularly true of the distributers. Some of them are pretty well "up in the air" while others seem to be getting some very good shipments. The record sales also are going big and many of the retailers are having big rushes on this end of the business.

While many high priced machines are being sold, the demand for cheaper ones seems to be gaining considerably. This is held to be due to the fact that many persons are going to the country and shores and are taking along small machines for amusement while away.

Of particular interest to the trade is the removal of the Sanders & Stayman Co., representatives of the Aeolian-Vocalion. This house also handles the Victor and Columbia lines. It would be hard to imagine a better establishment in every particular than the one this house has opened at 319 North Charles street. The talking machines are handled on the first floor and there is plenty of room for everything. The entire interior is of the very best quality and the numerous sound-proof booths are enameled in white. The appearance is a most striking one.

Another important announcement is that the Hub, the big department store, will open a talking machine department in conjunction with a piano department at the corner of Charles and Fayette streets, the building vacated by the Sanders & Stayman Co. The location is a good one, being directly in the heart of the city. Charles B. Noon, who came to Baltimore from St. Louis, to handle the piano department, will have charge of the talking machine department. The piano department has not been established as yet. The house handles Columbia and Edison machines.

Still another move of interest to the talking machine trade was the announcement that the Joseph M. Mann Piano Co. would install the Victor line. To prepare for this department in conjunction with his piano department, Mr. Mann has taken over the entire building where he is located. He expects the new department to open by July 1.

The talking machine distributers are much pleased with the way things are moving along.

May was a wonderful month with the Columbia headquarters here, according to A. J. Heath, local manager. It went far ahead of the same month of 1915. During the month Mr. Heath made a tour of the South, visiting Richmond, Roanoke, Norfolk and many points in North Carolina. W. T. McCoy, of Charlotte, has signed to handle the Columbia line.

W. L. Eckardt, district manager of the Columbia; James P. Bradt, general sales manager for the Columbia, and Frank Dorian, general manager of the Columbia's dictaphone department, visited the city during the month.

UKULELES

The biggest sellers in the small musical instrument business. Why handle inferior machine-made American imitations when you can get at similar prices the genuine hand-made instruments of

Jonah Kumulae, Honolulu

The old, thoroughly seasoned native Hawaiian Koa of which they are constructed is greatly superior to any other wood in tone quality—Kumulae instruments have no superior in this respect.

E. H. LANSING
611 Washington St. BOSTON

Remarkable reports are made by W. C. Roberts, manager for E. F. Droop & Sons Co., Victor distributers. He says that May was 90 per cent. better than the corresponding month of last year, and that during the first two days of this month 85 per cent. more business was done than during the entire month of June of last year. Mr. Roberts paid a visit to the factory a few days ago. He says that he is getting some good shipments of machines and he is hoping this good work will continue.

Henry Eisenbrandt, who has charge of the talking machine department of H. R. Eisenbrandt Sons, Inc., also says that things are booming, and that his only complaint is that he is unable to get as many machines as desired. He has just accepted two large orders with the provision that they be filled when possible. This house distributes the Victor lines. The same complaint comes from Cohen & Hughes, also distributers of the Victor. Some big orders are being filled by the house and the demand for machines continues.

Jesse Rosenstein, of the National Piano Co., Pathé distributers, reports big wholesale and retail business, and is suffering to some extent because he is unable to get enough machines to meet the big demand.

The retailers also report good business with numerous sales of high-priced machines. This is particularly true with William Knabe & Co., where the Victor line is handled. The business of May was far better than that done in April by the company, reports Milton Boucher, manager of the talking machine department. Among the sales made was a $200 machine to Dr. Hand, of the University of Maryland Hospital. The machine was placed in one of the sun parlors at the hospital and is being used for the entertainment of the convalescing patients.

INCREASE FACTORY FACILITIES

The Nanes Art Furniture Co., New York, manufacturer of Savoy gramophones, has further increased its factory facilities, and in addition to manufacturing its own cabinets, is now turning out cabinets for a number of prominent manufacturers. The additional manufacturing capacity at the company's disposal will enable it to handle a very large cabinet output. Miss Elizabeth T. Nanes, secretary and general manager of the company, states that the demand for Savoy machines is steadily increasing, the call for the higher-priced models being particularly active.

A PROGRESSIVE BROOKLYN DEALER

One of the aggressive and successful Victor dealers in local territory is George Millard, 1803 Myrtle avenue, Brooklyn, N. Y., who has built up a profitable Victor trade in the city of "trolleys and rubber-plants."

Mr. Millard attributes a considerable portion

Warerooms of Geo. Millard

of his success to the fact that he pays close attention to the condition of his record stock, using a system which enables him to keep his stock up-to-date and complete at all times, in addition to furnishing him with a key to the likes and dislikes of his patrons.

A portion of Mr. Millard's store is shown herewith, and it will be noticed that that record stock is arranged so that it may be handled with maximum efficiency and convenience. Mr. Millard also specializes on the sale of higher-priced Victrolas, in which he has been very successful.

The Reynolds Music Shop at Bisbee, Ariz., reports excellent business in the Columbia Electric Grafonola.

E. S. BEALE RESIGNS AS MANAGER

Gives Up Direction of Burgess-Nash Piano Store in Omaha by Direction of Physician

OMAHA, NEB., June 3.—Edgar S. Beale, for the past sixteen months manager of the Burgess-Nash piano store in this city, and one of the most capable and best-liked men in the retail field, has resigned his post, effective June 1.

Mr. Beale has been active in the piano business for the past ten years. He came to Omaha on February 1, 1915, after having been for seven years manager of the St. Louis branch of the Estey Co. Previous to that time he was connected with Phillip Werlein, Ltd., at New Or-

During his stay in Omaha, he has developed the Burgess-Nash piano store into one of the handsomest and most attractive in the city, meanwhile building up a trade which was the object of extreme pride on the part of his house, both in the piano and Victrola departments.

Mr. Beale's action was prompted by the dictum of his physicians, who insisted that he take a vacation and a much needed rest. During the summer he will spend his time chiefly on the Gulf coast.

VICTOR CO.'S NEW RECORD CATALOG

The Victor Talking Machine Co. announced to its dealers this week that the May 1916 edition of the Victor record catalog is now ready for distribution. This new catalog does not differ in make-up and arrangement from recent preceding editions, as it has been conclusively proven that the present method of indexing and listing makes for maximum efficiency and convenience. The many extra pages in the May edition indicate the remarkable activity of the Victor recording department during the past six months, the record catalog being a semi-annual publication.

The Victor Co. has also sent out to its trade a new numerical price list of all repair parts for Victors and Victrolas.

The White Furniture Co., of Mebane, N. C., is making preparations to manufacture talking machine cabinets.

VIEW OF COLUMBIA GRAPHOPHONE CO.'S NEWEST PLANT

Herewith is shown the first photograph of the new factory building purchased a fortnight ago by the American Graphophone Co. (Columbia Graphophone Co.) at Bridgeport, Conn. This factory, which is now being put into shape for occupancy by the Columbia Co., will be used exclusively for record production, and will materially augment the company's record output, which has shown tremendous increases during the past year or two.

This new factory is credited with being one of the most up-to-date and efficiently arranged manufacturing plants in Bridgeport, and was formerly occupied by the Birdsey-Somers Co. It is a four-story building, and with the ground which was included in the purchase occupies an area of six and one-half acres. The building itself has 78,000 square feet, with every modern convenience for the comfort of employes. There is a power and lighting plant connected with the factory building which is not shown in the accompanying photograph.

According to present plans the Columbia Co. will take formal possession of the new plant the early part of the month, and it is likely that 3,000 expert workmen will be employed in the factory.

This latest purchase by the Columbia Co. is the third of a series of recent additions to the company's manufacturing facilities which indicate the wonderful strides that the Columbia product is making. Only recently a new seven-story factory building was completed adjoining the main buildings of the Columbia Co., and a few weeks ago the contract was awarded for the erection of a three-story addition which will give 30,000 additional square feet. With all of these new buildings it is more than likely, however, that the demand for Columbia products the next few months will far outdistance the factory output, but it is encouraging to note that the company is exercising every possible means to co-operate with its dealers, and give them efficient service.

The New Columbia Plant, Formerly the Birdsey-Somers Factory

COLUMBIA IN WESTERN NEW YORK

Several New Dealers Signed Up Recently by Buffalo Headquarters

BUFFALO, N. Y., June 4.—Manager W. O. Sprague, of the Columbia Graphophone Co., with headquarters in this city, reports an exceptional demand for the products of that company in Western New York. The local offices have closed a number of important contracts with dealers recently, the new dealers including Kuhn Bros., Buffalo; Martin Bros., Syracuse, and Praub & Son, Auburn. A number of other deals are pending.

The Doyle Furniture Co., of Galesburg, Ill., recently established a record for a long-distance shipment, when it sent a Victor-Victrola to one of its customers in Sweden.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., June 5, 1916.—RESONATOR FOR SOUND REPRODUCING DEVICES.—William B. Hollingshead, Mt. Vernon, N. Y., assignor of one-half to Waldo G. Morse, Yonkers, N. Y. Patent No. 1,173,272.

In the following specification is described an improved resonator in connection with a talking machine, but it is obvious that it may be used in other situations.

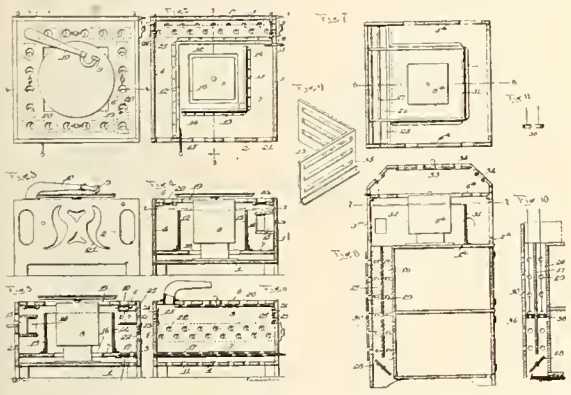
The object is to provide a resonator for talking machines or the like in which the megaphone or horn is entirely eliminated.

A further object is to produce a device in which the intensity of the sounds may be increased or diminished.

A further object is to increase the volume of tone by inserting in the path of the sonorous waves, bodies capable of vibrating together with the principal vibrating body. These vibrating bodies or septa are rigidly attached to the body of the resonator which incloses the talking machine mechanism and with which the tone arm of the talking machine communicates. The septa have free edges which are capable of free vibration. The septa may be made of variable thickness or may be weighted to synchronize them, and the walls of the resonator or cabinet are provided with valved openings for the escape of the amplified sound waves.

In the drawing this invention is illustrated in connection with a phonograph of the disc type, but it is to be understood that it is not limited to machines of this character, but is equally adaptable to talking machines of the cylindrical type.

Fig. 1 is a plan view of the improved resonator showing the same applied to a disc record talking machine. Fig. 2 is a horizontal section on the line



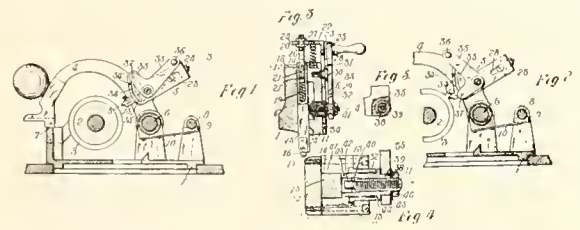
2—2 of Fig. 4. Fig. 3 is a front elevation of the device. Fig. 4 is a section on the line 4—4 of Fig. 1. Fig. 5 is a section on the line 5—5 of Fig. 2. Fig. 6 is a section on the line 6—6 of Fig. 2. Fig. 7 is a horizontal sectional view of a modification, the section being taken on the line 7—7 of Fig. 8. Fig. 8 is a section on the line 8—8 of Fig. 7. Fig. 9 is a perspective view of a modified form of septum. Fig. 10 is a detail view of a further modification. Fig. 11 is a detail view of a still further modification showing a pair of unperforated diaphragms.

MACHINE FOR SHAVING SOUND RECORDS.—Charles Schiftel, Montclair, N. J., assignor to the New Jersey Patent Co., West Orange, N. J. Patent No. 1,174,292.

This invention relates to machines for shaving sound records when it is desired to remove the outer portion of a sound record tablet in which the record is impressed in order that a fresh surface may be presented to be recorded upon, and more particularly to an improved construction for effecting the movement of the shaving knife into and out of operative position and the locking of the same in operative position.

This invention has been especially designed for embodiment in machines in which the shaving knife is adapted to be held in engagement with a rotating record of wax-like material, such as are described, for example, in a patent to John Ott, No. 796,857, dated August 9, 1905, and in an application of Frank E. Traphagen, Serial No. 592,976, filed November 18, 1910, and entitled shaving knife for sound records. In machines of this character heretofore employed, much difficulty has been experienced in readily effecting an adjustment of the shaving knife to secure the proper cut, that is, a cut that is neither too deep nor too shallow.

The principal object of this invention is to obviate this objection, and in accordance with this object there is provided in a machine of this type, an improved construction whereby, regardless of the amount of material which has previously been shaved from a record for which the machine is adapted, a single and easy manipulation first effects the engagement of the cutting tool of the shaving knife with the record and the projection thereof into the material of the record such a distance as to secure the proper depth of cut, and thereafter effects the locking of the knife in such position, and whereby another single manipulation



first effects the release of the knife and thereafter the return thereof to inoperative position.

Another object of the invention resides in rendering the last mentioned action more or less automatic.

This invention also contemplates the provision of a device in the form of an attachment adapted to be readily applied to shaving machines in use for accomplishing the above results.

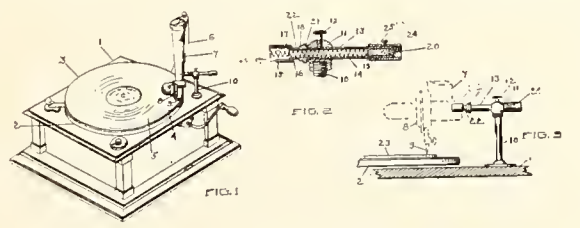
Fig. 1 is a side elevation, partly in section, of a record shaving machine in accordance with the invention with the shaving knife in inoperative position. Fig. 2 is a fragmentary view similar to Fig. 1 with the shaving knife locked in operative position. Fig. 3 is an enlarged sectional view on line 3—3 of Fig. 1, parts being shown in elevation. Fig. 4 is an enlarged sectional view on line 4—4 of Fig. 3, a part being omitted; and Fig. 5 is a fragmentary view, partly in section, showing the connection between the actuating bell crank lever and the mounting therefor.

NEEDLE SETTER.—Frederick A. Chapin, Toledo, O. Patent No. 1,173,251.

This invention relates to means for positioning a member for coaction with another member for subsequent relative travel there-between.

This invention has utility when incorporated in connection with reproducing mechanisms, especially sound reproducers of the disc record type.

Referring to the drawings: Fig. 1 is a perspective view of an embodiment of the invention in



connection with a disc record sound reproducer; Fig. 2 is a longitudinal section, on an enlarged scale, of features of the device of the invention; and Fig. 3 is a side elevation of the device, adjusted for use in connection with a different diameter record than the showing in Fig. 1, with a fragment of the machine shown.

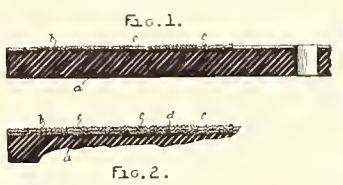
GRAMOPHONE RECORD.—Arthur Eichengrun, Berlin, Germany. Patent No. 1,175,728.

This invention relates to sound records, tablets, discs or other bodies for use in sound recording and sound reproducing machines.

Sound records used for gramophones and the like apparatus give after a very short use indistinct and impure tone. This is caused by miscroscopically small injuries to the edges of the sound grooves or phonetic characters. This phenomenon is due to the brittleness of the foundation material containing shellac, colophonium, asphalt and the like that is generally used for making such sound records. Numerous attempts have been made to obviate this drawback by replacing the usual foundation material by elastic substances such as celluloid, xylonite, gallalite, hardened gelatin, ebonite and the like. These materials, however, have not proved altogether satisfactory for this purpose. Celluloid, which was particularly recommended, is liable gradually to settle down until its surface becomes level, the phonetic characters then becoming partially or entirely obliterated; moreover celluloid is liable to shrink and its tension then becomes so altered as to warp the record. Apart from this physical change of celluloid the material itself is too hard for the purpose in question and produces a shrill harsh tone, and it is inconvenient to employ.

The present invention aims at obviating these drawbacks and at imparting to the record body the requisite degree of toughness coupled with a sufficient but not undue degree of hardness, and also at very materially improving the tone and the details of the phonetic record and at simplifying the process of its manufacture. For this purpose, according to the present invention the foundation layer or body of the record is coated with a layer of cellulose ester containing the acetyl group prior to receiving the sound record and said sound record is then impressed in the layer of the cellulose ester and preferably also in the layer of other material immediately below said cellulose ester. Record bodies produced in this way retain the phonetic characters permanently because the layer of cellulose ester, containing the acetyl group is not liable to level down like a celluloid layer. Such records are not liable to shrink and in consequence of the plasticity and non-elastic character of the layer a fine, soft, mellow tone is obtained.

Owing to the high concentration of the solutions which can be prepared with cellulose ester containing the acetyl group, they can be applied to the record disc in one operation without the necessity of successive coatings or applications. The plasticity of the cellulose ester containing the acetyl group can be modified or adapted to the material in conjunction with which it is to be used, that is to say to the material forming the underlayer or body. This is of vital importance to the production of a good tone because it will be obvious that the particular kind of sound obtained from a record body of one kind of material (say, for example, cardboard) will be very different from the one obtained from a



record body of a widely different material, such, for instance, as vulcanite.

A further advantage is that where the film of the cellulose ester is so thin that the sound record is impressed not only in said film, but in the under layer, the guiding of the needle is effected by said under layer as well as by the cellulose ester layer, while the cellulose ester will protect the walls of the sound record in the under layer and prevent them from crumbling or being otherwise damaged or defaced.

It has sometimes been found convenient not to make layers of cellulose ester containing the acetyl group alone but to employ mixtures of the same with softening agents such as di-chlorhydrin or with liquid or solid bodies adapted to impart increased plastic properties to the layers of cellulose ester, such, for example, as camphor substitutes, and it will be obvious that if desired organic and inorganic filling materials, especially in a finely powdered state may be admixed therewith. Of inorganic filling materials, mineral powders presenting a certain resistance to the needle have been found especially convenient, such, for example, as gypsum, kieselguhr, or the like.

The invention is diagrammatically illustrated in the accompanying drawings, in which:—

Fig. 1 represents in section one form of the disc; and Fig. 2 another form thereof.

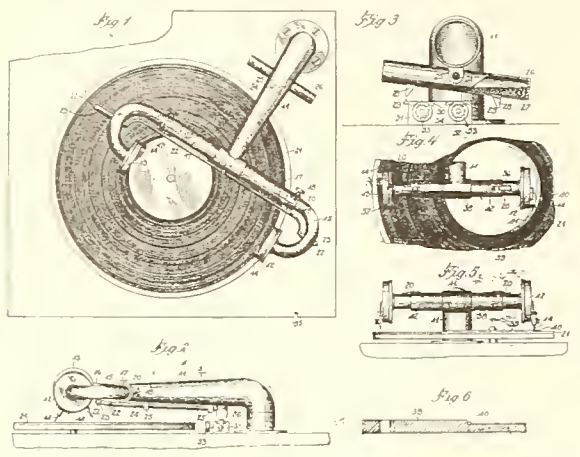
REPEATER.—Edward S. Keogh, New York. Patent No. 1,175,639.

Among the principal objects which the present

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 91)

invention has in view are: to provide means for automatically replaying a disc record; to diminish the time interval between the repetitions of the playing of said disc record; and to noiselessly suspend and inaugurate the playing of said record.

Drawings.—Fig. 1 is a plan view of a talking machine employing a record disc, showing in conjunction therewith a repeater constructed and arranged in accordance with the present invention; Fig. 2 is a side edge view of the same; Fig. 3 is a



cross section of an enlarged scale, taken as on the line 3—3 in Fig. 2; Fig. 4 is a top plan view showing a fragment of a record disc, and in conjunction therewith a modified form of the invention; Fig. 5 is a front edge view of the construction shown in Fig. 4; Fig. 6 is a detail view of an enlarged scale, showing in cross section a central fragment of a disc constructed and arranged in accordance with the modified form of the invention.

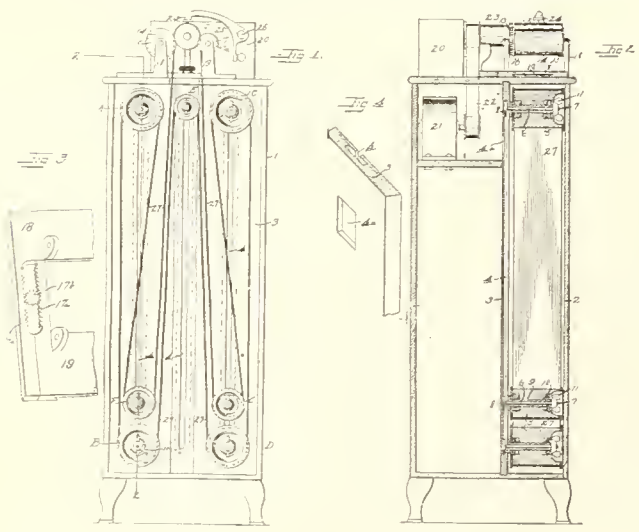
Tape Graphophone.—Isaac S. Turner, Centralia, Wash., and Theodore B. Turner, Penticton, B. C., Canada. Patent No. 1,175,205.

This invention relates to improvements in acoustics, and more specifically to tape graphophones.

The object of the invention is to provide a graphophone construction that will utilize an endless tape of considerable length upon which the etching for reproduction is contained, and of a width adapted to receive a continuous line of etching successively disposed with respect to the width of the tape. This system of arrangement provides for the placing upon a single record a very lengthy production, or an entire music or other program which may be reproduced without interruption for the frequent changing of records, as when small cylinder records are used. At the same time the device may be interchangeably used for cylinder records.

A further object of the invention is to provide a novel endless tape construction for use in recording and reproducing sound when used in connection with this novel graphophone.

Referring to the drawings, which are merely illustrative of the invention, Fig. 1 is a side elevation



of the device with the side cover removed to show the interior arrangement of the parts. Fig. 2 is a vertical sectional view taken on the line 2—2 of Fig. 1. Fig. 3 is a detail view of the sliding support construction. Fig. 4 is a fragmental detail of the partition showing the cut-out portion adapted to admit the shaft of the rollers to the slots.

Sound Box for Phonographs.—Joseph C. Kulp, Atlantic Highlands, N. J. Patent No. 1,174,996.

This invention relates to improvements in the vibratory members of the sound box of a phonograph, and more specifically to an auxiliary diaphragm, located between the usual diaphragm and the outlet to the amplifier.

This invention is an improvement on the auxiliary diaphragm disclosed in application Serial No. 37,904 filed July 3, 1915.

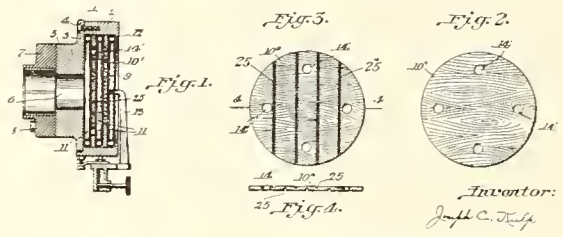
One object of this invention is to provide an auxiliary diaphragm of such material and construction, as will produce a more musical and softer tone.

A second object is to provide such a diaphragm as will produce a tone, amplified to a greater degree than is possible by the use of the usual diaphragm alone.

A third object is to provide such a diaphragm, as will produce better enunciation than heretofore attained.

A fourth object is to produce a wooden diaphragm, which will vibrate substantially as well across the grain of the woods as with the grain.

Fig. 1 illustrates a sectional view through a phonograph sound box equipped with an auxiliary diaphragm. Fig. 2 illustrates a plan view of one form of the improved diaphragm. Fig. 3 illustrates



a plan view of a modified form of this improved diaphragm, and Fig. 4 illustrates a sectional view along line 4—4 of Fig. 3.

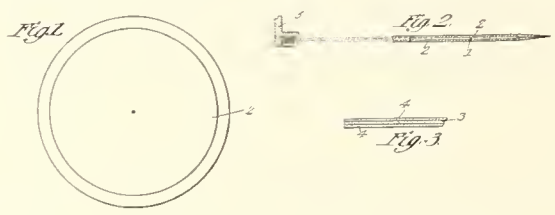
Diaphragm for Sound Reproducers.—James H. Sutlive, Keokuk, Ia. Patent No. 1,176,326.

This invention relates to diaphragms for sound reproducers, one of its objects being to provide a composite diaphragm whereby the vibration is distributed practically equally over the entire diaphragm and, consequently, the harsh tones so often produced during the reproduction of high tones are avoided while at the same time all tones reproduced are more natural because of the larger vibrating surface.

A further object is to provide a diaphragm which can be substituted readily for those now in use.

In the accompanying drawings the preferred form of the invention has been shown.

In said drawings:—Figure 1 is a plan view of a



diaphragm constructed in accordance with the present invention. Fig. 2 is an enlarged section therethrough. Fig. 3 is an enlarged section through a modified form of diaphragm.

Phonograph Stop.—Montague Adair, New York. Patent No. 1,175,912.

The present invention relates generally to a stop mechanism for phonographs or the like in which there is a rotatable element carrying a record having a zone of grooves, and a movable element which has a motion with respect to said rotatable element during the operation of the machine.

It is well known that the extent of the zone of grooves of the record varies and in the stopping devices heretofore employed it has usually been the practice to adjust such stopping device to correspond with the extent of the groove zone prior to playing the record, the machine thereby automatically stopping when the end of the record is reached.

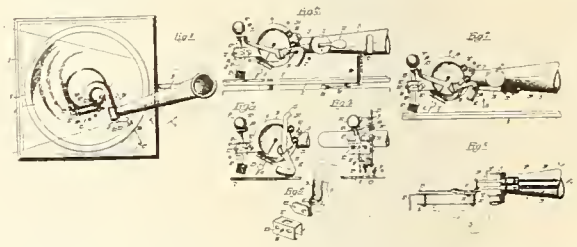
It is the main object of this invention to provide means whereby such adjustment, to fit it to each individual record, will be rendered unnecessary so that the machine will stop automatically when the end of the record is reached, irrespective of the extent of the zone of grooves.

In carrying out this and other objects the invention is characterized by a controller which is carried by the movable element and which by its engagement with the grooves of the record will control the moment that the braking element shall be permitted to operate. Preferably the braking element is also carried by the movable element, and is under the influence of a latch which normally restrains its action, said latch being in turn controlled by the controller engaging the record.

It is clear that the controller must be of a peculiar character in order to obtain this result in a practical manner. The necessary characteristics of this controller are that it must be non-playing, that is to say, its engagement with the record grooves must not produce a tune or a scratch; it must not injure the record; it must not retard the rotation of the rotatable member; it must not sensibly increase the pressure with which the sound reproducing stylus engages the record. To this end it is found that a brush makes an ideal non-playing follower for controlling the braking element in that it possesses all the characteristics above enumerated and has in addition the further characteristic that it cleans the record as the latter passes underneath the brush. This brush will preferably be set with its bristles slightly inclined and with their ends extending in the direction of rotation of the rotatable member so as to produce a soft and yielding engagement with the record.

The braking element controlled by the controller is preferably mounted on the movable element such as the swinging arm in such a way that it has a pivotal movement when engaging the record, said pivotal movement being of such a character that the braking element swings into engagement with the record in the direction of rotation of the record so that the rotation of the record once the braking element has initially engaged the same will of itself serve to additionally clamp the braking element more securely into position.

In the said drawings: Figure 1 is a conventional representation in plan of an ordinary phonograph



showing the invention applied thereto. Fig. 2 is a side elevation of both braking devices showing their relation to the rotatable element and to the record carried thereby, as well as to the movable element or swinging arm. Fig. 3 is a view of the end of the movable element or swinging arm and sound reproducer, showing the braking element in its released position. Fig. 4 is a view looking in the direction of the arrow 4, Fig. 3. Fig. 5 is a detail view of the means for securing the braking element to the swinging arm. Fig. 6 is a detail view of an adjustable member for properly positioning the controller with respect to the sound reproducing stylus. Fig. 7 is a side elevation of a modified form of the invention showing a cut-out or switch for use when an electric motor is employed to operate the rotatable element. Fig. 8 is a view looking in the direction of the arrow 8, Fig. 7.

The Denver Phonograph Co. is a new concern which has opened up at 1417 California street, Denver, Col.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

Its beauty is irresistible!

SUPPOSE you were a *buyer* instead of a seller of phonographs. You would compare the Sonora with others.

And you would find that the Sonora Swiss-made motor is unequalled in construction and design, that the tone-control is scientifically and correctly accomplished, that this instrument is *designed* (not adapted) to play all disc records, and that the features, such as the automatic stop, envelope filing system, motor meter, sound box, etc., all are of a decidedly superior character.

Finally, the grace and elegance of the cabinet work, and the marvelous purity, strength and expressiveness of the tone would convince you that there is no phonograph like the Sonora—the value and beauty of which is irresistible.

That's why there's such a tremendous demand for Sonora.

Sonora sales agencies are valuable.

If you are interested in selling "the highest class talking machine in the world," write to us.

PRESTIGE *and* PROFITS

No matter how distinctive and lucrative any dealer's line may be, the NEW EDISON would add prestige and profit. Prestige because the NEW EDISON embodies Thomas A. Edison's new art—Music's Re-Creation. Demonstrations of this unparalleled achievement have profoundly impressed many thousands of cultured music lovers with the fact that the NEW EDISON is the peer of the finest musical instruments in artistic achievement and unapproached by any in its range of musical expression.

The NEW EDISON
Chippendale—Official Laboratory Model

On the recently concluded tour of Marie Rappold, brilliant Metropolitan star, when she sang in immediate comparison with the NEW EDISON from New York to Seattle, from St. Paul to Dallas, some 30,000 music lovers and critics strained their ears to catch any difference between Mme. Rappold's living and Re-Created voices and were astounded to find there was no difference to catch.

Surely an instrument to sustain this exacting test must possess characteristics so distinctive as to place it above comparison. The prestige thus created is an invaluable asset for the Edison dealer.

Edison profits are ample. The average per sale is unusually large and requires no more effort to secure, and frequently less than with lines carrying a much smaller profit per sale.

The Edison Probationary Zone Plan gives good dealers a chance to prove that they *are* good dealers.

Details of this plan may be secured from the jobber in the list below nearest you, or from

SPECIAL—THE NATIONAL TALKING MACHINE JOBBERS' CONVENTION

VOL. XII. No. 7.

SINGLE COPIES, 20 CENTS
PER YEAR, ONE DOLLAR

The TALKING MACHINE WORLD

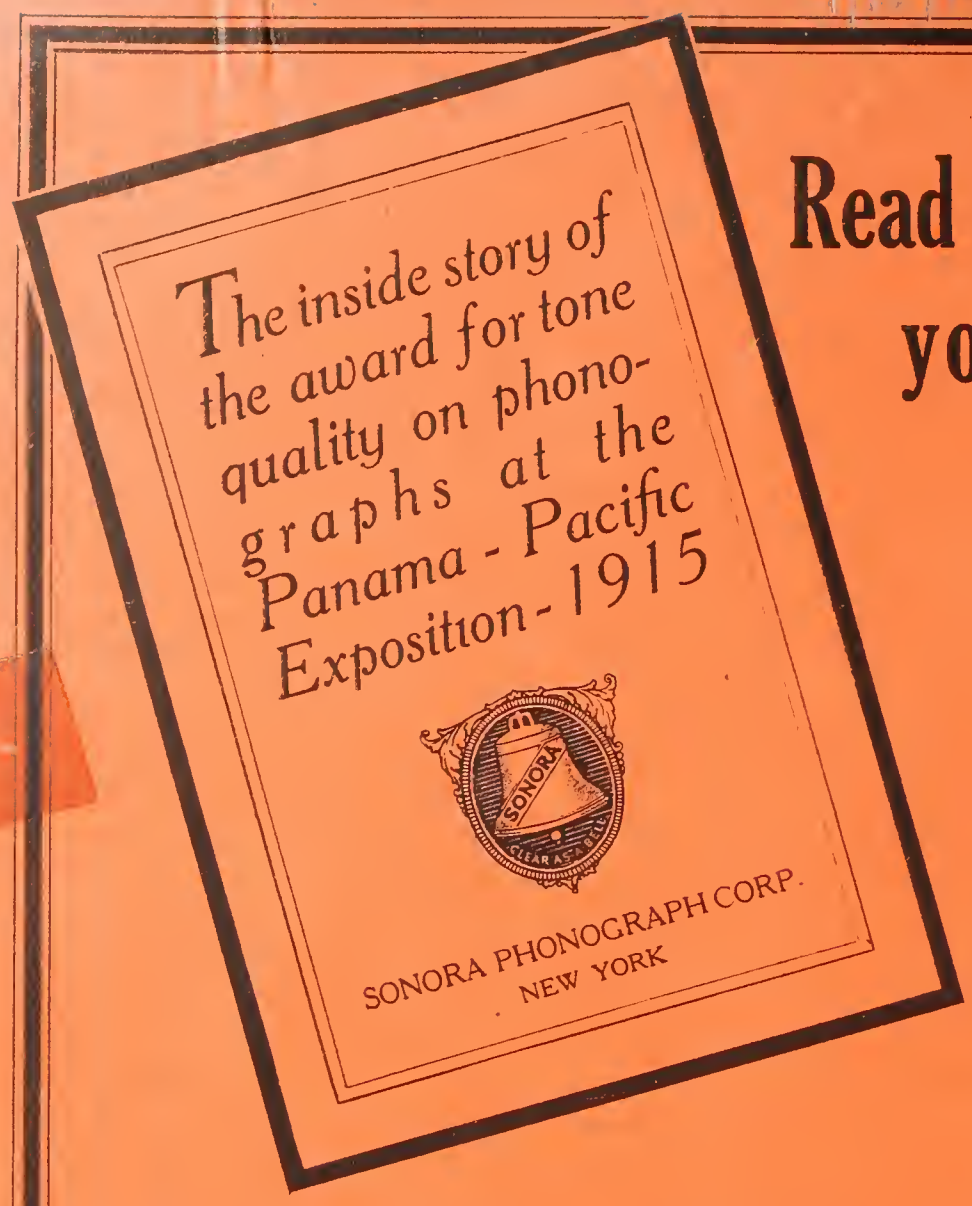
For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, July 15, 1916

Victrola XVI, $200
Mahogany or oak

The instrument by which the value of all musical instruments is measured

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.



Read what this says and you'll be convinced!

DO you fully realize what it means to win out against the competition of the entire world?

IT means that something has been done, something more remarkable than any one else has been able to accomplish.

That is the reason why the makers of the Sonora Phonograph have gathered in a little leaflet the data pertaining to the awarding of the highest score for tone quality to the Sonora at the Panama-Pacific International Exposition.

Read the letters from members of the International Jury that heard and passed on the merits of the various machines exhibited.

READ the letter of Mr. O. H. Fernbach, Secretary, International Award System, in which he states that "The only jury which heard and tested all the phonographs at the Panama-Pacific Exposition recommended that the Sonora Phonograph be given a marking for tone quality higher than that given to any other phonograph or talking machine."

These letters will show you conclusively how Sonora triumphed.

The finer the tone quality the finer the phonograph. That is self-evident.

Hear the **Sonora** *and you will agree that it is, as claimed, "the highest class talking machine in the world."*

Write for the new "Inside Story" leaflet. Sent free on request.

KEEPING SALESMEN INTERESTED

George F. Standke, Manager of Retail Department of Columbia Graphophone Co., Kansas City, Uses New Sales Credit System

KANSAS CITY, MO., July 6.—George F. Standke, retail manager of the Columbia Graphophone Co., Kansas City, is getting fine results from a new system of handling sales. The basis of this system is the giving of proper credit to each salesman for his sales. The name of every prospect secured by a salesman is entered on Mr. Standke's private book and there credited to the salesman. This prospect's name is then entered on a date card index under the date when the prospect is again to be seen. Every morning the prospects on cards of that day are given to the salesmen credited with them. But if the prospect happens to be sold by another salesman the report of the sale is made to Mr. Standke, who looks up the salesman who first got the prospect and credits him with that sale. The men break even under this plan—and experience has shown them that they do, so every fellow is on his toes to sell every prospect regardless of who is to profit by that sale.

TO TAKE RECORDS TO LABRADOR

Dr. Wilfred Grenfell Purchases Supply of Columbia Records for Expedition

MONTREAL, CAN., July 3.—Dr. Wilfred Grenfell, of Labrador fame, recently purchased a liberal supply of patriotic and popular Columbia records from Layton Bros., which he will take along with him on his coming trip to Labrador for exploration purposes.

HANDLING THE APPROVAL QUESTION

Manager A. W. Roos, of the Columbia Graphophone Co., Indianapolis, Explains How He Solved the Problem of Discontinuing Approval System Without Hurting His Business

INDIANAPOLIS, IND., July 5.—A. B. Roos, manager of the Columbia Graphophone Co. here, was recently asked by an Eastern dealer how he managed to discontinue the practice of sending records out on approval without hurting his business. Mr. Roos stated, in explanation, that about five months before the first of the year, at which time it was decided to do away with the approval system, all the clerks were notified that whenever any customers took records on approval they were to be informed that after December 15, 1915, they could get no more records on approval.

"By the time the date came around to stop the approval system," said Mr. Roos, "all our customers were acquainted with the fact and they did not have any reason to be offended. We did not lose any business to any extent and are very well pleased with the way we are getting along."

INCREASE CAPITAL STOCK

The Grafonola Co., of 913 Euclid avenue, Cleveland, O., has leased the retail store room on the first floor in the new Hotel Statler for a term of ten years. The capitalization of the concern was recently increased from $25,000 to $50,000 common stock.

Thomas F. Hennessey, of Oswego, N. Y., has secured the Edison Diamond Disc agency.

INTERESTED IN SALES TRAINING

Many Dealers and Salesmen Take Advantage of Offer of Phonograph Co., of Kansas City, for Instruction in the Selling of Edison Phonographs and Records—The Modus Operandi

KANSAS CITY, MO., July 5.—The Phonograph Co. of Kansas City, has been highly gratified the past few weeks by the response of dealers in the territory to its opportunities for training salesmen. Many of the dealers themselves have come to these schools, but the chief advantage is the training of men who will have charge of phonograph departments. During the past week, for instance, the following Edison department managers have been in: Jenkins, Red Cross Pharmacy, Bartlesville; Caney, Hogabaum Co., Pittsburg, Kan.; Houghton, O'Brien Pharmacy, Beloit, Kan. The dealers seem to prefer to send men in who can learn the business and become competent to handle the departments as a district enterprise.

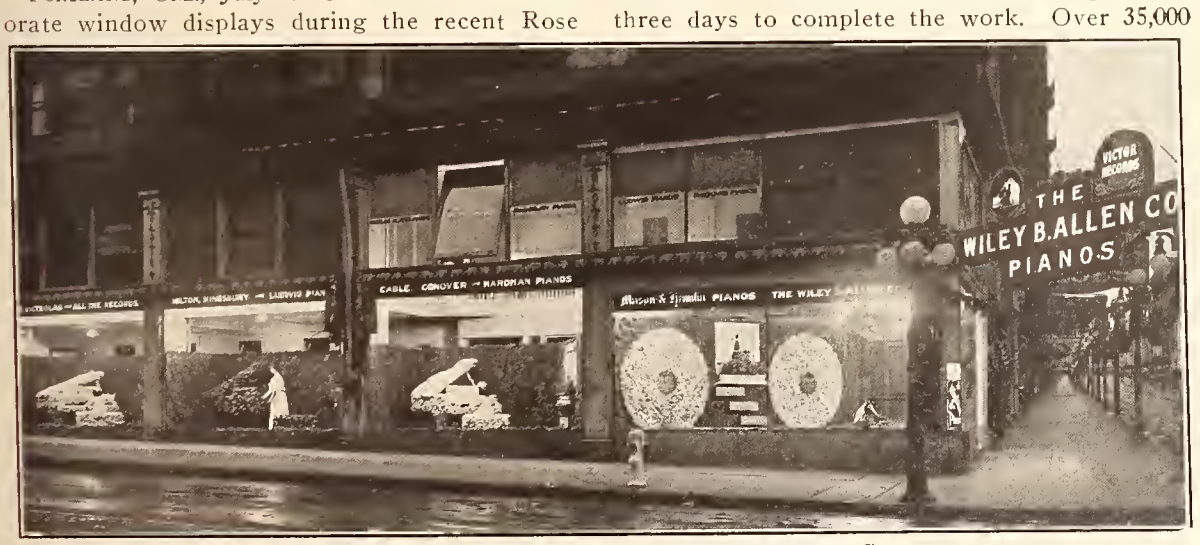
More than twenty-five dealers have already paid expenses of salesmen for a week or more at the Kansas City headquarters, and thirty more have expressed their desire to give their salesmen such training.

The company has regular floor salesmen's meetings every two weeks, and when one or two outside salesmen are in the city, they attend these sessions. When the visitors are more numerous, special meetings are arranged for them. The visitors are given special training in the service department as well as in salesmanship. The tendency this indicates is considered important—for the dealers realize that different equipment and ability are necessary to sell musical goods, than to sell the ordinary commodities in a drug store.

A FEATURE OF THE ROSE FESTIVAL

Floral Window Display of Wiley B. Allen Co. in Portland, Ore., Attracts Unusual Amount of Attention—35,000 Roses Used for the Display

PORTLAND, ORE., July 2.—One of the most elaborate window displays during the recent Rose Festival in this city was that prepared by the Wiley B. Allen Co., which occupied four windows with 100-foot frontage on the Broadway side of the company's store.



Rose Window Display of the Wiley B. Allen Co.

As will be seen in the accompanying illustration three windows were devoted to pianos and the fourth window situated on the corner to Victor records. The two big Red Seal records were built out of Caroline Testout roses on a background of moss, and were about seven feet in diameter, with real Red Seal records in the center.

The decorations were in charge of J. L. Loder, manager of the Victrola department of the store. It took the services of eight men three days to complete the work. Over 35,000 roses of various hues and carefully selected to secure uniform size were required to carry out the scheme.

Victor Record Window

LEAVES FOR SWITZERLAND

Frederic Hermann Thorens, representing H. Thorens, Ste. Croix, Switzerland, sailed Saturday, July 1, for that country after a two months' stay here. While in America Mr. Thorens closed a number of important deals whereby talking machine manufacturers will use the Thorens motor extensively during the coming year. He has been advised that the factory output will be materially increased in the near future, and the house is planning to give prompt service and co-operation to the Thorens clients. Mr. Thorens expects to return to this country within the next two months.

ORDERING LIBERALLY IN MONTREAL

Dealers, for the Most Part, Insuring Against Shortage of Machines in the Fall—Demand for Wartime Records—Dealers Attend Edison Convention—Other Trade Activities

MONTREAL, CAN., July 3.—The majority of the talking machine dealers in this city and vicinity are at present placing large orders with the manufacturers with a view to anticipating, if possible, the expected shortage that generally develops in the fall, and a great number of them will be prepared for the holiday trade when it arrives.

The Berliner Gramophone Co., Ltd., reports a large demand for the new wartime record, "Our Hearts Go Out to You, Canada," and also for "Listen to the Mocking Bird," sung by Alma Gluck. The patriotic records are increasing in popularity steadily and the Berliner Co. has recently issued an attractive advertising hanger in two colors in the shape of a large Union Jack, with mortised center, calling attention to a number of patriotic records.

Several local talking machine dealers attended the Edison convention in New York recently, including Philip, E. H. A. and Geo. Layton, all of Layton Bros. Bourget Goodwin and the Monty Bros., from Granby, Que., also attended.

The new Stewart talking machines are being featured by a number of local houses, including the Robt. Mitchell Co., Ltd., and Henderson & Richardson, of Montreal, and Allen & Cockrane, of Ottawa. A Victrola and a supply of records furnished the music for a recital recently held in Sherbrooke, Que., under the auspices of the Graduate Nurses' Association.

C. R. Coleman has resigned as manager of the Montreal branch of the R. S. Williams Sons, Ltd., which position he has held since the branch was opened six years ago. Beyond a lengthy vacation in the wilds his future plans are indefinite.

FINE HALF YEAR BUSINESS RECORD IN KANSAS CITY

Although There is a Shortage of Certain Types of Machines, Records Are Plentiful—Much Interest Displayed in Jobbers' Convention—What the Various Prominent Houses Are Doing to Stimulate Interest—Talking Machines Aid in Recruiting—News of the Month

KANSAS CITY, Mo., July 5.—With the coming of July the talking machine jobbers and dealers are looking over the figures of their business for the first half of the year with great satisfaction, for the first six months brought a larger increase in trade than a similiar period in previous years. Incidentally the month of June, with many of the houses, proved the best month of the year. A liberal volume of orders are being placed for the holiday trade, for it is realized that with an actual shortage in some styles during the summer months the dealers who want to meet demands in the fall must be prepared.

The Schmelzer Arms Co.'s talking machine department has had to scramble to keep up with the demand from dealers for machines. Every style of instrument seems to be going at top speed, and June was the biggest month so far this year, the close of the biggest six months' business the department has ever had. A. A. Trostler, manager, says that dealers are trying their best to build up their stocks, had, indeed, started as early as March to make preparations for Christmas business. But the dealers seem to be unable to make much headway, the goods moving as fast as they are secured.

Mr. Trostler recently went with the Commercial Club, which visited ninety-six towns in a week. He found dealers most optimistic.

Dealers of Kansas City territory have shown deep interest in the jobbers' convention at Atlantic City. They realize that the jobbers are looking at merchandising from the standpoint of getting goods into the hands of the customer and their interests are common. The convention will help greatly—if any help were needed—to build up a close sympathy between jobbers and dealers.

E. A. Erisman, district manager of the New England States for the Columbia Co., with headquarters at Boston, spent Saturday in Kansas City with E. A. McMurtry, manager of the Kansas City branch. The Western trip of Mr. Erisman was in line with the policy of the company to give its men an opportunity to see how other managers handle business, and it is a great help to them. Mr. McMurtry visited Mr. Erisman in Boston last February.

The Columbia branch in Kansas City has been working at top speed with an especially strong sale of high-priced machines of the $150 and $200 type. There is a shortage of smaller machines which are popular in the summer.

Mr. Blackman, manager of the Phonograph Co., of Kansas City, distributer for the Southwest, went to Wichita July 1 to assist in planning an exclusive Edison department for the George Innes Mercantile Co. The Innes store is one of the finest in Kansas—and it will go into the phonograph business "right."

The Edison Shop, of Kansas City, recently used large display space to exploit the Edison, and gave the names of dealers in the Kansas City territory, including Kansas, Missouri, Arkansas and Oklahoma. It was a notable list of high class music dealers and merchants. It is said that there are only a dozen or so places in this territory where dealers can now get the Edison, all other desirable towns having Edison dealers now.

The E. E. Trower Music Co. received its first shipment of Pathé machines June 30, and July 1 opened its retail store in Kansas City for business. It is a beautiful store, with the rugs, decorations, signs and every feature harmonizing for an impressive effect. The company started its local advertising July 1. R. L. Waters and B. W. Chappell, travelers for the E. E. Trower Music Co., distributer in the Southwest for the Pathé, are organizing the territory well, sending in many dealer-contracts.

E. S. Hall, of the Hall Music Co., resurrected the record "They're on Their Way to Mexico" last week and revived the demand by playing it while the recruiting was going on in the same building. This record came out three years ago, but the words fit the present state of affairs. The head of the commissary department had his quarters in the Scarritt Arcade, where the Hall Music Co. is located, and altogether with the music and the khaki uniforms, the place had quite a military atmosphere.

The Billy Sunday, Rodeheaver and Mrs. Asher records have been in constant demand, both by people in Kansas City and in the small towns nearby.

The Victrola department of the Peck Dry Goods Co. has sold small machines to friends of soldiers and these have been sent, with a free donation of records from the store, to Nevada, Mo.

The talking machine department of the J. W. Jenkins' Sons Music Co. has also sold machines to the different companies that went to Nevada, and has sent a large number of records to Battery B. Mr. Ditzell, manager of this department, will attend the Talking Machine Jobbers' Association convention at Atlantic City.

E. C. Rauth, of the Koerber-Brenner Co., St. Louis, Mo., was in the city recently.

C. R. Moores, representative of the Ross P. Curtice Co., Lincoln, Neb., both for their pianos and for the Victor goods for which they are jobbers, was in Kansas City recently, calling on A. A. Trostler, of the Schmelzer Arms Co., in reference to the jobbers' convention. Mr. Moores had just returned from a visit to the Victor factories.

A series of concerts was held recently by the music department of the Jones Store Co., during which entertainments were given every afternoon for two weeks. The program included piano and player selections and Victrola numbers. The attendance was highly satisfactory, and the sales of Victrolas reached a considerable volume. The co-operation of the piano and player division with the Victrola section proved very profitable to both.

Miss N. Williams, formerly employed by the Schmelzer Arms Co., is now in the Victrola department of the Jones Store Co.

The Columbia retail store at Kansas City came within one or two machines of doubling business in June of June last year. There are several reasons for this increase, one of which is the special window display that the store has been putting up. There was a beautiful and striking display for Fourth of July records. The window was typical of the style and taste which George F. Stanke, retail manager, puts into them. There was one large machine in the middle of the window with white window streamers, forming the staff, running to each side. On the staff were the characteristic trade mark notes of the company. Two large, very stiff cardboard signs, lettered with especial artistry, were placed in corners of the window, and on them were styles, record numbers and soloists and each bore a record. The simplicity of the window was the important feature of its effectiveness, and it sold records.

NEW PATHE DISTRIBUTERS

The Pathé Frères Phonograph Co., New York, announced this week the appointment of the Armstrong Furniture Co., Memphis, Tenn., as Pathé distributer in that section. This concern is well-known throughout the South, and is now perfecting a sales organization that will concentrate on the development of Pathé wholesale business.

The Fraad Talking Machine Co. was incorporated for $100,000, and not for $10,000 as published recently in the New York Times.

IMPORTANT MEETING OF THE TALKING MACHINE MEN, INC.

Meetings Henceforth Third Wednesday of Each Month—Discuss National Association—Officers Elected—Some Interesting Talks—Important Committees Appointed

At the June monthly meeting of the Talking Machine Men, Inc., the organization of New York, New Jersey and Connecticut talking machaine dealers, held at Keene's Chop House on West Thitry-fifth street, New York, it was decided that as a matter of convenience all future meetings of the association be held at Keene's. The regular monthly meetings being held on the third Wednesday of each month, for the benefit of those dealers who desire a social hour before the meeting it has been arranged to serve an informal luncheon at 1 o'clock on the day of the meeting at a cost of 75 cents.

One of the features of the meeting was the report made by Henry Mielke of his recent trip to Washington as a representative of the talking machine men to attend the hearings on the Stephens Bill for price maintenance, and he stated that a full report of the matter would be filed later. A resolution thanking Mr. Mielke for his work was adopted unanimously.

A particularly important and interesting action taken by the talking machine men at the meeting was the appointment of a committee of five, consisting of John E. Hunt, president; H. Mielke, Theodore Arison, J. T. Coughlin and S. Lazarus to discuss ways and means for forming a national association of talking machine dealers. The committee was appointed at the suggestion of Mr. Mayers, who declared that there was a real necessity for such an organization which should be so designed as to take in the various local associations now in existence.

It was announced during the meeting that J. G. Bremner, former president of the association, was no longer connected with that organization.

During the course of the meeting an interesting talk on "Co-operation in Business" was given by A. P. McCoy, of the Fulton Driggs & Smith Co., Waterbury, Conn., and vice-president for Connecticut of the Talking Machine Men.

J. T. Coughlin, vice-president of the association for New York, also spoke at some length on the subject of "Organization and Price Maintenance," and gave the dealers some excellent ideas to think over.

As a matter of convenience in holding meetings the by-laws of the Talking Machine Men were amended to provide that ten instead of fifteen members, as formerly, should constitute a quorum. From the revival of interest on the part of dealers in the Talking Machine Men, it is very probable that future attendance will be such that the question of a quorum need not be brought up.

The officers of the Talking Machine Men for the year are: President, John E. Hunt, White Plains, New York; vice-president for New York, J. T. Coughlin; vice-president for New Jersey, H. H. Jaffe, Hoboken, N. J.; vice-president for Connecticut, A. P. McCoy, Waterbury; treasurer, A. Galuchie, Jersey City, and secretary, Sol Lazarus, New York.

The list of committees follows:

Executive Committee—Henry Mielke, 1680 Second avenue; R. Montalvo, 209 Nelson avenue, New Brunswick, N. J.; Yonkers Talking Machine Co., M. Goransky, Yonkers, N. Y.

Associate Members Executive Committee—Adams Music Store, 6950 Second avenue; Saul Birns, 117 Second avenue; Blackman Talking Machine Co., 97 Chambers street; R. F. Bolton, 83 Chambers street; Chas. H. Ditson, 8 East Thirty-fourth street; Irving Kurtz, 135 Broadway; Max Landay, 563 Broadway; Mathushek & Son Piano Co., 1569 Broadway; A. H. Mayers, 1983 Broadway; John Y. Shepard (G. T. Williams), 217 Duffield street, Brooklyn, N. Y.; I. Zion, Broadway and Eigbty-third street; E. Leins Piano Co., 304 West Forty-second street.

Entertainment Committee—John Y. Shepard (Chairman), 217 Duffield street, Brooklyn (G. T. Williams Co.); Geo. Kelly (New York Talking Machine Co.); J. T. Coughlan, 485-87 Eighth avenue; A. Galuchie, 724 Bergen avenue, Jersey City, N. J.; Sol Lazarus, 216 East Fifty-ninth street; E. Blout (Riddell), 2799 Broadway.

Finance Committee—G. T. Lake (Chairman), 1501 Madison avenue; Epstein (Epstein & Berdy), 1198 Fulton street, Brooklyn, N. Y.; Johann Scbick, 956 Third avenue; I. Zion, Broadway and Eighty-third street; E. Leins Piano Co., 304-6 West Forty-second street.

Legal Committee—J. T. Coughlan (Chairman), 487 Eigbth avenue; Irving Kurtz, 135 Broadway; Henry Mielke, 1680 Second avenue.

Membership Committee—Jobn Y. Shepard (Cbairman), G. T. Williams Co., 217 Duffield street, Brooklyn; E. Blout (Riddell), 2799 Broadway; Blackman Talking Machine Co. (Wilkins), 97 Chambers street; New York Talking Macbine Co. (Fontaine), 119 West Fortieth street; S. Pearsall (Spencer), 16 West Forty-sixtb street; S. B. Davega (Kaiser), 831 Broadway; Fred G. Scholl, 1125 Jamaica avenue, Woodbaven, L. I.; American Talking Machine Co. (Goldsmith), 368 Livingston street, Brooklyn; I. Davega, Jr., Inc., 125 West 125tb street; Daniel R. Weed & Son, Beacon, N. Y.

Ditson & Co., 8-10-12 East Thirty-fourth street; Saul Birns, 117 Second avenue; A. P. McCoy, Waterbury, Conn.; Fred Loeser & Co. (E. Paul Hamilton), 482 Fulton street, Brooklyn; L. Bamberger & Co. (Semels, manager), Market street, Newark, N. J.; Columbia Phonograph Co. (R. F. Bolton).

Auditing Committee—A. Anderson (Chairman), (New York Talking Machine Co.); Theo. Arison, 52 West 116th street; M. W. Gibbons, 1314 Fulton street, Brooklyn.

Grievance Committee—A. H. Mayers (Cbairman), 1983 Broadway; Fred Michaelis, 269 Jackson avenue, Jersey City, N. J.; Ideal Music Co. (Jacob), 29 John street; Geo. M. Millard, 1803 Myrtle avenue, Brooklyn; Hugo H. Traeger, 61 Wright street, Stapleton, S. I.; Daniel R. Weed & Son, Beacon, N. Y.; E. H. Smith, 945 Soutbern Boulevard; Matbusbek Piano Co., 1569 Broadway.

NEW UDELL CABINET CATALOGS

Six New Booklets to Be Issued, Each Devoted to Cabinets for Particular Machine

INDIANAPOLIS, IND., July 4.—H. T. Griffith, sales and advertising manager of the Udell Works, manufacturers of talking machine cabinets, has announced that the company will soon have six new catalogs to mail to the trade.

There will be a catalog each devoted respectively to the Victor, Columbia, Pathé, Vocalion, Sonora and Empire lines. The catalogs are beautifully illustrated and the cuts show the machines and the cabinets together. Mr. Griffith expects the new catalogs will prove popular with the dealers as the Victor dealer and the others will have handy an exclusive cabinet catalog for their use.

NEW QUARTERS IN HARLEM

Albert Sichel, Victor Dealer, Has Handsome New Store on 125th Street

Albert Sichel, who was formerly at 233 West 125th street, and who was compelled to vacate owing to the fact that Loew's new theatre will occupy that address, has moved to much larger quarters at 219 West 125th street. Mr. Sichel handles a complete line of Victor Victrolas and records. His new salesrooms are equipped with ten soundproof demonstration rooms.

LATEST VICTOR PUBLICITY

"Will there be music for you and your friends this summer?" is the title of an attractive four-page folder which was mailed to the Victor trade this week by the Victor Talking Machine Co. This folder is appropriately illustrated, the pictures showing some of the many uses of the Victrola and Victor records during the summer season. A letter accompanying this folder suggests that Victor dealers start an aggressive campaign to secure all possible summer trade.

NEW YORK, JULY 15, 1916

REPORTS from all sections of the country indicate that the enthusiasm of talking machine dealers over business prospects for the coming months, and particularly for the fall and holiday season is not based merely on optimism, but is backed by action. In most localities dealers are placing unusually heavy orders for fall delivery in order to overcome as far as possible the effect of the shortage that factory officials announce as sure to be in evidence.

Some dealers declare that they have already placed orders sufficient to take care of demands far and above anything previously recorded, on the theory that last minute shipments may be held up and that the proportion of the orders filled will be just about sufficient to meet actual demands when the rush comes.

Preparedness doesn't mean military efficiency alone. It is a mighty good system to apply to ordinary business. The talking machine retailers are realizing it more than ever. The placing of early orders not only proves the confidence of the dealer in his business, but guarantees him future protection through giving the jobber a fair line on the demand he is expected to meet. The jobber, in turn, in his orders to the factory gives the manufacturers first hand information on what is expected of them in the fall so that if there is a shortage they can divide available supplies to the best advantage.

THE talking machine trade, which for the past year or so, has been chaotic in certain particulars, appears to have again found its level under the new conditions, and those in touch with the situation can see a further settling of things to normal.

For several months there has been a flood of new talking machine companies incorporated, often at the rate of half a dozen a day. A great many of these new concerns have found that money in the talking machine business is not picked up for the asking, that to win success in the trade means consistent effort and legitimate development just the same as in any other line of business.

Some of the new ventures are on a sound basis. The men behind them have gone at the matter in a businesslike way, and without the get-rich-quick idea, but too great a number have embarked in the business with limited capital, putting out products without originality and with a lack of definite ideas where to find the selling field and how to exploit their goods when they found it.

One need not pose as a prophet to forecast that there will be a reaction from an artificial condition, and the usual result of a survival of the fittest. Such a reaction will do much to keep the trade on a high plane and enable it to enjoy a natural healthy growth.

THE big event of the month in talking machine circles has been the annual convention of the National Association of Talking Machine Jobbers at Atlantic City, a complete report of which is to be found in the news columns of this issue of The World.

In many respects the latest convention of the jobbers represents the culmination of development work that has been a feature of that organization since its inception. The Association has been known as one that has done things. While in their social affairs the members of the Association and those who attend the Conventions with them have represented one large, peaceful family, the Conventions have not in any sense been looked upon primarily as an outing, as there has been a time for play, also has there been set aside a time for work, and the work has been earnest and resultful.

This year the slogan has been education, the sort of education that will enable the jobber and those connected with him to better understand and conduct his business, that will enable him to glean a thorough understanding of the mechanical details of the products he handles, as well as of the most efficient methods for their exploitation and sale. An Association with this object in view cannot go wrong.

From all accounts, as this is written, the attendance will be one that will surpass all previous records, a tribute not only to the cohesive character of the Association, but also to the ability of those charged with making up an attractive program.

ONE of the most interesting moves yet to be made by a local organization of talking machine dealers was the appointment of a committee at the last meeting of The Talking Machine Men, Inc., to discuss ways and means for the organization of a National Association of Talking Machine Dealers, to take in, if possible, local associations now existing in a number of cities.

The proposition is a big one; it cannot be accomplished in a day, if at all, but the idea is worth far more than passing thought.

In the same business, with interests so closely allied and the same problems to face, it would appear that there are genuine grounds for the formation of a national organization of talking machine dealers. Were the approval question, for instance, acted upon by such an organization, such action would prove much more effective than resolutions against the approval system adopted in certain localities and which give aid to competition in neighboring centers where such regulation does not exist. Then interest charges, limit of payments, and character of advertising could all be governed with the greatest effect.

To the most optimistic, however, it must be apparent that a national organization of talking machine dealers is something far in the distance, although the action taken by The Talking Machine Men, Inc., at least places it in the ranks of possibilities.

WHILE everything looks favorable for the passage of the Stephens Bill, which upholds the principle of price maintenance, the members of the talking machine trade should be on the alert to keep in touch with their representatives in Washington, and continue to urge upon them continued and active interest in this measure. The bill has received the support of all the leading business organizations of the country, and this is demonstrated in the endorsement, by a three to one vote, of the Chamber of Commerce of the United States.

Certain big interests are protesting against price standardization, and some of the small fry have joined in, through lack of courage and ability to act and think for themselves; while some chain and sensational department stores, mail order concerns and trading stamp interests—all vicious price cutters—are savagely attacking the uniform price policy. Without standardization they can go right along "baiting" the public with standard brands, and beating the public with private brands. Their sole complaint is that legitimate business men will not permit them to cut on quality, and get the profit they must have on the cheap products.

Price maintenance does not establish a monopoly; for the proposed legislation is permissive, not mandatory, and no pro-

ducer need come under the protection of this provision unless he choses to do so.

The Stephens Bill is a constructive measure of the highest importance to business men, and if enacted into law can only work for the best interests of this and every other trade.

Meanwhile there must be no let-up or indifference on the part of the talking machine men in keeping in touch with Washington, to the end that representatives in Congress are made aware of the wishes and desires of their constituents.

THE talking machine trade has not been slow in introducing business building innovations, but it remained for the talking machine dealers of Louisville, Ky., through their new Association to introduce a "Talking Machine Week" for the benefit of that city. Nine representative houses, handling among them Columbia, Victor and Edison lines, formed the Talking Machine Dealers' Association of Louisville and for the week of June 26th to July 1st carried a most attractive joint advertisement in the local papers. Daily concerts were held at all the stores and readers were urged to take advantage of the occasion to enjoy a demonstration of the machine of their choice, or to make comparisons. The high quality of the modern talking machine, as compared with its predecessors, was strongly emphasized. Certainly such work is for the uplift of the trade generally, and proves that the talking machine dealers as a class are up and doing, and that they realize, in Louisville at least, the high value of co-operative action; the strength of numbers in talking machine exploitation as in other matters. Such a movement should be earnestly encouraged, and might be emulated in any city with profit to those who display the proper initiative.

AT the recent conventions of piano manufacturers, merchants and travelers held in New York, the matter of most general importance discussed in the meetings was that of ways and means for Trade Advancement. In other words, means for stimulating interest in music generally in the schools and through other mediums, thereby creating a demand for musical instruments, particularly pianos.

Piano men went after the matter as though it were a new thing and they the pioneers, yet a sufficient number of the piano merchants handle talking machines to have informed the main body of what the talking machine companies and their representatives have accomplished and are doing to stimulate interest in music in the schools.

The leading talking machine companies were among the first to realize the influence of the child mind in bringing about the sale of musical instruments, and after preliminary surveys established educational departments for the primary and sole purpose of introducing talking machines and records into schools and colleges. There is nothing haphazard about the system. It was carefully mapped out and after the authorities were interested they received earnest co-operation in carrying out the idea to a successful conclusion, through the issuance of special records, reading matter and by other means.

Piano men in their new campaign of Trade Advancement cannot do better than take a leaf from the book of experience in the possession of the talking machine trade, for the methods used therein are of proven value.

THAT live talking machine dealers are fully cognizant of the inestimable value of local publicity is indicated by the enthusiastic manner in which many concerns participate in local celebrations, on a business basis. The talking machine men appear particularly interested in celebrations of which pageants or parades form a part and which offer the opportunity for entering special floats.

To the offices of The World come each month, numerous photographs showing window displays or floats of an elaborate character prepared for some event in which a certain city or town is interested, and a surprising number of these displays have won first or second prizes. It is noted—with comparatively no exceptions—that the instrument featured by the house is shown in the display, being represented either by a model in flowers or other material, or by the actual sample of the machine itself. Grasping opportunities for publicity—and such publicity is welcomed and looked for—is one of the earmarks of the wide-awake merchant, and lines him up with the big business men of his town.

Twenty Dollars for Manhattan

The value of Manhattan today is represented by its creative improvements. Any City, County, State or Service improves only to the extent of the attention and money given to it.

Thousands for PEARSALL SERVICE

We are never contented with the "things of yesterday" in Pearsall Service. Progress and more progress is the service word and this is why we grow. An auditing of our sales records shows a constantly increasing growth—sure signs that the quality of Service—to emphasize the word "quality"—is right. A Pearsall Servicee is a Happy One.

ST. LOUIS DEALERS TO HOLD OPEN MEETINGS HEREAFTER

Will Inject Social Features in Regular Monthly Gatherings to Revive Interest in the Organization—Discuss Plan to Equalize the Value of Trade-Ins—the Interest Question

St. Louis, Mo., July 3.—Following the decision that it would no longer conduct its affairs as a secret society, the St. Louis Talking Machine Dealers' Association has decided to hold regular monthly meetings where there will be a dinner, in a different restaurant of note each month, perhaps auto trips to suburban resorts, something to drink if wanted, but mostly plenty of talk. Previous to the dinner held at the Missouri Athletic Association club house the last Tuesday in June the monthly meetings had been attended by two or three persons. There was a growing indifference in the ranks as to the association. There were fifteen members present at the June meeting, representing the following firms: Koerber-Brenner Music Co., Silverstone Music Co., Columbia Co., Smith Reis Piano Co., Field-Lippman Piano Stores Co., Theibes Piano Co., Mengle Music Co., Stix, Baer & Fuller Dry Goods Co., Vandervoort Music Salon. Managers of the Famous & Barr Co. and the Nugent Bros. Dry Goods Co. expressed regret at being unable to attend and pledged support.

In calling the meeting to order after the dinner, F. K. Niemueller, of the Associated Retailers' organization, permanent chairman and secretary, told the members that the association was threatened with death from indifference and that any association that had saved as much as $25,000 to its members in two years (as had been done on the interest proposition) deserved to live. That it would be worth while if it did nothing more than to perpetuate the present restrictions on records sent on approval.

Then the members opened discussions on matters uppermost in their minds. Val Reis was then made chairman of a committee to report at the next meeting on a proposal to raise the requirement that customers taking records on approval must retain 50 per cent. of those taken. The twenty-four return requirement will be maintained. Some members reported that they already required 50 per cent. to be taken, although the association rules set the requirement at 25 per cent.

Irby W. Reid, of the Columbia Co.; Charles Lippman, of the Field-Lippman Piano Stores, and Mrs. Medairy, of the Stix, Baer & Fuller Dry Goods Co., were appointed to select the next meeting place and to call the meeting. Also they are expected to report at the next meeting on a plan to equalize the value of trade-ins. A suggestion was made that each member in making an offer on any musical instrument should telephone to Mr. Niemueller, the secretary, the amount of that offer and that he should card index all such offers so that any other dealer could obtain the figure. This plan met with general approval, but it was thought best to allow further consideration.

Then somebody started a discussion of the rule regarding the charging of interest on deferred payments. This practice is followed by all Columbia, Victor and Edison dealers except the time payment furniture stores, and there always has been some friction over this feature. The hottest argument of the evening resulted concerning this feature, but it died down when all hands declared that their intentions were of the best and they wished only to bring about entire harmony. So far the furniture houses have declined to align themselves with the association, but it is hoped to gain from them the concession, at least, that they will charge interest on sales of talking machines when nothing else is sold. Their present practice is not to charge interest on furniture bills but to give a discount for cash.

Aside from the furniture houses, the association includes practically all downtown dealers except Aeolian Hall. The small dealers outside the main shopping districts are not members, owing to the cost of joining the association, but in the main they follow the association agreement. Some rumors are heard of secret commissions given by them but this is not frequent. The small dealers never give offense in the matter of over valuation of trade-ins and they are sticklers for interest and for the minimum monthly payments.

OPENS NEW STORE IN BUFFALO

John G. Shuler Takes Over Edison Agency Formerly Held by Schuler Bros., Recently Dissolved—Opens Elaborate Quarters

Buffalo, N. Y., July 3.—The well-known house of Schuler Bros., 777 Main street, this city, was dissolved last month and the Edison agency, formerly held by that firm, was taken over by John G. Schuler in a new location in the Utica Building at 1394 Main street. The new store is in the uptown trade center and has a frontage of thirty feet and a depth of 180 feet, being artistically decorated.

The business started off with a rush immediately upon the opening of the new store, and Mr. Schuler is enthusiastic over the outlook. L. M. Cole is the manager of the Edison department. Pianos and player-pianos are also handled by the house.

The capital stock of the Eagle Talking Machine Co., of New York City, has been increased from $200,000 to $500,000.

The Wuchter Music Co., of 1019 Hamilton street, Allentown, Pa., reports an exceptional demand for Columbia Grafonolas and records. Seven demonstration booths are installed in the store.

F. E. Farley, of Crown Point, Ind., will operate a music store there, carrying a full line of talking machines and pianos.

We Will Make Fine Cases FOR TALKING MACHINE MANUFACTURERS

We have a large plant, well equipped with the latest woodworking machinery and finishing rooms. We can also create handsome designs for you.

Send specifications, quantity, and blue prints, if possible, for prices.

DEALERS—
Who would be interested in a line of quality pianos at sale-able prices should write us.

HOW THE AUTO FIEND SUMS IT UP

Shortcomings of an Ambitious Salesman Set Forth by Employer in Auto Language

"When you came into the talking machine business, young man (thus saith the proprietor who had just acquired the auto infection), "you represented yourself to be a forty-horsepower machine, fully equipped and tested; ready for the track; spark-plug in action, bearings oiled, reservoir loaded with gasoline, steering apparatus in perfect order, lamps in place, exhaust properly muffled; hand-painted from end to end; good for a hill-climbing contest, an endurance run, or any old thing in the way of hard work that a chauffeur (that's me) might require of you. These were a few of the specifications that you unrolled before me at the time you were chartering yourself to me for a business run.

"So far, your action has not been good, and your tires are too fully inflated to be secure when you strike the jolts. Your steering gear is hard to manage; you will make for the curb when your place is in the middle of the road. You lag in the hills, and make a big noise in going over the stretches of bad road. At times you can put on the full forty horse momentum, and at other times it drops down to a half dozen old spavined hacks. Your spark plug is erratic. It is in action for a cigarette, I notice, but not to be relied upon when a time comes for the machine to go.

"You don't like to carry loads; seem to be a fancy roadster, not available as an auto-truck in an emergency. I don't like your lubricants; too large a proportion of aqua vitae to the oil.

"How would it do for you, young man, to again go over the specifications and see if you cannot gear up to meet them? The machine seems to have some good stuff in it, and what it needs is to get it into better running order. If so, all right. If not, 'Back to the garage for yours.'"

DEVICE TO GIVE SOUND CONTROL

The Rowland Sound Regulator Co., New York, has placed on the market a device which, it states, will give perfect tone control under all conditions. This device has been on sale in local territory for quite some time, where it has attracted considerable attention. The regulator was invented by Dr. Rowland E. Faldl, a well-known authority on acoustics, who is vice-president of the Rowland Sound Regulator Co.

THE HUMAN VOICE CORPORATION

The Human Voice Corp. (The home of the Victor Victrola), Norfolk, Va., has been incorporated with a capital stock of $5,000. Ira S. Lightfoot is president and E. J. Doran secretary and treasurer of the new company.

AN EDUCATIONAL VOLUME

Is "The Victor Book of the Opera," Which Has Won a Great Vogue

The third edition of "The Victor Book of the Opera" has just made its appearance. As is well known this volume, with its 110 stories of the operas, its seven hundred illustrations and descriptions of twelve hundred Victor operatic records, has proven one of the great factors in the trade in disseminating not only a knowledge of the operas themselves, but of the perfection and excellence of these operatic records from an educational standpoint.

Those people who, in the olden days, viewed the talking machine as a toy and failed to comprehend its value as one of the most potent factors in expanding a knowledge of music in its higher forms, have been educated to a large extent through this volume. They have been able to comprehend the enormous labors of the Victor Co. in assembling such a remarkable array of artists, who are brought into the homes of the masses of the people by means of the records which they have made.

This revised volume of "The Victor Book of the Opera" should be in the home of everyone interested in operatic music, and dealers should make it their duty to acquaint customers with its contents and its importance in an educational way.

GRAFONOLAS AND "SAFETY FIRST"

Used in Exhibit Prepared by United States Government Now Touring the Country

Columbia Grafonolas are important features of the equipment of the "Safety First" exhibit prepared by the United States Government, and now touring the country. This exhibit consists of a twelve-car train of interesting exhibits by the Treasury, War, Navy and Agricultural departments, Department of the Interior, Commerce Commission and the Red Cross Socity. Each individual exhibit is equipped with a Columbia Grafonola, which plays continuously from 1 to 9 p. m. daily.

At one town the Grafonola was carried to the station platform and a Sunday evening public concert was given to over a thousand persons. The first sound that greeted President Wilson and Cabinet when they visited the train was "Hail to the Chief," played on a Grafonola.

This "Safety First" exhibit is attracting country-wide attention, as it was prepared to acquaint the people of the United States with the various methods adopted by the Federal Government to further personal safety.

If you weren't taught politeness at home, you will have a hard time cultivating it; but you can never succeed as a salesman without it.

Discriminating Dealers

BASE their choice of a line of merchandise as much on quality as on profit-producing possibilities. Their wisdom and foresight impel them to choose merchandise that not only "stays sold" but that sells more of the same line and at the same time builds up a reputation for distinctive quality that becomes an invaluable asset.

Such a line of merchandise tones up an entire business, and affects all other lines in the merchant's establishment.

For super-distinctiveness, no musical merchandise equals the New Edison, for no instrument is enough like it to bear comparison.

Edison Dealer Policy

UNDER the Probationary Zone Plan the Edison dealer is encouraged to prove how good a dealer he can be and in addition is given every assistance the vast Edison organization is capable of rendering.

Added to this is the fact that every sale of a New Edison carries a worth while profit, in most cases requiring less effort than merchandise on which a much smaller profit per sale is realized.

Inquiries may be addressed to the nearest Edison jobber in the list on the back cover of this issue, or

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., July 7.—Local business in all the stores is just about at the top notch and June surpassed all records everywhere. One feature that has become conspicuous in the past few weeks is the prevalence of the cash business over the partial payment idea, which means sometimes a long period for tied-up money. Everywhere there is a marked disposition to encourage the cash transaction. The quick interchange of money is always a benefit to general trade. There is a strong feeling that with the end of summer business is going to take a tremendous boost, and in this sentiment the talking machine men only share the feeling with what is prevalent everywhere in the business world.

Returns from Western Trip

Arthur C. Erisman, manager of the Boston department of the Columbia Graphophone Co., has just returned from an extended trip through the Middle West, taken at the solicitation of the head officers, who were anxious that Mr. Erisman should undertake some special work, which he is so competent to handle. The trip included visits to Buffalo, Pittsburgh, Detroit, Chicago, Kansas City, St. Louis and Philadelphia. He found business excellent everywhere and the trip gave him many new ideas as to how other managers conduct their local headquarters. Mr. Erisman was no sooner home than he hurried away to New York for a few days' business conference.

W. L. Currier to Portland

Everyone in the local trade misses Wallace L. Currier, late manager of the talking machine department of Chickering & Sons; but Mr. Currier, with characteristic ambition and hustle, which he inherits from his talented father, Mason P. Currier, manager of the Chickering retail warerooms, looked about for an opportunity to branch out, and he found just this opportunity in Portland, Me. This city he found was a good field in which to exploit the Edison Diamond Disc machines, so he resigned from his Boston post and began work upon the new plan. He leased quarters in the Masonic Building in Portland and he found quick co-operation from the Edison people. He had hoped to open his warerooms several days ago, but that was not possible because of the details involved in getting a new place ready. So the opening is taking place on the 10th inst. In honor of the opening his friends in Chickering's sent Mr. Currier a handsome palm which will occupy a prominent place in the new warerooms. Among those who will go down for the opening will be Manager Fred H. Silliman, of the Pardee-Ellenberger Co., and L. H. Ripley, of the same Boston quarters.

New Manager at Chickering & Sons

By the retirement of Wallace Currier to open the new Edison quarters in Portland, Ralph Longfellow becomes manager of the Edison and Victor departments at the Chickering & Sons Tremont street warerooms. Mr. Longfellow has had a wide experience in the talking machine business and is well equipped for the managerial post. In August Mr. Longfellow will take his vacation, going to Long Island, but en route will stop off at New Haven and visit his brother, Wilbur W. Longfellow, who formerly was with the Chickering house, but is now holding a responsible position with the Pardee-Ellenberger Co.

Marriage of Guy R. Conor

One of the interesting bits of news of the month is the marriage of Guy R. Conor, of the traveling staff of the Pardee-Ellenberger Co., and Miss Dorothea Kathryn Meehan, of Dorchester, the ceremony having taken place on June 28. Just now Mr. Conor and his bride are taking a honeymoon among the Thousand Islands in the St. Lawrence. On their return they will live in Argyle street, Dorchester.

Vocalion Co.'s New Dress

The warerooms of the Vocalion Co., at 190 Boylston street, have taken on a new dress suitable to the warm weather season. All the furniture has been covered with handsome printed linens which give just the right summer touch. Manager R. S. Hibshman, of this establishment, states that the June business was considerably in excess of what might reasonably have been expected. Leo E. G. Shatney, floor manager of the house, went up to Bangor the latter part of June to attend the wedding of a sister. Later he played the part of host to the newly-married couple here in town and entertained them extensively for several days.

Eastern Talking Machine Co.'s Camp

All aboard for Camp "'Tis Ours," at Southport, Me., on the shores of the Penobscot River, say the boys of the Eastern Talking Machine Co. Members of Manager Taft's staff have been going down there for several years and the first group to get away this season will be Jerry Splaine, Ed. Welch and John Maguire, but they won't start for several weeks yet. With these boys will go James McDonald, of the Columbia forces, and they're all anticipating a jolly, good time. Later another group of Eastern chaps, including Billy Fitzgerald, the manager of the wholesale department, and Mark Read and James White, will start.

Announce Their Engagement

The engagement has been announced of Harry Rosen, the well-known talking machine dealer in School street, and Miss Rosa Caplan. The couple sent to their friends a dainty card, on which were these lines:

We're two such happy people,
We wanted you to know,
And so we send this little card
And sign ourselves below.

Silver Cup for Steinert Auto Display

In the automobile parade which was a feature of the Brookline Fourth of July celebration, was a float entered by the well-known house of M. Steinert & Sons Co., in which several Victrolas figured conspicuously. In the center of the float was a Jewett grand piano, and ranged at the corners were the Victrolas, to which were attached black leather funnels, which protruded through masses of red, white and blue bunting, making them to appear like miniature cannon. Near each Victrola stood a khaki-clad youth which still further carried out the idea of musical preparedness. The float deservedly received recognition in the shape of a silver cup as a prize. All along the route it received many words of approbation.

An Attractively Arranged Window

In one of the windows of the Eastern Talking Machine Co. is a most inviting looking display which immediately suggests a quiet week in the woods. It is a camp scene. In the foreground is a fire, over which is suspended a kettle. Through the logs of wood one can discern the flames, the illusion being well produced by strips of red and yellow paper. There is a tent with rifle and fishing rod close by and a background of evergreens. A placard suggests the desirability of having a Victrola as an important part of a camping outfit. The window attracts many passersby.

Another Seasonable Display

Another house that has an attractive window suggestive of camp and canoe life, is that of A. McArthur & Co., 111-117 Washington street.

RE-CREATION—Edison's New Art, has secured for the New EDISON Diamond Disc Phonograph the stamp of unqualified approval from the cultured music lover who turns a deaf ear toward anything that smacks of mechanical reproduction—the critic who will have nothing short of the actual RE-CREATION of musical sound. Added to this is the fact that every Edison dealer has plenty of "elbow room."

(From a recent advertisement by Thomas A. Edison, Inc.)

We can add to, but not strengthen the truthfulness and accuracy of the foregoing. We can say, however, that two P-E Services are at your disposal—each a separate organization of post-graduate experience.

THE PARDEE-ELLENBERGER CO., INC.

Edison Jobbers for New England, with complete wholesale offices at

BOSTON and NEW HAVEN

The foreground is filled in with mossy turf and small rocks, there is a background of hilly suggestiveness and a tent, boiling kettle, fishing rod, net and gun, all carry out the summer vacation idea. A small Victrola is in the foreground and the Victor dog and a jack rabbit are features of the scene.

Interested in Baseball Game

The talking machine boys are all agog over the forthcoming baseball game between the Chickering & Sons team and that of M. Steinert & Sons Co., which is to be played on Franklin Field on July 15. The Chickering boys are quite enthusiastic players, and they have won some exciting games lately.

Great June Business

The Columbia Graphophone Co. had the biggest June business in the history of the local house, and the complaint is that there is a serious shortage of machines. The Tremont street headquarters are being remodelled at the rear of the ground floor in order to give more space to the foreign record department, which under the superintendency of Frank Mills is growing rapidly. This is getting to be a very important department of Manager Erisman's business.

Famous Pitcher Orders Victrola

The Victor department of the Henry F. Miller Co. had a visit yesterday from "Dutch" Leonard, the famous pitcher of the Boston Americans, and before he left he had purchased a high-priced Victrola and a large bunch of choice records. Warren Batchelder, the manager of the department, goes away on the 15th inst. on his vacation, which will be spent with his family at Pine Point, Me. Percy W. Baker, the chief clerk, will take his vacation the first week in August.

Proud of Business Showing

Manager Frederick H. Silliman, of the Pardee-Ellenberger Co.'s Boston headquarters, is justifiably proud over the showing his department made for last month, which he said was 120 per cent. in advance of the business of a year ago. Even more business might have been done were there sufficient machines to supply the demand.

Vacation Now Under Way

Manager Francis T. White, of the Edison and Victor departments of the C. C. Harvey Co., plans to spend his vacation at the Ocean House, Swampscott, and he will start away for the last two weeks in July. Louis Coner, one of his salesmen, is enjoying an automobile trip of several days through New York State. Manager White says July has made a very good start in his department.

Some of those already away on their vacations at the Columbia Graphophone Co.'s Boston quarters are William Townsend, who is at York Beach, Me. A. A. Magowan, who is at his home in Springfield; R. H. Luscomb and his brother, J. F. Luscomb, who are in Fall River; Miss Lillian Dunigan, also at York Beach, and Miss Bessie Langdon, who is in the White Mountains.

Enjoyed Regular Drive

George Lincoln Parker's Victor and Edison departments enjoyed a regular drive during June, and Manager John Alsen says that July has started off very well, despite some rather hot weather which the town is now experiencing. Mr. Alsen is thinking of joining some of the Eastern Talking Machine boys at their camp "Tis Ours" at Southport, Me., early in August. George H. Bishop, of Manager Alsen's staff, has retired from the talking machine business and gone to New York, where he is to become purser on a steamer that is about sailing for Panama. Eventually he hopes to sail around South America.

Emilio De Gogorza a Victor

Emilio De Gogorza, the Victor artist, whose "Non e Ver" has just been added to the July catalog, was a caller at the warerooms of the Eastern Talking Machine Co. a few days ago. He came down from Maine, where he left his wife, Emma Eames, superintending some large functions for the relief of the French wounded.

Personals

H. E. Shartle, of the Victor Co., was a caller on the Boston trade lately, making the rounds of several of the Victor warerooms.

Charles Urlass, of the Edison and Victor staffs, at Chickering & Sons, is one of the first of that group to go off on his vacation. Urlass has lately had a second little one added to his family.

Harlan P. Skelton, of the Thomas A. Edison Co., has made splendid recovery from his operation, and he is now off on a business trip.

W. O. Pardee, head of the Pardee-Ellenberger Co. of New Haven, was in town a few days ago and said that he is planning to spend his vacation up in the White Mountains where his family will accompany him.

W. E. Birdsell, manager of the F. H. Thomas Co.'s Edison department at the Boylston street headquarters, was one of those attending the Edison conference in New York a few weeks ago, and he came back home with a new lot of enthusiasm. Mr. Birdsell and his staff have built up a large business in the Edison line.

Miss Gertrude Woodman, formerly head of the talking machine department of the Gilchrist Co., is now manager of the talking machine department at the Tremont stores, formerly the old Butler establishment.

NEEDLE PRICES TEND UPWARD

Lowell, Mass., July 7.—C. H. Bagshaw, general manager of W. H. Bagshaw, talking machine needle manufacturers, in a statement to a representative of The World, stated that he sees no prospect of any reduction in the price of needles. "If the present prices are changed at all," Mr. Bagshaw added, "I think they will go higher, owing to the tremendous increases in the cost of special needle wire and everything else that enters into the manufacture of talking machine needles."

BUSINESS ACTIVITY IN WORCESTER

All Branches of Trade Make Good Reports—Charging of Interest No Detriment

Worcester, Mass., July 6.—Business in all the recognized lines of talking machines is of large volume the past month and there is no likelihood of there being any let-up in the business throughout the summer. The plan of no records on approval, as recommended by the Victor Co., appears to be subscribed to by nearly all the Victor dealers in the city, and thus far the plan has worked advantageously with those houses adopting it. The plan of discouraging lease accounts through charging 6 per cent. additional, appears not to be a detriment to trade. A large class of the buying public have taken to it kindly and it has so worked out that many more cash accounts are now on the books of some of the concerns than ever before.

JOINS HIS FATHER'S BUSINESS

Portsmouth, N. H., July 8.—The firm of Joseph Hassett Co., of this city, which has large and commodious Victor warerooms in the center of the city has taken on a new member, Joe Hassett, son of his able father. The son has just been graduated from the Portsmouth High School and is all eager for business. He is well posted on the talking machine business and will prove a distinct advantage to the house. The Hassett warerooms, a most progressive store, has furnished may ships of the United States Navy with Victor outfits and Naval attaches are among its best customers.

H. T. ABRAMS' NEW POST

Hiram T. Abrams, of Portland, Me., who some years ago was connected with the talking machine department of M. Steinert & Sons, has been elected president of the Paramount Film Corp. of America, one of the largest producers of motion picture films in the United States.

Quick Service for Victor Dealers

A BIGGER CONVENTION—t
gressing and growing *prosperou*
trade-mark, the most musically sign

Just *one* topic for discussion: what does th
cance—what is behind the "notes"?

Tone Quality!

Tone quality in the reproducing construction of the Columbia Grafonola. Tone quality in the Columbia Records that are bought to play on it—tone quality so absolutely superior that every buyer of a Columbia Record, every owner of a Columbia Grafonola knows it and talks about it!

Prestige!

Prestige that comes to a dealer in handling a product well made and well advertised. Prestige that comes to a dealer in handling a line that measures up to every expectation of the public. There is no line advertised today with greater effect or with more profitable results to the dealer than the Columbia line of records and Grafonolas.

Progressiveness!

Continuously, day in and day out, experts in every manufacturing department of the Columbia Graphophone Company are inventing and developing improvements which ultimately bring profits to the pockets of Columbia dealers.

Stability!

Merchandising stability in manufacturing method, in selling policy, in product, plans and publicity. The fact that every statement made in Columbia advertising is *true* is a policy of business stability which means much.

Success!

The success of the past year has been a story of enormously increased demand for product, enlarged activities, new factory buildings, new plants, additions to old plants and a steady upward rise of production and output. Increased production and increased sales are the plans for a prosperous future for all Columbia dealers.

Your Interest!

If you are not already "in" on this second convention it is to your interest to put all your ideas and enthusiasms behind the famous Columbia "Note the Notes" trade-mark. It is to your interest to know just what there is behind this trade-mark. It is to your interest to get this information today. Our answer is ready. Ask us for it.

Needle Questions

1. Who made the first needle?
2. Who makes the most needles?
3. Who has the largest needle factory?
4. Who makes the best needles?
5. Who uses special needle steel?
6. Who does the biggest export needle trade?
7. Who shipped 63,000,000 needles in 10 days?
8. Where should I buy my needles?

Eight Questions and ONE Answer

Columbia Records TRADE MARK Note the Notes

ACTIVE SUMMER TRADE REPORTED IN SAN FRANCISCO

Talking Machine Dealers' Association Proving an Active Force in the Trade—Recent Reunion a Most Enjoyable One—Pacific Coast Dealers Placing Heavy Orders with Manufacturers to Meet the Demands for Fall Trade—Jobbers Leaving for Convention

San Francisco, Cal., July 5.—Interest in talking machines does not seem to have fallen off a great deal this month in spite of the summer season uncertainties, and in some instances an increase in business is reported for June. In the interior the dealers are enjoying a fairly normal trade also. There is a noticeable increase in the prominence given to lower priced talking machines of late. Many of these instruments are purchased for the use of children. The record business shows a stimulation by reason of the sale of cheap machines, so the big concerns are not complaining. The local talking machine people all report dance records to be the best sellers this month, notably the fox trot and one step records. These are much in demand at summer resorts and country homes.

Talking Machine Dealers Meet

The Talking Machine Dealers' Associations, of the San Francisco Bay counties, gathered at their regular quarterly meeting and dinner in San Francisco on the evening of June 14, and one of the most enthusiastic meetings ever held by them is reported. The dinner was held at the Old Poodle Dog Café and covers were laid for about forty. A good representation of the dealers from Oakland, Alameda, Richmond, San Francisco and other near-by points were present and in the way of speeches and entertainments, the members excelled themselves. This dinner was arranged by William F. Morton, of Sherman, Clay & Co., chairman of the executive committee, and past master of manipulating social functions. He was accorded a hearty vote of thanks for his signally successful endeavors in this instance. Among the speech makers must be mentioned C. J. Kenrick, representing the Victor Co., who spoke on salesmanship and sales organization; Gus Eilers, of the Eilers' Music House, who told of his recent Eastern trip and gave an interesting analytical comparison of business conditions in the East and West, and A. W. White, manager of the Emporium talking machine department. Mr. White's little talk was concerned with the why and wherefore of talking machines in a department store and the ways and means of selling them. Nor must there be omitted the excellent musical numbers rendered by Harvey Orr, of Sherman, Clay & Co., who, accompanied by Jack Fletcher, of the same company, sang several songs in a tenor voice of singular richness. It was remarked that Mr. Orr's voice was of the timbre adapted to records, so perhaps he will be discovered by the record manufacturers some day and thereafter sing to the nations. James J. Black, with his ready wit and alert executiveness, served as toastmaster. Joe Scott, who recently started in business at the stand of George Scott on Clement strect, was enrolled as a new member, and the Richmond Hardware Co., Edison dealers of Richmond, was also entered for membership.

A. W. White, manager of the talking machine department of the Emporium, says business in his department is 100 per cent. better this June than a year ago. The Stewart phonograph, made by the Stewart Phonograph Corp., is being shown at the Emporium. High grade machines of the smaller models are selling well for the country trade.

Andrew McCarthy Off to Convention

Andrew McCarthy, of Sherman, Clay & Co., leaves this week to attend the annual convention of the National Association of Talking Machine Jobbers at Atlantic City. Being president of this association, he will preside at that gathering.

Attended Knights Templar Conclave

Charles Mauzy, manager of the Victor and Columbia talking machine departments of the Byron Mauzy Co., was initiated as a Knight Templar last week and is a present attending the national conclave of the Knights Templar, being held in Los Angeles. Byron Mauzy, his father, is also a Templar, and is at the convention, the two having made the trip by automobile.

Joins Pathé Pathephone Co.

A. T. Morey, well known to the Pacific Coast furniture trade, has joined the traveling force of the Pathé Pathephone Co. and is covering his territory in Northern California. The San Francisco office of the Pathé Co. reports difficulty in keeping enough $75 models in stock.

DOMINO QUALITY

The quality of the Domino Record is not limited to its playing qualities, to the excellence of its recordings and the honesty of its manufacture. It is apparent in the very "look" of it, in the label, the container, the price cards, the displays and all the incidental advertising helps which are being issued for Domino dealers.

The aim of the producers and the distributors is to make the Domino Record a clean-cut, well-rounded, increasingly profitable dealer's proposition, to give it the earmarks of "class" in all the little-big things that count with the buying public, to make a Domino Record agency a genuine and growing asset.

Dealers, jobbers and manufacturers interested in phonographs which play a vertical cut record will find the Domino line of particular assistance for it offers a ***quality*** record at a popular price, a price which will enable every family to own more records, to buy more new selections and thus find a keener zest in the possession of a phonograph.

New recordings for August contain such popular vocal hits as "You're a Dangerous Girl", sung by O'Connell, "Old Glory", by Alan Turner, "Shades of Night", by Richard Darville and "Ladder of Roses" by Inez Barbour, together with eight new dance numbers, three Hawaiian melodies, patriotic songs and marches and other up-to-the-minute selections.

INTRODUCTORY OFFER

Twelve selected double disc records (selling price, 35c or 3 for $1.00) illustrating the Domino standard, popular, comic, vocal and instrumental selections, will be sent postpaid to any dealer for $2.50. Or a double sample order of 24 records for $5.00. Advance August list mailed on request.

THE W. R. ANDERSON COMPANY

220 FIFTH AVENUE NEW YORK

FACTORY DISTRIBUTORS

TRADE NEWS FROM SAN FRANCISCO

(*Continued from page* 19)

mond, Cal., has had his Pathé shop going for two months now and is enjoying a very encouraging trade. He is one of the first dealers in small communities on the Coast to open a Pathé agency.

Some Edison Activities

C. W. Davis, the new manager of the Edison Shop in San Francisco, while new to the talking machine business, is an old hand at the piano business and is very well known to the trade in the Northwest. He was recently with Kohler & Chase at Portland.

The latest recital given by the Edison Shop was especially interesting to music lovers. Miss Zhay Clark, the well known harpist whose programs at the exposition last year excited enthusiastic public comment, was the principal participant. She was occompanied on the violin by Mrs. Balis. The Edison demonstration concerts grow in popularity.

R. T. Haydock, of the San Francisco Edison Shop, is on his vacation at Orange, N. J.

A new dealer to handle the Edison line is Prouty, of Napa, Cal.

"Weingartner's," prominent druggists of Palo Alto, have installed the Edison line and have provided a modern separate department.

"Wilson's," of the flourishing little city of Martinez, has made a record for that place in the phonograph line. Eight Edison machines were sold in eight days of this month, one of which was a $250 machine.

Heavy Orders for Columbia Machines

Fred A. Dennison, Pacific Coast manager for the Columbia Phonograph Co., states that the Coast dealers are ordering heavily for fall delivery well in advance this year on account of the desire to make sure of having plenty of stock at the right time. Mr. Dennison returned last week from an eight-day pleasure trip to Los Angeles. He made the trip by automobile and was accompanied by his family. Though meant as a pleasure trip, he found that business followed him on the road and waited ahead for him in Los Angeles. The only way to take a real vacation these days, he says, is to go up in a balloon.

L. C. Ackley, formerly a talking machine dealer at San Fernando, Cal., is now on the traveling force of the Columbia Co., making territory in Southern California, with headquarters at the Los Angeles office.

L. V. Ridgeway, representing Lyon & Healy, of Chicago, has been calling on the local trade.

Still Visiting Around New York

George R. Hughes, of the Wiley B. Allen Co., attended the national convention of the Piano Merchants' Association in New York and will remain in the East to attend the convention of the Talking Machine Jobbers at Atlantic City. Before returning to San Francisco he will also visit several talking machine factories.

Some Other Trade Brieflets

James J. Black, manager of the Wiley B. Allen talking machine department, has left for an automobile trip to the Yosemite Valley.

F. B. Travers, manager of the Sonora Phonograph Co., has just been making a call on the trade in the South. He states that business in the Sonora line is in fine shape on the Coast.

E. M. Bonnell, the Los Angeles manager for the Pathephone Co., is East on a visit.

A. J. Kendrick, representing the Victor Talking Machine Co., has left for the East.

VICTOR SERVICE

My Distributor

is a short phrase but it simplifies much. It is a dealer's pledge of friendship for a distributor; gained, not by one purchase, but by rendering *intelligent, courteous service,* with every transaction, large or small, extending over a period of time. We are happy to say *our distributorship* is *"my distributor"* for an increasing number of dealers who have compared *our methods, our service, our large* and *extensive stock,* and have found them to be just a little better than elsewhere.

EDISON EMPLOYES OFF FOR FRONT

Work was suspended at several of the plants of Thomas A. Edison, Inc., at Orange, N. J., for about a half hour on Thursday, June 22, the day on which the militia from the Oranges, in New Jersey, left for Sea Girt, where the State forces were mobilizing. The soldiers left on the Erie railroad, which runs close to the Edison works, and they entrained near-by.

A great crowd of employes swarmed the vicinity of the tracks and said good-bye to the departing soldiers. Nearly one hundred of the three hundred who left had been employed in the Edison industries. The whistle continued to salute the militiamen until the train had pulled out of the yard and the last sight that the soldiers saw was the farewells waved to them from the windows of the factory.

CLEVELAND

EDISON OBSERVES FLAG DAY

Great Inventor Takes Part in Exercises at Edison Plant in Orange, N. J.

Flag Day, June 14, saw the second formal Edison celebration of the holiday at the Thomas A. Edison, Inc., plants at Orange, N. J. The observance was marked by a flag raising, Mr. Edison himself hauling Old Glory up to a conspicuous place on his laboratory. When it was waving proudly in the breeze, Mr. Edison led the crowd in saluting it, as shown in the picture of the great inventor, given herewith. The celebration of Flag Day at the Edison plants was considered of especial significance this year in view of the attitude that Mr. Edison has taken toward the question of national preparedness.

Edison Salutes Flag

The observance took place at noon, occupying about a half hour. While the ceremonies were in progress inside the laboratory fence, thousands of employes watched and listened from the outside. One of the features of the program was the appearance of the Edison band, a new musical organization connected with the Edison industries, which played its first public program on this occasion. The musicians accompanied the singing of "The Star Spangled Banner," and then played "America I Love You," as well as several marches and popular selections, with vim and spirit.

MACHINE FUNERAL RITES

Scott Plans Talking Machine Discs for Use in Remote Places

LAKE CITY, MINN., July 1.—Death soon will have lost its sting. James Scott, of this city, is planning a series of disc talking machine records for use at funerals in remote places. The records will contain a funeral oration, a song by a quartet and a prayer.

Various types of records are planned. According to Scott, a Presbyterian will have a strong Presbyterian program, Baptists will have characteristic sermons, and so on for every denomination.

If a strong eulogy is desired, it will be forthcoming. The entire program will cost not to exceed $1.

The Putnam-Frost Bros., of Newfield, N. J., have moved their talking machine store to a larger establishment on Broadway in order to accommodate the increasing demand for Victor Victrolas.

The Metropolitan Sales Co., New York, dealing in talking machines, records and cabinets, has been incorporated at Albany with a capital of $300,000.

Boone Medford and J. E. Massie, of Waynesville, N. C., are featuring the Columbia Grafonola, a large stock of machines and records being carried.

DANCING PROVES ATTRACTION

At the Retail Store of Gately-Haire Co., Inc., Albany, N. Y.

In line with the present day entertainment policies of progressive talking machine stores, John L. Gately, president of the Gately-Haire Co., Inc., Albany, N. Y., in its retail store, is featuring Miss Geraldine Noble Durkee, age six years, who is appearing in a series of dances to the music of the Victor talking machine. Her performance before enthusiastic audiences always creates a furor.

Miss Durkee

The Standard Popular Priced Talking Machine Record

Operaphone Records

have stood the test and are now a demonstrated success. They are sold by hundreds of dealers, from coast to coast—and the demand is growing all the time. Conscientious effort to produce and deliver records according to our promises has spelled success for us.

In six months our catalogue has grown from 12 to 90 numbers—180 selections—no duplicates, of the finest standard and popular music—vocal and instrumental—rendered by experienced and popular artists.

We want every dealer who sells talking machines equipped with a universal tone arm to sell OPERAPHONE RECORDS. One sells the other. The demand for a popular priced record is big and Operaphone Records satisfy that demand. They sell quickly on demonstration.

Dealers can make no mistake carrying OPERAPHONE RECORDS, they are 8 inches in diameter, double sided, and have more music than the 10 inch records of other makes. They are "*vertical*" or "*up and down*" cut, but play with a steel needle, *no jewel point required.*

OPERAPHONE RECORDS are played on the standard phonographs not equipped with universal tone arms with a small adapter or attachment, which is easy to use and costs little.

The OPERAPHONE goal is the production of the best phonograph record in the market and we are making good.

We solicit inquiries; and will send catalogue and price list on request.

PATRIOTIC RECORDS IN DEMAND

Indianapolis Dealers Find Mobilization Helps Sale of Patriotic Numbers

INDIANAPOLIS, IND., July 6.—Talking machine dealers here have been featuring the talking machines and records to good advantage in catering to the public's demand for patriotic music, following the mobilization of the State militia. In fact, the Columbia machine took a foremost place in connection with the recruiting. A. W. Roos, local manager for the Columbia Co., lent two machines and supplied patriotic records for two of the downtown recruiting stations. In this manner, it was an easy matter for the recruiting officers to attract and hold the crowds. There was no doubt but that the music encouraged many enlistments.

Mr. Roos is greatly pleased the way business continues. With the record for June practically three times as large as for the month of June in 1915, Mr. Roos states that the total business up to date is close to the entire total of 1915.

D. Sommers & Co., which several months ago began handling the Columbia line, is now about to enlarge its talking machine department and considers doubling or trebling the space.

Two good accounts for the Columbia Co. were opened in Terre Haute with the Harvey Furniture Store and the Scott-Hart Furniture Store. Several counties from the Chicago district have been added to Mr. Roos' territory in Northern Central Indiana.

The Western Columbia Cabinet Co., which has been doing business here for about a year, will close its plant here within the next thirty days. The machinery has been moved to the Stout-Mehornay-Duckwall Co., of Salem, Ind., which owned and operated the local plant.

V. N. Shischcoff, the enterprising naturalized American, who built up a small talking machine business in the foreign district of Indianapolis, has advanced to the point where he could give up his box car quarters and has fitted up a nice store at 530 West Washington street. He handles the Columbia line exclusively.

George Stewart, of the Stewart Talking Machine Co., Victor jobbers, is on a trip to the East. After a visit at the Victor factory, Mr. Stewart went to the convention of the Associated Advertisers' Clubs of the World in Philadelphia. E. B. Knight, advertising manager for the Stewart Co., is on his vacation. He accompanied Mr. Stewart to the Victor factory and later to Philadelphia.

Walter E. Kipp, of the Kipp Phonograph Co., is taking a short vacation along with his business matters. Jewell Cartmill, secretary of the company, reports that the Edison business is good.

At the Edison shop business is considered as keeping up with the rest of the year, although there is a slight falling off due to the summer season.

M. P. Tobin, of the Pathé Phonograph Co., Inc., says that the advertising song, "At Home With My Pathé Pathephone," has been meeting with approval. Mr. Tobin has added another man to his forces, E. R. Miller, of Indianapolis, who will look after the retail sales in the store.

DO YOU REALIZE THE FACT--MR. DEALER

A BIG VICTOR RECORD TRADE IS MORE PROFITABLE TO YOU THAN THE SAME AMOUNT OF VICTOR MACHINE BUSINESS?

FIFTH ANNUAL EDISON FIELD DAY

Two Thousand Employes of Thomas A. Edison, Inc., Enjoy Outing at Olympic Park

The fifth annual field day of the employes of Thomas A. Edison, Inc., of Orange, N. J., was held on June 17 at Olympic Park, in Newark. Fully two thousand persons who are connected with the Edison industries gathered at the park and participated in, or were witnesses of, a fine program of athletic events. Mr. Edison occupied a prominent place in the grandstand and awarded a handsome cup to the individual who won the greatest number of points in the various contests. He manifested a deep interest in the proceedings and frequently applauded the efforts of the contestants.

There were twenty-seven events on the program and seven of these were for the ladies. The rest were confined to the men and boys and they included all kinds of legitimate and freak contests. At the close of the sports, late in the afternoon, the majority of those who had come to the park for the events of the afternoon remained for the evening and enjoyed dancing and other amusements afforded by the park. The annual Edison field day is marked by a complete suspension of work in the Edison industries. It is Mr. Edison's gift to his employes and it is highly appreciated and made the most of by the thousands of men and women who are employed in the industries controlled by the great inventor.

COMBINED TALKER AND TELEGRAPH

Details of Invention of Dr. Max Herz, a Prominent Vienna Scientist

A dispatch from Vienna, Austria, of recent date notes that Dr. Max Herz, a well-known Vienna scientist, has invented a sort of combination of talking machine and telegraph which will enable the blind to "read" with far greater ease than the present cumbersome and costly Braile books. The principle of the new device lies in the conveying of Morse or other telegraphic signs to the blind through the sense of hearing. On the machine are placed small records, each of which may contain a whole story written out in code.

To produce these records a further instrument, composed of two Morse keys and electric sounders, is required, the sounders being connected with a needle which cuts into the prepared wax record. The records consist only of long and short sounds and they can be sold at extraordinarily low prices. It is proposed through this medium to issue a daily newspaper for the blind, which will contain the important news of the day.

TAKES CHARGE IN WOOSTER

MILWAUKEE TRADE IN EXCESS OF THAT OF LAST YEAR

Shortage of Machines in All Styles Being Felt—Sale of Records Being Pushed with Vigor —Emil O. Schmidt Store Opened—Novel Idea in Demonstration Room Decorations at Badger Talking Machine Shop—Schefft & Sons Recovering from Fire—News of Month

MILWAUKEE, WIS., July 5.—Wholesalers and jobbers in talking machines agree that the volume of business in June is considerably in excess of that for the same month last year, and it is a conservative statement to say that business during the past month is the best Milwaukee houses have ever experienced.

The shortage of machines is still a problem that Milwaukee dealers are battling with. In the words of one large retailer, there always has been a shortage and there always is likely to be a shortage. Sales are continually ahead of the supply, but it seems that Milwaukee buyers at least are good waiters and rather expect that they will be required to wait for deliveries, particularly when they buy special case styles. There has been a shortage of fumed oak talkers for some months and there is no relief in sight.

Milwaukee dealers are more concerned with the sale of records than of machines, judging from the extraordinary efforts directed that way, and the many original ways and means that are being devised to push sales of records.

The Mexican embroglio has not seemed to affect business to an appreciable extent, although tradesmen realize that any kind of a scare like this induces people to "pull in their horns," as it were, and restrict their buying to some extent because a rainy day may come later.

Opening of Emil O. Schmidt Store

This month there is to be recorded the opening of another elaborate music establishment, which is without doubt one of the finest Pathé representations in the Middle West. The Emil O. Schmidt Co. has moved into its new store at 525 Grand avenue, in the Palace Hippodrome Building, now being completed at a cost of $600,000. The Schmidt Co. was delayed nearly three weeks in occupying the new quarters because the contractors met with unexpected delays. The formal opening was held June 24 and 26. The company is primarily a piano dealer, but it has recently taken on the Pathé and is doing a splendid business. The Pathé parlors are among the "swellest" in the city and occupy a large part of the second floor, where a recital hall seating 150 people has been set apart. The talking machine department is under the direct charge of Henry M. Steussy, secretary and treasurer of the Schmidt Co., who recently moved to Milwaukee from New Glarus, Wis. Emil O. Schmidt is president and general manager of the entire business, which recently was incorporated with an authorized capital stock of $50,000.

The Badger Talking Machine Shop Active

The Badger Talking Machine Shop, which recently took occupancy of its new building at 425 Grand avenue, and is an exclusive Victor retailer, has been changed to a separate corporation from the Badger Talking Machine Co., 135 Second street, Victor jobber and wholesaler. The name of Badger Talking Machine Shop is retained by the new corporation. The capital stock is $40,000 and R. H. Zinke, W. C. Schmidt and Adele Vogt appear as incorporators. Manager Zinke is working out some new and novel sales methods, with particular reference to records, and the big recital hall on the second floor is open to the public at all times. It is equipped with a Kimball grand piano, and Mr. Zinke has recently been making a specialty of teaching pianists to accompany vocal records without charge. Naturally, this method has made a large number of sales of operatic vocal records, which all dealers know are profitable to sell. Dance records are also pushed, and when the July records came out Mr. Zinke extended a cordial invitation to lovers of dancing to use his recital hall for trying out the terpsichorean selections. Many took advantage of the offer.

Manager Zinke has also originated a new idea in making each of his demonstrating booths typify something different from the other. For instance, one booth has been decked out as a "black and white outing room." On these hot days a person actually feels cool just by looking into the room, and after sitting in it for a few minutes and listening to a number of breezy records, it is not a far stretch of the imagination to feel as if he were on the porch of a summer home on the shores of some fine lake in the north of Wisconsin. Electric fans add

BALANCE
Sound Box

TROY, N. Y.

The completeness of the Columbia line; its rapidly growing popularity; the fair and solid policy of the Company—these are three good reasons why the Columbia line cannot safely be ignored.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

a touch of breeziness that makes the illusion more distinct. The other booths are being arranged on other lines, such as a Japanese room, a military room, and so on.

New Pathé Dealers

The Pathephone Co. of Wisconsin, 185 Fourth street, this city, has recently appointed a large number of new dealers throughout Wisconsin. Manager Lawrence McGreal is among the jobbers who are suffering from a shortage of machines and in spite of repeated shipments, is hardly able to hold his own because of the extraordinary demands from retailers. Records are coming through in good shape, however. New Pathé dealers include John E. Daly, Grand Rapids, Wis.; L. A. Towne, Waterloo, Wis.; Carpenter Sales Co., Waukesha, Wis.; A. F. Schoen, Mayville, Wis.; Roesing & Haas, Burlington, Wis.; Tillman Bros., LaCrosse, Wis.; the Koerner Drug Co., Jefferson, Wis., and Schmutzler & Oestreich, Watertown, Wis.

Orders for Hinged Cover Support

Harry T. Young, representing the Chicago Hinged Cover Support & Balance Co., Chicago, spent the last week in June in the Milwaukee trade and reports that the device has been accorded an enthusiastic reception here as well as throughout the country. A number of local factories are going to use the appliance.

Great Vocalion Activity at Gram's

The Aeolian-Vocalion, although introduced to the public only three months ago in Milwaukee, is breaking all taking machine sales records at the Edmund Gram Music House. The house also handles the Columbia, and Manager Paul Seeger is kept on the jump from morning till night. The Aeolian-Vocalion is a fit companion for the Steinway and other high class pianos the Gram house represents, and it is interesting to note that a great many sales are made to Steinway owners. Edmund Gram, head of the house, was elected vice-president of the National Association of Piano Merchants of America at the recent convention in New York.

The Hoeffler Piano Manufacturing Co. has been introducing the Starr talking machine to the local and State trade during the past month.

To Return Soon to Old Quarters

Chas. H. Schefft & Sons, Victrola shop, 849 Third street, expect to get back into their store, damaged by fire several weeks ago, by July 15. The firm has been doing business on an ample scale, in spite of the handicap of having to attract customers to a temporary second floor location. The rebuilt store will be one of the finest in Milwaukee. Seven large demonstrating booths are included in the equipment.

The talking machine departments in all three stores of Edward Schuster & Co., one of the largest department store concerns in this city, are being remodeled and put into tip-top shape for an active retail campaign on the Victrola.

Sonora Phonograph for Theatre

Charles J. Orth, of this city, is receiving many compliments on the Sonora from purchasers throughout the State and in Milwaukee. Mr. Orth has made a campaign on motion picture houses and placed a large number of the higher priced styles. The Jackson Theatre in Milwaukee, one of the largest in the city, is using the Sonora to entertain the crowds during intermissions. The trend of sales is well indicated by the fact that out of eight consecutive sales made by Mr. Orth during the past week, five were $150 machines, two of the $75 style, and one $35 instrument.

Activity With Edison Shop

The Edison Shop, 213-215 Second street, reports the best June volume in its history. The jobbing business has shown a decided increase from month to month over last year, and in spite of an expected summer slackening, business is being maintained on a high level.

The Premier Talking Machine Co., 220 West Water street, this city, has been granted the jobbing rights on the Golden Tone needle for Wisconsin and Northern Michigan. Park Adams, manager, who has just returned from a trip, reports a splendid business.

The Gether Piano Co. has been doing a "record-breaking" business in Empire talkers, and is extending its selling campaign throughout the State. K. L. Williams is now traveling out of Green Bay, Wis., for the Gether house.

Furniture stores in Milwaukee, which handle talking machines, are finding much profit in these connections, and in some instances are selling almost as many machines as pieces of furniture, comparing sales on a price basis. Many jewelry stores are handling talking machines with profitable results.

Good Results From Trip

A. G. Kunde, Columbia jobber, is reaping the benefit of his recent trip with the Merchants and Manufacturers' Association trade extension trip into Eastern Iowa, Northern Illinois and Southern Wisconsin. More than fifteen retailers have been appointed as a direct result of the demonstrations made by Mr. Kunde on the special train, upon which the Columbia was the official instrument.

Lessons of the Convention!

¶ Every meeting at Atlantic City served to emphasize that service and co-operation are the key-notes of Victor success. Without service of a proper and adequate character the Victor dealer is handicapped in every direction. We therefore ask you to let

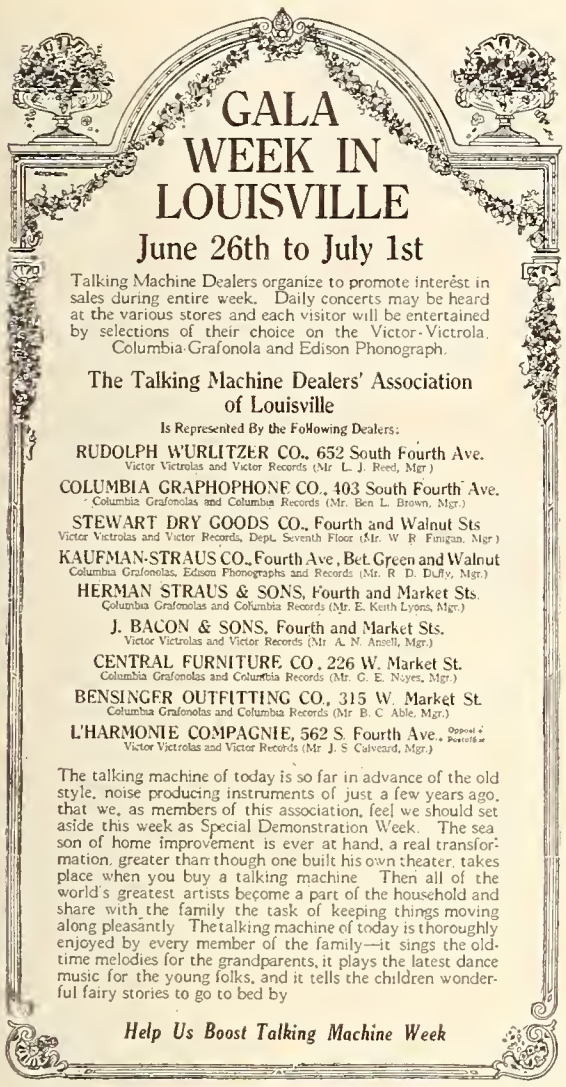
LOUISVILLE DEALERS ORGANIZE

Following Formation of Dealers' Association, a Talking Machine Week Is Held, Which Produced Excellent Results

LOUISVILLE, KY., July 4.—At a meeting of the local talking machine dealers held at the Hotel Henry Watterson, this city, recently, the Talking Machine Dealers' Association of Louisville was formed for the purpose of co-operating



Poster Featuring Talking Machine Week

in developing a more general interest in talking machines and records.

The first evidence of the success of the new association was the celebration of Talking Machine Week in Louisville from June 26 to July 1. During the week the stores were handsomely decorated, frequent recitals and concerts were given each day and a large volume of local advertising matter distributed, all calculated to interest the public to a great degree.

During the week also large, attractive and impressive advertisements were run in the local papers by the new association, in which the names of the association members were published, together with lines handled and the names of the managers. The advertising called particular attention to the great development made in the talking machine during the recent years and urged readers to visit the nearest store and listen to their favorite machine or to shop around and make comparisons if desired.

All the dealers were most enthusiastic over the success of the week and the direct results received through their efforts. Trade marks of the various lines were deeply impressed upon the local public, the Columbia Co., for instance, used a five by three feet banner, showing the "Note the Notes" trade mark, and one department store placed a banner on each side of twenty-two of its wagons. Other lines were exploited with equal effect.

The members of the new association are: The Rudolph Wurlitzer Co., L. J. Reed, manager; Columbia Graphophone Co., Ben L. Brown, manager; Stewart Dry Goods Co., W. R. Finigan, manager; Kaufman-Straus Co., R. D. Duffy, manager; Herman Straus & Sons, E. Keith Lyons, manager; J. Bacon & Sons, A. N. Ansell, manager; Central Furniture Co., G. E. Noyes, manager; Bensinger Outfitting Co., B. C. Able, manager; L'Harmonie Compagnie, J. S. Calveard, manager.

The officers of the association are: President, Ben L. Brown, Columbia Phonograph Co.; vice-president, W. R. Finigan, Stewart Dry Goods Co.; secretary, E. Keith Lyons, Herman Straus & Sons, and treasurer, R. Duffy, Kaufman-Straus Co.

EXCELLENT TRADE IN THE SOUTH

Corley Co. Has New Fall Selling Plan—All Sections of South Improve—Crops Promise Extraordinary Harvest—Musical Interest Grows

RICHMOND, VA., July 10.—Activity in the talking machine trade throughout the South is increasing in volume, as is demonstrated by the plans which the Corley Co., the leading Victor distributer of the South, is making for its fall trade. President John G. Corley, accompanied by his son, Frank W. Corley, who is general manager of the concern, visited the North several weeks ago, and during their visit they placed with the Victor Talking Machine Co. one of the largest orders for machines and records that the Victor Co. has ever received from any distributer. The Corley concern has mapped out a fall service plan which contains many new and attractive ideas for increasing talking machine business, and the plan is rapidly being adopted by the great number of local dealers who are served by the Corley firm.

Economic conditions in the South are better to-day than have ever been before. Weather conditions, which were somewhat unfavorable in certain sections for a time, have made a decided change for the better, with the result that the crops now give evidence of an abundant harvest. The diversification of crops, and the gradual elimination of the single-crop idea, which has hitherto hindered and agricultural progress of the South, is another factor which is materially increasing the purchasing power of the citizens throughout this section.

In the manufacturing centers in Alabama, Tennessee, and West Virginia, the mills and factories are working to capacity, and the complete and favorable readjustment of the cotton-industry, together with the greatly increased activity in the coal and iron industry, all have tended to bring about a big era of prosperity.

Always musically inclined, the Southern people have this year shown an even greater interest in music than hitherto, as is witnessed by the spring festival which was held in Richmond a few weeks ago at which many noted operatic stars appeared. There is a noticeable increase in the number of concerts and musicales which have been given all over the South since the first of the year, and this has had a direct influence in extending and enlarging the demand for talking machines and records.

With prosperous conditions generally obtaining, and with the interest in things musical increasing as it is, the prospects for the talking machine trade are especially bright.

NO LET-UP TO PROSPERITY IN THE DETROIT TRADE

Talking Machine Dealers Profiting by the General Prosperity Which Has Existed in Detroit for the Past Six Months—Machines Hard to Get—Wallace Brown Featuring Edison Line in Novel Billboard Advertising—Improvements at Grinnell Bros.—Other Items

DETROIT, MICH., July 7.—It's the same old story in the same old way so far as talking about business conditions in Detroit are concerned. There is no let-up to local prosperity and this applies particularly to the talking machine trade. Another year is bound to see more dealers here because every business thoroughfare is developing, and especially those in the outskirts. This is due to the development in real estate and to the fact that the first six months of 1916 were the greatest for building Detroit has ever known, and the remaining six months will show even a better record. You just can't stop Detroit from forging ahead—and it wouldn't be at all surprising if by 1920, our population exceeded that of Cleveland. "A million by 1920" is still the slogan of Detroit business men.

Wholesalers and retailers in the talking machine business make relatively the same statement, which is to the effect that this has been a splendid year so far, there having been practically no quiet spells.

C. H. Grinnell, who has charge of the Victor jobbing business of Grinnell Bros., 231 Cass avenue, says business is surpassing all expectations. Shipments of machines from the factory are not coming in quite as good as they might be, but this fault he attributes partly to the railroad company, who claim they are helpless because of freight congestion everywhere. "We could sell many more machines if we could only get them," he said. "But one thing pleases us and that is our record business. We have a big stock on hand and are able to promptly care for any sized order. We never were in better shape on records." C. H. Grinnell and A. A. Grinnell, treasurer of the company, will attend the Victor Jobbers' convention at Atlantic City.

J. R. Peckham, manager of the Pathephone Co., Michigan Pathé jobbers, attended the New York convention of the Pathé jobbers, accompanied by M. F. Millard, one of the large stockholders. Mr. Peckham said he benefited greatly by attending the convention and talking with jobbers from other sections of the country. He expects to inaugurate a number of new business-getting schemes in the very near future. He says trade is good and getting better.

R. B. Alling, general manager of the Phonograph Co. of Detroit, Edison jobbers, says

For Dealers and Jobbers handling The Leading Type of Talking Machines

PERFECT TONE CONTROL SECURED

by a simple turn of

The Rowland Sound Regulator.

A simple device, instantly attached to the machine, absorbs all harsh, metallic sound, as well as annoying scratching noises.

ROWLAND SOUND REGULATOR CO., Inc., 261 Broadway, New York City

trade has been excellent right along, although he looks for things to quiet down during July and August, and then to re-open with a bang in September after everybody is back from vacationing. Mr. Alling, several of his staff, and thirteen Michigan Edison dealers went to New York in a special car to attend the Edison convention at the McAlpin Hotel, June 22, 23 and 24.

Wallace Brown, 31 East Grand River avenue, is paying $100 a month for a large billboard on Woodward avenue, near Charlotte, bearing these words: "When they say Edison you think of Wallace Brown." It is costly for general publicity, but Mr. Brown believes it pays in that particular section. Electric glimmers keep the sign lighted all night. Mr. Brown says he is always glad to listen to any advertising proposition and will tackle anything that has merit.

K. Mills, manager of the Columbia branch, 503 Woodward avenue, spent an enjoyable vacation of two weeks in June touring as far East as Buffalo. Mrs. Mills accompanied him. For the six months period ending June 30, as compared with last year, Mr. Mills says the increase in actual dollars and cents would really be amazing. This is no reflection on last year, because Mr. Denison, who was manager at that time, also showed a big increase over the same period for 1914—but it only goes to show how the Columbia line is developing in Michigan. Mr. Mills reports also that since the completion of the new addition to the Columbia factory, shipments have been much better, both as to machines and records, and this has materially aided in bringing up the figures for merchandise sold.

Ed Andrew, manager of the J. L. Hudson talking machine department, returned July 3 from a three weeks' motor trip through the East. Mrs. Andrew, as well as his father and mother, were also on the trip.

The new Sonora phonograph shop at 607 Woodward avenue, owned by John E. Schmidt, compares favorably with any of the modern stores, and is doing a good business, according to Mr. Schmidt, who also owns the East Detroit Music House on Gratiot avenue, which features the Sonora in connection with pianos, players and musical instruments.

Another local Sonora dealer is W. W. Gunn, at 794 Woodward avenue, who says he could sell many more machines if he could only get them. Mr. Gunn expects to push the Sonora real hard this fall.

A. E. Noble, Columbia dealer, Woodward avenue, attended the convention of the National Association of Piano Merchants at the Hotel Astor, in June. Before returning home he visited Boston and other Eastern points.

W. H. Huttie, district manager at Detroit for the Starr Piano Co., 110 Broadway, says every week is showing steady improvement in the new phonograph department.

The Kalamazoo (Mich.) Edison Shop has moved from 203 North Burdick street to 115 East Main street. B. A. Monroe and J. H. Monroe are the proprietors of this shop.

H. L. Ireland, assistant manager of the Columbia branch in Pittsburgh, was a visitor in Detroit June 24. A. C. Erisman, district manager for the Columbia in the New England States was also a recent visitor in June. Mr. Erisman was connected with the local Columbia office about ten years ago.

John Schmelzer, Columbia dealer in Saginaw, who operates stores on the east and west side, and who carries the complete line at the east side store, has now decided to put in equally as complete a line in his west side store.

Some extensive improvements are in contemplation for the Victor retail department of Grinnell Bros. At present the entire basement is devoted to Victrolas and records. Architects are now working on the plans for remodeling the basement.

Victor dealers throughout Michigan have been advertising and featuring their $15 and $25 models to people occupying summer cottages, and they have been ready sellers.

The Columbia retail department of Heynz Bazaar, 147 Woodward avenue, under the management of Phil Lang, is doing a splendid business. During June Mr. Lang cleaned out a big lot of cylinder Columbia records.

Larry Dow is now the manager of the Edison department at the Frank Bayley store, 114 Broadway. He was formerly with Wallace Brown.

Max Strasburg, 74 Library avenue, is using his old store at Grand River and Library avenues, for displaying Columbia machines, although a big sign in the window conveys the information that he has moved to No. 74. Mr. Strasburg holds the lease on the corner until October, and feels that he might as well use it in this way rather than let it remain vacant. Max reports good business both on Victor and Columbia goods.

JOIN HEINEMAN FACTORY STAFF

E. Jaccard and Rene Jaccard Now Connected with That Concern in Elyria, O.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week that E. Jaccard and his son, Rene Jaccard, had joined the Heineman factory forces at Elyria, O. E. Jaccard is well known in talking machine circles, having been associated with the Sonora Phonograph Corp. for a number of years, and is thoroughly posted on all phases of the industry's technical division. In the Heineman plant Mr. Jaccard will concentrate his activities on experimental and research work, in conjunction with Louis Valiquet, consulting engineer at the Heineman factory.

E. C. Albertson, music dealer of Bridgetown, N. J., has leased a large store on South Laurel street, where he is displaying talking machines.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., July 8.—The month of June has been most profitable to all the talking machine dealers of Philadelphia, and it ends the first six months of the present year in a most satisfactory way, with profits very much ahead of a corresponding period of last year. The prospects are most glowing for the future. The manufacturers are coming nobly to the aid of the jobbers and retailers and less complaint is heard about the scarcity of goods during June than at any time during the year—in fact in several years.

Victor Co. Float Wins Prize

The advertising men held there convention in Philadelphia during the week of June 26, and it brought many talking machine men to this city. In this convention the talker attracted a great amount of attention, and the Victor Talking Machine Co. display in the big Monday evening parade won first prize against a great many very attractive displays.

The Victor display consisted of a large float on which was a picture of "His Master's Voice." The dog, made of plaster of paris, was of immense proportions, as was also the Victor horn. Back of this came another elaborate float large enough to hold at least two dozen men and women dressed in the exact costumes prescribed by all the leading operatic roles. It was very well carried out and was picturesque, and the general public as well as the judges agreed that to the Victor belonged first honors.

Firm of Hughes & Eakins Dissolved

The firm of Hughes & Eakins, who handle talking machines as well as pianos, at 261 South Fifty-second street, has been dissolved. Mrs. Eakins purchased Mr. Hughes' interest, and is conducting the place under the name, Eakins Piano Co.

W. Lester Bowers, of the Heppe talking machine department, has gone to Texas with his regiment, one of the very few soldiers among local talking machine men.

Increase in Columbia Co. Business

Manager Walter L. Eckhardt, of the Pennsylvania Talking Machine Co., reports that in June his business has been keeping up its regular quota of increase, and was fully 100 per cent. ahead of the same month last year, which in itself was a very extraordinary month. Mr. Eckhardt states: "We have booked orders for the Columbia for fall delivery to the extent of about 300 per cent. increase over last year, and with the present facilities for handling our business, we find that we are better able to handle this increase, with much more ease and precision and with practically the same force. We have, however, increased our clerical force."

The firm was favored the past week with a visit from James P. Bradt, general sales manager of the Columbia Co.; Frank Dorian, general manager of the Dictaphone; N. F. Milner, gen-sales manager of the Dictaphone; M. D. Easton, of the sales department, and Messrs. Hanff and Metzger, advertising agents.

Mr. Eckhardt reports that his firm has been doing a very large business at their Atlanta store, and has taken a new loft which will double their floor space. He has just returned from a visit to that city and says he was delighted with the condition that he found there.

Mr. Eckhardt was most enthusiastic regarding the Victor Co. display in the ad men's parade. He said: "I want to congratulate them on their enterprise. Their float representing the different characters from the operas was wonderfully done and was an interesting and educational exhibit that fully justified the effort. I was away so much that it was not possible for me to attempt an adequate competitive display."

Development in Edison Demand

Blake & Burkhart, the big dealers here in the Edison, report that their business in June was very good and it would have been very much better had they been able to have gotten the goods. They did not find a shortage of machines, but in the record situation. Mr. Burkhart says: "We are assured the record proposition will be taken care of in the future, as the Edison people have increased their output to practically double what is was formerly, and in another month or so we will be able to overcomes the present shortage."

H. A. Weymann & Son made, during the ad men's week in Philadelphia, a very creditable display of Victrolas, and their entire building was decorated for the occasion.

Harry Weymann says that the demand for Victrolas and records is just as great now as it was in any month during this year. He says: "There seemed to be no let up to the demand, and we are making every effort to keep our dealers supplied. Records we are in a position to fill 100 per cent."

Wants Dealers to Charge Interest

Mr. Weymann is very hopeful that all the dealers in Philadelphia will get together and not only agree upon charging 6 per cent. interest on the lease plan, but also to agree upon a certain percentage that should be paid down and so much per month—a uniform rate among the dealers as to the time that leases should run.

H. A. Weymann has removed his family to his cottage at Chelsea, Atlantic City, and is commuting each day.

Messrs. Schnell and Megehan, of Seventeenth street and Columbia avenue, Victor dealers, will erect three new booths in the front part of their store.

Busy Times With Buehn Co.

Louis Buehn & Co. report that June was their biggest month this year, and was very much better than the same month last year. Mr. Buehn has taken a cottage at Ocean City for the season, but will spend several days a week at his Philadelphia warerooms. Before Mr. Buehn went away he took a two weeks' automobile trip through the New England States, going as far as Maine. W. J. Raush, of the Swank Hardware Co., of Johnstown, Pa., was in Philadelphia last week attending the ad men's convention, and reports that the talking machine business in his section is fine. Another visitor was J. J. Knies of Mahonoy City.

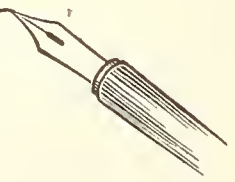
The Edison dictating machine business has also shown a very handsome increase over any previous month of the year, and their prospect for the coming month is very good. They have been able to keep on their full winter force all summer. Among some of the largest of their sales in June were the George A. Parker Hosiery Co., the Standard Supply and Equipment Co., John B. Stetson & Co., the Dill and Collins paper people, as well as a number of smaller orders.

The Penn Co. on July 1 ended the greatest year in their history and by a per cent. in advance of any other year that is almost staggering. They report that machines and records are coming in very much better than heretofore, and that they are in excellent shape to begin July, which they believe will be another record breaker. Two members of the firm will alternate at the Talking Machine Jobbers' Convention at Atlantic City next week.

Introducing the Wizard Needle

Among the newer developments in the talking machine trade are Wizard needles, manufactured by H. S. Townsend, 1833 West Venango street, of this city, this needle being in the semi-permanent class. These retail at 25 cents a box of ten needles. Claims made by the manufacturer are: Scratch is eliminated, guaranteed not to injure records, produces a soft mellow sound, and will play a number of times without changing.

Pen Your Victor Orders to Penn



There are many reasons back of the broad statement above as to why Penn should fill your orders. One is, because Penn can do it, if anyone can. And that's one reason why you see no stock piled up around our storehouse, for every available machine and record goes OUT to our dealers. Put your trust in Penn. We'll work hard to please you.

VICTOR

Penn Phonograph Co., Philadelphia

VICTOR CO.'S PATRIOTISM

CAMDEN, N. J., June 26.—The Victor Talking Machine Co., following the call for the mobilization of the National Guard, issued an announcement to the effect that all employes of the concern who responded to the call would be given their salaries during the time they were in service and that upon their return positions would be provided for them.

The Victor Talking Machine Co., of Camden, N. J., has announced the usual quarterly dividend of $1.75 on preferred stock and $5 on common stock. These dividends will be payable July 15 to stock of record as of June 30.

Two things to remember after the Convention

—that the Victrola is the greatest single unit in today's world of merchandising.

—that BUEHN VICTOR SERVICE helps you most to realize the profits due to your efforts with this unit.

ARTHUR L. VAN VEEN & CO., Marbridge Bldg., Broadway and 34th St., New York

ENTIRE BUILDING FOR LANDAY

To Occupy Entire Five Floors of 23 West Forty-second Street, Which Will Be Remodeled and Re-arranged for Retail Victor Trade

Max Landay, of Landay Bros., New York, Victor distributers, announced last week the closing arrangements whereby this concern will occupy the entire building at 23 West Forty-second street, New York, which is in the heart of the high-class retail district. Five entire floors in this building will be devoted to the exclusive sale and exhibition of Victor goods—in fact the plans indicate that this establishment will be a veritable "Victor Temple of Music."

Mr. Landay states that the front of the building will be torn out and remodeled and that the interior will consist of the latest and most up-to-date ideas in the equipment of retail warerooms. The demonstration booths will be handsomely furnished and decorated and there will also be constructed a recital hall which will be devoted to informal Victor recitals. A feature of this Victor establishment will be an educational department which will be given over exclusively to this important branch of the Victor industry.

The facade of the new building will be of a festive character, with Corinthian ornamental columns. The scheme of decoration and ornamentation throughout will be suggestive of a Temple; dignified and substantial, withal attractive. The latest ideas in concealed lighting systems will be installed in the new building.

Landay Bros. have occupied the store floor of the building at 23 West Forty-second street for the past eighteen months, and have achieved a remarkable success there from a commercial standpoint, which left no doubt as to the desirability of the location as a retail headquarters. Facing the New York Public Library, and a few doors from Fifth avenue, this Victor showroom will be ideally situated in every respect.

Landay Bros. have never hesitated to spend large sums of money to make their exclusive Victor establishments artistic to a degree, and Max Landay is now working out plans which will make the Landay-Victor Music Temple a show place of the local retail trade.

DEMAND FOR SPRING LUBRICANT

In a recent chat with The World, P. Henry Kerler, of Ilsley-Doubleday & Co., New York, stated that the graphite phono spring lubricant which this company introduced a short while ago is meeting with very pleasing success. Talking machine manufacturers have favorably commented upon the many qualities of this lubricant, and are using it extensively for motors, main springs, gears, etc.

H. H. Rhodes is the manager and W. W. Baitinger, assistant manager, of the Forest Park branch of the Geo. P. Bent Co., Chicago, which was recently opened.

GENEROSITY OF SONORA CORP.

To Increase Salaries of Men Ordered to Mexico and Will Retain Positions for Them

The employes of the Sonora Phonograph Corporation who are members of the National Guard, and who were called out for Mexican service recently, donned their uniforms and hastened to the armories without knowing just what arrangements the company would make for their care while away.

George E. Brightson, president of the Sonora Co., quietly increased the salaries of all the men ordered out at once, and stated that the new salaries would be paid while the men were absent. Their positions will be waiting for them on their return.

The first news that some of the men had about this pleasing surprise was from the newspapers issued while they were about to go aboard their trains. Letters have been pouring in from all over the country commending the Sonora Phonograph Corporation for its action in relieving its men of worry as to how their families are to be provided for while they are in the country's service.

The workers in the Sonora offices and factories are watching the reports of developments on the border with much interest, as their men are in quite a number of the New York regiments, and those at home feel as though they were at the front by proxy.

USING NEW WORM-GEAR MOTOR

All Models of Wonder Talking Machines to Have New Motor Equipment

Hugo S. Radt, vice-president of the Wonder Talking Machine Co., New York, announced this week that the company is now using a new worm-gear motor, which replaces the former type of motor used in Wonder machnes. This new motor will be used in the $5 and $7.50 models as well as the more expensive ones, thereby enabling the company's dealers to furnish their trade with the new motor in all types of Wonder machines. Mr. Radt states further that this new motor has been carefully tested at the company's factory for four and a half months and has given perfect service under all conditions.

Ephraim F. Aldrich, receiver of the Boston Talking Machine Co., recently won a verdict of $3,100 in a suit against George A. Whitmore, for the recovery of money alleged to be due for an option on the purchase of the bankrupt concern.

Tenth Annual Convention
of the
National Association of Talking Machine Jobbers
Atlantic City, July 10 to 13, 1916

Atlantic City, N. J., July 13.—Beyond all doubt the most successful convention of the National Association of Talking Machine Jobbers ever held was the tenth annual meeting which convened at the Hotel Traymore, this city, on Monday, and has been in constant action ever since.

In the first place the attendance has been unusually large. Not only have the jobbers and their executives come to the convention, but in several cases they brought with them as many as a half dozen of the employes for the purpose of absorbing the information regarding the making and marketing of Victor talking machines and records, which was made one of the main features of the convention. The promise of an educational convention, made some time ago, was well carried out with the earnest co-operation of the Victor Co. and its officials.

The business meetings, which went far to prove how active the association officers and committeemen have been during the past year, were held on Monday and Tuesday afternoons, with the mornings given over to the enjoyment of the many pleasures offered by this popular resort. With the general meeting on Wednesday there began the educational features, including addresses by the department heads of the Victor factory as well as those engaged in the exploitation work for that company. The big event, next to the banquet on Tuesday night, was the appearance of artists of international fame, who entertained the jobbers on Wednesday evening through the courtesy of the Victor Co., for whom all the artists present make records. Such names as Alma Gluck, John McCormack, Efrem Zimbalist, Reinald Werrenrath and others of equal note afford an indication of the calibre of the talent which the jobbers have heard so often through the medium of big selling records and were now privileged to hear in the flesh, so to speak.

In the matter of general entertainment there was nothing left to be desired, for despite the rain which came on Sunday afternoon and on Monday, the work of the committee in charge of the arrangements showed itself in the perfect manner in which each detail was attended to. From both the business and the social standpoint the convention was by far the greatest ever.

The First Session on Monday Afternoon

The first business session was held on Monday afternoon in the Rose Room of the Traymore, with President McCarthy presiding, who presented the following report of his year as president:

PRESIDENT McCARTHY'S REPORT

It is incumbent upon your officers to render at each annual meeting an account of their stewardship for the year entrusted to them by you, and to set forth for your approval or otherwise an account of their doings during that period. You will be given full and complete statements by your secretary and treasurer as to the physical and financial standing of our association, and on these reports I will not intrude. They will speak for themselves.

In general the association members have enjoyed a year of splendid business and prosperity, and I congratulate each and every one of us upon being engaged in the best business of which I have any knowledge at this time. The work at the factory has been generous to a marked degree, and supplies have been more nearly ample than for many years; with many indications of better things to come in the near future.

My work for the association during the year just closing has been rendered light and pleasant by the efficient gentlemen you so wisely chose to co-operate with me in carrying on our labors, and to those gentlemen go my heartfelt thanks. Our ranks are practically unbroken, and we face the future serenely and hopefully. There remains great and good work ahead of us in perfecting our organization and our business, first and foremost being our work to secure the passage of the Stephens bill. As to the work done on this measure by our secretary and committee you will be duly advised by the secretary. That the measure is of paramount importance to us goes without saying. Additional ways and means to further the passage of the bill will be presented to this meeting, for which I bespeak your careful consideration.

Retiring President Andrew G. McCarthy

A pleasant happening outside the beaten path of business during the year was the marriage of our good friend and well-wisher, the general manager of the Victor Co., Mr. Louis F. Geissler, and to him and his charming bride our association paid its best respects in the form of a suitable and appropriate memento.

I deem it proper at this time to take official cognizance of the regrettable and untimely passing away of a friend and comrade to each and every one of us in the person of the late Colonel Edward Lyman Bill, the editor and proprietor of the official journal of our trade, The Talking Machine World, and also The Music Trade Review, devoted to the interests of the music trade. A kindly, courteous, polished gentleman and a staunch friend and supporter of our organization. May he rest in peace.

Officers of the National Association of Talking Machine Jobbers for 1916-1917

President, Edwin C. Rauth, Koerber-Brenner Co., St. Louis, Mo.

Vice-President, H. A. Winkelman, Oliver Ditson Co., Boston, Mass.

Secretary, L. C. Wiswell, Lyon & Healy, Chicago, Ill.

Treasurer, W. H. Reynalds, Mobile, Ala.

Matters of major and serious import will be presented to you at this time which will require your earnest attention, and for these and for our sessions throughout I ask for the fairness, harmony and good fellowship which have ever distinguished our annual meetings.

The secretary's report was as follows:

SECRETARY E. C. RAUTH'S REPORT

At the close of our last meeting in San Francisco, Cal., on July 24, 1915, this association totaled eighty-eight members, all of whom are distributers of Victor Talking Machines. Since that time, Chase & West, of Des Moines, Ia., have been automatically dropped from membership; owing to their discontinuing the distributing of Victor talking machines. We have received one new member—Hext Music Co., of Denver, Col. This still leaves a total membership of eighty-eight, consisting of seventy-eight regular members and ten branch house members.

The executive committee, since our last annual convention, has had two meetings—one being held on September 19, 1915, at Philadelphia, Pa., and the other in New York City, February 15, 1916. Both meetings were well attended by your executive committeemen, and also by other members of this association.

The meeting at Philadelphia was called for the purpose of levying a special assessment to create a fund to carry on the work of promoting the Stephens bill. It might be well, at the proper time, to bring this matter up for discussion, particularly since some of the members paid this assessment under protest.

If we intend to continue our good work, in promoting the Stephens bill during this and, if necessary, the next session of Congress, it will very likely devolve upon us to raise more funds. The detailed report of your secretary will show the immense amount of work done by your Stephens committee, for which they received no remuneration. The only expense defrayed by this association was railroad fare and hotel accommodation. Every Congressman in the United States, during the adjourned period of Congress, was visited by some member of your Stephens committee. Your legislative committee made three different trips to Washington. This will give you only a faint idea of the vast amount of effort necessary to carry on this work.

The meeting at New York was the regular mid-winter meeting of your executive committee. At this meeting, a committee of three was appointed to confer with the Allied Music Trades, to consider the Klugh resolution. This committee was given no power to act, but was instructed to report back to the association at its next meeting, July 10, 1916.

A committee of three was appointed to consider suitable plans for the establishment of an association credit bureau, and submit the report of these plans to the next annual meeting. The committee consisted of: H. G. Koer-

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 35)

ber, chairman; A. A. Trostler and J. N. Blackman.

A committee, consisting of J. N. Blackman, chairman; W. H. Reynalds and J. C. Roush, was appointed to visit the Victor Co., to discuss matters of mutual interest to the entire industry.

The following letter was received from L. F. Geissler, acknowledging receipt of the wedding present sent by the members of this association:

February 12, 1916.

Mr. James F. Bowers, Chicago, Ill.

Dear Mr. Bowers: To you as chairman, and, through you, I would attempt to express to the National Association of Talking Machine Jobbers my genuine and deep appreciation—

First: For the kind sentiments expressed by them through the medium of the beautiful illuminated book of presentation bearing their signatures.

Second: For the perfectly magnificent set of silver which Mrs. Geissler and myself have already taken so much pleasure in exhibiting to our friends, and which we only

Retiring Secretary, E. C. Rauth

wish might be used in the joy of serving each member at our own table.

I have never had any evidence of friendship so deeply affect me as did this beautiful gift, and I would that I could shake the hand of every member of our association in grateful personal acknowledgment. Most sincerely yours,

(Signed) Louis F. Geissler.

I also have the following letter from J. Raymond Bill, acknowledging the memorial tribute sent by this association to the family of our lamented friend, Colonel Edward Lyman Bill:

April 11, 1916.

The National Association of Talking Machine Jobbers.

Gentlemen: I have recently received, through the kindness of Mr. James F. Bowers, the leather-bound memorial tribute to my late father, Edward Lyman Bill.

I have not as yet delivered it to the rest of my family, but even before doing so, I am moved to evince in some meagre way my own heart-felt appreciation.

To a young man who has just lost his father, there can be nothing of a dearer nature than those acts which throw into vivid relief the good character of the one now absent.

I have always, son-like, thought a great deal of my father, but when I see such men as I know to be prominent in the Jobbers' Association, extending to the lonesome family some evidence of their sincere esteem, I can only thank those friends for adding another long chapter to my filial love for my father. But my thanks to you for this sort of a gift must stand unqualified—fitting words are not within my power.

But at least I can say that all the good things "The Colonel" has said to his son about the Jobbers, have now been turned from the verbal into the real by your truly human deed. Sincerely.

(Signed) J. Raymond Bill.

TREASURER REYNALDS' REPORT

In connection with his report as treasurer of the association, W. H. Reynalds said: "The finances of our association are in a very flourishing condition, and the membership, almost to a man, has been very prompt in paying their dues and assessments, thus showing their appreciation of the valuable work the association has been doing.

"The adjustment on the price of double-faced records several years ago has paid each member many thousand per cent. interest on his investment in dues and assessments in the association, to say nothing of the benefits they are deriving through the vigilance of the traffic committee, through the great benefits derived from close contact between the factory and the association, through the great benefits of the convention, which serves as a big melting pot for the views of the members, and through the many benefits derived by every man who rubs shoulders with those engaged in the same struggle in life.

"I do not believe that any organization has been more active in looking after the interests of the trade it represents, and I am satisfied, through the manner in which the members cheerfully provide funds for the organization, that they are fully satisfied with results."

REPORT OF TRAFFIC COMMITTEE

The traffic committee, of which L. C. Wiswell is chairman, reported as follows regarding its work for the year:

Our industry is indeed fortunate as far as traffic matters are concerned, for during the past year no changes in the freight classification or rate increases were proposed by the various classification committees.

Some person or concern (your committee was unable to learn whom) made application through the Western classification committee for second class CL rating on combination carloads of talking machines and pianos, minimum 18,000 pounds.

A hearing was held on this application in Chicago at which your committee through its chairman appeared and talked for the affirmative. A number of other interests had representatives at this meeting. After hearing all the evidence the classification committee rejected the application.

You will be interested to learn that at the present time there is a movement on foot to change the CL rating on talking machines, reducing the minimum from 24,000 pounds to 16,000 pounds. You are all cognizant of the fact that it is a physical impossibility for the factory to put 24,000 pounds of Victrolas in a thirty-six-foot car. Victrolas, regardless of size, sufficient to fill a car, will not in the aggregate weigh 24,000 pounds. Heretofore the factory has been compelled in many instances to delay carload shipments in order to put in a sufficient quantity of records to make the minimum, also in many instances the distributers have been obliged to pay for tonnage which they did not receive because of the fact that the Victor Co. in filling the car was only able to put in, say 22,000 pounds. when the minimum is 24,000 pounds.

The reducing of the minimum to 16,000 pounds will not only mean that in making carload shipments the Victor Co. will be able to fill the car to the minimum, but it will mean more carload shipments to distributers, hence a great saving in freight charges.

It is estimated that if this recommendation is adopted by the various committees it will mean a saving of thousands of dollars in freight charges, all of which argue for larger net profits, for where you are now paying for LCL. first class rating on Victrolas and records on shipments aggregating 16,000 pounds and over you will save the difference between LCL and CL rating on shipments weighing of this size.

While your committee can only presage, still evidence at hand tends to show that the recommendation will be favorably received. However, we should not be caught napping, therefore, your committee respectfully suggests that the association have a representative at the meetings of the official Southern and Western classification committee when this recommendation comes up for hearing. Your chairman has been reliably informed that the Western classification committee also the official classification committee will docket this recommendation for a hearing at their next meeting which will be held in Chicago and New York respectively. Respectfully submitted, traffic committee: L. C. Wiswell, chairman: W. F. Davisson. G. A. Mairs, E. N. Upshaw, H. L. Royer.

ARRANGEMENT COMMITTEE'S REPORT

A. A. Trostler, chairman of the arrangement committee of the association, as a matter of regularity filed his report, but the excellent work of that committee in arranging the details of the convention was so evident that a report of its activities, except as a matter of record, was superfluous. Mr. Trostler's report read in part:

"The function of the arrangement committee is largely working out the details of conventions. Your chairman, with his fellow members on this committee, has not left a stone unturned to make this—the tenth annual convention—our banner one, and hopes that when this convention is over it will prove so. The many requests for reservations and other information pertaining to this convention, prompts me to make the above statement.

ir Friends Who Attended the Convention in Atlantic City

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 36)

"I have enjoyed the work allotted to me by President McCarthy, and greatly appreciate the honor. The hotel management has done everything possible for your committee and has made it as easy as they could to make satisfactory arrangements."

Mr. Trostler here spoke of the arrangements made for the banquet and of the co-operation of the Victor Co. and its artists in furnishing entertainment, and continuing said:

"I also want to say that L. F. Geissler, gen-

Arthur A. Trostler

eral manager of the Victor Talking Machine Co., has done everything possible to assist your committee in working out the details pertaining to the Educational Day, and I am satisfied that you will gain a world of information which is valuable to your business.

"In conclusion, I want to thank the members of our association for answering the questions that I put to them through the mails as promptly as they did, which helped me very materially. I also want to thank the balance of my committee for the wonderful support they have given me, and my fellow members have worked just as hard as their chairman. We know that one cannot accomplish great things unless he has the support and co-operation of others."

Following the report of Mr. Trostler came the report of the legislative committee, which was presented by Mr. Mickel. The report outlined the work which the committee had done during the year, and also was supplemented by the report of the special Stephens Bill committee, which was presented by Secretary Rauth, after Mr. Mickel's report had been read. Mr. Mickel showed that the legislative committee had been exceedingly active in endeavoring to foster interest and support for the Stephens Bill, and the report, which is as follows, was received with much approval by the convention:

REPORT OF LEGISLATIVE COMMITTEE

The report of the legislative committee will have to include the report of the special committee on the Stephens Bill for the entire work of the year has been concentrated on this one movement. I will not attempt in this report to go into the details of this work. If any of you are interested to know what has been done, apply to our efficient secretary, E. C. Rauth, after the meeting and you will be gratified to see the detailed account of the work which has been accomplished by the different members of the committee.

Special interest in the Stephens Bill was aroused at the convention in San Francisco. W. H. Reynalds and myself discussed the plan of our association doing something more definite on the Stephens Bill than had been done before. The matter was then presented to the executive committee which held a meeting immediately after our convention, at which time the executive committee decided to have appointed a special Stephens Bill committee.

In the latter part of July I talked to Louis F. Geissler about the work and he stated to me that if the association could be of assistance in bringing about the passage of the Stephens Bill, it would have done more good than the organization had accomplished since it had been in existence. I mention this so that the members of the association who have not been active, will appreciate the importance of the work done. When the committee began to look into the plan it very soon developed that we required money in order to accomplish much, so in the early fall there was a meeting of the executive committee and the special Stephens Bill committee called in Philadelphia, at which time there was an assessment of $100 per member to defray the expenses of the committee. At this time we divided the United States up into districts, allotting specific sections to the different members of the committee and also to some who were not on the committee and were willing to devote some time to this work.

In February, another meeting was called in New York, at which time our plans were further perfected and adjournment taken to Washington. This meeting was attended by Messrs. Roush, Nestor, Blackman, Rauth and myself. While in Washington we called on a number of the Senators and Representatives and Secretary Tumulty, also consulted with Mr. Whittier, of the American Fair Trade League, and I am sure that every member of the committee agrees with me that we did some very active work at that time.

Since that meeting it has been necessary on one occasion for Mr. Rauth to go to Washington; on another occasion, Mr. Blackman went. Last November, it seemed to be necessary that some one go to Atlanta, Ga. Blackman, Rauth and myself made that trip. About a month ago the committee on Interstate and Foreign Commerce, to which this bill has been

George E. Mickel

referred, took it up, which made it necessary for our committee to have another meeting in Washington, and at that time J. Newcomb Blackman made a very able argument before the committee. The hearings will be continued before this committee at some future date, but when it will be reported out is indefinite. I mention these few instances just to give you an idea of the time a thing of this kind requires and this is only a small amount of the work done. I have not attempted to give any detailed account of the trips that every member of this committee has made and they have required much more time than these special trips I have mentioned. The report which our secretary, E. C. Rauth, has, if looked over, will give you some idea of the time that has been given to this work. I want to say to you, gentlemen, that the thanks of the association are due to the individual members of this committee for the work which they have done.

The plan of operation as conceived originally was to see individually the United States Representatives and Senators to secure if possible

(*Continued on page 38*)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 37)

their promise to vote for and support this bill. This was work which had not been done by any other organization and the results have been very satisfactory. In conversation with Mr. Whittier, of the American Fair Trade League, he stated to our committee "that no association in the United States had done the efficient work for the Stephens Bill that has been done by the National Association of Talking Machine Jobbers." This has been done by the conscientious and persistent effort of the committee, all of them having given liberally of their time.

The work, however, is just well started because it looks now as if the bill would not come up during this session of Congress, and if it does not, we should continue the work so well begun. The plan of operation is right. Going direct to the Representatives and Senators is the thing to do. They have all been flooded with letters and we have had it done by the dealers and this should be continued, but each of you should be so vitally interested as to plan some way to get directly in touch with your Senators and Representatives.

We have every reason to be encouraged for some of the most prominent men in Congress are interesting themselves in the Stevens Bill. In conversation with George M. Hitchcock, Senator from Nebraska, he stated to me that either the Stephens Bill or one embodying the same principle would undoubtedly become a law soon. In an interview with Senator Cummins, of Iowa, he said to me: "Mr. Mickel, I am much interested in the Stephens Bill, familiar with its provisions, will work for it and support it." The members of our committee report that almost in every instance they have been received with the utmost courtesy and it is up to this association to continue the effort as originally planned.

STEPHENS BILL COMMITTEE REPORT

Following Mr. Mickel, Secretary Rauth made the following report of the special Stephens bill committee:

"The following is the general report of the special Stephens bill committee appointed to work in the interests of the Stephens bill at a regular meeting of the legislative committee of the National Talking Machine Jobbers' Association, at Philadelphia, September 10, 1915. The members of this committee were as follows: J. Newcomb Blackman, Blackman Talking Machine Co., New York; J. F. Bowers, Lyon & Healy, Chicago; Louis Buehn, the Louis Buehn Co.; Lester Burchfield, Sanger Bros., Dallas, Tex.; B. R. Foster, I. Davega, Jr., Inc., New York; Harry G. Koerber, Koerber-Brenner Co., St. Louis; Andrew G. McCarthy, Sherman, Clay & Co., San Francisco; George A. Mairs, W. J. Dyer & Bro., St. Paul; Geo. E. Mickel, chairman, Nebraska Cycle Co., Omaha, Neb; French Nestor, W. F. Frederick Piano Co., Altoona, Pa.; E. F. O'Neill, Beckwith, O'Neill & Co., Minneapolis; W. H. Parmenter, the Whitney & Currier Co., Toledo, O.; E. C. Rauth, secretary, Koerber-Brenner Co., St. Louis; William H. Reynalds, Reynalds Music House, Mobile, Ala.; J. C. Roush, Standard Talking Machine Co., Pittsburgh, Pa.; C. J. Schmelzer, Schmelzer Arms Co., Kansas City, Mo.; A. M. Stewart, Stewart Talking Machine Co., Indianapolis, Ind.; W. G. Walz, W. G. Walz Co., El Paso, Tex.; J. P. Werlein, Philip Werlein, Ltd., New Orleans, La.; P. B. Whitsit, Perry B. Whitsit Co., Columbus, O.; L. C. Wiswell, Lyon & Healy, Chicago; Rudolph Wurlitzer, Rudolph Wurlitzer Co., Cincinnati, O.

"It is very difficult for me to give the members even an idea of the vast amount of work done by this committee, as the expense which would be entailed in giving out a lengthy report will not permit it. If I was to include in this report all of the correspondence and the complete report of each committeeman, it would require a volume as large as 'The Victor Book of the Opera.' The members must take into consideration that each Congressman was personally called up by some committeeman and thousands of letters were sent out to dealers all over the country. In addition to that, petitions favoring the Stephens bill were solicited by committeemen from constituents in the districts of the various Congressmen.

"If this association was compelled to pay for the time spent on this work by each committeeman we would have been financially unable to carry on the work, as our funds would have been exhausted months ago.

"I feel sure that the members of the association will fully realize the immense amount of preparatory work involved in properly approaching Congressional representatives; thousands of letters had to be written; advance work undertaken among the merchants in order to make an effective demonstration; numerous skeins unraveled in a quest for any information bearing upon the personal and official characteristics of the man seen which might prove helpful in seeking his support.

"In spite of the laudable work done by our interests and those of other lines of business, we found a singularly large degree of apathy among the merchants; many had no knowledge of the bill; a large number were apparently indifferent and some hostile.

"The underlying principles of the Stephens bill are sound and absolutely essential to the proper consummation of our interests. Much has been accomplished, but much more remains to be done. The impressions we make and the results secured are going to be as great as the interest and sympathy displayed by our members in this work. Before this measure can come up for discussion in the House, however, it must be reported by the Interstate and Foreign Commerce Committee. Therefore, write your Congressman to-day, asking him when the Stephens bill will be given a hearing by this committee."

Ex-Presidents of N. A. T. M. J.

Left to Right—James F. Bowers, Perry B. Whitsit, J. Newcomb Blackman, Joseph C. Roush, George E. Mickel, Andrew J. McCarthy, Edwin C. Rauth (New President)

Secretary Rauth reported also upon the hearing of the Stephens Standard Price Bill before the House Committee on Interstate and Foreign Commerce, in Washington, on May 31, at which were present George E. Mickel, J. Newcomb Blackman, A. A. Trostler, French Nestor and Mr. Rauth. Continuing, he said:

"The opening address was made by Paul Nystrom, formerly Professor of Economics of the University of Wisconsin. Professor Nystrom's testimony was very definite and to the point. The next witness was our own J. Newcomb Blackman, who presented many practical arguments. Messrs. Nystrom and Blackman consumed the greater part of the first day, the balance of the time being taken up by members of various retail organizations.

"On the morning of the second day, the first witness was Mrs. Christine Frederick, editor of economics of the Ladies' Home Journal and the New York Evening Sun. Mrs. Frederick consumed about two hours in presenting her argument to the committee, thoroughly explaining the advantages to be gained by the consumer. Her arguments were very clear and concise and made a marked impression upon the committee.

"The committee allowed an additional thirty minutes, and this time was taken up by Mrs. Heath, president of the Housewives' League, an organization of 80,000 members. It is to be regretted that Mrs. Heath could not have more time, as she too, spoke from the consumers' standpoint.

"The committee seemed only to be interested in how the Stephens bill would affect the buying public and, in a small measure, the retailer.

"Adjournment was taken until after the first of July, when the opposition will be given an opportunity to present their evidence; after that we will be permitted to show evidence in rebuttal.

Talking Machine Men Ready for a Dip

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 38)

"It seems very encouraging for our bill to be presented to Congress at this session, and I am sure that all those who attended the hearing feel very optimistic as to the result.

"It is now essential that all those interested in the Stephens-Ashurst bill keep right after their Senators and Congressmen, particularly since the election is drawing nigh."

In Memory of Col. Bill

James F. Bowers then presented a resolution of regret at the death of Col. Edward Lyman Bill, founder and editor of The Talking Machine World. The members of the association rose and stood in silence for a moment in memory of the departed editor.

Ladies Attend the Theatre

Owing to the rain on Monday afternoon, the auto trip planned for the ladies had to be abandoned, and they were taken to Keith Theatre where, to the number of fifty, they were the guests of the Victor Co., at an excellent vaudeville show. The trip to and from the theatre was made in rolling chairs, and the ladies made quite an imposing parade.

New Officers Elected Tuesday Afternoon

The final business session of the convention was held on Tuesday afternoon, the most important feature being the election of offices as follows:

President, Edwin C. Rauth, Koerber-Brenner Co., St. Louis.

Vice-President, Henry A. Winkelman, Oliver Ditson Co., Boston.

Secretary, L. C. Wiswell, Lyon & Healy, Chicago.

Treasurer, W. H. Reynalds, Mobile, Ala.

The Executive Committee will consist of the four new officers and the three junior past presidents, namely, A. G. McCarthy, George E. Mickel and J. C. Roush.

Chamber of Commerce Plan in Committee

During the session the plan advanced by Paul B. Klugh for the formation of a Music Industries' Chamber of Commerce, which was discussed at the Monday session, again was brought to the attention of the jobbers and the report of the committee which attended the meeting held in New York in February of all representatives of the allied music trades, to act in the matter, was received and accepted. The matter was finally left in the hands of the Executive Committee of the association with instructions to report at the next convention.

Grave Charge Against J. F. Bowers

One of the bright spots of the meeting came when President McCarthy notified James F. Bowers that he had grave charges to present against him. The charges proved to be a gift in the form of a handsome morocco bound set of the Encyclopedia Brittanica, in a mahogany stand and stamped with Mr. Bowers' name in gold. The gift was accompanied by the following testimonial handsomely engrossed:

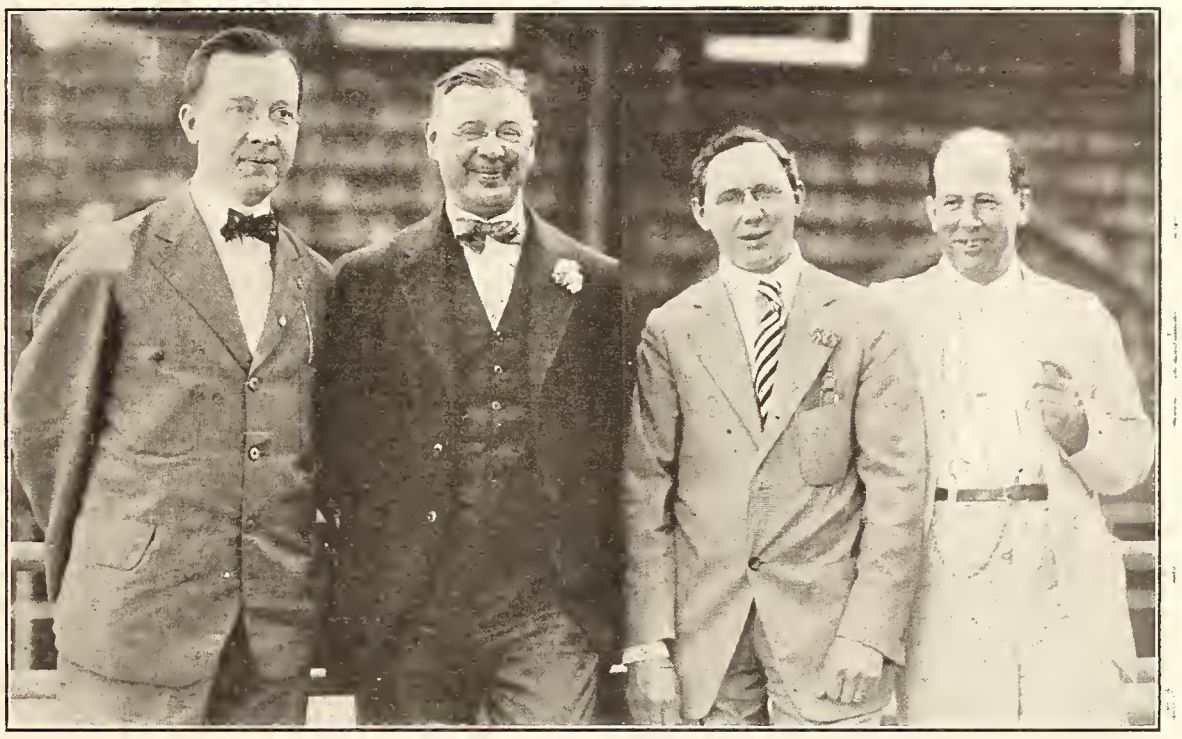
"Presented to James F. Bowers as a token of appreciation from the members of the association for the excellent services and earnest zeal devoted to this organization."

On the inside page of the testimonial, engrossed in the center of an Irish harp of gold, appeared the words:

"To all you have been a source of inspiration for your activities in the events that have marked our social and business period. Each yesterday with you was a happy day. May the rememberance of it always stay. (Signed) Perry B. Whitsit, Lester Burchfield and Arthur A. Trostler.

When it came time to select a meeting place for the 1917 convention, Max Landay came out strong for New York, but James F. Bowers said that there was no need for a vote because he had already decided upon Atlantic City. Atlantic City, therefore, it will be, the date and place being left to the Executive Committee.

A number of other matters of direct interest to the association members alone were also discussed at the session which brought to a close the official activities of the convention.



Newly Elected Officers of the Association

From Left to Right—E. C. Rauth, President; H. A. Winkelman, Vice-President; L. C. Wiswell, secretary; W. H. Reynalds, Treasurer

Important Papers Read At Wednesday's Session

The Victor Co., formally took charge of the destinies of the jobbers and the other conventioners on Wednesday and acted as host during the balance of the convention period at Atlantic City, Camden and Philadelphia. The first section of the Victor Co. program was the open meeting in the Belvidere room at the Traymore on Wednesday afternoon at which papers prepared by several of the department heads at the Victor factory were read and addresses made by those in charge of the great advertising and exploitation work being carried on by the Victor Co.

Advertising Manager H. C. Brown called the meeting to order and declared during the course of his opening remarks that the already great advertising appropriation of his company had been increased by between $650,000 and $700,000, a statement which was met with much enthusiasm. Mr. Brown thereupon introduced Louis F. Geissler, general manager of the Victor Co., who, on the subject of "1916 and What it Brings," had the following to say as the formal introduction to the list of addresses:

LOUIS F. GEISSLER'S ADDRESS

"1916 and What is Brings" has been suggested as the title for a talk by myself. I have prepared only a short essay on the subject and, in view of the number and excellence of the papers which are to be read this afternoon before you, it behooves me to make my remarks as brief as possible.

The uppermost thought in the mind of all merchants as applied to the query, "what does 1916 hold for you?" will be, how much money; how much more profit will I make as a Victor merchant in this year than last? The answer will be made by three kinds of merchants which I have in mind.

The first merchant is he whose profits will be increased just that proportion in which shipments from the Victor Co. exceed the shipments of 1915; I mean the merchant who will figuratively sit down—and there are a number of such among the dealers—who will practically be content with that solution and satisfied with that advancement. He is the least enterprising of our representatives.

The second merchant is he who adopts that policy in so far as Victrola shipments are concerned, who will dispose of all Victrolas that he will acquire from the factory, but whose grasp of the possibilities of increasing record business is better than merchant number one and who in consequence devises ways and means and concentrates upon the development of the record trade, thereby increasing his record output and consequent profits probably 20 per cent. over those of merchant number one.

The third Victor merchant is he who is both thoughtful and further seeing than either of the other two, and who will make 1916 serve 1917 in advance by his hard work and closer study of his business by better advertising, more liberal advertising. By practically following the Victor Co. tactics which are ever to keep the demand for Victrolas far in advance of the supply—he makes 1916 serve 1917. He will enter 1917 with a greater quantity of unfilled orders, consequently guaranteed business and a clientele which keeps him in the front rank with our leading distributers.

1916 has brought and will bring a rush of inexperienced men into our field of manufacturing; developments of interest if not of menace to your trade are growing. Already several would-be competitors have fallen by the wayside, and it is my opinion that the future will see many more expire and many others who will not meet with any marked degree of success.

I am very positive in the opinion that your trade during the fall and winter months will surpass that recorded in any past season. I am equally certain that notwithstanding our increase in output, the buying abilities and demands of our country will be no better met proportionately, than they have been in the past. While this is proving and will prove annoying, it is certainly a healthy annoyance.

There is no necessity for my quoting statistics. The prosperity and wealth of our country have been so thoroughly exploited by our journals that its wonderful financial condition from coast to coast is equally well known to you.

(*Continued on page* 40)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 39)

The question of peace or war and its consequent result upon our industries and the prosperity of these United States is one upon which the keenest judges differ very materially. To read the various impressions of various authorities, it would seem to be any man's guess.

While powerful influences will be at work for many months to come that will affect more or less the business of this country it is my conclusion that at least two or three years of great prosperity are ahead of us in these United States. I fail to see how the many billions of wealth that our country has accumulated during the last two years, the comparative conservatism during these times of undreamed-of prosperity, our comparative freedom from debt to the outside world, our promising crops, and our well developed mines, can help but exert an influence for prosperity that will extend at least through that period or until the great natural swing towards a more economical era again asserts itself.

1916 and subsequent years are very apt to re-

Louis F. Geissler

turn to you just exactly what will be your due according to the physical effort and the mental power and whatever degree of enterprise you place in and behind your business.

The Victor Talking Machine Co. throughout all its departments has certainly blazed a way for you and is no mean example of hard work, enterprise or expenditure. We hope to do our share and to keep up the pace.

During the past year and since our last pleasant meeting upon those beautiful Pacific shores, your prosperity and ours has been again well marked. No backward step has been taken. Your solidity and ours has been better welded by another year of pleasant experiences; the Victor family remains a powerful unit to resist the attempted encroachment of usurpers and imitators.

With your loyal and good business sense, we are willing to rest our future advancement. That the Victor Co. will underwrite all your efforts by doing their full share of the labor that makes for our continued and greater success is an assurance that I will give you with all the force that I possess.

Ernest John, of the advertising department, next read several papers on the production, facts and problems at the Victor factory and which were prepared by the heads of various departments, the first paper being that of Belfort G. Royal, general superintendent of the immense plant. The others follow in order:

B. G. Royal, General Superintendent

Mr. Chairman, Ladies and Gentlemen:—No reasonable man expects that a composer of music shall also be a successful carpenter. We don't expect a plumber to be a poet. I assure you that anyone who aspires to be general superintendent of the Victor Talking Machine Co., will have neither time, opportunity nor energy, to become a specialist at anything else.

In my official capacity, I do a good deal of talking. Good plain speech. It seems to be effective. It may, indeed, be eloquent, but I believe it is not the kind of eloquence which we associate with speech-making. That is why I prefer to have a paper—a very short paper—read to you, instead of attempting a speech.

I want to give you some insight into the difficulties we have had to meet and overcome, for that will be of greater service to you, and so—more interesting—than any form of oratory.

"Stupendous" is a word which is suffering slightly from over-work, and yet I feel that it is the one most satisfactory word to use in connection with the Victor. Within so short a time, we have grown so fast and the ratio of expansion has been so great, that, in my opinion, it is not at all remarkable that you gentlemen should have experienced a shortage of Victor product. I am surprised, and, I confess, very pleased, that the shortage has not been greater.

It is easy enough to suggest that we add more buildings, more machinery, and so on, but the fact is that an increase in output is not so readily achieved as all that. If that were so, there never would have been a shortage. We are always building. In fact, if we ever get through, I think we shall have to hire somebody to make a noise like a pile-driver, just so that we may all feel at home.

It has been the same thing every year for many years. New buildings have been put up one after another. New machinery has been installed almost before the concrete has dried and in every instance this has been done regardless of cost. We never hesitate to adopt a new process, just as soon as we are satisfied that it will mean an improvement in our product or maintain its standard of excellence with a saving in time, but—you see—when we build a new cabinet factory or install a new and more effective battery of record presses, there are other compensating changes which must be made.

It does no good to increase the cabinet output if we cannot proportionately increase the manufacture of motors and vice versa. We have to effect a more or less complete reorganization all along the line, from the boiler room to the delivery truck. More machinery means more pulley wheels to be turned, which means that we must begin at the beginning of things and generate more steam with which to keep them turning.

You must realize that this same thing is true, not merely as between one department and another, but in each department, itself. Mr. Kieffer has five thousand men in the cabinet factory. Five thousand men, and every one of them working hard all day long. Imagine the fearfully disastrous condition which would immediately result if the even balance of all the various operations were destroyed.

I believe it is a fact that years ago, before the city of New York had its present traffic system, Broadway was once blocked for a space of two whole days. A worse condition than that would prevail if we had not evolved a system, an organization, which passes vast quantities of raw material through our big plant without congestion.

In this respect the rapid growth of a concern presents possibilities of real danger. We have grown used to the idea of armies which consist, not of thousands of men as they once did, but of millions, and military men know that it is a vastly less difficult problem to manoeuver a hundred thousand men than to handle a million. They are apt to get in one another's way, and by sheer weight of numbers, produce a confusion, which may in time, become a rout.

It is comparatively easy to expand gradually, but, thanks to our combined efforts—I mean the efforts of you gentlemen assembled here, and the efforts of the Victor Talking Machine Co. itself—the growth of Victor business has not been gradual. It has been entirely healthful, but it has nevertheless been a progression by leaps and bounds.

I can quite see that it must be extremely annoying to be short of goods, in a market that grows more and more eager every day, every month, every year, and yet I have no doubt Mr. Geissler can convince you that you are to be congratulated rather than condoled.

I have so far made no reference to another factor which affects every commercial enterprise in the most direct, most vital way—and that, is labor. Last year, in spite of the fact that the most populous countries in the world were short of food, yet, nevertheless, it was impossible to get enough labor to properly harvest this country's crops. There is no longer such a thing as "common" labor. The unskilled laborer today is working in munition factories at wages which formerly could be commanded only by skilled men.

I should feel that I had wasted an opportunity, if I did not, at this time, call your attention to another, and most important consideration. The commerce of the world has been disorganized by the European war. Raw material of every description, has so advanced in price, as to approach the prohibitive—yet there has been no raising of the royalties on Victor product.

Actually, of course, war conditions represent only the climax, for the tendency in labor and material has been upward for a considerable time.

Since 1911, and prior to our recent voluntary increase in wages, this company has had to accept and absorb out of its profits, an advance in labor cost alone which is as follows:

Superintendent of Buildings....	18 per cent.
Cabinet Factory.....	20 per cent.
Shipping Department.....	26 per cent.
Printing Department	30 per cent.
Other Mfg. Departments.....	40 per cent.

It may, or may not, be correct to say that this company has had to accept and absorb this increase, but it is positively correct to say that that, at least, is what we have done.

We haven't complained—we haven't handed on this increased cost to you, to your dealers, or to the public, but it has been another and a considerable problem, which we have had to take into consideration along with the equally urgent problem of an increased output.

Figures mean little. Perhaps a comparison—which by the way has been used before—will be more serviceable.

The highest mountain in the world is Mt. Everett, which is five and a half miles high. If it were possible to place our year's output of Victrolas one on top of the other, they would reach a point which would be one hundred and fifty miles above the surface of the earth.

I can remember the time when the shipment of a carload of talking machines was an event. Today—as our Mr. Smith can tell you—our incoming and outgoing freight, for one year, if it could be made up in one train, would constitute an unbroken line of cars from Camden to a point three miles beyond New York.

I have said that before we can show an operative increase in output, we have to adjust many thousands of operations, great quantities of raw material and new principles of transportation to that increase. I want to remind you that that has been done many times, and is still being done.

There are lots of cases, where, lacking complete understanding, a man might not know whether he was being abused or complimented, and if I have been able to give you a little clearer conception of the nature and physical aspects of our gigantic problem, I shall feel that my paper has been well worth the reading.

H. H. Murray, Chief Engineer

I have been asked to tell you something of the work of my department which, for lack of a better name, is called the Engineering Department. This name is rather broad, however, as we cover only the engineering problems involved in the development of the motor, the taper arm, the sound box and their accessories, and the special tools, machinery and processes used in their manufacture in the machine factory. There is, of course, a great deal of engineering in a manufacturing business like ours. The entire plant with its buildings for offices, factories, warehouses and packing and shipping is an impressive example of what can be done toward making a thoroughly workable and efficient plant in the heart of a crowded city, and is a credit to the engineering ability of the men who have built it up The power plant and the equipment for distributing heat, light, water and power has also required much thought and study along engineering lines. The heads of our various manufacturing and research departments are, though they would probably deny it, engineers of no mean skill, for it requires engineering ability, as well as executive ability, to plan and arrange the equipment of machinery, etc., required to rapidly produce work which shall stand the test of Victor quality and keep within the costs necessary to yield a satisfactory margin of profit. The term engineer as generally applied means either an engine driver or a theorist who spoils a lot of good material with something he has read in a book. The real engineer is a man who follows mechanical principles in his work, and it makes no difference whether he learned these principles from hard experience or got them from a book so long as he uses horse sense in applying them. But to come back to our subject, which is my own small job, and to tell you something of what we do and how we do it. It is not likely that any of you have ever honored us with a visit, as we are one of the secret departments whose work is done behind closed doors where visitors never enter. I cannot, therefore, tell you of the wonderful new things which are coming, partly because I have my instructions and partly because we don't produce that sort of thing. Our work is a series of steps, an addition here or a change there, which will make the machine more attractive or more convenient to operate, and it is only occasionally that some novelty like the Electric Victrola or the Tungs-tone stylus is brought out.

The beginning of a job with us usually happens when Mr. Royal brings us an idea with instructions to work out its possibilities, a requirement for some attachment or new model with instructions to develop something which will do the work, or with some suggestion of our own for improvement on the product or its manufacture. We usually first work out our ideas on the drawing board until we are satisfied of their practicability, after which we make working models to prove our theories. For this work we have a force of about seventy-five men composed of designers, draftsmen, pattern makers, expert mechanics and experimenters, the latter working in individual laboratories equipped with everything possible to assist them. In fact the whole department is equipped with the very best and most accurate machinery and apparatus that can be obtained, in the purchase of which we never consider the cost, but only its suitability for the work. This equipment consists of electrical and physical apparatus from the most delicate measuring instruments to presses which will exert hundreds of tons pressure.

The designing of a new model or device on the board frequently takes months of thought and study only to find that we are on the wrong path and that we must begin it all over again. Our designers do not limit their working time to the six or eight hours a day of the ordinary man, for the investigator's mind is never really off the particular problem which is before him. It is always with him and many an hour is spent with paper and pencil at his home. Science yields her treasures very grudgingly and it is only by the most persistent and painstaking effort that she can be persuaded to tell us anything.

The model also often requires long study and much changing, for a design on paper is not always successful in metal, and the model, like the drawing, is often discarded after months of trying work, and a new start is made. Even when a successful model is finally constructed, our work is not done for it must then be studied for simplification and improvement and its manufacturing possibilities considered. When we are satisfied that we have a practical device we submit it to our Executive Committee for their examination and criticism. If its adoption is ordered we proceed to prepare for its manufacture. This means that working drawings, complete to the minutest detail, must be made of every piece or combination of pieces. These drawings must carry all the information required for purchasing the material, making the parts, and collecting the costs and this information must be stated with all the exactness of a legal document, yet briefly and so clearly that it cannot be misconstrued. Hundreds and thousands of prints are made every year from these drawings as every department whose work in any way concerns the parts must have copies for reference. A very simple yet comprehensive system has been devised for filing and recording tbe drawings and prints and keeping every copy up to date so that all departments may have exactly the same information. One of the most important points on the drawings is the specifications of the materials to be used. The right material must be selected, the first consideration in which is, of course, the work which the piece has to do. But there is frequently a wide range to select from, as for instance steel, which is the name of an almost endless number of combinations of iron and carbon and sometimes other elements. This requires a broad knowledge of the metallurgical and physical properties of the different materials in order to select the one best suited for the purpose and best adapted for the various manufacturing processes. This frequently means many physical tests and even chemical analyses, before the really best material for the particular purpose is finally found. Having once decided on the right material, rigid specifications are drawn for it and the mills are held strictly to these specifications by an elaborate system of testing and inspection, one instance of which, as you have probably observed in the factory, is the series of tests to which we put our main spring material.

Having completed the drawings of the device our next step is to design for the factory the jigs, tools and special machines which are needed to produce the parts rapidly and economically, and so accurately that they will be interchangeable. The planning of a set of tools must also have full consideration. The ideal equipment, of course, is the one which will produce maximum quality at minimum cost. Generally speaking to combine these two points means the use of fully automatic machinery so that labor costs can be most nearly eliminated. But this kind of machinery costs large sums of money, which must be considered in the cost of the parts which it makes as this is the only way in which this money can be returned. For this reason we must, in planning our new equipment, take into account the probable quantity to be made, and let me tell you that this question is of great importance in the engineering of manufacturing. It concerns you as distributers fully as much as it does us as makers. The policy of standard prices for standard goods we all know to be the life blood of every kind of manufacturing and selling. But the engineer must remember, that while you cannot afford to lower the price of a given type of machine, you cannot even consider raising it, and that if he is to add improvements he must decrease costs at some point and if he changes quality it must be for the better. Increased production enabling us to use more fully automatic machinery is the easiest line of action. Look for instance, at the completeness of the Victrola XI of today as compared with the Victrola XI which we first put out some years ago. This has been made possible by two things, one of which is the great increase in the volume of business enabling us to work out the other which is the development of elaborate machines and tools for lowering the costs of production. These machines improve the product in quality, too, as they eliminate, to

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 40)

a great extent, the element of uncertain hand labor. You can and probably have seen this change in your trips through the factories during the past years. In the drilling department for instance, you formerly saw a man pull a lever for each hole drilled in a casting, while now you will find that he pulls a lever once for a dozen or more holes In the punching department you formerly saw the man pick up a short strip of material and feed it step by step under a punch at the same time pressing a pedal with his foot for each piece made. Now you see this man take a coil of two or three hundred feet of the same material, put one end of it in the press, start the machine, and then go away and let it run itself, knowing that it will do the work far faster and with less chance for mistake than if he tried to operate it in the old way. In some cases such as screw machines we are able to buy standard automatic machinery which with. slight changes will do the work required. But generally we must design what we need, and in many cases this has resulted in some strikingly novel machines, such as those used for bending tone tubes, making Tungs-tone styli, doing special drilling operations, numbering sound boxes, and many others.

An example of one of our larger problems of design, experiment and testing is the Electric Victrola. The development of this machine was exceedingly long and difficult, and involved a tremendous amount of research and experiment in both its electrical and mechanical features, although the former were the cause of our greatest difficulties. At the time we started to work out this problem the universal electrical motor was known, of course, as it was in use on the dictating machines, though the motor which was satisfactory for the dictating machine would not do for a talking machine, and the majority of the electric motor manufacturers did not believe it could be made to work satisfactorily. But we cannot let a little thing like that discourage us. If a manufacturer tells us that the material we want cannot be made, we go to work to show him how, and in a great many cases we have succeeded in enabling him to add something to his regular line of product, as well as in getting what we want. Frequently, too, we have been able to show manufacturers how to make additions and modifications on their machines which will be really valuable in other lines of work. It is this boldness and daring which is the secret of good special machinery design and we are frequently consulted by these same makers on other problems after they have once done work for us. There was much of this sort of thing in developing the electric motor, and it does not seem too much to say that something of the success of the small universal electric motor as used today on vacuum cleaners and other household devices is the result of the efforts made by a number of the electrical manufacturers to develop a motor which would satisfy our requirements.

But we have many problems which we must work out entirely within the organization. One of these, of which you have heard much and seen but little, is the Tungs-tone stylus. Years of study were spent in the search for a material which should meet the need for a needle which would last indefinitely and not wear out the record. Finally it was discovered that tungsten possessed the necessary properties Then came the problem of finding a construction for a needle made of this material which would allow us to make it commercially, and in enormous quantities, and in devising machinery to do this automatically. Both of these were real problems. The first took months of study before the present simple construction was found and adopted, and then came the machinery which we believe is absolutely unique, and is certainly as clever for its purpose as is often seen. It is hard to realize the minuteness of the point of the stylus, and when it is considered that this small bit of wire, which is measured in thousandths of an inch, must be taken up by the machine, inserted in position in the steel body or holder and fastened firmly in place, and that this must be done with absolute accuracy or the work will be spoiled and the machine blocked, the difficulty of our task can be understood. But we have worked this out successfully, and we are now giving our most earnest attention to getting enough of these machines to make some showing toward satisfying the tremendous demands with which you have so flatteringly received our latest innovation. The present congested condition of the machinery factories and the shortage of skilled mechanics has made this very difficult, and you will realize the sincerity of our efforts when I tell you that we are using even the men of our experimental shop on this work although to do this has caused us to neglect some very promising new work.

Another line of work in our department, which is of great importance and also of great difficulty, is the effort to make the product so simple in design that it cannot be tampered with or made to work wrong It is, of course, a satisfaction to design a device and find that the model will do what is required. But we cannot stop here. We must next study it very closely to find out in how many ways the curiously inclined user can put the thing out of business and we must work to eliminate as many of these ways as possible. It is remarkable, also, what an incompetent repairman can and will do to put a talking machine out of order. We know that what the customer requires is a machine that will run evenly and quietly and stay that way, just as the watch maker knows that his trade requires an accurate timepiece, and as the sewing machine maker knows that his trade requires a machine to make a smooth even stitch. But the latter do not have to contend with the curious and incompetent repairmen or customer for no one but a skilled expert dares to attempt the adjustment of either of these devices. The user does not tamper with his watch or his sewing machine or his piano. He takes it to the best house that he can find where he feels confident that a good man, and not the janitor of the building, will do the work.

I have gone into some detail in this paper regarding what we do in our department, my thought being to give you some idea of the study and care which is given the premilinary stages in the making of the world's best talking machine, the standard by which all other musical instruments, as well as all other talking machines, are judged.

I. F. Burton, Superintendent Manufacturing Department

Mr. Chairman, Ladies and Gentlemen:—I suppose every one of you has, at some time in the past, visited the Victor Co.'s Manufacturing Department, which is the name given to the factory where the Victor motors for all types of machines, either Victor, Victrola or Victrola Electric, as well as the accompanying metal parts, including taper arms, sound boxes and hardware used on cabinets, are made and assembled into groups and then erected into the cabinet, after which they are thoroughly tested out for accuracy in governing and playing qualities before they are sent to the shipping department.

If you have already seen the department, it might be assumed you are well acquainted with the various operations performed in it. No doubt you are—in a way—but you will have an opportunity to visit it again tomorrow, and I feel sure you will find many new points of interest.

Think what the history of the Victor Co. has been. Every year you gentlemen have done a big business in Victor product, but the next year has been bigger yet. We have no chance to stand still and I know, for a fact, that even our own people can never safely say they are thoroughly acquainted with all the operations and the methods of producing the work.

These operations and methods are being changed from day to day, due to improvements, both by the installation of up-to-date machinery and the changing of devices for getting out the work more accurately and rapidly.

You may, today, know all about some portion of some floor or some one operation which you have seen done, but six months from today, you will find things greatly changed, as the result of improvements. Generally speaking, these changes are due to the installation of new machinery and methods and always with the one object in view—betterment of the output.

Take the case of the driving and winding gears, which in years past were made by hand indexing with fixed cutters. Then improved methods were introduced so they were semi-automatically produced more rapidly and accurately, but today all gears are cut on rotating hobs in automatic hobbing machines, which gives us absolutely perfect indexing, so that the diameters and spacings of the teeth are perfect.

Another example of improvement is found in the governor. Years ago we made the governor balls of lead in moulds, by which method the weight of the balls would vary as much as twelve grains so they had to be selected

L. C. Wiswell, A. A. Trostler, H. J. Shartle, of Arrangement Committee

and paired up in sets, whereas, at present we make them on the automatic screw machines, so we can guarantee they will not vary more than one-half a grain, so that the governors are in perfect balance. Also the method of fastening the springs has been greatly improved.

Also the turntable spindle and governor spindle driving gear teeth, as well as the turntable spindle and governor spindle threads, have been improved upon in shape as well as the number of teeth increased, so they have a much better and more accurate mesh as well as working faces, producing quietness, so that, today, we rarely, if ever, hear of noisy governors unless they have been damaged in transit.

The turntables have also been greatly improved upon by means of the use of steel instead of cast iron, whereby they are made accurate and thoroughly balanced. Ribs and spokes have been pressed in to stiffen them and the steel hubs attached to them are spun in as well as fastened by means of four rivets which are staked securely in place, after which the center hole is bored perfectly concentric with the periphery and face, so the turntable runs true and in even balance.

All parts are made within the limits of one-thousandth

Lester Burchfield and Geo. Stewart, of the Arrangement Committee

part of an inch and many as close as a quarter of a thousandth.

Do you realize what it means to comply with this standard? No matter how eager the market may be or how urgently you may be demanding more goods from the factory, we positively do not deviate from the high standard of accuracy. If we did, it would impair the prestige which has taken the company years of patient industry to establish. No matter how perfect the record or sound box may be, if the motor does not make the turntable revolve at an even rate of speed, harmony becomes discord.

After the governor sleeve and friction disc have been assembled and the hole bored perfectly true, it is then placed on a fly arbor which runs dead true and both sides and periphery of the friction disc are faced off perfectly accurate, so it runs perfectly true on the side where the friction leather comes in contact with it to control the even governing of the motor.

An example of how rigidly our standards are maintained is demonstrated by our careful testing and retesting and inspection throughout the factory, both in manufacturing and assembling as well as in erecting machines, and I assure you nothing leaves the manufacturing department but what is correct.

In the buffing and polishing department, sixth floor, we have installed a quantity of up-to-date machinery, much of it automatic, whereby we do much larger quantities than formerly and with considerably less handling, which again makes for efficiency.

Every one who has visited the manufacturing department seems to remember the multiple drill presses in the drill press department on the third floor. These are machines especially designed for drilling holes of different or the same size at the same time. The largest of these presses can drill as many as twenty holes at one time, either in steel, iron or brass, and our latest equipment are combination drilling and tapping machines, so we can do either drilling or tapping with the same spindle or any number of spindles by a slight change, or we can do part drilling and part tapping on the same press, and they are all equipped with automatic feeds, trips and quick returns.

We also have, among our latest improved machinery in this department, a group of machines on one bed which automatically bore, face, drill and tap parts without changing them in the jigs or fixtures, merely by the rotating of the table on which they are placed. This gives more accurate and interchangeable work, and the same is true of the work on the top plates They are placed in accurate jigs in which all of the holes may be drilled, reamed or tapped, and, as all work is done at one setting, they come out interchangeable and are true to the thousandth part of an inch, with the result that, when we come to the point of assembling, the parts all interchange and fit properly, as they cannot do anything else, so, if we have spent hundreds of thousands of dollars and months of time in adding new machinery, jigs and fixtures, it has been with the net result that we have obtained an increased output and absolute accuracy and interchangeability.

In the automatic screw machine department, on the second floor, we have installed a number of four spindle automatic screw machines on which four pieces are finished at one rotation of the machine, whereas, on the single spindle machines, we were only able to produce one. We have also installed automatic attachments on many of the machines whereby the parts are drilled, milled and knurled before the piece is cut off, thereby saving re-handling on separate machines. We have also installed a large number of automatic screw machines for making the new Tungs-tone stylus.

In the punch press department, first floor, we have put in a number of up-to-date automatic punch presses and bending and forming machines, among which are a thousand ton press for forming up turntables, wire bending machine for forming regulating shafts, spring barrel cap retainers and similar wire and rod parts, and a compound automatic press for blanking, forming, transferring, piercing and bending all parts from sheet metal.

We are also installing automatic roll feed attachments for feeding the work through the presses from stock in large coils and chop shears on the press to chop up the scrap stock as it leaves the press We have also installed in this department an electric hoist on overhead tracks whereby we convey the work quickly from one part of the floor to another. This track also extends out over the metal platform on the outside of the building, on which and under which we store our metal trucks filled with scrap material. We have also installed a large twenty ton scale on which the wagons can be backed and loaded with this scrap material, making a great saving in handling same. We can store a car load of this scrap material, or more, in these trucks before we need to dispose of it.

All of these improvements have been added at tremendous expense to the company for the betterment of the output and many improved features have been added, also, to the machines, all of which has been without any additional expense to you or the users of the machines.

When you go through the factory, everything seems to be working along so nicely, it seems to be almost automatic. But you must remember that this automatic smoothness is a thing that is only developed gradually. Before we can put a new operation into effect or perform some operation in a new way, we frequently have to design the entire machine and, almost invariably, manufacture a new set of tools, jigs and fixtures to accomplish the same.

Have you any idea how big this item of tool manufacturing is? Our tool cost for maintaining this standard in the past year alone has been about $100,000.00 and on all floors of this six-story building in which the manufacturing department is located, there is a vault containing these jigs, tools and fixtures, both of the present as well as of the past product, in which collection there are, approximately, 20,000 separate pieces. Every bit of this special machinery, these jigs, tools and fixtures which we have adopted and are using at the present time, have been duplicated eight or ten times by earlier models.

All of these special machine tools mentioned, as well as punches and dies, jigs and fixtures, have been specially designed and specially built at tremendous expense, especially for The Victor Talking Machine Co., that we may be able to get out absolutely interchangeable parts with the greatest possible degree of perfection.

Except for accidents in transportation, or some other cause beyond our control, the machines, motors, etc., manufactured in this department are as near perfect as human ingenuity is able to make them. This is not merely a claim; it is a known fact.

E. K. Smith, Superintendent Shipping Department

Ladies and Gentlemen:—All the finished product of the Victor Co. passes through the shipping department, where it is applied to orders, packed and shipped. As the packing and shipping of a product are equally as important as the designing and manufacture, I want to show you the careful consideration which we give to it.

The shipping department building includes five and one-half acres of floor space, and is so arranged that all incoming goods, outside of machines and records, are received at the Northeast corner, whether they come in, in carloads, teams or automobile trucks. The goods are distributed to the various floors from this point by platform and endless chain elevators, where they are placed in stock.

Machines are received from the manufacturing department over a bridge connecting the two buildings on the fourth floor. Records are received on the second floor by means of a gravity conveyor which brings them from the fourth floor of the pressing plant through the manufacturing building, to us. All goods sent to the shipping room are completely packed, and are delivered from the center of the building by platform and endless chain type elevators, where they receive the final check and are shipped.

Many manufacturers spend vast sums of money to design and manufacture their goods, but do not give the packing and shipping equal consideration. The result is that their products reach destination in a more or less broken or damaged condition. This means dissatisfied customers, claims and additional expense to both the manufacturer and his customers. The Victor Co. leads not only in manufacturing, but also in methods of packing. This company was the first to discover ways and means of shipping highly finished cabinets, which would guarantee safe arrival at destination without damage to the finish.

When speaking of packing, the average person thinks of excelsior or bay and a wooden box; but we pack differently for any of our large cabinet machines could be unpacked in your parlor without making any dirt.

Let me tell you about some of the special machines we use to build the various forms of packing frames. We have, for instance, a single spindle boring machine with automatic feed, equipped with a special screw driver attachment, designed and made in the shipping department for assembling the screws in the skid crossbars. One operator will drive about 7,500 screws per day with this machine. It is also used for drilling the bolt holes in the

(*Continued on page 42*)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 41)

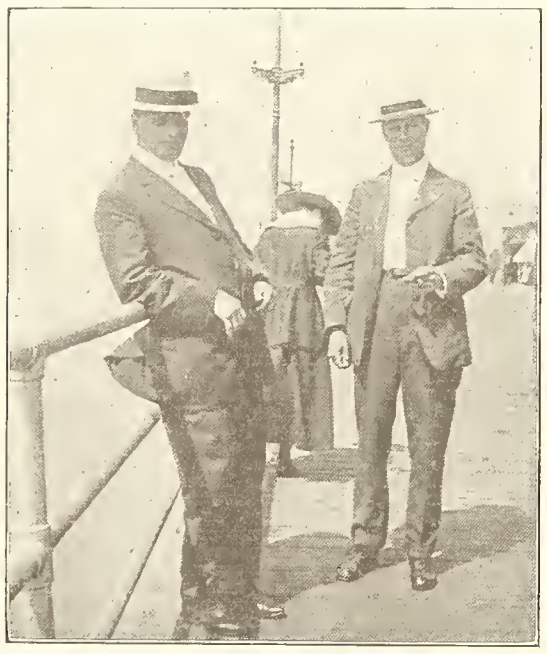
skid crossbars. One operator drills about 9,000 holes per day.

Another machine which is used principally for lid clamps is a special type, fitted with spindles which can be set at any degree for boring angular holes. One operator will bore about 6,000 holes per day.

Then too, we have specially constructed power belt conveyors, made in the shipping department, on which corks are inserted in guard rails, gauged, coated with paraffine wax and assembled with screws while the conveyor is in motion, at the rate of twenty-four guard rails per minute.

Instead of hammer and nails, we have nailing machines which are used for framing boxes, i e., fastening the sides to ends, after which operation, the box moves on to the next machine, which nails on the back These two machines are equipped with the latest improved power feed tables, and special cleat shelves to hold the veneer panels rigid while being assembled. These machines, with four operators, average a little better than three boxes per minute.

Another special attachment which was designed and made in the shipping department, is a Yankee screw driver, equipped with special attachment for driving screws, and permitting the operator, after screws are started, to place the sleeve over the head. The blade automatically finds the slot, drives the screw home, and then throws off. We have also portable electric hand drills, which are used principally in drilling holes in the packing case to fasten the skid to the case. We also use special portable electric screw drivers, which have the same attachment as the Yankee screw driver. This is used for driving screws into skids, attaching them to the packing case. A very interesting machine which we use is what is known as a Jumbo Mullen Tester, and is used for testing the strength of all paper, corrugated and fiber board used by the shipping



The "One Price" Brothers, Homer G. and M. G. Price

department. This machine insures us that these materials are of the proper strength, and that we are getting what we pay for.

As you know, in the packing of our small machines, they are imbedded in excelsior. We found, however, great difficulty in getting packers to properly pull this excelsior apart, and so we installed what is known as an excelsior picking machine. The excelsior is placed on a belt conveyor by an operator, and is run through this machine at the rate of one hundred pounds per minute, and is pulled apart much better and finer than could be done by hand. We use approximately one-half a car of excelsior per day.

As you know, all manufacturers bave drawings covering the different parts they manufacture, but I know of none that have drawings covering the packing material they use. But with us, all packing material is covered by blue prints. Each piece of packing material is gauged and carefully inspected for defects to insure quick and accurate packing. We use from four to eight carloads of packing material daily. We carry in stock at all times from 75 to 125 carloads of packing material, the bulk of it heing in outside warehouses.

I think by this time I have convinced you that great care is exercised in the shipping department in preparing the packing material.

The packing of our machines is carried on very similarly to the manufacture of them, each man performing his little bit as the machine passes him. The first operation is attaching back stay to cabinet. The cabinet factory has attached angle irons in the back of this cabinet wbere machine bolts are to go, which means absolutely accurate boring is necessary on the back stay. The next operation is attaching guard rails to the hack stay. The ends of the guard rails overlap each other in such a manner that when placed around the cabinet they have great strength and permit the packing case to be severely crushed without marring the cabinet, because the latter is held at a uniform distance from the guard rails by paraffine wax coated corks End-wood is depended upon to take the strain instead of the screws.

Considerable time and money was expended before we found that natural cork, properly coated with paraffine wax, could be placed against the finish of cabinets without harmful results.

The next operation is fastening the skid to bottom of the cabinet, and fastening guard rails to them by means of upright strips. The cabinet then moves on, where the lid clamp is fitted to the lid and fastened to guard rails. Then it moves on to where the albums, outfit and turntables are packed, after which operation the cabinet is ready to be placed in the packing case.

I wish to call your attention to the fact that while we utilize the inside of the cabinet for packing purposes, we do so without harmful results to the inside finish. The Victor Co. spends yearly, many thousand dollars in the packing of their goods, which could be saved if they did not consider the unpacking conditions. As an example, screws are used in the packing of all our large type machines, when nails would answer the purpose from a packing point of view, equally well. Here is a case where both material and labor are an extra expense to us, but we aim to have our machines reach destination in first-class shape; and we make the packing as simple as possible for the one who must unpack.

After the cabinet is placed in the packing case, it is placed on the conveyor system, which elevates it four feet, six inches from the floor. The case then moves by gravity around to the point where holes are drilled through the packing case into the skid—this work being done by portable electric drills. As the machine passes this operator, another operator starts the screws in holes just bored, and machine continues to the next operator, where the screws are driven by a portable electric screw driver. After the machine leaves this operator, it goes into the other end of the huilding, and is there laid on its back.

At this point the lid is fastened on This work is done by two operations, one being the starting of the screws with a hammer and the other driving them home with the Yankee screw driver. After reaching the end of this conveyor, they are then placed in an upright position and moved along on the conveyor system to another elevator, which again raises them to a height of approximately four feet six inches, where they again start traveling by gravity.

The packed machine is then weighed on an automatic scale. This scale is more accurate than an ordinary beam scale, being much more sensitive, and is tested several times per day with government test weights.

About four years ago we adopted three-ply crossgrain veneer to take the place of solid wood for many of our boxes In other cases we adopted corrugated and fiber board boxes. In this way we have cut down weight wherever it could possibly be done and be consistent with safety.

You will doubtless recall that Mr. Geissler advised you two years ago that improved methods of packing had reduced the shipping weight of our product to such an extent that for the year of 1913 it saved in excess of 350 carloads of freight. It might interest you to know that the changes in vogue then and additional changes represent a saving to you in freight charges on more than 450 carloads for the year of 1915. This represents a saving to you in dollars and cents of more than $50,000. This year's saving will be on more than 650 carloads, and in dollars and cents, means more than $80,000 saved to our distributers. This saving in transportation charges not only affects you, but is again enjoyed by the dealer.

When we come to the point of shipping our product, we load practically all of the cars. We do this for two reasons; first, to insure proper loading; second, to get the greatest possible weight into a car. As you know, all machines are shipped on schedules issued by our order department, and these schedules are followed out to the letter by the shipping department. We endeavor at all times, to load cars that will give you the best and quickest movement. We often ship machines in the afternoon that are received in the morning. This applies to machines which come through in quantities sufficient to cover allotment scheduled for all distributers in one city or territory. At all times the matter of transportation charges is considered, and when shipment can be billed as a carload showing a saving to you, it is so billed.

Shipments going forward via boat line are necessarily hauled to Philadelphia, and such shipments we endeavor to deliver in ample time to make the next sailing.

Freight conditions, however, are in a very congested state; every transportation company apparently having more business than it can handle and give good service. Some of the boat lines go so far as to stamp bills of lading, "subject to delay." Whenever possible, in making shipments, I can assure you that your interests are carefully watched, both regarding service and transportation charges. All shipments which go forward via express, are watched with the same care as far as service and transportation charges are concerned. In many instances goods receive special packing, reducing the weight and likewise the express charges. In many instances, express shipments leave our building direct for the trains, special arrangements having been made with the express agents, in order to insure quick delivcries. During the holiday season, all express shipments are hauled direct from the shipping room by the express companies, direct to the trains. Express wagons call for shipments four or five times a day regularly, and whenever necessary, special wagons are sent upon request.

Parcel post shipments, when compared with the other business, are very small of course, but we still maintain good service in this branch, merchandise being delivered to the post office four times per day, and oftener if necessary.

Cars are moved directly from our shipping department, where they are under cover at all times, and even under lock and key, until our own electric locomotive switches them onto the Pennsylvania Railroad tracks.

Gentlemen, the proof of the pudding is in the eating. After taking a high railroad official through the shipping department, he informed me that he knew of no article shipped where the care and protection were used to guard against damage while in transit, that Victor goods were receiving. He was up-to-date too, for after glancing at the veneer boxes he said, "You have the maximum strength, but the minimum weight." We feel that we are packing our goods well, but wish your co-operation to better conditions in the packing, in the same manner as in other branches of the business; therefore, should you receive any of our goods in an unsatisfactory condition, when advising us of this condition, won't you go into detail as far as possible, and any suggestion that you can make, I assure you shall be given careful consideration. While complaints are not pleasant to receive, I can honestly say they have been a great benefit in strengthening weak points in the shipping end of our business. I figure that men who make no mistakes do nothing, and try to impress upon my employes the fact that every mistake made, should be a lesson and improvement made from same.

E. T. Kieffer, Superintendent Cabinet Factory

Ladies and Gentlemen:—The birth of the Victrola inaugurated a demand for all that was best in materials and a construction heretofore never deemed necessary in producing woodwork. Shortly after its incipience it was decided to cut away from the hide bound processes of the woodworking field and introduce what was at that time thought, and since proven, to be, better methods and worth in the selection of the materials that go to make the Victrola what it is today, standing in comparison to other woodwork, in about the same relation as a plated watch does to a solid gold one.

African mahogany, which enters into its construction almost exclusively, at that time was not a wood universally used by the cabinet makers of the world; no one had ever attempted to analyze its richness of figure and lustrous beauty in comparison with its domestic brother, the Mexican, so when the Victor entered the field of purchasers it did so much the same way as our forefathers hewed their way into new fields, flatly refusing to follow a beaten path in their search for the best that could be had, and decided at that time to use this class of mahogany exclusively. How wise their course was, has been shown by the fact that at this day African mahogany has become the one wood used exclusively throughout the woodworking trades and had it not been for the foresight of the Victor Co. in anticipating and preparing against a shortage, we would today be like the other factories throughout the country, facing a famine and compelled to use substitutes, but fortunately, the markets of the world were gone through in time and we have plenty for our needs, while others are, as before mentioned, using substitutes.

When the Victor Co. first began to use this wood, it did so much as others would do; simply went into the markets and bought it and all the comments it made was that Victor wanted African wood. How different, however, today we now hear the word "Victrola" all over the world used to designate the kind of wood wanted and we find its name coupled with this wonderful product of nature; we hear today of men sent specially into the forests of Africa to find trees that will make Victrola wood, trees that will be six feet in diameter, in order to produce wood twenty-four inches on the quarter; we hear of the markets of the world being combed for Victrola wood and instead of a man's waxing enthusiastic over a big log and saying what a magnificent piece of wood, he says there's a Victrola log; we hear of ships being chartered to bring Victrola wood here, of fabulous prices being paid insurance companies for its protection while en route to our shores during war time. Every effort of brain and brawn heing used to enable us to give you a Victrola that is a fitting child to its magnificent parent.

The true African mahogany or Kahaya Senegalensis, as it is called, unlike its domestic relation, grows to enormous dimensions, standing alone, a veritable monarch of the forest; overtopping and of greater girth than its companions, it presents to the searcher the fulfillment of all his efforts, in locating this king of the forest and fully repays for the trouble of hewing and transporting to the coast, all of which has to be done through almost impassable forests, reeking with fever, reptiles and dangers that would try the courage of the bravest constitutions, and which has claimed its toll of human lives, in order to bring this wonderful product of nature to beautify our homes.

Another wood that enters into the construction of the "Victrola" is walnut. A great many people have the idea that the selection of this wood is left to the general customary merchant-scheme. In other words, the purchaser goes out and selects what he can get. This, however, I can assure you, in the grade of wood demanded in the manufacture of our machines, is impossible. The class of wood we require can only be obtained by diligent search and great expense.

As an illustration of the above statement, I would call your attention to the accompanying photograph, which I regret not having brought before you in a large picture, but owing to the need of this material, the tree was cut up before we ever decided to bring the matter to your attention.

This tree, to which I refer, is one cut of about a thousand that were looked over and rejected because they did not measure up in beauty and figure to that which is required for our machines. Like the proverbial story of finding a pearl among swine, this tree stood out in its

Left to Right—L. L. Roush, P. B. Whitsit, R. H. Morris, N. Goldfinger, L. J. Gerson Watching the Bathers

beauty above everything else, representing one of the largest and finest specimens ever taken out of the State of Maryland, measuring five feet six inches in diameter, and producing more than seven thousand feet of perfectly sound and figured wood.

Standing on the North Point Shore of the Patapsco River, about eighteen miles east of Baltimore, it was a monument to the most beautiful and historic spot in the State of Maryland, being the scene of the Battle of North Point An old colonial mansion stands there at this date, one hundred and thirty years old, which was the headquarters of General Ross while the British were landing for the invasion of Baltimore. In the ensuing battle, General Ross was killed.

Walnut trees of this size have become a rarity, and the Victor Co., following its usual custom, on noting the perfections of this piece of timber, its size, soundness, color and figure, decided that it was to be Victrola wood. The veneers into which that tree was manufactured have justified this judgment in every respect, and will soon be submitted to you clothing a Victrola. I only point out to you this fact in order to make you appreciate what it means to select and procure our class of wood.

In a like sense the construction has also called for all that was new and best in the minds of efficient and capable constructors, designed as a musical instrument, it has achieved a distinction with the priceless violin, the piano, harp, etc, to give us the renditions of the master, both of the past and present.

Its peculiar dimensions lending itself to the caprices of shipping companies throughout the country demand a construction that will resist wear and abuse, to an almost unheard-of extent, to insure which, workmanship of the highest character has to be devised and followed in the minutest detail.

If I were to take you step by step throughout the factory and stop at each operation, I would only be successful in establishing one fact in your mind that would stand out indelibly, like a beacon light to a shipwrecked mariner, and that would be the merits of hundreds of inspections that take place before the Victrola finally takes its last plunge across the bridge into the machine department After the last cabinet factory inspectors agree to let it through it bids adieu to its home, there to be pounced on and turned over and divested of all its glamor hy some of the most cold-blooded, unemotional inspectors that can be found, who absolutely refuse to let anything pass that does not meet with the Victor standard.

This brings me to the point that affects you more than any of us and that is the care of the cabinet after it leaves our hands

Having shown you to what extent we go to produce a worthy instrument it is certainly not too much to ask you to continue on with the same desire to place it in the homes with the same adherence to details as called for in its manufacture

Many a little scratch and bruise which mars its beauty can be readily obliterated if the proper method he employed; to this end I would ask you to study and develop a knowledge of this part of your work

Efficient and capable instructors are always at your command in the factory, and an hour of your time spent among them will be of the greatest assistance and help to you in handling the cabinets as they pass through your hands.

A great part of the causes for complaints from our distributers is traceable to careless handling and the climatic changes to which the product is subjected.

After the case is unpacked, sometimes hruises and scratches are found, and the finish rubbed off or paper sticking to the cabinets, and it is my desire in connection with this matter to offer a few suggestions, which may he of help in the successful handling of such minor repairs as may be necessary to place the cabinet in an A-1 condi-

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 42)

tion without returning the cahinet to the factory.

It has come under our ohservation that whenever such repairs have been attempted hy unskilled mechanics, and the improper use of materials, greater damage to the instrument has resulted.

After the cahinet is unpacked, it should be wiped off with a piece of fine cheese cloth to remove all dirt and marks of packing. Then taking a clean piece of the same cloth and using a small portion of cleaner, made of three parts of benzine and one part of paraffine ruhhing oil, go all over the case, ruhhing briskly lengthwise of the grain, cleaning off all the surplus and hrushing out all the corners. A soft round three degree hristle varnish brush is good for this purpose. Cahinets should never he sponged with water and then exposed to tbe strong rays of the sun in a show window, which acts as a lens and either hlisters the varnish, fades the color or ruins the finish so that it must be removed. So called liquid polishes should be avoided, which are supposed to work "wonders"; frequently they do, hut in a different way than intended, and may destroy the finish, leaving the surface sticky and tbe satin finish spotted and cloudy. The cleaning preparation mentioned hefore will answer all purposes.

Bruises, if not too deep, may he safely ruhhed out with a piece of soft felt and 3F pumice stone and paraffine ruhhing oil, taking care to go only lengthwise of the grain and only so far as the hody of varnish will stand. This also applies to scratches. If too deep to rub out, they may he hurned in with shellac cement; the spot leveled up with fine sandpaper and touched up to the required color and French polished with a solution of shellac, alcohol and raw linseed oil, using a piece of cotton covered witb a piece of fine linen cloth. This requires skill and experience and should never he attempted hy a novice on large flat surfaces. Ruhhed spots and white corners may be touched up with spirit stain made from Bismarck hrown, dissolved in alcohol, to which is added a little shellac. This for the regular red mahogany; for the English hrown a little Nigrosine added to this stain will give the required shade. The special finishes and oak requires tbe color adapted to the finish.

Paper sticking to the finish can be removed with a cloth and water, dry carefully and rub the surface with third degrees pumice stone, soft felt and paraffine oil. If, after rubhing closely the marks still show, it will require the services of a skilled mechanic to French polish the same to the desired finish, which is then dulled off with a soft hrush dipped in 3F pumice stone and cleaned up as hefore mentioned.

Where the finish has turned gray or spotted from dampness or some unusual condition, the only remedy is to have the finish removed and should only he attempted hy a competent, experienced polisher, and never by a novice.

As I have said before, the machines leave the Victor factories in perfect condition and if not injured in transportation, severe climatic changes or unusual conditions, should open up in first-class shape and if properly handled and taken carc of should cause no trouhle whatever.

A Quartet of Prominent Delegates to the Jobbers' Convention

C. H. Wickes, Superintendent Record Pressing Plant

Mr. Chairman, Ladies and Gentlemen:—I suppose there may be other kinds of husiness as interesting as the Victor, hut all I have to say is, that so far, I have never been ahle to find any of them. I always expect that visitors to the factory are going to bc very enthusiastic about my department, and my expectations have never heen disappointed.

When you stop to think ahout it—it is a wonderful thing. I have delivered to me the finest kind of chocolate colored dust. Tons of it at a time. It is worth a good deal of money of course, hecause there's so much of it and the ingredients come from all over the world, but when that same "dust" leaves my department it is worth hundreds of thousands—yes, millions—of dollars. Instead of being so much dust, it is artistic triumph—in a thousand forms.

Being a truthful man, I have to admit that I, myself, do not have much to do with the miracle that happens. Mine is a straight manufacturing proposition, but I don't helieve there's a soul in my whole department hut what realizes the importance of the work we do. I believe we have made the claim in our advertising that the Victrola has done for music what the printing press did for literature. That is our particular job. It is all very well for Caruso or Melba to sing like angels, but it is up to us to "print" their music in such a form that it can be enjoyed hy everybody, no matter where they live and how much they know about music. Its also up to us to make so many records that the cost of each is kept down so that they will he within the reach of all.

Most of you know the process, but I want to give a short outline of the operations performed in the record pressing plant

People always want to know just what composition we use in making records, but you will easily understand how that piece of information is not for me to give.

Perhaps you don't know that the comhination of substances we use is so delicately adjusted that we need the services of an analytical chemist at all times. If some one of the ingredients didn't come up to normal, it would throw out the entire combination, and so all raw product is submitted to analysis and all mixtures are similarly examined.

The record material is now compounded in our new plant near the river front. By the way, since the last Jobbers' Convention was held, we have put an entirely new plant for the preparation of record material into operation—which in the matter of methods and output, represents a very considerable gain. The new material preparing plant is located near the river, adjoining the new power plant and pumping station.

To resume my story. When the record material arrives at the record pressing plant, it is fed into hig mixing and kneading machines, having steam heated rollers or other appliances which raise the composition to the exact temperature at which it develops the required degree of softness. By the time this happens, the kneaded mass has turned black and it exists thereafter not as dust, hut as an absolutely smooth, plastic mass.

We handle it in immense rolls—about all that two men can handle in passing it from one mixing or kneading machine to another. Finally this hlack "dough" is rolled out into long strips ninety feet long, three feet six inches wide and approximately one-eighth inch thick. The last set of rollers mark it off into squares ten or twelve inches, as the case may be. It is conveyed some distance hy a wide canvas helt, and while on this helt, passes through a cooling chamher which hardens the composition so tbat it can he handled readily.

The squares are then sent to the pressing floors. The actual pressing is prohably more familiar to you than any one other operation performed by my department.

The squares of record material are again heated on steam tables to just the right temperature. The press operator then puts a lahel, face down on the center of the matrix, and folds over it one of the softened squares of record composition. A heavy pressing plate is then placed on top and the whole thing is slid hetween the jaws of a press, where sufficient power is applied to make a perfect impression.

Advertising and Education Discussed

After the manufacturing departments had had their say, as it were, the other departments of the great Victor organization also had their inning with Ernest John, of the advertising department of the company, leading off with the following address on "Advertising That Gets Attention:"

Advertising That Gets Attention

By Ernest John

Mr. Chairman, Ladies and Gentlemen: There are some people who look for trouble. There are others who have trouble thrust upon them. I do not belong to the first, but—evidently I do belong to the second, class of unfortunates. Any man who undertakes to say anything worth saying on "Advertising That Gets Attention"—and say it in fifteen minutes, is likely to have all the trouble he wants without looking for it. It is not a general subject to be dealt with in a general way, but a highly specific subject which must be so dealt with. There is no time to lose—no chance to wander into pleasant verbal byeways, and so, if you please—if I may so far presume upon your forbearance—I shall work close to my notes.

They say that money talks. I suppose it does, but for that matter, so can a parrot. As between two advertisers, each of them using the same amount of space, one of them will be more successful than the other—always. In every case it will be found that the successful advertiser is the one who has found out what is the best thing to say and what is the best way to say it. Each man may spend the same amount of money, but one man's money talks louder and more plainly. Is there a remedy for such condition of affairs? Of course there is.

There are certain first principles in advertising which are perfectly understandable, just as there are certain fundamental principles in music or mathematics. They can't very well be weighed or measured or analyzed in a test tube, but they are there nevertheless, and they work just as effectively as the liveliest microbe that ever came to live in a human lung.

Geraldine Farrar, in an interview given some time ago, was asked how a student practicing four hours a day should spend her time. Miss Farrar's reply was quite characteristic. She said, "Think for three hours and practice for one." If you first think for an hour, you will write the right sort of copy, and figure out the right typographical arrangement in a very few minutes.

There are many of you no doubt, who have come to understand advertising very well.

I will venture to say you have arrived at that happy estate as the result of hard knocks and spiritual anguish. Never mind, you can't have had any worse experience than I have, because "they ain't no such animal." In my newspaper days I labored for years to convince a town full of small store keepers that it pays to advertise, and believe me, gentlemen, I earned my money. It was worse than that. I had to earn my own money and theirs too. And under such circumstances advertising technique becomes an instinct, or you become a corpse.

I may have comparatively little to offer you, but I have much hard won experience to offer through you to your dealers, and that is what the Victor Co. has asked me to do.

If an advertisement is to produce any business, it must first of all be read. I am not trying to be funny, nor do I propose to feed you spoonfuls of sophistry. I mean just what I say, and I believe the first question, the most important question of all is, how to get your advertisement read. I am not talking for the benefit of the man who uses pages or half pages of space. When a man can burn up space like that he doesn't need much help from me, nor indeed, from anyone. The very size of his advertisement will turn the trick, unless he makes a very bad mess of it.

What I want to do is to make one or two practical suggestions for the man who can only

(*Continued on page 44*)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 43)

buy five or six inches of space, single or double column. To get such ads. read, in other words to make people see them, is quite a healthy job.

It is easier to overlook a mole hill than a mountain, and similarly it is easier to overlook a small ad. on a crowded page than it is to overlook a big one. So the right sort of typographical make up is doubly necessary for the use of small space.

You must realize that every newspaper advertiser has the same tools to work with as every other advertiser; namely—type, ink, paper—and brains. All the different effects are gained by the same means under the limitations which are imposed by the mechanical processes of printing, and here is the essential fact.

Almost the only chance for the small ad. is that it shall be different in appearance from the other ads. which surround it.

Generally speaking, you will find that one of the best ways to make an ad. look "different" from the other fellow's is by cutting down your copy to one-half its usual length, and then I would suggest that you throw out one-half of what is left.

Brevity is the thing to strive for, but not, of course, at the expense of sense. You must use enough words to make your message intelligible, but don't let even one unnecessary word creep in.

Actually—when it comes to making your ads. stand out from all the rest, no one can help you very much at long range. It is eminently a job for the man on the spot. No one else is familiar enough with the appearance of the pages of a certain newspaper in a certain town. But—

If you can't buy space enough to dominate the page you must—if your advertisement is to be read—make it "different" from the rest, and attractively different. Very well!

The first and simplest way of making one ad. different from those which surround it is—naturally—by getting a contrast. I have said already, that most advertisers try to say too much. Obviously then, if you buy five inches, double column, and limit your copy to ten words, your ad. will be "different." That's one way. Of course, no one can say much in ten words, and I don't mean to seriously suggest that you should actually confine your copy in any such way.

The point that I do wish to make, and make very strongly, is—that since the majority of people are averse to buying space and leaving it blank, that you, if you have courage enough to use lots of white space, will find that your advertisement does stand out from among the others.

Next—if the advertisers of your town, generally speaking, have a tendency to use bold, black type so that the characteristic look of the page is black and heavy, you can make your advertisement look "different" by using a light silvery looking type which carries little ink. You will again get a contrast, and that contrast is the thing which catches the eye of the casual observer.

Again, it can be done with cuts. Two artists will make a sketch of the same thing, but just as likely as not, they will make two entirely different looking sketches, because each one of them may use a different kind of pen stroke and each may express black and white values in a different way. Franklin Booth's black and white sketches are totally different in character from those of Call or Paus, and it is quite possible to get sketches and cuts which have a strong touch of individuality all of their own. Here again, you see it would be possible to make your ads. catch the eye more quickly than if you used just the ordinary kind of cut.

While I am on the subject of cuts, let me say that in my experience it is better to use no cuts, than to use poor ones. If you ever use a picture of any sort, be dead sure that it tells the story you want to tell, and suggests what you want to suggest. What's more, be sure that it does that unmistakably.

It doesn't do any good to publish pretty pictures unless these pictures make the observer think along the lines that you want him to think. When you can do that—do it, by all means, for the quickest and most vivid impressions that can be carried to the human brain, are those that can be carried through the human eye.

Another point to be considered in picture ads. or in the use of cuts, is this: Can you assume that everybody is interested in your advertisements? You can assume nothing of the sort. A type ad. has got to be read, or it will

L. C. Wiswell and A. A. Trostler Getting the Air on the Hotel Traymore Balcony

do you no good; whereas, a picture ad. only has to be glanced at. And so, other things being equal, the picture ad. is best.

How much time does the average reader spend in reading advertisements? How much time do you? And you being an advertiser yourself, probably spend twice as much time as the non-advertiser does. What happens is this. A man buys a paper to find out the news of the day. In turning over the pages he can't very well shut out the ads. entirely, but his eye only skims them over, and it is up to you to shoot the big idea into that casual reader's mind if you can. That's why the pic-

Starting Out to Give the Boardwalk the "O. O."

ture ad. has so much drawing power and why brevity is so very necessary.

I have dealt so far only with the question of how you can get attention for your advertisement. Volumes, of course, could be written as to the kind of copy you should use, but for the present I shall content myself with showing you some examples of ads. which were made over into better ones. I want to remind you that in making over these ads. I was careful to use the same borders, and as a general thing, the same type as were used in the originals. Personally, I should not care to use some of them myself, but I wanted to show that understanding the principles involved would improve the results.

Here is an original advertisement published by a Victor dealer. I think you will agree with me that first it is a fairly good ad. for grand opera, but a comparatively poor one for the Victrola. Second: there are too many facts presented, and whenever that is the case, each one fact loses much of its value. There is no one suggestion which stands out prominently enough. I contend that the thing which should have been played up is the fact that grand opera is always available to people when they have a Victrola.

In the made over ad. you will notice, too, that while we used the same cut, we changed the character of it. The reason for doing so is that broken lines, because of their incompleteness, attract the eye, especially in a newspaper page where the make up of the paper demands straight lines.

Here are two more. The border used seems to me to be weak and meaningless, but I kept to the rules of the game, and used the same border in my own reconstructed ad. You will notice this original announces "A New Stock of Victor Records." Now that, of course, may be a matter of pride for the dealer, and in a way it is a matter of interest to the customer, but the thing to do is to emphasize what this new stock of records will mean to the customer in musical entertainment for him. Customers are not interested in a dealer's stock as such, but they are interested in what that stock represents to them.

The next original advertisement is good if you read the whole ad., but until you do that, you would have no possible idea that its purpose was to advertise the Victrola. The word "Victrola" is not played up anywhere, and you must flash that word "Victrola" at people.

People who read advertisements are divided into two classes. One—the larger class—has no interest in an ad. except in a purely casual way, and then it is a question of catching his interest on the fly. There is another smaller class of readers who are interested. When a man has got the Victrola "bug" in his system, he will read anything about it, but it is much safer in preparing advertising copy to figure that most people have no very specific interest. The word "to-morrow," the price and the dealer's name don't suggest anything of what the customer can enjoy through having a Victrola. Here in this reconstructed advertisement, you will see that with very little change as to copy and only slight changes as to typographical make up, the ad. has been made more effective, as a Victor ad.

Here is one more sample. It is a sort of trick advertisement that I personally condemn. The man who prepared it had ingenuity, but it was misdirected. Think for a minute—when you start out to write an acrostic you have to make the words you use fit the acrostic rather than the idea you want to convey. That is obviously wrong.

These are all the examples I have prepared. No one, of course, can do much with so big a subject in so short a paper, but I want in conclusion to say a word or so about quality.

If you will show me the printed matter a man uses, I can tell you just about what sort of man he is. Doesn't that sound like a piece of idle presumption? It isn't. I can show you that it isn't in a moment. You can do the same thing. Haven't you often seen a bill head, a letter head or an advertisement that irresistibly brought to your mind a picture of a country grocery? And on the other hand, doesn't Tiffany stationery suggest Fifth avenue? Yes—and there are all manner of modifications in between. There is such a thing as a "quality look" in printed matter, and my advice to you is to get it—for you are handling a "quality" product that ranks with the great masterpieces of art or literature.

Together—with the Victrola—we are doing for music what the printing press did for literature.

There is a line of Omar Khayyam which reads:

One wonders what the Vintners buy
One-half so precious as the thing they sell.

Those lines are no less applicable to the Victor

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 44)

dealer. Do you realize, gentlemen, that your merchandise is not only Victrolas and Victor records? It is all that those things represent. It is joy, laughter, tears—whatever the need of the moment may demand. It is the inspired achievement of some great artist. A quality product? Mr. Chairman, that question has been answered—is being answered—North and South and East and West.

Mrs. Frances E. Clark, of the educational department, then read the following paper:

The Victor in the Schools

By Mrs. Frances E. Clark

For the third time, I have the pleasure of bringing to this wideawake body of thinking men the message of progress in one of the lines of the Victor business—the educational work.

Emulating the phenomenal growth of the Victor itself, this youngest child of the organization may well take pride in its achievements. The story of the beginning of the work and the organization of the department are too recent and too well known to need recapitulation. Music is one of the vital things in education to-day, and only through the talking machine can it be adequately presented to the millions who can in no other way come to know real music.

Pedagogy—psychology and human need are at one in this at last, and America is aroused as never before to the value of music as a universal pleasure, a cultural avocation and, lastly, an education. It has in it inherently more elements of educational value than any other branch—reading excepted.

The use of music as an educational factor is a comparatively recent discovery. A speaker the other day read from early reports of proceedings of the school committee of Boston, enumerating reasons why music should be taught in the schools. Discipline, mental activity, invigorating of pupil for other studies, patriotism, etc., but never once for music itself. Reports of meetings of supervisors and other musicians are as barren of any suggestion of using real music itself.

For fifty years after music was first introduced into the schools of Boston, sight reading was the only aim and object. Then came the singing of songs, and some little reaching out after better things, but not until five years ago, when our work began to crystallize the idea and to show how the Victor could carry the great music of the world into every school, did there come an awakening to the power and value of real music in education. The entire plan and aim of teaching has been changed. Many do not yet realize the cause of the complete overturning of ideals and aims in the teaching of school music.

The impetus is, of course, a part of the general awakening of America in music in all lines and fields of activity, but the Victor has made possible the practical realization of the dreams of a musical America through the schools where rests the future of our national music.

Not less sight reading but more is being taught because of the quickened interest and keener ear resulting from hearing much fine music. Not fewer songs but many more are being taught because of the easy, rapid and accurate learning of songs, folk, familiar and art songs, direct from the records, in perfect tone, rhythm and phrasing, enriched by instrumental accompaniment, wholly impossible in the old way. Music supervisors were baffled and beaten in their efforts in securing credits for music work and in producing a sufficiently artistic finish in their choral singing on public occasions as to command the respect and endorsement of musicians and boards of education, with the resulting appropriation of enough money to continue their meagre salaries for another year because there were no standards beyond the often pitiful efforts of the village choir.

The Victor has opened up now a new world of tone values and interpretations which the pupils may hear, available for all, and which is being carried as fast as our efforts and years can do so, into every school in the entire country. Every large summer school is at this present moment presenting courses in music appreciation and most of them with Victor records. The three great book company summer schools being held in Chicago are each giving full courses with daily lectures and classes all illustrated with the Victor. At New York University, Chautauqua, Ocean City, N. J.; Boulder, Col.; Berkeley, Cal.; Emporia, Kan.; University of Illinois, University of Wisconsin, University of Arkansas, Worcester University, and in dozens of other such schools such courses are being given. Our folk dance records are being used at this moment on four Chautauqua circuits comprising nearly a thousand towns. Our lecturers are presenting the work in many other large normal summer schools, county institutes, district and State associations.

The piano, which for two hundred years has been the standard purveyor of all forms of music, has been outclassed, wonderful as it is, as an interpreter of music. It can give only a meagre representation of the stringed instruments, the woodwinds or the combination of

Mrs. Frances E. Clark

strings in trios or quartet, or the orchestra or band.

It is entirely barren in the wonderful tone coloring of the orchestra, and therefore inadequate in giving a student any conception of the great form of symphony and sonata.

Even the player-piano, while excellent for extended study of form and piano literature, is still narrow in its scope and useless in any true representation of the larger forms. It is helpless in the great field of vocal music, which is by far the richest of all.

The opera, the highest development in the combination of instrument, voice and dramatic action, and also the great choral works of the oratorio are closed to the piano.

It is the once despised talking machine that is the open sesame to this great world of tonal beauty.

By means of the Victor and the Victor only can the music of the world, properly interpreted by the greatest artists, be disseminated throughout the entire country for all to enjoy.

If then to the Victor falls the privilege and duty to purvey the nectar of the gods to a thirsting populace, and we desire to build surely, sanely and safety for a well assured future, where shall we begin but with the children. Let us but educate the ears of the children to know music and the question is settled.

The number of cities and towns throughout the United States placing the Victor as an integral part of every day school work, has grown with ever increasing ratio from one city in 1910 to 500, 900, 1,800, 2,700 and now, to nearly 4,000, an average of 800 added for each of the five years and our reports are far from complete.

On the playgrounds one Victor reaches a large number of children whose school buildings do not yet possess an instrument. Our lecturers are reaching very large numbers of children a year in direct contact, while the little children below school age in the home are getting the message from their brothers and sisters.

Some of these Victors are being carried around to many different buildings in country and small town schools.

A conservative estimate would place the number of children being reached at nearly or quite 12,000,000.

An authority in school matters recently said to me: "Does the Victor Co. realize what a tremendous thing this educational work is for future business? It has been demonstrated that 75 per cent of the pupils use in after life the tools, books and equipment used in the school life."

These millions of children who are to-day in the schools are soon to be the home-makers, the business men and financiers of the nation. It is therefore of no small matter to lead them with the Victor through records of special appeal, to a taste, love for and knowledge of good and lasting music.

If we want to establish a large and valuable clientele for the next decade, reach the high schools and grammar schools of to-day.

Everybody knows this and every nostrum and humbug tried to use the schools for free advertising, which has resulted in stringent rules being adopted in many places prohibiting any lectures or demonstrations being given where a commercial idea is attached. In spite of this our lecturers find entree and are almost always welcome as offering something of great value to the schools. We are working consistently showing the teachers better ways to secure greater returns from their investment, giving them real value and instruction in a little understood subject.

We have played fair with the schools and have continuously tried to give them the records most useful and most needed at the lowest possible rate. We have given out millions of copies of valuable booklets.

Because of a clear understanding of the needs of the schools we have been able to offer service in many lines, and the school people have followed our lead with remarkable alacrity.

At first there was but one thought—that of music appreciation. We soon added material for actual teaching of songs—then came records for marching, folk dancing, calisthenics, penmanship, stenotypy, American music, geography and many other correlations with school work, giving information and suggestions as to better ways to use the records.

The great field of the rural schools lies almost untouched. Material is nearly prepared, both records and printed matter, to cover this—and we hope to inaugurate a vigorous campaign for this work in September.

Our new edition of "What We Hear" is at last on press and will be ready to push a renewed effort in all high schools and colleges—a definite course of study with the book as a text in the hands of the pupils, and not merely a reference text as before.

Our commercial work has been a revelation to all. The discovery that the appeal of rhythm to the motor activity of the fingers in the penmanship, and typewriting is the same as to the feet in dancing, has completely overturned methods in such teaching. Much greater speed, fluency, clearness and better form is obtainable when the motion is controlled and inspired by music.

The use of our splendid new records in the study of English literature was adopted last week by the National English Teachers' Association. This is another of our new lines of work where the possibilities are boundless. We have had this year ten lecturers and hope to increase the number for next year to more adequately cover many sections yet but scarcely touched.

The greatest danger now is not that we may not succeed, that is long past, but that we may

(*Continued on page* 46)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 45)

be overwhelmed by an embarrassment of riches—so many schools placing Victors, and not knowing enough of our ever-widening plans for their use—fail to derive the full benefit from them. A Victor in a school closet gathering dust and out of repair, for want of new records to keep alive the interest of the children to carry along definite plans for use in various fields, is the worst possible advertisement. If the Victor is being used intelligently and joyfully every day, the news filters into the homes and builds Victor prestige, but if the results are marred by improper adjustment of the reproduction, or if the number of records is so small as to defeat any real plan of use, or the same few are played so frequently as to weary the pupils, then the whole splendid plan falls into disrepute—through no fault of the plan, the material prepared, or the innate love of the pupils for the work, but simply plain starvation for lack of food—or stagnation because of a continual diet of the same thing.

It is a matter of life and death to the whole plan of school work, which has now reached such astounding proportions, as well as to the business side of it, to keep the schools supplied with fresh records for the ever-increasing lines of service of the school Victor. This can only be done—if you, as Victor distributers, second our efforts in making these especially prepared records, by giving them a chance. If you do not order them and do not endeavor, by letters and personal appeal, to induce your dealers to order them, how can the school people have any opportunity to find out anything about them?

We are mailing direct a large amount of literature but this is not enough. There must be the more intimate personal touch of the local dealer, where all information may be had and at least a representative list of educational records may be heard.

Again, the average clerks on the floors of a large number of the stores of our dealers are unfortunately not musicians, and great difficulty is experienced by school people and supervisors in obtaining any accurate information about educational records, or in fact any enthusiasm for and knowledge of any considerable number of our Red Seal records, which we use so freely in educational work.

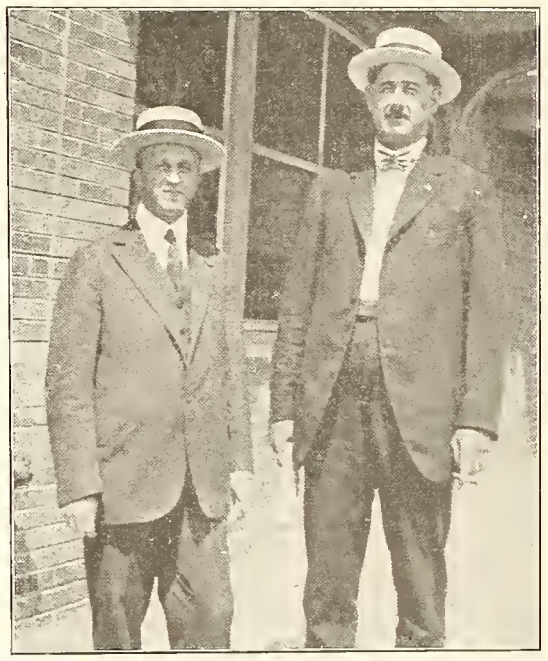
One of your number confessed to me a while ago that he had never read the educational page in the "Voice of the Victor," never read our circular letter nor a single one of our booklets nor "What We Hear?" nor had a single clerk or assistant ever done so.

Do you not think that the time is ripe for the organization of educational departments in every single one of your retail stores and in the stores of your larger dealers to take care of this tremendously important branch of Victor business? Do you not think you would increase your record business enormously with a very valuable clientele of mothers in the homes as well as to the schools if you had at least one talented, bright musicianly young woman or young man on your floor who knows music as a whole and who will give the necessary time to finding out what records young children should hear, and what lines of work are to be carried out in the schools?

Thousands of mothers, having a Victrola in their homes, have not the slightest idea what records to get for the children or what can be done toward their education by means of the right kind of records, and I grieve to say that hundreds of Victor stores are unable to enlighten them on the subject when they appeal for help.

Hundreds of our schools having Victors have never heard of our many new lines of work until an educational representative comes along to show them what is being done. You, as Victor distributers, are vitally interested in all that tends to build up Victor prestige and I plead with you to recognize this imperative need to give better attention to this service to the homes and schools. The schools are vital to our future and every effort should be made to increase this value as well as to serve them better for the cause of education.

A number of you have already organized educational departments—this is fine—the number should be increased before September first to practically every large Victor store in the country. This movement has grown so fast that it requires prompt and efficient measures to keep pace with it. We cannot get on with the equipment of four years ago nor even one year ago. The department has planned for greatly extended development, but we need your co-operation to the fullest extent to achieve the success which the field promises. Will you not send us orders for literature carefully adjusted



Chas. F. Bruno and F. E. Evans Getting the Air

to your actual needs? Will you not order more liberally the records especially prepared for service in one or another of the lines of educational work, and then let the homes and schools know about them? Will you not encourage your dealers to put somebody on their floors who can push this work intelligently and will you see that they are supplied with the fullest information and literature? This work is no longer an experiment nor an idle dream but has come to stay, as the stone that was almost rejected by the builders and has become at least one of the corner stones of the arch of Victor success.

The next paper was that by C. G. Child, director of the Recording Laboratory.

Your Opportunity to Create a Greater Interest in Music

By C. G. Child

Ladies and Gentlemen: A few days ago I was told by Mr. Geissler that I was again to have the privilege of saying a few words to you at your annual Convention. The program for Victor Day was shown to me, and I found that I was put down for what was termed, in a most complimentary manner, an address to you on the building up of the greatest musical catalog in the world. I asked if the subject heading of the few remarks that I would make might be changed, and that I might once more say to you something touching on your opportunities to further the interest in and to bring to the great public the better music of the world. It will, I fear, be necessary for me to make some repetitions of my little talk to you of two years ago, but the matters which I then brought to your attention are even more urgent to-day than they were at that time.

Some of you will perhaps remember the expression which I used here two years ago as to taking our business "out of Coney Island," and may I say now that it rests almost entirely with you whether the business goes back to the "Coney Island" type or not?

Your interests and the interests of the Victor Co. are so closely allied to-day that I feel I may talk of our interests together, and I hope you will not consider my remarks in the light of criticism. Having had, ever since the incorporation of the Victor Co., almost the sole responsibility for the artists added to the Victor catalog and for their repertoire, as given to us in the records in the catalog, I perhaps am more closely in touch with the very difficult situation to-day than anyone connected with the business.

You will remember that I called your attention to the fact that the present grand opera is more a musical dramatic production to-day than ever before. We rarely see anything that touches on the wonderful melodies abounding in the old operas of that time. We have gone through this class of music again and again, we have been compelled, on account of the repertoire of the artists, to make repetition after repetition from these wonderful old melodies, so that to-day there is scarcely anything in the "bel canto school" that is not represented in our catalog. This situation has been so thoroughly gone over time after time that there is not much left to be taken from these old works. It is so thoroughly exhausted that it reminds me a bit of a story that Harry Lauder told me about a year ago.

A young Scotch lad came to Glasgow to work in a factory. He took up his abode with an old Scotch boarding house keeper, and during the first week he was with the old lady, she gave him for his breakfast a soft boiled egg, for his luncheon another soft boiled egg, for his tea in the afternoon after the hard work that he had done, a hard boiled egg, and at night so that he might have a complete change, she gave him a poached egg on toast. At the end of the first week when he had gotten his pay, going home at night he passed a butcher shop and saw sausages hanging in the window. He went in and asked the butcher to give him a pound and a half of sausages. He wanted the long thin ones instead of the short fat ones, because there was more to them.

He took the sausages to the old lady and said: "Mother, I thought I would like to have a change for my breakfast in the morning. Will you cook the sausages for me?" "Aye, Danny boy, but how do you cook sausages?" "Why, mother, you cook sausages like you cook a sausage." "But I ne'er have cooked a sausage." "Why, mother, you cook them like you cook a fish." In the morning Danny came down to his breakfast fully expecting to have a real treat. He was met by the old lady who said to him: "Danny, lad, I fear you'll be sore disappointed. There's not much left to them when they're cleaned."

By this I do not mean to imply in any way that there is not much to the melodies of the bel canto, but I do mean to say that we have so cleaned and exhausted this particular type of music that we have taken practically all the meat and good there is in it.

But in music as in our own lives, there are many other kinds of food, and there is a field which is far greater and almost limitless in its scope of wonderful music, and that is the lieder and concert songs of a great number of composers, the principal ones being Schumann, Schubert, Brahms, and of the present day, Debussy, Chadwick and many others.

If you gentlemen would take the time to study the programs of the concert artists, you would find this kind of music represented in a far greater degree and used much more frequently. It appeals to all classes, it is musically instructive and in your own hands lies the opportunity to increase the demand for this music and bring it to the public and thereby add greatly to your own profits.

I am constantly told by our Record Ordering Department that dealers are worried about the size of the Red Seal list, and ask, can't we cut out this, can't we cut out that, and just as frequently I am asked by the artists, "Mr. Child, what are we to sing? Some of the best things musically we have done for the Victor meet

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 46)

with little or no reception. We find on our annual statements of account only a few of the records sold of the selections which seem to have the greatest success in our concert work. Cannot something be done to awaken an interest in this music?"

I had a long talk with Caruso only a short time ago along just these lines. I have told you just how seriously he and all of the other artists take their Victor work, and Caruso told me that he could not understand why two records from Germania, which he had made for us some few years ago, were among the poorest selling records in his list. Artistically he considered them a great credit to himself, and he spoke with much disappointment at the lack of appreciation of these and other numbers of the same character.

Only a few months ago, when some of you gentlemen were at the Victor factory as a committee to discuss some matters with Mr. Geissler, I was called to the meeting and I asked you if as a personal favor, you would not listen to two records which were to appear in our next bulletin. 88552 La Reine de Saba—Prete moi ton aide (Queen of Sheba-Lend Me Your Aid) and 87242 Luna d'Estate (Summer Moon)—and if you could tell me why such records as these would not appeal to the general public and why you could not sell them in large quantities.

Do you not think that it would be a most profitable thing for you yourselves to make a close study of the lives and work of our great artists, and in this way be in a position to give your sales forces instruction and advice as to bringing forward records of the kind to which I have referred?

The great artist obtains his or her position in the musical world not alone through the wonderful God-given gift of a glorious voice, but through years and years of the hardest kind of work and study, and the thing which counts the most with them all and with the public to which they sing, is their ability to correctly interpret the music of the great masters. It is in your hands to carry everywhere that interpretation and to make it known and felt.

The real artist does not want to be known alone as a singer of "Carry Me Back to Old Virginny" and "Little Grey Home in the West," or as a singer of "I Hear You Calling Me," "Tipperary" and "A Little Bit of Heaven," and they ask and insist, rightly, I think, that in their Victor repertoire there must be records which represent their artistic and serious work.

We have, during the past three or four years, seen two or three of our great artists retire from opera and the concert field. We have lost one or two by death, and while the great majority of our celebrity artists are still in their prime with years of their career before them, eventually their places will have to be taken by the new names and the new voices of young singers who are gradually coming to the front, and it is of the most urgent necessity that you and your staff should try to create an interest in the work of these new singers as it appears in the bulletins and catalogs.

We must between us make a demand for their records, and we must make their sales large enough to make their Victor accounts of real interest to them. The best way to accomplish this is for you to familiarize yourselves with this music. Our competitors to-day are ready and willing to pay enormous prices to secure a name, and it is in your hands to give us the kind of help and aid that will make it possible for us in the coming years to hold the position that we have held so long in the opinion of the singers, which is that they would rather be connected with the Victor Co. than with any other company making records. The cost to you of stocking and carrying records of all of these singers is not great as compared to the value that is in it for us all.

The concert which has been arranged for this evening, not for your entertainment alone, but for your instruction as well, is given to you by some of our great artists and our most valuable singers who wish to give to you in the program a message, not only of the popularity of some of the lighter things which they have sung, but a message touching on really good music.

Mme. Alma Gluck and her husband, Mr. Zimbalist, have broken into their summer at Lake Placid, New York, and come all the way to Atlantic City to give this message directly to you. Mr. John McCormack has given up his much needed rest and recreation at his summer home in Rowayton, Conn., to tell you that there are other things that he sings beside the light ballads of the day. Mr. de Gogorza has left

Left to Right—L. Burchfield, H. J. Shartle, E. Paul Hamilton, M. Max, S. O. Wade

his summer home in Bath, Me., and comes also to say to you that he wants you to hear something that is really serious in music. Mr. Zimbalist brings you the same message, and the soloists of the Victor Opera Co. whose work on the program this evening is confined entirely to concerted numbers, have the same appeal to make.

The courtesy of these singers in coming to Atlantic City to sing for you to-night is a very great one, and I earnestly trust and hope that their message to you may come in such a way that a real effort will be made to take from your record racks the good music which they have done for us and give to your sales force some plan whereby this music may be played and explained and talked of to your customers.

Could you not follow closely the concert programs of the artists who appear in your various cities and vicinities and bring to the attention of your customers at these most opportune times, records of selections which these artists are to sing.

There are fifty-two weeks in the year. Would it not be possible each week to take some two or three records of the class to which I have referred, say one artist this week, another

Wm. Haddon, Thos. Green, E. Paul Hamilton; Mrs. Hamilton and Mrs. Green in Chairs

artist another week, and so on, and have the sales people familiarize themselves with these records so that they can present them in such a way that interest will be awakened and a demand gradually built up for this kind of music, which means so much to us in the future years.

One of the addresses of special interest, inasmuch as it was made by a man not directly interested in the exploitation or sale of Victrolas was that of Dr. A. E. Winship, editor of the Journal of Education, Boston, and who had for his subject, "The Mission of School Music and the Message of the Victrola." Dr. Winship reviewed the work of the schools and of famous individual educators in testing the sight and hearing of school children and told how illiteracy had been overcome through attention to those matters. He emphasized the fact that it was not only necessary that a person should simply hear well, but that the ear should be trained to enjoy the finest sensation.

His address was listened to with great attention, for it presented some salient facts in a new and interesting manner.

The Mission of School Music and The Message of the Victrola

By Dr. A. E. Winship

"The trouble is," said Dr. Winship, "we have never made any use of the sense of hearing as a fine art with all the people. We have never trained the ear in school. What absurdity could be greater than to leave men and women illiterate because they would not enjoy reading 'Paradise Lost' and could not wing a penman's graceful bird. That would be no more viciously absurd than to leave the multitudes with untrained ears because they cannot appreciate the quavers and semi-quavers of the highest musical composition. . . .

"Teachers test the eyes of children and their hearing if faulty. It should be as definite a duty for every teacher to test the ear and train the ear to hear discriminatingly as to teach the children to learn the multiplication table. All ears can be easily trained to feel the thrill of rhythm.

"Any person who can walk with another and not keep step is as uncultured as one who can sit with his hat on in the presence of a lady in a parlor or reception room. Marching in step, and walking in step when not marching, is as definite a responsibility for the school as correct speech. Rhythm can be attained for every child and must be attained in every well managed school. The thrill of melody is also an indispensable attainment for every child. College songs and other rippling, frollicking jingles are as necessary in school as is a blackboard. You are not after classical music now any more than you are training in 'Paradise Lost' when reading 'Jack and Jill Went Up the Hill.'

"You do not need these jingles for pupils who can sing and who know music and appreciate the art of music, but there are some in every school who can only have melody stirred in them by the melody in song, and there are few, if any, who will not respond ultimately to melody, and besides it livens up a dull school as nothing else does. 'Yankee Doodle' and 'Dixie,' 'Old Black Joe' and 'Old Kentucky Home' have a mission for the school and an especial mission for the non-musical ones who need to have their ears unstopped thereby.

"While music touches the lowest depths, it also rises to the greatest heights. Nothing in any of the common branches has any such possibilities of glory as have the masterpieces in song.

"While you reach down after the dullest ones with 'Jingle Bells' and the semi-musical ones with 'My Bonnie Lies Over the Ocean' and 'Annie Laurie,' there are those whose soul will respond to 'Rocked in the Cradle of the Deep,' 'Bandelier,' 'Sailing O'er the Bounding Main' and 'Then You'll Remember me.'

"Nothing but music sways the physical, mental, and moral being as does the charm of rhythm. Physical health needs rhythm, industrial peace needs it, contentment cannot be maintained without it, and social efficiency and domestic life need rhythm. Rhythm is one of the subtlest and one of the most majestic forces in the earth beneath and in the skies above. To

(*Continued on page* 48)

CONVENTION OF NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 47)

spend time on the lesser needs of the ehild and not unloose the charm and power of rhythm is an unspeakable tragedy.

"And yet rhythm is as nothing when compared with melody. Rhythm is primarily physical, while melody is for the mind. What rhythm does for the body, melody does for the intellect. While rhythm sways the physical life, melody sets the mental life aglow. The work of the sehool is to see to it that the child gets control of his mind, gets it in action, gets it in action right, helps it in action along right lines.

Intense M'nd Needs Break in Intensity

"The intense mind needs to break its intensity. That which is intense to the child is far from intensity to the teacher. The whole effort of the school is to make the life of the schoolroom intense. Study, think, do more and more, is the whole plan and purpose of the school. What the school needs is the occasional breaking in upon intensity and nothing does this so effectively, so refreshingly, so inspiringly as melody. And nothing helps achieve any of these as does the melody of music.

"Rhythm prepares the quiet and peace for receptivity, but the mind must have something more. It needs the lightness and the brightness which melody alone ean give to the sluggish mind; the eaptivating frolie which melody alone can bring into the chaotie mind, the delicious joy which melody alone can give to the sour soul.

"There is no normal child for whom rhythm and melody have not a mission, a simple, applicable, adaptable mission. Harmony may not

Flirting with the Oeean

be for all minds, but it is Heaven itself to those for whom it has a mission. Harmony is the rainbow of promise to the soul that is so situated that it may catch the arch of glory spanning its horizon.

"The child wrestling with '2 and 2 are 4' cannot appreciate the wonders of higher mathematics, but no one would make the high school student mark time because there are some whose minds are as yet closed to every truth above the table of two. So the mission of musie that begins with the simplest sway of rhythm, and tarries awhile with the faintest ripple of melody should give wing to the highest flight of the joy of the masters.

Musie Now in Smallest Sehool

"All this has been mere sentiment in the past. Not a few years ago I might as well have talked about making rainbows in the chemical laboratories as to talk about the universality of rhythm and melody, and the heights of musical glory in the country school, but to-day every highest aspiration of music for the soul can go to the smallest school in any country community.

"It was a beastly day on which I stepped from the train at a lonely station in Idaho whose postmark was on the letters I received from time to time. I found that I was eight miles from the one-room school I sought. When I asked the liveryman if he would drive me out in the country he replied, 'Not on your life.' But when I spoke the name of the teaeher, he said, 'I'd not go out there in this mud to save your life, but I'll try it to carry a friend from the outside world to see Annie Pike Greenwood.'

"Here was a little woman, a graduate of a university, a writer of poems for the 'Century Magazine,' who had corresponded with Riehard Watson Gilder, teaching the little sehool in a far away district when her husband was fencing the pesky rabbits from the raneh whose crops they had entirely eaten the year before.

Left to Right—Emanuel Blout, Mrs. Blout, Mrs. T. E. Swann and Mr. Swann After a Dip

I shall never forget how my heart sank as I got the first glimpse of that shanty sehool house on the plains in whieh was Annie Pike, the valedietorian and poet of the university a few short years ago!

The Victrola in the Desert School

"As we approached we heard Tetrazzini singing, and then Caruso. I had talked about the wonders of the Victrola. I had even written of its glory, but it had been an artificial appreciation until I heard in that little Idaho shanty of a school house a $60 Vietrola which had been purehased from the proeeeds of eountry entertainments. One evening every week and every Sunday afternoon that little sehool room was filled with people of all elasses, with men, women and children who came for the rhythm, for the melody, for the harmony of the masters.

"There is a fine new sehool house there now, and babies are in the Greenwood home. The rabbits have retreated to new ranehes, and there are good erops, better markets and better priees and Annie Pike Greenwood is not teaehing any more, but she is a community leader all the same, and new records are eontinually eoming to that Vietrola. Prosperity and joy reign all about them.

"But not every community has an Annie Pike Greenwood to arrange entertainments for the purchase of a $60 instrument, and I have personally seen instruments eosting less than $25 in a seore of rural sehools on the plains of North Dakota, as they are all over this broad land.

"Not every school has as yet any eommunity leader to purchase even a $25 instrument, but I have in a single half day gone with Professor Farrington, of the Cedar Falls, Ia., State Normal College, as he carried his little Vietrola to five different country schools with one lone reeord made on purpose for him with one stanza eaeh of 'Old Blaek Joe' and several other attraetive songs from the jolly to the patriotic and devout. And after the Victrola had given them one of these stanzas he would have the school sing it with the Victrola, and then he would have some ehild stand beside the instrument and sing. Twenty minutes in a country sehool was glory enough, and every week Professor Farrington or one of his music students goes to a series of sehools, thanks to the possibilities of the automobile. Ordinarily the visit is longer than was ours.

Appreciation of the Artists

"But there are not normal schools enough to eover all rural sehools, and not every faeulty has an available automobile, so as in the case of Professor Beach, of the Emporia, Kan., State Normal School, they loan instruments and reeords for a week or more and send them and receive them baek by pareel post. Sometime someone will have the genius to paint a word pieture of the message of hope and cheer, of beauty and glory that has eome to the world in rhythm, in melody, in masterpieces through the Victrola. I have heard Madam Schumann-Heink and Tetrazzini sing when fabulous priees have been paid. I have seen Tetrazzini called before the curtain again and again. But the ovation was not a faint suspicion of the greeting she daily receives from ten thousand schools where she will eontinue to sing to millions yet unborn.

"About 1632 the officials of Massaehusetts built a highway out West, and in due time reported that a highway had been built eight miles to the bluffs midway between the upper and lower falls on the Charles River, 'which is as far West as a highway will ever be needed.'

"In 1856—sixty years ago—the seventh prineipal meridian was loeated. The United States Government employed an expert eivil engineer, a young Harvard graduate, to run a line west on the fortieth parallel from the Missouri River into Kansas as far as civilization would ever go, and in the archives of Washington is his report that he had surveyed west from the Missouri River on the fortieth parallel

F. R. Kessnick and Miss Florence Briscoe, of the Corley Co.

about 100 miles 'whieh is as far west as civilization will ever go.'

Fixing New Educational Limits

"The chief mission of Boston, Harvard and kindred spirits of the East has been to set a limit beyond whieh the privileges of edueation should not go. For generations reading, writing and arithmetie were as far as the edueational highway was allowed to go. Little by little the prineipal meridian scholastically was earried farther and farther away from the traditions of the fathers, but no advance has been made without the most vigorous attempt to prevent the extension of opportunities.

"Only a little while ago did any publie school pretend to give the privileges of musie. At first it was by rote and then by note, but this teaching was only for those who had an ear for music; nothing was allowed in the sehool room exeept devotional hymns mostly in the long meter. Only recently were gospel hymns allowed in any sehool anywhere. Most of us can remember when ehurehes even would allow no musieal instrument to aeeompany the worship of song. Until very recently it never entered into the heart of man to have children in sehool hear any music other than that whieh they themselves can sing.

"The great American desert is made to do more than to blossom as a rose. Great Lakes, Great Dam Lakes, feed to the parched desert as needed the stored waters of the winter mountain. There is to-day a great desert waste barren of all appreeiation of the masters in music, but this need not be in the future if from the reservoir of the reeords of all the masters of to-day there can be the Vietrola in every sehool room in Ameriea, the instrument through which these records can eaptivate, faseinate, thrill and

inspire, the children of every school in America.

"I yield to no one in my appreciation of the rural mail service, and of the rural telephone, but I place above either and above both of them in the service for God and humanity the possibilities of the instrument which will ever more thrill country life with the richest music of the greatest masters."

World Famous Artists Entertain Jobbers

With a galaxy of artists of international fame, declared to be the greatest ever gathered together for any one concert of either public or private character, with a brilliant audience of talking machine men and their ladies that became madly enthusiastic with the appearance of each new artist on the platform, and with a program that was decidedly well balanced and calculated to bring out the selections with which the audience were most familiar as associated with the records made by the various singers and instrumentalists, the Complimentary Concert given by Victor artists to the National Association of Talking Machine Jobbers in the Rose Hall at the Hotel Traymore on Wednesday night was not only the star feature of this, and for that matter, of preceding conventions, but was a musical event of unusual interest and importance.

Every artist appeared to be in a joyous frame of mind and each gave the best that was in him or her, the program being so arranged that each artist had two or three numbers, so diversified

Reinald Werrenrath

as to offer a fairly large range in music, ranging from opera selections to the lighter ballads and folk songs. Neither the brilliant array of musical talent or their generous work will soon be forgotten by those privileged to attend the concert.

The program opened with the overture "Mignon," played by the Victor Orchestra, under the direction of Walter B. Rogers, with Rosario Bourdon as associate director. The full orchestra was present and played brilliantly.

After the overture came the Orpheus Quartet, consisting of J. S. MacDonald, first tenor; Reinald Werrenrath, baritone; Lambert Murphy, second tenor, and William Hooley, bass, four singers who needed no introduction to the jobbers. The quartet sang with the true darky swing intended by the composer, Will Marion Cook's delightful number, "Swing Along," and followed it with a stirring rendition of the famous and popular "Stein Song."

Next in order came the Good Night Quartet from "Martha," sung by Miss Olive Kline, soprano; Miss Sophie Braslau, contralto; Lambert Murphy, tenor, and Reinald Werrenrath, baritone, in a manner that aroused the audience to great enthusiasm. The same quartet, augmented with the other singers of the Victor Opera Company, next sang the familiar, but welcome, waltz from "Faust."

The appearance of Efrem Zimbalist, the noted violinist, was greeted with a volume of applause that stopped proceedings temporarily, and the applause was renewed after his wonderful playing of the three selections assigned to him

John McCormack

on the program, namely: "Harlequin's Serenade," the Andantino from the Second Sonata, Op. 42, of Max Reger, and a brilliant Polish dance of his own composition.

The next artist was Emilio de Gogorza, the famous baritone, who gave a magnificent rendering of "Oh, Promise of a Joy Divine," from "Le Roi de Lahore"; the old English ballad, "Drink to Me Only With Thine Eyes," and the popular Spanish "La Paloma."

The enthusiasm of the audience was again aroused with the appearance of Alma Gluck, one of the greatest of our contraltos, who had for her share of the program Handel's "Oh, Sleep! Why Dost Thou Leave Me?" from "Semele"; "Sing Me to Sleep," with violin obligato, by Mr. Zimbalist, and her famous song, especially in Victor record form, "Carry Me Back to Old Virginny," with the support of a male quartet in the chorus.

The final, but, not by any means, the least im-

Efrem Zimbalist

portant, of the artists, was the famous Irish tenor, John McCormack, who, after the tremendous ovation had subsided and he was able to proceed, sang the Prize Song from the "Die Meistersinger"; a delightful little Viennese folk song, "The Old Refrain," with music composed by Fritz Kreisler, and lastly, "Larboard Watch," as a duet, with Mr. Werrenrath.

The wonderful entertainment of the evening came to a close with the singing of a medley of patriotic airs by the Victor Opera Company, with the "Star Spangled Banner" as the final

Emilio de Gogorza

selection, bringing the audience to its feet in a last round of applause and cheers.

At the conclusion of the program James F. Bowers, in behalf of the association, expressed the deep appreciation of that body of the treat given them by the artists, which expression was backed by a rising vote of thanks.

The several artists were, later in the evening, the guests of Louis F. Geissler at dinner at the Hotel Shelburne, at which some members of the audience and Victor officials were present.

ACCESSORY MEN AT CONVENTION

Makers of Cabinets, Booths and Other Products Mingle with the Jobbers

As is usually the case at the convention of the jobbers, the makers of accessories were considerably in evidence, although there were few exhibits at the hotel. Among those seen about the lobbies during the convention were E. H. Lansing, the maker of the khaki covers for talking machines; Ross Douglas, of the National Toy Co., manufacturer of Ragtime Rastus, the "Wireless Pup" and other novelties for the talking machine; Clement Beecroft and Albert E. Long, representing the Long Cabinet Co., who displayed several newer styles of cabinets in their room; S. O. Wade, of Wade & Wade, Chicago, manufacturers of fibre needle cutters, special oils for talking machines and other accessories, Daniel E. Williams, the veteran representative of the Udell Works, Indianapolis, and H. Allen Dalley, sales manager, and Mr. Drum, representing the Unit Construction Co., makers of Unico booths, Philadelphia, Pa.

EXECUTIVE COMMITTEE MEETS

Jobbers' Executives to Confer with Victor Officials—Decide to Affiliate with Chamber of Commerce of U. S. and Appoint Committee

At a meeting of the new executive committee it was decided that the committee go to the Victor factory on Friday to confer with the officials of that company regarding a number of matters of mutual interest and importance.

Following the suggestion made at the annual banquet by L. F. Geissler that the association become affiliated with the Chamber of of the United States it was decided by the executive committee to take such action and twelve members of the association were appointed to secure individual memberships in the Chamber. The twelve members were: E. C. Rauth, Geo. E. Mickel, W. H. Reynalds, J. C. Roush, Perry B. Whitsit, James E. Bowers, Andrew J. McCarthy, Wm. Schmelzer, J. N. Blackman, L. C. Wiswell, R. Wurlitzer, H. A. Winkelman.

BANQUET OF THE JOBBERS' ASSOCIATION

Never in the history of the Jobbers' Association has there ever been a banquet that quite compared in attendance, entertainment and general arrangements with that held on Tuesday evening at the Traymore, which represented the big social event of the convention.

Not the least interesting feature was the appearance of James F. Bowers in his regular role of toastmaster, with his fund of Celtic wit bubbling out in practically every sentence.

The speakers of the evening included Louis F. Geissler, general manager of the Victor Talking Machine Co.; Hon. Edward F. Trefz, of the Chamber of Commerce of the United States; Edwin C. Rauth, the newly elected president; Andrew G. McCarthy, the retiring president of the association, and J. Raymond Bill, of the Talking Machine World.

In his address, as the first speaker, Mr. Geissler told of the wonderful development of the Victor business and of the optimistic outlook for the future and said:

Louis F. Geissler on Victor Expansion

"Mr. President, Mr. Toastmaster, Ladies and Gentlemen—I am again grateful for the honor and pleasure afforded by your kind invitation to another meeting with your association and our friends of the talking machine industry.

"Your conventions are indeed an exceptionally genial gathering of friends rather than competitors; I doubt if there be another national business organization wherein a feeling of such fine fellowship—such general interest and comradeship exists as does within this body of Victor distributers who comprise the National Association of Talking Machine Jobbers of America.

"For years your annual meetings have been looked forward to by your members with anticipatory pleasure—your affairs and relations as between yourselves and with our company have been so tranquil—confidence so complete and mutual, that little of frictional purport has ever darkened the horizon or threatened the harmony of our meetings and conferences; for this the Victor Co. has striven and to the maintenance of this delightful condition our distributers have contributed until this policy of real family intimacy and trust has been created.

"It is our hope that the behavior of our company in its future dealings with your membership will be such as to perpetuate this enviable relationship.

"Your meetings have been honored socially and advantaged by a good attendance and a lively interest upon the part of the ladies of your families—God bless them—what a prosy lot of fellows we would appear on these occasions without them. The debt that we owe them we gratefully acknowledge—they are the incentive for our noblest impulses and greatest ambitions—their intelligent interest in our business affairs, their intuitively good advice in times of crisis, their encouragement and solace in adversity, every real man applauds and we of the talking machine industry are blessed with women who have come up and through with us from the days of smaller and less pretentious things, through the days of experiment, doubt and worry in the industry to these days of prosperity and expansion and the enjoyment of your prosperity is all the more complete because of the happy association of your charming wives and daughters with your accomplishments.

"While I yield to no man any greater respect for the ladies than I possess and, have tried to express, I am not entirely oblivious of the traits of some very importunate business women and at this point a story recently read may be apropos just to show my male friends present what they have missed:

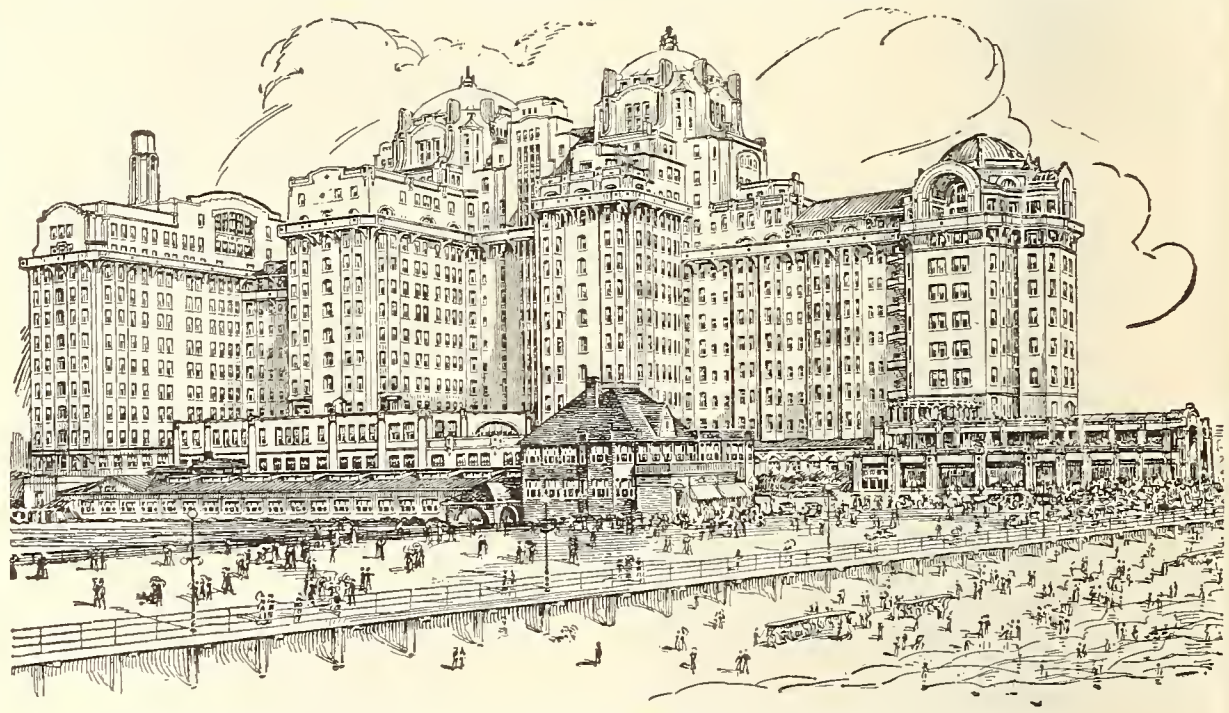
"John D. Rockefeller's friends say that he tells this most frequently: It is the story about the man whose wife had him bluffed and who was obliged to do her bidding. One night she chased him under the bed. He persisted in peeking out from under to see what she was up to. In harsh tones she bade him quit his peeking. Summoning all the courage at his command he declared: 'So long as I've the spirit of a real man, I'll take a little peek!'

"If I have less to say to you all to-night than has been my wont upon similar occasions, it is because to-morrow I hope, the Victor Co. is to have the pleasure of this audience at our program of business talks, whereat more technical affairs will be dealt with and in which we hope your business instincts and acumen will cause you to be much interested.

"The evening concert will assemble such an array of world renowned talent as is possible only for the Victor Co. to gather.

"The artists who are present to entertain you responded to the invitation to appear at your convention with such unfeigned pleasure and with such an exhibition of appreciation for what you have done and are doing for them that the compliment is all the prettier and more enjoyable.

"I will close my remarks by extending to you all, on behalf of the Victor Co., the warmest invitation to be in attendance at our Victor Day at Camden and Philadelphia on Thursday."



Hotel Traymore, Atlantic City, Where Convention and Banquet Were Held

Messrs. Clay and Rauth Speak

Following Mr. Geissler came Philip T. Clay, who made a witty address on general subjects, and who gave way to E. C. Rauth, the newly elected president. Mr. Rauth expressed his belief in short speeches and stated that he would follow that rule, which he accordingly did.

Silent Toast to the Late Col. Bill

Before introducing the next speaker, J. Raymond Bill, of the Talking Machine World, Mr. Bowers paid a glowing tribute to his father, the late Col. Edward Lyman Bill, founder and editor of The World, and called for a standing and silent toast to Col. Bill's memory.

J. Raymond Bill's Remarks

"To my mind the true mission of music is to ennoble and uplift, and I doubt if anything has been a greater factor towards accomplishing this result than has the talking machine. Most musical instruments require years of training to play them, not so the talking machine. That is why its appeal has been so universal, because through it music in all its varieties is open to everyone and anyone. It is the one practical instrument that can introduce musical appreciation on a real and nation-wide scale. As far as hurting the other branches of the music trade—that is impossible—for the more that people become familiar with the great musical compositions the more they will want to play and have their children play pianos and other musical instruments. Talking machines are simply the great stepping stones to a realization of how life improves because of the music which is put into it.

"This Jobbers' Association has not only endeavored to raise the national character of our people through musical appreciation, but it has fought to place the music trade on a basis of healthy profits—profits of a standard sort that admit of great constructive service in the vending of musical instruments, and some day when price maintenance has been established, thanks in great measure to the untiring efforts of the association, the rest of the music trade will be loud in its acclamation of the far sighted policy which you gentlemen have adopted.

"The talking machine has not only brought music into the homes of the masses—has not only happily enriched the men who have made the talking machine business their calling, but it has also left an indelible mark of good nature on the men who have been engaged in the work of spreading music broadcast. Surely if music raises a national character, there is a great deal of satisfaction in furthering its cause. Whether we be manufacturers, jobbers, dealers or journalists, we all unite under the inspiration given by good music, and this inspiration is not without its reflection. It shows in the contented smiles of every person here. Look around you and you will easily see that not only is there no discord in good music, but that the social harmony between the vendors of good music is complete."

Speech of Hon. Edward F. Trefz

The final speaker was E. F. Trefz, who talked on "The Relation of the Chamber of Commerce of the United States to the Business Interests of the Country," and gave the jobbers some new ideas of just what the Chamber is and how it operates for the protection of the business man. He said:

"Business for the past few years has been under a sort of theoretical indictment on the part of our government. Business has been looked upon with suspicion. It started with the fight upon the railroads about fifteen years ago, and while doubtless in the process of rehabilitation, recapitalization and readjustment, there have been some abuses in the conduct of those corporations, we believe the railroads of this country, because of their particular advancement over the railroads of all other countries, have given in the increase of taxable wealth far greater value than they can possibly have taken out of society. . . .

"It is not in the passage of a law but in the inculcation of law that society realizes its surest safeguard.

"Of 62,550 laws passed by various States of the Union during a certain period, as compared with less than 18,000 laws passed in Great Britain during the same space of time, over 54,000 of the laws were designed to control or regulate business in some particular. Other nations have a real excuse for believing that the United States is a nation of thieves after such a showing at lawmaking, and in considering the great number of laws we must consider that the Almighty rules the world, even at present, with only ten laws or commandments."

Mr. Trefz stated that China had the laugh on every other nation of the world, for through the thousands of years she had preserved her integrity and avoided the disintegration that has been the lot of other nations, because of the fact that there is a lack of an abundance of laws. Chinese children are taught only two laws, he stated, one being not to lie and the other not to steal.

Business Men Now a Unit

In coming directly to the work of the Chamber of Commerce Mr. Trefz said that up to the time of the formation of the Chamber, labor and other organizations could lift their voices on national questions as a unit and with power and effect, while the business men could only protest as representatives of special trades and industries and with the accepted appearance of having some ulterior motive against the interests of other business men. Through the Chamber of Commerce, however, the business men of the country can now make themselves heard and respected, for the Chamber includes in its memberships 740 organizations with over 600,000 business men enrolled. He stated that during the past four years the Chamber had sent out about sixteen referenda on national questions in order to get an expression from its members, with the result, in the case of the referendum on the question of laws for the maintenance of retail prices, that the vote was practically seven-eighths in favor of such legislation, with only a two-thirds vote required to put the Chamber on record in favor or against a project.

In closing Mr. Trefz warned the diners that the country was about to pass through its most trying times, not excepting the Civil War period, for with the ending of the war abroad we would be left without a friend and with the other nations joining against us in trade development. Under such conditions the American business man will need all the aid he can get from the Government without being pestered by too many laws, and the National Chamber of Commerce will endeavor to secure that support.

L. F. Geissler's Recommendation

At the conclusion of Mr. Trefz's address General Manager Geissler arose for the second time and strongly advised that the National Association of Talking Machine Jobbers become a member of the Chamber of Commerce of the United States. The Victor Co., as an individual house, has been affiliated with the Chamber for a number of years.

The toastmaster then read a telegram from J. B. Spillane, editor of The Talking Machine World, extending best wishes to the convention and regretting his inability to be present.

Mr. Bowers here made his noted reference to the fact that midnight is the shank of the evening at Atlantic City and thus ended the program, except for the hours of dancing that followed.

The entertainment offered both during and after the dinner was of the unusual sort and was presented by record artists of reputation, who sang the popular songs of the day with a vim. The entertainers included Billy Murray, Arthur Collins, Henry Burr, John Meyer, Byron G. Harlan, Albert Campbell and Vess Ossman, with Theodore Morse, the composer, at the piano.

In all ways the banquet was a notable one, and owing to perfect arrangements, it went off without a hitch.

BANQUET OF THE NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS AT HOTEL TRAYMORE

Speakers' Table—Left to Right: H. A. Winkelman, Wm. J. Staats, E. C. Rauth, Hon. Ed. F. Trefz, Andrew J. McCarthy, Louis F. Geissler, James F. Bowers, Philip T. Clay and J. Raymond Bill

ENJOYABLE TRIP TO THE VICTOR FACTORY AT CAMDEN

Special Train Takes Jobbers and Their Families from Atlantic City to Camden—Luncheon Served in New Administration Building—Theatre Party, Supper and Dance in Evening

The last event of the greatest of all jobbers' conventions was the entertainment provided by the Victor Talking Machine Co., in Camden, on Thursday. The details of carrying the jobbers to the factory from Atlantic City was attended to in true Victor style. Tags were provided for baggage which was sent direct to the Bellevue-Stratford Hotel, Philadelphia, where reservations were made for all the jobbers and their families. At 11 o'clock the entire party took a special train from Atlantic City, arriving in Camden at noon and proceeding at once to the new Administration Building. The change from the breeze-swept boardwalk upon the ocean front to the hot streets of the city was a severe and sudden one, but during an elaborate luncheon served in the cool Auditorium on the eighth floor of the Administration Building, most of the conventionists managed to get back to normal.

Immediately after luncheon the visitors were divided into squads of ten and under the capable guidance of members of the office force, who were qualified to give full and interesting information regarding all the processes observed, and were conducted through many of the most important departments of the factory; through the motor departments, the wonderful machine shops and finally through the immense cabinet factory which, even with its acres of floor space, and 5,500 employes, has been unable to keep up with the demands for the Victrola. Every detail was carefully explained.

At the conclusion of the tour of the factories, the parties returned to the Administration Building, where automobiles were waiting to carry them to the Bellevue-Stratford Hotel, Philadelphia, where each member of the party found a room assigned to him as a guest of the Victor Co.

In the evening the jobbers were entertained by the Victor Co. at a theatre party at Keith's Theatre, where a fine vaudeville bill, interspersed with topical bits aimed at the guests, was enjoyed. The party then returned to the Bellevue-Stratford to enjoy an elaborate after-theatre supper, followed by a dance lasting into the wee sma' hours, held in the Rose and North Garden on the roof of the hotel. It was cool there and this helped in part to make the conventionists forget the heat throughout the day.

On Friday morning there was a general exodus of jobbers to their homes in all sections of the United States, and even Hawaii.

THOSE PRESENT AT THE CONVENTION AND THE BANQUET

Those who registered at convention headquarters included: Gately-Haire Co., Albany, N. Y., J. L. Gately and wife; Elyea-Austell Co., Atlanta, Ga., C. L. Elyea and wife; Talking Machine Co. of Texas, Austin, Tex., T. E. Swann and wife; Cohen & Hughes, Inc., Baltimore, Md., I. Son Cohen and wife, Miss E. Cohen, Charles Jacob and Miss Lowenstein; E. F. Droop & Son, Baltimore, Md., W. C. Roberts; H. R. Eisenbrandt Sons, Baltimore, Md., W. A. Eisenbrandt; Andrews Music House Co., Bangor, Me., M. H. Andrews and W. T. Jordan; Talking Machine Co., Birmingham, Ala., A. R. Boone; Oliver Ditson Co., Boston, Mass., H. A. Winkelman and wife; M. Steinert & Sons Co., Boston, Mass., H. L. Royer and wife.

American Talking Machine Co., Brooklyn, N. Y., R. H. Morris and W. H. Barker; G. T. Williams Co., Brooklyn, G. T. Williams; Neal, Clark & Neal Co., Buffalo, N. Y., W. J. Buehl and wife and O. L. Neal and wife and B. E. Neal; Lyon & Healy, Chicago, L. C. Wiswell, L. V. B. Ridgeway, J. E. Bowers and wife, Mark Healy, W. Roache and R. Smith; Talking Machine Co., Chicago, G. P. Ellis, R. Keith, W. Lockridge and R. Griffith.

Rudolph Wurlitzer Co., Cincinnati, Rudolph Wurlitzer; Rudolph Wurlitzer Co., Chicago, Fred Siemon; Eclipse Musical Co., Cleveland, O., T. H. Towell, P. J. Towell, C. K. Bennett, Ethel Volk and C. Maresh; Perry B. Whitsit Co., Columbus, O., Perry B. Whitsit and wife; W. H. Buescher & Sons Co., Cleveland, O., F. W. Buescher, W. H. Buescher, J. Buescher and F. Smith.

Sanger Bros., Dallas Tex., L. Burchfield, E. Sanger; Knight-Campbell Music Co., Denver, Col., C. H. Arbenz; Mickel Bros. Co., Des Moines, Ia., W. P. Deal; Grinnell Bros., Detroit, Mich., A. A. Grinnell, C. H. Grinnell, G. F. Martin; Elmira Arms Co., Elmira, N. Y., J. W. Butts; Thomas Goggan & Bros., Galveston, Tex., George N. Copely and wife; W. D. Adams, Honolulu, H. I.; Stewart Talking Machine Co., Indianapolis, Ind., Geo. E. Stewart; Florida Talking Machine Co., Jacksonville, Fla., W. M. Dunham, J. J. Logan and wife; George B. Peck Dry Goods Co., Kansas City, Mo., J. F. Ditsell and wife; Schmelzer Arms Co., Kansas City, Mo., C. J. Schmelzer, A. A. Trostler, Miss E. Trostler; Ross P. Curtice Co., Lincoln, Neb., Ross P. Curtiee.

O. K. Houck Piano Co., Memphis, Tenn., J. F. Houck; Badger Talking Machine Co., Milwaukee, Wis., H. Goldsmith; Beckwith & Neill Co., Minneapolis, Minn., E. F. O'Neill and wife; Reynalds Music House, Mobile, Ala., W. H. Reynalds; Price Talking Machine Co., Newark, N. J., M. J. Price and wife, H. S. Price and wife; Philip Werlein, Ltd., New Orleans, La., Parham Werlein; H. Norton, New Haven Conn.; Blackman Talking Machine Co., New York, J. N. Blackman and wife, F. P. Oliver and wife; Emanuel Blout, New York, E. Blout and wife, C. B. Riddle and wife; C. Bruno & Sons, Inc., New York, C. F. Bruno, E. G. Evans; I. Davega, Jr., Inc., New York, I. Davega and wife, Byron R. Forster; S. B. Davega Co., New York, S. B. Davega and D. E. Levey and wife.

Charles H. Ditson & Co., New York, P. E. W. Carlson; J. B. Greenhut Co., New York, N. Goldfinger and wife; Landay Bros., Inc., New York, Max Landay and James Landay; Musical Instrument Sales Co., New York, C. A. Wagner and C. R. Wagner; New York Talking Machine Co., New York; R. W. Morey; Ormes, Inc., New York, Henry E. Smith; Silas E. Pearsall Co., New York, Thomas F. Green and wife; John Wanamaker, New York, L. J. Gerson and wife, A. Russell and wife, I. I. Gerson, H. B. Bertine, George E. Tanner and wife; Nebraska Cycle Co., Omaha, Neb., Geo. E. Mickel.

A. Hospe Co., Omaha, Neb., A. Hospe; Putnam-Page Co., Inc., Peoria, Ill., F. H. Putnam and Roy Page; Louis Buehn, Philadelphia, Pa.; Lit Bros, Philadelphia, Pa., A. A. Sternberger; Penn Phonograph Co., Philadelphia, Pa., Henry Miller and wife, T. W. Barnhill and wife; the Talking Machine Co., Philadelphia, Pa., Henry A. Ellis and wife; W. F. Frederick Piano Co., Pittsburgh, Pa., French Nestor, M. Max, D. Gara and G. S. Hards; H. A. Weymann & Son, Inc., Philadelphia, Pa., A. G. Weymann and wife, W. A. Weymann and wife, H. W. Weymann and wife, G. W. Carroll and wife, G. W. Huver and wife.

C. C. Mellor Co., Pittsburgh, Pa., J. Fisher, T. T. Evans and W. C. Dierks; Standard Talking Machine Co., Pittsburgh, Pa., J. C. Roush, L. L. Roush, L. C. Mountcastle, Marie Lightner; Cressy & Allen, Inc., Portland, Me., C. R. Cressey, C. B. Snow, R. L. Wentworth; J. Samuels & Bros., Providence, R. I., J. R. Fales; the Corley Co., Richmond, Va., J. G. Corley, F. W. Corley, F. R. Kessnich, H. C. Lukhard and Florence Biscoe.

Sherman, Clay & Co., San Francisco, Cal., A. G. McCarthy, Philip T. Clay; W. Gus Haenschen, St. Louis, Mo.; Koerber-Brenner Co., St. Louis, Mo., E. C. Rauth, R. F. Ott and wife; W. J. Dyer & Bros., St. Paul, Minn., Geo. A. Mairs; W. D. Andrews Co., Syracuse, N. Y., R. L. Andrews; the Whitney & Currier Co., Toledo, O., W. H. Parmenter; F. G. Loeffler, Union Hill, N. J.; R. C. Rogers Co., Washington, D. C., R. C. Rogers and wife; E. F. Droop & Sons Co., Washington, D. C., Carl A. Droop and C. L. Howser; Frederick Loeser & Co., Brooklyn, E. Paul Hamilton and wife.

LADIES ENJOY THEATRE PARTY

Auto Trip Postponed on Account of Rain But Ladies See Good Vaudeville Show

Owing to rain the automobile trip arranged for the entertainment of the ladies on Monday afternoon was cancelled, and through quick action, blocks of seats were secured at Keith's Theatre, where about fifty ladies saw a vaudeville show headed by Billie Taylor and Stella Mayhew, and including Sunshine and Tempest, as guests of the Victor Co. The ladies making up the party included:

Miss F. Biscoe, Richmond, Va.; Mrs. R. C. Rogers, Washington, D. C.; Mrs. H. L. Rogers, Baltimore, Md.; Mrs. H. A. Ellis, Philadelphia, Pa.; Mrs. John F. Ditzel, Kansas City, Mo.; Mrs. E. F. O'Neill, Minneapolis, Minn.; Mrs. M. G. Price, Newark, N. J.; Mrs. H. S. Priee, Brooklyn, N. Y.; Mrs. J. N. Blackman, East Orange, N. J.; Mrs. F. P. Oliver, Brooklyn; Mrs. I. Davega, New York; Mrs. N. Goldfinger, New York; Mrs. T. F. Green, New Rochelle, N. Y.; Mrs. L. J. Gerson, New York; Mrs. T. W. Barnhill, Philadelphia, Pa.; Mrs. H. P. Miller, Philadelphia, Pa.; Mrs. J. L. Gately, Albany, N. Y.; Mrs. I. S. Cohen and Miss Cohen, Baltimore, Md.; Mrs. H. A. Winkelman, Boston, Mass.; Mrs. O. L. Neill, Buffalo, N. Y.; Mrs. James F. Bowers, Chicago, Ill.; Mrs. P. B. Whitsit, Columbus, O.; Mrs. G. H. Copley, Galveston, Tex.; Miss Lightner, Pittsburgh; Mrs. F. K. Dolbeer, Miss Edna Dolbeer, Miss Ruth Dolbeer, Moorestown, N. J.

AUTO RIDE FOR THE LADIES

Taken on Tour of Atlantic City and Suburbs on Tuesday Afternoon

The automobile trip for the ladies, which was scheduled for Monday afternoon but postponed on account of rain, was given on Tuesday afternoon while the jobbers were in session. The ladies, to the number of forty or more, in ten

Start of Ladies' Auto Trip

cars toured Atlantic City and suburbs for an hour or more before returning to the hotel. Lester Burehfield and Parham Werlein did the honors in Chesterfieldian fashion.

PERCY S. FOSTER A VISITOR

Among those interested in the doings of the Talking Machine Jobbers' Association was Percy S. Foster, secretary of the National Association of Piano Merchants, with which organization several of the jobbers are affiliated. Mr. Foster with Mrs. Foster came to Atlantic City with the close of the piano conventions in New York on June 24 and have been here ever since.

GRIST FROM THE JOBBERS' CONVENTION MILL

Although the convention opened officially on Monday, a majority of the delegates arrived in Atlantic City on Sunday to take advantage of the extra day as a sort of holiday, and some of them even showed up on Saturday, because they knew there was a good time awaiting them and they wanted to get all the enjoyment possible out of it.

The interest aroused by the educational features of the convention program was emphasized by the delegations that represented certain of the jobbers. As many as six representatives of a single house was not an unusual number, the managers bringing their associates and assistants in order that they might gather as much information as possible regarding the Victor line to aid them in the development of the business.

The ladies as usual were very much in evidence for the jobbers' convention is noted for its resemblance to a big family party. While their men folk were in session the ladies were liberally entertained, being given a theatre party at Keith's on Monday afternoon and a trip around Atlantic City in automobiles on Tuesday. In addition they enjoyed the bathing in the morning, and passed the midnight hour with gay parties in the evening.

The banquet menu contained the startling information that with the Aiguillettes de Sea Bass Bonne Femme there would be served "Saturn" in place of the usual sauterne. This may have been the reason why some of those present declared that they later discovered several new planets in the midnight sky.

Realizing the inclination of the jobbers and their friends to burst into song at the slightest excuse, those in charge of the preparation of the program wisely devoted seven of its twelve pages to the printing of the words of a number of the popular songs, on the theory perhaps that when the jobbers were singing they might as well sing them properly.

A feature of the program which particularly appealed to the talking machine men was the opportunity offered to met personally a large number of prominent artists whose records they have been handling from various periods. Not only did such stars as McCormack, De-Gogorza, Werrenrath, Zimbalist and Alma Gluck appear in person before the jobbers, but the singers and players of popular songs, such as Campbell, Burr, Collins and Harlan, Teddy Morse, Billy Murray were also present in the flesh, to prove how really good they could sing.

Some few of the conventionists—a very few—did not seize the opportunity for mingling with the briny, but that fact did not keep them off the beach at bathing time, for some of the costumes of the women bathers reminded one of the heavy dressing of the Ziegfeld Follies, and proved a decided attraction.

Sunday night bathing was a feature of this year's convention. Many were parading on the Boardwalk and got caught in a good gallon-sized rain storm, which added to the sundry cash accounts of bushelmen. P. S.—What is a bushelman? Ask Louis Buehn, he don't know.

Conversation drifted to sharks at one stage of the game, for only recently two bathers off the Jersey coast were killed by them. This did not stop many from getting wet, although the good swimmers were not seen beyond the line of breakers.

It goes without saying that two men were very much missed—the late Col. Edward Lyman Bill, and O. K. Houck, who is convalescing from a serious illness.

A question puzzles those interested in sea food, and that is why so many distributers take clam broth for breakfast? Clam broth as a food is a fine drink, its action being of a lateral cut type.

Henry Winkelman, Oliver Ditson Co., Boston—Henry, as everyone calls him—is living on a farm in Acton, Mass., where the activities of such things as cabbage, turnip, lettuce, watermelon, beet, parsnip, potato, mean much. Or it might be termed: The action of vegetables at Henry's Acton farm.

The Traymore management might have made a hit by serving finger bowls with turntables, for it was particularly noticeable that empty cabinet finger bowls were not used by anyone—not one—except ———. "What I know about finger bowls," by E. G. Evans.

Talking about speed records, the Bruno party from New York motored down to the Traymore is five and one-half hours, running time, the distance being 150 miles, or an average of about twenty-eight miles the hour, which is traveling. Chas. F. Bruno, in whose Pierce-Arrow car the party journeyed, and E. G. Evans, the Bruno Victor representative, alternated in driving and at a few stages of the run the speedometer registered "60."

W. H. Reynalds, from Mobile, was unable to get in touch with his headquarters owing to the hurricane, but eventually landed a wire through. At this writing he wasn't able to discover if any damage was done to his property.

Monday morning loomed dark and cloudy, the chief topic of conversation being about the German submarine that came through from Germany with a cargo of dyestuffs. John L. Gately, president of the Gately-Haire Co., Albany, N. Y., ventured the opinion that it was more difficult to kill Chinamen with automobile than to cross the ocean in a submarine. He has tried and he knows.

Although the submarine landed at Baltimore, I. Son Cohen, of Cohen & Hughes, protested that he had nothing to do with it, and as evidence, offered the fact that he registered Sunday night. "All my submarines go out through the shipping room," added Mr. Cohen.

Although the convention this year was held at the Hotel Traymore, one of Atlantic City's newest and most palatial hostelries, a number of the jobbers and their families did not forego a visit to the old headquarters at the Chalfonte, where the convention was held for several years. The quietness of the lobby at that hotel was quite in contrast to the excitement rampant at the Traymore.

Was the "Angel Chorus" present? You can just bet it was, in full voice and under competent leadership. In the various resorts along the Boardwalk and at the banquet the chorus had plenty of opportunity to tell just what they thought of certain members of the association, all of it good.

One of the committeemen who came in for high praise was A. A. Trostler of the Schmelzer Arms Co., who as chairman of the arrangements committee, laid the plans for the convention. That the program went off without a hitch was proof of the thought and care that had been given to its preparation, and Mr. Trostler and his associates on the committee were deserving of all the commendation that came their way.

The motto of the conventioners traveling from the West on the special was "Down with liquor," and the result was that when the train reached the convention city there were left only six bottles of White Rock, a couple of bottles of ginger ale and a half bottle of cocktails. And Sunday is dry at Atlantic City.

The publicity bureau of the Hotel Traymore is a busy place with the result that the jobbers got more advertising in the daily papers than has been the case at any previous convention. The fact that grand opera artists of international fame were to sing for the jobbers at the banquet and at the recital on Wednesday evening, through the courtesy of the Victor Co., was made the basis of some excellent publicity stuff that appeared in several of the New York, Philadelphia and Atlantic City papers.

Coming with the rain on Monday were Max Landay and James Landay, of New York, who added rays of sunshine to the conventioners.

"Safety First" came in for a great deal of discussion, this movement being one of prime interest to the guests.

The charter members of the Ancient and Effervescent Order of the Yellow Dog were all present, although Big Mastiff O. K. Houck was missing. A meeting was held in the kennel.

Plus a bunch of new expressions and a new (?) pair of white pants, Thos. F. Green, general manager of the Silas E. Pearsall Co., New York, was about the corridors, main floor, basement and mezzanine.

Genial Frank K. Dolbeer, the host of hosts, welcomed everyone in his usual cheery manner and no one was overlooked in the good things.

Sure there was a honeymoon couple at the convention. Just before leaving for Atlantic City, R. E. W. Carlson, manager of the Victrola department of the Chas. H. Ditson Co., New York, married Miss Judith Kerberg, of that city, and brought her to the convention with him.

In the midst of the convention festivities Roy Keith, W. Lockridge and Wm. Griffith, of the Chicago Talking Machine Co., answered duty's call and left for the training camp at Plattsburgh, N. Y., to take a month's course in military instruction. They got a great send off from the jobbers.

The first peek of sunshine since Sunday served to brighten things on Tuesday morning, with the result that there was a grand rush for the bathing beaches by all hands. Bathing in the rain did not appear to have much charm for the majority of the conventioners who wanted something to warm them when they came from the water.

The reports of a man-eating shark which has killed two men within the past fortnight near Jersey beaches, did not appear to worry the talking machine men who took their dips in the briny early and often. As one thin jobber remarked the shark would only grab him if he needed a toothpick after eating a fat man.

The Western delegation to the convention displayed their usual penchant of traveling in style by coming to Atlantic City in a special car attached to the Manhattan Limited, one of the best trains over the Pennsylvania line. The Westerners left Chicago on Saturday morning and arrived in Atlantic City Sunday in plenty of time to be present at the begin-

(*Continued on page 50d*)

GRIST FROM THE JOBBERS' CONVENTION MILL—(Continued from page 50c)

ning of things. Those who came from Chicago included Jas. F. Bowers, secretary, Marquette A. Healy, vice-president and general manager, and L. C. Wiswell, manager of the talking machine department, W. C. Roche and L. V. B. Ridgeway, Lyon & Healy; Roy J. Keith and Geo. P. Ellis, of the Chicago Talking Machine Co.; A. Hospe, of A. Hospe & Co., Omaha; Lester Burchfield, of Sanger Bros., Dallas, Tex.; Mr. and Mrs. S. O. Wade, of Wade & Wade, Chicago; G. A. Mairs, of W. J. Dyer & Bro., St. Paul; Fred A. Siemon, of the Rudolph Wurlitzer Co., Chicago; G. F. Ruez and S. Goldsmith, of the Badger Talking Machine Co., Milwaukee; E. C. Rauth, of the Koerber-Brenner Co., St. Louis, and Roy Page and F. H. Putnam, Putnam-Page Co., Peoria, Ill.; Parman Werlein, of Philip Werlein, Ltd., New Orleans, La.

When the train reached Pittsburgh another special talking machine men's car was attached, containing Dan J. Nolan, of the May Co., Cleveland; T. H. and P. J. Towell, of the Eclipse Musical Co., Cleveland; I. H. Buescher, F. W. Buescher, W. H. Buescher and Grant Smith, of the W. H. Buescher Co., of Cleveland; J. C. Roush, C. A. Bruce and L. C. Mountcastle, of the Standard Talking Machine Co., Pittsburgh; W. F. Frederick, F. Nestor and G. S. Hards, of the W. F. Frederick Piano Co.; J.Fischer, E. F. Evans and W. C. Dierks, of the C. C. Mellor Co., Pittsburgh; Mr. and Mrs. Max, of the Kaufmann Bros., Department Store, Pittsburgh. It was a gay party that rolled in from the West to Atlantic City.

ANNOUNCE FIRST OUTING

John Y. Shepard, chairman of the entertainment committee of The Talking Machine Men, has announced that the first outing of this association will be held on August 16, at Rye Beach. Carry-alls will convey dealers and their friends to this beach at 10 a. m. and 2 p. m. Invitations are being sent out to the dealers and a large attendance is expected.

PROVES THE WORLD'S SUPREMACY

Only Full and Complete Report of Convention Proceedings Found in This Issue of the Official Journal of the Trade

The absolute and unqualified supremacy of The Talking Machine World in the handling of all news features connected with the talking machine trade has never been more clearly demonstrated than in connection with the convention at Atlantic City. Reaching its readers on regular schedule, The World will be found to contain the only full and complete report of the convention proceedings from the opening session to the closing entertainment, livened with a series of characteristic snap-shots, taken especially for this paper—a full report of the happenings that will reach the desks of the convention delegates, in many cases, before they themselves return to their homes.

The first complete program of the convention proceedings, the first advertisement, designed by The World copy department, and the only complete report of the convention, simply reflects World service during a decade and more. That is why The World is the only recognized talking machine paper, is read by thousands the world over, and was referred to by President McCarthy in his official report as "the official journal of our trade."

ELECT OFFICERS IN MINNEAPOLIS

At the annual dinner and meeting of the Associated Talking Machine Dealers of Minneapolis, held on June 17, Archie Matheis, of the Talking Machine Co., was elected president; D. C. Prestion, of the L. S. Dolandson Co., vice-president, and Blanche I. Saunders, of the Metropolitan Music Co., secretary-treasurer.

PATHEPHONE DISTRIBUTERS' CO.

The Pathephone Distributers' Co., of New York, Inc., was granted a certificate of incorporation on Saturday by the Secretary of State, Albany, N. Y., to engage in the talking machine and musical instrument business. This concern, which will act as a distributer of the products of the Pathé Frères Phonograph Co., New York, has a capital of $50,000, and the incorporators are H. A., E. I. and L. Ricca, New York. The concern takes over the Peerless Phonograph Co.

The baseball nines representing the G. T. Williams Co., Brooklyn, N. Y., and the Blackman Talking Machine Co., New York, Victor distributers, met in a "battle royal" Saturday on a diamond at Avenue H and Ocean avenue, Brooklyn, N. Y., and the G. T. Williams Co. emerged victorious, being on the long end of an 18 to 16 score.

STEINWAY TO HANDLE CLAYOLA

Branch Stores of Steinway & Sons to Carry New Talking Machine

CINCINNATI, O., July 8.—R. E. Wells, general manager of the Middle West store of Steinway & Sons, while in the East last week closed arrangements whereby all the Steinway stores in this territory will handle a new talking machine which is known as the "Clayola." The stores to handle this machine are located in Cincinnati, Columbus, Dayton, Indianapolis and Louisville. It is also understood that N. Stetson & Co. in Philadelphia, will carry the "Clayola."

This new machine contains many new improvements and perfections which were developed by George Clay Cox, of the house of J. W. Martin & Bro., Rochester, N. Y., well-known piano concern, which incidentally has handled the Steinway piano for a number of years. The "Clayola" will be marketed in a number of finishes and styles, electrically operated to retail at $150 up.

* * * *

In connection with the above announcement, it was also mentioned that Steinway & Sons, New York, would handle the "Clayola." This statement, however, has been definitely denied at Steinway Hall, there being no thought in the minds of the Steinway directorate regarding the installation of any talking machine at the Steinway headquarters in this city.

JACK WELKER WITH I. EACUTT

FILES BANKRUPTCY PETITION

The Albany Edison Diamond Disc Studio, Inc., of Utica, N. Y., has filed a petition in bankruptcy, showing liabilities of $44,000 and assets of $35,000. The concern engaged in retailing talking machines and records.

GRAPHOPHONE SHARES IN THE GLORY

A Columbia graphophone was part of the equipment of the German submarine "Deutschland" which arrived in Baltimore this week after a trip across the Atlantic which will make history. This Columbia machine figured prominently in the day's news, as Capt. Koenig referred to it frequently in his narrative as being well-nigh indispensable to the officers and the crew in their efforts to amuse themselves on their long journey.

SERIES OF HEBREW RECORDS

The Emerson Phonograph Co. will place on the market in the near future a series of Hebrew records of popular Hebrew melodies, with organ accompaniments, by the Rev. Meyer Kenewsky, the well-known Cantor, which will mark a departure from the usual type of moderate-priced record. R. D. Wyckoff, vice-president and general manager of the company is enthusiastic regarding the new Emerson supplements which contain records by several well-known artists, including Henry Burr, Manuel Romaine, Arthur Collins, Sam Ash, the leading tenor of "Rackety Coo;" Grace Nash and others, who sing some of the most popular hits of the day.

SOME STRIKING PUBLICITY

The Victor Co. carried in last week's Saturday Evening Post, one of the finest two-page advertisements which has appeared in this medium for quite some time. The feature of this copy was the fact that only six words were used, these being "A Summer's Night and the Victrola." As the Victor Co. mentioned in a letter accompanying the proof of this advertisement which was sent to each dealer, $12,000 for six words is worth more than passing attention. The illustration for this advertisement was a splendid example of modern printing and lithographic art, for the dancing figures were remarkably true to life and unusually clear and distinct.

NEW STORE IN PORTLAND, ME.

PORTLAND, ME., July 11.—A new talking machine store was added to this city's quota yesterday when Wallace L. Currier opened the doors of his new Phonograph Shop in the Masonic Temple. This store will handle the Edison Diamond Disc line exclusively. Mr. Currier was formerly connected with the M. Steinert & Sons Co, Boston, and Chickering & Sons, Boston, Mass., and is thoroughly familiar with the sales possibilities of the Edison Diamond Disc line.

NEW MAGNOLA IMPROVEMENTS

Some Changes of Importance Made in the Latest Magnola Styles of Talking Machines Which Are Essential and Valuable

CHICAGO, ILL., July 11.—The Magnola Talking Machine Co., of this city, which is a subsidiary of the old established piano manufacturing house of the M. Schulz Co., have been having a really excellent demand for their Magnola talking machine and have placed a number of desirable agencies. A change has been made in the Magnola which promises to still further enhance its general excellence both in regard to appearance and tonal quality. The tone deflecting feature of the Magnola has been changed somewhat in design, and the grill work concealing the tone chamber will be done away with and a drop door substituted. When open this door forms a shelf on which records may be placed. It also, it is stated, serves as an auxiliary to the tone deflection system. This change has already been made in the Queen Anne style, a one hundred dollar machine, and will be incorporated in the entire line.

MAKING DISPLAY AT GRAND RAPIDS

The Empire Talking Machine Co. Showing Their Full Line of Talking Machines at the Grand Rapids Furniture Exposition

CHICAGO, ILL., July 10.—The Empire Talking Machine Co. are showing their complete line of models, ranging from $25.00 to $200.00, at the Grand Rapids Furniture Exposition, on the fourth floor of the Klingman building. A sound proof demonstrating room has been installed and shows off the models to splendid advantage and enables the salesmen to demonstrate their splendid tone quality in a way that is winning unstinted praise from the dealers who have visited the exhibition. A great many new accounts have been opened up with high-class dealers during the present fall season.

H. C. Shea, formerly sales manager of the Pathephone Co., of Detroit, is in charge of the Empire exhibition at Grand Rapids during the furniture exhibition, and at the close of the exhibition, August 1st, will take charge of the Empire sales in Chicago and adjacent territory. Mr. Shea is thoroughly posted on all phases of the talking machine business and will be in position to give Empire dealers splendid service and assistance.

The Empire catalog is well on the way and will be mailed to dealers during the present month, and it promises to be an innovation in talking machine catalogs. In addition there will be a very attractive, sixteen page booklet, illustrating all Empire models in natural colors and telling a heart interest story entitled "Dorothy Decides." These booklets will be furnished to Empire dealers in quantities so that they can send them out to their prospective customers. The Empire window signs are making their appearance on many attractive store fronts throughout the country, while the Empire lantern slides are effective advertising factors.

OPEN MANY NEW ACCOUNTS

ST. LOUIS, MO., July 6.—J. P. Fitzgerald, president of the Mozart Talking Machine Co., 1432 North Twentieth street, states that the company has opened a number of important accounts during the past few weeks which will necessitate a material increase in its output. The Style "A" Mozart machine, a cabinet model, retailing at $55, has been achieving unusual success, the orders for this instrument exceeding all expectations.

MUSIC STORES
MAKE LARGE EXTRA PROFITS
WITH THIS BEAUTIFUL

Playerphone
The QUALITY TALKING MACHINE

The Quality Talking Machine

$1000 to $5000 Extra Profits Yearly

Everywhere high-class music stores are handling Playerphones in conjunction with their regular business. People are demanding high-grade cabinet talking machines. There are no finer instruments built than Playerphones, and the Playerphone has the added advantage of playing *all* disc records as well or better than the instruments for which the records were made. The adjustment of the sapphire ball, Jewel point, steel or fiber needle, as the case may be, and just a slight turn of the wonderfully balanced full curve tone arm does it.

Exclusive Features—100% Profit

These and many other exclusive features make the Playerphone the most popular talking machine on the market and the easiest to sell. Our terms are so liberal that you make about 100 per cent. profit on every sale, and our time payment plan to you permits you to get your profit without having to tie up any money or incur any risk. From the way most music stores are selling Playerphones, you should make from $1,000 to $5,000 extra profit a year, handling the Playerphone.

The Price is Irresistible

That is another wonderful feature of Playerphones. While they are the utmost in talking machine construction, very highly finished in mahogany or oak, the prices of the seven sizes range from $50 to only $225. Each one of these Playerphones compares with, and in most cases is, mechanically, musically and artistically, better than instruments selling at from $75 to $400.

The complete line of Playerphones is superior in every way. They give you an opportunity for big profit and prestige you can't afford to miss. Come to Chicago and let us demonstrate the Playerphone to you. If you decide to handle our line, your traveling expenses will be refunded. If you can't come, fill out this coupon and mail it *to-day—sure!*

Columbia Records TRADE MARK Note the Notes

SUCCESS WITH SONORA IN TEXAS

De Loache Phonograph Corp., of Dallas, Tex., Establishes Many High-Class Dealers in That State—Handsome Retail Quarters

DALLAS, TEX., July 5.—One of the most notable successes of the talking machine field in this

Section of Main Floor of De Loache Store

section of the country has been that scored by the De Loache Phonograph Corp., of this city, which was organized about six months ago for the purpose of handling the Sonora phonograph as distributers throughout the State of Texas, and conducting a retail establishment for the sale of the Sonora in this city. The company was incorporated early in the year with a capital stock of $10,000, the incorporators being Ira P. De Loache, who is president of the concern, B. W. Carrington and D. W. Marshall.

Since entering the local field, the new concern has established a number of new high-

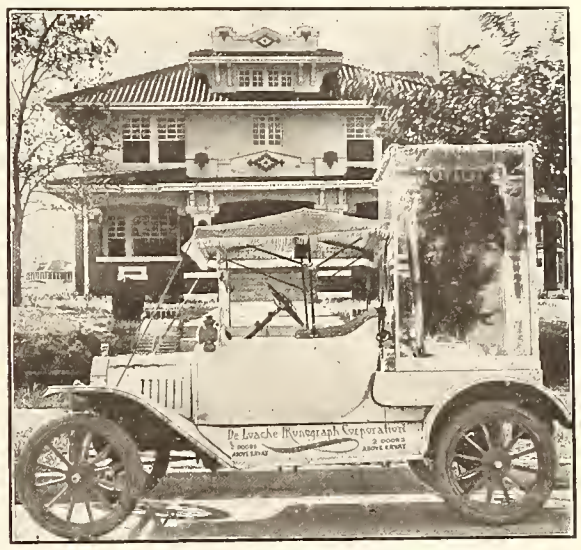
Corner of the Mezzanine Floor

class dealers in many Texas cities and its activities has been limited largely to the amount of stock obtained from the Sonora factory. The line has been featured in a dignified manner befitting its character and an effective publicity has been particularly noticeable in the quality of the retail business that has been developed. For its headquarters in this city, the De Loache Phonograph Corp. occupies a large building running from 1708 Elm street to 1707 Live Oak street, the store being elaborately fitted up to meet the requirements of the business.

On the main floor there are provided a number of soundproof rooms for the demonstration of machines, all finished in white, and there has been fitted up on the mezzanine floor, over the booths, a handsomely furnished reception room, illustrated herewith, where visiting dealers and retail customers may be entertained.

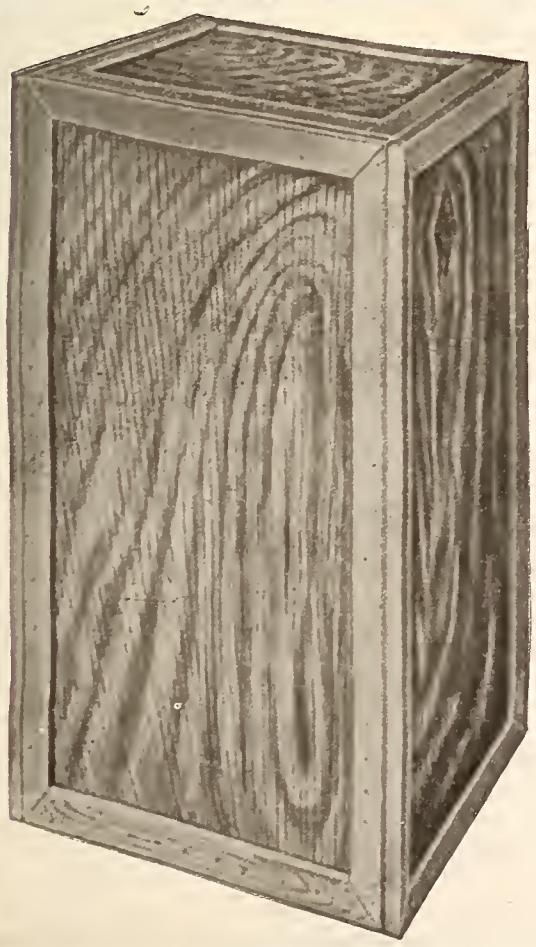
A particularly interesting and original feature of the retail service of the company is the manner in which machines are delivered. A special automobile is provided for the purpose with the permanent square glass case attached to the rear of the body. The case will hold the largest size of Sonora machine and as the instrument is being taken to the home of the customer it makes a very effective advertisement for the company. The automobile is finished in white with the name of the company in gold on the sides, and makes a most imposing appearance.

The De Loache Corporation reports that the bulk of the demand thus far has been for the



The Novel Delivery Auto

higher-priced machines, and that at times it has been difficult to obtain a suitable stock for the more expensive type of instruments.



The Practical Packing Case
for
Talking Machines and Cabinets
is the
Re-enforced Three-Ply Veneer Case

Strength:
Fully equal to 7/8 lumber.

Weight:
About 60 per cent of lumber case.

Tightness:
Sides, Tops and Ends are each one piece, making a practically dust proof and water tight case.

Appearance:
Much neater than any other type of case.

Proof:
The largest manufacturers of talking machines use this case exclusively.

If you will advise sizes of your packing cases, inside dimensions, we will send, without charge, a case to test out. We will consider it a favor to be allowed to send sample.

EMPIRE MANUFACTURING CO.
GOLDSBORO, N. C.

JOHN STEPLER RESIGNS

John Stepler, foreman of the night shift automatic screw machine department of the American Graphophone Co. (Columbia factories), Bridgeport, Conn., resigned from this position last Saturday following the advice of his physician to take a complete rest. As a token of their regard the men of the department met in the parlor of the Howard Avenue Hotel, to which place Mr. Stepler was decoyed, and presented him with a beautiful diamond stick pin.

FULL PAY FOR ENLISTED MEN

WEST ORANGE, N. J., June 26.—Thos. A. Edison, Inc., announced last week that all employes in the works who are enlisted in the National Guard, or who enlist now, will receive full pay during the time that they may be called away for active service, and that their positions will be held open for them until their return.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., July 10.—Although naturally, in connection with the preceding months, June showed something of the falling off due to the intervention of the traditionally dull summer season, it still made a better showing relatively as well in amount of business than last year. Dealers have become so accustomed to the chronic shortage of goods that they are doing everything in their power to keep their stocks up and are also placing advance orders for fall trade earlier than ever. Local jobbers say that June was either the biggest or one of the biggest Junes they ever had, and that July bids fair to make a similar record.

Local retail trade is reported as making an excellent showing considering the season, and all told the situation is one conducive to the much to be desired contented frame of mind.

Ely Covers Chicago Loop

F. F. Dawson resigned a week ago as wholesale "loop" salesman for the Chicago office of the Columbia Graphophone Co., and will engage in another line of business.

C. R. Ely, formerly traveling from the East for the Columbia Co., but who has lately been doing promotion work for this office, will now devote his distinguished talents to boosting Columbia sales and landing new accounts in the downtown business district. Mr. Ely is admirably equipped for the job.

E. A. McMurty, manager of the Kansas City branch of the Columbia Graphophone Co., was in Chicago this week conferring with District Manager Yerkes. He was able to report conditions as excellent in his territory and said that owing to the splendid crop conditions everybody in Kansas was looking for an unusually prosperous and satisfactory fall trade in that State.

E. B. Slidell, manager of the Dallas, Tex., branch of the Columbia Graphophone Co., also spent a few days in Chicago this week. Mr. Slidell has the entire State of Texas under his care and keeps two men busy besides making frequent trips among the dealers himself. With an 81 per cent. normal cotton crop and ten thousand addition acres planted, business should be good in Texas. In fact the last fiscal year was way ahead of any previous one in the history of the Dallas house.

Good Fourth Display

A Wabash avenue piano store had for the patriotic feature of their Victor window a framed copy of a steel engraving of the signing of the Declaration of Independence, and beneath it was this legend: "Write your declaration of musical independence by placing a Victor in your home."

C. T. M. Co.'s "Movie" Service

The Chicago Talking Machine Co. has added another to its many service triumphs for dealers. This concern has had prepared for them a series of specially adaptable and timely motion picture films, fixing the attention of the people who see them upon the wonderful possibilities of the Victrola as the ideal home entertainer, and practically conveying the idea that the store of the dealer using the service furnishes the instrument that will bring the world's greatest artists into the home. These films last just long enough to fix the idea in the minds of the audience in a graphic manner, but are not long enough to weary the beholder. The company call attention to the fact that 13,000,000 people attend movies daily and that every talking machine dealer should cover his part of this tremendous field and take advantage of the unlimited opportunities at his disposal.

The first film is now ready for distribution. Briefly, its scenario is as follows: Start of reel shows a Victrola XVI with doors closed. Doors of record compartment fly open and several records come out of the albums. Records flit across the film and take their position in a row at top of the picture. Records then explode, changing into photographic reproductions of Victor artists, such as Caruso, Gluck, McCormack and Lauder. There are letters to form the following words, which then take their position, one at a time, under the artists' pictures, "The World's Greatest Artists Make Records for the Victrola." Then follows the dealer's name and address.

To prepare an individual film of this sort would cost the dealer from $30 to $50, but by contracting for a large number of them the company is able to offer the service for the small sum of $5.50. All that the company asks in order to demonstrate the force of this advertising proposition is that dealers arrange now to exhibit this film at their local motion picture theatre. As said before, a special service has been prepared and as the films are issued from time to time they will all prove just as forceful in attracting attention to Victor goods and to the dealer handling them as the first.

Six Best Sellers

The six best Columbia sellers this month were: "The Murray Walk" and "The Girl on the Magazine"; "Southern Roses" and "Wine, Woman and Song"; "Star Spangled Banner" and "Columbia the Gem of the Ocean"; "Amer-

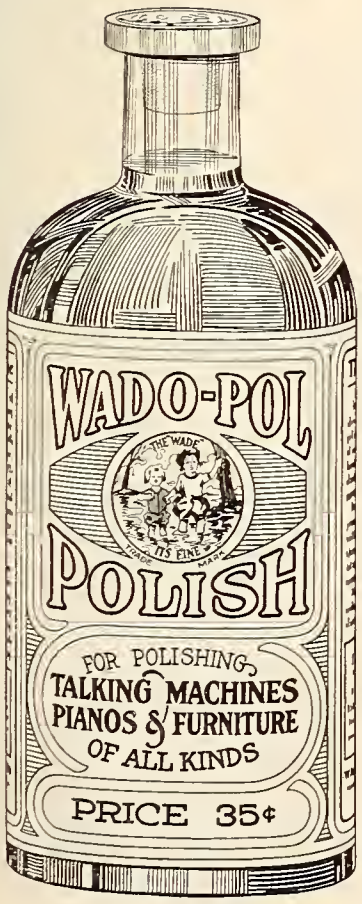
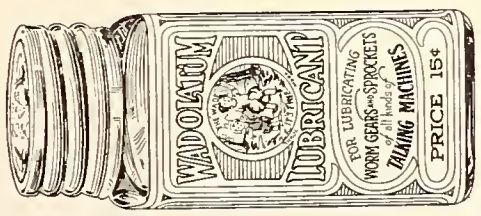
Wade & Wade Accessories For Talking Machines



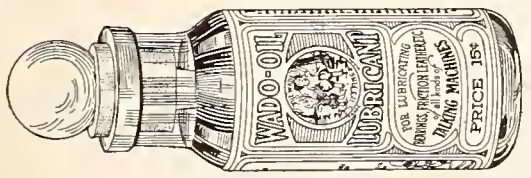
The **Wade Polish** leaves a perfectly dry, hard, glossy finish.



This is the **Grease** for the spur gears and worm gears, and eliminates the gritting and grinding noise.

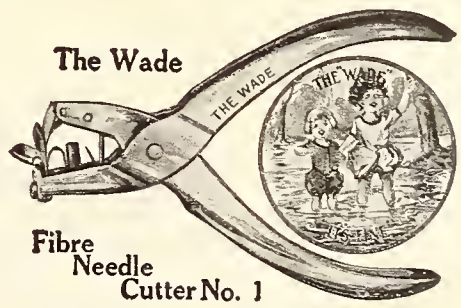
We also manufacture a light grease to be used in spring barrels to prevent the springs from sticking and relcasing irregularly. This grease does not get hard or dry out.

Further information upon application.

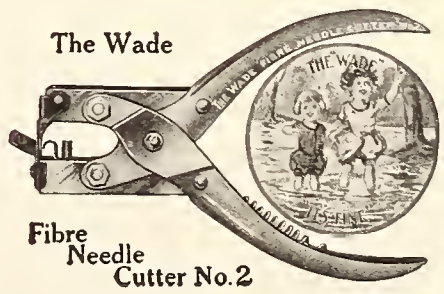


Notice the Patent Dropper

This is the **Oil** for close-fitting bearings on Talking Machines, typewriters, or any other fine machines.



The New Improved No. 1 Wade Fibre Needle Cutter in which the upper and lower blades work parallel to each other.



The No 2 Wade Cutter is still as popular as ever and the demand for them steadily increases.

Get your orders in at once for Wade Accessories

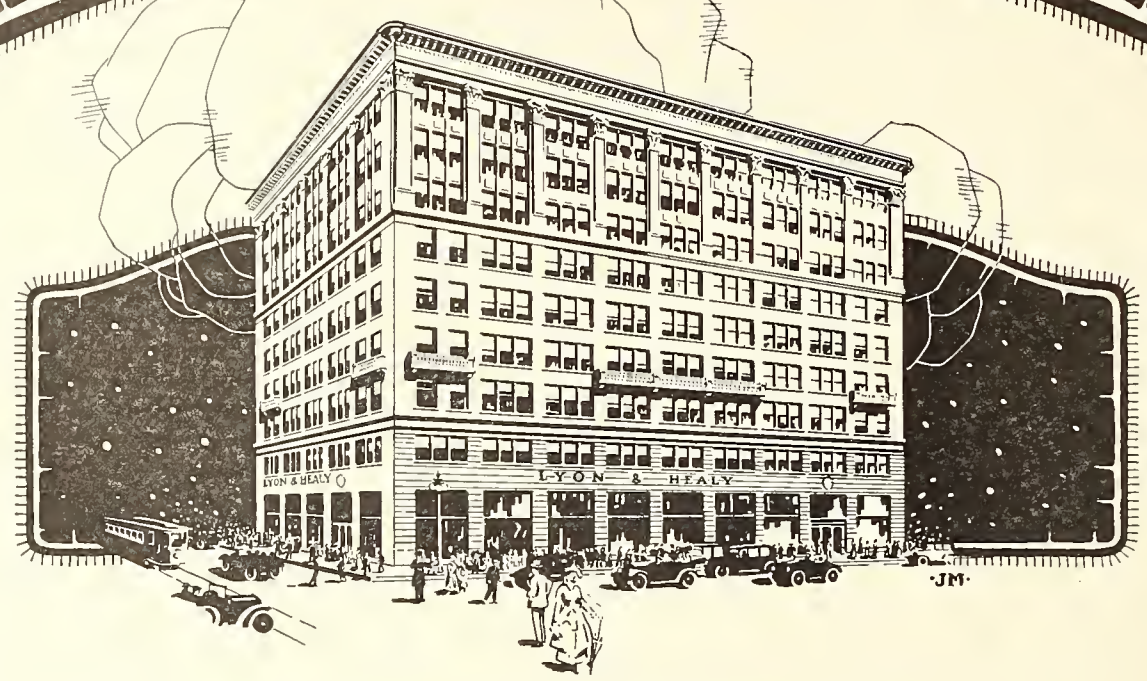
WADE & WADE, 3807 Lake Park Ave., Chicago, Ill.



You *get SERVICE* from this

HALF-MILLION RECORD STOCK

Housed in this building is the largest and most accessible jobbing stock of Victor Records in the World!

It is complete.
It is up to date.
It will eliminate back orders for you.

The Service it enables you to give your customers will help you to *dominate* in the Victrola business of your locality.

Our specialty is *speed* in filling orders *complete*. Save freight and express charges by ordering your Victrola supplies, and other musical merchandise from one house and having them all forwarded together.

LYON & HEALY

Victor Record and Victrola Distributors
CHICAGO

This illustration shows a small section of our record stock-room; you can just see the end of the second row of shelves in the picture.

These shelves hold the "live" stock, which is "moving." This supply is kept up constantly. Reserve bins carry the extra supply. This half million stock means complete shipments.

This room was planned so as to assure speedy shipments. All orders are shipped the day they are received.

The records are taken from these shelves by the order fillers, to the packing bench, and are then dropped through the parcel chute direct to auto-trucks, thus quickly starting on their journey to you.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 57)

ica" and "Battle Hymn of the Republic"; "There's a Quaker Down in Quaker Town" and "When It's Springtime in Killarney"; "When You and I Were Young, Maggie" and "Bring Back My Bonnie to Me."

The six best sellers in the Pathé library this month were: "Hello, Hawaii, How Are You?" and "Loading Up the Mandy Lee"; "Hupa Haua Hula Girl" and "Waikiki March"; "O Pardiso," from "L'Africaine," and "Reviens," sung by Lucian Muratore; "Star Spangled Banner" and "Old Folks at Home"; "Evelyn" and "Mon Desir," from "Pom-Pom"; "Wake Up, America" and "Georgia Moon."

In the Victor list the popular records of the red seal type were: "Birds in the Night," by Sophie Braslau; "Non e Ver," by Emilio de Gogorza and the "Nightingale Song" by Alma Gluck. In the rag pieces, "Pom-Pom" with "Honky Tonky"; "Walkin' the Dog" with "Are You Prepared for Summer," and "Arrah Go On, I'm Gonna Go Back to Oregon" with "Oh Joe, With Your Fiddle and Bow," were in the greatest demand.

The popular records for the month in the Edison offerings proved to be "Yaaka Hula Hickey Dula" with "On the Hoko Moko Isle"; "Songs of Other Days, No. 1" with "Songs of Other Days, No. 2"; "Kentucky Babe" with "Swing Along," and "Wake Up, America" with "Played by a Military Band." Two Edison records in German, which have taken especially well this month are: "Der Tyroler und sein Kind" with "Mad'le, ruck, ruck, ruck," sung by Karl Jorn and "Als Bublein klein an der Mutter Brust" with "Der Vogelfanger bin ich ja."

Reed Landis, son of Federal Judge K. M. Landis, formerly connected with the retail department of the Aeolian-Vocalion Co., under O. C. Searles, is now a member of the First Illinois Cavalry on the Mexican border.

Poem to L. & H. Concert Hall

Lyon & Healy announce the close of an interesting contest in connection with selecting a poem to be used on the program of their new concert hall. The prize was offered for the most suitable poem in the opinion of the judge. The editor of "Poetry" acted in this capacity. We are informed that eighty-five poems were submitted and that it was a difficult matter to judge them. Five were selected as especially good and one of these was passed on as the most fitting for use in the hall.

The following poem seems indeed well fitted for the purpose:

IN THE NEW LYON & HEALY CONCERT HALL
By Agnes Lee

Hush! May we not feel their presence? They are here.
Wing upon wing,
The gods are gathering,
Invisible, potential, closing near.

Heart, be a noble amphora, for wine
Of golden sound!
Mind, be a thought profound
To meet their challenge with the countersign.

For us their flashing pennons are unfurled
On Art's high peak,
Hush,—they are going to speak,
The everlasting great who move the world!

The Lyon & Healy concert hall has been an important part of this institution for the past fifteen years. This hall has been crowded daily with music lovers interested in the Victrola and Duo-Art Pianola. The poem is certainly appropriate to these concerts. The hall also will be placed at the disposal of patrons of the institution for concert purposes.

Edison Managers Get Together

On Wednesday afternoon of last week various managers of Edison branches met in Chicago for the purpose of round table discussion. A good deal was said and resolved with a view to further increasing public respect and favor for the Diamond Disc. Among those present as the guests of C. E. Goodwin and the Phonograph Co., of Chicago, were: George Babson, of New York; R. B. Alling, of Detroit; William Schmidt, of Milwaukee, and M. M. Blackman, of Kansas City.

The evening of the same day was devoted to a generous repast served at the Chicago Athletic Club to the concurring Edison managers and the many Edison dealers of Chicago. The gathering took advantage of Mr. Blackman's presence and speaking ability by inducing him to get friendly in what proved to be a very practical and inspiring talk, entitled "Coming Through."

Lewis Back in Chicago

L. L. Lewis has accepted a position as manager of the Cortina language course department, which has just been established in connection with the Grafonola Shop, at 12 North Michigan avenue. Mr. Lewis has recently traveled over the country, establishing agencies for the Cortina system, and is, therefore, thoroughly posted with the line. Some years ago Mr. Lewis successfully conducted the I. C. S. language department at Lyon & Healy; from there he went to Mexico and was for sometime manager of the Edison phonograph interests in that country, and afterwards for four years was manager of the talking machine department in one of the largest mercantile houses in the city of Mexico. He is a most efficient man and Chicago is fortunate in getting his services in teaching languages. The Cortina system, which uses disc records exclusively, has a patriotic feature which Mr. Lewis takes keen pleasure in. He not only has Spanish, French, Italian and German courses, but also an English course calculated to aid new citizens in mastering the language of the country of their adoption.

Personals and Visitors

Roy Keith, of the Chicago Talking Machine Co., spent the Fourth down at Springfield, Ill., with George Cheattle, formerly of the C. T. M. forces, and who now, with his brother and father, conducts the Music Shop at the state capital. On his return Mr. Keith spent a day with Mr. Spaad, manager of the Emerson Piano Co., at Decatur, Ill. They have recently occupied a new store, elaborately fitted up with a fine Victrola department, which has just been placed in charge of G. W. Deetz, formerly advertising manager of the leading Decatur daily paper.

I. C. Parker, manager of the talking machine department of Gimbel's, Milwaukee, was in Chicago this week on his way to attend the convention of the Alexander Hamilton Institute, of which he is one of the lecturers, in Milwaukee.

Open New Store

Arthur Kopp, formerly manager of the Pathé Shop on Wilson avenue, and L. W. Sporlein recently bought the Victor license of A. H. Dannemark, at Wilmette, Ill., and will utilize it in the establishment of the Sheridan Road Music Shop, at 6750 Sheridan Road, Chicago. They will handle Victor records exclusively.

Price Advance on Needle Cutters

S. O. Wade, of Wade & Wade, states that he is having a great deal of trouble in securing steel for the Wade fibre needle cutters and that the big advance in the price of the metal has made it necessary to make a moderate increase in the price of the finished product. Mr. Wade left Saturday with the Chicago bunch for the Talking Machine Jobbers' Convention at Atlantic City. He was wife accompanied.

F. A. Ruger Establishes Chicago Office

F. A. Ruger, who has been for some time with the Acme Die-Casting Corporation, of Brooklyn, N. Y., has been appointed central western representative of that concern and has established an office at 232 South Clark street. Mr. Ruger has on display about 250 die-castings among which are some 50 talking machine tone arms and attachments which will show what can be accomplished for the talking machine maker by the die-casting process. For those who wish to equip their machines with tone arms, sound boxes and other parts of a distinctive type, Mr. Ruger always has new designs on hand which he will gladly submit or in collaboration with the engineering department of his company will work out a design to meet special conditions. Mr. Ruger has already secured a large number of excellent accounts among talking machine manufacturers in Chicago and other cities in this territory.

Provides Soldiers with Victrolas

I. A. Eacutt, proprietor of the Woodlawn Talking Machine Shop, 1131 East Sixty-third street, was the first to send a musical instrument to our Mexican-bound soldiery. Mr. Eacutt sent a Victor machine and records to Col. J. B. Sanborn, commander of the First Illinois Infantry. In making the gift, Mr. Eacutt said: "Please accept from us a Victor talking machine with quite a selection of records. We would thank you to forward the same to any of the Chicago regiments. A little music will help to pass many a lonely hour."

"Used" Machines Offered

One of the first offers of "used" talking machines was made this month by one of the large

Dealers—Prepare for the New

BRUNSWICK-PATHEPHONE

And Pathé Disc Records

An Epochal Development in the Phonograph Industry

The Brunswick-Balke-Collender Company—for several decades America's master producers of cabinet work—now announce the Brunswick-Pathephone. This new instrument ushers in nine new-day improvements. No rival, we believe, has more than two or three of them. The majority are found on the Brunswick-Pathephone and Pathé disc records exclusively. They include the supreme attainments of the Pathé Frères Company.

The Pathé Frères Company will manufacture the records for the Brunswick-Pathephone. But this great instrument will play not only these exceptional records, but also any other disc records vertical or lateral cut.

The Brunswick-Pathephone introduces prices unknown before on instruments of super-excellence. For remember, it brings not only the supreme achievements in sound reproduction, but also rarest woods, finest cabinet work and unrivaled conveniences.

Mammoth Resources

Brunswick-Pathephones will be manufactured in the great Brunswick-Pathephone factory at Dubuque, Iowa. (See illustration.)

They will be distributed through the 60 Brunswick Branch Houses in all parts of the United States and in Canada.

An ample stock will be carried at each branch—and there is one near your store.

This means that Brunswick Service to dealers will be unrivaled. And the Brunswick Pathephone and Pathé records will be widely advertised in the nation's powerful periodicals.

Behind this enterprise are $15,000,000 and we shall employ these vast resources to make the Brunswick-Pathephone dominate the phonograph field.

Write Us Now

Please don't underestimate the value of immediate action. Our proposition means unequaled expansion for good aggressive dealers everywhere. Write for full details today. Investigation incurs no obligation. Write at once.

piano houses on Wabash avenue, which printed an advertisement calling attention to used talking machines as well as used pianos.

To Make Talkers at Elgin

The Elgin, Ill., property of the bankrupt Engelhardt-Seybold Co., has been taken over by the E. P. Johnson Piano Co., of Ottawa, Ill., which is capitalized at $200,000. In addition to the manufacture of pianos and organs the new concern will pay considerable attention to the making of phonographs, which has already been established at the Ottawa plant. The machine is known as the "Artonian" phonograph. The officers of the company are E. P. Johnson, president and manager; William Grote, vice-president; A. M. Johnson, secretary, and Henry Muntz, treasurer. Frank Grote is superintendent.

I. Hirschberg, representing Hallis & Co., a mercantile house of Port Elizabeth, South Africa, was in Chicago last week. He placed a material order for talking machines during his stay here.

Miss O. K. Gressing, who has been identified with the music business in Milwaukee, Wis., for a number of years, died in that city last week. She was a sister of Otto Gressing, who was formerly connected with the talking machine trade and who is now with the Melville Clark Piano Co.

C. Harry Bent, formerly secretary of the Geo. P. Bent Co., and now Western wholesale representative of the Cheney Talking Machine Co., with headquarters at Pasadena, Cal., is in Chicago. He had no announcement to make as to his future plans.

Herbert P. Gibbs, traveler for the Rudolph Wurlitzer Co., was along Piano Row last week, accompanied by the two junior Gibbs's. One is Herbert, Jr., and the other William. They are twins about four years old and are the handsomest pair of kids on Wabash avenue.

H. S. Allen, Victor man of Los Angeles, Cal., was one of the month's visitors to the local trade.

The Music Shop is a new store at Loda, Ill., that is specializing in talking machines.

A. D. Chattelle, music dealer of Warren, Ill., was killed recently by an Illinois Central train while riding in the automobile of a friend, Peter Howe, of Darlington, Wis. The five other occupants of the car died instantly and Mr. Chattelle died on the way to a Freeport, Ill., hospital.

The West Goes East

As the result of the efforts of L. C. Wiswell, of Lyon & Healy, the Western delegates to the convention of the National Talking Machine Jobbers' Association at Atlantic City, were able to make the journey eastward together. Two special cars, occupied exclusively by the talking machine people, were attached to the Manhattan Limited train on the Pennsylvania Railroad which left Chicago last Saturday, arriving at Atlantic City Sunday morning at 9 o'clock. One car, which was carried from Chicago, was occupied entirely by the Chicago and Western contingents, the other car being put on at Pittsburgh for the accommodation of the Smoky Cityites and the Cleveland delegation. A list of those who were in the two cars will be found elsewhere in a detailed story of the trip in this issue of The World.

Off For Plattsburg

The Chicago talking machine and piano trades are going to have quite a representation at the citizen's military training camp at Plattsburg, N. Y. Roy J. Keith is already in New York getting a little of the Talking Machine Jobbers' Convention and will leave from there Tuesday night for Plattsburg. A. M. Lockridge and W. C. Griffith also of the Chicago Talking Machine Co., are also on their way to Plattsburg. Charles Bent, the youngest son of George P. Bent, president of the Geo. P. Bent Co., will spend a month of his vacation between his junior and senior years at the University of Chicago at the Plattsburg training camps. John Mitchell, of the automatic department of Lyon & Healy, leaves to-night, and on the same train goes H. S. Kingwill, of the Chicago branch of the Talking Machine World, who is specially delegated as war correspondent of The Talking Machine World and The Music Trade Review at the front.

"OROTUND" Sound Reproducers

"Orotund" sound-boxes reduce that scratching surface noise and improve the tone of talking machines, playing any record. Write for descriptive circular and quantity prices.

Exclusive Design—Highest Quality

Sample price to dealers—with full equipment for playing any record—$3.50 postpaid.

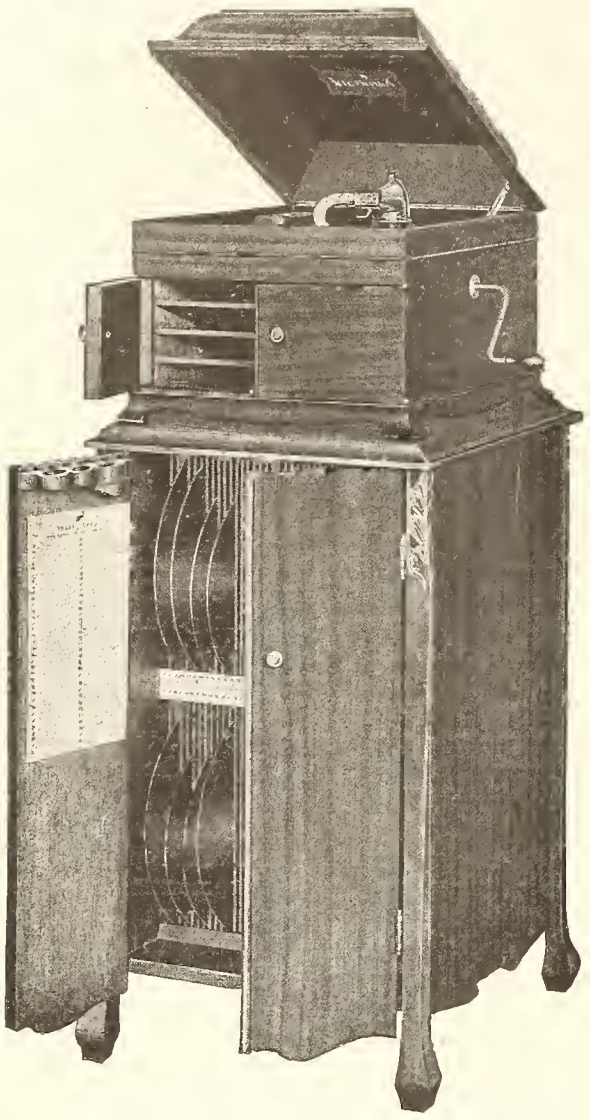
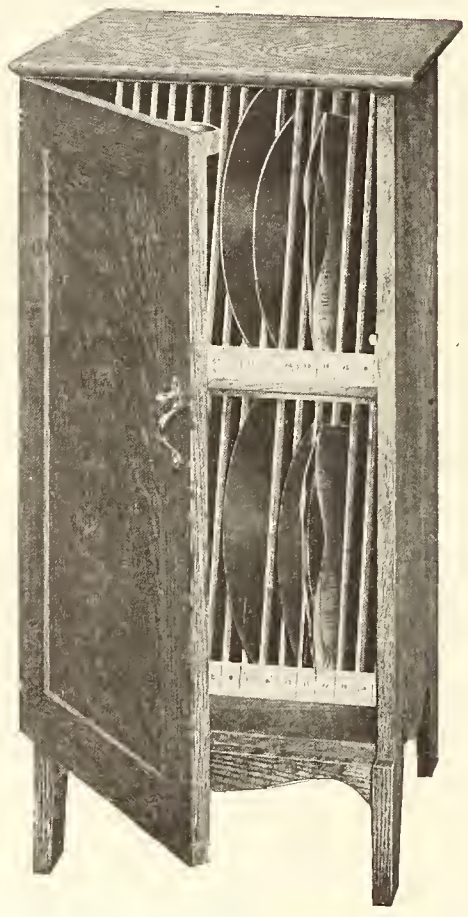
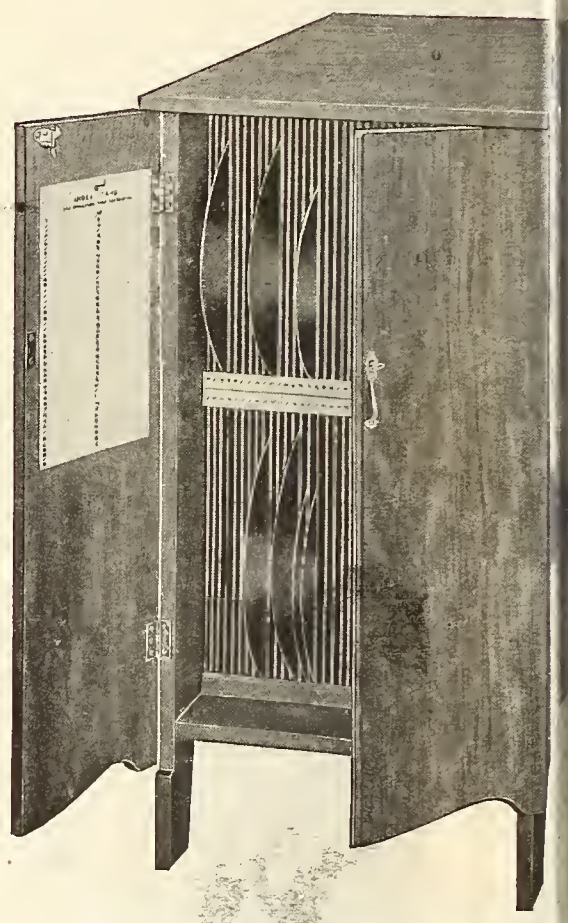
QUICK DELIVERY O



No. 19 with Victor IX. Built to harmonize with machine. Of selected mahogany or oak in any color. Nickel-plated fittings, index system, etc. Felt-lined shelves to prevent injury to 96 records. Wood rack holds 156.



No. 790. Cabinet with Wood Rack Interior. Height 34½ ins.; top, 15¾x15¾ ins. Will hold 112 ten or twelve-inch records. Made in oak or mahogany. Index system, needle holder, etc. Used for small machines generally.



No. 787. Size, 35 ins. high; top, 21¾x18½ Holds 90 records in felt-lined shelves, or 15 wood rack. Finished in any color. Popular Sonora and other dealers.

AN additional new building and new machinery that together will increase the output of Salter Cabinets by 100% has just been completed by this company.

It means that for the first time in many years we will be able to keep pace with our orders.

It means that you can secure almost immediate delivery on any one of the many different styles that we make.

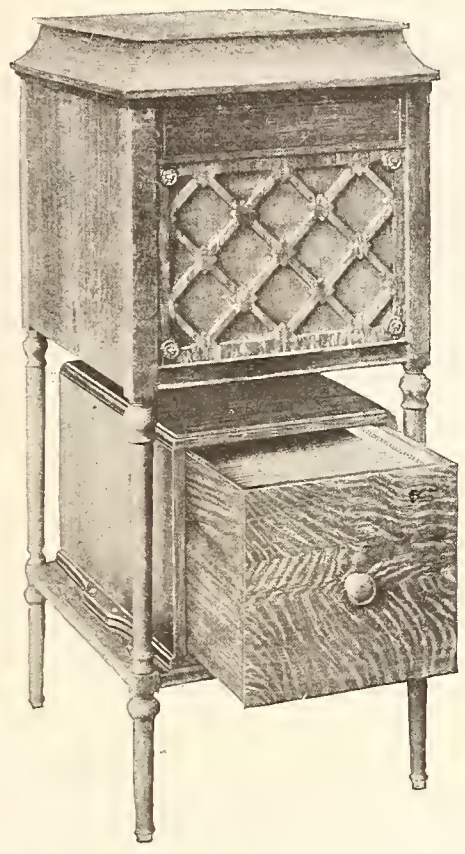
From now on, in addition to Salter Quality, Salter Practicality and the moderate Salter Price you can get *delivery!*

THE SALTE

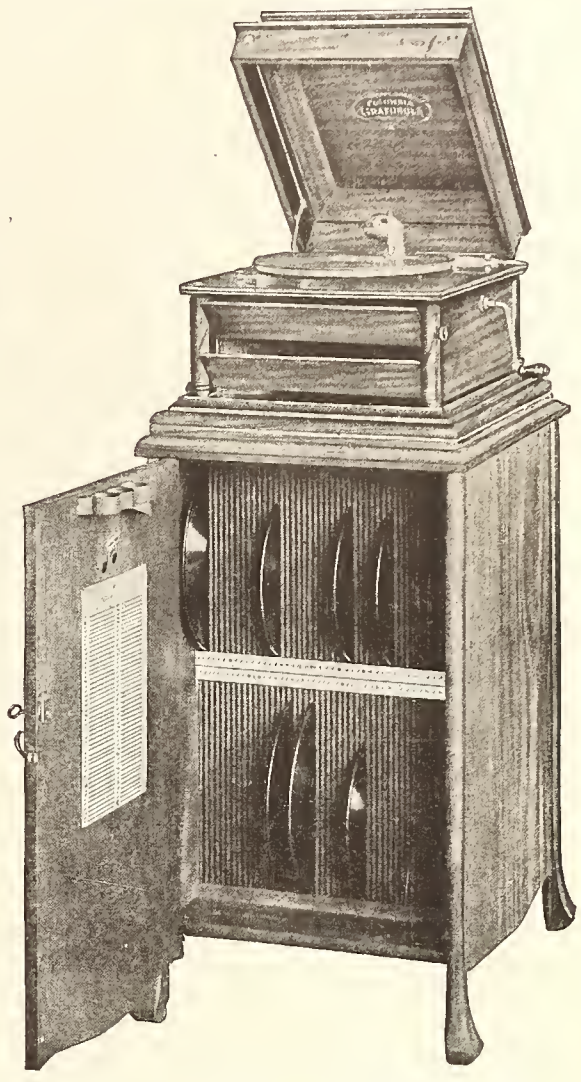
Originators of Felt-Lined Cabinets

ALTER CABINETS

No. 166. Height, 30 ins.; top, 25x20 ins. Records can be laid on front when open. Felt-lined compartments hold 52 records. Wood rack holds 96. Any color in mahogany or oak. Much used by Pathé and other dealers.



Cabinet No. 100, with Edison 100-A machine. Designed especially to fit on machine shelf, and finished to match. It is quickly and easily fastened by means of four screws. Felt-lined compartments and index afford ideal protection and filing facilities. Made in any color.



No. 111, with Columbia "Favorite." Has appearance of one article. Height, 33½ ins.; top, 23x19½ ins. Finished in any color. Felt-lined interior will hold and protect 96 records. Handsomely trimmed and equipped. Any color of select mahogany or oak.

THESE standard Salter Styles will bring us a tremendous Fall and holiday business, and we hope to take care of it with our new facilities.

To be on the safe side however, give some thought to the cabinet situation *now*. Go over your lists and then go over our catalog.

You will find the present an opportune time to do this. You will have a rush on machines before long that will leave but little time except for machine sales. Spend some time on this cabinet subject now and make your profits later.

Now is the time! Send for catalogs.

MFG. COMPANY

339 N. OAKLEY BLVD., CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 61)

LYON & HEALY'S HANDSOME RETAIL DEPARTMENT

Most Completely Equipped for the Convenience of the Public—Concert Hall an Interesting Feature of This Well-Arranged Establishment

CHICAGO, ILL., July 11.—In the June World an illustrated account was given of the facilities for handling the wholesale talking machine business of Lyon & Healy in the company's new building at the corner of Wabash avenue and Jackson boulevard. This month an attempt will be made to convey some idea of the retail talking machine department. Perhaps departments would be the better term. The machine sales department occupies space on the first floor and on the mezzanine; the remarkable retail record department and the general offices of Department H are located on the second floor, the remainder of which accommodates various media of wholesale Victor activity, while on the ninth floor is found the repair department.

Section of the Victrola Sales Department, Two of the Sound-Proof Rooms Are Seen in the Background

Start in with the "machine sales." Turn to the right as you enter the store from Wabash avenue and there you are. If your mission is to purchase sheet music or to spend a few minutes in the L. & H. concert hall, or whether you are going "up stairs," you must pass the Victor machines. First there is a beautifully rugged and Adam style furnished reception room. Off of this open four Victor salesrooms, each containing a sample of each of the Victrola styles. The art styles are shown in the reception room. A silent salesman case, in which accessories are displayed, is a feature of the latter. The rotation system of handling customers is used so that the salesmen get an equal chance. The sales force is a thoroughly trained one. It includes T. B. Stone, whose five years of service has been marked by steady promotion; Joseph N. Vesey, veteran in point of years of service with the house, and who has been selling talking machines for Lyon & Healy for a decade and a half; John Otto, second oldest in years given to the department, and who knows the Victor from A to Z, and Harry G. Bartruff, an efficient newcomer. Miss M. Olso is the "usheress," who receives customers and assigns them to the salesmen, and she has as an assistant a young woman named Gladys Foster. When the four main salesrooms are all occupied, as is frequently the case, even in the so-called dull summer season, recourse is had to three overflow rooms on the mezzanine floor just off the beautiful waiting room.

A Section of the Victor Record Sales Department, New Lyon & Healy Building (No. 2)

Up on the second floor the big and wonderfully equipped retail record room looms up in all its glory. You step right off the elevators into the reception room, where Mrs. Pinger, the "monitor," receives the customers, assigns them to private record rooms if they want to hear records, to a station of the long counter if they want to select records to be sent on approval, or, if they have just purchased machines, to the service room in one corner of the department, where, seated at convenient tables they are waited upon by musically versed attendants who assist them in selecting their initial record selections. There are twenty-three commodious record demonstration rooms extending around three sides of the large center space, in which the record stock cabinets are located. In assigning a customer to a room the monitor glances at the electric signal board shown in illustration No. 2. The dead bulbs indicate the rooms not occupied. A saleswoman is summoned and as a room is entered and the door is closed the room is lighted and the bulb corresponding to the room number on the signal board also lights up. Exactly the reverse happens when the room is vacated. If the customer happens to be alone in a room and wants an attendant, she pushes a button, a purple light bulb on the signal board gets busy, as does also the monitor, who "buzzes" the appropriate attendant. Each demonstration sales woman has charge of two adjoining rooms. These demonstration rooms reach the height of soundproofness. An idealized system of weather stripping prevents sound leaking out between the door and the door jam. It is also applied to the bottom of the door, but is coun-

DEKALB WAGON COMPANY

DeKalb, Illinois

One short and direct route to Columbia profits is Columbia double-disc dance records—endorsed BY THE PUBLIC.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

Columbia Records TRADE MARK Note the Notes

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 64)

tersunk in the door when open. As the door is closed a plunger working on contact releases a spring and drops the strip into place.

With these natural loopholes for sound guarded against, the heavy glass partitions do their duty wonderfully as tests made for the delectation of The World man amply demonstrated.

Now take a glance at that long counter shown in illustration No. 2. It is divided into stations, each accommodating one customer and in charge of an attendant. Each section has three of the three last monthly bulletins under glass and beneath the counter and at each station is a complete stock of needles, albums and various accessories, together with literature, catalogs, supplements, etc. At the eastern end of the reception room is a service room where record returns, complaints and repair orders are handled. Near it is another silent salesman display case for accessories.

The retail record department is in charge of Wm. Nolan, who has no less than thirty young women as assistants. Many of them have been with Lyon & Healy for many years and the corps is noted for its intelligence, musical knowledge and its trained expertness in the enunciation of the names of Italian, German, French and Spanish operas and arias.

Just a word about the daily Victor recitals in the concert hall on the main floor. Since the removal to the new building the feature of accompaniments to the Victrola developed to some extent in Victor hall in the old building has been greatly extended. Lyon & Healy have a number of accomplished musicians in their employ and they utilize them to excellent advantage. Miss Elsie Stein, who is in charge of the concert hall, plays delightfully and often plays accompaniments on the Steinway grand to Caruso and others of the golden voice. Miss Clara Thurston often comes down with her harp. Miss Treat, of the record department, sings with the record artists every once in a while, or lets the Victor orchestra accompany her. Edward J. Freund, the violinist, who has his studio in the building, frequently appears on the programs.

Manager L. C. Wiswell, of Department H, and his capable assistant, J. B. Hyde, have every reason to be proud of the new retail talking machine department in all of its ramifications.

TO DISTRIBUTE THE MAJESTIC

O. W. Richardson & Co., the big rug and house furnishing concern of South Wabash avenue, has taken the jobbing rights of the Majestic phonograph in six States: Illinois, Iowa, Michigan, Wisconsin, Ohio and Indiana. The move is an important one, for the entrance of the Richardson Co. into the field means an active representation in the States named of a line that is already making its presence strongly felt.

IMPORTANT PATHÉ-BRUNSWICK-BALKE-COLLENDER DEAL

Western Concern to Handle Pathé Records in a Wholesale Way—Their Talking Machine to Be Known as the Brunswick-Pathé—Avenues of Distribution

CHICAGO, ILL., July 11.—One of the most important deals in the talking machine trade that has taken place for some time was consummated when the Brunswick-Balke-Collender Co., with headquarters in this city, closed the contract with the Pathé Frères Phonograph Co., of New York, whereby they will handle the entire line of Pathé records selling them in a wholesale way. They will thus be able to supply dealers of their talking machines the name of which is being changed from the "Brunswick" to "Brunswick-Pathé." This puts the B.-B.-C. Co. in an excellent position in meeting the demands of their trade, as the Pathé records include not only those by American artists recorded at their laboratory in New York including a large number of the latest "hits" issued each month, but also their tremendous European catalog. The dealer purchasing the Brunswick-Pathé machines will, therefore, be able to furnish his trade with anything from the late popular song to grand opera arias sung by artists of international reputation. The Brunswick-Pathé phonograph is a distinctive machine created by the Brunswick-Balke-Collender Co., but the present deal was contemplated although not consummated when the machine was being worked out. Therefore, special attention was given to equipping it for playing the hill and dale as well as the lateral cut records. Every make of records can be played most satisfactorily on the Brunswick-Pathé.

Martin Nystrom, manager of the Brunswick-Balke-Collender phonograph department, has been in the East for the last ten days arranging the details of the new deal and two representatives of the Pathé Frères Phonograph Co., are now in Chicago making out the order for records which is an unusual one. The initial order will approximate 500,000 records. Extensive stocks of Brunswick-Pathé phonographs and of the Pathé records will be carried not only at the Chicago office and sales rooms at 623-633 South Wabash avenue, but at all the various branches offices and sales rooms which are as follows:

Eastern: New York City, 29-35 West Thirty-second street; Albany, N. Y., 576 Broadway; Baltimore, Md., 11-13 North Liberty street; Boston, Mass., 90 Washington street; Buffalo, N. Y., 219-221 Washington street; Newark, N. J., 224 Market street; New Haven, Conn., 129-131 Temple street; Philadelphia, 1002 Arch street; Syracuse, N. Y., 411 South Clinton street; Washington, D. C., 712 Thirteenth street, N. W.

Southern: Atlanta, Ga., 22 Luckie street; Dallas, Tex., 611 Main street; El Paso, Tex., 129 San Francisco street; Memphis, Tenn., 128 Monroe avenue; New Orleans, La., 735-737 Poydras street; San Antonio, Tex., 112 Main avenue.

Western: Cincinnati, O., 130-132 East Sixth street; Butte, Mont., Broadway and Arizona street; Cleveland, O., 1035-37-39 Huron road; Columbus, O., 166 North High street; Denver, Colo., 1701-19 Fifteenth street; Des Moines, Ia., 113 Walnut street; Detroit, Mich., 98-100 Randolph street; Indianapolis, Ind., 118 South Meridian street; Kansas City, Mo., 1329-1331 Main street; Milwaukee, Wis., 275-277-279 West Water street; Minneapolis, Minn., 426-428-430 Third street, South; Oklahoma City, Okla., 22 North Robinson street; Omaha, Neb., 407-409 South Tenth street; Pittsburgh, Pa., 20 Wood street; Salt Lake City, Utah, 55-59 West South Temple street; St. Louis, Mo., 106 South Fourth street; Toledo, O., 513-515-517 North St. Clair street; Muskegon, Mich.; Big Bay, Mich.; Dubuque, Ia.

Pacific Coast: Los Angeles, Cal., 845 South Los Angeles street; Portland, Ore., 46-48 Fifth street; San Francisco, Cal., 767-769-771 Mission street; factory, Twentieth and Harrison streets; Seattle, Wash., 200-202-204 First avenue, South; Spokane, Wash., 216-218-220 Wall street.

Canadian: Edmonton, Alberta, 647 Fourth street; Montreal, P. Q., 11 Notre Dame street, West; Toronto, Ont., 80 York street; Vancouver, B. C., 552 Beatty street; Winnipeg, Man., 143 Portage avenue, East; Toronto, Can.

Foreign: Buenos Aires, Argentine Rep., Calle Libertad 176-190; Honolulu, Hawaii, 71 Queen street; Mexico City, Mex., la La Calle De Capuchinas, No. 25; Monterey, Mexico; Paris, France, 2 Rue des Italiens (Grand Boulevards).

DOUBLE SIZE OF SALTER FACTORY

Addition to Salter Plant Just Completed That Doubles the Plant's Output—Can Now Supply All Demands for Cabinets—Particularly for Fall and Winter Trade

CHICAGO, ILL., July 10.—The end of July will see completed in every particular an addition to the Salter factory that will more than double the plant's output. The actual work of construction on the new building has been nearly finished and the work of installing new machinery is well under way. The new structure is immediately to the south of the old building at 339 North Oakley boulevard.

"Our principal difficulty in the past has been inadequate production," said J. F. Mortensen to The World. "With the approach of the fall months and the heavy demands that that season also brings it is a source of considerable satisfaction to us and to our friends to know that they will be taken care of on delivery as well as on quality and price. With this new advantage we feel that the fall of 1916 will be the greatest period of prosperity in our history by far. The felt lined cabinet which was original with this company has enjoyed tremendous popularity. Its advantages are so easily demonstrated and dealers have always found it a quickly marketable accessory.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World which was started with the April issue, is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. A talking machine out of order often reflects both upon the maker and dealer, and yet frequently the trouble is so slight that the simple knowledge of repairs will permit of the machine being put into proper running order, quickly and practically without expense. In the large cities talking machine repair shops are, of course, available, but this department should prove of particular value to the out-of-town talking machine men.

Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 25 East Fourteenth street, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

COLUMBIA DOUBLE SPRING MOTOR

There are so many different styles of Columbia motors that I am going to write several articles in reference to adjustments and little repairs that the average dealer can do himself as the occasion demands.

This month we will consider the troubles which might happen to the present type of double spring Columbia motor.

Of course, the chief trouble is always the problem of replacing a broken spring. This should be found very easy for any one who has a screwdriver and pair of pliers handy and is not averse to getting his hands a little dirty.

First remove the screws which hold the spring cage shaft in place—take point of screwdriver and push shaft out far enough to get hold of end with pliers, when same can be easily pulled out. Be careful not to loosen the little brass bushing which fits between the running gear and casting and which is used to keep the cage in its proper position in relation to the winding ratchet on one end and the operating gear on the opposite end.

Before removing the eight little screws from the tabs of the spring cage plate make a mark of some kind on one of the tabs and also opposite the tab on the cage (do this on both cages) so that when replacing the plate you will have some guide to get the plate back in the same position it was originally, otherwise you may find that the tabs will not center over the screw holes.

In removing the broken spring be very careful that you do not let spring slip and fly out of the cage—for Columbia springs are very strong and are liable to cut and damage anything they may strike.

I use two methods in putting in the new spring. First, take the new spring, clamp it tight in a vise and cut the wire band which holds it coiled up—then gradually loosen vise and allow to spring to uncoil. I then coil spring into the cage by hand. The other plan I often use is to take an old clamp ring from a Victor 3014A spring and knock it into position over the Columbia spring just above the clamp wire—then cut wire—the clamp ring will hold spring securely and allows room to pull end of spring out as we do with the Victor springs—thus permitting you to hook end of spring on cage rivet as we do with the Victor springs.

After graphiting, and for Columbia springs I use a kind of paste graphite called Graphitoleo, replace cage plate, using your guide marks on tabs and cages to get the tab holes center, replace tab screws, put cage into motor, slide shaft through cage and brass bushing—tighten up screws which hold shaft in position, wind up motor and test.

In a new motor about the only other trouble you might have occasion to overcome will be in the governor, either a possible broken governor spring or the spring screws have worked loose. In all cases I remove governor and take it all apart. I clean the center hole of friction disc, clean the governor spindle with croens cloth and oil until it will slide perfectly free through the hole of friction disc, then replace the balls and springs, being sure that springs line up perfectly straight and also sure that screws are set up good and tight; replace governor in motor, allowing just a little end play and set up governor bearing screw good and tight.

If the governor is properly assembled and the springs are straight, screws tight, etc., you should have little trouble with motors changing speed, which causes the change of pitch in the reproduction of the record.

INDIANAPOLIS, IND., July 1, 1916.

Andrew H. Dodin,

Care The Talking Machine World.

Dear Sir—Being repairman for the Edison Shop of Indianapolis, Ind., I have made several experiments in regard to spring lubricants, and have as yet found none that gives satisfaction.

No doubt you are familiar with the spring barrel in question, which is the new style Edison. There is an extra disc inside of the spring barrel cover which I cannot find the reason for using. Do you think this disc rubbing against the edge of the spring would cause a pounding sound, or jumping spring?

What do you think of dry graphite as a lubricant? Yours very truly,

ROY R. PEARCE, Repair Department.

Answer—For a spring lubricant for use in new style Edison motor, would suggest that you try Dixon's Graphitoleo, which can be obtained in small cans and is manufactured by the Jos. Dixon Crucible Co., Jersey City.

As to the extra disc inside spring cage, do not think the same could cause trouble unless the side in contact with spring had become rough or cut in some way.

Think your trouble is more in the graphiting. I never use dry graphite for spring lubrication.—A. H. Dodin.

SPECIALIZING IN TALKER FELTS

Widney Co., of Chicago, Call Attention to Their Facilities for Producing Felt Parts Used in Talking Machine Construction

CHICAGO, ILL., July 10.—The Widney Co., of 163 West Harrison street, this city, long recognized as one of the leading houses for cut felt specialties, are now calling the attention of talking machine manufacturers to their unrivalled facilities for producing all the felt parts used in the construction of talking machines. They have recently added a Special Service Department to their business for the purpose of assisting the many manufacturers in this industry to solve their felt problems. This department is made up of men who have been actively connected with the construction of talking machines and who are therefore well able to advise on questions of felt for the line. The company has also installed many special large die cutting machines for producing turntable felts, bumpers, insulators, wicks, washers, etc., and as they have in their equipment dies and tools for producing all the standard sizes of these articles they are in a position to offer exceptionally prompt deliveries.

Although the general labor situation and the wool shortage has seriously handicapped the felt market, this company prepared itself against the situation months ago with the result that they now have on hand large stocks of all the grades of felt used in talking machine work. In these abnormal times it means considerable to the manufacturer to be able to place his orders with a house who can be depended upon to give prompt deliveries, and who, through careful planning ahead are in a position to send out goods that are up to standard in quality at prices that are not governed by "war" conditions.

Roy F. Ott, progressive and successful Columbia dealer at Huntsville, Ala., was a visitor to New York this week, spending some time at the executive offices and factory of the Columbia Co. Mr. Ott is enthusiastic regarding the business he is closing with the Columbia line, and incidentally paid a tribute to The Talking Machine World, which he states, he finds invaluable in the conduct of his establishment.

STYLE "A"
Height, 45½"
Width, 17"
Depth, 19"

The MOZART Special Style "A"

Retail Price $55.00

Is satisfying the demand for a large low priced cabinet machine, that has proven the biggest leader on the market today.

NEW QUARTERS IN CANTON, O.

Miller-McConnell Co. Holds Formal Opening of Handsome Store at 416 Market Avenue, North, That City—Up-to-Date Equipment

CANTON, O., July 5.—Much local interest is being displayed in the handsome new quarters of the Miller-McConnell Co., opened recently in the new Vicary Building, at 416 Market avenue, North, this city. The company occupies three large floors in the building, all handsomely equipped. The front of the first floor is fitted up as a rest room for ladies and equipped with

Miller-McConnell's Attractive Quarters

telephones, easy chairs and writing desks, the hangings and upholstery being of a rich rose shade.

Immediately back of the rest room are located five demonstrating booths for Victrolas and records, the woodwork being in gray and mahogany and the furniture of wicker. A feature of the equipment is a record stock room holding 6,500 records, any one of which may be picked out instantly. The record stock is kept constantly at the 6,500 mark.

The downstairs room has a large recital hall fitted up at the front, where both Victrola and player-piano recitals will be held. The main piano wareroom is located in the rear of the first floor. V. G. Miller and Lawson S. McConnell are the members of the firm.

SOUTHERN CALIFORNIA NEWS ITEMS

Call for Small Machines Prevails—Tungs-Tone Needles Popular—News of Month

LOS ANGELES, CAL., July 5.—Not until the last week of June did summer really arrive, but at last it is here, and a great many people are leaving for the mountains and beaches. Consequently the demand for small machines has begun, also record business is fine, especially in the popular and dance numbers.

The demand for large machines has dropped off somewhat, although all dealers report a very good business for this season of the year. Stocks are in a great deal better condition than they have been for several years, especially is this true concerning machines of which all models are now obtainable. A great many records are still hard to get, in fact such a thing as a complete stock of records is an unknown quantity in Los Angeles.

There is an increasing demand for Tungstone needles, and the supply seems to be diminishing, most houses having hundreds of special orders awaiting to be filled. In order to make them go farther, some of the dealers are cutting the packages in two, and only giving two needles to each person.

The tri-annual Conclave of the Knights Templar, given in this city from June 18 to 24, was one of the greatest conventions ever given here. More than 40,000 Knights were here, and the city was beautifully decorated in their honor. Several of the local dealers sent talking machines to the several headquarters of the Templars for the entertainment of themselves and their ladies.

The members of the talking machine force of this city are jubilant over the fact that all music stores will close on Saturdays at 1 p. m. during the summer months.

Owing to the Holmes Music Co. of 422 South Broadway retiring from business, the Andrews Talking Machine Co., who for several years has occupied space in their store, will move later this month to 350 South Broadway, where this firm will occupy the entire ground floor.

Barker Bros. have lately put in a complete line of Edison Amberolas and records.

Harold Jackson, road representative for the Diamond Disc Distributing Co., of 340 South San Pedro street, is on a vacation. Mr. Jackson, who motors over nearly his entire route, made 3,000 miles last month.

The music department of Barker Bros. is making an exhibit, the first in this city, of the Schloss wagon cabinet for talking machine records. The company will carry a stock of the cabinets in future.

Quality Bassett, a music dealer of Bristol, Conn., recently purchased a carload of Edison Diamond Disc phonographs, including many of the higher priced models.

SEMI-ANNUAL COLUMBIA CATALOG

Columbia Graphophone Co. Issues Attractive List of All Records up to June, 1916

The Columbia Graphophone Co. has just issued its regular semi-annual catalog of Columbia records. This catalog is dated June, 1916, and contains all Columbia records listed to date.

This new publication contains several changes in make-up and appearance which were embodied in this book in order to make it even more valuable to the dealer than the previous editions of this catalog.

The new Columbia catalog is divided into three parts; one-third of the book, consisting of an alphabetical list of every Columbia record in the general library, arranged so that if a purchaser knows the name of the record he wants to find he can do so without the slightest inconvenience. The center of the book is devoted to an attractive thirty-two-page tinted section, listing the operatic and concert artists who make Columbia records, and the names of their records are accompanied by biographies and artistic illustrations of the different artists. The third section of the catalog consists of a classified list of all the Columbia records wherein each selection is placed under the heading or division where it properly belongs.

The value of this book is well summed up by William S. Scherman, who states that it is not only an order taker, but an order maker, for the classified division acts as a powerful stimulant to increased record sales by suggesting to the purchaser records similar to the one he is purchasing.

Typographically the new Columbia catalog is beyond the slightest criticism, for it represents the combined efforts of a number of the country's leading type experts.

EPSTEIN & BERDY DISSOLVE

The firm of Epstein & Berdy, formerly operating stores at 1198 Fulton street, Brooklyn, N. Y., and 2977 Third avenue, New York City, has been dissolved by mutual agreement. The Brooklyn store is now under the sole management of Wm. Berdy, while the New York store will be controlled entirely by Louis Epstein, each one assuming responsibility for the present and future liabilities of the individual stores. Each store will handle a full line of Victor Victrolas and records.

J. ADLER VISITS PATHE OFFICES

A recent visitor to the executive offices of the Pathé Frères Phonograph Co., New York, was J. Adler of the Globe Furniture Co., Braddock, Pa., who called to discuss plans for fall business with J. F. Collins, sales manager of the Pathé Frères Co. Mr. Adler stated that in the short time he had handled the Pathé line he had closed a remarkable business, and that he looks forward to a decided increase in sales with the coming of the fall and holiday business.

We also make tone arms and sound boxes ranging in prices from $1.00 to $3.75 per set.

Triton Phonograph Co., 41 Union Sq., New York

HALLET & DAVIS GET PATHE LINE

Arrangements Made Whereby Well-Known Piano Firm Will Handle the Pathé Pathephone Machines and Records Through Its Dealers—Will Carry Complete Stock

Announcement was made this week by the Hallet & Davis Piano Co., whose executive headquarters are at 146 Boylston street, Boston, with New York offices at 18 East Forty-second street, that this company has secured the complete line of phonographs and records of the Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, for distribution among the several hundred piano merchants throughout the country handling the Hallet & Davis pianos and player-pianos. This move manifests once again the progressiveness of this company, which has always been well known for making far-sighted business deals. With the concluding of the arrangements the Hallet & Davis Piano Co. becomes the first piano manufacturer to furnish their dealers with a full outside line of phonographs and records.

This company has followed the policy which has been pursued by the house for many years of placing at the disposal of the piano merchants who handle their instruments, a most complete line of product. This concern holds the distinction of being the first Eastern manufacturer to furnish their dealers with a complete line of instruments, as well as having developed the Virtuolo, which has become recognized as one of the most efficient player-pianos on the market. With the new line of Pathé phonographs and Pathé discs, Hallet & Davis dealers will be assured of meeting all competition from whatever angle it may come.

E. A. Widmann, president of the Pathé Frères Phonograph Co., referring to the consummation of this deal expressed his keen pleasure at having the Hallet & Davis Co. numbered among the Pathé jobbers. Mr. Widmann states that the many stores handling the Hallet & Davis line will enable the Pathé Frères Co. to have a distribution through channels which should aid immeasureably in developing and increasing Pathé popularity.

BROWN DEBATES STEPHENS BILL

Advertising Manager of the Victor Co. Has Interesting Debate with E. L. Howe

One of the most interesting features of Wednesday's session at the annual convention of the Advertising Clubs of the World, held in Philadelphia last week, was a spirited debate over the Stephens-Ashurst bill which is pending in Congress. This bill seeks to prohibit price-cutting on articles widely advertised and bearing trade-marks.

The debate, which was held before the retail advertisers' department of the convention was between E. L. Howe, executive secretary of the National Retail Dry Goods Association, and H. C. Brown, advertising manager of the Victor Talking Machine Co. Mr. Howe spoke in opposition to the bill and Mr. Brown in its favor.

Mr. Brown contended that the Stephens-Ashurst measure deserved the support of the advertising men. Price-cutting, he said, had ruined many department stores in New York City, and was mainly responsible for several recent failures. He said it was not a fair way of doing business—that customers who paid less for some articles at bargain sales paid proportionately more on other goods to make up for it. Otherwise, he said, the merchant could not do business.

"Price-cutting is merely intended to get people into the stores in order that they may be induced to buy something else, the price of which has been boosted," he said. "Maintaining the price is a protection to the public against exploitation and to the manufacturer, who, by his own efforts and by advertising, has established a market for his wares."

He quoted price-cutting advertisements published by one New York firm to prove that it was selling the articles below the wholesale price, a thing it could not do unless it hoped to make up the deficit in some way.

"If merchants want to cut prices, let them establish trade-marks of their own," he said. "But it is my belief that the days of bargaining are over. When the department stores are pushing ahead to the extent of making our women wear straw hats in January, things have gone as far as they can."

TALKING MACHINE EXPORTS

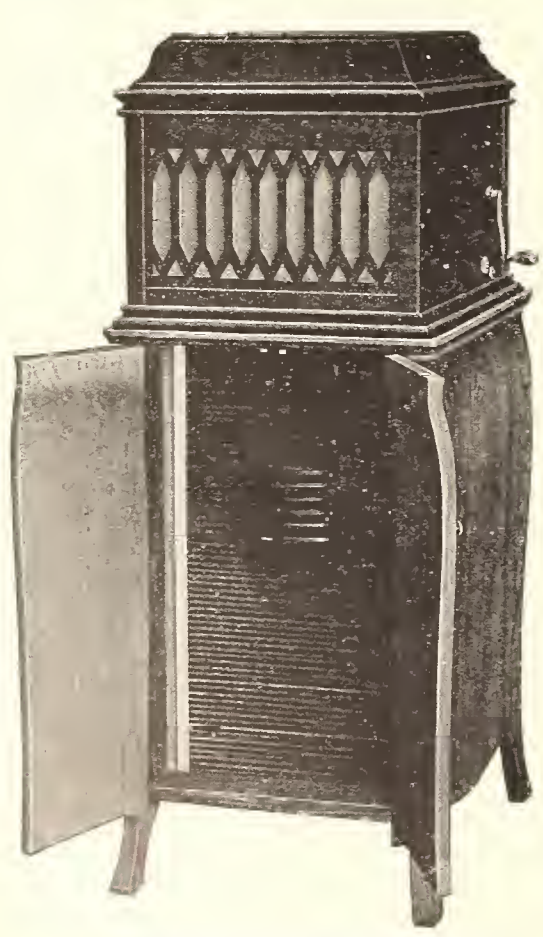
The Figures for April Presented—Exports Show Increase for the Month

WASHINGTON, D. C., July 7.—In the summary of the exports and imports of the commerce of the United States for the month of April, 1916 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures relating to talking machines and supplies are set forth:

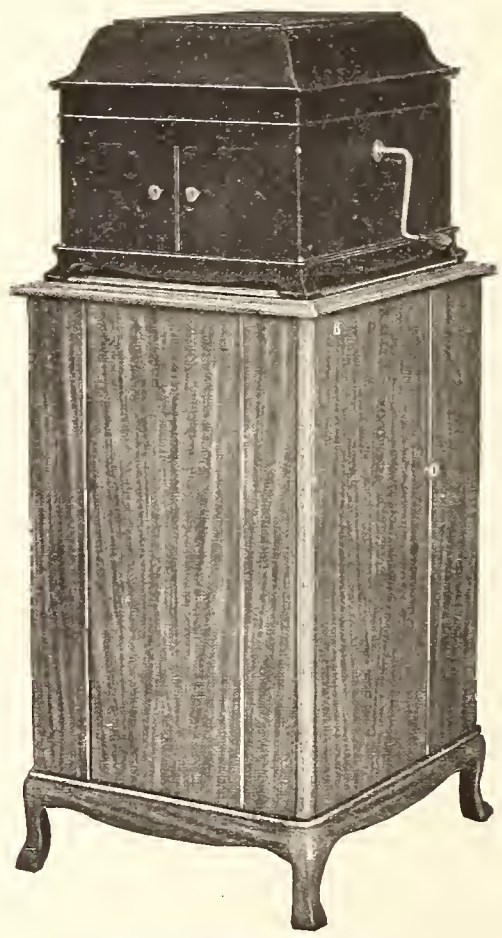
Talking machines to the number of 4,410, valued at $127,292, were exported for April, 1916, as compared with 2,748 talking machines, valued at $75,614, sent abroad in the same month of 1915. The total exports of records and supplies for April were valued at $129,558, as compared with $62,861 in April, 1915. For the ten months 32,657 talking machines were exported, valued at $964,238, and records and supplies valued at $793,827 were sent abroad for that period.

Wm. S. Scherman, of the Columbia advertising department, left Saturday for a fortnight's vacation—destination unknown. With the characteristic temperament of the modern advertising man Mr. Scherman prefers to wander where his fancy dictates.

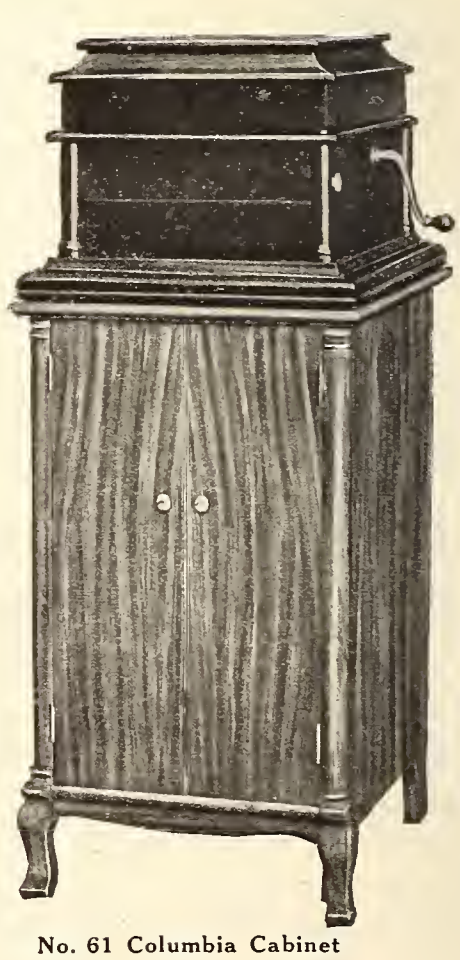
R. F. Bolton, district manager of the Columbia Co., returned from a week's visit to the up-State cities in his territory, which include Rochester, Albany and Buffalo. He states the business outlook in this section is splendid.



No. 38 Edison B80 Cabinet



No. 58 Victrola Cabinet



No. 61 Columbia Cabinet

HERZOG CABINETS are made for all types of talking machines. Several of the new models are shown above, and you can see that the designs represent the latest word in cabinet architecture. All of these three are excellent sellers and many dealers are making money by showing customers how it is to their advantage to own a Herzog cabinet.

TO INCREASE OUTPUT

C. M. Mayers, sales manager of the Castle Phonograph Co., New York, announced this week that the company had completed arrangements whereby its output will be increased fully 150 per cent. by the first of the year. The company had been endeavoring for some time to secure additional manufacturing facilities, in order to handle its growing trade. Mr. Mayers is now arranging to open a distributing center in Chicago and another office in a leading city in the far West which will enable the company's dealers to secure maximum service. At the present writing the Castle Phonograph Co. is concentrating on the manufacture of the Style "E" model, retailing at $30.

GEO. W. LYLE WITH DOMESTIC CORP.

Well Known Talking Machine Man Becomes Sales Agent for This Company With Offices in New York—Will Co-operate with Dealers

George W. Lyle, who for many years was vice-president and general manager of the Columbia Graphophone Co., New York, has become associated with the Domestic Talking Machine Corp., of Philadelphia, Pa.

Mr. Lyle has leased offices at 111 Broadway, Suite 815, New York, where he will make his

Geo. W. Lyle

headquarters as sales agent for this company. He is now engaged in organizing a capable sales staff, which will co-operate with the dealers and render them valuable and practical assistance.

Mr. Lyle is thoroughly familiar with every phase of the talking machine industry and he is especially well qualified to co-operate with the dealers, as he understands and appreciates their problems.

Since his retirement from active business a little over a year ago Mr. Lyle has been directing the destinies of a large farm, but was persuaded to re-enter the talking machine business by Horace Sheble, founder of the Domestic Talking Machine Corp., and one of Mr. Lyle's old friends.

TWO NEW APPOINTMENTS

R. G. Craig Appointed Head of New York Talking Machine Co.'s Efficiency Department—W. G. Porter Joins Staff in Executive Office

R. W. Morey, general manager of the New York Talking Machine Co., New York, Victor

R. G. Craig

distributer, announced this week the appointment of R. G. Craig as head of the company's efficiency department. Mr. Craig will also devote considerable time to the sales division, and will endeavor to co-operate with Victor dealers even more closely than the company has in the past.

Mr. Craig has been connected with the New York Talking Machine Co.'s sales department for the past year and a half, and during that time has visited Victor dealers throughout the East. He is therefore well qualified to extend real service to the company's dealers, and the signal success of the New York Talking Machine Co.'s efficiency work will doubtless be augmented under Mr. Craig's direction.

W. G. Porter, who has been covering New York and Pennsylvania territory during the

W. G. Porter

past year, has also joined the staff of the executive officers, and will be associated with the sales and efficiency division. Mr. Porter, during the short while he visited the trade, earned the friendship and esteem of his dealers, and he will work along lines that cannot fail to be profitable to the company's dealers.

C. H. Dietrich, talking machine dealer of 154 Monticello avenue, Jersey City, N. J., was among the business men who had a special display during the recent "Made in Jersey City Week" in that city.

295 FIFTH AVENUE NEW YORK

TO MANUFACTURE THE MANOPHONE

James Manoil Co., 60 Broadway, New York, Makes Announcement of New Line of Machines—B. Abrams to Be Vice-President and General Manager—Factory at Newburg

Announcement was made this month by the James Manoil Co., Inc., with executive offices at 60 Broadway, New York, of the manufacture of the Manophone. B. Abrams, formerly owner of the Grand Talking Machine Co., of Brooklyn, will be vice-president and general manager of the company. The other officials of the concern are James Manoil, president; Enrique Paats, owner of the Hercules Mineral Water Co., treasurer; while the directors are James Manoil, A. Livingston Norman, of Anderson, Iselin & Anderson, and Emil Oppenheim, of Oppenheim & Co.

While the executive offices of the company are at 60 Broadway, the factory is located in Newburgh, N. Y., where up-to-date facilities are maintained for the manufacturing of machines. Five styles of machines are now being put on the market.

Mr. Manoil, president of the company, was for a number of years general manager for Slocum, Aaron & Slocum, exporters and manufacturers. Mr. Abrams has had several years' experience in the talking machine business.

ONLY WAY TO TAKE A VACATION

Says Arthur D. Geissler, Is to Pack Up Some Day and Start Out Without Knowing Where You Are Going—How it Worked Out

"The only way to take a vacation and get a real rest is to pack up some day and start out without knowing where you are going, when you are coming back and where you will sleep from one night to the other," said Arthur D. Geissler, vice-president of the New York Talking Machine Co., New York Victor distributer, who returned last week from an automobile trip which carried him into parts of Canada.

When asked to explain his cryptic advice, and for an account of his trip, Mr. Geissler said: "I reached the office one day feeling pretty well fagged out and as the day progressed I wanted to get away from business, family and friends. During the course of the afternoon I 'phoned out to the house to have a few clothes packed in a grip, instructed my chauffeur to meet me, and left with no idea when I would return.

"When my chauffeur asked for instructions I told him 'to go north,' and that was my only itinerary. That night I spent in the heart of the Berkshires at a little place called Redman Inn. From there I went through the White Mountains and the lake resorts in that vicinity.

"One night we stopped just outside of Newport, Vt., and found a little farm with the sign out, 'Summer Boarders Wanted.' This seemed infinitely more attractive than any commercial hotel in the town, so I decided to stay there for the night, using as a garage a space in the front yard, topped by a huge oak tree.

"In the evening our hostess entertained us with one of the first types of Tel-Electric piano players, and she seemed to be greatly interested in me when she learned that I was connected with the Victor business. She told me that she had saved a little more than $100 towards a Victrola, which she was convinced would make her house the most popular resort in that section. The next morning I called up New York and managed to dig up a Victrola which had been traded in by a dealer and had a second-hand license. Our little landlady was overjoyed with the machine, and I suppose that by now the little farm with its modest retirement which served to attract travelers on the highway is in the throes of a full-fledged musical entertainment.

"The next morning found us in Quebec, and one of the most enjoyable parts of the trip was putting the 'car' on board the steamer at Quebec and going up the St. Lawrence to Montreal. That part of the journey back from Montreal is, in my opinion, the ideal motor tour of this country Around Lake Champlain and Lake George, through the Adirondacks, down the Hudson and through the haunts of Rip Van Winkle, making a trip of over 400 miles over the best State roads in the East.

"We covered 1,560 miles in nine days without an itinerary, and I believe that this kind of a trip, which nature has made possible, seems to have been laid out for the special benefit of the haphazard motorist."

George A. Baker, assistant advertising manager of the Columbia Co.'s local distributing division, is back from a week's rest.

FOREIGN RECORD ACTIVITIES

Columbia International Record Department Salesmen Hold Interesting Meeting

There was held recently at the offices of the International record department of the Columbia Graphophone Co., a meeting of a number of the company's salesmen who specialize on this division of Columbia record business. Among those who attended the meetings were Lambert Friedl, Pittsburgh, Pa.; A. Thalmeyer, Philadelphia, Pa., and Mr. Blimke, Chicago, Ill. Anton Heindl, head of the Columbia Co.'s international record department, provided a number of interesting topics for discussion, and the meetings were very successful. The Columbia Co.'s international record business has increased tremendously the past few years and is now an important factor throughout the country.

BUSINESS HAS TRIPLED

Success Achieved by the Mickel Bros. Co, of Des Moines, in Their Business

DES MOINES, IA., July 5.—In line with the general policy of improving service extended Victor dealers, Mickel Bros. Co., distributers in Iowa, recently completed extensive improvements in their general office and warehouse, 120 South Sixth avenue. A substantial display and demonstrating room handsomely equipped and furnished has been added for the reception of dealers and their customers. The room is finished in English brown mahogany, and with a general line of sample machines, gives the dealer an idea of proper dignity and value of display. The warerooms have been practically rebuilt with time-saving record stock racks and shelves.

Mickel Bros. Co., though young in the field of jobbers, have developed a large clientele of dealers. The local Des Moines office is under the management of W. P. Deal, recently a Victor factory traveler, who is proud to state that since his control the general business has tripled in comparison with previous years. Mickel Bros. Co. find courtesy, promptness and energy the foundation for their success.

THE PROBLEM OF SUCCESS

Gentle Manner and Winning Voice Always Win Friends, Especially in the Commercial World

Successful business men value their time often more than the best line of goods you can give them. If you beat about the bush to a tactful man he will show his impatience by scowling, and if you do the same thing to a candid man he will exclaim, "Well, what can I do for you?"

Coming to the point does not mean aggressiveness. Modesty wins even in business. It is especially valuable in combating an aggressive nature. A positive and negative force prevails in business as well as in electricity. A gentle manner and a pleasant voice always win friends, especially in the business world.

They give greater weight to your logical and concise facts. A convincing manner shows perfect self-control and a knowledge of men. Show that you have something worth while to say and offer by your voice, your carriage and walk. This is poise, and poise means that you are even more confident of your goods than of yourself. This says to your customer, "I have come to force this on you."

A successful man tells us that the time has come when business men, along with all others, must educate their faculties. They must learn how to overcome obstacles and to break down barriers by stating the value of goods. It is your business to see your argument from the beginning and to express it with clearness and precision.

If you wish to win in business it is your duty not alone to analyze the science of business but the thinking of your mind. You may imagine that it is as natural for you to think clearly and logically as it is to breathe. It is not. The fewest are given this gift, but it can be acquired by years of hard work and a desire to win.

NEW PATHE DEALER

The Pathé Pathephone Shop is the name of a new store opened this week at 3904 Broadway, New York. This store, which is located in the heart of the uptown residential district, will handle a complete line of products of the Pathé Frères Phonograph Co.

The capitalization of the Boston Book Co., 73 Broad street, Brooklyn, N. Y., is $5,600 instead of $2,500 as recently published. Julius Alter is president. This company makes talking machine record albums.

UTILIZING WINDOW DISPLAY

Mrs. E. Byrne de Witt Utilizes Both Warerooms and Window for Display Purposes

Those dealers who imagine that their front windows cannot be used to advantage because of limited size will find the accompanying photographs interesting and perhaps suggestive of similar displays. They represent the show window and interior of a new talking machine store recently opened by Mrs. E. Byrne de Witt, at 1398 Third avenue, New York. Mrs. de Witt handles the products of the Columbia Graphophone Co. exclusively.

This store is a small shop; only a few steps would carry you by the windows, yet the display is effective in every particular. The monthly hanger issued by the Columbia Co. is utilized, together with the "note the notes" cut-out, a recent Saturday Evening Post and a number of Grafonolas. A window transparency is also used to excellent advantage in connection with the running widow signs. The Columbia transparency was attached and a sign painter completed the entire lettering across both windows. The use of the transparency in this way saved the biggest expense in a window sign.

Referring to Columbia product, Mrs. de Witt says:

"It is with great pleasure I take this opportunity, at the opening of my new store, to express my extreme satisfaction with the Columbia line. I never realized the wonderful possibilities afforded a dealer through handling Columbia product until I started putting my energy in your direction. Since then I have been more agreeably surprised, and have established a profitable and constantly increasing clientele."

Attractive Quarters of Mrs. E. Byrne de Witt

LABOR MEN FAVOR STEPHENS BILL

Reports That Organized Labor Is Opposed to Price Maintenance Are Unfounded

Edmund A. Whittier, secretary-treasurer of the American Fair Trade League, stated in a recent interview that the reported opposition of labor organizations to the Stephens bill is a deliberate misrepresentation of facts, the truth of the matter being that only one small local in the entire country took adverse action when the bill was brought up before it for discussion, and this adverse action was taken under misapprehension and probably will be reversed, according to latest information. It is hardly consistent for organized labor to oppose the Stephens bill, for the principal on which labor organizations are founded is identical with that principal which underlies the standard price measure.

Labor organizations seek to standardize the prices of labor, and the Stephens bill seeks to standardize the prices of identified products of labor. Stable production and stable markets mean steady employment at satisfactory wages, and no labor organization can conscientiously oppose any measure which seeks to bring about these results. Many of the strongest opponents of the Stephens bill are concerns which pay exceeding small wages, many of the large department stores, which have been active in their opposition to this bill, being known all over the country because of the extremely small wages which they pay to their employes. It is interesting to note that almost all of the higher-class department stores are in favor of the Stephens bill, as are all manufacturers who seek to bring about conditions whereby an honestly-made product may be marketed under fair conditions and at a fair price.

Piano manufacturers and dealers alike should lend their hearty co-operation to the efforts now being made by the American Fair Trade League to bring about the enactment of the Stephens bill into law. Concerted action is necessary and every intelligent business man in this country should do all in his power to help bring about a condition which will be of lasting benefit to manufacturer, dealer and consumer alike.

The members of the 1915 class of Penn Yan Academy presented their alma mater with a handsome Victor Victrola at the commencement exercises held recently.

J. NEWCOMB BLACKMAN DEFENDS THE STEPHENS BILL

Presents Some Exceedingly Strong Arguments for Price Maintenance Before Governmental Committee as a Representative of the National Association of Talking Machine Jobbers

At the recent hearing on the Stephens bill before the Committee for Interstate and Foreign Commerce, House of Representatives, Washington, D. C., one of the most interesting addresses was made by J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, Victor distributer, and also one of the representatives of the National Association of Talking Machine Jobbers.

In the first part of his testimony Mr. Blackman briefly pointed out the unlimited arguments in favor of price maintenance, and after answering a number of questions propounded by members of the committee, was requested by the chairman of the committee to present his closing arguments in a limited time so that the hearing could be adjourned temporarily.

Mr. Blackman thereupon gave the following testimony which is an unusually valuable brief for price maintenance, and which, considering the fact that it was extemporaneous and given against a time limit, deserves special praise:

Mr. Blackman: Until the recent decision of the United States Supreme Court, by a vote of five to four, deciding that it was against public policy to permit restriction in price after the title had been given to an article, it was legal to conduct business restricting the re-sale price, regardless of the passing of the title.

Let us not lose sight of the fact that this decision might easily be reversed were the Supreme Court to re-hear the case. Then, again. the Supreme Court was merely interpreting the law, as affecting public policy on a question of the conduct of business.

It appears that the whole question sums up as to whether or not it is in the interest of public policy to allow a fixed price. This being the case, then why not decide that question instead of allowing it to be done through one process and prohibit it by another. which would appear as class legislation or interpretation of law.

Let me give you some examples where the provisions in the Stephens Bill are in operation and considered perfectly legal. I will draw a comparison between a real estate operator, who practically manufactures land through a process of taking a large tract of virgin land and developing and improving it until it represents improved and highly restricted property, and a mercantile manufacturer. The real estate merchant has the land surveyed and mapped out, showing roads and lots to be sold, and offers the property for sale. The restrictions are obligatory only after we have exercised our option to purchase, and we can refuse to buy, because of the restrictions, for the reason that there is to be found other property unrestricted, or with restrictions to our liking. We recognize, however, that these restrictions, to become effective, and in order that we may individually enjoy them, must be binding on other property owners and run for a certain length of time and be binding on subsequent purchasers. Such property may not necessarily be sold direct by the real estate operator, but through any real estate agent, and we have noticed quite generally that the real estate agents' commissions are uniform.

I have heard opponents of the Stephens Bill claim that when you take title to property you should be free to do as you please with it, and while you may reply that you could re-sell the property without restriction as to the price, the other restrictions certainly restrict your prospective purchasers to those who are willing to be bound by the restrictions.

This universal method of developing residence property is so generally recognized as desirable and necessary that you would not be considered a good neighbor if you attempted to break down values for purely selfish reasons, as follows: Suppose you decided to lay aside the moral question as to what was right and fair to the other purchasers, but with an ulterior motive rented your property to a family of darkies. You know that this would affect the value of the entire property, but more particularly the adjoining properties. After you have in this manner damaged the values of the adjoining properties, you might indirectly buy them in, and by a pre-arrangement plan for your own selfish benefit, in that way ruin values and revert to yourself the benefit. Your action would not be approved, and you would not be respected, even though you might be able to get away with it. Why not say in this case that a real estate operator can still sell his property and get his price? You can readily see that he may not be able to sell it as residence property to the class of buyers intended and that values in the entire real estate development referred to have been seriously injured, although the land remains the same.

Does this not compare with the manufacturer who erects a factory, buys raw material in large quantities, and proceeds to map out a plan for manufacturing of merchandise, and turns the bulk raw material into small lots, or a manufactured product? Does not the price cutter, who, regardless of business ethics, uses some of the product as bait, create a false standard, and does he not have an ulterior motive, as in the case of the real estate sharper, who rented to the darky family? There seems to me to be a strong resemblance in the effect of the damage to the producer in both cases. However, in the first instance, it is generally frowned on, and in the other considered quite clever, and the consumer, who does not regard the rights of others, but simply follows his selfish desires, takes advantage of these cut-price schemes and lauds the price cutter. If it is a good argument that the producer and consumer can take care of themselves without restriction, which some claim take away independence, then there are many laws on the statute books to-day that should be repealed. We know, however, that public policy demands laws, and that there shall be uniform observance. We need a police department in business, as well as in socicty.

Here is another illustration. When Henry Ford found that he could not sell his automobiles at a uniform price through independent agents, did he agree with the government that a uniform price was unnecessary and not in the interest of public policy? On the contrary, being one of our largest and wealthiest manufacturers, he immediately

J. Newcomb Blackman

changed his system and distributed his automobiles at uniform prices through his own stores by a process of holding title to the automobile until it was sold at a uniform retail price. If uniform prices are wrong, wherein has the public been benefited, and if, as 90 per cent. of the merchants of the country believe, they are absolutely necessary to insure uniform quality and satisfactory service, then why make it possible for only the largest and wealthiest manufacturers to operate legally on a uniform price basis?

The prices at which some standard trade-mark goods are sold represent such losses that were we not aware of the fact that the loss is made up on other goods, on which a proportionately high profit was made. we would question whether the goods had not been stolen. The methods pursued by some price-cutters, I believe, constitute commercial stealing. and I believe the Stephens Bill protects the honest manufacturer, wholesaler, retailer and consumer, and will be legislation that will foster and protect honest merchandising.

Some one referred to the Big Ben clocks in a manner that would indicate that the price was inflated to pay for advertising, and that it was not the merit of the article itself which brought about such a large sale. I do not agree with this statement, nor the statement that any advertising of a reputable article increases the cost; on the other hand, have found that by quantity production through increased demand, better value has been obtained. I used to buy ordinary alarm clocks of the unknown variety without any guarantee for about 98c. each. They lasted a few months, and I threw them away. About two years ago I bought a Big Ben and a Little Ben. They are keeping good time, are apparently as good as new, and I think I have received my money's worth. You do not have to buy Big Bens, but can select the 98c. variety, but I want manufacturers who produce a good article to have the protection that will enable them to continue.

The Gillette razor has been referred to. I bought one about ten years ago and paid the full list price. of $5.00. It is as good as new, and I feel that I have, in that case. value received. I tried a razor put on the market and widely advertised at 25c. After one shave, I decided that the price compared with the article. Then, again, I tried a dollar safety razor, and while it may be fairly said that it was worth a dollar, I believe that my experience with the Gillette is not one that calls for any complaint.

Personally, I do not ask the government to give me the right by fair or unfair means to get merchandise I want at a price I want to pay, regardless of the injury to the merchant. So long as there are plenty of safety razors, shoes, hats and other articles of merchandise in competition, the law of supply and demand will give me ample protection.

A Congressman from the South asked me whether the Stephens Bill would enable the cotton merchant to brand his cotton and sell it at a uniform price. I said, "Certainly, nobody will stop you." And then he said, "Can we get the price?" I replied, "I was not aware that it was the purpose of this bill to sell the goods for the merchant. If he has not enough real value in his goods, the branding of them and putting a uniform price on them will re-act, and he will not exercise his option to do business under the provisions of the Stephens Bill."

In conclusion, I think the consumer should have the protection of the Stephens Bill, in order to insure him a steady supply of identified merchandise at a uniform price and quality. The small independent merchants of the country should be able to buy goods from manufacturers who desire to operate under the Stephens Bill, to protect them against being put out of business by the merciless price-cutter, or by the necessity of a manufacturer doing business through his own stores, to operate on the uniform price basis. The producers or manufacturers need the protection of the provisions in the Stephens Bill to enable them to manufacture goods of uniform quality, which is only possible with a uniform price.

Before my time is up, let me get this home. It is *strictly optional* whether any one chooses to operate under the Stephens Bill. Any producer or manufacturer under the terms of the Stephens Bill must lay his cards on the table with the government, thus exposing his system to the fiercest competition. To qualify for operation under this bill there must be *no monopoly*, and if a monopoly develops, tbe operator would immediately *disqualify*.

A privilege and a protection will be restored, which was only recently removed, by the closest possible decision of seven Supreme Court judges as to the interpretation of law in the interest of public policy.

The underlying reasons calling for the passage of this bill are to foster and protect honest merchandising and discourage immoral practices in business. The element of competition is *not lessened, but increased,* and it is changed only to the extent that it makes it possible to more clearly define what is *honest competition.*

Truetone Combination Sets

ACME Die Castings

ACME DIE CASTINGS are made under great pressure in steel moulds. They are cast accurately to the thousandth part of an inch, and are delivered to you ready for assembling and plating.

The Acme patented process makes possible a beauty of design and wide range of construction which cannot be secured by other means except at very high cost. When light weight is essential the castings may be made with 1/32 in. walls.

Beautiful finish, strength of the metal and its close, velvety grain are characteristic features of Acme Die Castings. They present a perfect surface for plating of any kind—nickel, brass, gold, etc.

Acme Dies are guaranteed for an unlimited number of castings.

The service of experts—Prompt deliveries

The Acme organization is composed of experts who have had years of experience in die-casting phonograph parts. They are ready to co-operate with you, and their help in carrying out your plans or in offering suggestions will be found valuable.

The production capacity of Acme Die Casting Machines is greater than that of any others in existence using similar metals. This means *deliveries*. You can depend upon getting your castings when you want them. Our daily capacity per die is greater.

Send us prints or models for estimate, stating quantities you will use. You will find our prices low considering the quality of the castings and the high quality of our service.

Act now and be convinced.

PRIZE WINNERS IN SINGING CONTEST MAKE RECORD.

Successful Contestants in Denver Newspaper Contest Make Trip to New York for the Purpose of Making a Record for Columbia Co.—Royalties to Establish Fund for Amateurs

A record of unusual interest was made last week at the laboratories of the Columbia Graphophone Co., New York, when Miss Alice Forsyth, a soprano, and Chauncey Parsons, a tenor, each recorded a selection for a Columbia double-faced record, to be issued shortly. Behind the making of this record is a story of effort and achievement which has attracted the attention of the newspapers and musical worlds in a number of the large cities.

Chauncey Parsons Recording in the Columbia Laboratory

Last month H. A. Herrick, managing editor of the Rocky Mountain News, a Denver newspaper, after conferring with several of his friends, including E. J. Dalzell, Columbia wholesale representative, decided to hold a contest which would be open to all amateur singers in the State of Colorado. The winners of this contest were to be the guests of Mr. Herrick and his newspaper on a trip to New York, and arrangements were consummated with the Columbia Graphophone Co. whereby they would make a record at the company's laboratory. This record was designated as the "Scholarship Fund Record," and it was decided that a certain proportion of the sales from this record would be devoted to a fund to be known as the "News-Times-Columbia-Colorado - Scholarship Fund." This fund was to be placed at the disposal of deserving and needy amateur singers, whose voices showed unmistakable signs of rare talent, but whose means did not permit of a continuation of their studies.

Chauncey Parsons—Alice Forsyth

As soon as Mr. Herrick announced this novel contest he was deluged with applications, and every means was taken to have the contest fairly judged without prejudice to any competing singer. It was decided to divide the tests into three groups, preliminary, semi-final and finals. Every contestant was assigned a number, and from the moment they entered the contest the identity of each singer was unknown to any group of judges.

A total count of the contestants showed that 452 amateur singers in the "Centennial State" had signified their intentions of entering the contest, and as the great majority of these amateurs possessed very pleasing voices, the judges were forced to exercise extreme skill and care to give absolute justice to all the singers.

On the night of the final contest Mr. Herrick arranged for the use of the Auditorium Theatre, the largest theatre in that city, and one of the best-known amusement houses in the West. An audience of four thousand music lovers assembled to hear the finals of the contest and a similar number were unable to obtain admittance to the theatre.

The judges at the final contest consisted of Prof. George M. Chadwick, of the University of Colorado; Dean Edward Danforth Hale, Colorado College; Prof. Al. B. Longacre, University of Denver; Dean Henry Housely and Dr. Nicoll Brown. The contest finally narrowed down to twelve contestants, and the judges, after a lengthy consideration of the qualities of each competing voice, selected Miss Forsyth and Mr. Parsons as the winners. The contest was decided upon the following qualifications—natural voice, tone production, interpretation and diction. After being announced the winners, Miss Forsyth and Mr. Parsons left for New York, in charge of Mr. and Mrs. Herrick. They spent quite some time at the Columbia factories in Bridgeport, Conn., and made a record which has been pronounced a decided success, and which will be placed on sale shortly.

Miss Forsyth has a natural voice of remarkable beauty, and at the public hearings, astounded the critics with her clarity of diction and tone production. Neither Miss Forsyth nor Mr. Parsons has appeared on any public stage, but their achievement in the Denver contest has brought them many offers.

DEFERRED PAYMENT CONTRACT

The Victor Talking Machine Co. sent out to its dealers recently a sample copy of a deferred payment and instalment contract. The company strongly recommends that for the sake of uniformity Victor dealers use this new form of contract, where payments of cash royalties on the instalment plan are accepted.

This contract contains an interest clause calling for 6 per cent. interest upon deferred payments which is the usual rate of interest collected by Victor dealers.

An interesting section of this contract is a supplemental "endorsement" whereby another party guarantees that the purchaser of the Victor machine on the instalment plan will either pay the amount specified in the contract or will return the Victor machine to the dealer within thirty days after default or violation of any of the conditions mentioned in the contract.

The use of this endorsement is, of course, optional, although the Victor Co. suggests that it is advisable, as experience has shown that frequently an employer or responsible friend will sign this endorsement in the nature of a guarantee only of the honesty of a customer.

Patent No. 1131895

UNCLE SAM and the MEXICAN

Uncle Sam is Booting the Mexican Bandit in Vigorous Yankee Fashion and Boxing his Ears. The Mexican is "Beating It" as fast as he can go.

Only one dealer has seen this novelty before this copy was sent to the Talking Machine World. He is the manager of a large Victor Distributor and said: "*Send us one gross of Uncle Sam and The Mexican as soon as possible.*"

This Novelty is timely and a side-splitter. We have had to use our "First Aid to the Injured" on people who have seen it in our factory.

Recommended in connection with the following records:

Columbia { They're on their way to Mexico A1565 / Patriotic Airs March - - No.5573 / National Emblem March - No.1025

Victor { They're on Their Way To Mexico - No.17599 / National Emblem March No. 1025

(This toy does not fit on the Edison Machine)

These figures are hand painted in four colors and Retail at $1.25. **Price to Dealers** $9.00 per dozen. **Order at once and get this Novelty first.** Will be a tremendous hit with the Public — A good Midsummer Novelty and Business Getter.

QUICK RECOVERY FROM FIRE LOSS

Schloss Bros. Plant Again in Full Operation Within a Month After it Had Been Over Half Destroyed by Blaze

The practically complete recovery in three weeks from the effects of a fire that destroyed practically half its plant and caused heavy damage to the remaining section, is the unusual record made by Schloss Bros., talking machine cabinet manufacturers of this city. On June 17, in the midst of a thunderstorm a bolt of lightning came through one of the windows on the top floor of the company's factory and started a dangerous blaze that got beyond the control of the employes. Before the fire engines arrived the entire floor was a mass of flames, which were eating their way through the roof. Three alarms were immediately turned in by the firemen, bringing the necessary fighting force.

The great quantity of water thrown into the blazing floor poured through to the floors below, soaking machinery and a large stock of finished and unfinished cabinets. Through good fortune several carloads of dimension stock which had just arrived was still in the railroad yards awaiting unloading when the fire came. This stock was moved into temporary quarters, the machinery dried out, repaired and put into operation, and within about a week a large section of the factory was in full working order.

As The World goes to press the burned section has again been occupied, and Schloss Bros. are sending out cabinets at their usual rate. Complete recovery is attributed to the energy of Myron Schloss, president, and Edwin G. Schloss, general manager of the company.

REINHART IN CHARGE OF CREDITS

Becomes Head Credit Man for New York Talking Machine Co.—M. Owens Joins Staff

M. M. Reinhart has been placed in charge of the credit department of the New York Talking Machine Co., New York, Victor distributer. Mr. Reinhart has been associated with the company for more than a year, and during that time has won the friendship and esteem of Victor dealers and his associates. He is fully conversant with the requirements of his new post, and will endeavor to co-operate with the company's patrons in every possible way.

Morris Owens has joined the staff of the New York Talking Machine Co., occupying a position in the credit department.

L. L. Spencer, of the Silas E. Pearsall Co., 16 West Forty-sixth street, New York, has returned from a short visit to his old home in Illinois, where he spent a part of his vacation.

Thos. Mee opened a talking machine store at Clinton, Ill., recently, featuring the Columbia Grafonola.

NEW HELP FOR EDISON DEALERS

Salesman's Manual, Containing Talking Points on Edison Phonographs, Just Issued

A new salesman's manual, designed for the use of dealers in the new Edison, recently has been issued and distributed by Thomas A. Edison, Inc., of Orange, N. J. The manual is novel in that it has been bound in loose-leaf form, which will permit the addition of supplementary material to the various sections into which it is divided. The book treats the new Edison from a demonstrating and sales standpoint and between its covers there is a liberal education for those selling this instrument.

Among the features is a "Straight Talk," which outlines the form of an ideal demonstration. By a study of this outline demonstration the dealer will learn the most effective method of presenting his facts and marshaling his arguments in dealing with a prospect. Another department is devoted to a series of questions and answers. Other pertinent points regarding the Edison are driven home by the same methods. The book also contains selling points on all of the records in the new Edison catalog.

With each manual a set of cards, each showing an Edison artist singing in comparison with Edison's re-creation of their voice and a brief description of their artistic capabilities.

INCREASE CAPITAL TO $1,300,000

At a meeting of the stockholders of the Pathé Frères Phonograph Co., held at the company's executive offices last week, it was decided to increase the capital of the company from $900,000 to $1,300,000. This increase was suggested to the stockholders subsequent to a meeting of the board of directors.

By increasing its capital to $1,300,000, the Pathé Frères Phonograph Co. will be in a position to adequately take care of the remarkable expansion of its business, which has been particularly impressive the past year. New factories are now being erected and a number of important manufacturing and merchandising deals have been closed which insure an outlet for the company's capacity production during the next twelve months.

VISITING YELLOWSTONE PARK

MINNEAPOLIS, MINN., July 10.—Archie Matheis, proprietor of the Talking Machine Co., Victor dealers, of Minneapolis, with Mrs. Matheis, left July 1 on an automobile trip to Yellowstone Park and return. They are acting as official pathfinders of the southern route to Yellowstone, and are reporting road conditions to G. Roy Hill, secretary of the Minneapolis Automobile Club. Mr. Matheis, who reports good business prospects, expects to return about the first of August.

THREE NEW TALKING MACHINE HOUSES FOR ST. LOUIS

Brunswick-Balke-Collender Co., Artophone Co. and Pathephone Co. will open new stores in a Few Weeks—Local Trade Reports Record-Breaking Sales for Past Month—Patriotic Songs in Demand—Dealers Seeking to Solve the Problem of Approvals—Other News

St. Louis, Mo., July 6.—With three new talking machine houses due to open within a few weeks, an old line piano house adding a machine of its own to its line, there is plenty of interest on "Piano Row" besides talking over the June sales records that equal those of holiday months, as was the case with many houses.

The new stores are those of the Brunswick-Balke-Collender Co., at 1118 Olive street, which will open July 15. While this store will handle other goods made by this firm, which have been sold by a branch store in another part of town for many years, the new store will feature the Brunswick talking machines. Local dealers who have seen this machine are free with praise of its appearance.

Another new store will be opened by September 1 by the Artophone Co., of this city, at 1113 Olive street. The Artophone Co. will use this building as a sales wareroom and assembly and manufacturing plant except the fifth floor, which has been leased to the Baldwin Piano Co., whose warerooms are next door, to be added to the Baldwin shop space. The Artophone machines are advertised as "made in St. Louis," and have been on sale here several months.

The third store, which will be opened by August 1, is that of the Pathephone Co., of Missouri, at 1010 Olive street. R. H. Gordon, manager of the Pathephone Co., returned from the jobbers' meeting in New York late last month and immediately got the decorators busy on his new place. The Pathephone business has outgrown the second floor quarters leased by this company when it opened for business here last September. The added record racks now occupy about half of the space formerly devoted to both records and display of machines. Mr. Gordon says that much interest is being shown in the new models of the Pathephone and he expects fine fall orders on these. His record orders are running unexpectedly heavy.

The local trade has run out of all bounds, according to all dealers. A number of them report June totals as higher than those of last December, their former highwater mark, despite that in practically all lines there is a shortage of certain models of machines or of the most popular records.

The Columbia warerooms have enjoyed a very favorable month despite a shortage of the small machines to meet the demand for the outing trade. A big hit has been made with the records of "Wake Up, America," "They're on Their Way to Mexico," and "Soldier Boy." Heavy sales of the second number were made to men in soldier's uniform after the mobilization of the local militia was ordered. It was apparently the only talking machine record that exactly filled the bill. The Columbia Co. advertised this feature heavily and accompanying the placard in the show window announcing the numbers was a pile of sand, a reminder that the St. Louis soldiers were on their way to Laredo, where there is more sand than anything else except heat.

Manager Irby W. Reid was in Chicago the first of the month on a business trip. A June visitor at the Columbia warerooms was Arthur Erismann, Columbia district manager for New England, and son-in-law of Mr. Reid. Mr. Erismann found his visit to the local store quite profitable and was enabled to leave some pointers, so his stay was mutually agreeable.

The Guassman-Perker Furniture Co., at 8206 North Broadway, St. Louis, is a new Columbia dealer. This firm placed a heavy initial order and is preparing for an extensive trade, as it does a heavy country trade north of St. Louis.

Manager Ching, of Aeolian Hall, says the June business in Aeolian-Vocalion machines was surprisingly good. A feature now is the number of Vocalion owners who bring their friends into the store to buy, a custom which the Aeolian Hall salesforce regards as very complimentary to their machine. The record business, which now is well established on the first floor, is thriving. The move to the first floor from the former basement rooms has proved to be a distinct advantage, despite the fact that the basement salesroom left little to be desired. Aeolian Hall service in keeping track of record customers, too, helps.

The Silverstone Music Co. reports an excellent business in Edison machines and records. The sales of Diamond Disc records would be better, it is said, if the supply was equal to the demand. A bit of good news from the Edison standpoint was that the Stix, Baer & Fuller Drygoods Co. has advanced to the A class of

THE WONDER TALKING MACHINE COMPANY

113-119 Fourth Avenue (at 12th St.) New York Telephones: Stuyvesant, 1666, 1667, 1668

dealers. This department store has been advertising the Edison machines quite freely. They also advertise the Victors, which they handle.

One of the problems that is causing a good deal of study is that of returns of records taken out on approval. One dealer has been keeping record and he finds that it is not the average customer who violates rules and does other annoying things, but the wealthy machine owners. He also finds that this class of persons is likely to have a worn or damaged record, order this number to him (or her) on approval and keep the good one and return the damaged one. Also there is a growing tendency of owners of a laterally cut record machine to order hill and dale records and try them out on their machines and then return them, usually more or less damaged. This complaint comes from dealers in both styles of records. It seems that no machine owner is satisfied with the records made for their machines, as long as some lists seem to be. One dealer who practically refused to sell a hill and dale record to the owner of a machine that played only laterally cut records was threatened with a suit and later this customer tried to force him to take back the record that he had threatened suit to obtain. These and other things have made it appear that it would be better to cut out approvals all together or at least establish an approval department and keep records in this department and not inflict those once sent out on approval on the good customers who come to the demonstration rooms to listen and then buy or the still larger class that come in, tell what they want, pay cash and have a right to be indignant if they get a damaged record.

A manufacturer's agent in Canada desires to receive samples and quotations from American manufacturers and exporters of talking machine points. Full information may be secured by addressing the Bureau of Foreign and Domestic Commerce, either at Washington, D. C., or at the Customs House, New York City, and referring to foreign trade opportunity No. 21,394.

NEW SONORA CATALOG ISSUED

Artistic Booklet Describing Different Sonora Models Just Off the Press

Many new departures in catalog construction are seen in the new volume illustrating and describing the Sonora phonograph, just issued by the Sonora Phonograph Corporation, 57 Reade street, New York, and now being mailed to the trade. Coming from the press of the American Lithographic Co., New York, it is needless to say that it is a specimen of the beautiful in the printing art.

A new feature in the presentation of the different Sonora models is the grading of each type of machine according to the tone, which was carefully done by a board of tone experts. For example, the "Supreme" model of the Sonora, retailing at $1,000 (construction and design patented), has a tone grading of "AA," while the "Invincible" model is graded "A," and as the various models are presented, the grading differs, model "Melodie" taking a tone grading of "F." This new departure will give to the customer a clearer idea of the musical value of the different models. As the catalog says: "All Sonora machines are graded according to tone. The difference lies in added fullness and depth with each grade, produced by scientific means; but all Sonora machines, from the highest to the lowest in price, have a true Sonora tone, worthy of the name. Sonora tone is free from metallic sounds and the rattling of mechanism. Friction between the record and the needle is reduced to a minimum."

Some of the Sonora features covered in this volume by articles are: Tone Control, Universal Playing, Sonora Motor, Cabinet Design, Sonora Motor Meter, Envelope Filing System, Sonora Electric Instruments, Needles, Testimonials, Awards, and Record Cabinets.

Although a separate catalog has been published relating specifically to the "Supreme" thousand dollar Sonora phonograph, two pages in this catalog are devoted to it. Other models are the "Invincible," the "Grand," the "Laureate," the "Elite," the "Baby Grand," the "Imperial," the "Troubadour," the "Barcarolle" and the "Melodie."

EDISON FACTORY BAND ORGANIZED

Employes of Thomas A. Edison, Inc., Form Brass Band—First Public Appearance

A band has been organized at the Edison factories at Orange, N. J., the membership being confined to men employed in the Edison plant. Arrangements have been made whereby the members of the band will have the advantage of the best instruction that can be provided and a high-class musical organization is anticipated. Although formed only a short time ago, the Edison band already has an extensive membership and a lively interest is being manifested in its activities, both on the part of the members and their fellow employes.

The first public appearance of the new organization was on June 14, flag day, when, with appropriate ceremonies, the stars and stripes were raised above the roof of Mr. Edison's laboratory. Despite the fact that only a few rehearsals had been held, the efforts of the musicians resulted in the production of some inspiring music, which was thoroughly enjoyed by the large number of employes of the Edison factories present.

VICTOR OFFICES BEING MOVED

CAMDEN, N. J., July 7.—The executive offices of the Victor Talking Machine Co. are being slowly moved from the former headquarters at the southeast corner of Front and Cooper streets, to the magnificent new building at the northwest corner of the same streets. The moving is being effected slowly so as not to interfere with the work of the concern.

The Heidelberg Furniture Co., of Jackson, Miss., recently opened a Columbia Grafonola department.

W. S. GRAY WITH DOMESTIC CORP.

Becomes Pacific Coast Sales Agent for This New Manufacturing Concern

Walter S. Gray, who for the past eighteen years has been connected with the Columbia Graphophone Co., and for twelve years their Pacific Coast general manager, has resigned his position to become Pacific Coast sales agent for the Domestic Talking Machine Corp. In such capacity Mr. Gray will have entire charge of

Walter S. Gray

sales of Domestic talking machines on the Pacific Coast.

Mr. Gray can well be classed as one of the pioneers in the talking machine industry and can recount many amusing incidents of happenings when talking machines were a decided novelty.

Many houses prominent in the talking machine trade to-day owe their introduction to the industry to his efforts. Not only has Mr. Gray occupied a prominent position in talking machine trade circles in the United States, but he is responsible for starting many large accounts in China and Japan, having traveled the Orient on a number of occasions.

Mr. Gray expects to open offices in San Francisco, which he will make headquarters for selling Domestic talking machines on the Pacific Coast. His friends in the trade are legion and all join in wishing him the full measure of success which his years of experience plus the attractiveness of the line he will concentrate on seem to fully justify.

CONDITIONS GOOD IN MIDDLE WEST

Declares Otto Heineman Upon Return from Trip Through That Section—Chicago Office Doing Large Business in Machine Parts

"Business conditions throughout the Middle West are splendid, and from all indications the talking machine trade will enjoy a record-breaking fall prosperity," said Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, who returned last week from a visit to the company's Middle West branch in Chicago and the factory at Elyria, O.

"Our Chicago office has been closing a business far beyond expectations, and this applies to our tone arms and sound boxes as well as motors. The talking machine manufacturers in the Middle West are building up a steady and profitable business along lines which insure the stability of the industry.

"The new and additional departments at our factory are now in working shape and with the increased facilities they afford us we can assure our clients a more effective service and co-operation than they have received in the past. These new departments contain new machinery of the most modern type and our output will be augmented considerably by these additions to our plant."

DEALERS INSPECT VICTOR LINE

Many Conventioners Visit Victor Jobbers—Interested in Record Stock Systems

The recent piano convention, which attracted dealers from Coast to Coast, was responsible for a large number of dealers calling at the headquarters of the local Victor distributers, in order to get in touch with conditions in the East. These visitors carefully examined the latest ideas in record stock systems so that they may utilize them in their own establishments.

Among these out-of-town Victor dealers were the following, who spent some time at the offices of the New York Talking Machine Co., Victor distributer: Mr. Parker, Parker-Gardner Co., Charlotte, N. C.; Messrs. Lamotte and Thearle, Thearle Music Co., San Diego, Cal.; W. C. Heim, Danbury, Conn.; Mr. Marshman, manager of the Victor department, McClure & Cowles, Albany, N. Y.; W. J. McCarthy, William Mueller Co., Baltimore, Md.; J. H. Troup, Jr., and Robert Troup, Troup Music House, Harrisburg, Pa.

INTRODUCE THREE NEW MODELS

Special Tone Arm Also Produced by Mutual Talking Machine Co., Recently Reorganized

The Mutual Talking Machine Co., New York, which recently reorganized, increased its capital and broadened its activities, has added three new models to its line, retailing at $37.50, $50 and $75. The company has also arranged to manufacture talking machine parts, specializing on the production of a tone arm embodying several distinctive features.

The Royal Cabinet Manufacturing Co., a subsidiary company to the Mutual Talking Machine Co., has been formed, with H. Lobschutz as general manager. This concern will manufacture all Mutual cabinets and has also equipped its plant to do general cabinet work for the trade.

THE PATHÉ LIBRARY

The Following Famous Artists Are But Part Of Pathé Exclusive Talent

We have in the Pathé library exclusive records by artists of great fame who have never been heard in this country, and because of their contracts abroad may never be heard in America—except from a Pathé Disc. We also have many other Pathé artists who have won fame upon the American operatic stage.

Muratore, Chicago Opera Company; **Albers,** Opera Comique, Paris; **Burzio,** La Scala, Milan; **Parvis,** La Scala, Milan; **Noté,** Grand Opera Company, Paris; **Fitziu,** Metropolitan Opera House, New York; **Bassi,** Covent Garden, London; **Burrian,** Metropolitan Opera House, New York; **Didur,** Metropolitan Opera House, New York; **Rudolph Ganz,** the solo pianist; **Dr. Bernhardt Steinberg,** Cantor of Temple Beth-El, New York, recognized as the greatest authority in America on traditional Jewish music; **Aumonier, Bardi, Chenal, Denera, Thomas Egan, Baptiste Hoffman, Grace Hoffman, Junka Burchardt, Magliulo, Merentie, Montesanto, Scampini, Sparkes, Tanzler, Vaguet, Vogelstrom, Weil,** and numerous additional well-known singers, soloists, symphony orchestras, bands, "trios," etc., who record **exclusively** for Pathé, place the Pathé dealer in an enviable position to supply the constant public demand for something *New, Exclusive, Better.*

The following artists of international fame also record for Pathé: **Vallandri, Sammarco, Ancona, Urlus, Cavalieri, Giorgini, Ober, de Cisneros, Slezak, Galvany, Titta Ruffo, Lenzi, Journet.** The "golden voices" of hundreds of other of the world's greatest artists are heard at their best on Pathé Records.

Do you not see the impregnable position the Pathé dealer holds when he is able to offer his public such records as these? Records which, artistically, are unsurpassed.

The Pathé library meets every need of the dealer. Besides these great selections by opera and concert stars and by famous orchestras and bands, it is kept constantly up to date with the newest popular music of the day.

The large size of the average Pathé Disc make possible longer sound waves. The longer the sound wave the truer the music.

OF FAMOUS ARTISTS

Don't Sell Your Customer "Half" a Phonograph

Sell the Pathephone, which plays **any** make of disc record. And, if your customer owns a machine which is not of Pathé make, you can sell him Pathé records just the same. Pathé discs play beautifully on any standard make of phonograph. A simple attachment accomplishes this.

The Pathé "Violin" Wood Sound Chamber produces a rich, full, throbbing tone, which a metal or part metal sound chamber can never achieve. This feature makes the Pathephone wonderfully easy for you to sell. In fact, all the Pathé selling points are sales clinchers. For example—

The Pathé Sapphire Ball

the polished round jewel which glides smoothly over the face of the record, without ever ripping or wearing. You never have the bother of changing needles on a Pathephone. The Sapphire ball does not wear out, nor wear, dig or destroy the record.

Pathé discs sell for 65c to $4.00 and are *all double-faced,* including records of the greatest artists.

Dealers: Are You Awake To This Opportunity?

Are you awake to the fact that you really have something *new* and *exclusive* if you secure a Pathé Agency? You have:

1. A name—Pathé—which stands for highest quality—Pathé.
In Europe this name has long signified pre-eminence in two fields—Phonograph and Moving Picture. In America, Pathé Frères are now duplicating their European success.
2. Abroad, Pathé Discs have enjoyed artistic supremacy for over twenty years.
3. The support of National Publicity of the highest order. *Watch for the new Pathé advertising in the Saturday Evening Post.*
4 The backing of a business house of acknowledged high standing.
5. The co-operation and assistance of an experienced selling organization, which supplies you with every possible aid to quick sales—literature, handsome store hangers, bulletins, letters, catalogs, etc., etc. An organization as alive to *your* interests as to its own.

Think one minute, and you will write asking for full information about the Pathé line and our *attractive proposition to new dealers.* Write *now.*

EDISON DEALERS IN CONVENTION

Greatest Gathering in History of the Edison Trade in Session Recently in New York

The second annual convention of Edison phonograph dealers was held at the Hotel McAlpin, New York, on Thursday and Friday, June 22 and 23, and was successful in every way. A number of special cars from various points throughout the country brought in a large number of Edison dealers which, together with the dealers from near-by territories, brought the attendance to more than 500.

Second Annual Convention Banquet of Edison Dealers at Hotel McAlpin

The first business session took place Thursday afternoon, when A. C. Ireton, general sales manager for Thomas A. Edison, Inc., made an address of welcome to the visiting dealers. A message from Thos. A. Edison was read by William Maxwell, vice-president, Thomas A. Edison, Inc., and the characteristic utterances of this world-famous inventor were enthusiastically applauded. An original play, in one act, entitled "Bought and Nearly Paid For," was then produced by Frank Smithson. The plot of this piece is woven around the method of demonstrating and selling an Edison phonograph. It was very capably acted by Miss Nannette Flack, William Wadsworth and Richard Tucker. During this playlet the dealers sat as critics and entered into an animated discussion in which every one present freely joined.

The open forum Thursday afternoon included two interesting papers entitled "Ideals and Editorials," by Edward C. Boykin, director of sales promotion, Thomas A. Edison, Inc., and "The Ideal Dealer and His Reward," by T. J. Leonard, assistant general sales manager, Thomas A. Edison, Inc., who outlined the probationary zone policy of the Edison organization.

The banquet was held Thursday evening at the Hotel McAlpin and the diners were entertained by a number of prominent Broadway actors. Subsequent to the banquet a concert was given by the following Edison artists: Miss Elizabeth Spencer, Miss Helen Clark, Joseph A. Phillips, Billy Murray, Walter Van Brunt and the Criterion Quartet.

The Edison artists who took part were greeted with unbounded enthusiasm by the dealers. Miss Spencer, who is a great favorite with Edison dealers and owners, received a veritable ovation and responded by singing several request selections, among them the famous and universally loved "Happy Days." The reception to the other artists present was only a shade, if that, less enthusiastic. As a grand finale all joined in singing "The Star Spangled Banner."

On Friday morning Dr. Miller Reese Hutchison, chief engineer and personal representative for Mr. Edison, read a very interesting paper, entitled "Why the New Edison Is a Laboratory Product." This was followed by a paper entitled "Mechanical Service," by F. F. Gilmore, engineering attaché to the musical phonograph division, Thomas A. Edison, Inc.

The afternoon session included the following papers: "The Diamond Amberol Line," by K. R. Moses; "Doing It Better and Differently—the Way to Win," by W. D. Wilmot, Fall River, Mass.; "Things You Want to Know About," by William Maxwell.

The open forum on Friday featured "Tone Test Recitals," by Mme. Marie Rappold and Arthur Middleton, Edison artists. This forum concluded with the showing of "The Voice of the Violin," an Edison motion picture, featuring the new Edison, a photo-dramatic demonstration of Edison's new art, music's re-creation.

Motors, Tone Arms and Sound Boxes

You are in the phonograph business. You intend to stay in it. You claim some individual merit in your product—else you could not stand present day competition.

We are making tone arms and sound boxes, constructed specially to meet your ideas so that you may maintain a position among the leaders in the trade.

If you want to use an exclusive type of tone arm or sound box, send us rough drawings and we will submit our quotations, which will be unusually low—consistent with high quality materials and good workmanship.

Our line of single and double spring motors—as well as several universal tone arms and sound boxes of the most improved character—will be ready for the trade in the near future.

On a date, which we will announce later, we will not accept orders for deliveries this season from concerns not our customers at the time. Write us before you place your orders for the season's requirements.

All parts finished in nickel, gold, silver or oxidized plating.

CONSOLIDATED PHONO PARTS CORP.
142-146 West 14th Street Telephone 989 Chelsea **New York City**

THE TRADE IN NEW YORK CITY AND VICINITY

The local talking machine trade enjoyed a healthy and prosperous business in June, thereby continuing the remarkable record achieved by the industry during the past eighteen months. The sales totals for the month were far ahead of last June, many of the dealers stating that their month's business compared very favorably with the figures of the fall months of only a few years ago.

Those dealers who have inaugurated campaigns to secure summer business from every possible angle are more than pleased with the results to date. This is especially true in connection with the sale of moderate priced machines, for it has been found that the average owner of a high-priced machine is not particularly desirous of taking it with him to a country resort if a smaller one will fill the requirements during the summer season. Quite a number of the dealers have based their sales arguments on this particular point, and in almost every instance have succeeded in selling a small machine. There is, of course, a constantly increasing demand for the moderate priced models to be used for camping, canoeing, etc., and on the whole the machine business so far this summer has been more than satisfactory.

Concentrating on Record Development

During the past year many of the distributers have endeavored to point out to the dealers that their record business was worthy of considerably more than passing attention. They have emphasized the fact that the record department is actually the keynote of the talking machine dealer's profits and success, and that record sales are the surest indication of the prosperity of an establishment. The dealers have studied the various plans and ideas submitted for their consideration, and as a result, there is no doubt but that the record business of the average New York dealer is on a far more efficient and profitable basis at the present time than ever before. There are no longer any haphazard or hit-or-miss methods employed in the handling of record stock, but on the contrary, card systems are utilized which enable the dealer to order the right records at the right time, and also assist him in giving real service to his customers.

Large Local Attendance at Victor Convention

The Victor jobbers' convention at Atlantic City this week attracted a greater number of delegates from the local trade than any previous year. Practically every Victor distributer in the local territory was represented at the convention, and many of them were accompanied by their families and members of their sales and executive staffs. There is no doubt but that these annual conventions are productive of invaluable results, for they not only give the distributer an idea of what his associates are doing throughout the country, but they promote a spirit of friendship and good fellowship.

Lease New Executive Quarters

Landay Bros., New York distributers, have leased the ground floor and basement of the building at 151 West Thirtieth street, consisting of 15,000 square feet of space, which they will use as executive offices, wholesale and shipping departments. They started moving from their old executive offices, 569 Fifth avenue, a few days ago, and expect to be fully established in their new quarters by the end of next week. This building is ideally located from a transit standpoint, being situated in the Pennsylvania Terminal zone, and convenient for out-of-town visitors. In this new building Landay Bros. will have adequate facilities to take care of their fast growing wholesale and retail trade.

Shipments Improving Steadily

"June was a remarkably good month, showing a very large gain over last year," said R. F. Bolton, district manager of the Columbia Graphophone Co. "There is still enough shortage of goods to be somewhat annoying, but shipments are getting better right along. We have received assurances from the executive offices that July will put us on our feet as far as machines are concerned. The record situation has improved materially, and shipments are coming through better than ever. There is still a slight shortage in our foreign record catalog, but this division is also improving and by next month should be in excellent shape. We have been getting the benefit of increased manufacturing facilities on our record production and expect to have the same on machines this month. The strong demand just now in our machine line is for the $75 and $100 models, with, of course, the corresponding types with the special record equipment, retailing at $85 and $110. The record business seems to show a tendency to favor the higher class record, although there is, of course, the usual summer demand for dance and popular selections. The outlook for the rest of the summer is very fine, and personally I see no signs of any let-up in the remarkable prosperity of the talking machine industry."

Timely Window Displays

During the past few weeks the Phonograph Corporation of Manhattan, which conducts the Edison Shop at 473 Fifth avenue, has prepared a number of special window displays which have attracted the favorable attentions of passers-by along Piano Row. One of these recent displays was devoted to "Preparedness," an artistic display card listing some of the Edison Diamond Disc records which apply to this patriotic theme. The new Edison Diamond Disc records

(*Continued from page* 88)

contained in Supplement No. 59 are proving very popular, especially a first recording by Giovanni Zenatello, a tenor who has achieved international success. This record is meeting with a ready sale and becoming more popular day by day.

A Successful "Uptown" Store

Walter Drey & Co., which opened a new store at 1358 St. Nicholas avenue, with the Pathé line as a leader, is closing a very successful business and has already secured a good sized list of patrons for Pathephones and Pathé discs. Mr. Drey is making a special effort to develop the sale of the higher priced models of Pathephones.

Efficiency Work Producing Results

The efficiency department of the New York Talking Machine Co., Victor distributer, has issued a new and attractive series of price cards for Victrolas. These cards are furnished in four or five different designs so that the dealers may use the style best suited to individual requirements. The company is still continuing to receive very gratifying responses to its special electro service, the demand for the July electro exceeding all expectations. This electro advertised the Victor record "Shades of Night," sung by the Sterling Trio. In addition to the electro a handsome window card was prepared to feature this record, and the results of this publicity are evidenced in the splendid sales totals reported by the company's dealers. There is no doubt but that this special co-operative service is acting as a powerful stimulus to record business.

Language School to Handle Graphophones

The Columbia Graphophone Co. closed arrangements this week whereby the R. D. Cortina Co., 12 East Forty-sixth street, New York, will handle the complete line of Columbia graphophones and records. This company is well known in educational circles, having introduced the Cortina system of teaching languages, which has been remarkably successful. This company is planning to furnish a handsome studio in its building which will be devoted exclusively to the sale of Columbia graphophones and records, specializing particularly on foreign records, operatic and concert selections. This concern will also carry a library of Columbia folk songs and feature the machine line extensively.

An Enthusiastic Fisherman

The "Izaak Walton" of the local Victor trade is the name which may be well applied to Louis Barg, 7810 Third avenue, Brooklyn, N. Y. Mr.

Louis Barg

Barg has not missed a Friday fishing trip in three years, and in the accompanying photograph may be seen in the pursuit of his favorite hobby. Incidentally, it may be said, that Mr. Barg has been just as successful with his Victor business as he has in catching the members of the finny tribe, and his neighbors consider him "some fisherman."

Expect Substantial Summer Business

Spear & Co., the well-known furniture house which recently opened a new building at 22 West Thirty-fourth street, is handling the Columbia line exclusively, and to date have been very successful. Manager Friedman is enthusiastic regarding the progress of his Columbia department and is sure that the company will close a banner business this summer and fall.

Edison Diamond Disc Line Popular

Krakauer Bros., who are occupying a new store at 125 West Forty-second street, are devoting a considerable portion of their warerooms to the display of the Edison Diamond Disc line. Milton Weil, manager of the Krakauer store, states that his Edison business has been far ahead of last year, and that the splendid location of the store has aided considerably in developing new Edison sales.

Furniture House Features Pathé Line

One of the many recent accounts opened in Greater New York by the distributers of the Pathé Frères products, is Ludwig Baumann & Co., Brooklyn, N. Y., which is handling the complete Pathé line and displaying it to excellent advantage in its show window. Pathé products have been very successful in Brooklyn and several dealers who are handling the line are closing an excellent summer business.

Tone Test Attracts Large Audience

One of the most attractive establishments in suburban territory is the Edison Shop at Stamford, Conn., which was recently opened by George A. Heimer. The Edison Diamond Disc line is handled exclusively in these warerooms, and Mr. Heimer, through the use of high-class methods and up-to-date sales policies, has succeeded in placing the Edison Diamond Disc phonograph in a front position in the Stamford musical world. A tone test recital held in a Stamford theatre and sponsored by Mr. Heimer attracted a capacity audience, which was delighted and amazed at the results of the tone test.

The Fleifile Co., of New York, was granted a certificate of incorporation last week by the Secretary of State at Albany, N. Y. The concern will manufacture talking machines, musical equipment and loose leaf devices, the capitalization being $10,000.

EDUCATORS ENDORSE TALKERS

At Meeting Held During Convention in New York There Was Displayed a Strong Sentiment in Favor of Use of Talking Machines and Player-Pianos in Work of Schools

At a special meeting of the Music Education Department of the National Educational Association, held at Hunter College during the convention of the educators in New York during the week of July 3, the principal matter discussed was that of the use of talking machines and player-pianos in the schools, high schools and colleges of the country, as aids to instruction in music.

A number of the teachers present delivered addresses on the subject, among them being Leonard B. MacWhood, instructor in music at the Drew Theological Seminary, and who proved a strong advocate for the talking machine in school work. Another speaker was Leo R. Lewis, professor of music at Tufts College, who came to the defense of the player-piano in the school, and had one of the piano companies give a demonstration of the possibilities for the benefit of his audience.

Other addresses were made by Margaret Floy Washburn, professor of psychology of Vassar College, and Louise Haessler, of Hunter College, who had singers in costume to give Hungarian, Swedish and Slavonic airs in connection with her paper on "The Folk Song."

The meeting authorized a committee of ten to communicate with school superintendents over the country advocating attention to community music and to prepare a basis for instruction in the subject.

NEW EDISON DEALERS

Many Names Added to List of Retailers Handling Amberola and Diamond Disc Line

Thomas A. Edison, Inc., has announced that the following dealers have arranged to handle the Edison Amberola line during the past month: Charles F. Weber, Teutopolis, Ill.; Harry R. Thalis, Hagerstown, Ind.; George E. Seavey, Amesbury, Mass.; Etzikon Pharmacy, Etzikon, Alta., Can.; Ross McKeen, Owen Sound, Ont., Can.; Marvin Bros., Arrow River, Man., Can. The dealers taking on the Amerbola and disc lines are: Keller Bros., Skagway, Alaska; M. E. Crockett, Sisseton, S. D.; Diamond Disc Shop, New Orleans, La.; the Mercantile Co., Long Beach, Cal.; Hopewell Music Shop, Hopewell, Va.; Theodore A. Matson, Racine, Wis.; Schoenberg & Rahn, St. Joseph, Mich.; Thomson & Co., Santa Rosa, N. M.; Texas Pacific Mercantile & Manufacturing Co., Thurber, Tex.; J. R. Hartgraves, Caldwell, Tex.; Waconia Drug Co., Waconia, Minn.; Rodgers-Wade Furniture Co., Paris, Tex.; Max Davis, West Hoboken, N. J.

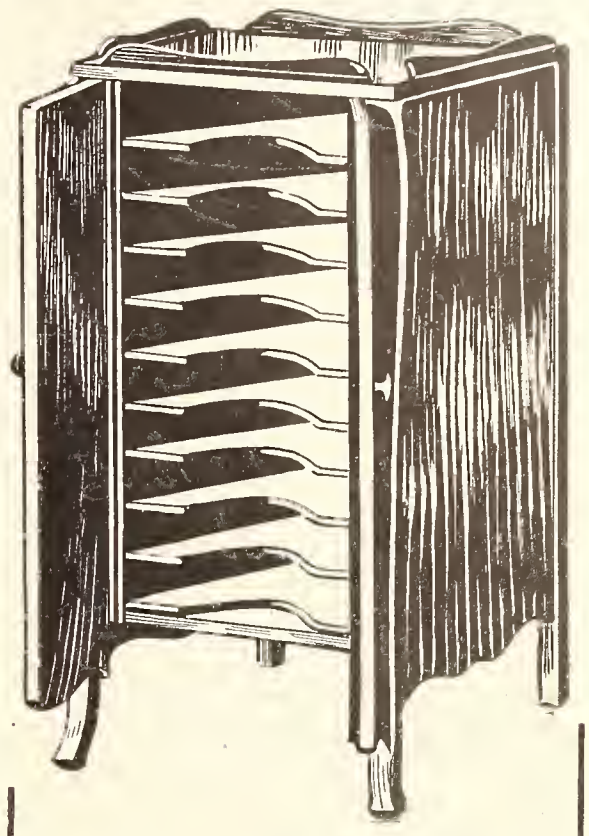
Edison Diamond Disc dealers who have also arranged to handle the disc line are as follows: C. F. Bath Music Store, Abilene, Kans.; Frank Rouse, Benson, Neb.; Hutchison-Wamser Co., Portsmouth, O.; Book Brothers Piano Co., Madison, Wis.; B. & W. Drug Co., Vernon, Tex.; C. J. Robinson, Newell, Ia.; H. L. Paden, Atwood, Kans.; Henry and John Pomer, Albany, N. Y.; W. W. Williamson, Sulphur Springs, Tex.; H. D. Leffel, San Angelo, Tex.

TALKER MEN OFF TO THE FRONT

Among the members of the local talking machine trade who have joined their regiments for service at Mexico are J. A. Giles, traveling representative for the Blackman Talking Machine Co., Victor distributer, and Nelson Decker, a member of the sales staff of the the Ideal Music Co., New York, Victor distributer. Mr. Giles is a lieutenant in his company, and has long been active in National Guard affairs.

According to advices from France, an inventor has perfected a form of talking machine record made from a species of cloth, which may be sent through the mails like an ordinary letter.

SAVE 25%



Order these Special Landay Cabinets at once. Should be $12.50, but our price only

$9.90 each

We are able to offer these special No. 990 cabinets at this price only because the manufacturer laid in a sufficient supply of raw material before the increase in prices.

However, the price must necessarily be raised after this allotment is gone. Better place your order at once. We will be glad to ship you a sample if you desire.

As explained in the last month's advertisement these cabinets are well made of fine Mahogany veneer on all sides and top; are substantial in appearance and finely finished and will retail easily at $18.00.

The quantity we have on hand is rapidly growing smaller so we suggest you place your order now before it slips your mind.

TALKING MACHINES AND THE MOVIES

Horace Sheble Points Out the Similarity in Purpose and Result Which Both Talking Machines and Motion Pictures Possess

PHILADELPHIA, PA., July 6.—Horace Sheble, president of the Domestic Talking Machine Corporation, is a philosopher who crystallizes mental observations into actual basic results. Comparing the talking machine with the moving picture, he points to the analogy as well as the difference. They parallel each other in greatness of invention. They both appeal to the love of entertainment and the desire for education. They have brought the best music, drama and comedy of the world to all the homes of the world, but their appeal to popularity has been along different courses.

The moving picture, from the first, declared Mr. Shelbe, was planned for the masses, with the result that $400,000,000 is said to be spent annually by the people of this country to see moving pictures. Through the direct appeal being made by talking machine manufacturers, however, the day will soon be here when every home, no matter how humble, will enjoy the uplifting entertainment of a good talking machine, and the cost will be so small that it will not be missed in the weekly wage. In outlining the present revolution in the market he stated that it is to be expected that the country will be flooded with an almost endless amount of cheap "furniture," with assembled parts and based on unscientific principles. This flood will be temporarily detrimental to the business in general, and the public will soon learn that a varnished box is not a talking machine and that tonal quality is the one essential element.

In organizing the Domestic Talking Machine corporation, as is stated, every element in manufacturing and merchandising has been analyzed by experts of long experience, with the result that the Domestic machines were perfected first for quality of tone and accuracy of reproduction. The soundbox, with its sensitive reciprocal action is one of the ingenious features of the new machine. The diaphragm is of aluminum and is made by a process that prevents buckling to the slightest degree and closes the pores of the metal to make it impervious to atmospheric changes. It is declared that in 10,000 Domestic diaphragms there has not been one that varies in tonal quality. The Domestic cabinets are attractively designed, built of seasoned resonant woods and intended to match the appointments of any home. Through the installation of efficient and, in many cases, distinctly original machinery, the cost of production has been minimized through the elemination of waste.

The same principles of efficiency are to be applied to the marketing of the product, the forerunner of which has been liberal advertising from which the results are credited directly to the dealer representing the Domestic in a given territory. The great demand from dealers for territorial rights proves that the plan is succeeding, and the plant is now being operated to capacity, with complete machines being shipped regularly. An interesting announcement in this connection appears on page 96 and 97.

INSTALLED MANY NEW BOOTHS

Arthur L. Van Veen, president of A. L. Van Veen & Co., New York, manufacturer of Van Veen demonstration booths, stated this week that his company had completed several important installations during the past few months, among others, in the new stores of Carl Bauer & Sons, and the Savidge & Reed Co., Brooklyn, N. Y.

Mr. Van Veen, who is now working out plans for the equipment of several new talking-machine stores in different sections of the country, has received letters from a number of his clients expressing their pleasure with the booths the Van Veen Co. has erected.

McMENIMEN RETURNS FROM TRIP

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, returned to his desk Monday after a ten weeks' stay in Chicago, during which time he consummated a number of important deals, and visited the company's jobbers in the surrounding territory.

EDISON DIAMOND DISC IN AUSTRALIA

New Firm of Wills & Patton Secures Sole Representation for That Line for State of Victoria, Australia—Open Edison Shop

A. H. Wills, proprietor of Wills & Co., 7 Quadrant, Launceston, Tasmania, Edison and Gramophone jobbers, and R. E. Patton, one of the partners of Patton & Sons, piano and music warehouses, Hobart, Tasmania, has combined forces and have secured the sole distributing rights for the new Edison Diamond Disc products for the State of Victoria, Australia, under the name of Wills & Patton. The new concern has opened an establishment under the name of the Edison Shop at 265 Collins street, Melbourne, Australia, and announced the fact in a letter to The World enclosing an order for two years' subscription in advance. Both members of the firm are old World subscribers.

REPORTS GOOD RECORD DEMAND

Manager Bouton Says Domino Records Are Well Received in All Sections of the Country Organizing Capable Sales Force

P. M. Bouton, manager of W. R. Anderson & Co., 220 Fifth avenue, New York, is enthusiastic regarding the success of the Domino records for which this company are sole distributers, and which were introduced to the trade a few months ago.

Referring to the company's plans, Mr. Bouton said, "We have made arrangements whereby we expect to give our dealers efficient service and co-operation. They will be furnished with attractive window cards and other publicity and sales helps which we feel sure will aid them in selling Domino records. We are very well pleased with the reception accorded the Domino records and our dealers and other prominent members of the trade tell us that these records are meeting with general approval."

W. R. Anderson & Co. are now organizing their sales force, and expect to have a group of competent men call on dealers throughout the country. Arrangements are also being made to handle a comple line of talking machines which will retail from $15 to $150.

LOS ANGELES STORE IMPROVED

Talking Machine Department of Broadway Department Store Moved to Larger Quarters on the Fourth Floor of This Establishment

Los Angeles, Cal., July 3.—The talking machine department of the Broadway department store has been moved from the eighth to the fourth floor, where extensive improvements have just been completed. The department is here given much larger space, and this space has been fixed up in truly artistic style, making it one of the most attractive and conveniently arranged talking machine departments in the city. There are eight sound-proof, well-ventilated and comfortably furnished demonstrating rooms, and a well-condensed section devoted to record racks and the office.

The whole section has its woodwork done in old ivory, with egg-shall gloss finish, and the floors are heavily carpeted in peacock blue. The doors to the booths are of glass, of the French window type, and large plate-glass windows are introduced in the partitioning walls. The company has been carrying a half-page advertisement announcing the closing out of the present stock of Sonoras at old prices, to make room for re-stocking with prices somewhat advanced, and, according to Manager F. A. Guyette, of the department, the sale is successful.

FINE RECORD OF PROGRESS

Acme Die Casting Corporation Shows Over 200 Per Cent. Increase in Filled Orders—Outlook for Balance of Year Fully as Good

For the six month's period ending June 30, the Acme Die Casting Corporation of Brooklyn, N. Y., shows an increase in filled orders of over 200 per cent. over the preceding six month's period. This report is made all the more encouraging by the unfilled orders on hand which indicate that the period just started will show another increase at least equally as large. The unfilled orders on hand now are the largest in the history of the company and the indications are that an increase of over 300 per cent. in filled orders for the year is certain. The officers of the company believe that this is an unheard of growth in the die casting business.

A large part of the product of this company is used for phonograph parts, which are supplied to the leading manufacturers of this line.

The Acme die casting machines are unique and they eliminate all manual labor and have a much greater capacity and a much greater power than any other machine. This company is said to be to-day the only company who die cast tone arms with one-thirty-second inch walls in zinc alloys. It has taken large orders for sound boxes and tone arms, a condition of which was the limitation of the effective weight on the record to four and one-half ounces.

Acme die castings are made in the Bush Terminal, which is a railroad terminal, having direct connections with all trunk lines and with a great many steamship lines. The Bush Terminal is a city in itself. If all the employes and their families were to settle in a separate town, the Bush city would be about 33 1/3 per cent. larger than Albany, the capital city of New York State.

Ralph Burger, of 72 Broadway, Newburgh, N. Y., has secured a local agency for Columbia Grafonolas and records.

INDIFFERENT SALES SERVICE

Some Very Pertinent Criticism Based Upon Personal Experiences Indulged in by a Writer in "The Little Schoolmaster"

In a recent issue of Printers' Ink appeared the following incident, among the "straight-from-the-shoulder" talks in the department conducted as the "Little Schoolmaster's Classroom." The article is reproduced exactly as it appeared in Printers' Ink, including the "Schoolmaster's" criticism:

"Advertising men are hard to please when it comes to selling methods. We know how sales work ought to be done, according to Hoyle, and it gets on the nerves to see good advertising nullified at the last because of poor or indifferent sales service.

"Here is an uncolored account of a recent sales transaction for an aggressively advertised article—one of the fine 'parlor editions' of the talking machines (never mind which one!).

"Customer enters the store. Salesman steps forward: 'Did you want something?'

"Customer pleasantly: 'Yes, I rather think I do. I have been thinking of buying one of these machines.'

"Salesman: 'About what price did you want to pay?'

"Customer, again smiling: 'As a matter of fact, there is no particular sum that I had in mind that I especially wanted to get rid of. I should like to see the different machines and compare values.'

"Salesman thereupon shows two different styles, one priced at $75 and one at $50, index cabinet extra.

"Customer: 'Is there really any difference in the tone values between these two?'

"Salesman assures him that there is. Customer had been previously apprised by a friend, who bought the lower-priced instrument, that the manager of the store had given his positive assurance that there was no perceptible difference, so far as tone values went, between these two grades. Grave suspicion of the sincerity of the store's counsel at once began to rise in the customer's mind.

"Customer: 'Is the lower case mahogany or birch?'

"Salesman: 'I don't know about that for sure. I don't guess it is real mahogany, though.' And then, it is but fair to relate, the salesman scored his first real point: 'Wouldn't you like to hear the $50 machine?' The customer nodded thanks and began to be hopeful, but just then the salesman called in a poor little office boy and gave him a good scolding that didn't help the atmosphere.

"The customer had a favorite piece that he wanted to hear, but he waited, thinking that surely the salesman would ask if there was anything in particular that he would care to hear. But the question didn't come. One of the regular demonstration records went on, and it was a good record, though it is doubtful that the selection would have suited every customer.

"The situation was saved by the manager himself coming in and taking charge of the transaction. But even then there was a big snag to overcome in the directly opposed bits of counsel as to the difference between the two instruments of different prices.

"We can't reach perfection in salesmanship, of course. No matter what system of training is introduced, there are human beings in the selling business who will not profit by the instruction, who will blunder and spoil the effect of all the back pages and double-page spreads of the advertising campaign. But ought not these clever advertising men to look into the methods of the best salesmen of the article, lay out one or more standard ways of greeting and demonstrating, and send out this illuminating material to managers of branch offices?"

CHAS. D. JOHNSON VISITS PATHE

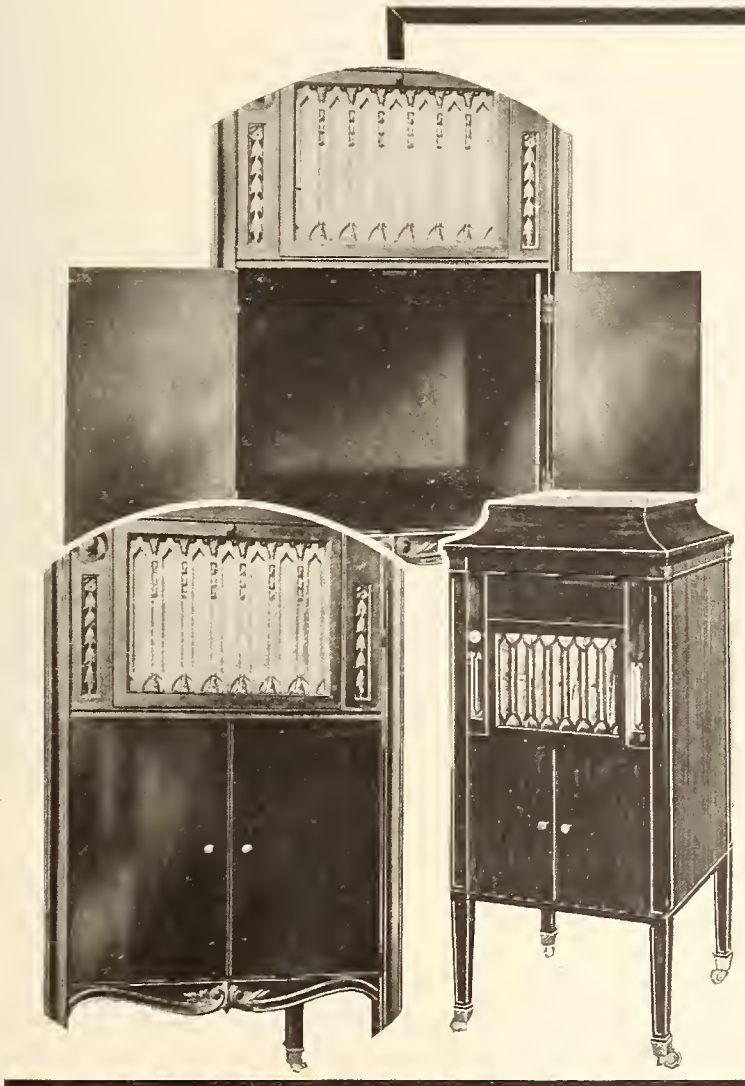
Librarian of Cossitt Library, of Memphis, Praises Pathé Operatic Records

A visitor recently to the offices of the Pathé Frères Phonograph Co., of New York, was Chas. D. Johnson, librarian of Cossitt Library, Memphis, Tenn. Mr. Johnson is a recognized authority on operatic records and every Saturday afternoon gives an opera talk at his library which is illustrated by appropriate records and stereopticon views.

For the past two years Mr. Johnson has been receiving from the Pathé Frères Co. a complete library of all Pathé operatic records, which he carefully tries out and then makes suggestions to the Pathé Co. regarding their listing, classification, etc., in the Pathé catalog.

In a chat with The World, Mr. Johnson commented enthusiastically upon the Pathé operatic records, stating that the many artists who have been recently added to the Pathé recording staff are producing records of unusual excellence.

SOSS



INVISIBLE HINGES

Emphasize Beautiful Wood Finishes

So many Talking Machine Cabinets are designed with a disguise of the instrument as their chief feature that invisible hinges are of special importance.

Ordinary hinges may be made inconspicuous, but the fact that they cannot be completely hidden by any ingenuity mars every cabinet on which they are used.

SOSS INVISIBLE HINGES preserve the beauty of well-designed and finely finished.

Talking Machines Music Cabinets
Pianos Player-Pianos and Benches

They are made in numerous sizes for these particular purposes. They are simple, strong and durable, easy to install and are an improvement on any class of cabinet work.

When you fail to see an unsightly hinge protruding, you know SOSS is the answer.

We will be pleased to send you our new illustrated booklet. Write today for catalogue "T"

Domestic
TALKING MACHINE

The biggest hit in the talking machine world

HERE it is again—the leader of the already well-known line of Domestic Talking Machines.

The biggest achievement in the talking machine world—(not only in this publication, but the biggest achievement of its kind in all the world).

The Domestic line of low priced talking machines has taken the trade by storm. And no wonder. From the standpoint of perfect tone reproduction, high class design and superb finish, nothing has ever been offered that can approach it.

The Domestic is blazing the trail over an entirely new route—accurate tone reproduction and beauty of cabinets at unheard-of low prices.

The reciprocal spring principle of the wonderful Domestic Patented Sound Box is not only different but truly wonderful. It is as sensitive as a compass needle, as accurate as a chronometer. The cabinets are genuine hard resonant woods, not mere soft

woods stained oak or mahogany finish. The finish is hand-rubbed, while the fittings are heavily plated and in keeping with the rest of the instrument.

The Domestic Silent Service Motor is an achievement in high-class spring motor design and construction. It is powerful and quiet, and runs with the steadiness of a high-grade clock.

The Domestic is not a mere piece of "furniture" with assembled parts but a perfect musical instrument, every part being made in our own plant except the woodwork. There is a Domestic model to suit all economical tastes. Made by men who have spent the best part of their business lives in designing and building talking machines. A winner for all live, well-established dealers. A line that satisfies the music loving public. A Domestic contract is a valuable franchise and we are limiting their number so that a Domestic Dealer may secure all the benefit of his and our combined efforts.

BECOMES RECORDING SUPERVISOR

The Columbia Graphophone Co., New York, announced this week the appointment of Clyde Emerson as recording supervisor, with headquarters at the company's recording laboratories, 102 West Thirty-eighth street, New York.

Mr. Emerson's promotion to this important

Clyde Emerson

post is well deserved, as he has been associated with the Columbia Co.'s recording department for nineteen years and has attained his present position through consistent effort and unfailing loyalty. Mr. Emerson's skill as a sound recorder is equalled by very few members of the talking machine industry, and the splendid quality of the present-day Columbia records may be attributed in a considerable measure to his ability. Mr. Emerson has visited all corners of the globe in the interests of the Columbia record department in addition to his laboratory and mechanical experience.

IMPORTANT PATHE-BRUNSWICK DEAL

Brunswick-Balke-Collender Co. to Sell Pathé Records and Call Its New Machine the "Brunswick-Pathephone," Under License from the Pathé Frères Phonograph Co.

The Pathé Frères Phonograph Co. recently made an arrangement with the Brunswick-Balke-Collender Co., by which the Brunswick-Balke-Collender Co. is to sell the Pathé record in conjunction with its machine, which it is going to call the "Brunswick Pathephone," under a license agreement from the Pathé Frères Phonograph Co.

The Brunswick-Balke-Collender Co. has a very large distributing organization, and will concentrate its efforts especially at points where the Pathé Frères Phonograph Co. is not entrenched at the present time.

The Brunswick-Balke-Collender Co. expects to enter into a large national advertising campaign on the Pathé records in conjunction with the "Brunswick-Pathephone."

The Pathé Frères Phonograph Co. has on hand a great many orders for machines, the shipments of which have been somewhat delayed, owing to the difficulty in obtaining springs and other parts from Europe. However, this situation is now clearing up and shipments will go forward in large quantities in the very near future.

There is ready some advance copy of very attractive advertising matter to appear in the Saturday Evening Post and other national magazines, all of which is in the plan of the active campaign that the Pathé Frères Phonograph Co. is working out for the benefit of its dealers and jobbers, a plan which should prove very successful.

BANTA CO. TO MAKE TALKERS

The Banta Furniture Co., of Goshen, Ind., has purchased the Hubert A. Meyers Phonograph Co., of Toledo, O., and will move the plant to Goshen at once. The furniture concern has been supplying the cabinets for a number of talking machine firms, and will now widen its field by the manufacture of talking machines for the general trade.

ELECTED AN ACTIVE MEMBER

James P. Bradt Honored with Membership in National Association of Piano Merchants

James P. Bradt, general sales manager of the Columbia Graphophone Co., New York, has been elected an active member of the National Association of Piano Merchants. Mr. Bradt was notified of his election last week, subsequent to the annual meeting of the association held in New York last week.

It is an unusual honor and distinction for anyone but a piano man to be elected an active member of the National Association of Piano Merchants, and Mr. Bradt is being congratulated on all hands upon the honor bestowed upon him.

Mr. Bradt is one of the most popular members of the talking machine industry, and during his many years' experience in the sales division of the business has not only won the friendship of the talking machine dealers' trade, but the piano merchants as well. Possessed of a jovial and magnetic personality Mr. Bradt numbers among his personal friends dealers in every city of any appreciable size throughout the country.

MAKING COMPLETE LINE OF CABINETS

The K. Nicholson Furniture Co., Chase City, Va., well-known as manufacturers of sectional bookcases and desks, has added a new department to its factory and is manufacturing a complete line of sectional record cabinets, standard record cabinets and music roll and music cabinets. The company has already shipped its cabinets to dealers in different parts of the country, who are well-pleased with their construction and appearance.

MACHINE SHORTAGE IN BALTIMORE

Difficult to Meet the Demand—Victor Line with Mann Piano Co.—Secures More Room—The Hub Handling Talkers—Leading Jobbers and Retailers Make Fine Business Reports

BALTIMORE, MD., July 5.—More machines is the general cry on the part of the Baltimore talking machine dealers. Many of them are afraid that if they do not get more machines they will be unable to take care of all the business. The record sales also are holding up very well and some of the distributers are filling some extra large orders.

Several of the local jobbers will attend the convention which will open in Atlantic City next week. They are looking forward to this gathering with a great deal of interest.

One of the most important events in the talking machine line in Baltimore recently was the placing of the Victor line with the Mann Piano Co., of which Joseph M. Mann is president. The stock arrived several days ago and the first public announcement has just appeared. Charles E. Stran, prominent in local talking machine circles, is the manager of the new department, and from the way he has started out he will prove himself to be the right man in the right place.

In order to take care of the business the Mann Co. has leased the entire building where the firm is located. This gives the house ample room to take care of big business and to offer excellent displays.

Before this month is out another large talking machine store will have opened. It is the Hub, the big department store. This house has taken over the large building at the corner of Charles and Fayette streets, formerly occupied by the Sanders & Stayman Co., which is being fitted up now for a complete line of Columbia and Edison machines. The machines now are sold in the main building at the corner of Baltimore and Charles streets.

A. H. Heath, manager of the Columbia Graphophone Co., is much pleased with the business being done. The distributing depot is rushed with work and the orders are coming faster than they can be filled. Many of the dealers, says Mr. Heath, are getting ready for a big fall trade and as a result his place is being kept on the go from early until late. Many other dealers, however, are placing their orders for immediate delivery and large numbers of machines are being sent out. The great demand for the lower priced machine, which seems to be prevailing in this city at present, is taxing the house to its utmost. In fact, it is unable to get sufficient machines to meet this demand.

Mr. Heath also reports extra large sales of records. The present difficulty with Mexico has brought about a very large sale of the record, "They're on Their Way to Mexico."

W. C. Roberts, manager of E. F. Droop & Sons Co., Victor distributers, is elated over the way business is moving along. The May business, Mr. Roberts reports, was double that done in the same month of last year and June business will prove three times as great as that done last June. On the first half of the year, Mr. Roberts says that 1916 is about 30 per cent. ahead of the first six months of 1915.

The Aeolian-Vocalion, which is handled in this city by the Sanders & Stayman Co., is still going big. Most of the machines being sold are of the higher prices. William B. Turlington, manager for the firm, is greatly pleased with the way the music lovers are taking to the Vocalion. He has arranged an excellent display of them at the new Sanders & Stayman store.

Several new dealers were signed up during the month by Jesse Rosenstein, of the National Piano Co., distributers of the Pathé line. Mr. Rosenstein is hard at work in an effort to secure additional machines to meet the heavy demand. He reports big business on all sides with no let up because of the warm weather.

I. Son Cohen, of Cohen & Hughes, also distributers of the Victor line, has only one complaint to make. That is he cannot get as many machines as he could use.

Good business also is reported by H. R. Eisenbrandt Sons, Inc., Victor distributers. This year is far ahead of the same period of last year and so far there is no indication of any slacking up in business. This house is short of some of the models.

Milton Boucher, manager of the Victrola department of William Knabe & Co., reports some good business for the month and he looks for the trade to continue along the same line. The record sales also are very good. The Knabe store is a very attractive one and the window displays are creating a great deal of favorable comment.

TYPING BY "TALKER" MUSIC

How Talking Machine Helps Students in Speed and Evenness Explained by H. S. Smith

SPOKANE, WASH., July 6.—Harold S. Smith, of the Spokane Expert School of Business, has installed a Columbia graphophone in his school for use in teaching typewriting. The idea of typing by music came to Mr. Smith as a result of investigations which demonstrated that one of the most important factors in typewriting speed is evenness of operation.

Mr. Smith got the idea that the strongly accentuated time of a dance record played on a graphophone would enable students to acquire a desirable rhythm of writing.

On entering one of Mr. Smith's classes a visitor is first attracted by the strains of "The Stars and Stripes Forever," or some other familiar tune, accompanied by the sharp click of the keys of twenty-five or thirty typewriting machines.

Investigations as to the value of this method as applied to featuring long-hand penmanship are under way by the management of the school, and the plan may be extended to this department in the future.

Initiative consists of doing on the spot without being told and without complaining what the other fellow never thought of doing—and didn't do when he was told.

Are You on the Border?

Not Mexico—but on the border of profits or no profits. To keep away the no-profit enemy, be well armed with machines and records, maintaining a battery of the different Victor styles and several regiments of records.

Gately-Haire Service Is on a War Footing

It is ready at all times to rush to your assistance with plenty of reinforcements, so you won't waste a single selling shell. No gilt braid or frills but plenty of hard work and a co-operation that has had the experience of war campaigns in many commercial centres.

BIGGEST HALF OF YEAR TO COME

Confidence Born of Enthusiasm, the Keynote of Successful Victor Business, Will Secure Big Profits for Those Who Go After Them

The year is almost half gone! It is only a few weeks since the general manager announced that business with us was 38½ per cent. ahead of a corresponding period last year. That's how it is with us, or was then. Since then it has increased still more, but the question is: How is it with you?

The other day we asked the contract department for information as to establishment of new dealers, and the answer was: "We are turning down applications by the hundred." That is done because it is absurd to establish new dealers when you cannot supply existing dealers with all the product they could use. In the past few years we have spent millions of dollars—actually millions—in increasing our output. It is evident, then, that a good many people must be making a lot of money out of Victor product. But the question is: How is it with you?

It's a fine thing, a splendid thing, to be engaged in a business with a line in which the demand is always many laps ahead of the supply; but the question is: Are you making money out of it?

If you're not, it's up to you to begin to ask why—for there are thousands of people who are. They are the dealers who rise above old-fashioned ideas and conduct their Victor business with the courage born of enthusiasm.

The public can't be fooled very successfully. They know just as well as the dealer knows whether he's got confidence in his business or whether he hasn't. If they find that he hasn't, why then they lack confidence too, and business which could be had easily by a dealer who had the required amount of confidence and enthusiasm, will go to seed if the dealer lacks those necessary qualities.

When you've made up your mind to buy anything, from a hat to a hobby horse, do you deal with a piker? You do not. You go to a store that is a store, that carries a stock which permits you to exercise some choice and where you believe the people know something about the goods they handle.

"For the Colonel's Lady and Judy O'Grady
Are sisters—under their skins"

wrote Rudyard Kipling, and we are disposed to think he knew what he was talking about. Human nature is very much the same, whether it is being blistered in the Sahara or petrified in Iceland, and when you want to know how things look to the other fellow, the best way to do it is to ask yourself how they look to you—because under the same sort of conditions, all men and women will act in pretty much the same way.

People won't trade at a store that doesn't inspire their confidence. There are several elements which contribute to that necessary building up of confidence. First of all comes stock, then appearances, service and so forth.

When a man intends to let go a fistful of good "iron men" that he's earned by the sweat of his brow, he wants to feel that he'll get the best that's to be had for the money, and sure as fate he'll begin to back toward the door if the stock looks small. He feels that he'd get a better choice elsewhere, and so you have an unnecessary obstacle to overcome which was erected by your own bad judgment in not doing business in a big way.

We learn slowly, but the dealer with only a few years' experience must have found out by now that any good business man who is willing to go after Victor business in a big way will reap a rich harvest. This is a statement which can be verified with the utmost ease. Big as the first half year's business has been, there is still a bigger to be won from the last half of the year, and that is why we want to say to every individual dealer—How is it with you?—Voice of the Victor.

MADE TIMELY WINDOW DISPLAY

How Klaye Bros. Utilized Window in Connection With Mobilization Movement

La Crosse, Wis., July 7.—An excellent example of a timely and attractive window display is shown herewith. This window was used by Klaye Bros., 205 Main street, at the time the National Guardsmen left LaCrosse for the

Klaye Bros.' Window, La Crosse, Wis.

mobilization point. A city holiday was declared at that time, and the window attracted considerable attention.

Klaye Bros., who have handled the Columbia line of graphophones and records for some time with pleasing success, are "live wires" in every respect. In addition to using timely and effective window displays, they are also extensive newspaper advertisers, and their copy is prepared with careful attention to every detail. They have built up a profitable Columbia clientele through the use of this advertising and the efforts of a capable sales organization.

The W. H. Marion Music House, of Mt. Airy, N. C., is featuring the Columbia Grafonola with great success.

Gentlemen:-

We think it is only fair to you that we should relate our experience as an advertiser in the Talking Machine World.

We placed our Hinged Cover and Support for talking machines in the market about six months ago and practically all the business we have done so far originated in the WORLD. Of course, we have had men on the road, but the initial inquiries have come from our advertisements in your paper. We estimate that up to the present time we have sold over 40,000 Hinged Cover Supports through your medium.

The evident thoroughness of your circulation campaign has interested us greatly.

We are constantly receiving letters from people contemplating entering the talking machine business either as manufacturers or dealers who have not been associated with the trade in the past. They all mention that they saw our advertisement in the WORLD. While naturally the bulk of our business is done with the manufacturers we are doing business with dealers in practically every one of the United States and have received inquiries from all over the world - all through your excellent journal.

We certainly wish to congratulate you on your success and the valuable service you are giving the trade both in respect to the helpful articles and comprehensive news features in your reading columns and the information conveyed through the advertisements.

With kindest regards, we remain,

Yours very truly,

Chicago Hinged Cover Support & Balance Company.

TRADE NEWS FROM CINCINNATI

With Big Business Increases Reported the Demand Has Been Greater for Records Than Machines—The Leading Jobbers Express Themselves Well Satisfied with the Conditions and Prospects in This Territory

CINCINNATI, O., July 5.—There apparently was a slight slump in the demand for machines during June, but the sales of records was on a satisfactory basis. The situation, generally speaking, is a most satisfactory one for the time of the year. The slight slump might be attributed to the lack of publicity given talking machine houses who, following a time honored custom prevalent about Cincinnati, are inclined to let up in their advertising propaganda when the heat waves make themselves felt over the Ohio valley.

Manager Byars, of the Aeolian Co.'s Vocalion department, reports a 50 per cent. increase in June business over June of last year, and present indications are that the summer business is going to be far above par. The Vocalion has found its way into the homes of so many prominent people in Cincinnati, that its prestige is now established. Selling them is comparatively easy now to what it was a year ago. The splendid tone of the instrument is becoming so well known that it is a common thing to hear people speaking of the Vocalion tone.

Mr. Byars is busy organizing a new sales organization for the fall. He is adding several new men of promising ability.

R. J. Whelen, manager of the local Columbia store, stated that business for June had been all that could be asked in the retail line and the wholesale is coming in by leaps and bounds. "The factory is getting on its feet," he said, "and we are able to fill practically all orders on demand with the exception of a few smaller types, but we expect to be on a normal basis in the near future with all types. Our traveling men are continuing to take large fall orders and also substantial orders for immediate delivery. They report that conditions in our line are good all through the territory."

Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., says:

"The demand, both retail and wholesale, has been very active during the last thirty days. Record sales have been good and the majority of dealers have placed orders for at least part of their requirements during the next six months.

"The feature of the June business was the tremendous demand for patriotic records. The demand for patriotic music has been increasing from year to year and we can safely say that the demand this year is double that of last year.

"We have shipped more Victrolas to country homes this year, than ever before and it is evident that Victrola lovers even when away from home, insist upon Victrola entertainment.

"The Wurlitzer House will be well represented at the Talking Machine Jobbers' convention at Atlantic City. Carrying out the Wurlitzer policy of assisting their employes in increasing efficiency, there will be six representatives attending the convention on this occasion. We believe that it is a most liberal education for any talking machine man to get in touch with the vast Victor factory and to absorb, first hand, the enthusiasm that exists there and take in the immensity of the industry and the conviction of superiority that has made Victor products so famed."

O. A. Peterson, manager of the Cincinnati branch of the Phonograph Co., is rusticating about Spokane, Wash., taking a well-earned rest. He did much towards putting the Edison machine on a firm basis in this territory. Mr. Peterson will be away about six weeks. E. H. Delman is now in charge of the house.

MEETING TRADE DEMANDS

Sonora Phonograph Corp. Develops Plans Along Service Lines Whereby the Factory Resources Have Been Perfected so as to Better Insure Required Stock Reaching Dealers

In a chat with one of the heads of the largest factory, making cabinets for the Sonora Phonograph Corp., 57 Reade street, New York, he related the interesting information that the output of cabinets for the Sonora corporation, if placed side by side, would equal twenty-five miles in length, while if each cabinet was placed on top of one another, the height would be fifty miles. This gives a vivid idea of the number of Sonora phonographs being sold.

President Geo. E. Brightson has been giving his personal attention to the service end of the business, his aim being to co-operate with the many Sonora dealers so that they have sufficient stock to come somewhere near meeting the demands. While the service under his direction has greatly improved, due to a re-organization of the factory, the increased demand from the retail trade seems to keep pace with all endeavors on the part of the factory to supply the goods.

In relation to the production of the Sonora factory, several changes have been made in both the operating and executive factory staff, which have helped to inspire a co-operation between heads of departments and workmen that is already manifesting itself by an increase in output that is of assistance in filling orders.

A number of Sonora employes have left with their regiments and, as referred to elsewhere, the astounding statement was made by President Geo. E. Brightson that not only would these men continue to draw their salaries in full and would be in line for promotion when they returned, but that on July 1 the salaries of these men would be raised. This move is typical of the Brightson-Sonora spirit.

BUFFALO

RAILROAD — EXPRESS — STEAMSHIP

SCHLOSS BROTHERS CABINETMATCH NEW YORK TRADE MARK

PATHE FRERES DISTRIBUTERS' ASSOCIATION FORMED

Organization Perfected Among Distributers of the Pathé Products to Further Their Mutual Interests—Four-Day Convention Held Recently in New York City—Banquet at the Hotel Claridge One of the Events of the Convention—Those Who Were in Attendance

The distributers handling the products of the Pathé Frères Phonograph Co. gathered in New York on June 21, and after attending executive sessions for four days announced the formation of the Pathé Phonograph Distributers' Association.

The officers of this new association are as follows: President, E. T. Caldwell, Fischer Piano Co., Cleveland, O.; first vice-president, H. J. Brennan, Pickering & Co., Pittsburgh, Pa.; second vice-president, E. E. Trower, E. E. Trower & Co., Kansas City, Mo.; secretary, Hugo Ricca, Peerless Phonograph Co., New York; treasurer, E. S. Bristol, Pathephone Sales Co. of New York. These officers constitute the executive committee of the new association.

The Pathé Phonograph Distributers' Association was formed to promote the mutual interests of Pathé distributers and to enable all factors of the Pathé business to co-operate more closely and more efficiently with each other. There is no limit to the membership, any jobber handling Pathé products being eligible to join, and each jobber having one vote upon all questions introduced at the meetings. It is planned to hold the convention annually, and judging from the enthusiasm of those in attendance at the organization meeting this week, the association will be an active factor in promoting Pathé trade.

At the present time there are twenty-six distributers of Pathé goods, and eighteen of these were present at this week's convention. Every one of the twenty-six, however, has expressed a willingness to become a member of the Pathé Phonograph Distributers' Association which, therefore, starts its career with the co-operation of every Pathé jobber.

During the course of the convention the Pathé jobbers were entertained by the Pathé Frères Phonograph Co., which arranged a number of events that were carried out very successfully. These included a theatre party, an automobile trip to the Pathé plant at Bellville, N. J., and a banquet at the Hotel Claridge on Wednesday evening.

The last mentioned affair was one of the most

Pathé Dinner at Hotel Claridge; Anna Fitziu in Center

enjoyable features of the entire convention, there being in attendance all of the visiting Pathé jobbers, together with a number of invited guests, including Anna Fitziu, the famous operatic soprano, who recently closed a contract to record exclusively for the Pathé library. During the course of the evening Madam Fitziu rendered a number of selections which were followed in turn by her recent Pathé records. These records were enthusiastically applauded as they illustrated to excellent advantage the splendid recording qualities of Madam Fitziu's voice.

A native Hawaiian troupe contributed largely to the evening's enjoyment, and E. M. Bonnell, of Los Angeles, favored the guests with some of his old time stage successes. A number of informal speeches were made, including a very interesting talk by E. A. Widmann, president of the Pathé Frères Phonograph Co., and timely addresses by Russell E. Hunting, Sr., J. F. Collins, Ralph Leininger, George W. Case, Jr., and E. T. Caldwell. Mr. Case was accorded hearty congratulations for the success of the banquet as he worked indefatigably to make the affair an interesting and most memorable one for all who were in attendance.

Among those present at the dinner were E. M. Bonnell, Curtis-Colyear Co., Los Angeles, Cal.; H. J. Brennan, Pickering & Co, Pittsburgh, Pa.; C. P. Chew, A. Victor & Co., Buffalo; E. E. Trower, E. E. Trower & Co., Kansas City, Mo.; Jesse Rosenstein, National Piano Co., Baltimore, Md.; Henry Nathan, A. Victor & Co., Buffalo; E. D. Bristol and F. H. Kilmer, Pathephone Sales Co. of New York, L. T. Ware, G. Sommers & Co., St. Paul, Minn.; E. T. Caldwell, Fischer Piano Co., Cleveland, O.; J. R. Peckham, Pathephone Co. of Detroit, Detroit, Mich.; R. H. Gordon, Pathephone Co. of St. Louis, St. Louis, Mo.; M. F. Maillard, Pathephone Co. of Detroit, Detroit, Mich.; Frederick Doll, Jacob Doll & Sons, New York, N. Y.; J. B. Stillwell, Stillwell Co. New York, N. Y.; M. P. Tobin, Pathé Phonograph Co., Indianapolis, Ind.; N. G. Barber, Pathephone Sales Co. of New York; George J. Murai, Manila Trading Co., Manila, P. I.; J. C. McClain, Berkhoel Music Co., Salt Lake City, Utah; Hugo Ricca, Joseph Schwartz and E. D. Ackerman, Peerless Phonograph Co., New York.

The following executives and staff members of the Pathé Frères Phonograph Co. were also in attendance: E. A. Widmann, T. E. LaMontagne, George W. Case, Jr., J. O. Young, J. I. Bernat, W. H. Penn, J. F. Collins, James Watters, Ralph Leininger, W. H. Rose, Frank L. Capps, R. B. Caldwell, Russell Hunting, Jr., Paul Mendigal.

Russell Hunting, Sr., of the Pathé Frères Co., in Paris, was a guest of honor, having recently arrived here after an extensive recording trip through China.

Columbia Records TRADE MARK Note the Notes

The Columbia recordings of song hits are real hits—hits as songs and hits as sales.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Co.
Woolworth Building, New York

TALKING MACHINE TRADE IN TORONTO VERY ACTIVE

Why John A. Sabine, of the Music Supply Co., Doubled His Orders—New $1,500 Sonora Displayed—Canadian Vitaphone Co., Ltd., to Close Out Business—Ralph Cabanas Chats Interestingly of Trip to Pacific Coast—Finds Business Good in West—News of Month

TORONTO, ONT., July 3.—While in New York John A. Sabine, of the Music Supply Co., wrote his firm's customers from the Columbia recording laboratories, giving them an idea of conditions in the talking machine trade. Although having several thousand machines on order, he decided to double the order in the hope that by doing so he would be able to get sufficient machines to take care of those who anticipate their needs and order early. Incidentally Mr. Sabine urged upon dealers the wisdom of getting orders booked as a precautionary measure, and not with the idea that either wholesalers or manufacturers desired large orders for immediate delivery, being so far behind with deliveries.

The Saxafour, composed of Messrs. Gilbert, Robinson, McGuirl and Till, all of Toronto, made an original saxophone record on the phonograph in the parlors of the R. S. Williams & Sons Co., Ltd., last month for the purpose of submitting it to New York theatrical managers to get a chance on the "big time."

E. van Gilder, of I. Montagnes & Co., Toronto, passed through Montreal recently on his return from a tour of the Maritime Provinces. Mr. van Gilder visited each Province, including Prince Edward Island, and reports excellent success in placing Sonora phonograph agencies.

A sample of the $1,500 Sonora phonograph, referred to in the last issue of The Talking Machine World, has been received by I. Montagnes & Co., of Toronto, Canadian distributers of Sonora lines. The formal introduction of this Sonora, which is named "Supreme," was before a select, invited audience.

One of the particularly interesting features of the program was the exhibition of dancing given by Miss Queenie Smith, premier dancer of the Metropiltan Opera House Ballet School, to the accompaniment of music from the "Supreme" Sonora. Refreshments were served to the audience during the intermission.

James P. Bradt, general sales manager of the Columbia Graphophone Co., New York, and formerly manager of the Canadian division of the company's business, spent a half day in Toronto recently.

The shareholders of Canadian Vitaphone Co., Ltd., Toronto, have decided to wind up the concern and have published a notice to that effect. W. R. Fosdick, vice-president and general manager of the firm, has been appointed liquidator. Creditors are given until June 26 to file their claims. Canadian Vitaphone Co., Ltd., was incorporated in the fall of 1913 with an Ontario charter authorizing capital of $250,000 in $10 shares.

The Music Supply Co., Toronto, are offering their dealers a store fixture that should be a great convenience and a valuable sales adjunct. This is a multiplex display stand on which to affix the monthly hangers listing new records. There are six swinging frames, on each side of which is inserted a hanger, so that there can always be the last dozen issued on view. The frames swing like the leaves of a book. The stand sells at $10.

Ralph Cabanas, manager of the Canadian division of the Columbia Graphophone Co., has returned to headquarters at Toronto after a six weeks' trip through Western Canada to the Pacific Coast. On this, his first trip through Canada's West, Mr. Cabanas visited all the large centers and many of the smaller places in order to thoroughly familiarize himself with conditions of doing business and to become acquainted with Columbia dealers. The open-hearted hospitality with which he met and the ready welcome extended, as only Western people know how to extend it, more than ever convinced him of the wisdom of his coming to this country.

Business in the West Mr. Cabanas reported good with a very noticeable improvement over last year. The wealth resulting from last year's crops has given Grafonola and record business a very material impetus, and in British Columbia also there is quite a perceptible advance.

The Toy Products Co. of Canada, 49 Bathurst street, Toronto, Ont., manufacture the Little Wonder talking machine, which is a real novelty, and ought to command an enormous sale. It is a sure-enough talking machine that will reproduce musical records, and the price is ridiculously low—$1.

Mr. Shea, proprietor of the Hippodrome, Toronto, was recently feted by the Toronto Sportmen's Patriotic Association, and made the recipient of an Edison Diamond Disc phonograph.

The Canadian Phonograph Co., 103 Yonge street, Toronto, are advertising Operaphone disc records.

THE SALESMAN PUT IT OVER

A traveling man who stutters spent all afternoon in trying to sell a grouchy business man a bill of goods.

As the salesman was locking up his grip the grouch was impolite enough to observe in the presence of his clerks: "You must find that impediment in your speech very inconvenient at times."

"Oh, n-no," replied the salesman. "Everybody has his p-peculiarity. S-stammering is mine. What's y-yours?"

"I'm not aware that I have any," replied the merchant.

"D-do you stir y-your coffee with your r-right hand?" asked the salesman.

"Why, yes, of course," replied the merchant, a bit puzzled.

"W-well," went on the salesman, "t-that's your peculiarity. Most people use a teaspoon."

Business Most Active But Manufacturing Greatly Curtailed by Lack of Supplies from Abroad—General Situation and Outlook Reviewed—Efforts Being Made to Modify the Official Prohibition Order—A New Record Material Introduced—Gramophone Co. Makes Splendid Business Report for the Year—The Good Work Accomplished at Sixth British Music Trade Convention Held at Harrowgate—Some Very Attractive Records Being Placed on the Market These Days—Great Activity at the Hayes Factories of "His Master's Voice"—News of the Month

LONDON, E. C., ENG., June 30.—Of the trade situation at the moment it would seem from inquiry in responsible quarters that while matters in general and prohibition restrictions in particular are not altogether satisfactory, the position is not without a ray of sunshine.

The sales of records continue to make a steady showing, London vieing with the Provinces in its proportionate demand for new issues. A pleasing feature is the continued wonderful trade in the big industrial centers where dealers have laid themselves out to handle the steady call for records bearing the lighter type of musical selections and the popular vocal numbers. As a matter of fact, manufacturers scarcely cope with retail orders and factory output is determined more by the shortage of labor than any want of orders.

Machines too are selling as fast as they can be made. There is, however, a great curtailment of necessary supplies from neutral sources abroad. Future instrument trade, it is expected, will suffer by reason of the import prohibition legislation. While licenses may now be secured to import a percentage, based upon previous figures over a period of parts and accessories from Switzerland, France and Italy, it is fairly clear that official refusal will meet any application for musical imports from America and countries other than those named. This is due to the fact that space in ships returning from the States can be utilized to more profitable advantage, while on the other hand, it is a matter of more or less common knowledge that on the homeward journey from the countries named our ships do not carry anthing like their full cargo capacity. We are consequently dependent upon what our allies can get to their ports from home factories and from Switzerland. The latter country is and always has been our chief supplier of gramophone parts in which they do an enormous export business with all foreign countries. The Swiss manufacturers have naturally taken all legitimate measures to preserve their output, and in consequence of our Government's initial refusal to consider any modification of the prohibition ban, they immediately took steps to strengthen their position, with the result that large quantities of motors, tone arms, sound boxes, etc. have been diverted from England to America. We know that some important Swiss houses, feeling doubtless a little anxious as to the trade situation on this side, sent representatives to America, where large engagements were entered into for the supply of gramophone goods amounting to many months' output.

This, of course, can only mean one thing and that is that British houses will in consequence experience a shortage of supplies to a considerable extent, I am afraid. Under different circumstances such a position would not have so grave an import for us, indeed, it might be a blessing in disguise if only in stimulating home manufacture. As it is we are very much handicapped. All our suitable available machinery is utilized for war work, and labor is at a premium. That's the alpha and omega of the whole business as far as any chance of increasing our manufacturing facilities is concerned, and we can, therefore, do little beyond urging our claims as old and regular customers entitled to some preferential treatment from Swiss houses. There is encouragement in the fact that so far as possible within the iron rules of legal commercial engagements we shall be accorded fair treatment, and evidence thereof is found in the tons of supplies which continue to reach us "under license" from Switzerland. Content to believe that things might have been worse, the trade is wisely and loyally determined to make the best of it in the hope that the position may by chance improve later. For what we have received by the way of licenses to import, it is but fair to accord public thanks on behalf of the whole trade to Mr. Ricketts, of the Gramophone Co., Ltd., for his untiring efforts to secure a modification of the official prohibition order. By conspicuous ability and sound logical reasoning with the Board of Trade he succeeded in the task of moving them to modify a restriction which would have meant, had it been maintained, almost the entire destruction of British gramophone trade. As reported in another column Mr. Ricketts' work was officially recognized at the British Music convention and

"Bing Boys" Music on Columbia Records

One of the most unique combinations of England's leading comedians is to be found in London's latest revue at the Alhambra Theatre, where Oswald Stoll has provided the war-weary with a tonic of laughter, music and scenic delight. Small wonder, too, when the public has three such favorites as George Robey, Alfred Lester and Violet Loraine to keep their risibles in constant action.

These famous laughter-makers are under exclusive contract to the Columbia Co., so it comes about that this firm is once again to the fore with exclusive records by original artists of London's latest thing in revues.

And the records reflect in very truth the gaiety that permeates the Alhambra atmosphere nightly and the merry trio in one of those ridiculous nonsense songs! The verses deal with a variety of subjects, but all tail off into the wholly extraneous pronouncement that "Another little drink wouldn't do us any harm." The little asides between the artists, too, give a delightful air of spontaneiety to the record. Then there is a very pretty duet sung by George Robey and Violet Loraine, "If You Were the Only Boy in the World," and as sung by the pair it is one of the choicest gems imaginable, though one strongly suspects that one is being "spoofed" by the manner in which it is sung. Similarly, Alfred Lester and Violet Loraine have a duet, "A Lady of a Thousand Charms," in which the woe-begone Oliver Bing (Alfred Lester) apostrophises Emma (Miss Loraine) with all the exaggeration of mock seriousness of which he is capable. It is a luscious piece of "codding."

George Robey as Lucifer Bing has two typical Robey numbers in "I Stopped, I Looked, I Listened," and "In Other Words," the latter a profound and funny study in terminology. The lugubrious one, Alfred Lester, has a so-called ragtime number, but seeks syncopated inspiration, not in Dixie or Tennessee, but in "Dear Old Shepherd's Bush," and much fun is extracted out of the effort—as may well be expected by any one who can imagine Alfred Lester in ragtime. Violet Loraine is fitted with a splendid "Zoo" number, in which the animals are described as doing "The Kipling Walk."

In addition to these three fine comedians, Jack Morrison figures in his original "Clock Song" and "The Right Side of Bond Street," while the Alhambra Orchestra, conducted by John Ansell, plays the "Bing Boys" selections and three orchestral numbers.

Order Windup of German Firms

A London Gazette announcement says that orders have been made by the Board of Trade requiring the following German-owned firms to be wound up: C. Bechstein, pianoforte manufacturers, Wigmore street W., and G. Dittmann, Ltd., 58 City road, E. C., agents for records and gramophones.

Bankruptcy Petition Filed

A receiving order in bankruptcy is out against August Ernst Gottlieb Thospann who, now in a civilian interment camp, formerly carried on business at 9 Fore street avenue, London, S. C. If memory serves, it was Mr. Thospann who proposed to market a home recording apparatus.

Good Report from Gramophone Co.

"The shares of the Gramophone Co. have been very active the last day or two, on hopes connected with the financial year, which ends June 30. Since last September the undertaking has been a controlled establishment and on the occasion of the last annual report the directors indicated that the contracts then entered into were likely to mean satisfactory profits for the current year. The opinion of the board has been amply justified, we believe, and the figures in the forthcoming balance sheet may be expected to turn out excellently. It will be recalled that the trading profits to June 30, 1915, were no more than £16,772, as against £138,186 for 1913-14, the directors having been busy adapting the works and resources of the company for munitions rather than music making purposes. The installation and manufacture of special plant and tools meant a temporary loss to the ordinary shareholders, whose dividends for ten years until then had averaged 18½ per cent. per annum. The last distribution was 10 per cent., and we anticipate that the next return on the ordinary shares will turn out to be well above that rate, so busy has the company been on Government work throughout the year now coming to an end."—Pall Mall Gazette.

Ebonitis—A New Record Material

In the matter of records, machines and supplies of raw material, the English market was, until the opening of hostilities, more than we like to admit dependent upon foreign manufacturers—mainly German. Although to-day we are not sufficiently organized to meet all our requirements, it is a matter for congratulation that steps are being taken which will we hope once and for all eliminate any future chance of enemy manufacturers ever regaining their old dominance in our Home and Colonial markets. If we have from this war realized one thing, it is not to declare in advance what we propose to do but to do it, and then talk. It may, therefore, now be said that after a period of close experiment, there has been devised by Ebonitis, Ltd. (Willowbrook Grove, Zeckham, London, S. E.) and recently marketed a new material for records which supercedes and entirely eclipses in quality the German stuff. The ingredient of "Ebonitis" cannot, of course,

Mr. DEALER: You Will Be SHORT OF RECORDS This Season!

be disclosed, but I have satisfied myself of its superiority in respect of smoothness and durability of wear. Experience has proved it to be free of the many faults of the old process of manufacture which the record user too often discovered after purchase. In every way satisfactory, "Ebonitis" is a compound which may be strongly recommended to all overseas record manufacturers. The company invites all interested to communicate with them, giving as far as possible the fullest information as to quantity required, etc., when the lowest quotation possible will be forthcoming.

The Sixth British Music Trade Convention

It is now possible to send for publication a brief resumé of the proceedings at the Sixth British Music Convention, held at Harrogate last month. The delegates were received by the Mayor and Mayoress of Harrogate, who extended a very hearty welcome to their visitors. It is interesting to recall that Harrogate was the scene of the first music trade convention.

Briefly to consider what has been done and to indicate what has to be done, represented the theme of the first day's proceedings, opened by the president, Henry Billinghurst, of John Brinsmead & Sons, Ltd., who reminded his audience "that the steady growth of the business side of our conventions and the valuable lectures, papers and discussions we heard at Brighton, Buxton, Bournemouth and Blackport . . . . the work has steadily grown and with it the mutual understanding of the various branches of the trade.

"As to the future," continued Mr. Billinghurst, "it depends on ourselves. We must set about at once to further properly organize ourselves." In the form of a question the speaker put it that to capture the world's markets British manufacturers need combined effort, mutual assistance and proper State backing. A reference, we take it, to an advocacy of continued tariff protection after the war.

" . . . Apparently our Government has not realized," said Mr. Billinghurst, "that ours is a most important, and I may say, national industry. It is estimated in the first place, that there are some £37,000,000 capital invested in it; that there are about 62,500 people directly employed, and that their average annual wages amount to £5,388,000. We can justly claim that Great Britain is the home of the industry; that the oldest and most experienced pianoforte manufacturing houses in the world are British, and that many of the leading English makers were already ancient firms before their principal German competitors came into existence. I know of no single great innovation regulating the construction of modern pianofortes that was not originally invented and developed by British makers; only to be subsequently copied (when proved to be successful) by our foreign competitors." In the course of reference to official action in relation to the imposition of a tariff duty, prohibition of imports, etc., the president complained that the Government, even to-day, permits German music and instrument agencies and business owned by Germans (either interned or resident in Germany), to continue to trade and sell their wares, and thus preserve the good will of German names and German firms against the time peace shall be declared.

Because of want of organization and power of resistance, the music trade was the easiest to shoot at and the least likely to retaliate. Here Mr. Billinghurst breathed a word of encouragement—"We have been passing through dark days, but we have grappled over difficulties with the little available organization to hand." In combination and "with the advantage of the energy, knowledge and resource of Mr. Ricketts, of the Gramophone Co., those able to deal with the crisis had succeeded in getting permission to import requisite supplies from France and a favorable consideration of importations of other necessary supplies from Switzerland and Italy. . . . We must combine to keep out the £749,450 worth of musical instruments (to say nothing of Gramophones and sheet music), imported annually from Germany and Austria; we must secure to this country the £504,666 imported from Germany by Australia, the £33,885 by Canada, the £124,709 by South Africa, the £68,666 by New Zealand, etc."

Mr. Billinghurst's instructive and inspiring address was warmly applauded and there can be no doubt that every endeavor will be made to carry out, as far as possible, that which he so strongly urged.

Replying to a vote of thanks, Mr. Billinghurst took the oocasion to pay a handsome tribute to Mr. Ricketts for the very valuable work which he had done on behalf of the trade in securing from the Board of Trade a partial cancellation of the importation restrictions. In these circumstances the convention conveyed to Mr. Ricketts a very hearty vote of thanks and a well deserved memento in the shape of a gold cigarette case, inscribed "In recognition of invaluable services rendered to the British musical industry, 1916." Mr. Ricketts suitably acknowledged this pleasing recognition of his efforts.

Many important subjects were opened by various important members of the trade, and afterwards discussed with an evident desire to reach definite and satisfactory conclusions upon which to act.

Alex Dow read an exceedingly valuable paper touching upon the best method for increasing overseas trade. He evinced a complete and practical understanding of his subject and at the finish was successful in carrying the following interesting resolution: "That this meeting of the British Pianoforte Manufacturers approves the policy of sending out (to British colonies, etc.), a commission of inquiry, regarding the overseas trade, and if the council can devise ways and means to carry it into effect, this meeting pledges itself to give the scheme its hearty support and financial help."

Apart from subjects affecting internal organization, methods of handling trade difficulties, etc., it must be acknowledged that the outstanding feature of the convention proceedings was the president's theme regarding the position of the British music trade in relation to the present and the after-war problems. I should describe the keynote of the convention as concentrated in a general expression that now and no other is the time for preparation. If by reason of labor shortage, prohibitions as to this or that, and other exigencies inseparable from present circumstances, it may be difficult to put into immediate effect any special campaign along the lines indicated, it should in no single instance be allowed to discourage or prejudice the work of preparation. The war may last another five years; on the other hand, it may be only another twelve months or so before peace is declared—we do not know. But what we do know is that we must be in every sense ready for "the day." Let us get that into our minds and act upon it concertedly and at once.

I know of no better example or stimulant best calculated to achieve this objective than Mr. Billinghurst's energetic and encouraging work, which, in combination with the activities of other leading traders in the pianoforte, organ, supplies, gramophones and sheet music sections, deserves the highest praise and practical support of the music industry as a whole.

Excellent Zonophone Lists

"Records you can rely on" aptly express the thoughts of Zonophone dealers, for each month the company issues a list of new numbers reliable as to variety, artists, quality and price. The supplement for July is a typical example, there being a real galaxy of first calss talent whose contributions are of like value from every point of view. A window bill depicts the famous Florrie Forde in one of her gorgeous costumes, the text giving publicity to some of her latest and best records, of which No. 1,630 bearing "Mister Sergeant Michael Donoghue" and "The Girls Know as Much as You Know" figure on the July list. Selections part 1 and 2 of "Chin-Chin," the American revue success, are handled very tunefully by the Black Diamond Band, which is also responsible for a medley march, introducing a selection of typical Australian ditties, and "The Call" march, both on No. 1,625. The popular lyric tenor, Sidney Coltham, is down for one ten-inch and one twelve-inch record, and other good sellers are vocal records by Foster Richardson, Herbert Payne, G. H. Elliott, Billy Whitlock and Henry Bluff and the Misses Elsie and Dorothy Southgate (violin and mustel organ), J. Pidoux (banjo), etc. Zonophone dealers abroad should

certainly stock well of the good things on this month's program.

Miniature Folder Brings Message

A miniature folder, measuring 3½x2½ inches, reaches us from the Gramophone Co. It is a novelty-reminder of the scarcity of paper, and points out that it may be necessary one day to economize as per sample. Meanwhile, "there is no scarcity of records," and a plentiful supply of the "Happy Day" revue numbers are ready. Two hits in one—an advertising and a record achievement, which "H. M. V." dealers will not be slow to appreciate.

Winner Record Co. Very Active

In the artistic field, if one may so term it in relation to record contributors, the Winner Record Co. has of late been very active. At one time it was content with the comfortable proverb that "there are as good fish in the sea," etc., while other firms secured unto their patrons the large fish exclusively. It is undoubtedly a fine commercial asset to provide that from which others are excluded. Hence the exclusive contract vogue with leading artists. Many well-known comedians now serve their best on Winners exclusively, as for instance, The Two Bobs and Will Evans, while other famous laughter-raisers in plenty provide each month all the gems from the musical sphere of London. The quality and general value of Winners were never better than to-day, which, of course, is as it should be with a company that is not content merely to rest upon past laurels. Of recent record issues the June supplement provides really excellent fare and it is sufficient to say that therein may be found a remarkable aggregation of current music, both vocal and instrumental, by eminent artists. To mention a few: Billy Merson, Ernie Mayne, The Two Bobs, Stanley Kirby, Jessie Broughton, the Royal Court Orchestra and, last but not least, the renowned Alhambra Theatre Orchestra, which under the baton of John Ansell, contributes some splendid selections of that popular revue, "The Bing Boys Are Here."

"His Master's Voice" Activities

The Hayes factories of "His Master's Voice" Co. appear to have been abnormally busy of late in the wealth of quality and abundance of new record issues. No sooner a new revue or musical play is put on the boards the gramophone recording director is busy putting it on "H. M. V." records. No time is lost and no expense spared in maintaining the tradition of the firm for first water quality and quick issue. One instance in particular is furnished in connection with "The Happy Day" musical comedy at Daly's Theatre. The first night was May 13. Seventeen days later a recording session for a complete set of records was in full swing and by June 7 the discs were on sale!

Other recent issues include the musical successes from "My Lady Frayle," "Mr. Manhattan" and "The Bing Boys Are Here," in which there are many tuneful items that make a wide appeal to gramophone owners. Dealers are, of course, carrying full stocks and always it seems bombarding the company with repeat orders.

Big sales, too, are experienced in the ordinary "H. M. V." monthly issues, which cater to the demand for operatic and standard songs and instrumental numbers, not excluding a reasonable leavening of the better class comic items popular with music hall patrons.

In fact, it must be admitted that while the Gramophone Co. makes a more than ordinary contribution on the serious side of music, at the same time it by no means neglects the sentimental and comic sections, upon which, by the way, many companies assert, and truly so, they place the greatest reliance from a revenue view point. Be that as it may the fact remains that this company occupies a supreme position in the provision of the greatest number of all classes of records, the wide range of music offered being truly remarkable. A big advertising campaign has been undertaken to make known the splendid musical value of the "H. M. V." June supplement, and we have little doubt that dealers will rise to the occasion by supporting the company's large generous expenditure, locally.

Sad and Pathetic Music Has the Call

In the glamour of war there is much pathos. Sons and daughters, wives and mothers bid goodbye to their loved ones, bravely disguising as best they can their full and aching hearts. In times of such anxiety, music, as we all know, exercises a wonderfully soothing influence, and this in mind, it is curious to note the type of record which finds most favor. Inquiry reveals that among a substantial percentage of people scant consideration is given music of the vigorously cheery kind, the evident demand being for records having a tendency rather in the direction of the sad and pathetic. "When the War Is Over, Mother, Dear," "When Daddy Comes Home Again" are the class of songs that sell best. At least that for instance is the experience of one company—The Invicta—who find that their "Guardsman" records of the two numbers mentioned are in greater demand than they can adequately fill. The latest "Guardsman" list, by the way, is a real bumper—full of picked selling numbers; it should be in the hands of all overseas dealers out for a profitable line.

REPORTS BUSINESS EXPANSION

Miss Elizabeth R. Nanes, secretary and general manager of the Nanes Art Furniture Co., New York, manufacturer of the Savoy Gramophones, in a chat with The World, commented upon the progress which this company is making. "During the past few months we have placed our lines with a number of prominent dealers throughout the country," said Miss Nanes. "They are all well pleased with our combination cabinets and machines, and judging from the reports of our dealers we have every reason to believe that the Savoy line will meet with a ready sale during the remainder of the year."

The Ideal Music Co., Poughkeepsie, has been incorporated with a capital stock of $10,000 to manufacture talking machines and supplies, sport and other goods. The directors are Harry Lawson, Albert R. Palmer and Ralph P. Dunlap.

The Whitehall Phonograph Shop, which has opened elaborate quarters at 32 Whitehall street, Atlanta, Ga., will feature the Edison Diamond Disc phonograph.

The Hall-Stephenson Co., of Knoxville, Tenn., has retired from business, and the Columbia Grafonola agency controlled by it has been secured by the firm of Sterchi & Haun, with H. C. Fowler as manager, who will push the Columbia line.

FLETCHER BROS. ATTRACTIVE STORE

Establishment Just Opened in Victoria Is Most Attractively Arranged—Recital Hall a Feature—Daily Concerts Are Well Attended

VICTORIA, B. C., CAN., July 3.—Fletcher Bros., one of the largest retail music houses in the Dominion of Canada, with stores in Vancouver

Columbia and Edison Demonstrating Rooms

and Victoria, have just moved into a new store in this city, which is considered by leading authorities as the finest music store in Western Canada.

In addition to handling a high-grade line of pianos and player-pianos Fletcher Bros. carry the Columbia and Edison lines of machines and

Fletcher Bros.' Recital Hall

records, with which they have achieved excellent success.

The accompanying photographs will give an idea of the attractiveness of the new Fletcher Bros. warerooms. The talking machine demonstration rooms are furnished attractively and comfortably, the main idea being to have visitors and patrons feel at home when selecting records and machines.

A feature of the new warerooms is a beautiful recital hall, in which informal concerts are given daily on the Columbia Grafonolas and the Edison Diamond Disc phonographs. These recitals are well attended and serve to impress upon music lovers the musical possibilities of the modern talking machine record. These recitals have resulted in the closing of numerous machine sales, in addition to being a powerful stimulus to the development of increased record business.

HAS AN INTERESTING HISTORY

Career of Denton, Cottier & Daniels, Buffalo, Admirably Set Forth in Special Article in Recent Edition of Buffalo Paper

In a recent issue of the Buffalo, N. Y., Press, devoted entirely to the gathering of the Rotary Clubs of that city, there appeared a full page illustrated story regarding the house of Denton, Cottier & Daniels, the head of which, Wm. H. Daniels, is an enthusiastic Rotarian. The article was devoted exclusively to the talking machine department of the company. The illustration included a view of the Victrola department and portraits of such stars as Geraldine Farrar, Fritz Kreisler, Mme. Schumann-Heink, Mischa Elman, Reinald Werrenrath and Harry Lauder listening to the reproduction of their voices through the medium of the Victrola. The history of the house of Denton, Cottier & Daniels, which was founded in 1827, was particularly interesting.

FIGURES ILLUSTRATE PROGRESS

"Our business is unusually satisfactory for this time of the year," said Philip A. Ravis, vice-president of the New York Album & Card Co., New York, in a recent chat with The World. "In fact, our sales totals for June compared very favorably with the figures of last fall, indicating the healthy condition of the talking machine industry.

"We have not only experienced a phenomenal demand for our Nyacco metal back albums, but our No. 1012 album, which is somewhat lower in price, is also meeting with a splendid reception everywhere. We are urging our dealers to anticipate their album requirements as much as possible, as the supply of raw materials is both limited and uncertain."

SOME VALUABLE POINTERS

"The Big Magnet Gets 'Em," is the pithy title of one section of an article purporting to give big ideas for small dealers. In part this says: "A small store with a handsome front attracts considerably more attention than a city block of poorly lighted and poorly decorated windows. Your store face, not its size, counts. You've got to be looked at before you're bought at."

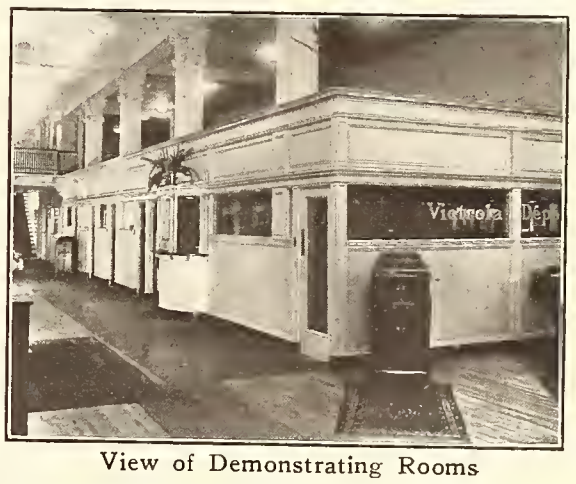
"Fresh Paint" is the second heading in this article in the "Columbia Record." This paragraph emphasizes the fact that a clean store front is always attractive, and that paint is one thing which may distinguish a store from its drab neighbors.

Other valuable sections in this article are headed "Free Concerts" and "Welcome," these pertinent and timely subjects being discussed in an informal, breezy way, which is both interesting and unusual.

FINE DEPARTMENT IN LOS ANGELES

Elaborate Arrangements for Accommodation of Talking Machine Customers in Store of Wiley B. Allen Co.—Ten Demonstrating Rooms

LOS ANGELES, CAL., July 3.—What is declared to be one of the handsomest talking machine departments on the Pacific Coast is that of the Wiley B. Allen Co. in this city, which embraces



View of Demonstrating Rooms

ten sound-proof demonstration booths arranged in a straight and broken line, together with other conveniences for machine display and record storage. The woodwork is of Colonial design finished in old ivory enamel with delicate gold trim. The interiors of the rooms are heavily carpeted and rich green draperies are elaborately furnished. The record stock is kept in a long alley in back of the room. Both the Victor and Columbia lines are handled in the department, which is under the management of H. E. Lindsey, assisted by L. O. LaMont, Miss Lottie Kruse, Miss R. Johnson and Miss Mary Schienle.

UKULELES

The biggest sellers in the small musical instrument business. Why handle inferior machine-made American imitations when you can get at similar prices the genuine hand-made instruments of

Jonah Kumulae, Honolulu

The old, thoroughly seasoned native Hawaiian Koa of which they are constructed is greatly superior to any other wood in tone quality—Kumulae instruments have no superior in this respect.

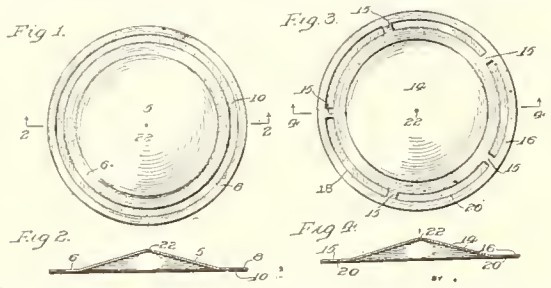
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., July 8.—SOUND BOX DIAPHRAGM.—John H. Elfering, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,182,078.

The principal object of this invention is to provide a diaphragm that will readily respond to the most delicate vibrations and accurately record and reproduce all of the high and low tones and the included range with equal clearness. Further objects of this invention are to provide a diaphragm having its major portion formed substantially inflexible and capable of reciprocation independently of its margin; and to provide means to flexibly connect said inflexible major portion with said margin.

The form of this invention provides a diaphragm comprising a central conically dished inflexible plate, having a peripheral flange extended in a plane in substantially perpendicular relation to the axis of said conical plate, a separate annular margin surrounding said flange in a plane therewith, and a thin flexible imperforable membrane connecting said flange and mar-

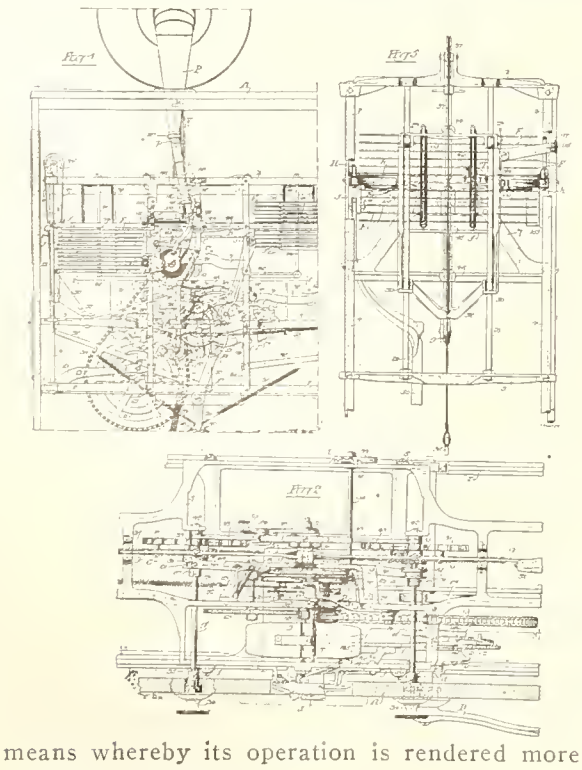


gin and arranged to support said inflexible plate. In the accompanying drawing Figure 1 is a front elevational view of a diaphragm showing the perferred embodiment of this invention; Fig. 2 is a central transverse sectional view taken on the line 2—2 in Fig. 1; Fig. 3 is a front elevational view of a modification of the structure shown in Fig. 1, and Fig. 4 is a transverse sectional view of the diaphragm shown in Fig. 3 and taken on the line 4—4 in said figure.

AUTOMATIC TALKING MACHINE.—John Gabel, Chicago, Ill. Patent No. 1,182,551.

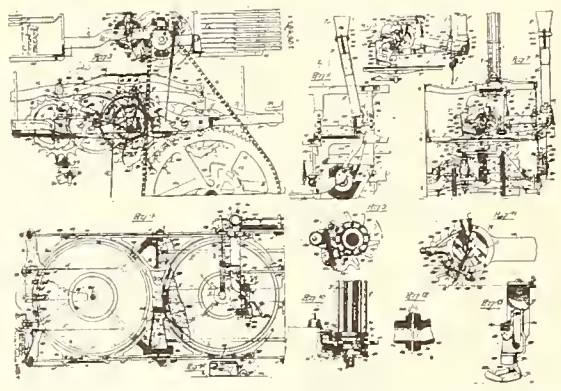
The invention relates to talking or sound reproducing machines of the type set forth in an application filed February 26, 1906, Serial Number 302,878, in which mechanism is provided for automatically engaging the disks or records and the sound box needle or stylus and for automatically shifting the sound box or reproducer, and starting and stopping the machine.

The object of the present invention is to improve and simplify the construction and provide



means whereby its operation is rendered more positive and certain.

In the drawings, Figure 1 is a rear view of the machine with the back door of the casing removed to expose the operating mechanism; Fig. 2 is a plan view of the part of the operating mechanism with parts shown in section on the line 2—2 of Fig. 1. Fig. 3 is an enlarged detail view with parts shown in vertical section on the line 3—3 of Fig. 2 and viewing the mechanism from the front of the machine. Fig 3a is a detail view in rear elevation of parts shown in Fig. 3. Fig. 4 is a plan view of the upper portion of the mechanism with parts shown in sec-

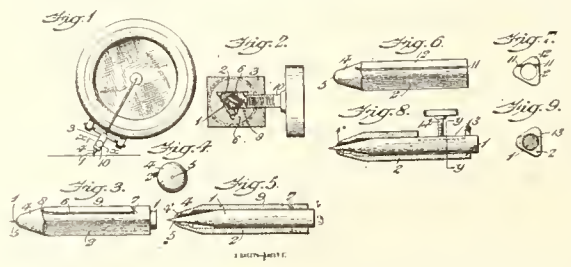


tion on the line 4—4 of Fig. 1. Fig. 4a is a view in front elevation of parts shown in Fig. 4. Fig. 5 is an end view of the upper portion of the machine. Fig. 6 is an enlarged detail view of parts shown in Fig. 1. Fig. 7 is a view of the mechanism shown in Fig. 6 with parts in section on the line 7—7 of Fig. 6. Fig. 8 is a view of parts shown in Fig. 7 in shifted position. Fig. 9 is an enlarged detail view in horizontal section of the needle-holder or magazine. Fig. 10 is a view in elevation thereof. Fig. 11 is an enlarged view in elevation of the sound box illustrating the needle changing mechanism. Fig. 12 is a sectional view of a joint of the sound box arm. Fig. 13 is an enlarged detail view of the needle changing mechanism with parts shown in section.

NEEDLE HOLDER FOR A TALKING MACHINE.—Albert J. Mickley, New York. Patent No. 1,182,922.

This invention consists of an improvement in the means for firmly, immovably and uniformly holding the needle of a talking machine, the same embodying a sleeve or socket in which such needle is contained, the same being adapted to support directly the point portion of the needle, as well as the body thereof, so that the needle is solidly and steadily sustained throughout its length, whereby the rasping, metallic, and other unsatisfactory sounds in the reproduction are obviated, and there are fuller, more distinct, clearer and more resonant tones produced with much less wear upon the records than heretofore, due to the greater length and finer pointed needles that can be used with this invention.

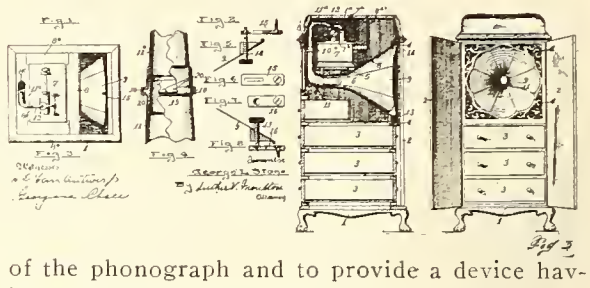
Figure 1 represents a side elevation of a needle holder for a talking machine embodying this invention. Fig. 2 represents a transverse section thereof on the line x—x, Fig. 1, on an enlarged scale. Fig. 3 represents a side elevation thereof on an enlarged scale. Fig. 4 represents a front end view thereof. Fig. 5 represents



a longitudinal section thereof. Fig. 6 represents a side elevation showing a slight modification thereof. Fig. 7 represents an end view thereof. Fig. 8 represents a longitudinal section of another embodiment of the invention. Fig. 9 represents a transverse section thereof on the line y—y, Fig. 8.

PHONOGRAPH.—George L. Stone, Grand Rapids, Mich., assignor to Thos. A. Edison, Inc., West Orange, N. J. Patent No. 1,184,268.

This invention relates to phonographs and its object is to provide improved means for pivotally mounting the horn or sound conveyer



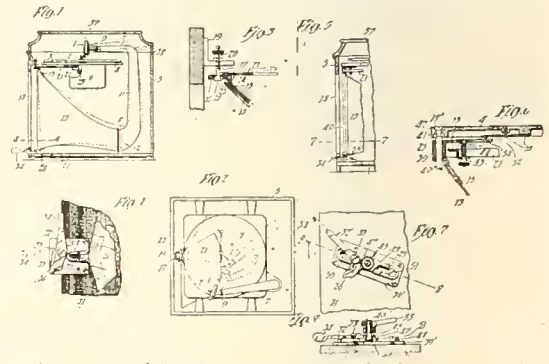
of the phonograph and to provide a device having various new and useful features.

Figure 1 is a side elevation of a device embodying the invention mounted in a cabinet with parts broken away to show the construction; Fig. 2 a front elevation of the same; Fig. 3 a plan view with the top removed; Fig. 4 an enlarged detail of the joint in the neck of the horn; Fig. 5 an enlarged detail of the upper pivot of the horn; Fig. 6 a detail of the upper pivot plat; Fig. 7 a detail of the lower pivot plate, and Fig. 8 a sectional detail of the lower pivot.

PHONOGRAPH OR TALKING MACHINE.—Thomas A. Edison, Llewellyn Park, West Orange, N. J. Patent No. 1,184,332.

This invention relates to phonographs or talking machines particularly of the type in which disk or flat records are operated upon, and preferably in which the sound conveying and amplifying horn is inclosed within a suitable cabinet.

In this invention the sound reproducer is carried by the sound conveyer which is connected with the interior of the reproducer, the arm of the sound conveyer to which the reproducer is secured preferably being integral and



continuous with the large amplifying horn. The conveyor is pivotally mounted or suspended adjacent the large exit end of the amplifier in such a manner that the whole conveyer and reproducer oscillate about the pivotal means referred to during the reproduction of the record, the mounting of the horn or amplifier being preferably such as also to permit a simple manipulation or adjustment of the same to remove the reproducer from the operative position when it is desired to change the record. Also, in the preferred embodiment of this invention, the lateral movement of oscillation of the sound conveyer and reproducer during the reproduction of a record is obtained by the engagement of mechanical means with co-acting driving means, the said mechanical means being secured to the sound amplifier or so mounted as to cause the desired feeding movement of the latter, this mechanical means and the driving means being disengaged by the same adjustment of the sound conveyer, which places the reproducer in inoperative position.

Figure 1 represents a vertical cross section and side elevation of a phonograph or talking machine comprising an inclosing cabinet and embodying one form of the invention; Fig. 2 represents a top plan view of the same, the cover of the cabinet being removed; Fig. 3 represents an enlarged vertical sectional detail of the means for pivotally supporting the upper side of the horn or sound amplifier, as shown in Fig. 1; Fig. 4 is an enlarged section taken upon line 4—4 of Fig. 1; Fig. 5 is a partial sectional and side elevational view similar to Fig. 1 of a modification of the invention; Fig. 6 is an en-

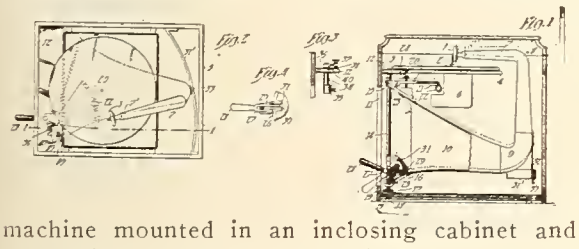
larged sectional detail of the means for pivotally supporting the upper side of the horn or sound amplifier used in connection therewith; Fig. 7 is an enlarged sectional view taken on line 7—7 of Fig. 5, and Fig. 8 is a section taken upon line 8—8 of Fig. 7, certain parts being shown in side elevation.

PHONOGRAPH OR TALKING MACHINE.—Thomas A. Edison, West Orange, N. J., assignor to Thos. A. Edison, Inc., same place. Patent No. 1,184 333.

This invention relates to phonographs or talking machines particularly of the type in which disk or flat records are operated upon, and preferably in which the sound conveying and amplifying horn in inclosed within a suitable cabinet; and in a general way, the invention resembles that disclosed in application Serial No. 596,007, filed December 7, 1910, and entitled phonographs or talking machines. In accordance with this invention, the sound reproducer is carried by the sound conveyer, which is connected with the interior of the reproducer, the arm of the sound conveyer to which the reproducer is secured preferably being integral and continuous with the large amplifying horn. The conveyer is pivotally mounted or suspended adjacent the large exit end of the amplifier in such a manner that the conveyer and reproducer oscillate about an axis through the pivotal means referred to during the reproduction of the record, the mounting of the horn or amplifier being preferably such as also to permit a simple manipulation or adjustment of the same to remove the reproducer from operative position when it is desired to change the record. Also, in the preferred embodiment of this invention the lateral movement of oscillation of the sound conveyer and reproducer during the reproduction of a record is obtained by the engagement of a mechanical means with co-acting driving means, the said mechanical means being secured to the sound amplifier and so mounted as to cause the desired feeding movement of the latter, this mechanical means and the driving means being disengaged by the adjustment of the sound conveyer which places the reproducer in inoperative position.

The principal object of this invention is to improve the means for placing the reproducer and feed in inoperative position, these means preferably imparting a direct bodily elevation to the conveyer.

Figure 1 represents a vertical cross-section and a side elevation of a phonograph or talking



machine mounted in an inclosing cabinet and embodying one form of the invention; Fig. 2 represents a top plan view thereof, the cover of the casing being removed; Fig. 3 represents a side elevation of improved stop, the parts of the casing to which the same is connected being shown in section, and Fig. 4 represents a plan view of improved means for adjusting the sound conveyer, the supporting rod to which same are connected being shown in cross section.

PHONOGRAPH OR TALKING MACHINE.—Thomas A Edison, West Orange, N. J. Patent No. 1,184,334.

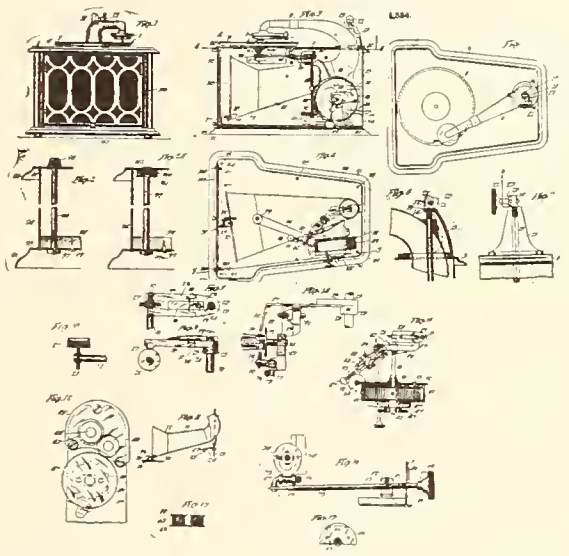
This invention relates to phonographs or talking machines, particularly of the type in which disk or flat records are operated upon and preferably in which the sound conveying and amplifying horn is inclosed within a suitable cabinet, the present invention resembling in some respects that disclosed in application Serial No. 609, 100, filed February 17, 1911.

The principal object of the invention is to provide a machine of the type above referred to, which may be constructed in a compact and inexpensive form.

Another object is to provide means for rotating the record support and feeding the reproducer across the record surface, and means whereby the said first named means are rendered inoperative when the reproducer is disengaged from the record surface.

A further object of the invention is to provide a metallic talking machine cabinet adapted to support the talking machine motor and of such a construction that the vibrations of the motor will not be imparted to the cabinet, unpleasant foreign sounds, such as would be produced by the vibration of the cabinet being avoided.

Figure 1 represents a front elevation of a phonograph or talking machine embodying one form of the invention; Fig. 2 represents a vertical sectional view illustrating a detail of construction of improved cabinet; Fig. 2a represents a sectional view illustrating a modification of the feature of the invention disclosed in Fig. 2; Fig. 3 represents a view of the phonograph or talking machine of Fig. 1, partly in elevation and partly in vertical section taken on the line 3—3 of Fig. 4; Fig. 4 represents a sectional view thereof taken on the line 4—4 of Fig. 3; Fig. 5 represents a top plan view thereof; Fig. 6 represents a vertical sectional view on the line 6—6 of Fig. 7 and illustrating the upper part of the mounting of the sound conveyer; Fig. 7

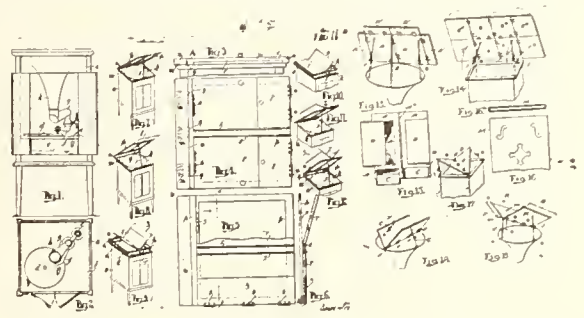


represents an elevation of the parts shown in Fig. 6, taken from a point to the right of Fig. 6; Figs. 8 and 9 represent a plan view and side elevation respectively of details of the apparatus employed for feeding the sound conveyer laterally; Fig. 10 represents a sectional view taken on the line 10—10 of Fig. 8; Figs. 11 to 17 inclusive represent views of details of construction, Fig. 12 being in elevation, Fig. 13 in central cross section, and Figs. 11, 14, 15, 16 and 17 being partly in section and partly in elevation, the section shown in Fig. 17 being taken on the line 17—17 of Fig. 16.

TALKING MACHINE.—Alex Fischer, Kensington, London, England. Patent No. 1,184,938.

The present invention refers to a construction, in which the top or door of the cabinet, while being so formed as to be capable of being turned into various positions, is itself furnished with one or more secondary hinged or sliding flaps or strips, forming a reflecting surface or surfaces which can be brought into a large number of different positions and retained in such positions independently of one another when desired, in order that the sound may be reflected either in one direction only, as has already been the case, or in various directions at the same time and in various ways to suit requirements. Where a cabinet is not used, there is a reflecting device adapted to be mounted at the mouth of the trumpet of a talking machine, which reflecting device is provided with a secondary hinged or sliding flap or flaps or strips before mentioned.

Figure 1 is a front elevation of the machine with the doors open; Fig. 2 is a sectional plan; Fig. 3 is an enlarged view of the top of the cabinet; Fig. 4 is a plan view of same. Fig. 5 is a similar view to Fig. 4 of a slightly modified form. Fig. 6 is a sectional view on the line A—B of Fig. 5 looking in the direction of the arrow. Figs. 7 to 12 are partly diagrammatic views of the cabinet showing different kinds of covers, and also showing the cover in some of the different positions it can be made to assume. Fig. 13 illustrates how a reflector with adjustable flaps may be applied adjustly directly to the mouth of the horn. Fig. 14 shows another form of the reflector applied adjustably to the top of a cabinet. Fig. 15 is a plan view of still another form of reflector with sliding flaps. Fig. 16 is a plan view of a portion of a reflector provided with a resonating chamber. Fig. 16a



shows a transverse section thereof. Fig. 17 is a perspective view showing still another way of applying reflectors to the top of a cabinet in such manner that they may be adjusted relatively to the mouth of the horn and relatively to each other. Figs. 18 and 19 show other ways of applying reflectors to the mouth of the horn of a talking machine.

PHONOGRAPH FOR DOLLS OR OTHER TOYS.—Herman Ringel, Newark, N. J. Patent No. 1,185,001.

This invention relates more especially to phonographs designed to be placed in dolls or other toys, whereby they can be constructed in a manner so simple and inexpensive as to be adapted to almost universal use in the production of articulate sounds, and especially short sentences or phrases of everyday speech.

In the accompanying drawings, Figure 1 represents a front elevation of the improved phonograph. Fig. 2 represent a plan view of the same. Fig. 3 represents a transverse section taken on lines x—x of Fig. 1, looking in the direction indicated by the arrows. Fig. 4 represents in partial section, a side elevation of the improved phonograph taken on lines a—a of

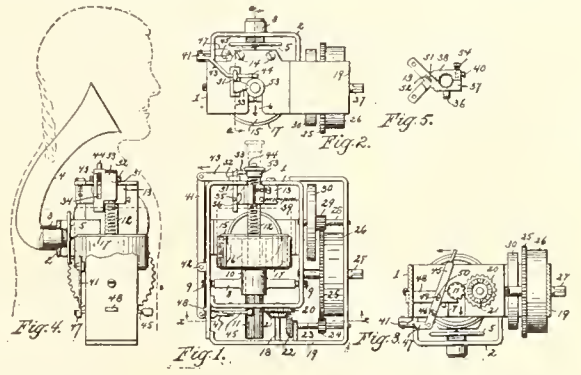


Fig. 2, looking in the direction indicated by the arrows, the phonograph being shown in position in a dotted view of a doll, and Fig. 5 represents a plan view of the split-nut used in connection with the improved phonograph.

Other patents received which have not been illustrated and described in this department of The World, are:

SUPERVISES MOTOR CONSTRUCTION

Louis P. Valiquet Appointed Consulting Engineer for Otto Heineman Co.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week the appointment of Louis P. Valiquet as consulting engineer, with headquarters at the Heineman factories, in Elyria, O. Mr. Valiquet will supervise motor construction and work out new ideas and plans in the company's experimenting and research departments.

Louis P. Valiquet is well known both here and abroad as one of the ablest technical men in the talking machine industry, and his previous connections have included important posts with leading talking machine manufacturers. His intimate knowledge of the mechanical and constructive phases of the industry will enable Mr. Valiquet to render invaluable aid to the Otto Heineman Phonograph Supply Co. in its plans to render the manufacturers maximum service and co-operation.

A certificate of incorporation was issued last week by the Secretary of State at Trenton, N. J., to the Bergen Talking Machine Co., of Hackensack, N. J., which will engage in the manufacture and sale of talking machines.

COLUMBIA CO. STILL EXPANDING

To Increase Further Its Manufacturing Facilities at Bridgeport—Fifth Edition of Music Money Just Issued—A Valuable Volume

The Columbia Graphophone Co. is making plans to even further increase its manufacturing facilities at Bridgeport, Conn. Notwithstanding the recent completion of an immense plant, the purchase of a six-story factory building, and the construction of a new building adjoining the company's present plant, it has been found that additions are still needed, and steps in that direction have already been taken. The Columbia factory forces are working three shifts a day, and it need hardly be stated that the company is closing the best year in its history. In fact, the figures to date are so far ahead of last year, the previous record-breaker, that comparisons belittle the efforts and results achieved in 1915.

The fifth edition of Music Money made its appearance last week and outside of some illustrations of new factory buildings completed since the last edition, and the revision of the statistics regarding sales and output, this edition is substantially the same as the fourth one. This book has acquired an enviable reputation in the talking machine industry, and several dealers have told the Columbia Co. that they regard it as the "Bible." Summarized briefly, Music Money shows what the industry is founded on, how the demand for talking machine products can be established and stimulated and how the dealer can profitably handle this demand. It is addressed to exclusive talking machine dealers and piano and furniture dealers handling talking machines, and for piano merchants, in particular, it is especially valuable in that it points out how the dealer, through the proper exploitation of his talking machine department, can bring his patrons to his warerooms frequently and regularly.

PATHE TRADE MARK REGISTERED

The Pathé Frères Phonograph Co., of Wilmington, Del., recently filed a trade mark in the patent office at Washington, D. C., consisting of a disc bearing the words "Sapphire Records," the bottom of the plate containing the words "Made for United States Consumption Only."

CONTINUING ITS CAMPAIGN

Notwithstanding the advent of warm weather, the Aeolian Co. is continuing its splendid campaign in behalf of the Aeolian-Vocalion. Sunday's newspapers contain a large sized advertisement presenting the distinctive merits of the Aeolian-Vocalion in an interesting and personal manner. This advertisement carried an attractive illustration which enhanced its effectiveness materially.

The Columbia Graphophone Co., at 174 Tremont street, Boston, Mass., has taken a new lease of the premises, together with additional space on the second floor.

Gordon Stewart, who has had several years experience in the talking machine line, has been appointed manager of the Victor department of the M. Steinert & Sons Co., of Bangor, Me.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

No—You Can't Buy It Everywhere

NOR can you buy a Howard watch, or a Worth gown, or a Pierce-Arrow motor—everywhere. Because of exceptional merits the sales of **Sonoras** are great.

The best representative in each locality is chosen as the **Sonora** representative and this selection implies that the **Sonora** dealer is better qualified to give his customers perfect service, than is any other firm in his territory.

IT is a fact that the **Sonora** does more to sell itself than any salesman.

After listening to the magnificent richness of the tone of the **Sonora**, the visitor naturally is interested in knowing something about the mechanical construction of the instrument, the purchase of which has been mentally decided upon.

Then the salesman who is demonstrating the **Sonora** explains the perfection of the Swiss-made motor, the unique effective method of tone control at the sound source, the superiority of design of the **Sonora** Sound Box, the advantage of a phonograph made especially (and not adapted by means of makeshifts) to play all disc records, etc.

Grand $225

BUT these explanations are not what sell the **Sonora** in such quantities as to keep the factory running at the highest possible speed.

The *superb tonal beauty* of the **Sonora** and its handsome appearance are its great sales features.

If you contemplate *selling* phonographs, go out and hear all makes, just as though you were going to buy a machine for your *own use* at home.

Then you'll know that the **Sonora** is the finest phonograph manufactured to-day, and you will understand why it was awarded the highest score for tone quality at the Panama Pacific International Exposition.

WRITE today if you are interested in handling the **Sonora**. *Should territory be open we shall be pleased to consider the matter with you.*

Ten magnificent models are now ready

$45 $60 $75 $100 $150 $175 $190 $225 $350 $1000

INDIVIDUALITY

Re-Creation of every tonal characteristic of the human voice and human-played instruments, *plus* the magnetism that only a human can give to musical sound, is the unparalleled achievement of the New Edison.

Edison dealers are Edison dealers because of their ability to appreciate and profit by this individuality that distinguishes the New Edison from every other instrument or device fashioned by the hand of man.

The TALKING MACHINE WORLD

For the makers & sellers of talking machines

Published Each Month by Estate of Edward Lyman Bill at 373 Fourth Ave., New York, August 15, 1916

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly.*

Entered as second-class matter May 2, 1905, at the post office at New York, N. Y., under the act of Congress of March 2, 1879.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

Why this is "The Highest Class Talking Machine in the World"

1—Universal Playing

THE Sonora is **designed** to play all makes of disc records perfectly. It was so designed **before** it was built; no make-shifts or awkward, unsatisfactory devices are added to secure this decided advantage.

2—Tone Quality

FOR tone quality the Sonora is without a peer, winning the highest score for this at the Panama-Pacific Exposition in competition with the world's foremost phonographs and talking machines.

3—Tone Control

AT the sound source, the proper place, is the Sonora tone control. It is simple in design, but remarkably effective in expression. This is another notable Sonora patent that assists in making this instrument the very best one that human ingenuity has been able to devise.

4—Sound Box

THIS assists in reproducing the golden tones and is noteworthy for its excellence of construction. Made from the best of materials, it sends forth notes that are clear, distinct, accurate and beautiful.

5—Automatic Stop

ON all machines there is placed an automatic stop, which is decidedly convenient and useful. It is simple and mechanically correct, and gives added pleasure and enjoyment.

6—Cabinet Work and Design

THE Sonora is extraordinary for the exceptional beauty of its design and cabinet work. The graceful, flowing lines ("Bulge" effect) are the result of a patented process and are **exclusive** with Sonora.

7—Motor

THE motor is made in Switzerland by experts with generations of experience, and plays about twice as long as do motors of other machines sold at similar prices. For constructional excellence, durability, and strength, it is the supreme motor of the phonograph world.

8—Sound Amplifier or Horn

THE sound amplifier helps create the wonderful tone that the Sonora is noted for. It is made on scientific principles and with special treatments that are exclusive with us.

9—Envelope Filing System

THIS is a marvel of simplicity and convenience. Records are instantly available and can always be located where and when they are desired.

The Complete Instrument

THE assembled machine is an aggregation of individually perfect parts correctly combined. As a result, the tone is of unrivaled clarity and magnificence, with a depth of expression that makes the Sonora unqualifiedly "The Highest Class Talking Machine in the World."

THE COMPETITION IDEA A BIG FACTOR IN SALES RESULTS

Monthly Sales Contests and Bonus System Prove Good Stimulus to Sales Force in Securing Satisfactory Results—Competition Is the Life of Salesmanship

The spirit of competition goes far to make life worth living. The average man can eat so much, wear only one suit of clothes at a time and otherwise find himself limited in his actual requirements, but in the face of competition he endeavors to eat elaborately in lavish surroundings, have several changes of clothes, all good, and to be seen in fast company, as it were. All this is not just because the individual really wants or enjoys such a condition, but his competitor is doing it, and he endeavors to increase his income to a point where he can show an equal amount of "class." Vanity it may be called, but it is vanity developed through competition, all of which brings us to a discussion of the matter of competition among talking machine salesmen.

There is the natural competition—the desire of every man to get all the business he can and a little more than the other fellow, but many concerns have found it desirable and profitable to stimulate this natural competition by special offers of awards and through contests. Only recently a Western house held a contest among its salesman with a trip to the piano trade conventions in New York as grand prize. Other houses stimulate the competition idea constantly by offering weekly, monthly, or quarterly prizes for the champion salesman. A New Jersey concern keeps the salesmen on edge by running a selling contest each month, the successful man being entitled to a salary increase throughout the month following, the increase continuing until some other salesman captures the monthly prize. With a prize in sight, no matter how inconsequential it may be, every salesman feels stimulated to do his best.

The plain matter of selling, and the steady earning of money are naturally the first inducements, but that soon becomes routine, and all too often the salesman reaches a gait that he maintains without any apparent effort to speed up. It is just such a spirit that affects the athlete, running by himself or with some friends without any real objective. He simply jogs along, covers a certain distance, maybe in good time, but without great enthusiasm. Put the same man in a race against the field, with a prize offered for the man who breaks the tape, and he puts real effort into his work.

So it is with salesmanship, which is well summed up by a manager who recently said: "Too many talking machine executives labor under the idea that a salesman will not do his best unless he is constantly hounded. In other words, the salesman cannot get through the day and work properly unless he goes out of the store in the morning with a scolding still ringing in his ears. Many managers scold even their best men on every occasion, feeling that if the men realize that the manager is dissatisfied with their efforts they will put forth further energy to suit him. The great trouble with this system is that the ordinary salesman becomes hardened to the continual complaining of the manager, lets the scolding go in one ear and out the other, and plods along in the usual way. On the other hand, the efficient salesman—the valuable man who is doing the best he knows how, producing results—is likely to be of a sensitive nature and allows the constant hounding to get on his nerves. The result is that he either becomes over-wrought and sacrifices much of his ability, or becomes disgusted and goes with a house that treats its men humanely.

"There is no question but that the competition idea is the real secret in inducing salesmen to toe the mark. The 'don't-care' type won't improve under any conditions, but the good man will put forth every effort in his power, not alone for the sake of securing the prize but through the pure love of competition, of doing something and doing it better than his fellows. I, personally, have a monthly contest and give the winning man a bonus of 1 per cent. additional on his actual cash showing, and ½ per cent. on his instalment accounts. It sometimes runs up into money, but the more I pay means the more money I have received. And there are the other dozen or so salesmen who have been bringing in increased business in their efforts to win the prize.

"Competition is the life of trade, and is, therefore, the life of salesmanship."

NEW SONORA SALES MANAGER

Frank J. Coupe, Prominent in the World of Publicity, Also to Assume Post of Advertising Manager—To Co-operate with Dealers

The Sonora Phonograph Corp., 57 Reade street, New York, has secured as its advertising and sales manager, Frank J. Coupe, of the Redfield Advertising Agency, this city. There are few men better known in advertising circles than Frank J. Coupe. For over seventeen years he has been connected with large corporations, developing sales, advertising, and promotion plans. He is familiar to newspaper and magazine advertising men throughout the country and his knowledge of effective advertising methods is such that aggressive new campaigns may be expected shortly from Sonora headquarters.

Some of the prominent concerns with the business building of which the new Sonora manager has been intimately identified are: Standard Mail Order Co., Kohinoor Pencils, Onoto Fountain Pen, American Lead Pencil Co., American Thermos Bottle Co. and many others.

The new connection is not the first association of Mr. Coupe with the Sonora Corp. He has guided its advertising from the days when it was a tiny infant in the phonograph world, until to-day it has grown into one of the big industrial plants of the country.

Because of his wide experience Mr. Coupe will be able to be of particular assistance to the dealers throughout the country in helping them with advertising, selling plans and methods, etc., and he will be in such close touch with them as to act for them as their New York representative. This, in times when the constant cry is, "Send us more machines," is no sinecure.

Though the major part of Mr. Coupe's time will be devoted to the Sonora Corp. he will retain his interest and office as vice-president in the Redfield Advertising Agency, which will continue to handle the Sonora advertising as heretofore.

In a series of letters and booklets which will soon be sent out, the new manager is expected to have something of more than ordinary interest to say to the trade, and as the Sonora way of doing business has always been marked by its independence, originality and sound business sense, the Sonora Corp. and its representatives will without doubt have extra good ammunition for the fall and winter drive this year.

THE TALKING MACHINE IN BERMUDA

Victrolas Form Important Part of Stock of E. S. Outerbridge's General Store There

The accompanying photograph shows the store of E. S. Outerbridge, Victor dealer, at

The Store of E. S. Outerbridge

St George, Bermuda, with Mr. Outerbridge and H. Royer Smith in the doorway. The photograph was taken during Mr. Smith's recent visit to the island. Mr. Smith is the Illinois wholesale traveler for Lyon & Healy, and he spent a very enjoyable vacation in Bermuda, returning a couple of weeks ago. The Outerbridge store is well known to tourists, as it contains a general assortment of merchandise running all the way from Victor Victrolas to anchors. Mr. Outerbridge reports a good trade in both machines and records, and says he could do even a larger business than he is doing if he could get a sufficient supply of Victor machines.

QUITE A SHORTAGE IN WINNIPEG

WINNIPEG, MAN., CAN., August 4.—Robert Shaw is still bemoaning a shortage of Columbia Grafonolas. Orders, he states, are piling up, although a plentiful supply of records is arriving in much better shape than formerly. This firm is anticipating good business from its foreign catalog which is being published.

Thos. Nash, manager of His Master's Voice Gramophone Co., Ltd., Toronto, was a recent visitor to the Western Gramophone Co., the Victor distributor for the West. Business is reported good by these firms, in spite of the shortage of Victrolas.

Mr. Fitch, manager of Babson, Bros., Edison phonograph dealers, is back from a six weeks' vacation. This firm has adopted daylight saving upon a majority vote of the employes.

DISTRIBUTORS FOR THE "VEECO"

The Pathephone Sales Co., 111 East Fourteenth street, New York, has been appointed distributor for the Veeco, the electric motor made by the Victor Electrical Equipment Co., 246 Boylston street, Boston, Mass.

HANDLE COMPLETE COLUMBIA LINE

WASHINGTON, D. C., August 5.—Lansburg & Bro., of this city, have closed arrangements to handle the complete line of products manufactured by the Columbia Graphophone Co., New York, and have placed a very large initial order with H. C. Grove, manager of the Columbia distributing division in this city.

Lansburg & Bro., who are one of the leading mercantile concerns in Washington, are just completing a seven-story addition to their already large store. With the completion of this addition, they are planning to open several new departments, including one devoted to the Columbia line.

A. MAGOUN THE NEW MANAGER

A. Magoun, a well-known talking machine man, has been appointed manager of the talking machine department of Otto Wissner, Inc., 53 East Thirty-fourth street, New York, which duties he undertook the first of the month. This house handles the Columbia, Sonora and Victor products. Possessed of a sparkling personality and being well-liked by his customers, Mr. Magoun bids fair to achieve considerable success in his new post of duty.

INFORMATION OF VALUE TO THE NEW MAN IN THE FIELD

Importance of Having More Than a Cursory Knowledge of the Various Types of Machines and Records—Correct Speed for Reproduction—Some Record Troubles—Some Suggestions

A man going into the talking machine business as a dealer must remember that in entering any new line of business success depends largely upon an understanding of that business. Talking machines do not sell themselves automatically, although the tremendous advertising campaigns carried on in the field almost accomplish that effect. The retailer must know not only how to tell the customer about his machines and records intelligently and authoritatively, but must know enough about the line he handles, or contemplates handling to select stock to the greatest advantage. A little study of the various types of machines and records and the gleaning of some knowledge about the records themselves, should serve to prevent him from investing more or less capital in a line of machines or records that are decidedly foreign to one another, so far as playing qualities are concerned.

With any make of talking machines and records there crop up certain problems that, while simple and readily solved by the man who has been in the trade for some time, cause some trouble to the newcomer. In this section of The World information will be given on such problems that do not of necessity concern the technical construction or mechanical features of the instruments which are so capably handled in the department of "Repairs" by A. H. Dodin.

The Importance of Correct Speed

In the sale of talking machines of any make, it is the demonstration that offers the final argument to the purchaser if the price is right. The machine is sold to reproduce music, and if the reproduction is imperfect and unsatisfactory, fine construction, cabinet attractiveness, strength of spring and all other mechanical details may be set forth for naught.

With the great majority of records a speed of seventy-eight revolutions a minute will be found to give the most satisfactory results. It may be well, if the reproducing speed is not given on the record, for the dealer to write to the manufacturer and learn the speed at which the recording is done, for the recording and reproducing speeds must be the same to give the proper effect and preserve the naturalness of tone. The better class of machines are provided with indicators to show how many revolutions the machine is running. Many machines, however, have simply the speed adjustment without the indicator.

The dealer may learn the proper speed by considerable experimenting, but this does little good to the record and does not impress the customer very favorably. A better way is when the machines are first received to fix each one at the proper speed so that they will be ready for demonstration at any time. Where there is no indicator, or where the indicator is not accurate, the number of revolutions of the turntable may be readily determined by inserting a strip of paper about one-half inch wide between the record and the turntable, and as the record is played, count the number of times the paper passes a given point within a minute. In making this test, the record should be played in the ordinary manner instead of running free, as it will be found that the weight of the sound box and the pressure of the needle will have some effect upon the speed.

Making Disc Records at Home

A correspondent has written to inquire if it is possible to make disc records at home. In reply we would say that to the best of our knowledge there is no practical system in vogue for the home recording of disc records. In the first place, the process is somewhat complicated and would require equipment, the cost of which would be prohibitive. In the first place, on the disc talking machines the grooves serve to carry the reproducing point across the record and to record on such a surface it is necessary to provide a mechanism that will carry the recording stylus along at an even speed while the record is being made. Moreover, the material used for most master disc records is so soft, that were it used for ordinary recording a very few reproductions would ruin it.

Our correspondent probably gets his idea from the old cyclinder machines, many of which were supplied with record attachments and special records for that purpose. The fact that cylinder machines were equipped with worm gears to carry the recorder along the record surface made this system possible, and are still to be found in connection with various types of dictating machines on the market at the present time.

Repetition of Certain Notes

A dealer writes to The World to inquire why it is that occasionally while playing records the reproduction will be all right through a section of the record and then suddenly one note, or series of notes, will be repeated several times before the reproduction is continued in the proper way. There are several causes for this, the most frequent being some dirt or other foreign substance being in the record groove, which tends to throw the needle back into the preceding groove. The remedy lies in carefully cleaning out the grooves with a soft brush. Sometimes the repetition is due to the marring of the record through a scratch or indentation by the needle. In such a case, there is no remedy. For ordinary use, constant repetition at that particular point may be avoided, says one who knows, by giving the machine a slight jar when the indentation is reached by the needle, which will cause the needle to jump the obstruction and continue in the groove.

The Two Types of Records

The frequent reference, in advertisements and elsewhere, to lateral cut and vertical cut or "hill and dale" records, has served to confuse more than one new entrant into the trade ranks and The World has, on a number of occasions, been called upon to explain the general difference between the two types of records.

For the benefit of those who are still puzzled, it may be explained that the difference between the lateral cut and the hill and dale records is to be summed up briefly as follows: In the lateral cut records the sound waves are recorded on the walls of the record grooves, the bottom of the groove being smooth. In the hill and dale records the sound waves are recorded at the bottom of the groove, the sides being smooth. In playing lateral cut records the sound box must be kept in a vertical position with the diaphragm parallel with the sound grooves so that the needle follows the sides of the record groove, and the vibrations will be communicated to the diaphragm direct. In playing hill and dale records the reproducer must be placed in position with the diaphragm parallel with the record surface, or upright with the diaphragm surface at right angles with the record grooves so that the vibrations may be carried directly from the sound reproducing surface at the bottom of the record to the diaphragm.

LEARNING TO BE A SOLDIER

William C. Griffith, with the Chicago Talking Machine Co., Chicago, Ill., has been at the Civilians' Training Camp at Plattsburg, N. Y., learning to be a real soldier. He writes that he has to get up at 5 o'clock on week days, while on Sunday morning he can sleep until 6 o'clock, the extra hour being quite enjoyable, as he puts it. Mr. Griffith is the brother of Tom Griffith, sales manager of the Udell Works, Indianapolis, Ind.

E. H. Gaines, of Gaffney, S. C., is opening a music store in the Wood Building on Frederick street, where he will feature the Edison Diamond Disc phonographs and records. The store will be in charge of Miss Alice Gaines.

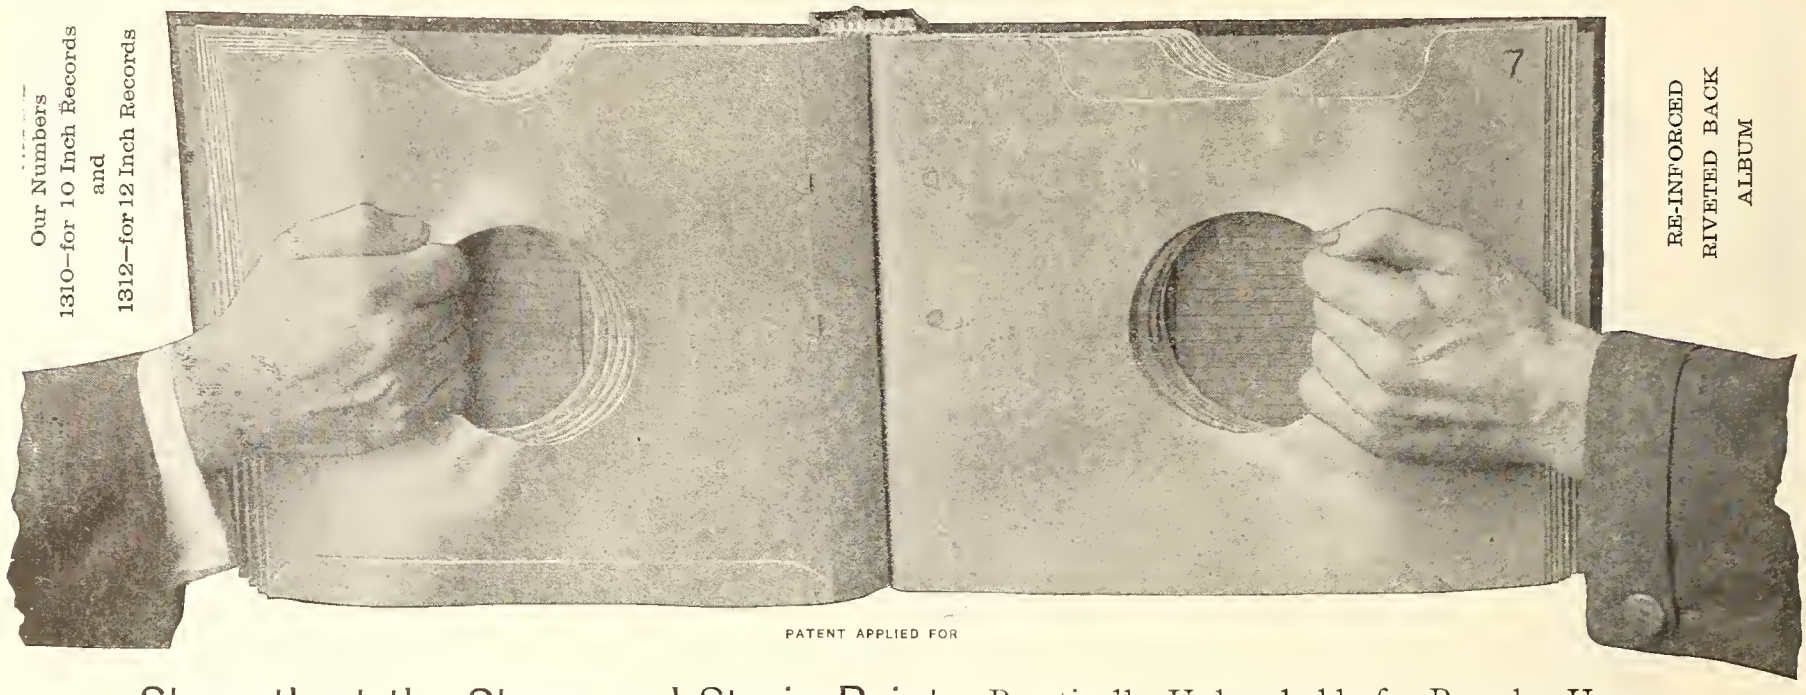
THE PULLING TEST—THE STRENGTH IS THERE

THE STRONGEST ALBUM MADE *AT ANYWHERE NEAR ITS LOW PRICE*



Strength at the Stress and Strain Point. Practically Unbreakable for Regular Usage.

THE WELL-KNOWN "NATIONAL" RECORD ALBUMS ARE ALWAYS THE LEADERS

THE ONLY CONVENIENT AND SAFE WAY TO PROTECT DISC RECORDS

These Albums will pay for themselves in a short time by preserving Records. When full the Albums are flat and even like books. They will fit in a library cabinet or book case, or they will lie flat on one another.

We manufacture disc Record Albums containing 12 pockets to fit the Victrola cabinets Nos. X and XI. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc Records.

For durability, finish and artistic design, our Albums have no equal. They are made in the most substantial manner by skilled workmen. We sell our superb Albums at big discounts to meet competition. Shall we quote prices?

THESE ALBUMS ARE THE BEST FOR VICTOR, COLUMBIA AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. AMERICAN ST., PHILADELPHIA, PA.

TALKERS FOR CANADIAN CAMPS

Heavy Demand for Machines from Vacationists —Higher-Priced Models Have the Call in Montreal—Wm. Lee, Ltd., Opens New Store —New Makes Offered Public—Other News

MONTREAL, CAN., August 4.—The ease with which talking machines may be transferred in automobiles and motor boats, and the pleasant effect of music on the water or in the woods, has made these instruments immensely popular in the summer camp at lake and mountain resorts. From boats out in the lake and from cottages along the shore the music of the best bands, orchestras and singers is being enjoyed by thousands of music lovers who take their machines with them on their trips to the country or to the beach. Dealers within easy automobile distance from resorts and lakes find it profitable to feature talking machines and records and many sales are made to tourists who have high priced instruments at home, but who want smaller and less expensive instruments for their camp or summer home. Such wonderful strides have been made in perfecting low-priced talking machines, it is rare to find a camp of music lovers that does not have one or more of these instruments. They are coming more and more in vogue along the lake shore for furnishing music to dance with, the marvelous, accurate and clear tone being admired by all.

The Mills Phonograph Co. has removed to 701 St. Lawrence boulevard.

G. M. Reece and Victor Michallis, of the Berliner Gramophone Co., Ltd., were recent visitors to Boston and whilst there called on the Eastern Talking Machine Co., Victor distributors in that city.

The higher priced models of Sonora and Columbia machines are meeting with favor, said Charles Culross, who handles these makes to good advantage. The Sonora Jewel needle is proving exceptionally popular and where one is sold it always means one more to another buyer.

Wm. Lee, Ltd., has opened up at 618-622 St. Catherine street West, and will feature the Edison Amberola, Columbia Grafonola and Stewart machines, besides giving special attention to the repairing of talking machines.

The Rossignol Talking Machine Co., 51 St. Paul street West, has placed on the market a machine wholesaling at $7.50 upwards.

The remarkable growth of the talking machine department of Layton Bros., Edison and Columbia dealers, has rendered it necessary to remove this department from the second floor to the ground floor. It will be greatly enlarged and modernized in keeping with the high-class lines handled by this house. Seven soundproof booths each eight by six with a special process of ventilization will be installed.

That the summer camp and summer home business is productive of good business is evidenced by the fact that the Berliner Gramophone Co., Ltd., business in this regard is growing larger every year in the demand for Victor talking machines and records.

JOINS BOARD OF DIRECTORS

John N. Beach, Prominent in Insurance and Business Circles, Elected Director of the Sonora Phonograph Corp.

At a recent meeting of the board of directors of the Sonora Phonograph Corp. a vacancy was filled by the unanimous election of John N. Beach.

Mr. Beach is very well known in commercial circles, having been actively engaged for many years. At present he is one of the directors of the Equitable Life Assurance Co., and also a director of the Atlantic Mutual Marine Insurance Co., and is president of the Lord's Court Building, 27 Williams street, and is affiliated with numerous other large enterprises. Mr. Beach will form a valuable acquisition to the present board of the Sonora.

HERRINGTON'S ATTRACTIVE STORE

Norman W. Herrington held a formal opening of his very attractive talking machine store at 1218 Kings Highway, Brooklyn, N. Y., on July 19. The store, which is newly built, is finished in mahogany and white with three sound proof rooms and a floor space 100 feet square, which is used for the display and sale of Sonora phonographs, Columbia Grafonolas and a complete line of records. Mr. Herrington is getting in touch through correspondence with the people of his locality, and so far is doing an excellent business.

NEW YORK, AUGUST 15, 1916

WHILE it is customary at this season of the year for business men in all lines of trade to slow up in their plans of business promotion, it must be admitted that there has been little of this in evidence in the talking machine trade during the present summer months, for great activity is reported from almost every section of the country. The greater employment of labor and the more general diffusion of money among the people has been prolific of results to the talking machine men.

Relaxation from business pressure is a very necessary requirement during the heated months. It is good for the mind and the body, and every man should have a vacation, but to accomplish this it is not necessary for business houses to shut off steam or permit their business to lay idle.

The modern business organization should be so well arranged that, whether in the wholesale or retail lines, everything progresses during the summer season just as well as the winter season, and it is the man who wisely makes business plans for all seasons who usually wins out.

It will be noted that the business houses who have carried on very active campaigns during the summer months are now being rewarded by increased business. There can be no resting on laurels won in any season, but just the same the plan of operation should call for every member of the force getting an opportunity of resting up and receiving mental and physical rejuvenation so that the entire force is ready for the business activities of the fall season with renewed energy.

AS is universally recognized, the wonderful talking machine business of to-day has been built upon advertising—advertising that has been increased in extent constantly with the passing of years and which was actually increased when those engaged in other lines of business were close to panic and preached retrenchment. In the history of American business there are few, if any, more convincing examples of the power of publicity, carefully thought out and courageously carried out. As the demand for talking machines and records increased and swamped the facilities of the factories, despite frequent large additions to buildings and equipment, the question has frequently been asked "Why increase instead of decrease the advertising when the present demand can only be met in part?" The real explanation of this apparently paradoxical condition was offered by one of the officials of the Victor Co., in an address at the Atlantic City convention when he said: "We are increasing our advertising appropriation by several hundred thousand dollars this year, not for the present alone, but for the future. The present demand is far in excess of the supply and our advertising is designed to make that condition, so far as possible, a permanent one."

IT is a popular argument adduced by many publishers of books and magazines that the talking machine and automobile have been potent factors in destroying the reading habit among all classes of people. While a casual consideration of these forebodings, corroborated as they are by certain superficial symptoms of a changing public taste, suggests something of credibility in the theory upon which they are based, yet facts are necessarily more convincing than theory. For instance, one New York publishing house announced recently that its bindery has orders now for one million books beyond those it would normally manufacture in the coming three months.

The obvious and important deduction to be made from this convincing evidence of book publishing activity is the very simple one that the public demand for literature produced in comparatively permanent form is increasing rather than abating.

As a matter of fact, the popularity of the talking machine has been a great blessing. It has made a great many people more content with their homes and more inclined to enjoy a good book and at the same time enjoy good music. It has elevated the musical taste of the masses; it has created a desire for better music, and this has created a psychological condition that has also increased the desire for good reading.

This is something rather hard to explain, but the fact remains that anything which inclines to refinement in the home and produces a mental condition that creates a demand for better things, whether it be furnishings or music, also inclines to the demand for good books.

While the popularity of the automobile may be harmful to book publishers, because it takes people away from the home, the talking machine should not be included in this category.

The advertising end of the publishing business should exclude the talking machine when making the argument all too common just now, that there is a decline in the tendency to read good books.

During the last twelve months, evidence is abundant that there is a decided revival of interest in good books, and there is every indication that this interest will grow rather than diminish. It is significant that this increase has gone hand in hand with the increase in the output of talking machines.

THE promises and predictions made by those in charge of the arrangements for the recent annual convention of the National Association of Talking Machine Jobbers regarding the attendance at and profitable character of the sessions at Atlantic City were more than fulfilled at the convention itself. Never before have the jobbers had presented to them so much detailed information regarding the production and selling ends of their business, by those who through close association with the various departments in executive capacities were therefore best qualified to offer authentic information. The problems of manufacturing looked upon by too many of the jobbers as more or less incidental took on a new meaning when explained by those who face the problems constantly. Generous hints on how to advertise most profitably and effectively, how to develop business in the schools, and how to forward the cause of music generally were given to the jobbers in a form that made them usable and understandable. All this was topped off by a tour of inspection of the great Victor plant, and much of the work previously explained by department heads was actually witnessed.

Although the usual attractive entertainments at Atlantic City and Philadelphia were enjoyed to the utmost, the conventionists for the most part attended the meetings with deep appreciation of the importance attached thereto, and carried away with them a fund of new ideas that should manifest itself in a more than normal increase of business during the coming year.

The convention went far to prove that the talking machine industry is not built on the hit or miss plan. It has its manufacturing and sales problems and a future to be protected just as any other business and the wonderful success that has come to those who have stuck to the business during the past years has not been the result of sheer luck, but rather the result of intelligent and expensive exploitation work carried on by those ranking

as pioneers in the trade, and is indicative of a spirit of confidence in the future of the business that has seldom been seen.

Those who for any reason were unable to be present at the Atlantic City meetings will do well to re-read and study the complete reports of the sessions published in The World last month. Therein is to be found material that will prove highly valuable in developing business in the months to come.

A TALKING machine dealer, located in a Western city, who has won quite a reputation as a salesman as well as an executive, was a visitor to the sanctum of The World the other day, and when cross-examined as to what peculiar talents or gifts he possesses that enable him to score such a special success in his field, he stated that there was nothing remarkable about his accomplishments other than the fact that he had made it an object, whenever he had a holiday, of seeking trade information, of broadening his knowledge of men and things.

In quite a friendly way he would call upon local retailers, sometimes as a customer, sometimes as a visitor. He would note how he was received, how the salesman "talked up" the lines about which he inquired, and how his demands in general were met. He thus acquired much valuable information which he utilized when he got back to his own warerooms. His experiences were many and varied, and some of them induced him to modify his own methods very considerably; for he remarked that to stand in the warerooms of another man was like seeing himself as others saw him, and he never failed to profit by the lesson.

There is a moral here which is so transparent that there is hardly need for elucidation—it means that the merchant or salesman who desires to become an adept at his business must not be content with his own theory of doing things, but rather find out by practical example whether someone else is not doing things better.

No man has yet been able to know everything, and the egotistic salesman who thinks that his sales methods cannot be excelled is rather a dangerous personality in any business, for he never seeks to learn. What a contrast is to be found in the man who realizes that he knows his business pretty thoroughly, but who always seeks for suggestions and who never fails to adopt a better plan of doing things when he learns of them.

It is hardly necessary to say that the Western merchant above referred to has built up a very fine business, and, as might be expected, he is affiliated with lines of national reputation, the sales of which add to his standing in the community.

THIS is an age of ideas. Never before in the history of the world has there been such an urgent and increasing demand for bright thoughts of a commercial nature.

The competition which yearly draws the lines of trade tighter, and sifts men and affairs with a relentless force, turns the business mind upon some new object with which to strike out from the crowded highway into an unbeaten path toward success.

In every office, store and shop throughout the wide world there is somebody who is continually thinking and seeking for an idea which will help his affairs. The clergyman is thinking of an idea which will extend his influence. The physician, as he sits by the bedside, is seeking for some new idea which will aid nature. The banker is puzzling his brain for an idea which will master finance, and talking machine manufacturers, jobbers and dealers are on the still hunt for ideas to improve their business. It only requires a mere idea, if it is a perfect one, to prepare the foundation for a great success; but, like inventions, ideas which stand the test of practice are rare indeed.

Men who have that peculiar faculty which enables them to so apply old principles to new purposes as to produce a novel idea or method are the sort of inventors whom the world admires and rewards.

It is said that ninety out of every one hundred business men fail who continue in a given line for a term of years, and the majority of those who do succeed will tell you that a new idea which turned the current of their thoughts was the keystone of their prosperity.

IN no branch of the music trade industry is more attention being given to the value of window display than in the talking machine trade. As a matter of fact the window as a sales factor is a topic that is of continuous interest and one which is engaging the attention of the best minds in all lines of industry to-day. While it is only one of a number of factors that contribute to a store's success, yet it is a vital one, because the window is a continuous trade promoter day and night, and where the merchant gives it intelligent attention, it is bound to be a profit-maker. As someone said recently: Don't be afraid to be seen looking straight into your competitor's window and look deliberately, too, for you may there and then discover the real reason for his success, for in these days an attractively arranged window is almost too big an asset to set a limit upon.

When you see a whole front torn out of a comparatively new building, just to put in a new idea of a window, just make up your mind that that merchant is a smart one, and has discovered the value of a good looking window, and he doesn't care what he spends to build and dress it.

It will pay to make your windows look smart at any cost. Make people think they want what they never thought they wanted before, and they will want when they see attractive looking windows. Now, if you have well digested this fact, and put it into execution, you have conquered a big obstacle to success.

You should put your personality into your show windows, displays and your store, and make them represent you by having everything therein look neat, attractive and dignified.

DITSON
VICTOR SERVICE

For many years we have helped dealers to grow, not only dealers in Victor talking machines, records and supplies, but also dealers in Musical Merchandise and Sheet Music.

This experience is at your service and it is the kind that has been developed by actual service on the firing line.

So when you use Ditson Service, you secure the best. Let us talk over a "Fall Campaign" with you.

Columbia Records TRADE MARK Note the Notes

BIG PERCENTAGE OF INCREASE IN PACIFIC COAST TRADE

Excellent Reports Made for First Half of Current Year—Labor Troubles Tie Up Shipping—New Sonora "Supreme" Model Displayed—Talking Machine Men Now on Vacation Bent—Remodeling Recital Hall of Edison Shop—Changes Among Sales Staffs—Other News

San Francisco, Cal., August 1.—The first half year reports in the San Francisco talking machine business show a considerable increase over the same period a year ago. Some firms report business over the entire Coast territory to be as heavy for the first half of the year as for the entire year of 1915, but on the whole it is perhaps unsafe to claim there has been more than a 25 per cent. increase. The greatly increased demand for records has helped most to swell the volume, and, of course, the number of cheap new machines on the market is largely responsible for the unusually heavy record sales. The summer months are not much brisker than normal in most of the local talking machine departments, but spring business was very good. Labor trouble in the shipping trades has interfered with business a great deal since the first of June and the trouble is not over yet, though the situation has eased up a great deal in the past two weeks. There was some car shortage due to the tying up of water shipping, but the talking machine trade has not suffered unduly. Leading concerns are still hampered by their inability to get sufficient supplies from the factories. This is vacation season and many dealers are away to the mountains or other summer retreats. Talking machines seem to be more popular for dancing at the summer resorts this year than ever before.

Displaying the Sonora "Supreme"

The San Francisco branch of the Sonora Phonograph Corp. has now on display one of the magnificent thousand-dollar phonographs, the "Supreme," at its Geary street sales rooms and it is attracting a lot of attention. F. B. Travers, manager of the company, has been spending a very pleasant vacation in the High Sierras this month.

A. R. Pommer an Enthusiastic Golfer

A. R. Pommer, head of the Pacific Phonograph Co., attended the national golf tournament at Del Monte, Cal., this month. His enthusiasm for the ancient and royal game is just as keen as ever.

O. N. Kruschke, sales manager of the Pacific Phonograph Co., is at present calling on the trade up the Sacramento Valley.

The Pacific Phonograph Co. reports business up to July first to be greater than for the whole of last year, with the best half of the year yet to come. The record business has been exceptionally good, but the sale of machines outstripped all expectations. The average price of the machines sold came to over $125.

Mrs. Edwards Back to Edison Shop

Josephine Edwards, who has been with the Pacific Phonograph Co., is now back on the floor of the Edison Shop. "It seems like home to be back here," she remarked, "and it is most pleasing to know that the old customers have not forgotten me." Mrs. Edwards has had a wide experience with Edison phonographs, having been with the Edison Shop previously and on the traveling sales force of the Pacific Phonograph Co. Last year she was in charge of the Edison recital work at the Panama-Pacific Exposition, playing the Edison diamond disc with the Kimball pipe organ. Here she attained considerable distinction by the high order of the entertainment she provided and won recognition as one of the ablest women in the talking machine field of the Pacific Coast.

Mrs. Norris, who was very popular as a demonstrator of the Edison phonograph, is no longer in charge of the recitals at the Edison Shop. In fact, the voice and phonograph recitals have been discontinued for the summer, though the weekly Saturday record recital is still given. Mrs. Norris is at present at Fresno.

Remodeling Recital Hall

The recital hall on the mezzanine floor of the Edison Shop is undergoing a radical transformation. Though beautiful enough before, it would seem, Manager Davis was not satisfied, and he has spared no expense to make the room a model for phonograph recital demonstrations. The little stage is being removed as the elevation interfered with the acoustics somewhat. By the addition of beautiful draperies and playing from the floor level, a better result is obtainable. The hall is being redecorated in delicate tints and the floor will be laid with a carpet of sea-green and blue shades. New draperies and upholstered chairs will be added also. And not only is the recital hall being reconstructed, but also the private demonstrating rooms. Each room, instead of being bare of wall and coldly business-like, is to be refurnished to resemble a cozy sitting room in a private home. Pictures will grace the walls, rugs relieve the shining hardwood of the floors and draperies and upholstered furniture will further lend a home aspect. Commencing in August daily recitals will be given at the Edison Shop.

Roger Haydock, of the Edison Shop, who has been visiting the laboratories of the Edison Co., in New Jersey, has returned to San Francisco.

Mr. Storms, of the Pacific Phonograph Co., is covering his territory in the Watsonville district.

In Charge of Dictaphone Department

Paul F. West, who has been for some years the San Francisco manager of the Royal Typewriter Co., and who has won a splendid reputation as a sales campaigner, is now in charge of the Dictaphone department of the Columbia Graphophone Co., Pacific Coast headquarters in San Francisco. Mr. West brought with him from the Royal Typewriter office three of his ablest assistants who are now devoting their energies and enthusiasm to the welfare of the Dictaphone. These persons are: Miss McKim, who had charge of the employment department of the Royal office; Mr. Matthews and Mr. Coombs, both of the sales force.

Fred A. Denison in the Northwest

Fred A. Denison, manager of the Columbia Graphophone Co., on the Pacific Coast, is making a trip through the Northwest this month for the purpose of visiting the various branches of the company in Seattle, Portland and other cities.

The local branch of the Columbia Co. has been handicapped by the non-arrival of goods from the factory. They are oversold on some machines and records.

J. J. Black, manager of the talking machine department of the Wiley B. Allen Co., allowed himself a vacation this month and spent the time at the Yosemite Valley. He came back greatly refreshed in mind and body.

W. S. Gray with Domestic Corp.

Walter S. Gray, who is well known in San Francisco as the former manager of the Columbia Graphophone Co., and who has been absent from the city for several months, has now returned as the Pacific Coast manager of the Domestic Talking Machine Corp., a Philadelphia concern. Mr. Gray is an old hand at the talking machine game and he will lose no time in establishing his new line in the Coast territory. The headquarters will be in San Francisco, but no definite location has been decided upon as yet. Mr. Gray intends to inaugurate a lively campaign for trade.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., August 7.—It will come as welcome news to the talking machine trade at large that at last the dealers are waking up to the need of purchasing early their fall stock of goods. On several occasions this department has called attention to the dilatory attitude of dealers in this matter. Mention of it, it is true, was more or less inspired by some of the large distributors and jobbers who had tried, many times in vain, to impress upon the trade the necessity of placing their orders early. With this issue a new situation, and an altogether encouraging one, can be recorded. Already stacks of orders, as one large house expresses it, are on hand for delivery any time from now on into the fall. These find their way quickly to the factories and the rush of business reported from the home establishments is said to exceed for this time anything that the business has yet known. The indications, therefore, are for an enormous business this fall and winter and it will be sad sledding for those who have not got early on the band wagon.

Busy Times with Pardee-Ellenberger Co.

Manager Frederick H. Silliman, of the Pardee-Ellenberger Co., has not as yet found time to get away on a vacation, because, as he says, there is too much business, and it looks just now as though the house would be all sold out before fall. He adds that the firm is experiencing a regular Christmas rush and the indications are that with the present demand for goods keeping up there is to be a very large fall business. Mr. Silliman has one vacation consolation. He is enjoying week-end trips in his new automobile and this gives him a welcome respite from business. W. O. Pardee, head of the company, was over in town the other day and told your correspondent that he was planning to go to Chocura, N. H., about the 12th of the month.

Big Columbia Improvements Under Way

Improvements of a rather extensive character are again under way at the Columbia Graphophone Co.'s Tremont street quarters, and one wonders if there is ever to be an end to the changes. But they are demanded by the tremendous growth of the Columbia business, which is increasing surprisingly under the constant eye of Manager Arthur Erisman. At the rear of the ground floor there is a new record room being built which will ease the front of the store considerably as the records heretofore have been kept there. At the forward end of the floor new demonstration booths are being constructed and these are likely to be constantly occupied. With the three new ones there will be perhaps the largest number of booths of any talking machine quarters in the city. The foreign record department has about tripled in the past year, which is a good indication of the growth of business. Other alterations, too, are under way on an upper floor, which lately was leased to meet the growing demands of business. Manager Erisman, who has not taken a vacation for several years, left last night for Lake Sunapee, N. H., where he and his wife and child will remain for a few weeks.

Fred Erisman, brother of Manager Arthur Erisman, of the Columbia Co., is about finishing his two weeks' vacation. He has had as his guests at his new home in Winchester, his two brothers, Malcolm and Albert Erisman, both from Philadelphia, and they have been let in on the ground floor in seeing the wonders of Boston. A visitor at the Columbia quarters a week ago was W. C. Fuhri, the United States manager of the Columbia Co. Three new women have been added in the past week to the bookkeeping department of the company.

M. Steinert Co. Happenings

With a well-organized force, Manager Arthur Royer, of M. Steinert & Sons Co., is able to despatch business at a rapid rate these days. System is his watchword and it is seldom that the machinery of business needs oiling in his offices and warerooms. Manager Royer returned a few days ago from Connecticut, where he visited several cities on a business trip. He tells some great stories of the prosperity of the manufacturing centers of that State, where the manufacture of war munitions has been a tremendous stimulus to business activity. He remained home only a few days when he started off in his car for Canada, where he and his family have spent their vacation for several summers. Mr. Royer will go to Murray Bay and several of the places along the St. Lawrence river.

New Ditson Building Under Way

The old building on the site of which the Oliver Ditson Co. is about to put its new structure is finally razed and definite building operations will now be begun. Manager Henry H. Winkelman, of the Victor department, is eagerly looking forward to the time when he will be occupying his new quarters, which promise to be wonderfully well adapted to his growing Victor business. Mr. Winkelman is planning to go on his vacation the latter half of August and will take his family to Maine. Otto A. Piesendel, Mr. Winkelman's valued right-hand man, is already away at Long Beach, Gloucester, where his family preceded him.

Closed Excellent July Business

There was a very good July business in both Edison and Victor goods at the warerooms of George Lincoln Parker, besides many prospects ahead. Manager John Alsen thinks that the prospects are good for a large fall business. A scarcity in the receipt of machines is what constitutes the element of worry just now. Mr. Alsen left a couple of days ago for Southport, Me., where he is to be the guest of the Eastern Talking Machine boys at their cottage, "'Tis Ours," where they have enjoyed themselves for several seasons.

Activity with the Eastern Co.

Speaking of the Eastern Co.'s boys, the first contingent already has left for the Southport camp, these being Ed Welch and Jerry Spillane. As the warm weather is again upon us, they are going away in the nick of time. These boys will constitute a merry bunch.

Business at the Eastern Co.'s Tremont store is all that had been anticipated for July. Manager Elton Taft's son, Elton, Jr., who is a student, is in the store this summer getting some business experience. He will go back to school at the beginning of the fall season.

A Visitor from Montreal

Harry Brown, who is pleasantly remembered in Boston when he was with the Eastern Talking Machine Co., is expected in town about the 12th of the month. Mr. Brown has been located in Montreal for the past few years, where he has been able to build up a splendid business. George Reese, who is associated with friend Brown, was a caller on the Boston trade last week.

Alterations at the Osgood Co. Establishment

The Victor, Edison and Columbia departments at the furniture store of the C. E. Osgood Co. are being extensively remodeled and redecorated, and in a week or so it will be in handsome shape to welcome customers. Manager Chester J. Sylvester has watched carefully the details of remodelling and has decided on a

RE-CREATION—Edison's New Art, has secured for the New EDISON Diamond Disc Phonograph the stamp of unqualified approval from the cultured music lover who turns a deaf ear toward anything that smacks of mechanical reproduction—the critic who will have nothing short of the actual RE-CREATION of musical sound. Added to this is the fact that every Edison dealer has plenty of "elbow room."

(From a recent advertisement by Thomas A. Edison, Inc.)

We can add to, but not strengthen the truthfulness and accuracy of the foregoing. We can say, however, that two P-E Services are at your disposal—each a separate organization of post-graduate experience.

THE PARDEE-ELLENBERGER CO., INC.

Edison Jobbers for New England, with complete wholesale offices at

BOSTON and NEW HAVEN

scheme of white and old gold for the wall-finishing interior. There is a new Colonial entrance, which is flanked with white Corinthian columns, which give quite an imposing effect. Mr. Sylvester, who is spending the summer at Winthrop, will go on his vacation the latter part of August and will take with him his brother, Roy, who is with the Columbia Co. Louis Samuels, of Manager Sylvester's staff, is taking his vacation in Montreal. The summer business thus far in this department has been very satisfactory.

Expanding Its Department

The large furniture store of A. McArthur & Co. is largely increasing its Columbia and Victor departments and four soundproof rooms are being added to the equipment. The department is being removed to near the main entrance, so that no customers entering the store can escape coming into immediate contact with it.

Enjoying Increased Facilities

With increased facilities for handling business, the talking machine department of the Iver Johnson Sporting Goods Co., at 155 Washington street, is making marked progress. Manager Arthur W. Chamberlain is just now on his vacation at New Found Lake, N. H., where he has been for several seasons.

Nelson Furbush on Vacation

Nelson Furbush, of the Furbush-Davis Co., on Boylston street, is making an extended visit at his father's farm in Freedom, N. H. Mr. Furbush became ill while attending the New York convention and ptomaine poisoning developed which kept him confined to his home for several weeks. He will return to town the latter part of August.

Steinert's Camp Scene Window

A camp scene with all the accessories for a pleasant week-end rest is being shown in the Boylston street windows of the M. Steinert & Sons Co. There is the tent with a comfortable looking cot inside, fire and cooking utensils, canoe and gun. The expression of the man standing by the tent tells of pleasant memories and equally happy anticipations. Of course, a camp is not complete without a talking machine, so here is a Victor.

Larger Vocalion Quarters

Business at the Vocalion headquarters keeps right along despite summerish weather. Manager R. S. Hibshman is about to branch out in a larger degree and his company has leased the whole of the building it now occupies, and will carry the Weber pianos, in addition to the Vocalion phonogragh.

SELLING HIGH-PRICED GOODS PAYS

Letters from Two Competing Dealers in One City Offer Proof of Fact to A. C. Erisman—Imparts Some Excellent Sales Advice

BOSTON, MASS., August 7.—Two letters of more than passing interest from Columbia dealers in the same city were received recently at the office of Arthur C. Erisman, New England district manager for the Columbia Graphophone Co. One read: "Send us some more 200's, also some 225 E's. These higher priced machines are our very best sellers." The other read: "We have a $200 machine we want to exchange for four 50's—send us some small machines in exchange for the higher priced instrument, our trade won't purchase anything beyond $50 or $75 models.

Naturally dealer No. 1 was making the big profits in that particular city. Mr. Erisman, carefully weighing the letter from dealer No. 2, immediately wrote him a letter which brought the following reply the next day: "Your letter received—along the line of your suggestions we sold the 200 and took an order for another. We will make it a point to talk these high grade machines. It pays."

In view of the above it is interesting to read Mr. Erisman's letter, which was as follows: "Our Boston sales force are adepts at selling 'de luxe.' As salesmen, no doubt every one of you Columbia dealers is equally adept. All you need is a hint.

"We never ask a man what priced instrument he wants. We take him immediately to a specially displayed 350. Record A-1735 is kept on this machine for demonstration. We play it at once and no time is allowed the customer to talk price. The salesman shows the fascinations

Arthur C. Erisman

of this style instrument. He talks of the enormous tone chamber, artistic design, delights of such an instrument in the home and at this point (one always being in his pocket) produces an order book and pencil. The salesman who attacks the day's duties without an order book does not deserve the title. Produced at the right time in the right way it will win many a battle.

"At this point we mention the price—$350—and compare it with the $500 or $600 the man would pay for a piano, pointing out that the $350 purchases the very epitome of perfection in a Grafonola. Also it is pointed out the Grafonola brings 'all the music of all the world.' If a customer says here that $350 is more than he cares to pay at present we have a 200 or 225-E flanking the grand and offer these types with the privilege of exchange for a grand within ninety days—and nine times out of eleven we sell at the very least a 110 or 150 and very often the 200 instead of a 35 or 50."

Mr. Erisman's letter as quoted above is worthy of close attention in view of the fact that he has achieved unusual success with the higher priced machines. From his very first entrance into the talking machine business he realized that concentration on the sale of the better class of machines would pay handsome dividends all along the line.

As Mr. Erisman has often pointed out to his associates and the Columbia dealers in his territory, a $200 or $150 machine in the home will mean a better satisfied customer, will raise the standard of record sales, will prove a thousand fold better advertisement for the dealer's store, and a lot more money for the dealer.

FORREST GIVING VICTOR RECITALS

LAWRENCE, MASS., August 8.—J. J. Forrest, Victor dealer of this city, has been attracting considerable attention to his establishment by giving informal concerts, featuring selections by local artists, together with a carefully chosen program of Victor records. Mr. Forrest pays particular attention to the records which he uses at these concerts, in order that the audience may obtain some idea of the unlimited scope of the Victor repertoire. A recent program featured Victor records made by John McCormack, Sousa's Band, Caruso, Fritz Kreisler, the Victor Orchestra and the Peerless Quartet.

The Secretary of State at Wilmington, Del., granted a charter of incorporation last week to the Metronola Phonograph Co., which will make and sell talking machines.

Needle Questions

1. Who made the first needle?
2. Who makes the most needles?

LOWELL, MASS.

Columbia Record Prestige
Columbia Record Demand

Once in a while it is profitable to take a sort of inventory
the *reasons* that justify the prestige that everybody recognize

We have reason to be well satisfied that the one word *"tone*
explains it all—coupled with our very successful policy of issui
"All the hits while they *are* hits."

Take our dance records: *You* as a dealer know better than anyone else that in tone, as well as in time and rhythm, they are unsurpassed.

Take any one of our instrumental trios: What but pure, perfect *tone* made this instant and permanent success?

Take our unmatchable talking records: "Cohen at the Telephone," or any of the others. Had you any idea that ***talking*** records could take hold in such extraordinary fashion?

Take our recordings of the violin: Has the violin ever before been anything like so faithfully reflected?

And in musical novelties: What a hit was made by our Hawaiian music, and how the Marimba records sold and resold!

It's the *tone* of such records as these that has made the presti
—and prestige *is* demand.

And the demand for Columbia Grafonolas and Columbia Doubl
Disc Records has been increasing so rapidly that the bare figur
—80%, 100%, and now 200% increase over a corresponding peri
of the past year—are enough to convince any shrewd buyer a
seller of merchandise that the demand is healthy, natural and d
pendable and growing even stronger every week.

INDIANAPOLIS TRADE VERY ACTIVE

Hot Weather Does Not Affect Talking Machine Business in That City—Dealers Placing Big Orders for Fall—What the Various Concerns Have to Report Anent Conditions

INDIANAPOLIS, IND., August 3.—In spite of all the freakish turns the weather has taken, the local talking machine dealers are still coming along with reports of "better business than ever." And that is saying something, considering the fact that the past month of July was the second hottest month in the history of the weather bureau here.

There has, of course, not been a brisk demand for the higher priced machines, but the sales of the lower priced machines have kept up the total business.

The wholesalers all report that they are filling many summer orders from dealers who learned last year the folly of trying to get orders filled during the rush of the winter months. Walter E. Kipp, of the Kipp Phonograph Co., distributors of the Edison, says the last month showed a tremendous increase over July, 1915, and that the biggest worry continues to be the difficulty in getting shipments fast enough from the factory.

A. W. Roos, local manager for the Columbia Co., has rented the storeroom next to the Columbia store for the purpose of maintaining a larger stock to supply the dealers who do not buy direct from the factory. Mr. Roos has secured many summer orders from his larger dealers, among them being the D. Sommers Co., which has been pushing the Columbia machine strongly.

Mr. Roos has not fully recovered from an injury he received when he fell in the street and injured his leg several weeks ago. The accident occurred in front of a recruiting station, where Mr. Roos had lent a Columbia machine, and friends of Mr. Roos say that his attention was so fixed on the machine that he failed to see the curb. Mr. Roos reports the dictaphone business for the last month as establishing a new record for Indiana, with the talking machine business at least 125 per cent. more than July, 1915.

Frank Carlin, of the Carlin Music Co., in speaking of the talking machine business, said that he was surprised at the way the business keeps up through the hot weather.

Arnold E. Pfeiffer, manager of the Starr Piano Co., is featuring the Starr phonograph in window advertising and is getting results. At the Pearson Piano Co. it was reported that the talking machine department was keeping up its record. Victor machines and records swelled the sales record for July at the Fuller-Wagner Music Co.

E. L. Lennox & Co. reports the business in Victrolas and Edisons continues good. The Rex Talking Machine Co. is doing considerable advertising in the "movies" and with good results.

At the Aeolian Co., the Vocalion is coming right along and it is expected to be one of the leading sellers this fall.

M. P. Tobin, of the Pathé Phonograph Co., reports that his men continue to bring in contracts with live dealers all over the State. Among those signed recently are the W. A. McNaughton Co., of Muncie; Frank A. Brown, piano merchant at Logansport; The Osbon Dry Goods Co., of Noblesville, and the Iroquois Drug Co., of Marion, Ind.

The McNaughton Co., which runs one of the largest department stores in the State, will handle the Pathé exclusively and is devoting considerable space to the talking machine department, which is under the management of Prof. Harry Paris.

At the Stewart Talking Machine Co., jobbers of the Victor line, business continues good. Emerson Knight, advertising manager, and the sales force are passing some of their time these hot days joking with E. W. Fortiner, one of the Stewart salesman, who, they say, has developed the golf fever to such a degree that he is likely at any time to stop talking about Victrolas and begin telling of his latest exploits on the green. Fortiner, however, insists that the better the golf player you are, the better the salesman you are, and he is not letting jokes bother him in the least.

Quick Service for Victor Dealers

There's no lost motion in our organization—no red tape methods in our order department. Everybody here is ready and eager to help you to do business. When you want something in the Victor line right off, get in touch with us.

NEW FILING AND INDEXING SYSTEM

A new system of filing and indexing records has just been introduced by Henry Rosenberg, 14 Wooster street, New York. This system which is known as the "Indexo" phono record holders consists of a set of specially constructed holders which may be stood on edge in the racks or laid in piles on shelves of the cabinet. Each record is filed in a separate holder, and the names of the records may be written on the individual holders, making for maximum convenience in every way.

B & H FIBRE NEEDLES

Announcement

THE B & H Fibre Manufacturing Company, *Sole Owners, Patentees and Manufacturers* of the *Fibre Needle* are now in a position to supply their specialty to such of the trade as are not now ordering from the Victor Talking Machine Company or the Columbia Graphophone Company.

The *Fibre Needle* is today a part and parcel of the Talking Machine and Phonograph.

Its place among needles is unique, in that its specific performance is different and quite separate and apart from any other.

The *Fibre Needle* has no competition—it is in a class of its own.

It has been proven to be the only needle that does not injure the record—that eliminates "surface sound" and produces a "round tone."—*Three Facts to be Remembered!*

The *Fibre Needle* has never failed to repay the dealer, in terms of increased profits and prestige, for all efforts expended in familiarizing his customers with its many advantages.

ACTIVE CONDITIONS PREVAIL IN KANSAS CITY TRADE

Dealers Who Attended Jobbers' Convention Enthusiastic Over Good Results It Produced—Governmental Safety Exhibit Train Carries Grafonolas—May, Stern & Co. Department Remodeled—Blackman Heads Music Committee of Advertising Club—General News

KANSAS CITY, Mo., August 4.—A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., returned the morning of July 28 from the trip he made following the convention of talking machine jobbers. He was accompanied on this trip by E. C. Rauth, of St. Louis. They went up into Canada, where they had a pleasant visit with the Berliner Gramophone Co., at Montreal, and with other dealers and jobbers in talking machines. Coming back to Detroit, they took the boat trip thence to Chicago. Mr. Trostler is enthusiastic over the convention and the good it did. W. E. Lyman, his assistant, efficiently managed the department during Mr. Trostler's absence.

C. J. Schmelzer, president of the Schmelzer Arms Co., who attended the convention of talking machine jobbers, left Kansas City shortly after his return from the East for Colorado, where he will take a short vacation.

The nine cars in the safety exhibit of the United States Government were on side track at Kansas City, two days recently. Each car is equipped with a Columbia Grafonola, and the men made a bee line for the Columbia shop in Kansas City. Mr. Standke, manager of the retail store, had called at the train as soon as it stopped, and inquired as to their needs. They wanted records. And they stocked up with almost a complete new line. The machines have been a great treat for the men with the train, and are kept going most of the time. The music helps the men at the work of cleaning the cars; solaces the lonesomeness of trips, and assuages the boredom of long waits at small towns. The train is going westward again, and these hot days and nights the Grafonolas are expected to make life bearable.

E. E. McMurtry, manager of the Kansas City branch of the Columbia Co., went on his vacation August 1. It was to be a short one, less than a month. He expected to find some cool spots in Estes Park, Colo.

Grant Pauley, a partner in the Kroh Music Co, of Muskogee, Okla., visited the Columbia store in Kansas City on his return from a trip East that had included the Elks' convention. Mr. Pauley is the impressario of Muskogee, and has brought nearly all the great artists there. He arranged for some on this trip. The Kroh Co. handles Grafonolas in Muskogee, and the visits of the great artists are used, with the distribution of Grafonolas, to build up in this city a desire and appreciation of music that is really wonderful.

E. S. Hall, of the Hall Music Co., has found the summer dull only in spots, for the talking machine and record trade; his sales of Victrolas has exceeded expectations.

John F. Ditzell, manager of the talking machine department of the Geo. B. Peck Dry Goods Co., with Mrs. Ditzell, has returned from the jobbers' convention and several side trips. They visited New York, Syracuse, Washington, Philadelphia, Cleveland and Chicago, in each city inspecting the talking machine departments of the big stores.

The report was given recently of the sending of talking machines and records to the soldiers from Kansas City from the talking machine department of the Geo. B. Peck Dry Goods Co. The machines and records were gifts from Kansas City people to the soldiers, and were purchased at the Peck store—not given by the store.

Charles M. Robertson, in charge of the talking machine department of May, Stern & Co., is delighted with the new arrangement of the department. The present location is near the elevator, and two rooms have been provided besides equipment and decorations far ahead of those in the previous location in the store. The business has responded to the improved surroundings.

An addition to the Victrola department of the Jones Store Co. is Thomas W. Ivey, recently in the phonograph department of the North-Mehornay Furniture Co., and previously with the Southwestern Talking Machine Co., of Dallas, Tex.

Harry B. Bibb, manager of the Victrola department of the Jones Store Co., had to scramble this summer to provide vacations. Indeed, instead of reducing the number of employes, he had to find extra help for the record section. In the large business done the more expensive machines predominate.

The Wunderlich Piano Co. accepts the summer dullness philosophically, and while keeping up its usual pace of advertising and providing attractive windows, has not spread out. "People do not want to stay indoors and listen to new records," said one connected with the firm. "No use fooling ourselves."

Music was an important feature of the annual picnic of the Jones Store Co., at which this year more than 2,000 employes were present. The store closed for the afternoon. Harry B. Bibb, manager of the talking machine department, was a member of the dance and the music committees.

The talking machine department of the Geo. B. Peck Dry Goods Co. is planning an extensive campaign of advertising, which will probably exceed any of the previous ones. The company is also planning to extend its service in an educational way this fall and winter, when school is in session, and to give the pupils and teachers the fullest co-operation towards the knowledge of and appreciation of good music.

M. M. Blackman, manager of the Edison Shop, of Kansas City, has been appointed chairman of the music committee of the Kansas City Advertising Club.

E. E. Trower, of the E. E. Trower Music Co., distributor for the Kansas City territory of the Pathephone, has made fine progress in the organizing of the district. The company has its salesmen out, who are locating the Pathephone in many of the best cities. Mr. Trower reports conditions favorable and collections especially good.

William Volker, a large wholesaler of curtains, draperies, floor coverings, furniture and hardware, in Kansas City, is now handling the Knabe Crystola over all the territory that the firm covers with its salesmen.

W. E. Rupe, manager of the Starr Piano Co.'s Kansas City branch, with Mrs. Rupe, has gone on a vacation to Grand Rapids. They will return by way of Richmond. The trade at the Kansas City branch has been excellent in phonographs and records this summer.

Miss Minna C. Lee, who has been with the Kansas City branch of the Starr Piano Co. almost since its establishment, was married July 8 to Mr. C. R. Olson.

J. D. McKenzie, representing the Playerphone, was in Kansas City recently, visiting the agents in this territory, the Architects' and Engineers' Supply Co.

COLUMBIA RECORDS BY DE PACHMANN

The Columbia Graphophone Co. is announcing in its September supplement the first records by Vladimir De Pachmann, the world-famous pianist, who has achieved international renown as an interpreter of Chopin's music. The selections played by De Pachmann for the Columbia library include Liszt's famous "Polonaise-Cadenza" and Chopin's Etude, Op. 25, No. 3, No. 3 in F Major and Prelude Op. 28, No. 16 in B Flat Minor. The splendid piano tone of these records has won considerable praise from pianists who have visited the Columbia laboratory and heard them.

Columbia Records TRADE MARK Note the Notes

TALKER TRADE IN CANADA SHOWS STEADY PROGRESS

Columbia Sales Constantly on the Increase, Declares Ralph Cabanas—Pathé Frères Pathephone Co., of Canada, Ltd., Organized to Distribute Pathé Goods—General Expansion in the Trade Through the Entrance of Many New Wholesale and Retail Dealers

TORONTO, ONT., August 5.—Among the few representatives from Canada who visited New York recently was Ralph Cabanas, manager of the Canadian division of the Columbia Graphophone Co., with headquarters in this city. Mr. Cabanas had only returned from his Western trip a few days when business required his presence in New York, where his family had gone while he was absent in the West. Activity in the talking machine trade in the United States he thought to be just as pronounced as in Canada, with the various manufacturers making abnormal efforts to take care of the dealer's demands. Mr. Cabanas is quite elated with the continued increase in Columbia sales in Canada and the prospect of his firm catching up with sales at an early date.

R. P. Newbigging, head of the Newbigging Cabinet Co., Ltd., of Hamilton, who visited New York recently, speaking of the talking machine trade, said: "Everything points to a very busy fall trade in the United States and that will likely mean a shortage for Canada.

A new firm was organized and incorporated with an Ontario charter to distribute and eventually manufacture Pathé lines in Canada, under the name and style of the Pathé Frères Pathephone Co., of Canada, Ltd. The headquarters of the company are at 215 to 219 Victoria street, Toronto, a five-story brick block owned by W. J. Craig, who is managing director of the new corporation. Associated with Mr. Craig on the executive staff are James Malcolm and N. G. Valiquette, of Montreal. The latter has one of the largest and most successful retail furniture and furnishing houses in Canada. Mr. Malcolm has old established and progressive furniture manufactories at Listowell and Kincardine. The firm, of which he is the head, was established many years ago by his father, the late Andrew Malcolm, of Kincardine, and a former member of the Ontario Legislature. This firm is rated among the most advanced furniture manufacturing establishments in the country, and has a wide reputation for up-to-dateness. Mr. Craig, who will be the active head of the new concern, has had a long career in the furniture industries in Canada, in which he is well known and has made an unqualified success. For many years he has handled the products of the best Canadian factories in addition to imported lines. He maintains permanent show rooms in his building on Victoria street, Toronto, where the headquarters of the Pathé Frères Pathephone Co., of Canada, Ltd., are located. The management of the Pathephone and record business is vested with Henry Pratt, formerly on the selling staff of the R. S. Williams & Sons Co., Ltd., and latterly in charge of the retail phonograph department of Frank Stanley. While it is the purpose to manufacture in Canada, Pathephones and records are in the meantime being imported from the factories of the New York concern, with which the new firm is linked up with as well as the parent firm in France. Referring to the prospects for doing business Mr. Pratt stated to your correspondent that so numerous have been the inquiries for agencies even before they were ready to make any definite announcement that they have been unable to take care of them all.

To be prepared for the fall rush and in line with their policy of service, the Music Supply Co., of Toronto, has leased additional wareroom space in order to handle a larger stock of Columbia Grafonolas than they have ever carried. Having in mind the shortage that has existed and the increased demands that it is confidently expected will be made on the talking machine trade this fall they have placed unusually heavy orders in the hope of being able to accumulate stock in advance to take care of early fall deliveries. The Columbia factories are gradually catching up with orders and hope to be in a position by the end of the summer to fill all orders immediately.

Otis C. Dorian, assistant manager of the Columbia Graphophone Co., Toronto, is among the members of the music trade spending a vacation in the "Highlands of Ontario."

I. Montagnes, of I. Montagnes & Co., Toronto, the Canadian distributors of Sonora phonographs, has returned from a visit to the Sonora factories at New York. Mr. Montagnes was well pleased with the goods he was able to secure for immediate delivery which, he states, will take care of orders.

C. R. Coleman, late manager of the R. S. Williams & Sons Co., Ltd., branch, at Montreal, has returned to his home city of Toronto, where he is now manager of Thos. Claxton, Ltd. The latter firm is retailer and wholesaler of musical merchandise and has an extensive trade, featuring Edison and Columbia lines.

The home of J. D. Ford, the energetic and popular manager of the R. S. Williams & Sons Co., Ltd., retail phonograph department, in this city, was favored by a recent visit from the stork, who left a miniature edition of the head of the house.

The demand for the first recordings of Florence Macbeth has been exceptionally good.

The A. A. Langford Co., London, Ont., has taken on the representation of the Sonora.

JOINS COLUMBIA AD STAFF

Charles Wm. Wolfe, for five years a member of the advertising division of the Corn Products Co., has recently joined the advertising staff of the Columbia Graphophone Co., New York.

Acme Die Castings

for all-around satisfaction in Talking Machine parts. There can be no finer product. Acme Die Castings are made by an organization of practical men who have had years of experience in Phonograph work, and who have developed special machinery and compounded special metals for obtaining *unusual results* in die casting.

Tone Arms and Sound Boxes cast the Acme way will give you what you must have—light weight on the record, due to thin but strong and uniform walls.

We can meet exceptional requirements and save you a large percentage of the cost of parts which have to be cast and machined or made from tubing. Acme Die Castings are ready to plate or assemble when you receive them—and you get them when you want them, and in the desired quantities.

Consult Our Engineers

They are ready to help you realize the utmost benefit from the Die Casting Process.

MIDSUMMER RECITALS SUCCESSFUL

Emergency Ventilating System in Edison Shop in Kansas City Makes Recital Hall a Haven of Rest in the Hot Days—A Piece of Enterprise That Should Appeal to Other Dealers

KANSAS CITY, MO., August 7.—Here's one instance of the methods which have held up the sales of the Edison Shop at Kansas City during the summer months. It is one of the reasons that July looked like a winter month, from the standpoint of the visitors and buyers in the Edison Shop. The concert room was hardly without an audience any part of the day, and on some of the hottest days there were comfortable crowds.

The reason: The room was comfortably cool. And Mr. Blackman advertised the fact that it was cool. He had had the men build chutes for air passages from the concert room to the rear of the store, chutes made out of cases in which machines had been shipped. Similar air tunnels were led to the various demonstration rooms and to the reception room. In the rear window a great exhaust fan was erected, similar to those used by restaurants for their kitchens. This fan drew the cool air from the clean basement through the various rooms, and indeed from the entire store, out into the alley and away. Below the stage in the concert room was the ventilator through which the cool air reached the room, and it had to pass over the auditorium to reach the exit shaft, into which it was pulled by the exhaust fan. The room was delightful—and Mr. Blackman advertised the pleasing fact to the limit.

In the front window was a display of machines and records, and apparently casually a few ribbons were attached to them. The exhaust fan caused a current of air that kept these ribbons constantly agitated, and the fact of a breeze was apparent. A large card in the window bore this inscription:

"A cool breeze blows through delightful Diamond Disc Hall. Step in, rest a bit and hear 'My Laddie,' Anna Case."

The name of the record was on a separate card, and changed frequently.

This usually caused the passerby to hesitate a moment by the door of the store. And on this door was another sign:

"You are welcome in this store. Rest in Diamond Disc Hall. Real music; fresh, pure air; continuous program."

If the visitor opened the door he felt a current of cool air pulling him in—a breeze in fact—and it was certainly enticing in the hot, dry days of July. For July broke all records in Kansas City for heat and dryness.

That was a bit of local advertising, pulling the customers into the store.

Are You Making The Most of Your Opportunities?

¶ Victor dealers who have been and are successful realize that there is going to be an unusual opportunity this fall to achieve even better results and more profits than they have in the past.

¶ This can only be accomplished, however, if your stock and service are complete and thoroughly up-to-the-minute.

¶ If there is any phase of your business which needs a little more attention than usual routine supervision, this organization is prepared to assist you along practical, helpful lines.

¶ May we not serve you?

G. T. WILLIAMS CO., 217 Duffield St., Brooklyn, N. Y.

TALKING MACHINE FOR FUNERALS

Instrument a Gift to Calvary Cemetery for the Benefit of the Poor

An experiment was made with talking machine music at two funerals recently held in the chapel in Calvary Cemetery, at which Father Lonergan, chaplain of the cemetery, officiated.

Thousands of burials are made yearly in Calvary Cemetery, and in many instances the families are too poor to pay for music. It was this that recently led two women to present to Father Lonergan one of the latest styles of talking machines, with appropriate records, in memory of their dead sister.

Father Lonergan declined to disclose the names of the donors, but said they were interested in having suitable music rendered at the funerals of the poor. The machine was set up in the chapel in Calvary Cemetery, which is a reproduction of a famous chapel in Rome.

NEW COLUMBIA STORE IN NEWARK

Donald Co. to Handle the Columbia Line—Recent Publicity—Vacations Still Under Way

The Columbia Graphophone Co.'s local wholesale division, 83 Chambers street, New York, closed arrangements last week with the Donald Co., Newark, N. J., whereby this concern will install a Columbia department and handle the complete line of Columbia products. The Columbia line has been increasing steadily in popularity in Newark and the surrounding territory, and the Donald Co. expects to feature the line extensively.

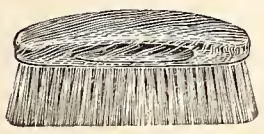
NEW EDISON BOOKLET

"A Scot and a Belgian" is the peculiarly opportune title of a leaflet just issued by Thomas A. Edison, Inc., of Orange, N. J. The title of the leaflet is derived from the fact that Christine Miller and Alice Verlet were recently featured in the Edison national advertising. Christine Miller is of Scottish descent and, as everybody knows, a noted contralto. Alice Verlet is a Belgian and besides being an ardent devotee of the land of her birth, she is one of the leading coloratura sopranos.

INCORPORATED

The Paddock Diaphragm Co., of Brooklyn, N. Y., was incorporated recently for the purpose of making diaphragms for talking machines and dictaphones. The capitalization is $10,000, the incorporators being H. D. Watson and L. M. and S. D. Paddock.

The Paramount Record Brush



For cleaning the grooves of Phonograph and Talking Machine Records. Removes grit, takes off finger marks, improves the tone. Made of soft black hair, set in solid rosewood backs, highly polished.

Will not injure the Records. Retails for 25c-35c and 50c. Sold by distributors and jobbers of Phonographs and Talking Machines.

DEMAND FOR GOOD SALESMEN IN CINCINNATI TRADE

Business for July Reported Satisfaetory—New Corporation to Promote Crystola Talking Maehine Being Formed—Leading Jobbers in All Lines Make Cheery Reports on Trade Outlook—Dealers Stoeking Up in Anticipation of an Unusually Lively Fall Trade

CINCINNATI, O., August 5.—While no official information is available it is understood that steps have been taken towards the formation of a new corporation which will take over all the rights connected with the Knabe Crystola talking machine, introduced less than a year ago.

Officials of the company decline to discuss the present stage of the negotiations. It is intimated that a corporation, having a capitalization of $750,000, has practically been formed for the purpose of manufacturing the Crystola. The talking machine is to be separated from the Knabe Bros. Co., although officers of the latter concern, it is intimated, will continue to have a financial and probably an executive interest in the production of the Knabe Crystola. Much Cincinnati capital is to be invested in the corporation, it is said.

One of the great drawbacks of the retail houses about Cincinnati is the inability of the dealers to secure the proper kind of salesmen. Several of the owners admit that their poor showing of the past thirty days was principally due to the lack of efficient help and their inability to secure men who are willing to take up the selling of talking machines as a life vocation.

In a general way the business of July was satisfactory. Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., covers the Cincinnati situation as follows:

"The past month was extremely hot and the business suffered accordingly, in a retail way. When the instinct of self-preservation makes everyone seek protection from the terrific heat it is practically impossible to push the sale of Victrolas or to expect much attention on the part of prospective buyers. However, even with the big handicap of extremely hot weather, the business was up to its normal, and the demand for records was about the average for this time of the year.

"In a wholesale way, however, business was extremely good. There is never an idle moment either in our machine warehouse or the wholesale record department, and orders are piling in in such quantities that it is evident that most of the dealers are determined not to go into the busy season unprepared, and the numerous record orders also indicate that the record end of the talking machine business is just coming into its own and receiving the attention that it merits.

"It is evident that the volume of business will be determined not by the demand, but by the supply, and as dealers are purchasing all the machines that they can lay their hands on, the shortage apparently will continue just as acute as it has been during the last six months, and in fact, grow worse every day among those dealers who have not taken time by the forelock and prepared in advance for the fall and winter business by purchasing liberally in machines and records."

Nothing will be done towards the establishment of a phonograph department in connection with the Middle West branches of Steinway & Sons until the return of Divisional Manager R. E. Wells from his vacation. Mr. Wells is rusticating somewhere in the neighborhood of French Lick Springs.

Manager R. J. Whelan, of the Cincinnati branch of the Columbia Graphophone Co., remarked that the same terrific demand exists for all types of Grafonolas, and there is still a great shortage of machines for which he is holding bona-fide orders. He has been assured that the factory will bring them through shortly, taking care of the great demand which will surely follow after the present hot spell has passed. He said further:

"While the business in Cincinnati proper has been a little slow, as far as the machine industry goes, the record trade has been splendid, and there seems to be a demand for all the records we get out, both popular and classic." The major portion of the Cincinnati store have had their vacations, and are all back in harness again, awaiting the rush which is sure to come in the very near future.

Mr. Byars, manager of the Vocalion department at the Aeolian Co. here, reports a nice increase in July business over last year. The hot wave at the close of the month unquestionably cut down on the floor sales, but not sufficiently to overcome the big lead of the first two weeks. Record business has been remarkably good and indications point to an exceptionally big record business in spite of the summer heat. The great difficulty in the phonograph business, according to Mr. Byars, is the development of good salesmen. The energetic, enthusiastie and intelligent chap, whieh is the only raw material you can accept for training, is a mighty scarce article. The market is flooded with the cultured, refined little fellow, who would love the work provided he can have two hours leisure in the morning and three in the afternoon. The fellows who really want to work are certainly as scarce as hen's teeth.

The Otto Grau Piano Co. is now stocking up for a busy fall season. The Cable Piano Co. is doing likewise. The Phonograph Co. is commencing to receive select records which have been in demand for months, but could not be filled on account of the recent fire at the factory.

The Phonograph Finance Co., Cleveland, with a capitalization of $5,000, has been chartered by John H. Price, Phelps Crum, E. E. Maynard, V. L. Polear and C. D. Sutton.

A new Edison phonograph store has been opened at Edgerton, Ind., by Ray Hosack, son of W. L. Hosack, who handles the Edison line in Angola, Ind.

More than 200 selections now ready

35c at Retail

PLAY longer than the average 10-inch records and retail at less than one-half the price.

No wonder the talking machine owner demands them!

A veritable whirlwind of popularity is stirred up wherever they are demonstrated.

You should sell them—not only because there's profit in them—but because they build business by making friends!

TALKING MACHINE MEN'S OUTING

Organization to Hold Annual Affair on September Sixth—Elaborate Program

Secretary Sol. Lazarus, of The Talking Machine Men, Inc., has sent out a circular announcing that the annual outing of the association will take place September 6, at Rye Beach. The entertainment committee is working hard to assure the success of the affair, and an elaborate program of games has been arranged. Baseball games between the nines of the New York Talking Machine Co. vs. the G. T. Williams Co., and between the Blackman Talking Machine Co. vs. the American Talking Machine Co., are expected to be among the features.

Tickets are $3 a person, including an automobile ride from Twenty-third street. New York City, to Rye Beach, an excellent shore dinner and a return ride. Those who desire to attend the outing are requested to communicate at once with Secretary Lazarus, at 216 East Fifty-ninth street, stating the number of tickets they will require.

COLUMBIA MACHINES FOR EXPORT

Illustrated and Described in New Catalog Just Issued by Columbia Graphophone Co.

The Columbia Graphophone Co.'s export department has just issued a very attractive catalog listing the various machines in the Columbia line designed for export trade. Quite a number of these machines are intended exclusively for export use, embodying distinctive features appealing to this class of trade.

This catalog is very artistically arranged, particular care having been taken to make the translation of the descriptions accurate in every detail. The cuts used are clear and distinct, the cabinets being colored to resemble mahogany.

Among the machines listed in this catalog are the following, the names given being the terms used in export trade: "Armonia," "Bijou," "Meteor," "Lyric," "Melodia," "Eclipse," "Campeon," "Joya," "Favorita," "Esterlino," "Jefe," "Mignonette," "Nonpariel," "DeLuxe" and "Grand."

A POST CONVENTION PICTORIAL

How Some of the Delegates Looked After Motoring to Camden from Atlantic City

The accompanying photograph, which shows a set of two perfectly good tires, was snapped in front of the office building of the Victor

Some Conventioners Snapped

Talking Machine Co., Camden, N. J., during the last convention. Reading from left to right are Thomas Towell, of Cleveland, O.; J. C. Roush, Standard Talking Machine Co., Pittsburgh, Pa.; Miss E. Trostler, Glad Henderson, of The Talking Machine World; Charles Bruno, of C. Bruno & Sons, Inc., New York; Miss M. Lightner, of Pittsburgh, Pa., and three auto horns. The photograph was snapped by E. G. Evans, the party just arriving from Atlantic City to visit the plant of the Victor Co.

B. L. Malone & Co., Grady, Texas, are among the recent additions to the Edison phonograph dealers in that territory.

Mrs. Flora W. Axelby, of Newark, N. J., is collecting talking machines and records to be sent to the regiments on the Mexican border.

DEALER MUST GO AFTER TRADE

Widespread and Good Advertising Alone Will Not Produce all the Results, Declares M. M. Blackman, of Kansas City

KANSAS CITY, Mo., August 4.—M. M. Blackman, manager of the Edison Shop at Kansas City, the local retail store for the distribution of Diamond Disc machines, was known to have been doing rather extensive local advertising, and he was called upon for comment on the effect of advertising at a meeting of the Kansas City Advertising Club.

"Local advertising has certainly pulled the business into our store," he said. "There isn't any doubt that the dealer has to go after his trade for himself. He can't expect any amount of national advertising to build up his personal trade. On the other hand, a comparatively small amount of national advertising, shrewdly taken advantage of by a dealer, and supported by careful local advertising, will yield big returns. But the local advertising undoubtedly is necessary."

The Edison Shop, of Kansas City, has had rather a remarkable record the past few months —which can be credited largely to the local advertising.

SUFFER FROM GREAT EXPLOSION

Quite a number of the local talking machine stores suffered from the effects of the munitions explosions in New York harbor on Sunday, July 30, and in the different parts of the city show windows were completely destroyed by the explosion. Among the downtown stores whose windows were shattered were the Columbia Graphophone wholesale division, at 83 Chambers street, and the Blackman Talking Machine Co., 97 Chambers street. The most annoying part of the loss of these windows is the fact that they cannot be replaced for several weeks, owing to the shortage of glass at the present time.

SEMBACH WITH COLUMBIA

Noted Wagnerian Tenor Has First Records in September Supplement

The Columbia Graphophone Co., New York, has announced the addition to its list of famous artists of Johannes Sembach, Wagnerian tenor of the Metropolitan Opera Co., New York. His first records are in the September supplement and include a number of the selections which

Johannes Sembach

have made him internationally prominent in operatic circles.

Johannes Sembach, in addition to achieving world-wide fame as an interpreter of Wagnerian opera, is one of the few operatic tenors who sing equally well in three languages—French, Italian and German. He has also made a country-wide reputation during the last few seasons as an out-door singer, having sung at the Yale Bowl presentation of "Die Walkure," in the title role of "Siegfried," in Pittsburgh, and in a number of other performances under the open sky.

A NOVEL VICTROLA SAVINGS PLAN

The A. B. Clinton Co., of New Haven and Hartford, Conn., which has been very successful with the Victor line, has made a specialty of introducing original advertising matter at opportune times. This literature has produced excellent results, primarily because it was "off the beaten track" and contained a personal, human interest message.

A recent piece of advertising distributed by the company consisted of a savings bank envelope, bearing this copy: "Just see how easy it is to slip a few nickels, dimes and quarters, now and then, into this Victrola dime saver. When it contains $5 bring it to us and select your Victrola. We will send it to your home at once and furnish you with another Victrola bank, and in this way you will have a fine Victrola and not miss the money."

THORPE ELECTRIC MOTORS
FOR TALKING MACHINES (Operates on all currents)
WALTER THORPE, Manufacturer, 29 West 34th Street, NEW YORK CITY

ENTERS THE CABINET FIELD

John J. Cavanaugh, 452 Fulton street, Brooklyn, N. Y., has placed on the market a complete line of cabinets, known as the "Cavanaugh" cabinets, which are designed to match Victor table machines, and in the comparatively short while they have been before the trade, have been the subjects of considerable praise from the dealers.

Mr. Cavanaugh has been associated with the talking machine industry for many years, and in designing his cabinets, he utilized the experience which he had garnered during that time. He aimed particularly to have the Cavanaugh cabinets match perfectly the instruments which they were intended to accommodate, and to this end, embodied a number of distinctive features which have contributed materially to the success of his products.

ANNOUNCE NEW RECORD LABELS

Operaphone Records to Have Paper Labels in Black and Gold—Factory Output Trebles

In connection with the steady improvement of its product, the Operaphone Manufacturing Corp., New York, has made arrangements to supply all its records in future with attractive paper labels in black with bright gold letters. The new label not only adds to the appearance of the record, but makes it easier to see at a glance the name of the selection. Since the first of the year the demand for the Operaphone records has increased at a rapid rate, with the result that the output of the company's plant in Long Island City has been trebled in that time. With branches in Chicago and other cities, the problem of distribution is being handled very successfully, and the list of Operaphone dealers is growing steadily.

HOW TO "RAISE" RECORD BUYERS

Hints Regarding the Raising of 75-Cent Record Buyers into $3 Class

"How to raise a 75-cent record buyer to the $3 class" is the title of the following pertinent and informative article appearing in this month's "Columbia Record:"

"Class in selling psychology called to order! Here's Mr. B. of S. & G. somewhere north of Nyack, complaining that all his customers carry 75-cent pieces in their pockets and never unravel a whole dollar bill at any one time. What's the use of offering the 'Pique Dame Overture' (A-5763—$1) to a man who never asks for anything over the ¾ $ mark?

"Here's the answer. Because anyone appreciating the 75-cent line of Columbia records will appreciate the $1, $1.50 and $3 lines. They may not take your word for it; you may have to do the 'educational' work, but it will pay you well to do it.

"A good lot of selling psychology is necessary and some time is needed, but it will work.

"This is the way:

"Take a customer who is now buying the Taylor Trio and Stellar Quartet records at 75 cents. After one of the usual 'trio' purchases suggest offhandedly, 'I see you enjoy trio music, just listen a moment to one of our Trio de Lutece recordings. You know this trio is composed entirely of master musicians. They are really the epitome of trio perfection—and their records are only 75 cents too.' Then play A-1907. Follow this up by suddenly remembering 'one more really remarkable trio recording' and play A-5789—12-inch, $1.

"Hint at how much more music is given on the 12-inch record. You have made a start. Keep on playing Trio de Lutece records at every opportunity. They instill an appreciation of higher class music. A little later talk about the beauty of the 'cello in the Taylor records. Suggest hearing a real 'cello record, solo. Play Popper's Spanish Dance by Casals, A-5650—$1.50. This is brilliant and light music that will appeal to anyone. When your man comes to the point of enjoying Casals you have him where he will enjoy the whole catalog of fine instrumental music.

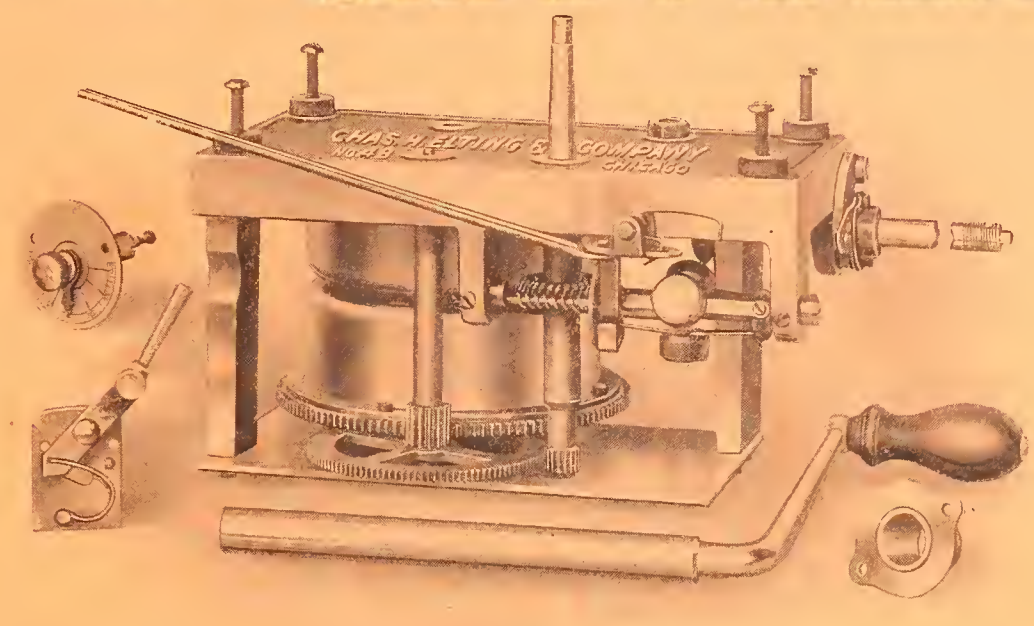
"Don't force a man from one extreme to another. Make your sales appeal along the lines of his natural likes. A love of music will grow by suggestion. And above all, don't force your sales idea until a man has bought what he wants first. One sale will then be assured and you can develop the next.

"Along the lines of vocal music the same ideas apply. After playing the latest Stellar Quartet selections suggest the customer hear some of the solos by the individual members of the quartet. There you have the entering wedge to oratorios, opera and chorus recordings. Reed Miller's oratorio selection and Harrison's oratorio and operatic selection will gradually impress themselves on anyone who already appreciates these voices in the Stellar Quartet. 'Oh, by the way, here is a record by the second tenor of the Stellar Quartet,' you can say as you put on 'Comfort Ye My People,' A-5506—$1.25, by Mr. Miller. Never give up. Always play at least one record in the price-class above."

McMENIMEN HOME FROM WEST

H. N. McMenimen, managing director of the Pathé Frères Phonograph Co., New York, returned Monday from a week's stay in Chicago. His reports of business conditions in the "Windy City" are most optimistic, for notwithstanding the terrific heat throughout the Middle West, there is a healthy tone to wholesale and retail business which augurs well for the future.

PROMPT DELIVERIES—PHONOGRAPH MOTORS



PLAYING 5-12 INCH RECORDS

MESSAGES FOR KAISER VIA U-BOAT

German Submarine "Deutschland" Carries Voices of 800 Interned German Sailors to Their Emperor on Talking Machine Records

When the German undersea liner "Deutschland" sailed for home last week there was included in the cargo a small package that was not listed in the manifest, but which was nevertheless of immense value to those interested in it, for the package is addressed to the Kaiser personally and carries to him the actual spoken messages of the 800 or more German sailors interned at Norfolk, Va.

The packet contains a dozen or more phonograph records and to the interned sailors in Norfolk it has a greater value than all the rest of the entire cargo of the "Deutschland." For months the German sailors wondered how they could get messages to the fatherland. The mail service was out of commission, thanks to the British censorship.

It seemed to them for a long time that no means would be found to communicate with their families. Hope came with the arrival of the submarine and her sturdy crew, and the interned sailors at once became active. Hundreds of letters were written, mail bags were filled with messages to dear ones at home. But something was lacking in them, the ability to transmit the human voice.

With characteristic ingenuity, the men decided to make a series of phonographic records, to sing into them the patriotic and folk songs of the fatherland. The blank records were quickly obtained, every one of the 800 men having a voice in the making of some records. Never was "Die Wacht am Rhein" sung with greater fervor, according to this information from Norfolk. It was followed by "Deutschland, Deutschland ueber Alles." So carried away with enthusiasm were the sailors to show love for the fatherland that they included the Kaiser's favoriate hymn, by Luther, "Eine fester Burg ist unser Gott."

"In der Heimat giebts ein Wiedersehn," "Ich bin ein Preusse," "Kennt Ihr meine Farben" and several other equally well known.

One officer recited into a record the loyalty of his men and their longing to get back to their people. When the records were finished they were securely wrapped in stout paper and addressed to the German Emperor. The parcel, which has a sentimental value to every one of the 800 men interned in Norfolk, was tenderly given to the care of Capt. Koenig, who promised to see to it that the records were placed in the hands of the Kaiser, if good fortune favored him and the "Deutschland" gets safely back to Bremen.

This is one reason why every German in Norfolk said a little prayer as she cleared the capes for deep water.

The Colonial Music Shop, recently opened in Freeport, Ill., by A. G. Crockett, handles a full line of Edison phonographs in addition to pianos.

SALISBURY CO. OPENS STORE

Salisbury, N. C., August 7.—The Salisbury Music & Supply Co. recently opened a new store at 102 Dock street for the purpose of featuring the Victor line of talking machines and records, over 350 different selections being carried in stock. Several soundproof booths, furnished in wicker, add to the attractiveness of the store. The owners of the store are W. C. Day, Jr., of Danville, Va., and G. P. Stanley, of Parkton, N. C., both of whom have had wide experience in the talking machine field.

A VERSATILE "TALKER" DEALER

Chas. L. Gordon, Jamaica, N. Y., a live Victor dealer of that city, not only finds time to operate a band and orchestra which is known as Gordon's Red Uniform Band, but he is a composer of no mean distinction. His latest success is "Peace and Liberty," a march that is being played by a number of bands in the eastern section of the country.

THE PHONOGRAPHIC TOP

The phonographic top is the latest novelty based on the principle of sound production found in all talking machines. The top is a metal disc with seven circles, of graduated size, fashioned of pin-point dots upon it, each circle representing the note in the scale of C natural. To play a tune on it, the top is spun so that the disc revolves rapidly, and the dots flash around so quickly that they have the appearance of a continuous line. With the point of a paper cone the different lines are touched, and the notes of popular airs can thus be picked out.

SOME PLACE TO VACATIONIZE

Joseph Honig, advertising manager of the Doehler Die Casting Corporation, Brooklyn, N. Y., is spending his vation at Lake Chargoggagoggmanchaugagoggchaubunagoggamaug, Webster, Mass. Mrs. Honig accompanies him. Mr. Honig submits this lake name as a new talking machine name suggestion.

This Combination
TOTAL $13.00
Capacity 600-10" and 200-12" Records
On Approval—Freight Paid

A practical, inexpensive, convenient cabinet for dealers; made on the sectional principle, affording the following advantages:

It grows with your requirements: You first purchase just the number of sections you actually need for your present requirements; as you need more space, add more sections.

Adapted to any space: As many sections as desired may be placed in a stack; as many stacks may be used side by side as wall space will permit.

Neat in appearance: No empty shelves; no overcrowding. Case always complete, yet always capable of additional expansion.

Carefully made and beautifully finished in plain oak, golden finish. Metal strips for partitions, with label holder under each compartment; eight compartments in each section.

Made in two sizes; to hold 10-inch and 12-inch records. Each section holds 200 records (100 Edison records.) Stack may be made up with all sections of the same size; or sections for 10-inch records may be used above sections for 12-inch records by means of a reducing section as shown in accompanying illustration.

Price per section for 10-inch records $1.75

Price per section for 12-inch records $2.25

10-inch top section, $1.50; base, $1.75
12-inch top section, $2.00; base, $2.25

Reducing section, for use when 10-inch and 12-inch sections are used in same stack, $1.75.

Cases shipped on approval; on orders amounting to $10.00 and over we pay freight to all points East of Montana, Wyoming, Colorado and New Mexico. To points in and West of these states, we equalize freight charges.

Send for our new illustrated circular, No. 60.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., August 6.—The talking machine business in Philadelphia during July was everything that the dealers could hope for, so far as the public is concerned, and nearly everything they had hoped for from the manufacturers, who were not able to keep the trade properly supplied and yet they did better than during some of the previous months of the year. Whether it was the Victor, the Columbia or the Edison dealers, all of them report that their business has been only limited by the amount of stock they were able to secure in the way of machines, but in records most of them had little about which they could complain. They are beginning to understand the trade and are sending in their orders for records in such a way that many of the big firms here have been able to supply the demand almost to the extent of 100 per cent.

Death of John B. Miller

Death has entered the ranks of the prominent local talking machine dealers in the passing away of John Bremer Miller on Sunday, July 30 at 6.30 p. m. Mr. Miller had been treasurer of the Penn Phonograph Co. for a number of years, and was one of the best known and best liked of the men in the local trade. The wide esteem in which he was held was shown in the many messages of regret received by the company and by the large attendance at his funeral.

Mr. Miller had not been in the best of health for some time and concluded on taking an automobile trip through New England, accompanied by Mrs. Miller. They were on their homeward trip when he was taken with a chill while riding near New London, Conn., towards evening. He was feeling better the following morning and decided to resume the journey home in his machine. He was extremely ill all the way until this city was reached on Saturday last, when a consultation of physicians was held at his home, and the doctors pronounced him critically ill and advised that he be removed at once to a hospital. This was done but he only survived until Sunday. Mr. Miller was buried from his home, 705 Kenilworth avenue, Oak Lane, on Wednesday afternoon at 3 o'clock, and is survived by Mrs. Miller.

Mr. Miller began his business career when a young man, by connecting himself with the William H. Horstmann Co., now at Fifth and Cherry streets. Later he was connected with the firm of Partridge & Richardson, department store, at Eighth & Chestnut streets, where he was in charge of the wholesale department. After that he went into business for himself at 1004 Market street. He closed out his interest in that business in 1898, when the Penn Phonograph Co. was established, and became treasurer of that company, a position he has held ever since.

Mr. Miller was fifty-three years of age, and a prominent member of the Rotary Club, the Manufacturers' Club, the Odd Fellows and also the Masonic Fraternity. He took an active interest in the Lutheran Church at Oak Lane. Among those who attended the funeral were F. K. Dolbeer, George D. Ornstein, H. C. Brown and W. B. Fulghun, representing the Victor Co., and the local jobbers were well represented as well as a number of out-of-town retailers.

As the Penn Phonograph Co. is a stock company, Mr. Miller's death will cause no change in the firm. H. F. Miller, the secretary of the company, who was no relative of the deceased, was absent on an automobile trip at the time of the death. He left this city on Saturday, July 29, and as he left no direct address at which he could be reached, he did not hear of his partner's death until after the funeral, as the firm was unable to locate him.

Report an Active Business

The Penn Co. report that its business was most excellent in July and that the increase was simply remarkable. This concern is experiencing the same difficulty in getting machines that it had for several months past and has been unable to accumulate any stock whatever for its fall trade, machines going out as fast as they are being received.

Vacations Under Way with Blake & Burkhart

Blake & Burkhart, the most prominent firm handling the Edison machine in this city, report that their business in July has been quite satisfactory for that month. They have been able to fill up their stock of records in very good shape, and machines have also been coming through in a satisfactory way. Herbert E. Blake is away on his vacation at the present time, which he is spending in taking automobile trips to every section from his country home near Llanareh, Pa. G. G. Blake, Jr., one of the salesmen, is also away on his vacation. which he is spending at Buffalo, N. Y. Irvin H. Burkhart will leave for a two weeks' stay at Ocean City, Md., on Monday of next week.

A. H. Bates Takes Charge

A. H. Bates has been made the head of the talking machine department at the Wanamaker store. He is a very efficient man and they are planning big things for the coming season.

Buehn Doubles Last Year's Business

The Louis Buehn Co. reports that it has doubled last year's business for July and a very large percentage of this increase was in the record department. Mr. Buehn says "the sale of records with us has kept up wonderfully well. Records and machines are coming in in a fairly decent way, and in a sufficient quantity. We have unfilled orders now for a large number of machines, and we hope to be able to meet all demands that may be made upon us. Everything points to the best season we have ever had."

Phenomenal Columbia Business

Manager Eckhardt, of the Pennsylvania Talking Machine Co., reports that the company's business has been phenomenal, and that it is not a case of business itself, but a case of merchandise. July showed the average percentage of increase of previous months, and on August the first the firm had back orders and unfilled orders the largest in its history.

Mr. Eckhardt had hoped to remain away during the entire month of July, but he has decided to merely spend as much time as possible with his family at the Marlborough-Blenheim, Atlantic City, and go back and forward from his office several times a week. He says his firm is, for the first time in a great many months, in receipt of shipments of the fifteen, twenty-five and thirty-five dollar machines, and that it is a real pleasure to renew their acquaintance with this particular type.

18 Years of Service is back of every Penn Shipment of Victor Victrolas

"We know how to do it"

PENN PHONOGRAPH CO.
PHILADELPHIA

INCREASE UNIT CO. FACTORY FORCE

PHILADELPHIA, PA., August 8.—So brisk is business with the Unit Construction Co., Thirty-first and Chestnut streets, this city, makers of Unico booths, that a doubling of the force was necessary, and the plant is working day and night.

A number of big deals were recently closed, involving thousands of dollars, for special installations, while the smaller orders comprising one or more separate booths have practically trebled.

Inasmuch as the Unit Construction Co. makes a specialty of prompt shipments, it is obliged to carry a tremendous amount of stock on hand, this service being rendered without charge to any dealer.

CARING FOR SOLDIERS' FAMILIES

CAMDEN, N. J., July 31.—The Victor Talking Machine Co., which has a number of employes away at the front with the army, is looking after the dependents of those men, and will continue to do so as long as they are away in the service. In addition to giving the men full salaries while they are away, arrangements have been made to see that the families of the men are not in want. The Victor Co. is co-operating with a special committee appointed by the City Council in this work.

A new structure to be known as the Edison Building, is rapidly nearing completion on South Salina street, Syracuse, N. Y. It will be occupied by Frank E. Bolway & Son, distributors of the Edison Diamond Disc phonograph, as soon as it is finished.

DEEP STUFF is subway building. The engineers puzzle over plans and blueprints for many moons before the work is completed. But at last it is BUILT.

Service is never BUILT. No matter if Buehn Victor Service is the best today, we want it the best TOMORROW, and the next day. It is this "keeping everlastingly at it" policy that WINS.

What you want is DELIVERIES. You want your record business to be PROFITABLE. You want goods when you want them, today, tomorrow and the next day. Quick service followed by a big rest is a flash in the pan.

Buehn Service delivers. It delivers consistently, quietly, and permanently. It is the kind of service that successful dealers must have in order to be successful.

READY FOR FALL RUSH IN BALTIMORE

Talking Machine Dealers of That City Prepared to Handle Unusual Volume of Business During Coming Months—New Dealers Enter the Field—Warm Weather Business Good

BALTIMORE, MD., August 4.—Baltimore dealers are preparing to handle a big fall rush. Almost all of them are stocking their stores as fast as they can. The retailers, with but few exceptions, report that they are doing excellent business considering the fact that a great many people are out of the city. Record business also is holding up well.

The Victrola department recently opened by the Mann Piano Co., of which Charles R. Stram is manager, is making excellent progress. Mr. Mann has just had a large sign placed in front of his store and this attracts a great deal of attention.

The talking machine department of the Hub, a large department store, has been removed from the main building to Charles and Fayette street, the house formerly occupied by the Sanders & Stayman Co. The firm handles the Edison and Columbia lines. The building has been greatly improved and is one of the finest in this section. The department is in conjunction with a new piano department just opened. There are six booths on the first floor and the entire interior is finished in white. W. E. Collins is in charge of the talking machine department. C. B. Noon is head of the new store.

Failure to secure sufficient machines to meet the demand is still the complaint coming from the distributors. Most of the Victor dealers are hard after the distributors in their efforts to get their stock well up. The distributors are doing all they can to accommodate them, but they are having a trying time.

A. J. Heath, in charge of the Columbia headquarters here, is overjoyed the way business keeps up. "It is truly wonderful," he said, "and things are just going great with us. Prospects were never better. The dealers continue to stock up and are taking all of the goods they can get their hands on. All appear to be sure that the coming fall is going to be a record breaker and they want to have all the ammunition in their line. In other words, the preparedness in the air has spread to the business world."

Jesse Rosenstein, the Pathé distributor, announces that he has just signed up the Rominger Furniture Co., Winston-Salem, N. C., and Amberg & Jordan, Inc., 406 to 408 North Eutaw street, one of the large furniture houses of Baltimore. Mr. Rosenstein expects to announce some additional distributors very shortly. He reports business very good.

The shortage of machines is still handicapping H. R. Eisenbrandt Sons, Inc., Victor distributors. Henry Eisenbrandt, who has charge of the Victrola department, says that he would have no trouble whatever in disposing of far more machines than he is able to get possession of. The same shortage is reported by Cohen & Hughes, also local distributors of the Victor line.

The higher priced machines are having the call with E. F. Droop & Sons Co., also distributors of the Victor Co. machines and records. W. C. Roberts, manager of this house, is away on his vacation at present. The same old shortage is reported.

Although the weather is very warm the sales of the Aeolian-Vocalion, which is handled in this section by the Sanders & Stayman Co., holds up well. W. B. Turlington, manager of the house, says no complaint whatever can be made upon the way the machines are selling. The demand in this line also runs toward the higher prices. The house also handles the Victor and Columbia machines.

L. K. Scott, formerly with the Reid & Hughes Co., of Waterbury, Conn., is the new manager of the Victrola department of Stewart & Co., one of the largest department stores in the city. Mr. Scott, who recently came to this city, is much pleased with the outlook. He has started to make plans for the Fall rush and is getting in a good supply of machines. Mr. Scott has added E. M. Ogilvie, formerly with the Sonora Co., in New York, to his present sales force. A live campaign is planned.

Preparations for the fall trade with the Victrola department of William Knabe & Co., which is now under the management of Henry T. Kennedy, who has taken the place of Milton Boucher, promoted to the piano department.

TELEPHONES ORDERS FROM COAST

SAN FRANCISCO, CAL., August 3.—The Stern Talking Machine Corp., 1085 Market street, Pacific Coast distributors of Rex phonographs and records, has been closing a large business. A few weeks ago Frederick Stern, president of the company, decided to call up the Rex plant at Wilmington, Del., on the long distance telephone in order to arrange for additional shipments of machines and records. He ordered two carloads of merchandise for shipment this month, and also inquired regarding another carload which had been somewhat delayed in transit. This telephone call from the Coast to the East is a fair indication of the Stern Co.'s energetic sales policies.

PLAUT-CADDEN CO. RECITALS

NORWICH, CONN., August 8.—The Plaut-Cadden Co., of this city, Victor dealers, have been receiving considerable notice in the local newspapers by reason of the success they have achieved with Victor recitals. This company has made a specialty of giving informal concerts at frequent intervals, and aside from the increased sales which this publicity has produced, these recitals have served to make the Plaut-Cadden store a Mecca for local music lovers.

Eugene Krone has opened a new and exclusive Diamond Disc store in Bryan, O.

150 NEW DEALERS IN THREE MONTHS

G. Sommers & Co., St. Paul, Minn., Win Quick Success as Jobbers of the Pathé Phonographs Throughout Northwestern Territory

ST. PAUL, MINN., August 1.—C. E. Gore, traveling representative for the Pathé Frères Phonograph Co., New York, left this city this week after spending three weeks with G. Sommers & Co., Pathé distributors for this territory. Mr. Gore's time was well-spent in this city, as he assisted G. Sommers & Co. in putting their stock in shape, and also gave them valuable help in organizing the efficient sales staff which is now visiting the trade.

C. E. Gore

G. Sommers & Co. have only been Pathé distributors since the first of May, but in this very short time have signed up 150 dealers to handle the Pathé line. Their territory reaches out to Spokane, covering the Northwest to that city, and fifteen salesmen are spending all their time co-operating with the company's Pathé dealers in this section.

Before leaving St. Paul, G. Sommers & Co. gave Mr. Gore an order aggregating $125,000 worth of Pathephones and Pathé discs, and according to their present plans and the aggressiveness of their sales campaign, they will sell $500,000 worth of Pathé goods before the first of the year. L. T. Ware, who is in charge of this division of the Sommers business, is a keen and aggressive merchandising expert, and his enthusiasm regarding the possibilities of the Pathé line is based on years of experience and judgment which are reflected in the success his company has already achieved in the Pathé goods.

Mr. Gore's destination after leaving St. Paul is Memphis, Tenn., where he will render similar co-operation to the Armstrong Furniture Co., which only recently arranged to handle the Pathé line as distributors. Mr. Gore is thoroughly versed in all phases of the talking machine industry, and the practicability of his suggestions is evidenced in the splendid sales totals of the Pathé distributors with whom he has worked.

INCREASING ITS FACTORY CAPACITY

ST. LOUIS, MO., August 5.—J. P. Fitzgerald, president of the Mozart Talking Machine Co., states that the company's sales totals this summer have far exceeded all expectations, and as a matter of fact, business the past month or two has resembled the fall and winter season's activities. The company is steadily increasing its factory capacity to cope with its increased business.

SALES POINTERS OF VALUE

Bearing on Victor Records and Their Use Sent Out by V. W. Moody, of Neal, Clark & Neal, Buffalo—Offers Some Interesting Facts

BUFFALO, N. Y., August 7.—V. W. Moody, manager of Neal, Clark & Neal, Victor distributors, has just sent out to the company's dealers for general distribution a selected list of Victor records for the convenience of those who have not had an opportunity to study the complete Victor catalog.

On the last page Mr. Moody asks a number of pertinent questions, under the heading "Do You Know:" "That your Victrola should operate at a speed of seventy-six revolutions per minute? That the governor 'friction pads' must be oiled monthly? That the sound box gaskets must be live rubber? That your Victrola must not vary in speed the slightest? That in a high soprano note there are 3,000 vibrations per second? That if your motor drags for one-half of 60/76 of a second that 1,500 of these soprano vibrations will be flat? That your reproducing point (needle) travels over approximately 100 yards of reproducing surface with each twelve-inch record played?"

OUTING OF TALKING MACHINE MEN

Talking Machine Dealers' Association of Buffalo to Hold Annual Picnic This Month

BUFFALO, N. Y., August 1.—The Talking Machine Dealers' Association of Buffalo, one of the most influential organizations of its kind in the country, is completing arrangements for the annual outing to be held late in August. Present plans point toward the affair being staged at Crystal Beach, a lake resort on the Canadian shore. F. E. Bruehl, of the Neal, Clark & Neal Victrola department is the chief spirit working toward the success of the big event.

ENJOY HARRY LAUDER'S RECORD

At a dinner given last month by the Chamber of Commerce, of Odgensburg, N. Y., the members and guests, among whom was Chas. M. Tait, of Gouverneur, N. Y., had the pleasure of listening to a telephone conversation between Ogdensburg and San Francisco. One of the interesting features of the program was hearing Harry Lauder's Victor record, "I Love a Lassie," played on a Victrola in San Francisco. Mr. Tait states that every word was astonishingly clear and distinct, and that Harry Lauder's Scotch "burr" was as distinct as though the Victrola was in the very room in which they were sitting. The program closed with "The Star-Spangled Banner" played on the Victrola.

R. E. Babylon has purchased an interest in the Dillon Bros. talking machine factory at Piqua, O., which will be enlarged by the addition of a new building and the installation of new machinery.

UDELL

Cabinets

For Records

play a leading part in the sale of a talking machine outfit. This is true because a machine and a library of records *without* a Udell Record Cabinet are *not* complete.

Put it up to your customer and ask him where he is going to file his records. Of course, people buy what they see—so have several in your store. You not only get the profit on the cabinet but you are making a better record buyer. The importance of that cannot be overstated. A better record buyer because he takes some pride in the care and filing of his records. He knows just what he has because of the system used in filing.

The large capacity of a *Udell Record Cabinet* makes a consumer want to fill it up.

Yes, it's a mighty good proposition for *you* to push *Udell* cabinets.

You can get pictures and prices by writing to

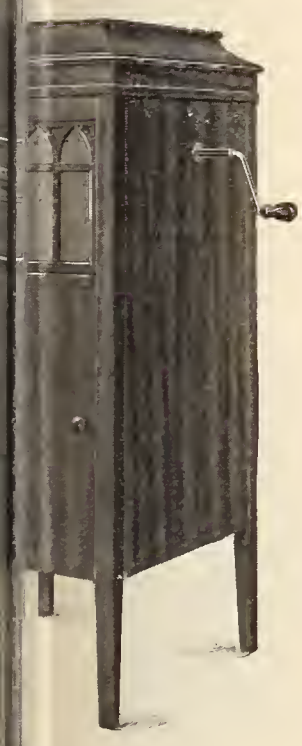
e Offer This Newest Service o Our Dealers - - - The Full Line of Pathéphones and Pathé Disc Records



Concerning Pathé Quality

WE have chosen Pathé products because they have an international reputation; because they are reliable; because dealers can sell them with the knowledge that customers will stay satisfied.

We chose the Pathephone because it has a "Violin" Sound Chamber of resonant wood that adds warmth and mellowness to tone. Because it plays with a polished Sapphire Ball that never has to be changed and never scratches records (like sharp metal needles).

We chose Pathé Discs because they reproduce more truly. Because they are more durable, showing no signs of wear after years of use. Because they are cheaper—**All** Pathé records from dance music to grand opera are double-disc. A single price pays for two selections. Because Pathé Discs reproduce not only the voices of singers who are enjoying triumphs in America, but also the voices of famous European artists who have never sung in this country. Finally, we chose Pathé Discs because the indications are becoming clearer and clearer daily that the public will demand Pathé records, no matter what make of machine they own.

Concerning Our Financial Service

WE are prepared to back up Pathé products and to stand behind our dealers with the strongest kind of service. We don't mean just merchandising service. Everybody is doing that now, more or less. We mean **Financial Service.**

We will cash your installment phonograph paper! We will let you buy new stock on the strength of your customer's promise to pay! This means that your business can grow from the start. You don't have to wait for the cash to come in.

If you are the kind that likes to grasp success more than to dream about it, you will ask our Phonograph Division **today** about our Financial service.

MILLION POUNDS OF SPRING STEEL

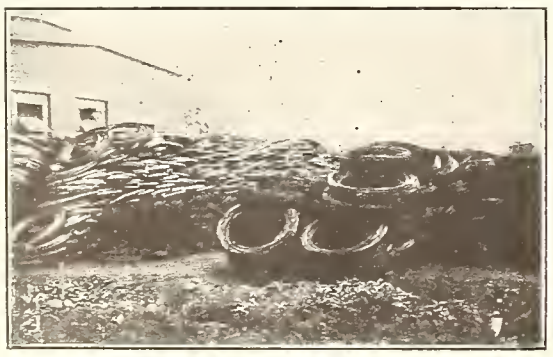
Enormous Supply of That Important Material for Talking Machine Motor Manufacture Now on Hand at Otto Heineman Co. Factory

Five hundred tons, one million pounds of spring steel, for use in the manufacturing of Heineman motors are now on hand, and are

A Small Portion of the Million Pounds

being utilized in the production of these well-known motors.

Even in ordinary times, this vast amount of spring steel would attract more than passing



One View of the Spring Steel

interest, but with the present condition of the steel market, and the extreme difficulty experienced by manufacturers in all lines to secure sufficient steel for their daily or weekly requirements, this amount of spring steel assumes imposing proportions.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., is a firm believer in the doctrine of "preparedness" as applied to commercial success, and as soon as he realized that raw materials were becoming scarcer day by day, made his plans accordingly, and instructed his purchasing agents to spare no efforts to secure an adequate supply of that all important factor in motor production—spring steel.

In pursuance of these instructions orders were placed aggregating considerably more than 500 tons, and although the price was far in advance of anything previously paid for spring steel, Mr. Heineman approved the orders so that his patrons might receive their motor shipments at the earliest possible moment regardless of the expense or inconveniences involved.

The first portion of this vast order was received some time ago, and shipments have been received daily, until at the present time there are one million pounds on hand. All of this steel is subjected to the severest possible tests, and only the very highest grade of product is O.K.'d for use in the Heineman motors.

As soon as this spring steel is approved by the Heineman factory experts it is put in work, and extreme care is taken that the steel stands up perfectly under every process. "Quality" is the keynote of the Heineman factory policy, and no matter how many motors are on order, Mr. Heineman does not permit the slightest deviation from the quality dictates which have guided his company in its remarkably successful career.

A faint idea of the tremendous volume of spring steel comprising one million pounds may be gleaned from the accompanying photographs, although these pictures show but a very small portion of the 500 tons. It is a tribute to the popularity of Heineman motors that even this vast amount of spring steel will suffice but a very short while, as the Otto Heinemann Co. has received some huge orders the last few months which will necessitate working the factory to capacity and overtime for a long time to come.

BELIEVES IN AN OUTDOOR LIFE

F. P. Oliver Snapped After Eighteen Holes of Golf With Francis Wilson

Fred P. Oliver, the active vice-president and general manager of the Blackman Talking Ma-

F. P. Oliver and Francis Wilson

chine Co., New York, Victor distributor, is a firm believer in the benefits to be derived from an active outdoor life. He is an ardent golfist and has even made his appearance on the "diamond" as a member of the Blackman Talking Machine Co.'s baseball nine. In the accompanying picture, Mr. Oliver "is taking it easy" with Francis Wilson, prominent theatrical star, at the latter's country home, "The Hill," at Lake Mahopac, N. Y. Messrs. Oliver and Wilson just finished eighteen holes when this photograph was snapped by J. N. Blackman, president of the Blackman Talking Machine Co., who was also spending a few days at Lake Mahopac.

BUILDING UP RECORD BUSINESS

Some Live Facts and Hints Offered by the Stewart Talking Machine Co., Indianapolis, to a Dealer Whose Record Sales Were Not What They Should Be—Excellent Suggestions

The Stewart Talking Machine Co., Indianapolis, Ind., Victor distributor, sent out a most interesting letter some time ago in response to a letter from a Victor dealer who had written that his record business was only 14 per cent. of his total. This letter, reading as follows, is well worth the careful attention of every talking machine dealer:

"Your recent letter has been considered with much interest, and we have spent a considerable length of time in looking up material for a complete answer. We find that your record orders for the last six months show an advance over previous accounts. You are to be congratulated on that. And you are not to be entirely held at fault because your record business is not greater. Yet it's certain that the record business should be much more than 14 per cent. of the total. They should equal the machine orders. You have done splendid work in placing Victrolas, but you have overlooked vast possibilities for enlarging your record business. We should have told you so sooner.

"At the present time it is possible to get from the Victor factory records in almost numberless quantities—a pleasant situation for you when machines are so hard to obtain. And it is equally as pleasant for us.

"There are several suggestions that might be followed toward the increase of your record business.
